Emergency Assistance Grants for Mental Health Trust Beneficiaries - Mental Health Trust Authority Receipts (MHTAAR) for grants to support beneficiaries of the Alaska Mental Health Trust Authority to prevent loss of housing that might occur due to unforeseen events such as institutionalization. It will allow beneficiaries to maintain homeownership or long-term rental stability by providing gap or short-term assistance. Assistance may be provided for any event like a structural or major appliance breakdown that may go beyond the financial reach of the homeowner, or life event that may threaten the ability of the beneficiary to make a mortgage or rent payment. Funding under this program is intended to supplement, not supplant, existing resources available for home modifications, weatherization or rehabilitation programs.

Funding History:
FY2009 $200,000 MHTAAR
FY2008 $200,000 MHTAAR

Program Description:
This program provides funds to support beneficiaries in maintaining homeownership or long-term rental stability by providing gap or short-term assistance. Assistance may be provided for any event like a structural or major appliance breakdown that may go beyond the financial reach of the homeowner, or life event that may threaten the ability of the beneficiary to make a mortgage or rent payment. Funds shall be used for "gap" or "short-term" assistance only. Funding under this program is intended to supplement, not supplant, existing resources available for home modifications, weatherization or rehabilitation programs. Grantees will need to document which other programs the recipient is eligible for and which have been queried for funding.

Eligible recipients are the head of household or co-head of household who is a person with a permanent physical, mental or developmental disability and is a "beneficiary" as defined by the Alaska Mental Health Trust Authority. Household income must be less than 80% of the median income (adjusted for family size) as defined by HUD. The grantee will be required to provide appropriate file documentation to support the fact that the assisted household's income is less than the applicable limit.

Eligible program activities include:

1. Major appliance repair, i.e., furnaces, refrigerators, stoves and the cost of installation.
2. Only owner-occupied housing is eligible for major structural improvements, i.e., stairway improvements, repair fire damage, or some other improvement which is necessary for the continued use of the property by the eligible beneficiary as the result of an emergency or funding gap.
3. Short-term mortgage payments to facilitate the receipt of supportive services in an institutional setting that jeopardizes the recipient's housing situation.
4. Short-term rental assistance payments to facilitate the receipt of supportive services in an institutional setting that jeopardizes the recipient's housing situation.
5. Short-term utility payments.
6. Other activities approved in advance by AHFC.

Other conditions include:

- Fifteen percent (15%) of funds received may be used for administrative expenses by the grantee. Administrative expenses shall be billed as a percentage of program funds requested under Attachment C, Article Payments.
- Participants in the AHFC Home Choice Voucher Homeownership program have a priority for the use of these funds. A set-aside of $50,000 will be maintained as part of the program's operation. If these funds are not used within six months of the start of each program year, then they may be reallocated to other participants.
- Project expenditures under $5,000 may be approved by the grantee. Project costs

between $5,000 and $10,000 must be approved in advance by the AHFC Program Manager. There is a maximum $10,000 household limit.

Beneficiaries -- are defined as an eligible recipient of funding from the Alaska Mental Health Trust Authority.

Gap -- is defined as the amount of funding needed to complete an assistance activity that exists because the other sources of funding available are insufficient to complete the activity.

Short-term -- is defined as a one-year period of time beginning with the date the recipient receives the initial payment of assistance.

Institutional Setting -- is defined as Alaska Psychiatric Institute (API), Corrections or a similar type facility.

(SECTION 2 OF THIS ACT BEGINS ON PAGE 37)

* **Sec. 2.** The following sets out the funding by agency for the appropriations made in sec. 1 of this Act.

Funding Source	Amount
Department of Administration	
1004 Unrestricted General Fund Receipts	175,000
1147 Public Building Fund	2,800,000
*** Total Agency Funding ***	$2,975,000
Department of Commerce, Community and Economic Development	
1002 Federal Receipts	40,630,000
1003 General Fund Match	500,000
1004 Unrestricted General Fund Receipts	14,305,400
1007 Interagency Receipts	300,000
1061 Capital Improvement Project Receipts	1,300,000
1210 Renewable Energy Grant Fund	25,000,000
*** Total Agency Funding ***	$82,035,400
Department of Corrections	
1004 Unrestricted General Fund Receipts	7,000,000
*** Total Agency Funding ***	$7,000,000
Department of Education and Early Development	
1004 Unrestricted General Fund Receipts	43,443,481
*** Total Agency Funding ***	$43,443,481
Department of Environmental Conservation	
1002 Federal Receipts	52,125,000
1003 General Fund Match	14,041,598
1004 Unrestricted General Fund Receipts	23,189,396
1052 Oil/Hazardous Release Prevention & Response Fund	5,750,000
1108 Statutory Designated Program Receipts	500,000
*** Total Agency Funding ***	$95,605,994
Department of Fish and Game	
1002 Federal Receipts	24,325,000
1004 Unrestricted General Fund Receipts	340,000

1024	Fish and Game Fund	775,000
1108	Statutory Designated Program Receipts	455,000
1201	Commercial Fisheries Entry Commission Receipts	138,000
***	Total Agency Funding ***	$26,033,000
Department of Health and Social Services		
1002	Federal Receipts	5,635,438
1003	General Fund Match	2,494,744
1004	Unrestricted General Fund Receipts	2,773,160
***	Total Agency Funding ***	$10,903,342
Department of Labor and Workforce Development		
1004	Unrestricted General Fund Receipts	600,000
1157	Workers Safety and Compensation Administration Account	3,092,200
***	Total Agency Funding ***	$3,692,200
Department of Military and Veterans Affairs		
1002	Federal Receipts	28,350,000
1003	General Fund Match	750,000
1004	Unrestricted General Fund Receipts	450,000
***	Total Agency Funding ***	$29,550,000
Department of Natural Resources		
1002	Federal Receipts	10,810,000
1003	General Fund Match	200,000
1004	Unrestricted General Fund Receipts	375,000
1108	Statutory Designated Program Receipts	1,100,000
1153	State Land Disposal Income Fund	3,500,000
1195	Special Vehicle Registration Receipts	450,000
***	Total Agency Funding ***	$16,435,000
Department of Public Safety		
1002	Federal Receipts	2,500,000
1004	Unrestricted General Fund Receipts	1,942,800
***	Total Agency Funding ***	$4,442,800
Department of Revenue		

1002	Federal Receipts	18,182,692
1050	Permanent Fund Dividend Fund	135,000
1139	Alaska Housing Finance Corporation Dividend	24,686,000
1156	Receipt Supported Services	73,508
*** Total Agency Funding ***		$43,077,200
Department of Transportation/Public Facilities		
1002	Federal Receipts	698,360,550
1003	General Fund Match	35,360,000
1004	Unrestricted General Fund Receipts	11,418,260
1026	Highways Equipment Working Capital Fund	15,000,000
1027	International Airports Revenue Fund	16,806,800
1061	Capital Improvement Project Receipts	400,000
1108	Statutory Designated Program Receipts	12,000,000

(SECTION 13 OF THIS ACT BEGINS ON PAGE 62)

* **Sec. 13.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Development Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

* **Sec. 14.** FUND TRANSFERS. (a) The income earned during fiscal year 2010 on revenue from the sources set out in AS 37.13.145(d) is appropriated to the Alaska capital income fund (AS 37.05.565).

(b) The interest earned on amounts in the election fund, estimated to be $320,000, are appropriated to the election fund required by the federal Help America Vote Act.

(c) The sum of $2,500,000 is appropriated from the general fund to the information services fund (AS 44.21.045(a)).

(d) The sum of $15,000,000 is appropriated from the general fund to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a)) for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

(e) The sum of $25,000,000 is appropriated from the general fund to the renewable energy grant fund (AS 42.45.045).

* **Sec. 15.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from

the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

* **Sec. 16.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. (a) The sum of $15,967,840 of the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2009, estimated to be $16,035,066, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program to be allocated to the following municipalities in the amounts stated:

MUNICIPALITY	PROJECT	ALLOCATION
(1) North Slope Borough	North Slope Borough workforce development three-year program enforcement	$2,500,620
(2) North Slope Borough	Arctic Fox supplemental studies to include the prevalence and incidence of rabies and other related diseases in the National Petroleum Reserve - Alaska	409,262
(3) City of Atqasuk	Local government operations and youth program	226,500
(4) City of Wainwright	Operations and maintenance equipment	49,269
(5) North Slope Borough	Continuing waterfowl survey in the National Petroleum Reserve - Alaska	900,000
(6) North Slope Borough	Police officers for National Petroleum Reserve - Alaska impacted communities	1,354,712

(c) The unexpended and unobligated balance, after the reappropriation made in (a) of this section, of the appropriation made in sec. 1, ch. 27, SLA 2008, page 44, line 20 (Budget and Audit Committee - $19,123,900) is reappropriated to the Legislative Budget and Audit Committee for purchase, restoration, and display of historical art and artifacts in conjunction with statehood celebrations in the capitol.

(d) Section 70(c), ch. 29, SLA 2008, is amended to read:

(c) The unexpended and unobligated balances, not to exceed $100,000, of the appropriations made in sec. 1, ch. 28, SLA 2007, page 42, line 22 (Budget and Audit Committee - $14,219,300); sec. 1, ch. 28, SLA 2007, page 42, line 28 (Legislative Council - $30,201,500); and sec. 1, ch. 28, SLA 2007, page 43, line 6 (legislative operating budget - $9,682,300) are reappropriated to the Legislative Council for the Legislative Outdoor Heritage Caucus for the fiscal year ending June 30, **2010** [2009].

*** Sec. 38.** UNIVERSITY OF ALASKA. The unexpended and unobligated balance of the appropriation made in sec. 4, ch. 30, SLA 2007, page 117, lines 23 - 25 (University of Alaska, Kachemak Bay Campus expansion - city hall purchase - $2,500,000) is reappropriated to the University of Alaska for property acquisition and property improvements to the Kachemak Bay Campus of the Kenai Peninsula College.

*** Sec. 39.** COASTAL IMPACT ASSISTANCE PROGRAM. (a) The share of money received by the state under the federal coastal impact assistance program, sec. 384, P.L. 109-58 (Energy Policy Act of 2005), expected to be $53,600,000, is appropriated in the following amounts to the departments listed for the projects described:

(1) $25,950,000 to the Department of Natural Resources for state-initiated capital projects, as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(2) $750,000 to the Department of Fish and Game for the chum and sockeye genetic identification program in western Alaska;

(3) $16,000,000 to the Department of Commerce, Community, and Economic Development for capital project grants to be awarded through an open public solicitation process and as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(4) $10,900,000 to the Department of Commerce, Community, and Economic Development for competitive capital project grants, as allowed under federal and state laws governing the use of coastal impact assistance program funds, to be allocated to the following coastal resource service areas and municipalities in the amounts stated:

RECIPIENT	AMOUNT
Cenaliulriit CRSA	$3,000,000

City and Borough of Juneau	1,900,000
Aleutians West CRSA	1,200,000
Bering Straits CRSA	1,100,000
City and Borough of Sitka	900,000
Ketchikan Gateway Borough	900,000
Aleutians East Borough	700,000
Bristol Bay CRSA	500,000
City and Borough of Yakutat	300,000
Haines Borough	200,000
Municipality of Skagway	100,000
City and Borough of Wrangell	100,000

(b) If the amount available for appropriation in (a) of this section is less than $53,600,000, the appropriations made in (a)(1) - (4) of this section shall be reduced in proportion to the amount of the shortfall.

*** Sec. 40.** DEPARTMENT OF FISH AND GAME. The sum of $750,000 is appropriated from the general fund to the Department of Fish and Game to supplement the appropriation of federal funds in sec. 39(a)(2) of this Act for the chum and sockeye genetic identification program in western Alaska for the fiscal year ending June 30, 2010.

*** Sec. 41.** FUND SOURCE CHANGES FOR FEDERAL ECONOMIC STIMULUS PROJECTS FOR THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) Section 2, ch. 61, SLA 2001, page 65, line 24, is amended to read:

Federal Receipts	**658,269,373**
	[664,017,739]
Federal Stimulus: ARRA 2009	**5,748,366**

(b) The fund source amendment in (a) of this section is for $5,748,366 of the allocation made in sec. 1, ch. 61, SLA 2001, page 41, lines 21 - 23 (Ketchikan: Tongass - viaducts replacement and rehabilitation - $5,750,000).

(c) Section 2, ch. 159, SLA 2004, page 53, line 28, is amended to read:

Federal Receipts	**1,095,667,288**
	[1,100,167,288]
Federal Stimulus: ARRA 2009	**4,500,000**

(d) The fund source amendment in (c) of this section is for

(1) $3,000,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 36, lines 29 - 30 (Fort Yukon: resurfacing - $3,000,000); and

(2) $1,500,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 44, line 33, through page 45, line 4 (Ketchikan: Tongass Highway - viaducts replacement and rehabilitation - $2,200,000).

(e) Section 2, ch. 3, FSSLA 2005, page 93, line 27, is amended to read:

1002 Federal Receipts	**742,445,086**
	[757,030,711]
1212 Federal Stimulus: ARRA 2009	**14,585,625**

(f) The fund source amendment in (e) of this section is for

(1) $4,220,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 69, lines 31 - 32 (Allakaket: airport improvements - $4,220,000);

(2) $2,765,625 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 71, lines 9 - 10 (Fort Yukon: airport resurfacing - $2,765,625);

(3) $6,600,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 73, lines 6 - 8 (Ouzinkie: airport reconstruction and relocation - $9,000,000); and

(4) $1,000,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 79, lines 30 - 31 (Dillingham: Wood River Road reconstruction - $1,000,000).

(g) Section 2, ch. 82, SLA 2006, page 113, line 23, is amended to read:

1002 Federal Receipts	**1,026,284,951**
	[1,036,719,351]
1212 Federal Stimulus: ARRA 2009	**10,434,400**

(h) The fund source amendment in (g) of this section is for

(1) $2,734,400 of the allocation made in sec. 1, ch. 82, SLA 2006, page 90, lines 16 - 17 (Fort Yukon: airport improvements - $4,725,151); and

(2) $7,700,000 of the allocation made in sec. 1, ch. 82, SLA 2006, page 99, lines 7 - 8 (Gustavus: dock replacement - $19,000,000).

(i) Section 5, ch. 30, SLA 2007, page 121, line 20, is amended to read:

1002 Federal Receipts	**531,315,800**
	[542,215,800]

1212 Federal Stimulus: ARRA 2009 **10,900,000**

(j) The fund source amendment in (i) of this section is for

(1) $3,500,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 28 - 29 (Akiachak: airport relocation - $10,500,000);

(2) $400,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 32 - 33 (Allakaket: airport improvements - $400,000); and

(3) $7,000,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 107, lines 4 - 5 (Huslia: airport improvements - $7,525,000).

(k) Section 14, ch. 29, SLA 2008, page 177, line 9, is amended to read:

1002 Federal Receipts **551,465,150**

[563,745,150]

1212 Federal Stimulus: ARRA 2009 **12,280,000**

(*l*) The fund source amendment in (k) of this section is for

(1) $1,780,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 162, lines 11 - 12 (Allakaket: airport improvements - $1,950,000); and

(2) $10,500,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 169, lines 31 - 33 (Juneau: Glacier Highway – Amalga to Eagle Beach widening - $10,500,000).

* **Sec. 42.** ALASKA HOUSING CAPITAL CORPORATION. (a) The available balance of all subfunds and accounts that would be deposited in the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska) for fiscal year 2009 by operation of art. IX, sec. 17(d), Constitution of the State of Alaska, to repay appropriations from the budget reserve fund is appropriated to the Alaska Housing Capital Corporation, a subsidiary of the Alaska Housing Finance Corporation created under authority of AS 18.56.086.

(b) Appropriations made to the Alaska Housing Capital Corporation for fiscal year 2009 that are made from subfunds and accounts other than the operating general fund (state accounting system fund number 11100) by operation of (a) of this section are appropriated from the Alaska Housing Capital Corporation to the subfunds and accounts from which those funds were appropriated under (a) of this section.

* **Sec. 43.** REVENUE AND APPROPRIATION BALANCE; CONSTITUTIONAL BUDGET RESERVE. (a) The sum of $1,673,000 is appropriated from the general fund to the

Department of Revenue, treasury division, for operating costs related to management of the constitutional budget reserve fund for the fiscal year ending June 30, 2010.

(b) If the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated from the budget reserve fund (AS 37.05.540) to the general fund.

(c) If, after the appropriation made in (b) of this section, the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated to the general fund from the Alaska Housing Capital Corporation, a subsidiary of the Alaska Housing Finance Corporation created under authority of AS 18.56.086.

(d) The amount calculated to be available for appropriation under art. IX, sec. 17(b), Constitution of the State of Alaska, for fiscal year 2010 is appropriated under art. IX, sec. 17(b), Constitution of the State of Alaska, from the budget reserve fund to the general fund.

*** Sec. 44.** LAPSE. (a) The appropriations made by secs. 14 and 15(1) of this Act are for the capitalization of funds and do not lapse.

(b) The appropriations made by secs. 16, 19(b), 20(b), 20(c), 22(d) - (f), 23(b) - (e), 23(g) - (i), 26, 32(a)(3), 34(a), 35, 36, 37(a), 37(c), 38, and 39 of this Act are for capital projects and lapse under AS 37.25.020.

(c) A grant awarded in this Act to a named recipient under AS 37.05.316 is for a capital project and lapses under AS 37.25.020, unless otherwise specified.

*** Sec. 45.** Sections 4, 7, 10, 18, 41, 43(b), and 43(c) of this Act take effect April 19, 2009.

*** Sec. 46.** Sections 17(b), 17(c), 19 - 38, and 42(a) of this Act take effect June 30, 2009.

*** Sec. 47.** Except as provided in secs. 45 and 46 of this Act, this Act takes effect July 1, 2009.

CS FOR SENATE BILL NO. 75(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act making and amending appropriations, including capital appropriations, supplemental appropriations, and appropriations to capitalize funds; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

(SECTION 1 OF THIS ACT BEGINS ON PAGE 2)

* **Section 1.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 2 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

(SECTION 13 OF THIS ACT BEGINS ON PAGE 62)

* **Sec. 13.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Development Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

* **Sec. 14.** FUND TRANSFERS. (a) The income earned during fiscal year 2010 on revenue from the sources set out in AS 37.13.145(d) is appropriated to the Alaska capital income fund (AS 37.05.565).

(b) The interest earned on amounts in the election fund, estimated to be $320,000, are appropriated to the election fund required by the federal Help America Vote Act.

(c) The sum of $2,500,000 is appropriated from the general fund to the information services fund (AS 44.21.045(a)).

(d) The sum of $15,000,000 is appropriated from the general fund to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a)) for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

(e) The sum of $25,000,000 is appropriated from the general fund to the renewable energy grant fund (AS 42.45.045).

* **Sec. 15.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from

the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

* **Sec. 16.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. (a) The sum of $15,967,840 of the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2009, estimated to be $16,035,066, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program to be allocated to the following municipalities in the amounts stated:

MUNICIPALITY	PROJECT	ALLOCATION
(1) North Slope Borough	North Slope Borough workforce development three-year program enforcement	$2,500,620
(2) North Slope Borough	Arctic Fox supplemental studies to include the prevalence and incidence of rabies and other related diseases in the National Petroleum Reserve - Alaska	409,262
(3) City of Atqasuk	Local government operations and youth program	226,500
(4) City of Wainwright	Operations and maintenance equipment	49,269
(5) North Slope Borough	Continuing waterfowl survey in the National Petroleum Reserve - Alaska	900,000
(6) North Slope Borough	Police officers for National Petroleum Reserve - Alaska impacted communities	1,354,712

(7) North Slope Borough	Meade River school counselor	243,598
(8) City of Barrow	New boat ramp	2,000,000
(9) City of Nuiqsut	Youth center operations and maintenance	188,847
(10) City of Wainwright	Wainwright youth recreation program	240,000
(11) North Slope Borough	Communications system upgrade	5,000,000
(12) North Slope Borough	Emerging disease surveillance: continuation of wildlife population health assessment in the National Petroleum Reserve - Alaska	335,032
(13) City of Nuiqsut	Local government operations and maintenance	420,000
(14) City of Wainwright	Wainwright local government operations	300,000
(15) City of Barrow	Local government operations and maintenance	1,800,000

(b) If the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2009, is less than $15,967,840, the Department of Commerce, Community, and Economic Development shall work with the municipalities listed in (a) of this section to reduce the allocations made in (a) of this section to equal the amount received.

* **Sec. 17.** DEPARTMENT OF COMMERCE, COMMUNITY, AND ECONOMIC DEVELOPMENT. (a) The sum of $8,000 is appropriated from the anatomical gift awareness fund (AS 13.50.160) to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to Life Alaska Donor Services, Inc., for promoting the donation program under AS 13.50.150 for the fiscal year ending June 30, 2010.

(b) Section 60(b), ch. 29, SLA 2008, is amended to read:

(b) The sum of $125,000 is appropriated from the general fund to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to World Trade Center Alaska for the international trade program partnership for the fiscal year ending **June 30, 2010** [JUNE 30, 2009].

(c) Section 10(b), ch. 159, SLA 2004, is amended to read:

(b) **The** [CONTINGENT UPON THE FORMATION OF A BOROUGH THAT ENCOMPASSES THE CITY OF DELTA JUNCTION, THE] balance owing on the loan made under (a) of this section on **June 30, 2009,** [THE DATE OF INCORPORATION OF THE BOROUGH] is redesignated as a grant under AS 37.05.315 to the City of Delta Junction for the payment of the costs of the settlement agreement for litigation regarding the establishment of a private prison in the vicinity of the city.

City of Akutan - Akutan Harbor Road Project **and Airport Access Projects** (HD 37)	3,100,000	3,100,000

*** Sec. 34.** HOUSE DISTRICT 38. (a) The unexpended and unobligated balances of the appropriations made in sec. 1, ch. 135, SLA 2000, page 56, lines 18 - 20 (Upper Kalskag, community restoration and graveyard restoration - $25,000), sec. 1, ch. 1, SSSLA 2002, page 84, lines 25 - 27 (Upper Kalskag, teen center and playground equipment purchase - $28,791), and sec. 8(b)(25), ch. 159, SLA 2004 (Lower Kalskag, community projects and improvements - $41,922) are reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Native Village of Upper Kalskag for the multi-facility building renovation.

(b) The unexpended and unobligated balance of the appropriation made in sec. 8(b), ch. 1, SSSLA 2002, page 97, line 28 (Eek, community projects and improvements - $170,838) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Eek for river bank repairs and boardwalks.

*** Sec. 35.** HOUSE DISTRICT 39. The unexpended and unobligated balances of the appropriations made in sec. 8(a), ch. 1, SSSLA 2002, page 96, line 26 (Pitka's Point,

Community projects and improvements - $77,149) and sec. 8(a)(21), ch. 159, SLA 2004 (Pitka's Point, Community projects and improvements - $35,507) are reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.316 to the Pitka's Point Traditional Council for upgrading the washeteria.

*** Sec. 36.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. The unexpended and unobligated balance of the appropriation made in sec. 1, ch. 82, SLA 2006, page 38, lines 9 - 12 (Kenai Peninsula Borough, Diamond Ridge nonmotorized vehicle safety trail - $65,000) is reappropriated to the Department of Transportation and Public Facilities for Ohlson Mountain Road improvements.

*** Sec. 37.** REAPPROPRIATION OF LEGISLATIVE APPROPRIATIONS. (a) The unexpended and unobligated balances of the appropriations made in sec. 1, ch. 27, SLA 2008, page 44, line 28 (Legislative Council - $32,960,200) and sec. 1, ch. 27, SLA 2008, page 45, line 6 (legislative operating budget - $10,835,500), and the unexpended and unobligated balance, not to exceed $4,300,000, of the appropriation made in sec. 1, ch. 27, SLA 2008, page 44, line 20 (Budget and Audit Committee - $19,123,900) are reappropriated to the Legislative Council for the projects listed in the amounts stated:

PROJECT	AMOUNT
(1) boiler replacement and heating rehabilitation project	$2,900,000
(2) exterior and interior repair, renovation, and safety improvements	2,600,000
(3) information technology upgrades and electronic voting improvements	450,000
(4) comprehensive statewide energy plan	300,000

(b) If the amount available for reappropriation in (a) of this section is less than $6,250,000, the reappropriations made by (a)(1) - (3) of this section shall be reduced in proportion to the amount of the shortfall.

(c) The unexpended and unobligated balance, after the reappropriation made in (a) of this section, of the appropriation made in sec. 1, ch. 27, SLA 2008, page 44, line 20 (Budget and Audit Committee - $19,123,900) is reappropriated to the Legislative Budget and Audit Committee for purchase, restoration, and display of historical art and artifacts in conjunction with statehood celebrations in the capitol.

(d) Section 70(c), ch. 29, SLA 2008, is amended to read:

(c) The unexpended and unobligated balances, not to exceed $100,000, of the appropriations made in sec. 1, ch. 28, SLA 2007, page 42, line 22 (Budget and Audit Committee - $14,219,300); sec. 1, ch. 28, SLA 2007, page 42, line 28 (Legislative Council - $30,201,500); and sec. 1, ch. 28, SLA 2007, page 43, line 6 (legislative operating budget - $9,682,300) are reappropriated to the Legislative Council for the Legislative Outdoor Heritage Caucus for the fiscal year ending June 30, **2010** [2009].

* **Sec. 38.** UNIVERSITY OF ALASKA. The unexpended and unobligated balance of the appropriation made in sec. 4, ch. 30, SLA 2007, page 117, lines 23 - 25 (University of Alaska, Kachemak Bay Campus expansion - city hall purchase - $2,500,000) is reappropriated to the University of Alaska for property acquisition and property improvements to the Kachemak Bay Campus of the Kenai Peninsula College.

* **Sec. 39.** COASTAL IMPACT ASSISTANCE PROGRAM. (a) The share of money received by the state under the federal coastal impact assistance program, sec. 384, P.L. 109-58 (Energy Policy Act of 2005), expected to be $53,600,000, is appropriated in the following amounts to the departments listed for the projects described:

(1) $25,950,000 to the Department of Natural Resources for state-initiated capital projects, as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(2) $750,000 to the Department of Fish and Game for the chum and sockeye genetic identification program in western Alaska;

(3) $16,000,000 to the Department of Commerce, Community, and Economic Development for capital project grants to be awarded through an open public solicitation process and as allowed under federal and state laws governing the use of coastal impact assistance program funds;

(4) $10,900,000 to the Department of Commerce, Community, and Economic Development for competitive capital project grants, as allowed under federal and state laws governing the use of coastal impact assistance program funds, to be allocated to the following coastal resource service areas and municipalities in the amounts stated:

RECIPIENT	AMOUNT
Cenaliulriit CRSA	$3,000,000

City and Borough of Juneau	1,900,000
Aleutians West CRSA	1,200,000
Bering Straits CRSA	1,100,000
City and Borough of Sitka	900,000
Ketchikan Gateway Borough	900,000
Aleutians East Borough	700,000
Bristol Bay CRSA	500,000
City and Borough of Yakutat	300,000
Haines Borough	200,000
Municipality of Skagway	100,000
City and Borough of Wrangell	100,000

(b) If the amount available for appropriation in (a) of this section is less than $53,600,000, the appropriations made in (a)(1) - (4) of this section shall be reduced in proportion to the amount of the shortfall.

*** Sec. 40.** DEPARTMENT OF FISH AND GAME. The sum of $750,000 is appropriated from the general fund to the Department of Fish and Game to supplement the appropriation of federal funds in sec. 39(a)(2) of this Act for the chum and sockeye genetic identification program in western Alaska for the fiscal year ending June 30, 2010.

*** Sec. 41.** FUND SOURCE CHANGES FOR FEDERAL ECONOMIC STIMULUS PROJECTS FOR THE DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) Section 2, ch. 61, SLA 2001, page 65, line 24, is amended to read:

Federal Receipts	**658,269,373**
	[664,017,739]
Federal Stimulus: ARRA 2009	**5,748,366**

(b) The fund source amendment in (a) of this section is for $5,748,366 of the allocation made in sec. 1, ch. 61, SLA 2001, page 41, lines 21 - 23 (Ketchikan: Tongass - viaducts replacement and rehabilitation - $5,750,000).

(c) Section 2, ch. 159, SLA 2004, page 53, line 28, is amended to read:

Federal Receipts	**1,095,667,288**
	[1,100,167,288]
Federal Stimulus: ARRA 2009	**4,500,000**

(d) The fund source amendment in (c) of this section is for

(1) $3,000,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 36, lines 29 - 30 (Fort Yukon: resurfacing - $3,000,000); and

(2) $1,500,000 of the allocation made in sec. 1, ch. 159, SLA 2004, page 44, line 33, through page 45, line 4 (Ketchikan: Tongass Highway - viaducts replacement and rehabilitation - $2,200,000).

(e) Section 2, ch. 3, FSSLA 2005, page 93, line 27, is amended to read:

1002 Federal Receipts	**742,445,086**
	[757,030,711]
1212 Federal Stimulus: ARRA 2009	**14,585,625**

(f) The fund source amendment in (e) of this section is for

(1) $4,220,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 69, lines 31 - 32 (Allakaket: airport improvements - $4,220,000);

(2) $2,765,625 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 71, lines 9 - 10 (Fort Yukon: airport resurfacing - $2,765,625);

(3) $6,600,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 73, lines 6 - 8 (Ouzinkie: airport reconstruction and relocation - $9,000,000); and

(4) $1,000,000 of the allocation made in sec. 1, ch. 3, FSSLA 2005, page 79, lines 30 - 31 (Dillingham: Wood River Road reconstruction - $1,000,000).

(g) Section 2, ch. 82, SLA 2006, page 113, line 23, is amended to read:

1002 Federal Receipts	**1,026,284,951**
	[1,036,719,351]
1212 Federal Stimulus: ARRA 2009	**10,434,400**

(h) The fund source amendment in (g) of this section is for

(1) $2,734,400 of the allocation made in sec. 1, ch. 82, SLA 2006, page 90, lines 16 - 17 (Fort Yukon: airport improvements - $4,725,151); and

(2) $7,700,000 of the allocation made in sec. 1, ch. 82, SLA 2006, page 99, lines 7 - 8 (Gustavus: dock replacement - $19,000,000).

(i) Section 5, ch. 30, SLA 2007, page 121, line 20, is amended to read:

1002 Federal Receipts	**531,315,800**
	[542,215,800]

1212 Federal Stimulus: ARRA 2009 **10,900,000**

(j) The fund source amendment in (i) of this section is for

(1) $3,500,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 28 - 29 (Akiachak: airport relocation - $10,500,000);

(2) $400,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 105, lines 32 - 33 (Allakaket: airport improvements - $400,000); and

(3) $7,000,000 of the allocation made in sec. 4, ch. 30, SLA 2007, page 107, lines 4 - 5 (Huslia: airport improvements - $7,525,000).

(k) Section 14, ch. 29, SLA 2008, page 177, line 9, is amended to read:

1002 Federal Receipts **551,465,150**

[563,745,150]

1212 Federal Stimulus: ARRA 2009 **12,280,000**

(*l*) The fund source amendment in (k) of this section is for

(1) $1,780,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 162, lines 11 - 12 (Allakaket: airport improvements - $1,950,000); and

(2) $10,500,000 of the allocation made in sec. 13, ch. 29, SLA 2008, page 169, lines 31 - 33 (Juneau: Glacier Highway – Amalga to Eagle Beach widening - $10,500,000).

* **Sec. 42.** ALASKA HOUSING CAPITAL CORPORATION. (a) The available balance of all subfunds and accounts that would be deposited in the budget reserve fund (art. IX, sec. 17, Constitution of the State of Alaska) for fiscal year 2009 by operation of art. IX, sec. 17(d), Constitution of the State of Alaska, to repay appropriations from the budget reserve fund is appropriated to the Alaska Housing Capital Corporation, a subsidiary of the Alaska Housing Finance Corporation created under authority of AS 18.56.086.

(b) Appropriations made to the Alaska Housing Capital Corporation for fiscal year 2009 that are made from subfunds and accounts other than the operating general fund (state accounting system fund number 11100) by operation of (a) of this section are appropriated from the Alaska Housing Capital Corporation to the subfunds and accounts from which those funds were appropriated under (a) of this section.

* **Sec. 43.** REVENUE AND APPROPRIATION BALANCE; CONSTITUTIONAL BUDGET RESERVE. (a) The sum of $1,673,000 is appropriated from the general fund to the

Department of Revenue, treasury division, for operating costs related to management of the constitutional budget reserve fund for the fiscal year ending June 30, 2010.

(b) If the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated from the budget reserve fund (AS 37.05.540) to the general fund.

(c) If, after the appropriation made in (b) of this section, the unrestricted state revenue available for appropriation in fiscal year 2009 is insufficient to cover general fund appropriations made for fiscal year 2009, the amount necessary to balance revenue and general fund appropriations is appropriated to the general fund from the Alaska Housing Capital Corporation, a subsidiary of the Alaska Housing Finance Corporation created under authority of AS 18.56.086.

(d) The amount calculated to be available for appropriation under art. IX, sec. 17(b), Constitution of the State of Alaska, for fiscal year 2010 is appropriated under art. IX, sec. 17(b), Constitution of the State of Alaska, from the budget reserve fund to the general fund.

* **Sec. 44.** LAPSE. (a) The appropriations made by secs. 14 and 15(1) of this Act are for the capitalization of funds and do not lapse.

(b) The appropriations made by secs. 16, 19(b), 20(b), 20(c), 22(d) - (f), 23(b) - (e), 23(g) - (i), 26, 32(a)(3), 34(a), 35, 36, 37(a), 37(c), 38, and 39 of this Act are for capital projects and lapse under AS 37.25.020.

(c) A grant awarded in this Act to a named recipient under AS 37.05.316 is for a capital project and lapses under AS 37.25.020, unless otherwise specified.

* **Sec. 45.** Sections 4, 7, 10, 18, 41, 43(b), and 43(c) of this Act take effect April 19, 2009.

* **Sec. 46.** Sections 17(b), 17(c), 19 - 38, and 42(a) of this Act take effect June 30, 2009.

* **Sec. 47.** Except as provided in secs. 45 and 46 of this Act, this Act takes effect July 1, 2009.

Verbal Testimony by Kathy Morgan of Tok, Alaska

Presented via teleconference to the Senate Finance Committee on SB75, FY2010 Capital Budget

My name is Kathy Morgan, and I'm representing the Tok Community Umbrella Corporation. I'd like to ask your support for the capital improvement projects that the community of Tok is requesting this year. First, though, thank you very much for the grant the legislature awarded us last session for purchase of a giant wood chipper to reduce our wildfire fuel stands of trees to a safe form that can heat the school and hopefully other public buildings in the community. That chipper should be delivered tomorrow.

This year we are requesting funding for 7 much smaller projects. All of them are intended either to make our community safer from wildfires, or to use wood to reduce heating costs for public buildings, which also indirectly helps to make the community safer, since it provides a market for the wildfire fuels we want to remove. Some of them involve hiring workers and equipment to remove wildfire fuel, which will also boost the local economy while making the community safer.

One project is the Senior's Defensible Space: we'd like to remove the wildfire fuels from around the homes of the seniors, veterans, and disabled who are not able to accomplish the removal themselves. [$150,000]

We want to build a fire lookout off the Eagle Trail, south of the community, at a location that overlooks the communities of Tok, Tanacross, and Tetlin. A fire spotter at that location could provide several hours of additional lead time for

fighting a wildfire and/or evacuating people from threatened areas before it's too late to escape. [$98,000]

We'd like $86,000 to move a couple of buildings belonging to Div of Forestry and set them up as a firefighting academy with a bunkhouse and shower facility, so that residents of surrounding villages would have a place to live and train for brief periods of time to upgrade their firefighting skills and certifications. That's a really small sum to make our communities safer as a result of having well-trained crews while also improving economic opportunities for the villagers who take advantage of the new fire fighting academy.

We're asking for $47,500 to install 5 wood pellet heating stoves in community buildings, including the Tok Volunteer Fire Department. These could heat the buildings for less than the cost of fuel oil, while keeping the money within the community instead of sending it out of state to the big oil companies.

The most expensive project that we're asking funding for is for a wood chip boiler to heat the DOT&PF facility. This would be $1,500,000 but would in the long run save the State a great deal on heating costs, while also providing a use for the chips that result from the wildfire fuel reduction projects.

We'd like money to purchase a small tractors or similar equipment to help in fighting fires and in removing wildfire fuels to prevent fires. [$295,000]

Finally, we'd like to upgrade our collection and processing area for wood chip storage and handling. We're asking for $190,000 to grade and pave a small area and put in a pole-supported roof structure to keep chips clean and dry.

Copies of our requests have been sent to Senator Kookesh and Rep. Salmon; I'd be glad to email copies to anyone else who is interested, and would be happy to send you a copy of my testimony tonight.

Thank you very much for the opportunity to testify. I'd be glad to answer questions if you have any.

Holt, Teresa M (HSS)

Attachments:

Teresa, Representing The Governor's Council on Disabilities and Special Education

Just left a message and I am hoping you will get this email before 5 PM today. I am hoping I can get you to go to Senate Finance Room 532 at 5 Pm to provide testimony on coordinated community transportation. The following info in this email can help you in ur testimony.....

Community transportation is a vital project in Alaska. The lack of accessible, affordable transportation is a major barrier to the employment and community participation of Alaskans with disabilities, seniors, Alaska Mental Health Trust Authority beneficiaries, youth, low-income Alaskans, and the general public. This service is provided through public transit systems like the People Mover, and coordinated transportation systems operated by local nonprofits.

Despite increased levels of federal funding, Alaska's community transportation systems are under constant financial pressure to keep up with the increasing demand for services. The Governor's FY10 capital budget includes $800,000 (GF) and $300,000 (MHTAAR) right now – THIS IS NOT ENOUGH! Alaska is one of only TWO states in the country that does not fully match federal funds for community transportation services. If they did, federal funds would increase.

---For every ONE dollar of state money provided for community transportation, another FOUR dollars is generated from federal funds!---

With the extra funding, the state could purchase new vehicles and other transportation-related capital equipment, which are vitally important for the continuation of community transportation systems in Alaska. Rising fuel costs are putting all Alaska transportation systems into financial peril, forcing them to cut back on service at a time when demand is at its highest ever. According to a survey over the summer of 2008, 61% of Alaskans supported the use of the state's then budget surplus to fund community transportations in Alaska.

WE NEED YOU to speak up and ask for $2.5 million in the capital budget for coordinated community transportation funding!

Teresa – you feel comfortable with this??

Governor's Council on Disabilities and Special Education

Alaskan Seniors Living Longer Growing Stronger

from the Alaska Commission on Aging

The TRUST

The Alaska Mental Health Trust Authority

Establish funding for Coordinated Community Transportation

The Governor's Council on Disabilities and Special Education, Alaska Mental Health Board, Advisory Board on Alcoholism and Drug Abuse and the Alaska Commission on Aging, in collaboration with the Alaska Mental Health Trust Authority, the Alaska Brain Injury Network and the Alaska Suicide Prevention Council, have identified as one of their joint priorities the establishment of an Alaska Community Transportation Trust Fund, as well as capital appropriations for coordinated community transportation and operating appropriations for community transportation providers.

Overview

The lack of accessible, affordable transportation is a major barrier to the employment and community participation of Alaskans with disabilities, seniors, Alaska Mental Health Trust Authority beneficiaries, youth, low-income Alaskans and the general public. Even with an adequate infrastructure of roads and bridges, many of these individuals still won't have affordable, accessible community transportation.

There are generally two ways community transportation is provided in Alaska: 1) public transit systems (buses and Americans with Disabilities Act paratransit services) and 2) coordinated transportation systems operated by local nonprofits. However, in many communities in Alaska, there are no community transportation systems. Some non-profit organizations, churches, senior centers and civic groups may help their community members get a few rides, but the need far exceeds the availability. Some seniors and persons with disabilities are forced to move to communities that can support their transportation needs. It is no surprise that transportation is one of the top statewide needs identified in surveys of seniors, people with disabilities and beneficiaries of the Alaska Mental Health Trust Authority.

Most funding comes from federal formula grants, the Alaska Mental Health Trust Authority, fare box collections, fees for service and local government. Despite increased levels of federal funding, Alaska's community transportation systems are under constant financial pressure to keep up with the demand for services, particularly given increases in the number of rides and fuel and vehicle costs.

Rising fuel costs are putting all Alaska transportation systems into financial peril, forcing systems to cut back on hours, levels of services and raise fees beyond that which low income riders can support – at a time when demand for services is at its highest ever. In June 2008, the Alaska Mobility Coalition surveyed community transportation systems across the state. The number of rides increased by 5-7% (325,000 rides) and demand has remained high despite the recent drop in gas prices. However, fuel costs increased by 30% over the past 12 months.

We support the Governor's FY10 capital budget request which includes $800,000 (GF) and $300,000 (MHTAAR).

Airport Deferred Maintenance List
FY 2010

Reference Number: 30633

Depart of Transportation & Public Facilities

FY2010 Aviation - Deferred Maintenance Inventory

Priority	Project Title	Project Cost ($000)	Project Description	Location (City or Area)	Election District
1	Brush Cutting Tatitlek Airport	12.0	Cut brush back along the runway and safety areas, and reestablish sight distance to windsock and at intersections. Airport has not been brush cut for three years, and vegetation grows quite swiftly in the Southcentral climatic circumstances.	Valdez District	5-C
2	Homer Airport	55.0	New segmented circle and lighted windsock	Homer	35-R
3	Sitka Airport	75.0	Supplemental Lighted Wind Cone	Sitka	
4	St. Marys Airport: Minor Road and Appurtenances Repairs	28.0	The St. Marys Airport has several assets that need major maintenance or rehabilitation, such as the fencing around the sewer lagoon, snow dump area regrading, and perimeter road regrading, brush cutting and ditching. This project would enable the District to man and execute a project to cost-effectively complete these repairs.	Western District	39-T
5	Homer Airport	120.0	Fence and gates	Homer	35-R
6	Klawock Airport Brush Cutting	20.0	Brush Cut	Klawock	
7	Copper Center Runway Dust Palliative	80.0	Apply surfacing and dust palliative. This fund would be used in addition to existing deferred maintenance funds.	Tazlina District	6-C
8	SW Districk Airports	145.0	Fencing and gates	Various	37-S/38-S
9	Haines Airport Drainage Improvements	75.0	Repair Airport Apron Drainage phase II	Haines	
10	Segmented Circles Repairs	75.0	Current funding is not adequate to address the regionwide issue of aging segmented circles. Painting is not enough to restore these important regulatory visual markers and many must be completely replaced. This will be a continuing issue for several years as this maintenance has been deferred too long due to budget constraints.	Northern Region	40-T, 39-T, 6-C, 12-F, 8-D, 7-D
11	Haines Airport Crack Seal	20.0	Crack seal	Haines	
12	Unalaska Airport	168.0	Sea Plane Ramp	Unalaska	37-S
13	Brush Cutting Various Interior Aviation airports	210.0	Cut brush back along the runway and safety areas, and reestablish sight distance to windsock and at intersections. Most of our Interior airports have not been brush cut for several years, and vegetation needs attention as a project focus. Airports known to need brush cutting include: Beaver, Rampart, Huslia, Ruby, Birch Creek, Stevens Village and Tanana.	Interior Aviation	6-C
14	Kongigianak and Kwigillnok Airports	50.0	"Dura-Base" floor systems for SREB's	Kongigianak & Kwigillinok	38-S
15	Kake Airport R/W Repairs	100.0	Repair Runway Dips	Kake	
16	Kotzebue Airport Repair/Replace Perimeter Fencing & Gate	35.0	The Kotzebue Airport fence has not seen any substantive repairs in years, and is drawing negative attention from the FAA/TSA during every inspection, clearly needing repair or full replacement in some areas. The traffic control gate at R/W 09 needs to be completed and brought into service.	Western District	40-T
17	Quartz Creek Airport	64.0	Runway surface course	Quartz Creek	34-Q
18	Kake Airport Crack Seal	25.0	Crack seal	Kake	
19	Gulkana Airport Old Tower Removal	50.0	Remove old windsock/beacon tower. This is a large tower that requires special equipment for removal	Tazlina District	6-C
20	Tuluksak Airport	70.0	Runway repair and materialmining and stockpile	Tulusak	38-S
21	Yakutat Airport Brushing	50.0	Level Line of Sight Triangle, Phase I	Yakutat	

Priority	Project Title	Project Cost ($000)	Project Description	Location (City or Area)	Election District
22	Regionwide Airport Electrical Repairs & Upgrades: Lighting & Nav Aids	350.0	Replace, repair, or upgrade various electrical elements (by contracting out to competent electrical sub-contractors tasks that involve significant repair effort) at many airports, regionwide. Activities envisioned include: repairing or replacing runway and taxiway light cans, LED R/W lights and Distance To Go markers, conduit and wire, taxiway signage and/or lighted wind-cones at various Northern Region airports. Replacement of ailing regulators may also be necessary. Additionally, the FAA has recently been citing us during cert inspections about the need to provide lighted supplemental windcones at all certificated airports. Doing staged changeover to LED lit windcones is also envisioned, over time. Airports identified to have serious electrical repair needs include 1) all 6 certificated airports for the supplemental windcones, and 2) over a dozen airports needing various other electrical misc items, such as Kotzebue and Birch Creek.	Northern Region	40-T, 39-T, 6-C, 12-F, 8-D, 7-D
23	SW District Airports	85.0	New regulator and transformers	Various	37-S/38-S
24	Petersburn Airport Security Gate	30.0	Security Access Gate Replacement	Petersburg	
25	Tazlina Airport Runway Improvements	80.0	Continuing improving the runway base and extend the safety areas.	Tazlina District	6-C
26	Y-K Delta Airports	65.0	Equipment moves and brush cutting	Various	37-S/38-S
27	Gustavus Airport Crack Seal	25.0	Crack seal	Gustavus	
28	Kotzebue Airport - R/W 17-35 D-1 Surfacing & Dust Palliative	300.0	The short, gravel-surfaced cross-wind runway at Kotzebue needs additional D-1 surfacing, and dust control attention.	Western District	40-T
29	Adak Airport	75.0	Safety Area improvement	Adak	37-S
30	Gustavus Airport Striping	25.0	Enhanced Taxiway Markings	Gustavus	
31	Chistochina Runway Surfacing	40.0	Apply surfacing to extend the life until relocation can be completed.	Tazlina District	
32	Regionwide Surface Maintenance (Blading & shaping with compaction, to re-establish runway crown)	250.0	This project will fund the surface maintenance (blading) of numerous rural airports throughout the Region (including non-NPIAS airports!). This project will fund transportation, personnel, equipment, and contract costs for pro-active blading of rural gravel runways, by excellent motor grader operators. Due to the cost of transportation and the limited availability of personnel, many rural airports do not receive the proper surface maintenance during the limited summer season.	Northern Region	40-T, 39-T, 6-C, 12-F, 8-D, 7-D
33	Airport Surfacing Aggregate Stockpiles	300.0	Many of our NR Airports have no remaining D-1 stockpiles which would be used for significant surfacing repairs (Federal projects) and general maintenance. These stockpiles will allow the Department to respond to natural disasters and other unforeseen situations that require specialized crushed materials (requiring long lead-time to procure and provide) to repair. Currently, the lack of available stockpiles seriously impacts the Department's response in effectuating prompt surfacing repairs, causing less than satisfactory aviation operations. This funding will also allow for the barging of material to airports without construction projects in the foreseeable future.	Northern Region	40-T, 39-T, 6-C, 12-F, 8-D, 7-D
34	Security/Perimeter Fencing at 4 Certificated Airports	160.0	As with Kotzebue, the TSA is applying increased scrutiny regarding our airport fencing. Nome has worked hard, recently, to get their fences in order, but all of our other certificated airport sites have fence repair/rehab work to be done, which exceeds the normal GF funding available: Barrow, Deadhorse, Cordova, Valdez	Northern Region	12-F, 5-C. 40-T
35	Kotzebue Airport Fill alongside R/W (to eliminate existence of bird attractant area)	300.0	An area just west of the 35 threshold of R/W 17-35 (size = 75' x 2,000') is a bird attractant area, and Kotzebue has experienced bird strikes. Dave Wahto, FAA Cert Inspector, has recommended that this are be filled to eliminate this hazard.	Northern Region	40-T

Priority	Project Title	Project Cost ($000)	Project Description	Location (City or Area)	Election District
36	Prepare Environmental Assessments and Execute the Removal of Environmentally Complicated Structures on NR Airport Lease Lots	200.0	At least 15 of our NR airports have otherwise viable and valuable lease lots with abandoned buildings on them. Letting a multi-site contract to assess the buildings at most of these locations, and then accomplish the recommended hazmat mitigation and building sales or removals, would result in the return of these lots to productive aviation or community use.	Northern Region	40-T, 39-T, 6-C, 12-F, 8-D, 7-D
37	SW District Airports	32.0	Wind socks and poles	Various	37-S/38-S
38	Kodiak Airport	45.0	Lighting system replacement	Kodiak	36-R
39	Sitka Airport Striping	$20.0	Enhances Taxiway Markings	Sitka	
40	Petersburg Airport Striping	$20.0	Enhanced Taxiway Markings	Petersburg	
41	Wrangell Airport Striping	$20.0	Enhanced Taxiway Markings	Wrangell	
42	Yakutat Airport Crack Seal	$30.0	Crack Seal	Yakutat	
43	Yakutat Airport Brush Cutting	$25.0	Brushing	Yakutat	
44	Gustavus Airport Brushing	$15.0	Brushing	Gustavus	
45	Sitka Airport Crack Sealing	$25.0	Crack Seal	Sitka	
46	Sitka Airport Wind Cone	$20.0	Replace Lighted Wind cone, Runway 11 (base is in good shape but needs new mast and wind cone)	Sitka	
47	Sitka Airport Brushing	$20.0	Cut brush with excavator	Sitka	
48	Wrangell Airport Fog Seal	$120.0	Fog seal apron	Wrangell	
49	Ketchikan Airport Obstruction Survey	$25.0	Obstruction Survey	Ketchikan	
50	Hoonah Airport Obstruction Survey	$25.0	Obstruction Survey	Hoonah	
51	Haines Airport Gate	$45.0	Security Access Gate Replacement	Haines	
52	Yakutat Airport Obstruction Survey	$25.0	Obstruction Survey	Yakutat	
53	Kake Airport Gates	$75.0	Install maintenance access gates	Kake

2	Standing Water & Deck Corrosion	16.00	88.0	16.0	88.0	An aluminum housing shall be fabricated and installed to the underside of the deck structure, surrounding the capstan and providing a gasketed seal. The housing is to include a drain hole, a perimeter flange with bolt holes for attachment to the existing	Taku	1-40
1	Wheel House fire boundaries	20.00	108.0	20.0	108.0	Make corrections to fire boundaries between the wheelhouse and main machinery spaces.	Fairweather	1-40
1	Observation Lounge door replacement	20.00	128.0	20.0	128.0	Replace fire door leading to lounge.	Malaspina	1-40
2	Main Engine Room	20.00	148.0	20.0	148.0	Modify ventilation system as required to meet existing noise requirements. (If the ship is repowered, the ventilation system should be replaced. New automatic fire dampers should be installed, controllable from the EOS.)	Malaspina	1-40
2	Chain Locker, Port	20.00	168.0	20.0	168.0	Remove chain and conduct a full survey.	Matanuska	1-40
2	Capstans	20.00	188.0	20.0	188.0	Replace the motor controllers for the capstans.	Tustumena	1-40
2	Steam Condensate Piping	25.00	213.0	25.0	213.0	The steam duct heaters and convectors should be replaced. The valves for the steam convectors should be replaced. Replacement should occur in conjunction with the refurbishment of the surrounding compartments.	Malaspina	1-40
2	Steering Gear Room	25.00	238.0	25.0	238.0	Install a steering repeater in the steering gear room adjacent to the manual steering control station.	Malaspina	1-40
1	Wheel House navigation improvements	26.00	264.0	26.0	264.0	Instal a Comm. Nav. 2001 Auto Pilot above the ECDIS that acts as a helm repeater.	Fairweather	1-40
1	L4 Panel wire corrections	30.00	294.0	30.0	294.0	Pull back approximately 50 feet of the oversize cable to a junction box in the Aux engine room and run a smaller size cable appropriate for a 50 amp circuit from the JB to the panel.	Columbia	1-40
1	Stability Software Program	30.00	324.0	30.0	324.0	Using the stability software report within the FCS, find a suitable software and incorporate this into the vessel.	Kennicott	1-40
1	Towing & Mooring Equipment	30.00	354.0	30.0	354.0	Unknown...TBD	Matanuska	1-40
2	Steam Duct Heaters And Convectors	30.00	384.0	30.0	384.0	Replace all sealed steam traps.	Malaspina	1-40
1	Salt Water Pipe repairs	35.00	419.0	35.0	419.0	Renew flanges, valves or isolation kits as described in the Fleet Condition Survey report.	Fairweather	1-40
1	Fire Station Modifications	45.00	464.0	45.0	464.0	Replace one 1-1/2" sweep elbow at FS60 and one 1-1/2" 6" nipple at FS63.	Columbia	1-40
1	Vehicle Elevator Limit repairs	45.00	509.0	45.0	509.0	Repair photobeams to provide safety protection for crew and passengers.	Kennicott	1-40
2	Railings	45.00	554.0	45.0	554.0	Perform a detailed survey of the railings pay particular attention to the stanchion/deck interface. Repair or renew railing sections are required. Remount electrical cable mounts using compatible metals to prevent disimilar metal corrosion.	LeConte	1-40
1	Wheel House magnetic compass	50.00	604.0	50.0	604.0	Relocate or otherwise correct mag compass for proper operation	Chenega	1-40
1	Life Boat Davits	50.00	654.0	50.0	654.0	A design change is required and the author of this item does not know what the extent of the changes would be. It is recommended that Eagle hydraulics be consulted for details.	Kennicott	1-40
1	Open Deck hand rail repair	65.00	719.0	65.0	719.0	Repair the corroded handrail structure to the deck immediately.	Columbia	1-40
1	Vehicle Deck pipe replacement	75.00	794.0	75.0	794.0	Replacement of wasted riser pipes on vehicle deck including water, ballast and fuel lines	Malaspina	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
1	Auto Fire Dampers in MVZ Bulkheads	75.00	869.0	75.0	869.0	NC...No visible indicators are provided on fire dampers. [1.4.2008...Mike Aholt, Beacon Professional Services] In order to comply with the applicable SOLAS regulations, a total of nine automatic fire dampers, mostly in the Vehicle Deck overhead need A-60 insu	Matanuska	1-40
1	Handicap Head/Toilet/Shower	75.00	944.0	75.0	944.0	Recommend conducting an assessment of this space to make sure it complies with the current ADA regaulations. Determine method to prevent shower water from leaving the space under the door.	Tustumena	1-40
2	Cable Runs Too Close to Exhaust	75.00	1,019.0	75.0	1,019.0	Re-route or otherwise protect this existing cable run from the heat of the exhaust system.	Chenega	1-40
1	Fwd Observation Lounge window repairs	80.00	1,099.0	80.0	1,099.0	Replace seals in the windows that are leaking.	Kennicott	1-40
1	Water Maker rehab	80.00	1,179.0	80.0	1,179.0	This unit should be investigated and if found to be not acceptable for passenger use, it should be removed or upgraded.	Kennicott	1-40
1	CO2 Room steel repairs	80.00	1,259.0	80.0	1,259.0	Source and repair steel corrosion	Malaspina	1-40
1	Sliding Bridge Door Locks	80.00	1,339.0	80.0	1,339.0	Correct the problem with the door locks ASAP.	Tustumena	1-40
2	Main Breaker	80.00	1,419.0	80.0	1,419.0	Replace breakers or otherwise reconfigure existing. Expected cost $80,000	Chenega	1-40
2	Power Distribution System	80.00	1,499.0	80.0	1,499.0	Replace breakers or otherwise reconfigure existing. Expected cost $80,000	Fairweather	1-40
2	Power Distribution Systems	80.00	1,579.0	80.0	1,579.0	The condition of the cable should be monitored for insulation deterioration and be replaced as needed.	Fairweather	1-40
1	CO2 System improvements	90.00	1,669.0	90.0	1,669.0	Additional CO2 cylinders should be added into the system and the system configured to flood both spaces at the same time.	Malaspina	1-40
1	Anchor replacement	95.00	1,764.0	95.0	1,764.0	Replace the anchor. Anchor most likely will be a long lead-time procurement item.	LeConte	1-40
1	Passenger Elevator Doors	100.00	1,864.0	100.0	1,864.0	PC...The passenger elevator doors are not tight at each deck level. The service elevator has fire doors at each level. [1.4.2008...Mike Aholt, Beacon Professional Services] The vessel passenger elevator is not currently compliant with 1974 SOLAS regulations	Matanuska	1-40
1	Bow Thruster maintenance	120.00	1,984.0	120.0	1,984.0	Remove deflector, rotor blades, steering shaft and replace all bearings and seals	Columbia	1-40
1	SSDG No. 2 Overhaul	120.00	2,104.0	120.0	2,104.0	Overhaul engine as required	Columbia	1-40
1	Underwater Body coatingss	120.00	2,224.0	120.0	2,224.0	Perform total removal of the underwater hull system by abrasive blast grit. Apply new underwater hull system with Interspeed or Intersmooth system by International Paint.	Kennicott	1-40
1	Steel Renewal	125.00	2,349.0	125.0	2,349.0	Crop out and renew the areas of clad welding. One of these areas is over the #6 ballast tank, this could provide access into this tank for sandblasting and renewing the main deck tees if some are found to be wasted as shown in FCSI # 5595.	LeConte	1-40
1	Main Switchboard	150.00	2,499.0	150.0	2,499.0	Rectify Main Switchboard issues as covered on the FCSI	Aurora	1-40
2	Power Conditioning	150.00	2,649.0	150.0	2,649.0	Provide power conditioners to either all or part of the incomming shore power circuits Approx estimate cost $150,000	Chenega	1-40
2	Potable Water Pumps	150.00	2,799.0	150.0	2,799.0	Provide power conditioners to either all or part of the incomming shore power circuits Approx cost estimate $150,000	Columbia	1-40
2	Power Conditioning	150.00	2,949.0	150.0	2,949.0	Add additional 200 amp shore power connections near the forward starboard door and at the aft starboard mooring platform. If both connections are not possible the aft connection would be a higher priority than the forward.	Fairweather	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	Open Deck	175.00	3,124.0	175.0	3,124.0	Repair corrosion in bulkheads, find and repair source of corrosion. Repair faulty doors and door seals.	Aurora	1-40
2	Lifeboat Davits	200.00	3,324.0	200.0	3,324.0	Next 5-year davit inspection should be scheduled for (Oct2012) the FY13 Overhaul.	Tustumena	1-40
1	CO2 System re-configure	225.00	3,549.0	225.0	3,549.0	Install additional CO2 bottles to adequately protect both spaces--MMR and AMR.	Columbia	1-40
1	'A' Class Doors	250.00	3,799.0	250.0	3,799.0	PC...See SOLAS Insulation Upgrade Matrix and insulation markup plan where upgrades to doors are required. [1.4.2008...Mike Aholt, Beacon Professional Services] The vessel is not currently in compliance with the 1974 SOLAS regulations regarding "A" Class doors	Matanuska	1-40
1	Vehicle Space HVAC noise level	260.00	4,059.0	260.0	4,059.0	Recommend modifying system to comply with the regulations and installing silencers to reduce noise.	Columbia	1-40
1	#6 Ballast Tank pre & paint	260.00	4,319.0	260.0	4,319.0	The overhead should be blasted and painted along with about 400 square feet of other angles and frames in the tank. The majority of the tank has a good coating system and does not need a full blast and paint system.	LeConte	1-40
1	Fidley Natural Exhaust Vent	280.00	4,599.0	280.0	4,599.0	Fabricate and install two gooseneck vents with a total of 20 sq feet of area on top of the house. Formal plans may have to be presented for USCG approval.	Columbia	1-40
2	Watertight Doors	500.00	5,099.0	500.0	5,099.0	Inspect steel in areas of corrosion, repair steel as necessary. Clean, prime and recoat. Routine maintenance is required to prevent further deterioration.	Malaspina	1-40
2	Shaft Alley	500.00	5,599.0	500.0	5,599.0	The plate type access door from the space should be replaced with a USCG approved door and frame. Otherwise, with regular maintenance, this space should hold up satisfactorily until at least 2010.	Tustumena	1-40
1	Power management System	500.00	6,099.0	500.0	6,099.0	Install the Fuel Management System as outlined in the Fleet Condition Survey item	Columbia	1-40
1	Fire Detection System replacement	600.00	6,699.0	600.0	6,699.0	A centralized, comprehensive fire detection and alarm system should be installed throughout the vessel. The system should serve all passenger, crew and work areas.	Malaspina	1-40
1	Vehicle Space Ventilation System upgrades	650.00	7,349.0	650.0	7,349.0	The vehicle space ventilation system should be completely modified and replaced to meet the current regulatory requirements. New motorized, automatic fire dampers should be installed and tied into the fan controllers.	Malaspina	1-40
1	Engine re-power	25,000.00	32,349.0	25,000.0	32,349.0	Replace both Main Engines and associated equipment	Columbia	1-40
1	Life Boat & FRB Davits pipe mod	8.00	32,357.0	8.0	32,357.0	Modify the davit systems for the lifeboats and FRB to prevent the accidental discharge of oil from the accumulator through the vent.	Kennicott	1-40
1	Waste Heat Boilers modification	78.00	32,435.0	78.0	32,435.0	Modify and reroute exhaust through the funnel. Additionally, relocate the safety valves themselves to provide easier access to the valves by using stand pipes.	Malaspina	1-40
1	Auto Fire Dampers in MVZ Bulkheads	68.00	32,503.0	68.0	32,503.0	Modify system so that operating mechanisms are readily accessible (Refer to VNT 008), and mark in red light-reflecting color.	Matanuska	1-40
1	Auto Fire Dampers in MVZ Bulkheads	240.00	32,743.0	240.0	32,743.0	Where installed, existing fire dampers are fitted adjacent to the bulkhead. Where new fire dampers will be needed, such as for the vehicle space (Refer to VNT 015), and where dampers must be relocated to provided manual closing from each side of the boundary.	Matanuska	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
1	'B' Class Door Openings	150.00	32,893.0	150.0	32,893.0	Passenger cabin doors must be modified (to meet regulations) so that the gap under the door is no greater than 78 in2.	Matanuska	1-40
1	Bilge And Ballast Valve replacement	68.00	32,961.0	68.0	32,961.0	The bilge/ballast system valves should be replaced with new valves.	Matanuska	1-40
1	Bow Thruster Compartment mods	350.00	33,311.0	350.0	33,311.0	Install an inclined ladder similar to those on the Taku and Malaspina.	Matanuska	1-40
1	Controllable Pitch Propeller System	5,800.00	39,111.0	5,800.0	39,111.0	Replace CPP pumps #1 port and #1 starboard with new pumps. Overhaul piping, valves and controls as necessary. Open OD box, remove all components. Replace all wear parts with new, replace all O-rings, seals, gaskets, etc. with new. Test run, certify to n	Matanuska	1-40
1	Electrical Cabling replacement	252.00	39,363.0	252.0	39,363.0	Cabling with poor insulation should be replaced by 2010. A full insulation survey should be done to determine where higher risk cables are. This item for partial only.	Matanuska	1-40
1	Life Raft Radar Transponders	26.00	39,389.0	26.0	39,389.0	New transponders procured and installed at next recertification	Matanuska	1-40
1	Lifeboat registration	15.00	39,404.0	15.0	39,404.0	Correct the port of registration on the lifeboats.	Matanuska	1-40
1	Lifeboat covers	180.00	39,584.0	180.0	39,584.0	Repair or renew the lifeboat fiberglass covers.	Matanuska	1-40
1	Marine Growth Inhibitor install	130.00	39,714.0	130.0	39,714.0	Chlorinators or other marine growth inhibitors should be installed in each seachest to prevent engine overheating and down time.	Matanuska	1-40
1	Passageway (Fwd) hand rail repair	18.00	39,732.0	18.0	39,732.0	Make repairs/ replace handrail in fwd passageway	Matanuska	1-40
1	Reefer Drawers (Salad Station)	56.00	39,788.0	56.0	39,788.0	Replace refer drawers with new.	Matanuska	1-40
1	Reefer Drawers (Second Cook Station)	56.00	39,844.0	56.0	39,844.0	Replace refer drawers with new.	Matanuska	1-40
1	Reference Cell Replacement	37.00	39,881.0	37.0	39,881.0	Replace the reference cell with new using a CAPAC tech rep and parts. The lead time on this material is unknown so this will need to be research prior to the upcoming overhaul period.	Matanuska	1-40
1	Shafting Coupling repair	220.00	40,101.0	220.0	40,101.0	Replace muff couplings with new to overcome internal defects.	Matanuska	1-40
1	Steam Table Water Filling System & Heating	34.00	40,135.0	34.0	40,135.0	REPLACE STEAM TABLE SHELF WITH NEW STAINLESS STEEL WITH HEAT LAMPS UNDERNEATH. HOOK UP WATER FILL SYSTEM TO HOT WATER WITH FLOAT VALVE OR AUTO STOP SO THAT IT DOES NOT OVER FLOW.	Matanuska	1-40
1	Accommodation Spaces HVAC cleaning	160.00	40,295.0	160.0	40,295.0	Clean Accom space HAVAC system.	Taku	1-40
1	Engineer's Operating Station Steel Repairs	220.00	40,515.0	220.0	40,515.0	The deck plate is wasted and is in need of replacement to remain compliant.	Taku	1-40
1	Steering Gear Compartment coatings	80.00	40,595.0	80.0	40,595.0	Renew coatings within the space with areas of complete failure receiving priority.	Taku	1-40
1	Steward's Stores steel repair	80.00	40,675.0	80.0	40,675.0	Determine the source of the leak and repair. Crop out bulkhead and renew with new steel plate.	Taku	1-40
1	Vehicle Space insulation repair	80.00	40,755.0	80.0	40,755.0	Remove the insulation around Main Deck as allowed by the USCG to prevent further insulation damage. Prep and paint area around the interface between the deck and the bulkhead to protect the hull and deck from corrosion. Area aft of insulation on Main De	Taku	1-40
1	Vehicle Space steel tie downs	160.00	40,915.0	160.0	40,915.0	Repair the damaged car deck turtles which will require extensive hot work.	Taku	1-40
1	Vehicle Space Ventilation controls	90.00	41,005.0	90.0	41,005.0	Correct the vehicle space ventilation controls according to design specifications from 2000 upgrade.	Taku	1-40
1	Vehicle Space Ventilation repairs	130.00	41,135.0	130.0	41,135.0	Repair the damaged ducting.	Taku	1-40
1	Accommodation Ventilation Systems	60.00	41,195.0	60.0	41,195.0	Replace for repair the dampers that must be tied open.	Tustumena	1-40
1	Fin Stabilizer Room Platform	90.00	41,285.0	90.0	41,285.0	Execute repair in accordance with the approved dwgs to appropriately support platform.	Tustumena	1-40
1	Laundry space steel deck repair	110.00	41,395.0	110.0	41,395.0	Crop and renew affected steel.	Tustumena	1-40
1	Oily Water Separator tank repair	40.00	41,435.0	40.0	41,435.0	Replace failing oil tank	Tustumena	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
1	Port Main Engine overhaul	130.00	41,565.0	130.0	41,565.0	Engine is due for a 30,000 hour overhaul during next availability. At that time engine will have approx. 60,000 hours total.	Tustumena	1-40
1	Purser's Stateroom (S/R 108) PBX config	40.00	41,605.0	40.0	41,605.0	Reconfigure PBX to receive crew announcements in lieu of passenger stateroom announcements.	Tustumena	1-40
1	Side Port Door deck re-coat	30.00	41,635.0	30.0	41,635.0	The deck in way of the doors should be coated to reduce corrosion.	Tustumena	1-40
1	Stbd Main Engine overhaul	130.00	41,765.0	130.0	41,765.0	Engine is due for a 30,000 hour overhaul during next availability. At that time engine will have approx. 60,000 hours total.	Tustumena	1-40
1	Vehicle Space deck steel replacement	240.00	42,005.0	240.0	42,005.0	Make steel repairs to deck in way of vehicle doors.	Tustumena	1-40
2	Anchor Chain replacement	160.00	42,165.0	160.0	42,165.0	Replace shots 3-5.	Aurora	1-40
2	Bilge And Ballast Pump replacement	20.00	42,185.0	20.0	42,185.0	The bilge/ballast pump is old and should be replaced.	Aurora	1-40
2	Bridge Catwalk Stanchions	18.00	42,203.0	18.0	42,203.0	Repair stanchions as required.	Aurora	1-40
2	Bridge Wings (P/S) steel repair	35.00	42,238.0	35.0	42,238.0	Renew steel under the port compass stand. Prep and paint to renew coatings on this area which is often neglected because it can not be accessed by the crew.	Aurora	1-40
2	Crew Shower/Head Aft	35.00	42,273.0	35.0	42,273.0	Replace the deck covering in the head and improve the lighting levels.	Aurora	1-40
2	Depth Sounder replacement	22.00	42,295.0	22.0	42,295.0	Replace the depth sounder.	Aurora	1-40
2	Docking Intercom System	65.00	42,360.0	65.0	42,360.0	Intercom system overhaul to include updated as-built conditions.	Aurora	1-40
2	Emergency Generator & Fan Room	25.00	42,385.0	25.0	42,385.0	Replace the door and frame with new	Aurora	1-40

2	Housetop coatings	96.00	42,669.0	96.0	42,669.0	Clean, renew, prime and repaint steel surfaces, as needed.	Aurora	1-40
2	MCC Room repair and coatings	60.00	42,729.0	60.0	42,729.0	Determine the cause of the visible corrosion and take corrective action.	Aurora	1-40
2	MSD tank repair/ replacement	80.00	42,809.0	80.0	42,809.0	Rebuild the V1 tank during the next availability with either Mild Steel or 316 Stainless Steel.	Aurora	1-40
2	Open Deck coatings	120.00	42,929.0	120.0	42,929.0	Structure should be sandblasted and painted, as needed in localized areas.	Aurora	1-40
2	Paint Locker coatings	40.00	42,969.0	40.0	42,969.0	The compartment needs to be thoroughly cleaned and the steel inspected for wastage. Renew steel where necessary. The space should be sand-blasted, primed and repainted.	Aurora	1-40
2	Purser's Information Desk HVAC	60.00	43,029.0	60.0	43,029.0	Improve ventilation to this space by modifying existing system	Aurora	1-40
2	Speed Log transducer	30.00	43,059.0	30.0	43,059.0	Repair/ replace existing transducer for speed log	Aurora	1-40
2	Steam And Condensate Piping replacment	140.00	43,199.0	140.0	43,199.0	The remaining sections of the existing steam piping should be replaced. The remaining ACM insulation should be replaced with non-ACM.	Aurora	1-40
2	Wheelhouse window leak repair	8.00	43,207.0	8.0	43,207.0	Replace window seal	Aurora	1-40
2	Additional Shorepower Connections	28.00	43,235.0	28.0	43,235.0	Add additional 200 amp shore power connections near the forward starboard door and at the aft starboard mooring platform. If both connections are not possible the aft connection would be a higher priority than the forward.	Chenega	1-40
2	Black Water Tank level indicator	20.00	43,255.0	20.0	43,255.0	Modify the Tank Level Indicator to provide more acurate results.	Chenega	1-40
2	Bridge Console mods	15.00	43,270.0	15.0	43,270.0	Modify the consoles to allow easy removal of the access panels to facilitate maintenance.	Chenega	1-40
2	Bridge Console mods	6.00	43,276.0	6.0	43,276.0	Increase ventilation inside the bridge consoles to cool the equipment.	Chenega	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	Capstan area talk back speaker	18.00	43,294.0	18.0	43,294.0	Look at adding a talkback speaker in the Forepeak or modifying the controls to allow operation from the Forecastle Deck.	Chenega	1-40
2	Firemain valve replacement	26.00	43,320.0	26.0	43,320.0	Replace the check valves with a different material. Replace the iron ball valves with monel or stainless steel valves that will last longer in the marine environment.	Chenega	1-40
2	Water Jet hyd repair	10.00	43,330.0	10.0	43,330.0	Make repairs to hyd system to correct high temp.	Chenega	1-40
2	10-Inch Sewage Vent Line Replacement	80.00	43,410.0	80.0	43,410.0	Replace approximately 120-feet of vent piping.	Columbia	1-40
2	Air Compressor replacement	48.00	43,458.0	48.0	43,458.0	The two ships service/start air compressors should be replaced.	Columbia	1-40
2	Air Piping replacement	18.00	43,476.0	18.0	43,476.0	The compressed air piping should be replaced when new compressors are installed.	Columbia	1-40
2	Auxiliary Engine Room coatings	75.00	43,551.0	75.0	43,551.0	The bilge needs to be cleaned and painted.	Columbia	1-40
2	Battery Room coatings	16.00	43,567.0	16.0	43,567.0	Prep and paint the deck.	Columbia	1-40
2	Bilge And Ballast System mods	65.00	43,632.0	65.0	43,632.0	Modify the system to include independent piping for pumping out the ballast tanks. See specs developed during federal project 73780.	Columbia	1-40
2	Boiler re-tube	340.00	43,972.0	340.0	43,972.0	Replace the old tubing with new.	Columbia	1-40
2	Bow Thruster Compartment coatings	230.00	44,202.0	230.0	44,202.0	The compartment needs to be cleaned and the steel inspected for deterioration. Renew steel as necessary. Space should be blasted (SSPC-SP10) and coated.	Columbia	1-40
2	Bridge Toilet deck covering	15.00	44,217.0	15.0	44,217.0	New deck covering should be installed	Columbia	1-40
2	CCTV System modifications	180.00	44,397.0	180.0	44,397.0	Replace all cameras less the stack camera with a camera similar to the type installed at the AMHS terminals for security. Along with other components needed to control the cameras and record their images.	Columbia	1-40
2	Chain Locker coatings	160.00	44,557.0	160.0	44,557.0	Prep and coat P/S Chain lockers as needed.	Columbia	1-40
2	Crew Stairway deck coating/ covering	48.00	44,605.0	48.0	44,605.0	The stairways should be painted and deck covering replaced.	Columbia	1-40
2	Emergency Switchboard Batt Replacement	16.00	44,621.0	16.0	44,621.0	Replace emergency 120 volt batteries.	Columbia	1-40
2	Fan Room (100-104 Port) coatings	25.00	44,646.0	25.0	44,646.0	The deck should be cleaned and painted in the fan room.	Columbia	1-40
2	Fan Room (50-57 Port) coatings	25.00	44,671.0	25.0	44,671.0	The deck should be repaired to prevent further deterioration and possible structural problems.	Columbia	1-40
2	Fathometer replacement	26.00	44,697.0	26.0	44,697.0	Replace the fathometers with new equipment	Columbia	1-40
2	Fire Screen Door hold back install	90.00	44,787.0	90.0	44,787.0	Install a magnetic hold back for each door by extending the current magnetic hold back run from the nearest unit to each door. Hold backs should only be energized in port.	Columbia	1-40
2	Flushing Pumps replacement	36.00	44,823.0	36.0	44,823.0	The flushing pumps should be replaced.	Columbia	1-40
2	Fwd Observation Lounge window leaks	60.00	44,883.0	60.0	44,883.0	The window leaks should be repaired immediately. The torn upholstery should be repaired to prevent further deterioration.	Columbia	1-40
2	Main Deck to Second Deck Crew Quarters	60.00	44,943.0	60.0	44,943.0	Remove doors and door jams entirely, replace with new modern doors of same fire rating.	Columbia	1-40
2	Main Engine Pneumatic Control & Shutdown System	90.00	45,033.0	90.0	45,033.0	Remove pneumatic switches and associated tubing from Main Engines, Reduction Gears, and Turbo low oil pressure shutdowns and replace with modern electrical switches. Remove pneumatic Main Bearing high temp trips and replace with modern electronic sensors.	Columbia	1-40
2	Main Engine Room coatings	60.00	45,093.0	60.0	45,093.0	The bilge needs to be cleaned and painted.	Columbia	1-40
2	Mooring Compartment (Port) cable replace	13.00	45,106.0	13.0	45,106.0	The electrical cabling should be replaced.	Columbia	1-40
2	Mooring Compartment (Stbd) cable replace	13.00	45,119.0	13.0	45,119.0	The electrical cabling should be replaced.	Columbia	1-40
2	MSD Room coatings	48.00	45,167.0	48.0	45,167.0	The bilge needs to be cleaned and painted.	Columbia	1-40
2	No 5 DB FO Tank (CI) Open and inspect	5.00	45,172.0	5.0	45,172.0	This tank has not been surveyed in several years. Open and inspect tank	Columbia	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District

2	No 7 DB FO Tank (CI) Open and inspect	5.00	45,182.0	5.0	45,182.0	This tank has not been surveyed in several years. Open and inspect tank	Columbia	1-40
2	No 7 DB FO Tank (Port) Open and inspect	5.00	45,187.0	5.0	45,187.0	This tank has not been surveyed in several years. Open and inspect tank	Columbia	1-40
2	No 7 DB FO Tank (Stbd) Open and inspect	5.00	45,192.0	5.0	45,192.0	This tank has not been surveyed in several years. Open and inspect tank	Columbia	1-40
2	Observation Lounge window leaks & E lighting	75.00	45,267.0	75.0	45,267.0	The window leaks should be repaired immediately. The existing emergency lights should be replaced with new fixtures.	Columbia	1-40
2	OWS piping mods	18.00	45,285.0	18.0	45,285.0	The suction piping for the OWS should be relocated about 12 inches higher than the present location. A stripping suction should be added from the oily water processing tank directly to the waste oil pump.	Columbia	1-40
2	Paint Locker door replacement	15.00	45,300.0	15.0	45,300.0	The steel plate door to this space should be replaced with a USCG approved fire door and frame. The bulkheads, deck and overhead should be cleaned and painted.	Columbia	1-40
2	Shaft Alley coatings	25.00	45,325.0	25.0	45,325.0	Repair space coatings	Columbia	1-40
2	Steam Piping replacement	60.00	45,385.0	60.0	45,385.0	The steam piping and associated valves, traps and controls should be replaced. This may involve removal and disposal of ACM.	Columbia	1-40
2	Steering Gear Room coatings	25.00	45,410.0	25.0	45,410.0	Repair coatings	Columbia	1-40
2	Vehicle Doors modifications	230.00	45,640.0	230.0	45,640.0	The vehicle elevator cables and sheaves should be completely inspected for safety. Investigate adding vehicle elevator PLC/controls to UPS.	Columbia	1-40
2	Backup Power for Cell Phone Amplifier	12.00	45,652.0	12.0	45,652.0	Emergency power is available from the spare circuit at Inverter #2 Distribution Panel, located approximately six feet below the cell phone amplifier in the Bridge Electrical Room (BER). Rewire the cell phone amplifier feeder cable.	Fairweather	1-40
2	Bottom Paint	230.00	45,882.0	230.0	45,882.0	Each drydock the vessels underwater body paint shall be inspected. Due to the availability and cost of this paint, the underwater coatings should be planned one year in advance.	Fairweather	1-40
2	Bow Thruster Tunnel Marine Growth Reduction	68.00	45,950.0	68.0	45,950.0	Install two (2) Rolen-Star audio transducers on each of the bow thruster tunnels. These transducers shall be wired into the existing Hydrosonic Hull Tender oscillator unit on the forward side of bulkhead 31. Regulatory body approved transits shall be fi	Fairweather	1-40
2	Purser's Office and Stateroom improvements	80.00	46,030.0	80.0	46,030.0	Remove the weathertight door and rearrange the stateroom and office to provide a better office and living quarters	LeConte	1-40
2	Radar Mast	15.00	46,045.0	15.0	46,045.0	Prep and paint radar mast as required to eliminate active corrosion.	LeConte	1-40
2	Railings	8.00	46,053.0	8.0	46,053.0	Perform a detailed survey of the railings pay particular attention to the stanchion/deck interface. Repair or renew railing sections are required on Sun Deck.	LeConte	1-40
2	Railings	7.00	46,060.0	7.0	46,060.0	Perform a detailed survey of the railings pay particular attention to the stanchion/deck interface. Repair or renew railing sections are required on Upper Deck.	LeConte	1-40
2	Searchlights	82.00	46,142.0	82.0	46,142.0	Install 2 new Carlisle Finch Model X9398-HRF Xenon Arc Searchlights	LeConte	1-40
2	Shaft Alley,	45.00	46,187.0	45.0	46,187.0	Shaft alley is due to be prepped and painted.	LeConte	1-40
2	Solarium	30.00	46,217.0	30.0	46,217.0	Solarium heaters need to be replaced. Solarium windows need to be replaced. Solarium should be painted.	LeConte	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	Steam	10.00	46,227.0	10.0	46,227.0	The steam and condensate piping is in fair condition. Traps, control valves, pipe insulation and other system components should be overhauled to keep the system operating at high efficiencies.	LeConte	1-40
2	Unisex Head	1.50	46,228.5	1.5	46,228.5	Replace rusted tiles. Fix deck drain & repair steel.	LeConte	1-40
2	V1 & V2 Sewage Tanks	22.00	46,250.5	22.0	46,250.5	Sewage tanks should be sand blasted and painted in place of the annual patch repair work that has been done over the past few years.	LeConte	1-40
2	Vehicle Space	75.00	46,325.5	75.0	46,325.5	Blast and paint the car deck to avoid corrosion of the steel deck.	LeConte	1-40
2	Weathertight Door	42.00	46,367.5	42.0	46,367.5	Many of the weather tight doors are deteriorating. There are 7 on the vessel that are showing rust. Renew the door and jambs with new SS weld in type doors	LeConte	1-40
2	CCTV System	20.00	46,387.5	20.0	46,387.5	Install new camera and weather proof heated housing on front of Foc'sle house to view fore deck.	Lituya	1-40
2	Re-Route Waste Oil Piping	13.00	46,400.5	13.0	46,400.5	Install larger drain pans with larger diameter piping with a propper slope with correct slope for drainage.	Lituya	1-40
2	A/C Compressors Officers Qtrs	12.00	46,412.5	12.0	46,412.5	The air conditioning system should be converted over to an EPA approved refrigerant other than R-134a.	Malaspina	1-40
2	Accommodation	10.00	46,422.5	10.0	46,422.5	Clean ducting which has been deffered for the past 7 years.	Malaspina	1-40
2	Accomodation Space Ventilation System	35.00	46,457.5	35.0	46,457.5	The ventilation systems serving the accommodation spaces should be inspected and ducting restrictions repaired. New humidifiers should be installed that inject potable quality steam into the air.	Malaspina	1-40
2	Accomodation Space Ventilation System	5.00	46,462.5	5.0	46,462.5	Add additional access covers inthe overhead for rebalancing and cleaning of the system.	Malaspina	1-40
2	Aft Mens T/S	14.00	46,476.5	14.0	46,476.5	Repair leaking fixtures and renew decking.	Malaspina	1-40
2	Auxiliary Machinery Room	15.00	46,491.5	15.0	46,491.5	Clean the bilge area and repair failed coating systems.	Malaspina	1-40
2	Bow Thruster	400.00	46,891.5	400.0	46,891.5	Capt. Sundt would like to see an omni-directional bow thruster such as those on the Columbia and Kennicott.	Malaspina	1-40
2	Camera System	10.00	46,901.5	10.0	46,901.5	Install the previously purchased cameras to improve security aboard the vessel. System is capable of 16 views, currently only 6 are installed.	Malaspina	1-40
2	Chill Room	4.00	46,905.5	4.0	46,905.5	The door gasket should be replaced. The indicator light in the light switch should be replaced.	Malaspina	1-40
2	Chill Room	5.00	46,910.5	5.0	46,910.5	Inspect areas of corrosion, repair and recoat as necessary.	Malaspina	1-40
2	Circuit Breaker Panels	8.00	46,918.5	8.0	46,918.5	Check ID markings for all circuits.	Malaspina	1-40
2	CO2 Room	3.00	46,921.5	3.0	46,921.5	Install an automatic hold back door, instead of the manual latch that is currently installed.	Malaspina	1-40
2	Crews Head	12.00	46,933.5	12.0	46,933.5	Repair leaks and recoat steel as necessary. Replace floor tiles and coving.	Malaspina	1-40
2	Cross Passage	6.00	46,939.5	6.0	46,939.5	Apply non-skid that could be used to build up the low points on deck to eliminate potential areas of standing water. Renew coatings.	Malaspina	1-40
2	Deck Coatings	35.00	46,974.5	35.0	46,974.5	Remove existing and renew external deck coatings on Sun Deck	Malaspina	1-40
2	Electrical Cabling	110.00	47,084.5	110.0	47,084.5	All electric cable should be meggered and replaced as required. Due to the age, it is suspected that the majority of the exposed wire will require replacing.	Malaspina	1-40
2	Fan Room	25.00	47,109.5	25.0	47,109.5	Repair and recoat steel as necessary. Descale and paint rusty pipes.	Malaspina	1-40
2	Fan Rooms	20.00	47,129.5	20.0	47,129.5	Renew filter housings to provide more effective air filtration. Improve access to filters if possible.	Malaspina	1-40
2	Fantail	15.00	47,144.5	15.0	47,144.5	Prep and paint the fantail to prevent corrosion.	Malaspina	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	Fwd Observation Lounge	30.00	47,174.5	30.0	47,174.5	The overhead paneling should be replaced when possible. Window leaks should be repaired.	Malaspina	1-40
2	Fwd Womens Head	20.00	47,194.5	20.0	47,194.5	Repair leaks and steel deck and recoat steel as necessary.	Malaspina	1-40
2	Liferaft Racks	3.00	47,197.5	3.0	47,197.5	Prep and paint the liferaft racks.	Malaspina	1-40
2	Main Engine Room	15.00	47,212.5	15.0	47,212.5	Clean, prep and paint foundations to extend life of equipment.	Malaspina	1-40
2	Marine Growth Inhibitors	12.00	47,224.5	12.0	47,224.5	Chlorinators or other marine growth inhibitors should be installed in each seachest.	Malaspina	1-40
2	Mens Head - Aft	5.00	47,229.5	5.0	47,229.5	Replace caulking and paint the space.	Malaspina	1-40
2	Mens Head Stbd	14.00	47,243.5	14.0	47,243.5	The toilets should be replaced and the space cleaned up and painted.	Malaspina	1-40
2	Motor Control Circuitry	32.00	47,275.5	32.0	47,275.5	As motor controllers are replaced, the control voltages should be changed to low voltage.	Malaspina	1-40
2	MSD Room	40.00	47,315.5	40.0	47,315.5	Recommend building a coaming underneath the MSD system to catch the corrosive runoff that is causing multiple material failures under the equipment.MSD bilge needs spot scaling and coating.	Malaspina	1-40
2	Naming Convention	22.00	47,337.5	22.0	47,337.5	Update the tank & void names on the vessel to create a standard for all future reference to the tanks & voids. This would include the Sounding Procedures, Fueling Manual, Stability Manual, Capacity Plan and General Arrangements. Update signage at tanks.	Malaspina	1-40
2	Officer/Crew Passage	4.00	47,341.5	4.0	47,341.5	Replace the deck covering.	Malaspina	1-40
2	Oil Fired Boiler	350.00	47,691.5	350.0	47,691.5	Replace boiler it has reached the end of it's effective service life	Malaspina	1-40
2	Public Address System	25.00	47,716.5	25.0	47,716.5	Balance the entire system.	Malaspina	1-40
2	Recreation Rooms	8.00	47,724.5	8.0	47,724.5	Replace worn carpet in the fwd and aft rec room	Malaspina	1-40
2	Satellite Antenna Foundation Pedestal	3.00	47,727.5	3.0	47,727.5	The old Sat Phones are no longer used due to the new system that was installed.	Malaspina	1-40
2	Shaft Alley insulation	10.00	47,737.5	10.0	47,737.5	Repair damaged insulation. (Insulation may be ACM)	Malaspina	1-40
2	Shaft Alley piping	5.00	47,742.5	5.0	47,742.5	Remove unused sewage pipes.	Malaspina	1-40
2	Shaft Alley sewage piping	10.00	47,752.5	10.0	47,752.5	Renew coatings on sewage and drain piping	Malaspina	1-40
2	Shaft Alley	17.00	47,769.5	17.0	47,769.5	Recommend spot scale and coat of the shaft alley bilge.	Malaspina	1-40
2	Shaft Alley Escape Trunk	6.00	47,775.5	6.0	47,775.5	The shaft alley should be cleaned and painted.	Malaspina	1-40
2	Ships Stores	5.00	47,780.5	5.0	47,780.5	Replace the deck covering.	Malaspina	1-40
2	Side Port Doors	500.00	48,280.5	500.0	48,280.5	These weather tight car doors are original and require maintenance, this is an old system, doors should be renewed with hydraulic type doors.	Malaspina	1-40
2	Steering Gear Compartment	12.00	48,292.5	12.0	48,292.5	Areas with coating failures should be repaired.	Malaspina	1-40
2	Stern Loading Doors	100.00	48,392.5	100.0	48,392.5	Doors are operated with pnuematic cylinders. Pins and bushings need to be renewed and change to hydraulic cylinders.	Malaspina	1-40
2	Stewards Staterooms (Fwd)	7.00	48,399.5	7.0	48,399.5	The steel plate door to this space should be replaced with a USCG approved fire door and frame.	Malaspina	1-40
2	Stewards Stores	7.00	48,406.5	7.0	48,406.5	The steel plate door should be replaced with a USCG approved fire door and frame.	Malaspina	1-40
2	Store Room	6.00	48,412.5	6.0	48,412.5	Replace shelves with better grade shelving and new floor grating.	Malaspina	1-40
2	Stores Locker	5.00	48,417.5	5.0	48,417.5	Replace the deck covering.	Malaspina	1-40
2	Transformers	12.00	48,429.5	12.0	48,429.5	Conduct a transformer survey. The transformers should be replaced with transformers designed for the new voltage ranges.	Malaspina	1-40
2	Underwater Body	325.00	48,754.5	325.0	48,754.5	Underwater hull coatings are nearly 10 years old and get annual patch work as needed. Blast and renew coatings.	Malaspina	1-40
2	Vehicle Deck	25.00	48,779.5	25.0	48,779.5	Improve lighting.	Malaspina	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	Vehicle Deck	15.00	48,794.5	15.0	48,794.5	Modernize the refrigeration van receptacles with supportable equipment.	Malaspina	1-40
2	Vehicle Deck	20.00	48,814.5	20.0	48,814.5	The valve seals need to be replaced or new valves installed at scuppers	Malaspina	1-40
2	Wheelchair Access	25.00	48,839.5	25.0	48,839.5	Modify hand rail on the sun deck to allow wheelchair access to the solarium.	Malaspina	1-40
2	Womens Head	25.00	48,864.5	25.0	48,864.5	Deck has soft spot, suspect wasted steel under deck coatings. Remove coatings, repair steel, and renew coatings on the deck.	Malaspina	1-40
2	Womens Head - Aft	12.00	48,876.5	12.0	48,876.5	Poured flooring should be installed in this space to replace tile.	Malaspina	1-40
2	1JV Circuit Between Wheelhouse & BT Compartment	15.00	48,891.5	15.0	48,891.5	Pull new cable between Wheelhouse to B/T Compartment. Install cabling and headset for better communication to the B/T flat.	Matanuska	1-40
2	AC Compressors	5.00	48,896.5	5.0	48,896.5	A new compressor oil needs to be found that properly lubricates the machines.	Matanuska	1-40
2	Accommodation Space Ventilation Systems	170.00	49,066.5	170.0	49,066.5	The crew and passenger spaces accommodation systems should be completely replaced. Individual terminal reheat systems should be installed for the cabins. Potable quality steam humidifiers should be added to the system.	Matanuska	1-40
2	Aft Capstan	3.00	49,069.5	3.0	49,069.5	Replace foundation bolts.	Matanuska	1-40
2	Anchor Chain	22.00	49,091.5	22.0	49,091.5	Range, gauge, sandblast and paint. Include shot marks.	Matanuska	1-40
2	Bar	3.00	49,094.5	3.0	49,094.5	Repair drain pipe that has been patched.	Matanuska	1-40
2	Bridge Wing Controls	2.00	49,096.5	2.0	49,096.5	Replace plexiglass control covers and equipment consoles.	Matanuska	1-40
2	Carpet	15.00	49,111.5	15.0	49,111.5	Install new carpet in the bridge, officers quarters and passageway.	Matanuska	1-40
2	Clean Stack, Crankcase Exhaust Fan & Motor	20.00	49,131.5	20.0	49,131.5	Remove screens, fan and motor. Clean the entire area and motor. Meg motor, reinstall and test.	Matanuska	1-40
2	Compressed Air Receivers	100.00	49,231.5	100.0	49,231.5	Replace the compressed air receivers by 2010.	Matanuska	1-40
2	Condensate Piping	90.00	49,321.5	90.0	49,321.5	The boiler condensate piping should be replaced. The existing piping insulation is suspected to be ACM and should be removed and replaced.	Matanuska	1-40
2	Cooling Piping	75.00	49,396.5	75.0	49,396.5	The seawater cooling system for the propulsion system auxiliaries should be replaced with Cu-Ni and the pipe size increased.	Matanuska	1-40
2	Fan Room No. 2	4.00	49,400.5	4.0	49,400.5	Fix the forward bulkhead penetration and replace insulation.	Matanuska	1-40
2	Forecastle Deck	8.00	49,408.5	8.0	49,408.5	Strip, prime and repaint approximately 1,700 square feet.	Matanuska	1-40
2	Forward Observation Lounge	45.00	49,453.5	45.0	49,453.5	Leaks in the overhead and window should be repaired immediately. An additional means of escape should be added to the space.	Matanuska	1-40
2	Hanging Lifejacket Storage Boxes	4.00	49,457.5	4.0	49,457.5	Install louver vents of the aft section of the boxes to reduce condensation and damage to the lifejackets.	Matanuska	1-40
2	Lifeboat Davits	10.00	49,467.5	10.0	49,467.5	Prep and paint the areas of corrosion on the lifeboat davits and associated equipment.	Matanuska	1-40
2	Main Engine Cooling Pumps	20.00	49,487.5	20.0	49,487.5	The seawater cooling pumps should be rebuilt/overhauled by 2010.	Matanuska	1-40
2	Main Engine Room Supply System	30.00	49,517.5	30.0	49,517.5	The MMR air supply system should be increased in capacity by 2010.	Matanuska	1-40
2	Men's Head (Fwd)	10.00	49,527.5	10.0	49,527.5	A new poured floor should be installed in this head.	Matanuska	1-40
2	Men's Toilet/Shower in the Solarium	44.00	49,571.5	44.0	49,571.5	This space should be refurbished in the next few years.	Matanuska	1-40
2	Move E-Gen Voltage Regulator	6.00	49,577.5	6.0	49,577.5	Remount regulator in the Switchboard, add multiple connector wire from E-Gen to switchboard and connect to regulator.	Matanuska	1-40
2	No. 10 Port Wing Void	20.00	49,597.5	20.0	49,597.5	Blast and recoat the lower sections and the aft bulkhead of this tank.	Matanuska	1-40
2	No. 10 Stbd Wing Void	15.00	49,612.5	15.0	49,612.5	Blast and recoat the lower sections of this tank.	Matanuska	1-40
2	No. 10 Void (Centerline)	15.00	49,627.5	15.0	49,627.5	Blast and recoat the lower sections of this tank.	Matanuska	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	No. 11 Stbd Wing Void	12.00	49,639.5	12.0	49,639.5	Blast and recoat the lower section fwd of FR 162 of this tank.	Matanuska	1-40
2	No. 2 DB Ballast	28.00	49,667.5	28.0	49,667.5	Recoating of this tank is recommended.	Matanuska	1-40
2	No. 4 DB FW Ballast (Port)	30.00	49,697.5	30.0	49,697.5	Recoating of this tank is recommended.	Matanuska	1-40
2	No. 4 DB FW Ballast (Stbd)	30.00	49,727.5	30.0	49,727.5	Recoating of this tank is recommended.	Matanuska	1-40
2	No.11 Port Wing Void	18.00	49,745.5	18.0	49,745.5	Recoating of this tank is recommended.	Matanuska	1-40
2	Officers Mess & Crew Mess	6.00	49,751.5	6.0	49,751.5	Replace the officers quarters (water cooled) A/C unit with a new air cooled model.	Matanuska	1-40
2	Passageway (Aft-Steward Qtrs)	15.00	49,766.5	15.0	49,766.5	The space should be refurbished. Decking, bulkheads and overheads are old.	Matanuska	1-40
2	Passageway (Fwd Steward Qtrs)	15.00	49,781.5	15.0	49,781.5	The space should be refurbished. Decking, bulkheads and overheads are old.	Matanuska	1-40
2	Placards	3.00	49,784.5	3.0	49,784.5	The lifesaving placards are faded and stained, these should be renewed.	Matanuska	1-40
2	Purser's Office	18.00	49,802.5	18.0	49,802.5	Replace carpet. Install bulkhead cabinet at fwd bulkhead. Install undercounter shelves and cabinet. Add additional electrical outlets under counter.	Matanuska	1-40
2	Recliner Lounge	35.00	49,837.5	35.0	49,837.5	The deck covering and furniture should be replaced. The window leaks should be repaired as soon as possible to prevent deterioration of the deck.	Matanuska	1-40
2	Recreation Room	12.00	49,849.5	12.0	49,849.5	The deck covering should be replaced. The bulkheads should be painted.	Matanuska	1-40
2	Sanitary Pumps	14.00	49,863.5	14.0	49,863.5	Existing pumps were rebuild 3 years ago, should be replaced with bronze double seal pumps.	Matanuska	1-40
2	Speed Log Transducer	18.00	49,881.5	18.0	49,881.5	Speed Log is very old and hard to have serviced, renew with a more modern unit.	Matanuska	1-40
2	Stairwell	5.00	49,886.5	5.0	49,886.5	Paint stairwell, and renew signage.	Matanuska	1-40
2	Steam Piping	60.00	49,946.5	60.0	49,946.5	There are remaining sections of the original steam piping that should be replaced. The ACM insulation should be removed and replaced.	Matanuska	1-40
Th	Transfer Pump	26.00	49,972.5	26.0	49,972.5	The fuel oil pump is rebuilt on a regular bases and is to small causing long fuel transfer times. Larger pumps and piping should be installed.	Matanuska	1-40
2	Wheelhouse Window	4.00	49,976.5	4.0	49,976.5	The portside window has poped out of the frame and is secured in place till it can be replaced.	Matanuska	1-40
2	Wheelhouse Heated Windows	21.00	49,997.5	21.0	49,997.5	Replace the three heated windows, controls and power supplies since only the center one works marginal.	Matanuska	1-40
2	Women's CG Locker	4.00	50,001.5	4.0	50,001.5	Prep and paint this space.	Matanuska	1-40
2	Women's Shower	18.00	50,019.5	18.0	50,019.5	Shower surrounds showing signs of rust, renew surronds and repair deck coatings.	Matanuska	1-40
2	Women's Head (Aft)	12.00	50,031.5	12.0	50,031.5	The deck covering should be replaced before more deterioration leads to possible failure of the deck plate, and the sinks should be replaced.	Matanuska	1-40
2	Accommodation Spaces	30.00	50,061.5	30.0	50,061.5	Install new electric humidifiers throughout the ships ventilation system.	Taku	1-40
2	After Lounge	40.00	50,101.5	40.0	50,101.5	The deck covering and furniture is dated and worn out.	Taku	1-40
2	Battery Locker	4.00	50,105.5	4.0	50,105.5	The deck should be cleaned and repainted.	Taku	1-40
2	Boiler Condensate Tank	16.00	50,121.5	16.0	50,121.5	Replace with new tank which would have an epoxy coating on the inside to prevent corrosion.	Taku	1-40
2	Bow Thruster Machinery Space	8.00	50,129.5	8.0	50,129.5	Repair burn marks in the overhead. Renew deck coating.	Taku	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	Elevator Controls	28.00	50,157.5	28.0	50,157.5	The 1980 elevator motor controller and elevator controls are obsolete, and should be updated.	Taku	1-40
2	Electrical Power Distribution	150.00	50,307.5	150.0	50,307.5	The eleven NA1B power panels should be replaced. The circuit breakers are no longer available and it will be necessary to replace the entire panel.	Taku	1-40
2	Engine Room Bilges	20.00	50,327.5	20.0	50,327.5	Clean bilges and recoat as required.	Taku	1-40
2	Exterior Deck, Upper Deck	65.00	50,392.5	65.0	50,392.5	Correct areas with coating failure.	Taku	1-40
2	Exterior Deck, Cabin Deck	30.00	50,422.5	30.0	50,422.5	Renew coatings as required to protect the exterior of the Cabin Deck.	Taku	1-40
2	Exterior Deck	18.00	50,440.5	18.0	50,440.5	Add deck drains in areas of standing water.	Taku	1-40
2	Fan Room	4.00	50,444.5	4.0	50,444.5	Recoat the deck.	Taku	1-40
2	Fire Alarm Label Plates	3.00	50,447.5	3.0	50,447.5	Update signage to match current alarm type.	Taku	1-40
2	Firemain Piping	200.00	50,647.5	200.0	50,647.5	Current piping is steel and carries salt water, many areas have been patched. Recommend replacement with 90:10 CuNi piping.	Taku	1-40
2	Forecastle	30.00	50,677.5	30.0	50,677.5	Renew coatings.	Taku	1-40
2	Foredeck / Ladderway	14.00	50,691.5	14.0	50,691.5	Remove doubler plate, crop out wasted steel and renew steel plate as required.	Taku	1-40
2	Forward Observation Lounge	40.00	50,731.5	40.0	50,731.5	Reseal the windows. Remove joiner panel to determine the extent of corrosion that has occurred to the bulkhead, repair and paint.	Taku	1-40
2	FRB Davit	35.00	50,766.5	35.0	50,766.5	Renew coatings and davit components as required.	Taku	1-40
2	Fuel Oil Purifier	225.00	50,991.5	225.0	50,991.5	The fuel oil purifier is used continuously whenever the vessel is in service. The average economic life of a purifier is 15-20 years, which it has reached.	Taku	1-40
2	Main Machinery Room Ventilation	22.00	51,013.5	22.0	51,013.5	The ventilation supply and exhaust ductwork should be fitted with silencers.	Taku	1-40
2	Mens Head (Fwd)	10.00	51,023.5	10.0	51,023.5	Repair leaks in piping behind joinery work and recoat the deck.	Taku	1-40
2	Men's T/S Shower & Dressing Room Area	14.00	51,037.5	14.0	51,037.5	Remove existing tile and check integrity of the steel underneath. Renew with a deck coating rather than tile.	Taku	1-40
2	Mens Toilet/Shower	12.00	51,049.5	12.0	51,049.5	The Cabin Deck Men's Toilet/Shower should be refurbished as it is very old and in poor condition.	Taku	1-40
2	Mens Toilet/Shower	9.00	51,058.5	9.0	51,058.5	The failed deck covering should be replaced.	Taku	1-40
2	Mens Toilet/Shower CG Locker	15.00	51,073.5	15.0	51,073.5	Repair bulkhead and replace deck covering. Replace label plate of the space. Renew the sink.	Taku	1-40
2	Mooring Compartment (Port & Stbd)	52.00	51,125.5	52.0	51,125.5	Renew coatings as required to protect the exterior of the space. Replace all ordinary steel foundation bolts with stainless-steel.	Taku	1-40
2	No 4 Double Bottom Ballast Tank--Port	28.00	51,153.5	28.0	51,153.5	Prep and paint as required.	Taku	1-40
2	No 4 Double Bottom Ballast Tank--Starboard	28.00	51,181.5	28.0	51,181.5	Prep and paint as required.	Taku	1-40
2	No 4 Fresh Water Tank--Port	36.00	51,217.5	36.0	51,217.5	Prep and paint as required.	Taku	1-40
2	No 4 Fresh Water Tank--Starboard	36.00	51,253.5	36.0	51,253.5	Prep and paint as required.	Taku	1-40
2	No. 3 Void (Fr. 47-61)	18.00	51,271.5	18.0	51,271.5	Prep and paint as required.	Taku	1-40
2	No. 4 Wing Void (Fr. 131-145)	18.00	51,289.5	18.0	51,289.5	Prep and paint as required.	Taku	1-40
2	Passenger Staterooms	4.00	51,293.5	4.0	51,293.5	Renew lifesaving placards.	Taku	1-40
2	Recreation Room	10.00	51,303.5	10.0	51,303.5	The forward and aft recreation rooms should be completely refurbished; carpet and appropriate underlayment and padding should be installed.	Taku	1-40
2	Scullery	7.00	51,310.5	7.0	51,310.5	Replace broken window frame in scullery, water is leaking in this space.	Taku	1-40
2	Shaft Alley	6.00	51,316.5	6.0	51,316.5	Areas with coating failures should be repaired.	Taku	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	Ship Service Switchboard	85.00	51,401.5	85.0	51,401.5	The old type ML breakers are no longer supported by the manufacturer and should be replaced as required with the FA or KA type. Some bus work may have to be done.	Taku	1-40
2	Signage	10.00	51,411.5	10.0	51,411.5	Update signage throughout the ships passenger area to be uniform and correct.	Taku	1-40
2	Steering Repeater	20.00	51,431.5	20.0	51,431.5	Install a steering repeater in the steering room which would be used during emergencies.	Taku	1-40
2	Tonnage Opening (Fr. 127-130 Stbd)	9.00	51,440.5	9.0	51,440.5	Renew coatings as required. Repair insulation.	Taku	1-40
2	Top of Mooring Compartments (Port & Stbd)	16.00	51,456.5	16.0	51,456.5	Renew coatings as required. Repair insulation.	Taku	1-40
2	Upper Void (Fr. 47-61)	5.00	51,461.5	5.0	51,461.5	Mechanical spot paint repair needed.	Taku	1-40
2	Vehicle Space	86.00	51,547.5	86.0	51,547.5	Remove old coatings by track blast and apply zinc which is less maintenance and protects the steel deck.	Taku	1-40
2	Vehicle Space	14.00	51,561.5	14.0	51,561.5	Some of the vehicle space drain do not function properly due to their location. Install new drains near the car doors.	Taku	1-40
2	Vehicle Space Ventilation	35.00	51,596.5	35.0	51,596.5	The system should be thoroughly inspected and corroded sections renewed.	Taku	1-40
2	Void (1-35-0)	1.00	51,597.5	1.0	51,597.5	Open tank and inspect during next available drydock period.	Taku	1-40
2	Womens Head (Fwd)	5.00	51,602.5	5.0	51,602.5	Fix plumbing issues and install new stall door handles.	Taku	1-40
2	Anchor Windlass	12.00	51,614.5	12.0	51,614.5	Replace motor controllers on the anchor windlass	Tustumena	1-40
2	Bosun's Stores	11.00	51,625.5	11.0	51,625.5	Surfaces with loss of coating should be prepped and painted to help deter corrosion.	Tustumena	1-40
2	Bow Thruster Room	5.00	51,630.5	5.0	51,630.5	Areas with coating failures should be repaired.	Tustumena	1-40
2	Bridge Wings (P/S)	30.00	51,660.5	30.0	51,660.5	Prep & paint areas with active corrosion around the port & starboard bridge wings. Renew cable ties underneath railings.	Tustumena	1-40
2	Cocktail Lounge	16.00	51,676.5	16.0	51,676.5	Repair or replace gate. Recover bar stools & benches.	Tustumena	1-40
2	Collision Damage Repair	14.00	51,690.5	14.0	51,690.5	Insert gunwale where dented, and paint effected areas.	Tustumena	1-40
2	Cooling Pumps	22.00	51,712.5	22.0	51,712.5	These pumps run continously and have outlived their life span, they should be replaced.	Tustumena	1-40
2	Doppler Log	18.00	51,730.5	18.0	51,730.5	Install a Doppler Log to interact with the Stabilizer Fins.	Tustumena	1-40
2	Electrical Cabling	150.00	51,880.5	150.0	51,880.5	The original exterior cabling on the ship should be replaced with new cabling. All cable should be insulation-resistance checked.	Tustumena	1-40
2	Exterior Doors	125.00	52,005.5	125.0	52,005.5	Replace all the exterior doors due to corrosion. Work will include steel deck replacement due to corrosion.	Tustumena	1-40
2	Fan Room	6.00	52,011.5	6.0	52,011.5	Repair insulation and repaint deck as required.	Tustumena	1-40
2	Fin Stabilizer Compartment	8.00	52,019.5	8.0	52,019.5	Areas with coating failures should be repaired.	Tustumena	1-40
2	Focsle Open Deck	20.00	52,039.5	20.0	52,039.5	The areas of corrosion prepped and painted.	Tustumena	1-40
2	Life Boats	20.00	52,059.5	20.0	52,059.5	Overhaul the lifeboat engines.	Tustumena	1-40
2	Machinery Casing	10.00	52,069.5	10.0	52,069.5	Repaint the deck in worn areas.	Tustumena	1-40
2	Mens Forward Head	12.00	52,081.5	12.0	52,081.5	Repair deck drain, stalls & fix bulkhead.	Tustumena	1-40
2	MSD Room	14.00	52,095.5	14.0	52,095.5	Areas with coating failures should be repaired. Additional lighting fixtures should be installed.	Tustumena	1-40
2	MSD System	200.00	52,295.5	200.0	52,295.5	Perform upgrades on Tustumena similar to those being proposed for Step One of the AMHS Fleet MSD Upgrade project.	Tustumena	1-40
2	Navigation Antenna Foundations	15.00	52,310.5	15.0	52,310.5	Replace rusting antenna foundations on the House Top & paint all foundations.	Tustumena	1-40
2	Observation Lounge	18.00	52,328.5	18.0	52,328.5	Reseal leaking windows as required.	Tustumena	1-40
2	Officers Mess	9.00	52,337.5	9.0	52,337.5	Install new inset units with insulation sleeve around units. Install & attach new compressors making sure there is a good seal.	Tustumena	1-40

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	Running Total ($000)	Project Description	Location (City)	Election District
2	Open Deck	80.00	52,417.5	80.0	52,417.5	Weather decks should be blasted and recoated.	Tustumena	1-40
2	Open Deck Aft of Solarium	15.00	52,432.5	15.0	52,432.5	Weather decks should be blasted and recoated.	Tustumena	1-40
2	Open Deck, Exterior	20.00	52,452.5	20.0	52,452.5	Replace brass drain covers as required to prevent foreign objects from entering the drain pipes. Add deck drains to eliminate standing water problems.	Tustumena	1-40
2	Open Deck, Exterior	12.00	52,464.5	12.0	52,464.5	Install a stop to prevent the gates & railings from striking each other and renew coatings. Coatings on railings need spot repair.	Tustumena	1-40
2	Open Deck, Exterior	2.00	52,466.5	2.0	52,466.5	Replace homemade vent protection with a softer type of protection.	Tustumena	1-40
2	Passenger Cabins	24.00	52,490.5	24.0	52,490.5	There are 4 passenger cabin bathrooms that have cracked bulkheads that should be renewed.	Tustumena	1-40
2	Public Shower (Port side)	4.00	52,494.5	4.0	52,494.5	Replace this interior door and frame	Tustumena	1-40
2	Purser's Office	22.00	52,516.5	22.0	52,516.5	The Chief Purser has some ideas on moving a joinery bulkhead to provide more space for both the office and the stateroom.	Tustumena	1-40
2	Pursers Station	15.00	52,531.5	15.0	52,531.5	Replace shelves with a better sea going pan type shelf to prevent items from falling off.	Tustumena	1-40
2	Radar Mast	15.00	52,546.5	15.0	52,546.5	Prep and paint radar mast to stop corrosion.	Tustumena	1-40
2	Service Boat Crane	6.00	52,552.5	6.0	52,552.5	Install a new remove stop start switch by crane.	Tustumena	1-40
2	Shaft Alley	5.00	52,557.5	5.0	52,557.5	Spot paint repair needed.	Tustumena	1-40
2	Side Lounge & Vending Area	18.00	52,575.5	18.0	52,575.5	Rubber floor tile needs to be renewed, and benches recovered with vinyl.	Tustumena	1-40
2	Solarium	200.00	52,775.5	200.0	52,775.5	Solarium heaters need to be replaced. Solarium windows need to be replaced. Solarium should be painted.	Tustumena	1-40
2	Stairs, Exterior	6.00	52,781.5	6.0	52,781.5	Stairs are rusted and need coatings.	Tustumena	1-40
2	Steering Gear Compartment	6.00	52,787.5	6.0	52,787.5	The bilge needs to be cleaned and painted.	Tustumena	1-40
2	Transformers	20.00	52,807.5	20.0	52,807.5	Transformers are very old, new transformers should be installed with lower voltages.	Tustumena	1-40
2	Wheelhouse	5.00	52,812.5	5.0	52,812.5	Overhead in wheelhouse is old and has several unused holes, renew ceiling panels.	Tustumena	1-40
2	Women's Forward Head	10.00	52,822.5	10.0	**52,822.5**	Aft bulkhead has rust bleeding out of the walls, remove joinery panel, fix leak and reinstall joinery panels.	Tustumena	1-40

AMHS Facility Deferred Maintenance FY 2010

Reference Number: 42001

Depart of Transportation & Public Facilities

Department of Transportation and Public Facilities

AMHS Facility Deferred Maintenance -- FY09

Dept. Priority	Project Title	Project Cost ($000)	Running Total ($000)	GF Cost ($000)	GF Running Total ($000)	Project Description	Location (City)	Election District
1	Ketchikan south berth repairs	230.0			230.0	Electrical system needs to be replace on South Berth mooring float.	Ketchikan	1
2	KTN Port Engineer bldg. roof replacement, and space modifications	320.0			550.0	Remove existing shingled roof and replace, add three new Offices, add three new windows, and replace floor coverings	Ketchikan	
3	KTN Heating control up grade	170.0			720.0	Remove existing pneumatic heating controls and replace with DDC controls.	Ketchikan	
4	Replace Heating system AMHS KTN Ware House.	120.0			840.0	Remove existing oil fired cabnet unit heaters, and replace with Electric unit heaters.	Ketchikan	
5	Reinstall damaged fender panel Berth III KTN	25.0			865.0	Weld new studs on fender panel, and reinstall.	Ketchikan	
6	Auke Bay roof Replacement	150.0			1,015.0	Remove and replace existing roof at the Auke Bay ferry terminal.	Juneau	
7	Auke Bay Terminal Renovations	375.0			1,390.0	Remove and replace all exterior Doors and frames and associated hardware, Remove and replace existing ticket counters.	Juneau	
8	Skagway Float rehab	350.0			1,740.0	Remove and replace existing concrete toping slab on the Skagway floating dock, and electrical conduit and breaker panel.	Skagway	
9	Sitka roof Replacement	75.0			1,815.0	Remove and replace existing roof at the Auke Bay ferry terminal.	Sitka	
10	Sitka potable waterline mods	75.0			1,890.0	Replace exist backflow device with a new Watts Model 009 OSY RPBA back flow preventer, and replace existing Heat Trace.	Sitka	
11	Mooring Dock Improvements	50.0			1,940.0	Install safety netting to catch the mooring lines, and top treat existing creosote piling to prevent rot.		
12	Petersburg out side storage Bldg.	30.0			1,970.0	Construct new 15 X 20 out side storage Bldg.	Petersburg	
13	Petersburg Apron	7.0			1,977.0	Replace expanded metal on the apron.	Petersburg	
14	Petersburg Transfer Bridge	20.0			1,997.0	Repair crack in wheel guard on the Transfer Bridge	Petersburg	
15	Cordova side walk replacement	30.0			2,027.0	Replace sections of the existing side walks at the Cordova ferry terminal due to damage caused by salting walks during winter weather.	Cordova	
16	Cordova FVF Facility Gate Mods	15.0			2,042.0	Lift gate on upper mezzanine needs to be redesigned for a swing gate, as lift gate is heavy and could cause a person removing it less balance	Cordova	
17	Cordova Shore Power	350.0			2,392.0	Resolve shore power issues the M/V Chenega is experiencing while	Cordova	
18	Cordova Heat Trace	125.0			2,517.0	Replace existing Heat Trace in potable water lines, and sewage	Cordova	
19	Valdez wall covering repairs	5.0			2,522.0	Remove existing wall covering at east end of the Valdez terminal Bldg. replace with drywall and texture and paint to match existing wall color	Valdez	
20	Whittier storage project	250.0			2,772.0	Close in part of covered area at the front of the Whittier Ferry Terminal	Whittier	
21	Whittier Terminal Window Leaks	30.0			2,802.0	Remove exterior windows on East of of the Wrangell Ferry Terminal and reflash, and make needed sheet rock repairs.	Whittier	
	DEPARTMENT TOTAL	**2,802.0**

Facility Deferred Maintenance List
FY 2010

Reference Number: 30632

Depart of Transportation & Public Facilities

FAC ES
FY2010 Deferred Maintenance List

				FY2010 Facility Deferred Maintenance -- Department Inventory		
	Department Name: DOT&PF					
			Project			
	Dept		Cost		Location	Election
Reg	Priority	Project Title	($000)	Project Description	(City)	District
NR	1	Nenana Shop Hydronic Heat Conversion and Mezzanine Remodel	60.0	Convert shop to more efficient hydronic heat. Elimination of the large forced air furnace on the mezanine will allow remodeling the space for better use as a meeting area for the crew. Not required if new shop is funded - see request below.	Nenana Maintenance Station	8D
SE	2	Region-wide eyewash and safety shower installation	140.0	Upgrade and/or install OSHA required and approved eyewash stations to meet ANSI standards.	Region-wide	1-A, 2-A, 3-B, 4-B & 5-C
SEF	3	Crane Replacement and Upgrade	30.0	Current Unit will not handle larger equipment	Valdez	
CR	4	Kodiak Griffin Building Repair Exterior Finish	145.0	Stucco type finish is cracking and allowing water to penetrate, needs repair or replaced	Kodiak	6
SEF	5	Equipment Lift Replacement	35.0	Replace Unsafe/Outdated Maintenance Lift	Nenana	
CR	6	Upgrade Lighting in DOT&PF Facilities to Energy Efficient Lighting	220.0	Numerous Facilities have T12 lighting and need to be replaced with the new energy efficient T8 bulbs and electronic ballasts will save 30% in lighting costs	Region Wide	10
CR	7	Anchorage Aviation HQ Building Replace Heating Coil	20.0	Existing heating coil has leaks and needs to be replaced. The location of the leak makes it impossible to repair	Anchorage	8
SEF	8	Equipment Lift Replacement	60.0	Replace Unsafe/Outdated Maintenance Lift	Palmer	
CR	9	Anchorage Aviatin Building Relocate Elevator Pump and Controller	20.0	Code requires the elevator pump and controller to be isolated from the elevator pit. We must correct this discrepancy to avoid penalties and fines.	Anchorage	8
CR	10	Anchorage Boney Court Upgrade Elevators	520.0	Elevators need modernization work to be code compliant	Anchorage	8
NR	11	Nome SEF Complex Concrete Slab for Tractor/Trailer Bldg	40.0	The Tractor/Trailer building was created by recycling two ATCO buildings placed end to end. Only one half of the structure has a concrete slab under it. This project will place concrete in one half of the building to allow maintenance in a normal shop environment vs. on a dirt floor.	Nome SEF Complex	39T
NR	12	Livengood Bunkhouse Upgrade	60.0	The bunkhouse kitchen needs remodeling due to wear & tear. Counter tops and floors are worn through. Appliances are at the end of useful life. This kitchen is to small for the assigned personnel and wears heavily as a result. A gas line will likely result in a new bunkhouse, but this kitchen remodel should not be delayed. Project includes new more efficient windows.	Livengood Maintenance Station	6C
SE	13	Ketchikan Court & Office Building - Interior Finish Repairs	70.0	Repair worn and damaged interior wall and ceiling finishes; replace worn carpet in corridors which is becoming a life safety hazard.	Ketchikan	1-A
SEF	14	Equipment Lift Installation	31.0	Lift Installation for Safety/Productivity	Wrangell	

FAC ES
FY2010 Deferred Maintenance List

Reg	Dept Priority	Project Title	Cost ($000)	Project Description	Location (City)	Election District
NR	15	Emergency DG Arctic Pack	50.0	Procure and set up portable Arctic Pack Diesel Generator for emergency power. This unit is backup to our DG powered maintenance stations. It can be quickly transported where needed and placed in service immediately with quick disconnect capability.	Peger Complex	7,8,9,10, 11
CR	16	Anchorage Public Safety Replace Carpet	150.0	Carpet is worn and unsightly and needs replacement	Anchorage Public Safety	10
NR	17	Paxson Install DG Coolant Heat Recovery System	80.0	Install heat exchangers and piping to recover and use heat radiated off of the camp's electrical generators. This is a energy saving upgrade with an estimated 3-year payback.These systems would tie into the existing cooling system and recover approximately 1 million BTU/hour, which should provide most of the necessary heat to the shop.	Paxson Maintenance Station	12F
NR	18	Montana Creek Shop Hydronic Heat Conversion and Mezzanine Remodel	60.0	Convert shop to more efficient hydronic heat. Elimination of the large forced air furnace on the mezanine will allow remodeling the space for better use as a meeting area for the crew.	Montana Creek Maintenance Station	7D
SE	19	Klawock - Rain Gutter Replacement	15.0	Replace failed rain gutters. This will extend building life by protecting siding and foundation	Klawock	5-C
SE	20	Gustavus - Rain Gutter Replacement	15.0	Replace failed rain gutters. This will extend building life by protecting siding and foundation	Gustavus	5-C
CR	21	Dutch Harbor Paint Exterior of Hanger Building	65.0	Building is deteriorating due to weather conditions and lack of protective coating.	Dutch harbor	
NR	22	Livengood Generator Heat Recovery System	80.0	Install heat exchangers and piping to recover and use heat radiated off of the camp's electrical generators. This is a energy saving upgrade with an estimated 3-year payback.These systems would tie into the existing cooling system and recover approximately 1 million BTU/hour, which should provide most of the necessary heat to the shop.	Livengood Maintenance Station	6C
NR	23	Livengood Shop Window Replacement	15.0	Windows in the shop need replacement.	Livengood Maintenance Station	6C
CR	24	Anchorage Boney Court Retofit with Energy Efficient Lighting	58.0	Many outdated lighting fixtures still exist within this facility, Changing these fixtures with new energy efficient lighting would save costly energy consumption.	Anchorage Boney Court	10
SE	25	Haines - Repair Roof	45.0	Replace all metal roofing fasteners to eliminate leaks in field and around flashings.	Haines	5-C
SEF	26	Crane Replacement and Upgrade	30.0	Current Unit will not handle larger equipment	Tok	
CR	27	Kodiak State Equiment Fleet Shop Pave Parking Area	150.0	Existing yard is poorly graded, gets extremely muddy and needs resurfaced	Kodiak SEF	6
SE	28	Juneau - Cold Storage	100.0	Repair structural steel at slab. Add concrete housekeeping pads to protect base of structural steel.	Juneau	3-B

Reg	Dept Priority	Project Title	Cost ($000)	Project Description	Location (City)	Election District
SE	29	Skagway - Drainage	25.0	Septic drains back up and create health and environmental hazards due to high water table in the area.	Skagway	5-C
CR	30	Kodiak Court Replace Carpet	52.0	Carpet is worn and unsightly and needs replacement	Kodiak Courthouse	6
NR	31	Tazlina Facilities Shop	950.0	The Tazlina Facilities crew shop is inadequate and is currently housed in a 1950's vintage Quonset hut. This building has almost no insulation, no vehicle bay, no bathroom and no foundation. This project would build a 40' x 50' shop with office, vehicle bay with overhead door, and a bathroom. Included would be a storage mezzanine and a two-ton hoist. This project is not needed if the Tazlina Warm Storage project is funded.	Tazlina Maintenance Station	12F
NR	32	Peger Admin Bldg - Engineering Area Remodel	85.0	Remodel the northeast Design area. This heavy traffic area has 26 employees in it. The space needs to be recarpeted, painted, office furniture upgraded, and electrical distribution reworked. The current use of the room is very different from what the space was designed for, resulting in an uncomfortable working environment for the employees. The logistics of displacing this many employees for the project adds significantly to the cost. Asbestos abatement is required to remove the tile mastic beneath the carpeting. It is believed that the poor working conditions in the space are contributing to hiring difficulties, moral, and retention problems.	Peger Admin Building	7,8,9,10, 11
CR	33	Anchorage Aviation HQ Replace Ceiling Tile and Light Sensors	30.0	Existing tile is unsightly and lighting sensors need to be installed for energy saving r	Kodiak Griffin	6
SE	33	Region-wide Lighting Upgrade	100.0	Replace T-12 fluorescent lighting with energy efficient T-8/T-5 lighting and install lighting controls to increase occupant comfort and reduce energy costs. Upgrade exterior lighting and high bay lighting at maintenance shops.	Region-wide	1-A, 2-A, 3-B, 4-B & 5-C
SEF	34	Crane Upgraded and Moved	30.0	Current Unit is too small and off center	Silvertip	
CR	35	Anchorage Annex Replace Water Lines with New Copper Lines	32.0	Replace existing corroded iron pipes with copper	Anchorage Annex	10
NR	36	Peger Parking Expansion and Head bolt Heater Upgrade	1,500.0	All existing headbolts are currently assigned. There are none available for new employees. The existing system has indoor rated wire which is impossible to repair in cold weather. Upgrade and expand system. This project adds 30 additional spaces adjacent to Davis Road.	Peger Complex	7,8,9,10, 11
SEF	37	Crane Replacement and Upgrade	30.0	Current Unit will not handle larger equipment	Tazlina	
CR	38	Upgrade Ready lines	130.0	Equipment requirements have changes requiring increases in electrical for ready lines	Ninilchik, Homer, kodiak, Seward, Palmer, McGrath, and N. Kenai	

FAC ES
FY2010 Deferred Maintenance List

Reg	Dept Priority	Project Title	Cost ($000)	Project Description	Location (City)	Election District
CR	39	Replace Highway Scale Signs with LED signs	30.0	Existing signs are hard to read and require constant maintenance	Anchorage Glenn-in and Glenn-out	10
SE	40	Sitka Court and Office Building - Restroom Renovation	140.0	New fixtures, replace tiling and flooring, partitions, counters, dispensers and upgrade automatic door openers.	Sitka	2-A
SEF	41	Equipment Lift Replacement	26.0	Replace due to size limitations - larger equipment	Anchorage LD	
NR	42	Peger Complex Building Maintenance Shop Addition	1,700.0	The facilities section has outgrown our existing shop. The existing shop is so crowded that it is nearly impossible to perform any work in it. All facility maintenance work for the Fairbanks/Denali areas and 23 rural airports is based out of this shop. Twenty seven maintenance personnel are currently working out of the existing 2,500 sq. ft. shop. Add 4000 sf with layout patterned after FIA and Anchorage International A/P Facility buildings with separate electrical, carpenter, and plumbing, shops. Central Region workshop is far superior to NR's converted loading dock.	Peger Complex	7,8,9,10, 11
NR	43	Peger Water Well & Pumphouse	200.0	Water Pumphouse – This will eliminate purchasing water from the city to use for road maintenance. High capacity well and associated equipment.	Peger Complex	7,8,9,10, 11
CR	44	Anchorage SEF Replace Bi-fold doors	200.0	Doors are original 1977 construction and are uninsulated. New insulated doors will save considerable energy/heating costs	Anchorage SEF	10
SE	45	Juneau - DOT&PF SE Regional Complex HVAC Major Maintenance and upgrade.	340.0	Replace malfunctioning pneumatic HVAC controls with direct digital controls; clean ducts in entire building, rebalance and repair system for efficient operation and lower operating costs. This project will increase productivity and improve indoor air quality for health/life safety.	Juneau	3-B
SE	46	Juneau - DOT&PF SE Regional Complex Ventilation Improvement	40.0	Replace restroom exhaust ventilator to improve indoor air quality. Install new exhaust system for 1st and 2nd floor copy rooms to reduce heat buildup in the building.	Juneau	3-B
SE	47	Ketchikan Court & Office Building - HVAC Major Maintenance and upgrade.	400.0	Replace malfunctioning pneumatic HVAC controls with direct digital controls; clean ducts in entire building, rebalance and repair system for efficient operation and lower operating costs. This project will increase productivity and improve indoor air quality for health/life safety.	Ketchikan	1-A
NR	48	Western District Rural Airport - Slabs for SREBs	800.0	Western area SREB's concrete floor installation at White Mountain, Teller, Emmonak, Golovin. Dirt floors in many of the SREB's trap moisture and causes mold growth on interior walls and ceilings. Concrete floors would eliminate this health risk and provide for a much cleaner environment for the contractors, mechanics and maintenance personnel.	White Mtn, Teller, Emmonak, Golovin	39T
CR	49	Anchorage Glenn Highway Scales Install Protective Barriers	15.0	Skidding automobiles are a potential hazard to state employees performing duties at the Glenn Highway scales. A barrier needs to be installed between the highway and the scales stations.	Anchorage Glenn-in and Glenn-out	10
CR	50	Maintenance Shops/Weigh Stations Water/Filtration Systems	425.0	Several Shops/Weigh Stations have nonpotable water supply need new wells or filtration systems	Glenn, Potter, Sterling, Silvertip,	

FAC ES
FY2010 Deferred Maintenance List

Reg	Dept Priority	Project Title	Cost ($000)	Project Description	Location (City)	Election District
SEF	51	Equipment Lift Installation	35.0	Lift Installation for Safety/Productivity	Bethel	
SE	52	Ketchikan COB Exterior Clean, Seal and Caulk	140.0	Concrete exterior panels need to be cleaned, sealed and joints caulked to protect from further weather damage; this will increase the service life of the building.	Ketchikan	1-A
CR	53	Kodiak Regional Office Repair Parking Lot and Sidewalks	300.0	Pave parking area and replace 200' of deteriorated sidewalks and curbs	Kodiak	6
SE	54	Region-wide - Insulation Upgrade	275.0	Survey and upgrade insulation and exterior sealing systems. Where necessary, added insulation and improving cladding integrity will reduce energy costs and increase productivity.	Region-wide	1-A, 2-A, 3-B, 4-B & 5-C
SEF	55	Equipment Lift Replacement	31.0	Replace Unsafe/Outdated Maintenance Lift	Valdez	
SE	56	Sitka - Prepare and Paint Exterior Doors	20.0	Prevailing weather-side doors are corroding due to failing paint; this will prolong the life of the doors. Door replacement may be necessary.	Sitka	2-A
SE	57	Juneau - AMHS Reservations Building	45.0	Install roof access to 2nd floor roof for roof inspections, snow removal and drain maintenance. Life/safety - hazard of accessing 2nd floor roof from 1st floor awning roof.	Juneau	3-B
CR	58	Chulitna Highway Maintenance Station Expansion	525.0	Existing shop is too small to accommodate the new larger equipment. Need to extend the bay area to allow inside storage of critical snow removal equipment	Chulitna SEF	36
NR	59	Manley Hot Springs Shop/SREB	900.0	Current rented shop is inadequate and inefficient. Combine with new SREB in A/P Relocation Project (AKSAS 61564) Add State funds to double size of AIP SREB. This funding would expand the AIP funded, planned 40'x50' building to 40'x100' and consolidate the Elliott Highway equipment under one roof in a new energy efficient building. This will eliminate leasing a substandard and inefficient building for highway equipment.	Manley Hot Springs	6C
NR	60	Trims Shop Addition	1,200.0	Expands the shop's equipment warm storage building. There are currently 2 bays and there is a for an additional bay. The warm storage shop is used for equipment during the winter months and also serves as the SEF shop when a mechanic travels from Delta. The existing bays are small and the amount of equipment makes it difficult to work on equipment. Equipment must be moved out of the building in order to change blades on graders and plow trucks. This project would add one 21'x100' bay to the joint SEF/M&O equipment building.	Trims	12F
CR	61	North Kenai Highway Maintenance Station Expansion	525.0	Existing shop is too small to accommodate the new larger equipment. Need to extend the bay area to allow inside storage of critical snow removal equipment	Kenai	

FAC ES
FY2010 Deferred Maintenance List

Reg	Dept Priority	Project Title	Cost ($000)	Project Description	Location (City)	Election District
NR	62	Cantwell Slab Repair	240.0	Replace slab in 40'x50' section of shop. Existing concrete floor is rough, broken, and has in-floor heat pipes that leak. Remove and replace concrete and underground plumbing. Install OWS for DEC compliance. Not required if Shop will be replaced - see request below.	Cantwell	8D
NR	63	Delta Maintenance Shop Office Addition	100.0	This shop's office is inadequate for the needs of the camp. It is only 300 square feet and poorly insulated. The eight personnel assigned need additional space. The office was an add-on to the original construction. It is uncomfortably cold during sub-zero weather. This project is not required if a new shop is funded.	Delta Maintenance Station	12F
NR	64	Western SREB Roof Ladder Installation	400.0	SREB's without roof mounted beacons do not have a wall mounted ladder to access roof. Currently, for roof maintenance (roof covering or chimney), access is gained with a ladder stood up in a loader bucket, and then raised high enough to reach the roof. (Extension ladders do not fit on passenger planes). This is a severe SAFETY hazard.	Western District SREBs	6C,39T, 40T
SE	65	Gustavus - Door Installation	30.0	Install 2 new doors in equipment storage area.	Gustavus	5-C
SEF	66	Crane, .5T Jib Crane	3.0	Additional unit, requires electricity and mounting	Kotzebue	
SEF	67	Crane Replacement and Upgrade	30.0	Current Unit will not handle larger equipment	Unalakleet	
CR	68	Silvertip Highway Maintenance Station Expansion	525.0	Existing shop is too small to accommodate the new larger equipment. Need to extend the bay area to allow inside storage of critical snow removal equipment	Hope	
NR	69	Peger SEF Shop Addition	1,800.0	Add two bays to Heavy Equipment Shop. 50'x80' total with O/H crane.	Peger SEF	10
NR	70	Healy Shop Replace Roof	210.0	The original roof design currently provides an R 11 energy rating. The current condition of the roof is very poor and needs to be replaced. This project would provide additional insulation, raising the R-value to R 40. At the time of replacement of the new roof system, an OSHA-approved, fall protection system would be installed. Not necessary if shop is replaced.	Healy Maintenance Station	8D
SE	71	Sitka Court & Office/Municipal Building Major Repairs	140.0	Replace defective glazing; renovate interior finishes (shared cost basis with City & Borough of Sitka.) This project will increase energy efficiency to reduce heating costs.	Sitka	2-A
SE	72	Petersburg Scow Bay Shop - Replace Roofing	175.0	Replace metal roof. Add insulation and improve wall/roof seal. This project will extend building life, increase building efficiency and reduce maintenance costs	Petersburg	5-C
CR	73	Anchorage Public Safety Repave Parking Lot	420.0	Existing Parking lot has deteriorated and has cracks and pot holes	Anchorage	10
SEF	74	Equipment Lift Replacement	31.0	Replace Unsafe/Outdated Maintenance Lift	Northway	
NR	75	Chandalar Bunkhouse Addition	175.0	Increased staffing level on the Dalton highway are taxing the existing bunkhouse. An additional four rooms are necessary to correct the situation. This will be an addition to the existing bunkhouse. Not required if new bunkhouse is funded.	Chandalar Maintenance Station	40T

FAC ES
FY2010 Deferred Maintenance List

Reg	Dept Priority	Project Title	Cost ($000)	Project Description	Location (City)	Election District
CR	76	Anchorage State Equipment Fleet Replace Sprinkler System	30.0	Existing sprinkler system is deteriorated and leaking. Pipes are over 30 years old and need to be replaced.	Anchorage	10
CR	77	Anchorage Comm Building DDC Upgrades	50.0	HVAC systems controls needs upgrade to better heat and cool the facilty. Many critical communications system depend on proper cooling in this facility.	Anchorage Communications	10
CR	78	Chulitna Highway Maintenance Station Replace Siding	300.0	Siding is old, damaged and lacks proper insulation. New insulated metal panels will save costly heating for this facility.	Chulitna Station	36
SEF	79	Equipment Lift Replacement	35.0	Replace Unsafe/Outdated Maintenance Lift	Livengood	
SE	80	Skagway Maintenance Shop - Cold Vehicle Storage	85.0	Install roof and siding to cold storage shed. Structure is in place and will increase equipment life by providing sheltered storage.	Skagway	5-C
NR	81	Peger Complex Supply Building Roof Replacement	170.0	This roof is in poor condition and requires patching several times every year.	Peger Complex Supply Building	7,8,9,10
CR	82	Replace Roof Anchorage Aviation Building	450.0	Roof membrane has surpassed its life expectancy. Leaks and needs replacement	Anchorage AviationHQ	10
NR	83	Tazlina District Headquarters ADA Office Addition	750.0	This building is not ADA compliant. This is the DOT hub for the district and is frequented by many members of the public. An elevator and many other modifications will need to be installed allowing wheelchair access to the 2nd floor offices.	Tazlina District Maintenance Station	12F
SE	84	Juneau DOT&PF SE Regional Complex - 2nd Floor Ceiling Tile	35.0	Replace poor quality ceiling tile for acoustical and lighting improvement. This will increase occupant productivity.	Juneau	3-B
SE	85	Skagway - 12-mile Bldg - Wastewater Tank	20.0	No wastewater facilities available at this remote site. Tank would be pumped as necessary to remove waste.	Skagway	5-C
CR	86	Aniak Maintenance Shop Roof Replacement	175.0	Roof is extremely old and leaks excessively	Aniak Maintenance Shop	36
CR	87	Dutch Harbor Storage Facility Repair Concrete Roof	350.0	Roof leaks excessively causing safety concerns with electrical panels needs drains installed and new membrane	Dutch harbor	
SE	88	Sitka Court and Office Building - Boiler Replacement	15.0	Original re-appropriation less than required for the project, creating an unpaid obligation.	Sitka	2-A
SEF	89	Equipment Lift Replacement	22.0	Replace Unsafe/Outdated Maintenance Lift	Delta	
NR	90	Delta Vehicle Warm Storage Extension	600.0	The Delta Warm Storage Bldg is not "deep" enough. Currently graders will not fit with any attachment installed. This causes inefficiency requiring removal of plows to utilize the warm storage or plugging the grader in outside while still spending money to heat the building.	Delta Maintenance Station	12F
NR	91	Peger Complex Tech Services Building Roof Replacement	260.0	Roof is in poor shape. Replace with EPDM and add fall protection system.	Peger Complex	7,8,9,10
NR	92	Peger Complex Vehicle Warm Storage Roof Replacement	250.0	Roof is in poor shape. Replace with EPDM and add fall protection system.	Peger Complex	7,8,9,10

FAC ES
FY2010 Deferred Maintenance List

Reg	Dept Priority	Project Title	Cost ($000)	Project Description	Location (City)	Election District
CR	93	Dutch Harbor Remove Asbestos from Hanger Building	175.0	Building contains asbestos and is a hazard to employees entering the facility. Asbestos needs to be removed or contained.	Dutch harbor	
NR	94	Coldfoot Station Vehicle Exhaust System	40.0	Existing system does not work adequately and results in unsatisfactory conditions in the shop during welding/cutting and vehicle testing operations.	Coldfoot Maintenance Station	6
NR	95	Peger SEF Complex Asbestos Removal	90.0	Asbestos mastic was used to secure carpeting when the Complex was built in 1971. This mastic must be abated so the old carpet can be stripped up, and new floor coverings can be installed in several areas.	Peger SEF Complex Floors	7,8,9,10
CR	96	Anchorage Aviation HQ Upgrade Electrical System	320.0	Existing electrical system is unsafe in its current configuration. Failure of the transformer could lead to an explosion within the facility. Transformers need to be relocated to outside of building for the safety of its occupants	Anchorage Aviation Headquarters	10
SEF	97	Equipment Lift Installation	35.0	Lift Installation for Safety/Productivity	McGrath	
SEF	98	Equipment Lift Replacement	31.0	Replace Unsafe/Outdated Maintenance Lift	Slana	
NR	99	Livengood Install New Fuel Station and Tanks	130.0	Existing system doesn't meet DEC Code. Above ground tanks are a concern because of age. Piping is underground (non compliant). Fueling station materials are wood and do not meet fire proof requirements.	Livengood Maintenance Station	6C
NR	100	Sag River Shop Metal Siding	100.0	Replace the maintenance intensive wood siding with metal siding.	Sag River Maintenance Station	40T
NR	101	Cordova ARFF Housing	120.0	Renovation of ARFF appartment housing – Both units need new carpeting, tile, windows, paint, bathroom and kitchen refurbishment. Iron removal system installation on domestic water.	Cordova A/P	5C
CR	102	Soldotna Highway Maintenance Station Correct Condensation problems	125.0	Shop has excessive condensation/water forming inside creating a hazardous work environment around electrical fixtures and panels. Need to increase air flow and building air exchange	Soldotna Maintenance Shop	8
SEF	103	Crane Replacement and Upgrade	30.0	Current Unit will not handle larger equipment	Tazlina	
SEF	104	Hoist Modification	4.0	Needs wireless system	Seven Mile	
SEF	105	Equipment Lift Replacement	22.0	Replace Unsafe/Outdated Maintenance Lift	O'Brien Creek	
SEF	106	Equipment Lift Replacement	35.0	Replace Unsafe/Outdated Maintenance Lift	Healy	
NR	107	Paxson Shop Addition	1,200.0	Add additional bay for heavy equipment warm storage.	Paxson Maintenance Station	12F
NR	108	Overhead Crane Replacement	100.0	Current cranes (2 each 7.5 ton) are over 30 years old, parts are no longer available.	Fairbanks SEF Shop Building	7,8,9,10

FAC ES
FY2010 Deferred Maintenance List

Reg	Dept Priority	Project Title	Cost ($000)	Project Description	Location (City)	Election District
CR	109	Soldotna Highway Maintenance Shop Replace Roof	820.0	Water condensation has caused internal damage and electrical hazards in side the facility. Poor design/construction has created a situation where it rains inside the building shorting out electrical circuits, blowing up lights and creating a potential fire hazard as water leaks into the main electrical distribution panel. A new sandwiched panel roof will eliminate these hazards	Soldotna Maintenance Shop	8
SEF	110	Hoist Modification	4.0	Needs wireless system	Chandalar	
		Total	24,897.0

Depart of Transportation & Public Facilities

Harbors Deferred Maintenance - DOT&PF Inventory
2008 Update

(Prepared on 11/12/08)

Dept. Priority	Facility Name	Cost estimate ($000)	GF cost ($000)	GF running total ($000)	Description	Location (city or area)	Election District
1	Tenakee Springs Small Boat Harbor	$ 1,155.0	$ 1,155.0	$ 1,155.0	Float deferred maintenance & repairs. Replace and transfer 'C' and M2, M3 floats to local government.	Tenakee Springs - Chigikof Island	1A
2	Hyder Inner Float & SPF	$ 638.0	$ 638.0	$ 1,793.0	Float deferred maintenance & repairs. Replace of all floats. SPF float is okay.	Hyder - Ketchikan area	1A
3	Kasaan Harbor & SPF	$ 1,261.7	$ 1,261.7	$ 3,054.7	Float deferred maintenance, repairs, and replacement. Replace breakwater. Steel approach is okay.	Kasaan - Prince of Wales Island	1A
4	Port Alexander Inner Float	$ 3,861.1	$ 3,861.1	$ 6,915.8	Float deferred maintenance, repairs, and replacement. Salvage existing grid.	Port Alexander - Baranof Island	1A
5	Elfin Cove Inner Float	$ 1,274.9	$ 1,274.9	$ 8,190.7	Float deferred maintenance, repairs, and replacement. Improve harbor layout.	Elfin Cove - Chigikof Island	1A
6	Edna Bay Refuge Float	$ 759.0	$ 759.0	$ 8,949.7	Float deferred maintenance & repairs. Remove navigational obstructions in front of floats. Install $50K timber floating breakwater.	Edna Bay - Prince of Wales Island	1A
7	Funter Bay Refuge Float	$ 192.5	$ 192.5	$ 9,142.2	Float deferred maintenance, repairs, and replacement. Install a $50K timber floating breakwater.	Juneau area - Admiralty Island	1A
8	Papke's Landing Float	$ 717.2	$ 717.2	$ 9,859.4	Float deferred maintenance, repairs, and replacement. Expand existing float to accommodate more users.	Petersburg area	1A
9	Elfin Cove Outer Float & SPF	$ 854.7	$ 854.7	$ 10,714.1	Float deferred maintenance, repairs, and replacement. Install a $50K timber floating breakwater.	Elfin Cove - Chigikof Island	1A
10	Baranof Warm Springs Refuge Float & S	$ 690.8	$ 690.8	$ 11,404.9	Float deferred maintenance, repairs, and replacement	Baranof Warm Springs - Baranof Island	2A
11	Hollis Float & SPF	$ 760.1	$ 760.1	$ 12,165.0	Float deferred maintenance, repairs, and replacement. Need ADA ramp and expanded SPF float.	Hollis - Prince of Wales Island	1A

3070

12	Tenakee Springs Small Boat Harbor	$ 926.2	$ 926.2	$ 13,091.2	Float deferred maintenance & repairs. Replace and transfer 'A' and 'B' floats to local government.	Tenakee Springs - Chigikof Island	1A
13	Point Baker Refuge Float & SPF	$ 952.6	$ 952.6	$ 14,043.8	Float deferred maintenance, repairs, and replacement. Install a $50K timber floating breakwater.	Point Baker - Prince of Wales Island	1A
14	Meyer's Chuck Float & SPF	$ 1,256.2	$ 1,256.2	$ 15,300.0	Float deferred maintenance, repairs, and replacement. Steel approach is okay.	Meyer's Chuck - Wrangell area	1A
15	Port Protection Refuge Float & SPF	$ 380.6	$ 380.6	$ 15,680.6	Float deferred maintenance & repairs	Port Protection - Prince of Wales Island	1A
16	Hyder Outer Float	$ 366.3	$ 366.3	$ 16,046.9	Float deferred maintenance, repairs, and replacement	Hyder - Ketchikan area	1A
17	Funter Bay Cannery Float & SPF	$ 731.5	$ 731.5	$ 16,778.4	Float deferred maintenance & repairs	Juneau area - Admiralty Island	1A
18	Kupreanof Float	$ 717.2	$ 717.2	$ 17,495.6	Float deferred maintenance & repairs. Replace one rotten approach pile.	Kupreanof - Petersburg area	1A
19	Tenakee Springs Small Boat Harbor	$ 6,494.3	$ 6,494.3	$ 23,989.9	Floating breakwaters (2) deferred maintenance, repairs, and replacement.	Tenakee Springs - Chigikof Island	1A
20	Ninilchik Small Boat Harbor	$ 440.0	$ 440.0	$ 24,429.9	Float deferred maintenance & repairs	Ninilchik - Kenai area	34Q
21	Entrance Island Refuge Float	$ 11.0	$ 11.0	$ 24,440.9	Float deferred maintenance & repairs	Hobart Bay - Petersburg area	1A
22	Helm Bay Refuge Float	$ 11.0	$ 11.0	$ 24,451.9	Float deferred maintenance & repairs	Helm Bay - Ketchikan area	1A
23	Halibut Cove Refuge Float	$ 55.0	$ 55.0	$ 24,506.9	Float deferred maintenance & repairs	Halibut Cove - Kachemak Bay	34Q
24	Mountain Point Float and Ramp	$ 5.5	$ 5.5	$ 24,512.4	Float deferred maintenance & repairs	Ketchikan area	1A
25	Whale Pass Float & SPF	$ 11.0	$ 11.0	$ 24,523.4	Float deferred maintenance & repairs	Whale Pass - Prince of Wales Island	1A

26	Gustavus Dock & Float	$ 4,017.2	$ 4,017.2	$ 28,540.6	Dock programmed for replacement with FHWA & NPS funds in 2008-2009. Mostly new harbor floats installed in 2008. Remaining float deferred maintenance, repairs, and replacement cost is approximately $50K.	Gustavus - Juneau area	1A
	DEPARTMENT TOTAL	**$ 28,540.6**

Highway Deferred Maintenance List
FY 2010

Reference Number: 30631

Depart of Transportation & Public Facilities

FY2010 Highways - Deferred Maintenance Inventory

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
	VEGETATION				
1	Fairbanks Area Brush Cutting	100.0	This project provides for cutting brush along roads throughout the Fairbanks District. Brush cutting would be completed to improve sight distance at curves and intersections and to provide adequate sight distance in area with known animal crossings. Vegetation on many of these priority roads has not been cut for years due to manpower and funding shortages.	Fairbanks District	7-D,8-D,9-E,10-E,11-F,12-F
2	P.O.W. Brush Cutting	50.0	Klawock/Hollis Hwy	Klawock MP 15-30	
3	Knik-Goose Bay Road	89.0	Brush Cutting	Knik	15-H
4	Richardson Hwy, MP 0 - 42 Valdez & Thompson Pass MS	60.0	Cut brush back from guardrail, road surface and reestablish sight distance on roads that have not been brush cut for several years. Some areas will require use of a mower-head excavator to reach from roadside.	Valdez District	12-F
5	Ketchikan Area Brush Cutting	30.0	N. Tongass	Ketchikan MP 4.8-13.8	
6	Seward Highway MP 35-37	31.4	Establish Clear Zone	Quartz Creek	35-R
7	Denali Highway Brush Cutting	100.0	Cut brush back from road surface and reestablish sight distance on roads that have not been brush cut for several years.	Denali District	8-D, 12-F
8	Kake Brush Cutting	7.5	Keku Rd Brush cut	Kake MP 0-3	
9	Big Lake Road	75.0	Brush Cutting	Big Lake	15-H
10	Sourdough & Slana Vegetative Management	100.0	This project will provide much needed cutting of heavy brush and trees in the Sourdough and Slana areas of the Tazlina District.	Tazlina District	6-C, 12-F
11	Sitka Brush Cutting	10.0	Sawmill Creek Road	Sitka MP 0-7	
12	Hollywood Road	76.0	Brush Cutting	Wasilla	15-H
13	Tok District Highways - Vegetative Management	200.0	Brush cut both sides of (portions of) the Alaska, Richardson and Taylor Highways and the Tok Cutoff. Several areas along these highways have not been brushed in 5 years due to manpower and equipment shortages. This project would allow M&O to develop brush cutting contract(s) to address brushing needs throughout the corridors. Due to the terrain, brush cutting this corridor will require a variety of specialized equipment.	Tok District	6-C
14	Sitka Brush Cutting - Halibut Pt Rd	10.0	Halibut Point Road	Sitka MP 0-7	
15	Knik River Road	55.0	Brush Cutting	Matanuska	16-H
16	St. Marys - Mountain Village Road Brush Cutting	20.0	Brush cut both sides of the road from St. Mary's, to the airport (MP 0-8). Sections of road have not been cut in quite a while, no available equipment, and dense vegetation is up to the edge of the road in places.	Western District	39T
17	Exit Glacier Road	24.3	Spot repairs	Seward	35-R
18	Portage Highway and Seward Highway @ Portage area	34.0	Brush Cutting	Portage	32-P
19	Copper River Hwy, MP 2 - 49 Cordova MS	40.0	Cut brush back from guardrail, road surface and reestablish sight distance on roads that have not been brush cut for several years. Some areas may require use of a mower-head excavator to reach from roadside	Valdez District	6-C
20	Lucus Road	16.0	Brush Cutting	Wasilla	14-G

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
21	Steese Hwy MP 128-162 Brush Cutting	90.0	Brush cut the Steese Hwy from Central to Circle (MP 128-162). Sections of road have grown up 8' - 10' due to a decade or more of neglect. No equipment or funding has been available for years to accomplish this needed brushing work, and dense vegetation is up to the edge of the roadway in places.	Fairbanks District	7-D,8-D,9-E,10-E,11-F,12-F
22	Parks Highway MP 42-52	90.0	Brush Cutting	Houston	15-H
23	Nome Area Brush Cutting	125.0	Cut brush where necessary on Nome area road system. Between MP 31-34 we will widen the safety area to right of way limits. This project will result in an estimated spring maintenance cost savings of $15,000 or more in yearly road opening efforts.	Western District	39-T
24	Pittman Road	80.0	Brush Cutting	Meadow Lakes	15-H
25	Silvertip Area Roads and Highways	30.0	Brush Cutting	Silvertip	32-P
26	Schrock Road	60.0	Brush Cutting	Maeadow Lakes	15-H
27	Trunk Road	65.0	Brush Cutting	Palmer	13-G
28	Sterling Highway MP 158-169	100.0	Establish Clear Zone	Anchor Point	35-R
	VEGETATION MANAGEMENT	**$ 1,768.20**			
	GRAVEL SURFACING				
1	Denali Highway Gravel Resurfacing	100.0	This project would provide gravel resurfacing funds for the portion of Denali Highway that is within the Cantwell MS's coverage.	Denali District	8-D, 12-F
2	South Tongass Ave.	240.0	South Tongass D-1 resurface	Ketchikan MP 11-12	
3	Hatcher Pass Road MP 9-21	1,000.0	Gravel embankment spot repair and ditching	MatSu	35-R
4	Steese Hwy Surface Repair (MP 128-162)	100.0	5,000 cy of surface aggregate would finish off repairs to the washed out areas and locations that received new culverts this year	Fairbanks District	7-D,8-D,9-E,10-E,11-F
5	Revilla Road	240.0	Revilla Road D-1 resurface	Ketchikan MP 3-4	
6	Squaw Creek Road	85.0	Embankment repair and culverts	Dillingham	37-S
7	St. Mary's-Mountain Village Road Gravel Fills & Resurfacing (MP 8 - 21)	200.0	Place gravel in areas where the road has settled below adjacent tundra, and resurface approximately 5 - 8 miles of gravel roadway with an estimated 5,000 CY of D-1. This project would resurface the worst portions of this road, which is in desperate need of additional surfacing material.	Western District	39-T
8	Sawmill Creek Road	260.0	Sawmill Creek D-1 resurface	Sitka MP 5.7-7.1	
9	Jakolof Bay Road	217.8	Gravel resurface	Seldovia	35-R
10	Kougarok Road Improvements (MP 32-34)	100.0	This project would provide for the placement of material to raise the existing grade in this area by approximately four feet. This is a high snowfall area and raising the grade will help reduce spring road opening costs. The grade raise and the replacement/installation of several culverts in this area will improve drainage and help protect the roadway embankment, thus extending the life of the road.	Western District	39-T
11	Quartz Creek East and West and Williams Road	97.4	Gravel resurface	Quartz Creek	32-P

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
12	Taylor Highway - Stockpile Road Surfacing Material	500.0	Provide some gravel stockpiles approximately 50 miles apart on the Taylor Hwy (as feasible). Strategic placement of stockpiles reduces resurfacing project costs by reducing the cost of hauling material, through the reduction of fuel cost, wear and tear on equipment and the potential for accidents. Approximately 80 miles of the Taylor is constructed of native rock. A substantial amount of effort is used grading large chucks of bedrock in an effort to keep the road safe. Due to the lack of crushed rock, this road is extremely unsafe when it is wet. As a result, tour buses, motor homes, fuel trucks and travel trailers slide off this road on an annual basis.	Tok District	6-C
13	Old Edgerton Hwy Repair/Resurface	80.0	Repair specific portions of the Old Edgerton Hwy that have little or no base material and is prone to annual flooding.	Tazlina District	12-F
14	Nome-Teller Highway Repairs	150.0	This project would provide for various surface repairs on the Nome-Teller Highway between MP 21 and MP 31. Repairs include hauling and placing gravel to fill in existing dips between MP 24 and 26. The project also includes a grade raise at MP 29 to eliminate spring glacier problems. Between MP 21 and 22 and from MP 23-31.5 existing shoulders will be pulled and the material processed utilizing the Fahr Roadcrusher in order to create new driving surface aggregate. These segments of highway have received very limited maintenance over the last several years due to manpower and funding shortages. This project will provide a smoother driving surface, improve safety by eliminating dips in the roadway, and reduce maintenance costs by eliminating glaciering and by crushing and placing a new driving surface aggregate.	Western District	39-T
15	Elliott Highway Gravel Resurfacing	100.0	This project would provide gravel resurfacing for the Elliott Highway.	Denali District	7-D,
16	Denali Highway: Dust Control (Calcium Chloride Application)	60.0	This project would be to apply 100 tons of CaCl to the sections of the Denali Hwy that would most benefit from dust control.	Denali District	8-D, 12-F
17	Elliott Highway: Dust Control (Calcium Chloride Application)	60.0	This project would be to apply 100 tons of CaCl to the sections of the Elliott Hwy that would most benefit from dust control.	Denali District	7-D
	GRAVEL SURFACING	**$ 3,590.20**			
	ASPHALT SURFACE REPAIRS				
1	Glenn Highway	2700.0	Rut Repair - Mill and overlay	N-S Birchwood 17.8-20.5	
2	Dalton Highway Asphalt Repairs (Hot Mix) MP 19-23	40.0	This project would provide repairs for existing asphalt surface which has incurred substantial potholing this year. This project will extend the life of the existing surface, provide a smoother and safer roadway, and will reduce future maintenance costs.	Denali District	6-C
3	Glacier Highway Repairs	500.0	Brotherhood Bridge to Hamilton Mill and fill	Juneau MP 9.3-10.2	
4	Jewel Lake Road (Raspberry to Strawberry)	5.0	Overlay pavement in southbound lane (0.2 miles)	*Anchorage*	***27-N***
5	Gaswell / Wendy Lane	3,000.0	Rut Repair - Mill and overlay	0-3	
6	Fairbanks Area Local Roads Asphalt Banding	150.0	Restore cross cracked asphalt due to frost expansion and contraction, extend the life of pavement and greatly improve ride quality.	Fairbanks District	7-D,8-D,9-E,10-E,11-F

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
7	POW Pavement Repairs	45.0	Dip repair on Craig/Klawock/Hollis Hwy	Klawock MP 0-30	
8	Parks Highway	27,000.0	Rut Repair - Mill and overlay	72-99	
9	Huffman Road (Old Seward to Carrs entrance)	14.4	Overlay pavement all 3 lanes (0.3 miles)	*Anchorage*	***31-P***
10	Northway Road Re-surfacing (High Float)	2.0	Resurface 9 miles of Northway Road. Maintenance was deferred for 3 years pending the execution of the Northway airport project. At present time, approximately 50% of the road will need to be resurfaced at the end of the project. The remaining 50% would benefit from a resurfacing due to the shortened life span resulting from the numbers of heavy trucks utilizing the road during the 2008 airport project.	Tok District	6-C
11	North Cohoe Loop	5,000.0	Rut Repair - Mill and overlay		
12	North Tongass Highway Repairs	75.0	Mill and Pave	Ketichikan MP 4.8-13.8	
13	Smith Road MP 0-0.8	65.0	Overlay pavement	*Palmer*	***16-H***
14	Sterling Highway	7,000.0	Rut Repair - Mill and overlay	83-90	
15	Edgerton Highway Surface Maintenance	120.0	Resurface sections of the Edgerton Highway that are damaged due to frost heaving. Currently, federal preventative maintenance funds are not available to repair these heavily damaged areas.	Tazlina District	12-F
16	Kake Road Repairs	55.0	Cold Patch and fabric repair of dip in the road	Kake MP 2	
17	Glenn Highway	7,800.0	Rut Repair - Mill and overlay	Peters Ck. - Eklunta 22-25.5	
18	Ridgecrest Drive	100.0	Overlay 550' of road	Bethel	38-S
19	Airport Road, MP 0.5 - 2.8 Valdez MS	50.0	Airport Road (Valdez) needs repair and rehabilitation - particularly chip sealing, to perform properly over the next several years.	Valdez District	12-F
20	Mosquito Lake Road Repairs	350.0	Mosquito Lake Road; Core out road remove log cord and replace with rip rap and rebuild base and double chip seal.	Haines MP 0.9	
21	Seward Highway	15,000.0	Rut Repair - Mill and overlay	62-75	
22	Outer Springer Road MP 0-1.5	117.0	Overlay pavement	Palmer	13-G
23	Ester Dome Road Surface Repair	275.0	RAP and Chip surface has completely failed and requires excessive maintenance and attention. This project would reshape the base course, inject CSS-1 to create a 3% residual ATB, and then double chip the surface for future ease of maintenance.	Fairbanks District	7-D
24	Sterling Highway	15,000.0	Rut Repair - Mill and overlay	45-60	
25	Angoon Road Repairs	600.0	Patch and new chipseal overlay	Angoon MP 0-	
26	Exit Glacier Road	24.3	Spot repairs	Seward	35-R
27	Eagle River Loop	10,000.0	Rut Repair - Mill and overlay	Hiland-Eagle River Rd	
28	Resurface Clearwater Lake Loop Road in Delta	75.0	Purchase, haul, and place modified C-1 surface aggregate on Clearwater Lake Loop Road in Delta Junction. The total length of the project is approximately 4 miles. This project will help reduce maintenance costs and improve driver safety by providing a smooth driving surface that will not require as	Tok District	12-F
29	Zimovia Highway	100.0	Zimovia Highway Asphalt Patching a or Chip seal	Wrangell MP 7-8	

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
30	Glenn	7,000.0	Rut Repair - Mill and overlay	35-42	
31	Edlund Road MP 0-0.72	61.0	Overlay Pavement	Wasilla	16-H
32	Regional Emulsified Asphalt Treated Base Stockpiles	800.0	This project would provide for the purchase of aggregate and emulsion in order to create regional stockpiles of EATB's around the Region for use on the road system. Due to limitations in Federal Preventative Maintenance funding, M&O has been unable to construct base improvements in areas with melting permafrost. This project would significantly improve M&O's highway patching program by providing the EATB material to be placed before the high float/chip seal patch is placed.	Northern Region	
33	Hoonah Airport Road Repairs	475.0	Airport Road mill and fill	Hoonah MP 0.7-1.3	
34	Clarks Road	244.0	Base repair, mill and overlay pavement	Anchorage	32-P
35	Rich Highway - Chip Seal Repairs MP 27 - 42	175.0	This project would provide repairs for existing asphalt surface which has incurred substantial potholing this year. This project will extend the life of the existing surface, provide a smoother and safer roadway, and will reduce future maintenance costs.	Valdez District	12-F
36	Halibut Point Rd Repairs	600.0	Halibut Point Road EATB & Chip Seal	Sitka MP 6.6-7.3	
37	Knik River Road	237.0	Base upgrade and pave	Matanuska	16-H
38	Clark Wolverine Road	348.0	Base upgrade and pave above existing paved section	Palmer	16-H
39	Jonesville Road MP 0-2.5	200.0	Overlay pavement	Sutton	12-F
40	C Street @ Fireweed Lane	9.6	Overlay pavement	Anchorage	25-M
41	Bodenburg Loop Road MP 0-5.7	453.0	Overlay pavement	Butte	16-H
42	Fairview Loop Road MP 9.2-11.1	148.0	Overlay pavement	Wasilla	16-H
43	Farm Loop Road MP 0-2.9	224.0	Overlay pavement	Palmer	13-G
44	New Glenn Highway @ Ft. Richardson Overpass	96.0	Overlay pavement	Anchorage	18-I
45	Reeve Boulevard	6.4	Overlay pavement	Anchorage	23-L
46	Sterling Highway MP 81.7-89.5	7,800.0	Rotomill and pave	Sterling	34-Q
47	Old Klatt Road	93.6	Overlay pavement	Anchorage	28-N
48	Jonhs Road	53.1	Overlay pavement	Anchorage	31-P
49	Old Seward Highway Huffman to Potter	44.0	Overlay sections of pavement	Anchorage	31-P
50	Eagle River Road MP 6-End	317.4	Overlay pavement	Eagle River	32-P
51	West Drive, Lakeshore and Longmere Road	153.5	Base prep and pave	Soldotna	34-Q
52	Poppy Ridge MP 0-0.5	120.0	Rotomill and pave	Soldotna	33-Q
53	E. Poppy MP 0-0.9	182.7	Rotomill and pave	Soldotna	33-Q
54	College Loop Road MP 0-1.4	314.9	Rotomill and pave	Soldotna	33-Q
55	Birch Road (Huffman to O'Malley)	16.0	Base repair and overlay	Anchorage	31-P
56	DeArmoun Road (last 1 mile)	100.0	Base repair, ditching and overlay pavement	Anchorage	32-P
57	South Birchwood @ Chugiak HS	80.0	Overlay pavement	Birchwood	16-H
58	Minnesota Drive Off-ramp @ West HS	4.8	Overlay pavement	Anchorage	26-M

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
59	Potter Drive (C Street to Dowling)	17.6	Overlay pavement	Anchorage	24-L
60	Kincaid Road	292.5	Base repair, ditching and overlay pavement	Anchorage	27-N
61	Bragaw Street (Tudor Road to UAA Drive)	80.0	Overlay pavement	Anchorage	22-K
62	Seward Highway MP 90-97	224.0	Overlay pavement in outside lanes	Girdwood	32-P
63	Alyeska Highway MP 3-4	32.0	Overlay pavement	Girdwood	32-P
64	Portage Highway (Wye to Visitor Center)	16.0	Overlay pavement	Portage	32-P
65	Seward Highway MP 46-75	664.0	Overlay sections of pavement	Silvertip	32-P

	TRAFFIC SIGNS/SIGNALS				
1	Parks Highway Sign Replacement	120.0	Most signs on the Parks Highway need replacement because of large amounts of snow removal wear and tear	Denali District	6-C, 7-D, 8-D
2	Ketchikan Sign Replacement	35.0	Replace Damaged Signs	Ketchikan	
3	Glenn Highway @Sylvia Sign	3.0	Sign base and guardrail repair	Anchorage	18-I
4	Nome Highway Delineators	35.0	Install delineators on all Nome area winter maintained roads, totaling 30 miles. Posts to be installed off plowing surface area thus eliminating secondary berms and improving snow removal efficiency. Annual Savings $10,000	Western District	39-T
5	Upgrade Paint Truck Message Board	25.0	The current message board on the paint truck can only display a directional arrow, which can no longer be used due to a state policy change. Replacing this with a programmable message board will improve crew safety and public safety.	Fairbanks District	7-D,8-D,9-E,10-E,11-F
6	College Road & Old Steese Hwy Badger Road & Old Rich Hwy	50.0	Replacement of existing 3M Program Visibility heads with current production models. This project would eliminate the high maintenance that has been required for years in two high traffic areas, and provide better service to the travelling public.	Fairbanks District	7-D,8-D,9-E,10-E,11-F
7	Western District Road Sign Improvements	50.0	All area roads. Replace, upgrade, repair all road, bridge and information signage.	Western District	6-C, 39-T
8	Airport Way	100.0	Replace obsolete traffic displays with current production models, significantly reducing operating costs.	Fairbanks District	9-E
9	Steese Highway	50.0	Replace obsolete traffic displays with current production models providing efficient and more reliable service to this high-traffic road.	Fairbanks District	7-D
	TRAFFIC SIGNS/SIGNALS	**$ 468.00**			
	CULVERT REPAIRS				
1	Richardson Highway Culvert Replacement	200.0	Replace failing culverts between MP 130-150 on the Richardson Highway	Tazlina District	12-F
2	Allen Road Culvert Improvements	30.0	Culvert replacement or lining	Haines	
3	Elliott Highway Culvert Rehab/Repair/Installation	100.0	Culvert rehab and installation would reduce washouts, shoulder erosion and time spent steaming culverts each spring.	Denali District	7-D
4		45.0	North Douglas drop inlet	Juneau MP 3.5	

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
5	Fairview Loop MP 7-8	12.0	Ditching and culvert repair	Wasilla	16-H
6	Ballaine and Yankovich Roads. Culvert Replacements	25.0	Four culverts on these roads have failed and two have become partially blocked. This project would restore drainage and extend the life of the roadway, while reducing annual maintenance requirements.	Fairbanks District	7-D
7	Lucus Road MP 0-1.4	14.0	Ditching and culvert repair	Wasilla	14-G
8	Douglas Highway Culvert Repair	120.0	Culvert liner 48" culvert	Juneau MP 1.5	
9	Tok District - Culvert Replacement	300.0	Replace several of the failed culverts the Taylor, Alaska and Richardson Highways; and the Tok Cutoff. Approximately 40% of the culverts in the District are 38 years old and/or are in some need of repair or replacement. Many of these culverts are in deep fills up to 35' deep. (Alaska Highway 1226-1266 - 13 culverts)	Tok District	6-C, 12-F
10	Back Loop Road Culvert Improvements	195.0	Culvert Upgrade 24" - 48"	Juneau MP 3	
11	Maud Road MP 0-1.8	9.0	Ditching and culvert repair	Palmer	16-H
12	Richardson Hwy Culvert Restoration (MP 289 - 341.5)	30.0	Several culverts and drainages were filled in with material from the July/August 2008 floods. This project will restore the culverts' capability in preparation for the next high-water event.	Fairbanks District	7-D,8-D,9-E,10-E,11-F,12-F
13	Old Glenn Highway MP 11-12.8	10.0	Ditching and culvert repair	Butte	16-H
14	Richardson Hwy Culvert Replacement	1,500.0	Replace five 10 foot culverts on the Richardson Highway at MP 0.8, 1.2, 1.4, 1.6 and 2.1 that are failing. Replacing these culverts will improve roadside drainage and will reduce maintenance by eliminating standing water adjacent to the roadway.	Valdez District	6-C, 12-F
15	Plumbley Road MP 0-1.4	8.0	Ditching and culvert repair	Butte	16-H
16	Nome Area Culvert Installation	125.0	Culvert installation would reduce washouts, shoulder erosion and time spent steaming culverts each spring and give an estimated savings of $15,000 a year.	Western District	39-T
17	Parks Highway MP 42-52	10.0	Ditching and culvert repair	Palmer	12-F
18	Denali Highway Culvert Rehab/Installation	100.0	Culvert rehab and installation would reduce washouts, shoulder erosion and time spent steaming culverts each spring.	Denali District	8-D, 12-F
19	Seward Highway MP 81-89	246.1	Culvert replacement or lining	Girdwood	32-P
20	Emergency Culvert Stockpiles	600.0	This project would allow for the purchase of several larger diameter culverts in order to maintain a regional stockpile for use in emergency situations. During the Oct 06 flood it was determined that the lack of larger available culvert pipe was a major short coming. Larger culvert can take as long as 3-4 weeks to be delivered after it is ordered. Therefore, during an emergency the availability of large diameter culvert	Northern Region	7-D,8-D,9-E,10-E,11-F,12-F
	CULVERT REPAIRS	**$ 3,679.10**			
	SHOULDERS &				
1	Airport Road, MP 0.5 - 2.8 Valdez MS	20.0	Airport Road (Valdez) has several locations where shoulders have not been improved for years, even during adjacent PM projects. This project would restore the worst shoulder failures, and create proper drainage away from the road profile.	Valdez District	12-F
2	Klawock/Hollis Hwy	50.0	Ditch cleaning	Klawock MP 15-30	
3	Chiniak Highway	58.3	Ditch cleaning	Kodiak	36-R
4	Fairview Loop MP 0-1	5.0	Ditching and culvert repair	Wasilla	16-H

Region Priority	Project Title	Project Cost	Project Description	Location	Election
		(000)			
5	Chena Hot Springs Road Shoulder Rehabilitation	25.0	Chena Hot Springs Road has several locations where shoulders have not been improved during PM projects. This project would restore the worst shoulder failures, and create proper drainage away from	Fairbanks District	7-D, 12-F
6	N. Tongass Rd	12.0	Ditch cleaning	Ketchikan MP 7-8.6	
7	Glenn Highway MP 54-59	38.0	Shoulder erosion repair	Sutton	12-F
8	Denali Highway MP 60-131 Ditching Rehabilitation	125.0	Reestablish drainage in locations that cannot be reached with graders and slopers. We would have to rent equipment to accomplish this work.	Denali District	8-D, 12-F
9	N.Pt Higgins Rd	7.5	Ditch cleaning	Ketchikan MP 0-1	
10	58 Mile Road MP 0-0.3	9.0	Shoulder erosion repair	Sutton	12-F
11	Richardson Highway Drainage Improvement	95.0	As a result of the October 06 Southcentral flood, drainage ditches along various segments of the Richardson Highway have become plugged with debris, mud, and silt and numerous culverts have become completely or partially plugged. The areas proposed under this project are areas that the FHWA have declined emergency funding on declaring them "Major Maintenance Areas". This project will re-establish drainage by removing debris and brush and re-creating a flowline.	Tazlina District	12-F
12	Revilla Road Ditching	31.5	Ditch cleaning	Ketchikan MP	
13	Buffalo Mine Road MP 0.5-4.5	10.0	Shoulder erosion repair	Sutton	12-F
14	Tok District - Drainage Program	200.0	For the past 10 years, there has been minimal repairs to roadside ditches and shoulders. Part of this is a personnel/time issue. The other part is a funding issue. There are many areas within the District that could benefit from a comprehensive drainage improvement project.	Tok District	6-C, 12-F
15	Halibut Point Road Ditch Cleaning	35.0	Ditch cleaning	Sitka MP 0-7.3	
16	Edlund Road MP 0.2-0.3	5.0	Shoulder erosion repair	Wasilla	16-H
17	Robe Lake Road, MP 0.2 - 0.5 Valdez MS	12.0	Robe Lake Road (Valdez) has several locations where the ditches have filled up, and focused work is needed in order to carry rainwater and snow melt along and away from the road profile.	Valdez District	12-F
18	Jonesville Road MP 1.4-1.5	5.0	Shoulder erosion repair	Sutton	12-F

20	Ninilchik Beach Road	3,500.0	Embankment erosion repair and riprap	Ninilchik	34-Q
21	Sterling Highway MP 45-58	37.3	Establish shoulders	Quartx Creek	32-P
22	Island Lake Road and Miller Loop Road	26.2	Establish shoulders	N. Kenai	34-Q
	SHOULDERS & DITCHES	**$ 4,456.80**			
	BRIDGE MAINTENANCE				
1	Western District Bridges Corrective Action to Annual Inspections	30.0	The Western District would like to be able to address a variety of bridge deficiencies identified over the last several years. Having a project with funding available, would enable the District to coordinate with Earl Ratliff and District personnel to execute a brief, cost-effective summer program of repairs.	Valdez District	5-C
2	Klawock River Bridge Approach Pavement Repair	17.0	Klawock River Bridge Approach Pavement Repair	Klawock	
3	Region-wide Bridges	25.0	Training and small tools funding	CR	All

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
4	Richardson Highway Bridge Resurface	120.0	Mill and resurface Tiekel North, Tiekel South and Stuart Creek Bridges that have failing surfaces before bridge integrity is affected.	Tazlina District	12-F, 6-C
5	Angoon Float Repairs	12.0	Seaplane Float bridge pin replacement	Angoon	
6	Byers Creek Bridge	50.0	Replace bridge posts	Chulitna	15-H
7	Portable Traffic Lights	100.0	Purchase portable traffic light system for the Bridge Crew for work on one lane bridges. It would also be available in the region for other districts to use for projects involving traffic control, as needed.	Denali District	6-C, 7-D, 8-D, 12-F
8	Dyea River Bridge Repairs	450.0	Dyea River Bridge stringer and deck replacement	Skayway	
	BRIDGE MAINTENANCE	**$ 804.00**			
	OTHER				
1	Klutina River Levee Repairs	90.0	The Army COE inspected the Klutina River Levee, at Copper Center, on May 13, 2008 and determined that it was in disrepair to the point that its integrity and serviceability would be threatened during a flood or ice event. We (John Hoffman & Clark Milne) inspected the levee again in July and propose to do several simple and cost-effective repairs, using DOT&PF personnel and force account methods, to bring the levee into satisfactory operating condition. Repairs would include brush cutting, transport & placement of fill and surfacing for areas where the crest of the levee has been cut into and lowered, placement of additional riprap to protect the bridge pier by the levee, and removal of various residential encroachments atop the slopes and crest of the levee that preclude movement along it.	Tazlina District	12-F
2	Egan Drive sidewalk replacement	16.0	Egan Drive sidewalk replacement	Juneau MP 0.2	
3	Seward Highway, Anchorage	550.0	Repair wooden fences	Anchorage	29-O/31-P
4	Fairbanks District Paint Markings	75.0	Most arrows, only's and crosswalks within the district are not compliant due to traffic and winter maintenance. This project would purchase stencils and extra paint and beads and restore these markings to federal compliance.	Fairbanks District	10-E,11-F, 12-F
5	Douglas Highway Wall Repair	45.0	Douglas Highway, refurbish timber retaining wall	Juneau MP 0.6-1.5	
6	Seward Highway MP 100-117	1,000.0	Repair rockfall protection fencing	Indian	32-P
7	Larry Spengler Road	45.0	This spring, DOT&PF raised the elevation of the road 2' to keep the Delta River from flooding across the road. We now need to hydro seed the embankment and provide stabilizing mat to the ditch line to meet requirements of a Storm Water Pollution Protection Program.	Tok District	6-C
8	Seward Highway MP 26-28	15.0	Seward Highway MP 26-28	15.0	
9	Repair Rip Rap @ Richardson Hwy MP 7 - 8.5	50.0	This section of the Rich Hwy was severely impacted by flooding in Oct. 2006, and needs additional attention to best assure protection of the roadway during similar, future precipitation and flood events.	Valdez District	5-C
10	Kenai Spur Road Bike Path	64.0	Base spot repair and overlay pavement	Kenai	33-Q
11	Klutina River Boat Launch Access Improvements	100.0	This project would provide for various improvements to the existing boat launch facility on the Klutina River. At high flows the existing boat launch can be difficult to utilize due to the rapid current. This project would improve the launching ramp, protect the riverbank, and create a deadwater zone to improve boat launching capabilities.	Tazlina District	12-F

Region Priority	Project Title	Project Cost (000)	Project Description	Location	Election
12	Tazlina River Wayside Protection	200.0	Last year, sections of the Tazlina River Wayside were fenced off and warning signs were installed due to erosion caused by the Tazlina River. M&O had to remove a staircase and sections of asphalt due to the continued erosion of the riverbank. This project would provide for the placement of riprap along the river bank adjacent to the wayside. Completion of this project would allow M&O to open up the wayside to	Tazlina District	12-F
13	Richardson Highway Riprap Stockpiles	200.0	One of the primary "lessons learned" during the October 2006 Southcentral flooding was that M&O needed to develop stockpiles of riprap to be available during flood events and other river eroding events.	Tazlina District	12-F

DEC Water, Wastewater and Solid Waste Grant Programs

- Facility Programs of DEC's Division of Water work with communities to develop and maintain sustainable water, sewer, and solid waste services in full regulatory compliance.

- There are two types of grant programs managed by DEC for sanitation projects. The *Village Safe Water* program offers 100% grant funding for smaller, rural communities and the Municipal Matching Grants program offers 60%-85% grant funding for larger communities.

Village Safe Water (VSW) Program

- VSW Funding comes from a combination of federal grants and state appropriations. The two primary federal funding sources (which have provided a five year combined average of $57 million per year) are the U.S. Department of Agriculture and the Environmental Protection Agency. Funding through these agencies requires a 25% State match. In addition, the Denali Commission and the Indian Health Service have provided a recent average of $10 million a year in 100% federal grants for projects through VSW.

- Communities apply each year for proposed sanitation project funding. Applications are scored, based heavily on the proposed project's ability to address assessed critical public health needs, as well as the communities' demonstrated capacity to operate and maintain the facilities. Capital funding is requested for the highest ranking projects.

- Per a federal funding requirements established in 2004, the VSW CIP priority list which is divided into two types of projects – those that can be completed in less than three years and those that will take three years or longer.

- Projects that are estimated to take one year to complete receive full funding in a single fiscal year.

- The Three Year List contains large, high scoring projects; however projects on the list are not prioritized. This allows the flexibility that is required in scheduling funding for multi-year projects. An

unanticipated delay in one project will not hold up funding for a different project that is ready to go.

- Funding for the construction phases of Three Year List projects is granted based upon completion of design packages and chronological approval, available funding, and sufficient drawdown of existing project funds. In other words, this is a "first ready, first funded" list and new funds are not made available to a project until prior project grant funds for the project are exhausted.

- In some cases, funding is transferred by VSW through the Indian Health Service to the Alaska Native Tribal Health Consortium, who in turn assists communities in design and construct of sanitation projects.

Municipal Matching Grants Program

- The Alaska Municipal Water, Sewerage, and Solid Waste Matching Grant program provides partial funding and engineering support for drinking water, sewer, solid waste and non-point source pollution projects, such as water quality enhancement and waterbody restoration and recovery.

- These state grants primarily assist the larger communities and boroughs in the State.

- Each year, communities submit sanitation grant questionnaires which are scored weighing primarily the extent to which proposes projects address critical public health and environmental needs. Grants are awarded to the highest ranking projects as funding allows.

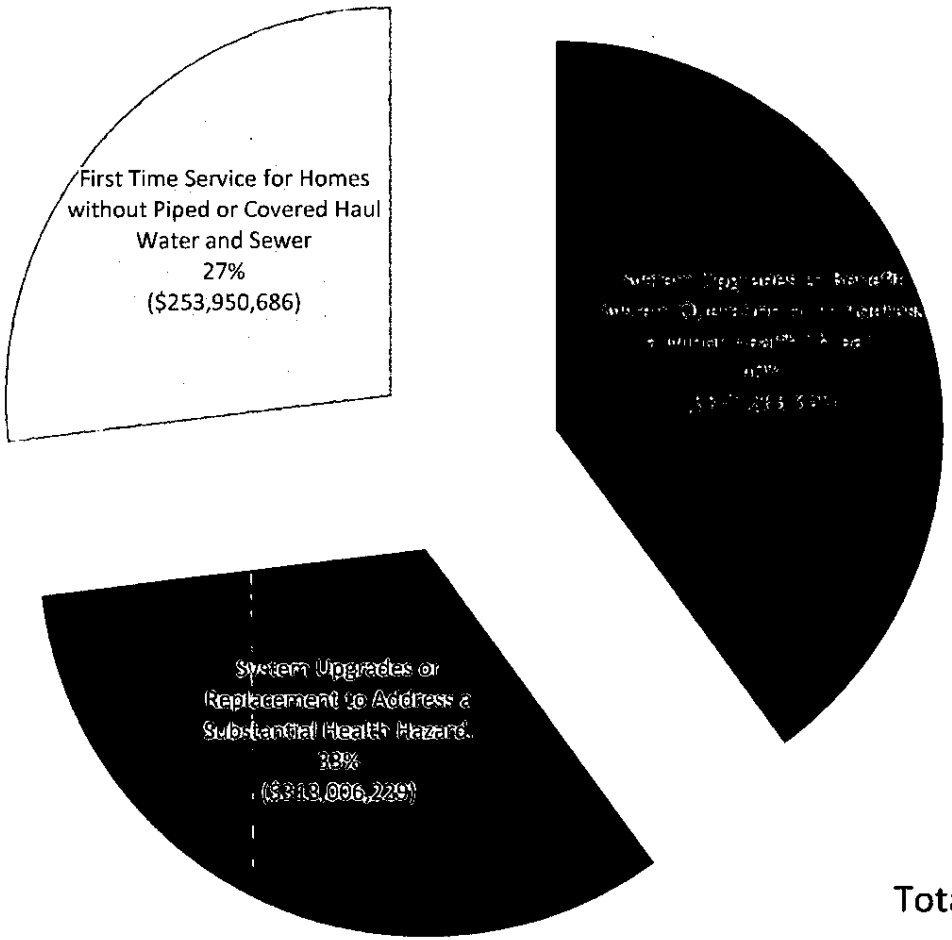
- SB 303 which passed the Legislature last year amended the Municipal Matching Grants enabling statute to change the State/Local funding ratio of eligible project costs. The State share of project costs for grants awarded under the program are now:

    - 85 percent of eligible costs for a municipality with a population of 1,000 persons or less.

    - 70 percent of eligible costs for a municipality with a population of 1,001 to 10,000 persons.

    - 60 percent of eligible costs for a municipality with a population of greater than 10,000 persons.

Rural Alaska Water and Sewer Needs

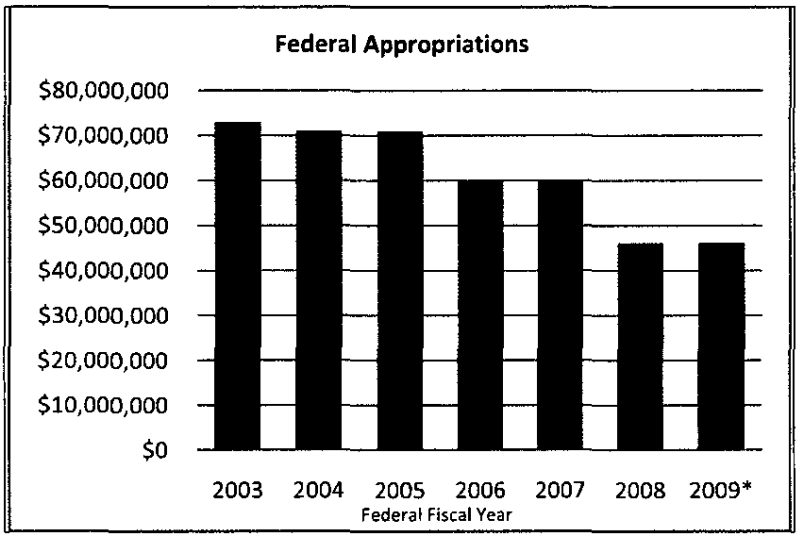


Total: $944,222,610

Source: Alaska Area Sanitation Deficiency System

March 9, 2009

Rural Alaska Sanitation Appropriations



Annual funding for rural sanitation improvements has declined by nearly $27 million or 37% since FFY 2003.

Fiscal Year	EPA				USDA				Total Enacted
	President	House	Senate	Enacted	President	House	Senate	Enacted	
2003	$40,000,000	$35,000,000	$45,000,000	$43,000,000	$20,000,000	$24,000,000	$30,000,000	$30,000,000	$73,000,000
2004	$40,000,000	$25,000,000	$45,000,000	$43,000,000	$11,800,000	$0	$30,000,000	$28,000,000	$71,000,000

2006	$15,000,000	$15,000,000	$40,000,000	$35,000,000	$11,800,000	$0	$26,000,000	$25,000,000	$60,000,000
2007	$14,850,000	$15,000,000	$40,000,000	$35,000,000	$0	$0	$25,000,000	$25,000,000	$60,000,000
2008	$15,500,000	$10,500,000	$30,000,000	$24,610,000	$0	$0	$21,945,000	$ 21,515,000	$46,125,000
2009*	$15,500,000			$24,610,000	$3,300,000			$ 21,515,000	$46,125,000

* Assumes the Continuing Resolution for the first six months of FFY09 will be extended through last six months of FFY09.

While funding has declined by 37% over the last six years, there are still over 500 rural Alaska sanitation projects that need funding. The cost of completing these projects is approximately $700 million.

The State's continued goal is to increase the number of rural households with adequate sanitation facilities by an average of 3% per year while at the same time assisting communities address sanitation needs relating to aging infrastructure and complying with new regulations.

We are concerned that although we've achieved this goal for the last several years, the momentum that we've gained may wane due to a decrease in federal funding levels.

	$208,455,441	$154,860,869

* Includes $10,000,000 in ANTHC/Denali Commission funding

Alaska Department of Environmental Conservation
Village Safe Water Program
2010 Project Lists

The Village Safe Water program provides funding for three types of projects that are identified on three separate lists. The first list consists of studies and/or plans that require one-year funding; the second list consists of single phased construction projects that require one-year funding; and the third list includes larger, multi-phased projects that will require funding over multiple years. Amounts included on the Studies and Single Phase Construction lists are the grant amounts that will be made available for the project once the capital budget is approved. Amounts included on the Multiple Year Funding Plan are estimates of the funding that will be needed for a project during the upcoming fiscal year. Actual SFY 2010 grant amounts may be higher or lower than these estimates and will be made on a first come, first served basis. Projects not funded this year will remain on the list and will be eligible for funding next fiscal year.

U.S. Department of Transportation
Federal Highway Administration

Memorandum

Subject: **INFORMATION:** Snow Removal on Sidewalks Constructed with Federal Funding

Date: AUG 27 2008

From: Butch Wlaschin
Director, Office of Asset Management

In Reply Refer To:
HIAM-20

To: Directors of Field Services
Division Administrators

The purpose of this memorandum is to address questions raised by several FHWA Division Offices about maintaining pedestrian facilities, particularly during the winter season.

Two provisions provide the FHWA with authority to require snow removal on pedestrian facilities constructed with Federal funds. Both of these provisions fall under current statutory and regulatory maintenance requirements.

The maintenance requirements of 23 U.S.C. § 116 apply to all transportation facilities that are constructed with Federal funds. Section 116 requires a State DOT to maintain projects constructed with Federal-aid funding or enter into a maintenance agreement with the appropriate local official where such projects are located.

Snow removal and treatment for ice on sidewalks is also a pedestrian accessibility issue, for which FHWA has oversight responsibility. In accordance with 28 CFR § 35.133, a public agency must maintain its walkways in an accessible condition for all pedestrians, including persons with disabilities, with only isolated or temporary interruptions in accessibility. Part of this maintenance obligation includes reasonable snow removal efforts. See FHWA, Questions and Answers About ADA/Section 504, question 31 under Maintenance, www.fhwa.dot.gov/civilrights/ada_qa.htm#q31.

Note that the maintenance requirements described in this memorandum also apply for other sidewalk obstructions. For more information see section *4.3.1, Surface Repairs, Snow Removal, and Vegetation* in the AASHTO Guide for the Planning, Design, and Operation of Pedestrian Facilities (July 2004).

Current maintenance provisions require pedestrian facilities built with Federal funds to be maintained in the same manner as other roadway assets. In some cases, however, local agencies may have policies that reasonably limit removal of snow from their own roadways and adjoining pedestrian facilities. State Agencies have generally established levels of service on various routes especially as related to Snow and Ice events. This is particularly

MOVING THE AMERICAN ECONOMY

important in heavy snow regions, since it is possible to have snow on the ground for many months from late fall to early spring.

It is recognized that winter conditions vary from State to State. The FHWA's role is to assure that reasonable snow removal efforts are provided to make facilities safe and traversable, considering local conditions.

If you have any further questions, your staff may contact Mr. Celso Gatchalian, Office of Asset Management, 202-366-1342, celso.gatchalian@dot.gov.

ALASKA DEPARTMENT OF TRANSPORTATION & PUBLIC FACILITIES

STATEWIDE DESIGN & ENGINEERING SERVICES

BRIDGE STATUS REPORT – March 6, 2009

Contact: Roger Healy, P.E., Chief Engineer 465-6958

Project Development Timeline – Bridges

All projects take time to bring from concept through completion: federally funded projects take longer yet. It is not unusual for the project development process (funding authorization, preliminary design, permits, environmental clearances, final design, bidding, and award) to take multiple years. Bridge projects have further challenges in preconstruction and construction because of historic structure considerations, river hydraulics, wetland impacts, Coast Guard clearances, fish permit timeframes, traffic detours, temporary bridges, and seasonal construction windows.

Bridge Work Present and Future

The focus of the following lists is bridges owned and maintained by the DOT&PF. Future anticipated Project Costs are preliminary and will change. The following lists identify:

- Major Bridge work underway or completed in the 2008 construction season;
- Major Bridge work anticipated for construction in the 2009 construction season;
- Major Bridge design and construction work for Structurally Deficient bridges without complete funding through design and/or construction;
- Structurally deficient bridges of major significance that, subject to available funding, must be replaced or undergo rehabilitation in the future.

Major Bridge Construction Work in 2008

Bridge	Highway/Location	Project Cost or Bridge Component (BC) Cost	Notes
Hick's Creek	Glenn Highway	~$4M (BC)	Open to Traffic
South Channel	Unalaska	~$20M	Open to Traffic
North Pole Interchange	Richardson/North Pole	~$2M (BC)	Open to Traffic
Susitna River Br. Rehab	Talkeetna	~$5.5M(BC)	Open to Traffic
ADOT Maintenance Repairs	Statewide	~$250K	Open to Traffic

3101

Anticipated Bridge Construction Work 2009 – Funds Identified for Design/Construction

Bridge	Highway/Location	Project Cost or Bridge Component (BC) Cost	Notes
Tanana River	Alaska Highway	~$40M	Bid on 2/26/2009
Gakona River	Tok	~$5M	2009 Stimulus - Fast List
Shaw Creek	Richardson	~$3M (BC)	GF Funded
Barnette Street	Chena River/Fairbanks	~$4M	FMATS TIP
Tok River	Alaska	~$380K	2008 G.O. Bonds for Future STIP Eligibility

On System Major Bridge Work – Planning and Design – Majority of Funds Identified

Bridge	Highway/Location	Project Cost or Bridge Component (BC) Cost	Notes	Proposed Funding Source
Snake River	Nome	~$10M	Replacement	2008 G.O. Bonds
Wood River	Aleknagik	~$20M	New Crossing	2008 G.O. Bonds
Ptarmigan Creek	Seward Highway	~$2M	Emergency Temp. Repairs	2008 G.O. Bonds
Falls Creek	Seward Highway	~$2.5M	Emergency Temp. Repairs	2008 G.O. Bonds
Trail River	Seward Highway	~$6.5M	Emergency Temp. Repairs	2008 G.O. Bonds
Slana River	Tok	~$6M	Replacement	2008 G.O. Bonds
Taiya River	Dyea/Skagway	~$1.5M	Load Rated/Rehab	2008 G.O. Bonds
Tolsona Creek	Glenn	~$1.5M	Replacement	2008 G.O. Bonds

FUTURE FUNDING

DOT&PF anticipate between $20M to $25M annually in federal Bridge Replacement monies for bridge replacement and rehabilitation. The limited federal Bridge Replacement (BR) funds will be prioritized based on needs for safety and transportation efficiency. Project costs are rough.

On System Bridge Work – Funds Not Secured – STIP Nominations for Federal Bridge Replacement Funds

Bridge	Highway/Location	Project Cost or Bridge Component (BC) Cost	Notes	Proposed Funding Source
Tok River	Alaska Highway	~$10.0M	Replacement – Functionally Obsolete/Gas Line Support	2009 STIP Nomination for Design
Moose Creek RR Xing	Richardson	~$14M	Replacement	2009 Stimulus – Contingent
Ketchikan Viaducts	Tongass	~$7.15M	Rehabilitation	2009 Stimulus – Contingent
Livengood Creek	Old Elliot	~$1.0M	Structurally Deficient - Replacement	2009 STIP -Potential Nomination for Design Funds
Phelan Creek	Richardson	~$2.5M	Replacement Structurally Deficient - Replacement	2009 STIP -Potential Nomination for Design Funds
Ruby Creek	Richardson	~$2.0M	Replacement - Structurally Deficient	2009 STIP -Potential Nomination for Design Funds
Snow River Center	Seward	~$1.8M	Rehabilitation - Structurally Deficient	2009 STIP -Potential Nomination for Design Funds
Snow River West	Seward	~$5M	Rehabilitation – Structurally Deficient	2009 STIP -Potential Nomination for Design Funds
S. Fork Anchor River	Sterling	~$2.5M	Replacement – Structurally Deficient	2009 STIP -Potential Nomination for Design Funds
Ptarmigan Creek	Seward Highway	~$4.0M	Permanent Replacement	2009 STIP
Falls Creek	Seward Highway	~$3.0M	Permanent Replacement	2009 STIP
Trail River	Seward Highway	~$8.5M	Permanent Replacement	2009 STIP
	TOTALS	**~$55M to $65M**		**FHWA BR Funds**

Structurally Deficient On-System Major Bridge Work – Future

Bridge	Highway/Location	Bridge Component Cost (est.)	Notes
Twenty Mile River	Seward Highway	~$25M	Seward Hwy MP75 to 90 – STIP ID# 11925
Virgin Creek	Seward Highway	~$7M	Seward Hwy MP75 to 90 – STIP ID# 11925
No Name Creek	Halibut Pt. Road	~$3M	Future Fund Request
Mendenhall River	Glacier Highway	$3.0M for Design	2010 Gov Budget for Design, Construction out-years
Portage Creek No. 1	Seward Highway	~$10M	Seward Hwy MP75 to 90 – STIP ID# 11925
Portage Creek No. 2	Seward Highway	~$12M	Seward Hwy MP75 to 90 – STIP ID# 11925
Peterson Creek	Seward Highway	~$5M	Seward Hwy MP75 to 90 – STIP ID# 11925
Glacier Creek	Seward Highway	~$15M	Seward Hwy MP75 to 90 – STIP ID# 11925
Placer River Main	Seward Highway	~$20M	Seward Hwy MP75 to 90 – STIP ID# 11925
Placer River Overflow	Seward Highway	~$13M	Seward Hwy MP75 to 90 – STIP ID# 11925
Gerstle River	Alaska Highway	~$55M	Future Fund Request
O'Connor Creek	Goldstream Road	~$1.5M	Future Fund Request
Klehini River	Porcupine River	~$7M	Future Fund Request
	TOTALS	**~$160M to ~$200M**

DEC Water, Wastewater and Solid Waste Grant Programs

- Facility Programs of DEC's Division of Water work with communities to develop and maintain sustainable water, sewer, and solid waste services in full regulatory compliance.

- There are two types of grant programs managed by DEC for sanitation projects. The *Village Safe Water* program offers 100% grant funding for smaller, rural communities and the Municipal Matching Grants program offers 60%-85% grant funding for larger communities.

Village Safe Water (VSW) Program

- VSW Funding comes from a combination of federal grants and state appropriations. The two primary federal funding sources (which have provided a five year combined average of $57 million per year) are the U.S. Department of Agriculture and the Environmental Protection Agency. Funding through these agencies requires a 25% State match. In addition, the Denali Commission and the Indian Health Service have provided a recent average of $10 million a year in 100% federal grants for projects through VSW.

- Communities apply each year for proposed sanitation project funding. Applications are scored, based heavily on the proposed project's ability to address assessed critical public health needs, as well as the communities' demonstrated capacity to operate and maintain the facilities. Capital funding is requested for the highest ranking projects.

- Per a federal funding requirements established in 2004, the VSW CIP priority list which is divided into two types of projects – those that can be completed in less than three years and those that will take three years or longer.

- Projects that are estimated to take one year to complete receive full funding in a single fiscal year.

- The Three Year List contains large, high scoring projects; however projects on the list are not prioritized. This allows the flexibility that is required in scheduling funding for multi-year projects. An

unanticipated delay in one project will not hold up funding for a different project that is ready to go.

- Funding for the construction phases of Three Year List projects is granted based upon completion of design packages and chronological approval, available funding, and sufficient drawdown of existing project funds. In other words, this is a "first ready, first funded" list and new funds are not made available to a project until prior project grant funds for the project are exhausted.

- In some cases, funding is transferred by VSW through the Indian Health Service to the Alaska Native Tribal Health Consortium, who in turn assists communities in design and construct of sanitation projects.

Municipal Matching Grants Program

- The Alaska Municipal Water, Sewerage, and Solid Waste Matching Grant program provides partial funding and engineering support for drinking water, sewer, solid waste and non-point source pollution projects, such as water quality enhancement and waterbody restoration and recovery.

- These state grants primarily assist the larger communities and boroughs in the State.

- Each year, communities submit sanitation grant questionnaires which are scored weighing primarily the extent to which proposes projects address critical public health and environmental needs. Grants are awarded to the highest ranking projects as funding allows.

- SB 303 which passed the Legislature last year amended the Municipal Matching Grants enabling statute to change the State/Local funding ratio of eligible project costs. The State share of project costs for grants awarded under the program are now:

    - 85 percent of eligible costs for a municipality with a population of 1,000 persons or less.

    - 70 percent of eligible costs for a municipality with a population of 1,001 to 10,000 persons.

    - 60 percent of eligible costs for a municipality with a population of greater than 10,000 persons.

* Assumes the Continuing Resolution for the first six months of FFY09 will be extended through last six months of FFY09.

While funding has declined by 37% over the last six years, there are still over 500 rural Alaska sanitation projects that need funding. The cost of completing these projects is approximately $700 million.

The State's continued goal is to increase the number of rural households with adequate sanitation facilities by an average of 3% per year while at the same time assisting communities address sanitation needs relating to aging infrastructure and complying with new regulations.

We are concerned that although we've achieved this goal for the last several years, the momentum that we've gained may wane due to a decrease in federal funding levels.

Alaska Department of Environmental Conservation
Village Safe Water Program
2010 Project Lists

The Village Safe Water program provides funding for three types of projects that are identified on three separate lists. The first list consists of studies and/or plans that require one-year funding; the second list consists of single phased construction projects that require one-year funding; and the third list includes larger, multi-phased projects that will require funding over multiple years. Amounts included on the Studies and Single Phase Construction lists are the grant amounts that will be made available for the project once the capital budget is approved. Amounts included on the Multiple Year Funding Plan are estimates of the funding that will be needed for a project during the upcoming fiscal year. Actual SFY 2010 grant amounts may be higher or lower than these estimates and will be made on a first come, first served basis. Projects not funded this year will remain on the list and will be eligible for funding next fiscal year.

Senator Kevin Meyer
Senate District O

SPONSOR STATEMENT FOR SENATE BILL 80

"An Act extending the termination date of the Board of Veterinary Examiners; and providing for an effective date."

SB 80 extends the sunset date for the Board of Veterinary Examiners (BVE).

Responsible for controlling and regulating the practice of veterinary medicine in Alaska, the BVE ensures that over 290 licensed veterinarians and over 100 veterinary technicians in the state are competent and capable of maintaining the integrity of the profession.

The Division of Legislative Audit recommends extending the BVE termination date to June 30, 2017.

Members of the Legislative Budget
and Audit Committee:

In accordance with the provisions of Title 24 and Title 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities of the Board of Veterinary Examiners. The attached report is submitted for your review.

DEPARTMENT OF COMMERCE, COMMUNITY,
AND ECONOMIC DEVELOPMENT
BOARD OF VETERINARY EXAMINERS

September 22, 2008

Audit Control Number
08-20059-08

This review examines the activities of the Board of Veterinary Examiners to determine if there is a demonstrated public need for its continued existence. Under AS 08.03.010(c)(21), the Board of Veterinary Examiners is currently scheduled to terminate June 30, 2009. We recommend the legislature extended the board's termination date to June 30, 2017.

The audit was conducted in accordance with generally accepted government audit standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. Fieldwork procedures utilized in the course of developing the findings and discussion presented in this report are discussed in the Objectives, Scope, and Methodology.

Pat Davidson, CPA
Legislative Auditor

OBJECTIVES, SCOPE, AND METHODOLOGY

In accordance with Titles 24 and 44 of the Alaska Statutes, we have reviewed the activities of the Board of Veterinary Examiners (BVE or board) to determine if there is a demonstrated public need for its continued existence and if it has been operating in an efficient and effective manner.

As required by AS 44.66.050(a), this report shall be considered by the committee of reference during the legislative oversight process in determining whether BVE shall be continued. Currently, AS 08.03.010(c)(21) states that the board will terminate on June 30, 2009. If the legislature does not extend the termination date for the board, BVE will have one year to conclude its administrative operations.

Objectives

The three central, interrelated objectives of our report are:

1. To determine if the termination date of the board should be extended
2. To determine if the board is operating in the public's interest
3. To determine if the board has exercised appropriate regulatory oversight of licensed veterinarians and veterinary technicians.

Scope

The assessment of operations and performance of the board was based on criteria set out in AS 44.66.050(c). Criteria set out in this statute relates to the determination of a demonstrated public need for the board. We reviewed the board's activities for FY 05 through FY 08.

Methodology

The major areas of our review were board proceedings, licensing, and complaint investigation. During the course of our audit we:

- Reviewed and evaluated applicable statutes and regulations related to the licensing of veterinarians and veterinarian technicians.
- Reviewed the minutes of BVE meetings.
- Reviewed the annual reports issued by the board.
- Analyzed the complaints filed with the Department of Commerce, Community and Economic Development's Office of Consumer Affairs and Investigations in order to evaluate the investigative support being provided to BVE.

- Requested information regarding any complaints regarding the BVE from the Department of Administration's Division of Personnel, the Equal Employment Opportunity Commission, the Human Rights Commission, The Office of Victim's Rights, and the State Ombudsman.
- Analyzed the financial records related to the revenues generated and the operating costs incurred by BVE to determine if sufficient revenues are being collected to cover the board's costs.
- Tested files related to applicants for, and holders of, licenses issued by BVE.
- Conducted interviews with employees of the Department of Commerce, Community, and Economic Development, Division of Corporations, Business, and Professional Licensing and the BVE chair and its members.
- Attended a BVE board meeting.

ORGANIZATION AND FUNCTION

The Board of Veterinary Examiners (BVE or board) was established for the purpose of controlling and regulating the practice of veterinary medicine in Alaska.

The board regulates the profession of veterinary care in the State by examining applicants and approving the issuance of licenses to qualified applicants, establishing or amending regulations necessary to enforce state statutes, and conducting disciplinary proceedings in accordance with law.

Applicants for a veterinary license are required to pass the North American Veterinary Licensing Examination and a state written exam which covers specific Alaskan issues of veterinary practice.

BVE is made up of five members. State law requires four board positions be filled by licensed veterinarians that have been engaged in the practice of veterinary medicine in the State for at least five years prior to appointment. The remaining position is to be filled by an individual from the general public.

Exhibit 1

Board of Veterinary Examiners
(As of June 30, 2008)

Professional Members
Steve Torrence, DVM, Chair
Timothy Bowser, DVM
David Hunt, DVM
Vacant

Public Member
Martin Buser

The Department of Commerce, Community, and Economic Development, Division of Corporations, Business, and Professional Licensing provides administrative and investigative assistance to the Board of Veterinary Examiners. Administrative assistance includes budgetary services and functions such as collecting fees, maintaining files, receiving and issuing application forms, and publishing notices of examinations and meetings.

Alaska Statute 08.01.065 mandates that the department shall adopt regulations that establish the amount and manner of payment of applications fees, examination fees, registration fees, permit fees, and investigative fees.

(Intentionally left blank)

REPORT CONCLUSIONS

Under AS 08.03.010(c)(21), the Board of Veterinary Examiners (BVE or board) will terminate on June 30, 2009. If the legislature does not take action to extend the board's termination date, AS 08.03.020 provides that the board will have one year in which to conclude its administrative operations.

The regulation and licensing of veterinarians and veterinary technicians benefits the public. BVE has demonstrated an ability to conduct its affairs in an efficient manner. The board continues to propose changes to regulations to improve the effectiveness of the board and ensure that veterinarians and veterinarian technicians licensed in the State of Alaska are competent and capable of maintaining the integrity of the profession.

In our opinion, the termination date of Board of Veterinary Examiners should be extended to June 30, 2017.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Department of Commerce, Community and Economic Development, Division of Corporations, Business and Professional Licensing, in conjunction with the Board of Veterinary Examiners, should review licensing fees as provided by statute and consider decreasing fees.

The Board of Veterinary Examiners (BVE or board) has had a significant cumulative surplus of revenues at the end of the last four fiscal years. Additionally, the Division of Corporations, Business and Professional Licensing has not reviewed BVE licensing rates since 2004. At the end of FY 08, the board had an estimated operating surplus of $78,000. This surplus exceeds the Board's total operating expenses for each of the prior three years (FY 05 – FY 07).

AS 08.01.065(c) states that:

> *...the department shall establish fee levels under (a) of this section so that the total amount of fees collected for an occupation approximately equals the actual regulatory costs for the occupation. The department shall annually review each fee level to determine whether the regulatory costs of each occupation are approximately equal to feel collections related to that occupation.*

The division was unable to provide an explanation of the Board's need for the cumulative surplus of excess revenue from licensing fees. Without the required annual review of licensing fee levels, it is likely that BVE will continue to accumulate revenue in excess of its regulatory costs.

We recommend the division, in conjunction with the Board, review the licensing fees and regulatory expenditures as required by statute and determine whether a fee decrease is necessary to reduce BVE's current surplus.

Recommendation No. 2

The Office of the Governor should fill vacant seats on the Board of Veterinary Examiners in a timely manner.

As of August 31, 2008, one of the veterinarian seats on the board has been vacant since March 2008. A vacancy of even one member on a board of five presents an undue hardship to the remaining board members.

Alaska Statute 08.01.020 states that board members are appointed by the Governor and serve at the pleasure of the Governor. Alaska Statute 08.98.010 states that four members of the board shall be licensed veterinarians who have been in active practice in the state for at least five years preceding appointment and one shall be a public member.

Turnover in the Office of Boards and Commissions has negatively impacted the Governor's ability to make timely appointments to the Board of Veterinary Examiners.

With only four board members[1], the board is continually at risk of not having a quorum and if for any reason, two of the current board members are unable to attend a scheduled meeting or continue as a member, the board will not be able to carry out its responsibilities.

We recommend that the Office of Boards and Commissions, Office of the Governor, fill vacancies on the board in a timelier manner.

[1] Three of the current board members are practicing veterinarians and/or practicing veterinarian/business owners and the public member is a musher/business owner.

ANALYSIS OF PUBLIC NEED

The following analyses of board activities relate to the public need factors defined in AS 44.66.050(c). This analysis was not intended to be comprehensive, but address those areas we were able to cover within the scope of our review.

Determine the extent to which the board, commission, or program has operated in the public interest.

The Board of Veterinary Examiners (BVE or board) has served the public through its examination and licensing of qualified applicants, by adopting regulations to carry out laws governing veterinary practice, and by making licensing decisions and taking disciplinary actions.

Determine the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices that it has adopted, and any other matter, including budgetary, resource, and personnel matters.

The board receives its primary revenue from licensing and renewal fees. Renewals are conducted on a biennial basis creating a two-year cycle in board revenues. The board has proven to be cognizant of expenditures and works to reduce costs when possible.

The BVE licensing fee level has not been reviewed since 2004. Since then, BVE has had a cumulative surplus at the end of every fiscal year from FY 05 to FY 08, see Exhibit 2 on the next page. We recommend that the division review licensing rates and consider changes to fee levels to reduce this cumulative surplus in licensing income, see Recommendation No. 1.

3155

Exhibit 2

Board of Veterinary Examiners
Schedule of License Revenue and Expenditures
As of June 30, 2008
(Unaudited)

	FY 05	FY 06	FY 07	FY 08
Total Revenues	$153,495	$33,149	$158,806	$34,218
Direct Expenditures				
Personal Services	31,688	26,773	26,550	26,009
Travel	6,153	8,605	10,885	10,582
Services	10,439	10,446	4,832	33,462[2]
Commodities	8	54	8	0
Total Direct Expenditures	48,288	45,878	42,275	70,053
Administrative Indirect Costs	20,498	17,160	25,103	22,413
Total Expenditures	68,786	63,038	67,378	92,466
Annual Revenues over (under) Expenditures	84,709	(29,889)	91,428	(58,248)
Beginning Cumulative Surplus (Deficit)	(10,000)[3]	74,709	44,820	136,248
Ending Cumulative Surplus (Deficit)	$74,709	$44,820	$136,248	$78,000

Determine the extent to which the board, commission, or agency has recommended statutory changes that are generally of benefit to the public interest.

From FY 05 – FY 08 the board developed proposed statutory changes and sought legislative sponsorship to introduce a bill. House Bill 297 was introduced, the board chairman testified in support of it, and the bill was signed into law on June 24, 2008 (Chapter 108 SLA 08). This law amended licensing statutes allowing veterinary students in their final year of graduate studies to return to the State to work under the supervision of an Alaska licensed veterinarian. Additionally, this law clarified statutes related to out of state veterinarians performing wildlife services and the use of out-of-state consulting services.

The board has also worked on improvements to the veterinarian regulations. Regulation changes involved:

[2] The increase in FY 08 Services account was primarily due to the large amount of legal fees incurred for interagency legal services.
[3] The beginning cumulative deficit shown in FY 05 was obtained from Department of Commerce, Community, and Economic Development Board of Veterinary Examiners Sunset Review, Audit Control No. 08-20036-05.

- Reducing the passing score for the State's jurisprudence exam[4].
- Addressing time requirements for the division's receipt of applications for the North American Veterinarian Licensing Examination.
- Assessing and restructuring fees for veterinary technician exams.

Determine the extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service that it has provided.

Board meeting dates, times and locations are published both on the State's Online Public Notice system and in the Anchorage Daily News. In addition, the board's licensing examiner notifies all licensees and persons on the interested parties listing she maintains of upcoming board meetings. Board members also encourage their peers to attend. One board member attends the Alaska State Veterinary Medical Association meetings, at his own expense, and gives a BVE report.

Review of the State's Online Public Notice system determined public notice was not given for the board's May 17, 2007, meeting. This omission was caused by staff turnover in the division's publications technician position.

Time was provided at every public meeting for public comment and board meetings are purposely rotated between Fairbanks, Anchorage, and Juneau to give interested parties every opportunity to attend.

Determine the extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

Notice of proposed regulation changes are posted on the State's Online Public Notice system and in the Anchorage Daily News. Proposed regulation changes are subjected to the State's public notice practice. From FY 05 to FY 08 all regulation changes were public noticed.

Determine the efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of victims' rights or the office of the ombudsman have been processed and resolved.

No complaints have been filed with the State Department of Administration's Division of Personnel, the Equal Employment Opportunity Commission, the Human Rights Commission, the State Ombudsman, or the Office of Victim's Rights.

[4] The passing score was lowered from 95% to 90%. The jurisprudence exam tests a licensees understanding of Alaska statutes and regulations governing veterinary practice in Alaska. The exam is an open book test.

From the period of July 1, 2005 through June 19, 2008, 42 veterinarian/veterinarian technician investigation cases were open or opened with the Division of Corporations, Business and Professional Licensing's Office of Consumer Affairs and Investigations Section (OCAI).[5] Cases involving continuing education enforcement are assigned to the division's Juneau Paralegal section but are also assigned a case number by OCAI.

Types of cases open or opened include:

- Violating Professional Ethics (1)
- Unlicensed Practice (9)
- Standard of Care (6)
- Prescriptive Practice (3)
- Negligence (9)
- Licensing Application Problems (3)
- Incompetence (2)
- Fraud/Misrepresentation (3)
- Drug Diversion (1)
- Continuing Education (5)

Of these 42 cases open or opened, 24 were closed in an average of four months time. The disposition of the 24 closed cases were: 12 cases were closed with no action taken; six cases were closed with some licensing action taken; five cases were closed after the investigator had issued an advisement letter; and the final case was closed when the licensee came into compliance with regulations.

Of the remaining 18 open cases, four were assigned to the Juneau Paralegal and involve continuing education issues and a longer time to close, eight cases involve the same individual and are related in nature[6], and six cases remain open. These six cases have been open an average of seven months and have a priority level of 3 or lower[7].

OCAI is effectively investigating complaints and taking disciplinary action when necessary. Additionally, we conclude that the board is operating efficiently by taking necessary enforcement actions and that these actions are both fair and objective.

Determine the extent to which a board or commission that regulates entry into an occupation or profession has presented qualified applicants to serve the public.

Veterinary licensing requirements involve passing national and state examinations. The national examination is developed and graded nationally. The state examination is developed by the board and includes statutory and regulatory material specific to Alaska. This state exam is reviewed continually by the board for updates. In addition, the board and the

[5] The Investigations Unit within the Department of Commerce, Community and Economic Development's Division of Corporations, Business and Professional Licensing was reorganized effective July 1, 2008 as the Office of Consumer Affairs and Investigations.

[6] The Office of Consumer Affairs and Investigations is working to find this individual who may be currently out of state.

[7] Priority levels are defined as:

Level 1 - Incident represents an immediate danger to public,
Level 2 - Incidents which by the severity of their nature dictate a high priority,
Level 3 - Incidents that are less serious in nature and do not appear to constitute immediate or severe pubic danger or serious damages,
Level 4 - Incidents involving failure to comply with statutes or regulations which are discovered through the course of proactive enforcement on the part of the Investigative Unit, but do not meet the criteria of priority 1 - 3. This type of enforcement can only occur when manpower and caseload allow.

Department of Commerce, Community, and Economic Development, Division of Corporations, Business, and Professional Licensing work together to ensure continuing education requirements are met and license renewals are issued only to qualified licensees.

The exhibit below summarizes new licenses and permits issued by the board from FY 05 to FY 08.

Exhibit 3 New Licenses or Permits Issued (Exclusive of Renewals)	FY 05	FY 06	FY 07	FY 08	Current License Holders as of June 30, 2008
Veterinarians	18	17	13	18	296
Veterinary Technicians	20	12	11	17	130
Temporary Permits	7	4	3	8	-
Temporary Licenses	4	2	1	1	-
Courtesy Licenses	51	49	49	53	-

Determine the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

We did not find any evidence that the board was not complying with state personnel practices, including affirmative action in qualifying applicants. Each time the board denied an applicant, the reason for this denial was based on requirements set out in licensing regulations. Applicants are informed in writing of the reason for their denial, their rights, and the process to contest or appeal.

Determine the extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

The majority of current board members are in their second term of service. Board member experience and the efficiency of their licensing examiner have allowed the board to consistently meet their goals. We have not identified any statutory changes necessary for the board to better serve the interests of the public.

Regulatory Changes

In 2008 a controversy arose regarding a possible conflict between a statute and regulation. The controversy centered on whether or not the client confidentiality aspects of 12 AAC 68.100 would impede a veterinarian in reporting animal cruelty under AS 03.55.110 to animal control, the department, or a peace officer when the client may be the perpetrator.

Legislative Affair's Division of Legal and Research Services addressed this controversy by opining:

> *...that there is not a recognized veterinarian-client testimonial privilege or other legal barriers in Alaska statute or regulation that currently serves to prevent a veterinarian from voluntarily reporting a suspected instance of animal cruelty.*

To ensure there is no lingering confusion regarding this issue, on June 13, 2008 the board unanimously approved a motion to initiate a regulation project to amend regulation, 12 AAC 68.100, with the following subsection:

> *...(b) Any veterinarian licensed in this state who reports, in good faith and in the normal course of business, a suspected incident of animal cruelty, as described by law, to the proper authorities shall be immune from liability in any civil or criminal action brought against such veterinarian for report of such incident.*

Other

As of August 31, 2008, one of the veterinarian seats on the board has been vacant since March 2008. Because the board is only five members, having a vacant seat on the board poses potential hardship, see Recommendation No. 2.

Determine the extent to which the board, commission, or agency has effectively attained its objectives and purposes and the efficiency with which the board, commission, or agency has operated.

The objectives adopted by the board are in line with its missions[8]. Major objectives the board has successfully met from FY 05 to FY 08 include:

- updating and distributing the Alaska Board of Veterinary Examiners Handbook annually;
- reviewing and evaluating current statutes and legislative proposals and developing new proposals as needed;
- continuing to license veterinarians and veterinarian technicians and monitoring continuing educations hours; and
- continuing to review and evaluate current regulations and develop new regulations as needed.

[8] The mission of the board is:

> *To protect the health, safety, and welfare of Alaskans by ensuring that veterinarian practitioners possess and maintain a level of skill and knowledge necessary to provide safe, competent professional veterinary services to consumers and to protect the public from veterinary practitioners who pose a risk to the public's health, safety, and welfare.*

Determine the extent to which the board, commission, or agency duplicates the activities of another governmental agency or the private sector.

BVE does not duplicate the activities of another governmental agency or private sector organizations; however BVE collaborates with various state and local agencies/programs.

Within the Department of Environmental Conservation, Division of Environmental Health there is the State Veterinarian program. The relationship between this program and BVE board is one of collaboration rather than duplication. An example of this collaboration is the State Veterinarian providing the board with information for use in its handbook regarding reportable diseases, import/export and shipping regulations, and health certificate information.

We found that membership in the American Veterinary Medical Association (AVMA) is optional for veterinarians. Although most Alaska veterinarians are members of this association, AVMA does not regulate, investigate, or take disciplinary actions against its members. The State's version of the AVMA is the Alaska Veterinary Medical Association (AKVMA). The AKVMA seeks to promote excellence and professionalism of Alaska veterinarians and advance the health and well being of animals. Membership in AKVMA is voluntary and their efforts do not duplicate those of the board.

BVE is a member of the American Association of Veterinary State Boards (AAVSB). Among other duties, AAVSB is the single entity that reports national licensing examination scores to state boards and maintains a national clearinghouse for the approval of continuing education providers. The association with AAVSB merely is complimenting rather than duplicating BVE's efforts.

Lastly, we explored BVE's affiliation with the National Board of Veterinary Medical Examiners (NBVME). NBVME is organized and operated for the purpose of providing standard examinations that may be used by states as part of their licensure procedures for veterinarians. Again, this affiliation is complimenting rather than duplicating BVE's efforts.

OCT 23 2008
LEGISLATIVE AUDIT

Dear Ms. Davidson:

This letter is in response to your September 22, 2008 confidential preliminary audit report on the Board of Veterinary Examiners.

Recommendation No. 2

The Office of the Governor should fill vacant seats on the Board of Veterinary Examiners in a timely manner.

The Office of the Governor concurs with this recommendation. I appreciate your observation that turnover in the Boards and Commissions office may have played a role in the delay. I am pleased to report that the Governor recently made her selection for the vacant veterinarian seat. We find it challenging to find volunteers from the various professions who are willing and able to devote the time necessary to serve on the licensing boards. We will continue to make every effort to fill vacant board and commission positions in a timely manner.

If you need additional information, please contact me at 269-7450.

Sincerely,

Frank Bailey, Director
Boards and Commissions

Division of Legislative Audit
P.O. Box 113300
Juneau, Alaska 99811-3300

Dear Ms. Davidson,

Re: Audit Report, ACN 08-20059-08
Board of Veterinary Examiners

Thank you for allowing us to comment on the Audit Report of the Board of Veterinary Examiners.

We fully agree that the Board has conducted itself in an efficient manner and that the Board should be extended to June 30, 2017.

We concur with your audit findings and recommendations that –

Recommendation No. 1: The Department of Commerce, Community and Economic Development, Division of Corporations, Business and Professional Licensing, in conjunction with the Board of Veterinary Examiners, should review licensing fees as provided by statute and consider decreasing fees.

Staff turnover in the Division did have a negative impact on assessing fees in a timely manner. Fees for the December 2008 renewals are being reduced to utilize some of the surplus of excess revenue and to bring revenue more in line with program costs.

Recommendation No. 2: The Office of the Governor should fill vacant seats on the Board of Veterinary Examiners in a timely manner.

We concur with this recommendation. As noted, the vacancy of even one position on a five member Board does present an undue hardship to the remaining board members and the Division in coordinating actions with the Board on licensing issues.

Thank you again for the opportunity to comment on your audit findings.

Sincerely,

Emil Notti /by CH

ANALYSIS: *(Attach a separate page if necessary)*

This bill extends the Board of Veterinary Examiners to June 30, 2017. In accordance with AS 08.03.020 funding would extend one year following the termination date allowing the Board to conclude its affairs. The FY 2010 funding is included in the Operating Budget request and the costs shown are an average of direct costs for a biennial licensing period.

Travel expenses represent transportation and per diem for the 5 member board and 2 staff to meet at least 3 times each year and to administer licensing examinations as required by AS 08.98.040.

The program is required to cover costs with licensing fees under AS 08.01.065, and revenue generated by board fees are anticipated to cover its full operating costs. New funds are not required to implement this bill.

ANALYSIS: *(Attach a separate page if necessary)*

This bill will increase the number of individuals on the State Vocational Rehabilitation Committee to align with federal regulations by adding three additional seats. Additional costs estimated at $7.5 will result from travel, per-diem, and lodging for the three additional members. The Client Services component will absorb the additional costs within currently budgeted funding.

CS SB 83 (L& C)

An Act relating to the State Vocational Rehabilitation Committee

Sectional Analysis

Section 1 repeals the Governor's Committee on Employment of People with Disabilities (GCEPD). Creates the State Vocational Rehabilitation Committee and describes its purpose.

Section 2 describes the appointment, number, composition of committee members. It states that the number and composition of the committee must consistent with the requirements of 29 U.S.C. 725 and 29 U.S.C. 3003, as amended.

Section 3 addresses the selection and term of the Committee Chair. It eliminates the need for the Governor to appoint the Chair, allowing the voting members of the Committee to make a selection, subject to disapproval by the Governor. Term of Chair is one year.

Section 4 provides for four (4) meetings per year. Meeting may be conducted telephonically.

Section 5 addresses the transition of current members of the GCEPD. Current members, who on the day before the effective date of this Act meet the requirements for membership on the new committee, will continue to serve their original GCEPD term on the new committee until that term would have expired. They may apply to the Governor for reappointment after their term expires.

Section 6 is a new section that changes the heading of art. 2 of AS 23.15 from the "Governor's Committee on Employment of People with Disabilities" to "State Vocational Rehabilitation Committee."

Section 7 provides for an effective date.

February 5, 2010

The Honorable Lyman Hoffman
The Honorable Bert Stedman
Co-Chairs Senate Finance
State Capital Building
Juneau, AK 99801-1182

Dear Senators Hoffman and Stedman,

Thank you for scheduling Senate Bill 83 which establishes a State Vocational Rehabilitation Committee (SVRC) in the Senate Finance Committee. The primary purpose of this legislation is to bring current state statute into compliance with federal law. The SVRC will function as the State Rehabilitation Council and the Assistive Technology Advisory Committee, both of which are required by federal law to accept funding from the U.S. Department of Education, Rehabilitation Services Administration to operate the Vocational Rehabilitation Client Services program and Assistive Technology grant. The SVRC will replace the Governor's Committee on Employment and Rehabilitation of People with Disabilities (GCERPD).

It is important that this legislation pass during this session. The Division of Vocational Rehabilitation is currently undergoing a federal review and monitoring of programs authorized under Title I of the Rehabilitation Act of 1973, as amended. Management and organization of the State Rehabilitation Council is included in this compliance review to determine whether the agency is fully constituted in accordance with federal law and regulations, including membership composition. Current state statutes are not in compliance with the federal laws related to the State Rehabilitation Council or the Assistive Technology Advisory Committee. Current statute was written for a committee that no longer exists, the President's Committee on Employment of People with Disabilities.

The GCERPD will continue to perform the duties of the State Rehabilitation Council and the Assistive Technology Advisory Committee until this matter is resolved. The Division of Vocational Rehabilitation could be sanctioned during the federal review. Similar legislation regarding SVRC was introduced during the 25th Legislative Session.

Federal compliance is critical to assist Alaskans with disabilities to become employed and have access to appropriate assistive technology services and devices. Thank you for your consideration of this important matter. Please contact me or my Legislative Liaison, Paula Scavera at 465-2700 if you would like to discuss this further.

Sincerely,

Clark Bishop

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 23, 2009

The Honorable Gary Stevens
President of the Senate
Alaska State Legislature
State Capitol, Room 111
Juneau, AK 99801-1182

Dear President Stevens:

Under the authority of Article III, Section 18, of the Alaska Constitution, I am transmitting a bill repealing the Governor's committee on employment of people with disabilities, creating the state vocational rehabilitation committee, and relating to the committee.

The purpose of this bill is to eliminate the need to change state law every time federal requirements change the number and or constituency of the membership required for the Governor's committee on employment of people with disabilities and to expand its responsibilities to include the functions of an assistive technology advisory council as required under federal law. Since approximately 70 percent of the financing for the committee comes from the federal government, compliance with federal requirements is necessary.

Assisting those with disabilities in obtaining employment is vital to the economic and social well-being of the state. Given the opportunity, these Alaskans have the ability to contribute significantly to our workforce and to our communities, while granting them financial independence and affirmation of their value to society.

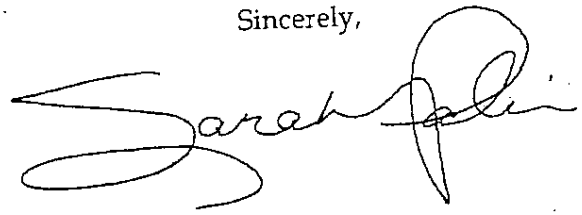
The Governor's committee on employment of people with disabilities has been carrying out the responsibilities of the state rehabilitation council identified in 29 U.S.C. 725, as amended. This bill would replace the existing committee with a federally compliant committee and would allow for adjustments necessary to remain in conformance with federal law without the need for further statute changes. The newly created committee's responsibilities would also include the functions of an assistive technology advisory council required under 29 U.S.C 3001.

The bill would also increase the frequency of meetings of the committee, from a minimum of once each year to four times a year. The bill would allow telephonic participation in committee meetings, and would provide for election of the chair by the committee members, subject to the approval of, rather than appointment by, the Governor.

The bill would also provide a reviser's instruction to change the heading of Article 2 of AS 23.15, to reflect the creation of the new committee.

I urge your prompt and favorable action on this measure.

Sincerely,



Sarah Palin
Governor

Juneau, AK 99801
V/TTY: (907) 465-2814
Fax: (907) 465-2856

January 26, 2010

Dear Senator:

The Governor's Committee on Employment & Rehabilitation of People with Disabilities strongly supports CS Senate Bill 83(L&C). This legislation will bring state statute into compliance with federal law. It will also eliminate the need to change state statute every time federal law changes. This committee will also function as the assistive technology advisory council which is also required under federal law and has similar membership requirements.

The Governor's Committee on Employment and Rehabilitation of People with Disabilities, which operates as Alaska's State Rehabilitation Council, is mandated by 29 U.S.C. 725 as amended, to have a very specific composition that is comprised of employers, service providers and individuals with disabilities. This varied composition provides an avenue for the Division of Vocational Rehabilitation to receive direct public feedback from a variety of stakeholders throughout Alaska. The Division utilizes this valuable feedback to continuously improve and refine its program.

We support the name change of the Governor's Committee on Employment of People with Disabilities to the State Vocational Rehabilitation Committee. Since this committee provides oversight to the Vocational Rehabilitation program, the name will clearly align it with the State of Alaska, Department of Labor and Workforce Development, Division Vocational Rehabilitation. The name change will also reduce the on-going confusion between this committee and the Governor's Council on Disability and Special Education.

Thank you for considering the CS SB 83(L&C). It is important that this committee is compliant with federal law to ensure continued funding which is critical to assist Alaskans with disabilities to become employed and have access to appropriate assistive technology services and devices. Please contact us if we can be of any assistance or provide any additional information.

Sincerely,

Ron Boynton

Senator Bert Stedman
State Capital Building, Room 516
Juneau, AK 99801-1182

Dear Senator Stedman:

Assistive Technology of Alaska (ATLA) strongly encourages you to schedule a hearing for SB 83 as soon as possible.

Our agency is very much in support of SB 83. This legislation will bring state statute into compliance with federal law. It will also eliminate the need to change state statute every time federal law changes. This committee will also function as the assistive technology advisory council as required under federal law.

We support the name change of the Governor's Committee on Employment of People with Disabilities to the State Vocational Rehabilitation Committee. Since this committee provides oversight to the Vocational Rehabilitation program, the name will clearly align it with the State of Alaska, Department of Labor and Workforce Development, Division Vocational Rehabilitation. The name change will also reduce the on-going confusion between this committee and the Governor's Council on Disability and Special Education.

Thank you for considering scheduling a hearing for SB 83. It is important that this committee is compliant with federal law to ensure continued funding which is critical to assist Alaskans with disabilities to become employed and have access to appropriate assistive technology services and devices. Please contact me if I can be of any assistance or provide any additional information.

Sincerely,

Kathy Privratsky
Executive Director

Darwin

RECEIVED
MAR - 9 2009

March 6, 2009

Senator Bert Stedman
State Capital Building, Room 516
Juneau, AK 99801-1182

Dear Senator Stedman:

REACH, Inc. strongly encourages you to schedule a hearing for SB 83 as soon as possible. REACH, Inc. is very much in support of SB 83. This legislation will bring state statute into compliance with federal law. It will also eliminate the need to change state statute every time federal law changes. This committee will also function as the assistive technology advisory council as required under federal law.

We support the name change of the Governor's Committee on Employment of People with Disabilities to the State Vocational Rehabilitation Committee. Since this committee provides oversight to the Vocational Rehabilitation program, the name will clearly align it with the State of Alaska, Department of Labor and Workforce Development, Division Vocational Rehabilitation. The name change will also reduce the on-going confusion between this committee and the Governor's Council on Disability and Special Education.

Thank you for considering scheduling a hearing for SB 83. It is important that this committee is compliant with federal law to ensure continued funding which is critical to assist Alaskans with disabilities to become employed and have access to appropriate assistive technology services and devices. Please contact me if I can be of any assistance or provide any additional information.

Sincerely,

Richard Fagundes
Executive Director

29 USC Sec. 725

-EXPCITE-

TITLE 29 - LABOR
CHAPTER 16 - VOCATIONAL REHABILITATION AND OTHER REHABILITATION SERVICES
SUBCHAPTER I - VOCATIONAL REHABILITATION SERVICES
Part A - General Provisions

-HEAD-

Sec. 725. State Rehabilitation Council

-STATUTE-

(a) Establishment

(1) In general

Except as provided in section 721(a)(21)(A)(i) of this title, to be eligible to receive financial assistance under this subchapter a State shall establish a State Rehabilitation Council (referred to in this section as the "Council") in accordance with this section.

(2) Separate agency for individuals who are blind

A State that designates a State agency to administer the part of the State plan under which vocational rehabilitation services are provided for individuals who are blind under section 721(a)(2)(A)(i) of this title may establish a separate Council in accordance with this section to perform the duties of such a Council with respect to such State agency.

(b) Composition and appointment

(1) Composition

(A) In general

Except in the case of a separate Council established under subsection (a)(2) of this section, the Council shall be composed of -

(i) at least one representative of the Statewide Independent Living Council established under section 796d of this title, which representative may be the chairperson or other designee of the Council;

(ii) at least one representative of a parent training and information center established pursuant to section 671 of the Individuals with Disabilities Education Act [20 U.S.C. 1471];

(iii) at least one representative of the client assistance program established under section 732 of this title;

(iv) at least one qualified vocational rehabilitation counselor, with knowledge of and experience with vocational rehabilitation programs, who shall serve as an ex officio, nonvoting member of the Council if the counselor is an employee of the designated State agency;

(v) at least one representative of community rehabilitation program service providers;

(vi) four representatives of business, industry, and labor;

(vii) representatives of disability advocacy groups representing a cross section of -

(I) individuals with physical, cognitive, sensory, and mental disabilities; and

(II) individuals' representatives of individuals with

disabilities who have difficulty in representing themselves or are unable due to their disabilities to represent themselves;

(viii) current or former applicants for, or recipients of, vocational rehabilitation services;

(ix) in a State in which one or more projects are carried out under section 741 of this title, at least one representative of the directors of the projects;

(x) at least one representative of the State educational agency responsible for the public education of students with disabilities who are eligible to receive services under this subchapter and part B of the Individuals with Disabilities Education Act [20 U.S.C. 1411 et seq.]; and

(xi) at least one representative of the State workforce investment board.

(B) Separate Council

In the case of a separate Council established under subsection (a)(2) of this section, the Council shall be composed of -

(i) at least one representative described in subparagraph (A)(i);

(ii) at least one representative described in subparagraph (A)(ii);

(iii) at least one representative described in subparagraph (A)(iii);

(iv) at least one vocational rehabilitation counselor described in subparagraph (A)(iv), who shall serve as described in such subparagraph;

(v) at least one representative described in subparagraph (A)(v);

(vi) four representatives described in subparagraph (A)(vi);

(vii) at least one representative of a disability advocacy group representing individuals who are blind;

(viii) at least one individual's representative, of an individual who -

(I) is an individual who is blind and has multiple disabilities; and

(II) has difficulty in representing himself or herself or is unable due to disabilities to represent himself or herself;

(ix) applicants or recipients described in subparagraph (A)(viii);

(x) in a State described in subparagraph (A)(ix), at least one representative described in such subparagraph;

(xi) at least one representative described in subparagraph (A)(x); and

(xii) at least one representative described in subparagraph (A)(xi).

(C) Exception

In the case of a separate Council established under subsection (a)(2) of this section, any Council that is required by State law, as in effect on October 29, 1992, to have fewer than 15 members shall be deemed to be in compliance with subparagraph (B) if the Council -

(i) meets the requirements of subparagraph (B), other than the requirements of clauses (vi) and (ix) of such subparagraph; and

(ii) includes at least -

(I) one representative described in subparagraph (B)(vi); and

(II) one applicant or recipient described in subparagraph (B)(ix).

(2) Ex officio member

The Director of the designated State unit shall be an ex officio, nonvoting member of the Council.

(3) Appointment

Members of the Council shall be appointed by the Governor or, in the case of a State that, under State law, vests authority for the administration of the activities carried out under this chapter in an entity other than the Governor (such as one or more houses of the State legislature or an independent board), the chief officer of that entity. The appointing authority shall select members after soliciting recommendations from representatives of organizations representing a broad range of individuals with disabilities and organizations interested in individuals with disabilities. In selecting members, the appointing authority shall consider, to the greatest extent practicable, the extent to which minority populations are represented on the Council.

(4) Qualifications

(A) In general

A majority of Council members shall be persons who are -

(i) individuals with disabilities described in section 705(20)(B) of this title; and

(ii) not employed by the designated State unit.

(B) Separate Council

In the case of a separate Council established under subsection (a)(2) of this section, a majority of Council members shall be persons who are -

(i) blind; and

(ii) not employed by the designated State unit.

(5) Chairperson

(A) In general

Except as provided in subparagraph (B), the Council shall select a chairperson from among the membership of the Council.

(B) Designation by chief executive officer

In States in which the chief executive officer does not have veto power pursuant to State law, the appointing authority described in paragraph (3) shall designate a member of the Council to serve as the chairperson of the Council or shall require the Council to so designate such a member.

(6) Terms of appointment

(A) Length of term

Each member of the Council shall serve for a term of not more than 3 years, except that -

(i) a member appointed to fill a vacancy occurring prior to the expiration of the term for which a predecessor was appointed, shall be appointed for the remainder of such term; and

(ii) the terms of service of the members initially appointed shall be (as specified by the appointing authority

described in paragraph (3)) for such fewer number of years as will provide for the expiration of terms on a staggered basis.

(B) Number of terms

No member of the Council, other than a representative described in clause (iii) or (ix) of paragraph (1)(A), or clause (iii) or (x) of paragraph (1)(B), may serve more than two consecutive full terms.

(7) Vacancies

(A) In general

Except as provided in subparagraph (B), any vacancy occurring in the membership of the Council shall be filled in the same manner as the original appointment. The vacancy shall not affect the power of the remaining members to execute the duties of the Council.

(B) Delegation

The appointing authority described in paragraph (3) may delegate the authority to fill such a vacancy to the remaining members of the Council after making the original appointment.

(c) Functions of Council

The Council shall, after consulting with the State workforce investment board -

(1) review, analyze, and advise the designated State unit regarding the performance of the responsibilities of the unit under this subchapter, particularly responsibilities relating to -

(A) eligibility (including order of selection);

(B) the extent, scope, and effectiveness of services provided; and

(C) functions performed by State agencies that affect or that potentially affect the ability of individuals with disabilities in achieving employment outcomes under this subchapter;

(2) in partnership with the designated State unit -

(A) develop, agree to, and review State goals and priorities in accordance with section 721(a)(15)(C) of this title; and

(B) evaluate the effectiveness of the vocational rehabilitation program and submit reports of progress to the Commissioner in accordance with section 721(a)(15)(E) of this title;

(3) advise the designated State agency and the designated State unit regarding activities authorized to be carried out under this subchapter, and assist in the preparation of the State plan and amendments to the plan, applications, reports, needs assessments, and evaluations required by this subchapter;

(4) to the extent feasible, conduct a review and analysis of the effectiveness of, and consumer satisfaction with -

(A) the functions performed by the designated State agency;

(B) vocational rehabilitation services provided by State agencies and other public and private entities responsible for providing vocational rehabilitation services to individuals with disabilities under this chapter; and

(C) employment outcomes achieved by eligible individuals receiving services under this subchapter, including the availability of health and other employment benefits in connection with such employment outcomes;

(5) prepare and submit an annual report to the Governor and the Commissioner on the status of vocational rehabilitation programs operated within the State, and make the report available to the public;

(6) to avoid duplication of efforts and enhance the number of individuals served, coordinate activities with the activities of other councils within the State, including the Statewide Independent Living Council established under section 796d of this title, the advisory panel established under section 612(a)(20) of the Individuals with Disabilities Education Act [20 U.S.C. 1412(a)(20)], the State Council on Developmental Disabilities established under section 15025 of title 42, the State mental health planning council established under section 300x-3(a) of title 42, and the State workforce investment board;

(7) provide for coordination and the establishment of working relationships between the designated State agency and the Statewide Independent Living Council and centers for independent living within the State; and

(8) perform such other functions, consistent with the purpose of this subchapter, as the State Rehabilitation Council determines to be appropriate, that are comparable to the other functions performed by the Council.

(d) Resources

(1) Plan

The Council shall prepare, in conjunction with the designated State unit, a plan for the provision of such resources, including such staff and other personnel, as may be necessary and sufficient to carry out the functions of the Council under this section. The resource plan shall, to the maximum extent possible, rely on the use of resources in existence during the period of implementation of the plan.

(2) Resolution of disagreements

To the extent that there is a disagreement between the Council and the designated State unit in regard to the resources necessary to carry out the functions of the Council as set forth in this section, the disagreement shall be resolved by the Governor consistent with paragraph (1).

(3) Supervision and evaluation

Each Council shall, consistent with State law, supervise and evaluate such staff and other personnel as may be necessary to carry out its functions under this section.

(4) Personnel conflict of interest

While assisting the Council in carrying out its duties, staff and other personnel shall not be assigned duties by the designated State unit or any other agency or office of the State, that would create a conflict of interest.

(e) Conflict of interest

No member of the Council shall cast a vote on any matter that would provide direct financial benefit to the member or otherwise give the appearance of a conflict of interest under State law.

(f) Meetings

The Council shall convene at least four meetings a year in such places as it determines to be necessary to conduct Council business and conduct such forums or hearings as the Council considers appropriate. The meetings, hearings, and forums shall be publicly announced. The meetings shall be open and accessible to the general

public unless there is a valid reason for an executive session.

(g) Compensation and expenses

The Council may use funds allocated to the Council by the designated State unit under this subchapter (except for funds appropriated to carry out the client assistance program under section 732 of this title and funds reserved pursuant to section 730(c) of this title to carry out part C of this subchapter) to reimburse members of the Council for reasonable and necessary expenses of attending Council meetings and performing Council duties (including child care and personal assistance services), and to pay compensation to a member of the Council, if such member is not employed or must forfeit wages from other employment, for each day the member is engaged in performing the duties of the Council.

(h) Hearings and forums

The Council is authorized to hold such hearings and forums as the Council may determine to be necessary to carry out the duties of the Council.

-REFTEXT-

REFERENCES IN TEXT

The Individuals with Disabilities Education Act, referred to in subsec. (b)(1)(A)(x), is title VI of Pub. L. 91-230, Apr. 13, 1970, 84 Stat. 175, as amended. Part B of the Act is classified generally to subchapter II (Sec. 1411 et seq.) of chapter 33 of Title 20, Education. For complete classification of this Act to the Code, see section 1400 of Title 20 and Tables.

-MISC1-

PRIOR PROVISIONS

A prior section 725, Pub. L. 93-112, title I, Sec. 105, as added Pub. L. 102-569, title I, Sec. 126(a), Oct. 29, 1992, 106 Stat. 4381; amended Pub. L. 103-73, title I, Sec. 107(d)(1), Aug. 11, 1993, 107 Stat. 721, related to State Rehabilitation Advisory Council, prior to the general amendment of this subchapter by Pub. L. 105-220.

AMENDMENTS

2004 - Subsec. (b)(1)(A)(ii). Pub. L. 108-446, Sec. 305(h)(2), substituted "671 of the Individuals with Disabilities Education Act" for "682(a) of the Individuals with Disabilities Education Act (as added by section 101 of the Individuals with Disabilities Education Act Amendments of 1997; Public Law 105-17)".

Subsec. (c)(6). Pub. L. 108-446, Sec. 305(h)(3), substituted "section 612(a)(20)" for "section 612(a)(21)" and "Individuals with" for "Individual with" and struck out "(as amended by section 101 of the Individuals with Disabilities Education Act Amendments of 1997; Public Law 105-17)" before ", the State Council".

2000 - Subsec. (c)(6). Pub. L. 106-402 substituted "the State

Council on Developmental Disabilities established under section 15025 of title 42" for "the State Developmental Disabilities Council described in section 6024 of title 42".

1998 - Subsec. (b)(3). Pub. L. 105-277, Sec. 101(f) [title VIII, Sec. 402(c)(6)(A)], substituted "Governor or, in the case of a State that, under State law, vests authority for the administration of the activities carried out under this chapter in an entity other than the Governor (such as one or more houses of the State legislature or an independent board), the chief officer of that entity" for "Governor" in first sentence and "appointing authority" for "Governor" in second and third sentences.

Subsec. (b)(4)(A)(i). Pub. L. 105-277, Sec. 101(f) [title VIII, Sec. 402(c)(6)(B)], substituted "section 705(20)(B)" for "section 705(20)(A)".

Subsec. (b)(5)(B). Pub. L. 105-277, Sec. 101(f) [title VIII, Sec. 402(c)(6)(C)], substituted "chief executive officer" for "Governor" in heading and "appointing authority described in paragraph (3) shall" for "Governor shall" in text.

Subsec. (b)(6)(A)(ii), (7)(B). Pub. L. 105-277, Sec. 101(f) [title VIII, Sec. 402(c)(6)(D)], substituted "appointing authority described in paragraph (3)" for "Governor".

-End-

-CITE-

29 USC Sec. 3003

-EXPCITE-

TITLE 29 - LABOR
CHAPTER 31 - ASSISTIVE TECHNOLOGY FOR INDIVIDUALS WITH DISABILITIES

-HEAD-

Sec. 3003. State grants for assistive technology

-STATUTE-

(a) Grants to States

The Secretary shall award grants under subsection (b) to States to maintain comprehensive statewide programs of technology-related assistance to support programs that are designed to maximize the ability of individuals with disabilities across the human lifespan and across the wide array of disabilities, and their family members, guardians, advocates, and authorized representatives, to obtain assistive technology, and that are designed to increase access to assistive technology.

(b) Amount of financial assistance

(1) In general

From funds made available to carry out this section, the Secretary shall award a grant to each eligible State and eligible outlying area from an allotment determined in accordance with paragraph (2).

(2) Calculation of State grants

(A) Base year

Except as provided in subparagraphs (B) and (C), the Secretary shall allot to each State and outlying area for a fiscal year an amount that is not less than the amount the State or outlying area received under the grants provided under section 3011 of this title (as in effect on the day before October 25, 2004) for fiscal year 2004.

(B) Ratable reduction

(i) In general

If funds made available to carry out this section for any fiscal year are insufficient to make the allotments required for each State and outlying area under subparagraph (A) for such fiscal year, the Secretary shall ratably reduce the allotments for such fiscal year.

(ii) Additional funds

If, after the Secretary makes the reductions described in clause (i), additional funds become available to carry out this section for the fiscal year, the Secretary shall ratably increase the allotments, until the Secretary has allotted the entire base year amount.

(C) Higher appropriation years

Except as provided in subparagraph (D), for a fiscal year for which the amount of funds made available to carry out this section is greater than the base year amount, the Secretary shall -

(i) make the allotments described in subparagraph (A);

(ii) from a portion of the remainder of the funds after the Secretary makes the allotments described in clause (i), the Secretary shall -

(I) from 50 percent of the portion, allot to each State or outlying area an equal amount; and

(II) from 50 percent of the portion, allot to each State or outlying area an amount that bears the same relationship to such 50 percent as the population of the State or outlying area bears to the population of all States and outlying areas,

until each State has received an allotment of not less than $410,000 and each outlying area has received an allotment of $125,000 under clause (i) and this clause;

(iii) from the remainder of the funds after the Secretary makes the allotments described in clause (ii), the Secretary shall -

(I) from 80 percent of the remainder allot to each State an amount that bears the same relationship to such 80 percent as the population of the State bears to the population of all States; and

(II) from 20 percent of the remainder, allot to each State an equal amount.

(D) Special rule for fiscal year 2005

Notwithstanding subparagraph (C), if the amount of funds made available to carry out this section for fiscal year 2005 is greater than the base year amount, the Secretary may award grants on a competitive basis for periods of 1 year to States or outlying areas in accordance with the requirements of subchapter III of this chapter (!1) (as in effect on the day before October 25, 2004) to develop, support, expand, or administer an alternative financing program.

(E) Base year amount

In this paragraph, the term "base year amount" means the total amount received by all States and outlying areas under the grants described in subparagraph (A) for fiscal year 2004.

(c) Lead agency, implementing entity, and advisory council

(1) Lead agency and implementing entity

(A) Lead agency

(i) In general

The Governor of a State shall designate a public agency as a lead agency -

(I) to control and administer the funds made available through the grant awarded to the State under this section; and

(II) to submit the application described in subsection (d) on behalf of the State, to ensure conformance with Federal and State accounting requirements.

(ii) Duties

The duties of the lead agency shall include -

(I) preparing the application described in subsection (d) and carrying out State activities described in that application, including making programmatic and resource allocation decisions necessary to implement the comprehensive statewide program of technology-related assistance;

(II) coordinating the activities of the comprehensive statewide program of technology-related assistance among public and private entities, including coordinating efforts

related to entering into interagency agreements, and maintaining and evaluating the program; and

(III) coordinating efforts related to the active, timely, and meaningful participation by individuals with disabilities and their family members, guardians, advocates, or authorized representatives, and other appropriate individuals, with respect to activities carried out through the grant.

(B) Implementing entity

The Governor may designate an agency, office, or other entity to carry out State activities under this section (referred to in this section as the "implementing entity"), if such implementing entity is different from the lead agency. The implementing agency shall carry out responsibilities under this chapter through a subcontract or another administrative agreement with the lead agency.

(C) Change in agency or entity

(i) In general

On obtaining the approval of the Secretary, the Governor may redesignate the lead agency, or the implementing entity, if the Governor shows to the Secretary good cause why the entity designated as the lead agency, or the implementing entity, respectively, should not serve as that agency or entity, respectively. The Governor shall make the showing in the application described in subsection (d).

(ii) Construction

Nothing in this paragraph shall be construed to require the Governor of a State to change the lead agency or implementing entity of the State to an agency other than the lead agency or implementing entity of such State as of October 25, 2004.

(2) Advisory council

(A) In general

There shall be established an advisory council to provide consumer-responsive, consumer-driven advice to the State for, planning of, implementation of, and evaluation of the activities carried out through the grant, including setting the measurable goals described in subsection (d)(3).

(B) Composition and representation

(i) Composition

The advisory council shall be composed of -

(I) individuals with disabilities that use assistive technology or the family members or guardians of the individuals;

(II) a representative of the designated State agency, as defined in section 7 of the Rehabilitation Act of 1973 (29 U.S.C. 705) and the State agency for individuals who are blind (within the meaning of section 101 of that Act (29 U.S.C. 721)), if such agency is separate;

(III) a representative of a State center for independent living described in part C of title VII of the Rehabilitation Act of 1973 (29 U.S.C. 796f et seq.);

(IV) a representative of the State workforce investment board established under section 111 of the Workforce Investment Act of 1998 (29 U.S.C. 2821);

(V) a representative of the State educational agency, as defined in section 7801 of title 20; and

(VI) representatives of other State agencies, public

agencies, or private organizations, as determined by the State.

(ii) Majority

(I) In general

A majority, not less than 51 percent, of the members of the advisory council, shall be members appointed under clause (i)(I).

(II) Representatives of agencies

Members appointed under subclauses (II) through (VI) of clause (i) shall not count toward the majority membership requirement established in subclause (I).

(iii) Representation

The advisory council shall be geographically representative of the State and reflect the diversity of the State with respect to race, ethnicity, types of disabilities across the age span, and users of types of services that an individual with a disability may receive.

(C) Expenses

The members of the advisory council shall receive no compensation for their service on the advisory council, but shall be reimbursed for reasonable and necessary expenses actually incurred in the performance of official duties for the advisory council.

(D) Period

The members of the State advisory council shall be appointed not later than 120 days after October 25, 2004.

(E) Impact on existing statutes, rules, or policies

Nothing in this paragraph shall be construed to affect State statutes, rules, or official policies relating to advisory bodies for State assistive technology programs or require changes to governing bodies of incorporated agencies who carry out State assistive technology programs.

(d) Application

(1) In general

Any State that desires to receive a grant under this section shall submit an application to the Secretary, at such time, in such manner, and containing such information as the Secretary may require.

(2) Lead agency and implementing entity

The application shall contain information identifying and describing the lead agency referred to in subsection (c)(1)(A). The application shall contain information identifying and describing the implementing entity referred to in subsection (c)(1)(B), if the Governor of the State designates such an entity.

(3) Measurable goals

The application shall include -

(A) measurable goals, and a timeline for meeting the goals, that the State has set for addressing the assistive technology needs of individuals with disabilities in the State related to -

(i) education, including goals involving the provision of assistive technology to individuals with disabilities who receive services under the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.);

(ii) employment, including goals involving the State

vocational rehabilitation program carried out under title I of the Rehabilitation Act of 1973 (29 U.S.C. 720 et seq.);

(iii) telecommunication and information technology; and

(iv) community living; and

(B) information describing how the State will quantifiably measure the goals to determine whether the goals have been achieved.

(4) Involvement of public and private entities

The application shall describe how various public and private entities were involved in the development of the application and will be involved in the implementation of the activities to be carried out through the grant, including -

(A) in cases determined to be appropriate by the State, a description of the nature and extent of resources that will be committed by public and private collaborators to assist in accomplishing identified goals; and

(B) a description of the mechanisms established to ensure coordination of activities and collaboration between the implementing entity, if any, and the State.

(5) Implementation

The application shall include a description of -

(A) how the State will implement each of the required activities described in subsection (e), except as provided in subsection (e)(6)(A); and

(B) how the State will allocate and utilize grant funds to implement the activities, including describing proposed budget allocations and planned procedures for tracking expenditures for activities described in paragraphs (2) and (3) of subsection (e).

(6) Assurances

The application shall include assurances that -

(A) the State will annually collect data related to the required activities implemented by the State under this section in order to prepare the progress reports required under subsection (f);

(B) funds received through the grant -

(i) will be expended in accordance with this section; and

(ii) will be used to supplement, and not supplant, funds available from other sources for technology-related assistance, including the provision of assistive technology devices and assistive technology services;

(C) the lead agency will control and administer the funds received through the grant;

(D) the State will adopt such fiscal control and accounting procedures as may be necessary to ensure proper disbursement of and accounting for the funds received through the grant;

(E) the physical facility of the lead agency and implementing entity, if any, meets the requirements of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) regarding accessibility for individuals with disabilities;

(F) a public agency or an individual with a disability holds title to any property purchased with funds received under the grant and administers that property;

(G) activities carried out in the State that are authorized under this chapter, and supported by Federal funds received

under this chapter, will comply with the standards established by the Architectural and Transportation Barriers Compliance Board under section 508 of the Rehabilitation Act of 1973 (20 (!2) U.S.C. 794d); and

(H) the State will -

(i) prepare reports to the Secretary in such form and containing such information as the Secretary may require to carry out the Secretary's functions under this chapter; and

(ii) keep such records and allow access to such records as the Secretary may require to ensure the correctness and verification of information provided to the Secretary under this subparagraph.

(7) State support

The application shall include a description of the activities described in paragraphs (2) and (3) of subsection (e) that the State will support with State funds.

(e) Use of funds

(1) In general

(A) Required activities

Except as provided in subparagraph (B) and paragraph (6), any State that receives a grant under this section shall use a portion of the funds made available through the grant to carry out activities described in paragraphs (2) and (3).

(B) State or non-Federal financial support

A State shall not be required to use a portion of the funds made available through the grant to carry out the category of activities described in subparagraph (A), (B), (C), or (D) of paragraph (2) if, in that State -

(i) financial support is provided from State or other non-Federal resources or entities for that category of activities; and

(ii) the amount of the financial support is comparable to, or greater than, the amount of the portion of the funds made available through the grant that the State would have expended for that category of activities, in the absence of this subparagraph.

(2) State-level activities

(A) State financing activities

The State shall support State financing activities to increase access to, and funding for, assistive technology devices and assistive technology services (which shall not include direct payment for such a device or service for an individual with a disability but may include support and administration of a program to provide such payment), including development of systems to provide and pay for such devices and services, for targeted individuals and entities described in section 3002(16)(A) of this title, including -

(i) support for the development of systems for the purchase, lease, or other acquisition of, or payment for, assistive technology devices and assistive technology services; or

(ii) support for the development of State-financed or privately financed alternative financing systems of subsidies (which may include conducting an initial 1-year feasibility study of, improving, administering, operating, providing capital for, or collaborating with an entity with respect to,

such a system) for the provision of assistive technology devices, such as -

(I) a low-interest loan fund;

(II) an interest buy-down program;

(III) a revolving loan fund;

(IV) a loan guarantee or insurance program;

(V) a program providing for the purchase, lease, or other acquisition of assistive technology devices or assistive technology services; or

(VI) another mechanism that is approved by the Secretary.

(B) Device reutilization programs

The State shall directly, or in collaboration with public or private entities, carry out assistive technology device reutilization programs that provide for the exchange, repair, recycling, or other reutilization of assistive technology devices, which may include redistribution through device sales, loans, rentals, or donations.

(C) Device loan programs

The State shall directly, or in collaboration with public or private entities, carry out device loan programs that provide short-term loans of assistive technology devices to individuals, employers, public agencies, or others seeking to meet the needs of targeted individuals and entities, including others seeking to comply with the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.), the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.), and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

(D) Device demonstrations

(i) In general

The State shall directly, or in collaboration with public and private entities, such as one-stop partners, as defined in section 101 of the Workforce Investment Act of 1998 (29 U.S.C. 2801), demonstrate a variety of assistive technology devices and assistive technology services (including assisting individuals in making informed choices regarding, and providing experiences with, the devices and services), using personnel who are familiar with such devices and services and their applications.

(ii) Comprehensive information

The State shall directly, or through referrals, provide to individuals, to the extent practicable, comprehensive information about State and local assistive technology venders, providers, and repair services.

(3) State leadership activities

(A) In general

A State that receives a grant under this section shall use a portion of not more than 40 percent of the funds made available through the grant to carry out the activities described in subparagraph (B). From that portion, the State shall use at least 5 percent of the portion for activities described in subparagraph (B)(i)(III).

(B) Required activities

(i) Training and technical assistance

(I) In general

The State shall directly, or provide support to public or private entities with demonstrated expertise in collaborating with public or private agencies that serve

individuals with disabilities, to develop and disseminate training materials, conduct training, and provide technical assistance, for individuals from local settings statewide, including representatives of State and local educational agencies, other State and local agencies, early intervention programs, adult service programs, hospitals and other health care facilities, institutions of higher education, and businesses.

(II) Authorized activities

In carrying out activities under subclause (I), the State shall carry out activities that enhance the knowledge, skills, and competencies of individuals from local settings described in subclause (I), which may include -

(aa) general awareness training on the benefits of assistive technology and the Federal, State, and private funding sources available to assist targeted individuals and entities in acquiring assistive technology;

(bb) skills-development training in assessing the need for assistive technology devices and assistive technology services;

(cc) training to ensure the appropriate application and use of assistive technology devices, assistive technology services, and accessible technology for e-government functions;

(dd) training in the importance of multiple approaches to assessment and implementation necessary to meet the individualized needs of individuals with disabilities; and

(ee) technical training on integrating assistive technology into the development and implementation of service plans, including any education, health, discharge, Olmstead, employment, or other plan required under Federal or State law.

(III) Transition assistance to individuals with disabilities

The State shall directly, or provide support to public or private entities to, develop and disseminate training materials, conduct training, facilitate access to assistive technology, and provide technical assistance, to assist -

(aa) students with disabilities, within the meaning of the Individuals with Disabilities Education Act (20 U.S.C. 1400 et seq.), that receive transition services; and

(bb) adults who are individuals with disabilities maintaining or transitioning to community living.

(ii) Public-awareness activities

(I) In general

The State shall conduct public-awareness activities designed to provide information to targeted individuals and entities relating to the availability, benefits, appropriateness, and costs of assistive technology devices and assistive technology services, including -

(aa) the development of procedures for providing direct communication between providers of assistive technology and targeted individuals and entities, which may include partnerships with entities in the statewide and local workforce investment systems established under the

Workforce Investment Act of 1998 (29 U.S.C. 2801 et seq.), State vocational rehabilitation centers, public and private employers, or elementary and secondary public schools;

(bb) the development and dissemination, to targeted individuals and entities, of information about State efforts related to assistive technology; and

(cc) the distribution of materials to appropriate public and private agencies that provide social, medical, educational, employment, and transportation services to individuals with disabilities.

(II) Collaboration

The State shall collaborate with entities that receive awards under paragraphs (1) and (3) of section 3005(b) of this title to carry out public-awareness activities focusing on infants, toddlers, children, transition-age youth, employment-age adults, seniors, and employers.

(III) Statewide information and referral system

(aa) In general

The State shall directly, or in collaboration with public or private (such as nonprofit) entities, provide for the continuation and enhancement of a statewide information and referral system designed to meet the needs of targeted individuals and entities.

(bb) Content

The system shall deliver information on assistive technology devices, assistive technology services (with specific data regarding provider availability within the State), and the availability of resources, including funding through public and private sources, to obtain assistive technology devices and assistive technology services. The system shall also deliver information on the benefits of assistive technology devices and assistive technology services with respect to enhancing the capacity of individuals with disabilities of all ages to perform activities of daily living.

(iii) Coordination and collaboration

The State shall coordinate activities described in paragraph (2) and this paragraph, among public and private entities that are responsible for policies, procedures, or funding for the provision of assistive technology devices and assistive technology services to individuals with disabilities, service providers, and others to improve access to assistive technology devices and assistive technology services for individuals with disabilities of all ages in the State.

(4) Indirect costs

Not more than 10 percent of the funds made available through a grant to a State under this section may be used for indirect costs.

(5) Prohibition

Funds made available through a grant to a State under this section shall not be used for direct payment for an assistive technology device for an individual with a disability.

(6) State flexibility

(A) In general

Notwithstanding paragraph (1)(A) and subject to subparagraph

(B), a State may use funds that the State receives under a grant awarded under this section to carry out any 2 or more of the activities described in paragraph (2).

(B) Special rule

Notwithstanding paragraph (3)(A), any State that exercises its authority under subparagraph (A) -

(i) shall carry out each of the required activities described in paragraph (3)(B); and

(ii) shall use not more than 30 percent of the funds made available through the grant to carry out the activities described in paragraph (3)(B).

(f) Annual progress reports

(1) Data collection

States shall participate in data collection as required by law, including data collection required for preparation of the reports described in paragraph (2).

(2) Reports

(A) In general

Each State shall prepare and submit to the Secretary an annual progress report on the activities funded under this chapter, at such time, and in such manner, as the Secretary may require.

(B) Contents

The report shall include data collected pursuant to this section. The report shall document, with respect to activities carried out under this section in the State -

(i) the type of State financing activities described in subsection (e)(2)(A) used by the State;

(ii) the amount and type of assistance given to consumers of the State financing activities described in subsection (e)(2)(A) (who shall be classified by type of assistive technology device or assistive technology service financed through the State financing activities, and geographic distribution within the State), including -

(I) the number of applications for assistance received;

(II) the number of applications approved and rejected;

(III) the default rate for the financing activities;

(IV) the range and average interest rate for the financing activities;

(V) the range and average income of approved applicants for the financing activities; and

(VI) the types and dollar amounts of assistive technology financed;

(iii) the number, type, and length of time of loans of assistive technology devices provided to individuals with disabilities, employers, public agencies, or public accommodations through the device loan program described in subsection (e)(2)(C), and an analysis of the individuals with disabilities who have benefited from the device loan program;

(iv) the number, type, estimated value, and scope of assistive technology devices exchanged, repaired, recycled, or reutilized (including redistributed through device sales, loans, rentals, or donations) through the device reutilization program described in subsection (e)(2)(B), and an analysis of the individuals with disabilities that have benefited from the device reutilization program;

(v) the number and type of device demonstrations and referrals provided under subsection (e)(2)(D), and an analysis of individuals with disabilities who have benefited from the demonstrations and referrals;

(vi)(I) the number and general characteristics of individuals who participated in training under subsection (e)(3)(B)(i) (such as individuals with disabilities, parents, educators, employers, providers of employment services, health care workers, counselors, other service providers, or vendors) and the topics of such training; and

(II) to the extent practicable, the geographic distribution of individuals who participated in the training;

(vii) the frequency of provision and nature of technical assistance provided to State and local agencies and other entities;

(viii) the number of individuals assisted through the public-awareness activities and statewide information and referral system described in subsection (e)(3)(B)(ii);

(ix) the outcomes of any improvement initiatives carried out by the State as a result of activities funded under this section, including a description of any written policies, practices, and procedures that the State has developed and implemented regarding access to, provision of, and funding for, assistive technology devices, and assistive technology services, in the contexts of education, health care, employment, community living, and information technology and telecommunications, including e-government;

(x) the source of leveraged funding or other contributed resources, including resources provided through subcontracts or other collaborative resource-sharing agreements, from and with public and private entities to carry out State activities described in subsection (e)(3)(B)(iii), the number of individuals served with the contributed resources for which information is not reported under clauses (i) through (ix) or clause (xi) or (xii), and other outcomes accomplished as a result of such activities carried out with the contributed resources; and

(xi) the level of customer satisfaction with the services provided.

SENATOR BILL WIELECHOWSKI

Sponsor Statement for SB 87: No Child Left Uninsured

The intent of SB 87 is to make health insurance accessible to all children in Alaska, while asking those families who can afford it to make a substantial financial contribution towards their coverage. By ensuring that all children have access to health services, SB 87 will reduce costs to the state and its citizens over the long run.

An estimated 20,000 children in Alaska lack health insurance and the number is growing. According to the Robert Wood Johnson Foundation, the number of children covered by private health insurance has declined by 31% in the last decade. The vast majority of these children are from working families.

Uninsured children have much higher health risks than do covered children. They are more likely to develop chronic illnesses such as asthma and diabetes and to suffer from acute conditions such as eye and ear infections. While many lack a regular doctor and don't receive preventative care, they are four times more likely than insured children to use emergency rooms when medical attention is needed.

The high cost of this emergency care is often borne by other Alaskans, including businesses that purchase health insurance for their employees. For example, Providence and Alaska Regional hospitals provided $89 million in uncompensated care in 2006. These costs are passed on to other hospital users through higher charges for medical services, which ultimately results in increased premiums. These costs could be reduced by insuring that all children have access to health insurance.

SB 87 raises the eligibility limit for participation in the Denali KidCare program to 200% of the federal poverty level (FPL), currently $36,000/year for a single parent and child. This change puts Alaska in line with other states, 41 of which allow participation by families at or above this level. Roughly 66% of the costs of this program are currently covered by the federal government.

SB 87 would also allow families with incomes up to 300% of the FPL to buy into Denali KidCare using a sliding fee scale for premiums and a 20% co-pay. Those with the greatest means would reimburse the state roughly 90% of its costs. Participants would have to certify that they don't have access to health insurance at work.

With the "No Child Left Uninsured Act," Alaska joins states from Idaho to Illinois that are working to ensure that all children have access to health insurance. Please support this critical legislation.

Testimony of Patricia Senner MS, RN, ANP
SB 13 and SB 87
Denali KidCare Eligibility

My name is Patricia Senner and I am a Family Nurse Practitioner working at Covenant House Alaska. I am speaking today in favor of SB 13 and 87. Just yesterday I had a young teenager in my office who was having problems in her home and both her and her mother agreed they needed family counseling. This is situation was more complicated than the usual adolescent/parent conflict. I was relieved to see that she had Denali KidCare to cover this counseling until her case manager informed me that her mother had said she had recently received a pay raise and so was probably no longer eligible for Denali KidCare.

This is a classic example of why we need to increase the eligibility criteria for Denali KidCare. If we can get proper care for this young teen we may stave off more serious problems in the future that will cost us much more. Her mother in turn, is being punished for working hard to provide for her family.

If we want to solve our current healthcare crisis we need to work together. Individuals, employers and government alone cannot afford health insurance for everyone. We need to pool our resources to provide these needed services. This is why I support SB 87. It allows families with higher incomes to pool their resources with the government's resources to purchase insurance for children.

Along this line I wanted to bring up the fact that I think the Federal SCHIP program allows for states to buy coverage for children from private insurance companies. For instance I think the state could pay for a parent to have their child covered under their insurance at work. People with low incomes usually don't have insurance at work so for the families with incomes below 200% this probably wouldn't be much help. But as we move to cover families with higher incomes we should include this as an option. Families could buy into Denali KidCare or the state could pay to have the child included on the parents insurance at work. This would be a true partnership between the government, families and employers.

WASHINGTON, DC 20510

February 25, 2009

The Honorable Gary Stevens
Senate President
State Capitol, Room 111
Juneau, AK 99801-1182

The Honorable Lyman Hoffman
Co-Chairman, Senate Finance Committee
State Capitol, Room 518
Juneau, AK 99801-1182

The Honorable Bert Stedman
Co-Chairman, Senate Finance Committee
State Capitol, Room 516
Juneau, AK 99801-1182

Dear Senators Stevens, Hoffman and Stedman:

As the Alaska Senate this week resumes committee work on Denali KidCare, I urge your support of proposals to increase the number of children and pregnant women eligible for health insurance under this valuable program. One of my first acts as U.S. Senator was to vote in favor of the Children's Health Insurance Program Reauthorization Act of 2009. The measure also was supported by Senator Lisa Murkowski and Congressman Don Young. Now that Congress has reauthorized and funded the Children's Health Insurance Program (CHIP) for the next five years, it is time to give more Alaska families the chance to qualify for basic health care.

The federal legislation authorizes states to offer coverage for families earning up to 300 percent of the federal poverty level (FPL), and some already do. It is troubling that Alaska – recognized in the early days of Denali KidCare as a national leader for its outreach and signup efforts – is now at only 175 percent of FPL and one of the strictest states in the nation for eligibility.

At a minimum, I urge you and your colleagues to restore Alaska's eligibility guidelines to 200 percent. As you know, that step would return Alaska to 2003 levels and immediately qualify an estimated 1,277 additional children and 218 more pregnant women for Denali KidCare. I and many other Alaskans would celebrate that improvement. However, merely restoring the program to where it was six years ago is not exactly a huge victory for Alaska's families. We can and should do better. I support efforts to increase eligibility levels beyond 200 percent of FPL, including the possibility of an effective but equitable co-pay provision for families that can afford to buy into the program. I applaud your Senate and House colleagues on both sides of the political aisle who are working to improve Alaska's program.

We know the need is great. According to the respected Kaiser Family Foundation, there are more than 21,000 children in Alaska without health insurance. Many are from hard-working families who make too much for regular Medicaid but not enough to afford a private health plan. This results in less preventive care, more sickness and more lost school days. Emergency room visits also increase – last-minute care that is often uncompensated and results in higher insurance premiums and medical costs for everyone.

As you deliberate, let me alleviate concerns about federal support. When President Obama signed the CHIP reauthorization bill earlier this month, he and Congress effectively joined forces to provide states with funding certainty (CHIP is now authorized through FFY2013). That continuity is especially important during these times of economic instability. If families do lose employer-provided health coverage or fall further behind in their efforts to afford private insurance, it is essential that Denali KidCare be available to cover basic health care needs. Coupled with the fact that the federal government is offering financial incentives to states that increase enrollment and will pay up to 70 percent of the total cost of the program (currently estimated at 66 percent in Alaska), this is frankly a very good deal.

Given action by Congress to reauthorize CHIP, the Legislature's obvious interest in this issue and Governor Palin's announced intent to support an expansion of Denali KidCare, it looks as if the stars are finally aligned.

Thank you for your work on this matter. Please feel free to contact me if I can be of assistance.

Sincerely,

Mark Begich
U.S. Senator

ANALYSIS: *(Attach a separate page if necessary)*

This bill raises the income level for existing categories of pregnant women and children under Denali Kidcare to 200% of federal poverty guidelines (FPG) and creates a new category of eligibility for children between 200 and 300% of FPG subject to premiums and co-payments. The bill makes most provisions effective on July 1, 2010.

More than 200 pregnant women and nearly 3,000 children will qualify for medical assistance under this bill. This fiscal note represents the portion of benefit costs paid through the Medicaid Services component.

DHSS Finance Management Services

FISCAL NOTE # 3

STATE OF ALASKA **BILL NO.** SB 87

2009 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

Health Care Services, Medicaid Services component is allocated 2/3 of the total costs for children (reduced by co-payments), all of the costs for pregnant women, and all of the collections for premiums. The Medicaid services component is responsible for all collections of premiums for the entire Medicaid program.

Summary of All Components:
Total additional enrollment/year: 3,197 (2,979 children and 218 pregnant women)
Total additional benefit cost/year less premiums & co-payments: $6,365.6 ($3,657.2 fed/$1,483.0 GF/$1,225.4 SDPR)
Total premiums collected/year: $1,225.4 SDPR
Total co-payment offset/year: $547.7

Assumptions:
176-200% FPG (no cost-sharing): 1,277 children; $1,300 annual benefit cost per person; 65% federal match
176-200% FPG (no cost-sharing): 218 pregnant women; $2,934 annual benefit cost per person; 50% federal
201-250% FPG (premiums): 851 children; $2,780 annual benefit cost per person; 50% federal
251-300% FPG (premiums & co-payments): 851 children; $2,780 annual benefit cost per person; 50% federal

Requiring cost sharing may discourage enrollment. Half as many children in the groups that require premiums or co-payments will enroll compared to the group with no cost sharing. Native families with access to tribal providers will not choose to enroll their children because they can access health care services without paying premiums or making co-payments.

Children in the 176-200% FPG group are assumed to have an annual average cost similar to those in 151-175% FPG. Children above 200% are assumed to have an average cost similar to all Denali KidCare enrollees.

Uninsured children under age 19, between 201% and 300% of the prevailing FPG will be required to pay premiums to the state ranging between $240 and $1,200 per year per child. The average premium across all income groups is $720. Those above 250% FPG will also be responsible for co-payments equal to 20% of the cost of service. Co-payments are payable to the health care provider at the time of service and offset benefit costs. Federal law limits total out-of-pocket expenses to 5% of household income and precludes cost sharing for certain services, such as family planning, hospice and emergency services. The ceiling on cost sharing is not a factor in calculations for this fiscal note. The annual cost per person is expected to be lower than the average out-of-pocket limit; however, some children will likely reach cost sharing limits.

Fund sources are based on historical federal collections. We assume the SCHIP allotment remains at the FFY2009 level. The SCHIP allotment, which receives 65% federal match, is sufficient to fund costs for the additional 1,277 children in the 176-200% FPG group. Costs for the remaining children will be reimbursed at the regular Medicaid match rate of 50%. Pregnant women are not eligible for SCHIP and all their costs will be reimbursed at 50%. Collections for premiums are SDPR. Co-payments are offsets to benefits. Benefit cost projections for 2012 through 2015 assume 6.8% annual growth.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation increases the income standards for covering children and pregnant women under Denali KidCare to 200% of the federal poverty level (FPL), up from 175%.

This legislation also provides new Medicaid coverage for children in higher income categories. To qualify, children must be under age 19, have no insurance coverage, and their family income must be between 200% and 300% of the FPL. Families will be required to pay premiums to the State of Alaska ranging between $240 and $1,200 per year per child. Families with income above 250% of the FPL will also be responsible for co-payments equal to 20% of the cost of their children's medical service, payable to the provider at the time of service.

FISCAL NOTE # 4

STATE OF ALASKA

2009 LEGISLATIVE SESSION

BILL NO. SB 87

ANALYSIS CONTINUATION

Assumptions:

This fiscal note represents the administrative costs for managing the increase in applications, customer service, and eligibility determinations associated with expanding medical assistance coverage for pregnant women and children up to 200% of poverty, and instituting a new program for higher income groups that includes cost sharing. In addition to determining eligiblity based on income and household size, division staff will be required to calcuate the amount of the household's premium obligation, make adjustments to premium payments when household income changes, inform households and the Division of Health Care Services of the amount to be collected, confirm payment of the premium before Medicaid benefits are issued and suspend eligibilty when premiums are not collected. The casework complexity involved with this Medicaid exansion creates the need for additional eligibility staff and administrative support. Lead staff will be needed to provide outreach to medical providers and community service providers and the public to explain the program, initially and ongoing. An analyst is needed for the development of policy and processes and the creation of systems and supports for expanded medical coverage .

We estimate 13 positions will be needed to support this Medicaid program expansion:
2 Administrative Support Staff to provide customer service, manage phone lines, and clerical support ;
5 Eligibility Technicians to make decisions on applications and calculate premiums;
4 Lead Eligibilty Techicians to perform statewide outreach, quality assurance, training on program rules, and other lead worker duties;
1 Eligibility Supervisor to oversee and manage the work of the new staff ; and
1 Public Assistance Analyst for the development and management of the program policy and procedures and creation of systems and supports for the expanded coverage.

Modifications to DPA's Eligibility Information System (EIS) will also be necessary to facilitate the exchange of information between the Division of Public Assistance and the Division of Health Care Services regarding the calculation and payment of premiums .

FY 11- FY15 Total Annual Administrative Costs: $1,179.0

Personal Services: 13 staff at an annual cost of $948.1 (includes salary and benefits)
Travel: $15.0 for statewide outreach activities.
Contractual: $192.4 annual cost for phones/lease ($14.8 x 13 staff)=$192.4.
Supplies: $23.5 which includes $12.0 for Denali KidCare identification cards, renewal forms, and notices; $5.0 for outreach materials; and $6.5 for office supplies ($0.5 x 13 staff = $6.5).

FY10 Start-Up Costs: $691.9

Personal Services: $237.0 One quarter year's funding will be needed in FY10 to hire and train staff in order to be able to accept applications and make eligibility determinations effective July 1, 2010.
Travel: $3.8 to start community , public, and provider awareness about the new program.
Equipment: $150.0 for one time purchases which include a multi-function printer and personal computers, software, and workstations, and associated costs for 13 staff ($20.0 plus $10.0 x 13 = $150.0).
Contractual: $298.1 which includes $250.0 for modifications to DPA's Eligibility Information System (EIS) and $48.1 for phones and space to locate the additional staff.
Supplies: $3.0 for printing applications, outreach materials and office supplies.

ANALYSIS: *(Attach a separate page if necessary)*

This bill raises the income level for existing categories of pregnant women and children under Denali Kidcare to 200% of federal poverty levels (FPL) and creates a new category of eligibility for children between 200% and 300% of FPL subject to premiums and copays.

The Division of Health Care Services estimates that it will need a total of 4 FTE's to collect and manage the premium collection and co-pay activities required by SB087.

FISCAL NOTE # 2

STATE OF ALASKA BILL NO. SB 87

2009 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

System enhancements to the MMIS will cost approximately $150,000. These changes would accommodate the new Federal Poverty Level indicator and co-pay requirements and would be a one time cost in FY2010.

There will be increased referrals to the Department of Law for collections and appeals, this will result in approximately $125,000 in the contractual line starting in FY2011.

The Division of Health care Services anticipates the the following caseload increase from the passage of SB087:

For 176%-200% FPG (no cost-sharing): 1,277 kids and 218 pregnant women.
For premiums at 201%-300% FPG and co-payments at 251%-300% FPG: 851 kids at 201%-250% FPG and 851 kids from 251%-300% FPG
Total SB87 coverage: 3,197

We estimate two Accounting Technician I's, and a Medical Assistant Administrator I position will be needed to manage this additional work beginning in FY2010. In FY2011 a Medical Assistant Administrator II will be needed. The new extended Medicaid program increases complexity of the eligibility determination work and results in increased contact with applicants and enrollees.

Total Administrative Costs:
The increase in Medicaid applications and caseload creates the need for two Accounting Technician I, a Medical Assistant Administrator I, and a Medical Assistant Administrator II, all located in Anchorage. These annual costs are estimated to be:

2 Accounting Technician I's, $142.0 (Range 12 at a cost of $71.0, including benefits, per position).
1 Medical Assistant Administrator I, $89.0 (Range 16 at a cost of $89.0, including benefits, per position).
1 Medical Assistant Administrator II, $101.0 (Range 18 at a cost of $101.0, including benefits, per position).

It is assumed that one quarter year's personal services funding will be needed in FY10 to hire and train staff, the two Accounting Technician I's and the one Medical Assistant Administrator I in the Accounting and Recovery section, at the cost of $100.2, in order to be able to accept applications and make eligibility determinations effective July 1, 2010. The Medical Assistant Administrator II will be filled in FY2011.

With the additional caseload, a one time supplies cost will be incurred in FY2010, for computers and software with a cost of $2.6 for each additional staff for a total of $7.8 for three staff hired in FY2010 and $2.6 in FY2011 for the 4th new position. Annual costs for office space, phones and other contractual costs are calculated at a cost of $9.4, per additional staff for a total of $37.6 (prorated for 1/4 year in FY2010).

One time costs for office furniture (chairs, cubicle partitions, and cubical funiture) for three positions in FY2010 is estimated at $2.5 per person for a total of $7.5. In FY2011 furniture costs is estimated at $2.5.

ANALYSIS: *(Attach a separate page if necessary)*

This bill raises the income level for existing categories of pregnant women and children under Denali Kidcare to 200% of federal poverty guidelines (FPG) and creates a new category of eligibility for children between 200 and 300% of FPG subject to premiums and co-payments. The bill makes most provisions effective on July 1, 2010.

More than 200 pregnant women and nearly 3,000 children will qualify for medical assistance under this bill. This fiscal note represents the portion of benefit costs paid through the Behavioral Health Medicaid Services component.

(continued on page 2)

Prepared by: William J. Streur, Deputy Commissioner
Phone 334-2520

FISCAL NOTE # 1

STATE OF ALASKA BILL NO. SB 87

2009 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

The Behavioral Health Medicaid Services component is allocated 1/3 of the total benefit costs for children (reduced by co-payments). Benefit costs for pregnant women and collections for premiums are reflected in another component (Medicaid Services).

Summary of All Components:
Total additional enrollment/year: 3,197 (2,979 children and 218 pregnant women)
Total additional benefit cost/year less premiums & co-payments: $6,365.6 ($3,657.2 fed/$1,483.0 GF/$1,225.4 SDPR)
Total premiums collected/year: $1,225.4 SDPR
Total co-payment offset/year: $547.7

Assumptions:
176-200% FPG (no cost-sharing): 1,277 children; $1,300 annual benefit cost per person; 65% federal match
176-200% FPG (no cost-sharing): 218 pregnant women; $2,934 annual benefit cost per person; 50% federal
201-250% FPG (premiums): 851 children; $2,780 annual benefit cost per person; 50% federal
251-300% FPG (premiums & co-payments): 851 children; $2,780 annual benefit cost per person; 50% federal

Requiring cost sharing may discourage enrollment. Half as many children in the groups that require premiums or co-payments will enroll compared to the group with no cost sharing. Native families with access to tribal providers will not choose to enroll their children because they can access health care services without paying premiums or making co-payments.

Children in the 176-200% FPG group are assumed to have an annual average cost similar to those in 151-175% FPG. Children above 200% are assumed to have an average cost similar to all Denali KidCare enrollees.

Uninsured children under age 19, between 201% and 300% of the prevailing FPG will be required to pay premiums to the state ranging between $240 and $1,200 per year per child. The average premium across all income groups is $720. Those above 250% FPG will also be responsible for co-payments equal to 20% of the cost of service. Co-payments are payable to the health care provider at the time of service and offset benefit costs. Federal law limits total out-of-pocket expenses to 5% of household income and precludes cost sharing for certain services, such as family planning, hospice and emergency services. The ceiling on cost sharing is not a factor in calculations for this fiscal note. The annual cost per person is expected to be lower than the average out-of-pocket limit, however, some children will likely reach cost sharing limits.

Fund sources are based on historical federal collections. We assume the SCHIP allotment remains at the FFY2009 level. The SCHIP allotment, which receives 65% federal match, is sufficient to fund costs for the additional 1,277 children in the 176-200% FPG group. Costs for the remaining children will be reimbursed at the regular Medicaid match rate of 50%. Pregnant women are not eligible for SCHIP and all their costs will be reimbursed at 50%. Collections for premiums are statutory designated program reciepts. Co-payments are offsets to benefits. Benefit cost projections for 2012 through 2015 assume 6.8% annual growth.

Impact of the Uninsured on the Broader Population

- Hospitals often serve as primary care treatment facilities for those without access to other health care. Providence and Alaska Regional Hospitals in Anchorage report providing $89 million in uncompensated care in 2006. In 2005, the total cost of health care in Alaska for the uninsured (excluding costs paid out-of-pocket by the uninsured) was $125 million (Families USA).

- These costs are passed on to other Alaskans, businesses and government, raising premiums and out-of-pocket expenses for individuals, employers, and the State of Alaska.

- According to new research, private employers in Alaska pay an average of $1,466 more per family and $565 more per individual in health insurance premiums to cover the costs of health care for the uninsured. By 2010, this is expected to increases to $2,248 per family and $857 per individual (Families USA).

- The cost to the State of Alaska of providing health insurance for its 14,786 full-time, executive branch employees is estimated to be $18.9 million higher because health providers shift the cost of caring for the uninsured. (March 2006, Legislative Research Report).

- Some $17 billion is spent in the U.S. annually on unnecessary hospitalizations, according to a 2004 study in *Pediatrics*. The study, which surveyed parents and doctors of children admitted to the hospital, found that 13-46% of the admissions could have been avoided with better care at home or by primary care physicians.

- Nationally, individuals unable to pay medical bills are filing for bankruptcy at unprecedented rates. Between 1980 and 2001, medically driven bankruptcies increased 23 times (American Medical Association, 2005). Half of the 1.5 million American families that filed for bankruptcy in 2001 cited medical bills as the cause (Health Affairs, Feb. 2005).

- The pay-off from providing health insurance for low-income children is substantial. According to governing.com, "Immunizations, annual visits to a pediatrician, dental care, and screening for vision, hearing and developmental problems are all long-term money savers for the health care system as a whole." For example, every $1 spent on a mumps/measles/rubella shot, saves $26, according to Washington State Dept. of Health research.

A Primer on the "No Child Left Uninsured" Act

- The intent of this bill is to make health insurance accessible to all children in Alaska, while asking those families who can afford it to make a meaningful financial contribution towards their coverage.

- The bill raises the eligibility limit for participation in Denali KidCare from 175% to 200% of the federal poverty level (FPL). This was the eligibility limit for the program until 2003, when SB 105 substantially lowered the limit.

- 200% of the FPL is currently $36,000/year for a single parent and child. The FPL is adjusted annually for inflation.

- This proposal puts Alaska in line with other states, 43 of which allow participation by families at or above 200% of the FPL. Eighteen states set the limit at or above 300% of the FPL. Alaska is currently tied for the second lowest eligibility rate in the nation.

- This bill would also allow families with incomes up to 300% of the FPL to buy into Denali KidCare using a sliding fee scale. Many children from working families in Alaska are unable to afford private insurance and go without coverage, which results in poorer health and greater costs in the long-run.

- Premiums for coverage would range from about $240-$1,200 annually depending on income. In addition, a 20% co-pay would be required. (This is still significantly less than the cost of comparable private health insurance.) Parents and/or guardians would have to certify that eligible children do not have other insurance coverage.

- Several states have taken steps in recent years to ensure that all children have access to health insurance. For example, in Connecticut, uninsured children from families making 300% or more of the FPL can buy into "All Kids." In Illinois, coverage is available to any child that has been uninsured for 12 months or more, with the cost determined on a sliding scale basis. Similar proposals under are under consideration in Oregon, Wisconsin, Washington, California and New Mexico, among other states.

Background on Denali KidCare

- Denali KidCare provides health insurance for children through age 18 and pregnant women who meet income guidelines. There is no cost for eligible children, teens and pregnant women. However, youth who are 18 may be required to pay a limited amount for some services.

- Denali KidCare pays for doctor's visits; eye exams and glasses; dental cleanings and fillings; hearing tests and aids; hospital care; speech, physical and mental health therapy; substance abuse treatment; lab tests; prescription drugs; and other care.

- Roughly 7,500 children are covered by Denali KidCare.

- The cost per child of providing this coverage is about $1,300/year.

- In recent calls to private insurers, the cost of a health insurance plan for a family of 3 (pregnant woman with two children) ranged from $8,000-$17,000 annually. Unlike Denali KidCare, this coverage comes with a $500 deductible, 20% co-pay, and no vision, dental or hearing benefits.

- **Alaska has one of the lowest program eligibility rates in the nation** (175% of the FPL). Forty-four states allow participation by families at or above 200% of the FPL. Nineteen have rates at or above 300% of the FPL.

- The federal government currently reimburses 66% of the cost of the Denali KidCare program up to the state's allocated funding level. After that, the reimbursement rate declines to 50%.

- In fiscal year 2006, the cost of Denali KidCare (also known as the State Children's Health Insurance Program) was $25.9 million, of which $18.2 million was paid by the federal government.

Why Coverage for Pregnant Women is Important:

- Alaska has one of the nation's highest documented pregnancy-associated mortality ratios – 58 per 100,000 live births during 1990-1999 (DHSS). National data indicate that women who receive no prenatal care are at increased risk of pregnancy-related death.

- Only 58% of women in Alaska receive adequate prenatal care, compared with 75% nationally.

- Mothers having late or no prenatal care are more likely to have low birth weight or pre-term infants and are at increased risk for pregnancy-related mortality and complications of childbirth (DHSS).

- The average cost of hospital care for a premature baby was $75,000 in 2001, compared with $1,300 for a healthy, full-term infant. The March of Dimes Prenatal Data Center reports that premature babies cost about $13.1 billion annually.

Falling Through the Cracks: The Unmet Health Needs of Alaska's Uninsured Children

- The number of uninsured children in Alaska is estimated to be 19,638 or 10% of the population 18 and under (U.S. Census).
- Over the last decade, Alaska has seen a large decline (31%) in the number of children covered by private health insurance (Robert Wood Johnson Foundation).
- Nationally, more than 80% of uninsured children are from working families (Kaiser Commission on Medicaid and the Uninsured).
- Uninsured children have much higher health risks than do covered children. They receive less preventative care and are diagnosed at more advanced stages of illness (Kaiser Commission on Medicaid and the Uninsured).
- Uninsured children are more likely to develop viral soar throats, eye and ear infections, serious dental problems, and chronic conditions such as asthma and diabetes. They are more than 5 times as likely as insured children to have an unmet need for medical care and 9 times more likely not to have a regular doctor. They are also 4 times more likely to use emergency rooms (*Pediatrics* 105 and 113; Care for Children, *New England Journal of Medicine* 330; The Urban Institute).
- Almost 1/3 of uninsured children received no medical treatment during a 1-year period between 2002 and 2003 (Health Affairs 23, no. 5, September/October 2004).
- Uninsured children are 25% more likely to miss school than insured children (Children's Defense Fund Minnesota). Continued illness affects school performance and, in the long run, workforce participation (Southern Institute on Children and Families). A National Institute of Medicine study indicates that lack of insurance results in lost national economic productivity of $65-$130 billion annually.

This bill raises the income level for existing categories of pregnant women and children under Denali KidCare to 200% of federal poverty levels (FPL) and creates a new category of eligibility for children between 200% and 300% of FPL subject to premiums payments.

The Division of Health Care Services estimates that it will need a total of 2 FTE's to collect and manage the premium collection activities required by SB087.

FISCAL NOTE

STATE OF ALASKA

BILL NO. CSSB087(FIN)

2009 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

The Division of Health Care Services estimates that it will need a total of 2 FTE's to collect and manage the premium collection activities required by SB087. The new extended Medicaid program increases complexity of the eligibility determination work and results in increased contact with applicants and enrollees.

The Division of Health care Services anticipates the following caseload increase from the passage of SB087: For 176%-200% FPG (no cost-sharing): 1,277 kids and 218 pregnant women. For premiums at 201%-300% FPG : 851 kids at 201%-250% FPG and 851 kids from 251%-300% FPG

Total SB87 coverage: 3,197

Medicaid Management Information System (MMIS) Enhancements:
System enhancements to the MMIS will cost approximately $150,000. These changes would accommodate the new Federal Poverty Level indicator and premium requirements and would be a one time cost in FY2011.

Legal Costs:
There will be increased referrals to the Department of Law for collections and appeals. This will result in approximately $62.5 in the contractual line starting in FY2011 (one-half fiscal year) and approximately $125.0 annually.

Administrative Costs:
The increase in Medicaid applications and caseload creates the need for one Accounting Technician I and a Medical Assistance Administrator II, all located in Anchorage. The annual costs are estimated to be:

1 Accounting Technician I, $71.0 (Range 12 at a cost of $71.0, including benefits, per position), $53.3 in FY2011 (three-quarters of FY2011); and 1 Medical Assistant Administrator II, $101.0 (Range 18 at a cost of $101.0, including benefits, per position), $75.8 for FY2011 (three-quarters of FY2011).

With the additional caseload, a one time supplies cost will be incurred in FY2011, for computers and software with a cost of $2.6 for each additional staff for a total of $5.2 for two staff hired in FY2011. Annual costs for office space, phones and other contractual costs are calculated at a cost of $9.4 per additional staff for a total of $18.8, $14.1 for FY2011 (three-quarters of FY2011).

One time costs for office furniture (chairs, cubicle partitions, and cubical funiture) for two positions in FY2011 is estimated at $2.5 per person for a total of $5.0.

The department recognizes that this is a new program with untested parameters. It may be necessary to request additional positions through the normal budgetary process if experience shows additional work effort is required.

ANALYSIS: *(Attach a separate page if necessary)*

This bill raises the income level for existing categories of pregnant women and children under Denali Kidcare to 200% of federal poverty guidelines (FPG) and creates a new category of eligibility for children between 200 and 300% of FPG subject to premiums. This fiscal note assumes that enrollment and benefits will begin January 1, 2011, and that the projected enrollment will be complete within 12 months.

More than 200 pregnant women and nearly 3,000 children will qualify for medical assistance under this bill. This fiscal note represents the portion of benefit costs paid through the Behavioral Health Medicaid Services component.

FISCAL NOTE

STATE OF ALASKA

BILL NO. CSSB087(FIN)

2009 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

The Behavioral Health Medicaid Services component is allocated 1/3 of the total benefit costs for children. Benefit costs for pregnant women and collections for premiums are reflected in another component (Medicaid Services). Benefit costs in FY2011 for this component, prorated for implementation January 1, will be $1,236.3 ($829.0 fed/$407.3 GF).

Summary of Benefits for All Components, first 12 months:
Total additional enrollment/year: 3,197 (2,979 children and 218 pregnant women)
Total additional benefit cost/year: $8,158.5 ($5,442.1.2 fed/$2,716.4 GF)
Total premiums collected/year: $1,225.4 Statutory Designated Program Receipts (SDPR)

Annualized enrollment and per child costs for first 12 months:
176-200% FPG (no cost-sharing): 1,277 children; $1,504 annual benefit cost per person
176-200% FPG (no cost-sharing): 218 pregnant women; $3,396 annual benefit cost per person
201-300% FPG (premiums): 1,702 children; $3,230 annual benefit cost per person

This fiscal analysis assumes that nearly 3200 individuals will enroll in the first 12 months. For children in the 201-300% group, some parents or guardians may be discouraged from enrolling eligible children due to the burden of premium costs. Native families with incomes above 200% FPG and with access to tribal providers will likely not choose to enroll their children because they can access health care services without paying premiums.

Children in the 176-200% FPG group are assumed to have an annual average cost similar to those in 151-175% FPG. Children above 200% are assumed to have an average cost similar to all Denali KidCare enrollees. Benefit cost projections are based on FY2008 average annual per child cost, inflated 5% annually until the first year of implementation. After implementation we assume 6.8% annual growth, which includes inflation and projected trends in population and utilization.

Uninsured children under age 19, between 201% and 300% FPG will be required to pay premiums to the state ranging between $240 and $1,200 per year per child. The average premium across all income groups is $720.

Fund sources are based on historical federal reimbursement rates. We assume the SCHIP allotment, which receives 65% federal match, is sufficient to fund costs for the additional 2,979 children. The FFY2009 allotment is the only amount that is already appropriated. There is some degree of uncertainty if the full amount needed will be available, but it appears likely the SCHIP allotment will remain at or above the FFY2009 level. Pregnant women are not eligible for SCHIP and all their costs will be reimbursed at 50%. Federal financial participation applies to revenues as well as expenditures, therefore, the federal government receives 65% of the premiums collected.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSSB087(FIN)

2009 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

Health Care Services, Medicaid Services component is allocated 2/3 of the total costs for children, all of the costs for pregnant women, and all of the collections for premiums. The Medicaid services component is responsible for all collections of premiums for the entire Medicaid program. Benefit costs in FY2011 for this component, prorated for implementation January 1, will be $2,842.9. Premiums (prorated) will require an appropriation of $612.7 SDPR authority. Federal and GF revenues for this component in 2010, after offset for premiums, will be $1,492.3 Fed and $737.9 GF.

Summary of Benefits for All Components, first 12 months:
Total additional enrollment/year: 3,197 (2,979 children and 218 pregnant women)
Total additional benefit cost/year: $8,158.5 ($5,442.1.2 fed/$2,716.4 GF)
Total premiums collected/year: $1,225.4 Statutory Designated Program Receipts (SDPR)

Annualized enrollment and per child costs for first 12 months:
176-200% FPG (no cost-sharing): 1,277 children; $1,504 annual benefit cost per person
176-200% FPG (no cost-sharing): 218 pregnant women; $3,396 annual benefit cost per person
201-300% FPG (premiums): 1,702 children; $3,230 annual benefit cost per person

This fiscal analysis assumes that nearly 3,200 individuals will enroll in the first 12 months. For children in the 201-300% group, some parents or guardians may be discouraged from enrolling eligible children due to the burden of premium costs. Native families with incomes above 200% FPG and with access to tribal providers will likely not choose to enroll their children because they can access health care services without paying premiums.

Children in the 176-200% FPG group are assumed to have an annual average cost similar to those in 151-175% FPG. Children above 200% are assumed to have an average cost similar to all Denali KidCare enrollees. Benefit cost projections are based on FY2008 average annual per child cost, inflated 5% annually until the first year of implementation. After implementation we assume 6.8% annual growth, which includes inflation and projected trends in population and utilization.

Uninsured children under age 19, between 201% and 300% FPG will be required to pay premiums to the state ranging between $240 and $1,200 per year per child. The average premium across all income groups is $720.

Fund sources are based on historical federal reimbursement rates. We assume the SCHIP allotment, which receives 65% federal match, is sufficient to fund costs for the additional 2,979 children. The FFY2009 allotment is the only amount that is already appropriated. There is some degree of uncertainty if the full amount needed will be available, but it appears likely the SCHIP allotment will remain at or above the FFY2009 level. Pregnant women are not eligible for SCHIP and all their costs will be reimbursed at 50%. Federal financial participation applies to revenues as well as expenditures, therefore, the federal government receives 65% of the premiums collected.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation increases the income standards for covering children and pregnant women under Denali KidCare to 200% of the federal poverty level (FPL), up from 175%.

This legislation also provides new Medicaid coverage for children in higher income categories. To qualify, children must be under age 19, have no insurance coverage, and their family income must be between 200% and 300% of the FPL. Families will be required to pay premiums to the State of Alaska ranging between $240 and $1,200 per year per child.

FISCAL NOTE

STATE OF ALASKA BILL NO. CSSB087(FIN)

2009 LEGISLATIVE SESSION

ANALYSIS CONTINUATION

This fiscal note represents the administrative costs for managing the increase in applications, customer service, and eligibility determinations associated with expanding medical assistance coverage for pregnant women and children up to 200% of poverty, and administering a new program to provide coverage to children in higher income families. In addition to making routine eligibility determinations, the new program will require division staff to calculate premiums and make adjustments to them when household income changes, communicate premium obligations to eligible families and to the Division of Health Care Services, confirm payment of premiums before Medicaid benefits are issued, and suspend coverage when premiums are not collected. The casework complexity involved with this Medicaid expansion creates the need for additional eligibility staff and administrative support.

Assumptions:
States have some flexibility for setting Medicaid premium and payment collection polices. In completing this fiscal analysis we assumed premiums will be calculated at time of enrollment, and will only be adjusted or ended if a household reports a reduction in income. We also assumed a child's Medicaid coverage will be suspended if the household fails to pay their premium payments for two consecutive months, and that any unpaid premiums must be paid before Medicaid coverage is reinstated.

We estimate 9 positions will be needed to support this Medicaid program expansion:
1 Administrative Clerk III to provide customer service, manage phone lines, and perform clerical support;
5 Eligibility Technicians to make decisions on applications, calculate premium payments, and act on changes in household income or other factors affecting a household's eligibility for coverage such as leaving the state;
1 Lead Eligibility Technician to perform quality assurance, training on program rules, and other lead worker duties;
1 Eligibility Supervisor to oversee and manage the work of the new staff ; and
1 Program Coordinator for the development and administration of program policy and processes, the creation of systems and supports for the new expanded program, and to perform outreach.

FY2010 Administrative Costs $278.2
FY2010 costs include start-up funds to hire the Program Coordinator in October 2009 to begin development of the program , establish a plan for outreach, and submit the revised state plan to the federal Dept. of Health & Human Services, Center for Medicare and Medicaid Services (CMS) for approval. FY2010 start-up costs also include funding to begin making modifications to DPA's Eligibility Information System (EIS) that are needed to add premiums to the eligibility process and facilitate the system exchange of information between the Division of Public Assistance and the Division of Health Care Services regarding the calculation and payment of premiums.

FY2011 Administrative Costs $845.5
FY2011 costs include 9 months of funding to hire and train the eligiblity staff, including one-time purchases of equipment for the new positions. FY2011 costs also include funding for final modifications to EIS, outreach, media advertising, supplies, information technology, telecommunications, office space, and phones.

FY2012 - FY2015 Administrative Costs $870.4
Administrative Costs for FY2012 through FY2015 include annual costs for 9 positions, including associated supply costs. These annual costs also include continued funding for outreach and media advertising, information technology, telecommunications, office space, and phones.

88</subject><comm>SFIN26</comm></target>

Senator Lyman Hoffman

Alaska State Legislature

Sponsor Statement for SB 88

Power Cost Equalization (PCE) is the program designed to (1) extend power assistance to rural Alaska as a response to the development of other power around the state and (2) make power more affordable to rural Alaskans. SB 88 proposes to make permanent the changes to the program adopted by the last legislature, which made higher cost power eligible for PCE. This helps Alaskan families continue to afford to buy the electricity that provides the basic services that we all take for granted.

Residents of Alaska whose electricity is generated by oil have seen their power costs increase significantly during the past few years. Last year for example, oil was purchased during the summer when delivery by barge was possible. At that time, they paid the highest price ever recorded. In consequence, though the price of a barrel of oil has plummeted, the cost in the villages continues to reflect the price at which it was purchased - currently over $7.00 per barrel in many communities.

During the previous legislative session, this high cost of electricity was acknowledged by a change in the Power Cost Equalization statute. It recognized the high cost of fuel and the subsequent increase in Power Cost Equalization by increasing the upper limit, the ceiling, of the PCE calculation from 52.5 cents per kilowatt hour to $1.00 per kilowatt hour. This change was for this heating season only, and sunsets on June 30, 2009.

The floor is a weighted average of the cost of power in Anchorage, Fairbanks and Juneau; currently a little over 12 cents per kilowatt. Power Cost Equalization is paid only on the first 500 kilowatts of power used each month. Any use above that does not qualify for PCE. The amount of PCE for each eligible family depends on a calculation which determines a floor and an amount per kilowatt which establishes the ceiling. As noted, the ceiling is now $1.00 but will revert to 52.5 cents if this bill were not to pass. PCE payments are made on any cost for power falling within this band. For many utilities, the cost of producing power now exceeds 52.5 cents per kilowatt. Consequently, for many electric users, reverting to a PCE ceiling of 52.5 cents would mean considerably higher power bills.

Because power costs in many rural communities are approaching the $1.00 per kilowatt range, it is crucial that PCE helps households by making power more affordable, particularly for basic services. To not pass this legislation would mean that many rural families would simply not be able to afford to buy the electricity needed for even the basic services that we take for granted.

ANALYSIS: *(Attach a separate page if necessary)*

This bill continues a maximum $1.00 per kilowatt-hour cap for power costs paid by the PCE program. This fiscal note represents the additional funding needed for the PCE program if the bill passes. The Governor's budget currently contains $32.16 million. The total funding needed if this bill passes is anticipated to be $37.66 million.

SHORT TITLE: POWER COST EQUALIZATION
STATUS DATE: 01/28/09
HEARING: (S) FIN Feb 03 9:00 AM SENATE FINANCE 532 TELECONFERENCE

TITLE: "An Act repealing certain provisions relating to modifying the factors that apply to calculate the amount of power cost equalization; providing for an effective date by repealing the effective date of sec. 3, ch. 2, 4SSLA 2008; and providing for an effective date."

AVCP, Inc.
Testimony to the 26th Alaska State Legislature
Senate Finance Committee
By
Myron P. Naneng, Sr., President

Regarding SB 88

Tuesday, February 3, 2009

Good morning Chairman Hoffman and Co-Chairman Bert Stedman. We at the Association of Village Council Presidents, Inc. (AVCP) are grateful for you to be holding this discussion in order to bring more appropriate energy relief to remote, rural Alaska communities like the 56 villages in our Yukon Kuskokwim region.

My name is Myron Naneng, I am President of our regional non-profit corporation. What we are testifying to today comes as no surprise to either of you, since you tried to address it in the last session through SB 4002. Since early last summer, tribal leaders as well as myself were very nervous about our coming winter since we were forced to prepay our winter fuel purchases for our tank farms at the highest costs of oil on record.

Because we are roadless, all of our villages have to import fuel by barge or by air in emergencies. In most cases, we have no choice but to sign no-fault contracts with fuel vendors if weather or acts of god prevent a scheduled delivery. Some of our villages, with human resources turnover or other constraints, are unable to make their fuel orders in concordance to State programs such as the bulk fuel loan in time to lock in at more agreeable rates. Factors such as these aggravate the already challenging nature of providing light and heat to our communities with little or no energy infrastructure.

Rural Alaska village communities are faced with extremely high costs of living, in particular, the people of the Wade Hampton district are having to pay upwards of $0.62 per kWh for electricity, $7.68 per gallon for heating fuel and, recently upwards of $11.00 for heating fuel that had to be flown into the village of Emmonak when they ran out of fuel. Energy costs are up to 60% or more of household costs for many rural Alaskans in this census district whose average incomes are $30,184. Some households went without electricity and fuel for heat because of the extremely high costs and lack of income to

pay. Clearly, energy costs in rural Alaska makes life unsustainable, and practically unhealthy. The high cost of energy combined with the severe cold winter of 2008 and 2009 is a threat to the general health and wellbeing of the residents of this region.

The villages in our region are extremely remote have great distances from major transportation hubs and commercial centers, have small size and economy of scale, and there are tremendous logistical problems and high costs for transporting fuel for home heating and electricity. This contributes to a high cost of electrical power plants with high capital and operating costs. All the villages in this region are dependent upon diesel fuel for electricity and home heating. It is often the only and best solution when considering the available energy resources, cost for development and deployment, and the small loads often experienced in rural Alaska villages. Diesel-electric power plants provide an efficient and effective energy solution in many cases. PCE provides a buffer against the high costs of electricity.

There have been concerns expressed by some of your colleagues within the Senate and your House counterpart that the subsidy suggested in SB 88 creates an unending entitlement program, that it is an insufficient one-size-fits-all solution to an enduring program. Truthfully, it could be that way should the commercial fisheries continue to collapse; however, the circumstances that brought about this particular energy crisis are unusual. The price of oil topping over $100 a barrel, the commercial salmon fishery on either river no good, but catastrophic on the Lower Yukon, the early freeze-up and particularly hard winter has sopped up whatever energy program and cash most families need for our sub-arctic winters. Because of the poor fishing season, the cash usually generated by that commercial practice was not there to outfit seal, small whale or moose hunting and gathering expeditions that make up most of our winter sustenance.

With continued and full funding by the Legislature of the Renewable Energy Fund coupled with possible federal stimulus infrastructure funds, we may be looking at a reality where accessible energy sources come to fruition in a matter of years, rather than a matter of decades. With affordable energy at the village level, a failed fishing season would not break us as badly as this hard winter has shown.

Though Governor Palin herself has not directly acknowledged the fishery or fuel crisis in our region, in her response to the U.S. Army's reduced retirement payments to 26 Alaska Native Elders who had served in the Territorial Guard during WWII, she argued:

> "Rural Alaskans face the highest food and energy costs in the nation, and these veterans need their retirement checks now more than ever," Governor Palin said. "Using the emergency fund to provide monetary protection for these 26 veterans is the right thing to do."

When arguments on fairness and equality are thrown around, keep in mind, that families with mid-range incomes who live in Anchorage were projected to spend about 3% of their income on energy costs (based on May prices) and that figure increases to about 5% of your income if you live in other cities or towns on Alaska's road system.

Mid-income households in remote villages (places you can only reach by water or plane) were expected to spend about 11% of the paycheck on energy because we rely on diesel fuel, while the majority of Anchorage families use natural gas.

ISER estimates that the median annual cost of power and heating costs for an Anchorage family is about $2,400, compared to about $4,100 for midsize towns and cities and **$6,600 for remote rural villages.**

AVCP provides direct assistance to many families in our member villages that include a Housing Improvement Program, TANF and LIHEAP to name a few. Last year we assisted 1,846 households with energy assistance, and we anticipate the same number if not more appeals for the remainder of this season.

On a related matter, there has been a lot of discussion among regional and tribal entities about heating and lighting village dependent offices that are necessary for operations to the community. When Governor Palin said in her Energy Plan press conference that she had tried to, but failed, to get a hold of people in Emmonak in response to a private citizens appeal for help in the Bristol Bay Times, we were confused as to whom she tried to communicate with. . .the people of Emmonak from the Mayor's office, the tribal council and Nick Tucker all said an hour before in our joint Agency teleconference that their calls were never answered in the Governor's office. It turns out that whatever attempts the Governor's office made - was communicating to a closed up City Office, because the village can't afford to keep the building operational more than one week out of the month. All other entities were operational, all of them frantically calling out for help with the State.

We tried to do this proactively, in public statements and resolutions. We warned that the $1,200 rebate would not adequately address the remote / rural fuel needs - and with the taxes due from as little as $90 to over $300 per person, we will continue to see pain in affected households this year. If we had access to affordable energy sources, all the factors we laid out for you would not have hurt us so badly this winter.

Senator Hoffman's call for the state to make up the difference in the instance where an Alaskan has to pay more than $3 a gallon for residential heating fuel up to 600 gallons purchased per residence from September through March, in addition to SB 88's extension of the PCE program, will go a long way to keeping our homes heated, and saving our families from deciding between freezing or going hungry.

Power Cost Equalization
Questions and Answers

Mike Harper, Deputy Director/Linda MacMillan, Project Accountant

Rural Energy Group, Alaska Energy Authority

February 3, 2009

ALASKA ENERGY AUTHORITY

Power for Rural Alaska
30 year History

- Statewide -almost no transmission in Alaska
  - Chugach Electric owned a line from Beluga through Anchorage to Nikiski
  - Fairbanks relied on local heavy oil and coal
  - Diesel fuel was the primary energy source elsewhere
- Very little hydropower
  - Eklutna – 30 mw, serving ML&P, MEA, CEA
  - Cooper Lake – 20 mw, serving CEA
  - Snettisham – 52 mw, serving Juneau
  - ~20 mw of small projects scattered throughout SE Alaska

Power Development Begins -Oil started flowing down the Pipeline

The State began to spend its newfound wealth

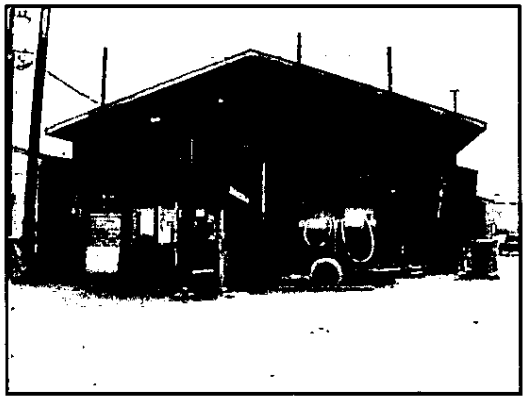
- A transmission line to Fairbanks was started
- The Susitna mega-project design was started - 1981
- The Bradley Lake project was started - 1983
- Kodiak, Valdez, Ketchikan, Wrangell and Petersburg began work on 4 Dam Pool - 1983
- Studies were commissioned to identify projects to reduce the cost of electricity throughout Alaska

Alaska Rural Electrification
The First Assistance program

- Oil prices peaked in 1979
- Diesel-fueled utilities were hit hard
- Legislature established the Power Production Cost Assistance Program in 1980 – a one year stop-gap
- In 1981, the program was amended into the Power Cost Assistance Program, which was designed to self-extinguish in five years

RPSU program: Golovin power house

Golovin Before and After



ALASKA ENERGY AUTHORITY

DENALI COMMISSION ALASKA

Alaska Rural Electrification
And finally - PCE

- There was no silver bullet to cure rural Alaska's electric needs
- Small loads and small communities spread across thousands of miles could not be interconnected
- Legislature established Power Cost Equalization
  - Cost of power was to be equalized to the average of Anchorage, Fairbanks and Juneau – 8.5 cents per kwh
  - PCA was rewritten as PCE – effective October 1984
  - Utilities using diesel to generate at least 75% of power in October 1984 were eligible
  - Costs above 52.5 cents were not covered
  - All users were eligible for the first 700 kwh used

Power Cost Equalization

- Eligible electricity has been reduced 30% to 500 kwh
- Only one meter per resident
- Commercial customers are ineligible for PCE
- Fuel use the same, but cost up 150% since FY00
- FY09 funding ($28 million) is at 100% level
- More utilities crossing through the 52.5 cent ceiling

PCE Program Changes in Recent Years

	2000	2007
Population served	77,625	78,530
Total Sales (gWh)	391	416
Eligible Sales	116	122
Percentage eligible	29.7%	29.2%
Average Fuel Cost/gallon	$1.10	$2.78
Fuel Consumed – million gallons	27.7	27.6
Fuel cost – millions	$30.4	$75.3
Non-fuel cost – millions	$41.5	$67.4
Total PCE Appropriations– millions	$14.4	$25.6
Percent of costs	20%	18%

Qn#1 – Does PCE Reduce Rural Power Cost to Urban Levels?

Residential Power Cost per 2007 PCE Report

Chugach Electric	Anchorage	.1205 kWh
Golden Valley	Fairbanks	.2030 kWh
AEL&P	Juneau	.1140 kWh
Kodiak Electric	Kodiak	.1831 kWh
Kotzebue Electric	Kotzebue	.1881* kWh
AVEC	52 Villages	.2362* kWh
Bettles	Bettles	.2859* kWh
MKEC	5 Villages	.4398* kWh
Napakiak	Napakiak	.6014* kWh

*after PCE

Cost of 700 Residential kwh

• Anchorage	$84.35
• Fairbanks	$142.10
• Juneau	$79.80
• Kodiak	$128.17
• Kotzebue	$171.05*
• AVEC Village	$219.56*
• Bettles	$268.63*
• MKEC	$374.88*
• Napakiak	$489.48*

*After PCE

Qn. #2 – Who gets PCE?

- Every residential consumer
  - Only one meter per consumer
  - Only the first 500 kWh
- Community Facilities
  - Up to 70 kWh/resident per month
    - Streetlights
    - Washeterias
    - Water and sewer facilities
    - Community buildings

Qn. #3 – Who doesn't get PCE?

- Schools
- State facilities
- Federal facilities
- Commercial consumers
- Consumers with seriously delinquent accounts

Qn. #4 – How does PCE work?

- Utility applies to RCA to participate
- Utility submits detailed cost and operational data
- RCA determines eligible costs and computes PCE by rate class
- Utility bills customers per normal tariff rates
- Utility applies PCE credit based upon actual consumption (subject to kWh limit)
- Consumer is responsible to pay bill after PCE credit
- Utility bills state (AEA) for all PCE credited
- Utility provides AEA with detailed billing records
- Utility files annual update of costs with RCA, per schedule established by RCA

Qn#5 – Doesn't PCE discourage Conservation & Innovation?

- Only 29% of all electricity sold in eligible communities receives PCE
- But the smaller the community, the more kwh that are eligible (because of minimal commercial usage)
  - Akiachak 46%
  - Aniak 37%
  - AVEC 48%
  - Cordova 28%
  - Kotzebue 27%
  - Napakiak 72% (School is on own generation)
  - Tanana 38%

Non Fuel Costs –Overhead

- Operating and maintaining power plants
- Operating and maintaining tanks farms
- Operating and maintaining distribution lines
- Connecting customers, billing, collections
- Administration, accounting, engineering, warehouse
- Insurance, depreciation, cost of long-term debt
- Taxes and miscellaneous

Qn#6 – Would PCE Money be better spent on Alternative Energy?

Wind generation costs 6 times diesel generation

- We cannot use 'utility grade' turbines as in Lower 48
- Average village load is ~150 kw
- There are only 1 or 2 manufacturers of 50-100 kw units
- To accommodate sophisticated integration needs, the existing generation and distribution must be upgraded
- Typical cost of an integrated project $4+ million
- Diesel generation and fuel tankage still needed for the 70%+ energy that wind cannot provide

MEMORANDUM January 28, 2009

SUBJECT: Senate Bill 88, repealing delayed amendments to the power cost equalization program in order to make permanent certain formula amendments that were treated as temporary when enacted -- sectional analysis (Work Order No. 26-LS0414\R)

TO: Senator Lyman Hoffman, Co-Chair
Senate Finance Committee

FROM: Jack Chenoweth
Assistant Revisor

Among other additions and amendments, § 2, ch. 2, 4SSLA 2008, temporarily amended the parameters for a community to be eligible to receive power cost equalization payments under the power cost equalization program.[1] For one year, now scheduled to

---

[1] Substantively, § 2, ch. 2, 4SSLA 2008, made changes to AS 42.45.110(c) that increased the maximum allowable kilowatt-hour cost for which power cost equalization payments could be calculated from 52.5 cents to $1.00 per kilowatt hour:

> (c) The amount of power cost equalization provided **for each** [PER] kilowatt-hour under [SUBSECTION] (b) of this section may not exceed 95 percent of the power costs, or the average rate **for each** [PER] eligible kilowatt-hour sold, whichever is less, as determined by the commission. However,
>
> (1) [DURING THE STATE FISCAL YEAR THAT BEGAN JULY 1, 1999,] the power costs for which power cost equalization **are** [WERE] paid to an electric utility **are** [WERE] limited to minimum power costs of more than 12 cents **a** [PER] kilowatt-hour and less than **$1 a** [52.5 CENTS PER] kilowatt-hour;
>
> (2) **each year** [DURING EACH FOLLOWING STATE FISCAL YEAR], the commission shall adjust the power costs for which power cost equalization may be paid to an electric utility based on the weighted average retail residential rate in Anchorage, Fairbanks, and Juneau; however, the commission may not adjust the power costs under this paragraph to reduce the amount below the lower limit set out in (1) of this subsection; and

end June 30, 2009, the standards were relaxed -- made less restrictive. Another provision of that Act, § 3, ch. 2, 4SSLA 2008, effective June 30, 2009, restores the standards to what they were before the temporary adjustment.

The provisions of Senate Bill 88 set aside the provisions of the 2008 Act that would restore the former standards.

Bill section 1 repeals the substantive law provision, sec. 3, ch. 2, 4SSSLA 2008, that, if left unamended, would restore the former factors that apply to calculate the amount of power cost equalization payable under that program.

Bill section 3 repeals the related delayed effective date provision, sec. 11, ch. 2, 4SSLA 2008, that, on June 30, 2009, would provide for restoration of the former factors under that power cost equalization formula. This bill section is, in effect, the repeal of an effective date provision that, under the *Manual of Legislative Drafting*, requires that it be separately set out and noticed in the bill title ("providing for an effective date by repealing the effective date of sec. 3, ch. 2, 4SSLA 2008"). *Manual of Legislative Drafting* at pp. 12 - 13. This change affects an effective date in the earlier bill and requires a two-thirds vote in each house for adoption.

Bill section 2 is a contingency provision so that, if Senate Bill 88 is passed late in the session and is substantially delayed in transmittal to the governor, or the governor otherwise fails to act to approve the bill until at or beyond the June 30, 2009, transitional date, the new provisions are made retroactive so that the legislature's intent (to eliminate the scheduled formula calculation change) is fully and seamlessly carried out.

Bill section 4 gives the measure an immediate effective date and requires a two-thirds vote in each house for adoption.

This sectional analysis was prepared in response to a request from Jay Livey.

JBC:lmb
09-007.lmb

---

(3) the power cost equalization **for each** [PER] kilowatt-hour may be determined for a utility without historical kilowatt-hour sales data by using kilowatt-hours generated.

A related amendment proposed by § 3, ch. 2, 4SSLA 2008, would readjust the maximum allowable, as amended in the last line of AS 42.45.110(c)(1), as shown in the text, from $1 back to the former rate of 52.5 cents.

ANALYSIS: *(Attach a separate page if necessary)*

This bill provides for the Department of Military and Veterans Affairs to pay eligible individuals, each month, who served for in the Alaska Territorial Guard. Monthly pay to each eligible individual is calculated according to the attached spreadsheet (2009 Pay Delta column).

This fiscal note calculation is based on 3 months of payments in FY09 (April 09-June 09) and 8 months of payments in FY10 (July 09-Feb 10) at $10,437.00 per month to 26 eligible individuals. The department anticipates minimal time and cost to process the 26 monthly payments using existing staff.

CS FOR SENATE BILL NO. 89( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATE FINANCE COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to retirement benefits for members of the Alaska Territorial Guard; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ALASKA TERRITORIAL GUARD INTERIM BENEFIT. (a) The department shall pay an interim benefit each month to an individual resident of the state whose monthly federal retirement payment was reduced in April 2009 because the individual's service in the Alaska Territorial Guard was not treated as active service under federal military law.

(b) The amount of the interim benefit to be paid under (a) of this section is the amount by which the individual's monthly federal retirement payment in January 2009 was reduced in April 2009 because the individual's service in the Alaska Territorial Guard was not treated as active service under federal military law.

(c) To be eligible for an interim benefit, an individual shall submit to the department

an application on a form established by the department and provide the department with the information that the department determines is necessary to determine whether the individual is eligible for the interim benefit and to calculate the amount of the interim benefit.

(d) The department shall pay the interim benefit to the individual each month until the federal government begins paying to the individual a monthly federal retirement payment that treats the individual's service in the Alaska Territorial Guard as active service under federal military law.

(e) If an individual receives for the same month both the interim benefit and a federal retirement payment that treats the individual's service in the Alaska Territorial Guard as active service under federal military law, the individual shall reimburse the department for the interim benefit paid for that month.

(f) In this section,

(1) "department" means the Department of Military and Veterans' Affairs;

(2) "federal military law" means 10 U.S.C. 1401 - 1414, 3991 - 3992, or 12731 - 12741;

(3) "federal retirement payment" means a retirement payment under 10 U.S.C. (Armed Forces);

(4) "interim benefit" means the interim benefit authorized under (a) of this section.

*** Sec. 2.** Section 1 of this Act is repealed February 28, 2010.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

RETROACTIVITY. Section 1 of this Act is retroactive to April 1, 2009.

* Sec. 4. This Act takes effect immediately under AS 01.10.070(c).

Congress of the United States

Washington, DC 20515

March 18, 2009

The Honorable Bill Wielechowski
Co-Chair, Joint Armed Services Committee
State Capitol, Room 115
Juneau, AK 99811

The Honorable Nancy Dahlstrom
Co-Chair, Joint Armed Services Committee
State Capitol, Room 411
Juneau, AK 99811

Dear Senator Wielechowski and Representative Dahlstrom:

We write to follow up on the issue of the retirement pay for 26 former members of the Alaska Territorial Guard (ATG).

As you know, in June 2008 these individuals were issued military retirement credit for the period of their service in the Territorial Guard and they began receiving a modest increase in their retirement pay. However, in January 2009, the Defense Finance and Accounting Service (DFAS) stopped the retirement payments, based on a finding that they were erroneously awarded due to a misinterpretation of the law.

We immediately contacted the Secretary of the Army seeking a solution and to his credit, Secretary Pete Geren tapped the Army Emergency and Extraordinary Expense Fund to continue the retirement payments for two months. At the same time, we introduced legislation in Congress providing lifetime retirement pay to these Guardsmen. The regular order in the Congress is to consolidate all defense-related legislation into one defense authorization bill, followed by a defense appropriations bill. Accordingly, it is unlikely that the Congress will consider our legislation until later this year. These bills are usually sent to the President in the summer and fall.

We have been asked by members of the Alaska Legislature whether it would be appropriate for the State to consider a special appropriation representing the difference in retirement pay that each of the 26 would receive if his Territorial Guard service were credited toward military retirement and what each will receive as a result of the January 2009 DFAS reinterpretation for the remainder of calendar year 2009.

3262

COPY ON FILE

We think it is important to maintain the economic safety net for these 26 elders and are supportive of this approach. These payments would serve as a "bridge" so these Guardsmen can continue to receive the modest increase in retirement payments to which we all believe they are entitled while we continue to pursue a permanent solution.

On behalf of these Alaska Territorial Guardsmen, thank you in advance for your consideration of our views.

Sincerely,

Mark Begich	Lisa Murkowski	Don Young
U.S. Senator	U.S. Senator	U.S. Congressman

SPONSOR STATEMENT: SB 92

Under the National Popular Vote interstate compact, electoral votes which are based on the number of U.S. Representatives and U.S. Senators in each state, would be awarded to the national winner, not the state winner. The U.S. Constitution gives the states exclusive and plenary control over the manner of awarding their electoral votes. The winner-take-all rule is not in the Constitution. The fact that Maine and Nebraska award electoral votes by Congressional district, is a reminder that an amendment to the U.S. Constitution is not required to change the way the President is elected.

As of January 2010, this interstate compact has been joined by Hawaii, Illinois, Maryland, New Jersey, and Washington. Their 61 electoral votes amount to 23% of the 270 votes needed for the compact to take effect. The bill has also passed in one or both houses in many states and has continued to gain support nationally.

Because of the current winner-take-all rule, a candidate can, and has won the Presidency Without winning the Most popular votes nationwide. This has occurred in 4 of the nation's 56 presidential elections (and 1 in 7 of the non-landslide elections). In 2004, A shift of fewer than 60,000 votes in Ohio would have defeated President Bush despite his nationwide lead of 3,500,000 votes.

Another shortcoming of the winner-take-all rule is that presidential candidates have no reason to poll, visit, advertise, or organize in states where they are comfortably ahead or hopelessly behind. In 2008, candidates concentrated over two-thirds of their campaign visits and ad money in just six closely divided "battleground" states. A total of 98% went to just 15 states. In other words, voters in two thirds of the states were essentially spectators to the election.

Under the National Popular Vote Interstate Compact bill, all the electoral votes from the enacting states would be awarded, as a bloc, to the presidential candidate who receives the most popular votes in all 50 states (and DC). The bill would take effect only when enacted by states possessing a majority of the electoral votes — that is, enough electoral votes to elect a President (270 of 538).

MEMORANDUM February 2, 2009

SUBJECT: Sectional summary of SB 92 (Work Order No. 26-LS0441/A)

TO: Senator Bettye Davis
Attn: Thomas Obermeyer

FROM: Alpheus Bullard
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Ratifies an interstate compact to elect the President and Vice- President of the United States by national popular vote. Under the compact and the bill, the presidential candidate who receives the most popular votes in all 50 states and the District of Columbia will win the presidency. Under the compact, all of the state's electoral votes would be awarded to the presidential candidate who receives the most popular votes in all 50 states and the District of Columbia. This compact would take effect only when enacted by states possessing a majority of the electoral votes, that is, enough electoral votes to elect a President, which is 270 of 538 electoral votes.

Sections 2 -5. Conform statutes to the changes made by section one of the bill.

12th Amendment

Amendment 12 - Choosing the President, Vice-President. Ratified 6/15/1804.

The Electors shall meet in their respective states, and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;

March 26, 2010

"Agreement Among the States to Elect the President by National Popular Vote"
(SB 92)

The National Popular Vote bill guarantees that the presidential candidate with the most popular votes in all 50 states (and DC) will win the Presidency; every voter in every state will be politically relevant in every presidential election; and every vote will be equal.

The bill has passed 29 legislative chambers in 19 states (Arkansas, California, Colorado, Connecticut, Delaware, Hawaii, Illinois, Maine, Maryland, Massachusetts, Michigan, Nevada, New Jersey, New Mexico, North Carolina, Oregon, Rhode Island, Vermont, and Washington).

The National Popular Vote bill has been enacted by states representing 61 electoral votes — 23% of the 270 necessary to activate the law (Hawaii, Illinois, Maryland, New Jersey, and Washington).

The bill has sponsors in all 50 states and has been endorsed by 1,825 state legislators.

A survey of 800 Alaska voters conducted on January 27–28, 2010 showed 70% overall support for the idea that the President of the United States should be the candidate who receives the most popular votes in all 50 states. Voters were asked "How do you think we should elect the President? Should it be the candidate who gets the most votes in all 50 states, or the current electoral college system?" By political affiliation, support for a national popular vote was 66% among Republicans, 78% among Democrats, 70% among Nonpartisan voters, 82% among Alaska Independent Party voters, and 69% among others. By gender, support was 78% among women and 60% among men. By age, support was 68% among 18-29 year olds, 70% among 30-45 year olds, 70% among 46-65 year olds, and 70% for those older than 65. The survey was conducted by Public Policy Polling, and has a margin of error of plus or minus 3 1/2%.

The shortcomings of the current system stem from the winner-take-all rule (i.e., awarding all of a state's electoral votes to the candidate who receives the most popular votes in each state).

The major shortcoming of the winner-take-all rule is that presidential candidates have no reason to poll, visit, advertise, or organize in states where they are comfortably ahead or hopelessly behind. In 2008, candidates concentrated over two-thirds of their campaign visits and advertising money in just six closely divided "battleground" states. A total of 98% went to just 15 states. Voters in two thirds of the states were essentially spectators to the election.

Alaska is not ignored in presidential elections because it is small. New Hampshire, for example, received 12 of the candidates' 300 post-convention visits in 2008. Meanwhile, the 6 predictably Republican small states (AK, ID, MT, WY, ND, SD) and the 6 predictably Democratic small states (VT, ME, RI, DE, DC, HI) were ignored.

Alaska (like two-thirds of the states) is ignored because the winner-take-all-rule gives presidential candidates no reason to campaign in Alaska (and, therefore, to pay attention to Alaska issues).

Under a national popular vote, every vote in Alaska would matter. In 2004, George W. Bush concentrated on winning the closely divided battleground state of Ohio (which he did, by 118,000 votes). However, Alaska generated a 79,864-vote margin for Bush — over half of Ohio's margin. A vote in Alaska would be as important as a vote in Ohio. Republican presidential candidates would have to pay attention to Alaska voters and issues because the 79,864-vote margin produced in Alaska would matter. Democratic presidential candidates would also have a reason to campaign in Alaska. Independent voters in Alaska would matter because both candidates would be trying to win their votes. A vote in Alaska would become as important as a vote in closely divided battleground states such as New Hampshire or Ohio.

Another shortcoming of the winner-take-all rule is that a candidate can win the Presidency without winning the most popular votes nationwide. This has occurred in 4 of the nation's 56 presidential elections (and 1 in 7 of the non-landslide elections). Moreover, a shift of a handful of votes in one or two states would have elected the second-place candidate in five of the last 12 presidential elections. A shift of fewer than 60,000 votes in Ohio in 2004 would have defeated President Bush despite his nationwide lead of 3,500,000 votes.

The U.S. Constitution gives the states exclusive and plenary control over the manner of awarding their electoral votes. Article II, Section 1, Clause 2 of the U.S. Constitution states:

> "Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors...."

The winner-take-all rule is not in the Constitution. It was not the Founder's choice and was used by only 3 states in the nation's first presidential election in 1789. Maine and Nebraska currently award electoral votes by congressional district — a reminder that an amendment to the U.S. Constitution is not required to change the way the President is elected.

Under the National Popular Vote bill, all the electoral votes from the enacting states would be awarded, as a bloc, to the presidential candidate who receives the most popular votes in all 50 states (and DC). The bill would take effect only when enacted by states possessing a majority of the electoral votes — that is, sufficient electoral votes to elect a President (270 of 538).

The National Popular Vote bill would replace the current system based on which candidate happens to get the most popular votes in each separate state with a system that guarantees the Presidency to the candidate gets the most individual votes in all 50 states (and DC).

State polls show strong support for a national popular vote (AK–70%, AR–80%, CA–70%, CO–68%, CT–74%, DC–76%, DE–75%, ID–77%, IA–75%, KY–80%, ME–77%, MA–73%, MI–73%, MS–77%, MO–70%, NH–69%, NE–74%, NV–72%, NM–76%, NY–79%, NC–74%, OH–70%, OK–81%, PA–78%, RI–74%, SD–75%, UT–70%, VT–75%, VA–74%, WA–77%, WI–71%, and WV–81%). Support is strong in every partisan and demographic group.

The National Advisory Board of National Popular Vote includes former congressmen John Anderson (R–Illinois and later independent presidential candidate), John Buchanan (R–Alabama), Tom Campbell (R–California), and Tom Downey (D–New York) and former Senators Birch Bayh (D–Indiana), David Durenberger (R–Minnesota), and Jake Garn (R–Utah).

Additional information is available in our book *Every Vote Equal: A State-Based Plan for Electing the President by National Popular Vote* and at `www.NationalPopularVote.com`.

Short Explanation

The National Popular Vote bill would guarantee a majority of the Electoral College to the presidential candidate who receives the most popular votes in all 50 states and the District of Columbia. The bill would reform the Electoral College so that the electoral vote in the Electoral College reflects the choice of the nation's voters for President of the United States. more

Sarasota Florida Herald Tribune Editorial

"The most compelling and practical alternative is promoted by a bipartisan group called National Popular Vote. The NPV proposal calls for legislatures to pass bills committing their state's electoral votes to the candidate who receives the most popular votes nationwide; the bill would take effect only when enacted by states that together have enough electoral votes to elect a president. more

Short Explanation

The National Popular Vote bill would guarantee a majority of the Electoral College to the presidential candidate who receives the most popular votes in all 50 states and the District of Columbia. The bill would reform the Electoral College so that the electoral vote in the Electoral College reflects the choice of the nation's voters for President of the United States. more

Sarasota Florida Herald Tribune Editorial

"The most compelling and practical alternative is promoted by a bipartisan group called National Popular Vote. The NPV proposal calls for legislatures to pass bills committing their state's electoral votes to the candidate who receives the most popular votes nationwide; the bill would take effect only when enacted by states that together have enough electoral votes to elect a president. more

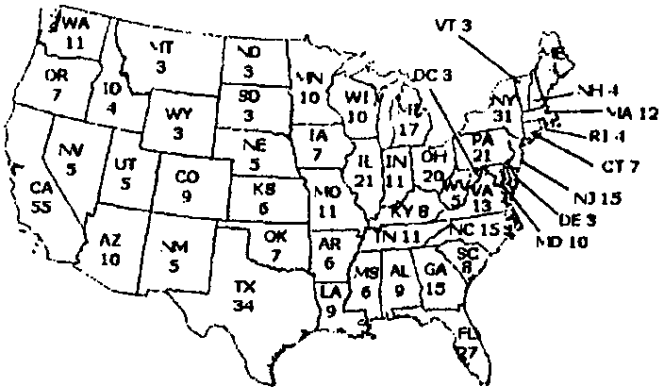
The Electoral College

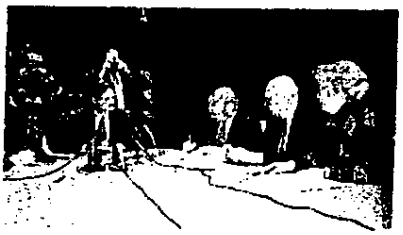


The U.S. Constitution specifies that the President and Vice President of the United States are to be chosen every four years by a small group of people who are individually referred to as "presidential electors." The electors are collectively referred to as the "Electoral College."

The Constitution specifies that each state is entitled to one member of the Electoral College for each of its U.S. Representatives and U.S. Senators. Today, there are a total of 538 electoral votes in the Electoral College. This total corresponds to the 435 U.S. Representatives from the 50 states *plus* the 100 U.S. Senators from the 50 states *plus* the three members of the Electoral College to which the District of Columbia became entitled under the 23rd Amendment (ratified in 1961). Every 10 years, the 435 U.S. Representatives are reapportioned among the states in accordance with the latest federal census, thereby automatically reapportioning the membership of the Electoral College among the states.

Members of the Electoral College are chosen by each state and the District of Columbia on the Tuesday after the first Monday in November in presidential election years. Each political party nominates its own candidates (typically long-standing party activists) for the position of presidential elector.

The 538 members of the Electoral College cast their votes for President and Vice President in meetings held in the 50 state capitals and the District of Columbia in mid-December of presidential election years. If all 538 electors are appointed, 270 electoral votes (i.e., a majority of 538 members of the Electoral College) are required to elect the President and the Vice President.



The three North Dakota members of the Electoral College met on December 15, 2000, in Bismarck to cast their votes for the Bush-Cheney ticket. Gov. John Hoeven (left) observes former Gov. Ed Schafer put his signature to ballot for Electoral College. The other two electors are former state Senator Bryce Streibel of Fressenden and former Lieutenant Governor Rosemarie Myrdal. more

Washington - 11 votes

The three Wyoming members of the Electoral College met in December 1996 in Cheyenne to cast their votes for the Robert Dole for President and Jack Kemp for Vice President.

The table below shows the distribution of electoral votes among the 51 jurisdictions that appoint members of the Electoral College. Because each state has two Senators and at least one Representative, no state has fewer than three members of the Electoral College. The states with the most members of the Electoral College are California (55), Texas (34), and New York (31). There are 13 low-population states with three or four members of the Electoral College. The average number of members of the Electoral College per state is about 11.

The date for the meeting of the Electoral College is established by federal election law (United States Code. Title 3, chapter 1, section 7). In 2004, the designated day for the meeting of the Electoral College was Monday, December 13. This statute was enacted in 1934 after the 20th Amendment changed the date for the presidential inauguration from March 4 to January 20.

The people have the right, under the U.S. Constitution, to vote for U.S. Representatives. The 17th Amendment (ratified in 1913) gave the people the right to vote for U.S. Senators (who were elected by state legislatures under the original Constitution). The people, however, have no federal constitutional right to vote for President or Vice President or for their state's members of the Electoral College. Instead, the Constitution (Article II, section 1, clause 2) provides:

> "Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress...."

As the U.S. Supreme Court observed in the 1892 case of *McPherson v. Blacker*:

> "The constitution does not provide that the appointment of electors shall be by popular vote, nor that the electors shall be voted for upon a general ticket, nor that the majority of those who exercise the elective franchise can alone choose the electors." ...
>
> "In short, the appointment and mode of appointment of electors belong exclusively to the states under the constitution of the United States."

In 2000, the U.S. Supreme Court in *Bush v. Gore* reiterated the principle that the people have no federal constitutional right to vote for President or Vice President or for their state's members of the Electoral College..

> "The individual citizen has no federal constitutional right to vote for electors for the President of the United States unless and until the state legislature chooses a statewide election as the means to implement its power to appoint members of the Electoral College."

The Constitution's delegation of power to the states to choose the manner of selecting their members of the Electoral College is unusually unconstrained. It contrasts significantly with the limitations contained in the Constitution on state power over the manner of conducting congressional elections (Article II, section 4, clause 1).

> "The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by Law make or alter such Regulations...."

In a 1919 case involving a state statute entitled "An act granting to women the right to vote for presidential electors," the Maine Supreme Judicial Court wrote (*In re Opinion of the Justices*):

> "[E]ach state is thereby clothed with the absolute power to appoint electors in such manner as it may see fit, without any interference or control on the part of the federal government, except, of course, in case of attempted discrimination as to race, color, or previous condition of servitude...."

Certificate of Ascertainment showing that Wyoming cast its three electoral votes for the Bush-Cheney ticket because that state received more popular votes in Wyoming than any other state.

Reform the Electoral College so that the electoral vote reflects the nationwide popular vote for President

Endorsed by 1,777 State Legislators

Pennsylvania Rep. Timothy J. Solobay

In addition to 829 state legislative sponsors (shown above), 948 other legislators have cast recorded votes in favor of the National Popular Vote bill.

2. Myths about Small States

(back to Main Table of Contents)

CONTENTS

2 **Myths about Small States**
- 2.1 MYTH: The small states would be disadvantaged by a national popular vote.
- 2.2 MYTH: The small states oppose a national popular vote.
- 2.3 MYTH: The National Popular Vote bill threatens the equal representation of the states in the U.S. Senate.
- 2.4 MYTH: A national popular vote would undermine a partisan advantage in favor of the Republican Party in the small states.

2.1 MYTH: The small states would be disadvantaged by a national popular vote.

The small states are the most disadvantaged group of states under the current system.

Although the small states theoretically benefit from receiving two extra electoral votes corresponding to their U.S. Senators, this "bonus" does not, in practice, translate into political power. Political power in presidential elections comes from being a closely divided battleground state—not from the two-vote bonus conferred on the small states in the Electoral College.

Under the winner-take-all rule (i.e., awarding all of a state's electoral votes to the candidate who receives the most popular votes in each state), candidates have no reason to poll, visit, advertise, organize, or pay attention to the concerns of states where they are comfortably ahead or hopelessly behind. Instead, candidates concentrate their attention on a small handful of battleground states. This means that voters in the vast majority of the states are ignored in presidential elections. In 2004, candidates concentrated over two-thirds of their money and campaign visits in five states; over 80% in nine states; and over 99% of their money in 16 states. In 2008, candidates concentrated over two-thirds of their campaign events and ad money in just states, and 98% in just 15 states.[20]

The reason that the small states are the most disadvantaged group of states under the current system is that almost all of them are one-party states in terms of presidential elections. In the last six presidential elections (1988 through 2008), six of the 13 least populous states (i.e., those with three or four electoral votes) have regularly gone Republican (Alaska, Idaho, Montana, Wyoming, North Dakota, and South Dakota). Six others (Hawaii, Vermont, Maine, Rhode Island, Delaware, and the District of Columbia) have regularly gone Democratic.[21] New Hampshire has been the only battleground state among the 13 smallest states.

The 12 smallest non-competitive states have a combined population of 11.4 million. Because of the bonus of two electoral votes that every state receives, these 12 small states have 40 electoral votes. Coincidentally, Ohio has 11.4 million people. Ohio has 20 electoral votes. That is, the 11 million people in Ohio have "only" 20 electoral votes, whereas the 11 million people in the 12 smallest non-competitive states have 40 electoral votes. However, political power does not arise from the number of electoral votes that a state possesses, but, instead, from whether the state is a closely divided battleground state. The battleground state of Ohio (with "only" 20 electoral votes) received 62 visits in the 2008 presidential election. However, the 12 non-battlegound small states (with their 40 electoral votes) were politically irrelevant. In 2008, the 12 small non-competitive states received no visits, advertising, polling, or policy consideration by presidential candidates because the outcome of the presidential race in those states is generally a foregone conclusion. The winner-take-all rule makes the 11 million people in the closely divided battleground state of Ohio crucial in presidential races, while rendering the 11 million

people in the nation's smallest states irrelevant. This is a situation in which 20 is much more than 40. A national popular vote would make every vote equal throughout the United States. A national popular vote would make a vote cast in a small state as important as a vote cast in Ohio.

Most of the states with five or six electoral votes are similarly non-competitive in presidential elections (and therefore similarly disadvantaged). In fact, of the 22 least populous states (i.e. those with between three and six electoral votes), only New Hampshire (four electoral votes), New Mexico (five electoral votes), and Nevada (five electoral votes) have been battleground states in recent elections.

The fact that the small states are disadvantaged by the current system has been recognized by prominent officials from smaller states. In a 1979 Senate speech, Senator Henry Bellmon (R–Oklahoma) described how his views on the Electoral College had changed as a result of serving as National Campaign Director for Richard Nixon and a member of the American Bar Association's commission studying electoral reform.

> "While the consideration of the electoral college began—and I am a little embarrassed to admit this—I was convinced, as are many residents of smaller States, that the present system is a considerable advantage to less populous States such as Oklahoma. ... As the deliberations of the American Bar Association Commission proceeded and as more facts became known, **I came to the realization that the present electoral system does not give an advantage to the voters from the less populous States. Rather, it works to the disadvantage of small State voters who are largely ignored in the general election for President.**"[22] [Emphasis added]

Senator Robert E. Dole of Kansas, the Republican nominee for President in 1996 and Republican nominee for Vice President in 1976, stated:

> "Many persons have the impression that the electoral college benefits those persons living in small states. I feel that this is somewhat of a misconception. Through my experience with the Republican National Committee and as a Vice Presidential candidate in 1976, it became very clear that the populous states with their large blocks of electoral votes were the crucial states. It was in these states that we focused our efforts.
>
> "Were we to switch to a system of direct election, I think we would see a resulting change in the nature of campaigning. While urban areas will still be important campaigning centers, there will be a new emphasis given to smaller states. **Candidates will soon realize that all votes are important, and votes from small states carry the same import as votes from large states. That to me is one of the major attractions of direct election. Each vote carries equal importance.**
>
> "Direct election would give candidates incentive to campaign in States that are perceived to be single party states.[23] [Emphasis added]

Because so few of the least populous states are battleground states in presidential elections, the current system actually shifts power from voters in the small and medium-sized states to voters in a handful of big states. As early as the spring of 2008, both major political parties acknowledged that there would be at most 14 battleground states (involving only 166 of the 538 electoral votes) in the 2008 presidential election.[24] In other words, two-thirds of the states were regarded as irrelevant under the current system. Among this group of 14 battleground states, Michigan (17 electoral votes), Ohio (20), Pennsylvania (21), and Florida (27) contain over half (85) of the 166 electoral votes. Among the 22 least populous states, only three (i.e., New Hampshire, New Mexico, and Nevada) were among this group of 14 battleground states. These three states contain only 14 of the 166 electoral votes. The net result is that the current system shifts power from voters in the least populous states to voters in a handful of closely divided battleground states (almost all of which are big states).

The facts speak for themselves. Hawaii was the fourth state to enact the National Popular Vote bill. As of 2008, the bill has been approved by a total of seven state legislative chambers in small states, including one house in Maine and both houses in Hawaii, Rhode Island, and Vermont.

The concept of a national popular vote for President is far from being politically "radioactive" in small states. Indeed, the concept of a national popular vote for President is popular in small states. Polls in 2008 showed a high level of support for a nationwide election for President in small states such as Vermont (75%), Maine (71%), New Hampshire (69%), and Rhode Island (74%).[25] These results are consistent with the fact that more than 70% of the American people have favored a nationwide election for President since the Gallup poll started asking this question in 1944. The *Washington Post*, Kaiser Family Foundation, and Harvard University poll in 2007 showed 72% support for direct nationwide election of the President. This recent national result is similar to recent statewide polls in Arkansas (74%), California (70%), Connecticut (73%), Massachusetts (73%), Michigan (73%), Missouri (70%), and Washington (77%). In short, there is very little difference in the level of political support for a national popular vote in small, medium-sized, and large states.

The small states are the most disadvantaged group of states under the current system (as discussed in section 10.2.1 of this book). The fact that the bonus of two electoral votes is an illusory benefit to the small states is not a new revelation. This fact has been widely recognized by the small states for some time. In 1966, Delaware led a group of 12 predominantly low-population states (including North Dakota, South Dakota, Wyoming, Utah, Arkansas, Kansas, Oklahoma, and Iowa) in suing New York in the U.S. Supreme Court. These states argued that New York's use of the winner-take-all rule effectively disenfranchised voters in their states.[26] The Court declined to hear the case (presumably because of the well-established constitutional provision that the manner of awarding electoral votes is exclusively a state decision). Ironically, the defendant (New York) is no longer an influential battleground state (as it was in the 1960s). Today, New York suffers the very same disenfranchisement as most of the less populous states because it too has become politically non-competitive. Today, a vote in New York is equal to a vote in Wyoming—votes in both are equally irrelevant in presidential elections.

The Electoral College is not the bulwark of influence for the small states in the U.S. Constitution. The 13 smallest states (with 3% of the nation's population) have 25% of the votes in the U.S. Senate—a very significant source of political clout. However, the 13 smallest states (i.e., those with three or four electoral votes) have only 26 extra votes in the Electoral College by virtue of the two-vote bonus—not a large number in relation to the total of 538 electoral votes. Although the 13 smallest states cast 3% of the nation's popular vote while possessing 6% of the electoral votes, the extra 3% is a minor numerical factor in the context of a presidential election. More significantly, this small theoretical advantage is eradicated by the fact that the small states are equally divided between the two major political parties and because the one-party character of the small states makes 12 out of 13 of them irrelevant in presidential elections. In fact, the bulwark of influence for the small states is the equal representation of the states in the U.S. Senate—not the small number of additional electoral votes that they have in the Electoral College.

2.3 MYTH: The National Popular Vote bill threatens the equal representation of the states in the U.S. Senate.

Equal representation of the states in the U.S. Senate is explicitly established in the U.S. Constitution. This feature of the U.S. Constitution cannot be changed by state law. In fact, it may not even be amended by an ordinary federal constitutional amendment. Instead, this feature of the U.S. Constitution may only be changed by unanimous consent of all 50 states.[27] In contrast, the U.S. Constitution explicitly assigns the power to choose the manner of electing the President to the state legislatures. The adoption by a state legislature of the National Popular Vote bill is an exercise of a legislature's existing powers under the U.S. Constitution. Such action has no impact or bearing on the constitutional provisions concerning representation in the U.S. Senate.

2.4 MYTH: A national popular vote would undermine a partisan advantage in favor of the Republican Party in the small states.

The small state issue sometimes serves as a surrogate for the unstated political concern (and misconception) that the small states confer a partisan advantage in favor of the Republican Party. However, this belief does not reflect current political reality. In the last six presidential elections (1988 through 2008), six of the 13 least populous states have regularly gone

Republican (Alaska, Idaho, Montana, Wyoming, North Dakota, and South Dakota), while six others (Hawaii, Vermont, Maine, Rhode Island, Delaware, and the District of Columbia) have regularly gone Democratic.[28] New Hampshire has been, in recent years, the one closely divided battleground state among the 13 smallest states (having supported the Democrat in 1992 and 1996, the Republican in 2000, and the Democrat in 2004 and 2008).

Interestingly, the 12 smallest non-competitive states actually confer a slight political advantage on the Democratic presidential candidate. For example, in 2004, John Kerry won 21 electoral votes from his 444,115-vote lead in the six non-competitive Democratic small states, whereas George W. Bush won only 19 electoral votes from his 650,421-vote lead in the six non-competitive Republican small states. The reason that the Democrats enjoy a partisan advantage in presidential elections in the smallest states is that the six regularly Republican small states are very heavily Republican (Alaska 64%, Idaho 69%, Montana 61%, Wyoming 70%, North Dakota 64%, and South Dakota 61%). In contrast, the Democrats carried three of their six small states (Delaware, Hawaii, and Maine) with only 54% of the vote. A 54% margin is generally viewed as placing a state safely out of reach for the opposition during a typical presidential campaign;[29] however, 54% is considerably less than the Republican Party's margin in their six small states. In two additional states (Vermont and Rhode Island), the Democrats won with 60% of the vote (again a smaller margin than the Republican Party's margin in their six small states). If the boundaries of the small states had been recently drawn, there would be accusations that the boundaries were a Democratic gerrymander.

[29] Although there is no universally accepted definition of a battleground state, battleground states are, more or less, those in which the spread between the top two candidates is less than 8%.

Hartford Courant.

For National Popular Vote

Hartford Courant editorial
March 2, 2008

Connecticut, to everyone's surprise, was in play during the Super Tuesday primaries. Three major candidates visited the state.

But that may not happen in the run-up to the November general election (minus a quick fundraising visit or two to Fairfield County). If, say, the state is considered safe for the Democrats, neither candidate will feel the need to campaign here. The same thing is likely to happen in two-thirds of the other states.

Our system of electing the president and vice president is flawed and archaic. There is a way to change it without amending the U.S. Constitution. The states can simply agree to give their electoral votes — regardless of who wins each state's popular vote — to the winner of the national popular vote. There is a serious proposal to adopt the "National Popular Vote" plan here and across the country. It's worth supporting.

Connecticut Often Ignored

The problem with the present system is the winner-take-all rule used in 48 states. In all states except Maine and Nebraska, the candidate who wins the state's popular vote gets all of the state's electoral votes.

So if a candidate is assured of winning, say, 55 percent of the popular vote, the campaign is over. He or she will get all the electoral votes, and there's no point in trying to get more votes, nor is there any point in the losing candidate losing by fewer votes. Although it's possible that the losing candidate could try to reverse the numbers, what almost always happens is that both candidates put their money and time into battleground states.

According to the FairVote organization, 99 percent of the campaign advertising money in the 2004 presidential election was spent in just 17 states, and 92 percent of the campaign visits were in only 16 states. Issues in those states are thrust to the fore, at the expense of whatever Connecticut and other less-noticed states are concerned about. Federal grants tend to find their way to contested states, especially as elections near.

The way we elect presidents now thwarts the democratic principle of majority rule. Four times in our nation's history, most recently in 2000, a president has won the office while losing the popular vote. It almost happened in a number of other elections. A shift of only 60,000 votes in Ohio would have given the 2004 election to John Kerry, despite President George W. Bush's 3.5 million-vote lead in the popular tally.

Also, the lack of a meaningful campaign depresses voter turnout, which in turn makes things worse for the minority party.

Reformers have been trying to scuttle the Electoral College system for at least 50 years. Twice in the 1970s, a proposed constitutional amendment passed one house of Congress, only to be blocked by beneficiaries of the current system. It is difficult, as it should be, to amend the U.S. Constitution. But because states have the power to allocate their electoral votes, some clever folks have come up with another way around the block.

Change How States Use Votes

The National Popular Vote creates a compact. All of the states that join agree to give their electoral votes to the candidate who receives the most popular votes in all 50 states and the District of Columbia. The compact only kicks in when enacted by states possessing a majority of the electoral votes — 270 of 538, enough to elect a president.

The bill has passed in two states, Maryland and New Jersey, and is in the pipeline in more than 40 other states, including Connecticut. The bill, which failed to pass last year, has been introduced again, and backers say it has a better chance of passage this year.

Support is not universal. Critics such as Gov. Arnold Schwarzenegger, who vetoed the bill after it passed both houses in the California legislature, object to the possibility that a state could give its electoral votes to a candidate it didn't support.

Others in favor of the devil-we-got say the new method could increase the cost of elections and focus campaigning on population centers at the expense of rural areas.

Those points are well-taken, but the positives of National Popular Vote outweigh the negatives. There are no other indirect elections left in government; they are a relic of the past. The Electoral College was supposed to help small-population states (and Southern states where slaves couldn't vote), but most small population states aren't in play on Election Day. That the 2000 election was hanging on hanging chads was absurd.

If a million votes in Connecticut count as much as a million votes in Ohio, we'll see the candidates again. National Popular Vote is worth a try.

The New York Times

Maryland Takes the Lead

New York Times Editorial
April 14, 2007

As the nation braces for a long and numbing presidential election, the State of Maryland has done voters a favor by rejecting the Electoral College as a fossil in need of a democratic makeover. Gov. Martin O'Malley and the Annapolis legislature made the state the first in the nation to decide that its Electoral College members should someday be required to vote for the presidential candidate chosen by a plurality of the nation's voters, not according to the state's parochial tally.

The change would not take effect until it won final acceptance by enough states to amount to a 270-vote majority in the college. (Maryland has 10 votes.) But it is something all Americans would benefit from, particularly the masses of voters routinely ignored when candidates focus on a few battleground states — just 16 in 2004 — that increasingly settle modern campaigns.

The need to scrap the creaky college machinery was made clear in the angst of the 2000 election. George W. Bush lost the popular election by almost 544,000 votes, yet won in a Supreme Court showdown over Florida's electors that hinged on far fewer disputed state ballots. Four years later, it was Mr. Bush's turn to sweat as he handily won the national vote yet came close to losing Ohio — and the White House — in the college's arcane state-by-state fragmentation of the popular majority.

The reform movement, driven by a bipartisan coalition called National Popular Vote, has a long way to go. But Hawaii is close to approval, and hundreds of legislators are sponsoring the change in more than 40 other states. It is an ingenious way around the fact that the alternative strategy of trying to amend the Constitution would require the approval of three-fourths of the states, leaving veto power in the hands of smaller states over-represented in the college.

The objection that reform would mean that rural interests would be ignored is a canard. The change would require candidates to present positions that galvanized all Americans. This is the truer and more certain path of democracy.

CHICAGO SUN-TIMES
suntimes.com

We vote for a fairer way to decide national elections

Chicago Sun-Times editorial
March 1, 2006

Calls to reform or abolish the Electoral College hit a fever pitch after the 2000 presidential election, when Al Gore won the popular tally but didn't have enough votes in the right states to carry the electoral vote. That call quieted somewhat after the 2004 election, when President Bush won the popular vote but still could have lost the election if John Kerry had won Ohio. Despite interest in reform, nothing has happened, mostly due to the difficulty in amending the Constitution.

Now a bipartisan commission, whose members include former Rep. John Anderson (R-Ill.) and former Sen. Birch Bayh (D-Ind.), has proposed an idea to retain the Electoral College while still ensuring it reflects the will of the majority of voters. The Sun-Times News Group backs the concept and applauds the National Popular Vote group for thinking outside the box.

The group's plan is to get enough states to agree to give all their electoral votes to the national vote winner, regardless of the results in their individual states. Under the proposal, each state would pass laws to change the way their electoral votes are awarded, a process the Constitution leaves for the states to set. They would also enter an interstate compact with other states that make the same change, agreeing that the new system won't take effect until states representing 270 electoral votes -- the number needed to carry the Electoral College -- have joined.

In Illinois, the plan is backed by a group that includes state Senators Jacqueline Collins, a Chicago Democrat, and Kirk Dillard, a Hinsdale Republican and chairman of the DuPage County Republican Party.

Using such a system in the last election would have meant Bush won all of Illinois' electoral votes, even though Kerry easily carried the state. If that sounds strange, it's no stranger than Illinois and other populous states being virtually ignored by both parties during the last campaign, since one candidate or the other had them locked so early. That likely hurt the turnout in those noncompetitive states, affecting elections further down the ticket.

What of awarding electoral votes by the top vote-getter in each congressional district, as is currently done in Nebraska and Maine? That would simply set up a situation where candidates concentrate on a small number of battleground districts, because, thanks to gerrymandering, most districts are noncompetitive.

Republicans may be hardest to persuade to support this plan, over fears that large urban centers that tend to vote Democratic will dominate elections. But that wasn't an impediment to Bush's re-election. And polls show most Americans want the president to be elected by the popular vote. It's time to make the change with this innovative plan.

This editorial represents the view of the Sun-Times News Group of 100 newspapers in the Chicago metro area.

States join forces against electoral college

A piecemeal approach may be the only way to kill the anachronistic institution

Los Angeles Times Editorial

June 5, 2006

A PROPOSED EXPERIMENT with majority rule has generated plenty of naysayers who apparently think that some nations are simply too immature to let people directly choose their own leaders. But we say the United States is ready for real democracy.

The experiment is the National Popular Vote campaign, which intends to undermine the Constitution's anachronistic Electoral College. If the campaign succeeds, future presidents will take office only if they win the popular vote nationwide.

The ingenious scheme was developed by John R. Koza, a Stanford professor who also invented the scratch-off lottery ticket. It calls on state legislatures to pass a measure dictating that all the electoral votes from that state go to the winner of the national popular vote. It goes into effect only if enough states approve it to represent a majority of the electoral votes. In other words, if states that represent at least 270 of the 538 electoral votes all approve the measure, the winner of the popular vote nationwide would automatically win the presidency. It thus renders the Electoral College moot without eliminating it.

This kind of end run is necessary because the only way to get rid of the Electoral College entirely is via a constitutional amendment, which would be nearly impossible to pass. Enough small states benefit from the current system to block an amendment. The beauty of this approach is that each state is constitutionally allowed to allot its electoral votes as it sees fit. The measure was approved by California's Assembly on Tuesday and is pending in four other states; backers hope to get it before all 50 states by January.

Anyone wondering why he should care about the Electoral College need look no further than the 2000 election, when George W. Bush won the presidency despite getting about half a million fewer votes than Al Gore. If that makes conservatives think they should be thankful that the majority doesn't always rule in the United States, they should think again. The same thing nearly happened in reverse in 2004. If John Kerry had picked up a mere 60,000 more votes in Ohio, he would have won — even though Bush took in 3 million more votes overall.

The Electoral College doesn't skew just election results; it skews elections. Candidates know they don't have to campaign in states that either clearly favor them or clearly don't; they have to focus only on swing states. In the 2004 campaign, Bush and Kerry spent a great deal of time brushing up on agricultural policy and other issues of vital concern in Iowa, while ignoring matters important to people in states such as California, Texas and New York.

Opponents argue that the current system ensures that smaller states continue to have a say in setting national policy. But the U.S. Senate already gives Delaware every bit as much clout as California. Any method besides majority vote empowers some citizens at the expense of others and makes the president beholden to minority interests.

At its inception, the United States was, well, a union of states. But it is now one nation, and our president should be elected by the citizens of that nation, not by its constituent states. To argue otherwise is to say that some Americans should have more power to elect a president than others simply because of where they live. Remember, all men are created equal. Including Californians and New Yorkers.

StarTribune.com
Minneapolis · St. Paul, Minnesota

How to drop out of the Electoral College:

There's a way to ensure top vote-getter becomes president

Editorial—Minneapolis Star Tribune
March 27, 2006

This country could form a more perfect union by accepting a novel idea: that the president of the United States should be elected by the people of the United States.

That's not the way it's done, of course, and, given the Constitution's enshrinement of the Electoral College, things aren't likely to change. To quit the college would take approval of two-thirds of both houses of Congress and three-quarters of state legislatures, so fuggedaboudit.

But now comes a gaggle of bipartisan reformers with a cheeky idea worth considering. What if legislatures, one by one, entered their states into an interstate compact under which members would agree to award their electoral votes to the winner of the national popular vote? The compact would kick in only when enough states had joined it to elect a president—that is, when a majority of the 538 electoral votes were assembled. As few as 11 states could ensure that the candidate with the most popular votes nationally would win the presidency. As a result, the Constitution and the Electoral College would stay intact, but the college's fangs would be removed.

That approach would be more democratic than current practice. Recall that Al Gore lost the 2000 election to George W. Bush despite getting a half-million more popular votes, and that Bush nearly lost the 2004 election despite getting 3 million more popular votes (a shift of only 60,000 votes in Ohio would have thrown the election to John Kerry). So, both parties have reason to fear the college's distortions.

That the Electoral College has "worked" in all but one election since 1888 isn't a good enough reason to stay with the status quo. The college has a perverse impact on campaigns. With no incentive to compete in states that are predictably red or blue, candidates concentrate on the battleground states—only 13 of them in 2004, down from 34 in 1960. That's not the national campaign voters deserve. In the last election, 92 percent of campaign events took place in just 13 states, which also absorbed 97 percent of advertising during the campaign's final month. Three dozen red and blue states as large as California, New York and Texas and as small as Delaware, Utah and Wyoming were mere spectators.

Now that Minnesota is a battleground getting lots of attention, it's a lot to ask the Legislature to do the right thing and endorse the new compact. But it really should. So should other states—both red and blue—join, for the sake of a better democracy.

The Sacramento Bee

Editorial: Rx for U.S. elections

States can assure the popular vote rules

Saturday, June 3, 2006

The election of the U.S. president should reflect the directly expressed will of the American people. But it doesn't.

The current Electoral College system can produce perverse results: A candidate can lose the popular vote and win the Electoral College vote and, thus, the presidency. That has happened several times in American history, most recently in 2000. With the nation so closely divided politically, this is likely to be an ongoing problem, undermining the legitimacy of our presidential elections.

It doesn't have to be that way.

Polls for the last 30 years have shown that Americans overwhelmingly support direct election of the president, but Congress hasn't budged on a constitutional amendment.

A new campaign, "National Popular Vote," spearheaded by several former members of Congress, including California's Tom Campbell (most recently Gov. Arnold Schwarzenegger's finance director), has a creative way to get the same result.

The campaign uses an old mechanism -- an interstate compact -- to achieve the direct election of the president. The idea is modeled on existing interstate compacts, such the Colorado River Compact, which divides water among seven Western states. The compact depends on states changing their own rules for dividing up their electoral votes.

We'd prefer a constitutional amendment simply abolishing the Electoral College, but this state-by-state reform is an achievable second-best solution to a defective product that even the Founding Fathers regarded wearily and warily.

The strongest arguments at the 1787 Constitutional Convention favored direct election of the president by the people. Proponents wanted the president to be the "guardian of the people" and as independent as possible of Congress and the states. But the delegates were hopelessly divided between direct election by the people and election by Congress.

The Electoral College was a last-minute compromise, reached under what James Madison called the "hurrying influence produced by fatigue and impatience." The Electoral College has been patched many times since.

The interstate compact proposal wouldn't abolish the Electoral College, but at least it would ensure that it reflects the national popular vote.

Election officials in the compact states would award all of their electoral votes to the candidate receiving the greatest number of votes nationally.

Clearly, one state could not do this on its own. So each of the states has the same 888-word bill entering into a binding interstate compact (you can find the text at www.nationalpopularvote.com). States would join the agreement one by one. The compact would take effect only after enough states joined to represent a majority of Americans and electoral votes -- 270 of the 538 electoral votes.

So far, the bill has been introduced in five legislatures -- California, Illinois, Colorado, Missouri and Louisiana. The campaign's goal is 10 states by the end of 2006 and enough states by the end of 2007 to make direct election the governing rule for the 2008 presidential election.

In California, the Assembly approved the bill Tuesday. Because California has such strong influence nationally, the governor and senators can get this process rolling in other states by acting this session. Otherwise, in presidential elections, unhappy Americans are bound to continue paying for the Founding Fathers' fatigue.

The Fayetteville Observer

Our View: Electoral vote change would be good for the state and its people

The Fayette Observer Editorial
May 16, 2007

Four times since the framers met in Philadelphia in 1787, the presidency has gone to the candidate on the losing end of the popular vote. The republic still stands.

That's hardly a compelling argument for leaving things as they are. The Electoral College less than perfectly reflects the will of the people, and the threat of the "faithless elector" who tips an election the way his partisan bias dictates is real, if remote. Both threats would vanish if the election automatically went to the candidate for whom most registered voters pulled the lever.

This is the point at which the conversation normally would turn to amending the federal Constitution to abolish the Electoral College. But the state Senate has just passed a bill that would achieve a comparable effect by simple statute.

The bill provides that, if enough states join in to command a majority in the Electoral College, all of North Carolina's electoral votes will be awarded to the winner of the popular vote — not the statewide winner, but the one who wins nationwide. More than 40 states are already looking at substantially the same bill.

If it works as planned, the problem goes away, with no violence done to the Constitution.

Something else happens, too. North Carolina will less often find itself in political obscurity when the nation chooses its top leader.

During the 2000 election, one analyst noted that the candidates were focusing most of their time and effort on 11 swing states. Ironically, only three of those had more electoral votes than North Carolina, which was not one of the 11. If candidates understand that they have a real shot at our 15 electoral votes right up until the polls close on that fateful Tuesday in November, we are unlikely to be shrugged off or taken for granted again.

The arguments against it are no stronger than those for retaining the Electoral College in all its supreme majesty: (1) it's different; and (2) it means that North Carolina could end up giving its 15 votes to someone not favored by the majority of Tar Heel voters. The first argument lacks heft. The second would make perfect sense, but only if one could ignore the fact that presidential elections are held to enable individual Americans to put someone in the White House, not merely to express each state's collective pique or pleasure.

This is worth a try — for the sake of simplicity and fairness, and in the interest of raising our state's political profile.

Drop Out of the College

New York Times editorial
March 14, 2006

The Electoral College is an antidemocratic relic. Everyone who remembers 2000 knows that it can lead to the election of the candidate who loses the popular vote as president. But the Electoral College's other serious flaws are perhaps even more debilitating for a democracy. It focuses presidential elections on just a handful of battleground states, and pushes the rest of the nation's voters to the sidelines.

There is an innovative new proposal for states to take the lead in undoing the Electoral College. Legislatures across the country should get behind it.

Both parties should have reason to fear the college's perverse effects. In 2000, the Democrats lost out. But in 2004, a shift of 60,000 votes in Ohio would have elected John Kerry, even though he lost the national popular vote decisively.

Just as serious is the way the Electoral College distorts presidential campaigns. Candidates have no incentive to campaign in, or address the concerns of, states that reliably vote for a particular party. In recent years, the battleground in presidential elections has shrunk drastically. In 1960, 24 states, with 327 electoral votes, were battleground states, according to estimates by National Popular Vote, the bipartisan coalition making the new proposal. In 2004, only 13 states, with 159 electoral votes, were. As a result, campaigns and national priorities are stacked in favor of a few strategic states. Ethanol fuel, a pet issue of Iowa farmers, is discussed a lot. But issues of equal concern to states like Alabama, California, New York and Indiana are not.

The Electoral College discourages turnout because voters in two-thirds of the nation know well before Election Day who will win their states. It also discriminates among voters by weighing presidential votes unequally. A Wyoming voter has about four times as much impact on selecting that state's electors as a California voter does on selecting that state's.

The answer to all of these problems is direct election of the president. Past attempts to abolish the Electoral College by amending the Constitution have run into difficulty. But National Popular Vote, which includes several former members of Congress, is offering an ingenious solution that would not require a constitutional amendment. It proposes that states commit to casting their electoral votes for the winner of the national popular vote. These promises would become binding only when states representing a majority of the Electoral College signed on. Then any candidate who won the popular vote would be sure to win the White House.

The coalition is starting out by trying to have laws passed in Illinois and a few other states. Americans are rightly cautious about tinkering with mechanisms established by the Constitution. But throughout the nation's history, there have been a series of reforms affecting how elections are conducted, like the ones that gave blacks and women the vote and provided for the direct election of United States senators. Sen. Linda Menard, Chair
Members of the State Affairs Committee

I strongly support SB 92, a bill to enter into an interstate compact for a popular vote for Presidential elections.

After looking at a number of sources on this important issue, I have concluded three basic advantages of this type of election; those being:
Nationwide popular election of the President is the only system that:
(1) makes all states competitive in presidential elections,
(2) guarantees that the candidate with the most popular votes nationwide wins the Presidency, and most importantly
(3) makes every vote equal.
I have been following the issue and am very excited to see that Alaska will now have an opportunity to comment in the form of this proposed legislation. This bill will give Alaska an opportunity to gain parity in Presidential elections.

Sincerely,

Lori Davey

Subject: popular vote

Dear Senator Linda Menard, Chair
& Members of the State Affairs Committee:

Please consider supporting SB 92, in reference to a popular vote for Presidential elections. The current electoral system needs updating, a direct election of the president is just plain common sense as that is the system that's in place for all other elective officials.....

Thank you,

Jim Gilles

SB 92 BY SECTION

Section 1. Adding new sections to enact the Agreement Among the States to Elect the President by National Popular Vote

ARTICLE I—MEMBERSHIP

I-1 Any State of the United States and the District of Columbia may become a member of this agreement by enacting this agreement

ARTICLE II—RIGHT OF THE PEOPLE IN MEMBER STATES TO VOTE FOR PRESIDENT AND VICE PRESIDENT

II-1 Each member state shall conduct a statewide popular election for President and Vice President of the United States.

ARTICLE III—MANNER OF APPOINTING PRESIDENTIAL ELECTORS IN MEMBER STATES

III-1 Prior to the time set by law for the meeting and voting by the presidential electors, the chief election official of each member state shall determine the number of votes for each presidential slate in each State of the United States and in the District of Columbia in which votes have been cast in a statewide popular election and shall add such votes together to produce a "national popular vote total" for each presidential slate.

III-2 The chief election official of each member state shall designate the presidential slate with the largest national popular vote total as the "national popular vote winner."

III-3 The presidential elector certifying official of each member state shall certify the

appointment in that official's own state of the elector slate nominated in that state in association with the national popular vote winner.

III-4 At least six days before the day fixed by law for the meeting and voting by the presidential electors, each member state shall make a final determination of the number of popular votes cast in the state for each presidential slate and shall communicate an official statement of such determination within 24 hours to the chief election official of each other member state.

III-5 The chief election official of each member state shall treat as conclusive an official statement containing the number of popular votes in a state for each presidential slate made by the day established by federal law for making a state's final determination conclusive as to the counting of electoral votes by Congress.

III-6 In event of a tie for the national popular vote winner, the presidential elector certifying official of each member state shall certify the appointment of the elector slate nominated in association with the presidential slate receiving the largest number of popular votes within that official's own state.

III-7 If, for any reason, the number of presidential electors nominated in a member state in association with the national popular vote winner is less than or greater than that state's number of electoral votes, the presidential candidate on the presidential slate that has been designated as the national popular vote winner shall have the power to nominate the presidential electors for that state and that state's presidential elector certifying official shall certify the appointment of such nominees.

III-8 The chief election official of each member state shall immediately release to the public all vote counts or statements of votes as they are determined or obtained.

III-9 This article shall govern the appointment of presidential electors in each member state in any year in which this agreement is, on July 20, in effect in states cumulatively possessing a majority of the electoral votes.

ARTICLE IV—OTHER PROVISIONS

IV-1 This agreement shall take effect when states cumulatively possessing a majority of the electoral votes have enacted this agreement in substantially the same form and the enactments by such states have taken effect in each state.

IV-2 Any member state may withdraw from this agreement, except that a withdrawal occurring six months or less before the end of a President's term shall not become effective until a President or Vice President shall have been qualified to serve the next term.

IV-3 The chief executive of each member state shall promptly notify the chief executive of all other states of when this agreement has been enacted and has taken effect in that official's state, when the state has withdrawn from this agreement, and when this agreement takes effect generally.

IV-4 This agreement shall terminate if the electoral college is abolished.

IV-5 If any provision of this agreement is held invalid, the remaining provisions shall not be affected.

ARTICLE V—DEFINITIONS

V-1 For purposes of this agreement,
"chief executive" shall mean the Governor of a State of the United States or the Mayor of the District of Columbia;

V-2 "elector slate" shall mean a slate of candidates who have been nominated in a state for the position of presidential elector in association with a presidential slate;

V-3 "chief election official" shall mean the state official or body that is authorized to certify the total number of popular votes for each presidential slate;

V-4 "presidential elector" shall mean an elector for President and Vice President of the United States;

V-5 "presidential elector certifying official" shall mean the state official or body that is authorized to certify the appointment of the state's presidential electors;

V-6 "presidential slate" shall mean a slate of two persons, the first of whom has been nominated as a candidate for President of the United States and the second of whom has been nominated as a candidate for Vice President of the United States, or any legal successors to such persons, regardless of whether both names appear on the ballot presented to the voter in a particular state;

V-7 "state" shall mean a State of the United States and the District of Columbia; And

V-8 "statewide popular election" shall mean a general election in which votes are cast for presidential slates by individual voters and counted on a statewide basis.

Sections 2 and 3.

Notification of Electors. Amends AS 15.30.060 and adds a new subsection. These sections together allow the Director of the Division of Elections to send a certificate of election to each elector in accordance with the national popular vote totals.

Section 4.

Amends AS 15.30.090 by adding conforming language that allows the electors to vote in accordance with the national popular vote totals.

Section 5.

Adds a new subsection to AS 15.30.090 that dictates that electors follow the results of the national popular vote when the compact is in effect, and requires that any required administrative or legal services be provided to the electors.

March 22, 2010

The Honorable Senator Bert Stedman
Alaska Senate
State Capitol
Room 516
Juneau, AK 99801-1182

Dear Senator Stedman:

I support the National Popular Vote bill, which would guarantee the Presidency to the candidate who receives the most popular votes in all 50 states—and I'm asking you to seriously consider this proposal.

As the former Chairman of the Michigan Republican Party, I am asking you to consider a bipartisan, truly representative and fairer process to elect the President of the United States -- Our President.

Currently, the Alaska Senate is considering SB 92.

The National Popular Vote does not abolish the Electoral College. Instead, it uses the state's existing authority to change how the Electoral College is chosen, namely from the current state-by-state count to the popular vote of the people in all 50 states.

This would guarantee the Presidency to the candidate who receives the most popular votes in all 50 states.

The shortcomings of the current system stem from the winner-take-all rule (i.e., awarding all of a state's electoral votes to the candidate who receives the most popular votes in each state).

Because of the winner-take-all rule, a candidate can win the Presidency without winning the most popular votes nationwide. This has occurred in 4 of the nation's 56 presidential elections. As an example of a near miss, a shift of fewer than 60,000 votes in Ohio in 2004 would have defeated President Bush, despite his nationwide lead of 3,500,000 votes.

This is a state rights issue. We the people—in every state—have the right to decide how and who is elected President.

The U.S. Constitution gives the states exclusive and plenary control over the manner of awarding their electoral votes. The winner-take-all rule is not in the Constitution. It was not the Founder's choice and was used by only three states in the nation's first presidential election in 1789.

Under the National Popular Vote, all the electoral votes from the enacting states would be awarded to the presidential candidate who receives the most popular votes in all 50 states. The bill would take effect only when enacted by states possessing a majority of the electoral votes—that is, enough electoral votes to elect a President (270 of 538). The bill would replace the current state-by-state system of awarding electoral votes with a system guaranteeing the Presidency to the candidate who wins the most popular votes in all 50 states.

As of today, 29 Legislative Chambers in 19 States have passed the National Popular Vote Bill. A 2007 national poll showed **72% support nationwide** for a national popular vote for the President. A recent poll of Alaskan voters in January of this year, found that 70% of your citizens supported the National Popular Vote concept.

The National Popular Vote bill has passed in states having almost a quarter (23%) of the electoral votes necessary to bring this into effect. Those states include Hawaii, Illinois, Maryland, New Jersey and Washington.

This proposal would guarantee that every vote matters, every state is relevant, every town and community would have the same value to each candidate for President in every presidential election.

More importantly, this bill would insure that every Alaskan vote matters, that every effort is relevant and that Alaska and issues important to Alaska stay in the forefront. Candidates would battle for every vote in Alaska!

During the 2008 Presidential campaign, John McCain determined that Michigan's 17 Electoral votes were out of reach. Senator McCain's staff announced to the world that campaign activities would cease in Michigan, so resources could be targeted to the battleground states of Ohio, Florida, Pennsylvania and Missouri. Candidate McCain abandoned conservatives in Michigan and made it difficult to win seats for U.S. Congress and the Michigan Legislature. With National Popular Vote, the McCain campaign would have fought for every Republican vote in Michigan right up until Election Day. Republicans—up and down our ticket—would have benefited from National Popular Vote in 2008, just as they would in 2012.

As a conservative and a Republican, there are several other political aspects that I think are important to consider.

I believe we are a 'center-right' nation. A national vote system would give our center-right coalition a greater voice in electing the President. Rather than having to campaign in 'battleground' states only, every one of our coalition's members would matter. Nationwide turnout, regardless of the impact on individual states, would matter. Our voices and issues move and affect voters nationally and candidates would have to take them into greater consideration.

Moving away from the current system also helps reduce the incentive and value of voter fraud. Today, small changes in a particular state could have determinative effects on the Electoral College vote. By moving away from the state-by-state system, we diminish the role any one group, city or 'machine' could play to swing a state's Electoral College votes. We insure that the will of the people is heard.

In The Federalist Papers No. 68, Alexander Hamilton, in arguing for an Electoral College that reflected a 'national perspective, said: "Talents for low intrigue, and the little arts of popularity, may alone suffice to elevate a man to the first honors in a single State; but it will require other talents, and a different kind of merit, to establish him in the esteem and confidence of the whole Union, or of so considerable a portion of it as would be necessary to make him a successful candidate for the distinguished office of President of the United States."

Today, conservatives in many states have little voice. Presidential campaigns concentrate their efforts in the 12-18 'battleground' states, depending on the year. Under a National Popular Vote, conservative turnout in California, New York and small states like Vermont would matter. This would provide for a great incentive to organize our 'natural' and often times 'silent' majority in EVERY state.

Obviously, the left has a similar scenario and perspective about the national electorate. They believe that they have a better organizational base, a broader appeal and would/should be the majority party and movement in America. I am confident that the conservatives across this country are under-represented and under-counted election after election.

The bottom line is that the National Popular Vote bill would guarantee the Presidency to the candidate who receives the most popular votes in all 50 states. I believe that is both right and fair.

Senate Bill 93 - Municipal Air Quality Property Tax Credit

Sponsor Statement

Some communities in Alaska have been designated as non-attainment areas for PM 2.5 by the EPA. Based on the requirements of the Clean Air Act, the state and those impacted local governments have three years to develop attainment plans designed to bring air quality into compliance with federal air standards.

SB 93 is needed as a first step to allow local municipalities the latitude in developing tax credit programs to address the important public health and community compliance issues that result from poor air quality.

Senate Bill 93 is designed to provide optional tools to municipalities that can be used to create incentives for individuals to take actions that will improve local air quality and reduce fuel consumption.

SB 93 expands the discretion of municipalities in a manner that allows, by ordinance, the creation of programs that will offer property tax credits for actions that the local governing body determines will improve air quality. This bill requires that eligibility, conditions and other criteria for the tax credits be established by ordinance.

Examples of how this proposed legislation might be used by a municipality include:

- Incentives to residents to exchange old-style wood stoves for EPA certified wood stoves. Data show that EPA certified wood stoves significantly reduce fine particulate emissions over non-EPA stoves. It is in the interest of any community with air quality nonattainment issues to have citizens who choose to heat with wood do so in the most environmentally friendly way.

- Incentives to residences or commercial businesses to improve the energy efficiency of their property. Reduced fuel consumption would lead to reduced emissions from area heating or electricity generation. Incentives could be based on calculated BTU savings, MW reductions, etc.

- Incentives to convert from carbon based energy consumption to alternative energy generation. This could involve tax credits for construction and use of a solar array or wind turbine to power/heat residential or commercial facilities.

The proposed legislation would create a full range of options for a local municipality to address air quality issues, rather than just restriction and enforcement based options.

Hey Darwin:

fyi, the following folks will be available on Monday morning to testify/answer questions regarding SB 93 - Muni Air Quality Tax Credits:

- Nadine Winders, Presiding Officer of the Fairbanks North Star Borough (FNSB) Assembly
- Jim Conner, FNSB Air Quality Specialist
- Alice Edwards, State DEC Environmental Specialist
- Tyson Fick, State DCCED (re the zero fiscal note)

Thomas & Elton are co-sponsors of the bill, and Olson heard the bill in (S)CRA last week, so I've asked the FNSB folks to keep their comments brief.

Thanks,

yuri

ANALYSIS: *(Attach a separate page if necessary)*

This bill would allow municipalities to provide a property tax exemption based on a percentage of verifiable air quality improvement costs on a property.

The Department of Commerce, Community and Economic Development does not foresee a fiscal impact to DCCED as a result of this bill.

Achieving a healthy and affordable energy future, for itself and its fellow Alaskans, is Fairbanks' goal. Recognizing the probable negative ramifications of inaction—or wrong action—is what drives Fairbanks to pursue this goal.

4. FNSB Air Quality (PM 2.5)

Monitoring of particulate levels in urban areas within the Fairbanks North Star Borough continues to show daily exceedances of Federal limits, particularly during periods of temperature inversions. This chapter describes the status of the FNSB's particulate emissions issue.

4.1 Particulate Matter (PM) 2.5 Non-Attainment

The Fairbanks area is surrounded by hills on three sides and is susceptible to severe surface-based temperature inversions during the winter that stratify cold air near the ground. Coupled with low wind speeds, pollutants in the air get trapped up to weeks at a time and concentrate resulting in periods of poor air quality. Particulate matter is one of those pollutants. Fine particles that are 2.5 micrometers in diameter and smaller (PM 2.5) are unhealthy to breathe and have been associated with serious lung and heart problems. These particles are a mixture of microscopic solids and liquid droplets suspended in air. Sources of fine particles include all types of combustion activities (motor vehicles, power plants, wood burning, etc.) and certain industrial processes. Cold weather (near 0 degrees F and below) seems to increase the PM 2.5 levels in the Fairbanks area during temperature inversions.

In 1997, the EPA issued standards for PM 2.5 based on health studies and extensive peer review. The annual standard of 15 micrograms per cubic meter and 24-hour standard of 65 micrograms per cubic meter (µg/m3) is based on a three-year average of annual mean PM 2.5 concentrations. In September 2006, the EPA issued revised national air quality standards for PM 2.5. The daily PM 2.5 particle standard has been reduced from 65 to 35 µg/m3 of air.

In March 2007, EPA issued a rule defining requirements for states to clean the air in areas with levels of fine particle pollution that do not meet national air quality standards. EPA designates an area as "non-attainment" if it violates the fine particle standards over a three-year period. Once an area is designated as non-attainment, the Clean Air Act requires a state to submit an implementation plan to EPA within three years. This plan must include enforceable measures to reduce air pollutant emissions that form the fine particles in the atmosphere. The plan must also provide enforceable steps to attain the PM 2.5 standards and show how it will make reasonable progress toward meeting them.

States must meet the new PM 2.5 standard by 2010. In their 2008 implementation plans, states may propose an attainment date extension for up to five years. Those areas for which EPA approves an extension must achieve clean air as soon as possible, but no later than 2015.

In August 2007, the Alaska Dept. of Environmental Conservation (ADEC) published "Alaska's 2008 Air Monitoring Network Program." This document included the following statements concerning Fairbanks:

- "Fairbanks had consistently experienced the highest PM 2.5 values measured in the State."

- "Based on winter PM 2.5 levels, Fairbanks had been flirting with exceeding the annual fine particulate standard (set at 15 µg/sm3) for the past seven years. If [they are] exceeded, Fairbanks will need to control year-round PM pollution."

- "To address the needs of an Alaska PM 2.5 State Implementation Plan (SIP), the Fairbanks North Star Borough is expanding its monitoring network to better identify the magnitude, extent, and source of its winter PM 2.5 problems. This effort will see the addition of between three and five new monitoring sites operated during the winter months."

- "The 2007 PM 2.5 network so far only monitored the fine particles at the State Office Building."

4.1.1 FNSB Non-Attainment Boundary (PM 2.5)

In December 2007, ADEC sent a letter to EPA recommending that, based on the past three years of ambient air monitoring data, EPA designate all areas of the State in attainment with the annual PM 2.5 standard of 15 µg/m3. The letter also stated that Fairbanks was the only Alaska community that had exceeded EPA's new 35 µg/m3 (24-hour) standard. Enclosed with the letter was supporting information that included a recommended boundary for a Fairbanks PM 2.5 (24-hour) non-attainment area. Following are excerpts from that document concerning the proposed PM 2.5 non-attainment boundary:

- "Ambient air monitoring has been conducted at one site in downtown Fairbanks since the PM 2.5 network was established in 1999. While this site does represent the level of fine particulates in the downtown area, there is nothing to confirm that PM 2.5 concentrations exceed State and Federal fine particulate standards outside of the urban center."

- "EPA recommends that states consider nine factors in making non-attainment boundary recommendations. These nine factors include: emission data, air quality data, population density and degree of urbanization (including commercial development), traffic and commuting patterns, growth rates and patterns, meteorology (weather/transport patterns), geography/topography (mountain ranges or other air basin boundaries), jurisdictional boundaries (e.g. counties, air districts, reservations, metropolitan planning organizations [MPOs]), and level of control of emission sources."

- "Based on a number of these factors, the department (ADEC), in consultation with the Fairbanks North Star Borough, has developed a recommended boundary for a PM 2.5 non-attainment area in Fairbanks. The proposed boundary captures the air shed most likely contributing to the exceedances in Fairbanks resulting in non-attainment of the health standard based on existing monitoring data and other factors listed above."

- "Because there is only one monitoring site in Fairbanks, the monitoring data and source characterization work derived from that site is most likely not representative of the source contributions throughout the entire area."

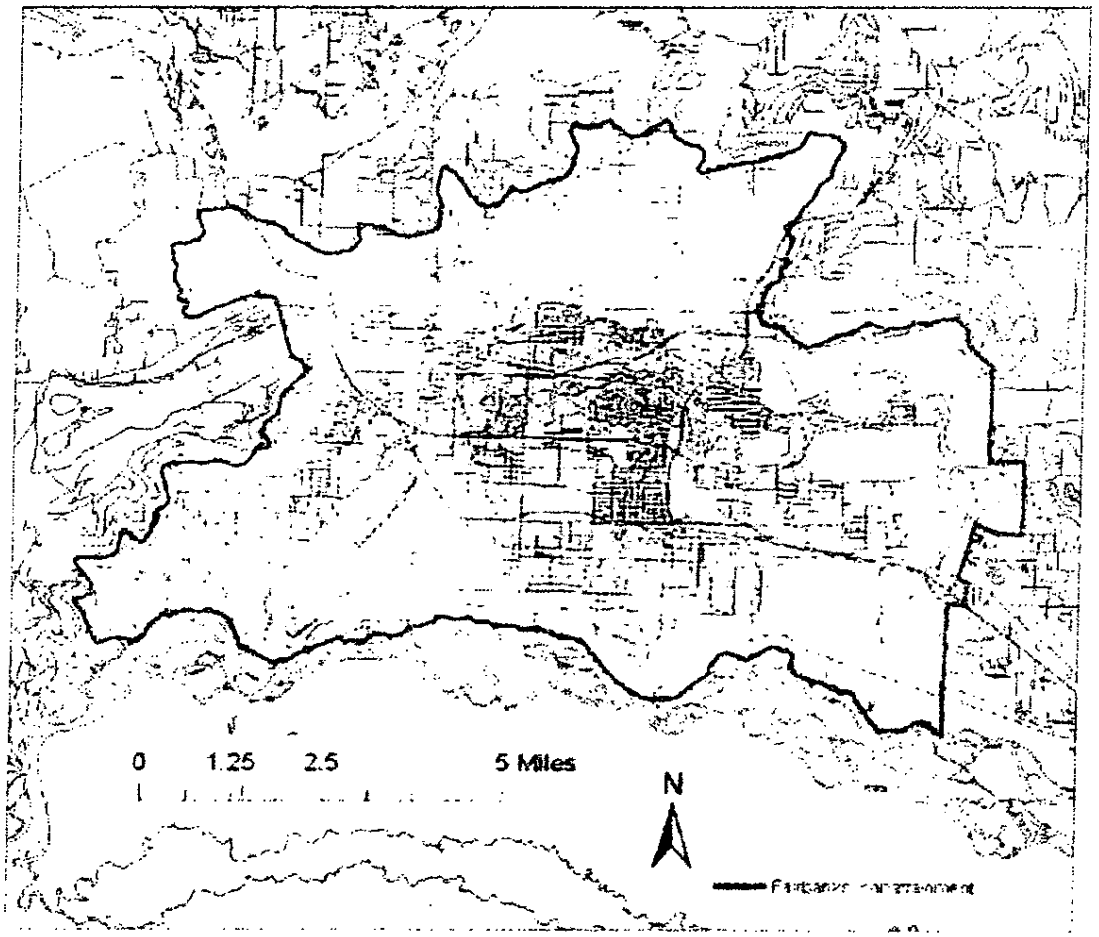
- "At this time, no monitoring data exist for the city of North Pole or other residential areas in the outlying valleys to the north of Fairbanks. At this time, there is insufficient information to suggest that North Pole or these other outlying populated areas have an air quality problem or are significantly contributing to the air quality violations occurring in downtown Fairbanks. Furthermore, some of the outlying populated areas are located at higher levels that are frequently above the inversion layer. Therefore, PM 2.5 concentrations are most likely lower than in downtown Fairbanks because areas above the inversion experience good exchange

with air masses aloft. For these reasons, they have been excluded from the proposed boundary."

- "As supplemental information and data are collected over the next several years, this boundary could be further refined. "

Figure 4-1 shows a map of the PM 2.5 non-attainment boundary originally proposed by ADEC and FNSB.

Figure 4-1: FNSB's Proposed PM 2.5 Non-Attainment Boundary



In 2007, FNSB installed a particle monitor at Nordale School and uses a mobile sniffer, known as the RAMS trailer, to gather air samples throughout the FNSB.

In April 2008, ADEC issued an updated "State Air Quality Control Plan." This document included the following statements concerning PM 2.5 emissions:

- "In a recent rulemaking with an effective date of December 18, 2006, EPA revised the level of the 24-hour PM 2.5 standard from 65 to 35 µg/m3. A review of monitoring data collected in Fairbanks in recent years shows summer values are generally low, approximately 7 µg/m3 (24-hour average), except when smoke from wildfires is transported into the downtown area (i.e., the location of the borough's PM 2.5 monitor). When this occurs, concentrations can become quite high (many multiples of the recently adopted 35 µg/m3 standard). Concentrations resulting from these conditions, however, can qualify as exceptional events. Winter values average approximately 23 µg/m3 (24-hour average), but episodically can exceed 50–60 µg/m3."

- "The entire State of Alaska is currently classified as in attainment of the PM 2.5 standard; however, barring a substantial change in wintertime concentrations, it is likely the State will recommend to EPA that Fairbanks be designated non-attainment of the revised 24-hour PM 2.5 standard in 2008/2009."

During the past three years, the Fairbanks area has exceeded the 2006 revised EPA PM 2.5 (24-hour) standard of 35 µg/m3 numerous days during the winter. Figure 4-2 shows the number of days the PM 2.5 (24-hour) standard was exceeded during the past five calendar years. The graph in Figure 4-3 shows the daily PM 2.5 (24-hour) levels in Fairbanks during the four winter months of November 2005 through February 2006.

Figure 4-2: PM 2.5 Exceedances (2003-2008)

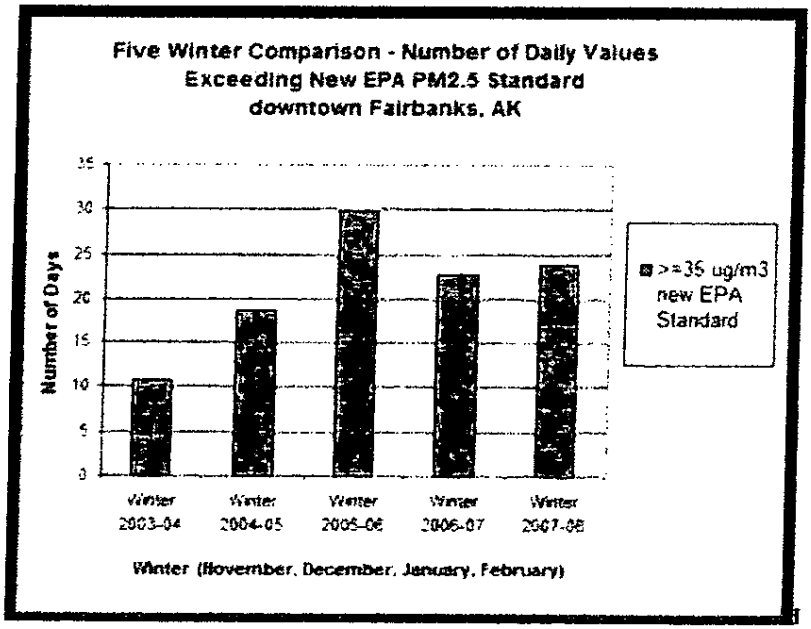


Figure 4-3: Fairbanks Daily PM 2.5 Levels (Winter 2005-2006)

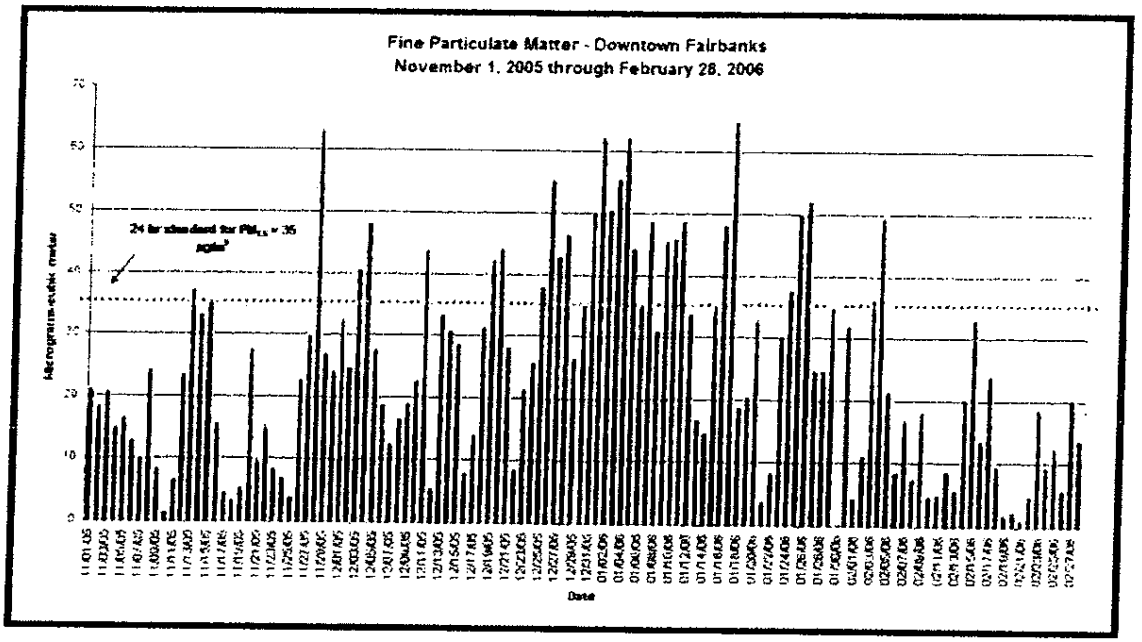
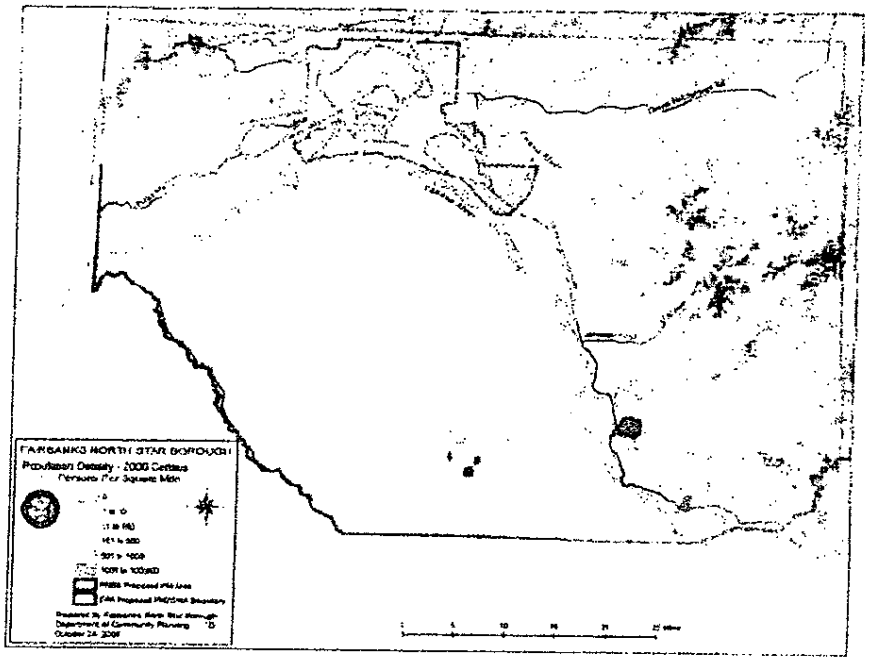
3313



In August 2008, EPA sent a letter notifying the State of its intent to designate a portion of the Fairbanks North Star Borough (FNSB) as non-attainment and to modify Alaska's recommended FNSB non-attainment boundary. EPA encouraged the State to submit any additional information that EPA should consider concerning the FNSB PM 2.5 non-attainment boundary before October 20, 2008. Figure 4-4 shows EPA's proposed boundary. It encompasses a large area of the borough that has few or no people, such as the Tanana Flats. EPA plans to publish a notice in the Federal Register to solicit public comments on its decision and make final designation decisions for the 2006 PM 2.5 (24-hour) standard by December 18, 2008.

3314

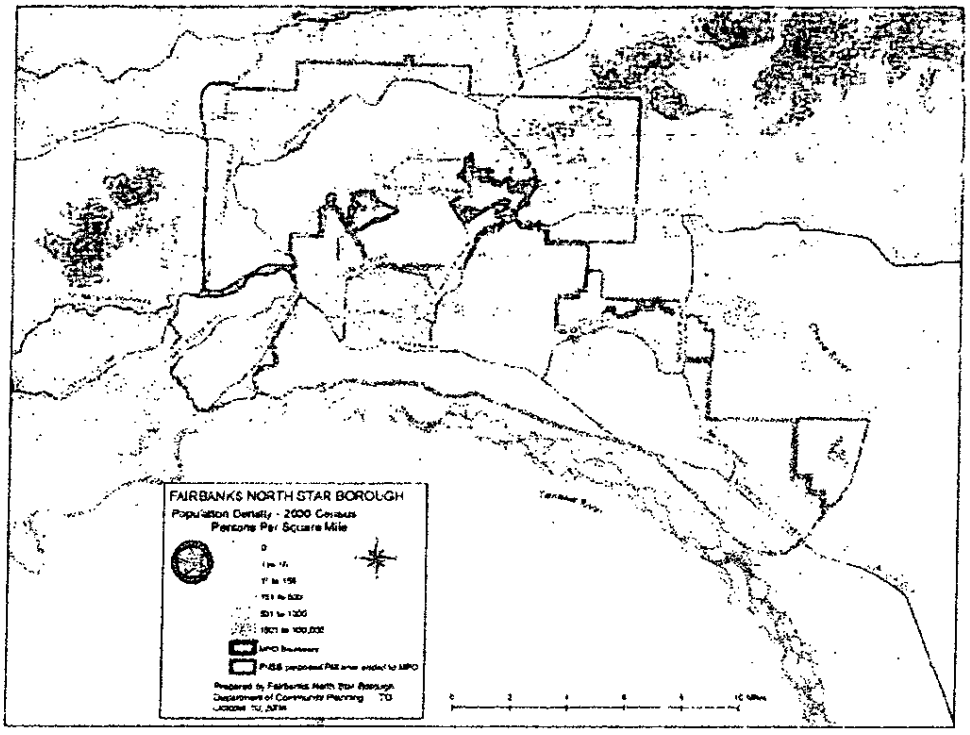
Figure 4-4: EPA's Proposed PM 2.5 Non-Attainment Boundary



In October 2008, the FNSB proposed a smaller PM 2.5 (24-hour) non-attainment boundary to EPA that is shown in Figure 4-5. An EPA decision on the non-attainment boundary is pending.

3315

Figure 4-5: FNSB's Adjusted PM 2.5 Non-Attainment Boundary

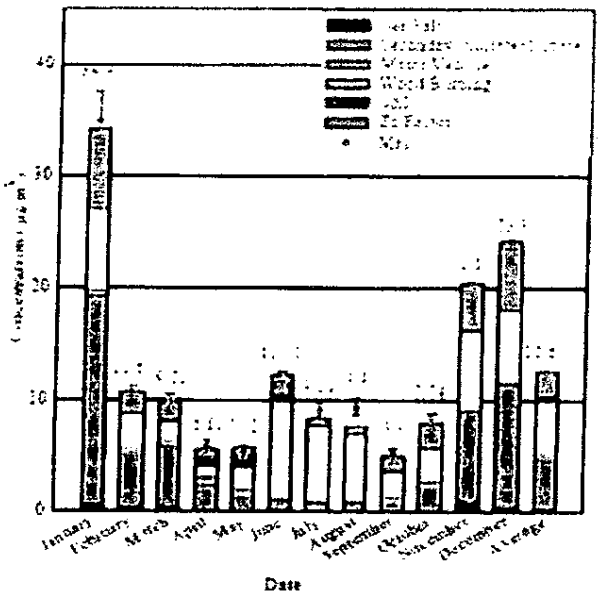


4.2 PM 2.5 Particle Analysis

ADEC and FNSB have analyzed the samples collected in the ambient air monitors and identified possible sources of the PM 2.5 particles. They found that the winter samples contained about 40 to 55 percent of the fine PM 2.5 particles made of secondary sulfate and nitrate aerosols. Most of the remaining aerosol was contributed equally from wood burning emissions and an unknown zinc-related factor. Trace amounts were also identified as sea salt, motor vehicle emissions, and soil. Figure 4-6 summarizes these results.

3316

Figure 4-6: PM 2.5 Particle Analysis Results



Sulfite and Nitrate Aerosols: The source of the sulfur and nitrate aerosols is most likely burning fuels that contain sulfur. Fairbanks vehicles burn significant amounts of gasoline and diesel fuel; however, the sulfur content of both fuels has been reduced dramatically in recent years. Low-sulfur diesel fuel contains 0.007 percent sulfur by weight. The sulfur content of fuel oil used for building heating contains about 0.22 percent sulfur. Although there are numerous sources in Fairbanks that burn fuel containing sulfur, the distillate fuel oils used in space heating could be a dominant source of the atmospheric sulfite and nitrate aerosols in Fairbanks during the winter.

Wood Burning Emissions: Heating fuel oil prices in Alaska have increased significantly during the past four years, and data from ADEC-sponsored building heating surveys show that more households and businesses have installed supplemental wood-burning heaters. The EPA estimates that wood stoves emit more pollutants than oil-fired furnaces—generally 30 to 250 times more particulates on a heat-equivalent basis.

Zinc-based Emissions: The source of the zinc found in the Fairbanks PM 2.5 particles is unknown at this time. Possible sources include burning of waste lubricating oils, motor vehicles burning lube oil, or distant sources of zinc mining and ore handling. Zinc is widely used as an additive in lubricating oils for diesel engines and, in lower concentrations, for gasoline-powered engines.

4.2.1 Expanded PM 2.5 Sampling Program

Starting in 2007, the FNSB expanded monitoring to determine the extent of the elevated PM 2.5 emissions. This effort continued last winter (2007-08) with three new fixed monitoring sites, a re-locatable trailer, and a mobile monitor. One of the fixed sites was placed in the Hamilton Acres area to characterize the PM 2.5 in a neighborhood setting. The FNSB placed another fixed site downtown near the State Office Building, to support those monitors with new types of monitors

3317

that will help differentiate the sources of the PM downtown such as mobile sources. The third fixed site is on south Peger Road and monitors the roadway contributions and the effect of mobile sources such as cars and commercial vehicles.

The trailer was placed in eleven different locations in and around the Fairbanks and North Pole areas, including varying altitudes to better assess the spatial extent and inversion/particulate layer height for PM 2.5 particles.

The mobile monitor drove extensively through neighborhoods and industrial areas throughout the Fairbanks and North Pole area as well as Goldstream Valley. FNSB is using these data to assess the spatial extent as well as the local effects of hot spots (outdoor wood boilers [OWBs], poorly running woodstoves, and high-emitting vehicles).

During 2008, the FNSB Air Quality Department refined and expanded its studies further with a new fixed site in North Pole and the addition of new "speciation" monitors that provide data on the chemical types within the collected PM particles. These new instruments will help apportion the source mixture of the PM and indicate the best way to reduce and maintain PM emissions in the future. The FNSB has also expanded its meteorological monitoring to help assess any transport of PM from outside the downtown area. New meteorological measuring equipment has been set up at the South Peger and Hamilton Acres sites, and will soon operate at the North Pole site.

These new "speciation" monitors will provide data to be input into the EPA's UNMIX model as well as a Chemical Mass Balance model to help differentiate between mobile source contributions and space heating. In addition to those analyses, the information from those monitors will be analyzed for key tracers of wood burning. This should allow us to separate the wood burning sources from the rest of the sources.

A better understanding of the Fairbanks basin microclimate and the meteorological patterns that cause severe inversions is necessary so we can prevent exceedances of the PM 2.5 by applying cost-effective emission reduction practices.

4.3 PM 2.5 Standard Non-Compliance Consequences

Areas that EPA classifies as non-attainment are subject to a Federal measure known as "transportation conformity." It requires local transportation and air quality officials to coordinate planning to ensure transportation projects (road construction, etc.) do not hinder an area's ability to achieve and maintain clean air standards. Non-attainment areas also become subject to "new source review" requirements, which is a Federal permitting program designed to ensure that pollution from new and modified industrial facilities does not impede progress toward clean air.

Some of the potential negative consequences for the Fairbanks North Star Borough of not meeting and maintaining EPA's PM 2.5 (24-hour) standard could include the following:

- Unhealthy air quality during winter inversion periods leading to increased health care costs for residents, also deterring future population growth in the Fairbanks area and discouraging new businesses from locating in the Interior
- Loss of Federal highway funds along with other Federal funding streams

- Denials on submitted projects to Federal review due to continuation of non-attainment days after program implementation

- Reduced military staffing at Fort Wainwright and Eielson Air Force Base

4.3.1 Fairbanks PM 2.5 Implementation Plan

The FNSB, City of Fairbanks, City of North Pole, ADEC, and Alaska Department of Transportation and Public Facilities (DOT&PF) are working together to develop an implementation plan that will achieve and maintain the current EPA standards by reducing PM 2.5 air pollutant emissions by 2014. Population growth and increased fuel combustion in the Fairbanks area are most likely responsible for the area's PM 2.5 violations during winter months.

Following are some possible methods of reducing PM 2.5 (24-hour) levels during peak winter inversion periods:

Reduce Open Burn Periods: The FNSB currently bans open burning from November 1 through the last day of February in areas designated as Urban, Urban Preferred Commercial, Light or Heavy Industrial, or Perimeter area, with campfires as an exception. The length of the winter ban could increase and the affected area could be expanded to encompass the PM 2.5 boundary.

Reduce Distillate Fuel Emissions: The following could reduce particulate emissions from existing fuel oil-fired heating systems:

- Switch to a lower-sulfur fuel for all oil-fired building heating systems in the Fairbanks urban areas.

- Introduce annually required inspections and tune-ups on oil-fired furnaces similar to the I/M program to ensure optimum burning efficiency and low particulate emissions.

- Collaborate with other non-attainment northern tier communities across the U.S. to pursue subsidies, exceptions, waivers, retrofits, new regulatory requirements for manufacturers, etc., from Federal agencies. For example, as part of the process of reaching attainment for carbon monoxide (CO) standards in Alaska, Alaskan research conducted in the early 1980s documented that motor vehicle emissions reductions for CO were not achieved at cold temperatures because EPA tested vehicle emissions at room temperature ranges only. Efforts by Alaska and other local and state governments were successful in getting Congress to require EPA to test vehicular emissions at 20 degrees F to make sure auto manufacturers were improving combustion efficiency and the performance of pollution control devices to reduce CO emissions during cold starts. A similar effort could determine if the full benefits of the motor vehicle pollution control program are accrued at low temperatures for PM 2.5. Control of poorly tuned or broken vehicles may be necessary to address the hydrocarbon emissions that increase dramatically with low temperatures.

Reduce Wood Stove Emissions: Investigate methods of improving or restricting wood stove operation during winter inversion periods. EPA has published information on the efficiency and PM 2.5 emission rates of various wood stoves, summarized in the following two tables:

Table 4-1: Efficiencies by Stove Type

Appliance Type	Efficiency
Conventional Cordwood Stove	54%
Non-catalytic Cordwood Stove	63%
Catalytic Cordwood Stove	63%
Pellet Stove	78%

Table 4-2: Cordwood and Pellet Stove PM 2.5 Emission Factors

	Conventional Woodstove (lb/ton)	Catalytic Certified Woodstove (lb/ton)	Non-catalytic Certified Woodstove (lb/ton)	Pellet Stove	
				Exempt (lb/ton)	Certified (lb/ton)
AP-42 Emission Factors	30.6	16.2	14.6	8.8	4.2

According to EPA, certified pellet stoves had the highest fuel efficiency and the lowest PM 2.5 emission rates. Conventional wood stoves were much less efficient with the highest PM 2.5 emission rates.

Following are potential wood stove strategies that could help reduce their PM 2.5 emissions:

Restrict Wood Stoves: Restrict the installation and use of wood-burning or waste-oil heating appliances during winter inversions. This would require more information to quantify their contribution to PM 2.5 emissions in the Fairbanks and surrounding area during winter.

Wood Stove Buy-Out: Rapidly develop a trade-out of older wood stoves through a locally bonded, State, or Federally funded program that provides affordable upgrading for residents who own older or unapproved new simple wood heaters or the non-EPA approved wood boilers. Through local education, it would create an incentive to trade out rather than not comply. A successful trade-out program in Libby, Montana, could be used as a model.

Retrofit Wood Stoves: Investigate possible improvements in modes of operation or equipment modifications that could retrofit existing wood stoves to produce fewer PM 2.5 emissions.

Encourage Dry Wood Use: Discourage late season harvesting of green standing trees. Wet wood burns inefficiently and could increase particulate emissions. The FNSB could work with the State to provide residents access to supplies of dry seasoned firewood.

Reduce Waste Oil Heater Emissions: Consider restricting the use of waste oil burners during winter inversions. More information will be needed to verify that burning waste oil is the actual source of zinc-based PM 2.5 emissions in the area during the winter. Investigate whether using micron filtration can remove zinc compounds and unwanted impurities from waste oils before they are burned in the heaters.

Expand District Heating: Aurora Energy provides district heat to downtown Fairbanks through buried steam and hot water heating systems from its power plant. Expanding the existing district steam and hot water heating systems could replace individual oil-fired furnaces throughout the downtown area and surrounding subdivisions and lower PM 2.5 emission levels.

Expand Natural Gas Use: Switch existing residential and commercial oil-fired building heaters in the urban area to natural gas to reduce PM 2.5 emission levels. Fairbanks Natural Gas (FNG) has been expanding its buried distribution system and is providing heat to many Fairbanks-area buildings.

In the short term (2008-2010), we expect that implementing a combination of the methods listed above will help the Fairbanks region move toward achieving the new EPA PM 2.5 (24-hour) emission standard. We also believe that switching existing building heaters to natural gas and expanding district heat would provide the FNSB a long term solution for achieving and maintaining its air quality in compliance with EPA's PM 2.5 standards.

5. Alternatives for Energy

Though this Report's primary focus is on the use of in-state natural gas, a brief review of other alternative energy sources is appropriate. Alternative energy options are likely to be considered by individual homeowners. The most obvious is residential space heating with wood or coal stoves, which has already increased substantially in Fairbanks. These are, however, causing increased PM 2.5 air pollution problems and will require replacement of inefficient units or improvement of smoke emissions if they are to address one problem without exacerbating the other. They also cannot be considered a 50-year solution until forestry and horticultural techniques are devised and implemented on a commercial scale that might ensure sustainable cultivation of dedicated biomass-for-energy crops.

Solar panels (both photo-voltaic and solar-hydronic) for Interior Alaska are in the trial stage at homes, businesses, and the Cold Climate Housing Research Center. The cost of solar panel production must drop by a factor of at least five to be economically competitive with other potential energy sources.

Increased wind power may be a good prospect in some areas, if priced competitively, but cannot replace more than 20 percent of total electrical needs because of base load requirements and the unpredictability of wind. In some Alaska locations, wind-generated electricity can help heat homes and reduce overall diesel fuel usage but, like solar, we cannot rely on it as a sole solution.

Because of the above constraints, the introduction of alternative energy options will be incremental and evolutionary, and will not solve the energy shortages of Alaskans in the near to medium term (2014-2034). We believe from the 100-year perspective, however, electricity from hydroelectric, geothermal, and possibly nuclear reactors will heat residences and commercial buildings, and power transport vehicles. Other alternatives may also contribute, depending on the economics, but remain outside the bounds of this analysis.

In this section we discuss four major energy alternative scenarios (here defined as energy sources other than those predominating in a particular locality, such as Cook Inlet gas in Southcentral or oil in the Interior), which assumes that Alaska natural gas is not made available

February 9, 2009

The Honorable Donald Olson, Chair
Senate Commerce, Community & Economic Development Committee
State Capitol
Juneau, Alaska 99811

Dear Senator Olson:

The Fairbanks North Star Borough appreciates Senator Joe Paskvan's effort to address a very serious issue facing our community by introducing SB 93. This letter is being offered in support of the change to Alaska Statutes, Title 29 proposed by SB 93, "An Act relating to a municipal property tax credit for an improvement that aids in improving air quality." This bill, if enacted by the legislature, will provide tools to local municipalities that can be used to create incentives for individuals to take actions that will improve local air quality and reduce fuel consumption. Local taxation policy and discretion is governed by Title 29 of the Alaska Statutes. Tax exemptions and tax credits are only permitted within the authority of this section of state law.

The proposed legislation expands the discretion of local municipalities in a manner that allows, by ordinance, creation of programs that will offer tax credits for actions that the local governing body determines will improve air quality. The language proposed requires that eligibility, conditions, and other criteria for the tax credits be established by ordinance.

Example of how this proposed legislation might be used by a municipality include:

- Incentives to residents to exchange old-style wood stoves for EPA certified wood stoves. Data show that EPA certified wood stoves reduce fine particulate emissions by approximately 67% over non-EPA stoves. It is clearly in the interest of any community with air quality nonattainment issues to have citizens who choose to heat with wood do so in the most environmentally friendly way possible.

- Incentives to residences or commercial businesses to improve the energy efficiency of their property. Reduced fuel consumption would lead to reduced emissions from area heating or electric generation. Incentives could be based on calculated BTU savings, MW reductions, etc.

- Incentives to convert from carbon based energy consumption to alternative energy generation. This could involve tax credits for construction and use of a solar array or wind turbine to power/heat residential or commercial facilities.

As the Fairbanks North Star Borough and the State of Alaska look to find solutions that will help the borough and the state come into compliance with the clean air act, there exists a clear lack of ability to provide incentives at the local level. Compliance efforts will ask individuals to take and pay for actions to benefit the air quality of the entire community. Enactment of this bill will allow local municipalities the ability to lessen the individual cost of action through creation of a tax credit program not presently allowed by state law.

The Fairbanks North Star Borough Assembly passed a resolution including this item as an FNSB legislative priority for 2009 on December 11, 2008. We support this bill and urge its passage as drafted and introduced on February 4, 2009.

Thank you.

Jim Whitaker, Mayor

Nadine Winters, Presiding Officer

ALASKA MUNICIPAL LEAGUE
BOARD OF DIRECTORS

RESOLUTION #BOD2009-02

A RESOLUTION OF THE ALASKA MUNICIPAL LEAGUE BOARD OF DIRECTORS ADVOCATING FOR AMENDING TITLE 29 TO ALLOW LOCAL GOVERNEMNT OPTION TO CONSIDER PROPERTY TAX CREDITS FOR IMPROVEMENTS TO AIR QUALITY CONDITIONS AND FUEL CONSUMPTION

WHEREAS, Alaska Municipal League Board of Directors supports the issue of local governments being able to develop local responses to Alaska's energy solutions; and

WHEREAS, municipalities should have the ability to adopt local incentives to encourage individuals to make their homes and businesses more energy efficient thereby improving local air quality; and

WHEREAS, local taxation policy determined by Title 29 currently allows a property tax credit only for river bank habitat protection; and

WHEREAS, by providing for an optional tax credit, local municipalities will be able to consider providing property tax credits for actions, such as reducing fuel consumption, that councils or assemblies determine will improve air quality; and

WHEREAS, the Alaska Municipal League Board of Directors believes it is in the best interest of Alaska to allow local government to encourage its citizens to make improvements to their home and businesses that positively impact the community's air quality and to heat their homes and businesses in the most environmentally responsible way possible.

NOW, THEREFORE BE IT RESOLVED that the Alaska Municipal League Board of Directors supports an amendment to Title 29 that provides local municipalities with the ability to provide tax incentives for residences or commercial businesses to improve the energy efficiency of their property, convert from carbon based energy consumption to alternative energy generation or to take other steps that positively impact their community's air quality; and

NOW, THEREFORE BE IT RESOLVED that the Alaska Municipal League Board of Directors supports legislation authorizing an air quality improvement tax credit that allows specific eligibility, conditions, and other criteria for the tax credits to be established by local ordinance so that governments will have flexibility in crafting appropriate tax incentives that meet their individual community's needs.

PASSED AND APPROVED by the Alaska Municipal League Board of Directors on this 30th day of January, 2009.

Signed: _____

Denise Michels, President, Alaska Municipal League

Attest: Kathie Wasserman

Kathie Wasserman, Executive Director, Alaska Municipal League

(Prepared by Fairbanks North Star Borough)

1) **Can you give an example of what kind of program might be established?**

   One likely example that would be considered is a wood stove change-out program. This would allow the FNSB to provide credits to people who replace old style (higher polluting) wood stoves with EPA certified wood stoves (that have catalytic converters to re-burn combustion gases). It would likely be administered by the FNSB Air Quality staff.

2) **How much do the wood boilers cost? Can they be converted to meet EPA standards?**

   Wood Boilers cost 8,000 – 12,000. Right now there is no "conversion" mechanism. We're working to see if one can be developed – but there would be no way to predict success in the near future of developing a conversion unit. If there was an identified conversion method that consumed exhaust gases – that would be another likely example.

3) **How many households are there in FNSB?** About 30,000

   a. **How many use wood boilers?** Estimate is about 1,000 (Cold Climate Housing Research currently researching this)

   b. **How many use non-EPA approved wood stoves?** Estimate is about 5-6000 woodstoves total, with an estimate of 20%-33% non-EPA. (Also on CCHRC task list)

4) **Brief history of increased EPA Standards & why?**

   This provides great background on fine particulate matter.
   http://www.dec.state.ak.us/air/anpms/pm/pm_bckgrd.htm

   This provides specific information on Fairbanks and PM 2.5.
   http://www.dec.state.ak.us/air/anpms/pm/pm2-5_fbks.htm

5) **Economic study / impact of increased EPA standards on Fairbanks/Interior - evidence of impact?**

   None currently exist.

6) **EPA Timeline for compliance?** 3 years to have a Mitigation plan approved and in place.

7) **FNSB efforts toward compliance – examples (in addition to this legislation)**

   $2M research effort across winters on 2008-9 and 2009-10 to characterize and identify contributing sources and control measures to work into a program.

8) **Other Allies in support of the bill: I understand Juneau is in the same situation. Anywhere else in Alaska?**

   State DEC , City & Borough of Juneau are the main two on AQ.

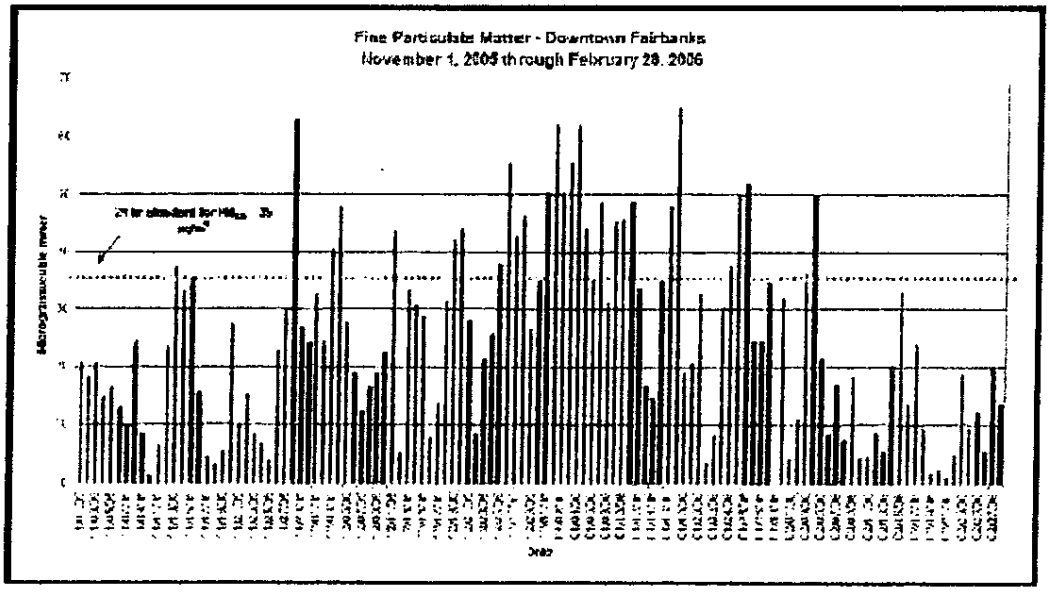
(Prepared by Fairbanks North Star Borough)

PM2.5 and Fairbanks

Fairbanks already has years of experience with programs associated with being in nonattainment for carbon monoxide. The reasons for Fairbanks problems with PM 2.5 may be similar. Surrounded by hills on three sides, Fairbanks is susceptible to temperature inversions which trap a layer of cold air close to the ground. Even relatively small amounts of pollution can be trapped for days, even weeks, at a time. This leads to episodes of poor air quality. Cold weather (below -10 or -15F) also seems to increase the PM2.5 levels. Fine particulates are products of combustion - burning more fuel, be it fuel oil or wood, when it is colder produces more PM2.5.

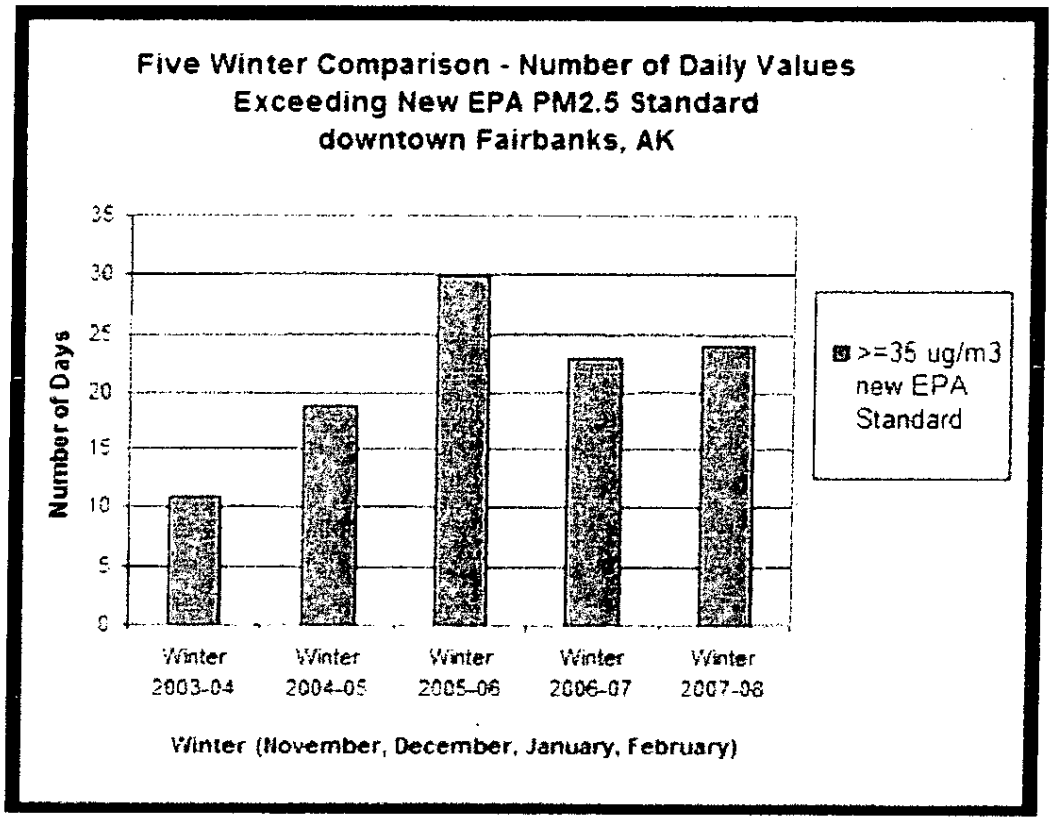
Fairbanks can be pro-active during the non-attainment process. The community can conduct studies, determine how to decrease the PM2.5 levels, and work to come into compliance prior to the attainment deadline. Should Fairbanks come into compliance, the community would not have to add control measures. This would avoid the need for the PM conformity process for federal projects.

The graph below shows the number of times PM2.5 levels in Fairbanks exceeded the September 2006 revised EPA particulate matter standard during the winter of 2005-2006. Fairbanks will likely exceed the PM2.5 standard in the years to come. Population growth, and a likely increase in use of woodstoves, seem responsible for the increasing number of PM2.5 violations.



(Prepared by Fairbanks North Star Borough)

The following chart shows the number of days the September 2006 PM2.5 Standard was exceeded in Fairbanks over the past five calendar years.



(from DEC Website: http://www.dec.state.ak.us/air/anpms/as/pm/pm_bckgrd.htm)

Particulate Matter - Background Information

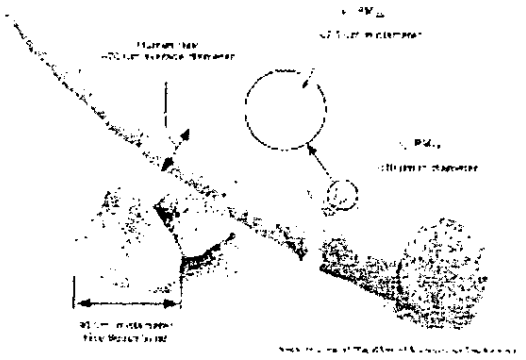
According to the Environmental Protection Agency (EPA), Particulate Matter (PM) is a "mixture of extremely small particles and liquid droplets."

Air quality professionals pay attention to particulate matter because these very small particles can cause health problems when inhaled. Specifically, particles less than 10 micrometers in diameter can pass the nose and throat and enter the lungs. A micrometer is one millionth of a meter.

Size is important to understand because the EPA classifies particulate matter as two types based on size. Alaska has problems with both types of particulate matter.

- **Coarse Particulate Matter (PM10)** is less than 10 micrometers in diameter. It primarily comes from road dust, agriculture dust, river beds, construction sites, mining operations, and similar activities. Most people in Alaska experience PM10 as dust.

- **Fine Particulate Matter (PM2.5)** is less than 2.5 micrometers in diameter. PM2.5 is a product of combustion, primarily caused by burning fuels. Examples of PM2.5 sources include power plants, vehicles, wood burning stoves, and wildland fires.



A single human hair is approximately 70 micrometers or seven of the largest PM10 particles in diameter. A single human hair is almost 30 times larger than the largest fine particle, PM2.5.

Air pollution standards are given as a mass of material in a volume of air: micrograms per cubic meter (µg/m3). A microgram is one millionth of a gram. A paper clip weighs about a gram. Imagine chopping the paperclip into a million equally sized pieces. One of those pieces would weigh about a microgram. A cubic meter (approximately 39" X 39" X 39") describes a volume of air that is about the size of a washing machine. If you place one of the million pieces of the paper clip in the space occupied by the washing machine, you would have 1 µg/m3.

NEW PARTICULATE MATTER REGULATIONS

The EPA recently updated the national standards for Particulate Matter. For PM10, the EPA retained the current 24 hour PM10 standard of 150 µg/m3 and eliminated the annual PM10 standard. The EPA increased the stringency of the PM2.5 standard by lowering the previous 24 hour standard of 65 µg/m3 to 35 µg/m3. EPA left the annual PM2.5 standard of 15 µg/m3 in place.

(from DEC Website: http://www.dec.state.ak.us/air/anpms/as/pm/pm_bckgrd.htm)

CONTROLLING PARTICULATE MATTER

Violations of air quality standards mean the state government and impacted communities must work together to formulate a plan to reduce particulate emissions.

PM10 - The state may recommend EPA designate areas violating the PM10 standard as "nonattainment." If EPA agrees, a process of planning and rulemaking begins for transportation related problems; these areas gain access to federal highway funds dedicated to air quality improvement. A second option might be for state and impacted communities to sign a "Memorandum of Agreement" with EPA for a pollution reduction plan. A Memorandum Of Agreement (MOA) avoids the stigma of being in "nonattainment" and provides some flexibility and timeliness in formulating a pollutant reduction plan, but does not allow special access to the air quality transportation funds.

PM2.5 - With the new PM2.5 standard, the EPA expects and is looking for states to designate communities in violation of the standard as nonattainment areas. The state may recommend designating the Fairbanks North Star Borough as a nonattainment area for PM2.5.

What does "nonattainment" status mean?

The state may recommend either a community or a region as a PM non-attainment area. Exactly how the state will group or classify portions of Alaska is still being discussed.

If the state submits an area as "nonattainment" for PM, the EPA has 18 months to approve or disapprove the request. The state begins forming plans to reduce PM levels. This is done in close cooperation with local and regional governments as pollution controls are generally enacted at a local level. If EPA approves the state's request for designating an area as "nonattainment," the state has 18 months to submit an "attainment" plan which includes all the controls and programs agreed to by the state and local governments. Two 18 month periods means it can take 3 years from submittal of the state recommendation to when controls are put into place. The state and local governments then have five years to bring nonattainment areas into attainment.

Next Steps

The state is in the early stages of planning a strategy to comply with EPA's new PM rules. The state will work with communities to determine the most effective controls. At this point, the state does not know how the areas will be designated, or what the controls might be. As the state works with communities and is given permission from communities to publicize information on PM levels and control strategies, the state will post updates on this website.

MEMORANDUM

STATE OF ALASKA
Office of the Governor
Office of Management and Budget
PO Box 110020
Juneau AK 99811-0020
(907) 465-4660, fax 465-3008

To: Commissioners
Administrative Services Directors

Date: June 26, 2008

From: Karen J. Rehfeld
Director

Subject: FY2009 General Fund
Savings Plans

As you know, the Governor has set a savings target of $20 million general fund for FY2009. The attached document provides additional information and the savings targets by department to assist you in developing a FY2009 savings plan.

The savings targets were established as 2.9% of each department's estimated general fund personal services. Personal services are the only budget line item that includes fund source data. The estimated general fund personal services amounts came from the FY2009 Governor Amended Final scenario, which will be updated in the FY2009 Management Plan scenario.

Even though the target amounts were based on personal services, the saving plan does not necessarily need to come from personal services. However, since personal services is a large portion of a department's budget, cost savings may be achieved by requiring an internal review process before approving recruitment for vacant positions or by extending the vacancy by a month or more. Departments should also limit the creation of new positions.

As of July 1, OMB approval will be required for the creation of ALL new positions. In addition, OMB approval will be required for all reclassifications resulting in more than a two-range increase. Reclassifications as a result of flex-range positions or if initiated by the Division of Personnel are exempt from OMB approval. Updated personal services revised program procedures will be included in the July 2008 version of the Revised Program Manual. The manual will be available shortly.

I encourage you to review all line items and programs for potential savings. Consider savings in travel costs by using airline miles for ticket purchases, consolidating or reducing the number of trips and/or the number of travelers, and holding more video or teleconference meetings. Every year state agencies lapse funds. It may be helpful to look at FY08 lapse as the fiscal year ends for potential savings ideas.

Your department savings plan with amounts and impacts by component is due to OMB by Friday, August 1. If you have any questions, please contact me or your OMB Analyst. Thank you for your assistance.

Attachment

Task: Identify $20 million in FY2009 General Fund Savings

General fund target methodology

Targets established as a percentage of each department's estimated general fund personal services.

Departments are not limited to the personal services line for actually obtaining the required savings.

As of July 1 all new position requests must be submitted to OMB for approval along with reclassification requests that increase more than two ranges. Reclassifications associated with flex-range positions or initiated by the Division of Personnel are exempt from OMB review.

Departments develop savings plan and submit it to OMB by Friday, August 1.

No Washington Monuments!

Encourage departmental review of ALL line items and programs.

Engage department staff.

Savings plan memo to identify the amounts and impacts by component.

Identify the reductions that can be continued in the FY2010 budget.

Chief of Staff and OMB Director review each department's plan and work with department to modify if necessary.

Present summary to Governor for approval.

Departmental plans to be finalized by August 29 and incorporated into FY2009 Management Plan scenario.

Each department will establish general fund expenditure AKSAS restrictions by line item per the approved plan and report quarterly to OMB on progress.

Each department will develop a cost savings plan for FY2010 budget (may be different than that proposed for FY2009) and be prepared to discuss it at their Heads Up meetings in September - October, including whether or not legislation or regulations would be required for implementation.

Targets:

Administration - $1,100.0	
Commerce, Community & Economic Development - $80.0	
Corrections - $3,910.0	
Education & Early Development - $270.0	
Environmental Conservation - $390.0	
Fish & Game - $940.0	
Governor - $440.0	
Health & Social Services - $4,760.0	
Labor & Workforce Development - $330.0	
Law - $1,030.0	
Military & Veterans Affairs - $160.0	
Natural Resources - $1,300.0	
Public Safety - $2,280.0	
Revenue - $390.0	
Transportation & Public Facilities - $3,220.0	
Total	**$20,600.00**

Date: October 27, 2008

From: Karen J. Rehfeld
Director

Subject: Quarterly Reporting on FY2009 General Fund Savings Plans

During last month's Heads Up Meetings, we briefly discussed progress to date with the FY2009 Savings Plan in conjunction with potential supplemental needs. In order to keep track of efforts made by each agency toward meeting the savings target, we would like to receive a report on your progress for the first quarter of FY2009.

Please submit a memo that lists the approved components of your plan; the savings amounts assigned to each, if they were specified; your actual or estimated savings as of September 30 for each item identified; and any comments.

This format will be helpful:

Savings Plan	Savings Target	Sept 30 Savings	Comments
Hold 5 PCNs vacant in XYZ Division	$350.0	$17.5	On track to achieve this savings target
Reduce travel costs by using accrued miles	$100.0	$15.0	Struggling with this savings target. If unable to meet this target, will find other savings in department.
Savings Plan Totals	**$450.0**	**$32.5**	

If your department is having significant difficulty meeting your savings target, please contact me immediately. Otherwise, please submit your first quarter report to your OMB Analyst by October 31. Please use this format for subsequent quarterly reports (due dates are on the budget calendar).

Thank you for your efforts to control spending and find efficiencies that may result in cost containment and costs savings. The careful managing of our budget will have positive results in reduced supplemental need or in helping to find areas in the budget that may be trimmed in the future.

Rehfeld, Karen J (GOV)

From: Rehfeld, Karen J (GOV)

Cc: GOV OMB Staff; GOV Special Assistants; Nizich, Michael A (GOV); Goode, Kelly C (GOV)
Subject: $20 Million Savings Target

Good Morning –

I have received some feedback from legislators who are hearing from their constituents that we are "cutting the FY09 budget" and impacting services.

In response, I explained the governor's concern about managing the growth in the operating budget and her goal in setting the $20 million savings target. I let them know that we have asked agencies to see what we may be able to accomplish in savings in FY09 by managing those things we have control over, finding efficiencies, and implementing changes in business processes and practices that could ultimately result in some savings.

We used 2.9% of GF personal services to establish the savings target so that departments would have a number to work toward, but we did not suggest that savings would have to come from personal services. We encourage departments to look at all line items for potential savings.

We typically end up with a GF lapse at the end of the year without imposing any savings targets. We have NOT asked agencies to cut services or positions. We have suggested delaying the filling of vacant positions or reassigning work, if possible, to achieve some savings.

We look forward to hearing your plans – emphasis on plans – in early August. The careful managing of our budget will have positive results in reduced supplemental need or in helping to find areas in the budget that may be trimmed in the future.

Please remind your divisions and programs that it is in everyone's best interest to be good stewards of public resources and demonstrate our commitment to provide quality service in the most efficient and effective manner. We have very talented and creative state employees who have excellent ideas on how to better serve Alaskans. Juneau's recent energy conservation efforts are a great example of what is possible.

Thanks for your help in communicating the positive aspects of our savings efforts!

Karen

The Honorable Bill Stoltze
Co-Chair, House Finance Committee
Alaska State Legislature
State Capitol, Room 515
Juneau, AK 99801-1182

Dear Finance Committee Co-Chairs:

During my presentation before the House Finance Committee on January 26, 2009, and the Senate Finance Committee on February 4, 2009, I was asked to provide documents regarding the $20 million savings target. I have enclosed:

- memorandum of June 26, 2008, with instructions to state agencies;
- follow-up email of July 11, 2008, to state agencies;
- memorandum of October 27, 2008, regarding quarterly reporting;
- the departments' savings plans;
- the departments' second quarter report; and
- a one-page summary as of December 31, 2008

As the Governor stated in her operating budget transmittal letter dated May 23, 2008, she implemented a $20 million savings target last summer. We asked agencies to see what they could accomplish in savings in FY2009 by managing those things we have control over, finding efficiencies, and implementing changes in business processes and practices that could ultimately result in some savings.

We did not ask agencies to cut services or positions. We encouraged departments to look at all line items for potential savings. We also suggested delaying the filling of vacant positions or reassigning work, if possible, to achieve some savings. Agencies prepared savings plans and have provided quarterly reports on the status of the plans.

The Departments of Public Safety and Military and Veterans Affairs were exempted from the savings target although the commissioners are working hard to find efficiencies in their agencies also.

Departments' savings plans and reports vary in the amount of specificity, but all are committed to achieving the savings. We included $17.5 million in reductions in the FY2009 supplemental bill based on the savings identified through these plans. With five months left in the fiscal year, adjustments may be needed in the savings plans at the component level in order to achieve the target. In order to provide flexibility, we included unallocated reductions in the commissioner's office for the amount of the departments' savings targets with two exceptions - both related to Education: a reduction in the school performance incentive program and a reduction in school debt reimbursement.

Please contact me if you have additional questions.

Sincerely,

Karen J. Rehfeld
Director

Dear Finance Committee Co-Chairs:

The executive branch hiring freeze was instituted by the Governor on January 23 as a management tool to help save funds, particularly general funds, in FY2009 given our new fiscal realities. We did not mandate a specific dollar amount to achieve through the hiring freeze, but asked departments to critically look at their staffing needs and if possible, delay hiring by some period of time without negatively impacting services to the public. Any general fund savings realized by the hiring freeze will ultimately reduce the amount of the FY2009 draw from the Constitutional Budget Reserve (CBR) as proposed in the supplemental bill. Any savings from a non-general fund funding source that is subject to the year-end sweep into the CBR will increase the CBR balance.

I have enclosed the following hiring freeze information:

- January 23, 2009, memorandum establishing the hiring freeze and listing exemptions to the hiring freeze;
- February 6, 2009, memorandum adding clarification of exemptions to the hiring freeze; and
- the listing of waiver requests received as of this date and the disposition of them

printed on recycled paper

I also want to share with you our estimates of the number of permanent full-time positions (PFTs) potentially affected by the hiring freeze. As of December 31, 2008, there were nearly 1,500 vacant budgeted PFTs, of which 844 had general funds (GF) in their funding mix. The GF cost for the remainder of the fiscal year for those 844 vacant PFTs is approximately $25.5 million. As you know, agencies generally do not receive 100% funding of their personal services costs as there is a presumption of some vacancy during the fiscal year.

We know that some of these positions will remain vacant in order to achieve the budgeted vacancy factor and also efforts to achieve additional savings in FY2009 by managing position vacancy. Our initial $12 million estimate of potential savings was based on approximately one-half of the GF cost for the remainder of the fiscal year. We know there will be waivers requested and granted, so we do not expect to achieve that level of savings.

The hiring freeze explicitly exempts several types of positions, including public safety and 24 hour institutions. Any savings achieved will increase in the GF lapse at the end of the fiscal year which will reduce the amount of the draw on reserves to balance the budget.

Sincerely,

Karen

From: Michael Nizich
Chief of Staff

Subject: Purchasing Restriction and Hiring Freeze

In her State of the State speech before a joint session of the Alaska Legislature last night, Governor Palin described the period of financial uncertainty due to current oil prices. As you may recall, last spring when the FY2009 budget was finalized, we expected the price of a barrel of oil to average $83.04 during this fiscal year. The price is currently hovering in the $30 - $40 range and is having a significant impact on our state revenues. In light of this, we need to take prudent management actions.

The Governor announced the immediate implementation of a non-essential purchasing restriction and a hiring freeze to reduce the impact on state general funds. Each Commissioner will determine what items are non-essential, but would likely include conference travel, administrative travel, subscriptions, supply or equipment purchases that could be delayed until FY2010, etc. The hiring freeze applies to all positions, except for those that are necessary to protect the health and safety of Alaskans. Departments may request a waiver from the hiring freeze due to extraordinary circumstances. That process is outlined below.

The hiring freeze applies to:

- All full-time, part-time, non-permanent and seasonal positions in bargaining units and in the partially-exempt and exempt service paid for by general funds and other state funds.
- Requests to establish new non-permanent positions.
- Requests to extend non-permanent positions.
- Positions that provide administrative support and maintenance in 24-hour facilities.
- Positions partially funded by federal funds.

The hiring freeze does not apply to:

- Positions essential to protect Alaska citizens. This includes Alaska State Troopers, corrections and probation officers, airport police and fire officers, airport screening officers, and employees that provide patient and resident services and food service at 24-hour institutions. The following are considered 24-hour institutions:
  - Correctional Facilities
  - Juvenile Justice Facilities
  - Alaska Military Youth Academy
  - Pioneer Homes
  - Alaska Psychiatric Institute
  - AVTEC
  - Mt. Edgecumbe High School
- Positions for which an offer of employment was made prior to January 23, 2009.
- Lateral transfers and promotions within the same department.
- Range changes in flexibly-ranged positions.
- Reclassifications within the same job family.
- Employees delegated the authority to perform the duties of a vacant position that is assigned a higher pay range if bargaining unit provisions or regulations provide for compensation.
- The use of on-call non-permanent employees if only used to perform work essential to protect the public's safety or meet other essential state responsibilities.
- Positions fully funded by federal funds. The Division of Personnel must be sent funding verification from the Commissioner of the requesting department for any new job posting for a position that is 100% federally funded.
- Alaska Aerospace Development Corporation,
- Alaska Commission on Postsecondary Education,
- Alaska Housing Finance Corporation,
- Alaska Industrial Development and Export Authority,
- Alaska Oil and Gas Conservation Commission,
- Commercial Fisheries Entry Commission
- Permanent Fund Corporation, and
- Regulatory Commission of Alaska.

Recruitments currently on Workplace Alaska will be open through the stated closing date. However, a notice to all applicants will be posted on Workplace Alaska advising applicants of the hiring freeze and stating that only positions necessary to protect the health and safety of Alaskans and to meet other essential state responsibilities will be filled. A currently posted recruitment will not be extended unless a waiver has been approved.

Positions providing direct patient or resident services (including food services) or that are essential in protecting Alaska citizens, but not employed in a 24-hour institution or in one of the exempt job classifications listed above IS subject to the hiring freeze, but a waiver may be requested.

If a department believes filling a position is necessary to protect the public's safety or meet other essential state responsibilities, a request for waiver from the freeze must be submitted to OMB. The waiver request must be submitted in a memorandum addressed to the Chief of Staff and approved by the department's Commissioner. The memorandum must include the following information:

- position title, range, ADN, annual personal services cost, and fund source (if CIP Receipts, identify the source of the CIP Receipts);
- the essential results that the person will be responsible for delivering;
- the extraordinary circumstances that contribute to why a waiver should be approved; and
- how long the position has been vacant.

When a waiver is approved, the department is responsible for providing a copy of it to their HR Manager in the Division of Personnel.

On behalf of the Governor, please accept her thanks for your cooperation in meeting this challenge.

Subject: Hiring Freeze
Update

In response to questions that have been asked about hiring freeze applicability, I want to clarify that the following positions are also exempt from the hiring freeze:

- Recall seasonal positions.
- Student, college, and graduate interns.
- New hires into seasonal positions for the Department of Fish and Game, Department of Natural Resources, and the Department of Transportation and Public Facilities.
- On-call and temporary substitute positions.
- EVOS Trustee Council.

The Honorable Bert Stedman
Co-Chair, Senate Finance Committee
Alaska State Legislature
State Capitol, Room 516
Juneau, AK 99801-1182

Dear Co-Chairs Hoffman and Stedman:

The following is provided in response to questions from the committee during my presentation on February 4, 2009.

1. **Constitutional responsibilities:** Art 9/Sec 16 of the Alaska Constitution sets a population and inflation adjusted annual spending limit. Within the limit, 1/3 is to be reserved for capital projects and loans. Given the administration's desire to maintain a combined (operating & capital) annual growth of 3% - can you help the committee understand how we can include both budgets in the growth target and still accomplish the constitutional requirement of reserving at least 1/3 of the annual appropriation for capital?

The long range plan that the Administration put forward associated with the release of the December 15 budget targeted general fund expenditure growth rate of 3% annually. This figure assumed the Governor's FY10 budget as the base and projected 3% annual growth in general fund spending regardless of whether the funds were in the capital or operating budget. Implicit in that assumption was that to the extent that operations costs can be held to a 3% or lower annual growth rate, growth in the capital budget would also grow at a 3% rate. It has been the Administration's goal to contain the growth of the operations budget, however factors such as growth in the state portion of Medicaid, the State's commitment to the contain the cost to public employers of paying the unfunded liability of the retirement systems, implementation of the Education Task Force's recommendations, and oil tax credits are portions of the operations budget that make the target of 3% growth in the operations portion of the budget challenging.

Additionally, in 1983 Law opined on the issue of the 1/3 reservation for capital projects and loans in art. IX, sec. 16. Op. Att'y Gen. No. 1 (1983). Law observed that the language was "ambiguous when applied for a year in which revenue available for

printed on recycled paper

appropriation falls short of the adjusted limit for that year." Id. at 16. Law advised that it would be unwise to "blindly apply the allocations imposed by the appropriation limit when conditions impose an even more stringent limit." Id. at 16-17. Law concluded that "the best way to resolve the ambiguity is to disregard the one-third allocation reserved for capital projects and loan appropriations when economic conditions impose a limit which is more restrictive than that set out in section 16." Id. at 17-18.

To the extent that the revenues currently available for appropriation, less the Permanent Fund Earnings Reserve, are significantly less than the appropriation limit FY2010, we concur with Law's advice that the one-third reservation in sec. 16 is not triggered.

2. **Efficiencies:** Has the administration addressed the problem of capital appropriations – DOT projects in particular – losing value due to long delays between when the time when the appropriation is made and when the project is finally executed? Inflation and cost escalations during these long delays require the legislature to provide additional supplemental project funding.

The Department of Transportation & Public Facilities (DOTPF) has instituted a policy that project cost estimates include contingencies to address higher than anticipated bids and change orders during construction. The inflation over the last few years has been unprecedented and resulted in projects being under funded. Single line appropriations are also challenging because when costs increase there is no ability to address it without additional funding from the legislature. Without flexibility and funds to use to cover cost increases, the projects are held up until additional funds are obtained.

The cost estimates will appear to be over inflated but it will allow projects to progress more timely. Unused funds can then be re-appropriated by the legislature.

3. **Hiring Freeze Data:** Senator Elton asked if you could provide the committee with written copies of the hiring freeze data you testified to in committee. Specifically, quantifying the full-time vacancies as of Dec 31, 2008 that will be subject to the freeze or waiver process broken out by community.

Enclosed is a summary of the full-time vacant general fund positions as of December 31, 2008 by community and department and our estimate of the positions that are exempt from and subject to the hiring freeze.

4. **Hiring Freeze: Guidance, Goals and Progress:** Senator Huggins asked 1) to see a copy of specific guidance that was provided by OMB to the agencies regarding the hiring freeze, 2) what savings goals you expect to achieve by instituting the hiring freeze, and 3) for a monthly summary of the waivers requested/granted/denied by agency (until the freeze is lifted). You stated in your testimony that you initially expected to achieve a $12 mill savings through the hiring freeze but because of exemptions and waivers you didn't expect to achieve that number. 4) What do you now expect is a reasonable savings to achieve as a result of the freeze?

The committee should have copies of my letter of February 9, 2009, containing copies of specific guidance given to departments and a list of the waiver requests received and processed as of February 6. The $12 million estimate used in my testimony was based on approximately 1/2 of the general fund cost of the vacant positions for the remainder of this fiscal year. We know some of these positions will be filled either through exemptions from the hiring freeze or through waivers from the hiring freeze. At this time, I cannot estimate the amount of savings that will result from the hiring freeze. Enclosed is an update of waiver requests received and processed as of March 3.

5. **Half-time vs. Full-time Employees:** Is the movement of half-time/part-time employees to full-time employees restricted by the hiring freeze? You indicated during your testimony that you felt that it would be allowed, can you please clarify how you will be handling those moves during the freeze?

Time status changes are not part of the hiring freeze. However, agencies must get approval to change the status of a position from part-time to full-time.

6. **New School Construction:** In the last 3 capital budget cycles the Governor has not proposed any new school construction. There seems to be support for the 70/30 debt reimbursement program for organized communities within the administration, but not for new schools in unorganized Alaska. What is the administration's policy on new school construction in rural Alaska?

The administration has requested funding for school major maintenance projects, which also includes major renovations. The administration's policy has been to focus on repair and upgrade of existing facilities.

7. **Kasayulie Lawsuit:** Senator Hoffman wanted to know if the administration is working on a settlement to the Kasayulie case, what the status of that case is and if the case is having any influence on the administration's approach to school construction in rural Alaska.

Settlement negotiations in *Kasayulie* have been off and on. The parties agreed that *Kasayulie* negotiations would be suspended during the *Moore* proceedings. The State has since attempted to restart negotiations but has not yet had a response from plaintiffs. The Department of Education & Early Development annually ranks proposed projects for grant funding based on need, and presents the list of priorities to the Governor and the legislature.

8. **Kalskag School Construction:** Senator Olson asked if there would be an appropriation request forthcoming from the administration to replace George Morgan Senior High School in Kalskag that burned on January 28th.

We are working with the Department of Education & Early Development to determine what is necessary for the replacement of the Kalskag high school to include in the FY2009 supplemental bill. The estimated replacement cost is $19 million, with the state share at approximately $18.7 million.

Please contact me if you have additional questions.

Sincerely,

Karen J. Rehfeld
Director

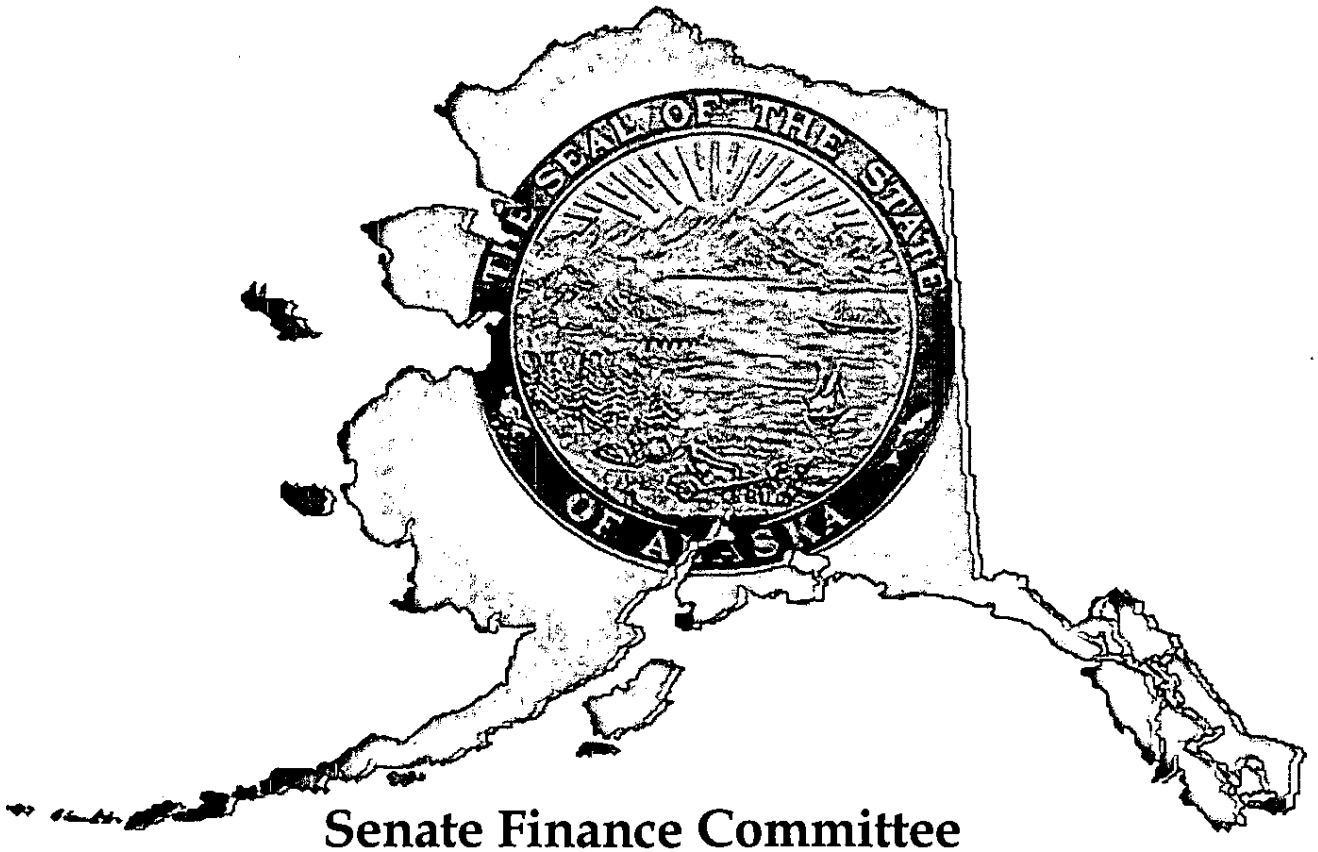
FY2009/FY2010 Budget Overview



Senate Finance Committee

Governor's Office of Management and Budget

February 4, 2009

Budget Guidelines

Starts with clearly established goals communicated to state agencies, the legislature and the public

Governor Palin's budget goals have been consistent:

- Slow the growth of government
- Live within our means
- Save for the future
- Focus on core services
  - Constitutional and statutory responsibilities
  - Invest in responsible resource development

Budget Direction

The fundamental building blocks

- Focus on core state services,
- Find efficiencies in service delivery,
- Identify savings or reductions,
- Redirect existing resources, where possible, to higher priority items, and
- Limit growth in operating budget.

FY2009 Revenues/Expenditures

A year of unprecedented revenue volatility

FY2009 Budget Version Forecast Version	Governor Dec. 15, 2007 Fall 2007	Enacted May 23, 2008 Spring 2008	Post Special Sessions	Governor Dec. 15, 2008 Fall 2008	Interim Forecast With Supplemental January 2009
Price Per Barrel	$66.32	$83.04	$100 +	$77.66	$63.28
Production	0.701	0.689		0.689	0.686
Total Revenue*	**$5,264.9**	**$7,523.3**	**$7,523.3**	**$6,765.4**	**$5,536.2**
Budget Appropriations	**$4,609.6**	**$5,045.6**	**$5,979.7**	**$5,992.3**	**$5,723.7**
Savings Appropriations	**$500.0**	**$1,175.5**	**$1,195.3**	**$1,175.3**	**$1,175.3**
Surplus/(Shortfall)	$155.3	$1,302.2	$348.3	($402.2)	($1,362.8)

*Includes tax credits and carryover

Office of Management and Budget

FY2009 Revenue Shortfall

Steps taken and in process to address a revenue shortfall

- Governor Palin signed the appropriation bills on May 23, 2008, with instructions to the departments to achieve at least $20 million in savings in the operating budget.
- Freeze hiring and purchases issued January 23, 2009.
- FY2009 supplemental bill proposes $268.6 in reductions in current year authorized expenditures and the overall spending plan.
- Seeks legislative approval for use of reserves.

Reserve Balances

Estimated balances as of December 31, 2008

- Constitutional Budget Reserve $6.8 billion
  - Main Fund $3.2 billion
  - Sub Fund $3.6 billion
- Statutory Budget Reserve $1.0 billion
- Public Education Fund $1.0 billion
- AK Housing Capital Fund $342.3 million

FY2009 Economic Stimulus Bill

Moving quickly at the federal level

Federal action expected mid-February

- Formula and competitive grants
  - Transportation
  - Energy
  - Education
  - Health Care
- State agencies reviewing the legislation
- Anticipate separate supplemental bill

FY2010 Budget Overview

Consistent fiscal policy

- Dec. 15 budget proposes to spend less general fund dollars in FY2010 than we are spending in the current year - $4.9 billion compared to $5.2 billion (*comparison excludes resource rebate*)

- Budgeted $389 million below the fall forecast of $5.27 billion.

- Interim forecast will be provided on February 18 along with budget amendments.

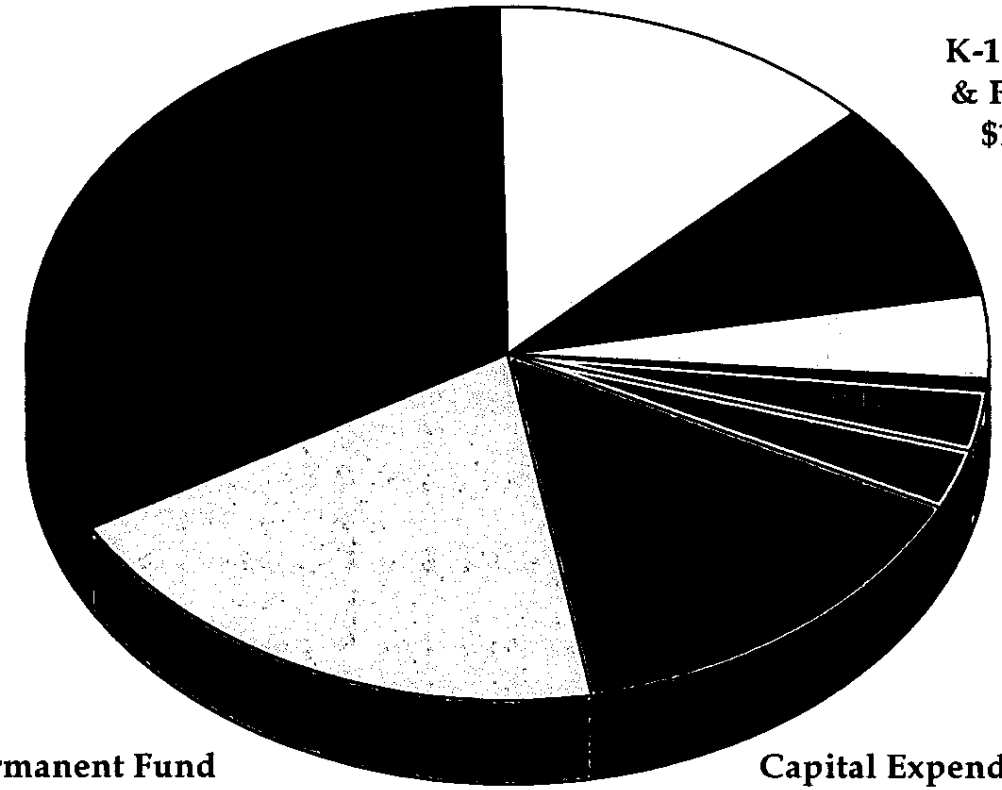
FY2010 Budget Highlights

Focus on priorities

- Operating
  - K-12 Education $1.05 billion
  - Revenue Sharing $60 million
  - Retirement system unfunded liability $451.2 million
  - Exploration tax credits $300 million
  - State employee contract increases $31 million
- Capital
  - Gas line projects $82.1 million
  - Renewable Energy Fund $50 million
  - School Major Maintenance $40.5 million
  - Highways & Aviation $772.5 million
  - Water & Sewer $114.8 million

FY2010 Budget Request

Provides statewide programs and services



Office of Management and Budget

1/ Excludes duplicated authorizations.

To Meet FY2009/FY2010 Budget Challenges

and Protect Alaska's economy

- Fiscal Discipline
  - Savings and efficiencies
  - Budget reductions where practical and sustainable
  - Freeze hiring and purchases
- Prudent use of Reserves
  - $8 billion in reserves
  - Careful planning to manage shortfall in the short-term and provide long-term stability
  - Avoid massive single-year cuts

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
1	1	Administration	Office of the Commissioner	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(1,100.0)				(1,100.0)
2	1	Administration	Personnel	Personnel Board investigations and support - contracts for legal services for complaints filed with the board	725.0				725.0
3	1	Administration	Retirement and Benefits	This adjustment is necessary to properly allocate costs of the defined contribution plan, Tier 4, to the correct fund sources, per the fiscal note for Ch. 9, FSSLA2005 An Act relating to the teachers' and public employees' retirement systems and creating defined contribution and health reimbursement plans (SB 141).	(107.6)		154.1	120.0 PERS 34.1 TRS	46.5
4	1	Administration	Retirement and Benefits	Funding is needed to conduct an analysis of how pending legislation might affect retirement systems of the State. Per AS 24.08.036, a cost analysis must be done for legislation that may affect retirement systems of the State before that legislation is reported to the Rules Committee. General Funds are requested so that no current pension trust funds are impacted.	50.0				50.0
5	1	Administration	Group Health Insurance	The Division of Retirement and Benefits is preparing to re-bid the health benefits Third Party Administrator (TPA) contract and needs additional funding to have the healthcare consultant (Buck) help prepare information for the bid process, audit the performance of the current TPA contractor, and analyze the the long term care projections to determine if the State is carrying adequate reserves.			250.0	Group Health and Life Benefits Fund	250.0
6	1	Administration	EPORS	Actual increased program retirement and health benefits	85.0				85.0
7	1	Administration	Office of Public Advocacy	Authorization is needed to accept and spend two federal grants. The two grants are Court Appointed Special Advocate (CASA) program funds from the National CASA Program. One is for $31,000.00 and the other is for $1,949.00 for a total of $32,949.00. Both were awarded to the Office of Public Advocacy after the end of the last legislative session.		33.0			33.0

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
8	1	Administration	Public Defender Agency	Caseload and cost increases - For the 1st half of FY2009, the Public Defender Agency has experienced caseload growth in the following key areas: The Anchorage Criminal Section has experienced an 11% increase for all cases, a 30% increase in felony petitions to revoke probation, a 14% increase in misdemeanor cases, and a 70% increase in misdemeanor petitions to revoke probation. Fairbanks has experienced a 5% increase in felony cases and a 14% increase in juvenile delinquency cases. The Civil Section within the Public Defender Agency has experienced a 7% increase in all cases, a 15% increase in juvenile delinquency cases, and a 9% increase in civil commitment cases. The Palmer office has seen a 35% increase in Child in Need of Aid (CINA) cases. Multi-year trends show significant increases over the past five years and predict caseload increases for FY2009. Statewide closing rates, however, are below 100% for the most complex caseloads, which indicates an increase in workload due to the increasing complexity of casework and trial preparation.	1,000.0				1,000.0
9	1	Administration	Motor Vehicles	Additional funding is needed to provide for the purchase of license plates, driver manuals, and license tabs. The plates, manuals and tabs were previously funded in the capital budget. When the budget was established in the operating budget, the division underestimated the annualized costs and the amount added was insufficient to cover the costs now being incurred. In addition, some materials costs have increased. It is critical that Division of Motor Vehicles not run out of these materials and have to stop issuing licenses and plates. The funding requested here is necessary to purchase sufficient stock and inventory for the remainder of FY2009.			562.8	Receipt Supported Services	562.8
10	1	Commerce	Commissioner's Office	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(80.0)				(80.0)

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
11	1	Corrections	Office of the Commissioner	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(750.0)				(750.0)
12	1	Corrections	Inmate Health Care	The department is requesting a supplemental of $1,405.8 for increased inmate health care costs that includes fees-for-service, increased release medications for mentally ill inmates, and Inmate Health Care staff cost overages due to overtime for 24-hour medical coverage. $646.4 shortfall is projected in the in-state and out-of-state medical fees for service. The department is seeing an increase in chronic disease associated with diabetes, cancer, heart disease, surrounding health-related issues due to obesity, and health issues associated with care for geriatrics. $361.0 shortfall is projected for psychotropic drugs. As of September 2008, the department's Mental Health Unit began providing additional release medications to inmates with serious chronic mental illness as an interim measure until treatment begins with a community mental health provider. $398.4 shortfall is projected for overtime for 24-hour medical coverage; contractual nursing shortages; and the successful hiring of a Forensic Psychiatrist.	1,405.8				1,405.8
13	1	Education	Executive Administration	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(270.0)				(270.0)
14	1	Environ Cons	Office of the Commissioner	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(390.0)				(390.0)
15	1	Fish and Game	Commercial Fisheries Special Projects	Transfer excess SDPR from Commercial Fisheries Special Projects to Administrative Services to cover indirect receipt costs The FY10 budget contains a corresponding transfer.			(145.0)	Statutory Designated Prgm. Rcpts.	(145.0)
16	1	Fish and Game	Commercial Fisheries Special Projects	Transfer excess SDPR from Commercial Fisheries Special Projects to Fish and Game Boards and Advisory Committees to cover public information requests. The FY10 budget contains a corresponding transfer.			(6.0)	Statutory Designated Prgm. Rcpts.	(6.0)

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
17	1	Fish and Game	Commercial Fisheries Special Projects	Transfer excess SDPR from Commercial Fisheries Special Projects to Habitat to cover the North Slope Borough Teshekpuk Lake Studies.			(22.0)	Statutory Designated Prgm. Rcpts.	(22.0)
18	1	Fish and Game	Commissioner's Office	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(1,000.0)				(1,000.0)
19	1	Fish and Game	Administrative Services	Transfer excess SDPR from Commercial Fisheries Special Projects to Administrative Services to cover indirect receipt costs. The FY10 budget contains a corresponding transfer.			145.0	Statutory Designated Prgm. Rcpts.	145.0
20	1	Fish and Game	Fish and Game Boards and Advisory Committees	Transfer excess SDPR from Commercial Fisheries Special Projects to Fish and Game Boards and Advisory Committees to cover public information requests. The FY10 budget contains a corresponding transfer.			6.0	Statutory Designated Prgm. Rcpts.	6.0
21	1	Fish and Game	Habitat	Transfer excess SDPR from Commercial Fisheries Special Projects to Habitat to cover the North Slope Borough Teshekpuk Lake Studies.			22.0	Statutory Designated Prgm. Rcpts.	22.0
22	1	Governor	Unallocated Reduction	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(465.0)				(465.0)
23	1	Governor	Executive Office	Transfer AGIA Coordinator PCN and funds to DNR (PCN 01-802X) $158.0 from personal services and $25.0 from travel.	(183.0)				(183.0)
24	1	Health & Soc Svcs	Behavioral Health Medicaid	Reduce GF and federal authorizations based on current trends and projections.	(8,100.0)	(8,100.0)			(16,200.0)
25	1	Health & Soc Svcs	Medicaid Services	Reduce GF due to reduction of RSA with Nursing due to recent determination of error in billing methodology. See related items in Nursing and Administrative Support Services. A corresponding FY10 budget amendment is likely.	(2,000.0)				(2,000.0)
26	1	Health & Soc Svcs	Medicaid Services	Medicaid rate increase for physician services effective 1/1/09 tied to increased Medicare rates. Many of the reimbursements for services are going up as much as 20-30% instead of the usual 4-5%. The ten most frequently used procedures are increasing 27%. The department analyzed nearly 3,000 medical procedure codes to determine the estimated cost impact.	6,000.0	6,000.0			12,000.0

3372

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
27	1	Health & Soc Svcs	Probation Services	Funds necessary for guard hires for escorts, travel for juveniles who are not Medicaid-eligible, psychiatric evaluations that are not Medicaid-eligible and other various court-ordered costs. Recipients of the funds are youth either in division custody or under court order to receive specified services. The department previously received legislative direction to bring these costs forward as supplementals rather than include them in the base budget.	250.0				250.0
28	1	Health & Soc Svcs	Senior & Disabilities Medicaid Services	Reduce GF and federal authorizations based on current trends and projections.	(5,400.0)	(5,400.0)			(10,800.0)
29	1	Health & Soc Svcs	Unallocated Reduction	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(4,760.0)				(4,760.0)
30	1	Health & Soc Svcs	Commissioner's Office	Interim management contract for Mary Conrad Center. The state suspended the license and assumed management of the facility on Dec 18, 2008. A plan of correction required by the federal Centers for Medicare and Medicaid Services has been developed to address the identified deficiencies. Implementation of that plan is directed by state staff working with a nursing consulting firm. These funds will be used to pay the nursing consulting firm as well as contracted security personnel. The current owners of the facility are trying to negotiate a sale of the facility and operations.	500.0				500.0
31	1	Labor	Commissioner's Office	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(330.0)				(330.0)
32	1	Law	Deputy Attorney General's Office	Unplanned Legal Activity: Gasoline Pricing Investigation Public Records Polar Tanker Kensington Mine	849.0				849.0

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
33	1	Law	Oil, Gas and Mining	Oil and Gas Projects The Department of Law has a number of major projects underway that will continue to require outside counsel and experts beyond the funding included in the base operating budget. The most noteworthy are the Pt. Thomson litigation, ongoing proceedings before the Federal Energy Regulatory Commission (FERC) on TransAlaska Pipeline Service (TAPS) tariffs issues, State of Alaska Assessment Review Board disputes and two major corporate income tax matters.	1,335.0				1,335.0
34	1	Law	Statehood Defense	Endangered Species Act Litigation Unplanned legal activity for costs associated with assessing and protecting the State's interest related to actions taken by the federal government as they relate to the Endangered Species Act, specifically Polar Bears and Beluga Whales.	150.0				150.0
35	1	Law	Office of the Attorney General	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(980.0)				(980.0)
36	1	Military & Vets	Army Guard Facilities Maintenance	Increase federal authority for ongoing maintenance costs. There is a corresponding increase in the FY10 budget.		500.0			500.00
37	1	Military & Vets	Air Guard Facilities Maintenance	Increase federal authority for ongoing maintenance costs. There will likely be a corresponding FY10 budget amendment.		300.0			300.00
38	1	Natural Resources	Commissioner's Office	Transfer AGIA Coordinator PCN and funds from Governor's Office (PCN 01-802X) $158.0 from personal services and $25.0 from travel.	183.0				183.0
39	1	Natural Resources	Commissioner's Office	Departments have implemented savings plans and this unallocated reduction will allow the commissioner to apply the reduction to the specific components in which the savings will be achieved.	(1,240.0)				(1,240.0)
40	1	Public Safety	Fire and Life Safety Operations	A $10/month/person uniform allowance is included in the current PSEA bargaining unit agreement. Unfortunately that monetary term was inadvertently omitted from the FY09 PSEA appropriation. The total cost to the department in FY09 is $44.1. There is a corresponding increase in the department's FY10 budget of $50.5.	0.6				0.6

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
63	1	Transportation	Measurement Standards and Commercial Vehicle Enforcement	Unified Carrier Registration Fees The Unified Carrier Registration (UCR) program requires individuals and companies that operate commercial motor vehicles in interstate or international commerce to register their business with a participating state and pay an annual fee based on the size of their fleet. FY09 was the first year Alaska participated in this program. Per the Federal Motor Carrier Safety Administration, these revenues may only be used for administration of the unified carrier fee system, motor carrier safety programs, or motor carrier enforcement programs.			150.0	Receipt Supported Services	150.0
64	1	Transportation	Measurement Standards and Commercial Vehicle Enforcement	Permit Fee Increase Changes to 17 AAC 25 are in process to increase the amounts charged for oversize/overweight permits. Measurement Standards and Commercial Vehicle Enforcement anticipates the permit fee increase to be in place mid-March 2009. This will be an overall average increase of 23%. This increased Receipt Supported Service revenue will be used to fund the following: $16.4 - Increased State equipment Fleet costs. $55.0 - Computer Equipment Replacement Program/Equipment for new inspector position. $31.1 Capital Outlay - which includes the following: Metrology Laboratory Air Quality Study $14.9. Anchorage Prover Truck Conversion $16.2.			102.5	Receipt Supported Services	102.5
65	1	Transportation	State Equipment Fleet	Credit Card Payments for Fuel The State Equipment Fleet (SEF) maintains contracts which allow a vehicle credit card to be used to purchase fuel and necessary consumables. These charges are paid by SEF and subsequently billed to executive branch state agencies.			400.0	HWCF	400.0
66	1	Transportation	State Equipment Fleet	Increased Travel Costs Related to Airfare in and Around Alaska's Rural Areas Increase receipt authority to cover travel costs in support of rural airports and highways for the repair and preventative maintenance of vehicles and equipment.			149.0	HWCF	149.0

3378

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
67	1	Transportation	State Equipment Fleet	Increased Costs in Freight for Parts, Equipment and Vehicles Increased receipt authority to cover cost increases in freight (shipment of parts, commodities, vehicles and equipment around the state) and increased contractual costs for vendor supplied repairs or vehicle and equipment make-ready such as Trooper vehicle setups.			77.0	HWCF	77.0
68	1	Transportation	State Equipment Fleet	Increased Costs Related to Parts and Commodities Used in the Maintenance and Repair of Wheeled Assets Increase receipt authority to cover parts and commodities costs. The transportation sector has not seen the cost decreases that the average retail sector has. Commodities like oils and lubricants have not seen price reductions that mirror fuel prices. Bulk quantities were purchased early in the fiscal year when fuel prices were at their highest for shipment to rural locations statewide.			800.0	HWCF	800.0
69	1	Transportation	Central Region Facilities	State Equipment Fleet Costs Over the past few years the operating and replacement rates of state vehicles has increased without a corresponding increase in budgets to the Facilities components. Older vehicles have remained in the fleet and repair costs have been incurred to maintain these vehicles. Certain services, such as repairing damage from accidents, is a billable service and not part of operating rates established by the State Equipment Fleet (SEF). The accumulation of additional costs can no longer be absorbed in the operating budget.	54.8				54.8

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
70	1	Transportation	Northern Region Facilities	State Equipment Fleet Costs Over the past few years the operating and replacement rates of state vehicles has increased without a corresponding increase in budgets to the Facilities components. Older vehicles have remained in the fleet to support full staffing and rotating schedules, and repair costs have been incurred to maintain these vehicles. Certain services, such as repairing damage from accidents, is a billable service and not part of operating rates established by the State Equipment Fleet (SEF). The accumulation of additional costs can no longer be absorbed in the operating budget.	116.7				116.7
71	1	Transportation	Central Region Highways and Aviation	Anchorage Sidewalk Snow Removal Funding is requested to operate newly acquired sidewalk tractors throughout the winter to blow, plow, and sweep the snow from Anchorage sidewalks, bus stops, trails and pathways. The Federal Highway Administration (FHWA) has notified the department that all infrastructure built with FHWA federal funds must be appropriately maintained. That maintenance includes snow removal from sidewalks and other pathways. Failure to meet these requirements could jeopardize future surface transportation funds and require reimbursement of previously expended funds.	250.0				250.0
72	1	Transportation	Central Region Highways and Aviation	Anchorage Snow Haul (Roads) Snowfall in Anchorage this winter has returned to the amount that used to be considered normal for the area. Including the heavy snowstorms over the holidays, the accumulation of snow plowed from the roads onto the shoulders and sidewalk areas reached the level that required hauling it away. To date, snow haul expenses have nearly exhausted the annual operating budget of $250. Supplemental funding of $250.0 will allow for one additional snow haul for the remainder of the winter. In addition to this funding request, an additional $31.5 in funding required to fully fund one additional snow haul has been requested as a reappropriation in sec. 14(b).	218.5				218.5

3380

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
73	1	Transportation	Central Region Highways and Aviation	Commodities Price Increases The increased cost for commodities has significantly impacted the operating budget for Central Region Maintenance and Operations. Competitive bids were completed last spring for delivery of commodities prior to winter maintenance needs. Purchases of sand and winter chemicals fall into this category. Similarly, competitive bids are completed during the fall for delivery of commodities prior to spring maintenance needs, such as paint for striping. Supplemental funding is needed for sand ($575.0), winter chemicals ($205.3) and paint ($334.0).	1,114.3				1,114.3
74	1	Transportation	Central Region Highways and Aviation	State Equipment Fleet Costs Older equipment and vehicles have remained in the fleet and repair costs have been incurred for maintenance and repairs. Certain services, such as repairing damage from accidents, is a billable service and not part of operating rates established by the State Equipment Fleet (SEF). The accumulation of additional costs cannot be absorbed in the operating budget.	284.8				284.8
75	1	Transportation	Northern Region Highways and Aviation	Legal Costs for Material Site Lawsuits Due to ongoing lawsuits filed by one of the regional native corporations for supposed infringement on their land and rights of way, the department has incurred excessive costs this year for Department of Law attorneys. None of the three lawsuits filed have yet gone to court so the total cost is unknown at this time. Additional funding for $150.0 is based on the amount expended to date for attorneys and expert witnesses.	150.0				150.0
76	1	Transportation	Northern Region Highways and Aviation	State Equipment Fleet Costs Older equipment and vehicles have remained in the fleet and repair costs have been incurred for maintenance and repairs. Certain services, such as repairing damage from accidents, is a billable service and not part of operating rates established by the State Equipment Fleet (SEF). The accumulation of additional costs cannot be absorbed in the operating budget.	554.0				554.0

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
77	1	Transportation	Southeast Region Highways and Aviation	State Equipment Fleet Costs Older equipment and vehicles have remained in the fleet and repair costs have been incurred for maintenance and repairs. Certain services, such as repairing damage from accidents, is a billable service and not part of operating rates established by the State Equipment Fleet (SEF). The accumulation of additional costs cannot be absorbed in the operating budget.	241.4				241.4
78	1	Transportation	Anchorage Airport Administration	Reduce Operating Budget in Response to Airline Carrier Economic Operating Environment In response to a multitude of requests for economic relief from airline carriers, the Commissioner and Deputy Commissioner directed the Alaska International Airport System (AIAS) to implement certain operating and capital cost reductions to stabilize rates and fees. This response was in recognition of the deterioration of the economic operating environment in which AIAS customers operate. Reduce contractual services for Anchorage Airport Administration. Public relations, cargo, passenger marketing services and capital improvement project support contracts were all reduced.			(281.0)	International Airport Revenue Funds	(281.0)

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
79	1	Transportation	Anchorage Airport Facilities	Reduce Operating Budget in Response to Airline Carrier Economic Operating Environment In response to a multitude of requests for economic relief from airline carriers, the Commissioner and Deputy Commissioner directed the Alaska International Airport System (AIAS) to implement certain operating and capital cost reductions to stabilize rates and fees. This response was in recognition of the deterioration of the economic operating environment in which AIAS customers operate. Reduce contractual services for Anchorage Airport Facilities. A maintenance contract was cancelled in FY07 and those services were provided from newly created maintenance positions as well as individual contracts for services (such as window washing). These changes resulted in cost savings that are included in this reduction.			(800.0)	International Airport Revenue Funds	(800.0)
80	1	Transportation	Anchorage Airport Field and Equipment Maintenance	Reduce Operating Budget in Response to Airline Carrier Economic Operating Environment In response to a multitude of requests for economic relief from airline carriers, the Commissioner and Deputy Commissioner directed the Alaska International Airport System (AIAS) to implement certain operating and capital cost reductions to stabilize rates and fees. This response was in recognition of the deterioration of the economic operating environment in which AIAS customers operate. Reduce Anchorage Airport Field and Equipment Maintenance snow removal services contract and equipment rentals. Snow removal will be for priority areas only. Lease agreements will be reviewed to ensure tenants provide their own snow removal and do not request services from the Anchorage Airport. Only priority equipment rentals will be approved (loaders, other large equipment).			(400.0)	International Airport Revenue Funds	(400.0)

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
81	1	Transportation	Anchorage Airport Operations	Reduce Operating Budget in Response to Airline Carrier Economic Operating Environment In response to a multitude of requests for economic relief from airline carriers, the Commissioner and Deputy Commissioner directed the Alaska International Airport System (AIAS) to implement certain operating and capital cost reductions to stabilize rates and fees. This response was in recognition of the deterioration of the economic operating environment in which AIAS customers operate. Reduce Anchorage Airport Operations contractual services, commodity and equipment budget. Priority only items will be approved. A reduction in contractual services will reduce the contract for airport parking services.			(80.0)	International Airport Revenue Funds	(80.0)
82	1	Transportation	Anchorage Airport Safety	Reduce Operating Budget in Response to Airline Carrier Economic Operating Environment In response to a multitude of requests for economic relief from airline carriers, the Commissioner and Deputy Commissioner directed the Alaska International Airport System (AIAS) to implement certain operating and capital cost reductions to stabilize rates and fees. This response was in recognition of the deterioration of the economic operating environment in which AIAS customers operate. Reduce Anchorage Airport Safety contract for unarmed security at the Anchorage Airport. The coverage previously provided will be monitored using current on duty Police and Fire Officers as well as other contracted unarmed guards.			(254.0)	International Airport Revenue Funds	(254.0)

102	3	Capital	Transportation	Iliamna: Snow Removal Equipment / Sand and Chemical Storage / Office Building This is a new FY2009 project. Construct a 4-bay Maintenance and Operating building to provide inside heated storage for an expanded equipment fleet, sand and urea storage, as well as an office, training room and bathroom facilities. This project will add two equipment storage bays with a minimum of 22 foot door openings. It will also add a bay for storing approximately 400 cubic yards of sand and 50 tons of urea. It will add additional space for an office area, a training room, and a bathroom facility complete with a shower.		1,000.0			1,000.0
103	3	Capital	Transportation	Petersburg: Airport Runway Safety Area This is a new FY2009 project. This project consists of the design and construction of an expanded Runway Safety Area, shifting the existing runway, replacing undersized culverts, relocating navigation aids, and other required work. It also includes the acquisition of additional property adjacent to the airport in order to protect Runway Protection Zones from incompatible land uses.		26,000.0			26,000.0
104	3	Capital	Transportation	Savoonga: Airport Improvements This is a new FY2009 project. This is the second stage for rehabilitating the Savoonga Airport. The work includes resurfacing the runway, taxiway, apron and airport access road, applying a dust palliative to the operating surfaces and replacing the lighting system. The taxiway will be realigned to meet geometric standards.		4,840.0			4,840.0

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
105	3	Capital	Transportation	Takotna: Airport Relocation This amends an existing FY2009 project (sec. 13, ch. 29, SLA2008, page 164, line 16), increasing the FY2009 allocation to $10,500,000. Relocate the airport to a new location about a mile east of the village. This will include acquiring property and constructing the following to current standards: new runway, taxiway, apron, airport lighting and visual aids, snow removal equipment building and an airport access road.		5,000.0			5,000.0
106	3	Capital	Transportation	**Surface Transportation Program Appropriation $15,750,000**					0.0
107	3	Capital	Transportation	Chena Hot Springs Road: Milepost 24 to 56 Rehabilitation This is a new FY2009 project. The project consists of 32 miles of roadway reconditioning and paving with 1.5" of hot mix asphalt. The work includes bridge seismic retrofits and upgrading traffic signs, guardrail, striping, and approaches.		1,430.0			1,430.0
108	3	Capital	Transportation	Ester Weigh Station Scale Replacement This is a new FY2009 project. Replace the scale at the Ester weigh station and return it to service. The Ester Weigh Scale has currently been removed from service due to inaccuracies in its measurements. The steel scale deck support system and steel scale mechanisms have deteriorated beyond the point of reasonable repair. The extensive corrosion present is almost certainly a direct cause of the recent loss of accuracy of the scale system.		120.0			120.0

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
109	3	Capital	Transportation	Kotzebue: Shore Avenue Rehabilitation and Erosion Protection This amends an existing FY2009 project (sec. 13, ch. 29, SLA2008, page 170, line 3), increasing the FY2009 allocation to $20,590,000. This project was originally requested as an FY2010 project. A corresponding decrement for FY2010 will be submitted as a budget amendment. Reconstruct Shore Avenue from Lake Street, through the primary commercial area of Kotzebue, approximately 4,400 feet to the end of the road at Crowley Dock. Shore Avenue will be paved, new sidewalks, a pathway, parallel parking, an open space on the seaward side, and an erosion protection revetment on the seaside.		14,200.0			14,200.0
110	4			Sets out the funding by agency for the appropriations in sec. 1.					0.0
111	5			Summarizes by fund source the funding for the appropriations in secs. 1 and 3.					0.0
112	6	Administration	AOGCC	Extend lapse date of AOGCC appropriation for reservoir depletion studies, sec. 61(d), ch. 30, SLA 2007, as amended by sec. 34(a), ch. 29, SLA 2008, from June 30, 2009 to June 30, 2010. The estimated carryforward amount is $1.4 million.					0.0
113	7(a)	Education	ACPE - Program Administration & Operations	Extend lapse date from June 30, 2009 to June 30, 2011 for the Mental Health Employee Loan Repayment Program, which is appropriated and allocated in sec 1, ch. 28, SLA 2008, page 2, line 31 - page 3, lines 3 - 5. This program makes payments on participant education loans over eight quarters. The lapse extension is necessary to be able to make payments for the entire period.					0.0

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
114	7(b)-(c)	Capital	Education	Increase the FY09 appropriation and allocation for the Maudry J. Sommers K-12 School Major Maintenance project. When HB 373, now ch. 107, SLA 2008, passed last year, the participating share amounts for some districts were revised and funds were appropriated in sec. 61(b), ch. 29, SLA 2008, page 220 and 221, to those districts whose amounts were lowered. Tanana City School District should have received a similar adjustment to make up the difference between a 5% and 10% participating share.	392.5				392.5
115	7(d)	Capital	Education	Repeal the $98,056 balance of the appropriation made in sec. 60, ch. 3, FSSLA 2005, page 140, line 24, for Alaska Gateway - Dot Lake School Mechanical Upgrade. In section 14(d) the funds are reappropriated to the Department of Transportation and Public Facilities, Southeast Region Highways and Aviation, for the purchase of required safety equipment at rural airports.	(98.1)				(98.1)
116	7(d)	Capital	Education	Repeal the $54,753 balance of the appropriation made in sec. 60, ch. 3, FSSLA 2005, page 142, line 13, for Southeast Island - Thorne Bay House Access Ramp. In section 14(m) the funds are reappropriated to the Department of Transportation and Public Facilities, Alaska Marine Highway System for vessel and terminal overhaul and rehabilitation.	(54.8)				(54.8)
117	7(e)	Education	School Performance Incentive program	Based on prior year trends, the department believes that only $2.5 million will be needed for this program in FY09, freeing up $2.3 million.	(2,300.0)				(2,300.0)
118	7(f)	Education	School Performance Incentive program	This subsection appropriates the amount necessary if the $2.5 million left in the appropriation is insufficient to make the payments.					0.0
119	8	Capital	Environmental Cons	Transfer the balance of $208,578 AHFC Dividend and $625,800 Federal funds from Tununak Flush Tank and Haul, and Washeteria Project (ED 38), made in sec. 1, ch. 135, SLA 2000, page 10, line 30, to a new Village Safe Water Study, Design and Construction Projects allocation.		(625.8)	(208.6)	AHFC Dividend	(834.4)

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
138	9(l)-(o)	Health & Soc Svcs		Reflects fund source changes from sec. 9(h)-(k)					0.0
139	10	Labor	Commissioner's Office	The $850.0 fiscal note for ch. 22, SLA 2007 (HB 177, AGIA) was appropriated in sec. 2, ch. 28, SLA 2007, page 44, line 22. Sec 34(e), Ch 29, SLA 2008, Pg 210, Ln 22 extended the lapse date to June 30, 2009. The department will not spend the entire amount in FY09, therefore they request that the lapse date be extended through June 30, 2010 in order to complete the work with the estimated balance of $325.0.					0.0
140	11(a)	Law	Deputy Attorney General's Office	Judgments and Settlements The actual amount of the FY2009 Judgments and Settlements that are finalized as of February 2, 2009 is $90,061.64.	90.1				90.1
141	11(b)	Law	Deputy Attorney General's Office	Judgments and Settlements Language The amount necessary to pay judgments awarded against the state on or before June 30, 2009, is appropriated from the general fund to the Department of Law, civil division, deputy attorney general's office, for the purpose of paying judgments against the state for the fiscal year ending June 30, 2009.					0.0
142	11(c)	Law	Second Judicial District	Extend the lapse date for the Sexual Assault/Domestic Violence Federal Earmark, made in sec. 27(d), ch. 11, SLA 2008, page 104, line 29 (SB 256), from June 30, 2009 to June 30, 2010 Further extending the lapse date to June 30, 2010 will enable the department to continue to fund additional attorneys and paralegals in Bethel, Barrow and Anchorage to aid in the prosecution of domestic violence as well as adult and child sexual assault cases. It is estimated that approximately $89,700 would be available to carry forward.					0.0

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
143	11(c)	Law	Third Judicial District: Anchorage	Extend the lapse date for the Sexual Assault/Domestic Violence Federal Earmark, made in sec. 27(d), ch. 11, SLA 2008, page 104, line 30 (SB 256), from June 30, 2009 to June 30, 2010 Further extending the lapse date to June 30, 2010 will enable the department to continue to fund additional attorneys and paralegals in Bethel, Barrow and Anchorage to aid in the prosecution of domestic violence as well as adult and child sexual assault cases. It is estimated that approximately $149,000 would be available to carry forward.					0.0
144	11(c)	Law	Fourth Judicial District	Extend the lapse date for the Sexual Assault/Domestic Violence Federal Earmark, made in sec. 27(d), ch. 11, SLA 2008, page 104, line 31 (SB 256), from June 30, 2009 to June 30, 2010 Further extending the lapse date to June 30, 2010 will enable the department to continue to fund additional attorneys and paralegals in Bethel, Barrow and Anchorage to aid in the prosecution of domestic violence as well as adult and child sexual assault cases. It is estimated that approximately $407,900 would be available to carry forward.					0.0
145	11(d)	Law	BP Corrosion	Extend the lapse date for the BPXA Corrosion Litigation appropriation made in sec. 1, ch. 27, SLA 2008, page 31, line 20, from June 30, 2009 to June 30, 2010 Further extending the lapse date to June 30, 2010 will enable the department to pursue claims for penalties and lost revenues for the 2006 Prudhoe Bay pipeline spills and production shutdowns. It is estimated that approximately $1,900,000 would be available to carry forward.					0.0
146	12	Natural Resources	Oil & Gas	Extend lapse date on sec. 24(p), ch. 159, SLA 2004 Gasline Right of Way and Application from June 30, 2009 to June 30, 2011. Due to the number of projects under development and the work involved with right of ways and associated permitting there is huge demand for work not covered by the companies involved: ANGDA, ENSTAR, Denali and TransCanada. The estimated carryforward is $2,965,800.					0.0

FY2009 SUPPLEMENTAL REQUESTS

	Sec. No.	Department or Capital	Component or, if capital, Department	Description of Supplemental Need	General Funds	Federal Funds	Other Funds	Fund Source	Total Funds
147	13(a)	Revenue	Resource Rebate	Extend lapse date from June 30, 2009 to June 30, 2010 for the Alaska Resource Rebate Program, appropriated in sec.1(b), ch. 1, 4SSLA 2008, in order to finalize determinations for approximately 10,000 applicants in some stage of having their eligibility determined, already denied but not yet appealed, or in appeal status.					0.0
148	13(b)-(c)	Revenue	AHFC	Fund source change from corporate receipts to federal, mostly in personal services. Now that AHFC is in HUD's Moving to Work agency status, there are sufficient federal resources to cover these expenses. There is a corresponding increase in the FY10 budget.		674.3	(674.3)	AHFC Rcpts	0.0
149	13(d)	Revenue	ARM Board	Implementation of cost allocation plan wherein FY09 is based on FY07 net asset values that realized a large increase in value of the funds under management. This is compounded by prior year allocations that were a flat amount and may not have charged benefit systems their full fair share, as well as an increase in the number of participants. Plus, ARM Board is managing additional new investment options for participants (SBS, deferred comp). The FY10 budget contains a corresponding increase of $249.0 relating to investment options and it is likely that an FY10 budget amendment will also be proposed.				890.0 Benefit Systems Rcpts (700.0) PERS (190.0) TRS	0.0
150	14(a)	Capital	Transportation	Mission Road (Kodiak Island) - Upgrade and Repair This amends an existing FY2009 project (sec. 13, Ch 29, SLA 2008, page 159, line 14), increasing the FY2009 appropriation to $782,600. Additional funding is being requested to cover costs for the project because the low bid came in higher than expected. Project work was initiated during the fall of 2008 and will resume in the spring of 2009 and is scheduled for completion mid-summer of 2009.	207.6				207.6

Subject: Department of Administration FY2009 GF Savings Plan

We have reviewed the FY2009 operating budget of the Department of Administration (DOA) to determine where reductions can be made to meet the Governor's savings target. I believe reductions for FY2009 can be made which will result in GF savings for FY2009 and which will limit the impact to the services we provide to our customers. My recommendations are as follows:

Division of Finance (DOF) **($300.0) GF**
This reduction will be offset with an increase in unbudgeted CIP receipts. The DOF currently has capital project funding in excess of $40 million GF for statewide systems replacement. The division plans to use staff resources to work on the project, and expect that staff efforts over the next several fiscal years will be at a level to support charging the project $300.0 annually.

Enterprise Technology Services (ETS) **($300.0) GF**
ETS received in excess of $800.0 GF for salary and health insurance cost increases for FY2009 for all units within the division. ETS also has in excess of $7.0 million of GF in the FY2009 budget for SATS/ALMR operations. I believe we can aggressively manage vacancy and achieve efficiencies in non-personal services costs in all areas of ETS to meet the targeted savings.

Department Wide Personal Services Reduction **($200.0) GF**
I am proposing to spread $200.0 of GF reduction among all divisions within the department that have GF in their personal services budget. The reduction will be based on each divisions' percentage share of the amount of the total GF received for salary and health insurance increases for FY2009. The reductions

will be modest for each division, and I believe with careful management of vacancy we can achieve the savings.

Retirement & Benefits GF Reduction **($107.6) GF**

The Division of Retirement & Benefits will see a reduction of GF needed in FY2009 for costs related to the defined contribution retirement plan. This reduction, which was projected in the fiscal note for SB141 (CHAPTER 9 FSSLA 05), and which should have been made in the FY2009 budget, was inadvertently overlooked.

Year End Lapsing **($200.0) GF**

For the past several years the DOA has lapsed in excess of $200.0 of GF each year. I believe it is reasonable to expect that to occur again in FY2009. As we progress through FY2009 we will be looking to identify specifically where this lapse will occur.

The total amount of FY2009 GF savings identified here is $1,107,600. This exceeds our target amount by $7,600.

Please let me know if you have questions or need additional information.

Office of the Commissioner

Sarah Palin, Governor
Emil Notti, Commissioner

Date: August 1, 2008

To: Karen Rehfeld, Director
Office of Management and Budget

From: Emil Notti, Commissioner
Department of Commerce, Community and Economic Development

Subject: FY09 General Fund Savings Plan

The Department of Commerce, Community, and Economic Development has looked at a variety of areas to determine where to achieve the $80,000 of general funds savings requested by the Governor. After discussions with the directors of the impacted divisions and careful consideration of the options, I am proposing the following general fund cuts:

The Office of Economic Development (OED): $60,000.
Although $290,000 was added via a fiscal note for the newly created film office, the regulations process and the position approval and recruitment has taken longer than anticipated. As a result, OED will be able to achieve one-time savings of $60,000 from the FY09 budget. However, the film office will be fully operational fairly soon, and OED will need the full $290,000 in FY10.

The Division of Community and Regional Affairs: $16,000.
Due to significant staff turnover, DCRA is actively recruiting for a number of positions. The payroll costs of these temporarily vacant positions should be enough to address most of this reduction. Additional cuts will be made by reducing staff travel. This travel reduction will result in a reduced presence at conferences this year, including the Southeast Conference, Alaska Municipal League, and AFN.

Because DCRA's turnover is typically very low, this cut will be difficult to sustain when the positions are filled. If this cut carries into FY10, the delivery of its programs may be negatively impacted.

Division of Administrative Services: $4,000.
Reductions in travel (in numbers of trips and the length of trips) and delaying the purchase of some equipment should enable this division to achieve these savings. These savings are probably sustainable and can be carried into FY10.

Governor's Office

DATE: July 31, 2008

From: Dwayne Peeples
Deputy Commissioner
Department of Corrections

SUBJECT: DOC FY09 Savings Scenario

The Department of Corrections appreciates the opportunity to provide the requested information on potential general fund savings for FY2009. This was a valuable exercise in looking for inefficiencies and areas where we identify long-term practices that can save general fund dollars in future years.

Challenges and Possibilities:

- FY 09 Anticipated Supplemental Requirements: Fuel/energy cost increases for 24/7 facilities. In addition to physical plant increased costs, this also includes increased transport cost and increased commodities—all tied to fuel and energy increased costs.

- FY09 *Knowns*: If population remains static, we will not be in supplemental mode *except for fuel/utilities*, and possibly *medical*. We can draw from Electronic Monitoring (EM) and Out-of-State (OOS)—OOS will generate fewer trips if populations remain static as of 7/31/08 (3696 max cap - 3626 incarcerated = -70).

Savings Scenario--$3,910.0 GF, $123.0 MHTAAR = $4,033.0:

- Substance abuse treatment program FY09 increases, $1,132.8: These services are expansion of treatment services appropriated for ¾ of the fiscal year and are the major part of the department's initiative to reduce recidivism. The expansion for the services have not been implemented and will not result in lay offs or cancelation of contracts. Impact: Elimination of this program expansion will result in increased population growth in future years requiring additional facility construction or purchase of contract beds; adversely impact the program design of the new 1,536 bed prison in the Mat/Su Borough and adversely impact the credibility of the department with the legislature to obtain funding for these programs in future years.

- Freeze Substance Abuse Coordinator and Education Program Coordinator (or the equivalent), $199.6: the substance abuse position is vacant, this will not result in a layoff situation. The Education Program Coordinator position is expected to become vacant by 10/1/08 and will remain unfilled, duties will be absorbed by existing filled positions.

- 3rd year fiscal note funding for Sex Offender Polygraph, $752.5: 1) the Sex Offender Polygraph program is under performing, however, it has recently shown improvements in our ability to hire qualified polygraphists; and, 2) we propose to restrict the funding for the 2 PFT probation officer positions until the program is performing at full levels. *(NOTE: this does not impact the YKCC (Bethel) program.)*

- Electronic Monitoring (EM) FY08 increase, $881.1: we have not increased EM by 50 slots as originally proposed. In FY09, adding 40 Community Residential Center (CRC) beds is being proposed which will reduce overcrowding in the Anchorage Correctional Complex and allow the out-of-state placements to remain static.*

- Freeze SCCC Micro-Tech (or equivalent) and HMCC Food Service Lead, $148.6: this does not generate lay-offs, these are vacant positions that we believe the duties can be absorbed by existing staff (HMCC) or by institutions sharing a Micro-Tech (WWCC and SCCC).

- Mental Health Services FY09 increase, $246.0: we have not implemented this increase in services by providing treatment materials; or, fund existing vacant positions that were to be reallocated to mental health to facilitate increased services. Not implementing increased services minimizes the impact versus reducing or eliminating an existing service. This does not create a lay-off situation.

- Increase the vacancy factor from 3.3% to 6.25% for Probation/Parole, $672.4: while this will increase the caseload for existing PO's, the positions are vacant and this does not create a lay-off situation.

**With OMB approval, DOC procured the CRC beds in July 2008, using EM funds*

Conservation and Efficiencies--In Process of Implementation:

- Energy Conservation Measures: DOC Energy Savings Performance Contracting w/Siemens Financial
  - Savings will not be measurable until project is complete and enough time has lapsed to generate a comparative analysis on energy savings

- Cost Containment Measure: Standardized Menu
  - Nutritionist/Contractor submitted first draft of standardized menu on 7/25/08; review is underway. Until standardized menus are adopted and implemented in the institutions, there is no measurable savings. Standardized menu savings will be linked to standard procurements (below) and may be possible to evaluate savings by the end of FY09.

- Cost Containment Measure: Western States Contracting Alliance (WSCA), standardized procurement
  - SOA/DGS is within a few weeks of signing the final WSCA contracts
  - WSCA allows states to purchase as much or as little at any one time at negotiated bulk flat rates
  - We pay NO freight and shipping costs, exceptions: Bethel, Nome, Fairbanks, Pt. McKenzie

        - DOC anticipates primary savings on paper products and cleaning supplies
            - Contract is not in place; no measurable savings as yet

- Fund Source Change: SGF to GF/MH – No direct savings, fund change
    - Working with AMTHA to complete preliminary identification of FY10 funds by early September; and, any amounts remaining will be captured in FY11.

- Liquidated Damage Recovery: Out-of-State (OOS) Contract with Corrections Corporation of America (CCA)
    - In FY08, the department recovered $275.0 in contract funds for not providing services included in the contract. The department has taken due diligence in controlling the OOS agreement by holding the CCA accountable and to the terms of the contract.
    - In FY09, we anticipate recovering up to $200.0

If you require additional information, please feel free to contact us.

DEC FY 2009 General Fund Savings Report Proposal

Identify General Fund Type (GF, GFPR or GFM)	Program	Savings Amount	Describe Impact
GFPR	Air - Air Non-Point & Mobile Source Program	$34,980	It is projected at this point that all these receipts will not be realized in FY09.
GF	SPAR – Industry Preparedness and Pipeline Operations	$208,520	In fiscal year 2008 DEC received an appropriation of $606,500 and 4 positions for the purpose of pipeline compliance oversight and North Slope flow line integrity. The department has encountered extreme difficulties in the classification and recruitment of these four positions. One position has been filled with the incumbent to begin in August, however, we don't expect to fill the other 3 positions until later this year. This is a one time savings and will not be available in FY10.
GF / GFM / GFPR	All Divisions – Implement agency based travel program	$126,500	This would eliminate $56,000 in travel agent fees annually and one position estimated at $70,500.
GF / GFM / GFPR	Mileage Tickets	$20,000	Current balance of the DEC mileage account would allow approximately 50 tickets to be purchased. This would be allocated to a variety of programs.

TOTAL $390,000

Department of Education & Early Development
FY2009 Management Plan Discussion

The Department of Education & Early Development has conducted an internal review of general fund program expenditures to identify potential areas of savings to meet the target provided by the Governor's Office of Management & Budget. While developing a management plan to minimize program impact but still attaining the goal, it is critical to review the overall fund source levels for program operations compared to annual growth and the personal services required for agency operations.

General fund for the Foundation Program, Boarding Home Grants, Youth in Detention, Special Schools, School Performance Incentive Program, Pupil Transportation, Alaska Challenge Youth Academy, Early Learning Coordination (Head Start) and WWAMI were not considered for targeted restrictions. The School Debt Reimbursement expenditures are not included in ABS under the Department of Education & Early Development and were not manually added for this analysis but do have a human resource impact. These totals are included in the analysis of personal services expenditures because of the human resources required to manage and execute these authorized programs.

Based on the program funding levels recorded in ABS under Management Plan scenarios for each given fiscal year with the exception of FY2009 which is still being developed, the overall growth of general fund personal services expenditures remains relatively low as shown below. For FY2009, only 2.13% of the total budget (all fund sources) is allocated to personal services and this represents an annual change of -.04% since FY2004. The sharp decline in the total position count from FY2004 to FY2005 was due to a statewide realignment/integration which transferred programs to more appropriate agencies and also included the elimination of specific programs or reductions through efficiency measures.

	FY2009	FY2008	FY2007	FY2006	FY2005	FY2004

General Fund Personal Services Comparison to Personal Services Total all fund sources	31.38%	29.74%	32.49%	32.48%	28.41%	26.02%
% Change from FY08	1.64%					
% Change from FY04	5.36%					
5 year average annual growth	1.07%					

The general fund allocated to personal services represents less than 1% of the total agency funding. The general fund allocated to personal services in the DEED budget

represents less than 1/3 of the total funding allocated specifically for personal services. The average annual growth of general fund personal services compared to overall personal services authorization allocated within DEED budget is only 1.07% as illustrated over the six year period.

In order to mitigate the perception of cutting programs or services connected to other funding sources, DEED did not to include general fund match in the following analysis of positions. This analysis identifies the specific components containing funding for personal services, and the percentage funded with general funds.

Component	Percentage General Fund	Total Position count
Executive Administration	100%	8
Administrative Services	77%	8
Information Services	30%	6
School Finance	58%	13
Student & School Achievement	16%	70
Mt. Edgecumbe	30%	44
Libraries	100%	35
Archives	89%	10
Museums	97%	18

Executive Administration

The Executive Administration component provides oversight and leadership to the agency in support of the mission and vision of the State Board of Education & Early Development. Historically, this component has maintained extremely low staffing levels relative to the responsibilities and duties. For FY2009, this component received general funds through a fiscal note associated with SB 285 which also authorized three new positions for the Statewide System of Support (district intervention). The total position count of eight shown for this component includes these three new positions created specifically for the Statewide System of Support directing state resources to fund activities necessary to fulfill the constitutional mandate clearly defined in the Moore v. State decision. In the review to identify areas where efficiencies can be managed, the Department of Education & Early Development will meet the OMB target in components other than Executive Administration. General funds to support essential staff and State Board of Education & Early Development priorities remain critical to the success of the entire agency in execution of the mission to ensure quality standards-based instruction to improve academic achievement for all students.

Administrative Services

This unit has maintained stable staffing levels and supports the activities of the entire department. With a low turnover rate, the vacancy factor must remain relatively low to accurately reflect the personal services expenditures necessary for this unit. This unit has available funding from interagency receipts collected from various components and has historically been able to return funding to the programs at the end of the fiscal year. This section would be able to restrict $5.0 general fund in the contractual line item by allocating expenditures to the interagency fund source.

Department of Education & Early Development
FY2009 Management Plan Discussion

Information Services
Beginning in FY2007, the Information Services section has seen extremely challenging levels of turnover and difficulties in the recruitment process to keep the section fully staffed with experienced personnel. We anticipate stabilization within this section since two key positions have been filled. On going recruitment issues for Analyst/Programmer positions will continue to exist but restricting funds based on any anticipated vacancies would be detrimental to funding contractors through the ETS Task Order system which has become a critical component to meeting the business requirements of the department while these positions are vacant. This section has seen significant savings related to software expenditures and the enterprise agreement with Microsoft for educational discounts. This section would be able to restrict $5.0 in the contractual line item in support of the efficiency efforts.

School Finance & Facilities
The School Finance & Facilities section manages K-12 Foundation program, Pupil Transportation, School Debt Reimbursement, the CIP process, and the audit process. While all of these programs are removed from the operational areas where funding could be restricted for FY2009, the personal services associated with providing the human resources necessary to execute these programs are contained in this section. Within this section, PCN 05-1058, Statistical Technician II, Range 14 with a total cost projected at $66,519 for FY2009, remains unfilled due to recruitment difficulties. Under the current memo of instruction from OMB regarding job reclassification, this section will seek the approval of an upgrade for this position to accurately reflect the duties required to meet the business needs of this section. DEED anticipates the approval and recruitment process to take several months and can restrict approximately 4 months of the costs associated with the position for a total of $16.9 to manage a lapse savings for FY2009.

Student & School Achievement
This section manages most of the federal funding for education programs administered through DEED. The majority of the federal receipt authority is located in the grants line item. The general fund in this component is approximately 4.6% of the total funds authorized for this component (FY2009 Management Plan). The largest expenditure of general fund is the contract costs for Data Recognition Corporation to administer the Comprehensive Statewide System of Assessments which includes the High School Graduation Qualifying Examination. A newly funded general fund program for the development of a longitudinal data system is also contained within this component for the first time in FY2009. This program was funded previously with federal receipts from a 3 year grant. During the FY2009 budget cycle, it was anticipated that the federal receipts would expire or be fully expended. We have since received approval for a no-cost grant extension on the period of performance and contractual obligations were moved into the current fiscal year accordingly. Recruiting fully qualified, expert Analyst/Programmers required due to the complexity of this project continues to be an issue. Managing the use of the DOA/ETS Task Order system or other procurement procedures for professional services must be utilized to fill the void while recruitment efforts continue. A projected 6 month vacancy can be managed to allow a restriction of $36.5 for PCN 05-8723 and 05-8724, Analyst/Programmer II, Range 16 positions. Specific projected costs associated

with hardware/software maintenance identified for the general fund appropriation can be deferred to FY2010 due to the timing of the maintenance and licensing renewals. General fund in the amount of $100.0 may be restricted in order to contribute to the managed lapse savings target for FY2009.

Mt. Edgecumbe High School
Mt. Edgecumbe High School has been successful in managing the increasing costs of running the State Boarding School's academic and residential programs with the help of additional funding for fuel costs through various energy relief funding measures. The additional increases in the funding available through the Foundation Program will also contribute substantially to the success of this program. To avoid the appearance of making unnecessary reductions to this program when fuel costs could realistically require some level of supplemental funding and until the energy costs stabilize or begin trending toward a manageable growth, DEED recommends not restricting any general funds associated with this program pre-maturely for FY2009.

State Facilities Rent
This component contains the funding necessary for leased space acquired through General Services and also space associated with the Public Building Fund. DEED received a general fund appropriation to provide off site storage for the State Archives. The Division of General Services is preparing a Request for Proposals (RFP) to acquire existing space or provide a build to suit contract for the necessary square footage. The RFP will be made public at the end of July with an anticipated award date of September. Since the appropriation anticipated the lease costs on an annual basis, $60.0 may be restricted in order to contribute to the managed lapse savings target for FY2009.

Libraries, Archives and Museums
The Division of Libraries, Archives and Museums (LAM) provides services to the public, the legislature and the executive branch. The (LAM) budget has been impacted by rising costs associated with materials, books, periodicals and online database subscriptions required to provide reference and research services. These costs erode the capacity of this unit to maintain a budget with little or no growth to mitigate the pressure on existing general fund appropriations.

This component has identified several areas that will be restricted without impacting the delivery of services to the public. Through vacancies associated with staff turnover and recruitment efforts, this division will be able to restrict $11.8 for PCN 05-3080, Librarian I Range 16, and $24.8 for PCN 05-3508, Micrographics Manager (Archives) Range 17.

By deferring purchases of equipment and museum acquisitions, another $10.0 will be restricted in the commodities line item.

School Performance Incentive Program
A lapse balance could occur within the School Performance Incentive Program in FY09 but will not be included as part of the DEED reduction analysis since the payments are formula driven based on assessment data and not subject to savings attributable to

management decisions. In FY 07, the payments totaled approximately $1.9 million and $3.86 million lapsed. The FY08 payments are projected to be close to $1.1 million which will leave a lapse balance of nearly $2.5 million. If the trend continues, a significant lapse balance may be available in FY09 that could be included as part of the overall OMB savings target. Ideally, the final year of the School Performance Incentive Program will reflect greater improvements in student performance throughout the state.

The proposed general fund managed lapse savings will be restricted as follows:

Component	General Fund Proposed Managed Lapse
Administrative Services Total	5.0
Information Services Total	5.0
School Finance & Facilities	16.9
Student & School Achievement Total	136.5
State Facilities Rent	60.0
Library Operations	16.8
Archives	24.8
Museum Operations	5.0
Total Proposed General Fund Restriction	270.0

MEMORANDUM

TO: Karen Rehfeld, Director
Office of Management and Budget

THRU:

FROM: Tom Lawson, Director

DATE: August 1, 2008

SUBJECT: FY09 General Fund Savings Plan

The purpose of this memo is to outline the Department of Fish and Game's (ADF&G) FY09 savings plan as requested by Governor Palin. Per your June 26, 2008 memo, the department's targeted savings goal is $1.0 million of general fund (GF). ADF&G determined that the most equitable method of allocating the savings target within the department should be based on the percentage of GF in each division.

Following is the proposed ADF&G FY09 savings plan. Savings plans for most divisions are based on extending the vacancies of already vacant positions or leaving positions vacant for a period of time, once the incumbent departs. It must be noted that generally, extended vacancies in divisions are the result of our inability to attract candidates because of non-competitive wages and benefits. Vacant positions put a significant strain on existing staff as the workloads of vacant positions must be absorbed.

Division of Commercial of Commercial Fisheries – $644.2

The Division of Commercial Fisheries continues to experience recruitment difficulties within each regional, headquarters, and special projects components.

SE Region: The SE Region Fisheries Management component will leave a Fishery Biologist vacant for over 7 months. This position has been vacant and work has been and will continue to be absorbed by other positions. Savings from this position is expected to result in a one-time spending reduction of $41.9.

Central Region: The Central Region Fisheries Management component will leave 3 positions (Vessel Technician, and 2 Fishery Biologists) vacant for a minimum of three months. Savings from these positions are expected to result in a one-time spending reduction of $37.7.

AYK Region: The AYK Region Fisheries Management component will leave vacant 7 positions (4 Fishery Biologists, Research Analyst, Program Technician, and F&G Regional Supervisor) for a minimum of three months. Savings from these positions are expected to result in a one-time spending reduction of $94.5.

Westward Region: The Westward Region Fisheries Management component will leave vacant 4 positions (4 Fishery Biologists). for a minimum of three months. Savings from these PCNs are expected to result in a one-time spending reduction of $85.0.

HQ Fisheries Management: The Headquarters Fisheries Management component will leave 11 positions (Deputy Director, 2 Analyst Programmers, Database Manager, 2 Biometricians, 3 Fishery Biologists, Fisheries Scientist, and F&G Regional Supervisor) for a minimum of two to three months. Many of the vacant positions within headquarters have been vacant for a while and recent recruitment efforts have failed. It is hoped that a successful applicant pool will be available when these positions are recruited again. In the interim, some staff members have been placed in acting status or others have taken on additional duties. Neither are good long-term solutions. Savings from these positions are expected to result in a one-time spending reduction of $284.9.

CF Special Projects: Every effort will be made to leave positions vacant longer than usual to try and achieve a GF savings of $100.2.

Division of Sport Fisheries – $67.9

The Division of Sport Fisheries is experiencing ongoing recruitment difficulties in positions throughout the state, particularly at the professional level (biometricians, fishery scientists, fishery biologists). This general fund decrease in personal services could be absorbed in FY09 due to these vacancies, but with ongoing recruitments and a fully staffed division this general fund decrease would be difficult to absorb in future fiscal years.

Division of Wildlife Conservation – $123.5

The Division of Wildlife Conservation will manage this requested spending reduction through the vacancy of its new Wildlife Scientist position. This position is required by the division to oversee the scientific rigors of division research. The position must receive final classification action by the Division of Personnel and complete the recruitment and hiring process. This is expected to require six months of time, achieving a one-time FY09 savings of approximately $60.0. Additionally, the division continues to experience recruitment difficulties within each region. To achieve the balance of the savings required by this target, the division will extend by one month the vacancy period when positions turnover. If savings by this mechanism do not materialize, the division would have to reduce spending on field research. The division does not anticipate the savings to be sustainable in future years.

Commissioner's Office – $13.4

The Commissioner's Office generally budgets for a zero vacancy factor, but due to turnover with clerical staff, the actual vacancy factor is higher than zero. Historically, the Commissioner's Office has a very tight budget, but in FY09 every effort will be made to manage position costs with a reduced personal services line.

Division of Administrative Services – $42.2

The Division of Administrative Services has recruitment and retention issues in all positions in Juneau where most of the staff are located. The division generally budgets for a 5 percent vacancy factor, but due to turnover of clerical staff and the inability to fill higher level positions, the actual vacancy factor has been higher than 5 percent. This personal services reduction amount is possible in FY09 due to recruitment and retention issues. However, the division will continue to actively recruit for these higher level professional positions and does not expect the savings to be sustainable in future years.

Boards Support – $20.6

The Boards Support Section was able to procure a new contract for printing for FY09 that was less than last year's costs. This contractual services reduction amount is possible due to a one time savings because of the lower bid award to the vendors and the section does not anticipate the savings to be sustainable in future years.

Division of Subsistence – $36.2

73000 per 70m

For FY09, the Division of Subsistence is projecting to use carry-forward federal indirect receipts savings from the previous year to pay for services normally paid with general fund. The division does not anticipate the savings to be sustainable in future years.

Division of Habitat – $52.0

The Division of Habitat will manage the requested reduction in spending by reducing its contractual services by $30.0; FY09 lease costs will be less than in FY08 due to the transition from the Department of Natural Resources to ADF&G per Executive Order 114. The division will also reduce commodities by $22.0; many older computers and office supplies were updated in FY08 so FY09 expenses should be less. This GF decrease will be very difficult to absorb in future fiscal years due to decreases in several of the division's interagency agreements that provide key personal services support.

MEMORANDUM

TO: Karen Rehfeld, Director
Office of Management and Budget

DATE: August 1, 2008

FROM: Linda Perez
Administrative Director
Office of the Governor

SUBJECT: FY 2009 Savings Plan

As requested, the Office of the Governor has identified $465.0 in potential GF savings in FY 2009. We will create a 'savings plan' management encumbrance for these funds against our FY 2009 Executive Office appropriation.

We will continue to review our accounts throughout the year to identify any additional savings that may be realized in FY2009.

MEMORANDUM

DATE: July 31, 2008

TO: Karen Rehfeld
Director
Office of Management and Budget

FROM: Randall Super
Deputy Commissioner

SUBJECT: Governor's $20 million Savings Target

The Department of Health and Social Services will achieve its portion of the Governor's savings target through a range of management and program actions. To most effectively manage achievement the department will establish restrictions on AKSAS limiting each affected division's expenditure authority. However, as the year progresses the department may adjust the allocation of those restrictions to reflect actual activity; but will maintain restrictions totaling the department's $4,760.0 general fund target.

Summary	GF Amount
Position Management	(500.0)
Senior Benefits Program	(500.0)
Medicaid Client Travel	(437.6)
Administrative Travel	(134.5)
Additional Medicaid Reductions	(3,187.9)
Total	***(4,760.0)***

Position Management - $500.0 GF
The department will manage position vacancy and turnover to achieve an additional savings totaling $500.0 in general funds through a combination of management techniques. Division directors will evaluate the necessity of filling each individual position (new or becoming vacant), may hold positions that become vacant open longer before recruitment, or may lay off positions

determined less essential to achieving the division's mission. This target is allocated between the divisions based on the number of authorized positions in each division divided by the total authorized positions in the Department. The following table displays the Division and the allocation of this portion of the target.

Division	PFT	PPT	Non-Perm	Total Positions	% of Total Positions	Target Amount
Alaska Pioneer Homes	557	49	40	646	17.6%	88.0
Behavioral Health	304	15	27	346	9.4%	47.1
Children's Services	475	2	7	484	13.2%	65.9
Health Care Services	91	-	7	98	2.7%	13.4
Juvenile Justice	467	5	18	490	13.4%	66.8
Public Assistance	528	9	-	537	14.6%	73.2
Public Health	519	16	15	550	15.0%	74.9
Senior and Disabilities Servies	119	1	3	123	3.4%	16.8
Commissioner's Office/FMS	357	1	17	375	10.2%	51.1
Boards and Commissions	19	-	2	21	0.6%	2.9
Totals	3,436	98	136	3,670		500.0

Senior Benefits Program - $500.0 GF

The new Senior Benefits Program helps low-income seniors who are at least 65 years of age remain independent in the community by providing a monthly cash benefit.

During a special session in late June 2007, the Alaska Legislature passed legislation to create a new program to benefit low-income seniors, which followed the sunset and end of the SeniorCare program on June 30. The department successfully transitioned almost 7,000 seniors from the former SeniorCare program to the new Senior Benefits Program, and continues to process applications for individuals newly eligible under the income limits. By FY09, the division expects 11,000 seniors will qualify for assistance under this new program. Individual monthly payments are $125, $175 or $250 depending on the senior's gross annual income. Income limits are tied to the Alaska Federal Poverty Guidelines and will change annually.

The FY09 appropriation for the program includes $19,662.3 in benefits and $683.1 for administrative costs. With actual caseload and expenditure data through the end of April, the Department conservatively projects that it will not expend $500.0 GF of the appropriation by the end of FY09.

Medicaid Client Travel – $875.2 ($437.6 GFM/$437.6 Fed)
The divisions will reduce the Medicaid FY09 Travel Authorization by 2%. The 2% reduction target is calculated based on the 5/27/08 MMIS FY08 projected Travel expenditure of $43,760.3. Division reductions are calculated based on that division's percentage portion of the total Medicaid authorization times the FY08 projected actual travel expenditure multiplied by 2%. This reduction estimate does not include any savings that may result from an internal review of the State Travel Office by the Department of Administration.

Medicaid Services Transportation

Estimated FY08 Actuals as of 5/27/08	43,760.3			
Division Allocation based on FY08 Exp to Date			**Total**	**GF Portion**
DHCS	676,032	57.3%	(501.5)	(250.8)
DBH	168,921	14.3%	(125.3)	(62.7)
OCS	16,146	1.4%	(12.0)	(6.0)
DSDS	318,610	27.0%	(236.4)	(118.2)
Total Services Transportation		100.0%	***(875.2)***	**(437.6)**

Agency Travel – $134.5 GF
Each division will reduce the FY09 Travel line allocation within its programs by 2%. This reduction estimate does not include or reflect any savings that may result from an internal review of the State Travel Office by the Department of Administration.

FY09 DHSS Travel Budget by Appropriation		
Alaska Pioneer Homes	24.3	(0.5)
Behavioral Health	617.0	(12.3)
Children's Services	1,026.7	(20.5)
Adult Preventative Dental Medicaid Services	-	
Health Care Services	179.9	(3.6)
Juvenile Justice	415.8	(8.3)
Public Assistance	666.8	(13.3)
Public Health	2,646.5	(52.9)
Senior and Disabilities Services	304.5	(6.1)
Departmental Support Services	455.9	(9.1)
Boards and Commissions	388.3	(7.8)
Human Services Community Matching Grant	-	
Community Initiative Matching Grants	-	
Agency Total	***6,725.7***	***(134.5)***

Additional Medicaid Program - $3,187.9 GF
The final portion of the target will be achieved through actions by the Division's within their portions of the Medicaid program to reduce expenditures. The Division's portion of the target will be achieved by allocating the reduction between the divisions based on their portion of the

FY2008 Medicaid expenditures similar to the Medicaid Client Travel above. However, given the sensitivity around children in the custody of the state the small amount (43.6) allocated to the Office of Children's Services has been reallocated to the Division of Health Care Services.

Division of Health Care Services	(1,870.4)
Division of Behavioral Health	(456.5)
Division of Senior & Disability Services	(861.0)
Total	***(3,187.9)***

Subject: FY 09 GF Lapse Projection.xls

Attachments: FY 09 GF Lapse Projection.xls

I have enclosed our general plan to reach the general fund savings target. We hope to achieve the target by managing travel and personal services costs. Specific actions include the following:

1. Data Processing Section will delay the hiring of a position to implement Chapter 92, SLA 08. This position is critical to our achieving the security requirements contemplated in Chapter 92, but given that we have just completed the classification process and given the hiring timeline, we feel we can achieve the proposed level of savings.
2. Various components have had some difficulty recruiting and while we continue to actively pursue qualified candidates for critical positions, we believe the extended vacancy in some areas will enable us to manage toward a general fund lapse.
3. Other components are identified for modest general fund savings that we think are achievable through prudent management.

If circumstances arise is specific components that require adjustments we will keep you apprised.

Guy

Department of Labor and Workforce Development
FY 09 General Fund Lapse Projection

Component	Total GF	GF Red.	Notes
Commissioner's Office	$ 658.5	$ 4.4	Travel Management
Management Services	$ 184.6	$ 12.0	Vacancy Management
Data Processing	$ 426.7	$ 25.0	Delay hire of position to implement Ch. 92, SLA 08.

STATE OF ALASKA

Department of Law

To: Karen J. Rehfeld, Director
Office of Management and Budget

Date: July 31, 2008

From: Talis Colberg, Attorney General
Department of Law

Subject: FY2009 General Fund Savings Plans

CONFIDENTIAL: DELIBERATIVE PROCESS PRIVILEGE

OMB has requested the Department of Law propose a savings plan for FY2009 that will generate $1,030,000 in general fund cost savings. We have identified the following areas where general funds can be saved.

RDU	Component	Description	FY2009 General Fund Savings	Potential Carryover to FY2010
Civil	Commercial and Fair Business	Move $200,000 in existing unused SDPR authority from Labor and State Affairs to Commercial and Fair Business and expended additional consumer protection program receipts instead of general funds	$200,000	$200,000
Civil	Human Services	Lapse the majority of the $500,000 Curyung multi-year supplemental. The case appears to be settling and the Dept had minimal costs during FY08. NOTE: If the status of the settlement suddenly changes we could have to revisit this item.	$475,000	
Criminal	2nd Judicial	Fund Barrow Victim Witness Paralegal with federal earmark money from July 2008 – September 2009 (new PCN approved in FY09 budget)	$106,200	$26,550
Criminal	OSPA	Recruitment time will result in estimated start dates of the new Attorney and LOM of Sept 1, 2008 (2 mos x $35,000/month)	$75,000	
Criminal	4th Judicial	The current lease will renew in November 2008 at a lower rate as the cost of amortizing leasehold improvements drop off.	$78,000	$78,000

All	Various	Slow down PC replacement cycle (currently 3 years)	$95,800	$37,500
		Total	$1,030,000	$342,050

Approximately 33% of the FY2009 savings will carry forward into FY2010. Following is a discussion of other constraints facing the Department as it moves into the FY2010 budget planning process.

Civil Division Billing Methodology:

Over $29 million of the Civil Division's costs are captured for accounting purposes in a cost allocation pool. From there these costs are billed out to the Division's clients based upon actual attorney and paralegal hours worked on cases times a uniform billing rate. "Clients" are either RSA's with other agencies or the Division's own general fund. Reduction in charges to any RSA or to general funds can happen one of two ways – either the billing rate is reduced (which affects all clients) or fewer hours are billed (which affects only the client being billed to).

Reduce hourly billing rate: First, the hourly billing rate can be reduced by cutting actual costs in the pool. On average, 51% of our professionals' time is billed to the Division's general funds. Every dollar saved in the pool by the direct reduction of costs only equates to 51 cents in savings to general fund cases – the other 49% benefit is passed along to other agencies when time is billed to them. Or stated differently, to reduce billings to the Division's general funds by $1 a total of $1.96 in costs must be cut from the pool. This equitable sharing of costs across all matters the attorneys work on makes the exercise of finding general fund specific savings extra burdensome for the department.

Reduce the number of hours billed: The second way to reduce charges to the general fund would be to reduce hours worked on matters funded from the Division's general fund. A quarter of the Division's general fund is used to cover work on human services and child protection – areas that do not readily lend themselves to simply not performing the work as a way of reducing the dollars billed. Another 30% of the Division's general funds are spent on oil and gas related matters. Because the nature of this work requires the department to engage expensive outside counsel and continues to be an area of heavy investment by the State, the Division has sought supplementals and increments for the last few years. For all intents and purposes attempts to save money in this area will simply result in a subsequent supplemental.

The remaining 45% of the Division's general fund billings are primarily in the areas of Labor and State Affairs, Opinions and Appeals and Statehood Defense. These billings include matters such as representation of the State in significant civil appellate matters (approximately 100 active cases at any time) before the Alaska Supreme Court, Ninth Circuit and U.S. Supreme Court; legal matters relating to Indian law, native sovereignty, federal subsistence, land into trust, Tongass National Forest, ANSCA, RS 2477, ANILCA access rights; ownership of navigable waters; involvement in ethics, elections, personnel and employment litigation; and advice for the State acting as an employer as well as legal advice when requested by the Offices of the Governor and Lt. Governor.

Lease Expirations:

Our lease in Anchorage is expiring and the Division of General Services has estimated the increase to market rate with the signing of a new lease will result in an additional $1.5 million in rent per year. As a result, in FY 2010 roughly $510,000 in general funds will be required for the Criminal Division as well as $485,000 in additional interagency authority and $505,000 in general funds for the Civil Division. The Civil Division's share will be charged through the pool and is likely to require us to raise our billing rates approximately $2.00/hour.

Our Bethel and Kenai offices are currently functioning seriously below the state's space standards. We are currently investigating the availability of additional space and determining the actual expected increase in costs.

Personnel Services:

HB417: The passage of HB417 was accompanied by a fiscal note that did not include the effect to the Department of Law of dozens of attorneys suddenly receiving pay increments years in advance of when longevity increases would have happened (or as in the case of those at M step resulted in pay increments to those who would other wise have never seen another increase other than COLA). The costs to us in FY2009 alone will be $235,000.

During the FY2007 budget process, the Civil Division's Statehood Defense general funds were cut and replaced with carry forward reappropriated funds. As we stated at the time, we believe the reappropriated funds will cover the reduced general funds through FY2009 but we will need to seek replacement general funds in FY2010.

Federal Funds:

The Criminal Division received two multi-million dollar earmarks in 2004 to fund expanded work in the areas of rural prosecution and domestic violence and sexual assault. These funds expire in FY2009 and FY2010. We are anticipating carry-over funds and are proceeding with requests to extend with the appropriate federal agency but the exact impact to our FY2010 budget is still undetermined.

Karen, we look forward to our meetings with you and the Chief of Staff in August to further discuss these items.

MEMORANDUM

State of Alaska
Department of Military & Veterans Affairs
Division of Administrative Services

TO:	Lena Simmons Budget Analyst Office of Management and Budget	DATE:	August 4, 2008
FROM:	Susan Colligan Director	SUBJECT:	FY09 Cost Savings Plan

The Department of Military and Veterans Affairs has followed Governor Palin's direction during her administration regarding budget expectations. DMVA has met or exceeded the expectations of no O&M Supplemental in SFY08 and a "No Growth" budget for SFY09. At this time we have not been able to identify any additional savings that would not impact the effectiveness of our programs and our mission.

As you know DMVA is responsible for the Army and Air National Guard military force, the State Defense Force, Alaska Military Youth Academy, Homeland Security and Emergency Management, and the Naval Militia, being fully prepared to protect Alaska from any threat, disaster, or emergency at all times. This can only be accomplished with adequate resources of military and civilian personnel and support costs to maintain the necessary infrastructure in preparation and response to any threat, disaster, or emergency. As a department with the responsibility of the military forces for protection, preparedness, and recovery, it is important to ensure that we do not jeopardize our ability to respond to our mission by reducing necessary resources with cost savings measures.

We are willing to look at our budget over time and identify any additional savings that might be available.

We look forward to discussing this information with you. Please contact me at 428-6881 if you have any questions.

MEMORANDUM

State of Alaska
Department of Military & Veterans Affairs
Division of Administrative Services

TO: Lena Simmons
Budget Analyst
Office of Management & Budget

DATE: August 19, 2008

FROM: Susan Colligan
Director

SUBJECT: FY09 Savings Plan

Per your request of August 13, I am providing additional information on how this department has continued to hold the line in the operating budget. As we stated before, the Department of Military and Veterans Affairs has followed Governor Palin's direction during her administration regarding budget expectations.

In FY2008, the department contributed to the Governor's target reduction request by: discontinuing the JROTC program which resulted in a $40.0 general fund reduction; reduced general funds related to publication distribution by $25.0; cost savings of approximately $215.0 in general funds through efficiencies in facility maintenance costs; and deleted a net of nine permanent full-time positions department-wide resulting in a reduction of approximately $233.0 in general funds.

The Department submitted a no new growth FY2009 budget as requested by the Governor. It is our understanding that DMVA was the only department to follow the Governor's direction of no new growth. The department also adhered to the Governor's direction of no position increases in the budget.

Additionally, the department proposed efficiencies through consolidation of Information Technology Services and Procurement. This consolidation will allow for better management and support of these functions across the entire department. Although no specific savings has been identified with these consolidations, efficiencies will allow for maintaining required staffing levels to provide the department-wide support in a more accountable and efficient manner.

Another important thing to consider with DMVA's budget is that while DMVA has not asked for new funding per the Governor's direction, other departments have. As a result the base funding level to find "savings" is much tighter for DMVA than other agencies that have seen increased funding requests under this Administration.

With those points made, DMVA is committed to help the Palin Administration meet the goal of reducing spending, but cannot identify specific dollar savings at this time. However, the department will monitor use of overtime, travel, and contracting costs where possible without impairing its ability to meet its mission and requirements of the Federal/State Cooperative Agreement.

If you have any further questions, please contact me at 428-6881.

ALASKA DEPARTMENT OF NATURAL RESOURCES

Support Services Division

400 Willoughby, Suite 500 PO Box 111010 Juneau, AK 99811-1010

TO: Karen J. Rehfeld, Director
Office of Management and Budget

FROM: Leta Simons, Director
Support Services Division

THRU: Tom Irwin, Commissioner

DATE: July 18, 2008

RE: FY09 General Fund Savings Plan

The Department of Natural Resources has developed a FY2009 savings plan as requested by the Office of Management and Budget in the memo dated June 26, 2008. The targeted savings for DNR is $1.24 million, approximately 1% of our operating budget for FY09.

FY09 SAVINGS PLAN

DNR will realize cost savings for FY09 by restricting transfers from the Personal Services line item, thereby allowing excess funds due to vacancies to lapse rather than be transferred for use in other line items. Savings estimates by component are detailed on the attached spreadsheet. Actual savings may differ from this initial plan. We will monitor the variance between budgeted and actual Personal Services expenditures quarterly, and recommend adjustments as needed.

IMPACT

For all components, the impact will be the same. Funds that were previously available to purchase office furniture and equipment, pay down DNR's leave balance, conduct special events such as the AGIA forum, pay for unexpected buildout and move expenses, purchase software and other technology resources that became available, cover increases in the cost of facilities and commodities, and otherwise cover a variety of unexpected and under-budgeted expenses will not be available in FY09. A tighter budget with reduced margin for error will likely result in an increase in the amount of time spent on budget management and a decrease in time devoted to program management and service delivery.

DNR FY09 Cost Savings Plan
Details by Component

	Component	Line Item	Planned Savings
423	Commissioner's Office	Personal Services	-
424	Administrative Services	Personal Services	48,400
427	Information Resource Management	Personal Services	-

STATE OF ALASKA
Department of Public Safety
MEMORANDUM

To: Karen Rehfeld, Director
Office of Management & Budget

Date: February 4, 2009

Telephone: 907-465-5488

From: Dan Spencer, Director
Administrative Services

Subject: FY09 Savings Target

The Department of Public Safety has examined our budget and business practices to consider the means by which we might achieve the Governor's targeted general fund savings of $2,280,000 for this department. Obviously, we will do our best to make efficient use of state resources and where possible we will make processes more efficient, so long as those efficiencies do not come with an unacceptable cost in effectiveness nor cause a significant drop in services we provide unless we have discussed that with the Governor's Office.

So far as it is practical and prudent we may reduce staff assigned to special events, curtail some lower priority enforcement activity, and take other measures that will not significantly reduce services. We will also work to implement technological improvements funded in the FY09 capital budget; this will not provide operating budget savings in FY09, but it will help us provide better service in a cost effective manner. We have already planned measures such as targeted use of airline miles to hold down increasing travel costs for recruiting and training.

However, unless we immediately reduce services significantly, I do not expect the department to lapse this amount of general funds. My assessment of our fiscal situation is that the department will need a multi-million dollar FY09 supplemental appropriation if we intend to continue to provide the same level of services in FY09 as we did in FY08. Our efforts to save money may reduce the amount of supplemental appropriations required, but will not eliminate the need.

As you know, the Governor requested more than $4 million in supplemental appropriations for the department in FY08. The legislature did not fully fund that request and the Alaska State Trooper RDU was forced to reduce services to save more than $900,000 in the last two months of FY08. In recognition of the FY08 supplemental needs, the Governor's amended FY09 budget included an increase of about $3.4 million just to ensure a continuation level of service. That amount was reduced by more than $1.3 million. Additionally, the legislature inadvertently failed to appropriate more than $650,000 for the Anchorage prisoner transportation agreement even though we are providing those services, so that will need to be requested as supplemental funding. And finally, rising inflation for all facets of operations, not just for fuel, will almost certainly drive our cost of operations even higher.

The managers and staff of the department are serious about being good stewards of public funds and accomplishing our mission in a cost effective manner. Unfortunately, we cannot at this time tell you that we have any realistic expectation of lapsing enough general funds to meet the savings goal established for the department.

As always, I would be happy to answer any questions you may have.

State of Alaska

Department of Revenue

Administrative Services Division

SARAH PALIN, GOVERNOR
333 Willoughby Avenue, 11th Floor
P.O. Box 110400
Juneau, Alaska 99811-0405
Phone: (907) 465-2300
Fax: (907) 465-2394

MEMORANDUM

To: Karen Rehfeld
Director
Office of Management & Budget

Date: August 1, 2008

From: Jerry Burnett
Director
Administrative Services Division

Phone: 465-2312

Subject: FY2009 GF Savings Plan

In response to the Governor's request that departments collectively meet a savings target of $20 million general fund for FY2009, the Department of Revenue proposes the following savings plan to meet its target of $390.0.

General funds in the Department of Revenue exist primarily in the Tax Division, which accounts for over 81% of the department's general fund budget. The Treasury Division has about 9%, and the Commissioner's Office and Administrative Services have 1.4% each. The remaining general fund is spread in small amounts amongst minimally funded agencies such as the Long-term Care Ombudsman.

The operating budgets for Treasury, the Commissioner's Office and Administrative Services each contain a mix of funding sources that are based on cost allocation plans and indirect cost recovery. The general fund in these budgets serves to supplement the receipt-based allocation methods that are used, reduces the amount that must be charged back to GF-funded programs, and provides funding for costs that aren't otherwise allocable. For example, Treasury allocates the cost of managing the investments of the state's general fund to the GF in their budget; this cost isn't allocable to other funds being invested by Treasury. With the increase in the state's general fund accounts, Treasury may actually require an increase of GF in their budget in order to maintain proper cost allocation. Removing general funds from these three components is not recommended, due to the effect on other funds and other components cited above.

In order to meet the general fund reduction target, the department must look to the Tax Division. The largest cost in the Tax Division's budget is personal services, which accounts for 78% of its overall funding. Because this division has had high vacancy rates of up to 20% in recent years, much effort has gone into the recruitment and retention of tax auditors and other staff critical to meeting the division's mission of collecting revenues for use by state government. Currently we have managed to reduce the vacancy to near 12% which is the lowest level in several years, but the Tax Division continues to have turnover and it will require aggressive recruitment to maintain that level.

To achieve savings of $390.0, the equivalent of four tax auditor positions would need to be left vacant for one year. This is in addition to the positions which will be held vacant to meet the budgeted vacancy factor of approximately 10%. The actual positions held vacant will be determined by the division based on workload priorities. The division will supplement personal services savings by reducing travel whenever possible.

During the 2008 legislative session the Tax Division requested funding for four audit master positions that were established as part of the ACES legislation passed during the special session in 2007. This request was short-funded by the legislature in the amount of $200.0 with the expressed intent that the Tax Division would be able to ask for supplemental funding in FY2009 if the positions are filled. The Tax Division's general fund increment request to implement ACES was further reduced by an additional $473.2 from the FY2009 Governor's Amended budget. When combined with the $390.0, the division will receive a total general fund reduction in their current year budget of $1,063.2.

To minimize the impact of this reduction on the Tax Division, the Department of Revenue intends to closely review all line items and programs for potential savings as part of the management plan budget exercise and will continue to work with OMB to achieve the Governor's savings goals.

Commissioner

SUBJECT: FY09 Operating Savings

This is in response to your memo of June 26, 2008, requesting our department savings plan for FY09. Over the years the department has been faced with maintaining services at fairly flat funding levels and staff have implemented many cost efficiencies as a result. For example, DOT&PF has warehouses in Juneau, Anchorage, Fairbanks and Ketchikan that allow the purchase of supplies in quantity at lower prices and then distribute and charge those supplies as they are needed. I am including a list of program efficiencies that are either currently being implemented or plan to be implemented in the future.

Alaska Marine Highways

- Starting Oct. 1, 2008, the Alaska Marine Highway System will commence the use of "Force Account" work. Force account work allows the use of the State's own workforce, when the costs are determined to be less than with a bid contract. A labor-cost comparison indicates that as much as $599.0 could be saved by using vessel engineering staff as opposed to outside manufacturer's labor.
- During the last overhaul of the M/V Aurora, an electronic voyage power management system was installed. This system controls the vessel's power and speed settings to effect fuel consumption savings. With the setting of the departure point, arrival point and time-to-destination, the system controls the engines, via the most efficient means, bringing the vessel to its destination – taking into account all the external forces the vessel may encounter. The Aurora is seeing a fuel savings of over 12% as a result of this computerized control system. This new system cost $250.0 to install through a federal project and is projecting a fuel costs savings of $378.0 this year (based on fuel at $4.00/gallon). AMHS plans to install this system aboard 9 vessels as they rotate through their federal overhaul projects.

Highways and Aviation

- Implementation of "pave and trade" road projects where state owned facilities are improved to local government standards and then turned over to the local governments for ownership and responsibility for maintenance. Such has taken place in Petersburg, Juneau, Wrangell, Haines, Wasilla, Palmer and Anchorage. Estimated annual savings is $109.5.
- Reimbursing employees for use of personal aircraft to reduce commercial travel costs for maintaining outlying rural airports. Estimated annual savings is $8.0.
- Reducing overtime. Estimated annual savings is $500.8.

- Installation of magnetic cards and readers at bulk fuel tanks at maintenance stations to monitor fuel consumption and theft protection. There is no estimate of savings at this time.
- Increased heavy equipment size to accomplish more highway snow/ice removal work, with same labor hours. Estimated annual savings is $300.0.
- Acquired modern, secure/dedicated frequency FM-band radios, both vehicle-mounted and hand-held, to provide much better communication and field execution efficiency with available personnel. Estimated annual savings is $100.0.
- Deployed RWIS (Road Weather Information system) to have remote cameras and thermo-sensors to dispatch crews more timely and efficiently. Estimated annual savings is $25.0.
- Now post all seasonal weight restriction notices on Public Notice website, thus informing many more users without answering phone calls or paying for newspaper notices. Estimated annual savings is $25.0.
- Applying dust control products on roads and airports as well as winter road icing practices has helped us decrease overall maintenance cost by retaining fines, and reducing frequency of surface maintenance. Estimated annual savings has been $400.0.
- Established a statewide training program for Equipment Operators. Adequately training operators provides for efficiencies in work and repair of equipment. This has reduced the cost of preventable accidents by reducing damage to state equipment. We have seen a 40% reduction in equipment damage which is about $150.0 cost savings per year. Savings could also result from less damage to other items such as overhead doors and airport lighting. These can range from $20.0 to $50.0 per incident.
- Installation of LED lights in all traffic signals in the Anchorage District. Estimated annual savings is $350.0.

Facilities

- Participated in the Energy Performance Contract for three of our large energy consuming facilities: Aviation Avenue Building, Department of Public Safety Headquarters, and Anchorage Annex Building. Cost savings are used to pay for upgrades to facilities. Once upgrades are paid for, all savings are available for reallocation or cover rising cost of utilities. Annual savings is $63.5 which covers the cost of the Siemens contract. These improvements include:
    a. Installing new energy efficient lighting
    b. Add motion light sensors
    c. Install Direct Digital Controls for HVAC fans to shut down in the evening
- Reducing heating fuel for remote snow removal equipment buildings. Installation of low temperature "fixed" thermostats at our SREBs. Our contractor maintained airports were using too much fuel relative to contracted work activities. We installed tamper proof thermostats set at 45 degrees in the SREBs. This effort, in conjunction with aggressive control of available funding allowed NR SREB heat to come in on-budget vs. over-budget in prior years. Estimated annual savings is $65.0.
- Installed Variable Frequency Drive Fan motors in the Boney Court Facility saving over $25.0 annually in electric costs.
- Retrofitted lighting at the Anchorage Boney Court Building with new energy efficient T8 lighting saving an average of $3.0 per month or about $36.0 annually in electric costs. Transition to T-8 florescent has improved our electrical efficiency in upgraded buildings by 10% over the past ten years. There is an initiative in progress to retrofit our Tok, Tazlina, and Valdez buildings to even more efficient T-5 technology lamps. Occupancy sensors

reduce lighting costs and have been retrofitted in many of our buildings. All new buildings incorporate them. Northern Region estimated annual savings is $100.0.

- Installed high efficiency boilers in the Department of Public Safety Headquarters, Anchorage Boney Court and Kodiak Griffin facilities saving approximately 20% in gas consumption. Estimated annual savings is $27.2.
- Replaced roofs on Anchorage Building Maintenance Building and on the Ninilchik, Kalsin Bay and Chulitna Maintenance Stations with energy efficient roof systems reducing heating oil consumption by 20% and 15%. Estimated annual savings is $6.5.
- Installed insulated thermo pane windows at the Bethel Combined Facility reducing heating fuel consumption by 10%. Installed insulated thermo pane windows at the Juneau, 7-Mi facility. Estimated annual savings is $1.2.
- There are ongoing energy projects to retrofit many of the older existing facilities with upgraded high efficiency lighting. Estimated savings could be 25% of lighting costs.
- Altered heating and cooling set-points in many facilities to 68 degrees for heating and 72 degrees for cooling. The impact of this measure has not been determined at this time.
- Smart building technology. New construction and some retrofitted buildings have Direct Digital Control systems that improve fuel and electric efficiency while improving the comfort level of occupants. This technology enables remote monitoring and control of the buildings which drastically cuts employee time/travel to them. In addition, system alarms and trending identifies failing components before they fail, reducing overall repair cost. Estimated annual savings is $100.0.
- Alternative schedules for Roving Crew. The 7on/7off schedule reduces "windshield time" and increases productivity. The crew works remote jobs and stays onsite for their shift, eliminating commute time and overall cost. The LOA pays them long term per diem vs. the higher cost short term. This has enabled completion of projects that would otherwise be too costly to consider. Estimated annual savings is $40.0.
- Dispatching personnel by trade. This major organizational change greatly improved efficiency. Previously Facilities personnel were each assigned buildings. Some buildings needed more attention than others which caused inefficiencies. Now personnel are dispatched centrally by trade. If the building needs plumbing work, a plumber is dispatched. If there is an electrical problem, an electrician is sent. The respective district foremen dispatch staff for optimum use of available staff. Estimated annual savings is $30.0.
- Northern Region mandated many of the LTC employees to achieve a Journey level in a second trade. Many jobs can be completed by a single employee as a result. We have been able to defer staffing increases as a result. Estimated annual savings is $160.0.
- Locking fuel tanks. While we have found no lock stops a determined thief, locks installed on our fuel tanks have reduced fuel theft. With the rising fuel cost, this is going to be more of a problem than ever. Estimated annual savings is $50.0.
- Installation of "heat recovery" systems at our diesel generator powered facilities. These systems recover wasted heat from the diesel's cooling system. Instead of using a typical radiator, we route the coolant through a heat exchanger and use it as heat in our buildings. These systems reduce station heating fuel consumption by up to 40% depending on the size of the shop. Estimated annual savings is $200.0.
- Use of thermographic cameras. These cameras allow us to "see" where our heat loss is. We have used camera data to make decisions on door and window replacement, weather stripping, and insulation projects. This is new technology we began using in FY08. No

savings data is available, but it is very obvious it can be a big heating (and cooling) cost saver. Estimated annual savings is $40.0.

- Right tools for the job. To cover all buildings situated throughout Northern Region with only 40 maintenance technicians, having the right tool for the job is critical. Investment in tools has improved job efficiency by reducing necessary manpower and "gofer" trips to rent or buy the proper tool. Estimated annual savings is $60.0.
- Computerized Maintenance Management System. We have implemented a system that streamlines administration of the workforce documentation. Face to face communications are reduced by inputting data remotely that is reviewed and approved by management. The system called the Buildings Interface includes all aspects of building management. Workers check the computer to view assigned jobs, record data including time, parts, materials, actions taken and status. The system maintains a searchable database of completed, in progress, and scheduled work. Workers do not have to wait in line to receive their jobs for the day or week. They know in advance and plan accordingly. Since all workers log on daily, it serves as a bulletin board for group communications. Estimated annual savings is $120.0.
- Conversion to oil fired hydronic heat. All Peger Road complex buildings were built with electric heat. We have converted most buildings to hydronic heat and realized a 15% energy cost savings. With the rising cost of fuel oil however, this savings may be eroded. Estimated annual savings is $100.0.

Measurement Standards and Commercial Vehicle Enforcement (MSCVE)

- Movement of MSCVE to Virtual Servers (VMWare) which will realize a savings of $14.4 in 2009 in server costs alone, and will have additional savings throughout the subsequent years. Virtualization essentially lets one computer do the job of multiple computers by sharing the resources of a single computer across multiple environments. Virtual servers and virtual desktops will allow MSCVE to host multiple operating systems and multiple applications locally and in remote locations, freeing MSCVE from physical and geographical limitations. The Information Services section of Administrative Services Division is looking at this for possible efficiencies in other areas of the department.
- MSCVE purchased a 100/500 gallon prover to be placed in Dutch Harbor this past year. To move the prover to various locations as needed during the testing of fuel meter devices, MSCVE acquired an X-class extended cab pick-up truck. This will allow MSCVE to no longer ship a truck and prover to Dutch Harbor for the annual inspections. This will result in a cost savings of $3.0 or more each subsequent year.
- MSCVE will be moving toward the automation of the load analysis impact on bridge structures for overweight permits. This automation should increase the efficiency of the Commercial Vehicle Customer Service Center in the number of permits issued by 12%. This increase in efficiency will reduce overtime needed to process permits as well as increase the revenue received. It will also eliminate any potential errors of these impact calculations, protecting public infrastructure.
- Measurement Standards is often requested by a company to go to a site for a special inspection or for a re-inspection of devices. The companies agree to pay for all costs associated with the trip using our Device Inspection Request form. In FY08, MSCVE increased RSS by $30.0 and in FY09 an additional $5.0 to offset the expenditure to travel to these locations. Prior to this increase in RSS, these expenditures were funded by GF/GOR and caused a shortfall in the travel budget every year, affecting regularly scheduled trips to inspect devices to assure market place confidence and equitable trade.

Construction

- Eliminated the Construction/M&O Director at a position savings of $153.0.

Transportation Management and Security

- Keep the Integrated Vegetation Management Coordinator position vacant an additional three (3) months ($11.8). Delaying the filling of this position will impact the department's ability to address our longstanding brush control issues and the new challenge of noxious weeds infesting our right of ways.

Contracts and Appeals

- The Engineer/Architect II position will be reclassified to a Procurement Specialist position. Since the Design/Build program is up and going, an engineering position is no longer needed. Anticipated savings is expected to be $32.0.

Administrative Services

- The following vacant positions will be kept open longer resulting in a savings of $41.6: Accountant III, Administrative Clerk III, and Procurement Specialist II.

Program Development

- Keep two more positions vacant resulting in savings of $5.5. Leaving these positions vacant could interfere with meeting Federal requirements set by Federal Highways Administration (FHWA). Our solution is to cross train existing staff to cover the FHWA required duties of the vacant positions.

Statewide Design and Engineering Services

- The Division will not complete as many bridge inspections during FY09 as originally anticipated. Those inspections will be delayed until FY10. This will provide an estimated savings of $20.0.

Department-wide initiatives

- Implemented an electronic procurement system throughout most of the department (still training vessel crew on this program). This is an on-line stock request program that has increased processing efficiencies for purchase and receipt of orders. It has reduced the amount of redundant data entry and has allowed in at least one office to convert a clerical position to an additional procurement position.
- Partially implemented an electronic time sheet program that reduces the amount of data entry and thus errors associated with payroll processing and AKSAS charges to projects.
- Travel is more scrutinized by the regions especially travel that is not specific to a project. Estimated annual savings is $5.5. Mileage is being used where ever possible – the department's most recent mileage balance is 355,000 which is pretty low for the size of this agency.
- Converted computer replacement schedules to 4 years as opposed to 3 years. Estimated annual savings is $60.3.
- Software purchases (i.e., Adobe) are not made for all computers which reduces the number of software licenses in use and renewed each year. Estimated annual savings is $22.8.
- Equipment is being sent in for repair instead of replacement.

- Implement more sharing of copiers, scanners and plotters between the different sections within the regions. Estimated annual savings is $32.0.
- The use of cellular phones by each section is monitored closely and reviewed each year to identify areas where costs can be reduced by eliminating phones and changing calling plans. Estimated annual savings is $4.7.
- Eliminated the agreement with a local courier service to pick up recycling and instead use warehouse staff during their frequent trips between the Juneau offices to deliver recycling to the recycling center. Estimated annual savings is $1.0.

As you can see, we are dedicated to providing state services in as efficient manner as possible. The past several years have shown that DOT&PF has little to no general fund lapse balances. We have also needed supplemental funding to cover the cost increases associated with fuel, utility and contractual services. I expect that we will be seeking supplemental funding again this year for the same reasons. If further costs savings are required of this agency, then service reductions would be necessary. I am hesitant to offer reductions in Marine Highway service, reduced maintenance on roads, airports and public buildings, or elimination of any positions. I would appreciate your feedback on the items we are presenting to you. If I can be of further assistance, please do not hesitate to call.

Subject: Quarterly Reporting on
FY2009 GF Savings Plan

The approved components of the Department of Administration FY2009 GF Savings Plan and second quarter estimates are as follows:

Savings Plan	Savings Target	Est. Jan. 15 Savings	Comments
Division of Finance GF Reduction	$300.0	$300.0	Savings will be Achieved.
ETS GF Reduction	$300.0	Unknown	We continue to be challenged with this target.
Department Personal Services Reduction	$200.0	$75.0 - $200.0	Many divisions should be able to achieve.
R&B Reduction	$107.6	$107.6	Savings is achieved.
Year End Lapsing	$200.0	Unknown	It is too early to estimate amounts. Some of these savings may be difficult to achieve.

Please let me know if you need additional information.

Office of Management and Budget
Office of the Governor

DATE: January 15, 2009

PHONE: 465-3339

FROM: Leslie Houston, Director
Division of Administrative Services

SUBJECT: FY2009 2nd Quarter General Fund Savings Plans

The falling price of oil is certainly a mixed-blessing. For the Department of Corrections (DOC), this has alleviated our fears as we anticipated a large fuel cost-related supplemental. The 38% surcharges on our foodstuffs has dropped to less than 4%; our shipping costs have dropped; and most of all, our energy costs in all facilities with the exception of Anvil Mountain (Nome) and Yukon-Kuskokwim (Bethel) have dropped and stabilized. Barring the price of oil rising sharply, we believe we are secure with our level of fuel/energy funding for FY2009.

Following is the updated DOC FY2009 2nd Quarter General Fund savings and efficiencies status report:

- ***Savings Plan, $672.4***: Statewide Probation/Parole V&T– we will meet this savings.

- ***Energy Conservation Measures:*** We are resubmitting the DOT Energy Savings Plan and DOC Analysis. This is the same document that was submitted with the 1st Qtr Savings Update. Please let us know if you have questions and we can coordinate a teleconference to include Facilities/Project Manager, Charlie Finch.

- ***Cost Containment Measures***

o **Western States Contracting Alliance (WSCA) Standardized Procurement**: this is a multi-state buying consortium contract facilitated by DGS. The first vendor Waxie was found by the DOC to be unresponsive, and in some cases, charging more for products than competing vendors that are not included in the WSCA contract. The second vendor Coastwide (aka Corporate Express) is no improvement. We have determined WSCA purchasing is not cost effective for all of our facilities. The four institutions located in the Anchorage Bowl may eventually realize savings when DGS can secure a reliable vendor, however, the other eight institutions will no longer attempt to participate in the WSCA purchasing process because the products offered are more costly.

The DOC agreed to be a pilot agency for this contract based on the savings we would gain. To date, we have no measurable savings from this contract. We will continue attempting to participate through the 3rd quarter of FY2009, if no improvements are made we will be seeking alternate forms of procurement that are both reliable and cost-effective.

3452

- **Standardized Menu**: We are on target to implement the standardized menu by February 1, 2009. The savings are unknown, we should be able to evaluate savings by the end of FY2009.

- **Out-of-State Liquidated Damage Recovery, $429.0**: On October 20, 2008, DOC received a check from the out-of-state contract vendor Corrections Corporation of America (CCA) in the amount of $429.0. These funds are being applied to prior fiscal years 2007 and 2008—there is no savings in FY2009.

If you require additional information, please feel free to contact me directly.

State of Alaska, DOT&PF - Energy Performance Contracting
Phase II - DOC Statewide Facilities

Project Goals

A - The primary goal of this program is to reduce energy consumption by investing in high efficiency electrical and mechanical equipment with a highly favorable return on investment (ROI).

B - Our secondary goal was to utilize the savings generated by the high ROI systems, such as lighting, heat reclaim units, etc. and invest those savings in systems with longer payback periods. We specifically looked at systems that were not being funded via our 6-year capital improvement program due to higher priority items (emergency repairs, etc.) displacing them.

C - Our Tertiary goal was to install systems that could reduce the workload on our staff and allow their efforts to be directed on planed maintenance and less on emergency response on antiqueted equipment failures.

Project Finacial Data

Financed Amount	$ 9,010,700	Annual Interest Rate	4.3%
Rebates & Down payments	$ -	Finance Period	15 years

MEMORANDUM

State of Alaska
Department of Education
& Early Development

To: Karen J. Rehfeld
Director
Office of Management & Budget

Date: January 15, 2009

Phone: 465-2875

FAX: 465-3452

File: OMBQuarterly

From: Mark E. Lewis
Administrative Services Director

Subject: Quarterly Reporting FY2009

The Department of Education & Early Development has reviewed our targeted general fund savings for the second quarter of FY2009.

Savings Plan	Savings Target	January 15 Savings	Comments
Administrative-Information Services contractual line items	$10.0	$5.0	On track to achieve this savings target
School Finance & Facilities personal services vacancy	$16.9	$16.9	On track to achieve this savings target
Student & School Achievement personal services vacancy	$36.5	$36.5	On track to achieve this savings target
Student & School Achievement contractual line items	$100.0	$50.0	On track - IT infrastructure issues may require use of this funding. Other departmental balances will be identified to meet this target.
State Facilities Rent	$60.0	$30.0	Funding identified is tied to occupancy date of the new leased facility and build out requirements. EED is tracking progess.
Library, Archives & Museums	$46.6	$23.3	On track to achieve savings.
Savings Plan Totals	**$270.0**	**$161.7**	

FY 2009 General Fund Savings Quarterly Report
December 31, 2008

Savings Plan	Savings Target	Dec 31 Savings	Savings Amount
Uncollectible GFPR	$34,980	$17,490	On track to achieve this savings target.
In fiscal year 2008 DEC received an appropriation of $606,500 and 4 positions for the purpose of pipeline compliance oversight and North Slope flow line integrity. The department has encountered extreme difficulties in the classification and recruitment of these four positions. One position has been filled with the incumbent to begin in August, however, we don't expect to fill the other 3 positions until later this year. This is a one time savings and will not be available in FY10.	$208,520	$0.00	The return of the GF from the Contaminated Sites component to the Industry Preparedness and Pipeline Operations (IPP) did not occur. Since the vacant positions are in the IPP component the funding source realizing this savings is now Oil/Hazardous Response funding (1052) not GF as originally appropriated. We are continuing to review current spending levels to identify areas in which we may be able to cut back on our GF spending.
This would eliminate $56,000 in travel agent fees annually and one position estimated at $70,500.	$126,500	$0.00	The managed travel process is still in place so no savings have been realized this quarter. Savings not realized this quarter total $50,377.
Current balance of the DEC mileage account would allow approximately 50 tickets to be purchased. This would be allocated to a variety of programs.	$20,000	$2,087	On track to achieve this savings target. Update of mileage use procedure is completed and mileage usage is on the rise.
Savings Plan Totals	**$390,000**	**$19,577**	

Department of Fish and Game
FY09 General Fund Savings Plan
As of December 31, 2008

Savings Plan Item	Division	Savings Target	1st Quarter savings	2nd quarter savings	Cumulative savings	Comment (update)
SE Region - leave positions vacant for 3 months	Comm Fish	41.9	20.0	11.9	31.9	PCN expected to remain vacant for about 7 mm. The target amount may not be met if estimated service step increases of 10.0 are unfunded.
Central Region - leave positions vacant for 3 months	Comm Fish	37.7	37.7	(12.4)	25.3	PCNs have remained vacant for the required 3 mm but the target amount may not be met if estimated service step increases of 12.4 are unfunded.
AYK Region - leave positions vacant for 3 months	Comm Fish	94.5	94.5	(6.7)	87.8	PCNs have remained vacant for the required 3 mm but the target amount may not be met if estimated service step increases of 6.7 are unfunded.
WW Region - leave positions vacant for 3 months	Comm Fish	85.0	85.0	100.0	185.0	PCNs have remained vacant for the required 3 mm. The region has identified additional savings due a cancelled project and the availability of other funding sources.
HQ Fisheries Mgmt - leave positions vacant for 3 months	Comm Fish	284.9	284.9	(100.0)	184.9	While PCNs have remained vacant for the required 3 mm the target amount is not expected to be met due miscellaneous expenditures and if estimated service step increases of 16.6 are unfunded. However, the Westward region has identified additional savings that cover this components savings target.
CF Special Projects - leave positions vacant for 3 months	Comm Fish	100.2	25.0	25.1	50.1	PCNs have remained vacant for the required 3 mm. The region is on track to meet its savings objective.

Department of Fish and Game
FY09 General Fund Savings Plan
As of December 31, 2008

Savings Plan Item	Division	Savings Target	1st Quarter savings	2nd quarter savings	Cumulative savings	Comment (update)
Realize savings due to ongoing recruitment difficulties	Sport Fish	67.9	14.8	15.5	30.3	The target amount may not be met if estimated service step increases of 37.6 are unfunded.
Wildlife Scientist position - hold vacant for 6 months.	Wildlife Cons	60.0	30.4	29.6	60.0	Held vacant for 6 months. On-Target
Division vacancies - hold open for an additional month	Wildlife Cons	63.5	18.3	33.5	51.8	On-target
Reduction in personal services line	Comm office	13.4	4.0	-	4.0	Due to unanticipated moving expenses for two newly appointed staff members, the personal services savings from the deputy commissioner position vacancy is no longer available. The 1st quarter GF savings amount is still valid.
Reduction in personal services line	Admin Services	42.2	10.0	-	10.0	The division has had to absorb some unanticipated Information Technology costs. In addition, the target amount may not be met if estimated service step increases of 7.0 are unfunded.
Reduction in printing/lower bid award.	Boards	20.6	20.6	-	20.6	The target has been met. The Boards Support Section was able to procure a new contract for printing for FY09 that was less than last year's costs. This contractual services reduction has allowed for a savings of approximately 20 percent for each legal notice and call for proposals mail out. We are currently working on a multi-year bid for the printing of proposal books.

Department of Fish and Game FY09 General Fund Savings Plan As of December 31, 2008						
Savings Plan Item	**Division**	**Savings Target**	**1st Quarter savings**	**2nd quarter savings**	**Cumulative savings**	**Comment (update)**
Division of Subsistence	Subsistence	36.2	9.1	-	9.1	The division is not on track to realize the target savings especially if estimated service step increases of 6.5 are unfunded.
Reduce Contractual Services	Habitat	30.0	6.0	-	6.0	The Habitat Division has been unable to meet its projected second quarter GF savings plan due the transition from DNR to ADF&G and the associated move costs as well as other contractual and personnel costs. Specifically, line 300 and line 400 funds where we had anticipated savings, will need to be shifted to line 100 to cover a potential shortfall.
Reduce Commodities	Habitat	22.0	5.0	-	5.0	The Habitat Division has been unable to meet its projected second quarter GF savings plan due the transition from DNR to ADF&G and the associated move costs as well as other contractual and personnel costs. Specifically, line 300 and line 400 funds where we had anticipated savings, will need to be shifted to line 100 to cover a potential shortfall.

MEMORANDUM

State of Alaska
Department of Law
Division of Administrative Services
Phone (907) 465-3672 Fax (907) 465-5419

To: Mike Crabb, Budget Analyst
Office of Management & Budget
Office of the Governor

Date: January 15, 2009

Telephone: 465-3673

From: Dave Blaisdell, Director
Administrative Services Division
Department of Law

Subject: 2nd Quarterly Report
FY2009 Savings Plan

As requested, this memorandum is intended to report on the Department of Law's progress during the second quarter of FY2009 toward meeting the Savings Plan goal of $1,030.000 set out in Attorney General Colberg's July 31, 2008 memo to Karen Rehfeld.

Savings Plan	Savings Target	Dec 31 Savings	Comments
Move $200K in unused SDPR to offset GF expenditures on consumer protection matters.	$200.0	$0.0	Savings will not be realized until final quarter of FY09 when these adjustments are customarily made.
Lapse majority of $500K Curyung Supplemental.	$475.0	$245.2	Expenditures against this approp have totaled only $4,830 through the second quarter. Savings goal appears to be on target.
Fund Barrow VW Paralegal from federal earmark.	$106.2	$34.9	Position was not filled until mid-August and vacated in mid-November. It is currently only 50% allocated to federal earmark funds. If filled in January savings may only reach $58K
Delay filling new OSPA attorney and LOM until after first quarter.	$75.0	$75.0	Savings target fully achieved.
Fairbanks DA office lease reduction after November 2008.	$78.0	$78.0	Savings target fully achieved.
Slow PC hardware replacement cycle.	$95.8	$0.0	Savings will not be realized until final quarter of FY09 when these purchases are customarily made.
Savings Plan Totals:	**$1,030.0**	**$433.1**	

As with last quarter, although the total savings through December may not appear at first glance to be "on-target" I would note that for several of the items originally listed the actual savings were not anticipated until specific payments or adjustments were made. In two cases those payments or adjustments would not customarily occur until the last quarter of the fiscal year. In the case of the Barrow victim/witness paralegal it was previously reported that we could not fund the position 100%

from the federal earmark funds originally cited; however, the position has been vacant for three of the last six months so some additional savings have been realized through vacancy as well as federal funding.

If you have any questions or would like to discuss any of these matters in greater detail, please don't hesitate to call.

MEMORANDUM

State of Alaska
Department of Military & Veterans Affairs
Division of Administrative Services

TO: Lena Simmons
Budget Analyst
Office of Management and Budget

DATE: January 15, 2009

FROM: Susan Colligan
Director

SUBJECT: FY09 Cost Savings
Second Quarter Update

I am responding to OMB's request for a second quarter update on FY09 cost savings for the Department of Military and Veterans' Affairs.

As you know in August 2008 DMVA provided you with information on how the department has continued to hold the line on the operating budget. In addition to holding the line on the budget, DMVA submitted cost savings in FY08 (budget reductions) and consolidated department core services to achieve efficiencies.

In the Governor's FY10 budget, the department has again, held the line on the budget with no major changes to the base funding level. As a result of the recent budget reductions and holding the line on the budget, the base funding level to find "savings" is much tighter for DMVA than other agencies that have seen increased funding requests under this Administration.

The department is continuing to monitor overtime, travel (we have been using up unused tickets and will be using mileage as a means to reduce costs), and contracting costs but at this time cannot identify specific dollar savings due to the loss in buying power of our base budget to maintain services without impairing our ability to meet our mission and the requirements of the Federal/State Cooperative Agreement.

If you have any further questions, please contact me at 428-6881.

1st quarter notes

DNR will restrict the Personal Services line items in the above components for a total realized cost savings of $666,945 as of 9/30/2008. This amount represents a little more than half of the FY09 cost savings goal amount of $1.24 million for our agency. Since payroll adjustments are not made quarterly, subsequent adjustments may cause a change in the amount or the source. However, we do expect to meet the target goal by the end of the fiscal year.component

2nd quarter notes

DNR will restrict transfers from Personal Services line items in the above components for a total realized cost savings of $903,400 as of 12/31/2008. This amount represents 75% of the FY09 cost savings goal amount of $1.24 million for our agency. We expect to meet the target goal by the end of the fiscal year.

MEMORANDUM

To: Karen Rehfeld
Director
Office of Management & Budget

Date: January 15, 2009

From: Ginger Blaisdell
Director
Administrative Services Division

Phone: 465-2312

Subject: FY2009 GF Savings Plan
Second Quarter Report

In response to the Governor's request that departments collectively meet a savings target of $20 million general fund forFY2009, the Department of Revenue proposed holding three positions vacant in the Tax Division to meet its savings plan target of ($390.0).

During the first quarter of FY2009, unexpected vacancies and delays in filling newly created positions resulted in sufficient savings in the personal services line to allow the Tax Division to fill these positions for the balance of FY2009 and still meet the target. The $390.0 GF has been restricted in the personal services line of the Tax Division budget.

Savings Plan	Savings Target	December 31 Savings	Comments
Hold three positions vacant in Tax Division for FY2009	$390.0	$390.0	Savings goal achieved
Savings Plan Totals	**$390.0**	**$390.0**

SB 96

TITLE: "An Act relating to nonpayment of child support: relating to certain judicial and administrative orders for medical support of a child;."

SPONSOR STATEMENT (B)

In July 2008, the federal government issued new medical support regulations that require states to have guidelines addressing how either or both parents will provide for a child's healthcare needs through accessible health insurance coverage, cash medical support, or both. Under the federal regulations, states must order either or both parents to purchase reasonably-priced, accessible health insurance coverage, provide cash medical support or both. Cash medical support may be required in those cases where no reasonably-priced health insurance coverage is accessible to the child. If a parent is ordered to pay cash medical support, the Child Support Services Division must enforce the ongoing cash medical support obligation as well as collect any cash medical support arrears. Failure to satisfy these mandated jeopardizes 17 million dollars in federal funding for the state's child support program.

This bill adds to existing law the authority for a tribunal to order either or both parents to pay cash medical support, if warranted. In addition, the bill directs CSSD to review child support orders for modification on a federally mandated three-year cycle. The bill adds cash medical support to the definition of arrearage and the definition of support order thereby enabling CSSD to use

its existing enforcement tools to collect a cash medical support obligation on behalf of the child. Finally, the bill removes the language limiting who may request the correction of a clerical mistake in an administrative order or request the vacation of an administrative order based upon a default income.

This bill puts Alaska in compliance with the federal requirements. As explained above, this bill will assure that Alaska's children receive the medical support to which they are entitled.

MEMORANDUM February 27, 2009

SUBJECT: Sectional Summary (CSSB 96( ); (Work Order No. 26-LS0485\E))

TO: Senator Betty Davis
Attn: Lynda Zaugg

FROM: Jean M. Mischel
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Adds reference to cash medical support to the crime of aiding the nonpayment of child support in the second degree.

Section 2. Adds the Virgin Islands and Indian Tribes to the definition of "state."

Section 3. Amends order of support provision to include both parents, medical support, and insurance.

Section 4. Adds medical support to provision authorizing the initiation of administrative action to establish a duty of support.

Section 5. Amends periodic reviews of support orders to require a three year cycle of review.

Section 6. Deletes motion requirement for correcting an administrative mistake in a support order.

Section 7. Deletes motion requirement for vacating a support order that is based on a default amount.

Section 8. Redefines "arrearage" for child support purposes.

Section 9. Amends the definition of "support order" to include cash medical support.

Section 10. Amends garnishment provision to include insurance and cash medical support.

Section 11. Amends the Alaska Native family assistance program to include obligations for cash medical support.

Section 12. Provides for an indirect court rule amendment to Rule 90.3, Alaska Rules of Civil Procedure for changes made in the bill.

Section 13. Makes bill changes applicable to child support actions filed on or after the bill's effective date.

Section 14. Authorizes the Department of Revenue to proceed to adopt regulations needed under the bill.

Section 15. Provides for a conditional effect for the court rule amendment in sec. 12 only for two-thirds majority vote.

Section 16. Makes sec. 14 effective immediately.

Section 17. Provides for a July 1, 2009, effective date for all other bill sections.

DEPARTMENT OF HEALTH & HUMAN SERVICES

ADMINISTRATION FOR CHILDREN AND FAMILIES
370 L'Enfant Promenade, S.W.
Washington, D.C. 20447

JAN 29 2009

Mr. John Mallonee
Director
Child Support Services Division, MS
550 West 7th Avenue, Suite 310
Anchorage, AK 99501

Dear Mr. Mallonee:

This is in response to your letter dated December 18, 2008 regarding Alaska's request for an exemption from the State plan requirement in section 466(f) of the Social Security Act (the Act), which mandates that on and after January 1, 1998, each State must have in effect the Uniform Interstate Family Support Act (UIFSA), as approved by the American Bar Association on February 9, 1993, and as in effect on August 22, 1996, including any amendments officially adopted as of such date by the National Conference of Commissioners on Uniform States Laws. Specifically, the State's UIFSA does not include Indian Tribes in the definition of 'State'. Based upon the submitted documentation, the State's request for an authority exemption to exclude Indian Tribes from the definition of State as well as the State's request for an exemption to operate a similar procedure is disapproved.

The State plan provision at section 454(20) of the Act requires States to have in effect and use the laws and procedures specified in section 466 to improve the effectiveness of child support enforcement programs. However, States may apply for an exemption from implementing one or more of these laws and procedures, which may be approved if a State demonstrates to the satisfaction of the Secretary that the mandated law or procedure would not increase the efficiency or effectiveness of the State IV-D program "through the presentation to the Secretary of such data pertaining to caseloads, processing times, administrative costs, and average support collections, and such other data or estimates as the Secretary may specify." [42 U.S.C. 666(d)]

As indicated in OCSE's October 2, 2008 letter, the authority exemption that Alaska requested requires that the State have an existing law or other legal authority for procedures under which it is operating in compliance with the intent of the Federal mandatory procedure even though the State does not have a statute specifically addressing the matter. Alaska does not have a procedure that is in compliance with or meeting the intent of section 466(f) of the Act; thus the State lacks an essential requirement for an authority exemption.

Your request asserts that the Full Faith and Credit for Child Support Orders Act (FFCCSOA), 28 U.S.C. 1738B, provides sufficient authority to recognize the child support orders of other jurisdictions. However, UIFSA provides necessary and additional procedures, not included in

FFCCSOA, for the orderly and efficient recognition and enforcement of inter-governmental child support orders including procedures for: registration of support orders; challenging registration and enforcement of support orders; paternity establishment; direct wage withholding; and long-arm jurisdiction. These procedures apply to tribal child support orders across the United States, but do not apply in Alaska because of the failure to include "Tribes" in the definition of State. As a result, FFCCSOA does not meet the goals and intent of UIFSA and cannot substitute for UIFSA.

Alaska's second request is for an exemption to operate a similar procedure. In addition to the application of FFCCSOA, the request states that the State can recognize tribal child support orders issued outside Indian Country under comity principles. The request fails to provide any description of the similar procedure, i.e., the comity procedure, as is required by AT-07-06.

Section 466(d) of the Social Security Act, 45 CFR 302.70(d)(2) and AT-07-06 also require that the State provide supporting data showing that a mandated law or procedure would not increase the efficiency or effectiveness of the child support program. The requirement to provide supporting data was made clear to the State in the October 2, 2008 letter from Region X to the State (page 2, paragraph 1). According to the exemption request, the State estimates that the cost of operating under a similar procedure is "zero" and that the "required inclusion" would not increase, decrease, or have a minimal impact on the average length of time to take action in a case in Alaska, the number of support orders enforced, and/or the amount of collections. The State, however, failed to fully document the request by describing the similar procedure it would operate; defining the methodology used to reach its conclusion; and identifying the assumptions made and/or sampling approaches used.

As such, Alaska must enact the appropriate laws and implement the mandatory practice as soon as possible. The State must then submit for approval copies of the required laws, written policies and procedures, and administrative regulations or court rules as attachments to their IV-D State plan page for the mandated procedure.

We look forward to working with you to resolve this matter.

Sincerely,

Donna J. Bonar
Acting Commissioner
Office of Child Support Enforcement

March 20, 2009

The Honorable Bert Stedman
Chair, Senate Finance Committee
Alaska State Legislature
State Capitol, Room 516
Juneau, AK 99801

Dear Senator Stedman;

The Department of Revenue has requested a hearing to be scheduled for SB96 Child Support / Cash Medical. This bill was introduced by the Senate Health and Social Services Committee with support from the Governor. This letter outlines the need for the legislation to pass during this legislative session both for content of the bill and fiscal impact to the citizens of the state.

The Alaska Child Support Services Division (CSSD) needs to amend state law on three issues.

1. The requirement for cash medical support
2. The three year review cycle
3. The change of the definition of state in UIFSA

The first two amendments are less controversial and only require that child support orders include a provision for obligors to pay cash medical assistance to the custodial parent to help with health costs when insurance is not provided for that child, and that the division performs regular reviews of its cases.

The third amendment is more sensitive to certain legislators. The Uniform Interstate Family Support Act (UIFSA) contains a definition of "state." Under federal law, all states must adopt the uniform act's definition of "state" that includes "the United States Virgin Islands" and "an Indian tribe." For Alaska, the impact of adopting a definition that would include Indian tribes, means Indian tribes can issue and serve income-withholding orders on employers. The obligor would be entitled to contest the jurisdiction of the tribe to issue the order and the usual rights to contest the validity or enforcement of an order by an obligor would still apply. The change would also affect the process for state recognition of tribal orders. A tribal child support order would be registered in the Alaska state courts under the UIFSA procedures instead of a comity process. These changes are consistent with the purpose of UIFSA. The purpose of UIFSA is to unify state laws relating to child support orders, to provide efficient procedures for collecting child support in interstate cases, and to eliminate multiple support orders that were permitted under prior child support laws.

One question raised by the changes required by UIFSA is whether the tribal amendment would result in an expansion of tribal authority. The Department of Law has examined this question and came to the

following conclusion:

> "UIFSA's underlying purpose is not to define jurisdiction. Nor does the state have the ability to define tribal jurisdiction. The overall purpose of UIFSA is simply to unify state laws relating to child support orders, to provide efficient procedures for collecting child support in interstate cases, and to eliminate multiple support orders that were permitted under prior child support laws. These purposes do not trigger broader jurisdictional concerns."

Intent language could be included in the introduced child support legislation (SB 96) to ease concerns of legislators who are not comfortable with issues related to Indian tribes. Or a letter of intent could be attached as a separate letter to the bill. I might suggest the following as an amendment:

LEGISLATIVE FINDINGS AND INTENT. (a) The legislature finds that

(1) failure to bring AS 25.25.101 into compliance with the federal Social Security Act Title IV-D could result in the loss of approximately $17,000,000 in administrative funding;

(2) of the 33 states that have federally recognized tribes, Alaska is the only state that has not yet passed conforming legislation; and

(3) to bring Alaska into conformity with UIFSA, the legislature finds that it is necessary to amend AS 25.25.101 to include "an Indian tribe" and "the United States Virgin Islands" in the definition of "state."

(b) It is the intent of the legislature that this Act not alter or expand in any way the governmental relationship between federally recognized tribes and the state.

A zero fiscal note accompanies the legislation because passage of the bill would result in no additional impact to the Department of Revenue, Child Support Services Division. The fiscal impact to non-passage of SB96, or another like bill, could be detrimental to 62,000 Alaska's children under age 19. If the state remains out of compliance after this legislative session, CSSD could lose nearly the entire operating budget required to operate the child support activities mandated by state and federal law and could jeopardize the entire TANF block grant received by the Department of Health and Social Services, Division of Public Assistance. (The division currently has a budget of $174,000 General Funds.)

$11,000,000	Federal receipts paid through Title IV-D of the Social Security Act for child support services.
$12,708,403	Each year CSSD collects funds from families who also receive state benefits through the State's TANF (Temporary Assistance for Needy Families) program. The collections received on behalf of the children receiving funding through TANF are retained by CSSD and used as match to obtain additional federal funding for child support, $6,070,137 state match, and $6,638,266 to be used as part of the total federal receipts to be paid to CSSD for its services. *FY08 totals

$ 1,025,761	Annual collections from obligors whose children are in state foster care are sent to the Department of Health and Social Services to help pay for foster care costs. *FY08 totals
$ 860,560	Annual collections from obligors whose children are institutionalized are sent to the Department of Health and Social Services to help pay for non-federal foster care. *FY08 totals
$60,000,000	Federal TANF Block Grant is part of the Social Security Act. If any part of the Act is not in compliance, the State would risk losing the entire block grant. The majority of this funding is appropriated in the Department of Health and Social Services. Action Transmittal OCSE-AT-97-05 dated April 28, 1997 describes that CSSD funding would be lost and that non-compliance could also put at risk Title IV-A funding. The language from this Action Transmittal follows:

AUTHORITY:Section 455(a)(1)(A) of the Act specifies that funds appropriated under title IV-D shall be paid to States with approved State IV-D plans. There is no authority to expend Federal funds under title IV-D of the Act for the operation of a Child Support Enforcement program unless such State has an approved State IV-D plan.

Section 466 of the Act requires that all States, as a condition for approval of their State IV-D plan, must have in effect laws requiring the use of mandatory procedures to increase the effectiveness of their Child Support Enforcement programs. As a condition for State plan approval, section 454(20) of the Act provides that, to the extent required by section 466, States must have laws in effect and implement the procedures prescribed in or pursuant to such laws.

Section 454 of the Act sets the statutory requisites for the State IV-D plan. In addition, regulations at 45 CFR 301.10 define the State IV-D plan as a comprehensive statement submitted by the IV-D agency describing the nature and scope of its program. The State IV-D plan contains all the information necessary for the Office of Child Support Enforcement (OCSE) to determine whether the plan can be approved, as a basis for Federal financial participation in the State IV-D program.

Section 452(a)(3) of the Act requires that OCSE review and approve State plans for Child Support Enforcement programs under title IV-D of the Act. The authority to approve State plans is delegated to the Regional Office, but OCSE retains authority for determining that a State IV-D plan is not approvable.

As stated above, a determination that a State IV-D plan is disapproved will result in immediate suspension of all Federal payments for the State's child support enforcement program, and such payments will continue to be withheld until the State IV-D plan can be approved by OCSE. If a State is dissatisfied with OCSE's decision, reconsideration may be requested pursuant to 45 CFR 301.14. Withholding of Federal payments cannot be stayed pending reconsideration.

Section 402(a)(2) of the Act (as amended by PRWORA) provides that the chief executive officer of a State must certify that it will operate a child support enforcement program under an approved IV-D plan as a condition of eligibility for a TANF block grant under title IV-A of the Act. Therefore, States should be aware that TANF funds may also be at risk.

In conclusion:

1. Monthly distribution of child support payments to custodial parents averages $9,350,000.

2. One out of six citizens (approximately 125,000 people) in Alaska are somehow involved in a child support case.

3. If this legislation does not pass in the next 30 days, Alaska risks losing its entire child support services program and could lose its state TANF block grant that serves low-income citizens in every community.

Thank you for working with us on this issue.

Sincerely,

Ginger Blaisdell

March 27, 2009

The Honorable Bert Stedman
Co-Chair Senate Finance Committee
Alaska State Capitol, Room 516
Juneau, AK 99801

Dear Senator Stedman;

In consideration of a letter of intent for SB 96 Child Support / Cash Medical, I am offering the following language that would clarify the changes to AS 25 and conform to Uniform Code.

> It is the intent of the legislature that in order to bring Alaska into conformity with the nationwide Uniform Interstate Family Support Act (UIFSA) as approved by the American Bar Association on February 9, 1993, and as in effect on August 22, 1996 including any amendments officially adopted as of such date by the National Conference of Commissioners on Uniform State Laws, it is necessary to amend AS 25.25.101 to include "an Indian tribe" and "the United States Virgin Islands" in the definition of "state."
>
> The proposed UIFSA amendments are conforming amendments which will result in procedural changes in Alaska for enforcement and modification of child support orders from other jurisdictions. UIFSA does not determine the authority of an Indian tribe to enter, modify or enforce a child support order. In Alaska, the scope of tribal authority to enter, modify or enforce child support orders is an unsettled legal question, due in part to the lack of Indian country in most of the state. In adopting UIFSA conforming amendments, the legislature does not intend either to grant or restrict tribal jurisdiction, if any, which may exist to enter, modify, or enforce child support orders, and the amendments are not intended either directly or impliedly to acknowledge, expand or restrict tribal jurisdiction.

Thank you for working with us on this issue.

Sincerely,

V Blaisdell

CS FOR SENATE BILL NO. 96( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): SENATE HEALTH AND SOCIAL SERVICES COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to nonpayment of child support, to the definition of the term "state" for the purposes of the Uniform Interstate Family Support Act, to certain judicial and administrative orders for medical support of a child, to periodic review and adjustment of child support orders, to relief from administrative child support orders, to child support arrearages, and to medical support of a child and the Alaska Native family assistance program; amending Rule 90.3, Alaska Rules of Civil Procedure; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

DEFINITION OF "STATE"; LEGISLATIVE INTENT. (a) It is the intent of the legislature that in order to bring Alaska into conformity with the nationwide Uniform Interstate Family Support Act (UIFSA), as approved by the American Bar Association on

February 9, 1993, and as in effect on August 22, 1996, including any amendments officially adopted as of that date by the National Conference of Commissioners on Uniform State Laws, it is necessary to amend AS 25.25.101 to include "an Indian tribe" and "the United States Virgin Islands" in the definition of "state."

*** Sec. 2.** AS 11.51.122(a) is amended to read:

(a) A person commits the crime of aiding the nonpayment of child support in the second degree if the person knows that an obligor has a duty under an administrative or judicial order for periodic payment of child support**, for cash medical support,** or for the provision of health care coverage for a child under a medical support order **or a cash medical support order, or both** and

(1) being a person with a statutory duty to disclose information to a child support enforcement agency intentionally withholds the information when it is requested by a child support enforcement agency;

(2) being an employer of the obligor, intentionally withholds information about the residence or employment of the obligor, the eligibility of the obligor's children for coverage under the employer's health insurance plan, or the cost of the coverage of the children under the plan, when that information is requested by a child support enforcement agency or when the employer is required by state or federal law to report the information without a request by a child support enforcement agency; or

(3) intentionally participates in a commercial, business, employment, or other arrangement with the obligor, knowing at the time that the arrangement is made that it will allow the obligor to avoid paying all or some of the support when it is due or to avoid having a lien placed on assets for the payment of delinquent support; receipt of a substantial asset for less than fair market value from an obligor after the obligor's support order has been established constitutes a rebuttable presumption that the person receiving the asset knew that the transfer would allow the obligor to avoid paying all or some of the support or to avoid having a lien placed on the asset.

*** Sec. 3.** AS 25.25.101(19) is amended to read:

(19) "state" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico**, the United States Virgin Islands**, or

any territory or insular possession subject to the jurisdiction of the United States; the term "state" includes **an Indian tribe and** a foreign jurisdiction that has enacted a law or established procedures for issuance and enforcement of support orders that are substantially similar to the procedures under this chapter or under the Uniform Reciprocal Enforcement of Support Act or the Revised Uniform Reciprocal Enforcement of Support Act;

*** Sec. 4.** AS 25.27.060(c) is amended to read:

(c) In a court or administrative proceeding where the support of a minor child is at issue, the court or agency, as applicable, may order either **parent** or both parents to pay the amount necessary for support, maintenance, nurture, and education of the child. Regardless of whether a support order for periodic payments is issued, the court or agency shall issue a medical support order**, a cash medical support order, or both**. The medical support order shall require health care insurance coverage for the child if health care insurance coverage is available to either parent **or both parents** for the child at a reasonable cost. The court or agency shall consider whether the child is eligible for services through the Indian Health Service or other insurance coverage before ordering either parent **or both parents** to provide health care coverage through insurance**, cash medical support,** or other means **or a combination of insurance, cash medical support, or other means**. The court or agency shall allocate equally the cost of health care insurance for the child between the parents unless there is good cause to allocate the costs unequally. If the obligor has the duty to make periodic payments for non-medical child support, the obligor's periodic payments shall be decreased by the amount of the other parent's portion of payments for health insurance ordered by the court or agency and actually paid by the obligor. If the obligor has a duty to make periodic payments for non-medical child support, the periodic payments shall be increased by the obligor's portion of payments for health insurance if the other parent is ordered to and actually does obtain and pay for insurance. The court or agency shall allocate equally between the parents the cost of reasonable health care expenses not covered by private insurance unless there is good cause to allocate the costs unequally. One parent shall reimburse the other parent for the first parent's share of the uncovered expenses paid by the parent within 30 days after receipt by the first

parent of the bill for the health care, payment verification, and, if applicable, a health insurance statement indicating what portion of the cost is uncovered. The medical support order must meet the requirements of AS 25.27.063. Upon a showing of good cause, the court may order the parents required to pay support to give reasonable security for payments.

*** Sec. 5.** AS 25.27.160(c) is amended to read:

(c) If the agency is establishing only [A] medical support [ORDER], the notice and finding of financial responsibility must state

(1) that health care insurance shall be provided for the child to whom the duty of support is owed if health care insurance is available to the alleged obligor at a reasonable cost and that the alleged obligor and the other parent shall share equally the cost of the health care insurance and the costs of reasonable health care expenses not covered by insurance;

(2) **the sum of periodic payments of cash medical support for which either parent or both parents are found to be responsible under this chapter;**

(3) the name of the alleged obligee and the obligee's custodian;

(4) [(3)] that the alleged obligor may appear and show cause in a hearing held by the agency why the finding is incorrect, should not be finally ordered, and should be modified or rescinded, because

(A) no duty of support is owed;

(B) health care insurance for the child is not available to the alleged obligor at a reasonable cost;

(C) adequate health care is available to the child through the Indian Health Service or other insurance coverage; or

(D) there is good cause to allocate the costs of health insurance**, cash medical support,** or uninsured health care expenses unequally between the parents;

(5) [(4)] that, if the person served with the notice under this subsection does not request a hearing within 30 days, a copy of the medical support order will be sent to the person's employer under AS 25.27.063(b) without further notice or hearing

for inclusion of the child in family health coverage if it is available through the person's employer.

*** Sec. 6.** AS 25.27.193 is amended to read:

Sec. 25.27.193. Periodic review or adjustment of support orders. As necessary to comply with 42 U.S.C. 666, the agency, by regulation, shall provide procedures and standards for the modification, through **a three-year cycle of** [PERIODIC] review or adjustment, of a support order. Regulations adopted under this section must include procedures for periodic notice of the right to request review, procedures for hearings, and standards for adjustments regarding future periodic support payments. A modification under this section may be made without a showing of a material change in circumstances.

*** Sec. 7.** AS 25.27.195(a) is amended to read:

(a) A clerical mistake in an administrative order issued by the agency or an error arising from an oversight or omission by the agency may be corrected by the agency at any time [ON THE MOTION OF AN OBLIGOR].

*** Sec. 8.** AS 25.27.195(b) is amended to read:

(b) **The** [UPON THE MOTION OF AN OBLIGOR, THE] agency may, at any time, vacate an administrative support order issued by the agency under AS 25.27.160 that was based on a default amount rather than on the obligor's actual ability to pay.

*** Sec. 9.** AS 25.27.900(2) is repealed and reenacted to read:

(2) "arrearage" means a debt that is past due and equal to at least one monthly obligation under the support order for one or more of the following:

(A) monetary support;

(B) cash medical support;

(C) payment of health care costs or maintenance of health insurance;

(D) reimbursement of related costs;

(E) payment of attorney fees and legal costs and other fees;

(F) penalty, interest, and other relief as required by a support order;

*** Sec. 10.** AS 25.27.900(12) is amended to read:

(12) "support order" means any judgment, decree, or order that is issued by a tribunal for the support and maintenance of a child or of a parent with whom the child is living; "support order" includes a judgment, decree, or order

(A) on behalf of a child who has reached the age of majority if the judgment, decree, or order was lawfully issued; and

(B) for any or all of the following:

(i) monetary support, including arrearages;

(ii) payment of health care costs or maintenance of health insurance;

(iii) **payment of cash medical support;**

(iv) reimbursement of related costs;

(v) [(iv)] payment of attorney fees and legal costs and other fees; or

(vi) [(v)] penalty, interest, and other relief as required by a tribunal;

*** Sec. 11.** AS 47.07.025(b) is amended to read:

(b) Through the child support services agency or on its own behalf, the department may garnish the wages, salary, or other employment income of a person who

(1) is required by a medical support order**, cash medical support order, or both,** under AS 25.27.060(c) to provide **insurance or cash** coverage of the costs of medical care to a child who is eligible for medical assistance under this chapter;

(2) has received payment from a third party for the costs of the services; and

(3) has not used the payments to reimburse, as appropriate, the other parent or custodian of the child, the provider of the services, or the department.

*** Sec. 12.** AS 47.27.200(o) is amended to read:

(o) The applicability of AS 25.27 in the case of a recipient under an Alaska Native family assistance program includes the following:

(1) an obligor is liable to the Alaska Native family assistance program

in the amount of the family assistance provided by the program to a child to whom the obligor owes a duty of support except that, if a support order has been entered, the liability of the obligor for assistance provided by an Alaska Native family assistance program may not exceed the amount of support provided for in the support order, and, if a medical **support order, cash medical support order, or both,** [ORDER OF SUPPORT] has been entered, the liability of the obligor for assistance granted under AS 47.07 may not exceed the amount of support provided for in the medical **support order, cash medical support order, or both** [ORDER OF SUPPORT]; the child support services agency shall send notice of accruing liability under this paragraph in the same manner as required under AS 25.27.120(c), and, if the agency fails to comply with the notice requirement of this paragraph, interest does not accrue on the liability to the Alaska Native family assistance program unless a support order or medical support order**, or cash medical support order**, as applicable, has been entered;

(2) the child support services agency may appear in an action authorized under AS 25.27.045 at the agency's own discretion if an obligor under AS 25.27 is liable to the Alaska Native family assistance program under (1) of this subsection;

(3) an Alaska Native family assistance program to which the child support services agency erroneously disburses an overpayment of child support under an income withholding order is liable to the state for the amount disbursed, plus interest at the rate imposed under AS 25.27.062(*l*)(1);

(4) when the right to receive child support has been assigned to an Alaska Native family assistance program, an agreement under AS 25.27.065(a) that has not been adopted as an administrative order of the child support services agency is not effective during a period when the obligee is receiving assistance under an Alaska Native family assistance program;

(5) the child support services agency, on behalf of an Alaska Native family assistance program, shall take all necessary action permitted by law to enforce child support orders entered under AS 25.27, including petitioning the court for orders to aid in the enforcement of child support;

(6) if an obligor under AS 25.27 is liable to an Alaska Native family

assistance program under (1) of this subsection, the state is subrogated to the rights of the obligee to take actions authorized under AS 25.27.130(a);

(7) notwithstanding AS 25.27.130(c), the recovery of an amount for which an obligor under AS 25.27 is liable that exceeds the total assistance granted under AS 47.07 and this chapter shall be paid to the obligee;

(8) except as provided in AS 25.27.130(f), if an obligee under AS 25.27 is not receiving assistance under AS 47.07 or this chapter at the time the state recovers money in an action under AS 25.27.130(d) or (1) of this subsection, the recovery of any amount for which the obligor is liable shall be distributed to the obligee for support payments, including medical support payments, that had become due and unpaid since the termination of assistance under AS 47.07 or this chapter under a support order in favor of the obligee;

(9) after payment to the obligee under (8) of this subsection, the state may retain an amount not to exceed the total unreimbursed assistance paid on behalf of the obligee under AS 47.07 or this chapter;

(10) if an alleged obligor is liable to an Alaska Native family assistance program under (1) of this subsection, and a support order has not been entered, the child support services agency may, at its own discretion, undertake an action to establish paternity and a duty of support using the procedures prescribed in AS 25.27 and may enforce a duty of support using the procedures prescribed in AS 25.27; the agency may also institute administrative proceedings to determine the paternity of a child born out of wedlock upon application of an Alaska Native family assistance program; the agency may not recover costs of genetic tests required under this paragraph from a person who is a recipient of assistance under an Alaska Native family assistance program;

(11) when a hearing officer makes a determination under AS 25.27.170(d), the hearing officer shall, in addition to the factors described in AS 25.27.170(e), consider the amount of the alleged obligor's liability to an Alaska Native family assistance program under (1) of this subsection;

(12) notwithstanding AS 25.27.255(a), the child support services agency may not pay to an obligee any money that has been assigned to an Alaska

Native family assistance program.

*** Sec. 13.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INDIRECT COURT RULE AMENDMENT. AS 25.27.060(c), amended by sec. 4 of this Act, has the effect of changing Rule 90.3, Alaska Rules of Civil Procedure, by changing standards for issuance of medical and other support orders by the court.

*** Sec. 14.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. This Act applies to actions filed on or after the effective date of this section and to motions filed on or after the effective date in proceedings filed before, on, or after the effective date of this section.

*** Sec. 15.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Revenue may proceed to adopt regulations necessary to implement this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before July 1, 2009.

*** Sec. 16.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONDITIONAL EFFECT. Section 4 of this Act takes effect only if sec. 13 of this Act receives the two-thirds majority vote of each house required by art. IV, sec. 15, Constitution of the State of Alaska.

*** Sec. 17.** Section 15 of this Act takes effect immediately under AS 01.10.070(c).

*** Sec. 18.** Except as provided in sec. 17 of this Act, this Act takes effect July 1, 2009.

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

Senate Bill 108 - An Act creating the Stampede State Recreation Area

Sponsor Statement

The Stampede Road corridor, northwest of Healy and flanked on three sides by the Denali National Park, is a traditional place for many Alaskans to hunt, fish, trap, snowmachine, mush and pursue other recreational opportunities. Home to a growing number of Denali Borough residents and businesses, this is a wild and beautiful place that Alaskans from across the state can easily access.

This bill would establish the Stampede State Recreation Area in the vacant and unappropriated state land and water within the corridor as described in the bill and attached maps. The purpose of State Recreation Areas is to manage state-owned land and water in such a way that provides the maximum level of outdoor recreation opportunities without significant adverse effects on the natural system. The goal of this legislation is to protect the area for continued traditional use.

The Stampede mining trail was trail blazed in the 1930s. In 1961, the new State of Alaska upgraded the trail as part of the Pioneer Road Program. The project was halted in 1963 after some fifty miles of road was built, but no bridges were ever constructed over the several rivers it crossed, and the route was shortly rendered impassable by thawing permafrost and floods. While the road is described as being fifty miles long, only the first few miles are paved, and only the first eight miles are passable by standard car.

SB 108 will preserve the traditional uses of this area by creating the Stampede Recreation Area within the Stampede corridor. Several years ago, former Governor Murkowski proposed to build a road through this area. This planned road was vehemently opposed by borough residents as well as the recreational and traditional user groups who had an interest in keeping things "the way they are." In an effort to preserve the area for use by residents and visitors, the Denali Borough Assembly passed a resolution calling on the Alaska Legislature to designate the corridor as the Stampede State Recreation Area, with a strong emphasis on self-determination by the residents and users of the area.

The current use of the area includes off-road and all-terrain vehicle use, watercraft use, snowmobiling, horseback riding, hiking, bicycling, dog sledding, cross-country skiing, skijoring, camping, hunting, fishing, wildlife viewing, and photography. Recreational users of the area come from the Denali Borough, Fairbanks, Mat-Su and Anchorage. Tourists and adventurers travel to the area from across the globe. The area supports several tourism-related businesses including several lodges and a road-touring company that rents all-terrain vehicles for use on the more primitive sections of the road.

This bill is supported by the Denali Borough Assembly (see attached resolution). Additionally, the bill's sponsor has hosted several constituent meetings on the proposed legislation. By and large, the proposed area is supported by local residents and trail users. The main impetus behind the legislation is to protect the area for continued traditional use.

ANALYSIS: *(Attach a separate page if necessary)*

The costs associated with management of this new state recreation area include funding for a limited 2 year public planning process to develop a management plan (FY 2010-2011), followed by funding for a full time Park Ranger providing field management beginning in FY2011. Costs associated with the public planning process include scoping and survey work, draft management plan preparation, maps, displays, public notice advertising, room rentals, printing and distribution of final plan, lease space, computer and office supplies. Field management costs beginning in FY2011 include funding for a park ranger position, lease space, vehicle costs, utilities, and general supplies. One-time start up costs include one new vehicle, office supplies, and law enforcement gear.

Potential infrastructure identified in the management plan such as camping areas could generate park fees in future years.

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

MEMORANDUM March 16, 2009

SUBJECT: Sectional Summary for SB 108

TO: Senators Lesil McGuire and Bill Wielechowski, Co-Chairs
Members of the Senate Resources Committee

FROM: Senator Joe Thomas, Sponsor

This sectional summary is developed based on earlier summaries developed by Legislative Legal, and should not be considered an authoritative interpretation of the bill.

Section 1. Establishes the Stampede State Recreation Area. Describes the purpose for creating the recreation area, the land and water to be included, management responsibilities and incompatible uses. Identifies activities that the commissioner may not restrict within the recreation area. Authorizes the commissioner to purchase real property lying within the boundaries of the recreation area. Prohibits the use of the power of eminent domain to acquire privately owned land for inclusion in the recreation area.

DENALI BOROUGH, ALASKA
RESOLUTION NO. 07-01

A RESOLUTION IN SUPPORT OF THE ALASKA LEGISLATURE DESIGNATING MANAGEMENT OF THE STAMPEDE ROAD AREA WEST OF EIGHT MILE LAKE TO THE STATE OF ALASKA; DIVISION OF PARKS AND OUTDOOR RECREATION:70 CREATE THE STAMPEDE STATE RECREATION AREA.

WHEREAS, there are many issues related to the Stampede Trail and surrounding area west of Eight Mile Lake, many of which have brought into question the ability to continue traditional use dating back prior to statehood; and

WHEREAS, the Denali Borough has openly and repeatedly expressed a desire to have recreational opportunities and uses continued in this area; and

WHEREAS, the current use of the area includes motor vehicle access, horseback riding, dog mushing, cross-country skiing, skijoring, hiking, fishing, hunting, snowmobiling, and other outdoor activities; and

WHEREAS, there are no designated Alaska State Parks or Recreation Sites within the Denali Borough; and

WHEREAS, the Stampede Trail and surrounding area are well known critical habitat for caribou, moose and other wildlife; and

WHEREAS, this area is of current and future importance for providing a land base to support Alaska-owned outdoor recreation enterprises at Denali National Park and Preserve and other existing tourism destinations.

THEREFORE, BE IT RESOLVED that the Denali Borough Assembly strongly encourages the state of Alaska Legislature to pass legislation designating management of the following area to the state of Alaska, Division of Parks and Outdoor Recreation the following area: Fairbanks Meridian, Healy Quadrangle, the western half of Township 12S9W, the western half of Township 13S9W, Township 12S10W, Township 12511 W, Township 13S10W, Township 13S11 W.

BE IT FURTHER RESOLVED that the Denali Borough specifically requests that the aforementioned current uses be included in the management of the area and the Denali Borough Assembly be designated as the Local Advisory Management Council for the Stampede Recreation area.

ED a APPROVED by the DENALI BOROUGH ASSEMBLY this 10th day of January, 2007.

Denali Borough Mayor

ATTEST: Borough Clerk

RESOLUTION IN SUPPORT OF THE STAMPEDE STATE RECREATION AREA
DENALI BOROUGH, ALASKA

WHEREAS, the State of Alaska has recognized the importance of the Stampede townships for habitat and public recreation by classifying most of this area as Wildlife Habitat and/or Public Recreation in the Tanana Basin Area Plan (1991); and

WHEREAS, the State of Alaska recently validated the importance of these lands for habitat and recreation by choosing to retain acreage around 8 Mile Lake and near Otto Lake in state ownership when determining the Denali Borough's entitlement conveyances; and

WHEREAS, 8 Mile Lake is a logical gateway to such a State Recreation Area, and is most in need of immediate planning to provide services and avoid negative impacts; and

WHEREAS, local citizens who attended two Stampede Summits and commented on land and resource planning issues have re-iterated their individual interest in maintaining these lands for existing recreational uses; and

WHEREAS, growing numbers of statewide and national visitors enjoy the Denali area, for its landscape, wildlife, and its unique recreational opportunities; and

WHEREAS, in view of increased pressures for visitation, the established purposes of the Stampede townships will best be furthered by use of a management structure that enables all stakeholders to plan the future of this valuable public resource; and

WHEREAS, designation as a State Recreation Area will ensure such management.

THEREFORE, BE IT RESOLVED BY THE BOARD AND MEMBERS OF THE DENALI CITIZENS COUNCIL, that we support the establishment by the State of Alaska of the Stampede State Recreation Area, with boundaries as described in the legislation brought forth by Senator Joe Thomas, but with the ADDITION of nine sections around 8 Mile Lake (see map attached).

Panguingue Creek Homeowner's Association
P.O. Box 451, Healy, AK 99743

3/24/2009

Dear Senator Thomas,

The Panguingue Creek Homeowner's Association would like to thank you for sponsoring the bill to create the Stampede State Recreation Area and for your work toward its passage. The Panguingue Creek Subdivision is located along the first few miles of the Stampede Road, so all of our members are very interested in the future of the lands proposed to be a part of the new recreation area.

Many of us that own property in this area and choose to live here do so because of the area's beautiful setting and access to Alaska's wilderness. We live here because we enjoy hiking, camping, berry picking, bird watching, skiing, skijoring, dog mushing, snowmobiling, riding ATV's, hunting, trapping, and fishing, and just about everything you can do to enjoy Alaska's beauty. Indeed, we have given up easy access to groceries and services we travel for over 100 miles to obtain, in order to have easy access to all the Stampede area has to offer.

Already, people from across the state, the country, and the world pass through here to use the state's land for recreation. Creating the Stampede State Recreation Area will help ensure that future generations of Alaskans and visitors will be able to enjoy this area, as well. As homeowner's closest to the proposed area, we know of the need that already exists for some type of management and improvement of this area.

Stampede Road offers vehicle access as far as Eight-mile Lake, one of the area's biggest draws, for the summer months. This area sees the highest use in the summer months, and without any improvements, its quality as a destination will continue to deteriorate as users leave trash and impact the area. The area around Eight-mile Lake already serves as a trail head for the area and begs for its inclusion in the State Recreation Area Proposal.

Two "Stampede Summits" got our community together to think about what we could do to make sure that we will always have access to these lands so near to our homes. The Stampede State Recreation Area is the best way to achieve that goal, and we thank you for taking this issue to Juneau for us.

Sincerely,

Panguingue Creek Homeowner's

William Price, President
Phil Brease, Secretary
Jared Zimmerman, Treasurer

March 16, 2009

Senator Joe Thomas
State Capitol, Room 510
Juneau, AK 99801

RE: Senate Bill 108, Creation of a Stampede State Recreation Area

Dear Senator Thomas,

The Denali Chamber of Commerce was created for the purpose of cooperating in matters of interest to the public and professional people of the community; to promote and perpetuate the business, commercial, manufacturing and civic interests of the members and the community; to promote and perpetuate the general welfare and prosperity of the Denali area, and to stimulate public interest to these ends; and to develop a uniform public spirit whereby we may put forth the maximum effort in the aid of our area and to make it more prosperous, beautiful and a better place in which to live.

Therefore, in fulfilling the purpose of the Denali Chamber of Commerce, the Board of Directors on behalf of the members of the chamber support the proposed legislation you have introduced in the State of Alaska Senate, for the Creation of the Stampede State Recreation Area.

Our community residents use this area for many recreational purposes such as hiking, bird watching, motor vehicle travel (ATV's and snowmobiling), dog mushing, skiing, skijoring, photography, berry picking, hunting and trapping. Several chamber members own business enterprises on the Stampede Road which provide recreational services to users of the area which include horseback riding, jeep safari tours and sled dog tours along the Stampede Trail, as well as lodging facilities for tourists visiting the area.

The chamber members also support inclusion of lands around the 8-Mile Lake area in the legislation. These lands provide a natural gateway to a recreation area and are most in need of management. Most locals and visitors use this as a parking and/or staging area for access to the Stampede Trail and state lands on which they recreate.

Denali Chamber of Commerce

PO Box 437
Healy, AK 99743

website: http://denalichamber.com
email : denali.chamber@gmail.com

We are most appreciative of your efforts to introduce this important legislation which will provide a means of management to encourage stewardship and continued recreation opportunities for all Alaskans and visitors alike. We also appreciate you making the wishes of your constituents known to the legislature.

Best regards,

Denali Chamber of Commerce Board of Directors

Josh Wilhour, President

Heidi DeCoeur, Vice President

Julia Potter, Treasurer

Cathey Peterson-Hall, Correspondence Secretary

Division of Geological & Geophysical Surveys

Coal and CBM Resource Assessment for the Proposed Stampede State Recreation Area

Executive Summary

The Division of Geological & Geophysical Surveys undertook the following short analysis of available geologic data in an area west of Healy, Alaska, to determine the state's current understanding of the area's coalbed methane (CBM) and other energy resource potential. Figure 1 outlines the acreage that is being considered for designation as a State Recreation Area (SRA). Sedimentary rocks of the coal-bearing Usibelli Group were mapped and analyzed at the southern boundary of the SRA by previous geologists working this region. They noted that the thickest coal seam was 13 feet, 6 inches and the thickest cumulative coal at one locality was 22 feet. Coal quality analyses from these exposures indicate the maturity rank is predominantly Lignite A. If coal bearing strata extending beneath the extensive covered area to the north within the SRA are all of this rank, the potential for commercially viable CBM or other energy resources would be low.

However, coal measures exposed to the east of the SRA, in the vicinity of the town of Healy, contain much thicker coal seams and are of much higher thermal rank. If these strata are present in the subsurface in the area of the SRA, there would be unrealized potential for natural gas and/or coal resources within the area in question. The currently available information does not rule out either interpretation. Gathering subsurface information by drilling a few critically-placed core holes would provide a relatively definitive answer as to the energy resource potential of the area.

Sources of Information

Available resource information for the proposed Stampede State Recreation Area include several regional 1:250,000 scale geologic maps (Csejtey and others, 1992; see Fig. 1); detailed 1:63.360 scale geologic map of the Healy D-5 quadrangle (eastern half of the proposed area, Wahrhaftig, 1970; see Fig. 2), and maps of the Healy D-5 and D-6 quadrangles (Gilbert and Bundtzen, 1976); U.S. Bureau of Mines Report of Investigations 4520 (Toenges and Jolley, 1949); Alaska coal geology, resources, and coalbed methane potential (Flores and others, 2004, see Fig. 3); geologic report on coal investigations in Alaska (Barnes and others, 1951); the Alaska Coal Mine Land Inventory (Plangraphics, Inc., 1983); and the U.S. Bureau of Mines Selected Coal Deposits in Alaska (Meyer, 1990). The RI 4520 contains outcrop descriptions of bed and coal thickness, strike and dip bedding attitude information, and coal quality analyses (11 analyses shown in table 1) at seven sites (1-7 on attached map, Fig. 1) that are at or just below the southern margin of the area. Unfortunately, the locations of these sites are indicated on a single page, hand drafted cartographic map (Fig. 7 from Toenges and Jolley, 1949) so no precise latitude or longitude data are available. However, these locations were approximately located on the map of Csejtey and others, 1992 (our Fig. 1) by using the river drainages as depicted on Fig. 7 in Toenges and Jolley, 1949, and the descriptions given in the text. The discussion that follows is based on the above mentioned **publicly-available** data and relies on the geologic mapping

3518

presented in Csejtey and others (1992) and Wahrhaftig (1970). This discussion will focus on the coal geology and related data that are relevant to the proposed Stampede State Recreation area.

Geology

The proposed Stampede State Recreation area contains Quaternary surficial deposits (**Qt** map unit, Fig. 1), and sedimentary rocks consisting of the Nenana Gravel (**Tcn** map unit, Fig. 1), and the Tertiary-age coal-bearing Usibelli Group (**Tcb** map unit, Fig. 1) exposed on its southern border. These Tertiary rocks were deposited on much older metamorphic rocks of the Yukon-Tanana terrane, that includes Paleozoic and Precambrian (?) pelitic and quartzose schist (**PzpCp**, **Pzk** and **MDt** map units, Fig. 1).

The Usibelli Group (**Tcb** map unit, Fig. 1) is predominantly Miocene-age strata that were deposited in southward-flowing fluvial, lacustrine, and peat bog environments situated north of the present day central Alaska Range (Ridgway and others, 2007). The Usibelli Group sedimentary sequence consists of five formations that are summarized in Fig. 3. These are from bottom to top: 1.) coal-bearing Healy Creek; 2.) noncoaly Sanctuary; 3.) coal-bearing Suntrana; 4.) coal-bearing Lignite Creek; and 5.) noncoaly Grubstake. The Usibelli group is conformably overlain by the Tertiary-age Nenana Gravel (unit 6 described in Fig. 3).

East of the Parks Highway near Healy, Alaska the Usibelli Coal Mine successfully produces annually about 1.5 million short tons of coal. In the immediate area, the only past production west of the Parks Highway and southeast of the proposed Stampede State Recreation area was at the abandoned Diamond Coal Mine (shown as DCM on Fig. 1). Here, a 40 foot thick coal bed that strikes N62° E and dips 33° NW, along the slope of the hill, was mined in 1946, producing 34,911 (short) tons of coal in stripping operations (Toenges and Jolley, 1949). This unit is mapped as **Tcu**, or undifferentiated coal-bearing Usibelli Group by Wahrhaftig (1970, see Fig. 2).

Figure 1 shows outcrops of the Usibelli Group at the southern edge of the proposed Stampede State Recreation area and south into Mt. McKinley National Park as coal-bearing strata (**Tcb**). Strikes and dips of **Tcb** shown on the Fig. 1 are from Toenges and Jolley (1949) and they generally dip from 9° to 33° to the northwest, directly into the proposed recreation area. The total thickness of the exposed coal at these localities ranges from 8 ft to 22 ft (see Fig. 1) with the thickest bed of coal at 13 ft 6 in (data from Toenges and Jolley, 1949; locations approximate). In general, detailed geologic mapping by Wahrhaftig (1970) shows similar directions of bedding attitude (strike and dip) of the coal-bearing Usibelli Group. However, Wahrhaftig's mapping further differentiates the Usibelli Group into the lowermost Healy Creek Formation (unit 1, Fig. 3) and the Lignite Creek Formation (unit 4, Fig. 3). The Lignite Creek Formation is queried (Tlc?) indicating uncertainty which formation is present. The intervening Sanctuary Formation (unit 2, Fig. 3) and the Suntrana Formation (unit 3, Fig. 3), the main source of minable coal to the east at the Usibelli Coal Mine are not indicated on the Wahrhaftig 1970 map in the area along the southern border of the proposed Stampede State Recreation area. Additionally, Wahrhaftig's 1970 map of the Healy D-5 quadrangle has structure contours (red-dashed lines, Fig. 2) drawn at the base of the Nenana Gravel that suggest that the local basin may be up to 2500 ft deep. However, his cross sections A to A' (shown on Fig. 2) and B to B' (not

3519

shown) imply that this small basin is filled with ~2500 ft of Nenana Gravel. The base of the Nenana gravel in these cross sections is denoted by question marks (?) indicating what lies beneath the Nenana Gravel is unknown. The 1970 Wahrhaftig map does not indicate the source of the information for the structure contour, or that data that indicates the local "basin" may be 2500 feet deep. On the basis of the general trend of northwest dipping strata it is reasonable to suggest that coal-bearing Usibelli Group rocks might underlie the proposed recreation area at some depth. However, drilling would be necessary to confirm their presence, thickness, and depth.

Coal Quality of Coal Exposed near the Proposed Stampede State Recreation Area

Eleven coal quality analyses reported in Toenges and Jolley (1949) for coal seams sampled at the seven localities (1-7 shown on the map, Fig. 1) were placed into an Excel spreadsheet and Apparent Coal Rank was calculated for each (Table 1). Nine of the samples have an Apparent Rank of Lignite A and have Moist, Mineral Matter Free BTUs between 7536 to 8140. Two samples have "Apparent Ranks" of High Volatile Bituminous C (Locality 1, analysis C- 64425) and Subbituminous C (Locality 5, analysis C-64418). The high moisture content of 26.3% for sample C- 64425 at locality 1 suggests that this sample was highly weathered prior to testing and that the "Apparent Rank" of High Volatile Bituminous C is suspect. The description given on page 22 in Toenges and Jolley (1949) suggests that this 7 ft 10 in thick coal seam is directly beneath the Nenana Gravel and was subaerially exposed for a long period of time. Bacterial action on highly weathered coals results in higher water retention, and the moisture content of High Volatile Bituminous C coals should not exceed 20%. Therefore, discounting the analysis for this sample, all of the other coals are low rank Lignite A (9 samples) to Subbituminous C (1 sample). The low apparent rank of these coals indicates that the original peat bogs were never buried deep enough and for a long enough time to develop into higher rank coals. This is consistent with these coals likely being from the uppermost Lignite Creek formation (unit 4, Fig. 3).

Alaska State Legislature

Senator Hollis French

Sponsor Statement
Senate Bill 110 Preservation of Evidence

The American system of justice is founded on balancing the twin protections of the rights of those harmed by crimes, and the rights of the accused. Criminal convictions are guided by evidence of innocence or guilt, and no one in the criminal justice system wants innocent people to be convicted of crimes they did not commit. The availability and use of physical evidence at trials and during appeals is a critical piece of a meaningful justice system.

Modern DNA technology, coupled with today's comprehensive information and communications technologies, has exponentially increased the power of preserved evidence. Preserved evidence can solve cold cases and prove or disprove claims of innocence in ways unimaginable just a few years ago. The problem is, however, that evidence collection and preservation policies have not always kept pace with these new technologies.

Senate Bill 110 begins to address this issue by requiring that biological evidence in murder and sexual assault cases is properly retained while cases are unsolved and during the period after conviction that an offender is imprisoned or required to register as a sex offender. The bill still provides for police departments to return or dispose of evidence too large to keep after portions of the material likely to contain biological evidence have been removed and preserved. The bill provides for a notice process in cases where evidence will be destroyed, and it establishes a temporary task force to look at other issues involved in this emerging field of technology and make recommendations on standards and practices in cataloging and handling evidence.

Recently in Denver, Colorado a young man who had been convicted of murder at the age of 15 and who served over a decade in prison was released and his conviction was vacated as a result of DNA evidence that proved his innocence. And in cases closer to home, DNA was used after 13 years to identify a suspect in the murder of Bonnie Craig, a UAA student. The preservation of evidence is a vital and effective way to ensure the criminal justice system meets its goal of protecting the innocent and convicting the guilty. Join me in supporting this important bill.

Senator Hollis French

SB110 Preservation of Evidence
Sectional Analysis

Section 1.

Section 1 creates new provisions in the criminal code for the preservation of evidence that require state agencies and municipal law enforcement agencies to preserve all evidence that relate to unsolved cases of murder and 1st degree sexual assault and 1st degree sexual abuse of a minor.

The section further requires that biological evidence in these crimes be retained while a person remains a prisoner in the custody of the Department of Corrections or subject to registration as a sex offender.

The section then provides that evidence that is impracticable due to size or other characteristics to retain may be destroyed after removal and preservation of portions likely to contain relevant evidence, and that evidence can be destroyed before the expiration of the time period by following a notice procedure outlined in the bill.

The section provides for the court to order remedies if evidence is destroyed in violation of this section, and protects agencies from civil immunity for unintentional failure to comply with the provisions of the section.

Finally, section one provides definitions of terms.

Sections 2, 3 and 4, make amendments to the disposal of DNA for persons who are not guilty of offences for which they were arrested.

Section 5 establishes a task force to address standards and practices for the proper collection and preservation of preserved evidence.

Section 6 establishes the applicability of section 1.

Section 7 provides a repeal of the task force established in Section 5.

Prison inmate charged in Bonnie Craig killing

DNA Database connects man held Outside to 1994 slaying of Anchorage teen.

By MEGAN HOLLAND
Anchorage Daily News
(05/01/07 05:39:00)

A grand jury has charged a former Anchorage man with murder in the slaying of Bonnie Craig, an 18-year-old college student who was raped and savagely beaten before she toppled over a cliff into a creek in 1994.

Kenneth Dion, now 37 and in prison in New Hampshire for a series of armed robberies, has also been charged with rape in one of the most highly publicized and emotional slayings in Anchorage in recent decades.

DNA evidence that prosecutors say links Dion to the slaying was central to the solution, according to cold-case investigators.

"It's a major step in a case that was of significance to Anchorage and a burden to the family for years," prosecutor Pat Gullufsen said.

Dion was on probation on an Anchorage robbery conviction and had been out of prison for only a few months when Bonnie was killed.

"Just to know he's already in jail and there's no way he can hurt anyone else is a relief," said Bonnie's mother, Karen Foster, reached Monday morning. She said she had been told in January that charges could be coming in the slaying of her daughter, who had been a high school wrestler and had taught swimming to junior high kids.

Troopers were able to match semen found on Bonnie with Dion through a national computer database of DNA profiles. Dion was never known to troopers and wasn't a suspect in the case until the DNA match came back in November.

"There is no doubt about this one," trooper cold-case investigator Jim Stogsdill said of the match. "There's no confusion."

Dion likely did not know Bonnie, Stogsdill said, but apparently picked her up as she walked to a bus stop on Lake Otis Parkway on the way to an early-morning class on Sept. 28, 1994, at the University of Alaska Anchorage. Her body was found that afternoon by a hiker at McHugh Creek.

FORT RICHARDSON

Dion, originally from New Hampshire, came to Alaska as a soldier and was stationed at Fort Richardson, then stayed for a couple of years after he left the military. He did not have a job at the time of Bonnie's slaying and was in and out of jail on robbery and assault charges. He was 25 years old when Bonnie was killed.

He was in jail in Alaska at the end of July 1994, two months before Bonnie's death. And he

returned to jail on a probation violation about two months after the slaying.

Troopers say Bonnie was beaten and raped before she fell off a cliff near the Seward Highway. Her body was found floating in McHugh Creek near Mile 112.

Troopers have said she died of a head injury and hypothermia.

As to how Bonnie got to McHugh Creek, 10 miles from her home, or where she was raped, or whether she was struck in the head by her killer or she injured her head in the fall off the 30-foot cliff, "we can only surmise," Stogsdill said.

The hunt for her killer mesmerized Anchorage. Family and friends posted photocopies of the doe-eyed teenager who graduated from Service High School, asking for anyone with information about her killer to call troopers. She was not the kind of young woman to get in trouble. She lived with her parents and played the violin. She didn't drink.

Clues, though, were few and far between. And as the years passed, the crime remained unsolved and a reminder to young women walking alone that a brutal rapist had not been found.

As authorities kept looking, technology advanced to better match DNA, and more people were put into a national database.

DNA from Bonnie's case was put in the national database in 2000. New Hampshire authorities entered Dion's information in November 2006. Immediately, when workers with the Alaska state crime lab were conducting their weekly routine check of the database on Nov. 9, they had a hit.

Tammy Gregory, who was married to Dion at the time Bonnie was killed, broke down crying when reached Monday afternoon in Kenai. She said Dion was in and out of jail, on drugs, and generally abusive during those years. She hasn't seen or spoken to him in a decade. She doesn't want to remember that time in her life.

But still, she said, "I would never have thought he was capable of that. I would never have thought I was associated with someone like that."

NEW HAMPSHIRE RECORD

Dion, who left Alaska around 1996, made it back to New Hampshire, where he committed a series of robberies beginning in May 2002, according to authorities there and in Alaska. One robbery was of a pharmacy. He didn't have a weapon but, using his finger, pretended to, said Tom Velardi, deputy county attorney for Strafford County, N.H.

Dion ordered the pharmacy workers to give him OxyContin, a prescription painkiller similar to heroin that has become a popular street drug. "He had very serious addiction to it," Velardi said.

After the initial DNA match in November, authorities collected new DNA from Dion, which was taken back to Anchorage and matched again, Stogsdill said.

The grand jury in Anchorage indicted Dion on one count of first-degree murder, two counts of second-degree murder and one count of first-degree sexual assault. The two counts of second-degree murder are because it could have been a situation in which Dion didn't intend to kill Bonnie, Stogsdill said.

According to the New Hampshire Department of Corrections, Dion was sentenced to 15 years in

prison in February 2003 for five robberies that occurred from spring 2002 until he was incarcerated. Dion was living in Rochester, N.H., before he went to prison. According to the department's Web site, he is eligible for parole in August 2008.

Alaska troopers and New Hampshire authorities interviewed Dion recently, but Stogsdill said he revealed little information.

"This is a long-overdue resolution to the Bonnie Craig case," Stogsdill said.

Bonnie's mother said the news of the charges is a relief, but it also opens old wounds and memories of what happened to her little girl. She said she doesn't want a trial to deepen those wounds. She hopes Dion will admit to the crime and make a deal with prosecutors. That would be easier, she said.

Alaska authorities will try to have him extradited here to face the new charges, Gullufsen said. And, if he is convicted, he will likely finish out his sentence in New Hampshire, then transfer to an Alaska prison.

Masters released from jail

By Howard Pankratz
The Denver Post
Posted: 01/22/2008 01:02:20 PM MST

Tim Masters leaves the Larimer County courtroom where he was released after serving nearly a decade of a life term in prison for the murder of Peggy Hettrick in 1987. (THE DENVER POST | CRAIG F. WALKER)

FORT COLLINS — Special prosecutors today said that DNA testing of murder victim Peggy Hettrick's clothing revealed the partial profiles of three men but that the profiles excluded Tim Masters as the source of the DNA.

Minutes after the prosecutors handed their findings to Judge Joe Weatherby, Weatherby vacated the judgment of conviction and sentence against Masters, who was immediately released from custody on a $200,000 personal recognizance bond.

Masters' next court date is Feb. 5, after the Larimer County district attorney assesses the status of the case.

A short time after Masters' release, longtime Colorado defense attorney David Wymore — who led the effort to free Masters for a crime Masters maintained he didn't commit — praised former employees of the Colorado Bureau of Investigation, the FBI and Fort Collins Police Department for their help in freeing Masters.

Fax: 907-465-3922
E-mail: Senator_Bert_Steadman@legis.state.ak.us.

Dear Senator Steadman:

We are writing this letter to explain to you the importance of Senate Bill 10, a bill sponsored by the cancer physicians in Alaska to require health care insurers to provide insurance coverage for the routine medical care costs for cancer patients who enroll on certain approved clinical trials. We believe that this bill will significantly enhance the care and outcome for many of our patients with cancer. Clearly, a diagnosis of cancer is life threatening and requires the best care possible. Many clinical trials are available in Alaska, but this treatment option is often not pursued by patients because of the concern for costs of the standard medical care.

This bill has been fully vetted in the Senate Health & Social Services and the Labor & Commerce Committees. Furthermore, it carries a zero fiscal note. We would like to urge you to place this bill on the Finance Committee as soon as possible or to waive the bill through your committee due to the zero fiscal note.

Your prompt attention to this bill will clearly enhance the treatment for our patients and that of all the Alaskans affected by cancer..

Thank you very much for your attention. Please contact our office to speak with one of us if you have any questions.

Sincerely yours,

Jeanne E. Anderson, MD

400. Coverage for reconstructive surgery following mastectomy
405. High deductible health plan
500. Definitions

Sec. 21.42.010. Applicability. AS 21.42.010 — 21.42.500 do not apply to

(1) reinsurance;

(2) policies or contracts not issued for delivery in this state or delivered in this state, except as provided in AS 21.42.120;

(3) wet marine and transportation insurance;

(4) title insurance, except that AS 21.42.080, 21.42.120, 21.42.130, 21.42.180, 21.42.190 and 21.42.230 do apply. (§ 1 ch 120 SLA 1966)

Revisor's notes. — In the introductory language of this section, in 2006, "AS 21.42.010 — 21.42.500 do not" was substituted for "this chapter does not" to reflect the addition of AS 21.42.700 — 21.42.705 to this chapter by § 1, ch. 39, SLA 2006.

Sec. 21.42.020. Insurable interest: life, annuity, or health. (a) A person of competent legal capacity may procure or effect an insurance contract on the life or body of the person for the benefit of any person. A person may not procure or cause to be procured an insurance contract upon the life or body of another person unless the benefits under the contract are payable to the individual insured, the personal representatives of the individual insured, or to a person having, at the time the contract was made, an insurable interest in the individual insured.

(b) If the beneficiary, assignee, or other payee under a contract made in violation of this section receives from the insurer any benefits from the contract upon the death, disablement, or injury of the person insured, the person insured or the executor or administrator of the person insured may maintain an action to recover the benefits from the person receiving them.

(c) Notwithstanding the other provisions of this section, a charitable organization may obtain, by procurement, assignment, or otherwise, life or health insurance on an insured who consents to the issuance of the insurance. In this subsection, "charitable organization" means a charity that is exempt from taxation under 26 U.S.C. 501(c)(3) (Internal Revenue Code).

(d) "Insurable interest," with reference to life, annuity, or health insurance, includes only the following interests:

(1) in the case of persons related closely by blood or by law, a substantial interest engendered by love and affection;

(2) in the case of perso

STATE OF ALASKA
2010 LEGISLATIVE SESSION

BILL NO. CSSB110(JUD)

ANALYSIS CONTINUATION

CSSB110(JUD) would establish requirements for the preservation or retention of certain types of evidentiary material. Since Law only maintains temporary custody and returns such material to the investigating agency there will be no fiscal impact on Law from this portion of the bill.

The bill also adopts a procedure for a person whose DNA is collected at the time the person is arrested for a felony offense but who is later acquitted of the charge to request that his or her DNA be removed from the system. It also provides that DNA included in the DNA identification registration system in good faith, even if it is later removed, may be used a provided by law in a criminal investigation.

Section 5 of the bill establishes a "Task Force on Standards and Training of Evidence Technicians" under the Department of Law and directs the Task Force to complete its work by 12/31/2011. In contemplating the creation and assignment of the Task Force to Law it is clear there will be a period of considerable staff work involved (for which Law is not seeking additional monetary support). In addition, the potential also exists for some significant out-of-pocket costs. With eleven members on the task force including the Attorney General, the Chief Justice, and members of the Legislature it seems reasonable to conclude some face-to-face meetings would be necessary. Law will minimize such costs by carrying out the extensive and detailed interagency staff work largely (if not entirely) via teleconference, videoconference, etc. Presuming all participating agencies would assume their own costs, Law would anticipate incurring travel and other associated Task Force related expenses not to exceed $5,000.00 in FY11.

This bill amends AS 12.36.010 by adding a new section which requires the preservation of evidence in crimes listed under AS 11.41.100 - 11.41.130. This legislation will result in additional evidence being stored for a longer period of time. It is expected that the requirements of this bill will be manageable and have no fiscal impact on the department.

This bill extends the State Board of Registration for Architects, Engineers, and Land Surveyors to June 30, 2017. In accordance with AS 08.03.020 funding would extend one year following the termination date allowing the Board to conclude its affairs. FY 2010 funding is included in the Operating Budget request. The costs shown are an average of direct costs for a biennial licensing period and are included in the FY 2010 budget request.

Travel expenses represent transportation and per diem for the 10 member board and at least 3 staff to meet at least four times each year and to administer licensing examinations as required by statutes.

The program is required to cover costs with licensing fees under AS 08.01.065, and revenue generated by board fees are anticipated to cover its full operating costs. New funds are not required to implement this bill.

Members of the Legislative Budget
and Audit Committee:

In accordance with the provisions of Title 24 and Title 44 of the Alaska Statutes, sunset legislation, we have reviewed the activities of the State Board of Registration for Architects, Engineers, and Land Surveyors. The attached report is submitted for your review.

DEPARTMENT OF COMMERCE, COMMUNITY
AND ECONOMIC DEVELOPMENT
STATE BOARD OF REGISTRATION FOR ARCHITECTS,
ENGINEERS, AND LAND SURVEYORS

September 22, 2008

Audit Control Number
08-20058-08

This review examines the activities of the State Board of Registration for Architects, Engineers, and Land Surveyors to determine if there is a demonstrated need for its continued existence. Currently, under AS 08.03.010(c)(3), the State Board of Registration for Architects, Engineers, and Land Surveyors is scheduled to terminate on June 30, 2009. We recommend that the legislature extend the board's termination date to June 30, 2017.

The audit was conducted in accordance with generally accepted government audit standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. Fieldwork procedures utilized in the course of developing the findings and discussion presented in this report are discussed in the Objectives, Scope, and Methodology.

OBJECTIVES, SCOPE, AND METHODOLOGY

In accordance with Titles 24 and 44 of the Alaska Statutes, we have reviewed the activities of the State Board of Registration for Architects, Engineers, and Land Surveyors (BRAELS or board) to determine if there is a demonstrated public need for its continued existence and if it has been operating in an efficient and effective manner.

As required by AS 44.66.050(a), this report shall be considered by the committee of reference during the legislative oversight process in determining whether BRAELS shall be continued. Currently, AS 08.03.010(c)(3) states that the board will terminate on June 30, 2009. If the legislature does not extend the termination date for the board, BRAELS will have one year to conclude its administrative operations.

Objectives

The three central, interrelated objectives of our report are:

1. To determine if the termination date of the board should be extended.
2. To determine if the board is operating in the public's interest.
3. To determine if the board has exercised appropriate regulatory oversight of architects, engineers, land surveyors, and landscape architects.

Scope

The assessment of operations and performance of the board was based on criteria set out in AS 44.66.050(c). Criteria set out in this statute relates to the determination of a demonstrated public need for the board. We reviewed the board's activities for FY 05 through FY 08.

Methodology

The major areas of our review were board proceedings, licensing, and complaint investigation. During the course of our audit we:

- Reviewed applicable statutes and regulations.
- Tested for compliance with statutes and regulations related to the State Board of Registration for Architects, Engineers, and Land Surveyors.
- Reviewed meeting minutes of the board.
- Reviewed and tested licensing files for compliance with statutory and regulatory requirements.
- Reviewed and analyzed investigation files.
- Reviewed annual reports issued by the board.
- Corresponded with the Department of Administration, Division of Personnel, the Equal Employment Opportunity Commission, the Human Rights Commission, the Office of

Victim's Rights, and the State Ombudsman's Office regarding complaints against BRAELS.

- Reviewed the reading and correspondence files maintained with the Department of Commerce, Community, and Economic Development's Division of Corporations, Business, and Professional Licensing.
- Interviewed employees of the Division of Corporations, Business, and Professional Licensing and BRAELS board members.

ORGANIZATION AND FUNCTION

The State Board of Registration for Architects, Engineers, and Land Surveyors (BRAELS or board) is a regulatory board consisting of 10 members appointed by the governor. The board consists of two civil engineers, two land surveyors, one mining engineer, one electrical or mechanical engineer, one engineer from another branch of the profession of engineering, two architects, and one public member[1].

Alaska Statute requires each board member to have been a resident of the State for three consecutive years immediately preceding an appointment to BRAELS.

Additionally, except for the public member, board members must be registered and have a minimum of five years of professional practice in their field.

Exhibit 1

STATE BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS, AND LAND SURVEYORS
(As of June 30, 2008)

Professional Members
Boyd Brownfield, Chair, Civil Engineer
Craig Fredeen, Vice Chair, Mechanical Engineer
Mark Morris, Secretary, Electrical Engineer
Charles Leet, Civil Engineer
Clifford Baker, Land Surveyor
Richard Heieren, Land Surveyor
Daniel Walsh, Mining Engineer
Harley Hightower, Architect
Burdett Lent, Landscape Architect (non-voting)
Vacant, Architect

Public Member
Vacant

Alaska Statutes 08.48.101 and 08.48.111 establish the powers of the board. They include adopting regulations for:

1. Describing the contents, conducting, and establishing a minimum score for passing examinations.
2. Establishing bylaws governing its meetings and activities.
3. Publishing a code of ethics or professional conduct for those persons regulated by the board.
4. Establishing continuing education requirements for persons regulated by the board.

The board may issue registrations to architects, engineers, land surveyors, and landscape architects who meet the standards of education and training determined to be necessary by the board. In addition to issuing new or renewal registrations, the board may also suspend, refuse to renew, or revoke registrations.

By statute, the Department of Commerce, Community, and Economic Development's, Division of Corporations, Business, and Professional Licensing (division) provides administrative support to the board. Administrative support is carried out by the board's

[1] In August 2007, the board voted to introduce legislation to make the landscape architect representative a full voting member and increase the board to 11 members. This legislation was introduced in the 2007-2008 legislative session. The result was unsuccessful and legislation will again be introduced in the 2008 – 2009 legislative session. Currently, the Landscape Architect seat is non-voting.

Executive Administrator and Licensing Examiner and the division's Office of Consumer Affairs and Investigations.

Administrative support includes budgetary services and functions such as collecting fees, maintaining files, receiving application forms, and publishing notices of examinations and meetings.

AS 08.01.087 empowers the division with the authority to act on its own initiative or in response to a complaint. The division may:

1. Conduct an investigation if it appears a person is engaged or about to engage in a prohibited professional practice.
2. Bring an action in Superior Court to enjoin the act.
3. Examine the books and records of a registrant or an individual engaged in practices regulated by the board.
4. Issue subpoenas for the attendance of witnesses and records.

REPORT CONCLUSIONS

Under AS 08.03.010(c)(3), the Board of Registration for Architects, Engineers, and Land Surveyors (BRAELS or board) will terminate on June 30, 2009. If the legislature does not take action to extend the board's termination date, AS 08.03.020 provides that the board will have one year in which to conclude its administrative operations.

In our opinion, the termination date for the board should be extended. BRAELS serves a public purpose and has demonstrated an ability to conduct its business in a satisfactory manner. The registration of qualified architects, engineers, land surveyors, and landscape architects benefits the public's health, safety, and welfare. We recommend that the legislature extend the termination date of the board until June 30, 2017.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Department of Commerce, Community, and Economic Development Division of Corporations, Business, and Professional Licensing, in conjunction with the State Board of Registration for Architects, Engineers, and Land Surveyors (BRAELS), should review registration fees as provided by statute and consider decreasing fees.

BRAELS has a significant cumulative surplus of revenues. The FY 08 surplus income is almost twice the four year average of expenditures. Additionally, the division has not reviewed BRAELS registration rates since 2005.

Based on the division's 2005 review, BRAELS registration fees were increased for the 2006-2007 biennium registration period. However, the division's review was flawed due to understated revenue information. The division neglected to include over half a million dollars in registration fees paid through the internet in its analysis[2].

AS 08.01.065(c) states that:

> *...the department shall establish fee levels under (a) of this section so that the total amount of fees collected for an occupation approximately equals the actual regulatory costs for the occupation. The department shall annually review each fee level to determine whether the regulatory costs of each occupation are approximately equal to fee collections related to that occupation.*

The division was unable to provide an explanation of BRAELS's need for the cumulative surplus of excess revenue from registration fees. Without the required annual review of registration fee levels, it is likely that the board will continue to accumulate revenue in excess of its regulatory costs.

We recommend the division, in conjunction with the board, review registration fees and regulatory expenditures as required by statute and determine whether a fee decrease is necessary to reduce BRAELS's current surplus. Further, we recommend that the division perform the annual review of fee levels as defined in state statute.

[2] Specifically, revenues collected electronically over the internet were missing from the rate review. These missing revenues total: FY 02 (renewal year) $230,283, FY 03 $780, and FY 04 (renewal year) $435,318.

3547

Recommendation No. 2

The director of Corporations, Business, and Professional Licensing should ensure that BRAELS registrants that are Corporations, Limited Liability Companies (LLC's), and Limited Liability Partnerships (LLP's) are licensed in accordance with state regulations.

In addition to registering individuals, the board also registers architects, engineer, land surveyor, and landscape architect corporations, LLC's and LLP's. State regulation[3] requires that:

1. Corporations, LLPs or LLCs designate an individual currently registered in Alaska as the responsible person for each field of practice, and;
2. The entity must provide full authority to the designated individual to make all final practice decisions on behalf of the corporation, LLC, or LLP.

In FY 08, over 35% of corporations, LLC's, and LLP's registered by division staff were registered without the required documentation showing the acceptance by the individual designated by the entity as the responsible person for each field of practice.

12 AAC 36.135(7) states that:

> *...a certified statement on a form provided by the board, stating that each licensee designated in responsible charge for each branch of practice acknowledges and agrees to that designation by the corporation, limited liability company, or limited liability partnership; the statement must include each responsible charge licensee's (A) state registration number; (B) registration expiration date; (C) professional seal; and (D) signature.*

We recommend that the director of Corporations, Business, and Professional Licensing obtain any missing certified statement of acceptance, from the responsible person, for all corporations, LLCs and LLPs currently licensed. The director should also have registration procedures corrected to ensure all required documentation is obtained prior to registering any corporations, LLCs or LLPs.

Recommendation No. 3

The Office of the Governor should fill vacant seats on the State Board of Registration for Architects, Engineers, and Land Surveyors in a timely manner.

For the past nine months, the board has not been in a position to serve in the best interest of the public due to board vacancies. The public member seat has been vacant since December 5, 2007 and an architect seat vacant since March 1, 2008.

[3] 12 AAC 36.135(3).

Alaska Statute 08.48.011(b) states that the board consists of ten members appointed by the governor having the qualifications as set out in AS 08.48.031. The board consists of two civil engineers, two land surveyors, one mining engineer, one electrical or mechanical engineer, one engineer from another branch of the profession of engineering, two architects, and one public member.

Staff turnover in the Office of Boards and Commissions has negatively impacted the Governor's ability to make timely appointments to the State Board of Registration for Architects, Engineers, and Land Surveyors.

The public has not been represented by a seat on the board for the past three meetings; architects have not been fully represented for the past two meetings.

We recommend that the Office of the Governor fill vacant seats on the State Board of Registration for Architects, Engineers, and Land Surveyors in a timely manner.

(Intentionally left blank)

ANALYSIS OF PUBLIC NEED

The following analyses of board activities relate to the public need factors defined in AS 44.66.050(c). These analyses are not intended to be comprehensive, but address those areas we were able to cover within the scope of our review.

Determine the extent to which the board, commission, or program has operated in the public interest.

The State Board of Registration for Architects, Engineers, and Land Surveyors (BRAELS or board), through its registration of architects, engineers, land surveyors and landscape architects, has presented competent professionals to the public. There is a continued public need for this board because of the professional expertise required to practice the varied professions within its scope. The registering of applicants who meet the required qualifications is necessary to protect the public's safety, health, and welfare.

The board is responsible for adopting regulations to ensure only persons with the proper qualifications are admitted into the profession. The board disciplines, suspends, or revokes registrations of practitioners who have committed acts in violation of state law. Registrants are required to stamp final drawings, specifications, surveys, plats, plates, reports, and similar documents with a seal bearing the registrant's name, registration number, and the profession for which they are registered. By affixing this seal and signing the documents, the registrant certifies that these documents were prepared by or under the registrant's direct supervision, and the registrant has met the minimum standard set to protect public safety, health, and welfare.

Determine the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices that it has adopted, and any other matter, including budgetary, resource, and personnel matters.

The board receives its primary revenue from registration and renewal fees. Renewals are conducted on a biennial basis creating a two-year cycle in board revenues. The board has had an ending cumulative surplus since FY 06, see Exhibit 2 on the following page.

BRAELS registration fees have not been reviewed since October 2005 when fees were increased $100. This increase in registration fees was based on understated revenue information. We recommended that the division, using corrected revenue information, review registration rates and consider changes to fee levels to reduce this cumulative surplus in income, see Recommendation No. 1.

Exhibit 2

State Board of Registration for Architects, Engineers, and Land Surveyors
Schedule of License Revenue and Expenditures
As of June 30, 2008
(Unaudited)

	FY 05	FY 06	FY 07	FY 08
Regular Revenue	$170,065	$870,474	$185,778	$ 903,769
Online Revenue	1	890,983	4,425	864,941
Total Revenues	170,066	1,761,457	190,203	1,768,710
Direct Expenditures				
Personal Services	268,313	286,842	242,015	199,898
Travel	36,362	59,818	41,040	33,863
Services	146,170	176,596	100,339	147,836
Commodities	1,472	1,845	1,271	1,456
Total Direct Expenditures	452,317	525,101	384,665	383,053
Administrative Indirect Costs	303,021	273,258	353,890	310,652
Total Expenditures	755,338	798,359	738,555	693,705
Annual Revenues over (under) Expenditures	(585,272)	963,098	(548,352)	1,075,005
Beginning Cumulative Surplus (Deficit)	469,600	(115,672)	847,426	299,074
Ending Cumulative Surplus (Deficit)	$ (115,672)	$ 847,426	$ 299,074	$ 1,374,079

Determine the extent to which the board, commission, or agency has recommended statutory changes that are generally of benefit to the public interest.

In FY 08 the board supported SB 263 which was passed into law (Ch. 66, SLA 2005) on June 6, 2008. This law provided a BRAELS registration exemption for persons already authorized by the Department of Public Safety who are engaged in the design of fire detection and suppression systems. Additionally, this law allowed that if a mining engineer who qualifies for appointment to the board and is interested in serving on the board is not available, the governor may appoint a petroleum or chemical engineer to the seat designated for a mining engineer.

The board has also worked to make needed revisions to BRAELS regulations. Significant changes to regulations include:

- 12 AAC 36.061(a)(2) – Updating the National Council of Architectural Registration Boards' education standards.
- 12 AAC 36.067 – Changing the computation of qualifying experience days for admission to the examination.
- 12 AAC 36.068 – Updating landscape architect mentoring regulations.
- 12 AAC 36.100 – Mandating an applicant seeking registration by examination pass a jurisprudence questionnaire, with the exception of land surveyors.
- 12 AAC 36.910 – Enacting stricter policies to board member absences.
- 12 AAC 36.510 – Changing the continuing education requirements for architects, engineers, and landscape architects.

Determine the extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service that it has provided.

Board meeting dates, times and locations are published both on the State's Online Public Notice system and in the Anchorage Daily News. In addition, board members extend meeting invitations to peers and to the public, and promote use of the BRAELS ListServ[4] function. Meetings are rotated between the State's three largest cities and time was provided at every meeting for public comment.

Online public notice was not given for the board's November 17, 2006 and May 17, 2007 meetings. Additionally, public notice was only given ten days in advance of the August 9, 2007 meeting, instead of the required 15 days notice. These omissions were caused by staff turnover in the Department of Commerce, Community, and Economic Development's, Division of Corporations, Business, and Professional Licensing publications technician position.

Determine the extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

Meetings were sufficiently advertised; time was allotted in the agenda of each meeting for public discussion; and often, public members with knowledge in a specific field were sought to share their insights. Public notices of proposed regulations are published on the Alaska State website, and circulated to architects, engineers, land surveyors and landscape architects in professional trade journals, public notice advertisements, and direct mail correspondence with the division. The board reviews and considers all public correspondence at their meetings.

[4] ListServ is the board's electronic mailing list. Members receive agendas, minutes and other board-related materials.

Determine the efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of victims' rights or the office of the ombudsman have been processed and resolved.

Complaints

No complaints against the board were reported to the State Department of Administration's Division of Personnel, the Equal Employment Opportunity Commission, the Human Rights Commission, or the Office of Victim's Rights.

The State Ombudsman received four complaints against the board from FY 05 to FY 08. Three were declined based on a lack of jurisdiction and the fourth involved providing oral advice to the complainant. Each of these cases was closed the same day they were received.

We received a complaint regarding possibly inappropriate communications between the board and the administrative law judge (ALJ) while the board was meeting in executive session. In the cases of professional occupation boards, the dispute before an ALJ would be between the complainant and the attorney general's office. Since it is the board that decides to accept or reject the ALJ's decision, the board itself is not a party to the dispute.

Typically when transmitting their decision, the ALJ will offer the board an opportunity to meet and answer questions that the board might have. If the board meets with the ALJ as part of its deliberation regarding a possible licensing action, this would be done in executive session. This process appears reasonable given the relative duties and responsibilities of both the board and the ALJ.

Registrant Investigations

The board sets goals and then develops objectives in order to meet these goals. Two objectives related to investigations were developed and accomplished. These objectives included working to reduce the backlog of enforcement cases and having active participation in investigations. A special board committee was created to work with investigators on technical issues and expedite cases. The length of time between when cases opened and closed and the amount of cases open have significantly declined during the last four years.

From the period of July 1, 2005 through June 19, 2008, 245 investigation cases were open or opened with the Division of Corporations, Business and Professional Licensing's Office of Consumer Affairs and Investigations (OCAI)[5]. Types of cases are summarized on the next page.

[5] The investigations unit in the Department of Commerce, Community and Economic Development's Division of Corporations, Business, and Professional Licensing was reorganized effective July 1, 2008 as the Office of Consumer Affairs and Investigations.

- Unlicensed Practice/Activity (94)
- Violation of Licensing Regulations (65)
- Negligence (27)
- Practice Beyond Scope (17)
- Violating Professional Ethics (11)
- License Application Practice (8)
- Incompetence (5)
- Fraud/Misrepresentation (5)
- Other (4)
- Violation of Agreement (3)
- Contested License Denial (2)
- Action in Another State (2)
- Supervision (1)
- Malpractice (1)

Of these 245 cases open or opened, 230 were closed in an average of 2.5 months time. Exhibit 3 identifies the actions taken in these closed cases:

Exhibit 3

Case Closure Summary July 1, 2005 - June 19, 2008

Disposition of Closed Cases	Number of Cases
Advisement Letter	113
Compliance	57
No Action - No Violation, Unfounded or Insufficient Evidence	47
Other	6
License Action	4
Incomplete Complaint	2
Director Caseload Reduction	1

Of the remaining 15 cases open, 14 cases were assigned to OCAI and one case to the Office of Administrative Hearings. The average time these 14 cases have been opened with OCAI is 4.6 months and all have a case priority level of 3[6].

OCAI is effectively investigating cases, and the board has operated efficiently by taking necessary enforcement actions. These board actions were both fair and objective.

Determine the extent to which a board or commission that regulates entry into an occupation or profession has presented qualified applicants to serve the public.

The board registers architects, engineers, land surveyors, or landscape architects either by

[6] Case Priority levels are defined as:

Level 1 - Incident represents an immediate danger to public,

Level 2 - Incidents which by the severity of their nature dictate a high priority,

Level 3 - Incidents that are less serious in nature and do not appear to constitute immediate or severe pubic danger or serious damages,

Level 4 - Incidents involving failure to comply with statutes or regulations which are discovered through the course of proactive enforcement on the part of the Investigative Unit, but do not meet the criteria of priority 1 - 3. This type of enforcement can only occur when manpower and caseload allow.

examination or by using past performance records. Registration using past performance records is more commonly referred to as registration by comity. Each applicant is required to satisfy the requirements listed in State regulations for registration. In addition, architect, engineer, and landscape architect applicants are required to complete a board-approved university level course in arctic engineering. The registration application process appears to be reasonable and appropriate. We found no instances of unqualified applicants being registered.

In 35% of licenses issued to corporations, limited liability companies, and limited liability partnerships, the certified statement acknowledging and agreeing with the responsible party designation had not been obtained by the division. Obtaining this statement is required by regulation,[7] see Recommendation No. 2.

The board implemented continuing education (CE) requirements for Land Surveyors during the 2007 renewal period. Architects, engineers, and landscape architects will be required to fulfill CE requirements for the 2009 renewal period. Registrants fulfill CE requirements on the honor system and a sample is audited by division staff for compliance. Due to a procedural error, division staff only audited 7% sample of registrants for compliance instead of the 10% defined in regulations.

Concerns surfaced in FY 08 regarding the board's comity policy with Canada, specifically, that the Board waived the fundamentals of engineering examination (FE) if a Canadian engineer applicant had at least 5 years of experience.

The board's position is that Canada's education program for engineers differs from that of the United States (US) and therefore comity regulations[8] for Canadian engineers differ. As explained by a board member, in the US, engineering candidates receive a bachelor's degree and then sit for the FE exam. The FE exam tests engineering basics. After at least four years of work experience an US applicant sits for the Practice of Engineering (PE) exam prior to being registered.

In Canada, engineering candidates go to school longer and are subject to a rigorous mentoring program. These Canadian schools and mentoring programs' curriculums exceed what is tested on the US FE exam, and therefore the exam is waived. Canadian engineers applying for practice in the US are still required to pass the US PE exam. These regulations appear reasonable and a review of the 245 investigations shows no licensing actions taken against Alaskan registered engineers residing in Canada.

The exhibit on the following page summarizes new registrations issued by the board from FY 05 to FY 08.

[7] 12 AAC 36.135
[8] 12 AAC 36.105

Exhibit 4

New Licenses or Permits Issued (Exclusive of Renewals)	FY 05	FY 06	FY 07	FY 08	Current License Holders as of June 30, 2008
Architects	25	22	34	21	539
Landscape Architects	8	5	2	4	45
Land Surveyors	7	11	18	11	478
Chemical Engineers	3	7	6	6	103
Civil Engineers	124	128	117	135	2755
Electrical Engineers	21	33	33	27	581
Mechanical Engineers	39	38	38	30	679
Mining Engineers	2	0	0	1	30
Petroleum Engineers	5	2	2	4	114
Certificate of Authority - Corporations	29	32	43	39	375
Certificate of Authority - LLC	12	15	27	14	90
Certificate of Authority - LLP	0	1	1	0	3

Determine the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

The board is in compliance with State personnel practices, including affirmative action in qualifying applicants. From FY 05 to FY 08, the board did not deny an applicant registration based on personal attributes.

Determine the extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Statutory

In August 2007, the board voted to support introduction of legislation to make the landscape architect representative a full voting member. The legislation introduced to revise the statute during the 2007/2008 legislative session was unsuccessful. Currently, board members are working with the Alaska Professional Design Council to craft new legislation to be introduced during the 2008/2009 legislative session. The board anticipates that the landscape architect representative will be a full voting member by spring 2009.

Regulatory

In May 2007, the board voted to begin registering structural, environmental, and fire protection engineers. The special committee assigned to studying additional engineering specialties for registering is now addressing issues such as regulation changes, definitions,

3557

and grandfathering of civil engineers. The board anticipates having these disciplines registered by the end of FY 09.

Other Changes

For the past nine months, the board has been hampered in its work due to board vacancies. The public member seat has been vacant since December 05, 2007 and an architect seat vacant since March 1, 2008; see Recommendation No. 3.

Determine the extent to which the board, commission, or agency has effectively attained its objectives and purposes and the efficiency with which the board, commission, or agency has operated.

BRAELS's mission is to protect the public health, safety, and welfare through the regulation of the practice of architecture, engineering, land surveying, and landscape architecture by:

- Ensuring that those entering these practices meet minimum standards of competency, and maintain such standards during their practice;
- Requiring registration to practice in the State of Alaska; and
- Enforcing both the registration and competency requirements in a fair and uniform manner.

We reviewed the board's goals and objectives established to achieve this mission from FY 05 to FY 08. These goals and related objectives were aligned with the board's mission and they have either been met by the board or the board is in the process of attaining them.

Major goals and objectives the board has successfully met include:

- Implemented continuing education requirements for architects, engineers, land surveyors and landscape architects.
- Reviewed the Arctic Engineering course to ensure all materials used to establish competency in professions are appropriate.
- Evaluated administrative process and staffing functions to ensure effective use of human resources.
- Continually updated the board's website with new and changing information.
- Attended architect, engineer, land surveyor, and landscape architect zone and national meetings.
- Encouraged board members to assume leadership positions in national organizations.

Determine the extent to which the board, commission, or agency duplicates the activities of another governmental agency or the private sector.

BRAELS is the only such board that registers, investigates, and enforces continuing education requirements for architects, engineers, land surveyors and landscape architects in Alaska. BRAELS registrants have the option to affiliate with state and national organizations. We reviewed numerous state and national organizations and have found none that duplicate the efforts of the board.

Legislative Audit Division
P.O. Box 113300
Juneau, AK 99811-3300

Dear Ms. Davidson:

This letter is in response to your September 22, 2008 confidential preliminary audit report on the State Board of Registration for Architects, Engineers and Land Surveyors.

Recommendation No. 4

The Office of the Governor should fill vacant seats on the State Board of Registration for Architects, Engineers and Land Surveyors in a timely manner.

The Office of the Governor concurs with this recommendation. I appreciate your observation that turnover in the Boards and Commissions office may have played a role in the delay. I am pleased to report that the Governor recently selected the public member for the board, however, we are still working on identifying an architect to fill the remaining vacancy. We find it challenging to find volunteers from the various professions who are willing and able to devote the time necessary to serve on the licensing boards. We will continue to make every effort to fill vacant positions in a timely manner.

If you need additional information, please contact me at 269-7450.

Sincerely,

Frank Bailey, Director
Boards and Commissions

LEGISLATIVE AUDIT

Ms. Pat Davidson, CPA
Legislative Auditor
Legislative Budget and Audit Committee
Division of Legislative Audit
P.O. Box 113300
Juneau, AK 99811

Dear Ms. Davidson,

Re: Audit Report, CAN 08-20058-08
Board of Registration for Architects, Engineers and Land Surveyors

Thank you for allowing us to comment on the Audit Report of the State Board of Registration for Architect, Engineers and Land Surveyors.

We concur with your audit findings and recommendations that –

Recommendation No. 1: The Department of Commerce, Community, and Economic Development, Division of Corporations, Business, and Professional Licensing, in conjunction with the State Board of Registration for Architects, Engineers, and Land Surveyors (BRAELS), should review registration fees as provided by statute and consider decreasing fees.

We fully concur with this recommendation and will take immediate action to reassess expenditure and revenue data, and calculate new fee proposals to utilize the surplus of excess revenue. Staff turnover in the Division and miscommunications with the department's Fiscal staff have unfortunately caused this negative impact on incorrect fee assessments. The new fee assessments will be ready for implementation at the next license renewal cycle in December 2009.

Recommendation No. 2: The director of Corporations, Business, and Professional Licensing should ensure that BRAELS registrants that are Corporations, Limited Liability Companies (LLC's), and Limited Liability Partnerships (LLP's) are licensed in accordance with state regulations.

P.O. Box 110800, - 23 -Alaska 99811-0800
Telephone: (907) 465-2500 Fax: (907) 465-5442 Text Telephone: (907) 465-5437
Email: questions@commerce.state.ak.us Website: http://www.commerce.state.ak.us/

We concur with your recommendation. Staff has already initiated the process of reviewing files to obtain a "responsible charge" statement for each business. Since January 2008, there were 50 corporate authorizations issued. Of the 50, seventeen failed to contain the responsible charge statement or a copy of the seal of the responsible charge individual. Attempts to obtain the missing information are currently in progress.

Another item worth mentioning is while many of the files failed to contain a "responsible charge form" as required by regulation, the files do contain correspondence identifying or verifying the designation of the responsible charge individual. The department will ensure procedures are followed to satisfy regulation 12 AAC 36.135(7).

Recommendation No. 3: The Office of the Governor should fill vacant seats on the State Board of Registration for Architects, Engineers, and Land Surveyors in a timely manner.

We concur with this recommendation.

Thank you again for the opportunity to comment on your audit findings.

Sincerely,

Emil Notti /by CH

LEGISLATIVE AUDIT

Dear Pat:

I have reviewed the "CONFIDENTIAL" preliminary audit report on:

Department of Commerce, Community, and Economic Development, State Board of Registration for Architects, Engineers and Land Surveyors, September 22, 2008

The Board agrees with the contents and substance of your Preliminary Audit Report dated September, 2008, most notably the three "FINDINGS AND RECOMMENDATIONS" contained therein.

It is further noted that the Preliminary Audit Report removed Recommendation number three of four recommendations contained in an earlier "Management Letter No. 1", State Board of Registration for Architects, Engineers, and Land Surveyors" dated September 9, 2008.

The board will work closely with our divisional staff to bring the recommendations to closure as follows:

- RECOMMENDATION #1. The board will avail itself to and cooperate with our division's budgeting and accounting activities to review registration fees and make appropriate recommendations as provided by statute.

- RECOMMENDATION #2. The board will work closely with our investigative support, as appropriate, to bring closure to those corporations, LLC's and LLP's who are operating without proper documentation and to correct procedures that will ensure the process is complete upon original application.

- RECOMMENDATION #3. The board will continue to emphasize the importance of fielding a complete representation of professionals as defined by statute/regulation. It is noted that, after an extended time without a Public Member, the board has recently received a replacement. Our board needs only to fill an Architect seat.

SB 115

<target><bill>SB 115</bill><subject>SB 115</subject><comm>SFIN26</comm></target>

Senator Lyman Hoffman

Alaska State Legislature

2/23/09

Sponsor Statement for SB 115

SB 115 creates the Rural Community Energy Assistance Program (RCEAP) within the Department of Commerce. This program will provide grants for energy assistance to rural communities based on a community's population and the price they pay for fuel. The program is for 1 year only, and will sunset at the end of that time.

During this winter, it has been difficult for many Alaskan families to afford to purchase heating oil. This issue was first highlighted by reports from Emmonak but has spread to other areas of the state. These reports detail the dilemma faced by many families; choosing between purchasing adequate amounts of heating fuel or choosing other necessities of life.

Reports indicate that, unlike previous years, there is sufficient fuel in the villages. However, because fuel and other necessities of life are so expensive, people cannot afford to buy both. A recent report written by the Institute of Social and Economic Research noted than in 1990, food costs in Bethel were 45 percent above food costs in Anchorage. By the beginning of 2007, this differential had increased to 92 per cent. It stands to reason that small villages outside of Bethel are even more expensive. This issue is exacerbated by a lack of income to accommodate these rising prices.

The same ISER document reports that in 2007, 100 gallons of fuel oil in Bethel cost $459 while in Anchorage the equivalent energy costs $120. Again this difference would be even greater if comparing more remote villages in Alaska with Anchorage.

This legislation is not a permanent fix to the energy problems in rural Alaska. It provides one time assistance to Alaskan families to help them get through the remainder of the winter heating season.

Understanding Alaska's Remote Rural Economy

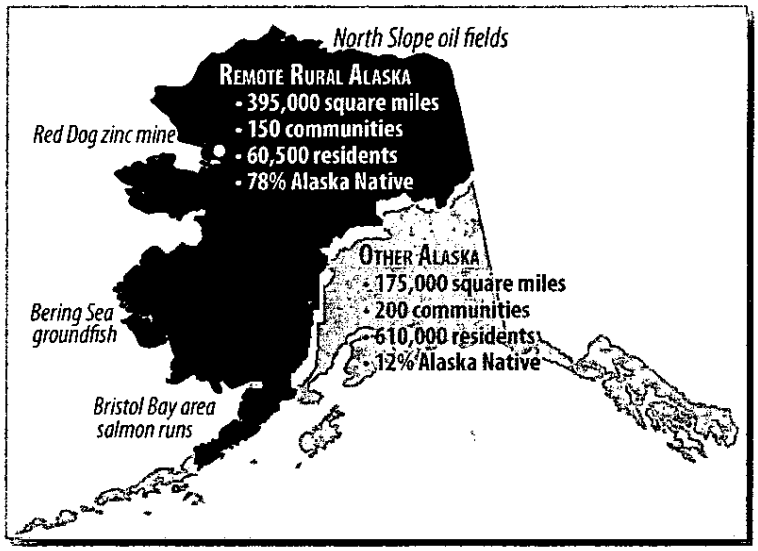
By Scott Goldsmith

UA Research Summary No. 10 • January 2008
Institute of Social and Economic Research • University of Alaska Anchorage

In the big, remote stretches of northern and western Alaska, many households keep themselves going with a mix of cash, subsistence, sharing, and other non-cash trading. That's a world away from the state's urban economy, and under standard measures like income, the remote rural economy lags far behind.

Over the years there have been many efforts to improve the remote rural economy—but there's a lot we don't know about it. Standard economic measures don't capture all the activity in an economy where subsistence, sharing, and non-cash trading play important parts. Some kinds of data don't even exist.

But to develop effective strategies, Alaskans need to understand the economic realities of the remote region. This paper is an overview of the remote economy, based on published data. It's at best an approximation, because the data are so limited. Still, it's a first step—and it highlights the many gaps in information.



Stretching from the North Slope to the Alaska Peninsula, the remote region covers 395,000 square miles and is large enough to hold Japan, Germany, and Great Britain. Alaska Natives, the region's aboriginal people, still make up most of the population—although thousands have moved to urban areas in recent times. The 60,500 residents live in five regional centers and about 150 small communities.

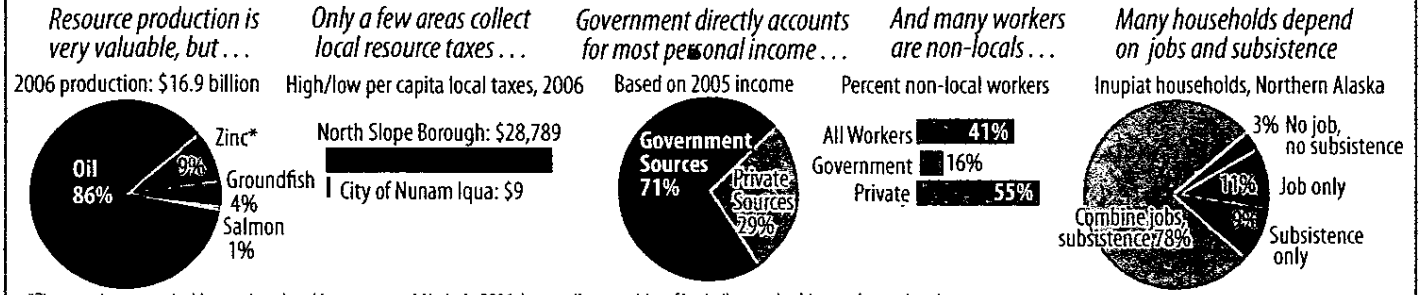
Most of Alaska's natural resource wealth is produced in the remote region—but largely in enclaves like the North Slope oil facilities. Outside the enclaves, the region's isolation, difficult terrain, and harsh climate have historically limited economic growth.

Commercial salmon fishing was the region's largest private industry for much of the last century, and thousands of residents still depend on it. But changes in world markets have hurt that industry. Oil has been by far the most valuable resource since the 1970s. Pollock and other groundfish harvested offshore are also valuable, making up much of the world's groundfish catch. And with rising prices, zinc produced in the region has also recently become much more valuable.

But with some important exceptions, this resource wealth bypasses the regional economy, and it's government that accounts for most income of residents. Regional unemployment is high and cash incomes are low. Figure 1 tells the story of the remote economy.

- *Despite the high value of resources produced in remote areas—nearly $17 billion in 2006—local residents depend on government for 71% of their personal income.* That share would likely be closer to 90% if it also included income that indirectly depends on government spending. Government supports not only public but also many private jobs.
- *Some residents and a few areas do benefit from resource production* —through local taxes, jobs, and Alaska Native corporations that own resources or do business with resource industries.
- *The locations and types of jobs available in remote areas often don't match the local labor supply*—which means many local residents are unemployed, while at the same time about 40% of workers are non-locals, either from other areas of Alaska or outside the state.
- *Combining cash-paying jobs and subsistence activities is the way most households in remote areas get along.* A recent survey found, for example, that 78% of Inupiat households in northern Alaska combine jobs and subsistence fishing, hunting, and other activities.

Figure 1. The Remote Rural Economy: What Makes It Different?



*Zinc was the most valuable metal produced in remote rural Alaska in 2006, but smaller quantities of lead, silver, and gold were also produced.

Sources: Alaska Departments of Labor, Natural Resources, Fish and Game, and Commerce, Community and Economic Development; National Marine Fisheries Service; Bureau of Economic Analysis; Survey of Living Conditions in the Arctic, 1998-2001; author's estimates. Note: Resource production value based on wellhead value of oil, market value of zinc, and price paid fishermen for salmon and groundfish.

The Remote Rural Region

We define the remote rural region as the North Slope, Northwest Arctic, and Lake and Peninsula boroughs and the Wade Hampton, Bethel, Nome, Dillingham, and Yukon-Yoyukuk census areas.[1] Most communities in this region are small and along the coast or on rivers, far off the state's main road and ferry systems.[2]

The people, the way of life, the local government structure, and the Alaska Native corporations in remote rural Alaska all influence the regional economy. Data about this region are spotty at best, and some figures we include here are estimates. The huge size, isolation, and small population of the region—and the complexity of the economy—make collecting data expensive and difficult. That complexity also means that standard measures—income, employment, and consumption—are useful but don't give the whole economic picture. They don't account for the contributions of subsistence and other non-market activities, or differences in spending patterns and other factors that complicate comparisons of living conditions between remote rural and urban places.

The People

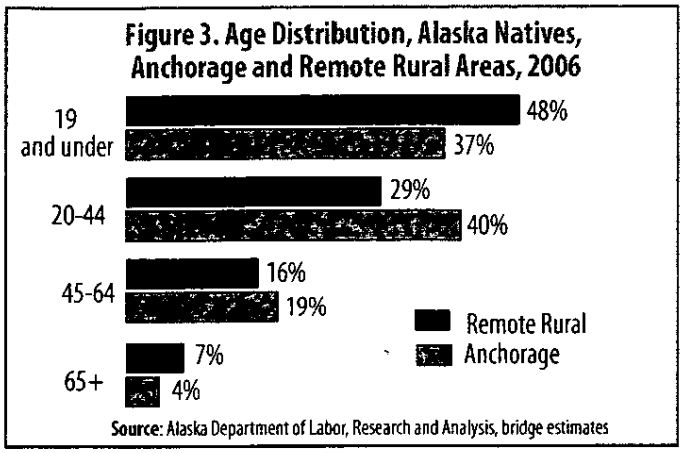
We used population data from both the U.S. census, last done in 2000 but still the only available source for some data, and the Alaska Department of Labor's Research and Analysis section, which estimates population between federal censuses.[3]

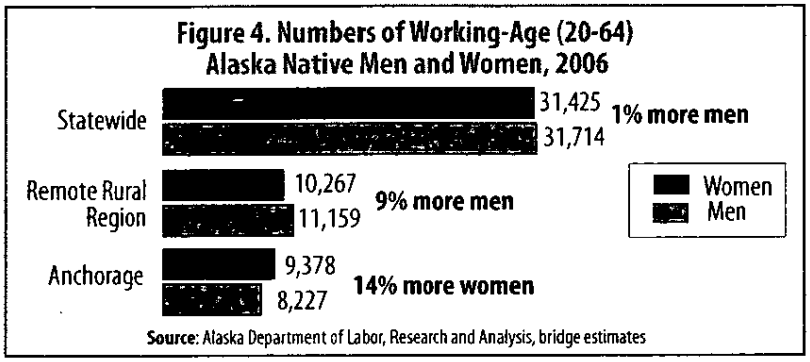
- *One in eleven Alaskans lives in remote areas—about 60,500 in 2006.* A third live in the regional centers of Barrow, Bethel, Dillingham, Kotzebue, and Nome—towns with populations in the thousands. The rest live in nearly 150 small communities with average populations of about 280.
- *Close to 80% of regional residents are Alaska Native. That share is higher in small places.* Non-Natives are concentrated in the regional centers, where they made up a third of the population in 2000.
- *The remote rural population increased only about 1% between 2000 and 2006, despite thousands of births, and population actually declined in several areas.* Nearly 6,500 more people were born in the region than died between 2000 and 2006. But at the same time, 6,100 more people moved out than in (Map 1).
- *Much of that movement is accounted for by Alaska Natives moving from remote to urban areas.*[4] The Alaska Department of Labor estimates that from 2000 to 2006, the number of Alaska Natives dropped about 3% in the remote region but was up nearly 25% in Anchorage. Lack of jobs in the smaller remote places is a big reason for this migration, but other factors likely also contribute—better access to specialized medical care, higher education, or technical training, for instance.

Figure 2. Estimated Changes in Alaska Native Population In Remote Rural Region and Anchorage, 2000-2006

	2000	2006	Change
Remote Rural	48,490	47,182	-3%
Anchorage	24,025	29,730	+24%

Source: Alaska Department of Labor, Research and Analysis, bridge estimates





- *Until recently, gains from natural increase were considerably larger than losses from migration.* In the 1990s, the remote rural population grew 15%—almost as fast as growth in urban areas.
- *Other rural areas—outside the remote region*—have also lost population (Map 1). Those areas, typically on the state road or ferry systems, have been hurt by declines in the timber and fishing industries.
- *Nearly half the Alaska Natives in remote areas are under 20, compared with 37% in Anchorage* (Figure 3). High birth rates in remote areas partly account for that difference, but migration of working-age Alaska Natives from remote to urban areas also plays a part.
- *Working-age Alaska Natives (20 to 64) make up 59% of the Native population in Anchorage but just 45% in remote places*—another sign that Alaska Natives are moving to urban places (Figure 3).
- *Alaska Native women of working age are especially likely to live in urban areas.* Numbers of working-age Alaska Native men and women statewide are about equal. But in Anchorage, there are 14% more women and in remote areas 9% more men (Figure 4).
- *Non-Native residents of the remote region are concentrated among working-age adults* and are most likely to live in regional centers.

The Mixed Economy

Some analysts wonder if the cash economy is replacing the traditional subsistence economy in remote rural Alaska. According to the evidence so far, the answer is no.

Subsistence activities—hunting, fishing, berry picking, and preserving meat and fish, among others—are part of the Alaska Native culture, as is sharing those subsistence foods. Both the subsistence activities themselves and the sharing among families and friends also have substantial economic value.

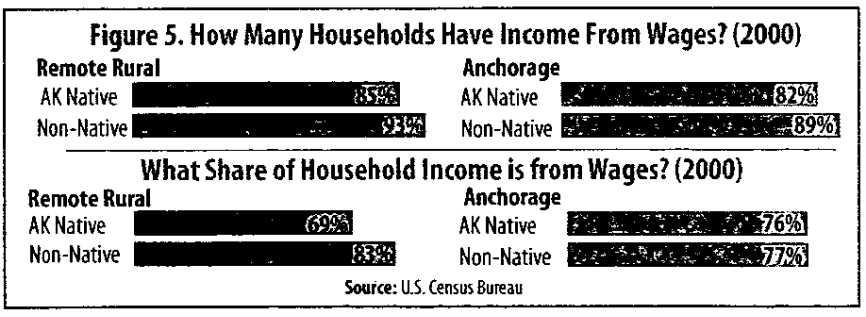
The Alaska Department of Fish and Game estimated in 2000 that among remote rural households (including both Alaska Native and non-Native households), 60% harvest game and 80% fish, and that annual harvests are several hundred pounds per person.[5]

But the U.S. Census Bureau reported in 2000 that most households in the remote rural region—85% of Alaska Native and 93% of non-Native—also had at least some income from wage work, and that wages made up most household income among both Alaska Native and non-Native households (Figure 5).

So it's clear, given the large subsistence harvests and the prevalence of wage-work, that remote rural households routinely combine work and subsistence. Evidence of that pattern is in the recent Survey of Living Conditions in the Arctic, an international survey of indigenous people around the Arctic. It found that in northern Alaska (including the North Slope and Northwest Arctic boroughs and the Nome census area), 78% of Inupiat households combined subsistence activities and jobs.[6] (See Figure 1 on the front page).

There's also an "informal" economy, not captured in statistics, in remote places. Families and neighbors may trade services, share goods, or make cash payments not reported to the IRS. Such activities outside the standard market economy go on nationwide. But they are especially important in remote rural Alaska, where both cash and local businesses are scarce. Small remote communities can't support most of the service businesses—everything from vehicle repair to hair-cutting shops—found in urban areas.

No estimates exist of how much time residents spend in the informal economy. But such activities clearly add to households' economic well-being.



Prices and Living Costs

Prices in remote rural places are much higher than in urban areas. Transportation costs, severe climate, small local markets, inefficiencies, lack of competition, and other structural problems all add to prices in remote areas.

The limited available information about how residents of remote places spend their money suggests that most cash spending, especially in the smallest villages, is for food from stores, utilities (including fuel), and transportation.

Rising energy prices have made it more expensive for all Alaskans to heat their homes and keep the lights on. But most remote rural places rely on fuel oil for both heating homes and generating electricity. Fuel oil is far more expensive than natural gas, which is available in Anchorage and a few other communities.

In mid-2007, energy from fuel oil in Bethel was roughly four times more expensive than energy from natural gas in Anchorage (Figure 6). And fuel oil is even more expensive in smaller remote places than in regional centers like Bethel.

Rising energy costs have also increased the costs of transporting food and everything else to remote places. For example, in 1990 the cost of buying the same market basket of foods was 45% higher in Bethel than in Anchorage, but by mid-2007 it was 92% higher (Figure 7). Again, prices are higher in smaller remote places than in Bethel and other regional centers.

Keep in mind that higher prices for individual items don't necessarily mean overall living costs are equally high. Comparing living costs in urban and remote rural Alaska is complicated, because households in remote places don't typically buy the same kinds and quantities of things urban households do.

A big difference is that people in remote places are more likely to buy gear and supplies for subsistence hunting and fishing. (That doesn't mean urban Alaskans don't hunt and fish—just that the percentage who do is smaller.) In turn, harvests of fish and game mean that people in remote places often don't have to buy as much meat and fish as most urban Alaskans do.

Transportation and other kinds of everyday expenses also differ. For instance, most urban Alaskans own cars, while snow machines and all-terrain vehicles are common in remote villages.

Another thing affecting spending patterns is that a majority of people in remote areas are Alaska Natives, who as indigenous people are eligible for federal health care, housing, and other programs. Such programs can reduce costs for Alaska Natives—but availability of specialized health care and other services is limited in small remote places.

Still, even though we know about some of these differences in spending patterns, there isn't enough specific information to estimate overall living costs for remote rural households. Estimating those costs would require knowing much more—for example, about what remote rural households typically buy, how much subsistence harvests offset food and other costs, and how much informal economic activities contribute to the well-being of households.

Local Government

Local governments of several kinds play a big part in the remote rural economy, accounting for more than a quarter of all jobs. Borough and city governments are authorized under state law. Boroughs are regional governments similar to counties. School districts are also considered local government entities. Tribal governments for Alaska Native communities are authorized under federal law.

Many but not all remote places have city governments, which typically collect some local taxes—most often sales taxes. Alaska school districts get about two-thirds of their operating money from the state, and the rest comes from a combination of local and federal money. Tribal governments, supported by federal money, exist in Alaska Native communities throughout remote rural areas. They account for nearly 20% of local government jobs in remote places.

Borough governments have never been established in many parts of remote rural Alaska—because most remote places don't have adequate tax bases to support regional governments. There are, however, three borough governments in the remote rural region (as defined in this paper)—the North Slope, Northwest Arctic, and Lake and Peninsula boroughs (Map 1). They exist because resource production provides tax bases that other remote rural areas don't have.

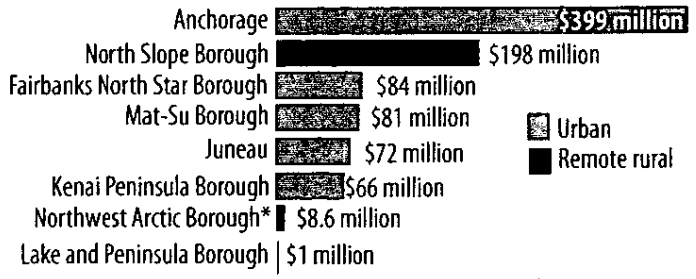
The North Slope Borough, formed in 1972, collects taxes on petroleum property on the North Slope—which for 30 years has been the largest onshore oil-producing area in the country. Inupiat leaders realized early on that a borough government would help local people capture some benefits of oil production. It was the first non-tribal regional government in the U.S. controlled by Native Americans.

The Northwest Arctic Borough was established in 1986, after a very large mineral deposit was confirmed on land owned by NANA, the Alaska Native regional corporation representing northwest Alaska. The borough collects payments in lieu of taxes from the operators of the Red Dog mine, which primarily produces zinc but also smaller quantities of lead and silver.

The Lake and Peninsula Borough was established in 1989 and includes major commercial salmon fishing districts. It operates mostly with revenues from a tax on raw fish, but also collects taxes related to recreational hunting and fishing and tourism.[7]

Figure 8 compares local tax revenues among Alaska's urban and remote rural boroughs. The North Slope Borough, with the oil facilities around Prudhoe Bay as a tax base, collected nearly $200 million in property taxes in 2006. It is second only to Anchorage in local tax revenues—and on a per-capita basis, it is the wealthiest borough in Alaska and among the wealthiest regional governments in the country.

Figure 8. Local Tax Revenues, Urban and Remote Rural Boroughs, 2006



*These are not taxes but payments in lieu of taxes, paid by the operators of the Red Dog mine.

Sources: Alaska Division of Community Advocacy, *Alaska Taxable;* Northwest Arctic Borough

The Northwest Arctic Borough collected $8.6 million in payments in lieu of taxes from the Red Dog mine in 2006. The Lake and Peninsula Borough collected about $1 million in local taxes, mostly from a fish tax.

Taxes boroughs collect are one way local residents benefit from resource production, because they fund local services and create local jobs. That's especially true of the North Slope Borough, which employs several hundred people. The two other boroughs, with much smaller tax bases, employ fewer people—Northwest Arctic about 30 and the Lake and Peninsula 6 full-time employees in 2006.

Alaska Native Corporations

Alaska Native corporations—both for-profit and non-profit—are unique to Alaska and have become very important to the remote rural economy (as well as the state economy). The for-profit corporations were established under the 1971 Alaska Native Claims Settlement Act, which awarded Alaska Natives 44 million acres and $1 billion, to settle aboriginal land claims.

The act established 13 for-profit regional corporations (12 in Alaska and one outside), as well as more than 200 village corporations within the regions.[8] Those corporations manage the land and money on behalf of their Alaska Native shareholders. Six regional corporations—Arctic Slope, Bristol Bay, Bering Straits, NANA, Calista, and Doyon—represent shareholders from remote rural areas. (Some areas within the Doyon and Bristol Bay corporation boundaries are outside our defined remote rural region.)

The non-profit corporations often grew out of older Native associations. They administer health, housing, and other programs the U.S. government provides Alaska Natives and other Native Americans. They are among the largest employers in remote areas (see Figure 11, page 7). Although funded largely with federal money, they are in the private non-profit sector.

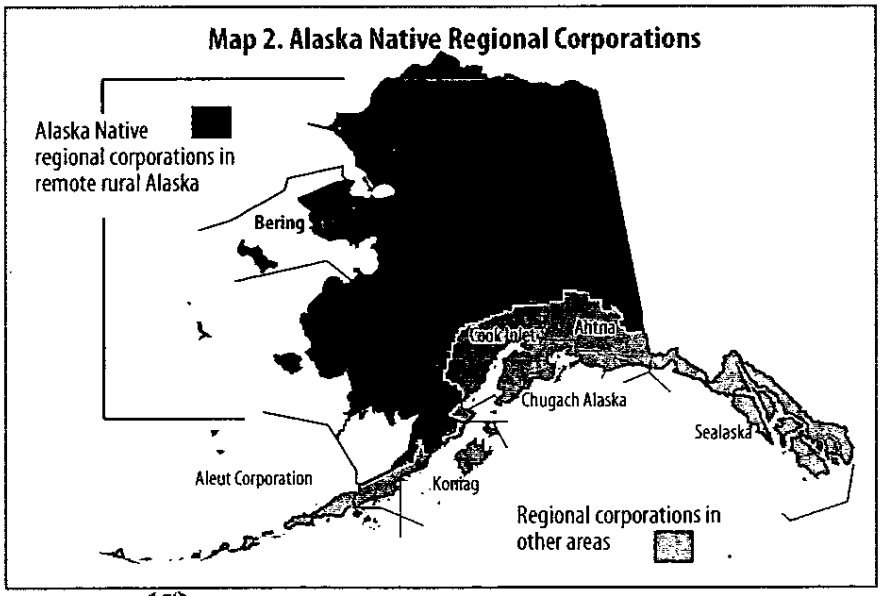
The six for-profit regional corporations in remote rural areas own businesses in many industries, inside and outside Alaska. All six are involved—some much more than others—in resource industries in remote rural Alaska.

It's beyond the scope of this paper to try to sort out the regional corporations' many business ventures. Instead, we'll cite a few examples, to show the ways they benefit from resource development—and in turn contribute to the remote rural economy. Broadly speaking, the corporations benefit when resources they own are developed or when they provide services to resource developers.

- *All Native regional corporations benefit when any corporation collects revenues from developing its subsurface minerals or timber.* That's because a provision of the claims settlement act (7i) requires the regional corporations to share 70% of the net revenues they collect from production of subsurface minerals or logging on their lands. That provision was included to account for the fact that some regions have more minerals and timber than others. From 1971 through 2004, about $675 million was distributed among the corporations under the revenue-sharing requirement.[9]

- *The recent spike in oil prices has been good for Arctic Slope Regional Corporation.* ASRC is part owner of the Alpine oil field on the North Slope, and its royalties increase with higher oil prices. It also owns ASRC Energy Services, which was ranked number 6 among the top private employers in Alaska in 2006.[10] It provides oil field services on the North Slope and in other places. ASRC also owns refineries in Fairbanks and Valdez. Shareholders working for various ASRC businesses—in remote rural Alaska and elsewhere—collected $61 million in wages in 2006. The corporation reports that profits related in one way or another to high oil prices contributed to a fall 2007 shareholder dividend of $42.21 per share, or $4,221 for the average shareholder owning 100 shares.

Map 2. Alaska Native Regional Corporations



• *A recent big increase in zinc prices has benefited NANA regional corporation, which owns the land where the Red Dog zinc mine is located.* NANA collects royalties from the mine operators based on the price of zinc. As part of the lease agreement with mine operators, NANA also requires that shareholder hire be a priority—and in early 2007, NANA shareholders made up about 55% of the mine's 370 employees. NANA also owns businesses that provide a range of services for the North Slope oil fields and the Red Dog mine.

• *The fortunes of both ASRC and NANA depend heavily on resource prices.* As Figure 9 shows, as recently as 2002 oil and zinc prices were a small fraction of what they were in 2006—as were revenues of those corporations.

• *Other Native regional corporations in remote areas also benefit but in more limited ways from resource development.* Examples include Doyon, the corporation in interior Alaska, which owns a number of drilling rigs on the North Slope. Calista and Kuskokwim Corporation (representing 10 village corporations that merged) have an agreement with mining companies planning to develop a large gold deposit on corporation-owned land in southwest Alaska. A subsidiary of Bristol Bay provides construction and other services for North Slope operators. Bering Straits corporation, in western Alaska, owns part of the Rock Creek gold mine, being developed outside Nome.

The corporation activity described above is by no means comprehensive, but it gives an idea of the growing role of regional corporations in the remote rural economy.[11] It also reflects their vulnerability to volatile oil and mineral prices.

Economic Drivers

Large-Scale Resource Production

The oil, zinc, salmon, and groundfish from remote rural Alaska or offshore waters were worth nearly $17 billion in 2006 (Figure 1, front page) and will be worth more in 2007, with prices climbing even higher. But resource prices are famously volatile. Figure 9 compares 2002 and 2006 prices. Oil and zinc prices in 2006 were three to four times what they had been in 2002. Salmon prices hit highs in the 1980s and then began a long decline through 2002, when they began to recover somewhat. Prices for pollock from the Bering Sea were also up considerably between 2002 and 2006.

What prices will be next year or the year after depends on market, political, and environmental factors Alaska can't control. It's important to keep that in mind, because the benefits the remote rural economy gets from resource production—through industry jobs, borough governments, and Alaska Native corporations—also rise and fall with prices.

• *Figures from the Alaska Department of Labor show that around 1% to 2% of the several thousand oil company* and support workers in the North Slope oil fields are residents of remote rural areas.[12] Most work for subsidiaries of Alaska Native regional corporations.

• *More than half the workers producing zinc in northwest Alaska are shareholders of NANA* corporation, but employment at the zinc mine is less than 400—compared with the thousands of jobs in oil production. Also, not all NANA shareholders are local residents. As of 2005, about 46% of mine employees lived in remote areas.[13]

• *The commercial salmon fisheries employ far more regional residents than any other resource industry.* But the season is short—and as prices fell from the late 1980s to 2002 employment also fell. These are limited entry fisheries centered in Bristol Bay but extending out along the Alaska Peninsula and along rivers flowing into the Bering Sea.

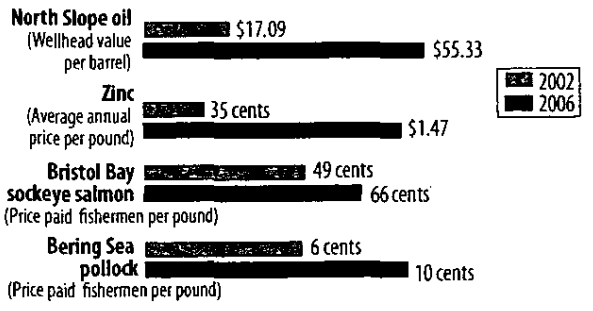
The Research and Analysis section of the Alaska Department of Labor estimates that about 4,000 residents of remote rural areas worked seasonally either as permit holders or crew members in the salmon fisheries in the 2005 season. In small fisheries of the Northern and Yukon Delta areas, most captains and crew members are local residents, but in the more lucrative Bristol Bay area fisheries only about 20% of permit holders and crew live in the remote region.[14]

• *Seafood processing also creates thousands of seasonal jobs in remote rural Alaska, primarily in the Bristol Bay area.* But non-locals (either from other areas of Alaska or outside Alaska) hold most processing jobs in that area—more than 80% in 2005, according to the Department of Labor. But local residents hold a larger share of the much smaller number of processing jobs in other remote rural areas.

• *Most coastal communities in western Alaska also share in the revenue from bottom fishing through the federal Community Development Quota (CDQ) program.* The program allocates a share of the seafood catch—including pollock, cod, halibut, and crab from the Bering Sea and Aleutian Islands— to six groups representing 65 western Alaska villages, including many in the remote rural region. Some groups own their own vessels and harvest their own allocation, but others lease their harvest rights and collect royalties.

In 2005, the CDQ program generated 2,025 seasonal jobs, a payroll of $16.5 million, and $120 million in net revenues and royalties for CDQ communities. Accumulated net revenues and royalties for CDQ groups totaled nearly $820 million from 1992 through 2005.[15] Most of that total is attributable to villages within the remote rural region.

Figure 9. Natural Resource Prices, 2002 and 2006



Sources: Alaska Departments of Fish and Game, Revenue, and Natural Resources; National Marine Fisheries Service

The CDQ groups have invested income in the local harvesting and processing sectors, in harbor improvements and other infrastructure, and training programs. This spending contributes to local income and economic activity. But much of this investment likely doesn't stay in the local economy. For example, the construction of boats purchased outside the region doesn't directly create local jobs.

- *State and federal services supported by taxes and royalties from resource production also benefit regional residents*—in addition to the benefits from borough governments, discussed earlier.

Small-Scale Resource-Based Activities

Smaller resource-based activities also take place in remote areas, including sport fishing and hunting lodges and guiding, as well as other tourism and recreation, small-scale mining, handicraft manufacture, resource management, logging, trapping, and agriculture.[16] Their combined contribution to economic activity in the region (as measured by income for resident households) is modest—perhaps $100 million to $200 million annually.

But that is just a ball-park estimate. Jobs in these activities are often held by self-employed people, are mostly seasonal, and are often part-time—so many of them don't show up in the state's official employment figures.

Also, as with the major resource industries, it's likely that a large share of the income, particularly from small-scale mining and recreation, goes to non-locals. Still, these activities are valuable because they add to the region's jobs, income, and economic diversity.

Government Spending

- *Excluding resource development, the largest source of cash flowing into remote rural Alaska is the federal government* (Figure 10). Grants, purchases from businesses, payments to individuals, and wages totaled $900 million in 2005. Grants made up more than two-thirds of that total, with the largest for Medicaid and the Alaska Area Native Health Service. Alaska Native non-profit corporations administer much of the federal grant money related to health care—and are among the largest employers in remote areas (Figure 11). Payments to individuals include retirement and disability payments, as well as food stamps and other assistance.
- *State general fund spending in the remote rural region was roughly $250 million in 2005*—assuming that the share of state spending equals the share of the population. Available data don't allow us to precisely calculate general fund spending in remote areas. The largest component of state operating spending is for education. The state pays most of the costs for school districts—and school districts are among the largest employers in the remote rural region (Figure 11).
- *A share of federal grants to the state*—an estimated $100 million—was also spent for remote rural projects in 2005.
- *Permanent Fund dividends provide a floor for household income in remote areas and accounted for 3% of all personal income in 2005.* These are payments the state makes annually to all Alaska residents from the earnings of the state's big savings account, the Permanent Fund (see Figure 18, page 11). Because every Alaskan gets equal payments, the dividends mean all households have at least some level of cash income.[17]

Other Sources of Cash

- *Cash coming into the region from other sources is modest, perhaps in the range of $100 million.* It includes investment income, dividends paid shareholders by Alaska Native corporations, private pensions, and earnings of residents who work outside the region.

[a]This figure is an estimate of the general pattern of employment in remote rural Alaska. We relied on several sources that measure employment in somewhat different ways, and we made some adjustments in the figures so we could fit all the pieces together. It includes all jobs in the region, held by both local residents and non-locals. It is a count of the average number of jobs, not workers, over the year.

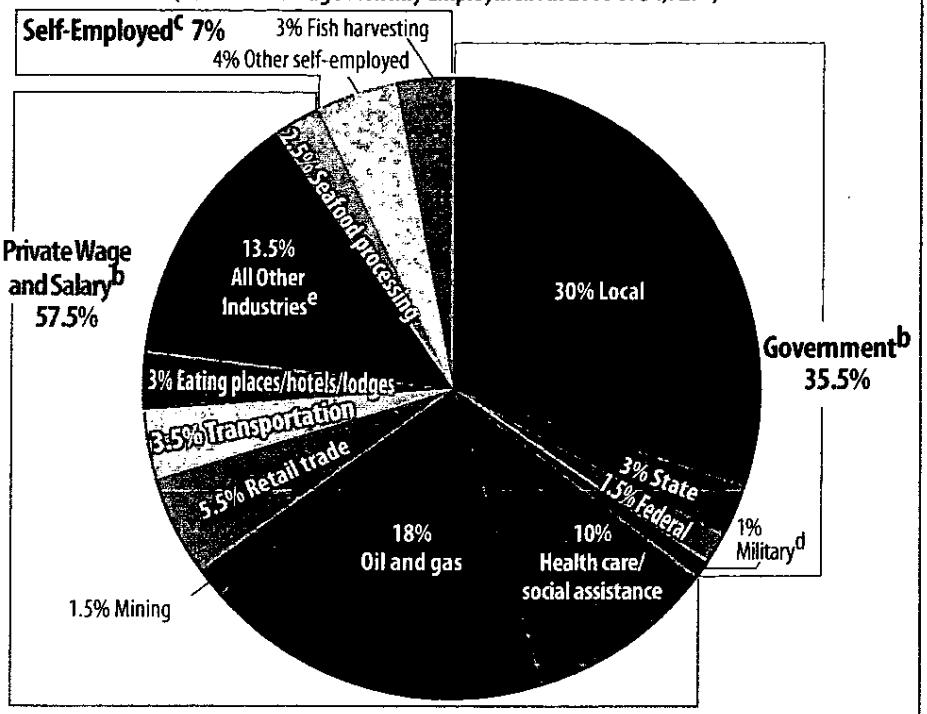
[b]Government and private wage and salary employment are based on the Alaska Department of Labor's 2006 figures on average monthly employment by industry.

[c]Standard employment figures cover wage and salary jobs but exclude self-employment, which is a significant share of all jobs. To include the self-employed for a complete and consistent picture of jobs in the region, we used the Alaska Department of Labor's estimate of annual average jobs in fish harvesting and our own estimate of other self-employment. Fish harvesting here includes average annual figures for the Northern, Yukon Delta, and Bristol Bay region fisheries, excluding those in the Bristol Bay Borough. We estimated the number of self-employed workers other than fish harvesters by subtracting fish harvesters from the total number of self-employed (proprietors) reported by the Bureau of Economic Analysis. We then converted the remaining count of proprietors to an estimate of annual average jobs, assuming the average proprietor works six months per year.

[d]Military jobs based on the Bureau of Economic Analysis's 2005 figures by census area.

[e]Other industries include construction, finance, real estate, arts, wholesale trade, and other services.

Figure 12. Estimated Employment in Remote Rural Alaska, 2006
(Based on Average Monthly Employment in 2006 of 34,729[a])



Sources: Alaska Department of Labor, Research and Analysis; Bureau of Economic Analysis; and author's estimates

Total Employment in the Region

How do all the cash sources just described translate into jobs? The region had average monthly employment of about 34,800 in 2006, including jobs held by local residents and people either from other areas of Alaska or outside Alaska. The total job count over the year would be larger than the average, because many jobs are seasonal.

Figure 12 is based on several sources, and it's not precise. Standard employment figures include only wage and salary jobs. Self-employment is estimated here. Also, some wage jobs don't show up in regional figures, because some employers report their employees where the business is headquartered rather than where they work.

- *Government (mostly local) accounts for almost 36% of jobs*, self-employment 7%, and private wage and salary jobs just under 58%.
- *One in five local government jobs is in tribal government.* Others are in schools or municipal governments and utilities.
- *The oil and gas industry accounts for 18% of employment and the mining industry 1.5%.* Oil industry jobs are on the North Slope, in enclaves far from established communities—and almost all jobs are held by non-locals. Mining jobs are concentrated at the Red Dog mine, where about half the employees are local residents.
- *About 10% of jobs are in health care or social assistance*, primarily with the Alaska Native non-profits that administer federal health and other programs for Alaska Natives. Although supported by federal money, these are private jobs.
- *Commercial fishing jobs account for an estimated 3% of jobs, on an average over the year.* Fish processing accounts for another 2.5%.
- *Other industries that contribute a significant share of private jobs* are trade (mostly small general stores), transportation (mostly air) and eating places and hotels and lodges.

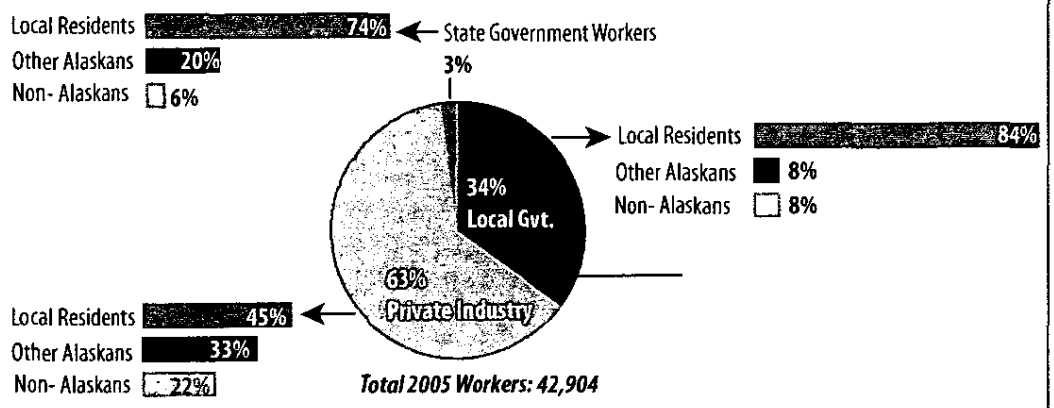
Employment Among Local Residents

We know that many workers in remote areas aren't local residents, and Figure 13 shows the Alaska Department of Labor's 2005 estimate of how many workers are residents and how many are non-locals—either from other areas of Alaska or outside Alaska.

The total number of workers in the remote region—nearly 43,000 in 2005—is considerably higher than the 34,800 average monthly employment shown in Figure 12. That's because it is a count of everybody who worked at any time during the year. Two or more people can hold a single job over the course of the year. Also, the number of people who work during the summer fishing season is much larger than the annual average number of jobs in fish harvesting.

- *Nearly two-thirds of the workers in remote areas are in private industry—but less than half those workers are local residents.* Alaskans from outside the region account for 33% of private workers and non-Alaskans 22%. Most oil industry and seafood processing workers are non-locals. All the other industries also have some non-local workers, but the percentages are smaller.
- *Just over a third of the workers in remote areas have government jobs, and most are local residents.* The majority of government jobs are in local government—school districts, city and borough governments, and tribal governments.
- *Overall, local residents made up 59% of all workers in remote areas in 2005, but they collected only 44% of wages paid.* Many of the highest-paying jobs—especially in the oil industry—are held by non-locals. Alaskans from other areas of the state collected 37% of the wages and non-Alaskans 19%.

Figure 13. Workers* in Remote Rural Alaska, By Type of Job and Residence, 2005



Comparing Share of Resident Workers and Resident Share of Wages Paid, 2005

Share of Total Workers			Share of Total Wages		
Local Residents	59.5%	25,495	Local Residents	44%	$561.9 million
Other Alaskans	24%	10,345	Other Alaskans	37%	$472.1 million
Non- Alaskans	16.5%	7,064	Non- Alaskans	19%	$249.4 million

*Includes full-time, part-time, and seasonal workers covered by Alaska unemployment insurance. Excludes federal employees and self-employed people. Each worker is counted only once, even if some workers have more than one job.

Unemployment Among Local Residents

We've just seen that non-locals account for about four in ten workers in remote areas. At the same time, unemployment among local residents is high. Both the unemployment rate and the number of unemployed people rose sharply in remote areas in recent years—even though many people left for urban areas.

Government statistics show that from 2000 to 2006, the unemployment rate in the remote region increased from 9.3% to 12%. The number of unemployed people rose from 2,264 to 3,194—a jump of 41%. During the same period, the unemployment rate in Anchorage was also up, but much less—from 4.9% to 5.3%—and the number of unemployed was up about 17% (Figure 14).

But those government figures probably underestimate the number of people who want jobs in remote areas, because they include only those who say they want jobs *and* have been actively looking for work. That ignores the "discouraged worker" effect in small places with few jobs—that is, people who would like jobs may not be actively looking because they know there aren't any jobs.

Another way of assessing how many residents are without work is the number of Alaska Native villages in the region that are exempt from the standard five-year limit on welfare benefits. Since the national overhaul of the welfare system in the late 1990s, most welfare recipients are limited to five years of benefits. But residents of federally recognized Alaska Native villages where more than half the adults do not have jobs are exempt from that limit.

Figure 15 shows that 120 Alaska Native villages statewide are currently classified as exempt from the five-year limit. Three quarters of those villages are in remote rural Alaska. That measure *overstates* how many people can't find jobs, because not all adults want jobs—due to age, disability, family responsibilities, or other reasons.

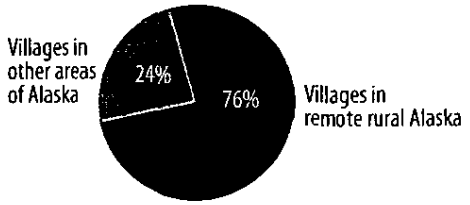
Still, the large number of remote rural communities where half the adults don't have wage jobs shows there must be many people who want jobs but can't find them.

Figure 14. Changes in Unemployment, Remote Rural Alaska and Anchorage, 2000-2006

	Number of Unemployed People			Unemployment Rate	
Remote Rural	2000	2,264	+41%	2000	9.3%
	2006	3,194		2006	12.0%
Anchorage	2000	6,909	+17%	2000	4.9%
	2006	8,052		2006	5.3%

Source: Alaska Department of Labor, Research and Analysis

Figure 15. Alaska Native Villages Where Half the Adults (16 and Older) Don't Have Wage Jobs*



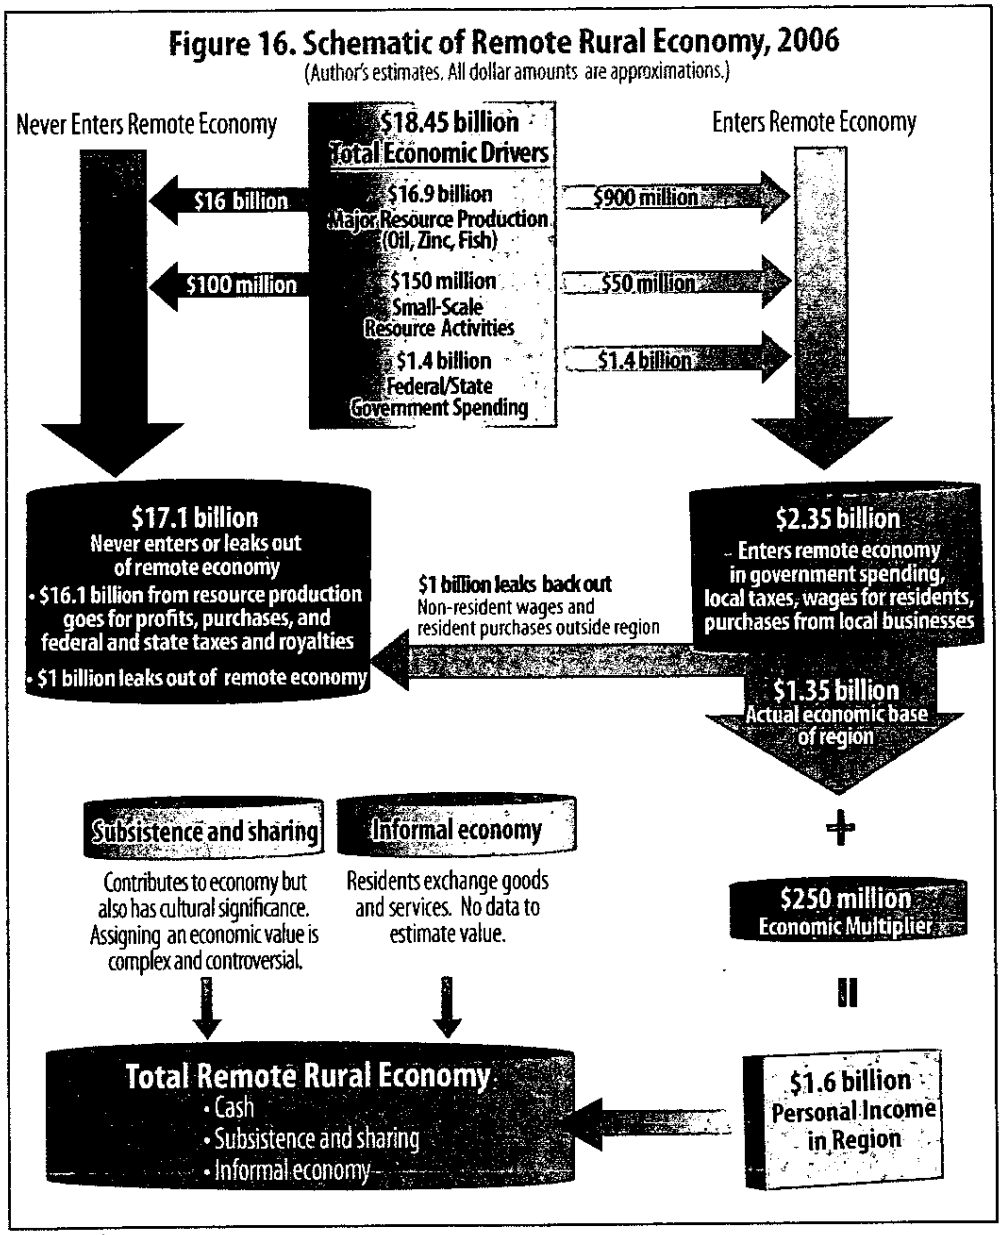
Total: 120 communities

*These are villages exempt from the standard 5-year limit on welfare benefits, as determined by the Alaska Division of Public Assistance. That determination is based on 2000 U.S. census data supplemented by the most recent reliable data from surveys, following procedures established by the Alaska Department of Labor and Workforce Development. Under federal law, Alaska Native villages where half or more of the adult population (16 and older) don't have jobs are exempt from the 5-year benefit limit.

Money Doesn't Stick

Figure 16 helps explain why the remote economy doesn't produce enough jobs for residents. It estimates cash either flowing into or generated in the region in 2006—and it shows that most cash generated in remote areas never influences the local economy at all. And of the cash that does flow into the economy, a big share doesn't stick around. The flows are approximations, based on limited data.

- *Nearly $18.5 billion was either generated in or flowed into remote areas in 2006, but only $2.35 billion entered the local economy.* The rest went directly to other areas for producer profits; purchases of labor, supplies, and services; and federal and state taxes and royalties.
- *Of the $2.35 billion that did go into the local economy in 2006, $1 billion quickly leaked out again, because:* (1) the many non-residents working in remote areas take their paychecks home when they leave, and (2) resident households and businesses can't or won't buy many things locally—and therefore spend money outside the region.



• *That left about $1.35 billion as the actual economic base of the economy in 2006—the share of the $18.5 billion that went to remote rural households, businesses, and local governments.* That's the purchasing power households and businesses have to support the local economy.

• *Major resource production was valued at nearly $17 billion in 2006, but more than $16 billion of that bypassed the local economy.* Around $900 million did go in—$550 million in wages and $350 million in local taxes and purchases.

• *Smaller resource-based activities generated another $150 million or so in 2006,* with $100 million bypassing the local economy and $50 million going in.

• *All the $1.4 billion the federal and state governments spent* for wages, grants, or purchases from local businesses in 2006 initially went into the local economy.

• *The $1.35 billion economic base from resource production and government spending generates more economic activity* when residents, businesses, and governments buy locally. Say a resident fisherman uses his fishing income to buy food or fuel from local businesses. That keeps cash circulating in the local economy, which helps make local businesses profitable and pay their employees. That additional activity is called the economic multiplier.

• *But in small remote communities the economic multiplier is small.* They can't support many businesses—so, as we just discussed, residents often can't buy what they need locally. When they buy outside the region, the economy loses the money needed to support local jobs. We estimate that in 2006 the money coming into the region from outside sources generated only about $250 million of additional household income as it circulated.

• *The economic base of $1.35 billion and the $250 million economic multiplier* together roughly total the $1.6 billion in personal income of residents in 2006.

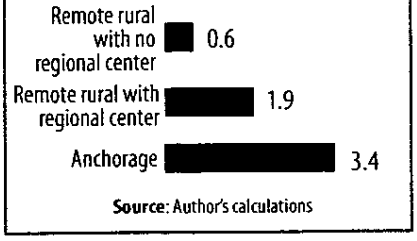
Figure 16 also recognizes that the remote economy is not based just on cash. Both subsistence and informal economic activities also contribute to the well-being of residents. But there isn't enough information to assign them monetary value. Subsistence activities also have cultural significance for Alaska Native people, making it even more complex to assign them a dollar value.

Figure 17 is another illustration of why small communities have trouble generating local jobs. In Anchorage, $1 million of household income generates 3.4 trade jobs. With 270,000 people, Anchorage can support a range of businesses.

By contrast, remote areas with regional centers can generate only about half as many jobs—1.9 jobs per $1 million in household income. In remote areas without regional centers, like the Wade Hampton census area, the number of jobs generated is much smaller: only 0.6 trade jobs for every $1 million of household income.

This short characterization of the remote rural economy highlights both the challenges of economic development and the opportunities. Cash is in short supply. To increase that supply, residents and businesses have to find ways either to bring in more cash or to circulate it more before it leaks out.

Figure 17. Trade Jobs Generated by $1 Million in Household Income



Source: Author's calculations

Income of Regional Residents

As we've just seen, personal income among the roughly 60,500 remote rural residents is about $1.6 billion. Nearly all comes from outside sources, with about $250 million from money circulating in the economy. Figures 18 to 21 show more about regional income.

- *About 71% of personal income can be traced directly to government*—transfer payments, government payroll, and payroll for private jobs supported by federal money. Those private jobs are mostly in non-profit Alaska Native corporations that contract with the federal government to administer health and other programs for Alaska Natives.

- *The 29% of income not directly from government is private payroll and non-wage income.* But probably only about 10% of income is really independent of government. An unknown share is the indirect result of government spending—through the economic multiplier. Also, non-wage income is a government estimate of individuals' income from assets like stocks. Such income often stays in financial accounts rather than going into people's pockets.

- *Permanent Fund dividends make up 3% of personal income and other government transfers another 24%.* Those include unemployment and welfare payments and pensions, all paid directly to individuals. But by far the biggest single transfers are Medicaid payments to hospitals, doctors, and others for medical costs of low-income Alaskans. Also included are payments under Medicare, the program for older Americans. (The fact that government figures classify these medical payments as "personal income," even though they don't go to individuals, highlights why personal income is a less-than-perfect measure of cash actually available to families and communities.)

- *Per capita personal income in most remote rural areas in 2005 was anywhere from 25% to 50% below the state average*—largely due to a combination of part-time work and lower wages (Figure 19). The exception is the North Slope, where the borough government and the Arctic Slope regional corporation employ many residents.

*Food stamps, Medicaid, or welfare payments. **Source:** Alaska Department of Education

- *Poverty is widespread, under standard measures.* Among children in the region, 63% qualify for free meals at school, compared with 26% in other Alaska districts (Figure 20). Some areas are poorer than others. About 32% of children in the Dillingham school district are from families receiving public assistance—Temporary Aid to Families, Medicaid, or food stamps—compared with more than 80% in the Kashunamuit and St. Marys districts in the Wade Hampton census area (Figure 21).

Challenges and Opportunities

Strengthening the economy of remote rural Alaska will take work as well as creativity. We can identify a number of challenges for the region and some opportunities as well. Keep in mind that the vast remote region has three very different kinds of communities—the many small, isolated villages; the five regional centers; and the enclaves where valuable natural resources are produced. Future challenges and opportunities will be different in those three kinds of places.

- *Importing goods and services will continue to be expensive.* Improved access can reduce but not eliminate the cost difference between remote rural and urban areas.

- *The young age of the population will continue to swell the labor force.* Most opportunities for young people will be created by retirements or turnover in health, education, and government administration jobs.

- *Future government spending in the region will be constrained,* as the federal budget tightens and as oil production—the state's main source of general operating money—declines.

- *Job growth will slow down, because so many jobs depend on government spending.* New jobs will be mainly in regional centers. Innovative ways to share jobs—like village labor contracting cooperatives—might be useful.
- *Development of oil and gas and hard-rock minerals will continue to offer high-paying jobs*—but such jobs will still typically be in remote enclaves, and most will continue to go to workers from outside the region. Local benefits will still likely be concentrated in a few areas.
- *The paradox of high local unemployment at the same time non-locals hold many jobs isn't likely to change overnight.* Many jobs in resource production are not only in isolated enclaves but also require special skills.
- *Opportunities in the "knowledge economy"*—data processing, for example—will continue to increase, but will require more education.
- *Expansion of small-scale mining, tourism, recreation, handicraft manufacture, agriculture, and trapping* can potentially provide modest economic benefits for some communities.
- *The undeveloped natural environment in remote areas will become more valuable* for tourism and recreation—but high costs and isolation will still constrain growth.
- *Cash will continue to be scarce.* Informal economic activities—like exchange of services among family and neighbors—will continue to be extremely valuable, because they reduce the need for cash. Cash circulating in the local economy will still only be able to generate a few jobs in retail trade and other support businesses.
- *Finding ways to capture more of the value of resource production for local residents* would boost the cash economy in remote areas. Right now most of the multi-billion dollar value of resource production bypasses the local economy.
- *To reduce unemployment, residents will have to continue moving out* of the region or commuting to jobs in other areas.

Limits of Data

Finally, as we said at the outset, the available data on the remote economy have many shortcomings. It's important to keep those shortcomings in mind.

- *By ignoring time residents spend in subsistence and the informal economy, employment figures underestimate time residents spend working.* If such time were included, employment would be larger than official data show and would have a more complex seasonal pattern.
- *More people are unemployed than the official figures show*—because those figures only include people actively looking for work. In many villages, residents know there aren't any jobs to look for.
- *Personal income numbers don't fully measure the well-being of households, because they ignore the value of subsistence harvests* and services exchanged in the informal economy. But putting a monetary value on subsistence is fraught with conceptual and political challenges.
- *Existing cost-of-living measures don't account for the differences in urban and remote rural spending patterns.* For instance, remote households typically have to buy more equipment and supplies for subsistence—but they may also receive federal health and other services non-Native urban households have to pay for.
- *The economic base of the remote rural region can't be accurately identified with current data.* We approximated cash flow into and out of the region by piecing together data with many gaps.

Of course, it's easy to identify shortcomings and hard to fix them. It may be impossible to correct them all, given the difficulties and costs involved. But finding ways to improve the economy of the remote rural areas has been a goal of Alaskans for decades. If more information were available, it would help us all understand the realities that constrain economic development in remote areas.

Endnotes

1. This publication excludes the Bristol Bay Borough and the Aleutian Islands from the remote rural region, because historically these areas have been different from other remote Alaska areas. The Aleutians East and Bristol Bay boroughs overwhelmingly depend on commercial fisheries with mostly non-local fishermen. And although the naval station on Adak Island closed in the 1990s, the large military population there dominated the Aleutians West census area for several decades. Still, including those areas wouldn't appreciably change the overall patterns we see in remote rural Alaska.

2. A few have road or ferry access.

3. The job of estimating population by race became more complicated after the 2000 U.S. census, which for the first time allowed people to identify themselves as being of more than one race. Previously, respondents chose a single primary race. Now, the Alaska Department of Labor does two types of estimates by race: (1) estimates based on the 2000 U.S. census definition, which includes a multi-race category; and (2) "bridge" estimates, which attempt to replicate the previous single-race categories, using assumptions about which primary race people of more than one race would choose. When presenting numbers by race in this publication, we use the bridge estimates, because they allow us to compare changes in Alaska's population by race over time.

4. See *Status of Alaska Natives 2004*, by Scott Goldsmith, et al., ISER, May 2004. This migration of Alaska Natives from remote to urban places doesn't imply that Alaska Natives living in urban areas no longer maintain ties with remote communities or take part in subsistence activities.

5. Robert Wolfe, Alaska Department of Fish and Game, Subsistence Division, 2000.

6. The Survey of Living Conditions in the Arctic is a survey of indigenous people in Northern Alaska and Arctic areas of Canada, Russia, and Greenland, conducted between 1998 and 2001. For more information see www.arcticlivingconditions.org.

7. A deposit of gold and copper believed to be among the world's largest, the Pebble site, has also been discovered in the Lake and Peninsula Borough, potentially adding to the borough's resource tax base. But the proposed open-pit mine near river drainages that provide habitat for Bristol Bay area salmon has been very controversial. In fall 2007, campaigns for and against the proposed mine continued.

8. In 2007 there were only about 169 village corporations. Some have merged with regional corporations; in southwest Alaska, 10 village corporations banded together to form a single new corporation.

9. Cited in 2006 report of Association of ANCSA Regional Corporation Presidents.

10. Alaska Department of Labor, *Alaska Economic Trends*, July/August 2007, "The Trends 100," by Neal Fried.

11. Information about business activities of individual corporations is from annual reports and Web sites of ASRC, NANA, Calista, Doyon, Bering Straits, and Bristol Bay corporations.

12. The Department of Labor reports that a shortcoming of these figures on workers by place of residence is that not all employers report the geographic area where their employees work. Some report all employment at their headquarters, not where the work takes place.

13. Data from ISER study of economic effects of the Red Dog zinc mine, to be published in 2008.

14. Includes the Department of Labor's Northern, Yukon Delta, and Bristol Bay region, excluding residents of the Bristol Bay Borough (which is not included in our analysis).

15. Alaska Department of Commerce, Community, and Economic Development Web site, October 2007. See www.commerce.state.ak.us/bsc/CDQ/cdq.htm..

16. Mining exploration, particularly at the Donlin Creek and Pebble sites, is included here—but development at those sites would move them into the large-scale resource production category.

17. Some households don't receive dividends because they are garnished for various reasons.

Understanding Alaska is a special series of studies looking at economic development issues, funded by the University of Alaska Foundation. This UA Research Summary is based on a longer paper by Scott Goldsmith, *The Remote Rural Economy of Alaska*, April 2007. Copies are available for $5.00, plus postage; call 907-786-7710. ALASKA PRIMARY CARE ASSOCIATION, INC.

"... Uncompromising in the pursuit of access to primary care for all Alaskans."

2/23/09

Honorable Lyman Hoffman, Senate Finance Co-Chair
And Members of the Senate Finance Committee
Alaska State Legislature
Juneau, Alaska 99801

RE: Support for SB 115 and SB 116 Energy Assistance Program

February, 22, 2009

Dear Co-Chair Hoffman and Members of the Senate Finance Committee,

The Alaska Primary Care Association (APCA) appreciates and supports SB 115 and SB 116 introduced by the Senate Finance Committee. The APCA represents 26 Community Health Center (CHC) organizations and the 141 clinic sites they operate across the state. The health and welfare of Alaskans in medically underserved areas is of utmost concern to the APCA; these bills will help provide much needed relief for these communities.

The APCA requests that the non-profit CHC organizations and local tribal CHC organizations be considered as eligible for assistance via this grant program to communities. We hope the assistance funds will not only provide relief for energy costs at facilities but will also provide for weatherization assistance to reduce future costs at these facilities.

CHC directors have reported that revenues intended for patient services are being re-directed to cover high energy costs at their facilities. The CHCs are facing tough decisions daily and have developed contingency plans as they work to keep their doors open. Some clinics have reduced or are planning to reduce provider hours or have shortened or are planning to shorten clinic hours. Not filling vacancies until the situation is alleviated is another option. Some plan to close off parts of their building if needed; all are working to conserve energy.

Energy assistance is needed for Community Health Centers to help offset high energy costs. Without assistance, patient access will be reduced. If the Senate Finance Committee does not think these bills are the appropriate vehicle for assistance to the CHCs, the Alaska Primary Care Association has an alternative plan to suggest to provide energy relief for CHCs: the amount would be calculated on the same basis as the state Office of Management and Budget (OBM) allocated energy cost increase amounts authorized to be distributed under sec. 22, ch. 28, SLA 2007 and subsequent appropriations. Based on the FY07 operating budgets of the CHCs, the amount for assistance would be $5.631,400.

The Alaska Primary Care Association commends the Senate Finance Committee for introducing and hearing SB 115 and SB 116 and asks members to support and move the bills out of committee.

Respectfully,

Regan Mattingly
State Affairs Coordinator

In rural Alaska, villagers suffer in near silence

Bush residents struggle to balance the need for food with the need for fuel – the building blocks of survival in a frigid winter that has months to go. Some call for massive airlifts of aid.

By Kim Murphy

January 25, 2009

Reporting from Tuluksak, Alaska — As the temperature plunged to minus-40 degrees last month, Nastasia Wassilie waited.

The 61-year-old widow had run out of wood and fuel oil, and had no money to buy more. Nor was there much food in the house. But people here in rural Alaska try to take care of themselves. Her sister would come to help. Surely she would.

Nearly three days later, when neighbors learned of Wassilie's plight, the Tribal Council put out a call on the VHF radio that is the lifeline for most of the far-flung Yupik Eskimo villages along this remote stretch of the Kuskokwim River.

People who had enough gas for their snowmobiles immediately set off across miles of tundra, hauling firewood back to Wassilie's small house. A few offered helpings of dry fish, which most families keep in the larder for winter.

There was little more they could do. Nearly every one of Tuluksak's roughly 500 residents is performing a perilous balancing act between food and fuel -- the building blocks of survival in a frigid winter that still has months to go.

Life in rural Alaska always has been treacherous. But last year's dramatic escalation in fuel prices, combined with a disastrous fishing season, plunged the ramshackle villages of America's frontier into one of the worst crises in decades, prompting calls for humanitarian aid and demands for pricing reform.

"Holy Jiminy Christmas, what we're going through," said Dora Napoka, 49, the librarian at the village school. "It's like we have to choose between six gallons of stove oil or six gallons of gas to go out and get the firewood -- or does my baby need infant milk? Which one is more important?"

The public alarm first sounded from Emmonak, a town of about 800 people near the mouth of the Yukon River, when Nicholas Tucker polled fellow villagers and found many in a state of desperation: They were running out of food after paying up to $200 a week for fuel oil to heat their homes.

"Help is needed and cannot be delayed," Tucker wrote in an open letter to state authorities that was published in several rural newspapers this month, requesting a "massive airlift" of food.

"What is mind-boggling about the whole situation is that they have remained silent, anonymous, suffered, and cried," he said.

Tucker included a terse case list of 25 households he had contacted. It read like a report from a Third World country.

"Near-middle-aged couple, family of six. The husband cried as he was talking to me. . . . ," one summary read. "He receives a very small unemployment income and is out of fuel a lot. . . . His family has been out of food for quite

some time now. Their 1-year-old child is out of milk, can't get it and [the father] has no idea when he will be able to get the next can. He has been borrowing milk from anyone he can. His moose meat supply is running out. . . . The electricity has skyrocketed and he can't pay all the bills."

From a couple in their mid-30s: "He and his girlfriend have no heating fuel. Whatever money he gets goes to getting gasoline for his snow machine to get logs. . . . Today, they had nothing for breakfast. Most of the time, they have some dry fish for lunch or cup of noodles with [crackers]."

As word of Emmonak's troubles spread, donations from across the country poured in. On Wednesday, a shipment of 5,300 pounds of food and other basic supplies was delivered by plane.

But regional leaders say dozens of rural villages -- where unemployment is at 65% and higher -- quietly are enduring similar emergencies.

The main reason is the price of heating fuel, which warms homes and powers village electrical plants. While the rest of the United States has seen prices ease since last summer, most Alaskan villages had to lock in purchase contracts for their fall fuel deliveries while costs were at their peak.

Worse, some villages weren't able to get their bulk deliveries of winter fuel by barge because the early onset of winter froze the river. Much of the fuel now must be flown in, which makes it even more expensive. Residents in Tuluksak are paying $6.99 a gallon for heating fuel, up more than $2 from last year, and $6.58 for gasoline. In some villages, prices have climbed past $8 a gallon.

A typical home here is a small, primitive cabin without running water that may shelter more than a dozen people. Even a family with a modern, efficient stove will spend $185 a week for heating.

"The oil is drilled right here in Alaska, and yet we're paying $8 a gallon? Something is amiss here. The oil companies are making billions of dollars, and people here can't afford to eat," said Pat Samson, social services director for the Assn. of Village Council Presidents in Bethel, about 35 miles southwest of Tuluksak.

The price for heating fuel and gas is only the beginning of the story. Groceries must be flown in at ever-higher freight prices. A pound of hot dogs in the village store costs $7.39, and a two-pound loaf of domestic cheese runs $17.49. A loaf of Wonder Bread is $5.85.

The cost of flying to Bethel has risen to $186 for a round trip, so few go there to shop -- and even fewer make the trip to the dentist or hospital until ailments become urgent.

In earlier years, hunting, fishing and trapping helped villagers get by. But the market for fur has disappeared, and the fish stock has declined precipitously. Last year, there was no commercial fishing season at all for the region's mainstay, chinook salmon. Moose hunting, also because of declining numbers, hasn't been allowed around Tuluksak for five years.

"Me, I have 17 people living in my house," said Elena Gregory, the Tribal Council secretary. She is the only breadwinner in a household that includes her husband -- a seasonally employed carpenter -- four daughters, two sons-in-law and nine grandchildren.

"I'm lucky because I have a full-time job. . . . Most people are two weeks on, two weeks off," a job-sharing arrangement devised to spread out the village's 34 available jobs, Gregory said.

"Right now, my truck and my snow machine are out there rusting, because I can't afford gas for them," said Rachel Sallaffie, a teacher's aide. "But we're lucky. I have four freezers of birds and fish, and two months ago my husband got a caribou, so we still have meat."

Samson, an Alaska Native who grew up in the region before going away to college in Fairbanks, helps villagers

here apply for fuel subsidies and other aid programs.

Walking through lots filled with abandoned vans and pickups -- the remnants of an era when the fishing was good enough that people could afford cars and could repair them when they broke down -- he pointed to a shack made of weathered plywood, its roof ripped open to the chilly sky.

"This guy asked for help fixing his house, but I couldn't do it -- too dangerous for the workers," he said.

"When I started this job, I was going to pay my student loans and then just work menial jobs after that, go commercial fishing in the summer. Now, I've been to just about all these villages, and I've seen things -- things that keep me working," he said. "It was going to be a six-month job, and come September, I'll be doing this for 18 years."

The state has sent fact-finding delegations to the hardest-hit rural areas. Bill McAllister, spokesman for Gov. Sarah Palin, said officials were in the process of finding aid programs already in place that could be extended immediately to help afflicted families.

The governor shepherded rural fuel subsidies and a $1,200-per-person fuel rebate through the Legislature last summer in anticipation of the high prices, and now is looking to see what more can be done, McAllister said.

But doing much more can be politically difficult in a state where urban residents often resent the substantial subsidies that keep rural Alaska afloat.

Stories about Emmonak prompted a number of angry comments to the Anchorage Daily News, some noting that rural families often collect tens of thousands of dollars from the state's annual oil dividends and from annual tribal corporation payouts, and asking why city dwellers should subsidize them even more.

"Folks who live in the bush do so because of a personal choice. Some just have the concept now that they need not save and conserve because the government will pay their way," one letter said. "When you are not able to live there for whatever reason, then move."

At the moment, villagers in Tuluksak say their greatest hope is that Venezuelan President Hugo Chavez will come through again on his pledge to deliver free fuel to Native Americans -- a promise that could mean 100 gallons for many families.

"What most people do not realize is that what our country as a whole has been seeing for the past year or so is nothing compared to the economic conditions that have been prevailing in many of our Native communities for over 100 years," Sen. Lisa Murkowski (R-Alaska) told the Senate Committee on Indian Affairs on Jan. 15.

"It is truly tragic," she said, "that Alaska Native villages must depend on Venezuela for their safety net."

There is talk of distributing state-funded fuel vouchers to ease the crisis until spring. But Tuluksak residents say no one is expecting much from Juneau.

"Two governors ago, we were promised no more honey buckets in the villages. And yet you see we still have the honey buckets," said Gregory, referring to the portable toilets that are a pungent feature everywhere in Tuluksak except the school.

"Sarah Palin got us the fuel rebate, but she never promised anything," Samson said. "Which I guess is to her credit."

Wassilie was making her way to the village post office the other day -- her slight, shuffling figure smothered in a dark parka, moving like a blackbird on the snow.

Asked why she had waited so long to seek help, she shrugged, and smiled, and blinked, and didn't answer at all.

Tucker says he's seen the same thing all over. Shame. Pride. Silence.

"You would think a Yupik village like this would be aware of its neighbors' needs, but we weren't, because people were so shy and quiet," he said. "They were suffering alone. Like one of them said during our testimonials with the state officials, 'I thought I was the only one.' "

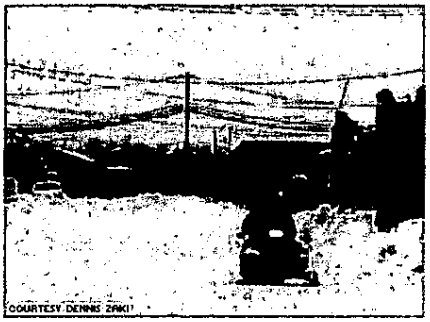
TEXT SIZE

(CNN) -- Thousands of villagers in rural Alaska are struggling to survive, forced to choose between keeping their families warm and keeping their stomachs full, residents say.



Villagers in Emmonak, Alaska, travel to the store and to hunt by snowmobile now that the river has frozen over.

1 of 2

Harvested nuts and berries, small game animals, and dried fish are the only things keeping some from starving.

To get to the nearest store, Ann Strongheart and her husband, who live in Nunam Iqua, Alaska, take an hour-and-15-minute snowmobile ride to Emmonak, Alaska. Their town does not have a store of its own.

Normally, they would each ride a snowmobile, in case one broke down. But now, they can't afford to waste the fuel, so they just take one and hope for the best.

At the store, the Stronghearts buy groceries and supplies for the family for the week, which cost more than $400. They buy only as much as their snowmobile can carry.

In many stores, 2 pounds of cheese costs between $15 and $18, milk costs $10 a gallon, a 5-pound bag of apples costs $15, and a dozen eggs costs $22 – more than double the price in the area just two years ago.

Many area residents don't even bother with fruits and vegetables, which can be damaged by freezing on the trip home.

After shopping, the Stronghearts pack their groceries into boxes, tie them to the snowmobile, and begin the 25-mile trek home, passing moose, rabbit and fox tracks along the way.

Watch how transportation is a challenge in rural Alaska »

The trip sets them back about $50 in fuel alone.

On top of high food prices, some residents are paying nearly $1,500 a month to heat their homes.

Don't Miss

The Stronghearts live in one of a group of Native American communities along the Yukon-Kuskokwim Delta.

They and other residents of these villages of 200 to 800 residents are feeling the impact of a devastating perfect storm of events.

See where the towns are and learn more about them »

Commercial fishermen couldn't make money from the seasonal king salmon harvest this year, because there was barely enough fish for subsistence. In fact, most fishermen lost money.

Then a brutal early winter brought the longest cold snap in five years. In September the temperature in many villages dropped as low as 20 degrees, a record low for many, according to the Alaska Center for Climate Assessment and Policy.

The 1,200-mile Yukon River, which the villages use as a highway, froze completely in September, at least two months earlier than usual. That left residents cut off from some basic necessities, and forced them to have pricey bulk fuel flown in.

These residents and their ancestors have lived for hundreds of years in the Yukon Delta, which Emmonak resident Cindy Beans describes as something out of National Geographic.

Watch how rural Alaskans celebrate their culture »

Though they send their kids to school, many speak the native Yup'ik language, and live a much simpler life than even urban Alaskans.

They have always had the comfort of food around them – whatever they can pick, catch and hunt.

TOPICS

"But in order to have access to all the subsistence food, you have to be able to get out there and hunt for it," Beans said.

And that requires them to go out on their snowmobiles, which means using more fuel.

The community is always gathering food, Beans said.

"All summer long we are putting away fish for the winter, by fall working on moose, then setting nets under the ice for winter time. But now, this food which used to supplement groceries is all that people have, since they can't afford to buy food at these prices."

So residents have been forced to rely more on these subsistence methods.

Beans said her brother walks three miles in 20-below-zero weather to check on nets under the ice for fish. The fish is a staple they need to keep themselves fed.

"The life out here has always been hard, it's just that its a lot harder now," she said.

Emmonak resident Nicholas Tucker wondered if others were feeling the impact, so he broadcast an inquiry via VHF radio, one of the common ways to communicate in the village.

Tucker said many residents sobbed as they radioed him back.

"His family has been out of food for quite some time now," Tucker wrote about one resident in a letter sent to legislators and the media. "Their 1-year-old child is out of milk, [he] can't get it and he has no idea when he will be able to get the next can."

"There are days without food in his house," Tucker wrote.

A single father with five children choked back tears as he told Tucker of his struggle to help his kids.

"Right now, we can't eat during the day, only at supper time," Tucker wrote of the man. "If there had been no school lunch our kids would be starving."

Many of the tribal leaders said they are begging the state and federal governments to do something to help.

George Lamont, tribal administrator in Tuluksak, Alaska, said because of the crisis and villagers' inability to pay their utility bills, he fears many may have their electricity shut off.

Watch how heating the house is a daily struggle for one family »

Alaska has given many residents $1,200 energy rebate checks, but residents say it barely helps them with one month's heating costs. Aid agencies, including the Red Cross, aren't an option right now -- the Alaska Red Cross said they couldn't help unless a disaster is declared.

But the state hasn't declared an emergency yet, and it can't because of a state statute that requires the average income levels in the villages to drop below $26,500 -- regardless of the cost of living.

Alaska Gov. Sarah Palin's office said the state is trying to find a way to free up government help.

"Local government specialists in the state Department of Commerce, Community and Economic Development continue to crunch numbers and seek creative approaches to finding a statutorily acceptable way to justify a disaster declaration, which would open the door to federal aid, as well," deputy press secretary Sharon Leighow said.

Leighow said Palin is sending her new rural advisor, John Moller, to the area next week, accompanied by representatives of the Alaska Food Bank.

Sen. Lisa Murkowski, R-Alaska, asked the Bureau of Indian Affairs to step in and help the towns most in need.

"I find it ironic, tragically ironic, that it takes an economic downturn in the rest of the country for this Congress to consider an economic stimulus for Indian Country," she said during a Senate Committee on Indian Affairs economic stimulus hearing.

The villagers hold out hope that the state or federal governments can come through.

"People have really been looking forward to some emergency assistance," Lamont said.

ADVERTISEMENT

After hearing the stories from his neighbors, Tucker said it's clear help is needed now. "We have remained quiet, cried and suffered in silence," he said.

"So now, this is our simple cry to others for help."

Alaska State Legislature

Sponsor Statement for SB 116

SB 116 appropriates $5,000,000 into the Rural Community Energy Assistance Program, created by SB 115 to help Alaska households afford to heat their homes.

During this winter, it has been difficult for many Alaskan families to afford to purchase heating oil. This is especially true in rural areas of the state. Reports detail the dilemma of choosing between purchasing adequate amounts of heating fuel or choosing among the other necessities of life.

Unlike past years, there is sufficient fuel in the villages. But fuel and other costs have become so expensive that people cannot afford to buy both. A recent report written by the Institute of Social and Economic Research (ISER) noted than in 1990, food costs in Bethel were 45 percent above food costs in Anchorage. By the beginning of 2007, this differential had increased to 92 per cent. It stands to reason that small villages outside of Bethel are even more expensive. This issue is exacerbated by a lack of income to accommodate these rising prices.

The ISER document said that in 2007, 100 gallons of fuel oil in Bethel costs $459 while in Anchorage the equivalent energy costs $120. Again this difference would be greater if comparing Anchorage with more remote villages in Alaska.

This legislation is not a permanent fix to the energy problems in rural Alaska. However, this funding for the Rural Community Energy Assistance Program will provide much needed relief to some Alaskan families during the rest of the winter.

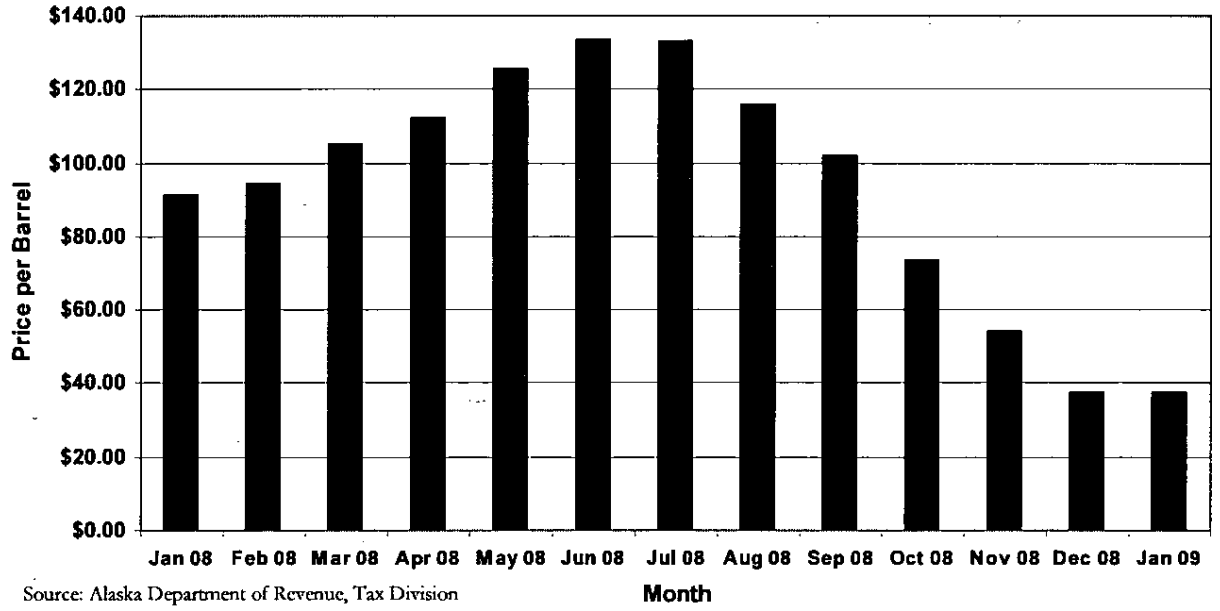
DIVISION OF COMMUNITY & REGIONAL AFFAIRS
REPORT TO THE DIRECTOR

CURRENT COMMUNITY CONDITIONS:
FUEL PRICES ACROSS ALASKA

FEBRUARY 2009 UPDATE

INTRODUCTION

Figure 1.
Alaska North Slope Crude: January 2008 to January 2009
Average Monthly per Barrel Price



Source: Alaska Department of Revenue, Tax Division

In December 2008, the price of Alaskan North Slope (ANS) crude dropped to $37.70, its lowest price since June 2004. This drop continued in January 2009, and prices fell to $37.38. This is markedly lower than the price six months earlier in June 2008, when ANS crude oil reached a record average monthly price of $133.78 per barrel (Figure 1). The national average price of gasoline dropped 55 percent from its peak of $4.05 per gallon in mid-July to $1.84 at the end of January. Similarly, national average heating fuel prices have dropped 36 percent since October

ALASKA DEPARTMENT OF COMMERCE, COMMUNITY, AND ECONOMIC DEVELOPMENT

FEBRUARY 2009

2008, from $3.66 to $2.36[1] per gallon. Alaska has not experienced the same level of decline. Due to transportation issues, many remote rural Alaska communities purchased most or all of this winter's fuel at peak prices during June and July. These communities are unlikely to see price relief until the middle of 2009.

During February 2009, the Division of Community & Regional Affairs (DCRA) repeated a statewide survey of retail heating fuel and gasoline prices in a cross-section of 100 select Alaska communities, first initiated during 2005 (*Community Conditions: Fuel Prices Across Alaska*). This report, *Current Community Conditions: Fuel Prices Across Alaska, February 2009 Update*, summarizes fuel survey findings, discusses changes in fuel prices during the recent past, and provides a current and historical perspective on fluctuating fuel prices. This report details fuel prices in each community on the date of contact.

METHODOLOGY

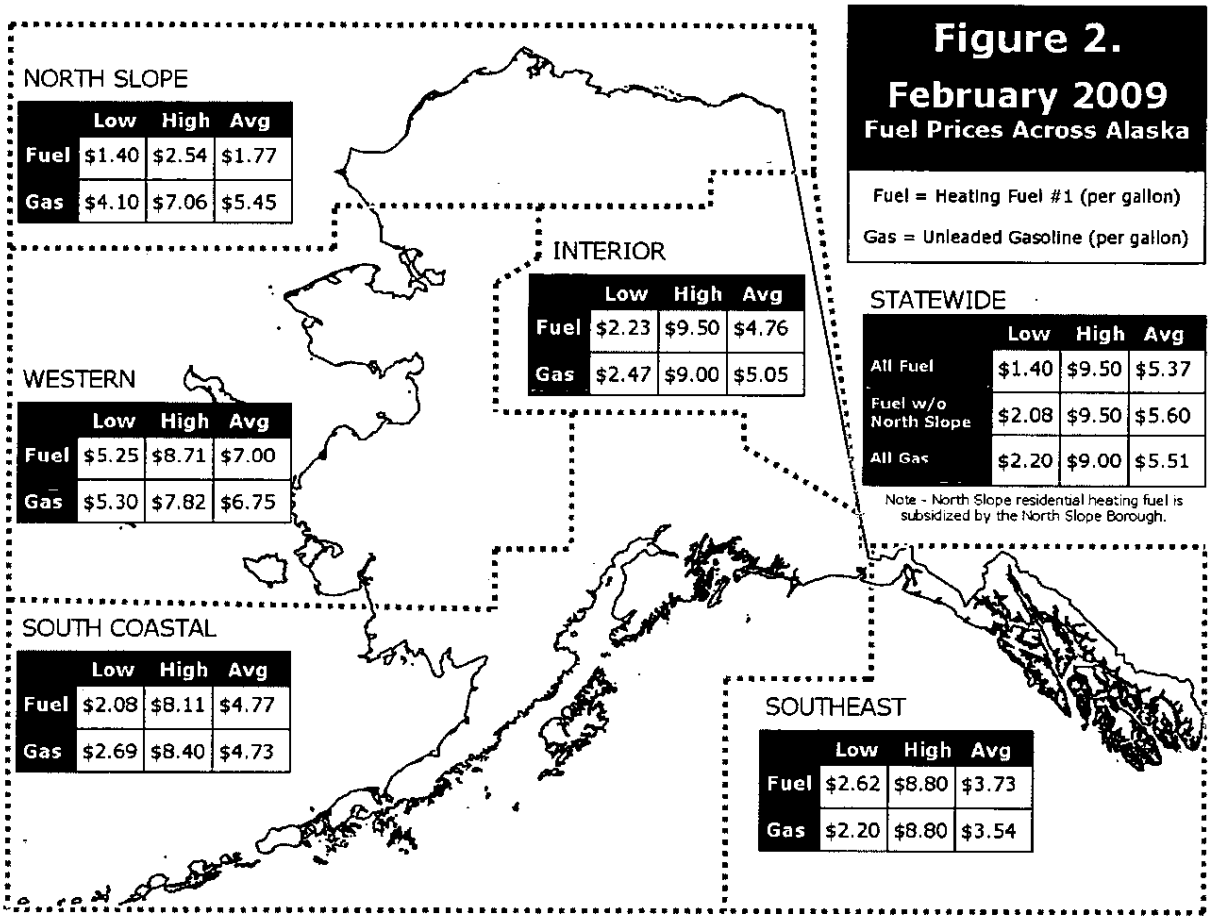
The DCRA Research and Analysis Section and Local Government Assistance Section, developed the survey and selected a community sample during 2005. Communities were strategically selected to represent differing socioeconomic conditions and all Alaska regions, including the Interior, North Slope, South Coastal, Southeast, and Western regions. Selected communities had also generally been the recipient of an Alaska Energy Authority bulk fuel project during the recent past.

Since a non-probability sampling method was utilized, this survey is considered a non-scientific study with results not generalizable to the entire population of rural Alaska. To accurately and consistently track longitudinal changes in fuel prices, the 2005 survey and community sample were used to collect 2006, 2007, 2008, and 2009 fuel information – the communities and core questionnaire items remained the same from 2005 to 2009.

DCRA Research and Analysis staff conducted a survey between February 3 - 6, 2009. In total, local fuel retailers serving 100 communities were contacted (via telephone) and asked to provide current heating fuel (#1) and gasoline per gallon prices. Survey results are one-time measurements and representative of retail fuel prices on the particular day of contact. Heating fuel and gasoline prices may have changed between the time of contact and publishing of this report.

[1] Source: United States Department of Energy, Energy Information Administration. Note: Heating fuel prices are only recorded from October to March. Gasoline prices are recorded year-round.

CURRENT FUEL PRICES ACROSS ALASKA



Average heating fuel prices per gallon vary across Alaska by region (Figure 2). Western Alaska communities report the highest average heating fuel retail price at $7.00 per gallon, while North Slope communities report the lowest average retail price at $1.77 per gallon. Of noteworthy importance, the North Slope Borough provides free heating fuel for residential use through village corporations, who distribute fuel to residents throughout the borough, charging only a delivery fee on a per gallon basis. The North Slope Borough does not subsidize heating fuel for commercial use. Consequently, the retail price of heating fuel for commercial entities is significantly higher than for residences (Table 1). Compared to other regions, excluding the North Slope, Southeast communities experience the lowest heating fuel prices, at an average price of $3.73 per gallon.

Table 1. North Slope Heating Fuel (#1) and Gasoline Retail Prices

Community	Community Retailer	Heating Fuel Retail Price		Gasoline Retail Price
		Residential	Commercial	
Anaktuvuk Pass	Nunamiut Corporation	$1.55	$9.20	$6.50
Atqasuk	Atqasuk Corporation	$1.40	$4.10	$4.10
Barrow	BUEC, Inc.	Natural Gas	$5.78	$4.70
Kaktovik	Kaktovik Inupiat Corporation	$2.00	$6.95	$4.90
Nuiqsut	Kuukpik Corporation	$2.54	$3.95	$4.95
Point Hope	Tigara Corporation	$1.65	$6.35	$5.95
Wainwright	Olgoonik Corporation	$1.50	$7.83	$7.06

To accurately summarize statewide heating fuel prices, it is appropriate to exclude North Slope Region communities because of the North Slope Borough subsidy for residential use heating fuel. The Arctic Village Traditional Council in Arctic Village (Interior Region) reports the highest heating fuel retail price at $9.50 per gallon (see Appendix). In contrast, Homer Run Oil in Homer (South Coastal Region) reports the lowest heating fuel retail price at $2.08 per gallon. On average, excluding North Slope Region communities, heating fuel retails for $5.60 per gallon across the 93 surveyed Alaska communities.

As Figure 2 illustrates, average gasoline prices per gallon also vary across Alaska by region. Western Region communities report the highest average gasoline retail price at $6.75 per gallon while Southeast communities report the lowest average retail price at $3.73 per gallon. Statewide retail prices indicate significant variation in gasoline retail price. Specifically, the Arctic Village Traditional Council in Arctic Village (Interior Region) reports the highest gasoline prices at $9.00 per gallon. In contrast, Fred Meyer Gas in Juneau (Southeast Region) reports the lowest gasoline retail price at $2.20 per gallon. On average, gasoline retails for $5.51 per gallon across 99 Alaska communities.

CHANGE IN FUEL PRICES ACROSS ALASKA

Portions of Alaska have begun to realize fuel price relief (Figure 3). Excluding North Slope Region communities, the statewide average per gallon heating fuel price decreased from $5.85 to $5.60 from November 2008 to February 2009. This $0.25 per gallon average price change represents a four percent decrease in the statewide average heating fuel price per gallon. Prices in the Southeast (-25%), South Coastal (-6%), Interior (-2%), and North Slope (-2%) regions

decreased from November 2008 to February 2009 (Figure 4). The Western Region experienced a $.01 increase, less than one percent.

Figure 3. Trend in Average Alaska Fuel Price: November 2005 to Feburary 2009

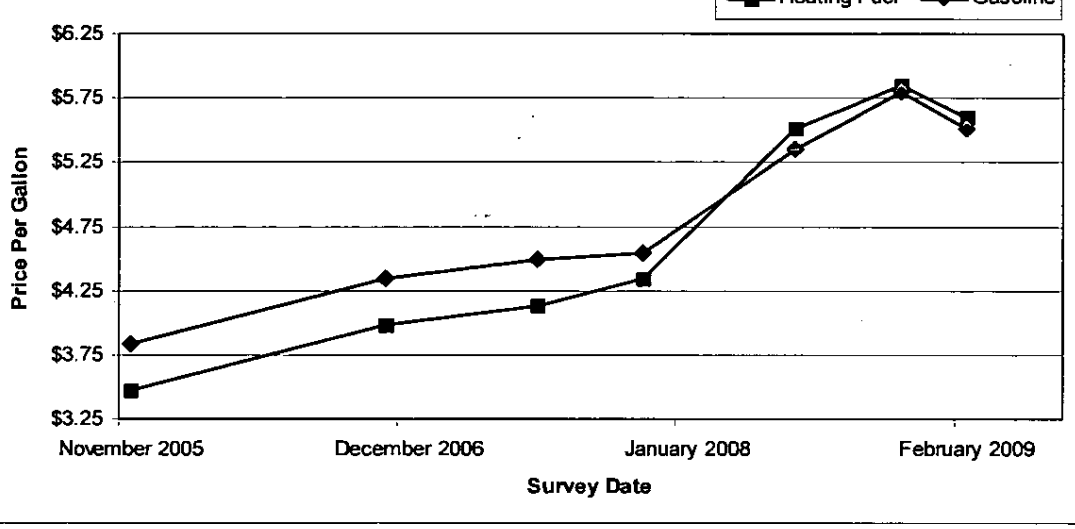


Figure 4. Percent Change: Cost of Heating Fuel by Region

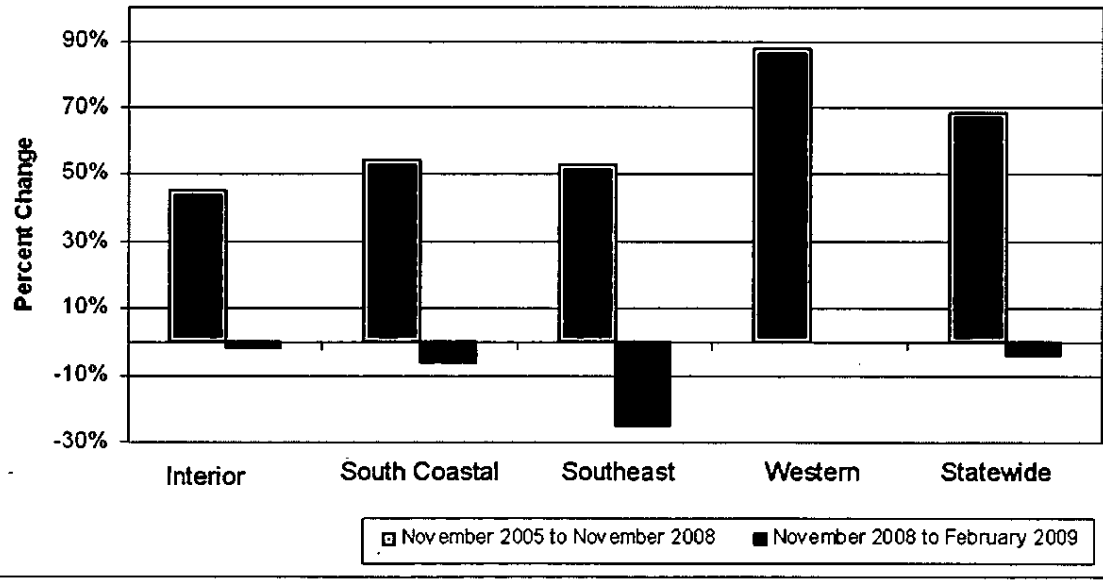
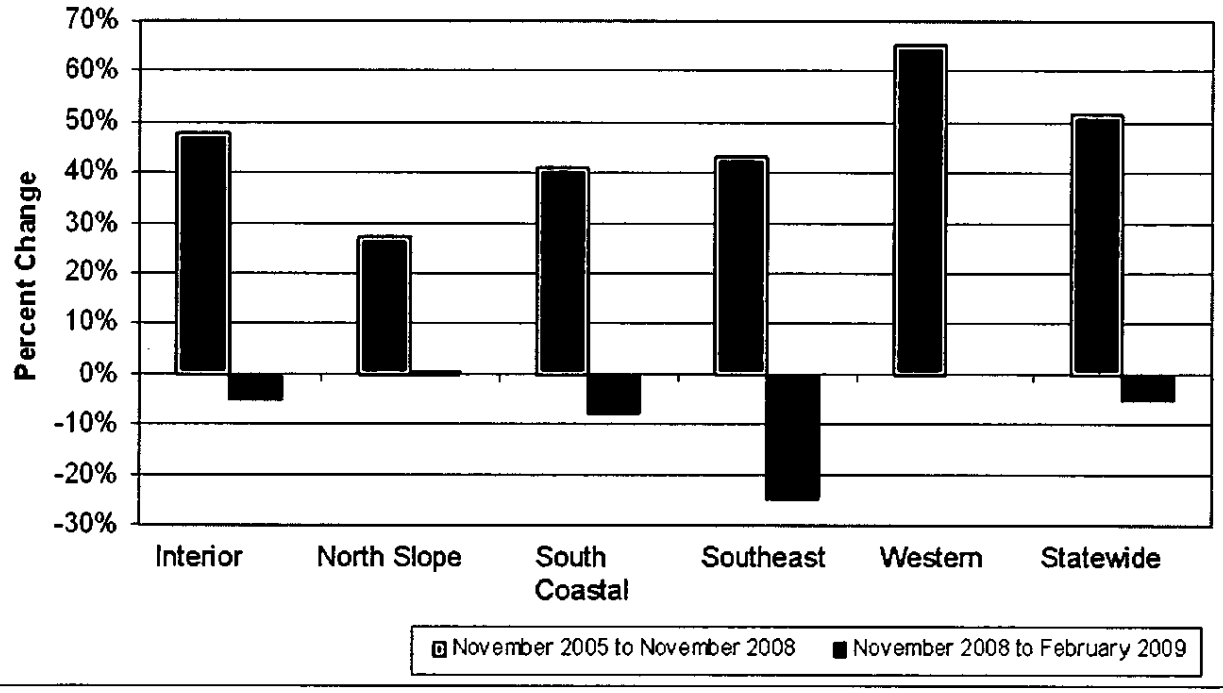


The statewide average gasoline price also decreased from November 2008 to February 2009, from $5.80 to $5.51 per gallon (Figure 5). This $0.29 per gallon average price decrease

represents a five percent decrease in the statewide average price per gallon of gasoline. Prices in the Southeast (-25%), South Coastal (-8%), and Interior (-5%) regions declined during the past three months. Western Region prices decreased by $.01, less than one percent. Prices in the North Slope Region increased one percent.

Figure 5. Percent Change: Cost of Gasoline by Region



From November 2005, when this survey began, to November 2008, the statewide average price for heating fuel increased $2.37 per gallon. From June 2008 to November 2008, it increased $0.34 per gallon; from November 2008 to February 2009, it decreased by $0.25 per gallon. Similarly, from November 2005 to November 2008, the statewide average price for gasoline increased $1.97 per gallon. From June 2008 to November 2008, it increased $0.45 per gallon; from November 2008 to February 2009, it decreased by $0.29 per gallon.

ADDITIONAL DISCOUNTS ON HEATING FUEL

Due to the high price of fuel in Rural Alaska, vendors were asked if any discounts were being offered to residents. Of the one hundred surveyed, nine vendors were offering discounts. The discounts were not consistent. For example, Point Hope offers a 10% discount for elders, the

City of Akutan is selling their fuel at cost, and Dillingham dropped its gas tax from six to three percent (see Appendix). Twenty-one respondents were unsure whether the business offered discounts or not. Fuel vendors operated by a tribe, such as in Quinhagak, often give discounts to local tribal shareholders.

In the previous fuel survey, one of the questions posed to fuel vendors was whether they offered volume discounts. Volume discounts are more prevalent in larger and/or more accessible communities. In the Southeast Region, where most communities have regular barge service, two-thirds (64%) of fuel vendors offer volume discounts. Only five Western Region vendors (13%) offer volume discounts, two of them located in the regional hubs of Kotzebue and McGrath. Generally speaking, residents of remote rural Alaska communities have the least opportunity to benefit from volume purchases of residential heating fuel.

Other fuel cost relief came during the 2008 legislative special session, in which the final outcome was a $1200 energy rebate to every Permanent Fund eligible individual. From September 1, 2008, through August 31, 2009, there was also a one-year suspension of both the state motor fuel tax of $0.08 and the state tax on resident heating fuel. Despite these measures, the cost of fuel remains an issue for Alaska.

SUMMARY

While Alaska North Slope crude oil prices have dropped significantly during the past few months, Alaskans have continued to pay high prices for heating fuel and gasoline. As the price of crude oil continues to drop, communities along the road system and in temperate coastal regions have seen their cost of fuel decline; however, many remote rural Alaska communities are still plagued with high fuel prices.

From November 2008 to February 2009, the statewide average per gallon price of heating fuel decreased four percent from $5.85 to $5.60. Concurrently, the statewide average per gallon price of gasoline decreased five percent from $5.80 to $5.51. Since DCRA began keeping track of fuel prices in November 2005, this period is the first time the average price of fuel has decreased. From November 2005 to November 2008, the statewide average cost of fuel increased 68%; from November 2008 to February 2009, prices declined 4%. Although the average cost of fuel is still several dollars higher in 2009 than it was in 2005, this decline in the price of fuel has offered some relief to residents of Southeast and communities on the road system. Unfortunately, many of the communities off the road system are not experiencing the same relief, continue to pay high fuel costs, and are unlikely to see a decline in fuel prices any time in the near future.

RE: Energy Assistance Need

Dear Co-Chairs Hoffman and Stedman and Members of the Senate Finance Committee:

The Alaska Native Health Board (ANHB) thanks the Senate Finance Committee for introducing and expresses support for SB 115 and SB 116.

ANHB represents 24 regional and village tribal health organizations that provide direct care services and programs to approximately 130,000 Alaska Natives and American Indians and to non-Native residents in most of the rural/remote villages in Alaska.

Village clinics and regional health organizations are experiencing extreme energy-related hardships with as a second year of high energy costs set in. As they struggling to balance budgets, many have had to cut direct patient services, reduce spending on medical supplies, and, in the worst instances, close clinics. I'll give you a few examples of these struggles.

- Maniilaq Association, which represents the hub village of Kotzebue and 11 surrounding villages, has seen fuel prices increase by 45%. The cost of electricity has increased 28%, along with office space rent. Maniilaq is estimating the increased cost in energy from last year to this year at $2.1 million.
- Eastern Aleutian Tribes, Inc. represents eight remote villages along the Aleutian Chain and Whittier. Transportation fuel costs have risen more than 35%. As a result, many of their grants have spent 75% of their total budget in just the first eight months of the year. The Adak clinic has been open on an intermittent basis. It is one example of the impact high fuel and utility costs are having on direct patient services. The ability of the clinic to pay staff salaries has created retention and recruitment problems.
- Tyonek employs one Community Health Aide. Their energy costs have increased substantially, but they have been able to maintain clinic hours. However, they are experiencing rising supply costs due to freight charges causing changes to supplies orders.
- Bristol Bay Area Health Corporation (BBAHC) serves Dillingham and 34 villages in the area. BBAHC's village cost of living increases directly related to energy and fuel costs range from 206% to 376% above the Anchorage cost of living index. Facing their very first unbalanced budget, BBAHC recently laid off 18 employees and reduced hours for six employees. To

VALDEZ NATIVE TRIBE

offset increased fuel and electricity costs experienced by village clinics, BBAHC increased Indian Health Service village lease payments by ten percent. Patient travel, medevac services, fuel oil and electricity combined are $1 million above BBAHC's FY 2008 budget.

ANHB is also concerned about the toll high energy costs are taking on individual families. As households struggle with home heating and other energy costs, some families are deciding to close their homes and move in with relatives. Combining households means more people are living together in close quarters, raising public health issues. In these circumstances, the risk of spreading communicable diseases, including respiratory disease and skin infections, increases dramatically. Another concern is persons who are dependent on durable medical equipment (such as respirators) for chronic conditions are choosing to limit their hours of use because of high electric rates, which risks their health and, in the long run, puts the patient at risk for more invasive treatment.

Alaskans who live in rural/remote areas of the state count on the health systems in their communities for a complex array of health services. For most of rural Alaska, that is the tribal health system. As you consider energy assistance to the part of Alaska most challenged during high energy costs, we respectfully request you craft a solution that includes energy assistance for rural health facilities.

If we can provide any additional information or assistance please feel free to contact me at 907-562-6006 or via e-mail at edotomain@anhb.org.

Respectfully,

Evangelyn Dotomain
President/CEO

Estimated Impact of $9M Appropriation for Heating Assistance Programs[1]

Community	Avg. CHP[2]	Fuel Oil $/Gal.[3]	Est. Avg. HH Award[4]	Est. # Gal.
Anchorage	5	2.68	$285	106.3
Fairbanks	7	2.63	$399	151.7
Juneau	5	4.07	$285	70.0

Chitina	11	4.12	$627	152.2
Togiak	14	5.87	$798	135.9
Shismaref	29	7.75	$1,653	213.3
New Stuyahok	16	6.34	$912	143.8
Est. $ per CHP[5]	$57			

[1] Estimates show the impact on households participating in the state-operated heating assistance programs

[2] Avg. CHP - Average Community Heating Points based on 2009 ytd approved Heating Assistance Applications

[3] Fuel Oil Prices from DCRA "Current Community Conditions: Fuel Prices Across Alaska November 2008 Update"

[4] Est. Avg. HH Award - Estimated award for average household based on the average total number of Community Heating Points for the community multiplied by calculated dollar value per CHP

[5] $57 is the estimated dollar per CHP based on the statewide average of CHP (8.5), the projected number of eligible households (13,000), and the amount of the appropriation available for the State heating assistance programs ($6.3M)

Provided by the Department of Health and Social Services
Submitted by the Office of Sen. Lyman Hoffman

3628

Alaska Heating Assistance Programs

From the Office of Sen. Lyman Hoffman
March 9.2009

3629

- Low Income Home Energy Assistance Program (LIHEAP)
- Alaska Heating Assistance Program (AkHAP)

.3630

Program Participants

- Program is statewide
- Directly serves 162 communities
- Through contracts with Native organizations serves 114 more communities
- Outside of tribal areas, 47% of households using the program live in 6 communities – Anchorage, Wasilla, Fairbanks, Palmer, North Pole, Homer

3631

Eligibility

- Resident of the State
- Living in the home in which the heating costs occur
- For LIHEAP have income (family of four) less than $39,750
- For AkHAP have income (family of four) less than $59,750
- For heating costs incurred from November 1st through April 30

3632

Program Mechanics

- Individual must apply on behalf of a household
- Household is assigned points based on application information
- Number of applications is estimated
- Based on state and federal appropriations and estimate of the number of applications, a dollar amount is assigned to each point
- Initial grant is made on behalf of household to vendor in community
- Supplemental assistance is provided if available

3633

Amount of Assistance

- Based on household points
- Fuel cost and climatic conditions
- Size and type of housing
- Household size and income
- If elderly, disabled or young children are in the household
- Federal and state appropriations

3634

Sample Calculation

- Based on application, household has 15 points.
- Based on available funds and estimate of total number of applications – each point is worth $220.
- Applicant would receive $3300
- Based on heating oil prices of $6.50 per gallon user could purchase 507 gallons or 84 gallons per month
- Assuming each household uses 150 gallons per month, only 56 per cent of household's fuel needs are recognized by the program

ANALYSIS: *(Attach a separate page if necessary)*

This bill would amend Alaska's current cigarette minimum price statutes by removing the ability for a cigarette distributor or retailer to present evidence to the Department of Revenue that their actual cost of selling cigarettes is below the state manadated mark-ups of 4.5% for wholesale and 6% for retail. There would be no effect on state revenues as a result of this bill. There also would be no effect on the operating costs incurred by the Department of Revenue. However, the Department would be able to divert the resources currently expended on auditing a distributor or retailer's actual cost to cigarette tax audits. The Department will still continue to expend resources to update the minimum price of cigarettes on its website and conduct investigations to insure distributors and retailers are not selling cigarettes below state mandated minimums.

SPONSOR STATEMENT
CS for SENATE BILL NO. 117

Alaska, along with at least 23 other states, prohibits wholesale cigarette distributors and retailers from selling cigarettes below a state regulated minimum price. This reflects a public policy which seeks to prevent the use of cigarettes as a "loss leader" or a bargain item. Furthermore, studies have shown that pricing cigarettes below cost has been linked to youth smoking.

However, current law contains a loophole which allows large, high-volume cigarette sellers to price their cigarettes at less than the minimum price set by law if they can prove their actual cost of doing business is lower than the mandated minimum price.

In order to qualify for the lower price, application for each cigarette brand must be made. The Department of Revenue must then review the financial data provided to see if the submission is available for an exception. This process of verifying the cost versus price calculations by brand is both expensive and time consuming for the agency. If the exception is granted, it changes the state minimum prices for all wholesalers and retailers. Consequently, cigarettes in effect become somewhat of a "loss leader" because the granted exemption price is at or below cost for some retailers, thus defeating the original purpose of setting a minimum price.

If CS SB 117 is passed, it requires the Department of Revenue to set the same minimum cigarette price for all vendors – regardless of size, volume, or accounting practices. Thereby promoting fairness by putting all cigarette sellers on the same playing field with regard to the state mandated minimum cigarette price. Furthermore, CS SB 117 would ensure that it will no longer be permissible for anyone to set a price any lower than that which the State establishes.

The percentages in CS SB 117 are based on a compromise between interested parties. As a result, major cigarette brands will experience an increase in price.

In the end, if passed, CS SB 117 will increase the price of cigarettes overall; will eliminate the labor and expense for the Department of Revenue in calculating exceptions to the minimum price; and it will promote fair and reasonable competition in the marketplace.

SECTIONAL ANALYSIS
Senate Bill No. 117 (26-LS0386\S)

Section 1. Amends AS 43.50.710(a) by removing language that currently allows wholesalers and retailers to price cigarettes as low as that seller's actual cost. This section replaces that language by setting the Department's minimum price as the lowest price at which a wholesaler or retailer can sell cigarettes.

Section 2. Amends AS 43.50.710(b) by removing language that currently permits a retailer to attempt to procure the purchase of cigarettes at a price as low as the actual cost to a wholesaler. This section replaces that language by setting the Department's minimum price as the lowest price.

Section 3. Amends AS 43.50.710(c). This section of law allows the State to utilize evidence of advertisement or offers to sell cigarettes at less than actual cost as prima facie evidence of intent to injure competition. The proposed change simply replaces the actual cost with the minimum price set by the Department as the new benchmark for constituting prima facie evidence.

Section 4. Amends AS 43.50.720. This section of law requires that when cigarettes are priced together with other merchandise the selling price may not be less than the wholesaler or retailer's actual cost. This section will again replace the seller's actual cost with the minimum price set by the Department as the lowest price available.

Section 5. Amends AS 43.50.790(a). This section removes the Department's authority to calculate and set the actual cost of doing business as the lowest price available to sell cigarettes. It would now require the Department to instead determine only the applicable minimum price for cigarette sales.

Section 6. Adds a new section to AS 43.50 at 43.50.810. This section requires the Department to set the minimum price for which a wholesaler or retailer may advertise or sell cigarettes, and it sets forth the applicable formula for determining that minimum price.

Section 7. Repeals several sections of Title 43 to make the law consistent with the foregoing changes.

AS 43.50.730 is repealed, which currently requires wholesalers to provide their actual costs to one another when selling cigarettes. Since the actual cost is no longer available for setting a sales price, this provision is irrelevant.

AS 43.50.740(a) is repealed, which allows sellers to cut their prices to match the actual cost.

AS 43.50.760, AS 43.50.770, and AS 43.50.800 are repealed, which all currently set forth the factors used in determining the actual cost to a wholesaler or retailer. Since actual cost will not be utilized to set the lowest price, these provisions are irrelevant.

AS 43.50.849(4) is repealed, which is the definition of a direct-buying retailer.

SENATOR LESIL MCGUIRE

SUMMARY OF CHANGES
CS FOR SB 117 – VERSION S

(1) Section 6 (a)
Changed the multiplier used to calculate the Wholesale Minimum Price from 1.045 to 1.02.

(2) Section 6 (b)
Changed the multiplier used to calculate the minimum price for which a retailer or wholesaler may advertise, offer to sell, or sell cigarettes at retail from 1.06 to 1.04.

Reasons:

The CS represents a compromise among interested parties with respect to the specific minimum price formula. While it still eliminates the exception to price below minimum, it reflects a slightly lower minimum wholesale and retail price than the original Senate Bill 117.

This change allows the State to firmly establish a minimum wholesale price; prohibits any exceptions; and sets the figure at a price that is consistent with fair competitive market principles. Compared to historical exemptions granted, it will raise the minimum price slightly to a figure that allows market competition, and still maintains the policy of setting a minimum price.

CAMPAIGN for TOBACCO-FREE Kids

RAISING CIGARETTE TAXES REDUCES SMOKING, ESPECIALLY AMONG KIDS (AND THE CIGARETTE COMPANIES KNOW IT)

The cigarette companies have opposed tobacco tax increases by arguing that raising cigarette prices would not reduce adult or youth smoking. But the companies' internal documents, disclosed in the tobacco lawsuits, show that they know very well that raising cigarette prices is one of the most effective ways to prevent and reduce smoking, especially among kids.

- Philip Morris: *Of all the concerns, there is one - taxation - that alarms us the most. While marketing restrictions and public and passive smoking [restrictions] do depress volume, in our experience taxation depresses it much more severely. Our concern for taxation is, therefore, central to our thinking . . . .*[1]
- Philip Morris: *When the tax goes up, industry loses volume and profits as many smokers cut back.*[2]
- RJ Reynolds: *If prices were 10% higher, 12-17 incidence [youth smoking] would be 11.9% lower.*[3]
- Philip Morris: *It is clear that price has a pronounced effect on the smoking prevalence of teenagers, and that the goals of reducing teenage smoking and balancing the budget would both be served by increasing the Federal excise tax on cigarettes.*[4]
- Philip Morris: *Jeffrey Harris of MIT calculated...that the 1982-83 round of price increases caused two million adults to quit smoking and prevented 600,000 teenagers from starting to smoke...We don't need to have that happen again.*[5]
- Philip Morris: *A high cigarette price, more than any other cigarette attribute, has the most dramatic impact on the share of the quitting population...price, not tar level, is the main driving force for quitting.*[6]

  [For more on cigarette company documents and price/tax increases see the 2002 study in the *Tobacco Control* journal, "Tax, Price and Cigarette Smoking: Evidence from the Tobacco Documents."[7]]

The cigarette companies have even publicly admitted the effectiveness of tax increases to deter smoking in their required filings with the U.S. Securities and Exchange Commission.

- Philip Morris: *Tax increases are expected to continue to have an adverse impact on sales of tobacco products by our tobacco subsidiaries, due to lower consumption levels...* [10-Q Report, November 3, 2008]
- Lorillard Tobacco: *We believe that increases in excise and similar taxes have had an adverse impact on sales of cigarettes. In addition, we believe that future increases, the extent of which cannot be predicted, could result in further volume declines for the cigarette industry, including Lorillard Tobacco...* [10-Q Report, November 4, 2008]
- R.J. Reynolds: *Together with manufacturers' price increases in recent years and substantial increases in state and federal taxes on tobacco products, these developments have had and will likely continue to have an adverse effect on the sale of tobacco products.* [10-Q Report, October 24, 2008]

Economic Research Confirms That Cigarette Tax Increases Reduce Smoking. Numerous economic studies in peer-reviewed journals have documented that cigarette tax or price increases reduce both adult and underage smoking. The general consensus is that every 10 percent increase in the real price of cigarettes reduces overall cigarette consumption by approximately three to five percent, reduces the number of young-adult smokers by 3.5 percent, and reduces the number of kids who smoke by six or seven percent.[8] Research studies have also found that:

- Cigarette price and tax increases work even more effectively to reduce smoking among males, Blacks, Hispanics, and lower-income smokers.[9]
- A cigarette tax increase that raises prices by ten percent will reduce smoking among pregnant women by seven percent, preventing thousands of spontaneous abortions and still-born births, and saving tens of thousands of newborns from suffering from smoking-affected births and related health consequences.[10]
- Higher taxes on smokeless tobacco reduce its use, particularly among young males; and increasing cigar prices through tax increases reduce adult and youth cigar smoking.[11]

1400 I Street NW - Suite 1200 - Washington, DC 20005
Phone (202) 296-5469 · Fax (202) 296-5427 · www.tobaccofreekids.org

- Cigarette price increases not only reduce youth smoking but also reduce both the number of kids who smoke marijuana and the amount of marijuana consumed by continuing users.[12]
- By reducing smoking levels, cigarette tax increases reduce secondhand smoke exposure among nonsmokers, especially children and pregnant women.

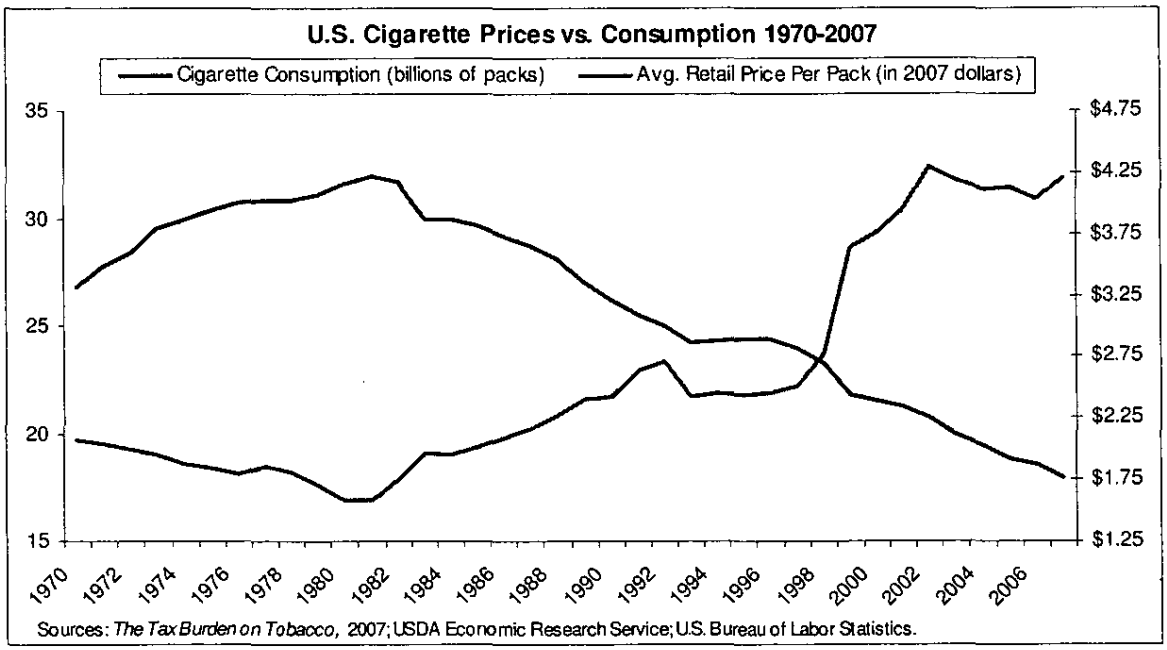
Recent State Experiences

In every single state that has significantly raised its cigarette tax rate, pack sales have gone down sharply.[13] While some of the decline in pack sales comes from interstate smuggling and from smokers going to other lower-tax states to buy their cigarette, reduced consumption from smokers quitting and cutting back plays a more powerful role. As shown in more detail, below, nationwide data – which counts both legal in-state purchases and the vast majority of packs purchased through cross-border, Internet, or smuggled sales – shows that overall packs sales go down as state cigarette tax increases push up the average national price.

In-state evidence shows that state cigarette tax increases are prompting many smokers to quit or cutback. For example, the Wisconsin Quit Line received a record-breaking 20,000 calls in the first two months after its $1.00 per cigarette pack increase (it typically receives 9,000 calls per year). Likewise, in Texas and Iowa, which each increased their cigarette taxes by $1.00 in 2007, the number of calls to the state quitlines have been much higher compared to the year before.[14] It is also clear that these efforts to quit by smokers after tax increases translate directly into lower future smoking rates. In Washington State, for example, adult smoking from the year before its 60-cent cigarette tax increase in 2002 to the year afterwards declined from 22.6 to 19.7 percent, reducing the number of adult smokers in the state by more than 100,000, despite overall population increases.[15]

Increasing U.S. Cigarette Prices and Declining Consumption

Although there are many other factors involved, comparing the trends in cigarette prices and overall U.S. cigarette consumption from 1970 to 2007 shows that there is a strong correlation between increasing prices and decreasing consumption.



While U.S. cigarette prices are largely controlled by the cigarette companies' price-setting decisions, from 1970 to 2006, the federal tax on cigarettes also increased from eight cents to 39 cents per pack and the average state cigarette tax increased from 10 cents to $1.07 per pack during that time period. Without these federal and state tax increases, U.S. cigarette prices would be much lower and U.S. smoking levels would be much higher.

Prices and Youth Smoking Rates. The chart below shows how closely youth smoking prevalence is to cigarette pack prices. As prices climbed in the late 1990s and early 2000s, youth smoking rates declined, but as the price decreased between 2003 and 2005 (along with funding for tobacco prevention programs in many states), youth rates increased. Even the slight increase in price between 2005 and 2007 corresponds with a decline in youth smoking rates.

Expert Conclusions on Cigarette Prices and Smoking Levels

- In its 2007 report, *Ending the Tobacco Problem: A Blueprint for the Nation*, the National Academy of Sciences' Institute of Medicine recommends raising cigarette taxes in states with low rates and indexing them to inflation, to reduce cigarette consumption and to provide money for tobacco control. The report states, "Tobacco excise tax revenues pose a potential funding stream for state tobacco control programs. Setting aside about one-third of the per-capita proceeds from tobacco excise taxes would help states fund programs at the level suggested by CDC."[16]
- The President's Cancer Panel's 2007 report, *Promoting Healthy Lifestyles*, advised increasing state tobacco taxes, stating, "Increases in tobacco excise taxes, which are passed along to consumers in the form of higher tobacco product prices, have proven highly effective in reducing tobacco use by promoting cessation among current users, discouraging relapse among former users, preventing initiation among potential users, and reducing consumption among those who continue to use tobacco. These revenues also provide crucial dollars needed to fund anti-tobacco efforts."[17]
- The 2000 U.S. Surgeon General's Report, *Reducing Tobacco Use*, found that raising tobacco-product prices decreases the prevalence of tobacco use, particularly among kids and young adults, and that tobacco tax increases produce "substantial long-term improvements in health." From its review of existing research, the report concluded that raising tobacco taxes is one of the most effective tobacco prevention and control strategies.[18]
- Wall Street tobacco industry analysts have long recognized the powerful role increased cigarette taxes and rising cigarette prices play in reducing U.S. smoking levels. For example, a December 1998 "Sensitivity Analysis on Cigarette Price Elasticity" by Credit Suisse First Boston Corporation settled on a "conservative" estimate that cigarette consumption will decline by four percent for every 10 percent increase in price.
- In its 1998 report, *Taking Action to Reduce Tobacco Use*, the National Academy of Sciences' Institute of Medicine concluded that "the single most direct and reliable method for reducing consumption is to increase

the price of tobacco products, thus encouraging the cessation and reducing the level of initiation of tobacco use."[19]

COSTCO WHOLESALE

January 21, 2010

Senator Lesil McGuire
Alaska Senate
Room 125
State Capitol
Juneau, AK 99801

RE: In Support of Committee Substitute for Senate Bill 117

Dear Senator McGuire:

I am writing to you on behalf of Costco Wholesale Corporation ("Costco") to support Committee Substitute for Senate Bill 117 ("CSSB 117"). Costco holds licenses as a wholesale distributor and a retailer of cigarettes and other tobacco products.

Currently, the law is difficult to interpret. CSSB 117 clarifies the language in the statute and makes it easier for wholesale distributors and retailers to determine the minimum price of cigarettes. The Department of Revenue and all licensees will benefit with CSSB 117 because the determination of price for cigarettes is simpler and more efficient, thus saving valuable state resources. Further, we believe that CSSB 117 is consistent with the fair and competitive practices in Alaska.

Thank you for your time and the opportunity to comment on this pending legislation.

Sincerely,

COSTCO WHOLESALE

John McKay
Senior Vice President

999 Lake Drive • Issaquah, WA 98027 • 425/313-8100 • www.costco.com

Michael J. Elerding

Ketchikan, AK 99901

March 19, 2010

Senator Bert Stedman
Alaska State Senate
State Capitol Room 516
Juneau, AK 99801

RE: CS for SB 117 Price of Cigarettes

Dear Senator Stedman,

The purpose of this letter is to urge your support of the above referenced bill. This bill is a technical correction of the Un-Fair Cigarette Sales Act, which was passed in 2005. The bill is strictly defined and deals with just one topic – The Minimum Price of Cigarettes. While the bill may not have much sex appeal it is an important legislation for the following reasons:

1. Price is a significant determinant to youth access to cigarettes. Studies ad nauseam have linked the price to cigarettes to youth smoking rates. The higher the price of cigarettes the lower youth smoking rates.
2. Article 7 of AS 43 50 700 was intended to end the predatory pricing practice of selling cigarettes at below cost. This legislation closes a loophole in the original measure (AS 43 50 800(c))which allows large mega distributors to sell cigarettes for less than presumptive costs if they can show that their "Cost of Doing Business" is less than 4.50% at the wholesale level. By eliminating this loophole, using a percentage that all parties collaborated on, the legislation is promoting competition and leveling the playing field for wholesalers and retailers.
3. This legislation will save the Department of Revenue time and money contrary to the fiscal note because the department would no longer need to perform time consuming audits on a distributor's "Cost of Doing Business." Instead the department could redeploy their auditors to conduct audits on actual tax returns – a much more beneficial use of their time.

The concept of ending predatory pricing practices and restricting youth access to cigarettes has been vetted among all of the vested constituency groups; Tobacco Alliance Groups (Mark Hickey et al), Large Wholesale/Retailer's (Costco); Big Tobacco (Philip Morris – Bob Evans) and the Department of Revenue. There is no opposition to the measure. The negotiations and discussions that have taken place among these diverse groups is nothing short of amazing. The fact that all of these interest groups are on the same page mandates that the legislature take a serious look and support the efforts that have manifested themselves in the form of SB 117.

As with many measures that arrive on your door step there has been a lot of blood, sweat and tears that have gone into the crafting of SB 117. Senator McGuire and her staff have done a yeoman's job of carrying this measure thus far. Now we need your support and your leadership in getting a hearing for SB 117 before your Senate Finance Committee. Because this legislation is narrowly defined and only deals with a technical correction regarding the price of cigarettes there is no controversy or any danger of unintended consequences. Finally, there is no opposition to this legislation.

Michael J. Elerding
Box 5811
Ketchikan, AK 99901

As you know this legislation is important to Northern Sales Company and their eighty two (82) plus employees who live and work in SE Alaska. Your support and leadership in marshalling this legislation through your Senate Finance Committee will not go unnoticed by your constituents who work for Northern Sales.

If you have any questions of if you require additional information please feel free to give me a call at 907-617-5412. If you think my testimony would assist with the passage of this legislation I would be happy to arrange my schedule to accommodate the hearing schedule of your Senate Committee. Thank you in advance for your leadership and support of this legislation.

Sincerely yours

Michael J. Elerding

February 19, 2009

Mr. Leo von Scheben, Commissioner
Alaska Department of Transportation
and Public Facilities
P.O. Box 112500
Juneau, AK 99811-2500

In Reply Refer To:
Adm F&A 5

Dear Commissioner von Scheben:

As you are aware, on February 17, 2009, President Obama signed the American Recovery and Reinvestment Act (ARRA) of 2009 into law. Since that time, the FHWA has been working to interpret the provisions of the Act, and has identified an Alaska specific suballocation issue that will affect the development of the Alaska Statewide Transportation Improvement Program (STIP) and the advancement of projects under ARRA.

Specifically, apportionments to States, including Alaska, are divided into 3 "pots" as follows:

- 3% is dedicated to Transportation Enhancements
- 67% is for use on projects anywhere in the State
- 30% is allocated for urbanized areas urbanized areas over 200,000 and areas under 200,000.

The allocation for areas under 200,000 is further divided as follows:

- areas under 200,000.
- areas under 5,000.

The law requires that the calculation for areas under 5,000 be an amount which is not less than 110 percent of the amount of funds apportioned to the State for the Federal-aid secondary system for fiscal year 1991. In the case of Alaska, this calculation results in the entire suballocation for areas under 200,000 going to areas of under 5,000. **This result occurs only in Alaska.**

This might be better illustrated in the following table:

Total Distribution	Transportation Enhancements (3 percent)	Division between Urbanized Areas over 200,000 population and other areas (30 percent)			Available for any area (67 percent)
		Areas over 200,000	Areas under 200,000	Areas under 5,000	
175,461M	5,263M	18,953M	0	33,684M	117,559M

MOVING THE AMERICAN ECONOMY

3650

Therefore, while urban areas between 5000 and 200,000 are not eligible for the suballocated portion of ARRA funds, they are eligible for funding from the $117,559M pot which is available for use in any area of the State. We understand that this has not been the interpretation that the Alaska Department of Transportation and Public Facilities has been working under.

Please be aware that these calculations are preliminary at this time and are offered in an advisory capacity. Final suballocation amounts will be released with the respective Notice(s) of Apportionment and accompanying computation tables. In the interim, we would request that you review our initial computations and take action as appropriate.

Sincerely,

David C. Miller

DRAFT

STATE IMPLEMENTATION OF THE AMERICAN RECOVERY AND REINVESTMENT ACT

A National Governors Association Report

February 20, 2009

3654

Key Points

1. The American Recovery and Reinvestment Act (ARRA) will have a huge impact on state government because it will affect about 50 state formula and discretionary grants as well as about 15 entitlement and anti-cyclical programs. States or individuals through state programs will receive over $250 billion from the package. Many of these programs will require states to make legislative, business, and even management information system changes. In addition, state revenues and bonding activities will also be impacted.

2. In many instances, the act requires funds to be obligated quickly. In particular, it contains several "use it or lose it" provisions, which would reallocate unobligated funds to other states. For example, there is a requirement in the highway section for states to obligate 50 percent of funds in 120 days.

3. States are likely to experience difficult fiscal conditions for at least the next three years. Both 2009 and 2010 will be difficult because the economy will grow very little. Meanwhile, 2011 also will be difficult because history has shown that the biggest impact on state government budgets has been felt the year after the recession ends. It is also true that these funds are only temporary. Thus, governors will be challenged to develop the correct balance between quick obligation and program stability and efficiency in bridging the gap until economic recovery.

4. The act includes numerous provisions to ensure that the appropriated funds are spent as intended by Congress. As a result, state activities will be subjected to extensive public scrutiny and will have to meet very high standards with respect to transparency and accountability. States also should be prepared for extensive audits by the federal government.

5. The current estimate of total state budget shortfalls over fiscal years (FYs) 2009-2011 is about $250 billion. The ARRA contains some flexible funds to counter these shortfalls, namely $87 billion from Medicaid and about $48 billion in the State Stabilization Fund (for a total of about $135 billion in countercyclical funds). On average, this is just a little over 50 percent of the projected shortfall, which means it will be a big help but no panacea. To bridge the gap, states will have to continue to consolidate and streamline state government.

6. There are three categories of funds in the ARRA – countercyclical or flexible funds, safety net (i.e., Medicaid, Food Stamps, Unemployment Insurance), and direct appropriations – that are all an integral part of the short-run stimulus. These programs must be implemented quickly to have positive macro-economic impacts.

7. The act includes substantial funds for health IT, research and development, alternative energy, and broadband development. These are intended to transform the economy and set the foundation for long-run economic growth. They also provide a major opportunity for governors to aggressively combine various funds to maximize long-run growth and competitiveness. To maximize these opportunities, governors should develop a strategic vision for using the funds and engage their state universities and the private sector.

8. Governors may want to appoint a lead coordinator and a team or task force that includes staff with extensive budget, transparency and accountability expertise. They may also want to appoint other sub-leads for the four major categories of spending, i.e., countercyclical, direct appropriations, safety net, and long-run foundational funds to maximize coordination. The lead coordinator may report directly to the governor. It is critical for this team to develop strategic visions as well as management plans..

9. Governors also may want to develop an aggressive outreach strategy to develop input directly from the public as well as local governments and the private sector. Some states may wish to appoint advisory groups to assist in channeling input and advice.

10. Finally, governors may want to develop a comprehensive strategy to keep citizens informed at each step of the implementation, given continuing economic difficulties and the importance of the stimulus. Developing a sophisticated Internet strategy to share information will be critical.

3656

STATE IMPLEMENTATION OF THE AMERICAN RECOVERY AND REINVESTMENT ACT

ARRA provides about $787 billion to reduce the risk of deflation and to significantly reduce both the decline of GDP and loss of jobs over the next two to three years. It includes $478 billion in increased spending and $300 billion in tax cuts.

Spending Categories

From a state perspective, it is critical to think in terms of the various categories of spending because they have very different intents and many require different management structures, reporting requirements, and even the involvement of state legislatures. Four categories are particularly important.

1. Countercyclical Funds

There are two major categories of the countercyclical funds, which are the most flexible funds. First, there is the $87 billion in estimated federal increase in Medicaid funds that, depending on the future growth of Medicaid, will allow states to reprogram some of their own previous matching funds to other areas to offset planned budget cuts. The second is the $48 billion in the State Fiscal Stabilization Fund, which includes $8.8 billion that can be used for any purpose as well as $39 billion that must be used for elementary and secondary education, higher education, and early childhood. Because education averages about 30 percent of state budgets, it provides considerable flexibility. It is important to note that local school districts will also receive an additional $25 billion in Title I and special education grants for education. The combination of Medicaid and the State Stabilization Fund means that the flexible funds provided under the act total about $135 billion. Additional detail is provided for this category in **Appendix A.**

2. Appropriated Programs

The ARRA contains a significant number of direct appropriations into existing state programs, which run the gamut from $27.5 billion for highways to $1 billion for community services block grants to $3.1 billion for state energy grants. States have little flexibility here and must spend these additional funds in the specified program areas. Many of these grants are formula while others are discretionary or competitive grants. This category includes about 50 programs. In many cases, states need to obligate and spend these funds quickly to create jobs. Additional detail is provided for this category in **Appendix B.**

3. Safety Net

The act does expand on a number of safety net programs such as Medicaid, including transitional Medicaid assistance as well as both increased food stamp benefits and eligibility. Also, it extends eligibility for unemployment insurance. Most of these programs will require states to make decisions regarding new eligibility and benefit levels, which may require state legislative changes as well as major changes to business processes and management information systems. The additional safety net funds will be spent quickly by recipients and, thus, will have a positive macroeconomic impact. Additional detail is provided for this category in **Appendix C**.

These three categories of available funds are all intended to be part of the stimulus portion of the bill, which requires that all changes be enacted quickly and funds obligated rapidly. They all are important in limiting the rate of decline in GDP and job loss.

3657

4. Foundations for Economic Growth

The legislation also targets long-run investments in four areas with substantial potential for both short- and long-term economic growth. These areas are:

- Alternative Energy, Energy Efficiency and Green Jobs;
- Health IT;
- Broadband Development; and
- Research and Development.

To maximize the benefit of these investments provided under the act, states must develop strategic plans to combine the various grants and loans. Achieving the maximum "bang-for-the-buck" requires a coordinated approach, governance structure, and clear strategic goals. The legislation authorizes about $56 billion for these four areas. However, these funds are not in addition to funds described in the three preceding categories. This number is just illustrative of the potential to draw linkages between program funds. Additional detail is provided for this category in **Appendix D.**

Federal Tax Changes

The legislation also contains a number of provisions designed to provide tax rebates or other forms of tax benefits to individuals and businesses. Some of these changes may have an adverse impact on state tax revenue in those states that are still coupled with the federal income tax law. Other changes may affect state and local bonding authority and affect the cost of that borrowing. Those changes most likely to affect states and localities are described in more detail in **Appendix E**.

Challenges and Opportunities

This act presents governors with an almost unprecedented series of challenges and opportunities. While new funds will become available almost immediately, the recession will likely continue to affect state government for the next three years. As a result, the first challenge for governors will be to obligate funds quickly while also ensuring program stability over the 2009-2011 period.

The second challenge for governors will be the need to ensure that state departments and agencies:

- Secure the maximum amount of federal funds available;
- Fulfill transparency and reporting requirements;
- Ensure full and timely use of resources; and
- Avoid waste, fraud, and abuse.

Federal Oversight and Accountability

The legislation contains numerous provisions to ensure that the appropriated funds are spent as intended by the Congress. As a result, state activities will be subjected to extensive public scrutiny and to enhanced oversight by a variety of federal entities, including federal program managers, agency inspectors general, and the Government Accountability Office. Federal efforts will be coordinated by a newly established Accountability and Transparency Board that will be chaired by the President's Chief Performance Officer and include six members designated by the President from among the inspectors general and deputy secretaries. The board is charged with:

- Ensuring that reporting meets applicable standards;
- Verifying compliance with competition requirements; and
- Investigating spending to identify poor contract management, fraud, or waste.

The legislation requires the board to establish a Web site, www.recovery.gov, as a portal or gateway to key information related to the act and to provide a window to other government websites with related information. States will be required to use this Web site to post information on the use of both operational funding and infrastructure investments. The required information is generally more detailed than mandated by current statutes and will include:

- Descriptions of the intended use of the funds;
- Impact on job development and preservation; and
- Copies of individual grants and contracts.

The legislation includes substantial increases in the appropriations for the Government Accountability Office and departmental inspectors general. It requires grantees to provide federal reviewers with unfettered access to state records. It also establishes new whistle-blower protections, including the authority for federal inspectors general to review and decide claims regarding retaliation.

Timing Issues and Constraints

The legislation has numerous requirements regarding obligation of funds for the various programs. Many of these incorporate "use or lose" provisions, which means that funds are reallocated to other states if they are not obligated by the given deadline.

Additional provisions govern the availability of some other funds, such as enhanced Medicaid reimbursement and temporary increases in eligibility and benefit levels for programs assisting needy individuals and families.

The ability of states to meet these timing requirements may be affected by a number of factors, including the need for:

- State legislative authorization to receive and expend funds;
- State legislative authorization for needed program/eligibility changes;
- Modification of business processes and/or information systems;
- Staff capacity; and
- Public support.

Assessing the Management Challenge

Governors should expect to be held fully accountable for their use of these new federal funds. Critics are already questioning state decisions during the period leading up to the recession and will likely be even more vocal as time passes. Governors will be expected to achieve an almost impossible balance between three related objectives:

- Expending funds quickly;
- Targeting funds effectively; and
- Avoiding any appearance of waste, fraud, or abuse.

To best achieve these objectives, governors will need to quickly build or expand a capacity to:

- Plan and establish priorities;
- Obtain necessary legislative and public support;
- Coordinate the interaction between state and federal agencies;
- Oversee state agency implementation, including coordination and collaboration across agency and program lines;
- Expand workforce capacity to develop and monitor a rapid growth in contracts;
- Ensure compliance with grant requirements, including transparency and accountability provisions; and

3659

- Facilitate local government and private sector opportunities to utilize federal grant and loan programs to the maximum extent.

Thoughtful planning and skilled implementation will be required to achieve the full benefit of the opportunities encompassed in the ARRA. Planning is required to ensure that new spending is timed to provide necessary resources over the duration of the recession and initial recovery. Failure to plan early for the next two to three years could worsen the out-year impact because states might be hard pressed to meet service expectations or commitments.

Planning is also vital to ensure that available funds are used strategically to address both the short-term needs of individuals adversely affected by the recession and the opportunities to invest in some critical elements of future economic growth. A thoughtful planning process that involves multiple stakeholders at an early stage can help both to identify priorities and the opportunities to coordinate a variety of funding sources to help achieve broader goals. That process also can help identify and address issues relating to the sustainability of programs and services that may be initiated or expanded under the ARRA.

The full use of new federal funds will likely require quick state legislative action. The heated debates in the Congress underscore the importance of communicating a clear message regarding the importance of timely action to the public and of an aggressive outreach effort to include key legislative interests early in the planning process.

Similarly, a proactive approach by the governor may be needed to identify and maximize opportunities for better collaboration and coordination with direct federal programs and to minimize the restraints inherent is some of the traditional stovepipe programs that are being used to channel increased funding. While department and agency heads will often play a lead role in these efforts, gubernatorial oversight and participation will be critical for their success.

The need to commit new funding quickly will require speedy action by a large number of state departments and agencies. In some cases, new programs must be developed and implemented. In other cases, extraordinary steps may be required to expand the capacity to deliver existing services to additional clients. Implementation plans may need to encompass new regulations, changes in operating procedures, large scale modifications to information systems, enhanced training, and expanded outreach efforts. Governors will want to ensure that their department and agency heads clearly understand their critical roles and to develop procedures to monitor their progress.

The use of new resources available to the states in a number of program areas will require a rapid expansion in state capacity for contracting. An initial focus on the preparing and issuing contracts will need to be followed by intensive contract management to ensure the proper and timely expenditures of funds. Many states may lack the trained manpower needed to carry out these tasks. Governors will want to review the possible need to enhance their contracting and contract management capacity.

Extensive public reporting provisions, particularly the mandate for posting detailed information on a national Web site, provide numerous opportunities for ongoing scrutiny by the public at large and for those hoping to identify waste and misuse. Governors will want to ensure that state departments and agencies are fully meeting these requirements in a timely manner and to monitor the data that is being made available in an effort to anticipate potential problems.

Similarly, governors may want to consider additional ways to identify and monitor potential problems before they can become operational or political issues. Possible steps include a more aggressive state auditing schedule, special waste and abuse hotlines, and an aggressive risk management strategy that encourages participation and truth-telling by all levels of employees and managers.

Finally, governors and their appointees can help local governments, nonprofits, and other segments of the private sector identify and pursue grant and loan opportunities, as well as help coordinate those activities and identify intergovernmental and cross-program opportunities to work together toward a set of common objectives.

Creating a Management Structure

The issues involved in implementing state responsibilities under the ARRA are too important and too complex to leave to "business as usual." They will require extraordinary steps to prepare for and carry out those responsibilities efficiently and effectively. Some of the possible steps include:

- Assigning oversight responsibility to the governor's office;
- Assigning oversight responsibility to an existing planning or budgeting agency;
- Assigning oversight responsibility to the cabinet or to sub-cabinets;
- Delegating responsibility to department and agency heads; and
- Creating new mechanisms to coordinate planning and implementation.

As described in **Appendix F,** more than 20 governors already have taken steps to prepare for the new opportunities and responsibilities resulting from enactment of the ARRA.

Conclusion

Over the next 12 to 36 months, the ARRA will make over $250 billion available to state government or through state governments to individuals. This act provides governors with a unique opportunity to mitigate the impact of the recession while they work to lay the foundation for future economic growth. It also presents governors with an almost unprecedented series of challenges and opportunities.

As already demonstrated, governors are working quickly to identify and respond to those challenges and opportunities in a timely and responsible manner.

3661

APPEDIX A: COUNTERCYCLICAL FUNDS

In the midst of a deepening national recession, states can play a critical role in determining when the economy will start to recover. Because states must balance their budgets every year, when faced with falling revenues from an economic crisis, states must reduce spending or raise taxes—options that further exacerbate the effects of a downturn. Federal investments to stimulate the economy and speed recovery must therefore include flexible funds so that states can postpone planned budget cuts.

The two largest components of state budgets are health care and education. The scope of the financial crisis means these core services are subject to cuts to meet balanced budget requirements. The ARRA contains several provisions to support these services and reduce the need for cuts to these programs. States will receive approximately $87 billion in funding through enhancements of the Federal Medical Assistance Percentage (FMAP), $53.6 billion through a new State Fiscal Stabilization Fund for education and other critical government services, and $26 billion for Title I and special education.

COUNTERCYCLICAL FUNDING

Federal Dept.	Program Title or Description	ARRA Appropriations (in millions of dollars)		Comments
		FY08	*ARRA*	
EDU	State Fiscal Stabilization Fund	----	53,600	Grants to governors based on population to support (1) elementary and secondary education (81.8% of allocation); and (2) public safety and other government services, which may include education (18.2% of allocation). Funds may be used in state FYs 2009, 2010, and 2011. Governors must submit an application including assurances. Funds also reserved for a new state Incentive Fund at Secretary's discretion. Governors may also seek fiscal and regulatory relief from other federal education programs.
EDU	NCLB Title I School Improvement Grants section 1003 (g)	491	3,000	Use funds for 2009-2010 2010-2011 school year
EDU	Special Education IDEA	11,760	12,200	$11.7 billion Part B Grants $500 million Part C grants Use funds for 2009-2010 2010-2011 school year
HHS	Child Support Enforcement	0	1,000	2-year restoration of federal incentive match
HHS-CMS	Enhanced Medicaid FMAP	191 Bil. (FY07)	87,000	27-month provision Broad eligibility MOE Prompt pay enforcement
HHS-CMS	Medicaid Disproportionate Share Hospitals (DSH) payments		500	2.5% increase in FY 2009-2010 allotments

3662

APPENDIX B: APPROPRIATED PROGRAMS

This category of funding will increase direct spending to help create jobs. To ensure that these funds are used quickly, Congress included provisions that require federal agencies to make both formula and competitive funds available to grant recipients on an accelerated schedule. At the same time, the legislation requires grant funds to be obligated by September 30, 2010, unless other timelines are established in the legislation for a specific program. In addition, the legislation also includes program-specific use-it-or-lose-it clauses that require states to obligate available funding within a specified timeframe to prevent reappropriation to other states.

These categorical grants do not provide much state flexibility in determining how the funds can be spent and are therefore unlikely to offset state shortfalls.

In most cases, the use of these funds will not require changes in authorizing legislation at the state level. However, individual programs may require changes in state policies or law, and many states may need legislation to appropriate the increased funds.

DIRECT APPROPRIATIONS

Federal Dept.	Program Title or Description	ARRA Appropriations (in millions of dollars)		Comments
		FY08	*ARRA*	
Comm.	National Telecommunications and Information Administration's (NTIA) Broadband Technology Opportunities Program	N/A	4,350	Available until 9/30/10 for competitive grants to increase broadband deployment; requires 20% match unless waived.
Comm.	NTIA Broadband Mapping grants	N/A	350	Only one grantee per state, designated by the state.
DOT	Office of the Secretary - Supplemental Discretionary Grants for a National Surface Transportation System	N/A	1,500	New discretionary grant program for projects that will have a significant impact on the nation, metro area, or region. Eligible grantees include states, localities, and transit agencies; grants range between $20M-$300M. Not more than 20% of these funds may go to projects in a single state; eligible projects include highway, bridge, public transportation, passenger and freight rail, and port infrastructure. SecDOT to publish criteria for selection process within 90 days of enactment. All applications due to SecDOT within 180 days of enactment. All funding awarded within one year; money must be obligated by recipients by 9/30/10.
EDU	Educational Technology Grants	267.5	650	Formula grants to states and local schools. Use funds for 2009-2010 and 2010-2011 school year.
EDU	Teacher Incentive Fund	97.3	200	Competitive grant to states.

3663

EDU	McKinney-Vento Homeless Act	64	70	Formula grants to states with a pass through to locals.
EDU	Teacher Quality Enhancement	33.7	100	Competitive grant to states.
EDU	Statewide Data Systems (P-16) Alignment	48.3	250	Competitive grant to states. Up to $5 million for state data coordinators and awards for public or private organizations to improve data coordination.
Energy	Weatherization Assistance Grant	227	5,000	Raises eligibility threshold from 150% to 200% of poverty. Increases maximum grant from $2,500 to $6,500. All funds must be obligated by 9/30/10.
Energy	State Energy Program	44	3,100	Requires governors to: work with utilities to implement a general policy that ensures utilities provide financial incentives to help customers use energy more efficiently; adopt residential and commercial building codes that exceed specified standards; give priority to projects that include an expansion of existing energy efficiency programs; expand existing support for renewable energy projects and deployment activities; and cooperate in joint activities among states to support energy efficiency priorities. All funds must be obligated by 9/30/10.
Energy	Energy Efficiency and Conservation Block Grant	0	2,800	The State Energy Programs receive approximately 12% of these funds. Another 16% must be passed through to towns of fewer than 35,000 residents or counties of less than 200,000. All funds must be obligated by 9/30/10.
Energy	Alternative Fueled Vehicles Pilot Program	0	300	Available to states, localities, and metropolitan transportation authorities. Must include a Clean Cities Initiative participant. Funds alternative fuel, fuel cell, and ultra-low-sulfur diesel vehicles, fueling infrastructure, and O&M of vehicles or equipment. All funds must be obligated by 9/30/10.
Energy	Transportation Electrification	0	400	Available to states, localities, and metropolitan transportation authorities. All funds must be obligated by 9/30/10.
EPA	Clean Water State Revolving Loan Fund	700	4,000	The Administrator shall reallocate funds where projects are not under contract or construction within 12 months. Priority funding must be given to projects on the state priority list that can be under construction within 12 months. Further, states must use 50 percent of the funds for grants, negative interest loans, and principal forgiveness. Not less than 20% of the SRFS fund must devoted to specific project types specified in the legislation. Funds cannot be used to purchase land or easements. Funds may be used to buy, refinance, or restructure existing debt obligations incurred on or after 10/01/08. The bill would waive the 20% state match requirement.
EPA	Drinking Water State Revolving Loan Fund	842	2,000	See above.

EPA	Leaking Underground Storage Tanks	107	200	State cost share has been waived. All funds must be obligated by 9/30/10.
EPA	Brownfields	95	100	All funds must be obligated by 9/30/10.
EPA	Superfund Hazardous Waste	1,270	600	States are eligible for grants to conduct site assessments. All funds must be obligated by 9/30/10.
EPA	Diesel Emission Reduction Act	49.5	300	States receive 30% of these funds. All funds must be obligated by 9/30/10.
FAA	Grants-In-Aid for Airports (AIP)	3,500	1,100	Discretionary grant program. Grantees are primarily local governments that run airports. Priority to projects that can be completed within 2 years of enactment.
FHWA	Highway Infrastructure Investment	38,900	27,500 -840 million in top-of-line set-asides	Distributed by formula to states; 30% of state apportionment must be suballocated within the state by population. 3% is set aside for Transportation Enhancements. Funds must be apportioned within 21 days of enactment. States must obligate first 50% within 120 days of apportionment. States given 1 year to obligate remaining 50% of funds. Suballocated funds must be obligated within 1 year.
FRA	High-Speed Rail Corridors and Intercity Passenger Rail	0	8,000	Discretionary grants. SecDOT must submit a "strategic plan" to Congress for the program within 60 days of enactment. SecDOT to issue interim regulations within 120 days of enactment. Projects will not need to be included on a state rail plan. Funds must be obligated by 09/30/12.
FRA	Capital Grants to Amtrak	470	850	$450 million for capital security grants; $850 million for capital grants. No funds may be used for operating costs. Not more than 60%/grants may go toward Northeast Corridor projects.
FTA	Transit Capital Assistance	7,700	6,900	$100 million set aside for discretionary grants to reduce energy consumption of public trans systems. Remaining funds must be apportioned to states and transit agencies by formula within 21 days of enactment. 50% of funds must be obligated within 180 days of apportionment; remaining 50% must be obligated within 1 year.
FTA	Fixed Guideway Infrastructure	1,300	750	Distributed by formula to states and transit agencies. Funds must be apportioned to states and transit agencies within 21 days of enactment. 50% of funds must be obligated within 180 days of apportionment; remaining 50% must be obligated within 1 year.
FTA	Capital Investment Grants	1,560	750	Discretionary grants to transit agencies for approved and existing New Starts and Small Starts projects.
HHS-CDC	Prevention & Wellness fund		1,000	Funds targeted to programs largely at discretion of CDC/HHS
HUD	Public and Indian Housing - Public Housing Capital Fund	2,440	4,000	$3billion to public housing agencies by formula; $1billion to PHAs in competitive grants.
HUD	Community Development Block Grant	3,590	1,000	
HUD	Neighborhood Stabilization Program	N/A	2,000	Competitive grants to states, local government, and nonprofits.

3665

Interior	Wildfire Hazard Reduction	358	500	Increases funds for state and private lands from $48 million to $250 million. The state cost share is waived. All funds must be obligated by 9/30/10.
Justice	Byrne JAG	170.4	2,000	Formula grants; available FY09-FY10.
Justice	Byrne competitive grants	16	225	Competitive grants; available FY09-FY10.
Justice	Violence Against Women	183.8	225	Formula grants; $50 million for transitional housing assistance; available FY09-FY10.
Justice	Victim compensation	0	100	Formula grants; available FY09-FY10.
Labor	WIA Adult Program	849	500	Formula grants to states available for obligation on date of enactment.
Labor	WIA Youth Program	924	1,200	Formula grants to states available for obligation on date of enactment. Funding includes summer jobs programs. Bill changes the eligibility age from 21 to 24 years.
Labor	WIA Dislocated Worker	1,117	1,250	Formula grants to states available for obligation on date of enactment.
Labor	Community Service Employment for Older Americans	522	120	22% of the funds are allocated to States, and 78% go to national organizations that compete to provide services. Funds for existing Community Service Employment Program (CSEP) grantees available for obligation on date of enactment.
Labor	WIA Dislocated Worker National Reserve	402	200	Secretary's discretionary funding for National Emergency Grants (NEGs) to states.
Labor	High Growth and Emerging Industry Grants	0	750	Competitive grants to states for worker training and placement in high growth and emerging industries. $500 million is reserved for energy efficiency and renewable energy sectors.
Labor	State Employment Service	703	400	Formula grants to states. $250 million is designated for Reemployment Service Grants (RES) to serve Unemployment Insurance recipients.
Labor	Extension of Unemployment Benefits	----	----	Provides qualifying individuals with 20 weeks of federally funded extended UI benefits and 13 additional weeks in high unemployment states thru 12/31/2009.
Labor	Weekly Unemployment Insurance Benefit Increase	-----	-----	States voluntarily select to increase state UI benefits by $25/ week/eligible individual thru 12/31/2009. Full reimbursement paid to states by the federal government.
Labor	Unemployment Insurance Modernization	0	500	Special transfers to state UI accounts for FY2009 for administration.
Labor	Unemployment Insurance Modernization	0	7,000	Incentive grants to states for enacting UI reforms. To access incentive funds, the state must currently have specific unemployment laws or enact specific legislative changes.
Labor	State Loans from Federal Unemployment Account	----	----	Temporarily waives interest accrual and interest payments on state loans from the FUA used to pay state Unemployment Insurance benefits. The provision is in effect from the date of enactment to 12/31/10.

3666

Labor	Trade Adjustment Assistance - Training	220	575	Expands TAA and Alternative TAA ("*wage insurance*" for older workers) for qualifying trade-affected individuals and extends reauthorization thru 12/31/2010.
Labor	Trade Adjustment Assistance - Communities	0	180	Discretionary grants to states for a new Sector Partnerships Program and Community College and Career Training Program.
Labor	Trade Adjustment Assistance – Case management	0	350,000 thousand per state	Set grant amount provided to each state for case management services.
USDA	Rural Broadband Infrastructure: USDA – Rural Utilities Service	6.4	2,500	Loans, grants, and loan guarantees for open access broadband infrastructure projects that serve rural areas primarily; projects funded are ineligible for funding under the Broadband Technology Opportunities Program; states are specifically eligible for grants - historically the money for loan and loan guarantees has been designated for other entities. 15% match requirement for grants.
VA	State Extended Care Facilities Grants	175	150	Competitive grants; available FY09-FY10.

3667

APPENDIX C: SAFETY NET

The ARRA provides significant funding increases for a number of human services, health, employment and other safety net programs. This additional support is intended to provide relief for lower-income families and others hardest hit by the recession. In addition, the funding will assist fiscally constrained state and local governments as they manage administrative and operational challenges stemming from the rise in demand for programs and services. Economists agree that increased assistance to low-income families has the most immediate stimulative effect on the economy because those with the least amount of financial security traditionally engage in more immediate consumption and are less likely to divert those resources into savings or debt reduction. Safety net programs also provide education and training for America's workforce, ensuring that there is a supply of qualified workers as new jobs become available.

SAFETY NET PROGRAMS

Federal Dept.	Program Title or Description	ARRA Appropriations (in millions of dollars)		Comments
		FY08	*ARRA*	
AG	Supplemental Nutrition Assistance Program (SNAP)	39,700	20,000	13.6% benefit increase, plus grants to states for administration ($145 million for FY09 and $150 million for FY10.
EDU	Rehabilitation Services and Assistance	3,280	680	540 million for state grants under part B of title I of the Rehabilitation Act $140 million for state grants for independent living under parts B and C of chapter 1 and chapter 2 of title VII of the Rehabilitation Act
HHS-ACF	Temporary Assistance for Needy Families (TANF)	16,500	5,000	Grants to states experiencing increases in caseload or expenditures and 2-year extension of supplemental grants.
HHS-ACF	Child Care Development Block Grant (CCDBG)	2,000	2,000	
HHS-ACF	Community Services Block Grant (CSBG)	654	1,000	
HHS-CMS	Transitional Medical Assistance (TMA) extension	1,000	1,300	Extension of otherwise expiring current law for 7/1/09-12/30/10. State legislative approval may be needed.
HHS-CMS	Qualifying Individuals (QI-1) extension	500	550	Extension of otherwise expiring current law for 1/1/10-12/30/10
HUD	Public and Indian Housing - Public Housing Capital Fund	2,440	4,000	$3billion to public housing agencies by formula; $1billion to PHAs in competitive grants.
HUD	HOME Investment Partnerships	1,700	2,250	
HUD	Homelessness Prevention Fund	1,580	1,500	
HUD	Neighborhood Stabilization Program	N/A	2,000	Competitive grants to states, local government, and nonprofits.
Labor	Extension of Unemployment Benefits			20 weeks of federally funded extended benefits; 13 additional weeks in high unemployment states.

3668

APPENDIX D: FOUNDATIONS FOR ECONOMIC GROWTH

Introduction

As mentioned, AARA provides states an unprecedented opportunity to build the types of foundations that are critical to economic growth and competitiveness in a global economy. These foundations are important because they provide the basis for long-run job and productivity growth. The four areas are described briefly below. Every state should strongly consider establishing a strategic planning effort for each area to maximize public and private investments; avoid duplication or conflicts; and coordinate activities across a wide array of institutions, including businesses, universities, community colleges, and research centers.

Alternative Energy, Energy Efficiency, and Green Jobs

- Numerous alternative energy, energy efficiency, and green jobs programs are included in the ARRA, totaling some $25 Billion, not including funds for school construction. They fall mainly under the Department of Energy but also involve the departments of Education, Labor, and Housing and Urban Development. They span the areas of alternative energy development; energy efficiency improvements to homes, schools, and industry; smart grid and transmission enhancements; fossil energy R&D; alternative fueled vehicles; and workforce programs to promote green jobs (i.e., careers in energy efficiency and alternative energy). States would be eligible recipients in 14 of the 20 programs identified. Remaining programs target businesses, universities, or non-state entities that could support state efforts and may call for state-sponsored outreach and technical assistance efforts. In addition, the legislation contains a dozen tax credit, bond, and loan guarantee measures supporting alternative energy development, energy conservation, energy research, and development.

- Many of the ARRA provisions entail enhancements to existing programs; however, some of the enhancements represent substantial increases to current funding and will require expansions, as in the case of State Energy Program (a 70-fold increase over FY08 appropriation) and the Weatherization Program (a 20-fold increase over FY08 appropriation). In addition, there are some new programs like the Energy Efficiency and Conservation Block Grants that will need to be established. The most significant flexible addition would be funds provided to the State Energy Program, which can be utilized to pursue a wide range of activities.

- Governors will face three major issues specific to this area of funding:
    - First, governors may want to consider whether the current structure of their state energy office needs to be enhanced, including elevating it to a cabinet level, as has been done in about a dozen states. Through the ARRA, state energy offices will receive considerable increases in funding and responsibility. In addition, they will need to be able to coordinate state efforts across a wide range of agencies and stakeholders and with local entities.
    - Second, governors may need to prioritize some portion of the more flexible energy funding and leverage existing programs to assist with energy workforce development. Successfully spending the ARRA funds will hinge on having an adequate number of trained energy workers available to conduct energy audits; install renewable energy devices, insulation, advanced lighting, HVAC, and other technologies; and perform operations and maintenance functions. This is in addition to the upstream demands on manufacturing that will be generated. Some ARRA funds are available to support workforce development, but demand already outpaces supply in some states, and the rise in demand nationally will further strain the system.
    - Third, to receive a portion of the energy related funding, governors will need to provide written assurances that the appropriate state or local bodies in their state are pursuing actions on electricity sector rate "decoupling" (adjusting utility profits to be independent of electricity sold) and state energy building code enhancements.. This will entail the governor taking actions

3669

such as petitioning the state public utility regulatory body to implement decoupling and encouraging the state legislature to upgrade state residential and commercial energy building codes.

Health Information Technology (Health IT)

- The ARRA has three major components relating to the development of health IT that will be of interest to states: (1) a grant program for states (or state-designated entities) to plan for and help build an electronic health records (HER) exchange; (2) a loan program, to be administered by states, to help providers purchase the equipment they need to "plug into" the exchange; and (3) financial assistance to providers through Medicaid for the purchase and use of health IT equipment, with no matching funds required.

- The bill gives the states a great deal of responsibility for planning and helping create a nationwide EHR exchange. States will need to develop capacity in their Medicaid programs and other agencies to deliver and oversee the provider payments for EHRs.

- States receiving health IT grants will need to move quickly to create a business and oversight plan for the exchange—which includes choosing how patient records will be transmitted, stored, and protected and how the exchange will be financed. It appears that the grants could also be used to purchase and house the exchange directly or support industry-based construction.

- Governors will need to focus on three major activities to get the full advantage of this funding: (1) Agency capacity and potential legislation will be needed to get the Medicaid-based incentives implemented and ensure accountability; (2) states should immediately begin planning with stakeholders how to govern an EHR exchange and how to ensure standards-based purchases by providers; and (3) states will need to work with HHS and begin their own planning efforts to design grant and loan programs that reflect state interests and contribute to other health care reform efforts.

Broadband

- The ARRA includes $7.2 billion for broadband-related provisions. Of this amount, $2.5 billion will flow through the U.S. Department of Agriculture's Rural Utilities Services Distance Learning, Telemedicine, and Broadband Program to be used for building broadband infrastructure in rural areas without sufficient access to high-speed broadband service. The remaining amount, $4.7 billion, will flow through the U.S. Department of Commerce's National Telecommunications and Information Administration (NTIA) Broadband Technology Opportunities Program (TOP) to provide funds for accelerating broadband deployment in unserved and underserved communities and to strategic institutions that are likely to create jobs or provide significant public benefits.

- Given the economic impact of investing in broadband, these programs could be very beneficial to states in terms of economic development. The Information Technology & Innovation Foundation estimates that 498,000 total jobs will be created from a $10 billion investment in broadband infrastructure. Connected Nation projects that a 7 percent rise in broadband adoption would create 2.4 million U.S. jobs, with an annual economic benefit of $134 billion.

- States are to use grant funds primarily for building out broadband services to rural, unserved, and underserved communities; expand awareness, education, and training; and identify and track the availability and adoption of broadband services. NTIA is tasked with developing and maintaining a nationwide broadband inventory map.

- Governors will need to move quickly in the following areas:
    - Create a Strategic Plan: Because states are only one eligible entity under these grant programs, governors should quickly designate a broadband advisor or agency to assemble potential grantees and other stakeholders. These stakeholders will create a "high-level" strategic plan for broadband deployment to coordinate investments. Many governors have already created a broadband advisory group. The task is to ensure the right people are included and that the governor assigns the strategic planning assignment with the goal of expanding broadband to rural areas. States should utilize existing public-private partnerships and/or form new ones that will be most effective in building out broadband service. It is also important for stakeholders to assess rural accessibility in relation to what service is provided to urban/suburban areas. This will help to coordinate existing investments with those provided by the stimulus.
    - Create a Statewide Broadband Inventory Map: With funds available through the grant programs, governors should task the broadband advisor with creating a state broadband availability map to identify unserved and underserved areas. Governors can use this map to inform decisionmaking about where the investments in broadband should be focused. States should quickly gather existing availability information from service providers that will feed into the strategic planning.

Research and Development

- Because most states have strategies to build innovation capacity to spur long-term economic growth, they should be aware that ARRA includes increased federal investment in research and development, research equipment, and research facilities. Overall, there may be as much as $21.5 billion in new federal R&D money, including $18 billion for research and $3.5 billion for R&D facilities. The majority of this money will be available to universities and research institutes and awarded through a competitive process run by federal agencies such as National Science Foundation, National Institutes of Health, and Department of Energy.

- The key requirements and issues for states to consider include:
    - States may want to use the additional R&D and infrastructure funding to enhance the strengths of their universities and research institutes or seek to build new institutes where the opportunity exists.
    - States will need to act quickly. Nearly all of the funding will be awarded within 120 days of when the President signs the bill into law, with staggered deadlines of 30 days for formula funds, 90 days for competitive grants, and 120 days for competitive grants in brand-new programs.
    - As a result, governors may want to coordinate in-state efforts by universities, research institutes, and industry to pursue these new funds.
    - No state match is required for research grants; state or university matching is required for most construction and equipment grants.

APPENDIX E: FEDERAL TAX CHANGES

Nearly 40 percent of the ARRA is dedicated to tax law changes to promote private investment, provide tax relief to individuals, and loosen credit markets. Although the tax provisions deal with federal taxes, those states coupled with federal income tax laws may experience revenue losses from some of the tax law changes. The act also includes provisions meant to address the difficulty states are experiencing in raising capital. Even highly rated public issuers now wait longer and offer higher interest rates than before to attract investors. Several provisions in the ARRA are intended to boost the public bond market through new tax credit programs and changes to existing bond programs that could loosen credit markets and encourage more public issuers to go to market.

TAXES/BONDS				
Federal Dept.	**Program Title or Description**	**ARRA Appropriations (in millions of dollars)**		**Comments**
		FY08	***ARRA***	
TAX PROVISIONS				
INDIVIDUALS				
IRS	Sales Tax Deduction for Vehicle Purchases		1,684	Provides all taxpayers with a deduction for State and local sales and excise taxes paid on the purchase of new cars, light truck, recreational vehicles, and motorcycles through 2009.
IRS	Temporary Suspension of taxation of unemployment benefits		4,740	Temporarily suspends federal income tax on the first $2,400 of unemployment benefits per recipient.
HOUSING				
IRS	Low-income housing grants in lieu of tax credits		3,006	Permits states to elect to substitute a portion of low-income housing credit allocation for 2009 for grants. State housing agencies would receive a grant equal to up to 85% of 40% of the state's low-income housing tax credit allocation in lieu of the low-income housing tax credits they would have received.
BUSINESS				
IRS	Extension/bonus depreciation		5,074	Extends authority for business to recover the costs of capital expenditures made in 2009 by allowing them to immediately write off 50% of cost.
IRS	Extend/enhanced small business expensing		41	Last year, Congress temporarily increased the amount that small businesses could write-off for capital expenditures incurred in 2008 to $250,000 and increased the phase-out threshold for 2008 to $800,000. The act extends these temporary increases for capital expenditures incurred in 2009.
IRS	5Y NOL carry-back		947	For 2008 and 2009, the act extends the maximum carryback period for net operating losses from 2 years to 5 years.

STATE & LOCAL	*Bond Provisions Generally*			*Note: The Act mandates that wage requirements under the* Davis-Bacon Act *apply to the Recovery Zone Economic Development Bonds, Qualified Zone Academy Bonds, Qualified School Construction Bonds, Clean Renewable Energy Bonds and the Qualified Energy Conservation Bonds.*
IRS	De Minimus Safe Harbor Exception		3234	Allows banks to deduct 80% of the carrying costs of purchasing all types of tax exempt bonds issued in 2009 and 2010 provided no more than 2% of a bank's assets comprise those bonds..
IRS	"Qualified Small Issuer" Exception			Encourages financial institutions to invest in tax-exempt bonds issued in 2009 and 2010 by raising the annual issuance threshold for qualified small issuers to $30 million from $10 million.
IRS	Temporary Modification of AMT Limit		555	Eliminates the application of the AMT on all bonds issued in 2009 and 2010, including refunding of bonds that were initially issued after 2003.
IRS	Withholding Tax on Government Contractors		291	Delays until 2012 law requiring withholding at a three percent rate on certain payments to persons providing property or services made by federal, state, and local governments.
IRS	AMT exclusion/all Private activity tax exempt bonds		555	Excludes interest earned on all private activity tax exempt bonds issued during 2009 and 2010, including the refunding of bonds issued after 2003, from the alternative minimum tax (AMT).
IRS	Qualified School Construction Bonds		9,970	Creates new category/tax credit bonds to finance repair/renovation (existing schools) and build new public schools; 11 billion annual allotment for 2009-2010 (60%/states; 40%/large school districts).
IRS	Qualified Zone Activity Bonds (QZABs)		1,000	Increases to $1.4 billion annual issuing authority (2009-2010)/states for bonds to finance repair/renovation; financing new construction is ineligible use.
IRS	Taxable Bond Option for state/locals (Build America Bonds)		4,348	New option for states to issue taxable rather than tax-exempt bonds for 2009 and 2010; issuer may opt to receive direct federal payment (35%/interest costs) for 2009 and 2010 issues in lieu of interest subsidy/35% refundable tax credit to investor.

IRS	Recovery Zone Bonds		5,371	New taxable (Recovery Zone Economic Development bonds/$10 billion annual allocation) and tax-exempt (Recovery Zone Facility private activity/$15 billion annual allocation) categories for use in "recovery zones," which are designated areas with significant unemployment, poverty, and home foreclosure rates. Both bond categories allocated to the states in proportion to their respective 2008 job losses, with sub-allocations to counties and large municipalities within a state also made based on relative job losses. States would receive a minimum allocation of .9%. Bonds must be issued by01/01/11. For taxable bonds state issuer would receive a 45 percent reimbursement of interest paid, with no option to apply the credit to investors.
ENERGY	Clean renewable energy bonds (CREB) for State and local governments		578	Increases annual allotment by $1.6 billion for existing tax credit authority used to finance renewable energy facilities. States, local, and tribal governments eligible for one-third of annual allocation; remainder to public power providers and electric cooperatives.
IRS	Energy Conservation Bonds		803	Increases annual allotment by $2.4 billion for existing tax credit bond authority for green community programs, including financing loans to homeowners for energy retrofits.
IRS	Addition of Permanent Sequestration Requirement to CO2 Capture Tax Credit		0	Requires that any taxpayer claiming the $10 credit per ton for carbon dioxide captured and transported for use in enhanced oil recovery must also ensure that such carbon dioxide is permanently stored in a geologic formation.

APPENDIX F: EXAMPLES OF GOVERNORS' ACTIONS TO MANAGE AND COORDINATE STATE RESPONSES TO THE ARRA

- Alabama – Governor Bob Riley has hired two former state finance officials to oversee the stimulus money.

- California – Every agency is part of a working group to constantly monitor the implementation of the stimulus.

- Colorado – Eleven transportation commissioners will determine which projects to fund based, in part by recommendations for local governments and planners.

- Connecticut – Governor Rell has created a working group of municipal officials, business leaders, legislators and state agencies to determine the final list of stimulus projects.

- Florida – Governor Crist has announced that he will chair a sixteen member Federal Stimulus Working Group that will include the lieutenant governor, the governor's chief of staff, the state budget director and twelve state agency heads. The group has been directed to begin reviewing the best use of federal stimulus funds and to plan for the distribution of the monies by identifying critical program and infrastructure needs.

- Indiana – Governor Daniels has created two parallel efforts. The state OMB director will head a team to analyze formula spending. The Secretary of Commerce and the Chairman of the Economic Development Corporation will prepare a strategy for competitive grants. In addition, a task force of key department and agency heads and the governor's policy director will meet regularly with the governor to provide up-to-date information.

- Kansas – Governor Sebelius has assembled a group of key state officials, including four representatives appointed by state legislative leaders, to better prepare Kansas for the use of new federal funds. The group is named The American Recovery and Reinvestment Act Advisory Group. They have also launched a web site.

- Maine – Governor John Baldacci says he will seek guidance from lawmakers and, while legislative input is not required, he plans to provide legislative leaders with an opportunity to review a plan for spending the stimulus.

- Massachusetts - Governor Patrick appointed Jeffrey Simon, a senior real estate professional as Director of Infrastructure Reinvestment and promised comprehensive oversight and unprecedented transparency.

- Minnesota – Governor Pawlenty has named state Management and Budget Director Tom Hanson to serve as Federal Stimulus Coordinator.

- Missouri – Governor Nixon appointed twenty-six members to a new Economic Stimulus Coordination Council.

- New Hampshire – Governor John Lynch has tapped a former state attorney general to manage stimulus funds.

- New Jersey – Governor Corzine has formed a federal stimulus working group to spearhead New Jersey's efforts in maximizing federal economic stimulus aid and a second group to monitor job creation resulting from his Economic Assistance and Recovery Plan.

- New York – Governor Paterson has created the New York State Economic Recovery and Reinvestment Cabinet to manage the development and state and local infrastructure projects financed through the ARRA. The Cabinet will oversee the distribution of federal funds throughout the state for projects involving transportation, water and sewer, energy, technology and other infrastructure. It will work closely with local governments to ensure federal dollars reach critical projects and put people to work as quickly as possible.

- North Carolina – Governor Perdue has established the Office of Economic Recovery & Reinvestment to coordinate and track North Carolina's handling of federal stimulus funds as well as state-level economic recovery initiatives. The office will be led by Dempsey Benton, former secretary of the state Health and Human Services Department.

- North Dakota – Governor Hoeven plans to hire a senior staff member to oversee the implementation of stimulus funds.

- Ohio – Governor Strickland has created an Infrastructure Czar and has appointed the president and CEO of the Cleveland Foundation to that new position.

- Oklahoma – Governor Henry is considering an executive order assigning oversight responsibilities to a task force comprised of affected state agencies, private sector representatives and, possibly, members of the legislature. The governor is also considering working with the State Auditor in establishing reporting systems and providing public access to allow for citizen review of the implementation process.

- Oregon - Governor Ted Kulongoski created a new public-private advisory council called The Oregon Way Advisory Group to use Oregon's green advantage to maximize potential grants from the federal economic recovery package to create jobs immediately and for the long term.

- Puerto Rico – Governor Fortuno is working to centralize oversight by selecting one state agency to serve as "project manager" and authorizing that agency to subcontract with private firms to manage specific program components and to coordinate reporting efforts.

- Utah – Governor Huntsman's Office of Planning and Budget is coordinating planning for the distribution of federal funds. It has solicited suggestions of the best use of funds from state agencies and from outside of state government.

- Vermont – Governor Douglas has created a Vermont Federal Recovery Office to expedite projects when federal funds are received.

- Virginia – Governor Tim Kaine is taking a grass-roots approach to planning for the stimulus package and has set up a website seeking input from citizens, local governments and community groups.

- Washington – Governor Gregoire has named a former head of the Office of Financial Management, Dick Thompson, to lead state efforts to protect existing jobs and accelerate job creation.

- Wisconsin – Governor Doyle created an Office of Recovery and Reinvestment. Gary Wolter, President and CEO of Madison Gas and Electric will head the office on a voluntary basis.

TITLE VI—DEPARTMENT OF HOMELAND SECURITY

OFFICE OF THE UNDER SECRETARY FOR MANAGEMENT

For an additional amount for the "Office of the Under Secretary for Management", $200,000,000 for planning, design, construction costs, site security, information technology infrastructure, fixtures, and related costs to consolidate the Department of Homeland Security headquarters: *Provided*, That no later than 60 days after the date of enactment of this Act, the Secretary of Homeland Security, in consultation with the Administrator of General Services, shall submit to the Committees on Appropriations of the Senate and the House of Representatives a plan for the expenditure of these funds.

OFFICE OF INSPECTOR GENERAL

For an additional amount for the "Office of Inspector General", $5,000,000, to remain available until September 30, 2012, for oversight and audit of programs, grants, and projects funded under this title.

U.S. CUSTOMS AND BORDER PROTECTION

SALARIES AND EXPENSES

For an additional amount for "Salaries and Expenses", $160,000,000, of which $100,000,000 shall be for the procurement and deployment of non-intrusive inspection systems; and of which $60,000,000 shall be for procurement and deployment of tactical communications equipment and radios: *Provided*, That no later than 45 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a plan for expenditure of these funds.

BORDER SECURITY FENCING, INFRASTRUCTURE, AND TECHNOLOGY

For an additional amount for "Border Security Fencing, Infrastructure, and Technology", $100,000,000 for expedited development and deployment of border security technology on the Southwest border: *Provided*, That no later than 45 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a plan for expenditure of these funds.

CONSTRUCTION

For an additional amount for "Construction", $420,000,000 solely for planning, management, design, alteration, and construction of U.S. Customs and Border Protection owned land border ports of entry: *Provided*, That no later than 45 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a plan for expenditure of these funds.

U.S. Immigration and Customs Enforcement

AUTOMATION MODERNIZATION

For an additional amount for "Automation Modernization", $20,000,000 for the procurement and deployment of tactical communications equipment and radios: *Provided,* That no later than 45 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a plan for expenditure of these funds.

Transportation Security Administration

AVIATION SECURITY

For an additional amount for "Aviation Security", $1,000,000,000 for procurement and installation of checked baggage explosives detection systems and checkpoint explosives detection equipment: *Provided,* That the Assistant Secretary of Homeland Security (Transportation Security Administration) shall prioritize the award of these funds to accelerate the installations at locations with completed design plans: *Provided further,* That no later than 45 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a plan for the expenditure of these funds.

Coast Guard

ACQUISITION, CONSTRUCTION, AND IMPROVEMENTS

For an additional amount for "Acquisition, Construction, and Improvements", $98,000,000 for shore facilities and aids to navigation facilities; for priority procurements due to materials and labor cost increases; and for costs to repair, renovate, assess, or improve vessels: *Provided,* That no later than 45 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a plan for the expenditure of these funds.

ALTERATION OF BRIDGES

For an additional amount for "Alteration of Bridges", $142,000,000 for alteration or removal of obstructive bridges, as authorized by section 6 of the Truman-Hobbs Act (33 U.S.C. 516): *Provided,* That the Coast Guard shall award these funds to those bridges that are ready to proceed to construction: *Provided further,* That no later than 45 days after the date of enactment of this Act, the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a plan for the expenditure of these funds.

FEDERAL EMERGENCY MANAGEMENT AGENCY

STATE AND LOCAL PROGRAMS

For an additional amount for grants, $300,000,000, to be allocated as follows:

(1) $150,000,000 for Public Transportation Security Assistance and Railroad Security Assistance under sections 1406 and 1513 of the Implementing Recommendations of the 9/11 Commission Act of 2007 (Public Law 110–53; 6 U.S.C. 1135 and 1163).

(2) $150,000,000 for Port Security Grants in accordance with 46 U.S.C. 70107, notwithstanding 46 U.S.C. 70107(c).

FIREFIGHTER ASSISTANCE GRANTS

For an additional amount for competitive grants, $210,000,000 for modifying, upgrading, or constructing non-Federal fire stations: *Provided*, That up to 5 percent shall be for program administration: *Provided further*, That no grant shall exceed $15,000,000.

DISASTER ASSISTANCE DIRECT LOAN PROGRAM ACCOUNT

Notwithstanding section 417(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, the amount of any such loan issued pursuant to this section for major disasters occurring in calendar year 2008 may exceed $5,000,000, and may be equal to not more than 50 percent of the annual operating budget of the local government in any case in which that local government has suffered a loss of 25 percent or more in tax revenues: *Provided*, That the cost of modifying such loans shall be as defined in section 502 of the Congressional Budget Act of 1974 (2 U.S.C. 661a).

EMERGENCY FOOD AND SHELTER

For an additional amount to carry out the emergency food and shelter program pursuant to title III of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11331 et seq.), $100,000,000: *Provided*, That total administrative costs shall not exceed 3.5 percent of the total amount made available under this heading.

GENERAL PROVISIONS—THIS TITLE

SEC. 601. Notwithstanding any other provision of law, the President shall establish an arbitration panel under the Federal Emergency Management Agency public assistance program to expedite the recovery efforts from Hurricanes Katrina and Rita within the Gulf Coast Region. The arbitration panel shall have sufficient authority regarding the award or denial of disputed public assistance applications for covered hurricane damage under section 403, 406, or 407 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170b, 5172, or 5173) for a project the total amount of which is more than $500,000.

SEC. 602. The Administrator of the Federal Emergency Management Agency may not prohibit or restrict the use of funds designated under the hazard mitigation grant program for damage caused by Hurricanes Katrina and Rita if the homeowner who is an applicant for assistance under such program commenced work

otherwise eligible for hazard mitigation grant program assistance under section 404 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170c) without approval in writing from the Administrator.

SEC. 603. Subparagraph (E) of section 34(a)(1) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2229a(a)(1)(E)) shall not apply with respect to funds appropriated in this or any other Act making appropriations for fiscal year 2009 or 2010 for grants under such section 34.

SEC. 604. (a) REQUIREMENT.—Except as provided in subsections (c) through (g), funds appropriated or otherwise available to the Department of Homeland Security may not be used for the procurement of an item described in subsection (b) if the item is not grown, reprocessed, reused, or produced in the United States.

(b) COVERED ITEMS.—An item referred to in subsection (a) is any of the following, if the item is directly related to the national security interests of the United States:

(1) An article or item of—

(A) clothing and the materials and components thereof, other than sensors, electronics, or other items added to, and not normally associated with, clothing (and the materials and components thereof);

(B) tents, tarpaulins, covers, textile belts, bags, protective equipment (including but not limited to body armor), sleep systems, load carrying equipment (including but not limited to fieldpacks), textile marine equipment, parachutes, or bandages;

(C) cotton and other natural fiber products, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric (including all textile fibers and yarns that are for use in such fabrics), canvas products, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles); or

(D) any item of individual equipment manufactured from or containing such fibers, yarns, fabrics, or materials.

(c) AVAILABILITY EXCEPTION.—Subsection (a) does not apply to the extent that the Secretary of Homeland Security determines that satisfactory quality and sufficient quantity of any such article or item described in subsection (b)(1) grown, reprocessed, reused, or produced in the United States cannot be procured as and when needed at United States market prices. This section is not applicable to covered items that are, or include, materials determined to be non-available in accordance with Federal Acquisition Regulation 25.104 Nonavailable Articles.

(d) DE MINIMIS EXCEPTION.—Notwithstanding subsection (a), the Secretary of Homeland Security may accept delivery of an item covered by subsection (b) that contains non-compliant fibers if the total value of non-compliant fibers contained in the end item does not exceed 10 percent of the total purchase price of the end item.

(e) EXCEPTION FOR CERTAIN PROCUREMENTS OUTSIDE THE UNITED STATES.—Subsection (a) does not apply to the following:

(1) Procurements by vessels in foreign waters.

(2) Emergency procurements.

(f) EXCEPTION FOR SMALL PURCHASES.—Subsection (a) does not apply to purchases for amounts not greater than the simplified

acquisition threshold referred to in section 2304(g) of title 10, United States Code.

(g) APPLICABILITY TO CONTRACTS AND SUBCONTRACTS FOR PROCUREMENT OF COMMERCIAL ITEMS.—This section is applicable to contracts and subcontracts for the procurement of commercial items not withstanding section 34 of the Office of Federal Procurement Policy Act (41 U.S.C. 430), with the exception of commercial items listed under subsections (b)(1)(C) and (b)(1)(D) above. For the purposes of this section, "commercial" shall be as defined in the Federal Acquisition Regulation—Part 2.

(h) GEOGRAPHIC COVERAGE.—In this section, the term "United States" includes the possessions of the United States.

(i) NOTIFICATION REQUIRED WITHIN 7 DAYS AFTER CONTRACT AWARD IF CERTAIN EXCEPTIONS APPLIED.—In the case of any contract for the procurement of an item described in subsection (b)(1), if the Secretary of Homeland Security applies an exception set forth in subsection (c) with respect to that contract, the Secretary shall, not later than 7 days after the award of the contract, post a notification that the exception has been applied on the Internet site maintained by the General Services Administration known as FedBizOps.gov (or any successor site).

(j) TRAINING DURING FISCAL YEAR 2009.—

(1) IN GENERAL.—The Secretary of Homeland Security shall ensure that each member of the acquisition workforce in the Department of Homeland Security who participates personally and substantially in the acquisition of textiles on a regular basis receives training during fiscal year 2009 on the requirements of this section and the regulations implementing this section.

(2) INCLUSION OF INFORMATION IN NEW TRAINING PROGRAMS.—The Secretary shall ensure that any training program for the acquisition workforce developed or implemented after the date of the enactment of this Act includes comprehensive information on the requirements described in paragraph (1).

(k) CONSISTENCY WITH INTERNATIONAL AGREEMENTS.— This section shall be applied in a manner consistent with United States obligations under international agreements.

(l) EFFECTIVE DATE.—This section applies with respect to contracts entered into by the Department of Homeland Security 180 days after the date of the enactment of this Act.

TITLE VII—INTERIOR, ENVIRONMENT, AND RELATED AGENCIES

DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

For an additional amount for "Management of Lands and Resources", for activities on all Bureau of Land Management lands including maintenance, rehabilitation, and restoration of facilities, property, trails and lands and for remediation of abandoned mines and wells, $125,000,000.

CAPITAL INVESTMENT FUND

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "Capital Investment Fund", $290,000,000, for information technology security and upgrades to support mission-critical operations, of which up to $38,000,000 shall be transferred to, and merged with, funds made available under the heading "Capital Investment Fund" of the United States Agency for International Development: *Provided*, That the Secretary of State and the Administrator of the United States Agency for International Development shall coordinate information technology systems, where appropriate, to increase efficiencies and eliminate redundancies, to include co-location of backup information management facilities, and shall submit to the Committees on Appropriations within 90 days of enactment of this Act a detailed spending plan for funds appropriated under this heading.

OFFICE OF INSPECTOR GENERAL

For an additional amount for "Office of Inspector General" for oversight requirements, $2,000,000.

INTERNATIONAL COMMISSIONS

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

CONSTRUCTION

(INCLUDING TRANSFER OF FUNDS)

For an additional amount for "Construction" for the water quantity program to meet immediate repair and rehabilitation requirements, $220,000,000: *Provided*, That up to $2,000,000 may be transferred to, and merged with, funds available under the heading "International Boundary and Water Commission, United States and Mexico—Salaries and Expenses": *Provided further*, That the Secretary of State shall submit to the Committees on Appropriations within 90 days of enactment of this Act a detailed spending plan for funds appropriated under this heading.

TITLE XII—TRANSPORTATION AND HOUSING AND URBAN DEVELOPMENT, AND RELATED AGENCIES

DEPARTMENT OF TRANSPORTATION

OFFICE OF THE SECRETARY

SUPPLEMENTAL DISCRETIONARY GRANTS FOR A NATIONAL SURFACE TRANSPORTATION SYSTEM

For an additional amount for capital investments in surface transportation infrastructure, $1,500,000,000, to remain available through September 30, 2011: *Provided*, That the Secretary of Transportation shall distribute funds provided under this heading as discretionary grants to be awarded to State and local governments or transit agencies on a competitive basis for projects that will have a significant impact on the Nation, a metropolitan area,

or a region: *Provided further,* That projects eligible for funding provided under this heading shall include, but not be limited to, highway or bridge projects eligible under title 23, United States Code, including interstate rehabilitation, improvements to the rural collector road system, the reconstruction of overpasses and interchanges, bridge replacements, seismic retrofit projects for bridges, and road realignments; public transportation projects eligible under chapter 53 of title 49, United States Code, including investments in projects participating in the New Starts or Small Starts programs that will expedite the completion of those projects and their entry into revenue service; passenger and freight rail transportation projects; and port infrastructure investments, including projects that connect ports to other modes of transportation and improve the efficiency of freight movement: *Provided further,* That of the amount made available under this paragraph, the Secretary may use an amount not to exceed $200,000,000 for the purpose of paying the subsidy and administrative costs of projects eligible for federal credit assistance under chapter 6 of title 23, United States Code, if the Secretary finds that such use of the funds would advance the purposes of this paragraph: *Provided further,* That in distributing funds provided under this heading, the Secretary shall take such measures so as to ensure an equitable geographic distribution of funds and an appropriate balance in addressing the needs of urban and rural communities: *Provided further,* That a grant funded under this heading shall be not less than $20,000,000 and not greater than $300,000,000: *Provided further,* That the Secretary may waive the minimum grant size cited in the preceding proviso for the purpose of funding significant projects in smaller cities, regions, or States: *Provided further,* That not more than 20 percent of the funds made available under this paragraph may be awarded to projects in a single State: *Provided further,* That the Federal share of the costs for which an expenditure is made under this heading may be up to 100 percent: *Provided further,* That the Secretary shall give priority to projects that require a contribution of Federal funds in order to complete an overall financing package, and to projects that are expected to be completed within 3 years of enactment of this Act: *Provided further,* That the Secretary shall publish criteria on which to base the competition for any grants awarded under this heading not later than 90 days after enactment of this Act: *Provided further,* That the Secretary shall require applications for funding provided under this heading to be submitted not later than 180 days after the publication of such criteria, and announce all projects selected to be funded from such funds not later than 1 year after enactment of this Act: *Provided further,* That projects conducted using funds provided under this heading must comply with the requirements of subchapter IV of chapter 31 of title 40, United States Code: *Provided further,* That the Secretary may retain up to $1,500,000 of the funds provided under this heading, and may transfer portions of those funds to the Administrators of the Federal Highway Administration, the Federal Transit Administration, the Federal Railroad Administration and the Maritime Administration, to fund the award and oversight of grants made under this heading.

FEDERAL AVIATION ADMINISTRATION

SUPPLEMENTAL FUNDING FOR FACILITIES AND EQUIPMENT

For an additional amount for necessary investments in Federal Aviation Administration infrastructure, $200,000,000, to remain available through September 30, 2010: *Provided*, That funding provided under this heading shall be used to make improvements to power systems, air route traffic control centers, air traffic control towers, terminal radar approach control facilities, and navigation and landing equipment: *Provided further*, That priority be given to such projects or activities that will be completed within 2 years of enactment of this Act: *Provided further*, That amounts made available under this heading may be provided through grants in addition to the other instruments authorized under section 106(l)(6) of title 49, United States Code: *Provided further*, That the Federal share of the costs for which an expenditure is made under this heading shall be 100 percent: *Provided further*, That amounts provided under this heading may be used for expenses the agency incurs in administering this program: *Provided further*, That not more than 60 days after enactment of this Act, the Administrator shall establish a process for applying, reviewing and awarding grants and cooperative and other transaction agreements, including the form and content of an application, and requirements for the maintenance of records that are necessary to facilitate an effective audit of the use of the funding provided: *Provided further*, That section 50101 of title 49, United States Code, shall apply to funds provided under this heading.

GRANTS-IN-AID FOR AIRPORTS

For an additional amount for "Grants-In-Aid for Airports", to enable the Secretary of Transportation to make grants for discretionary projects as authorized by subchapter 1 of chapter 471 and subchapter 1 of chapter 475 of title 49, United States Code, and for the procurement, installation and commissioning of runway incursion prevention devices and systems at airports of such title, $1,100,000,000, to remain available through September 30, 2010: *Provided*, That such funds shall not be subject to apportionment formulas, special apportionment categories, or minimum percentages under chapter 471: *Provided further*, That the Secretary shall distribute funds provided under this heading as discretionary grants to airports, with priority given to those projects that demonstrate to his satisfaction their ability to be completed within 2 years of enactment of this Act, and serve to supplement and not supplant planned expenditures from airport-generated revenues or from other State and local sources on such activities: *Provided further*, That the Secretary shall award grants totaling not less than 50 percent of the funds made available under this heading within 120 days of enactment of this Act, and award grants for the remaining amounts not later than 1 year after enactment of this Act: *Provided further*, That the Federal share payable of the costs for which a grant is made under this heading shall be 100 percent: *Provided further*, That the amount made available under this heading shall not be subject to any limitation on obligations for the Grants-in-Aid for Airports program set forth in any Act: *Provided further*, That the Administrator of the Federal Aviation Administration may retain up to 0.2 percent of the funds provided under this

heading to fund the award and oversight by the Administrator of grants made under this heading.

FEDERAL HIGHWAY ADMINISTRATION

HIGHWAY INFRASTRUCTURE INVESTMENT

For an additional amount for restoration, repair, construction and other activities eligible under paragraph (b) of section 133 of title 23, United States Code, and for passenger and freight rail transportation and port infrastructure projects eligible for assistance under subsection 601(a)(8) of such title, $27,500,000,000, to remain available through September 30, 2010: *Provided*, That, after making the set-asides required under this heading, 50 percent of the funds made available under this heading shall be apportioned to States using the formula set forth in section 104(b)(3) of title 23, United States Code, and the remaining funds shall be apportioned to States in the same ratio as the obligation limitation for fiscal year 2008 was distributed among the States in accordance with the formula specified in section 120(a)(6) of division K of Public Law 110–161: *Provided further*, That funds made available under this heading shall be apportioned not later than 21 days after the date of enactment of this Act: *Provided further*, That in selecting projects to be carried out with funds apportioned under this heading, priority shall be given to projects that are projected for completion within a 3-year time frame, and are located in economically distressed areas as defined by section 301 of the Public Works and Economic Development Act of 1965, as amended (42 U.S.C. 3161): *Provided further*, That 120 days following the date of such apportionment, the Secretary of Transportation shall withdraw from each State an amount equal to 50 percent of the funds awarded to that State (excluding funds suballocated within the State) less the amount of funding obligated (excluding funds suballocated within the State), and the Secretary shall redistribute such amounts to other States that have had no funds withdrawn under this proviso in the manner described in section 120(c) of division K of Public Law 110–161: *Provided further*, That 1 year following the date of such apportionment, the Secretary shall withdraw from each recipient of funds apportioned under this heading any unobligated funds, and the Secretary shall redistribute such amounts to States that have had no funds withdrawn under this proviso (excluding funds suballocated within the State) in the manner described in section 120(c) of division K of Public Law 110–161: *Provided further*, That at the request of a State, the Secretary of Transportation may provide an extension of such 1-year period only to the extent that he feels satisfied that the State has encountered extreme conditions that create an unworkable bidding environment or other extenuating circumstances: *Provided further*, That before granting such an extension, the Secretary shall send a letter to the House and Senate Committees on Appropriations that provides a thorough justification for the extension: *Provided further*, That 3 percent of the funds apportioned to a State under this heading shall be set aside for the purposes described in subsection 133(d)(2) of title 23, United States Code (without regard to the comparison to fiscal year 2005): *Provided further*, That 30 percent of the funds apportioned to a State under this heading shall be suballocated within the State in the manner and for the purposes described in the first sentence of subsection

133(d)(3)(A), in subsection 133(d)(3)(B), and in subsection 133(d)(3)(D): *Provided further,* That such suballocation shall be conducted in every State: *Provided further,* That funds suballocated within a State to urbanized areas and other areas shall not be subject to the redistribution of amounts required 120 days following the date of apportionment of funds provided under this heading: *Provided further,* That of the funds provided under this heading, $105,000,000 shall be for the Puerto Rico highway program authorized under section 165 of title 23, United States Code, and $45,000,000 shall be for the territorial highway program authorized under section 215 of title 23, United States Code: *Provided further,* That of the funds provided under this heading, $60,000,000 shall be for capital expenditures eligible under section 147 of title 23, United States Code (without regard to subsection(d)): *Provided further,* That the Secretary of Transportation shall distribute such $60,000,000 as competitive discretionary grants to States, with priority given to those projects that demonstrate to his satisfaction their ability to be completed within 2 years of enactment of this Act: *Provided further,* That of the funds provided under this heading, $550,000,000 shall be for investments in transportation at Indian reservations and Federal lands: *Provided further,* That of the funds identified in the preceding proviso, $310,000,000 shall be for the Indian Reservation Roads program, $170,000,000 shall be for the Park Roads and Parkways program, $60,000,000 shall be for the Forest Highway Program, and $10,000,000 shall be for the Refuge Roads program: *Provided further,* That for investments at Indian reservations and Federal lands, priority shall be given to capital investments, and to projects and activities that can be completed within 2 years of enactment of this Act: *Provided further,* That 1 year following the enactment of this Act, to ensure the prompt use of the $550,000,000 provided for investments at Indian reservations and Federal lands, the Secretary shall have the authority to redistribute unobligated funds within the respective program for which the funds were appropriated: *Provided further,* That up to 4 percent of the funding provided for Indian Reservation Roads may be used by the Secretary of the Interior for program management and oversight and project-related administrative expenses: *Provided further,* That section 134(f)(3)(C)(ii)(II) of title 23, United States Code, shall not apply to funds provided under this heading: *Provided further,* That of the funds made available under this heading, $20,000,000 shall be for highway surface transportation and technology training under section 140(b) of title 23, United States Code, and $20,000,000 shall be for disadvantaged business enterprises bonding assistance under section 332(e) of title 49, United States Code: *Provided further,* That funds made available under this heading shall be administered as if apportioned under chapter 1 of title 23, United States Code, except for funds made available for investments in transportation at Indian reservations and Federal lands, and for the territorial highway program, which shall be administered in accordance with chapter 2 of title 23, United States Code, and except for funds made available for disadvantaged business enterprises bonding assistance, which shall be administered in accordance with chapter 3 of title 49, United States Code: *Provided further,* That the Federal share payable on account of any project or activity carried out with funds made available under this heading shall be, at the option of the recipient, up to 100 percent of the total cost thereof: *Provided further,* That

funds made available by this Act shall not be obligated for the purposes authorized under section 115(b) of title 23, United States Code: *Provided further,* That funding provided under this heading shall be in addition to any and all funds provided for fiscal years 2009 and 2010 in any other Act for "Federal-aid Highways" and shall not affect the distribution of funds provided for "Federal-aid Highways" in any other Act: *Provided further,* That the amount made available under this heading shall not be subject to any limitation on obligations for Federal-aid highways or highway safety construction programs set forth in any Act: *Provided further,* That section 1101(b) of Public Law 109–59 shall apply to funds apportioned under this heading: *Provided further,* That the Administrator of the Federal Highway Administration may retain up to $40,000,000 of the funds provided under this heading to fund the oversight by the Administrator of projects and activities carried out with funds made available to the Federal Highway Administration in this Act, and such funds shall be available through September 30, 2012.

FEDERAL RAILROAD ADMINISTRATION

CAPITAL ASSISTANCE FOR HIGH SPEED RAIL CORRIDORS AND INTERCITY PASSENGER RAIL SERVICE

For an additional amount for section 501 of Public Law 110–432 and discretionary grants to States to pay for the cost of projects described in paragraphs (2)(A) and (2)(B) of section 24401 of title 49, United States Code, subsection (b) of section 24105 of such title, $8,000,000,000, to remain available through September 30, 2012: *Provided,* That the Secretary of Transportation shall give priority to projects that support the development of intercity high speed rail service: *Provided further,* That within 60 days of the enactment of this Act, the Secretary shall submit to the House and Senate Committees on Appropriations a strategic plan that describes how the Secretary will use the funding provided under this heading to improve and deploy high speed passenger rail systems: *Provided further,* That within 120 days of enactment of this Act, the Secretary shall issue interim guidance to applicants covering grant terms, conditions, and procedures until final regulations are issued: *Provided further,* That such interim guidance shall provide separate instructions for the high speed rail corridor program, capital assistance for intercity passenger rail service grants, and congestion grants: *Provided further,* That the Secretary shall waive the requirement that a project conducted using funds provided under this heading be in a State rail plan developed under chapter 227 of title 49, United States Code: *Provided further,* That the Federal share payable of the costs for which a grant is made under this heading shall be, at the option of the recipient, up to 100 percent: *Provided further,* That projects conducted using funds provided under this heading must comply with the requirements of subchapter IV of chapter 31 of title 40, United States Code: *Provided further,* That section 24405 of title 49, United States Code, shall apply to funds provided under this heading: *Provided further,* That the Administrator of the Federal Railroad Administration may retain up to one-quarter of 1 percent of the funds provided under this heading to fund the award and oversight by the Administrator of grants made under this heading, and funds retained for said purposes shall remain available through September 30, 2014.

CAPITAL GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION

For an additional amount for the National Railroad Passenger Corporation (Amtrak) to enable the Secretary of Transportation to make capital grants to Amtrak as authorized by section 101(c) of the Passenger Rail Investment and Improvement Act of 2008 (Public Law 110–432), $1,300,000,000, to remain available through September 30, 2010, of which $450,000,000 shall be used for capital security grants: *Provided*, That priority for the use of non-security funds shall be given to projects for the repair, rehabilitation, or upgrade of railroad assets or infrastructure, and for capital projects that expand passenger rail capacity including the rehabilitation of rolling stock: *Provided further*, That none of the funds under this heading shall be used to subsidize the operating losses of Amtrak: *Provided further*, That funds provided under this heading shall be awarded not later than 30 days after the date of enactment of this Act: *Provided further*, That the Secretary shall take measures to ensure that projects funded under this heading shall be completed within 2 years of enactment of this Act, and shall serve to supplement and not supplant planned expenditures for such activities from other Federal, State, local and corporate sources: *Provided further*, That the Secretary shall certify to the House and Senate Committees on Appropriations in writing compliance with the preceding proviso: *Provided further*, That not more than 60 percent of the funds provided for non-security activities under this heading may be used for capital projects along the Northeast Corridor: *Provided further*, That of the funding provided under this heading, $5,000,000 shall be made available for the Amtrak Office of Inspector General and made available through September 30, 2013.

FEDERAL TRANSIT ADMINISTRATION

TRANSIT CAPITAL ASSISTANCE

For an additional amount for transit capital assistance grants authorized under section 5302(a)(1) of title 49, United States Code, $6,900,000,000, to remain available through September 30, 2010: *Provided*, That the Secretary of Transportation shall provide 80 percent of the funds appropriated under this heading for grants under section 5307 of title 49, United States Code, and apportion such funds in accordance with section 5336 of such title (other than subsections (i)(1) and (j)): *Provided further*, That the Secretary shall apportion 10 percent of the funds appropriated under this heading in accordance with section 5340 of such title: *Provided further*, That the Secretary shall provide 10 percent of the funds appropriated under this heading for grants under section 5311 of title 49, United States Code, and apportion such funds in accordance with such section: *Provided further*, That funds apportioned under this heading shall be apportioned not later than 21 days after the date of enactment of this Act: *Provided further*, That 180 days following the date of such apportionment, the Secretary shall withdraw from each urbanized area or State an amount equal to 50 percent of the funds apportioned to such urbanized areas or States less the amount of funding obligated, and the Secretary shall redistribute such amounts to other urbanized areas or States that have had no funds withdrawn under this proviso utilizing whatever method he deems appropriate to ensure that all funds

redistributed under this proviso shall be utilized promptly: *Provided further,* That 1 year following the date of such apportionment, the Secretary shall withdraw from each urbanized area or State any unobligated funds, and the Secretary shall redistribute such amounts to other urbanized areas or States that have had no funds withdrawn under this proviso utilizing whatever method he deems appropriate to ensure that all funds redistributed under this proviso shall be utilized promptly: *Provided further,* That at the request of an urbanized area or State, the Secretary of Transportation may provide an extension of such 1-year period if he feels satisfied that the urbanized area or State has encountered an unworkable bidding environment or other extenuating circumstances: *Provided further,* That before granting such an extension, the Secretary shall send a letter to the House and Senate Committees on Appropriations that provides a thorough justification for the extension: *Provided further,* That of the funds provided for section 5311 of title 49, United States Code, 2.5 percent shall be made available for section 5311(c)(1): *Provided further,* That of the funding provided under this heading, $100,000,000 shall be distributed as discretionary grants to public transit agencies for capital investments that will assist in reducing the energy consumption or greenhouse gas emissions of their public transportation systems: *Provided further,* That for such grants on energy-related investments, priority shall be given to projects based on the total energy savings that are projected to result from the investment, and projected energy savings as a percentage of the total energy usage of the public transit agency: *Provided further,* That applicable chapter 53 requirements shall apply to funding provided under this heading, except that the Federal share of the costs for which any grant is made under this heading shall be, at the option of the recipient, up to 100 percent: *Provided further,* That the amount made available under this heading shall not be subject to any limitation on obligations for transit programs set forth in any Act: *Provided further,* That section 1101(b) of Public Law 109–59 shall apply to funds appropriated under this heading: *Provided further,* That the funds appropriated under this heading shall not be comingled with any prior year funds: *Provided further,* That notwithstanding any other provision of law, three-quarters of 1 percent of the funds provided for grants under section 5307 and section 5340, and one-half of 1 percent of the funds provided for grants under section 5311, shall be available for administrative expenses and program management oversight, and such funds shall be available through September 30, 2012.

FIXED GUIDEWAY INFRASTRUCTURE INVESTMENT

For an amount for capital expenditures authorized under section 5309(b)(2) of title 49, United States Code, $750,000,000, to remain available through September 30, 2010: *Provided,* That the Secretary of Transportation shall apportion funds under this heading pursuant to the formula set forth in section 5337 of title 49, United States Code: *Provided further,* That the funds appropriated under this heading shall not be commingled with any prior year funds: *Provided further,* That funds made available under this heading shall be apportioned not later than 21 days after the date of enactment of this Act: *Provided further,* That 180 days following the date of such apportionment, the Secretary shall

withdraw from each urbanized area an amount equal to 50 percent of the funds apportioned to such urbanized area less the amount of funding obligated, and the Secretary shall redistribute such amounts to other urbanized areas that have had no funds withdrawn under this proviso utilizing whatever method he or she deems appropriate to ensure that all funds redistributed under this proviso shall be utilized promptly: *Provided further*, That 1 year following the date of such apportionment, the Secretary shall withdraw from each urbanized area any unobligated funds, and the Secretary shall redistribute such amounts to other urbanized areas that have had no funds withdrawn under this proviso utilizing whatever method he or she deems appropriate to ensure that all funds redistributed under this proviso shall be utilized promptly: *Provided further*, That at the request of an urbanized area, the Secretary of Transportation may provide an extension of such 1-year period if he or she feels satisfied that the urbanized area has encountered an unworkable bidding environment or other extenuating circumstances: *Provided further*, That before granting such an extension, the Secretary shall send a letter to the House and Senate Committees on Appropriations that provides a thorough justification for the extension: *Provided further*, That applicable chapter 53 requirements shall apply except that the Federal share of the costs for which a grant is made under this heading shall be, at the option of the recipient, up to 100 percent: *Provided further*, That the provisions of section 1101(b) of Public Law 109–59 shall apply to funds made available under this heading: *Provided further*, That notwithstanding any other provision of law, up to 1 percent of the funds under this heading shall be available for administrative expenses and program management oversight and shall remain available for obligation until September 30, 2012.

CAPITAL INVESTMENT GRANTS

For an additional amount for "Capital Investment Grants", as authorized under section 5338(c)(4) of title 49, United States Code, and allocated under section 5309(m)(2)(A) of such title, to enable the Secretary of Transportation to make discretionary grants as authorized by section 5309(d) and (e) of such title, $750,000,000, to remain available through September 30, 2010: *Provided*, That such amount shall be allocated without regard to the limitation under section 5309(m)(2)(A)(i): *Provided further*, That in selecting projects to be funded, priority shall be given to projects that are currently in construction or are able to obligate funds within 150 days of enactment of this Act: *Provided further*, That the provisions of section 1101(b) of Public Law 109–59 shall apply to funds made available under this heading: *Provided further*, That funds appropriated under this heading shall not be commingled with any prior year funds: *Provided further*, That applicable chapter 53 requirements shall apply, except that notwithstanding any other provision of law, up to 1 percent of the funds provided under this heading shall be available for administrative expenses and program management oversight, and shall remain available through September 30, 2012.

MARITIME ADMINISTRATION

SUPPLEMENTAL GRANTS FOR ASSISTANCE TO SMALL SHIPYARDS

To make grants to qualified shipyards as authorized under section 3508 of Public Law 110–417 or section 54101 of title 46, United States Code, $100,000,000, to remain available through September 30, 2010: *Provided*, That the Secretary of Transportation shall institute measures to ensure that funds provided under this heading shall be obligated within 180 days of the date of their distribution: *Provided further*, That the Maritime Administrator may retain and transfer to "Maritime Administration, Operations and Training" up to 2 percent of the funds provided under this heading to fund the award and oversight by the Administrator of grants made under this heading.

OFFICE OF INSPECTOR GENERAL

SALARIES AND EXPENSES

For an additional amount for necessary expenses of the Office of Inspector General to carry out the provisions of the Inspector General Act of 1978, as amended, $20,000,000, to remain available through September 30, 2013: *Provided*, That the funding made available under this heading shall be used for conducting audits and investigations of projects and activities carried out with funds made available in this Act to the Department of Transportation: *Provided further*, That the Inspector General shall have all necessary authority, in carrying out the duties specified in the Inspector General Act, as amended (5 U.S.C. App. 3), to investigate allegations of fraud, including false statements to the Government (18 U.S.C. 1001), by any person or entity that is subject to regulation by the Department.

GENERAL PROVISION—DEPARTMENT OF TRANSPORTATION

SEC. 1201. (a) MAINTENANCE OF EFFORT.—Not later than 30 days after the date of enactment of this Act, for each amount that is distributed to a State or agency thereof from an appropriation in this Act for a covered program, the Governor of the State shall certify to the Secretary of Transportation that the State will maintain its effort with regard to State funding for the types of projects that are funded by the appropriation. As part of this certification, the Governor shall submit to the Secretary of Transportation a statement identifying the amount of funds the State planned to expend from State sources as of the date of enactment of this Act during the period beginning on the date of enactment of this Act through September 30, 2010, for the types of projects that are funded by the appropriation.

(b) FAILURE TO MAINTAIN EFFORT.—

If a State is unable to maintain the level of effort certified pursuant to subsection (a), the State will be prohibited by the Secretary of Transportation from receiving additional limitation pursuant to the redistribution of the limitation on obligations for Federal-aid highway and highway safety construction programs that occurs after August 1 for fiscal year 2011.

(c) PERIODIC REPORTS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, each grant recipient shall submit to the covered agency from which they received funding periodic reports on the use of the funds appropriated in this Act for covered programs. Such reports shall be collected and compiled by the covered agency and transmitted to Congress. Covered agencies may develop such reports on behalf of grant recipients to ensure the accuracy and consistency of such reports.

(2) CONTENTS OF REPORTS.—For amounts received under each covered program by a grant recipient under this Act, the grant recipient shall include in the periodic reports information tracking:

(A) the amount of Federal funds appropriated, allocated, obligated, and outlayed under the appropriation;

(B) the number of projects that have been put out to bid under the appropriation and the amount of Federal funds associated with such projects;

(C) the number of projects for which contracts have been awarded under the appropriation and the amount of Federal funds associated with such contracts;

(D) the number of projects for which work has begun under such contracts and the amount of Federal funds associated with such contracts;

(E) the number of projects for which work has been completed under such contracts and the amount of Federal funds associated with such contracts;

(F) the number of direct, on-project jobs created or sustained by the Federal funds provided for projects under the appropriation and, to the extent possible, the estimated indirect jobs created or sustained in the associated supplying industries, including the number of job-years created and the total increase in employment since the date of enactment of this Act; and

(G) for each covered program report information tracking the actual aggregate expenditures by each grant recipient from State sources for projects eligible for funding under the program during the period beginning on the date of enactment of this Act through September 30, 2010, as compared to the level of such expenditures that were planned to occur during such period as of the date of enactment of this Act.

(3) TIMING OF REPORTS.—Each grant recipient shall submit the first of the periodic reports required under this subsection not later than 90 days after the date of enactment of this Act and shall submit updated reports not later than 180 days, 1 year, 2 years, and 3 years after such date of enactment.

(d) DEFINITIONS.—In this section, the following definitions apply:

(1) COVERED AGENCY.—The term "covered agency" means the Office of the Secretary of Transportation, the Federal Aviation Administration, the Federal Highway Administration, the Federal Railroad Administration, the Federal Transit Administration and the Maritime Administration of the Department of Transportation.

(2) COVERED PROGRAM.—The term "covered program" means funds appropriated in this Act for "Supplemental Discretionary Grants for a National Surface Transportation System"

to the Office of the Secretary of Transportation, for "Supplemental Funding for Facilities and Equipment" and "Grants-in-Aid for Airports" to the Federal Aviation Administration; for "Highway Infrastructure Investment" to the Federal Highway Administration; for "Capital Assistance for High Speed Rail Corridors and Intercity Passenger Rail Service" and "Capital Grants to the National Railroad Passenger Corporation" to the Federal Railroad Administration; for "Transit Capital Assistance", "Fixed Guideway Infrastructure Investment", and "Capital Investment Grants" to the Federal Transit Administration; and "Supplemental Grants for Assistance to Small Shipyards" to the Maritime Administration.

(3) GRANT RECIPIENT.—The term "grant recipient" means a State or other recipient of assistance provided under a covered program in this Act. Such term does not include a Federal department or agency.

(e) Notwithstanding any other provision of law, sections 3501–3521 of title 44, United States Code, shall not apply to the provisions of this section.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

PUBLIC AND INDIAN HOUSING

PUBLIC HOUSING CAPITAL FUND

For an additional amount for the "Public Housing Capital Fund" to carry out capital and management activities for public housing agencies, as authorized under section 9 of the United States Housing Act of 1937 (42 U.S.C. 1437g) (the "Act"), $4,000,000,000, to remain available until September 30, 2011: *Provided*, That the Secretary of Housing and Urban Development shall distribute $3,000,000,000 of this amount by the same formula used for amounts made available in fiscal year 2008, except that the Secretary may determine not to allocate funding to public housing agencies currently designated as troubled or to public housing agencies that elect not to accept such funding: *Provided further*, That the Secretary shall obligate funds allocated by formula within 30 days of enactment of this Act: *Provided further*, That the Secretary shall make available $1,000,000,000 by competition for priority investments, including investments that leverage private sector funding or financing for renovations and energy conservation retrofit investments: *Provided further*, That the Secretary shall obligate competitive funding by September 30, 2009: *Provided further*, That public housing authorities shall give priority to capital projects that can award contracts based on bids within 120 days from the date the funds are made available to the public housing authorities: *Provided further*, That public housing agencies shall give priority consideration to the rehabilitation of vacant rental units: *Provided further*, That public housing agencies shall prioritize capital projects that are already underway or included in the 5-year capital fund plans required by the Act (42 U.S.C. 1437c–1(a)): *Provided further*, That notwithstanding any other provision of law, (1) funding provided under this heading may not be used for operating or rental assistance activities, and (2) any restriction of funding to replacement housing uses shall be inapplicable: *Provided further*, That notwithstanding any other provision of law, the Secretary shall institute measures to ensure that funds provided under this heading

LIMIT ON FUNDS

SEC. 1604. None of the funds appropriated or otherwise made available in this Act may be used by any State or local government, or any private entity, for any casino or other gambling establishment, aquarium, zoo, golf course, or swimming pool.

BUY AMERICAN

SEC. 1605. USE OF AMERICAN IRON, STEEL, AND MANUFACTURED GOODS. (a) None of the funds appropriated or otherwise made available by this Act may be used for a project for the construction, alteration, maintenance, or repair of a public building or public work unless all of the iron, steel, and manufactured goods used in the project are produced in the United States.

(b) Subsection (a) shall not apply in any case or category of cases in which the head of the Federal department or agency involved finds that—

(1) applying subsection (a) would be inconsistent with the public interest;

(2) iron, steel, and the relevant manufactured goods are not produced in the United States in sufficient and reasonably available quantities and of a satisfactory quality; or

(3) inclusion of iron, steel, and manufactured goods produced in the United States will increase the cost of the overall project by more than 25 percent.

(c) If the head of a Federal department or agency determines that it is necessary to waive the application of subsection (a) based on a finding under subsection (b), the head of the department or agency shall publish in the Federal Register a detailed written justification as to why the provision is being waived.

(d) This section shall be applied in a manner consistent with United States obligations under international agreements.

WAGE RATE REQUIREMENTS

SEC. 1606. Notwithstanding any other provision of law and in a manner consistent with other provisions in this Act, all laborers and mechanics employed by contractors and subcontractors on projects funded directly by or assisted in whole or in part by and through the Federal Government pursuant to this Act shall be paid wages at rates not less than those prevailing on projects of a character similar in the locality as determined by the Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code. With respect to the labor standards specified in this section, the Secretary of Labor shall have the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (64 Stat. 1267; 5 U.S.C. App.) and section 3145 of title 40, United States Code.

ADDITIONAL FUNDING DISTRIBUTION AND ASSURANCE OF APPROPRIATE USE OF FUNDS

SEC. 1607. (a) CERTIFICATION BY GOVERNOR.—Not later than 45 days after the date of enactment of this Act, for funds provided to any State or agency thereof, the Governor of the State shall certify that: (1) the State will request and use funds provided by this Act; and (2) the funds will be used to create jobs and promote economic growth.

(b) ACCEPTANCE BY STATE LEGISLATURE.—If funds provided to any State in any division of this Act are not accepted for use by the Governor, then acceptance by the State legislature, by means of the adoption of a concurrent resolution, shall be sufficient to provide funding to such State.

(c) DISTRIBUTION.—After the adoption of a State legislature's concurrent resolution, funding to the State will be for distribution to local governments, councils of government, public entities, and public-private entities within the State either by formula or at the State's discretion.

ECONOMIC STABILIZATION CONTRACTING

SEC. 1608. REFORM OF CONTRACTING PROCEDURES UNDER EESA. Section 107(b) of the Emergency Economic Stabilization Act of 2008 (12 U.S.C. 5217(b)) is amended by inserting "and individuals with disabilities and businesses owned by individuals with disabilities (for purposes of this subsection the term 'individual with disability' has the same meaning as the term 'handicapped individual' as that term is defined in section 3(f) of the Small Business Act (15 U.S.C. 632(f))," after "(12 U.S.C. 1441a(r)(4)),".

SEC. 1609. (a) FINDINGS.—

(1) The National Environmental Policy Act protects public health, safety and environmental quality: by ensuring transparency, accountability and public involvement in federal actions and in the use of public funds;

(2) When President Nixon signed the National Environmental Policy Act into law on January 1, 1970, he said that the Act provided the "direction" for the country to "regain a productive harmony between man and nature";

(3) The National Environmental Policy Act helps to provide an orderly process for considering federal actions and funding decisions and prevents ligation and delay that would otherwise be inevitable and existed prior to the establishment of the National Environmental Policy Act.

(b) Adequate resources within this bill must be devoted to ensuring that applicable environmental reviews under the National Environmental Policy Act are completed on an expeditious basis and that the shortest existing applicable process under the National Environmental Policy Act shall be utilized.

(c) The President shall report to the Senate Environment and Public Works Committee and the House Natural Resources Committee every 90 days following the date of enactment until September 30, 2011 on the status and progress of projects and activities funded by this Act with respect to compliance with National Environmental Policy Act requirements and documentation.

SEC. 1610. (a) None of the funds appropriated or otherwise made available by this Act, for projects initiated after the effective date of this Act, may be used by an executive agency to enter into any Federal contract unless such contract is entered into in accordance with the Federal Property and Administrative Services Act (41 U.S.C. 253) or chapter 137 of title 10, United States Code, and the Federal Acquisition Regulation, unless such contract is otherwise authorized by statute to be entered into without regard to the above referenced statutes.

(b) All projects to be conducted under the authority of the Indian Self-Determination and Education Assistance Act, the Tribally-Controlled Schools Act, the Sanitation and Facilities Act, the

Sections in American Recovery and Reinvestment Act of 2009 requiring Governor action:

--Sec. 410(a). Additional State Energy Grants. Grants in excess of state base allocation under the Energy Policy Conservation Act require governor to notify the Secretary of Energy that the governor has obtained certain necessary assurances spelled out in bill.

--Sec. 1201(a). Within 30 days of enactment (3/19/09), for each appropriation distributed to state or agency for a covered program, governor shall certify to Secretary of Transportation that state will maintain its effort with regard to state funding for types of projects funded by appropriation. Governor shall submit statement to Secretary identifying amount of funds state planned to expend from state sources as of date of enactment (2/17/09) through 9/30/10 for types of projects funded by appropriation.

--Sec. 14001. Grants from State Fiscal Stabilization Fund. (f) Governor shall return any funds within two years of receipt if not awarded or otherwise granted.

--Sec. 14002. Grants from State Fiscal Stabilization Fund. (a)(1) Governor shall use 81.8% of grants for support of elementary, secondary, postsecondary education, and as applicable, early childhood education programs and services.
--(a)(2) and (3) sets forth the order in which funds should be expended.
--(b)(1) Governor shall use 18.2% of grants for public safety and other gov't services, including education
--(b)(2) All institutions of higher education eligible for funds under (b)(1) – this may preempt our constitutional prohibition against appropriating funds for private or religious schools.

--Sec. 14005. Governor to apply for sec. 14001 grants. Sec'y of Education to set the timing and requirements for grant applications.

--Sec. 14005(c). Governor to apply for sec. 14006 state incentive grants.

--Sec. 14008. Requires annual state report on use and impact of fiscal stabilization funds.

--Sec. 1511. For covered funds made available for infrastructure investment, governor shall certify that the investment has received full review and vetting required by law and governor accepts responsibility that it is an appropriate use of taxpayer dollars. Investment must be described – total cost, funds used. Certification must be posted on a website and linked to federal ARRA website.

--Sec. 1607. Governor shall certify within 45 days of enactment (4/3/09) that for funds provided to state, state will apply for and use ARRA funds and that the funds will be used to create jobs and promote economic growth.

Dear Senator Hoffman and Senator Stedman:

I respectfully request a hearing on SB 124 authorizing the Department of Transportation and Public Facilities (DOT&PF) to apply for funding available through the American Recovery and Reinvestment Act. The bill amends the uncodified law of Alaska. Specifically, DOT&PF is directed to apply to for funds from the Departments of Homeland Security and Transportation.

The bill contains language directing DOT&PF to maximize the funding it applies for and receives.

I look forward to discussing this important piece of legislation with you and your committee.

Sincerely,

Leo von Scheben, P.E., L.S., M.B.A.

Sponsor Statement

SB 125 Alaska Aerospace Corporation

"An Act changing the name of the Alaska Aerospace Development Corporation to Alaska Aerospace Corporation."

Senate Bill 125 simply seeks to change the name of the Alaska Aerospace Development Corporation to the Alaska Aerospace Corporation.

"Development" gives the perception that the organization is a non-profit administrative body that simply encourages aerospace development in Alaska, rather than an organization that owns and operates space launch facilities that are fully developed and capable of launching rockets as large as the Minotaur IV.

There are an increasing number of state sponsored aerospace development organizations that have been established in the lower 48 (California, Florida, New Mexico, Oklahoma, Texas, Virginia) that fit the "development" mold. They have some facilities, and they all work hard to develop aerospace incentives within the individual states, but they all have limited hands-on rocket launch experience.

The launch site in Kodiak is operational, functioning and self supporting, in that no Alaska General Fund appropriations are needed for operations and maintenance of the site. The site has had 14 successful launches since November 1998. The corporation's title needs to reflect these facts and this name change will help the organization meet its 21st century goals.

The new title, Alaska Aerospace Corporation, is unambiguous about their capabilities and will improve their ability to offer launch services to the national and international aerospace market.

This name change will further assist the corporation in securing launch and other aerospace related contracts that generate significant economic benefits to Alaska by providing long-term, high paying, stable jobs; by providing local economic diversity; and by creating short-term benefits from projects and construction activities.

I urge your support of this legislation.

Senator Joe Paskvan, Chair
Senate Labor and Commerce Committee
Alaska State Capitol, Room #7
Juneau, Alaska 99801

SUBJECT: Support of SB 125 - Alaska Aerospace Corporation
"An Act changing the name of the Alaska Aerospace Development Corporation to Alaska Aerospace Corporation"

Dear Senator Paskvan:

The Alaska Aerospace Development Corporation completely supports this bill that changes our name to the Alaska Aerospace Corporation. We feel strongly that this name change will further assist the corporation in securing launch and other aerospace related contracts that generate significant economic benefits to Alaska by providing long-term, high paying, stable jobs; by providing local economic diversity; and by creating short-term benefits from projects and construction activities.

The launch site in Kodiak is fully operational, functioning and self supporting. The site has had 14 successful launches since November 1998. The corporation's title needs to reflect our maturity and this name change will help the organization meet its 21st century goals.

The new title, Alaska Aerospace Corporation, is unambiguous about our capabilities and will improve our ability to compete for and offer launch services to the national and international aerospace market.

Please call me if you have any questions.

Sincerely,

Dale K. Nash

Sponsor Statement

SB 133

Alaska health care providers and patients continue to rely on an outdated healthcare infrastructure, with many providers using only paper based systems, which contributes to dangerous drug interactions, missed diagnoses, costly delays, duplicate testing and administrative overhead. According to national studies, these problems contribute to approximately 5% of health care expenditures or $250 million annually in Alaska and unnecessarily degrade the quality of health care for all Alaskans.

SB 133 modernizes Alaska's healthcare IT infrastructure by developing a secure electronic Health Information Exchange (HIE) system to improve the *safety, cost effectiveness,* and *quality of healthcare* in Alaska. This standards-based electronic health network will allow individual Alaskans to have their own personal health record and to authorize their health care providers to exchange electronic medical records in a timely, secure manner.

The use of such technology requires careful and strict privacy protection measures. Current Federal and State laws already provide a number of standards protecting a patient's privacy and personal information. The privacy and security rules contained in the Health Insurance Portability and Accountability Act (HIPAA) most directly and extensively impact the HIE system. HIPAA establishes individuals' right to review and obtain a copy of their health information, requires notice of privacy practices, limits the use of records and the disclosure of information, and institutes strict security standards.

SB 133 establishes further strict standards to secure and protect the confidentiality of individually identifying health information of a patient. These standards include a secure and traceable electronic audit system to allow patients to see who has viewed their record, restrictions on how information may be used, patient consent requirements, an ability to opt out of the health information exchange system, and notification of confidentiality violations.

When complete, the Health Information Exchange System will have the capability to provide any Alaskan with a secure Personal Health Record, including authorization for their health care providers on the network to have access to electronic records required for continuity of care, such as hospitalization records, prescription information, vaccinations, allergies, imaging records, laboratory results, etc. The Network will support telemedicine services, the transfer of high resolution images for patient care, video conferencing, and Voice over Internet applications for providers.

Over 300 health organizations in Alaska are eager to participate in the electronic Health Information Exchange system.

I urge your support for SB 133.

ANALYSIS: *(Attach a separate page if necessary)*

SB 133 proposes to oversee creation of a secure statewide electronic health information exchange system. It would mandate the department oversee 1) infrastructure planning by a qualified nonprofit or for-profit entity; 2) implementation measures that include installation and training, a plan to encourage use of the system, support to providers, and compliance with federal and state health information policies. The fiscal note assumes federal stimulus funding is available for the first five years of the project; it assumes those funds will create a number of new private sector jobs with those funds, and that the project promotes cost efficiencies across the public and private health delivery systems. The project assumes that when federal stimulus funds are gone, the electronic exchange system will be self-sustaining afterward from a combination of public and private sources that utilize the system. (continued on next page)

FISCAL NOTE

STATE OF ALASKA
2009 LEGISLATIVE SESSION

BILL NO. SB 133

ANALYSIS CONTINUATION

Given the size and complexity of the task, the department has chosen to pursue funding in both the operating and capital budgets. The department believes that this approach enhances the overall success of the project.
The Division of Health Care Services estimates that it will need a total of 2 FTE's for the planning and administration of the electronic health information exchange system.

Operating Budget :

Administrative costs

1 Project Manager, $150.0, 1 Accountant III $82.2, All personal services costs include benefits. Assumes $9.4 per FTE annually for office space, phones, and other contractual costs. Assumes $2.6 one time costs per FTE for computers and software. Assumes $5.0 one time costs per FTE for Office equipment. Assumes $2.0 per FTE annually for supplies. Assumes $10.0 for travel for first 2 years and $3.0 for remaining years.

Maintenance

Assumes $1,800.0 per year for hosted service maintenance costs beginning in FY2012.

Assumes $300.0 annual maintenance costs for broadband support beginning in FY2012.

Capital Budget:
Planning

Assumes approximately $1,500.0 will be needed for infrastructure planning, Statewide Technical planning, policy and standard planning, training and workforce development planning, and health information policy compliance.

Implementation

Assumes $13,000.0 one time costs will be needed for contractual services to upgrade broadband support statewide for the electronic health information exchange system to be interactive, responsive, and less subject to frequent breakdowns especially in rural parts of the state. Assumes $7,000.0 one time costs will be needed for hardware and software updates for the system. Assumes $5,775.0 one time costs will be needed for Health Electronic Records repository, patient and provider potals.

Fund Source
Assumes 90% federal for FY2010 and FY2011
Assumes 54.34% federal for 2012 and beyond

AMENDMENT 1 S. Thomas

OFFERED IN THE SENATE

TO: CSSB 133(HSS)

Page 4, line 7:

Delete "the state or"

Page 4, lines 8 - 9:

Delete "or a combination of the state and one or more entities under contract with the state"

Page 5, line 2, following "information":

Insert ";

(6) ensure that the health information exchange system becomes self-sustaining through a combination of user fees and other private and public funding sources."

3713

CSSB 133(HSS) Amendment

Summary

This amendment does two things:

1. Deletes the designation of "the state" as an option for fully implementing and operating the HIE system
    a. It is not necessary to have a big-government operation when there are private sector options – the state can just act in an oversight role.

2. Puts in statute the expectation that the designated entity must become self-sustaining through a combination of user fees and other private and public funding sources.

SB 133 – Electronic Health Info Exchange
Questions and Answers

1. Impact of developed AeHN to sole practitioner
2. Does North Sound Support?
3. $27 million fiscal note includes federal dollars – if we don't get the federal stimulus funding have we obligated the state to $27 million general funds?
4. Why does the fiscal note include 6 positions?
5. What happens if this bill doesn't pass this year?
6. What "strings" are attached to the stimulus funding?
7. Do we need the state match?

---

1. Impact of developed AeHN to sole practitioner?

SB 133 does not mandate any provider to implement (Electronic Health Records) EHRs or to join the Health Information Exchange (HIE) system.

It is anticipated that any provider could join the network for a minimum membership fee of $50/year. Additional fees would be charged for additional services such as practice work flow design and use of an ASP (application service provider) model EHR. By utilizing a shared network to exchange data, the cost to private providers is greatly decreased.

The real benefit to providers is in the connectivity. While the provider may be able to implement a local EHR, the real need is to have access to data in other provider EHRs. This is what will provide "meaningful use". Note that meaningful use is still being defined by CMS (Center for Medicare/Medicaid Services), but connectivity has been identified as one of the criteria.

S. Paskavan's office

2. Does Norton Sound support?

All of the regional organizations including Norton Sound have signed letters of agreement to participate in the FCC network build out for the non-profit AeHN and are participating in the ongoing health information exchange planning process.

The health information exchange does not provide the regional corporations with EHRs, but does connect the EHRs currently being installed at regional locations with the ANTHC EHR and the rest of the state.

3. $27 million fiscal note includes federal dollars – if we don't get the federal stimulus funding have we obligated the state to $27 million general funds?

The current fiscal note is based on a state-developed Health Information Exchange (HIE), with state employees. However, SB 133 allows the state to designate an entity other than itself to plan and implement the system. This approach would avoid costs of state employees and place the costs in a non-profit, user supported entity.

Below may be considered alternative fiscal note summary language which would identify the actual costs to the state based on the cost estimates prepared by the non-profit AeHN:

2010 $1.3M (stimulus match) plus $65K (1 FTE for a oversight position)
2011 $1.0M (stimulus match) plus $65K (1 FTE for a oversight position)
2012 $1.0M (Operations membership fee) plus $65K (1 FTE for a oversight position)
2013 $1.0M (Operations membership fee) plus $65K (1 FTE for a oversight position)
2014 $1.0M (Operations membership fee) plus $65K (1 FTE for a oversight position)

The AeHN Business Plan shows the cost being borne by all of the stakeholders not just the state. The State's ongoing bill is $1M. This amount is offset by a potential savings to Medicaid of $10M.

4. Why does the fiscal note include 6 positions?

The state is projecting the entire project cost in the fiscal note if the state were to fully implement it on its own. With SB 133, the state has the option to designate another entity while maintaining oversight.

The state oversight may be handled by 1 FTE. A second position may be required for Finance. The other positions are part of the HIE and would be covered in the sustainable model by revenues generated through user fees.

5. What happens if this bill doesn't pass this year?

Passing this bill would cement the state's involvement in the HIE project, demonstrate the state's commitment to HIE, require a standards based approach, and solidify privacy standards on Alaska's terms. Other states are moving forward with a similar approach. With the availability of stimulus funds, and additional competitive grants, passing this bill would put a designated entity in a better position to be awarded additional funding.

If it doesn't pass, the HIE project would not have the match required to apply for regular grants, stimulus grants or the stimulus match required funds. Essentially, the existing work done to bring Alaska along with the rest of the nation for health information exchange would be severely impacted and momentum to complete this project would be lost.

SB 133 ensures that progress toward HIE completion is done on Alaska's terms. It outlines additional privacy standards not currently existing in Federal and State law.

AeHN will continue to look for additional funds from other funders (Denali, Rasmuson and others), and will do this whether there are stimulus funds or not. However, the guarantee for success is much higher with a state match. The $10 million FCC project which is already approved by the feds would also be placed on hold.

6. What "strings" are attached to the stimulus funding?

There are no strings attached according to the Office of the National Coordinator (ONC) staff and the speakers at a recent HIMSS Conference. All the federal agencies are feeling the push from the Obama administration to get stimulus funds released. In particular, agencies are focusing on the money that will be given directly to states. But all agencies are gearing up for an increased number of competitive grants as well. There are still unanswered questions regarding the release of funds, but each day brings additional clarity as agencies meet with consumers.

The HIMSS Conference in Chicago was attended by over 30,000 people representing most of the states. Almost every state is approaching electronic health network system development similarly as proposed in SB 133—partnership organization with a state designated, shareholder based entity. Speakers from Congress, federal agencies, HIE Directors, providers and consumers all spoke about the need to include private providers, state agencies, federal agencies, consumers and payors.

3717

7. Do we need the state match?

Yes. The language in ARRA is clear, and requires a 90/10 match. The state is a key player in the health information exchange process. Without state commitment, this project will move much slower and cost the state more over time. The non-profit, AeHN, which has already made significant progress, will continue to pursue other revenue sources whether the state money is awarded or not.

There will be stimulus funds available very soon in the form of competitive grants from federal agencies such as HRSA, FCC, and NTIA to anyone. If a non-profit has the $1.3M, they can use it as match for other funds as well. They can apply for these funds with or without the governor's approval of the stimulus $$ for states. State match will be necessary to apply for these funds as well.

SARAH PALIN, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES
OFFICE OF THE COMMISSIONER

P.O. BOX 110601

FAX: (907) 465-3068

MEMORANDUM

DATE: April 9, 2009

TO: Senator Bert Stedman
Chair, Senate Finance

FROM: William J. Streur
Deputy Commissioner

SUBJECT: SB 133

Chair: No, I'm under the assumption that we're looking at 6 FTE and capital expenditures of 27.9 of which 25.1 is federal. I mean we don't *have to* take action on this bill. So, I guess I'm struggling with the timing issue because we are going to be out of session apparently when the administration decides or doesn't decide to accept any of the stimulus funding.

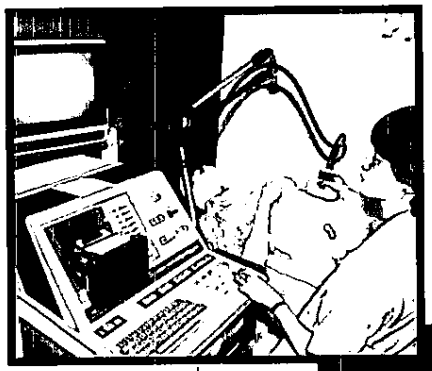
Does it put us in any jeopardy if we just set this aside until January when you make your decision?

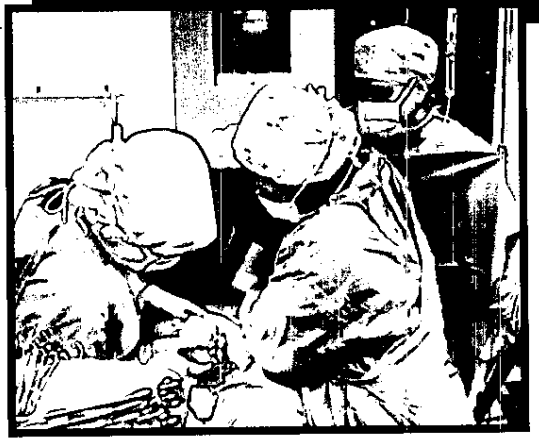
DHSS: To answer your question regarding a delay until next year, it may jeopardize our ability to realize the full benefits as envisioned under the bill. The ARRA Stimulus Funds anticipated come from two pots of money; the Provider pot for provider enhancements to encourage expansion of HIT/HIE/EHR activities. This money requires no match and is intended to be provided on a first come first served basis until gone. With this funding, we also face the potential ire of providers who would like to access that funds source for their efforts. CMS believes we may place the provider incentives in jeopardy as well as potential good will if we do not request the money. The money could potentially not be available once we are approved to request the funding and the authority to spend it. The second pot is more straightforward and, with the Legislature/Governor's approval, we will be able to request the funding from CMS through an Advance Planning Document (APD) much as we do when planning for Medicaid expenditures on an annual/biannual basis.

My concern is with our spending limits. In the past couple of years we have taken significant cuts in the Medicaid budget and our federal authority has been cut right along with our GF authority. So, I do not have enough authority on the books right now to spend the money even if I am able to submit the APD to request the funds.

CMS does not believe enough is known on the larger 90/10 match funds and how aggressive the states will be in their efforts to go after the money. They believe if there is significant interest, there may be less funds available in the second year, but that remains an unknown.

We continue to look carefully at the elements of the legislation and also the planning funding contained in the ARRA to determine what the state's role should/could be, particularly in this current revenue situation with over $1 billion in revenue shortfall for the next fiscal year.





Deploying a Health Information Exchange for Alaskans

Paul Sherry, President
Alaska eHealth Network
March 2009

3/21

Medical Care: From Paper to Electronic

- Alaska's health care providers are now making major investments ($100M+) in moving from paper records to ***Electronic Medical Records***

- Alaska's health care providers are aligned in support of creating a statewide ***Health Information Exchange*** network so patient records may be securely exchanged between providers for timely and safe patient care

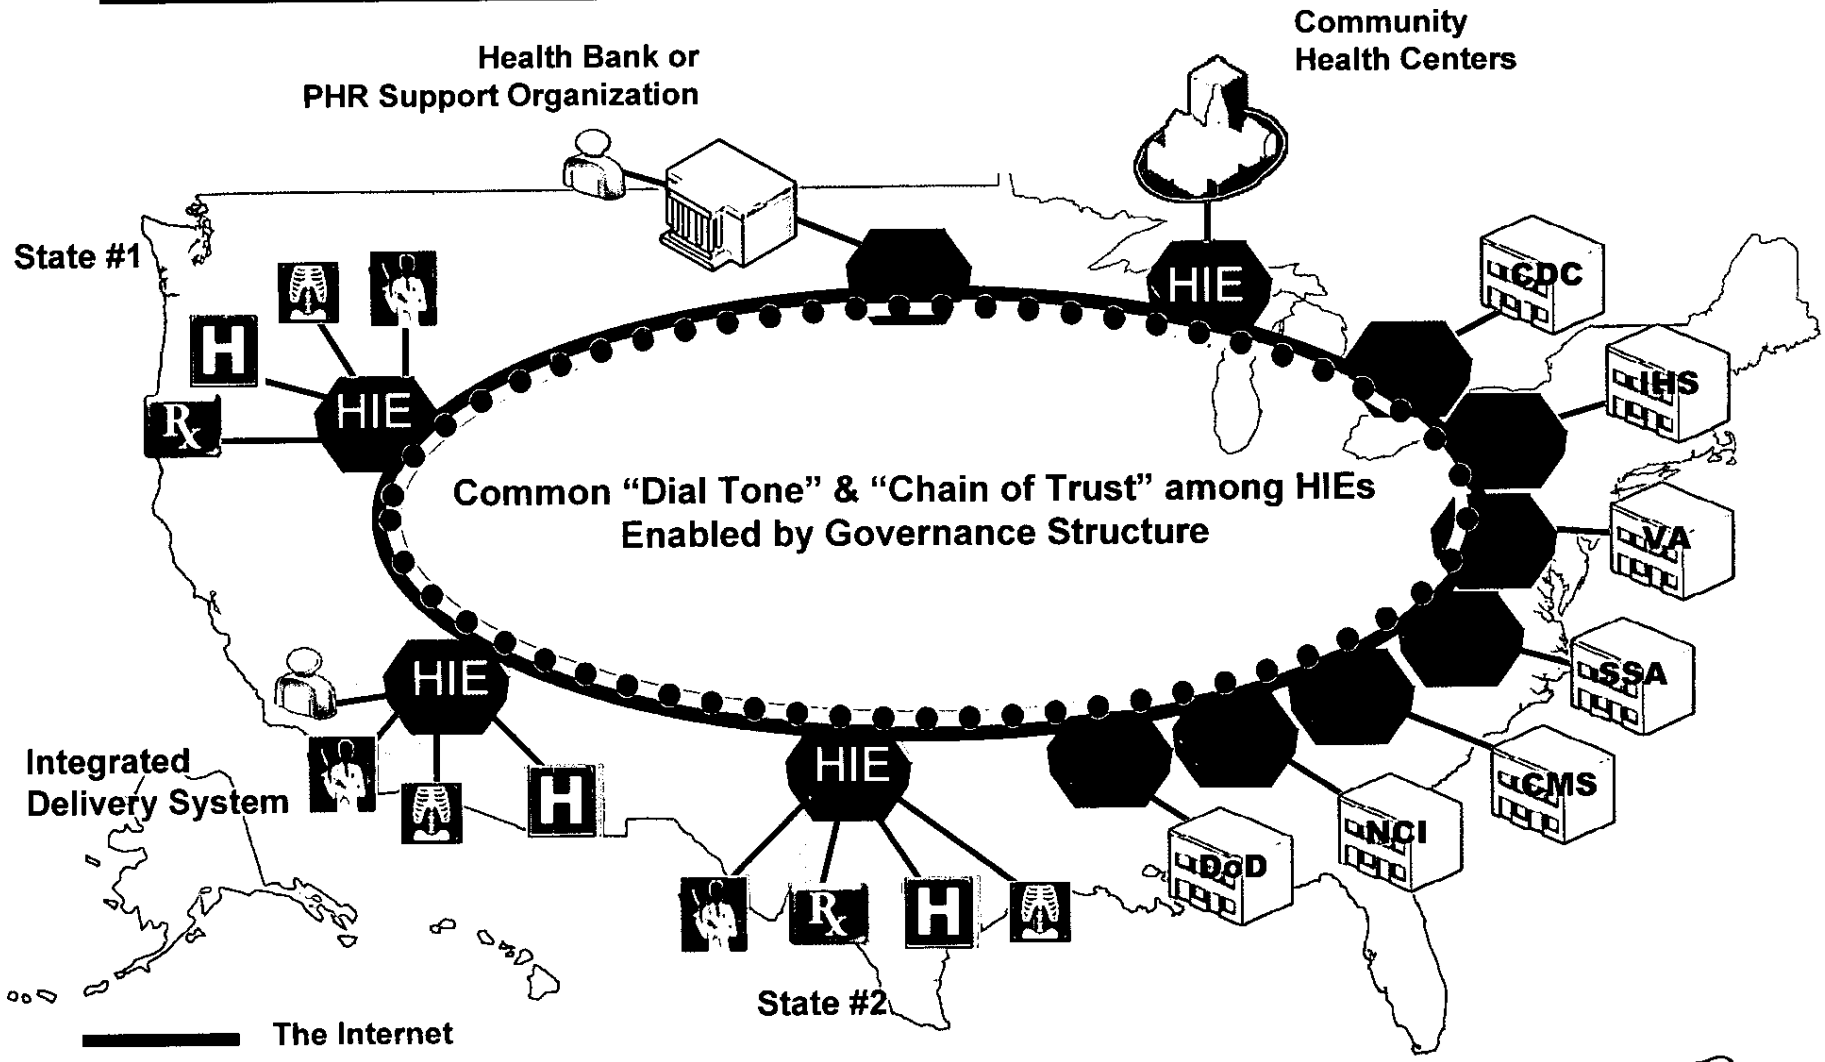
- State of Alaska plays a ***key role as a partner*** in Alaska's developing Health Information Exchange

3722

Health Information Exchanges: National effort: State Solutions

- Statewide and regional health information exchanges have developed over the last 10 years in other states
- "National Health Information Network" concept created in Bush administration and enhanced in Obama administration through ARRA 2009 stimulus
- Successful State Models:
  - DHIN - Delaware Health Information Network
  - CalRHIO – California, Los Angeles County
  - FHIN – Florida Health Information Network
  - Regenstrief – Indiana Eight County Network

NHIN "Network of Networks"



Health Information Exchanges: Providing timely, safer care

- Provide rapid access by authorized providers to critical patient information at the point of care

medical history	allergies
medication status	laboratory reports
immunization status	imaging reports

- Reduce redundancy in medical testing and procedures
- Improve patient safety through reducing medication reconciliation errors
- Reduce provider administrative costs for data management
- Expedited response to public health emergencies

Health Information Exchanges: Respecting Patient Privacy

- Do not require centralized patient health record repositories: health providers continue to own their records
- Facilitate connectivity with patient's Personal Health Record choices
- Respect patient decisions to opt-out of network participation
- Provide significant penalties for data breaches

3726

Health Information Exchanges: Saving money

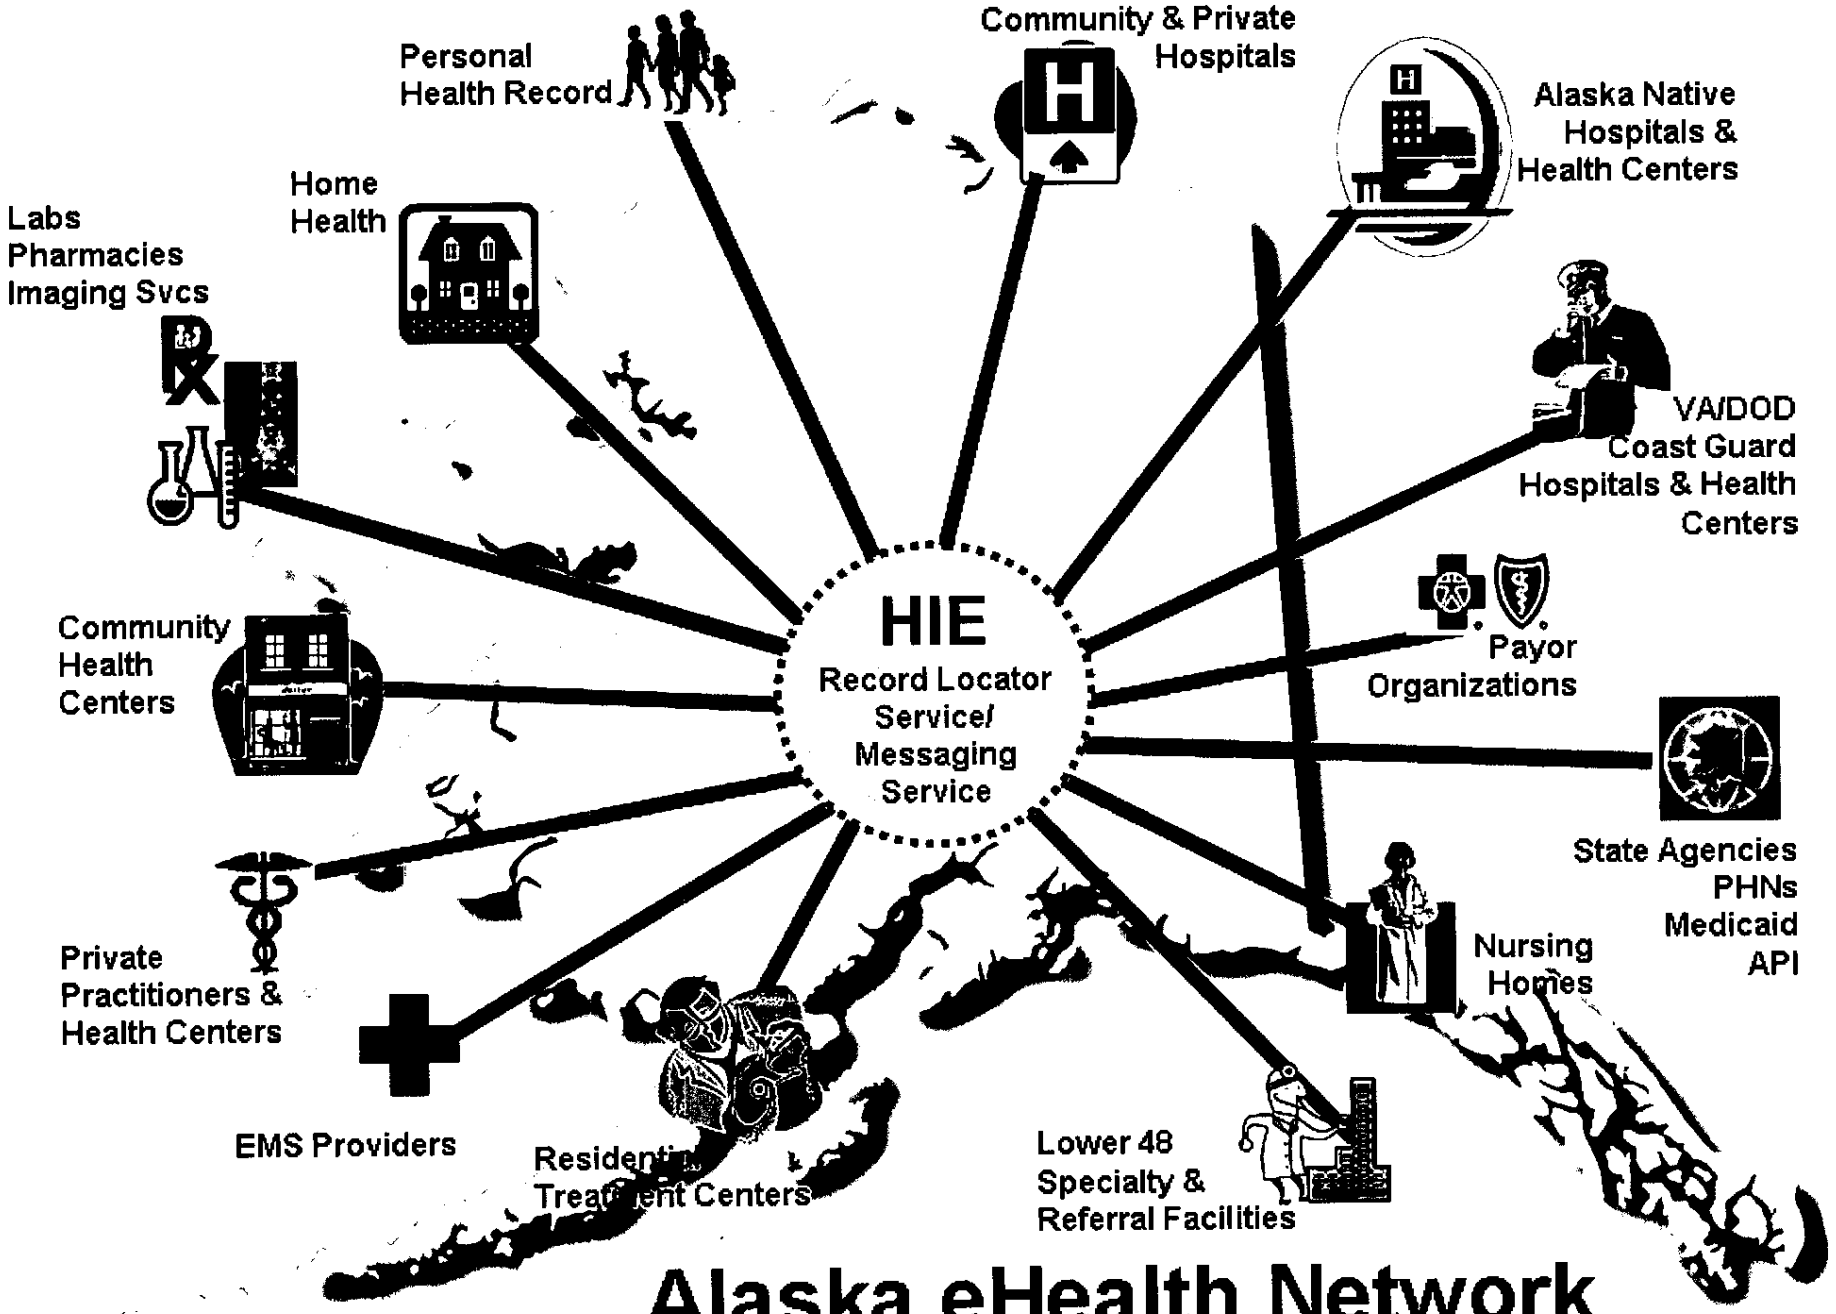
- Federal and private research projects 5% savings in annual U.S. health care expenditures from full deployment of inter-operable electronic medical records
- For Alaska's $5B health care industry, annual savings could reach $250M.
- For the State of Alaska's $250M GF Medicaid expenditures, annual savings could exceed $10M

3727

Alaska eHealth Network

- **5 year $35 million project** to deploy a secure network supporting the exchange of electronic health records between all Alaska health care providers

- **$12.0 million currently awarded** through 2008 from Federal Communications Commission, US Dept. of Health and Human Services, State of Alaska, Alaska Federal Health Care Partnership



Alaska eHealth Network

- Jay Butler, M.D.
- Jerome List, M.D.
- Tom Nighswander, M.D.
- Joel Gilbertson
- Marilyn Walsh-Kasmar
- Pat Luby
- Paul Sherry
- Rod Betit

3733

Progress to Date: 2007-2008

- Participation in determining national privacy standards and technology interoperability standards
- Contract for technical network design awarded to GCI; determining requirements for needed broadband connectivity for Alaska health providers
- FCC grant funding is now available for health provider network technology acquisitions in 2009 and 2010

Next Steps: 2009-2010

- Complete network design and assist providers with connectivity
- Secure AeHN designation as Alaska's qualified Health Information Exchange organization
- Secure $20M+ from $19B available federal ARRA funding to acquire Health Information Exchange software

Next Steps: 2009-2010

- Secure $1.3M for FY2010 and $1.0M in FY2011 from State of Alaska for network development
  - Ensures match for federal stimulus funds
- Engage contractor/vendors to deploy Health Information "bridging" software to interconnect Alaska's various Electronic Medical Records systems
- Align the Health Information Exchange with State systems: MMIS, API, Public Health data
- Add Internet2 connectivity for telemedicine applications, teleconferencing, voice-over-internet, and consults from lower-48 academic/teaching hospitals

3736

Sustainability: FY2011+

Establish the Alaska eHeath Network business structure to sustain network and software services through provider and payor contributions

AeHN Estimated recurring costs after FY11: $5.0M

$1.3M administration/business operations

$3.7M contractual HIE technical/software services

Estimated recurring AeHN revenues after FY11: $5.0M

- $1.5M 1500+ physicians/clinicians
- $0.5M 26 Hospitals
- $0.5M Laboratories/Pharmacies/Imaging Centers
- $1.0M State of Alaska
- $1.0M Private Insurers
- $0.5M Alaska Federal Health Care partners

3737

SB133 Facilitates HIE development

- Positions Alaska for substantial stimulus funding
- Demonstrates state commitment to support and participate in Alaska's Health Information Exchange development
- Provides for DHSS oversight, engagement, and long-term participation plan
- Provides framework for designation of a qualified state Health Information Exchange entity
- Ensures privacy protections

Alaskan's support Health Information Exchange

- Partner organization support: hospitals, physicians, tribal health, insurers, citizens, community health centers, employers, federal health providers
- Alaska Health Care Commission short term priority area
- Strong Congressional delegation support

3739

Summary recommendations

- A. Passage of SB133
- B. State DHSS oversight, support, and designation of HIE organization
- C. Provide stimulus match of $1.3M in FY10 and $1.0M in FY11

The outcomes:

- Timelier access to safer health care for Alaskans

- $1M annual State investment yields ~5% savings in future State expenses for Medicaid, employee health care, state-operated health care programs

SENATE MAJORITY LEADER
JOHNNY ELLIS

FREQUENTLY ASKED QUESTIONS
ABOUT UNEMPLOYMENT INSURANCE MODERNIZATION FUNDING IN THE FEDERAL STIMULUS

The American Recovery and Reinvestment Act of 2009, better known as the federal stimulus, has been the subject of intense scrutiny here in Alaska and around the country. Because of the amount of interest and complexity of the stimulus bill, there has been significant confusion about a number of specific points. In the interest of ensuring accuracy in the conversation around Senate Bill 170 and the unemployment insurance funds in the federal stimulus, this sheet attempts to address some of those common misconceptions around the specific changes proposed in this bill.

Q: What changes Alaska must make to our unemployment insurance program to be eligible for the modernization incentive? Many states are concerned that changes to the UI statutes will require significant expansions of eligibility requirements.

A: The US Department of Labor has certified that **Alaska already meets two of the three qualifications** for the unemployment insurance modernization incentive funds. The first third of the money is contingent on a state including an alternative base period to determine eligibility, which is the change SB170 proposes. The second two-thirds are based on a state allowing UI payments to be made to unemployed workers who fit at least two of the following four conditions: part-time workers, workers enrolled in training programs, workers who leave their jobs for compelling family reasons, and additional benefits for workers with dependents. Alaska already meets the final two categories, making further change unnecessary. Many other states need to make all three changes.

Q: Won't those changes mean increased numbers of people receiving UI benefits and increase business taxes over the long term?

A: The Alaska Department of Labor has determined that had the changes in SB170 been in effect in calendar year 2008, 1,300 additional people would have been eligible for $1.9 million in payments. The amount necessary to keep the UI trust fund solvent, given the current balance of over $350 million, is significantly less than the amount offered by the federal government. After seeing these calculations, the **National Federation of Independent Business – Alaska endorsed SB170** as "a relatively simple administrative change the cost of which will be born by stimulus funding. . . This is good for individual Alaskans, employers, and Alaska's economy."

Q: What is the effect on state government of accepting short-term federal money? Will we be forced to close down the existing programs or replace the federal dollars with state funds?

A: While the stimulus does not mandate that any federal funds be replaced, the unemployment insurance modernization funds provided are **more than enough to cover the costs of the expansion indefinitely**. The state Department of Labor is determining exactly how much of the

$15.6 million Alaska would be eligible for if SB170 is adopted would need to be deposited in the UI trust fund to maintain solvency, but it is expected to be significantly less than the available total, freeing up the rest of the money to support job training and workforce development programs.

Q: If all the money is not necessary to shore up the UI trust fund, what will be done with it, and how can we be assured that it will not create a long-term growth in government?

A: The UI modernization incentive funds are eligible to be used for three purposes: paying UI benefits, administering the UI program, or job training programs. It is our intent that funding in excess of the amount required to pay benefits without increasing taxes would be appropriated to support job training. Alaska is currently facing the highest unemployment rates in a generation, and we are facing a massive shortage of qualified workers as we approach construction on a natural gas pipeline. The confluence of these two events makes the timing perfect for a **highly targeted short term expansion of workforce development programs**, the need for which will decline as the federal money runs out.

Q: Are these stimulus funds a backdoor approach to increasing state spending through the requirement of a state match?

A: There are some stimulus programs that require a state match component to participate, but the UI modernization is not one of them. It is also worth noting that other stimulus programs serve to reduce state spending, either by increasing federal reimbursement levels or eliminating state match components altogether.

Q: Some are concerned about the impact of the federal stimulus package on the overall federal debt. Many of these criticisms portray the stimulus package as burdening the future and passing debt on to future generations.

A: The federal debt is a very serious issue, and significant action must be taken to undo the fiscal impacts of the last eight years and return to the surpluses left by the Clinton Administration. Unfortunately, **state action on the stimulus cannot have any impact**. All funds have already been appropriated by the federal government, and any moneys not accepted by Alaska will be re-routed to other states that are willing to take advantage of them – many of which have already stated their willingness to do so due to the hardships caused by the current economic downturn.

Q: A major consideration for some has been potential strings attached to federal funds, and what a change in statute now means for the future.

A: Any changes to state statute that are made to maximize federal funding are done freely, after a detailed examination of the positive and negative attributes of the package. While the unemployment insurance section of the stimulus explicitly prohibits sunset clauses or temporary provisions, there is **no prohibition on future legislatures re-examining the program** and making whatever changes they see fit.

Q: Doesn't increasing our reliance on federal funding create a potential loss of state sovereignty? Many are concerned that the stimulus funds represent a marked increase in moneys contingent on compliance with federal mandates.

A: The fiscal year 2010 operating budget contains approximately $2.8 billion in federal funds, almost all attached to highly specific instructions on how it may be spent. Since its inception, the state of Alaska has received tens of billions of dollars from the federal government, and our delegation to Congress, most notably Sen. Ted Stevens, has made careers out of maximizing the number of federal dollars that flow into our state.

CS for SB 133

Explanation of Changes

Added Flexibility

The CS reflects new language to provide the department with some added flexibility while maintaining the integrity of multiple stakeholder participation. *(Page 4, Lines 7-10)*

The department now has the option to designate one entity or a combination of entities to fulfill the purposes of Section 2. The department may designate the state, an outside vendor, and/or a nonprofit to fulfill the purposes of Section 2.

Any and all entities designated must meet the same requirements which include:

- Have an advisory or governing body made up of health system stakeholders
- Apply for available federal and state funding for planning and implementation of the system
- Meet the most stringent applicable federal or state privacy law governing the protection of the information contained in the system.
- Submit an annual budget for approval of the commissioner
- Provide cost and cost saving data associated with the development and use of the system

Clear Responsibilities

Section 18.23.305 was added in the CS to more clearly establish the Department's duties.. *(Page 4, Line 22 – Page 5, Line 2)*

- in accordance with federal recommendations, determine the manner in which the system is developed and operated
- provide oversight and technical assistance needed for planning and implementing the system
- authorize and facilitate applications for available federal funding for planning and implementing the system
- ensure compliance with applicable federal and state health information policies and standards
- ensure compliance with federal and state law and standards that safeguard the privacy and security of health information

Clarification of Board Membership

The CS places specific advisory/governing board membership requirements. *(Page 4, Lines 11-21)*

Interoperable Statewide Health Information Exchange (HIE)

State Medicaid General Fund and Alaska Health Care System Cost Savings Projections

Annual Medicaid State General Funds	Net Value Percentage	Annual Net Value of HIE*	
$248,544,000	4.68%	$11,631,859	Based on standard cost benefit model
$248,544,000	3.69%	$9,171,274	Based on high-cost HIE model
$248,544,000	5.70%	$14,167,008	Based on low-cost HIE model

Annual AK Health Care Spending	Net Value Percentage	Annual Net Value of HIE*	
$5,294,000,000	4.68%	$247,759,200	Based on standard cost benefit model
$5,294,000,000	3.69%	$195,348,600	Based on high-cost HIE model
$5,294,000,000	5.70%	$301,758,000	Based on low-cost HIE model

*Full Annual Net Value realized beginning 2013

Assumptions:

Fully standardized and fully implemented statewide interoperable Health Information Exchange
State Medicaid GF budget based on Gov 09 Request for Medicaid Services Component only
State Medicaid GF budget remains flat
Annual AK Health Care Spending remains flat
Based on national cost benefit model (see Sources):
- Cost savings: 5.68% of annual health care expenditures, minus cost: 1% of annual health care expenditures
- National cost benefit model calculates projected cost savings based on projected efficiencies in laboratory testing, imaging procedures, interactions between outpatient providers and pharmacies, provider to provider connectivity, provider to public health agency connectivity, and provider-payer transactions

Alaska HISPC Implementation Project Summary and Impact Analysis Report

Executive Summary:

Alaska, like the rest of the United States, faces challenges in addressing increasing health care costs, improving access to medical care, and ensuring and improving quality medical care for patients. Timely access to essential medical information by providers at the point of care is critical to good outcomes for the patients. A statewide initiative is working to address these challenges by promoting the expansion of the use of electronic health records by Alaska's medical providers and by establishing a statewide electronic health information exchange delivery system to provide critical information when and where it is needed.

Alaska health care leaders and members of the Alaska Telehealth Advisory Council formed the Alaska Regional Health Information Organization to look at innovative technology solutions targeted toward lowering costs and preventing medical errors. To accomplish this goal the Alaska RHIO, with the support of the Alaska Governor's office, successfully competed for a national contract to focus on issues of security and privacy as related to health information exchange. In January 2007, the Alaska RHIO was reorganized as Alaska ChartLink.

The Health Information Security and Privacy Collaboration (HISPC) is part of a national effort to encourage wider adoption of Electronic Health Records (EHRs) and establish a Health Information Exchange (HIE) network in Alaska and throughout the United States. Participation in this national initiative gives a voice to Alaska specific issues, needs, and recommendations in the development of national policies as related to security, privacy and best business practices surrounding interoperability of health information exchange.

Phase I of the HISPC contract provided an assessment of the privacy and security climate in Alaska as it relates to health information exchange. The findings from this assessment determined a number of action steps that needed to be addressed in order for Alaskans to begin exchanging electronic health information. Key areas of action included:

- Legal solutions for enacting legislation related to medical records and the electronic exchange of health information,
- Standardized policies and procedures for use across participating organizations,
- Participation agreements for use by participating organizations and consumers, and
- Education and marketing tailored to consumers and providers encouraging use of electronic health records.

Alaska HISPC Implementation Project Summary and Impact Analysis Report

Phase II of the HISPC contract provided an opportunity for Alaska to implement selected solutions developed during Phase I and to participate in a national collaborative security and privacy think tank. In particular, the Alaska HISPC contract produced three products:

1. Five essential documents providing a standardized approach to the exchange of health information and addressing privacy and security concerns.
2. A Communications Plan and educational materials targeted toward patients, providers, and payers, that addressed the benefits of exchanging critical medical information in a secure manner that ensures patient privacy.
3. A collaborative report developed in conjunction with Guam, Iowa, New Jersey, North Carolina, North Dakota, Puerto Rico, and South Dakota addressing multi-state inter-organizational agreements for health information exchange.

Volunteers from across the state participated in the HISPC project. Over 250 Alaska citizens participated in stakeholder meetings held in both urban and rural locations. Participants included; healthcare consumers, public, private and federal providers, payers, state and municipal workers, healthcare professionals, lawyers and employers. These dedicated individuals provided valuable insights into the needs, desires and fears associated with electronic health information. The documents created through the exchanges with the citizens of Alaska provide a sound basis for the ongoing development of health information exchange in Alaska.

V. Conclusion

Phase I of the HISPC contract provided an assessment of the privacy and security climate in Alaska as it relates to health information exchange. The findings from this assessment determined a number of action steps that needed to be addressed in order for Alaskans to begin exchanging electronic health information. Key areas of action included:

- Legal solutions for enacting legislation related to medical records and the electronic exchange of health information,
- Standardized policies and procedures for use across participating organizations,
- Participation agreements for use by participating agreements and consumers, and
- Education and marketing tailored to consumers and providers encouraging use of electronic health records.

Phase II of the HISPC contract provided an opportunity for Alaska to implement selected solutions developed during Phase I and to participate in a national collaborative security and privacy think tank. In particular, the Alaska HISPC contract produced three products:

1. Six essential documents providing a standardized approach to the exchange of health information and addressing privacy and security concerns.
2. A Communications Plan and educational materials targeted toward patients, providers, and payers addressing the benefits of electronic health records, personal health records, and exchanging critical medical information in a secure manner that ensures patient privacy.
3. A collaborative report developed in conjunction with Guam, Iowa, New Jersey, North Carolina, North Dakota, Puerto Rico, and South Dakota addressing multi-state inter-organizational agreements for health information exchange.

In addition to the products developed during the HISPC contract, the Alaska partners received additional benefits:

The HISPC project has helped to increase awareness of electronic health records and health information exchange in both consumers and providers throughout the state. Processes are now in place to continue this awareness campaign.

Prior to this project there was no coordinated statewide approach to addressing issues of privacy and security. Standardized policies, procedures, and participation agreements are now available for use statewide.

The collaborative process initiated by HISPC facilitated the exchange of ideas and lessons learned between many states. It was an opportunity for Alaska's Core Team to share and receive "best practice" solutions to privacy and security issues.

The HISPC project created an opportunity for Alaska to advance the HIE and EHR initiatives within Alaska and has opened the door to potential future grant opportunities.

Updating Privacy Laws to Facilitate Health Information Exchange

Consumer and provider concerns about privacy and security are inhibiting adoption of health IT. Consumers are concerned about the consequences of disclosure of sensitive health information related to dire or stigmatized diseases, such as the loss of health coverage or employment. Providers, concerned about varying interpretations of state and federal privacy laws and the liability for violations, often are reluctant to exchange data. State updates to health privacy laws can help alleviate these and other concerns. Trends identified in enacted legislation include the following.

Comprehensive Reform

Key policy decisions for states that want to update privacy laws to allow for health information exchange include structuring patient consent, addressing provider concerns and establishing accountability mechanisms.

Structuring Patient Consent

States face key questions on the issue of patient consent. Under what circumstances should patient consent be required? How should consent be structured (opt-in, opt-out)? Will patients have to choose between including all their information for exchange or none? Or will patients be able to choose specific information to share? As states set policy on consent, a number of competing issues must be balanced, including: patients' desire to control data, providers' concern about having access to all relevant information for treatment, and implementation costs for providers and health information exchanges.

Provider Concerns

Providers, understandably, want access to all relevant patient information at time of treatment. They are concerned about liability if they treat a patient based on incorrect or missing data obtained from a health information exchange. Providers also are concerned about the cost of implementing privacy rules and their effect on practice workflows.

Accountability

States need to structure regulations and penalties so that patient, provider and health information exchange needs are balanced.

3750

Minnesota and Rhode Island passed health privacy updates as part of comprehensive health IT measures. A comparison of the privacy portion of the bills illustrates the differing paths states take as they attempt to capture the benefits of mobile health data and temper the associated risks (Table 1).

Table 1. Comparison of Privacy Provisions from Minnesota and Rhode Island

	Minnesota *Minnesota Health Records Act*	**Rhode Island** *Rhode Island Health Information Exchange Act of 2008*
Bill	2007 HB 1078	2008 HB 7409
Status	Enacted 5/25/07	Enacted 7/10/2008
Summary	Allows creation of record locator services (RLS). An RLS is an electronic index of patient identifying information that directs providers to the location of patient health records held by providers and group purchasers.	Establishes a statewide health information exchange (HIE) under state authority. Designates the Rhode Island Quality Institute as the governance body or regional health information organization (RHIO) for the HIE.
Putting Patient Data into the System	An RLS can be created without patient consent. Patients have the right to opt-out of the RLS in total or can exclude specific provider contacts from the system.	Patients must opt in for their data to be included in the HIE.
Consent for Access	Consent is required to search an RLS for the location of a patient's records except in an emergency. To facilitate the real-time exchange of data, one provider can electronically represent patient consent to another. To do so, a provider must have a signed and dated patient consent form authorizing the release. In addition, the provider releasing the record shall document: 1) the provider requesting the health records; 2) the identity of the patient; 3) the health records requested; and 4) the date the health records were requested.	Patients who opt in can choose which providers have access to their data. If a patient opts in their authorization is not required for release to: • public health authorities for specified functions; • health care providers for diagnosis or treatment in an emergency; and • the RHIO for operation and administrative oversight of the HIE.

3751

Table 1. Comparison of Privacy Provisions from Minnesota and Rhode Island (continued)

	Minnesota *Minnesota Health Records Act*	**Rhode Island** *Rhode Island Health Information Exchange Act of 2008*
Audit Log	RLS must maintain an audit log of providers who access a patient's information. The log must contain at least the following: 1) the identity of the provider accessing the information; 2) the identity of the patient whose information was accessed by the provider; and 3) the date the information was accessed.	Patients have the following rights: (a) to obtain a copy of their health care information from the HIE; (b) to obtain a copy of the disclosure report pertaining to their health care information; (c) to be notified of a breach of the HIE security system; (d) to terminate participation in the HIE; and (e) to request to amend their information through the provider participant.
Provider Liability	(b) When requesting health records using consent, or a representation of holding a consent, a provider warrants that the request: 1) contains no information known to the provider to be false; 2) accurately states the patient's desire to have health records disclosed or that there is specific authorization in law; and 3) does not exceed any limits imposed by the patient in the consent.	Provides immunity to health care providers who rely in good faith upon information provided through the HIE in the treatment of a patient.
Penalties	An RLS is liable for inappropriate disclosures of information. Anyone who inappropriately discloses a patient's data is liable for compensatory damages caused by an unauthorized release, plus costs and reasonable attorneys' fees. Providers who violate the statute can face disciplinary action by the appropriate licensing board or agency.	The bill establishes civil and criminal penalties for violations of the statute. Attorneys' fees may be awarded by the court to the successful party in any action under this chapter.

Other Strategies

Make HIPAA the Rule

Nevada specifies that the Health Insurance Portability and Accountability Act (HIPAA) shall preempt any more stringent state laws related to the electronic exchange of health information by covered entities. The bill allows patients to not participate in electronic transmission of individually identifiable health information, with an exception for Medicaid and SCHIP patients and when required by HIPAA or state law.

> Nevada SB 536 *Section 1 1. "If a covered entity transmits electronically individually identifiable health information in compliance with the provisions of the Health Insurance Portability and Accountability Act of 1996, Public Law 104-191, which govern the electronic transmission of such information, the covered entity is, for purposes of the electronic transmission, exempt from any state law that contains more stringent requirements or provisions concerning the privacy or confidentiality of individually identifiable health information."*

Address Varying Interpretations of State and Federal Privacy Laws

To address differing interpretations and application of federal and state privacy laws, the Oklahoma Legislature ordered the State Board of Health to create a standard authorization form for exchange of health information. Providers who use the form and follow the board's instructions are immunized from liability under state privacy laws that may arise from the exchange of health information. Use of the form is not required. (Oklahoma SB 1420)

Data Breach Notification

California AB 1298 expands the state's data breach notification law to include unencrypted medical information and health insurance information. The bill also expands the definition of provider of health care under the state's Confidentiality of Medical Information Act to cover third-party vendors of personal health records such as Google and Microsoft. HIPAA and most state health privacy laws do not cover personal health records maintained by third-party vendors.

E-prescribing

A few states prohibit e-prescribing systems from influencing provider prescribing practices. New Hampshire passed the most comprehensive of these bills, which included the following language to prohibit use of prescription information by certain parties:

> New Hampshire HB 134 *"(e) No person who has access to electronic prescription information solely by transmitting or facilitating the transmission of prescriptions between the licensed prescriber generating the prescription and the pharmacy receiving the prescription, or any intermediary, shall retain the prescription or any information it contains for longer than is mandated by federal or state law, after which time the prescription information shall be destroyed. No such person shall sell, use, or otherwise make available the prescription information for any purpose other than transmission of prescriptions, prescription refills, and clinical information displayed to the prescriber or pharmacist."*

3753

Promoting Health Information Exchange

States are working to advance health information exchange by promoting interoperable health IT tools and by establishing and sustaining health information exchange organizations and infrastructure. Interoperability, combined with state initiatives to create health information exchange organizations is essential to states efforts to achieve quality improvements and reduce duplicative tests. Trends identified in the enacted legislation include the following.

Interoperability

Interoperability allows different systems to share information in an understandable format. Uniform data standards are essential to achieving this capability among health IT systems. At the national level, the Healthcare Information Technology Standards Panel is establishing standards, and the Certification Commission for Healthcare Information Technology certifying products. State approaches to encourage interoperability vary. Some states adopted these standards by reference, while others designated a state agency or outside group to establish standards. To encourage use of the standards, states can require agencies to purchase only standards-based systems. States also can require specific functions for health IT systems sold within their borders.

Require Purchase of Certified Systems

Minnesota mandated interoperable electronic health records by 2015 for all hospital and health care providers. To meet the interoperability standards set by statute, providers must use an electronic health records system certified by the Certification Commission for Healthcare Information Technology or its successor. An exception is included in the legislation for specialists whose practice setting the Certification Commission for Healthcare Information Technology doesn't certify electronic health records for. (Minnesota SB 3780)

Use State Agency Purchasing Requirements

Virginia HB 2198 requires that electronic health records systems or other tools that interact with electronic patient information purchased by state agencies meet interoperability standards or be certified by a recognized certification body. The bill also requires state agencies that provide grants available to other entities for such systems ensure that the systems meet interoperability standards or be certified by a recognized certification body.

3754

Create Standards and Require Use to Exchange Data

Utah HB 47 authorizes the Department of Health to adopt standards for electronic health information exchange. Payers and providers must use the standards adopted by the department to electronically exchange health information between health care systems. Payers and providers are not required to use the standards if they electronically exchange health information within a health care system.

Require Certain Functions

Texas SB 204 requires that electronic medical record systems sold to Texas health care providers who administer immunizations be able to interface with the state immunization registry.

Create or Designate a State-level Health Information Exchange

Many early health information exchange efforts began in the private sector, and state governments were asked to join. The current wave of health information exchanges, by contrast, is as likely to originate at the state level. Texas and Indiana created bodies to run the state-level health information exchange; and Connecticut, Vermont and Rhode Island designated existing independent nonprofit entities. Whether they create new entities or bless existing activities, statutes that define a state-level health information exchange confer formal status and authority, charge the health information exchange to promote health IT in both private and public sectors, define governance to include state agencies, and determine that they may receive and disburse funds on behalf of statewide health IT initiatives. Beyond these broad elements, various models have been adopted, reflecting existing activity in the state. Statutes that create these entities typically are comprehensive measures that, among other things, include: start-up support for a designated group, a state governance role, ongoing funding, and unique state-level responsibilities.

Appendix A compares legislation from Indiana, Texas and Vermont that creates or designates a state-level health information exchange.

Advancing Adoption and Use

States are drawing on a wide range of policy levers to expand the use of health IT. These include mandates, incentives and leveraging state purchasing power. Trends identified in the enacted legislation include the following.

Mandates

Minnesota and Massachusetts have enacted mandates for the use of health IT tools. A few other states considered such mandates but did not enact them.

Mandate Purchase

Minnesota enacted two mandates for the purchase of health IT systems. The first requires hospitals and health care providers to have interoperable electronic health records systems by 2015. (Minnesota HB 1078) The second requires that, by 2011, all providers, group purchasers, prescribers and dispensers establish and maintain e-prescribing systems. (Minnesota SB 3780)

Tie Facility Licensure to Health IT System Implementation

Massachusetts tied implementation of computerized physician order entry and electronic health records to facility licensure standards for hospitals and community health centers. The Department of Public Health is charged with adopting regulations to require implementation of computerized physician order entry by Oct. 1, 2012, and of electronic health records by Oct. 1, 2015. The systems are to be certified by the Certification Commission for Healthcare Information Technology or its successor. (Massachusetts SB 2863)

Require health IT competency for physician licensure.

(Massachusetts SB 2863) *"The board shall require, as a standard of eligibility for licensure, that applicants show a predetermined level of competency in the use of computerized physician order entry, e-prescribing, electronic health records and other forms of health information technology, as determined by the board."*

3756

Incentives

Link Medical School Loan Repayment to Health IT Competency

Massachusetts created a workforce loan repayment assistance program for graduates of medical or nursing schools who specialize in areas where practitioners are in short supply. Among other eligibility requirements for the program is demonstration of competency with certain health IT tools. (Massachusetts SB 2863)

Offer Tax Credits

Wisconsin SB 40 creates a tax credit for providers who purchase electronic medical records. Providers can claim up to 50 percent of the cost of the system, to a maximum of $10 million per year.

Leverage State Purchasing Power

States are leveraging their role as a purchaser and provider of care to drive adoption and use of health IT.

Offer Incentive Payments for Electronic Health Records Use

New York SB 6808 allows providers who meet certain standards set by the Department of Health to receive supplemental payments for the increased cost of using electronic health records. To receive the payments, a provider must have an operating electronic health records system, and a set percentage of patients must be on Medicaid or uninsured.

Provide Targeted Reimbursement

Colorado SB 196 provides medical assistance program reimbursement for home and community services delivered via telemedicine.

Leverage State Employee Health Plan

Minnesota HB 548 creates a pilot program to provide a consumer-owned portable personal health record to members of the state employee health plan.

Appendix A. Comparison of Health Information Exchange Legislation in Three States

	Indiana *Indiana Health Informatics Corporation*	**Texas** *Texas Health Services Authority Corporation*	**Vermont** *Vermont Information Technology Leaders*
Bill	**2007 IN S 551**	**2007 TX H 1066**	**2007 VT H 229**
Status	Enacted 5/2/07	Enacted 6/15/07	Enacted 6/5/07
Project's Role within State Health IT Activities			
	Chapter 5. General Powers Sec. 1. The corporation shall encourage and facilitate the development of health informatics functions in Indiana. Sec. 2. The corporation is granted all powers necessary or appropriate to carry out the corporation's public and corporate purposes under this article. Chapter 7. Expiration Corporation will expire on June 30, 2015.	Section 182.051 (a) Created to promote the establishment of a voluntary statewide network for the communication of electronic health information and to foster a coordinated public-private initiative for the development and operation of the health information infrastructure in the state.	Amends the scope of work of the Vermont Information Technology Leaders (VITL, a non-profit organization incorporated in 2005). Section 903 (c) VITL shall develop the states health information technology plan. Designates VITL to operate the statewide health information exchange network.
Organizational Structure			
	Chapter 3. Indiana Health Informatics Corporation Sec. 2. (a) The corporation is a body politic and corporate, not a state agency but an independent instrumentality exercising essential public functions.	Sec.A182.051. Texas Health Services Authority; Purpose. ... (b) The corporation is a public nonprofit corporation and, except as otherwise provided in this chapter, has all the powers and duties incident to a nonprofit corporation under the Business Organizations Code.	VITL is a nonprofit corporation.

	Indiana *Indiana Health Informatics Corporation*	Texas *Texas Health Services Authority Corporation*	Vermont *Vermont Information Technology Leaders*
Bill	**2007 IN S 551**	**2007 TX H 1066**	**2007 VT H 229**
Status	Enacted 5/2/07	Enacted 6/15/07	Enacted 6/5/07
Board Membership			
	Chapter 4. Corporation Board Sec. 1. The corporation shall be governed by a board. Sec. 2. (a) The board is composed of the following nine (9) members, none of whom may be a member of the general assembly: (1) The secretary of family and social services, or the secretary's designee. (2) The state health commissioner, or the state health commissioner's designee. (3) Seven (7) individuals appointed by the governor, of which at least: (A) one (1) individual must be a licensed physician who is actively engaged in the practice of medicine; and (B) one (1) individual must be engaged in the administration of a hospital licensed under IC 16-21.	Sec.A182.053.AA Composition Of Board Of Directors. (a) The corporation is governed by a board of 11 directors appointed by the governor, with the advice and consent of the senate. (b) The governor shall also appoint at least two ex officio, nonvoting members representing the Department of State Health Services. (c) The governor shall appoint as voting board members individuals who represent consumers, clinical laboratories, health benefit plans, hospitals, regional health information exchange initiatives, pharmacies, physicians, or rural health providers, or who possess expertise in any other area the governor finds necessary for the successful operation of the corporation.	Sec. 903. Health Information Technology (d) The following persons shall be members of VITL: (1) the commissioner, who shall advise the group on technology best practices and the state's information technology policies and procedures, including the need for a functionality assessment and feasibility study related to establishing an electronic health information infrastructure under this section; (2) the director of the office of Vermont health access or his or her designee; (3) the commissioner of health or his or her designee; and (4) the commissioner of banking, insurance, securities, and health care administration or his or her designee.

3759

Financing			
	Chapter 5. General Powers Section 11 The corporation may request appropriations from the general assembly to: 1) carry out the corporation's duties under this article; and 2) fund the effort to develop and operate a statewide health information network. Section 12. (a) The Indiana health informatics fund is established. ...the corporation shall deposit the following in the fund: (1) All appropriations made by the general assembly to the corporation (2) All funding received from nonprofit entities under IC 5-31-6-2(4). (3)All other contributions received by the corporation from a nonprofit entity, as long as the nonprofit entity does not otherwise have an interest in the decisions of the corporation or board.	Sec. 182.107 (a) The corporation may be funded through the General Appropriations Act and may request, accept, and use gifts and grants as necessary to implement its functions. (b) The corporation may assess transaction, convenience, or subscription fees to cover costs associated with implementing its functions. All fees must be voluntary but receipt of services provided by the corporation may be conditioned on payment of fees. (c) The corporation may participate in other revenue-generating activities that are consistent with the corporation's purposes.	Sec. 903 (a)(8)(g) By July 1, 2007, shall prepare a plan for achieving self-sustainable funding, including an analysis of the costs, benefits, and effectiveness of any pilot projects. (i) VITL is authorized to seek matching funds...In addition, it may accept any and all donations, gifts and grants of money, equipment, supplies, materials, and services from the federal or any local government, or any agency thereof, and from any person, firm or corporation for any of its purposes and functions under this section and may receive and use the same, subject to the terms, conditions, and regulations governing such donations, gifts, and grants.

Privacy and Security			
	Chapter 6. Duties Sec. 3. The corporation's plan to create the statewide health information exchange system must provide for procedures and security policies to ensure the following: (1) Compliance with the federal Health Insurance Portability and Accountability Act (HIPAA) (P.L. 104-191). (2) Protection of information privacy. (3) Use of information in the statewide health information exchange system only in accordance with the federal Health Insurance Portability and Accountability Act (HIPAA) (P.L.104-191) and as required by public health agencies.	Sec. 182.104.AASecurity Compliance. The corporation shall: (1) establish appropriate security standards to protect both the transmission and the receipt of individually identifiable health information or health care data; (2) establish appropriate security standards to protect access to any individually identifiable health information or health care data collected, assembled, or maintained by the corporation; (3) establish the highest levels of security and protection for access to and control of individually identifiable health information, including mental health care data and data relating to specific disease status, that is governed by more stringent state or federal privacy laws; and	Sec. 903. Health Information Technology (f) The standards and protocols developed by VITL shall be no less stringent than the "Standards for Privacy of Individually Identifiable Health Information" established under the Health Insurance Portability and Accountability Act of 1996 and contained in 45 C.F.R., Parts 160 and 164, and any subsequent amendments. In addition, the standards and protocols shall ensure that there are clear prohibitions against the out-of-state release of individually identifiable health information for purposes unrelated to treatment, payment, and health care operations, and that such information shall under no circumstances be used for marketing purposes. The standards and protocols shall require that access to individually identifiable health information is secure and traceable by an electronic audit trail.

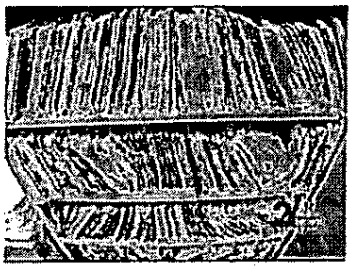
Medical offices gradually switching to electronic records



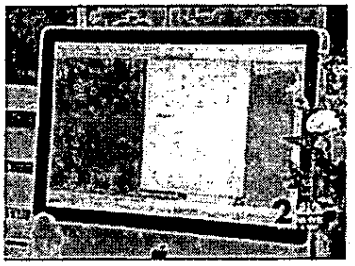
Doctors are hoping to transition patient records from this ... (Daniel Hernandez/KTUU-TV)

by Ashton Goodell
Tuesday, March 17, 2009

ANCHORAGE, Alaska -- Visiting the doctor's office you can expect two things: paperwork and a wait time.

But a new record system might do away with one of those two things. Doctors say it's a wonder offices still use paper charts.

"If this were the banking industry or any other industry we would be bankrupt," Dr. Tom Nighswander said.



... to this, a computerized database. (Daniel Hernandez/KTUU-TV)

The Alaska eHealth Network is designing a system to exchange medical records. The network would allow you and your doctor to access your medical information anywhere.

"The No. 1 reason is for patient safety," said Rebecca Madison director of the Alaska eHealth Network. "You've probably heard horror stories (about people) who had drug interactions or have tests done by mistake just because there's not a way to transfer records."

Rebecca Madison director of the Alaska eHealth Network (Daniel Hernandez/KTUU-TV)

The network won't have a central database where patient information is stored. All the data will be in your doctor's office and will stay there, but offices will share the information through a network.

"It's less time consuming as far as the time it takes to make a chart," said Yanira Williams, a doctor's office administrator.

Patients have raised concerns about privacy. They are worried someone could potentially hack the system or get into private records.

Dr. Jerome List (Daniel Hernandez/KTUU-TV)

"A lot of people are nervous about their stuff being scanned into the system, so they are a little bit hesitant about identity theft," Williams said.

Some doctors say paper databases aren't necessarily safer.

"Paper charts have just always been messy and difficult to organize, difficult to gather information from, easy to lose," Dr. Jerome List said.

Electronic records could replace the bulk of paper records, and a patient has full control over who accesses their health records.

Electronic records work kind of like an ATM -- the information you see on the screen isn't transmitted and can't be pulled up by someone else after it's closed.

You might go home or to the office and look at your bank statement online -- the same applies for the e-network. You can look up your information at any time to see who last touched the record.

"You can see who actually looked at your record for how long and for what purpose," Nighswander said.

The e-network is voluntary, so it's up to you whether you want to be on the system, and if so who you'll allow access to your records.

Some doctors have already switched to electronic records, but they said it wasn't easy.

"Early on document scanning was very difficult," List said. "Scanning did not get saved and so on and so forth, so yes, I had some bumps along the road to show for it."

The goal now is to exchange those records between offices, probably two years down the road.

A move toward electronic record keepers will eliminate jobs in doctors' offices. The eHealth Network says the system would cut jobs but would also cut other costs like the mailing of records.

They say that savings would pass along to patients.

The e-network says it needs $20 million to finish the system. Some of the state's stimulus money could go toward the project.

UNBOXED

How to Make Electronic Medical Records a Reality

By STEVE LOHR

IN the world of technology, inventors are hailed as heroes. Yet it is more subtle forms of innovation that typically determine the impact of a technology in the marketplace and on society. Clever engineering, smart business models and favorable economics are the key ingredients of widespread adoption and commercial success.

History abounds with evidence. For years, much of what was known as "Yankee ingenuity" was, in fact, the American ability to pursue commercial applications of British inventions, from the Bessemer steel process to the jet engine. Even in computing, which we regard as made-in-America technology, the first stored-program computer, simple programming language and reusable code were pioneered in Britain.

But, of course, computer technology and the industry really flowered in the United States. That happened in no small part because the federal government nurtured the market with heavy investment, mainly by the Defense Department, and by choosing standards, like the Cobol programming language.

Today, Washington is about to embark on another ambitious government-guided effort to jump-start a market — in electronic health records. The program provides a textbook look at the economic and engineering challenges of technology adoption.

In its economic recovery package, the Obama administration plans to spend $19 billion to accelerate the use of computerized medical records in doctors' offices. Medical experts agree that electronic patient records, when used wisely, can help curb costs and improve care.

The proof is seen in large medical groups, with hundreds or thousands of physicians. They sift, sort and analyze the data from digital records, for example, to better manage the health of patients with costly, chronic conditions like diabetes and heart disease. These larger groups have the scale to invest in information technology, and they are often insurers as well as providers, so they benefit directly from the cost savings.

Yet these large groups are the exceptions in American health care. Three-fourths of the nation's doctors practice in small offices, with 10 doctors or fewer. For most of them, an investment in digital health records looks like a cost for which they are not reimbursed.

It is scarcely surprising, then, that only about 17 percent of the nation's physicians are using computerized patient records, according to a government-sponsored survey published last year in The New England Journal of Medicine.

"This is really not a technology problem," observed Erik Brynjolfsson, an economist at the Sloan School of Management at the Massachusetts Institute of Technology. "It's a matter of incentives and market failure."

That market failure is a principal target of the Obama administration's plan. A main feature of the legislation calls for incentive payments of more than $40,000 spread over a few years for a physician who buys and uses electronic health records. But the technology is just a tool, one that needs to be used properly to improve health care.

So the legislation states that physicians will be paid only for the "meaningful use" of digital records. The government has not yet defined that term precisely. While the long-term goal is better health for patients, that can take years to measure. Consequently, many health experts predict that the meaningful use will be a requirement to collect and report measurements that can be closely correlated with improved health. Examples would be data for blood glucose, cholesterol and blood pressure levels for diabetes patients.

The legislation, health experts say, seems thoughtfully put together, but the obstacles to success will be daunting. "What's underappreciated is the implementation challenge," said Dr. Blackford Middleton, chairman of the Center for Information Technology Leadership, a research arm of Partners Healthcare in Boston.

A crucial bridge to success, according to experts, will be how local organizations help doctors in small offices adopt and use electronic records. The new legislation calls for creation of "regional health I.T. extension centers." In a letter to the White House and Congress last month, Dr. Middleton and 50 other experts emphasized the importance of these centers and pointed to the Primary Care Information Project in New York City as a model.

The New York project's brief history, beginning two years ago with $27 million in financing, offers a glimpse of the challenges of wiring small physician practices. The New York team, headed by Dr. Farzad Mostashari, an assistant commissioner in the city's health department, started by bringing in decision-support experts in medicine to study how doctors work, so the technology would be easier to use. Team members considered writing their own software for simple, Web-based electronic health records, but abandoned that idea once they understood that patient records would have to be tightly linked to billing — a physician's financial lifeblood.

The project's 50-member staff provides centralized technical support and education for doctors and others. "There's no way small practices can effectively implement electronic health records on their own," Dr. Mostashari said. "This is not the iPhone."

The staff worked closely with its software supplier, eClinicalWorks, to tweak and tailor the system. They began rolling out the records a little more than a year ago. They are now used by more than 1,000 physicians, mainly in poorer neighborhoods, whose workplaces include two hospital outpatient clinics, 10 community health centers, 150 small group physician practices and one women's jail, serving a total of one million patients. The rollout is progressing, and the government plan promises to accelerate adoption.

"Our experience here is that it's just hard," Dr. Mostashari said. "It's not impossible."

Subject: Alaska e-Health Network

Dear Senator Paskvan:

I recently read with interest Senate Bill #133 that advocates creating a statewide electronic health information exchange system. The Alaska Veteran Affairs Healthcare System is a strong advocate of such a system. The VA has had an electronic medical record since the 1980's and has seen the benefits of improving quality patient care and safety, reducing healthcare costs, coordinating care and improving emergency services. Increasing the ability to exchange information with private sector providers would further enhance these benefits for Alaska veterans.

The Alaska VA Healthcare System has a strong relationship with providers throughout Alaska. Last year the Alaska VA purchased approximately $40m of healthcare services from hospitals, clinics and doctor's offices throughout the state. Allowing instantaneous exchange of vital information can do nothing but improve the quality of care for Alaskans. Reducing duplication of tests, x-rays, medications and procedures would surely drive down costs for everyone. We are excited about the possibilities of a statewide network. As such, I am a member of the Board of the Alaska e-Health Network to assure federal providers are included as a stakeholder in any system developed in our state.

The Alaska VA Healthcare System seeks the same solutions as you do. We would be glad to work with all parties to assure such a system is comprehensive in its scope.

Good Luck in your efforts.

Sincerely,

Alex Spector
Director
Alaska VA Healthcare System

RE: SB 133 – Electronic Health Information Exchange System

Dear Senator Paskvan:

The Alaska State Medical Association (ASMA) represents physicians statewide and is primarily concerned with the health of all Alaskans.

We in Alaska need the ability to electronically transmit patient health information securely and flawlessly between the various facilities and health care professionals involved in the treatment process. The transfer of such information in a uniform manner is important in providing the best care for our injured or ill citizens. Additionally, this system also needs to mesh with similar systems outside of Alaska as well. This facilitates the timely and best care for patients in Alaska who reside elsewhere in the United States and Alaskan patients who require care while in another state.

ASMA has been engaged as a stake holder in this process for sometime being represented by Dr Jerome List, an ASMA past president. He currently is on the board of Alaska e-Health Network. Additionally, ASMA was one of the founders of the Alaska Electronic Health Record Alliance and is represented on its board by Dr. List and Jim Jordan, ASMA Executive Director. This entity is engaged in developing pilot programs to get electronic health records deployed in the office of solo or small number physician practices. It needs the uniform interoperability to maximize patient care through the ability to send and receive health information involving all in the care of a patient.

ASMA supports SB 133 and urges its passage.

Sincerely,

Thomas J Vasileff

Re: SB 133

Dear Senator Paskvan:

Premera Blue Cross Blue Shield of Alaska is pleased to offer this letter of support for Senate Bill No.133. Benefits to Alaskans will be significant. Health information exchange networks have been successful in improving patient care and safety, reducing healthcare costs and enhancing emergency response to public health emergencies.

A non-profit organization which is independent, widely representative of the major stakeholders, and operates transparently is crucial to the success of this effort. We feel this is necessary to win and maintain the trust of Alaskans. Your bill truly meets these important criteria.

Premera feels a deep commitment to improving the health and welfare of the citizens of Alaska while creating efficiencies in the health care system. This organization is willing to work with other stakeholders to seek out best practices and solutions for a statewide healthcare network infrastructure enabling the secure exchange of health care data.

Premera supports this plan. Healthcare organizations in Alaska have a track record of working together with other health care leaders in Alaska to improve health services for our patients. We see this as a next logical step toward improving health care delivery and outcomes throughout Alaska.

Thank you, Senator Paskvan, for supporting this important legislation.

Sincerely,

Re: Alaska e-Health Network Appropriation Request

Dear Senator Paskvan:

The Alaska Primary Care Association (APCA) is pleased to offer this letter of support for Senate Bill No.133. Irrefutable research shows that health information exchange (HIE) networks are successful in improving patient care and safety, reducing healthcare costs and enhancing emergency response to public health emergencies. Thus, there is no question that benefits to Alaskans as a result of this bill will be significant.

APCA holds a deep commitment to improving the health and welfare of the citizens of Alaska while creating efficiencies in the health care system. APCA's mission, purpose and programs revolve around increasing access to primary care for all Alaskans. APCA is committed to working with other stakeholders to seek out best practices and solutions for a statewide healthcare network infrastructure enabling the secure exchange of health care data, as it will help our constituents (Alaska's community health centers and other safety net providers) in providing quality health care more effectively.

Healthcare organizations in Alaska have a track record of working together with other leaders and stakeholders here to improve health services for our patients. APCA sees this plan for the continued development of an HIE as a next logical step toward improving health care delivery and outcomes throughout Alaska.

Thank you, Senator Paskvan, for supporting this important legislation.

Sincerely,

Marilyn Walsh Kasmar, RNC, MBA
Executive Director.

March 16, 2009

To Whom It May Concern:

The Bristol Bay Area Health Corporation (BBAHC) has begun implementation of a Electronic Health Records EHR system at our Kanakanak Hospital and hopes to secure additional funding to do so with our 28 village clinics.

It is our hope that we can electronically communicate our EHR's and receives EHR's from all patients using our system and other health facilities throughout the state and elsewhere.

With our different system's we need a way to all talk to each other.
We are excited about the possibility of SB No. 133 "An Act creating a statewide electronic health information exchange systems; and providing for an effective date. By senators PASKVAN, Davis introduced on 3.2.09.

We are members of several statewide groups who are supportive of an HIE as proposed, as we have seen how well it works in the lower 48.

This should be a high priority of the state and is an area that President Obama's stimulus package supports.

Thank you for you support.

Re: SB 133 and the Alaska e-Health Network (AeHN) Budget Request

Dear Senator Paskvan:

The Alaska State Hospital & Nursing Home Association (ASHNHA) is pleased to offer this letter of support for Senate Bill No.133. ASHNHA has been – and is – a long standing and strong supporter of the efforts of the AeHN. Indeed, I have seat on the newly formed board of directors for the AeHN, in part as a reflection of the Association's keen interest in this important project, but primarily because ASHNHA's members believe that the benefits to Alaskans from the outcome of the AeHN initiative will be significant. Health information exchange (HIE) networks in other parts of the country have been successful in improving not only the quality of patient care but patient safety, as well. As a result, HIE's contribute to reducing healthcare costs while enhancing emergency response to public health emergencies.

The AeHN is an independent, non-profit organization with representative of the major stakeholders within Alaska concerned for the development and provider and patient utilization of important health information technologies (HIT). In this day of heightened concern for the speed at which digital information is spinning out across the Internet, the purposeful and transparent actions and activities of the AeHN are viewed by ASHNHA as crucial to the success of this statewide effort to bring unity of purpose to this important cost-effective, public safety program. The AeHN Board of Directors feels strongly that it must conduct its business in the full view of the public in order to win and maintain the trust of Alaskans. Your bill truly ensures these important criteria.

ASHNHA and its individual members feel a deep and demonstrative commitment to improving the health and welfare of the citizens of Alaska, while also recognizing citizen call for the creation of more efficiencies within the health care system.

Our organization is most willing to work with other healthcare related stakeholders to seek out best practices and solutions as we move forward together to create a statewide healthcare network infrastructure enabling the secure exchange of personal health care data.

ASHNHA whole heartedly supports the approach outlined in SB 133. Healthcare organizations in Alaska have a track record of working together with other health care leaders in Alaska to improve health services for our patients. We see this legislation, its goals and intents, as the next logical step toward improving health care delivery and outcomes throughout Alaska.

Thank you, Senator Paskvan, for sponsoring this important legislation.

Respectfully,

Rod Betit

Fax: (907) 465-4714

Re: SB 133

Dear Senator Paskvan:

As a mother and a health care lawyer, I am writing in support of Senate Bill No.133. Health information exchange networks can be a great tool to improve healthcare and increase the efficiency and safety of health care services. In addition, they can assist in reducing healthcare costs and eliminating redundant services. As a mother, I want to make sure my daughter can receive the best health care with the least amount of pain or discomfort. As a health lawyer, I want to make sure clients can provide services quickly and in compliance with all laws and regulations. An independent non-profit organization representing the major stakeholders would help to facilitate these goals and is an important step towards a complete health care system. Senate Bill No. 133 is a major part of this goal.

Everyday, I encourage clients to adopt electronic health records and help them figure out the privacy and security of those records. Most clients are ready and willing to support health information exchange, if they know there will be support available and the infrastructure to make their efforts worthwhile. They also want to know that there are local laws that address and encourage the exchange of health information, so they can show patients that these efforts are backed by more than just a computer company selling a program, or a healthcare organization pushing its own agenda. This bill would be one step in the building blocks that form a health information exchange network.

Even with my daily interaction with health care providers, I did not realize how difficult coordination of records would be without an electronic health record and health information network until I had a baby. My daughter was born over a year ago, was happy and healthy, and yet we are still working out the bills and services provided during her birth. I can only imagine the difficulty that we would have had if she were not healthy and happy. By coordinating records and services electronically, and by helping families avoid redundant tests and paperwork, a health information exchange network can make it easier for parents to cope with a loved one's illness.

I strongly support this plan. Healthcare organizations in Alaska have a track record of working together with other health care leaders in Alaska to improve health services for patients – I see this happening everyday. This bill is the next logical step toward improving health care delivery and outcomes throughout Alaska.

DORSEY

Thank you, Senator Paskvan, for supporting this important legislation.

March 10, 2009

Senator Joe Paskvan
Alaska State Capitol
Juneau, Alaska 99801

RE: Endorsement of SB133: Alaska Health Information Exchange

Dear Senator Paskvan:

The Alaska Native Tribal Health Consortium (ANTHC) hereby expresses our support for your introduction of SB133 for consideration by the Alaska State Legislature.

For the past two years our organization has been the managing partner for the development of the Alaska e-Health Network, organized to create a health information exchange serving all residents of the State of Alaska. Like most Americans, Alaskans receive medical care services from multiple providers, and the availability of an electronic network allowing rapid transfer of medical data will significantly improve medical care wherever patients seek services. We have been encouraged that all of the major health care provider organizations in Alaska are aligned and working together in support of development of such a network.

Our organization is making a significant investment in the process of transferring all of our paper medical records to electronic medical records. When this process is complete, the Alaska e-Health Network will allow us to exchange our records with other participating health care providers both within the Alaska Tribal Health System and with other governmental and private health care providers who also see our patients.

National research, and the experience of health information exchanges developed in the lower-48 states, have demonstrated that full deployment of interoperable electronic health records save the health care system nearly 5% of total annual costs, improve patient safety through reduction of medical errors, and improve the coordination of patient care.

The Alaska e-Health Network will ensure that patient privacy is protected and enhanced through the availability of a secure, encrypted network that is HIPAA compliant.

ANTHC urges the State of Alaska to take a leadership role in deploying health information exchange for Alaskans through passage of SB133 as enabling legislation, through a capital contribution to the development of the Network, and through a proportionate contribution for the long-term operations of the Network. The State will realize savings as a health care provider, as an employer, and as a major payor for health care services for Alaskans.

Please let me know how ANTHC can assist further in supporting your initiative.

Sincerely,

Don Kashevaroff
Chief Executive Officer
Alaska Native Tribal Health Consortium

RE: SB 133 (Paskvan)—Support

Dear Senator Paskvan:

On behalf of the 97,000 members of AARP in Alaska, we are pleased to support SB 133, authored by you and co-sponsored by Senator Davis.

AARP has been collaborating with a group of organizations and medical leaders for several years to determine how Alaska can develop electronic medical record systems in medical offices and an electronic health record exchange network to connect clinics, hospitals, labs, pharmacies, insurers, the State of Alaska and other related health and medical providers that need to have quick access to accurate records.

SB 133 will establish an electronic health information exchange system.

AARP strongly supports this effort.

We believe electronic medical records will save overall costs as well as significantly reduce medical errors. In addition, electronic medical records will also lead to the more effective use of personal health records to increase consumers' engagement in their health care. Electronic records can take advantage of technology to facilitate patient education and self-management, permit secure messaging reminders, allow patients to maintain diaries, eg., of pain, symptoms and side effects, and to obtain prescription refills, schedule medical appointments online, and track medical test results. Ideally these personal health records will be connected to the electronic medical record system.

Even if all an electronic health information exchange accomplished was a reduction in medical errors, that goal alone is worth pursuing in Alaska.

Some proponents of setting up such an exchange system believe such a network could be the biggest advance in medicine since the discovery of penicillin. A network like this in Alaska has the potential to save hundreds, if not thousands, of lives and save millions of

dollars by eliminating duplicate tests, shortening hospital stays, improving care for chronically ill patients, and guaranteeing accurate prescribing.

The collaboration on this issue that we have already witnessed in Alaska gives us confidence that the system will work and work well. Some of our "best and brightest" are committed to accomplishing this for Alaska citizens and health consumers.

AARP members, more than any other age group, are consumers of health care. We believe SB 133 is in the best interests of our members as well as their families.

AARP is pleased to lend our strong support to SB 133.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Subject: Support for SB 133

Dear Chair Hoffman and Chair Stedman:

The Alaska Commission on Aging (ACoA) respectfully asks for your support of SB 133, a bill to establish a statewide electronic health information exchange system that would modernize the current paper-based system and allow health care providers quick access to patient health care records, reducing medical errors and enhancing cost effectiveness. This legislation is authored by Senator Joe Paskvan and co-sponsored by Senator Bettye Davis.

The benefits of an electronic heath care information exchange system are significant and would contribute substantially to the State's goals to improve safety, cost effectiveness, and quality of health care in Alaska. An electronic information exchange system provides the means for individual Alaskans to have their own personal health records accessible to all health care providers so that providers can make medical decisions in a timely and secure manner in the location where medical services are delivered. The electronic exchange system will support telemedicine services including the transfer of high resolution images for patient care and video conferencing between providers and between providers and patients which are particularly important for patients living in rural Alaskan communities. SB 133 also provides for the implementation of a secure infrastructure that follows federal standards and requires patient consent to insure maximum protection of patient confidentiality and their medical records.

For older Alaskans, an electronic health information system will help to enhance the management of chronic diseases and improve health outcomes by increasing the availability of complete patient health information to ensure appropriate care and use of evidence-based health care services. An electronic health information system can also help to facilitate patient education in self-management of health conditions and potentially provide a means for personal health records to be connected to the electronic medical record system – including prescription records, lab results, schedules of medical appointments, and patient diaries of reported symptoms, side effects related to medicine, and other related information.

ACoA is pleased to support SB 133 and appreciates your consideration of this bill. We believe that an electronic health care information system will serve all Alaskans well, including older Alaskans who are among the largest consumers of health care services. Please feel free to contact Denise Daniello, ACoA's executive director (465-4879), should you have any questions regarding our position or request assistance from our office. Thank you for your consideration of support for this important legislation.

Sincerely,

RE: SB 133 (Paskvan)—Support

Dear Co-Chairs Hoffman and Stedman:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the Senate Finance Committee to support SB 133, authored by Senator Joe Paskvan and co-sponsored by Senator Bettye Davis.

AARP has been collaborating with a group of organizations and medical leaders for several years to determine how Alaska can develop electronic medical record systems in medical offices and an electronic health record exchange network to connect clinics, hospitals, labs, pharmacies, insurers, the State of Alaska and other related health and medical providers that need to have quick access to accurate records.

SB 133 will establish an electronic health information exchange system.

AARP strongly supports this effort.

We believe electronic medical records will save overall costs as well as significantly reduce medical errors. In addition, electronic medical records will also lead to the more effective use of personal health records to increase consumers' engagement in their health care. Electronic records can take advantage of technology to facilitate patient education and self-management, permit secure messaging reminders, allow patients to maintain diaries, eg., of pain, symptoms and side effects, and to obtain prescription refills, schedule medical appointments online, and track medical test results. Ideally these personal health records will be connected to the electronic medical record system.

Even if all an electronic health information exchange accomplished was a reduction in medical errors, that goal alone is worth pursuing in Alaska.

Some proponents of setting up such an exchange system believe such a network could be the biggest advance in medicine since the discovery of penicillin. A network like this in Alaska has the potential to save hundreds, if not thousands, of lives and save millions of dollars by eliminating duplicate tests, shortening hospital stays, improving care for chronically ill patients, and guaranteeing accurate prescribing.

The collaboration on this issue that we have already witnessed in Alaska gives us confidence that the system will work and work well. Some of our "best and brightest" are committed to accomplishing this for Alaska citizens and health consumers.

AARP members, more than any other age group, are consumers of health care. We believe SB 133 is in the best interests of our members as well as their families.

AARP is pleased to lend our strong support to SB 133.

Senate Bill 139 – Incentives for Certain Medical Providers

Version 26-LS0503\E

SPONSOR STATEMENT

Alaska is facing a serious shortage of healthcare practitioners, especially in the rural areas of our state, and it is projected to worsen significantly in the next few decades. Senate Bill 139 is intended to address this issue by establishing a program to immediately begin filling the vacant healthcare practitioner positions throughout the state.

This legislation will establish a loan repayment and incentive program in the Department of Health and Social Services. The program is designed to attract healthcare practitioners to Alaska. Currently, the WWAMI program serves a similar purpose by giving WWAMI medical students the option of paying off a portion of their loans by staying in Alaska to practice for a specified number of years. Last year, the number of WWAMI seats was increased from 10 to 20, and this year, SB 18 aims to raise that number to 24. However, expanding the WWAMI program only ensures that we have more healthcare practitioners in future years, as WWAMI participants must complete their education before they can begin their service. Therefore, it is not the immediate solution that we need. SB 139 would be an effective way to fill this gap in the very near future, and would attract healthcare practitioners from all areas of country, rather than just from the WWAMI participating states.

Senate Bill 139 will provide loan repayments and incentives for up to 90 applicants per year in 10 different health care occupations. Sixty of the slots will be reserved for "regular" site positions, which can be located anywhere in the state. Thirty of the slots will be reserved for "very-hard-to-fill" positions, which can be located only in areas that are designated by the

Commissioner of Health and Social Services. Priority will be given to sites that treat patients who are uninsured and who have medical assistance or Medicare coverage. The amount of monetary incentive will vary with each slot, according to location and the category of healthcare provided. Prioritized Tier 1 slots are designated according to the relative need in the state, and will include physicians, pharmacists and dentists. A slot in this tier has incentives of up to $35,000 per year for three years at a regular site, and up to $47,000 per year for three years at a very-hard-to-fill site. Tier 2 slots are also designated according to the relative need in the state, and will include dental hygienists, registered nurses, certified nurse practitioners, physician assistants, physical therapists, clinical psychologists, and clinical social workers holding at least a master's degree in social work. A slot in this tier has incentives of up to $20,000 per year for three years at a regular site, and up to $27,000 per year for three years at a very-hard-to-fill site.

It is critical that we promptly address Alaska's healthcare shortages in order to ensure that all Alaskans have adequate access to medical care. SB 139 helps us to save and improve the lives of our constituents by allowing us to provide for those who cannot wait until tomorrow to get the care that they need today.

ANALYSIS: *(Attach a separate page if necessary)*

CS for SB 139(FIN) creates a cash incentive program for eligible health professionals engaged in qualified employment. The intent of the legislation is to "address the worsening shortage of certain health care professionals in the state by increasing the number and
improving the distribution of health care professionals who provide direct patient care."

Division of Health Care Services estimates that it will need a total of 1 FTE to fully administer the employment incentive programs.

Prepared by: William J. Streur, Deputy Commissioner
Phone (907) 269-7827
Division: DHSS Health Care Services
Date/Time 4/10/10 1:00 PM

Approved by: Alison Elgee, Assistant Commissioner
Date 4/10/2010
DHSS Finance & Management Services

ANALYSIS CONTINUATION

Health Care Professions Incentive Program

The Division assumes it will need $2,715.0 for practitioner incentive payments in FY2011. Maximum payments established for cash incentive are: $35.0 annually for tier I health care professionals employed in "regular" positions; $47.0 annually for tier I health care professionals employed in "very hard-to-fill" positions; $20.0 annually for tier II health care professionals employed in "regular" positions; and $27.0 annually for tier II health care professionals employed in "very hard-to-fill" positions. The need for $2,715.0 in FY2011 assumes the following:

Tier I 27 Practitioners $1,161.0 (assumes 9 participants from each of 3 types comprising tier I at $387.0 for each type)
Tier II 63 Practitioners $1,554.0 (assumes 9 participants from each of 7 types comprising tier II at $222.0 for each type)
Total 90 Practitioners $2,715.0

The Division assumes the employing entities will provide 25% of the $2,715.0 as contributing match as specified in HB392. Therefore, the expected GF match is $2,036.3 The match for the employing entities is $678.7.

Incentive payments are available to professionals for up to 3 years of qualified employment with a lifetime maximum participation of six years in the direct incentives program by a tier I or tier II health care professional. The total number of participants in the program may not exceed 90 participants annually, regardless of whether the participant is a new or continuing participant.

On the fiscal note, the payments for practitioners will be paid from the contractual line:

Item	FY2011	FY2012	FY2013	FY2014	FY2015	FY2016
Practitioner Payments	$2,715.0	$2,715.0	$2,715.0	$2,715.0	$2,715.0	$2,715.0
Evaluation Contract	$ 18.0	$ 18.0	$ 18.0	$ 18.0	$ 18.0	$ 18.0
Staff Contractual Costs	$ 9.4	$ 9.4	$ 9.4	$ 9.4	$ 9.4	$ 9.4
Total:	$2,742.4	$2,742.4	$2,742.4	$2,742.4	$2,742.4	$2,742.4

Administrative Costs
1 Health Program Manager II, $89.3 (includes fringe benefits). Assumes $9.4 per FTE annually for office space, phones, and other contractual costs; $2.6 one time costs per FTE for computers and software; $5.0 one time costs per FTE for office equipment; $2.0 per FTE annually for supplies; $6.0 per year for travel; $18.0 each year for a program evaluation contract.

Health Program Manager II.
This position will serve as lead program manager for the employment incentive program and will: establish procedures for the commissioner's designation and prioritization of sites eligible for participation in the program, develop the application process for participation in the program for sites and professionals, develop and disseminate public information and notices pertinent to the program, lead the development of the methodology and procedures for classifying each eligible site as having either regular or very hard-to-fill positions, prepare annual reports that document the successes and challenges of the program, facilitate the creation of and ongoing work of the advisory committee, and establish procedures and manage the employer contribution portion of the program.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SIXTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS OLSON, Wielechowski, Meyer, Davis, French, Kookesh, Paskvan, Egan

A BILL

FOR AN ACT ENTITLED

"An Act establishing an employment incentive program for certain health care professionals employed in the state; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 18 is amended by adding a new chapter to read:

Chapter 29. Health Care Professions Incentive Program.

Sec. 18.29.010. Legislative findings and intent. (a) The legislature finds that

(1) the state is facing a serious shortage of health care practitioners and the shortage is projected to worsen;

(2) the state is one of few states that does not offer direct incentives to attract trained primary care providers to the state;

(3) the villages and towns in rural areas of the state are experiencing the greatest shortage of health care practitioners.

(b) The incentive payments provided under this chapter are intended to ensure that residents throughout the state, including recipients of medical assistance and

Medicare, have access to health care and that residents of rural areas of the state, in particular, experience improved access to health care services.

Sec. 18.29.015. Health care professions incentive program; purpose; advisory body. (a) The health care professions incentive program is established in the department for the purpose of addressing the worsening shortage of certain health care professionals in the state by increasing the number and improving the distribution of health care professionals who provide direct patient care.

(b) The program established under this section must include

(1) direct incentives paid under AS 18.29.020;

(2) procedures for the commissioner's designation and prioritization of sites eligible for participation in the program;

(3) an application process for participation in the program as

(A) an eligible site; or

(B) a tier I or tier II health care professional;

(4) the dissemination of public information and notices pertinent to the program;

(5) classification by the commissioner of each eligible site as having either regular or very hard-to-fill positions, or both;

(6) a lifetime maximum period of six years for participation in the program by a tier I or tier II health care professional; and

(7) annual program evaluations and reports.

(c) The program shall be administered by the commissioner in consultation with an advisory body appointed by the commissioner. The advisory body is made up of members with health care expertise, including expertise in economic issues affecting the hiring and retention of health care professionals in the state. Members of the advisory body serve at the pleasure of the commissioner to provide recommendations for and oversight and evaluation of all aspects of the program. The commissioner shall accept a recommendation of the advisory body on a matter pertaining to the identification and monitoring of areas of shortages, eligible sites, payment priorities, or evaluation of the program, unless the commissioner finds, in writing, that the recommendation cannot be financially or otherwise supported by the

department.

Sec. 18.29.020. Direct incentives. (a) The department shall provide direct incentives in the form of quarterly cash payments to eligible tier I and tier II health care professionals engaged in qualified employment. The department may not make an incentive payment

(1) before the employment period begins;

(2) for a period of qualified employment of less than three months; or

(3) under a contract term that is less than one calendar quarter.

(b) Payments made under this section may not exceed

(1) $35,000 annually for a tier I health care professional employed in a regular position;

(2) $47,000 annually for a tier I health care professional employed in a very hard-to-fill position;

(3) $20,000 annually for a tier II health care professional employed in a regular position; or

(4) $27,000 annually for a tier II health care professional employed in a very hard-to-fill position.

(c) The commissioner shall calculate the annual incentive payment amount by multiplying the annual maximum payment under (b) of this section by the percentage of full-time-equivalent employment for each of not more than three years of qualified employment less a matching payment amount as determined under (d) of this section.

(d) An employer or other entity that employs an eligible tier I or tier II health care professional at an eligible site shall make nonrefundable quarterly matching payments to the department. The payments must be in an amount that is

(1) not more than half of the annual incentive payment made under (c) of this section, as determined by the commissioner; and

(2) based on the employer's or entity's ability to pay, as determined by the commissioner, in consultation with the program advisory body.

(e) A payment made under (d) of this section shall be combined with the payment made to the professional by the department.

Sec. 18.29.025. Number of participants. (a) The number of participants to

whom the commissioner may provide a direct payment under the program established under AS 18.29.015 may not exceed 90 participants annually as described in (b) of this section, regardless of whether the participant is a new or continuing participant.

(b) The commissioner shall reserve sufficient funding for not fewer than three positions in each of the 10 tier I and tier II health care professions in very hard-to-fill positions at an eligible site.

Sec. 18.29.030. Eligibility and priority. (a) To be eligible for a direct incentive payment under AS 18.29.020, an individual shall

(1) submit an application on a form approved by the commissioner;

(2) be engaged in qualified employment at an eligible site;

(3) be licensed as a tier I or tier II health care professional in the state within 90 days after the first day of employment;

(4) meet a priority for payment established under (b) of this section; and

(5) meet other criteria established by the commissioner.

(b) The commissioner shall establish priorities for payment of an incentive under the program based on the recommendations of the program advisory body and the availability of funding. The commissioner shall prioritize eligible sites based on the remoteness of the site and the percentage of patients treated at the site who

(1) are uninsured;

(2) have or are eligible for medical assistance or Medicare coverage; or

(3) have or are eligible for other federal health program benefits.

(c) After June 30, 2017, the commissioner shall discontinue the approval of new applicants under the program and provide incentives to eligible participants who were approved previously and are continuing participants.

Sec. 18.29.099. Definitions. In AS 18.29.010 - 18.29.099,

(1) "commissioner" means the commissioner of health and social services;

(2) "department" means the Department of Health and Social Services;

(3) "eligible site" means a service area or health care facility that the commissioner has designated as located in a health care services shortage area based

on a needs assessment and employment statistics for qualified tier I or tier II health care professionals;

(4) "program" means the health care professions incentive program;

(5) "qualified employment" means employment of a tier I or tier II health care professional at an eligible site at which the health care professional is hired and paid to work

(A) in a full-time or not less than half-time position;

(B) for a contract term that is not less than three years; and

(C) not less than 50 percent time on direct patient health care services;

(6) "tier I health care professional" means a dentist, pharmacist, or physician;

(7) "tier II health care professional" means a dental hygienist, registered nurse, certified nurse practitioner, physician assistant, physical therapist, clinical psychologist, or clinical social worker holding at least a master's degree in social work.

*** Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

HEALTH CARE INCENTIVE PROGRAM; REPORT. On or before January 1, 2019, the Department of Health and Social Services shall prepare and submit a report to the legislature that describes the participation rates, costs, and the effect on health care profession shortage areas, as designated by the commissioner, of the health care profession incentive program established under AS 18.29.015.

*** Sec. 3.** AS 18.29.010, 18.29.015, 18.29.020, 18.29.025, 18.29.030, and 18.29.099, added by sec. 1 of this Act, are repealed June 30, 2019.

*** Sec. 4.** This Act takes effect immediately under AS 01.10.070(c).

adopted 3/31/10 Replaced 4/11/10

A BILL

FOR AN ACT ENTITLED

"An Act establishing a loan repayment program and employment incentive program for certain health care professionals employed in the state; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.43 is amended by adding new sections to read:

Article 8A. Health Care Professions Loan Repayment.

Sec. 14.43.430. Loan repayment; purpose. (a) The commission shall repay a portion of education loans made by the state to eligible tier I and tier II health care professionals under the health care professions loan repayment and employment incentive program established in AS 18.29.010 and the loan repayment procedures established under this section.

(b) The Department of Health and Social Services shall administer the health care professions loan repayment program under AS 18.29.010 - 18.29.099. The commission shall act as a disbursing agent in carrying out the provisions of

AS 14.43.430 - 14.43.449.

(c) Loan repayments under this section shall be made with funds appropriated by the legislature for that purpose. The loan repayments made under this section do not constitute a financial obligation of the corporation.

Sec. 14.43.435. Eligibility. To be eligible for loan repayment under AS 14.43.430, an individual must

(1) meet eligibility and priority criteria established under AS 18.29.030;

(2) have an unpaid balance on one or more education loans made by the state and verified by the commission; and

(3) meet other criteria established by the commission.

Sec. 14.43.440. Conditions and limitations on loan payments. (a) A loan repayment under AS 14.43.430 - 14.43.449 shall be in an amount not to exceed 33.3 percent of the unpaid loan balance existing in the first year of program participation, multiplied by the percentage of full time equivalent employment for each of up to three years of qualified employment less a matching loan or incentive amount from an employer or other entity as determined under AS 18.29.020.

(b) The commission shall make a loan repayment under this section in quarterly installments payable to the lending institution. A loan repayment made under this section may not exceed the annual benefit amounts established under AS 18.29.020(b). The commission may not make a loan repayment installment for an employment period of less than one calendar quarter.

(c) A loan or interest on a loan is not eligible for repayment under this section if the loan or interest is eligible for repayment from another source, including another loan repayment or forgiveness program or an employer-sponsored repayment program.

Sec. 14.43.449. Definitions. In AS 14.43.430 - 14.43.449,

(1) "qualified employment" has the meaning given in AS 18.29.099;

(2) "tier I health care professional" means a dentist, pharmacist, or physician;

(3) "tier II health care professional" means a dental hygienist,

registered nurse, certified nurse practitioner, physician assistant, physical therapist, clinical psychologist, or clinical social worker holding at least a master's degree in social work.

* **Sec. 2.** AS 18 is amended by adding a new chapter to read:

Chapter 29. Health Care Professions Loan Repayment and Incentive Program.

Sec. 18.29.010. Health care professions loan repayment and incentive program; purpose; advisory body. (a) The health care professions loan repayment and incentive program is established in the department for the purpose of addressing the worsening shortage of certain health care professionals in the state by increasing the number and improving the distribution of health care professionals who provide direct patient care.

(b) The program established under this section must include

(1) loan repayments made under AS 14.43.430 - 14.43.449;

(2) direct incentives paid under AS 18.29.020;

(3) procedures for the commissioner's designation and prioritization of sites eligible for participation in the program;

(4) an application process for participation in the program as

(A) an eligible site; or

(B) a tier I or tier II health care professional;

(5) the dissemination of public information and notices pertinent to the program;

(6) classification by the commissioner of each eligible site as having either regular or very hard-to-fill positions, or both;

(7) a lifetime maximum period of six years for participation in the loan repayment and direct incentive aspects of the program by a tier I or tier II health care professional; and

(8) annual program evaluations and reports.

(c) Except as provided under AS 14.43.430, the program shall be administered by the commissioner in consultation with an advisory body appointed by the commissioner. The advisory body is made up of members with health care expertise, including expertise in economic issues affecting the hiring and retention of health care

professionals in the state. Members of the advisory body serve at the pleasure of the commissioner to provide recommendations for and oversight and evaluation of all aspects of the program. The commissioner shall accept a recommendation of the advisory body on a matter pertaining to the identification and monitoring of areas of shortages, eligible sites, payment priorities, or evaluation of the program, unless the commissioner finds, in writing, that the recommendation cannot be financially or otherwise supported by the department.

Sec. 18.29.020. Direct incentives. (a) The department shall provide direct incentives in the form of quarterly cash payments to eligible tier I and tier II health care professionals engaged in qualified employment. The department may not make an incentive payment

(1) before the employment period begins;

(2) for a period of qualified employment of less than three months; or

(3) under a contract term that is less than one calendar quarter.

(b) Payments made under this section, when combined with a loan repayment amount paid under AS 14.43.440, if any, may not exceed

(1) $35,000 annually for a tier I health care professional employed in a regular position;

(2) $47,000 annually for a tier I health care professional employed in a very hard-to-fill position;

(3) $20,000 annually for a tier II health care professional employed in a regular position; or

(4) $27,000 annually for a tier II health care professional employed in a very hard-to-fill position.

(c) The commissioner shall calculate the annual incentive payment amount by multiplying the annual maximum payment under (b) of this section by the percentage of full time equivalent employment for each of not more than three years of qualified employment less a matching payment amount as determined under (d) of this section and loan repayment amount, if any, under AS 14.43.440.

(d) An employer or other entity that employs an eligible tier I or tier II health care professional at an eligible site shall make nonrefundable quarterly matching

payments to the department. The payments must be in an amount that is

(1) not more than half of the combined annual incentive payment made under (c) of this section and the loan repayment amount paid under AS 14.43.440(a), as determined by the commissioner; and

(2) based on the employer's or entity's ability to pay, as determined by the commissioner, in consultation with the program advisory body.

(e) A payment made under (d) of this section shall be combined with the payment made to the professional by the department.

Sec. 18.29.025. Number of participants. (a) The number of participants to whom the commissioner may provide a direct payment, loan repayment, or both under the program established under AS 18.29.010 may not exceed 90 participants annually as described in (b) of this section, regardless of whether the participant is a new or continuing participant.

(b) The commissioner shall provide direct incentive payments, loan repayments, or both, to not fewer than three participants employed in very hard-to-fill positions at an eligible site in each of the 10 tier I and tier II health care professions.

Sec. 18.29.030. Eligibility and priority. (a) To be eligible for a direct incentive payment under AS 18.29.020, an individual shall

(1) submit an application on a form approved by the commissioner;

(2) be engaged in qualified employment;

(3) be licensed as a tier I or tier II health care professional in the state within 90 days after the first day of employment;

(4) meet a priority for payment established under (b) of this section; and

(5) meet other criteria established by the commissioner.

(b) The commissioner shall establish priorities for payment of a loan and incentive under the program based on the recommendations of the program advisory body and the availability of funding. The commissioner shall prioritize eligible sites based on the percentage of patients treated at the site who

(1) are uninsured;

(2) have or are eligible for medical assistance or Medicare coverage; or

(3) have or are eligible for other federal health program benefits.

Sec. 18.29.099. Definitions. In AS 18.29.010 - 18.29.099,

(1) "commissioner" means the commissioner of health and social services;

(2) "department" means the Department of Health and Social Services;

(3) "eligible site" means a service area or health care facility that the commissioner has designated as located in a health care services shortage area based on a needs assessment and employment statistics for qualified tier I or tier II health care professionals;

(4) "program" means the health care professions loan repayment and incentive program;

(5) "qualified employment" means employment of a tier I or tier II health care professional at an eligible site at which the health care professional is hired and paid to work

(A) in a full-time or not less than half-time position;

(B) for a contract term that is not less than three years; and

(C) not less than 50 percent time on direct patient health care services;

(6) "tier I health care professional" means a dentist, pharmacist, or physician;

(7) "tier II health care professional" means a dental hygienist, registered nurse, certified nurse practitioner, physician assistant, physical therapist, clinical psychologist, or clinical social worker holding at least a master's degree in social work.

*** Sec. 3.** This Act takes effect immediately under AS 01.10.070(c).

ALASKA STATE LEGISLATURE

SENATOR DONALD C. OLSON

ALASKA
STATE CAPITOL
ROOM 508
JUNEAU, ALASKA 99801-1182

(907) 465-3707
FAX (907) 465-4821

Explanation of Changes Contained in CS for SB 139

This CS makes two changes to version "C".

- Language was added to page 1, line 8 to limit the loan repayments to only those loans held by the State of Alaska. It simply means that loan repayments for loans held by other states, the federal government or other entities are not offered. This is expected to make the implementation simpler and less administratively burdensome. Please note that it does nothing to change that all participants, including those with student loans held by the State of Alaska, are still eligible for the direct incentive provided they meet the criteria outlined in 18.29.020.

- A new section was added, Section 18.29.025 found on page 5, to limit the number of participants to 90 per year regardless of whether it is a new or continuing participant; and to allocate the slots between regular and very-hard-to-fill locations to ensure some slots are reserved for those very-hard-to-fill locations.

MEMORANDUM March 17, 2009

SUBJECT: Sectional Summary (SB 139; Work Order No. 26-LS0503\E)

TO: Senator Donald Olson
Attn: Kendri Cesar

FROM: Jean M. Mischel
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Requires the Alaska Commission on Postsecondary Education to repay education loans made to health care professionals, as defined, under eligibility criteria established in sec. 2. Specifies that the loan repayment obligation is not a financial obligation of the corporation. Provides for quarterly payments based on the fulfillment of qualified employment at eligible sites located in the state.

Section 2. Establishes the health care professions loan repayment and incentive program in the Department of Health and Social Services for the purpose of addressing a shortage of certain health care professionals in the state and for improving the distribution of those professionals. Requires the commissioner of health and social services to administer the program, to designate and prioritize eligible employment sites, and to monitor the program in consultation with an advisory body established under this section. Provides for maximum combined loan repayment and employment incentives base on the type of employment.

Section 3. Provides for an immediate effective date for the bill.

ANALYSIS: *(Attach a separate page if necessary)*

As currently amended, this legislation will require the Alaska Commission on Postsecondary Education (ACPE) to receive and apply loan repayment benefits for participants in a health care provider loan repayment and direct incentive program. The Department of Health and Social Services (HSS) is the primary administrative agency. Given ACPE's minimal involvement, there is no related fiscal impact to the agency.

ANALYSIS: *(Attach a separate page if necessary)*

This legislation will require the Alaska Commission on Postsecondary Education (ACPE) to serve as disbursing agent for a loan repayment program for certain health care professionals employed in the state. As drafted, the Department of Health and Social Services (HSS) is the primary administrative agency. Based on HSS estimates of the number of individuals participating in the program, it will be of sufficient size that ACPE, in order to mitigate the need for manual processing and related personal services expenses, will need to procure services to develop a program database to ensure program benefits are paid out in compliance with program statutes and ensure accurate annual reporting of benefits paid to the Internal Revenue Service. We estimate the one-time contractual costs would be $35 thousand and will be included in the HSS fiscal note associated for this bill. Due to the anticipated functionality of the database, including the ability to electronicaly share files between HSS and ACPE, no additional staffing will be needed to provide these fiscal agent services in support of the loan repayment program

ANALYSIS: *(Attach a separate page if neces*

SB 139 creates a loan repayment program for identified health professional occupations and provides for cash incentives for eligible health professionals engaged in qualified employment. The intent of the legislation is to "address the worsening shortage of certain health care professionals in the state by increasing the number and improving the distribution of health care professionals who provide direct patient care."

Division of Health Care Services estimates that it will need a total of 1 FTE to fully administer the loan repayment and employment incentive programs.

BILL NO. CSSB139(HSS)

ANALYSIS CONTINUATION

Health Care Professions Loan Repayment & Incentive Program

The Division assumes it will need $2,715.0 for practitioner payments in FY2011. This funding will be used for either practitioner payments as cash incentives, or payments to lender institutions for loan repayments, or there can be a combination of the two types of payments. Maximum payments established for any combination of loan repayment and cash incentive are: $35.0 annually for tier I health care professionals employed in "regular" positions; $47.0 annually for tier I health care professionals employed in "very hard-to-fill" positions; $20.0 annually for tier II health care professionals employed in "regular" positions; and $27.0 annually for tier II health care professionals employed in "very hard-to-fill" positions. The need for $2,715.0 in FY2011 assumes the following:

Tier I	27 Practitioners	$1,161.0	(assumes 9 participants from each of 3 types comprising tier I at $387.0 for each type)
Tier II	63 Practitioners	$1,554.0	(assumes 9 participants from each of 7 types comprising tier II at $222.0 for each type)
Total	90 Practitioners	$2,715.0	

The Division assumes the employing entities will provide 25% of the $2,715.0 as contributing match as specified in SB139. Therefore, the expected GF match is $2,036.3 The match for the employing entities is $678.7.

Incentive payments are available to professionals for up to 3 years of qualified employment with a lifetime maximum participation of six years in the loan repayment and direct incentives aspects of the program by a tier I or tier II health care professional. The total number of participants in the program may not exceed 90 participants annually, regardless of whether the participant is a new or continuing participant.

On the fiscal note, the payments for practitioners will be paid from the contractual line:

Item	FY2011	FY2012	FY2013	FY2014	FY2015	FY2016
Practitioner Payments	$2,715.0	$2,715.0	$2,715.0	$2,715.0	$2,715.0	$2,715.0
Evaluation Contract	$ 18.0	$ 18.0	$ 18.0	$ 18.0	$ 18.0	$ 18.0
Staff Contractual Costs	$ 9.4	$ 9.4	$ 9.4	$ 9.4	$ 9.4	$ 9.4
ACPE Software	$ 35.0	$	$	$	$	$
Total:	$2,777.4	$2,742.4	$2,742.4	$2,742.4	$2,742.4	$2,742.4

Administrative Costs
1 Health Program Manager II, $89.3 (includes fringe benefits). Assumes $9.4 per FTE annually for office space, phones, and other contractual costs; $2.6 one time costs per FTE for computers and software; $5.0 one time costs per FTE for office equipment; $2.0 per FTE annually for supplies; $6.0 per year for travel; $18.0 each year for a program evaluation contract.

Health Program Manager II.
This position will serve as lead program manager for the loan repayment and employment incentive program and will: establish procedures for the commissioner's designation and prioritization of sites eligible for participation in the program, develop the application process for participation in the program for sites and professionals, develop and disseminate public information and notices pertinent to the program, lead the development of the methodology and procedures for classifying each eligible site as having either regular or very hard-to-fill positions, prepare annual reports that document the successes and challenges of the program, facilitate the creation of and ongoing work of the advisory committee, and establish procedures and manage the employer contribution portion of the program.

Assumes one time costs of $35.0 for contractual services/software development for Alaska Commission on Postsecondary Education (ACPE).

ACPE will facilitate the disbursement of the loan repayment benefit. It will not be the budgetary agency for requesting and receiving the funds. After HCS selects program participants, ACPE will verify the existence of their qualifying education debt, and, on a periodic basis, transmit the appropriate benefit amount to the individual's lender.

MEMORANDUM

DATE: April 1, 2009

TO: Senator Joe Paskvan
Senator Bettye Davis, Chair Senate Health & Social Services Committee
Senator Donald Olson

FROM: Commissioner Bill Hogan

SUBJECT: Questions regarding SB 139

Administration response to questions posed by Senator Paskvan during the 3/25/2009 Senate HSS hearing on SB 139

Question 1. I understand the administration does not support this bill. Does the administration recognize the need for attracting health care workers, or is the administration rejecting recognition of the need?

Response:
Yes, the administration recognizes the need for recruiting and retaining health care workers. The Alaska Dept. of Health and Social Services (DHSS) provided statements during the 3/25/2009 Senate HSS hearing that the department has prepared documents and conducted projects that recognize health care workforce shortages and strategies to resolve these shortages. Specifically, the department referenced the Physician Supply Task Force Report that was prepared in 2006, which was staffed by DHSS and funded by the University of Alaska. This report includes documentation of need for additional physicians as well as recommended strategies, such as loan repayment (p. 55), for addressing these shortages.

In addition, DHSS is working with the Alaska Mental Health Trust Authority and the University of Alaska to address shortages in the social services workforce (including behavioral health, developmental disabilities, senior services, etc.). In addition, DHSS, along with the Alaska Dental Action Coalition, is undertaking various needs assessments and developing strategies to address the oral health workforce shortages. DHSS has also participated in an analysis of health care workforce recruitment efforts across Alaska. DHSS has participated in researching and documenting strategies that are effective in attracting and retaining health care professionals, such as loan repayment and direct incentives (http://hss.state.ak.us/dph/Healthplanning/publications).

Finally, DHSS prepares health professional shortage area (HPSA) applications on behalf of communities/boroughs and submits them to U.S. Department of Health and Human Services Health Resources and Services Administration. Designation of a borough as a health professional

shortage area allows providers in that area to apply for National Health Service Corps loan repayment.

Question 2. Does the administration oppose the bill because it wants to reject certain fields as covered under the bills? Is there the recognition that some fields should be supported, and is there some lesser number of positions the administration would support? Or is it that, despite any recognition of need, the administration opposes spending the money?

Response: The administration's opposition to SB139 is not related to rejection of certain professional fields covered under the bill. The concerns of the administration are related to the fiscal note and the funding that would be required to place 90 professionals.

The department assumed 90 positions when developing the fiscal note in order to make a substantial impact on the workforce shortages. SB 139 cites the level of funding provided to each type of professional. The bill does not identify the number of professionals to be funded each year. Thus, the bill allows for placement of fewer than 90 professionals per year if the annual funding for the loan repayment and employment incentive program were made at a lesser total amount.

At this point, the administration cannot commit to supporting a loan repayment program, even for a reduced number of loans. Because of current economic conditions, the administration has recently introduced two other bills, SB 140 and HB 172, that would allow the Department of Revenue to enter into a bond purchase agreement and take other measures necessary to avoid a disruption in education loan services provided by the Alaska Student Loan Corporation. These measures are necessary to ensure the viability of the ASLC, and take precedence over creating additional obligations.

Mat-Su Health Foundation Resolution to Support Health Care Professions Loan Repayment & Incentive Program for Alaska

WHEREAS the Mat-Su Health Foundation's mission is to enhance the health of Alaskans living in Mat-Su, where health is in part determined by access to primary, behavioral, and dental care and preventive services;

WHEREAS an adequate healthcare workforce is necessary to provide this access, and according to the *2005-2015 Mat-Su Borough Health Plan*, Mat-Su has an "inadequate number of providers to meet the demands of a growing population" in both the core area and the outlying rural areas of the borough;[i]

WHEREAS Mat-Su is designated a Medically-Underserved Area/Population by the U.S. Health Resources and Services Administration and has sub-regions designated Primary Care Health Professional Shortage Area, Mental Health Professional Shortage Area, and Dental Care Health Professional Shortage Area;[ii]

WHEREAS the Mat-Su Borough is the fastest growing area of Alaska, growing from 5,188 in 1960 to 82,515 in 2008 due to both positive birth and in-migration rates; and the AK Department of Labor projects that all Mat-Su age groups will continue to grow through 2020;[iii]

WHEREAS the Mat-Su Borough is experiencing one of the highest rates of population growth in the state among senior citizens, who use the healthcare system disproportionately more than any other age group; and the Alaska Commission on Aging reports Mat-Su's senior growth rate at 11.6%, which includes a net gain from a senior in-migration rate that is almost double its senior out-migration rate;[iv]

WHEREAS the Alaska Health Care Commission has designated Medicare-access as one of its six focus areas; and the University of Alaska Anchorage Institute of Social and Economic Research has reported that access to primary care for Medicare beneficiaries is problematic in Mat-Su, where data reveals that only 57.7% of Mat-Su primary care physicians will see new Medicare patients;[v]

WHEREAS the Mat-Su Health Foundation believes that an investment in the education of Mat-Su residents will help to build the healthcare workforce of the future and an engaged citizenship with a higher capacity to address the health-related challenges impacting Mat-Su and Alaska; and to this end has offered scholarships to help defray the cost of higher education and encourage Mat-Su residents to complete a degree or certificate program that emphasizes health and/or wellness; but also recognizes that more needs to be done to bolster the healthcare workforce in Mat-Su and Alaska;

WHEREAS Mat-Su Regional Medical Center has spent $6,238,438 on contract labor over the last five years on temporary health professionals from outside the state to fill current needs;

WHEREAS Alaska is competing with other states for the finite pool of available health care professionals; and over 40 states currently offer Support-for-Service Programs (SFSPs) that have influenced health professionals' geographic and specialty distributions;

WHEREAS national studies have determined loan repayment and incentive programs to be two of the most effective strategies in terms of both recruitment and retention;[vi]

WHEREAS without this incentive, it will be challenging for Alaska to compete for medical and health professionals, especially to work in rural areas;

BE IT THEREFORE RESOLVED that the Mat-Su Health Foundation promotes and advocates for the establishment of the Health Care Professions Loan Repayment & Employment Incentive Program to bring more qualified medical professionals to Alaska and will advocate for the necessary authorizing and fiduciary legislation.

***Approved by the Mat-Su Health Foundation Board of Directors on* January 18, 2010.**

Alaska State Legislature

Please enter into the record my testimony to the Senate Finance
committee name

Committee on SB 139, dated 3-31-10
bill # / subject — public hearing date

Dear Senators,

I am writing you with my concern regarding the omission of Licensed Professional Counselors (LPCs) in SB 139.
This is an important bill which I would support, with the inclusion of LPCs. Licensed Professional Counselors provide many of the front line direct mental/behavioral health services to the people of Alaska. We help to fulfill the realization of the vision of the Alaska Mental Health Act (Title 47) in serving to fill the mental/behavioral health vacuum throughout Alaska. To meet the needs that you seek to address, it is necessary to include LPCs in this legislation.
My colleagues and I, ask you to make this small but important addition to this important piece of legislation.

Sincerely,

J.R. Myers, LPC
President
Kenai Peninsula Counselors Association

3811

Outcomes of States' Scholarship, Loan Repayment, and Related Programs for Physicians

Donald E. Pathman, MD, MPH,† Thomas R. Konrad, PhD,* Tonya S. King, PhD,‡ Donald H. Taylor, Jr., PhD,§ and Gary G. Koch, PhD‖*

Context: Many states attempt to entice young generalist physicians into rural and medically underserved areas with financial support-for-service programs—scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs—with little documentation of their effectiveness.

Objective: The objective of this study was to assess outcomes of states' support-for-service programs as a group and to compare outcomes of the 5 program types.

Design: We conducted a cross-sectional, primarily descriptive study.

Participants: We studied all 69 state programs operating in 1996 that provided financial support to medical students, residents, and practicing physicians in exchange for a period of service in underserved areas; federally funded initiatives were excluded. We also surveyed 434 generalist physicians who served in 29 of these state programs and a matched comparison group of 723 nonobligated young generalist physicians.

Data Collection: Information on eligible programs was collected by telephone, mail questionnaires, and from secondary sources. Obligated and nonobligated physicians were surveyed, with 80.3% and 72.8% response rates, respectively.

Main Outcome Measures: Levels of socioeconomic need of communities and patients served by physicians, programs' participant service completion and retention rates, and physicians' satisfaction levels.

Results: Compared with young nonobligated generalists, physicians serving obligations to state programs practiced in demonstrably needier areas and cared for more patients insured under Medicaid and uninsured (48.5% vs. 28.5%, $P < 0.001$). Service completion rates were uniformly high for loan repayment, direct incentive, and resident-support programs (93% combined) but lower for student-targeting service-option loan (mean, 44.7%) and scholarship (mean, 66.5%) programs. State-obligated physicians were more satisfied than nonobligated physicians, and 9 of 10 indicated that they would enroll in their programs again. Obligated physicians also remained longer in their practices than nonobligated physicians ($P = 0.03$), with respective group retention rates of 71% versus 61% at 4 years and 55% versus 52% at 8 years. Retention rates were highest for loan repayment, direct incentive, and loan programs.

Conclusions: States' support-for-service programs bring physicians to needy communities where a strong majority work happily and with at-risk patient populations; half stay over 8 years. Loan repayment and direct financial incentive programs demonstrate the broadest successes.

Key Words: physicians, health services access, rural health, primary care, student loans and scholarships, loan repayment, state health policy

(*Med Care* 2004;42: 560–568)

■ *It is one of the happy incidents of the federal system that a single courageous State may, if its citizens choose, serve as a laboratory; and try novel social and economic experiments without risk to the rest of the country.—"Louis Brandeis*
Supreme Court of the United States
New State Ice Co. v. Liebmann, *1932; dissenting opinion*[1]

States and federal agencies frequently use service-requiring scholarships, loans, loan repayment, and related incentives to entice physicians into medically underserved settings.[2–4] As of 1996, 40 states offered 69 such physician-obligating programs, the federal National Health Service Corps (NHSC) and Indian Health Service (IHS)-sponsored scholarship and loan repayment initiatives,[5] and the NHSC and states jointly sponsored an additional 29 loan repayment programs. Service-requiring programs collectively wield a sizable workforce, estimated at 2900 physicians in 1996, half each under state and federal auspices.[5]

The 5 recognized program types—scholarships, service-option loans, loan repayment, direct financial incentives,

and resident support[5]—share fundamental goals and an approach that links financial support to periods of service; however, these program variations differ in important ways. *Scholarship programs* obligate medical students early in their training and many years before they are to serve their obligations. Participants in scholarship programs are firmly expected to provide service, and hefty penalties are used to discourage participants from buying out their obligations should their career interests change. *Service-option loan programs* also target medical students but offer participants a choice of performing service or repaying program funds at standard interest rates.

Loan repayment and *direct financial incentive programs* commit physicians much later, near the completion of residency training when their service is to begin. They typically levy no or minimal penalties on physicians who fail to complete a period of service. With loan repayment programs, physicians receive assistance repaying traditional education loans they acquired years earlier as students, whereas financial incentive programs provide unrestricted funds.

The newest programs, the *resident support* type, respond to the growing financial pressures on residents[6] with assistance in the form of scholarships, loan repayment, and direct financial incentives. Service is required and begins 1 to 2 years after a commitment is signed, at the end of residency.

Over the decades much has been said, with little supporting evidence, about the outcomes of these programs as a group and the relative strengths of the individual program types. It is generally believed, for example, that physicians in support-for-service programs are less satisfied and remain in their practices briefer than physicians without obligations. Many observers believe that stiff penalties are required to curtail otherwise high buyout rates, especially in programs that obligate individuals years in advance of service.[7] Others worry, however, that high penalties trap some participants in ill-suited commitments who are then unhappy as they serve and unlikely to be retained.[8–10] Proponents of loan repayment and direct incentive programs believe satisfaction and retention are better when physicians sign commitments after their training when they know their career interests, job options, and families' needs.[11] Scholarship defenders counter that only captive scholarship recipients can be drawn to the most desperately underserved communities because they are so unattractive.[12]

Few studies have assessed the outcomes of support-for-service programs, like the rates at which their practitioners complete their obligations with service and their practitioners' satisfaction and retention. Programs do not often undertake self-evaluations and those that do seldom have comparative data on other programs.[2,13] States and federal agencies regularly add, drop, and modify their programs without firm evidence of their effectiveness.[14–17]

This study has 2 primary goals: 1) to assess outcomes of states' support-for-service programs as a group, and 2) to compare outcomes for the 5 program types. We assess program outcomes we believe are important to underserved communities, physicians, and policymakers: the levels of socioeconomic need of communities and patients served by participating physicians, participant service completion and retention rates, and satisfaction levels of participants and their families. We also test the assumptions that 1) higher buyout penalties increase the proportion of physicians who fulfill their obligations with service but at a cost of lower physician satisfaction and poorer retention, and 2) scholarship programs bring physicians into the neediest communities.

METHODS

Identifying Eligible State Programs

We identified all state support-for-service physician programs nationally as of 1996[5] by supplementing previous lists of relevant programs[3,18,19] with information from telephone calls to key contacts in every state and from available online sources and printed materials. Eligibility criteria for programs were that they 1) provided financial support to students, residents, and/or practicing physicians in 1996; 2) had a service requirement or option in defined medically needy settings located across a given state; and 3) received no direct federal support. Of the 69 identified eligible programs, 20 offered scholarships, 24 provided loan repayment incentives, 12 offered loans with service options, 7 offered direct financial incentives, and 6 offered support to residents.

Program Data

We obtained basic descriptive information for all programs through initial and follow-up telephone contacts with program directors and from programs' web sites, brochures, reports, and copies of their enacting legislation. This information was verified and supplemented through an 8-page mailed questionnaire completed by 45 programs (65%). Forty-eight (86%) of the 56 programs old enough to have had more than 20 physicians eligible for placement in service sites provided estimates of the service completion rate for their obligated physicians over the previous 3 years. Programs were approached for survey and other data in no particular order other than we started with the few directors we knew and tended to recruit all programs within a particular state at the same time.

Identifying State-Obligated and Comparison Group Physicians

Programs were asked to provide names and basic information on each physician who signed a first contract with them and/or had been placed in a first-service site in 1991 and 1996. These 2 years were selected because individuals who

committed to student programs in 1991 and loan repayment and direct incentive programs in 1996 would have begun serving their obligations in approximately 1996. Programs created after 1991 provided names of individuals contracted in their first year of operation; very large programs provided only a randomly selected subsample of names from 1991 and 1996, and smaller programs supplemented their samples with names of physicians obligated in proximate years (eg, 1992 and 1995). We elected not to request physician names from the last 12 eligible programs as a result of project time requirements. Of the 48 programs from which we requested physician data, 29 (60%) provided all data we needed to survey their obligated physicians. Programs from which we requested and received physician-specific information, programs from which we requested but did not receive this information, and programs from which this information was not requested were similar in size, physicians' contract terms, the types of geographic locations where their obligated practitioners served, and reported service completion rates.

We surveyed all 434 family physician, general internist, and general pediatrician participants (allopaths and osteopaths) identified by programs as then serving or having served their obligations. We excluded nongeneralists and physicians who defaulted or bought out their obligations without ever serving a day of their obligations. Programs reported no international medical graduates.

We constructed a comparison group of nonobligated generalists from the American Medical Association Physician Masterfile. A sampling frame of eligible subjects was constructed of all 8742 graduates of U.S. allopathic and osteopathic medical schools in 1988 and 1992 who 4 years after graduation were in clinical practice in the United States in family practice, general internal medicine, and general pediatrics. A stratified random sample of 723 of these physicians was selected, with oversampling of strata to match the state-obligated cohort in specialty distribution and geography, and to ensure diverse racial and ethnic representation.

Physician Surveys

In 1998 and early 1999, we sent up to 4 questionnaire mailings to the state-obligated and comparison group physicians. Of the 434 obligated physicians surveyed, 23 proved to be ineligible or were never located, and there were 330 eligible respondents (80.3%). Response rates for obligated physicians were comparable across service program types, physician specialties, and racial–ethnic groups.

In the comparison sample of 723 physicians, 56 subjects proved ineligible or were never located and 468 eligible physicians responded (72.8%). Response rates for the comparison sample did not vary by subjects' rural/urban location, gender, or specialty; rates were somewhat lower for blacks (52.4%). We excluded 100 physicians from the comparison group who indicated that they had or were serving a state or federal obligation.

In the physician questionnaires, participants of state programs reported details of the first practice in which they served their obligations. On parallel questionnaire items, comparison group physicians described the first practice after residency in which they worked 9 months or longer. Both groups reported their incomes, satisfaction, their families' experiences, and their patients' insurance types. Nearly all questionnaire items had been used in earlier studies[9,20,21] and were pilot-tested again for applicability to this study with 30 obligated and nonobligated physicians in North Carolina.

We appended 1990 U.S. Census data characterizing the towns and cities where physicians worked.[22] County data on local physician-to-population numbers were appended for 1994 from the Area Resource File.[23]

Analyses

We compared obligated and nonobligated physicians on a variety of outcomes, including satisfaction and retention rates. We also compared programs of each of the 5 types individually and with the other 4 program types as a group. We used chi-squared tests, independent sample 2-tailed t tests, and 1-way analysis of variance (ANOVA) to compare groups on normally distributed variables. The Kruskal-Wallis test was used to compare groups on 4 nonnormally distributed variables: physician income, town population, town per capita income, and county primary care physician-to-population ratios. Bivariate comparisons were followed with linear and logistic regression models (with log transformations of nonnormally distributed variables) to adjust for key potentially confounding or explanatory variables. Life tables were used to describe proportions of physician groups remaining in their practices for specified numbers of years. Kaplan-Meier plots and Cox proportional hazards models were used to compare estimates of retention for various physician groups over time.

We also assessed relationships between programs' buyout costs and the various program outcomes with chi-squared and 2-tailed t tests. We further used multiple and logistic regression to test the relationships between buyout costs and the various outcomes for confounding by varying service obligation terms across programs and/or respondents' actual obligation periods. No confounding was found and we do not report these models.

Comparisons of obligated and nonobligated physicians were weighted to adjust for strata sampling fractions and response rates and run on the SUDAAN statistical software program (Research Triangle Institute, Research Triangle Park, NC). Analyses involving only obligated physicians were run on the SPSS statistical program (release 11.5.0; SPSS Inc., Chicago, IL) and not weighted. A level of statistical significance of $P \leq 0.05$ was used throughout.

RESULTS

State Programs

In 1996, the 69 eligible programs were relatively new and small, with a median age of just 6 years and median workforce of 11 physicians. Sixty-four programs were funded with state revenues, 2 had only private support, and 3 were self-supporting using buyout funds from earlier participants; 9 programs also used community matching funds. Forty-seven programs were based in state offices of rural health or other state agencies, 18 within individual medical schools, and 4 within private organizations.

Programs supported physicians with an average of $14,000 for each year of obligated service with no significant differences across the 5 types of programs ($P = 0.55$). Average minimum service obligation terms did vary across program types, from 12 months in resident support programs, 18 months in scholarship programs, 19 months in service-option loan programs, 29 months in loan repayment programs, and 36 months in direct financial incentive programs ($P = 0.003$).

Physicians and Their Practices

Physicians obligated to state programs, compared with physicians without obligations, were more often male (63% vs. 53%, $P < 0.05$), more often married (84% vs. 75%, $P < 0.05$), slightly older (33 vs. 32 years on average, $P < 0.001$), but no more or less likely to be black or Hispanic (8.5% vs. 6.2%, $P = 0.10$). Obligated physicians were much more likely than nonobligated generalist physicians to be family physicians (72% vs. 38%, $P < 0.001$) and more often owned the practices where they worked (36% vs. 27%, $P < 0.05$), but earned comparable salaries (median, $89,735 vs. $89,622, $P = 0.2$).

Comparing physicians obligated to the 5 types of programs, we found no differences in gender, marital status, ethnicity, or income. Loan program participants, however, were less likely to be family physicians than participants of other programs (54% vs. 75%, $P = 0.02$), and physicians in incentive programs more often owned their practices (49% vs. 16%, $P = 0.01$).

Although minimum service obligation durations varied across programs of the 5 types, the average number of years this study's respondents were actually obligated to their programs did not differ for those in 4 of the types (range, 3.13–3.48 years, $P = 0.31$) but was shorter for participants of resident-support programs (2.72 years, $P = 0.02$).

Service Completion Rates

The 5 types of programs differed greatly in how often their physicians completed their obligations with service rather than buying out or defaulting ($P < 0.001$) (Fig. 1). Service-option loan programs reported the lowest average service completion rates (44.7%) followed by scholarship programs (66.5%). The 30 programs of the remaining 3 types, programs that committed physicians after training or as residents, reported uniformly high service rates (entire group mean, 93%; 92% after omitting the 5 of these 30 programs without a minimum service period).

Program directors reported obligation default rates, the proportion of obligated physicians who failed to provide either service or repay program funds, of 5.2% on average for all programs combined with no significant differences across program types ($P = 0.78$). In contrast, the percentage of physicians who bought out-of-service commitments differed greatly across the 5 program types, greatest in service-option loan programs (49.2%) and scholarship programs (27.2%).

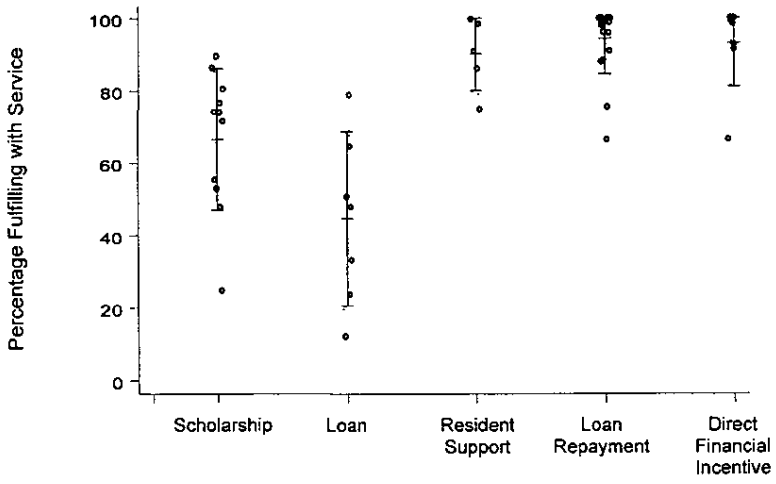

FIGURE 1. Percentage of recent physicians in each program (°) who fulfilled their obligations with service, grouped by program type.

Programs of the remaining 3 types reported comparable low buyout rates (2.3% combined). Thus, the high buyout rates of student programs account for their low service completion rates.

The costs that loan repayment, direct incentive, and resident support programs levy on physicians who buyout of obligations had no relationship with programs' service completion rates. Only among student programs, scholarships and service-option loans, were penalties and service completion rates related; specifically, rates averaged 80.3% for the 4 student programs that charged penalties of 3 times the amount of support provided compared with 48.6% for the 12 programs that charged less ($P = 0.02$).

Communities and Patients Served by Physicians

Physicians serving in state programs of all types combined, compared with the nonobligated physicians, worked in counties that were far more often rural and had lower primary care physician-to-population ratios, in cities and towns that were much smaller and poorer, and they reported more of their patients were uninsured or covered under Medicaid (Table 1). Even in analyses run separately for rural and urban-situated physicians and in multivariate models adjusting for physicians' rural versus urban location, specialty, and demographics, obligated physicians were still found to work in needier communities and with needier patients by all measures.

We explored whether county physician-to-population ratios were lower for obligated physicians simply because states with a greater need for physicians (and thus lower ratios) more often sponsored support-for-service programs.[24] We confirmed that, indeed, obligated physicians worked in counties with primary care physician-to-population ratios lower than their state's median county ratios more often than nonobligated physicians (37% vs. 11%, $P < 0.001$).

Among obligated physicians and weighing findings on all 5 measures of community need (Table 1), those serving in direct financial incentive programs worked in the neediest settings. Contrary to popular belief, the towns and counties where scholarship participants worked demonstrated no greater need than where participants of other programs worked.

Physician and Family Satisfaction

Physicians serving state obligations were more often satisfied with their work and practices and more often felt a sense of belonging to their communities than nonobligated physicians (Fig. 2). Obligated and nonobligated physicians gave comparable estimations of the satisfaction and needs-fulfillment of their spouses and children.

In virtually all ways tested, satisfaction was comparable for physicians and families participating in the 5 types of programs, the only exception being that scholarship program participants more often than others felt restricted by the practice sites available to them (36.6% vs. 19.3%; $P < 0.01$).

TABLE 1. Comparison of Community and Patient Characteristics of State-Obligated and Nonobligated Physicians; Physicians Serving in the 5 Types of Service Programs; and Physicians Obligated to Programs Using Different Types of Site-Eligibility Criteria

		Community and Patient Characteristics				
	(n Physicians/ Programs)	Rural (Nonmetropolitan) County (%)	Median Town/City Population	Median Town/City per Capita Income ($)	Median County Primary Care Physician-to-Population Ratio	Mean Patients Covered by Medicaid or Uninsured (%)

FIGURE 2. Satisfaction and needs fulfillment of physicians and their families serving in all state programs combined (n = 330) compared with nonobligated physicians (n = 368)

A remarkable 90.2% of obligated physicians indicated that they likely would enroll in their program if they had it to do all over again, including 64.2% who indicated that they definitely would do so. Differences across programs were found only for physicians in scholarship compared with loan repayment programs in which 47% versus 71% of physicians indicated that they would definitely sign up again ($P = 0.01$).

We explored the relationships between the buyout costs that programs levied and physicians' satisfaction, again finding associations only for medical student-targeted programs. When service-option loan and scholarship programs charged more than simple principal plus interest to buyout, most measures of physician satisfaction were lower, including fewer participants reporting, in retrospect, a definite willingness to commit to their programs again (36% vs. 65%, $P = 0.04$).

Retention

Obligated physicians remained longer in their service practices than nonobligated physicians remained in their first jobs after training (hazard ratio [HR] for leaving, 0.70; 95% confidence interval [CI], 0.51–0.96; $P = 0.029$) (Table 2). Respective group retention rates from life tables at 2 years were 92% versus 77%, at 4 years 71% versus 61%, at 6 years 59% versus 55%, and at 8 years 55% versus 52%. Retention tended to be better for obligated physicians than nonobligated physicians even after adjusting for group differences in physicians' specialties and demographics, although the differ-

TABLE 2. Comparison of the Retention of State-Obligated versus Nonobligated Physicians

	Hazard Ratio	*P* Value	95% Confidence Interval
Model 1 (unadjusted)			
Obligated vs. nonobligated	0.70	0.029	(0.51–0.96)
Model 2 (adjusted)			
Obligated vs. nonobligated	0.75	0.080	(0.53–1.03)
Family physician vs. internist	0.91	0.688	(0.58–1.43)
Pediatrician vs. internist	0.80	0.533	(0.40–1.61)
Male vs. female	0.76	0.190	(0.50–1.15)
Married vs. unmarried	0.75	0.270	(0.46–1.25)
Age when physicians began serving obligations	1.01	0.675	(0.95–1.08)

ence fell under the threshold of statistical significance (P = 0.08).

Among the 5 types of service-requiring programs, the longest group retention was seen for loan repayment recipients, 66% of whom remained in their service sites 8 years after starting work there, with a hazard ratio of departure compared with all other programs = 0.46 (95% CI, 0.30–0.70; P <0.001) (Fig. 3). Retention was shortest for resident support programs (HR, 6.72; 95% CI, 4.05–11.12; P <0.002). Scholarship participants demonstrated the second shortest retention (HR relative to service-option loan, loan repayment and direct incentive programs, 1.96; 95% CI, 0.97–3.97; P = 0.061).

Programs' buyout penalties were associated with retention, but once again only in scholarship and service-option loan programs, wherein penalties above simple principal plus interest were associated with lower odds of retention at 4 years (odds ratio, 12.4; P = 0.012).

DISCUSSION

Outcomes for states' support-for-service programs as a group were generally quite positive. Programs as a whole placed physicians in small and needy rural towns and counties, where physicians estimated that almost half of their patients were covered by Medicaid or were without health insurance. Physicians who served in these state programs were generally more satisfied with their work and communities and remained in their service sites longer than nonobligated "mainstream" generalists. We do not believe that the jobs and communities where these physicians served were inherently more pleasing; rather, we suspect that the benevolence of individuals who commit to and then fulfill service requirements predisposes them to find particular satisfaction from work that they believe in.[25,26]

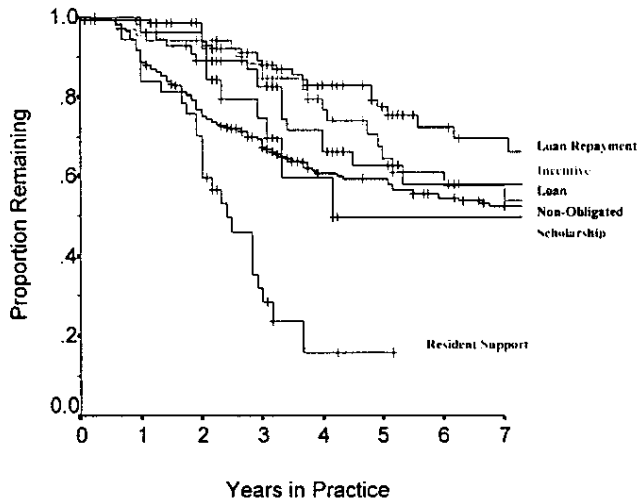

FIGURE 3. Retention of obligated physicians within their service practices: Kaplan-Meier estimations by type of program and compared with nonobligated physicians

Loan repayment and direct financial incentive programs enjoyed the greatest successes among the various program types, confirming the wisdom of recruiting physicians at the end of their training.[11] Financial buyout penalties were generally not used or needed in these programs, because their service completion rates were excellent without financial threats. Several program directors spoke of how much easier loan repayment and financial incentive programs are to administer than student-targeted programs, in which program staff must monitor participants during their training and deal with the many who buy out.[10,27] Direct financial incentive programs demonstrated an interesting niche among the program types, supporting physicians who often owned their practices, often in particularly needy settings.

Despite positive outcomes for programs overall, this study confirmed some commonly held concerns about scholarship programs. Very high penalties do seem to cut buyout rates by one third,[7] but penalties of any amount were associated with lower physician satisfaction and shorter retention. Contrary to claims,[12] state scholarship program participants did not work in demonstrably needier settings than participants of other programs. Studies of the NHSC Scholarship Program have similarly found that its participants do not serve in needier settings than those in the NHSC Loan Repayment Program.[11,27] The Congressional Government Accounting Office (GAO) and NHSC further similarly concluded that the NHSC Loan Repayment Program achieved better outcomes—higher service-completion rates, greater satisfaction, and longer retention—than the NHSC Scholarship Program, and also at a lower cost.[11,15,28]

The affordable buyout terms of student service-option loan programs allowed half of their participants to opt out of service, but the half who did serve were satisfied and long retained. Service-option loans could play an important complementary role to programs that target graduates, appealing to aspiring medical students who might otherwise choose not to pursue a medical career rather than assume the typical $100,000+ debt in traditional education loans. To embrace loan programs with service options, states must accept that it is not fatally undesirable for some participants to satisfy their loan contracts financially rather than with service. Indeed, most medical students fund their education with traditional loans, like the Health Education Assistance Loans (HEAL), where there is no option or enticement for service.[6] Concerns that too many physicians buyout of loan-for-service programs leaving too few available for shortage communities can be addressed quite readily by making more awards up front, costing programs nothing more because nearly all who opt not to serve repay their loans with interest.

Limitations and Unanswered Questions

Some of this study's data were self-reported and thus vulnerable to reporting inaccuracies. Directors provided figures on their programs' default and buyout rates and likely used a variety of methods to determine these rates. We are unaware, however, of any systematic inaccuracies likely to have biased our principal findings.

Some directors of scholarship and service-option loan programs who otherwise cooperated with our study would not provide the physician-specific information we needed to survey their participants, citing federal confidentiality protections of administrative data collected on students.[29] Given the demonstrated similarities between participating and nonparticipating programs, most importantly in the service completion rates of their participants, we do not suspect that the lower participation rates of student programs biased our outcomes. However, if less successful student programs withheld participants' names to hide their weaknesses, then loan repayment and direct incentive programs could actually be relatively even *more* successful than we judged (ie, bias, if present, was toward the null).

We had wanted to assess program costs and cost-effectiveness but program directors could not provide complete or comparable cost data. We also did not assess the experiences of physicians who signed up with these programs but chose not to serve.

We had no validated criteria on which to judge how often state-obligated physicians work in the very neediest settings, because states have not substantiated their site eligibility criteria and current federal criteria are inadequate.[30,31] Nonetheless, because some state programs use very broad site eligibility criteria, it is very likely that some obligated physicians do not work in the neediest areas.[5,32]

CONCLUSIONS AND RECOMMENDATIONS

As a whole, states' support-for-service programs bring physicians to needy communities where they find satisfying work caring for at-risk patient populations and remain for many years. Of all program types, the loan repayment and direct financial incentive forms, which target physicians after training, show the broadest successes. The successes of these state programs warrant their continued support and perhaps expansion to remedy the continuing maldistribution of physicians.

ACKNOWLEDGMENTS

The authors are grateful to the many state program directors, program staff, and participating physicians who provided data for this study. The authors thank the indispensable contributions of Kathleen Crook, MPA, to the data management aspects of this study, and the contributions of Tim Henderson, MSPH, of the National Conference of State Legislatures and James Bernstein, MHA, and Thomas Tucker of the NC Office of Rural Health and Resources Development to our understanding of these state programs and interpretation of the data. The authors also thank the fellows of UNC's National Research Service Award Primary Care Research Fellowship for their thoughtful suggestions on various drafts of this paper. This study was funded by grant R01-HS09165 from the Agency for Healthcare Research and Quality.

Context In the mid-1980s, states expanded their initiatives of scholarships, loan repayment programs, and similar incentives to recruit primary care practitioners into underserved areas. With no national coordination or mandate to publicize these efforts, little is known about these state programs and their recent growth.

Objectives To identify and describe state programs that provide financial support to physicians and midlevel practitioners in exchange for a period of service in underserved areas, and to begin to assess the magnitude of the contributions of these programs to the US health care safety net.

Design Cross-sectional, descriptive study of data collected by telephone, mail questionnaires, and through other available documents, (eg, program brochures, Web sites).

Setting and Participants All state programs operating in 1996 that provided financial support in exchange for service in defined underserved areas to student, resident, and practicing physicians; nurse practitioners; physician assistants; and nurse midwives. We excluded local community initiatives and programs that received federal support, including that from the National Health Service Corps.

Main Outcome Measures Number and types of state support-for-service programs in 1996; trends in program types and numbers since 1990; distribution of programs across states; numbers of participating physicians and other practitioners in 1996; numbers in state programs relative to federal programs; and basic features of state programs.

Results In 1996, there were 82 eligible programs operating in 41 states, including 29 loan repayment programs, 29 scholarship programs, 11 loan programs, 8 direct financial incentive programs, and 5 resident support programs. Programs more than doubled in number between 1990 (n=39) and 1996 (n=82). In 1996, an estimated 1306 physicians and 370 midlevel practitioners were serving obligations to these state programs, a number comparable with those in federal programs. Common features of state programs were a mission to influence the distribution of the health care workforce within their states' borders, an emphasis on primary care, and reliance on annual state appropriations and other public funding mechanisms.

Conclusions In 1996, states fielded an obligated primary care workforce comparable in size to the better-known federal programs. These state programs constitute a major portion of the US health care safety net, and their activities should be monitored, coordinated, and evaluated. State programs should not be omitted from listings of safety-net initiatives or overlooked in future plans to further improve health care access.

JAMA. 2000;284:2084-2092 www.jama.com

DURING THE PAST 30 YEARS, the federal government has played a key role in efforts to encourage primary care physicians and other health care practitioners to work in underserved areas. The most visible federal program has been the National Health Service Corps (NHSC), which supports students and young practitioners with scholarships and loan repayment incentives in exchange for a specified period of work in shortage areas.[1-4] The NHSC has supported some 20000 health care practitioners and received wide recognition for its efforts.

States also have offered programs to encourage physicians and others to work in underserved areas, although their efforts have been much less visible.[5-10] Among the most common of these state safety-net efforts are those similar to the NHSC's programs, in which financial support is provided to students and practitioners of health care professions in exchange for a period of service in underserved communities.[9]

State involvement in these programs dates to Arkansas' creation of a medical scholarship program with a service requirement in 1940, 30 years before US Congress created the NHSC.[8,11] By the mid-1980s, 26 states supported 29 programs that offered health care professionals financial support in return for service commitments.[9] From 1985 through 1992, the pace of program growth quickened, with 35 states enacting legislation to create physician scholarships and similar programs.[12,13]

Despite states' investments, little is known about their service-requiring programs. No national organization or central public agency monitors these programs. Partial lists of state programs have been assembled[9,10,14-19] but there has not been a complete enumeration of them.[20] These programs also tend not to formally evaluate themselves or document their successes, as they often lack the funds, expertise, and mandate to do so.[18,20] As a consequence, these state-level programs and their contributions have been hidden from national awareness, omitted from most listings of medical safety-net efforts,[2,21-24] and overlooked in national access-to-care policy discussions.

We aimed to describe these overlooked state programs and to begin to understand their role in remedying the geographic maldistribution of health care practitioners. We addressed both public and private programs that operate within states and provide financial support to physicians and nonphysician primary care practitioners and trainees in exchange for service in underserved areas. We calculated comparative information on similar federal programs to add a sense of perspective to the characterization of these state programs.

METHODS

Identifying Eligible State Programs

Eligibility criteria for programs were refined through the course of this study as we learned about the numerous and varied state programs that support young practitioners. Ultimately, eligible programs were designated as those that (1) provided financial support to students, resident or practicing physicians, physician assistants, nurse practitioners, or certified nurse midwives; (2) had a service requirement or option in a defined medically underserved setting; (3) supported practitioners with state public dollars, community funds, recurring program dollars, or funds from private nonprofit sources (eg, state medical societies) but did not have direct federal support; (4) placed practitioners in underserved areas across a given state rather than solely in 1 region or community within a state; (5) delivered financial support directly to practitioners or to an educational or financial entity on their behalf, such as to a medical school or commercial lender; and (6) were operating in 1996. The calendar year 1996 is the period for which this evolving group of state programs is described because it was the most recent year for which programs could report complete information when data collection for this study began in 1997.

We excluded the 29 programs sponsored jointly by states and the federal government—called "state loan repayment programs" by the NHSC[1,3]—because of their federal support and their differences under federal regulations from the fully independent and more varied programs created and managed solely by states. However, we included the nonfederal components of the few loan repayment programs that sponsored some practitioners with solely state funds under one set of contract terms and also supported other practitioners with combined state and federal funds under different contract terms. We also excluded programs with other types of federal support (eg, the Native Hawaiian Health Scholarship Program), programs run by individual employers and communities, and programs that provided funds directly to communities or other local entities for recruitment and retention activities even if used for loan repayment or other financial incentives. We further excluded service-requiring programs for registered nurses, dentists, pharmacists, and other health care workers if they were not open to physicians or midlevel practitioners or if these 2 latter groups did not compose a significant portion of obligated participants.

To identify all eligible programs, we augmented previous lists of relevant programs[9,10,14-19] with information from telephone calls to key contacts in every state from mid-1997 through mid-1999. Contacts included individuals and program offices named in prior compendia, officials in state offices of rural health, state public health offices, state higher education financial aid authorities, financial aid offices of individual medical schools, and, in some cases, state medical and specialty societies and relevant within-state foundations. Contacts were queried about potentially eligible programs run by their organizations or by others in their states. Contacts for potential new programs were then called, sometimes leading to further contacts. No additional calls were made when contacts indicated that we were aware of all potentially eligible programs and when we were confident of the eligibility and fate of every program listed in prior compendia. Typically, 4 to 6 individuals were interviewed in each state.

Data Collection

Detailed information about eligible state programs, including their mission, history, types of obligated practitioners, field strengths, and contract terms, was obtained through the initial and subsequent telephone interviews, typically with program directors. All programs provided enough information by telephone to ascertain eligibility and most provided virtually all of the information on program characteristics reported here. This information was then confirmed and supplemented with mailed questionnaires that were returned by 67.1% of the directors of eligible programs, and for all programs with information from Internet Web sites, brochures, application materials, texts of enacting legislation, or prior in-state evaluations and compendia.

Further follow-up contacts were made to program directors to clarify ambiguous and conflicting information. In the 17 cases in which sources could not—or, in a few cases, would not—provide exact counts of new practitioner contracts and program field strength in 1996, we generated estimates from all available information, typically by averaging or extrapolating data from earlier and subsequent years. When information about a program differed among various sources, we heeded information from programs' printed reports and program directors over other sources.

We calculated the comparative field strength of the NHSC's scholarship, federal loan repayment, and state loan repayment programs as of September 1996 with data from the NHSC on all of its current and past practitioners. Data on practitioners serving in the Indian Health Service (IHS) loan repayment program[25] were from the IHS Office of Management Services. We were unable to obtain needed practitioner counts for several smaller federal programs, such as the NHSC Community Scholarship Program and the IHS Health Professions Scholarship Grant Program.[3,26] However, with collectively fewer than 50 primary care practitioners at any point during the 1990s, we simply omitted these programs from the federal comparison data.

Analyses

We developed a classification of program types. Frequencies of eligible programs in 1996 were tabulated by type. Tallies of the numbers and types of programs in operation each year from 1990 to 1996 were based on the reported start and end dates of all current programs and those that ceased operation between 1990 and 1996. The distribution of state programs across the states and US regions was described. National tallies of 1996 new practitioner contracts and total field strength were estimated by summing data across programs. Last, basic features of programs were described, including their missions, funding sources, eligible service sites, and terms of contracts with practitioners.

RESULTS

Types of State Programs

Discussions with program directors revealed that there were no universally accepted terms for denoting the various types of programs. For example, the terms *bonus*, *incentive*, *grant*, and *tuition reimbursement* used in program titles all indicated funds given to practitioners and graduating residents to be used for any desired purpose. Some other programs blurred the distinctions between loan and scholarship programs by using both terms in their titles and in program descriptions they provided to applicants, reasoning that when a contractual loan debt was repaid with service, it in effect became a scholarship. Other loan-writing programs retained the term *loan* in their titles and descriptions of practitioners' obligations, regardless of how individuals settled their debt.

From the great variability in program features and labels, 5 program types were distinguished: scholarship, loan, resident support, loan repayment, and direct financial incentive programs (TABLE 1). These program categories were based on (1) the career stage of targeted eligible applicants (ie, students, junior residents, senior residents, or practitioners); (2) whether service was required or optional (from which many other program characteristics followed, such as the criteria for selecting practitioners and the buyout terms of practitioners' contracts); and (3) whether programs' financial support to practitioners was to be used solely for up-front training costs, after-the-fact repayment of educational loans, or for unrestricted use. This typology of programs captured the key differences across programs and reflected the underlying rationale of virtually all programs. It also was consistent with the classification and labels used for federal programs. Furthermore, this typology distinguishes among the program options that practitioners encounter at various career stages. For example, students could opt for either a scholarship or loan program where available, whereas graduating residents and practitioners could commit to loan repayment or direct financial incentive programs.

State Program Numbers and Flux

In total, 82 eligible programs were identified in 41 states in 1996, with 9 states and the District of Columbia not offer-

Table 1. Classification of Support-for-Service Programs

Program Type	No. in 1996	Eligible Individuals	Service	Use of Funds	Typical Design
Scholarship	29	Students	Required	Up-front training costs	Funds to students for tuition, fees, books, and living expenses, with service expected after training
Loan	11	Students	Optional	Up-front training costs	Loans to students for tuition, fees, books, and living expenses; loan is repaid after training either financially or by providing service
Resident support	5	Junior residents	Required	Variable	Unrestricted funds for junior and, occasionally, senior residents, with service expected after training
Loan repayment	29	Senior residents and practitioners	Required	Repayment of educational loans	Funds to repay outstanding educational loans of graduating residents and practitioners in exchange for service
Direct financial incentive	8	Senior residents and practitioners	Required	Unrestricted	Unrestricted incentive funds for graduating residents and practitioners in exchange for service

ing an eligible program. (States named 79 eligible programs, of which 3 were dual programs that maintained 2 components, each of which fit 1 of the 5 program types. For clarity, ease of presentation, and because all other states treated similarly distinct components as 2 different programs, we present these 3 dual programs as 6 separate programs in this article.) Alaska, California, Colorado, Connecticut, Delaware, Hawaii, Michigan, Rhode Island, and Wyoming had no qualifying programs.

There were many state programs that were similar to the 82 eligible programs but that failed to meet 1 or 2 of the eligibility criteria. These not-quite-eligible programs included 6 generally large programs in which obligated practitioners were restricted to work within their states' borders but not in underserved areas. Also ineligible were 3 very large loan and scholarship programs that supported individuals from a wide array of professions, of whom only a few were physicians or midlevel health care practitioners.

Loan repayment (n=29) and scholarship (n=29) programs were the most numerous in 1996, with fewer loan (n=11), direct financial incentive (n=8), and resident support types (n=5). Among all programs, 84% (n=69) were available to medical students, residents, and physicians, whereas 44% (n=36) supported student or practicing physician assistants, nurse practitioners, or nurse midwives. Twenty-eight percent (n=23) targeted both groups. Twenty percent (n=16) also supported other types of health care workers, such as registered nurses, dentists, and podiatrists.

Year-by-year tallies of operating programs, based on all sources of information on current and past programs, revealed that these state programs more than doubled in number from 1990 to 1996, increasing from 39 to 82 (FIGURE). Nearly all of this growth was due to the tripling of loan repayment programs and doubling of scholarship programs. The first resident support program was created in 1992. We learned of 3 programs that were terminated from 1990 through 1996 and another 3 that were transformed from one type of program into another (eg, a loan program created in 1965 became a scholarship program in 1995 when service changed from an option to a requirement and payback penalties were greatly increased).

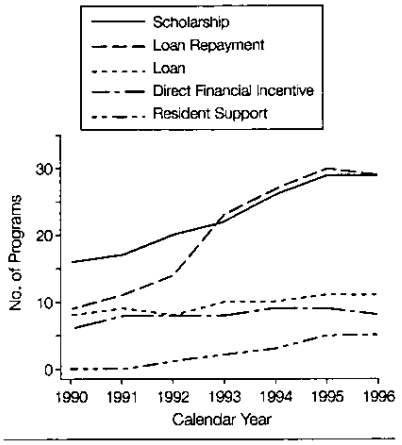
Of the programs in operation in 1996, 5 (6%) predated 1950, whereas 47 (59%) had been established or assumed their current form since January 1990. Among the newest programs in 1996 were 2 that had not yet signed a contract with a practitioner and another 5 programs that had signed contracts but had yet to place their first participating practitioner. At the other end of the program life span were 5 programs operating in 1996 that were being phased out. In nearly every case, program creations, eliminations, and transformations were undertaken at the initiative of state legislators, program officials, or local advocates in an effort to try newer and more promising program types, eliminate underperforming programs, or rectify perceived weaknesses in existing programs.

Distribution of Support-for-Service Programs Across States

Of the 41 states that offered eligible state-level support-for-service programs, 23 offered 2 or more such programs (TABLE 2). Twenty-four states offered both fully state-supported programs and programs with joint state and federal support. States that offered programs funded with purely in-state funds were no more or less likely to cosponsor joint state-federal programs (odds ratio, 1.07; $P=.93$). State-funded programs were somewhat less common among states in the West than in states in the South, Northeast, and North Central regions (61% vs 89%), whereas joint state-federal programs were more common among states in the Northeast than in other regions (100% vs 50%).

Some program director respondents working in offices that managed both state and joint state-federal loan repayment programs indicated that they first attempted to place practitioners through their jointly funded programs to save state costs. However, informants also indicated that positions in purely state-funded programs often were more popular with practitioners because they generally offered a wider choice of practice sites and greater flexibility, despite having less lucrative financial terms.

Figure. Number of State Support-for-Service Programs in the United States, by Type and Year



Program Workforce

Programs funded solely within states tended to be small, with a median number of 8 new contracts in 1996 and a median field strength of 11 practitioners serving their obligations. Some programs were substantially larger, including 12 that signed more than 25 new contracts (the largest had 112 contracts) and 16 that maintained field strengths of more than 35 practitioners (the largest had 120 practitioners).

In 1996, the 82 state programs collectively signed initial contracts with an estimated 1215 practitioners, of whom 959 (79%) were physicians (TABLE 3). In the same year, these programs maintained an estimated collective field strength of 1676 practitioners working to fulfill their obligations, of whom 1306 (78%) were physicians.

The estimated total field strength of physician and midlevel practitioners in both state and federal support-for-service programs in 1996 was 3876 in-

*The District of Columbia had neither a qualifying state program nor a joint state-federal program.

dividuals (Table 3). Of this number, approximately 1700 were serving in state programs, a roughly comparable number were serving in federal programs, and another 489 individuals were serving in joint state-federal programs. State programs supported a larger physician workforce than federal programs, whereas federal programs supported a larger workforce of midlevel practitioners.

Features of State Programs

The primary or joint mission of all but 3 of the 82 state programs was to influence the distribution of the health care workforce. Programs were administered by a variety of organizations and offices, including individual medical schools, state offices of rural health, and a few private organizations (TABLE 4). Three of 4 state programs were funded entirely or partially by annual appropriations from state legislatures, and others had received state funds earlier in their history. Only 3 programs were supported completely or in part by private funds.

Reliable revenue figures were unavailable for many programs, typically because program-specific funds could not be separated from lump-sum appropriations allocated to administering offices for a variety of programs. Many programs indicated, however, that they operated under very modest budgets, with funds allocated almost entirely to meet the stipend or incentive needs of participating practitioners and with little additional funding available for practitioners' other needs or for program administration.

States used a variety of approaches to define sites where practitioners could serve their obligations. Most programs (55%) used unique criteria specified in their enacting legislation or devised by a shortage area designation office within the state. State-defined community eligibility criteria varied from complex combinations of need indicators, such as physician-population ratios, indicators of population health status, and travel distances to nearest physicians, to simple ceiling sizes of town or county populations (eg, all towns smaller than 10000 were

©2000 American Medical Association. All rights reserved.

Downloaded from www.jama.com at Univ Of North Carolina / Acquisitions srvcs on February 17, 2009

deemed eligible). Only 10% of programs used the federal Health Professional Shortage Area (HPSA) or Medically Underserved Area (MUA) criteria without modifications, and 35% of programs used the federal HPSA or MUA designations in combination with state-devised criteria. A sizable minority of programs (41%) placed practitioners exclusively or preferentially in rural areas. All but 1 of the 23 programs available to both physicians and midlevel practitioners used identical site eligibility designations for both groups.

Programs that supported physicians clearly targeted primary care physicians: all accepted family physicians and 93% accepted general internists and pediatricians. Far fewer programs accepted physicians of other specialties, and they sometimes accepted them only on a case-by-case basis to meet a particular community's needs.

In most programs, obligated practitioners were asked to identify their own practice opportunities within designated eligible communities, then seek approval from their program for their chosen site. Only 13 programs (16%) listed specific types of qualifying practice settings (eg, health departments, prisons, neighborhood health centers) or named specific practices where practitioners could fulfill their obligations.

Practitioners' contract terms varied greatly across programs. For physicians, financial support varied from $3000 to $38 000 per year and the minimum obligation term varied from 1 to 60 months. Costs for those who bought out of their obligations financially rather than through service varied from nothing (in several programs that paid physicians only after they completed their service and had no need for penalties) to 3 times the outstanding principal plus interest. Contract terms for nonphysician practitioners were typically the same as those for physicians.

COMMENT

The number of state-run programs that leverage financial incentives to entice physicians and other primary care practitioners into underserved area practices began to grow in the mid-1980s.[8,12] This study demonstrates a continued and remarkable growth in these programs through the mid-1990s. In 1996, nearly 1700 physicians and midlevel practitioners were serving in 82 identified state programs, comparable with the number serving in the better-known federal NHSC and IHS. States and the federal government cosponsored another 489 primary care practitioners.

Because of their relatively recent and rapid expansion and lack of central coordination, little has been known about the contributions of state programs to the health care needs of underserved communities. We found that most state programs have missions and structures similar to those of federal loan repayment and scholarship programs. States also offer 2 new program variants, the resident support and direct financial incentive types, as well as traditional loan programs with service options. As is common of state programs, support-for-service programs vary significantly in design and operations.[27] Variation arises from creative approaches to meet local needs and opportunities, or is a less deliberate outcome of political forces. In addition to wholly new program types, specific examples of innovation include a southern loan program that required its students to participate in a rural training curriculum, an Appalachian-region program in which financial benefits varied according to the level of need where physicians served, and a midwestern loan program for which acceptance into the program improved the chances of admission into in-state public medical schools. Some programs allowed practitioners to fulfill obligations with part-time work, an innovation now proposed for the NHSC.[28] Outcomes for these various program

features are unknown and may vary from state to state. Such local innovations are interesting and promising but unproven.

Several factors prompt states to create their own support-for-service programs when federal programs are available. Program informants often indicated a belief that state-designed initiatives operating under state control better meet the needs of their communities, and that these locally tailored programs are more likely to yield lasting solutions for underserved areas.[10] States also recognized that their programs' smaller size make them more manageable, and their closer relationships with communities give them advantages in innovation and flexibility.[13,29,30] Indeed, the New Federalism doctrines in recent years have encouraged innovation by states as "policy laboratories."[27,29]

State support-for-service programs also grew to fill a workforce void left when NHSC staffing dwindled in the late 1980s and when President Clinton's health care workforce reform proposals were defeated in the early 1990s.[3,10,27,29] These experiences revealed states' vulnerability when relying completely on federal programs and leadership. States created their own programs as a solution that offered greater control and flexibility to meet their needs.[10] A mixture of state and federal financial enticement programs is now the chosen course for half of states.

There have been repeated calls to expand federal support-for-service programs and even proposals to create a universal, mandatory service requirement for all newly trained physicians.[2,22,27,31-35] Plans for such expansions and new initiatives must be mindful of all current types of support-for-service programs—including federal, state, community, and privately sponsored programs—which collectively field an obligated safety-net workforce more than double that generally recognized based on federal program data alone. If an expansion of federal programs is pursued, it should be coordinated with states' efforts. With fully informed considerations, perhaps a further

3827

expansion of state programs will be found preferable. Continued uncoordinated growth in state programs and an unmindful broadening of federal efforts—whose requirements of practitioners always supersede those of states—raise the likelihood of conflicts between state and federal programs.[36] Some state programs already report competition for students and young practitioners willing to work in underserved areas, and some are now unable to fill all of their funded positions. Whether this is due to an exhausted pool of interested practitioners or unattractively designed programs is unclear. What is clear is that mutual recognition, communication, and coordination between federal and state initiatives in underserved areas is needed.[4,37]

Many state program directors voiced a need to communicate with and learn from other programs. Directors working in individual medical schools and those in higher education financial aid state offices most often voiced or demonstrated their need for more communications with others because they had little contact with programs based in state offices of rural health and other public health agencies and had little experience managing students' obligations other than loans. Among the few current models of national collaboration are the promising centralized electronic listings of support-for-service opportunities maintained by the National Rural Recruitment and Retention Network (3R Net[38]) and by the Association of American Medical Colleges.[39]

Changing Spectrum of State Programs

The growth of state programs from 1990 to 1996 occurred primarily in new loan repayment and scholarship programs. The growth in loan repayment programs is not surprising given that the first such programs were created in the mid-1980s and their growth had been documented for the late 1980s.[8,12] Loan repayment is perceived as a responsive mechanism to rapidly target needed specialties and practitioner types to specific underserved communities.[4,24] Loan repayment commitments, typically made as practitioners complete their training, come at a time in practitioners' careers when they can make informed practice commitments. The growing debt of today's young physicians also makes loan repayment assistance increasingly attractive to physicians and, thus, a stronger enticement mechanism for programs and communities.[40]

The explanation for the growth in scholarship programs is less evident. Perhaps as the only model for obligating practitioners at the student level (service in loan programs is optional), scholarships remain a requisite choice for states that believe it is important to offer service-requiring support at several career stages through a constellation of programs.[41] Paradoxically, while some states were creating new scholarship programs, others were replacing these programs with loan repayment incentives in an effort to decrease program costs and lessen the administrative and legal burdens that have been associated with programs that obligate individuals years in advance of required service.[4,24,42]

Direct financial incentives are a less familiar program approach, as these programs are newer and exist in only 8 states, and there is no comparable federal model. Respondents identified 2 advantages for these programs over loan repayment programs: (1) they relieve programs of the need to verify the eligibility of applicants' educational loans; and (2) they broaden the number of individuals eligible to participate. As a program director stated, there is no reason to assume that only those with educational loans are worth recruiting to underserved areas.

Resident support programs also are new and uncommon. They emerged to capitalize on the growing financial pressures on residents—who now carry a median debt amount of more than $75 000[40]—and to help fill in-state residency positions and retain physicians within the states where they train.

How the 5 types of programs differ in their outcomes for communities and for participating physicians and other practitioners remains to be documented.

Limitations

Despite careful efforts, we may have overlooked several eligible state programs. The addition of data from these omitted programs, however, would further substantiate the collective size and, thus, importance of states' efforts. It is also likely that practitioner counts for some programs are inaccurate because programs sometimes found it difficult to reconstruct complete field strength numbers from their records. We anticipate that practitioner count inaccuracies tend to be underestimates because it was easy for programs to overlook individuals as they tallied names for our study. We do not expect any program to have misjudged their practitioner strength so greatly as to significantly affect our findings and conclusions.

Although we demonstrated growth in program numbers from 1990 through 1996, we were unable to assess how much the collective field strength of these programs grew over time because many programs could not provide the requisite data for trend analysis on their workforce size in the early 1990s. We also did not document how state service-requiring programs changed in number, size, or characteristics since 1996. Similar state initiatives for nurses, dentists, and other non–primary care health care professionals also were not assessed.

CONCLUSIONS AND RECOMMENDATIONS

The tremendous growth in state loan repayment, scholarship, and related programs is one of the most important developments in the US health care safety net over the past 15 years. Remarkably, this growth occurred without fanfare or deliberate design at a national level. The expansion and innovation in state programs is good news, for without them the safety net would be thinner and more vulnerable than it now is. However, much remains to be learned about these state programs and their contributions to promoting uniform access to health care.

Without some degree of cross-state linkage, these programs will remain underappreciated and their lessons hid-

den.[27] As proposed recently by the Council on Graduate Medical Education,[21] we recommend establishment of a mechanism to track, evaluate, and offer coordination to the safety-net efforts of states and local communities, including their support-for-service programs. Joint evaluation and planning will help states and others clarify the optimal complimentary roles for federal, state, local, and private efforts. With coordination, programs can avoid duplication and harmful competition, address gaps in existing program coverage, and identify synergistic opportunities.[4]

Many program directors desired more contact with other programs. Beyond assistance and collaboration, however, directors were not looking for the imposition of uniform standards, restrictive requirements, or federal oversight. Whatever coordinating approach is pursued, it should have the consent and contributing leadership of states. An appropriate seat for a coordinating center might be 1 of the existing national resource organizations for states, such as the National Governors' Association or the National Conference of State Legislatures. Alternatively, a new national association of state safety-net programs might be established or responsibility might be placed on a capable state office experienced with support-for-service programs; in either case, support by federal or foundation funding should exist.

Beyond new coordination for states' efforts, we recommend that all future national safety-net descriptions and proposals incorporate state initiatives and, when possible, community efforts. Despite the challenges of acquiring complete information on states' programs, planning based on federal data and remedies alone is inadequate, as it overlooks half of the full picture and can envision only some of the options.

March 18, 2010

Senator Donald Olson
Alaska Capitol, Room 508
Juneau, AK 99801-1182

Subject: Support for CSSB 139, Incentives for Certain Medical Providers

Dear Senator Olson:

The Alaska Commission on Aging (ACoA) is pleased to support CSSB 139, a bill to establish a loan repayment program to build Alaska's health care workforce by increasing the recruitment and retention of targeted health care professionals in urban and rural, underserved communities. This bill is authored by you.

Alaska, as with the rest of the nation, is experiencing a shortage of health care workers as fewer students are entering the health care profession and many of those already working in health care are preparing for retirement. Alaska is one of five states that does not offer a state-sponsored loan repayment program for health care professions. As a result, our hospitals, clinics, and communities lose potential health care workers to other states that incentivize their workforce with loan repayment programs.

Access to quality health care is a priority for all Alaskans and a critical need for people age 65 years and older. Older Alaskans benefit from regular health care services which enhance their overall health and decrease the need for more expensive, intensive treatment and emergency visits.

Alaska continues to lead all states with the fastest growing senior population currently comprising about 12 percent of our state's population and is projected to increase by five to six percent each year until 2020. The graying of Alaska's population is creating substantial shifts for workforce, particularly in the health care and long-term support service sectors, as demand increases and providers are reaching retirement age. If older Alaskans are unable to find a health care provider, they may be forced to leave the state in search of access to health care professionals. As a result, Alaska could suffer from a loss of retirees, who contribute more than $1.7 billion to the state's economy in addition to their significant volunteer service, caregiving activities, and community leadership.

ACoA supports CSSB 139 and believes that the proposed legislation will help to build a qualified health care workforce who will be available to meet the health care needs of older Alaskans. Please feel free to contact Denise Daniello, ACoA's executive director, by phone (465-4879) or email (denise.daniello@alaska.gov) should you have questions or require additional information about our position. Thank you.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Sincerely,

Denise Daniello
ACoA Executive Director

data from www.hrsa.gov March 3, 2009

http://www.hpsafind.hrsa.gov/HPSASearch.aspx

Health Professional Shortage Areas (HPSAs) are designated by HRSA as having shortages of primary medical care, dental or mental health providers and may be geographic (a county or service area), demographic (low income population) or institutional (comprehensive health center, federally qualified health center or other public facility).

Medically Underserved Areas/Populations are areas or populations designated by HRSA as having: too few primary care providers, high infant mortality, high poverty and/or high elderly population.

USDHHS HRSA: More about shortage areas

Alaska Primary Care Office information: http://www.hss.state.ak.us/dph/healthplanning/primarycare/PC_Home.htm

"Yes" in HPSA columns means there is a "geographic" HPSA designatuion approved by HRSA Office of Shortage Designation, for all or part of the census area or borough.

"CHC" indicates there is at least one Community Health Center with automatice HPSA designation. Where geographic HPSAs exist, the geographic area score is generally higher than the CHC score. Most of the areas with geographic designations also have CHCs in one or more sites within the census area or borough.

Alaska Center for Rural Health – Alaska's AHEC
UNIVERSITY of ALASKA ANCHORAGE
August 2007

2007 Alaska Health Workforce Vacancy Study Research Summary

Key Findings: *Alaska is confronted by severe shortages of professional health workers, primarily in high-level primary care occupations that include* ***Family Physician, General Internist, Critical Care Nurse, Nurse Case Manager, Family Nurse Practitioner, Physician Assistant, Pharmacist, Dentist, Physical/Occupational/Speech Therapist,*** *and* ***Behavioral Health*** *occupations. Shortages in* ***RNs*** *and* ***Allied Health*** *are much less acute. Most affected are rural areas and Tribal Health Organizations, though growth-driven high vacancy rates affect the Anchorage-Matsu region as well.*

BACKGROUND

Alaska is confronted by a "perfect storm" of health professional shortages. The state has long suffered from a deficient "supply side" characterized by insufficient numbers of key health workers whose recruitment, retention and training have been impeded by Alaska's remoteness, harsh climate, rural isolation, low population density and scarce training resources. Now exacerbating this already difficult situation is a burgeoning "demand side" for increased health services for a steadily growing and aging population. The health services industry is the fastest growing sector of Alaska's economy, employing over 7% of the state workforce.

METHODOLOGIES

The key questions this study sought to answer were: What health occupations were at this time most critically affected by shortages? Exactly how many budgeted positions existed and how many of these currently remained unfilled? Where were these vacancies regionally and in what types of organizations? What did employers perceive to be the major underlying causes of their vacancies? How many new trainees/graduates could the job market actually absorb annually and how many organizations could absorb them?

Four hundred seventy-six (476) purposively sampled Alaska health service organizations of all types responded to the study survey (Figure 1). Survey data was used to generate estimates of positions and vacancies for the entire state of Alaska.

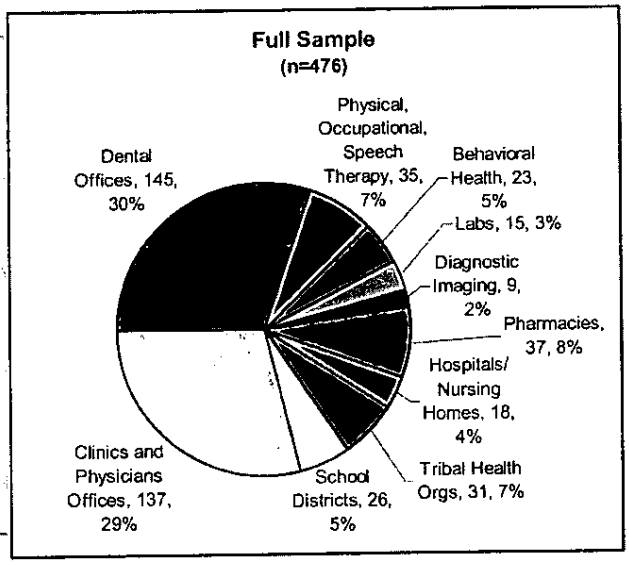

Figure 1

KEY FINDINGS

The findings confirm and quantify the trends cited in recent studies and accumulating anecdotal evidence: despite the recent progress in training and deploying health personnel, such as **Registered Nurses**, critical shortages persist (Tables 1,2).

The situation for key primary care occupations – **Family Physician, General Internist, Nurse Practitioner, and Physician Assistant** – was troubling, particularly in the rural areas, with numerous estimated vacancies and high estimated state vacancy rates between 15% and 20%.

Though vacancies for **Psychiatrists** were not numerous, they were particularly in demand (19.0% estimated vacancy rate) and difficult to recruit (mean vacancy length of 34.5 months).

This study was funded by the Office of Associate VP for Health, University of Alaska Anchorage, through Center for Disease Control and Prevention grant #5-H755-DP024673, and by the Alaska Mental Health Trust Authority.

3833

The national **Pharmacist** shortage has hit Alaska hard and affects every region, with high estimated vacancy numbers (98), and an estimated vacancy rate of 23.7%.

Therapists of all kinds – **Physical, Occupational, Speech, and Speech-Language Pathologists** – were in short supply, with estimated vacancy rates ranging from 15.6% to 29.3%. No part of the state escaped the shortages; vacancy rates were most acute in rural areas, but numerically high in the Anchorage Mat-Su region.

High numbers of vacancies and high vacancy rates were reported for key specialized nursing occupations, particularly for **Nurse Case Manager, Family Nurse Practitioner**, and **Critical Care Nurse**. These appeared to be the current areas of most critical shortage in nursing.

The estimated **Registered Nurse** vacancy rate was moderate (8.0%), but this masked 10% rates in hospitals and tribal health organizations, and an estimated rural rate of 16.1%.

While the estimated vacancy rate for **Dentist** was 10.3%, this masked a 15.3% estimated rural rate and a very high 42.0% rate for tribal health organizations, which had 39% of estimated **Dentist** vacancies.

Table 1. Occupational Groups

Occupational Groups	Study Sample (n=476)			State Estimate		
	Positions	Vacancies	Vacancy Rate	Positions	Vacancies	Vacancy Rate
All Occupations	18158	1866	10.3%	34738	3529	10.2%
Physicians	730	109	14.9%	1931	226	11.7%
Professional Nurses	4202	462	11.0%	7139	696	9.8%
Other Nursing Staff	1769	135	7.6%	1762	111	6.3%
Professions/ Therapists	1240	217	17.5%	2281	404	17.7%
Behavioral Health	2938	327	11.1%	7450	1033	13.9%
Allied Health	3209	291	9.1%	5523	434	7.9%
Public Health/ Nutrition	154	18	11.7%	189	ND	ND
Other Primary Care (PA & CHAP)	759	132	17.4%	1067	198	18.5%
Managers	1337	69	5.2%	2947	160	5.4%
Health Information/ Reimbursement	1816	106	5.8%	4451	253	5.7%

In the **Behavioral Health** occupational group, the most acute shortages – with both extremely high vacancy numbers and high vacancy rates – appeared to be among **Human Services Workers**. In addition, overall estimated **Behavioral Health** occupation vacancies were extremely numerous (1033), around 29% of all estimated vacancies – more than any other occupational group.

Among **Allied Health** occupations, high vacancy rates were affecting employers of **Physical Therapy Assistants** and **Respiratory Therapists**. **Sonographer** vacancies were difficult to fill, and **Surgical Technician** vacancies, though not numerous, were averaging 3 to 4 years in length.

One hundred (100) vacancies and a vacancy rate of 18.1% were reported for **Community Health Aide/Practitioners (CHA/Ps).**

Among "front office" and "back office" occupations, **Coding Specialist** and **Certified Coder** had 11% estimated vacancy rates and very long mean vacancy lengths.

The managerial occupations for which high vacancy rates were reported were healthcare related: **Behavioral Health Supervisor, Clinical Department Manager, Health Information Manager, Medical Director, Nurse Manager, and Practice Manager.** Behavioral health organizations had the most estimated managerial vacancies.

Table 2. Key occupations

Key Occupations (high numbers of vacancies, high vacancy rates)	Study Sample (n=476)			State Estimate		
	Positions	Vacancies	Vacancy Rate	Positions	Vacancies	Vacancy Rate
Family Physician	252	48	18.3%	675	107	15.8%
General Internist	71	15	21.1%	200	40	20.0%
Psychiatrist	36	10	27.8%	93	18	19.0%
Registered Nurse	3109	299	9.6%	5489	439	8.0%
Critical Care Nurse	497	43	8.7%	629	60	9.5%
Nurse Case Manager	136	42	30.9%	209	49	23.4%
Family Nurse Practitioner	155	36	23.2%	364	71	19.5%
Physician Assistant	207	32	15.5%	515	98	19.0%
Pharmacist	302	73	24.2%	413	98	23.7%
Physical Therapist	271	29	10.7%	510	84	16.5%
Dentist	319	47	14.7%	692	71	10.3%
Human Services Worker	1568	170	10.8%	4800	697	14.5%
Behavioral Health Clinician	297	35	11.8%	555	71	12.8%
Case Manager/Care Coordinator	505	52	10.3%	1163	164	14.1%
Physical Therapy Assistant	35	11	31.4%	62	18	28.6%
Medical Assistant	367	38	10.4%	1092	102	9.3%
CHA/P	552	100	18.1%	552	100	18.1%
Certified Coder	85	6	7.1%	209	22	10.6%
Medical Director	49	6	12.2%	120	18	14.8%
Behavioral Health Supervisor	82	13	15.9%	176	22	12.5%

3834

Looking at respondent types, tribal health organizations reported the highest overall vacancy rate (16.5%). These organizations reported 87 **CHA/P** vacancies; approximately half of all estimated vacancies for **Nurse Case Manager, Pharmacist, Chemical Dependency Counselor, Dentist, Medical Lab Tech, Medical Technologist,** and **Health Educator**; and all the estimated vacancies for **Coding Specialist**. But every respondent type was a locus for acute shortages in key occupations, such as clinics/offices of physicians for **PAs**, hospitals/nursing homes for **RNs**, pharmacies for **Pharmacists**, behavioral health organizations for **Human Services Workers**, and school districts for **Speech-Language Pathologists**.

Higher vacancy rates were generally found in the rural respondents, particularly in the North/West and Southwest regions, which reported double digit vacancy rates for nearly all occupational groups, and overall vacancy rates of around 20% (Table 3, Figure 2). Occupations with much higher rural estimated vacancy rates included **RN** (6.9% urban, 16.1% rural), **Behavioral Health Clinician** (9.3% urban, 22.9% rural), **Dentist** (7.2% urban, 15.3% rural), **Physical Therapist** (13.5 urban, 31.6% rural), and **PA** (14.7% urban, 26.8% rural) (Table 4).

DISCUSSION

The "supply side" shortages apparently persist. "Inadequate Pool of Qualified Workers" was the top reason given for vacancies, cited by 54% of respondents, followed by "Transience/Moving Away" (28%), "Insufficient Compensation" (18%), and "Rural Isolation" (16%). Many tribal health organizations also reported "Insufficient/Expensive Housing" as a top reason for unfilled vacancies. The data also indicated a burgeoning "demand side," where shortages were exacerbated by population growth and an increased need and demand for health services, particularly in the high-growth Anchorage Mat-Su region.

Table 3. Regional vacancy rates

Occupational Group	Regions (Study Sample = n=476)						
	North/ West (n=10)	Southwest (n=17)	Interior (n=72)	Anchorage/ Mat-Su (n=232)	Gulf Coast (n=69)	Southeast (n=70)	Statewide/ Multiregional (n=6)
Physicians	26.7%	21.2%	21.6%	12.6%	10.4%	6.8%	30.3%
Professional Nurses	26.0%	21.6%	5.9%	11.1%	8.0%	5.9%	12.1%
Other Nursing Staff	18.6%	18.8%	5.8%	6.2%	4.6%	2.3%	8.8%
Dentists/Pharmacists/Therapists	32.4%	32.4%	20.7%	15.9%	16.5%	16.3%	12.4%
Behavioral Health	19.0%	22.7%	13.1%	8.3%	7.1%	11.1%	11.6%
Allied Health	17.0%	24.6%	7.3%	6.5%	8.4%	7.7%	8.6%

All Occupations	20.1%	20.3%	9.0%	8.6%	8.1%	7.7%	10.2%

Table 4. Urban vs. Rural vacancies and vacancy rates

Occupation	Urban		Rural	
	Estimated Vacancies	Estimated Vacancy Rate	Estimated Vacancies	Estimated Vacancy Rate
Family Physician	68	14.9%	38	17.6%
General Internist	27	18.8%	13	23.1%
RN	339	6.9%	94	16.1%
Family Nurse Practitioner	36	13.3%	34	36.4%
Pharmacist	68	22.7%	30	25.9%
Behavioral Health Clinician	36	9.3%	34	22.9%
Human Services Worker	158	8.5%	209	10.1%
Dentist	32	7.2%	38	15.3%
Dental Hygienist	14	3.6%	17	10.0%
Dental Assistant	27	4.4%	64	14.9%
Physical Therapist	59	13.5%	26	31.6%
PA	50	14.7%	47	26.8%
All Occupations	1998	8.1%	1162	13.3%

Many respondents provided commentary with their surveys and noted positions that are particularly difficult to fill:

- *"We have been hiring travelers for Physical Therapy positions at $67/hr – we can't find therapists to employ. We have been looking for 2 years."* (Urban Medical Clinic).
- *"Without a state Physical Therapy program it is very difficult to get PT staff. Usually this area is staffed by PTs that leave competing PT clinics."* (Urban Physical Therapy Office)
- *We really need a pharmacy school in Alaska. It took two years to fill our last pharmacist position."* (Urban Pharmacy)
- *"Pharmacists are always the most difficult position to fill."* (Rural Pharmacy)

3835

The availability of military spouses has apparently alleviated some of the workforce pressure, but has exacerbated the "transience" problem. Also affecting the shortages was the absence of local training resources (such as medical, dental, pharmacy, and therapy schools) to provide a local workforce pipeline. In the qualitative data, common refrains were, "we need a pharmacy school," "we need a dental school," "we need a physical therapy school."

The acuity of workforce shortages was also reflected by the high percentage of estimated vacancies the responding employers would consider filling with new grads (Table 5). Respondents indicated that they had the capacity to hire sizeable graduating cohorts of Family Physicians, PAs, Occupational and Physical Therapists, Pharmacists, and Dentists. These may be the occupations likely to yield optimal responses to substantial investments in preparation and training programs and/or targeted recruitment and retention campaigns.

How Hard Is It for Alaska's Medicare Patients to Find Family Doctors?

By Rosyland Frazier and Mark Foster

UA Research Summary No. 14 • March 2009
Institute of Social and Economic Research • University of Alaska Anchorage

In the past few years, Alaskans have been hearing reports that some primary-care doctors won't see new Medicare patients. Medicare pays these doctors only about two-thirds of what private insurance pays—and that's after a sizable increase in 2009. But most Americans 65 or older have to use Medicare as their main insurance, even if they also have private insurance. Just how widespread is the problem of Alaska's primary-care doctors turning away Medicare patients? ISER surveyed hundreds of doctors to find out—and learned that so far there's a major problem in Anchorage, a noticeable problem in the Mat-Su Borough and Fairbanks, and almost no problem in other areas.

Medicare is the federal health insurance program for older Americans and for some younger people with disabilities. At issue is what Medicare pays primary-care doctors for their services—not what it pays for other medical costs. Alaska's 50,000 Medicare enrollees are almost all in the "fee for service" plan, which pays doctors standard fees for their services.*

Why is it so worrisome if primary-care doctors won't see Medicare patients? These are the doctors who provide broad care, track patients' overall health, and coordinate care with specialists. That's very important for older people, who often have various medical problems and chronic conditions. And the number of Alaskans over 65 is growing fast—it's expected to double in the next 15 years.

To learn how hard it is for older Alaskans to find primary-care doctors, in 2008 we tried to survey all those who could see the general population of Medicare patients. We were able to interview 229 doctors or their staffs—about 85% of those we tried to reach.

But Medicare payments for Alaska doctors increased in 2009, thanks to efforts of Alaska's U.S. senators. So we recently called back the doctors who had told us they weren't taking new Medicare patients. None of them had opened their doors to significant numbers of new Medicare patients. Four said they now see a very limited number of new Medicare patients, under special circumstances. Two doctors in a joint practice who still didn't see new Medicare patients had hired a nurse practitioner who did.

It's certainly also possible that without the 2009 increase, even more doctors would have decided not to see Medicare patients. Figure 1 shows what our 2008 and 2009 surveys found.

• *It's mainly doctors in Alaska's larger urban areas who are declining to see new Medicare patients.* But that's where the majority of older Alaskans live. Most doctors (even in Anchorage) will still see established patients—that is, patients they've seen in the past.

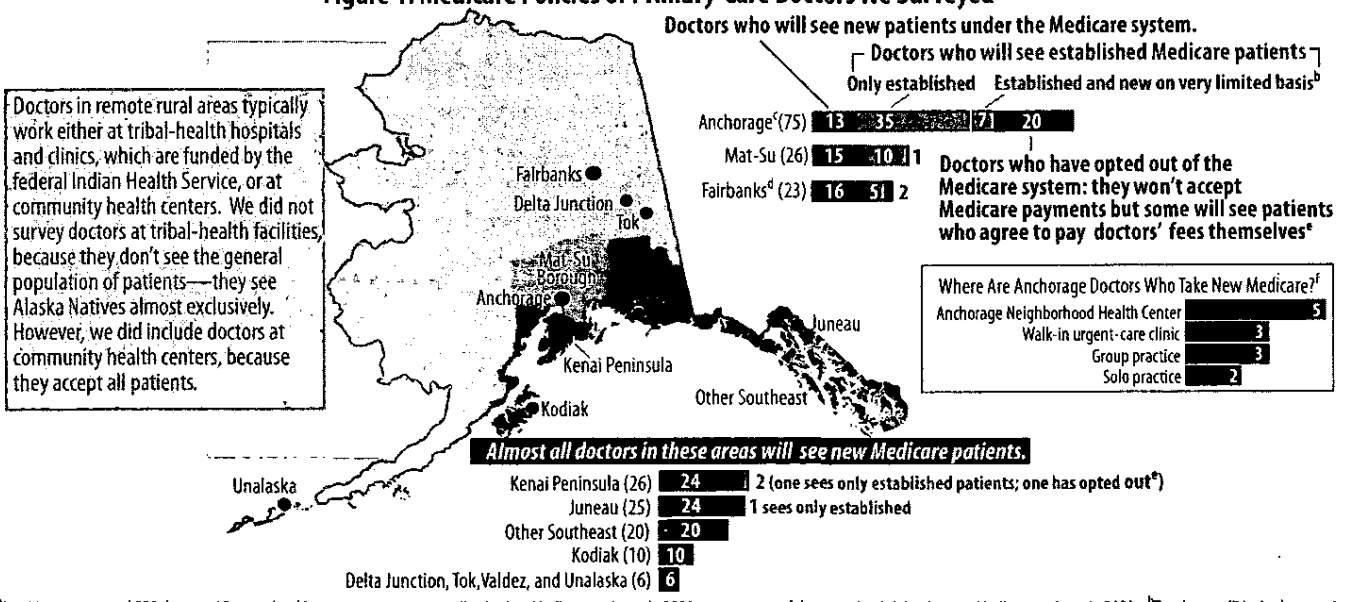
• *Almost all doctors in smaller communities take new Medicare patients.* Rural places have few doctors—so doctors probably feel more of an obligation to see all patients. For patients (Medicare or otherwise) in rural Alaska, the challenge is more likely to be recruiting and keeping doctors.

• *One in ten doctors we surveyed has opted out of the Medicare system.* Most are in Anchorage. They will not accept Medicare payments, but some will see patients who agree to pay the entire doctor's bill themselves.

• *The Anchorage Neighborhood Health Center,* which accepts all patients, saw twice as many Medicare patients in 2007 as in 2001. It has become the only choice for many of Anchorage's Medicare patients.

• *Medicare patients are not relying more on emergency rooms,* if figures for Providence Hospital's emergency room in Anchorage are typical. Numbers of Medicare patients there haven't changed much in the past several years.

Figure 1. Medicare Policies of Primary-Care Doctors We Surveyed[a]



[a]In 2008 we surveyed 229 doctors; 15 weren't taking any new patients at all; 3 had no Medicare patients. In 2009 we re-surveyed doctors who didn't take new Medicare patients in 2008. [b]Ten doctors (7 in Anchorage, 2 in Fairbanks, 1 in Mat-Su) accept a few new Medicare patients under special circumstances, but don't typically see new Medicare patients. [c]Includes Eagle River/Chugiak. [d]Includes North Pole. [e]See Figure 9. [f]See page 3.

*Nationwide, 21% of beneficiaries have enrolled in Medicare Advantage programs—which means they become members of private health plans, and Medicare then pays the plans a set monthly amount for each Medicare enrollee.

Survey of Primary-Care Doctors

We surveyed only primary-care doctors. So far there hasn't been any sign that specialists are declining to see Alaska's Medicare patients—not surprising, since Medicare tends to pay them closer to private-insurance rates.

We first had to determine how many doctors fit our survey criteria: those who currently practice general, family, or internal medicine at least 20 hours a week and who could see the average Medicare patient, if they chose to.

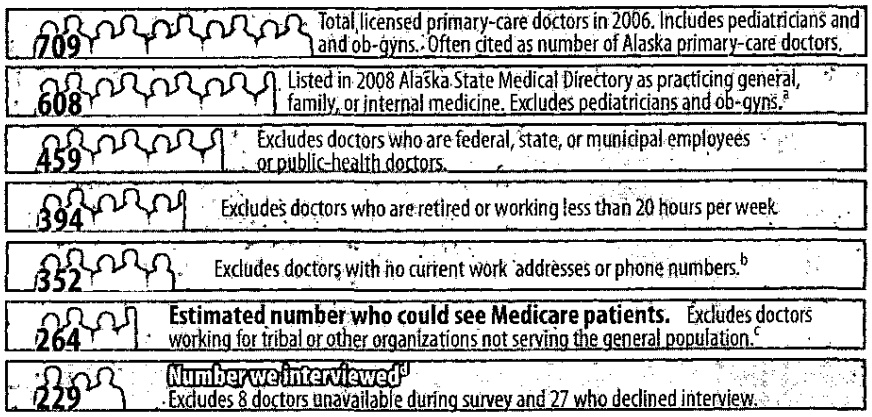
About 700 primary-care doctors are licensed in Alaska, but most aren't available to see the general population of Medicare patients. Hundreds work for government agencies, are in public health, or see only specific groups (Figure 2).

Among those who didn't fit our criteria are doctors working for tribal-health facilities that provide Indian Health Service programs for Alaska Natives. These doctors do see Alaska Native Medicare patients.

We estimated that 264 doctors were left, after we took out those who didn't fit our criteria. In 2008 we tried to reach all 264. We were able to talk with about 85%—229 doctors or their staffs. We asked them to tell us their policies for seeing Medicare patients and to rank reasons why they might be limiting or turning them away. The top reason they cited was "inadequate reimbursement"—that is, Medicare payments aren't enough to cover the costs of seeing patients.

We also followed up, in 2009, with doctors who had told us in 2008 that they weren't taking new Medicare patients. We reached all but two.

Figure 2. How Many Primary-Care Doctors Are Available to See Medicare Patients?
(Among Alaska Doctors Practicing General, Family, or Internal Medicine at Least 20 Hours per Week)



[a]We excluded pediatricians and obstetrician-gynecologists, who are often included in definitions of primary-care doctors, because they don't routinely see older patients. [b]About 42 doctors were not at the addresses and phone numbers in the medical directory. We tried but weren't able to find them, and we assume they have left the state or are not practicing. [c]We excluded doctors working for tribal-health organizations, the military, the Veterans' Administration, and Planned Parenthood, because they don't see the general population of Medicare patients. Doctors who work for tribal-health facilities do see Alaska Native Medicare patients. [d]We interviewed either doctors or members of their staffs.

Medicare Versus Private Insurance

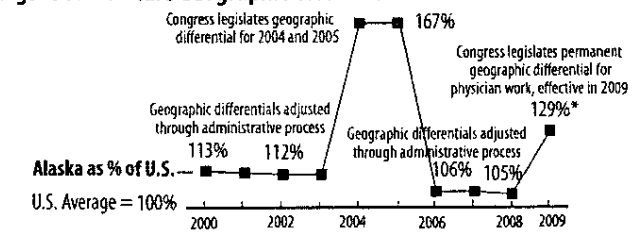
The federal Center for Medicare and Medicaid Services (CMS) calculates Medicare payments for doctors under a complex formula that takes into account geographic differences in costs around the country. Alaska's doctors have historically been paid more than the U.S. average for seeing Medicare patients.

The CMS formula actually includes three geographic differentials: one for "physician work" itself, one for doctors' costs of operating practices, and one for doctors' costs of carrying liability insurance.

In 2008, Congress set the Alaska geographic differential for "physician work" at 50% above the U.S. average, effective in 2009. Alaska's U.S. senators Lisa Murkowski and Ted Stevens were instrumental in gaining that increase for Alaska doctors. But combined with the other differentials—set by CMS—the overall Medicare geographic differential for Alaska doctors in 2009 is 29% above the U.S. average. Figure 3 shows the differential since 2000.

- *From 2000 to 2003, the geographic differential for Alaska doctors was about 12% above the U.S. average.* That differential was set entirely under CMS's administrative process.
- *In 2004 and 2005, the differential for Alaska doctors jumped to 67% above the U.S. average.* Ted Stevens, at that time Alaska's senior U.S. senator, spearheaded the legislation that led to the substantial but temporary increase. In those two years, Medicare paid Alaska doctors as much as private health insurance (Figure 4).
- *After that legislation expired, the Medicare differential dropped sharply,* to about 5% above the U.S. average from 2006 to 2008.
- *In 2009, the cost differential for Alaska doctors climbed to 29% above the U.S. average,* due to new federal legislation—as we just discussed. But Medicare still pays doctors less now than it did in 2005 (Figure 4).
- *Medicare pays about two-thirds of what private insurance pays, in Alaska and on average nationwide.* (But in the adjacent markets of Washington state, Medicare pays 68% to 75% of what private insurance pays.)
- *That nationwide gap helps explain why more Medicare patients are having trouble finding doctors.* Recent national surveys sponsored by the Medicare Payment Advisory Commission found that 17% of Medicare patients in the U.S. had "a big problem" finding family doctors in 2007, up from 13% in 2005. Alaska may be the harbinger of a national trend.

Figure 3. Medicare Geographic Cost Differential* for Alaska Doctors



*This is a weighted average of three geographic cost differentials the Center for Medicare and Medicaid Services uses in a complex formula that determines what doctors are paid. One of those is the differential for "physician work," and Congress set that at 150% of the U.S. average for Alaska doctors, effective in 2009. But the other differentials—for physicians' costs of operating their practices and for carrying liability insurance—are set by CMS and can vary from year to year.

3838

Where Are the Medicare Patients?

• *Nearly 70% of non-Natives over 65 live in Anchorage, the Mat-Su Borough, and the Fairbanks area.* Figure 5 shows only where older non-Natives live, because older Alaska Native patients have access to doctors through tribal-health care facilities. For them, the issue is not that doctors won't see them but that there may not be enough doctors, especially in rural areas.

Who Accepts Medicare Patients?

Besides the doctors who will see new or established patients, some doctors have made another choice: they've opted out of the Medicare system. They don't accept any Medicare payments (see Figure 9), but some will see Medicare patients who agree to pay the doctor's fee themselves. Patients who can do that have more choices. But for those who need Medicare to help pay the bill, the access problem is the worst in Anchorage.

• *We found only 13 primary-care doctors seeing the general population of new Medicare patients in Anchorage.* Of those, 3 were at walk-in, urgent-care clinics, which mostly just treat minor injuries and illnesses (Figure 1).

• *Five of the 13 Anchorage doctors seeing new Medicare patients in 2008 were at the Anchorage Neighborhood Health Center.* That's one of dozens of federally funded community health centers in Alaska. There are hundreds more across the U.S. These centers are open to everyone, but they are mainly for medically "under-served" groups of people—poor and uninsured, for instance—or areas of the country without adequate local medical care, like many of Alaska's rural communities.

• *The Anchorage Neighborhood Health Center is the main choice for growing numbers of Medicare patients.* Both the number of Medicare patients coming to the clinic and the percentage they make up of all patients doubled between 2001 and 2007 (Figure 6). That growth did flatten out in 2004 and 2005, when Medicare paid doctors at a level comparable to private insurance. But after that, the numbers climbed. (In Fairbanks, the community health center saw a similar percentage increase. In the Mat-Su Borough, a health center just opened in 2005, so data are limited.)

• *Until recently there was another choice for Anchorage's Medicare patients—the Alaska Family Medicine Residency Program*, where some family doctors get their final phase of training. These resident doctors see patients, and they had been accepting growing numbers of Medicare patients. But to make sure the residents see a variety of patients, the program has now capped the number of Medicare patients it accepts.

• *Anchorage's Medicare patients don't seem to be turning more to emergency rooms.* Data from Providence Hospital's emergency room show that visits by older patients have stayed mostly steady, with seasonal variations, since 2004 (Figure 7). But some health-care providers think that Medicare patients may be postponing care they need and coming in only when medical problems get much worse.

Medicare Payments to Doctors and to Health Centers

• *Medicare pays doctors and community health centers differently.* Some people believe that Medicare uniformly pays health centers more than it pays private doctors, making it more feasible for health centers to see Medicare patients. But the reality is more complex.

• *Medicare pays health centers the same fee for seeing Medicare patients for any visit, but private doctors more for longer, more complex visits.* Figure 8 compares payments for 30- and 60-minute visits with new patients, at doctors' offices and the Anchorage Neighborhood Health Center (ANHC). For a 30-minute visit, Medicare pays ANHC $119 and doctors about $95. But for a 60-minute visit, it still pays ANHC $119, but the doctors $189.

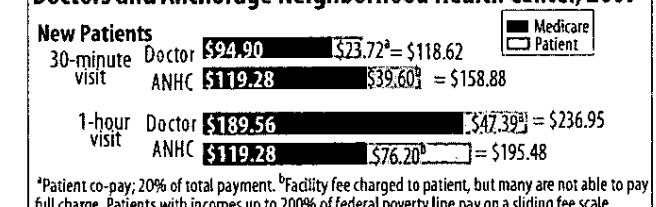
Figure 8. Medicare and Patient Payments to Private Doctors and Anchorage Neighborhood Health Center, 2009



[a]Patient co-pay; 20% of total payment. [b]Facility fee charged to patient, but many are not able to pay full charge. Patients with incomes up to 200% of federal poverty line pay on a sliding fee scale.

Sources: Anchorage Neighborhood Health Center; Ingenix National Fee Analyzer

• *What Medicare patients pay at health centers and at doctors' offices is also determined in different ways.* Essentially, Medicare allows the health centers to take their own fees into account when determining what patients are charged. But Medicare doesn't allow doctors to use their own fees; instead, Medicare sets a maximum allowable charge for specific kinds of visits, and patients pay a portion of that (see Figure 9).

• *Neither ANHC nor the doctors' offices necessarily collect the amounts shown in Figure 8 as payments from patients.* At ANHC, patients with incomes up to 200% of the federal poverty line are charged on a sliding fee scale. Likewise, private doctors may not always be able to collect the patient's share. And both private doctors and ANHC report losing money when they see Medicare patients.

3839

Doctors and the System

Primary-care doctors who see Medicare patients have three choices for getting paid. Figure 9 describes those choices among doctors we surveyed.

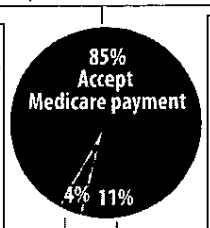
About 85% choose the standard Medicare process ("participating"). Another 4% still work with the Medicare system but charge patients somewhat more ("non-participating"). The final 11% have opted out of the Medicare system, but will still see patients who agree to foot the bill.

Patients also pay different amounts, depending on their doctors' policies. For a service with an allowable Medicare fee of $100, patients seeing doctors who accept that fee would pay $20—but only after Medicare paid the other $80. Patients seeing "non-participating" doctors would pay the doctors $109.25; Medicare would later reimburse the patients $76, so their final cost would be $33.25. Patients seeing doctors who have opted out of the Medicare system would pay a fee determined by the doctor—perhaps a negotiated fee, but still typically more than Medicare pays.

Figure 9. How Do Alaska Primary-Care Doctors Who See Medicare Patients Deal with the System?
(Among 211 Surveyed Who See New or Established Patients)

Most doctors accept standard Medicare fees and bill Medicare. They are called "participating." Medicare sets maximum allowable charges for various services. Participating doctors agree not to charge more than the allowable rate, and Medicare pays them 80% of that. The patients (and their secondary insurance, if they have any) pay the other 20%.

A few doctors (called non-participating) can charge up to 9% more than the allowable Medicare charge. But Medicare pays less and patients pay more. Here's how it works. The patient pays the entire bill, but the doctor submits a statement to Medicare so the patient is paid for the Medicare share. But instead of paying 80% of the charge, Medicare pays only 76%. The patients (and their secondary insurance, if they have any) pay the rest of the bill.



Some doctors don't accept Medicare payments for their fees. They are said to have "opted out." They will still see Medicare patients, but patients must agree to pay a fee the doctor sets. Medicare doesn't pay either doctors or patients, and patients can't bill any secondary health insurance they may have. Remember that patients pay only the fee for the doctor. They still use Medicare to help pay hospital and other medical costs. Doctors who opt out have to re-confirm their decision with Medicare every two years. They can also apply to come back into the system after two years.

Example: How Much Would Patients Pay for a Service with an Allowable Medicare Charge of $100?

	Participating Doctors Charge $100	Non-Participating Doctors Can Charge $109.25	Doctors Who Have Opted Out Can Set Their Own Fees
Medicare pays	$80	$76	$0
Patient pays	$20[a]	$33.25[a]	Entire doctor's fee[b]

[a]Patients can bill secondary insurance to help pay their share. [b]Patients can't bill secondary insurance to pay any amount.

Sources: American Academy of Family Physicians; Government Accountability Office

Conclusion

With few exceptions, Americans 65 or older who are retired have to use Medicare as their primary insurance—even if they also carry private health insurance or have retirement benefits that include health-care coverage. Any other insurance they have can *only* be used to help pay *their share of the allowable Medicare charge*. They can't use private insurance to pay doctors more than Medicare allows.

As more Alaskans turn 65, the access problem will get worse, unless something changes. Growing numbers of Medicare patients around the country are also reporting access problems. And the American College of Physicians has reported that a nationwide shortage of primary-care doctors is looming—which would make the problem even worse.

This summary talks about just a very narrow slice of the multitude of issues facing Medicare. It's one of the largest and fastest-growing federal programs, and President Obama has said reforming it will be part of his plan to improve the U.S. health-care system. How potential reforms might affect Medicare patients' access to family doctors isn't clear today.

Because Medicare is a federal program, the state's options for helping improve access are limited. But Alaskans are talking about various possibilities—like recruiting more doctors and offering them bonuses to see Medicare patients, and either establishing an Anchorage clinic for Medicare patients or expanding the Anchorage Neighborhood Health Center.

In a publication later this year, we'll look at the implications of various ways of trying to improve access for Medicare patients. We'll also report what family doctors themselves told us—how they make decisions about seeing Medicare patients and what might make them willing to see more.

Health Care Professions Loan Repayment Program

Summary

Problem

Alaska is competing with other states and nations for the finite pool of available healthcare professionals. This competition will only intensify since the growth of supply is continuing to fall behind that of demand.

A common state-level response to these pressures is the use of financial inducements, collectively known as support-for-service programs (SFSP's). Good outcomes have been achieved with these. There are five types: scholarships, service-option loans, loan repayment, direct financial incentives, and residency support programs. All SFSP's have the same public goal: To improve healthcare staffing in shortage areas. National studies have determined loan repayment programs to be one of the most effective of the several support-for-service strategies - in terms of both recruitment and retention (see: *HCPLRP: Issue Paper*, 2007)

A key problem is that Alaska does not have a robust support-for-service program while most other states do, many have several, and further, some of those are growing. In sum, Alaska is at a substantive disadvantage as it necessarily competes in the national healthcare labor market.

Discussion

Alaskan health care provider agencies use many approaches to recruit and retain staff. This has proved difficult, however, and particularly so where (1) federal loan repayment programs do not apply, or, (2) there is insufficient resource available to meet need. More tools are needed to confront the problem of steadily growing vacancies in the Alaskan healthcare workforce.

Most all other states have state-sponsored programs that influence health professionals' geographic and specialty distributions. Programs that integrate a number of strategies for attracting and retaining health professionals have had a greater likelihood of success than have programs which rely on a single strategy. Substantial evidence indicates that state-level support-for-service programs typically are a fundamental part of those strategies.

Support-for-Service Programs

It is well-established that many healthcare professionals carry a heavy debt-burden as they come out of training and are attracted to serving in those locations where a share of that burden can be taken away. For instance, in 2004, young physicians' educational debt averages stood at over $109,000 and this cost was increasing at the rate of more than $4,000 per annum.

There are several types of support-for-service programs. One of the two most common types of such programs is the service-requiring scholarship program. These pay tuition and other costs for healthcare students while obligating them to a period of service that begins when they complete residency (or similar post-graduate training) years later. The other common program type is loan repayment. Loan repayment programs recruit healthcare practitioners as they complete their training and are ready to begin service in exchange for paying off the traditional education loans

they acquired years earlier. Programs of both types typically require one year of service for each year of training cost support they provide.

Considerable precedent exists for state-level offices to sponsor and manage financial support and inducement programs to thus encourage the within-state service of healthcare personnel. Overall, 81 state-level programs were identified. There were 44 states with at least one program (88% of states). Fully 21 states had two or more programs (47%), with highs found in New Mexico (at 5) and Minnesota (at 7). On average, the 44 states had nearly two programs (1.8) each.

Loan Repayment Programs

In national studies, loan repayment has been found to be a successful strategy to recruit and retain health care professionals. Twenty-five years of program evaluations have clarified many of the outcomes possible from healthcare training support-for-service programs. Furthermore, studies have demonstrated that loan repayment programs, as a whole, have better outcomes than scholarship programs. Studies have shown that there are several benefits which can accrue from loan repayment programs. Selected examples include: (a) high position-fill rates, (b) high service-completion rates, and (c) high retention rates.

These programs are successful because the benefit of loan repayment is clear to potential applicants, and programs typically only provide payments to participants after they complete each 3 or 6 months of work; therefore, if a participant leaves or otherwise fails to work in the agreed upon area or practice, payments simply stop and there is no need to enforce penalties.

In 2006, the Alaska Physician Supply Task Force recommended a number of specific strategies and action steps to assuring an adequate supply of physicians to meet Alaska's need. One of the PSTF findings was that loan repayment is a proven strategy for recruiting physicians, and the federal loan repayment programs currently available to Alaska physicians need to be stabilized financially and supplemented with Alaska-based programs.

Conclusion

Reported increasing vacancy rates, increasing costs of recruitment [SORRAS report], and comparisons with national norms [PSTF report] suggest that Alaska currently experiences a shortage of healthcare professionals, and, that shortages exist in several key occupational categories. Loan repayment programs have demonstrated substantial and longstanding success as a public strategy which has helped to rectify such shortages.

Recommendation

It is recommended that Alaska create a "Health Care Professions Loan Repayment Program".

To do this, a planning process should be established. This process should define and prepare for adoption at least the following program elements: (a.) organizational support, (b.) oversight, (c.) fiduciary agent, (d.) practitioner eligibility, (e.) site eligibility, (f) repayment details, (g.) program design & management, and (g) program evaluation.

Health Care Professions Loan Repayment Program: Issue Paper (2007). Health Planning & Systems Development, Alaska Department of Health & Social Services.

Health Care Professions Loan Repayment Program
Issue Paper

Abstract

This paper: (1.) illustrates the current and expected healthcare workforce needs of Alaska; (2.) indicates the widespread use elsewhere of support-for-service programs, and in particular loan repayment; and (3.) recommends that Alaskans should now explore creation of a Health Care Professions Loan Repayment Program (HCPLRP).

Main Issue

Alaska is increasingly vulnerable to the competitive challenges posed by other states and nations for the finite pool of available healthcare graduates. This vulnerability will increase during coming years because of two factors. (1.) The need for health care professionals in Alaska is steadily rising, and, shortages are now evident in some categories. (2.) Further, these trends are national. These workers are part of, and often respond to, nationwide labor markets. Further, these trends are expected to accelerate. This is particularly true in those states that do not produce adequate numbers of their own health workers in the given disciplines. This puts such states at a marked disadvantage. Financial incentive programs are particularly important for those states, and Alaska is one of these. As a result, several other states have become robust competitors in recruitment of the healthcare workforce, and some are planning new and expanded loan repayment programs (Pathman, 2007).

A fundamental, and common, state-level response to these pressures is the use of financial inducements, these collectively known as support-for-service programs (SFSP's). Excellent outcomes are readily achievable from these efforts. There are five types: scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs. All support-for-service programs have the same key public goal: To improve healthcare staffing in shortage area communities.

National studies have determined loan repayment programs to be one of the most effective of the several support-for-service strategies - in terms of both recruitment and retention. As compared to the other SFSP options, here loan repayment participants sign support-for-service contracts after they complete their training, when they are older and better informed as to their career options. These professionals make commitments at the time they are ready to begin their service-obligations. They are more likely to know their own needs and those of their families at this later juncture. They know where they will serve and have a sense as to how well their chosen worksites will "fit" their needs.

Problem

This section presents evidence which indicates that:

- A healthcare workforce shortage currently exists in several occupations.
- Under current conditions these shortages will continue into the foreseeable future.
- In several occupations, these shortages will escalate.

Trends in National Workforce

Numerous, prominent sources indicate that there is a growing national shortage in the rural health care workforce. Two examples follow.

GAO Position (2001): In 2001, the General Accounting Office's (GAO's) director of health care-public health issues testified before Congress regarding growing concerns about the adequacy of the health care work force and lessons learned from the experience of the National Health Service Corps (NHSC) in addressing the maldistribution of health care professionals (Heinrich, 2001). Selected key points were:

- Recruitment and retention of adequate numbers of qualified health care workers are major concerns for many health care providers today.
- Available evidence suggests emerging shortages in some fields (e.g. nurses).
- Vacancy rates for HC workers in rural areas and inner cities are especially high.
- Although demand for most health workers will continue to grow, the increasing age of Americans, and their workforce may limit supply.
- The National Health Services Corp (NHSC) illustrates the challenges in addressing shortages of health professionals in certain locations.
- Better placement coordination with waivers for J-1 visa physicians is needed.
- Loan repayment is a better approach than service-requiring scholarships, to which individuals commit when they are still students.

NOSORH Position (2006): A representative and recent understanding can be gained from the National Organization of State Offices of Rural Health (NOSORH). In September 2006 NOSORH issued a Statement of National Priorities. Presented below are selected summaries of that document, without further comment. Interested readers should see: http://www.nosorh.org/pdf/Rural_Impact_Study_States_IT.pdf

- While most rural communities in the U.S. already experience health care workforce shortages, the demand for health care workers nationwide is projected to grow faster than the supply. This shortage of health care workers can impact health care in a variety of ways, including: decreasing quality of care, decreasing access to care, increasing stress in the workplace, increasing medical errors, increasing workforce turnover/decreasing retention rates, and increasing health care costs.

- Most rural areas ... are classified by the federal government as Health Professional Shortage Areas (HPSAs) for primary medical care. A HPSA designation is made using a formula that includes a ratio of physician to population that is greater than 1:3,500. A population is considered "adequately served" when the ratio is 1:2,000. In 1997, more than 2,200 additional physicians would have been needed in non-metropolitan areas to eliminate HPSA designations. SORH directors consider the workforce shortage to be one of the greatest issues facing rural health, in particular shortages related to physicians and nurses.

- Certain national health workforce trends that will have a profound impact on rural populations and exacerbate the current rural health workforce shortages. Examples follow:

    - If health care consumption patterns and physician productivity remain constant over time, the aging population will increase the demand for physicians per thousand population from 2.8 in 2000 to 3.1 in 2020. Demand for fulltime-equivalent RNs per thousand population would increase from 7 to 7.5 during this same period.

    - Minority and female physicians have a greater propensity than do non-minority and male physicians to practice in urban communities. Meanwhile the percentage of physicians that are minorities and women is increasing.

    - The Bureau of Health Professions projects that there will be a 33-44% increase in demand for physicians, 41 percent for RNs, and 46 percent for LPNs from 2000 to 2020.

    - According to the Bureau of Health Professions, there is an acute shortage of pharmacists in the U.S. In February 1998, there were 2,670 unfilled full and part-time positions in the U.S. as compared to 6,920 in February 2000. Adding to this, enrollment rates in U.S. schools of pharmacy declined during this period.

    - In 1970, women accounted for 13 percent of the nation's pharmacists as compared to 2000 when they were 46 percent of the nation's pharmacists. Women tend to elect part-time work as pharmacists.

    - From 1990 to 1999, there was a 46 percent increase in the number of prescriptions dispensed from hospitals.

- *NOSORH concluded the following in its 2006 statement of national priorities:* ...SORH directors around the U.S. determined that they are most concerned with issues related to rural health workforce, health care services, and the needs of special populations. Research suggests that this concern is warranted as: demand for health care workers is increasing while the supply is decreasing; rural health care facilities continue to be fragile, there are gaps in these services, and all of these rural health services are critical to the health and well-being of the U.S.; and the needs of rural populations are changing, however, the programs serving them are unable to meet their needs. While SORHs respond to a variety of rural health needs and issues, new health care policies and additional rural health programs and funding will be needed if states are to address these increasingly important rural health issues and concerns.

Growth in Alaskan Jobs

Healthcare Workforce Overall: In 2004 there were 301,300 jobs in Alaska, with 32,700 (10.9 percent) of these in health care and social assistance (HCSA). By 2014, the overall job count is projected to be 349,550, with the HCSA workforce at 43,650 (12.5 percent). Thus by 2014, the number of HCSA jobs is projected to grow by 10,950 (34 percent), accounting for 22.7 percent of overall statewide job growth for the period. By 2014, health care and social assistance is projected to be the largest single industry workforce category in Alaska with 43,650 workers. (AHCDB, 2007, Table 3.300).

Social Service Occupations: For 2004, employment in community & social service (CSS) occupations was estimated to be 6,025 jobs. By 2014, this category of jobs is forecasted to be at 7,487, a rise of 1,462 (24 percent). The highest projected growth rates from 2000-2014 are projected to include mental health & substance abuse social workers (36.2 percent), social & human service assistants (34.6 percent) and mental health counselors (32 percent). (AHCDB, 2007, Table 3.310).

Selected Occupations: Review of 42 particular healthcare occupations indicates that these held 14,083 jobs in 2000, and that these are forecasted to reach 25,009 by 2010, an overall rise of 10,026 jobs (78 percent). Registered nursing positions are expected to grow the most, from 4,439 in 2000 to 8,556 in 2010, a gain of 4,117 jobs or (93 percent). All but one of the examined occupations is expected to have more jobs available by 2010. Further, of the 42 occupations presented, employment in 8 of these will more than double (e.g. AHCDB, 2007, Table 3.330).

Shortage in Alaskan Workforce

Health Professional Shortage Areas: Alaska has a large number of federally designated "Health Professional Shortage Areas" (HPSAs), the point of these designations being to aid in health care planning and finance. Typically these are determined by the existence of: (1.) a relative lack of desired personnel, and (2.) the existence of particular socio-economic conditions. A second route to HPSA designation, which is automatic, is via the existence of a federally funded community health center (CHC). HPSAs are of three types. Statewide in 2007 the following HPSAs existed: 28 in Primary Care (with 16 scored, and 12 via CHCs), 27 in Mental Health (with 14 scored, and 13 via CHCs), and 24 in Dental Health (with 7 scored, & 17 via CHCs). (Alaska Health Care Databook, 2007, Table 3.360). However, an important caveat is that many observers feel that the federal HPSA designation process underestimates the extant need for more healthcare professionals (e.g. US GAO, 1995). Thus, these designations should be considered as a conservative method for establishing need for the healthcare workforce.

Medically Underserved Areas: Alaska also has numerous federally designated "Medically Underserved Areas" (MUA) and "Medically Underserved Populations" (MUP). These designations identify shortages of primary medical care, dental health or mental health providers. Designations may be either geographic (MUA, i.e. a county or service area), or demographic (MUP, i.e. low income, Medicaid-eligible populations, cultural and/or linguistic access barriers to primary medical care services). Each designation is assigned an Index of Medical Underservice (IMU) score, which is used to determine the eligibility of an area or population for MUA/MUP status. For 2007, there were 17 area designations and 11 population designations. (Alaska Health Care Databook, 2007, Table 3.350).

Resident Workers with Age: Two aspects of worker demographics further suggest the likelihood of a workforce shortage in the health care and social assistance (HCSA). The first of these regards "resident workers with age". In 2005 total employment in all HCSA occupations stood at 28,356. Of resident workers in all HCSA occupations statewide, 40 percent were age 45 and older; 27 percent were age 50 and older. Of resident workers who were in health care practitioner occupations per se, 47 percent were age 45 and older; and 31 percent were age 50 and older. Therefore, succession planning will be of concern over the next two decades as today's mature health care professionals retire (Alaska Health Care Databook, 2007, Table 3.320).

Non-Resident Workers: A second workforce demographic issue regards the sizeable number of "non-resident" workers. Overall, 10 percent of the workforce was non-residents in 2005, with a

high of (13 percent) among non-resident health care practitioner and technologist occupations. Expect additional pressure to build on the health care system if non-resident (itinerate) workers are not available to fill Alaska health care workforce gaps (e.g. AHCDB, 2007, Table 3.320).

Selected Occupations: Physicians

Physician Shortage – 1997: A decade ago Johnson and Norris (1997) conducted a comprehensive study to describe Alaska's geographic distribution of generalist physicians relative to population. These investigators queried all 443 generalist care physicians (family, general, general internal medicine, and pediatric) or their offices as to their specialties, employers, populations served, hours spent per week offering direct patient care, and locations. The results indicated a 30% overall shortage of generalist physicians for the state, representing roughly 141 full-time-equivalent generalists relative to national practice patterns and trends of health maintenance organizations. Of 17 primary health care areas, including the Anchorage area, 15 showed a need for additional generalist physicians. Most areas had a 20 to 40% shortage.

Physician Shortage – 2004: In 2004, a survey by the American Medical Association showed that, nationally, there were 2.38 practicing physicians per 1,000 people. Alaska's rate of practicing physicians was 2.05 per 1,000 people. Based on Alaska's 2004 population estimate of 656,834 and the national average of 2.38 physicians per 1,000 people, Alaska should have had 1,565 practicing physicians to be on par with national averages. The actual number of physicians practicing in Alaska was 1,347, indicating a shortage of 14 percent or 218 physicians. In areas outside of Anchorage, the rate of physician deficiency was 16 percent. (Alaska Health Care Databook, 2007, Table 3.370).

Physician Shortage – 2006: In 2006, the AK DHSS and the University of Alaska jointly assembled the "Alaska Physician Supply Task Force" (PSTF). This group then conducted a large inter-agency study, issuing the authoritative report, "*Securing an Adequate Number of Physicians for Alaska's Needs*". It found that Alaska had a shortage of physicians. Although not at crisis levels, the shortage was affecting access to care throughout the state, and, increasing cost to hospitals and other health care organizations. Up to 16% of rural physician positions in Alaska were vacant in 2004. Patients with Medicare were having difficulty finding a primary care physician. Several important specialties were in serious shortage in Alaska. It concluded that:

- The shortage is very likely to worsen over the next 20 years as the state's population increases and ages. Physician supply nationwide is entering a period of shortage, according to the best current predictions. Physicians in Alaska are aging and one-third may be retiring in the next 10-15 years. The new generation of physicians wants a more balanced life, meaning fewer hours on duty and more predictable schedules. These trends mean that more physicians will be required to serve the same population. Technology and scientific advances have increased the amount of medical care available, also adding to the need for physicians, as the patients expect more care than previously.

- As the supply of physicians shrinks, recruitment will become more competitive. Alaska's traditional system of recruiting physicians from federal assignment in the military and Indian Health Service is much less effective with changes in these systems. Alaska is far behind the other states in production capacity. (1-2) Long-range planning, even if it includes a four-year medical school in Alaska, will not address current physician needs in a timely fashion, so interim measures are needed. (59)

Selected Occupations: Nurses

Nursing Shortage – 2003: The nursing shortage is particularly acute, both in Alaska and nationwide. It is estimated that during this decade the need for RN's will increase by 4,117 (in 2000: 4,439; in 2010: 8,556) (Fried, N. & Keith, B. (2003). National shortages will make recruitment yet more difficult. As a result, Alaska will have a great need to recruit and retain registered nurses. Addressing the need of rural and remote areas will be yet more difficult and expensive than to do so for urban areas.

Impact on CHC's

Rosenblatt, et al. (2006) examined the status of provider workforce shortages such as these may limit CHC expansion. They noted that the federal government has continued to expand the capacity of community health centers (CHCs) to provide care to underserved populations. The researchers therefore conducted a survey of all 846 federally funded US CHCs that directly provide clinical services and are within the 50 states and the District of Columbia (May-Sept, 2004). Questionnaires were completed by the chief executive officer of each grantee. Overall response rate was 79.3%. Information was supplemented by data from the 2003 Bureau of Primary Health Care Uniform Data System and weighted to be nationally representative.

Rosenblatt, et al (2006) found that primary care physicians made up 89.4% of physicians working in the CHCs, the majority of whom are family physicians. In rural CHCs, 46% of the direct clinical providers of care were non-physician clinicians compared with 38.9% in urban CHCs. There were 428 vacant funded full-time equivalents (FTEs) for family physicians and 376 vacant FTEs for registered nurses. There were vacancies for 13.3% of family physician positions, 20.8% of obstetrician/gynecologist positions, and 22.6% of psychiatrist positions. Rural CHCs had a higher proportion of vacancies and longer-term vacancies and reported greater difficulty filling positions compared with urban CHCs. Physician recruitment in CHCs was heavily dependent on National Health Service Corps scholarships, loan repayment programs, and international medical graduates with J-1 visa waivers. The study concluded that CHCs face substantial challenges in recruitment of clinical staff, particularly in rural areas. The largest numbers of unfilled positions were for family physicians at a time of declining interest in family medicine among graduating US medical students. They stated that success of the current US national policy to expand CHCs may be challenged by these workforce issues.

Strategy

It is essential to enhance the capacity of Alaskan health care provider agencies to recruit and retain staff where: (1.) federal loan repayment programs either do not apply, or, (2.) there are insufficient resources available to meet need. More tools are needed to confront the problem of steadily growing vacancies in the Alaskan healthcare workforce.

Most other states have programs that influence health professionals' geographic and specialty distributions. Programs that integrate a number of strategies for attracting and retaining health professionals have a greater likelihood of success than do programs which rely on a single strategy. Substantial evidence indicates that state-level support-for-service programs should be, and typically are, a fundamental part of those strategies.

Debt from Health Care Training

What follows are brief summaries of recent, representative studies which suggest that:

- Health care student debt affects subsequent practitioner career choices;
- Loan repayment options support recruitment goals; and
- These programs directly help to correct practitioner maldistributions.

Factors in Recruitment & Retention: Daniels, et al. (2007) sought to identify factors associated with rural recruitment and retention of graduates from a variety of health professional programs in the southwestern United States. They conducted a longitudinal study by mailing a survey to graduates from 12 health professional programs in New Mexico. The main outcomes examined were: (1.) first rural employment, and, (2.) aspects of any rural employment, since graduation. Daniels, et al. (2007) concluded that rural background and preference for smaller sized communities are associated with both recruitment and retention. In addition, however, they stated that loan forgiveness and rural training programs appear to support recruitment. Retention efforts must focus on financial incentives, professional opportunity, and desirability of rural locations

Medical Student Debt & Career Choice: Rosenblatt & Andrilla (2005) examined the notion that medical students' rising total educational debt is one of the factors that explains the recent decline in students' interest in family medicine and primary care. They analyzed the results from questions on the Association of American Medical Colleges' 2002 Medical School Graduation Questionnaire that focused on students' debt and career choices. Students reported that higher levels of debt influenced their future career choices. An inverse relationship was observed between the level of total educational debt and the intention to enter primary care, with the most marked effect noted for students owing more than $150,000 at graduation.

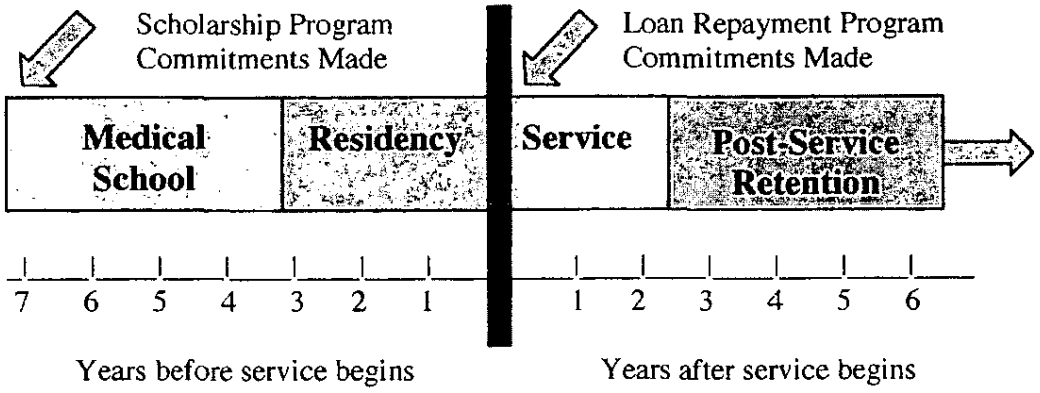
Medical Training Debt & Service Commitments: Pathman, et al (2000) assessed how student loan debt and scholarships, loan repayment and related programs with service requirements influence the incomes young physicians seek and attain, influence whether they choose to work in rural practice settings and affect the number of Medicaid-covered and uninsured patients they see. Data are from a 1999 mail survey of a national probability sample of 468 practicing family physicians, general internists and pediatricians who graduated from U.S. medical schools in 1988 and 1992. A majority of these generalist physicians recalled "moderate" or "great" concern for their financial situations before, during and after their training. Eighty percent financed all or part of their training with loans, and one-quarter received support from federal, state or community-sponsored scholarship, loan repayment and similar programs with service obligations. In their first job after residency, family physicians and pediatricians with greater debt reported caring for more patients insured under Medicaid and uninsured than did those with less debt. For no "specialty" was debt associated with physicians' income or likelihood of working in a rural area. Physicians serving commitments in exchange for training cost support, compared to those without obligations, were more likely to work in rural areas (33 vs. 7 percent, respectively, $p < 0.001$) and to provide care to more Medicaid-covered and uninsured patients (53 vs. 29 percent, $p < 0.001$), but did not differ in their incomes ($99,600 vs. $93,800, $p = 0.11$). Thus, among physicians who train as generalists, the high costs of medical education appear to promote, not harm, national physician work force goals by prompting participation in service-requiring financial support programs and perhaps through increasing student borrowing.

Support-for-Service Programs

It is well-established that a sizeable number of healthcare professionals carry a heavy debt-burden as they come out of training and are attracted to serving in those locations where a share of that burden can be taken away. For instance, training to become a physician is expensive, as 80 percent of medical students who graduate in debt will attest (e.g. Jolly, 2005). In 2004, young physicians' educational debt averages stood at over $109,000 and was this cost was increasing at the rate of more than $4,000 per annum (e.g. AAMC, 2004). Nonetheless, educational costs and students' fears of acquiring six-figure debts have created a market for government programs that link support for healthcare training costs to a period of obligated clinical work in shortage areas.

There are several types of financial "support-for-service programs" (SFSP's). These include: scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs. One of the two most common types of such programs is the service-requiring scholarship program. These pay tuition and other costs for healthcare students while obligating them to a period of service that begins when they complete residency (or similar post-graduate training) years later. The other common program type is loan repayment. Loan repayment programs recruit healthcare practitioners as they complete their training and are ready to begin service in exchange for paying off the traditional education loans they acquired years earlier. Programs of both types typically require one year of service for each year of training cost support they provide.

Figure 1 - Timeline of physicians' training years, signing of commitments with service-requiring scholarship and loan repayment programs, service periods (typically two-to-four years) and post service retention.



(After: Pathman, D.E. (2006). What Outcomes Should We Expect From Programs That Pay Physicians' Training Expenses in Exchange For Service? NCMEDJ, 67(1), pg. 77)

Support-for-service programs appear to be a natural solution to both the students' and the public's needs. They have grown in popularity over the past 25 years in tandem with rising tuition costs, with both federal and state agencies using them. In one well-known federal example, in 2005 the Bureau of Health Professions reported that the National Health Service Corps (NHSC) was providing an obligated physician workforce of about 1,700 scholars and loan re-payers. As a result of NHSC shifting most of its funding to loan repayment, more workers were immediately brought into the fold, and that census has now roughly doubled. In addition, most states also

sponsor their own support-for-service programs. In 1996 there were a total of 69 state programs with an estimated workforce of 1,300 practicing physicians. These state programs doubled in number from 1990 to 1996 and very likely have grown further since (Pathman, et al. 2000).

State Scholarship, Loan Forgiveness, and Related Programs: Pathman, Taylor, et al (2000) noted that in the mid-1980s, states expanded their initiatives of scholarships, loan repayment programs, and similar incentives to recruit primary care practitioners into underserved areas. These programs have since grown substantially during the ensuing two decades. The authors thus sought to identify and describe state programs that provide financial support to physicians and midlevel practitioners in exchange for a period of service in underserved areas, and to begin to assess the magnitude of the contributions of these programs to the US health care safety net. This cross-sectional, descriptive study established the number and types of state support-for-service programs in 1996; trends in program types and numbers since 1990; distribution of programs across states; numbers of participating physicians and other practitioners in 1996; numbers in state programs relative to federal programs; and basic features of the state programs.

The study found that in 1996 there were 82 eligible programs operating in 41 states, including 29 loan repayment programs, 29 scholarship programs, 11 loan programs, 8 direct financial incentive programs, and 5 resident support programs. Programs more than doubled in number between 1990 (n = 39) and 1996 (n = 82). In 1996, an estimated 1306 physicians and 370 midlevel practitioners were serving obligations to these state programs, a number comparable with those in federal programs. Common features of state programs were a mission to influence the distribution of the health care workforce within their states' borders, an emphasis on primary care, and reliance on annual state appropriations and other public funding mechanisms.

The authors concluded that as of 1996 the several states had fielded an obligated primary care workforce comparable in size to the better-known federal programs. Thus, these state programs constitute a major portion of the US health care safety net. The study emphasized that such state programs should be considered in plans to further improve health care access.

Experience of Other States

State-Level Support-for-Service Programs (2007): Considerable precedent exists for state-level offices to sponsor and manage financial support and inducement programs to thus encourage the within-state service of healthcare personnel. Tables 1, 2 & 3 here-present listings of those state-level support-for-service programs that were web-posted by the Association of American Medical Colleges (as of 8/10/07). These provide a selective look at state and federal loan repayment, forgiveness and scholarship programs available to allopathic medicine and other health professions students. This compilation is not exhaustive, and at present, our office is not aware of one that is. The here-derived tables shows that, overall, there were 81 programs. There were 44 listed states with at least one program (88% of US states). Fully, 21 of these states had two or more programs (47% of listing), with highs found in New Mexico (at 5) and Minnesota (at 7). On average, the 44 listed states had nearly 2 programs (1.8) each. Table 1 presents 43 listings that were designated as "state programs". Table 2 presents another 20 listings that were designated as "federal/state programs". Finally, Table 3 presents another 18 programs were not otherwise classified, though quick inspection of titles suggests that many can be readily classified. Those programs that were categorized as (strictly) "federal" (e.g. NIH, military) are not further considered. Click on any program title for more programmatic detail.

State-Level Offices: Service-for-Support Programs

Loan Repayment Programs

In national studies, loan repayment has been found to be a successful strategy to recruit and retain physicians and nurses. Twenty-five years of program evaluations have clarified many of the outcomes possible from healthcare training support-for-service programs. Furthermore, studies have demonstrated that loan repayment programs, as a whole, have better outcomes than scholarship programs. Results of these comparisons have proved compelling. For example, studies demonstrating the strengths of loan repayment programs prompted Congress recently to allow the NHSC to make more loan repayment and fewer scholarship awards (e.g. Bureau of Health Professions, 2005) and led some states to expand their loan repayment programs (Pathman, et al. 2000).

Studies have shown that there are several benefits which can accrue from loan repayment programs. Selected examples follow:

> *High Position Fill-Rates:* Some programs, including the NHSC, have many more applicants than their funds can support and regularly fill all funded positions; other programs have many unfilled positions for lack of applicants.
>
> *High Service Completion Rates*: Very few loan repayment programs, accordingly, have found a need to set any buy-out penalties; as a group, their service completion rates average 93% without them (Pathman, et al, 2004). It is the physician-program-community fit and the financial attractiveness of the program that prompts physicians to complete their obligations with service (the "carrot"), not financial and legal threats (the "stick").
>
> *High Retention Rates:* Beyond merely completing obligations with service, there has long been the hope that obligated physicians will remain in their service communities for years afterwards ... In fact, data show that physicians participating in state-run support-for-service programs remain in their service sites as long on average as other young physicians remain in practices of all types nationwide. Physicians obligated to state-run loan repayment programs remain substantially *longer* than other young physicians (e.g. Pathman, 2004).

Effectiveness of Support-for-Service: Sempowski, I.P. (2004) attempted to evaluate the effectiveness of programs that provide financial incentives to physicians in exchange for a rural or underserviced area return-of-service (ROS) commitment. This was done via a systematic literature review using Medline and Ovid HealthSTAR databases were searched from 1966 to 2002. The initial search yielded 516 results. Bibliography review yielded additional references. Ten publications were selected as the highest level of evidence available. The main outcome measures were: (a.) initial recruitment of physicians, (b.) buyout rates, and (c.) long-term retention.

The majority of studies reported effective recruitment despite high buyout rates in some US-based programs. The one prospective cohort study on retention showed that physicians who chose voluntarily to go to a rural area were far more likely to stay long term than those who located there as an ROS commitment. Multidimensional programs appeared to be more successful than those relying on financial incentives alone. Sempowski, I.P. (2004) concluded that ROS programs to rural and underserviced areas have achieved their primary goal of short-term recruitment but have had less success with long-term retention. However, this study combined different types of support-for-service programs within its analysis thus somewhat preventing conclusions as to loan repayment programs, per se.

Loan Repayment vs. Payback Programs: Miller & Crittenden (2001) sought to determine and contrast the possible impact that two different types of support-for-service programs might have on medical school choice, and, students' intentions to return to their home states. The authors examined difference in preferences for: (a.) payback programs regarding state-subsidized medical education which are designed to increase the rate of graduates returning to those states to practice; and (b.) loan repayment programs that are designed to entice medical school graduates from rural states to return to their home states.

Miller & Crittenden (2001) surveyed 229 medical students (response rate 80 percent). The questionnaire collected background information on the students and addressed the possible

impact of payback and loan repayment policy proposals on student plans. Forty-seven percent of students reported that they would attend a different medical school if a required payback program were in place. Students who were more competitive at the time of admission to medical school were significantly more likely to say they would attend another medical school than were less competitive students. In contrast, 48 percent of students reported that they would be more likely to return to their home states if expanded loan repayment programs were available for service in areas of need. The findings suggest that payback programs may dissuade more competitive students from entering medical schools with such requirements, compromising the pool of students most likely to return to rural areas. Conversely, medical students appear willing to consider loan repayment programs upon completion of their training.

Why Do Loan Repayment Programs Work? Expert opinion was sought for insights into why loan repayment programs work. Donald Pathman, MD, MPH, (Univ. of North Carolina) was queried as to his view. Dr. Pathman stated:

> "As a whole, state-run (loan repayment) programs are successful but not because they are run well---- most are under-funded, under-staffed and can't offer individualized assistance to the health care practitioners they support. They are successful because the benefit of loan repayment is clear to potential applicants and programs typically only provide payments to participants after they complete each 3 or 6 months of work; therefore, if a participant leaves or otherwise fails to work in the agreed upon area or practice, payments simply stop and there is no need to enforce penalties." (Pathman, 2007)

Does a Loan Repayment Program Make Sense for Alaska? Expert opinion was sought for perceptions as to whether a loan repayment program makes sense for Alaska. Again, Donald Pathman, MD, MPH, (Univ. of North Carolina) was queried as to his view. Dr. Pathman stated:

> "I am glad to hear that Alaska is thinking of expanding loan repayment opportunities. I visited Alaska for the first time this past spring for the National Rural Health Association meeting, in Anchorage, with a side trip to Minto and Fairbanks. What an amazing place! I spoke with several folks working with the Native American health corporation in the state, and realize the physician shortages for the populations they serve. I was impressed that they knew little about how to attract and keep a physician. Lots of opportunities there for improvement in programs." (Pathman, personal communication, 2007)

Position of the Alaska Physician Supply Task Force (2006): The PSRF recommended a number of specific strategies and action steps to achieve four main goals related to assuring an adequate supply of physicians to meet Alaska's need. One of the PSRF findings was that Alaska's clinics and hospitals receive inquiries from physicians about the availability of loan forgiveness often. Loan repayment is a proven strategy for recruiting physicians, and the federal loan repayment programs currently available to Alaska physicians need to be stabilized financially and supplemented with Alaska-based programs. For detail, see: "*Securing an Adequate Number of Physicians for Alaska's Need*" (2006).

Precedents in Alaska: There are, and have been, other circumspect loan repayment programs for health professionals here in Alaska. These have typically been via categorical federal funding. Examples include Indian Health Service supports, and use of the National Health Service Corp. There have also been selected opportunities via the regional health corporations, and certain hospitals. Further, the Alaska Mental Health Trust has recently considered some loan repayment supports in the behavioral health field. While promising, these will collectively still fall far short of garnering the needed workforce to face projected need.

Recommendation

Recommended: Alaska should establish a Health Care Professionals Loan Repayment Program (HCPLRP). Decisions as to particular program elements must await further public process. Questions should be addressed regarding at least the following program elements:

- *Organizational Support*: What are the best ways to build legislative and public understanding and support on this issue? For instance, members of the Alaska Physician Supply Task Force supported a loan payback provision for physicians.

- Oversight: What is that governance entity most suited to provide leadership and oversight of this program? Similarly, which entity is most suited to administer the program? There is evidence that no single entity has the expertise to properly oversee and administer such a program. This might argue for a blended or interagency oversight structure. One agency might provide programmatic administration, while the other might serve as fiduciary agent.

- *Fiduciary Agent*: It may prove both workable and preferred that fiduciary mechanics and other administrative aspects be organizationally separated. If so, which agency is most to assume this fiduciary role? One approach might be to have the program work in tandem with the Alaska Commission on Postsecondary Education (ACPE). It is possible that the functions of the Alaska Commission on Postsecondary Education could be amended as these relate to repayment provisions healthcare degree program participants. It appears likely that no substantive change would be necessary for ACPE to act strictly as fiscal agent for participant payments. Further, this would not be a recommendation to change the scope of the ACPE mission to include direct workforce development. This later function would likely be accomplished by another state agency via interagency partnership.

- *Provider Eligibility*: Which healthcare occupations are to be deemed as eligible for the HCPLRP? Are all eligible occupations to benefit equally from the HCPLRP, or, will the occupations differ in terms of: (a.) maximum financial benefit, (b.) length of service required, (c.) specificity of service location, and, (d.) penalty for early-quit? There is evidence that for a loan repayment program, marked penalties are not needed, and, are actually likely harm outcomes.

- *Repayment Details*: Several policy and procedural decisions must be concluded. Examples follow. What is an adequate period of service-payback? What is the proportionality of payback when scheduled over years? What are the most useful policies with which to govern service payoff?

- *Work Processes*: Several work-process details will need to be established as regards management client relationships. Programmatically, what ways do we want to work, one-on-one, with program applicants to help them find suitable communities/positions? What types of assistance do we most want to provide to applicants, practices and communities?

- *Program Evaluation*: An ongoing evaluation should be installed and maintained as an expected part of any proposed support-for-service program (e.g. Henderson & Fox-Grage, 1997). It is in everyone's interest, and particularly in those of Alaska's medically underserved communities, that such programs: (a.) have explicit outcome objectives, (b.)

are regularly monitor as to those outcomes, (c.) openly acknowledge weaknesses, and (d.) embrace change as needed. Many different types of outcomes might be monitored. Reasonable measures might include:

- Practice in specific needy communities (e.g. HPSAs)
- Serve high-priority patient groups (e.g. Medicaid)
- Service completion of participants
- Retention rate of participants
- Satisfaction of participants
- Indictors as to the content of practice/work of program participants (e.g., proportion that provide inpatient care, that provide obstetrical care, or whatever specific services are deemed to have critical workforce shortages)

Other Support-For-Service Options to Consider:

As robust as a state-level loan repayment is likely to prove, there are other programmatic strategies. At least two other strategies should also be thoroughly examined: (a.) service-option loans, and (b.) direct incentives.

- *Strategy: Service-Option Loan Programs*

  Consider provision of educational loans to all citizens of Alaska who undertake health professions training, where the loans will be forgiven if they work within Alaska after graduation. This would provide added incentive for health care students who were raised in Alaska to return to Alaska to practice, rather than being wooed away by the states/communities where they receive their training. There is evidence that these have worked well elsewhere, given attention to key programmatic details. For Alaska, a service-option loan program should nicely complement a loan repayment program; because the former would address only Alaska residents and the latter would primarily attract those health practitioners coming from out-of-state.

- *Strategy: Direct Incentive Programs*

  Consider provision of direct incentive programs. In these, funding is provided to practitioners who agree to work in needy settings whether or not they have educational loans to be repaid. There is no reason to believe that only young practitioners-with-debt are suited to work in rural areas and/or with underserved populations.

  Loan repayment programs only target recent graduates who have weighty educational debts. For instance, as regards physicians, many recent graduates carry minimal debt (perhaps 40%). Further, a large portion of those physicians who are potentially recruit-able to Alaska are 10 or 20 years out of training and have no educational debts. It is possible, even likely, that "an Alaskan adventure" would appeal to some number of mid and late-career physicians. It may prove informative to assess the State's medical licensure files to learn the average/median/quartiles of age of physicians as to when they gain their first Alaska license. If, indeed, many are older, then this is a group that should be targeted. Direct incentive programs target those practitioners without loans, and, older practitioners.

Finally, support-for-service programs (of all types) constitute only one way to help bolster recruitment and retention of health care professionals. Alaska must develop a multi-pronged approach to confronting our growing healthcare workforce shortage.

Conclusion

Substantial evidence shows that Alaska currently experiences a shortage of healthcare professionals, and, that this shortage exists in several key occupational categories.

There are several types of support-for-service programs, and the national experience has proven loan repayment programs to be robust. These have demonstrated substantial and longstanding success as a public strategy which has helped to rectify such shortages. To quote from Pathman, et al. (2004),

> "As a whole, states' support-for-service programs bring physicians to needy communities where they find satisfying work caring for at-risk patient populations and remain for many years. Of all program types, the loan repayment and direct financial incentive forms, which target physicians after training, show the broadest successes. The successes of these state programs warrant their continued support and perhaps expansion to remedy the continuing maldistribution of physicians." (pg. 567).

Money seen as cure for shortage of doctors in Alaska

PRIMARY CARE: State considers help for more medical students; paying physicians to move north.

By ROSEMARY SHINOHARA
rshinohara@adn.com
(12/16/09 16:10:18)

Citing a continuing shortage of primary care doctors in Alaska, a state commission recommends the state spend considerably more money to train new doctors and lure more already-qualified doctors to the state.

Exactly how many primary care physicians Alaska needs isn't clear, but it's certain we need more, said Dr. Ward Hurlburt, chief medical officer for the Alaska Department of Health and Social Services and chair of the Alaska Health Care Commission, which made the recommendations.

Getting more primary care doctors will help deal with the crisis in care for senior citizens on Medicare, too, the commission believes. Doctors say reimbursement rates for Medicare are too low, and many primary care physicians won't take new Medicare patients.

If there were more doctors available, though, they could spread the Medicare population around.
