State Capitol, Juneau, Alaska 99801-1182

MEMORANDUM

DATE: January 19, 2009

TO: Members of the Alaska State House of Representatives
Members of the Alaska State Senate

FROM: Representative Bill Stoltze, Co-Chairman
Representative Mike Hawker, Co-Chairman
House Finance Committee

RE: **Hearing Request Requirements for the House Finance Committee**

The House Finance Committee will consider bills for scheduling when the prime sponsor submits a hearing request with the following documents in an electronic format to my office:

- Memo requesting scheduling of the pending legislation;
- A sponsor statement describing the intent of the bill and how the intent will be achieved through the passage of the legislation;
- A sectional analysis for long or complex bills;
- A brief explanation of changes, if any, that have occurred between the original version of the bill and the version that is before the House Finance Committee for consideration;
- Appropriate and updated fiscal notes for the most recent version of the bill;
- Supplemental back-up documentation from agencies and organizations, including but not limited to, research and legal opinions;
- A list of expected witnesses to testify on the legislation; and
- Teleconference and off-net site requests.

All hearing requests should include the name and phone number of the staff member assigned to the legislation. Please submit the hearing request and above information to: House_Finance_Legislation@legis.state.ak.us.

All documents should be submitted as separate PDF documents, and not in one large PDF file. When the legislation is scheduled for a hearing, the documents will be posted to the House Finance Committee website, under the Division of Legislative Finance.

If the sponsor of a bill would like a blank committee substitute to be considered by the committee in lieu of the most recent version of the bill, it must be received in a hard copy at least 24 hours prior to the scheduled hearing.

Amendments

Only House Finance Committee members may offer amendments for consideration by the committee. Amendments by the sponsor should be submitted with 24 hours prior to the scheduled hearing. Also, if the amendments will have a fiscal impact on the legislation, it is suggested that updated fiscal notes from the departments affected should also be submitted. When possible, amendments should be drafted by Legislative Legal Services to ensure conformity and legality.

Requests to Waive Bills from Committee

A written request, submitted electronically, must be submitted with the following information:

- A sponsor statement;
- Appropriate (new or revised) fiscal notes for the most recent version of the bill; and
- A sectional analysis or explanation of the bill.

If approved for waiver, my office will issue a House Finance Committee memo. All House Finance Committee members must sign, agreeing to the waiver.

If you have any questions, please feel to contact Ben Mulligan, at 465-6541.

Thank you for your cooperation.

HOUSE FINANCE COMMITTEE RULES

TIME:

1:30 p.m. to 3:30 p.m. (longer if necessary)
Please notify the appropriate Co-Chairman if you must be absent from or leave during a meeting:

Rep. Stoltze-legislation/Capital Budget
Rep. Hawker-Operating/Supplemental Budgets

If possible let the Chairmen's offices know where you can be reached in case you are needed for a vote or to establish a quorum. Members must be present to vote on passage of a bill from committee and to sign committee reports.

If you are requesting an excused absence from the Call of the House, both Co-Chairmen must approve the absence from committee. Once approved by the Co-Chairmen, please bring a copy of the excused absence to Capitol 505.

COMMITTEE QUORUM AND VOTING RULES:

A quorum of the majority of the committee membership (**six** members) is necessary to vote or take any Committee action.

If fewer than eleven members are present, motions to amend may be adopted by a majority of those present, but under no conditions will the number of votes required for adoption of an amendment be less than **five**.

Members participating via teleconference may be considered for the purposes of establishing quorum.

CONFLICTS OF INTEREST/ABSTENTION FROM VOTING

It is not required to request to abstain from voting to report a bill from committee due to conflict of interest. However, if members would like to declare a conflict of interest and request to abstain from voting, they may.

AMENDMENTS:

When possible, amendments should be drafted by Legislative Legal Services to ensure conformity and legality. This will facilitate the transmittal of amended legislation.

All amendments to legislation **must** be turned into the appropriate Co-Chairman's office **24 hours prior** to a bill hearing in House Finance. This will be strictly enforced this year. We will hold bills over if amendments need to be done but are not submitted 24 hours ahead.

COMMITTEE REPORTS

Members must be present to sign the committee report. Please do not leave the room before signing. Staff is unable to track down members for their signature. A legal memo is attached concerning the signing of committee reports.

DRAFT HFC COMMITTEE SUBSITUTES

Only the Chairmen and their staff may request draft House Finance Committee Substitutes. Members may request blank committee substitutes or submit their requests as amendments.

TELECONFERENCE PARTICIPATION:

When necessary, members may participate via teleconference. They may vote on amendments and any other committee action. However, they may not vote to move a bill from committee. A member must be physically present to vote on the passage of a bill from committee. Attached is a memo from legal regarding teleconference participation.

NOTICE REQUIREMENTS:

Written notice of the time, place, and subject matter of all House Finance Committee meetings shall be given in accordance with Rule 23 of the Uniform Rules.

(1) Data from Platt's Oilgram Price Report, Wood McKenzie and Alaska Department of Revenue's prevailing value and tax return data. Historical nominal crude oil and natural gas prices can be found on the Tax Division's web site at: www.tax.alaska.gov/sourcesbook/OilGasPrices.pdf.

(2) Adjustment to "nominal" dollars is required to prepare the crude oil and natural gas price forecasts. Callan Associates Inc.'s inflation rate of 2.75% was used for FY 2008 and beyond. A summary of nominal crude oil and natural gas prices can be found in at the Tax Division's web site at: www.tax.alaska.gov/sourcesbook/OilGasPrices.pdf.

(3) Adjustment to "real 2007" dollars is useful to compare prices across time excluding inflation. These prices data are adjusted to real 2007 dollars based on inflation rates provided by the U.S. Department of Labor, Bureau of Labor Statistics. The data series used is the Consumer Price Index for all Urban Consumers (CPI-U) which can be found at: www.gls.gov/cpi/home.htm. A summary of real 2007 crude oil and natural gas prices can be found in at the Tax Division's web site at: www.tax.alaska.gov/sourcesbook/OilGasPrices.pdf.

[1] In FY 2008, the Department of Revenue made a change in the method by which it accounts for future revenues, as well as historical and future production and oil prices, from a cash basis to an accrual basis. This method change will better align fiscal year revenues with the state's financial reports and other publications. As a result, slight modifications have been made to historical production values and oil prices to accommodate this change.

[2] A summary of historical crude oil production can be found on the Tax Division's web site at: www.tax.alaska.gov/sourcesbook/AlaskaProduction.pdf.

[3] Includes NGLs from Central Gas Facility shipped to TAPS.

[4] Aurora, Borealis, Midnight Sun, Orion and Polaris.

[5] Lisburne, Niakuk, North Prudhoe Bay State, Point McIntyre, Raven, West Beach and West Niakuk.

[6] Meltwater, Tabasco, Tarn and West Sak.

[7] Includes Sag River and Schrader Bluff.

[8] Includes Badami, Eider and Sag Delta.

[9] Includes Alpine-West and Qannik.

[10] Fiord, Fiord-Kuparuk and Fiord West.

[11] Nanuq and Nanuq-Kuparuk.

[12] Known Offshore includes Nikaitchuq and Oooguruk.

[13] Includes Outer Continental Shelf (OCS) production.

FALL 2008

Figure 7-8. Constitutional Budget Reserve Fund Cash Flows, FY 2008 and Forecasted FY 2009-2010 ($ million)

	History	Forecast	
	FY 2008	FY 2009	FY 2010
Beginning Cash Balance CBRF	2,548.4	5,601.2	7,138.3
Beginning Main Account Balance	1,980.7	1,134.0	2,237.0
Earnings on Main Account Balance [1]	140.4	83.0	103.4
Petroleum Tax, Royalty Settlements [2]	438.3	20.0	20.0
Repayment to CBRF (prior year) [3]	74.6	0.0	0.0
(Loan to GF)/Repayment to CBRF (current year) [3]	(1,500.0)	1,000.0	0.0
Ending Main Account Balance	**1,134.0**	**2,237.0**	**2,360.4**
Beginning Special Subaccount Balance	567.7	4,467.2	4,901.3
Earnings on Special Subaccount Balance [1]	(200.5)	(129.7)	391.4
Repayment to Special Subaccount [3]	4,100.0	563.8	146.4
Ending Special Subaccount Balance	**4,467.2**	**4,901.3**	**5,439.1**
Total CBRF Balance	**5,601.2**	**7,138.3**	**7,799.5**

[1] The earnings estimate for the main account is 4.526% and the earnings estimate for the special subaccount is 7.609%. These projections are based on 2008 Callan's capital market assumptions and Department of Revenue, Treasury Division's asset allocation.

[2] Settlement estimates are provided by the Department of Revenue and Department of Law, net of annual Federal Minerals Management Service payments.

[3] Repayment from the General Fund to the CBRF is indicated by a positive dollar amount; Loan from the CBRF to the General Fund is indicated by a negative dollar amount.

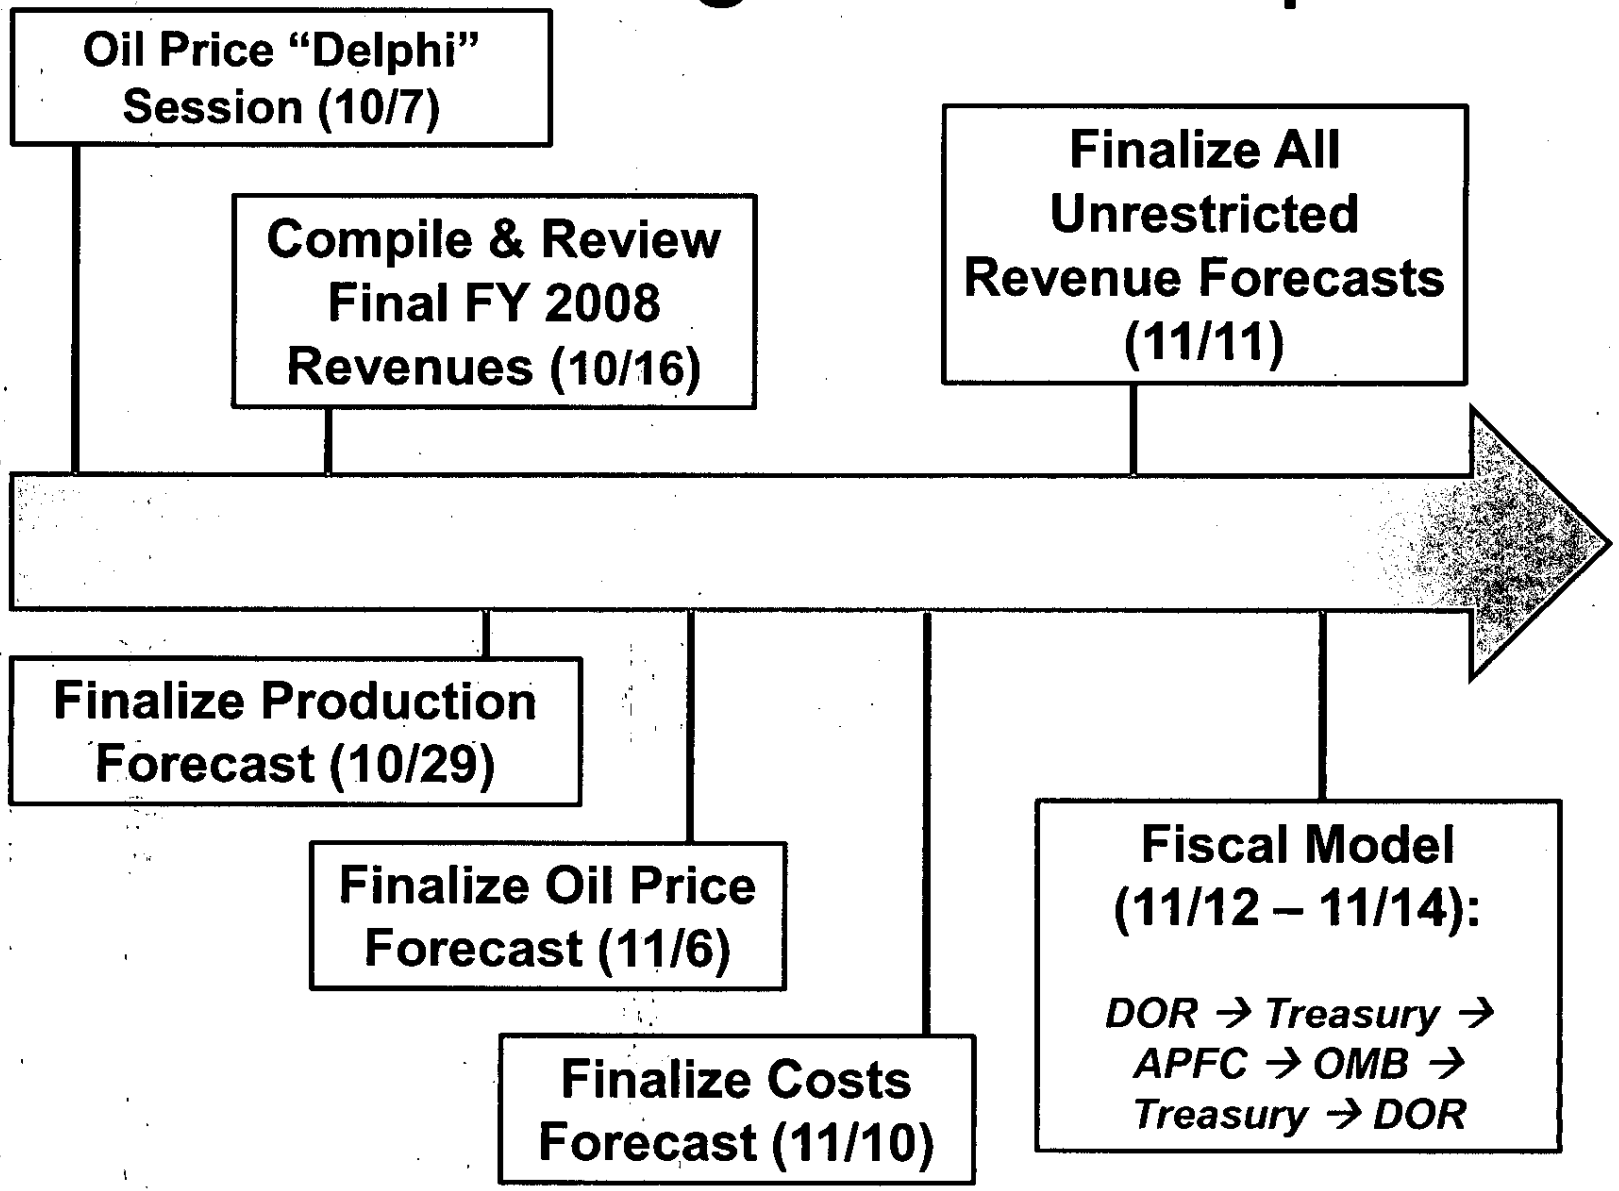
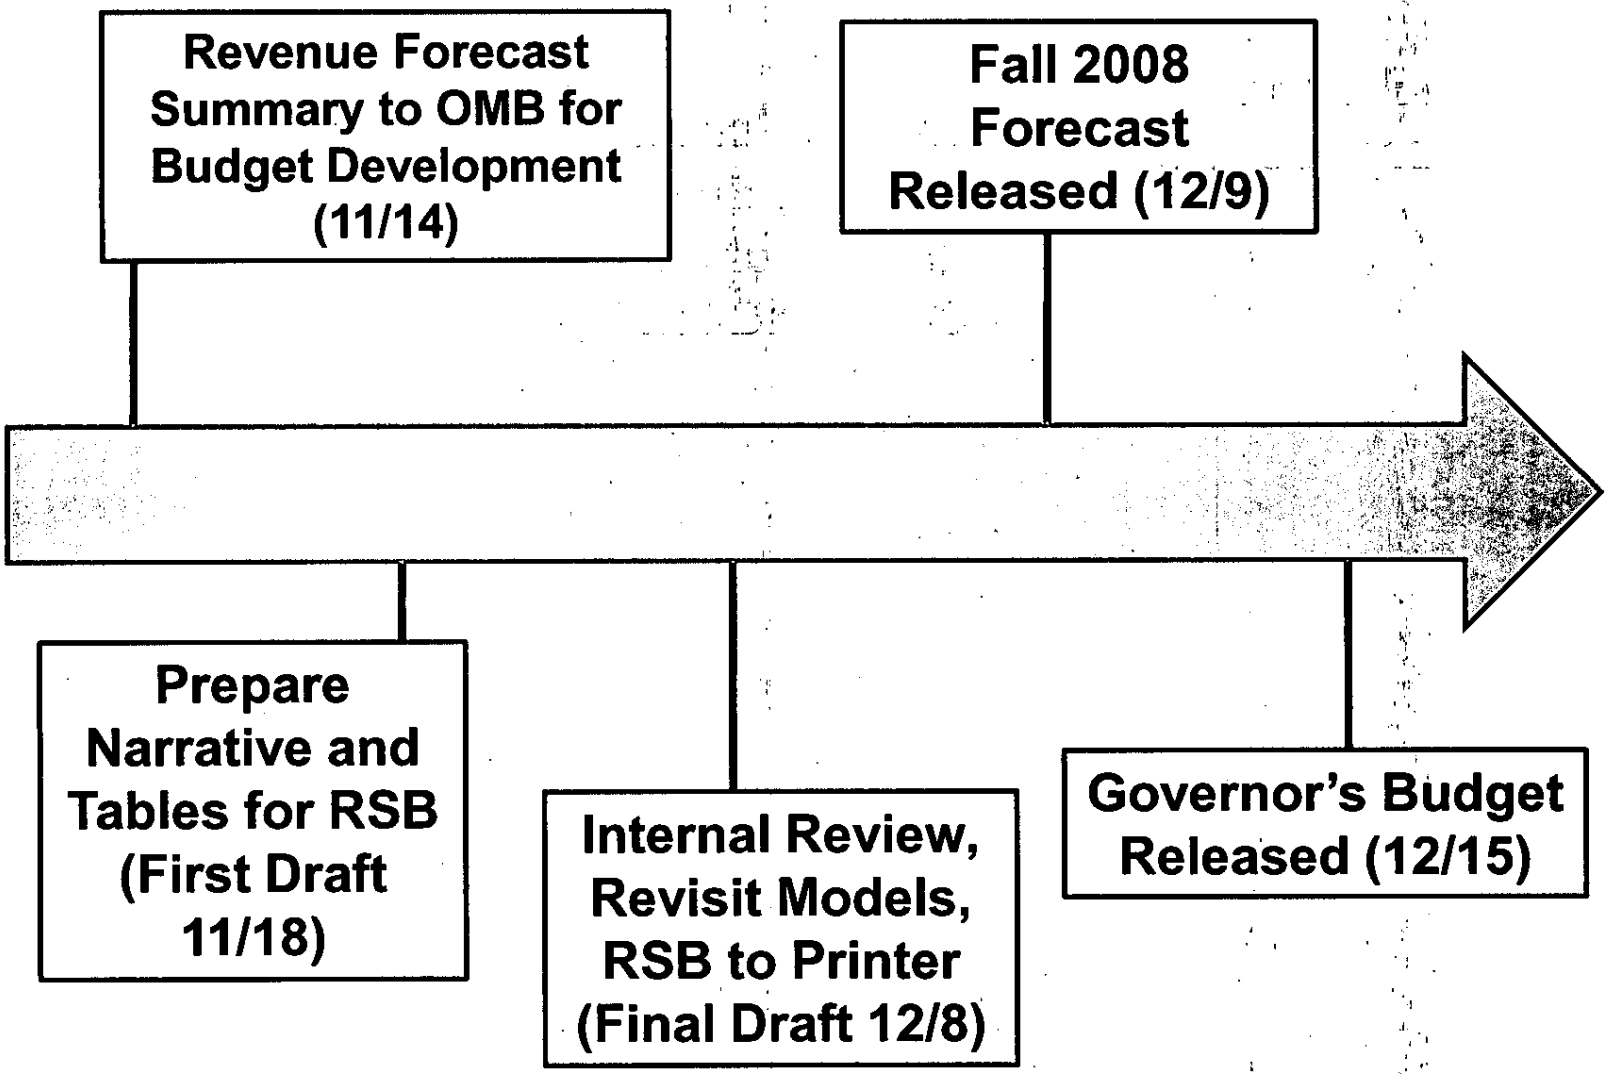
The Forecasting Timeline – part I



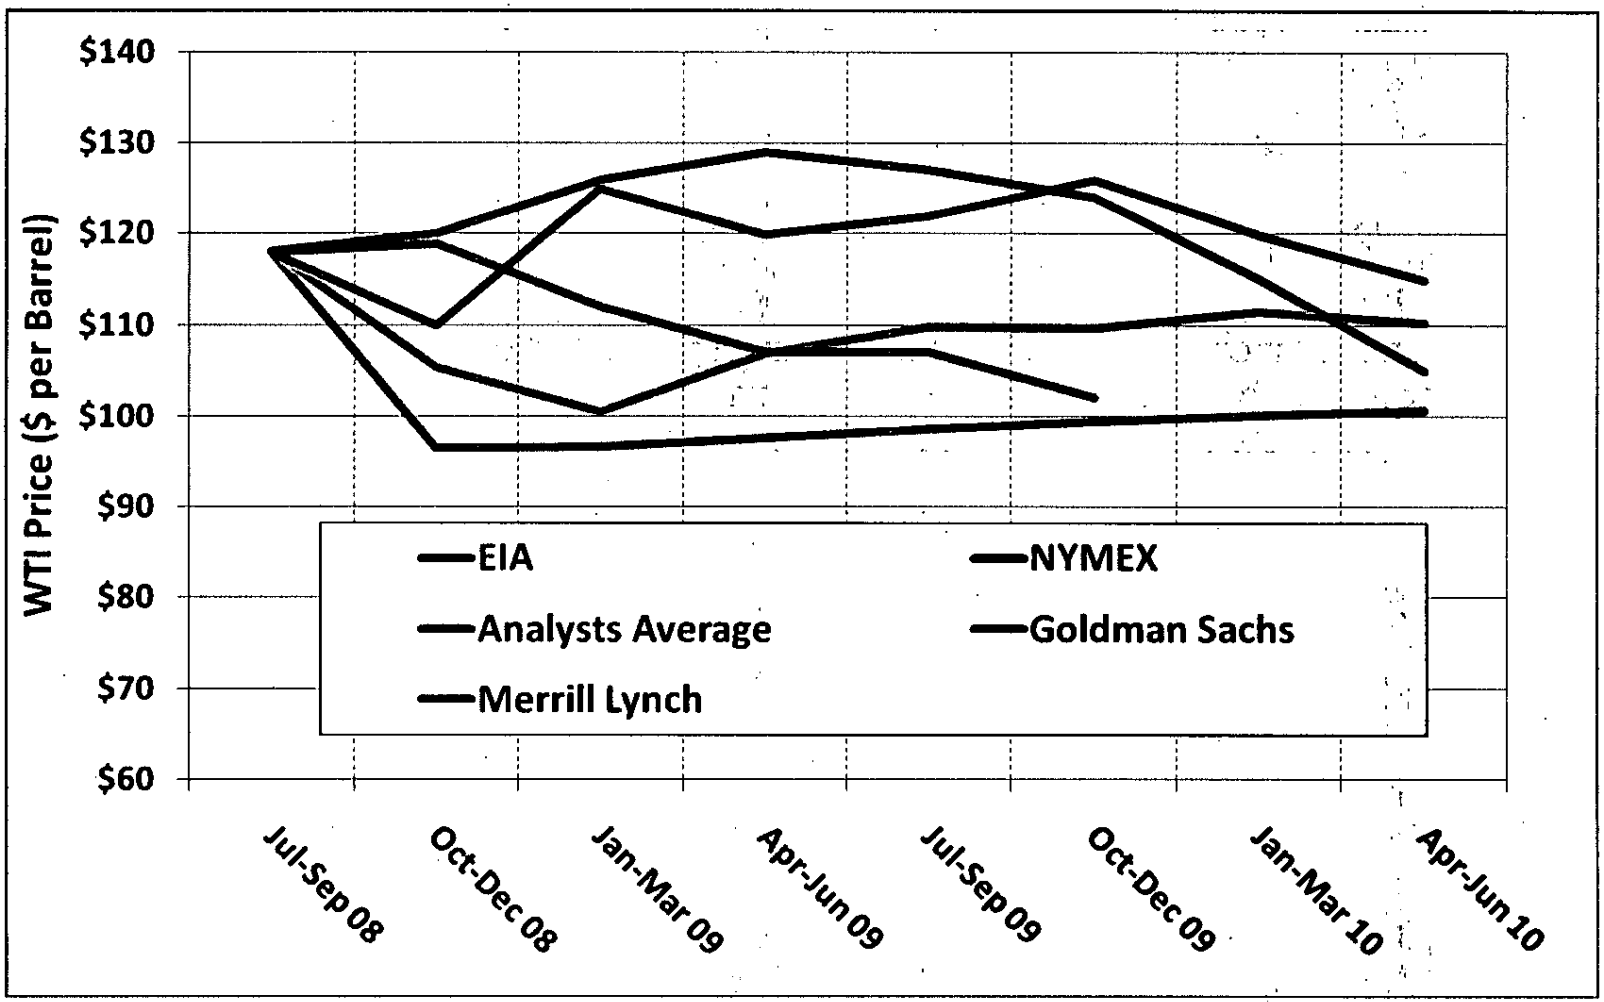
The Forecasting Timeline – part II



The "Delphi" Session

- **Modified "Delphi" technique**
- **Oct 7, 2008: Prices averaging $92.85**
- **Expanded Invitee List: 50 Invitees, 29 Participants from DOR, DNR, DOL, OMB, University, Legislative Finance, Legislature, outside participants**
- **Presentations: Fundamentals (supply & demand), geopolitics, financial markets, analyst expectations, etc.**
- **28 forecasts received; Delphi forecast is the "median" forecast of the participants**

Price Forecasts Available At Delphi



Sources: Bloomberg, New York Mercantile Exchange, Energy Information Agency
Note: Only Analyst Average, EIA and NYMEX were presented at Delphi. Merrill Lynch and Goldman Sachs were included in Analyst Average.

FY 2009 Total Revenue

	$ Millions
Unrestricted Revenue	
Oil Revenue	6,051.4
Other Revenue (except Federal & Investment)	484.1
Investment Earnings	215.9
Subtotal Unrestricted	6,751.4
Restricted Revenue	
Oil Revenue	759.8
Other Revenue (except Federal & Investment)	634.4
Investment Earnings	2,799.7
Federal Revenue	2,523.4
Subtotal Restricted	6,717.4
Total Revenue	13,468.8

Source: Fall 2008 Revenue Sources Book, Page 6

Restricted vs. Unrestricted Revenues

- **All revenue is classified as either "Restricted" or "Unrestricted"**
- **All amounts in the presentation are Unrestricted Revenue only.**
- **Restricted = Use of this revenue is restricted by constitution, state or federal law, trust or debt restrictions, or customary practice.**
- **Unrestricted = Revenue available for general appropriation. This is the amount typically discussed in budget context.**

Sources of Unrestricted Revenue

- **Oil – Property tax, Corporate Income Tax, Production Tax (ACES), Royalties.**
  - ***Oil will make up 89% of unrestricted revenue in FY 2009***
- **Investment Earnings – On General Fund**
- **Other Non-Oil – Taxes, Charges for Services, Fines and Forfeitures, Licenses and Permits, Rents and Royalties, Miscellaneous**

FY 2009 Revenue Overview
(General Fund Unrestricted Revenue)

	$ Millions	Share of Total
Royalty - Net PF / SF	1,755.1	26.0%
Production Tax	3,588.8	53.2%
Corp Income Tax	635.0	9.4%

Costs/Investment	4677.00	4526.00	*-3.2%*

Note: Revenues and Costs are in $ Millions

Source: Spring 2008 Forecast and Fall 2008 Revenue Sources Book

Conclusions

- Record level oil price volatility
- Price forecast in "ballpark" when issued
- Minimum production level changes from previous forecast
- Lower prices likely to impact future costs and possibly investment

Historical Production and Price Changes as of Fall 2008

Change in Revenue Forecasting from "cash basis" to "accrual" accounting

- Timing Issue: Production, prices, and revenue received in July for June production changed from June to July
- Necessary due to significant monthly variation in oil revenues
- Shift in fiscal year affected historical production and price, not revenue
- Greater accuracy in reporting
- Alignment with state financial documents

Change to RSB Figure 7-6

December 9, 2008

The Honorable Sarah Palin, Governor of Alaska
P.O. Box 110001
Juneau, Alaska 99811-0001

Dear Governor Palin:

This letter accompanies the Department of Revenue's Fall 2008 *Revenue Sources Book* (RSB). The RSB is a resource document presented to you, the Alaska Legislature, and the Alaska public that includes an accounting of state revenues received in Fiscal Year 2008 and projections for FY 2009 through FY 2018.

This *Revenue Sources Book* includes the four components of restricted and unrestricted oil revenue, as well as non-oil and other revenue sources. To celebrate Alaska's 50th anniversary, we have also included a special chapter on Alaska's revenue history, titled "Fifty Years of Revenue." This publication is the end product of a collaborative effort between Department of Revenue Tax Division and Treasury, the Permanent Fund Corporation, and the Office of Management and Budget.

Fiscal Year 2009 may be one for the record books when it comes to oil price volatility. Alaska North Slope (ANS) crude oil prices started out the year at close to $133 per barrel, but dropped precipitously down to less than $50 per barrel in November, a 63% decrease in only four months. We forecast ANS prices to level off for the remainder of the fiscal year in the $62 per barrel range, closing out the fiscal year at $77.66 per barrel when all twelve months are averaged. For FY 2010, we project an average price over the entire year of $74.41.

Our medium term outlook calls for increased stability in oil prices, with FY 2011 and FY 2012 at $71.65 and $72.57, respectively, and in the mid-$70 range through FY 2015. Our long term ANS crude oil price forecast for FY 2016 and beyond did not change from our Spring 2008 forecast price of $78.51, increasing at the projected rate of inflation. This price forecast assumes that the financial crisis experienced in the U.S. is relatively short-lived, and the economy returns to a more stable state within one to two years.

Production of ANS crude oil is expected to finish out FY 2009 averaging about 689,000 barrels per day, a 3.8% decline from FY 2008. For FY 2010, we forecast production to decline to 665,000 barrels per day, 3.5% lower than the previous year. At least part of the decrease in volume is due to company plans that call for significant facility and pipeline downtime in the summer of 2009, reducing production.

The steeper production decline from existing fields is expected to be offset by production coming from new fields. It is anticipated that Nikaitchuq will produce its first crude oil in FY 2010. Ongoing development at the new Oooguruk field will continue to add production. New development is also expected in the Colville River Unit (Alpine) and exploration is ongoing in the National Petroleum Reserve-Alaska (NPR-A).

Total unrestricted revenue in FY 2009 is forecast to be $6,751.4 million, of which 90% is attributable to oil production. In FY 2010, we are forecasting total unrestricted revenue to be $5,275.4 million, of which 88% is attributable to oil. Non-oil sources will contribute $700 million and $648 million of those unrestricted totals, respectively.

It is possible that the state will receive a Trans Alaska Pipeline System (TAPS) tariff settlement during FY 2009 in the amount of approximately $175 million. Any payment made pursuant to this settlement will likely be deposited in the Constitutional Budget Reserve Fund (CBRF). Due to the uncertainty of the timing of this payment, we have not incorporated this revenue source into this publication.

We hope you find the information provided in the Fall 2008 *Revenue Sources Book* to be useful. Our next forecast for FY 2009 and FY 2010 will be provided in the Spring of 2009.

Sincerely,

Patrick Galvin
Commissioner

In Memoriam

Brian Andrews

Brian Andrews and his son Brandon were lost August 9, 2008 while returning from Young's Lake on Admiralty Island in Brian's floatplane. In spite of extensive air, water and ground searches of the area, no sign of Brian, Brandon or the plane has been found.

Brian Andrews was appointed Deputy Commissioner on January 10th, 2007. Brian had more than 30 years of private and governmental financial investment and management experience in Alaska. His experience included management positions in banking, credit union and broker-dealer industries. Brian worked as Branch Manager or Assistant Manager at Merrill Lynch and then Smith Barney. Prior to that, he spent ten years working for the Department of Revenue in positions including Comptroller, Debt Manager, and Deputy Commissioner for Treasury.

Brian was a 48 year resident of Alaska. Over those 48 years he lived in ten different Alaskan communities. He appreciated and understood the diversity and "spirit" of Alaska.

Brian received his BBA from Colorado State University in 1974. He furthered his education with public administration graduate level course work through the University of Alaska. He achieved the Certified Investment Management Analyst (CIMA) designation in 2005. Brian held the series 3, 7 and 8 SEC licenses, the NASD series 63 and 65 licenses and was a licensed insurance agent with the State of Alaska.

Brian was a board member of Wildflower Court, a non-profit organization dedicated to senior citizen care. Brian was an involved member of various civic and club organizations in Juneau. Brian is survived by his wife Joyce, another son, and a daughter.

Brian's great sense of humor, positive attitude, and dedication will be missed by all.

Revenue Sources Book

Alaska Department of Revenue – Tax Division

FALL 2008

1. **Introduction** 1

2. **Executive Summary** 3

3. **Fifty Years of Revenue** 17

   A historical look at the state's revenue sources.

4. **Oil Revenue** 39

   In FY 2009, oil revenues are projected to contribute 90% of the state's General Purpose Unrestricted Revenue. Oil revenues will continue to play a key role in Alaska's future.

5. **Other Revenue (except Federal & Investment)** 61

   Revenue from non-oil sources includes non-oil taxes, charges for services, fines and forfeitures, licenses and permits, rents and royalties and other revenue sources.

6. **Federal Revenue** 75

   Federal funding accounted for 14.5% of the state's total revenue in FY 2008.

7. **Investment Revenue** 79

   Investment earnings come from the Alaska Permanent Fund, Constitutional Budget Reserve Fund, General Fund and other state investments.

8. **State Endowment Funds** 87

   Alaska has six endowment funds including the Alaska Permanent Fund, Mental Health Trust, Public School Trust, Alaska Children's Trust, Power Cost Equalization Endowment and the University of Alaska Endowment.

9. **Public Corporations & the University of Alaska** 91

   Seven public corporations and the University of Alaska are treated as separate component units of state government for financial reporting purposes.

10. **Appendices** 99

    The appendices provide 10 years of historical data and 10 years of forecast data on oil revenue, prices and production.

1. Introduction

General Discussion

The purpose of the semi-annual Revenue Sources Book is to provide the governor, legislature and citizens of the state a summary of our past collections of state revenue and a forecast of future revenue. Revenues are categorized into four major components: oil revenue, revenue from sources other than oil, federal revenue and investment revenue.

Oil revenue continues to dominate the unrestricted revenue picture—and is projected to provide more than 84% of General Purpose Unrestricted Revenue through FY 2018. However, North Slope oil production is declining. In FY 2008, Alaska North Slope (ANS) output was 0.716 million barrels per day compared to a peak of 2.01 million barrels per day in FY 1988. While production declined by approximately 64% over that period, the market price of oil increased more than sixfold. For FY 2009, we project ANS oil production will decrease to 0.689 million barrels per day.

Before 2003, the Constitutional Budget Reserve Fund (CBRF) was used to balance the state's budget in 10 of the previous 15 years. Fiscal Year 2008 was a banner revenue year, in which surpluses exceeding $5 billion were deposited in the CBRF. Lower prices in the future, combined with the fall in North Slope crude oil volumes, could lead to future budget shortfalls and draws on the CBRF.

On December 19, 2007, Governor Palin signed into law the oil and gas production tax called Alaska's Clear and Equitable Share (ACES). This tax is designed to encourage investment by the petroleum industry in Alaska, while providing an open, transparent tax system in which both the industry and the people of the state can have confidence that the state is receiving a fair share of the revenue from Alaska's petroleum resources.

Alaska's total revenue picture also includes earnings from investments in the Permanent Fund and CBRF, federal revenue and other sources, such as taxes, charges for services, licenses, permits, fines and forfeitures. The information provided in this book will provide greater insight not only into the sources of revenue that support the state today, but also into future revenue from potential new sources.

Please note that totals in some tables throughout this publication may not equal the sum of components due to rounding.

Unrestricted Revenue and Restricted Revenue

Throughout this forecast, we report two categories of revenue: General Purpose Unrestricted Revenue (frequently referred to as unrestricted revenue) and restricted revenue. These two types of revenue are based on the two components of the General Fund in the Alaska State Accounting System (AKSAS)—the unrestricted component and the restricted component—with certain adjustments.

General Purpose Unrestricted Revenue (GPUR)

General Purpose Unrestricted Revenue reflects revenue that is not restricted by the constitution, state or federal law, trust or debt restrictions, or customary practice. Most legislative and public debate centers on this category of revenue, and this is the amount generally used for budget planning purposes and designated in budget documents as General Fund revenue. General Purpose Unrestricted Revenue reported in this forecast includes funds deposited into the unrestricted component of the General Fund, with certain adjustments:

- Reductions might include (a) revenue earmarked for specific programs, (b) pass-through revenue for qualified regional aquaculture and dive fishery associations and (c) revenue shared with municipal governments and organizations (e.g., fisheries taxes).
- Additions might include transfers from the unclaimed property trust to the state treasury.

The Department of Revenue uses a three-step process to make its final estimate of General Purpose Unrestricted Revenue.

Step 1. We estimate all revenue for the unrestricted component of the General Fund in AKSAS, as well as certain program receipts, by using our forecast models and obtaining estimates from other state agencies.

Step 2. We then consult the Governor's Office of Management and Budget and Legislative Finance for their input.

Step 3. Finally, following analysis, we adjust our initial projection to derive a forecast of total General Purpose Unrestricted Revenue.

Figure 2-5 on the next two pages sets out FY 2008 General Purpose Unrestricted Revenue and our forecast for FY 2009 and 2010.

Restricted Revenue

Restricted revenue represents any revenue that is not considered General Purpose Unrestricted Revenue. This includes revenue restricted by the constitution, state or federal law, trust or debt restrictions, or customary practice. Restricted revenue reported in this forecast includes money deposited into the restricted component of the General Fund, with certain additions. Additions might include (a) receipts deposited in funds other than the General Fund and (b) receipts that are deposited into the unrestricted component of the General Fund but are restricted by statute or customarily appropriated for a particular purpose or program, such as sharing of fish tax revenue with municipalities.

Article IX, Section 15 of the Alaska constitution requires that at least 25% of all mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments and bonuses received by the state be placed in the Permanent Fund. Until 2003, Alaska Statute 37.13.010 required the placement of 50% of royalties from certain leases into the permanent fund. House Bill 11, passed by the legislature in 2003, changed the law so that 25% from all leases would be placed into the Permanent Fund, contingent on the impact of this change to the Permanent Fund Dividend. On October 1, 2008, the impact of HB 11 on the Permanent Fund Dividend had exceeded the limitations provided in HB 11, and HB 11 was repealed. As of October 1, 2008, the applicable leases will pay 50% of royalties to the Permanent Fund, while others will pay 25% to the fund. This change will be reflected in this revenue forecast as a decrease in unrestricted revenue and an increase in restricted revenue.

In FY 2008, the Department of Revenue made a change in the method by which it accounts for future revenues, as well as historical and future production and oil prices, from a cash basis to an accrual basis. This method change will better align fiscal year revenues with the state's financial reports and other publications. As a result, slight modifications have been made to historical production values and oil prices to accommodate this change.

Crude Oil Price Forecast

Oil revenue is projected to provide more than 84% of forecasted General Purpose Unrestricted Revenue through FY 2018. Three elements are critical to the oil revenue forecast: price, volume and to a lesser extent lease expenditures.

There is no price for Alaska crude oil on the New York Mercantile Exchange (NYMEX) [1] or other commodity exchanges. The spot price of Alaska North Slope (ANS) crude oil is calculated by subtracting a market differential from the spot price of West Texas Intermediate (WTI). Platts, Reuters, Dow Jones Energy Service and Bloomberg each estimate that market differential and report a daily spot price for ANS.

All of Alaska's oil production is delivered to refineries on the U.S. West Coast (including Alaska and Hawaii). Consequently, Alaska's royalty and production tax revenue depends in large part on the average market price of ANS crude oil at U.S. West Coast refining centers.

Figure 2-6 shows crude oil prices for FY 2008 and the Department of Revenue's forecast of prices for the 10-year period beginning with the current fiscal year FY 2009 and continuing through FY 2018. The oil price forecast is based both on a subjective assessment of market dynamics and trend analysis by participants at a Department of Revenue price forecasting seminar and other commercial price forecasting sources.

Figure 2-6. Nominal WTI, ANS West Coast and ANS Wellhead, FY 2008 and Forecasted FY 2009-2018 ($ per barrel)

Fiscal Year	WTI	ANS West Coast	ANS Wellhead
2008	97.02	96.51	90.46
2009	79.79	77.66	71.84
2010	76.91	74.41	68.93
2011	74.15	71.65	66.05
2012	75.07	72.57	66.67
2013	76.05	73.55	67.48
2014	76.74	74.24	68.04
2015	76.32	73.82	67.48
2016	81.01	78.51	72.06
2017	83.24	80.74	74.09
2018	85.53	83.03	76.35

[1] The NYMEX futures market is one source for a WTI quote. A daily WTI spot quote could also be determined by a reporting service's daily assessment of the WTI spot market.

Figure 2-7 shows: (1) the monthly ANS West Coast market price from November 2003, through October 2008, (2) the 60-month moving average of the ANS West Coast market price for the same period and (3) estimated ANS futures price for December 2008 to December 2013.

The figure illustrates a number of issues with respect to oil prices:

- Month-to-month crude oil price volatility—monthly ANS West Coast prices during this time period ranged from $29.11 per barrel to $133.78 per barrel.
- The 60-month moving average is $64.64 per barrel and has more than tripled since 2003.
- The derived futures market price from November 2008 shows prices that are dramatically lower from July 2008 record highs and lower than the 60-month moving average.

We project that over the medium term, ANS oil prices will average $72.57 per barrel in FY 2012, $73.55 per barrel in FY 2013 and $74.24 per barrel in 2014 in nominal dollars. Over the long run, ANS oil prices are projected to average $78.51 per barrel in FY 2016, then increase at 2.75% per year, based on inflation.

Figure 2-7. Monthly Nominal ANS West Coast and Futures Market Oil Prices ($ per barrel)

Crude Oil Production Forecast

Alaska North Slope crude oil production peaked at 2.01 million barrels per day in FY 1988 and has steadily declined since. We anticipate volumes will decline by 3.8% in FY 2009 to about 0.689 million barrels per day (see Figure 2-8), due in part to increased planned and unplanned maintenance on aging North Slope facilities, flowlines, pipelines and wells. For FY 2010, we project a 3.5% decrease in North Slope production due primarily to delays in heavy oil development. More discussion of the Fall 2008 oil production forecast can be found in Section 4. Also, a detailed production forecast is included in the appendices of this forecast.

Crude Oil Expenditures Forecast

A third component of production tax revenue forecasting is the forecast of expenditures. Under the new ACES production tax, companies are allowed to deduct certain lease expenditures from the gross value of their production before applying the tax rate. Future tax collections, therefore, are dependent not only on the oil price and the level of production, but on the cost of that production. Costs of production may include fixed and variable operating expenses, such as the costs of labor and the expense to run facilities, and they may include costs to acquire production equipment or to drill a well—usually deemed to be capital expenses. A portion of capital expenses is also allowed as a credit against the ACES production tax.

Lease expenditures for the exploration for and production of crude oil have risen over the two-year period that they have been reported. In FY 2007, over $3.6 billion was spent producing and exploring for oil on the North Slope. Although we have not received complete information for FY 2008, we estimate lease expenditures to total approximately $3.8 billion. In FY 2009, lease expenditures are estimated to total $4.5 billion. We estimate that FY 2010 lease expenditures will total over $5 billion.

Long-Term Unrestricted Revenue Outlook

Using the price, volume and lease expenditure components developed for this fall forecast, Figure 2-9 summarizes the department's forecast of total General Purpose Unrestricted Revenue through FY 2018.

Figure 2-9. Total General Purpose Unrestricted Revenue, FY 2008 and Forecasted FY 2009-2018 ($ million)

Fiscal Year	Unrestricted Oil Revenue	Unrestricted Other Revenue (except Federal & Investment)	Unrestricted Investment Revenue	Total Unrestricted Revenue	Percent From Oil
2008	10,012.4	552.2	227.8	10,792.4	93%
2009	6,051.4	484.1	215.9	6,751.4	90%
2010	4,626.9	413.2	235.3	5,275.4	88%

Spending, Revenue Forecast and the Constitutional Budget Reserve Fund

As approved by voters in 1990, all receipts from oil and gas tax and royalty settlements are deposited into the Constitutional Budget Reserve Fund (CBRF). The state has deposited about $6.2 billion into the reserve fund and generated another $1.5 billion in investment earnings. Since the increase in oil prices beginning in 2003, no CBRF withdrawals have been necessary to balance the state's budget. However, given price volatility and the decline expected in volumes from the North Slope, the state may have to depend on the CBRF in the future. Through September 30, 2008, approximately $5.2 billion had been borrowed from the CBRF to balance the budget, leaving a balance of approximately $2.7 billion. According to the state constitution, the $5.2 billion that was withdrawn must be repaid to the CBRF. In FY 2007 and 2008, significant progress was made toward this repayment, as a total of $4.6 billion was deposited back into the CBRF. Approximately $612 million remains to be repaid back into the fund.

Figure 2-10 is presented to help the reader understand the time period in which the CBRF could be depleted, based on the current forecast and the assumption that all excess revenue would be deposited into the CBRF. This figure shows that, given the current forecast, the earliest we would anticipate the CBRF being depleted would be March 2015, assuming that the state experiences budget increases of 10% per year. If oil prices were to fall below our forecasted level and stay at $40 per barrel, we could expect the CBRF to be depleted as early as July 2012, assuming an annual 10% increase in the state's budget. Assuming forecasted oil prices and a 3% annual increase in the state budget, the CBRF is expected to last at least until December 2020.

3. Fifty Years of Revenue

Alaska's Purchase and Struggle for Statehood

"The political society to be constituted here, first as a territory, and ultimately as a state or many states, will prove a worthy constituency of the Republic,"[1] remarked Secretary of State William H. Seward during a visit to Alaska. William Seward was one of very few who recognized Alaska's potential when he negotiated its purchase from Russia in 1867. At less than 2 cents an acre, the land mass acquired, more than twice the size of Texas, would be known by some to be "Seward's Folly" because of its remote location and seemingly questionable value. As one news columnist reported on the purchase, "The territory included in the proposed cession was not contiguous to the national domain. It lay away at an inconvenient and dangerous distance. The treaty had been secretly prepared, and signed and foisted upon the country at one o'clock in the morning. It was a dark deed done in the night..."[2]

True, the Russians needed to dispose of the property. The whaling and fur trade industries that supported the Russian colony for years was at risk due to overharvesting and the Russian government had land acquisition aspirations closer to home. As acquired by the U.S., an estimated 2,500 Russians and 8,000 aborigines were spread among 23 Russian trading posts, and another 50,000 Eskimos and Native Americans resided elsewhere in the state. The official transfer ceremony was held in Sitka on October 18, 1867, a day that continues to be celebrated as Alaska Day. The Aleutian word "Alakshak," meaning Great Land, was chosen as the official name for the new U.S. possession, although it took on the Russian pronunciation of Alaska.

At the time of Alaska's purchase, statehood seemed like a far away dream. The First Organic Act, passed by the federal government in 1894, allowed Alaska to become a judicial district. The Second Organic Act, passed in 1912, authorized territorial status for the remote parcel, along with an elected legislature. Even under these acts, the federal government retained control over the land's vast resources. It wasn't until the 1920s that the push for statehood began. The first referendum, held in 1946, showed that Alaskans

[1] Gislason, Eric. "A Brief History of Alaska Statehood (1867-1959)." Alaska Statehood Celebration Commission. 2008. http://www.gov.state.ak.us/ASCC/.

[2] Oberholtzer, Ellix Paxson. *A History of the United States since the Civil War.* Volume 1. 1917. p. 123

supported statehood by a 3-to-2 margin. The biggest hurdle was yet to come: convincing the federal government that statehood should be granted to the relatively wild, new land.

Statehood opponents were set on thwarting Alaska's efforts. Many claimed Alaska could not support a state government because of the lack of an adequate tax base. Adding to the struggle, the political makeup of the U.S. Senate was sharply divided. Congressional republicans were not pleased with the prospect of two new democratic senators from Alaska. Opposition to statehood also came from Alaska residents. Representatives of the salmon canning industry, for example, lobbied against statehood for fear that the state would impose new taxes on their industry, thereby jeopardizing their business viability.

Most Alaskans were persistent in their goal and, led by statehood advocates Bob Bartlett and Ernest Gruening, kept the focus on statehood. Bartlett represented Alaska for 14 years as a non-voting delegate to Congress and worked to persuade Congressional members that Alaska was ready for statehood. Gruening was an ardent supporter of statehood during his service as governor of Alaska for 13 years and pushed reforms that would prepare Alaska for the change.

Two organizations sprung up to support the effort: The Alaska Statehood Committee and Operation Statehood. Members of the statehood movement had articles about Alaska published in nationwide media and pushed for Anchorage's selection as an "All America City" by the U.S. Chamber of Commerce.[3] Alaskans argued that not only did they have the capacity to govern themselves, but the right to be represented by a state government and control their natural resources.

Alaskans responded to claims that a state government could not support itself by establishing new territorial taxes and perhaps most importantly, by creating a constitution prior to achieving statehood. Fifty-five delegates to the Constitutional Convention met in Fairbanks for about 90 days beginning on November 8, 1955. Delegates included businessmen, miners, fishermen and homemakers. One Alaska Native, Frank Peratrovich, was also a delegate to the convention. By the time the delegates were done, Alaska had what would later be recognized as one of the best constitutions in the country, with a strong emphasis on the management and development of natural resources for the benefit of all Alaskans.

In July of 1958, Congress passed the Alaska Statehood Act and President Eisenhower signed it into law. The battle was over and Alaska was a state – at least on paper. The process of building a functioning state government would be Alaska's next struggle.

In the first years of statehood, Alaska faced challenges to establish itself as a stable, capable state. Revenues hardly met budget demands for the new state. The economy had no apparent pillars, and federal transitional grants would not last forever. The largest revenue source was the individual income tax that, prior to oil development, provided nearly one quarter of the unrestricted revenue for the state. The individual income tax dated back to pre-statehood days and initially collected 10% of an individual's federal income tax liability.

In 1961, the state legislature had to take serious measures to guarantee that a functioning state government would continue to exist. The highway motor fuel tax was raised from 5 to 6 cents per gallon; taxes on liquor and wine were increased from $3.50 to $4, and from $.50 to $.60 per gallon respectively, and individual income taxes raised from 10% to 16% of federal income tax liability on income earned within Alaska. Even with the tax increase, real non-petroleum revenue per capita was stagnant after the 1961 tax increases.

Alaskans Strike Oil!

Statehood advocates stood firm on the premise that the ability to exercise control over its abundant resources would be key to sustaining a mature economy. It was under such premises that the Statehood Act gave Alaska the right to select 104 million acres, or 28% of the total land in Alaska, to support any activities the state deemed reasonable. The state selected its lands wisely.

Among the parcels selected by the state was a barren, brutally cold tract of land on the North Slope later known as Prudhoe Bay. The selection was based on the recommendation of Tom Marshall, the land selection officer with the Department of Natural Resources. Even with geological data to support his choice, Marshall was ridiculed for selecting land that was of no interest to oil developers and was generally considered "worthless tundra." Fortunately, Marshall's geological experience told him otherwise, and Roscoe Bell, commissioner of the Department of Natural Resources at the time, backed Marshall's pick.[4]

[3] Haycox, Stephen. Alaska: An American Colony. Seattle: University of Washington Press, 2002.
[4] Wolf, Lisa. "Katalla to Prudhoe Bay: An entertaining look at the first 100 years of the oil and gas industry in Alaska." Petroleum News, 1997.

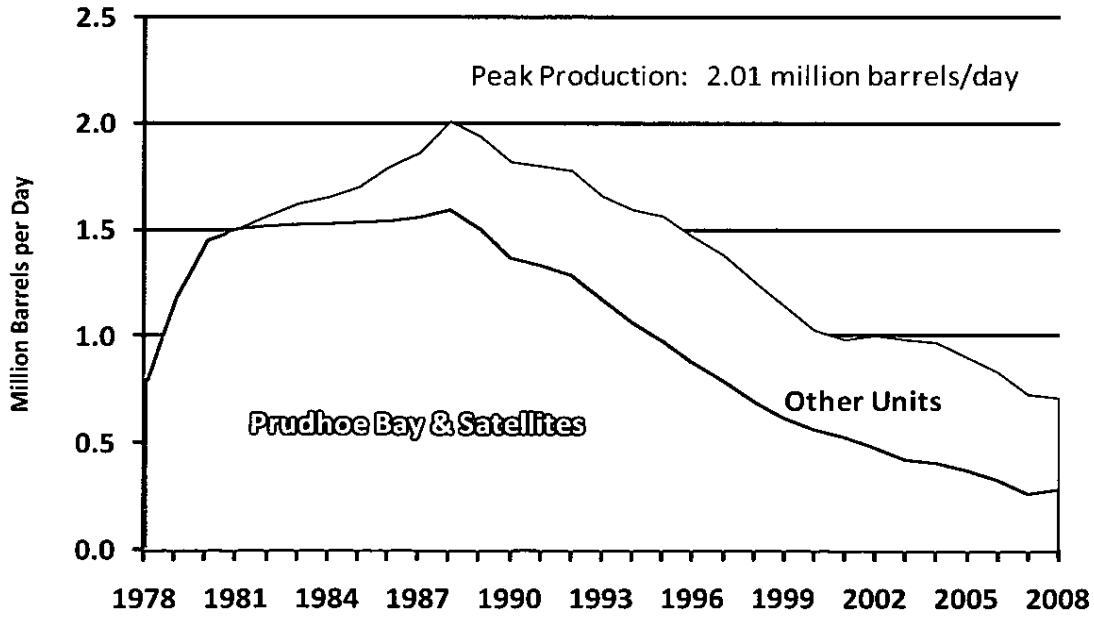
The first oil in Alaska was not discovered on the North Slope, however. Alaska's first commercial oil production came from an unlikely discovery by Alaskan pioneer Tom White in 1896. After nearly falling into a puddle of oil during a bear hunt near the small village of Katalla, near Cordova, he later returned to the pool with a match. White recalls burning his face as "a gusher of fire as high as the trees" roared in front of him.[5] Some stories have it that the countryside burned for a week, others say it was a month. In either case, Katalla was rich with oil, and the history of Alaska's oil production had begun. Production in Katalla started up and stalled several times until a refinery fire in 1933 ended Katalla's oil days.

Further discoveries in Cook Inlet just prior to statehood helped expand the industry. The Swanson River oil field on the Kenai Peninsula led to a wave of exploration and development in the area. In 1965, the McArthur River oil field was discovered in Cook Inlet, and proved to be the largest oil development in the Cook Inlet basin. The development of these oil fields boosted state government revenues. Although the production tax rate was only 1%, production from Swanson River starting in 1961 and McArthur River in 1968 immediately fed revenue into Alaska's new state government. Cook Inlet production of oil and gas increased 10-fold and 30- fold respectively from 1961 to 1968.

Federal approval of Alaska's land selections in the North Slope area meant that the state could begin issuing leases on the North Slope. The state's first North Slope lease sale was held in 1964, raising $4.3 million; a second lease sale in 1965 brought the state $6.1 million, demonstrating active interest in exploring for oil in the remote region. Despite the influx of investment dollars on the North Slope, however, explorers had little to show for their money. It wasn't until December 1967 that the Prudhoe Bay State No. 1 well proved fruitful, as gas ignited by workers monitoring the well soared 50 feet in a 30 mph wind. Two months later, Atlantic-Richfield Company announced oil was discovered, and by the summer of 1968 Prudhoe Bay was known to be awash with black gold. The $900 million Prudhoe Bay lease sale in September 1969 sent state revenue to a record high in FY 1970.[6]

The discovery of oil at Prudhoe Bay relieved worry that Alaska wouldn't survive as a state. But oil on the North Slope could not be turned into revenue until it could be transported to market. A pipeline would need to be constructed to transport oil from Prudhoe Bay to Valdez. In addition to the engineering and regulatory challenges of a designing and building an 800-mile pipeline over Arctic

Figure 3-1. Alaska North Slope Oil Production, 1978-Present



[5] Wolf, Lisa. "Katalla to Prudhoe Bay: An entertaining look at the first 100 years of the oil and gas industry in Alaska." Petroleum News, 1997.
[6] ibid.

tundra and three mountain ranges, issues relating to Alaska Native land claims and environmental concerns needed federal attention before any construction could begin.

Native land claims were settled with the Alaska Native Claims Settlement Act (ANCSA) passing Congress in 1971, but the decision on whether the pipeline, called the Trans Alaska Pipeline System (TAPS), would meet National Environmental Policy Act (NEPA) standards was pending court approval after environmental groups filed suit against the project. Two years of hearings, decisions and appeals had passed since the completion of the draft environmental impact statement (EIS) in 1971, and the courts' final ruling did not state whether the EIS met NEPA standards. Tired of waiting, in the summer of 1973 Congress passed the Alaska Pipeline Authorization Act, which squeaked through the Senate with Vice President Spiro Agnew breaking the tie vote.[7]

As the state anxiously awaited the completion of TAPS, the drain on the state budget grew. The influx of pipeline construction workers meant higher demand for state services, and it would be at least two years before oil revenue would reach state coffers. In response to this temporary shortfall, the Alaska legislature passed a 2% tax on oil and gas reserves. The tax would allow money paid under the reserves tax to be credited against future production taxes. Essentially, the state was borrowing against future oil production tax revenues. From 1976 to 1977, the state collected about $500 million in reserves tax.

When completed, TAPS was the largest privately financed project in the world, costing $8 billion. The pipeline carried its first oil from the North Slope to Valdez in June 1977. This event marked the end of an era and the beginning of another. There was no longer as much concern about where money would come from, but rather how the state's new wealth would be spent and managed.

Figure 3-1 shows the importance of the Prudhoe Bay discovery to petroleum production in Alaska. Although production in the Prudhoe Bay Unit and satellites has been in steady decline since 1988, oil production in other units has helped to stem the decline.

Unprecedented Wealth Shapes Decisions

The discovery of Prudhoe Bay in the late 1960s and subsequent nine year delay in revenues meant that Alaska lawmakers were well aware of the revenues they were about to receive. In the years preceding the first flow of oil, many were concerned about how the state's new wealth would be spent. Some pointed to the speed at which ensuing legislatures had spent the $900 million from the Prudhoe Bay lease sale. In particular, Governor Jay Hammond advocated for the creation of a permanent fund as a way to prudently manage the state's wealth. A similar proposal offered by Hammond in 1969, prior to the state's receipt of revenue from the Prudhoe Bay lease sale, had been defeated by the legislature. This time, Governor Hammond got the public's support, when he advocated there were "900 million reasons why Alaskans should support [the Permanent Fund]."[8]

In 1976, the Alaska Permanent Fund was established to invest a minimum of 25% of the state's resource royalties, rents and bonuses. The Permanent Fund was not initially set up to pay out dividends to Alaska residents. It was a savings account, but legislators had not yet agreed on a method for investing the revenue. Between 1976 and 1980, Alaskans debated whether to use the fund as an economic development bank that would invest in Alaska industries or a public trust that would pay out dividends to Alaska residents. Several proposals were put forth, and generally, people agreed the Fund should benefit future generations of Alaskans and not be used for current government expenses.

In 1980, it was decided that the fund would be a public trust that paid dividends to Alaska residents, rather than be used as a development bank to subsidize commercial enterprises in Alaska. The first checks in the amount of $1,000 were mailed out in 1982. By the end of FY 2008, $13 billion had been deposited into the Permanent Fund since FY 1977, and the total fund balance had reached $36 billion.[9] In addition to the creation of the Permanent Fund, the School Fund was established to fund "the state public school program" with 0.5% of resource royalties, rents and bonuses.

In 1977, the legislature abandoned its old production tax system, a graduated tax ranging from 3% to 8% of the wellhead value based on barrels per day per well, and adopted a new production tax system on oil production with a nominal rate of 12.25% of wellhead value, adjusted by the economic limit factor (ELF). Under the ELF formula, the lower a lease or

property's average per-well production, the lower the effective tax rate. This allowed small or declining fields in Cook Inlet and the North Slope to be taxed at lower rates than those applicable to highly productive fields such as Prudhoe Bay and Kuparuk.

Concerns over how the state would manage Alaska's wealth were also part of the motivation for creating the Constitutional Budget Reserve Fund (CBRF). In 1990, the CBRF was established to meet the state's cash flow needs and provide temporary funding when the state budget exceeded revenues. The CBRF could also be appropriated for any public use purpose if three-fourths of the House and Senate approve.

Revenue deposited into the CBRF is from settlements of litigation and tax disputes involving mineral royalties, rents, bonuses, production taxes and other sources of mineral revenue. The wealth of the CBRF became especially important when low oil prices in the late 1990s reduced revenues. Withdrawing funds from the CBRF allowed for continued funding of state operations and general services.

Figure 3-2 illustrates the impact petroleum production has on unrestricted revenue used to fund the state government. Also shown are events that contributed to higher and lower petroleum revenues.

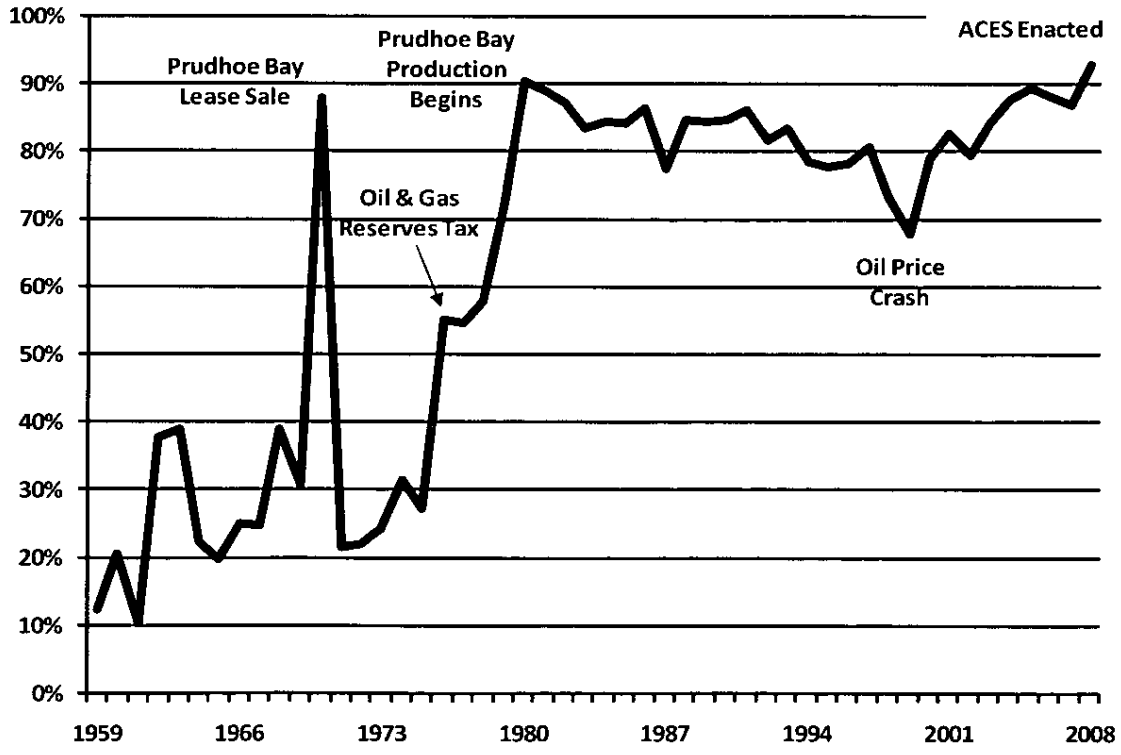
Fifty Years of Revenue

The discovery and development of Prudhoe Bay and other petroleum reservoirs helped solidify the state's financial future. In 1980, the personal income tax was repealed. Although there have been discussions over the years since statehoo, about implementing a state sales tax, state policymakers have avoided doing so.

Despite lean revenue years when oil prices were low, over the past 50 years, the state has collected a total of $96 billion in restricted and unrestricted oil revenue, for an average of about $2 billion per year. Royalties, bonuses and rents make up almost half of the total revenue, with a total of $42 billion. Production tax is next with about 35%, or roughly $34 billion. The other components of oil revenue are corporate income tax, property tax, interest and oil tax and royalty litigation settlements that are required to be deposited in the CBRF. These categories make up the remaining $20 billion.

On average, oil revenue has accounted for 85% of General Purpose

Figure 3-2. Unrestricted Petroleum Revenue as a Percent of Total Unrestricted Revenue



Unrestricted Revenue. Non-oil revenue, which will be discussed later in this chapter, has averaged 10% of unrestricted revenue. Investment interest makes up the remainder of the revenue.

Although the state has substantial reserves of natural gas, the market for this petroleum resource has been limited by the lack of a transportation system. The Cook Inlet region has been a steady supplier of natural gas to the greater Anchorage area since the 1960s. The revenue generated from the production of Cook Inlet natural gas has been low compared to the revenue generated by North Slope oil, due to the relatively small volumes of gas produced. The volumes of gas known to exist on the North Slope are substantial and the production and sale of these reserves could yield significant tax and royalty revenue for the state. To date, however, the majority of the state's natural gas supplies remains stranded on the North Slope, without a means of transporting it to market.

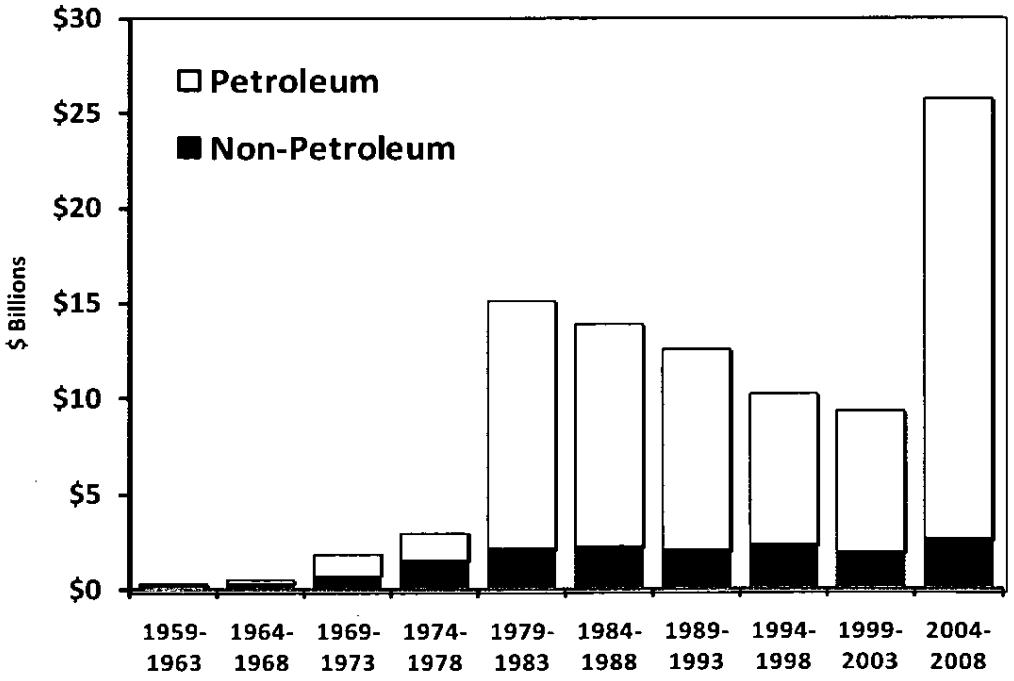
Figure 3-3 shows the importance of petroleum revenue compared to non-petroleum revenue in Alaska since statehood. Non-petroleum revenue has remained essentially flat since 1979, while petroleum revenue decreased in the years from 1979 through 2003, and then increased dramatically beginning in 2004 with the rapid rise in oil prices and changes in production tax.

Revenue Classifications

The Department of Revenue classifies revenue as either unrestricted or restricted, based in part on whether the revenue is available for general legislative appropriation. Restricted revenue, which is not available for general legislative appropriation, is considered set aside for a particular use by the constitution, state or federal law, trust or debt restrictions, or customary practice. An example of restricted revenue is the royalty revenue that is deposited in the Permanent Fund, as provided in the Alaska Constitution. The Department of Revenue also classifies as restricted those revenues that are customarily appropriated back to the programs that generate them (sometimes called "program receipts."). For example, the Business Licensing Program generates revenue, and the legislature is not required to, but customarily does, appropriate these funds back to the Business Licensing Program.

Unrestricted Revenue is all revenue that does not fit into the restricted category. Unrestricted revenue resides primarily in the General Fund and is generally available for legislative appropriation. When budget makers are assembling annual state budgets, they look to the amount of unrestricted revenue as a budget guide. The department forecasts unrestricted revenue twice yearly. For more information on the definitions of

Figure 3-3. Unrestricted Petroleum and Non-Petroleum Revenue, $ billion (nominal)



unrestricted and restricted revenue, see the Executive Summary section of this Revenue Sources Book.

The classification of several revenue sources as unrestricted or restricted has changed over time. For example, prior to 1988, the municipal share of fisheries business taxes was classified as unrestricted revenue. Beginning in 1988, the department reclassified this revenue as restricted, due to the long standing tradition of allocating this revenue to the municipalities. Such changes are minor in the big picture of state revenue, and they do not materially distort unrestricted revenue trends.

General Purpose Unrestricted Revenue from FY 1959 to FY 2008 is presented in Figure 3-7 at the end of this chapter. We do not present total restricted revenue due to the inconsistency in reporting criteria over the period. Restricted petroleum revenue is available for all years and can be accessed through the historical revenue database on the Department of Revenue, Tax Division website.

Petroleum Revenue

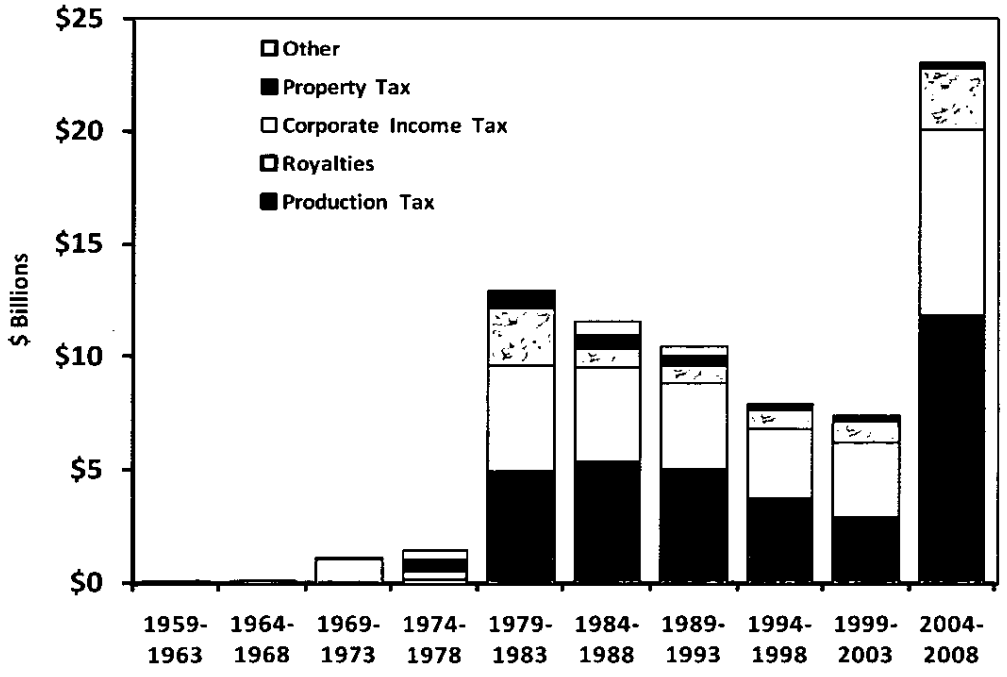
Petroleum taxes and the majority of royalty revenue are classified as unrestricted revenue. Petroleum taxes consist of production tax, property tax and petroleum corporate income tax. Of these three petroleum taxes, the production tax accounts for the majority of the tax revenue.

Royalty revenue, which is administered and collected by the Department of Natural Resources, is the fourth source of petroleum revenue. The Alaska Constitution requires that a minimum 25% of all mineral bonuses, rents and royalties be deposited into the Permanent Fund. Another 0.5% of mineral bonuses, rents and royalties is deposited in the Public School Trust Fund. The amounts deposited in the Permanent Fund and School Trust Fund are classified as restricted revenue. The remainder of the royalty revenue is classified as unrestricted revenue.

Fiscal Year 2008 had the highest annual unrestricted and restricted petroleum revenue in the state's history, in nominal dollars, totaling about $11.26 billion. As a comparison, FY 1981's $4.6 billion in nominal petroleum revenue amounted to about $11.5 billion in real 2008 dollars when adjusted for inflation. Fiscal Year 2008's record revenue was due primarily to high oil prices (average $96.51 per barrel) in conjunction with a new, progressive tax structure, while FY 1981 had nearly double the oil volumes and high oil prices relative to the years following it, at about $34 per barrel ($84 per barrel in nominal dollars).

Production tax structure has played an important role in the amount of revenue collected from Alaska's oil. As

Figure 3-4. Unrestricted Petroleum Revenue by Component, $ billion (nominal)



described earlier, the first substantive production tax on petroleum was a tax on the gross value of the oil and gas produced as adjusted by the Economic Limit Factor (ELF). The ELF tax structure remained in place from 1977, when Prudhoe Bay began production, to 2006, when a revised production tax structure based on net profits was adopted. The first version of the net profits production tax, called the Petroleum Profits Tax (PPT) became effective April 1, 2006. The tax structure was further revised with the passage of the Alaska's Clear and Equitable Share tax (ACES), effective July 2007. Both of these tax structures allowed deductions of lease expenditures against the gross value of production before applying the tax rate. Both of the structures also had credit provisions whereby taxpayers could offset tax liabilities through capital investments made towards petroleum production in Alaska.

Among the goals of the net profits tax structure was to encourage reinvestment in petroleum properties in the state. Alaska was the first state to adopt a progressive tax structure like ACES, although many other oil provinces around the world use a similar structure.

Figure 3-4 illustrates the four primary components of petroleum revenue, along with a fifth component called "other" that consists of revenue from petroleum special settlements and the reserves tax received in some prior years.

Non-Petroleum Revenue

Since statehood, non-petroleum unrestricted revenue has totaled $15.7 billion, or 17% of revenue collected. Although Alaska's revenue picture is now concerned primarily with oil and gas revenue, this has not always been the case. Before Alaska became a major oil province, the state relied on non-petroleum revenues to fund the majority of state government. Looking forward, as oil production continues to decline, and oil prices stabilize well below recent record levels, if gas resources are not developed, then non-petroleum revenues could again become a major component of state revenues.

With the exception of the Prudhoe Bay lease sale in 1970, non-petroleum revenues made up more than 50% of unrestricted revenue every year from statehood through 1975. The largest contributor to state revenues during these years was the individual income tax. The individual income tax generated $459 million from statehood through 1975, or about 21% of unrestricted revenue (again excluding the Prudhoe Bay lease sale revenue).

A number of other taxes and revenue sources round out non-petroleum revenues. At statehood, there were taxes on corporate income, motor fuel, alcohol, fisheries and business licenses, as well as an inheritance tax and a school tax. There were also revenues from licenses and permits, charges for state services, investment earnings, non-petroleum royalties and miscellaneous items. Individually, these items contributed a very small amount to the state treasury, but collectively they accounted for more than half of Alaska's unrestricted revenue from 1959-1975 (not counting the Prudhoe Bay lease sale).

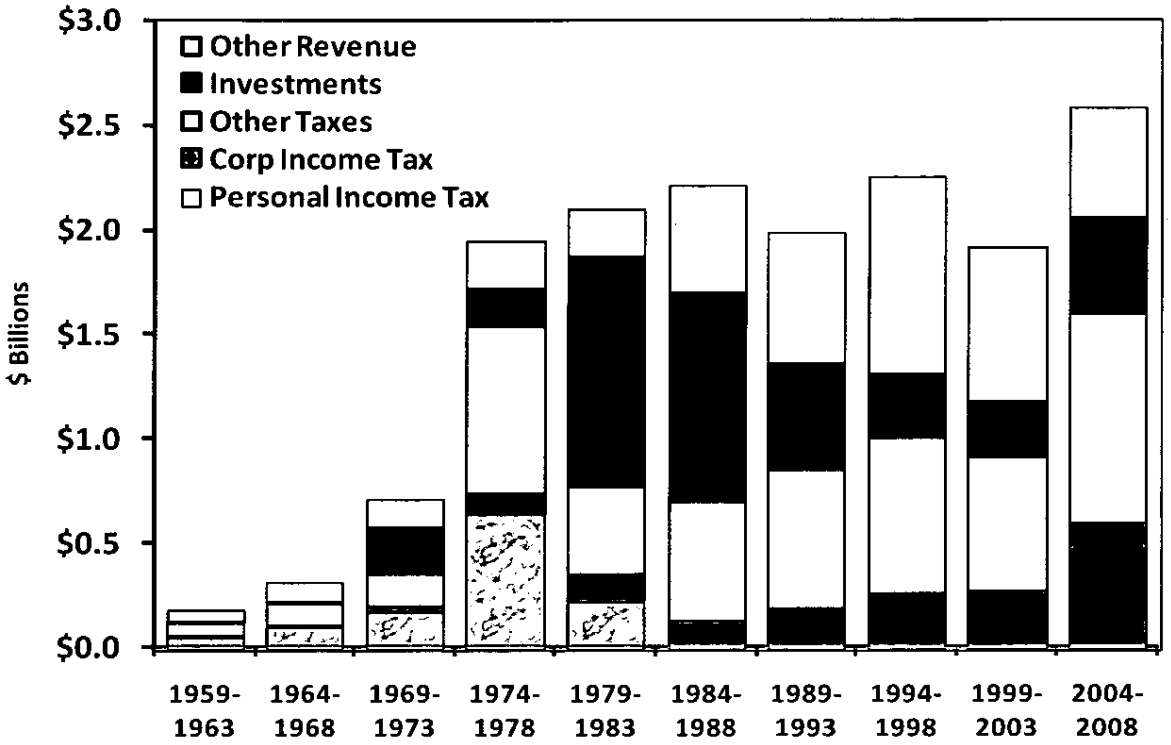
Since 1975, non-petroleum revenue has made up a much smaller share of Alaska's revenue than in the early years of statehood. Revenue from oil allowed Alaska to eliminate the biggest source of early state revenue: the individual income tax. Alaska also eliminated other revenue generators it relied upon in earlier years, such as the school tax, the inheritance tax and the business license tax. Until its repeal in 1980, the income tax was a stabilizing tax, producing a total of $1.2 billion over that period. Alaska is the only state in the nation that does not have a statewide sales or income tax.

Today, non-petroleum revenue is a mix of several different taxes, fees and other revenue items, with taxes making up nearly two-thirds of the total over the past five years. A number of industries contribute to non-petroleum tax revenues. There are taxes on fisheries processing and landing. There is a severance tax on the net income of mining operations in the state which has grown in recent years as mineral prices increased. Taxes on tourism activities were added within the last 5 years, and they include a vehicle rental tax and a large passenger vessel gambling tax. There are also per-passenger tourism taxes and fees, but those revenues are considered restricted revenues. The largest non-petroleum tax is the corporate income tax, which is paid by companies in almost all industries, including mining, tourism, fisheries, timber and others.

Collectively, all unrestricted non-petroleum revenues amounted to $780 million in FY 2008 compared to over $10 billion of unrestricted petroleum revenue. Although the amount pales in comparison with oil revenue, non-petroleum taxes do contribute to the state treasury and may become a larger force. in the future.

Figure 3-5 presents the five components of non-petroleum revenue. These include the individual income tax, the corporate income tax, investments, other taxes and other revenue. "Other taxes" includes all tax revenue except the personal and corporate income taxes, including fisheries taxes, mining taxes, insurance taxes, excise taxes, etc.

Figure 3-5. Unrestricted Non-Petroleum Revenue by Component, $ billion (nominal)



"Other revenue" includes non-petroleum revenues that are neither taxes nor investment revenues such as licenses and permits, charges for state services, fines and forfeitures, rents and royalties and miscellaneous revenues. In contrast to petroleum revenue, non-petroleum revenue has remained relatively consistent since 1974.

Boom and Bust Cycles and Fiscal Stability

Since the first oil began flowing down TAPS, Alaska's state budget has been largely dependent on oil revenues. Government budgets that depend on resource-driven revenues such as oil will have a bumpy ride where the price of that resource is volatile. Over the past 30 years, oil prices have been as low as $8.79 per barrel and as high as $145 per barrel. Oil prices on an annual basisreached their low only 10 years ago in FY 1999 when they hit $12.99 per barrel ($16.70 in real 2008 dollars). Not coincidentally, that same year was also the state's lowest revenue year over the 30-year period with total unrestricted revenue for the year at just $1.35 billion. The budget for FY 1999 was $2.4 billion, creating a revenue shortfall of just over $1 billion. Fortunately, previous legislatures set aside some early oil revenue in the Constitutional Budget Reserve Fund. The CBRF came to the rescue in 1999, providing over $1 billion, or almost half of the revenues needed to meet budget demands. The CBRF was tapped to fill revenue-budget gaps in ten of the fifteen years since FY 1994.

In a letter to the governor from the Fall 2000 Revenue Sources Book, then-Commissioner Wilson Condon noted,

Amusement parks are known for their rollercoaster rides but there's nothing amusing about the up-and-down ride for oil prices this year. Buyers on March 7 paid a 10-year high for Alaska North Slope crude at $32.30 a barrel, and then watched as the price fell to $22.10 on April 10. The rollercoaster cranked up again and topped out at a crest of $35.62 on Sept. 19 before aiming down another curve and hitting $25 on Monday.

This has been a familiar story to past and present governors of this state. Oil prices seemed to mysteriously rise and fall with very little warning. What's more, in recent years, oil price swings have become bigger, accentuating the volatility. Whereas movements in price were once measured in cents or in dollars, they are increasingly being measured in $10 and $20 increments.

With several down years of oil prices in the late 1990s, the words "budget

shortfall" were not uncommon in the halls of the Capitol and state budgets had to be trimmed to accommodate the lack of revenue. Broad based taxes were again the subject of conversation, and there were several legislative proposals to re-establish an individual income tax or to implement a sales tax in the state. None of them were passed, however, leaving state revenues subject to the boom and bust cycles of oil prices.

This fiscal year may be a year for the record books when it comes to oil price volatility. Oil prices essentially doubled from levels experienced in 2006 and 2007, reaching an all time high in July 2008 of $145.29. Within a few months, oil prices came crashing down to less than $50 per barrel in November 2008 – a decrease of almost $100 per barrel. The impacts will be felt in the state's revenue picture as well: in Spring 2008, the department forecasted FY 2010 revenues to be what was deemed a conservative $6.3 billion. The figure for FY 2010 revenue is now set one billion dollars lower, at $5.3 billion. The outlook for FY 2011 looks less rosy, with revised estimates of unrestricted revenue at $4.4 billion from a previously forecasted $6.0 billion.

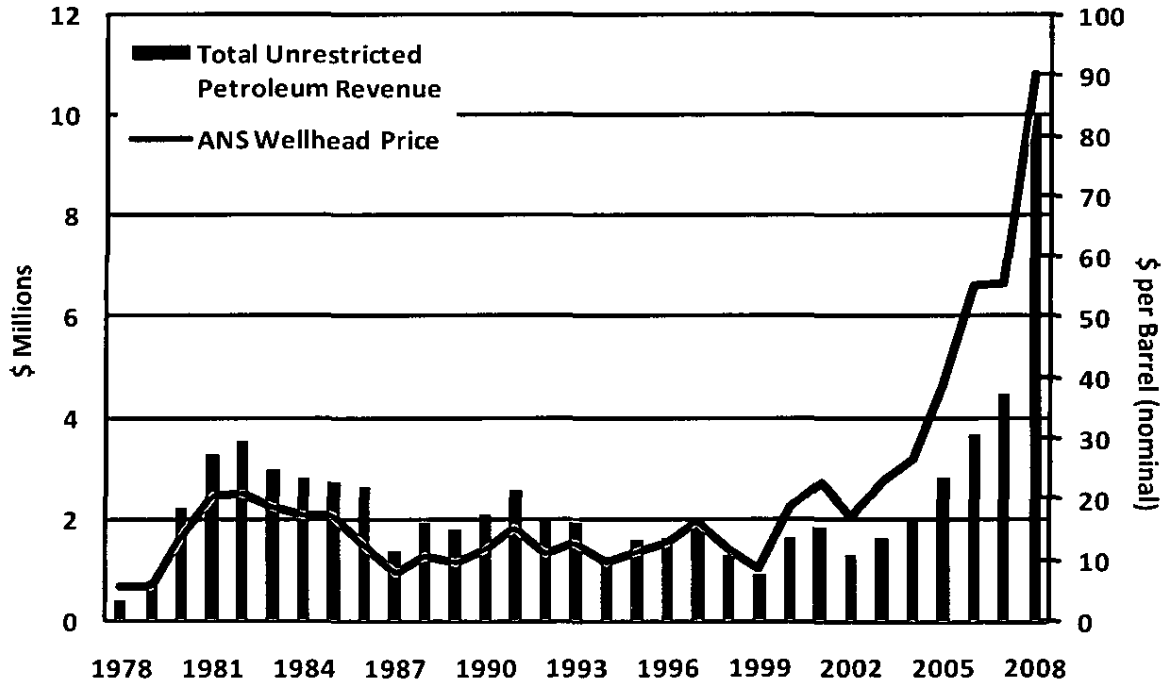
Most economists point to market fundamentals—primarily reduced demand—as the driver of the recent downturn in oil prices. The housing market crisis and the subsequent near collapse of several of the country's largest financial institutions have had a significant impact on the health of the nation's economy. Recent indicators are that the U.S. recession is spreading worldwide, impacting global markets in otherwise healthy economies. All this has led to lower consumer confidence, reduced spending and decreased demand for petroleum products.

As has happened throughout the history of Alaska's petroleum revenues, however, petroleum demand will rebound when economies strengthen. With the increase in demand, oil prices should come back to levels that are consistent with demand. If demand increases to levels beyond those sustainable by supply, we will see oil prices rise again, perhaps to levels at or above those experienced in July 2008. Such is the typical boom and bust cycle that non-renewable resources like petroleum generate.

Figure 3-6 illustrates the impact oil prices have on the state's unrestricted revenues. In the mid to late 1980s, production levels sustained revenues, even in the absence of high oil prices.

In an effort to stabilize state spending—one half of the revenue-budget equation—the legislature passed House Bill 125 in 2008, requiring the governor to prepare and submit a 10-year fiscal plan along with the

Figure 3-6. ANS Wellhead Price and Total Unrestricted Petroleum Revenue



normal budget documentation at the beginning of each legislative session. The fiscal plan must identify the source of funds, as well as the use of them, and the two must balance. The governor and the Office of Management and Budget will be submitting the first of such fiscal plans to the legislature in January 2009.

Alaska Revenues – A Look Back and A Look into the Future

The history of state revenue in Alaska has not been a dull story. At times revenue trickled and at other times it flooded the treasury.

Over the 50 years that Alaska has been a state, over eighty percent of unrestricted revenue has come from petroleum sources, and sixty percent of this has been from production taxes and royalties. With so much state revenue coming from a commodity with such price volatility, booms and busts in state revenue are almost guaranteed.

In the early years of statehood, petroleum revenue was only a small portion of unrestricted revenue. Individual and business taxes provided most of state revenue before Prudhoe Bay. In the past five years, petroleum revenue has averaged 89% of unrestricted revenue.

Has this reversal been a blessing or a curse? On the positive side, it has allowed the state to establish a stable state government and balance the budget—something that was a challenge before Prudhoe Bay. On the negative side, the state's revenue heavily depends on a finite resource that is subject to extreme price volatility.

For the past 50 years, state revenue has been focused on the Prudhoe Bay discovery and its production. What will be the focal point of the next 50 years?

On August 1, 2008, the Alaska legislature authorized the Alaska Gasline Inducement Act (AGIA) license to be awarded to TransCanada Alaska. The 1,715-mile proposed natural gas pipeline from Alaska's North Slope to the Alberta Hub in Canada will be the largest construction project in North American history. It will ship 4.5 billion cubic feet (bcf) of gas per day with additional capacity up to 5.9 bcf per day.

In the coming years TransCanada will be moving forward on early-stage development of the project and preparing to secure supply commitments in an open season to be held by July 2010. The TransCanada Alaska gasline is scheduled to be in service before the end of 2018.

Natural gas is also an important energy source for Alaskans. With this in mind, the ACES production tax provides tax relief for natural gas production that is sold and used within the state. It is anticipated that a portion of the natural gas that is developed through the AGIA process or other in-state gas delivery initiatives will be made available to meet the energy needs of Alaska residences and current and future industries.

Mining in Alaska also holds potential for future revenue. Alaska is currently fifth in the United States in mineral production value, and more exploration and development is under way. Mining exploration and development has expanded in the last four years. Total exploration expenditures have increased 12-fold from 2002 to 2007; development expenditures from 2005 to 2007 were higher than any other 3-year period over the last 30 years.[10]

Alaska's seafood industry has enjoyed higher prices and healthy stocks. The 2007 salmon harvest reached its 4th highest level in terms of pounds of salmon caught since 1960.[11] The ability of Alaska to sustain an environment conducive to large and healthy seafood populations and promote Alaska seafood products will be vital to continuing the growth of the seafood industry and its contribution to state revenue.

Alaska's natural resource wealth also includes its beauty and attractiveness to outside visitors. Alaska's tourism industry and its share of state tax revenue, through corporate income taxes, vehicle taxes and passenger vessel taxes, have grown in recent years as the volume of visitors and employment in the industry have increased. A citizen's initiative passed in 2006, adding new taxes on the cruise ship industry and increasing its share of state tax revenue. Alaska boasts superb summer and winter activities and attractions that generate tourism dollars in most areas of the state. Improving the attractiveness of visiting Alaska and its natural assets will be essential to the growth of the state's economy and its revenue.

Alaska's natural resource wealth will be a major part of Alaska's future economy and state revenue. It alone, however, does not ensure a prosperous future. The ability of Alaskans to successfully manage their natural resources and handle the volatile wealth it brings has been a vital element in creating and sustaining Alaska's prosperity. The future will surely be no different.

[1] In years before FY 2000, some revenues figures may include customarily restricted revenue. These include revenues in the following categories: license & permits, federal shared revenues, and charges for services and others.

[2] The property tax figure in the Spring 1991 Revenue Sources Book includes a $28 million settlement with the City of Valdez. This table excludes that settlement.

[3] Prior to FY 1988, data are for General Fund Unrestricted Revenue. This amount is higher than General Purpose Unrestricted Revenue because the data include certain shared revenue.

[4] Prior to FY 1997, includes aviation fuel tax revenue shared with local municipalities.

[5] The figure in the Spring 1994 Revenue Sources Book includes $717.6 million in settlements to the CBRF. The figure in this table excludes these settlements.

[6] Prior to FY 2000, includes revenue shared with local municipalities.

[7] The "other fish tax" category includes salmon enhancement tax and seafood and salmon marketing tax.

[8] The "other tax" category includes several taxes which are now repealed: school tax, inheritance tax, non-petroleum property tax and others.

[9] These categories are primarily comprised of petroleum.

[10] The "other rents and royalties" category includes several non-petroleum royalties and other resource revenue such as sales of state property and timber sales.

[11] Starting in FY 2001, interest earnings are included in oil and gas royalties and excluded from investment earnings.

[12] Includes payments of $22.4 million, $45.6 million and $131.4 million for FY 1978, 1979, and 1980 respectively to the Alaska Native Fund under ANCSA.

[1] In years before FY 2000, some revenues figures may include customarily restricted revenue. These include revenues in the following categories: license & permits, federal shared revenues, and charges for services and others.
[2] The property tax figure in the Spring 1991 Revenue Sources Book includes a $28 million settlement with the City of Valdez. This table excludes that settlement.
[3] Prior to FY 1988, data are for General Fund Unrestricted Revenue. This amount is higher than General Purpose Unrestricted Revenue because the data include certain shared revenue.
[4] Prior to FY 1997, includes aviation fuel tax revenue shared with local municipalities.
[5] The figure in the Spring 1994 Revenue Sources Book includes $717.6 million in settlements to the CBRF. The figure in this table excludes these settlements.
[6] Prior to FY 2000, includes revenue shared with local municipalities.
[7] The "other fish tax" category includes salmon enhancement tax and seafood and salmon marketing tax.
[8] The "other tax" category includes several taxes which are now repealed: school tax, inheritance tax, non-petroleum property tax and others.
[9] These categories are primarily comprised of petroleum.
[10] The "other rents and royalties" category includes several non-petroleum royalties and other resource revenue such as sales of state property and timber sales.
[11] Starting in FY 2001, interest earnings are included in oil and gas royalties and excluded from investment earnings.
[12] Includes payments of $22.4 million, $45.6 million and $131.4 million for FY 1978, 1979, and 1980 respectively to the Alaska Native Fund under ANCSA.

[1] In years before FY 2000, some revenues figures may include customarily restricted revenue. These include revenues in the following categories: license & permits, federal shared revenues, and charges for services and others.

[2] The property tax figure in the Spring 1991 Revenue Sources Book includes a $28 million settlement with the City of Valdez. This table excludes that settlement.

[3] Prior to FY 1988, data are for General Fund Unrestricted Revenue. This amount is higher than General Purpose Unrestricted Revenue because the data include certain shared revenue.

[4] Prior to FY 1997, includes aviation fuel tax revenue shared with local municipalities.

[5] The figure in the Spring 1994 Revenue Sources Book includes $717.6 million in settlements to the CBRF. The figure in this table excludes these settlements.

[6] Prior to FY 2000, includes revenue shared with local municipalities.

[7] The "other fish tax" category includes salmon enhancement tax and seafood and salmon marketing tax.

[8] The "other tax" category includes several taxes which are now repealed: school tax, inheritance tax, non-petroleum property tax and others.

[9] These categories are primarily comprised of petroleum.

[10] The "other rents and royalties" category includes several non-petroleum royalties and other resource revenue such as sales of state property and timber sales.

[11] Starting in FY 2001, interest earnings are included in oil and gas royalties and excluded from investment earnings.

[12] Includes payments of $22.4 million, $45.6 million and $131.4 million for FY 1978, 1979, and 1980 respectively to the Alaska Native Fund under ANCSA.

General Discussion

The state receives oil and gas revenue from four sources: oil and gas production tax, property tax, royalties and corporate income tax. The bulk of the revenue goes into the General Fund for general purpose spending. With the repeal of HB 11[1], about 30% of oil royalties goes into the principal of the Alaska Permanent Fund and 0.5% goes into the Public School Trust Fund. There also are two other funds that receive specific oil and gas revenues: the National Petroleum Reserve-Alaska (NPR-A) Fund,[2] which receives the state's share of all lease bonuses from sales in the NPR-A; and the Constitutional Budget Reserve Fund (CBRF), which receives settlements of tax and royalty disputes between the state and oil and gas producers.

Figure 4-2 shows the actual amount of each tax and royalty source in FY 2008 and forecast for FY 2009 and FY 2010. As can be seen from the figure, royalties and the production tax constitute the largest part–90%–of restricted and unrestricted oil revenue combined. Figure 4-3 shows the department's unrestricted oil revenue forecast from the current fiscal year through FY 2018 by revenue category. This section begins with a discussion of production taxes and royalties, both of which are driven by price and volume. We then review the price forecasting methodology that underlies this report, and discuss the linkage between market prices and wellhead values. We also review our production forecast, and close this section with a discussion of oil and gas property taxes, oil and gas corporate income taxes and the restricted portions of oil revenue.

[1] For more discussion on deposits to the Permanent Fund and HB11, see the Executive Summary section.

[2] This fund implements a federal requirement that the state use its share of NPR-A oil revenue to satisfy the need of local communities most affected by development in the NPR-A. For detailed information on this fund, see Section XII-P of Treasury's Investment Policies and Procedure Manual.

Crude Oil and Natural Gas Production Taxes

All oil and gas production in Alaska, except the federal and state royalty share and a small amount used in production operations, is subject to the state's production tax and to the hazardous release surcharge, which is levied only on crude oil. Taxes and surcharges are collected on a monthly basis.

The Production Tax Known as "Alaska's Clear and Equitable Share" (ACES)

In November 2007, the Alaska State Legislature passed Alaska's Clear and Equitable Share, which made changes to the state's production tax system. The previous production tax, known as the Petroleum Profits Tax (PPT), had been in place for one year prior to the passage of ACES. Both are based on net income (see Figure 4-4). For more than 20 years prior to the enactment of the PPT, the state used a production tax system that was based on the gross value at the point of production as adjusted by the Economic Limit Factor (ELF).

The ACES tax calculation starts with the value at the point of production, then subtracts upstream costs, including costs that are capitalized on company financial statements, from this value to arrive at the "production tax value." Each company that produces oil in Alaska has a production tax value based on this calculation, which is conceptually similar to a company's net income. The production tax value is multiplied by the tax rate—25%—to arrive at the base tax. Should the production tax value exceed $30 per barrel of oil produced (or the equivalent in gas), the tax rate increases by a progressive factor of 0.4% for every dollar the per-barrel production tax value is over $30. For production tax values greater than $92.50, the progressive factor changes to 0.1% for every additional dollar of profit on a barrel of oil. The maximum total tax rate is 75%.

Under ACES, a company's production tax liability is reduced to the extent that it invests in equipment, projects, or other items that are deemed "capital expenditures." Capital expenditures generally include costs related to the purchase of drilling rigs or other equipment, infrastructure, exploration and facility expansion. Capital costs are eligible for a 20% credit against the company's ACES liability, and they must be spread over two years. The 20% capital expenditure credit is intended to encourage investment in Alaska.

ACES also encourages investment in Alaska through three other tax credits. Companies producing less than 100,000 barrels of oil per day may be eligible for a tax credit of up to $12 million per year. Net losses are eligible for a 25% tax credit in the year following the loss. ACES also expanded the Exploration Incentive Credit, changing the credit rates from 20% and 40% to 30% and 40% of exploration expenditures.

Figure 4-5 shows the credits that companies reported on their annual tax returns filed March 31, 2007 and March 31, 2008. Note that most of the credits were applied against tax liabilities; those that could not be immediately applied against a tax liability will be carried forward or sold to the state or another company.

Figure 4-4. ACES Tax Liability Calculation

ACES Tax Liability = [(Value – Costs) * Tax Rate] – Credits

The terms used in the equation are defined as follows:

Value = Volume of Oil and Gas Produced x Wellhead Value

Costs = Operating Expenditures + Capital Expenditures

Tax Rate = 25% + 0.4% for every $1 per barrel that this "net income" exceeds $30

Credits = (20% x Capital Expenditures)* + (20% x Eligible Transition Expenditures)** + Base Allowance

* spread over two years

**Limited to those credits earned while the PPT was in effect and could not be used

The oil and gas tax credit fund, authorized under AS 43.55.028, was created to fund the state's purchase of production tax credit certificates. In FY 2008, the fund paid out $54 million to purchase credits, and approximately $200 million are pending approval. As of November 2008, the fund balance was $556 million.

Hazardous Release Surcharge

The Oil and Hazardous Substance Release Prevention and Response Fund was created by the legislature in 1986 to provide a "readily available funding source to investigate, contain and clean up oil and hazardous releases." An amendment in 1994 divided the fund into two separate accounts comprised of (1) the Response Account, which requires a surcharge on all oil production except federal and state royalty barrels, that may be used to finance the state's response to an oil or hazardous substance release declared a disaster by the governor; and (2) the Prevention Account, which is funded by an additional surcharge on all oil production except federal and state royalty barrels, that may be used for the clean up of oil and hazardous substance releases not declared a disaster by the governor. This account can also be used to fund oil and hazardous substance release prevention programs in Alaska.

The Response surcharge (AS 43.55.201) is $.01 per taxable barrel of oil and the Prevention surcharge (AS 43.55.300) is $.04 per taxable barrel of oil produced.

The Response surcharge is suspended when the balance of the Response Account is equal to or exceeds $50 million. As of September 30, 2008, the cumulative balance of the account was $45.4 million. The Response surcharge was re-imposed effective April 1, 2007.

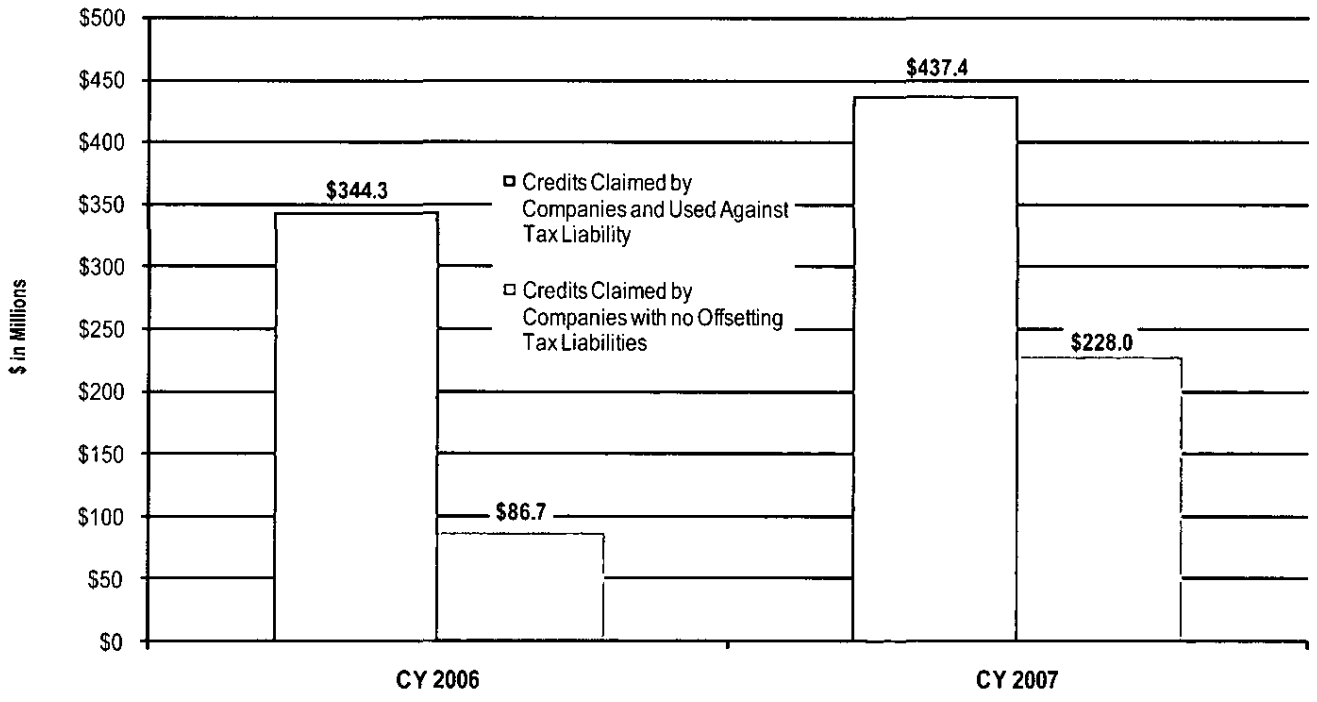
Oil Royalties

Almost all Alaska oil and gas production occurs on state lands leased for exploration and development. As the land owner, the state earns revenue from leasing as (1) upfront bonuses, (2) annual rent and (3) a royalty interest in oil and gas production.

Typically, the state issues leases based on a competitive bonus bid system. The state generally retains a royalty interest of at least 12.5%. The vast majority of current production is from leases that carry that rate. Some currently producing leases carry rates as high as 20%, and some leases also have a net profit-share production agreement.

State oil and gas leases provide that the state may take its oil royalty in barrels (in-kind) or as a percentage of the production value (in-value). In FY 2008, the state took approximately 60,000 barrels per day of North Slope production in-kind and sold it to Flint

Figure 4-5. Production Tax Credits Reported, CY 2006 and CY 2007 ($ million)



Hills Resources Alaska, LLC for their refinery at North Pole.

The royalty oil taken in-value is valued according to a formula using a market basket of spot crude oil prices closely approximating the ANS West Coast spot price of oil, less a transportation allowance back to the lease. Royalties are based on a destination price—the higher of the actual sales price or the prevailing value.[3] Pipeline and marine transportation costs are deducted from the destination value to derive the well-head value of the oil or gas.

Crude Oil Prices, Lease Expenditures, Transportation Costs and Crude Oil Production: Forecasting Methodology & Assumptions

For many years, the level of revenues accruing to the state from oil production have been contingent primarily on (1) oil prices and (2) production volumes. With the new production tax on net profits, a third factor influences revenues from oil production—costs related to exploring for, developing and producing oil, which are deductible under the production tax as "lease expenditures" and are often the basis for credits against production tax liability

Estimating oil revenue for the state entails projecting four factors:

1. Crude oil prices
2. Lease expenditures
3. Transportation charges
4. Crude oil production

This section reviews each of these factors.

To forecast oil prices, the department conducts a day-long price forecasting session to review and discuss petroleum price drivers. The session includes professionals from the Department of Revenue, Department of Natural Resources, Department of Labor, the Governor's Office of Management and Budget, the Division of Legislative Finance, the University of Alaska and industry experts.

To forecast crude oil production volumes, the Department of Revenue uses an engineering consultant in conjunction with assistance from the Department of Natural Resources and the Alaska Oil and Gas Conservation Commission. The statewide production volume forecast is based on projections of oil and gas production by field.

To forecast lease expenditures, the department uses data from industry filings as a base and projects short-term future expenditures from company submitted documents. Mid- and long-term expenditure forecasts take into account long-term development plans as detailed in company documents and are intended to coincide with our production forecast.

Transportation charges include tariffs on pipelines, marine transportation and other cost adjustments for moving crude oil to market. ACES allows "reasonable" costs to be subtracted as transportation charges.

Each of these four forecasted items play an important role in determining the level of revenue anticipated from oil production. These four items are inputs in the department's revenue model. More information about expenditures and tax calculations is explained later in this section.

1. Crude Oil Prices

Methodology for Forecasting Prices

The department uses a modified Delphi[4] technique, which involves a pre-session price solicitation, a day of presentations and discussion and a post-session price solicitation, to develop its official price forecast. Participants are asked for their projections for West Texas Intermediate (WTI) crude oil prices. Prices are forecasted in real 2008 dollars. The Department of Revenue projects the differential between WTI and ANS and uses a projection of inflation to arrive at the nominal dollar forecast used in this publication.

The fall oil price forecasting session, held October 7, 2008, had over 25 attendees from various state agencies, and included three presentations from outside consultants. In addition to hearing the presenters' views, participants reviewed forecasts from the Energy Information Administration (EIA), the New York Mercantile

[3] ANS West Coast prevailing value per 15 AAC 55,171, is the monthly average of daily spot market prices reported by Platt's Oilgram, Reuters and Dow Jones Energy reporting services. This price is published monthly on the Tax Division website at www.tax.state.ak.us.

[4] The Delphi method is a forecasting technique developed by the RAND Corporation that obtains a forecast by eliciting and refining individual forecasts from a group of independent experts. For more information, see the 1967 RAND Corporation paper "Delphi" by N.C. Dalkey, www.rand.org/pubs/papers/p3704/.

Exchange (NYMEX) and several other oil price forecasting organizations. At the end of the session, the participants completed the post-session price solicitation forms that became part of the department's official oil price forecast.

Given the oil price volatility of the past 12 months—and particularly over the past 6 months—it was decided that the department's price forecast would benefit from incorporating forecasts created by other organizations. Accordingly, three other forecasts were selected for blending with the forecast compiled from the Delphi participants: the EIA, the NYMEX and the department's Fall 2007 low price scenario forecast. The NYMEX prices as of October 24, 2008 were used for the FY 2009 forecast; the three forecasts citied above were equally weighted with the forecast from the oil price session to create the base forecast for FY 2010 through FY 2015. The long-term base forecast, which begins in FY 2016, did not change from the spring 2008 forecast of $67 real 2008 dollars for WTI ($78.51 nominal dollars).

Oil Price Forecast Assumptions

Many factors contribute to the pricing of oil on the world market. There are the fundamental economic factors of supply and demand. There are geopolitical events. There are other related issues, such as the impact of the financial sector, refining capacity and configuration and weather, that help determine how oil is priced. These factors have all been considered in establishing our oil price forecast. The following is a discussion of recent events affecting the oil market and projections for supply and demand over both the short and long term.

Recent Events Affecting the Oil Market

The year 2008 can be split into two distinct periods of time with regard to oil prices: the first half of the year was a period of rising prices leading to the all-time record oil price set on July 3; the second half has thus far been a period of falling prices, during which the oil price has fallen over 60% from July's high price.

The first half of 2008, which saw rising oil prices, was marked by uncertainty about oil supplies caused by geopolitical concerns, low spare capacity and below average oil inventories going into summer driving and hurricane seasons. World oil demand was showing significant growth, particularly in China, the Middle East and Latin America. Commodity traders expected further supply constraints and demand growth and poured money into oil price futures, propping up the high prices. On July 3, WTI oil prices closed at an all-time record of $145.29 per barrel. The summer's high prices were not yet tempering the economic outlook. In a July update, the International Monetary Fund reported global GDP growth of 4.5 percent in the first quarter of 2008, with a forecast of 4.1 percent growth in 2008 and 3.9 percent growth in 2009.

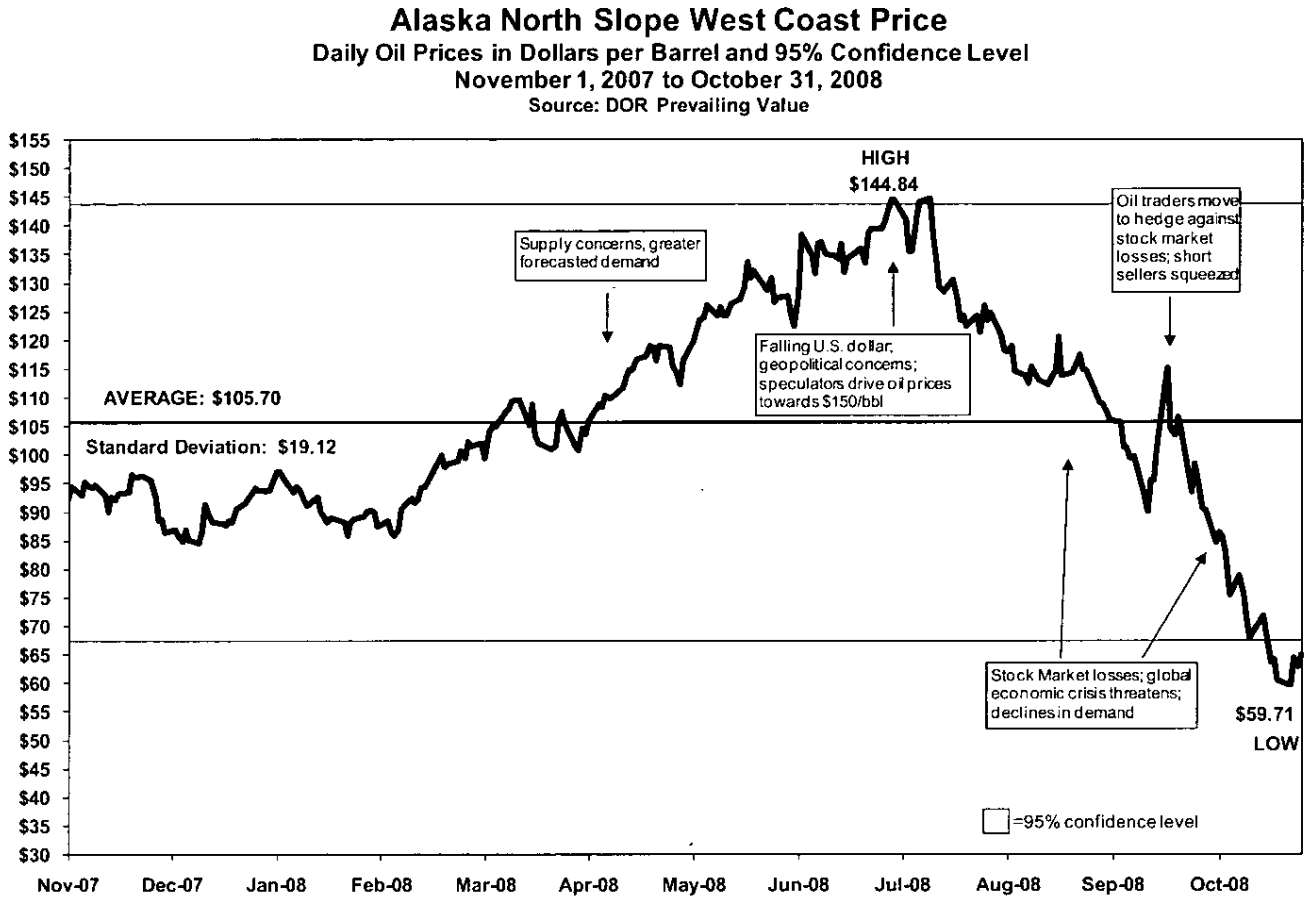
The second half of 2008 has been a dramatic reversal of the first half of the year. By October, the world economy was suffering the effects of a severe credit crisis. The combination of the economic downturn and high prices early in the year led to a reduction in worldwide energy demand and a corresponding plunge in oil prices. Compounding this decline in demand, space capacity from the Organization of Petroleum Exporting Countries (OPEC) and non-OPEC supply are both expected to grow next year, spurred in part by recent high prices. As a result, OPEC reduced their production target by 1.5 million barrels per day, citing the global economic slowdown, weakening oil demand, falling prices and increases in oil supply as rationale for the cuts. Despite their efforts, OPEC's production cuts have not been enough to stop the slide in oil prices. Other factors, such as sell-offs in the financial markets, the troubled manufacturing sector and the general slowdown in economic growth have been the drivers of oil prices for the latter half of 2008. Most advanced economies—including the US, the largest user of oil—are expected to show negative growth in 2009. Oil prices responded to the deteriorating economic outlook by falling precipitously, and are below $50 as we go to press. Oil prices are now more than 70% below the record set just a few months ago (see Figure 4-6 on the following page).

Short- and Long-Term Demand and Supply Projections

History shows that oil prices move in cycles—they go up and they come down. As oil prices increased in recent years, analysts warned that they would not go up forever. Likewise, the current decline in oil prices will eventually come to an end and prices will stabilize and even go up again. But when will this change take place? Over the short term, the outcome of the economic crisis is likely to be the major determinant of oil prices and prices will rise and fall with the outlook for the economy. A severe global recession could lead to falling demand and further declines in oil prices. A return to growth could support a return to higher price levels.

In their November 2008 update, the EIA projected that OPEC production cuts will stabilize oil prices near current levels, barring a severe global recession. The EIA predicted that world oil demand will be essentially flat in 2008

Figure 4-6. ANS Crude Price Volatility



Note: 95% confidence level equals two standard deviations, or +/- $38.24 from the average of $105.70 per barrel

and 2009, as declines in the industrial economies are offset by demand growth in China, Latin America and the Middle East. This is a change from the trend in recent years that saw demand growth increasing in almost all the economies in the world including the U.S., the world's largest oil consumer.

On the supply side, non-OPEC supply will show a moderate decline for 2008 of 280,000 barrels per day, mostly due to project delays and supply disruptions, such as Hurricane Ike in the Gulf of Mexico. In 2009, non-OPEC supply will grow by 500,000 barrels per day, led by a 450,000 barrel per day increase in the United States as new projects come on line and production recovers from Hurricane Ike. For OPEC, the EIA estimates that about 70% of the announced 1.5 million barrel per day cut will be implemented, and that OPEC will hold production steady at 31.1 million barrels per day through 2009. Combined with new projects coming on line, OPEC spare capacity should rise to over 4 million barrels per day, the highest level since 2002. Most of this spare capacity will be located in Saudi Arabia.

Current economic difficulties could be setting the stage for the next run-up in oil prices. If low oil prices and difficulty obtaining project financing restrain supply growth, this could result in a period of tight supplies when the economy and demand growth recover. As always, oil prices move in cycles and there will be ups and downs in the future as there have been in the past.

Over the long term, we must look beyond the immediate situation. The EIA projects that over the long term, world petroleum consumption will grow by about 27 million barrels per day from the 2007-2009 level of just under 86 million barrels per day to 112.5 million barrels per day by 2030. About 90 percent of the demand growth will come from developing countries, including Eastern Europe, Asia, the Middle East, Africa and Latin America.

Over half of the increase will come from developing countries in Asia, led by China. Thus, even as the United States and other developed nations limit growth in oil use, the developing world will drive world consumption higher as its people buy automobiles, build factories, generate power and engage in the other oil-intensive activities that are the hallmarks of modern society.

Increased oil supplies will be needed to meet this higher level of demand and will require new investments. The EIA projects that supply growth will be evenly spread between OPEC and non-OPEC, with over 13 million barrels per day of new production from each category by 2030.

Some pundits have suggested that world conventional oil production is beginning to plateau. Indeed, supply growth over the next two decades will require a great deal of unconventional supply. In addition to finding and developing new sources of conventional oil, sources such as biofuels, deep water oil, heavy oil and enhanced oil recovery in existing fields will be needed to achieve the growth in supply. Many of these sources have higher costs than conventional supplies, so we are unlikely to see prices much lower than current levels for a sustained period of time. Prices will have to be high enough to justify bringing new, more expensive supplies into production.

We believe that the global economy – and demand growth – will face a slowdown in the short term but will eventually return to growth over the long term. We assume that oil will continue to be a competitive energy resource. And finally, we forecast that oil prices will remain above historical levels, encouraging OPEC and non-OPEC oil-producing countries to continue to explore ways to increase production from existing facilities and to seek out new production opportunities.

Low-Price Drivers

In July of 2008, it seemed almost inconceivable that oil prices could plunge 60% in the matter of only a few months. Yet, in November 2008, WTI oil prices hovered around $60 per barrel—less than half of the price of oil in July of the same year. What caused the price of oil to come crashing down at such a rapid pace? Most economists point to market fundamentals, specifically the destruction of demand in industrialized countries, as being one of the root causes. Other causes include a weakened U.S. economy brought on by the collapse of some of the country's largest financial institutions. Fears are that this downturn could impact global markets, creating a worldwide recession.

Although oil prices have declined significantly, they could be pushed even lower. The following oil price drivers would likely push oil prices lower than the $60 range they were in during early November:

- The recession that began in the U.S. is severe and spreads worldwide. Developing nations like China and India can no longer sustain their rapid growth due to weakening demand for their products in the industrialized nations. Demand for petroleum products falls not only in the Organization for Economic Cooperation and Development (OECD), but in the emerging economies in the Asia-Pacific as well.
- Oil supplies increase as a result of investments made over the past several years. High oil prices have spurred investment in exploration and in the development of new technologies to extract oil from unconventional sources. These investments will give way to new oil supplies. Additional supplies at a time of lowered demand will drive down prices.
- OPEC is not successful in implementing production cuts and therefore is not able to support higher prices.
- Financial markets amplify the downward trend of oil prices. Commodity traders, seeing the already declining price, accelerate the downward trajectory by purchasing "puts" for prices to decline in the future.
- Governments achieve some success with energy policies. These policies include giving tax breaks to companies that adopt energy saving measures and develop alternative fuels and technology breakthroughs that reduce the use of petroleum based products.
- Governments open areas otherwise off limits to drilling. In the U.S., this would include offshore federal acreage that was under a moratorium on drilling, and vast tracts of known reserves, such as the Arctic National Wildlife Refuge.

High-Price Drivers

Oil prices reached an all-time high in July of 2008. The increase in prices was driven by a "perfect storm" of increasing demand, limited supplies, limited inventories, geopolitical instability and a weak dollar. Even OPEC nations voiced concern about the runaway prices that they claimed had little to do with market fundamentals and more to do with geopolitical and economic instability and intense commodity trading. Beginning in March, oil prices stayed above $100 per barrel for close to 200 days.

During the run-up in prices, some analysts were suggesting that prices could be as high as $200 within the year. We believe that should the right market conditions exist, prices could stay above $100 for an extended period of time.

The following oil price drivers would likely push oil prices back up to triple digits:

- The recession that began in the U.S. subsides as government programs aimed at rebuilding the economy begin to work. Demand for oil in the U.S. and in other OECD countries increases. The recession does not significantly spread to developing nations, and demand in those countries continues to grow.
- Not only does oil demand increase, but it does so at an accelerated rate. Supply cannot keep pace with demand in the developing countries as their economies expand and more people have sufficient income to travel and purchase automobiles. Demand in the industrialized nations stays flat or rises gradually as people are able to absorb the higher cost of fuels.
- Investments made by oil companies over the past few years fail to translate to additional supplies. Nationalizations and excessive taxation in oil-rich provinces drive out companies that could assist in developing new technologies to increase supplies. At the same time, OPEC nations limit their production to ensure prices remain high.
- The financial markets amplify the trends set by market fundamentals. In this scenario, one would expect to see traders having "call" options on the expectation that prices would rise.
- There are unanticipated supply disruptions due to geopolitical instability and weather-related events such as hurricanes.
- The U.S. dollar weakens against other currencies to levels seen in early 2008.

Forecast for Alaska North Slope Crude Oil

Since our Spring 2008 forecast, Alaska North Slope crude prices set an all-time record and subsequently fell by over 75%, closing below $40 per barrel in early December 2008. The Department of Revenue's fiscal year end forecast for ANS crude for 2009 is $77.66. The price of benchmark West Texas Intermediate is forecasted to average $79.79 in FY 2009, implying an average discount for ANS of $2.13 per barrel for the fiscal year.

In spring 2008, we increased our WTI oil price forecast for the period FY 2016 and beyond, from $36.00 per barrel in real 2008 dollars to $67.00 per barrel. This corresponds to an ANS price forecast of about $65.00 per barrel in real 2008 dollars. The inflation rate is 2.75% per year based on Callan Associates Inc. 5-year capital market assumptions.

2. Lease Expenditures

The passage of PPT and subsequently ACES requires the Department of Revenue to forecast lease expenditures, a task the department had never before undertaken for tax purposes. Lease expenditures are defined in part as the upstream costs that are the direct costs of exploring for, developing, or producing oil or gas deposits. When the department undertook this task for the first time in 2006, it had very little industry information on which to base its forecast.

Methodology

The first annual tax filings under PPT at the end of March 2007 provided the department with much needed data for the purpose of forecasting lease expenditures. In addition to having more accurate information about the magnitude of spending on oil and gas production, the tax returns provided insight into whether the costs were capital or operating expenditures. Forecast models were adjusted to take into account this new information.

A second annual tax filing, this time under ACES at the end of March 2008, provided additional cost information to the department. It also provided insight into current and future spending plans by companies that are engaged primarily in exploration in the remote areas of the North Slope.

Beginning in May of 2008, companies began submitting monthly information forms that detail expenditure information by field. This regularly scheduled data influx has greatly enhanced the department's abilities to monitor and project costs. Forecasted cost information provided semi-annually by taxpayers has helped department economists create better revenue forecasts.

The department also uses several other means to forecast lease expenditures, including other taxpayer-submitted information, such as plans of development, federal partnership returns and other documentation. Production profiles are reviewed, as well as publicly available information on estimated costs to bring new fields online and projected start-up dates.

Forecast

We forecast operating expenditures of $2.15 billion for FY 2009 and $2.35 billion for FY 2010. Capital expenditures are estimated at $2.37 billion and $3.05 billion for FY 2009 and FY 2010, respectively. Total forecasted lease expenditures are $4.53 billion for FY 2009 and more than $5 billion for FY 2010 (see Figure 4-7).

Figure 4-7. Basic Data Used for ANS Oil & Gas Production Taxes

	FY 2008 History	FY 2009 Forecast	FY 2010 Forecast
State Production Tax Revenue from the North Slope			
Millions of Dollars	6,879.0	3,588.8	2,389.7
Key North Slope Assumptions			
Price of ANS WC in dollars per barrel	96.51	77.66	74.42
Transit Costs & Other in dollars per barrel	6.05	5.82	5.48
ANS Wellhead in dollars per barrel	90.46	71.84	68.93
Production in barrels per day	715,950	688,880	664,557
Royalty and federal barrels per day	89,494	91,553	88,227
Taxable barrels per day	626,456	597,327	576,330
Lease Expenditures in Millions of Dollars			
Operating Expenditures [OPEX]	1,881	2,153	2,352
Capital Expenditures [CAPEX]	1,967	2,373	3,052
Total Expenditures	3,848	4,526	5,404
Implied North Slope Data			
CAPEX Credits Used against Tax Liability in $millions	411.4	396.8	440.6
CAPEX Credits not Used against Liability in $millions	250.8	375.0	275.0
Lease Expenditures per barrel of oil produced			
OPEX	7.2	8.6	9.7
CAPEX	7.5	9.4	12.6
Total Expenditures	14.7	18.0	22.3
Average Production Value per Barrel [Pre-Tax]	75.7	53.8	46.7
Production Tax Collected per Taxable Barrel	30.1	16.5	11.4

Notes

1 This table presents a grossly simplified snapshot of the production tax calculation on an average North Slope basis, and any use of this data should be viewed accordingly. Additionally, because production tax is calculated on a company basis, any simplification such as this distorts the actual value to companies. For example, a company's pre-tax production value per barrel could be significantly more or less than that shown in this table, depending on the "mix" of petroleum investments they have on the North Slope.

2 Lease expenditures for FY 2008 are estimated and unaudited. Expenditure data for July 2007 through December 2007 are as reported on tax returns received March 31, 2008, while January 2008 through June 2008 are estimates.

3 Expenditure data for FY 2009 and FY 2010 are compiled from company submitted expenditure forecast estimates and other documentation as provided to the DOR.

4 CAPEX credits are spread out over two years as specified in the ACES production tax. In addition, the assumptions for the transitional credits and the $12 million credits for small Alaska producers are not included in the table.

3. Transportation Charges and Other Production Costs

Taxpayers subtract marine transportation costs, the Trans Alaska Pipeline System (TAPS) tariff, feeder pipeline tariffs and an adjustment for Quality Bank charges from the appropriate destination value. This netback calculation is shown in Figure 4-8 for FY 2008-2018. The Department of Revenue has not yet finalized its regulations which address the methodologies to be used in calculating "reasonable" transportation charges. Pending completion of these regulations, the Fall 2008 forecast utilitzes the same methodology adopted in prior years.

Marine Transportation Costs

Crude oil deliveries to Valdez are shipped to Washington and California refineries by tanker. State-of-the-art double-hulled tankers known as "Alaska Class" vessels are now the standard. The mandated replacement of vessels without double hulls with new, more expensive double-hulled vessels, and the continued use of smaller qualified vessels to replace larger vessels retired by compliance with the Federal Pollution Act of 1990 have increased tanker transportation costs. We forecast that a modest increase in tanker transportation costs per barrel will be necessary in order to maintain the integrity of the fleet.

Trans Alaska Pipeline System (TAPS) Tariff

The TAPS tariff forecast uses a cost-of-service ratemaking approach with guidance from recent decisions by the Federal Energy Regulatory Commission (FERC). Components of the model and the methodology are designed to emulate the regulatory approach and outcome.

In June of 2008 the FERC issued Opinion and Order No. 502. The opinion affirmed a 2007 Administrative Law Judge (ALJ) ruling that interstate rates charged in 2005 and 2006 were not just and reasonable and ordered limited refunds to shippers who had overpaid. Refunds are limited to the difference between the 2005/2006 rates and the 2004 filed rate.

Order 502 clarified provisions in the ALJ's order regarding the appropriate dismantlement, removal and restoration (DR&R) expenses and modified the return on equity component of the capital structure to be consistent with FERC's new policy on proxy groups for pipelines. The order also established the basis for the new just and reasonable rates to go into effect on a prospective basis. New rates are to be based on Opinion No. 154-B methodology and are to be determined after the carriers make a compliance filing to establish rates in conformance with the Initial Decision and Order 502 within thirty days of the order.

In July 2008, the carriers submitted their compliance filing to implement the rulings in the Order 502 decision. Rates for 2005 and 2006 were calculated using test period and actual period data. Rates for 2007 and 2008 were not calculated because the order did not require them and proceedings regarding the 2007 and 2008 rate filings are being held in abeyance subject to the outcome of the current proceedings.

In November 2008, FERC issued their Order on Rehearing and Compliance. The order denied rehearing of return on investment issues and balances in property and deferred return accounts. They also denied rehearing

Figure 4-8. Fall 2008 Forecast Assumptions, FY 2008 and Forecasted FY 2009-2018 (nominal $ per barrel)

Fiscal Year	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
ANS West Coast Price	96.51	77.66	74.41	71.65	72.57	73.55	74.24	73.82	78.51	80.74	83.03
ANS Marine Transportation	1.93	2.17	2.43	2.48	2.53	2.58	2.63	2.68	2.73	2.78	2.83
TAPS Tariff	5.08	4.52	3.75	3.79	3.95	4.01	4.02	4.11	4.23	4.35	4.35
Other Deductions & Adjustments [1]	-0.96	-0.87	-0.70	-0.67	-0.57	-0.52	-0.44	-0.45	-0.51	-0.48	-0.50
ANS Wellhead Price	90.46	71.84	68.93	66.05	66.67	67.48	68.04	67.48	72.06	74.09	76.35

[1] Includes other adjustments such as quality bank charges, location differentials and company-amended information.

on the uniform rate issue, but granted rehearing on the pooling arrangement and directed carriers to include a pooling mechanism when the uniform rate becomes effective. Carriers are to modify their governing operating agreement to include an all-inclusive pooling mechanism so that the revenue requirement is based on usage, not ownership share.

The order accepted compliance rates using test period data and rejected rates using actual data. The following are the rates effective January 1, 2005:

	2005	2006
Golden Valley Electric	$1.23	$1.30
Petrostar	$1.90	$2.00
Valdez Intrastate	$1.91	$2.01
Valdez Interstate	$1.92	$2.02

Our TAPS tariff forecast does not attempt to predict the outcome of pending litigation or estimate the level and timing of protested tariffs. Corrections between filed, charged and allowed rates will be made through the refund process and are not part of the tariff forecast. The TAPS forecast model simulates what the tariff would be using standard rate making practices with assumptions and data from the compliance order. The model calculates a total revenue requirement for operating and maintaining the pipeline, while providing a return for the investment in the pipeline. The total revenue requirement is then unitized by dividing by the total number of barrels of oil shipped through the pipeline.

The rate base calculation uses test period data from Order 502 and a 154-B methodology with the FERC specified depreciation schedule and life of the pipeline. Other cost components are projected using relationships developed from historical data and assumptions regarding future costs and investments. Additional capital expenditures are input for the Strategic Reconfiguration project.

Adjustments to the rate base use

- Beginning rate base
- Trending
- Deferred return
- New capital additions
- Depreciation
- Ending rate base.

Per FERC Order 502, the return component uses a capital structure of 58% debt and 42% equity with a 7.16% cost of debt and an 8.89% real return on equity. The deferred return and the Allowance for Funds Used During Construction (AFUDC) are amortized per the specified rate. Components of the revenue requirement include

- Operating expenses
- Property tax
- Depreciation expense
- Interest expense
- Return on equity
- Amortization of AFUDC
- Amortization of deferred return
- Income tax allowance
- Non-transportation revenues.

The sum of the cost components listed above is the total revenue requirement (TRR) for the pipeline. A tariff in dollars per barrel is calculated by dividing the TRR by throughput or deliveries. Dividing by throughput makes the tariff sensitive to the production profile and subjects the forecast to the inherent uncertainties in production forecasting.

Using the methodology specified in Order 502 generates a lower tariff than using the methodology in the existing settlement agreement. The TAPS Settlement Agreement (TSA), established in 1985, defines the TAPS Settlement Methodology (TSM) for each carrier to use to calculate their annual TAPS tariff. The TSA expires at the end of 2011, but the agreement has a provision that allows parties to open negotiations on a follow-on agreement after December 31, 2006. That provision was triggered on January 1, 2007, and negotiations are on-going. If an agreement is not reached within a two-year period, any party, including the State of Alaska, has the right to terminate the agreement. It is thus possible that use of the TSM will terminate as early as January 1, 2009.

Carriers may continue to file TSM ceiling rates but the effective rates are assumed to be those in compliance with Order 502. The tariff forecast in Figure 4-8 is consistent with the order and uses the Fall 2008 production forecast discussed below. For calendar year 2009, the tariff using Order 502 is about two dollars less than the tariff calculation using the TSM. Since the tariff model is calendar year, the fiscal year forecast is calculated as the average of the current calendar year and the previous calendar year. The forecast is $4.52 per barrel for FY 2009, $3.75 for FY 2010, then increases modestly for the next few years. TAPS is an old pipeline with operating expenses accounting for about 80 percent of the total revenue requirement. As the production decline accelerates and operating costs get spread over fewer units, the tariff will escalate more rapidly.

The tariff forecasting model is cost-based and simulates the regulatory approach and outcome. As a cost-based tariff, we assume that the TAPS tariff is "reasonable" for transportation charges for the purposes of this forecast.

Feeder Pipeline Tariffs and Other Adjustments

These costs include both feeder pipeline charges and other cost adjustments to account for the different qualities of oil

entering the pipelines, as well as market location differentials for intrastate sales. Transportation costs for feeder pipelines are incurred to move the crude oil from the various North Slope production fields to Pump Station No. 1 of the TAPS. A tariff is calculated for each of the feeder pipelines according to the particular settlement agreement. Inflation and cost-based factors are used to project the tariffs, which are weighted by each pipeline's throughput volume to estimate a weighted-average feeder pipeline tariff.

Wellhead Price

The combination of ANS wellhead value and production volumes forms the basis for both state production taxes and royalties. The wellhead value is calculated by subtracting the relevant marine transportation and pipeline tariff costs (as well as adjustments for North Slope feeder pipelines and pipeline Quality Bank) from the appropriate destination value. Figure 4-8 reflects this calculation for FY 2008-2018.

4. Crude Oil Production

Methodology

In a hydrocarbon rich basin such as the North Slope of Alaska, any discussion regarding production forecasting methodology should begin with identifying those resources that are not included in our estimates. We do not include any estimates for undiscovered oil, including future potential from the Alaska National Wildlife Refuge (ANWR), the National Petroleum Reserve-Alaska (NPR-A), the federal Outer Continental Shelf (OCS) or onshore lands within the state of Alaska. We exclude from our estimates production from most of the known heavy or viscous oil deposits; in fact we consider none of the approximately 20 billion barrels from the giant Ugnu deposit. We exclude 96% of the viscous/heavy oil from the large West Sak field, projecting roughly 400 million barrels recovery out of roughly 10 billion barrels in place. We also exclude 87% of the heavy oil at Schrader Bluff, projecting roughly 285 million barrels recovery out of over 2 billion barrels in place. Additionally, none of the known oil discoveries in the federal OCS, in fields such as Sivilluq, Kuvlum and Sandpiper, potentially totaling hundreds of millions of barrels of recoverable oil, are considered in the forecast. None of the known discoveries west of the small NPR-A accumulations in the vicinity of the Alpine field are included. Finally, we limit any production attributed to a promising new enhanced oil recovery technology termed 'low salinity waterflood' to a portion of the Endicott field, where results from an ongoing pilot project are expected by year end. Laboratory tests using Endicott rock show low salinity waterflood can increase ultimate recovery by 10-15%, or approximately 150 million barrels. Successful slopewide implementation of low salinity waterflood could result in incremental recovery measured in the billions of barrels. We also exclude any enhanced oil recovery from CO_2 injection, a long proven technology that complements low salinity waterflood and provides necessary disposition of an otherwise unwanted byproduct of gas conditioning associated with major gas sales from the North Slope. Carbon dioxide injection, presumed to occur only with major gas sales, could add hundreds of millions barrels of incremental recovery from the North Slope.

We exclude the aforementioned resources, both known and unknown, in order to avoid speculation and to reduce the uncertainty typically associated with the commercialization, timing and magnitude of resource development. Accordingly, we believe that our current estimates of ultimate recovery from the North Slope are conservative.

For the production forecasting process, we engage a petroleum engineering consultant who performs a bottom-up evaluation on each of the individual fields that yields a forecast of three types of oil production: (1) oil that is currently being produced, (2) oil production that we expect to realize from projects currently under development and (3) oil production that we expect to realize from projects under evaluation. A detailed description of each type of production is provided later in this section. The engineering consultant employs decline curve analysis, augmented by generally accepted engineering principals, discussions with field operators and public and private information, in order to assemble our long range production forecast.

Assumptions

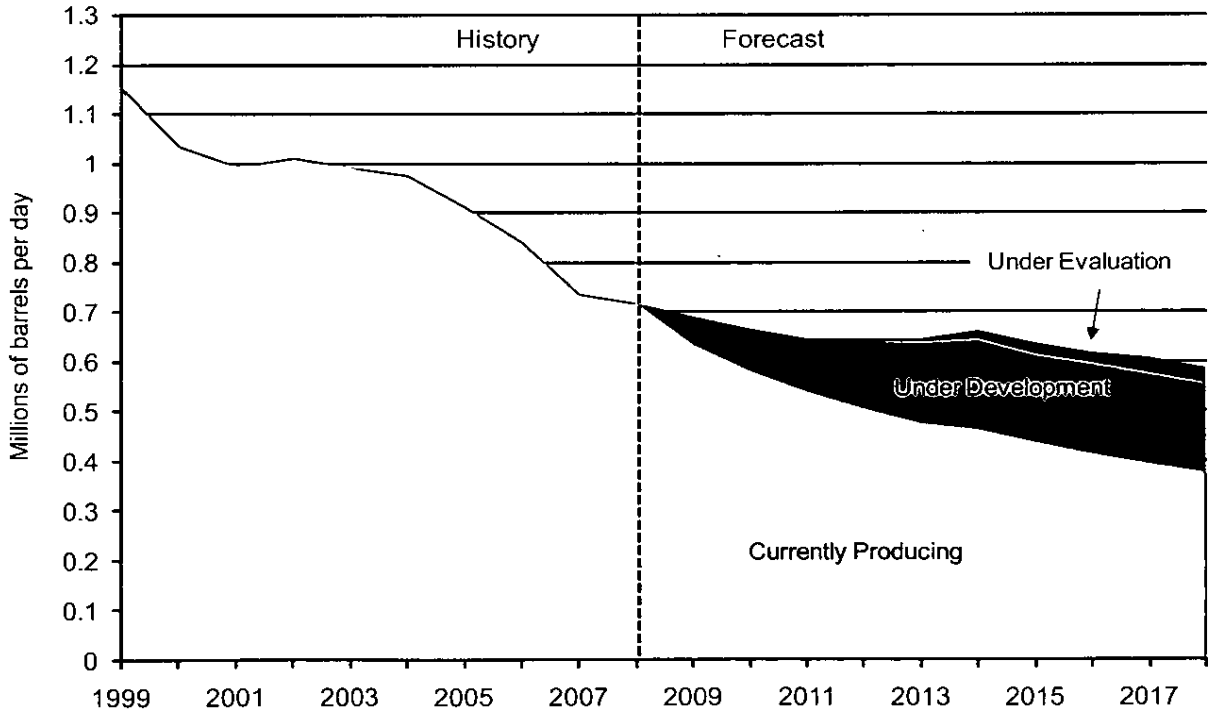
We continue to make adjustments to our production expectations from the North Slope in this Fall 2008 forecast. As always, we examine reservoir performance, review the uncertainty associated with the pace and scope of development of new fields and new projects within existing fields and re-evaluate planned and unplanned downtime for all fields. Our review indicates that, with minor exceptions and notwithstanding planned and unplanned surface disruptions, all reservoirs are performing at or above expectations. Through FY 2050, we expect to produce almost 6.7 billion barrels of liquid hydrocarbons.

In the next ten years, we anticipate new developments on state and federal lands, both of which benefit the state. Most of the opportunities to add production from state lands are from expanded heavy/viscous oil development (West Sak, Orion, Polaris,

Schrader Bluff fields), continued satellite development at Alpine (Fiord, Fiord-West, Nanuq, Qannik, Alpine West fields) and new developments at Oooguruk and Nikaitchuq. Production from the Oooguruk field began during the summer of 2008 and is progressing as expected. As anticipated, the Nikaitchuq field was sanctioned in early 2008, and development is underway, with first oil expected in the first quarter of CY 2010. Although we forecast expanded development at West Sak, we have again assumed a slower pace of heavy oil development there to allow the operator to fully evaluate technical and commercial issues associated with the development. For similar reasons, heavy oil development at Orion and Polaris was assumed to be slower, although Phase 2 development is moving forward. For the Milne Point Unit, which includes both the Kuparuk pool and the heavier Schrader Bluff pool, we have assumed a slower pace of development to allow for reprioritized spending on infrastructure renewal projects. We have assumed a delayed development of Point Thomson and associated satellites for one year in keeping with our 10 year development lead time, which may be conservative. The development of Point Thomson has not been tied to any gas pipeline project or gas contract. Our review of Alpine satellite field development yielded expanded development at Alpine West, the addition of new satellite Fiord West, increased expectations from Fiord and reduced expectations from Nanuq. New satellite Qannik came on production during the summer of 2008 and is under development.

Our forecast includes production from federal lands. From a revenue standpoint, the State of Alaska benefits in at least five ways, albeit to a lesser degree, from new developments on federal lands: (1) shared royalties (27.5% of federal share) from federal OCS fields such as Liberty; (2) production taxes on federal oil produced onshore within Alaska (NPR-A); (3) increased property tax on any infrastructure on state lands required to produce and transport federal oil; (4) corporate income taxes; and (5) lower pipeline transportation tariffs, which increase wellhead prices. In addition, any oil processed through the Endicott facility (from Liberty for example) may increase net profit payments to the state. Federal oil produced within the State of Alaska can return up to 75% of the revenue generated by oil produced on state lands. Federal oil produced from non-state lands provides a revenue benefit limited to decreased transportation tariffs and increased property taxes.

Figure 4-9. Alaska North Slope Production, FY 1999-2008, and Forecasted FY 2009-2018.



For the fall forecast we have reevaluated our assumptions regarding the scope and pace of development of projects within the federal NPR-A to better reflect the timing of competing projects at Alpine and to permit further delineation drilling and subsequent evaluation this winter. The end result is a slight delay in development at known accumulations Spark and Moose's Tooth. Liberty development is underway, with long lead items such as building the world's largest land drilling rig setting the pace. The rate profile we use for Liberty is adapted from the plan of development recently filed with the Minerals Management Service and should be considered a base case scenario with upside potential.

Although we anticipate new developments from state and federal lands over the next 10 years to contribute to overall production and partially mitigate base decline, we continue to make adjustments near term to reflect ongoing infrastructure renewal projects. Much of the new production we forecast relies upon the continued use of aging wells, flowlines, production facilities and pipelines, as does at least 500,000 barrels per day of existing production.

Crude Oil Production Forecast

Our three categories of North Slope production are illustrated in Figures 4-9 and 4-10. We do this so that the reader will have an understanding about the uncertainty associated with the production forecast. We forecast production of only those fields that have already been discovered and at a minimum are being evaluated for development.

Currently Producing

Production characterized as "currently producing" includes baseline production and presumes a continued level of expenditure sufficient to promote safe, environmentally sound operations. Such expenditures include the following: well diagnostic and remedial work, data acquisition and rate-enhancing expenditures such as perforating, acid stimulation, well workovers, fracture treatments, artificial lift optimization and production profile optimization. This category of production also presumes continued gas and water injection for pressure support. We exclude 10% of the barrels currently producing at Kuparuk and 15% of the barrels currently producing at Prudhoe Bay to reflect future development drilling, opting instead to characterize some as "under development." Based on historical forecasting performance, we assign a 98% confidence level for the current fiscal year and a 95% confidence level for the second fiscal year forward.

Currently Under Development

Production characterized as "currently under development" is based on new projects either currently funded or

Figure 4-10. Alaska North Slope Production, FY 2008 and Forecasted FY 2009-2018[1] (million barrels per day)

Fiscal Year	Currently Producing	Under Development	Under Evaluation	Total ANS
2008	0.716	0.000	0.000	0.716
2009	0.633	0.056	0.000	0.689
2010	0.580	0.084	0.000	0.665
2011	0.538	0.105	0.001	0.644
2012	0.504	0.138	0.003	0.644
2013	0.474	0.164	0.006	0.644
2014	0.461	0.183	0.016	0.660
2015	0.436	0.178	0.022	0.635
2016	0.412	0.183	0.020	0.616
2017	0.393	0.183	0.030	0.606
2018	0.375	0.180	0.030	0.585

[1] Some of the oil forecasted in the Under Development and Under Evaluation categories are from new projects in fields currently producing.

Figure 4-11. New Oil as a Percentage of Total Oil (million barrels per day)

Fiscal Year	Total New Oil	ANS Total	Percent New Oil
2009	0.056	0.689	8.2%
2010	0.085	0.665	12.7%
2011	0.106	0.644	16.5%
2012	0.141	0.644	21.8%
2013	0.170	0.644	26.4%
2014	0.199	0.660	30.2%
2015	0.200	0.635	31.4%
2016	0.204	0.616	33.1%
2017	0.213	0.606	35.2%
2018	0.210	0.585	36.0%

awaiting project sanctioning in the very near future. It includes projects that may be in the design/construction phase, as well as development drilling and enhanced oil recovery (miscible or immiscible injection) projects, currently funded or underway, but not included in the "currently producing" category. It also includes incremental oil expected from the long-term gas cap water injection project at Prudhoe Bay and the low salinity waterflood at Endicott. Examples of production currently under development include the Fiord, Nanuq, Alpine West, Fiord West and Qannik satellites at Alpine; the Borealis, Orion and Polaris satellites at Prudhoe Bay; J-pad, 3K-pad, 1N-Pad and 1P-Pad at West Sak; development drilling at Tarn and Northstar; Liberty; Oooguruk; Nikaitchuq; 10% of existing Kuparuk production and 15% of existing Prudhoe Bay production.

The timing of these projects are often influenced by budget cycles, working interest owner approval, available human resources, equipment procurement, rig availability and even available bed space in camps on the North Slope. Our subjective confidence level for this category of production is 85% to 90%.

Currently Under Evaluation

Production characterized as "currently under evaluation" includes technically viable projects currently in the pencil sharpening stage where engineering, cost, risk and reward are all being actively evaluated. These projects are all currently unfunded by the operators but have a high chance of being brought to fruition. Examples include heavy oil development outside of the core or near core area at West Sak, longer term Orion drilling, half of all new Schrader Bluff drilling, Point Thomson and associated satellites and pools within the NPR-A.

Confidence levels vary for this category of production. Production from the known NPR-A fields that are undergoing further delineation and likely will use the existing Alpine facility might have confidence levels approaching that of "production under development." High-cost, scope-challenged developments such as Point Thomson probably deserve a lower confidence level, not because of the lack of reserves, but because of the uncertainty in the timing of first production.

As Figure 4-11 shows, by FY 2013 more than one-quarter of our projected oil production will come from projects requiring significant new investment.

Undiscovered Potential

The long term revenue outlook published in this book is associated with our forecast of production from oilfields that have already been discovered. However, it is important to discuss the potential for future production from resources currently undiscovered.

In August 2007, the U.S. Department of Energy released a report entitled *Alaska North Slope Oil and Gas: A Promising Future or an Area in Decline?*[5]

[5] http://www.netl.doe.gov/publications/press/2008/08002-DOE_Releases_Alaska_Report.html

which assessed the potential for Alaska to remain a major producer of oil and gas under different development scenarios. The report summarizes near-term potential (2005-2015) and long-term potential (2015-2050) mostly under a major gas sales scenario. According to the report, the North Slope is a relatively young petroleum province from an exploration perspective, and may provide oil, and increasingly more important natural gas, for years to come. The 2007 report, which is based on information as of 2005, is currently being revised to reflect changes since then. The revised report is estimated to be released early in 2009.

The 2007 report evaluates geologic and commercial viability of future oil and gas production from five areas or provinces: (1) the central Arctic area between the Colville and Canning Rivers (and adjacent state waters), (2) the 1002 area of ANWR, (3) NPR-A, (4) the Beaufort Sea OCS and (5) the Chukchi Sea OCS. Under the most optimistic scenario, DOE reported mean technically recoverable oil resources of 47.9 billion barrels and mean technically recoverable gas resources of 194.9 trillion cubic feet (TCF) from these five areas. Figure 4-12 shows the breakout by exploration area.

These figures represent the amount of hydrocarbon resources that are technically recoverable with today's technology assuming that all five areas are open to development; however, they say nothing about the economic recoverability. DOE also estimates economically recoverable reserves from these five areas using a range of oil and gas prices ($25 to $60 per barrel and $3.13 to $7.50 per thousand cubic feet of gas), and an 8:1 oil-to-gas price ratio. Using the high oil price case of $60 per barrel, total economically recoverable oil for the 2005-2050 time period is estimated at 35-36 billion barrels of oil and 137 TCF of gas. Figure 4-13 details the economic recoverable resources by area.

Petroleum Property Tax

An annual tax is levied each year on the full and true value of property taxable under AS 43.56. The tax on oil and gas property is the only statewide property tax. The valuation procedure for three distinct classes of property—exploration, production and pipeline transportation—is described here.

Exploration Property

Value is based on the estimated price that the property would bring in an open market under prevailing market conditions in a sale between a willing seller and a willing buyer, both conversant with the property and with prevailing general price levels.

The state petroleum property assessor gathers raw data for determining market value by reviewing the details of equipment sales in Alaska when available and reviewing trade journals. This data is then applied to the taxable

Figure 4-14. Distribution of Petroleum Property Tax, FY 2008 ($ million)[1]

Municipalities	Gross Tax	Local Share	State Share
North Slope	254.3	235.2	19.1
Unorganized	52.7	0.0	52.7
Valdez	26.5	26.5	0.0
Kenai	12.7	6.6	6.1
Fairbanks	10.2	6.8	3.3
Anchorage	1.8	1.4	0.5
Other Municipalities [2]	0.0	0.0	0.0
Total	**358.3**	**276.5**	**81.7**

[2] Includes Matanuska-Susitna Borough, Cordova and Whittier.

property, taking into account age, capacity and physical and functional obsolescence.

Production Property

Value is determined on the basis of replacement cost new less depreciation, based on the economic life of the proven reserves.

The factor used in the depreciation calculation for the facility typically equals the years of remaining life divided by the total life.

Pipeline Transportation Property

The full and true value of taxable pipeline property is determined with due regard to the economic value of the property based on the estimated life of the proven reserves of gas or unrefined oil that will be transported by the pipeline. We rely upon several standard appraisal techniques to value Alaska pipelines. When market rents are available, we analyze the income method under which the value is the net present worth of all future income streams of the pipeline. We primarily rely on replacement cost new less depreciation, based on the economic life of the reserves that feed the pipeline. This is especially useful when rents are constrained by the regulatory process or when market rents cannot be obtained for use in the income method.

Figure 4-14 illustrates the property tax distribution between local communities and the state for FY 2008. The property value is assessed by the state. A local tax is levied on the state's assessed value for oil and gas property within a city or borough, and is subject to the local property tax limitations established in AS 29.45.080 and AS 29.45.100. The state's mill rate is effectively 20 mills minus the local rate.

Petroleum Corporate Income Tax

Alaska levies two types of corporate income tax. This section focuses on the oil and gas corporate income tax. Forecasts and discussion of the corporate income tax as applied to corporations other than oil and gas corporations can be found in the Other Revenue section of this forecast.

An oil and gas corporation's Alaska income tax liability depends on the relative size of its Alaska and worldwide activities and the corporation's total worldwide net earnings. The corporation's Alaska taxable income is derived by apportioning its worldwide taxable income to Alaska based on the average of three factors as they pertain to the corporation's Alaska operations: (1) tariffs and sales, (2) oil and gas production and (3) oil and gas property.

Historically, oil and gas corporate income tax revenue has varied greatly along with oil prices and oil industry profits. In FY 1982, revenue from this tax was $668.9 million. As recently as FY 1994, the oil and gas corporate income tax generated a mere $17.8 million. For the past several years, revenues from the oil and gas corporate income tax have benefitted from high oil prices and oil industry profits, generating $605.8 million in FY 2008. This represents a small increase from the $594.4 million collected in FY 2007.

We produce our forecast of oil and gas corporate income tax collections using an economic model based on the statistical relationships between historical tax payments, crude oil prices, North Slope oil production and refinery margins. We then adjust for refunds and carryforwards which cause actual collections to differ from estimated payments.

We forecast oil and gas corporate income tax collections of $635 million in FY 2009, benefitting from record oil prices early in the fiscal year. We expect moderation in oil prices to result in a decline to $560 million in FY 2010.

Restricted Oil Revenue

According to Article IX, Section 15 of the Alaska Constitution, a minimum of 25% of all mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments and bonuses received by the state must be deposited into the Alaska Permanent Fund. In addition, AS 37.14.110 requires a contribution of 0.5% of all royalties and bonuses to the Public School Trust Fund. Settlements with, or judgments against, the oil industry involving tax and royalty disputes must be deposited in the Constitutional Budget Reserve Fund (CBRF).

The state is entitled to 50% of all bonuses, rents and royalties from oil development activity in the federal NPR-A, all of which flows into the NPR-A Special Revenue Fund. Revenue in the fund each year is available for appropriation in the form of grants to municipalities that demonstrate present or future impact from NPR-A oil development. Of the revenue not appropriated to the municipalities, 25% goes to the Permanent Fund, 0.5% goes to the Public School Trust Fund, and the rest may be appropriated to the Power Cost Equalization and Rural Electric Capitalization Fund. Any remaining revenue after these appropriations lapses into the General Fund.

Figure 4-15 reflects restricted oil and gas revenue.

General Discussion

This section includes income from sources other than oil, state investments and federal receipts, including non-oil taxes, charges for services, fines and forfeitures, licenses and permits, rents and royalties and other revenue sources. These revenue sources are divided between unrestricted and restricted revenues; the amounts of each are reflected in Figures 5-2 through 5-8 throughout this chapter. Restricted revenue includes money deposited in funds other than the General Fund, as well as receipts that are restricted by statute or that the legislature customarily appropriates for a particular purpose or program, such as fish tax revenue that is shared with municipalities.

Taxes

Alcoholic Beverages Tax

Alcoholic beverage taxes are collected primarily from wholesalers and distributors of alcoholic beverages sold in Alaska. The per-gallon tax rates on alcoholic beverages are $1.07 for beer, $2.50 for wine and $12.80 for liquor. Qualifying small brewers pay tax at a rate of $0.35 per gallon for beer. Revenue is deposited into the General Fund. Fifty percent of the revenue is deposited into a subfund of the General Fund, the Alcohol and Other Drug Abuse Treatment and Prevention Fund, and is treated as restricted in this forecast.

Over the past 10 years, alcohol consumption has grown at an average annual rate of 0.7% for beer, 4.3% for wine, and 3.8% for liquor. We forecast that consumption will continue to grow at these historical average rates.

Charitable Gaming

Under Alaska law, municipalities and qualified nonprofit organizations may conduct certain charitable gaming activities. The purpose of these activities is to derive public benefit in the form of money for the charities and revenues for the state. The Department of Revenue collects permit and license fees, a 1% net proceeds fee and a 3% pull-tab tax. We forecast that revenues from charitable gaming activity will increase slightly in FY 2009 before returning to current levels in FY 2010.

Commercial Passenger Vessel Taxes

In August 2006, Alaska voters approved an initiative that imposed new taxes and fees on commercial passenger vessels:

- The Cruise Ship Passenger Fee, a per-passenger tax of $46 on commercial passenger vessels with 250 or more berths. Revenues are deposited into a subfund of the General Fund, the Commercial Vessel Passenger Tax Account. Five dollars of the tax is distributed to each of the first five ports of call, and an additional 25% of the tax is designated for other local governments impacted by the cruise ship industry via the Regional Cruise Ship Impact Fund. The entire passenger fee is considered restricted for purposes of this forecast. We forecast that just over 1 million passengers per year will be subject to the tax, representing no change from FY 2008 levels.
- The Ocean Ranger Fee is an additional per-berth fee of $4 to operate the Ocean Ranger program, which provides for independent observers of engineering, sanitation and health practices. This fee is considered restricted and is included in the Charges for Services section of this forecast.
- The Large Passenger Vessel Gambling Tax is a tax of 33% on the adjusted gross income from gaming or gambling activities aboard large passenger vessels in the state. Revenue goes to the General Fund and is considered unrestricted. We expect revenue to remain constant at FY 2008 levels.
- The Alaska corporate income tax now applies to large commercial passenger vessels. The effects of this provision are included in our forecast of corporate income taxes.
- There are new penalties for false reporting, violating environmental regulations and failing to make proper disclosures on promotions and shore side activity sales. Any revenue from these provisions is included in the Fines and Forfeitures section of this forecast.

Corporate Income Tax

Alaska levies two types of corporate income tax: one that applies to oil and gas corporations and one that applies to corporations other than oil and gas corporations. Forecasts and discussion of the corporate income tax as applied to oil and gas corporations can be found in the Oil Revenue section of this forecast.

Alaska levies the corporate income tax on net income of corporations that do business in the state and derive income from sources within Alaska. Corporate tax rates are graduated from 1% to 9.4% in $10,000 increments of Alaska taxable income; the maximum rate of 9.4% applies to taxable income over $90,000. S-Corporations and LLCs that file federally as partnerships are generally exempt from corporate income tax. Corporations compute their tax liability based on federal taxable income with Alaska adjustments. Corporations other than oil and gas corporations apportion their income to Alaska by using a three-factor apportionment based on sales, property and payroll. Alaska taxable income is determined by applying the apportionment factor to the corporation's modified federal taxable income.

We produce our forecast of non-petroleum corporate income tax collections by using two economic models: one for the largest sector (in terms of collections), mining, and one for all other sectors.

The mining sector model is based on the statistical relationship between historical tax payments, corporate profits and zinc prices. Zinc prices are used because zinc accounts for over half of Alaska minerals production. The model for all sectors other than mining is based on the statistical relationship between historical tax payments, corporate profits and crude oil prices. Crude oil prices are used because the price of oil influences company profitability in many economic sectors in Alaska. After forecasting estimated payments, we then adjust for refunds, carry-forwards and other payments that cause actual collections to differ from estimated payments.

Over the past few years, income tax revenue from corporations other than oil and gas corporations has increased significantly. In FY 2004, revenue from the tax was $39.6 million. By FY 2008, revenue increased to $182.7 million. Much of the growth came from mining, with collections from that sector growing from $0.4 million in FY 2004 to $61.3 million in FY 2008. Looking forward, collections will be lower in part because of the economic downturn, and in part due to lower prices for Alaska's oil and minerals. The first half of FY 2009 appears strong and collections are expected to total $160 million for the year. However, by FY 2010 we expect that collections will fall to $90 million – about half of FY 2008 total.

Electric Cooperative and Telephone Cooperative Taxes

The electric cooperative tax is based on kilowatt hours furnished by qualified electric cooperatives recognized under Title 10 of the Alaska Statutes. The telephone cooperative tax is levied on gross revenue of qualified telephone cooperatives under Title 10. Revenue from cooperatives located in municipalities is treated as restricted revenue in this forecast because it is shared 100% with the municipalities. The small amount of revenue collected from cooperatives outside municipalities is retained by the state. We forecast that revenues from the electric and telephone cooperative taxes will grow according to the overall rate of inflation.

Estate Tax

The estate tax is levied on the transfer of an estate upon death. The Alaska estate tax is tied to the federal tax, with the amount of the state tax equaling the maximum state credit allowed on the estate's federal return. All revenue derived from estate taxes is deposited in the General Fund.

As a result of changes to the federal estate tax, the Alaska estate tax was phased out completely beginning January 1, 2005. The federal estate tax changes that caused the state tax to phase out are currently scheduled to sunset after December 31, 2010. Assuming the tax changes sunset as scheduled, Alaska will begin to receive revenue from the estate tax again in FY 2012.

Fisheries Business Tax

The fisheries business tax is levied on businesses that process fisheries resources in or export fisheries resources from Alaska. Although the tax usually is levied on the act of processing, the tax is often referred to as a "raw fish tax" because it is based on the value of the raw fishery resource. Tax rates vary from 1% to 5%, depending on whether a fishery resource is classified as "established" or "developing," and whether it was processed by a shore-based or floating processor. Revenue from the tax is deposited in the General Fund. Fifty percent of the revenue (before credits) is shared to qualified municipalities and is treated as restricted in this forecast.

We forecast fisheries business tax revenues based on estimated taxable values of the major fisheries in the state and historical effective tax rates. Fisheries business tax revenue retained by the state is reduced by a forecast of tax credits, including Salmon Product Development credits, which apply only to the state portion of the tax.

Fishery Resource Landing Tax

The fishery resource landing tax is levied on fishery resources processed outside of and first landed in Alaska, and is based on the unprocessed statewide average price of the resource. The tax is collected primarily from factory trawlers and floating processors that process fishery resources outside the state's 3-mile limit and bring their products into Alaska for shipment. The tax rates vary from 1% to 3%, based on whether the resource is classified as "established" or "developing." All revenue derived from the tax is deposited in the General Fund. Fifty percent of the revenue (before credits) is shared with qualified municipalities, and is treated as restricted in this forecast.

We forecast fisheries resource landing tax revenue based on estimated taxable values of the major fisheries in the state and historical effective tax rates. Fisheries resource landing tax revenue retained by the state is reduced by a forecast of tax credits which apply only to the state's share of the tax.

Insurance Premium Tax

Insurance companies in Alaska pay an insurance premium tax instead of corporate income tax, sales or other excise taxes. Revenue is deposited into the General Fund, and for most types of insurance, the tax is treated as unrestricted revenue. Insurance premium taxes on worker's compensation insurance are deposited into a subfund of the General Fund, the Workers Safety and Compensation Fund, and are reflected as restricted in this forecast. The restricted component also includes service fees paid into the Workers Safety and Compensation Fund by employers who are uninsured or self-insured.

We forecast insurance premium tax revenues based on estimates provided by the Department of Commerce, Community and Economic Development's Division of Insurance, which administers the insurance premium tax, and the Department of Labor and Workforce Development's Workers Compensation Division, which collects worker's compensation service fees.

Mining License Tax

The mining license tax is a tax ranging from 0% to 7% on the net income of all mining operations in the state. Except for sand and gravel operations, new mining operations are exempt from the mining license tax for a period of 3½ years after production begins.

Our forecast is produced using a bottom-up approach that estimates tax payments for each of the major mines in the state based on expected minerals prices and production.

Mining license tax revenues were $54.4 million in FY 2008, the second-highest level on record. However, prices for many minerals have declined recently. In particular, zinc prices have fallen by about 75% from the highs reached in late 2006 (zinc prices are particularly important because zinc accounts for more than half of Alaska's non-petroleum mineral production).

Based on expectations of lower profits at Alaska's mines, we forecast that mining license tax revenues will decline from recent records. We foresee a moderate decline in FY 2009 followed by collections of under $20 million by FY 2010.

Motor Fuel Tax

The motor fuel tax is imposed on all motor fuel sold, transferred or used within Alaska. Per gallon rates are 8 cents for highway use, 5 cents for marine fuel, 4.7 cents for aviation gasoline, 3.2 cents for jet fuel, and 8 cents or 2 cents for gasohol, depending on the season, location and EPA mandate. Motor fuel taxes are collected primarily from wholesalers and distributors licensed as qualified dealers. Various uses of fuel are exempt from tax, including fuel used for heating or flights to or from a foreign country. All revenue derived from motor fuel taxes is deposited in the General Fund. Sixty percent of the taxes attributable to aviation fuel sales at municipal airports are shared with the respective municipalities, and are treated as restricted for purposes of this forecast.

A temporary suspension of the motor fuel tax was included in the energy assistance package introduced by the governor and passed by the legislature this summer. This suspension took effect September 1, 2008 and ends August 31, 2009. Therefore, FY 2009 will include only two months of motor fuel tax collections and FY 2010 will include ten months of collections.

We forecast motor fuel tax revenue based on Energy Information Agency projections for U.S. motor fuel consumption growth, with adjustments for the temporary tax suspension.

Tire Fee

The tire fee has two components. The first component is a tax of $2.50 on all new tires sold in Alaska for motor vehicles intended for highway use. The second component is an additional $5 fee per tire on all new tires with heavy studs sold in Alaska, and a $5 fee per tire on the installation of heavy studs on a previously un-studded tire.

We forecast tire fee revenue based on the expected number of vehicle registrations in the state.

Seafood Assessments and Taxes

The Department of Revenue administers five different programs that raise money through seafood assessments and taxes. The rates for these assessments and taxes are determined by a vote of the appropriate association within the seafood industry, by members of the Alaska Seafood Marketing Institute, or by the Department of Revenue.

The five programs are the following:

- The seafood marketing assessment, which applies to all seafood products made or first landed in Alaska and all unprocessed products exported from Alaska.
- The dive fishery management assessment, which is levied on the value of fishery resources taken using dive gear in a designated management area.
- The regional seafood development tax, which is levied on the value of fishery resources in a designated management area.
- The salmon enhancement tax, which is levied on salmon sold or exported from designated aquaculture regions.
- The cost recovery fisheries assessment, a new program authorized in 2006. This program allows hatcheries to establish a common property fishery and recoup costs through an assessment on fishery resources taken in the terminal harvest area. So far, no hatcheries have elected to use this program as a funding source.

Although revenue received under these assessments is deposited in the General Fund, funds are treated as restricted revenue in this forecast because they are set aside for the legislature to appropriate for the benefit of the seafood industry, either in marketing or in management and development of the industry.

We forecast salmon enhancement tax revenue based on the estimated taxable value of Alaska's salmon fishery and historical effective tax rates. We forecast seafood development tax revenue based on the estimated taxable value of seafood processed in Alaska. All other seafood assessments are reflected as receipt supported services under the Charges for Services section of this forecast and are not forecast individually.

Tobacco Tax

The tobacco tax is levied on cigarettes and tobacco products sold, imported or transferred into Alaska. Tobacco taxes are collected primarily from licensed wholesalers and distributors. There are two components to the tobacco tax: the cigarette tax and the other tobacco products tax.

The tax rate on cigarettes has been $2.00 per pack since July 1, 2007. Of the

cigarette tax, $0.76 per pack is deposited into the School Fund, and is considered restricted revenue. All cigarette and tobacco products license fees are also deposited in the School Fund. The remainder of the cigarette tax revenue is deposited into the General Fund. Of the General Fund portion, 8.9% is deposited into a subfund of the General Fund, the Tobacco Use Education and Cessation Fund, and is treated as restricted in this forecast.

We forecast cigarette tax revenue based on projected average consumption declines of 4% annually. Our forecast does not include the effects of any possible increase in the federal excise tax on cigarettes.

The tax rate on other tobacco products, such as cigars and chewing tobacco, is 75% of the wholesale price and is deposited entirely in the General Fund.

We forecast that moderate increases in wholesale prices and consumption will result in other tobacco products tax revenue continuing to increase at the 10-year average rate of about 6% annually.

Grand Total	**572.8**	**502.3**	**440.6**

[1] In addition to the worker's compensation insurance premiums for the Insurance Premium Tax, this amount also includes services fees from employers who are self-insured.

Vehicle Rental Tax

The vehicle rental tax is a 10% tax on most passenger vehicle rentals of 90 days or less, and a 3% tax on rentals of recreational vehicles for 90 days or less. The vehicle rental tax provisions became effective January 1, 2004.

We forecast that vehicle rental tax revenue will remain flat in FY 2009 due to the economic downturn then increase with the overall rate of inflation.

Charges for Services

The charges for services category includes fees and other program charges for state services. Revenues reported in this category do not include all charges for state services—just those that do not fit into other categories in this report.

Most of these receipts are considered restricted revenue because they are returned to the program where they were generated. The only unrestricted revenues listed in this category come from charges that do not have program receipt designations, or are not otherwise segregated and appropriated back to a program. Many of the charges for services are small amounts that we have grouped into the broad categories "General Government," "Natural Resources" and "Other." Our forecast for these categories is based on fiscal year-to-date collections and historical averages. The largest categories of charges for services are listed separately and are discussed below.

Marine Highway Fund

The Alaska Marine Highway Fund is a subfund of the General Fund and receives revenue from state ferry system operations. The legislature has discretion over how the revenue is allocated. Because revenue is customarily appropriated for Alaska Marine Highway operations, they are considered restricted for this forecast. We forecast Marine Highway Fund receipts based on revenue expectations in the Alaska Marine Highway System business plan.

Commercial Passenger Vessel Fees

Commercial passenger vessel fees paid into the Environmental Compliance Fund come from two sources: ocean ranger fees and environmental compliance fees. All fees paid into the fund are considered restricted for purposes of this forecast. We forecast receipts based on an estimate of just over 1 million passengers per year.

The Ocean Ranger Fee is a per-berth fee of $4 that applies to commercial passenger vessels with 250 or more berths. The fee is levied to support the Ocean Ranger Program, which provides for independent observers of engineering, sanitation and health practices aboard the vessels. This fee was imposed as part of an initiative passed by voters in August 2006, and is covered in more detail in the Taxes section of this chapter.

Environmental compliance fees are levied on commercial passenger vessels with over 50 berths. Fees range from $75 to $3,750 per vessel based on the number of berths, and funds are used to support environmental compliance programs.

Program Receipts

Under AS 37.05.142 – 37.05.146, receipts from authorized state programs are accounted for separately and appropriated to administer the source program, implement laws related to the program, or cover costs associated with collecting the receipts. Some programs with program receipt authority are not included in our Charges for Services category because they are reported elsewhere in this forecast or because they do not generate revenue available for general appropriation.

We forecast program receipt revenues based on discussions with the Governor's Office of Management and Budget and analysis of the most recent budget expectations for these categories.

Program receipts listed in this section are

- Receipt supported services, which includes state services such as Pioneers homes and occupational licensing that are funded by program receipts. Some seafood assessments are included in this category.
- Statutorily designated program receipts, which includes money received from sources other than the state or federal government and restricted by the terms of a gift, grant, bequest or contract.
- Regulatory Commission of Alaska (RCA) receipts, which are regulatory cost charges and user fees levied on utilities and pipelines to fund costs of regulation.
- Test fisheries receipts, generated by the Department of Fish and Game from selling fish caught during testing the commercial viability of fisheries.
- Timber sale receipts, which are used to fund the timber disposal program of the Department of Natural Resources.
- Oil and Gas Conservation Commission receipts, which are fees and charges for regulation of oil and gas wells and pipelines.
- Business license fees collected by the Department of Commerce, Community and Economic Development.

Fines and Forfeitures

Fines and forfeitures include civil and criminal fines and forfeitures and money received by the state from the settlement of civil lawsuits. The largest single source of receipts under this category is the multi-state tobacco settlement. Other sources are forecast based on fiscal year-to-date collections and historical averages.

Tobacco Settlement

The tobacco Master Settlement Agreement was signed by 46 states (including Alaska) in November 1998 and dictates annual payments to each of the states. All tobacco settlement revenue is considered restricted for purposes of this forecast. Eighty percent of the settlement revenue is earmarked for the Northern Tobacco Securitization Corporation for payments on bonds that were sold based on the future revenue stream. The remaining 20% of the revenue is deposited into the Tobacco Use Education and Cessation Fund, a subfund of the General Fund.

Tobacco settlement payments are based on a complex formula that takes into account several factors including declines in cigarette consumption, inflation and certain adjustments for litigation expenses and market share losses related to

Figure 5-5. Fines & Forfeitures, FY 2008 and Forecasted FY 2009-2010 ($ million)

	History	Forecast	
Unrestricted	FY 2008	FY 2009	FY 2010
Fines & Forfeitures	8.9	8.3	8.7
Total Unrestricted	**8.9**	**8.3**	**8.7**
Restricted			
Tobacco Settlement (North Tobacco Securitization Corporation)	27.6	28.3	27.4

Other	7.4	2.0	2.5
Total Restricted	**41.9**	**37.4**	**36.7**
Grand Total	**50.8**	**45.7**	**45.4**

the settlement. We forecast that cigarette consumption will decline at an annual rate of 4% and inflation will be 2.75%.

Licenses and Permits

Licenses and permits represent government revenue derived from charges for participating in activities regulated by the state. The majority of the receipts under this category are from motor vehicle registration and fishing and hunting license fees. Alcoholic beverage license fees are also forecast separately. There are several other small license and permit fees which are summarized in the Other Fees category.

Alcoholic Beverage Licenses

Alcoholic beverage licenses are required to manufacture or sell alcoholic beverages in Alaska. Licenses are issued by the Alcoholic Beverage Control Board and revenue is deposited into the General Fund. All of the revenue from biennial license fees collected within municipalities, excluding annual wholesale fees and biennial wholesale license fees, is shared with the municipalities and treated as restricted for purposes of this forecast. We forecast little change in revenue because alcoholic beverage license issuance is limited based on population.

Fishing and Hunting License Fees

Fishing and hunting licenses are issued by the Alaska Department of Fish and Game for participation in various fishing, hunting and related activities. The majority of these fees are appropriated to a special revenue fund called the Fish and Game Fund. Money in the fund may only be spent for fish and game management purposes. We forecast fishing and hunting license fee revenue based on expectations of the Alaska Department of Fish and Game.

Motor Vehicle Registration Fees

Motor vehicle registration fees are collected by the Division of Motor Vehicles within the Department of Administration. Most are considered unrestricted license and permit revenue; however, some registration fees are considered restricted receipt supported services and are reflected in the Charges for Services section of this forecast. We forecast motor vehicle registration fee revenue based on expectations of the Division of Motor Vehicles.

Rents and Royalties

Rents and royalties from sources other than oil and gas fall into two categories: mining rents and royalties and other non-petroleum rents and royalties.

All rents and royalties from oil and gas are reported in the Oil Revenue section of this forecast.

Mining Rents and Royalites

As with oil and gas production, the state earns revenue from other mineral production that occurs on state lands leased for exploration and development. As the

landowner, the state earns revenue from leases as (1) upfront bonuses, (2) annual rent charges and (3) as a retained royalty interest in minerals production.

Until October 2008, only 25% of the rents and royalties were deposited in the Permanent Fund and 0.5% to the School Fund. With the repeal of House Bill 11 this year, the amount rises to 50% for leases issued after December 1979. The amound deposited into the School Fund remains unchanged. See the Oil Revenue section for a more complete discussion of HB11.

We forecast mining rents and royalties based on expected changes in minerals prices as well as mine-specific forecasts for large mines on state land.

Other Non-Petroleum Rents and Royalties

The state receives revenue from the leasing, rental and sale of state land. While all of these revenues are deposited into the General Fund, some are deposited in subfunds of the General Fund and are treated as restricted for purposes of this forecast. This category includes revenues from leasing, rental and sale of state land that do not fall into the oil and gas or mining royalties categories. We forecast other non-petroleum rents and royalties based on analysis of fiscal year-to-date and historical collections.

Other

This category includes unclaimed property transfers, transfers to the state from component organizations and miscellaneous revenues. Miscellaneous revenues, which include contributions to the state and other revenues, are projected based on analysis of fiscal year-to-date and historical collections. Unclaimed property and transfers from component organizations are discussed below.

Unclaimed Property

Alaska's Unclaimed Property statutes require businesses and corporations to report unclaimed intangible property to the state. Property is reportable if an owner cannot be located, the owner has not cashed a property check, or an account has not had any owner-initiated activity for at least three years. Unclaimed property may include checking accounts, customer deposits and over-payments, gift certificates, unpaid wages, and security related

Grand Total	**76.9**	**84.8**	**81.4**

accounts. The state holds the property in trust until the owner or his or her legal heir claims it. Each year the unclaimed property trust account is evaluated and the excess of the working trust balance is transferred to the General Fund.

A $15 million transfer was processed during FY 2008. Transfers in FY 2009 and following years are expected to be $6.5 million per year. We forecast unclaimed property revenue based on estimates prepared by the Unclaimed Property Group of the Department of Revenue.

Transfers from Component Organizations

Each year, the state receives money in the form of transfers from component organizations, such as the Alaska Housing Finance Corporation, frequently in the form of dividends. Component organizations are covered in more detail in the Public Corporations & the University of Alaska section of this forecast. Some component organizations do not make transfers to the state, and as a result not all component organizations are listed here.

Actual transfers for FY 2008 are reflected in draft tables from the Comprehensive Annual Financial Report. Forecasts for FY 2009 and FY 2010 transfers are based on discussions with the Governor's Office of Management and Budget and analysis of the most recent budget expectations for these categories.

Transfers from component organizations presented under this category may differ from those presented in the Public Corporations & University of Alaska section for two reasons: (1) amounts in this section account differently for funds paid over time for multi-year capital projects; and (2) amounts in this section include funds that are transferred to the state and then appropriated to the component unit for operations.

General Discussion

The federal government continues to play a significant role in Alaska's economy. In Federal Fiscal Year (FFY) 2007, the federal government spent $9.4 billion in total direct expenditures in Alaska.[1] The majority of that spending came from the activities of various federal agencies, including defense spending, procurement contracts, retirement and disability payments, wages, loans and grants. Another $1.3 billion was spent on other federal assistance, such as loan guarantees and insurance.

Alaska has historically ranked first in per capita federal spending, however, increased federal expenditures to Louisiana and Mississippi after Hurricane Katrina and Rita in FFY 2006 dropped Alaska to third. In FFY 2007, Alaska moved up, ranking second only to Virginia (see Figure 6-3). In the last several years, federal spending in Alaska has grown faster than total U.S. spending. However, for FFY 2007, federal direct expenditures in Alaska increased by only 1.4 percent from FFY 2006, while total U.S. federal expenditures increased by 4.4 percent. In FFY 2005, Alaska received $1.84 for every dollar paid in federal taxes, the most recent data available from the Tax Foundation.[2]

Among federal agencies, the Department of Defense spends the most in Alaska, followed by the Department of Health and Human Services. Together, these two departments account for 61percent of all federal direct spending in the state. Not surprisingly, a large portion of federal money flows into Alaska through salaries of federal employees. However, 32 percent of all federal direct spending comes in the form of grants, mostly to state and municipal governments, and to nonprofit organizations.

In FY 2008, the State of Alaska received and spent more than $1.9 billion in federal funds. This federal funding is generally restricted to specific uses such as road improvements, Medicaid payments and aid to schools. Potential changes to federal law, differing federal and state fiscal years and varying numbers of eligible Alaskans in certain programs make forecasting federal revenue difficult. The estimates we present for FY 2009 and FY 2010 are from the Office of Management and Budget and are based on state

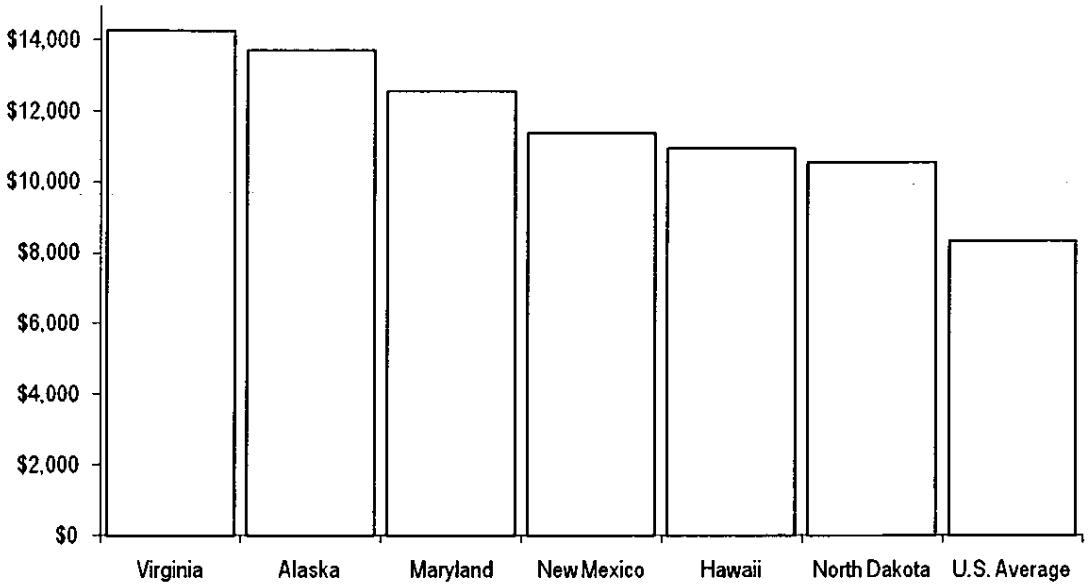
Figure 6-3. FFY 2007 Federal Spending per Capita, Top Six States



agency projections of potential federal revenues.

For FY 2009, the state is budgeted to receive more than $2.5 billion in federal receipts. The same amount is predicted for FY 2010. Most federal funding requires state-matching money. The budgeted state match and the top three budgeted categories for federal spending in Alaska for FY 2009 are included in Figure 6-5.

It is important to note that the state routinely budgets for federal funds in excess of expected allotments. The legislature authorizes state agencies to receive and spend the maximum that federally funded programs might receive, while the actual appropriation amounts are generally less. In addition, some of the funding granted for multi-year capital projects is received and spent in years following the one in which the money is procured. All federal funds, whether spent in the operating or capital budget, are restricted by legislative appropriation to specific uses.

[1] Governmental Accounting Standards Board (GASB) principles require the recognition of changes in the value of investments as income or losses at the end of each trading day, whether the investment is actually sold or not.

Investment Forecast

To forecast investment revenue for the current fiscal year—FY 2009—we combine actual performance through September 30, 2008, with a projection for the remainder of the year. Forecasts and estimated capital market median returns are based on information supplied by the state's investment consultant, Callan Associates Inc., and their 5-year capital market estimated returns.

Unrestricted Investment Revenue

Unrestricted investment revenue is earned on the General Fund non-segregated investments managed by the Treasury Division. Interest Paid by Others is interest received by the state other than on its investments. Oil and gas royalty interest, production tax interest, and corporate income tax interest are included in the Oil Revenue section of this forecast.

Restricted Investment Revenue

Restricted investment revenue consists of earnings from governmental funds, the Constitutional Budget Reserve Fund (CBRF), other Treasury-managed governmental funds and the Alaska Permanent Fund.

Figure 7-3. Callan Associates Inc.'s 5-year Capital Market Estimated Returns, as of September 30, 2008

Asset Class	Benchmark for Asset Class	%/Year Median Expected Return	%/Year Expected Risk[1]

Inflation	CPI-U	2.75%	1.40%

[1] The continued volatility in the world's financial markets makes focus on the "Expected Risk" column (far right in the table above) particularly appropriate. The numbers in the Expected Risk column represent a statistical measure called standard deviation, which is the most commonly used measure of risk in the investment world. The standard deviation is a measure of the dispersion of data around its mean. The analyst can use this measure of dispersion to provide a range of possible outcomes at any desired level of confidence. In the data in this table, the level of confidence is set at 67% or one standard deviation. A higher level of confidence would require a broader range. For example, Callan estimates an average annual return for the domestic broad market fixed-income asset class of 5.25% and an expected risk for that asset class of 4.5%. That means Callan is forecasting that two-thirds of the time the annual return for the domestic broad fixed-income asset class will fall between 0.75% (the median expected average annual return of 5.25% minus the expected risk of 4.5%) and 9.75% (the median expected return plus the expected risk). A prediction at 95% confidence would run from -3.75% to 14.25%, too broad a range to be useful. The probability that a particular asset class or portfolio will have a negative return over a given period of time is another way to reflect the riskiness of that asset class or portfolio.

[1] Data projected using September 30, 2008, financial statements and the Fall 2008 revenue forecast. Callan Associates Inc.'s 2007 capital market assumptions result in 8.05% median expected total return for FY 2009 and FY 2010.

[2] Inflation proofing is required by statute AS 37.13.145(c). Callan Associates Inc.'s inflation rate of 2.75% was used to project inflation proofing.

[3] The Permanent Fund dividend payment is recorded as a liability at fiscal year end and is paid out the following month.

8. State Endowment Funds

This section compares important attributes of six endowment funds. The University of Alaska endowment is included in this comparison because it is one of Alaska's public endowment funds that uses the annual distribution calculation method typical of the vast majority of endowments in the United States and Canada.[1]

The fiduciary for each of these endowment funds has the responsibility for establishing an asset-allocation policy for the fund. Figure 8-1 on the next page compares the asset-allocation policies for these endowments.

Under the standards adopted by the Governmental Accounting Standards Board (GASB), public funds calculate and report their income by recognizing changes in the value of securities as income, or losses, as they occur at the end of each trading day. They do this regardless of whether the securities are actually sold and the income, or losses, are taken or realized. All six of these endowments report annual income on this basis. However, as reflected in Figure 8-2 on the next page, four of them use other measures of annual income for determining their distributions. These include the Alaska Permanent Fund and the Mental Health Trust Fund, both administered by the Alaska Permanent Fund Corporation, the Public School Trust and the Alaska Children's Trust.

In determining the amount of income available for distribution each year for the two funds managed by the Alaska Permanent Fund Corporation, gains or losses on individual investments are not recognized until the investment is sold. For calculating distributable income for the Public School Trust and the Alaska Children's Trust, only interest earned and dividends received are treated as income. Gains and losses in the value of individual investments are never recognized as income. By law, those gains and losses remain with the principal of the fund.

[1] The predominant practice, making annual distributions of 4% to 5% of the market value of the endowment, developed following a 1968 Ford Foundation study. See The Ford Foundation Managing Educational Endowments (New York, New York; 1968).

Figure 8-1. Target Percent Asset Allocation—State Endowment Funds

	Cash	U.S. Bonds	International Bonds	U.S. Equities	International Equities	Global Equities	Real Estate	Alternative Investments	Total
Alaska Permanent Fund	0	19	3	26	13	14	10	15	100
Mental Health Trust	0	19	3	26	13	14	10	15	100
Public School Trust	0	55	0	45	0	0	0	0	100
Alaska Children's Trust	0	18	0	58	24	0	0	0	100

University of Alaska Endowment	3	17.5	0	26	11	10	8.5	24	100

Figure 8-2. Calculation of Annual Income—State Endowment Funds

	Financial Reporting of Income	Distributable Income
Alaska Permanent Fund	GASB (recognize gains and losses based on change in market value)	Interest earnings + dividends paid + gains and losses on investments actually sold
Mental Health Trust	GASB (recognize gains and losses based on change in market value)	Interest earnings + dividends paid + gains and losses on investments actually sold
Public School Trust	GASB (recognize gains and losses based on change in market value)	Interest earnings + dividends paid; gains and losses on value of securities are never income, they become part of principal
Alaska Children's Trust	GASB (recognize gains and losses based on change in market value)	Interest earnings + dividends paid; gains and losses on value of securities are never income, they become part of principal
Power Cost Equalization Endowment	GASB (recognize gains and losses based on change in market value)	GASB (recognize gains and losses based on change in market value)
University of Alaska Endowment	GASB (recognize gains and losses based on change in market value)	GASB (recognize gains and losses based on change in market value)

Figure 8-3. Distributable Income Determination—State Endowment Funds

Alaska Permanent Fund

The annual distribution for the Permanent Fund Dividend follows the formula in AS 37.13.140-.150, which specifies that 10.5% of the past five years' total realized income shall be paid out as dividends but also sets the limitation that the annual distribution may never exceed 50% of the balance in the fund's Realized Earning Account (REA). The 50% limitation has never been triggered.

Mental Health Trust

The Mental Health Trust Board adopted a policy, beginning in FY 2001, to distribute 3.5% a year of the market value of the fund's total assets. The distribution rate had been 3% for FY 1996-1998 and 3.25% for FY 1999-2000. Because of recent declines in market value, the board is exploring a redefinition of "principal" so that losses in market value would be proportionally allocated to the principal account and the earnings account rather than assigning the entire value of any losses to the earning account.

Public School Trust

The annual distribution is 4.75% of a five-year moving average of the fund's principal market value so long as that amount does not exceed the interest and dividend earnings available in the earnings account. The trust has accumulated a sizable earnings account balance, providing a cushion for the fund to maintain its annual distributions in a sustained bear market.

Alaska Children's Trust

The annual distribution is 4.75% of a five-year moving average of the fund principal's market value so long as that amount does not exceed the interest and dividend earnings available in the earnings account. The trust has accumulated a sizable earnings account balance, providing a cushion for the fund to maintain its annual distributions in a sustained bear market.

Power Cost Equalization Endowment

The annual distribution is 7% of the fund's market value. For the initial transition years, state statute specifies that the fund shall use the market value on February 1 for the subsequent fiscal year's distribution. Thereafter, the fund is to distribute each year 7% of the monthly average market value for a specified 36-month period.

University of Alaska Endowment

The annual distribution is 5% of a 5-year moving average of the market value of the fund.

Figure 8-4. Inflation-Proofing Procedures—State Endowment Funds

Alaska Permanent Fund

An annual appropriation is needed to inflation proof the principal of the Permanent Fund (but not the accumulated earnings) pursuant to AS 37.13.145. The legislative appropriation requires a transfer from the Realized Earnings Account to the fund's principal an amount equal to the calculated U.S. Consumer Price Index's effect on the value of the principal, comprised of oil and gas royalty contributions and legislative appropriations. The Alaska Permanent Fund Corporation's Trustees have proposed a constitutional amendment that would inflation proof the entire fund—the principal and accumulated earnings—by limiting the annual distribution of earnings to 5% of a five-year moving average of the market value of the fund.

Mental Health Trust

The Mental Health Trust Authority has adopted two policies to inflation proof the fund. First, it limits distributions to 3.5% of the fund's market value. (The authority's ultimate goal, after further building up the principal, is to distribute 5% of the fund's market value each year, which would still allow enough retained earnings to inflation proof the fund.) Second, the authority also has adopted a policy transferring money from the reserve account to the principal whenever the reserve exceeds four times the annual income distribution, to help build up the fund's principal.

Public School Trust

The asset-allocation policy is such that—when combined with the requirement that the fund's capital gains and losses remain part of the principal—the retained capital gains are adequate to inflation proof the fund.

Alaska Children's Trust

The asset-allocation policy is such that—when combined with the requirement that the fund's capital gains and losses remain part of the principal—the retained capital gains are adequate to inflation proof the fund.

Power Cost Equalization Endowment

The legislature, in selecting a 7% distribution policy, expressly elected not to inflation proof this fund, but rather to distribute all, or almost all, of its anticipated annual earnings.

University of Alaska Endowment

The university's distribution policy of 5% of the moving five-year average of the fund's market value should allow for retained earnings to inflation proof the fund.

9. Public Corporations & University of Alaska

Public Corporations

The state has established the following public corporations to carry out certain public policies:

- Alaska Housing Finance Corporation (AHFC)
- Alaska Industrial Development and Export Authority (AIDEA)
- Alaska Energy Authority (AEA)
- Alaska Student Loan Corporation (ASLC)
- Alaska Municipal Bond Bank Authority (AMBBA)
- Alaska Aerospace Development Corporation (AADC)
- Alaska Railroad Corporation (ARC)

These seven corporations and the University of Alaska are components of state government whose activities are accounted for in the state's Comprehensive Annual Financial Report separately from the activities of primary state government. Information in this section is provided by these corporations.

Four of these corporations pay some portion of their income as an annual "dividend" to the state. They include the Alaska Housing Finance Corporation, Alaska Industrial Development Authority, Alaska Student Loan Corporation and Alaska Municipal Bond Bank Authority.

The members of the AIDEA Board of Directors also serve as Board of Directors of AEA, though AIDEA and AEA continue to exist as separate legal entities. AEA has no employees, and AEA contracts to have AIDEA employees administer AEA programs. Other corporations have their own staffs and boards. While neither the sale of bonds nor the expenditure of bond proceeds by these corporations are subject to the state's Executive Budget Act, expenditures for the day-to-day administration of all of these corporations except the Alaska Railroad are subject to the Executive Budget Act.

The Alaska Commission on Postsecondary Education (ACPE) administers the ASLC programs. The ASLC has no employees, and the executive director of the ACPE serves as the executive officer of the ASLC.

The six figures that follow in this section summarize the activities of these corporations.

Figure 9-1. Public Corporations—Missions. What does the corporation do and how does it do it?

Alaska Housing Finance Corporation

Using proceeds from the sale of bonds backed by its corporate assets, AHFC purchases home mortgages from Alaska banks. Income from payments on these mortgages repays bond holders and adds to the corporation's income, thereby enabling the corporation, since FY 1991, to pay an annual dividend and/or return of capital to the state. In addition to ensuring that Alaskans, especially Alaskans of low and moderate income and those in remote and underdeveloped areas of the state, have adequate housing at reasonable cost, the corporation administers federally and state funded multi-residential, senior and low-income housing, residential energy and home weatherization programs. In recent years, the legislature has authorized AHFC to finance the construction of schools, University of Alaska housing and other capital projects identified by the legislature.

Alaska Industrial Development and Export Authority

By lending money, guaranteeing loans or becoming an owner, AIDEA makes financing available for industrial, export and other business enterprises in Alaska. The corporation earns money from interest on its loans, investments, leases and operations of its properties. The corporation has paid an annual dividend to the state since FY 1997.

Alaska Energy Authority

AEA provides loans to utilities, communities and individuals to pay for the purchase or upgrade of equipment and for bulk fuel purchases. Additionally, the agency administers the Power Cost Equalization program, subsidizing rural electric costs with the Power Cost Equalization Endowment. AEA also receives federal and state money to provide technical advice and assistance in energy planning, emergency response management, energy infrastructure construction and conservation in rural Alaska. AEA owns and, under contractual agreements, operates and maintains state-owned power projects, such as Bradley Lake and the Alaska Intertie.

Alaska Student Loan Corporation

The Alaska Student Loan Corporation uses proceeds from bond sales to finance education loans made by the Alaska Commission on Postsecondary Education. Loan repayments satisfy bond obligations and enhance the corporation's capital asset base. Alaska statutes authorize the board of directors to annually declare a return to the state of a portion of its net income. The board has declared return of capital payments for each year beginning in FY 2001 through FY 2007. Alaska statutes also authorize the corporation to issue bonds for the purpose of financing projects of the state. Those bonds in aggregate may not exceed $280 million.

Alaska Municipal Bond Bank Authority

The Bond Bank loans money to Alaska municipalities for capital improvement projects. The bank's larger capital base, its reserve funds and its credit rating enable it to sell bonds at lower interest rates than the municipalities could obtain on their own. The Bond Bank earns interest on the money it holds in reserve and has returned a dividend to the state every year since 1977.

Alaska Aerospace Development Corporation

The corporation operates and maintains a commercial spaceport in Kodiak, Alaska and provides commercial rocket vehicle launch support services. It promotes space-related business, research, education and economic growth in the State of Alaska.

Alaska Railroad Corporation

The corporation operates freight and passenger rail services between Seward and Fairbanks, including a spur line to Whittier. In addition, the corporation generates revenues from real estate it owns.

Figure 9-2. Public Corporations—State Capitalization. How did the state capitalize the corporation?

Alaska Housing Finance Corporation
The legislature appropriated $739.9 million in cash and $292.5 million in mortgages held by the General Fund to the corporation between 1976 and 1984. The payments on those mortgages and additional mortgages purchased with the cash have helped build the corporation's asset base and allow it to return some capital to the state each year. In 1993, AHFC received an additional $27.7 million in cash and $9.3 million in equity when the legislature merged the Alaska State Housing Authority with this corporation.

Alaska Industrial Development and Export Authority
Between 1981 and 1991, the State of Alaska transferred various loan portfolios worth $297.1 million and $69.2 million in cash to this corporation.

Alaska Energy Authority
The legislature established the AEA in 1976 to finance and operate power projects. This corporation has also administered rural energy programs at various times, including the present. As a result of legislatively mandated reorganizations, capital has moved into and out of the corporation. At the end of FY 2001, this corporation reported contributed capital of $963.5 million.

Alaska Student Loan Corporation
In FY 1988, the state transferred $260 million of existing student loans to this corporation. Additional appropriations of cash between FY 1988 and FY 1992 totaled $46.7 million.

Alaska Municipal Bond Bank Authority
Between 1976 and 1986, the legislature appropriated $18.6 million to the Bond Bank to be used for backing bond issues. In addition, the legislature gave the Bond Bank $2.5 million in 1981 to fund a direct loan by a municipality. The municipality repaid the loan and the Bond Bank retained the appropriation.

Alaska Aerospace Development Corporation
Since 1993, the state has contributed $10.9 million from the Science and Technology Endowment.

Alaska Railroad Corporation
The state bought the railroad from the federal government in 1985. The purchase price of $22.7 million was recorded as the state's capitalization.

Figure 9-3. Public Corporations—Financial Facts, FY 2008 ($ million) [1]

	Total Assets	Assets Less Liabilities Book Value	Unrestricted Net Assets	FY 2007 Operating Budget	Total Positions [2]
Alaska Housing Finance Corporation	$4,946.1	$1,666.2	$781.0	$50.5	372
Alaska Industrial Development & Export Authority [3]	$1,165.9	$945.9	$863.4	$8.0	66

[1] All figures are effective as of June 30, 2008, except for the Alaska Railroad which reports on a calendar year basis.

[2] Permanent Full Time (PFT), Permanent Part Time (PPT) and Temporary (TMP) are included in total positions.

[3] The Alaska Industrial Development and Export Authority (AIDEA) and Alaska Energy Authority (AEA) report financial data on a fiscal year basis. Assets, liabilities and net assets in the table are from audited June 30, 2008 financial statements.

[4] AIDEA provides staff for the activities of AEA. A significant portion of AIDEA's 66 member staff is engaged in AEA programs.

[5] Budget and positions reported are for the Alaska Commission on Postsecondary Education (ACPE). Budget amount reported is funded by the Alaska Student Loan Corporation (ASLC). ACPE staff serve as staff for the ASLC.

[6] Based on audited financial statements.

[7] The Alaska Railroad reports financial data on a calendar year basis. Assets and book value shown in this table are from audited December 31, 2007, financial statements. The operating budget figure shown here is for CY 2007.

Figure 9-4. Public Corporations—Revenue & Net Income, FY 2008 ($ million)

	Revenue	Operating Income	Net Income
Alaska Housing Finance Corporation	$341.8	$35.3	($18.3)
Alaska Industrial Development & Export Authority [1]	$85.1	$46.0	$47.3
Alaska Energy Authority [1]	$61.9	($17.9)	($32.6)
Alaska Student Loan Corporation	$60.0	$10.1	$5.0
Alaska Municipal Bond Bank Authority	$17.2	$0.9	($0.5)
Alaska Aerospace Development Corporation[2]	$18.1	($5.0)	($3.7)
Alaska Railroad Corporation [3]	$167.8	$9.7	$16.3

[1] The Alaska Industrial Development and Export Authority and Alaska Energy Authority report financial data on a fiscal year basis. Revenue, operating income and net income in the table are from audited June 30, 2008 financial statements.

[2] The Alaska Aerospace Development Corporation financial data include depreciation of $5.5 million and are based on audited June 30, 2008 financial statements.

[3] The Alaska Railroad reports financial data on a calendar year basis. Revenue and Operating Income shown in this table are for CY 2007.

Figure 9-5. Public Corporations—Dividends to the State. How, if at all, does the corporation pay dividends to the state?

Alaska Housing Finance Corporation

The Twenty-Third Legislature, in 2003, enacted SCSHB 256 (the "2003 Act") which added language to the Alaska Statutes to modify and incorporate the Transfer Plan. As approved and signed into law by the Governor, the Transfer Plan calls for annual transfers as follows: FY 2005, $103 million; FY 2006, $103 million; FY 2007, the lesser of 95% net income or $103 million; FY 2008, the lesser of 85% net income or $103 million; FY 2009 and thereafter, the lesser of 75% of the corporation's net income or $103 million.

Alaska Industrial Development and Export Authority

By statute, AIDEA must make available to the state each year not less than 25% and not more than 50% of its total net income for a base year, defined as the year two years prior to the dividend year. The dividend is further limited to no more than the total amount of its unrestricted net income in the base year (AS 44.88.088). Net income is defined in the statutes.

Alaska Energy Authority

AEA does not pay a dividend or return capital to the state on a regular basis. However, in FY 2000 this corporation returned $55.6 million of contributed capital to the Railbelt Energy Fund and the General Fund.

Alaska Student Loan Corporation

This corporation, at the discretion of its board of directors, may make available to the state a return of contributed capital or dividend for any base year in which the net income of the corporation is $2 million or more. A base year is defined as the year two years before the payment year. If the board authorizes a payment, it must be between 10% and 35% of net income for the base year (AS 14.42.295). The corporation may also issue bonds in an aggregate amount not to exceed $280 million, for the purpose of financing projects of the state as those projects may be identified by law (AS 14.42.220).

Alaska Municipal Bond Bank Authority

By statute, the Bond Bank annually returns earnings or income of its reserve fund, in excess of expenses, to the state.

Alaska Aerospace Development Corporation

AADC does not pay a dividend or return capital to the state.

Alaska Railroad Corporation

The corporation does not pay a cash dividend to the General Fund.

Figure 9-6. Public Corporations—Operating Expenses & Dividends ($ million)

	Expenses		Dividends	
	Actual FY 2008	Budget FY 2009	Actual FY 2008	Budget FY 2009
Alaska Housing Finance Corporation [1]	$46.5	$51.2	$81.4	$65.9
Alaska Industrial Development & Export Authority	$7.9	$8.2	$10.0	$23.8
Alaska Energy Authority [2]	$32.7	$33.2	na	na
Alaska Student Loan Corporation	$11.7	$12.0	$1.2	$9.1
Alaska Municipal Bond Bank Authority	$0.5	$0.7	$0.7	$0.3
Alaska Aerospace Development Corporation [3]	$22.6	$24.1	na	na
Alaska Railroad Corporation	na	na	na	na

[1] Because some of this money is earmarked for multi-year capital projects, actual cash transfers in any given year may vary.

[2] The Alaska Industrial Development and Export Authority and Alaska Energy Authority report financial data on a fiscal year basis. Actual operating expenses and dividends are for the fiscal year ended June 30, 2008

[3] The Alaska Aerospace Development Corporation financial data include depreciation of $5.5 million and are based on audited June 30, 2008 financial statements.

Revenue. A-1

Glossary of Terms

Constitutional Budget Reserve Fund (CBRF)

Created by voters in 1990, the Constitutional Budget Reserve Fund receives proceeds from settlements of oil, gas, and mining tax and royalty disputes. The legislature may, with a three-quarters majority vote in each chamber, withdraw money from the fund.

Federal Revenue

Revenue appropriated from the federal government to the state with restrictions on how the money can be used. Highway and airport construction funds, Medicaid and education funding cannot be used for other purposes. In addition to restricting how the money is spent, the federal government often requires states to put up matching funds to qualify for the federal funding.

General Fund Revenue

General Fund Revenue has different meanings in different contexts. In the state's official financial reports, General Fund Revenue is used to designate the sum of General Purpose Unrestricted Revenue, General Fund sub-account revenue, program receipts and federal dollars spent through the General Fund. In budget-writing context, General Fund revenue has a definition similar to General Purpose Unrestricted Revenue.

Permanent Fund GASB (or Market) Income

Under standards adopted by the Governmental Accounting Standards Board (GASB), the Permanent Fund's income—and that of any other government fund—is the difference between the purchase price of the investments and their market value at a given point in time, plus any dividends, interest or rent earned on those investments. Under GASB standards, the Permanent Fund does not have to sell the investment to count the gain or loss as it changes value. It is called "marking to market," that is, measuring the value of the fund's investments by the current market price. This can produce a much different picture than Permanent Fund statutory income, which does not reflect fluctuating investment values until the assets are sold.

Permanent Fund Statutory Income

Permanent Fund statutory income is the sum of realized gains and losses of all Permanent Fund investment transactions during the year, plus interest, dividends and rents earned by the fund. The Permanent Fund Dividend is based on statutory income. Though the legislature may appropriate the earnings for any purpose it chooses, the historical practice has been to restrict the use of realized income to dividends and inflation proofing, and then either leave the excess in the Realized Earnings Account or transfer it to the principal of the Permanent Fund.

Restricted Program Receipts

Revenue that is earmarked in state statute or by contract for specific purposes and is usually appropriated back to the program that generated the revenue. Examples include University of Alaska tuition payments, marine highway receipts, payments to various revolving loan funds and public corporation receipts. Some of this revenue is actually dedicated as a consequence of the provisions of Article 18, Section 11 of the Alaska Constitution. The remainder, while statutorily earmarked, may be appropriated to purposes other than those reflected in statute if the legislature so chooses.

Restricted Revenue

Restricted revenue represents revenue that is restricted by the constitution, state or federal law, trust or debt restrictions, or by customary practice. The legislature can at any time remove restrictions that are solely imposed by either Alaska statute or customary practice. Program receipts, revenues allocated to sub-accounts of the General Fund, and General Fund revenues customarily shared with other entities are all considered restricted revenues for the purposes of this report.

General Purpose Unrestricted Revenue

Revenue not restricted by the constitution, state or federal law, trust or debt restrictions or customary practice. Most legislative and public debate over the budget each year centers on this category of revenue. In deriving this figure from General Fund revenues, we have excluded General Fund sub-account revenue, as well as customarily restricted revenues such as shared taxes and marine highway receipts.

$100	9,733	8,880	8,082

[1]FY 2009 revenue totals illustrate the significant impact of monthly variation in oil prices. Oil prices for the first three months of the fiscal year averaged $116 per barrel. In these three months, over one half of the total forecasted production tax of $3,589 was collected. This is largely due to the impact of the progressive surcharge, which is triggered at net profit of $30 per barrel, and is calculated on a monthly basis.

[2]Fiscal year averages incorporate actual prices for the first four months of FY 2009. Because oil prices were high in the first four months, prices would have to remain very low for the rest of the fiscal year to bring the average down to the levels in this table (e.g. a fiscal year price of $50 per barrel would require eight months of oil prices at around $22 per barrel).

*In addition to price and production, revenue estimates under ACES depend on levels of spending by petroleum producers and explorers. Spending plans may change as companies occasionally revise their investment strategies. The above estimates also do not consider how company investment decisions would change with a change in oil prices.

(1) General Purpose Unrestricted Revenue includes those revenues that are not restricted by statute or custom, as reported elsewhere in this publication. A summary of historical General Purpose Unrestricted Revenue can be found on the Tax Division's web site at: www.tax.alaska.gov/sourcesbook/GeneralFund-UnrestrictedRevenueHistory.pdf

(2) Prior to FY 2000, data presented are for General Fund unrestricted revenue. This amount is higher than General Purpose Unrestricted Revenue because the data include certain revenues that are restricted by custom, such as fisheries tax revenues shared.

(3) Prior to FY 2000, other fish tax included certain customarily restricted fisheries tax revenues.

(4) Prior to FY 2000, mining license tax and charitable gaming receipts are included in "Other."

(5) These categories are primarily composed of petroleum.

(6) Starting in FY 2001, interest earnings are included in oil and gas royalties and excluded from investment earnings.

(7) Includes non-petroleum rents and royalites.

(1) Historical General Purpose Unrestricted petroleum revenue can be found on the Tax Division's web site at: http://www.tax.alaska.gov/sourcesbook/PetroleumRe enueHistory.pdf. Table on Tax web site includes historical Reserve Tax (FY 1976-1977) and Petroleum Special Settlements (FY 1986-1995) which are reflected current zero totals in Appendix A-4a.

(2) Royalties, bonuses, rents and interest are net of Permanent Fund contribution and Constitutional Budget Reserve Fund (CBRF) deposits.

(3) This category is primarily composed of petroleum revenue.

(4) The cumulative unrestricted petroleum revenue total is based on revenue beginning in FY 1959.

(1) In FY 2008, the Department of Revenue made a change in the method by which it accounts for future revenues, as well as historical and future production and oil prices, from a cash basis to an accrual basis. This method change will better align fiscal year revenues with the state's financial reports and other publications. As a result, slight modifications have been made to historical production values and oil prices to accommodate this change.

(2) Data from Platt's Oilgram Price Report, Wood McKenzie and Alaska Department of Revenue's prevailing value and tax return data. Historical real and nominal crude oil and natural gas prices can be found on the Tax Division's web site at: www.tax.alaska.gov/sourcesbook/OilGasPrices.pdf.

(3) Adjustment to "nominal" dollars is required to prepare the crude oil and natural gas price forecasts. Callan Associates Inc.'s inflation rate of 2.75% was used for FY 2009 and beyond.

(4) Adjustment to "real 2008" dollars is useful to compare prices across time excluding inflation. These prices data are adjusted to real 2008 dollars based on inflation rates provided by the U.S. Department of Labor, Bureau of Labor Statistics. The data series used is the Consumer Price Index for all Urban Consumers (CPI-U) which can be found at: www.gls.gov/cpi/home.htm.

(1) In FY 2008, the Department of Revenue made a change in the method by which it accounts for future revenues, as well as historical and future production and oil prices, from a cash basis to an accrual basis. This method change will better align fiscal year revenues with the state's financial reports and other publications. As a result, slight modifications have been made to historical production values and oil prices to accommodate this change.

(2) A summary of historical crude oil production can be found on the Tax Division's web site at: www.tax.alaska.gov/sourcesbook/AlaskaProduction.pdf.

(3) Includes NGLs from Central Gas Facility shipped to TAPS.

(4) Aurora, Borealis, Midnight Sun, Orion and Polaris.

(5) Lisburne, Niakuk, North Prudhoe Bay State, Point McIntyre, Raven, West Beach and West Niakuk.

(6) Meltwater, Tabasco, Tarn and West Sak.

(7) Includes Sag River and Schrader Bluff.

(8) Includes Badami, Eider and Sag Delta.

(9) Includes Alpine-West and Qannik.

(10) Fiord, Fiord-Kuparuk and Fiord West.

(11) Nanuq and Nanuq-Kuparuk.

(12) Known Offshore includes Nikaitchuq and Oooguruk.

(13) Includes Outer Continental Shelf (OCS) production.

[1] In FY 2008, the Department of Revenue made a change in the method by which it accounts for future revenues, as well as historical and future production and oil prices, from a cash basis to an accrual basis. This method change will better align fiscal year revenues with the state's financial reports and other publications. As a result, slight modifications have been made to historical production values and oil prices to accommodate this change.

[2] A summary of historical ELFs can be found on the Tax Division's web site at www.tax.alaska.gov/sourcesbook/ELFs.pdf.

Under the ELF production tax system, the tax rate for oil depended on the age of the field and the Economic Limit Factor (ELF). The ELF was calculated based on total daily oil production and average daily per well production from each producing field. The statutory production tax rate on oil was 12.25% of its value at the point of production for the first five years of field production and 15% thereafter. There was a minimum tax of 80 cents per taxable barrel. The effective tax rate was calculated by multiplying the statutory tax rate, even if it was the minimum 80 cents per barrel, times the ELF. The ELF formula resulted in lower effective tax rates for smaller, low-production fields and higher tax rates for larger, highly productive fields. There was a unique combination of total daily field production and average daily per well production.

In January 2005, the department aggregated seven fields in the Prudhoe Bay Unit. The decision to aggregate focused on, among other things, the increasing interdependence found in the engineering and operation of the fields.

Production. C-3b

Revenue Sources Book

Alaska Department of Revenue – Tax Division

FALL 2008

In accordance with AS 37.07.060 (b)(4), the Revenue Sources book is compiled biannually by the Alaska Department of Revenue to assist the governor in formulating a proposed comprehensive financial plan for presentation to the Alaska State Legislature. Within the publication are shown prior year actuals, revised current year estimates and future year projections.

Anticipated state income is projected through the use of a number of data sources:

(1) econometric models developed by the Department of Revenue to forecast unrestricted non-petroleum revenues;

(2) a petroleum revenue model created by the department's Tax Division;

(3) estimates from individual state agencies.

We thank the various state agencies for their cooperation in computing anticipated revenues for publication in this Fall 2008 Revenue Sources Book.

The Department of Revenue complies with Title II of the Americans With Disabilities Act of 1990. This publication is available in alternative communication formats upon request. Please contact the division's representative at 907-465-3692 or 907-465-3678 (TDD) to make necessary arrangements.

This publication, required by law (AS 37.07.060), was printed in Juneau, Alaska at a cost of about $13 per copy.

How the PFD Came to be at Risk

By

Gregg Erickson

1976 amendment to Alaska's Constitution:

- "At least twenty-five percent of all mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments and bonuses received by the State shall be placed in a permanent fund, the principal of which shall be used only for those income-producing investments specifically designated by law as eligible for permanent fund investments. ..."
- —Article IX, Section 15 [Effective February 21, 1977].

Orange County Debacle

- "The new rule arises in part out of the losses incurred in 1993 by the government of Orange County. Managers of county investments were able to avoid showing the declining market value of bad investments because they were not required to show the loss on the county-owned fund's income statement. Accounting experts believe that requiring unrealized gains and losses to be reported will help provide early warning of such investment problems."
- —"APFC asks for legal opinion on status of income, principal," *Alaska Budget Report*, February 17, 1999

GASB 31

- "Governmental entities, including governmental external investment pools, should report investments at fair value in the balance sheet. … Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale."
- —"Summary of Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools," Government Accounting Standards Board, March 1997

1999 Request for Legal Opinion

- "The Alaska Permanent Fund Corporation has asked the national law firm of Morrison and Forrester to prepare a legal opinion on whether the governor's proposal in HB 90 to remove $4 billion from the permanent fund would invade the principal of the fund.
- "…Communications Director Jim Kelly told the Senate State Affairs Committee that a legal opinion had been requested. The issue arose in the context of … testimony on … a bill by Sens. Jerry Ward and Rick Halford to transfer … the fund's earnings reserve to the principal."
- — "APFC asks for legal opinion on status of income, principal," *Alaska Budget Report*, February 17, 1999

199

1999 Legal Opinion

- "Attorneys from Morrison and Foerster say Gov. Tony Knowles' proposal to take $4 billion from the permanent fund won't violate the Alaska Constitution. But a formula in state law that is used to calculate income available for dividends (or other purposes) should be changed to avoid a possible conflict-of-laws situation that could occur under new accounting interpretations, the lawyers said in a March 3 opinion."
- — "Lawyers OK $4 billion transfer from earnings reserve to CBR," *Alaska Budget Report*, March 10, 1999

The 2002 Crisis, Part 1

- "For a few days in July a falling stock market shaved $399.9 million off the principal of the permanent fund. The erosion of principal, the first such event in the fund's 25-year history, reached its deepest point on July 23, culminating a slide that took the fund's reserves from a comfortable $8.6 billion in the spring of 2000 to a negative value in July."
- —"Fund recovers after market slide eats $400 million hole in principal," *Alaska Budget Report*, September 17, 2002.

The 2002 Crisis, Part 2

- "Later in July rising market values erased the deficit, but the issues raised by the episode remain, including
- "• worries that fund's constitutional structure is more vulnerable to meltdown than officials had ever realized,
- "• unsettling legal questions about APFC's authority to transfer money to the state government when reserves drop into the red, and
- "• increased doubt over whether the fund will be able to meet its dividend and inflation-proofing obligations in 2003."
- —"Fund recovers after market slide eats $400 million hole in principal," *Alaska Budget Report*, September 17, 2002.

POMV Percent of Market Value

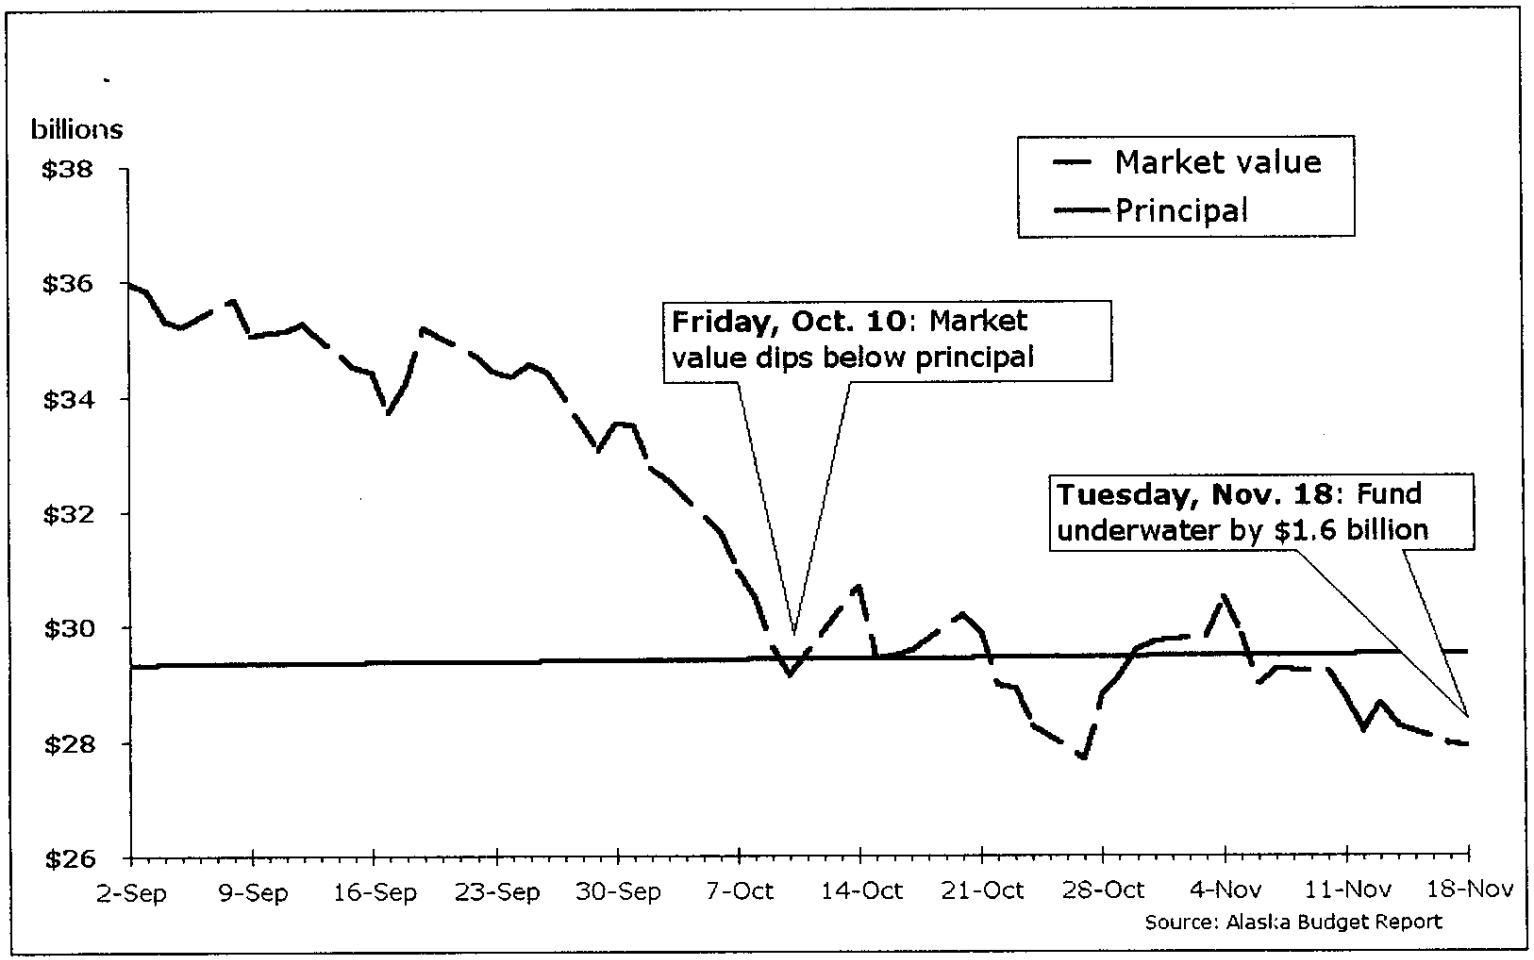
Renkes' Opinion and POMV

- "Only through a constitutional amendment, like that currently proposed by the corporation trustees establishing a payout limit of 5 percent of the total fund value, can the rate of dedication be increased and the deposit of income available for distribution be limited. Absent such an amendment, the full amount of income, made up of the realized gains and losses, is available for expenditure."
- —Renkes 2003 opinion AG file 663-03-0153

Renkes' Legal Opinion, Part 2

- "There is no basis for expanding the concept of principal by creating a notational number that serves as a limitation on the deposit of income for distribution purposes."
- —Renkes 2003 opinion AG file 663-03-0153
- "Rep. Eric Croft of Anchorage says he is still pondering a lawsuit to challenge Attorney General Gregg Renkes' opinion that unrealized gains shouldn't be considered 'available for appropriation.'"
- —"What do Democrats really want," *Alaska Budget Report*, December 33, 2003.

Investment losses of 2008-2009



APFC October 23 letter to OMB

- "Erosion of the supposedly permanent principal has stimulated Alaska Permanent Fund Corporation (APFC) officials to seek guidance from the Palin administration on the appropriateness of continuing to draw money from the fund to pay their own salaries and other corporation expenses. …'In times of extreme market volatility with downward trends, as is the current case questions arise regarding the Permanent Fund's ability to make cash payments for items such as its operating budget,' wrote APFC executive director Mike Burns … in an October 23 memorandum to OMB Director Karen Rehfeld."
- —"Fund recovers after market slide eats $400 million hole in principal," *Alaska Budget Report*, September 17, 2008.

OMB's Reply to Burns

- "A consultation with the Department of Law regarding the corporation's current circumstances affirms APFC's interpretation that the [APFC] operating budget should be paid from the positive cash flow in order to meet the FY09 appropriated budget."
- —OMB Director Karen Rehfeld, Memorandum to APFC Executive Director Mike Burns, November 5, 2008

Current Status

- Principal exceeds market value: fund is $1.6 billion under water.
- $1.1 billion needed on June 30 to pay PFD
- $3.9 billion in realize earnings "reserve" account, but …
  - fund investments must grow by about $2.7 billion ($1.6 billion + $1.1 billion) to avoid threat of court intervention.

Options

- Take no action.
  - Hope markets rise as in 2002.
  - Hope nobody sues.
  - If dividends are blocked, deal with economic consequences separately.
  - Try to find consensus on a POMV amendment for that can win voter approval in 2010.
- Adopt backstop plan.
  - Pay PFD (all or part) out of CBR, AHFC equity, or other sources.
  - Hope markets rise before June 30, 2010.
  - Try to find consensus on a POMV amendment for that can win voter approval in 2010.

Professional History

Economist and journalist Gregg Erickson, was raised in Anchorage. In 1966 he joined the University of Alaska's Institute of Social and Economic Research as a resources economist. In 1972 he left Alaska to take an appointment as a research fellow with Resources for the Future, a Washington, D.C., think-tank.

Erickson's work at RFF on energy economics led to appointment in 1973 to the staff of what is now the U.S. Senate Energy Committee.

In 1976, Mr. Erickson returned to Alaska, becoming director of research for the Alaska Legislature. In 1984 he joined the Alaska Office of the Governor, where he served as senior economist under Governors Bill Sheffield and Steve Cowper. Following the Exxon Valdez oil spill in 1989, he was selected to direct the state's oil spill impact assessment and restoration efforts.

In 1991, Erickson left state government and opened Erickson & Associates, an economic consulting firm, and in the same year founded the *Alaska Budget Report,* a weekly legislative newsletter. He remains affiliated with the newsletter as editor-at-large.

He is co-author of *Mineral Policy and the Public Lands*, editor of two other books, and the author of more than 150 articles, papers and monographs on Alaska economics, public finance and fiscal policy issues. He frequently testifies as an economic expert in state and federal courts in Alaska, and writes a syndicated newspaper column appearing every two weeks in Alaska's largest newspapers.

Erickson is president of the Juneau Symphony Foundation. He is a long-time director of the New York-based Robert Schalkenbach Foundation and has served four terms as the foundation's treasurer. He currently chairs the foundation's Employee Pension Trust. He is married, has four grown children, and three grandchildren.

FOR IMMEDIATE RELEASE: June 20, 2003

Alaska Attorney General Issues Opinion Clarifying Permanent Fund Accounting Procedures

(Juneau) – Attorney General Gregg Renkes today released an opinion clarifying that the Alaska Permanent Fund Corporation should only consider realized investment income in calculating the amount available for dividends and inflation-proofing.

After a thorough review of Alaska statutory and case law, the attorney general determined that existing law requires only realized income from investments should be used for expenditures and the calculation of income. Alaska law (AS 37.13.140) is explicit that net income shall be computed "excluding any unrealized gains or losses." Moreover, this is consistent with what the generally accepted accounting principles were prior to 1997, when unrealized gain or loss was not a part of the income determination.

The Permanent Fund Board of Trustees requested the opinion from the attorney general in order to resolve an apparent inconsistency between that law and revised accounting principles, the attorney general said.

"We hope this opinion will resolve the ambiguity created by differences between our law and standard accounting practices regarding the treatment of unrealized gains and losses," Renkes said. "This is important because it could affect the amount of money available for Permanent Fund dividends and will affect the calculations the funds necessary for inflation-proofing."

Alaska law requires the corporation to transfer funds from the Fund's earnings reserve account at the end of each fiscal year to distribute dividend checks and inflation-proof the principal. While the Alaska Legislature this year made the necessary appropriations authorizing each transfer, declining stock and financial markets had raised concerns that the earnings reserve account would not be big enough to cover those appropriations.

These concerns were exacerbated by an apparent conflict between state law and changes in the Generally Accepted Accounting Principles (GAAP) regarding calculation of the balance of the earnings reserve account, the attorney general said.

(MORE)

State law holds that only realized earnings (i.e., the gains and losses from the sale of investments, bond interest, stock dividends, and rental property income) were recorded as income in the earnings reserve account. However, 1998 changes to the GAAP required the Permanent Fund Corporation to record the Fund's readily marketable investments at current fair value in its financial statements. In other words, all unrealized earnings (i.e., the difference between market value and the original cost of assets held in the fund) were required to be included in determining Fund income for accounting purposes.

"This inconsistency resulted in large differences between net income as calculated under Alaska law, and net income as calculated using the new generally accepted accounting principles," Renkes said. "The Permanent Fund Trustees looked to us to resolve that inconsistency in their March 14 request for an opinion."

"Although financial markets have significantly rebounded over the past several months, it was imperative that these issues be addressed today," said Renkes. "By clarifying these standards, we ensure that the earnings reported by the Permanent Fund are an accurate representation of its value. It is important that the public and the trustees understand the correct application of the law and that the corporation's financial statements properly inform the public."

As of June 30, 2002 the Permanent Fund recorded net assets totaling $23.5 billion. Of that total, $21.8 billion was principal. Since 1982, $7.5 billion of permanent fund income has been added to principal for inflation-proofing, through June 30, 2002. In addition to the constitutionally and statutorily mandated dedicated revenues, the legislature has made special appropriations to the permanent fund totaling $6.9 billion. In FY04 the Legislature appropriated an additional amount to principal which could not be determined as of the date of this opinion.

The Permanent Fund Corporation will announce the amount of this year's dividends on June 30, 2003.

Juneau, Alaska 99811-0410

Re: Questions Concerning the Accounting for Principal and Income of the Alaska Permanent Fund
AG File No. 663-03-0153

Dear Mr. Wohlforth:

This letter responds to a request from the Alaska Permanent Fund Corporation (the corporation) for an opinion interpreting the provisions of article IX, section 15, of the Alaska Constitution and implementing statutes. Particularly, the APFC trustees ask if their current policies correctly determine net income available for appropriation and the limitations, if any, properly placed upon the expenditure of income from the earnings reserve account.

Introduction

At the end of each fiscal year, AS 37.13.145(b) directs the corporation to transfer to the dividend fund established under AS 43.23.045 an amount that is equal to 50 percent of the "income available for distribution" under AS 37.13.140. In addition, AS 37.13.145(c) directs the corporation to transfer to the principal of the Alaska permanent fund an amount "sufficient to offset the effect of inflation" on the principal ("inflation-proofing"). These transfers are to be made from the permanent fund's

earnings reserve account established by AS 37.13.145(a). Separate appropriations authorizing those transfers for the current fiscal year (ending June 30, 2003) were approved by the legislature in the FY 2003 operating budget (sec. 10, ch. 94, SLA 2002).

Although the necessary appropriations for the transfer of money to pay permanent fund dividends and inflation-proofing in 2003 are enacted, possible declines in the financial markets can cause some uncertainty whether there will be a balance available for expenditure from the earnings reserve account to cover the amounts appropriated. The question arises for two related reasons. First, there is an apparent inconsistency between the provisions of AS 37.13.140 and AS 37.13.145, both adopted in the 1980's, and the accounting requirements of GASB 31,[1] which became effective in 1998, regarding how to determine the size of the earnings reserve account from which money may be transferred. Second, although the constitutional provision that created the permanent fund[2] has always been viewed as providing "protection" for the principal, the

[1] "GASB 31" is shorthand for Statement No. 31 of the Governmental Accounting Standards Board, Accounting and Financial Reporting for Certain Investments and for External Investment Pools.

[2] Section 15, article IX of the Alaska Constitution provides:

> Section 15. Alaska Permanent Fund. At least twenty-five per cent of all mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments and bonuses received by the State shall be placed in a permanent fund, the principal of which shall be used only for those income-producing investments specifically designated by law as eligible for permanent fund investments. All income from the permanent fund shall be deposited in the general fund unless otherwise provided by law.

nature and extent of that protection are unclear. Accordingly, the corporation requested an opinion from this office to assist in determining how much is available for expenditure from the earnings reserve account to finance the 2003 appropriations for dividends and inflation-proofing.[3]

Questions presented:

Is the corporation's current policy that only realized income of the permanent fund is available for expenditure under AS 37.13.145 correct? If not, how should the amount available for expenditure from the permanent fund under AS 37.13.145 be determined?

Short answer: We believe that the corporation's policy that only realized earnings are available for expenditure is correct.

Is the corporation's current practice that both realized and unrealized income of the permanent fund should be taken into account in determining the amount that is available for appropriation correct? If not, how should the amount available for appropriation from the permanent fund be determined?

Short Answer: We believe that it would not be correct to compute the amount available for distribution by using unrealized gains and losses to determine

[3] Since it is clear under both AS 37.13.145 and the appropriations for permanent fund dividends and inflation-proofing that funding of the PFD appropriation has priority and must be fully paid before any amount is transferred for inflation-proofing, you did not request our advice on whether or how those two transfers should be prioritized or allocated.

income. Existing law clearly provides that only realized gains and losses are allocated to income and are thus available for distribution. Under the relevant constitutional provision, what is not principal is income; therefore any gain or loss not expressly allocated to income must be allocated to principal.

Do the constitution and statutes require that income of the fund may not be appropriated when doing so would bring the total value of the permanent fund including all unrealized gains and losses below the sum of the amounts deposited or appropriated to principal? If not, are there any other limitations with respect to the use of principal that are applicable in determining the amount that is available for expenditure or appropriation from the permanent fund?

Short Answer: We believe that principal is the total value of all deposits and appropriations adjusted for unrealized gains and losses that should properly be allocated to principal. There is no doubt that the principal of the permanent fund cannot be deposited in the general fund and must only be used for income producing investments. However, if unrealized gains and losses are allocated to principal, by definition there is no invasion or misuse of principal if only statutory income, realized gains, is deposited in the earnings reserve fund and available for appropriation.

Before we explain how we arrived at the answers set out above, it is necessary to consider the history of the permanent fund amendment and the actions of the legislature and the corporation to implement the amendment.

Legislative History Relevant to the Questions Presented.

1. Prior to Adoption of the Amendment.

The legislature passed the permanent fund amendment in the form of HJR 39 which was ratified by the voters at the 1976 general election. The effective date of the amendment was February 21, 1977.[4] The amendment was introduced by Governor Hammond.[5] The legislative history of consideration of the resolution is primarily devoted to the amount and kind of revenue to be dedicated to the permanent fund. The governor first proposed a 10 percent dedication of mineral revenues but later supported an increase to at least 25 percent.

---

[4] The ballot summary read as follows:

> This proposal would amend Article IX, Section 7 (Dedicated Funds) and add a new section to Article IX, Section 15 (Alaska Permanent Fund) of the Alaska Constitution. It would establish a constitutional permanent fund into which at least 25 percent of all mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payment and bonuses received by the State would be paid. The principal of the fund would be used only for income producing investments permitted by law. The income from the fund would be deposited in the State's General Fund and be available for appropriation for the State unless law provided otherwise.

1976 Ballot Proposition No. 2.

[5] The resolution was introduced in January, 1976 as a sponsor substitute for the initial version of HJR 39, introduced by the governor the previous June, which had only proposed amending the dedicated funds provision of article IX, section 7 of the Alaska Constitution to permit the dedication of the proceeds of mineral lease bonuses. The sponsor substitute proposed adding a new section 15 to article IX to create a permanent fund by dedicating 10 percent of nonrenewable resource revenue. The resolution substituted by the governor also expressly provided that the legislature could make additional contributions to the fund. 1976 House J. at 39-40.

In a joint report of the House Judiciary and Finance Committees, the chairmen explained that the principal would be used only for income-producing investments that the legislature could change from time to time to meet the needs of the state. They explained that the effective date of the amendment was delayed somewhat to permit the legislature to provide by law for an investment structure for the fund. Finally, they explained that it was their intent to give future legislatures the maximum flexibility in using permanent fund earnings, ranging from adding to principal to paying out a dividend to residents.[6]

In supporting materials provided at the time of consideration by standing legislative committees, it appeared that the governor intended that the permanent fund could be used to invest in economic development projects with a long term net economic benefit.[7] This same view was repeated after adoption of the resolution when various proponents took their case to the voters.[8] Although the voters were told that it was up to the legislature to shape the permanent fund, it was explained that the "income producing"

7 1976 House and Senate J. Supp. (fiscal note comments dated January 12, 1976).

8 Anchorage Daily News editorial, October 26, 1976 ("a percentage of the fund would go for direct use by Alaskans - for loans to businessmen, fishermen and builders.") The permanent fund was described as a "tool whereby Alaska can take some of today's mineral wealth and prepare for the future by investing in the development of human and material resources that will remain productive for many generations . . . ." *Quoting* Revenue Commissioner Sterling Gallagher.

requirement gave the state broad latitude and that local bonds could be purchased as a means of financing instate development.[9] The Revenue Commissioner reported

> I hear public support for the fund from three sectors, . . . from those who favor a savings account approach, those who want it used to provide assistance in community development and those who want it to provide economic diversity in the state. . . . [A] major goal [is] the strengthening of the state's economic base by investing in renewable resources and by policies which would reduce seasonality of employment.[10]

The voters were told that "the income from the fund will be available for general appropriation by the legislature but the principal of the fund may not be touched."[11] The permanent fund was described as "a lasting savings account."[12]

> The object is to prevent future legislatures from doing what previous legislatures did with the $900 million bonanza received by the state from the sale of Prudhoe Bay leases in 1969. That gigantic sum ran through the legislators' fingers like water, to the alarm of many who had pleaded at the time that the $900 million be invested, the principal preserved and the state spend only that money derived from interest.[13]

There is fairly strong evidence that the voters were aware that the legislature would have a role in providing the details for administration of the permanent

fund. Whether the fund was to be a savings account or a development bank was not resolved by the legislature until four years after adoption of the amendment.

2. Post Adoption

A. Legal Opinions

After the amendment took effect, the attorney general was asked to interpret its meaning for various purposes. Set out below are opinions discussing aspects of the permanent fund that are relevant to our consideration of the corporation's accounting practices.

In August of 1977, the attorney general answered whether money appropriated to permanent fund principal in excess of the amount required by the constitution is irretrievable. The attorney general confirmed that once money was deposited in principal by any means, it could not be removed without further amendment of the constitution.[14] The attorney general advised that the constitution's restriction on the use of fund principal is an implied restriction against the withdrawal of appropriated principal.[15] The attorney general speculated that the legislature probably could not condition appropriations to principal on the ability to withdraw at a future date or to

[14] 1977 Inf. Op. Att'y Gen. (Aug. 31; 663-78-0106).

[15] *See also* 1986 Inf. Op. Att'y Gen. (Mar. 6; no file number); 1987 Inf. Op. Att'y Gen. (Feb. 12; 663-87-0356).

specify that such amounts would not be considered principal. The attorney general observed that the permanent fund was a "peculiar -- perhaps unique -- quasi-trust."

In September of 1977, the attorney general again interpreted the amendment to determine whether the legislature was required to enact legislation which takes inflation into consideration in the management and investment of fund principal.[16] In this opinion, the attorney general restated the conclusion that the permanent fund was a trust or quasi-trust. This was based on a prediction that "the Alaska Supreme Court will follow a previously exhibited tendency to impose trust-like duties on the state's management of its patrimony" and the amendment "is extremely similar to the classic spendthrift trust both in its roots and causes and in its establishment . . . ."

The attorney general also concluded that the legislature acts as a trustee which must prudently exercise any duty in relation to administration of the permanent fund. In this regard, the legislature was advised that its power was not plenary but limited by the constitution and implied trust concepts. This office advised that there was no legal requirement that inflation be taken into account in statutes enacted to implement the permanent fund. The legislature was advised that the foregoing interpretation cannot be considered settled until the supreme court rules on the matter. However, the

---

[16] 1977 Inf. Op. Att'y Gen. (Sept. 16; 663-78-0107).

legislature was advised that it could resolve the question of status by making or treating the permanent fund as a trust.

In 1999, the attorney general contracted for an opinion from outside counsel on behalf of the board of trustees to advise on the possible transfer of permanent fund principal to the Constitutional Budget Reserve Fund (CBR). Morrison & Foerster Opinion, March 3, 1999. The advice was sought to assist the state in determining whether a proposed transfer of a portion of the permanent fund's assets to the CBR would involve an expenditure of principal. Similar to earlier legal opinions on the subject, Morrison & Foerster concluded that the permanent fund is not a true public or private trust fund. However, after rejecting the notion that the fund is a trust, the opinion resorts to trust law to support conclusions concerning the possibility of spending principal as a consequence of the transfer of principal to the CBR. Counsel observed that the board of trustees had a fiduciary obligation imposed by statute to preserve principal and to manage fund assets as prudent investors.

Morrison & Foerster accepted without comment the corporation's assumptions regarding principal. Under the corporation's longstanding practice, "principal" is reported as a notational number that changes only with further contributions to the fund - it does not fluctuate with changes in the market value of the

investments purchased with principal.[17] Counsel interpreted AS 37.13.140 as inconsistent with the principal and income allocation rules usually applicable to trusts. They determined that, after the adoption of GASB 31, an invasion of principal would occur if the amount paid out exceeded the balance of the earnings reserve account which, under GASB 31, would include both realized and unrealized gains and losses. It would not occur where, after a distribution, the balance of that fund turned negative. The critical difference, according to that opinion, is between an action of the trustees and the natural fluctuation of the investment markets. The opinion suggests that unrealized losses could not force an invasion of principal. Morrison & Foerster Op. at p. 16, n.7.

At the time of the opinion, the permanent fund was enjoying the benefits of a sustained period of capital appreciation which was accounted for in the earnings reserve. This fact permitted Morrison & Foerster to conclude that, because the fund's GASB 31 earnings reserve account was then substantially in excess of that amount, a $4 billion transfer of assets was possible to accomplish without "invading principal."

B. Principal and Income Accounting Practices

Next we consider the past principal and income accounting practices applied to the permanent fund and the sources from which those practices were derived.

[17] These contributions have included one-time legislative appropriations to the permanent fund of both income and general fund revenues and the annual inflation-proofing amounts, as well as the natural resource revenues dedicated under the constitutional provision.

These practices show that differing interpretations of principal and income prevailed under previous versions of the fund's enabling statutes.

For the period 1977 - 1980, the permanent fund was under the interim management of the Department of Revenue while legislation was pending to create the corporation. The fund was invested primarily in debt instruments with a fixed rate of return. Ch. 6, SLA 1977. In 1980, legislation was enacted providing for the management of the permanent fund by a public corporation within the Department of Revenue, managed by a board of trustees. Ch. 18, SLA 1980. This legislation modified the rate of dedication to the permanent fund from 25% to 50% of revenue received by the state from mineral leases issued after December 1, 1979, or, in the case of bonuses, after February 15, 1980. The 1980 legislation only authorized the corporation to invest in certain fixed return instruments.[18] Under this statute, income was defined to be the interest earned on investments and any realized gains or losses were to be allocated to principal.[19]

---

[18] The corporation was given authority to place funds in direct obligations of the United States Treasury, federal agency securities, certificates of deposit, high-grade corporate bonds, quality short-term investments, and federally guaranteed loans. The fund was directed to give preference to Alaska investments as long as they met the standards of quality set out in law. Specifically, deposits could be made in Alaska banks, mutual savings banks, savings and loan associations, and credit unions. Residential real estate (owner occupied single family dwellings, duplexes, and condominiums) could also be purchased if the mortgage was privately insured by a company doing business in Alaska.

[19] This legislation was accompanied by a free conference committee report in which the joint committee chairmen explained "[t]he fund is designed to be a trust which focuses on the (continued . . .)

In 1982, legislation was enacted making four amendments bearing on the corporation's accounting practices: (1) the authorized list of investments was expanded to include equities; (2) the concept of "net income" was established which included gain or appreciation in value determined by generally accepted accounting principles, excluding unrealized gains or losses; (3) a portion of each year's permanent fund income was targeted for reinvestment back into the fund to offset inflation; and (4) a valid permanent fund dividend program was established. Ch. 81, SLA 1982; ch. 102, SLA 1982.[20]

During the interim management period of 1977 - 1980, and after creation of the corporation until 1982, the accounting practices applied to the permanent fund distinguished between income and appreciation in the value of investments. For the first two accounting cycles of the corporation (1980 - 1982), income of the fund was defined as "the interest received in a year." Sec. 5, ch. 18, SLA 1980. For the entire period 1977 - 1982 during which the fund was limited to fixed income investments, appreciation

---

safety of principal first and the maximization of earnings second." 1980 Senate J. at 671. It was intended that the fund would be held to a more restrictive list of investments than other fiduciary trusts.

[20] The authorized list of investments has since been expanded at least four more times by the legislature: in 1989 to include investments in non-U.S. securities; in 1992 to include A-rated corporate bonds; in 1994 to expand permissible real estate investments; and in 1999 to make a variety of adjustments to the authorized list, to authorize up to 5% of the fund to be invested in other prudent investments not specifically included in the list, and to increase the allocation limit placed on equity investments.

in value ("gain") was credited to principal, interest was credited to income.[21] However, if losses exceeded gains, interest was to be transferred to principal in an effort to cover some of the loss. Former AS 37.13.130 (repealed 1982); former 15 AAC 137.060 (repealed 7/12/92).

In 1982 after the fund was authorized to invest in equities, income was defined to include realized gain representing appreciation in value. Under then-applicable generally accepted accounting principles ("GAAP"), only realized gains (and losses) of the fund were recorded as income in the earnings reserve account established under AS 37.13.145. This former GAAP approach was consistent with the statutory requirement of AS 37.13.140 (in effect since 1982) for determining fund "net income" (from which the amount of the annual dividend transfer is then computed), which specifically excluded unrealized gains and losses from the determination.[22]

---

[21] According to annual financial statements of the permanent fund, realized gain was credited to principal for fiscal years 1980 and 1981. When the permanent fund was under Department of Revenue management, income was deposited in the general fund. After the corporation was created, statutes called for income to be deposited in an undistributed income account.

[22] There were actually some minor differences in determining "net income" between the methods called for by GAAP pre-GASB 31 and by AS 37.13.140, but those differences did not affect the underlying requirement of each that only *realized* gains and losses be taken into account. The drafters of sec. 140 were aware of the potential that GAAP and state law might some day be inconsistent. In his transmittal letter, Governor Hammond made clear his intent that the statutory method for computing income should prevail over generally accepted accounting principles. Letter from Gov. Jay Hammond, regarding Sponsor Substitute for Senate Bill 684, 1982 Senate J. at 494, 496 (March 9, 1982).

This consistency in treatment ended with the implementation of GASB 31 in 1997. Under GASB 31, the corporation is required to record as revenue in its financial statements the permanent fund's readily marketable investments at current fair value. The corporation has interpreted this change in GAAP as requiring all unrealized market appreciation and depreciation (unrealized gains and losses) to be included in determining income for accounting purposes, potentially resulting in large differences between GAAP net income and "net income" under AS 37.13.140. As a result, the corporation now has two different ways to report income. The first method is to report realized income, as called for by the definition of "net income" under AS 37.13.140, to determine how much is available for distribution. The other method is to apply the GAAP definition and include both realized and unrealized gains and losses to determine net income for financial reporting purposes. Depending on the situation, the corporation applies both approaches in its financial statements. The inherent conflict between these two approaches is at the heart of the request for this opinion.

In late 2001, the audit committee of the corporation considered an issue paper prepared by APFC staff which discussed the policy for determining the amount available for expenditure to pay the dividend and inflation-proofing transfers provided for under AS 37.13.145. The issue paper did not resolve the matter, but recommended the trustees seek a legal opinion from the Department of Law. While the subject was briefly discussed by the trustees, they did not pursue an opinion from the Department of Law at

that time. In the absence of an attorney general's opinion, the corporation has applied a conservative "invasion test" under which realized income may not be spent if doing so causes the total value of the permanent fund and the earnings reserve account to fall below the historic dollar amount ("notational principal") contributed to principal from all sources. Although this limitation is not specifically addressed in the statutes, it was presumably applied in order to "protect" past contributions to principal from diminishment and has been subsumed in the corporation's accounting practices.

Notwithstanding this conservative "invasion test," there have been instances in the past when distributed earnings were more than offset by unrealized losses. These distributions to the state general fund occurred in fiscal years 1978 and 1979 and would have amounted to an expenditure of principal under the corporation's "invasion test." This is apparently why, beginning in 2001, the corporation and corporate counsel recommended obtaining a legal review of corporate accounting policy by this office.

For fiscal year 2002, there was enough realized income accumulated in the earnings reserve account and in excess of "notational principal" to fully pay the 2002 dividend and inflation-proofing distributions without having to apply the limitation regarding invasion of principal. However, given the current investment allocation of the fund, a sustained downward trend in financial markets could result in the total market value of the permanent fund at the end of a fiscal year totaling less than the sum of the

amount attributed to "notational principal," plus the amount of realized income in the earnings reserve account. If total market value of the permanent fund is less than the sum of those two figures, then current corporation accounting practices would limit the amount available for expenditure under AS 37.13.145 to the amount (if any) by which the total market value of the permanent fund on the last day of that fiscal year, including the earnings reserve, exceeds "notational principal" (the sum of all dedications and appropriations to the principal of the fund over time).

Discussion

At the outset we observe that the permanent fund has not yet experienced market conditions that required the trustees to apply an "invasion test" to limit appropriations from the earnings reserve. It appears, though, that the possibility of this happening caused the trustees to request this opinion. Notwithstanding the apparent lack of immediacy, this opinion is as appropriate and necessary now as it was in 2001 when staff and counsel first recommended it. It is important that the public and the trustees understand the correct application of the law and that the corporation's financial statements properly inform the public. It now appears that the financial condition of the fund and earnings reserve, barring some unforeseen and extraordinary financial event at the end of the fiscal year, will again not test the application of the concepts discussed here. Clearer opinions no doubt result when the law is not looked at through the fog of a looming crisis.

While the permanent fund is not a trust, we resort in part to trust principles to answer the corporation's questions, the central issue of which turns on construction of AS 37.13.140, defining income for purposes of the permanent fund corporation. The terms of every trust are governed by the governing document, statutes, court decision, and general trust principles. In the case of the permanent fund, the governing document is the Alaska Constitution and valid implementing statutes. In arriving at the correct interpretation of sec. 140, we will attempt insofar as possible to harmonize the provisions of that statute with trust principles.[23] However, if there is a conflict, existing law must prevail. An added complication is that the provisions of AS 37.13.140 can be read to be ambiguous regarding the treatment of unrealized gains and losses on assets of the permanent fund. We must determine whether unrealized gain or loss is an element of principal or income. This allocation is important for determining how much is available for distribution in a given year.

All who have considered the legal character of the permanent fund agree that it is not a trust. It is a constitutionally dedicated fund, the principal of which must be invested in income producing assets. However, each analysis inevitably turned to trust principles to support the advice given. Early in the life of the fund, this office advised the legislature that it was not obligated to protect the fund from inflation, but that it could

[23] We have located no case law in Alaska applying trust principles relevant to the questions presented.

undertake that responsibility and make clear that the fund will be operated according to trust concepts. We also advised that the legislature is a trustee when it provides for the administration of the permanent fund. This means that the legislature may be limited in its lawmaking power when it provides meaning to terms and concepts applicable to the permanent fund.

It appears that the legislature intended to act consistent with the advice of this office when it first enacted statutes to implement the permanent fund amendment. In a free conference committee report, the chairmen declared the permanent fund is ". . . designed to be a trust which focuses on the safety of principal first and the maximization of earnings second."[24] The corporation has also done its part to interpret both the constitution and the statutes. The corporation made specific the legislature's direction through various resolutions and policies. The corporation's powers to interpret and make specific the constitution are important. However, because we are interpreting the constitution and enabling statutes, it is not likely that a court will accord deference to interpretations by either the legislature or the corporation.[25]

---

[24] 1980 Senate J. at 671 (Senate and House J. Supp. No. 7).

[25] In *Hickel v. Cowper*, 874 P.2d 922 (Alaska 1995), the Alaska Supreme Court declared that matters of constitutional construction are reviewed *de novo*. The court will determine what the constitution actually means and will approach this task as a question of law which requires the exercise of independent judgment. 874 P.2d at 926.

The constitution uses the terms "principal" and "income" in establishing the permanent fund. As a limited exception to the general constitutional prohibition on dedicated funds, the constitutional amendment creating the permanent fund is explicit in that only principal must remain dedicated for investment and that income should be made available for appropriation from the general fund. This requirement by implication prevents appropriation of principal but does not further define principal or income. It clearly does not require that principal be preserved in the manner contemplated by the "invasion test" or in any way subjugate the availability of "income" for expenditure to the dedication of "principal" to income producing investments.

Consistent with the constitutional dedication of fund principal to one purpose, income producing investment, the legislature has declared a general purpose to provide safety for principal and legislative committees have, in a non-binding way, expressed intent that principal must be preserved. Relying in part on this expression of intent, the corporation interpreted the constitution and enabling statutes to require that principal be recorded at the dollar amount historically deposited by dedication and appropriation without any diminishment for gain or loss on investments. However, in doing so it appears that the corporation failed to consider the potential effect on the constitutional requirement that income be made available for appropriation.

explained above, the amendment was promoted by some as a savings account that would serve as a form of development bank to help diversify an economy that was too dependent on non-renewable resource revenues. There was also a clearly stated purpose to dedicate oil revenue and prevent expenditure of the dedicated amounts. The amendment expressly provided that income is to be deposited in the general fund or other legislatively authorized purpose. After the amendment was adopted, the legislature abandoned the development bank approach in favor of an investment fund managed by a public corporation authorized to make conservative fixed income investments.[26]

At the time the permanent fund amendment was adopted in 1976, trust law traditionally allocated gain and loss on equity securities to principal rather than income.

> The proceeds of the sale of trust property are ordinarily to be treated as trust principal, even though they include profit in excess of cost price or inventory value. Losses on such sales fall on trust principal. The rule should govern sales of corporate stock where there is a gain in value due to undistributed earnings.

Bogert on Trusts, sec. 120 (6th ed. 1987). As recently as 1984, the legislature chose to adopt traditional allocation rules for common trusts.[27]

There has been a movement among the trustees of endowment trusts to change traditional allocation rules to permit investment in equity securities. This

[27] 1984 House and Senate J. Supp. No. 21; *see also* AS 13.18.020(b) and 13.38.050.

approach would authorize a trustee to consider capital gain as part of the total return, enabling distributions to beneficiaries without being restricted by whether the returns are accounting income or value appreciation. A uniform act was proposed in 1972 to permit trustees to allocate both realized and unrealized capital appreciation to income for distribution purposes.[28] The uniform act is the law in 46 states and the District of Columbia. The UMIFA contains an impairment rule very similar to the "invasion test" contemplated by the corporation. Realized and unrealized gains are offset to determine if the historic dollar amount of contributions to principal will be impaired by a planned distribution. Sec. 2 UMIFA. However, the uniform act is not the law in Alaska. Aside from the difference between the permanent fund and an endowment trust, the uniform act differs from existing law by permitting distributions based on unrealized appreciation. State law charts a different course for the permanent fund by not allowing such a distribution. For that reason, it is not appropriate to apply the impairment rule of the uniform act. When the legislature expanded authority for investments to include equity

[28] Uniform Management of Institutional Funds Act, 7A U.L.A. 316 (West Supp. 1997) (UFIMA).

securities, it added a definition of income. AS 37.13.140 provides in pertinent part:

> Net income of the fund shall be computed annually as of the last day of the fiscal year in accordance with generally accepted accounting principles, excluding any unrealized gains or losses.

(Emphasis added.) This hybrid definition of income is intended to "to allow the maximum use of disposable income." AS 37.13.020(3). By making clear that "gain" is to be an element of income, the definition of income was expanded to include capital appreciation, but it plainly prevented any distribution of unrealized gain. Section 140 does not explain the accounting treatment for unrealized gains and losses other than to provide that this form of appreciation or loss is to be excluded from the determination of income.

The limitation of income to that which is realized appears to be consistent with the text of both the constitution and statute. The constitution provides the income "shall be deposited in the general fund." Alaska Const., art. IX, sec. 15. The statute provides: "[I]ncome from the [permanent] fund shall be deposited by the corporation into the [earnings reserve] account as soon as it is received." AS 37.13.145(a). When interpreting these words, a court will attempt to discover the plain meaning and purpose of the provision.

> Because of our concern for interpreting the constitution as the people ratified it, we generally are reluctant to construe abstrusely any constitutional term that has a plain ordinary meaning. Rather, absent some signs that the term at issue has acquired a peculiar meaning by statutory definition or judicial construction, we defer to the meaning the people themselves probably placed on the provision. Normally, such deference to

> the intent of the people requires "[a]dherence to the common understanding of words."[29]

The words "deposit" and "received" convey a meaning that income is to be in hand, or realized.[30] By applying these common meanings there is no conflict between sections 140, 145, and the permanent fund amendment.

Section 140 defines income with reference to generally accepted accounting standards. Before 1997, these standards did not include unrealized gain or loss in the determination of income. These unrealized values were permitted to be reported in notes at the foot of an agency's financial statements. After 1997, accounting principles changed to require the depiction of investment income as the net increase or decrease in fair value. Fair value is what a willing buyer would pay for the security in an arm's length transaction and necessarily includes unrealized gain or loss on the valuation date of a security held in the corporation's portfolio. Para. 22, GASB 31. This change reflected a concern that the disclosure of fair value in the notes may not have allowed financial statement users to be sufficiently aware of the potential effect of investment gains and losses. Appendix A to GASB 31. Even though GASB 31 requires fair value

[30] "Deposit" means to "place, cache, or entrust", while "receive" means to "take possession or delivery." Webster's Third International Dictionary.

reporting, the National Council on Governmental Accounting recognized that state law requiring other methods for the computation of income governs when there is a conflict.[31]

The restrictive definition of income set out in AS 37.13.140 embodies a policy instituted by the legislature to allow distributions to be made from the appreciated value of investments in equity securities. However, the legislature permitted appreciation to be considered income only if it is realized. Unrealized capital appreciation is not expressly allocated to either principal or income by section 140. As recounted in our discussion of the accounting practices set out above, realized appreciation was allocated to the principal of the permanent fund until the corporation was authorized to invest in equity securities. It is unclear whether unrealized appreciation was allocated at all, but we presume it would have been allocated to principal as well. We find no evidence that the legislature intended to alter the traditional allocation rules as to unrealized gain or loss. Therefore, we decline to attribute a legislative intent to allocate unrealized appreciation to income for any purpose, including the use of unrealized losses to determine whether there has been an invasion of principal. We believe that this policy is not authorized and could possibly upset the balance in the accounting for principal and income. The better interpretation is to give a consistent meaning to the exclusion of unrealized appreciation

[31] "Conflicts between legal provisions and GAAP do not require maintaining two accounting systems. Rather, the accounting system may be maintained on a legal-compliance basis, but should include sufficient additional records to permit GAAP based reporting." (continued . . .)

or loss in section 140 and account for such gains and losses as an element of principal where it has traditionally been allocated.

In our opinion, authority to invest in equity securities does not imply that unrealized gain or loss becomes an element of income for any purpose. The legislature can establish allocation rules for common trusts under its plenary law-making powers. *See Bogert on Trusts and Trustees*, sec. 816 (2nd ed. rev.) (but the best criterion for making [allocation] decisions is the practical treatment of the topic by the courts or the legislature.) We believe that the legislature established such a criterion when it enacted section 140.

Under article IX, section 15 of the Alaska Constitution and the relevant implementing statutes, there is no basis for expanding the concept of principal by creating a notational number that serves as a limitation on the deposit of income for distribution purposes. Once dedicated or appropriated, the principal in the permanent fund is used only for income producing investments the value of which rise and fall in corporation financial statements as unrealized gains and losses dictate. Only through a constitutional amendment, like that currently proposed by the corporation trustees establishing a payout limit of 5 percent of the total fund value, can the rate of dedication be increased and the deposit of income available for distribution be limited. Absent such an amendment, the

---

Para. 13, National Council on Governmental Accounting Statement No. 1 (Governmental Accounting and Financial Reporting Principles, issued March 1979).

full amount of income, made up of the realized gains and losses, is available for expenditure. It is up to the legislature, as it has done in the past, to appropriate excess permanent fund income to principal.[32] A corporate practice cannot operate to prevent the legislature from exercising discretion over the disposition of income.

Finally, we anticipate some will claim that our reading of the constitution and statutes serves to permit a silent invasion of principal when the permanent fund is carrying a large unrealized loss on its books. Realized income does not lose its character as income even if it were offset by unrealized capital losses. There simply is no basis in the history of the amendment or the enabling statutes for a liberal interpretation that

---

[32] As of June 30, 2002 the permanent fund recorded net assets totaling $23.5 billion. Of that total, $21.8 billion was principal. Since 1982, $7.5 billion of permanent fund income has been added to principal for inflation-proofing, through June 30, 2002. In addition to the constitutionally and statutorily mandated dedicated revenues, the legislature has made special appropriations to the permanent fund totaling $6.9 billion. The amount and sources of these appropriations are set out below:

Permanent Fund
Special Appropriations
(amounts in millions)

Year	Amount	Source
FY 81-85	$2,700	Surplus Oil Revenues
FY 87	1,264	Earnings Reserve Account
FY 96	1,842	Earnings Reserve Account
FY 97	803	Earnings Reserve Account
FY 00	250	Earnings Reserve Account

In FY 03 the legislature appropriated and additional amount to principal which could not be determined as of the date of this opinion.

would expand the scope of the dedicated fund by foreclosing expenditure of traditional accounting or statutorily defined income. To do so would do violence to the plain meaning of the constitution and section 140 which require that income be determined by realized gains and losses and be available for expenditure.

The constitutionally required dedication of principal is more than satisfied by the prudent investing practices of the corporation in statutorily approved investments and the generous inflation-proofing and contributions to principal appropriated by the legislature. We decline to read into either the constitution or the statutes a broader exception to the general prohibition on dedicated funds than can be justified by the plain meaning of article IX, section 15 of the Alaska Constitution and relevant implementing statutory provisions and the history leading to the adoption or enactment of these provisions.

Sincerely,

Gregg D. Renkes

Eric Wohlforth
Chair, Board of Trustees
Alaska Permanent Fund Corporation
P.O. Box 25500
Juneau, Alaska 99802-5500

Re: Transfer of Securities Pursuant to the Proposed Appropriation of $4 Billion of Permanent Fund Income to the Constitutional Budget Reserve Fund

Dear Mr. Wohlforth:

On behalf of the Board of Trustees of Alaska Permanent Fund Corporation ("APFC") you have requested our opinion on three questions regarding the transfer of securities from the Alaska Permanent Fund (the "Permanent Fund" or the "Fund") to the Constitutional Budget Reserve Fund to implement a proposed $4 billion appropriation of income from the Fund by the Governor and Legislature.

Question One: What is the proper definition of principal in the Permanent Fund, and does the plan to identify securities for transfer described in the accompanying memorandum (the "Discussion") in any way involve the expenditure of principal which is prohibited by the Constitution?

Answer: Principal in the Alaska Permanent Fund is an amount equal to the amounts contributed to the Fund by constitutional dedication, statutory dedication, and appropriation. The amount representing the excess of total assets, less total liabilities, over principal are credited to the earnings reserve account. Accordingly, the plan to identify securities for transfer does not involve the prohibited expenditure of principal provided that at the time of transfer the value of the securities transferred does not exceed the amount then credited to the earnings reserve account in the Permanent Fund as determined under generally accepted accounting principles.

Question Two: Is there anything in the Constitution or the enabling act that would conflict with or prevent the plan described in the Discussion from being implemented as presently conceived?

Answer: No, provided that the proposed legislation described in the Discussion amends the statute to direct that the earnings reserve account shall be determined pursuant to generally accepted accounting principles, amends the net income provision to clarify that it pertains only to the computation of income available for distribution, and directs that the amount of principal remaining in the Permanent Fund be maintained inviolate.

Question Three: What fiduciary obligations are imposed upon the Board of Trustees of the APFC ("Board") when they undertake to identify specific securities within the portfolio of the Permanent Fund for transfer?

Answer: Although not trustees of a true trust, the Board will be subject to the duties of judgment and care imposed by the prudent investor rule — here imposed by statute — whenever they select securities to sell and reinvest. The magnitude of the proposed transaction may impose greater restrictions on their flexibility than would be imposed by the ordinary turnover of a smaller percentage of securities within the portfolio. The proposed alternative method of transferring an across the board "slice" of the Permanent Fund's assets in the form of a unit interest in the commingled investment pool would preserve the existing diversification and asset allocation. Their duty to incur only reasonable expenses would appear to be well served by the proposed in-kind transfer, absent other conflicting considerations. The Board's constitutional duty to preserve principal is not impaired, provided the legislation requiring the transfer directs that principal is not to be impaired by the transfer. The Board's fiduciary duties to the other entities whose funds it administers are essentially limited to those of an investment manager — to follow the statutory prudent investor rule and to account for the principal and income in accordance with the governing statutes of each entity.

In rendering this opinion and responding to your inquiries, we have considered such facts and circumstances as you, the Commissioner of Revenue, the Chief Financial Officer, and others within the staff of the APFC have made available to us that describe the pending legislation, as well as the existing accounting methodologies utilized by the Permanent Fund as described in a memorandum prepared by the Chief Financial Officer of the APFC. We have also relied on discussions with, and a memorandum describing, the Permanent Fund's outside accountant KPMG's accounting analysis of the proposed transaction. Both memoranda are attached to this letter. We have also considered such law as we deemed appropriate and have made assumptions as stated in the Discussion. We have relied primarily on secondary sources for legislative or constitutional history materials due to the apparent lack of original documents. Our review of the books and records of the APFC has been limited to the 1997 and 1998 Annual Reports. This opinion is based upon and subject to those facts and circumstances supplied to us and

the considerations and assumptions reflected in the Discussion. Unless otherwise defined herein, capitalized terms shall have the meaning contained in the Discussion.

This opinion has been reviewed by the Office of the Attorney General of the State of Alaska and it concurs in our conclusions. This letter responds only to the specific questions asked, and should not be relied upon for opinions on issues that were not specifically requested. This opinion is provided solely for the use of the Board of Trustees of AFPC and may be distributed only as it shall direct.

Very truly yours,

Morrison & Foerster LLP (AHC)

DISCUSSION

Discussion appears under the following headings:

I. Background 5
II. Constitutional Duty to Protect Principal 5
III. Character of Fund — Not a True Trust 6
IV. Relevant Fiduciary Principles 8
V. Definition of "Principal" 10
VI. The Meaning of Income 13
VII. Impact of a Transfer on Principal 16
VIII. Statute Inconsistent With GAAP 17
IX. Limited Fiduciary Duties Analyzed 19
A. Prudence in Investing 19
B. Duty to Minimize Expenses 20
C. Fiduciary Duty of Loyalty — to the State 20
D. Investments Managed on Behalf of Other Entities 20

I. Background

You have informed us that Governor Tony Knowles proposes to appropriate $4 billion from the income of the Alaska Permanent Fund (the "Permanent Fund" or Fund"), Alaska Const. art. IX, 15, to the Constitutional Budget Reserve Fund, Alaska Const. art. IX, 17. The size of the proposed transfer would necessitate taking amounts equivalent to both realized and unrealized income from the earnings reserve account as it is determined under generally accepted accounting principles. Moreover, the actual sale of securities in order to realize up to $4 billion in cash proceeds to transfer would entail large transaction costs. Accordingly, it has been proposed that investments of the Permanent Fund not be sold in order to realize income, but that specific securities equivalent in value up to the amount of income appropriated be identified and transferred in kind to the Constitutional Budget Reserve Fund. Under these circumstances, questions have arisen as to whether the existing constitutional and statutory framework would permit such an in-kind transfer.

II. Constitutional Duty to Protect Principal

In anticipation of a great wave of revenue from Alaska's oil resources and with a historical recognition of the boom and bust nature of natural resource exploitation, the Constitution of the State of Alaska was amended by public referendum in 1976 to dedicate a portion of the State's natural resource revenues to the Alaska Permanent Fund. That same constitutional mandate required that the principal of the fund "shall be used only for income-producing investments specifically designated by law as eligible for permanent fund investments." Alaska Const. art. IX, 15. However, "[a]ll income from the permanent fund shall be deposited in the general fund unless otherwise provided by law." *Id.* This section has been interpreted to safeguard the principal of the fund by removing it from the power of legislative appropriation. Williams v. Zobel, 619 P.2d 448, 453 (Alaska 1980) ("the constitutional provision establishing the fund places the principal of the fund beyond the Legislature's appropriation power, which can be exercised only over earnings derived from the fund"), *rev'd on different grounds*, 457 U.S. 55 (1982).

The constitutional and legislative history are replete with discussions of the meaning and intent of a "permanent" fund. The consensus appears to have been that the principal could never be touched, but was to be invested in perpetuity. As a result, moneys dedicated or appropriated to the Permanent Fund cannot be withdrawn. *See* Helgath & Bibb, The Alaska Permanent Fund; Legislative History Intent and Operations (Alaska State Senate, January 1986) at 30-33.

III. Character of Fund — Not a True Trust.

As a predicate to our analysis, the legal status and character of the Permanent Fund must be established. Upon analysis, we conclude that the Permanent Fund does not have the fundamental characteristics of a true private or public trust fund.

First, the Constitution does not actually create a trust. Rather, the enumerated state revenues are placed in a dedicated fund called a permanent fund. This constitutional provision is an express exception to another constitutional provision which prohibits the dedication of state proceeds "to any special purpose, except as provided in section 15 of this article [the Permanent Fund]". Alaska Const. art. IX, §7. And indeed, no specific trust purposes are enumerated —rather, all income is to be deposited into the state's general fund to be expended as the legislature sees fit. Alaska Const. art. IX, 15.

Moreover, simply calling the Board "trustees" does not create a trust. "It is not enough, however, that a statute purports to create a trust: A state cannot magically transform ordinary agents, contractors, or sellers into fiduciaries by the simple incantation of the terms "trust" or "fiduciary." *See* In re Khai Tran, 151 F.3d 339, 342 (5th Cir. 1998).

In this case, the trustees are not designated as trustees of a trust fund but rather constitute the Board of a public corporation created under a statutory charter, AS 37.13.040, and required by the Constitution to be closely tied to the executive branch. *See* Alaska Const. art. III, §22. Indeed, the Alaska Attorney General has frequently issued legal opinions that the APFC is a state agency, and that its Board officers and employees are subject to the same laws and immunity as other state officials. *See, e.g.*, 1982 Op. (Inf.) Atty. Gen. Alaska, File No. 366-269-83 (Dec. 2, 1983).

Despite the obligation to take care when handling the Fund's investments in order to preserve the safety of capital as well as produce income, AS 37.13.120, "all income" from the Fund is specifically made subject to disposition "by law," and hence is subject to appropriation by the Legislature.

In this instance, the Constitution mandates that the Fund produce income not for beneficiaries of the Fund but for the "general fund" of the State of Alaska or for such other purposes as the Legislature shall direct. Thus, unlike a trust, the Board does not manage Fund assets for beneficiaries, present and future. Rather, it manages the Fund to generate income for distribution as the Legislature, not the Board, directs. Because the disposition of income is subject to the control of the Legislature, which may choose to either distribute it (favoring current recipients) or add it to principal for reinvestment (favoring future generations), the balance between the interests of current and future

generations is determined by the Legislature, not the Board. Because the determination of the distribution of income is constitutionally reserved to the Legislature, the Alaska Permanent Fund, at least with regard to the disposition of income, is more properly characterized as an investment fund rather than a classical trust fund.

Consequently, the "trustees" of the Permanent Fund do not have the customary trustee's obligations to balance the investments of the trust so as to avoid overgeneration of income for current beneficiaries at the expense of future beneficiaries. The trustees of a classical trust would be required to invest and distribute income in such a manner as to balance the needs of present and future beneficiaries. *See Restatement (Second) of Trusts* 183 cmt. a (duty to deal impartially with the beneficiaries of a trust whether they are entitled to their interests "simultaneously or successively") *and* §232 (duty to the successive beneficiaries to act "with due regard to their respective interests"); 3A Fratcher, Scott on Trusts (4th ed. 1998) §232 at 5-7.

Because the Constitution leaves the distribution of income to subsequent direction by law, the Fund differs from a true trust that creates a class or classes of beneficiaries with a legally enforceable entitlement to income. If a true trust with regard to income had been created in a legal sense, its ascertainable beneficiaries (a necessary component of any trust, *see Restatement (Second) of Trusts* 112 (1959) ("Definite Beneficiary Necessary")) would have enforceable legal rights against the trust and a legal entitlement to their dividends. However, both Alaska and federal courts have rejected any such notion of absolute entitlement. In Exxon Corp. v. Heinze, 792 F. Supp. 72,75 (D. Alaska 1992), the court stated that "The right to a dividend is a matter of legislative grace, not entitlement." The Court observed that no individual owns an interest, or has a cause of action to protect his expectancy regarding future dividends. *See also* Underwood v. State, 881 P.2d 322, 327 & n.7 (Alaska 1994) (no Alaskan has a vested right to a dividend, which is a creature of the Legislature and can be abolished at any time); Beattie v. United States, 635 F. Supp. 481, 491 (D. Alaska 1986), *aff'd sub nom.* Griesen v. United States, 831 F.2d 916 (9th Cir. 1987), *cert. denied*, 485 U.S. 1006 (1988) ("The people do not 'own' the natural resources nor the proceeds from the same nor the Alaska Permanent Fund. . . . . In adopting their constitution, the people of the State of Alaska have very clearly constituted the State as owner of the natural resources which give rise to the fund [Permanent Fund] in question."); State v. Anthony, 810 P.2d 155, 158 (Alaska 1991). Indeed, the IRS has ruled that current distributions, *i.e.*, dividend payments, are not distributions of Permanent Fund income, but rather are distributions of State funds. Rev. Rul. 90-56, 1990-2 C.B. 103 (1990).

Likewise, there is no class of remainder beneficiaries who ultimately would receive the principal of the trust. In contrast, under a private trust, "[a]lmost every trustee finds that the trust terms require him to pay or apply income to or for a

temporary beneficiary, and to distribute principal to one or more beneficiaries prior to or upon termination of the trust." G. Bogert, Trusts and Trustees, (rev. 2d ed.) Ch. 39, §816, at p. 339. The constitutional history plainly indicates that the Permanent Fund was to be exactly that — *permanent*. "Unlike most trusts, the principal may not be reached whatever, either now or in the future. No one has a future right to principal." Helgath & Bibb, The Alaska Permanent Fund: Legislative History, Intent, and Operations (Alaska State Senate, January 1986), at 32 (quoting State of Alaska Department of Law Letter to Representative Clark Gruening (Aug. 31, 1977)).

These facts, which distinguish the Permanent Fund from a true trust, are reinforced when considering other public trusts, each of which imposes duties on the trustees not only to manage the fund, but also to distribute the income to specified classes of beneficiaries. The state statutes reflect that the Alaska Legislature has either established or has inherited from Congress legislative authority over legal trust funds in other contexts. *See, e.g.*, Public School Trust Fund, AS 37.14.110-37.14.170; Alaska Children's Trust, AS 37.14.200-37.14.270; Mental Health Trust, AS 37.14.001-37.14.099. When it was intended that such state funds have a more traditional trust character, they were designated trust funds with duties to identifiable beneficiaries. For example, the enabling act for the Mental Health Trust specifies that the trust has beneficiaries, and charges the trustees with duties towards the beneficiaries. AS 37.14.007(b).

We conclude therefore that the Permanent Fund is an investment fund, not a true trust fund.[1] Indeed, to a great extent it is *sui generis*, and not readily susceptible to analogies or traditional concepts. *Compare* Beattie v. United States, 635 F. Supp. 481 (D. Alaska 1986), *aff'd sub nom.* Griesen v. United States, 831 F.2d 916 (9th Cir. 1987), *cert. denied*, 485 U.S. 1006 (1988).

IV. Relevant Fiduciary Principles

[1] We note that in 1997 the Government Accounting Standards Board circulated an Exposure Draft of "Basic Financial Statements — and Management's Discussion and Analysis — for State and Local Governments", which would require reporting from dual perspectives at both the entity-wide perspective and at the fund perspective. These financial reporting standards would define a new type of fund, Permanent Funds. These funds would consist of certain funds previously classified as Nonexpendable Trust Funds. This category would be included in the proprietary fund category, although such Permanent Funds presented at the fund perspective level would be presented in the entity-wide financial statements as governmental activities. The Permanent Fund category would include funds that are legally restricted to the extent that only earnings and not principal may be used for purposes that support the reporting government's programs (*i.e.*, for the benefit of the public).

Despite the foregoing, trust law has some relevance to interpreting the statutory and constitutional obligations of the Permanent Fund. The Legislature has imposed certain statutory fiduciary obligations upon the Fund that are rooted in trust law. *See Restatement (Second) of Trusts* §2, cmt. b (1959)("Fiduciary Relation") (limiting the duty of a fiduciary to act for the benefit of another "within the scope of the relation"); SEC v. Chenery Corp., 318 U.S. 80, 85-86, 63 S Ct. 454, 458, 87 L. Ed. 626, 632 (1942) (opinion of Frankfurter, J.) ("To say that a man is a fiduciary only begins analysis; it gives direction to further inquiry. To whom is he a fiduciary? What obligations does he owe as a fiduciary? In what respect has he failed to discharge these obligations? And what are the consequences of his deviation from duty?"); A. Scott, "The Fiduciary Principle," 37 Calif. L. Rev. 541 (1949) ("Some fiduciary relationships are undoubtedly more intense than others. The greater the independent authority to be exercised by the fiduciary, the greater the scope of his fiduciary duty.")

In this instance, the Board's fiduciary duties are provided by statute, which specifically imposes the prudent investor rule on the Board, admonishing it to "exercise the judgment and care under the circumstances then prevailing that an institutional investor of ordinary prudence, discretion, and intelligence exercises in the management of large investments entrusted to it not in regard to speculation but in regard to the permanent disposition of funds, considering the probable safety of capital as well as probable income." AS 37.13.120.

Here, the fiduciary duty of the Board is limited to preservation of principal and money management; the Governor and Legislature are in charge of distribution of income. This Board is obligated to manage the investments of the principal by the prudent investor rule, a rule traditionally applicable to trusts. It is charged with a paramount duty to preserve principal, again a fundamental trust law concept.

We believe that in analyzing the questions presented here, a Court would look to the plain language of the Constitution and implementing legislation, their purpose and intent, the decisional law of the state, and to the past practice of the responsible administrative agencies. *See* G. Bogert, Trusts and Trustees, (rev. 2d ed.) §816 at p. 340 ("the best criterion for making decisions [as to what is principal] is the practical treatment of the topic by the courts or legislatures.") And secondarily, when faced with the duty to interpret the applicable provisions of law absent controlling statutory or constitutional guidance, the Alaska courts also will look to basic trust law principles for analogies to guide their rulings.

A fundamental rule of trust law is that a trustee has such powers as are specifically conferred by the terms of the trust. The expression "terms of the trust" is here used in the broad sense, *Restatement (Second) of Trusts* 186, and frequently

includes statutory terms such as the prudent investor rule. A basic rule of trust construction is that the courts will interpret the trust documents in such a way as to implement the intent of the creator of the trust. Similarly, when the courts come to interpret and apply legislation, they construe legislation in accord with the legislative purposes. By either standard, the primary focus will be to determine what was intended. The statutory and constitutional provisions — the "terms of the trust" — will govern over general default rules of trust law, which will be applied only where the terms are silent. With these distinctions in mind, we turn to the relevant sections of the Alaska Constitution and the Alaska statutes.

V. Definition of "Principal"

The starting point for a definition of principal is the fundamental distinction between principal and income. Trust law divides the assets of a trust between the mutually exclusive categories of principal and income. Black's Law Dictionary (5th ed. 1979) defines "principal" as "property as opposed to income. The term is often used to designate the corpus of a trust." The Revised Uniform Principal and Income Act ("RUPIA"), which Alaska has adopted for *private trusts*, defines principal as: "The property that has been set aside by the owner or the person legally empowered so that it is held in trust eventually to be delivered to a remainderman while the return or use of the principal is in the meantime taken or accumulated for an income beneficiary." AS 13.38.020(b). By contrast, income is defined as: "The return in money or property derived from the use of principal, including ...." AS 13.38.020 (a). Even in private trusts, however, the terms of the trust may override the classic treatment of principal and interest by specific direction. AS 13.38.020(a); *see Restatement (Second) of Trusts* §§232-233.

Neither the Alaska Constitution, the statutes, nor the decided cases announce a comprehensive definition of the "principal" of the Permanent Fund, although they prescribe that certain amounts be dedicated or allocated to the Fund's principal. The statutes have defined "income" in different ways at various times which provides some guidance because what is income is not principal and what is not principal must be income. For the reasons stated below, we believe that a coherent definition of principal nevertheless may be derived from the Alaska Constitution and statutes, which is supported by analogy from trust law.

The drafters of the Constitutional clause that established the Permanent Fund had an overriding concern with the preservation of principal for the production of income for future generations. *See* Free Conf. Comm. Rept. for SB 161, p.1 (May 4, 1979). This duty was recognized by the Legislature when it enacted provisions to inflation-proof the principal of the fund, and is recognized by the Trustees themselves in managing their

investments. Alaska Permanent Fund Corporation, 1997 Annual Report, p. 1. Classically, the principal of a trust, or its "corpus," is the amount set aside to fund the trust when it is first created or "settled." Extending this principle to the Permanent Fund, the principal of the Fund clearly includes the amounts constitutionally dedicated to the Fund, that is, at least twenty-five percent of:

- mineral lease rentals,
- royalties,
- royalty sale proceeds, and
- federal mineral revenue sharing payments and bonuses.

Alaska Const. art. IX, 15.

In addition, such additional funds as the Legislature has directed to the Fund also constitute its principal. By statute, the Legislature has increased the constitutionally dedicated amounts from certain mineral leases to fifty percent of the enumerated revenues. AS 37.10.010. The Legislature also has enacted provisions further dedicating amounts for inflation-proofing pursuant to the statute, AS 37.13.145 (c), and transferring settlement earnings to principal, AS 37.13.145(d). And from time to time, the Legislature has appropriated additional amounts specifically to principal. *See* AS 37.13.010(a)(3). *See, e.g.*, 1983 Op. Atty. Gen. Alaska No. 234 (Sept. 23, 1983) (discussing inflation proofing — reflects consistent legislative view that principal is limited to monthly deposits of these enumerated revenues plus specific appropriations to principal).

This definition of principal is consistent also with the core concepts of trust law. The principal of a private trust would be the amount that the settler of a trust set aside for the future.

In a private trust, however, some portion of earnings also would be directed to principal absent specific direction from the trust document. For example, the Restatement of Trusts and the Uniform Act provide definitions of how profits, gains, dividends and interest should be allocated between principal and income. By implication, these authorities prescribe what increments of profit from investments shall be added to principal. For example, unless otherwise provided by the terms of a private trust, realized capital gains would be added back to the principal of the trust. This allocation is necessary in the private trust context because of the need to balance the interests of current and remainder beneficiaries.

The governing law for the Permanent Fund, however, does not look to private trust law principles for guidance, but rather establishes a different treatment for gains,

whether realized or unrealized.[2] First, under the Constitution, all income from the Permanent Fund is directed to the general fund of Alaska and is not added back to principal unless the Legislature directs otherwise. Alaska Const. art. IX 15. Indeed, the Constitution expressly directs that principal be used "only for income-producing investments", Alaska Const. Art. IX, 15; it does not require that any portion of it be used for principal-producing investments. The legislative history of the constitutional Permanent Fund provision indicates that the legislative intent behind the constitutional mandate depositing all income into the general fund was to give "future legislatures the maximum flexibility in using the fund's earnings—ranging from adding to fund principal to paying out a dividend...." Joint Comm. Rept. on HJR 39, 1976 House Journal, p. 635.

The history of legislative direction and control over gains and losses further supports the conclusion that they are allocable to income. The statutory scheme does not rely on traditional trust definitions of income or principal, but rather focuses on whether a particular inflow of money is to be considered "net income" under generally accepted accounting principles. AS 37.13.140. Thus under the statute, a capital gain of the Permanent Fund is allocated to income, not to principal. AS 37.13.140. Consequently, the Legislature's definitions of income reinforce the conclusion that principal consists exclusively of the constitutionally and statutorily-mandated sums plus additional legislative appropriations.

A related question is whether principal of the Permanent Fund consists of an identified, specific set of assets. We believe not. The sums set aside for the Permanent

[2] We believe a court would recognize that when the Legislature intended to incorporate specific provisions of private trust law, it chose precise language to do so. For example, other state trust funds have provisions that require that realized revenues, depending on their character as gains, losses, interest or dividends, are allocated to either principal, which must be preserved, or income which may be expended by the legislature for any public purpose. To illustrate, the enabling act for the Mental Health Trust expressly provides that principal and income are to be determined according to the guidelines applicable to private trusts. AS 37.14.031(d), citing AS 13.38 (the Revised Uniform Principal and Income Act). The governing statutes for the Public School Trust Fund, the Alaska Children's Trust, and the Alaska Heritage Endowment Fund all expressly provide that (1) income does not include capital gains or losses realized on principal, and (2) capital gains or losses realized on the principal shall be retained in the respective trust funds perpetually for investment as additions to principal. AS 37.14.110(c)(Public School Trust Fund); AS 37.14.240(a) (Alaska Children's Trust); AS 37.14.530(a)(Alaska Heritage Endowment Fund). In contrast, the Permanent Fund enabling act, as amended by the legislature, defines net income to include all realized income (regardless of its character as gain, dividend or interest), and excludes only *unrealized* gains or losses. AS 37.13.140.

Fund are cash revenues from identified resources and activities, which are invested in income-producing investments. This is not like a public land trust, for example, where the principal consists of specifically identifiable or tangible assets. Cash, by definition, is fungible — one dollar has no different character than any other dollar. The Permanent Fund principal cannot be traced to specific investments separate and apart from the investments representing reinvested earnings. Thus principal is an aggregate amount, consisting of the sum of all constitutional dedications, statutory transfers from income, and legislative appropriations. So long as the Permanent Fund records and separately accounts for these sums, the amount of principal has been identified. However, principal is not specifically identified to particular assets.

VI. The Meaning of Income

To answer the question of whether and when an invasion of principal could occur, we must consider the definition of income. The first statutory definition of income was found in section 37.13.140 ("Income") and its companion provision, section 37.13.130 ("Gains and Losses"). Income was then defined as "interest received in a year." Under section 37.13.130, the net gains from the sale of securities were to be added to principal, which was intended to help offset the effects of inflation. Free Conf. Comm. Rept. for SB161, p.2 (May 4, 1979).[3] It also provided that an amount equal to net losses from such sales should be deducted from income and added to principal, which was intended to protect the principal from erosion. *Id.* No specific legislative direction of such net gains to principal would have been necessary or possible if net gains were not otherwise included in income, and hence subject to legislative control.

Section 37.13.130 was repealed in 1982. At that time, section 37.13.140 was amended. Although the Section is titled "Income," it begins by discussing "Net Income." It does not define net income but directs that it be computed annually "in accordance with generally accepted accounting principles, excluding any unrealized gains or losses."[4] Section 37.13.145, titled "Disposition of Income," also does not define income directly, but rather provides that "Income from the fund shall be deposited by the corporation into the [earnings reserve] account as soon as it is received."

---

[3] This language reflects the Permanent Fund's statutory investment limitations. At the time, the Board lacked the power to invest in equities; the securities in question presumably would be bonds and other interest bearing investments such as mortgages.

[4] A later amendment clarified that income from the earnings reserve account is also included within income. 1992 SLA Ch. 134, §19.

Section 37.13.140 references generally accepted accounting principles for the determination of net income. At the time section 37.13.140 was first adopted, generally accepted accounting principles did not recognize unrealized gains or losses in income. In 1997, the Governmental Accounting Standards Board ("GASB") adopted Statement No. 31 ("GASB 31"). That standard requires that unrealized gains (or losses) be taken into account in determining net income. Consistent with the adoption of GASB 31, the Permanent Fund for *reporting purposes* now periodically marks to market its investment portfolio and reflects unrealized gains and losses in its statement of revenues and expenses.

The statutory reference to the definition of net income provided by generally accepted accounting principles, in turn, poses several interpretative issues. First, is there a difference between income and net income for statutory purposes? Second, given the change over time in generally accepted accounting principles ("GAAP"), has the statutory language become internally inconsistent or can it be reconciled with GAAP?

Is there a viable distinction between "income" and "net income" for purposes of section 37.13.140 or section 37.13.145 or both? Standard accounting texts recognize the concepts of gross and net income; income, however, can be one or the other depending upon the context. Gross income, however, is income before expenses, i.e. is equivalent to gross revenues. Net income, in turn, is defined to be what is generally conceived of as profit. One standard accounting text defines net income as "the net increase in net assets (owners' equity) of the firm, assuming no new capital contributions by the owners or dividend distributions by the business." Williams, Stanga, Holder, Intermediate Accounting (1984). Thus, net income as typically understood for accounting purposes is consistent with the broader GASB 31 definition although not consistent with the definition of section 37.13.140.

One might argue that a distinction between income and net income is supported by the difference between the title of section 37.13.140 — "Income" — and the use of the term "net income" in the statutory language itself. We do not believe a court would favor this view. A common principle of statutory and contract interpretation is to disregard section titles. Sutherland Stat. Const. §47.14 (5th ed. 1992 & 1998 Supp.). The only reference within section 37.13.140 to "income" other than "net income" is the term "income available for distribution," defined as a percentage of net income for the last five fiscal years. This usage of "income" is not inconsistent with the usage of "net income" in that section.

Although it could also be argued that the statute adopts the determination of net income under generally accepted accounting principles, this incorporated definition must be read as modified by the plain text of section 37.13.140, which expressly

excludes from net income unrealized gains and losses. The available legislative history suggests that the Legislature made a conscious decision to reject inclusion of unrealized gains and losses in the determination of net income for dividend purposes.[5] Moreover, this reading of "net income" is consistent with the use of "income" in section 37.13.145(a) — "income" appears to be limited to that which can be "deposited . . . as soon as it is received," *i.e.*, cash or realized income. Finally, it is inconceivable that the Legislature could allow a nongovernmental party ("GASB") the discretion to decide in the future what is net income for purposes of calculating the payment of State funds without creating a potential improper delegation of legislative power.

The inconsistency between GAAP and the statutory definition of income is further exacerbated by the discrepancy between the earnings reserve account as it is computed under generally accepted accounting principles ("the GAAP earnings reserve account") and the statutory earnings reserve account described in section 37.13.145(a). The statute establishes the earnings reserve account as a separate account in the Fund. It then states, however, that "income from the fund shall be deposited by the corporation into the account as soon as it is received." AS 37.13.145(a). The obvious implication is that the statutory earnings reserve account includes only realized income. This language made sense in an era when generally accepted accounting principles also required earnings to be realized before being treated as income and included in an earnings reserve account. However, this statutory provision is inconsistent with current generally accepted accounting principles.

Because unrealized gains and losses are now taken into income for accounting purposes, the earnings reserve account used for accounting purposes (the "GAAP earnings reserve account") contains both realized and unrealized gains and losses. That is, the GAAP earnings reserve account used for accounting purposes now contains all

[5] The legislative history of the 1982 amendments to AS 37.13.140 suggests that the sponsors of the amendment were aware of the potential that such an inconsistency might develop between the statutory exclusion of unrealized gains and losses and GAAP. The Governor's transmittal letter for the amendment observes that the provision was consistent with GAAP at that time. The Governor, however, notes that "we are advised that the GAAP may be revised to allow inclusion of unrealized gains and losses while computing net income. While it is important for sound management to know the market value of the fund, this concern is satisfied by the reporting requirement of AS 37.13.170. The Board of Trustees has determined, and I concur, that since the amount of income available for distribution is fixed by statute and may not be altered by the Board, it is imperative for sound management of the Fund to ensure the exclusion of unrealized gains and losses when computing distributable income." Letter from Gov. Jay Hammond, regarding Sponsor Substitute for Senate Bill No. 684, 1982 Senate Journal 494, 496 (March 9, 1982).

income of the Permanent Fund as that concept is defined by generally accepted accounting principles. At any point in time, then, the assets of the Fund are divided between the GAAP earnings reserve account and the principal.

VII. Impact of a Transfer on Principal

When would an invasion of principal occur? An invasion of principal would occur if a proposed pay-out from the Fund exceeded the current balance of the earnings reserve account. Past Permanent Fund dividend pay-outs have not tested this limitation because they were constrained by the limitation of section 37.13.140 against including unrealized gains and losses in income. In other words, the Permanent Fund had a cushion of retained earnings (consisting of unrealized gains and losses) that, in an accounting sense, protected it against coming close to an invasion of principal.[6] After adoption of GASB 31, an invasion of principal would occur if the amount transferred or paid out of the earnings reserve account exceeded the balance in the account, which balance now includes both realized and unrealized gains and losses due to the operation of GASB 31.[7]

We have been advised, and we have assumed for purposes of our opinion, that the past practice of the legislature, the State, the APFC, and its accountants and outside auditors — since the inception of the Fund — has been to treat principal as a balance of the accumulated sum equal to the value of the total assets contributed to the Fund by constitutional dedication, Alaska Const. art. IX, 15, statutory dedication, AS 37.13.010, 37.13.145; *see* AS 37.13.020, and legislative appropriation. We have also been advised, and we have assumed for purposes of this opinion, that principal is not specifically attributed to any particular asset in the Fund, but is maintained as a balance amount in the Fund as a whole. Accordingly, under the present accounting methodology, the

[6] Another protection is found in section 37.13.145(b), which provides that only 50% of the income available for distribution is transferred to the dividend fund.

[7] A logical question occurs. What if most of the balance of the earnings reserve account were paid out and some time later the stock market suffered a major correction? In that hypothetical situation, the value of the earnings reserve account would turn negative. Would that negative balance, be offset against the principal balance and if so, would that constitute an invasion of principal? The answer is negative. An invasion of principal would occur where the Permanent Fund had attempted action to pay out more than the balance of the earnings reserve account. It would not occur where, after a payout, the balance of that fund turned negative. The critical difference is between an action of the trustees and the natural fluctuation of the investment markets. One is an action over which the trustees have control; the market fluctuation is not.

excess of market value of total assets over principal, less total liabilities, is credited to the earnings reserve account. Accordingly, when a dividend is paid, principal always remains in the Fund and is not impaired when specific securities are sold and the entire proceeds transferred out of the earnings reserve account. So long as the value of the assets remaining in the Fund less the total liabilities at the time of the transfer is greater than the principal balance amount, the decrease in assets in the Fund caused by the transfer is balanced by a decrease in the balance attributed to the earnings reserve account, leaving the principal balance unimpaired.

Because the actual sale of securities and the transfer of the proceeds of such a sale would not result in any impairment of principal so long as the value of the remaining assets of the Fund (less total liabilities) exceed the principal balance, it is our opinion that the direct transfer of those assets at their fair market value also does not impair principal, provided that at the time of transfer the value of the securities transferred does not exceed the amount in the Permanent Fund earnings reserve account as determined under generally accepted accounting principles.

VIII. Statute Inconsistent With GAAP

The statutory framework for the Fund distinguishes the treatment given to realized and unrealized income. Section 37.13.140 provides, "Net income of the fund shall be computed annually as of the last day of the fiscal year in accordance with generally accepted accounting principles, excluding any unrealized gains or losses." For a period of time only the statutory net income consisting of net realized gains was credited to the earnings reserve account established by section 37.13.145(a), which provides, "Income from the fund shall be deposited into the [earnings reserve] account as soon as it its received. Money in the account shall be invested in [authorized] investments...." However, with the adoption of GASB 31, the chief financial officer of the APFC began valuing investments at market on a monthly basis and crediting unrealized net earnings to the balance of the earnings reserve account for financial reporting purposes. Accordingly, for financial reporting purposes, the earnings reserve account now holds both realized and unrealized net gains in the income that has been credited to it.

The statutory definition of net income in section 37.13.140 requires both adherence to generally accepted accounting principles, which requires marking assets to market value, and the exclusion of unrealized market gains and losses. This conflict creates problems with regard to whether or not the "income" of the Fund that must be deposited in the earnings reserve account, and from which the legislative appropriation shall come, should properly include unrealized gains and losses. One possible solution to the problem would be to simply sell the securities, which would convert any

unrealized gains or losses attributable to those securities into actual realized gains credited to the earnings reserve account that could then be transferred to the Constitutional Budget Reserve Fund. The difficulty with this approach is that selling securities on the open market generates additional expenses in the form of brokerage commissions and other transaction costs. If the securities could be transferred in kind at their fair market value, the Fund would be spared the expenses associated with the sales, and hence more Fund assets would be preserved. The difficulty is that it is not clear that the "income" held in the earnings reserve account under section 37.13.145(a) properly includes the unrealized gains and losses not included in "net income" under section 37.13.140.

Because the ambiguity has been created by section 37.13.140, it may be remedied the same way — by amending the statute to conform to generally accepted accounting principles to provide that income held in the earnings reserve account shall include both realized and unrealized gains and losses.[8] As income, the amounts in the earnings reserve account are subject to disposition as directed by statute without invading principal. Any proposed legislation should further direct that the principal shall be maintained inviolate.

If the statute is amended as described above, then a transfer of $4 billion of securities from the Permanent Fund to the Constitutional Budget Reserve Fund can occur without either affecting the dividend or requiring the realization of the gain associated with the particular securities that are transferred. Our conclusion is premised upon not only the amendment of the statute as described above, but also the advice that we have received from the Permanent Fund's accountants ("KPMG") that this transfer would be a one time non-standard, non-recurring event, which would be treated by the accountants as a residual equity transfer and permissible under generally accepted accounting principles as such. The consequence of this transfer would be that the earnings reserve account, assuming that it had more than $4 billion of realized and unrealized gains and losses, as well as other income, would be reduced by $4 billion as would the assets of the Fund. We are advised by KPMG that the particular unrealized gain that, in a theoretical sense, could be identified to the transferred securities would not be realized, and thus would have no immediate impact on the dividend calculation. Any impact on future dividends would be the result of the reduced amount of investments in the Fund, as well as any limitation on future pay-outs imposed by the

[8] To maintain the legislature's intent that the dividend shall be based on a measure of distributable income that excludes unrealized gains and losses, a companion amendment to Section 37.14.140 should clarify that the calculation of net income under that section is solely for the purpose of calculating the dividend.

decreased level of income in the earnings reserve account. The Constitutional Budget Reserve Fund would receive these securities at the fair market value on the date of transfer.

IX. *Limited Fiduciary Duties Analyzed*

In carrying out the proposed transfer, the Board will be subject to the same duties of prudence and care that apply whenever it selects securities to sell and reinvests; although the magnitude of the proposed transaction will impose greater restrictions on its flexibility than would be imposed by the ordinary turnover of a smaller percentage of securities within the portfolio. The duty to incur only reasonable expenses would appear to be well served by the proposed in-kind transfer, absent other conflicting considerations. The limited duty of impartiality and the duty to preserve principal are not impaired provided that the Board's acts are directed by the legislation requiring the transfer.

A. Prudence in Investing

The Board has adopted policies that pay careful attention to and comply with the concepts of diversification, asset allocation, and "total return" — the latter defined as "the realized income plus the net change in unrealized gains and losses. Realized income includes interest, dividends, real estate cash flow and realized capital gains." Alaska Permanent Fund Corporation, 1997 Annual Report, p. 3 note. The proposal does pay attention to total return, but reduces equity allocation and therefore diversification until rebuilt by future receipts and investments. However, this is a function of the fact that the unrealized gains and losses that are being transferred are due, in very large part, to appreciation in equities. The change in asset allocation is therefore a function of where the unrealized gains and losses to be transferred occur, not the consequence of a deliberate investment choice by the Board.

The Board will need to exercise care when selecting the stocks to be transferred to make sure that it has evaluated the impact of its divestiture program both on the overall risk of its portfolio, and on the investment policies that it has chosen in constructing its current equities portfolio.

We understand that one methodology under consideration as an alternative to selecting assets for transfer would be to implement the proposed transfer by transferring to the Constitutional Budget Reserve Fund a percentage across-the-board "slice" of the Permanent Fund's assets, representing $4 billion in value. The Constitutional Budget Reserve Fund would become a unit holder in the combined funds' investment pool, similar to the interests held by the Alaska Mental Health Trust, the Alaska Science and

Technology Foundation, and the International Trade and Business Endowment. *See* Discussion Part IX.D. below. This proposal would not disturb the asset allocation or diversification of the investment pool, nor would it impose unnecessary costs.

B. Duty to Minimize Expenses

A trustee must "incur only costs that are reasonable in amount and appropriate to the investment responsibility of the trusteeship." *Restatement (Third) of Trusts* §227(c)(3) (1992)(prudent investor rule). One of the clear advantages of an indexed approach to equity investments is that stock turnover is very low, thereby minimizing the losses that would otherwise occur in the form of commissions paid to brokers to execute trades. The need to sell stocks in order to generate cash proceeds to transfer decreases this advantage to the indexing investment strategy. However, the proposed direction of an in-kind transfer is clearly compatible with the duty to minimize costs, because it should substantially reduce the transaction costs that would otherwise attend the selling of a significant proportion of the Fund's equity portfolio.

C. Fiduciary Duty of Loyalty — to the State

The *Restatement (Second) of Trusts* §2, cmt. b (1957) states: "b. *Fiduciary relation.* A person in a fiduciary relation to another is under a duty to act for the benefit of the other as to matters within the scope of the relation." Here, the Board's duty is owed, not to specific beneficiaries, but to the State for which it manages the Permanent Fund in accordance with the statutes.

Here, the terms of the Constitution specifically reserve the disposition of "all income" to direction by the State "by law." Alaska Const. art. IX, 15. The removal of $4 billion in trust assets cannot help but reduce the amount to be available in the future for dividends because the lesser amounts to be invested will, all other things being equal, result in lower absolute amounts of income realized on those investments even if the current rate of return is maintained. However, the duties of this Board do not extend to distribution of income except as directed by law. Accordingly, no duty of loyalty within the scope of the discretion given to these trustees is implicated by the transfer itself.

D. Investments Managed on Behalf of Other Entities

Separately, there may be impartiality issues vis-à-vis the other state funds that invest through the Permanent Fund that will need to be handled to make sure that whatever interests they may have are kept whole. By statute, the Alaska Mental Health Trust (AS 37.13.300, 37.14.001 - 37.14.099), the Alaska Science and Technology Foundation Endowment (AS 37.17.010 - 37.17.110),and the International Trade and

Business Endowment (AS 37.17.440)(collectively referred to hereafter as "other funds") are invested by the APFC under the same investment authority as the Permanent Fund is managed. Alaska Permanent Fund Corporation, 1998 Annual Report, "Alaska's Future," p. 39 ("1998 Annual Report").

The assets of the other funds are commingled with the assets of the Permanent Fund for investment purposes. Earnings are separately allocated to the other funds on the basis of unit and fractional shares, which have undivided beneficial interests in the commingled assets equal to the proportion that such shares bear to the total units outstanding. Unit shares are credited to the other funds on the basis of amounts contributed to the investment pool. The following represents the other funds' shares of the commingled assets:

	6/30/1998	1997
Alaska Science and Technology Endowment Fund	$ 129,092,000	$ 128,565,000
Alaska Mental Health Trust Fund	299,356,000	267,553,000
International Trade and Business Endowment Fund	5,710,000	
TOTAL OF OTHER MANAGED FUNDS	$ 434,158,000	$ 396,118,000

It is apparent from a review of the respective enabling statutes that the APFC Board, acting only as investment manager of each of the respective funds, has only limited fiduciary responsibilities. For example, the cash principal of the Mental Health Trust Fund shall be retained perpetually in the fund for investment by the APFC under the prudent investor rule. AS 37.14.033, 37.14.035, AS 37.13.300. Net income of the fund shall be transferred to the mental health trust settlement income account at the end of each fiscal year and may be utilized only "by the Alaska Mental Health Trust Authority for purposes listed in AS 37.14.041". AS 37.13.035.

Similarly, the Science and Technology Foundation Endowment shall be held and invested by the APFC subject to the prudent investor rule, but net income shall be distributed by grants under Title 37, Chapter 17 rather than by the APFC. AS 37.17.020(b). The International Trade and Business Endowment also was established within, and is administered by, the Alaska Science and Technology Foundation, AS 37.17.440(a), 37.17.010(b)(3), although it is invested by the APFC subject to the prudent investor rule. AS 37.17.440(b).

Thus, the responsibilities for operational employment of the funds and distribution to the beneficiaries rest with the trustees and directors of the respective entities, and such fiduciary responsibilities as exist for the APFC Board are limited to those existing "within the scope of the [investment] relationship." *Restatement (Second) of Trusts*, § 2, comment b (1959).

Since the funds are permissibly commingled with the other assets of the Fund for investment purposes, the Board will adequately discharge its fiduciary responsibility with respect to these funds by continuing to follow the prudent investor rule (AS 37.13.120), by maintaining impartial treatment as to each of the separate funds through the undivided beneficial interests of each of the funds in the fashion described above, and by segregating income of other funds as required by particular provisions of the particular statutes relating to each fund. The Mental Health Trust enabling act requires that "The net income of the fund shall be determined by the Alaska Permanent Fund Corporation in the same manner the corporation determines the net income of the Alaska permanent fund under AS 37.13.140," AS 37.14.031(c), and then that "net income of the fund shall be transferred by the corporation to the mental health trust settlement income account at the end of each fiscal year." AS 37.14.035(b). Similarly, the "net income from the [Alaska Science and Technology Foundation] endowment shall be distributed under AS 37.17.010 - 37.17.110 and 37.17.225.", *i.e.*, under the control of that endowment's Board of Directors to make grants or other distributions of endowment income, and "not [as] net income available for distribution under AS 37.13.140." AS 37.17.020(b) Therefore, inasmuch as the special funds require the APFC Board to account separately for the net income of each fund, the Board must do so in such a way as not to impair the income due the subsidiary fund because of the Board's substantial transfer to the Constitutional Budget Reserve Fund.

In summary on this point, apart from investing according to the prudent investor rule (imposed by statute on all assets under its management), and accounting for principal and income under the terms of the particular statutes whose funds are being administered by it, the APFC Board has no other duties under the circumstances of the proposed legislation. The proposed legislation should have no special effect on commingled funds different from its effect on the other assets held by the Board since its effect will be distributed proportionately among each and all of the funds it holds for investment.

MORRISON & FOERSTER LLP

MEMORANDUM

TO: Kathy Porterfield

CC: Peter Bushre
James Baldwin

FROM: Robert Loeffler
Linda Arnsbarger
Michael Toumanoff
Joseph Wyatt

DATE: March 2, 1999

FILE: 14507/85

RE: Summary of Feb. 24, 1999 Discussion Regarding Accounting for Fund Transfers

---

This is to summarize the discussion on February 24, 1999 between Kathy Porterfield, Peter Bushre, James Baldwin, Robert Loeffler, Joe Wyatt, Michael Toumanoff, and Linda Arnsbarger regarding the proposed recommendations as to the proper accounting for a fund transfer. The facts we discussed involved the possible one-time transfer of $4 billion in cash or securities from the Alaska Permanent Fund to the Constitutional Budget Reserve Fund. We asked Kathy to discuss the accounting treatment for such a transfer. Kathy responded that her answer was premised on the fact that both are state funds, and the proposed transfer is a one-time transfer. She discussed two options with regard to transfers in general.

One, which was not discussed at length, was to reflect the transfer in the income statements, which would have an immediate and substantial impact on the dividend.

The second approach, which we understood to be the appropriate accounting treatment, was to reflect the transfer as an adjustment to retained earnings, here the earnings reserve account, which would not have an immediate impact on the dividend. We understand that the accounting literature would permit the second approach, described as a "residual equity transfer" if it is a one-time transfer between two state funds, so long as it is legal to do so.

With respect to the legal question, Kathy identified one statutory barrier to this second treatment. AS 37.13.145(a) establishes the earnings reserve account, and states that "income from the fund shall be *deposited* by the corporation into the account as soon as it is *received*." This provision literally appears to limit the earnings reserve account to realized cash income. In other words, as a matter of law, the unrealized gains are not in the earnings reserve account.

We asked Kathy to consider the following hypothetical: First, assume that AS 37.13.145 is amended to provide that the earnings reserve account is calculated in accordance with generally accepted accounting principles. Then assume that, on a one-time basis, $4 billion in securities are transferred from the Permanent Fund to another state fund. Assume that the transferred securities have $1 billion in unrealized gains associated with them. Assume that, prior to the transfer, the earnings reserve account is $5 billion. Kathy agreed that the assets of the fund would be reduced by $4 billion, and the earnings reserve account would be reduced by

the amount of $4 billion (leaving $1 billion in the account). The CBRF would take the securities at their market value.

In KPMG's view, under the second approach, the transfer of $4 billion in assets with an associated $1 billion in unrealized gain associated with the assets would not result in any realization of gain, and thus would have no immediate impact on the dividend calculation. Any impact on future dividends would be the result of the reduced amount of investments in the fund, as well as any limitation on future pay-outs imposed by the decreased level of income in the earnings reserve account.

We explored how this reduction in the earnings reserve account would follow through for statutory purposes in calculating a dividend in subsequent years. (Our concern was how, under the statutory accounting method, to ensure that the component of the transferred earnings reserve that represented transferred unrealized gains would not be double counted in determining realized gains in later years for purposes of the statutory dividend calculation.) Kathy agreed that if, in the subsequent year, the fund had $3 billion in realized income, and the calculated income available for distribution exceeded the earnings reserve account, the amount of the dividend still could not exceed $1 billion, or the amount in the earnings reserve account, because to pay out more would be to invade principal. In other words, $2 billion of that year's realized income would nevertheless be unavailable for a dividend distribution in the current year.

Kathy and Peter clarified that the earnings reserve account for statutory purposes is not, by definition, the same as the earnings reserve account for accounting purposes under current GAAP. The accounting earnings reserve account represents only residual equity, not income.

We asked Kathy Porterfield and Peter Bushre to review a draft of this memorandum, dated February 24, 1999, and to let us know whether this summary accurately reflects the description they provided to us.

Kathy Porterfield has reviewed this memorandum, made revisions, and has confirmed in a telephone conversation with James Baldwin and Linda Arnsbarger on March 2, 1999 that this revised summary accurately reflects the description she provided to us.

DOL Document #2

FISCAL PLAN AMENDMENTS

1. The governor has introduced a bill proposing to transfer $4 billion from the earnings reserve account of the Alaska Permanent Fund to capitalize the Constitutional Budget Reserve Fund.

2. A proposal has been under consideration to make the transfer in a way that will avoid the necessity of selling a large amount in securities to raise the money.

   These sales will cost the permanent fund a substantial amount in transaction fees (estimated in excess of $20 million) owed to brokers and other securities dealers.

3. The plan involves either the transfer to the CBRF of in-kind securities worth $4 billion, or an undivided interest in the permanent fund worth $4 billion. Counsel to the Alaska Permanent Fund Corporation was engaged to provide independent legal advice concerning implementation of this in-kind transfer plan.

4. Legal counsel determined that a one-time, in-kind transfer could be validly implemented if certain statutory amendments were made by the legislature to make it clear that income of the permanent fund is determined exclusively by generally accepted accounting principles.

5. By establishing these principles in statute, there would be no legal questions concerning whether the appreciated value of securities owned by the permanent fund can be made available for distribution by the board of trustees as income.

6. If these amendments are enacted, legal counsel advises that a transfer of unrealized earnings of the permanent fund will not

   constitute an appropriation from the principal of the permanent fund; and

   that such a transfer will not violate a fiduciary duty owed by the board of trustees of the Alaska Permanent Fund.

7. The legal opinion also relies on the advice of auditors of the Alaska Permanent Fund that such a one-time transfer of $4 billion in permanent fund income would not cause an increase in the permanent fund dividend payable in the year of the transfer.

"Draft Legislation" Document (#3)

* Section __. AS 37.13.140 is amended to read:

Sec. 37.14.140. Income. Net income of the fund includes income of the earnings reserve account established under AS 37.13.145. **For the purpose of calculating the income available for distribution, net** [NET] income of the fund shall be computed annually as of the last day of the fiscal year in accordance with generally accepted accounting principles, excluding any unrealized gains or losses. Income available for distribution equals 21 percent of the net income of the fund for the last five fiscal years, including the fiscal year just ended, but may not exceed [NET INCOME OF THE FUND FOR THE FISCAL YEAR JUST ENDED PLUS] the balance in the earnings reserve account described in AS 37.13.145.

* Sec. __. AS 37.13.145(a) is amended to read:

(a) The earnings reserve account is established as a separate account in the fund. **The balance of the earnings reserve account shall be determined according to generally accepted accounting principles.** [INCOME FROM THE FUND SHALL BE DEPOSITED BY THE CORPORATION INTO THE ACCOUNT AS SOON AS IT IS RECEIVED.] Money in the account shall be invested in investments authorized under AS 37.13.120.

Should Permanent Fund managers stick to philosophy?

GREGG ERICKSON
COMMENT

(11/29/08 22:56:03)

In late August, Sarah Palin flew off on her nine-week campaign for the nation's second-highest office. During those nine weeks the Alaska Permanent Fund lost $8 billion, including more than $1 billion from the supposedly untouchable principal.

Palin's absence played no role in the fund's meltdown. The fund's managers lost the state's money because of the world financial collapse. But Palin's preoccupations -- with gas pipeline issues, Troopergate and the national campaign -- may be implicated in the paralysis that has gripped managers in responding to the fund's hemorrhaging value.

The decline in fund investments has not occurred across the board. Stocks and real estate have declined most dramatically, while bonds have done relatively well. As a result, percentages of assets in several of the fund's nine asset categories have drifted far from the board's allocation targets. So far, managers have taken no steps to bring them back to where they belong. Domestic bond holdings, for instance, account for 27 percent of fund assets, way above the 19 percent target and well beyond the permissible percentage variation the board established in a July resolution. Real estate holdings are also outside the limits, though in the opposite direction.

Maintaining allocation discipline is the Holy Grail that has guided managers at the fund since the theory was first adopted there in 1983. Innovative then, the notion that diversified asset allocation is the key to successful investing is now a core tenet of investment theory as taught in finance and investment courses at graduate schools around the world.

Why have Permanent Fund managers abandoned this long-held discipline?

Author and investment manager Peter Lynch writes that when it comes to investing, "The key organ in the body is the stomach, not the brain." The way to maintain the allocation percentages is to sell assets that have done well and use the proceeds to buy more of the assets that have done poorly. Following through on that discipline in today's market requires the courage of one's convictions.

That kind of courage appears to be in short supply at Permanent Fund headquarters. Fund managers have the responsibility to maintain that discipline; they don't need to

wait for the board of trustees' blessing. In an interview last month with reporters for the Alaska Budget Report (see the newsletter's Oct. 31 issue), Michael Burns, the fund's executive director, was asked repeatedly why the oft-touted discipline appears to have been abandoned.

"We're working through it," was his most direct response.

Permanent Fund managers also worry about the political implications of continuing to draw money from the fund to cover its expenses when doing so eats into the constitutionally protected principal. The principal is the sum of the state's contributions to the Permanent Fund since its inception, whether from oil royalties, special state appropriations or inflation-proofing. As the chart shows, on Nov. 18 the fund's market value was $1.6 billion less than the principal, putting the fund "under water." Money drawn to pay Burns' monthly $21,416 salary or any other outlay submerges it even deeper.

If the fund is under water in June when it's time to transfer more than a billion dollars to the Department of Revenue for Permanent Fund dividends, someone could ask the courts to block the payments on grounds they would invade the principal.

Former Attorney General Gregg Renkes, in a 2003 legal opinion, wrote that the problem can be eliminated by adopting a new legal definition of "principal," but Burns is uncertain where Palin -- who styles herself as a fund protector -- might come down on that. On Oct. 23 he wrote an official memo to Palin's budget chief, Karen Rehfeld, requesting the administration's views.

So far, we see little indication that Palin or her top officials have paid much attention. In an interview late last month, Rehfeld, noting the implications for next year's Permanent Fund dividend, said Burns shouldn't expect a substantive response to come quickly.

"We have to look at that question, we have to look at inflation-proofing, all of those pieces. We're researching it now," Rehfeld said.

Patrick Galvin, Palin's revenue commissioner and one of her two representatives on the Permanent Fund's six-person board of trustees, was unaware of Burns' memo to Reh-feld until I asked him about it a week after it was sent.

The trustees have a meeting scheduled Tuesday and Wednesday in Anchorage. That's their chance to ask Burns whether managers have the courage to stick to their allocation discipline, and how he proposes to deal with a potential dividend challenge. Let's hope the trustees do ask those questions. And let's hope they get coherent answers.

Juneau economic consultant Gregg Erickson is editor-at-large of the Alaska Budget Report. E-mail, gerickso@alaska.com.

MEMORANDUM

STATE OF ALASKA
Office of the Governor
Office of Management and Budget
PO Box 110020
Juneau AK 99811-0020
(907) 465-4660, fax 465-3008

To: Michael Burns
Executive Director
Alaska Permanent Fund Corporation

Date: November 5, 2008

From: Karen J. Rehfeld
Director
Office of Management and Budget

Subject: APFC Operating Budget in Declining Financial Markets

On October 23, 2008, you requested feedback on a potential issue regarding the source of funds for the Alaska Permanent Fund Corporation's annual operating budget during times of extreme market volatility with downward trends.

As you outlined in your memorandum, state statute section 37.13.150 clearly identifies the source of corporation's operating budget as "The revenue generated by the fund's investments." A consultation with the Department of Law regarding the corporation's current circumstance affirms APFC's interpretation that the operating budget should be paid from positive cash flow in order to meet the FY09 appropriated budget.

cc: Mike Nizich, Chief of Staff
Julie Hamilton, APFC Director of Finance

Alaska Constitution

Section 9.15 - Alaska Permanent Fund.

At least twenty-five percent of all mineral lease rentals, royalties, royalty sale proceeds, federal mineral revenue sharing payments and bonuses received by the State shall be placed in a permanent fund, the principal of which shall be used only for those income-producing investments specifically designated by law as eligible for permanent fund investments. All income from the permanent fund shall be deposited in the general fund unless otherwise provided by law.

Alaska Statute

Sec. 37.13.020. Findings.

The people of the state, by constitutional amendment, have required the placement of at least 25 percent of all mineral lease rentals, royalties, royalty sale proceeds, and federal mineral revenue sharing payments and bonuses received by the state into a permanent fund. The legislature finds with respect to the fund that

(1) the fund should provide a means of conserving a portion of the state's revenue from mineral resources to benefit all generations of Alaskans;

(2) the fund's goal should be to maintain safety of principal while maximizing total return;

(3) the fund should be used as a savings device managed to allow the maximum use of disposable income from the fund for purposes designated by law.

Sec. 37.13.140. Income.

Net income of the fund includes income of the earnings reserve account established under AS 37.13.145 . Net income of the fund shall be computed annually as of the last day of the fiscal year in accordance with generally accepted accounting principles, excluding any unrealized gains or losses. Income available for distribution equals 21 percent of the net income of the fund for the last five fiscal years, including the fiscal year just ended, but may not exceed net income of the fund for the fiscal year just ended plus the balance in the earnings reserve account described in AS 37.13.145 .

Sec. 37.13.145. Disposition of income.

(a) The earnings reserve account is established as a separate account in the fund. Income from the fund shall be deposited by the corporation into the account as soon as it is received. Money in the account shall be invested in investments authorized under AS 37.13.120 .

(b) At the end of each fiscal year, the corporation shall transfer from the earnings reserve account to the dividend fund established under AS 43.23.045 , 50 percent of the income available for distribution under AS 37.13.140 .

(c) After the transfer under (b) of this section, the corporation shall transfer from the earnings reserve account to the principal of the fund an amount sufficient to offset the effect of inflation on principal of the fund during that fiscal year. However, none of the amount transferred shall be applied to increase the value of that portion of the principal attributed to the settlement of State v. Amerada Hess, et al., 1JU-77-847 Civ. (Superior Court, First Judicial District) on July 1, 2004. The corporation shall calculate the amount to transfer to the principal under this subsection by

(1) computing the average of the monthly United States Consumer Price Index for all urban consumers for each of the two previous calendar years;

(2) computing the percentage change between the first and second calendar year average; and

(3) applying that rate to the value of the principal of the fund on the last day of the fiscal year just ended, including that portion of the principal attributed to the settlement of State v. Amerada Hess, et al., 1JU-77-847 Civ. (Superior Court, First Judicial District).

(d) Notwithstanding (b) of this section, income earned on money awarded in or received as a result of State v. Amerada Hess, et al., 1JU-77-847 Civ. (Superior Court, First Judicial District), including settlement, summary judgment, or adjustment to a royalty-in-kind contract that is tied to the outcome of this case, or interest earned on the money, or on the earnings of the money shall be treated in the same manner as other income of the Alaska permanent fund, except that it is not available for distribution to the dividend fund or for transfers to the principal under (c) of this section, and shall be annually deposited into the Alaska capital income fund (AS 37.05.565).

10%	FY 2009	22.43%	3.95%	18.48%	10%	5.82%
	FY 2010-2019 [7]	8.05%	2.75%	5.30%		5.00%

Income year-to-date as of November 30, 2008

FY09 Statutory net income	
Interest, dividends, real estate & other income	$ 413.2
Realized gains (losses) on the sale of invested assets	(1,207.0)
Less operating exp / Legis. appropriations	(31.7)
Less AK Capital Inc. Fund committed realized earnings	-
Statutory net income (loss)	$ (825.5)

FY09 Accounting (GAAP) net income	
Statutory net income (loss)	$ (825.5)
Unrealized gains (losses) on invested assets	(7,438.6)
AK Capital Income Fund committed realized earnings	-
Accounting (GAAP) net income (loss)	$ (8,264.1)

Notes related to financial history and projections FY1977 - FY2019

[1] Appropriations include special general fund, realized earnings, and other miscellaneous appropriation transfers into principal

[2] Dedicated State Revenues in current and future fiscal years is based on the Fall 2008 Department of Revenue forecast

[3] Accounting net income is based on United States Generally Accepted Accounting Principles (GAAP). Statutory net income is accounting net income, exlcuding any unrealized gains and losses on investments.

[4] FY05 and forward, Amerada Hess, et al. settlement earnings are transferred to Alaska Capital Income Fund per AS 37.13.145(d)

[5] FY03 Senate Bill 100 transferred $354 million from realized earnings to principal. FY04 Senate Bill 283 defined that appropriation as pre-FY04 inflation proofing, so it was moved from appropriations to inflation proofing, along with the balance of $170 necessary to fully inflation proof the Fund. $15 million in settlement earnings remained in appropriations per AS 37.13.145(d).

[6] Current year returns are based on 2008 Callan capital market assumptions. A range of possible returns illustrates shows different outcomes across various market scenarios.

[7] Future returns are based on 2008 Callan capital market assumptions and median expected returns (the mid case). Actual results will vary

PERFORMANCE SUMMARY (preliminary as of November 30, 2008)	Current Month	Last 3 Months	Fiscal Y-T-D	Calendar Y-T-D	Last 12 Months	Last 3 Years	Last 5 Years

1/26/09 FY09/10 BUDGET OVERVIEW: OFFICE OF MANAGEMENT AND BUDGET

<target><bill></bill><subject>1-26-09 FY09-10 BUDGET OVERVIEW OFFICE OF MANAGEMENT AND BUDGET</subject><comm>HFIN26</comm></target>

FY09/FY10 Budget Overview

House Finance Committee

Governor's Office of Management and Budget

January 26, 2009

Budget Guidelines

Starts with clearly established goals communicated to state agencies, the legislature and the public

Governor Palin's budget goals have been consistent:

- Slow the growth of government
- Live within our means
- Save for the future
- Focus on core services
  - Invest in responsible resource development
  - Constitutional and statutory responsibilities

Budget Timelines

The process starts with state agencies

- The state fiscal year is July 1 through June 30
- Planning for the next fiscal year starts July 1
- Budget instructions to departments in August
- Discussion with agencies in September
- Preliminary decisions in October
- Final decisions in November
- Proposed budget released to the public Dec. 15
- Legislative review and final action by the 90th day

Budget Direction

The fundamental building blocks

- Focus on core state services,
- Find efficiencies in service delivery,
- Identify savings or reductions,
- Redirect existing resources, where possible, to higher priority items, and
- Limit growth in operating budget .

Budget Preparation

Fundamentals include accountability

- Agency budgets built on missions and results.
- Recommended strategies to implement the missions and results.
- Recommended measures for determining whether the missions and desired results are achieved.
- Assessment of whether prior year missions and desired results have been achieved.

FY2009 Revenues/Expenditures

A year of unprecedented revenue volatility

FY2009 Budget Version Forecast Version	Governor Dec. 15, 2007 Fall 2007	Enacted May 23, 2008 Spring 2008	Post Special Sessions	Governor Dec. 15, 2008 Fall 2008	*What If ?* *Not an official forecast* Interim Spring 2009
Price Per Barrel	$66.32	$83.04	$100 +	$77.66	$60's
Production	0.701	0.689		0.689	
Total Revenue*	**$5,264.9**	**$7,523.3**	**$7,523.3**	**$6,765.4**	**$5,765.4**
Budget Appropriations	**$4,609.6**	**$5,045.6**	**$5,979.7**	**$5,992.3**	**$5,992.3**
Savings Appropriations	**$500.0**	**$1,175.5**	**$1,195.3**	**$1,175.3**	**$1,175.3**
Surplus/(Shortfall)	$155.3	$1,302.2	$348.3	($402.2)	($1,402.2)

*Includes tax credits and carryover

Office of Management and Budget

FY2009 Revenue Shortfall

Steps taken and in process to address a revenue shortfall

- Governor Palin signed the appropriation bills on May 23, 2008, with instructions to the departments to achieve at least $20 million in savings in the operating budget.
- Hiring freeze and non-essential purchases issued January 23, 2009.
- FY2009 supplemental bill will propose reductions in current year expenditures.
- Seek legislative approval for use of reserves.

Reserve Balances

Estimated balances as of December 31, 2008

- Constitutional Budget Reserve $6.8 billion
  - Main Fund $3.2 billion
  - Sub Fund $3.6 billion
- Statutory Budget Reserve $1.0 billion
- Public Education Fund $1.0 billion
- AK Housing Capital Fund $342.3 million

FY2009 Supplemental Bill

Due to the legislature on February 3, 2009 – 15th Legislative Day

- Interim FY09 forecast will be provided along with the supplemental bill.
- Reducing current year operating and capital expenditures.
- Seek authorization to access reserve funds to balance the budget.

FY2009 Economic Stimulus Bill

Moving quickly at the federal level

Federal action expected mid-February

- Formula and competitive grants
  - Transportation
  - Energy
  - Education
  - Health Care
- State agencies reviewing the legislation
- Anticipate separate supplemental bill

FY2010 Budget Overview

Consistent fiscal policy

- Dec. 15 budget proposes to spend less general fund dollars in FY2010 than we are spending in the current year - $4.9 billion compared to $5.2 billion (*comparison excludes resource rebate*)

- Budgeted $389 million below the fall forecast of $5.27 billion.

- Interim forecast will be provided on February 18 along with budget amendments.

FY2010 Budget Highlights

Focus on Priorities

- Operating
  - K-12 Education $1.05 billion
  - Revenue Sharing $60 million
  - Retirement system unfunded liability $451.2 million
  - Exploration tax credits $300 million
  - State employee contract increases $31 million
- Capital
  - Gas line projects $82.1 million
  - Renewable Energy Fund $50 million
  - School Major Maintenance $40.5 million
  - Highways & Aviation $772.5 million
  - Water & Sewer $114.8 million

To Meet 09/10 Budget Challenges

and Protect Alaska's economy

- Fiscal Discipline
  - Savings and efficiencies
  - Budget reductions where practical and sustainable
  - Hiring freeze and non-essential purchases
- Prudent use of Reserves
  - $8 billion in reserves
  - Careful planning to manage shortfall in the short-term and provide long-term stability
  - Avoid massive single-year cuts

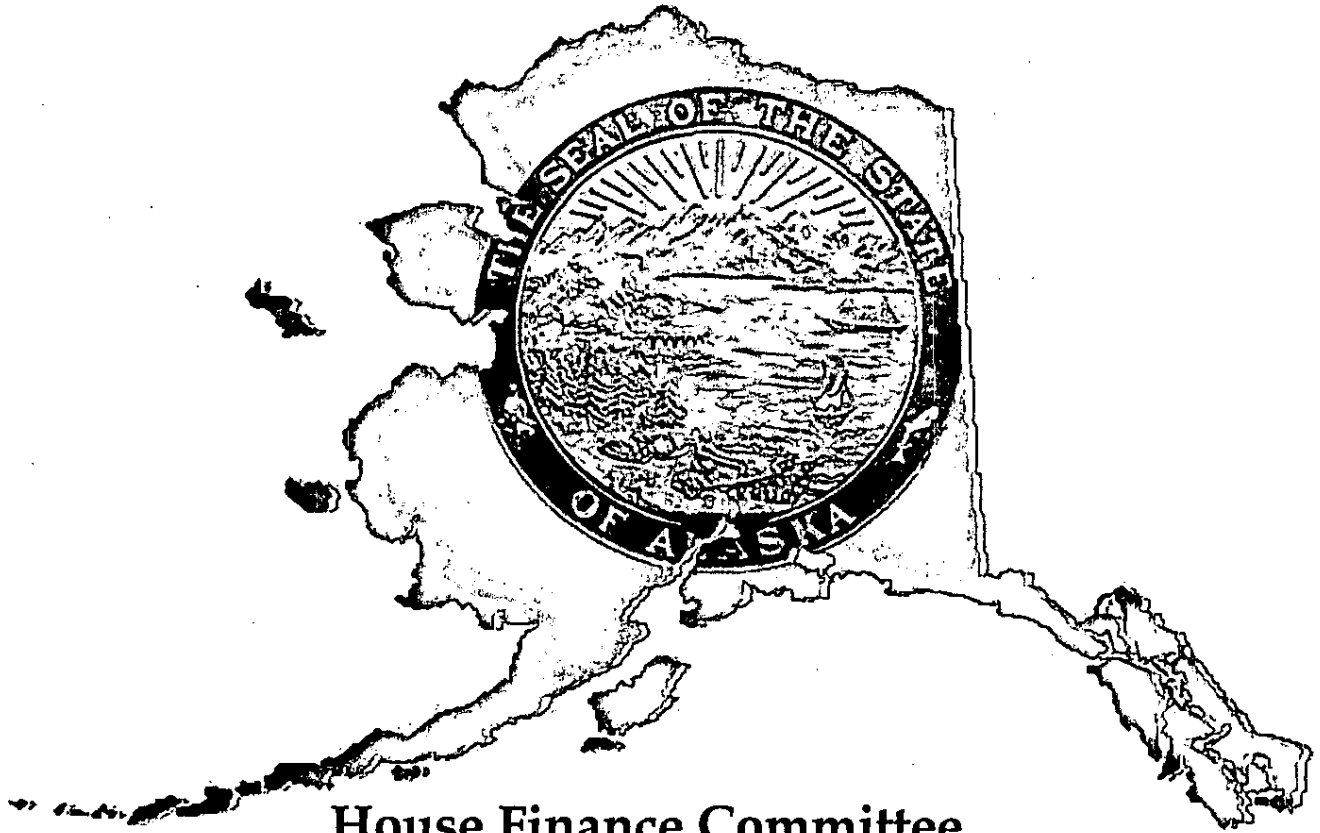
FY2010 10-year Plan



House Finance Committee

Governor's Office of Management and Budget

January 26, 2009

Implementation Schedule

The initial cycle of the 10 year plan process

- HB 125 introduced in 2007 session, passed in April 2008.
- In June 2008, HB 125 signed into law.
- Initial 10-year plan development schedule:
  - August-December 2008 – Development of initial 10 year plans (simultaneous with agency budgets)
  - December 2008 - Release of FY2010 budget, revenue forecast, and executive summary of 10-year plan
  - January 2009 - Release of agency level plan detail and additional required fund projections

Purpose of the Plan

To keep a dialogue about Alaska's future in the forefront

- Should initiate a dialogue about the future fiscal health of Alaska.
- Must involve the Legislature and engage Alaskans.
- The FY2010 plan is a starting point - not the "answer".

Imperatives of the Plan

The fiscal plans "must do's"

- AS Statute 37.30.020 (b) (2) says that the annual fiscal plan must:
  - Balance the Budget
  - Provide for essential state services
  - Protect Alaska's economic stability

Goal of the FY2010 Plan

Bridge the projected revenue gap from today to first gas

- In the long run, Alaska must diversify its revenue base.
- Monetizing Alaska's natural gas resource represents the state's best chance to replace the revenue decline that is projected due to falling oil production.
- The plan's primary goal is to bridge the revenue gap from today to the onset of natural gas revenue, currently forecast to occur sometime between 2018 and 2020.

Principles of the FY2010 Plan

Four basic principles of the FY2010 plan

- Slow the growth of government
- Live within our means
- Save for the future
- Invest in responsible resource development

Plan Guidance Provided by OMB

Agencies were provided an instruction memo in mid-August

- Agencies given latitude to develop their projections given the stated goals of the Administration and the plan.
- OMB did not provide a target growth rate
- Agencies were directed not to view the plan as an opportunity to develop a "wish list"
  - *"..the projections should be the result of a rational , objective process within each department that will withstand the scrutiny of the Governor, the legislature and the public. "*

Consistent Assumptions

Agencies were provided guidance for some "key assumptions"

- If inflation was to be included in the projection, it had to be documented which program and either use a 2.75% annual rate (DOR/Callan) or if appropriate a generally recognized rate i.e. medical care.
- Consistent with OMB policy, projections were not to be automatically adjusted for general inflation.
- If population growth is a factor in program growth, DOLWD November 2007 mid-case estimates were to be used, unless there is a commonly used projection source for a specific program.

What Did Agencies Project?

Agencies were asked to provide 3 discreet projections

- **Baseline**- Projected cost to continue the FY09 level of service through FY2019.
  - (*exception*: a program projecting a non-GF fund source decrease was not to assume that GF would replace that fund source. Those proposed GF increases were to be considered initiatives.)
  - Wage and benefit driven increases are not part of the agency projections, they were projected at a statewide level using data from the Dept. of Administration. (2.0% wages/5.0% medical for blended rate of approximately 3.25%)

Gasline and Initiatives Projections

In addition to baseline, two other projections scenarios were provided

- **Gasline**- Projected costs associated with the development of the TC/Alaska gasline project.

- **Initiatives**- Projected costs associated with expanding the service capacity of the agency beyond the FY09 service level (or if new GF would be needed to replace non GF funds.)

Level of Detail

What did the agencies provide?

Department level projections for FY2010-FY2019 by fund source (GF/Federal/Other) for the following categories

- Operations
  - Formula (with detailed projections for each formula program)
  - Non-formula
- Capital

Sample Projection

Baseline Budget Growth
(thousands $)

Other State Funds	0.0	0.0	0.0	0.0	0.0

Sample Draft

Yet to Accomplish

There could be significant improvements to the 10 year planning process

Planning & Budgeting data are not integrated

- Budget changes do not automatically inform the plan, they are manually dealt with.
- Statewide "sum of all agencies" is calculated separately from the statewide model.

Existing statewide projections model is GF focused- changes in federal and other funds are not factored in to the overall picture.

Depending on the level of engagement, one approach might be the development of an "outward" facing model for citizens to engage in the process.

Disclaimer

The plan will change

- *Appropriations projections in the plan do not represent a commitment by the Administration to propose spending at a particular level in FY2010 or any future year.*

- *The 10 year forecast shows that based on the Fall 2008 revenue forecast and expenditure assumptions, budget shortfalls over the 10-year period could be filled through prudent use of reserve funds. However, other fiscal tools including spending reductions could be used in addition to, or in lieu of, reserve funds.*

- *The plan will be revisited as conditions warrant.*

The 10-year forecast

Under Fall 2008 forecast, the CBR and SBR can sustain 3% growth through 2019

Fall 2008 Forecast	FY09	FY10	FY11	FY12	FY13	FY14	FY15	FY16	FY17	FY18	FY19

Notes

A Unrestricted General Fund Revenues: FY2009 Unrestricted Revenues are based on an ANS West Coast oil price of $77.66 per barrel and estimated production of .689 million barrels per day. FY2010 Unrestricted Revenues are based on an ANS West Coast oil price at $74.41 per barrel and .665 million barrels per day.

B Reappropriations and Carry Forward: Includes fund sources for reappropriations and other appropriations (typically roll-forwards of prior year authorizations) that were posted to FY2009 subsequent to the FY2009 Conference Committee, and that do not require additional FY2009 revenue.

C Corporate Dividends: Includes funds made available to the State by the boards of the Alaska Industrial Development and Export Authority (AIDEA), Alaska Housing Finance Corporation (AHFC) and Alaska Student Loan Corporation (ASLC). The AIDEA dividend is $23.8 million for FY2009 and $22.7 million for FY2010, though $22 million is appropriated in the Governor budget. The total AHFC transfer for dividend, capital projects, loan programs and debt service is $65.9 million for FY2009 and $68.7 million for FY2010. Since AHFC's debt payments for general government purpose bonds do not require appropriation, the net transfers appropriated here are $59.7 million for FY2009 and $62.5 million for FY2010. The ASLC Dividend is $4.1 million for FY2009; there is no ASLC Dividend for FY2010.

D Public Education Fund: Legislation in 2005 established the Public Education Fund (PEF). One of the effects of this legislation was to remove expenditures for K-12 Foundation Program and Pupil Transportation from operating formula programs (line 14), since expenditures from the fund do not require appropriation.

The FY2009 and FY2010 proposed Education K-12 Foundation Program and Pupil Transportation expenditures are shown as funds expended from the Public Education Fund on line 15.

Public Education Fund	Foundation	Pupil Transportation	Total
FY2009	944,776.2	58,516.6	1,003,292.8
FY2010	992,268.5	60,293.8	1,052,562.3
FY2011	1,049,674.8	62,239.9	1,111,914.7

The amount estimated for FY2011 is funded from the estimated balance of the Public Education Fund plus $9,565.4 from the FY2010 deposit of $1,062,127.7.

E Duplicated Authorizations: These appropriations are in the budget twice, such as when funds flow in and out of a holding account or one agency pays another for services provided. The most significant examples of these type of expenditures include operating payments from Interagency Receipts, and debt payments from the Debt Retirement Fund.

F Debt Service / Debt Retirement Fund Capitalization: The Debt Service line (line 19) includes actual payment of debt obligations, primarily general obligation bonds, State debt reimbursement programs, certificates of participation (lease-financing), and International Airports revenue bonds. Some of these debt payments are made from the Debt Retirement Fund, which is capitalized from a variety of fund sources. The Debt Retirement Fund Capitalization line (line 20) identifies various funding sources used to pay debt from the Debt Retirement Fund.

G Other Fund Capitalization: Other Fund Capitalization includes capitalization of various State operating funds, such as the Fish and Game Fund, Power Cost Equalization and Rural Electric Capitalization Fund, and others.

H AHCC Receipts Funded Projects and Fund Capitalization: In FY2006, the Legislature appropriated $300 million to the Alaska Housing Finance Corporation (AHFC) for the purpose of funding capital projects in Sec. 14, Ch. 13, SLA 2006. The Legislature's intent also allowed AHFC to transfer those funds and the earnings to a subsidiary corporation, which AHFC did. Those funds currently total $339 million in the Alaska Housing Capital Corporation (AHCC) as of mid-November, 2008. The receipts of the AHCC are the source of funds used for certain capital projects.

I Alaska Capital Income Fund Capitalization: The Alaska Capital Income Fund is authorized by AS 37.05.565. The fund consists of income earned on money awarded as a result of the State vs. Amerada Hess royalty case, estimated to be $28-29 million per year, plus other appropriations.

J PF Dividends / PFD Division Operations: Line 41 includes both the amounts for Permanent Fund Dividend (PFD) checks and other State operating costs of the PFD. In FY2009 the State will spend $20.7 million for Department of Revenue, Division of Permanent Fund Dividends operations ($7.1 million) and DHSS Public Assistance PFD Hold Harmless ($13.6 million). In FY2010 the amounts will be $21 million for Department of Revenue, Division of Permanent Fund Dividends operations ($7.4 million), and DHSS Public Assistance PFD Hold Harmless ($13.6 million).

The FY2009 GF one-time resource rebate is shown here as it was distributed with the FY2009 Permanent Fund Dividend.

K Balance to Constitutional Budget Reserve: The FY2009 column shows a negative amount based on the Fall 2008 Revenue Forecast. The administration will be closely monitoring revenues and revising the forecast in the coming months. Adjustments will be made for FY2009 if necessary.

House Finance Committee

Office of Management & Budget

Budget Overview – January 26, 2009

Slide 1 – Presentation Cover

Introduce yourself, Joan and John

Thank co-chair Hawker, co-chair Stoltze, and members of the committee for the invitation to present an overview of the governor's budget

I look forward to working with you and your staff on the budget.

In any year, there is a tremendous amount of work to do on the budget and this year, given the revenue picture, will present a number of challenges.

The administration is committed to working with you throughout the process.

First, introductions of the OMB staff and their particular areas of expertise.

Put names with faces, I'll ask them to stand as I call their names.

Read from list attached -

These folks do a remarkable job, are a great group of professionals and it is my privilege to work with them. Please feel free to call them or have your staff call directly if you have questions.

Slide 2 – Budget Guidelines

These budget goals have been the cornerstone of every conversation and communication with commissioners and state agencies from the beginning of the administration. Virtually every correspondence with individuals and communities requesting budget information or assistance also contains these guidelines.

Slide 3 – Budget Timelines

The budget is a planning tool – the better job we do in developing the budget, the better it will be as a tool. Along with the performance framework and the HB125 long-range fiscal plans, we have a tremendous opportunity to "connect the dots" that will help us invest our dollars wisely.

The budget is also a continual process – this slide outlines the development of a single budget through action by the legislature – once the budget is enacted, it is recorded in the state accounting system and the fiscal year begins again! At that same time, we are closing out the prior fiscal year, and starting the process for the next fiscal year!

Slide 4 – Budget Direction

There is significant pressure on agency budgets as the costs to do business increase while in many cases agencies are asked to absorb costs.

Agencies are asked to look critically at their core programs and services and find ways to change the way they are delivering those programs and services to find savings and efficiencies while still providing needed services.

State government is continually changing. Better use of technology and a skilled workforce are key to improved productivity and results!

Slide 5 – Budget Preparation

Performance and Accountability – this framework has been embraced by some, resisted by others, but is really so basic in terms of being able to tell the story – what are we doing? How do we intend to get there? How will we know? And what do we do if we are missing the mark? And if we are missing the mark, perhaps we should not continue that effort.

Improvements ARE happening – training, changes in the web, but still more to do.

Slide 6 – FY2009 Revenue and Expenditures

This HAS been a year of unprecedented revenue volatility – I know you discussed revenue forecasting with Commissioner Galvin last week and that we will be bringing you an interim forecast with the supplemental bill on February 3. We also know that we will have a revenue shortfall – let me walk through the chart from where we started FY09 to where we are

Gov Dec 07 - $66.32 ppb and $5.3 bill revenue

Enacted May 08 – had gone up to $83.04 and $7.5 bill revenue and kept on going

Post special sessions Sept 08 – no revised forecast but predictions of significant surplus and ppb over $100+

Between Sept and Dec 08 – rapidly declining oil prices – fall forecast $77.66 and $6.8 revenue

The What IF column is for illustration only – what if our revenue comes in lower than the Dec 15 estimate by $1 billion – somewhere in the $60's

It looks like we could end up closer to where we started in FY09

This is a significant challenge – we do have some options to address a revenue shortfall

Slide 7 – FY2009 Revenue Shortfall

Savings Target

Even at high oil prices last summer, the governor's commitment to managing the growth in the operating budget resulted in the $20 million savings target. We know we typically lapse GF at the end of the fiscal year. The goal was to start at the beginning of the fiscal year and manage those things we have control over, find efficiencies, make changes in business processes and practices to produce savings.

Public Safety and Corrections were held harmless although the commissioners are working hard to find efficiencies in their agencies also.

About ½ of the department savings plans targeted personal services – we have asked departments to report quarterly

Hiring Freeze and non-essential purchases

As of Dec 31, 2008 – approx 1,500 vacant full-time positions

Estimated ½ year cost of personal services for the 1,500 vacant full-time positions is $12 million

A number of these positions will be automatically exempted from the hiring freeze because they meet the essential services criteria for protecting Alaskans.

Some of these positions are already slated to be held vacant for the entire year to either meet the $20 million savings target or the normal budgeted vacancy.

Not all of these vacant positions are being actively recruited – Division of Personnel estimated approximately 157 positions in recruitment as of the date of the hiring freeze.

There will be some waivers granted for essential services – we don't know how many that will be.

This is a management tool to help us save money in FY2009. The amount of the savings is indeterminate and we will not know until the end of the fiscal year how much GF actually will lapse as a result of the savings target, the hiring freeze, or non-essential purchases.

FY09 Supplemental

We informed departments in December that with the drop in oil price we needed to look for reductions in the current year budget.

We asked them to update their savings plans and to redirect savings to cover other unanticipated costs

We also asked them to scrutinize existing appropriations for balances or projects that could be reduced or deleted.

Even with these efforts, we will need legislative authorization to use reserve funds to cover a revenue shortfall.

Slide 8 – Reserve Balances

We do have reserves to draw on – over $8 billion – these reserve funds were built up thanks to the wise choices by the governor and the legislature to save a significant amount of surplus revenue over the past two years.

Fiscal discipline, spending reductions, and prudent use of reserves will help us manage through this uncertain time, keep Alaskans employed and the economy moving.

The 3 year education plan with the changes to the base student allocation, intensive student funding, and district cost factors, lets school districts know what to budget and plan for provides the forward funding of education

The Public Education Fund sets aside a year's worth of education funding.

The AK Housing Capital Fund also has a balance – We have proposed to use a portion of this fund in the FY2010 budget ($238.4 million).

Slide 9 – FY2009 Supplemental Bill
Just reiterates the timing and our approach

Slide 10 – Economic Stimulus Bill
Is moving very rapidly – appears to be formula and grant driven
We do anticipate a separate bill once we know what authorization is needed and the timelines.

Slide 11 – FY2010 Budget Overview

The Governor's Dec. 15 budget proposes to spend less general fund dollars in FY2010 than we are spending in the current year

The $4.9 billion general fund and $11.2 billion total funds budget operating and capital budgets represent a 7% decrease from FY2009. (This comparison excludes the FY2009 one-time resource rebate of $746.4 million and appropriations to savings.)

We budgeted $389 million below the fall revenue of $5.27 billion which is over 7% below what was projected.

We know that given the current economic situation that the price per barrel will be different, and that expectation is that it will be lower. Commissioner

Galvin did an excellent job of describing the process and the challenges of revenue forecasting – especially during this extremely volatile and unpredictable time.

Interim forecast will be provided on February 18 along with budget amendments to correspond with these changing conditions.

Slide 12 – FY2010 Budget Highlights – REFER TO PIE CHART

FY2010 PIE CHART - $11.2 billion total; $4.9 billion GF

Will use the pie chart for the presentation but will reference where these items are on the fiscal summary.

1. **Agency Operations – Non-Formula $3.7 Billion**

   Includes 14 Executive Branch Departments, the University, Courts and Legislature – represents 33% of the total budget (38.8% GF)

   Line 10 - Non-formula $4,265.9; Line 25 – Potential Amends $75.0; less dups $639.3 = $3,701.6

   1. Bargaining Unit Agreements for state agencies and the University of Alaska - $31.0 GF - $50.6 total
   3. Placeholders $20 million amendments due to legislature on the 30th day - February 18, 2009
   4. Placeholder $50 million for FY2010 supplementals
   5. Placeholder $5 million for legislation

2. Formula Programs $1.5 billion

represents 13% of the total budget (12.8% GF)

Line 14 – Formula Programs & Rate Adjustments $1,540.4; less dups $69.8 = $1,470.6

This line includes elected official and national guard retirement systems, DHSS formula programs

1. Medicaid Savings – cost containment $33.7 million ($13.5 GF)
2. Federal Reimbursement FMAP – from 51.02% to 51.21% for a savings of $7.7 GF
3. Able to reallocate savings to children's and senior services, including MHTrust
4. Rate Increases $4.7 million subsidized adoptions and child care benefits
5. Natl Guard Retirement benefits $880,800 (increase of $130.0 GF)
6. Elected official retirement $1,948.1 (increase of $120.0 GF)
7. AK Challenge Youth Academy $6,429.1 (increase of $185.2 GF)
8. Boarding Home Grants $1,690.8 (increase of $350.0 GF)

3. K-12 Education $1.1 Billion

represents 9.4% of the total budget (21.6% GF)

Line 15 - Public Education $1.1 billion – 53 school districts; 128,357 students

1. Public School funding formula - $992.3 million - $47.5 increase –

increasing the base student allocation from $5,480 to $5,580 = $23.0 million; intensive student increase from 9 times the BSA to 11 times = $21.0 million; district cost factors to 62.5% = $12.5 million

increase in required local effort of $9.0 million

number of students 128,357.12 ADM

2. Pupil Transportation - $60.3 million = increase of $1.8 million

GF based on 3.2% CPI and estimated ADM 117,624.70

STATEWIDE APPROPRIATIONS

The next 4 items represents 10.2% of the total budget (20.6% GF)

4. Direct Deposit to Retirement Systems $451.2 Million

Line 18 – Direct Deposit to Retirement Systems $451.2 million

1. PERS $241.6 Million – retain employer rate at 22%
2. TRS $206.3 Million – retain employer rate at 12.56%
3. Judicial Retirement $1.6 million
4. Direct Military $1.7 million

Unfunded liability as of 6/30/07 – Total of $7.5 billion (down from $8.4 PY)

PERS $4.7 billion (down from $5.3) and TRS $2.8 billion (down from $3.1)

Current funding ratio for PERS is 68% and TRS is 62% - we are committed to improving this ratio.

5. Community Revenue Sharing $60 million

Line 22 – Community Revenue Sharing $60 million

Along with the state's contributions to education funding and the retirement system unfunded liability is significant in assisting local communities

6. Oil Tax Credits $300 million

Line 23 – Oil Tax Credits $300 million

Incentive to exploration and develop Alaska's oil resources through exploration investment tax credits - there is a lag from when the credits are earned to when they are paid – this authorization may need to be adjusted as we get more experience with the program

7. Debt and Fund Capitalizations $334 million –

$484.4 - $150.8 dups = $333.6

Line 19 – Debt Service $261.5 million

1. payment of debt obligations – GO Bonds, School Debt, COPS, prison expansion, Revenue Bonds, etc..

Line 20 – Debt Retirement Fund Capitalization $134.4 million

1. funds used to pay debt from the debt retirement fund

Line 21 – Other Fund Capitalization $88.5 million

1. PCE - $10.4 GF plus $20.9 endowment/plus carryforward – fully funded at $32.2 million
2. Disaster Relief Fund total $16.5 million - $7.5million GF

8. Capital Budget $1.7 billion total; $307.2 GF (inc $20 m placeholder)

represents 14.9% of the total budget (6.3% GF)

Line 39 - FY2009 Capital Budget – totals $1,667.9 million

1. General Fund $307.2 million
2. Federal Funds $1,103.9 million

Other funds $256.8 million

3. AK Housing Capital Corporation Funds $238.4 million
4. Cruise Ship Tax $39.2 million – in section 4 of capital budget bill
5. AIDEA Dividends $22.0 million
6. AHFC Dividends $62.5 million
7. AK Capital Income Fund $28.0 million
8. Gambling Tax $9.6 million

- Capital federal highway, aviation and water projects $887.3 million – including $88.6 million in matching general funds
    - DOTPF Highway & Aviation $772.5 million ($49.6 GFM)
    - DEC Village Safe Water $91.6 million ($39 GFM)
    - DEC Municipal water/sewer $23.2 million
- Capital Energy projects $98 million
    - $50 million to capitalize Renewable Energy Grant Fund
    - $41 million AK Energy Authority
    - $7.2 million AK Housing Finance Corporation
- Gasline Projects $79.5 million including $20 million for the AGIA reimbursement fund

- Gasline projects in Sec 7 of capital bill; AGIA in section 12 e; operating in section 16 of the operating
- School Major Maintenance $40.5 million – 20 projects

9. Permanent Fund $2.2 billion total

represents 19.5% of the total budget (0% GF)

Line 43 – Permanent Fund $2,187.0

1. Dividends $1,311.0 million
2. Inflation Proofing $876.0 million

New Positions – Net of 45 new full time positions

Executive Branch - Net of 17 Full Time

Court System – 25 Full Time

University – 3 Full Time

Total Budget $11,224.6 Billion - $4,877.2 General Funds

Line 45 – Total Authorization to Spend -7.0 % decrease from FY2009 without the Resource Rebate or Savings included

Important to note that over 60% of the total state budget flows to communities, schools, non-profit organizations and individuals through grants and capital spending.

GO TO FISCAL SUMMARY! VERY FEW DIFFERENCES THIS YEAR
Add a few comments from Steve/David's report

The presentation of the four main categories of Agency Operating, Statewide, Capital, and Savings will provide consistency over time – only a few areas of differences –
The largest in terms of comparison is that we excluded the resource rebate and have it on a different line in the budget –

GF versus other funds for the AK Housing Capital Corp receipts

Use of Gambling Revenue

We will continue to work with LFD to make further adjustments

Slide 13 – To Meet 09/10 Budget Challenges and Protect Alaska's economy

The administration is taking this very seriously, will be providing interim revenue updates and amending the budget to address these challenges.

Reasonable and Responsible approach to the current financial situation –

Turn it over to Mr. Boucher to present the Long-Range Fiscal Plan

STATE OF ALASKA

The Honorable Bill Stoltze
Co-Chair, House Finance Committee
Alaska State Legislature
State Capitol, Room 515
Juneau, AK 99801-1182

Dear Finance Committee Co-Chairs:

During my presentation before the House Finance Committee on January 26, 2009, and the Senate Finance Committee on February 4, 2009, I was asked to provide documents regarding the $20 million savings target. I have enclosed:

- memorandum of June 26, 2008, with instructions to state agencies;
- follow-up email of July 11, 2008, to state agencies;
- memorandum of October 27, 2008, regarding quarterly reporting;
- the departments' savings plans;
- the departments' second quarter report; and
- a one-page summary as of December 31, 2008

As the Governor stated in her operating budget transmittal letter dated May 23, 2008, she implemented a $20 million savings target last summer. We asked agencies to see what they could accomplish in savings in FY2009 by managing those things we have control over, finding efficiencies, and implementing changes in business processes and practices that could ultimately result in some savings.

We did not ask agencies to cut services or positions. We encouraged departments to look at all line items for potential savings. We also suggested delaying the filling of vacant positions or reassigning work, if possible, to achieve some savings. Agencies prepared savings plans and have provided quarterly reports on the status of the plans.

printed on recycled paper

The Departments of Public Safety and Military and Veterans Affairs were exempted from the savings target although the commissioners are working hard to find efficiencies in their agencies also.

Departments' savings plans and reports vary in the amount of specificity, but all are committed to achieving the savings. We included $17.5 million in reductions in the FY2009 supplemental bill based on the savings identified through these plans. With five months left in the fiscal year, adjustments may be needed in the savings plans at the component level in order to achieve the target. In order to provide flexibility, we included unallocated reductions in the commissioner's office for the amount of the departments' savings targets with two exceptions - both related to Education: a reduction in the school performance incentive program and a reduction in school debt reimbursement.

Please contact me if you have additional questions.

Sincerely,

Karen J. Rehfeld
Director

Subject: FY2009 General Fund
Savings Plans

As you know, the Governor has set a savings target of $20 million general fund for FY2009. The attached document provides additional information and the savings targets by department to assist you in developing a FY2009 savings plan.

The savings targets were established as 2.9% of each department's estimated general fund personal services. Personal services are the only budget line item that includes fund source data. The estimated general fund personal services amounts came from the FY2009 Governor Amended Final scenario, which will be updated in the FY2009 Management Plan scenario.

Even though the target amounts were based on personal services, the saving plan does not necessarily need to come from personal services. However, since personal services is a large portion of a department's budget, cost savings may be achieved by requiring an internal review process before approving recruitment for vacant positions or by extending the vacancy by a month or more. Departments should also limit the creation of new positions.

As of July 1, OMB approval will be required for the creation of ALL new positions. In addition, OMB approval will be required for all reclassifications resulting in more than a two-range increase. Reclassifications as a result of flex-range positions or if initiated by the Division of Personnel are exempt from OMB approval. Updated personal services revised program procedures will be included in the July 2008 version of the Revised Program Manual. The manual will be available shortly.

I encourage you to review all line items and programs for potential savings. Consider savings in travel costs by using airline miles for ticket purchases, consolidating or reducing the number of trips and/or the number of travelers, and holding more video or teleconference meetings. Every year state agencies lapse funds. It may be helpful to look at FY08 lapse as the fiscal year ends for potential savings ideas.

Your department savings plan with amounts and impacts by component is due to OMB by Friday, August 1. If you have any questions, please contact me or your OMB Analyst. Thank you for your assistance.

Attachment

Task: Identify $20 million in FY2009 General Fund Savings

General fund target methodology

Targets established as a percentage of each department's estimated general fund personal services.

Departments are not limited to the personal services line for actually obtaining the required savings.

As of July 1 all new position requests must be submitted to OMB for approval along with reclassification requests that increase more than two ranges. Reclassifications associated with flex-range positions or initiated by the Division of Personnel are exempt from OMB review.

Departments develop savings plan and submit it to OMB by Friday, August 1.

No Washington Monuments!

Encourage departmental review of ALL line items and programs.

Engage department staff.

Savings plan memo to identify the amounts and impacts by component.

Identify the reductions that can be continued in the FY2010 budget.

Chief of Staff and OMB Director review each department's plan and work with department to modify if necessary.

Present summary to Governor for approval.

Departmental plans to be finalized by August 29 and incorporated into FY2009 Management Plan scenario.

Each department will establish general fund expenditure AKSAS restrictions by line item per the approved plan and report quarterly to OMB on progress.

Each department will develop a cost savings plan for FY2010 budget (may be different than that proposed for FY2009) and be prepared to discuss it at their Heads Up meetings in September - October, including whether or not legislation or regulations would be required for implementation.

Targets:

Administration - $1,100.0	
Commerce, Community & Economic Development - $80.0	
Corrections - $3,910.0	
Education & Early Development - $270.0	
Environmental Conservation - $390.0	
Fish & Game - $940.0	
Governor - $440.0	
Health & Social Services - $4,760.0	
Labor & Workforce Development - $330.0	
Law - $1,030.0	
Military & Veterans Affairs - $160.0	
Natural Resources - $1,300.0	
Public Safety - $2,280.0	
Revenue - $390.0	
Transportation & Public Facilities - $3,220.0	
Total	**$20,600.00**

Subject: Quarterly Reporting on FY2009 General Fund Savings Plans

During last month's Heads Up Meetings, we briefly discussed progress to date with the FY2009 Savings Plan in conjunction with potential supplemental needs. In order to keep track of efforts made by each agency toward meeting the savings target, we would like to receive a report on your progress for the first quarter of FY2009.

Please submit a memo that lists the approved components of your plan; the savings amounts assigned to each, if they were specified; your actual or estimated savings as of September 30 for each item identified; and any comments.

This format will be helpful:

Savings Plan	**Savings Target**	**Sept 30 Savings**	**Comments**
Hold 5 PCNs vacant in XYZ Division	$350.0	$17.5	On track to achieve this savings target
Reduce travel costs by using accrued miles	$100.0	$15.0	Struggling with this savings target. If unable to meet this target, will find other savings in department.
Savings Plan Totals	**$450.0**	**$32.5**	

If your department is having significant difficulty meeting your savings target, please contact me immediately. Otherwise, please submit your first quarter report to your OMB Analyst by October 31. Please use this format for subsequent quarterly reports (due dates are on the budget calendar).

Thank you for your efforts to control spending and find efficiencies that may result in cost containment and costs savings. The careful managing of our budget will have positive results in reduced supplemental need or in helping to find areas in the budget that may be trimmed in the future.

Subject: $20 Million Savings Target

Good Morning –

I have received some feedback from legislators who are hearing from their constituents that we are "cutting the FY09 budget" and impacting services.

In response, I explained the governor's concern about managing the growth in the operating budget and her goal in setting the $20 million savings target. I let them know that we have asked agencies to see what we may be able to accomplish in savings in FY09 by managing those things we have control over, finding efficiencies, and implementing changes in business processes and practices that could ultimately result in some savings.

We used 2.9% of GF personal services to establish the savings target so that departments would have a number to work toward, but we did not suggest that savings would have to come from personal services. We encourage departments to look at all line items for potential savings.

We typically end up with a GF lapse at the end of the year without imposing any savings targets. We have NOT asked agencies to cut services or positions. We have suggested delaying the filling of vacant positions or reassigning work, if possible, to achieve some savings.

We look forward to hearing your plans – emphasis on plans – in early August. The careful managing of our budget will have positive results in reduced supplemental need or in helping to find areas in the budget that may be trimmed in the future.

Please remind your divisions and programs that it is in everyone's best interest to be good stewards of public resources and demonstrate our commitment to provide quality service in the most efficient and effective manner. We have very talented and creative state employees who have excellent ideas on how to better serve Alaskans. Juneau's recent energy conservation efforts are a great example of what is possible.

Thanks for your help in communicating the positive aspects of our savings efforts!

Karen

Director, Office of
Management and Budget

Date: July 25, 2008

From: Annette Kreitzer

Phone: 907-465-5671

Subject: Department of Administration FY2009 GF Savings Plan

We have reviewed the FY2009 operating budget of the Department of Administration (DOA) to determine where reductions can be made to meet the Governor's savings target. I believe reductions for FY2009 can be made which will result in GF savings for FY2009 and which will limit the impact to the services we provide to our customers. My recommendations are as follows:

Division of Finance (DOF) **($300.0) GF**
This reduction will be offset with an increase in unbudgeted CIP receipts. The DOF currently has capital project funding in excess of $40 million GF for statewide systems replacement. The division plans to use staff resources to work on the project, and expect that staff efforts over the next several fiscal years will be at a level to support charging the project $300.0 annually.

Enterprise Technology Services (ETS) **($300.0) GF**
ETS received in excess of $800.0 GF for salary and health insurance cost increases for FY2009 for all units within the division. ETS also has in excess of $7.0 million of GF in the FY2009 budget for SATS/ALMR operations. I believe we can aggressively manage vacancy and achieve efficiencies in non-personal services costs in all areas of ETS to meet the targeted savings.

Department Wide Personal Services Reduction **($200.0) GF**
I am proposing to spread $200.0 of GF reduction among all divisions within the department that have GF in their personal services budget. The reduction will be based on each divisions' percentage share of the amount of the total GF received for salary and health insurance increases for FY2009. The reductions

will be modest for each division, and I believe with careful management of vacancy we can achieve the savings.

Retirement & Benefits GF Reduction **($107.6) GF**

The Division of Retirement & Benefits will see a reduction of GF needed in FY2009 for costs related to the defined contribution retirement plan. This reduction, which was projected in the fiscal note for SB141 (CHAPTER 9 FSSLA 05), and which should have been made in the FY2009 budget, was inadvertently overlooked.

Year End Lapsing **($200.0) GF**

For the past several years the DOA has lapsed in excess of $200.0 of GF each year. I believe it is reasonable to expect that to occur again in FY2009. As we progress through FY2009 we will be looking to identify specifically where this lapse will occur.

The total amount of FY2009 GF savings identified here is $1,107,600. This exceeds our target amount by $7,600.

Please let me know if you have questions or need additional information.

COMMERCE
COMMUNITY AND
ECONOMIC DEVELOPMENT
Office of the Commissioner

Sarah Palin, Governor
Emil Notti, Commissioner

Date: August 1, 2008

To: Karen Rehfeld, Director
Office of Management and Budget

From: Emil Notti, Commissioner
Department of Commerce, Community and Economic Development

Subject: FY09 General Fund Savings Plan

The Department of Commerce, Community, and Economic Development has looked at a variety of areas to determine where to achieve the $80,000 of general funds savings requested by the Governor. After discussions with the directors of the impacted divisions and careful consideration of the options, I am proposing the following general fund cuts:

The Office of Economic Development (OED): $60,000.
Although $290,000 was added via a fiscal note for the newly created film office, the regulations process and the position approval and recruitment has taken longer than anticipated. As a result, OED will be able to achieve one-time savings of $60,000 from the FY09 budget. However, the film office will be fully operational fairly soon, and OED will need the full $290,000 in FY10.

The Division of Community and Regional Affairs: $16,000.
Due to significant staff turnover, DCRA is actively recruiting for a number of positions. The payroll costs of these temporarily vacant positions should be enough to address most of this reduction. Additional cuts will be made by reducing staff travel. This travel reduction will result in a reduced presence at conferences this year, including the Southeast Conference, Alaska Municipal League, and AFN.

Because DCRA's turnover is typically very low, this cut will be difficult to sustain when the positions are filled. If this cut carries into FY10, the delivery of its programs may be negatively impacted.

Division of Administrative Services: $4,000.
Reductions in travel (in numbers of trips and the length of trips) and delaying the purchase of some equipment should enable this division to achieve these savings. These savings are probably sustainable and can be carried into FY10.

Governor's Office

DATE: July 31, 2008

From: Dwayne Peeples
Deputy Commissioner
Department of Corrections

SUBJECT: DOC FY09 Savings Scenario

The Department of Corrections appreciates the opportunity to provide the requested information on potential general fund savings for FY2009. This was a valuable exercise in looking for inefficiencies and areas where we identify long-term practices that can save general fund dollars in future years.

Challenges and Possibilities:

- FY 09 Anticipated Supplemental Requirements: Fuel/energy cost increases for 24/7 facilities. In addition to physical plant increased costs, this also includes increased transport cost and increased commodities—all tied to fuel and energy increased costs.

- FY09 *Knowns*: If population remains static, we will not be in supplemental mode *except for fuel/utilities*, and possibly *medical*. We can draw from Electronic Monitoring (EM) and Out-of-State (OOS)—OOS will generate fewer trips if populations remain static as of 7/31/08 (3696 max cap - 3626 incarcerated = -70).

Savings Scenario--$3,910.0 GF, $123.0 MHTAAR = $4,033.0:

- Substance abuse treatment program FY09 increases, $1,132.8: These services are expansion of treatment services appropriated for ¾ of the fiscal year and are the major part of the department's initiative to reduce recidivism. The expansion for the services have not been implemented and will not result in lay offs or cancelation of contracts. Impact: Elimination of this program expansion will result in increased population growth in future years requiring additional facility construction or purchase of contract beds; adversely impact the program design of the new 1,536 bed prison in the Mat/Su Borough and adversely impact the credibility of the department with the legislature to obtain funding for these programs in future years.

- Freeze Substance Abuse Coordinator and Education Program Coordinator (or the equivalent), $199.6: the substance abuse position is vacant, this will not result in a layoff situation. The Education Program Coordinator position is expected to become vacant by 10/1/08 and will remain unfilled, duties will be absorbed by existing filled positions.

- 3rd year fiscal note funding for Sex Offender Polygraph, $752.5: 1) the Sex Offender Polygraph program is under performing, however, it has recently shown improvements in our ability to hire qualified polygraphists; and, 2) we propose to restrict the funding for the 2 PFT probation officer positions until the program is performing at full levels. *(NOTE: this does not impact the YKCC (Bethel) program.)*

- Electronic Monitoring (EM) FY08 increase, $881.1: we have not increased EM by 50 slots as originally proposed. In FY09, adding 40 Community Residential Center (CRC) beds is being proposed which will reduce overcrowding in the Anchorage Correctional Complex and allow the out-of-state placements to remain static.*

- Freeze SCCC Micro-Tech (or equivalent) and HMCC Food Service Lead, $148.6: this does not generate lay-offs, these are vacant positions that we believe the duties can be absorbed by existing staff (HMCC) or by institutions sharing a Micro-Tech (WWCC and SCCC).

- Mental Health Services FY09 increase, $246.0: we have not implemented this increase in services by providing treatment materials; or, fund existing vacant positions that were to be reallocated to mental health to facilitate increased services. Not implementing increased services minimizes the impact versus reducing or eliminating an existing service. This does not create a lay-off situation.

- Increase the vacancy factor from 3.3% to 6.25% for Probation/Parole, $672.4: while this will increase the caseload for existing PO's, the positions are vacant and this does not create a lay-off situation.

**With OMB approval, DOC procured the CRC beds in July 2008, using EM funds*

Conservation and Efficiencies--In Process of Implementation:

- Energy Conservation Measures: DOC Energy Savings Performance Contracting w/Siemens Financial
  - Savings will not be measurable until project is complete and enough time has lapsed to generate a comparative analysis on energy savings

- Cost Containment Measure: Standardized Menu
  - Nutritionist/Contractor submitted first draft of standardized menu on 7/25/08; review is underway. Until standardized menus are adopted and implemented in the institutions, there is no measurable savings. Standardized menu savings will be linked to standard procurements (below) and may be possible to evaluate savings by the end of FY09.

- Cost Containment Measure: Western States Contracting Alliance (WSCA), standardized procurement
  - SOA/DGS is within a few weeks of signing the final WSCA contracts
  - WSCA allows states to purchase as much or as little at any one time at negotiated bulk flat rates
  - We pay NO freight and shipping costs, exceptions: Bethel, Nome, Fairbanks, Pt. McKenzie

        - DOC anticipates primary savings on paper products and cleaning supplies
            - Contract is not in place; no measurable savings as yet

- Fund Source Change: SGF to GF/MH – No direct savings, fund change
    - Working with AMTHA to complete preliminary identification of FY10 funds by early September; and, any amounts remaining will be captured in FY11.

- Liquidated Damage Recovery: Out-of-State (OOS) Contract with Corrections Corporation of America (CCA)
    - In FY08, the department recovered $275.0 in contract funds for not providing services included in the contract. The department has taken due diligence in controlling the OOS agreement by holding the CCA accountable and to the terms of the contract.
    - In FY09, we anticipate recovering up to $200.0

If you require additional information, please feel free to contact us.

Department of Corrections
FY 2009 Operating Summary

Scenario 1

Component	Description	GF	FED	Other	TOTAL
Offender Programs	Freeze Substance Abuse Program Coordinator position (or the equivalent)	(119.8)			**(119.8)**
Offender Programs	Freeze Education Program Coordinator position $106.4 annually / hold vacant 3/4 yr (or the equivalent)	(79.8)			**(79.8)**
SCCC	Freeze Micro Tech position / support maintained by WWCC's & Admn Support (or the equivalent)	(76.3)			**(76.3)**
HMCC	Freeze Food Service Lead (or the equivalent)	(72.3)			**(72.3)**
	Sub-Total FY09 Scenario 1 :	***(348.2)***	***0.0***	***0.0***	**(348.2)**
Statewide Probation	Increase V&T within Probation & Parole to meet GF reductions. FY09 Authorized PS = $10,786.7 less 6.25% (or $672.4) = $10,114.3. This is the equivalent of 8.5 Adult Probation Officer I/II positions statewide.	(672.4)			**(672.4)**
	FY09 Scenario 1 Total :	***(1,020.6)***	***0.0***	***0.0***	**(1,020.6)**

DEC FY 2009 General Fund Savings Report Proposal

Identify General Fund Type (GF, GFPR or GFM)	Program	Savings Amount	Describe Impact
GFPR	Air - Air Non-Point & Mobile Source Program	$34,980	It is projected at this point that all these receipts will not be realized in FY09.
GF	SPAR – Industry Preparedness and Pipeline Operations	$208,520	In fiscal year 2008 DEC received an appropriation of $606,500 and 4 positions for the purpose of pipeline compliance oversight and North Slope flow line integrity. The department has encountered extreme difficulties in the classification and recruitment of these four positions. One position has been filled with the incumbent to begin in August, however, we don't expect to fill the other 3 positions until later this year. This is a one time savings and will not be available in FY10.
GF / GFM / GFPR	All Divisions – Implement agency based travel program	$126,500	This would eliminate $56,000 in travel agent fees annually and one position estimated at $70,500.
GF / GFM / GFPR	Mileage Tickets	$20,000	Current balance of the DEC mileage account would allow approximately 50 tickets to be purchased. This would be allocated to a variety of programs.

TOTAL $390,000

Department of Education & Early Development
FY2009 Management Plan Discussion

The Department of Education & Early Development has conducted an internal review of general fund program expenditures to identify potential areas of savings to meet the target provided by the Governor's Office of Management & Budget. While developing a management plan to minimize program impact but still attaining the goal, it is critical to review the overall fund source levels for program operations compared to annual growth and the personal services required for agency operations.

General fund for the Foundation Program, Boarding Home Grants, Youth in Detention, Special Schools, School Performance Incentive Program, Pupil Transportation, Alaska Challenge Youth Academy, Early Learning Coordination (Head Start) and WWAMI were not considered for targeted restrictions. The School Debt Reimbursement expenditures are not included in ABS under the Department of Education & Early Development and were not manually added for this analysis but do have a human resource impact. These totals are included in the analysis of personal services expenditures because of the human resources required to manage and execute these authorized programs.

Based on the program funding levels recorded in ABS under Management Plan scenarios for each given fiscal year with the exception of FY2009 which is still being developed, the overall growth of general fund personal services expenditures remains relatively low as shown below. For FY2009, only 2.13% of the total budget (all fund sources) is allocated to personal services and this represents an annual change of -.04% since FY2004. The sharp decline in the total position count from FY2004 to FY2005 was due to a statewide realignment/integration which transferred programs to more appropriate agencies and also included the elimination of specific programs or reductions through efficiency measures.

	FY2009	FY2008	FY2007	FY2006	FY2005	FY2004
Positions:

	346	346	343	338	331	381
Position count change from FY08	0					
Position count change from FY04	-35					
% Change from FY04	-9.19%					
% Personal Services to Total Agency Funds	2.13%	2.05%	2.01%	2.09%	2.01%	2.34%
% Change from FY08	0.08%					
% Change from FY04	-0.21%					
5 year average annual growth	-0.04%					
General Fund % Personal Services to Total Agency Funds	0.67%	0.61%	0.65%	0.68%	0.57%	0.61%
% Change from FY08	0.06%					
% Change from FY04	0.06%					
5 year average annual growth	0.01%					
General Fund Personal Services Comparison to Personal Services Total all fund sources	31.38%	29.74%	32.49%	32.48%	28.41%	26.02%
% Change from FY08	1.64%					
% Change from FY04	5.36%					
5 year average annual growth	1.07%					

The general fund allocated to personal services represents less than 1% of the total agency funding. The general fund allocated to personal services in the DEED budget

represents less than 1/3 of the total funding allocated specifically for personal services. The average annual growth of general fund personal services compared to overall personal services authorization allocated within DEED budget is only 1.07% as illustrated over the six year period.

In order to mitigate the perception of cutting programs or services connected to other funding sources, DEED did not to include general fund match in the following analysis of positions. This analysis identifies the specific components containing funding for personal services, and the percentage funded with general funds.

Component	Percentage General Fund	Total Position count
Executive Administration	100%	8
Administrative Services	77%	8
Information Services	30%	6
School Finance	58%	13
Student & School Achievement	16%	70
Mt. Edgecumbe	30%	44
Libraries	100%	35
Archives	89%	10
Museums	97%	18

Executive Administration
The Executive Administration component provides oversight and leadership to the agency in support of the mission and vision of the State Board of Education & Early Development. Historically, this component has maintained extremely low staffing levels relative to the responsibilities and duties. For FY2009, this component received general funds through a fiscal note associated with SB 285 which also authorized three new positions for the Statewide System of Support (district intervention). The total position count of eight shown for this component includes these three new positions created specifically for the Statewide System of Support directing state resources to fund activities necessary to fulfill the constitutional mandate clearly defined in the Moore v. State decision. In the review to identify areas where efficiencies can be managed, the Department of Education & Early Development will meet the OMB target in components other than Executive Administration. General funds to support essential staff and State Board of Education & Early Development priorities remain critical to the success of the entire agency in execution of the mission to ensure quality standards-based instruction to improve academic achievement for all students.

Administrative Services
This unit has maintained stable staffing levels and supports the activities of the entire department. With a low turnover rate, the vacancy factor must remain relatively low to accurately reflect the personal services expenditures necessary for this unit. This unit has available funding from interagency receipts collected from various components and has historically been able to return funding to the programs at the end of the fiscal year. This section would be able to restrict $5.0 general fund in the contractual line item by allocating expenditures to the interagency fund source.

Department of Education & Early Development
FY2009 Management Plan Discussion

Information Services
Beginning in FY2007, the Information Services section has seen extremely challenging levels of turnover and difficulties in the recruitment process to keep the section fully staffed with experienced personnel. We anticipate stabilization within this section since two key positions have been filled. On going recruitment issues for Analyst/Programmer positions will continue to exist but restricting funds based on any anticipated vacancies would be detrimental to funding contractors through the ETS Task Order system which has become a critical component to meeting the business requirements of the department while these positions are vacant. This section has seen significant savings related to software expenditures and the enterprise agreement with Microsoft for educational discounts. This section would be able to restrict $5.0 in the contractual line item in support of the efficiency efforts.

School Finance & Facilities
The School Finance & Facilities section manages K-12 Foundation program, Pupil Transportation, School Debt Reimbursement, the CIP process, and the audit process. While all of these programs are removed from the operational areas where funding could be restricted for FY2009, the personal services associated with providing the human resources necessary to execute these programs are contained in this section. Within this section, PCN 05-1058, Statistical Technician II, Range 14 with a total cost projected at $66,519 for FY2009, remains unfilled due to recruitment difficulties. Under the current memo of instruction from OMB regarding job reclassification, this section will seek the approval of an upgrade for this position to accurately reflect the duties required to meet the business needs of this section. DEED anticipates the approval and recruitment process to take several months and can restrict approximately 4 months of the costs associated with the position for a total of $16.9 to manage a lapse savings for FY2009.

Student & School Achievement
This section manages most of the federal funding for education programs administered through DEED. The majority of the federal receipt authority is located in the grants line item. The general fund in this component is approximately 4.6% of the total funds authorized for this component (FY2009 Management Plan). The largest expenditure of general fund is the contract costs for Data Recognition Corporation to administer the Comprehensive Statewide System of Assessments which includes the High School Graduation Qualifying Examination. A newly funded general fund program for the development of a longitudinal data system is also contained within this component for the first time in FY2009. This program was funded previously with federal receipts from a 3 year grant. During the FY2009 budget cycle, it was anticipated that the federal receipts would expire or be fully expended. We have since received approval for a no-cost grant extension on the period of performance and contractual obligations were moved into the current fiscal year accordingly. Recruiting fully qualified, expert Analyst/Programmers required due to the complexity of this project continues to be an issue. Managing the use of the DOA/ETS Task Order system or other procurement procedures for professional services must be utilized to fill the void while recruitment efforts continue. A projected 6 month vacancy can be managed to allow a restriction of $36.5 for PCN 05-8723 and 05-8724, Analyst/Programmer II, Range 16 positions. Specific projected costs associated

with hardware/software maintenance identified for the general fund appropriation can be deferred to FY2010 due to the timing of the maintenance and licensing renewals. General fund in the amount of $100.0 may be restricted in order to contribute to the managed lapse savings target for FY2009.

Mt. Edgecumbe High School
Mt. Edgecumbe High School has been successful in managing the increasing costs of running the State Boarding School's academic and residential programs with the help of additional funding for fuel costs through various energy relief funding measures. The additional increases in the funding available through the Foundation Program will also contribute substantially to the success of this program. To avoid the appearance of making unnecessary reductions to this program when fuel costs could realistically require some level of supplemental funding and until the energy costs stabilize or begin trending toward a manageable growth, DEED recommends not restricting any general funds associated with this program pre-maturely for FY2009.

State Facilities Rent
This component contains the funding necessary for leased space acquired through General Services and also space associated with the Public Building Fund. DEED received a general fund appropriation to provide off site storage for the State Archives. The Division of General Services is preparing a Request for Proposals (RFP) to acquire existing space or provide a build to suit contract for the necessary square footage. The RFP will be made public at the end of July with an anticipated award date of September. Since the appropriation anticipated the lease costs on an annual basis, $60.0 may be restricted in order to contribute to the managed lapse savings target for FY2009.

Libraries, Archives and Museums
The Division of Libraries, Archives and Museums (LAM) provides services to the public, the legislature and the executive branch. The (LAM) budget has been impacted by rising costs associated with materials, books, periodicals and online database subscriptions required to provide reference and research services. These costs erode the capacity of this unit to maintain a budget with little or no growth to mitigate the pressure on existing general fund appropriations.

This component has identified several areas that will be restricted without impacting the delivery of services to the public. Through vacancies associated with staff turnover and recruitment efforts, this division will be able to restrict $11.8 for PCN 05-3080, Librarian I Range 16, and $24.8 for PCN 05-3508, Micrographics Manager (Archives) Range 17.

By deferring purchases of equipment and museum acquisitions, another $10.0 will be restricted in the commodities line item.

School Performance Incentive Program
A lapse balance could occur within the School Performance Incentive Program in FY09 but will not be included as part of the DEED reduction analysis since the payments are formula driven based on assessment data and not subject to savings attributable to

management decisions. In FY 07, the payments totaled approximately $1.9 million and $3.86 million lapsed. The FY08 payments are projected to be close to $1.1 million which will leave a lapse balance of nearly $2.5 million. If the trend continues, a significant lapse balance may be available in FY09 that could be included as part of the overall OMB savings target. Ideally, the final year of the School Performance Incentive Program will reflect greater improvements in student performance throughout the state.

The proposed general fund managed lapse savings will be restricted as follows:

Component	General Fund Proposed Managed Lapse
Administrative Services Total	5.0
Information Services Total	5.0
School Finance & Facilities	16.9
Student & School Achievement Total	136.5
State Facilities Rent	60.0
Library Operations	16.8
Archives	24.8
Museum Operations	5.0
Total Proposed General Fund Restriction	270.0

MEMORANDUM

TO: Karen Rehfeld, Director
Office of Management and Budget

THRU:

FROM: Tom Lawson, Director

DATE: August 1, 2008

SUBJECT: FY09 General Fund Savings Plan

The purpose of this memo is to outline the Department of Fish and Game's (ADF&G) FY09 savings plan as requested by Governor Palin. Per your June 26, 2008 memo, the department's targeted savings goal is $1.0 million of general fund (GF). ADF&G determined that the most equitable method of allocating the savings target within the department should be based on the percentage of GF in each division.

Following is the proposed ADF&G FY09 savings plan. Savings plans for most divisions are based on extending the vacancies of already vacant positions or leaving positions vacant for a period of time, once the incumbent departs. It must be noted that generally, extended vacancies in divisions are the result of our inability to attract candidates because of non-competitive wages and benefits. Vacant positions put a significant strain on existing staff as the workloads of vacant positions must be absorbed.

Division of Commercial of Commercial Fisheries – $644.2

The Division of Commercial Fisheries continues to experience recruitment difficulties within each regional, headquarters, and special projects components.

SE Region: The SE Region Fisheries Management component will leave a Fishery Biologist vacant for over 7 months. This position has been vacant and work has been and will continue to be absorbed by other positions. Savings from this position is expected to result in a one-time spending reduction of $41.9.

Central Region: The Central Region Fisheries Management component will leave 3 positions (Vessel Technician, and 2 Fishery Biologists) vacant for a minimum of three months. Savings from these positions are expected to result in a one-time spending reduction of $37.7.

AYK Region: The AYK Region Fisheries Management component will leave vacant 7 positions (4 Fishery Biologists, Research Analyst, Program Technician, and F&G Regional Supervisor) for a minimum of three months. Savings from these positions are expected to result in a one-time spending reduction of $94.5.

Westward Region: The Westward Region Fisheries Management component will leave vacant 4 positions (4 Fishery Biologists). for a minimum of three months. Savings from these PCNs are expected to result in a one-time spending reduction of $85.0.

HQ Fisheries Management: The Headquarters Fisheries Management component will leave 11 positions (Deputy Director, 2 Analyst Programmers, Database Manager, 2 Biometricians, 3 Fishery Biologists, Fisheries Scientist, and F&G Regional Supervisor) for a minimum of two to three months. Many of the vacant positions within headquarters have been vacant for a while and recent recruitment efforts have failed. It is hoped that a successful applicant pool will be available when these positions are recruited again. In the interim, some staff members have been placed in acting status or others have taken on additional duties. Neither are good long-term solutions. Savings from these positions are expected to result in a one-time spending reduction of $284.9.

CF Special Projects: Every effort will be made to leave positions vacant longer than usual to try and achieve a GF savings of $100.2.

Division of Sport Fisheries – $67.9

The Division of Sport Fisheries is experiencing ongoing recruitment difficulties in positions throughout the state, particularly at the professional level (biometricians, fishery scientists, fishery biologists). This general fund decrease in personal services could be absorbed in FY09 due to these vacancies, but with ongoing recruitments and a fully staffed division this general fund decrease would be difficult to absorb in future fiscal years.

Division of Wildlife Conservation – $123.5

The Division of Wildlife Conservation will manage this requested spending reduction through the vacancy of its new Wildlife Scientist position. This position is required by the division to oversee the scientific rigors of division research. The position must receive final classification action by the Division of Personnel and complete the recruitment and hiring process. This is expected to require six months of time, achieving a one-time FY09 savings of approximately $60.0. Additionally, the division continues to experience recruitment difficulties within each region. To achieve the balance of the savings required by this target, the division will extend by one month the vacancy period when positions turnover. If savings by this mechanism do not materialize, the division would have to reduce spending on field research. The division does not anticipate the savings to be sustainable in future years.

Commissioner's Office – $13.4

The Commissioner's Office generally budgets for a zero vacancy factor, but due to turnover with clerical staff, the actual vacancy factor is higher than zero. Historically, the Commissioner's Office has a very tight budget, but in FY09 every effort will be made to manage position costs with a reduced personal services line.

Division of Administrative Services – $42.2

The Division of Administrative Services has recruitment and retention issues in all positions in Juneau where most of the staff are located. The division generally budgets for a 5 percent vacancy factor, but due to turnover of clerical staff and the inability to fill higher level positions, the actual vacancy factor has been higher than 5 percent. This personal services reduction amount is possible in FY09 due to recruitment and retention issues. However, the division will continue to actively recruit for these higher level professional positions and does not expect the savings to be sustainable in future years.

Boards Support – $20.6

The Boards Support Section was able to procure a new contract for printing for FY09 that was less than last year's costs. This contractual services reduction amount is possible due to a one time savings because of the lower bid award to the vendors and the section does not anticipate the savings to be sustainable in future years.

Division of Subsistence – $36.2

73000 per 7Dm

For FY09, the Division of Subsistence is projecting to use carry-forward federal indirect receipts savings from the previous year to pay for services normally paid with general fund. The division does not anticipate the savings to be sustainable in future years.

Division of Habitat – $52.0

The Division of Habitat will manage the requested reduction in spending by reducing its contractual services by $30.0; FY09 lease costs will be less than in FY08 due to the transition from the Department of Natural Resources to ADF&G per Executive Order 114. The division will also reduce commodities by $22.0; many older computers and office supplies were updated in FY08 so FY09 expenses should be less. This GF decrease will be very difficult to absorb in future fiscal years due to decreases in several of the division's interagency agreements that provide key personal services support.

TO: Karen Rehfeld, Director
Office of Management and Budget

DATE: August 1, 2008

FROM: Linda Perez
Administrative Director
Office of the Governor

SUBJECT: FY 2009 Savings Plan

As requested, the Office of the Governor has identified $465.0 in potential GF savings in FY 2009. We will create a 'savings plan' management encumbrance for these funds against our FY 2009 Executive Office appropriation.

We will continue to review our accounts throughout the year to identify any additional savings that may be realized in FY2009.

MEMORANDUM

DATE: July 31, 2008

TO: Karen Rehfeld
Director
Office of Management and Budget

FROM: Randall Super
Deputy Commissioner

SUBJECT: Governor's $20 million Savings Target

The Department of Health and Social Services will achieve its portion of the Governor's savings target through a range of management and program actions. To most effectively manage achievement the department will establish restrictions on AKSAS limiting each affected division's expenditure authority. However, as the year progresses the department may adjust the allocation of those restrictions to reflect actual activity; but will maintain restrictions totaling the department's $4,760.0 general fund target.

Summary	GF Amount
Position Management	(500.0)
Senior Benefits Program	(500.0)
Medicaid Client Travel	(437.6)
Administrative Travel	(134.5)
Additional Medicaid Reductions	(3,187.9)
Total	***(4,760.0)***

Position Management - $500.0 GF
The department will manage position vacancy and turnover to achieve an additional savings totaling $500.0 in general funds through a combination of management techniques. Division directors will evaluate the necessity of filling each individual position (new or becoming vacant), may hold positions that become vacant open longer before recruitment, or may lay off positions

determined less essential to achieving the division's mission. This target is allocated between the divisions based on the number of authorized positions in each division divided by the total authorized positions in the Department. The following table displays the Division and the allocation of this portion of the target.

Division	PFT	PPT	Non-Perm	Total Positions	% of Total Positions	Target Amount
Alaska Pioneer Homes	557	49	40	646	17.6%	88.0
Behavioral Health	304	15	27	346	9.4%	47.1
Children's Services	475	2	7	484	13.2%	65.9
Health Care Services	91	-	7	98	2.7%	13.4
Juvenile Justice	467	5	18	490	13.4%	66.8
Public Assistance	528	9	-	537	14.6%	73.2
Public Health	519	16	15	550	15.0%	74.9
Senior and Disabilities Servies	119	1	3	123	3.4%	16.8
Commissioner's Office/FMS	357	1	17	375	10.2%	51.1
Boards and Commissions	19	-	2	21	0.6%	2.9
Totals	3,436	98	136	3,670		500.0

Senior Benefits Program - $500.0 GF

The new Senior Benefits Program helps low-income seniors who are at least 65 years of age remain independent in the community by providing a monthly cash benefit.

During a special session in late June 2007, the Alaska Legislature passed legislation to create a new program to benefit low-income seniors, which followed the sunset and end of the SeniorCare program on June 30. The department successfully transitioned almost 7,000 seniors from the former SeniorCare program to the new Senior Benefits Program, and continues to process applications for individuals newly eligible under the income limits. By FY09, the division expects 11,000 seniors will qualify for assistance under this new program. Individual monthly payments are $125, $175 or $250 depending on the senior's gross annual income. Income limits are tied to the Alaska Federal Poverty Guidelines and will change annually.

The FY09 appropriation for the program includes $19,662.3 in benefits and $683.1 for administrative costs. With actual caseload and expenditure data through the end of April, the Department conservatively projects that it will not expend $500.0 GF of the appropriation by the end of FY09.

Medicaid Client Travel – $875.2 ($437.6 GFM/$437.6 Fed)
The divisions will reduce the Medicaid FY09 Travel Authorization by 2%. The 2% reduction target is calculated based on the 5/27/08 MMIS FY08 projected Travel expenditure of $43,760.3. Division reductions are calculated based on that division's percentage portion of the total Medicaid authorization times the FY08 projected actual travel expenditure multiplied by 2%. This reduction estimate does not include any savings that may result from an internal review of the State Travel Office by the Department of Administration.

Medicaid Services Transportation

Estimated FY08 Actuals as of 5/27/08	43,760.3			
Division Allocation based on FY08 Exp to Date			**Total**	**GF Portion**
DHCS	676,032	57.3%	(501.5)	(250.8)
DBH	168,921	14.3%	(125.3)	(62.7)
OCS	16,146	1.4%	(12.0)	(6.0)
DSDS	318,610	27.0%	(236.4)	(118.2)
Total Services Transportation		100.0%	***(875.2)***	**(437.6)**

Agency Travel – $134.5 GF
Each division will reduce the FY09 Travel line allocation within its programs by 2%. This reduction estimate does not include or reflect any savings that may result from an internal review of the State Travel Office by the Department of Administration.

FY09 DHSS Travel Budget by Appropriation		
Alaska Pioneer Homes	24.3	(0.5)
Behavioral Health	617.0	(12.3)
Children's Services	1,026.7	(20.5)
Adult Preventative Dental Medicaid Services	-	
Health Care Services	179.9	(3.6)
Juvenile Justice	415.8	(8.3)
Public Assistance	666.8	(13.3)
Public Health	2,646.5	(52.9)
Senior and Disabilities Services	304.5	(6.1)
Departmental Support Services	455.9	(9.1)
Boards and Commissions	388.3	(7.8)
Human Services Community Matching Grant	-	
Community Initiative Matching Grants	-	
Agency Total	***6,725.7***	***(134.5)***

Additional Medicaid Program - $3,187.9 GF
The final portion of the target will be achieved through actions by the Division's within their portions of the Medicaid program to reduce expenditures. The Division's portion of the target will be achieved by allocating the reduction between the divisions based on their portion of the

FY2008 Medicaid expenditures similar to the Medicaid Client Travel above. However, given the sensitivity around children in the custody of the state the small amount (43.6) allocated to the Office of Children's Services has been reallocated to the Division of Health Care Services.

Division of Health Care Services	(1,870.4)
Division of Behavioral Health	(456.5)
Division of Senior & Disability Services	(861.0)
Total	***(3,187.9)***

Subject: FY 09 GF Lapse Projection.xls

Attachments: FY 09 GF Lapse Projection.xls

I have enclosed our general plan to reach the general fund savings target. We hope to achieve the target by managing travel and personal services costs. Specific actions include the following:

1. Data Processing Section will delay the hiring of a position to implement Chapter 92, SLA 08. This position is critical to our achieving the security requirements contemplated in Chapter 92, but given that we have just completed the classification process and given the hiring timeline, we feel we can achieve the proposed level of savings.
2. Various components have had some difficulty recruiting and while we continue to actively pursue qualified candidates for critical positions, we believe the extended vacancy in some areas will enable us to manage toward a general fund lapse.
3. Other components are identified for modest general fund savings that we think are achievable through prudent management.

If circumstances arise is specific components that require adjustments we will keep you apprised.

Guy

Department of Labor and Workforce Development
FY 09 General Fund Lapse Projection

Component	Total GF	GF Red.	Notes
Commissioner's Office	$ 658.5	$ 4.4	Travel Management
Management Services	$ 184.6	$ 12.0	Vacancy Management
Data Processing	$ 426.7	$ 25.0	Delay hire of position to implement Ch. 92, SLA 08.
Labor Market Information	$ 1,242.2	$ 8.0	Vacancy Management
Workers' Compensation	$ 3.3	$ 3.3	Restrict GF and manage cost of travel, contractual, personal services.
Second Injury Fund	$ 0.2	$ 0.2	Restrict GF and manage cost of travel, contractual, personal services.
Wage and Hour	$ 1,588.8	$ 40.0	Delay maint. of new Certified Payroll System-system development is still underway

MEMORANDUM

STATE OF ALASKA

Department of Law

To: Karen J. Rehfeld, Director
Office of Management and Budget

Date: July 31, 2008

From: Talis Colberg, Attorney General
Department of Law

Subject: FY2009 General Fund Savings Plans

CONFIDENTIAL: DELIBERATIVE PROCESS PRIVILEGE

OMB has requested the Department of Law propose a savings plan for FY2009 that will generate $1,030,000 in general fund cost savings. We have identified the following areas where general funds can be saved.

RDU	Component	Description	FY2009 General Fund Savings	Potential Carryover to FY2010
Civil	Commercial and Fair Business	Move $200,000 in existing unused SDPR authority from Labor and State Affairs to Commercial and Fair Business and expended additional consumer protection program receipts instead of general funds	$200,000	$200,000
Civil	Human Services	Lapse the majority of the $500,000 Curyung multi-year supplemental. The case appears to be settling and the Dept had minimal costs during FY08. NOTE: If the status of the settlement suddenly changes we could have to revisit this item.	$475,000	
Criminal	2nd Judicial	Fund Barrow Victim Witness Paralegal with federal earmark money from July 2008 – September 2009 (new PCN approved in FY09 budget)	$106,200	$26,550
Criminal	OSPA	Recruitment time will result in estimated start dates of the new Attorney and LOM of Sept 1, 2008 (2 mos x $35,000/month)	$75,000	
Criminal	4th Judicial	The current lease will renew in November 2008 at a lower rate as the cost of amortizing leasehold improvements drop off.	$78,000	$78,000

All	Various	Slow down PC replacement cycle (currently 3 years)	$95,800	$37,500
		Total	$1,030,000	$342,050

Approximately 33% of the FY2009 savings will carry forward into FY2010. Following is a discussion of other constraints facing the Department as it moves into the FY2010 budget planning process.

Civil Division Billing Methodology:

Over $29 million of the Civil Division's costs are captured for accounting purposes in a cost allocation pool. From there these costs are billed out to the Division's clients based upon actual attorney and paralegal hours worked on cases times a uniform billing rate. "Clients" are either RSA's with other agencies or the Division's own general fund. Reduction in charges to any RSA or to general funds can happen one of two ways – either the billing rate is reduced (which affects all clients) or fewer hours are billed (which affects only the client being billed to).

Reduce hourly billing rate: First, the hourly billing rate can be reduced by cutting actual costs in the pool. On average, 51% of our professionals' time is billed to the Division's general funds. Every dollar saved in the pool by the direct reduction of costs only equates to 51 cents in savings to general fund cases – the other 49% benefit is passed along to other agencies when time is billed to them. Or stated differently, to reduce billings to the Division's general funds by $1 a total of $1.96 in costs must be cut from the pool. This equitable sharing of costs across all matters the attorneys work on makes the exercise of finding general fund specific savings extra burdensome for the department.

Reduce the number of hours billed: The second way to reduce charges to the general fund would be to reduce hours worked on matters funded from the Division's general fund. A quarter of the Division's general fund is used to cover work on human services and child protection – areas that do not readily lend themselves to simply not performing the work as a way of reducing the dollars billed. Another 30% of the Division's general funds are spent on oil and gas related matters. Because the nature of this work requires the department to engage expensive outside counsel and continues to be an area of heavy investment by the State, the Division has sought supplementals and increments for the last few years. For all intents and purposes attempts to save money in this area will simply result in a subsequent supplemental.

The remaining 45% of the Division's general fund billings are primarily in the areas of Labor and State Affairs, Opinions and Appeals and Statehood Defense. These billings include matters such as representation of the State in significant civil appellate matters (approximately 100 active cases at any time) before the Alaska Supreme Court, Ninth Circuit and U.S. Supreme Court; legal matters relating to Indian law, native sovereignty, federal subsistence, land into trust, Tongass National Forest, ANSCA, RS 2477, ANILCA access rights; ownership of navigable waters; involvement in ethics, elections, personnel and employment litigation; and advice for the State acting as an employer as well as legal advice when requested by the Offices of the Governor and Lt. Governor.

Lease Expirations:

Our lease in Anchorage is expiring and the Division of General Services has estimated the increase to market rate with the signing of a new lease will result in an additional $1.5 million in rent per year. As a result, in FY 2010 roughly $510,000 in general funds will be required for the Criminal Division as well as $485,000 in additional interagency authority and $505,000 in general funds for the Civil Division. The Civil Division's share will be charged through the pool and is likely to require us to raise our billing rates approximately $2.00/hour.

Our Bethel and Kenai offices are currently functioning seriously below the state's space standards. We are currently investigating the availability of additional space and determining the actual expected increase in costs.

Personnel Services:

HB417: The passage of HB417 was accompanied by a fiscal note that did not include the effect to the Department of Law of dozens of attorneys suddenly receiving pay increments years in advance of when longevity increases would have happened (or as in the case of those at M step resulted in pay increments to those who would other wise have never seen another increase other than COLA). The costs to us in FY2009 alone will be $235,000.

During the FY2007 budget process, the Civil Division's Statehood Defense general funds were cut and replaced with carry forward reappropriated funds. As we stated at the time, we believe the reappropriated funds will cover the reduced general funds through FY2009 but we will need to seek replacement general funds in FY2010.

Federal Funds:

The Criminal Division received two multi-million dollar earmarks in 2004 to fund expanded work in the areas of rural prosecution and domestic violence and sexual assault. These funds expire in FY2009 and FY2010. We are anticipating carry-over funds and are proceeding with requests to extend with the appropriate federal agency but the exact impact to our FY2010 budget is still undetermined.

Karen, we look forward to our meetings with you and the Chief of Staff in August to further discuss these items.

MEMORANDUM

State of Alaska
Department of Military & Veterans Affairs
Division of Administrative Services

TO:	Lena Simmons Budget Analyst Office of Management and Budget	DATE:	August 4, 2008
FROM:	Susan Colligan Director	SUBJECT:	FY09 Cost Savings Plan

The Department of Military and Veterans Affairs has followed Governor Palin's direction during her administration regarding budget expectations. DMVA has met or exceeded the expectations of no O&M Supplemental in SFY08 and a "No Growth" budget for SFY09. At this time we have not been able to identify any additional savings that would not impact the effectiveness of our programs and our mission.

As you know DMVA is responsible for the Army and Air National Guard military force, the State Defense Force, Alaska Military Youth Academy, Homeland Security and Emergency Management, and the Naval Militia, being fully prepared to protect Alaska from any threat, disaster, or emergency at all times. This can only be accomplished with adequate resources of military and civilian personnel and support costs to maintain the necessary infrastructure in preparation and response to any threat, disaster, or emergency. As a department with the responsibility of the military forces for protection, preparedness, and recovery, it is important to ensure that we do not jeopardize our ability to respond to our mission by reducing necessary resources with cost savings measures.

We are willing to look at our budget over time and identify any additional savings that might be available.

We look forward to discussing this information with you. Please contact me at 428-6881 if you have any questions.

MEMORANDUM

State of Alaska
Department of Military & Veterans Affairs
Division of Administrative Services

TO: Lena Simmons
Budget Analyst
Office of Management & Budget

DATE: August 19, 2008

FROM: Susan Colligan
Director

SUBJECT: FY09 Savings Plan

Per your request of August 13, I am providing additional information on how this department has continued to hold the line in the operating budget. As we stated before, the Department of Military and Veterans Affairs has followed Governor Palin's direction during her administration regarding budget expectations.

In FY2008, the department contributed to the Governor's target reduction request by: discontinuing the JROTC program which resulted in a $40.0 general fund reduction; reduced general funds related to publication distribution by $25.0; cost savings of approximately $215.0 in general funds through efficiencies in facility maintenance costs; and deleted a net of nine permanent full-time positions department-wide resulting in a reduction of approximately $233.0 in general funds.

The Department submitted a no new growth FY2009 budget as requested by the Governor. It is our understanding that DMVA was the only department to follow the Governor's direction of no new growth. The department also adhered to the Governor's direction of no position increases in the budget.

Additionally, the department proposed efficiencies through consolidation of Information Technology Services and Procurement. This consolidation will allow for better management and support of these functions across the entire department. Although no specific savings has been identified with these consolidations, efficiencies will allow for maintaining required staffing levels to provide the department-wide support in a more accountable and efficient manner.

Another important thing to consider with DMVA's budget is that while DMVA has not asked for new funding per the Governor's direction, other departments have. As a result the base funding level to find "savings" is much tighter for DMVA than other agencies that have seen increased funding requests under this Administration.

With those points made, DMVA is committed to help the Palin Administration meet the goal of reducing spending, but cannot identify specific dollar savings at this time. However, the department will monitor use of overtime, travel, and contracting costs where possible without impairing its ability to meet its mission and requirements of the Federal/State Cooperative Agreement.

If you have any further questions, please contact me at 428-6881.

ALASKA DEPARTMENT OF NATURAL RESOURCES

Support Services Division

400 Willoughby, Suite 500 PO Box 111010 Juneau, AK 99811-1010

TO: Karen J. Rehfeld, Director
Office of Management and Budget

FROM: Leta Simons, Director
Support Services Division

THRU: Tom Irwin, Commissioner

DATE: July 18, 2008

RE: FY09 General Fund Savings Plan

The Department of Natural Resources has developed a FY2009 savings plan as requested by the Office of Management and Budget in the memo dated June 26, 2008. The targeted savings for DNR is $1.24 million, approximately 1% of our operating budget for FY09.

FY09 SAVINGS PLAN

DNR will realize cost savings for FY09 by restricting transfers from the Personal Services line item, thereby allowing excess funds due to vacancies to lapse rather than be transferred for use in other line items. Savings estimates by component are detailed on the attached spreadsheet. Actual savings may differ from this initial plan. We will monitor the variance between budgeted and actual Personal Services expenditures quarterly, and recommend adjustments as needed.

IMPACT

For all components, the impact will be the same. Funds that were previously available to purchase office furniture and equipment, pay down DNR's leave balance, conduct special events such as the AGIA forum, pay for unexpected buildout and move expenses, purchase software and other technology resources that became available, cover increases in the cost of facilities and commodities, and otherwise cover a variety of unexpected and under-budgeted expenses will not be available in FY09. A tighter budget with reduced margin for error will likely result in an increase in the amount of time spent on budget management and a decrease in time devoted to program management and service delivery.

DNR FY09 Cost Savings Plan
Details by Component

	Component	Line Item	Planned Savings
423	Commissioner's Office	Personal Services	-

STATE OF ALASKA
Department of Public Safety
MEMORANDUM

To: Karen Rehfeld, Director
Office of Management & Budget

Date: February 4, 2009

Telephone: 907-465-5488

From: Dan Spencer, Director
Administrative Services

Subject: FY09 Savings Target

The Department of Public Safety has examined our budget and business practices to consider the means by which we might achieve the Governor's targeted general fund savings of $2,280,000 for this department. Obviously, we will do our best to make efficient use of state resources and where possible we will make processes more efficient, so long as those efficiencies do not come with an unacceptable cost in effectiveness nor cause a significant drop in services we provide unless we have discussed that with the Governor's Office.

So far as it is practical and prudent we may reduce staff assigned to special events, curtail some lower priority enforcement activity, and take other measures that will not significantly reduce services. We will also work to implement technological improvements funded in the FY09 capital budget; this will not provide operating budget savings in FY09, but it will help us provide better service in a cost effective manner. We have already planned measures such as targeted use of airline miles to hold down increasing travel costs for recruiting and training.

However, unless we immediately reduce services significantly, I do not expect the department to lapse this amount of general funds. My assessment of our fiscal situation is that the department will need a multi-million dollar FY09 supplemental appropriation if we intend to continue to provide the same level of services in FY09 as we did in FY08. Our efforts to save money may reduce the amount of supplemental appropriations required, but will not eliminate the need.

As you know, the Governor requested more than $4 million in supplemental appropriations for the department in FY08. The legislature did not fully fund that request and the Alaska State Trooper RDU was forced to reduce services to save more than $900,000 in the last two months of FY08. In recognition of the FY08 supplemental needs, the Governor's amended FY09 budget included an increase of about $3.4 million just to ensure a continuation level of service. That amount was reduced by more than $1.3 million. Additionally, the legislature inadvertently failed to appropriate more than $650,000 for the Anchorage prisoner transportation agreement even though we are providing those services, so that will need to be requested as supplemental funding. And finally, rising inflation for all facets of operations, not just for fuel, will almost certainly drive our cost of operations even higher.

The managers and staff of the department are serious about being good stewards of public funds and accomplishing our mission in a cost effective manner. Unfortunately, we cannot at this time tell you that we have any realistic expectation of lapsing enough general funds to meet the savings goal established for the department.

As always, I would be happy to answer any questions you may have.

State of Alaska

Department of Revenue

Administrative Services Division

SARAH PALIN, GOVERNOR

333 Willoughby Avenue, 11th Floor

P.O. Box 110400

Juneau, Alaska 99811-0405

Phone: (907) 465-2300

Fax: (907) 465-2394

MEMORANDUM

To: Karen Rehfeld
Director
Office of Management & Budget

Date: August 1, 2008

From: Jerry Burnett
Director
Administrative Services Division

Phone: 465-2312

Subject: FY2009 GF Savings Plan

In response to the Governor's request that departments collectively meet a savings target of $20 million general fund for FY2009, the Department of Revenue proposes the following savings plan to meet its target of $390.0.

General funds in the Department of Revenue exist primarily in the Tax Division, which accounts for over 81% of the department's general fund budget. The Treasury Division has about 9%, and the Commissioner's Office and Administrative Services have 1.4% each. The remaining general fund is spread in small amounts amongst minimally funded agencies such as the Long-term Care Ombudsman.

The operating budgets for Treasury, the Commissioner's Office and Administrative Services each contain a mix of funding sources that are based on cost allocation plans and indirect cost recovery. The general fund in these budgets serves to supplement the receipt-based allocation methods that are used, reduces the amount that must be charged back to GF-funded programs, and provides funding for costs that aren't otherwise allocable. For example, Treasury allocates the cost of managing the investments of the state's general fund to the GF in their budget; this cost isn't allocable to other funds being invested by Treasury. With the increase in the state's general fund accounts, Treasury may actually require an increase of GF in their budget in order to maintain proper cost allocation. Removing general funds from these three components is not recommended, due to the effect on other funds and other components cited above.

In order to meet the general fund reduction target, the department must look to the Tax Division. The largest cost in the Tax Division's budget is personal services, which accounts for 78% of its overall funding. Because this division has had high vacancy rates of up to 20% in recent years, much effort has gone into the recruitment and retention of tax auditors and other staff critical to meeting the division's mission of collecting revenues for use by state government. Currently we have managed to reduce the vacancy to near 12% which is the lowest level in several years, but the Tax Division continues to have turnover and it will require aggressive recruitment to maintain that level.

To achieve savings of $390.0, the equivalent of four tax auditor positions would need to be left vacant for one year. This is in addition to the positions which will be held vacant to meet the budgeted vacancy factor of approximately 10%. The actual positions held vacant will be determined by the division based on workload priorities. The division will supplement personal services savings by reducing travel whenever possible.

During the 2008 legislative session the Tax Division requested funding for four audit master positions that were established as part of the ACES legislation passed during the special session in 2007. This request was short-funded by the legislature in the amount of $200.0 with the expressed intent that the Tax Division would be able to ask for supplemental funding in FY2009 if the positions are filled. The Tax Division's general fund increment request to implement ACES was further reduced by an additional $473.2 from the FY2009 Governor's Amended budget. When combined with the $390.0, the division will receive a total general fund reduction in their current year budget of $1,063.2.

To minimize the impact of this reduction on the Tax Division, the Department of Revenue intends to closely review all line items and programs for potential savings as part of the management plan budget exercise and will continue to work with OMB to achieve the Governor's savings goals.

FAX NUMBER: 586-8365

FROM: Leo von Scheben, P.E., L.S., M.B.A.
Commissioner

SUBJECT: FY09 Operating Savings

This is in response to your memo of June 26, 2008, requesting our department savings plan for FY09. Over the years the department has been faced with maintaining services at fairly flat funding levels and staff have implemented many cost efficiencies as a result. For example, DOT&PF has warehouses in Juneau, Anchorage, Fairbanks and Ketchikan that allow the purchase of supplies in quantity at lower prices and then distribute and charge those supplies as they are needed. I am including a list of program efficiencies that are either currently being implemented or plan to be implemented in the future.

Alaska Marine Highways

- Starting Oct. 1, 2008, the Alaska Marine Highway System will commence the use of "Force Account" work. Force account work allows the use of the State's own workforce, when the costs are determined to be less than with a bid contract. A labor-cost comparison indicates that as much as $599.0 could be saved by using vessel engineering staff as opposed to outside manufacturer's labor.
- During the last overhaul of the M/V Aurora, an electronic voyage power management system was installed. This system controls the vessel's power and speed settings to effect fuel consumption savings. With the setting of the departure point, arrival point and time-to-destination, the system controls the engines, via the most efficient means, bringing the vessel to its destination – taking into account all the external forces the vessel may encounter. The Aurora is seeing a fuel savings of over 12% as a result of this computerized control system. This new system cost $250.0 to install through a federal project and is projecting a fuel costs savings of $378.0 this year (based on fuel at $4.00/gallon). AMHS plans to install this system aboard 9 vessels as they rotate through their federal overhaul projects.

Highways and Aviation

- Implementation of "pave and trade" road projects where state owned facilities are improved to local government standards and then turned over to the local governments for ownership and responsibility for maintenance. Such has taken place in Petersburg, Juneau, Wrangell, Haines, Wasilla, Palmer and Anchorage. Estimated annual savings is $109.5.
- Reimbursing employees for use of personal aircraft to reduce commercial travel costs for maintaining outlying rural airports. Estimated annual savings is $8.0.
- Reducing overtime. Estimated annual savings is $500.8.

- Installation of magnetic cards and readers at bulk fuel tanks at maintenance stations to monitor fuel consumption and theft protection. There is no estimate of savings at this time.
- Increased heavy equipment size to accomplish more highway snow/ice removal work, with same labor hours. Estimated annual savings is $300.0.
- Acquired modern, secure/dedicated frequency FM-band radios, both vehicle-mounted and hand-held, to provide much better communication and field execution efficiency with available personnel. Estimated annual savings is $100.0.
- Deployed RWIS (Road Weather Information system) to have remote cameras and thermo-sensors to dispatch crews more timely and efficiently. Estimated annual savings is $25.0.
- Now post all seasonal weight restriction notices on Public Notice website, thus informing many more users without answering phone calls or paying for newspaper notices. Estimated annual savings is $25.0.
- Applying dust control products on roads and airports as well as winter road icing practices has helped us decrease overall maintenance cost by retaining fines, and reducing frequency of surface maintenance. Estimated annual savings has been $400.0.
- Established a statewide training program for Equipment Operators. Adequately training operators provides for efficiencies in work and repair of equipment. This has reduced the cost of preventable accidents by reducing damage to state equipment. We have seen a 40% reduction in equipment damage which is about $150:0 cost savings per year. Savings could also result from less damage to other items such as overhead doors and airport lighting. These can range from $20.0 to $50.0 per incident.
- Installation of LED lights in all traffic signals in the Anchorage District. Estimated annual savings is $350.0.

Facilities

- Participated in the Energy Performance Contract for three of our large energy consuming facilities: Aviation Avenue Building, Department of Public Safety Headquarters, and Anchorage Annex Building. Cost savings are used to pay for upgrades to facilities. Once upgrades are paid for, all savings are available for reallocation or cover rising cost of utilities. Annual savings is $63.5 which covers the cost of the Siemens contract. These improvements include:
    a. Installing new energy efficient lighting
    b. Add motion light sensors
    c. Install Direct Digital Controls for HVAC fans to shut down in the evening
- Reducing heating fuel for remote snow removal equipment buildings. Installation of low temperature "fixed" thermostats at our SREBs. Our contractor maintained airports were using too much fuel relative to contracted work activities. We installed tamper proof thermostats set at 45 degrees in the SREBs. This effort, in conjunction with aggressive control of available funding allowed NR SREB heat to come in on-budget vs. over-budget in prior years. Estimated annual savings is $65.0.
- Installed Variable Frequency Drive Fan motors in the Boney Court Facility saving over $25.0 annually in electric costs.
- Retrofitted lighting at the Anchorage Boney Court Building with new energy efficient T8 lighting saving an average of $3.0 per month or about $36.0 annually in electric costs. Transition to T-8 florescent has improved our electrical efficiency in upgraded buildings by 10% over the past ten years. There is an initiative in progress to retrofit our Tok, Tazlina, and Valdez buildings to even more efficient T-5 technology lamps. Occupancy sensors

reduce lighting costs and have been retrofitted in many of our buildings. All new buildings incorporate them. Northern Region estimated annual savings is $100.0.

- Installed high efficiency boilers in the Department of Public Safety Headquarters, Anchorage Boney Court and Kodiak Griffin facilities saving approximately 20% in gas consumption. Estimated annual savings is $27.2.
- Replaced roofs on Anchorage Building Maintenance Building and on the Ninilchik, Kalsin Bay and Chulitna Maintenance Stations with energy efficient roof systems reducing heating oil consumption by 20% and 15%. Estimated annual savings is $6.5.
- Installed insulated thermo pane windows at the Bethel Combined Facility reducing heating fuel consumption by 10%. Installed insulated thermo pane windows at the Juneau, 7-Mi facility. Estimated annual savings is $1.2.
- There are ongoing energy projects to retrofit many of the older existing facilities with upgraded high efficiency lighting. Estimated savings could be 25% of lighting costs.
- Altered heating and cooling set-points in many facilities to 68 degrees for heating and 72 degrees for cooling. The impact of this measure has not been determined at this time.
- Smart building technology. New construction and some retrofitted buildings have Direct Digital Control systems that improve fuel and electric efficiency while improving the comfort level of occupants. This technology enables remote monitoring and control of the buildings which drastically cuts employee time/travel to them. In addition, system alarms and trending identifies failing components before they fail, reducing overall repair cost. Estimated annual savings is $100.0.
- Alternative schedules for Roving Crew. The 7on/7off schedule reduces "windshield time" and increases productivity. The crew works remote jobs and stays onsite for their shift, eliminating commute time and overall cost. The LOA pays them long term per diem vs. the higher cost short term. This has enabled completion of projects that would otherwise be too costly to consider. Estimated annual savings is $40.0.
- Dispatching personnel by trade. This major organizational change greatly improved efficiency. Previously Facilities personnel were each assigned buildings. Some buildings needed more attention than others which caused inefficiencies. Now personnel are dispatched centrally by trade. If the building needs plumbing work, a plumber is dispatched. If there is an electrical problem, an electrician is sent. The respective district foremen dispatch staff for optimum use of available staff. Estimated annual savings is $30.0.
- Northern Region mandated many of the LTC employees to achieve a Journey level in a second trade. Many jobs can be completed by a single employee as a result. We have been able to defer staffing increases as a result. Estimated annual savings is $160.0.
- Locking fuel tanks. While we have found no lock stops a determined thief, locks installed on our fuel tanks have reduced fuel theft. With the rising fuel cost, this is going to be more of a problem than ever. Estimated annual savings is $50.0.
- Installation of "heat recovery" systems at our diesel generator powered facilities. These systems recover wasted heat from the diesel's cooling system. Instead of using a typical radiator, we route the coolant through a heat exchanger and use it as heat in our buildings. These systems reduce station heating fuel consumption by up to 40% depending on the size of the shop. Estimated annual savings is $200.0.
- Use of thermographic cameras. These cameras allow us to "see" where our heat loss is. We have used camera data to make decisions on door and window replacement, weather stripping, and insulation projects. This is new technology we began using in FY08. No

savings data is available, but it is very obvious it can be a big heating (and cooling) cost saver. Estimated annual savings is $40.0.

- Right tools for the job. To cover all buildings situated throughout Northern Region with only 40 maintenance technicians, having the right tool for the job is critical. Investment in tools has improved job efficiency by reducing necessary manpower and "gofer" trips to rent or buy the proper tool. Estimated annual savings is $60.0.
- Computerized Maintenance Management System. We have implemented a system that streamlines administration of the workforce documentation. Face to face communications are reduced by inputting data remotely that is reviewed and approved by management. The system called the Buildings Interface includes all aspects of building management. Workers check the computer to view assigned jobs, record data including time, parts, materials, actions taken and status. The system maintains a searchable database of completed, in progress, and scheduled work. Workers do not have to wait in line to receive their jobs for the day or week. They know in advance and plan accordingly. Since all workers log on daily, it serves as a bulletin board for group communications. Estimated annual savings is $120.0.
- Conversion to oil fired hydronic heat. All Peger Road complex buildings were built with electric heat. We have converted most buildings to hydronic heat and realized a 15% energy cost savings. With the rising cost of fuel oil however, this savings may be eroded. Estimated annual savings is $100.0.

Measurement Standards and Commercial Vehicle Enforcement (MSCVE)

- Movement of MSCVE to Virtual Servers (VMWare) which will realize a savings of $14.4 in 2009 in server costs alone, and will have additional savings throughout the subsequent years. Virtualization essentially lets one computer do the job of multiple computers by sharing the resources of a single computer across multiple environments. Virtual servers and virtual desktops will allow MSCVE to host multiple operating systems and multiple applications locally and in remote locations, freeing MSCVE from physical and geographical limitations. The Information Services section of Administrative Services Division is looking at this for possible efficiencies in other areas of the department.
- MSCVE purchased a 100/500 gallon prover to be placed in Dutch Harbor this past year. To move the prover to various locations as needed during the testing of fuel meter devices, MSCVE acquired an X-class extended cab pick-up truck. This will allow MSCVE to no longer ship a truck and prover to Dutch Harbor for the annual inspections. This will result in a cost savings of $3.0 or more each subsequent year.
- MSCVE will be moving toward the automation of the load analysis impact on bridge structures for overweight permits. This automation should increase the efficiency of the Commercial Vehicle Customer Service Center in the number of permits issued by 12%. This increase in efficiency will reduce overtime needed to process permits as well as increase the revenue received. It will also eliminate any potential errors of these impact calculations, protecting public infrastructure.
- Measurement Standards is often requested by a company to go to a site for a special inspection or for a re-inspection of devices. The companies agree to pay for all costs associated with the trip using our Device Inspection Request form. In FY08, MSCVE increased RSS by $30.0 and in FY09 an additional $5.0 to offset the expenditure to travel to these locations. Prior to this increase in RSS, these expenditures were funded by GF/GOR and caused a shortfall in the travel budget every year, affecting regularly scheduled trips to inspect devices to assure market place confidence and equitable trade.

Construction

- Eliminated the Construction/M&O Director at a position savings of $153.0.

Transportation Management and Security

- Keep the Integrated Vegetation Management Coordinator position vacant an additional three (3) months ($11.8). Delaying the filling of this position will impact the department's ability to address our longstanding brush control issues and the new challenge of noxious weeds infesting our right of ways.

Contracts and Appeals

- The Engineer/Architect II position will be reclassified to a Procurement Specialist position. Since the Design/Build program is up and going, an engineering position is no longer needed. Anticipated savings is expected to be $32.0.

Administrative Services

- The following vacant positions will be kept open longer resulting in a savings of $41.6: Accountant III, Administrative Clerk III, and Procurement Specialist II.

Program Development

- Keep two more positions vacant resulting in savings of $5.5. Leaving these positions vacant could interfere with meeting Federal requirements set by Federal Highways Administration (FHWA). Our solution is to cross train existing staff to cover the FHWA required duties of the vacant positions.

Statewide Design and Engineering Services

- The Division will not complete as many bridge inspections during FY09 as originally anticipated. Those inspections will be delayed until FY10. This will provide an estimated savings of $20.0.

Department-wide initiatives

- Implemented an electronic procurement system throughout most of the department (still training vessel crew on this program). This is an on-line stock request program that has increased processing efficiencies for purchase and receipt of orders. It has reduced the amount of redundant data entry and has allowed in at least one office to convert a clerical position to an additional procurement position.
- Partially implemented an electronic time sheet program that reduces the amount of data entry and thus errors associated with payroll processing and AKSAS charges to projects.
- Travel is more scrutinized by the regions especially travel that is not specific to a project. Estimated annual savings is $5.5. Mileage is being used where ever possible – the department's most recent mileage balance is 355,000 which is pretty low for the size of this agency.
- Converted computer replacement schedules to 4 years as opposed to 3 years. Estimated annual savings is $60.3.
- Software purchases (i.e., Adobe) are not made for all computers which reduces the number of software licenses in use and renewed each year. Estimated annual savings is $22.8.
- Equipment is being sent in for repair instead of replacement.

- Implement more sharing of copiers, scanners and plotters between the different sections within the regions. Estimated annual savings is $32.0.
- The use of cellular phones by each section is monitored closely and reviewed each year to identify areas where costs can be reduced by eliminating phones and changing calling plans. Estimated annual savings is $4.7.
- Eliminated the agreement with a local courier service to pick up recycling and instead use warehouse staff during their frequent trips between the Juneau offices to deliver recycling to the recycling center. Estimated annual savings is $1.0.

As you can see, we are dedicated to providing state services in as efficient manner as possible. The past several years have shown that DOT&PF has little to no general fund lapse balances. We have also needed supplemental funding to cover the cost increases associated with fuel, utility and contractual services. I expect that we will be seeking supplemental funding again this year for the same reasons. If further costs savings are required of this agency, then service reductions would be necessary. I am hesitant to offer reductions in Marine Highway service, reduced maintenance on roads, airports and public buildings, or elimination of any positions. I would appreciate your feedback on the items we are presenting to you. If I can be of further assistance, please do not hesitate to call.

Office of Management and Budget
Office of the Governor

DATE: January 15, 2009

PHONE: 465-3339

FROM: Leslie Houston, Director
Division of Administrative Services

SUBJECT: FY2009 2nd Quarter General Fund Savings Plans

The falling price of oil is certainly a mixed-blessing. For the Department of Corrections (DOC), this has alleviated our fears as we anticipated a large fuel cost-related supplemental. The 38% surcharges on our foodstuffs has dropped to less than 4%; our shipping costs have dropped; and most of all, our energy costs in all facilities with the exception of Anvil Mountain (Nome) and Yukon-Kuskokwim (Bethel) have dropped and stabilized. Barring the price of oil rising sharply, we believe we are secure with our level of fuel/energy funding for FY2009.

Following is the updated DOC FY2009 2nd Quarter General Fund savings and efficiencies status report:

- ***Savings Plan, $672.4***: Statewide Probation/Parole V&T– we will meet this savings.

- ***Energy Conservation Measures:*** We are resubmitting the DOT Energy Savings Plan and DOC Analysis. This is the same document that was submitted with the 1st Qtr Savings Update. Please let us know if you have questions and we can coordinate a teleconference to include Facilities/Project Manager, Charlie Finch.

- ***Cost Containment Measures***

o **Western States Contracting Alliance (WSCA) Standardized Procurement**: this is a multi-state buying consortium contract facilitated by DGS. The first vendor Waxie was found by the DOC to be unresponsive, and in some cases, charging more for products than competing vendors that are not included in the WSCA contract. The second vendor Coastwide (aka Corporate Express) is no improvement. We have determined WSCA purchasing is not cost effective for all of our facilities. The four institutions located in the Anchorage Bowl may eventually realize savings when DGS can secure a reliable vendor, however, the other eight institutions will no longer attempt to participate in the WSCA purchasing process because the products offered are more costly.

The DOC agreed to be a pilot agency for this contract based on the savings we would gain. To date, we have no measurable savings from this contract. We will continue attempting to participate through the 3rd quarter of FY2009, if no improvements are made we will be seeking alternate forms of procurement that are both reliable and cost-effective.

o **Standardized Menu**: We are on target to implement the standardized menu by February 1, 2009. The savings are unknown, we should be able to evaluate savings by the end of FY2009.

o **Out-of-State Liquidated Damage Recovery, $429.0**: On October 20, 2008, DOC received a check from the out-of-state contract vendor Corrections Corporation of America (CCA) in the amount of $429.0. These funds are being applied to prior fiscal years 2007 and 2008—there is no savings in FY2009.

If you require additional information, please feel free to contact me directly.

State of Alaska, DOT&PF - Energy Performance Contracting
Phase II - DOC Statewide Facilities

Project Goals

A - The primary goal of this program is to reduce energy consumption by investing in high efficiency electrical and mechanical equipment with a highly favorable return on investment (ROI).

B - Our secondary goal was to utilize the savings generated by the high ROI systems, such as lighting, heat reclaim units, etc. and invest those savings in systems with longer payback periods. We specifically looked at systems that were not being funded via our 6-year capital improvement program due to higher priority items (emergency repairs, etc.) displacing them.

C - Our Tertiary goal was to install systems that could reduce the workload on our staff and allow their efforts to be directed on planed maintenance and less on emergency response on antiqueted equipment failures.

MEMORANDUM

State of Alaska
Department of Education
& Early Development

To: Karen J. Rehfeld
Director
Office of Management & Budget

Date: January 15, 2009

Phone: **465-2875**

FAX: **465-3452**

File: OMBQuarterly

From: Mark E. Lewis
Administrative Services Director

Subject: Quarterly Reporting FY2009

The Department of Education & Early Development has reviewed our targeted general fund savings for the second quarter of FY2009.

Savings Plan	Savings Target	January 15 Savings	Comments
Administrative-Information Services contractual line items	$10.0	$5.0	On track to achieve this savings target
School Finance & Facilities personal services vacancy	$16.9	$16.9	On track to achieve this savings target
Student & School Achievement personal services vacancy	$36.5	$36.5	On track to achieve this savings target
Student & School Achievement contractual line items	$100.0	$50.0	On track - IT infrastructure issues may require use of this funding. Other departmental balances will be identified to meet this target.
State Facilities Rent	$60.0	$30.0	Funding identified is tied to occupancy date of the new leased facility and build out requirements. EED is tracking progess.
Library, Archives & Museums	$46.6	$23.3	On track to achieve savings.
Savings Plan Totals	**$270.0**	**$161.7**	

FY 2009 General Fund Savings Quarterly Report
December 31, 2008

Savings Plan	Savings Target	Dec 31 Savings	Savings Amount
Uncollectible GFPR	$34,980	$17,490	On track to achieve this savings target.
In fiscal year 2008 DEC received an appropriation of $606,500 and 4 positions for the purpose of pipeline compliance oversight and North Slope flow line integrity. The department has encountered extreme difficulties in the classification and recruitment of these four positions. One position has been filled with the incumbent to begin in August, however, we don't expect to fill the other 3 positions until later this year. This is a one time savings and will not be available in FY10.	$208,520	$0.00	The return of the GF from the Contaminated Sites component to the Industry Preparedness and Pipeline Operations (IPP) did not occur. Since the vacant positions are in the IPP component the funding source realizing this savings is now Oil/Hazardous Response funding (1052) not GF as originally appropriated. We are continuing to review current spending levels to identify areas in which we may be able to cut back on our GF spending.
This would eliminate $56,000 in travel agent fees annually and one position estimated at $70,500.	$126,500	$0.00	The managed travel process is still in place so no savings have been realized this quarter. Savings not realized this quarter total $50,377.
Current balance of the DEC mileage account would allow approximately 50 tickets to be purchased. This would be allocated to a variety of programs.	$20,000	$2,087	On track to achieve this savings target. Update of mileage use procedure is completed and mileage usage is on the rise.
Savings Plan Totals	**$390,000**	**$19,577**	

Department of Fish and Game
FY09 General Fund Savings Plan
As of December 31, 2008

Savings Plan Item	Division	Savings Target	1st Quarter savings	2nd quarter savings	Cumulative savings	Comment (update)
SE Region - leave positions vacant for 3 months	Comm Fish	41.9	20.0	11.9	31.9	PCN expected to remain vacant for about 7 mm. The target amount may not be met if estimated service step increases of 10.0 are unfunded.
Central Region - leave positions vacant for 3 months	Comm Fish	37.7	37.7	(12.4)	25.3	PCNs have remained vacant for the required 3 mm but the target amount may not be met if estimated service step increases of 12.4 are unfunded.
AYK Region - leave positions vacant for 3 months	Comm Fish	94.5	94.5	(6.7)	87.8	PCNs have remained vacant for the required 3 mm but the target amount may not be met if estimated service step increases of 6.7 are unfunded.
WW Region - leave positions vacant for 3 months	Comm Fish	85.0	85.0	100.0	185.0	PCNs have remained vacant for the required 3 mm. The region has identified additional savings due a cancelled project and the availability of other funding sources.
HQ Fisheries Mgmt - leave positions vacant for 3 months	Comm Fish	284.9	284.9	(100.0)	184.9	While PCNs have remained vacant for the required 3 mm the target amount is not expected to be met due miscellaneous expenditures and if estimated service step increases of 16.6 are unfunded. However, the Westward region has identified additional savings that cover this components savings target.
CF Special Projects - leave positions vacant for 3 months	Comm Fish	100.2	25.0	25.1	50.1	PCNs have remained vacant for the required 3 mm. The region is on track to meet its savings objective.

Department of Fish and Game
FY09 General Fund Savings Plan
As of December 31, 2008

Savings Plan Item	Division	Savings Target	1st Quarter savings	2nd quarter savings	Cumulative savings	Comment (update)
Realize savings due to ongoing recruitment difficulties	Sport Fish	67.9	14.8	15.5	30.3	The target amount may not be met if estimated service step increases of 37.6 are unfunded.
Wildlife Scientist position - hold vacant for 6 months.	Wildlife Cons	60.0	30.4	29.6	60.0	Held vacant for 6 months. On-Target
Division vacancies - hold open for an additional month	Wildlife Cons	63.5	18.3	33.5	51.8	On-target
Reduction in personal services line	Comm office	13.4	4.0	-	4.0	Due to unanticipated moving expenses for two newly appointed staff members, the personal services savings from the deputy commissioner position vacancy is no longer available. The 1st quarter GF savings amount is still valid.
Reduction in personal services line	Admin Services	42.2	10.0	-	10.0	The division has had to absorb some unanticipated Information Technology costs. In addition, the target amount may not be met if estimated service step increases of 7.0 are unfunded.
Reduction in printing/lower bid award.	Boards	20.6	20.6	-	20.6	The target has been met. The Boards Support Section was able to procure a new contract for printing for FY09 that was less than last year's costs. This contractual services reduction has allowed for a savings of approximately 20 percent for each legal notice and call for proposals mail out. We are currently working on a multi-year bid for the printing of proposal books.

Department of Fish and Game FY09 General Fund Savings Plan As of December 31, 2008

MEMORANDUM

OFFICE OF MANAGEMENT & BUDGET

JAN 0 8 2009

DATE: December 30, 2008

TO: Karen Rehfeld
Director
Office of Management and Budget

FROM: Alison M. Elgee
Assistant Commissioner

SUBJECT: FY2009 General Fund Savings Plan

In response to the Governor's FY2009 General Fund Savings Plan, the Department of Health and Social Services fully restricted the $4.7 million general funds allotted as its share. The restrictions will remain in place throughout the year and the impacted entities are monitoring their expenditures to ensure the general funds will not be needed.

MEMORANDUM

State of Alaska
Department of Law
Division of Administrative Services
Phone (907) 465-3672 Fax (907) 465-5419

To: Mike Crabb, Budget Analyst
Office of Management & Budget
Office of the Governor

Date: January 15, 2009

Telephone: 465-3673

From: Dave Blaisdell, Director
Administrative Services Division
Department of Law

Subject: 2nd Quarterly Report
FY2009 Savings Plan

As requested, this memorandum is intended to report on the Department of Law's progress during the second quarter of FY2009 toward meeting the Savings Plan goal of $1,030,000 set out in Attorney General Colberg's July 31, 2008 memo to Karen Rehfeld.

Savings Plan	Savings Target	Dec 31 Savings	Comments
Move $200K in unused SDPR to offset GF expenditures on consumer protection matters.	$200.0	$0.0	Savings will not be realized until final quarter of FY09 when these adjustments are customarily made.
Lapse majority of $500K Curyung Supplemental.	$475.0	$245.2	Expenditures against this approp have totaled only $4,830 through the second quarter. Savings goal appears to be on target.
Fund Barrow VW Paralegal from federal earmark.	$106.2	$34.9	Position was not filled until mid-August and vacated in mid-November. It is currently only 50% allocated to federal earmark funds. If filled in January savings may only reach $58K
Delay filling new OSPA attorney and LOM until after first quarter.	$75.0	$75.0	Savings target fully achieved.
Fairbanks DA office lease reduction after November 2008.	$78.0	$78.0	Savings target fully achieved.
Slow PC hardware replacement cycle.	$95.8	$0.0	Savings will not be realized until final quarter of FY09 when these purchases are customarily made.
Savings Plan Totals:	**$1,030.0**	**$433.1**	

As with last quarter, although the total savings through December may not appear at first glance to be "on-target" I would note that for several of the items originally listed the actual savings were not anticipated until specific payments or adjustments were made. In two cases those payments or adjustments would not customarily occur until the last quarter of the fiscal year. In the case of the Barrow victim/witness paralegal it was previously reported that we could not fund the position 100%

from the federal earmark funds originally cited; however, the position has been vacant for three of the last six months so some additional savings have been realized through vacancy as well as federal funding.

If you have any questions or would like to discuss any of these matters in greater detail, please don't hesitate to call.

MEMORANDUM

State of Alaska
Department of Military & Veterans Affairs
Division of Administrative Services

TO: Lena Simmons
Budget Analyst
Office of Management and Budget

DATE: January 15, 2009

FROM: Susan Colligan
Director

SUBJECT: FY09 Cost Savings
Second Quarter Update

I am responding to OMB's request for a second quarter update on FY09 cost savings for the Department of Military and Veterans' Affairs.

As you know in August 2008 DMVA provided you with information on how the department has continued to hold the line on the operating budget. In addition to holding the line on the budget, DMVA submitted cost savings in FY08 (budget reductions) and consolidated department core services to achieve efficiencies.

In the Governor's FY10 budget, the department has again, held the line on the budget with no major changes to the base funding level. As a result of the recent budget reductions and holding the line on the budget, the base funding level to find "savings" is much tighter for DMVA than other agencies that have seen increased funding requests under this Administration.

The department is continuing to monitor overtime, travel (we have been using up unused tickets and will be using mileage as a means to reduce costs), and contracting costs but at this time cannot identify specific dollar savings due to the loss in buying power of our base budget to maintain services without impairing our ability to meet our mission and the requirements of the Federal/State Cooperative Agreement.

If you have any further questions, please contact me at 428-6881.

			1,240,000	666,945	903,400

1st quarter notes

DNR will restrict the Personal Services line items in the above components for a total realized cost savings of $666,945 as of 9/30/2008. This amount represents a little more than half of the FY09 cost savings goal amount of $1.24 million for our agency. Since payroll adjustments are not made quarterly, subsequent adjustments may cause a change in the amount or the source. However, we do expect to meet the target goal by the end of the fiscal year.component

2nd quarter notes

DNR will restrict transfers from Personal Services line items in the above components for a total realized cost savings of $903,400 as of 12/31/2008. This amount represents 75% of the FY09 cost savings goal amount of $1.24 million for our agency. We expect to meet the target goal by the end of the fiscal year.

Administrative Services Division

Phone: 465-2312

Subject: FY2009 GF Savings Plan
Second Quarter Report

In response to the Governor's request that departments collectively meet a savings target of $20 million general fund forFY2009, the Department of Revenue proposed holding three positions vacant in the Tax Division to meet its savings plan target of ($390.0).

During the first quarter of FY2009, unexpected vacancies and delays in filling newly created positions resulted in sufficient savings in the personal services line to allow the Tax Division to fill these positions for the balance of FY2009 and still meet the target. The $390.0 GF has been restricted in the personal services line of the Tax Division budget.

Savings Plan	Savings Target	December 31 Savings	Comments
Hold three positions vacant in Tax Division for FY2009	$390.0	$390.0	Savings goal achieved

SUBJECT: 2nd Quarter Report
FY2009 GF Savings

This in response to your October 27, 2008 memo requesting the status of achieving cost savings this year. The following is the information you requested for DOT&PF:

Savings Plan	Savings Target	December 31 Savings	Comments
AMHS use of force account	599.0	-	Authorization restricted. Savings should begin during 3rd quarter.
AMHS - fuel management system	378.0	189.0	Authorization restricted. On track to achieve savings target.
MSCVE - virtual servers	14.4	14.4	Authorization restricted. Savings has already been realized for FY09.
MSCVE - prover transport	3.0	3.0	Authorization restricted. Savings has already been realized for FY09.
MSCVE-automation of load analysis	7.7	3.0	Authorization restricted. Overtime reduction has been reflected in FY09 Mgmt Plan. On track to achieve savings target.
MSCVE-travel for re-inspection services (third-party billing)	5.0	2.9	Authorization restricted. Billing for special inspections directly to customer. On track to achieve savings target.
TM&S - Integrated Vegetation	11.8	11.8	Authorization restricted. Position held vacant.
Contracts & Appeals - reclass	32.0	32.0	Authorization restricted. Position held vacant.
Admin Svcs - positions	41.6	22.7	Authorization restricted. Positions held vacant.
Prog Dev -position vacancies	5.5	5.5	Authorization restricted. Positions vacant.

"Providing for the safe movement of people and goods and the delivery of state services."

SD&ES - bridge inspections	20.0	-	Authorization restricted. On track to achieve savings target.
Dept wide - travel	5.5	-	Savings will be realized by year-end.
Dept wide - computer replace	60.3	-	Savings will be realized by year-end.
Dept wide - software purchases	22.8	-	Savings will be realized by year-end.
Dept wide - shared equipment	32.0	-	Savings will be realized by year-end.
Dept wide - cell phones	4.7	-	Savings will be realized by year-end.
Admin Svcs - courier svcs	1.0	-	On target - the contract has been cancelled
Total	1,244.3	284.3	

Please let me know if you require any further information.

December 31, 2008 Savings Target Update

Department	Original Saving Target	Savings as of Dec. 31, 2008	Supplemental Bill Budget Reduction	Comments
Administration	1,100.0	607.6	1,100.0	Savings target is a challenge.
Commerce, Community, and Economic Dev.	80.0	78.0	80.0	On track to meet target.
Corrections	3,910.0	672.4	750.0	Original savings target reduced.
Education & Early Development	270.0	2,461.7	2,570.0	On track to meet original target. Increased savings of $2,300.0 comes from the School Performance Incentive Program
Environmental Conservation	390.0	19.6	390.0	Savings target is a challenge.
Fish & Game	1,000.0	761.8	1,000.0	More or less on track to meet target.
Governor	440.0	465.0	465.0	On track to meet target.
Health & Social Services	4,760.0	2,380.0	4,760.0	On track to meet target.
Labor & Workforce Development	330.0	209.7	330.0	On track to meet target.
Law	1,030.0	433.1	980.0	More or less on track to meet target.
Military & Veterans Affairs	160.0	0.0	0.0	Held harmless from savings target.
Natural Resources	1,240.0	903.4	1,240.0	On track to meet target.
Public Safety	2,280.0	0.0	0.0	Held harmless from savings target.
Revenue	390.0	390.0	390.0	Savings target has been achieved.
Transportation	3,220.0	284.3	1,500.0	Original savings target reduced.
Debt		2,015.8	2015.8	Savings due to reduced school debt reimbursement need.
	20,600.0	**11,682.4**	**17,570.8**

The Honorable Bill Stoltze
Co-Chair, House Finance Committee
Alaska State Legislature
State Capitol, Room 515
Juneau, AK 99801-1182

Dear Finance Committee Co-Chairs:

The executive branch hiring freeze was instituted by the Governor on January 23 as a management tool to help save funds, particularly general funds, in FY2009 given our new fiscal realities. We did not mandate a specific dollar amount to achieve through the hiring freeze, but asked departments to critically look at their staffing needs and if possible, delay hiring by some period of time without negatively impacting services to the public. Any general fund savings realized by the hiring freeze will ultimately reduce the amount of the FY2009 draw from the Constitutional Budget Reserve (CBR) as proposed in the supplemental bill. Any savings from a non-general fund funding source that is subject to the year-end sweep into the CBR will increase the CBR balance.

I have enclosed the following hiring freeze information:

- January 23, 2009, memorandum establishing the hiring freeze and listing exemptions to the hiring freeze;
- February 6, 2009, memorandum adding clarification of exemptions to the hiring freeze; and
- the listing of waiver requests received as of this date and the disposition of them

printed on recycled paper

I also want to share with you our estimates of the number of permanent full-time positions (PFTs) potentially affected by the hiring freeze. As of December 31, 2008, there were nearly 1,500 vacant budgeted PFTs, of which 844 had general funds (GF) in their funding mix. The GF cost for the remainder of the fiscal year for those 844 vacant PFTs is approximately $25.5 million. As you know, agencies generally do not receive 100% funding of their personal services costs as there is a presumption of some vacancy during the fiscal year.

We know that some of these positions will remain vacant in order to achieve the budgeted vacancy factor and also efforts to achieve additional savings in FY2009 by managing position vacancy. Our initial $12 million estimate of potential savings was based on approximately one-half of the GF cost for the remainder of the fiscal year. We know there will be waivers requested and granted, so we do not expect to achieve that level of savings.

The hiring freeze explicitly exempts several types of positions, including public safety and 24 hour institutions. Any savings achieved will increase in the GF lapse at the end of the fiscal year which will reduce the amount of the draw on reserves to balance the budget.

Sincerely,

Karen J. Rehfeld
Director

Chief of Staff

Subject: Purchasing Restriction and Hiring Freeze

In her State of the State speech before a joint session of the Alaska Legislature last night, Governor Palin described the period of financial uncertainty due to current oil prices. As you may recall, last spring when the FY2009 budget was finalized, we expected the price of a barrel of oil to average $83.04 during this fiscal year. The price is currently hovering in the $30 - $40 range and is having a significant impact on our state revenues. In light of this, we need to take prudent management actions.

The Governor announced the immediate implementation of a non-essential purchasing restriction and a hiring freeze to reduce the impact on state general funds. Each Commissioner will determine what items are non-essential, but would likely include conference travel, administrative travel, subscriptions, supply or equipment purchases that could be delayed until FY2010, etc. The hiring freeze applies to all positions, except for those that are necessary to protect the health and safety of Alaskans. Departments may request a waiver from the hiring freeze due to extraordinary circumstances. That process is outlined below.

The hiring freeze applies to:

- All full-time, part-time, non-permanent and seasonal positions in bargaining units and in the partially-exempt and exempt service paid for by general funds and other state funds.
- Requests to establish new non-permanent positions.
- Requests to extend non-permanent positions.
- Positions that provide administrative support and maintenance in 24-hour facilities.
- Positions partially funded by federal funds.

The hiring freeze does not apply to:

- Positions essential to protect Alaska citizens. This includes Alaska State Troopers, corrections and probation officers, airport police and fire officers, airport screening officers, and employees that provide patient and resident services and food service at 24-hour institutions. The following are considered 24-hour institutions:
  - Correctional Facilities
  - Juvenile Justice Facilities
  - Alaska Military Youth Academy
  - Pioneer Homes
  - Alaska Psychiatric Institute
  - AVTEC
  - Mt. Edgecumbe High School
- Positions for which an offer of employment was made prior to January 23, 2009.
- Lateral transfers and promotions within the same department.
- Range changes in flexibly-ranged positions.
- Reclassifications within the same job family.
- Employees delegated the authority to perform the duties of a vacant position that is assigned a higher pay range if bargaining unit provisions or regulations provide for compensation.
- The use of on-call non-permanent employees if only used to perform work essential to protect the public's safety or meet other essential state responsibilities.
- Positions fully funded by federal funds. The Division of Personnel must be sent funding verification from the Commissioner of the requesting department for any new job posting for a position that is 100% federally funded.
- Alaska Aerospace Development Corporation,
- Alaska Commission on Postsecondary Education,
- Alaska Housing Finance Corporation,
- Alaska Industrial Development and Export Authority,
- Alaska Oil and Gas Conservation Commission,
- Commercial Fisheries Entry Commission
- Permanent Fund Corporation, and
- Regulatory Commission of Alaska.

Recruitments currently on Workplace Alaska will be open through the stated closing date. However, a notice to all applicants will be posted on Workplace Alaska advising applicants of the hiring freeze and stating that only positions necessary to protect the health and safety of Alaskans and to meet other essential state responsibilities will be filled. A currently posted recruitment will not be extended unless a waiver has been approved.

Positions providing direct patient or resident services (including food services) or that are essential in protecting Alaska citizens, but not employed in a 24-hour institution or in one of the exempt job classifications listed above IS subject to the hiring freeze, but a waiver may be requested.

If a department believes filling a position is necessary to protect the public's safety or meet other essential state responsibilities, a request for waiver from the freeze must be submitted to OMB. The waiver request must be submitted in a memorandum addressed to the Chief of Staff and approved by the department's Commissioner. The memorandum must include the following information:

- position title, range, ADN, annual personal services cost, and fund source (if CIP Receipts, identify the source of the CIP Receipts);
- the essential results that the person will be responsible for delivering;
- the extraordinary circumstances that contribute to why a waiver should be approved; and
- how long the position has been vacant.

When a waiver is approved, the department is responsible for providing a copy of it to their HR Manager in the Division of Personnel.

On behalf of the Governor, please accept her thanks for your cooperation in meeting this challenge.

Subject: Hiring Freeze
Update

In response to questions that have been asked about hiring freeze applicability, I want to clarify that the following positions are also exempt from the hiring freeze:

- Recall seasonal positions.
- Student, college, and graduate interns.
- New hires into seasonal positions for the Department of Fish and Game, Department of Natural Resources, and the Department of Transportation and Public Facilities.
- On-call and temporary substitute positions.
- EVOS Trustee Council.

1/27/09 OVERVIEW: ALASKA MENTAL HEALTH TRUST AUTHORITY

<target><bill></bill><subject>1-27-09 OVERVIEW ALASKA MENTAL HEALTH TRUST AUTHORITY</subject><comm>HFIN26</comm></target>

The Alaska Mental Health Trust Authority

The Alaska Statewide Suicide Prevention Council is one of several boards/commissions that represent beneficiaries of the Alaska Mental Health Trust Authority (The Trust). Trust beneficiaries include people with mental illness, people with developmental disabilities, people with chronic alcoholism, and people with Alzheimer's disease and related disorders.

Prior to statehood, there were limited services available in the Territory of Alaska for individuals who experienced mental illness or developmental disabilities. Instead, these individuals were sent by the federal government to live in an institution in Oregon. During Alaska's transition to a state, Congress passed the Alaska Mental Health Enabling Act of 1956 to help bring these individuals home. This act transferred the responsibility for providing mental health services from the federal government to the Territory of Alaska and ultimately the State of Alaska, by creating the Alaska Mental Health Trust. To fund The Trust, the state selected one million prime acres of land that would be managed to generate income that would pay for a comprehensive integrated mental health program.

Though the state legislature held a fiduciary responsibility to mange the land on behalf of Alaskans with disabilities, it did not do so. Instead, by 1982, only about 35 percent of the land remained in state ownership. The majority of the land had been transferred to individuals or municipalities, or designated by the legislature as forests, parks or wildlife areas.

In 1982, Vern Weiss filed a lawsuit on behalf of his son, who required mental health services that were not available in Alaska. Other beneficiary groups joined *Weiss v State of Alaska* in a class action suit. The case was ruled on in 1984 by the State Supreme Court, which ordered that the original trust be restored. Ten years later, in 1994, a final settlement reconstructed The Trust with 500,000 acres of original Trust land, 500,000 acres of replacement land and $200 million.

The settlement established an independent Board of Trustees who are appointed by the governor and confirmed by the legislature for five-year, staggered terms. The Trustees are responsible for oversight of The Trust's investments and land and non-cash assets. The investments are managed by the Alaska Permanent Fund Corporation, and the land and non-cash assets are managed under a contract with the Trust Land Office, a separate unit within the Alaska Department of Natural Resources.

The Trust works with the Alaska Department of Health and Social Services to coordinate planning for a comprehensive mental health program, makes recommendations to fund the program and advocates for funding and policies that support the systems serving Trust beneficiaries.

Alaska Statewide Suicide Prevention Council

[Alaska Statute 44.29.300-390]

The Statewide Suicide Prevention Council is the state planning and coordinating agency for issues surrounding suicide and suicide prevention. The powers, duties and responsibilities of the Council are to act in the advisory capacity to the Governor and the legislature with respect to what actions can and should be taken to:

- ✓ Improve health and wellness throughout the state by reducing suicide and its effect on individuals, families, and communities;
- ✓ Broaden the public's awareness of suicide and the risk factors related to suicide;
- ✓ Enhance suicide prevention services and programs throughout the state;
- ✓ Develop healthy communities through comprehensive, collaborative, community-based approaches;
- ✓ Develop and implement a statewide suicide prevention plan; and
- ✓ Strengthen existing and build new partnerships between public and private entities that will advance suicide prevention efforts in the state.

Our beneficiaries are families, friends, and neighbors –

They are Alaskans in our schools, churches and workplaces. They deserve the quality of care and level of service that will allow them to live as independently as possible. Healthy people are Alaska's most important natural resource.

Services make a difference –

An individual who receives appropriate services can live a fuller, more dignified life. We have made great strides in understanding the challenges facing Trust beneficiaries and how to better help them. Adequate services allow beneficiaries to become more self-sufficient, improving the quality of life for them, their families and communities.

Investment produces dividends –

Wisely investing resources today in early intervention and prevention helps people build healthy lives and decreases the prospect of more costly services in the future. Individuals, families, communities, and the state reap the dividends.

What are some major challenges?

Funding for prevention and treatment has not kept pace with community need. Increasing reliance on Medicaid funds to be eligible for treatment excludes all but the very needy. Reaching out to families, returning veterans, older Alaskans, and others with moderate needs is critical to decreasing high costs, both financially and in addictions that take more effort to treat.

You KNOW us ...

The Public Health Burden of Brain Injury (prevalence)

5.3 million Brain Injuries

5 million persistent Mental Illness
4 million Alzheimer's
3 million Stroke
2 million Epilepsy
900,000 HIV/AIDS
500,000 Cerebral Palsy
400,000 Spinal Cord Injury

Brain injury prevalence is higher than most other disabilities.

Research shows outcomes after brain injury improve with quality TBI services at the right time.

The Financial Burden of Brain Injury

- Cost of care for a severe TBI survivor can range from $600,000 and $1,875,000.
- Direct medical costs and indirect costs of TBI such as lost productivity totaled an estimated $60 billion in the United States in 2000. *(Centers for Disease Control and Prevention)*
- Every dollar used for brain injury rehabilitation saves up to $35 in future medical costs. (Rhode Island Brain Injury Association)

Prevention is the <u>only</u> cure for Brain Injury

- The three leading causes of brain injury in Alaska are:
  1) falls 2) motor vehicles crashes and 3) assaults
  (ATV and Snowmachine accidents combined are a close fourth)
- One-third of all TBIs recorded in the Alaska Trauma Registry were alcohol related.
- The use of safety belts is the single most effective measure to prevent traumatic brain injuries.
- Using a helmet increases your chance of surviving a motorcycle crash by 37 percent. (*National Highway Traffic Safety Administration)*
- Bicycle helmets are 85-88 percent effective in mitigating head and brain injuries. Every dollar spent on a bike helmet saves $40 in direct medical costs and other costs to society. *(National Highway Traffic Safety Administration)*
- 14-20 percent of returning service members return from Iraq and Afghanistan with a TBI. Elmendorf Hospital recognizes the need for a Mild TBI clinic in Alaska. In the past year, 1400 soldiers have visited the local mild TBI clinic. *(KTUU News, 8/27/08)*

Traumatic Brain Injury is a beneficiary group in the Alaska Mental Health Trust Authority "You Know Me" Anti-Stigma and Treatment Works Campaign.

alaska brain injury network

Every 15 seconds someone sustains a traumatic brain injury (TBI) in the U.S.

Thirty years ago, only half of all people with brain injury survived; now 78% survive. This means that many individuals now live with significant disability requiring a full range of services.

Every year the Alaska Department of Health & Social Services reports about 800 traumatic brain injury (TBI) cases resulting in hospitalization or fatality. There is an estimated 3000 emergency department visits. The TBI rate in rural Alaska is one of the highest in the nation.

It is estimated that at least 10,000 Alaskans are living with brain injury today. This number accumulates each year. Brain Injury can be a life-long disability.

The goal for every brain injury survivor is the best possible recovery for a fulfilling and productive life. Achieving that goal requires full range of services close to home.

The Alaska Brain Injury Network, Inc. (ABIN) is a non-profit organization dedicated to Alaskans whose lives have been changed by brain injury.

ABIN's Board of Directors represent all regions of Alaska and the extended brain injury community – survivors, family members, service providers, health educators, researchers and those who write laws and policy.

ABIN works with Department of Health and Social Services, the Alaska Mental Health Trust Authority, and partner boards to advocate for policy changes, programs, and facilities to better serve Alaskans with disability due to brain injury.

ABIN connects survivors and family members with others. Please contact us to learn about brain injury programs in your region.

What you can do...

- **Support FY10 TBI Budget items:**

  "Care Coordination with specialty in brain injury"

  Department of Health and Social Services,
  Senior and Disability Services

  $50.0 (General Fund/Mental Health)
  Matching funds $150.0 MHTAAR
  Visit www.alaskabraininjury.net to learn more.

- **Be aware of the fiscal and social burden of brain injury to the state**
- **Recognize emerging populations i.e. military and the elderly.**
- **Join Alaska Brain Matters online forum to meet and learn from Alaskans who have been affected by TBI.**

10 Year TBI State Plan Priorities

Visit www.alaskabraininjury.net to read the full report

Brain Injury Waiver – Develop TBI Waiver and/or improve the current Medicaid waiver system to accommodate the services needed by brain injury survivors: neuropsychological assessment; cognitive and functional therapy; case management; counseling, home modifications; transportation; and respite care.

In-state rehab facility – many Alaskans are left in a hospital setting because there is no post-acute rehabilitation option in Alaska. Others are sent out of State. Research shows outcomes improve with quality and timely rehabilitation.

Implement full continuum of TBI Services: I & R, Care Coordination, Acute and Post-Acute Rehab, Educational and related supports, Vocational Training and Rehabilitation, Long-term Care and Community Supports.

Continue TBI System Development: Public Awareness, Prevention and Advocacy; Outreach and Identification; Training and Workforce Development; and Statewide Planning and Coordination.

alaska brain injury network
www.alaskabraininjury.net
3745 Community Park Loop, Ste 140
Anchorage, AK 99508
(907) 274-2824

Alaska Brain Injury Network, Inc. mission is to educate, plan, coordinate, and advocate for a comprehensive service delivery system for Alaskans with traumatic brain injury and their families.

assistance and ongoing support of multiple agency partners, the State Plan was intended to actively guide their work for the next four years, leveraged by the synergy of annual implementation meetings in which partners share ideas and report on their plan-related activities.

In 2006, the ACoA formed the Alaska Aging Advocacy Network (AAAN), a group of about 125 individuals (seniors and senior advocates) with an interest in joining the ACoA in advocating for legislation of particular interest to Alaska seniors. In 2007, the efforts of the AAAN assisted the Commission and other advocates in successfully obtaining a Senior Benefits program and several other bills benefiting seniors.

Each year, the Commission develops a list of advocacy priorities, which it posts on its website. One of the ACoA's top priority issues, a substantial operating budget increment for senior grant services (and an accompanying capital budget item for facility upgrades for senior grant providers), remains the focal point of the Commission's advocacy work in 2008.

Each year, the ACoA holds a series of senior legislative teleconferences during session, giving seniors at host sites across the state the opportunity to learn about and discuss a wide range of bills that may potentially impact them.

In 2007, the Commission and other partner agencies published a Report on the Economic Well-Being of Alaska Seniors, a long-awaited description of the economic status of older Alaskans and the variety of State programs available to them.

The ACoA engages in a variety of public awareness campaigns ranging from an Older Americans Month celebration each May featuring posters carrying messages about healthy aging, to participation in The Trust's "You KNOW Me..." campaign and the recent launching of the Healthy Body, Healthy Brain Campaign aimed at educating seniors and baby boomers about the links between healthy lifestyles (physical activity, healthy eating, socializing, and mental challenges) and a lower risk of developing ADRD.

The Commission's popular website is frequently updated with new features and news stories of interest to older Alaskans.

The Alaska Mental Health Trust Authority

The Alaska Commission on Aging is one of several boards/commissions that represent beneficiaries of the Alaska Mental Health Trust Authority (The Trust). Trust beneficiaries include people with mental illness, those with developmental disabilities, people with chronic alcoholism, and people with Alzheimer's disease and related disorders.

Prior to statehood, there were limited services available in the Territory of Alaska for individuals who experienced mental illness or developmental disabilities. Instead, these individuals were sent by the federal government to live in an institution in Oregon. During Alaska's transition to statehood, Congress passed the Alaska Mental Health Enabling Act of 1956 to help bring these individuals home. This act transferred the responsibility for providing mental health services from the federal government to the Territory of Alaska and ultimately the State of Alaska by creating the Alaska Mental Health Trust. To fund The Trust, the state selected one million prime acres of land that would be managed to generate income that would pay for a comprehensive integrated mental health program.

Though the state legislature held a fiduciary responsibility to manage the land on behalf of Alaskans with disabilities, it did not do so. Instead, by 1982 , only about 35 percent of the land remained in State ownership. The majority of the land had been transferred to individuals or municipalities, or designated by the legislature as forests, parks, or wildlife areas.

In 1982, Vern Weiss filed a lawsuit on behalf of his son, who required mental health services that were not available in Alaska. Other beneficiary groups joined Weiss v. State of Alaska in a class action suit. The case was decided in 1984 by the Alaska Supreme Court, which ordered that the original trust be restored. Ten years later, in 1994, a final settlement reconstructed The Trust with 500,000 acres of original Trust land, 500,000 acres of replacement land, and $200 million.

The settlement established an independent Board of Trustees who are appointed by the governor and confirmed by the legislature for five-year, staggered terms. The Trustees are responsible for oversight of The Trust's investments and land and non-cash assets. The investments are managed by the Alaska Permanent Fund Corporation, and the land and non-cash assets are managed under a contract with the Trust Land Office, a separate unit within the Alaska Department of Natural Resources.

The Trust works with the Alaska Department of Health and Social Services to coordinate planning for a comprehensive mental health program, makes recommendations to fund the program, and advocates for funding and policies that support the systems serving Trust beneficiaries.

The Alaska Commission on Aging

Alaska's Seniors – a Resource and a Responsibility

907-465-3250 www.alaskaaging.org

Alaska's senior population is the second most rapidly growing senior population in the nation. We experienced more than a 100% increase in the 60 and older population from 1990 to 2006, with the number of older Alaskans now growing by over five percent per year. By 2030, seniors age 60 and older will comprise 17% of Alaska's population – the same proportion as Florida's age 65+ population today.

Older Alaskans provide enormous benefits to the state, their communities, and their families. Contributing over $1.5 billion a year to the Alaskan economy (from retirement income and health care payments), seniors comprise one of the state's most basic economic "industries" – and one with many positive features, such as stability; local spending, triggering the economic multiplier effect; support of a diverse job mix year-round; an environmentally benign profile; non-enclave character where spending is distributed throughout the state); and creation of economies of scale in the provision of goods and services, especially in health care.

In addition to their economic assets, older Alaskans also contribute to their communities through high levels of volunteering, and they frequently serve as unpaid caregivers for children, other seniors, and younger adults with disabilities. The leadership and historical knowledge elders provide to our state is priceless and irreplaceable.

As the number of older Alaskans increases, the network of services for seniors must be strengthened and its capacity significantly expanded. This includes the information and referral resources upon which seniors rely to find the programs and services they need. Most seniors do not use any services – but when the need arises, they wish to have those services available and accessible.

Alaska Commission on Aging

The Alaska Commission on Aging (ACoA), formerly known as the Older Alaskans Commission, has been in existence since 1982. Its mission is to ensure dignity and independence for Alaska's seniors and to assist them, through planning, advocacy, education, and inter-agency coordination, to lead useful and meaningful lives.

What are the major challenges?

Alaska's senior population is expected to more than double by 2030, and the number of those age 85+ (the age group most likely to be affected by Alzheimer's Disease and Related Disorders – ADRD) will more than triple. There are an estimated 5,000 older Alaskans with ADRD today. While 80% of care for individuals with ADRD is provided at home, it is essential for families to be able to rely on an effective support system comprised of government, non-profit agencies, churches, businesses, and volunteers.

According to a 2005 senior survey conducted by the ACoA, financial security was the top concern of older Alaskans, followed closely by accessible, affordable health care. The survey provided an early alert to the growing problem of access to primary care for seniors on Medicare, with more and more physicians declining to serve patients enrolled in this program (they cite very low reimbursement rates). Other important concerns identified by the survey included the need for appropriate housing, fears of inadequate funding of senior services, a growing demand for senior transportation, and a perception that government and political leaders in Alaska should be more responsive to senior issues.

State- and municipally-funded programs (for example, the Senior Benefits program, the senior municipal property tax exemption, and senior grant services) are an important part of the economic and supportive resources of many senior households. However, they by no means constitute an adequate safety net for seniors. Only about one in five older Alaskans receives Medicaid services. The remaining 80%, often of very modest income, can have great difficulty obtaining the supportive services they may need. Even those with the requisite low income are deemed ineligible for Medicaid waiver services if their primary diagnosis is ADRD. Available funds for senior grant services have increased only marginally over the past decade, while the number of seniors has grown by over five percent per year.

How has the Commission addressed these challenges?

The Alaska Commission on Aging has undertaken a number of activities related to planning, advocacy, public awareness, and inter-agency coordination to address these challenges.

The State Plan for Senior Services, FY 2008 – FY 2011, approved by the U.S. Administration on Aging in June 2007, provides a broad vision of the status and needs of Alaskan seniors and offers an extensive set of goals, objectives and strategies chosen to move this vision forward among the state's aging network and other relevant agencies. Developed with the

systems navigation. This promotes communication between people with disabilities and their policymakers.

- **Education:** Alaska students should have educational experiences that allow them to reach their goals, and achieve their hopes and dreams. We work to ensure students with disabilities succeed at a rate as closely as possible to that of the general population. We also work to ensure that youth graduating from high school are equipped with skills to successfully participate in adult life.

- **Transportation:** We believe everyone should be able to get where they want to go when they want to get there. Only a few Alaska communities have public transportation. In other communities, what transportation that is available is uncoordinated and unnecessarily expensive. We work to improve statewide availability and accessibility of adequate transportation.

- **Health Care**: Everyone should have the opportunity to be healthy and benefit from the full range of needed health care services. As more people receive services, more attention needs to be given to assuring their health and safety. We work to promote the recruiting and retaining of high quality staff; exterminating wait lists; and giving more attention to people with complex needs, as well as those in remote areas of the state.

- **Housing**: We believe Alaskans who experience disabilities should be able to secure accessible, affordable and integrated housing in their communities. We work to increase the availability of accessible housing options for people with disabilities.

- **Self-Determination**: People should have control, choice, and flexibility in the services and supports they receive. We strive to ensure every individual is a valued, participating member of their community by helping them learn how to gain more control over their own supports and services. In this way, they learn and practice skills that enhance their abilities for self-determination.

- **Employment**: It is our goal that every Alaska is able to get and keep employment consistent with his or her interests, abilities, and needs. We work to develop strategies to significantly increase career opportunities for people with disabilities.

The Governor's Council on Disabilities and Special Education is one of several boards/commissions that the Alaska Mental Health Trust Authority (The Trust) represents.

Governor's Council on Disabilities and Special Education

Creating Change That Improves the Lives of People with Disabilities
And Students Receiving Special Education Services

The more than 87,000 children and adults in Alaska with developmental disabilities are as varied as any group of people. They go to school or work; have families and friends; nurture hopes and dreams; fulfill expectations and potential. These individuals and their families, like all of us, want to determine their own lifestyles and be valued, participating members of their communities.

Alaska is a better place than it used to be for people with developmental disabilities. We have more accessible, affordable housing, and better transportation and family support systems. But we also have long waiting lists for available services. And in many communities, services aren't available at all.

Large gaps exist between adults with developmental disabilities and other adults in employment, education, income and other important standards of living. Many public buildings still aren't accessible. Lack of affordable health care is also a major barrier to independent living.

For students with disabilities, getting an appropriate education is challenging. Education issues rank second in the number of complaints with the Disability Law Center. Successful transitions throughout the educational process are inconsistent statewide. Very few Alaskans with developmental disabilities receive any post-secondary education, which limits their employment options and opportunities for career advancement.

Rather than creating separate boards to comply with the requirements of the Developmental Disabilities Assistance and Bill of Rights Act and the Individuals with Disabilities Education Act, the Alaska Legislature established the Governor's Council on Disabilities and Special Education. The Council serves as the:

- State Council on Developmental Disabilities
- Special Education Advisory Panel
- Interagency Coordinating Council on Infants and Toddlers with Disabilities
- Beneficiary Board of the Alaska Mental Health Trust Authority
- Governing Board of the Special Education Service Agency (SESA)

The Council is a 28-member Governor-appointed body made up of people with disabilities, parents, and representatives of principal state agencies and private providers. We use planning, evaluation, capacity building, and advocacy to create change. We analyze trends and study population characteristics. To influence attitudes we conduct public awareness campaigns. We strive to coordinate services through interagency working groups. We develop coalitions to bring about change through legislation and regulation. We also provide information to assist individuals and families to access services and advocate to policymakers on their own behalf.

Our Major Areas of Focus

- **Community Participation**: We seek to make certain people with disabilities have access to fully participate in all aspects of their community by increasing their knowledge regarding consumer rights and responsibilities, self-determination, self-advocacy and

The Alaska Mental Health Board (AMHB) is statutorily charged with assisting in planning and offering oversight and evaluation of Alaska's behavioral health system. AMHB also provides advocacy for Alaskans affected by mental illness. Our vision is for all Alaskans to live healthy, productive lives.

Advocacy priorities

AMHB supports:

- Promoting evidence-based recovery models and treatment services for people with mental illness – including children, veterans and the elderly – in both rural and urban communities and in detention facilities;
- Treating children with emotional disorders at home in their own communities;
- Innovative housing for people with mental illness;
- Defining behavioral health needs of aging Alaska citizens;
- Reducing the stigma associated with mental illness.
- Promoting workforce development for both providers in the behavioral health field and beneficiaries in all fields.

AMHB supports evidence-based services such as tele-psychiatry and on-call emergency service teams to support rural community service needs. Making acute care services available in rural areas promotes quality treatment as close to home as possible while also reducing the costs associated with transporting people in crisis to Anchorage.

Too many Alaskans with serious mental illnesses end up in a corrections facility. The AMHB advocates for effective community-based programs available to serve individuals with serious mental illnesses so that they are less likely to offend, or to re-offend when released into the community.

With the Alaska Mental Health Trust Authority (Trust) and others, we continue to support the need for community-based care for children who experience severe emotional disorders. The Bring the Kids Home initiative has dramatically reduced the number of children in out-of-state treatment — we support maintaining the services to keep our children in Alaska.

We continue to support developing innovative housing for individuals experiencing mental illness, including consumer-run programs.

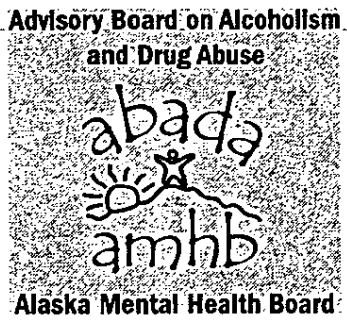
Alaska's senior population is growing rapidly. AMHB is working closely with the Alaska Commission on Aging and other partners to better define the behavioral health needs and resources for this group. Alaska and other states are finding that depression and substance abuse within the senior population are very serious problems that require specialized services.

Some facts about mental health in Alaska

The Division of Juvenile Justice reported that in a one-day count, 40% of the youth in their custody or care have a mental health diagnosis.

According to a one-day snapshot study conducted for the Department of Corrections in 2007, 42% of those in the corrections system experience a mental health disorder. "Among those identified, findings indicate that Trust beneficiaries spend more time in custody than other inmates, are more likely to recidivate post-release, and more than ¼ do not get reconnected with community-based mental health service providers upon release," the study said.

Alaska has the highest percentage of veterans in the nation (17% of all adults). The Veterans Administration reports that one in three veterans returning from Afghanistan and Iraq face behavioral health problems. Post traumatic stress disorders (PTSD), depression, substance abuse and traumatic brain injuries are very real problems for Alaska's veterans. The only four VA Centers are located on the road system, making it difficult for veterans in rural areas to access care. Alaskan veterans with severe mental health problems are sent to the Lower 48 for treatment.



Advisory Board on Alcoholism and Drug Abuse

Prevention & Treatment work! Recovery happens!

In Juneau (907) **465-8920**

The Advisory Board on Alcoholism and Drug Abuse (ABADA) is a statutorily authorized Governor's advisory board charged with assisting in planning and offering oversight of Alaska's behavioral health system. Through our mandate, we work to support a comprehensive, effective and accountable behavioral health system of prevention and treatment of substance abuse for Alaskans. Our members' vision is of all Alaskans living healthy, productive lives. The shared plan to achieve that vision is on our web site at www.hss.state.ak.us/abada.

Advocacy priorities

ABADA supports:

- a comprehensive and effective behavioral health service system;
- effective evidence-based prevention programs that target young people and families to help reduce the tendency and/or predisposition to becoming an alcoholic or addict;
- effective evidence-based treatment programs that work in the community and in detention facilities to guide alcoholics and addicts in changing their thinking and subsequently their behavior as it relates to addiction;
- reducing stigma about substance abuse disorder.

The American Medical Association has determined that addiction is a disease, like diabetes or heart disease. And, like other diseases, recovery from addiction is possible. ABADA supports programs that help individuals with addiction disorders realize their potential in recovery.

Evidence shows that incarcerated individuals with addiction disorders are less likely to reoffend if they receive treatment services while in prison and during the transition back into their communities. Evidence-based treatment programs are proven to decrease recidivism when an individual is treated closer to his/her family and community. ABADA supports partnering with the Alaska Department of Corrections to implement programs for supportive housing, employment and social/emotional skill development during the transition after incarceration.

The social and economic costs of substance abuse are shared by all Alaskans. Public safety, health care and public assistance are all impacted by substance abuse. However, funding for prevention and treatment of behavioral health programs that treat substance abuse has not kept pace with community need.

Some facts about substance abuse in Alaska

In 2003, the total cost of substance dependence in was estimated to be $738 million.*

- $367 million from productivity losses
- $154 million from criminal justice and protective services
- $178 million from health care
- $35 millions from traffic crashes
- $4 million from public assistance

Approximately 17,400 offenses and 1,190 incarcerations were attributed to alcohol and other drug abuse in Alaska's prisons. It is estimated that alcohol and other drug abuse plays a role in 85% to 95% of all incarcerations in the state.*

Alcohol and other drug abuse is a primary contributor to child abuse in Alaska. A 1999 study found that parents were three times more likely to abuse their children and four times more likely to neglect their children if the parents were substance abusers.*

About half of all U.S. fatal traffic crashes are caused by alcohol use. In Alaska in 2002, 32% of the 78 deaths from traffic crashes were attributed to alcohol.*

Alaska Scorecard, December 2008 | www.hss.state.ak.us/dph/healthplanning/scorecard/

Health: Suicide

1. Suicide rate per 100,000. Alaska rate is almost twice the national rate. (2005)[1]

2. Non-fatal suicide attempts per 100,000. Rate of non-fatal attempts requiring hospitalization for at least 24 hours. AK ranks no. 2 in the U.S. (2006)[2]

Health: Substance Abuse

3. Alcohol-induced deaths per 100,000. Includes fatalities from alcoholic psychoses, alcohol dependence syndrome, non-dependent abuse of alcohol, alcohol-induced chronic liver disease and cirrhosis, and alcohol poisoning. (2006)[1]

4. Adults who engage in heavy drinking. Percent of adults who reported heavy drinking in past 30 days (2 or more drinks daily for men and 1 or more daily for women). AK ranks no. 8 in the U.S. (2007)[3]

5. Adults who engage in binge drinking. Percent who reported drinking 5 or more drinks on one occasion in past 30 days. AK ranks no. 6 in the U.S. (2007)[3]

6. Illicit drug users. % population age 12 and older who report using illicit drugs, including marijuana/hashish, cocaine (including crack), heroin, hallucinogens, inhalants, or prescription-type psychotherapeutics used non-medically. Alaska ranks no. 2 in the U.S. (2006)[4]

Health: Mental Health

7. Days of poor mental health in past month (adults). Mean number of reports of poor mental health. (2007)[3]

8. Teens who experienced depression during past year. Percent of high school students who felt so sad or hopeless almost every day for two weeks or more in a row that they stopped doing some usual activities during past 12 months. (2007)[5]

Health: Access

9. Population without health insurance. Percent of Alaskans without health insurance for entire year. (2007)[6]

Safety: Protection

10. Children abused and neglected. Rate of child abuse and neglect per 1,000 children ages 0-17. AK rate is number 6 in U.S. (2006).[7]

11. Injuries to elders due to falls — rate per 100,000. Non-fatal injuries, ages 65+, hospitalized 24 hours or more. (2005)[2]

12. Rate of non-fatal traumatic brain injury per 100,000. Hospitalized 24 hours or more. (2005)[2]

Safety: Justice

13. Percent of incarcerated adults with mental illness or mental disabilities. (2006)[8]

14. Statewide criminal recidivism rates for incarcerated adults with mental illness or mental disabilities. Rate of re-entry into ADOC for a new crime occurring within one year of initial date of discharge. (2006)[8]

15. Percent of arrests involving alcohol or substance abuse. Arrest offenses with Division of AK State Troopers or Wildlife Troopers that were flagged as being related to alcohol and/or drugs. This data does not include municipalities. (2007)[9]

Living with Dignity: Housing

16. Rate of chronic homelessness per 100,000 population. AHFC Point-in-Time Survey. (2007)[10]

Living with Dignity: Education

17. High school graduation rate. Percent graduating public schools with a regular diploma. (2007)[11]

18. Percent of youth who received special education who are employed and/or enrolled in post-secondary education one year after leaving school. (2007)[12]

Economic Security

19. Percent of minimum wage income needed for average 2-bedroom housing in Alaska. "Affordable" housing defined as 30% of one's income. (2007)[13]

20. Average annual unemployment rate. Rate represents the number unemployed as a percent of the labor force. (2007)[14]

21. Percent of SSI recipients with blindness or disabilities who are working. (2007)[15]

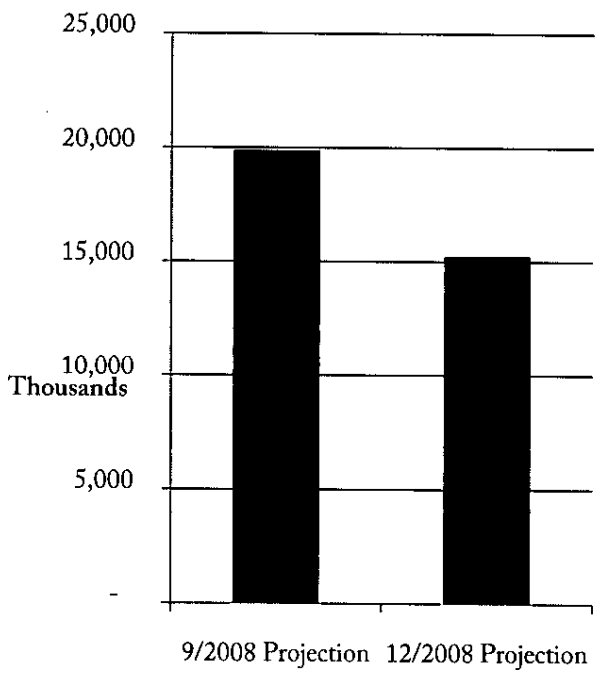
Projected Payout



The Trust
The Alaska Mental Health Trust Authority

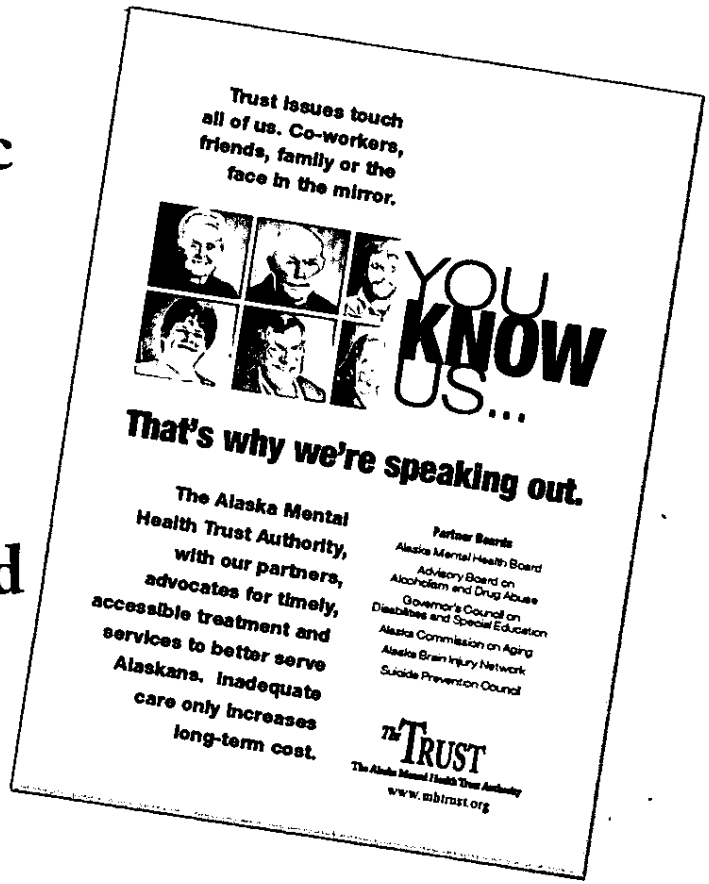
Trust Funding FY2010

Distributable Income	
Trust Fund Payout 4.25%	$15,205,253
Prior Year Lapse	$ 4,049,000
Land Office Income	$ 1,800,000
Interest	$ 800,000
Total Trust Projected	$21,854,253

The Trust
The Alaska Mental Health Trust Authority

Joint FY2010 Legislative Priorities

- Reauthorize adult dental Medicaid services
- Establish regular and periodic schedule of rate reviews for home and community-based services
- Fund 10-year plan to reduce homelessness
- Fund community-coordinated transportation systems



Priorities shared by The Trust and its advisors: Alaska Mental Health Board, Advisory Board on Alcoholism and Drug Abuse, Governor's Council on Disabilities and Special Education, Alaska Commission on Aging

The TRUST
The Alaska Mental Health Trust Authority

Formula for Success

- **Identify a problem or community need**
- **Collaborate with governmental agencies, advisory groups, non profits, service providers, philanthropic organizations and private sector**
- **Develop strategic, sharply focused solutions**
- **Make lasting system improvements for Trust beneficiaries**

committed partners + strategic thinking = results for Trust beneficiaries

The Trust
The Alaska Mental Health Trust Authority

Five Focus Areas

- **Bring the Kids Home**
- **Affordable, Appropriate Housing**
- **Disability Justice**
- **Workforce Development**
- **Beneficiary Projects Initiative**

The Trust
The Alaska Mental Health Trust Authority

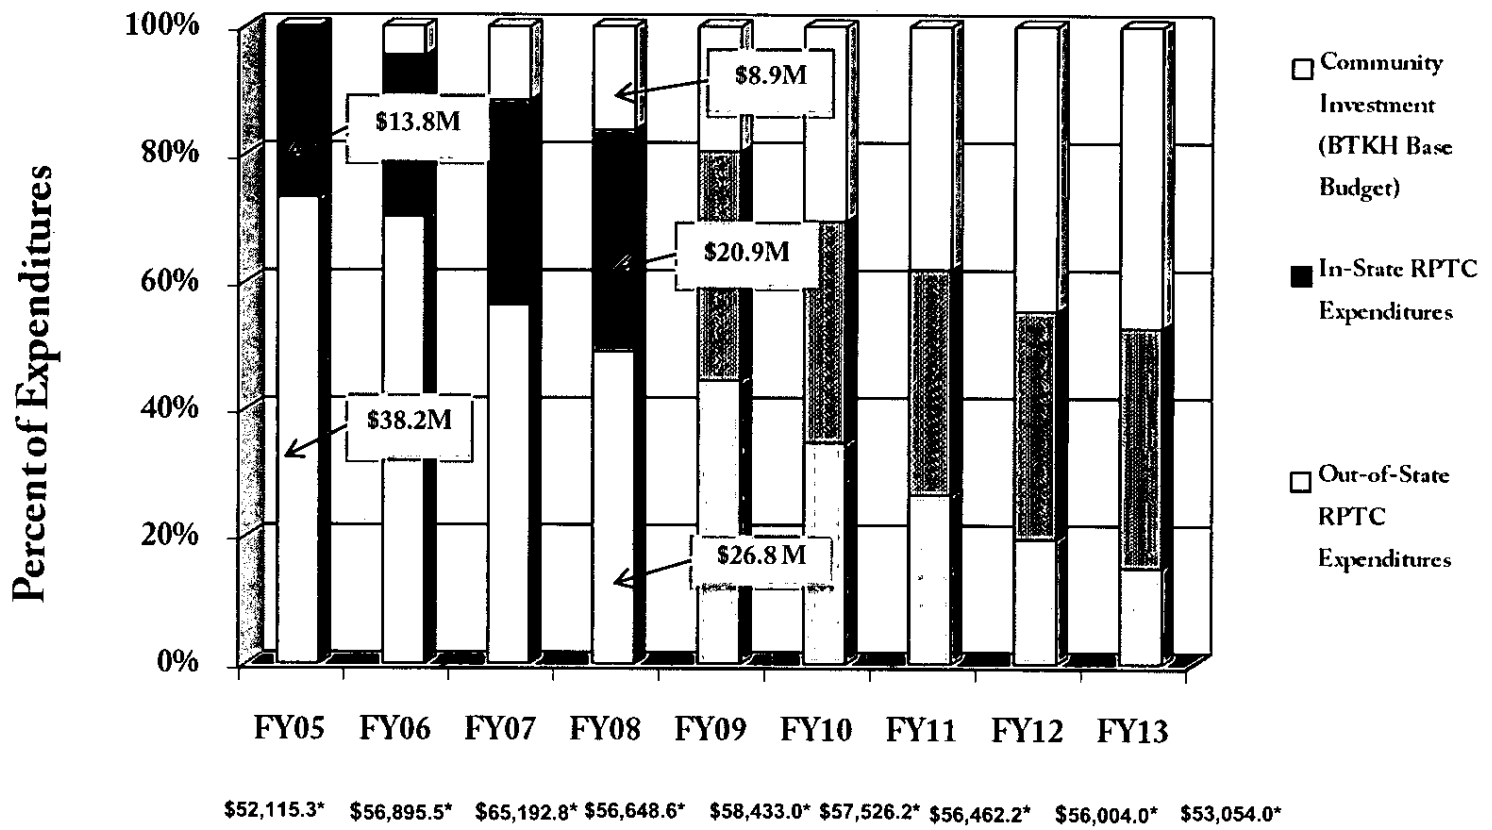
Bring the Kids Home

- **Problem or community need**
  - FY06: a total of 743 Alaskan children with severe emotional disturbances received service in out-of-state residential psychiatric treatment centers
    - separated from families, communities
    - length of stay varies from several months to multiple years
  - FY06: $40 million for out-of-state Medicaid care
- **Committed partners**
  - DHSS, Denali Commission, Trust partner boards, Alaska Native health providers, other service providers, parents, advocacy groups, AHFC
- **Strategic thinking**
  - Each child treated at appropriate level of care as close to home as possible
    - Build appropriate treatment facilities in Alaska
    - Increase capacity/core competence for outpatient services
    - Provide family supports
    - Involve parents and youth in the solutions

The Trust
The Alaska Mental Health Trust Authority

Projected BTKH Reinvestment

FY05-FY08 = Actual Expenditures *FY09 – FY13 = Projected Expenditures*



$52,115.3* $56,895.5* $65,192.8* $56,648.6* $58,433.0* $57,526.2* $56,462.2* $56,004.0* $53,054.0*

** Total per year cost in thousands of dollars*

Data for FY05-07 are from Behavioral Health based on paid claims for Medicaid data. Expenditure data for FY08 are from Finance Management Services and includes all claims incurred and paid in FY08 and claims incurred in FY08 and paid in the first quarter of FY09.

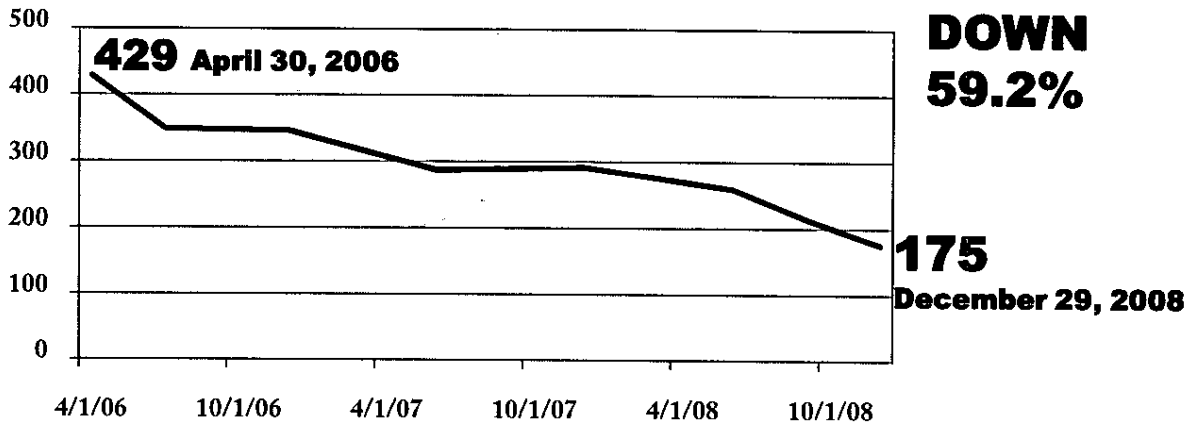
The Alaska Mental Health Trust Authority

Results for Beneficiaries

Youth Out-of-State Census



- Census of youth in out-of-state residential psychiatric treatment facilities DROPPED 59.2% from 429 on 4/30/06 to 175 on 12/29/08
- IN STATE services continue to increase. During FY08:
  - 300+ youth received INDIVIDUALIZED SERVICES
  - 500+ youth received services via new COMMUNITY behavioral health capacity
  - 150+ RESIDENTIAL BEDS were added

The Trust
The Alaska Mental Health Trust Authority

Ahead in FY2010

Transition into BTKH Base Budget:	MHTAAR	GF/MH	Total
• Individualized services		$ 800.0	$ 800.0
• Behavioral Health Technical Assistance	$ 100.0	$ 225.0	$ 325.0
Build capacity within BTKH Base Funding:			
• Community BH capacity development	$ 250.0	$ 2,000.0	$ 2,250.0
• Crisis Bed Stabilization	$ 150.0		$ 150.0
• Tribal/rural system development	$ 400.0	$ 400.0	$ 800.0
• Transitional-aged youth	$ 200.0	$ 300.0	$ 500.0
• Early childhood mental health	$ 255.0	$ 200.0	$ 455.0
• School based services	$ 300.0		$ 300.0
• Foster parent/parent services	$ 75.0		$ 75.0
• Strong family voice	$ 25.0	$ 25.0	$ 50.0
BTKH Capital Funding:			
• Matching for Denali Commission funds		$ 2,316.8	$ 2,316.8

Funding in thousands of dollars

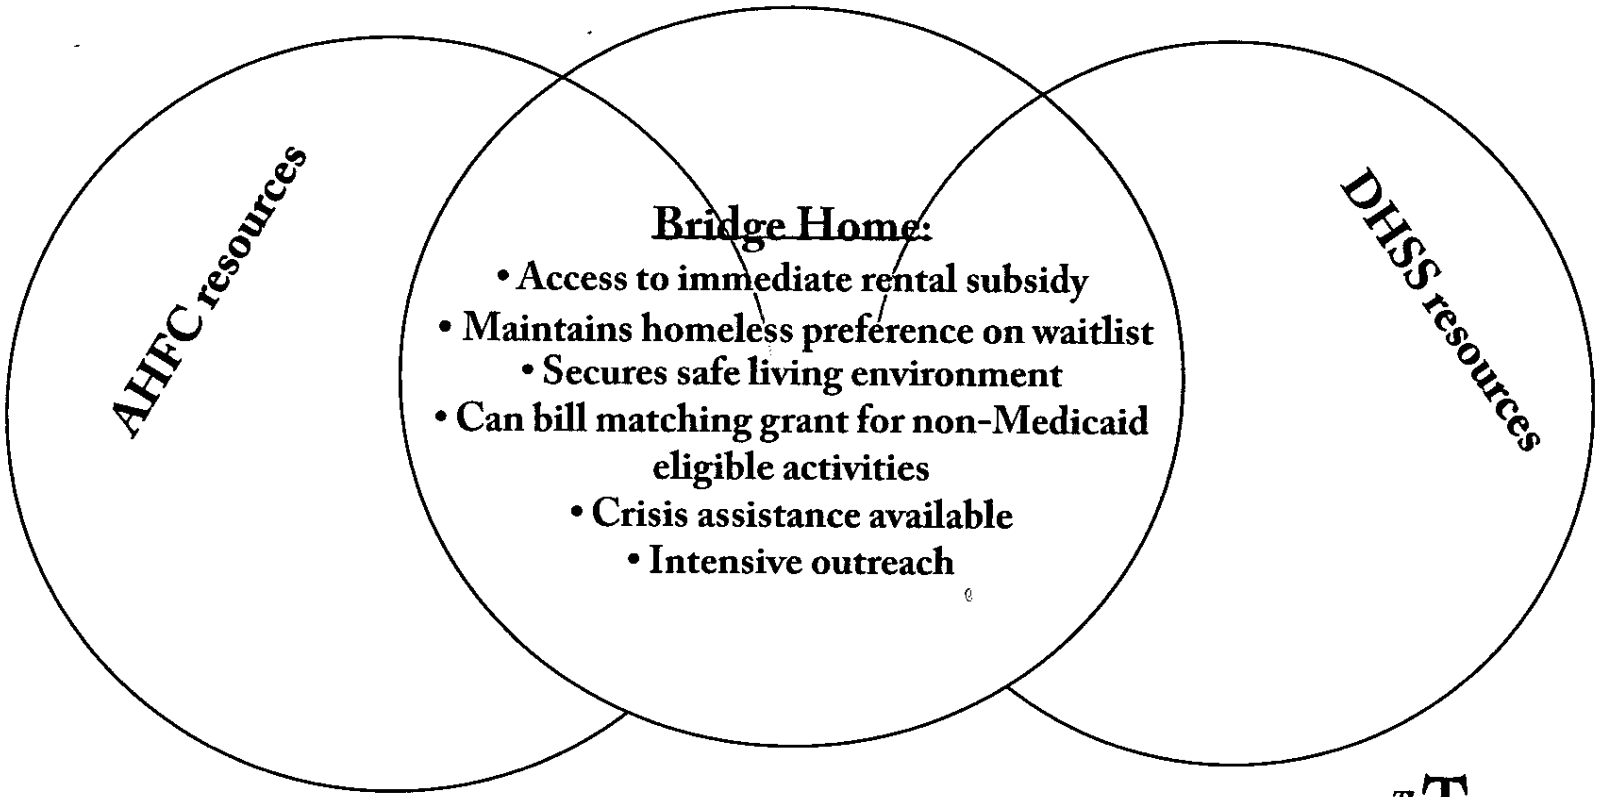
The Trust
The Alaska Mental Health Trust Authority

Affordable, Appropriate Housing

- **Problem or community need**
  - **3,500 Alaskans homeless on any given night**
    - **1,600 are in families with children**
    - **4,000 + and growing are number of people on rental assistance waitlist**
    - **Wait time on the list can be 2 years or longer**
  - **Lack of housing disproportionately affects Trust beneficiaries**
    - **challenges associated with disabling conditions**
    - **lack of opportunities for economic advancement**
    - **need for supportive living situations**
    - **physical accommodations required to meet special needs**
    - **need assistance locating and maintaining independent apartment units**

Bridge Home Pilot Project

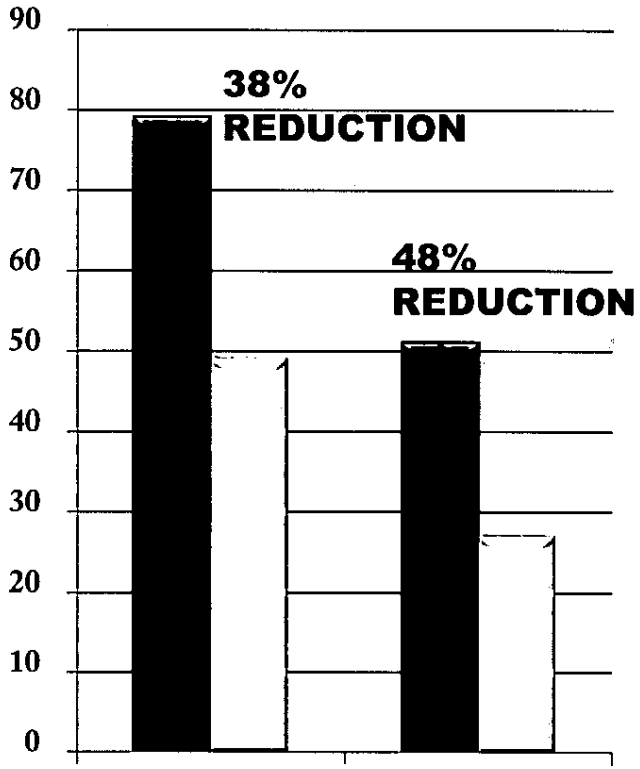
Program replicates housing trust programs Outside by combining resources



The Trust
The Alaska Mental Health Trust Authority

Bridge Home Results

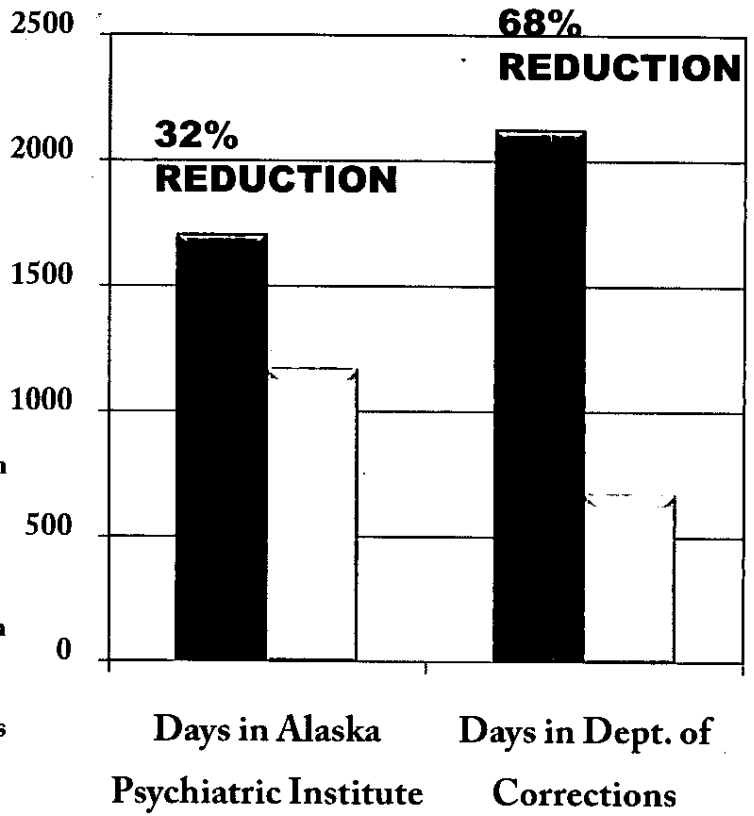
Reductions in institutionalization and incarceration



Prior to Program

During Program

•N = 47 participants



The Trust
The Alaska Mental Health Trust Authority

A Proven Model

- Each $1 spent leverages $7 in other funds
- 600 housing trusts operating in more than 30 states using these components
- Investment in permanent, affordable housing
- Include supportive services and skills training
  - case management
  - access to treatment
  - crisis intervention
  - financial literacy
  - home maintenance/upkeep
  - tenant education and responsibilities
  - job counseling and building work routines
  - transportation
  - money management
  - nutrition
  - life-skills training

The Trust
The Alaska Mental Health Trust Authority

Results for Beneficiaries

- Reduces public funding for other services
  - public safety
  - courts
  - jails
- Promotes strong families and community stability
- Children more successful in school
- Seniors and persons with disabilities can live independently with dignity
- Encourages partnerships between Alaska's social service and business sectors
- Helps keep Alaska's housing construction industry strong

The TRUST
The Alaska Mental Health Trust Authority

Ahead in FY2010

- **Policy - Governor's Council on the Homeless**
  - interagency collaboration
  - creating and overseeing 10-year homeless plan and budget recommendations
  - adapting programs to replicate successful homeless programs
- **Budget - $10 million in Governor's capital budget to begin implementing 10-year plan**
  - The Trust, AHFC, GF/MH and other sources
  - National Housing Trust funds possible in FY2010
- **Projects - Working on implementation of more responsive projects**
  - AHFC grants in FY08 and FY09 Special Needs Grant rounds
  - Trust/DHSS Bridge Home pilot project
  - Trust/Rasmuson Foundation pilot projects - $2 million
  - Office of Public Advocacy intensive needs housing project

Disability Justice

- **Problem or community need**
  - at least 42% of those incarcerated in DOC are Trust beneficiaries
  - incarcerated beneficiaries
    - have more difficulty adjusting to incarceration
    - are more likely to be victimized by other prisoners
    - spend a disproportionate amount of time in custody
  - hundreds of beneficiaries incarcerated for "safety" because services not available
- **Committed partners**
  - Alaska Court System
  - Dept. of Law
  - Dept. of Public Safety
  - Local governments
  - Dept. of Health & Social Services
  - Community treatment providers
  - Dept. of Corrections
  - Public Defender Agency
  - University of Alaska
  - Local law enforcement

Funding in thousands of dollars

The Trust
The Alaska Mental Health Trust Authority

Workforce Development

- Problem or community need
  - shortage of health care workers in Alaska at a near-crisis level
  - health services industry fastest growing sector of Alaska's economy, more than 7% of workforce
  - burgeoning demand for increased health services for the state's steadily growing and aging population, some are Trust beneficiaries
  - need to increase pool of qualified employees in Alaska who serve Trust beneficiaries and keep adequately trained
- Committed partnerships
  - more than 20 partners
    - service providers, Dept. of Health and Social Services, Dept. Labor and Workforce Development, non-profit and faith-based organizations, University of Alaska system
- Strategic thinking
  - key focus areas
    - recruitment,
    - retention
    - training

Results for Beneficiaries

- 990 professionals/providers across Alaska received training and education on behavioral health related topics through the Trust Training Cooperative
- 1,194 providers trained by the Geriatric Education and Training Center on issues regarding Alzheimer's and related disorders
- 1,550 people received behavioral health training through the University of Alaska, a 13% increase in enrollment in beneficiary related degree programs
- 958 professionals across the state received training through the Training and Technical Assistance for Providers program, increasing the number of professionals trained to respond to cases of disability related abuses

The TRUST
The Alaska Mental Health Trust Authority

Ahead in FY2010

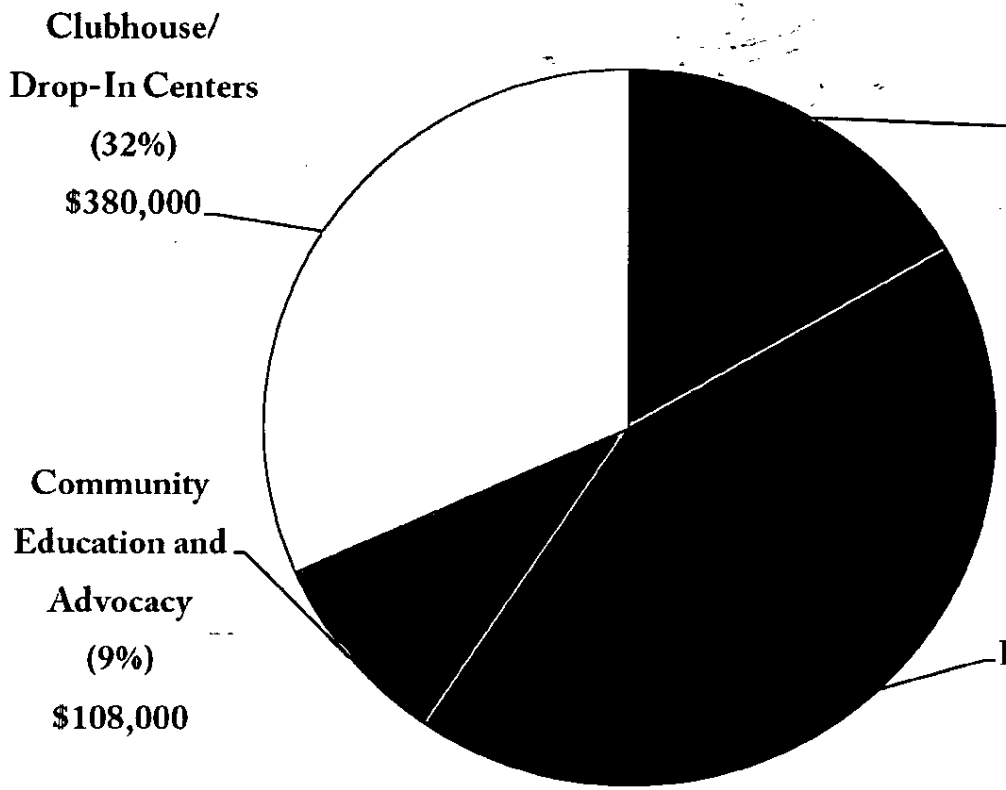
- Support student loan repayment strategies for health professionals
- Support increments for University of Alaska health programs
- Researching a psychiatric residency program in Alaska
- Finalizing plans for a PhD psychologist internship program in Alaska

Trust Beneficiary Projects Initiative

- **Community need:**
  - consumers active in defining and delivering recovery support
  - beneficiaries/families desire consumer-driven services yet need expertise and training
  - peer services, benefit of lower cost, prevention
- **Partners:**
  - 27 beneficiary grantees since 2006
  - Alaska Peer Support Consortium
  - Division of Behavioral Health, Rasmuson Foundation, Division of Vocational Rehabilitation, UAA-Center for Human Development
  - Partner Boards - Advisory Board on Alcohol and Drug Abuse, Alaska Mental Health Board, Governors Council on Disabilities and Special Education
- **Strategic thinking:**
  - Provide funding and technical assistance for beneficiary group projects
    - safe, sustainable and effective
  - Mini grants to improve beneficiaries' quality of life
  - Small projects grants for small, beneficiary-directed projects
    - $250,000 annually

The Trust
The Alaska Mental Health Trust Authority

FY08 Beneficiary Projects Grants



27 grantees serving
- people with mental illness
- people with developmental disabilities
- people with chronic alcoholism

The TRUST
The Alaska Mental Health Trust Authority

Results for Beneficiaries

- 27 beneficiary grantees since 2006
- Promotes recovery and stability
- Provides sense of empowerment
- Wide range of beneficiary-run programs
  - peer-support services
  - clubhouses
  - drop-in centers
  - community outreach
  - illness self-management
- In communities from Fairbanks to Sitka

Thank You

John Malone

FY07 Year in Review

As we assess the many things we accomplished at the Alaska Mental Health Trust (The Trust) during fiscal year 2007, there is clear evidence that we have continued to improve and refine our efforts because we are reaping more targeted results for Trust beneficiaries than ever. We attribute this success to the many collaborative relationships we are engaged in and the strategic thinking that evolves from these relationships. We have found this formula to be very successful and it will continue to guide us through the coming year. Thus, the theme for this annual report is "*committed partners + strategic thinking = results for Trust beneficiaries.*"

At the center of our success are our relationships with hundreds of committed partners, including local, state and federal agencies, our advisory groups, non-profits, service providers, philanthropic organizations and private sector leaders. Working with these partners has reinforced the old adage that "two heads are smarter than one," because together we have developed strategic, well-thought-out programs that are helping make a difference in the lives of Trust beneficiaries.

Like any organization, we work to learn from the past so that we are continuously improving and innovating. Over the years we have discovered that we are most successful when we focus our efforts like a laser beam on a few critical issues rather than scattering our funding across diverse program areas. From this knowledge evolved the concept of "focus areas," in which we concentrate funding and other resources on a few specific issues in an effort to substantially improve services and delivery systems across the state, and ultimately improve the lives of Trust beneficiaries. Currently The Trust is working on five focus areas that address issues with significant impact on Trust beneficiaries:

1. Bring the Kids Home – bringing home to Alaska children who are being treated in out-of-state psychiatric institutions and increasing treatment services statewide;
2. Affordable Appropriate Housing – increasing the availability of a continuum of housing options for Trust beneficiaries;
3. Justice for Persons with Disabilities – reducing the involvement and recidivism of Trust beneficiaries in the criminal justice system;
4. Trust Beneficiary Projects Initiative – supporting grassroots, consumer-driven programs and small, one-time projects that improve the lives of beneficiaries; and
5. Workforce Development – creating an available and competent workforce for Trust beneficiary service providers.

In each focus area we have partnered with agencies and organizations that can bring the most influence to the table or that are essential in helping us navigate through the current landscape of services and support available for beneficiaries. In many instances we have directly engaged beneficiaries or their family members – after all, who can better speak about these issues – to get guidance and feedback. From all these discussions we have fashioned specific performance measures that help us gauge how we are doing and whether we are turning the curve when it comes to improving the lives of beneficiaries. This annual report will address each of these focus areas and describe how we are making a difference.

All of this effort takes funding, of course, and fortunately The Trust had a highly successful financial year in FY07. Investments with the Alaska Permanent Fund increased approximately 14 percent over the previous year. As a result approximately $26 million was available to support programs of direct benefit to Trust beneficiaries in FY07. We expect to fund at a similar level in FY08 and in FY09. The full details of our financial performance are included later in this report.

The Trustees take their fiduciary responsibilities at The Trust very seriously. Trustees are also conscious of the need to develop Trust policies and programs that adequately and appropriately reflect the needs of beneficiaries, especially as state and federal funding tightens and philanthropic support is spread more thinly. We are committed to a prudent investment plan that will result in sustained growth over time and stability for the work of The Trust. At the beginning of FY08, The Trustees hired Harry Noah as the new executive director for the Trust Land Office and he has been tasked with seeking new ways to take advantage of the investment opportunities created by our land and non-cash assets.

We urge you to read through this annual report to see the progress we made in FY07 using our formula for success, and what lies ahead for FY08 as we continue to collaborate with our partners for the betterment of our beneficiaries.

William Doolittle, M.D.
Chair

Jeffrey L. Jessee

Bring the Kids Home Focus Area

The **Bring the Kids Home Focus Area** is a model example of how committed partners, strategic thinking and measurable outcomes provide results for Trust beneficiaries.

THE PROBLEM OR COMMUNITY NEED:

The events that led to formation of the Bring the Kids Home Focus Area began building in the late 1990s when the number of Alaska children being sent at state expense for treatment in out-of-state psychiatric institutions began rising dramatically. The situation was devastating to the children and their families, and it was expensive for the state.

By 2005, the state was paying almost $40 million for out-of-state care for more than 700 Alaskan children with severe emotional disturbances. That same year the Department of Health and Social Services and The Trust partnered to bring home the kids who were being treated in out-of-state psychiatric institutions. We also began building a continuum of services from in-home supports to foster and group homes, which are needed in order to curtail the practice in the future. By improving the treatment delivery system, we hope to improve the lives of these youth and their families, and control the state's cost for children's mental health care.

COMMITTED PARTNERSHIPS:

The Bring the Kids Home Focus Area is one of the most complicated efforts The Trust has undertaken because it involves so many players, including representatives from the Department of Health and Social Services, the Denali Commission, behavioral health providers, Trust partner boards, a parent advocacy group, individual parents, Alaska Housing Finance Corporation and The Trust. Plus, this initiative requires service system redesign, capital infrastructure development and workforce development, each of which can involve complex and protracted solutions.

STRATEGIC THINKING:

The initial planning and funding efforts focused on the following:

- ensuring that each child is treated at the appropriate level of care as close to home as possible,
- building appropriate treatment facilities in state,
- increasing the capacity and core competencies of in-state providers so they can provide services that meet the needs of kids with severe emotional disturbances,
- ensuring youth and their parents are supported as they navigate the system of care, and
- involving parents and youth in the entire process so they are part of the solution.

From the outset, the partners in the initiative agreed that this process would be data-driven and success would be gauged by significant changes in areas directly impacting the children, namely treatment location, length of stay, recidivism, functional improvements, and service satisfaction. In addition, we began tracking increases in service capacity and shifts in funding from out of state to more in state. Our goal is to achieve significant improvements in all these areas by fiscal year 2012.

RESULTS FOR BENEFICIARIES:

After two years of intense work, our data-driven effort is showing signs of impacting the problem and changing service delivery for this group of children. Some key indicators are:

- The number of youth admitted to out-of-state residential treatment facilities has dropped 39.3 percent, from 489 when this focus area launched in FY05 to 297 at the close of FY07.
- With the infusion of capital funding from the State and The Trust's partners, service capacity – the number of beds available in state – has increased from 668 in FY05 when the initiative launched to 804 in FY07. Another 349 beds are expected to be added by the close of FY09, bringing total capacity to 1,153 for a 72.6 percent increase over FY05.

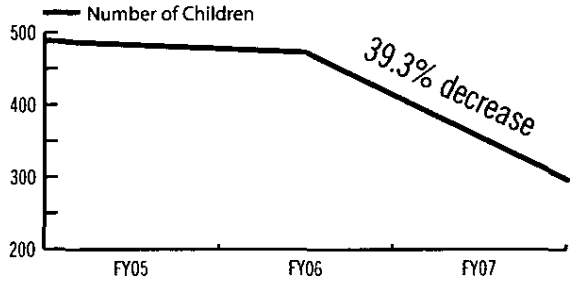
In order to bring the kids home, Alaska needed to increase the number of in-state services.

Construction began in late FY07 to increase capacity at the ARCH residential treatment facility in Eagle River.

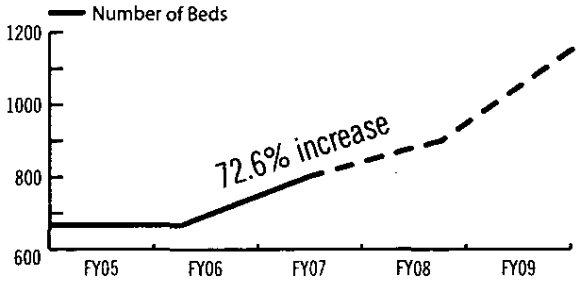
The ARCH is increasing its beds from 16 to 24 for children experiencing severe emotional disturbances.

New residential treatment facilities and group homes are also underway or operating in Fairbanks, Juneau, Mat-Su Valley and Dillingham.

CHILDREN IN OUT-OF-STATE RESIDENTIAL TREATMENT FACILITIES



RESIDENTIAL TREATMENT CAPACITY IN ALASKA



AHEAD FOR '08:

Our initial efforts in FY06 and FY07 focused heavily on increasing in-state residential treatment capacity in order to bring home the kids who were being treated in out-of-state psychiatric facilities. In FY07 we began to shift our focus to early intervention programs. These are primarily home and community-based programs involving families, schools and day care centers. This effort will receive greater attention in FY08 and FY09 in an attempt to help children experiencing severe emotional disturbances get assistance early in their lives. Our goal is to prevent these kids from advancing to residential treatment.

Capacity building remains an issue, however, and several capital projects are on the horizon in FY08 that will help increase capacity and improve the state's service delivery system. For example, in early FY08 bids were being accepted to build a 44-bed facility in Eklutna, which is expected to be complete sometime in FY09. Plus, construction began in late FY07, expanding the ARCH residential treatment facility in Eagle River from 16 to 24 beds. This project is expected to be complete by late FY08.

While great strides were made in FY07 and are ahead for FY08, creating a sensible and sustainable program that keeps Alaska's children home and controls out-of-state spending will take years of continuous effort.

Affordable Appropriate Housing Focus Area

The goal of The Trust's Affordable Appropriate Housing Focus Area is to increase the availability of a continuum of housing options that are best suited to Trust beneficiary needs, and that will improve or sustain their quality of life.

THE PROBLEM OR COMMUNITY NEED:

Statistics from around the state are conclusive: many Alaskans of all ages do not have a place to truly call home. What is most disturbing to The Trust is that the statewide housing shortage disproportionately affects Trust beneficiaries. Having safe, decent, affordable, accessible and appropriate housing is often the key for beneficiaries in maintaining a healthy lifestyle.

The high incidence of homelessness among Trust beneficiaries can be linked to challenges associated with disabling conditions, lack of opportunities for economic advancement, the need for supportive living situations, or accommodations required to meet special needs. Increasingly, the cost of providing these supportive services, such as treatment, crisis intervention, job counseling or life-skills training, is too expensive for mainstream landlords and challenging even for skilled social service providers.

RurAL CAP celebrated 10 years of offering supportive housing to Alaskans.

Housing advocates across the state support the Alaska Housing Trust.

Kenai Peninsula Housing Initiatives completed Crestview, supported housing in Soldotna.

Valley Residential Services operates several supported housing units in Mat-Su.

COMMITTED PARTNERS:

A steering committee was formed in 2006 to examine possible ways to increase the number of affordable housing units in Alaska and how to maintain them securely over time. Among the models examined was creation of a housing trust. The committee included representatives from the governor's office, The Trust, Alaska Housing Finance Corporation, Alaska Department of Health and Social Services, several regional tribal housing authorities, U.S. Department of Housing and Urban Development, U.S. Department of Agriculture Rural Development, Wells Fargo Bank, Rasmuson Foundation, social service providers, and homebuilders.

STRATEGIC THINKING:

Based on the success of housing trusts in more than 30 states, The Trust and its partners agreed to create the Alaska Housing Trust. A housing trust is a pot of non-federal funds devoted to housing activities for individuals and families with greater housing needs. It allows flexibility in spending and the opportunity to be innovative and entrepreneurial in solving housing problems.

By creating a housing trust, Alaska can increase the number of affordable units available for rent and help maintain them securely over time. Funding from a housing trust can serve as the glue to meld federal resources and social service funding, and can subsidize areas of supported housing projects that are not covered by traditional funding streams. With assistance from a housing trust, these units are more affordable and secure for tenants because additional support services and subsidies are built into the overall project costs. These service-enriched units are also attractive to developers and landlords because they create mechanisms for tenants to afford their rents, become reliable, long-term residents, and receive assistance with skills training and crisis management.

RESULTS FOR TRUST BENEFICIARIES:

In tandem with our efforts to create a housing trust, this focus area also funded several programs in FY07 that provide or promote stable housing for Trust beneficiaries. For instance, The Trust, the Denali Commission, the Rasmuson Foundation and The Foraker Group partnered to create a predevelopment program that offers technical assistance to housing and social service agencies interested in expanding or retaining their existing portfolio of special needs housing units. The Trust also collaborated with the Division of Behavioral Health's Supported Housing Office in developing a supported housing business plan for small housing developers that takes into account the cost of providing support to Trust beneficiaries. Additionally, in FY07, The Trust helped fund rental subsidies at Bridge Home, a transitional living facility which provided stable housing to about 40 individuals who had been cycling through hospital emergency rooms and psychiatric facilities.

During the 2007 legislative session, Gov. Sarah Palin issued an Administrative Order maintaining and expanding the Alaska Council on the Homeless, which was formed in 2004 to address homelessness in Alaska. The governor also included directions to develop a framework for the housing trust and legislation that will enact it. This legislation has been drafted and is ready for release once the Council, AHFC, the Alaska Housing Trust steering committee and the state administration determine the best mechanism to move the legislation ahead.

In recognition that the Alaska Housing Trust is moving forward, The Trust allocated $1 million in FY07 to support the housing trust and the Rasmuson Foundation granted a matching $1 million. In addition, the Alaska Housing Trust Coalition formed in FY07 in support of the Alaska Housing Trust and has nearly 70 members, including representatives from United Way organizations across the state, the Municipality of Anchorage, social service providers, private housing developers and the Alaska Chapter of AARP.

AHEAD FOR '08:

As a first step in administering the $2 million in pilot funds contributed in FY07 to support the housing trust, AHFC, the Municipality of Anchorage and The Trust combined application processes for AHFC's FY08 capital projects. This improved procedure gives applicants access to state and local funding, plus the housing trust pilot money, in a single competitive bid, demonstrating how the housing trust model streamlines the funding process.

Already several communities have begun examining how the Alaska Housing Trust may assist in meeting their need for housing for special populations, including plans for a pilot project in Anchorage to support the chronic homeless, and coordination of services in Juneau and Fairbanks to ensure seasonal housing demands are met.

WORK HOURS NEEDED TO PAY RENT

Area	Work hours per week at minimum wage needed to afford 1 bedroom	Work hours per week at minimum wage needed to afford 2 bedroom	Work hours per week at minimum wage needed to afford 3 bedroom	Work hours per week at minimum wage needed to afford 4 bedroom

Disability Justice Focus Area

THE PROBLEM OR COMMUNITY NEED:

A 1997 study showed that 37 percent of persons under the supervision of the Department of Corrections had a mental illness and most also had a co-occurring substance abuse disorder for either drugs or alcohol. By 2006 the statistics had not improved and a large number of Trust beneficiaries continued to be incarcerated, spurring The Trust to form the Disability Justice Focus Area. This focus area has two primary goals: (1) reduce the involvement and recidivism of Trust beneficiaries in the criminal justice system and (2) increase the criminal justice system's ability to effectively accommodate the needs of victims and offenders who are Trust beneficiaries.

Trust beneficiaries are at increased risk of involvement with the criminal justice system both as defendants and as victims. Each year, hundreds of Trust beneficiaries, who have committed no crime, are incarcerated for their safety because appropriate service alternatives are not available. Thousands more are arrested, prosecuted and incarcerated for status offenses resulting from behaviors associated with the symptoms of their mental disorders.

COMMITTED PARTNERS:

Several strong partnerships were formed to address this issue with The Trust, including the Alaska Court System, the departments of Corrections, Health and Social Services, Law, and Public Safety, the University of Alaska, local governments, law enforcement, and behavioral health treatment providers.

STRATEGIC THINKING:

The partners quickly identified cross system communication, early identification of beneficiaries when they enter the criminal justice system, and training as the key components needed to assist Alaska's criminal justice and health and social service systems in preventing the inappropriate or avoidable arrest, prosecution, and incarceration of Trust beneficiaries.

RESULTS FOR BENEFICIARIES:

In FY07, The Trust and its partners focused on two key areas: training criminal justice personnel to be more familiar with beneficiaries and their needs, and discharge planning for beneficiaries exiting the corrections system and re-entering Alaska's communities as a strategy to reduce recidivism among beneficiaries.

The Alaska Court System, the Alaska Bar Association, the Public Defender Agency and The Trust partnered to develop and implement a six-part Continuing Legal Education (CLE) series entitled "Managing Cases Involving Persons with Mental Disorders." The curriculum assists judges, lawyers and other professionals in understanding and more effectively handling legal cases involving Trust beneficiaries. There were 450 participants in the CLE series, of which 262 worked in the legal field. The training sessions were videotaped and are available for those who were unable to attend or for new lawyers entering the field who are unfamiliar with mental health disorders and law.

The departments of Corrections and Health and Social Services, behavioral health treatment providers and other stakeholders from around the state developed and implemented a discharge planning program for beneficiaries who leave corrections and re-integrate into Alaska's communities. It is based on a national best-practice model called Assess, Plan, Identify, Coordinate (APIC). The program was operational in the fourth quarter of FY07 in Anchorage, Fairbanks, Juneau and Palmer.

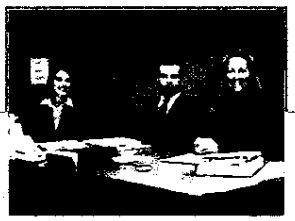
AHEAD FOR '08:

Goals for FY08 include release of a comprehensive, four-year, retrospective analysis of beneficiaries who entered, were served within, and were released from the Department of Corrections. This data will assist the Disability Justice Focus Area partners to strategically plan and develop effective programs that will divert and reduce the number of Trust beneficiaries who are incarcerated. The Trust has also committed funds in FY08 for additional training on disorders experienced by beneficiaries and intervention techniques for law enforcement officers in Anchorage and Fairbanks. Planning will begin for introduction of additional therapeutic courts in Southeast Alaska.

Finally, The Trust plans to develop, in partnership with the departments of Corrections and Health and Social Services, local governments and stakeholders, an enhanced continuum of detoxification and treatment services in several locations that will reduce the inappropriate and avoidable incarceration of beneficiaries under Alaska's protective custody laws.

District Court Judge Stephanie Rhoades presides over the Anchorage Mental Health Court.

Law enforcement and correctional officers completed Trust funded Crisis Intervention Team training.



Prosecutors are key team members of therapeutic courts in Anchorage, Fairbanks, Palmer, Bethel, Juneau and Ketchikan.

District Court Judge Greg Heath presides over the Palmer Mental Health Court.

Beneficiary Projects Initiative Focus Area

What better way to demonstrate The Trust's commitment to improving the lives and circumstances of Trust beneficiaries than putting funds directly into beneficiaries' hands for beneficiary-directed projects they conceive and operate.

THE PROBLEM OR COMMUNITY NEED:

Involving consumers in defining and mapping out their recovery is a well-known treatment tactic and may forestall the need for more intensive traditional service. While plenty of beneficiaries and their family members have keen interest in developing consumer-driven services, not all have the expertise or training to organize, manage and sustain the programs they envision.

In FY07, the Beneficiary Projects Initiative Focus Area committed about $1.3 million for Trust beneficiaries to develop grassroots projects that focus on peer-to-peer support. This means beneficiaries are helping each other find and maintain their individual path to recovery and wellness. The Trust also funded a $1.2 million mini-grant program for projects that provide Trust beneficiaries with a broad range of equipment and services essential to directly improving their quality of life and increasing independent functioning. In addition, The Trust allocated $250,000 for The Trust's Small Projects program, which provided small amounts of one-time funding for more than 30 beneficiary-directed projects in FY07.

COMMITTED PARTNERS:

The most significant partners in this focus area are the beneficiary grantees, of which there has been 25 since the program began in 2006, including 15 who received funding in FY07. They all have committed to delivering safe, effective services and running stable, well-managed organizations. They are succeeding because of the help they receive from a host of committed partners, including The Trust's advisory boards, federal agencies such as SAMHSA, state agencies such as the Division of Behavioral Health, Native organizations such as First Alaskans Institute, major foundations such as the Rasmuson Foundation, and national and state technical assistance providers.

STRATEGIC THINKING:

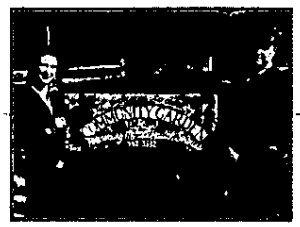
Among the goals for this focus area are providing grantees with seed money and technical assistance so their projects get off the ground, operate smoothly and are sustainable. The program is administered through a contract with The Foraker Group where staff can answer basic operating questions, help develop business plans, or assist beneficiaries in getting a program started and running effectively.

RESULTS FOR BENEFICIARIES:

Some of the services initiated by Trust beneficiaries include peer-support services, clubhouses and drop-in centers, community outreach, and illness self-management in communities that range from Nenana to Ketchikan. By funding these projects, The Trust has helped increase the capacity of the state's mental health treatment delivery system for beneficiary-directed services. But more importantly, these projects and services are improving beneficiaries' lives by creating a sense of empowerment and promoting recovery among both the beneficiary providers and the recipients. In 2007, more than 1,600 Trust beneficiaries received both direct and indirect services through the Beneficiary Projects Initiative Focus Area, nearly all of which were provided by fellow beneficiaries and/or family members.

AHEAD IN '08:

In FY08 an "incubator" program will assist beneficiaries in developing their project ideas more thoroughly. Overall initiative capacity building will take two distinct forms. First, through leadership training, we want to grow the expertise of individual beneficiaries who are already serving; and, second, we will recruit other skilled individuals who have interest in serving their communities. Finally, an evaluation of the initiative will be conducted to provide focus area guidance and establish appropriate performance measures.



The Trust funded the Petersburg Community Garden as a small project.

The annual Key Campaign raises awareness about developmental disabilities.

Beneficiaries developed peer-support services, club houses and drop-in centers.

Young self-advocates give back to their community by participating in a tree-planting program.

Workforce Development Focus Area

THE PROBLEM OR COMMUNITY NEED:

Having an available and competent workforce are enormous challenges for all Trust beneficiary service providers. A shortage of health care workers in Alaska has been at a near-crisis level for many years, yet the health services industry is the fastest growing sector of Alaska's economy, employing more than 7 percent of the state's workforce, according to a 2007 study commissioned by The Trust. Much of the reason for this worker shortage lies in Alaska's remoteness, harsh climate, rural isolation, low population density, high cost of living and scarce training resources. Exacerbating this already difficult situation is a burgeoning demand now for increased health services for the state's steadily growing and aging population, some of whom are among The Trust's beneficiaries. The Workforce Development Focus Area is aimed specifically at increasing the available pool of qualified employees in Alaska who serve Trust beneficiaries and keeping that workforce adequately trained.

COMMITTED PARTNERSHIPS:

More than 20 partners worked in FY07 to develop strategies that will address the goals set out by this focus area. These partners included service providers, the departments of Health and Social Services and Labor and Workforce Development, non-profit and faith-based organizations, and educational institutions such as the University of Alaska system, including the campuses in Anchorage, Fairbanks and Sitka.

STRATEGIC THINKING:

After studying data around the workforce issues it became clear that there are many dimensions to the problem and that multiple strategies are needed to reduce the problems. We have developed strategies around recruitment, retention and training issues to accomplish our goal of having a competent workforce to serve Trust beneficiaries. The strategies address a diverse array of problems including adequate pay and benefits, affordable housing, access to training and professional development, and competent supervision.

RESULTS FOR BENEFICIARIES:

The Trust partnered with the University of Alaska to conduct a state-wide vacancy study in 2007 to assess the number and length of time positions have been open in a broad array of physical and behavioral health organizations. The results were staggering, especially among the occupations that serve Trust beneficiaries. The vacancy study shows the most severe shortages in the behavioral health field were for occupations that fell under the category of human services worker, with both extremely high vacancy numbers and high vacancy rates. Overall, all behavioral health occupation vacancies were high – around 29 percent of all estimated vacancies – and ranked higher than any other occupational group. This means organizations that serve beneficiaries are understaffed, which results in delayed treatment or no services available to some people, resulting in negative impacts to individuals, families and communities.

AHEAD FOR '08:

Because the Workforce Development Focus Area is the newest of The Trust's focus areas, most of the work was just being planned in 2007 so many of the strategies are expected to gain traction or launch in FY08. A new Trust Training Cooperative formed in 2007 will address training needs in the field, helping to tie together and maximize available on-the-job training and necessary continuing education for the workforce. Additionally, new recruitment and retention strategies are beginning or expanding in FY08 in a wide variety of venues. For instance, a demonstration project for a new Student Loan Repayment Program for behavioral health professionals is expected to commence in 2008 that will serve as a recruitment and retention tool.

REGIONAL VACANCY RATES

The 2007 Alaska Health Workforce Vacancy Study was conducted by the Alaska Center for Rural Health – Alaska's AHEC, at the University of Alaska, Anchorage. The study was funded by The Trust and by the Office of Associate VP for Health, University of Alaska Anchorage, through the Centers for Disease Control and Prevention. The full report may be downloaded at http://nursing.uaa.alaska.edu/acrh/.

Trust Fund Experiences Record Growth in FY07

Due to strong investment markets throughout the 2007 fiscal year, the cash assets of the Alaska Mental Health Trust Authority reached a record high balance. Investments with the Alaska Permanent Fund (APFC) increased 13.8 percent, rising from $385,366,600 at the end of FY06 to $438,513,700 at the end of FY07.

Income from these investments was $62,448,000 for FY07 and $36,046,700 for FY06. Statutory net income determined by APFC (which does not include unrealized gains) was $31,756,200 for FY07 and $39,733,300 for FY06. Statutory net income increases the Budget Reserve and can be used to fund the mental health budget, while unrealized net income can only be applied to inflation proof our Principal investment.

The Budget Reserve is set at 400 percent of the annual payout, to allow for disbursements during market downturns without eroding Trust Principal. The Budget Reserve investment is split between the Alaska Permanent Fund and the Treasury Division of the Alaska Department of Revenue.

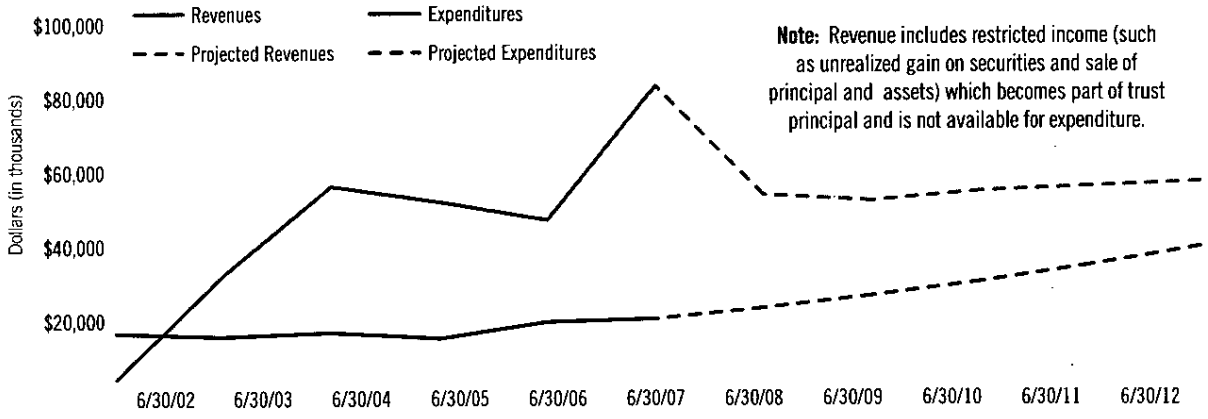
The Treasury Division Budget Reserve investments were reallocated during FY07 according to the recommendation of financial consultants Callan Associates, Inc. Due to this change, combined with strong investment performance, the earnings on this portion of the Budget Reserve soared tenfold from $445,740 in FY06 to $4,586,200 in FY07.

The Trust's payout rate, which is used to calculate the disbursement (or payout) for the mental health budget, was increased at the end of FY06 from 3.75 percent to 4.0 percent beginning with the FY07 budget. This rate is applied to the balance in the Trust Fund (Principal and Budget Reserve) at the end of a fiscal year to calculate the payout for the subsequent year.

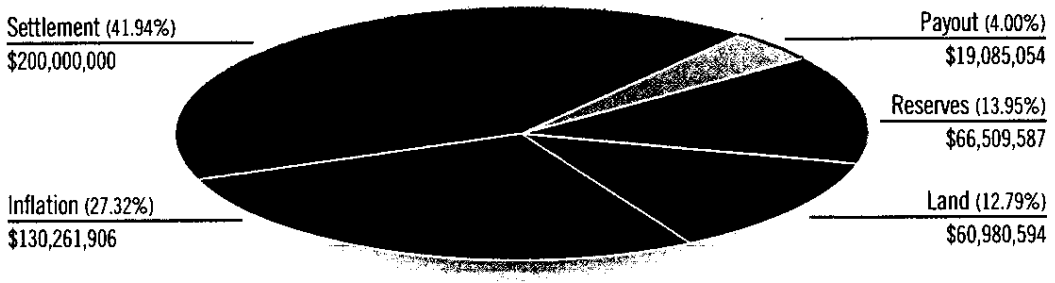
The following financial performance from FY07 is available for funding in FY08:

- Disbursement (payout) rate of 4.0 percent, for a payout of $19,085,054. This represents an increase of 14.8 percent over FY06.
- Resource management revenue allocated as income was $3,428,312.
- Interest on the Income Account at Treasury Division was $1,620,108.
- Lapsed funds from prior fiscal years were $2,770,922.
- Total funding available for FY08 is $26,904,396. This is a 17 percent increase from FY07 availability of $23,032,672.

REVENUES AND EXPENDITURES



TRUST CASH ASSETS AT END OF FY07



Trust Land Office Generated $8.1 Million

Revenue-generating uses of Trust land include land leasing and sales; commercial timber sales; mineral exploration and production; coal, oil and gas exploration and development; sand, gravel and rock sales; and other general land uses.

The Trust Land Office (TLO) is a small 11-person unit in the Department of Natural Resources that manages approximately one million acres of land and non-cash assets throughout Alaska on behalf of the beneficiaries of the Alaska Mental Health Trust. Gross revenue in FY07 totaled about $8.1 million, of which about $3.3 million was Spendable Income and about $4.7 million was Principal revenue.

Revenue-generating uses of Trust land include land leasing and sales; commercial timber sales; mineral exploration and production; coal, oil and gas exploration and development; sand, gravel and rock sales; and other general land uses. Rents, fees and 15 percent of timber revenue from Trust land uses are considered "Spendable Income' and are available to The Trust for use in the following fiscal year. Land Sale revenue, hydrocarbon and mineral royalties, and 85 percent of timber revenue are considered "Principal" and are deposited in The Trust corpus, which is held and managed by the Alaska Permanent Fund Corporation.

[redacted]:

- Completed subdivision and re-plat of The Trust's Juneau waterfront parcel known as The Subport, and sold a parcel adjacent to Centennial Hall to the City and Borough of Juneau for $2.93 million.
- Fairbanks Gold Mining Inc. paid The Trust a royalty of more than $700,000 for its 2006 calendar year production from its mine located on Trust land north of Fairbanks.
- Sold 67 parcels in The Trust's annual land sale for a value of $2.17 million.
- Responded quickly to approve an authorization for the expedited recovery of spilled fuel from a DC-4 that crashed on Trust land near Nenana carrying 3,000 gallons of heating oil.
- Worked with the Department of Natural Resources to establish a new replacement land list, and prioritized conveyances of the lands owed to The Trust under the Settlement Agreement for lands that were originally conveyed to The Trust in error or had other encumbrances that significantly affected the land.
- After a 10-year hiatus, the Board of Land Management began adjudication of the remaining Mental Health Enabling Act selections as part of the agreement to close out The Trust's federal entitlement.
- Talon Gold began mineral exploration on Trust land near Livengood. Early results from that program continue to provide encouraging news for the precious metals prospect.
- Worked with various communities throughout Alaska on issues affecting management of Trust lands.

[redacted]:

The TLO will begin long-term planning for Trust timber lands, commercial real estate and resort properties. In addition, the office will strive to build or rebuild relationships with local communities or individuals that live or work near lands managed by The Trust.

Key projects will include:

- Planning for development of the Juneau Waterfront Property (formerly titled the Juneau Subport);
- Researching potential timber land exchanges in Southeast Alaska with the U. S. Forest Service;
- Developing a long-term property and land management program for use by TLO staff;
- Resolving a back log of land use issues;
- Developing a preliminary feasibility study for monitoring resort quality properties;
- Offering for sale potential subdivision lots; and
- Continuing to offer oil, gas and mineral properties for lease.

Trust land along Juneau's waterfront is being redeveloped.

Typical timberland owned by The Trust in Southeast Alaska.

Saw logs waiting to be processed at Silver Bay Mill in Wrangell.

Yellow cedar dimensional lumber waiting for shipment in Wrangell.

The TRUST
The Alaska Mental Health Trust Authority

FACT SHEET

The Trust

The Alaska Mental Health Trust Authority is a state corporation that administers the Alaska Mental Health Trust, a perpetual trust managed on behalf of Trust beneficiaries. The Trust operates much like a private foundation, using its resources to ensure that Alaska has a comprehensive integrated mental health program to provide treatment and services for Trust beneficiaries. The Trust works with the Alaska Department of Health and Social Services to coordinate planning for this program, makes recommendations to the governor and Legislature regarding funding of the program, and advocates for funding and policies that support the systems serving Trust beneficiaries.

Trust Beneficiaries

Trust beneficiaries include:

- people with mental illness,
- people with developmental disabilities,
- people with chronic alcoholism and
- people with Alzheimer's disease and related disorders.

Trust History

Prior to statehood, there were limited services available in the Territory of Alaska for individuals who experienced mental illness or developmental disabilities. Instead, these individuals were sent by the federal government to live in an institution in Oregon. During Alaska's transition to a state, Congress passed the Alaska Mental Health Enabling Act of 1956 to help bring these individuals home. This act transferred the responsibility for providing mental health services from the federal government to the Territory of Alaska and ultimately the State of Alaska, by creating the Alaska Mental Health Trust. To fund The Trust, the state selected one million prime acres of land that would be managed to generate income to pay for a comprehensive integrated mental health program.

Though the Alaska Legislature held a fiduciary responsibility to manage the land on behalf of Alaskans with mental disabilities, it did not do so. Instead, by 1982, only about 35 percent of the land remained in state ownership. The majority of the land had been transferred to individuals or municipalities, or designated by the Legislature as forests, parks or wildlife areas.

In 1982, Vern Weiss filed a lawsuit on behalf of his son, who required mental health services that were not available in Alaska. Other beneficiary groups joined *Weiss v State of Alaska* in a class action suit. The case was ruled on in 1984 by the State Supreme Court, which ordered that the original trust be restored. Ten years later, in 1994, a final settlement reconstructed The Trust with 500,000 acres of original Trust land, 500,000 acres of replacement land and $200 million in cash.

Trust Governance

The Trust settlement established an independent Board of Trustees appointed by the governor and confirmed by the Legislature. The appointments are for five-year, staggered terms. Current Trustees are:

- Dr. William Doolittle, Chair
- Laraine Derr, Vice Chair
- Paula Easley, Secretary/Treasurer
- Tom Hawkins
- Larry Norene
- Timothy Schuerch

Trust Assets

The Trust employs the expertise of several organizations to manage its cash and non-cash assets. The Alaska Permanent Fund Corporation and the Alaska Department of Revenue Treasury Division manage The Trust's cash assets. The Trust Land Office, a separate unit within the Alaska Department of Natural Resources, manages the land and other non-cash assets on behalf of The Trust.

Trust Funding

The majority of The Trust's annual operating and capital budgets is spent in two areas:

- Trust Focus Areas -- based on recommendations from the focus area workgroups.
- Programs initiated by The Trust's advisory boards through the annual Request for Recommendation process.

These expenditures along with other state funds comprise the Separate Mental Health Budget Bill and must be approved by the Legislature.

A small portion of The Trust's annual operating budget is available for grants to non-profits, providers, tribal entities, governmental agencies and other organizations that serve Trust beneficiaries. Grant funds are spent at the discretion of the Board of Trustees or Trust staff.

Trust Focus Areas

Currently The Trust is focusing on five program areas that address issues with significant impact on Trust beneficiaries:

1. **Bring the Kids Home** – bringing home to Alaska those children who experience severe emotional disturbances and are being treated in out-of-state psychiatric institutions, and increasing treatment, services statewide so they remain in Alaska;
2. **Affordable Appropriate Housing** – increasing a continuum of housing options for Trust beneficiaries;
3. **Disability Justice** – reducing the involvement and recidivism of Trust beneficiaries in the criminal justice system;
4. **Beneficiary Projects Initiative** – supporting grassroots, peer-to-peer programs for Trust beneficiaries;
5. **Workforce Development** – creating an available and competent workforce for Trust beneficiary service providers.

An Overview of 2008

Last year we reported that we have developed a formula for achieving our goal of improving the lives and circumstances of Trust beneficiaries. We defined the formula as *"committed partners + strategic planning = results for Trust beneficiaries."* Throughout FY2008, we continued to rely on this formula to guide our work on behalf of Trust beneficiaries. As a result, our theme for this annual report is *"continuing our formula for success,"* which reflects our ongoing commitment to serve as a catalyst for change in the systems that serve Trust beneficiaries.

We urge you to read through this report to learn how we are collaborating with our many partners to ensure and improve the comprehensive integrated mental health program in Alaska. We hope that by reading this report you will have a better understanding of how the issues we address affect virtually all Alaskans.

WHAT IS THE TRUST

The Alaska Mental Health Trust Authority is a state corporation that manages the Mental Health Trust, which was established at statehood. Our goal is to serve as a catalyst for change and improvement in Alaska's mental health continuum of care. We do not provide individual services; instead we operate much like a private foundation, using our resources to fund projects and activities that promote system change, including capacity building, demonstration projects, funding partnerships, technical assistance, and other activities that will improve the lives and circumstances of Trust beneficiaries.

TRUST BENEFICIARIES

Our beneficiaries are a diverse group. They include people with mental illness, developmental disabilities, chronic alcoholism, and Alzheimer's disease and related dementia. They live throughout Alaska and range from newborns to the oldest members of our communities. You probably know someone who is represented by The Trust; it could be a family member, a neighbor, a coworker or even yourself. As a result, the issues addressed by The Trust touch nearly every Alaskan, either directly or indirectly.

HOW WE FUND PROGRAMS

The amount Trustees have available to spend each year includes a portion of the earnings from our cash and non-cash assets. Because of favorable market conditions in recent years our investments have done well. As a result, Trustees have disbursed about $25 million per year to support programs of direct benefit to Trust beneficiaries. The economic downturn in FY2009, however, indicates The Trust will have a smaller funding stream available in FY2010.

FOCUS OF TRUST FUNDING

Most of The Trust's annual operating and capital budgets are spent on five focus areas that address issues with significant impact on Trust beneficiaries. These focus areas are:

1. Bring the Kids Home – bringing home to Alaska children who are being treated in out-of-state residential psychiatric institutions and increasing early detection, intervention and treatment services for these children statewide;
2. Affordable Appropriate Housing – increasing the availability of a continuum of housing options for Trust beneficiaries to reduce homelessness and improve their quality of life;
3. Disability Justice – reducing the involvement and recidivism of Trust beneficiaries in the criminal justice system;
4. Trust Beneficiary Projects Initiative – supporting grassroots, consumer-driven programs and small, one-time projects that improve the lives of beneficiaries; and
5. Workforce Development – creating an available and competent workforce for Trust beneficiary service providers.

OUR PARTNERS

In many instances, we directly engage beneficiaries and family members for guidance and feedback. We also depend on input regarding funding and policy recommendations from several advisory boards that serve as a link between The Trust and our beneficiaries, their families, caregivers and legal guardians. In addition, we rely on participation and collaboration from a number of state agencies, community partners and stakeholders to help reform and improve the systems that serve Trust beneficiaries.

The Trustees and Trust staff are committed to working with Governor Palin, the Legislature and our many partners to continue applying our formula for achieving the systemic change needed to make long-term improvements in the lives and circumstances of Trust beneficiaries.

William Doolittle, M.D.
Chair

Jeffrey L. Jessee
Chief Executive Officer

Keeping Beneficiaries Out of Corrections

The Disability Justice Focus Area aims to reduce the involvement and recidivism of Trust beneficiaries in the criminal justice system and increase the system's ability to effectively accommodate the needs of victims and offenders who are Trust beneficiaries.

Study of Trust Beneficiaries in the Department of Corrections — More than 40 percent of Alaska inmates have a mental illness or a cognitive impairment, according to a study commissioned by The Trust and the Alaska Department of Corrections, in coordination with the Department of Health and Social Services. The 2008 study revealed that inmates identified as Trust beneficiaries are more likely to return to prison, return sooner and spend more time in custody than other inmates. The four-year study also revealed that Trust beneficiaries who receive community health services upon release from prison have a lower rate of recidivism. The Trust and its partners are using the study results to promote increased funding for correctional and community-based treatment, improve integration among the systems serving Trust beneficiaries, and provide better links with community health care services to help ease the burden of care on Alaska's criminal justice system.

Alaska District Court Judge Greg Heath presides over the Palmer Mental Health Court.

Therapeutic Court System Studies — Evaluations of the Anchorage and Palmer Mental Health Courts in FY2008 demonstrated that the courts save public funds, reduce crime, and better meet the needs of defendants with significant mental disabilities than the traditional criminal justice approach. The courts are a collaborative effort between The Trust, Alaska Court System, the departments of Administration-Public Defender Agency, Corrections, Health and Social Services, Law, and Public Safety; local law enforcement and community treatment providers.

According to the 2008 study of beneficiaries in the Department of Corrections, Trust beneficiaries are part of a "revolving door" system of justice that is expensive, does not serve the interests of public safety, and does not benefit the defendants. The retention and program completion rates at Anchorage and Palmer compare favorably with therapeutic courts nationally. As a result, other communities are being assessed for expansion of mental health and substance abuse courts statewide.

Fairbanks Enhanced Detox Facility — A $4.6 million, 16-bed detox treatment facility aimed at reducing the inappropriate and avoidable incarceration of beneficiaries under Alaska's protective custody laws opened in January 2009 in Fairbanks. Construction of the Gateway to Recovery – Fairbanks Community Enhanced Detox Center began in FY2008 after several years of planning by a coalition of community providers, including Fairbanks Memorial Hospital, Tanana Chiefs Conference, Fairbanks Community Behavioral Health Center, and the Fairbanks Native Association, which also operates the facility. The new center increases detoxification capacity in Fairbanks by 60 percent. The new facility is located on Trust land and received major financial support from the Department of Health and Social Services; the Department of Commerce, Community and Economic Development; Rasmuson Foundation; Greater Fairbanks Community Hospital Foundation; The Trust; Doyon Ltd.; Tanana Chiefs Conference and private donors.

Overall Distribution of Trust Beneficiaries in Custody of the Alaska Department of Corrections

Incarcerations	FY2003	FY2004	FY2005	FY2006
Total Incarcerations	36,597	39,067	39,260	37,165
Trust Beneficiary Incarcerations	14,996	16,570	16,309	15,175
Trust Beneficiary Percent	41.0%	42.4%	41.5%	40.8%
Unique Offenders	17,258	18,246	17,998	17,220
Unique Trust Beneficiaries	5,820	6,267	6,265	6,071
Trust Beneficiary Percent	33.7%	34.3%	34.8%	35.3%

Results from "A Study of Trust Beneficiaries in the Alaska Department of Corrections" conducted by Hornby Zeller Associates, Inc.

Providing Affordable, Supportive Housing

The Appropriate Affordable Housing Focus Area is directed at expanding the availability of supportive housing for Trust beneficiaries. Safe, affordable, secure housing is critical for all Trust beneficiaries to be successful in their communities. Yet, finding permanent, appropriate housing is a problem for all our beneficiary groups. The problem is compounded by the fact that Trust beneficiaries typically need more than just a roof over their heads. They often need housing that also provides training and support services such as budgeting, financial management, social-skills training, problem solving and assistance with cognitive or behavioral issues to help them become stable, dependable tenants. The Appropriate Affordable Housing Focus Area workgroup has developed and is piloting several innovative, flexible strategies to address the housing needs of Trust beneficiaries.

Special Needs Housing Grant Program Expanded — The Special Needs Housing Grants or SNHG (pronounced snug) program is a long-time partnership between Alaska Housing Finance Corporation and The Trust that provides capital funds for supported housing for Trust beneficiaries. The program was expanded in FY2008 to provide more operations assistance and more flexible funding so the units are affordable and have increased outreach and assistance for residents. This innovation represents important first steps to retooling the special needs housing systems in our state. The program is managed and funded by AHFC, with additional funding from The Trust and the Department of Health and Social Services. Competitive grants are available to non-profit service providers and housing developers for planning and construction activities and may provide for group, supportive and transitional housing.

Housing Trust Pilot Projects — The Rasmuson Foundation and The Trust each committed $1 million in FY2008 for supportive housing pilot projects in Southcentral Alaska. The projects replicate the approach used in 35 other states that have implemented housing trusts. Housing trusts are a tool that states and communities use to increase the outreach and social services available to housing developments. As a result, these housing developments offer long-term support for individuals with special needs and preserve the community's investment.

Restructured Housing in Fairbanks — The Trust and the Department of Health and Social Services were instrumental in assisting Fairbanks Community Behavioral Health Center in restructuring its housing programs, allowing the center to reopen 24 previously closed units for individuals with serious mental illness.

Bridge Home Reduces Institutionalization — The Trust's main program in the housing focus area, the Bridge Home, is aimed at reducing the number of beneficiaries cycling through the Alaska Department of Corrections and Alaska Psychiatric Institute. In a four-year analysis of program participants, there was a significant reduction in the number of admissions to these facilities and a reduction in the costs related to these visits. This program will be expanding in FY2009 to include more beneficiaries with histories of cycling through the system.

Left: Residents in a supportive housing program in Anchorage helped landscape the area around their home.

Bridge Home Supportive Housing Results*

	Prior to Program	During Program	Reduction in Use
Alaska Psychiatric Institute Admits	79	49	38%
Days in Alaska Psychiatric Institute	1,707	1,167	32%
Department of Corrections Admits	51	27	48%
Days in Department of Corrections	2,124	674	68%

* Number of residents = 47

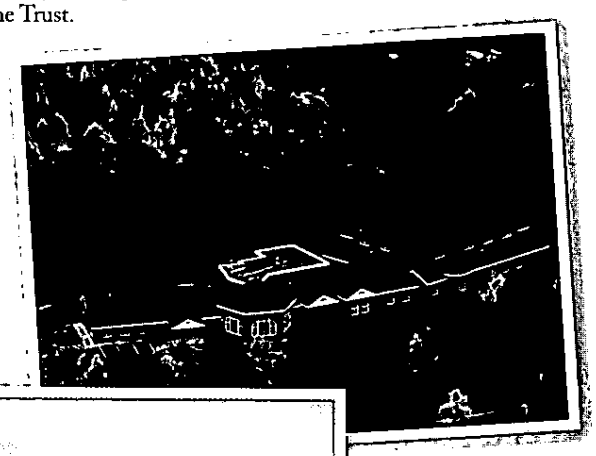
Reforming Mental Health Care for Children

The Bring the Kids Home Focus Area is reforming Alaska's mental health care for children and adolescents by increasing community-based services, providing early detection and intervention, and coordinating with families and schools to promote healthy learning environments. Bring the Kids Home began in 2005 as an initiative to return children with severe emotional disturbances from out-of-state residential facilities to treatment in Alaska and to keep additional children from moving into out-of-state care. Funded by The Trust and the Department of Health and Social Services, this initiative is a good example of how The Trust uses its resources to affect systemic change on behalf of Trust beneficiaries. Besides improving recovery at the lowest level of appropriate care, the State expects to benefit from this initiative by gaining better control of the future cost for children's mental health care.

Out-of-State Placements Dropped 59 Percent — The number of children admitted into out-of-state psychiatric treatment facilities dropped 32 percent, from 297 in FY2007 to 202 in FY2008. That is an overall 59 percent decline from the 489 kids who were admitted into out-of-state residential programs when the initiative began in 2005.

In-State Capacity Increased — In order for children in out-of-state treatment facilities to come home, there must be treatment available in Alaska. Planning and construction of new facilities take time and have not caught up with the need, but there were some small increases in FY2008 and at least one facility has opened in FY2009. The Boys & Girls Homes of Alaska in FY2008 opened a residential center in Fairbanks with a capacity of 130 kids. A five-bed group home opened in Dillingham in FY2008, with financial support from the Denali Commission, the Department of Health and Social Services and The Trust. In December 2008, the Volunteers of America-Alaska opened its expanded 24-bed adolescent residential center in Anchorage, increasing its capacity in FY2009 by 50 percent.

Individualized Services Increased — Developing in-state capacity for children with severe emotional disturbances is only a partial solution. The rest of the answer lies in preventing the need for residential care by providing youth the services and supports they need to stay at home. This requires investments in early intervention for children and families to keep problems from becoming severe. The Individualized Services program provides assistance to children and their families specifically geared to each child that will keep them safe, stable and at home. Services range from transportation to attend after-school activities to crisis intervention; and from family therapy to medication management. Without these services, many recipients would be destined for residential treatment, which would separate them from their families and home communities and cost more. The program is funded by the Department of Health and Social Services and The Trust.

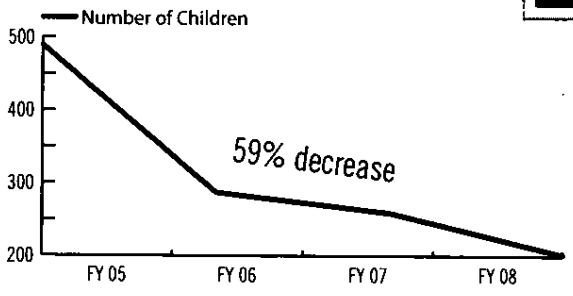


Top: Construction of new treatment facilities in Alaska is helping bring home those youth being treated out of state.

Left: Volunteers of America-Alaska increased capacity in their Anchorage residential facility by 50 percent.

Bottom: Early detection and intervention programs help children get help sooner and in their home communities.

Children Admitted into Out-of-State Residential Treatment Facilities



Bring the Kids Home Initiative

Offering the Wind Beneath Their Wings

The Beneficiary Projects Initiative Focus Area supports and funds grassroots, beneficiary-driven, peer-to-peer programs and small, one-time projects that improve the lives of Trust beneficiaries. In FY2008, The Trust authorized $1.25 million for this focus area, which is the only focus area that puts funds directly into the hands of beneficiaries to help them map out their recovery and long-term wellbeing. During the year, nine projects were funded that focused on everything from peer-to-peer support services and activities to early intervention programs, education, advocacy and outreach.

Technical Assistance — A panel of experts in the non-profit field is available to assist beneficiary groups in getting their programs developed, funded and running smoothly. The panel provided technical assistance in FY2008 to 23 beneficiary-led projects regarding organizational development, project implementation, business planning and board development. The panel is funded by The Trust and coordinated by The Foraker Group.

Alaska Peer Support Consortium — A network of 20 beneficiary-run programs organized into the Alaska Peer Support Consortium to advocate for beneficiaries, share information and provide training opportunities for peer-to-peer support services. The group is proving to be a critical partner to policymakers for developing peer-to-peer support services.

Beneficiaries Participate in Public Process — Partners in Policymaking is a Trust-funded program that provides training to Trust beneficiaries about how to participate in policymaking at various levels of government. The program is a collaboration with the Governor's Council on Disabilities and Special Education and the University of Alaska Center for Human Development. Program graduates have been successful in securing funds for peer-operated support services, serving on Beneficiary Projects Initiative grantee boards and participating in public advisory boards and commissions.

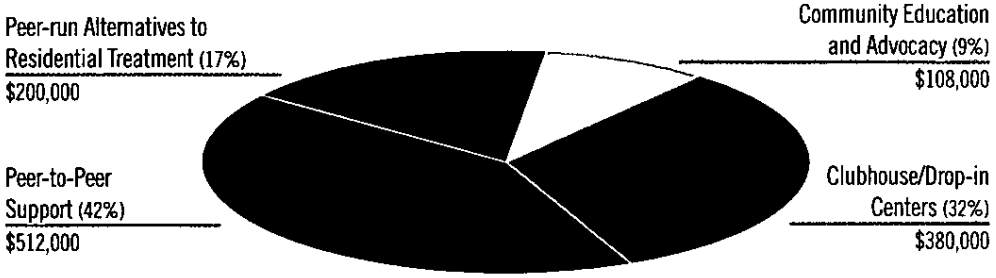
Left: Peer-run clubhouses offer participants life-skills training such as cooking.

Bottom: Beneficiaries produced costumes for an Anchorage poetry jam as part of their recovery.

5

Beneficiary Programs Initiative FY2008 Grants



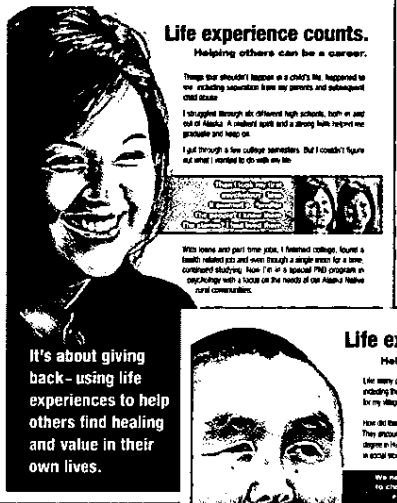
Recruiting, Retaining and Educating Workers

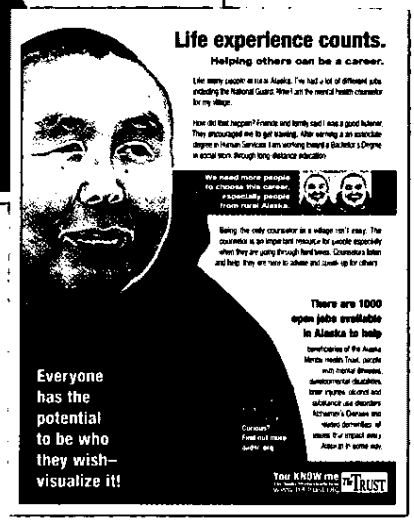
The overarching goal of the Workforce Development Focus Area is for service providers across the state to have access to a capable, culturally competent workforce that supports Trust beneficiaries, their families and communities. The focus area workgroup has identified three objectives to help make this happen: workforce recruitment, retention, and training and education. FY2008 was the first year of implementation in this focus area. During the year, more than 20 activities and programs were launched that targeted from entry-level personnel to paraprofessionals and professionals in a wide variety of beneficiary-related jobs across the state.

Student Loan Repayment Program — Under this incentive program, workers are being recruited into jobs in the behavioral health field that have been identified as having high vacancy rates in communities across the state. Professionals who graduated from an accredited college or university with a master's degree or higher are eligible for loan repayment in exchange for working in Alaska for two years. The program structure was developed in FY2008; five eligible job sites were selected for FY2008 and an additional five for FY2009.

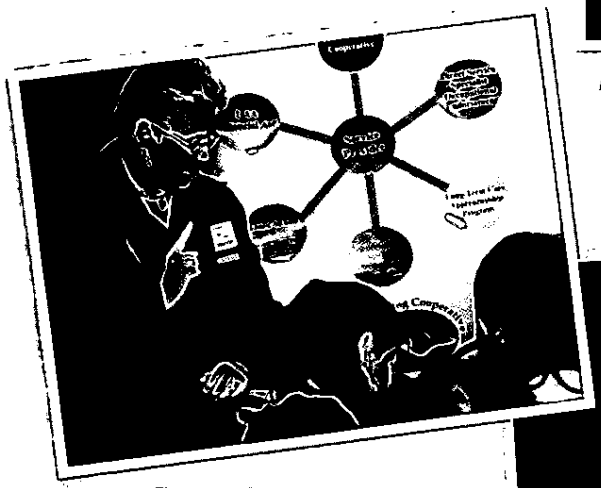
Trust Training Cooperative — Many service providers lack access to education and training for employees who serve Trust beneficiaries, especially at small agencies and agencies in rural areas. To help ease this problem, The Trust in FY2008 funded the Trust Training Cooperative, which is coordinated by and housed at the University of Alaska Center for Human Development. The cooperative functions as a clearinghouse to identify, coordinate and provide training, education and career development opportunities for the workforce that serves Trust beneficiaries. One of the cooperative's major accomplishments in 2008 was purchasing and piloting a learning management system for delivering, tracking and managing online training. When fully implemented, it will allow students to manage their training records, view course catalogs via the Internet, and register for, pay for and take training online.

"Life Experience Counts" Marketing Campaign — A television and print campaign was launched in FY2008 targeting Alaska Natives and individuals living in rural Alaska where there is a high percentage of vacancies in jobs serving Trust beneficiaries. The campaign ran in media outlets across the state with the slogan "Life Experience Counts" and featured the professional stories of two Alaska Natives. The ads encouraged individuals to use their experiences as caregivers as building blocks for jobs in the direct service field.





Above: TV and print ads encouraged people to turn their life experiences into job skills, helping and caring for Trust beneficiaries.



The annual Full Lives Conference provides motivational, educational and networking opportunities for direct service staff.

A loan repayment program is offering to repay student loans in exchange for working in behavioral health jobs in high vacancy areas of the state.

Trust Land Office Generated $11.8 Million

The Trust Land Office (TLO) is a 12-person unit in the Department of Natural Resources that manages approximately one million acres of land and other non-cash assets throughout Alaska on behalf of the Alaska Mental Health Trust. Gross revenues on these assets totaled about $11.8 million in FY2008, of which about $2.7 million was Spendable Income and about $9.1 million was Principal revenue.

Revenue-generating uses of Trust land include land leasing and sales; commercial timber sales; mineral exploration and production; coal, oil and gas exploration and development; sand, gravel and rock sales; and other general land uses. Rents, fees and 15 percent of timber revenue from Trust land uses are considered "Spendable Income" and are available to The Trust for use in the following fiscal year. Land Sale revenue, hydrocarbon and mineral royalties, and 85 percent of timber revenue are considered "Principal" and are deposited in The Trust corpus, which is held and managed by the Alaska Permanent Fund Corporation.

Highlights of FY2008 — The TLO completed a number of projects in FY2008 that resulted in increased revenue and helped build or strengthen relationships with individuals, communities and agencies that interact with the TLO. These included:

- Completed demolition and cleanup on Trust-owned waterfront property in Juneau, setting the stage for future development of the area.
- Received a royalty of more than $1.4 million from Fairbanks Gold Mining Inc. for 2008 production from its mine on Trust land north of Fairbanks. FGMI also paid $4.2 million for land assets involved in the mining operation.
- Sold 55 parcels in The Trust's annual land sale for $2.2 million.
- Signed a ground lease between The Trust and Fairbanks Behavioral Health Center for land on which a new enhanced detox center was built in FY2008.
- Sent the final Federal Entitlement close-out agreement to the Bureau of Land Management for review.
- Hired staff in Ketchikan and Petersburg, where large blocks of Trust land impact the local community.

Future Focus — The TLO, in conjunction with The Trust's Resource Management Committee, will continue developing long-term plans for its natural resource portfolio and working with local communities and individuals to increase public awareness of Trust lands and other non-cash assets and our mission. Key projects will include:

- Continued planning for the development of Juneau waterfront property;
- Exploring commercial real estate opportunities, specifically in the Anchorage University-Medical District and resort properties;
- Pursuing development of new mining projects on Trust lands;
- Developing a plan for future land sale programs;
- Developing large-block land management programs at Icy Cape and Haines;
- Seeking new business opportunities such as wind power or biomass development.

Top: This asphalt batch plant near Cantwell used aggregate from a quarry on Trust land to repair a section of the Parks Highway.

Right: The Trust has received more than $4 million in revenue over the past three years from timber harvested on Trust land near Leask Lake in Southeast Alaska.

Trust property adjacent to South Point Higgins Beach is being purchased by Ketchikan Gateway Borough. The property is highly valued by Ketchikan residents for its recreation and beach access.

Sluggish Economy Slows Trust Fund Growth

Due to the economic slowdown during the 2008 fiscal year, the cash assets of the Alaska Mental Health Trust decreased 7.2 percent from the record-high balance of the prior year. Our investments managed by the Alaska Permanent Fund Corporation (APFC) declined from $438,513,700 at the close of FY2007 to $406,981,200 at the end of FY2008.

These investments experienced a $15,575,000 loss for FY2008 compared to earnings of $62,448,000 for FY2007. Statutory net income determined by APFC (which does not include unrealized gains or losses) was $33,912,300 for FY2008 and $39,733,300 for FY2007. Statutory net income increases the Budget Reserve and can be used to fund the mental health budget, while unrealized net income can only be applied to inflation proof our Principal investment.

The reserve investments managed on behalf of The Trust by the Treasury Division of the Department of Revenue were also impacted by the economic uncertainty of 2008. The loss on this account was $1,914,200 in FY2008, compared to earnings of $4,586,200 in FY2007.

The Trust's payout rate, which is used to calculate the disbursement (or payout) for the mental health budget, was increased at the end of FY2007 from 4 percent to 4.25 percent beginning with the FY2008 budget. The following financial performance from FY2008 is available for funding in FY2009:

- Disbursement (payout) rate of 4.25 percent, for a payout of $19,102,185.
- Resource management revenue allocated as income was $2,579,683.
- Interest on the Income Account at Treasury Division was $1,846,172.
- Lapsed funds from prior fiscal years were $4,356,596.
- Total funding available for FY2009 is $27,884,636. This is a 3.6 percent increase from FY2008 availability of $26,904,396.

Since the end of FY2008, the financial slowdown has become a full-blown recession with the investments market falling sharply. In the first quarter of FY2009, we experienced more than a 25 percent reduction in our total asset value. Based on this trend, we are expecting FY2010 available income to fund the budget to be substantially less than FY2009.

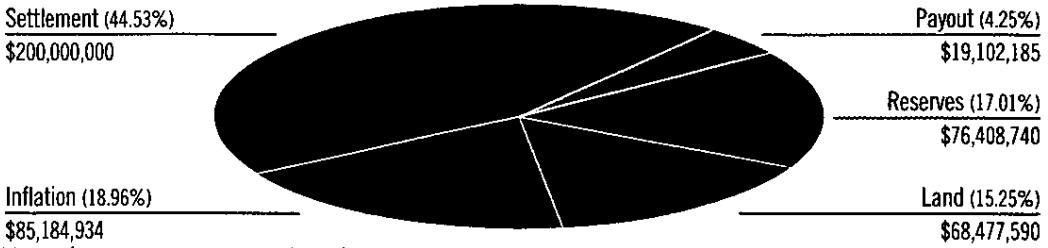
Trust Cash Assets at End of FY2008



Housing Trust Offers Housing Solutions

More than 150 policy makers, social service providers, business leaders and housing experts convened in Anchorage in December 2007 to discuss development of the Alaska Housing Trust as a mechanism for providing affordable, supportive housing for Alaska's low-income and vulnerable populations, including Trust beneficiaries. The theme of the two-day Alaska Housing Summit was "Opportunity Begins with a Home." The Alaska Housing Trust could fund construction of new housing or subsidize existing units that would also provide the kind of supportive services residents need to become stable, dependable tenants for our communities.

The Trust, the Alaska Housing Finance Corporation and a statewide coalition of housing planners and advocates took the housing message to Juneau during the 2008 legislative session. Their goal was an initial $10 million investment to establish the Alaska Housing Trust. While the Legislature stopped short of creating a specific Housing Trust Fund, legislators appropriated an additional $2.5 million to the Homeless Assistance Program already in AHFC's program base. The Trust committed $1 million to the program and AHFC was given authority to receive up to $2.5 million in donations from private foundations.

Based on the Legislature's backing for supportive housing in 2008, The Trust and its partners are committed to working with legislators in 2009 to create an acceptable governing structure for a stand-alone Housing Trust to assist low-income and vulnerable populations in finding and keeping stable, appropriate housing.

Housing Summit speakers included Alaska Housing Finance Corporation CEO Dan Fauske and Renee Sinclair, a former Washington State legislator and housing advocate.

9

Budgeting for FY2010

Each year the Board of Trustees makes recommendations to the governor and the Legislature regarding expenditure of Trust funds and other state dollars to help pay for Alaska's Comprehensive Integrated Mental Health Program. These recommendations comprise the Mental Health Budget Bill. During the 2009 legislative session, The Trust will seek approval of our FY2010 operating and capital budgets. Following are highlights of the projects and programs being planned for the next fiscal year in each of The Trust focus areas.

DISABILITY JUSTICE

- Expanding therapeutic courts to other communities,
- Continuing the partnership with Anchorage and Fairbanks police departments for crisis intervention team training, which instructs law enforcement on disorders experienced by Trust beneficiaries and appropriate intervention techniques, and
- Launching a juvenile therapeutic court to direct young people to the appropriate treatment and services and prevent them from entering the correctional system in the future.

AFFORDABLE APPROPRIATE HOUSING

- Assisting housing developers and service providers in business planning for supported housing and
- Improving and integrating the state funding systems available to housing developers and service providers for supported housing.

BRING THE KIDS HOME

- Expanding outpatient capacity to work with youth and families at home and avoid residential treatment and
- Establishing early childhood interventions that can mitigate the severity of mental illnesses among youth, thus preventing the future need for higher levels of care.

BENEFICIARY PROJECTS INITIATIVE

- Enhancing the Alaska Peer Support Consortium by increasing the capacity to assist grassroots programs and beneficiaries wishing to provide peer-to-peer support and
- Improving the credibility of peer-operated services within the traditional provider network.

WORKFORCE DEVELOPMENT

- Continuing to develop training capacity at the Trust Training Cooperative and
- Supporting expansion of student loan repayment for health care professionals through a state program.

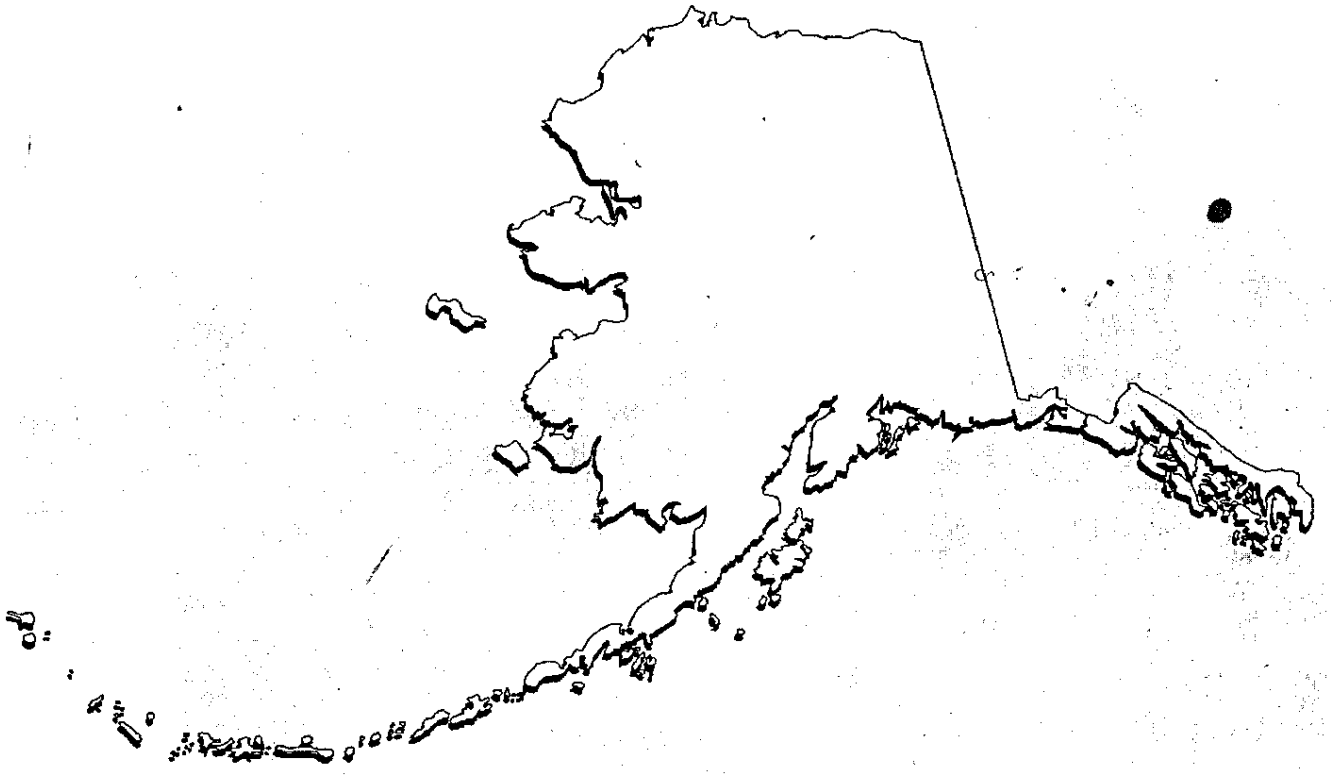
The Fiscal Year 2010 Budget:

Legislative Fiscal Analyst's Overview of the Governor's Request



Legislative Finance Division

http://www.legfin.state.ak.us/

The Legislative Fiscal Analyst Office has a professional, non-partisan staff that provides general budget analysis for members of the legislature and specifically supports the Legislative Budget and Audit Committee and the House and Senate standing finance committees. Each fiscal analyst is assigned agency areas of responsibility. Duties of the office are to:

(1) analyze the budget and appropriation requests of each department, institution, bureau, board, commission or other agency of state government;
(2) analyze the revenue requirements of the state;
(3) provide the finance committees of the legislature with comprehensive budget review and fiscal analysis services;
(4) cooperate with the Office of Management and Budget in establishing a comprehensive system for state budgeting and financial management as set out in the Executive Budget Act (AS 37.07);
(5) complete studies and prepare reports, memoranda or other materials as directed by the Legislative Budget and Audit Committee;
(6) with the Governor's permission, designate the legislative fiscal analyst to serve ex officio on the Governor's budget review committee. [AS 24.20.231]

Legislative Finance Budget System. The system tracks budget transactions and provides comparative reports for committees and subcommittees. In addition, the system is used to produce the Governor's budget request books, the general appropriations bills, Conference Committee reports and a breakdown of the capital budget by House district.

Introduction

As required by law, the Governor released her FY2010 budget proposal to the public and the legislature on December 15, 2008. The Legislative Finance Division prepared this Overview of the Governor's proposal and "subcommittee books" for each agency in accordance with AS 24.20.211-231.

Alaska's Fiscal Situation

For the first time in five years, State Senators and Representatives will begin a legislative session facing the prospect of a fiscal gap. Although the fiscal summary prepared at the end of the 2008 session anticipated a surplus of $350 million for FY09, an unprecedented drop in oil prices since then has turned a projected surplus into a projected $360 million deficit. And that projection is based on an average FY09 oil price of $78/barrel. If oil averages $40/barrel for the remainder of FY09, the deficit will be almost $2 billion—after paying $745 million as a resource rebate and depositing $1 billion into the Constitutional Budget Reserve Fund. (See the FY09 Sensitivity Chart on page 2.)

The FY2010 fiscal situation is equally sensitive to oil prices. The official Department of Revenue projection is that oil will average $74/barrel during FY2010. At that price, revenue will be sufficient to support the budget proposed by the Governor; as shown on line 46 of the fiscal summary on page 4, a pre-savings surplus of about $150 million is projected.

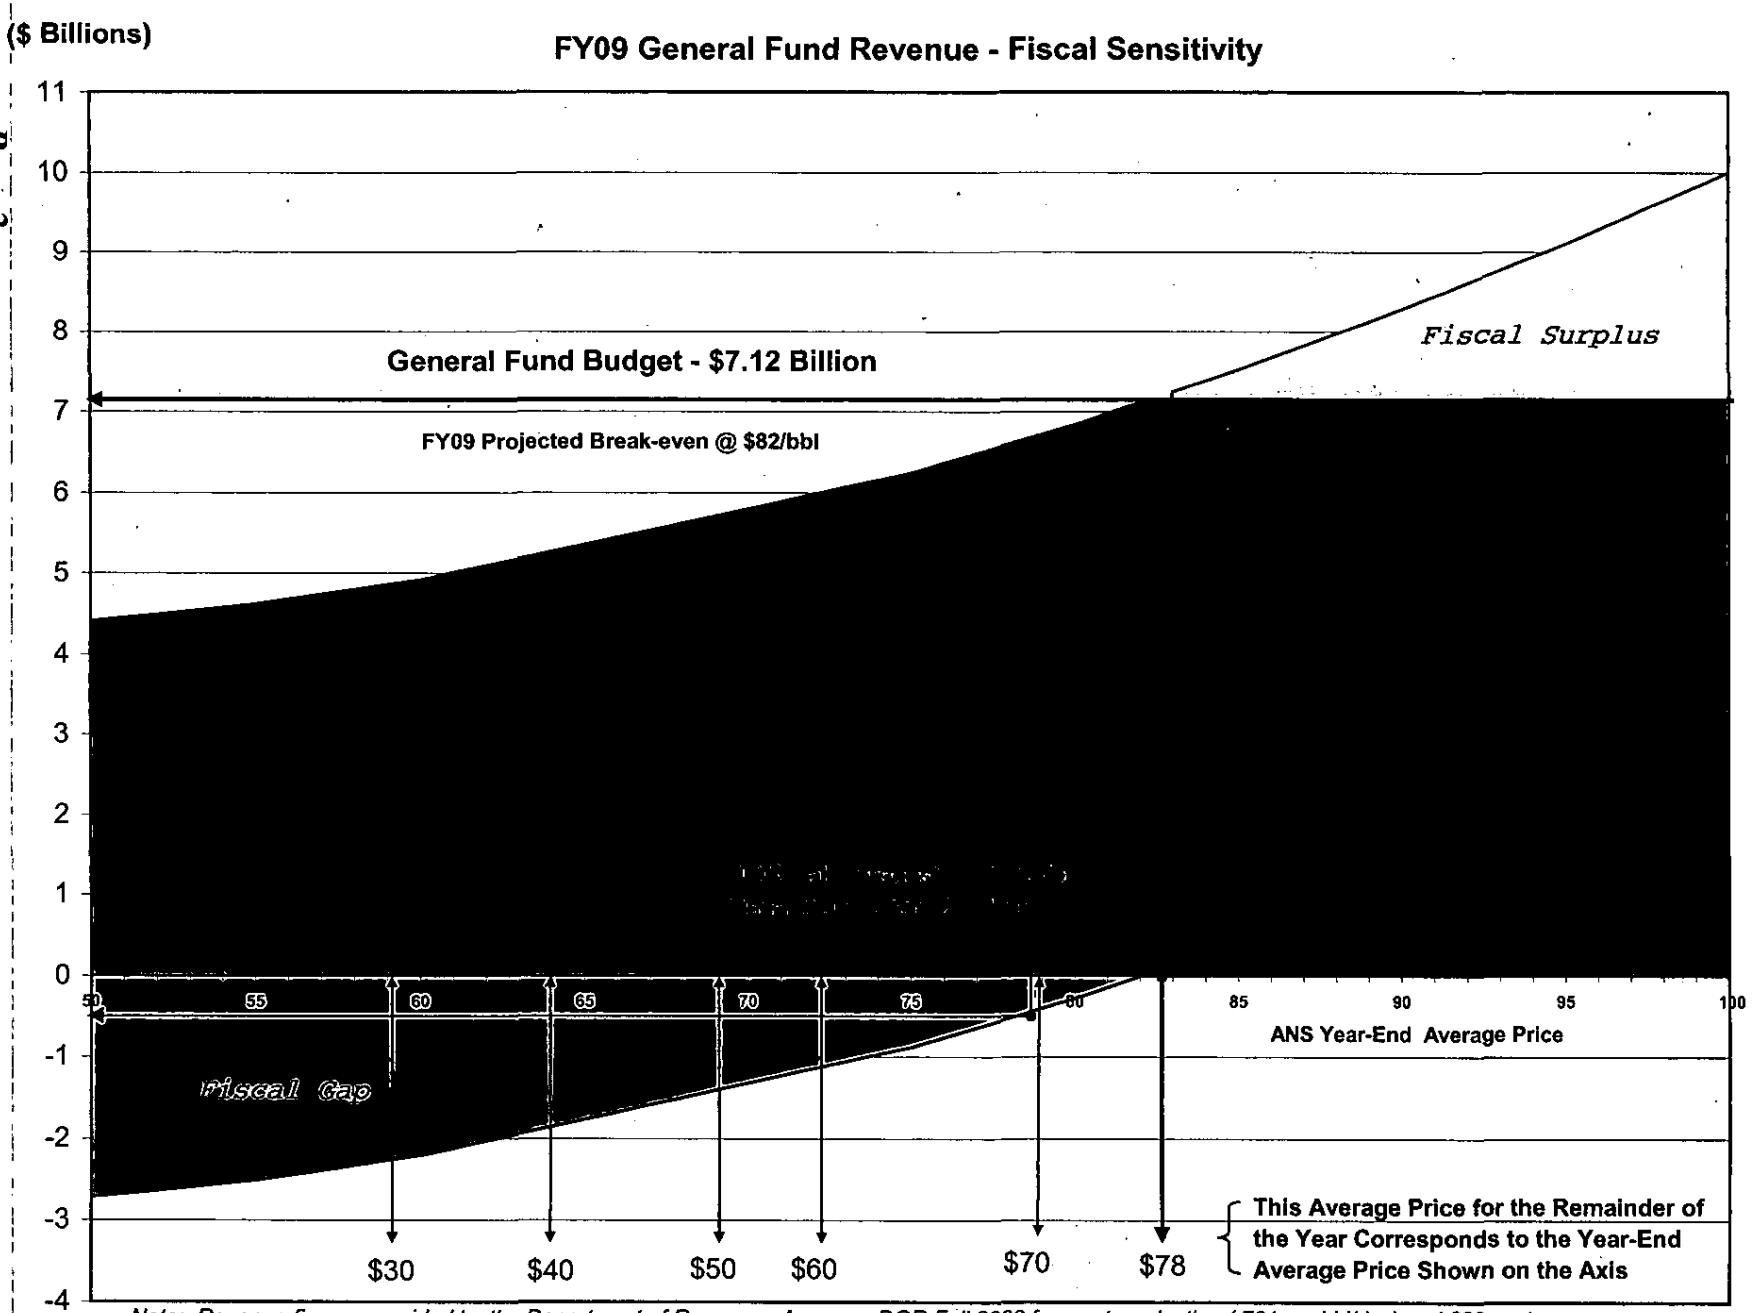
With oil now selling at less than $40/barrel, some legislators have questioned whether the official revenue forecast ($74/barrel oil) for FY2010 is a useful planning tool. Legislative Finance has used the official forecast for years, but finds a sensitivity chart to be a more useful tool than a specific dollar projection. The FY2010 Sensitivity Chart on page 3 shows how the surplus/deficit situation changes with oil prices (assuming adoption of the Governor's proposed spending level of $5.13 billion general funds):

- $74 oil (the official forecast) produces a surplus of $148 million;
- $73 oil produces a balanced budget;
- $55 oil produces a deficit of about $2 billion; and
- $35 to $40 oil produces a deficit of about $3.5 billion.[1]

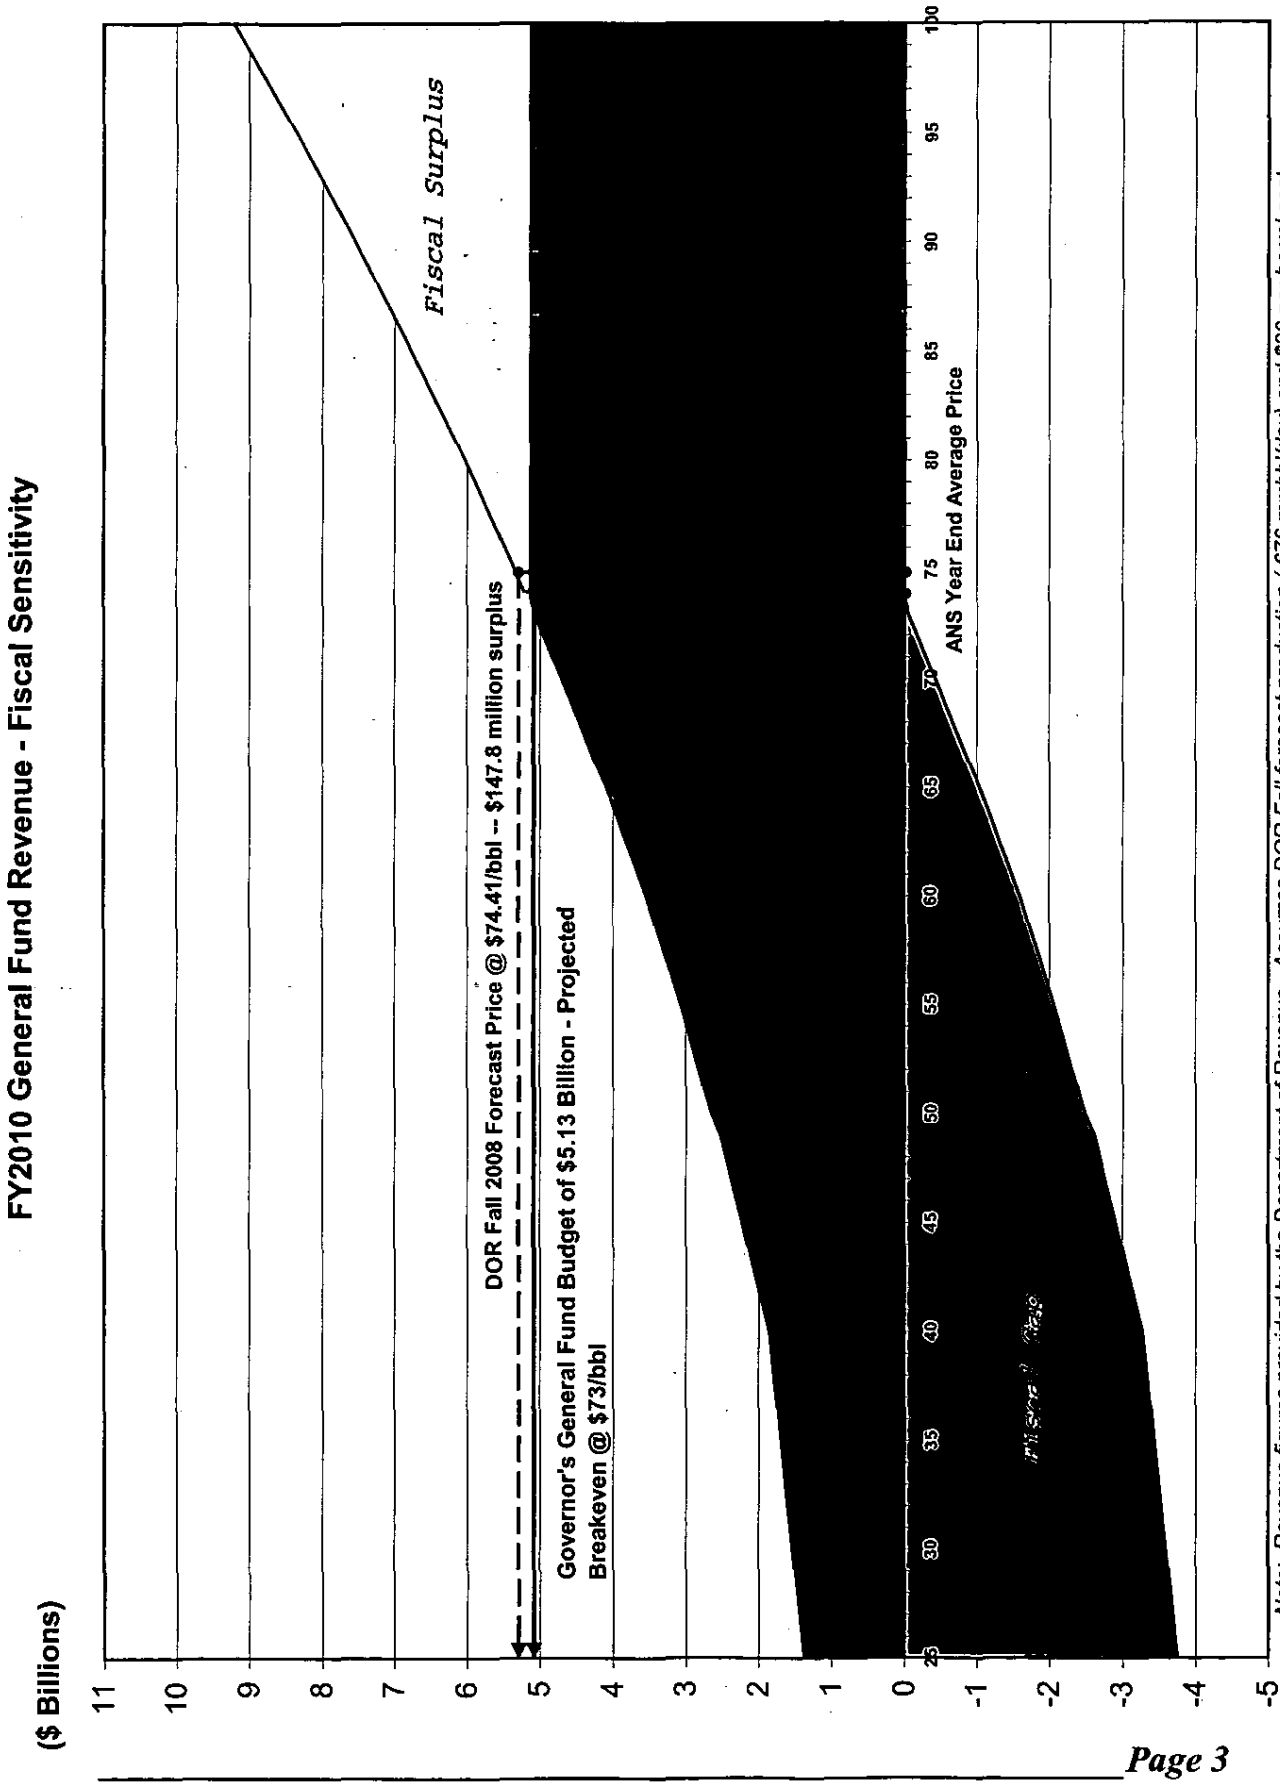
In summary, Alaska may be challenged with unprecedented levels of deficits (or budget reductions) unless and until oil prices rebound significantly. The combined deficit for FY09 and FY2010 could reach $5 billion.

Perhaps the only good news related to oil prices is that historically high prices in recent years allowed Alaska to develop an unprecedented level of reserves. As an example of the massive savings effort in recent years, consider the status of the Constitutional Budget Reserve Fund (CBRF). Withdrawals from the CBRF have been used to fill budget gaps almost every year since 1991, and it took 15 years to accrue a general fund debt to the CBRF of $5.2 billion. The legislature repaid over $4.6 billion of that liability since oil prices began climbing. Even with

[1] The sensitivity charts are vast oversimplifications of revenue forecasting techniques. They show only average oil prices for the year, while revenue at any average price is affected significantly by month-to-month price volatility because of the progressive nature of the tax. Although the charts can easily misstate annual revenue by $100 million or more at any price point, they are useful as a guide to determining the surplus/deficit at various oil prices.



Note: Revenue figures provided by the Department of Revenue. Assumes DOR Fall 2008 forecast production (.701 mmbbl/day) and $20 cost estimates. Revenue figures include sources not directly affected by oil prices. Budget figures include operating, capital and savings.



Note: Revenue figures provided by the Department of Revenue. Assumes DOR Fall forecast production (.676 mmbbl/day) and $20 per barrel cost estimates. Revenue figures include sources not directly affected by oil prices. Budget figures include operating and capital.

Notes:

January 15, 2009

(1) The Fall 2008 revenue forecast for FY09 is 0.701 mmbd at $77.66 per barrel; the FY2010 forecast is 0.676 mmbd at $74.41/bbl.

(2) Carryforward is money that was appropriated in a prior year that is made available for spending in FY09 via multiyear appropriations or reappropriations.

(3) Corporate dividends include funds made available to the State by the boards of AHFC, AIDEA, and ASLC. Dividends retained by AHFC for debt service on state capital project bonds are excluded from the stated amount. Net dividends for FY09 and FY2010, respectively, are AHFC-$59.7 million and $65.5, AIDEA-$23.8 million and $22.7 million, and ASLC-$4.1 million and $0.0 million.

(4) Duplicated authorizations are in the budget twice, such as when funds flow in and out of a holding account or one agency pays another for services provided. Duplicated authorization also includes the expenditure of bond proceeds when debt service on bonds (which includes repayment of principal) will be reflected in future operating budgets.

(5) The state is responsible for future debt service payments on airport revenue bonds and GO bonds. Bond proceeds are included on line 36 and 37 and are deducted on line 40.

recent investment losses, the balance in this savings account exceeds $6 billion. The legislature has added to other savings accounts as well:

- $1 billion to the Statutory Budget Reserve Fund;
- $1.1 billion to the Public Education Fund; and
- $300 million to the AHFC Capital Corporation savings account.

Without these reserves, Alaska's FY2010 budget could resemble a list of catastrophic spending reductions. Alaska's more than $8 billion in reserves (excluding money held by the Permanent Fund) allows the state to take a studied approach to the fiscal situation—turning what could be a short-term crisis into a longer-term planning challenge.

The Governor's Response to the Fiscal Situation

This discussion focuses on what the Governor proposed in her budget, not on whether the Governor's budget shows too much or too little response to the fiscal situation. That topic will undoubtedly be fodder for legislative debate; this review is intended to give context to that debate by dividing the budget into four topics:

1. **Agency operating budgets** are perhaps the best description of the public perception of "the budget"—they include money for Medicaid, K-12 education and other grant programs as well as the money to operate all public agencies. Because they are often perceived as providing necessary public services, agency operating budgets are notoriously difficult to cut, even in response to declining revenue.
2. **Statewide operations** include some items that are sticky in the sense that they depend on prior commitments and are difficult to change in the short term. These items include debt service and retirement system costs. Other items—community revenue sharing and the resource rebate, for example—are designed to spend money only when money is available. This part of the budget can be more responsive to changes in revenue.
3. **Capital budgets** act as shock absorbers in many states; capital spending increases when revenue is available and decreases—in some cases to little more than the matching amount required to receive federal grants—when state revenue declines. In Alaska, capital spending is sometimes perceived as more desirable than operating spending because it "brings the money home" to the people that want infrastructure and economic development.
4. **Savings** is the portion of the budget that is most responsive to revenue spikes. That status does little to reduce controversy; "How much should be saved?" was certainly a topic when oil revenue spiked. Similarly, revenue declines are sure to lead to questions/debate: "Should we withdraw from savings or focus on cutting expenses?" "Which savings account should be the source of withdrawals?" "How long will savings last if we.....?".

The graph on page 6 breaks Alaska's general fund budgets into the four topics described above. There are a few patterns worth noting:

- Agency budgets grew rapidly during the revenue spikes in the early 1980s and 2005-2008, but were stable when revenue did not support growth.
- Statewide operations were a decreasing part of the budget as GO bonds were repaid by FY00. The recent increase is due primarily to the cost of retirement contributions, capital expense credits against oil and gas production taxes, and the FY09 resource rebate.

- Capital budgets jump during periods of surplus revenue and fade to little more than the minimum required for federal match when money is tight.
- Savings occur only during revenue spikes.

This review focuses on general funds, not because other funds are unimportant, but because the difference between unrestricted general fund spending and unrestricted general fund revenue defines the fiscal gap.[2]

1. **Agency operating budget** growth was $336 million (11%) from FY08 to FY09. The Governor's proposed increase from FY09 is less than one-third as large—$92 million (2.7%).

   - Most of the increase in agency operations can be categorized as "unavoidable".
     - $51 million is due to K-12 education formula changes that were specified in advance,
     - $31 million is associated with salary increases for state employees, and
     - $3 million is associated with a Governor's bill that reduced business license fees.

   The sum of these items may appear to imply that the Governor's budget contains few increases other than "unavoidable" items. But there were some items in FY09 agency operating budgets that are not repeated in the FY2010 request. These items understate the FY2010 increase by $43 million.

   - Funding for Power Cost Equalization was increased by $23 million for FY09 due to extraordinarily high fuel prices. The FY09 funding was a short-term fix and the issue is to be readdressed this session; it will be interesting to see the Governor's proposal for permanent changes to the program.
   - Funding for increased fuel and utility costs was $44 million in FY09, and is $24 million in FY2010. Given current fuel prices, the reduction is not out of line. It is, however, inconsistent with the official oil price forecast (see discussion of section 13 of the Governor's proposed language). At the official forecast, the fuel appropriation should be $7 million higher in order to match the schedule used in FY09.

   Beyond a few large items, attempting to classify increases as "unavoidable" or "discretionary" is not particularly productive; opinions will always vary. But reviewing recent budget growth can help put the FY2010 budget in perspective. The 2.7% increase in agency operations in FY2010 is the smallest in several years. Since FY05, agency operating costs have increased between ten and 15% annually.

2. **The statewide operating budget** proposed for FY2010 is $843 million less than the statewide operating budget for FY09. This decline does not indicate any significant change in policy direction; the decline is due to:

   - Elimination of the $1,200 per person one-time resource rebate—$745 million.

[2] State unduplicated funds should arguably be the focus of any multi-year budget analysis. That fund group is more comprehensive, more consistently defined and more informative than the general fund group. Finance Committee Co-chairs have indicated an interest in reviewing the budget reporting system in order to provide clearer, more meaningful information on state spending and revenue.

- A reduction in anticipated claims for oil and gas development credits—$100 million.
- Elimination of one-time capitalization of loan funds—$16 million ($11 million for fuel purchases and $5 million for improved safety electronics in private aircraft).

There is a $13 million increase in debt service, almost all of it associated with the sale of $315 million in general obligation bonds for FY09 capital projects and an increase in debt for correctional centers.

Retirement contributions offer substantial flexibility. Actuarial recommendations allow the state to reduce retirement contributions by about $160 million in FY2010. The Governor proposed no reduction of contributions. But there is more to this story:

- State retirement systems have an unfunded liability of several billion dollars. Although there is considerable flexibility in determining a repayment schedule, the liability must eventually be disposed of.
- The legislature has avoided actions that would have reduced state retirement contribution rates—essentially opting to pay down the unfunded liability when revenue was high.
- The fiscal situation has changed—the outlook is for deficits rather than surpluses.
- Maintaining savings balances offers a more flexible planning environment than can be achieved by paying down retirement system unfunded liability. In the current fiscal situation, the legislature may wish to reexamine its policy positions on "extra" retirement payments and on making changes (to actuarial methods) that could modify the shape of the long-term curve representing required retirement contributions.

3. **Capital budgets** are put together under a different concept than operating budgets. While operating budgets are incremental—meaning that each year there are increments (and more rarely, decrements) to a base budget that moves forward from one year to the next—capital budgets start over every year. Compared to operating budgets, capital budgets are often far more responsive to changes in revenue.

   The Governor's capital budget proposal is $114 million (20%) less than the FY09 capital budget adopted by the legislature. It is perhaps more useful/interesting to compare the FY2010 proposal with the FY09 proposal. In that regard, the FY2010 proposal is $194 million greater in general funds and $310 million greater in federal funds than the Governor's FY09 proposal. Other funds are down $416 million; the FY09 Governor's budget proposed spending $300 million in bond proceeds and $168 million from the capital income fund. Please see the capital budget discussion in this *Overview* for additional details.

4. **Savings** is the portion of the Governor's budget that most clearly exhibits a policy position. Saving for the future was one of the Governor's two major policy initiatives in FY09. She proposed making deposits to a transportation endowment, an energy fund, the Permanent Fund and the Public Education Fund. While few of these plans came to fruition, the legislature deposited nearly $1.2 billion to savings in FY09 (along with over $5 billion of FY08 revenue).

   As shown in the fiscal summary (line 47), the Governor's proposed budget spends $235 million from savings accounts. Given a pre-savings surplus of $148 million (line 46), withdrawing from savings accounts is a peculiar policy decision. After withdrawing from savings accounts, there is a projected FY2010 surplus of $383 million (line 59) that (absent an appropriation to the contrary) will be swept into the Constitutional Budget

Reserve Fund (CBRF) at year end. Effectively, the proposed budget transfers $235 million from other savings accounts to the CBRF.

- The proposed budget spends $238 million from the Alaska Housing Capital Corporation account—a savings account the legislature created with a $300 million general fund deposit in FY07. The Legislative Finance fiscal summary shows this item as a withdrawal from the savings account and a corresponding increase in general fund expenditures. The Governor shows the item as an expenditure of "other" funds rather than of general funds. Further, the expenditure is classified in the Governor's budget as a duplicated expenditure so it shows as a net zero item.

- Section 18(w) of the Governor's operating budget bill appropriates $1.062 billion from the general fund to the Public Education Fund (PEF) in FY2010. This amount is $9.5 million more than required to fund K-12 education in FY2010, so the fiscal summary shows a $9.5 million deposit to savings.

  But there has been an effort to forward fund K-12 education in recent years. The concept of forward funding is that the amount appropriated in a given year will be the amount required in the following year. In this regard, the Governor's $1.062 billion appropriation is $50 million short of forward funding the anticipated $1.112 billion cost of K-12 education in FY2011.

  Although the Governor's action leaves the Public Education Fund with a balance (nearly) sufficient to fund anticipated FY2011 K-12 expenditures, this is possible only because the balance of the Public Education Fund included a surplus that was intended to provide a cushion in case expenditures exceed expectations. While not technically a withdrawal from savings, the Governor's proposal reduces the PEF balance by $50 million compared to the forward funding concept adopted by the legislature.

- The Governor's budget also calls for spending $12 million of proceeds from the Cruise Ship Gambling Tax. The Governor classifies the revenue as "other" funds despite their inclusion (by the Department of Revenue) in the forecast of unrestricted general funds. To further complicate the matter, the FY2010 budget spends revenue from both FY09 and FY2010 ($6 million from each year). The Legislative Finance fiscal summary shows the use of gambling tax proceeds as a $6 million savings deposit in FY09 offset by a $6 million withdrawal in FY2010 (line 52).

Further Analysis

Although the fiscal summary provides a concise statement (and comparison) of projected revenue, appropriations and the size of the anticipated surplus or deficit, it has the limitation of being Alaska's budget-on-a-page. This *Overview* contains more detailed discussions of the proposed FY2010 budget:

- Agency summaries (operating budget on pages 11 & 12 and capital budget beginning on page 49) provide a quick comparison of the Governor's proposed budget with FY09 spending.
- Greater detail is available in the discussions of the operating budget (and subtopics) and the agency write-ups beginning on page 67.

Also, subcommittee members will want to review the detailed agency books available in the Finance Committee rooms.

THIS PAGE INTENTIONALLY LEFT BLANK

Operating Budget

The fiscal summary provides a "big picture" of the budget, including not only the operating budget, but also the capital budget, revenue, debt service, transfers and new legislation. This introduction to the operating budget focuses on how to put the Governor's operating request in perspective.

Budget comparisons across fiscal years are always difficult—there are so many adjustments required to get an "apples-to-apples" comparison that a complete discussion would push the limits of the term "overview." These details are better left to subcommittees. The agency discussions in this overview serve as a starting point for subcommittee discussion, and subcommittee books provide more detailed information.

Each subcommittee book compares the Governor's request to two scenarios: FY09 Management Plan and FY2010 Adjusted Base. The advantages and disadvantages of using each of the comparisons are discussed in the paragraphs below. The following table highlights items included throughout each stage of the budget.

		GF Only	Change from FY09 Mgt Plan	Change from FY2010 Adj Base
FY2009 Management Plan (GF Only)		**3,428,123.5**		
	One-Time Items removed	(142,788.3)		
	Transfers between Agencies (nets zero statewide)	-		
	FY2010 Contractual Salary and Health Increases	26,917.0		
	Misc Adjustments	50,408.6		
FY2010 Adjusted Base Budget (GF Only)		**3,362,660.8**	**(65,462.7)**	
	FY2010 Unrealizable Salary Fund Source Changes	3,886.6		
	FY2010 Governor's GF Increment/Decrements/Fund Changes	128,335.0		
FY2010 Governor's Request (GF Only)		**3,494,882.4**	**66,758.9**	**132,221.6**

FY09 Management Plan to the Governor's request: $66.8 million. Management Plan is the most accurate picture of the previous year's budget. It incorporates all appropriations that can be spent in FY09, including reappropriations and carryforward from multi-year appropriations, and reflects the latest estimates for open-ended language appropriations. Management Plan excludes supplemental appropriations (because they have not yet occurred) but any FY2010 supplemental appropriations that may occur are also excluded, so there is no distortion from this source.

However, the Governor's FY2010 budget does not include reappropriations and carryforward from multi-year appropriations, so comparing the FY09 Management Plan to the Governor's FY2010 request tends to understate spending in FY2010 relative to FY2009. The amount carried forward to FY09 was about $20 million.

One-time items are a far larger source of distortion. For example, a $23 million appropriation to Power Cost Equalization is included in the FY09 Management Plan, but it is not expected to be repeated in FY2010. The PCE appropriation makes the FY2010 budget $23 million lower than the FY09 budget.

FY2010 Adjusted Base to Governor's request: $132.2 million. The adjusted base attempts to reduce distortion in comparing budgets across fiscal years. It is the first FY2010 budget scenario and can be described as the "cost of doing the same functions in FY2010 as in FY09." The adjusted base is the starting point for subcommittee discussion of the Governor's request.

- It removes one-time appropriations, reappropriations, and carryforward of multi-year appropriations that were included in the FY09 Management Plan.
- It incorporates the FY2010 nondiscretionary increases that the legislature may accept or reject on a statewide basis. If the legislature rejects these nondiscretionary increases, such as contractual salary increases, the costs of these increases will have to be absorbed by the agencies.

The FY2010 Adjusted Base includes increases for the salary adjustments below:

- **Contractual Wage and Health Insurance Increases for Bargaining Units**—Negotiated agreements for covered employees for contractual salary increases (which vary by bargaining unit) and increased health insurance costs add $56.6 million statewide ($31.7 million GF, $5.6 million Federal Receipts and $19.3 million in Other Funds).

The **Governor's column** includes program increments and fund source changes that the legislature may wish to consider on an individual basis. Note that the concept of adjusted base is useful only for agency operating budgets. Savings deposits and statewide items—debt service, fund transfers, retirement contributions, etc.—are not budgeted on an incremental basis and are not reviewed by subcommittees.

The following summary tables make the comparisons discussed above. Note that Agency Summary reports include duplicated fund sources, while the fiscal summary removes these items from the operating portion of the budget. Also note that the adjusted base is set at the Governor's request for items other than agency operating budgets.

Please see the agency narratives for details on significant issues in each agency's budget.

In addition to summaries of agency budgets, the *Overview* contains discussions of fund source changes for increased salary costs (general funds replacing federal and "other" fund sources), position changes and details of debt obligations.

Position Comparison

The Governor's FY2010 operating budget request increases permanent full-time (PFT) positions by 45 from the FY09 Revised Management Plan. In addition, 70 PFTs were added during FY09 to the number authorized by the legislature, so the total increase from the FY09 authorized level is 115. Overall, the Governor's FY2010 statewide budget contains 24,496 total positions (full-time, part-time, and temporary).

AS 39.25 (State Personnel Act) establishes the system of personnel administration within the state and describes the governor's authority to create and appoint positions within the executive branch. Positions (i.e. Position Control Numbers – PCNs) do not necessarily equate to the number of actual employees. More than one person can fill a single PCN, and many PCNs are vacant.

Permanent Full-time Positions Only

Non-Duplicated State Funding

Traditionally, comparisons of the Governor's operating budget have been made using two "Agency Summary" reports—a report comparing *total funds* (includes all federal, general, and other funds) and a report comparing only *general funds*.

This Overview includes a third report comparing differences in *non-duplicated state funding*. Over the years, several fund sources have moved from the general funds (GF) group to the "other funds" group. Although transferring funding from GF to the "other fund" group does not affect total spending, it does make it more difficult to see the true level of overall state spending.

The *State Funds* report shows all non-duplicated funds except federal receipts. Duplicate counting occurs when money is appropriated more than once. For example, an appropriation of general funds may be used to capitalize the Debt Retirement fund, and money in the Debt Retirement Fund may then be appropriated to pay debt service. Appropriations from the Debt Retirement Fund are classified as "duplicated." Reports using this fund group will not match the appropriations bill because the appropriations bill includes duplicated appropriations.

Agency Summary - FY 2010 Operating Budget - Non-Duplicated State Funds

Agency	08Actual	09 CC	09 Auth	09MP Rev	Adj Base	Gov	09MP Rev to Gov		Adj Base to Gov

Fund Source Changes for Salary Adjustments

The Governor's FY2010 budget includes increases for rising insurance costs and negotiated salary agreements. There is a two-step process for allocating these cost increases among the various fund sources that pay the salaries and benefits of state employees.

- **Step One: allocate costs in proportion to current funding.** This allocation of costs goes in the *adjusted base* column—meaning that the costs are considered unavoidable and that there will be a single decision to incorporate the costs in the FY2010 budget. If the Finance Committee Chair decide to incorporate the cost increases at a statewide level, subcommittees will not be discussing the associated increments.
- **Step Two: replace "unavailable" fund sources with general funds.** Fund change transactions that reallocate costs among fund sources appear in the *Governor* column—meaning that subcommittees will be discussing the requested fund changes on an agency-by-agency basis.

The Governor's request replaces $3.9 million of federal and "other" funds with general funds. There are several reasons a fund source may be replaced. Finance Subcommittees need to examine each agency's fund source changes to determine whether the changes are justified. The following discussion highlights issues around some of the fund source changes, followed by questions subcommittees may want to consider to help them make decisions.

Fund source changes for programs supported by revenue, fund balances, or grants.

- **Revenue.** Many programs are supported by revenue generated by the programs. For instance, fees for use of the state parks are used to support the parks. If salary costs increase, should fees be increased to cover these costs? Or, due to statutory or other considerations, is a fee increase desirable?
- **Funds and accounts with "low" balances.** Some examples are the Fish and Game Fund, Commercial Fisheries Entry Commission receipts, Agricultural Revolving Loan Fund and the Oil/Hazardous Release Prevention & Response Fund. These funds are (or have been) spending at an unsustainable rate.
- **Grants that don't increase when costs increase.** Many grants are a set amount that does not increase as costs increase. Other grants have limits on overhead costs.

Fund source examples for the **revenue, fund balances,** and **grants** issues:

1002 Fed Rcpts	1027 IntAirport	1109 Test Fish	1180 A/D T&P Fd
1014 Donat Comm	1052 Oil/Haz Fd	1141 RCA Rcpts	1189 SeniorCare
1016 CSSD Fed	1053 Invst Loss	1153 State Land	1194 F&G NonDed
1005 GF/Prgm	1054 STEP	1154 Shore Fish	1201 CFEC Rcpts
1018 EVOS Trust	1055 IA/OIL HAZ	1155 Timber Rcp	
1021 Agric RLF	1076 Marine Hwy	1156 Rcpt Svcs	
1024 Fish/Game	1092 MHTAAR	1157 Wrkrs Safe	

Questions subcommittees may want to ask agencies:

- Is there a possibility of collecting more revenue for the program/project?

- If a fund balance exists, is it possible (or desirable) to draw more from the fund?
- Should the program absorb the cost of the salary adjustments?
- Should the state use GF for this program?
- Should the state subsidize a program that has been self-sustaining?

Fund source changes for contractual services.

- **Statutorily Designated Program Receipts (SDPR) (1108)** consists of program receipts for projects initiated by a third party that are outside the scope of an agency's normal business.
  - If a third party is contracting with the state to do something outside the scope of the agency's normal business, should the contract reflect the full costs of doing the third party's work?
- **Interagency (I/A) Receipts (1007)** consists of amounts transferred between appropriations under contractual Reimbursable Services Agreements (RSAs). For example, the Department of Labor and Workforce Development (Labor) may contract with the Department of Administration (DOA) for human resources services. Because Labor is primarily funded with federal funds, federal funds are used to pay DOA (it shows in DOA's budget as I/A Receipts). When general funds replace I/A receipts in DOA's budget, the state pays for the federal government's fair share of the cost of providing human resources to Labor.
- **Highways Equipment Working Capital Fund (Hwy Capital) (1026)** are receipts from rental fees and surcharges to various departments for equipment rental, repair and supplies.

The following questions apply to SDPR, I/A, and HwyCapital:

- When the cost of doing business rises, should the agency receiving services pay for the increment with the appropriate fund source?
- Would it be preferable to appropriate GF to the recipient of services rather than the provider of services? An increment in the receiving agency makes the budget clearer.

Fund source changes for Capital Improvement Project (CIP) Receipts

- **CIP Receipts (1061)** consist of amounts transferred from capital projects to the operating budget for project operating costs. As a project's operating costs increase, are additional CIP receipts available?

Language Sections of the Governor's FY2010 Operating Budget

Section Deleted; appeared in FY09 Operating Budget

LEGISLATIVE INTENT. (a) It is the intent of the legislature that the amounts appropriated by this Act are the full amounts that will be appropriated for those purposes for the fiscal year ending June 30, 2009.

Legislative Fiscal Analyst Comment: *In recent years the legislature has taken steps to reduce the need for routine supplemental appropriations. The intent of this section was to emphasize that supplemental operating appropriations are designed to be limited to needs that are truly unanticipated.*

(b) It is the intent of the legislature that money appropriated from the general fund be expended conservatively. If an appropriation includes the unexpended and unobligated balance of program receipts collected in a prior fiscal year, it is the intent of the legislature that the program receipts be expended, as allowed, before the expenditure of other money appropriated from the general fund. It is the intent of the legislature that the office of management and budget and the Department of Administration assist the legislature in carrying out this intent.

Legislative Fiscal Analyst Comment: *The legislature may wish to discuss the impact of this section, in terms of both general fund savings and accounting headaches. The legislature may wish to consider revising the language to allow a limited amount of carryforward of program receipts in those programs in which carryforward acts as a cushion against fluctuations in receipts.*

Section Deleted; appeared in FY09 Operating Budget

COSTS OF JOB RECLASSIFICATIONS. The money appropriated in this Act includes the amount necessary to pay the costs of personal services due to reclassification of job classes during the fiscal year ending June 30, 2009.

Legislative Fiscal Analyst Comment: *This section was added by the legislature several years ago in response to agency requests for supplemental appropriations to cover the costs of reclassification of selected job classes that the legislature was not informed of in advance. The section clarifies that the cost of reclassifying positions is to be absorbed in an agency's existing budget.*

Section Deleted; appeared in FY09 Operating Budget

PERSONAL SERVICES TRANSFERS. It is the intent of the legislature that agencies restrict transfers to and from the personal services line. It is the intent of the legislature that the office of management and budget submit a report to the legislature on January 15, 2009, that describes and justifies all transfers to and from the personal services line by executive branch agencies during the first half of fiscal year 2009. It is the intent of the legislature that the office of management and budget submit a report to the legislature on August 1, 2009, that describes and justifies all transfers to and from the personal services line by executive branch agencies during the second half of fiscal year 2009.

* **Sec. 4.** ALASKA AEROSPACE DEVELOPMENT CORPORATION. Federal receipts and other corporate receipts of the Alaska Aerospace Development Corporation received during the

fiscal year ending June 30, 2010, that are in excess of the amount appropriated in sec. 1 of this Act are appropriated to the Alaska Aerospace Development Corporation for operations during the fiscal year ending June 30, 2010.

Legislative Fiscal Analyst Comment: *This section is intended to maximize the AADC's ability to attract launch activity by eliminating all questions regarding the corporation's ability to accept and spend receipts in a timely manner.*

Funding: The estimated impact of this section is zero. Historically, the appropriations to AADC in section 1 have been sufficient to avoid application of this section.

*** Sec. 5.** ALASKA PERMANENT FUND CORPORATION. (a) The amount authorized under AS 37.13.145(b) for transfer by the Alaska Permanent Fund Corporation on June 30, 2010, is appropriated from the earnings reserve account (AS 37.13.145(a)) to the dividend fund (AS 43.23.045(a)) for the payment of permanent fund dividends and administrative and associated costs for the fiscal year ending June 30, 2010.

Subsection a appropriates funds from the earnings reserve account to the dividend fund for payment of dividends and administrative and associated costs. Earnings in FY2010 (as calculated on the last day of the fiscal year) will be used to pay PFDs in FY2010 and associated costs throughout FY2010.

Funding: The projected amount of dividend transfer for FY2010 is $1,168 billion, including administrative and associated costs. Administrative and associated costs for FY2010 are reflected in section 1 of the budget. They include the cost of operating the PFD Division, hold-harmless provisions that affect people served by the Department of Health & Social Services and "cost recovery" programs in various departments.

(b) After money is transferred to the dividend fund under (a) of this section, the amount calculated under AS 37.13.145(c) to offset the effect of inflation on the principal of the Alaska permanent fund during fiscal year 2010 is appropriated from the earnings reserve account (AS 37.13.145(a)) to the principal of the Alaska permanent fund.

Subsection b is an "inflation proofing" provision, which transfers money from the Earnings Reserve Account to principal.

Funding: The projected amount of inflation proofing for FY2010 is $872 million.

(c) The amount required to be deposited under AS 37.13.010(a)(1) and (2) during fiscal year 2010 is appropriated to the principal of the Alaska permanent fund in satisfaction of that requirement.

Subsection c appropriates 25% of mineral lease rentals, royalties, royalty sales, etc. to the principal of the Permanent Fund as required by constitution or statute.

Funding: These deposits to the Permanent Fund do not appear in the bill summary or in Legislative Finance reports because the deposits are constitutionally dedicated rather than appropriated. The Permanent Fund projects that dedicated deposits will be $659 million during FY2010.

*** Sec. 6.** DEPARTMENT OF ADMINISTRATION. The amount necessary to fund the uses of the state insurance catastrophe reserve account described in AS 37.05.289(a) is appropriated from that account to the Department of Administration for those uses during the fiscal year ending June 30, 2010.

This section references the statute that allows up to $5 million to be swept from lapsing general fund appropriations for the catastrophe reserve account. It appropriates funds from the catastrophe reserve account to the Department of Administration to obtain insurance, establish reserves for the self-insurance program, and to satisfy claims or judgments arising under the program.

Legislative Fiscal Analyst Comment: *This section re-emphasizes the state's authority to expend funds from the state insurance catastrophe reserve account described in AS 37.05.289(a). The language may not be necessary, but it does no harm.*

Legislative Fiscal Analyst Comment: *The catastrophe reserve account sweeps lapsing general fund appropriations annually to maintain a balance not to exceed $5 million. If these funds were not available, two opportunities would remain for meeting catastrophic situations: 1) supplemental appropriations by the legislature; and 2) judgment legislation. Delays that could occur with legislative remedies would cause difficulty in situations that require immediate action.*

Funding: This provision has no FY2010 fiscal impact; it allows money appropriated elsewhere to be transferred/spent but does not increase total appropriations.

* **Sec. 7.** DEPARTMENT OF COMMERCE, COMMUNITY, AND ECONOMIC DEVELOPMENT. (a) The unexpended and unobligated balance of federal money apportioned to the state as national forest income that the Department of Commerce, Community, and Economic Development determines would lapse into the unrestricted portion of the general fund June 30, 2010, under AS 41.15.180(j) is appropriated as follows:

(1) up to $170,000 is appropriated to the Department of Transportation and Public Facilities, commissioner's office, for road maintenance in the unorganized borough, for the fiscal year ending June 30, 2010;

(2) the balance remaining after the appropriation made by (1) of this subsection is appropriated to home rule cities, first class cities, second class cities, a municipality organized under federal law, or regional educational attendance areas entitled to payment from the national forest income for the fiscal year ending June 30, 2010, to be allocated among the recipients of national forest income according to their pro rata share of the total amount distributed under AS 41.15.180(c) and (d) for the fiscal year ending June 30, 2010.

Subsection 1 appropriates $170,000 of National Forest Receipts to DOT&PF for road maintenance in the unorganized borough.

Subsection 2 appropriates any remaining balance to be paid as grants to local governments in the unorganized borough.

Legislative Fiscal Analyst Comment: *National Forest receipts consist of national forest income received by DCCED for the portion of national forests located within the unorganized borough. By law, 75 percent of the income is allocated to public schools and 25 percent for maintenance of public roads in the unorganized borough.*

Legislative Fiscal Analyst Comment: *AS 41.15.180(j) states that the amount in the national forest receipts fund remaining at the end of the fiscal year lapses into the general fund and shall be used for school and road maintenance in the affected areas of the unorganized borough for which direct distribution has not been made. The amount appropriated in subsection 1 ($170.0) has not changed for several years.*

Legislative Fiscal Analyst Comment: *Subsection 2 appears to change the intended purpose of lapsing receipts. Under AS 41.15.180(j) lapsing money must be spent in areas*

that do not receive money under AS 41.15.180(c) and (d). Subsection 2 takes money that would otherwise be spent in unorganized areas and appropriates it to local governments.

(b) An amount equal to the salmon enhancement tax collected under AS 43.76.010 - 43.76.028 in calendar year 2008 and deposited in the general fund under AS 43.76.025(c) is appropriated from the general fund to the Department of Commerce, Community, and Economic Development for payment in fiscal year 2010 to qualified regional associations operating within a region designated under AS 16.10.375.

Funding: These "pass through" amounts are excluded from Legislative Finance reports on the operating bill.

(c) An amount equal to the seafood development tax collected under AS 43.76.350 - 43.76.399 in calendar year 2008 and deposited in the general fund under AS 43.76.380(d) is appropriated from the general fund to the Department of Commerce, Community, and Economic Development for payment in fiscal year 2010 to qualified regional seafood development associations.

Funding: These "pass through" amounts are excluded from Legislative Finance reports on the operating bill.

(d) If the amount necessary to pay power cost equalization program costs without proration from the power cost equalization and rural electric capitalization fund (AS 42.45.100) exceeds the amount appropriated in sec. 1 of this Act, the amount necessary to pay those costs is appropriated from the power cost equalization and rural electric capitalization fund (AS 42.45.100) to the Department of Commerce, Community, and Economic Development, Alaska Energy Authority, power cost equalization allocation, for the fiscal year ending June 30, 2010.

NEW SUBSECTION: Subsection d makes the appropriation from the power cost equalization (PCE) fund to the PCE open-ended; if program costs exceed the amount appropriated in section 1, Subsection d authorizes additional transfers up to the amount required to fully fund PCE.

Funding: The estimated impact of this section is zero.

Legislative Fiscal Analyst Comment: *Subsection d addresses the (fairly common) problem of a shortage in the PCE program despite the availability of money in the PCE fund. However, it goes beyond addressing that situation when combined with the language in section 18(c), which is an open-ended appropriation that ensures the PCE formula is fully funded.*

Section Deleted; appeared in FY09 Operating Budget

DEPARTMENT OF EDUCATION AND EARLY DEVELOPMENT. The sum of $4,800,000 is appropriated from the general fund to the Department of Education and Early Development for the school incentive program for the fiscal year ending June 30, 2009.

Legislative Fiscal Analyst Comment: *The legislature decided not to extend the pilot program.*

* **Sec. 8.** DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT. (a) If the amount necessary to pay benefit payments from the fishermen's fund (AS 23.35.060) exceeds the amounts appropriated in sec. 1 of this Act, the additional amount necessary to pay those benefit payments is appropriated from that fund to the Department of Labor and Workforce Development, fishermen's fund allocation, for the fiscal year ending June 30, 2010.

This section allows benefit payments to exceed the amount appropriated in section 1, ensuring that expenditure authorization will be sufficient to pay benefits required by law.

Funding: The estimated impact of this section is zero.

(b) If the amount necessary to pay benefit payments from the second injury fund (AS 23.30.040(a)) exceeds the amount appropriated in sec. 1 of this Act, the amount necessary to make those benefit payments is appropriated from the second injury fund to the Department of Labor and Workforce Development, second injury fund allocation, for the fiscal year ending June 30, 2010.

This section allows benefit payments to exceed the amount appropriated in section 1, ensuring that expenditure authorization will be sufficient to pay benefits required by law.

Funding: The estimated impact of this section is zero.

(c) If the amount necessary to pay benefit payments from the workers' compensation benefits guaranty fund (AS 23.30.082) exceeds the amount appropriated in sec. 1 of this Act, the additional amount necessary to pay those benefit payments is appropriated from that fund to the Department of Labor and Workforce Development, workers' compensation benefits guaranty fund allocation, for the fiscal year ending June 30, 2010.

This section allows benefit payments to exceed the amount appropriated in section 1, ensuring that expenditure authorization will be sufficient to pay benefits required by law.

Funding: The estimated impact of this section is zero.

* **Sec. 9.** DEPARTMENT OF MILITARY AND VETERANS' AFFAIRS. Five percent of the market value of the average ending balances in the Alaska veterans' memorial endowment fund (AS 37.14.700) for the fiscal years ending June 30, 2007, June 30, 2008, and June 30, 2009, is appropriated from the Alaska veterans' memorial endowment fund to the Department of Military and Veterans' Affairs for the purposes specified in AS 37.14.730(b) for the fiscal year ending June 30, 2010.

Funding: Endowment payout is expected to be about $12,500. Proceeds may be used for maintenance, repair and construction of monuments to the military.

* **Sec. 10.** DEPARTMENT OF NATURAL RESOURCES. Federal receipts received for fire suppression during the fiscal year ending June 30, 2010, are appropriated to the Department of Natural Resources for fire suppression activities for the fiscal year ending June 30, 2010.

This section appropriates an open-ended amount of federal receipts received for fire suppression to the Department of Natural Resources.

Funding: A $2 million federal receipts estimate for fire suppression has been used for several years.

Section (b) Deleted; appeared in FY09 Operating Budget

The sum of $523,000 is appropriated from the general fund to the Department of Natural Resources for the petroleum systems integrity office for the fiscal year ending June 30, 2009.

Legislative Fiscal Analyst Comment: *The Governor's FY2010 budget includes this item in section 1.*

* **Sec. 11.** DEPARTMENT OF PUBLIC SAFETY. (a) The sum of $1,393,200 is appropriated from the general fund to the Department of Public Safety, division of Alaska state troopers, narcotics task force, for drug and alcohol enforcement efforts during the fiscal year ending June

30, 2010.

Subsection a appropriates $1.4 million in general funds for drug and alcohol enforcement efforts.

(b) If the amount of federal receipts received by the Department of Public Safety from the justice assistance grant program during the fiscal year ending June 30, 2010, for drug and alcohol enforcement efforts exceeds $1,289,100, the appropriation in (a) of this section is reduced by the amount by which the federal receipts exceed $1,289,100.

Subsection b is contingency language that requires a dollar-for-dollar reduction of the previous subsection's general funds if DPS receives over $1.3 million in federal grants for drug and alcohol enforcement efforts.

Legislative Fiscal Analyst Comment: *The FY09 operating budget included similar language. DPS received $1,560,940 of federal funds for this purpose resulting in a reduction of $271,840.*

Funding: Because the amount of federal funds for FY2010 is unknown, Legislative Finance is estimating the cost of the section to be the full $1.4 million in general funds.

(c) The sum of $1,270,000 is appropriated from the general fund to the Department of Public Safety, division of Alaska state troopers, special projects, for rural alcohol interdiction efforts during the fiscal year ending June 30, 2010.

Subsection c appropriates $1.3 million in general funds for rural alcohol interdiction efforts.

(d) If federal receipts are received by the Department of Public Safety for the rural alcohol interdiction program during the fiscal year ending June 30, 2010, the appropriation in (c) of this section is reduced by the amount of the federal receipts.

Subsection d is contingency language that requires a dollar-for-dollar reduction of the previous subsection's general funds if DPS receives over $1.3 million in federal grants for drug and alcohol enforcement efforts.

Legislative Fiscal Analyst Comment: *The FY09 operating budget included similar language. DPS received $715.5 of federal funds for this purpose resulting in an equal reduction of general funds.*

Funding: Because the amount of federal funds for FY2010 is unknown, Legislative Finance is estimating the cost of the section to be the full $1.3 million in general funds.

* **Sec. 12.** DEPARTMENT OF REVENUE. (a) The minimum amount of program receipts received during the fiscal year ending June 30, 2010, by the child support services agency that is required to secure the federal funding appropriated from those program receipts for the child support enforcement program in sec. 1 of this Act is appropriated to the Department of Revenue, child support services agency, for the fiscal year ending June 30, 2010.

Subsection a permits an unspecified amount of program receipts collected by the Child Support Services Division (CSSD) to be spent to capture the federal receipts appropriated in section 1.

Legislative Fiscal Analyst Comment: *The Federal Deficit Reduction Act of 2005 changed the way states could use money earned from federal incentives. In the past, state child support programs could use federal incentive receipts as part of the required 34%*

match to federal receipts; this practice reduced the amount of state funds needed to maximize the federal receipts. Effective in federal fiscal year 2008, federal rules prohibit using federal incentive receipts as matching funds for federal receipts from the child support program. As a result, the division requested $1.9 million of general funds in section 1. This section is unlikely to have any effect. The section could be deleted, but it does no harm.

Funding: The estimated impact of this section is zero.

(b) Program receipts collected as cost recovery for paternity testing administered by the child support services agency, as required under AS 25.27.040 and 25.27.165, and as collected under AS 25.20.050(f), are appropriated to the Department of Revenue, child support services agency, for the fiscal year ending June 30, 2010.

Subsection b appropriates (to CSSD) receipts collected to recover the costs of paternity testing.

Funding: The Department estimates that paternity testing will generate $47,000 in program receipts.

*** Sec. 13.** OFFICE OF THE GOVERNOR. (a) If the 2010 fiscal year-to-date average price of Alaska North Slope crude oil exceeds $35 a barrel on August 1, 2009, the amount of money corresponding to the 2010 fiscal year-to-date average price, rounded to the nearest dollar, as set out in the table in (b) of this section is appropriated from the general fund to the Office of the Governor for distribution to state agencies to offset increased fuel and utility costs.

(b) The following table shall be used in determining the appropriation amount in (a) of this section:

2010 FISCAL YEAR-TO-DATE AVERAGE PRICE OF ALASKA NORTH SLOPE CRUDE OIL	AMOUNT
$60 or more	$24,000,000
59	23,500,000
58	23,000,000
57	22,000,000
56	21,000,000
55	20,000,000
54	19,000,000
53	18,000,000
52	17,000,000
51	16,000,000
50	15,000,000
49	14,000,000

48	13,000,000
47	12,000,000
46	11,000,000
45	10,000,000
44	9,000,000
43	8,000,000
42	7,000,000
41	6,000,000
40	5,000,000
39	4,000,000
38	3,000,000
37	2,000,000
36	1,000,000
35	0

(c) It is the intent of the legislature that a payment under (a) of this section be used to offset the effects of higher fuel and utility costs for the fiscal year ending June 30, 2010.

(d) The governor shall allocate amounts appropriated in (a) of this section as follows:

(1) to the Department of Transportation and Public Facilities, 65 percent of the total plus or minus 10 percent;

(2) to the University of Alaska, eight percent of the total plus or minus three percent;

(3) to the Department of Health and Social Services and the Department of Corrections, not more than five percent each of the total amount appropriated;

(4) to any other state agency, not more than four percent of the total amount appropriated;

(5) the aggregate amount allocated may not exceed 100 percent of the appropriation.

Subsection a appropriates up to $24 million depending on the year-to-date average price of crude oil on August 1, 2009. This funding is to be distributed to agencies to offset increased fuel and utility costs.

Subsection b indicates, based on the price of oil, how much funding is appropriated in subsection a.

Subsection c states legislative intent that the funding is to offset fuel and utility cost increases.

Subsection d provides guidelines for allocating the money among agencies.

Funding: OMB included a $24 million appropriation for fuel in its budget transmittal.

Legislative Fiscal Analyst Comment: *Similar trigger mechanisms appear to have*

functioned as designed—providing funding for fuel during the past few years without permitting high fuel costs to become part of the base budget—and the legislature may wish to continue the concept. Note, however, that the above schedule is inconsistent with the official oil price forecast; the schedule shows oil prices up to $60 while the official oil forecast is $74. In theory, the schedule should extend beyond the forecast price. Extending the schedule to the official forecast would add $7 million to the estimate of the appropriation. Extending the schedule beyond the forecast price adds nothing to the estimated appropriation, but it would cover the contingency of higher-than-anticipated oil prices.

Subsection Deleted; appeared in FY09 Operating Budget

(e) The sum of $3,670,800 is appropriated from the general fund to the Office of the Governor, division of elections, for costs associated with conducting the statewide primary and general elections for the fiscal year ending June 30, 2009.

Subsection e appropriates general funds to cover the costs of 2008 statewide elections.

Legislative Fiscal Analyst Comment: *This one-time funding for elections was removed from the FY2010 base.*

*** Sec. 14.** UNIVERSITY OF ALASKA. The amount of the fees collected under AS 28.10.421(d) during the fiscal year ending June 30, 2009, for the issuance of special request university plates, less the cost of issuing the license plates, is appropriated from the general fund to the University of Alaska for support of alumni programs at the campuses of the university for the fiscal year ending June 30, 2010.

Funding: The University expects to receive about $2,000 under this section.

*** Sec. 15.** BOND CLAIMS. The amount received in settlement of a claim against a bond guaranteeing the reclamation of state, federal, or private land, including the plugging or repair of a well is appropriated to the agency secured by the bond for the fiscal year ending June 30, 2010, for the purpose of reclaiming the state, federal, or private land affected by a use covered by the bond.

This section is standard language that appropriates claims against bonds for land reclamation to the agencies that will direct the reclamation.

Funding: The Department of Natural Resources estimates the impact of this section to be $25,000.

*** Sec. 16.** GAS PIPELINE DEVELOPMENT. The following amounts are appropriated to the named department and components from the following sources in the amounts stated for work associated with development of a natural gas pipeline for the fiscal year ending June 30, 2010:

DEPARTMENT AND COMPONENT	SOURCE	APPROPRIATION AMOUNT
(1) Fish and Game		
Habitat and restoration	Interagency receipts	$180,000
(2) Labor and Workforce Development		
(A) Labor market information	General fund	145,000
(B) Business services	General fund	585,000
(C) Alaska Workforce		
Investment Board	General fund	130,000
(3) Law		
Oil, gas, and mining	General fund	1,250,000
(4) Natural Resources		
(A) Oil and gas development	General fund	391,700
(B) Pipeline coordinator	Statutory designated	
	Program receipts	2,500,000
(5) Revenue		
Natural gas commercialization	General fund	771,000

NEW SECTION: This section appropriates funding to multiple departments for development work associated with the natural gas pipeline.

Legislative Fiscal Analyst Comment: *In FY09, the legislature consolidated oil and gas development funding requests in the Office of the Governor, with direction to distribute the one-time funding of $7.3 million GF to the departments of Labor and Workforce Development, Natural Resources, Law, and Revenue as needed for work associated with the Natural Gas Pipeline. Consolidation was intended to increase flexibility and track how much was being appropriated for gasline work. OMB did not take advantage of the flexibility provided, and consolidation in section 16 has the advantage of correctly identifying each appropriation with an agency.*

* **Sec. 17.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as described in AS 44.21.045(b), Exxon Valdez oil spill trust receipts described in AS 37.05.146(b)(4), receipts of the Alaska Housing Finance Corporation, receipts of the Alaska marine highway system fund described in AS 19.65.060(a), receipts of the University of Alaska as described in AS 37.05.146(b)(2), and receipts of the Alaska Fire Standards Council described in AS 37.05.146(b)(5) that are received during the fiscal year ending June 30, 2010, and that

exceed the amounts appropriated by this Act, are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) that are received during the fiscal year ending June 30, 2010, exceed the amounts appropriated by this Act, the appropriations from state funds for the affected program shall be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) that are received during the fiscal year ending June 30, 2010, fall short of the amounts appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

Subsection a provides open-ended appropriations of the types of receipts listed. Although the appropriations are conditioned on review by the Legislative Budget and Audit Committee, the Governor can increase authorization for listed fund sources without the approval of the Committee.

NEW FUND SOURCE LISTED: Receipts of the University of Alaska is a FY2010 addition to the list of funds that can be increased upon LB&A committee review. There is no indication of the reason for the addition.

Subsection b is standard language that permits state authorization to be reduced if unanticipated money is received for projects funded by general funds. There is no formal process for tracking potential reductions.

Subsection c is standard language that automatically limits authorization of federal and other receipts to the amount actually received.

Funding: Although requests for approval to spend additional receipts will almost certainly be received, there is no way to determine where the increases will be, how much they will be, or what fund sources would be appropriate. Legislative Finance reports place no dollar value on appropriations made in this section.

*** Sec. 18.** FUND TRANSFERS. (a) The following amounts are appropriated to the Alaska debt retirement fund (AS 37.15.011):

(1) the sum of $118,670,100 from the general fund;

(2) the sum of $12,007,700 from federal receipts for state-guaranteed transportation revenue anticipation bonds, series 2003B;

(3) the sum of $2,837,400 from the investment earnings on the bond proceeds deposited in the capital project funds for the series 2003A general obligation bonds;

(4) the sum of $877,400 from the investment earnings on the bond proceeds deposited in the capital project fund for the state guaranteed transportation revenue anticipation bonds, series 2003B;

(5) the sum of $26,000 from the investment loss trust fund (AS 37.14.300);

(6) if the debt retirement fund balance is insufficient to pay the debt service obligations on the State of Alaska general obligation bonds, series 2003A and 2009A, the amount necessary is appropriated from the general fund.

Subsection a is summarized below:

Capitalization of the Debt Retirement Fund

Subsec	Fund Source	FY2010 Debt Service	Details
1	General Funds	118,670.1	Non-specific capitalization
2	Federal Receipts	12,007.7	Federal receipts to pay series 2003B GO Bonds
3	Capital Project Fund	2,837.4	Investment earnings receipts to pay series 2003A GO Bonds
4	Capital Project Fund	877.4	Investment earnings receipts to pay series 2003B GO Bonds
5	ILTF	26.0	Non-specific capitalization
6	General Funds	.0	Contingency funding for GO Bonds
	TOTAL DEPOSITS	**$134,418.6**	

New Subsection a (6) is an open-ended appropriation that appears to be intended to ensure that there is sufficient money to pay GO bond debt service.

Legislative Fiscal Analyst Comment: *The provision makes sense on the surface, given that the series 2009 bonds have not yet been sold, so the amount of debt service is unknown. However, because the various appropriations to the fund are not tied to specific debt service payments, the effect is that any shortage in the fund could be attributed to debt service on GO bonds. The weakness of this funding method is that it allows the amount of general fund capitalization to be understated. This situation could be avoided by specifying what type of debt service each appropriation to the fund is intended for, but that approach runs the risk of underfunding debt service. The legislature may prefer to simply deposit enough money to the debt retirement fund to leave a margin of safety.*

(b) The sum of $20,892,700 from the power cost equalization endowment fund (AS 42.45.070) is appropriated to the power cost equalization and rural electric capitalization fund (AS 42.45.100).

Subsection b capitalizes the PCE Fund with seven percent of the average value of the PCE Endowment ($20.9 million).

(c) The amount necessary, estimated to be $10,379,300, is appropriated from the general fund to the power cost equalization and rural electric capitalization fund (AS 42.45.100) for payment of power cost equalization for the fiscal year ending June 30, 2010.

Subsection c capitalizes the PCE Fund with $10.4 million in general funds. When combined with the appropriation in (b) this appropriation provides the $32.2 million needed to fully fund the PCE program appropriations made in section 1.

Legislative Fiscal Analyst Comment: *The appropriation in (c) is open-ended. This appropriation, in combination with section 7(d), ensures full funding of the PCE formula. The PCE program is up for review this session; section 18(c) will provide full funding under any changes made to the formula.*

(d) The federal funds received by the state under 42 U.S.C. 6506a(l) or former 42 U.S.C. 6508 not appropriated for grants under AS 37.05.530(d) are appropriated as follows:

(1) to the principal of the Alaska permanent fund and the public school trust fund (AS 37.14.110), according to AS 37.05.530(g)(1) and 37.05.530(g)(2); and

(2) to the principal of the Alaska permanent fund, the public school trust fund (AS 37.14.110), and the power cost equalization and rural electric capitalization fund (AS 42.45.100), according to AS 37.05.530(g)(3).

Subsection d (per AS 37.05.530(g)) appropriates the lapsing balance of NPR-A grants. No lapsing balance is anticipated.

Funding: The estimated fiscal impact of this section is zero.

(e) An amount calculated under AS 43.55.028(c), not to exceed $300,000,000 is appropriated from the general fund to the oil and gas tax credit fund (AS 43.55.028(a)).

Legislative Fiscal Analyst Comment: The amount appropriated to this fund—which is used to purchase transferable tax credit certificates and production tax certificates—in FY09 was $400 million. The legislature may wish to ask the Department of Revenue to describe cash flows into and out of the fund.

(f) The following amounts of revenue collected during the fiscal year ending June 30, 2010, are appropriated to the fish and game fund (AS 16.05.100):

(1) receipts from the sale of crewmember fishing licenses (AS 16.05.480(a)) that are not deposited into the fishermen's fund under AS 23.35.060;

(2) range fees collected at shooting ranges operated by the Department of Fish and Game (AS 16.05.050(a)(15));

(3) fees collected at boating and angling access sites described in AS 16.05.050(a)(6) and managed by the Department of Natural Resources, division of parks and outdoor recreation, under a cooperative agreement;

(4) receipts from the sale of waterfowl conservation stamp limited edition prints (AS 16.05.826(a));

(5) fees collected for sanctuary access permits (AS 16.05.050(a)(15)).

Subsection f appropriates revenue generated by the named licenses and fees into the Fish and Game Fund. Appropriations from this revenue source use the Fish and Game Nondedicated Receipts fund code (1194) to differentiate these appropriations (which are essentially GF appropriations) from the dedicated portion of the Fish and Game Fund.

Funding: The estimated fiscal impact of this subsection is $2.3 million.

(g) The following amounts are appropriated to the oil and hazardous substance release prevention account (AS 46.08.010(a)(1)) in the oil and hazardous substance release prevention and response fund (AS 46.08.010) from the sources indicated:

(1) the balance of the oil and hazardous substance release prevention mitigation account (AS 46.08.020(b)) in the general fund on July 1, 2009, not otherwise appropriated by this Act;

(2) the amount collected for the fiscal year ending June 30, 2009, estimated to be $11,100,000, from the surcharge levied under AS 43.55.300.

Subsection g is standard language appropriating (to the Oil and Hazardous Substance Release Prevention Account) the balance of the Release Prevention Mitigation Account and the FY09 collections from the 4 cent per barrel surcharge on oil produced in the state. Amendments effective April 1, 2006 changed the per barrel surcharge from $0.03 to $0.04.

(h) The following amounts are appropriated to the oil and hazardous substance release response account (AS 46.08.010(a)(2)) in the oil and hazardous substance release prevention and response fund (AS 46.08.010) from the following sources:

(1) the balance of the oil and hazardous substance release response mitigation account (AS 46.08.025(b)) in the general fund on July 1, 2009, not otherwise appropriated by this Act;

(2) the amount collected for the fiscal year ending June 30, 2009, from the surcharge levied under AS 43.55.201;

Subsection h is standard language appropriating (to the Oil and Hazardous Substance Release Response Account) the balance of the Release Response Mitigation Account and the FY09 collections from the $0.01 cent per barrel surcharge on oil produced in the state. Amendments effective April 1, 2006 changed the per barrel surcharge from $0.02 to $0.01.

Funding: Based on a five-year average, the projected balance of the response mitigation account that will be transferred under this section is approximately $600,000. The surcharge collected under paragraph (2) became effective when the balance of the Response Account dropped below $50 million. The drop in the balance is due to a Department of Law request for $8.8 million to investigate two oil spills which occurred in 2006 from transit pipelines operated by BP in Prudhoe Bay oil field.

Legislative Fiscal Analyst Comment: *Based on the current balance and annual collections of $2.3 million from the one cent surcharge, the surcharge may be in effect for a few more years.*

(i) The portions of the fees listed in this subsection that are collected during the fiscal year ending June 30, 2010, are appropriated to the Alaska children's trust (AS 37.14.200):

(1) fees collected under AS 18.50.225, less the cost of supplies, for the issuance of birth certificates;

(2) fees collected under AS 18.50.272, less the cost of supplies, for the issuance of heirloom marriage certificates;

(3) fees collected under AS 28.10.421(d) for the issuance of special request Alaska children's trust license plates, less the cost of issuing the license plates.

Subsection i appropriates (to the Alaska Children's Trust) net receipts collected during FY2010 from sales of heirloom birth certificates, heirloom marriage certificates and Trust license plates.

The Alaska Children's Trust was created by Chapter 19, SLA 88. The legislature appropriated $6 million from the investment loss trust fund to the principal of the trust in Chapter 123, SLA 96. The trust was established to provide a continuing source of revenue for grants to community-based programs for the prevention of child abuse and neglect.

Funding: *OMB projects $39.5 net proceeds from the sale of certificates/plates.*

(j) The loan origination fees collected by the Alaska Commission on Postsecondary Education for the fiscal year ending June 30, 2010, are appropriated to the origination fee account (AS 14.43.120(u)) within the education loan fund (AS 14.42.210) of the Alaska Student Loan Corporation for the purposes specified in AS 14.43.120(u).

Subsection j appropriates origination fees charged on student loans to the origination fee account within the student loan fund. The fees are intended to offset loan losses due to death, disability, bankruptcy and default.

Funding: The amount of the loan origination fee is capped by regulation at 5% and set annually by the corporation. For FY2010, the Alaska Commission on Postsecondary Education has indicated that the maximum fee of 5% will be set. It is currently set at 3%. Because the appropriation earmarks money within a fund, there is no impact on state expenditures.

(k) The amount of federal receipts received for disaster relief during the fiscal year ending June 30, 2010, is appropriated to the disaster relief fund (AS 26.23.300).

Subsection k is standard language appropriating federal receipts for disaster relief to the Disaster Relief Fund. The Governor needs no specific appropriations to spend money in the Disaster Relief Fund; money can be spent upon declaration of a disaster.

Funding: A $9 million estimate for federal disaster relief receipts has been used for several years.

(l) The sum of $7,500,000 is appropriated from the general fund to the disaster relief fund (AS 26.23.300).

Subsection l capitalizes the Disaster Relief Fund with $7.5 million of general funds. FY09 capitalization was $16 million.

(m) The balance of the mine reclamation trust fund income account (AS 37.14.800(a)) on June 30, 2009, and money deposited in that account during the fiscal year ending June 30, 2010, is appropriated to the mine reclamation trust fund operating account (AS 37.14.800(a)) for the fiscal year ending June 30, 2010. The amount necessary for the purposes specified in AS 37.14.820 for the fiscal year ending June 30, 2010, is appropriated from the mine reclamation trust fund operating account (AS 37.14.800(a)) to the Department of Natural Resources.

Subsection m authorizes an internal transfer of funds from the income account to the operating account, where it is available to DNR to spend without further appropriation.

Funding: The agency estimates the amount needed for mine reclamation expenditures is about $75,000.

(n) The sum of $6,000,000 is appropriated to the Alaska clean water fund (AS 46.03.032) for the Alaska clean water loan program from the following sources:

Alaska clean water fund revenue bond receipts	$1,000,000
Federal receipts	5,000,000

(o) The sum of $7,660,000 is appropriated to the Alaska drinking water fund (AS 46.03.036) for the Alaska drinking water loan program from the following sources:

Alaska drinking water fund revenue bond receipts	$1,660,000
Federal receipts	6,000,000

Subsections n and o provide money to develop sewer and water systems in Alaska communities through revolving loan programs. The state typically issues short-term

bonds that are repaid with earnings from the loan programs, and uses the bond proceeds to match federal money.

(p) The amount of municipal bond bank receipts determined under AS 44.85.270(h) to be available for transfer by the Alaska Municipal Bond Bank Authority for the fiscal year ending June 30, 2009, is appropriated to the Alaska municipal bond bank authority reserve fund (AS 44.85.270(a)).

Subsection p appropriates earnings of the Bond Bank to its earnings reserve fund.

Funding: *Earnings for FY09 were $250,000 and a similar amount is expected in FY2010.*

(q) The bulk fuel revolving loan fund fees established under AS 42.45.250(j) and collected under AS 42.45.250(k) from July 1, 2008, through June 30, 2009, estimated to be $45,000, are appropriated from the general fund to the bulk fuel revolving loan fund (AS 42.45.250).

Subsection q attempts to appropriate fee revenues to the bulk fuel revolving loan fund.

Legislative Fiscal Analyst Recommendation: *If the legislature chooses to capitalize the loan fund, the subsection should begin with "An amount equal to ..." in order to clarify that this is an appropriation of FY2010 general funds. The effective date of the section is July 1, 2009, which means that the specified FY09 collections will no longer be accessible. The associated budget transaction uses FY2010 general funds to capitalize the loan fund.*

(r) The sum of $8,400,000 is appropriated from the Alaska sport fishing enterprise account (AS 16.05.130(e)) in the fish and game fund (AS 16.05.100) to the Alaska fish and game revenue bond redemption fund (AS 37.15.770).

Subsection r transfers the amount collected under the surcharge on sport fish licenses (created by SB 147 (Ch 94, SLA 2005)) from the sport fish enterprise account, where the revenue is deposited, to the bond redemption fund. The transfer is for payment of debt service on bonds authorized for hatchery construction. As both funds are subfunds of the Fish and Game Fund, this section has no fiscal impact; it is an attempt to preempt legal issues associated the fisheries revenue bonds.

(s) An amount equal to the federal receipts deposited in the Alaska sport fishing enterprise account (AS 16.05.130(e)), not to exceed $1,584,200, as reimbursement for the federally allowable portion of the principal balance payment on the sport fishing revenue bonds series 2006 is appropriated from the Alaska sport fishing enterprise account (AS 16.05.130(e)) to the fish and game fund (AS 16.05.100).

Subsection s clarifies that the Department chooses to use $1.58 million of current federal funding as reimbursement. They may use federal operating receipts as reimbursement for a portion of debt service payments on the "Sportfish Bonds" issued in 2006 (see Section 23(u)).

Legislative Fiscal Analyst Comment: *The Department's action increases flexibility in the use of existing federal receipts by placing federal money in the sport fishing enterprise account. Once there, the money can be used for sport fishing facilities intended to directly benefit license purchasers.*

Funding: The section simply transfers funds between accounts within the Fish and Game Fund; there is no direct fiscal impact.

NEW SUBSECTION

(t) The sum of $459,200 is appropriated from the permanent fund dividend (PFD) appropriation in lieu of dividends to criminals account within the dividend fund (AS 43.23.045(a)) to the crime victim compensation fund (AS 18.67.162).

NEW SUBSECTION

(u) An amount received under AS 18.67.162, during the fiscal year ending June 30, 2010, is appropriated from the applicable fund source to the crime victim compensation fund (AS 18.67.162).

Subsection t capitalizes the Crime Victim Compensation Fund with $459.2 of "PFD in lieu of Dividends to Criminals" receipts.

Subsection u capitalizes the Crime Victim Compensation Fund with "money from donations, recoveries of or reimbursements for awards made from the fund, income from the fund, and other program receipts."

Legislative Fiscal Analyst Comment: *Chapter 112 SLA 2008 added language to the effect that money appropriated to the fund "may include donations, recoveries of or reimbursements for awards made by the fund, income from the fund, and other program receipts." The fund source cited in subsection t is not mentioned in AS 18.67.182, but lack of mention does not preclude the legislature from appropriating PFD criminal funds for this purpose.*

(v) An amount equal to 20 percent of the revenue collected under AS 43.55.011(g), not to exceed $60,000,000, is appropriated from the general fund to the community revenue sharing fund (AS 29.60.850).

Subsection v appropriates 20% of receipts from the progressive portion of the oil and gas production tax, to a limit of $60 million, for revenue sharing.

Legislative Fiscal Analyst Comment: *The revenue sharing fund was established with an FY08 supplemental appropriation of $180 million. Per AS 29.60.850, 1/3 of the FY08 year end balance ($60 million) was distributed to communities in FY09. The amount distributed was replaced by $60 million of FY09 revenue from the progressive portion of the oil and gas production tax. The FY2010 distribution to communities will be $60 million (1/3 of the FY09 year end balance). As long as oil prices are high enough to generate more than $60 million from the progressive production tax, the cycle of $60 million annual deposits/distribution will continue. At prices less than about $60/barrel, the progressive tax generates no revenue and annual distributions will decline. If there is no progressive tax revenue in FY2010, the year end fund balance will be $120 million and the amount available for distribution in FY2011 will be $40 million. If there is no progressive tax revenue in FY2011, the year end fund balance will be $80 million and the amount available for distribution in FY2012 will be $27 million. If the fund balance falls below $60 million (as it would in FY2012 if oil remains below about $60/barrel) there would be no distribution in FY2013.*

Funding: The full $60 million potential amount of the appropriation is included in all Legislative Finance and OMB reports.

(w) The sum of $1,062,127,700 is appropriated from the general fund to the public education fund (AS 14.17.300).

Subsection w appropriates $1.062 billion to the Public Education Fund (PEF).

Legislative Fiscal Analyst Comment: *The legislature began making deposits to the PEF in FY06, with the expectation of making continued deposits until reaching the goal of a balance sufficient to fund K-12 education one year in advance. The goal was reached last year, and FY2010 education was "forward funded". The concept of forward funding is that the amount appropriated in a given year will be the amount required in the following year. In this regard, the Governor's $1.062 billion appropriation is $50 million short of forward funding the anticipated $1.112 billion cost of K-12 education in FY2011!*

Although the Governor's proposal leaves the Public Education Fund with a balance (nearly) sufficient to fund anticipated FY2011 K-12 expenditures, this is possible only because the balance of the Public Education Fund included a surplus that was intended to provide a cushion in case expenditures exceed expectations. While not technically a withdrawal from savings, the Governor's proposal reduces the PEF balance by $50 million compared to the forward funding concept adopted by the legislature!

Section Deleted; appeared in FY09 Operating Budget

The sum of $5,000,000 is appropriated from the general fund to the information services fund (AS 44.21.045(a)).

Legislative Fiscal Analyst Comment: *The Information Services Fund is capitalized in the capital appropriations bill!*

Section Deleted; appeared in FY09 Operating Budget

The sum of $19,099,558 is appropriated from the Alaska capital income fund (AS 37.05.565) to the school construction grant fund (AS 14.11.005).

Legislative Fiscal Analyst Comment: *The fund is not capitalized in the Governor's budget proposal!*

Section Deleted; appeared in FY09 Operating Budget

The sum of $80,702,477 is appropriated from the Alaska capital income fund (AS 37.05.565) to the major maintenance grant fund (AS 14.11.007).

Legislative Fiscal Analyst Comment: *The fund is capitalized in the capital appropriations bill!*

*** Sec. 19.** RETAINED FEES AND BANKCARD SERVICE FEES. (a) The amount retained to compensate the collector or trustee of fees, licenses, taxes, or other money belonging to the state during the fiscal year ending June 30, 2010, is appropriated for that purpose to the agency authorized by law to generate the revenue. In this subsection, "collector or trustee" includes vendors retained by the state on a contingency fee basis.

Subsection a allows the state to compensate vendors that collect fees on behalf of the state. The provision originally addressed Fish and Game fishing, hunting and trapping license sales in which the vendor retained a portion of the sale. It also applies to several programs in the Department of Administration, Department of Natural Resources and Trial Courts!

Funding: These fees do not appear in the bill summary or in Legislative Finance reports on the grounds that the state has no effective control over the money!

(b) The amount retained to compensate the provider of bankcard or credit card services to the state during the fiscal year ending June 30, 2010, is appropriated for that purpose to each agency of the executive, legislative, and judicial branches that accepts payment by bankcard or credit card for licenses, permits, goods, and services provided by that agency on behalf of the

state, from the funds and accounts in which the payments received by the state are deposited.

Subsection b allows credit card service providers to retain fees charged for using a credit card.

Funding: These fees do not appear in the bill summary or in Legislative Finance reports on the grounds that the state has no effective control over the money.

(c) The amount retained to compensate the provider of bankcard or credit card services to the state during the fiscal year ending June 30, 2010, is appropriated for that purpose to the Department of Law for accepting payment of restitution in accordance with AS 12.55.051 by bankcard or credit card, from the funds and accounts in which the restitution payments received by the Department of Law are deposited.

Subsection c allows credit card service providers to retain fees charged for using a credit card for *payment of restitution*.

Funding: These fees do not appear in the bill summary or in Legislative Finance reports on the grounds that the state has no effective control over the money.

* **Sec. 20.** RETIREMENT SYSTEM FUNDING. (a) The sum of $206,300,000 is appropriated from the general fund to the Department of Administration for deposit in the defined benefit plan account in the teachers' retirement system as an additional state contribution for the fiscal year ending June 30, 2010, under AS 14.25.085.

(b) The sum of $241,600,000 is appropriated from the general fund to the Department of Administration for deposit in the defined benefit plan account in the public employees' retirement system as an additional state contribution for the fiscal year ending June 30, 2010, under AS 39.35.280.

Legislative Fiscal Analyst Comment: *During the past five years, Alaska's retirement systems accrued a multi-billion dollar unfunded liability due to a combination of investment losses, escalating health care costs, modification of actuarial assumptions and capped contribution rates. Beginning in FY08, the state began making direct contributions to retirement systems in order to stabilize employer contribution rates while repaying that unfunded liability. Actuarial rates for both TRS and PERS declined for FY2010, which means that required contributions decline as well. As shown below, the appropriations in subsections a and b contribute about $135 million "extra" to PERS and about $23 million extra to TRS. With the decline in state revenue, the legislature may wish to consider reducing extra contributions to retirement systems.*

Direct Payments to Retirement Systems ($ millions)

Retirement System	Fiscal Year	Estimated Salary Base	Actuarial Rate	Employer Share	State Share	Direct Payments	Amount Appropriated	Suplus Direct Payment
PERS	FY09	$ 1,813	35.22%	22.00%	13.22%	$ 239.7	$ 241.6	$ 1.9
	FY2010	$ 1,886	27.65%	22.00%	5.65%	$ 106.5	$ 241.6	$ 135.1
TRS	FY09	$ 652	44.17%	12.56%	31.61%	$ 206.2	$ 206.3	$ 0.1
	FY2010	$ 678	39.53%	12.56%	26.97%	$ 182.9	$ 206.3	$ 23.4
Joint	FY09	$ 2,465	79.39%	34.56%	44.83%	$ 445.9	$ 447.9	$ 2.0
	FY2010	$ 2,564	67.18%	34.56%	32.62%	$ 289.5	$ 447.9	$ 158.4

(c) The sum of $1,722,500 is appropriated from the general fund to the Department of Military and Veterans' Affairs for deposit in the defined benefit plan account in the Alaska National Guard and Alaska Naval Militia retirement system for the purpose of funding the Alaska National Guard and Alaska Naval Militia retirement system under AS 26.05.226.

Legislative Fiscal Analyst Comment: *A $10 million FY08 supplemental appropriation to the retirement fund was intended to payoff the unfunded liability of the system. The appropriation in subsection c may not be necessary; except for recent investment losses, the system has little unfunded liability.*

(d) The sum of $1,550,000 is appropriated from the general fund to the Department of Administration for deposit in the defined benefit plan account in the judicial retirement system for the purpose of funding the judicial retirement system under AS 22.25.046.

Legislative Fiscal Analyst Comment: *A $49 million FY08 supplemental appropriation to the retirement fund was intended to payoff the unfunded liability of the system. The appropriation in subsection d may not be necessary; except for recent investment losses, the system has little unfunded liability. Repayment of the unfunded liability reduced the actuarial rate that applies to the retirement system, permitting a reduction in the contribution rate paid by the Court System. FY2010 decrements totaling $3.5 million are reflected in the Court's budget request in section 1.*

* **Sec. 21.** SALARY AND BENEFIT ADJUSTMENTS. (a) The operating budget appropriations made in sec. 1 of this Act include amounts for salary and benefit adjustments for public officials, officers, and employees of the executive branch, Alaska Court System employees, employees of the legislature, and legislators and to implement the terms for the fiscal year ending June 30, 2010, of the following ongoing collective bargaining agreements:

(1) Alaska Public Employees Association, for the confidential unit;

(2) Alaska State Employees Association, for the general government unit;

(3) Alaska Public Employees Association, for the supervisory unit;

(4) Alaska Vocational Technical Center Teachers' Association – National Education Association, for the employees of the Alaska Vocational Technical Center;

(5) Public Safety Employees Association, representing the regularly Commissioned public safety officers unit.

(b) The operating budget appropriations made to the University of Alaska in this Act include amounts for salary and benefit adjustments for the fiscal year ending June 30, 2010, for university employees who are not members of a collective bargaining unit and for implementing the monetary terms of the collective bargaining agreements including the terms of the agreement providing for the health benefit plan for university employees represented by the following entities:

(1) Alaska Higher Education Crafts and Trades Employees;

(2) University of Alaska Federation of Teachers;

(3) United Academics;

(4) United Academics-Adjuncts.

(c) If a collective bargaining agreement listed in (b) of this section is not ratified by the

membership of the respective collecting bargaining unit, the appropriations made by this Act that are applicable to that collective bargaining unit's agreement are reduced proportionately by the amount for that collective bargaining agreement, and the corresponding funding source amounts are reduced accordingly.

Legislative Fiscal Analyst Comment: *"collecting" should be replaced with "collective" on the second line.*

Funding: This section appropriates no money; it specifies that various salary adjustments are funded with money appropriated in section 1.

*** Sec. 22.** SHARED TAXES AND FEES. (a) The amount necessary to refund to local governments their share of taxes and fees collected in the listed fiscal years under the following programs is appropriated to the Department of Revenue from the general fund for payment to local governments in fiscal year 2010:

REVENUE SOURCE	FISCAL YEAR COLLECTED
Commercial passenger vessel excise tax (AS 43.52.230(a))	2009
Fisheries business tax (AS 43.75)	2009
Fishery resource landing tax (AS 43.77)	2009
Aviation fuel tax (AS 43.40.010)	2010
Electric and telephone cooperative tax (AS 10.25.570)	2010
Liquor license fee (AS 04.11)	2010

Funding: These "pass through" amounts are excluded from Legislative Finance reports on the operating bill.

(b) The amount necessary, estimated to be $55,000, to pay to municipalities that amount of aviation fuel tax proceeds to which the municipalities would have been entitled under AS 43.40.010(e) for aviation fuel taxes that would have been due under AS 43.40.410 during the fiscal year ending June 30, 2010, but were not collected during a suspension from July 1, 2009 through August 31, 2009, of motor fuel taxes imposed under AS 43.40.010 is appropriated from the general fund to the Department of Revenue for the fiscal year ending June 30, 2010, for payment to municipalities of the amounts to which the municipalities would have been entitled to under AS 43.40.010(e) had the motor fuel tax not been suspended.

NEW SUBSECTION: Subsection b appropriates money to offset the loss of aviation fuel tax receipts that (if collected by the state) would have been distributed to municipalities under subsection a. The tax is suspended until August 31, 2009.

(c) It is the intent of the legislature that the payments to local governments set out in (a) and (b) of this section may be assigned by a local government to another state agency.

Subsection c is intended to allow a municipality to assign a payment under subsection a to a state agency. For example, the City of Homer might receive Fisheries Business tax payments under subsection a, but owe the Department of Administration contributions for PERS. Homer could assign the payment to DOA, thus avoiding cash flow from the state

to the city and back to the state.

*** Sec. 23.** STATE DEBT AND OTHER OBLIGATIONS. (a) The amount required to pay interest on any revenue anticipation notes issued by the commissioner of revenue under AS 43.08 during the fiscal year ending June 30, 2010, is appropriated from the general fund to the Department of Revenue for payment of the interest on those notes.

Subsection a appropriates general funds to pay interest on any revenue anticipation notes that may be issued during the year.

Legislative Fiscal Analyst Comment: *No notes are expected to be issued.*

(b) The amount required to be paid by the state for principal and interest on all issued and outstanding state-guaranteed bonds is appropriated from the general fund to the Alaska Housing Finance Corporation for the fiscal year ending June 30, 2010, for payment of principal and interest on those bonds.

Subsection b appropriate general funds to pay principal and interest on state-guaranteed bonds (veterans mortgage bonds) if the revenue stream from the mortgage loans is insufficient to make those payments. The only purpose of the state general obligation pledge is to gain tax-exempt status for the bonds. Because the bonds are general obligations of the state, they must be authorized by law, ratified by the voters, and approved by the State Bond Committee.

Funding: The revenue stream from mortgage loans is expected to be sufficient to cover bond payments, so the expected fiscal impact of this subsection is zero. However, a potential general fund obligation exists.

(c) The sum of $30,455,300 is appropriated to the state bond committee from the Alaska debt retirement fund (AS 37.15.011) for payment of debt service, accrued interest, and trustee fees on outstanding State of Alaska general obligation bonds, series 2003A, for the fiscal year ending June 30, 2010.

(d) The sum of $14,200 is appropriated to the state bond committee from State of Alaska general obligation bonds, series 2003A bond issue premium, interest earnings, and accrued interest held in the debt service fund of the series 2003A bonds for the fiscal year ending June 30, 2010, for payment of debt service, accrued interest, and trustee fees on outstanding State of Alaska general obligation bonds, series 2003A.

Subsections c and d appropriates $30.5 million from the debt retirement fund and $14,200 from bond premiums and interest, respectively, to pay debt service on series 2003A general obligation bonds. The bonds were authorized by the voters in 2002 for construction of schools and university facilities.

(e) The sum of $11,275,000 is appropriated to the state bond committee from the Alaska debt retirement fund (AS 37.15.011) for payment of debt service, accrued interest, and trustee fees on outstanding State of Alaska general obligation bonds, series 2009A, for the fiscal year ending June 30, 2010.

Subsection e appropriates $11.3 million from the debt retirement fund to pay debt service on series 2009A general obligation bonds. The bonds were authorized by voters in 2009 for road and harbor construction/renovation.

(f) If the amount necessary to pay the debt service obligations on the outstanding State of Alaska general obligation bonds, series 2003A and 2009A, exceed the amounts appropriated in (c), (d), or (e) of this section, the additional amount necessary is appropriated from the Alaska debt retirement fund (AS 37.15.011) for payment of those obligations for the fiscal year ending

June 30, 2010.

NEW SUBSECTION f ensures full payment of debt service on GO bonds.

(g) The sum of $12,885,100 is appropriated to the state bond committee from the Alaska debt retirement fund (AS 37.15.011) for payment of debt service, accrued interest, and trustee fees on outstanding state-guaranteed transportation revenue anticipation bonds, series 2003B, for the fiscal year ending June 30, 2010.

(h) The sum of $1,300 is appropriated to the state bond committee from state-guaranteed transportation revenue anticipation bonds, series 2003B bond issue premium, interest earnings, and accrued interest held in the debt service fund of the series 2003B bonds for the fiscal year ending June 30, 2010, for payment of debt service and trustee fees on outstanding state-guaranteed transportation revenue anticipation bonds, series 2003B.

Subsections g and h appropriate $12.9 million from the debt retirement fund and $1,300 from bond premiums and interest, respectively, to pay debt service on series 2003B state guaranteed transportation revenue anticipation bonds. The bonds were authorized by voters in 2002 for road and harbor construction/renovation.

Legislative Fiscal Analyst Comment: *Although these bonds were issued with a GO pledge by the state, they are more appropriately referred to as GARVEE bonds. The majority of the debt service is paid using eligible federal-aid highway formula funding coupled with a state matching component.*

(i) The sum of $50,028,700 is appropriated to the state bond committee for the fiscal year ending June 30, 2010, for payment of debt service and trustee fees on outstanding international airports revenue bonds from the following sources in the amounts stated:

SOURCE	AMOUNT
International Airports Revenue Fund (AS 37.15.430)	$46,828,700
Passenger facility charge	3,200,000

Subsection i appropriates funding for payment of debt service and fees on outstanding international airport revenue bonds.

(j) The sum of $1,005,000 is appropriated from interest earnings of the Alaska clean water fund (AS 46.03.032) to the Alaska clean water fund revenue bond redemption fund (AS 37.15.565) for payment of principal and interest, redemption premium, and trustee fees, if any, on bonds issued by the state bond committee under AS 37.15.560 during the fiscal year ending June 30, 2010.

(k) The sum of $1,670,000 is appropriated from interest earnings of the Alaska drinking water fund (AS 46.03.036) to the Alaska drinking water fund revenue bond redemption fund (AS 37.15.565) for payment of principal and interest, redemption premium, and trustee fees, if any, on bonds issued by the state bond committee under AS 37.15.560 during the fiscal year ending June 30, 2010.

Subsections j and k appropriate the interest earnings of the clean water and drinking water funds to their respective bond redemption funds. Both funds are capitalized annually with federal receipts for drinking and clean water bond receipts (see sections 18(n) and (o)). The federal receipts require a state match. Federal restrictions on the loan funds, however, limit their use to making loans and paying debt service. This section takes advantage of the ability to use the funds to pay debt service. Issuing short-term bonds (secured by the assets of the loan fund) allows the "restricted" earnings of the

funds to be used to pay off the bonds. Essentially, the earnings of the funds are used as match.

(l) The sum of $8,036,300 is appropriated from the Alaska debt retirement fund (AS 37.15.011) to the state bond committee for the fiscal year ending June 30, 2010, for trustee fees and lease payments relating to certificates of participation issued for real property.

Subsection l appropriates funds from the debt retirement fund to the state bond committee for payment of trustee fees and lease payments related to state-issued certificates of participation. Certificates of participation (COPs) are sold by the state to finance construction or purchase of state facilities. COPs represent fractional interest in the ownership of the lease payments that are paid over time by the state. Eventually, the state owns the facility outright.

(m) The sum of $3,467,100 is appropriated from the general fund to the Department of Administration for the fiscal year ending June 30, 2010, for payment of obligations to the Alaska Housing Finance Corporation for the Robert B. Atwood Building in Anchorage.

Subsection m appropriates $3.5 million for obligations associated with the Atwood Building. AHFC purchased the Robert B. Atwood Building for approximately $39 million in cash and then issued revenue bonds secured by the building itself and lease payments from the state. The state will own the building at the end of the lease.

(n) The sum of $25,968,100 is appropriated from the general fund to the Department of Administration for the fiscal year ending June 30, 2010, for payment of obligations and fees for the following facilities:

FACILITY	ALLOCATION
(1) Anchorage Jail	$5,103,900
(2) Spring Creek Correctional Center	2,102,400
(3) Goose Creek Correctional Center	17,810,000
(4) Yukon-Kuskokwim Correctional Center	951,800

Subsection n appropriates $5.1 million to pay lease costs for the Anchorage Jail. Anchorage issued municipal bonds to pay for the construction of the Anchorage Jail, which the state leases.

Legislative Fiscal Analyst Comment: *In common language, the contract with the Municipality of Anchorage is a lease, but terms of the contract are such that Governmental Accounting Standards Board's (GASB) rule #34 classifies it as a Capital Lease. This means that a default on lease payments could affect the state's credit rating. Because of the potential impact on credit rating, the obligation is categorized as debt.*

Legislative Fiscal Analyst Comment: *Chapter 160, SLA 2004 (SB 65) authorized lease-purchase agreements for the Spring Creek Correctional Center (SCCC) expansion, the Yukon-Kuskokwim Correctional Center (YKCC) expansion, and the Goose Creek Correctional Center construction. Upon renovation, the state will pay the debt service and utilize the facilities (a capital lease arrangement). SCCC is a $22 million project with projected FY2010 debt service of $2.1 million (25 year term @ 5.25%). YKCC is a $12.5 million project with projected FY2010 debt service of $952,000 (25 year term @ 5.25%).*

The latest construction cost estimates for the 1,536 bed Point McKenzie jail project, named Goose Creek Correctional Center, range from $257 to $259 million. The 25-year state lease is capped in statute at $11,600 per bed, and annual debt service is limited to $17.8 million. In order to remain within these financing parameters, bond rates would have needed to be about 4.75%. The administration proposed putting up $20 million as "gap" funding so that only $240 million would need to be raised through bond proceeds. The bonds were finally issued in that amount on December 22nd, 2008 at 5.95%. At this rate and term, annual debt service is expected to be in the $17.6 million range ($200 thousand less than the amount requested for FY2010).

(o) The sum of $3,303,500 is appropriated from the general fund to the Department of Administration for the fiscal year ending June 30, 2010, for payment of obligations to the Alaska Housing Finance Corporation for the Linny Pacillo Parking Garage in Anchorage.

***Subsection o** appropriates $3.3 million for obligations associated with the Linny Pacillo parking garage. The obligation is a lease purchase similar to the obligation for the Robert B. Atwood Building.*

(p) The sum of $98,937,100 is appropriated to the Department of Education and Early Development for state aid for costs of school construction under AS 14.11.100 from the following sources:

Alaska debt retirement fund (AS 37.15.011)	$75,937,100
School fund (AS 43.50.140)	23,000,000

Subsection p appropriates funds for municipal school debt reimbursement. AS 14.11.100 authorizes the state to reimburse municipalities for selected bonds issued for school construction (from 60-90% of principal and interest depending on the authorization). The amount of this appropriation is the projected need for full reimbursement.

(q) The sum of $5,548,923 is appropriated from the general fund to the following agencies for the fiscal year ending June 30, 2010, for payment of debt service on outstanding debt authorized by AS 14.40.257, AS 29.60.700, and AS 42.45.065, respectively, for the following projects:

AGENCY AND PROJECT	APPROPRIATION AMOUNT
(1) University of Alaska	$1,412,615
Anchorage Community and Technical College Center Juneau Readiness Center/UAS Joint Facility	
(2) Department of Transportation and Public Facilities	
(A) Nome (port facility addition and renovation)	127,500
(B) Matanuska-Susitna Borough (deep water port and road upgrade)	755,120
(C) Aleutians East Borough/False Pass (small boat harbor)	101,840

AGENCY AND PROJECT (Cont.)	APPROPRIATION AMOUNT (Cont.)
(D) Lake and Peninsula Borough/Chignik (dock project)	117,844
(E) City of Fairbanks (fire headquarters station replacement)	872,115
(F) City of Valdez (harbor renovations)	225,743
(G) Aleutians Ease Borough/Akutan (small boat harbor)	303,948
(H) Fairbanks North Star Borough (Eielson AFB Schools, major maintenance and upgrades)	337,343
Department of Transportation and Public Facilities Subtotal	2,841,453
(3) Alaska Energy Authority	
(A) Kodiak Electric Association (Nyman combined cycle cogeneration plant)	943,676
(B) Copper Valley Electric Association (cogeneration projects)	351,179
Alaska Energy Authority subtotal	1,294,855

Subsection q appropriates $5.5 million to various state agencies for reimbursement to municipalities and public entities for debt service on projects authorized in Ch. 115, SLA 2002 (HB 528). This level of reimbursement is lower than that enacted for FY09 ($8.0 million). The level of reimbursement is discretionary.

(r) The sum of $8,900,000 is appropriated from the Alaska fish and game revenue bond redemption fund (AS 37.15.770) to the state bond committee for payment of debt service, accrued interest, and trustee fees on outstanding sport fish hatchery revenue bonds. It is the intent of the legislature that the sum of $3,600,000 of the appropriation made by this subsection be used for early redemption of the bonds.

Subsection r appropriates the majority of the surcharge levied on sport fish licenses authorized under Ch 94, SLA 2005—and transferred to the bond redemption fund in Section 18(r) of this bill—for payment of debt service on bonds issued for sport fish hatchery development. The appropriation exceeds the debt service due on the bonds, allowing the bonds to be paid off ahead of schedule.

* **Sec. 24.** CONSTITUTIONAL BUDGET RESERVE FUND. (a) Deposits in the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska) for fiscal year 2009 that are made from subfunds and accounts other than the operating general fund (state accounting system fund number 11100) by operation of art. IX, sec. 17(d), Constitution of the State of Alaska, to repay appropriations from the budget reserve fund are appropriated from the budget reserve fund to the subfunds and accounts from which those funds were transferred.

Subsection a is "sweep reversal language." The Constitution requires that year-end general fund balances be used to repay withdrawals from the CBRF. All general fund subaccounts are "swept" into the CBRF; this provision reverses that action.

(b) Unrestricted interest earned on investment of the general fund balances for the fiscal year ending June 30, 2010, is appropriated to the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska). The appropriation made by this subsection is intended to compensate the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska) for any lost earnings caused by use of the fund's balance to permit expenditure of operating and capital appropriations in the fiscal year ending June 30, 2010, in anticipation of receiving unrestricted general fund revenue. The amount appropriated by this subsection may not exceed an amount equal to the earnings lost by the budget reserve fund as the result of the use of money from the budget reserve fund to permit expenditure of operating and capital appropriations in the fiscal year ending June 30, 2010, in anticipation of receiving unrestricted general fund revenue.

Subsection b appropriates general fund earnings to the CBRF as compensation for earnings lost by the CBRF as a result of draws to meet the Treasury's cash flow requirements.

(c) The sum of $1,673,000 is appropriated from the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska) to the Department of Revenue, treasury division, for operating costs related to management of the budget reserve fund for the fiscal year ending June 30, 2010.

Subsection c appropriates $1.7 million from the budget reserve fund to the Department of Revenue, Treasury Division, for investment management fees for FY2010.

(d) The appropriations made by (a) and (c) of this section are made under art. IX, sec. 17(c), Constitution of the State of Alaska.

Subsection d stipulates that appropriations made from the CBRF must be approved by at least three-quarters of the members of each house of the legislature.

Legislative Fiscal Analyst Comment: *The bill contains no language appropriating funds from the CBRF to cover any shortfall in unrestricted revenue.*

*** Sec. 25.** NONLAPSE OF APPROPRIATIONS. The appropriations made by secs. 5, 18, 20, 23(j), and 23(k) of this Act are for the capitalization of funds and do not lapse.

*** Sec. 26.** RETROACTIVITY. Those portions of the appropriations made in sec. 1 of this Act that appropriate either the unexpended and unobligated balance of specific fiscal year 2009 program receipts or the unexpended and unobligated balance on June 30, 2009, of a specified account are retroactive to June 30, 2009, solely for the purpose of carrying forward a prior fiscal year balance.

*** Sec. 27.** Section 26 of this Act takes effect June 30, 2009.

*** Sec. 28.** Except as provided in sec. 27 of this Act, this Act takes effect July 1, 2009.

THIS PAGE INTENTIONALLY LEFT BLANK

Capital Budget

The Governor has proposed capital projects of $1.9 billion and a total capital budget of $2.02 billion for FY2010.[3] The budget includes $535 million in general funds, $1.1 billion in federal funds, and $380 million of other state funds.[4] Compared with the budget proposed last year (on 12/15/2007), it is $194 million greater in general funds, $310 million greater in federal funds, but down $416 million in other state funds for a $88 million net increase over the Governor's FY09 proposal.

Funding

General Funds

General funds are up $194 million over the Governor's FY09 proposal. This amount includes money from a savings account set aside by the legislature in FY07. The legislature placed $300 million of general funds in a sub-corporation of AHFC, with the intent that the money be used for future capital projects. The Governor proposes using $238.4 million of the $300 million (plus approximately $45 million of earnings) available.

Other State Funds

The large drop in other state funds is attributable to:

- The inclusion of much more bond funding in FY09. A total of $300 million of general obligation and Alaska Student Loan bonds were proposed. This year, only airport bonds ($24.3 million) are included as a bond fund source.
- A substantial reduction in expenditures from the Alaska Capital Income Fund. Last year's appropriation level was supported by infusions of cash into the fund.[5] The fund was essentially drained in FY09 and the FY2010 budget contains roughly the amount of income expected in FY2010 (approximately $28 million).

The Governor's FY2010 proposal includes over $39 million in cruise-ship-related projects funded from the Commercial Passenger Vessel Tax Fund. Last year the legislature appropriated $25 million from this fund, of which $10 million was vetoed by the Governor.

Federal Funds

Federal receipt authority is up over $300 million. Much of this is attributable to two projects:

- DNR's $58 million Coastal Impact Assistance Program and
- the University's $100 million Arctic Research Vessel.

The remaining increase is in the DOT&PF Airport Improvement and Surface Transportation programs. Due to the very complex environment for federal funding (see *Issues* later in this section), the DOT&PF capital budget appears to include some "extra" projects. This is not an uncommon strategy by DOT&PF; it provides the flexibility to manage federal programs so as to best capture available federal funding. Once a new federal transportation authorization bill is

[3] The total budget includes fund transfer appropriations which, as duplicated appropriations, do not actually put more "money on the street." The Capital Budget Summary table on page 62 reflects this best. The report differs from the depiction on the Fiscal Summary, in which all duplicate funds are removed.

[4] The Fiscal Summary shows FY2010 GF spending of $555 million. That figure includes a $20 million placeholder for FY2010 supplemental projects which is excluded here.

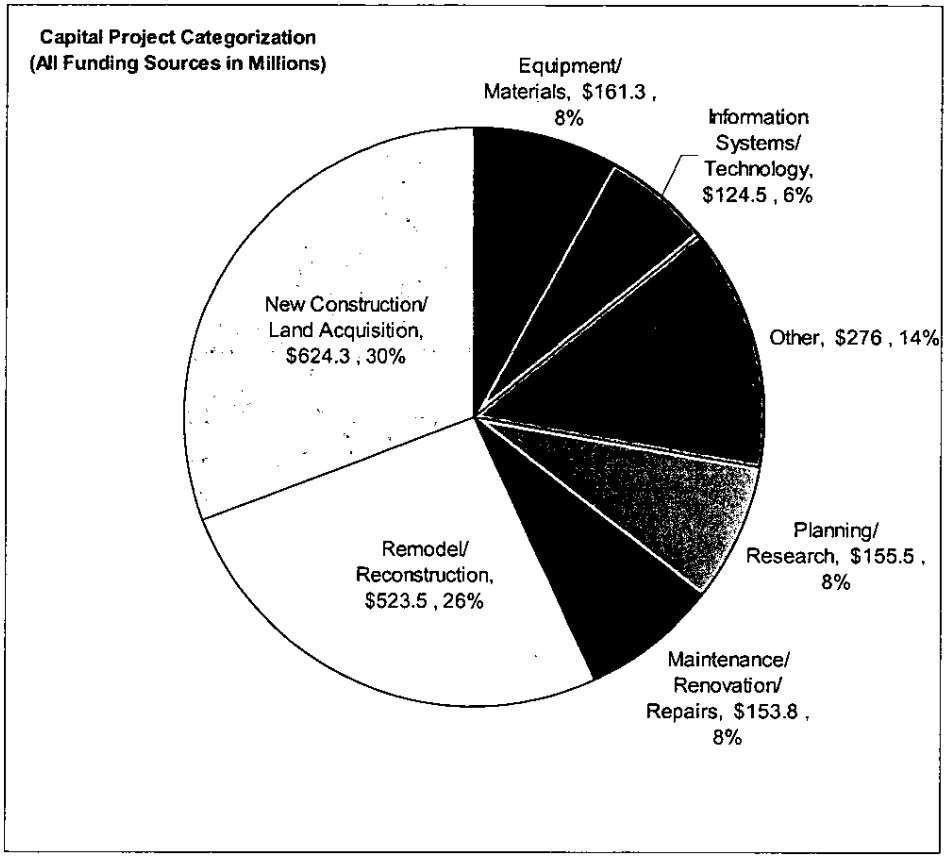
[5] In FY07, a general fund sweep provision caused over $140 million to be swept into the fund. In FY08, over $50 million of corporate dividends was placed into the fund.

passed and plans for economic stimulus are revealed, the direction of future federal funding will be clearer.

Budget Composition

The pie chart below provides a categorical breakdown of the proposed capital spending plan.[6] Further project details may be addressed in the individual agency narratives.

Figure 1



Construction

Construction projects—both new and remodel—comprise over 56% of the Governor's proposed capital budget. New construction involves adding infrastructure to the state's capital stock, and includes both new roads and new square footage. Reconstruction involves modifying or changing the function of existing roads or space. The Surface Transportation Program and the Airport Improvement Program within DOT&PF make up the majority of the construction budget at $602 million. Other significant construction projects are in the Village Safe Water and Waste Water Program and the Municipal Water Sewer Matching Grants Program at $110 million. Large, stand-alone *state funded* construction appropriations include:

- $20 million (AHCC Funds) - Goose Creek Correctional Center gap funding
- $20 million (AHCC Funds) - AVTEC 3rd Avenue Dorm Replacement

[6] Please see the last page of this section for the methodology of the project categorization.

- $12 million (AHCC Funds) - AVTEC Heavy Equipment and Diesel Shop
- $15 million (University Receipts) – UAF Energy Technology Building
- $20.6 million (University Receipts) – UAF Life Sciences Facility
- $50 million (GF) – Federal Aid Highway/ Aviation State Match
- $10.8 million (GF) – School Major Maintenance Projects

Maintenance/Renovation/Repairs

This category includes deferred/scheduled maintenance or repair projects for agency facilities, state parks, harbors, highways, bridges, rural airports, aircraft and vessels. The category accounts for 8% of the total capital budget. Notable projects include:

- $32 million (GF) – School Major Maintenance Projects
- $9.8 million (GF) – AMHS Vessel/Terminal Overhaul
- $18 million (Federal) – AMHS Mainline Ferry Refurbishment
- $11.4 million (Federal) – Richardson Highway Flood Repairs
- $10 million (GF) – UA Annual Facility Maintenance, Renewal/Renovation
- $32.9 million (various) – Various Agency Facility Maintenance Projects

Planning/Research

Another 8% of the budget is for the planning/research category, primarily federal highway and airport pre-construction appropriations. At $45 million and $18 million, respectively, these highway and airport projects fund the preliminary design, engineering, environmental analysis, right-of-way and utility work for the federal Airport Improvement Program and Surface Transportation Program. Other sizable projects include:

- $4.2 million (AHCC Receipts) – DEC Girdwood Wastewater Treatment Facility
- $22 million (Federal) – DF&G Pacific Coastal Salmon Recovery Fund
- $3 million (AHCC) – DNR Gas Pipeline Implementation
- $6 million (AHCC) – DNR Reservoir Studies Oil and Gas Resources
- $5 million (AHCC) – DOR Gas Spur Line Development
- $2 million (AHFC Dividend) – AHFC Energy Efficiency Monitoring Research

Information Systems/Technology

Information technology projects make up a significant portion of the budget at 6%. This is substantial given that the funding is made up of almost entirely state funds. Spread throughout state agencies, projects include network upgrades/replacements, security projects, document imaging projects, and two notable projects comprising over half the category:

- $23.4 million (AHCC/Gamble Tax) – DOR Tax Management System
- $50 million (AHCC) - DOA Statewide System Replacement (accounting and payroll system)

Equipment/Materials

This category, totaling $161 million, is much larger than normal because it includes $100 million of federal receipt authority for the UAF Alaska Region Research Vessel project. This funding, along with $80 million of previous authority, will allow for construction of a 236 foot ice-capable research vessel. Other significant equipment/ materials projects include:

- $15 million (Hwy Working Capital Funds) – State Equipment Fleet Replacement
- $13.6 million (Federal) – Snow Removal Equipment
- $2.3 million (AHCC Receipts) – Fairbanks Pipeline Training Center Equipment

Other

The Other category, 14% of the budget, is comprised of projects outside the other project categories. They include projects of economic assistance, training, safety grants/ programs, fund capitalizations and others. Notable projects include:

- $58 million (Federal) – DNR Coastal Impact Assistance Program
- $10 million (various) – AHFC Homeless Assistance Program
- $11.5 million (Federal) – DOT&PF Statewide Safety Program
- $20 million (AHCC) – AGIA Reimbursement Fund

ISSUES

Federal Funding

Last summer the Congressional Budget Office projected a Federal Highway Trust Fund shortfall of $3.3 billion for 2009. This shortfall was addressed by Congress, albeit temporarily, by an $8 billion infusion from the general treasury. Current projections have the Trust Fund remaining solvent through federal fiscal year 2009. The infusion fixes the immediate shortfall in funding, but does not address the structural problem with regard to the Trust Fund. Congress will need to address the funding mechanism of the fund on a long-term basis in the transportation authorization bill to follow SAFETEA-LU.

An unprecedented fiscal stimulus package is expected soon after the inauguration of President Obama. How it will affect Alaska is unknown at this time. Conjecture has Alaska receiving upwards of $300 million dollars very soon after the package is signed into law. The stimulus is intended to be very swift, and strings are likely to be attached. There is speculation that projects must be fully vetted through the normal federal rules and be "shovel ready" in short order, or states may lose the funding to a state that is ready to move more rapidly.

The Governor has submitted a $140 million request to the Alaska Congressional Delegation that some regard as less-than-sufficient given the situation. On the list were three gas pipeline infrastructure projects and one for Central Region general surface repairs. It is expected that these projects would come off the top of the $300 million, leaving approximately $160 million for statewide ready-to-build projects.

In order to avoid losing "stimulus funds," DOT&PF may use the new money for projects currently scheduled to receive regular federal program funding. They would then replace the projects removed from the regular funding list with projects scheduled for later years. A supplemental bill addressing the stimulus package is expected from the administration. Fast tracking the bill may be in order to maximize the federal funds. Environmental infrastructure, the Alaska Railroad and other infrastructure may also be included.

Gas Pipeline Infrastructure

The Department of Transportation and Public Facilities previously outlined $2 billion in transportation infrastructure projects that are deemed necessary in order to build the gas pipeline. "Every day, week, month or year that we wait to complete infrastructure will add cost to the project (gas pipeline) and could in fact be the main reason that this project doesn't get built," Federal Pipeline Coordinator Drue Pearce recently said. With only five construction seasons remaining before planned pipeline construction, the 86 identified projects along the Dalton, Elliot, Richardson, Parks, Glenn and Alaska Highways will need to be screened for "mission critical" items. The $2 billion estimate came when oil was over $100/bbl. In this $30-$40/bbl environment, projects may be limited to "must haves" for the safe and efficient construction of the pipeline. The governor has included one pipeline transportation infrastructure project, Dalton Highway MP 9-11 ($26.3 million), in her current bill.

Distribution by House District

The pie charts on the following page (Figures 2 & 3) detail the proportional breakdown of the budget by house district on an "impact" basis.[7] Figure 2 contains all funding sources, while Figure 3 is state funds only. As can be seen, the majority of projects are assigned to the "Statewide" House District. Projects falling under this assignment are generally broad appropriations that span multiple regions or the state. The types of projects included are large deferred maintenance projects, information technology projects, and federal grant programs. The Capital Budget Summary table on page 62 breaks out the funding sources by fund group (general, federal and other funds) for each house district. Project detail reports by House District (along with project back-up) can be found on the Legislative Finance website.

Project Categorization Methodology

The pie chart beginning this section and the spreadsheets accompanying each agency narrative categorize the capital budget by project groups. The groupings have been developed with the intent of creating a mutually exclusive set. This allows for the totaling of projects into a Project Group Summary report that reflects the entire capital budget without duplication. As with any task of categorization, subjectivity exists.

The rules used to define the projects in each group are provided in the table below.

Project Group	Description
Planning and Research	Projects involving planning, design, engineering, research, or studies
Maintenance, Renovation and Repairs	Projects involving the repair of deteriorated conditions, restoration, bringing back to a preexisting or improved state
Remodel and Reconstruction	Projects modifying existing space, changing the function of existing space
New Construction and Land Acquisition	Projects involving the addition of new space
Information Systems and Technology	Projects related to information technology regardless of whether they are in a planning phase or construction (programming) phase - segregated due to their unique nature
Other	Projects that do not fit elsewhere

[7] Legislative Finance assigns two house districts to each project: 1) by the house districts impacted by a project, and 2) by the geographic location of a project.

Figure 2

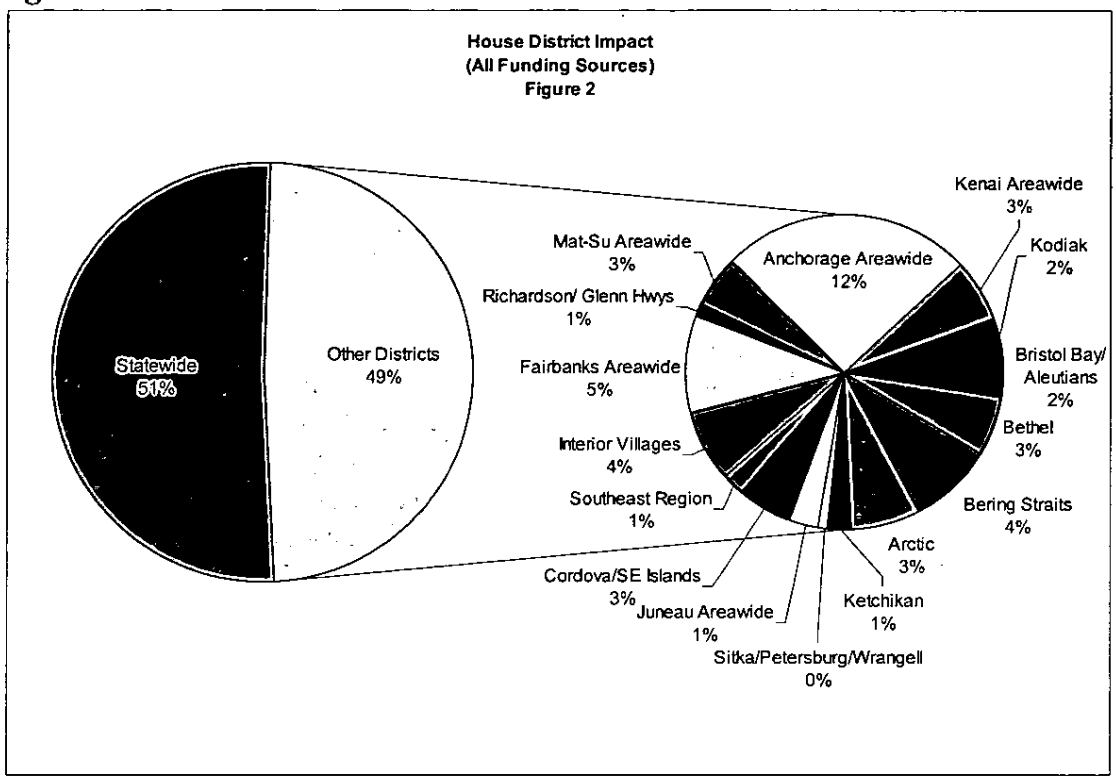


Figure 3

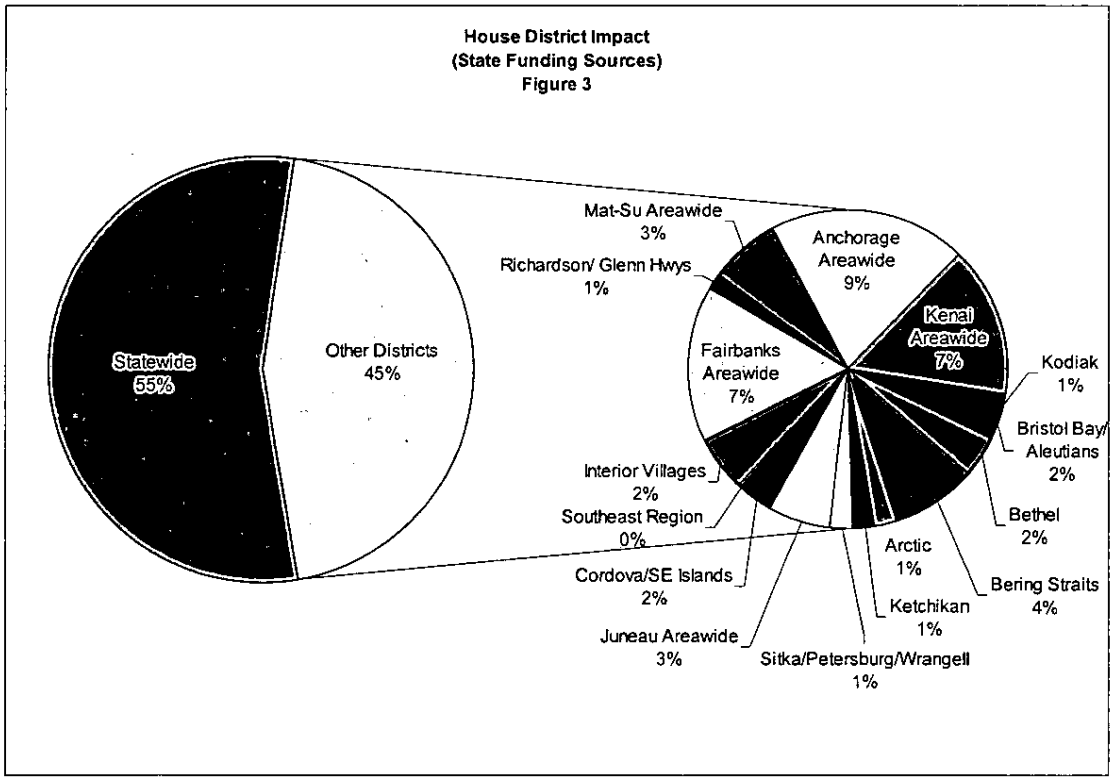

Capital Budget Summary

	Agency Comparison - All Funds (Includes MH)			FY2010 Governor by House District				
Agency	FY09 Governor (12/15/2007)	FY2010 Governor (12/15/2008)	Change FY09-FY2010	House District	HD #	General Funds	Federal Funds	Other Funds
Administration	38,118,000	65,325,000	27,207,000	Ketchikan	1	4,171,984	15,104,817	3,842,164
Commerce, Community & Econ Dev	88,282,802	138,311,401	50,028,599	Sitka/Petersburg/Wrangell	2	2,636,306	641,322	5,126,513
Corrections	14,761,700	27,690,400	12,928,700	Juneau Areawide	3-4	13,437,695	4,700,000	8,790,000
Education and Early Development	106,256,035	42,514,065	(63,741,970)	Cordova/SE Islands	5	815,575	39,325,231	12,161,763
Environmental Conservation	121,328,992	120,605,996	(722,996)	Southeast Region	1-5	275,000	18,600,000	-
Fish and Game	43,190,400	30,918,000	(12,272,400)	Interior Villages	6	7,038,489	49,899,688	12,581,618
Office of the Governor	100,000	12,185,183	12,085,183	Fairbanks Areawide	7-11	15,905,164	34,480,476	40,407,600
Health and Social Services	39,693,400	21,254,277	(18,439,123)	Richardson/ Glenn Hwys	12	13,255	8,263,360	4,875,000
Labor and Workforce Development	22,446,700	39,178,100	16,731,400	Mat-Su Areawide	13-16	25,414,260	23,250,000	-
Law	200,000	-	(200,000)	Anchorage Areawide	17-32	22,021,700	162,294,950	48,744,141
Military and Veterans Affairs	33,511,915	13,400,000	(20,111,915)	Kenai Areawide	33-35	47,100,923	6,433,428	6,500,000
Natural Resources	70,139,000	97,682,000	27,543,000	Kodiak	36	3,743,180	24,625,097	3,236,143
Public Safety	121,660,000	13,072,500	(108,587,500)	Bristol Bay/Aleutians	37	8,562,103	32,522,464	619,965
Revenue	83,933,700	114,526,000	30,592,300	Bethel	38	13,274,139	42,303,356	1,110,259
Transportation & Public Facilities	880,129,150	966,718,791	86,589,641	Bering Straits	39	10,545,596	47,607,247	20,566,140
University of Alaska	114,450,000	164,697,000	50,247,000	Arctic	40	7,372,827	56,315,014	-
Alaska Court System	9,776,000	2,500,000	(7,276,000)	Statewide	1-40	252,801,862	537,556,791	182,964,108
Fund Capitalization (1)	10,000,000	20,000,000	10,000,000					
Total Capital - "Money on the Street" (3)	**1,797,977,794**	**1,890,578,713**	**92,600,919**			**435,130,058**	**1,103,923,241**	**351,525,414**
Fund Transfers (2)	132,902,035	128,014,065	(4,887,970)	Statewide	1-40	100,014,065	-	28,000,000
Total - Including Fund Transfers	**1,930,879,829**	**2,018,592,778**	**87,712,949**			**535,144,123**	**1,103,923,241**	**379,525,414**
General Funds	341,337,982	535,144,123	193,806,141					
Federal Funds	794,323,817	1,103,923,241	309,599,424					
Other State Funds	795,218,030	379,525,414	(415,692,616)					

Notes:

1) Fund Capitalization in this context refers to funding appropriated to a program not requiring further appropriation for expenditure (e.g.- Harbor Facility Grant Fund, AGIA Reimbursement Fund).

2) Fund Transfers is the funding appropriated from one "fund" to another "fund," not actually adding any new capital project funding to the total.

3) "Money on the Street" is the total amount of funding for capital projects, net of fund transfers. Duplicated fund sources are not removed. Doing so would underestimate the actual amount of funding going toward capital projects. This is the opposite of operating budget duplicate funds, whereby the duplicate fund sources would double the actual money paying for services.

Language Sections of the Governor's FY2010 Capital Budget

*** Sec. 10.** ENTERPRISE INFORMATION TECHNOLOGY PROJECTS. (a) The sum of $7,564,659 is appropriated to the Office of the Governor from the following sources in the amounts stated and allocated for department information technology security projects:

DEPARTMENT AND PROJECT			SOURCE	ALLOCATION BY SOURCE	PROJECT TOTAL ALLOCATION
(1)	Administration Enterprise security projects		Information services fund	$5,000,000	$5,000,000
(2)	Health and Social Services				
	(A)	Personal information protection data encryption	Federal receipts	81,814	818,141
			General fund match	736,327	
	(B)	Health insurance portability and accountability compliance	Federal receipts	668,724	1,337,448
			General fund match	668,724	
	(C)	Disaster recovery	Federal receipts	40,907	409,070
			General fund match	368,163	

(b) The sum of $4,160,800 is appropriated to the Office of the Governor from the following sources in the amounts stated and allocated for department information technology imaging and document management projects:

DEPARTMENT AND PROJECT		SOURCE	ALLOCATION BY SOURCE	PROJECT TOTAL ALLOCATION
(1)	Administration			
	Document management system – microfilm conversion phase 1	General fund	$4,600	$328,000
		Group health and life benefits fund	94,500	
		FICA administration fund account	2,000	
		Public employees retirement trust fund	160,100	
		Teachers retirement trust fund	63,200	
		Judicial retirement system	400	
		National guard retirement system	3,200	

DEPARTMENT AND PROJECT			SOURCE	ALLOCATION BY SOURCE	PROJECT TOTAL ALLOCATION
(2)	Commerce, Community, and Economic Development				
	(A)	Banking and securities management systems	Receipt supported services	890,000	890,000
	(B)	Community and regional affairs imaging	General fund	690,000	690,000
	(C)	Banking and securities imaging	Receipt supported Services	580,000	580,000
(3)	Health and Social Services				
	Contract management automation system		Federal receipts General fund match	47,300 425,500	472,800
(4)	Natural Resources				
	DNR document management system phase 2 or 2		General fund	1,200,000	1,200,000

(c) The distribution to the respective state agencies of the appropriations allocated in (a) and (b) of this section is contingent on the respective state agencies signing an agreement to participate in the Department of Administration's enterprise collaboration model for information technology projects.

Subsections a appropriates $7.6 million to the Office of the Governor for information technology security projects. There are four allocations to various departments.

Subsection b appropriates $4.2 million to the Office of the Governor for information technology imaging and document management projects. There are six allocations to various departments.

Subsection c limits distribution of project funding to agencies that agree to meet unspecified requirements regarding collaboration.

Although details are not yet available, the Enterprise Investment Board (EIB) recently voted to establish a model of collaboration between agencies for IT projects of common scope. The intent is to "leverage opportunities in integration and take advantage of efficiencies and economies of scale." The EIB also voted to group similar projects into appropriations to the Office of the Governor, the intent of which is to compel collaborative work; OMB will hold the purse strings until agencies sign Project Charter Agreements identifying scope, timelines, etc. The minutes from the October 30, 2008 EIB meeting are available online and provide additional information on the topic.

Legislative Fiscal Analyst Comment: *While collaboration is a laudable goal, there may be alternative appropriation language that achieves the same end while allowing the projects to be formally associated the applicable agency.*

* **Sec. 11.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Development Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

Subsection a lists types of unanticipated additional receipts that are appropriated subject to review by the Legislative Budget and Audit (LB&A) Committee. Corporate receipts of the AHFC have been added to the list since FY08.

Legislative Fiscal Analyst Comment: *This standard language permits requests for additional capital authorization to be submitted to the LB&A committee for approval. Similar language in the operating budget applies only to operating authorization. The operating language excludes test fisheries receipts and corporate receipts of the Alaska Aerospace Development Corporation.*

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

Subsection b permits state authorization to be reduced if unanticipated money is received for projects funded by state funds. There is no formal process for tracking potential reductions.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

Subsection c automatically limits authorization of federal and other receipts to the amount actually received. The language applies to all appropriations in the Act, not merely to appropriations subject to LB&A review.

* **Sec. 12.** FUND TRANSFERS. (a) The income earned during fiscal year 2010 on revenue from the sources set out in AS 37.13.145(d) is appropriated to the Alaska capital income fund (AS 37.05.565).

Subsection a appropriates the FY2010 earnings associated with the State vs Amerada Hess settlement (held within the Permanent Fund) to the Alaska Capital Income Fund. This fund was established in FY05 and is customarily appropriated for capital projects.

Funding: The Amerada Hess settlement portion of the Permanent Fund is "fenced off" from the rest of the Permanent Fund principal. The earnings on this $425 million portion have historically been projected at $28 million per year based on the expected rate of return on Permanent Fund investments. Historically, earnings have averaged almost $35 million per year, and FY09 earnings are currently projected at $18 million.

(b) The interest earned on amounts in the election fund are appropriated to the election fund required by the federal Help America Vote Act.

(c) The following appropriations are made from the general fund to the following funds in the amounts stated:

FUND	APPROPRIATION
(1) Information services fund (AS 44.21.045(a))	$9,500,000

This subsection capitalizes the Information Services Fund for capital projects in Section 1. Typically, project appropriations equal the amount capitalizing the fund.

Legislative Fiscal Analyst Comment: *This cumbersome method of funding projects is intended to identify and track projects so that expenditures can be recouped via IT service charges. Given the high level of IT chargeback rates and the pushback from agencies on rate increases, it is doubtful that capital investments will be recouped.*

Funding: The projects in Section 1 utilizing the Information Services Fund (ISF) total $10.8 million. This exceeds the capitalization by $1.3 million.

Legislative Fiscal Analyst Comment: *Spending in excess of the capitalization of the fund begs questions concerning the available cash balance in the ISF. The balance is approximately $28 million, but the amount of that balance free of future replacement obligations is unknown at this time. Finance committees may wish to examine this issue.*

(2) Renewable energy grant fund (AS 42.45.045(a))	50,000,000

This subsection capitalizes the Renewable Energy Grant Fund created last session in HB 152 (Chapter 31, SLA 2008) and capitalized at $50 million. The fund was capitalized with an additional $50 million in HB4001, the special session appropriation bill.

Legislative Fiscal Analyst Comment: *Despite intent to distribute $100 million during the interim, most of the FY09 deposits remain in the fund. Requests for grants are expected to be part of the regular capital budget process.*

(d) The sum of $40,514,065 is appropriated from Alaska housing capital corporation receipts to the major maintenance grant fund (AS 14.11.007).

This subsection capitalizes the Major Maintenance Grant Fund set up in statute for school maintenance projects. Projects are scored and ranked by the Department of Education and Early Development (DEED). This amount would fund projects 1-23 on the DEED Major Maintenance List. The list contains 138 approved projects of which the state's share amounts to $269.6 million (approximately 75% of the total estimated cost).

Funding: The Alaska Housing Capital Corporation fund source refers to a $300 million general fund appropriation to a subcorporation established within the Alaska Housing Finance Corporation.

Legislative Fiscal Analyst Comment: *The AHCC savings account is a "parking spot" for surplus revenue. The account was created within AHFC in FY07 because doing so made the balance exempt from the annual sweep of unspent general funds to the Constitutional Budget Reserve Fund. Legislative Finance classifies withdrawals from the savings account as general funds; the Governor classifies them as duplicated funds.*

Legislative Fiscal Analyst Comment: *Note that the proposed budget does not address capitalization of—or spending from—the School Construction Grant Fund. The school construction list contains 32 schools projects that have an estimated state cost of $475 million.*

Legislative Fiscal Analyst Comment: *Legislative Finance prefers the Major Maintenance and School Construction Grant Funds be capitalized in the numbers section of the capital bill. The appropriation can go directly to the specific fund in DEED with the projects listed as allocations. Last year, this change was made in the capital bill (see*

page 136, line 13 through page 138 line 17, Section 13, Chapter 29, SLA 2008. The advantages of the FY09 approach are reduced fund source duplication in the budget (which adds clarity), and faster bill writing and modification.

(e) The sum of $20,000,000 is appropriated from Alaska housing capital corporation receipts to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a)) for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

This section appropriates $20 million to the AGIA reimbursement fund for expenses associated with the $500 million inducements provided to TransCanada Alaska with the issuance of the AGIA license. $30 million from the general fund was appropriated to the fund in the special session authorizing the license.

* **Sec. 13.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

This section allows an agency to receive insurance claim settlement payments directly from a third party. Without this provision, settlements would remain in the general fund and would not be available to offset an agency's loss without a specific appropriation.

* **Sec. 14.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. The amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2009, estimated to be $22,500,000, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program.

This section appropriates the entire amount received (estimated at $22.5 million for FY2010) from the revenue shared by the federal government from sales, rentals, bonuses, and royalties on leases issued within the NPR-A to the NPR-A Impact Grant Program. Grants are awarded to municipalities impacted by oil and gas development in the NPR-A. AS 37.05.530(g) states that receipts not appropriated as grants are to be distributed as follows: 25% to Permanent Fund Principal, ½% to the Public School Trust Fund, and any remaining amount to the Power Cost Equalization and Rural Electric Capitalization Fund.

Legislative Fiscal Analyst Comment: *The FY09 capital bill contained an itemized listing of all grantees and the projects to be funded. The benefits of listing the grantees in the bill include the ability to search for specific grant recipients.*

* **Sec. 15.** RURAL ELECTRIFICATION REVOLVING LOAN FUND; ELECTRICAL EMERGENCIES PROGRAM. (a) Notwithstanding AS 42.45.020(g), the balance of the rural electrification revolving loan fund (AS 42.45.020) on June 30, 2009, estimated to be $80,400, is appropriated to the Department of Commerce, Community, and Economic Development, Alaska Energy Authority, for the electrical emergencies program.

This section is effectively a general fund appropriation; it makes an FY09 supplemental appropriation of the balance of the Rural Electrification Revolving Loan fund to AEA before the receipts are deposited into the general fund. The balance consists of the loan payments on the remaining loans outstanding. These loan payments totaled approximately $330,000 annually until recently, when several loans accounting for over 70% of the outstanding balance were paid in full. The remaining loan payments will total

approximately $80,000 ($80,400 for FY2010) until 2020, when they will drop to approximately $65,000.

(b) The sum of $250,000 is appropriated from the general fund to the Department of Commerce, Community, and Economic Development, Alaska Energy Authority, for the electrical emergencies program.

The $250,000 is the difference between the $330,000 customary amount appropriated for electrical emergencies and the energy loan repayments of $80,000 appropriated in subsection a.

Legislative Fiscal Analyst Comment: *Scooping a lapsing balance may have made sense when no additional appropriation was necessary, but the legislature may wish to consider deleting this section in favor of a numbers section appropriation of $330,000 general funds.*

* **Sec. 16.** CLIMATE CHANGE IMPACT MITIGATION PROGRAM. Section 10, ch. 11, SLA 2008, page 57, lines 30 - 31, is amended to read:

ALLOCATIONS	APPROPRIATION ITEMS	GENERAL FUND	OTHER FUNDS
Climate Change Impact Mitigation Program (HD 1-40)	**1,400,000** [1,100,000]	**1,400,000** [1,100,000]	

This section adds $300,000 from the general fund to the listed appropriation.

Legislative Fiscal Analyst Comment: *Unless a supplemental adjustment is required, there is no need to amend the original appropriation. This project can be moved to the numbers section of the bill, which would then include a new project in the amount of $300,000 for Climate Change Impact Mitigation. If the section was intended to have a supplemental effective date, it can remain in language, but the effective date clause would need to be revised.*

* **Sec. 17.** LAPSE. (a) The appropriations made by secs. 12 and 13(1) of this Act are for the capitalization of funds and do not lapse.

(b) The appropriations made by secs. 10 and 14 - 16 of this Act are for capital projects and lapse under AS 37.25.020.

This section states that the projects lapse under AS 37.25.020 which provides that the appropriation is for the life of the project. The belief that capital appropriations have a five-year lapse is a common misunderstanding.

(c) A grant awarded in secs. 1 - 16 of this Act to a named recipient under AS 37.05.316 is for a capital project, unless specifically identified in this Act as an operating grant, and lapses under AS 37.25.020 unless otherwise stated or designated for a fiscal year.

This new subsection is included to clarify that all grants under AS 37.05.316 are to be considered capital projects and are to lapse like other capital projects. There has been confusion in the past on whether some grants are intended to be operating grants with a one-year lapse. This language should clarify the situation.

* **Sec. 18.** Section 15(a) of this Act takes effect June 30, 2009.

This effective date makes the $80,000 appropriation for electrical emergencies in section 15 (a) an FY09 supplemental appropriation.

* **Sec. 19.** Except as provided in sec. 18 of this Act, this Act takes effect July 1, 2009.

THIS PAGE INTENTIONALLY LEFT BLANK

Comprehensive Integrated Mental Health Program

The Alaska Mental Health Trust Authority (Authority) administers the Mental Health Trust established in perpetuity. The Authority has a fiduciary responsibility to enhance and protect the Trust and to provide leadership in advocacy, planning, implementation, and funding of a comprehensive integrated mental health program (CIMHP) to improve the lives and circumstances of its beneficiaries. **The Trust's beneficiaries include:**

- People with mental illness;
- People with developmental disabilities;
- People with chronic alcoholism; and
- People with Alzheimer's disease and related disorders.

The Trust

The Mental Health Lands Trust Settlement reconstituted the Trust established by the Alaska Mental Health Enabling Act of 1956 with trust land totaling approximately 930,000 acres. **The settlement required the state to:**

- provide a cash payment of $200 million into a newly created mental health trust fund;
- establish a Trust Authority;
- return the principal of the trust fund to the Authority; and
- perpetually use the income of the trust to pay for trust administration costs and ensure improvements and continuation of the integrated, comprehensive mental health program.

Chapter 6, SLA 1994 appropriated $200 million to the mental health trust fund from the following sources:

Mental health trust income account	$33,000.0
DNR mental health trust income in the general fund	$11,700.0
Proceeds from sale of DNR land sale contract portfolio	$25,000.0
Budget reserve fund	$130,300.0

This appropriation was finalized after the superior court of the State of Alaska made its final determination that the state had satisfied its obligation to reconstitute the Mental Health Trust.

Management of the Trust: The Permanent Fund Corporation manages the trust principal, the Mental Health Trust Lands Office (Dept. of Natural Resources) manages the land, and the Mental Health Trust Authority (Dept. of Revenue) and its Board make recommendations for program funding.

Mental Health Funding: The Trust Authority sources of income for annual spending include:

- a percentage of net asset value of the Trust Fund Corpus (Principal);
- lapsed funds from the prior year;
- income from the Trust's account in the treasury; and
- income from rents, fees, purchase contract interest, and 15% of timber sales from the Trust Land Management.

The Mental Health Budget Process

Separate Appropriation Bill: AS 37.14.001 establishes the responsibilities and authority for management of the Mental Health Trust. The statute requires the Governor to submit a separate appropriation bill limited to appropriations for the state's integrated comprehensive mental health program. If appropriations in the bill submitted by the Governor or the bill approved by the legislature differ from those proposed by the Authority, the bills must be accompanied by a report explaining the reasons for the differences from the Trust's recommendations.

Mental Health Trust Authority Authorized Receipts: The Mental Health Trust generates revenue from the investment earnings on the $200 million trust, land sale/lease proceeds, and land use royalties. Mental Health Trust income, identified in the appropriation bill as MHTAAR or Mental Health Trust Authority Authorized Receipts, provides approximately $10 million per year for CIMHP funded programs and mental health trust administrative costs.

A unique provision of the settlement grants the Authority the power to spend mental health trust income without legislative approval. This provision does not, however, remove the legislature from spending decisions. The Trust's spending plans typically allocate substantial money to state agencies, which cannot spend the money without legislative authorization.

This approach to budgeting requires extensive cooperation between the Authority and the agencies that receive MHTAAR. The Authority considers requests from relevant agencies and beneficiary boards, and then submits a list of approved projects and funding proposals to the Governor. Although the budget is developed cooperatively, the Governor's request makes changes in MHTAAR funding without the approval of the Authority. Similarly, the legislature typically works with the Authority on any revisions to the Authority's plan.

Zero-Based Budgeting: FY2010 is the second year of zero-based budgeting of MHTAAR for the Trust, meaning that all MHTAAR in state agencies was removed from the FY2010 adjusted base budget. This approach emphasizes that MHTAAR funding is not based on prior year appropriations, but is an independent decision made by the Authority each year. The approach has the advantage (from the Authority's perspective) of specifying the purpose of all MHTAAR that appears in the budget. In prior years, the purpose of continuing funding was not stated in budget transactions.

Other Funds Appropriated in the Mental Health Budget: Other state funds and federal funding are typically included in the CIMHP. These might include general funds, AHFC Dividend funds, and Alcohol and Other Drug Abuse Treatment & Prevention Funds. The Authority does not exercise as much control over this portion of the Mental Health budget. Although the Authority is typically consulted about expenditure of non-MHTAAR for mental health purposes, the Authority cannot dictate where other funds may or may not be used. Allocation of state and federal funding for mental health purposes is similar to the process that applies to the regular operating and capital budgets; state agency operating requests show changes to appropriations made the previous fiscal year. Capital requests are typically independent of prior year appropriations.

The FY2010 Mental Health Budget

The Trustees approved five focus areas for the FY2010 budget cycle, with the goals affecting significant system changes in the areas of:

- Bring The Kids Home;
- Affordable, Appropriate Housing for Trust Beneficiaries;
- Disability Justice for Trust Beneficiaries;

- Trust Beneficiary Group Initiatives; and
- Workforce Development

OPERATING

The net increase in state-controlled funding **(GF/MH)** from FY2009 to FY2010 is approximately $12.5 million. Mental Health Trust recommendations do not typically address all Mental Health funding. The Governor's budget request includes the following items not addressed by the Trust:

- FY2009 GF/MH funding included in the base for FY2010; and
- FY2010 Salary Wage and Health Insurance increases.

The FY2010 Trust **MHTAAR** recommended budget totals $12.7 million. The following items are Trust recommendations that are not yet included in the Governor's FY2010 budget request:

- New student loan repayment program to be used as a recruitment and retention tool for providers serving Trustee beneficiaries;
- Pilot program to provide coordinated services to individuals with traumatic brain injury, and their families not otherwise eligible for such services from other agencies or programs; and
- Support for a rural secure treatment provider program under Title 47, which provides for involuntary commitment of clients incapacitated by alcohol and/or drugs. Title 47 client services are the highest level of treatment and the most expensive in providing secure treatment services.

Statewide Total Appropriations for Mental Health Programs

	FY06	FY07	FY08	FY09	AMHTA FY2010 Request	FY2010 Gov
State-Controlled	114,652.0	127,712.4	131,568.6	159,818.2	17,918.6	172,269.9

State-Controlled	9,049.2	12,200.0	13,600.0	10,050.0	18,816.8	16,209.7
MH Trust	3,100.0	2,650.0	2,500.0	3,500.0	2,780.0	2,330.0
Total Capital	**12,149.2**	**14,850.0**	**16,100.0**	**13,550.0**	**21,596.8**	**18,539.7**

CAPITAL

The Governor's FY2010 Capital Budget Request of $18.5 million for Mental Health programs is $3.1 million less than the Trust's recommendations of $21.6 million. The Trust's recommendations include $2.7 million MHTAAR, $6.1 million GF/MH, and $12.8 million AHFC Dividends. Below are some of the significant projects contained in both the Trust's recommendations and the Governor's Mental Health budget (funding levels shown below are from the Governor's budget):

- MH AHFC Homeless Assistance Program (ED 99) $10.0 million
- MH AHFC Beneficiary and Special Needs Housing (ED 99) $1.8 million
- MH Coordinated Transportation and Vehicles (ED 99) $1.1 million
- MH Home Modification and Upgrades to Retain Housing $1.1 million

Department of Administration

The mission of the Department of Administration (DOA) is to provide consistent and efficient support services to state agencies so that they may better serve Alaskans. As a liaison between the Governor's Office and the Legislature, DOA steps in to establish policies and coordinate services among divisions. DOA provides statewide leadership and policy direction in the following areas:

- finance and accounting;
- payroll;
- information technology;
- human resources;
- labor relations;
- procurement, including final administrative decisions on statewide procurement appeals;
- facility leasing and management;
- risk management; and
- employee and retiree benefits programs for state and local governments.

Direct public services are provided through the Division of Motor Vehicles, Public Defender Agency, Office of Public Advocacy, and the Office of Administrative Hearings. The Department also oversees administrative functions of four independent boards and commissions (the Alaska Public Broadcasting Commission, the Alaska Public Offices Commission, the Alaska Oil and Gas Conservation Commission, and the Violent Crimes Compensation Board).

SIGNIFICANT ISSUES

The FY2010 Department of Administration general fund operating budget as submitted by the Governor is $462.1 below the FY09 Revised Management Plan (which excludes fuel/utility & gasline one-time funding of $66.8). The Governor's net GF change from Adjusted Base is $1,396.6.

The following notes correspond to numbers in the last column on the preceding spreadsheet:

1. **Enterprise Technology Services: $300.0 GF.** Additional funding is requested to pay cost increases associated with operation and maintenance of the State of Alaska Telecommunications System (SATS) microwave transmission network. The cost increases include fuel and power for SATS microwave sites and transportation costs, including costs for helicopter access to remote sites. This increment will assist in maintaining the physical operations of the SATS Microwave Network System and telephonic and network communications outside the Anchorage area. These sites are important to daily operations of state agencies, including the Alaska State Troopers. Areas of the state that rely on the SATS Microwave System include Kodiak, the Anchorage-Fairbanks-Delta-Tok-Glennallen highway corridors, the Kenai Peninsula, Valdez and Cordova.

2. **Finance Operations: $140.0 GF/Program Receipts.** The Governor requests additional authority to spend receipts anticipated under a new contract with U.S.

Bank for *One Card*. During FY09, the budgeted credit card rebate was increased by $250.0 for a new total of $463.2. Current projections suggest a rebate of between $550.0 and $600.0 will be available under the new contract with U.S. Bank in FY2010. The Department is asking for the authority to spend these receipts to partially offset cost increases related to supporting the Alaska Data Enterprise Reporting (ALDER) Data Warehouse ($100.0) and to provide for vacancy factor reduction ($40.0).

Per AS 37.05.142-144: Program receipts may not be collected unless authorized by law. An appropriation is required before funds may be expended, and expenditures are restricted to the lesser of the amount collected or amount authorized. Program receipts may be used to administer the program generating the receipts, implement the laws related to the functions generating the receipts, or cover the cost of collecting the receipts. They may not be used directly for programs other than the program that generates the receipts. Because it is not clear that receipts generated by a credit card program can be used for a data warehouse or vacancy factor reduction, subcommittees may wish to consider changing the fund source to GF.

3. **Elected Public Officers Retirement System (EPORS) Benefits: $120.0 GF.** EPORS currently has 39 members (25 retirees and 14 surviving dependents) who are receiving benefits. Increased costs are due to mandatory benefit increases based upon the salaries of the positions from which members retire. Another contributing factor for this increment is the projected rise in the cost of health insurance, which is also a member benefit.

4. **Salary Fund Source Changes: $1,095.1 GF.** The Governor's budget proposes using general funds to replace a portion of other funding sources that could be used to pay for contractual wage and health benefits increases. Subcommittees should carefully examine each of these salary adjustment fund changes. Please see ***Fund Source Changes for Salary Adjustments*** on page 18 for further discussion of this issue. Within the Department of Administration, $1.1 million in GF fund changes have been included to replace Inter-agency Receipts that are "not available" in customer agency budgets. The largest of these fund switches are in Personnel ($472.2) and Enterprise Technology Services ($415.9). As an alternative to these fund source changes, DOA could charge agencies for services and let any necessary fund source changes occur in the agencies. The latter approach would provide more information regarding agencies that are unable to pay for DOA services using existing fund sources.

ORGANIZATIONAL CHANGES

There are no significant changes requested.

CAPITAL REQUEST

The Governor's 2010 capital budget contains $50 million from the Alaska Housing Capital Corporation (AHCC) "savings account" to continue the massive undertaking of replacing accounting (AKSAS) and payroll (AKPAY) systems. The accounting and payroll systems are nearing the end of their useful lives and the Department is attempting to replace them while they are still functioning. Previous appropriations for this project total $41 million. The future anticipated GF requests from FY11 through FY15 would add another $105 million.

Legislative Fiscal Analyst Comment: *The AHCC fund source is classified as GF in Legislative Finance Division's view of the world. The Governor classifies these receipts as "Other" Funds, leading to a discrepancy in how the Department of Administration's largest capital project—the Statewide System Replacement—is classified.*

Section 10 of the capital budget appropriates $11.7 million in Information Technology Projects to the Governor's Office. Two of these projects are allocated to the Department of Administration:

- Administration Enterprise security projects for $5 million funded through the Information Services Fund, and
- Administration Document Management System – Microfilm Conversion Phase 1 for $328,000 funded by a variety of retirement system accounts and a small amount of GF.

The Information Services Fund is capitalized by a $9.5 million GF appropriation in Section 12(c)(1) of the Governor's bill.

The capital request presented by the Governor also includes $930.0 GF for four smaller projects. The most significant of those GF projects is the Lease Management System that will replace the existing systems currently used to project lease and facility costs (in service since approximately July 2002) with one that will interface with the state accounting system. The Department's goal for managing statewide leases, facilities information, and budgets is to provide effective space management, cost tracking, reporting, and projections for leases and facilities.

Legislative Fiscal Analyst Comment: *As in FY09, direct appropriations for costs associated with public employees' retirement systems are segregated from the Department's budget in order to avoid overstating the Department of Administration's budget. A total of $451.2 million in direct appropriations for retirement include:*

*(a) **$206,300.0 GF for the teachers' retirement system** defined benefit plan account;*

*(b) **$241,600.0 GF for the public employees' retirement system** defined benefit plan account;*

*(c) **$1,722.5 GF for the Department of Military and Veterans' Affairs AK National Guard and Alaska Naval Militia** defined benefit plan account; and*

*(d) **$1,550.0 GF for the judicial retirement system** defined benefit plan account.*

Department of Commerce, Community, and Economic Development

The Department of Commerce, Community, and Economic Development (DCCED) provides a wide range of development services to private businesses, aids in protecting the public by regulating certain industries, and provides services to communities. The Department:

- provides general assistance and access to capital markets for businesses;
- coordinates numerous state grant and loan programs;
- manages programs aimed at key economic sectors such as electric power generation, tourism, aerospace, mining, and fishing;
- participates in the marketing of Alaskan products and visitor attractions;
- regulates banking, securities and corporations, insurance, occupations and public utilities;
- provides services to local governments and unincorporated communities in the form of grants and direct technical assistance; and
- administers programs offering assistance in the areas of government and financial management, utilities, planning, and energy management.

SIGNIFICANT ISSUES

The FY2010 Department of Commerce, Community, and Economic Development general fund operating budget submitted by the Governor is $18.5 million less than the FY09 Revised Management Plan (which excludes fuel/utility and gasline one-time funding). In FY09, the legislature made a special appropriation of $23.0 million GF for distribution through the Power Cost Equalization Program. This amount is included in the FY09 Management Plan but is removed from the FY2010 base. The Governor's net GF increase from Adjusted Base is $4.8 million, comprised of salary fund source changes and several increments described in the numbered paragraphs below.

Power Cost Equalization (PCE). PCE was an issue in the special session when the legislature raised the cap on subsidies for rural electric rates in response to higher fuel costs. This was intended to be a one-year solution that would be readdressed during the 2009 session. The Governor's FY2010 request reflects a return to FY08 parameters. The FY2010 funding level is $32.8 million—down from $51.1 million in FY09. PCE is not typically addressed by subcommittees.

Core Service Increases. The Department's request includes several increments for "Core Services." According to the Department, the core services increment in the Commissioner's Office is primarily to record *intra-agency* charges, while the core services increments in various divisions are primarily to record *inter-agency* costs.

Most of the $171.0 I/A Receipts increment in the Commissioner's Office reflects indirect cost plan charges that have been collected (but not budgeted) for years. The request is not so much an increment as a clarification of the budget. According to the Department, the core services increments in various divisions cover FY09 and FY2010 increased charges (imposed by the Departments of Administration and Law) that the Department cannot absorb. Subcommittees may

wish to ask the Department to provide additional detail on all the core service increments, including where the money comes from, where it will go and what it will purchase.

Federal Program Funding for National Forest Receipts and Payment in Lieu of Taxes (PILT), $9.9 million Federal Funding. The Department anticipates receiving and distributing (to local governments) $6.3 million in National Forest Receipts and $3.6 million through the PILT formula.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. Community and Regional Affairs: $2.36 million GF.

- **Fund Change, $2 million GF.** Passage of HB 111 (effective 10/1/09), reduced business license fees to $50/year (from $100/year). The approved fiscal note for HB111 showed replacement of lost Business License Receipts revenue with general funds. This appropriation implements the fiscal note. In FY09, $6.26 million of Business License and Corporation Fees was spent to support Community and Economic Development and Operations on issuing licenses. Receipts in FY2010 are expected to be about $4.4 million. Thus, $1.97 million GF funding will be needed to maintain services at current levels.
- **Alaska Legal Services: $200.0 GF.** The Department did not remove this one-time item from the base budget for FY2010. The Department seeks to continue FY09 one-time funding for the Alaska Legal Services Program. Legislative Finance removed the amount from the base, and then added an increment in order to match the Governor's request.
- **Grant Administrators: $164.0 GF.** Two grant administrators were added as a one-time item in FY09 in response to an increasing number of grants appearing in the budget as oil prices (and state revenue) climbed from FY06 through FY09. The Department is requesting these positions be continued in the FY2010 budget. The number of grants distributed/monitored by the Department remains high and the grant administrators are needed to provide technical assistance to recipients. The subcommittee may wish to explore adding these positions to the base budget if the number of grants administered by the Department remains at current levels. On the other hand, if revenue reductions result in a significant reduction in the number of grants appropriated, retaining the one-time designation may be appropriate.

2. Alaska Seafood Marketing Campaign: $1,882.2 GF.

The Department's Seafood Marketing program seeks to replace $1,500.0 in Federal grants ($500.0 in direct federal funds and $1 million SDPR from the Alaska Fisheries Marketing Board (AFMB)—federal funds passed through the AFMB). In addition, ASMI claims that $378.0 of authority to receive and spend revenue from fish taxes will be uncollectible and requests that this amount be replaced with general funds. Subcommittees may wish to examine the reasons for declining receipts in this program and the desirability of adding general funds to the base budget.

3. Statewide Project Development, Alternative Energy Efficiency: $431.3 GF.

- **Support for Energy Planning: $150.0 GF.** This request is intended to provide the resources necessary to fund support staff for energy planning.
- **AEA Executive Director for Statewide Energy Coordination: $210.3 GF.** The AEA Executive Director/Statewide Energy Coordinator was funded in FY09 with

CIP receipts from a statewide energy plan capital project. Because the need for this position will not end when the statewide energy plan is completed, the agency is requesting base funding in the FY2010 budget.

- **Renewable Energy Fund/Task Force: $71.0 GF.** The fiscal note for HB 152 identified $71.0 as a one-time FY09 appropriation. The Department did not remove this amount from the base budget for FY2010. Legislative Finance added an increment in order to match the Governor's request, but subcommittees should consider deleting the start-up costs from the budget request.

4. **Fund Changes for salary adjustments: $132.9 GF.** Three fund changes have been requested to "correct unrealizable fund sources in the salary adjustment for bargaining units." The Department states that additional I/A Receipts funds are not available for programs and requests a replacement with GF. Please see ***Fund Source Changes for Salary Adjustments*** on page 18 for further discussion of this issue.

ORGANIZATIONAL CHANGES

There are no significant organizational changes.

CAPITAL REQUEST

DCCED's total capital budget is nearly $140 million; $63 million of which is federal money. The budget consists of a diverse mix of grants and capital projects, most of which are more clearly described as *passing through DCCED* rather than *to DCCED*. The pass-through projects include rural power and transportation systems, community economic assistance, port expansion and cruise ship industry enhancements. Projects requested by DCCED include:

- $17.5 million to build two facilities at the Kodiak Launch complex: a dedicated rocket motor storage facility and an additional launch pad.
- Several information technology projects, including $565.0 appropriated directly to the Department and $2.2 million for imaging and management systems appropriated through the Governor's Office.

Department of Corrections

The mission of the Department of Corrections (DOC) is to provide secure confinement, reformative programs, and a process of supervised community reintegration to enhance the safety of Alaskan communities. The Department:

- provides secure confinement;
- provides reformative programs; and
- provides supervised re-entry.

SIGNIFICANT ISSUES

The FY2010 Department of Corrections general fund operating budget as submitted by the Governor is $3,014.4 above the FY09 Revised Management Plan (which excludes fuel/utility & gasline one-time funding of $1,760.0). The Governor's net GF change from Adjusted Base is $2,097.4.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. **Prison population** has declined recently; however, population increases during the past few years have continued to drive departmental costs upward. The state prisoner population typically exceeds 100% of approved institutional emergency capacity. With increased law enforcement by local and state agencies, the Department has no expectation of a long-term decline in the offender population. The Department addresses the prison population issue with several increments;

Legislative Fiscal Analyst Comment: Subcommittee members may wish to inquire about the unprecedented decrease (roughly 5%) in the Department's in and out-of-state prisoner count (from December 2007 to present) and what impact these latest statistics have on costs.

- **Community Residential Centers (CRC): $719.2 GF.** Funding is requested for 43 additional regular beds to assist in managing the in-state offender population. In FY2008, the DOC contracted for 710 CRC beds (602 regular beds and 108 per-diem beds) of which approximately 50% of the per-diem beds were funded. DOC used 93% of available funding. In FY2009, DOC received funding for 710 CRC beds but was able to contract for 733 (625 regular beds and 108 per-diem beds) of which approximately 70% of the per-diem beds are funded.

- **Increased contractual costs for Arizona: $381.1 GF.** The Department is requesting funding for a $1.23/bed/day contract rate increase at the Red Rock Arizona facility that houses Alaska's overflow prisoners. As of October 31, 2008, out-of-state institutional capacity was at 98% (882 of 900 beds filled) with no expectation of a decline in offender population. The DOC anticipates continuing to place prisoners in the contract facility throughout the next fiscal year.

- **Wildwood Correctional Center: $302.2 GF.** In FY09, the Department received a one-time increment of $302.2 to convert two existing buildings in order to house 80 prisoners. The housing units are scheduled to become available in late FY09. The Department also received $1.1 million to cover ¾ of FY09 operating costs of the new housing units. The $1.1 million remains in the FY2010 base, and an increment for

$353.3 (for ¼ year operating costs) was expected. Instead, the Department request retains the $302.2 one-time funding and adds it to the base budget. The DOC intends to manage the new units at the requested funding level.

- **Goose Creek Correctional Center: $218.6 GF Transfer.** The Department is transferring two positions from the Prison System Expansion component to the new Goose Creek Correctional Center component that is expected to open in FY2012. In anticipation of future staffing needs, the Training Academy has established an annual schedule consistent to meet the needs of the new prison that will be located at Point MacKenzie.

2. **Inmate Health Care** cost increases are primarily due to increased costs for medical services and are associated with the degree of care that is being required for chronic conditions (i.e. dialysis, cardiac, oncology, geriatrics, diabetes, etc). The Department is requesting the following increments to address rising costs and expansion of services:

- **Substance Abuse Treatment Programs: $500.0 GF.** This request provides funding for a second year of expansion of the institutional out-patient treatment programs. This increment would implement two institutional out-patient treatment programs at Anchorage Correctional Complex and Anvil Mountain Correctional Center. In FY09, the Department received $801.0 GF to implement five intensive outpatient treatment programs at Spring Creek Correctional Center, Palmer Correctional Center, Fairbanks Correctional Center, Yukon-Kuskokwim Correctional Center, Lemon Creek Correctional Center, and the Anchorage Community Residential Treatment Centers.

- **Mental Health Services: $444.8 PFD Criminal.** Additional funding is requested to support the increase in Mental Health Trust beneficiaries committed to the custody of the Department. Of the 38,000 bookings processed annually by DOC, 14,000 have a mental health diagnosis. In FY09, the legislature approved a $246.0 increment ($123.0 GF/$123.0 MHTAAR) for this purpose.

- **Sex Offender Treatment: $200.0 PFD Criminal.** This increment is requested to establish an institutional sex offender treatment program within the Wildwood Correctional Center. The sex offender treatment program will enhance community safety by providing more offenders with intensive, offense-specific assessment and treatment prior to release.

Legislative Fiscal Analyst Comment: *As part of the new management strategy of the Palin administration, the agency is working to restore or expand many offender rehabilitation programs. Subcommittees may wish to inquire about the effectiveness of these programs on recidivism.*

- **Criminal Sentencing and Polygraphing: $485.3 PFD Criminal.** This request is the third year of funding associated with the passage of legislation relating to periodic polygraph testing and treatment of all sex offenders on probation or parole [Ch 14 SLA06 (SB 218)]. Previous appropriations for these activities total $786.8 GF in FY08 and $752.5 GF in FY09.

Legislative Fiscal Analyst Comment: *The amount of PFD Criminal funds available varies with the amount of the Permanent Fund dividend and the number of felons incarcerated. Recent investment losses are likely to reduce PFDs in the future, with a*

corresponding decrease in PFD Criminal funds available. The likely result is future requests to replace PFD Criminal funds with general funds.

3. **Administration and Support** has requested the following two increments:

- **Research and Records: $180.0 GF.** This increment replaces one-time funding in the Department's FY09 budget for a File Imaging Program in order to manage the increasing number of criminal records. According to the Department, continued funding is necessary to fully implement the program as well as maintain files as imaged records rather than as hard-copies.
- **Information Technology MIS: $183.9 Federal Receipts.** The Department is requesting authority to receive one-time funding for the second year of the Statewide Automated Victim Information and Notification (SAVIN) grant through the United States Department of Justice/Bureau of Justice Assistance (BJA). The Department will use the grant to enhance Alaska's existing automated victim notification system (VINES) which provides self-registered victims with information regarding the custody status of a given offender. DOC received the first year of funding ($122.6 in FY09) through RPL #20-9-0010.

  The Department will use their existing GF operating appropriation to fund their matching portion (50%) of this grant as required by the BJA.

ORGANIZATIONAL CHANGES

The Department has moved the Correctional Academy and Prison System Expansion allocations from Administration and Support to the Population Management Appropriation. The Substance Abuse Treatment and Sex Offender Programs have been relocated from Offender Habilitation / Population Management to the Inmate Health Care Appropriation.

CAPITAL REQUEST

The Agency's $27.7 million capital budget is primarily comprised of a $20 million dollar appropriation for the Goose Creek Correctional Center scheduled to begin construction in calendar year 2009. With the recent collapse of financial markets, the cost of selling bonds for this project has increased significantly. The Department of Corrections has responded by cutting back elements of construction where possible, however, the gap between the revised construction budget and the bond sale is still short by approximately $20 million. This request to support the construction and occupancy of the new prison utilizes Alaska Housing Capital Corporation (AHCC) Receipts.

Legislative Fiscal Analyst Comment: *Legislative Finance classifies the Alaska Housing Capital Corporation savings account as general funds. The Governor classifies the account as "other" funds.*

Some of the Department's other large capital projects include:

- Annual Facilities Maintenance and Repairs: **$2.5 million GF**
- Combined Hiland Mountain Correctional Center Lead Abatement and Buffer Fence: **$2.0 million GF**
- Medical Information System: **$1.5 million PFD Criminal**

Department of Education and Early Development

The Department of Education and Early Development (DEED) is committed to ensuring quality standards-based instruction to improve academic achievement for all students. The Department is responsible for funding and regulating the state's K-12 schools as well as administering school debt reimbursement and grants for school construction/major maintenance. Core services include the following:

- Provide and evaluate a Comprehensive Student and School Standards, Assessment and Accountability System for all students and schools in Alaska that is based on student, school, educator, and culturally responsive standards and state and federal requirements;
- Provide and support standards-based professional development and mentoring for Alaska's educators to ensure high quality and student achievement;
- Provide a statewide program to ensure all students have the foundational skills required for a successful transition to college and/or the workforce after high school;
- Secure and award state, federal, and private educational funding to school districts and other educational organizations to result in higher student achievement; and
- Provide high quality data to school districts and stakeholders through the use of the Alaska Statewide Longitudinal Data System.

The Department also houses Commissions and Boards (including the Professional Teaching Practices Commission, the Alaska State Council on the Arts and the Alaska Postsecondary Education Commission) and is responsible for Mt. Edgecumbe Boarding School, EED State Facilities Maintenance, and Alaska Library and Museums.

SIGNIFICANT ISSUES

The FY2010 Department of Education and Early Development general fund operating budget as submitted by the Governor is $50,929.9 above the FY09 Revised Management Plan (which excludes fuel/utility & gasline one-time funding of $167.8). The Governor's net GF change from Adjusted Base is $1,286.2.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. K-12 Education Formula Funding. Because education funding changes are likely to come through legislation rather than subcommittee action, the discussion here is brief and general. The Governor's general fund request of $994.3 million for the foundation program is $49.5 million more than the FY09 Management Plan.

Last year the Governor presented a three-year education plan that closely followed the legislative Education Task Force recommendations. The legislature approved HB 273 (Ch. 9, SLA 2008) with fiscal notes that provided for GF appropriations to capitalize the Public Education Fund for increases to the Foundation Program and Pupil Transportation. On the basis of this legislation, the Base Student Allocation (BSA) will increase $100/student/year for FY09, FY2010, and FY2011. There are also approximately 2,000 intensive-needs students in Alaska who experience health conditions and disabilities requiring daily monitoring and assistance with their school day activities. The second

year of a three-year phase-in with significantly higher payments to school districts to educate and care for these students is also included in the Governor's request.

Section 18(w) of the Governor's operating budget bill appropriates $1.062 billion from the general fund to the Public Education Fund for FY2010. This amount is $9.5 million more than required to fund K-12 education in FY2010, but is $50 million less than required to fund education in FY2011.

The concept of forward funding is that the amount appropriated in a given year will be the amount required in the following year. In this regard, the Governor's budget is $50 million short of forward funding K-12 education. However, the Public Education Fund target balance is 3% above the anticipated cost of K-12 in the following year. By using the "cushion" in the fund, the Governor's budget is only about $1 million short of funding anticipated FY2011 K-12 needs.

2. **Pre-Kindergarten Pilot Program: $2,000.0 GF.** Initial program implementation funds are included for an "Age 4 Pre-Kindergarten Pilot Program". According to the Department, this new preschool program would provide a voluntary, comprehensive, half-day for four-year olds and early five-year olds based on the standards set forth in the Alaska Early Learning Guidelines. Participating school districts would be funded through a competitive grant process. It is anticipated that the preschools would serve 500 children statewide.

3. **Alaska Challenge Youth Academy (ACYA): $185.2 GF.** The academy is operated by the Department of Military and Veterans Affairs and is funded through a Reimbursable Services Agreement with DEED in accordance with AS 14.30.740. With this increment, the total general fund budget for the ACYA will be $6,429.1.

Legislative Fiscal Analyst Comment: *The legislature may wish to revisit this formula program. The current statutory program support formula provides seven times the base student allocation for ACYA residential students plus a smaller non-resident amount. The legislature may wish to consider a direct appropriation to DMVA, as DEED has no legal responsibility for the ACYA and, therefore, should not act as a pass-through agency.*

4. **Executive Administration: $824.2 GF.** The Executive Administration allocation includes a request for additional funds ($600.0 GF) aimed at district improvement support services. According to the Department, specialist contracts in the amount of $600.0 are needed to meet the mandate in legislation passed last session (SB285—Ch. 70, SLA2008) which provides for DEED to work toward district improvement in the areas of math, science, arts, IT, culture, and social studies. A second increment ($224.2 GF) funds implementation of school improvement plans and district interventions on a statewide basis.

5. **Early Learning Coordination: $800.0 GF.** An increase of $800.0 GF for Head Start Grants would serve approximately 60-80 additional children. Approximately 1,000 Alaska children remain on wait lists for this program. The legislature increased funding for Head Start by $600.0 in FY09. With approval of this FY2010 increment, overall funding for Head Start grants would be $7,393.3 (GF $7,353.3/Fed $40.0).

6. **Student and School Achievement: $550.0 GF.** General Fund increments in this area are divided into three requests:

   (a) $250.0 for the Alaska Comprehensive System of Statewide Assessments Contractual Increase based on current contract change order costs plus a 4% annual anticipated increase;

   (b) $150.0 (GF/MH) for the GF match portion of the Mental Health Trust Authority's recommendation for an Autism Resource Center. This on-going project to provide education, consultation, and support to families plus resources for mental health community members is managed by DEED through a contract with the Special Education Service Agency. An additional increment of $200.0 Mental Health Trust Authority Authorized Receipts (MHTAAR) provides Trust Authority funding; and

   (c) $150.0 GF/MH funds for the Governor's Council for Rural Secondary Transition—a project managed by DEED to identify the skills of rural residents and seeks to team those residents with youth and communities in transition planning and service delivery. This FY2010 request continues the momentum of the project from FY09 which is currently funded with $50.0 MHTAAR plus $50.0 GF/MH.

7. **WWAMI Medical Education: $524.7 GF.** In the spring of 2007, the Alaska WWAMI program expanded class size to 20 incoming students per year. This increment is required under Alaska's contract with the University of Washington School of Medicine (UWSM). The basis for the funding structure is determined by the partnership contract between the UWSM, the University of Alaska, and the State of Alaska. Students attend the first year of training at the University of Alaska, Anchorage campus, before continuing training at the UWSM in Seattle, Washington. The Postsecondary Education Commission acts as the state's fiscal agent and administers WWAMI participants' services agreements/loans. Funds are used for education and administrative costs for second, third and fourth year students, which average over $40,000 per student per year. In addition, the program provides support for clinical sites in Alaska. WWAMI program administration and community clinical unit costs run about $300,000 per year. Since the inception of the program in 1971, approximately 400 students have been enrolled in this program which to date has a 95% graduation rate.

8. **Boarding Home Grants: $350.0 GF.** In accordance with regulation, Galena City School District is requesting an increase in funding for an additional 55 beds (from 120 to 175 students) for the Galena Boarding Home Residential Program. The capacity increase is due to continued growth of the program and increased dormitory capacity.

9. **Professional Teaching Practices Commission: $252.1 GF.** The Governor's FY2010 budget includes a funding switch from Receipt Supported Services to GF in the amount of $252.1. For the most part, in the past the Professional Teaching Practices Commission (PTPC) has received their revenue from receipts collected through Teacher Certification fees. The fees collected from Teacher Certification services also support the Teacher Certification allocation. For FY2010, the Department has determined that in order to remain self-supporting, the Teacher Certification program no longer has the ability to distribute a portion of their receipts to the PTPC, which has resulted in the increment request. There is neither a plan to increase Teacher Certification fees, nor are additional applications expected.

10. School Finance & Facilities: $219.9 GF. General Fund increments in this area are divided into three requests:

(a) $24.7 for the FY2010 School Bus Transportation contract, which increased due to negotiated CPI adjustments;

(b) $45.2 for school bus driver training program increases; and

(c) $150.0 to provide additional auditors for intensive students. The Department states that these funds will allow for contracts for auditors to review *new* claims regarding intensive students. Currently new claims are backlogged as staff focus on federal programs and current claims. These contracts would take place regionally in Juneau, Anchorage and Fairbanks.

11. School Performance Incentive Program: ($4,800.0) GF: *Decrement* to remove funding for the School Performance Incentive Program, which was initially authorized as a three-year program (FY07 – FY09) and which will sunset at the completion of the FY09 incentive award distributions.

ORGANIZATIONAL CHANGES

There are no significant changes requested.

CAPITAL REQUEST

In addition to school district major maintenance grants totaling over $40 million, the Department of Education and Early Development's FY2010 capital budget includes $2 million GF for continued work on deferred maintenance and construction projects from the Mt. Edgecumbe High School six-year plan. Specific projects are determined by an annual review including verification that the school is performing maintenance and operation tasks in accordance with the requirements of AS 14.11.011.

Legislative Fiscal Analyst Comment: *The school debt reimbursement program is shown in a separate section of this overview that addresses debt obligations (see table on page 47).*

Department of Environmental Conservation

The Department of Environmental Conservation (DEC) is responsible for protecting human health and the environment. This agency provides the following core services:

- develop and enforce standards for protection of the environment;
- provide controls and enforcement for the prevention and abatement of pollution to the environment; and
- provide controls and enforcement to protect citizens from unsafe sanitary practices.

SIGNIFICANT ISSUES

The FY2010 Department of Environmental Conservation general fund operating budget submitted by the Governor is $249.1 GF above the FY09 Revised Management Plan (which excludes fuel/utility and gasline one-time funding of $111.0). The Governor's net GF change from Adjusted Base is $247.4, comprised of salary fund source changes and one GF increment in Air Quality.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. **Climate Change Sub-Cabinet Activity: $184.0 GF.** The Department anticipates that during 2009 and 2010, The Alaska Sub-Cabinet on Climate Change will provide climate change mitigation and adaptation recommendations to the Governor. These recommendations will require coordination between the public and private sectors, between state agencies, and within the Department of Environmental Conservation. The 2008 Legislature added a one-time $184.0 GF increment associated with the Climate Impact Work Group (as part of the Alaska Climate Change Sub-Cabinet established by Administrative Order #238). The Sub-Cabinet's work is not yet done, and the Department requests funds in Air Quality for its completion. Currently, over one hundred Alaskans are serving on various advisory and technical committees providing recommendations to the Sub-Cabinet. The draft strategy is scheduled to be available in late 2009 for public comment before submission to the Governor for approval. The requested funding would pay for contractual costs for preparing final recommendations, public meeting participation costs, advisor travel costs, and a small amount for commodities and personal services. The subcommittee may wish to consider classifying the increment as a one-time item.

2. **Oversight of Activities Associated with Increased Mining Activity: $145.0 Inter-Agency Receipts.** Because mining activities have increased during the last few years, the Division of Water requests funding to provide additional oversight by adding one permanent, full-time Environmental Engineer position (as well as funding for part-time positions) to work with federal agencies to complete a viable and protective mine permitting framework. The receipts come from existing Department of Natural Resources funds within the Large Project Permitting allocation, Resource Development appropriation.

3. **Continuation of Ocean Ranger Program: $4.0 million Ocean Ranger Funds.** The 2008 Legislature approved $4.0 million and implemented a new FY09 fund source code to track expenditures for the Ocean Ranger program and other oversight measures as called for by a ballot initiative passed in August 2006. The

FY2010 Governor's request continues funding for this program. During the 2008 cruise ship season, the Department implemented a full Ocean Ranger program on large cruise ships. Ocean Rangers rode approximately 89% of voyages while a ship was in Alaskan waters. The other vessel voyages were covered using in-port inspections. The $4.0 million annual cost of the program equals the Department's estimate of fees that will be collected from a $4 per berth tax imposed to provide funds for the State to hire or retain Coast Guard licensed marine engineers (Ocean Rangers) to observe health, safety, and wastewater treatment and discharge operations.

Department of Fish and Game

The Department of Fish and Game (ADF&G) is charged with protecting and improving the fish, game, and aquatic plant resources of the state, and managing their use and development in the best interests of the economy and the people of the state, consistent with the sustained yield principle.

Core Services:

- Provide opportunity to utilize fish and wildlife resources;
- Ensure sustainable and harvestable surplus of fish and wildlife resources;
- Provide information to all customers;
- Involve the public in management of fish and wildlife resources; and
- Protect the state's sovereignty to manage fish and wildlife resources.

Goals:

- Optimize habitats and economic benefits from fish and wildlife resources;
- Optimize public participation in fish and wildlife pursuits; and
- Increase public knowledge and confidence about management of fish and wildlife.

SIGNIFICANT ISSUES

The FY2010 Department of Fish & Game general fund operating budget submitted by the Governor is $848.4 above the FY09 Revised Management Plan (which excludes fuel/utility and gasline one-time funding of $227.8). The Governor's net GF change from Adjusted Base is $2,512.3 comprised of salary fund source changes and a limited number of increments described in the numbered paragraphs below.

The Department of Fish and Game's request for FY2010 does not indicate any significant policy changes. The following are noteworthy items reflected in the budget request:

Use of Loan Funds. The Department of Commerce, Community, and Economic Development remains concerned about the long-term health of the Commercial Fisheries Revolving Loan Fund (CFRLF), which the Department of Fish and Game has used as a funding source for several years. Because loan interest rates are linked to the prime rate, and prime rate has fallen to an all-time low, fund income is in decline. Continuing to withdraw money from the loan fund for purposes not related to lending will eventually limit the ability to make loans. Subcommittees may wish to replace $1.3 million of CFRLF receipts used by the Department of Fish and Game with general funds. However, it should be noted that the CFRLF will receive no less than $10 million in direct payments from assignments of Exxon Valdez Oil Spill (EVOS) settlements in FY2011. Subcommittees may wish to examine use of Commercial Fisheries Entry Commission receipts as well.

Federal Funding Issues. For the past four fiscal years, the Department has budgeted federal receipts in excess of actual revenue by an average of $10.7 million per year. The Department states it is making efforts to reduce surplus federal authority for FY2010. The Governor's budget contains decrements that cut surplus federal funding authority by $572.0. Subcommittees may wish to request the Department to further reduce surplus federal authority.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. **Wildlife Conservation (W.C.) Special Projects: $930.0 GF.** In FY09, the legislature made a one-time appropriation of $1,180.0 GF for Pinniped Research (stellar sea lion, harbor seal, ice seals). The Department now requests that a portion of this funding be continued in FY2010. The ADF&G marine mammal program hopes to continue the research and data collection project, which the Department states has provided critical information on commercial fisheries, predation, oil and gas activities, and environmental variability as well as marine mammal populations protected under the Endangered Species Act (ESA).

2. **Commercial Fisheries, Westward Region Fisheries Mgmt.: $793.7 GF.** This general fund increment replaces a portion of a $1,043.7 one-time amount added in FY09 to support the Bering Sea crab research program. The Department states this funding is needed so the division can continue to provide supervision and perform data collection and analyses needed for abundance-based management of commercial king and Tanner crab stocks throughout the Bering Sea and Aleutian Islands area.

3. **Commercial Fisheries, AYK Region Fisheries: Mgmt.: $80.0 GF.** The Department is requesting GF to replace lost federal receipts that had been part of the funding for two subsistence programs in the AYK Region through the Office of Subsistence Management.

4. **Increased Specific Capital Receipt Authority from Pacific Coastal Salmon Recovery Fund (PCSRF) Program to fund CIP Position Costs in Commercial Fisheries Special Projects: 600.0 CIP.** The Division of Commercial Fisheries has additional PCSRF projects that will be funded in the FY10 budget which will require an additional $600.0 of CIP receipt authority to fund positions in the Special Projects Component.

5. **Fund Source Changes.** The Department is seeking $708.6 GF as fund source changes for Salary Adjustments. Subcommittees may wish to examine these fund source changes carefully to ensure that the funds being replaced with general funds are truly unavailable. Please see ***Fund Source Changes for Salary Adjustments*** on page 18 for further discussion of this issue.

ORGANIZATIONAL CHANGES

The Office of Habitat Management and Permitting (OHMP) of the Alaska Department of Natural Resources became the Division of Habitat, a part of the Alaska Department of Fish and Game, effective July 1, 2008, as a result of Executive Order 114. As part of this reorganization, special area planning, permitting functions, and staff, became part of the Division of Habitat, and offices have physically relocated.

CAPITAL REQUEST

The Department of Fish and Game's capital budget is primarily comprised of the following larger projects:

- **Pacific Coastal Salmon Recovery Fund: $22.0 million Federal Receipts**. Federal fiscal year 2009 (FFY09) appropriations legislation contains funding for the Pacific Coastal Salmon Recovery Fund (PCSRF). The Alaska portion of the federal appropriation is estimated to be up to $22.0 million. Funding comes to the state through a Memorandum of Understanding with the U.S. Department of Commerce designating the Alaska Department of Fish and Game as the program manager. This program seeks to maintain salmon populations for sustainability.

- **Genetic Analysis: $1.5 million GF.** This project proposes to continue the use of genetic stock identification to identify the stock composition of western Alaska chum and sockeye salmon fisheries. Upon completion, ADF&G and the stakeholders will have unprecedented information on the numbers and distribution in space and time of the various stocks of AYK (Alaska Yukon Kuskokwim) salmon to allow improved estimation of productivity and fishery impacts on a stock-specific basis.

- **Hazardous Site Cleanup: $750.0 GF.** The Department of Fish and Game has identified several sites across the state that have known, or suspected, hazardous substances contained at the location. This project provides funds to contract for hazardous substances/contamination site assessments and cleanup designs, and (pending funding) follow up with the actual site cleanup contracts. The funds would be allocated approximately as follows: Glennallen $250,000, Kodiak $250,000, and other smaller ADF&G facilities across the state $250,000.

- **Annual Maintenance and Repair: $1.1 million GF.** This request provides for repair, maintenance and renovation of department facilities statewide and vessel and aircraft repair and maintenance. This is an annual ongoing request.

- **Wildlife Conservation Response Team: $750.0 GF.** This project adds teams of trained wildlife technicians to take responsibility for the public education, proactive enforcement, and incidence responses regarding the increased interactions with wildlife in populated areas of the state. A Wildlife Conservation Response Team will be piloted for Anchorage, Kenai/Soldotna, Palmer, and Southeast communities beginning during the spring of 2010. The goal of the team is to save wildlife and work with the public to reduce inappropriate behaviors and practices that serve to entice wildlife into populated areas.

- **Sport Fish Recreational Access: $3.1 million ($2.3 million federal funds & $775.0 Fish/Game Funds).** This annual request authorizes the Division of Sport Fish to continue to construct and upgrade boating and sport fish access facilities statewide from funds comprised of 75% federal assistance and 25% Fish and Game Fund state match. Projects include: boat launches, mooring floats, parking lots, restrooms, fish cleaning facilities, and other services for recreational boaters.

The remainder of ADF&G's request is in seven projects totaling $791.0 in the areas of software development, salmon assessment, and interagency cooperation resources.

Office of the Governor

The Governor's Office is responsible for the operation of the executive branch of Alaska State government, with fiscal and policy duties conferred by the Alaska Constitution and statutes.

SIGNIFICANT ISSUES

The Governor's Office request for FY2010 reveals no significant changes in policy.

The practices of placing branch-wide appropriations (fuel costs and gasline development) in the Governor's Office and removing one-time items from the base budget make year-to-year budget comparisons difficult. Note that the FY09 budget of $76.7 million includes $57 million that is not carried into the FY2010 base budget. The result is that comparing the FY2010 request with the FY09 budget shows a decrease of $19 million, while comparing the request with the adjusted base shows an increase of $27.7 million. A more meaningful comparison focuses only on the FY2010 base increments; these include $2.7 million for various purposes (see the discussion of carryforward below) and $1 million for redistricting.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. Use of Carryforward from FY08. The Governor's Office has been permitted to carry forward unexpended operating appropriations for several years. Over $2.7 million of Governor's Office general funds was carried forward into FY09. The Governor's Executive Contingency Fund is the allocation that has been used in recent years to record the annual carryforward appropriation, which has historically been used by the Governor's Office for operational and unanticipated expenditures. Carryforward is considered to be a one-time item and is backed-out of the budget each year.

Last year, legislative leadership suggested that the annual carryforward appropriation should be eliminated and that the FY2010 Governor's Office budget should reflect appropriate funding levels in all allocations. The Governor's budget request shows FY09 Executive Contingency funds ($2.7 million) being carried forward into FY2010 and then transferred to various allocations within the Office of the Governor as follows:

Human Rights Commission	$175.0
Executive Office	1,346.3
Governors House	100.0
Contingency Fund	90.0
Lieutenant Governor	200.0
Facilities Rent	103.3
Leasing	85.4
Office of Management and Budget	226.5
Elections	416.1

Because the carryforward appropriation lapses at the end of FY09, the $2.7 million is not available for carryforward or transfer in FY2010. Legislative Finance replaced the

Governor's transfers with increments in order to match the amounts appearing in the Governor's request. Subcommittees may wish to ask the Governor's Office to provide information regarding the purpose of each amount in the table above.

2. **Special Fuel/Utility Cost Adjustment: $24 million GF contingency funding.** Section 13 of the Governor's operating budget bill appropriates up to $24 million (depending on the price of crude oil) to be distributed to agencies to cover increased fuel costs in FY2010.

   An FY09 appropriation of $44 million for increased fuel costs was distributed to agencies. The transfers were considered one-time items and were removed from agencies' FY2010 base budgets. The practice of including one-time branch-wide fuel appropriations in the Governor's Office budget inflates the apparent growth in the Governor's Office budget by $24 million; money appropriated via the fuel trigger will be spent by other agencies.

   Legislative Fiscal Analyst Comment: *The maximum amount of the appropriation corresponds to an average oil price of $60 per barrel. The table in section 13 is truncated before it reaches the projected FY2010 price of $74 per barrel. For further discussion, see section 13 of the review of language provisions in the Governor's operating bill.*

3. **Redistricting Planning Committee: $1,000.0 GF.** Chapter 4, SLA 1999 (now AS 15.10.300) established a Redistricting Planning Committee to make advance preparations for the Redistricting Board, which convenes in September of 2010. The Committee may obtain office space, staff and equipment, and procure a computerized system of data and maps for use by the Redistricting Board. This request kicks off the planning process for redistricting per the 2010 census.

4. **Elections: $3,670.8 GF Reduction.** The entire amount of the FY09 increment for general elections has been removed from the FY2010 budget. The reduction includes 29 temporary employees.

CAPITAL REQUEST

The Governor's Office capital budget contains several Information Technology projects that are to be allocated to various agencies. These projects are discussed in the reviews of the various agencies. The Governor's Office has no capital projects that apply to that Office.

ORGANIZATIONAL CHANGES

There are no structural changes, but several allocations no longer have funding. These include:

- the Statehood Celebration Commission,
- Arctic Wildlife Refuge, and
- Alaska Resources Marketing and Development.

In addition, $200.0 GF for the State Energy Coordinator has been moved to the Alaska Energy Authority.

Department of Health and Social Services

The Department of Health and Social Services (DHSS) promotes and protects the health and well-being of Alaskans through the following core services:

- providing the highest quality of life in a safe home environment for older Alaskans and veterans;
- providing an integrated and comprehensive behavioral health system based on sound policy, effective practices, and open partnerships;
- promoting stronger families, and safer children;
- managing health care coverage for Alaskans in need;
- holding juvenile offenders accountable for their behavior, promoting the safety and restoration of victims and communities, and assisting offenders and their families in developing skills to prevent crime;
- promoting self-sufficiency and providing basic living expenses to Alaskans in need;
- protecting and promoting the health of Alaskans;
- promoting independence of Alaska seniors and people with physical and developmental disabilities; and
- providing quality administrative services supporting the Department's mission.

SIGNIFICANT ISSUES

The FY2010 Department of Health and Social Services general fund operating budget as submitted by the Governor is $34.6 million above the FY09 Revised Management Plan (which excludes fuel/utility and gasline one-time funding of $1,760.0). The Governor's net GF change from Adjusted Base is $47.8 million. This is the smallest increase requested since FY2005.

The Department is targeting five program areas in meeting their theme of, "helping individuals and families create safe and healthy communities." The targeted areas include:

1. Substance Abuse;
2. Health and Wellness;
3. Health Care Reform;
4. Long-Term Care Programs; and
5. Protecting Vulnerable Alaskans.

The largest general fund cost increases in the Governor's FY2010 budget are for the following:

- Medicaid costs—$35.5 million, with reductions of $21.2 million, for a net increase of $14.3 million for Medicaid;
- Children's Services programs and Child Care programs—$7.1 million;
- Alaska Heating Assistance Program—$5.0 million; and
- Substance Abuse and Mental Health programs—$4.5 million GF.

Some requested increases in general funds are attributable to decreases in federal receipts (resulting in the need for general funds to replace federal funds in order to maintain service levels):

- Temporary Assistance for Needy Families (TANF)—the estimated FY2010 cost to continue assisting families with children is $5.1 million GF; and
- Child Advocacy Centers (including the cost of establishing two new centers)—the estimated FY2010 cost is $1.1 million GF.

Significant increases in the Governor's budget are discussed below. The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. Medicaid Increments: $35.5 million GF. Medicaid-related increases appear in the Behavioral Health, Adult Preventative Dental Medicaid Services, Health Care Services, and Senior/Disabilities Medicaid appropriations. Increases in Medicaid programs are attributable to the additional capacity expected as a result of the completion of new facilities and to proposed increases in provider reimbursement rates. Additional funding requests include the re-enrollment and updating of provider information in the Department's current Medicaid information system (required by the Federal Centers for Medicare and Medicaid Services), and adding new positions for performing eligibility assessments for Medicaid recipients.

The Department's request includes the following reductions, which give a net overall Medicaid increase of $14.3 million:

- Cost containment measures and reduced Medicaid authorizations ($13.5 million). Reductions in this year's budget are due to expanding the use of a Preferred Drug List, requiring prior authorization for certain medical services, and the continued use of the supplemental rebate program; and
- FFY2010 Federal Medical Assistance Percentage (FMAP) rate increase of 0.9 percentage point ($7.7 million). The rate change reduces GF and increases federal funds in the Behavioral Health, Children's Services, Health Care Services, and the Senior and Disabilities Services appropriations. The rate change affects three-quarters of state FY2010.

  The federal fund reimbursement rate is set by the Centers for Medicare and Medicaid and is outside the control of state government. The FMAP rate is based on the state's national rank of per capita personal income but can be no less than 50%. The amount of federal funds the state receives for its Medicaid program depends on a complex array of reimbursement rates, some of which change each October 1st with the start of a new federal fiscal year.

  This is the first FMAP rate increase since FFY2004. During the period from FFY2004 through FFY2009, the FMAP rate (which is the percentage of program expenses reimbursed by the federal government) decreased by 10.81 percentage points, which shifted a larger share of increasing health care costs to the state.

  The FMAP rate change also affects the State Children's Health Insurance Program (SCHIP) and the Breast and Cervical Cancer program (BCC), both of which are part of Alaska's Medicaid program. Eligible claims for SCHIP and BCC are reimbursed at an enhanced FMAP rate which reduces the state share of costs by 30% over the regular FMAP.

Legislative Fiscal Analyst Comment: *According to the "check write" information available on-line, the FY09 authorization may exceed Medicaid projections by as much as $40 million. Subcommittees may wish to discuss Medicaid expenditure projections and whether further GF surpluses may exist in the FY2010 budget.*

2. **Temporary Assistance for Needy Families (TANF): $5.1 million GF.** General funds are requested to replace lost federal receipts for the state's TANF program within the Children's Services Appropriation (Front Line Social Workers and Family Preservation allocations). The availability of TANF funding has diminished due to the effects of:

- elimination of TANF high performance bonuses (Alaska earned over $12 million in four years) and limiting the extension of supplemental grants to states with high population growth through FFY2009 (Alaska's annual high population grant is about $7 million);
- slower growth in the number of families on temporary assistance; and
- reductions in Alaska's annual TANF block grant as more Tribal TANF programs are established.

Under the welfare reform legislation of 1996 (the Personal Responsibility and Work Opportunity Reconciliation Act), TANF replaced the welfare program known as Aid to Families with Dependent Children (AFDC). The TANF block grant is designed and operated to accomplish:

- assisting needy families so that children can be cared for in their own homes;
- reducing the dependency of needy parents by promoting job preparation, work, and marriage;
- preventing out-of-wedlock pregnancies; and
- encouraging the formation and maintenance of two-parent families.

Alaska's temporary assistance program uses a "Work First" approach, which focuses on getting a job, then developing skills and work habits on the job in order to advance sufficiently to leave temporary assistance.

3. **Alaska Heating Assistance Program: $5.0 million GF.** The requested GF would be added to the base operating budget of the Energy Assistance Program allocation to maintain services beyond FY09. Last year's enacted budget included $10.0 million GF in one-time funding.

In FY09, the legislature appropriated $10.0 million GF and established a state heating assistance program that extended the federal Low-Income Home Energy Assistance Program (LIHEAP). LIHEAP program eligibility is capped at 150% of the federal poverty level and benefit amounts are based on a point system that considers household size and income, fuel costs and the type of housing. The state program provides home heating assistance to households with income levels between 150% and 225% of the federal poverty guidelines for Alaska. The Department estimates that as many as 8,800 households could qualify for the program in FY2010.

4. **Substance Abuse Programs: $4.5 million GF.** The increments requested provide funding in the Behavioral Health Grants allocation to various community based

grantees, the Palmer Mental Health Court participants, and the new Fairbanks Enhanced Detoxification Center. The funding would provide assessment and treatment of Alaskans with substance abuse and/or mental health illnesses. Increments include:

- $1.8 million GF for hard-to-serve adults with severe and persistent mental health illnesses, substance abuse problems, as well as repeated hospitalization, incarceration, and homelessness. Funding would provide treatment capacity for nursing care, 24 hour/day case manager support, daily medication administration, residential dual diagnosis, and transportation to services;
- $1.8 million GF for a 9% increase in statewide grant funding for substance abuse treatment services. The request would provide funding to agencies that are not able to bill Medicaid (due to Medicaid-related exclusions and non-eligible populations);
- $500.0 GF to cover the costs for Alaskans who don't have Medicaid or private insurance coverage. The funding fills the gap (for the new Fairbanks Enhanced Detoxification Center) between total operating costs and the amount of revenue that can be generated from Medicaid and other third-party billings;
- $419.2 GF for grant programs providing prevention and treatment services for substance abuse and mental health clients. The intent is to enhance community based models by recruiting and retaining a qualified workforce; and
- $75.0 GF to continue treatment capacity for Therapeutic Court Participants with co-occurring disorders (mental health and substance abuse), and providing assessment and treatment services (Palmer Mental Health Court program).

5. Children's Services Grantee and Rate Increases: $3.8 million GF. The GF increments include both grantee cost-of-operating increases and provider rate increases within the Family Preservation, Subsidized Adoptions and Guardianship, Residential Child Care, and Infant Learning Program allocations.

- $863.7 GF to address a 4.6% increase in grantee operating costs. According to the Department, without this increment, existing grant funds would need to be used to cover overhead costs, thereby reducing the services currently being provided to vulnerable Alaskans.
- $1.4 million GF for adoption subsidies to foster care base rate levels. Subsidized adoption rates are negotiated using the foster care base rate as the cap. According to the Department, most rates are negotiated at about 85% of the foster care base rate. In FY09 the foster care base rate increased by 28.9%, which affects subsidized adoption rates negotiated since FY06.
- $1.5 million GF increase for Early Intervention/Infant Learning Program (EI/ILP) provider rate increases. The intent of the funding is to adjust for inflation from 2003 for increases in therapy services, travel, fuel and personnel costs. The request is expected to recover up to 20 providers and one training coordinator. The EI/ILP program was not included in last year's provider rate increases.

In 2003, Congress reauthorized the Child Abuse and Prevention and Treatment Act (CAPTA). This required a referral for all children under the age of three with a substantiated report of abuse or neglect to the EI/ILP. Since 2003, EI/ILP has seen a 50% increase in referrals and a corresponding increase in children eligible for services. The federal reauthorization mandate did not include funding for the increase in referrals or services.

6. **Child Care Provider Rate Increases: $3.3 million GF.** This GF increase in the Child Care Benefits allocation is for adjusting the Child Care Provider Rates and grantee cost-of-operating increases for the Anchorage Bowl area. Increments include:

- $3.0 million GF to increase Child Care Rates to bring the state subsidy rates closer to the 75th percentile, as recommended by the federal government. The rates are currently at the 50th percentile, according to the Department's 2007 Child Care Market Rate Survey. The Department plans to conduct another Child Care Market Rate Survey in March of 2009. The information will be used in conjunction with the Department's comprehensive rate study to develop standardized methodologies for calculating child care rates and recommendations for the FY2010 rate increase.

  Legislative Fiscal Analyst Comment: *The requested increment, as stated by the Department, is an estimate of the cost to bring the rates closer to the 75th percentile. However, the next scheduled Child Care Market Rate Study is not expected to be completed until March of 2009. The subcommittees may wish to explore postponing the increment request until the March 2009 Child Care Market Rate Study is completed and a more accurate figured is calculated.*

- $305.4 GF to maintain service levels and avoid service reductions for grantees in the Anchorage Bowl area. Eligibility determinations for Child Care Assistance, Child Care Resource and Referral services, and Child Care Licensing in the Anchorage Bowl are provided through community grantees. The inflation adjustment is estimated to be 4.6% in FY2010.

7. **Youth Experiencing Serious Emotional Disturbances (SED): $2.2 million GF.** Increment requests within the Services for Severely Emotionally Disturbed Youth and Infant Learning Program allocations focus on reducing the need for more costly residential level services for youth experiencing serious emotional disturbances. General fund increments include the following:

- $1.1 million to expand grant funding to Community Behavioral Health Centers for enhancing outpatient services using innovative programs and training. The emphasis will be for youth from birth to age six with Fetal Alcohol Syndrome;
- $500.0 for continued care of youth experiencing SED who are not qualified under Medicaid or need non-Medicaid eligible services to stay at lower levels of care and avoid more costly Residential Psychiatric Treatment Centers (RPTC);
- $400.0 to assist in establishing treatment services for SED children in rural areas and to support tribal expansion in the delivery of this health service; and
- $200.0 to establish an early childhood mental health learning network, add a state coordinator, and provide grant funding for early childhood screening and intervention services at day care programs and Head Start programs to intervene early with youth at-risk of experiencing SED. The funding is part of the Bring-The-Kids Home Initiative in intervening early with youth at risk and avoiding placements in costly out-of-state RPTCs.

8. **Support for Child Advocacy Centers (CAC): $1.1 million GF.** This request for $1.1 million in general funds is to replace lost federal receipts to operate existing centers and support new centers in Homer and Glenallen.

A federal grant from the United States Department of Justice, Office of Juvenile Justice and Delinquency Prevention, provided funding to establish Alaska's Child Care Advocacy Centers over the last five years. At the end of FY09, this federal funding will be exhausted. According to the Department's latest data, reports of child sexual abuse and physical abuse increased 7% from FY07 to FY08.

During the five-year period, Alaska established Child Advocacy Centers in Anchorage, Wasilla, Juneau, Bethel, Nome, Fairbanks, and Dillingham. Child Advocacy Centers provide services for child sexual abuse victims and severe physical abuse victims, ages 0 through 18, and their non-offending parents. This includes a safe, child-friendly place to interview and receive forensic medical examinations and mental health services or referrals. Each victim is assigned a specialized family advocate who will remain with the child and family throughout the investigative process.

ORGANIZATIONAL CHANGES

Behavioral Health Appropriation:

- **Alaska Psychiatric Institute Advisory Board:** In July of 2008, the Governor established the Alaska Psychiatric Institute Advisory Board (Administrative Order Number 241). The advisory board will provide advice and recommendations to the Department's commissioner for meeting the needs of the state and the institute's patients and their families.
- **Alaska Mental Health & Alcohol & Drug Abuse Boards:** According to a Department press release, the above entity will move from the Boards and Commissions appropriation to the Behavioral Health appropriation to more closely align the constituent groups represented by the board or commission.

Health Care Services Appropriation:

- **Health Facilities Survey:** The new allocation's core service is to have certification and licensing surveyors inspect health care facilities in the state to determine whether they meet state and federal standards, and investigate complaints made against care providers. The purpose of the inspection is to determine a care provider's ability to offer services that are safe and meet acceptable standards. The Health Facility Survey program was previously housed in the Certification and Licensing allocation in FY09.

Public Health Appropriation:

- **Preparedness Program:** This newly created allocation's focus will be on the coordination and management of public health and emergency medical disaster preparedness activities such as planning, training, exercises and resource development. The program will provide expertise and funding for public health and emergency medical disaster preparedness to the Municipality of Anchorage, Alaska Native Tribal Health Consortium, all Alaska hospitals, nursing homes and primary care clinics.

Senior and Disabilities Services:

- **Governor's Council on Disabilities and Special Education and the Alaska Commission on Aging:** According to a Department press release, the above entities

will move from the Boards and Commissions appropriation to the Senior and Disabilities appropriation to more closely align the constituent groups represented by the board or commission.

CAPITAL REQUEST

The agency's $21.3 million capital budget includes the following:

- Phase 1 of 4 for renovating the Johnson Youth Center ($9.5 million GF). This phase includes renovation and expansion of the detention unit, new medical suite, and new admissions and police entry areas. Phases 2 through 4 would occur in FY12 – FY14 and are expected to cost an additional $8.1 million GF.
- The Johnson Youth Center is located in Juneau and is the State's fourth oldest facility. According to the Department's 2007 Assessment Study, threats to safety and security in this facility are a result of aging infrastructure, overcrowding, and an increase in behavioral health issues. The original structure is 50 years old and, according to the Department, needs safety and security issues addressed in order to expect positive results from the staff. Examples of deficiencies include antiquated door locking systems and design flaws that prevent adequate observation of the residents.

Section 10 of the Governor's capital budget appropriates $11.7 million in Information Technology Projects to the Governor's Office. Four of these projects are allocated to the Department of Health and Social Services for $2.2 million GF and $838.7 Federal Receipts as follows:

- Personal Information Protection Data Encryption, $736.3 GF/$81.8 Federal Receipts;
- Health Insurance Portability and Accountability Act Compliance, $668.7 GF/$668.7 Federal Receipts;
- Disaster Recovery, $368.2 GF/$40.9 Federal Receipts/$40.9 Federal Receipts; and
- Contract Management Automation System, $425.5 GF/$47.3 Federal Recipts.

Department of Labor and Workforce Development

The Department of Labor and Workforce Development (DOLWD) is responsible for providing safe and legal working conditions and advancing employment opportunities. It has also been charged with developing a statewide training program for an Alaskan workforce capable of managing, constructing, operating, and maintaining a gasline. To accomplish these goals the Department provides the following core services:

- Employment Assistance;
- Training and Education;
- Workforce and Economic Development;
- Injured Worker and Unemployment Compensation;
- Statutory and Regulatory Assistance and Enforcement; and
- Assistance to people with disabilities to obtain and maintain employment.

SIGNIFICANT ISSUES

The FY2010 Department of Labor and Workforce Development's general fund operating budget submitted by the Governor is $1,178.2 more than the FY09 Revised Management Plan (which excludes fuel/utility and gasline one-time funding of $963.6). The Governor's net GF change from Adjusted Base is an increase of $5,008.4 million, which is comprised of salary fund source changes and the increments described in the numbered paragraphs below. The Department's request for FY2010 does not indicate any significant policy changes. The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. **Construction Academy Training: $3,500.0 GF.** The Alaska Construction Academy received funding in the capital budget in FY07 and FY08, and in FY09 funding was moved to the operating budget. This request seeks to continue the appropriation that was received in FY09 as a one-time item. The Department states that an aging workforce and lack of available training opportunities for young Alaskans leave the construction, mining, transportation and energy industries with a significant shortage of skilled workers. The Department believes the shortage can be remedied in part through continuation of this program. The training takes place in existing facilities throughout the state.

2. **Workforce Development Business Services: $585.0 GF: $575.1 STEP Funds, & $128.5 Votech Ed Funds.** A requested GF one-time increment of $585.0 reestablishes one-time funds received in FY09 as part of the Department's Gasline Training Program. The increment is intended to provide:

   - Training to at least 70 apprentices at Regional Training Centers for gasline related occupations ($180.1);
   - Funding for cooperative training agreements with business and industry for registered apprentices and on-the-job training for approximately 125 workers ($321.7); and
   - Funding for Division of Business Partnerships staff assigned to assist in development of this project ($83.2).

The Business Services Unit is also requesting base increments of State Training & Employment Program (STEP) ($575.1) funds for training and Technical Vocational Education Program Receipts (TVEP) ($128.5) funds for administrative functions.

3. **SW AK Vocational Education Center Ops Grant: $195.0 GF.** The proposed Governor's budget seeks to reestablish one-time funds of $195.0 GF, received in FY09, by Southwest Alaska Vocational and Education Center (SAVEC). The Department says these funds represent approximately one-quarter of the current SAVEC annual operating budget and that a loss of the funds would present SAVEC with significant challenges to continued operations and services. As submitted, the increment would be added to base budgets in future years.

4. **Labor Market Information, Gasline Training Program Guide: $145.0 GF.** The Department requests continuation of a one-time FY09 appropriation for development of a web and print-based Alaska Training Program guide and for development and dissemination of regional employment data products. The guide is intended to identify training programs including Regional Training Centers, State Training Centers, University of Alaska, Registered Apprenticeships, the Pipeliner Training facility and associated career opportunities. The subcommittee may wish to inquire why the guide is not yet completed and to determine how much more time and money are needed to complete and maintain the Program Guide.

5. **Workforce Investment Board – AGIA Training Program: $130.0 GF.** The Department seeks to continue a FY09 one-time appropriation as part of the Department's Gasline Training Program. These funds will support an existing Education Specialist II position and associated costs. The Education Specialist will serve as the education skills coordinator for the Department of Labor and Workforce Development, to implement vocational education strategies contained in the Department's Gasline Training Strategic Plan. The Department requests that the increment be added to base budgets in future years.

6. **Client Services, Voc Rehab Lease Cost Increase: $130.0 GF.** The University of Alaska chose not to renew the lease for the space occupied by the Vocational Rehabilitation Office on University Lake Drive in Anchorage. That lease expires February 28, 2009. An agreement for new space was reached with the Municipality of Anchorage. However, the new space will cost $387,000 per year as compared to $257,000 for the space being vacated. Without this additional $130.0 GF funding, the Department states it may need to layoff a counselor, serving approximately 115 individuals, to pay the additional lease amount.

7. **Workers' Compensation Fund Change, ($10.2) GF, Occupational Safety and Health, Mech. Inspection Program Fund Change: $294.5 Workers' Safety Account (WSA).** The Department is proposing a change to the funding source for a portion of the elevator, boiler/pressure vessel, electrical and plumbing inspections. This change is dependent on approval of a requested $294.5 increase to WSA funding in the OSH component. Inspections are currently fee-supported, but revenue is not sufficient to cover all program and training costs. Nearly all mechanical inspections provide a significant degree of workplace safety. Consequently, the Department proposes to fund a portion of all inspection costs from the Workers' Safety Account instead of from the Building Safety Account. The statutory authority for WSA funding is maintained by the Occupational Safety and Health (OSH) component.

Through a reimbursable services agreement, OSH will contract with Mechanical Inspection to provide these inspections in places of employment.

ORGANIZATIONAL CHANGES

The Construction Academy Training was a separate appropriation in FY09. The FY2010 proposed structure makes it an allocation under the Workforce Development appropriation. Subcommittees may wish to consider retaining this program as a separate appropriation.

CAPITAL REQUEST

The Department of Labor and Workforce Development's capital budget totals $39.2 million, of which $36.1 is GF. These projects are:

- **AVTEC Dormitory Replacement: $20 million Alaska Housing Capital Corporation (AHCC) funds**. The Department requests these funds for replacement of an existing 120-bed facility that has several Americans with Disabilities Act (ADA) code and life-and-safety-deficiencies. The new facility will be fully accessible and reflect the current style dorm preferred by prospective students and will have handicap access.

  Legislative Fiscal Analyst Comment: *The AHCC fund source is classified as GF in Legislative Finance Division's view of the budget. The Governor classifies these receipts as "Other" Funds, leading to a discrepancy in how the capital project is classified.*

- **AVTEC Heavy Equipment Shop and Pipe Welding Program: $12.0 million AHCC funds.** The Department seeks funding to add a 16,000 square foot steel fabricated building to AVTEC's Applied Tech campus to house the Heavy Equipment and Diesel programs. The Heavy Equipment program relocation will facilitate the demolition of the existing building which has Americans with Disabilities Act (ADA) code and life-and-safety deficiencies.

- **Fairbanks Pipeline Training Center: $2.3 million AHCC funds.** The Department requests equipment funding for the Fairbanks Pipeline Training Center. With this additional equipment, the center will have the capacity to train up to 200 students per year initially, increasing to 400 per year during the peak construction phase of the natural gas pipeline.

- **AVTEC Deferred Maintenance and Expansion: $1.5 million GF**. This funding is requested for deferred maintenance in order to obtain materials and equipment for ongoing work performed by AVTEC's maintenance staff, or contractors, especially in the Industrial Electric training facility. Ability to take care of deferred maintenance allows AVTEC to provide safe environments for AVTEC students receiving training for future employment in Alaska.

- **Social Security and Employment Data Interface: $275.4 GF.** Funds are requested for the Division of Vocational Rehabilitation to create an electronic interface between the Division's management information system, the Social Security Administration's (SSA) beneficiary database housed in the Department of Health and Social Services and the unemployment insurance database in the Department of Labor and Workforce Development. The interface is needed to process state reimbursement

claims under SSA's Ticket to Work program and to help clients become more economically self-sufficient.

- **WC Computer Application/Platform Upgrade: $3.1 million Workers Safety funds**. The Workers' Compensation system, at the direction of the Department of Administration, needs to be upgraded to the ".Net" programming application because the old platform "VB6" will no longer be supported by Microsoft. The upgrade appears essential to the program's continued efficient functioning.

Department of Law

The mission of the Department of Law is to provide legal services to state government and to prosecute crime. The Department represents the state in:

- prosecuting violators of state criminal laws;
- representing the state in legal actions;
- providing legal services in the resolution of tax and royalty disputes;
- providing consumer protection;
- providing legal services for extraordinary proceedings such as oil and gas litigation; and
- advising state agencies in areas of legal concern, including promulgating regulations and drafting legislation.

The Criminal Division protects the public by prosecuting all violations of state criminal law committed by adults and juveniles, and by placing them under appropriate controls. The Civil Division serves the interest of Alaska's citizens by providing legal counsel to the executive branch in all civil actions. The Administrative Services Division provides the core administrative services that are essential to the day-to-day operation of the Department and to managing the resources of the Department.

SIGNIFICANT ISSUES

The FY2010 Department of Law GF operating budget as submitted by the Governor is $135.0 above the FY09 Revised Management Plan (which excludes fuel/utility & gasline one-time funding of $3.5 million). The Governor's net GF change from Adjusted Base is $7,153.2, which is comprised primarily of increments in the Oil, Gas and Mining appropriation.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. Oil, Gas and Mining: $6,359.2 GF. The Department is requesting funds in order to continue to play a role in the Governor's top priority project (the construction of a gas pipeline and bringing natural gas to market). Additionally, the Department has a number of other major projects underway that will continue to require outside counsel and experts beyond the funding included in the Department's base budget.

- **$5,109.2 GF** added to the base budget for ongoing oil and non-gas pipeline matters including Pt. Thomson Litigation, proceedings before the Federal Energy Regulatory Commission, TransAlaska Pipeline Service tariff issues, and two major corporate income tax matters.
- **$1,250.0 GF** one-time increment to assist the Department in the preparation of legislation and implementation of a comprehensive plan to commercialize North Slope gas.

  In FY09, the Department received $3.0 million dollars for "Gas Pipeline and Other Oil & Gas Projects" as one-time funding as well as $3.5 million dollars through an Oil and Gas Development transfer from the Governor's Office. Subcommittees may wish to ask the following questions of the Department:

  - How were the one-time increments (totaling $6.5 million) in FY09 broken out between gasline and non-gasline work?

- When does the agency anticipate resolution to the litigation issues mentioned in this request (i.e. Pt. Thomson)? Should the $5.1 million be added to the base budget?

2. **Lease Costs: $590.7 GF.** Additional funding is requested to cover increased lease costs, the largest factors of which are the Whale and Brady buildings in Anchorage. Lease expenses are expected to rise 34% between FY08 and FY2010, primarily due to higher rates per square foot.

   - **$351.2 GF:** Third Judicial District: Anchorage
   - **$239.5 GF:** Deputy Attorney General's Office

3. **Statehood Defense: $187.0 GF.** In FY08 the Department of Law reduced its general fund budget for Statehood Defense by $167.0. The reduction had no operational impact because an FY04 reappropriation of $350.0 (lapsing balance from the legislature) was available for statehood defense. The reappropriation was a multi-year appropriation with a lapse date of FY09, and none of the available funding was spent through FY07. The Department is seeking general funds in the FY2010 budget to cover the costs of an attorney assigned to statehood defense issues. The increment would be included in the base budget in future years. The subcommittee may wish to ask for an explanation of statehood defense issues, with focus on whether this increment should be added to the base budget or be identified as an increment tied to a specific project with an end date in sight.

ORGANIZATIONAL CHANGES

There are no significant changes requested.

CAPITAL REQUEST

The Department of Law has no capital projects for FY2010.

Department of Military and Veterans Affairs

The mission of the Department of Military and Veterans Affairs (DMVA) is to provide military forces to accomplish military missions in the state or around the world; provide homeland security and defense; emergency response; veterans' services; and youth military training and education. The Department accomplishes this mission by providing core services for the following:

- Alaska National Guard Joint Forces Headquarters;
- National Guard Support;
- Homeland Security and Emergency Services Management & Coordination;
- Alaska Statewide Emergency Communications (IT);
- Veterans' Services;
- Alaska Military Youth Academy;
- Administrative Services Support; and
- Special Operations.

SIGNIFICANT ISSUES

The FY2010 Department of Military and Veterans Affairs GF operating budget as submitted by the Governor is $51.5 below the FY09 Revised Management Plan (which excludes fuel/utility & gasline one-time funding of $960.1). The Governor's net GF change from Adjusted Base is $180.0.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. National Guard Retirement Normal Cost Administrative Fees: $130.0 GF. As with other state retirement plans, employer contributions to the Alaska National Guard and Naval Militia Retirement System (NGNMRS) are identified as "normal" costs (the cost of future benefits for current employees) and "unfunded liability" (the cost associated with bringing the fund balance to the actuarially recommended level). DMVA pays the normal costs of the system while the state makes direct contributions to the retirement fund to pay down the unfunded liability.

For FY2010, the Alaska Retirement Management (ARM) Board recommends the same amount of contributions made in FY09, with the addition of a $130.0 GF "expense load" that is equal to a two-year average of the administrative costs incurred by the Department of Administration. In the past, normal contributions did not include administrative costs.

Legislative Fiscal Analyst Comment: *During the last session, the legislature appropriated $10 million to pay off the unfunded liability of the NGNMRS. Although this payment permits the state to eliminate direct payments to the retirement fund, the ARM Board recommends that the state make the same direct contribution ($1,722.5) that was made in FY09. While the recommendation may fail to account for the $10 million contribution, the legislature may wish to make the recommended contribution in order to offset investment losses!*

2. **Expand Outreach to Veterans: $50.0 GF.** These funds will be used to expand the information delivery system on issues pertaining to veterans' benefits and eligibility criteria in order to ensure that Alaskan veterans are receiving benefits to which they are entitled.

3. **Alaska Military Youth Academy formula: $185.2 I/A Receipts.** The Alaska Military Youth Academy (AMYA) ChalleNGe program is a military school program for at-risk youth. The program is funded by a formula set in statute (AS 14.30.740), with general funds appropriated to the Department of Education and Early Development (DEED) and transferred to AMYA.

   The formula was originally designed to produce a specific dollar amount at a specific point in time. It provides seven times the base student allocation (BSA set forth by the Department of Education and Early Development) for each AMYA ChalleNGe program residential student.

   In FY2010, the BSA increased $100 dollars per student (to $5,580) which brings the Department's FY2010 request to $6.4 million ($185.2 more than the amount appropriated in FY09).

   Legislative Fiscal Analyst Comment: *Subcommittees may wish to discuss plans for future enrollment and estimates of operating costs at various student counts. The legislature may wish to consider a direct appropriation to DMVA, as DEED has no legal responsibility for the AMYA and, therefore, should not act as a pass-through agency.*

4. **Army Guard Facilities Maintenance: $500.0 Federal Receipts.** The Department is requesting additional federal authorization for ongoing operating maintenance costs such as snow removal, utilities, general day-to-day maintenance, etc. The federal fund increase reflects the anticipated amount of receipts for army guard facilities eligible for 100% funding from the National Guard Bureau. The Department does not have adequate operating federal authorization to utilize these available funds to meet costs.

ORGANIZATIONAL CHANGES

There are no significant changes requested.

CAPITAL REQUEST

A few of the larger projects included in the Governor's $13.4 million capital request for the Department of Military and Veterans Affairs are:

- **State Homeland Security Grant Program: $9.5 million Federal Receipts.** The 100% federally funded State Homeland Security grant program is annually awarded by the U.S. Department of Homeland Security. Programs include homeland security planning, equipment, training, and exercises to support local first responders, private sector critical infrastructure and state preparedness. This funding has been requested to assist in life-safety citizen preparedness.
- **Army Guard Facilities Project: $2.5 million ($1.75 million Federal Receipts/$750.0 GF Match).** With 237 Alaska Army National Guard buildings at 96 various locations with an average age of approximately 30 years, deferred

maintenance, renewal and replacement are a high priority. Alaska National Guard preventative maintenance is performed on a schedule, yet building components have a limited life requiring eventual renewal and replacement.

- **Military Youth Academy Deferred Maintenance: $1.0 million GF.** The Alaska Military Youth Academy (AMYA) operates at Camp Carroll on Fort Richardson. The campus currently has 23 buildings totaling 61,805 sq ft. with an average building age of 35+ years. Inadequacies include basic life-safety issues, outdated and inefficient heating/ventilation systems, restrooms, showers, and laundry facilities. This request will fund the modification of the Academy's ChalleNGe facilities to improve safety and living conditions (in compliance with ADA regulations), as well as improve technical training and educational training platforms.

Department of Natural Resources

The Department of Natural Resources (DNR) develops, conserves, and maximizes the use of Alaska's natural resources on state-owned land consistent with public interest by providing the following core services:

- provide opportunities to utilize state land and water resources;
- acquire and provide hydrologic, geologic, geographic, historical site, and other land record and natural resource information;
- acquire land;
- make land available for sale to the public, and transfer land to municipalities;
- preserve and enhance the value of state land and water resources and Alaska's coastal areas;
- mitigate potential disasters and hazards; and
- comply with federal regulations and programs related to natural resources.

SIGNIFICANT ISSUES

The FY2010 Department of Natural Resources general fund operating budget submitted by the Governor is $8,366.8 million *less* than the FY09 Revised Management Plan (which excludes fuel/utility and gasline one-time funding of $1,904.4). The Governor's net GF change from Adjusted Base is an increase of $4,273.9 million, which is comprised primarily of salary fund source changes and the increments described in the numbered paragraphs below. The Department's request for FY2010 does not indicate any significant policy changes.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. Oil & Gasline Initiatives: $2.4 million GF. The Division of Oil and Gas Development is seeking to stabilize its base funding for Oil and Gas Development and to enhance its capacity to collect royalty revenues for the state. It is requesting the addition of previous one-time items, which have been renewed, to its base budget. Some of these items are as follows:

- **Workload Base Adjustment: $1.3 million GF.** The Division of Oil and Gas is requesting that this funding, which has been one-time funding each year for five years, be added to the base operating budget. This annual funding has been utilized since FY05 to address workload issues in the Division of Oil and Gas. This money is not related to any specific project and is not related to gasline coordination.
- **Royalty Valuation Litigation: $500.0 GF.** This request is to pay the costs of outside legal counsel and consultants to develop and defend the state's position in royalty disputes and to represent the state in the reopening of royalty arbitration proceedings. (This funding was requested as a capital project in FY09 but was approved as an operating appropriation.) The Department seeks to add this amount to its base budget.
- **Contract Royalty Auditors: $200.0 GF.** The Department is requesting a base increment to cover the ongoing cost of outside auditors to reduce or eliminate the

backlog of royalty and net profit share lease audits. The increment would be added to the base budget in future years. The increment continues a one-time increment of $200.0 GF appropriated in FY09 with the understanding that use of contract auditors solved an anticipated problem with filling auditor positions in the agency. Subcommittees may wish to inquire about the continued use of contract auditors.

- **Gas Pipeline Coordination: $391.0 GF.** This request is made to provide ongoing funding for gasline coordination in DNR's budget. This funding was included in the FY09 operating budget as a one-time distribution from the Governor's Office. DNR is now requesting this funding as part of the base budget. Subcommittees may wish to consider continuing to segregate gasline startup costs from the base budget.

2. North Latitude Plant Material Center (PMC) – AK State Seed Lab: $725.0 GF. In FY09, the PMC received one-time funding to maintain the state's foundation seed program after a loss of federal funds, and to provide certified and pathogen-free seed potatoes to local farmers. The foundation seed program ensures the availability of healthy native seed stock in Alaska, which growers use to supply seeds to construction companies, state and federal agencies, the mining industry, and others tasked with reseeding/revegetation projects. The PMC is the only source of native plant seed stocks.

3. Geological Development – Mineral Survey and Volcano Observatory, $600.0 GF as follows:

- **Alaska Geophysical and Geological Mineral Inventory Fund Source Change: $350.0 GF.** The Department requests a fund source change of $350.0 for its geological survey program. The FY09 operating budget included $450.0 from GF and $350.0 authorization from industry (SDPR) for surveys. Collection of funding from industry was only marginally successful, despite the Department's claim that an increased interest in precious metals has increased the demand for survey data. The Department states that in order to contract for surveys, including airborne mapping, it is necessary to replace the $350.0 SDPR authorization with general funds. The general funds would remain in the base budget in future years.

- **Alaska Volcano Observatory Fund Source Change: $250.0 GF.** The Department requests a fund source change (to replace the expected federal funding decrease in FY2010) to allow functions of the observatory to continue at current levels. The observatory monitors volcanic activity and ash clouds potentially affecting aeronautic conditions for aircraft traffic and local communities along the Aleutian and Cook Inlet volcanic chain and sends alerts as necessary. The general funds would remain in the base budget in future years.

4. Title Acquisition and Defense – Statehood Entitlement Transfers: $300.0 GF. The Department requests funding for the final stages of the Bureau of Land Management (BLM) 2009 Conveyance Project. The state will receive approximately eleven million acres still owed to the state under the Statehood Act. The project will also result in the transfer of over eight million acres of federal land to Alaska Native Corporations formed under Alaska Native Claims Settlement Act (ANCSA). Special attention must be given to these conveyances to protect state ownership interests and public access and ensure that the state receives clear title. The federal government provided money in FY06 for implementation of the transfers, and positions were created, but federal funds were reduced and are no longer available to address public access and

state ownership interests (such as navigable waters). Subcommittees may wish to discuss the status of the land transfers, with a focus on whether the appropriation should be part of the base budget in future years or be identified as project funding with an end in sight.

5. **Fire Suppression Preparedness – Interagency Cost Increases: $90.0 GF.** The Alaska Interagency Coordination Center (AICC), located on Ft. Wainwright, serves as the focal point for initial attack resource coordination, logistics support, and predictive services for all state and federal agencies involved in wildland fire management and suppression in Alaska. Cooperators include the Bureau of Land Management, DNR, USDA Forest Service, National Park Service, Bureau of Indian Affairs, and the Fish and Wildlife Service. This funding will cover DNR's share of cost increases of the AICC, including lightning detection and weather station costs.

6. **Resource Development – Guide Service Initiative: $50.0 GF.** At the request of the guiding industry, the Department is seeking funds to develop a big game guide program that would establish a prospectus review procedure to allocate leased guide areas to specific guides for big game guide services on state land. The money is intended to cover the cost of drafting related regulations and statutes. Subcommittees may wish to consider identifying the funding as a one-time item.

ORGANIZATIONAL CHANGES

The Office of Habitat Management and Permitting (OHMP) of the Alaska Department of Natural Resources became the Division of Habitat, a part of the Alaska Department of Fish and Game (ADF&G), effective July 1, 2008, as a result of Executive Order 114.

CAPITAL REQUEST

DNR has requested a total capital budget of $97.7 million, of which $68.8 is Federal Funds. The budget consists of a diverse mix of capital projects from snowmobile trail development to parks maintenance, coastal management, fire suppression, bear viewing, technology upgrades, boating access, and trails, among others. Through the Governor's Office, DNR has also requested a $1.2 million GF Document Management System. A few of the larger DNR capital projects are:

- **Coastal Impact Assistance Funds: $58 million federal receipts**. The Division of Coastal and Ocean Management is the lead state agency to administer the approximately $29 million annually in Coastal Impact Assistance Program (CIAP) funding disbursed under the Energy Policy Act of 2005 (R.R. 6). As required by law, 35% of these funds will be paid to the coastal districts of the state, and the remaining 65% will be allocated as identified in the approved program. The $58 million reflected in the FY2010 amount includes the amount allocated but not yet received in FY09, as well as the FY2010 amount.

- **Gas Pipeline Implementation: $3.2 million GF**. Implementing the Alaska Gasline Inducement Act (AGIA) will involve contracting with numerous experts and specialists to advise the state on such issues as pipeline engineering, pipeline commercial terms, including analysis of and advice on tariffs, tariff terms, pipeline access, and terms for addressing cost overruns, royalty valuation methodology, enforcement, and remedies. Success of the initial and subsequent open seasons will

depend on the Department's ability to retain these services. This project may be more appropriately placed in the operating budget.

- **Reservoir Studies to Evaluate Oil and Gas Resources on the N. Slope, Phase 2 of 2: $6 million GF.** The primary purpose of this phase of reservoir studies is to determine the best way to maximize remaining Prudhoe oil recovery while optimizing gas for a North Slope gas pipeline. Qualified consultants will be hired through the Request for Proposals (RFP) process to work on the project. Results will enable the state to make informed technical decisions with regards to the impact of gas production on the recovery of remaining Prudhoe Bay oil reserves. This project may be more appropriately placed in the operating budget.

Department of Public Safety

The mission of the Department of Public Safety (DPS) is to ensure public safety and enforce fish and wildlife laws. The Department's core services include the following items:

- perform criminal and traffic law enforcement and investigations;
- manage and perform search and rescue operations for lost and missing persons;
- provide wildlife law enforcement and investigations;
- provide support to rural law enforcement entities;
- provide security to the Alaska Court System, transport inmates to and from court and between correctional institutions, and perform extradition of wanted persons to and from the state;
- provide criminal laboratory and forensic services, administer the statewide breath alcohol program, maintain Alaska's DNA identification system, and provide expert testimony in court proceedings;
- maintain accurate and complete Alaska criminal records and information for use by law enforcement agencies in Alaska and elsewhere;
- manage building and fire codes (development, adoption, interpretation, and review), conduct building plan reviews of commercial buildings and 4-plex and larger housing units, conduct fire and life safety inspections of priority facilities; and
- enforce alcoholic beverage laws.

SIGNIFICANT ISSUES

The FY2010 Department of Public Safety general fund operating budget as submitted by the Governor is $4,121.6 above the FY09 Revised Management Plan (which excludes fuel/utility & gasline one-time funding of $803.3). The Governor's net GF increase from Adjusted Base is $4,250.3.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. Drug Enforcement and Rural Alcohol Interdiction: $2,789.7 GF.

According to the Department, alcohol and drug enforcement remains a significant challenge, particularly with tenuous federal funding. The Department requests continued one-time funding, which could be restored based upon the amount of federal money received by DPS.

- **$1,393.2 GF (Language):** Narcotics Task Force
- **$1,270.0 GF (Language):** Rural Alcohol Interdiction Program (includes $400.0 for prosecution efforts by the Department of Law).

Legislative Fiscal Analyst Comment: *The legislature has included "reduce general funds if federal funds are forthcoming" language for the Narcotics Task Force Program since FY07. Similar language was added for the Rural Alcohol Interdiction Program in FY09. Because the language may imply that federal funds are anticipated, there may be an expectation that these increments will have no GF*

impact. The majority of federal funds have not materialized ($271,840 in FY08 and $715,479 in FY09 were returned to the general fund as a result of these language sections) and the subcommittees may wish to consider placing both funding items into the base budget (numbers section of the operating bill) with intent language stating that the general funds are not to be used if federal funding is received.

- **$126.5 GF: Alaska State Troopers Special Projects** requests funding to replace a federal grant for reducing illegal drug and alcohol use. The grant is no longer available. A portion of this increment will be used to fund cold case homicide investigations.

2. Departmental Overhead and Service Costs: $1,276.4 GF. The Department is requesting increments to pay increased overhead and service costs throughout the agency. Overhead costs include utilities, leases, housing, and medical and laboratory services and supplies. Increments have been requested as follows:

- **Rural Trooper Housing: $427.3 GF.** The Department requests funding to cover the increased cost of housing Alaska State Troopers (AST) located in rural posts. This increment request is for higher lease and utility costs and will assist in the leasing of eight replacement trooper units in Galena and Aniak. The Public Safety Employees Association (PSEA) bargaining unit contract states that troopers are required to pay a portion of their salary for rent with the remaining costs to be borne by the state.
- **Rising Lease Costs: $318.4 GF.** The Department is requesting an increment of $230.3 to cover rising office lease expenses for the AST Detachment component in the following communities: Aniak, Galena, King Salmon, Cooper Landing, Seward, and Wasilla.

  Additionally, $88.1 GF is requested for office and aircraft hangar lease increases in the Wildlife Troopers allocation.
- **Statewide Dispatch Services: $208.3 GF.** The Department is requesting funds for increased costs of contracts with local police departments to provide dispatch services in Wasilla and Kodiak partially funded in a similar increment request in FY09.
- **Ammunition and Uniforms: $31.4 GF.** Additional base funding is requested for the Alaska State Troopers ($25.5) and Wildlife Troopers ($5.9)
- **Medical Exams: $164.0 GF**. Additional funding in the AST Detachment allocation is also requested to offset the rising expense of medical forensic exams of victims of sexual assault and sexual abuse of a minor. Actual costs for these mandated services (AS 18.68.040) have exceeded authorization by roughly $164.0 per year since FY08.
- **Laboratory Services: $127.0 GF.** Overhead expenses for the Scientific Crime Detection Laboratory have increased significantly since FY07. Included in this increment are:
  - **$40.0** for the purchase of enough DNA reagent kits to process 400 additional violent crime and property crime cases and 6,000 Combined DNA Index System (CODIS) cases per year
  - **$40.0** to cover freight and courier service costs to return evidence to the submitting agency to be available for trial and to free up limited laboratory storage space.

3. **Prisoner Transportation: $88.0 GF.** In FY09, the legislature approved a $656.3 GF increment for six new Court Service Officer positions (attributable to a court settlement between DPS and the Municipality of Anchorage that transferred responsibility for prisoner transportation to the Department). A Legislative Finance error in recording conference committee action omitted the funding from the FY09 operating budget (a supplemental request should be expected). The amount was added to the FY2010 adjusted base. The Department requests an additional $88.0 for increased transportation costs.

4. **Corrected FY09 PSEA Salary Adjustments: $50.5 GF.** The Public Safety Employees Association (PSEA) contract negotiations for FY09 occurred late in the 2008 session and a portion of the monetary terms for uniform allowances was omitted from the budget request. This amount has been added to the FY2010 base budget; however, the Department could request supplemental funding for FY09 costs.

5. **Council on Domestic Violence and Sexual Assault (CDVSA): $1,677.9 PFD Criminal.** In FY09, the legislature replaced $1,341.5 GF with PFD Criminal Funds (PFD appropriations in lieu of dividends to incarcerated felons). As permanent fund dividends increase, more PFD Criminal funds are available for program costs.

__Legislative Fiscal Analyst Comment:__ The amount of PFD Criminal funds available varies with the amount of the Permanent Fund dividend and the number of felons incarcerated. Recent investment losses are likely to reduce PFDs in the future, with a corresponding decrease in PFD Criminal funds available. The likely result is future requests to replace PFD Criminal funds with general funds.

6. **Department Carryforward: $3,660.2 Federal Receipts.** Beginning in FY08, the department received a $5,000.0 federal multi-year appropriation for domestic violence and sexual assault prevention programs which lapses on June 30, 2010. This amount represents the unspent balance of that appropriation as of July 1, 2008.

7. **State Oversight of Hazardous Pipeline Facilities: $142.0 I/A Receipts.** Funding is requested to staff the new Office of Oil and Gas Systems Facilities within the Department via interagency receipts from the Department of Natural Resources (DNR). This office will provide one-stop servicing for fire inspection, plan review, fire investigation, fire detection and suppression system maintenance, and review of emergency response plans and fire response training for the whole oil and gas industry, statewide, to include onshore and offshore facilities. The new office will be located with the Joint Pipeline Office within DNR and will act as liaison supporting governmental oversight agencies for Trans-Alaska Pipeline System (TAPS) and all hazardous pipeline facilities located throughout the state.

ORGANIZATIONAL CHANGES

There are no significant changes requested.

CAPITAL REQUEST

Some of the larger projects in the Governor's $13.1 million capital budget for the Department of Public Safety are:

- Anchorage Aircraft Hangar Replacement – Phase II: $2.5 million ($2.43 million AHFC Receipts and $.07 million GF)
- Marine Fisheries Patrol Improvements: $2.5 million Federal
- Alaska Public Safety Information Network (APSIN) Redesign: $2.0 million GF
- Statewide Facilities Maintenance, Repairs, and Improvements: $1.5 million GF
- Aircraft and Vessel Repair and Maintenance: $1.5 million GF

Department of Revenue

The Department of Revenue's responsibilities include:

- administration and enforcement of Alaska's tax laws;
- management of the treasury;
- administration of the Permanent Fund Dividend Program;
- collection and distribution of child support; and
- administrative support to the following independent boards and corporations:
  - Alaska Permanent Fund Corporation;
  - Alaska Housing Finance Corporation;
  - Alaska Municipal Bond Bank Authority;
  - Alaska Natural Gas Development Authority;
  - Alaska Retirement Management Board; and
  - the Alaska Mental Health Trust Authority.

SIGNIFICANT ISSUES

The Governor's FY2010 general fund operating budget for the Department of Revenue (DOR) is $3,356.6 above the FY09 Revised Management Plan (excludes fuel/ utility & gasline one-time funding of $1,221.0). The net GF change from Adjusted Base is $4,122.3.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. Child Support Services Division Match: Fund Change $1,900.0 GF Match/($1,900.0) Receipt Supported Services (RSS). Continued decline in receipts received by the division, as a result of the decline in Temporary Assistance for Needy Families (TANF) cases, is expected to result in a shortfall of state matching funds. General funds are requested to supplement the shortfall.

Legislative Fiscal Analyst Comment: *TANF cases continue to decline for a variety of reasons (see H&SS analysis). The Child Support Services Division (CSSD) retains child support when a family is on TANF and splits the funding with the federal government (the state retains 47% as RSS). The retained funding is then utilized by the agency and counted toward the 34% state match. During the last two years, CSSD has been authorized to carry forward prior year receipts, thereby reducing the need for an alternate matching fund source. That funding source has been exhausted.*

2. Natural Gas Pipeline Development: $771.0 GF. For FY09, DOR received $1,221.0 for gas line development. This was the amount identified in the fiscal note to HB 177 or the Alaska Gasline Inducement Act (AGIA). The agency continues to follow that fiscal note and is requesting the $771.0 itemized for FY2010.

Legislative Fiscal Analyst Comment: *Considering that the fiscal note was written almost two years ago, it seems unlikely that the agency's expenditure plan remains*

exactly as written. Subcommittees may wish to ask the Department for further information regarding this request.

3. **Treasury Revised Cost Allocation Plan: Net Increase $572.0 GF/($420.0) Other.** Many agencies utilize federal program revenue for state retirement contributions. The Treasury Division invests these funds and has recently received federal approval of a new cost allocation plan. The plan requires a reallocation of funding sources to be in compliance. According to the Department, the plan will be used to develop budgets and agreements for charging users of Treasury services, and for allocating costs equitably among each fund/trust/client agency. The method is devised to address all costs and all users in a consistent, easily-administered manner, utilizing actual, quantifiable statistics.

Legislative Fiscal Analyst Comment: *The FY2010 cost allocation plan is based on fund net asset value at year end FY08. The plan is effective retroactive to July 1, 2008, making it effective for all of FY09. Adjustments in the supplemental process should be expected.*

4. **Contract Audit Assistance: $540.0 GF.** Last session, Revenue requested just over $1 million for contractual audit assistance during the recruitment of four Audit Master positions. A one-time increment of $540.0 was intended to fund two contract auditors and associated overhead. The Department did not remove this one-time item from the base budget for FY2010. Legislative Finance removed the amount from the base and added an increment in order to match the Governor's request. Contract audit assistance was identified in the fiscal note to AGIA (the oil production tax legislation) as a four-year need at over $1 million per year. The purpose is to supplement auditor functions during recruitment and provide training to less experienced staff. Subcommittees may want to examine the continued use of contract auditing.

5. **Fourth Audit Master: $200.0 GF.** Funding was requested last session for four Audit Master positions created during revision of the oil production tax. Funding for three of the positions ($600.0) was approved in anticipation of a recruitment lag. Funding for the final position is requested for FY2010.

6. **Federal "Moving to Work" Program Adjustments: $1,634.0 Federal Receipts/($674.3) Other.** The Alaska Housing Finance Corporation (AHFC) has recently become a Federal Housing and Urban Development (HUD) "Moving to Work (MTW)" eligible agency. This does not entitle AHFC to receive any additional federal funding per se, but it does allow considerable flexibility regarding how funding is programmed and accounted for. $674.3 of AHFC Receipts are being reclassified as federal receipts (per a rule change in FY08, these were changed from Federal Receipts to AHFC Receipts) while significant other federal funding is essentially being reprogrammed and brought on budget.

7. **Constitutional Budget Reserve (CBR) Fees: $1,673.0 CBR Funds.** As a result of high oil prices, the CBR has grown substantially. As a consequence of higher balances, additional funding for management fees are required (fees are typically a percentage of asset value). For FY09, $4.3 million was budgeted for fees. This amount exceeded the FY09 requirements and expenditure authority is expected to lapse. The amount requested for FY2010 reflects anticipated needs.

8. **Independent Actuary Audit: $300.0 Other Funds.** A one-time increment for an independent audit of the state's actuary was included in the FY09 budget. Per AS 37.10.220(10), an audit is to be performed not less than once every four years. The Department did not remove this one-time item from the base budget for FY2010. Legislative Finance removed the amount from the base, then added an increment in order to match the Governor's request. Subcommittees may wish to delete this increment.

9. **Mental Health Trust Zero-based Budgeting: $2,650.0 Other Funds.** The Alaska Mental Health Trust Authority has implemented zero-based budgeting for all of their programs. The goal of the Trust is to be able to identify how Trust funding is being allocated on a year-by-year basis. Yearly increments will be clearly identifiable as Trust recommended programs.

Legislative Fiscal Analyst Comment: *This concept works very well for Trust targeted program funding. However, there is no benefit to zero-based budgeting of the Trust's own administrative budget. The Trust may wish to return to incremental budgeting of administrative costs.*

ORGANIZATIONAL CHANGES

There are no significant changes requested.

CAPITAL REQUEST

The Alaska Housing Finance Corporation capital budget makes up the majority of DOR's annual request (74% of the budget for FY2010). AHFC has over $84 million budgeted for their housing programs, including $20 million of federal receipts, and almost $63 million of the $68.7 million AHFC dividend to the state. A few of the larger projects are:

- the Supplemental Housing Development Program ($10 million AHFC Dividend);
- the Senior Citizen's Housing Development Program ($7.5 million AHFC Dividend);
- the Homeless Assistance Program ($6 million AHFC Dividend); and
- the Loussac Manor Renovation and Replacement Phase 3 ($8.5 million AHFC Dividend).

The remainder of DOR's request is primarily two large projects totaling $28.5 million:

Gas Spur Line: $5,000.0 AHCC Funds. The Alaska Natural Gas Development Authority (ANGDA) is working to develop a spur line off the future gas pipeline from the North Slope. The intended route is from Delta Junction to Cook Inlet. During the special session last year, ANGDA had requested $25 million for this project, but received no funding. Current estimates for the spur line vary from $1 to 1.5 billion, depending on timing and other factors. This $5 million will allow efforts for right-of-way acquisition and engineering/ design to continue.

Legislative Fiscal Analyst Comment: *The ownership structure of the spur line is presently unclear. It may be prudent to identify ownership rights, revenue flow, and operational aspects before additional state funding is allocated to this project.*

Tax Revenue Management System: $23.4 million GF. DOR received $3.9 million in the FY09 capital budget for tax system(s) replacement. This project will create a single, comprehensive management system that will accommodate all tax types. The prior year funding will be combined with this funding to cover anticipated total project cost of just over $27 million.

Department of Transportation and Public Facilities

The Department of Transportation and Public Facilities (DOT&PF) is responsible for planning, research, design, construction, operation, maintenance, and protection of all state transportation systems and many public facilities. This includes approximately 258 state-owned airports and seaplane bases, 6,000 miles of state roads, 700 buildings ranging from maintenance shops to state office complexes, and 25 ports and harbors. In addition, the Department owns and operates the Alaska Marine Highway System (AMHS). The Department also owns and operates the State Equipment Fleet, which provides full maintenance support and replacement activities for all departments and state agencies, including 7,800 light and heavy duty vehicles and attachments.

SIGNIFICANT ISSUES

The Governor's FY2010 general fund operating budget for the Department of Transportation and Public Facilities is $4,364.8 above the FY09 Revised Management Plan (excludes fuel/ utility & gasline one-time funding of $33 million). The net GF change from Adjusted Base is $11,492.6.

The following notes correspond to numbers in the last column on the preceding spreadsheet:

1. Commodities Market: ($33,000.0) GF. The last three budget cycles have seen unprecedented commodity price inflation that has affected every family, business, organization and government unit in the state. The recent collapse of commodity prices—particularly fuel prices—relieves considerable budgetary pressure on DOT&PF.

The fuel "trigger" appropriation created by the legislature performed as intended. By making fuel appropriations one-time items, and backing them out of base budgets each year, the legislature has avoided excessive base budget build-up due to high fuel prices.

The Governor's budget retains a fuel trigger appropriation for FY2010, even with fuel prices far below the levels of FY09. Legislative Finance believes a trigger mechanism to be prudent given the volatility of markets, but suggests that the table (in section 13 of the Governor's operating bill) extend at least as high as the official forecast of $74 per barrel of oil. Limiting the trigger price to $60 per barrel may provide insufficient funding if oil prices rebound. If oil prices remain low, there is no harm in a higher cap.

DOT&PF received $33 million of the fuel appropriation for FY09. This is their maximum allocation (75%) of the $44 million appropriated. Under the Governor's proposal, DOT&PF would receive a maximum of $18 million in FY2010.

Legislative Fiscal Analyst Comment: *As of this writing, Alaska North Slope is trading near $30 per barrel. If oil stays at this level for the rest of the fiscal year, the year-end average price will be near $60 per barrel (see Fiscal Sensitivity on page 18). This price level would have provided DOT&PF with $18 million for fuel in FY09. The legislature may wish to explore the potential for supplemental appropriations that recover/reallocate a portion of the FY09 fuel appropriation.*

2. Sidewalk Snow Removal: $547.1 GF. $1.25 million was approved in the FY09 capital budget to purchase snow removal equipment for sidewalks on state roads, specifically those in the Anchorage Bowl. The sidewalk snow removal equipment was a legislative addition after discussion in the DOT&PF subcommittee last year revealed the lack of necessary tools to clear the sidewalks. Now part-time man-power is requested to run the equipment. An increment of $500.0 and eight part-time positions is requested for

snow removal operations in Central Region Highways and Aviation. An additional $47.1 is requested for the Southeast Region.

3. **Specialized Contracting Services: $170.0 GF.** The costs of various specialized contracting services in the Northern and Central Regions are increasing. An additional $110.0 in the Northern Region is requested for new Direct Digital Control (DDC) systems coming online, along with other specialized contract services such as elevator maintenance and insulation services. An increment was approved in FY09 for a position to maintain all of the DDC systems in the Northern Region. In FY2010 $60.0 is requested for similar Central Region contract cost increases.

4. **Janitorial Contracts: $165.2 GF.** Northern and Southeast Regions are requesting additional funding for janitorial contracts. In prior years, the cost for janitor contracts has been absorbed. The agency contends that contract prices have reached the point where they require additional funding.

5. **Striping Contracts: $169.3 GF.** Southeast Region Highways and Aviation is requesting funding for increased costs associated with highway and airport runway striping. The current budget for striping in the region is $180.7. Recent striping costs put the required amount near $350.0.

6. **Motor Carrier Safety Assistance Program Expansion: $250.0 Receipt Supported Services (RSS).** Through DOT&PF, Alaska became a Unified Carrier Program (UCR) state during FY09. This federal program authorized in SAFETEA-LU, allows states to mandate commercial motor vehicle registration under the UCR program. Program revenue is required to be used for increased motor carrier safety and motor carrier enforcement along with any administrative costs related to the program. This increment request would allow for expenditure of the additional revenue for motor carrier safety and enforcement activities.

7. **Whittier Tunnel Extended Operating Hours: $500.0 Cruise Ship Gambling Tax.** Last session, a special $500.0 appropriation was made in the capital bill for extended operating hours at the Whittier Tunnel. The extended hours were to benefit cruise ship passengers and industry merchants. An increment is being requested to maintain those extended hours during FY2010. In addition to the increment, a $2 million fund source change is requested from CIP Receipts (via federal capital projects) to gambling tax revenue.

Legislative Fiscal Analyst Comment: *The funding used in FY09 was from the Regional Cruise Ship Impact Fund established by the cruise ship head tax initiative passed in 2006. Present legal opinion is that the head tax revenue may be used only to mitigate cruise ship impacts or to benefit cruise ship passengers (in order to avoid violation of U.S. Constitution Commerce/Tonnage Clauses). The FY2010 request uses cruise ship gambling tax proceeds. Although this revenue source was also created as part of the head tax initiative, use of the fund source is not restricted by the same legal issues. Legislative Finance and the Department of Revenue classify the head tax as restricted Other State Funds, and the gambling tax revenue as part of the unrestricted general fund. Using the same funding source as FY09 may be warranted.*

Legislative Fiscal Analyst Comment: *Upon completion of the Whittier Tunnel, the Federal Highway Administration agreed to partially fund operation and maintenance of the tunnel until such time that it could be self-supporting. This contract expires in February of 2009. The switch from federal funds to state funds appears, however, to be a*

state choice. The federal government is not mandating the fund source change and federal funding may still be available as an option for tunnel operations. That said, using federal funds for tunnel operations makes them unavailable for road construction projects.

8. **International Economic Impacts on International Airports: ($2,153.0) International Airport Revenue Funds.** The global financial situation has caused considerable pressure on both passenger and cargo airlines. The airline association has asked DOT&PF to reduce landing fees given this operating environment. FY09 year-to-date combined cargo/passenger landing weight is approximately 16% below FY08. International Airport revenue is expected to be lower commensurately. The airport system is planning reductions for the FY2010 budget totaling over $2 million. Cost containment has already begun in FY09 and supplemental budget reductions are expected.

9. **Alaska Marine Highway System Maintenance Budget: $8,865.2 GF.** AMHS received two one-time appropriations for FY09. They have requested a continuation of that funding for FY2010 and beyond. $4.6 million was added during the operating budget process as a one-time fleet reconfiguration cost increase during Tustemena and other vessel overhaul. Additionally, $4.2 million was added in the capital bill as a one-time expansion of service to Southwest Alaska during the Tustemena overhaul.

Legislative Fiscal Analyst Comment: *FY2010 will require a different mix of vessels and likely have a different cost structure to maintain the same service level. The finance committees may wish to evaluate whether maintaining the same funding level is appropriate.*

10. **Salary Fund Source Changes: $1,015.2 GF.** The Governor's budget proposes using general funds to replace a portion of other funding sources that could be used to pay for contractual wage and health benefits increases. Subcommittees should carefully examine each of these salary adjustment fund changes. Please see **Fund Source Changes for Salary Adjustments** on page 18 for further discussion of this issue.

ORGANIZATIONAL CHANGES

There are no significant changes requested.

CAPITAL BUDGET

The DOT&PF capital budget comprises the majority of the statewide capital budget each year. Typical programs include the Surface Transportation Program (receipts from the Federal Highway Administration) and the Airport Improvement Program (receipts from the Federal Aviation Administration). Both programs require a state match component that are usually budgeted separately to allow for agency flexibility. The budget also typically has appropriations from the general fund for facility, harbor, airport, highway and Alaska Marine Highway vessel/ terminal deferred maintenance, and for the stockpiling of materials for construction. The Governor's proposal contains elements of all of the aforementioned. See the capital budget section on page 49 for further details.

University of Alaska

The major goals of the University are to inspire learning, and to advance and disseminate knowledge through teaching, research, and public service, emphasizing the North and its diverse peoples by fostering and promoting the following:

- a high quality postsecondary educational system;
- appropriate vocational education development and training;
- advancement and extension of knowledge, learning, and culture; and
- the University as the state's primary research facility with focus on the application of new knowledge and emerging technologies.

SIGNIFICANT ISSUES

The FY2010 University of Alaska operating budget as submitted by the Governor is $13,641.4 GF above the FY09 Revised Management Plan (which excludes fuel/utility & gasline one-time funding of $4.8 million). The Governor's net GF change from Adjusted Base is $4,543.9 (which includes, a requested fund source change, switching FY09 Business License & Corporation Filing Fees and Taxes funding to $550.0 GF for FY2010).

According to the University, the program enhancements in the University's FY2010 budget are critical to meeting the Board of Regents' goals in the following growth priorities:

- K-12 Outreach;
- Energy, Engineering, Climate;
- Health Programs; and
- Workforce and Campus Programs.

The University of Alaska Board of Regents requested an overall increase of $11.6 million (a net result of a $32.3 million GF increase and a net *decrease of $20.7 million* in non-GF). The Governor's budget mirrors the Regents' request in several categories but the end result is less than the Board of Regents' request by $24.6 million ($16.2 million GF and $8.4 million non-GF). (see following table)

- **Compensation Increases** – The compensation package requested by the University and submitted by the Governor includes salary increases for all union-represented groups and for non-represented faculty and staff totaling $14.5 million (including $8.9 million GF). It is based on projections of contractual increases for current employee agreements. This request includes a reduction for the University's Optional Retirement Program (ORP) for FY2010 of $2.4 million ($1.3 million of which is GF). It further includes a reduction of $234.4 GF for a one-time workforce development stipend of $800 per retained Alaska Community Colleges' Federation of Teachers member. As with similar salary adjustments in other agencies, compensation increases were added to the base budget.

The Governor made cuts to some areas as shown in the table on the next page:

In addition to (fully supported) compensation increases, Board of Regents' increments partially supported by the Governor include the following:

- **Non-Personnel Services Fixed Cost Increases** – $7,614.3 non-GF. This increase is intended to cover:
  - projected FY2010 travel for intercollegiate athletic teams at UAA and UAF, as well as academic and research travel, to offset airline travel costs that have risen 30%;
  - annual maintenance and repair calculated at a minimum 1.5% of current building value and other increases in non-discretionary costs (estimated at 2% of contractual services and commodities).
- **Compliance Mandates (personnel)** – $400.0 non-GF. This area includes risk management increases to support required insurance, risk assessment, and operation increases.
- **New Facility Operating and Maintenance Costs** – Total $694.3 ($350.0 GF, $344.3 non-GF) Additional funding in this area would cover:
  - the Bragaw Building Lease Expense in Anchorage for space expansion related to Development, Corporate Programs, Risk and Land Management functions;
  - the Integrated Science Building (ISB) East Campus Parking Garage; and
  - ISB support positions funding.

Legislative Fiscal Analyst Comment: *As in 2009, the Governor has included a contingent appropriation in the operating budget to offset increased fuel and utility costs of agencies. The University Board of Regents requested funds in excess of that contingency (estimating that costs will rise another 10% for FY2010), but that increment was not included in the Governor's budget submission. The University anticipates a possible supplemental request to cover excess fuel costs for FY09.*

The Governor's request does not include the entire Board of Regents' proposal in Priority Program Enhancement and Growth. A total of $15,525.0 ($8,222.6 GF and $7,302.4 non-GF) was cut from the Board of Regents' FY2010 operating budget submittal in these areas. Partial program funding is included in the Governor's budget for the following:

- **K-12 Outreach** – Total $1,030.0 ($800.0 GF, $230.0 non-GF) Funding in this category is intended to support partnerships with the Department of Education and Early Development and school districts, as well as summer camps, career awareness, outreach, special education teacher training, and early testing, assessment and placement. Examples of proposed program investments include expanding the following:
  - UAA Engineering Bridging Activities/Summer Camps;
  - UAA Alaska Native Science and Engineering Program;
  - UAF Alaska Summer Research Academy Engineering Components;
  - UAF Interior Aleutians Campus Early College High School Initiative;
  - UAF Individual Technology Based Math and Summer Bridge Programs; and
  - UAS Summer Bridge, Early College Advising and Programs.
- **Energy, Engineering, Climate** – Total $4,968.1 ($1,000.0 GF, $3,968.1 non-GF)

- The Governor's request focuses on funding to address solutions to the state's most pressing energy issues, including outreach through the Alaska Cooperative Extension Service.
- Operating support for energy is intended to provide the core expertise and support to address the needs expressed through state plans, including a plan prepared by the Alaska Energy Authority.

- **Health Programs** – Total $2,143.4 ($1,843.9 GF, $299.5 non-GF)
  - This priority program request is designed to support the University's next step in building strong health occupation training programs. Specific examples include:
    - Anchorage Campus – Clinical Rotations/Health Pipeline partnering with industry leaders to encourage Alaskans in health careers and support health students to select employment in underserved areas and with underserved populations; UAA distance social work program in partnership with the Alaska Mental Health Trust Authority; Human Services Practicum Coordination to meet accreditation guidelines; faculty/liaisons in the areas of pharmacy careers and physical therapy; and, expansion of the Physician Assistant Program;
    - Fairbanks Campus – increased funding for the UAF Psychology Clinic as the training site and behavioral health research facility for doctoral student clinicians;
    - College of Rural and Community Development – UAF Rural Human Services Faculty to work toward a culturally appropriate training program designed for rural human service workers;
    - Tanana Valley Campus – addition of a tenure-track faculty position to the Allied Health/Medical Assisting Certificate and Associate of Applied Science (AAS) program to expand the Medical Assisting program to rural locations; and
    - Juneau Campus – addition of a UAS Career and Health Coordinator to work with the Health Distance Education Partnership, Student Success Coordinator to work with students prior to and after enrollment in any regional health occupation program, and a biological sciences laboratory technician for the Sitka-based program.

Although the Board of Regents had requested funds for Workforce and Campus Programs, no funds were included in the Governor's request for that purpose.

The Governor's University of Alaska FY2010 budget adds three new PFT positions for a total of 4,919 (4,697 PFT and 222 PPT) positions.

ORGANIZATIONAL CHANGES

For FY2010, the Governor's Office is supporting a single appropriation structure for the University of Alaska. Although this was the structure maintained for many years, in FY09 the legislature determined that seven appropriations would allow more oversight and control from a legislative perspective.

In addition to the single University of Alaska appropriation, an allocation for the Small Business Development Center (SBDC) has been created. In FY09, an appropriation was set up to allow movement of the SBDC from the capital budget to the operating budget. For FY2010, this program is also singled out with a transfer of $337.2 ($257.2 GF, $80.0 non-GF) from the Anchorage Campus operating budget (which supplemented the capital budget appropriation each year) to a newly created allocation which adds to and continues the FY09 funding of $550.0. The University's intent is to keep this allocation complete and separate to track all SBDC activities for the federal match requirements, BuyAlaska and the Procurement Technical Assistance Program.

CAPITAL REQUEST

There are two general fund projects in the University's FY2010 capital budget:

(1) $10 million GF to maintain existing facilities (renewal and renovation annual requirement), and

(2) $2.2 million GF designed as a pass thru to Providence Alaska Medical Center for the Alaska Family Medicine Residency Program which trains medical school graduates who intend to practice family medicine in Alaska. This is the only residency program in the Northwest that does not receive annual direct state appropriations from their state university or higher education system.

Legislative Fiscal Analyst Comment: *Prior funding for this program was provided in the Department of Commerce, Community and Economic Development as a Grant to a Named Recipient ($2.0 million each in FY08 and FY09). If funding for this purpose is approved, the legislature may wish to add it to the operating budget as an ongoing appropriation.*

One other item in the University's capital request is funded by AHCC Receipts – $1,072.0 for University of Alaska Gasline Workforce Development to enable acquisition of a machinery simulator package that would support training for any occupation utilizing heavy equipment. The AHCC fund source is classified as GF by Legislative Finance. The Governor classifies these receipts as "Other" Funds.

Alaska Court System

The Alaska Court System constitutes the Judicial Branch of the state's government. Alaska has a unified, centrally administered, and completely state-funded judicial system. The mission of the Alaska Court System is to provide an accessible and impartial forum for the just resolution of all cases that come before it, and to decide such cases in accordance with the law, expeditiously and with integrity.

There are four levels of courts in the Alaska Court System, each with different powers, duties and responsibilities. The four levels of courts are the Supreme Court, the Court of Appeals, the Superior Court, and the District Court. The Supreme Court and the Superior Court were established in the Alaska Constitution. The District Court was established by state statute in 1959. The Court of Appeals was established by state statute in 1980. Jurisdiction and other areas of the judicial responsibility for each level of court are set out in Title 22 of the Alaska Statutes.

The Alaska Court System budget is presented in three appropriation requests - the Alaska Court System, the Commission on Judicial Conduct, and the Judicial Council.

SIGNIFICANT ISSUES

The FY2010 Alaska Court System GF operating budget as submitted by the Alaska Court System is $5,141.3 above the FY09 Revised Management Plan (which excludes fuel/utility & gasline one-time funding). The net GF change from Adjusted Base is $2,710.6.

The following notes correspond to the numbers in the last column of the preceding spreadsheet:

1. **Improve Public Service: $3,202.0 GF.** The Court System has been experiencing difficulty in recruiting and retaining qualified staff to manage the department's increased caseloads throughout the state. The agency has addressed this problem by adding twenty-five full-time positions to the FY2010 request. Increments for these purposes include:

   - **$2,085.0 GF:** Adding judicial, clerical, and administrative support positions where appropriate in communities with the largest need and expanding some positions from part-time to full-time;
   - **$474.0 GF:** Increasing salaries for Magistrates and Pro Tem Judges and Justices in an effort to maintain parity with employees in the classified and partially exempt state service;
   - **$639.4 GF:** Eliminating vacancy factors that currently exacerbate the number of backlogged caseloads by forcing delays in filling judgeships; and
   - **$3.6 GF:** Reducing personal services underfunding in the office of Judicial Conduct.

2. **Operating Expenses: $2,045.1 GF.** Operating costs are increasing for the Court System in the areas of lease costs, building maintenance, utilities, service contracts, office supplies and equipment, information technology and travel. Increments for these purposes include:

   - **$725.0 GF:** Utilities and service contracts to keep up with the rising cost of fuel and building service contractors (snow removal, janitorial and security services);

- **$492.8 GF:** Update operating systems and replace outdated equipment in addition to the purchase and maintenance of critical software licenses;
- **$297.5 GF:** Office and library products including paper, toner and other consumable supplies;
- **$268.3 GF:** Public Building Fund increases in Palmer and Juneau as well as increased lease costs for the other 22 facilities leased through private landlords;
- **$236.5 GF:** Increased travel costs, largely due to an 8.1% rise in domestic airfares from the second quarter of 2007; and
- **$25.0 GF:** Replacement of aging workstations and furniture.

3. **Judicial Retirement System Savings: $3,529.9 GF Reduction.** During the last session, the legislature appropriated $49 million to pay off the unfunded liability of the Judicial Retirement System (JRS). This reduction of debt enabled the Alaska Retirement Management (ARM) Board to reduce the contribution rate from 57.7% to 26.2%. This rate is expected to be stable for the foreseeable future; individual benefit costs under the Judicial Retirement System are more than twice the cost of individual benefit costs under the Public Employees Retirement System.

4. **Transcript Costs for Criminal Proceedings: $125.0 GF.** With an increase in criminal caseloads, the demand for transcripts has dramatically increased. Coupled with this increased demand, fewer contractors are willing to accept work from the court because the payment rates are below market standards. The Court System is currently paying a per page rate of $2.65 - $3.05, while federal courts are paying a per page rate of $3.65 - $4.85.

5. **Judicial Selection: $63.6 GF.** This increment will assist the Commission on Judicial Conduct in meeting its workload requirements in the judicial application and selection processes.

6. **Juror Mileage Reimbursement: $35.0 GF.** By court rule, jurors must reside in excess of 30 miles away from the court to be entitled to receive mileage reimbursement. The Court System is seeking a rule change to permit mileage expenses to be reimbursed after the juror has driven more than 60 miles to perform their service as a juror. This change is particularly important for jurors serving multiple days in rural locations.

7. **Mental Health Programs: $510.3 MHTAAR and $747.1 GF/MH.** FY2010 will be the second year of zero-base budgeting for Mental Health Trust Authority Authorized Receipts (MHTAAR) – meaning that all MHTAAR funding in state agencies is removed from the adjusted base and reconsidered by the Mental Health Trust Authority each fiscal year.

   For FY2010, The Mental Health Trust is recommending $510.3 ($477.5 less than FY09 Authorized) in MHTAAR funding for the MH Trust Disability Justice Initiative. The majority of the funding is for:

   - preventative treatment for youth intended to avoid future costs of more expensive treatment services associated with the adult correctional and judicial systems; and

- developing court ordered treatment plans that address clients treatment needs and are monitored by the court, thus reducing risk of future contacts with the criminal justice system.

The proposed reductions in MHTAAR authorization would be offset by a $747.1 increase in GF/MH funding for additional Disability Justice Initiative programs. Replacement of $647.7 MHTAAR authorization with GF/MH will ensure continued access to treatment services for existing and new therapeutic courts. The remainder of the GF/MH increase will replace FY2009 MHTAAR authorization for the Anchorage Mental Health Court ($99.4).

ORGANIZATIONAL CHANGES

There are no significant changes requested.

CAPITAL REQUEST

Anchorage Campus Project – Phase II: $2.5 Million GF. The Court System's sole capital project included in the Governor's request is a major remodel to all floors of the Boney Courthouse and a minor remodel in the Nesbett Courthouse to accommodate additional judges, provide safe prisoner transport to additional courtrooms in the Boney Courthouse, and provide spaces that are more conducive to efficient customer service.

Alaska Legislature

The Alaska State Legislature sets policy through the adoption of laws and has the power of appropriation as provided in the Alaska Constitution and in state statute. The legislature includes the following appropriations and allocations:

- Legislative Budget and Audit Committee
  - Legislative Audit
  - Legislative Finance
  - Committee Expenses
  - Legislature State Facilities Rent
- Legislative Council
  - Legislative Salaries and Allowances
  - Administrative Services
  - Session Expenses
  - Council and Subcommittees
  - Legal and Research Services
  - Select Committee on Ethics
  - Office of Victims Rights
  - Office of the Ombudsman
- Legislative Operating Budget

SIGNIFICANT ISSUES

The budget submitted to the Governor is traditionally a preliminary draft that has not been formally reviewed by legislative leadership. The FY2010 submittal is essentially identical to the FY09 budget, with the exception of salary adjustments and the following:

1. An increment of $500.0 general funds for potential cost increases during interims.

2. Two one-time appropriations that were carried forward into the FY2010 budget—$100.0 for the Legislative Outdoor Heritage Caucus and $192.5 for a Council of State Governments meeting – lapse at the end of FY09. In keeping with a legislative policy decision (made last session) to minimize carryforward, the legislature may wish to delete these FY09 one-items from the FY2010 budget.

3. A fund change that replaces $178.7 of general funds with PFD Criminal funds.

Legislative Fiscal Analyst Comment: *The amount of PFD Criminal funds available varies with the amount of the Permanent Fund dividend and the number of felons incarcerated. Recent investment losses are likely to reduce PFDs in the future, with a corresponding decrease in PFD Criminal funds available. The likely result is future requests to replace PFD Criminal funds with general funds.*

There are no capital projects or organizational changes requested.

Alaska Department of Health and Social Services

2009 PRIORITIES

The overriding theme for future direction for the Alaska Department of Health and Social Services is ***helping individuals and families create safe and healthy communities.***

Substance Abuse

Substance abuse affects every family and community in Alaska. It is a contributing factor in suicides, crime, unemployment, domestic violence, child abuse, school dropouts, juvenile delinquency, etc. We need to prevent, intervene early, treat and help people recover from substance abuse through public/ private partnerships and long-term strategies.

Major strategies include:

- **Prevention:** Implement Prevention of Underage Drinking Initiative; target substance abuse and suicide prevention programs to those communities most in need.
- **Early Intervention:** Integrate primary care with behavioral health (mental health and substance abuse); screen all youth in the juvenile justice system for substance abuse.
- **Treatment:** Develop and implement family-based treatment services (based on the California SHIELDS for FAMILIES project); submit substance abuse Medicaid Waiver targeting adults; implement involuntary treatment and secure detoxification services.
- **Recovery:** Support array of recovery services using performance-based standards and funding. Continue to integrate mental health and substance abuse services into a behavioral health system.

Health and Wellness

Many Alaskans lead less happy and less productive lives, and many die prematurely each year, because of disability and death caused by tobacco, alcohol abuse, injuries, obesity, diabetes, cancer, heart disease, and sexually transmitted diseases. The economic impact of chronic disease alone in Alaska is staggering: an estimated $600 million is spent annually on direct medical services and $1.9 billion in lost productivity. Most of this is attributable to personal choice involving diet, physical activity and tobacco use — and is preventable. We can do a better job of screening, diagnosing and treating these conditions.

Major strategies include:

- **Prevention:** Implement evidence-based, population-based health promotion efforts. Increase primary prevention approaches, including those targeting increased self responsibility, improved policies and environmental supports that encourages healthy choices. Educate about and improve methods for screening, diagnosis, and early treatment of conditions and behaviors most detrimental to the physical and mental health of Alaskans. Implement Early Childhood Comprehensive System recommendations (including a focus on early childhood mental health).
- **Access:** Grow the health care workforce and expand the number of Alaskans with health insurance.
- **Trauma system:** Develop a statewide trauma system.
- **Emergency Response Planning and Preparedness:** Work with communities to prevent health emergencies and prepare for pandemics and natural disasters.
- **Environmental Health Impacts:** Assess, guide and mitigate environmental impacts on health in Alaska. Develop expertise in performing health impact assessments.

Health Care Reform

Alaska's health care system continues to be fragmented and uncoordinated and doesn't produce the kinds of outcomes we expect. By strategically focusing on care management, reforming Medicaid, creating a Health Care Commission and growing our health care workforce, we can transform our health care system.

Major strategies include:

- **Care Management:** Improve care coordination; implement disease management program for chronic diseases and explore use of primary care case management strategy for most disabled populations; complete planning for the Bring the Kids Home Initiative.
- **Medicaid Reform:** Develop legislative and systemic recommendations for reforming Medicaid aimed at improving Medicaid sustainability.
- **Health Care Commission:** Establish a commission in order to build public awareness and define the future roles of the state, business, providers and individuals regarding health care funding and delivery.
- **Health Care Workforce:** Partner with the federal government and other states to increase training capacity and expand training programs for health care professions.

Continued ...

Alaska Department of Health and Social Services

2009 PRIORITIES

Long-Term Care

Seniors represent the fastest growing population in Alaska and it is our responsibility to determine what kinds of services we want for our aging parents (and grandparents) in order to keep them at home in their own communities. We need to develop a long-term care plan, improve services to those with Alzheimer's Disease and related disorders, and promote the expansion of aging and disability resource centers.

Major strategies include:

- **Long-Term Care Plan:** Develop an immediate and sustainable long-term care plan. DHSS has contracted with HCBS Strategies to develop this plan, which includes:
  - support for family caregivers;
  - improved service arrays and definitions of future roles of residential settings, e.g., the Pioneer Homes and nursing homes;
  - development of the workforce to meet long-term care needs; and
  - interdisciplinary departmental planning to provide quality assurance, provider training, audit and compliance coordination.
- **Long-Term Care and Services for Alaska Natives:** Work with the Alaska Native Tribal Health Consortium to identify and implement long-term care services.
- **Alzheimer Disease and Related Disorders Waiver:** Submit Waiver.
- **Aging and Disability Resource Centers:** Promote expansion of these centers.

Vulnerable Alaskans

We need to ensure that both kids and communities are safe, that developmentally disabled kids and adults have access to quality services and supports, and that individuals and families get the kind of financial and vocational supports they need to be contributing members of society. By focusing on family-centered services and through the use of performance-based standards and funding, we can better meet the needs of our most vulnerable citizens and their families.

Major strategies include:

- **Family-Centered Services Project:** Expand this project, which is designed to help families leave the public assistance rolls and find employment.
- **Performance-Based Standards:** Implement use of performance-based standards and funding for grantees.
- **Licensing, Certification and Training Standards:** Ensure providers comply with these standards.
- **Social Service Workforce:** Recruit and retain a qualified social services workforce using evidence-based practices to design and implement a department-wide approach.

Department of Health & Social Services
Overview of 10 Year Plan
January 27, 2009

MAJOR UNKNOWNS
- Federal funds – e.g. general erosion of funding, cost shifting, unfunded mandates
- Tighter federal and state budgets
- Increasing scrutiny and accountability, especially for Medicaid
- Broad economic problems – e.g. financial markets, energy costs, mortgage defaults, medical inflation
- Environmental problems – e.g. climatic/demographic changes, aging infrastructure, infectious disease outbreak
- Paradigm shifts in program operations – e.g. fewer medical professionals, IT efficiencies, cross- dept working groups

BASELINE ASSUMPTIONS

OMB –
- Non-formula program costs should reflect the FY09 level of service
- If adjusting for inflation, use 2.75% or a generally recognized source appropriate for the type of expense
- If adjusted for population, use ADOL&WD's mid-case population scenario

HSS –
- Non-formula programs were inflation adjusted using OMB's rate of 2.75%/year
- Medicaid service costs were estimated using MESA, a sophisticated forecasting model that incorporates many factors
- Medicaid School Based Administrative Claims were adjusted for inflation (2.75%) and trends in federal participation
- Children's Services were adjusted based on established historical trends
- Health Care Services were adjusted by program based on historical trends and projected population changes

BASELINE RESULTS

Total Cost
- From FY08 to FY19, total costs increase by 71% (or 5.5% per year, compounded)
- Formula based programs consume an ever larger percentage of total departmental costs

Operating Costs

Formula Programs – *such as Medicaid, Public Assistance, Child Care, Foster Care, Temporary Assistance*
- Over 10 years, formula-based program costs increase by 89% (6.6%/year, compounded), rising from 68% of total HSS costs in FY08 to 75% of total HSS costs in FY19
- Medicaid costs alone increase by 7.2%/year, gradually rising from 58% of total HSS costs in FY08 to 69% in FY19

Non-formula Programs – *such as Public Health activities, Child Protective Services, department administration*
- Over 10 years, non-formula program costs increase by 29% (2.7%/year, compounded) and decline as a percentage of total HSS costs (from 31% in FY08 to 24% in FY19)

Capital Costs
- Over 10 years, deferred maintenance of existing facilities increases 49% (4.1%/year, compounded) – est. $10 MM/year
- Capital grant programs for Trust beneficiaries

GASLINE ALTERNATIVE
- No gas line alternative was prepared due to the difficulty in quantifying social impacts
- TAPS experience leads HSS to expect an INCREASED need for Department services due to higher alcohol and drug abuse, as well as in-migration of job seekers from other states impacting public assistance roles

NEW INITIATIVES

Cost
- The average annual cost for New Initiatives is $110.6Million (roughly 6.2% of HSS Baseline)
- $7.7 MM (7%) for formula programs; $70.4 MM (64%) for non-formula programs; $32.5 MM (29%) for capital projects

Description
- Formula Programs – *Improvements in foster care and adoption subsidies beginning FY10, FY11, and FY12*
- Non-formula Programs – *For grant programs in DBH, DSDS, and OCS (excluding Medicaid) increase inflation from OMB's 2.75% rate to the BLS Anchorage CPI rate of 4.6%*
- Capital Projects –
  Public Assistance IT system replacement (EIS) in FY11-13; Juvenile Justice facility improvements in FY11-16
  From FY17-FY19 a placeholder was added for projects not yet specifically identified

1. Baseline wage and benefit increases are handled in the statewide spreadsheet.

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond

Summary of changes made in January 2009
Baseline Scenario >> Capital - Projects not funded in FY09 moved to out one year
New Initiatives >> Capital - Placeholders entered for projects not yet identified from FY17-FY19; Operating cost - On-going expenses added back into analysis (most recent version did not include these costs in either Baseline or New Initiatives)

Health & Social Services

Initiatives (Except Gasline)

House Finance Committee
Representative Mike Hawker, Chairing
Thursday, January 29, 2009
Department of Administration Overview

I. Introductions:
   a. Organizational Chart
      i. Robert Pearson
      ii. Anchorage DepCom & Directors
      iii. Juneau DepCom, KB and Director ES
      iv. Juneau Directors

II. Department has three main parts, one main function:
   1. Arm's Length Relationship
   2. Centralized Services
   3. Public Facing Agencies

Main Function: is to save the State money by centralizing services so that payroll, mailroom, personnel and computer services are not replicated across every department.

BROCHURE

1) **Boards, Commissions** with Arm's Length Relationship to department/commissioner:
- Alaska Oil & Gas Conservation Commission
- Alaska Public Broadcasting Commission
- Alaska Public Offices Commission
- Violent Crimes Compensation Board

2) **Centralized Services:**
- Personnel & Labor Relations
  - Handle all of the labor grievances, arbitrations for all departments
  - Negotiate contracts with all 11 State employee unions
  - Recruitment & Retention – AO #237 Working Group Report on our website
- Office of Administrative Hearings
  - Centralized, and Arm's Length
- Risk Management
- Enterprise Technology Services
- Finance
  - Online Checkbook
- BROCHURE : General Services
  - Rural and municipal outreach – purchasing power

3) **Public Agencies:**
   - Public Defender Agency
   - Office of Public Advocacy
   - Division of Motor Vehicles
   - Retirement & Benefits

III. FY 2009 Status Report:
   a. Completed installing VOIP phones – decommissioning the PBX's that were struck by lightning
   b. Brought Online Checkbook - online
   c. Have begun rolling out Active Directory, next step in Microsoft Exchange roll-out begun in 2007.
   d. Linny Pacillo Parking Garage opened on-time and on-budget in September 2008.
   e. Getting Palmer State Office Building ready for occupancy October 1 of this year.
   f. Working State computer security initiatives, including HB 65
   g. Continuing to address recruitment and retention issues for the State as an employer
      i. Labor contracts
      ii. Service steps – negotiated into most contracts
      iii. Working Group Report on progress is on the DOA main web page

IV. FY 2009 Savings Targets:
   a. Taking $300,000 reduction in the Division of Finance
   b. Taking $300,000 reduction in ETS - struggle
   c. Taking $200,000 reduction across the department in personal services (% of Personal Services budget)
   d. Believe through managing vacancies, and delaying purchases and ratcheting up vigilance on purchases that we could end the year saving $200,000. Some of those purchases would still be necessary in FY10.

V. FY10 Budget Overview – significant changes – Eric Swanson

V. HB 125 Long Range Plan – 10 Year Summary - Eric

Department of Administration 10 Year Plan

Operating Budget Assumptions
The 10 Year Plan template separates the operating budget of the DOA into Formula and Non-formula programs. For the DOA, there are only two formula programs, both small, both retirement plan related. The two are the Elected Public Officers Retirement System (EPORS) and the Unlicensed Vessel Participant Annuity Retirement Plan. There is a small amount of growth projected for EPORS, based on the analysis of an actuarial consultant. The UVPARP budget is projected to remain unchanged.

The remainder of the DOA was examined and projected primarily by function and division.. A recap of the more significant portions of that analysis is as follows:

DMV: Projected growth based on population growth estimates.

OPA and PD: Projected growth based on prior year spending trends. This amounts to approximately a 6% annual increase. We are expecting improved delivery of caseload numbers from the Public Defender Agency soon, and will revisit this methodology and conclusion upon receipt of the new data.

EPORS and UVPARP
Actuarially based growth for EPORS, flat for UVPARP.

Core Services:
Core Services includes the Office of Administrative Hearings, Office of the Commissioner, Administrative Services as well as the Divisions of Finance, Personnel & Labor Relations, General Services, Retirement & Benefits as well as the State Travel Office. There are a few other smaller components that reside here as well. For this group we are assuming a 1% annual growth for other funds and no growth for GF. *(note: future statewide labor contract costs are NOT included here).*

One unit within the core services group that is an exception to the above methodology is the Group Health unit, for which we are requesting an additional $5.1 million or what amounts to a 39% increase for FY2010 in this budget. This increment is in anticipation of a new contract for health care administration.

ETS – Estimate of 7% annual growth in the operating budget to provide resources necessary for creation/acquisition and deployment of equipment, software and other new technology.

AOGCC assumes flat funding in the operating budget.

Capital Budget Assumptions
Division of Finance System Replacement project calls for $50.0 million in FY2010, and an additional $152.0 million by FY2013.

ETS capital is projected to average approximately $31.0 million per year. This is based on a prior four year average.

DMV is in need of $5.0 million in FY2010 for the ALVIN project, then another $2.5 million in FY2011.

Continuing capital budget items include $250.0 per year for Non-PBF facilities, and approximately $2.8 million for PBF facilities.

Gasline Capital
AOGCC estimates needing an additional $500.0 to $1.0 million per year starting in FY2011 to complete gasline related studies and work.

Describe department assumptions for initiatives (except gasline) appropriations estimates:

Division of Finance accounting system replacement. 50.0 million for FY2010. An additional 150.0 million by FY2013.
Division of Motor Vehicles ALVIN replacement. 5,000.0, in FY2010 then 2,500.0 in FY2011.
Lease Management System Replacement. 500.0 GF.
ETS capital going forward is in new initiatives except gas line. Four year average of totals used to project. Amounts are included in GF (capitalize fund) and Other Funds, to provide ISF authorization. This is a "worst case" methodology assuming little contribution from depreciation.

Alaska Department of Revenue
10 Year Plan

A look back at the Department of Revenue's funding provides an historical perspective to how the agency long-range plan was derived.

1. Salary adjustments include benefits increases and bargaining agreement adjustments
2. Fixed Costs include mainframe, insurance, and rent chargeback with the most significant growth for AHFC
3. Actual increments are less than 1% for each of the prior years

The Department of Revenue anticipates a fairly flat projection with increases built in for population growth that would directly impact PFD, CSSD and AHFC.

1. We anticipate fund growth where management fees may increase again but staff management may not need to increase.
2. Capital budget growth should remain at a minimum given the assumption the new tax management information system funding is provided in FY10.
3. PFD's online filing has proven successful and should remain viable for the next 10 years.
4. After removing the management fee increases, the department's past growth has been consistently around 3%. That 3% is fairly evenly divided between salary adjustments, fixed costs, and fiscal notes.
5. Less than 1% is actual program growth to better serve Alaskans.

FY2006
Budget Growth totaled $26,711.0 (all funds)

- Salary Adjustments $3.5MM
- Fiscal Notes $4.7MM
- Fixed Cost Increases $2.5MM
- Investment Mgt Fees $13.5MM
- INC: Tobacco Tax Enforcement $778.9
- INC: Corporate Audit Program $998.6
- INC: Compliance Adjustments $225.0

FY 2007
Budget Growth totaled $28,927.5 (all funds)

- Salary Adjustments $4.1MM
- Fiscal Notes $167.0
- Fixed Cost Increases $3.2MM
- Investment Mgt Fees $20.4MM
- INC: ARMB responsibilities $661.9
- INC: Juvenile Justice Grant $100.0
- INC: APFC positions $300.0

FY 2008
Budget Growth totaled $26,291.6 (all funds)

- Salary Adjustments $3.4MM
- Fiscal Notes $2.4MM
- Fixed Cost Increases $1.5M
- Investment Mgt Fees $17.6MM
- INC: CSSD federal match $1.2MM

FY 2009
Budget Growth totaled $32,572.3 (all funds)

- Salary Adjustments $4.8MM
- Fiscal Notes $1.6MM
- Fixed Cost Increases $1.2MM
- Investment Mgt Fees $24.2MM
- INC: Audit Master positions $600.0
- INC: Contract Auditors $540.0
- INC: ARMB Contracted Actuary $300.0

1. Baseline wage and benefit increases are handled in the statewide spreadsheet.

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond

1) No major changes in programs are anticipated; assumes current service levels will be maintained.
2) Does not include APFC or AHFC; the corporations will provide separate 10-year plans.
3) The AK Mental Health Trust assumes average 3% growth in operating budget (MHT Admin/Other Funds) with two years that include planned staff increases of 1 FTE at a time.
4) PFD Div program growth tracks population growth per DOLWD projections.
5) Usual ongoing capital requests include computer replacements for CSSD and PFD Division.

Alaska Commission on Judicial Conduct

December 3, 2008

MEMORANDUM

TO: Division Director
Office of Management and Budget

THRU: Lena Simmons
Budget Analyst

FROM: Marla N. Greenstein
Executive Director

RE: **FY 2010 Budget Submission**

Enclosed is a copy of our FY 10 budget request. Please note that we are requesting additional funding to address an increase in our personal services under-funding. Our request for a $ 3,600 increment will address our anticipated personal services under-funding. We hope to ask for legislative action that will allow future minor adjustments to our personal services underfunding to occur automatically, without the need for us to request an increment every year.

If I can answer any questions, please do not hesitate to call.

Alaska Commission on Judicial Conduct

January 9, 2009

MEMORANDUM

TO: Division Director
Office of Management and Budget

THRU: Lena Simmons
Budget Analyst

FROM: Marla N. Greenstein
Executive Director

RE: **FY 2009 Supplemental Request for Commission Special Counsel**

As you are aware, the Commission proceeded with Formal Charges and a Formal Disciplinary hearing in a matter this fiscal year. We maintain an operating budget line of $36,000 to allow us to hire Special Counsel when the need arises, recognizing that supplemental funding will be needed should the matter proceed to formal hearing. This matter has exceeded our budgeted amount. To date our professional services costs for this matter in FY 09 total $58, 144, with an estimated additional $11, 000 for upcoming proceedings before the Alaska Supreme Court in this matter. These total costs exceed our budgeted funding by **$33, 144** (our supplemental request).

If I can answer any questions, please do not hesitate to call.

Alaska Court System
Review of 10-Year Funding Plan
1/29/09

The Alaska Court System is the primary entity in the Judicial Branch of state government. Its main purpose is to handle criminal and civil cases. The court system does not initiate this caseload; its work is generated entirely by the individuals, organizations, businesses, governmental agencies, and other entities that file cases.

Because the court system's workload is created entirely by others, it is difficult to predict how this workload might change in the future, other than to note that increases in population have historically meant more cases. The workload is also greatly impacted by the laws that are enacted by the legislature each session. The court system cannot predict future statutory changes that will impact the caseload.

FY10 Funding Levels – Amounts included for FY10 reflect the court system's FY10 operating and capital budget request.

FY11 Strategic Initiatives – In FY09, the court system requested funding for a significant court initiative called "No Dark Courtrooms" to improve courtroom operations around the state. The court system received 25% of the funding requested for this initiative. In the FY10 budget request, the court system is seeking $879,100 to further progress on this effort. In FY11, the court system will require an additional $866,700 to completely implement this project. This initiative has a far-reaching impact on the justice agencies serving the state. Improvements made under the first phase of the project have included expedited dissemination of data such as criminal judgments, bail, and conditions of release that are essential to public safety, as well as the distribution of documents such as copies of orders and notices of next hearing dates while the parties are in the courtroom.

Another initiative included in the FY11 planning document is the addition of two superior court judgeships. Long-term trends in the court system's caseload support adding superior court judges and related staff in Anchorage and in Juneau. The substantial increase in felonies is the driving force behind the Anchorage request, and the Juneau request is based on a caseload that is the highest in the state.

FY12 – FY19 – Lacking information about future changes in the law and other factors that may increase the number of case filings (such as the state of the economy or the number of municipal law enforcement officers), the funding requirements for FY12 – FY19 assume no significantly changed workload. For future years, the court system has applied the 2.75% inflation factor suggested by OMB for projecting operating funding required for the future periods. Capital funding required for FY11 – FY12 is based on capital projects currently identified in the court system's capital budget request. The annual capital project funding requirement for FY13 – FY19 is projected to be $6 million.

Impact of Gasline Project on Court Operations – The court system is unable to determine the increased costs that will result from the development of the gasline with the information it has available. During the 1970s, the criminal and civil caseload of the court system was impacted by the construction of the Trans Alaska Pipeline System (TAPS). This increased workload was the inevitable result of oil field construction projects that employed over 30,000 persons. The surge in workers resulted in significantly higher caseloads and court costs in Interior Alaska, with lesser impacts in other parts of the state. While the scope of the gasline project will not be as great as the TAPS project, we do not have enough information to project increased costs at this time. More accurate cost information will be available as this project progresses.

1. Baseline wage and benefit increases are handled in the statewide spreadsheet.

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond:

The cost for FY10 reflects the budget request levels for the entire Judicial Branch: the Alaska Court System, the Alaska Judicial Council and the Alaska Commission on Judicial Conduct. There is a significant capital component for the FY10 request; the majority of this request is for the remodel of the Boney Courthouse and for several deferred maintenance projects. For FY11 - FY19 operating requirements, the standard 2.75% inflation factor has been added to the prior year's funding level.

Describe department assumptions for initiatives (except gasline) appropriations estimates:

In FY11, the court system plans to add clerical staff to continue the "No Dark Courtrooms" initiative, which is an effort to expedite criminal case processing, improve courtroom operations, and make critical information available in a timely manner to law enforcement agencies and others. In addition, two new superior court judges and related staff will be needed in FY11. The work of the court system is greatly impacted by changes in legislation, and we cannot predict the statutory changes that will be enacted. In addition, the court system does not initiate its caseload; instead, work is initiated by the individuals, organizations, businesses, and governmental entities that file cases. Lacking information about future changes in the law, and about many of the factors that may increase the number of case filings (such the state of the economy or the number of municipal law enforcement officers), the funding for years FY12 - FY19 does not reflect any significantly changed workload.

ALASKA JUDICIAL COUNCIL - JUDICIAL SELECTION COSTS

- Absent sufficient funding for the Alaska Judicial Council's selection work, judgeships are likely to remain vacant for longer periods. Enabling a timely selection process is cost effective. The cost to the Alaska Court System of covering vacant judgeships is more than the cost of facilitating a timely judicial selection process.

- Prolonging judicial vacancies is likely to increase case disposition times for litigants.

- There have been many more judicial vacancies than in the past, a trend that is expected to continue.

- Prior to 2003, Alaska averaged 4 judicial vacancies per year. From 2003 through 2008, Alaska averaged 7 judicial vacancies per year.

- The Alaska Judicial Council anticipates 8 or 9 vacancies in 2009. In the first month of 2009 alone, the Council is aware of 5 vacancies occurring in 2009.

- The Alaska Court System is seeking funding for an additional judgeship in FY10.

- In addition to more vacancies, there have been more applicants per vacancy in recent years. Prior to 2003, an average of 8.3 attorneys applied for each vacancy. From 2003 through 2008, an average of 10.6 attorneys applied for each vacancy.

- The Council has no control over the numbers of judicial positions, vacancies, or applicants.

- Except for one-time funding in FY 07 to evaluate applicants for six new judgeships created by the legislature, the Council's budget for selection costs has been based on a pre-2003 historical average of 4 vacancies a year. When adjusted for inflation, the Council's funding for judicial selection expenses has not increased in more than 20 years, despite the Council's increased workload.

- In FY08, due to the high number of vacancies, the Council required supplemental funding for the first time in more than 20 years.

- Based on the numbers over the past 6 years, the Council seeks $63,600 to cover its increased judicial selection costs. These funds will permit the Council to screen applicants for 7 vacancies per year. This amount does not include any personal service costs even though the Council has fewer full-time staff than it did before 2003.

Alaska Department of Law
Long Range Fiscal Plan Summary
January 23, 2009

Operating Budget

We developed this plan expecting a 10% growth in population, an increase in cyber crime and an expansion of specialty courts (mental health courts, wellness courts, minor consuming courts, etc). We also anticipate that both federal and state laws will continue to increase in both numbers and complexity and increase agency reliance on our services. Our federal funding is slated to run out in FY10, and the plan does not anticipate additional federal dollars.

The Alaska Department of Law is predominately funded from either direct appropriations or funds from other agencies, which for purposes of the long range plan are all treated as general fund. Funding sources used by other agencies to pay the Department of Law include general funds, other state funds and federal funds. In FY 2009, 67% of the department's budget (civil, criminal and administrative divisions) is funded from general fund sources, 28% from agency receipts and 5% federal funds.

Personal services accounts for 66% of the department's budget and is the driving force behind increments built into the Baseline Long Range Plan. Most of the positions were added in FY14 and FY15 and are directly related to population growth. We have included a $7,200 overhead factor for each position to cover other costs associated with increased staff.

The greatest factor impacting the number of District Attorneys in the criminal division is the number of crimes committed and the number of law enforcement personnel to investigate those crimes. Other factors include the size and demographics of the population and the state of the economy (not factored into our plan). New laws generally have a direct impact on division resources.

Most of the growth in the civil section relates to the population growth. Other factors include the fluid human services laws and regulations and the increasing complexity of laws and regulations faced by state agencies.

Capital budget needs: The department's capital budget is primarily related to IT purchases and leasehold improvements. It is anticipated that the department will continue to seek funding for security enhancements and technology. We are projecting $200,000 per year; however, we anticipate the requests will continue to fluctuate.

GASLINE

The department anticipates that the Gasline will include increments in both personal services and legal contracts. We also anticipate that crime will increase as construction ramps up.

The long range plan does not include any potential funding as a result of the Economic Stimulus package.

State of Alaska

Department of Revenue

Administrative Services Division

SARAH PALIN, GOVERNOR

333 Willoughby Avenue, 11th Floor

P.O. Box 110400

Juneau, Alaska 99811-0405

Phone: (907) 465-2300

Fax: (907) 465-2394

February 11, 2009

The Honorable Mike Hawker
Co-Chair, House Finance Committee
Alaska State Legislature
State Capitol, Room 505
Juneau, AK 99801-1182

The Honorable Bill Stoltze
Co-Chair, House Finance Committee
Alaska State Legislature
State Capitol, Room 515
Juneau, AK 99801-1182

Dear House Finance Committee Co-Chairs:

During the House Finance Committee hearing for the Department of Revenue overview on January 29, 2009, questions were asked by members of the committee that required some follow-up on the part of the department. These questions are re-stated below with the department's answers.

What amount of the Resource Rebate was garnished by the Child Support Services Division (CSSD) in payment of child support?

According to the PFD Division, there were 12,528 applicants whose dividends were subject to garnishment by CSSD. Since the Resource Rebate was combined with the Permanent Fund Dividend and not all garnishments would have been for the full amount, it would require substantial effort to determine the exact amount garnished by CSSD that was attributable to the Resource Rebate portion of the payment. However, at $1,200 per applicant, the maximum amount of $15,033,600 could have been paid in child support from the Resource Rebate.

Do children placed in out-of-state care facilities (such as residential psychiatric treatment centers) receive Permanent Fund Dividends?

In most cases the child out-of-state and under continuous medical care would qualify for the PFD as long as they intend to return to the state, meet the "72 hour physical presence in two years" requirement, and are otherwise eligible to receive the dividend.

Will the new Tax Management Information System project allow for more timely release of the fisheries report, Commercial Operator's Annual Report (COAR)?

Fish processors file a Commercial Operator's Annual Report (referred to as the COAR report) with Alaska Department of Fish & Game (ADF&G) on March 31st of each year, reporting processing activities in the prior calendar year. AS 43.77.200(7) requires ADF&G to establish an annual statewide average price from the COAR information for each fish species, which is used to determine the value of fishery resources subject to the fishery resource landing tax collected by Department of Revenue (DOR). After compiling the COAR data, ADF&G provides DOR the statewide average price list (historically between the middle and end of May), which DOR publishes to allow at-sea processors to calculate their fishery resource landing tax. The COAR data is recorded under a database system that is managed by ADF&G, therefore the new system DOR is seeking would not affect the timing of the creation/publishing of the statewide average price list created by ADF&G.

Has the unfunded liability in the pension funds grown?

The latest actuarial estimates of the PERS and TRS unfunded liabilities was done based on June 30, 2007 information. They show an estimate of $4.7 billion for PERS and $2.8 billion for TRS based on the market value of assets. While the department does not have an estimated accrued liability numbers for today, it is most likely based on previous trends that these numbers will have increased slightly since June 30 2007.

The assets of the two systems have been reduced by about $3 billion during this period, so it is more than likely that if a reset of the actuarial valuation was done as of today's date, the total unfunded liability would be in the range of $10-$11 billion and the funding ratio would be just over 50% for both systems combined. Since we are in the middle of a fiscal year and actuarial studies are done at the end of each fiscal year, the numbers above should be used only as a guide. The year-end actuarial numbers will likely be substantially different than numbers based on today's asset values.

If the Committee requires any additional information, please contact me.

Sincerely,

Ginger Blaisdell

Violent Crimes Compensation Board

"Alaskans proudly serving Alaskans"

These words symbolize our commitment at the Alaska Department of Administration to provide consistent, efficient support services to State agencies so they may better serve all Alaskans.

Many of our department's services are quite familiar to Alaskans. However, the Alaska Department of Administration also fills a vital role in providing a broad spectrum of support services to state government.

We prepared this brochure so Alaskans have a convenient reference guide summarizing all of the services, telephone numbers, and email addresses for the 13 divisions in our department.

I would appreciate receiving your comments on the work of the Department of Administration. You may use the form attached to this brochure or contact me by telephone or email.

Commissioner
Annette Kreitzer

Annette Kreitzer

Benefits

These contracts provide significant savings that your entity may not be able to otherwise achieve through its normal contracting activities:

- **Great pricing** based on the State of Alaska's purchasing power
- **Multi-state contracts** that leverage the combined purchasing volume of many states
- **Avoid the time and expense** of contracting for these same goods and services yourself
- Most cooperative contracts allow **payment by credit card**
- State contracts include the latest and greatest goods and services at **discount prices**. We contract for the good stuff!

HUGE SAVINGS!

$$$$$$$$

HERE ARE JUST SOME OF THE STATE CONTRACTS THAT ARE AVAILABLE FOR USE BY CITIES, BOROUGHS, SCHOOL DISTRICTS AND OTHER POLITICAL SUBDIVISIONS:

Computers and Peripherals
Copiers
Industrial Supplies
Pharmaceuticals
Radios
Office Supplies
Fuel
Software
Hospital and Lab Supplies
Tires/Vehicle lifts
Vehicle Purchases
Fax Machines
Aircraft Charters
Paper

http://polisubs.alaska.gov

DOES THE STATE CHARGE A FEE?

No, the state does not charge or collect any fee for the use of these contracts.

WHAT IF I'M NOT SURE IF MY ORGANIZATION IS ELIGIBLE?

Contact the Division of General Services (DGS). A DGS Contracting Officer will work directly with you to determine eligibility. All State of Alaska political subdivisions may use these cooperative contracts, including cities, boroughs, school districts, and Rural Educational Attendance Areas (REAA).

ABOUT THE USE OF STATE CONTRACTS...

AS 36.30.700 allows the State of Alaska to make these contracts available for use by:

- Cities, Boroughs, School Districts;
- Alaska Court System, University of Alaska, Legislative Branch; and
- "Local public procurement unit", which means a municipality or other subdivision of the state or other entity that expends public funds for the procurement of supplies, services, professional services, and construction (ref. AS 36.30.790).

How do I order from a particular contract?

Each contract has specific ordering procedures included on DGS' Cooperative State Contracts web site. Follow the terms, conditions and ordering procedures of each particular contract.

What if I have additional questions about the use of state contracts?

Contact DGS Contracting Officer Jason Soza at:

(907) 465-5682

OR

jason.soza@alaska.gov

WHAT ELSE SHOULD I KNOW

Check with your organization's procurement expert to determine whether your public entity's rules, policies, or purchasing ordinances, allow you to use these contracts. All contracts were established by the state in accordance with AS 36.30 – the State Procurement Code.

In general, contract prices represent the purchase of a single item. We encourage users to negotiate lower prices for larger purchases.

All of the contracts are "non-mandatory" for use by state political subdivisions. However, some of the contracts may include a "mandatory use" clause that only applies to state Executive Branch Departments.

More information and a list of available contracts can be found at:

http://polisubs.alaska.gov

Administration & Support RDU Total	***$6,926.7***

Department of Corrections
FY 2010 Governor's Request Changes (Increases / Decreases)
Administration and Support RDU

Office of the Commissioner:

Remove OTI Authorization for Evidence Based Study ($50.0) ($25.0 GF / $25.0 MHTAAR)

Delete one-time item received in FY2009 for study of evidence-based options to lower crime and corrections costs in Alaska.

Information Technology MIS:

Establish Federal Authorization for Statewide Automated Victim Information and Notification Programs Grants $183.9

The Department of Corrections (DOC) is requesting authority to receive and expend funding from the United States Department of Justice, Office of Justice Programs, Bureau of Justice Assistance's FFY2008 Developing and Enhancing Statewide Automated Victim Information and Notification (SAVIN) grant. The SAVIN grant assures victims of crime receive accurate and timely information regarding the status of offenders and events related to their case and enables victims participation in the process and the ability to make well-informed personal decisions.

The Department of Corrections will use this SAVIN grant award to enhance Alaska's existing statewide automated VINE system by adding photos which will allow for a more positive visual identification and verification of the offender. SAVIN also provides one more method to assure that a victim's rights to information and notification are being upheld.

Trin/Trout of 3 PFT's with funding from Institutions $235.5 GF

Transfer of three positions with funding currently located within Anchorage Correctional Complex, Spring Creek Correctional Center and Wildwood Correctional Center. This request transfers these positions from the institutions to the Information Technology MIS component. These transfers will provide institutional information technology support from a centralized Department Information Technology component.
$83.0 GF and PCN 20-7663 Micro/Network Tech I/II from Anchorage Correctional Complex
$75.4 GF and PCN 20-8013 Micro/Network Tech I/II from Spring Creek Correctional Center
$77.1 GF and PCN 20-5215 Micro/Network Tech I/II from Wildwood Correctional Center

Research and Records:

Replace the Imaging Program OTI funding $180.0

The Department is requesting replacement of the File Imaging Program in FY2010 by decrementing the FY2009 One-Time-Item (OTI) and replacing as an increment request for establishment into the base budget of the Research and Records component. This request will continue the on-going records imaging management process.

The amount of boxes sent for storage and imaging has continuously increased even as boxes are imaged and purged. Once all the boxes of existing criminal and medical records in storage are imaged it will be necessary to maintain this funding to continue support of the program to keep up with imaging new boxes that are received rather than maintain hard copies. Continuing the imaging of these records will reduce the amount of storage space required for these boxes and results in increased efficiencies and in cost avoidance for future storage requirements within the Department.

Structure Changes:

The Correctional Academy and the Prison System Expansion Components are being transferred out of the Administrative Support RDU and to the Population Management RDU.

Department of Corrections
FY 2010 Governor's Request Changes (Increases / Decreases)
Population Management RDU

Out-of-State Contractual:

Arizona Contract Bed Rate Increase $381.1 GF

The Department is requesting additional funding to meet increased per day bed costs for the Arizona Contract Facility. The FY09 bed rate is currently $61.63 per prisoner per day with an anticipated average prisoner population of 900.

Offender Habilitation Programs:

Move Substance Abuse Treatment ($2,017.7) and the Sex Offender Treatment ($2,193.9) Programs from Offender Habilitation Programs to Inmate Health Care

The Department of Corrections (DOC) long-range goal is to provide comprehensive, integrated medical, mental health, substance abuse treatment services, and behavioral modifications both within correctional facilities and as a central component of corrections-community linkages.

The relationships between behavioral health (mental health and substance use) disorders, behavioral modification (sex offender), and physical health disorders (general health care) are connected and should be budgetarily co-located. This assists the DOC's phased and ongoing efforts to isolate and identify the true costs that go to serve this special needs population.

The Department proposes moving the Substance Abuse Treatment and Sex Offender Program out of the Offender Habilitation Programs component, Population Management Results Delivery Unit (RDU) to the Inmate Health Care RDU. The Offender Habilitation Program Component will continue to have the Educational Program Services and the Chaplain Program Services neither of which can be classified behavioral health programs.

Various Institutions:

Fuel/Utility Cost Increased Funding Distribution for 24-hour Facilities - One-time Item Reduction ($1,760.0)

Delete the FY09 one-time fuel/utility cost increase funding distribution from the Office of the Governor that was made pursuant to sec. 19(a) - (d), ch. 27, SLA 2008, pages 75 - 78.

Various Institutions:

Trin/Trout of 3 PFT's with funding to Information Technology MIS $235.5 GF

Transfer of three positions with funding currently located within Anchorage Correctional Complex, Spring Creek Correctional Center and Wildwood Correctional Center. This request transfers these positions from the institutions to the Information Technology MIS component. These transfers will provide institutional information technology support from a centralized Department Information Technology component.
$83.0 GF and PCN 20-7663 Micro/Network Tech I/II from Anchorage Correctional Complex
$75.4 GF and PCN 20-8013 Micro/Network Tech I/II from Spring Creek Correctional Center
$77.1 GF and PCN 20-5215 Micro/Network Tech I/II from Wildwood Correctional Center

Anchorage Correctional Complex:

Fund Change from Federal Receipts to General Funds $12.9

Correct Unrealizable Fund Sources in the Salary Adjustment for the Existing Bargaining Unit Agreements.

The number of incarcerated prisoners in the department's custody has become stable, however, the number of federal prisoners housed by the department is still anticipated to decline. This reduction in the number of federal prisoners housed as well as the number of days held in the Department's custody has previously resulted in the decrease of realizable federal receipts. Many of the facility costs are static and General Funds are needed to provide funding for daily operations.

Goose Creek Correctional Center:

Transfer 2 PFTs with funding from Prison System Expansion $218.6

Transfers of the Physical Plant Manager and Assistant Correctional Superintendent from the Prison System Expansion to the Goose Creek Correctional Center. The Goose Creek Correctional Center is anticipated to open in FY2012. These positions are essential in assisting in the planning, development and design of this new facility.

Probation & Parole Director's Office:

Fund Change from Inter-Agency Receipts to General Funds $2.0

Correct Unrealizable Fund Sources in the Salary Adjustment for the Existing Bargaining Unit Agreements.

Inter-Agency Receipts are received through a budgeted Reimbursable Services Agreement (RSA) with the Department of Public Safety to support a Criminal Justice Technician position for Victim's Services. Increased funding for this position requires approval by the Board of Victim's Services through the Department of Public Safety.

Community Jails:

Remove OTI FY09 funding for Community Jails contract review ($45.0) GF

Delete one-time item received in FY08 (SB256 (Ch 11) Sec 24(a) Pg 103 Ln 4) for the Department to establish a professional services agreement with an independent contractor to assist in completing a Community Jails Review to ensure a balanced distribution of funding is allocated on an equitable basis within the community jails program.

Community Residential Center Facilities:

Increase Community Residential Centers by 43 contract beds $719.2 GF

Increase Community Residential Centers (CRC) contracts by 43 regular beds to assist in managing the in-state offender population. These beds provide a viable alternative to institutional "hard" beds and allows an offender to be monitored within the community. This also gives the offender the opportunity to be employed, meet family and financial obligations, and is a source for reintegrating offenders back into society.

Structure Changes:

The Correctional Academy and the Prison System Expansion Components are being transferred out of the Administrative Support RDU and to the Population Management RDU.

Establish the Goose Creek Correctional Center component.

Inmate Health Care RDU

Inmate Health Care:

Eliminate FY09 OTI Mental Health Trust Authorization ($333.0)

Delete all MHTAAR funding from base funding received through FY2009 MH Trust recommendation.

Mental Health Trust Disability Justice – APIC Model $210.0 MHTAAR

The MH Trust: Dis Justice - Implement Assess, Plan, Identify, Coordinate (APIC) model connects the Trust beneficiary offenders re-entering the community to appropriate community behavioral health services and when appropriate, prior to release applies and receives prior authorization for SSI/Medicaid benefits for the beneficiary offender. This project will be managed by the Mental Health Release Programs Coordinator, with some funding disseminated to behavioral health grantees through contract agreements.

This project maintains a critical component of the Disability Justice Focus Area plan by proactively engaging the community treatment provider with the soon-to-be-released offender, so a plan is developed and secured for the offender to transition into once released from Department of Corrections (DOC) custody, thus decreasing the risk of recidivism and the associated high costs of care within the correctional setting. DOC staff will be collecting data on how funding is being utilized to save correctional costs, number of beneficiaries served, and the number of beneficiaries qualified, pre-release, for SSI/Medicaid.

This project was funded in FY09 with $210.0 MHTAAR and $239.0 GF/MH. In FY10 The Trust will maintain the partnership with DOC and the momentum of effort in this project with a MHTAAR investment at $210.0.

MH Trust: Dis Justice - Corrections Mental Health Clinical Positions $164.0 MHTAAR

Beginning in FY08 the Trust in partnership with the Department of Corrections, focused on increasing mental health clinical capacity within their correctional facilities. As part of this partnership funding was secured in FY09 for a mental health clinician at the Wildwood Correctional Center in Kenai. Currently there no on-site mental health staff at the Yukon-Kuskokwim Correctional Center in Bethel. Thus, mental health screenings are done by medical staff and those identified as having mental health needs are seen via telemedicine clinic on a weekly basis. As part of the Department-wide expansion, an additional 68 beds will be added to accommodate the facilities' growth. Adding a Mental Health Clinician staff to better assist those with mental health disorders in Bethel and other identified facilities is a critical need.

Mental Health Service Programs $444.8 PFD

Increase Mental Health Services to meet the increase in beneficiaries that have been committed to the custody of the department.

The Department of Corrections (DOC) processes approximately 38,000 bookings annually. Nearly 14,000 of these bookings have a mental health diagnosis. Mental Health staff are providing services for approximately 100 - 120 new patients each month who had previously been unidentified as having mental health diagnosis. This funding will provide staffing to meet the increased offender population with mental health issues.

Move Substance Abuse Treatment $2,017.7 and the Sex Offender Treatment $2,193.9 Programs from Offender Habilitation Programs to Inmate Health Care

The Department of Corrections (DOC) long-range goal is to provide comprehensive, integrated medical, mental health, substance abuse treatment services, and behavioral modifications both within correctional facilities and as a central component of corrections-community linkages.

The relationships between behavioral health (mental health and substance use) disorders, behavioral modification (sex offender), and physical health disorders (general health care) are connected and should be budgetarily co-located. This assists the DOC's phased and ongoing efforts to isolate and identify the true costs that go to serve this special needs population.

The Department proposes moving the Substance Abuse Treatment and Sex Offender Program out of the Offender Habilitation Programs component, Population Management Results Delivery Unit (RDU) to the Inmate Health Care RDU. The Offender Habilitation Program Component will continue to have the Educational Program Services and the Chaplain Program Services neither of which can be classified behavioral health programs.

Substance Abuse Program Increase $500.0 GF
Increase Substance Abuse Treatment Program services to provide Institutional out-patient treatment for incarcerated offenders located at Anchorage Correctional Complex and the Anvil Mountain Correctional Center. All participants will have aftercare plans when they are released into the community.

Out-patient (Institutional) Substance Abuse Programs are continuous (or open-ended) intensive treatment for a duration period of 3 to 4 months. All participants will have aftercare plans when released back into communities.

In FY09, the Department received an increment of $801.0 for inpatient treatment. This funding implements five intensive outpatient treatment programs beginning with Spring Creek Correctional Center, Palmer Correctional Center, Fairbanks Correctional Center, Yukon-Kuskokwim Correctional Center, Lemon Creek Correctional Center, and the Anchorage Community Residential Treatment Centers.

Sex Offender Treatment Increase $200.0 PFD
This funding will increase the Sex Offender Treatment Program for institutional programming within the Wildwood Correctional Center, beginning with Level I (Basic) treatment programs. This will enhance community safety because more offenders will receive intensive assessment and treatment prior to release.

Services in the Level 1 program would include offense-specific assessment and psycho-educational programming on basic sexual offending issues. Offense-specific treatment will be offered in an individual and group setting and therapists will work with probation officers to develop appropriate safety plans for offenders who are releasing. Offense-specific assessment and treatment focuses on issues that are directly related to sexual offending. This differs from general mental health counseling that is not related to the risk of re-offense.

Continue 4th year of Fiscal Note for Criminal Sentencing & Polygraph (SB218) $485.3 PFD
This request continues funding from the fiscal note for SB 218 Criminal Sentencing and Polygraphing in the Offender Habilitation Programs component.

SB 218 requires regular periodic polygraph examinations of all sex offenders releasing on probation or parole following the effective date of July 1, 2007. Regular periodic polygraph examinations used in conjunction with community sex offender treatment and sex offender specific supervision, often referred to as the Containment Model, is best practice in the field of sex offender management.

The fiscal impact on Offender Habilitation Programs will be phased in over a three year period beginning in FY08 as offenders gradually are released with the new parole/probation conditions.

Department Overview

New Mission Statement: We provide secure confinement, reformative programs, and a process of supervised community reintegration to enhance the safety of our communities.

Corrections Team:

- Dwayne Peeples, Deputy Comm:
  - Administrative function oversight department wide
  - Supervises medical function
  - Oversees departmental budget
  - Based in Juneau
- Sam Edwards, Deputy Comm:
  - Operational oversight department wide
  - Supervises population management
  - Oversees Arizona contract facility
  - Based in Anchorage
- Three Divisions:

Division of Institutions	Director Garland Armstrong
Division of Probation and Parole	Director Donna White
Division of Administrative Services	Director Leslie Houston

- Unified Department, pre-trial and sentenced prisoners. One of six states
- Twelve Institutions with a total of 3604 General Cap, and 3604 Emergency Cap
- Thirteen Probation Offices currently supervising 5940 Offenders
- Fifteen contract jails with 153 beds
- Seven Community Residential Centers with 753 beds
- Seven contract treatment centers with 26 beds
- CCA is holding 885 prisoners in the Red Rock facility in Arizona
- Electronic Monitoring program is currently supervising 184 offenders

Works In Progress

- Staffing review: ensuring staff are working where they are budgeted (Truth in Budgeting)
- OSHA respiratory protection program

Challenges

- Aging facilities; All are 18 or older (except ACC)
- Inmate Health Care

Alaska Department of Corrections

FY2011 thru FY2019 Anticipated Long Range Plan:

The Department of Corrections (DOC) is undergoing a full review and long-range analysis of its population management for the future years. This includes examining the current use of all facilities.

The department is appraising each institution for potential expansion, rehabilitation, or replacement. Many of the state facilities are aging and deteriorating. Funding for annual maintenance and repairs has not matched the pace of inflation and deterioration. This has placed the DOC in the position of responding and directing funds to the most urgent of repair needs associated with life, safety, and health.

A report prepared for the DOC by the University of Alaska, Institute of Social Economic Research providing a forecast in growth in Alaska's populations and prison expenditures is due for release in February, 2009. The department will use this report in its review and analysis to evaluate the potential for expanding prevention and intervention programs that will generate a cost-savings, curb prison growth, and continue to reduce crime in the State of Alaska.

The state's inmate population has grown dramatically over the years with increases in mental illness, chronic disease, and health issues associated with geriatrics. This represents a significant challenge for the department. In developing our long range plan, the department will consider a means of providing cost effective services for this special needs population.

The department's long range plan is to continue to address population management, rehabilitation and mental health services, and offender supervision. This includes statewide:

- Institutional bed capacity and community-based services
- State owned Facility Maintenance and Repairs
- Institutional-based offender habilitation programs
- Mental health services to meet the offender population diagnosed with mental health issues

1. Baseline wage and benefit increases are handled in the statewide spreadsheet.

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond

Operating - Out years include increases to maintain existing services and meet contractual obligations. The DOC's Planned Expansions have been removed from this information pending revisions and updates to meet the changing offender population.

Capital - Current Appropriations include all departmental capital projects. This includes Deferred Maintenance and Information Technology items and excludes any costs associated with the Expansion Projects. A capital/construction inflation factor of 2.9% was used for FY16-FY19 and excludes any capital/construction costs associated with the DOC's Expansion Plans.

Corrections

House Finance Committee
January 30th 2009
Department of Corrections

FY2009 Status update:

Commissioner's Office - $50.0 for Evidence Based Study to Lower Crimes in Alaska
The department entered into a Reimbursable Service Agreement (RSA) with the University of Alaska / Institute of Social and Economic Research (ISER) to begin the study. The final report is expected by February, 2009.

Offender Habilitation Programs - $801.0 Institutional Substance Abuse Treatment Program
The department received ¾ of the annual operating funding to implement Institutional Out-Patient programs intended for short-term offenders. The 5 contracts have been awarded to serve: Fairbanks Correctional Center, Lemon Creek Correctional Center, Spring Creek Correctional Center, Yukon-Kuskokwim Correctional Center, and the Anchorage Community Residential Center.

Offender Habilitation Programs - $470.3 Criminal Sentencing & Polygraphing
Contracts where implemented in October 2008 for the Bethel Community Residential Center and the Bethel Community Sex Offender Treatment Program. Existing contracts were amended to include the Palmer, Sitka and Ketchikan areas.

Institutions - $1,853.9 Vacancy & Turnover Elimination
The department continues in its efforts of recruitment. Currently there are 25 total vacant PCNs within the 24 hour facilities of which 15 are Correctional Officers. It is anticipated to have these position filled by June 2009.

Wildwood Correctional Center - $1,417.2 Building Conversion for 80 Bed Offender Housing Units
This project involves two buildings and both buildings have been abated of asbestos and the architectural designs are near completion. The anticipated timeframe for these beds to become available is late spring or early summer of 2009.

The department also received $1.1 million to cover ¾ of FY09 operating costs of the new housing units. The $1.1 million is being maintained in the FY2010 base, and an increment for $353.3 (for ¼ year operating costs) will not be requested. Instead, the Department is maintaining the $302.2 one-time item, leaving it in the base budget as a substitute for the $353.3 increment that was expected. The DOC intends to manage the new units at the requested funding level.

Community Jails - $45.0 Jail Oversight Contract
Funding was received to meet the Legislative Audit recommendation to establish a professional services agreement with an independent contractor to assist the department in its endeavor to assure that an equitable distribution of funding is allocated within the community jails program. The department is currently working with the contractor on the scope of work for the project.

Inmate Health Care - $246.0 Mental Health Services
Additional funding was received to support existing staff to continue providing Mental Health Services such as: Community based case management within the Anchorage Area; Expanded the men's Mental Health Services to meet the Chronic Mentally Ill (CMI) at the Anchorage Correctional Center and; Dual-diagnosis release planning at the Wildwood (men's) and Hiland Mountain (women's) Correctional Centers.

FY2010 Budget Highlights:

Offender Habilitation Programs - $500.0 Institutional Substance Abuse Treatment Program

This request provides funding for the second year of expansion of the institutional outpatient treatment programs. This increment would implement two institutional outpatient treatment programs at Anchorage Correctional Complex and Anvil Mountain Correctional Center.

Offender Habilitation Programs - $485.3 Criminal Sentencing & Polygraphing

This represents the third year of funding associated with the passage of legislation relating to periodic polygraph testing and treatment of all sex offenders on probation or parole [Ch 14 SLA06 (SB 218)]. Previous appropriations for these activities total $786.8 GF in FY08 and $752.5 GF in FY09.

Offender Habilitation Programs - $200.0 Sex Offender Treatment

The department is requesting funding to establish an institutional sex offender treatment program within the Wildwood Correctional Center. The sex offender treatment program will enhance community safety by providing more offenders with intensive, offense-specific assessment and treatment prior to release.

Community Residential Center - $719.2 Increase 43 regular beds

43 regular beds have been added to assist in managing the in-state offender population. These beds are being partially funded in FY2010 with $500.0 authorization from the Electronic Monitoring Unit.

Out of State Contractual - $381.1 Bed Rate increase

Annual bed rate increase negotiated with the Corrections Corporation of America for contract prison space in Arizona. The current FY2009 bed rate is $61.63 with the anticipated FY2010 bed rate to be $62.86 per prisoner per day with an anticipated average prisoner population of 900.

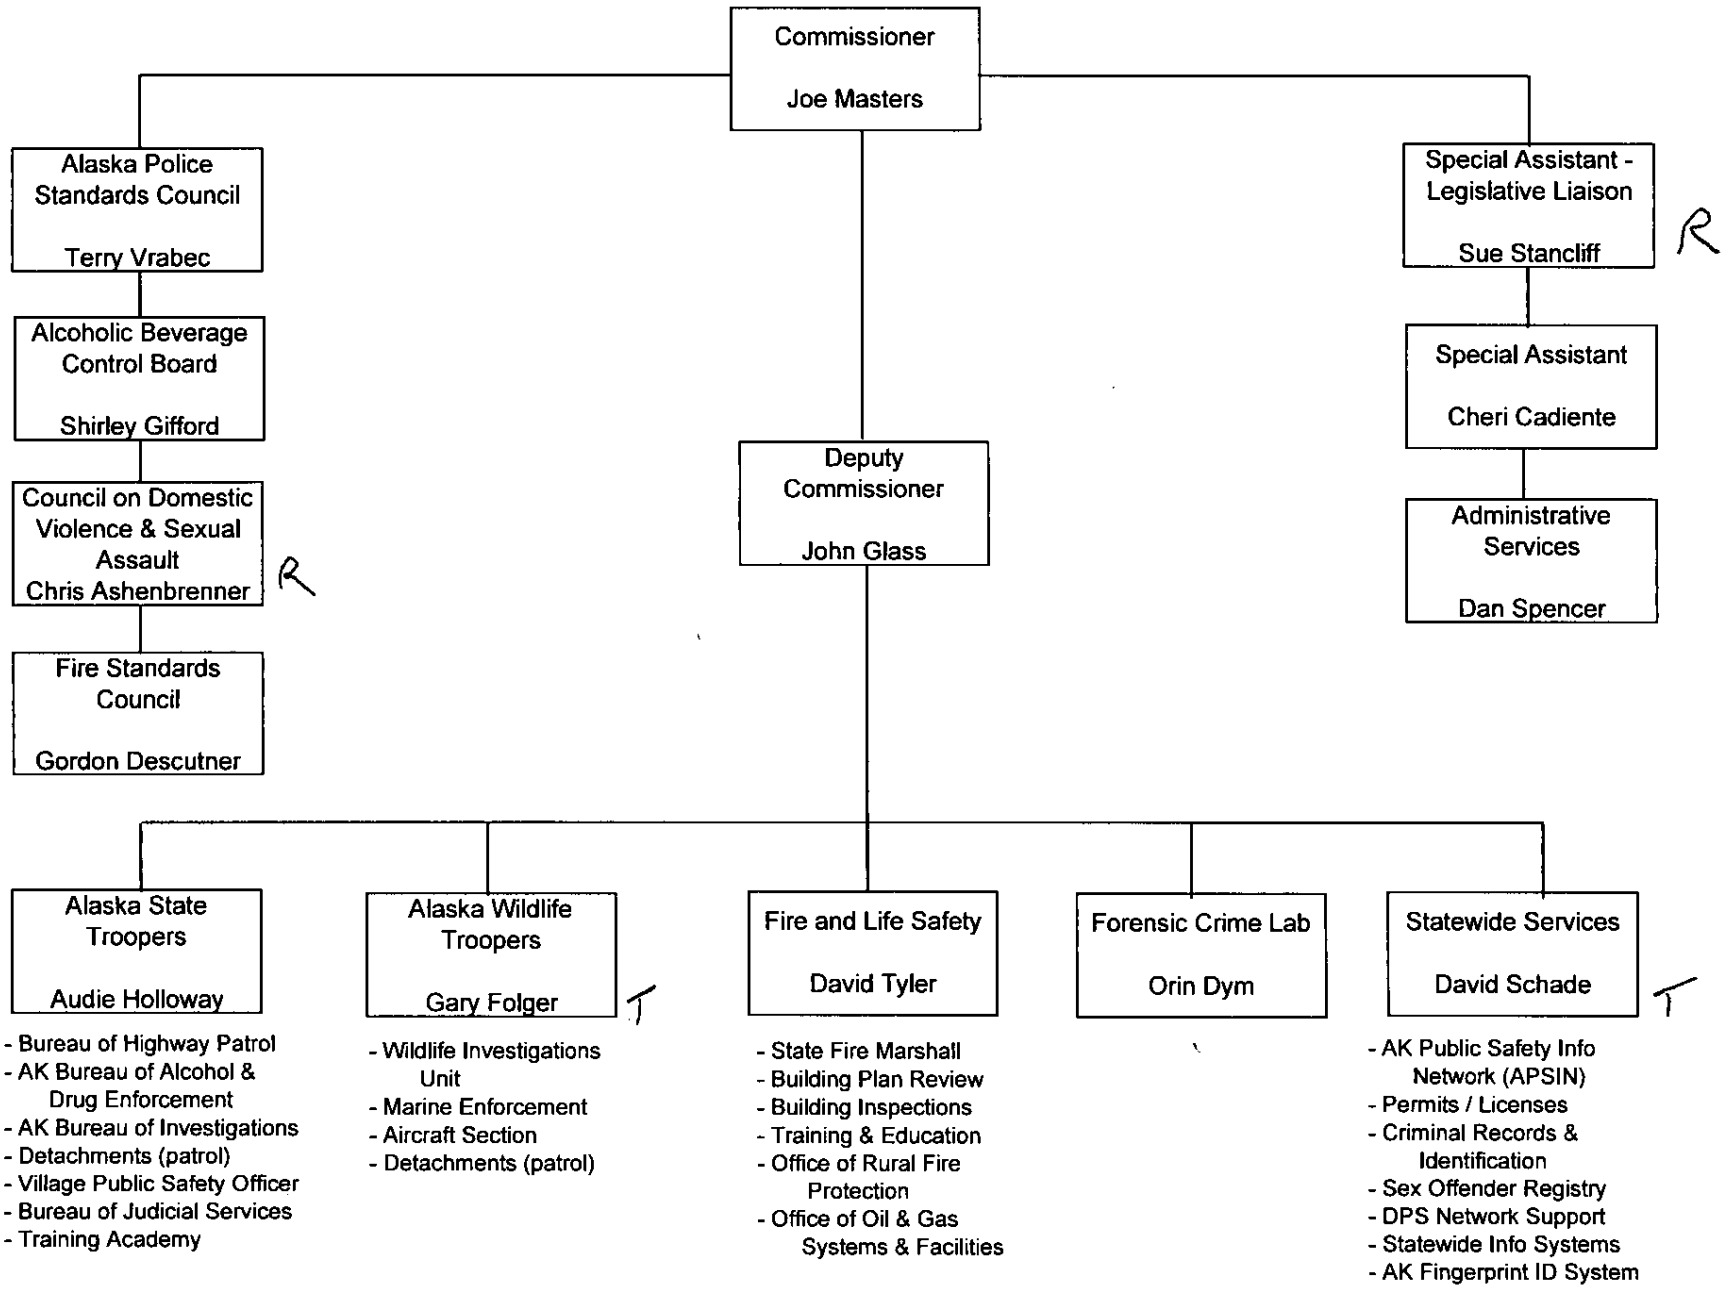
Inmate Health Care - $444.8 Mental Health Services

Additional funding is requested to support the increase in Mental Health Trust beneficiaries committed to the custody of the Department. Of the 38,000 bookings processed annually by DOC, 14,000 have a mental health diagnosis.

Structure Change –

Established Goose Creek Correctional Component in preparation of the anticipated opening in FY2012.

Department of Public Safety
January 30, 2009



2

Department of Public Safety
Selected 2008 Accomplishments

Alaska State Troopers
- 13 Homicides in 2008, 100% solved
- 72 open cold cases, 29 closed, continued progress

Alaska Wildlife Troopers
- 58,584 Resource user contacts
- 8.5% Violation to contact rate

Village Public Safety Officer
- 238 Domestic violence and assault arrests - up 51%
- 57 Driving under the influence arrests - up 63%

Fire and Life Safety
- 1,543 Facility inspections (143% increase) compliance @ 35%.
- 1,024 Building plan reviews (20% increase)

Statewide Services
- 2,458 Registered Sex Offenders, 107 non-compliant
- 7,802 Active Concealed Handgun permits

60,000 fingerprint

Crime Lab
- Filled 10 lab vacancies, fully staffed for first time since 2002
- Case backlog reduced 24% currently 600

State of Alaska
Department of
Public Safety

Sarah Palin, Governor
Joseph A. Masters, Commissioner

January 29, 2009

The Honorable Bill Stoltze, Chair
Public Safety Subcommittee
House Finance Committee
State Capitol, Room 515
Juneau, AK 99801-1182

Dear Representatives Stoltze:

During the January 22, 2009 House Finance Public Safety Subcommittee hearing, a number of questions were asked relating to the Department of Public Safety's (DPS) operating budget. Our responses follow:

Several questions were posed asking about DPS' recruitment efforts generally, and more specifically how these efforts are directed toward the military. Attached is a paper discussing those efforts. I hope it will provide the information you need.

Another questioner asked for statistics on the Drug Abuse Resistance Education (D.A.R.E.) program. D.A.R.E. Alaska, Inc., is a private non-profit organization. DPS employees administer federal funds used for D.A.R.E. officer training.

During the 2007-2008 school year, 70 D.A.R.E. officers from 20 police agencies taught D.A.R.E. curricula to 5,108 students in 57 elementary, middle, and high schools throughout the state. During October 2007, a two-day in-service was held to provide ongoing training for D.A.R.E. officers. Twenty-five certified D.A.R.E. officers attended the in-service, receiving training for additional supplemental lessons, the new community program, and enhanced training on a variety of topics that the D.A.R.E. officer deals with such as Internet safety. In December 2007, D.A.R.E. Alaska, Inc. hosted the Alaska Student Safety Summit, which provided critical information and skills for attendees. This two-day conference was attended by one hundred and fifty D.A.R.E. officers, police officers, educators, community based treatment providers, and

Office of the Commissioner
5700 E. Tudor Road – Anchorage, AK 99507 – Voice (907) 269-5086 – Fax (907) 269-4543
Juneau Office – Voice (907) 465-4322 – Fax (907) 465-4362

community and youth leaders. Evaluations of the speakers and the conference as a whole were very positive with many requests to continue to host the conference. In February 2008, 20 new D.A.R.E. officers graduated from the two-week D.A.R.E. Officer Training. Nine of the graduating D.A.R.E. officers were VPSOs who will be taking the program back to their communities. The D.A.R.E. program saw a decrease in the number of students that were taught during the 2007-2008 school year from six percent to four percent. This could be related to a number of differing factors, including officers moving to new positions, some larger schools not receiving the program due to construction, and several officers not responding to the request for surveys. There was a 29 percent increase in the number of certified D.A.R.E. officers statewide, a 12 percent increase in D.A.R.E. police agencies, a 29 percent increase in the percentage of school districts with the D.A.R.E. program, and a 59 percent increase in communities that have adopted the D.A.R.E. program.

Do VPSO training programs differ around the state? All VPSOs attend the same basic training at the department's Sitka training academy. Each year, regional training sessions are held, bringing in the VPSOs in that geographic area to a regional hub. Essentially, the regional trainings are consistent as it pertains to insuring all the necessary re-certification needs are met and continued training in DPS lead courses, such as Defensive Tactics, Report Writing, Crime Scene Investigation, EMT, Fire Training, Probation and Parole, DUI Enforcement, SAR/ICS, Domestic Violence, etc. The various regional non-profits also include training that is specific the non-profit corporation's policies and procedures, i.e., risk management, sexual harassment, regional Indian Child Welfare Act issues, etc.

Please call if you have additional questions.

Sincerely,

Joe Masters, Commissioner

DPS Military Recruitment Efforts

The Department of Public Safety, Alaska State Troopers, has a long history of recruiting military veterans and being active in the Guard and Reserve. This partnership is natural in part due to the paramilitary atmosphere of the Alaska State Troopers and the search for highly independent, disciplined, and ethical public service orientated men and women with adventurous spirits.

The department has employed members who have served at nearly all levels of the armed forces in all branches, including the Guard and Reserve. Currently, the Command Sergeant Major of the National Guard is a former Alaska State Trooper captain who retired from DPS to accept the highest-ranking enlisted position with the National Guard.

The department's historical recruitment efforts have focused on the "separating" active duty personnel as these veterans are often preparing to enter the civilian workforce and are searching for career opportunities. Guard and Reserve members generally have civilian careers and/or live in communities with ties that discourage them from joining the Alaska State Troopers, who often require them to move from their communities. It is, however, common for commissioned troopers to join their local National Guard and Reserve Units so they can enjoy the benefits of the Guard and Reserve programs.

Recruiting the Military

The Alaska State Troopers recruitment efforts have had a constant military focus. Currently, the department employs a significant percentage of military veterans. DPS provides a military preference in that all honorably discharged military veterans are offered an interview during the background portion of the application process.

The department recruitment unit attends several out-of-state military career fairs every year. DPS advertises with the Marine for Life program, Vet Jobs publications, Hire a Vet publications, G.I. Jobs, the Elmendorf and Ft. Richardson Newcomer's Guide, and all statewide Veteran Job Fairs and Army Career and Alumni Program (ACAP) events. The department also participates in the U.S. Army Partnership for Youth (PaYS) Program.

In addition, the DPS Academy has been approved by the Alaska Department of Military and Veterans Affairs (DMVA) Office of Veterans Affairs to allow military veterans to receive their G.I. Bill benefits while attending the academy and during the 15 week Field Training and Evaluation Program.

The department staffs a recruitment booth and display during the Military Appreciation Day at the Dimond Center in Anchorage as well as Arctic Thunder Air Show on Elmendorf Air Force Base.

Frequently throughout each year, the military asks for troopers to present information during their Safety Day Training, and during those presentations, trooper recruitment is highlighted. The department also attends venues to address separating military personnel from all the

installations, whenever the opportunity is presented. These events occur both in Anchorage and in Fairbanks.

Alaska National Guard and Reserve

Historically, current troopers who are also members of Alaska's Guard and Reserve have maintained themselves as informal liaisons with their Guard and Reserve counterparts, encouraging their peers to consider the Alaska State Troopers as a civilian career. These troopers have the advantage of working along side potential applicants and can provide valuable "real life" considerations for Guard members to consider.

The department recruiter has begun working with the Alaska National Guard recruitment commander discussing joint advertising and exploring the option of a "joint career track" between the Alaska State Troopers (civilian occupation) and the National Guard Military Police (Guard Service). In part, this concept may allow an "under 21" National Guard member to undergo the criminal background check for the Alaska State Troopers and if acceptable, attend the DPS Training Academy. At the conclusion of the Academy, the member could be hired into a non-commissioned position and secure employment with DPS with the anticipation that the employee promotes to trooper after reaching the age of 21. This would allow the department to mentor and train the young employee while providing them with a solid career path, and at the same time, they participate in Alaska's National Guard.

DPS has formalized a group of troopers whose heritage comes from Alaska Native communities from around the state. These troopers are focusing on recruiting Alaska Natives and building bridges between the department and native organizations statewide. In addition, this group will solicit interest from those National Guard and Reserve members who are currently residing in "Bush" Alaska.

Periodically throughout the year, the department attends meetings with ESGR (Employee support for Guard and Reserve) to discuss veterans' issues, strategize opportunities for returning military members, and the services we can provide those members.

Recruitment Enhancements

Staff Realignment

Currently the recruitment section staff consists of a Lieutenant, a Criminal Justice Technician, an Administrative Clerk II, and five background investigators. A vacant Corporal PCN is being upgraded to Sergeant and will be assigned to recruitment. Additionally, a vacant Administrative Assistant position will be converted to a GGU employee assigned to recruitment to focus on VPSO recruitment and background investigation.

Alaska National Guard and Reserve

Historically, troopers who are also members of Alaska's Guard and Reserve have maintained themselves as informal liaisons with their Guard and Reserve counterparts, encouraging their

peers to consider the Alaska State Troopers as a civilian career. Additionally, discussions with the Alaska National Guard recruitment commander have begun, discussing joint advertising and exploring the option of a "joint career track" between the Alaska State Troopers (civilian occupation) and the National Guard Military Police (Guard Service). Discussions and options are ongoing with particular interest in rural Alaska.

Alaska Native State Trooper Recruitment Program

Nine Alaska Native State/Wildlife Troopers have been selected to staff this team. These troopers will travel singly or in teams to different parts of Alaska to speak specifically about the need to increase native recruitment numbers in the divisions of Alaska State and Alaska Wildlife Troopers. They will also speak at social events like high school graduations and at other high school and university functions to encourage young adults to maintain a lifestyle that would allow for future employment in law enforcement. This team would also be allowed to travel to events put on by Alaskan Native corporations, other Alaskan Native professional organizations, as well as tribal events. Prisoner trips and airline mileage rewards would augment travel costs where possible.

Female Alaska State Trooper Recruitment Contract

A contract will be let for a retired female Alaska State Trooper to make recruitment trips to specific events aimed at increasing the numbers of qualified female recruits. The contractor would submit an overall plan and budget to the recruitment supervisor for approval. The contractor would provide generalized information and directions to large groups and would also seek out prospects with a high interest and stay in touch with those to provide encouragement and assistance during application.

Alaska State Trooper Ambassador Program

Troopers will be given the opportunity to submit a written plan to the recruitment supervisor that outlines a specific recruitment trip in which they have a personal interest. This may be a return to a hometown, a previous employment location, a university alma mater, etc. The troopers selected would bring a personal touch and personal interest to this effort, thus providing a greater chance for success. Each submission would be reviewed by headquarters command staff. AST would offset the cost of travel by using prisoner trips and airline mileage rewards where possible. The troopers who take these trips will be required to focus on a select few applicants that are really interested and have a true potential to succeed through the hiring process. The troopers would stay in touch with the prospects to maintain encouragement.

D.P.S. Recruitment Enhancements

- Opened recruitment to out-of-state applicants, 2005
- Establish $100,000 budget for advertising/recruitment programs, 2005
- Discontinued use of out-of-date written exam
- Finished the new recruitment website, 2006
- Integrated to Workplace Alaska by fall, 2007
- Open lateral hires to out-of-state police and troopers, 2007

- Increased moving allowance to include cost of transportation from point of origination to assigned duty station in Alaska instead of from Alaska border
- Increased outreach efforts (job, trade ,and career fairs) in all of Alaska
- Increased presence at military job fairs in Alaska, Washington, and San Diego
- Advertised with Career Builder.Com, Fish Alaska, Alaska Magazine, Alaska Airline Magazine, Military Guides
- Increased free advertising with Policeone.com, Officer.com, Craig's List
- Increased advertising in military venues
- Implemented Recruitment Incentives to PSEA members (leave award)
- Active with King Career Center, MatSu Career and Tech, Charter College, and UAA Criminal Justice Club
- Improved Lateral Hire process and Training program
- Updated Recruitment Display, VPSO banner, and incorporated DUI seized Caddie as a recruitment vehicle
- Updated and improved selection criteria for State Trooper Recruit, Court Service Officer, and Deputy Fire Marshal
- Increased advertising through "give-always"
- Increased background investigators by one
- Improved information passed on to applicants by the background investigators about "what it means to be an Alaskan State Trooper."
- DPS payment of Basic Police Certificate fee
- Improved follow-up with potential applicant questions

Proposed Projects

- Contract recruiter for female applicants
- Native trooper recruitment outreach program
- Assist lateral applicants with airfare and hotel costs for testing
- Host a co-operative Alaska law-enforcement summit/career fair
- Increase advertising budget
- College job fairs (Criminal Justice)
- "Troops to Trooper" concept with the National Guard
- Attempt to secure Advanced Step Placement for lateral hires
- Traveling AST recruitment Ambassador Program "Road Show"

Department of Public Safety

Presentation to House Finance Committee
January 30, 2009

FY 2009 Status Report

All trooper positions expected to be filled by July 1

- Expect 20 recruits in Academy starting next month
- Expect up to 12 lateral hires (from other police depts.)

Converted 7 trooper positions to Court Services Officer (CSO)

- Bethel (2), Nome/Kotzebue (2), Dillingham (1), Kenai (1), Anchor Pt. (1)
- Each new CSO frees up one trooper to return to law enforcement duties

VPSO update

- Salary increase in effect
- Still not all positions filled

New Crime Lab

- Land lease with Municipality of Anchorage near completion
- Validation study of design by DOT/PF contractor

FY2010 Budget Overview / Significant Changes

Operating Budget

- Budget request funds FY09 levels of service – no new initiatives
- Significant cost increases include adding the funding for the prisoner settlement with Municipality of Anchorage. Was inadvertently omitted from conference committee bill last session.
- Ongoing operations costs funded – previously covered by vacancy
- Small amount (50.5) for PSEA contract – uniform allowance omitted from monetary terms presented last year
- CDVSA grants increased by $1,677.9 PFD Criminal funds (forfeitures in lieu of dividends) – most of this will go directly to shelters

Capital Budget

- Recurring requests for facilities / aircraft / vessel maintenance and repairs
- Aircraft Hangar – $2.5 million to ensure enough funding prior to beginning – based on DOT/PF estimate
- APSIN $2.0 million to finish this multi-year redesign effort
- Smaller amounts to complete On-line Plan Review System and to ensure continuation of Alaska Law Enforcement Information Sharing System (ALEISS)

Department of Public Safety
Overview of 10 Year Plan

Note: The department will undertake a long range planning process during FY2010. Results of this effort will be reflected in the long range plan presented to the legislature next year.

Baseline Assumptions:

- Operating: FY 2009 level of service in FY2010 and beyond
  - All enforcement positions filled
  - No inflation adjustments
- Capital: Recurring routine capital outlay
  - Aircraft / vessel / facility maintenance at FY2010 cost
  - Periodic replacement / upgrades for short-life equipment
- Gas Line Initiatives:
  - No gas line initiatives
  - Impacts of gas line construction to be determined during planning process
- New Initiatives:
  - No new initiatives
  - Any new initiatives will be identified during planning process

Public Safety

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond

FY09 capital funding of $1,715.0 GF was deferred maintenance only, with the remainder of their capital appropriation funded from FY08 funds. FY08 capital: Leg Adds $12,025.0 GF, dept requests $15,637.0 GF and $5,000.0 fed for a total of $32,662.0.

Department includes usual annual appropriations in FY2009 baseline capital:
GF - $500.0 AST Law Enforcement Equipment, $475.0 AWT Law Enforcement Equipment, $100.0 Lab Equipment, $1000.0 Aircraft & Vessel Repair and Maintenance, $5000.0 APSIN Redesign.
FED - $2000.0 NMFS Patrol and Improvements, $2000.0 APSIN Redesign. $656.3 included in baseline OP GF for MOA prisoner transport supplemental omitted in error in conference committee bill.

FY2010 OP: Add operating requests as of 12/15/08.
FY2010 CIP: Add capital requests as of 12/15/08.
FY2011 OP: GF - increase amount needed for Illegal Drug/Alcohol Initiative to $606.4 for full year (netted out $126.5 in FY2010 budget); increase needed to fully fund VPSOs added at 50% in FY2009, $783.1; assume fill all commissioned PCNs at $4,000.0. Reduced CDVSA by $3660.2 one-time VAWA earmark.
FY2011 CIP: delete one-time FY2010 requests: $240.5 GF Phase II On-line Plan Review, $69.7 GF and $2430.3 AHFC Ph II Aircraft Hangar, $2000 GF APSIN Redesign.

HB81 - Operating Budget

HB83 - MH Budget

Overviews:

DEC

DNR

DFG

Department of Environmental Conservation
Overview of 10 Year Plan
January 29, 2009

UNKNOWNS

- Increases for inflation
- Bargaining unit increases besides the known GGU and SU increases in FY10
- Future cost of living allowances
- Future fuel distributions

BASELINE ASSUMPTIONS

- Non-formula programs were not adjusted for inflation.
- All years include an anticipated 1.875% increase in personal services to accommodate step increases and longevity increases.
- State statute providing $2,000,000 to support food safety inspections throughout the state will be approved in FY2010.
- Adoption of additional federal rules for public water systems from amendments to the Safe Drinking Water Act will occur and be funded in FY2013 ($500.0 GF and $500.0 Fed).
- FY09 Capital includes $135,000 General Fund Leg add-on for Dilution of Effluent Study.
- Mining is projected to increase 25% annually due to increasing metal prices and applications for mining permits will continue to increase. This is reflected as a 25% increase each year in I/A authority through FY19.
- The Federal appropriations for rural sanitation CIP projects will decline at a rate of $10 million per year until zeroing out in FY16. This decrease in funding is shown in the Baseline scenario under the Capital section. General Funds are included in the New Initiatives section to offset this decline in funding and maintain the Water Facilities program at its current funding level.

BASELINE RESULTS

Total Costs

- From FY09 to FY19 total Baseline costs decrease by 28.1%, largely due to the significant decline in Federal funding. However, when the total baseline appropriation is combined with Capital New Initiatives, total funding increases by 3.7% over 10 years. This is referenced on the attached "Environmental Conservation – All Funds" chart.

Operating Costs

Formula Programs – *DEC has none*

Non-formula Programs – *includes all RDUs and Components*

- Non-formula program costs increase by 5.8% over 10 years.

Capital Costs

- Capital Appropriations in the Baseline Budget shows a decline 52% over 10 years due to the significant decline in Federal funding to the Water program.
- Overall Capital Funding (Baseline and New Initiatives) will increase by a modest 2.4% over 10 years.

GASLINE ASSUMPTIONS

- Assumes AGIA startup in FY17. This includes AGIA only, and does not include affiliated projects (Bullet line or Alaska Natural Gas Development Authority).
- Assumes the following activities will be needed from DEC:
    - Air permits, monitoring and pre-construction review efforts. Food Safety & Sanitation, Drinking Water and Solid Waste permitting activity for pipeline camps during construction phase from FY15 to FY18. Construction of water and wastewater systems in temporary construction camps beginning in FY12 and increasing each year by 4% based on population growth as found on ADOL&WD's projection report during oil pipeline development in the 1970's. A 4% increase was determined by taking the average of the population growth trend during the construction period.
- All costs are for non-formula programs, which include: involvement in gas line legislation and permitting, AGIA startup and associated monitoring and permitting (see assumptions above), and Air Non-Point Mobile Source program conformity review for the FNSB in FY14 through FY16.

NEW INITIATIVES ASSUMPTIONS

- The Fugitive Dust project will be paid for using general funds absent any federal funds for three years with additional funds needed for compliance efforts after promulgation.
- Increased funding needed for increased monitoring of air quality with additional federal regulation implementation and adoption related to climate change and other environmental monitoring efforts.
- Federal appropriations for rural sanitation CIP projects will decline and will be completely expended and unavailable by FY16, as noted in the Baseline section. All but $500,000 of the Capital General Funds in New Initiatives will be used to replace the unavailable federal appropriations and maintain the current funding level.

1. Baseline wage and benefit increases are handled in the statewide spreadsheet.

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond

FY09 Capital includes: $135.0 GF Leg add on for Dilution of Effluent Study project #46852

Growth to the baseline budget includes the following assumptions:

- FY2010 includes the 3% negotiated COLA increase for GGU and SU employees.
- All years include an anticipated 1.875% increase in personal services to accommodate step increases and longevity increases.
- State statute providing $2,000.0 to support food safety inspections throughout state will be approved in FY2010.
- Adoption of additional federal rules for public water systems from amendments to the Safe Drinking Water Act will occur and be funded in FY2013 ($500.0 GF and $500.0 Fed).
- Federal appropriations for rural sanitation CIP projects will decline at a rate of $10 million per year until zeroing out in FY2016.

Assumption that State General Funds will replace federal appropriations to maintain an annual CIP total of $125.6 million.

- FY09 Capital includes: $135.0 GF Leg add on for Dilution of Effluent Study project #46852. Mining is projected to increase 25% annually due to increase in the metal prices.

We are seeing an increase in the mining permit applications. Federal Performance Partnership Grant has been decreasing and will impact starting from FY2011.

Describe department assumptions for initiatives (except gasline) appropriations estimates below:

Growth to the budget related to the new initiatives includes the following assumptions:

- Increased funding needed for increased monitoring of air quality with additional federal regulation implementation and adoption related to climate change and other environmental monitoring efforts.
- Federal appropriations for rural sanitation CIP projects will decline at a rate of $10 million per year until zeroing out in FY2016. Assumption that State General Funds will replace federal appropriations to maintain an annual CIP total of $125.6 million is included in "New Initiatives" section and not included in "Baseline Budget Growth" scenario.

WHAT THE 4¢ SURCHARGE PAYS FOR

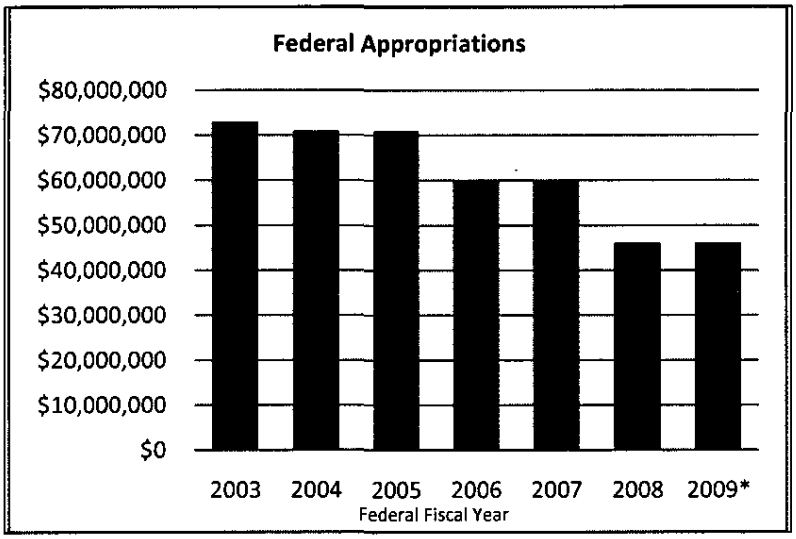
OIL AND HAZARDOUS SUBSTANCE, SPILL PREVENTION AND RESPONSE

- Standards and regulation to protect the environment from releases or oil or hazardous substances.
- Establishment and maintenance of a spill response capability.
- Investigation, evaluation, containment, and/or cleanup of a release or threatened release of oil or hazardous substances.
- Restoration of the environment.
- Review of oil discharge prevention and contingency plans.
- Training, response exercises, inspections, and tests.
- Verification of proof of financial responsibility.
- Recovery of state costs.

IS IT ENOUGH?

- Revenues continue to decrease as production decreases.
- Despite the change in surcharge amounts, expenditures continue to exceed projected revenues.
- Without additional revenues, the fund will be depleted in FY2014, which assumes no additional capital appropriations for clean-up costs.

Rural Alaska Sanitation Appropriations



Annual funding for rural sanitation improvements has declined by nearly $27 million or 37% since FFY 2003.

Fiscal Year	EPA				USDA				Total Enacted
	President	House	Senate	Enacted	President	House	Senate	Enacted	
2003	$40,000,000	$35,000,000	$45,000,000	$43,000,000	$20,000,000	$24,000,000	$30,000,000	$30,000,000	$73,000,000

2009*	$15,500,000			$24,610,000	$3,300,000			$ 21,515,000	$46,125,000

* Assumes the Continuing Resolution for the first six months of FFY09 will be extended through last six months of FFY09.

While funding has declined by 37% over the last six years, there are still over 500 rural Alaska sanitation projects that need funding. The cost of completing these projects is approximately $700 million.

The State's continued goal is to increase the number of rural households with adequate sanitation facilities by an average of 3% per year while at the same time assisting communities address sanitation needs relating to aging infrastructure and complying with new regulations.

We are concerned that although we've achieved this goal for the last several years, the momentum that we've gained may wane due to a decrease in federal funding levels.

DEC Water, Wastewater and Solid Waste Grant Programs

- Facility Programs of DEC's Division of Water work with communities to develop and maintain sustainable water, sewer, and solid waste services in full regulatory compliance.

- There are two types of grant programs managed by DEC for sanitation projects. The *Village Safe Water* program offers 100% grant funding for smaller, rural communities and the Municipal Matching Grants program offers 60%-85% grant funding for larger communities.

Village Safe Water (VSW) Program

- VSW Funding comes from a combination of federal grants and state appropriations. The two primary federal funding sources (which have provided a five year combined average of $57 million per year) are the U.S. Department of Agriculture and the Environmental Protection Agency. Funding through these agencies requires a 25% State match. In addition, the Denali Commission and the Indian Health Service have provided a recent average of $10 million a year in 100% federal grants for projects through VSW.

- Communities apply each year for proposed sanitation project funding. Applications are scored, based heavily on the proposed project's ability to address assessed critical public health needs, as well as the communities' demonstrated capacity to operate and maintain the facilities. Capital funding is requested for the highest ranking projects.

- Per a federal funding requirements established in 2004, the VSW CIP priority list which is divided into two types of projects – those that can be completed in less than three years and those that will take three years or longer.

- Projects that are estimated to take one year to complete receive full funding in a single fiscal year.

- The Three Year List contains large, high scoring projects; however projects on the list are not prioritized. This allows the flexibility that is required in scheduling funding for multi-year projects. An

unanticipated delay in one project will not hold up funding for a different project that is ready to go.

- Funding for the construction phases of Three Year List projects is granted based upon completion of design packages and chronological approval, available funding, and sufficient drawdown of existing project funds. In other words, this is a "first ready, first funded" list and new funds are not made available to a project until prior project grant funds for the project are exhausted.

- In some cases, funding is transferred by VSW through the Indian Health Service to the Alaska Native Tribal Health Consortium, who in turn assists communities in design and construct of sanitation projects.

Municipal Matching Grants Program

- The Alaska Municipal Water, Sewerage, and Solid Waste Matching Grant program provides partial funding and engineering support for drinking water, sewer, solid waste and non-point source pollution projects, such as water quality enhancement and waterbody restoration and recovery.

- These state grants primarily assist the larger communities and boroughs in the State.

- Each year, communities submit sanitation grant questionnaires which are scored weighing primarily the extent to which proposes projects address critical public health and environmental needs. Grants are awarded to the highest ranking projects as funding allows.

- SB 303 which passed the Legislature last year amended the Municipal Matching Grants enabling statute to change the State/Local funding ratio of eligible project costs. The State share of project costs for grants awarded under the program are now:

    - 85 percent of eligible costs for a municipality with a population of 1,000 persons or less.

    - 70 percent of eligible costs for a municipality with a population of 1,001 to 10,000 persons.

    - 60 percent of eligible costs for a municipality with a population of greater than 10,000 persons.

Annual Summary of Oil and Hazardous Substance Releases

Fiscal Year 2008 (July 1, 2007-June 30, 2008)

Alaska Department of Environmental Conservation

January 2009

Significant Responses

Sand Point Abandoned Drum Site

Location: Sand Point
*Report Date: February 15, 2007**
Product: diesel fuel, used oil, and water
Quantity: 605 drums
Cause: leaking drums

Over a 10-year period, more than 600 drums containing diesel fuel, used oil and water were placed within storage cells in an old rock quarry near the the Sand Point airport. The drums were placed there by the City of Sand Point and various other State agencies, private businesses, and local residents. During a site visit, DEC responders determined that 121 drums had ruptured and released their contents, some of which leached into the ground when it overflowed the secondary containment. In July 2007, DEC responders worked with the EPA, the City of Sand Point, and local native groups to clean up the site and properly dispose of the drums and their contents.

*NOTE: Cleanup occurred during FY 2008.

♦♦♦

F/V Nordic Viking Grounding

Location: Port Gravina
Spill Date: July 21, 2007
Product: diesel
Quantity: 3,500 gallons
Cause: grounding

On July 21, 2007, the *F/V Nordic Viking* ran aground at Port Gravina near Olsen Bay, Prince William Sound releasing an estimated 3,500 gallons of diesel fuel into the water. ADF&G closed the commercial salmon fishery for the Port Gravina area. The response team assisted with the lightering and salvage operations until demobilization on July 31, 2007. There were no reports of wildlife impacts.

♦♦♦

DS-16 Flowline D, Crude/Methanol Spill

Location: Flow Station 2, Prudhoe Bay Field
Spill Date: October 15, 2007
Product/Quantity: 630 gallons methanol;1,260 gallons 60/40 methanol/water; 42 gallons crude/water
Cause: puncture

A flow line at Flow Station 2 was punctured when it moved with sufficient force to strike an adjacent horizontal support module. An estimated 1,932 gallons of methanol, crude oil and water were released. Approximately one acre was impacted. The contaminated snow and ice were removed and treated.

♦♦♦

Kuparuk 2U Pad Crude Oil Spill

Location: North Slope, Kuparuk River Field
Spill Date: December 16, 2007
Product: crude oil, gas and fluids
Quantity: 4,284 gallons
Cause: external corrosion of flow line

On December 16, 2007, oil field workers at the Kuparuk 2U Pad discovered a crude oil spill from the 24-inch flowline and the oil wells feeding the flowline were shut down. Production wells were shut down for approximately five days during the repair. The spill volume was reported at 4,284 gallons (102 barrels) and affected a nearby frozen lake and the surrounding tundra.

♦♦♦

Selawik Tank Farm Release

Location: Selawik IRA Fuel Project
Spill Date: January 23, 2008
Product: diesel fuel No. 1
Quantity: 5,385 gallons
Cause: automatic shutoff malfunctioned

An estimated 5,385 gallons of diesel fuel was released due to the failure of an automatic shut off pump that transfers fuel from the storage tank to the day tank. The day tank overfilled and the diesel spilled into the tank farm's secondary containment. All the free-standing fuel oil was recovered and pumped back into a holding tank.

Statewide Summary

All Spills

During Fiscal Year 2008 (July 1, 2007-June 30, 2008), 2,013 oil and hazardous substance releases were reported to the Department.

Noncrude oil comprised 75% of the spills reported and nearly 60% of the total volume. The largest noncrude spill was a 145,000 gallon diesel spill which resulted when the *F/V Alaska Ranger* sank on March 23, 2008. This spill was also the largest one for the period.

While Oil Production facilities reported more spills, Vessels and Mining facilities were responsible for the greatest volume released for FY 2008.

Spills Reported in Gallons	2,013
Total Gallons	388,842
Spills Reported in Pounds	45
Total Pounds	117,856

Top 5 Causes (gallons)

- The total number of spills *(2,013)* as well as the total volume *(388,842 gal)* released in FY 2008 was lower than the average for the 13-year period of record.*
- The North Slope subarea had the greatest number of spills *(545)* during FY 2008 compared to the other subareas. However, the total volume *(46,755 gal)* was less than 25% of the 13-year average for the subarea *(200,933 gal)*.
- Cook Inlet subarea had significantly fewer spills *(351)* than its 13-year average *(538)*.
- Total volume spilled in the Aleutians subarea *(148,554 gal)* was about three times the 13-year average due to the 145,000-gallon diesel spill resulting from the sinking of the FV Alaska Ranger.
- Spill counts for the Aleutian subarea *(97)* and the North Slope subarea *(545)* were significantly higher than average during FY 2008.
- During FY 2008, spill counts for Cook Inlet subarea *(351)*, Interior subarea *(318)*, Prince William Sound subarea *(42)*, and Western subarea *(48)* were significantly lower than average.
- The Cook Inlet subarea *(16,175 gal)*, North Slope subarea *(46,755 gal)*, Southeast subarea *(11,642 gal)*, and Western subarea *(5,091 gal)* had spill volumes in FY 2008 that were significantly lower than average.
- The total spill count *(2,013)* and spill volume *(388,842 gal)* for FY 2008 were both significantly lower than average.

Noncrude Oil

- Nearly two-thirds of the noncrude spills were under 10 gallons.
- Diesel comprised approximately 40% of the total number of noncrude spills and more than 80% of the total volume released during FY 2008.
- The largest noncrude spill during the reporting period was a 145,000 gallon diesel spill which occurred when the F/V Alaska Ranger sank in March 2008. This single incident comprised over half of the total noncrude volume for the year.

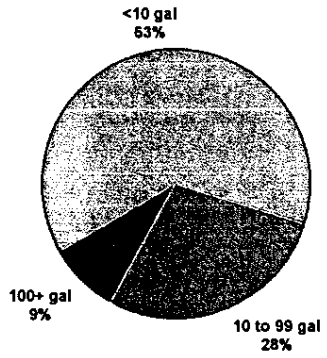
Number of Spills by Size Class



- The number of noncrude spills during **FY 2008 (1,497) was significantly below** the 13-year annual average.
- The total noncrude volume for FY 2008 *(227,151 gal)* was slightly above average, **but about 80% of the total was due** to a single 145,000 gallon release.
- Four large spills resulted in higher than average volumes:
  - FY 1998 - Elmendorf Aero Club *(100,000 gal aviation fuel)*
  - FY 2000 - West Coast Aviation Tank Farm *(84,360 gal gasoline)* and Gold Creek Derailment *(120,516 gal diesel)*
  - FY 2005 - Selendang Ayu *(321,052 gal IFO 380)*
- **The Cook Inlet subarea** *(275)*, **Interior** subarea *(238)* and Prince William Sound subarea *(35)* **had significantly fewer** spills compared to the 13-year average. Total noncrude volume for those subareas *(8,225 gal, 11,384 gal and 6,041 gal respectively)* **was also significantly** below the 13-year average.
- Total noncrude volume spilled in the Aleutians subarea *(148,548 gal)* was about three times the 13-year average due to the 145,000-gallon diesel spill resulting from the sinking of the FV Alaska Ranger.
- The Aleutian subarea *(93)* and North Slope subarea *(283)* had spill counts **that were significantly higher than** average in FY 2008.

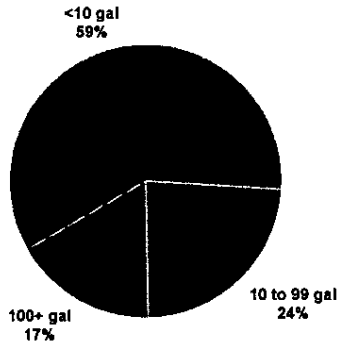
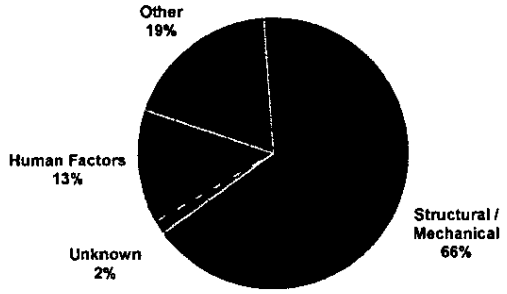
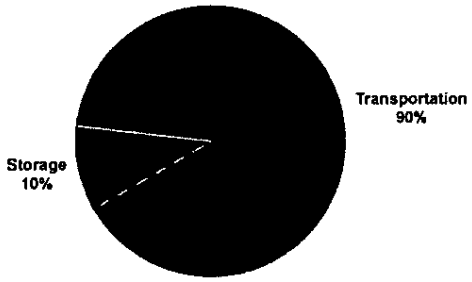
Number of Spills by Size Class



Number of Spills by Cause



Number of Spills by Facility Category



- There were 59 Crude Oil spills in FY 2008, significantly lower than average for the 13-year period.
- The average number of Crude Oil spills for the first half of the period (FY 1996-2002) was 95 compared to 63 spills for the latter half (FY 2003-2008).
- Several large crude oil spills account for higher total annual volumes:
  - FY 1996 - Check Valve 92 *(34,073 gallons)*
  - FY 2001 - GC-2 *(30,030 gallons)* and GCI D-Pad Flowline *(25,500 gallons)*
  - FY 2002 - TAPS Bullet Hole Release *(285,600 gallons)*
  - FY 2006 - GC-2 Oil Transit Line Release *(267,000 gallons)*
- Most subareas had fewer Crude Oil spills during FY 2008 compared to the 13-year average.
- Total volume for crude oil spills was substantially less than the 13-year average volume for the North Slope and Interior subareas. However, the average is inflated by a few very large spills -- in particular, the TAPS Bullet Hole release in FY 2002 and the GC-2 spill in FY 2006.
- The spill count for the Cook Inlet subarea *(20)* and the Prince William Sound subarea *(6)* was significantly below average in FY 2008.
- The spill volume for Cook Inlet *(1,649 gal)* was significantly below average in FY 2008.

Projects

Special Projects

■ *Emergency Towing System*

Within the last decade, several distressed or stricken vessel incidents occurring in the Aleutian Islands have impacted the community of Unalaska and in a few cases caused environmental and economic repercussions. In each situation, the vessel was a large tramper or cargo type vessel, which generally carry fuel in bottom tanks, thus posing a significant pollution risk in a grounding. The information provided in the Vessel Traffic in the Aleutians Subarea study, illustrates roughly 67% of port calls to Unalaska/ Dutch Harbor in 2004 were either container ships or tramper/reefer vessels.

Following the near grounding of the *Salica Frigo* on March 9, 2007 the Mayor of Unalaska convened a Disabled Vessel workgroup to address the possibility of future groundings and to discuss local emergency response solutions. This initial meeting prompted the Emergency Towing System (ETS) workgroup whose goal was to develop emergency towing capabilities for disabled vessels in the Aleutian Subarea using locally available tugboats in conjunction with ETS equipment stationed in Unalaska.

The City of Unalaska purchased a system suitable for vessels up to 50,000 DWT and the Alaska Department of Environmental Conservation purchased a system capable of towing vessels greater than 50,000 DWT; both systems are stored in Unalaska.

The ETS consists of a light weight towline, a messenger line to assist in deploying the towline, a line-launcher, a lighted buoy, and chaffing gear. These components may be configured to deploy to a disabled ship from the stern of a tugboat or airdropped to the ship's deck via helicopter.

The Alaska Department of Environmental Conservation has also purchased and stored a 10-inch Emergency Towing System (ETS) at the USCG Air Station in Kodiak. For mobilization and use of the Kodiak Emergency Towing System, please contact the USCG Sector Anchorage Command Center at (866) 396-1361 or (907) 271-6769.

Project website: http://www.dec.state.ak.us/spar/perp/aiets/home.htm

Prevention Initiatives

■ *Home Heating Oil Tanks*

Home heating oil tanks are in use throughout the state and are not regulated by the Department. Since 2001, response staff have actively worked to achieve a reduction in the number and magnitude of heating oil discharges from home heating oil systems through a variety of public outreach methods with a focus on prevention targeted primarily at the homeowner. They have attended home shows, state fairs, and local and statewide forums, and have been interviewed on radio and television. A series of public service announcements was produced and aired in over 250 Alaskan communities served by the Alaska Public Radio Network, and a print version appeared in newspapers.

Additional outreach information is being developed for fuel distributors. Greater emphasis is being placed on providing information on preventive measures to rural Alaskan communities where oil drum "tanks" are common and the high price of oil makes the impact of a spill difficult on the residents and governments of these remote Alaskan villages and towns.

Project website: http://www.dec.state.ak.us/spar/perp/hho.htm

■ *Clean Harbors Initiative*

The Clean Harbors initiative in Alaska is being sponsored jointly by Alaska Department of Environmental Conservation (ADEC) and Cook Inlet Regional Citizens' Advisory Council (CIRCAC), and is partially financed by a grant from the Conoco Phillips Earth Energy Partners Program. Homer Harbor is serving as a "pilot project" for launching the Clean Harbors initiative in Alaska. This program is based on Clean Marinas programs on the west coast and nationwide, promoted by NOAA and others, that encourage marina operators and recreational boaters to protect coastal water quality by engaging in environmentally sound operating and maintenance practices.

While Clean Marina Programs vary from state to state, all programs offer information, guidance, and technical assistance to marina operators, local governments, and recreational boaters on Best Management Practices that can be used to prevent or reduce pollution. Marinas that participate in the Clean Marina Program are recognized for their environmental stewardship.

The first workgroup meeting for the Clean Harbors pilot project was held in Homer on December 19, 2007. Participants at the meeting included ADEC, CIRCAC, City of Homer Port Administration, Cook Inlet Keeper, the USCG, Alaska Sea Grant, and Nuka Research. As the first step in the pilot project, a sub-group is working with a contractor, Nuka Research, to develop a Best Management Practices template for harbors in Alaska.

Project website: http://www.nukaresearch.com/projects/cleanharbor/index.shtml

■ *Aleutians Risk Assessment*

ADEC and the U.S. Coast Guard are funding a multi-stage risk assessment of maritime transportation in the Bering Sea and the Aleutian Archipelago. The first phase of this long-term risk assessment and mitigation strategy is to fund a project titled, "Risk of Oil Spills in the Aleutian Islands-A Study to Design a Comprehensive Risk Assessment". A Committee established within the Transportation Research Board of the National Academies is conducting this project and the first committee meeting was held in Anchorage and Unalaska during the last week of October 2007.

The efforts of the committee culminated with the completion of their report titled "Risk of Oil Spills in the Aleutian Islands- A Study to Design a Comprehensive Risk Assessment."

The second phase of the project – conducting the Aleutian Islands Risk Assessment is now underway. The assessment organization and management structure consists of four groups: a Management Team, an Advisory Panel, a Risk Analysis Team, and a Peer Review Panel. The management team consists of the U.S. Coast Guard, State of Alaska (ADEC), and the National Fish and Wildlife Foundation (the agency responsible for allocating funds). A priority for the management team is the establishment of the advisory panel and selection of a contracted facilitator for the panel.

STATE OF ALASKA

SARAH PALIN, GOVERNOR

DEPARTMENT OF FISH AND GAME

ADMINISTRATIVE SERVICES

P.O. BOX 115526
JUNEAU, AK 99811-5526
PHONE: (907) 465-6085
FAX: (907) 465-6078

February 17, 2009

The Honorable Mike Hawker, Co-chair
House Finance Committee
House of Representatives
Alaska State Capitol
Juneau, Alaska 99801-1182

Dear Representative Hawker:

At the February 2 Alaska Department of Fish and Game overview before the House Finance Committee, you asked the question whether the department had been asked by the Alaska Energy Authority to review their proposed energy projects.

The short answer is no. However, the department has issued fish habitat permits to Kenai Hydro LLC for the installation of stream gauges to collect baseline date regarding four hydro feasibility projects in the Moose Pass area.

Please contact me if you have further questions.

Sincerely,

Tom Lawson
Director

Department of Natural Resources
FY10 Long Range Plan

Notes for FY09 baseline appropriations and department assumptions for FY10 and beyond

Through operating budget one-time-item continuations and increments and capital project requests, the Department will continue to seek funding to support:

Resource Development

- Services provided by the Division of Oil and Gas
- Royalty valuation, allowing re-negotiation of royalty settlement agreements when it is advantageous to the State
- Airborne mineral surveys
- Abandoned Mine Reclamation (Fed)
- New Geologic Materials Center

Water Resources

- Cooperative Water Resource Program (SDPR)

Coastal Management

- Alaska Coastal Management pass-through grants (Fed)

Land acquisition and sales

- Land acquisition as per statehood entitlement
- Forward funding of surveys for remote recreational cabin sites (LDIF)
- New subdivision development and remote recreational cabin program (LDIF)

Wildland Firefighting

- Shared costs at the Interagency Coordinator Center
- Increases in helicopter and air tanker costs when contracts come up for renewal

Parks Facilities and Programs

- Design phase of the South Denali Access Road and other capital projects in State Parks
- Maintain the Boating Safety Program and expand the education portion (mostly Fed)
- Acquire outdoor recreation lands and develop facilities through the Land and Water Conservation Fund (Fed)
- National Historic Preservation Program (Fed)
- National Recreation Trails Grant (Fed)

Forest Management

- Reforestation of State forest lands following harvests and burns
- Forest road maintenance
- Timber inventories

- Technical forestry assistance program (Fed)
- Private and public forest assessment

Agricultural Industry

- Foundation seed program and other functions of the Plant Material Center that support the agricultural industry in Alaska

Guide Concession Area Program

- Initial planning work for guide concession area program, with additional general funds needed in subsequent years to develop regulations and implement the program until it is self-supporting through fees

Administrative and Information Technology

- Information technology infrastructure upgrades and contract increases
- Increases in chargebacks and core service costs

Anticipated need for replacement of federal funds:

- Funds to support critical services of the Alaska Volcano Observatory will decline, starting in FY10
- Federal funding for BLM2009 is scheduled to end in FY09, but continuing general funds will be needed for surveys, audits, and settlement of discrepancies

Increased demand for services and information:

- Over the next ten years we expect oil, gas and mineral exploration and development to continue to increase, based on the potential of Alaska's undeveloped resources
- General fund support for Large Project programs will be needed to allow advanced planning and staffing necessary to meet industry needs and facilitate projects that create jobs and generate state revenue
- The Pebble Project, if permitted, will require a full-time coordinator. Industry will support the position, although some general funds will be needed in the initial planning stage.
- Information needs will include geohydrology for water resource conservation, management and development; coastal hazards and development data; improved Geographic Information System (GIS) capability; a Statewide parcel database; and increased demand for programming and electronic solutions
- Increasing complexity of borough and other restrictions will require increased staffing in the Land Sales Program
- Increased demand for roads to access forest resources for firewood and timber sales
- Increased support for the agricultural industry will be proposed including erosion control and land conservation, a wetlands research unit, and horticulture evaluation program

Continual need for replacement/upgrade of facilities, equipment, and IT infrastructure including:

- Wildland fire truck replacement and fleet maintenance cost increases
- Trunk Road Facility move in FY10

- State Parks deferred and annual maintenance, with deferred maintenance balance currently at $60 million
- Plant Material Center facilities, grounds and equipment
- Deferred and ongoing maintenance of other buildings
- Replacement of Northern Region Facility and Kenai/Kodiak Area Forestry Facility, and site studies for various fire and resource management facilities
- Replace state-owned tactical aircraft in FY11

Other expected increases:

- Increased responsibilities of the Petroleum Systems Integrity Office based on completion of the gap analysis and risk assessment
- Need for Oil and Gas leasing program improvements
- Twenty permanent seasonal initial attack firefighting positions are currently paid with soft funding. To assure continuation of these positions, it will be necessary to replace this with general funds starting in FY11

Expected project completions:

- Mat-Su Hydrogeology assessment in FY11
- Electronic document management system in FY11 - creating electronic land management case files with search capability
- Unified Permit Project to streamline application and approval processes in FY11
- Statewide digital mapping initiative in FY13
- Electronic recording of titles and UCC for the Recorder's Office, resulting in savings as the need for regional offices will decrease

Department assumptions for gasline appropriation estimates

Continuation of funding to support:

- AGIA license management
- Pipeline corridor geologic hazards identification

Increased demand for services and information:

- Surveys, rights-of-way, inspection and administrative staff through FY17 as pipeline(s) are completed
- Geological trench mapping starting in FY13 (part SDPR)
- Upon completion of gasline in FY18, funds will be needed for multi-agency oversight of the completed project, and will require some level of funding for the life of the pipeline

Expected project completion:

- North Slope Reservoir Studies to determine the best use of natural gas resources

Department assumptions for new initiatives except gasline:

- Major influx of formula funds from the federal government for the Coastal Impact Assessment Program. Increase is based on federal offshore drilling leases. (Fed)
- Need to address the potentially dangerous situation of bear/human interaction at the Chilkoot River in Haines by managing the area to allow road-accessible brown bear viewing
- Construction of South Denali Visitors Center, estimated to start in FY12 (Fed)

Natural Resources

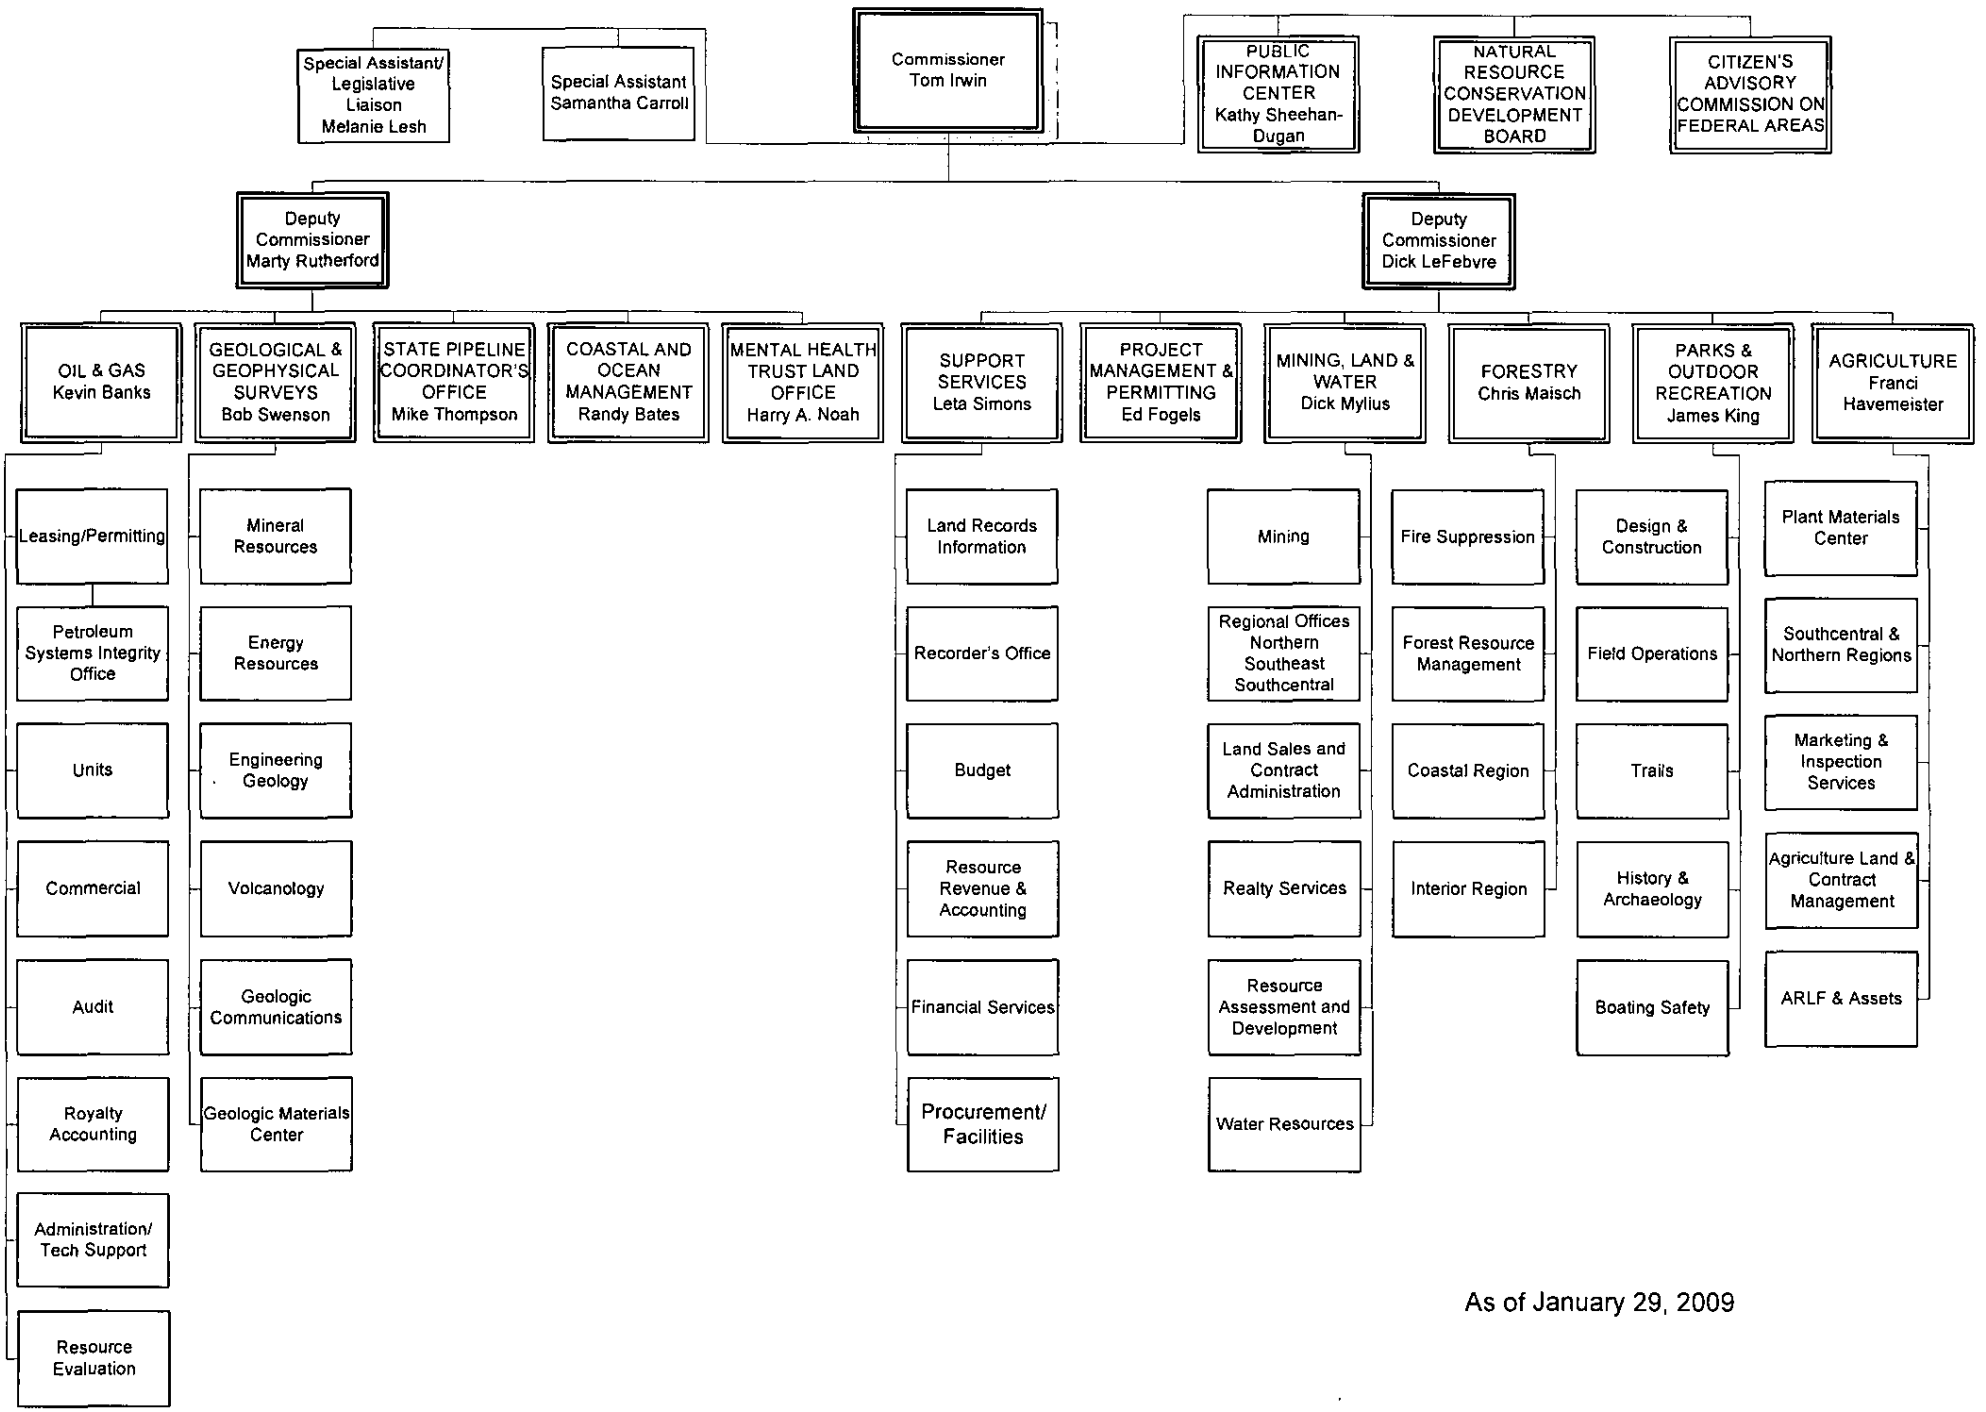
Department of Natural Resources



As of January 29, 2009

Overview of the Alaska Department of Fish and Game
February 2, 2009

Background

Alaska Constitutional mandates: Article VIII (Natural Resources) reads in part:

> The legislature shall provide for the utilization, development, and conservation of all natural resources belonging to the State, including land and waters, for the maximum benefit of its people.
>
> Fish, forests, wildlife, grasslands, and all other replenishable resources belonging to the State shall be utilized, developed, and maintained on the sustained yield principle, subject to preferences among beneficial uses.

Mission of the department:

> To protect, maintain, and improve the fish, game, and aquatic plant resources of the state, and manage their use and development in the best interest of the economy and the well-being of the people of the state, consistent with the sustained yield principle.

Goals of the department:

Optimize economic benefits from fish and wildlife resources
Optimize public participation in fish and wildlife pursuits
Increase public knowledge and confidence that wild populations of fish and wildlife are responsibly managed

Core Services of the Department

1. *Harvest Management*: provide opportunity to utilize fish and wildlife resources
2. *Stock Assessment*: ensure sustainability and harvestable surplus of fish and wildlife resources
3. *Customer Service*: provide information to all customers
4. *Public Involvement*: involve the public in management of fish and wildlife resources
5. *State Sovereignty*: protect the state's sovereignty to manage fish and wildlife resources

In support of these core services, the department conducts the following activities:

6. *Habitat Conservation*: protect, maintain, and improve Alaska's fish and wildlife habitat
7. *Workforce Development*: support a professional staff to deliver other core services

Ambitions within core services:

1. *Harvest management*: provide opportunities to utilize fish and wildlife resources
   - Expand existing and develop new programs to increase harvest opportunities (e.g., abundance-based management initiatives)
   - Protect and improve access to fishing and hunting opportunities and resources
   - Optimize participation in hunting and fishing activities
   - Improve harvest monitoring and assessment

2. *Stock assessment*: ensure sustainability and harvestable surplus of fish and wildlife resources
   - Improve existing fish and wildlife stock assessment capabilities
   - Expand stock assessments
   - Invest in new technologies*
   - Anticipate changing conditions (e.g., climate change, invasive species)

   *Idea of investing in new technologies applies to several of the core services.

3. *Customer service*: provide accurate and meaningful information to all customers
   - Enhance public communications materials and delivery (e.g., web capacity, multimedia, technical and lay reports)
   - Increase publication in peer-reviewed scientific literature
   - Improve management and scientific reporting
   - Improve licensing and permitting services (including unique identifier for each user)
   - Better coordinate and improve education and viewing programs throughout department and better integrate CF and Subsistence into education programs.

4. *Public involvement*: involve the public in management of fish and wildlife resources
   - Improve BOF/BOG and other regulatory processes (e.g., Federal Subsistence Board, North Pacific Fishery Management Council)
   - Effectively involve (optimize) public in specific decision making processes (legislative, EVOS, task forces and advisory groups)
   - Evaluate further and enhanced opportunities for public involvement

5. *State sovereignty*: protect the state's sovereignty to manage fish and wildlife resources
   - Reassess strategies for state/federal agreements and initiatives
   - Evaluate and improve effectiveness in interacting with other government agencies and forums (e.g., ESA, Magnuson-Stevens Act, NPFMC, Pacific Salmon Treaty, Migratory Bird Treaty Act, ANILCA, FSB)
   - Strengthen state's role in dual management for subsistence
   - Strengthen state's interests in partnerships with other governmental agencies

6. *Habitat conservation*: protect, maintain, and improve Alaska's fish and wildlife habitat
   - Strengthen department involvement in resource development and land use project reviews
   - Improve technical capabilities (e.g., geographical information systems, GIS) to inform environmental reviews of development projects

- Maintain, restore and improve habitats in the face of other resource development and land use

7. *Workforce development*: support professional staff to deliver other core services
   - Re-establish ADF&G as premier employer among nation's fish and wildlife agencies (e.g., compensation, benefits, training, workload management, motivation, initiative, recognition)
   - Improve and increase employee training opportunities
   - Enhance and improve administrative support
   - Stabilize and increase funding for divisional programs and employee development

Structure and Budget

The Department of Fish and Game comprises six divisions (Commercial Fisheries, Sport Fish, Wildlife Conservation, Subsistence, Habitat, and Administrative Services) plus the Alaska Boards of Fisheries and Game, the Commercial Fisheries Entry Commission, and the Exxon Valdez Oil Spill Trustee Council. Two deputy commissioners, an assistant commissioner, and special assistants support the Commissioner in managing the state's fish and wildlife resources.

The department's FY 09 operating budget is $180.0 million, from sixteen funding sources, including $55.0 million in federal funds, $58.1 million in state general funds, and $26.2 million in fish and game funds. In FY09, the department has 917 permanent full-time, 764 permanent part-time, and 62 non-permanent positions for a total of 1,743 positions.

The department's FY10 operating budget request is $180.0 million from sixteen funding sources, including $54.6 million in federal funds, $58.7 million in state general funds, and $26.1 million in fish and game funds. In FY10, the department has requested 910 permanent full-time, 767 permanent part-time, and 62 non-permanent positions, for a total of 1,739 positions.

Other Designated Responsibilities for the Commissioner

North Pacific Fishery Management Council
Pacific Fishery Management Council—non-voting seat
Pacific States Marine Fisheries Commission
University of Alaska-Fairbanks School of Fisheries and Ocean Sciences (SFOS) Advisory Council
Alaska Sea Grant Advisory Council
Alaska Board of Fisheries—as ex officio secretary, not a voting member
Alaska Board of Game—as ex officio secretary, not a voting member
Exxon Valdez Oil Spill Trustee Council
Federal Subsistence Board—non-voting seat
Western Association of Fish and Wildlife Agencies (WAFWA)—incoming president
Association of Fish and Wildlife Agencies (AFWA)
Alaska Migratory Bird Comanagement Council
The Pacific Flyway Council
The North Slope Science Initiative Board of Directors

Department of Fish and Game 10 Year Plan

Budget Assumptions

The Alaska Department of Fish and Game (ADF&G) does not have any operating formula programs and has fairly static operating and capital budgets. The growth in ADF&G's operating budget has been primarily related to Cost of Living Allowances (COLA) for state employees handled by the Office of Management and Budget (OMB) and a few priority programs and projects that are identified each fiscal year. The capital budget annually includes a few recurring appropriations for deferred maintenance of facilities, vessels, aircraft and equipment; recreational boating access projects; and Pacific Coastal Salmon Recovery Funds. Other capital budget items are generally for one-time projects identified each fiscal year.

The department has not identified any significant issues other than the gasline that will significantly affect ADF&G's budget over the next 10 years. The following is a list of each budget presented in the Long Range Fiscal Plan and our assumptions.

Baseline budget

FY10 and beyond assumes no major changes in funding as salary and benefit adjustments and other statewide issues dealt with by OMB.

Gasline budget

The operating budget amounts are for the Division of Habitat only and represent a "best guess" at workloads, funding, and positions needed to support gasline initiatives. These estimates are also based on the State Pipeline Coordinators Office estimates of timeframes and the assumption that either the TransCanada Alaska or Denali pipeline will be built, but not both.

The gasline will have operating impacts on other ADF&G divisions, but the department has not determined the financial impacts on the other divisions at this time. ADF&G assumes the gasline will have no major impacts on the department's capital budget.

New Initiatives budget

FY09 and FY10 budgets are showing zero as the full budget amounts are shown in the FY09 Authorized and FY10 Governor's baseline budget amounts above. It is very difficult to split out funds tied to new initiatives versus funds used to support programs.

For FY11 and beyond in the operating budget, ADF&G assumes a minimal 3 percent per year for yet to be determined initiatives. Historically ADF&G has received state funded initiatives that total at least 3 percent. (FY09 GF increments of $7,509.1 divided by total FY09 GF in Governor's Amended budget of $55,267.9 equals 13.5 percent. FY10 GF requested increments of $1,803.7 divided total FY10 GF in Governor's Request budget of $58,726.4 equals 3 percent.) These GF increments are not related to salary and/or benefit adjustments related or other statewide issues handled by OMB.

For the capital budget, we are assuming FY11 and beyond would be similar to FY10 amounts already shown in the baseline budget amount above.

Describe department assumptions for gasline appropriations estimates

The Operating budget amounts shown below are for the Division of Habitat only. The gasline will have operating impacts on other ADF&G divisions, but we are unable to determine the financial impacts on the other divisions at this time.

Operating Budget: The narrative, below, represents a "best guess" at workloads, funding, and positions needed to support gasline initiatives. Multiple State agencies will be affected by these proposals and, undoubtedly, as the projects develop and as applicants submit a specific scope of work, there will be interagency discussions to formulate the best overall State approach to review and permit these projects, including detailed discussions about budget and staffing needed. These interagency discussions have not yet occurred. These estimates are also based on the State Pipeline Coordinators Office estimates of timeframes and the assumption that either the TransCanada Alaska or Denali pipeline will be built, but not both.

FY10: Assumes Habitat will request and receive GF support for one new HB III position in Fairbanks to begin initial planning/design review/field inspections/and pre-construction permitting work on the TransCanada Gasline Project. This project is part of the $291,900 increment detailed in our FY 10 HUM budget proposal. Cost: $ 90,020 GF

Assumes pre-application work for Denali, ANGDA, ENSTAR and TransCanada. Assumes Habitat will get RSA money to support our initial planning/design review/field inspections/and pre-construction permitting.

Estimate up to two PCNs needed and cost of $180,000 in interagency receipt (RSA) funds will be handled with internal transfers from Sport Fish to Habitat.

(continued on following page)

Fish & Game

Department gasline assumptions continued

FY11: Assumes pre-application work for Denali and TransCanada and receipt of right-of-way applications from ANGDA and ENSTAR. Assumes Habitat will receive continuation RSA monies from previous year.

FY12: Assumes right-of-way applications received from Denali and TransCanada and continued processing of ANGDA and ENSTAR right-of-way applications. Assumes Habitat will get RSA money to support of work. Estimate up to three PCNS needed. ($281.2 includes funds for travel and supplies)

FY13: Assumes continued processing of right-of-way applications submitted by Denali and TransCanada. Also assumes that either ENSTAR or ANGDA are in the construction phase. Assumes Habitat will get RSA money to support our permitting/review/monitoring work. Estimate up to two PCNs needed. (Cost: $186.2 includes funds for travel and supplies)

FY14: Assumes continued processing of right-of-way applications submitted by Denali and TransCanada. Also assumes that either ENSTAR or ANGDA are in the construction phase. Assumes Habitat will receive continuation RSA monies from previous year, but no new monies or positions are needed.

FY15: Assumes construction phase for Denali or TransCanada (only one project assumed to reach the construction phase).
Assumes Habitat will receive RSA money to support our permitting/monitoring work. Estimate up to 5 PCNs needed. (Cost: $525.0 includes funds for travel and supplies)

FY16: Assumes construction phase for Denali or TransCanada. Assumes Habitat will receive continuation RSA monies from previous year, no new monies or positions needed.

FY17: Assumes construction phase for Denali or TransCanada. Assumes Habitat will receive continuation RSA monies from previous year, no new monies or positions needed.

FY18: Assumes first year operation for Denali or TransCanada. Assumes Habitat will receive RSA funding to support same number of positions.

FY19: Assumes continuation of Operation Oversight for Denali and ENSTAR. Assumes Habitat will receive RSA funding to support one oversight position.
(Cost: $119.8 includes funds for travel and supplies)

Describe department assumptions for new initiatives (except gasline) appropriations estimates

For FY09 and FY10, we are showing zero as the full budget amounts are shown in the FY09 Authorized and FY10 Governor's Base budget amount. It is very difficult to split out funds tied to new initiatives versus funds used to support programs.

For FY11 and beyond in Operating, we assume a minimal 3 percent per year for yet to be determined initiatives. At this point, we cannot forecast that far into the future, but historically we have state funded initiatives that total at least 3 percent (FY09 GF increments of $7,509.1 divided by total FY09 GF in Gov amended of $55,267.9 equals 13.5 perent. FY10 GF increments of $1,803.7 divided total FY10 GF in Governor of $58,726.4 equals 3 percent). These GF increments are not COLA or service step related which have been handled by OMB. For Capital, we are assuming FY11 and beyond would similar to FY10 amounts already shown in the Base amount.

February 9, 2009

The Honorable Mike Hawker
House of Representatives
Alaska State Capitol, Room 505
Juneau, Alaska 99801-1182

RE: Water and Sewer Services in Alaska

Dear Co-Chairman Hawker:

During the House Finance Committee hearing on February 2, 2009 Representative Gara asked two questions of the Department of Environmental Conservation regarding water and sewer services in Alaska.

First, he asked how many communities are paying more than $100/month for water and sewer services. We conducted a survey of 85 communities and found that 22% charged a residential rate which totaled $100 per month or greater. Survey results are enclosed.

Second, Representative Gara asked how many rural households have been disconnected from piped sewer and water service due to financial hardship in comparison to how many households have been connected to service. As part of the survey mentioned above, we asked if any customers had requested to be disconnected from service due to financial hardship. None of the communities responding answered yes to this question. In contrast, over the last ten years, the number of rural households receiving sanitation service has grown at an average rate of 2.5% per year or 875 homes per year. Currently an estimated 89% of all rural households are connected to a piped or covered haul system.

Sincerely,

Lynn J. Tomich Kent

Alaska Department of Labor and Workforce Development

House Finance Committee
Click Bishop, Commissioner
February 3, 2009

Our Mission

- Provide safe and legal working conditions and advance opportunities for employment.
  - Workforce Development
    - Labor market information (Research & Analysis Section)
    - Employment assistance (Employment Security Division)
    - Worker training and education (Business Partnerships and Alaska Vocational Technical Center)
    - Unemployment compensation (Employment Security Division)
    - Assisting people with disabilities to obtain and maintain employment (Vocational Rehabilitation Division)
  - Regulatory
    - Assuring fair compensation for work performed (Labor Standards & Safety, Wage and Hour)
    - Assuring a safe workplace (Labor Standards & Safety, Occupational Safety & Health)
    - Assuring fair workers' compensation claim adjudication (Workers' Compensation Division and Appeals Commission)
    - Unemployment insurance tax collection/fraud detection (Employment Security Division)

Alaska's Dynamic Labor Market

Workforce growth: 44,000 new Alaska jobs from 2006 to 2016

Aging workers—18% of Alaskans (124,500) are between the ages of 51 and 65

Unemployed Workers: Approximately 22,000 unemployed each month (a 6.2% average annual unemployment rate)

Imported workers: In 2007, nearly 20% of Alaska's workers are non residents—they earned over $1.7 billion, just over 13% of total wage and salary earnings.

Alaska's Youth

- 11,000 new Alaskan 18 year olds each year.
- 4,000 Alaskans ages 16-19 are not in school and not working.
- 62% of Alaska students who were freshmen in 2002 graduated high school in 2006 (does not include GED's).
- Only 62% of Alaskan high school graduates remain for training or employment; the rest leave the state.
- 2000 Census—over 57,000 Alaskans age 18 and over with no high school diploma.

Alaska Youth First goal -- in school, engaged and prepared for Alaska jobs…

FY 08 Key Program Accomplishments

Workforce Development

- Alaska job center network connected 31,274 Alaskans with jobs.
- 6,673 individuals received employment and/or training services for jobs. 94% of trained participants entered employment.
- 529 Vocational Rehabilitation Division consumers were employed
- Issued 1,540 General Education Development Diplomas.
- AVTEC trained nearly 900 Alaskans.
- Published a gasline workforce training plan.

Regulatory

- Occupational Safety: 21% reduction in the rate of lost workday accidental injuries and illness – from 2.02 to 1.59 per 100 employees.
- Wage & Hour: Wage claim resolution time is 4.5 months, 1.5 months less than the target of 6 months.
- Workers' Compensation: 169 uninsured employers were detected and there were 60 uninsured injuries .

FY 10 General Fund Continuation Increments

- **Construction Academy continuation--$3.5 Million GF***
  - Construction career training for youth and adults in Anchorage, Fairbanks, Mat-su, Juneau, Kenai, and Ketchikan.
- **On-the-Job Training and Registered Apprenticeship Incentives--$ 585.0 GF***
  - 200 participants targeted for industry related occupational training.
- **Coordinator to integrate Vocational Education/Set Standards--$130.0 GF***
  - Consistent standards for training programs/Program Accreditation.
  - Connect Education and Workforce Development.
- **Regional Economic Data Gathering--$95.0 GF***
  - Research & Analysis' support regional/local workforce planning.
- **Training Program Guide--$50.0 GF***
- **Continue designated grant to SAVEC--$195.0 GF***
- **Vocational Rehabilitation lease cost increase--$130.0 GF**

* **Funded in FY 09 but counted as one-time items; funding requested again in FY 10. Year over year GF change from FY 09 Authorized to FY 10 Request is $214.6.**

Workforce Training Related Programs and FY 10 Expected Funding Amount

The Training Continuum

	Secondary	Postsecondary Training	On the Job	Reemployment Assistance
Private Training System	Build-up Program and other programs in the schools	Employer paid tuition	Match state funding for training programs! Apprenticeships and Training Programs.	
Gasline Training Plan $860.0 GF		Training System Coordination focusing on Accreditation and Skills Standards. Regional economic data gathering.	Apprenticeship and OJT Incentives to Expand Skilled Opportunities. Increase registered apprentices and trainees. *Number Served: 200*	
Construction Academies $3.5 million GF	Train in and out of school youth as well as young adult workers in basic construction, welding, and other skills. *Number served: 1,000 High School/300 Adults*			
Youth First $2,321.8 GF	Secondary School Youth Career Awareness, Preparation and Job Experiences. Now working in tandem with DEED's Work Ready/College Ready . Captures all kids--not just those identified as "high risk" *Number served: 2,000*			
AVTEC $10,326.2 Total $4,852.9 GF		Vocational Training for in-demand occupations. *Number Served: 893*		
TVEP $9,447.0 TVEP		Allocated to various training entities and the University of Alaska to support operations and training programs.		
STEP $8,568.1 STEP		Used through the Job Center Network and Competitive Grant Awards to Train Workers who are Unemployed or face the threat of Unemployment. Fills funding gaps not met by WIA programs. *Number served: 2,000 to 2,500*		
Gasline Worker Federal Grant $2.5 million Federal	Summer Camps for College Bound Students *Number Served: 100*	Regional Training Center/AVTEC Targeted Training *Number Served: 350*	Apprenticeship and OJT Incentives to Expand Skilled Opportunities/Fairbanks Pipeliner Training *Number served: 350*	
Denali Training Fund $3.15 Million Federal	Denali Training Fund includes a $1 million per year allocation for competitive youth employment grants in rural Alaska, preferably connected with Denali Commission projects. *Number served: 1,000*		Denali Training Fund offers approximately $2!15 million in competitive grants for rural workforce development projects, preferably connected with Denali Commission Projects. *Number served: 250*	
Workforce Investment Act $12.7 Million Federal	Youth Funding focuses on at-risk in-school and out of school youth (ages 14 to 21) *Number Served: 500*		- Adult Program focuses on Job Center Services to unemployed individuals including counseling, assessments, job referral, and training. *Number Served: 530* - WIA Dislocated Worker program focuses on Job Center services to workers unemployed by virtue of business downsizing or closure. *Number served: 560*

OFFICE OF THE COMMISSIONER

P. O. Box 111149
Juneau, AK 99811-1149
PHONE: (907) 465-2700
FAX: (907) 465-2784

November 21, 2008

President Mark Hamilton
Office of the President
University of Alaska
P.O. Box 755000
Fairbanks, AK 99775

Dear President Hamilton:

The AGIA Training Plan calls for alignment of Alaska's vocational and technical education system in the best interest of the citizens of our state. I 'm seeking your support to develop a strategy for the postsecondary systems for career and technical education in the state, to assure they are aligned to train and educate our citizens without needless duplication of programs and investments.

I have directed my staff to work closely with representatives from the University of Alaska and prepare recommendations to address the AGIA strategy of CTE alignment in our state. Over the coming months I anticipate conversations to take place that will help us plan and shape Alaska's workforce development future. It is my intention to have recommendations from this working group, led by Fred Villa and David Stone, in May, 2009.

I hope you will join me in this endeavor to make sure that we position the state of Alaska to place the right programs in the right places to assist Alaskans in getting quality jobs in Alaska, maximizing Alaska resident hire overall and reducing the wages that are leaving the state.

Sincerely,

Clark Bishop
Commissioner

Alaska Department of Labor and Workforce Development
Long Range Fiscal Plan Summary
January 23, 2009

Operating Budget

Over the next 10 years, the Alaska Department of Labor and Workforce Development will continue to rely heavily on federal funds and state non general funds to support its regulatory and workforce development activities.

At present, general funds account for less than 18% of the department's operating budget--$31 million. Beginning in FY 11, anticipate requests to implement the gasline training plan, including training program administration, public awareness, expanding career and technical education, apprentice training expansion, training scholarships, and other targeted training through AVTEC, regional training centers and the University of Alaska.

Gasline related expenditures would stair step down 20% per year beginning in FY 15, and some funding would be reallocated from workforce training to enforcement. In addition, we assume additional occupational safety enforcement funding and staff will be required during the construction phase of the project.

The department is projecting new general fund initiatives in FY 11 focusing on Health Care Industry Career and Technical Education and Resident Hire Enforcement.

Capital Budget

The department's capital budget is primarily state-funded. In FY 10 and over the succeeding two fiscal years, we project significant facilities improvements at the Alaska Vocational Technical Center. Several of AVTEC's buildings do not meet current code and safety requirements and need to be replaced. Included in our long range fiscal plan are replacements of a dormitory, heavy equipment/diesel /welding building, the automotive technology building, and the building technology/facilities maintenance building. When these projects are completed, we project that AVTEC's facilities will be in a normal annual maintenance mode.

FY 13 and beyond, the department projects continued capital investments with an emphasis on regional training centers in preparation for construction of the gasline, with a ramping down of gasline related capital investments beginning in FY 14 of 20% per year.

Note

The department is not forecasting additional federal funding; however, it is very likely that additional federal authorization will be requested due to the workforce investment components of the Economic Stimulus Package.

1. Baseline wage and benefit increases are handled in the statewide spreadsheet.

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond

FY09 Department's Capital items were funded from FY08.
Note: (1) Federal Funds reduced by $2.5 million in FY 09 and shifted to Gasline Related to recognize Pipeliner Training Grant.
(2) No inflation assumption is used.
Capital Assumption: Limited to AVTEC's deferred maintenance request only.
FY11 and FY12 amounts are taken from AVTEC's three-year plan and it is assumed that ongoing deferred maintenance cost will remain at FY 12 level for the foreseeable future.

Describe department assumptions for gasline appropriations estimates below:

NOTE: Federal funds are the three-year Pipeliner Training Grant from the U.S. Department of Labor, Employment and Training Administration.

Operating Assumptions:

FY 10 continues GF funding received in FY 09 for gasline training program guide, regional economic analysis, apprenticeship development, and training through regional training centers.

FY 11 and beyond: adds funding to fully implement the gasline training plan, including training program administrator, public awareness, expanded career and technical ed, apprentice training expansion, training scholarships, and other targeted training through AVTEC, regional training centers and the University of Alaska. Funding would stairstep down beginning in FY 15, and some funding would be reallocated from workforce training to enforcement. In addition, we assume additional occupational safety enforcement funding and staff will be required during the construction phase of the project and are including $300.0 WSA in our plan for enforcement activities.

Capital Assumptions:

FY 10-Heavy Equipment/Diesel Shop/Welding Relocation $12 million and Fairbanks Pipeline Training Center Equipment-$2,310.5.

FY 11-AVTEC Automotive Technology Shop Replacement $7 million.

FY 12-AVTEC Building Tech/Facilities Maintenance Building-$7 million. Thereafter unknown but estimated at $7 million in FY 13, then ramping down thereafter during project construction and implementation.

Describe department assumptions for new initiatives (except gasline) appropriations estimates below:

Operations Assumptions: All increments currently requested; new non-Gasline initiatives in FY11 and beyond may include expanded resident hire enforcement and career and technical education, perhaps focusing on healthcare.

Capital Assumptions: All items currently requested; can't project forward at this time. FY 10 CIP is for AVTEC Dormitory Replacement at $20 million NGF; and Workers' Compensation Computer System Replacement at $3,092.2 WSA; and DVR Computer Interface improvements at $275.4 GF.

Total	$216.0 m	$144.1 m	7.1%	$150.2 m	$110.8 m

F Includes GF/MHT/TVEP/ASTF/BLic
ncludes extraordinary PERS/TERS retirement increases for FY05 $8.8m GF; FY06 $6.9m GF; 7 $7.9 m GF

Bottom Line: In only four of the last 20 years have general fund increases overed the salary and fixed cost obligations and allowed for state-funded rogram growth.

UA's Impact on Alaska

Completion of at least one workforce training course at UA leads to an average 18 percent increase in earnings.

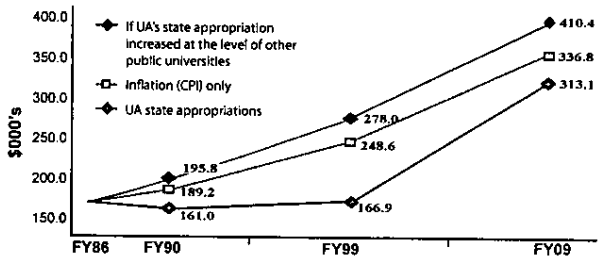
The UA Scholars Program keeps young Alaskans in state. More than 4,250 Scholars have enrolled since 1999, earning more than 1,200 degrees and certificates to date. More than 90 percent of them stay in Alaska to work, raise families and contribute to the economy.

New Occupational Endorsement and Workforce Credential tracks are tailored toward non-traditional students who have a specific career goal; like a promotion.

UA freshmen in baccalaureate engineering programs have doubled since 2004, with a 30 percent increase in the last year. State labor economists predict strong employment opportunities in engineering and related fields.

UA graduates in health programs have increased over 20 percent in the last five years. The latest enrollment figures, at nearly 3,450 students, are up an incredible 86 percent since 2000. Health-care workers are highly sought for employment, with demand even higher in rural Alaska.

State Appropriation Comparison



- Where We Could Be: If state funding increased at the average for Lower 48 public universities
- Where We Should Be: If state participation was adjusted for inflation (CPI)
- Where We Are: Nearly $24.6 million is consumed by extraordinary increases in state retirement

Bottom Line: State support for UA has not kept pace with the average of Lower 48 counterparts. At the same time, retirement costs have skyrocketed.

Strengthening Alaska's Economy

- The University of Alaska leaves an economic footprint in the state of nearly $1 billion annually, including:
  - Direct and indirect payroll
  - Student and visitor spending
  - And millions in goods and services paid to 1,200 Alaska businesses in 70 communities
- Nine out of 10 recent high school graduates rate the quality of education at UA as good or very good, a dramatic improvement since 1999.
- UA research brings over $150 million to the state each year, employs nearly 2,400 people and has a total payroll of $92 million. Future growth in UA research will require a state investment in new facilities.
- Charitable donations to the UA Foundation reached a record $31 million in FY08, with nearly 6,450 people, businesses and foundations supporting the university's programs, scholarships and students.
- UA now attracts 63 percent of college-bound high school graduates in Alaska, up from 45 percent in the mid-1990s.

Bottom Line: Students, parents, employers, alumni and citizens support the UA system.

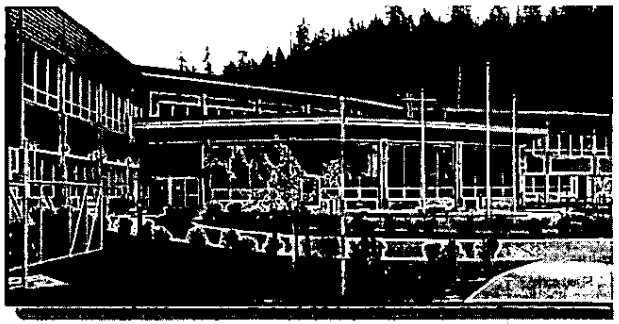
Funding Analysis Comparison
University of Alaska Compared to Western States

	U of A	WICHE
	FY06	FY06
State Appropriation to Higher Education	9.8%	11.6%
State Grant Aid per Student	$28	$416
Ratio : Instruction Expenditures per Student FTE	$9,373	
2-year, 4-year and Graduate Institutions		$6,545
4-year and Graduate Institutions only		$9,813
Ratio : Appropriation per Student FTE	$14,090	
2-year, 4-year and Graduate Institutions		$7,073
4-year and Graduate Institutions only		$15,613
Staff per 100 FTE Students*	13.9	12.9
Research Generated per Faculty**	$118,734	$54,283

Note: * UA Peer Institutions with less than 35,000 student FTE.

** Only FY05 Faculty figures were available on WICHE website: http://www.wiche.edu/policy/factbook/

Bottom Line: UA instructional costs and state appropriations, per student, are in line with our Western neighbors.



UA Facilities Need Investment

- UA requires annual capital funding of $50 million for major renewal and renovation (R&R), plus an additional annual investment to begin to address the R&R backlog known as "deferred maintenance."
- This investment is in addition to operating funds UA dedicates each year ($31 million in FY09) to maintain 400 buildings – 6.7 million square feet across the state.
- When capital R&R funding falls below $50 million annually, UA's maintenance backlog grows.
- Every year, UA's highest priority capital budget request is major R&R. Since FY2000, UA's annual request has averaged $75 million. State appropriations have averaged $16 million.
- UA's R&R inventory now exceeds $800 million--a critical level.

FY08 REPORT CARD

From FY07		From FY99
Up 1%	High Demand Job Area Degrees Awarded	Up 38%
Down 1.5 points	First-Time Full-Time Undergraduate Retention	Up 9.5 points
No Change	Student Credit Hours	Up 16%
Down 4.6%	Grant-funded Research Expenditures	Up 97%
No Change	University-Generated Revenue	Up 90%

Dispelling the Myths

The university does not compare itself with obviously larger institutions to justify costs. UA campuses use nationally established peer comparisons as guidelines. Peer campuses include Missouri State at Rolla, Utah's Weber State, and University of Wyoming.

Rural campuses are far more efficient than many people might think, and are moving toward even greater efficiencies.

UA has steadily decreased its dependence on state funds - from 60 percent of its overall budget to about 40 percent. However, fixed cost challenges (retirement and health care) may require more state funding in the future.

The university's business practices have saved millions of dollars in operating costs and maximized the use of our work force.

Health and pharmacy benefits are aggressively negotiated to keep rates low. Expanded disease management incentives result in healthier employees and reduced medical costs.

Serving a vast area presents unique challenges to the administration. UA consistently comes out as either average or below average on administrative costs and staffing levels compared with our peers.

UNIVERSITY of ALASKA

Many Traditions One Alaska

University Relations
P.O. Box 755200
Fairbanks, AK 99775-5200

www.alaska.edu/state/

Did you know:

UA enrollment is healthy - student credit hour production has increased 18 percent since 1999, with a headcount increase of more than 7 percent.

Sixty three percent of Alaska's college-bound high school graduates now choose to attend one of UA's 16 campuses across the state. That's up from 40 percent in the mid-1990s.

Over 80 percent of jobs in Alaska and the nation require at least one year of post-secondary education or workforce training.

UA research is one of Alaska's largest industries. In 2007, UA received over $132 million for research from public and private sources outside the state.

Facts
Not Fiction

University of Alaska

Facts Not Fiction

FICTION

Top administrator salaries are too high

FACT UA pays executives based on market comparisons. However, due to decades-long budget constraints, they are paid, on average, 10-20 percent below their colleagues at comparable institutions.

The President's annual salary of $300,000 is about 30 percent below the national average for a system president. According to a recent survey in the Chronicle of Higher Education, the average salary for similar positions is $389,000 per year.

FICTION

UA wants to be the "Harvard of the North"

FACT Though UA strives to be a quality institution, its costs and administrative levels are based on comparisons with schools of similar size and mission.

Unlike the "big name" private schools of the Lower 48, UA campuses are open admission institutions with few restrictions on enrollment. UA also embraces the community college, vocational and technical mission that more restrictive universities overlook.

FICTION

UA's tuition is too high

FACT Other universities across the nation have raised their tuition at higher rates. UA is still less expensive than other four-year public schools, including Arizona, California, Montana, North Dakota, Oregon, South Dakota and Washington State.

Tuition revenue at UA covers less than a quarter of the actual costs. But return on investment is high – working college graduates in Alaska make almost 50 percent more each year than working high school or GED graduates.

FICTION

The university is fat and inefficient

FACT That claim is ancient history. UA was cut $20 million in the late eighties, was flat funded through the nineties, and has absorbed numerous cost increases.

The truth is, UA funding has not kept up with inflation. In fact, in the last 20 years, UA has received program money, beyond fixed costs, just four times. This is particularly challenging in light of high cost drivers, such as retirement, utilities, fuel and healthcare.

FICTION

The university offers too many degree programs. It shouldn't try to be all things to all people

FACT According to the Western Interstate Commission on Higher Education (WICHE), the University of Alaska offers 30 percent fewer degree programs than the average offered by other universities in the West.

New programs in recent years have been aimed directly at addressing high priority state workforce needs such as engineering, nursing and allied health careers.

FICTION

There are too many rural campuses

FACT UA's rural campuses consume less than most people think – only 13 percent of total funds received by the state. Serving our rural neighbors is an integral part of the University of Alaska's mission.

FICTION

If the university would sell some of its land it would have all the money it needs

FACT Even after the state transfers 250,000 acres of land to the university per 2005 legislation, it will take many years before these remote, undeveloped lands produce regular income. In 20 years, it's estimated that proceeds from UA land will support 5 percent of the university's budget. Land income is important, but not the total budget fix.

FICTION

Professors don't spend enough time in the classroom

FACT University faculty workloads are consistent with institutions throughout the United States. Faculty members are required to perform multiple functions outside the classroom – including student advising, research and public service – as a condition of their employment.

FICTION

The university is top heavy with administrators

FACT National data on administrative staffing levels and costs consistently show UA at or below average for peer institutions.

University of Alaska 10-year Plan

Operating Budget Assumptions

The baseline scenario reflects the Governor's proposed FY10 budget increment level. This funding level is less than the UA Board of Regent's fixed cost increment; therefore some service level decreases are projected in key areas from FY09 to FY10. UA's 10-year plan includes projected contract and policy mandated personnel services increases, unlike other state agencies.

This plan has a GF Operating baseline increase of four percent based on the national Higher Education Price Index (HEPI). HEPI is an inflation index designed specifically to track the primary cost drivers in higher education. It is an essential planning tool for educational managers, enabling schools to project the future budget and funding increases required to maintain real purchasing power and investment. HEPI has averaged four percent for the past five years for the nation as a whole.

UA's actual fixed costs are projected to increase from four to five percent per year, based on projected contract requirements. A lower rate of increase will be challenging to achieve and represents a commitment by UA to continue realizing efficiencies.

The operating gasline related increments would support increased capacity for gasline related programs such as Engineering and Construction. UA is not producing enough graduates in these areas to meet current demand, much less demand increases anticipated from the gasline. In response to state needs, $4.3 million of the Board of Regents' approved FY10 request for Operations-GF is for gasline related programs and program support. This plan assumes the proportion of gasline related operating program increments will grow over this 10-year timeframe incrementally through FY19.

In addition to gasline related initiatives, UA has a number of other program initiatives designed to meet critical state needs. UA's K-12 Outreach initiatives, though not directly gasline related, are essential in order for UA to have a pool of Alaskan students with the skills required to enter gasline related programs. Another fundamental function provided by UA is Health career training. Though not directly gasline related, each of these initiative areas will provide support toward current and projected future workforce needs, which may be intensified by the gasline impact.

Capital Budget Assumptions

The capital projects presented in each scenario are based on the UA Board of Regents 6-year Capital Plan. The first three years of the plan are used for direct project cost estimates, and out year projects are represented by general placeholder cost estimates.

It is fiscally responsible to maintain existing facilities. The Governor's proposed FY10 budget provides $10 million of UA's $50 million annual renewal and renovation (R&R) requirement. This will add $40 million to UA's deferred maintenance backlog which already exceeds $800 million. For the period of FY11 through FY19, the baseline scenario incorporates $50 million annually in capital GF to meet the Annual Renewal & Replacement requirement to keep the backlog from growing. This plan also includes a pay down of the deferred maintenance backlog of $100 million annually.

The FY10 UA Board of Regents capital request includes $25 million in UA Engineering planning; this has been moved to FY11 as it is not included in the Governor's proposed FY10 budget. There is a placeholder for UA Engineering projects in FY12. A significant proportion of out-year Capital-GF listed as initiative is anticipated to support gasline related program growth.

UA PLAN BASELINE ASSUMPTIONS: *Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond*

- The Governor's FY09 Capital Budget Includes $46,075.0 in Legislative add-on projects ($75.0 General Funds and $46,000.0 Other Funds) for UA.
- This plan assumes future baseline GF program support growth at UA of 4% annually. This growth rate assumption will be challenging to achieve in part due to anticipated contract and policy mandated personnel services increases, which are included in this plan.
- The FY10 baseline numbers represent the Governor's proposed operating and capital budgets; however, these are less than the amount required for UA to maintain FY09 service levels.
- FY10 Operations-GF includes $9.4 million for fixed cost increases; this is $6.3 million (not including utilities) less than the level necessary for UA to continue operations at FY09 service levels. Also included is: $800.0 in K-12 Outreach; $1,000.0 in Energy and Cooperative Extension; and $1,843.9 in Health Academic Programs. It is important to note that to implement these programs the fixed cost shortfall will need to be addressed.
- Also included in the FY10 Operations-GF are transfers of Small Business Development Center funding from Business License and Corporate Fees to GF, and the Alaska National Guard/University of Alaska Tuition Scholarship Program (TSP) from the Department of Military and Veteran Affairs to the UA.
- The Higher Education Price Index (HEPI) is an inflation index designed specifically to track the primary cost drivers in higher education. It is an essential planning tool for educational managers, enabling schools to project the future budget and funding increases required to maintain real purchasing power and investment. HEPI has averaged 4% for the past 5 years.
- In response to state needs, UA has focused a majority of its resources on growing programs in high demand job areas. Most of these programs have higher costs associated with them due to: a need for competitive wages to recruit faculty; smaller class sizes because of strict accreditation limits and lab constraints; and needs for costly academic equipment.
- At UA, the primary contributors to Operations- Other State Funds are Student tuition and fees and general university receipts such as individual, local and corporate giving.
- The FY10 Baseline Operations incorporated unrealizable budget authority reductions in Other State Funds of $22.6 million and Federal Funds of $25.4 million.
- This plan assumes modest growth in Operations- Federal Funds; realizing this growth requires state investment in research space.
- Some of the FY10 Operations- Other State Funds budget increments are dependent on unfunded GF increments and will not be realizable at this level without the GF funding.
- This plan assumes tuition rate increases of 5% per year, which is just enough to keep up with the portion of fixed cost increases reliant on this source.
- Over this ten year period UA will become proportionally more dependent on state funds, due to having optimized the non-general fund leveraging opportunities at this time.
- The FY10 Capital-GF includes $10 million of the $50 million annual R&R requirement, and $2.2 million of pass-thru funding to Providence Alaska Medical Center for the Alaska Family Medicine Residency Program.
- $50 million per year in Renewal and Renovation is necessary in order to not add to the deferred maintenance backlog.
- FY10 Capital - Federal Funds is for the Alaska Region Research Vessel; and some receipt authority for other potential Federal projects.
- FY10 Capital-Other State Funds include bonding for the UAF Life Sciences Innovation and Learning Facility and the UAF Energy Technology Building. It is important to note that without the GF portion this authority will likely be unrealizable.
- College preparation program focus is necessary to continue increasing the number of qualified students and successful graduates.

1. UA baseline figures include wage and benefit increases.

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond

FY09 numbers include a $4,840.0 GF transfer from the Governor's office for Fuel and Utilities.
See prior page for assumptions.

UA PLAN GASLINE RELATED ASSUMPTIONS: *Describe department assumptions for gasline appropriations estimates below:*

- The Governor's proposed FY10 budget includes $800.0 in Operations- GF for K-12 bridging programs that support engineering and other gasline related programs.
- In response to state needs, $4.3 million of the Board of Regents' approved FY10 request for Operations-GF was for gasline related programs and program support, such as engineering.
- This plan assumes that the proportion of gasline related operating program increments will grow over this 10-year timeframe incrementally through FY19.
- The gasline related Capital-GF includes training equipment for gasline related programs in FY10, planning money for UA engineering facilities in FY11, and a placeholder for the actual construction costs for these facilities in FY12.
- A significant proportion of out-year Capital-GF listed under other growth is anticipated to support gasline related program growth.
- College preparation program focus is necessary to continue increasing the number of qualified students in gasline related programs and produce successful graduates in these programs.

Describe department assumptions for gasline appropriations estimates:

See prior page for assumptions.

UA PLAN NEW INITIATIVES (Except Gasline) ASSUMPTIONS: *Describe department assumptions for new initiatives (except gasline) appropriations estimates below:*

- A significant proportion of out-year Capital-GF listed under other growth is anticipated to support gasline related program growth.
- Items from the Board of Regents' FY10 approved capital request that were unfunded in the Governor's proposed FY10 budget have been shifted to FY11 and FY12, with some of the projects distributed across multiple years in phases. Some of the projects planned for FY11 have been shifted to FY12.
- In FY11, anticipated requests include: the UAF Life Sciences Innovation and Learning Facility; UAS Auke Lake Campus Entry Improvements and Road Realignment; the UAA Sports Arena; the UAF Energy Technology Building; additional or replacement dorms at all three MAUs; planning for the UAA cogeneration plant; planning for the UAF Fire Station and Student Firefighter Training Center; feasibility studies for Community Campus new facilities; as well as first phases of project and equipment requests in the areas of energy, climate and Alaska education policy.
- In FY12, anticipated capital requests include: the UAF Fire Station and Student Firefighter Training Center; the UAA Cogeneration plant; UAA and UAF classroom expansions; and UAA Health Sciences Phase II.
- Out year increments are placeholders for such things as potential projects coming from the Community Campus feasibility study results and/or increased state demand in a particular program area requiring additional facility investment.
- This plan assumes continued efficiencies are realized in space utilization of existing facilities.
- A solution to deferred maintenance is important; this plan incorporates $100 million per year for the next 8 years to pay down deferred maintenance. There are other funding options to be discussed.
- For every $100 million in new facilities investment there can be an expected increase of $3-5 million in operating costs.
- Over this ten year period UA will become proportionally more dependent on state funds, due to having optimized the non-general fund leveraging opportunities at this time.
- College preparation program focus is necessary to continue increasing the number of qualified students and successful graduates.

Department of Education & Early Development – 10 Year Fiscal Plan Assumptions

BASELINE BUDGET GROWTH (SCENARIO) 1

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond: Salary adjustments are included for FY10 but not highlighted below.

- Foundation Program Projections: Foundation Program projections reflect the following increases per Fiscal Note 2 (HB273) adjusted for updated student counts- FY10 $47,492.4, FY11 $57,406.3, FY12 $12,901.0, FY13 $12,075.0. As a primary assumption for this formula program it must be noted the division of School Finance has been tracking a steady decline in student population which is in contrast to the Department of Labor and Workforce Development Alaska Population Projections document. It is also assumed that legislation would be required to increase the Base Student Allocation (BSA) to hold harmless the districts with severely declining student populations FY14 through FY19. Since many factors impact the state aid calculation such as enrollment and required local effort, the trends would indicate a need to project declining entitlement payments. Using a historical perspective, state aid can remain relatively flat over multiple years during times of decreasing state revenue. On the optimistic side, the program should be sufficiently funded primarily due to the fact a tremendous amount of work has been accomplished through the efforts of the Education Funding Task Force and the implementation of their recommendations with the support of the governor and the legislature to build an equitable formula.

- Foundation Program - Public School Trust Funds from tobacco taxes fluctuates annually and will reduce or increase the amount of general fund required to fully fund the Foundation program. The published report online from the Department of Revenue shows a slight increase from FY08 to FY09. Funding will remain flat in this projection since no long term trends are available.

- Pupil Transportation reflects an increase of $1,777.2 in FY10 and an increase of $1,946.1 in FY11 per the latest student counts and based on the Anchorage CPI increases estimated at 3.2% (DLWD). The projection for Pupil Transportation from FY12 through FY19 reflects an average annual increase of 2.75% based on the annual inflation assumption as reported by the Alaska Permanent Fund.

- Boarding Home Grants includes an increment of $350.0 GF in the base for Galena's program beginning in FY10, Youth in Detention and Special Schools reflects no increments in a fiscally conservative environment (Special Education Service Agency has minor fluctuations in population and a decrement of 5.3 GF is projected in FY10) .

- Alaska Challenge Youth Academy includes and increment of 185.2 GF in FY10 based on student count. FY11 through FY19 reflects flat funding. Formula generated increases were rejected by the Alaska State Legislature in FY08 as

excessive. Legislation would be required to remove the link to formula funding and create a GF base budget in DMVA for annual appropriations.

- School Performance Incentive Program will be allowed to sunset after FY09. $4,800.0 is included in the non-formula section of the spreadsheet for FY09 only.

- Executive Administration projections include a decrement in FY10 of 30.0 GF based on SB285 fiscal note for start up funding for district support activities.

- School Finance and Facilities contains an increment of $24.7 GF for school bus inspections and $45.2 GF for school bus driver training. These are included in the base budget beginning in FY10 as a fixed cost.

- Student & School Achievement, Assessments section projects a fixed cost annual increase of $250.0 GF for state assessment contracts. The Standards Based Assessments and the High School Graduation Qualifying Examination are trending with a 3.5% to 4.0% annual increase just to maintain the current level of services. This amount has been included in the baseline budget growth projections beginning in FY10. Increments based on the Mental Health Trust recommendations are also included in the base for Autism Resources and Rural Secondary Transitions.

- Alaska State Council on the Arts includes an increment of $56.5 in federal authority to receive and expend additional National Endowment of the Arts grant funding.

- State Facilities Rent includes an additional $210.6 GF in the base budget projected from FY2010 through FY19 to provide funding for leases (DOA FY10 Projections) and to secure additional space.

- Alaska Commission on Post Secondary Education – Western Interstate Commission for Higher Education (WICHE) program assumes contractual increases at 4% annually in the base beginning in FY11 through FY19 based on current trends. This RDU includes an increase in federal authority of $330.0 for carryforward funds from the prior year.

- Washington, Wyoming, Alaska, Montana and Idaho (WWAMI) Program – University of Washington School of Medicine. Fiscal note for additional students provides an increase of $524.7 GF for FY10 and the program projects an annual increase of 4% through FY19 based on the number of students participating.

Capital

- Mt. Edgecumbe High School - $2,000.0 GF is included in the FY10 Governor's capital budget request for projects on the priority list developed from the six year CIP master plan. $5,000.0 has been included through FY15 and reduced to

$1,000.0 annually out to FY19 to complete a majority of the projects in the current six year CIP master plan. The CIP master plan would be scheduled for an update in FY14.

- School Construction/Major Maintenance - Assumes Debt Reimbursement does not sunset and is re-authorized. FY11 through FY19 consists of SC/MM at $100,000.0 annually in the base numbers. The FY10 Governor's capital budget contains only $42,514.1 for major maintenance using Alaska Housing Finance Corporation receipts.

- FY12 and beyond assumes $50.0 capital appropriations for other components annually.

NEW INITIATIVES (Except Gasline)

Describe department assumptions for new initiatives (except gasline) appropriations estimates below;

- Foundation Program includes $2,000.0 for the Age 4 Pilot Program as part of Education Reform beginning in FY10 with a $2,000.0 annual increase through FY14 and flat funding projected from FY15 out to FY19 set at $10,000.0 annually. The annual increases will serve an additional 500 children per year under the pilot program and would reach a service level of 2,500 children in FY14 according to this scenario.

- Executive Administration includes an increment of $824.2 GF justified as follows: During the last legislative session, the legislature passed SB285 (Ch.70) adding AS 14.07.032 and amending AS 14.07.020(a) and AS 14.07.03, which provides the Department of Education & Early Development with the clear, legal authority to improve instructional practices in school districts. The funding in this increment will be directed toward district/school improvement in the areas of math, science, arts, information technology, networks, culture and social studies by contracting the services of specialists for nine-month periods during the school year. The department fully anticipates a critical need for additional contracted staff to address the increasing need to provide professional and technical assistance to school districts and has projected an additional $800.0 GF in FY11 with flat funding through FY19. General funds are critical and required to implement and support this state mandate.

- School Finance & Facilities includes an increment of $150.0 GF in FY10 to provide funding to contract for 3 regionally based auditors to review new claims for intensive students.

- Early Learning Coordination has an increase of $800.0 GF in FY10 to serve approximately 60 - 80 additional children in Head Start programs. Approximately

1,000 Alaska children remain on wait lists for Head Start. The department projects a need to increase the funding by $800.0 in FY11 and again in FY12 to add capacity to the program. The funding is projected to remain flat from FY13 to FY19 under this scenario.

- Professional Teaching Practices Commission will be funded with 252.1 GF to replace Receipt Supported Services revenue generated from teacher certification fees. In order to remain self-supporting, the Teacher Certification component no longer has the ability to distribute a portion of their receipts to PTPC.

Capital

- School Construction/Major Maintenance - $50,000.0 - Assumes Debt Reimbursement does not sunset and is re-authorized. FY11 through FY19 consists of an additional $50,000.0 to provide an annual split of $50,000.0 for major maintenance to address the ever growing backlog of projects and $100,000.0 for new school construction due to the deterioration of old BIA and Molly Hootch schools.

DRAFT

Alaska Education Plan

January 23, 2009

FROM: DEPT. OF EDUCATION

Introduction

Welcome to the Alaska Education Plan. Created by Alaskans from many walks of life, it is the state's first blueprint for public education. The plan provides the basis for accountability to the public.

The plan answers these fundamental questions: What is Alaska's vision for our schools and students? What are our goals? What attributes and skills do we want high school graduates to possess? What actions will allow us to meet these goals and make this vision a reality?

In short, the vision and goals in the Alaska Education Plan are our destination. The actions are the roadmap. Knowing where we want to go, we can determine if our expenditures of money and effort are efficiently and effectively getting us there.

The public, having a clear vision for our schools and students, can measure performance against these goals. The plan, which will periodically be reviewed and revised, encourages Alaskans to participate in the goal-setting process and own the results.

The Alaska Statewide Education Summit, held in November 2008 in Anchorage, initiated the effort to develop the Alaska Education Plan. Nearly 450 participants discussed education topics ranging from preschool to postsecondary, technology to finances, community partnerships to culture.

Two principles guided the summit's structure: focused conversations among those who gather in a common cause will produce a shared vision, and collective wisdom is generated when groups gather in discussion.

Participants met in eight groups, each group discussing a separate topic in education. Each group identified challenges, opportunities, goals and actions for its topic. A ninth group crafted vision and mission statements and graduation outcomes – a list of the desired skills and attributes that Alaska high school graduates should possess as a result of their public education.

The Alaska Education Plan organizes the results from all eight groups at the summit into three topics, in order to provide greater focus. They are World-Class Schools; Community, Culture, and Family; and Student Health and Safety. Other topics discussed at the summit -- such as finance, technology, early education, and partnerships – have been integrated throughout the three remaining topics.

Each topic in the plan includes a rationale for action, a goal, and broadly stated actions for each goal. Groups of Alaskans will continue to meet in 2009 to develop a detailed, prioritized action plan for each goal.

The Alaska Education Plan, related background documents, and its ongoing progress are featured on the web site of the Alaska Department of Education & Early Development at www.eed.state.ak.us/ .

Vision

Vision: An Alaska education opens a world of possibilities.

- Our parents value learning
- Our communities support dreams and create opportunities
- Our schools inspire thinking
- Our graduates build the future

Mission

Mission: Alaska's education system fosters creativity and curiosity, and embraces diversity. Alaska's students have the skills and knowledge to contribute to their local and the global community by understanding the past and present, and are prepared for the future.

World-Class Students
Graduation Outcomes

Possess a broad knowledge base

- Know and be able to discuss the critical bodies of knowledge in art, science, literature/language arts, history, geography and health in addition to being skilled in reading, writing, and mathematics
- Apply content knowledge to everyday situations
- Use prior knowledge to acquire new knowledge, develop new skills, and expand understanding

Communicate effectively

- Express ideas clearly, both verbally and in writing
- Communicate through listening and discussion with others
- Read, understand and respond to written information
- Understand and respond to verbal information

Use technology skills

- Use a broad range of technologies to pursue interests, investigate and solve problems, and communicate and share ideas
- Be personally accountable for the ethical use of technology
- Use the Internet to explore questions; collect, evaluate and select information sources; synthesize conclusions; and communicate the results

Think logically and critically

- Solve problems using questioning, reasoning, and analysis
- Acquire and manage information to understand and solve problems
- Understand and apply decision-making processes in a variety of settings
- Be able to select, use and evaluate information for specific purposes
- Explore, consider and evaluate divergent viewpoints and ideas

Be healthy

- Apply the knowledge, habits and attitudes that promote physical and mental health
- Participate in collaborative and responsible relationships
- Make informed and safe choices
- Set and achieve personal goals
- Connect with family and culture values

Recognize, value and use creativity

- Appreciate artistic expression
- Demonstrate creative thinking
- Show self-expression
- Honor traditional art forms

Be a responsible and ethical citizen

- Understand and participate in the democratic process
- Demonstrate respect for people and cultures
- Demonstrate respect for the environment and evaluate the use of resources
- Take responsibility for personal actions and understand the impact those actions have on others
- Demonstrate an ability to approach problems from a global perspective
- Be an effective and responsible decision-maker who contributes to the community
- Adapt to a diverse and changing world

Be an enthusiastic learner

- Make a commitment to create quality work and strive for excellence
- Use a variety of learning strategies, personal skills, and time management skills to enhance learning
- Reflect on and evaluate learning for self-improvement
- Understand the relevance of learning a broad range of skills

World-Class Schools

Rationale for action

World-class schools are the ultimate goal for Alaska's public education system. All the other goals feed into this. These schools will nurture the students described in this plan's graduation objectives as world-class students.

There are many success stories in Alaska's schools, ranging from caring teachers helping struggling students, to the graduates who fill our work places, to creative programs by school districts to teach students independent living skills and the skills for jobs or postsecondary (after high school) education.

And yet there are many gaps in the education of Alaska's children. Some students are already behind on their first day of kindergarten. As they grow older, roughly a quarter of students are less than proficient in one or more of the fundamental skills of reading, writing and math. Several categories of students are less likely to do well in school -- ethnic minorities, students with disabilities, students from low-income families, and students who don't know English well.

At least a third of Alaska students will leave school without a diploma. About 40 percent of recent Alaska high school graduates who attend the University of Alaska need remedial courses. Some Alaska high school graduates have completed their public education yet do not have a direction in life and are not prepared for a career, while well-paying, interesting jobs go unfilled.

World-class schools will have the support of families and communities. World-class schools will honor local cultures and integrate them into instruction.

World-class schools will have strong academic standards and high expectations for all students, yet these schools will support the varied needs and interests of each student, both in academics and activities. World-class schools will have the flexibility to provide alternative pathways to student success. They will offer career and technical courses, preparation and guidance.

World-class schools will attract, prepare and retain quality teachers and administrators. World-class schools will have appropriate facilities and technology. They will build partnerships with entities outside of the schools.

Goal

All students will graduate prepared for careers or postsecondary training and education.

Actions

1. Ensure that families, if they desire, can access in their community affordable, high-quality early care and learning programs for children ages 3-5.

2. Define an education system, aligned from preschool to postsecondary, that ensures all students are prepared to transition to the next level of education, career, or life path of their choice.

3. Review the state's academic standards to determine alignment with world-class 21st century skills and Alaska's graduation outcomes.

4. Establish partnerships that enhance readiness for postsecondary education, career preparation, and life.

5. Develop a staff development infrastructure that is collaborative, need-based, research-proven, and provides opportunities for continuous growth for new and experienced teachers.

6. Ensure that public and private postsecondary institutions, business and industry, tribal organizations and state agencies work collaboratively to develop and maintain a coherent educational plan designed to achieve Alaska's high education expectations.

7. Collaborate with Alaska's postsecondary institutions to ensure that education-related degree programs and staff development programs reflect research, best practices, Alaska's diverse cultures, and alignment to academic standards, and are sufficient in scale and scope to meet the public school work force needs.

8. Empower students by engaging them as active partners in their own learning through technology.

9. Ensure that teachers have the training to effectively use technology to support instruction.

10. Establish and maintain a statewide public telecommunications network that provides the opportunity for instruction, communication and distance education.

11. Ensure that the state foundation funding program is comprehensible to the public, sufficient to meet world-class performance expectations, responsive to the changing needs of Alaska's work force, and predictable enough to facilitate effective planning.

12. Provide consistent funding for school construction and major maintenance projects.

Community, Culture and Family

Rationale for action

Family engagement has emerged as a central focus in Alaska education. Viewing parents as the first and best teachers of their children goes beyond their role in early education. Engagement means involving families in every aspect of educational planning, implementation and evaluation throughout their children's education.

Engagement means more than inviting parents to attend school functions or parent conferences or to join the PTA. Parent involvement must be more than asking parents to approve decisions about the school or their children that have already been made. Schools that make adjustments for parents with busy schedules, different backgrounds and varying comfort levels with schools will enjoy more parental involvement. Relevant parent engagement is recognizing that the school serves the interests of parents.

When parents join with other community members and the school to determine behavioral expectations or learning goals for their children, they become partners in their children's education. Student achievement data can demonstrate how well a student is progressing toward the state's grade-level expectations, but only parent and student feedback can reveal how positive the learning climate is and how well the school is serving the community's valued interests.

Schools that support and celebrate school choice and family engagement must be committed to sharing information about program options, assessment data, and other information that is critical to evaluating what is best for children. Choice without knowledge has no meaning.

Goal

Schools will form strong partnerships with families and communities, and will respect and embrace local cultures.

Actions

1. Develop and implement strategies that encourage Alaskans to value and support education and lifelong learning.

2. Formulate a shared vision of community-based education that respects culture, school governance and community ownership.

3. Implement a system of data collection and reporting of prekindergarten-postsecondary programming so parents, communities, and policy makers can make informed decisions.

4. Increase diversity in the teaching profession.

5. Ensure that Alaska's standards for culturally responsive schools are applied.

6. Provide new and experienced educators with sufficient training and ongoing support to integrate and instruct within the context of a community's indigenous cultures.

7. Ensure that schools' instruction, organization and operational procedures reflect and respond to student, family and community values and needs.

8. Support opportunities for school choice, education alternatives and distance-delivery options that are high quality, standards-based and flexible to meet the individual needs of a child or family.

9. Provide support and resources for parents who choose to home school their children.

10. Create a sustainable infrastructure committed to developing and maintaining partnerships that enhance student success.

Student Health and Safety

Rationale for action

Creating healthy, safe schools requires healthy families and communities. Children who have a strong connection to family values, customs and beliefs develop the confidence to reach for a star and the talent to grab one.

If children cannot rely on positive connections at home, they will settle for any substitute that satisfies this longing, including gang affiliation, harmful relationships, violence, and drug and alcohol abuse.

Schools must be proactive, focusing on the prevention of unsafe and unhealthy practices. Several ingredients are necessary to create a safe and healthy school environment. Schools will form partnerships with community entities to achieve these goals.

Schools must consistently demand zero tolerance for violence, drugs, disruptive behavior, and harassment. Schools must provide support and intervention services for parents and students, a broad range of activities, rigorous academic and vocational programs, and learning alternatives that meet the interests and learning needs of every child and family.

School staff must receive training and support to enforce school expectations. Students, parents, educators and community members must teach and model a consistent set of values as the basis for every activity, program, lesson or expectation.

Schools should be models of healthy nutrition and physical activity, teaching students good habits. Approximately one in 10 Alaska children is obese. At least half of Alaska's children do not meet recommended levels of physical activity.

Goal

Students will have access to safe schools, where they develop healthy and safe practices for life.

Actions

1. Develop a comprehensive health and safety plan that uses the expertise of parents, communities, tribal organizations, social and civic organizations, state agencies, and school districts.

2. Implement health and wellness programs that address substance abuse, suicide, sex education, bullying, Internet safety, mental health, and personal safety.

3. Implement nutrition and physical activity programs to ensure that students develop patterns of lifelong healthy behaviors.

4. Ensure that students, staff and community members are provided safe and secure schools.

Department of Commerce, Community and Economic Development
Overview of the 10-Year Plan
February 3, 2009

BASELINE ASSUMPTIONS

- **Operating:** Continuation funding for programs existing in FY09
- **Capital:** After FY09, the capital budget numbers do not contain funding for legislative grants.

BASELINE

Operating

- Formula
  - Incorporates anticipated changes in federal funding for existing programs such as the National Forest Receipts program and the Payment in Lieu of Taxes programs.

- Non-formula
  - FY11: Assumes $1 million of federal funding for the Rural Utility Business Advisory (RUBA) program is replaced with general funds
  - Funding at the FY10 level for all operating programs

Capital

- FY10 includes Governor's request ($2.2 mill GF, $48.5 Fed, and $62.0 Other)
- FY11-FY19 includes funding DCCED's recurring capital requests: Community Block Grants, Community Assistance Grants, AEA Energy Projects, Renewable Energy projects, other on-going capital programs and a $2 million placeholder ($1 million in GF and $1 million in other funds) for other projects.

NEW INITIATIVES

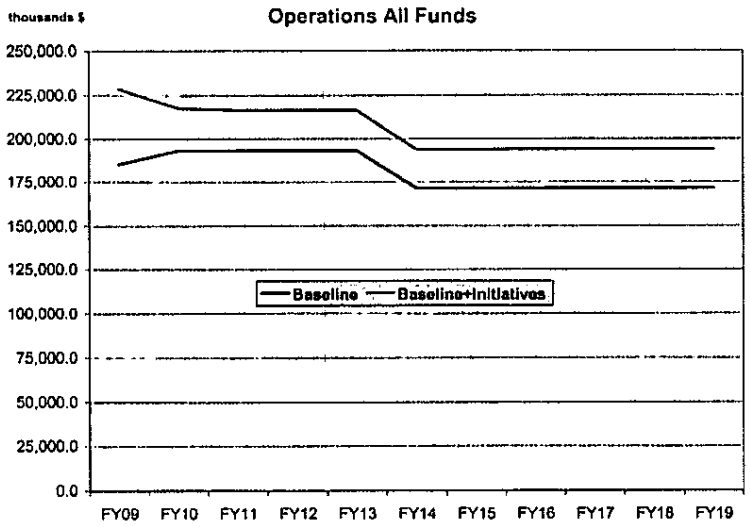
- Power Cost Equalization (PCE): FY10-FY19 funding assumes the FY09 $1 ceiling for the PCE program continues.
- Includes three FY10 Increments to support Energy Planning ($360.3 of GF and $541.0 Other funds)

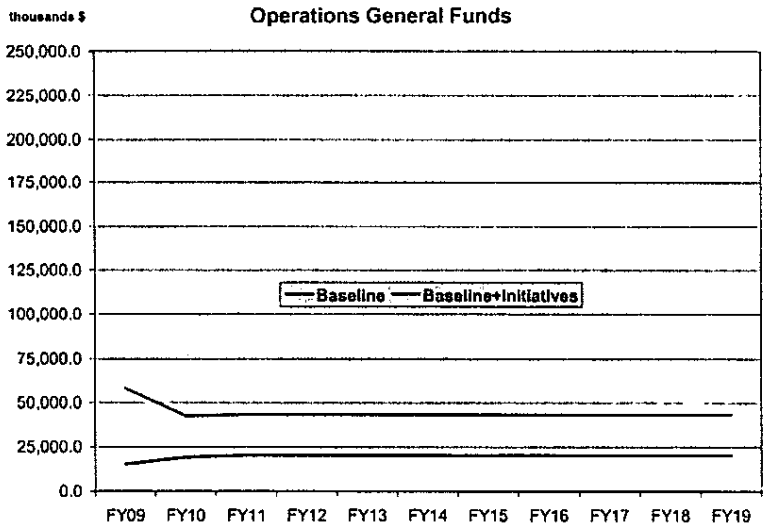
GASLINE RELATED BUDGET GROWTH: Commerce has no direct gas line appropriations. Due to the difficulty in quantifying impacts of the gas line on communities (hence on Commerce's budget) no gas line estimates were projected.

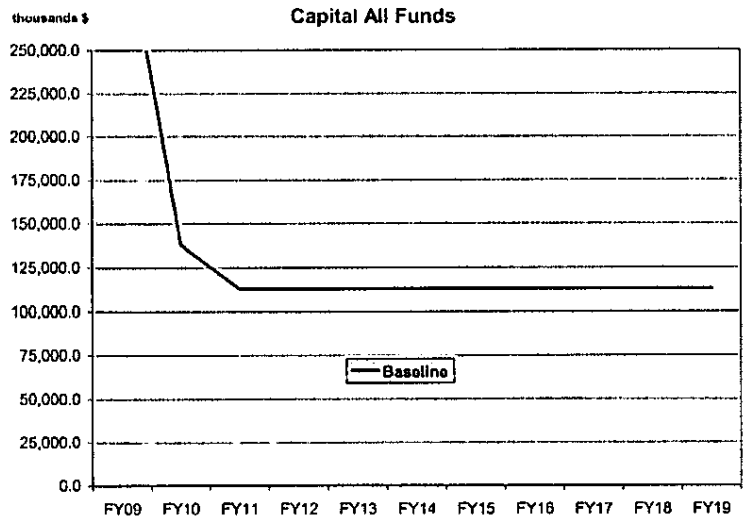
ITEMS EXCLUDED FROM DCCED'S LONG-RANGE FISCAL PLAN

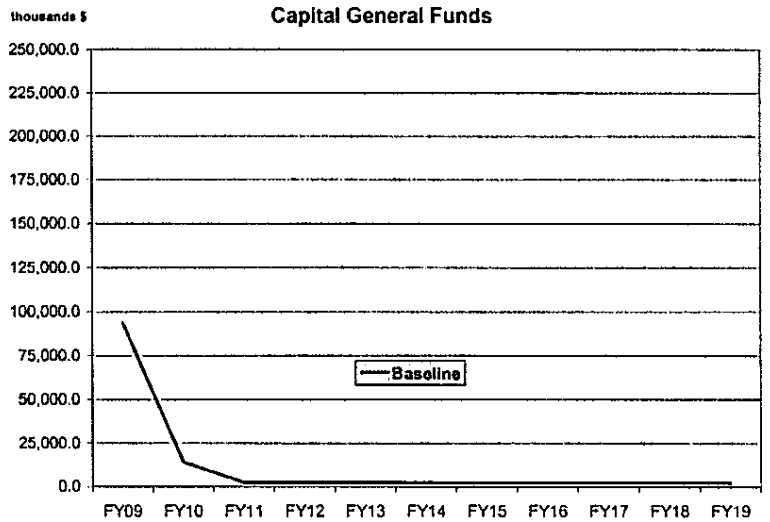
- Inflationary factors such as salary adjustments
- Funding that may be available in the Federal Economic Stimulus Package

Commerce, Community and Economic Development









Commerce, Community and Economic Development

1. Baseline wage and benefit increases are handled in the statewide spreadsheet.

Notes for FY09 Baseline Appropriations and department assumptions for FY10 and beyond

FY2009 Capital for Department Only (no legislative add-ons) = $70,350.0; GF=$13,950.0, GFM=$70.0, FED=$55,330.0 and OTH=$1,000.0.

Assumptions:

- Governor's FY10 budget is accepted except for exclusion of AEA Energy increments (totaling $360.3 of GF)
- FY11: $1 million increase in GF to replace lost federal funds in the RUBA program
- National Forest Receipts Program: assumes FY09-FY13 expenditures at the $22.3 million level. FY14-FY19 assumes program is eliminated
- Payment in Lieu of Taxes program holds steady at $10.1 million for FY09-FY13, FY14-FY19 assumes program expenditures at $5.0 million.

Department of Transportation and Public Facilities

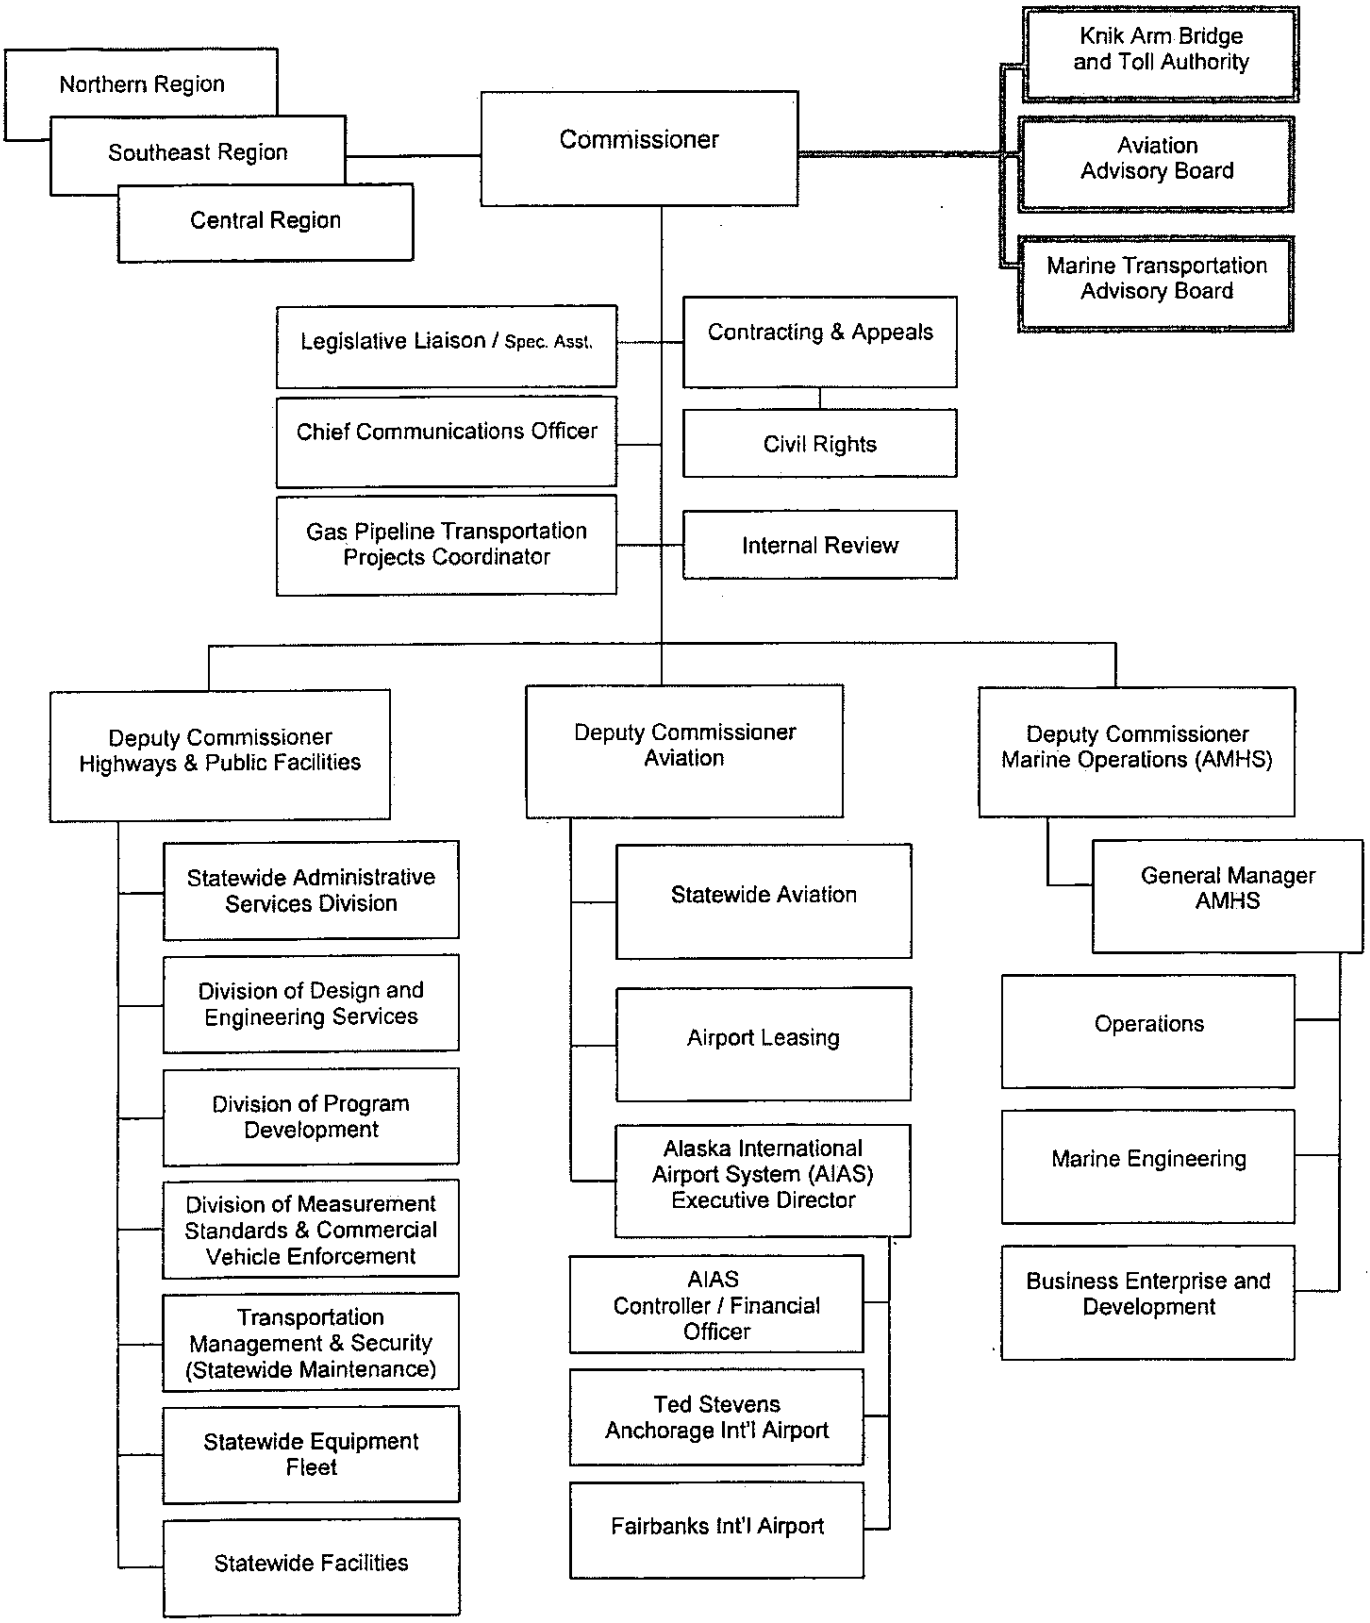
(December 2008)



Department of Transportation and Public Facilities
Select 2008 Accomplishments

- Transferred ownership of five docks and harbors to communities.
- Maintenance and Operations crews covered 1,563,794 linear feet of highways with surface crack seal treatment or re-leveling depressed roadway surfaces by "banding".
- Paved 33 lane miles of gravel roads.
- Repaved 213 lane miles of roads.
- Reconstructed 31 lane miles of roads
- Performed 529 bridge inspections.
- Completed 9,748 commercial vehicle inspections during FFY 08.
- Conducted airport pavement condition inspections on 1/3rd of all paved airports in the State.
- Between 2006 and 2008, fatal and major injury crashes dropped by 77% on the Seward Highway and 37% on the Parks Highway, Alaska's two designated safety corridors.
- Provided surface maintenance of either gravel or paved runways for 31 airports.
- Performed repairs on 34 bridges
- 17% reduction in square footage of structurally deficient bridges (2007-2008)
- Replaced 41 failing culverts - some over six feet in diameter.
- The Ted Stevens Anchorage International Airport, South Terminal Seismic and Security Retrofit Project, Concourse A was completed.
- In 2008 both AMHS passenger and vehicle ridership showed an increase in numbers from those of 2007.
- AMHS on-time departures were at 93% for 2008.

2.4.09

Department of Transportation and Public Facilities
Executive Summary of 10 Year Fiscal Plan

Baseline Budget

- Operating
  - Governor's request used as base for FY10
  - Used 2.75% inflation on non-personal services budget
  - Wages and benefit increases provided on a statewide basis
  - Fuel and utilities projections also provided on a statewide basis
- Capital
  - Identified regular, reoccurring capital programs (deferred maintenance, federal highway and aviation programs, match for federal projects, AMHS vessel overhaul, etc.)
  - Federal Surface Transportation Program kept at current level
  - Used 4% inflation for construction related projects/programs

Gas Line Initiatives – 4 competing projects, 2 large dia. and 2 small dia.

- Operating
  - Program management and right-of-way impacts during DOT&PF construction
- Capital
  - $2 billion infrastructure need to support the gas line
  - Timing is based on what can be accomplished in time for delivery of pipe

New Initiatives

- Operating
  - Continued additional services identified in the Governor's FY10 request (sidewalk clearing, Unified Carrier Registration program)
  - Identified additional needs in FY11 and beyond (equipment operator apprentice program, addition of new buildings and lane miles)
  - Reflect cost savings related to power management system added to AMHS vessels
- Capital
  - Projects were identified that are important to the safety of the traveling public and the continuing economy of the state – such as:
    - AMHS shuttles
    - Safety Corridors
    - Connect Anchorage and Highway to Highway programs
    - Rut repair
    - Salt Storage Buildings to meet EPA requirements
    - Rural airport lease lot improvements
    - Nome State Office Building
    - Various road, bridge and facility projects of high importance
  - Used 4% inflation for construction related projects/programs

Office of the Commissioner

Sarah Palin, Governor
Emil Notti, Commissioner

January 20, 2009

Dear Legislators:

The following is a brief overview of the Department of Commerce, Community, and Economic Development's Divisions and activities. The overview will provide you with a glimpse of our division's activities, a brief synopsis of what each division does and what we have accomplished in the last year.

As part of this introduction we have provided a summary of the general operating budget, source of funds, and expenditures to try to give you a context for individual budget presentations by each division. This report describes in detail only the line or internal divisions. The independent corporations or authorities of the Department of Commerce, Community, and Economic Development are summarized at the end of this report. More detailed descriptions of their activities and budgets will are provided in the divisions narrative in this publication.

As Commissioner, my priority for this coming year is to address the sustainability of communities, especially in rural Alaska, and statewide economic development. One of the most important economic development issues in the State is the Energy issue. Another issue involves strategies for statewide economic development that can provide jobs and opportunities for communities.

Another initiative of the Department and Alaska Energy Authority is developing long term plans for energy independence, replacing rural community dependence on diesel fuels, establishing an economic development plan in conjunction with AIDEA, and providing jobs in chronic high unemployment regions of the state. We are providing for the future of the State on a variety of fronts.

The Department is moving forward. I am continuing to organize the Department to best accomplish our mission and to address the priorities we have set for accountability and better consumer protection.

I look forward to working with each of you to better serve your respective constituencies. Thank you for reviewing this report and please feel free to share your recommendations with me.

Sincerely,

Emil Notti

Emil Notti

Department Budget Overview

Emil Notti,
Commissioner

Our Mission:

Promoting a healthy economy and strong communities.

Contact:

Office of the Commissioner
P.O. Box 110800
Juneau, AK 99811-0800
Phone: 907-465-2505
Fax: 907-465-5442

The total FY 2010 operating budget request for the Department of Commerce, Community and Economic Development is $187,618,100. This includes a general fund reduction of 48.6% from the FY2009 Management Plan (a decrease of $18.5 million). This decrease is primarily due to the removal of $23 million of general funds used to pay for a one-year increase in the ceiling of Power Cost Equalization formula from 52.5 cents to $1/kWh.

General Fund Changes. To more accurately compare budgetary changes, when the $23 million one-time PCE funding is removed from comparisons, the Department's GF increases by $4.5 million. The requested increases can be broken into two groups: budgetary changes that *maintain* the current level of service or budgetary changes that *increase* the level of service. About $4.36 million is requested to *maintain* the current level of service as follows:

- $2 million of GF to replace business license revenue due to the annual reduction in fees from $100 to $50
- $1.9 million of GF in ASMI to replace lost federal and other revenue
- $255.5 of GF for contractual salary increases
- $210.3 of GF for the AEA Executive Director/Statewide Energy Coordinator

The only general fund budgetary change that *increases* the current level of service is $150,000 of general funds to the Alaska Energy Authority to support the implementation of alternative energy and other energy initiatives.

Non-General Fund Requests. The Power Cost Equalization request program is fully funded under the traditional statutory formula and $32.8 million is the estimated amount needed for this—down from $51.1 million in FY09.

The recently passed Economic Stimulus package increased federal funds for the Payment in Lieu of Taxes (PILT) program and the National Forest Receipts programs by more than 50%. A $3.7 million increment is requested for the PILT program and another $6.3 million is

requested for the National Forest Receipts. All of the funding for these programs is distributed to communities.

Capital Budget. Finally, the overwhelming majority of our $138,311,401 capital budget request is for projects that pass through the Department to our associated organizations, corporations, and communities. For example, $17.5 million ($3.5 million GF) is requested for the Alaska Aerospace Development Corporation's new launch pad and rocket motor storage facility; $31 million for Alaska Energy Authority projects ($21 million federal funds); Community Block Grants, match for Denali Commission rural transportation projects.

Significant Budget Changes

Divisions within the Department

Commissioners Office

Significant Budget Changes (in thousands):
1. Increase to reflect increases in core services: $171.0
2. Cost-of-living increases per union agreements: $7.8

Division of Administrative Services

Significant Budget Changes (in thousands):
1. Increase to reflect increases in core services: $8.2
2. Cost-of-living increases per union agreements: $76.9

Serve Alaska

Significant Budget Changes (in thousands):
1. Cost-of-living increases per union agreements: $4.9

Division of Banking and Securities

Significant Budget Changes (in thousands):
1. Increase to reflect increases in core services: $8.2
2. Cost-of-living increases per union agreements: $39.0
3. Implement mortgage licensee examinations every three years: $208.0

Division of Community & Regional Affairs

Significant Budget Changes (in thousands):
1. Cost-of-living increases per union agreements: $110.8
2. Replace $2 million of Business License revenue with GF due to reduction in cost of a business license
3. Remove excess expenditure authority: $340.6

Division of Corporations, Business, and Professional Licensing

Significant Budget Changes (in thousands):
1. Increase to reflect increases in core services: $26.4
2. Cost-of-living increases per union agreements: $98.9

Division of Insurance

Significant Budget Changes (in thousands):
1. Reflect funding for temporary positions working on an imaging capital project: $122.8
2. Cost-of-living increases per union agreements: $100.1

Division of Investments

Significant Budget Changes (in thousands):
1. Increase to reflect increases in core services: $13.6
2. Cost-of-living increases per union agreements: $77.2

Office of Economic Development

Significant Budget Changes (in thousands):
1. Reflect contract with DMV to provide services to Tok and surrounding communities: $40.6
2. Cost-of-living increases per union agreements: $25.2
3. Fund each Alaska Regional Development Organization at the FY 09 level: $57.7

Corporations, Agencies, and Contracts within the Department

- AEA Energy Projects: $31 million ($20 million federal and $11 million other)
- AEA-Denali Commission Match for rural Power System Upgrades: $10 million Other Funds

Commissioner's Office

Overview

Emil Notti,
Commissioner

Our Mission:

Promoting a healthy economy and strong communities.

The Department continues to make the organizational changes needed and necessary to carrying out our mission. We have made personnel changes in the Director's level of several Divisions and our Legislative Liaison position has a new face. I believe that our new Directors and Legislative Liaison are very capable and will serve the Department and the people of Alaska in an outstanding manner.

The Commissioner's Office has one Deputy Commissioner position filled and another authorized but with no funding. In these difficult economic times that has probably been unavoidable. Even though the mission of this Department is extremely diverse and demanding, our ability to manage the responsibilities of being not only the representative of commerce as well as community issues of the State has made me proud.

The Department is certainly in the middle of many exciting initiatives and activities. Whether it is our involvement in developing a strategy for alternative energy under the leadership of our Alaska Energy Authority, the participation of the Department in development of Climate Change Policies, the involvement of our staff in the creation of a Statewide Economic Development Strategy through the Alaska Industrial Development Authority, ensuring the health and credibility of our financial institutions, the protection of our residents from fraudulent schemes, or the safeguarding of the welfare of our rural communities in very difficult economic times, our Department and our staff are dedicated and capable.

Certainly the State finds itself, as does most of the world, in times of uncertainty and stress. However, the opportunities for Alaska certainly outshine most other states and some countries. But these are only opportunities and opportunities missed are doubly vexing. The Department must continue to provide essential services to the State of Alaska's residents if we are as a state to benefit from our unique geography, resources and people. I am committed to ensuring that each unit of this Department is fulfilling its mission in a way that lives up to the promises given upon the creation of this organization fifty years ago.

Division of Administrative Services

Amanda Ryder,
Director

Our Mission:

To provide management services and centralized administrative support to the divisions and agencies in the department.

Contact:

Division of Administrative Services
P.O. Box 110803
Juneau, AK 99811-0803
Phone: 907-465-2505
Fax: 907-465-2563

The Division of Administrative Services provides management assistance to the Commissioner and professional support services for the Department's divisions and agencies. Centralized administrative support includes operating/ capital budgeting, financial management, procurement, property control, personnel actions and recruitment, and information technology.

The Finance Management Section reconciles grants and cooperative agreements with expenditures, prepares reimbursement requests, records receivables, and federal reports. The Department is substantially funded by sources other than State general funds. Most of the revenue received in the Department are revenues generated by the Department as well as federal receipts. The Division also develops the Department's cost allocation plan, calculates indirect costs and negotiates approval with the Federal Division of Cost Allocation. The Division prepares audit responses to audit recommendations and findings from OMB internal auditors, federal auditors and special audits conducted by state legislative auditors.

The Budget section provides departmental policy, procedures, processing, training and controls relating to the operating/ capital budget and ensuring compliance with state laws and regulations.

The Procurement Section provides services for all procurements over $25,000, professional service contracts, and alternate and exempt procurements. Procurement within DCCED is conducted in accordance with applicable laws and regulations.

The Information Technology (IT) Section focuses on providing coordination of computer services and programming activities to the entire department. At any one time, the IT section has between 20 and 25 active projects in various stages of implementation. The IT section chief acts as the Department liaison to the Department of Administration

Enterprise Technology Services. Key services include desktop deployment and support, custom systems programming and maintenance, website development and maintenance and providing all aspects of the computing infrastructure that the Department requires in fulfilling its mission.

Accomplishments in FY08

Supply and Inventory. Programs were implemented to improve purchasing and property management systems allowing a smoother yearly inventory process as well as better tracking and documentation of the department's property.

CBP Portal. A custom portal was developed for the Division of Corporations, Business and Professional Licensing to integrate the division's applications into one location for ease of use.

Business Licensing. Developed a completely new .Net application to track and issue business licenses for the Division of Corporations, Business and Professional Licensing.

Tax Assessor Reporting. Implemented a new system to provide enhanced reporting capabilities to the state tax assessor's office.

Oracle Strong Passwords. Implemented new rules for password creation, retention and expiration for the Department's oracle users to provide for better security.

Suite 1770
Anchorage, AK 99501
Phone: 907-269-4659
Fax: 907-269-5666

The Alaska State Community Service commission (ASCSC) was created in 1994 by Governor Walter J. Hickel to establish the state's eligibility to receive AmeriCorps funding. In November 2008 Administrative Order 245 was issued to change the name to ***Serve Alaska.*** The State commission is comprised of a 15-25 member Governor appointed nonpartisan board. The composition of the Commission is legally constrained to ensure non-partisanship and political neutrality. The National and Community Service Trust Act and administrative regulations issued in conjunction with it, specify requirements for balance in the Commission.

Based on population and funding availability, the Commission recommends formula and competitive applications to the Corporation for National and Community Service. Applications are selected based on their ability to address unmet community needs in education, public safety, disability inclusion, homeland security, faith-based and community initiative, environment or other human needs.

Our Goals

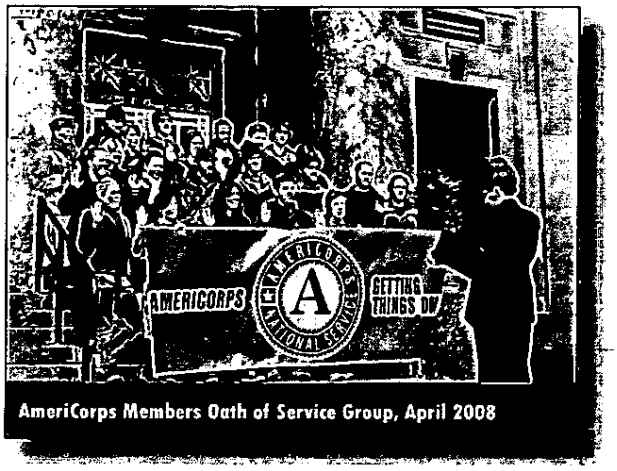
To more effectively serve the populace of our state, Serve Alaska will place a priority on programs that address statewide needs. Programmatic focus areas shall include the following:

- Developing Young Alaskans: projects could include but are not limited to: life skills development, job readiness or education.
- Meeting the Needs of Rural Alaska: projects could include but are not limited to: health, environment, and youth development.
- Meeting Alaska's Social Needs: projects could include but are not limited to: prisoner reentry, domestic violence, and drug and alcohol dependency. **Serve Alaska**, the State Service Commission's Core Service is

Vibrant and caring communities strengthen and sustained through service and volunteerism

In Alaska last program year:

- **AmeriCorps members** served 275,400 hours in meeting critical community needs in education public safety, health and the environment (Based on $17.50 as an hourly wage this would equate to $4,181,950. AmeriCorps members can not replace an employee);
- **AmeriCorps members** providing tutoring & mentoring services resulted in 373 individuals receiving their GED;
- **AmeriCorps members** assisted 476 ex-offenders with service for re-entry, 32 of the ex-offenders received full-time employment as a result of the services provided;
- **AmeriCorps members** coordinated backhaul and recycling for 20 rural communities resulting in 1,113,402 pounds of solid waste removal;



AmeriCorps Members Oath of Service Group, April 2008

- **AmeriCorps members** recruited and engaged 6,669 volunteers in a wide variety of activities related to education, public safety, health and the environment.

In **Alaska** between March 1, 1994 and March 1, 2008

- There have been 2,558 AmeriCorps members enrolled, serving 3,221,148 hours of service and earned $6,049,584 of the Segal AmeriCorps Education Awards (scholarships).
- Between March 1, 1995 and March 1, 2008 $2,541,428, of the Segal Education Awards have been used to attend the Alaska Title IV Universities and Vocational Training Institutes.

The state **must** have a state commission in order to access the AmeriCorps funding

375 students have participated in the **Learn and Service America** programs in the state. The primary difference in service learning and community service projects is **Service Learning** must connect the service to the curriculum.

Banking Section

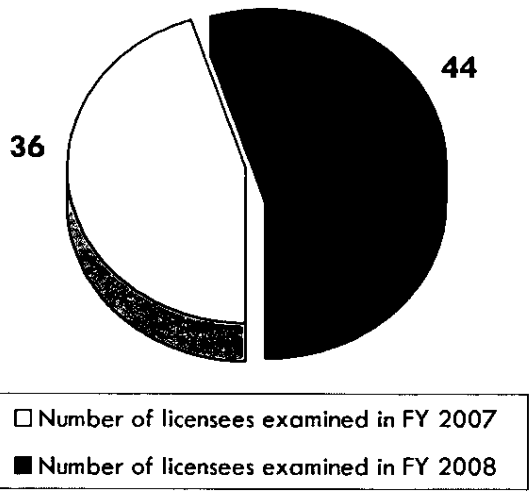
Seventy-one financial institution offices are subject to regulation by the Division, including banks, credit unions, trust companies, small loan companies, payday lenders and premium finance companies.

Our Accomplishments:

- We conducted examinations of more than half of the licensees we supervise, representing 44 licensed locations; the majority of examinations were conducted on the premises of the institution.

  (Note: most institutions are examined once every 18 months as required by statute).

Examinations Conducted



- As a result of our investigations, the Division required refunds directly to Alaska borrowers of approximately $10,000 in finance changes and fees.

- We approved licenses for four new payday lending businesses; and four new licenses for premium finance businesses.
- One payday loan licensee voluntarily surrendered their license due to a felony conviction.
- The Division approved the merger of a national bank by a state bank.
- The Division approved the sale of a state chartered trust company.

Securities Section

The Mission

The Securities section of the Alaska Division of Banking and Securities administers and enforces the Alaska Securities Act and associated regulations. The administrative function includes regulating securities offerings (stocks, bonds, mutual funds, etc.) and registering the firms and individuals who sell securities or give investment advice.

The enforcement function includes handling complaints and investigations of registered entities and regulated offerings as well as investigating unregistered activities (scams), whether offered directly by an individual or via phone, internet, newspaper, or public meetings. The Securities section's primary mission is protecting Alaska residents from investment activities that may cause financial harm.

Highlights

The Securities section in FY 2008 generated approximately $13 million in revenue with a budget of approximately two million dollars. The operation of the section is completely industry-supported through the assessment of various fees.

Activities

- Completed the registration of over 60,000 broker-dealer and investment adviser firms and their agents.
- Completed the registration of over 5,000 mutual funds to be sold to Alaska investors.
- Completed the registration of almost 300 exempt securities transactions for the creation of Alaska businesses.
- Completed the registration of almost 350 security offerings.
- Completed or in process of completing over 50 securities investigations. The Division's goal is to conduct a thorough investigation to determine if a law has been violated and protect investors and Native shareholders.
- Completed 13 determinations or interpretive opinions regarding securities issues.

Major Accomplishments

- Conducted investigations of several brokerage firms regarding the failure of the Auction Rate Securities market. The Division

received complaints that represented almost $100 million in invested funds. Final resolution of the complaints will continue into FY 2009.

- Planning outreach for FY 2009 in coordination with AARP to deliver investor education to fourteen communities. In FY 2008, delivered investor education program with AARP to eleven communities and over 1,500 Alaskans.

ANCSA Oversight

In FY 2008 the Securities Section reviewed ANCSA documents and investigated 35 complaints that certain reports and materials were untrue or misleading.

Consumer Finance Section

In addition to its banking and securities sections, the Division added a third section in response to added responsibilities under two new laws which came into effect July 1, 2008:

- The Alaska Mortgage Lending Regulation Act, under which the Division licenses, examines and regulates mortgage loan originators, brokers and lenders.

- The Alaska Uniform Money Services Act under which the Division licenses, examines and regulates money service businesses (businesses which sell or issue money orders, traveler's checks or stored value cards, receive money for transmission, and exchange currency).

Our Accomplishments

- In the final months of FY 2008, the Division set up the new section's structure, office space and prepared to hire more staff.

- The section is now up and running in FY 2009 and is conducting licensing activities under these new laws. It is anticipated that 200 licenses for mortgage lending and 35 licenses for money service businesses will be issued during FY 2009.

Fax: 907-269-4539

DCRA is a small Division of 60 dedicated staff that strive to meet its constitutional mandate to "advise and assist local governments." Much of our attention is focused on smaller communities because of their limited resources and need for this type of technical assistance. DCRA maintains seven offices throughout the state to allow staff a closer relationship with our constituent groups. The breadth of programs offered by DCRA is significant. Services include providing technical assistance for local government administration and rural utility management, Municipal Trust Lands management, administration of more than 2,000 grants, coordinating community mapping projects, preparing reports on municipal boundary alterations for the Local Boundary Commission, and researching a myriad of other issues affecting Alaskans. DCRA also plays a significant role in collaborating with other agencies for the benefit of Alaska's rural communities.

Our Accomplishments

Rural Utility Business Advisor Program, or RUBA, provides technical assistance for effective rural utility management. The majority of DCRA's regional office staff is RUBA and funded by the federal Environmental Protection Agency (EPA). RUBA staff is charged with providing the technical assistance necessary to manage sanitation services in rural Alaska. A small number of DCRA staff complement the RUBA program and provide local government assistance to those communities that do not participate in the federal program.

RUBA staff and local government specialists made 182 trips to 172 communities for a total of 470 days of on-site assistance in the areas of utility management, financial management, personnel issues, elections and ordinance adoption. Staff presented nine 32-hour Utility Management classes in six regional locations throughout the state to 102 utility managers. Contractors funded by RUBA presented three regional QuickBooks accounting classes to 32 participants representing 23 communities. Contractors also completed on-site installation and training for QuickBooks in the communities of Port Lions, Houston, Fort Yukon, and Thorne Bay.

Municipal Lands Trustee Program: DCRA assistance was instrumental in the settlement of land claims and the submission of boundary maps for the communities of Igiugig and Chefornak. ANCSA 14(c) lands were surveyed in Ninilchik, Mekoryuk and Naknek. Final plats were recorded for Allakaket, Kaltag, and Twin Hills.

Community Planning: DCRA Planning section provides technical advice, training, and funding opportunities for community and regional planning. These services include the National Flood Insurance Program which provides an opportunity for individuals, businesses, and renters in 32 cities and boroughs to purchase flood insurance coverage. Planning staff also serves as coordinator for the Newtok Planning Group, a multi-agency group assisting the Native Village of Newtok in its relocation efforts.

Grants and Financial Aid to Communities: DCRA grant administrators administered $900 million representing 11 programs with an average of over 200 grants per administrator. DCRA is also responsible for administering several state and federal shared revenue programs which provide financial assistance directly to communities, including Community Revenue Sharing, Payment in Lieu of Taxes, National Forest Receipts, Shared Fisheries Business Tax, and Fishery Resource Landing Tax.

Staff to the Local Boundary Commission: In 2008, DCRA replaced the LBC Director with Brent Williams. LBC worked on major issues involving Commission decisions: incorporation of a new Wrangell borough; and, annexation to the Ketchikan Gateway Borough. As a result of the Commission's revised regulations that took effect, January 9, 2008, LBC staff initiated required revisions to all boundary-change petition forms.

State Assessor's Office: The annual full value determination for taxable property in 84 municipalities was again completed within statutory deadlines. The office presented ten training workshops on assessment practices and Boards of Equalization. New personal property value models reflecting full values of several different categories of property were developed. The office also conducted audits on assessment practices for Ketchikan Gateway Borough, Haines Borough, Kenai Peninsula Borough and the Fairbanks North Star Borough. The office also assisted the Kenai Peninsula Borough assembly with reviewing assessment alternatives for tax purposes. This involved several meetings with the assembly and the public to investigate allegations of problems with the current methodology.

Research and Analysis: DCRA's research section maintains widely used Community Profile and Capital Projects databases. The database provides internet access to every municipal budget and year-end financial statement submitted to DCRA annually. The Financial Documents Delivery System is available through DCRA's website. The section also publishes reports on fuel prices across Alaska, as well as bi-monthly reports on liens filed against rural local governmental entities.

Phone: 907-465-2530
Fax: 907-465-3257

The Division of Corporations, Business and Professional Licensing regulates 39 professional and occupational licensing programs and administers the Alaska business licensing and corporations programs. Each year, the Division regulates over 100,000 individuals, businesses and corporations that offer services to Alaska consumers. To effectively administer these regulatory programs, there are 20 professional licensing boards and commissions established by Alaska Statutes that regulate certain industries. Individuals who serve on these boards and commissions are appointed by the Governor, confirmed by the Legislature and are comprised of industry and public members. The Division provides administrative, budgetary, and investigation services to the regulatory programs when appropriate. There are 19 programs solely administered through the Division without the oversight of a board or commission.

The Division licenses businesses to engage in commerce in Alaska and grant tobacco endorsements for sale of tobacco or tobacco-related products. The Division also registers corporations and trademarks for entities engaged in commerce in Alaska.

- Serve as a one-stop location to investigate and resolve consumer complaints regarding state licenses, state licensed non-depository lending, money service companies and other state licensed businesses.
- Provide consumer outreach and education regarding consumer borrowing and the use of state licensed professionals.

Issues Addressed in 2008

- Implementation of the Alaska Mortgage Licensing Regulation Act.
- Prescription Drug Monitoring Program signed into law.

- Veterinary students in their fourth year are authorized to perform an internship in Alaska. Statutory changes were also enacted allowing researchers and out of state experts to assist State licensed veterinarians without encountering licensing issues.
- The Division is encouraging licensees to use the web for renewals by mailing notices instead of renewal forms to licensees and advising how to renew online or how to download application forms.
- Coordination efforts between U.S. Coast Guard, U.S. Customs Office, Alaska State Troopers and local harbormasters' offices has resulted in greater compliance of marine pilot exemption laws on foreign pleasure craft entering southeast waters.

Coming in Fiscal Year 2010

- Online capabilities for licensing programs that currently do not have online capabilities.
- Provide new guide unit area maps for the Big Games Commercial Services Board along with access to Guide Hunt and Transporter Activity Records via the internet.
- Business license fees are decreased from $100 to $50 annually.

Division of Insurance

Linda Hall, Director

Our Mission:

To assure competitive, viable, ethical and lawful insurance is available to Alaskans

Contact:

Division of Insurance
550 W 7th Ave Ste 1560
Anchorage, AK 99501
Phone: 907-269-7900
Fax: 907-269-7910

The Division of Insurance provides the regulatory framework for insurance industry operations in Alaska and impacts consumers, agents, and insurance companies. Oversight of both the financial solvency and the underwriting and claims practices of insurance entities is a primary regulatory function.

For FY 08 total premium taxes and penalties collected by the Division on insurance business written in Alaska were $48,494,318 with an additional $11,510,009 collected in fees from the entities regulated for a total revenue attributed to the Division of $60,004,327. Total premiums written in Alaska in calendar year 2007 was $2.926 billion with 1,068 insurance companies doing business in Alaska on an admitted basis.

The National Association of Insurance Commissioners renewed the Division's accreditation in September of 2007. This accreditation is a recognition that the financial analysis and examinations performed by the Alaska examiners can be relied upon by other regulatory jurisdictions.

Core Services

Licensing

The Licensing section oversees and administers licenses of agents in compliance with Alaska statutes and regulations as one component of the emphasis on public protection in the Division.

Compliance

Compliance is monitored by the Financial Examination section and the Market Conduct section. These sections enforce statutes and regulations and conduct examinations of insurance companies and agencies. The third compliance section is Financial Reports and Audits which enforces statutes and regulations on tax and surplus lines matters and collects premium tax revenue for the State.

The Financial Examination section conducts examinations that are the primary method of oversight of the financial condition of insurance companies and focus on solvency. The Market Conduct Examination section monitors the insurance market for signs of problems. Both sections work collaboratively with the other Division sections to provide technical support.

Investigations

This section investigates alleged or suspected fraudulent insurance activities. In FY 2007, 54 cases were opened and reviewed in the Investigation section. Since early 2006 there have been eight criminal convictions.

Filing Approval

The Filings Review section monitors the raters and policy forms used by insurers providing insurance coverage for Alaskans. The rate review considers the funds needed to pay claims. In 2007, the section reviewed 4,022 rate and form filings.

Public Information

Public information and education are key to preventing insurance fraud and promoting consumer protection. Outreach efforts include presentations to community groups and press releases about current insurance topics. In addition, education materials are prepared, such as guides for consumers on Homeowners and Auto insurance, long term care and many more.

Consumer Services specialists investigation complaints, gather and evaluate data, research insurance laws and take appropriate action to bring the complaint to proper resolution.

In 2007, 331 consumer complaints were opened and the specialists resolved complaints that provided additional benefit payments to consumers of $634,228. The Division web site includes an electronic consumer complaint form which has made reporting a complaint to the Division easier.

Number of Licenses Maintained by the Division of Insurance

Division of Investments

Greg Winegar,
Director

Our Mission:

Promote economic development and provide interagency and interdepartmental servicing of loan portfolios that increase operational efficiencies and to protect the State's investments in the loan funds administered by ADI while providing a return of capital when it does not impair program missions.

Contact:

Division of Investments
PO Box 34159
Juneau, AK 99803-4159
Phone: 907-465-2510
Fax: 907-465-2103

The Alaska Division of Investments (ADI) mission is to promote economic development and provide interagency and interdepartmental servicing of loan portfolios that increase operational efficiencies and to protect the State's investments in the loan funds administered by ADI while providing a return of capital when it does not impair program missions.

Lending

ADI accomplishes its mission by administering and servicing thirteen loan programs under the Department of Commerce, Community, & Economic Development. These programs were primarily designed to promote economic development through direct state lending in industries and areas of the state that are not adequately serviced by the private sector. Private sector financing for these programs is generally not feasible due to limitations on the types of collateral available or because of a higher level of risk.

Active lending is available in six loan programs: Capstone Avionics, Commercial Fishing Revolving Loan Fund, Fisheries Enhancement Revolving Loan Fund, Small Business Economic Development Revolving Loan Fund, the Rural Development Initiative Fund and the Self Help Group Home Loan Program. These programs accomplish important policy goals as they create jobs for Alaskans, generate significant economic activity and provide a revenue stream back to the state in the form of earnings. These programs are completely self-sufficient and receive no support from the General Fund.

ADI provides loan servicing in six portfolios for four other state agencies: the Alaska Industrial Development and Export Authority, the Division of Community & Regional Affairs, the Department of Health and Social Services, and the Department of Environmental Conservation.

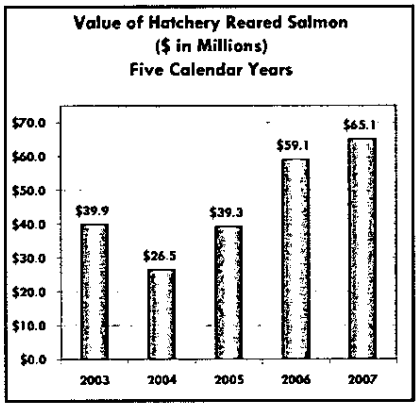
Commercial Fishing Revolving Loan Fund

This program benefits Alaska's economy by promoting the development of a predominantly resident fishery. This is accomplished by providing low interest rate loans to Alaskan commercial fishing harvesters to help them purchase limited entry permits, quota share, vessels and gear. During FY 08 120 new loans were made totaling $6.7 million. A total of 361 jobs were either created or saved as a result of these loans.

In September 2008 ADI created a new loan program that will provide low-interest loans to commercial fishing vessel owners who wish to replace older engines with new, more fuel efficient engines. These loans not only improve the viability of Alaskan fishing operations, they also benefit the environment by reducing the industry's carbon footprint. Since inception twenty-six loan applications have been received totaling $1.2 million.

Fisheries Enhancement Revolving Loan Fund

This program promotes the enhancement of the State's fisheries by making loans to qualified nonprofit corporations to build and operate salmon hatcheries and to engage in other fisheries related enhancement activities. During FY 08 four loans were made totaling $2.2 million. Salmon hatcheries provide a significant financial contribution to numerous coastal economies.



Rural Development Initiative Fund

This program benefits Alaska's economy by creating jobs and generating economic activity in communities of 5,000 or less. During FY 08 a total of five loans were made that created or saved forty-seven jobs.

Small Business Economic Development Revolving Loan Fund

This program benefits Alaska's economy by creating jobs and generating economic activity in areas of the state that have experienced economic difficulties. During FY 08 a total of seven loans were made that created or saved seventy jobs.

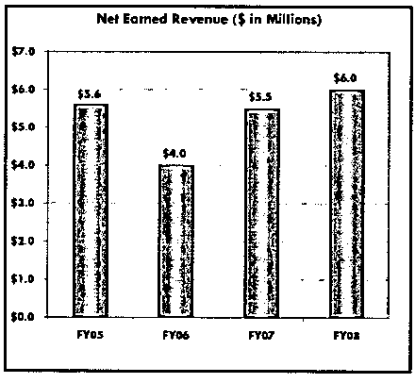
Alaska Capstone Avionics Loan Program

The Alaska Capstone Avionics Loan Program (Capstone Program) was implemented July 1, 2008. The Capstone Program is a joint endeavor involving both federal and state government and private industry in an effort to improve aviation safety as well as enhancing economic efficiency in the State of Alaska. The Capstone Program provides low interest loans to aircraft owners that fly a substantial number of flight hours in Alaska so that they can purchase Capstone Avionics equipment. This equipment allows aircraft to interact with ground infrastructure and satellite stations to provide pilots with a whole package of real time data needed for safe flight. The Federal Aviation Administration (FAA) has committed to installing and maintaining the required ground infrastructure (approximately $493 million) if a sufficient number of aircraft owners install the Capstone Avionics equipment. A pilot project demonstrated that aircraft equipped with Capstone Avionics were involved in 47% fewer accidents. The FAA estimated that the state could reap $824 million in safety and

community access benefits over the next twenty-seven years as a result of this new technology. ADI developed program regulations, policies and procedures, accounting infrastructure and servicing guidelines by the July 1st implementation date. Since inception, six loans have been made totaling $562,100.

Net Earned Revenue used for Government Operations

In addition to accomplishing very important policy goals, proper financial management of the loan portfolios creates earnings that can be made available for the operations of state government without sacrificing program goals. Improved market conditions and efficient program management resulted in increased earnings in FY 08.



Volunteer Tax & Loan Program

ADI supports and promotes economic development not only through their loan programs, but also through the Volunteer Tax & Loan Program (VTLP), which has been operating successfully since it originated in 1996. The VTLP was created as an effort to lay a foundation for strengthening the commercial fishing industry and rural Alaska's fishing community's economy. The VTLP program is a cooperative effort between ADI, the Alaska Business Development Center (ABDC), the University of Alaska Anchorage, the Internal Revenue Service and the private sector. Each year ABDC's VTLP sends volunteers to rural communities to assist taxpayers with the completion of tax returns and provides them with tax education. The program also serves taxpayers through a mail-in site located in the Anchorage office. ADI directly supports the VTLP through a fisheries business development contract with ABDC. The focus of the VTLP continues to be rural harvesting communities targeted by the IRS as having tax compliance issues. The VTLP program has won four national awards for excellence and is an outstanding example of how the state, federal government, higher education system and private sector can work together to create a program that accomplishes program goals for all concerned. Since inception, 45,692 Alaskan's have been assisted and a total of 22.7 million in tax refunds has been returned to the communities.

Office of Economic Development

Joe Austerman,
Manager

Our Mission:

Support the advancement of successful tourism, film, fisheries, forest products, minerals, and small business assistance programs in order to increase economic activity in Alaska and create new employment for Alaskans.

Contact:

Office of Economic Development
550 W. 7th Avenue
Suite 1770
Anchorage, AK 99501
Phone: 907-269-8100
Fax: 907-269-8125

The Office of Economic Development continues to pursue its mission of responsible industry advocacy for the benefit of Alaska. Our primary focus is in fostering responsible development of the mineral, timber, film, tourism, and fishery industries as well as assisting with small business development. OED's unique positioning within government provides for a critical conduit between the State and industries that are seeking to do business in Alaska. The industry development specialists in OED work with industry and policy makers alike in offering expertise in recognizing and capitalizing on opportunities with an emphasis on achieving a mutually beneficial outcome for both industry and the people of Alaska.

In the past year, OED has expanded our area of expertise and broadened our economic analysis abilities by adding a senior level economist to our staff. Having a senior level economist along with industry expertise has bolstered OED's capacity to provide timely and valuable economic and cost benefit analysis in evaluating policy and investment along with the potential impact to community and industry.

While we advocate for the proper development of industry, our customers are the people of Alaska and we are proud to be of service to them.

OED Publications and Reports

- Alaska Economic Performance Report and Net Rate of Return
- Alaska's Mineral Industry Report
- Report of the Alaska Minerals Commission
- Alaska Logging History for Society of American Foresters
- Film Office Annual Report – Available February of 2009'

- Also provide economic information and opinions to multiple users including Governor's Office, representatives, Department of Fish and Game, Department of Transportation, AIDEA, and general public

Office of Economic Development Highlights of 2008

Fisheries: Our industry development specialist works with industry, state, federal and local agencies serving as a primary conduit for fisheries related economic development projects in Alaska.

Film: Film is a relatively new sector to OED created with the passing of SB230. The primary activity associated with this sector has been in getting it rolled out. As of January of 09', the office is staffed and regulations supporting the bill are ready for public review and comment.

- The office has processed and approved three Pre Qualifying applications with an estimated qualifying spend in Alaska at just under $5 million.
- Disney has completed production work and is waiting for the final regulations package to apply for the final tax credit.

Tourism: OED's tourism staff continues to successfully assist entrepreneurs, primarily rural, interested in establishing tourism based business and draw new dollars to their communities. Activities for the year include:

- The Developing Alaska Rural Tourism (DART) project is a partnership between OED and the (U.S.) Economic Development Administration (EDA). Currently under DART, OED is helping several regional Alaska tourism destination marketing efforts get underway, offering targeted business development training workshops, and managing the Tourism Mentorship Assistance Program (TMAP). TMAP represents an 18 month long program that partners current successful tourism business owners with new or potential business owners.
- OED manages the Alaska Visitor Statistics Program (AVSP), the most comprehensive visitor arrival, visitor profile, and visitor spending data collected for Alaska's visitor industry. OED has just released the interim visitor numbers for Summer 2008. They indicate that just over 1.7 million out-of-state visitors came to Alaska between May and September 2008. This represents a slight (0.4 percent) decline from Summer 2007.
- OED manages the statewide AlaskaHost customer service training program - designed for employees of the hospitality and visitor services industry. The core of the AlaskaHost program trains participants in how to provide quality customer service for both residents and visitors to Alaska.

Minerals: Along with coordinating the Alaska Minerals commission and generating industry reports, the minerals development specialist in OED is the industry's primary state contact in evaluating investment potential in Alaska. This sector serves as a resource in interpreting government policy, promoting development opportunities and encouraging investment in Alaska. 2007 was a banner year in minerals exploration and development in the State. However, we know that 08' and 09' will be substantially less. Below are some of the activities conducted by this OED sector:

- Agency support in analysis of the minerals industry in the form of:
  - Identifying opportunities for financial support – analysis of needs and economics of that help.
  - Tax load analysis of specific operations/ projects or generic projects by location, land status.
  - Marketing recommendations – opportunities, informational development, tax analysis, infrastructure needs, economic analysis.
  - Infrastructure needs for projects and regions of mineral prominence.
  - Participated in the evaluation of the BLM Eastern area management plan.
- Providing support to and liaison between industries:
  - Assisting the small miner in technical issues with mines and recovery plants and legal issues to the extent that this assistance does not encroach on private industry consultants and attorneys.
  - Providing financial liaison between lenders and the mining industry – AIDEA, others.
  - Providing liaison between agencies and industry for legislative tax proposals and other issues.
  - Otherwise providing minerals-related information to the worldwide mining industry relative to opportunities in the State of Alaska.

Forestry: While the primary mission of this sector is to promote Alaska's hardwood resources for value added end products, the expertise available in this sector of OED has also been tapped for bio fuel energy analysis. 08' activity includes, but is not limited to:

- Promoting development of Alaska's hardwood resources.
  - Completed revision of hardwood prospectus.
  - Translation of hardwood prospectus into Japanese.
  - Providing assistance in securing investment in new sawmills in Mat-Su area.
- Partnering to promote and encouraging wood-based energy projects.
  - Provided technical assistance to companies in Kenai, Fairbanks, Mat-Su, Rural Alaska interested in wood pellet manufacturing.
  - Partners include AEA, FEDC, AK Village Initiative, DNR- DOF.
- Conducted survey of existing and potential Asian markets for Alaska wood.
  - Site visits in November, 2008.
  - Reports to be issued jointly with Federal and University agencies.

Business Development: Along with assisting businesses through the Small Business Assistance Center, OED also manages the Made in Alaska Program and the Alaska Product Preference Program.

Alaska Regional Development Organizations (ARDORs)

- In 2008, the State of Alaska, Office of Economic Development recognized the Interior Rivers Resource Conservation & Development Council (IRRC&D) as a reestablished ARDOR region. This

will make a total of 12 ARDORs partnered with the SOA helping to provide assistance in rural Alaska to communities, businesses and entrepreneurs.

Made In Alaska Program (MIA)

- Strengthened the integrity and the legal support of the MIA program by Federally Trade marking and registering the Mother Bear and Cub logo with the U.S. Trade mark office, for the MIA program.
- Through Webb Consulting increasing the rural outreach training programs (through Webinar) for marketing, and development of small businesses.

Small Business Assistance Center (SBAC)

- This is an effort to further develop outreach to rural Alaska and support small businesses and entrepreneurs. Expanding the partnership between the ARDORs, University of Alaska Anchorage, Small Business Development Center, Alaska Manufacturing Extension Partnership and the Division of Investments. Several businesses have followed the directions given by the OED specialist which resulted in winning start-up fees for their business in excess of $35,000.
- Provided support for entrepreneurs and small businesses in the Kenai Peninsula Economic Development District (ARDOR) region which helped to generate an additional $2 million dollar in new revenue for manufactures in the state.

The following corporations have been assigned to the Department of Commerce, Community, and Economic Development by Statute. While these entities are independent from the Department, their respective missions are complimentary, and within the scope of the philosophical mission of the Department to promote economic development, foster commerce, and facilitate responsible industry development across the state.

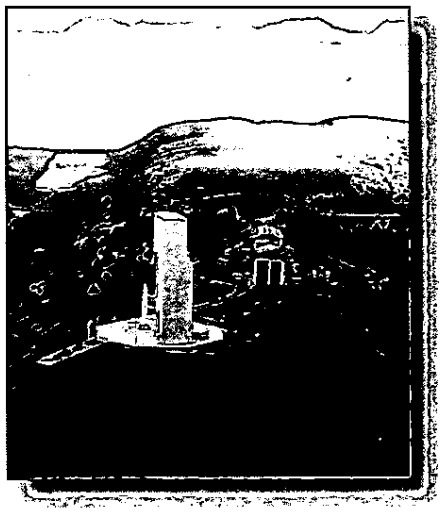
Alaska Aerospace Development Corporation (AADC)

Mission:

To promote aerospace related economic growth and development and strengthen Alaska's technological infrastructure.

The Alaska Aerospace Development Corporation was created by the Alaska State Legislature in 1991 as a public corporation of the state with a charter to take a leading role in developing aerospace industry in Alaska and for the nation.

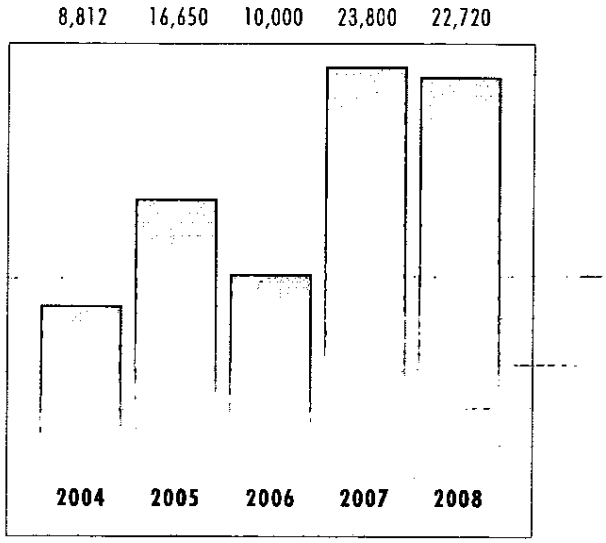
AADC designed, built, and operates the Kodiak Launch Complex (KLC), a high technology state-of-the-industry spaceport on Kodiak Island in partial fulfillment of its charter. Design and construction work on KLC was initiated with a $15.6M grant from the legislature, which AADC leveraged to gain approximately $139.0M in federal grants to invest in the construction of KLC and upgrades to the facility. Launch operations commenced at KLC in 1998, and to date there have been 14 missions launched from the facility,



all successful. Launch and related revenue brought into the state has totaled $93.5M.

AADC is a significant source of revenue for Kodiak and state residents. Each year AADC contracts an independent review of its revenue contributions to the state. The record is marked by steady growth in economic activity. The FY08 Economic Impact Report prepared by Northern Economics, Inc. revealed that the total economic contribution of AADC's operations and projects amounted to $28.7M. The data show AADC's business operations contributed $17.8M to the Kodiak economy and another $10.9M to the rest of the state. The total regional employment generated by AADC operations is estimated at 155 jobs being contributed to Kodiak. AADC continues to have a positive economic impact to Kodiak and other areas of Alaska.

AADC pursues business opportunities across the aerospace industry. The requirement for spaceport facilities to meet rapid response launch capabilities is expanding. The ability to meet this requirement enables AADC with an opportunity to be a key service provider to organizations upgrading and replacing key space infrastructure components.



AIDEA
Dividend History by Year Declared
(in thousands)

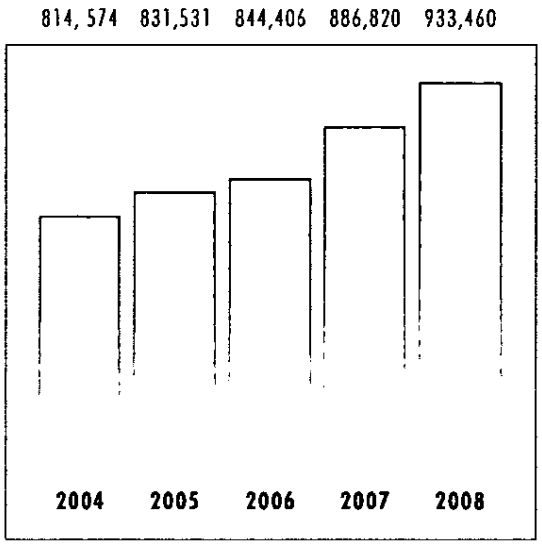
This capability requires a spaceport which can quickly prepare and launch space vehicles with a variety of payloads that is cost competitive and ensures the highest quality standards are met. AADC's current facilities and the planned construction of an additional launch pad and rocket motor storage facility will provide strategic opportunities for AADC to provide rapid launch capabilities at a competitive price.

Alaska Industrial Development and Export Authority (AIDEA)

Mission: To provide various means of financing to promote economic growth and diversification in Alaska.

AIDEA is a public corporation of the State of Alaska, constituting a political subdivision with separate and independent legal existence under the laws of the State. AIDEA was established in 1967 to advance Alaska's economic prosperity and to create jobs for Alaskans. AIDEA accomplishes this mission through its Credit programs by providing long-term capital to businesses for operations and expansion, and through the Development Finance Program by developing and owning infrastructure projects such as roads, ports and airport facilities with the purpose of advancing the economic prosperity of a region.

The Credit programs provide affordable long-term capital to Alaska businesses for new and existing projects, or for the refinancing of existing



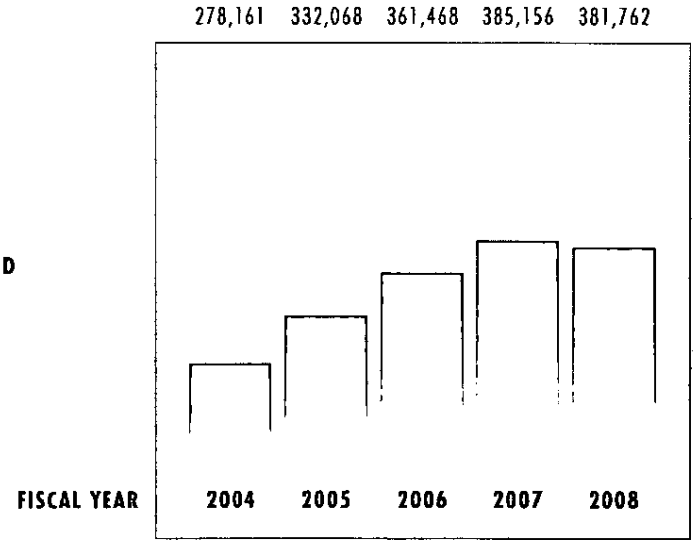
AIDEA REVOLVING FUND
Net Assets
(in thousands)

loans. In FY 2008, AIDEA issued more than $48 million in loans through the Loan Participation program, which resulted in more than 570 permanent jobs, including 206 construction jobs. At the end of FY 2008, the total Loan Participation portfolio was $381.5 million. Thousands of jobs have been created or retained as a result of AIDEA's Loan Participation and Conduit Revenue Bond programs, and these programs will continue to be an economic and job catalyst into the future.

The Development Finance program finances infrastructure necessary to support larger economic development projects in Alaska. This program has led to the estimated creation and retention of over 630 direct jobs in the regions of the state where AIDEA projects are located and have a tremendous economic impact on the respective communities.

AIDEA also provides, pursuant to Alaska statutes, an annual dividend to the state general fund. Since 1996, AIDEA has provided the state and its citizens with over $251 million in dividend funds to support much-needed programs, services and projects.

Key challenges lay ahead for AIDEA based on current economic forecasts suggesting a constriction in the secondary capital market. AIDEA projects more businesses seeking out funding in both the development finance and loan participation programs. AIDEA will seek to attract diverse economic development projects in the state as well as increase the loan portfolio to generate increased earnings in



AIDEA REVOLVING FUND
Total Loans
(in thousands)

FY 2010. Based on market demands, AIDEA is expanding the Ketchikan Shipyard and the Skagway Ore Terminal which will increase the economic development and job growth in the areas where the facilities are located. AIDEA must also maintain its current credit rating on its revolving fund bonds as this rating strengthens its ability to provide the kinds of financing that helps promote economic growth, development and diversification in Alaska.

Alaska Energy Authority (AEA)/ AIDEA

Mission: Reduce the cost of energy in Alaska

Alaska Energy Authority (AEA) projects and programs support its mission by:

1. providing for the operation and maintenance of existing Authority-owned projects with maximum utility control;

2. assisting in the development of safe, reliable, and efficient energy systems throughout Alaska, which are sustainable and environmentally sound;

3. reducing the cost of electricity for residential customers and community facilities in rural Alaska; and

4. responding quickly and effectively to electrical emergencies.

The Alaska Energy Authority was created in1976 by the Alaska Legislature. The Authority is a public corporation of the State with separate and independent legal existence. In 1993, under comprehensive energy legislation, oversight of AEA's existing state hydroelectric projects and the Alaska Intertie was transferred to the Alaska Industrial Development and Export Authority (AIDEA). Pursuant to legislation, the members of the Board of AIDEA also serve as the members of the Board of AEA. AIDEA provides staffing and administrative overhead for AEA; however, AEA continues to exist as a separate legal entity. There is no commingling of funds, assets, or liabilities between AIDEA and AEA and there is no responsibility of one for the debts or the obligations of the other. Programs addressing the energy needs of rural communities were transferred to a newly-created Division of Energy within the Department of Community and Regional Affairs. In 1999, Rural energy programs were integrated into AEA, with AIDEA providing staffing and administrative overhead. Division of Energy staff became AIDEA employees. The integration of Rural energy programs was done by the Legislature as part of a larger reorganization of state agencies. Benefits include: 1) a coordinated state energy policy encompassing rural energy programs and state-owned hydroelectric projects; 2) AIDEA oversight to foster a business-oriented attitude toward finance and development; and 3) a focused approach to work with the federal Denali Commission on rural energy issues.

AEA provides for the development and implementation of energy infrastructure projects through a variety of programs. Bulk Fuel Upgrades and Rural Power System Upgrades are funded by the Denali Commission with AEA staff providing direct project management for both programs. The Alternative Energy and Energy Efficiency Program manages projects that seek to lower the cost of power and heat to Alaskan communities while maintaining system safety and reliability.

In 2008, the Renewable Energy Fund was established for the purpose of recommending grants for renewable energy projects. AEA expects to play a lead role in the construction of many of the projects recommended through this program.

AEA's role as Statewide Energy Coordinator led to the development of the Statewide Energy Plan. Staff continues to move forward to implement the plan by engaging Alaskans to provide energy solutions through their active participation in the selection and ownership of their alternative energy sources.

Alaska Railroad Corporation

Mission: Safety, Service, Profitability.

Vision: Building a Great Railroad Across the Great Land

While wholly owned by the State of Alaska, the Alaska Railroad Corporation (ARRC) is an independent authority responsible for its own financial and legal obligations. According to statute, ARRC is mandated to be a self-sustaining corporation required to conduct its business without operating subsidies from the state. Employees are not State employees but employees of the Corporation who is responsible for all compensation and benefits.

ARRC was purchased by the State of Alaska in January 1985 and charged with providing transportation services, fostering economic development, and promoting the development of the state's transportation network. The Railroad is governed by a seven-member Board of Directors appointed by the Governor of Alaska. ARRC falls under the Department of Commerce but is enabled to operate as an independent enterprise through its exemption from the Executive Budget Act.

From tidewater at Whittier and Seward to the heart of the Interior Alaska in Fairbanks, ARRC's mainline rail covers 467 miles. There are 651 total miles of track including industrial spur lines and yard track. ARRC's operations are supported through revenues generated by providing freight, passenger and real estate services to Alaska businesses and the general public. Its Maintenance and operations centers are located in Seward, Whittier, Anchorage, Healy and Fairbanks. ARRC has commercial property including docks and/or rail in four ports and is the only remaining full-service railroad in the United States, providing both year-round regularly scheduled freight and passenger services.

Alaska Regulatory Commission of Alaska (RCA)

Mission: Decide all nature of disputes between individual regulated entities, regulated entities and their consumers or shippers and regulated entities and the Attorney General representing the public interest.

The Alaska Legislature created the Regulatory Commission of Alaska in 1999, giving it authority to regulate utilities and pipeline carriers throughout the state. The Commission monitors active certificates for public utilities and pipelines; these certificates cover

a broad range of activities, from provisional certificates for small village water and wastewater systems to fully regulated telecommunications, electric, and natural gas monopolies. In addition, the RCA regulates public utilities by certifying qualified providers of public utility and pipeline services and ensuring that they provide safe and adequate services and facilities at just and reasonable rates, terms, and conditions

Alaska Seafood Marketing Institute (ASMI)

Mission: Increase the economic value of the Alaska seafood resource through:

- Increasing positive awareness of the Alaska Seafood brand
- Collaborative marketing programs that align ASMI and industry marketing efforts for maximum impact within the food industry
- Long-term proactive marketing planning
- Quality assurance, technical industry analysis, education, advocacy and research
- Prudent, efficient fiscal management

ASMI was created over twenty-five years ago as a cooperative partnership between the Alaska seafood industry and state government to advance the mutually beneficial goal of a stable seafood industry in Alaska. It is Alaska's "official seafood marketing agency", and is established under State law as a public corporation. ASMI is governed by a seven member board of directors appointed by the Governor of Alaska.

In order to accomplish its mission ASMI engages in marketing activities promoting all species of Alaska Seafood in the United States, Europe and Asia. The "Alaska Seafood" brand is one of the best known and most respected seafood brands in the world and ranks in the top three most popular brands at restaurants in the United States. Promoting Alaska itself is an integral part of the "Alaska Seafood" brand promotion effort and helps generate interest in Alaska that goes well beyond simply purchasing Alaska Seafood in the market place.

The majority of ASMI's funding comes from a voluntary self-assessment by the Alaska Seafood industry. Federal matching grants (for overseas marketing) and state of Alaska general funds provide the remainder of ASMI marketing budget.

Alaska's Retirement Systems Glossary

Actuarial Accrued Liability (Past Service Cost)
The excess of the present value of a pension fund's total liability for future benefits and fund administrative expenses over the present value of the normal cost of those benefits as accrued for the current year.

Actuarial Assumptions
Factors which actuaries use in estimating the cost of funding a defined benefit pension plan. Examples include: the rate of return on plan investments; mortality rates; and the rates at which plan participants are expected to leave the system because of retirement, disability, termination, etc

Actuarial Cost Method
An actuarial method which defines the allocation of pension costs (and contributions) over a member's working career. All standard actuarial cost methods are comprised of two components: normal cost and the actuarial accrued liability (past service cost). An actuarial cost method determines the estimated pension costs, not the ultimate cost of a pension plan; that cost is determined by the actual benefits paid less the actual investment income.

Actuarial Valuation Report
Actuarial valuations are technical reports providing full disclosure of the financial and funding status of public retirement systems administered by the Department of Administration, Division of Retirement and Benefits.

Actuarially Required Contribution (ARC)
The ARC is equal to the sum of (1) the employer's "normal cost" of retirement benefits earned by employees in the current year, and (2) the amount needed to amortize any existing unfunded accrued liability over a period of 25 years.

Alaska Retirement Management Board (ARMB)
The Alaska Retirement Management Board serves as the trustee of the assets of the state's retirements systems, the State of Alaska Supplemental Annuity Plan and the deferred compensation program for state employees. The board manages and invests fund assets in a manner that is sufficient to meet the liabilities and the pension obligations of the system.

Funded Ratio
The ratio of a plan's current assets to the present value of earned pensions. There are several acceptable methods of measuring a plan's assets and liabilities. In financial reporting of public pension plans, funded status is reported using consistent measures by all governmental entities. According to the Government Accounting Standards Board (GASB), the funded ratio equals the actuarial value of assets divided by the actuarial accrued liability calculated under the Projected Unit Credit cost method.

Market Value of Assets
Market value is the amount for which fund assets would sell on the open market if put up for sale in the ordinary course of business.

Normal Cost
The normal cost generally represents the portion of the cost of projected benefits allocated to the current plan year. The employer normal cost equals the total normal cost of the plan reduced by employee contributions

Past Service Cost
The present value of benefits earned to date not covered by current plan assets.

PERS
The Public Employees' Retirement System (PERS) includes a defined benefit plan that is for government employees first hired on or before June 30, 2006 and a hybrid defined contribution plan that has some defined benefit components for employees first hired on or after July 1, 2006.

Pension
A series of periodic payments, usually for life, payable monthly or at other specified intervals. The term is frequently used to describe the part of a retirement allowance financed by employer contributions.

Political Subdivision
Any political entity, such as a municipality, city, or borough, governed by its own legislative body.

Pre-Funding
To accumulate a reserve fund in advance of paying benefits. This is the opposite of "pay-as-you-go."

Present Value
The current worth of an amount or series of amounts payable in the future, after discounting each amount at an assumed rate of interest and adjusting for the probability of its payment or receipt.

Qualified Plan
An employee benefit plan approved by the Internal Revenue Service, meeting requirements set forth in IRS Code Section 401 or 457. Contributions to such plans are subject to favorable tax treatment.

SB 141
Closed the defined benefit plans and created a new retirement and retiree health plan. Signed into law July 27, 2005 Chapter 9 FSSLA 05.

SB 123
Technical correction bill. Allowed the Alaska Retirement Management Board to apply the percent of pay past service cost against both defined benefit and defined contribution salaries. Signed into law June 6, 2007 Chapter 20 SLA 07.

SB 125
Changed the PERS to a cost-share plan and set the employer rate at 22%. Established that the State will pay the difference between the 22% and the actuarially determined rate. Signed into law April 8, 2008 Chapter 13 SLA 08

TRS
The Teachers' Retirement System (TRS) includes a defined benefit plan that is for government employees first hired on or before June 30, 2006 and a hybrid defined contribution plan that has some defined benefit components for employees first hired on or after July 1, 2006.

Unfunded Actuarial Accrued Liability (UAAL)
The excess, if any, of the Actuarial Accrued Liability over the Actuarial Value of Assets. In other words, the present value of benefits earned to date that are not covered by current plan assets.

Valuations
The process of determining the value of the funds. There are many assumptions used in the valuation, some are objective, such as the actual monetary assets some are subjective, such as member mortality or project cost of health insurance.

Name_____

Date_____

QUIZ 1

Retirement Systems 101 Instructor: Pat Shier

Multiple Choice: Place the letter of the answer you have chosen in the blank.

1. The Public Employees Retirement System (PERS) was established in _____.
   a. 1959 b. 1966
   b. 1961 c. 1972

2. SB 141 consolidated several retirement boards into the _____ .
   a. ROTC b. ARMB
   c. ASPIB d. AREA

3. "Accrued benefits of these [employee retirement] systems shall not be diminished or impaired" is found in _____ of the Alaska Constitution.
   a. Article 13, section 13 b. Article 7, section 12
   c. Article 9, section 2.5 d. Article 12, section 7

4. The Employer Contribution Rate of 22% into PERS and 12.56% into TRS is determined by _____.
   a. Alaska statute b. Alaska regulations
   c. the Governor d. the Commissioner of Administration

5. The difference between the Employer Contribution Rate of 22% into PERS, and the Alaska Retirement Management Board adopted rate of 35.22% into PERS is paid by _____.
   a. Federal funds b. taxpayers of local school districts
   b. state of Alaska d. individual TRS employees

6. That portion of the ARM Board adopted Employer Contribution Rates which only pays for the current year's benefit accrual is called the _____.
   a. Service Benefit Payment b. Normal Cost
   c. Regular Service Cost d. Accrued Service Payment

7. In *Actuarial Speak*, "Past Service Cost" means _____.
   a. costs of retired legislators b. last fiscal year budget shortfall
   c. paying for unfunded liability d. Actuarial assets/liabilities ratio

8. My first thought at the conclusion of this presentation is, _____.
   a. "Why am I here?" b. "Where are the doughnuts?"
   c. "This was very helpful!" d. 'Yawn, I could have had a nap instead!"

ANSWERS: 1. c, 2. b, 3. d, 4. a, 5. b, 6. b, 7. c, 8. c

Notes

(1) Investment is represented by shares in (or as a percentage of) commingled equity investments which, at any given time, may be a combination of securities and cash.
(2) Investment is represented by shares in various hedge funds.
(3) Mortgage-related assets are managed in-house. These assets are valued at their principal balance (cost) less an allowance for loan loss, the result of which approximates market value.

Qualifications for Retirement	Normal retirement age is 55, with early retirement at age 50; ▪ police/fire members can retire at any age after 20 years of police/fire service; ▪ all other members can retire at any age after 30 years of membership service. Early retirement reduction will be 1/2% per month or 6% per year for every year less than the required normal retirement age.	Normal retirement age is 60, with early retirement at age 55; ▪ police/fire members can retire at any age after 20 years of police/fire service; ▪ all other members can retire at any age after 30 years of membership service. Early retirement reduction will be 1/2% per month or 6% per year for every year less than the required normal retirement age.	Normal retirement age is 60, with early retirement at age 55; ▪ police/fire members can retire at any age after 20 years of police/fire service; ▪ all other members can retire at any age after 30 years of membership service. Early retirement reduction will be 1/2% per month or 6% per year for every year less than the required normal retirement age.	None for investment account. Taxes and penalties may apply if withdrawn before age 59-1/2. See requirements for Retirement Medical Coverage.
Benefit Calculation Formula	Benefit formula: ▪ 2% for first 10 years and all years of service prior to July 1, 1986, ▪ 2.25% for the next 10 years, and ▪ 2.5% per year thereafter. Benefit calculation is determined on the average of the **high three** consecutive years' salary. Police/Fire - 2% X 10, 2.5% over 10.	Benefit formula: ▪ 2% for first 10 years, ▪ 2.25% for the next 10 years, and ▪ 2.5% per year thereafter. Benefit calculation is determined on the average of the **high three** consecutive years' salary. Police/Fire - 2% X 10, 2.5% over 10.	Benefit formulas did not change. However, the benefit calculation is determined on the average of the **high five** consecutive years' salary. The benefit calculation for police and fire members is the average of the **high three** consecutive years regardless of tier (effective 2002).	DC account balance plus investment earnings. May be received in several different payment options. Payout options include lump-sum payments, rollovers to another qualified plan, or annuities. Annuities may be taken as a lifetime annuity, joint and survivor annuity, or for a period certain.
Alaska Cost-of-living Increases (COLA)	An Alaska Cost-of-Living Allowance is payable to benefit recipients who remain domiciled in Alaska after retirement. The allowance is $50 or 10% of the base benefit, whichever is greater.	An Alaska Cost-of-Living Allowance is payable to benefit recipients 65 or older or disability benefit recipients regardless of age who remain domiciled in Alaska after retirement. The allowance is $50 or 10% of the base benefit, whichever is greater.	An Alaska Cost-of-Living Allowance is payable to benefit recipients 65 or older or disability benefit recipients regardless of age who remain domiciled in Alaska after retirement. The allowance is $50 or 10% of the base benefit, whichever is greater.	None provided.

PERS and TRS Tier Comparison Chart

PERS Tiers	Tier I 1/1/61 - 6/30/86	Tier II Entered after 6/30/86	Tier III Entered after 6/30/96	Tier IV Entered after 6/30/2006
Post Retirement Pension Adjustments (PRPA) (Inflation Protection)	PRPA increases granted on an ad hoc basis. If an ad hoc is not granted, Tier I employees must be age 60 or over or receiving benefits for 5 years to qualify for the automatic PRPA. The automatic PRPA passed in 1986 applied to all members regardless of hire date.	Automatic PRPA adjustments to disabled members, retirees 60 and over, and those who have received benefits for 5 years.	Automatic PRPA adjustments to disabled members, retirees 60 and over, and those who have received benefits for 5 years.	None provided.
Retirement Medical Coverage	Medical coverage is provided to all benefit recipients and their eligible dependents for life. The retiree medical plan premium is paid by the retirement system. 5 year vesting.	Medical coverage is provided to disabilitants, regardless of age and benefit recipients over age 60 or, ▪ Peace officer/fire members with 25 years of police/fire service, ▪ all other members with 30 years of membership service and their eligible dependents for life. The retirement system pays the retiree medical plan premium. Retirees and survivors under age 60 must pay the full premium cost if they want coverage. 5 year vesting.	Same as Tier II. However, employees must accrue a minimum of 10 years of **credited service*** to have system-paid coverage at age 60. Employees with less than 10 years must pay the full premiums as long as they wish to continue medical coverage. 100% vested with 10 years of credited service.	Access to medical coverage at Medicare eligible age with 10 years of service or at any age with 25 years of service for peace officers and firefighters or with 30 years of service for all others. Must retire directly from the system. If not eligible for Medicare, must pay full premium. May use health reimbursement arrangement (HRA) account to pay premiums. Once the HRA is exhausted, member self- pays premiums. When eligible for Medicare, the percentage of premium paid by the retiree or surviving spouse is: ▪ 10-14 years of service - 30% ▪ 15-19 years - 25% ▪ 20-24 years - 20% ▪ 25-29 years - 15% ▪ 30 years or more - 10%

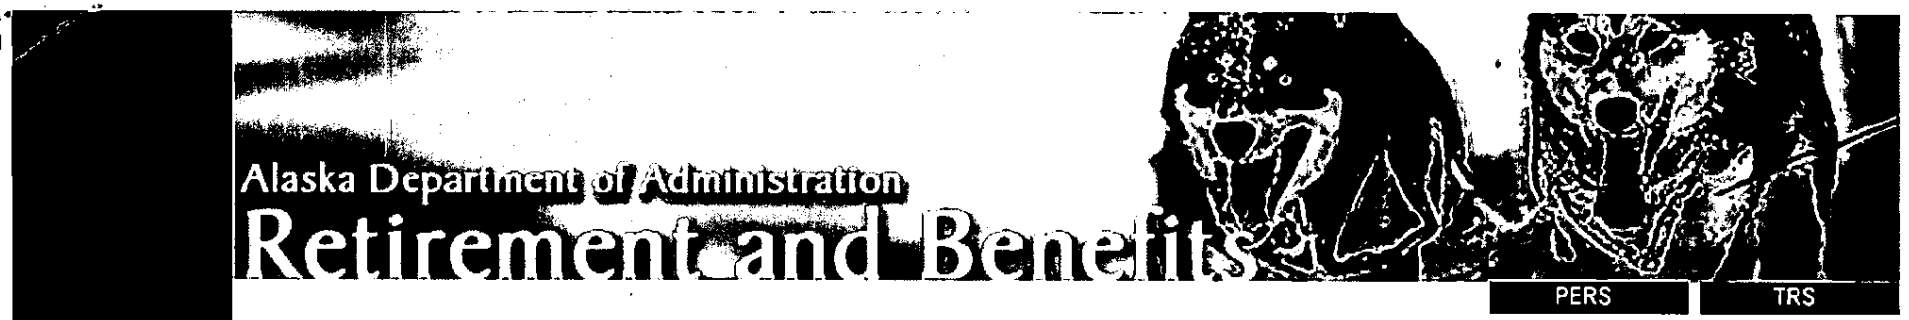
Disability benefits cease when the member becomes eligible for normal retirement at Medicare eligible age and 10 years of service or at any age with 30 years of service. No medical insurance until eligible for normal retirement.



State of Alaska

Public Employees' Retirement System

Teachers' Retirement System

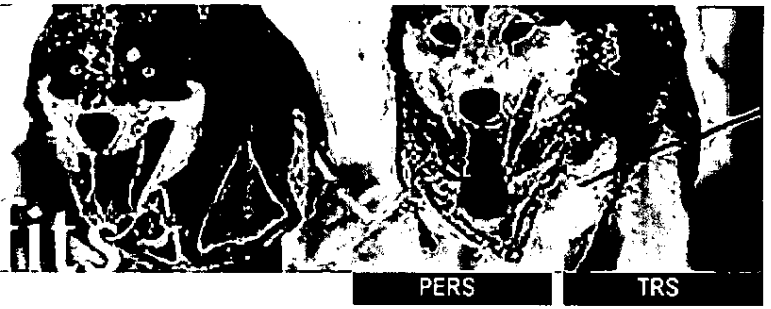
Presentation to the House Finance Committee on PERS/TRS 2009

History of PERS & TRS

- TRS established in 1955
- PERS established in 1961

Alaska Department of Administration

Retirement and Benefits



Who is Covered in the System?

Public Employers/Employees & Teachers

- Cities, boroughs, some hospitals, school districts, State of Alaska
- Optional for political subdivisions

ARM Board & Consolidation of Governance

- Several separate boards before – ASPIB, PERB and TRB
- 2004 SB 141 consolidation in Alaska Retirement Management Board

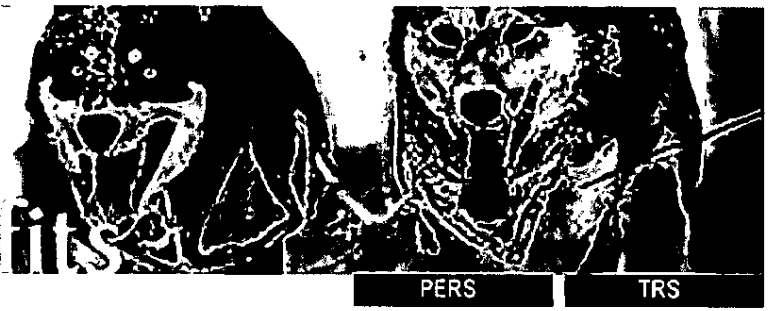
Alaska Department of Administration

Retirement and Benefits

PERS TRS

PERS SYSTEM

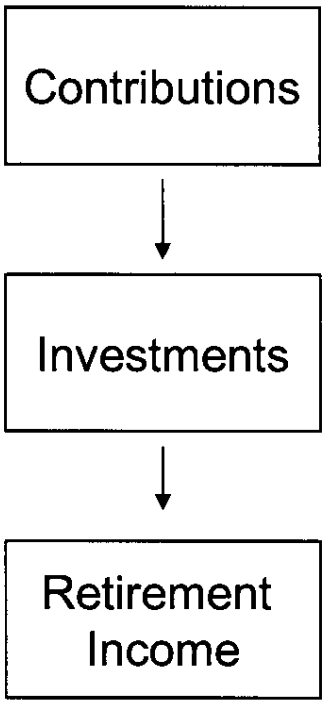
Defined Benefit (DB)	Defined Contribution Retirement (DCR-Hybrid)
Retirement Income	Retirement Income
Health	Health + HRA
Disability (Occupational and Non-occupational)	Disability (Occupational)
Survivor	Survivor



Constitutional Prohibition Against Diminishment

Article 12, section 7 - Retirement Systems. Membership in employee retirement systems of the State or its political subdivisions shall constitute a contractual relationship. Accrued benefits of these systems shall not be diminished or impaired.

How Does the Retirement System Work?



Contributions

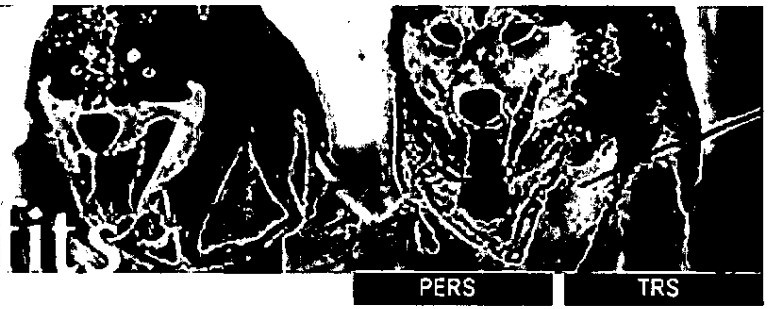
- Employee & Employer
- SB 125, General Fund – to pay down unfunded liability

Alaska Department of Administration

Retirement and Benefits

Contributions
Employee

Defined Benefit (DB)	Defined Contribution Retirement (DCR-Hybrid)
6.75% PERS and 7.5% PERS Peace Officer and Firefighter	8% PERS
8.65% TRS	8% TRS
Statutory	Statutory



Contributions

Employer - Rates

- ARMB Adopted Rates: 35.22% PERS, 44.17% TRS
- Statutory: 22.00% PERS, 12.56% TRS
- SB 125: Difference paid by state. (FY09 Budgeted & FY10 Governor's Request PERS $241,600,000, TRS $206,300,000)

ARMB Adopted Rate

- Valuations/Rate adopted by ARMB (based on over 25 variables set by ARM Board)
- Examples: Investments – rate of return and assets value, life expectancy, payroll growth, future healthcare costs

ARMB Adopted Rate

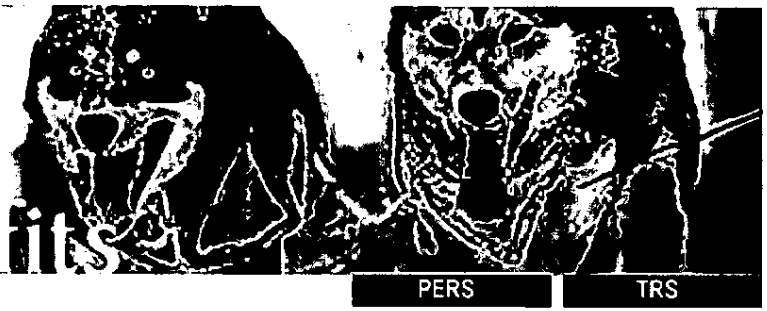
- Normal Cost pays for this year's benefit accrual only
- Past Service Cost pays for unfunded liability

ARMB Adopted Rate

	PERS	TRS
Normal Cost	→ 13.72%	9.37%
Past Service	→ 21.50%	34.80%
ARMB Adopted	→ 35.22%	44.17%
Statutory Rate	→ 22.00%	12.56%

Investments

- Assumptions and Asset Allocations (current rate of return assumption 8.25%; stocks, bonds, real estate)
- Long-term view – 5 yr. smoothing
- CY2008 PERS losses = DB (22.24%)
  DCR (35.46%)



Investments

- Needed for cash flow – contributions alone are not sufficient to make benefit payments as more people retire

Pay – Retirement Income

- Over 32,500 retirees
- 60% in state, 40% out of state
- $60 million per month retiree income
- $25 million per month in additional retiree & dependent health care

Unfunded Liability

- Funding ratio = assets ÷ liabilities
- 2001/2002 – investment losses from technology crash

Unfunded Liability

- Both PERS and TRS enjoyed funding ratios over 100% through 2003
- Funding levels reflect combined pension and OPEB liabilities
- With the market downturn in the early 2000s, recognition of OPEB costs and other actuarial adjustments, ratios have fallen to the 60% range
- Contribution requirements that were steady or declining rose markedly in 2005 and after
- Alaska is not alone

Alaska's Response

- DCR-Hybrid SB 141 – new retirement plan + new employer-funded health benefit plan
- SB 123 clean-up bill – assess all payroll at statutory rate
- SB 125 State pays difference between PERS 22%, TRS 12.56% statutory & ARMB adopted rate

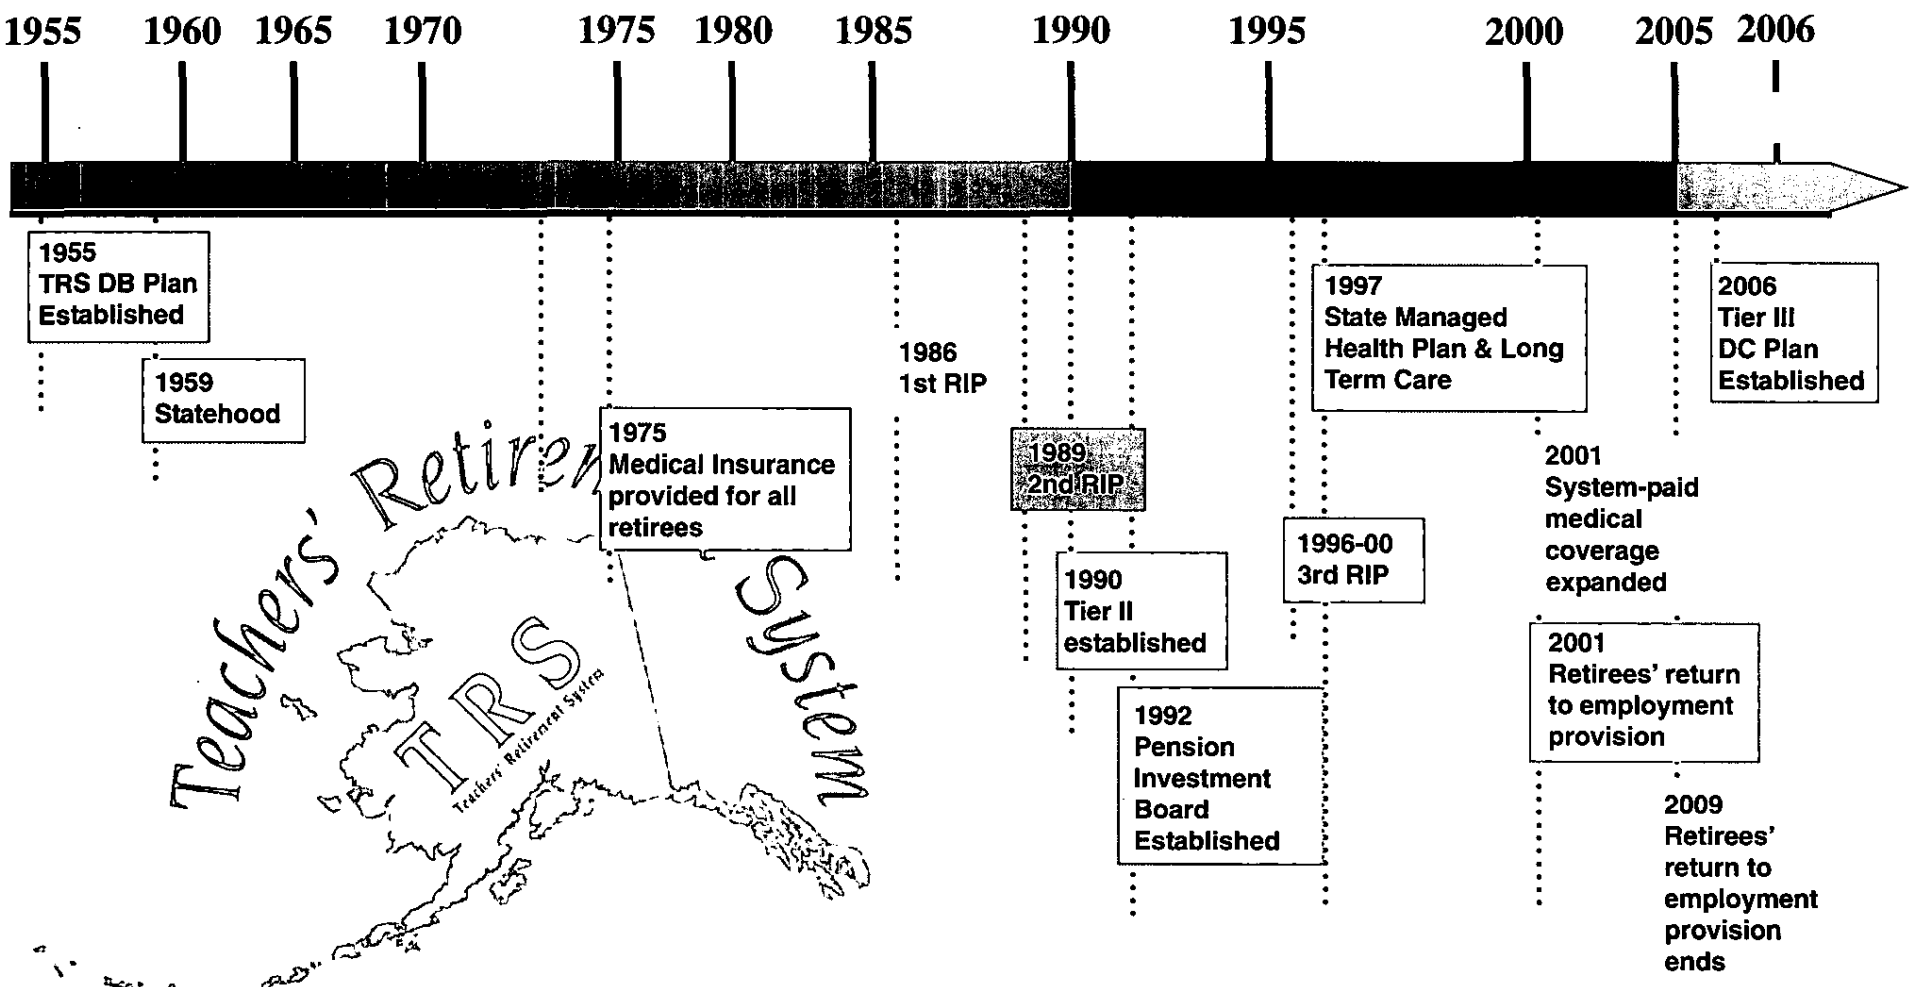
ALASKA TRS TIMELINE



The information on this timeline is not intended to replace the Alaska Statutes, the Alaska Administrative Code or Federal law. Language contained in the Alaska Statutes and the Alaska Administrative Code govern the plans. G:/publications/timelines/trstimeline.pmd (Rev. 12/07). Prepared by the State of Alaska, Department of Administration, Division of Retirement & Benefits. Contact Jim Puckett at 907-465-4471 for more information.

Actuarial Valuation 101

The ultimate cost of any retirement system can be represented by, the formula:

System Costs = Assets - Liabilities

Where assets = Investment Returns + Plan Contributions
and Liabilities = Benefits to be Paid + Administrative Expenses

Since none of these factors are known until the last benefit is paid, they must be measured and estimated by something called an **Actuarial Valuation**. The primary function of an **Actuarial Valuation** is to determine:

- The annual amount, the actuarially computed employer rate that must be paid into the plan in order to pay for current and all future benefit costs.

- This results in the computation of the plan's **Actuarial Funding Ratio**: the ratio of fund assets to liabilities for benefits accrued to date.

A pension plan whose assets equal its liabilities is funded at 100% and is considered *fully funded;* any shortfall of assets is an *unfunded liability,* and a plan with an unfunded liability is considered *underfunded.*

Underfunded does not mean that a plan is unable to pay the benefits for which it is presently obligated to pay or to meet its current cash flow requirements. It simply means that in the unlikely event that all the plan's liabilities had to be settled today, it would be unable to meet them. Fortunately, a retirement system's obligations extend many years into the future so the plan has time to accrue the assets needed to ultimately meet all its future obligations.

Calculating the employer rate and the Actuarial Funding Ratio involves many variable financial, economic, and demographic assumptions. Over the short-term, many of these assumptions will be incorrect to one degree or another. After all, the Actuarial Valuation is only a snapshot of an arrangement of complex, long-term financial and demographic projections, "based on the theoretical supposition that the plan's liabilities are subject to settlement on the date the valuation is done."

Because no one knows what the future holds, an actuary uses a mixture of professional judgment, past experience and future expectations to estimate possible future economic outcomes. Assumptions used in the **Actuarial Valuation** should be chosen in a way that ensures:

1) the plan is funded in an orderly and stable way and
2) that the plan's accumulated annual contributions and investment returns are adequate to provide participants with their promised benefit payouts by the end of the funding period - in the case of PERS and TRS, 25 years.

The Alaska Division of Retirement & Benefits contracts with an actuarial consultant to prepare annual Actuarial Valuations of the state's public retirement systems -PERS & TRS.

The actuarial consultant uses the following assumptions and actuarial methods in their annual valuation analysis:

Economic Assumptions

Relate to the expected long-term financial experience of *the plan*

- Annual Investment Return
- Post Retirement Health Premium Trend
- Total Inflation
- Annual Salary Increases

Demographic Assumptions

Relate to the plan's populations and how they are expected to change over time

- Mortality Rates
- Total Turnover Rate
- Disability Rate
- Retirement Rates
- Assumed Retirement Date if Before Age 50

Actuarial Assumptions

In addition to the Demographic and Economic Assumptions stated above, the following additional assumptions are inputs in the actuarial analysis

- Medical Benefit Valuation - A pre-65 and post-65 premium cost are computed, increased with a health inflation assumption and combined into a blended premium. This evaluation also is based on who is actually eligible for employer paid health care.
- Target Funding Ratio - *The ratio* of *Assets to Accrued Liabilities that the plan is targeting going forward - at 100% target ratio, the plan targets full funding after* 25 *years in the case* of *PERS and TRS.*
- COLA -% of retirees receiving
- Spouse's Age
- Dependent Children
- Contribution Refund Rates
- New Entrants
- Post-Pension Retirement Adjustments
- Expenses
- Marital Status

Actuarial Methods

The methods adopted by the actuarial consultant in determining the cost of a pension plan and for determining the annual contribution required to adequately provide for future benefits

- Asset Valuation Method -Actuarial currently uses an Asset Smoothing Method -*which recognizes 20%* of *assets gains* & *losses for the current and preceding four years*
- Actuarial Cost Method -Actuarial currently uses a Projected Unit Credit (PUC) -*which produces an Accrued Liability, Unfunded Liability,* a *Normal Cost Rate and* a *Past Service Cost* Accrued Liability -*the present value* of *benefits credited*
    - Unfunded Liability -*the* excess of *Accrued Liabilities over the Plan's total Assets*
    - Normal Cost -*is the present value* of *the benefits expected to be earned by active members during the current year*
    - Past Service Cost -*the annual payment required to payoff any Unfunded Liability over the stipulated amortization period*
- Amortization Schedule for Unfunded Liability and Future Gains & Losses – the actuarial uses a 25-year fixed period level percentage of pay.

Alaska State Legislature
HOUSE FINANCE COMMITTEE
Agenda
1:30 PM

Thursday, February 5, 2009

HB 81-APPROP: OPERATING BUDGET/LOANS/FUNDS
HB 83-APPROP: MENTAL HEALTH BUDGET

Budget Overviews:
PERS/TRS Update

Annette Kreitzer, Commissioner, Department of Administration
Pat Shier, Director, Division of Retirement and Benefits, Department of Administration

Available for Questions:
Kevin Brooks, Deputy Commissioner, Department of Administration
Kathy Lea, Retirement Manager, Division of Retirement and Benefits, DOA
Jerry Burnett, Deputy Commissioner, Division of Treasury, Department of Revenue
Gary Bader, Chief Investment Officer, Treasury Division, Department of Revenue
Pamela Green, Comptroller, Division of Treasury, Department of Revenue

2/11/09 OVERVIEW: PORT OF ANCHORAGE & PORT MACKENZIE

<target><bill></bill><subject>2-11-09 OVERVIEW PORT OF ANCHORAGE & PORT MACKENZIE</subject><comm>HFIN26</comm></target>

House Finance Committee
February 11, 2009

The Port of Anchorage

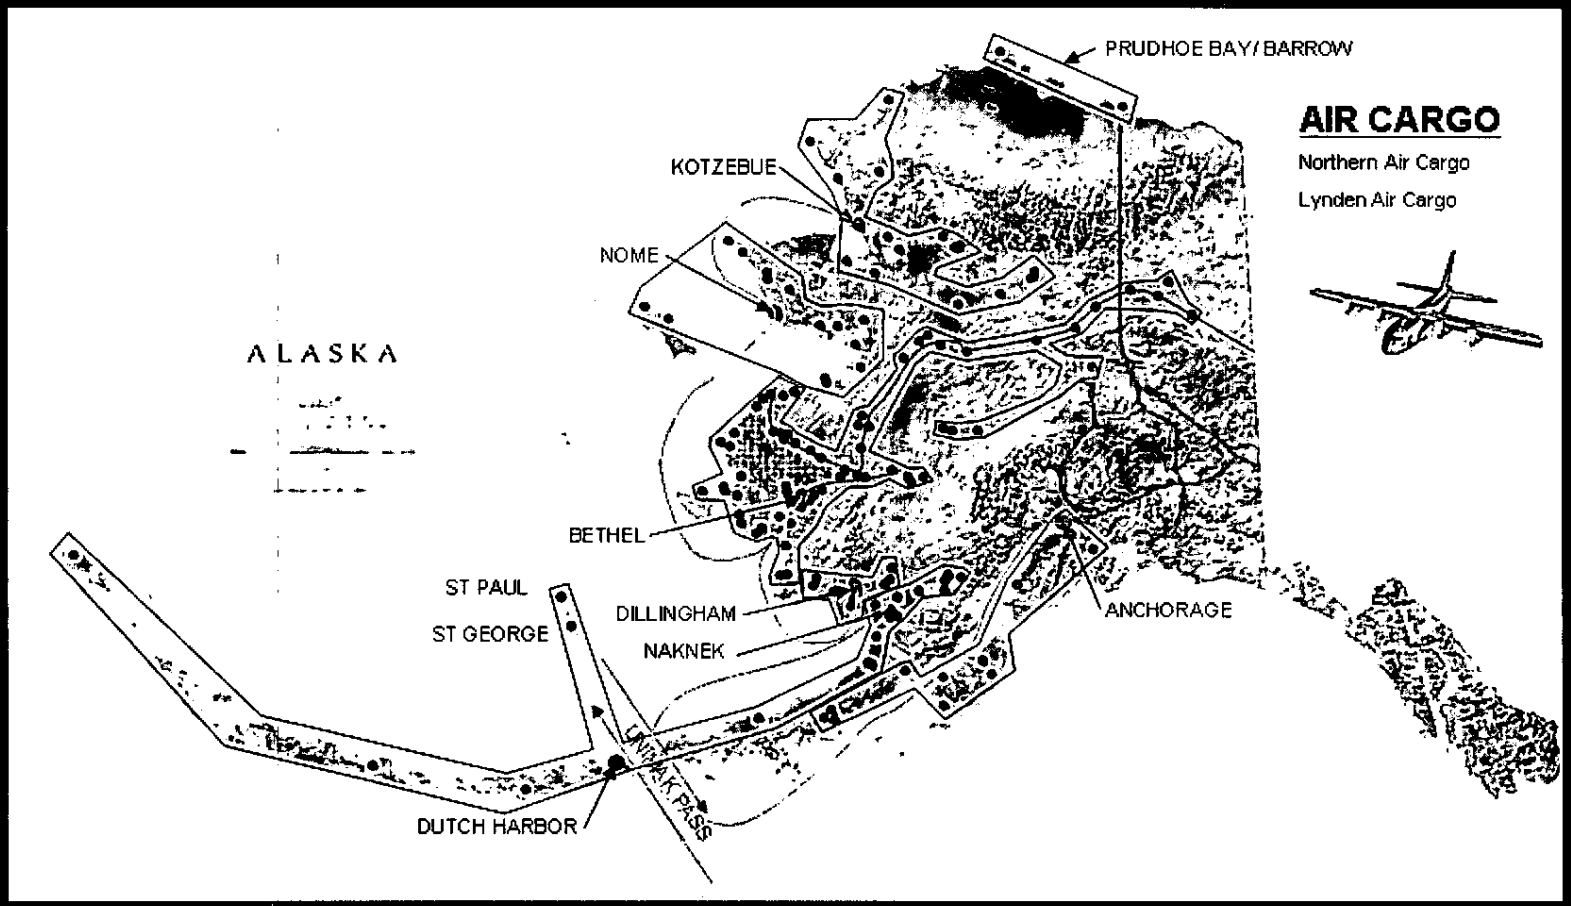
Economic Impact

- Serves 85% of the population, providing 90% of consumer goods
- Total economic impact estimated at $663 million[1]
- Freight Activity at the Port contributes to $137 million in household earnings and 4, 142 jobs
- 97% of freight shipments between Puget Sound and Alaska are waterborne
- 46,000 jobs in Puget Sound (Seattle-Tacoma) directly dependent on Alaska Trade & Shipping
- Classified as a "Port of National Significance" by the Department of Transportation-Maritime Administration

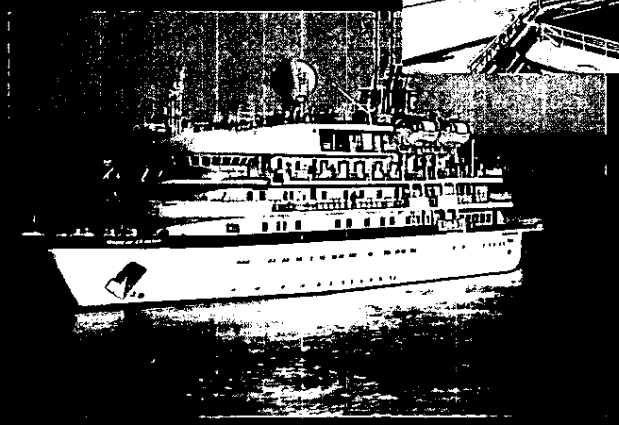
[1]Prokop, Darren. "The Economic Impact and Logistics of the Port of Anchorage." Department of Logistics, College of Business and Public Policy, University of Alaska Anchorage.

Regional & Statewide Importance

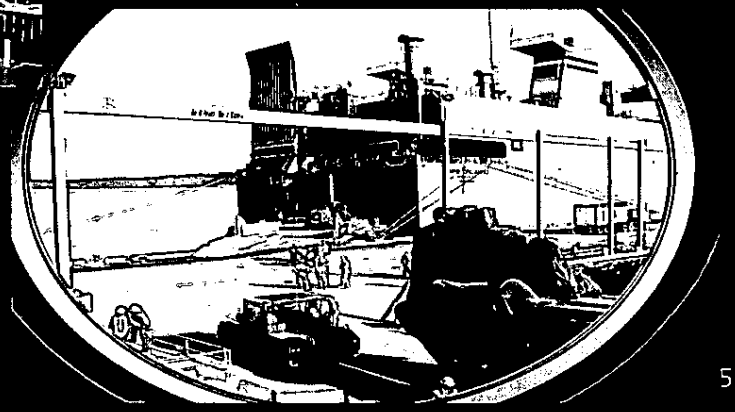
Transportation Supply Routes From Port of Anchorage



Business at the Port of Anchorage



- Containers
- Petroleum
- Dry Bulk/Cement
- Cruise Ships
- Coast Guard
- Military

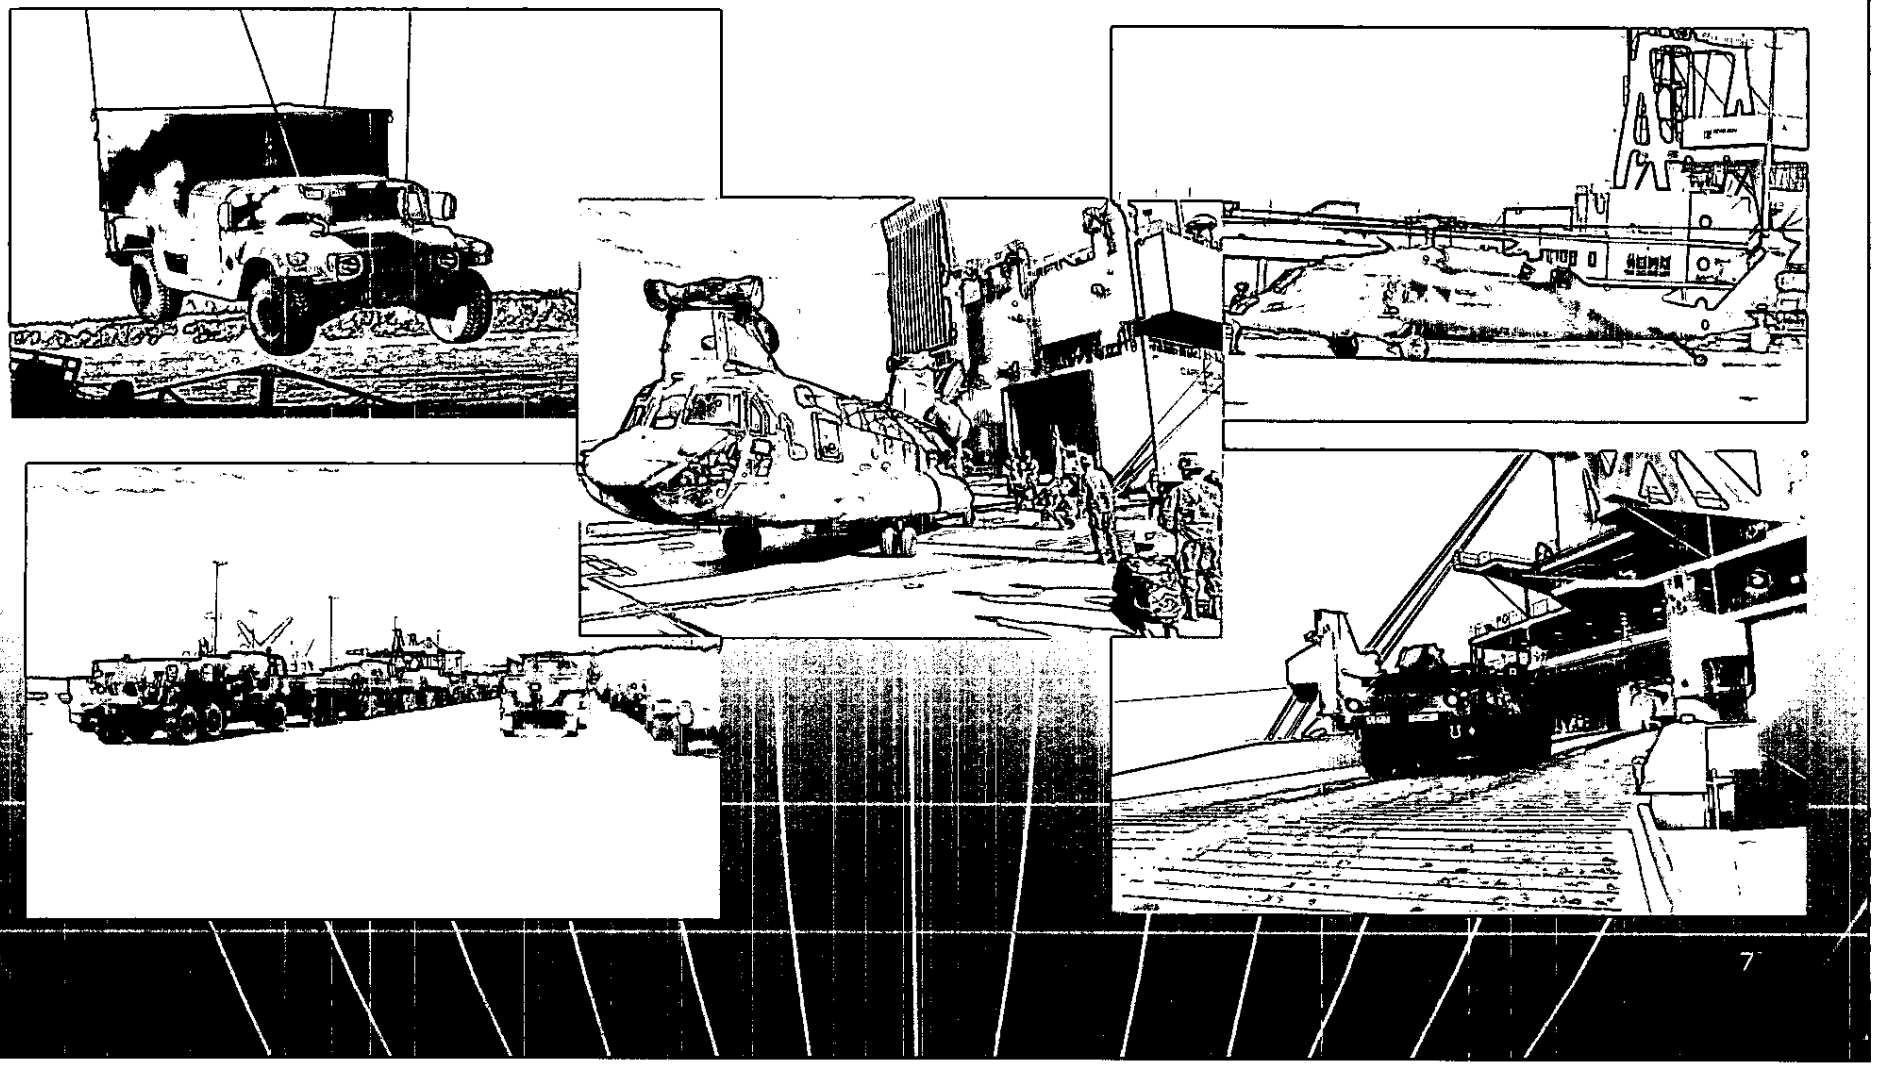


1060

The Port of Anchorage & the U.S. Military

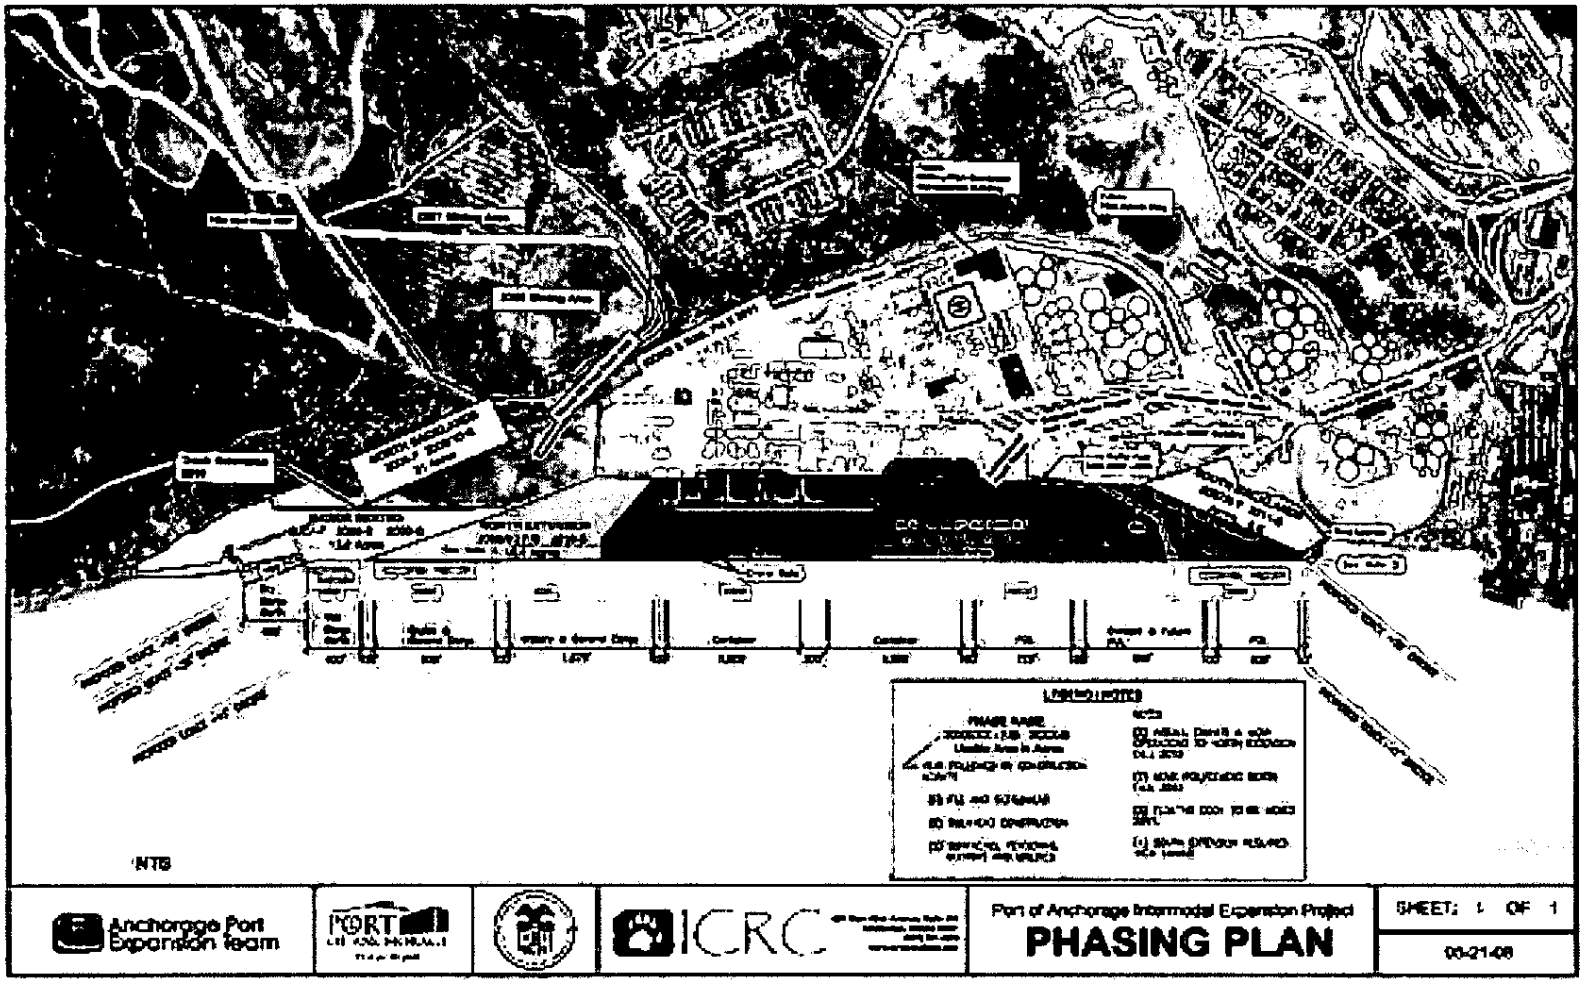
- Designated by the Department of Defense as a "Strategic Port" for national defense purposes
- Assisted in critical deployments in and out of the military bases and training facilities in Alaska to Iraq and Afghanistan
- Home to the Coast Guard Marine Safety and Security Team

Supply Hub for the U.S. Military in Alaska



The Port of Anchorage Intermodal Expansion Project

The Port of Anchorage Intermodal Expansion Project



The Port of Anchorage Intermodal Expansion Project

- A federal,state, and municipal program to replace/expand the current dock and facilities
  - Current infrastructure: Built in the 1950s
- US DOT Maritime Administration is the lead agency for the project
- Rehabilitate the facility to accommodate:
  - Larger ships
  - Increased port calls
- Purpose: reduce transportation conflicts and to improve intermodal transportation and commerce
  - Not just for Anchorage, but for the entire state of Alaska

The Port of Anchorage Intermodal Expansion Project

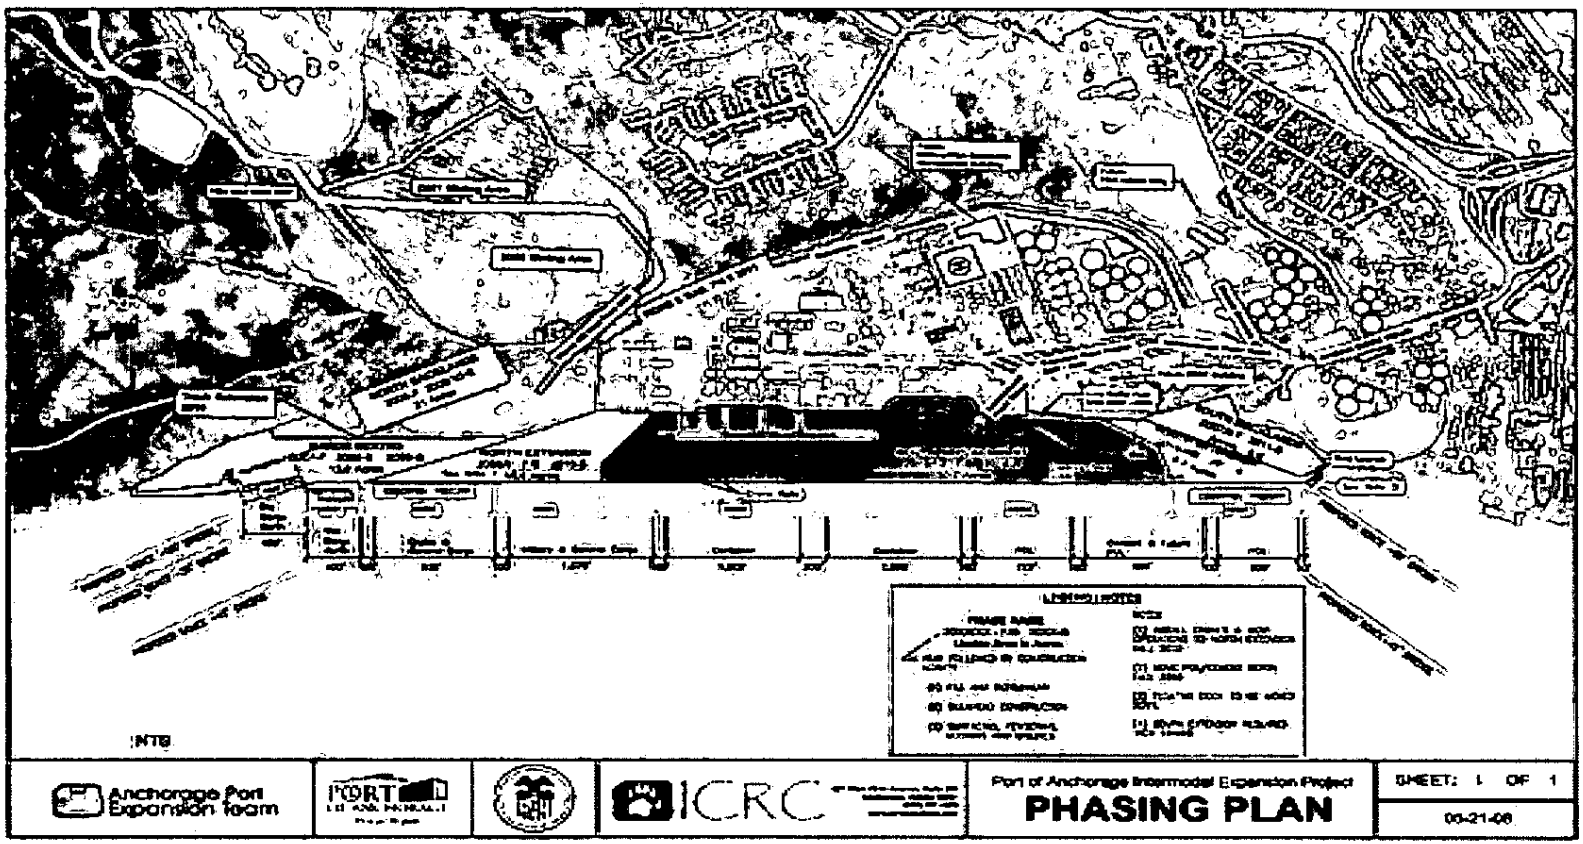
- Completed construction will provide efficient ship-to-shore connections
- New rail line connecting the waterfront to Alaska's mainline railbelt
- New roads with direct connections to the State's highway system
- State of the art cargo offloading and handling facilities
- Deeper and wider berths to accommodate modern shipping vessels and military ships

2009 Construction

- Finish fendering/mooring on North end; Barge Berths – Open For Business
- Complete fill and sheet pile in North Extension

2010 Construction

- Finish final utilities/paving on north end for arrival of new cranes
- Begin fill and sheet pile in South Extension



Construction Costs & Funding

Sources of Funds To Date
(in millions)

▫ Federal:	$112.7	(53%)
▫ State:	$ 41.3	(20%)
▫ Port:	$ 57.5	(27%)
▫ Total:	$211.5	

Construction Costs To Date

Finish Surface, Drainage and Utilities	$ 0.5	$ 23.0	$ 46.3		$ 42.8	$ 58.1	$ 55.2	$ 225.9
Total Uses	$ 210.4	$ 35.7	$ 135.3	$ 88.1	$ 148.2	$ 61.7	$ 57.4	$ 736.7

Cost of Construction:

Total Projected Costs **$ 736.8**

Advantages Realized with Advanced Funding

- Contracts completed earlier reduce costs
- Materials ordered in advance reduce costs
- Opportunity to purchase in volume reduces cost
- Cost reduction decreases investment required
- Speeds up completion

Port of Anchorage
Bill Sheffield, Port Director
Anchorage, Alaska

PROJECT NAME: Port of Anchorage Replacement/Expansion ($120,000,000)

The Statewide critical transportation infrastructure program is funded 52% by the federal government, and 48% by the Port and the State of Alaska. Past requests for State funding have called for $20 million from the State for 6 consecutive years; this request calls for an advance of $120 million in funding to allow awards of necessary construction contracts. Awards cannot be made without funding in place. Full awards will ensure the program continues without disruption, employs thousands of workers in Alaska, and ensures the State has necessary infrastructure in place to support gas line construction.

PROJECT IS READY-TO-GO

Should the Port receive advanced funding from the State, the Port is in a position to immediately begin field construction of ready projects in 2009. In the recent 5 years, the project has been fully permitted and designed employing several teams of registered engineers, environmental and permitting professionals, project managers, scientists, surveyors, and inspectors. The USDOT Maritime Administration (lead federal agency) and all regulatory agencies are positioned to continue project construction through permit conditions.

Construction is well underway; $210 million has been spent on the project to date. At the end of 2008, approximately 80 acres will have been developed north of the existing port and 15 acres south of the existing port (of 135 total additional acres programmed). The newly developed land will be the site of numerous projects, including the building of docking facilities and utilities necessary to support shipping operations. Two barge terminals are included, which will be the only publically owned barge docks in upper Cook Inlet. Receipt of the $120 million State capital funding will ensure the Port completes surface work through 2010, allowing occupancy of this new ground and complete relocation of maritime operations to new docks with no disturbance in service to the State. Further, it will provide the ability to reduce overall project cost through accelerated ordering of project materials, and through timelier contract actions. The full project cost is currently estimated at $700 million through 2014.

$65,000,000 – Construct Intermodal Transportation Connections

Construction components:

- Track extension to the waterfront with loading facilities.
- Road systems and intersections, track crossings, truck queuing lanes.
- Ship mooring infrastructure.
- Crane structural supports and power supply.
- Trunk utility corridors and systems.
- Operational support systems and structures.

$55,000,000 – Complete Cargo Handling Areas
Construction components:

- Develop parking, staging, and cargo storage areas.
- Modify and extend underground power supply.
- Modify and extend water/sewer, communications, and security systems.
- Install overhead lighting and other support systems.

TOTAL REQUEST - $120,000,000 (Labor and Materials)

The Port of Anchorage replacement/expansion project is a long term endeavor that is fully permitted and ready to proceed immediately. We are in a unique position to accelerate our project and get payroll into the hands of workers tomorrow.

PROJECT WILL CREATE JOBS
Over 3,000 to 7,500 direct and indirect jobs would be created, immediately, resulting in an estimated payroll of $55 to $60 million and an estimated $220 to $240 million in indirect economic impact to the nation. Payroll and labor records indicate 400-500 direct jobs are created at the project site each construction season, May through November. The project complies with Buy America; contracts are only open to American labor, suppliers, and materials.

The types of jobs created are very well paid, as salaries are Davis-Bacon prevailing wages, which is the highest of State and Federal prevailing wages at the time of the bid and are eligible for 1.5 times regular salary for any overtime. Even though all funds are administered by the federal government, the State of Alaska Department of Labor and Workforce Development has made final determination that AS 36, specifically AS 36.05 and AS 36.10 apply to all construction contracts awarded under this program. Notices of Work are filed routinely with the State, and 1% filing fees are submitted.

Many of these jobs will be year-round. While past years have required layoffs of construction workers at the end of each construction season due to subarctic temperatures, most of the remaining work will be out-of-water construction on the new 95 acres of developed land, as opposed to substructures in the water (already completed). The Port is in need of specialty trades which have the potential for immediate and year-round employment within the construction industry. Once this 95 acres are finished and ready for port occupancy, existing commercial crane operations will be relocated to this site to enable full demolition and future re-construction of the existing inefficient marine terminal area.

>3,000 Direct jobs per year:

carpenters, framers	landscape contractors
civil construction workers	masons
concrete workers	painters, stripers
crane rail contractors	paving contractors
drafting/graphics personnel	pile drivers, iron workers
electricians and electrical line workers	pipefitters, plumbers
environmental monitors & compliance personnel	riggers
equipment operators	safety personnel
estimators	scientists
expeditors	signage contractors
fencing contractors	specialty track contractors
field surveyors & engineers	storm water control contractors

field, superintendents & project managers	suppliers
HVAC technicians	steel workers
inspectors	telecomm system workers
insulators	traffic control personnel
laboratory technicians	truckers
laborers	welders

PROJECT WILL STIMULATE ECONOMY

A study found that Port's total economic impact is $663 million using 2002 data. Freight activity at the Port contributed to $137 million in household earnings and 4,142 jobs. The port facility itself contributed a further $6.7 million to the labor income earned in Anchorage; and furthermore another 115 jobs were created as a result.[1] In addition to the five berths available, these figures are expected to increase significantly with the expansion project to increase the number of berths by eight more.

The project connects the Port to the Alaska Railroad, which is also an economic engine for the State of Alaska. The Alaska Railroad is projected to spend $131 million in the Alaska economy in 2008, generating 2,036 jobs (full time equivalent) and $105 million of payroll. Of this total, 979 jobs will be railroad employees and 1,107 will be in other parts of the economy. Each $1 million decline in operations spending results in a loss of $890,000 in payroll and 17 jobs from the economy. Each $1 million decline in capital projects spending results in a loss of $640,000 in payroll and 13 jobs from the economy.[2] The Port of Anchorage will also be a key player with the Alaska Railroad and the U.S. Army-Alaska as the Railroad completes the currently-funded rail extension from Fairbanks and Fort Wainwright across the Tanana River and into the Army's million-plus acre training ranges in Alaska's interior. As a result of recent Army posture changes, the growth in numbers of Army personnel assigned in the State, and the maturing of these training ranges into assets for the entire U.S. Army, the Port of Anchorage's ability to support the subsequent growth in military movements into and out of the State is essential to the overall success of this effort.

The Nation and the State of Alaska are moving closer to seeing a natural gas pipeline project that can deliver vast quantities of gas to America's heartland, become an economic reality. The gas line project will employ tens of thousands of people from all over the country. The expanded and modernized Port of Anchorage will be a vital node in the supply chain process that will support the gas line construction and maintenance; without the growth in available staging put into service and ready for occupancy with cranes, operational conflicts would exist. The Port of Anchorage is the only truly intermodal port facility in the State. It has road, rail, and maritime access, close proximity to the world's third largest cargo airport, and a large city with a diverse skilled labor force. The Port's expansion is designed to ensure that, when gas line construction begins, there will be both sufficient depth for deep draft vessels planned to deliver the necessary project supplies and equipment; and sufficient acreage for gas pipe laydown, immediate rail access for reduced handling, and sufficient industrial ground for module construction. Additionally, the Port is adding the first two public barge berths to be made available in Upper Cook Inlet. These barge berths will be located adjacent to the planned module construction area and the extended rail line.

[1] Prokop, Darren. "The Economic Impact and Logistics of the Port of Anchorage." Department of Logistics, College of Business and Public Policy, University of Alaska Anchorage.

[2] Goldsmith, Scott. (2008). Institute of Social and Economic Research, University of Alaska Anchorage.

Alaska, and specifically the Port, is a key driver in the Pacific Northwest economy. The economic relationship between Alaska and the Puget Sound area in Washington State – which is the nation's leading region in foreign export sales – is stronger than ever. The trading partnership between Alaska and Puget Sound, by way of the Port of Anchorage, is an economic asset for Puget Sound, especially as a stimulus that helps offset regional downturns, as over 46,000 jobs in Puget Sound companies are directly dependent upon export trade with Alaska. The growth in jobs from the Alaska-Puget Sound trade relationship between 1994 and 2003 is substantial – equal to attracting a 1,000 employee company to the region each year. By weight, 97 percent of all freight shipments between Puget Sound and Alaska are waterborne.[3] An expansion of the Port of Anchorage to handle even more cargo could make this growth even more rapid.

While Alaska's economy is dominated by natural resource extraction, Alaska is transforming into a service-based economy that needs specialized banking, accounting, legal, engineering, and management, educational and medical services. Seattle has long served as a key service supplier not only to Alaska but for much of the quadrant of the Lower 48 west of Minneapolis and north of San Francisco.[4] The Port expansion project envisions dock space for cruise ships. The Alaska cruise ship industry has enjoyed phenomenal growth in recent years. The number of cruise line passengers departing from Puget Sound for Alaska has risen from 14,000 in 1994 to 550,000 in 2004.[5] Petroleum remains a hub of the Alaska-Puget Sound economic relationship. In 2003, $2.8 billion of Alaska crude oil came to Puget Sound refineries. Direct impact of this trade includes 1,990 jobs and $144.5 million in labor earnings.[6]

The Port of Anchorage rehabilitation provides sufficient storage of fuel and fuel transfer facilities to better serve the energy needs of western Alaska. More efficient and larger container handling facilities with warehousing in Anchorage will provide greater trans-shipment efficiency to western Alaska and will improve delivery schedules and costs with increased activity year-round.

Port expansion would allow running international cargo through the Port of Anchorage, which could cut typical transit times from Asia to the Midwestern United States in half. It takes only six to 12 days for ships to sail from Anchorage to a variety of destinations within Japan and China, respectively. It takes 10-17 days to sail from Los Angeles to Japan and China.[7]

Upon completion, the port will be able to support the build up for a planned gas line and storage/shipment of construction materials for off-shore drilling and pipeline construction. The gas line in Alaska will enable the flow of American gas for energy consumption. ConocoPhillips Alaska estimates that 17,000 workers in the U.S. and 12,000 workers in Canada would be needed to build the gas pipeline to the Midwest.[8]

The Port of Anchorage has committed staging grounds to BP for 4,000 tons of steel pipe a year (for 2009 and 2010) to offload and stage materials critical to their operations in Alaska;

serviceable ground is critical to today's BP logistics and needs separated from commercial port operations. Future gasline logistics will certainly require much more dedicated ground.

PROJECT DETAILS

The completed construction program will provide efficient ship-to-shore connections with a new rail line extension connecting the waterfront to Alaska's mainline railbelt, new roads with direct connections into the State's highway system, state-of-the-art cargo offloading and handling facilities, and deeper and wider berths to accommodate modern shipping vessels. This multi-year program replaces aged and deteriorating dock structures, which are functionally outdated and marginally safe, with new facilities capable of serving the commercial and military ships that call at this vital seaport. The existing dock structure is neither capable nor efficient enough for modern maritime intermodal operations.

The dock's 50-year-old cranes cannot reach required distances to serve modern vessels and must be replaced with three 100-foot gauge modern cranes to load and off-load cargo. The 9-acre trestle dock must be demolished by 2011 and replaced with a 135-acre offloading facility to accommodate berthing, intermodal ship-to-shore transfers, and adequate secured cargo storage – without disruption to critical Statewide cargo operations. Currently, $4-5M is spent annually on under-dock repairs by the Port of Anchorage administration, while crucial surface operations and cargo transfers continue to remain inadequate.

The new facility is being constructed in phases to accommodate the shipping industry without impact to day-to-day intermodal transfer operations and continual service to 85% of the State; to coincide with the US Army Corps of Engineer's on-going annual harbor maintenance program to maintain shipping lanes at the Port; and to align with incremental funding and available cash flow. The funding plan calls for 52% federal funds with 48% of remaining funds at the local level (State and Municipal revenue bonds, Port revenues).

The USDOT Maritime Administration and regulatory agencies are positioned to continue project construction through permit conditions, previously established best management practices during construction, acoustic programs and data collection, sighting/reporting teams on-site, and mandatory shut-downs of certain activities when whales are observed near the project.

ABOUT THE PORT

The Port of Anchorage serves 85% of the population within the State of Alaska providing 90% of their consumer goods, and is one of sixteen nationally designated commercial Strategic Ports with direct calls scheduled by the Department of Defense for critical deployments in-and-out of Alaska's military bases and training facilities (Ft. Greely, Eielson AFB, Ft. Wainwright, Ft. Richardson, and Elmendorf AFB) to Iraq and Afghanistan. The Port of Anchorage was inaugurated in the late 1950's with little build-up in the past fifty years, and is currently under-serving the State's transportation system as its primary hub.

The Port of Anchorage provides direct ties with the Stevens International Airport for competitive supplies of jet fuel and the sea-air movement of cargo. It also offers an active Foreign Trade Zone and is a designated customs port of entry to Alaska. It has been rated one of the most efficient container ports on the West Coast as far as location, and is the northernmost deep draft port in the United States. It is open for business with full services year-round.[9]

[9] Poe, Robert (2004). "Port of Anchorage: The Logistical Choice." Anchorage Economic Development Council.

The Port of Anchorage began a federal, state, and municipal dock replacement/expansion program in 2003, with the USDOT Maritime Administration as the lead federal agency, to rehabilitate the port facility to accommodate larger ships and increased port calls by providing additional upland area and berthing capacity. This project was undertaken specifically by the government on our behalf to reduce transportation conflicts and traffic congestion and to improve intermodal transportation and commerce for the Municipality of Anchorage and State of Alaska. The USDOT Maritime Administration, the State of Alaska, and the Municipality of Anchorage are partners in this endeavor.

HEADQUARTERS
ALASKAN COMMAND (ALCOM)
ELMENDORF AIR FORCE BASE, ALASKA 99506

Lieutenant General Dana T. Atkins
Commander, Alaskan Command
10471 20th Street, Suite 139D
Elmendorf Air Force Base Alaska 99506-2200

The Honorable William J. Sheffield
Director, Port of Anchorage
2000 Anchorage Port Road
Anchorage Alaska 99501

Dear Governor Sheffield

Thank you for the recent Port of Anchorage update you presented to the ALCOM staff. As you know, we [ALCOM] view this capital investment in the port very beneficial to our mission and requirement to receive and deploy combat forces stationed in Alaska. With recent changes in Army posture around the world, Alaska is now home to a stryker brigade, an airborne brigade, and an aviation task force, with the likelihood of even more forces being home-stationed here in the future. Our ability to project this power to combat theaters around the globe is heavily dependent upon sealift, so the Port of Anchorage remains absolutely critical to our success.

I concur with the Maritime Administration's decision to designate the Port of Anchorage as one of America's 19 National Strategic Ports in 2004, and I believe the Port of Anchorage must maintain that level of capability as long as we have these force levels assigned to Alaska. The Port's commitment under the Strategic Port program to provide at least 25 acres of ground within its facility during a deployment is a key enabler for the efficient staging and loading of our forces. Due to the high tempo of operations around the world, we have executed several large military movements through the Port recently, and I want to express my appreciation for the efforts that you, your staff, and the current Port tenants made to ensure the success of the operations. I have no doubt the Port of Anchorage will continue to provide superb support to the Department of Defense and its military forces in Alaska.

Finally, I appreciate your continued consideration of Alaskan military needs as you plan and execute your ongoing expansion project, and I look forward to continuing the partnership between the Port of Anchorage and Alaskan Command forces for many years to come.

Very respectfully,

Dana T. Atkins

DANA T. ATKINS

Port of Anchorage Intermodal Expansion Project

State Request:

- $120 million

Project is "Shovel Ready"

- Port is in a position to immediately begin field construction of ready projects
- The project is fully permitted and designed
- Construction well underway-$210 million spent to date.
- $120 million in funding will ensure that the Port completes work through 2010, allowing complete relocation of maritime operations to new docks with no disturbance of operations.
- Funding will allow for reduced overall project costs
    - Accelerated ordering of project materials and timelier contract actions

Detail of Project Funding:

$65,000,000-Construct Intermodal Connections

- Track extension to the waterfront with loading facilities
- Road systems and intersections, track crossings, truck queing lanes
- Ship mooring infrastructure
- Crane structural supports and power supply
- Trunk utility corridors and systems
- Operational support systems and structures

$55,000,000-Complete Cargo Handling Areas

- Develop parking, staging, and cargo storage areas
- Modernize and extend underground power supply
- Modernize and extend water/sewer, communications, and security systems
- Install overhead lighting and other support systems

Materials Necessary for Project Expansion: [1]

- Concrete
    - 11,000 Cubic Yards- 186 direct& Indirect jobs
- Asphalt
    - 65,900 Tons - 99 direct & Indirect jobs
- Gravel & Rock Fill
    - 865,000,000 Cubic Yards- 312 direct & indirect jobs
- Dredging
    - 70,800 Cubic Yards 42 direct & indirect jobs

National Implications – Materials and Equipment Manufactured elsewhere in the USA

- Steel
  - 7,700 Tons, total of 420 direct & indirect jobs
    - Forged/milled in Texas and/or Alabama-
    - Galvanized in California and/or Oklahoma -
    - Shipped by rail through Oregon and Washington Shipped to Alaska via ship and barge from Washington
    - Installed in Alaska
- Other equipment to be manufactured in the lower 48 states (380 direct and indirect jobs).
  - Petroleum Loading Arms
  - High Mast Lighting
  - Electrical Transformers & Conductors
  - Crane rails
  - Light poles
  - Concrete Ties

Support Services

- In addition to direct construction jobs 60 to 70 direct technical and professional jobs will be needed to support the construction.

Economic Impacts of Projects: Alaska and National

- Jobs
  - Between 3,000-7,500 direct and indirect jobs, in Alaska and out of Alaska, will be created.
  - Resulting in an estimated payroll of $55-$60 million
  - Estimated $300 to $350 million in direct economic impact to the nation.
  - Jobs are well paid, Davis-Bacon prevailing wages
  - Many of these jobs will be year-round
  - Most of the remaining work will be out-of-water construction on the new 60 acres of developed lands, as opposed to substructures in the water (already completed)
- Port's total economic impact: $663 million
- Freight activity contributes to $137 million in household earnings and 4142 jobs
- Natural Gas Pipeline
  - The expanded port will be an integral part to the construction of the widely supported natural gas pipeline to carry natural gas to the Lower 48 states to help address our nation's energy crisis
    - Sufficient depth for deep draft vessels planned to deliver project supplies and equipment
    - Sufficient acreage for gas pipe laydown
    - Immediate rail access for reduced handling of pipe
    - Sufficient industrial ground for module construction
- Key driver in the Pacific Northwest Economy

- Over 46,000 jobs in Puget Sound are directly dependent on export trade with Alaska
- Expanded port will result in increased domestic deliveries
- Expansion of the port will assist in revitalizing the economy of Alaska as well as Washington with new jobs

- Expansion will allow for increased international cargo through the Port of Anchorage
  - Could cut typical transit times from Asia to Midwestern United States by half, providing for efficient movement of consumer goods
    - Port of Anchorage is already an active Foreign Trade Zone and a designated customs port of entry into the United States

National and Strategic Significance:

- The Port of Anchorage is the major hub for the entire state.
- It serves 85% of the state's population and 90% of consumer goods pass through the Port.
- Home to the Coast Guard Marine Safety and Security Team
- Classified as a "Port of National Significance" by the Department of Transportation Maritime Administration (MARAD)

Designated by the Department of Defense as a "Strategic Port" for national defense purposes:

- Military Mission in Alaska:
  - The capital investment at the Port of Anchorage is seen as beneficial to the mission of the military to receive and deploy combat forces.
  - Alaska is now home to a stryker brigade, an airborne brigade, and an aviation task force, with the likelihood of increased forces being home stationed in Alaska.
  - Ability to respond to national and international theaters around the globe is heavily dependent on sealift-thus emphasizing Alaska's strategic global advantage
  - Year round access to training ranges by rail and with a Tanana River crossing that will be the key to future defense planning in Alaska for the nation.

- Joint Pacific-Alaska Range Complex
  - Training mission expanded to include maritime training in the Gulf of Alaska.
  - Port of Anchorage needs to have infrastructure to serve as a U.S. Navy Port of call for Naval vessels, including carriers
  - Donally Range-U.S. Army investing $80 million in range equipment and infrastructure

- Disaster Response/Survivability

- Alaska Command (ALCOM) Commander views Port of Anchorage as a key node in all of their planning for maritime re-supply and disaster recovery
- ALCOM committed to working with the Port to assure no single point failures in fuel supply infrastructure

---

[1] Job estimates are based on information from work to date on the PIEP, information from the Alaska General Contractors Association, a Canadian study, and Pres. Obama's speech in Hawaii talking about impact to Hawaii's construction industry. All of these sources agree that every $150,000 of construction spending creates approximately one direct job and two additional indirect jobs (delivery, supply, and secondary from spending of wages). The Alaska General Contractors information also suggested that for every dollar spent on construction, the State Gross Domestic Product increased by 1.9 dollars. This was used to adjust the "estimated economic impact figures for direct economic impact."

Jobs for other equipment were based on an assumption that 50 percent of the cost is labor and that a similar ratio for dollars spent to direct and indirect jobs would hold.

Port of Anchorage Intermodal Expansion Project

PHASING PLAN

SHEET: 1 OF 1

05-21-08

1087

Port MacKenzie

Gateway to the
Matanuska-Susitna Borough

Presentation for the

House Finance Committee

February 11, 2009

MISSION

- To develop a world class Alaskan deep-water Port capable of safely and efficiently transporting people and commodities.

VISION

- Create new employment opportunities.
- Stimulate economic development in the Port District, Borough, and State through capital investment for industrial facilities by private enterprises.
- Establish a transportation link for exporting natural resources from the State of Alaska.

PORT MACKENZIE
A "REGIONAL" IMPROVEMENT
MAIN GOALS

1. To construct utilities (3-phase electric, telephone/fax/internet, natural gas) to the Port.

2. To construct docks (barge dock expansion, ferry landings, deep-draft dock expansion).

3. To complete road improvements (Pt. MacKenzie Road, Port Access Road, Burma Road).

4. To develop a year-round ferry system.

5. To construct a rail line from the Parks Highway to the Port.

3

1090

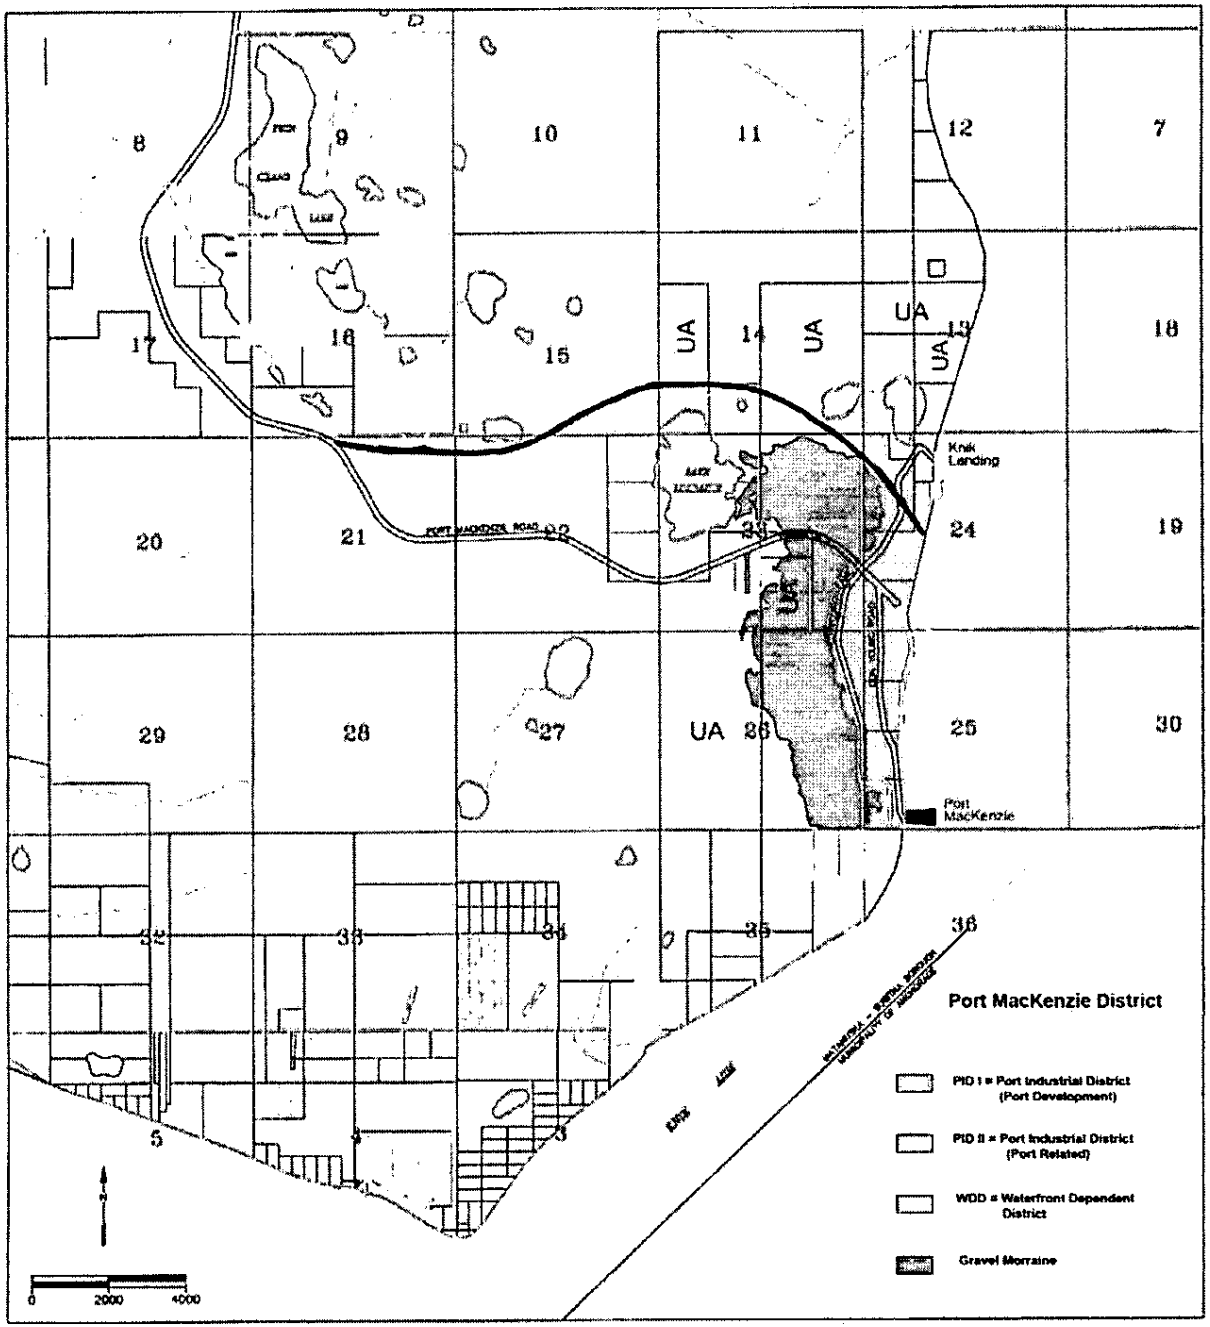
PORT MACKENZIE
A "REGIONAL" IMPROVEMENT
MAIN GOALS

6. To construct a rail loading facility at the Port.

7. To construct a fuel tank farm and connect to Anchorage via pipeline.

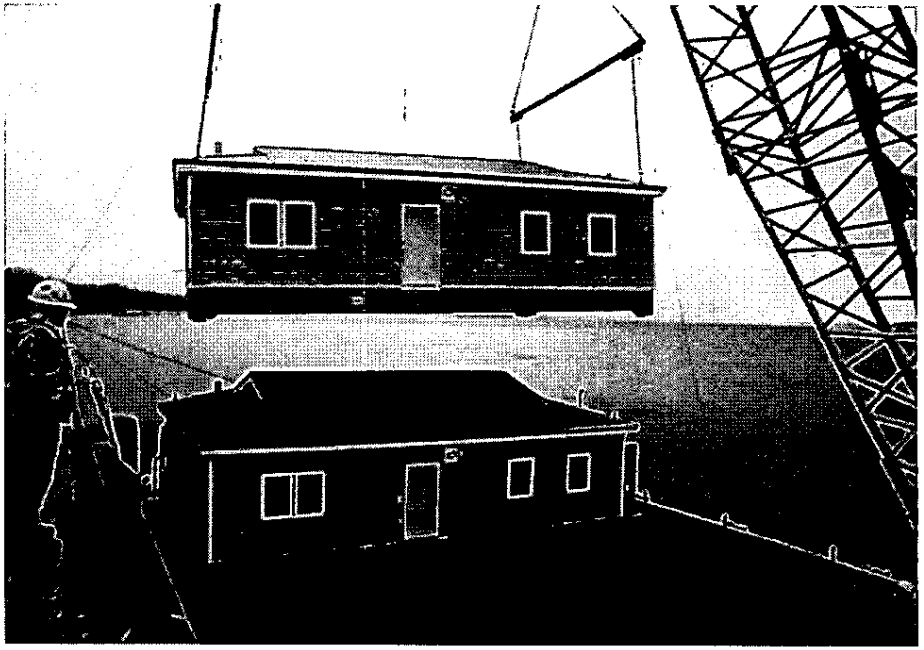
8. To promote the creation of a petrochemical facility or LNG plant at Port MacKenzie.

PORT DISTRICT BOUNDARIES

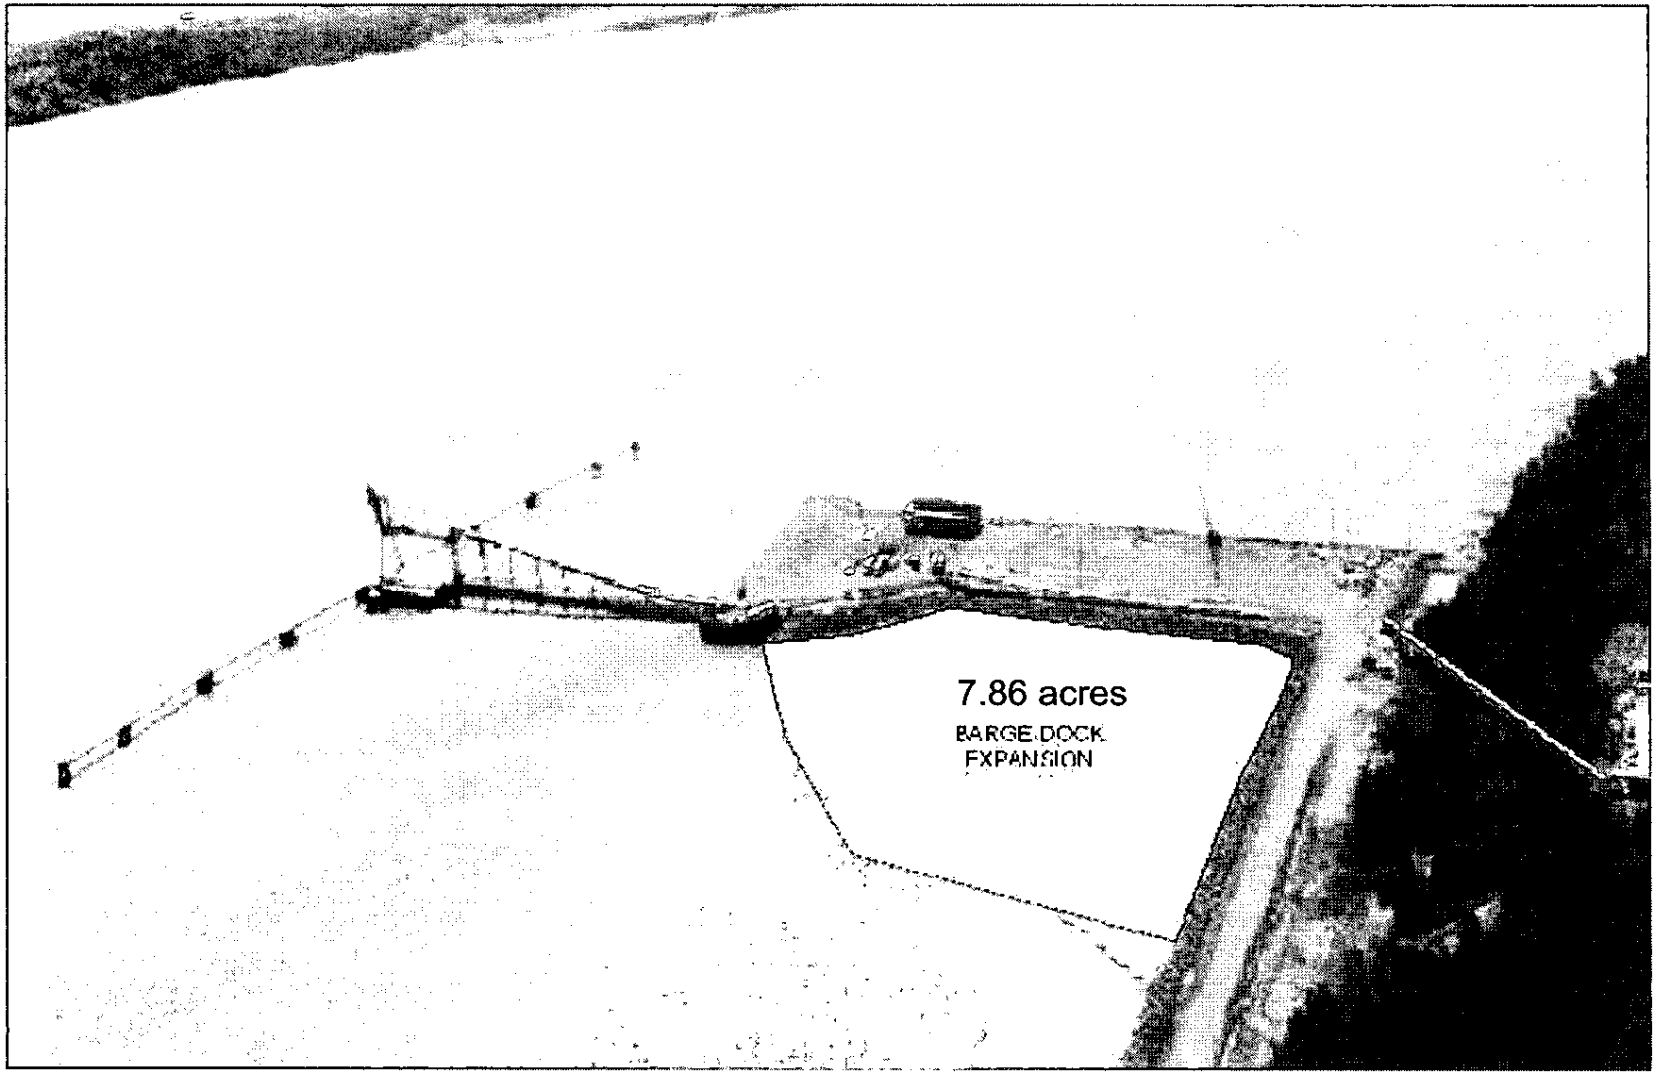


BARGE DOCK (-20' MLLW)

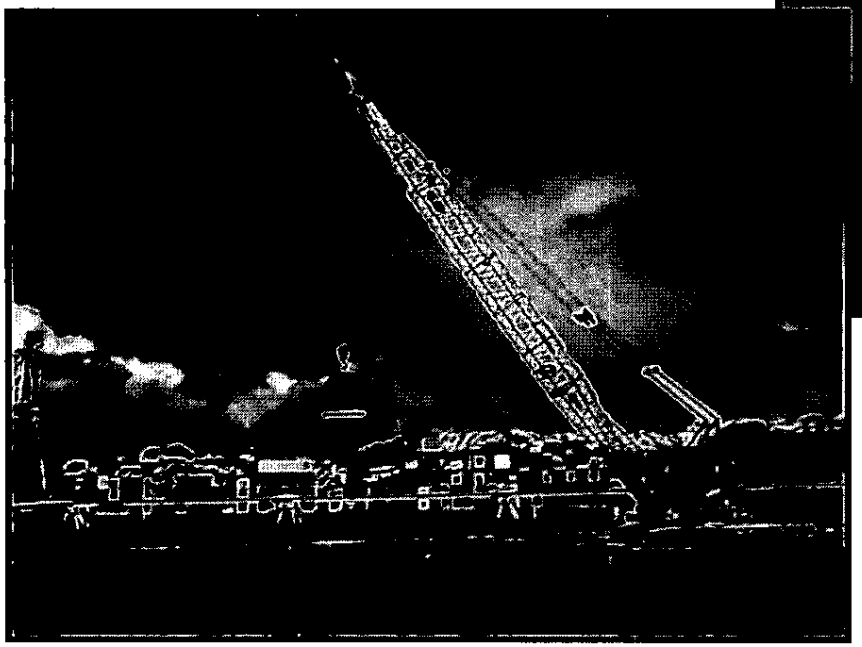
- 850' x 500' at face.
- Completed in Fall of 2003 with plans for expansion by 7.86 acres.



Future Expansion of Barge Dock

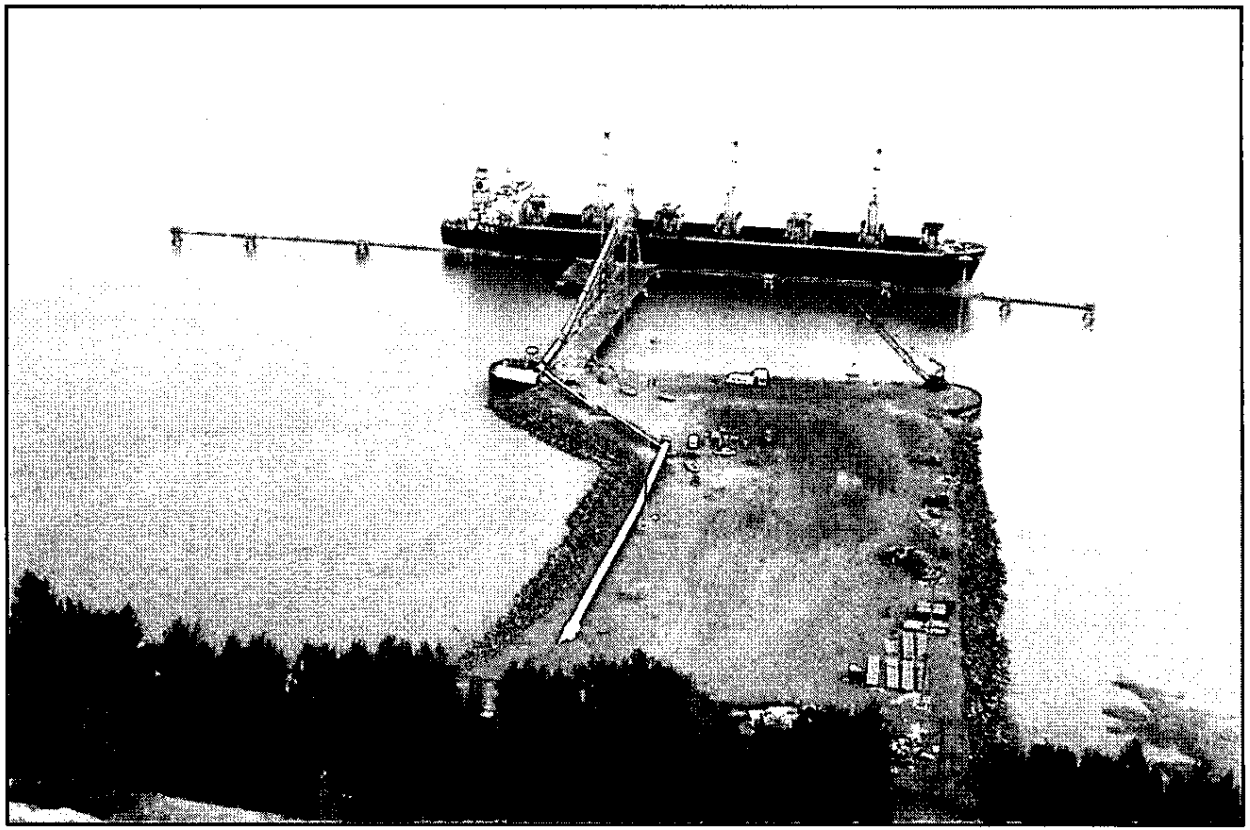


Barge at Port MacKenzie

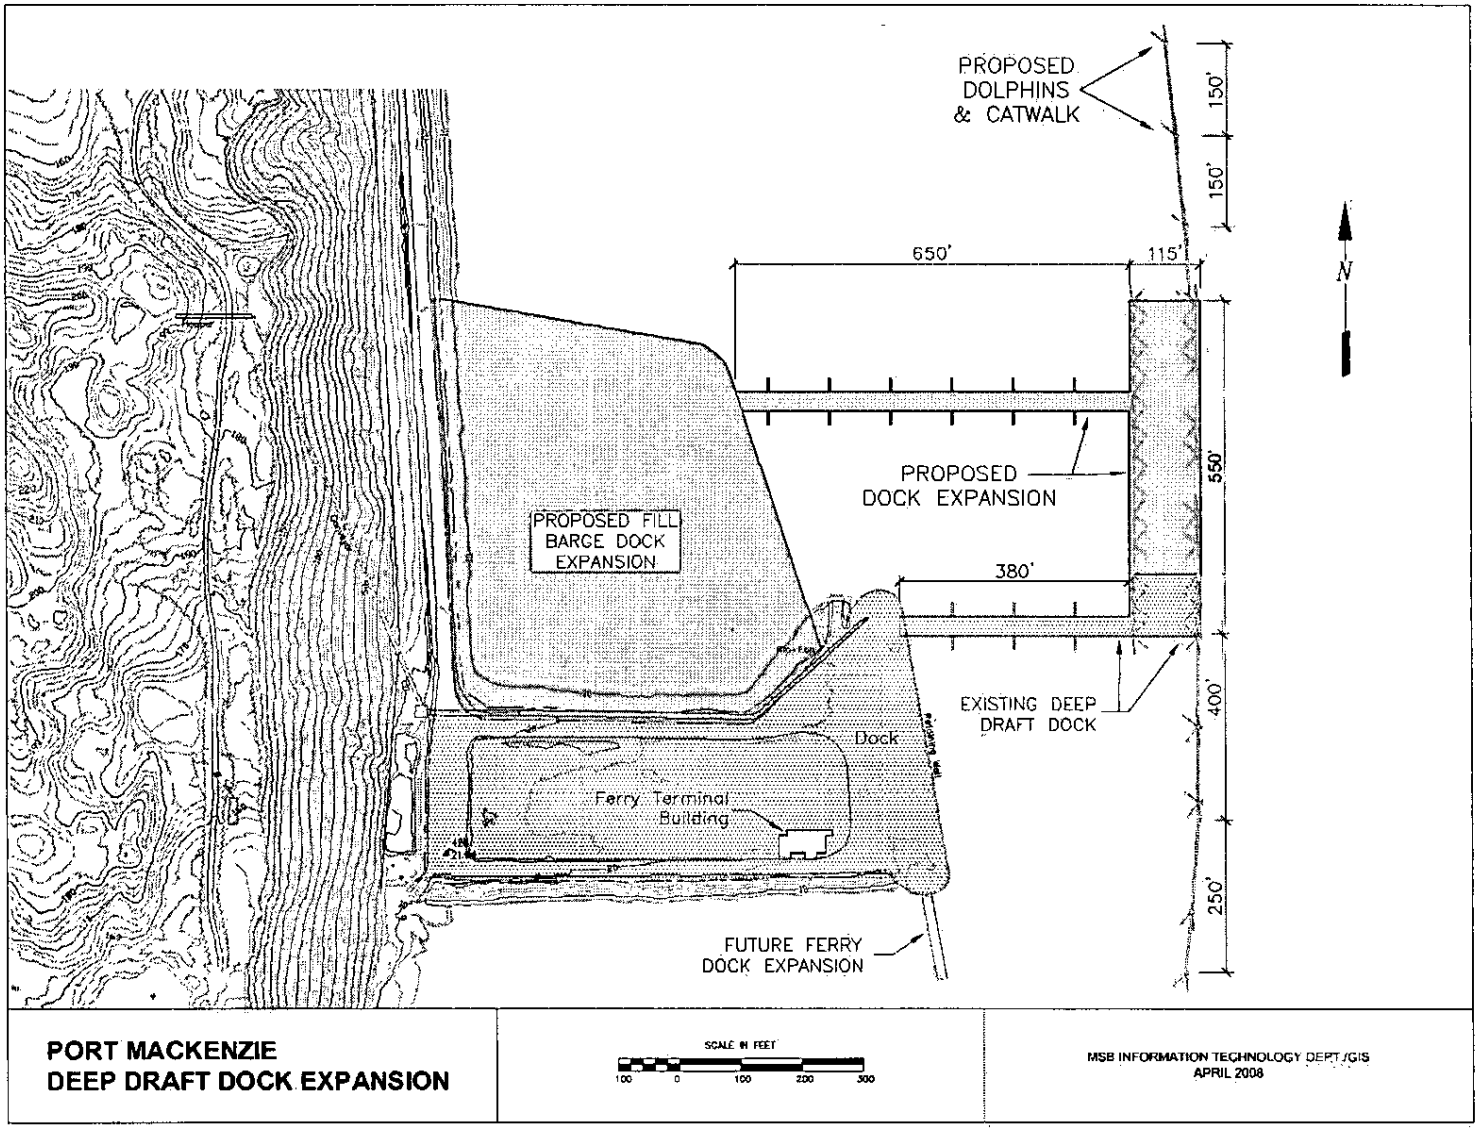


DEEP-DRAFT DOCK (-60' MLLW)

- The Northern most Deep-Draft Dock in North America.
- 485' trestle from existing barge dock leading to a dock face of 1,200'.



Future Expansion of Deep-Draft Dock



PORT MACKENZIE MARKETS

Export

- Wood Chips
  - S. Korea
  - Japan
  - Taiwan
- Saw Logs – S. Korea
- Sand & Gravel – w/i Alaska
- Heavy Equipment – w/i Alaska

Import

- Cement - China

Ferry Terminal Building

COOK INLET FERRY

- Will provide year-round transportation between Anchorage and Port MacKenzie.
- Also equipped as a Rescue Boat and Command Center.
- VariCraft vessel designed with variable deck configuration.
- Less than 15 minutes to cross the Inlet.

CURRENT BUSINESSES

- AMC – Manufacturing
- NPI – Wood Chips
  Saw Logs

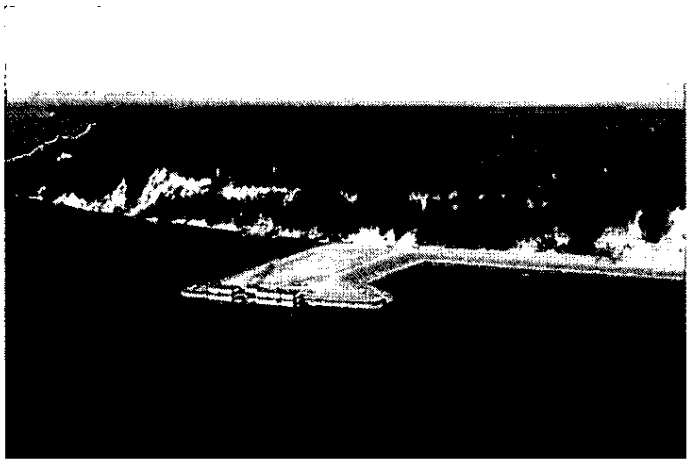
NEW BUSINESSES

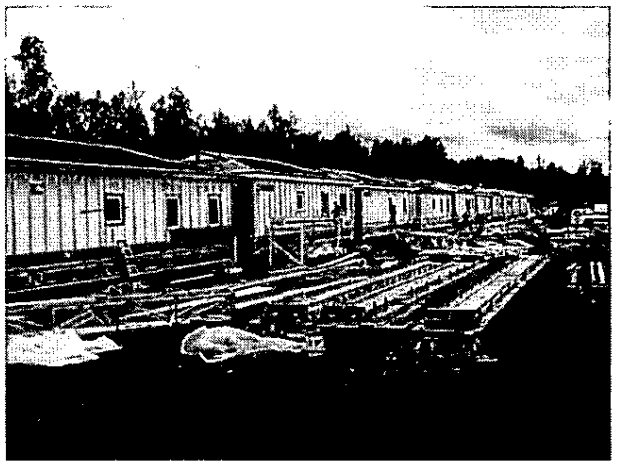
- KLONDIKE – Cement (Import)
- QUALITY ASPHALT - Sand & Gravel/451,000 tons in 2008

PROJECTED BUSINESSES

- CH2M Hill – Module Fabrication Plant
- Cruz Construction – Marine Base
- Coal Export from Sutton (Wishbone Hill)

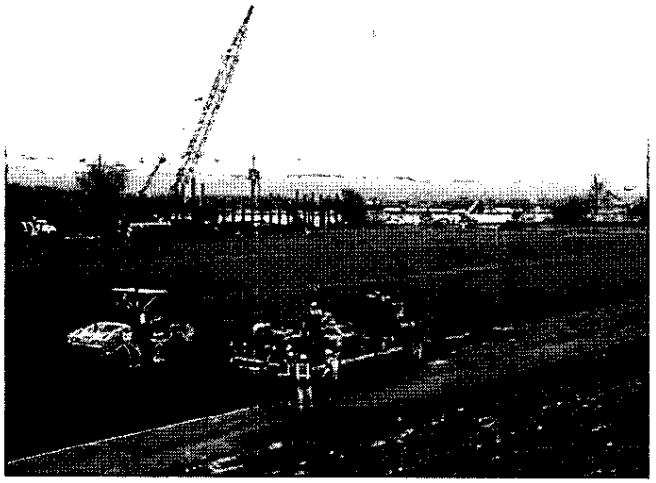
CURRENT BUSINESSES





- **Alutiiq Manufacturing Contractors**
  - Local company started in 2000 building modular homes for rural Alaskans.
  - First shipment from Port MacKenzie's barge dock on July 10, 2001.
  - Branching into government contracts.
  - Veco utilized facility in 2005 for constructing pump and electrical modules ($30-$40 million).

CURRENT BUSINESSES



- **NPI, LLC**
  - Exporter of wood chips.
  - Invested $3 million in the Deep-Draft Dock.
  - Invested $20 million in new road, commodities storage pad, conveyor system, and equipment.
  - First shipment of wood chips from Port MacKenzie's Deep-Draft Dock was in February 2005.

BENEFITS OF PORT MACKENZIE

1. Complementary Port to the Port of Anchorage
2. Deep-Draft Capability (-60' MLLW)
3. Space for Commercial/Industrial Development
   - 8,940 Acres (14 Square Miles)
4. Economic Development (Jobs)
5. Residential Expansion
6. Recreational Opportunities
7. New road/rail/utility corridors
8. Allow for export of natural resources
9. Fuel Tank Farm Expansion
10. Access for Small Aircraft Airpark
11. Access for connection to Knik Arm Crossing
12. Access for relocation of International Airport
13. Reduce tax burden on property owners

Port of Anchorage Intermodal Expansion Project

2009 Project Detail and Cost Estimates

Estimated Cost/Advertise In Time Frame:	30 days	60 days	90 days	Total
Total Estimated Costs for "Shovel Ready" Projects:	$ 63,441,154.00	$ 30,184,917.00	$ 68,879,894.00	$162,505,965.00

Project Detail			Estimated Cost/Advertise in Time Frame						
Item #	Project Phase	Task Order/Activity	30 Days	60 Days	90 Days	Priority Grouping	Comments	Length/Start Work	Coord Agency
1	General	EAFB tree clearing or Cherry Hill Reclamation	$ 500,000.00			1	Clearing must be completed prior to May 1 for Migratory Bird concurrence. Reclamation required in 2009 if no clearing.	1-3 mo	EAFB
2	General	EAFB Pit Development/Stockpile on site	$ 21,150,800.00			2	Work start dependent on ground thawing, tree clearing could be included and started earlier. Advertise $$ and request quantities bid.	12 mo	EAFB
3		ML&P Trunk Extension into the North Backlands	$ 3,325,000.00			1	Work contingent on ground thawing, 750-800 feet from Tidewater and then off pavement (includes telephone and data trunk lines).	6-8 mo	POA/ML&P
4		Crane Pilings	$ 6,410,000.00			1	Subsurface support for future cranes. Work will proceed when OCSP is complete. Pile material must be ordered /galvanized and shipped.		
5		Ground Bed Anodes	$ 8,310,000.00			1	Required for cathodic protection for steel already installed. Cannot delay. Work will proceed when OCSP is complete and coordinated with crane pile work. Includes purchase and installation.		
6		Move Cherry Hill Haul Road entrance to Port	$ 975,000.00			1	Work start contingent on ground thawing. Places road closer to the hill and increases available container parking space.	1-2 mo	
7		Continuity welds on Barge Berths/North Extension	$ 500,000.00			1	This is to tie all the tail walls together for corrosion protection.	6-8 mo	
8		Additional Cell To accommodate reduced cell width	$ 600,000.00			1	One 27-foot OCSP cell to complete the North Extension.	2-3 weeks	
9		Final Grading and NFS Cap North Extension	$ 11,817,000.00			2	Summer season work after ground thaw.	2-3 mo	
10		Temporary Wet Barge Berth Cap	$ 500,000.00			1	Work will proceed after vibracompaction is complete (scheduled for 5/31/09). This is the sacrificial cap that allows placing the Barge Berth in immediate revenue service; will install the permanent cap in 2010.	2 mo	
11		Drainage grates	$ 5,000.00			1	Improve drainage at Barge Berths	1 week	
12		Utilities and surfacing at Barge Berths (includes final Grading and NFS Cap)		$ 11,534,917.00		1	Utilities first, gravel second and surface third. Start after ground thaw; grade and cap almost designed (cap at 95%). Can advertise with 100% drawings in 60 days.	Start Util Jun-09	
13	General	Lower Jet Fuel Line		$ 500,000.00		3	Critical fuel line that provides all fuel to EAFB. Would require a by-pass line temporarily.		EAFB
14	General	Gaylor Gulch Storm Drain Connection		$ 2,750,000.00		2	Corrects erosion/sedimentation problem between Port and EAFB. Already designed and ready to bid.		EAFB
15		South Extension OCSP installation Big red phase. (Could be combined with 16)			$61,480,100.00	2	ERDC review scheduled late February 09. Already designed. Over 10 acres on south end. $61.4M includes purchase of steel.	Jul-09	USACE/ERDC
16		South Extension Earth Work -Dredging and mass fill. (Subset of 15 and could be combined).		$ 15,400,000.00	$ (15,400,000.00)	1	Expedited option to advertise in 60 days. Part of Item 15. Start work after ground thaw. ERDC review scheduled. 2009/2010 work.	Jun-09	USACE/ERDC
		MATERIAL PURCHASE ONLY							
17		Purchase of Steel Sheet Pile - (one half of South Replacement phase)			$ 22,799,794.00	3	Owner furnished material.		USACE/ERDC

	Project Phase	Other Project Segments:	30 Days to Advertise	60 Days to Advertise	90 Days to Advertise	Comments	Length/Start Work	Coord Agency
*		Dredge and replace soils with gravel at North and South Replacements			$ 36,129,533.00	Construction Dredging. Requires USACE coord, re-analysis and design in progress. [Possible cost share with USACE: DREDGING by USACE-$21,220,180 and FILL by Port-$14,909,353.]	May-10	USACE/ERDC
*	General	Rail Extension			$4,000,000	Estimate for single track to barge berth. 90 days to bid.	May-10	
*	General	Purchase and Install Asphalt Batch Plant. (Coordinate with item 27)	$ 3,300,000.00			Most of the costs would be purchase.		
*	General	Crush and stockpile aggregate for Asphalt/Concrete (Coordinate with item 26)	$ 4,400,000.00			Stockpile in Cherry Hill. Requires Asphalt Plant to be installed.		EAFB
*		Construct trestle and extend POL dock temporarily	Advertise in 180 days for $30,000,000			Temporary POL dock # 2. Assume 180 days to bid. $30M.	May-10	
*		North Extension Dock Cap, Utilities, & Surfacing. LOOK AT MOVING UP SOONER.	Advertise in 180 days for $67,056,000.			Can not start until OCSP installation complete in Aug/Sept 2009. In design now. Advertise $67,056,000 in 180 days. Maybe combine with Item 9 to accelerate.	Earliest start Oct 09	
*	General	Stevedore Buildings (two)	Advertise in 180 days for $1,960,000.			Design/Build. Assume 180 days to bid. $1,960,000 for both buildings.	May-10	
*	General	POA Administrative Building	Advertise in 180 days for $25,000,000			Assume 180 days to bid. $25M	Jun-10	
*	General	MSST Building for Coast Guard	Advertise in 180 days for $6,000,000			Assume 180 days to bid. $6M		
		Total for Other Project Segments			**$ 177,845,533.00**			

NOTES: Colors in the Project Phase column coincide with the colors on the project Phasing Plan.

- North Extension
- Barge Berths
- South Replacement current phasing
- South Replacement/North Replacement
- South Extension

USACE = U.S. Corps of Engineers
ERDC = USACE, Engineering Research & Development Center
EAFB = Elmendorf Air Force Base
ML&P = Municipal Light and Power
POA = Port of Anchorage

KEY POINTS FROM POA ADMINISTRATION:

Critical Path 1- Complete North End as soon as possible, new cranes arrive August 2010.
Critical Path 2 - Do the South Extension Phases, so cement ships may dock there by end of 2010.
Critical Path 3- Demolition of the two existing docks.

With State $120 Million in 2009

SOURCES (in Millions)	2002 - 2008	2009	2010	2011	2012	2013	2014	Total

Alaska's Housing Market 2009

Alaska Housing Finance Corporation

www.ahfc.us

Alaska Housing
FINANCE CORPORATION
Built to Last.

Alaska's Housing Market

- Interest rates are historically low
- Prices are stable
- New construction
  - Extremely low
  - Contractors busy with remodeling

Alaska Housing
FINANCE CORPORATION
Built to Last.

What Happened Outside?

- Collapse of housing market
  - Economy – Loss of jobs
  - Excessive speculation
    - Buying
    - Construction
  - Subprime mortgages defaulted
  - Depreciating home values

Alaska Housing
FINANCE CORPORATION
Built to Last.

The good news is…

- Alaska is different from the Lower 48
  - Adjustable rate mortgages (ARMs) were a very small proportion of total market
  - Small lending community that didn't participate in riskier loan products
  - AHFC did not participate in them
  - Minimal speculative development or buying
  - Continued moderate growth in economy expected

Alaska Housing
FINANCE CORPORATION
Built to Last.

Delinquencies—Are we in trouble?
3rd Quarter 2008

- Mortgage Bankers Association survey – 6.99 percent nationally
  - In Alaska our rate was 2.66 percent — the lowest in the nation
  - AHFC's delinquencies—2.29 percent

- Alaska's delinquency rate reached 5.9 percent in 2000 and 2001

Alaska Housing
FINANCE CORPORATION
Built to Last.

Foreclosures
3rd Quarter 2008

- Alaska ranks 47th in foreclosures at 1.64 percent
- Nearly one-third the national average of 5.17 percent

Alaska Housing
FINANCE CORPORATION
Built to Last.

Market is cooling

- 2008 end-of-year numbers of homes for sale in Anchorage much lower than '90s
- From 1999 to 2005, market hot for sellers
- Now a more moderate pace

Alaska Housing
FINANCE CORPORATION
Built to Last.

Average Sales Price as of Dec. 2008

- Anchorage – $326,000 (stable)
- Mat-Su – $221,000 (stable)
- Fairbanks* – $213,000 (up 1 percent)
- Kenai – $197,000 (up 2 percent)
- Kodiak – $260,000 (up 10 percent)

Mortgage Rate Trend Survey Predictions as of 02/09/09

Over the next 30 days:

- rates will rise significantly: 0.0%
- rates will rise slightly: 17.9%
- rates will remain unchanged: 14.3%
- rates will decline slightly: 64.3%
- rates will decline significantly: 3.6%

Over the next 90 days:

- rates will rise significantly: 0.0%
- rates will rise slightly: 17.9%
- rates will remain unchanged: 25.0%
- rates will decline slightly: 42.9%
- rates will decline significantly: 14.3%

Low Interest Rates – What has changed?

Alaska Housing FINANCE CORPORATION
Built to Last.

- Eligible borrowers have diminished 30 – 40 percent
  - Loan investors & mortgage insurance companies tightened credit standards
    - Higher down payment required
    - Higher FICO score required
    - Jumbo loan financing limited
    - No more exotic loans
      - No income; no jobs; no assets; interest-rate teaser; payment option (interest-only, half-interest, etc., payments)
  - FHA
    - increased fees
    - no seller-financed down payment assistance
  - People don't qualify to refinance
    - Decrease in property values
    - Shouldn't have gotten the loan in the first place & don't qualify

Alaska Housing
FINANCE CORPORATION
Built to Last.

Interest Rates Equate to Buying Power

- 1 percent decrease in interest rates roughly translates into a 10 percent increase in homebuyer purchasing power

Demand for housing isn't likely to subside...

- State demographers forecast population growth in Alaska = increased likelihood of demand for housing. (Source: Alaska Dept. of Labor & Workforce Development, Research & Analysis Sec.)

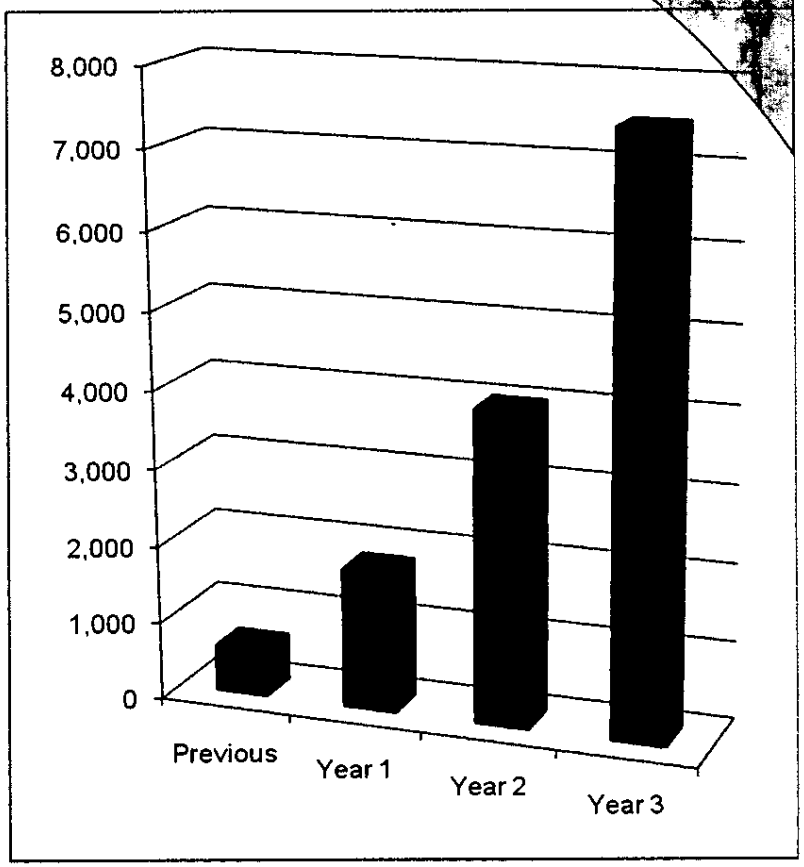
Energy Programs

- $200 million for weatherization
- $100 million for rebates
- $60 million additional for rebates (Sept. 2008)
- Big training component for both programs

Alaska Housing
FINANCE CORPORATION
Built to Last.

Weatherization Program Progress Report

- Previous program weatherized 600 homes.
- This year that number will triple to 1,800
- Year 2: 4,000
- Year 3: 7,500
- Statewide weatherization providers and housing authorities continue ramp-up



Alaska Housing

What's the Big Picture?

- Average home prices stable
- Home sale activity down
- Time on market up
- Delinquencies low
- Foreclosures low
- Interest rates low
- Overall construction outlook good
  - New home construction down
- Additional $1 billion estimated in Stimulus Package
- Population growth forecasted

Energy-Efficiency Programs

Progress Update for Alaska Legislature 2.17.2009

Weatherization PROGRAM

Home Energy Rebate PROGRAM

Overview

- $200 million for **weatherization**
  (income-based, no-cost program)
- $100 million for **rebates**
  (for those NOT qualifying for weatherization program: rebates for eligible improvements - ratings required)
- $60 million additional for rebates 9/2008(to carry program into 2009 calendar year)
- Large training component for both programs

Allocations

	Rebate	Weatherization
Anchorage Region	$26 million	• $34 million
Southcentral Region	$16 million	• $24 million
Fairbanks Region	$17 million	• $29 million
Interior Region	$2 million	• $12 million
Juneau Region	$4 million	• $12 million
Southeast Region	$5 million	• $14 million
Northern Region	$4 million	• $18 million
Western Region	$5 million	• $20 million
Southwest Region	$2 million	• $12 million

Program Start-Up

- April 2008: Programs approved
  - AHFC operates under emergency regulations
  - Training & personnel ramp-up started
- May 2008: Programs launched
- July 2008: Public hearing & final regulations adopted
- Summer 2008: Continued ramp-up & training

authorization provided in section 365(f) of such Act only if the governor of the recipient State notifies the Secretary of Energy in writing that the governor has obtained necessary assurances that each of the following will occur:

(1) The applicable State regulatory authority will seek to implement, in appropriate proceedings for each electric and gas utility, with respect to which the State regulatory authority has ratemaking authority, a general policy that ensures that utility financial incentives are aligned with helping their customers use energy more efficiently and that provide timely cost recovery and a timely earnings opportunity for utilities associated with cost-effective measurable and verifiable efficiency savings, in a way that sustains or enhances utility customers' incentives to use energy more efficiently.

(2) The State, or the applicable units of local government that have authority to adopt building codes, will implement the following:

(A) A building energy code (or codes) for residential buildings that meets or exceeds the most recently published International Energy Conservation Code, or achieves equivalent or greater energy savings.

(B) A building energy code (or codes) for commercial buildings throughout the State that meets or exceeds the ANSI/ASHRAE/IESNA Standard 90.1–2007, or achieves equivalent or greater energy savings.

(C) A plan for the jurisdiction achieving compliance with the building energy code or codes described in subparagraphs (A) and (B) within 8 years of the date of enactment of this Act in at least 90 percent of new and renovated residential and commercial building space. Such plan shall include active training and enforcement programs and measurement of the rate of compliance each year.

(3) The State will to the extent practicable prioritize the grants toward funding energy efficiency and renewable energy programs, including—

(A) the expansion of existing energy efficiency programs approved by the State or the appropriate regulatory authority, including energy efficiency retrofits of buildings and industrial facilities, that are funded—

(i) by the State; or

(ii) through rates under the oversight of the applicable regulatory authority, to the extent applicable;

(B) the expansion of existing programs, approved by the State or the appropriate regulatory authority, to support renewable energy projects and deployment activities, including programs operated by entities which have the authority and capability to manage and distribute grants, loans, performance incentives, and other forms of financial assistance; and

(C) cooperation and joint activities between States to advance more efficient and effective use of this funding to support the priorities described in this paragraph.

(b) STATE MATCH.—The State cost share requirement under the item relating to "Department of Energy; Energy Conservation" in title II of the Department of the Interior and Related Agencies

FMAP

Governor's FY2010 Operating Budget Amendments

	A	B	C	D	E	F	G	H	I	J	K
1	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
2	Administration	Personnel				A one-time item for Costs Associated with State Officers Compensation Commission (HB 417) (SB221 Sec 59 page 220 line 6) is removed.	(7.5)				(7.5)
3	Administration	Public Defender Agency				Additional funding is needed to cover expected increased operational costs due to projected caseload and workload increases. For the 1st half of FY2009, the Public Defender Agency (PDA) has experienced caseload growth in key areas. The Anchorage Criminal Section has experienced an 11% increase for all cases, a 30% increase in felony petitions to revoke probation, a 14% increase in misdemeanor cases, and a 70% increase in misdemeanor petitions to revoke probation. Of particular importance is the low closing rates in these cases. The closing rate for Anchorage Criminal is 73% for all cases, 81% for felony cases, 69% for felony petitions to revoke probation, 72% for misdemeanor cases, and 41% for misdemeanor petitions to revoke probation. Fairbanks has experienced a 5% increase in felony cases and a 14% increase in juvenile delinquency cases. The Civil Section within PDA has experienced a 7% increase in all cases, a 15% increase in juvenile delinquency cases, and a 9% increase in civil commitment cases. The Palmer office has seen a 35% increase in Child in Need of Aid (CINA) cases.	1,000.0				1,000.0
4	Commerce	Community and Regional Affairs				The department contracted for an updated cost allocation plan. This amendment provides additional authorization needed for the component to pay their share of the costs under the new proposed allocations.	4.4		51.1	CIP Rcpts 3.9 BLic Rcpts 45.0 Veh Rcpts 1.1 BF Bridg LF 1.1	55.5
5	Commerce	Community and Regional Affairs				Updated calculations for Business License Receipts show that there will be sufficient amounts to pay for salary cost increases without GF support previously requested in the Governor's Budget. These salary fund source changes are being reversed in both Community and Regional Affairs and the Office of Economic Development for a total of $61.4.	(39.2)		39.2	BLic Rcpts	0.0
6	Commerce	Office of Economic Development				Updated calculations for Business License Receipts show that there will be sufficient amounts to pay for salary cost increases without GF support previously requested in the Governor's Budget. These salary fund source changes are being reversed in both Community and Regional Affairs and the Office of Economic Development for a total of $61.4.	(22.2)		22.2	BLic Rcpts	0.0
7	Commerce	Office of Economic Development				The department contracted for an updated cost allocation plan. This amendment provides additional authorization needed for the component to pay their share of the costs under the new proposed allocations.			61.9	CIP Rcpts 1.9 BLic Rcpts 60.0	61.9
8	Commerce	Office of Economic Development				Eliminate one-time funding for start-up equipment costs to establish the new Film Office per fiscal note for ch. 63, SLA 2008.	(15.0)				(15.0)
9	Commerce	Payment in Lieu of Taxes				Language is added to ensure that all federal receipts received are able to be distributed to local governments as quickly as possible.					0.0
10	Commerce	National Forest Receipts				Language is added to ensure that all federal receipts received are able to be distributed to affected communities as quickly as possible.					0.0
11	Commerce	Alaska Aerospace Development Corporation				The department contracted for an updated cost allocation plan. This amendment provides additional authorization needed for the component to pay their share of the costs under the new proposed allocations.		36.5	14.2	CIP Rcpts 12.7 Aero Rcpts 1.5	50.7
12	Commerce	Alaska Seafood Marketing Institute				The department contracted for an updated cost allocation plan. This amendment provides additional authorization needed for the component to pay their share of the costs under the new proposed allocations.	2.3		2.8	Receipt Supported Srvcs	5.1
13	Commerce	AEA - Statewide Project Development				Eliminate one-time funding for start-up funding to establish the Renewable Energy Task Force and Renewable Energy Project Advisory Committee per the fiscal note for ch. 31, SLA 2008 (HB 152).	(71.0)				(71.0)
14	Commerce	Corporations, Business and Professional Licensing				The department contracted for an updated cost allocation plan. This amendment provides additional authorization needed for the component to pay their share of the costs under the new proposed allocations.			309.5	Interagency Rcpts 18.6 Rcpt Svcs 225.9 BLic Rcpts 65.0	309.5
15	Commerce	Corporations, Business and Professional Licensing				This amendment reduces uncollectible Interagency Receipt authority. At FY2009 Management Plan, the Office of Consumer Affairs and Investigations (OCAI) transferred $300.0 from personal services to contractual to hold for further evaluation of collectibiltiy. The component was merged with Corporations, Business and Professional Licensing in the Governor's Operating budget but potential funding needs were still being evaluated. The evaluation is complete and the authority is no longer needed.			(300.0)	Interagency Rcpts	(300.0)
16	Commerce	Regulatory Commission of Alaska				The department contracted for an updated cost allocation plan. This amendment provides additional authorization needed for the component to pay their share of the costs under the new proposed allocations.			105.3	RCA Rcpts	105.3
17	Commerce	Serve Alaska				The department contracted for an updated cost allocation plan. This amendment provides additional authorization needed for the component to pay their share of the costs under the new proposed allocations.	8.9	9.0			17.9
18	Corrections	Goose Creek Correctional Center				Goose Creek Correctional Center – A private contractor is being used to monitor the construction of the new prison. The Mat-Su Borough is going to contract with Corrections for that private contractor, since the State has oversight of the design and construction.			250.0	Statutory Designated Prgm. Rcpts	250.0

Governor's FY2010 Operating Budget Amendments

	A	B	C	D	E	F	G	H	I	J	K
1	Department	RDU/ Component	PFT	PPT	NP	Description	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
19	Corrections	Inmate Health Care				Eliminate MHTAAR for the Critical Incident Stress Management and Moral Reconation Therapy Training / Materials to comply with Trust request of January 2009. Reduces MHTAAR from $12.5 to 0.0.			(12.5)	MHTAAR	(12.5)
20	Fish and Game	Commercial Fisheries AYK Region Fisheries Management				Lower Yukon River cooperative summer drift test fishing project to assess run timing and relative strength of summer chum salmon at the mouth of the Yukon River. Funding is needed to replace special project funding from the Office of Subsistence Management (OSM), which was cut several years ago. The Yukon Delta Fisheries Development Association will be providing funding to hire local technicians to offset additional costs of this project.	18.9				18.9
21	Fish and Game	Commercial Fisheries AYK Region Fisheries Management				Hooper Bay/Dall Point offshore salmon test fish feasibility study. The proposed project is a cooperative study with the Yukon Delta Fisheries Development Association who is expected to provide local hire technicians to build community capacity and cover additional costs of operating this project.	67.0				67.0
22	Fish and Game	Commercial Fisheries AYK Region Fisheries Management				Pilot Station sonar fall chum comprehensive sampling to ensure the accuracy of fall chum and coho salmon passage estimates generated at the Pilot Station sonar project by increasing the frequency of sonar sampling during major pulses of returning salmon.	24.1				24.1
23	Fish and Game	Commercial Fisheries Westward Region Fisheries Management				Reduce general fund support for the Bering Sea/Aleutian Islands Crab Observer and Research Programs as federal funding may be available in the FY09 federal budget.	(793.7)				(793.7)
24	Fish and Game	Commercial Fisheries Special Projects				Increase federal receipt authority for the Bering Sea/Aleutian Islands Crab Observer and Research Programs as approximately $1million in federal funding may be available in the FY09 federal budget. A $793.7 general fund decrement for this program is in the Commercial Fisheries Westward Region Fisheries Management component. This federal increment is in the Commercial Fisheries Special Projects component as this is where the division records federal funds and represents the additional amount of federal authority needed to receive this funding.		500.0			500.0
25	Fish and Game	Wildlife Conservation				Wildlife pilot program of urban response teams. A more extensive program was included in the Governor's FY10 capital budget which is being deleted. This operating program will focus on the Anchorage area and may expand to other areas of the state.	190.0				190.0
26	Fish and Game	Wildlife Conservation Special Projects				Increase SDPR to receive National Fish and Wildlife Foundation funding to support two new research projects: 1) Dall Sheep Ecology Within Northern Alaska, and 2) Reduce Conflicts Between Grizzly Bears and Old Development Within Northern Alaska. Excess Interagency Receipt authority in this component is reduced for a net zero amendment.			0.0	Stat Des Prgm Rcpts 50.0 Interagency Rcpts (50.0)	0.0
27	Fish and Game	Administrative Services				Increase Interagency Receipt authority due to unanticipated SB250 indirect receipts from Wildlife Conservation and Sport Fisheries.			300.0	Interagency Rcpts	300.0
28	Governor	Executive Office	(2)			Transfer two AGIA positions and funds from Governor's Office to DNR (PCN 01-802X and PCN 01-919X). The transfer of PCN 01-802X is already in the supplemental budget bill and a supplemental amendment will be submitted to transfer the other position.	(390.0)				(390.0)
29	Governor	Governor's Office Leasing				Delete the GF increment for lease costs for the Absentee and Petition Office. The Office will remain funded with federal Help America Vote Act (HAVA) funds.	(60.5)				(60.5)
30	Governor	Elections				Delete the GF increment for Absentee and Petition Office. The Office will remain funded with federal Help America Vote Act (HAVA) funds.	(416.1)				(416.1)
31	Governor	Elections	(2)			Delete two HAVA project positions.					0.0
32	Governor	Elections				Restore funding from federal Help America Vote Act (HAVA) funds for Absentee and Petition Office staff.			142.0	CIP Rcpts	142.0
33	Governor	Fuel Branch-wide Unallocated				Reduce by $1.0 million the $24.0 million in the budget for distribution to executive branch agencies to reflect fuel and utility cost increases. $24.0 million is the appropriation amount corresponding to an oil price of $60 per barrel. The Department of Revenue's February 2009 Interim Forecast predicts the FY2010 price per barrel will be $57.78. Therefore, the cost associated with this appropriation is reduced by $1 million.	(1,000.0)				(1,000.0)
34	Health & Social Services	Behavioral Health Medicaid Services				Reduce authorization based on current Medicaid trends.	(4,300.0)	(4,300.0)			(8,600.0)
35	Health & Social Services	Behavioral Health Medicaid Services				Economic Stimulus - FMAP reduction. HSS calculated this amount based upon their understanding that the new FMAP will apply only to base Medicaid expenditures and not to any parts of the program that receive an enhanced Medicaid rate.	(10,399.9)	10,399.9			0.0
36	Health & Social Services	Behavioral Health Grants				Reduce MHTAAR for Develop Detox and Treatment Capacity as Alternative to Protective Custody Holds project to comply with Trust request of January 2009. Reduces MHTAAR from $530.0 to $500.0.			(30.0)	MHTAAR	(30.0)
37	Health & Social Services	Behavioral Health Administration				Increase MHTAAR for Office of Integrated Housing project to comply with Trust request of January 2009. Increases MHTAAR from $185.0 to $200.0.			15.0	MHTAAR	15.0
