1/24/11 OVERVIEW: DEPARTMENT OF EDUCATION & EARLY DEVELOPMENT

<TARGET><BILL></BILL><SUBJECT>1-24-11 OVERVIEW DEPARTMENT OF EDUCATION and EARLY DEVELOPMENT</SUBJECT><COMM>HEDC27</COMM></TARGET>

The following questions have been posed to the Department of Education for the overview scheduled for Monday, January 24. Do you have any questions you would like to have answered?

1. What is DEED, and how is it structured?
2. What is the overarching educational philosophy of DEED?
3. Give a brief history of education in Alaska. BIA (Bureau of Indian Affairs), SOS (State Operated Schools), AUBSD (Alaska Unorganized Borough School District), REAA's (Regional Educational Attendance Areas) and contemporary.
4. What are the differences and similarities between and among the rural, bush and urban schools?
5. Give an overview of the DEED budget and how it works.
6. What does DEED perceive to be the problems in Education, and what would DEED like this session of the legislature to address?

House Education Committee
Department of Education and Early Development (EED) Overview
January 24, 2011

What is the overarching educational philosophy at EED?

Mission Statement
Alaska's education system fosters creativity and curiosity, and embraces diversity. Alaska's students have the skills and knowledge to contribute to local, state, national and global communities by understanding the past and present, and they are prepared to create the future.

AS 14.03.105 State Education Policy
It is the policy of this state that the purpose of education is to help ensure that all students will succeed in their education and work, shape worthwhile and satisfying lives for themselves, exemplify the best values of society, and be effective in improving the character and quality of the world about them.

Historical Overview of Education History in Alaska

Organization of Schools and Local Control

1884 – Organic Act – Responsibility for providing schooling given to the Office of the United States Secretary of Interior; four years later the task was specifically delegated to the Bureau of Education, a unit of Interior.

1800s – Federal government established day schools in Alaska villages and a limited number of vocational boarding schools.

Early 1900s – United States Congress granted authority to individual communities in Alaska to incorporate and establish schools, and maintain them through taxation.

1905 – Nelson Act – Provided for establishment of schools outside incorporated towns. Governor of Territory of Alaska made ex-officio superintendent. Thus a dual system of education in Alaska (federal and territorial, later state, begins).

1931 – Federal Bureau of Education extends educational services to more remote sections of Alaska and by this year assumes responsibility for formal education of most rural Native people.

In Alaska the passage of the Johnson O'Malley Act led to the beginning of negotiations between Alaska Territorial Department of Education and the Bureau of Indian Affairs for the transfer of federally-operated rural BIA elementary schools to the territory.

Only option open for high schools in small rural communities was to attend distant BIA boarding high schools, with the exception of a small number of church-affiliated boarding high schools, such as St. Mary's Mission.

1965 – Alaska State Department of Education, 1965-66 biennium report, declared need for special provisions to accommodate conditions in rural Alaska. Established the Division of State Operated Schools, responsibility for rural and on-base military schools, created governor's committee to explore merger of BIA and state schools.

1974 – Lawsuit was filed for not providing local high school facilities for predominantly Native communities, known at that time as the Molly Hootch case.

1975 – Pressure on legislature for more local control from Alaska Native people, State Operated Schools abolished, separate rural school districts called Regional Education Attendance Areas (REAAs) established.

1976 – Governor of Alaska signed a consent decree related to Molly Hootch as an out-of-court settlement, and the state agreed that it would establish a high school program in every community in Alaska where there was an elementary school (with a minimum enrollment of 8 students) and one or more secondary students, unless the community specifically declined.

School Accountability

1991 – Reform movement known as Alaska 2000 moved forward by Governor's Blue Ribbon Commission, which includes developing student academic standards.

1992 – State Board of Education passes regulations that require local schools to provide students a working knowledge of English, mathematics, science, geography, history, skills for a healthy life, government and citizenship, fine arts, technology and world languages. Regulation takes effect June 1993.

1995 & 1996 – State Board adopts content standards in ten areas.

1997 – Law requiring secondary competency testing passes legislature and is signed; AS 14.03.075.

2000 – State Board adopts more detailed content standards in reading, writing, and mathematics.

2000 – Benchmark assessments given to students in grades 3, 6 and 8.

2004 – Students first held accountable for passing the High School Graduation Qualifying Examination to earn a diploma.

2005 – State Board adopts Grade Level Expectations, which define standards by grade level; new assessments called Standards Based Assessments given to students in grades 3-10 begin.

2006 – U.S. Department of Education approves Alaska's assessment system under No Child Left Behind, determining the system is aligned to standards, and uses valid, reliable and fair tests to assess Alaska's content standards.

1/26/11 PRESENTATION GOVERNOR'S COUNCIL ON DISABILITIES & SPECIAL EDUCATION

<TARGET><BILL></BILL><SUBJECT>1-26-11 PRESENTATION GOVERNOR'S COUNCIL ON DISABILITIES and SPECIAL EDUCATION</SUBJECT><COMM>HEDC27</COMM></TARGET>

SPECIAL EDUCATION SERVICE AGENCY

Joint House and Senate Education Committees
January 26, 2011

Governor's Council on Disabilities & Special Education

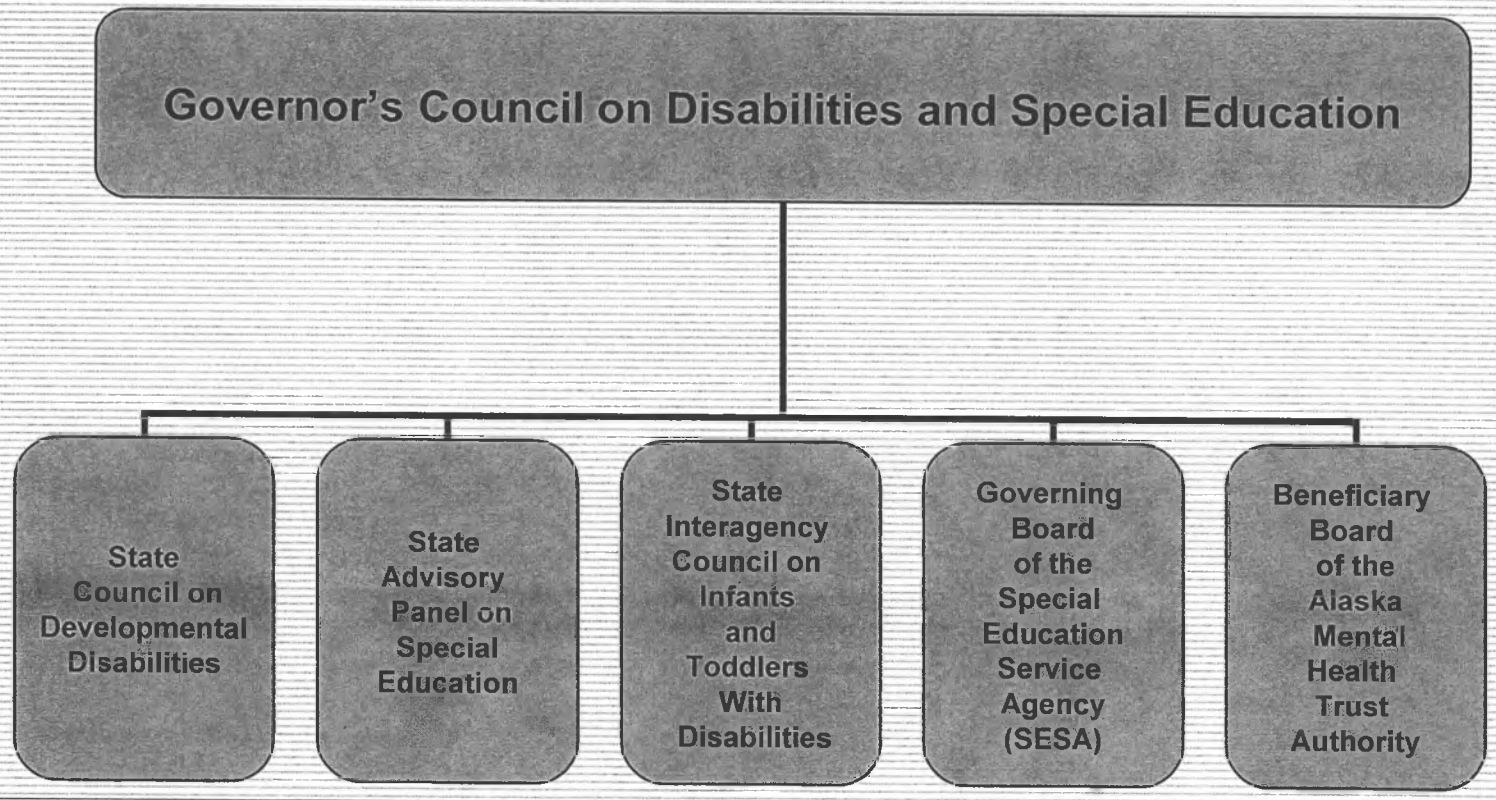
Council Mission

- Improve the lives of people with disabilities
  - Improve the quality of education provided to students with disabilities

Who are Council Members?

- Primary consumers or self-advocates
  - Individuals with disabilities
- Secondary consumers
  - Parents or family members of people with disabilities
- State agency representatives
- Other representatives designated in federal law
  - Center for Human Development
  - Disability Law Center
  - Non-profit agencies
  - Public education systems
  - Higher education

Council Responsibilities



Tools Used to Achieve Council's Mission

- Conducting research and data gathering
- Preparing policy papers and reports about issues that impact people with DD
- Educating and providing information to the media and general public
- Providing testimony about how legislation will impact people with disabilities

Tools Used to Achieve Council's Mission

- Providing advice to the Governor, legislature and agencies on policy that impacts people with disabilities
- Helping self-advocates and families learn about and connect with the political process
- Gathering community and stakeholder input

Planning Process

- ☐ Identify trends
- ☐ Determine key issues
- ☐ Develop state plan goals and objectives
- ☐ Determine state plan strategies
- ☐ Review state plan strategies annually
- ☐ Develop annual committee priorities
- ☐ Develop annual committee workplans
- ☐ Prepare recommendations for the Trust

Mechanisms for Change

- Outreach
- Training
- Technical assistance
- Supporting and educating communities
- Interagency collaboration and coordination
- Coordination with related councils, committees and programs

Mechanisms for Change

- Barrier elimination, systems design and redesign
- Coalition development and citizen participation
- Informing policymakers
- Demonstration of new approaches to services and supports
- Other activities

What is the Job of the Special Education Advisory Panel?

- Advise EED of unmet needs within the State regarding the education of children with disabilities
- Comment publicly on any rules or regulations proposed by the State regarding the education of children with disabilities
- Advise the EED in developing evaluations and reporting on data to the Secretary under section 618 of the Act

What is the Job of the Special Education Advisory Panel?

- Advise EED in developing corrective action plans to address finding indentified in the Federal monitoring
- Advise EED in developing and implementing policies relating to the coordination of services for children with disabilities
- Advise on eligible students with disabilities in adult prisons and the education of those convicted as adults and incarcerated in adult prisons

What are Other Responsibilities of the SEAP?

- Monitor State and federal legislation and policy
- Establish a physical presence before such bodies as the state board of education & early development or state legislature
- Testify regarding educational needs for children with disabilities
- Make knowledgeable and valued recommendations to the state department and board of education & early
- Provide an opportunity for public views to be expressed (town meetings or public hearings)

What is the Job of the SESA Board?

- Assure SESA provides assistance to school districts and early intervention programs serving individuals with low incidence disabilities, who live primarily in rural and remote areas of the state
- Assure SESA supports education that is student, family and community-centered and meets the individual needs of students
- Assist SESA in addressing other state education needs of individuals with low incidence disabilities, as external funding is obtained
- Monitor SESA policies and procedures

SESA Background

- Established under State Statute (AS 14.30.600) in 1986
- Formed as a not-for-profit corporation
- Operates under a sunset provision
- Receives Low Incidence Disabilities funding from EED based on prior year's statewide total enrollment
- Receives federal and state grants and contracts

Required Services AS 14.30.630 (b) (I)

- Itinerant outreach services to
  - Students who are deaf; deaf-blind; cognitively impaired; hearing impaired; blind and visually, orthopedically disabled, health impaired in other ways and severely emotionally disturbed
  - Students with multiple disabilities and autism

Required Services

- Special education instruction support and training of local school district special education personnel
- Other services appropriate to special education needs
- **Note:** SESA does not provide these services to the big 5 school districts

SESA's Funding Formula AS 14.30.650

- Each fiscal year the Department of Education & Early Development shall allocate to the agency not less than $15.75 times the number of students in the state in average daily membership in the preceding fiscal year

Recommended Changes

- Remove the sunset provision from SESA's authorizing statute
- Change the funding formula for SESA
  - 0.39 – 0.40% of Current Year Base Student Allocation (BSA) X Total Average Daily Membership (ADM) from Previous Year

Rationale for Removal of Sunset Provision

- Most recent audit findings
  - SESA performs a valuable, effective and efficient service to school districts that they cannot provide themselves because of the nature of low incidence disabilities
  - Students are able to be served in their local communities
  - Auditors recommended removal of sunset

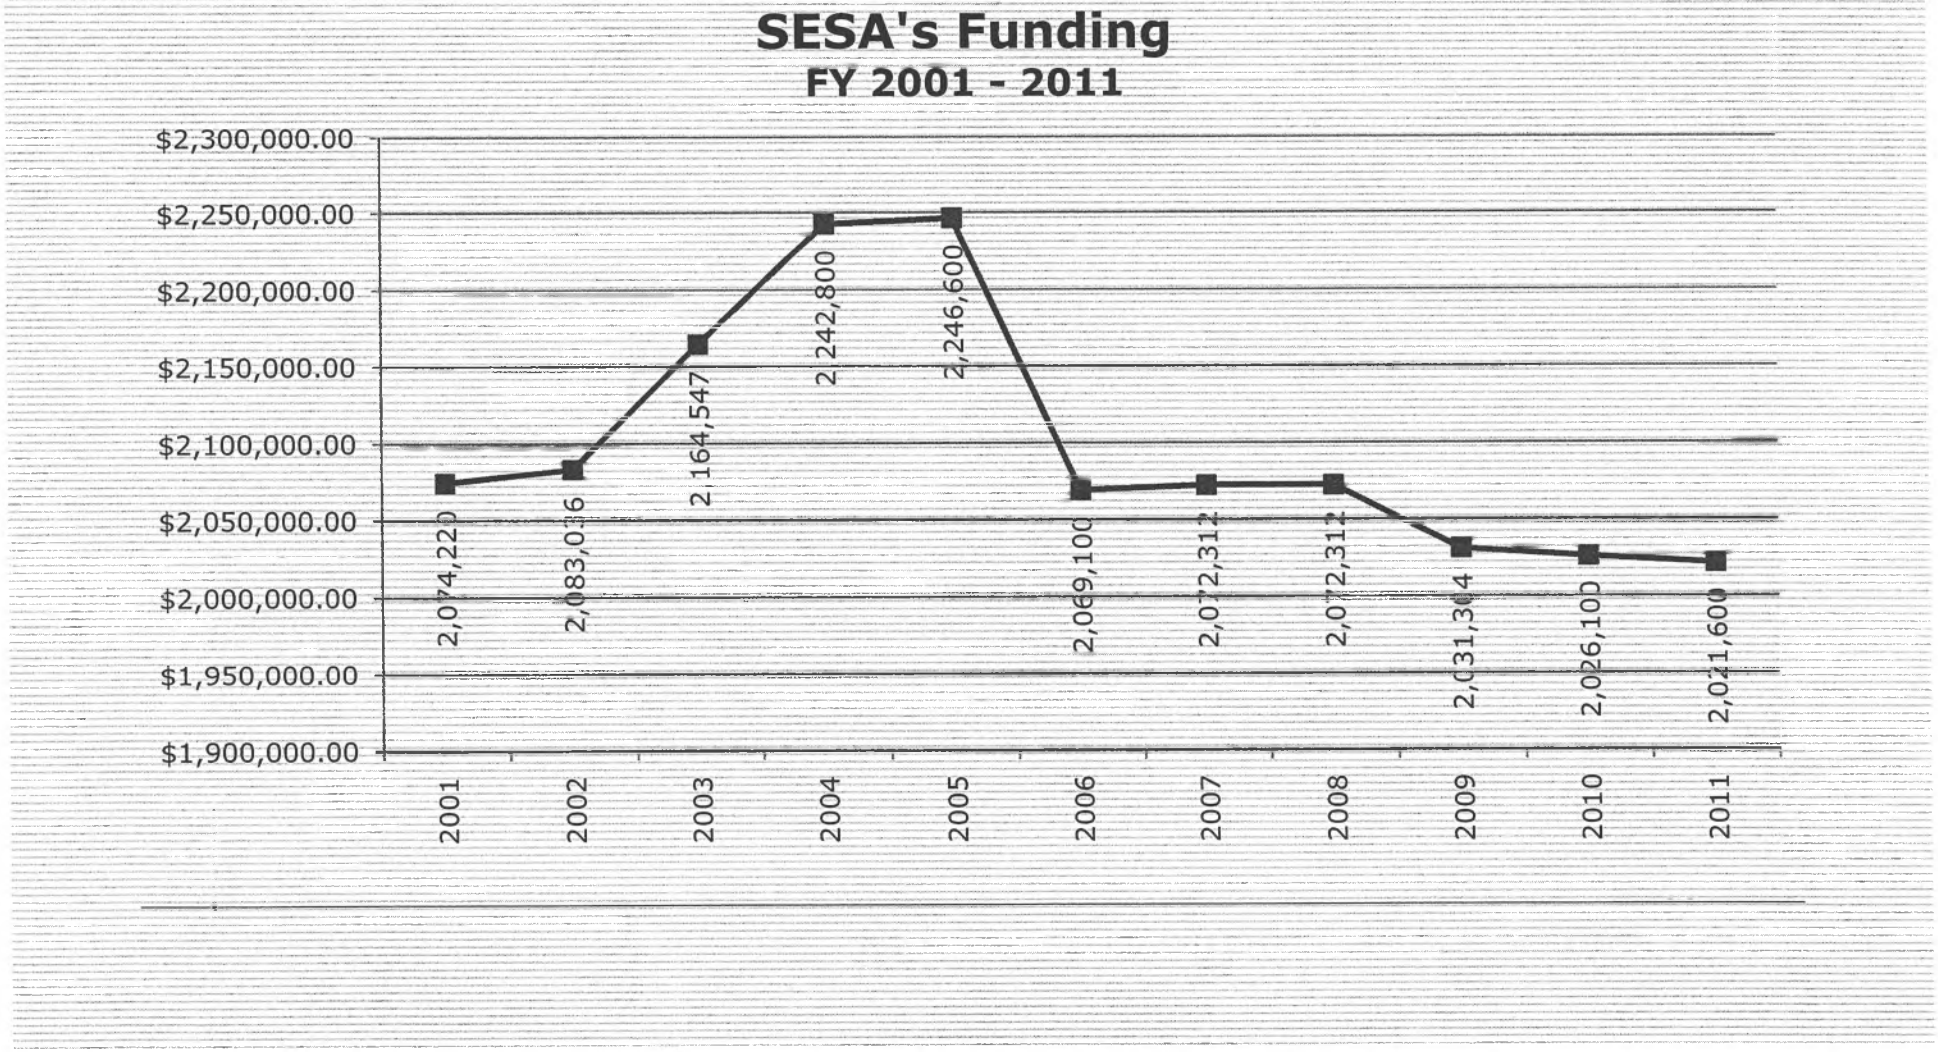
Rationale for Removal of Sunset Provision

- SESA does not duplicate services provided by the Department of Education & Early Development or local school districts
- Next audit is scheduled to start in January 2012 and completed by January 2013
  - Will be increasingly difficult to recruit and retain qualified staff and negotiate a long-term facility lease

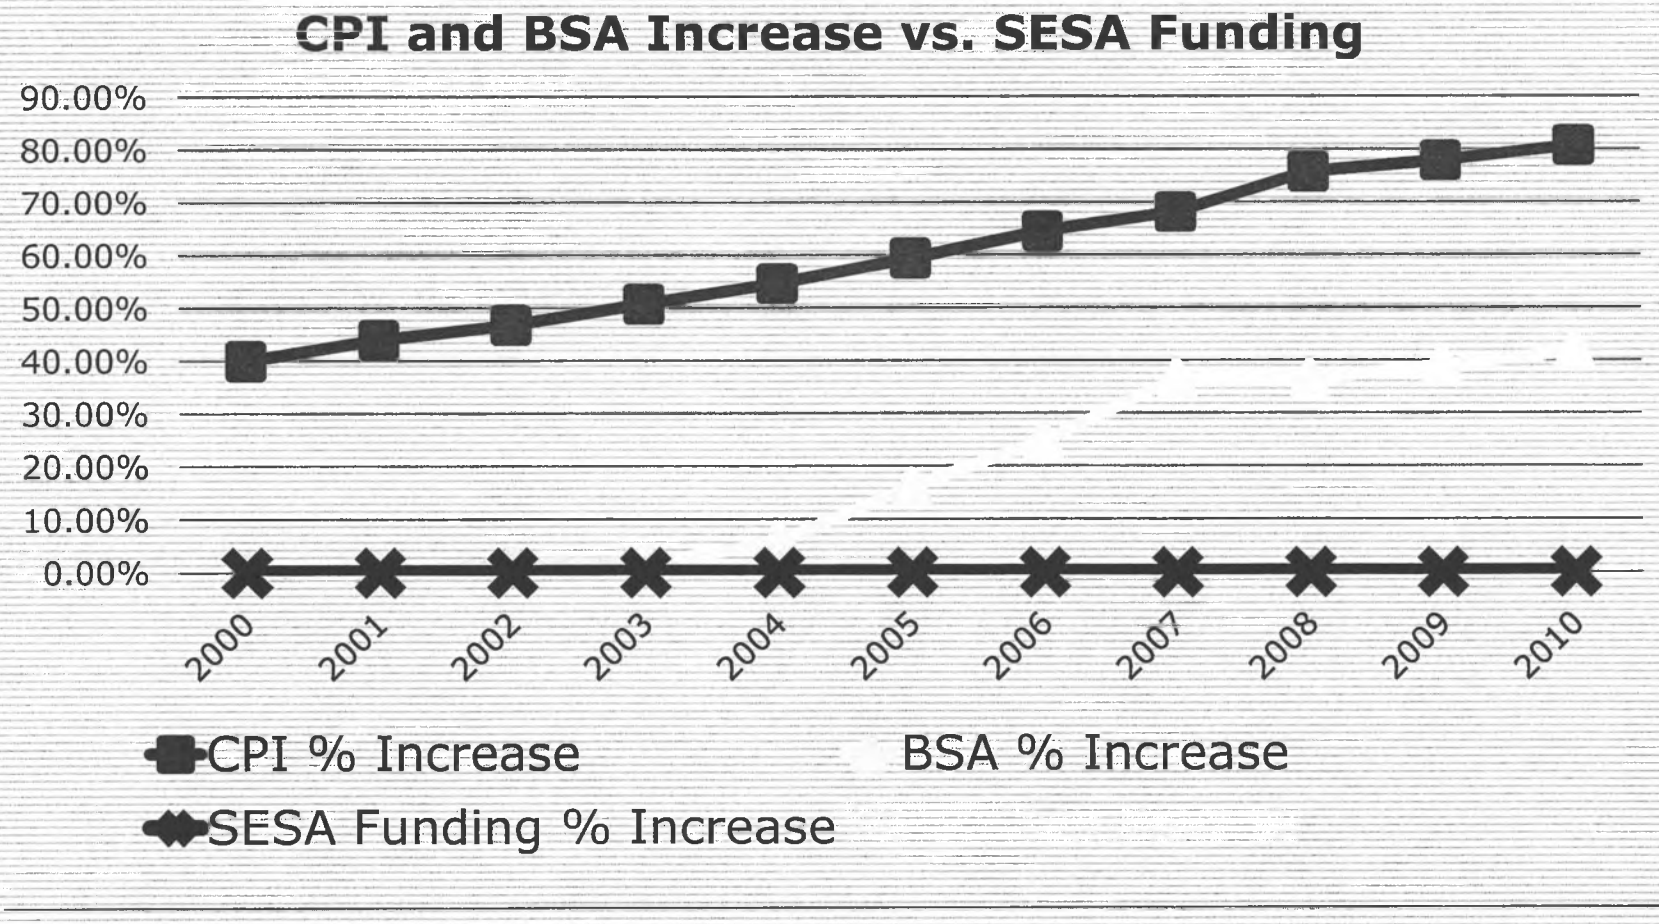
Rationale for Changing the Funding Formula

- The funding formula for SESA is based on a fixed student allocation of $15.75 that was set in 1986
- In 2011 SESA received less money than it did 10 years ago
- SESA's BSA did not change when school districts BSA changed
- If SESA's BSA had changed at the same time, its rate would be $22.71

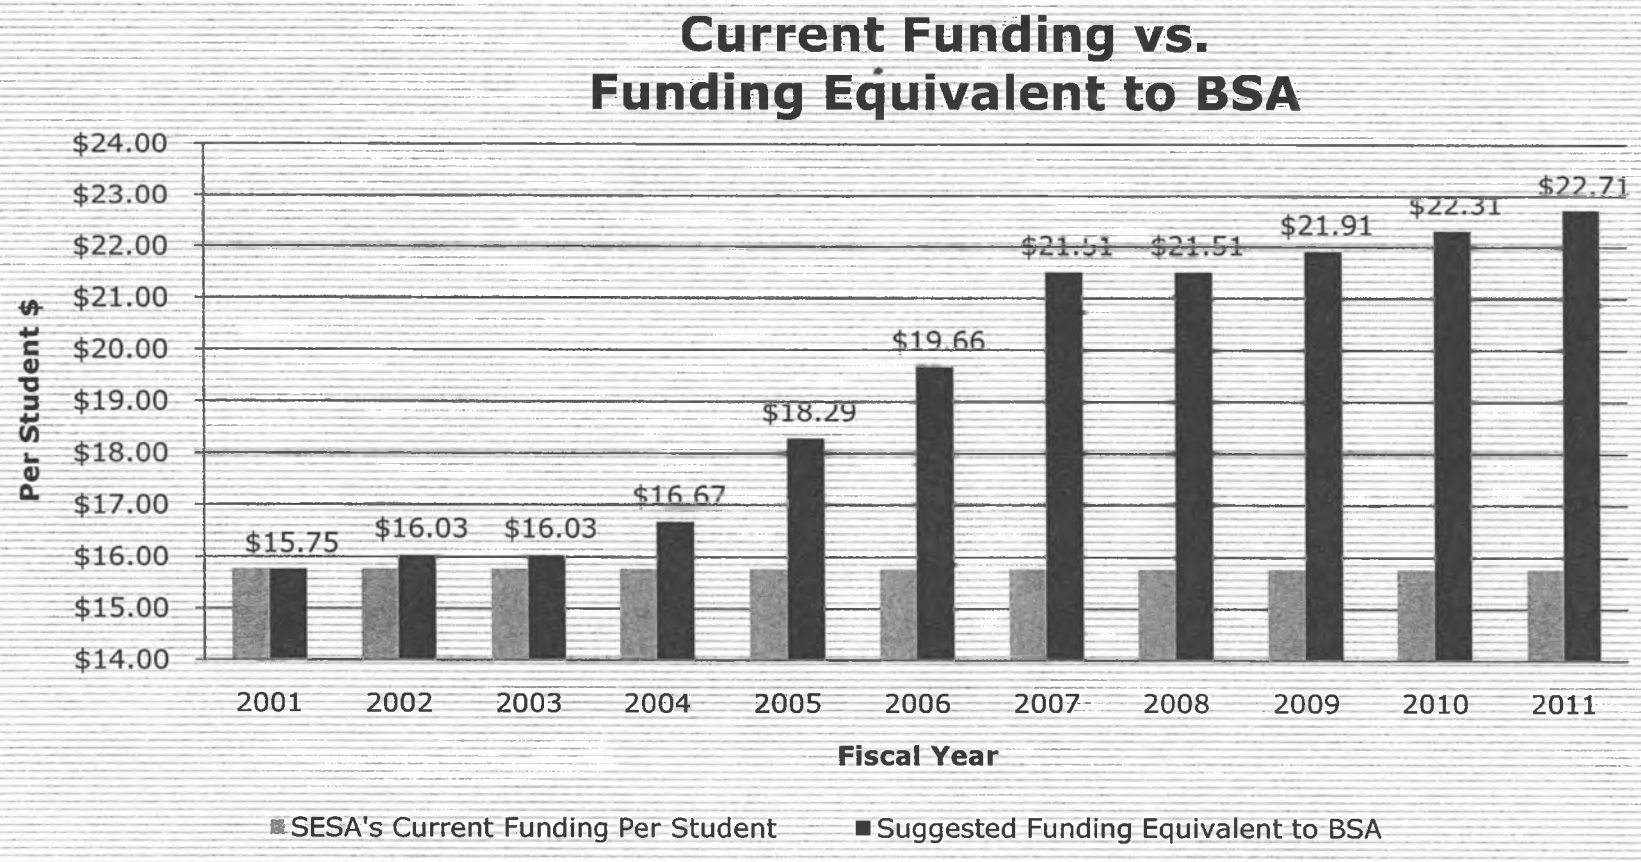
A Review of SESA's Low Incidence Disabilities Funding Over the Past 10 Years



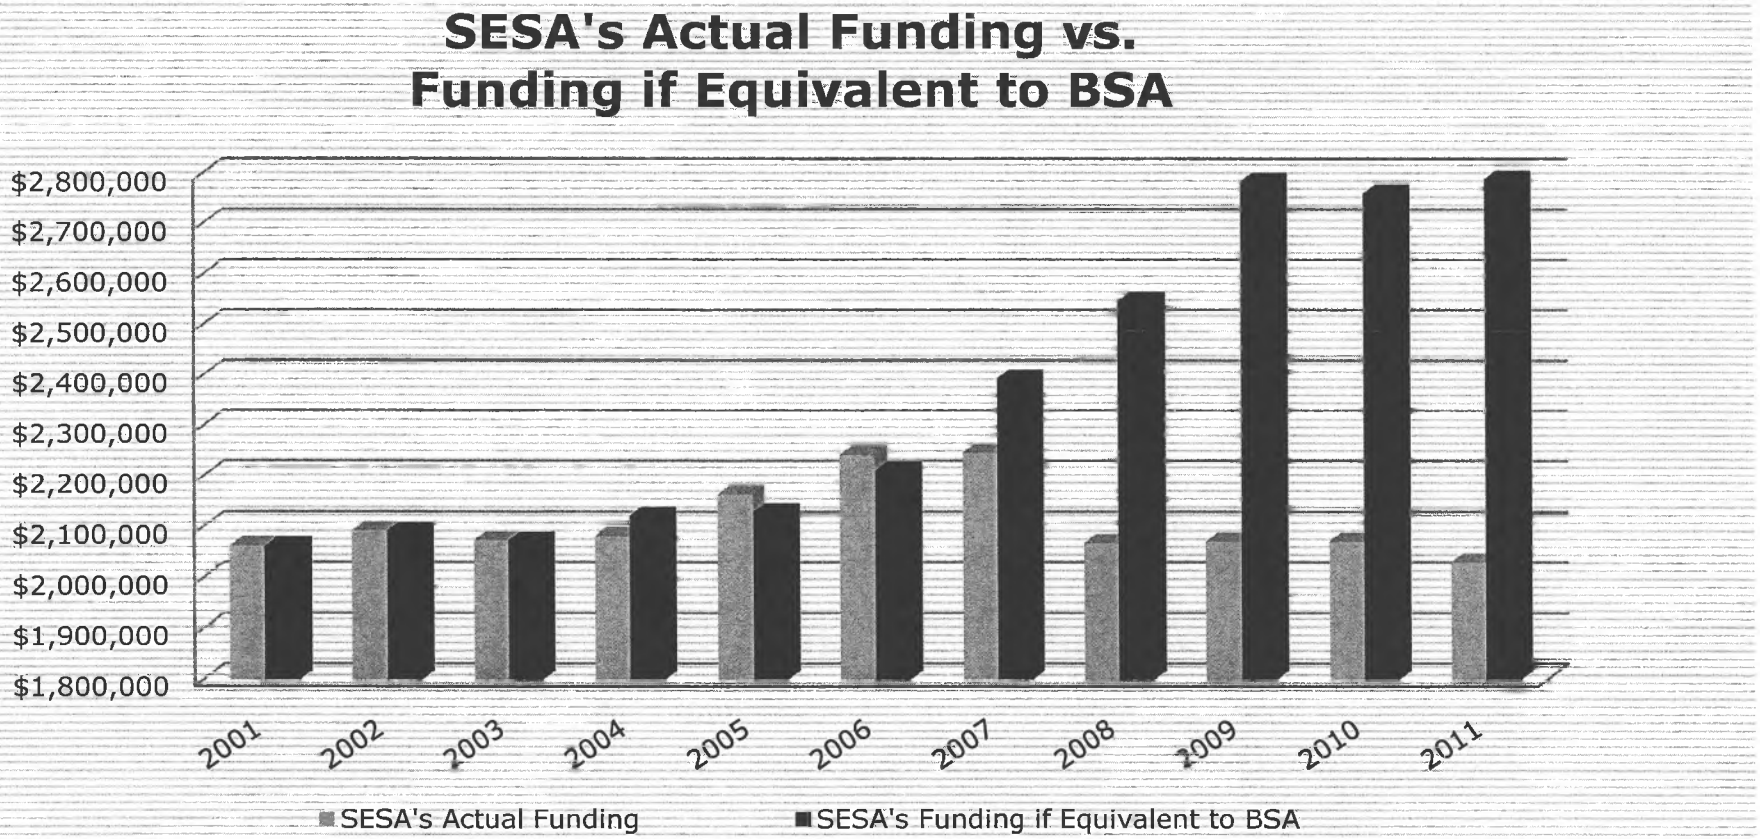
While School Districts have had their Base Student Allocation increased and while inflation has increased, SESA's funding has remained flat



SESA was written into Alaska Statute with a fixed per student allocation of $15.75. This chart shows what SESA should have received per student had their funding risen equivalent to the Base Student Allocation increases since 1999.



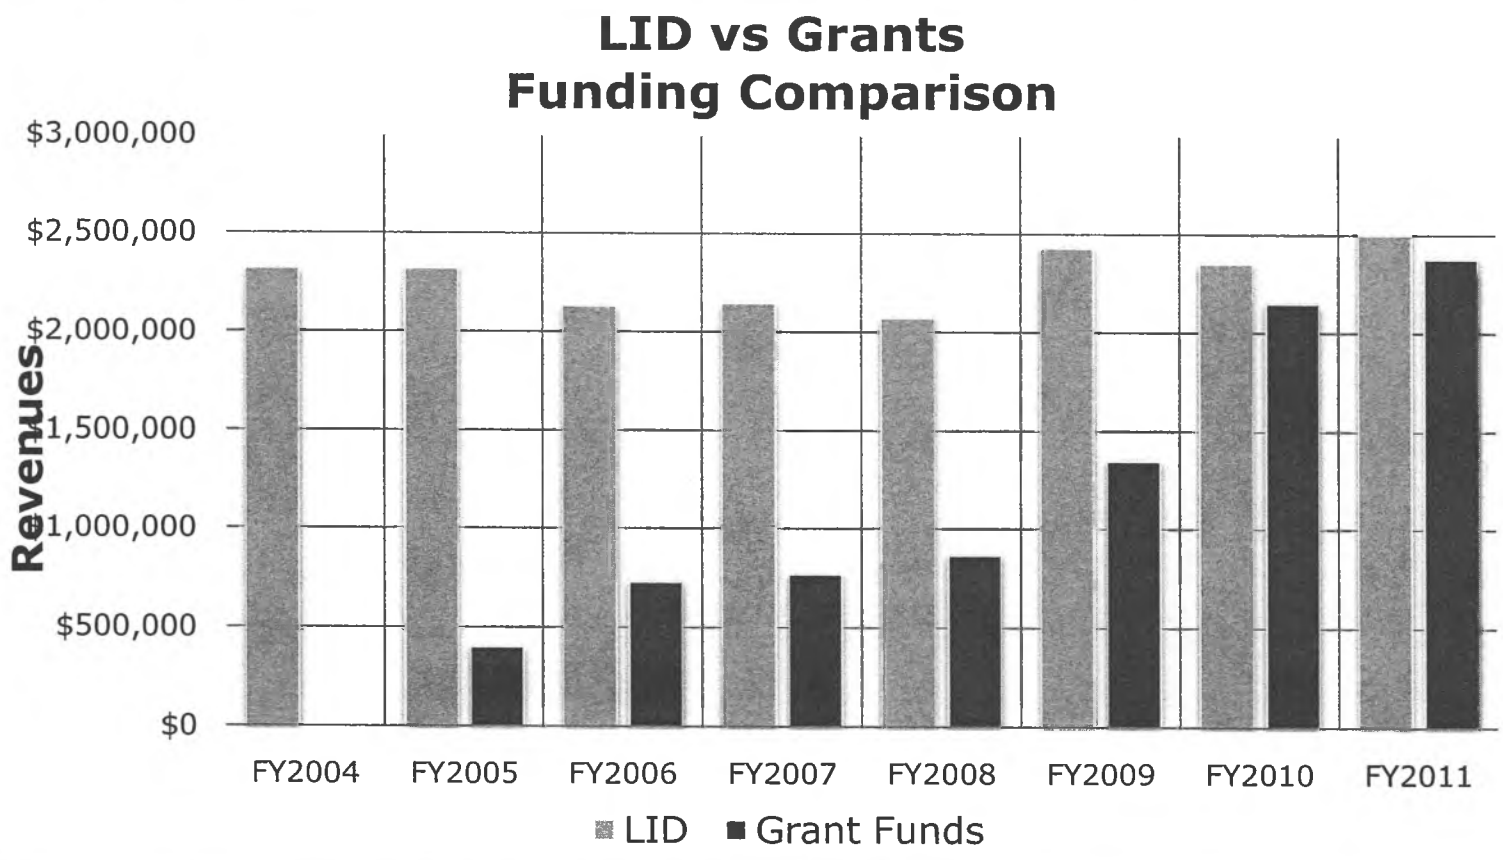
This chart illustrates the total dollar amount of funding that SESA has received from FY2001 through FY2011 versus the total dollar amount of funding that SESA would have received had their entitlement been based on the previous chart (i.e. rising equivalently with the BSA)



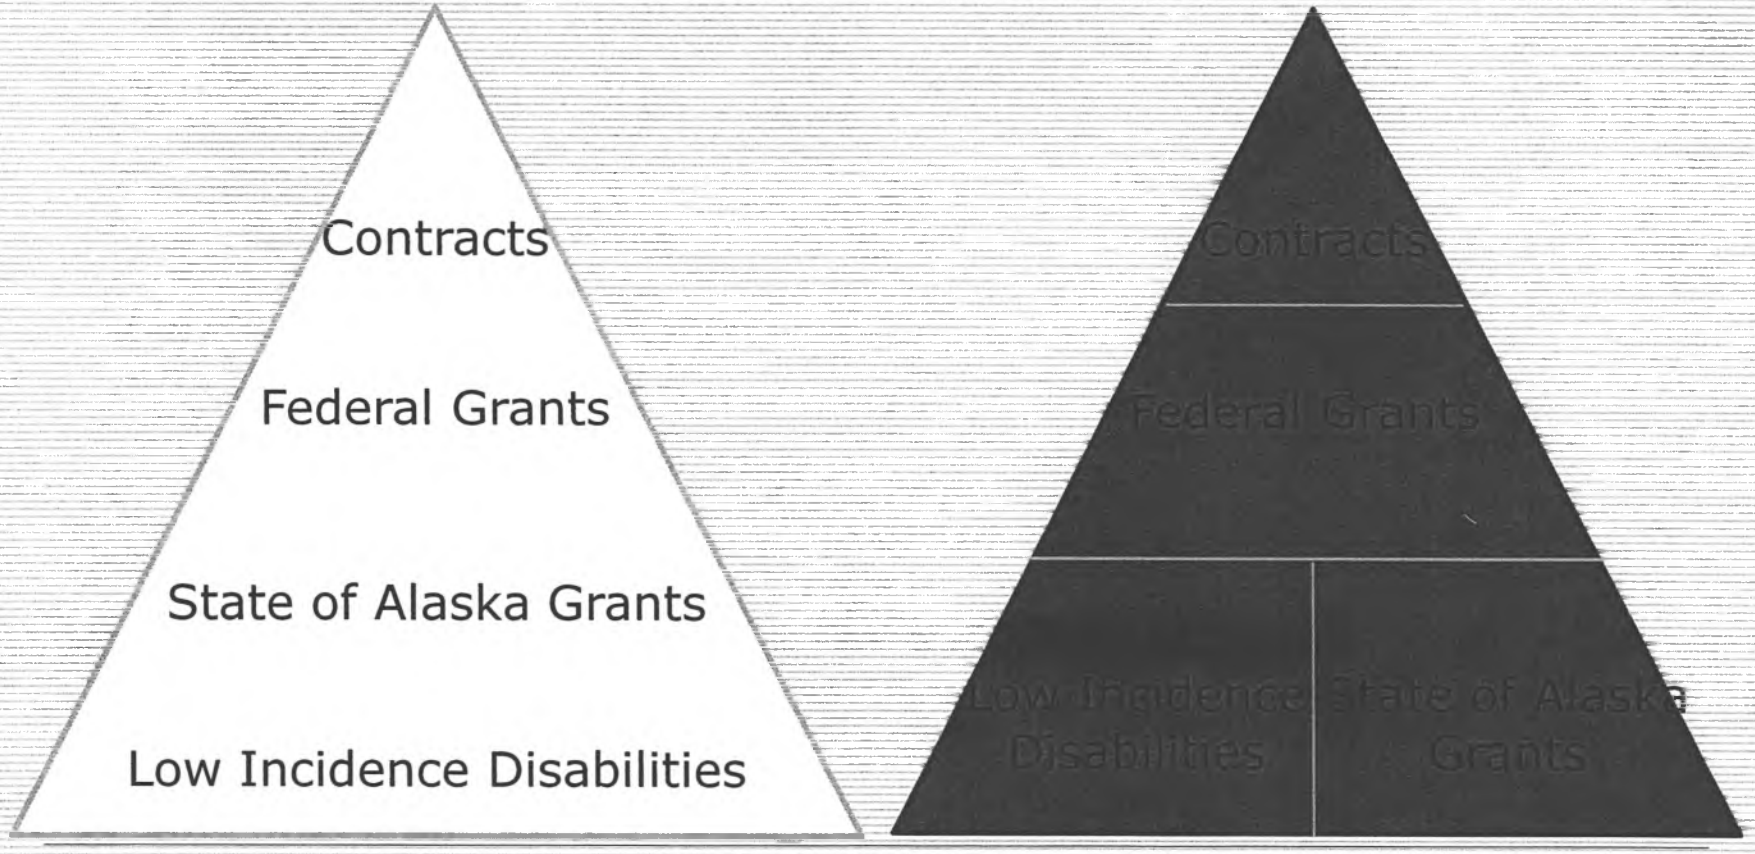
Rationale for Changing the Funding Formula

- In response to last audit, SESA successfully secured additional grants and contracts that fit with its mission
  - "Soft" money dedicated for specific purposes
  - Currently comprise 45% of SESA's budget
  - $236,000 contribution to overhead
    - As a result, SESA is able to fund 3 positions for the low incidence disability program

The chart below illustrates how SESA has increased grant funding over previous years



Recommended Structure Versus Current Structure



Rationale for Changing the Funding Formula

- SESA already has difficulty meeting its statutorily mandated duties
- If there is a reduction in grants and contracts this situation will get even worse and negatively impact students and school districts

Rationale for Changing the Funding Formula

- Negative impacts on students and school districts
  - Loss of child-specific evidence-based educational intervention strategies modeled on-site to teachers
  - Fewer on-site visits to provide targeted interventions, observe classrooms and enhance programs
  - Shorter visits to maximize travel funds to include more sites

Rationale for Changing the Funding Formula

- Negative impacts on students and school districts
  - Loss of guidance to new special education teachers and to classroom teachers working with students who have unique, low-incidence disabilities
  - Less student-teacher interactions based on evidence-based practices

Thank You!

Programs at Special Education Service Agency

FY11

Low Incidence Disabilities (LID)

Autism Impairment (AI)

Our primary purpose is to empower educational teams and provide information and training to professionals and families for development of programs for:

- Functional communication
- Positive behavior support
- Social skills
- Instructional strategies
- Meeting sensory needs
- Curriculum modification
- Accommodations.

We offer presentations and trainings to people who work with students, ages 3-21 years old, on a variety of topics including:

- Autism awareness
- Inclusion of special learners in general education settings
- Prompting strategies
- Positive behavior plans
- Functional behavior assessment

Emotional Disturbance (ED)

A student's emotional disturbance can affect areas beyond the emotional, and may also include the student's physical, social, or cognitive skills. ED program services include useful strategies for educators to provide emotional and behavioral support while also helping students with academics, social skills, self-control, and self-esteem. By encouraging positive behavioral support (PBS) in the school environment, problem behaviors are minimized, and positive, appropriate behaviors are fostered. This may include assistance with conducting a functional behavioral assessment (FBA) and the subsequent behavior intervention plan (BIP), which focuses on student strengths and interests. Families of students with ED often need help in understanding their child's disability and how to access mental health services. SESA's ED specialists help to coordinate services between home, school, and community.

Hearing Impairment (HI)

The HI program provides support to staff working with students with a moderate to profound hearing loss. Services include:

- Assistance with assessment of language, communication, literacy, and speech development
- Information on sign language, deaf culture, and professional development opportunities for interpreters

Hearing Impairment (HI) Continued...

- Assistance with planning transition to school or post-secondary programs
- Troubleshooting assistive listening devices
- Working closely with parents, teachers, and paraprofessionals to design programs that meet the unique needs of children with hearing loss

Multiple Disabilities (MD)

School teams in rural and remote Alaska are eligible to receive services to help them educate students with significant cognitive impairments, physical disabilities, and multiple disabilities. Students with other health impairments, traumatic brain injury, and pre-school developmental delay are also often assigned to the multiple disabilities program. Education specialists from the multiple disabilities program work with school-based teams and other itinerant professionals to help design and support educational programs that are age appropriate and meaningful for the student. We help teachers provide access to the general education curriculum, while focusing on academic and other essential skill development through specialized materials and strategies.

Vision Impairment (AI)

The SESA vision impairment program provides supports in any of the following areas of need:

- Functional vision evaluation
- Development and implementation of IEP/instructional programs
- Sharing and modeling of intervention strategies
- Specialized teaching strategies and skills
- Assistance in procuring or adapting instructional materials or equipment
- Orientation and mobility training

SESA Tech and Library

Tech

SESA maintains a full website with information and links to a wide variety of information and knowledge about low incidence disabilities. It includes staff-written blogs, presentations, and educational modules. In addition, SESA uses two-way videoconferencing to provide consultation and support to rural districts with similar technologies. The agency has an extensive infrastructure of these and other distance and educational technologies to help rural and remote districts provide quality educational programs to their students with significant disabilities.

Library

SESA's extensive library is available to educators, families, university students, and other service providers throughout Alaska. The library was established to support SESA's staff and the school districts they serve, and many outside patrons also take advantage of this resource assistive technology devices may be borrowed to try or to use while the student's own device is being repaired.

State Grants

Alaska Autism Resource Center (AARC)
AARC provides statewide information dissemination, presentations, and trainings. In collaboration with families, schools, and communities throughout the state, the AARC helps to increase the knowledge and resources of appropriate services for individuals of all ages with autism spectrum disorders.

Alaska Center for Accessible Media (AKCAM)
The Alaska Center for Accessible Media (AKCAM) was created with startup funding from the Alaska Department of Education and Early Development (DEED) to be a one-stop shop for school districts who need to provide accessible instructional materials (AIM) to students with print disabilities. AKCAM is a state Authorized user and Accessible Media Producer for the national system for AIM. In addition, AKCAM can help districts find electronic text across a variety of online and local providers, while being able to convert and produce electronic text materials in a variety of electronic formats, like Daisy-compliant talking books, accessible PDFs, Braille and refreshable Braille files, and audio files. Services are at cost for time and materials, and are available to school districts across the state of Alaska.

Bring the Kids Home Educational Transition Support Project (BTKH)
The BTKH Project was developed to establish a non-direct service program to support youth returning to Alaska schools from residential psychiatric treatment centers (RPTC). SESA will establish communications with the RPTCs and assist with advance notice of student return, transition of necessary paperwork, and follow up of recommended services.

Positive Behavior Intervention Supports Center of Alaska (PBIS Center)
The Positive Behavioral Interventions and Supports (PBIS) Center provides technical assistance and coaching to schools. It serves as a clearinghouse and depository for PBIS materials to meet the needs of all Alaskan schools and educators.

Federal Grants

Creating Innovative, Responsive, and Consistent Learning Environments (CIRCLE)
Project CIRCLE supports Head Start programs across Alaska to increase the use of program-wide positive behavior supports. We look at ways to teach correct behavior and arrange the learning and physical environments to prevent problem behavior and to help children who have difficulty managing their behavior.

Alaska Dual Sensory Impairment Services (DSI)
As the recipient of federal funds under The Individuals with Disabilities Education Act (IDEA), SESA provides technical assistance for children and youth, ages 0 through 21 years who have both vision and hearing impairments. Our purpose is to assist service providers and families in preparing learners with dual sensory impairments for quality lives in their homes, schools, and communities. We provide technical assistance to service providers and families through onsite consultation, in-service trainings, promotion of home-school partnerships, materials and resource dissemination, and access to an extensive lending library. Services are provided at no cost.

1/28/11 UPDATE: GRADUATION WORKING GROUP, DEED

<TARGET><BILL></BILL><SUBJECT>1-28-11 UPDATE GRADUATION WORKING GROUP, DEED</SUBJECT><COMM>HEDC27</COMM></TARGET>

Alaska Department of Education & Early Development
Graduation Working Group

Overview, Purpose and Evolution of Group

- Education Summit held November, 2009. Alaska Education Plan established as a result of input from people throughout Alaska and Summit attendees.
- Working groups, including Graduation Working Group were formed to continue the work begun at the Summit.
- Group began work on the goal of World Class Students in January, 2010, with a focus on improving graduation rates, strategies for engaging students.
- Group's initial focus was on high school. With realization that many students are lost at the transition points between elementary and middle, middle and high school focus shifted to include elementary and middle school. Group recognizes importance of the very earliest years to children's later success in school.
- Conversations moved from focus on high school graduation to retention in school and back to graduation.

Membership includes a broad group of stakeholders from throughout the state

- High school students
- Governor's Council on Disabilities
- High School Principals
- District Superintendents
- Cook Inlet Tribal Council (CITC)
- Anchorage's Promise
- Communities in Schools
- University of Alaska Statewide
- State Agencies: Department of Education & Early Development; Department of Health and Social Services; Department of Corrections;
- Members of House Education Committee
- State Board of Education & Early Development

Working Group Goals:

- To improve the connectedness and/or flexibility of our schools to meet the needs of all students.
- Increase community partnerships and build relationships, which eliminate barriers to learning.
- Increase involvement among culturally unique families and communities in Alaska schools.
- Evaluate current pre-service and certification course work requirements on Multi-cultural and Alaska Studies to assist staff in meeting the unique culturally responsive needs of our changing student populations.

Accomplishments

- At each meeting group members shared the positive steps being taken throughout the state to increase graduation rates.

- Began examination/analysis of policies and procedures that disenfranchise students.
- Suggestions from group regarding Alaska studies and multicultural requirements for teacher certification were presented to the Teacher Quality Working Group and incorporated into the work that group is doing to re-examine course requirements to make them meet the needs of Alaska's changing student populations.
- Middle School Partnership Program established through work of EED Partnership Liaison and RuralCap is linked with group.
- Created and distributed Raising a Graduate poster
- Work being completed on Every Student a Graduate link on EED website:
    - provide resources for students, families, teachers and others interested in increasing student success and increasing graduation rates
    - provide ideas for resolving issues that disenfranchise students and lead to dropping out of school
    - provide information regarding early warning signs for students at risk of dropping out

Next Steps

- Mr. McCormick and Ms. Curran will present the work done by the group to Commissioner Hanley to get direction regarding next steps for the work.

Graduation Rates and Dropout Rates
Definitions and Data

The Graduation Rate is a measure of the percentage of students that graduate within four years.

A **graduate** is defined as a student who has received a regular diploma from a state- or district-approved education program, as evidenced by receipt of a secondary school diploma from school authorities.

School Year	Graduation Rate	Graduate Count
2005	61.4%	6,905
2006	61.6%	7,361
2007	63.0%	7,666
2008	62.6%	7,855
2009	67.5%	8,008
2010	67.7%	8,245

The Dropout Rate is computed by dividing the number of dropouts in the current school year by the number of students enrolled in grades 7-12 on October 1 of the current school year. School year is defined as the 12-month period beginning with July 1 and ending June 30.

A **Dropout** is defined as a student who was enrolled in the district at some time during the school year and whose enrollment terminated. This does not include an individual who:

- graduated from high school or completed a state or district approved education program, as evidenced by receipt of formal recognition from school authorities;
- transferred to another public school, private school or state or district approved education program;
- is temporarily absent due to suspension;
- is absent due to illness or medical condition;
- died.

School Year	Dropout Rate	Dropout Count (Grades 7-12)
2005	6.0%	3,791
2006	5.8%	3,642
2007	5.5%	3,434
2008	5.2%	3,232
2009	5.2%	3,146
2010	5.15%	2,990

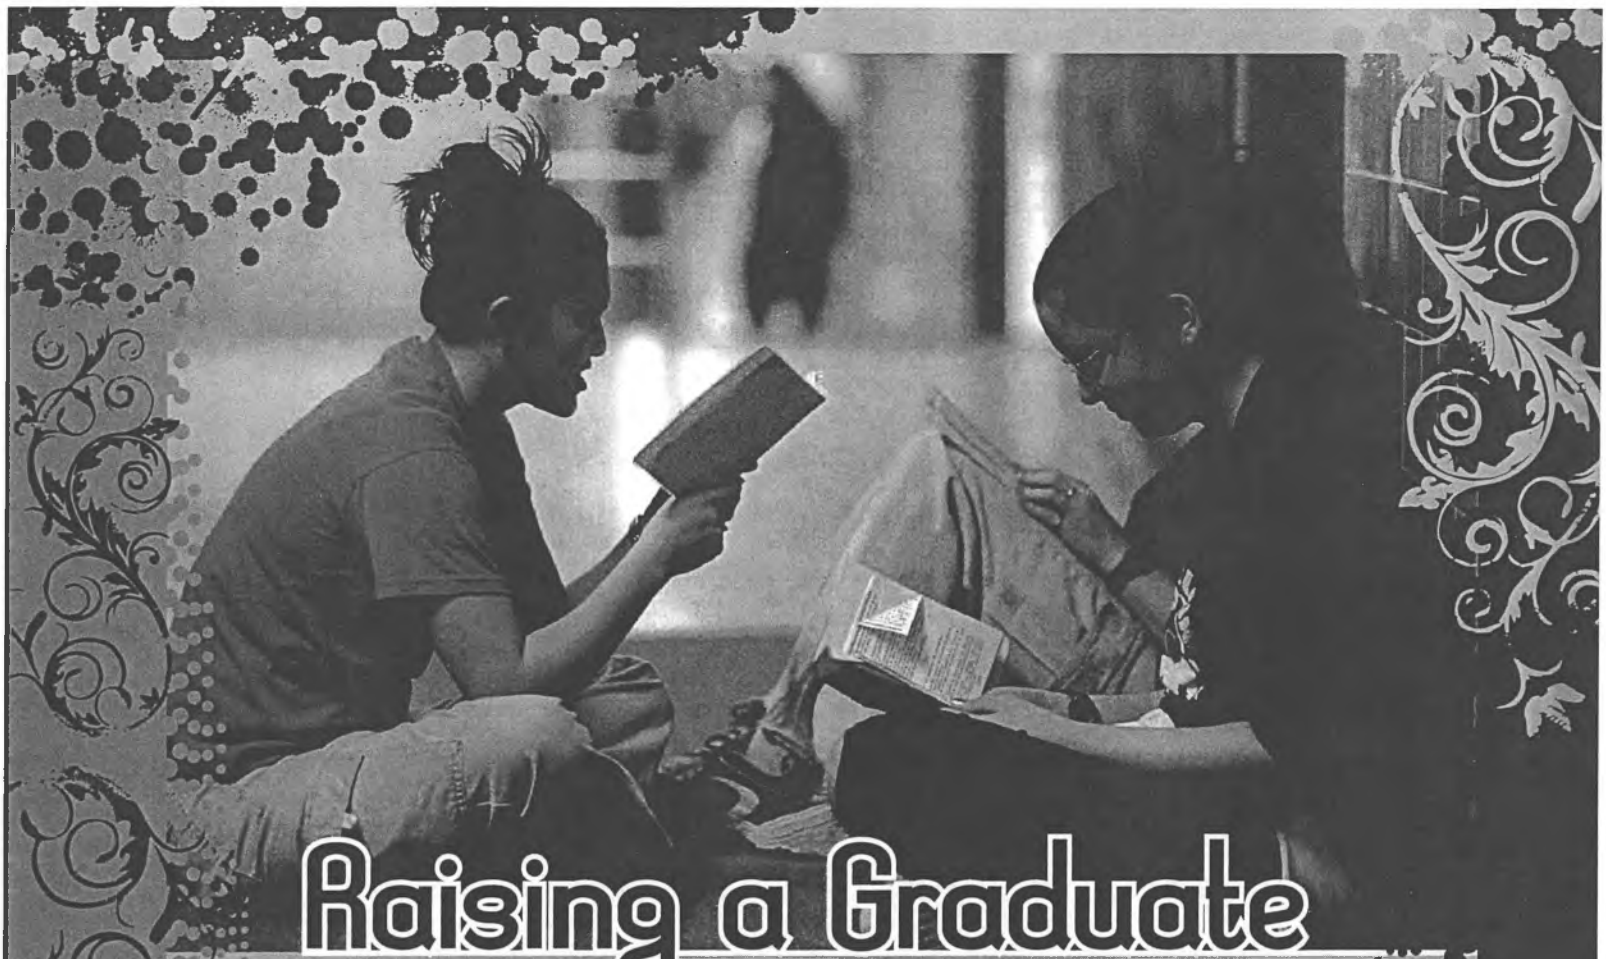
Dropout Prevention Information

Institute of Education Sciences (IES) identified six recommendations for reducing dropout rates*. The recommendations are divided into three categories: diagnostic processes for identifying student-level and school-wide dropout problems; targeted interventions for a subset of middle and high school students who are identified as at risk of dropping out; and school-wide reforms designed to enhance engagement for all students and prevent dropout more generally.

Recommendation	**Type of Intervention**	**What state and districts are implementing**
Utilize data systems that support a realistic diagnosis of the number of students who drop out and that help identify individual students at high risk of dropping out.	Diagnostic	• Fairbanks has developed Dropout Indicators
Assign adult advocates to students at risk of dropping out.	Targeted	• Anchorage Graduation Coaches • Fairbanks Advisories for interventions
Provide academic support and enrichment to improve academic performance.	Targeted	• Response to Instruction/Intervention (RTI)
Implement programs to improve students' classroom behavior and social skills.	Targeted	• Response to Instruction/Intervention (RTI) • Positive Behavior Interventions and Supports (PBIS)
Personalize the learning environment and instructional process.	School-wide	• Schools within schools • Early stages of development of statewide virtual learning network
Provide rigorous and relevant instruction to better engage students in learning and provide the skills needed to graduate and to serve them after they leave school.	School-wide	• EED contracted with Content Coaches to be available to schools and districts • EED beginning stages of review of content standards and GLEs • EED building tools to integrate cultural standards into instruction

* *IES Practice Guide Dropout Prevention* September, 2008. Institute of Education Sciences, National Center for Education, Evaluation and Regional Assistance, US Department of Education. http://ies.ed.gov/ncee/wwc/pdf/practiceguides/dp_pg_090308.pdf

Alaska Commission on Postsecondary Education has produced a publication: *Chart Your Course*, which is a newspaper for middle school students to encourage them to plan ahead so they can attend college. http://alaskadvantage.state.ak.us/page/236#BookHand



Raising a Graduate
It's Everybody's Business

Everyone is a role model—be a good one.
Read with children.
Show you care. Smile at youths and say hi.
Help youths develop a vision for their future.
Get involved in your schools.
Catch youths being good and recognize them.
Help youths explore their pathways to graduation.
Provide positive challenges for youths.
Involve youths in decision-making.
Create opportunities for youths to volunteer.
Provide a safe and supportive home.

Graduation Opens the Doors to Future Opportunities

Alaska Department of Education & Early Development

1/31/11 OVERVIEW: ALASKA CAREER & TECHNICAL EDUCATION PLAN

<TARGET><BILL></BILL><SUBJECT>1-31-11 OVERVIEW ALASKA CAREER and TECHNICAL EDUCATION PLAN</SUBJECT><COMM>HEDC27</COMM></TARGET>

January 14, 2011

Alaska Legislature Education Committee Chairs
Senator Joe Thomas, Room 514
Representative Alan Dick, Room 104
State Capitol
Juneau, AK 99801-1182

Senator Thomas and Representative Dick:

I'm writing on behalf of the Alaska Business Education Compact (ABEC) with congratulations on your committee appointments and thanks for your participation in the 27th Alaska Legislature. The Education committees you will lead are critical to preparing Alaskans for the future, both as part of the workforce and for their own success in life.

In 2010 a major effort was made to put together a plan for Career and Technical Education in Alaska. Endorsed by the Board of Education, Alaska Workforce Investment Board and the UA Board of Regents, the collaborative plan of the DOLWD, DEED and UA is now a blueprint for preparing our Alaskan students for successful and economic careers. The Alaska Business Education Compact was among many groups in Alaska to both support the initiative and to participate in the development. From our perspective, the CTE plan is a great step forward in attaining the goals of the state in educating Alaskans. The collaboration of the state departments and the university marks a long overdue step in assuring articulation among the major players in delivering education to Alaskans for a clear career pathway.

The Vocational Technical Education Providers (VTEP, a sub-committee of AWIB) and the ABEC led an effort to inform legislators, business and industry and other groups across Alaska about the plan and supported efforts to help allocate funding to support the plan. Those efforts included supporting bills (like HB 317) to route funding from the state to CTE programs as well as communications to school districts regarding budget planning and information to business communities about support for the plan.

Partners in the effort included business and industry associations, school districts and education associations. Part of the information process included packaging of letters of support from over 50 entities from across the state, urging the state and the local communities to provide strong career and technical education for all students in all regions.

While the Legislative bills have not yet addressed the allocation issue of funding, we would encourage the education committees to look at the previous bills and some new approaches. At

the local level, many districts are already including support in their budgets and bonds for the infrastructure to deliver CTE per the plan: as examples, with their board support, ASD and Mat-Su are working with their local governance entities to assure that the CTE is strengthened in their regions.

There is strong support from the ABEC and other business / industry organizations to enhance and support the basic elements of the CTE plan. That support should include such integral concepts as the following:

- Designated state funding for CTE should be provided with categorical designation in the funding formula or a budget appropriation from the legislature to the locally controlled school districts or institutions with intent to support CTE.
- Increase and Enhance Industry Financial Support by way of allowing tax incentive for a broad type of business entities that financially support CTE programs.
- CTE Programs of Study should be industry driven and validated and should lead to a certification and/or placement in a post-secondary program. They should be developed, implemented, and evaluated, based on their ability to link students to high wage, high skill, or high demand occupations.
- CTE Course Credits should be able (as applicable) to qualify for core academic status (i.e. math, science) to enable students to use these credits to meet graduation requirements and qualifications for the Alaska Performance Scholarships. The requirement for instructors to attain highly qualified teacher status for the core subject area should be sufficiently flexible to include industry-qualified CTE instructors.
- Alaska Department of Education and Early Development should have an adequate administrative support unit specified for administering, regulating, and monitoring CTE in Alaska.

The Alaska Business Education Compact would like to reiterate our continuing advocacy of the CTE plan as an integral part of the state's education plan. We hope to work to provide insights to the Legislature from the Business / Industry sectors as well as to continue the dialogue of employers, educators, parents and communities. We would offer to assist the legislative committees in developing the appropriate bills and processes

Dave Rees, Facilitator

Alaska Business Education Compact

August 20, 2010

Dear Alaskan:

The Department of Education and Early Development, the Department of Labor and Workforce Development and the University of Alaska are pleased to present the Alaska Career and Technical Education Plan. This plan outlines a comprehensive, integrated career and technical education system for Alaska that aligns training programs and coordinates delivery to prepare our citizens – youth and adults – for Alaska careers. Enclosed is a copy of the plan.

It has been our pleasure to work with others across the state to develop this plan and we are committed to follow-through on the implementation. We hope that you find this plan informative and a positive step forward for Alaska to develop our talent as the workforce that will stimulate economic growth your community and throughout the state. We look forward to your involvement during the implementation phases of the plan.

Please contact us if you have questions or suggestions in implementing the Alaska Career and Technical Education Plan.

Sincerely,

Helen Mehrkens

Process Industry
Careers Consortium

Resolution 2010-01
Alaska Process Industry Careers Consortium

RESOLUTION SUPPORTING THE ALASKA CAREER AND TECHNICAL EDUCATION PLAN

WHEREAS, the Alaska Process Industry Career Consortium is Alaska's leading industry organization delineating workforce data and occupational needs, and career pathways for Alaska's process industries,

WHEREAS, the Alaska Process Industry Career Consortium Board of Directors supports providing Alaska's citizens with training programs to prepare for Alaska careers,

WHEREAS, the Alaska Process Industry Career Consortium believes that high quality Career and Technical Education (CTE) is essential in supporting the development of career pathways that lead to a skilled Alaskan workforce, and economic prosperity for Alaska,

NOW THEREFORE BE IT RESOLVED that the Alaska Process Industry Career Consortium Board of Directors supports the "Alaska Career and Technical Education Plan" as a basis for actions that will lead to a comprehensive, integrated career and technical education system for Alaska.

CERTIFICATION
The Alaska Process Industry Career Consortium Board of Directors held a special vote on December 1, 2010 to convey support for the Alaska Career and Technical Education Plan and the foregoing Resolution was adopted unanimously.

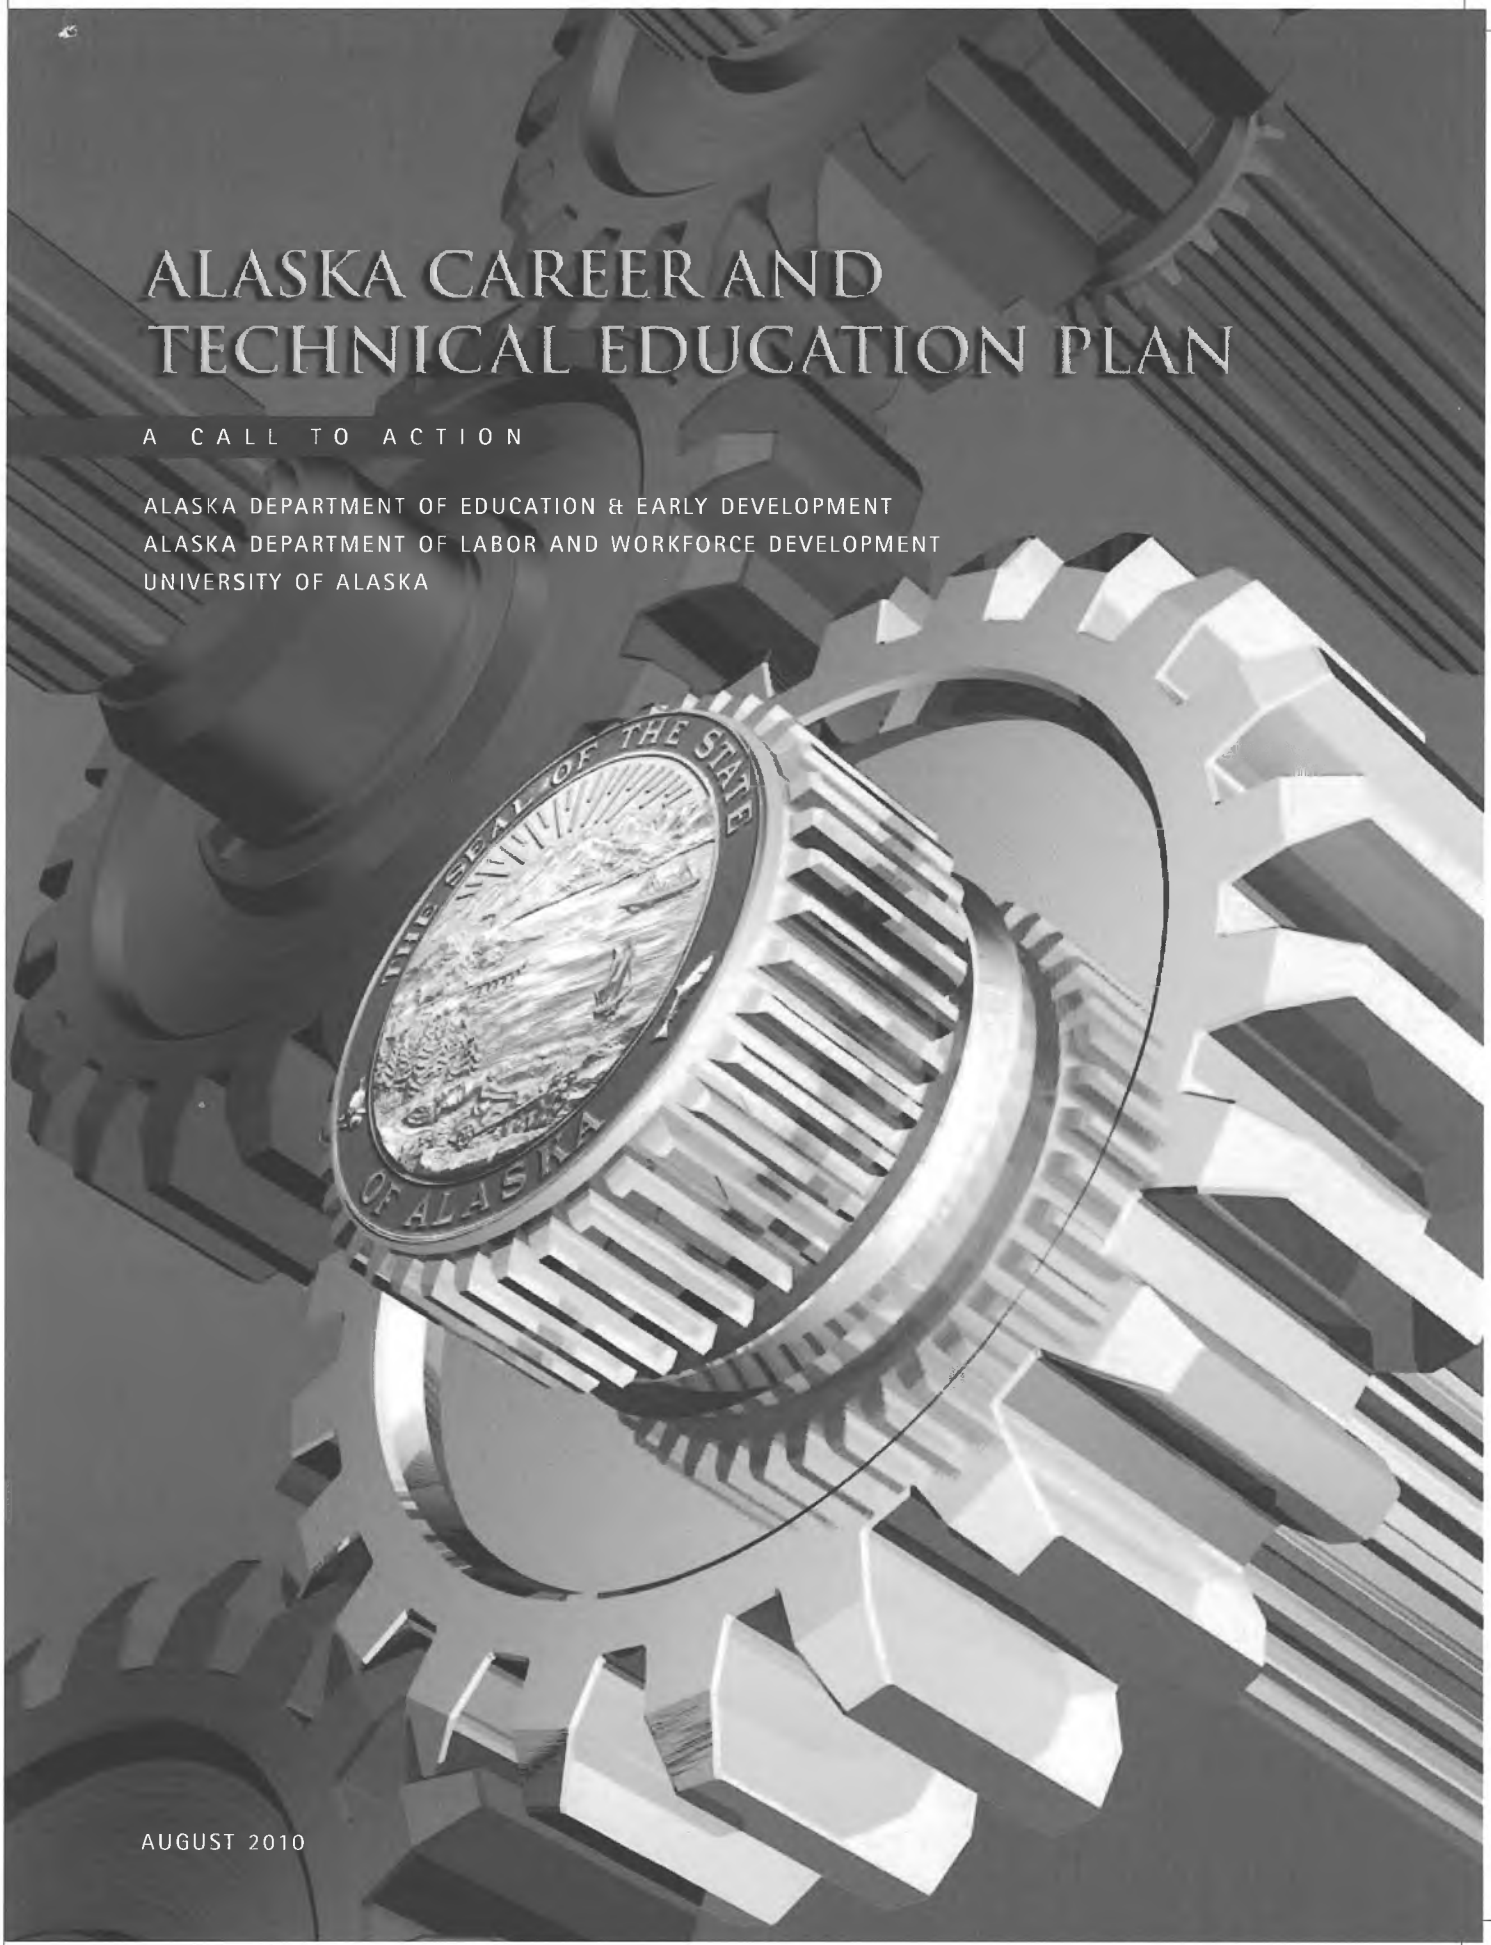
Signed this 10th day of December, 2010.

Dale Kruger, Chair
Alaska Process Industry Careers Consortium (APICC)

Distribution: APICC Board of Directors, Alaska Commissioner of Education and Early Development, Alaska Commissioner of Labor and Workforce Development, Alaska Legislature, Alaska Governor

Please find enclosed a resolution From the Alaska Process Industry Careers Consortium (APICC) Board of Directors supporting the ***Alaska Career and Technical Education Plan.***

- APICC has an eleven year history as Alaska's coalition of process industries (Oil and Gas), assuring appropriate standards based training and education opportunities exist to meet process industry's employment needs (e.g. University of Alaska Process Technology Degree)
- APICC works with Alaska's Oil and Gas industry to maintain a Priority Occupations Report, and is planning the development of a state-wide oil and gas industry workforce development plan.
- APICC represents Alaska's oil and gas industries at career events statewide and through hands-on, site-based, career exploratory activities.
- APICC collaborates with the Alaska Department of Education and Early Development, and the Alaska Department of Labor and Workforce Development, the University of Alaska, Alaska's public schools, and statewide educational institutions to provide guidance along career pathways in Alaska' process industries; including Youth Employability Skills, Teacher Industry Externships, Mobile career activities, and secondary engineering academies.
- APICC manages the North Slope Training Cooperative (NSTC). The NSTC is a collaborative effort between Alaska's oil and gas operators, along with their alliance of contractor companies, developing and maintaining high quality, standardized health, safety and environmental training programs and instruction for the operator employees and contractor workforce.



ALASKA CAREER AND TECHNICAL EDUCATION PLAN

A CALL TO ACTION

ALASKA DEPARTMENT OF EDUCATION & EARLY DEVELOPMENT
ALASKA DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT
UNIVERSITY OF ALASKA

AUGUST 2010

ALASKA DEPARTMENT OF EDUCATION & EARLY DEVELOPMENT

ALASKA DEPARTMENT OF LABOR & WORKFORCE DEVELOPMENT

UNIVERSITY of ALASKA
Many Traditions One Alaska

July 16, 2010

Dear Alaskans:

To expand and grow in the 21st Century, Alaska's economy needs an up-to-date workforce, which in turn requires a world-class education system.

The Department of Education and Early Development, the Department of Labor and Workforce Development and the University of Alaska are pleased to present the Alaska Career and Technical Education Plan. This plan outlines a comprehensive, integrated career and technical education system for Alaska that aligns training programs and coordinates delivery to prepare our citizens – youth and adults – for Alaska careers.

This plan is a living document that will not sit on the shelf. It invites coordinated and focused actions from all stakeholders. We encourage everyones' involvement in the implementation of this plan.

We are committed to working together in the truest sense of partnership. Our citizens and state will reap the benefits of our work. We invite you to join us in this quest. The action starts now.

Sincerely,

Larry LeDoux
Commissioner
Department of Education
& Early Development

Clark Bishop
Commissioner
Department of Labor
and Workforce Development

I. EXECUTIVE SUMMARY

Two forces have merged to focus attention on the need for a new, more effective career and technical education system for Alaska. The state has pledged to create world-class schools that prepare graduates for careers—careers that may begin immediately after high school graduation or may require additional education and training at the postsecondary level.

Comprehensive in-state workforce development plans for the proposed gas pipeline and the health and construction industries have raised awareness that the state cannot meet its current and future workforce demands without effectively preparing and transitioning young Alaskans from school into the world of work.

The leadership of the Departments of Education & Early Development (EED) and Labor and Workforce Development (DOLWD) recognized that addressing both the educational needs of students and the workforce needs of the state requires a cooperative planning effort. The Alaska Career and Technical Education (CTE) Plan is the result of this effort, and builds on the *Alaska Gasline Inducement Act Training Strategic Plan* endorsed by the Alaska Workforce Investment Board (AWIB) in 2008 and the *Alaska Education Plan* adopted by the State Board of Education & Early Development in 2009.

Work on writing the CTE plan began in January 2010, and involved a broad cross-section of policy makers, educators, employers, state agencies, training institutions and parent representatives. EED, DOLWD and University of Alaska (UA) staff refined the details of the planned strategies and timeline. The draft plan was posted for public comment via links on the EED CTE and the AWIB CTE websites. EED, DOLWD and UA staff presented the draft plan for comment at a variety of meetings and forums during spring 2010.

This CTE plan addresses the individual need for career preparedness as well as the broader social need for a training and education system that is efficient, effective, and coordinated with regional and state current and future workforce needs.

At the level of the individual student, the CTE plan incorporates several guiding principles. It seeks to develop a CTE system for Alaskan learners that is inclusive, comprehensive and accessible.

Inclusive: The plan assists all students, regardless of their career plans and goals, in meeting many of the graduation outcomes identified for world-class students in the *Alaska Education Plan:* critical thinking, problem solving, responsibility, respect for others, technology use, commitment to quality work, decision-making and ability to collaborate. It establishes personal learning and career plans for all students, beginning in grade 6 and extending through adulthood. A career plan will provide a roadmap to a student's future that allows for exploration, investigation and choice.

Comprehensive: The CTE plan also brings together in a comprehensive system the academic and technical preparation that Alaskan students need to meet the challenges of the global workplace.

Accessible: The plan addresses the need for individuals to obtain technical and professional skills specific to the career of their choice. All K-12 students should be able to access a basic level of technical skill development while still in high school through on-site instruction, distance delivered coursework or other mechanisms. However, the plan also recognizes that gaining higher skill levels may require at least temporary relocation to a central location.

At the system level, the CTE Plan strategies will require coordination, cooperation and collaboration.

Coordination: An effective CTE system requires coordination of public policy among responsible agencies to eliminate regulatory, procedural and fiscal barriers to smooth transitions between educational levels and from school to work. The CTE planning effort has engaged EED, DOLWD, UA and other stakeholder groups in efforts to identify and seek means of strengthening this coordination.

Cooperation: The CTE system envisioned by the plan requires cooperation among education and training providers in the state including K-12 school districts, University of Alaska campuses, regional training centers, joint apprenticeship training centers and other training partners. Cooperative curriculum planning and program development assures the broadest possible range of training, avoids unnecessary duplication of programs and allows the most efficient use of limited resources.

Collaboration: Providing excellent CTE programs is a collaborative effort. Although schools and training institutions have a primary role in delivering programs, the involvement of parents, local and regional employers, Alaska Native and statewide corporations, labor unions, employment counselors and a host of others is essential if these programs are to yield quality workers. These stakeholders are critical in setting state priorities for CTE program development and delivery.

The plan recognizes the importance of involving parents and local employers in students' personal learning and career planning. Gathering meaningful input from all of these groups in the evaluation of current CTE efforts can lead to program improvement.

For each strategy, the plan identifies agencies, organizations and groups that have a role in implementation. The first entity listed under "Responsible Parties" is the lead agency that will be responsible for inviting other partners to assist in carrying out the identified action steps.

The plan examines some of the conditions that must be in place to deliver effective career training, such as highly qualified CTE instructors and safe facilities with up-to-date equipment and materials. These must be supported by a stable and sufficient funding stream that includes local, state, federal and industry sources. Available funding, human and fiscal resources must be directed to the highest priority. To help assure this, the plan calls for establishing a capital and operational funding request process that takes into account state and local economic development needs, industry standards and CTE program evaluation criteria. Current and potential funding sources have been identified to support the action steps for each strategy.

The Commissioners of Education and of Labor have committed staff and resources to commence plan activities. The Alaska Workforce Investment Board endorsed the plan in May 2010, and resolved that AWIB "supports the Alaska CTE plan and the cooperative efforts of the Departments of Education & Early Development and of Labor and Workforce Development to implement the strategies contained in the plan"[1] The State Board of Education approved the plan at its June 10, 2010, meeting. Appendix A contains the Board endorsements and letters of support from the two Commissioners.

The plan consists of the following strategies and actions:

Strategy 1.0: Make transitions planned and accountable for both successful student progress and systemic cooperation.

This strategy can be implemented by:

1.1 Ensuring that every student has a personal learning and career plan (PLCP).

1.2 Developing an awareness campaign about the use of PLCPs to include parents, industry and adult job-seekers.

1.3 Coordinating program development and delivery among training programs to reduce duplication of effort and the need for remediation.

1.4 Developing data-sharing and other processes that provide information on student progress from one educational level to the next and from school to career.

[1] Alaska Workforce Investment Board, Resolution Number 10-03, Resolution in Support of the Alaska Career and Technical Education (CTE) Plan, May 3, 2010

Strategy 2.0: Align curricula at all training institutions to meet current industry standards – including academic, professional, and technical skills – from elementary through secondary to postsecondary and professional development levels.

This strategy can be implemented by:

2.1 Identifying current CTE programs and curricula and making the information publicly accessible.

2.2 Reviewing and updating the state's employability standards and developing appropriate Grade Level Expectations (GLEs) for achieving these skills.

2.3 Identifying industry standards for statewide priority industries and incorporating the identified knowledge and skills into aligned CTE curricula at elementary, secondary, and postsecondary levels.

2.4 Cataloging and disseminating practices and supporting materials for integrating academic GLEs into CTE programs and career applications into academic programs.

2.5 Aligning CTE Programs of Study that connect secondary academic and CTE courses with recognized industry and postsecondary standards and program content.

Strategy 3.0: Identify and promote career and technical education delivery models that ensure that all Alaskans have the opportunity to attain the knowledge and skills needed for further training and careers.

This strategy can be implemented by:

3.1 Inventorying and disseminating information about career and technical education delivery models at the K-12, postsecondary, and adult levels.

3.2 Developing criteria to evaluate career and technical education delivery models.

3.3 Identifying key strategies and effective delivery models to successfully teach and assess employability skills within schools, postsecondary institutions and other training providers.

3.4 Instituting systems to ensure all students have access to quality CTE programs.

3.5 Developing strategies for using personal learning and career plans to drive scheduling, curriculum and delivery models.

3.6 Promoting and celebrating effective CTE programs and practices.

Strategy 4.0: Recruit, develop, support, and retain high-quality CTE teachers and faculty.

This strategy can be implemented by:

4.1 Developing strategies to educate, recruit, and retain quality CTE teachers, faculty, counselors, and advisors.

4.2 Expanding strategies for effective professional development and mentoring.

4.3 Improving and streamlining credentialing processes for CTE instructors.

4.4 Expanding CTE leadership opportunities.

Strategy 5.0: Maximize the use of public facilities for training.

This strategy can be implemented by:

5.1 Inventorying the public facilities and equipment that are available and disseminating the inventory to training providers, industry and the general public.

5.2 Establishing a list of basic facility and equipment standards for priority CTE programs.

5.3 Identifying resources needed to bring public facilities and equipment for statewide priority programs up to standards.

5.4 Developing public policies and incentives that maximize and promote partnerships for the use of public facilities for training throughout the year.

5.5 Establishing capital funding strategies to renovate CTE facilities.

Strategy 6.0: Establish and maintain sustainable funding mechanisms for a successful CTE system for youth and adults.

This strategy can be implemented by:

6.1 Establishing criteria for prioritizing CTE program requests for state funding.

6.2 Encouraging CTE providers to take advantage of the State of Alaska corporate tax credit for contributions to qualified training programs.

6.3 Developing a strategy for State of Alaska CTE funding that leverages local, federal and private resources.

As a first step in translating the plan into reality, EED and DOLWD, together with the University of Alaska, have developed a detailed implementation timeline through FY2012. The plan and timeline will be revisited and updated as results of plan activities are evaluated and conditions change.

II. ALASKA CAREER AND TECHNICAL EDUCATION COMMITTEE

Participants

Name	Position and Organization
Mike Andrews	Executive Director, Alaska Works Partnership, Inc.
Representative Alan Austerman	Alaska House of Representatives
Greg Cashen	Executive Director, Alaska Workforce Investment Board, Department of Labor and Workforce Development
Esther Cox	Chair, State Board of Education & Early Development
Cynthia Curran	Director, Teaching and Learning Support, Departmentof Education & Early Development
Ray DePriest	CTE Director, Mat-Su Borough School District
Jim Hickerson	Superintendent, Bering Strait School District
Senator Charlie Huggins	Alaska State Senate
Jim Lynch	Chair, Alaska Workforce Investment Board
Paula Pawlowski	Parental Engagement Program Director, Alaska PTA
Dawn Salesky	Vice-President of Education Programs, Kawerak, Inc.

III. INTRODUCTION

The Alaska Skills Gap

Every year, around 8,000 Alaskan students graduate from high school. Several thousand more exit school without securing a high school diploma. Of the graduates, less than half transition into college and only 18.5 percent will still be in school by age 19[2]. Although some high school graduates will go on to non-collegiate postsecondary training, anecdotal evidence suggests that the number is not large. Alaska ranks fifth in the nation for teens not in school and not working.

The current educational system is best described as a "leaky pipeline," losing a significant portion of its students without imparting the skills necessary for successful lives and careers. The above figures suggest that many students do not have a clear idea about what they want to do in the future or cannot see a connection between school and their adult life. In addition, many students and adults who do know what career they want to pursue may not always understand how to prepare for the next step.

Alaskans must make successful transitions from school and training to employment. Alaska labor estimates call for the addition of 43,750 jobs in the decade from 2006 to 2016, an overall increase of 13.9%. Almost twenty percent (19.6) of current jobs are held by non-residents. Almost fifteen percent (14.8) of all positions today are occupied by workers 55 years of age or older. Filling new positions and replacing non-resident or older workers require developing effective and less porous pipelines from the earliest years through postsecondary training and into careers.

The Departments of Education & Early Development (EED) and of Labor and Workforce Development (DOLWD) have begun to tackle the challenges of the current situation in a series of planning efforts. The reform effort outlined in the *Alaska Education Plan* adopted by the State Board of Education & Early Development in 2009 commits Alaska to world-class schools from which "All students will graduate prepared for careers or postsecondary education."[3]

The *Alaska Gasline Inducement Act Training Strategic Plan*, endorsed by the Alaska Workforce Investment Board in 2008, calls for a "comprehensive, integrated Career and Technical Education system for Alaska that aligns training institutions and coordinated program delivery."[4] Other industry planning efforts—such as health and construction—have echoed that charge.

The Alaska Career and Technical Education (CTE) Plan is a continuation of the education reform effort and a response to industry demands. The plan envisions a CTE system that is a radical departure from the past from the point of view of the individual student and the system as a whole.

[2] Alaska Commission on Postsecondary Education, Making Alaska More Competitive by Preparing Citizens for College and Career, April, 2008, p. 1
[3] Alaska Department of Education & Early Development, Alaska Education Plan, adopted by the Board of Education & Early Development, March 2009, p. 7
[4] Alaska Department of Labor and Workforce Development, AGIA Training Strategic Plan: A Call to Action, updated and reprinted August 2009, p. 17

Training to Enhance the Alaska Workforce

The CTE system envisioned in this plan is inclusive for all Alaskans. Unlike many earlier vocational education programs, the new CTE system is not a separate "track" limited to students without postsecondary aspirations. Rather, the vision is for all students, whatever their current abilities or age, to develop personal learning and career plans that allow for exploration, investigation and choices and that provide a pathway to a career. Career planning is extended to adult learners and to those already in the workforce who need training to maintain or upgrade their jobs.

The CTE system described in the plan ensures that all students—whatever their ultimate career goals—have the employability skills that are necessary for success in life as well as employment. The graduation outcomes identified for world-class students in the Alaska Education Plan identify many of these skills: critical thinking, problem solving, responsibility, respect for others, technology use, commitment to quality work, decision-making and the ability to collaborate.

The plan encourages a high level of academic achievement on the part of all students in language arts, math and science. Although some entry-level employment can be accessed with limited skills, moving ahead in any industry requires good communication and computational ability. Trades and occupations that provide long-term employment opportunities and living wages will generally require the application of higher-level math skills and scientific concepts to workforce situations. CTE can assist students in gaining this knowledge through integration of applied academics in technical coursework. Regular academic courses can also be enriched by using real-life examples taken from the world of work to teach abstract concepts.

In addition to the academic and employability skills that are expected of all students who graduate from high school, Alaskans need to obtain the technical and/or professional skills required for entry-level employment in their preferred career. For some, acquiring these skills will begin in high school. The CTE plan calls for accessibility to career and technical education in local communities through on-site classroom instruction, distance delivery, packaged curriculum or other methods. Education and training opportunities close to home will increase as more certificate and associate degree programs are developed for distance delivery by postsecondary training institutions. Access to a higher level of skill training may require at least temporary relocation to an intensive training experience such as a summer construction or health academy; a pre-apprenticeship program at a regional training center such as NACTEC in Nome; a certificate or associate degree at a community UA campus; or a four-year degree program at an urban site. As students prepare their personal learning and career plans, it is essential that they have accurate information about where appropriate training and education programs are located and the full costs of such programs, including travel and housing where needed.

Creating a CTE System That Meets Individual and State Needs

The current plan differs from earlier efforts in looking at the CTE system as a whole, from early learning through postsecondary education and training. In the past, much of the planning focused only on one educational level and was in response to federal funding requirements.

One critical strategy in the CTE system is the implementation of personal learning and career plans that will allow students to navigate from one educational level to another as they pursue their aspirations. Therefore, an effective CTE system requires coordination of public policy among responsible agencies to overcome regulatory, procedural and fiscal barriers to smooth transitions between educational levels and from school to work. The CTE planning effort has engaged EED, DOLWD, the University of Alaska, other training and workforce development partners, parent teacher organizations, industry and labor.

Partner Collaboration and Engagement of Stakeholders

The CTE system envisioned by the plan requires participation among education and training providers from all areas of the state. The plan places special emphasis on student transitions from one level of education and training to another, and to the workplace. Programs of study based on career pathways and developed jointly by secondary and postsecondary CTE faculty can smooth transitions, reduce the need for remediation and eliminate unnecessary redundancy in required coursework. An equally important strategy addresses recruitment, training, and retaining the secondary and postsecondary faculty needed to deliver articulated CTE curricula.

Creating the system called for in the plan requires facilities and equipment that are safe and current with industry practices; these also can be expensive to acquire and maintain. The plan calls for a fresh look at how current CTE resources are allocated and utilized. Sharper evaluation of CTE programs in terms of student outcomes, industry standards and contribution to regional/state economic development can help direct limited resources to areas of highest need and greatest return on investment. Rational resource allocation requires close coordination among training partners at all levels to assure the broadest possible range of training while avoiding unnecessary duplication of programs. Sharing facilities and equipment among programs stretches available resources to serve greater numbers of students.

Cooperation also extends to sharing data about student outcomes and progress so that program planners, policy makers and funders can evaluate the success of current efforts and plan for program improvement where called for.

Delivering on the promise of the CTE plan requires an active partnership on the state level between the Departments of Education & Early Development and Labor and Workforce Development—in particular the State Board of Education & Early Development and the Alaska Workforce Investment Board—for aligning policies, increasing availability of qualified CTE teachers, identifying priority occupational areas and securing and administering funds to support plan activities.

Although **schools and training institutions** have a primary role in delivering programs, the involvement of parents, local and regional employers, Alaska Native and statewide corporations, labor unions, employment counselors and a host of others is essential if these programs are to yield quality workers. The CTE plan embraces and extends the goal in the Alaska Education Plan that "Schools will form strong partnerships with families and communities and will respect and embrace local cultures."[9]

[9]EED, Alaska Education Plan, p. 9

Parents are key in helping their students make realistic plans for the future and for following through with these plans. Parental participation and communication are powerful forces for ensuring that students excel academically, complete high school and successfully transition to the next level of education and employment.

Industry plays a significant role in working with state and local agencies to identify standards for CTE programs and to assist with evaluating program success in meeting these standards. Industry can provide sites for career exploration, technical training and instructor professional development as well as funding.

Finally, **Alaskans** in all geographic areas and from all walks of life must understand the importance of quality CTE not only for the individual but also for the economic well-being of their home community, their region and the state as a whole. The general public deserves accurate information about the CTE system, its outcomes and its costs in order to make informed decisions about public support for programs and facilities.

Stakeholders have been identified for each strategy in this plan. The first entity appearing under "Responsible Parties" is identified as the agency that will take the lead in securing the involvement of all listed partners in carrying out the identified action steps.

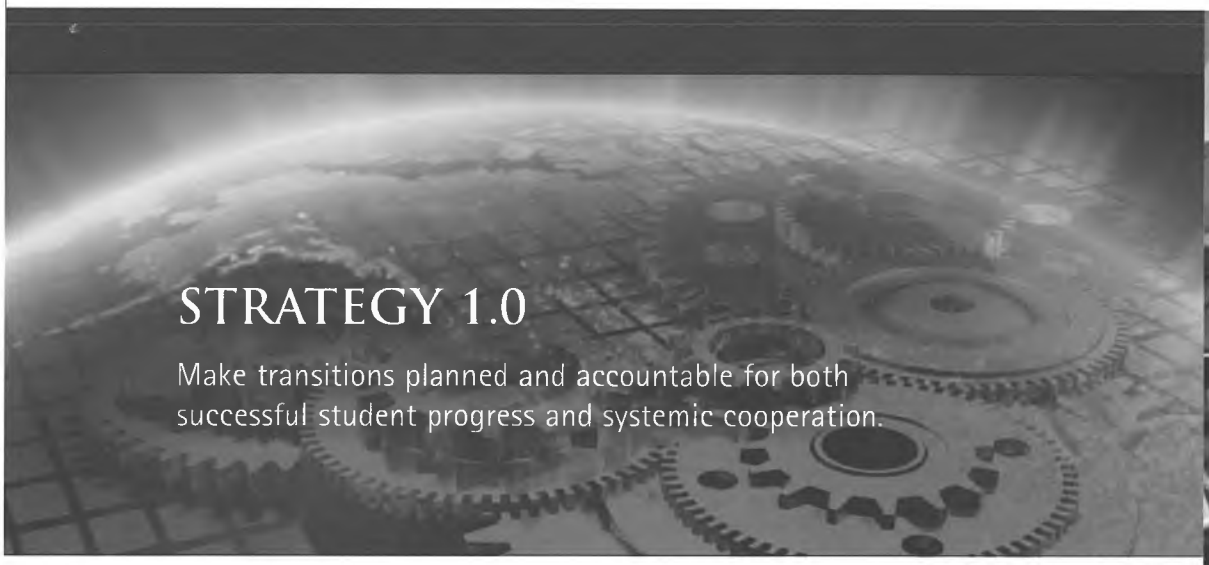
Long Term Plan and Phases

The following plan is broad in scope and will take some time to fully implement. However, EED, DOLWD and UA staff developed an accompanying timeline detailing activities to be accomplished through FY2012. Short-term emphasis is being placed on developing and implementing student personal learning and career plans; aligning curriculum between secondary and postsecondary programs using career pathways and programs of study; establishing standards for CTE programs; and developing models for teaching employability skills. These near-term emphases mirror the strategies outlined in the Gasline Training Plan and other workforce plans.

Possible funding sources have been identified for each strategy. In some cases, these sources already exist and can be dedicated or redirected to support the actions required to implement the strategy. In other cases, new or increased funding will be necessary.

As the events of the past several years have made abundantly clear, the global economy is increasingly interactive and fluid. To be competitive in the 21st century workplace, Alaska must have a career and technical education system that adapts to emerging demands and opportunities, adequately prepares its residents for success in their chosen careers and provides access to training across scattered populations with vast differences in regional needs and capacities. The state will be well on its way in creating a career and technical education system to the benefit of all Alaskans.

IV. STRATEGIES



STRATEGY 1.0

Make transitions planned and accountable for both successful student progress and systemic cooperation.

Rationale

Smooth transitions from secondary to postsecondary education and from school to work are essential for student success. Alaska currently does not do a good job of "handing students off" from one program or level to another. Stories abound of students who are required to re-take course content completed elsewhere or who must enroll in remedial courses because they did not possess the necessary academic skills. In addition, access to important life-long learning is not necessarily linear as changing economic conditions require that workers step back into school or training to maintain and upgrade their employment.

Informed career planning for every Alaskan student--from middle school to adult learner--can make these transitions more seamless at the individual level. Systems themselves must also change to become more collaborative and student-centered in their approach. Program and policy development that supports a more transparent and fluid CTE system will allow Alaskans and Alaska to meet the demands of the 21st century global economy.

This strategy can be implemented by:

1.1 Ensuring that every student has a personal learning and career plan (PLCP).

a) Use plain language and simple processes to make personal plans user-friendly.

b) Develop model components of the PLCP that students may use to plan their academic, technical and experiential learning leading to a career, including utilization of National Career Readiness Certification (WorkKeys™) information, Registered Apprenticeship, and Alaska Tech Prep.

c) Develop model processes to implement PLCPs for all Alaskan students that can be transferred from one school, district or training facility to another.

d) Develop accountability measures for PLCPs and measure effectiveness.

e) Provide related professional development for teachers, faculty, advisors and counselors on the preparation and use of PLCPs.

f) Implement PLCPs at all levels, from middle school to adult training.

Responsible Parties*: EED, DOLWD, UA, Alaska Commission on Postsecondary Education (ACPE), Alaska PTA (AKPTA), DOLWD Office of Apprenticeship, Alaska Tech Prep Consortium

Funding**: State agency general fund, Carl Perkins Career and Technical Education Act (Perkins) and Workforce Investment Act (WIA) federal funds

Evaluation: By 2012, all school districts and publicly-funded training programs will have implemented personal learning and career plans for students beginning in grade 6.

1.2 Developing an awareness campaign about the use of PLCPs to include parents, industry and adult job-seekers.

a) Work with EED and DOLWD public information personnel to develop an advocacy strategy for Alaska's students.

b) Involve parents, employers, students, counselors, teachers/faculty and others to ensure results will inspire, engage and involve.

c) Request the Governor's assistance in emphasizing the importance of coordination and seamless transitions.

Responsible Parties: EED, DOLWD, UA, AKPTA, ACPE

Funding: State agency general fund

Evaluation: By 2012, an awareness campaign targeted at various audiences is in place.

1.3 Coordinating program development and delivery among training programs to reduce duplication of effort and the need for remediation

a) Engage decision-makers in identifying barriers that hinder seamless/efficient student transitions and in exploring solutions to these barriers.

b) Identify and remove barriers for middle school to high school and high school to postsecondary/advanced training programs for students and adults to be successful at each level.

c) Develop expectations and recommended practices for ensuring program development processes include CTE and academic discipline faculty/teachers across institutions and between departments within institutions.

d) Develop model program(s) of study sequences that identify middle school, secondary, postsecondary and apprenticeship program requirements to achieve industry-valued credentials, certificates and degrees.

e) Establish criteria for each course to ensure credit acceptance by a student's next level of matriculation without the need for remediation.

f) Maximize Alaska Tech Prep and other dual-credit opportunities between educational and training levels to ease transition challenges and increase student opportunities.

*The first entity listed is identified as the lead agency, responsible for inviting the involvement of the other partners in implementing the action steps.
**Currently available and potential sources of funding for identified actions.

Responsible parties: EED, DOLWD, UA, school district personnel, Alaska Tech Prep Consortium, Office of Apprenticeship

Funding: State agency and UA general fund, Alaska School Foundation Program, Carl Perkins Career and Technical Education Improvement Act of 2006 federal funds

Evaluation: By 2012, programs of study linking secondary and postsecondary academic and technical coursework are developed for all career clusters.

1.4 Developing data-sharing and other processes that provide information on student progress from one educational level to the next and from school to career.

a) Align existing student and workforce data systems to follow student progress throughout the system from school to career.

b) Establish agreements to facilitate exchanges of student data that allow evaluation of program results.

c) Analyze and publish data that informs evaluation of CTE programs.

Responsible parties: EED Assessment, DOLWD Research and Analysis, UA Institutional Research.

Funding: State agency and UA general fund, Perkins federal funds

Evaluation: By 2011, a comprehensive data collection/exchange system is in place that provides student progress, success and placement information to funding agencies, program planners and policy makers.

STRATEGY 2.0

Align curricula at all training institutions to meet current industry standards – including academic, professional, and technical skills - from elementary through secondary to postsecondary and professional development levels.

Rationale

Recent research has confirmed that the skills necessary for success in the new workplace are much the same as those required for college success: critical thinking, high levels of communication and computational skills, problem solving, teamwork, and ethics. Education and training programs that prepare Alaskans to be successful must incorporate these skills as well as the academic and technical knowledge required for a specific career pathway.

Effective CTE is delivered through comprehensive programs of study that start with exploration in the elementary grades, progress through a postsecondary sequence, incorporate industry and business standards, and are validated using benchmarks, assessments and a body of evidence to demonstrate that all Alaskans are prepared to be successful in their chosen career.

This strategy can be implemented by:

2.1 Identifying current CTE programs and curricula and making the information publicly accessible.

a) Inventory current CTE courses and programs of study with respect to standards, curriculum, and sequencing.

b) Identify program gaps based on statewide priority areas.

c) Develop a searchable website to house existing information and related resources.

Responsible parties*: EED CTE and IT staff, DOLWD, UA, ACPE

Funding**: State agency and UA general fund, Perkins and Workforce Investment Act of 1998 federal funds

Evaluation: By 2011, an inventory and detailed gap analysis are complete and available in statewide priority areas.

*The first entity listed is identified as the lead agency, responsible for inviting the involvement of the other partners in implementing the action steps.

**Currently available and potential sources of funding for identified actions.

2.2 Reviewing and updating the state's employability standards and developing appropriate Grade Level Expectations (GLEs) for achieving these skills.

a) Review Alaska's employability standards and recommend revisions if necessary.

b) Develop appropriate performance standards for all age levels, including K-12 Grade Level Expectations (GLEs).

c) Review what Alaska districts and training institutions are already doing and research what other states are doing.

d) Identify how students demonstrate mastery of these skills.

Responsible parties: EED, AWIB, Regional Training Centers (RTCs), UA, DOLWD

Funding: State agency general fund, Perkins and WIA federal funds, industry

Evaluation: By 2011, models are in place for the effective teaching, learning and evaluation of a commonly agreed-upon set of employability skills.

2.3 Identifying industry standards for statewide priority industries and incorporating the identified knowledge and skills into aligned CTE curricula at elementary, secondary, and postsecondary levels.

a) Identify nationally-recognized standards for state level priorities, where available.

b) Use business/industry/education consortia to develop standards if national models are not available.

c) Utilize National Career Readiness Certification (WorkKeys™) information.

d) Require all state-funded training to be based on appropriate industry standards, embedded employability skills in the curriculum, and ability of students to attain the appropriate level of employment

Responsible parties: DOLWD, EED, industry, UA, RTCs

Funding: State agency general fund, industry, Perkins and WIA federal funds,

Evaluation: By 2012, all state-funded training programs are based on industry standards and lead to appropriate industry certification or recognized skill level.

2.4 Cataloging and disseminating practices and supporting materials for integrating academic GLEs into CTE programs and career applications into academic programs.

a) Show CTE alignment with GLEs in core academic content areas using crosswalks.

b) Develop model agreements for Alaska Tech Prep and other academic credit agreements for CTE content courses with supporting materials.

c) Research other state/organization efforts to find examples of integration strategies, materials and activities for each core academic area.

d) Work with EED's new content specialists and State System of Support (SSOS) coaches to understand and contribute to integration of CTE and academics.

Responsible parties: EED, school district personnel, UA faculty, Alaska Tech Prep Consortium, DOLWD Job Center employment counselors

Funding: Perkins federal funds, Alaska school foundation program, state agency and UA general fund

Evaluation: By 2011, strategies for effective integration of academics into CTE programs and career applications into academic courses have been identified and K-12 and postsecondary faculty are trained in their use.

2.5 Aligning CTE Programs of Study that connect secondary academic and CTE courses with recognized industry and postsecondary standards and program content.

a) Convene teachers, faculty and industry advisors to highlight essential components of programs of study, starting with statewide priority areas.

b) Investigate the viability of regional or state advisory committees at the program or trades level.

c) Identify needed support for promoting effective practices, materials, and key resources.

d) Document and publish program content for teachers/faculty.

Responsible parties: EED, AWIB, DOLWD, UA, RTCs, industry, Alaska Tech Prep Consortium, DOLWD Office of Apprenticeship

Funding: Perkins and WIA federal funds, state agency and UA general fund, industry

Evaluation: By 2012, career pathways from exploration to the highest educational level are developed in all career clusters and widely disseminated to secondary, postsecondary and adult learners.

STRATEGY 3.0

Identify and promote career and technical education delivery models that ensure that all Alaskans have the opportunity to attain the knowledge and skills needed for further training and careers.

Rationale

A comprehensive educational system provides quality academic, career and technical education available to all citizens. Because of Alaska's dispersed population and diversity of regional needs and resources, multiple delivery systems must be used to assure both access to and the quality of academic and technical programs. Alaska CTE programs need to take into account the balance between local/regional and statewide needs while avoiding expensive and unnecessary duplication of services. Although all Alaskans should be able to obtain at least a basic level of training at or near home through a combination of on-site and distance delivery, resource limitations may require at least temporary relocation to acquire higher skill levels.

This strategy can be implemented by:

3.1 Inventorying and disseminating information about career and technical education delivery models at the K-12, postsecondary, and adult levels.

a) Create and administer a survey to identify the nature and scope of existing CTE programs at all educational levels.

b) Identify and analyze how academic GLEs are used in CTE programs.

c) Develop Program of Excellence criteria for components necessary for quality program delivery.

d) Collect and analyze data against the Program of Excellence criteria and create an inventory of delivery models.

e) Disseminate information on identified quality delivery models; for example, partnerships, simulators or networks, apprenticeships, Alaska Tech Prep, shared facilities, etc.

Responsible parties*: EED, DOLWD, UA

Funding**: State agency general fund, Perkins and WIA federal funds

Evaluation: By 2011, an inventory of state CTE programs is maintained and is used in program planning.

3.2 Developing criteria to evaluate career and technical education delivery models.

a) Identify and review models used elsewhere to evaluate CTE programs for effectiveness.

b) Develop evaluation criteria for Alaska CTE programs, including student outcomes, industry standards, partnerships, return on investment and alignment with regional/state current employment conditions and economic development plans.

*The first entity listed is identified as the lead agency, responsible for inviting the involvement of the other partners in implementing the action steps.

**Currently available and potential sources of funding for identified actions.

c) Review evaluation criteria with Alaska CTE stakeholders.

d) Create standardized templates for Alaska CTE program evaluation.

e) Evaluate models identified in the inventory created in 3.1.

f) Publish the results of CTE program evaluations annually.

Responsible parties: EED, DOLWD, AWIB, UA

Funding: State agency general fund, Perkins and WIA federal funds

Evaluation: By 2012, CTE program evaluation criteria are in place and being used to inform program improvement and resource allocation decisions.

3.3 Identifying key strategies and effective delivery models to successfully teach and assess employability skills within schools, postsecondary institutions and other training providers.

a) Draft and share models for effective student practice and demonstration of these essential skills; for example,

- Promote the use of Youth Employability Skills (YES) rubric, and other "scoring guides" for coaches, employers, classroom teachers, service learning sponsors.
- Partner with Alaska School Activities Association (ASAA) to address and document employability skills in all student activities.
- Utilize, strengthen and fund the career and technical student organizations (CTSOs) to build and assess employability skills.
- Investigate an online assessment instrument for documenting each student's attainment of employability skills.

b) Identify and support sites that will pilot innovative portfolio assessments of employability skills acquisition via a variety of student activities.

c) Evaluate and publicize successful models and support schools and institutions in incorporating employability skills into their CTE programs.

d) Develop a plan for statewide implementation of employability standards in all programs.

Responsible parties: EED, DOLWD, school districts, UA, RTCs, DOLWD Office of Apprenticeship, ASAA, CTSOs

Funding: State agency and UA general fund, Perkins and WIA federal funds, Alaska school foundation program, industry

Evaluation: By 2012, all CTE programs include strategies to teach and assess employability skills.

3.4 Instituting systems to ensure all students have access to quality CTE programs.

a) Identify appropriate strategies and services for all students to master their CTE program standards.

- Provide assistive technology and accommodations as necessary.
- Incorporate career information into academic courses.

b) Develop useful strategies and services for technical assistance to improve local CTE program delivery; for example, develop integration strategies, materials, instructional kits and packaged lesson plans for district use.

c) Implement effective distance delivery strategies to use with existing delivery systems.

d) Expand the use of skill-building programs and summer exploratory programs, such as the UA ANSEP project, summer exploratory camps and the construction academies.

e) Develop guidelines for effective work-based learning experiences.

f) Create/expand mechanisms to assist students who must relocate to access training.

g) Expand the availability and use of CTSO programs in all CTE programs.

Responsible parties: EED, virtual schools staff, ACPE, UA, RTCs, industry, AKPTA

Funding: State general funds, Alaska Student Loans, industry

Evaluation: By 2012, a basic level of CTE is available in all secondary schools in Alaska. Distance delivery, UA community campuses and RTCs provide certificate, credential, licensure and degree-level training in all regions of the state. Specialized training is available in one or more centers of excellence and includes accommodation for temporary relocation of students from around Alaska.

3.5 Developing strategies for using personal learning and career plans to drive scheduling, curriculum and delivery models.

a) Pilot use of PLCPs within several of the delivery models identified in the CTE inventory.

b) Encourage the use of non-traditional school calendars to deliver CTE courses and programs.

c) Identify successes and challenges in implementing models.

d) Develop and disseminate materials and training on successful models.

Responsible parties: EED, school districts, RTCs, UA

Funding: State agency and UA general funds, Technical and Vocational Education Program (TVEP) state funding, Perkins and WIA federal funds

Evaluation: By 2011, CTE programs reflect information from local students' PLCPs in scheduling, curriculum and delivery.

3.6 Promoting and celebrating effective CTE programs and practices.

a) Advocate for a CTE strand in the Alaska performance scholarship program to be recognized at the same level of support as other programs.

b) Publish data and anecdotes that describe effective CTE programs and practices.

c) Establish recognition programs for CTE student excellence.

d) Establish a CTE honors diploma.

e) Recognize Centers of Excellence for various program areas, based on Program of Excellence criteria.

Responsible parties: AWIB, State Board of Education & Early Development, EED, DOLWD, UA, Alaska Association for Career & Technical Education (AACTE), CTSOs, AKPTA

Funding: State agency and UA general fund, Perkins and WIA federal funds, industry

Evaluation: By 2012, quality CTE programs are identified and publically recognized as models.

STRATEGY 4.0

Recruit, develop, support, and retain high-quality CTE teachers and faculty.

Rationale

Quality CTE program curriculum and delivery rely on highly skilled and qualified instructors, counselors and mentors. Due to Alaska's vast distances and remote rural communities, many CTE programs are dependent on single instructors who teach without easy access to professional development, peer review, or program support. The loss of a single CTE instructor in rural areas can cause the entire CTE program to shut down.

The current shortage of CTE teachers and faculty requires strategies to recruit CTE educators, support those who are already in place, and provide a mechanism for CTE advancement and leadership. The State Board of Education & Early Development has appointed a Teacher Quality Working Group that is charged with making recommendations for the preparation, certification and mentoring of all K-12 teachers. Close coordination between CTE administrators and this group is essential in carrying out the activities outlined below, especially with respect to CTE teacher certification.

This strategy can be implemented by:

4.1 Developing strategies to educate, recruit, and retain quality CTE teachers, faculty, counselors, and advisors.

a) Identify faculty shortages by career area at all levels of CTE instruction.

b) Identify core competencies for CTE instructors to serve as a guide in training, hiring and evaluation.

c) Develop strategies to "grow our own" teachers and faculty.

d) Improve strategies to retain current CTE teachers and faculty.

e) Promote effective strategies to attract qualified CTE teachers and faculty from elsewhere, as necessary.

Responsible parties*: EED, Alaska Teacher Placement (ATP), UA, Alaska Statewide Mentoring Project (ASMP), school districts, CTE providers , AACTE, Future Educators of Alaska (FEA)

Funding**: State agency and UA general funds, Perkins federal funds

Evaluation: By 2012, all CTE programs are delivered by highly-qualified teachers and faculty.

*The first entity listed is identified as the lead agency, responsible for inviting the involvement of the other partners in implementing the action steps.

**Currently available and potential sources of funding for identified actions.

4.2 Expanding strategies for effective professional development and mentoring.

a) Plan for both CTE and academic teachers in CTE professional development opportunities.

b) Provide training in integrating academic and CTE course content.

c) Incorporate training in career planning strategies into preparation programs for current and future teaching and counseling staff.

d) Require industry-trained teachers to attain classroom instruction, curriculum, and assessment skills.

e) Train educators in successful strategies for involving parents in the development of student career plans.

Responsible parties: EED, UA, ASMP, CTE providers, DOLWD, industry, AKPTA

Funding: State agency and UA general fund, Alaska school foundation program, Perkins federal funds, industry/education consortia

Evaluation: By 2011, quality professional development is available to CTE teachers/faculty at all levels.

4.3 Improving and streamlining credentialing processes for CTE instructors.

a) Identify appropriate industry standards for certification of CTE educators.

b) Include K-12 CTE teachers in alternate certification initiatives.

c) Expand Type M limited certificate criteria to recognize CTE qualifications for certified secondary teachers endorsed in other specialty areas.

d) Develop and require "endorsement" or "area of emphasis" in teacher training programs by industry and education.

e) Promote development of CTE teacher preparation programs in Alaska.

Responsible parties: State Board of Education & Early Development, EED's Teacher Quality Working Group, UA, industry, organized labor, school districts, DOLWD, ATP, AACTE

Funding: Alaska teacher certification fees, state agency general funds

Evaluation: By 2012, appropriate levels of certification and endorsement are available for K-12 CTE teachers.

4.4 Expanding CTE leadership opportunities.

a) Support the development of local, regional, and state CTE leadership roles.

b) Sponsor professional learning communities for professional growth and development of CTE leaders.

c) Develop and implement CTE leadership programs and courses.

Responsible parties: EED, AACTE, Alaska School Counselors Association (ASCA), school districts, UA, DOLWD, industry, ATP

Funding: Alaska school foundation program, state agency general fund, Technical and Vocational Education Program, industry/education consortia

Evaluation: By 2011, CTE leadership training is available to CTE professionals in Alaska.

[1] Alaska Workforce Investment Board, Resolution Number 10-03, Resolution in Support of the Alaska Career and Technical Education (CTE) Plan, May 3, 2010

STRATEGY 5.0

Maximize the use of public facilities for training.

Rationale

Facilities and equipment are critical to providing high-quality, relevant, and current technical training. Such facilities and equipment can be expensive to purchase or build, maintain, upgrade and repair.

The condition of CTE facilities and equipment varies widely across the state, according to anecdotal reports. Some are adequate or even state-of the art; others are out-of-date or in need of significant repair; still others have been mothballed or dismantled. Many of the existing facilities are underutilized or even completely unused for certain periods of time.

There is no current statewide inventory of such facilities, nor is there a system in place for communicating what facilities are available. Alaska needs to maximize the use of existing facilities across the state to allow more students and workers access to technical training that may not be available in their own school or region.

This strategy can be implemented by:

5.1 Inventorying the public facilities and equipment that are available and disseminating the inventory to training providers, industry and the general public.

a) Prepare and conduct a survey of public schools, postsecondary institutions, RTCs, local, state, regional or federal governmental agencies and other public entities.

b) Collate the survey results and prepare an inventory database.

c) Publicize the inventory via the Internet.

Responsible parties*: EED-Facilities, UA, school districts, RTCs, training providers, Department of Transportation and Public Facilities (DOTPF)

Funding**: state agency and UA general fund, Perkins federal funds

Evaluation: By 2012, CTE facilities inventory database is maintained and available electronically.

*The first entity listed is identified as the lead agency, responsible for inviting the involvement of the other partners in implementing the action steps.

**Currently available and potential sources of funding for identified actions.

[1] Alaska Workforce Investment Board, Resolution Number 10-03, Resolution in Support of the Alaska Career and Technical Education (CTE) Plan, May 3, 2010

5.2 Establishing a list of basic facility and equipment standards for priority CTE programs.

a) Identify CTE program certified training facility/equipment requirements in Alaska.

b) Investigate facility/equipment standards from other states and provinces.

c) Engage industry and stakeholders to develop Alaskan standards for CTE program facilities and equipment when other standards do not exist.

d) Publish the standards on website.

Responsible parties: EED, DOLWD, UA, industry, RTCs, school districts, licensing boards, accrediting organizations

Funding: State agency and UA general fund

Evaluation: By 2011, CTE program equipment standards are adopted and used in program development and improvement planning.

5.3 Identifying resources needed to bring public facilities and equipment for statewide priority programs up to standards.

a) Review survey of all statewide facilities.

b) Evaluate all facilities using the standards to determine needs and safety concerns of each facility.

c) Assess cost to upgrade identified facilities to meet standards.

Responsible parties: EED, DOLWD, UA

Funding: state agency and UA general funds, TVEP

Evaluation: By 2012, facility and equipment prioritized needs inventory is established and updated annually.

5.4 Developing public policies and incentives that maximize and promote partnerships for the use of public facilities for training throughout the year.

a) Provide technical assistance and successful models to school districts, training institutions and industry leaders for effective partnering of facilities for student access.

b) Identify barriers to the joint use of facilities such as liability and teacher credentialing issues and develop standardized procedures for dealing with these barriers.

c) Advocate after-school and year-round use of facilities for both students and adults.

d) Promote partnership incentives for facility use.

Responsible parties: EED, DOLWD, UA, school districts, RTCs, training providers, industry

Funding: Alaska school foundation program, state agency and UA general fund, TVEP, industry

Evaluation: By 2012, public CTE facilities in all locations are scheduled for maximum use and are open to training and industry partners at reasonable cost and within standardized operating policies and procedures.

5.5 Establishing capital funding strategies to renovate CTE facilities.

a) Use EED capital improvement projects model and AWIB priorities to prioritize needs of all CTE facilities.

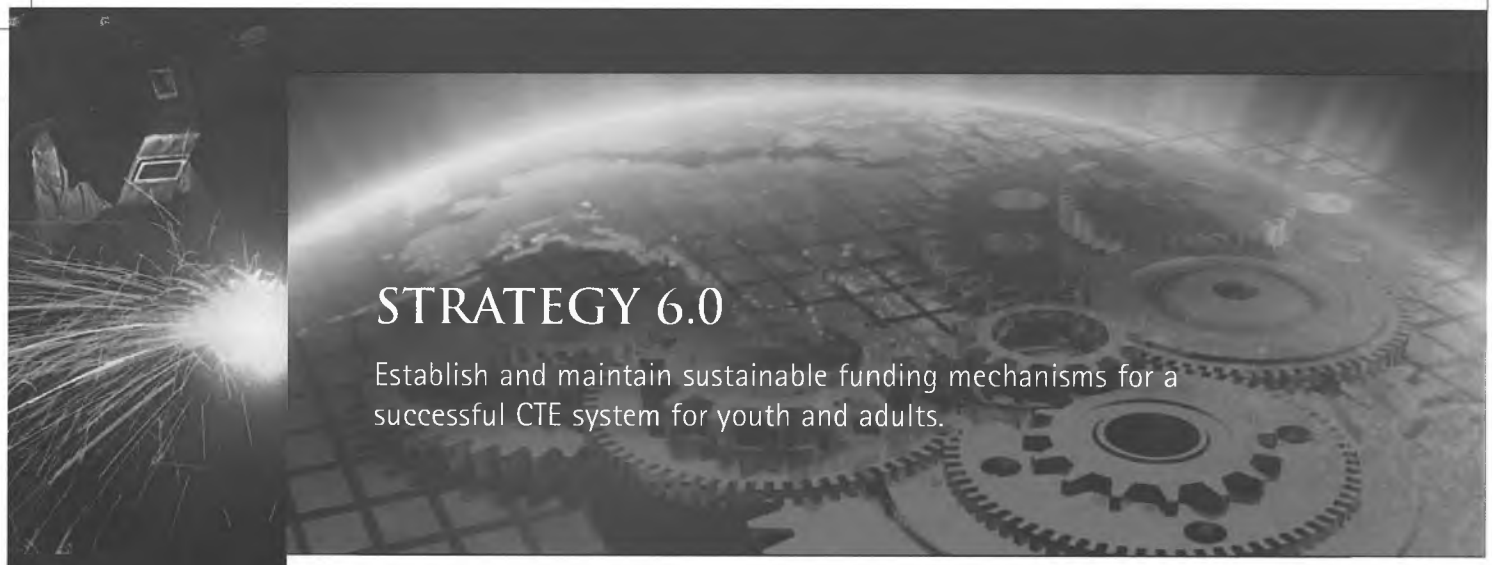
b) Investigate and develop funding strategies, mechanisms, and sources to upgrade facilities.

Responsible parties: EED, DOLWD, UA, RTCs, Alaska Office of Management and Budget (OMB), school districts, Alaska State Legislature

Funding: State and federal capital improvement funds, federal and state special programs e.g. Title III of the Higher Education Act, US Department of Housing and Urban Development (HUD), Alaska Housing Finance Corporation

Evaluation: By 2012, a capital projects prioritization process is in place and is used in making capital project funding decisions for CTE facilities and major equipment.

[1] Alaska Workforce Investment Board, Resolution Number 10-03, Resolution in Support of the Alaska Career and Technical Education (CTE) Plan, May 3, 2010



STRATEGY 6.0

Establish and maintain sustainable funding mechanisms for a successful CTE system for youth and adults.

Rationale

Excellent CTE programs require a dependable and adequate level of support. Because such programs can be expensive, the limited public funding available must be devoted to training that addresses high-priority occupations, supports regional and state economic development and shows evidence of producing quality student outcomes. Where possible, local and state funds should be used to leverage additional resources, through business and industry, federal workforce development and training funds and other sources.

This strategy can be implemented by:

6.1 Establishing criteria for prioritizing CTE program requests for state funding.

a) Identify, develop, and implement effective and meaningful accountability practices of CTE programs.

b) Develop a standardized request for funding that incorporates the CTE program evaluation criteria and the AWIB Future Workforce Strategic Policies and Investment Blueprint.

c) Require CTE programs requesting funding to demonstrate their relationship to the current job market and/or future economic development plans of the region/state.

d) Provide assistance to current programs that do not meet standards in:

- curriculum development,
- professional development,
- equipment/materials needed to meet standards,
- expense of undergoing industry certification review and
- accountability/reporting requirements.

Responsible parties*: EED, AWIB, DOLWD, UA, OMB

Funding**: State agency and UA general fund

Evaluation: By 2011, all requests for public funding for CTE programs demonstrate the ability to meet the CTE evaluation criteria and are directed at a documented regional/state existing or developing employment need. By 2012, assistance is provided to bring deficient programs up to standards.

*The first entity listed is identified as the lead agency, responsible for inviting the involvement of the other partners in implementing the action steps.

**Currently available and potential sources of funding for identified actions.

6.2 Encouraging CTE providers to take advantage of the State of Alaska corporate tax credit for contributions to qualified training programs.

a) Produce and distribute documents that explain tax credits and include examples of successful partnerships.

b) Provide technical assistance to CTE providers in promoting tax credits to industry partners.

c) Maintain an ongoing list of successful business/training program partnerships that contribute to operational or capital funding for CTE.

d) Recognize businesses that provide funding to CTE programs.

Responsible parties: DOLWD, Department of Revenue, Department of Law, EED, CTE providers, corporations operating in Alaska

Funding: Alaska's industry tax credit structure

Evaluation: By 2011, CTE providers and corporations are familiar with the existence and provisions of tax credits for qualified training programs. Industry contributions for CTE operational and capital funding increase annually over the FY10 base.

6.3 Developing a strategy for State of Alaska CTE funding that leverages local, federal and private resources.

a) Identify existing CTE funding sources, such as STEP, TVEP, Carl Perkins, and amounts per source.

b) Inventory existing CTE programs and their funding sources.

c) Determine current workforce priorities through AWIB.

d) Identify priority use of state-administered funds to support high-quality CTE programs that are tied to priority occupations.

e) Develop a comprehensive accountability model that will measure return on investment for CTE funding.

f) Target start-up funds to specific programs approved by AWIB.

g) Provide incentive funds for CTE programs and training centers to partner with other agencies.

h) Fund career-related learning experiences and organizations; for example, CTSOs, Junior Achievement, Future Educators of America, pre-apprenticeship and registered apprenticeship.

i) Increase funding for industry academies; for example, construction, health sciences, engineering.

Responsible parties: EED, AWIB, DOLWD-Business Partnerships, UA, CTE providers, OMB, Alaska State Legislature, Alaskan congressional delegation, industry, Alaska regional Native corporations

Funding: State general fund, Alaska school foundation program, TVEP, Perkins, WIA and other federal training and workforce development funds, industry

Evaluation: By 2011, a stable and efficient system of funding CTE program operations is in place and supported at an annual level sufficient to deliver quality programs throughout Alaska.

Commissioners' Letter of Coordination
Alaska Workforce Investment Board's Resolution of Support
Alaska State Board of Education & Early Development's Motion to Approve

STATE OF ALASKA

DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT
Alaska Workforce Investment Board

Sean Parnell, Governor

1016 W. 6th Avenue, Ste. 105
Anchorage, AK 99501

PHONE: (907) 269-7485
FAX: (907) 269-7489

November 12, 2009

Dear Interested Parties:

The Department of Labor and Workforce Development recently hired Jeff Selvey as the CTE (Career and Technical Education) Coordinator with the Alaska Workforce Investment Board (AWIB) and Helen Mehrkens was recently hired as the CTE Administrator with the Department of Education & Early Development. These two positions are responsible for implementation of statewide CTE strategies, including developing a comprehensive, integrated CTE system for Alaska that aligns training institutions and coordinates program delivery. Both departments are currently working in cooperation to develop a template for career plans, establishing and implementing standards for Alaska training programs, supporting the use of the Alaska Career Ready certificate, and communications and outreach with secondary and postsecondary educators and administrators throughout the state.

As the lead state planning and coordinating entity for human resource programs in the state, the AWIB is responsible for the facilitation and development of a statewide policy for a coordinated and effective employment training and education system. To accomplish this goal, the Commissioners of Labor and Workforce Development and Education & Early Development ask that all workforce development and CTE groups and organizations coordinate through the AWIB to implement statewide CTE initiatives for Alaska. We have designated Mr. Selvey and Ms. Mehrkens to lead the development and implementation of a statewide CTE Plan on behalf of both departments and report their progress to us through the AWIB.

It is critical that we all work closely together to accomplish these statewide objectives and we look forward to working with all of you. If you have any questions regarding the statewide CTE Plan, please call Jeff Selvey at (907) 269-3018 or Helen Mehrkens at (907) 465-8730.

Sincerely,

Clark Bishop
Commissioner
Department of Labor
and Workforce Development

Larry LeDoux
Commissioner
Department of Education
and Early Development

RESOLUTION NUMBER 10-03
RESOLUTION IN SUPPORT OF THE ALASKA CAREER AND TECHNICAL EDUCATION (CTE) PLAN

WHEREAS, the Alaska Workforce Investment Board is a private industry driven public organization that is accountable through its members including representatives from business and industry, education, government, and organized labor to the residents, the Legislature and the Governor of Alaska;

WHEREAS, the Alaska Workforce Investment Board acts as the lead state planning and coordinating entity for state human resource programs involving employment training, vocational education, and workforce development;

WHEREAS, the Alaska Workforce Investment Board recognizes and values the attributes that Career and Technical Education (CTE) provides to enhance students education by providing rigor and relevance to academic and career preparation;

WHEREAS, the Alaska Workforce Investment Board supports the efforts to align career and technical training programs to provide maximum efficiency, effectiveness, and access to all Alaskans;

WHEREAS, Alaska CTE Plan incorporates and values the strategies contained in both the Alaska Education Plan and the Gasline Training Strategic Plan;

WHEREAS, the Alaska CTE Plan will be implemented by the joint efforts of the Alaska Departments of Education & Early Development and Labor and Workforce Development with the assistance and input of all stakeholders including the University of Alaska system, Joint Apprenticeship Training Centers, Regional Training Centers, business and industry, K-12 schools, parents and families, and other interested organizations; and

WHEREAS, the Alaska Workforce Investment Board and Alaska Board of Education & Early Development will oversee this plan.

NOW THEREFORE BE IT RESOLVED that the Alaska Workforce Investment Board

supports the Alaska CTE Plan and the cooperative efforts of the Departments of Education & Early Development and Labor and Workforce Development to implement the strategies contained in the Plan.

CERTIFICATION

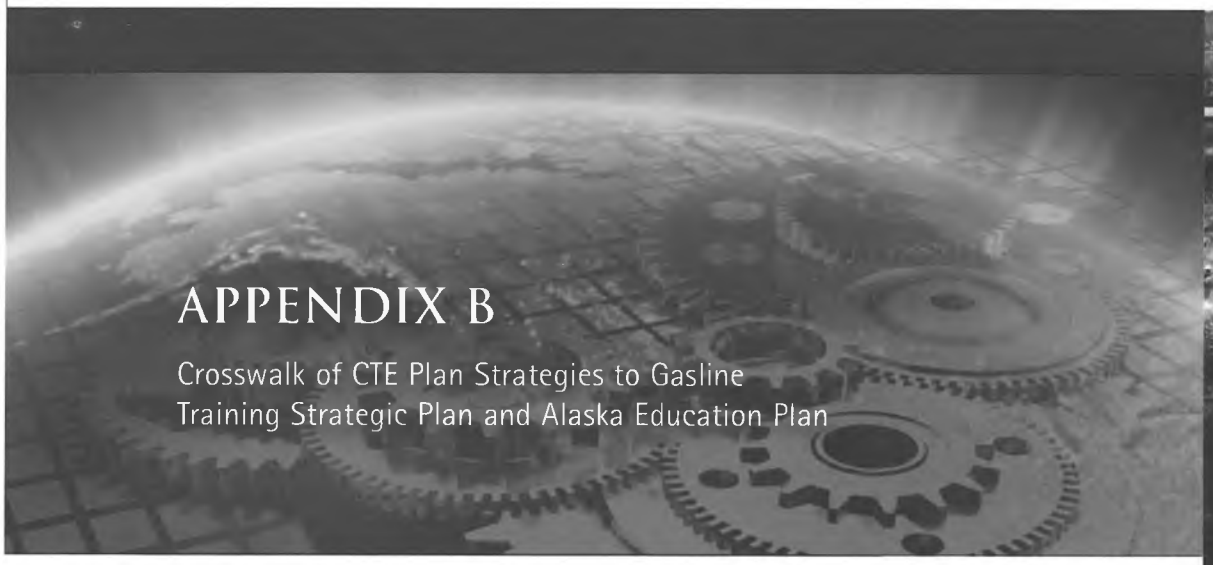
The Alaska Workforce Investment Board held a meeting duly and regularly called, noticed, and convened this 3rd day of May, 2010 and the foregoing Resolution was adopted unanimously at said meeting.

Signed this 3rd day of May, 2010.

Jim Lynch, Chair
Alaska Workforce Investment Board

Excerpt from June 10 & 11, 2010, State Board of Education & Early Development minutes.

The Alaska State Board of Education & Early Development at its June 10, 2010, meeting unanimously approved the Alaska Career and Technical Education Plan.



APPENDIX B

Crosswalk of CTE Plan Strategies to Gasline Training Strategic Plan and Alaska Education Plan

Note to readers: Following each action is a color-coded reference to the related sections of two state plans: the DOLWD's Alaska Gasline Inducement Act Training Strategic Plan (http://labor.state.ak.us/AGIA_teams/docs-combined/agiaweb.pdf) and the EED's Alaska Education Plan. (http://www.eed.state.ak.us/edsummit/pdf/AK_Education_Plan.pdf)

Strategy 1.0: Make transitions planned and accountable for both successful student progress and systemic cooperation.

This strategy can be implemented by:

1.1 Ensuring that every student has a personal learning and career plan (PLCP). (Gasline 2.2 – Ed Plan A.2 and 8)

1.2 Developing an awareness campaign about the use of PLCPs to include parents, industry and adult job-seekers. (Gasline 2.2 – Ed Plan A.2)

1.3 Coordinating program development and delivery among training programs to reduce duplication of effort and the need for remediation. (Gasline 2.4 – Ed Plan A.2 , 4, and 6)

1.4 Developing data-sharing and other processes that provide information on student progress from one educational level to the next and from school to career. (Gasline 2.2 – Ed Plan B.3)

Strategy 2.0: Align curricula at all training institutions to meet current industry standards – including academic, professional, and technical skills – from elementary through secondary to postsecondary and professional development levels.

This strategy can be implemented by:

2.1 Identifying current CTE programs and curricula and making the information publicly accessible. (Gasline 2.3 – Ed Plan A.6 and 10)

2.2 Reviewing and updating the state's employability standards and developing appropriate Grade Level Expectations (GLEs) for achieving these skills. (Gasline 2.2 – Ed Plan A.3, 13, and 15)

2.3 Identifying industry standards for statewide priority industries and incorporating the identified knowledge and skills into aligned CTE curricula at elementary, secondary, and postsecondary levels. (Gasline 2.3 – Ed Plan A.2, 3,6, 13 and 15)

2.4 Cataloging and disseminating practices and supporting materials for integrating academic GLEs into CTE programs and career applications into academic programs. (Ed Plan A.2, 3, 4, and 5)

2.5 Aligning CTE Programs of Study that connect secondary academic and CTE courses with recognized industry and postsecondary standards and program content. (Gasline 2.3 – Ed Plan A.2, 3,4,and 8)

Strategy 3.0: Identify and promote career and technical education delivery models that ensure that all Alaskans have the opportunity to attain the knowledge and skills needed for further training and careers.

This strategy can be implemented by:

3.1 Inventorying and disseminating information about career and technical education delivery models at the K-12, postsecondary, and adult levels. (Gasline 2.3 – Ed Plan A.2, 4, and 6)

3.2 Developing criteria to evaluate career and technical education delivery models. (Gasline 2.3 – Ed Plan A.3)

3.3 Identifying key strategies and effective delivery models to successfully teach and assess employability skills within schools, postsecondary institutions and other training providers. (Gasline 2.3 - Ed Plan A.4 and 15; B.7 and 11)

3.4 Instituting systems to ensure all students have access to a quality CTE program(s). (Gasline 2.5 - Ed Plan A.2, 4, 6 and 10)

3.5 Developing strategies for using personal learning and career plans to drive scheduling, curriculum and delivery models. (Gasline 2.2 – Ed Plan A.2, 4, and 8)

3.6 Promoting and celebrating effective CTE programs and practices. (Gasline 2.3 – Ed Plan B.1, 10).

Strategy 4.0: Recruit, develop, support, and retain high-quality CTE teachers and faculty.

This strategy can be implemented by:

4.1 Developing strategies to educate, recruit, and retain quality CTE teachers, faculty, counselors, advisors. (Ed Plan A.4, 5, 7, 9 and 14, B.4 and 6)

4.2 Expanding strategies for effective professional development and mentoring. (Gasline 2.2 – Ed Plan 4,5,6,7,9 and 14)

4.3 Improving and streamlining credentialing processes for CTE instructors. (Ed Plan A.4, 6, 7 and 14)

4.4 Expanding CTE leadership opportunities. (Gasline 2.3 – Ed Plan A.4, 5, 7 and 14)

Strategy 5.0: Maximize the use of public facilities for training.

This strategy can be implemented by:

5.1 Inventorying the public facilities and equipment that are available and disseminating the inventory to training providers, industry and the general public. (Gasline 2.3 – Ed Plan A.6 and 12)

5.2 Establishing a list of basic facility and equipment standards for priority CTE programs. (Gasline 2.3 – Ed Plan A.4, 6, 12 and 13)

5.3 Identifying resources needed to bring public facilities and equipment for statewide priority programs up to standards. (Gasline 2.3 – Ed Plan A.12)

5.4 Developing public policies and incentives that maximize and promote partnerships for the use of public facilities for training throughout the year. (Ed Plan A4 and 6)

5.5 Establishing capital funding strategies to renovate CTE facilities. (Gasline 2.4 – Ed Plan A.12)

Strategy 6.0: Establish and maintain sustainable funding mechanisms for a successful CTE system for youth and adults.

This strategy can be implemented by:

6.1 Establishing criteria for prioritizing CTE program requests for state funding. (Gasline 4.1 – Ed Plan A.11)

6.2 Encouraging CTE providers to take advantage of the State of Alaska corporate tax credit for contributions to qualified training programs. (Ed Plan A.6 and 13)

6.3 Developing a strategy for State of Alaska CTE funding that leverages local, federal and private resources. (Gasline 6.4 - Ed Plan A.11 and 12)

APPENDIX E

University of Alaska Workforce Development Priorities and Guidelines

November 2009

The University of Alaska is committed to preparing today's students for tomorrow, recognizing that tomorrow's careers will require advanced skills, greater knowledge, and more flexibility than ever before.

The University of Alaska's (UA) Role in Workforce Development with emphasis on Career and Technical Education

Preparing a qualified workforce is one of the most important missions of the University of Alaska. It is the responsibility of the state's university to prepare its citizenry for economic and workforce development as well as perform scientific research and provide an overall solid liberal arts education. As a result, UA is the state's most comprehensive source of workforce training and career and technical education.

Recognizing workforce development is a continuum, UA established the following three-tier approach for meeting Alaska's workforce needs:

1) Pre-college programs connect youth with career pathways and help them prepare for academic rigors.
2) Academic certificate and degree programs prepare students for careers.
3) Professional development courses provide continuing education to Alaska's workforce.

The following supports existing priorities within each of the three Major Administrative Unit (MAU) strategic plans. The purpose of the following is to (1) to provide the University leadership with workforce development priorities that support programs across the statewide system, and (2) to establish guidelines that can assist administrators, faculty, and staff with decisions related to program development, assessment, and funding requests.

University of Alaska Workforce Development Priorities:

- Economic and Community Development: Provide leadership and support for Alaska's economic and community development by responding to emerging industries, identifying solutions for workforce issues, and meeting the needs of employers, communities, and the State.

- Career Pathways: Provide a series of connected education and training programs and support services to prepare individuals for a career and to advance over time to successively higher levels of education and employment.
- High Demand Jobs: Develop and support programs that respond to employment shortages and projected occupational demand.

University of Alaska Workforce Development Guidelines:

a) Increase number of completers for Alaska high demand workforce needs.

b) Promote partnerships with K-12, focusing on:
   - career pathways
   - tech prep
   - dual enrollment
   - college preparation
   - workplace readiness

c) Collaborate with employer/industry representatives to develop or revise, and support programs that meet industry standards.

d) Increase access and flexibility of delivery options for workforce and high demand programs, including, but not limited to, on-line and distance education.

e) Improve persistence and efficiency of educational progress from entry to completion in workforce and high demand areas.

f) Support faculty professional development focused on meeting industry standards and practices.

g) Promote student internships, practicum, and experiential opportunities.

h) Promote collaboration across the UA system between programs, schools, colleges, and campuses.

i) Support student orientation, advising, career counseling services, and job placement in workforce and high demand areas.

j) Expand partnerships with local communities in order to integrate education, training, and research into community service.

This publication, released by the Alaska Department of Education & Early Development and the Alaska Department of Labor and Workforce Development was printed in Anchorage, Alaska at a cost of $6.41 per copy by AT Publishing & Printing, Inc.

Chapter No.
_____

AN ACT

Relating to the AlaskAdvantage education grant program; relating to professional student exchange program availability; establishing the Alaska merit scholarship program and relating to the program; relating to student records; making conforming amendments; establishing a Joint Legislative Higher Education Scholarship Funding Task Force; establishing an advisory task force on higher education and career readiness in the legislative branch of government; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1

AN ACT

Relating to the AlaskAdvantage education grant program; relating to professional student exchange program availability; establishing the Alaska merit scholarship program and relating to the program; relating to student records; making conforming amendments; establishing a Joint Legislative Higher Education Scholarship Funding Task Force; establishing an advisory task force on higher education and career readiness in the legislative branch of government; and providing for an effective date.

---

* **Section 1.** AS 14.03 is amended by adding a new section to read:

Sec. 14.03.113. District determination of scholarship eligibility. A school district shall determine whether a student who graduates from a high school in the district is eligible for an award of an Alaska merit scholarship program scholarship under AS 14.43.810 - 14.43.850. If a student is eligible, the district shall state in the student's permanent record the highest level of funding for which the student is

eligible. A district shall provide a student with an opportunity to request that the district correct an error in the eligibility determination.

* **Sec. 2.** AS 14.42.030(e) is amended to read:

(e) The commission may

(1) adopt regulations under AS 44.62 (Administrative Procedure Act) to

(A) carry out the purposes of

(i) **AS 14.43.091 - 14.43.850** [AS 14.43.091 - 14.43.750], 14.43.990, AS 14.44, and AS 14.48; and

(ii) AS 14.43.910 and 14.43.920 as they relate to the purposes of **AS 14.43.091 - 14.43.850** [AS 14.43.091 - 14.43.750], 14.43.990, AS 14.44, and AS 14.48;

(B) ensure compliance with the requirements imposed by state and federal statutes and regulations governing the guaranty, insurance, purchase, or other dealings in eligible loans by federal agencies, instrumentalities, or corporations; and

(C) establish standards for the

(i) administration of hearings conducted under AS 14.43.153; and

(ii) administrative enforcement of collection orders under AS 14.43.151 - 14.43.155;

(2) delegate to the executive director of the commission or a subcommittee of the commission any duty imposed on or power granted to the commission by this chapter, AS 14.43, AS 14.44, or AS 14.48, except its power to adopt regulations and its duty to consider appeals under AS 14.43.100(b) and AS 14.48.120;

(3) establish task forces, committees, or subcommittees, not necessarily consisting of commission members, to advise and assist the commission in carrying out its functions;

(4) contract with or use existing institutions of postsecondary education or other individuals or organizations to make studies, conduct surveys,

submit recommendations, or otherwise contribute to the work of the commission;

(5) establish fees for the review of an out-of-state institution that

(A) requests approval for participation in the programs under AS 14.43.091 - 14.43.750, 14.43.990, and AS 14.44; and

(B) is not accredited by a national or regional accreditation association recognized by the Council for Higher Education Accreditation; and

(6) collect all fees and costs incurred in collection of the amount owed on a loan or repayment obligation if the loan or repayment obligation becomes delinquent or in default; in this paragraph, fees and costs include attorney fees, court costs, and collection fees charged by a collection agency.

* **Sec. 3.** AS 14.43.420(a) is amended to read:

(a) A grant made under AS 14.43.400 - 14.43.420 may not be in an amount less than $500 nor more than **$3,000** [$2,000] for each school year.

* **Sec. 4.** AS 14.43.420(c) is amended to read:

(c) A student may receive not more than a total of **$12,000** [$8,000] in grants awarded under AS 14.43.400 - 14.43.420.

* **Sec. 5.** AS 14.43 is amended by adding new sections to read:

Article 11A. Alaska Merit Scholarship Program.

Sec. 14.43.810. Alaska merit scholarship program established; regulations. (a) The Alaska merit scholarship program is established to provide scholarships for high school graduates who are Alaska residents to attend a qualified postsecondary institution in the state.

(b) The department shall, in consultation with the commission, adopt regulations necessary to implement the program. The commission shall administer the daily operations of the program and financing of the program, including the procedures for applying for the scholarships, establishing standards for and ensuring continuing compliance with programmatic standards, and requiring students to apply for other nonloan financial aid, consistent with federal law.

Sec. 14.43.820. Alaska merit scholarship program; eligibility. (a) Subject to appropriation, the commission shall award an Alaska merit scholarship program scholarship to an applicant who

(1) is a resident of the state as defined in AS 01.10.055;

(2) graduated or will graduate within six months from a high school in the state;

(3) has completed a core academic curriculum in high school that includes

(A) four years of mathematics, four years of language arts, four years of science, and four years of social studies, one year of which may include a foreign language, an Alaska Native language, fine arts, or cultural heritage; or

(B) three years of mathematics, four years of language arts, three years of science, four years of social studies, and two years of a foreign language or an Alaska Native language;

(4) has a minimum grade-point average in high school of 2.5 or higher; the department shall set by regulation minimum requirements based on a substantially similar standard for districts that do not assign grades;

(5) has achieved a minimum score on a

(A) college entrance examination; or

(B) standardized examination designed to measure a student's level of preparedness to make the transition to work, as selected by the department; and

(6) is enrolled in good standing in a course of study at a qualified postsecondary institution in this state that is intended to result in the award of a certificate or degree.

(b) The commission shall establish in regulation standards for continuing and regaining eligibility for a scholarship.

Sec. 14.43.825. Maximum annual awards. (a) The maximum annual awards for the Alaska merit scholarship program scholarships are as follows:

(1) the first award level is $4,755 and requires a 3.5 grade-point average or above and a very high minimum score on a college entrance examination;

(2) the second award level is $3,566 and requires a 3.0 grade-point average or above and a high minimum score on a college entrance examination;

(3) the third award level is $2,378 and requires a 2.5 grade-point average or above and a moderately high minimum score on a college entrance examination.

(b) A student's eligibility for a scholarship terminates six years after the date the student graduated from high school unless the student qualifies for an extension of time allowed by the department by regulation.

(c) Except as provided in (b) of this section, a student receiving a scholarship may remain eligible for up to eight semesters of enrollment in good standing at a qualified university or college, which may include graduate courses.

(d) Scholarships may be awarded to a full-time student or, if a student is enrolled part time, prorated based on the number of credits. In this subsection, "full time" means enrollment in a course of study that is not less that 12 credits, and "part time" means enrollment in a course of study that is not less than six credits but less than 12 credits.

(e) The amount of a scholarship award may not exceed the amount of the student's costs of attendance as certified by the postsecondary institution for the purposes of federal financial aid, less any other scholarships or nonloan financial aid awarded to the student.

(f) Payment of a scholarship is subject to appropriation. If insufficient funds are appropriated to pay all eligible scholarships, the commission shall pay existing awards on a pro rata basis.

Sec. 14.43.830. Qualified postsecondary institutions. (a) The following institutions are qualified postsecondary institutions for purposes of awarding an Alaska merit scholarship program scholarship:

(1) a university or college physically located in the state that is

(A) authorized to operate in the state under AS 14.48.020 or is exempt from authorization under AS 14.48.030(b)(1); and

(B) accredited by a regional accreditation association;

(2) a career and technical school program physically located in the state that has been included on a list of certified career and technical school programs received from the Department of Labor and Workforce Development; the commission

shall publish the list on or before June 30 of the year preceding enrollment.

(b) The Department of Labor and Workforce Development shall, in consultation with the Department of Education and Early Development, adopt regulations under AS 44.62 (Administrative Procedure Act) establishing criteria under which the Department of Labor and Workforce Development shall certify career and technical school programs in the state as eligible to participate in the Alaska merit scholarship program.

Sec. 14.43.840. Report to the legislature. (a) To the extent permitted under law, the department, the commission, the University of Alaska, and the Department of Labor and Workforce Development shall share data necessary to prepare public reports regarding the program.

(b) Not more than 10 days after the convening of each regular legislative session, the department, the commission, the University of Alaska, and the Department of Labor and Workforce Development shall present an annual report to the public, the governor, and the legislature containing information of public interest regarding the program, including

(1) the number of applicants and number and types of scholarships awarded;

(2) the dollar amount of scholarships awarded in past years and the dollar amount expected to be awarded for the next year; and

(3) data and trends in the data regarding high school and postsecondary student performance, programmatic changes, and retention and graduation rates over time.

Sec. 14.43.850. Definitions. In AS 14.43.810 - 14.43.850, unless the context requires otherwise,

(1) "department" means the Department of Education and Early Development;

(2) "grade-point average" means the average of all grades on a four-point scale, or five-point scale for advanced placement classes, obtained by the student in high school;

(3) "high school" means a public or accredited secondary school in the

state and a home school program that is approved by the department;

(4) "program" means the Alaska merit scholarship program established under AS 14.43.810 - 14.43.850;

(5) "school district" means a borough school district, a city school district, a regional educational attendance area, and a state boarding school.

*** Sec. 6.** AS 14.44.025 is amended by adding a new subsection to read:

(b) Notwithstanding the funding priorities established under (a) of this section, the Alaska Commission on Postsecondary Education shall provide adequate funding for not fewer than five students each year to attend four-year programs in each of the following fields:

(1) dentistry;

(2) optometry; and

(3) pharmacy.

*** Sec. 7.** AS 14.45.130(a) is amended to read:

(a) A religious or other private school that elects to comply with AS 14.45.100 - 14.45.130 shall maintain permanent student records reflecting immunizations, physical examinations, standardized testing, academic achievement, [AND] courses taken at the school**, and level of eligibility for an Alaska merit scholarship program scholarship under AS 14.43.810 - 14.43.850**.

*** Sec. 8.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: PROGRAM STANDARDS AND IMPLEMENTATION FOR INITIAL SCHOOL YEARS. Notwithstanding any contrary provision of this Act, the Department of Education and Early Development and the Department of Labor and Workforce Development, after consultation with the Alaska Commission on Postsecondary Education, may adopt regulations under AS 44.62 (Administrative Procedure Act) to implement their respective duties under the Alaska merit scholarship program established in AS 14.43.810, enacted by sec. 5 of this Act, so that a student

(1) may be eligible for the program even though the student did not fully meet the required core academic curriculum for the school years beginning July 1, 2010, through June 30, 2014; and

(2) who graduated from high school in this state after January 1, 2011, and before July 1, 2011, and meets eligibility requirements for the program may apply for a scholarship on or after January 1, 2011, for enrollment in a program of study beginning on or after July 1, 2011.

* **Sec. 9.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Education and Early Development, the Department of Labor and Workforce Development, and the Alaska Commission on Postsecondary Education may proceed to adopt regulations necessary to implement changes made to their respective authorities by secs. 1, 2, 5, 7, and 8 of this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before July 1, 2011, except that regulations pertaining to applications for scholarships may take effect on or after January 1, 2011.

* **Sec. 10.** The uncodified law of the State of Alaska is amended by adding a new section to read:

JOINT LEGISLATIVE HIGHER EDUCATION SCHOLARSHIP FUNDING TASK FORCE. (a) The legislature finds that

(1) there is a growing problem of students entering degree programs at postsecondary institutions in Alaska but not completing the degree programs;

(2) at 22.4 percent, Alaska ranks last in the nation for first-time full-time bachelor degree-seeking students who complete their degrees within six years;

(3) it is estimated that, by 2025, 50 percent of all jobs in the United States will require a college-level degree;

(4) having an educated population is integral to economic development and promotion of lifetime success;

(5) the cost of attending postsecondary institutions continues to rise while financial aid for students fails to alleviate their unmet financial need so that they may attend college;

(6) improving financial aid opportunities for Alaska students would likely improve postsecondary graduation rates in the state; and

(7) establishing a state scholarship program to improve access to student

financial aid requires a more thorough examination by the legislature.

(b) The Joint Legislative Higher Education Scholarship Funding Task Force is established in the legislative branch for the purpose of examining higher education costs and identifying the best approach in providing financial aid to assist students in the state.

(c) The duties of the task force established under this section include

(1) evaluating how best to provide long-term and sustainable funding for state-provided financial aid for postsecondary institutions in the state, including scholarship opportunities;

(2) evaluating proposals that are based on available facts and conclusions pertaining to financial aid opportunities at postsecondary institutions in the state;

(3) recommending improvements or additions to the laws providing for financial aid at postsecondary institutions; and

(4) taking public comments on financial aid opportunities in the state.

(d) The task force consists of 15 members, as follows:

(1) five members of the senate appointed by the president of the senate;

(2) five members of the house of representatives appointed by the speaker of the house of representatives; and

(3) five members appointed by the governor, as follows:

(A) the commissioner of education and early development or the commissioner's designee;

(B) the president of the University of Alaska or the president's designee;

(C) the director of the office of management and budget or the director's designee;

(D) a member of the state Board of Education and Early Development;

(E) the executive director of the Alaska Commission on Postsecondary Education.

(e) The president of the senate and the speaker of the house of representatives shall jointly appoint the chair and vice-chair of the task force.

(f) The task force shall meet during the interim between legislative sessions.

(g) The task force shall submit a report of its findings and proposed legislative

changes to the governor, the Alaska Commission on Postsecondary Education, the Department of Education and Early Development, and the legislature by December 1, 2010, and may make any additional reports it considers advisable.

(h) The Joint Legislative Higher Education Scholarship Funding Task Force is terminated on January 1, 2011.

* **Sec. 11.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ESTABLISHMENT OF ADVISORY TASK FORCE ON HIGHER EDUCATION AND CAREER READINESS; COMPOSITION. (a) An advisory task force on higher education and career readiness is established in the legislative branch of state government for the purpose of compiling data and advising the legislature on matters pertaining to college and career readiness of students who graduate from public secondary schools in the state and students who are nontraditional students.

(b) The task force established under this section consists of 20 members, as follows:

(1) the governor or the governor's designee;

(2) the executive director of the Alaska Commission on Postsecondary Education or the executive director's designee;

(3) the commissioner of education and early development or the commissioner's designee;

(4) one member appointed by the governor who represents vocational, technical training, or apprenticeship programs in the state;

(5) a student representative appointed by the state Board of Education and Early Development;

(6) the student member of the Board of Regents of the University of Alaska or the student's designee;

(7) the president of the University of Alaska or the president's designee;

(8) the executive director of the Association of Alaska School Boards or the executive director's designee;

(9) the executive director of the Alaska Association of School Administrators or the executive director's designee;

(10) the president of the National Education Association of Alaska or the

president's designee;

(11) the president of the Alaska Federation of Natives or the president's designee;

(12) two members of the house of representatives, appointed by the speaker of the house of representatives, one of whom shall be appointed co-chair;

(13) two members of the senate, appointed by the president of the senate, one of whom shall be appointed co-chair;

(14) one member appointed by the governor who represents private colleges or universities;

(15) one member appointed by the governor who represents public postsecondary institutions and who is not affiliated with the University of Alaska;

(16) three members appointed by the governor who have specialized knowledge, skill, or experience in education remediation and who are employed as faculty at postsecondary institutions located in separate major administrative units in the state, at least one of whom resides outside of Anchorage, Fairbanks, and Juneau.

(c) A majority of the members of the task force constitutes a quorum. A vacancy on the task force shall be filled in the same manner as the original selection or appointment.

(d) Members of the task force serve without compensation but are entitled to per diem and travel expenses authorized for boards and commissions under AS 39.20.180, except that per diem and travel expenses shall be paid from the budget of the agency or institution the member represents on the task force. The agency or institution may opt out of participating to avoid payment of per diem and travel expenses. The staff of the legislative members of the task force shall serve as staff for the task force.

(e) The task force shall meet at the call of the chair not less than once every three months. The co-chairs shall call the first meeting of the task force not later than 30 days after the effective date of this section. The members of the task force shall elect other officers as needed to conduct the business of the task force.

(f) The task force shall

(1) compile research conducted in the state and nationally on reducing remediation, improving retention, and increasing college and postsecondary vocational or technical program graduation rates;

(2) summarize data on

(A) types of testing used to determine college and career readiness;

(B) remediation rates;

(C) effectiveness of remediation for students entering college or postsecondary vocational or technical training programs with skill deficits;

(D) characteristics of programs that are most effective in addressing skill deficits;

(3) create a definition of remediation to ensure consistency in reporting of remediation rates by postsecondary institutions in the state;

(4) identify the contributing causes of a lack of college and career readiness of students who graduate from public secondary schools in the state and the course topics taken in college or postsecondary vocational or technical training programs for which students require remediation;

(5) identify best practices examples of school systems, colleges, and postsecondary vocational or technical training programs that are succeeding in reducing the need for remedial education;

(6) explore new approaches that may be effective in producing increased levels of college and career readiness;

(7) determine the availability of broadband and Internet capabilities and the effect of the use of electronic, Internet, and virtual instruction on student learning and success in schools;

(8) determine the role various types of postsecondary institutions may play in addressing the need for remediation;

(9) review graduation rates of colleges, universities, and postsecondary vocational or technical training programs located in the state for the six years preceding the effective date of this section;

(10) prepare for the legislature a set of written recommendations to improve remediation, retention, and graduation rates at colleges, universities, and postsecondary vocational or technical training programs in the state;

(11) review completion rates for career skill certificate programs, disaggregated by program and postsecondary campus.

(g) The task force shall submit the assessment and recommendations developed under (f) of this section in a report to the legislature not later than April 1, 2011.

* **Sec. 12.** Section 11 of this Act is repealed on July 1, 2011.

* **Sec. 13.** Sections 3, 4, 6, and 8 - 11 of this Act take effect immediately under AS 01.10.070(c).

* **Sec. 14.** Except as provided in sec. 13 of this Act, this Act takes effect July 1, 2011.

Effective 11/4/2010
DEED

4 AAC is amended by adding a new chapter to read:

Chapter 43. Alaska Performance Scholarship Program.

Section

10. Requirements for school districts and certain religious or private schools

20. Standardized testing and grade point average requirements

30. Curriculum requirements

40. Procedures for home-based education and certain religious or other private schools

900. Definitions

4 AAC 43.010. Requirements for school districts and certain religious or private schools. In administering a school district's duties under the scholarship program established in AS 14.43.810 – 14.43.850, a school district, or a religious or other private school accredited under 4 AAC 04.300(c) that elects to comply with AS 14.45.100 - 14.45.130, shall

(1) determine a student's level of eligibility for the Alaska performance scholarship based on curriculum, standardized examination scores, and grade point average for each of its graduating students;

(2) record a student's level of eligibility on the student's permanent record;

(3) require a student seeking Alaska performance scholarship eligibility certification to provide proof of results achieved on one of the standardized examinations required for scholarship eligibility; and

(4) no later than July 15 of each year, transmit to the department an electronic version of each graduating student's permanent record that describes the student's eligibility for the Alaska performance scholarship. (Eff. __/__/____, Register __)

Authority: AS 14.07.060 AS 14.43.810

4 AAC 43.020. Standardized examination and grade point average requirements. (a) A student is eligible for an Alaska performance honors scholarship if the student meets the curriculum requirements of 4 AAC 43.030, obtains a grade point average of 3.5 or higher, and provides proof of

(1) an ACT score of 25 or higher;

(2) an SAT score of 1680 or higher; or

(3) a WorkKeys score of five or higher in each of the following areas:

(A) applied mathematics;

(B) reading for information;

(C) locating information.

(b) A student is eligible for an Alaska performance achievement scholarship if the student meets the curriculum requirements of 4 AAC 43.030, obtains a grade point average of 3.0 or higher, and provides proof of

(1) an ACT score of 23 or higher;

(2) an SAT score of 1560 or higher; or

(3) a WorkKeys score of five or higher in each of the following areas:

(A) applied mathematics;

(B) reading for information;

(C) locating information.

(c) A student is eligible for an Alaska performance opportunity scholarship if the student meets the curriculum requirements of 4 AAC 43.030, obtains a grade point average of 2.5, and provides proof of:

(1) an ACT score of 21 or higher;

(2) an SAT score of 1450 or higher; or

(3) a WorkKeys score of five or higher in each of the following areas:

(A) applied mathematics;

(B) reading for information;

(C) locating information.

(d) A student who qualifies for a scholarship using the WorkKeys examination must use the scholarship award in a career and technical program that results in the award of a certificate. (Eff. __/__/____, Register __)

Authority: AS 14.07.060 AS 14.43.810

4 AAC 43.030. Curriculum requirements. (a) For a student graduating from high school in 2011, the curriculum requirements for all levels of the Alaska performance scholarship are completion of

(1) the subject matter requirements for high school graduation under 4 AAC 06.075(b); and

(2) one additional unit of credit from any of the following:

(A) mathematics – one unit of credit;

(B) science – one unit of credit;

(C) mathematics and science – one-half unit of credit in mathematics and one-half unit of credit in science. (Eff. __/__/____, Register___)

Authority: AS 14.07.060 AS 14.43.810

4 AAC 43.040. Procedures for home-based education and certain religious or other private schools. (a) To establish eligibility for an Alaska performance scholarship, a student who is not enrolled in a public school program and who completes a home-based education program in the state, or who graduates from a religious or other private school accredited under 4 AAC 04.300(c) that does not elect to comply with AS 14.45.100 - 14.45.130, shall apply to the department no later than July 1 of the year the student intends to enroll at an eligible postsecondary institution. The application must be in writing, on a form provided by the department, and must include documentation demonstrating

(1) proof of results achieved on a standardized examination that meet the requirements of 4 AAC 43.020(a), (b), or (c); and

(2) completion of the curriculum requirements in 4 AAC 43.030.

(b) No later than 15 days after receipt of a complete application under (a) of this section, the department will provide the student with a written notice of eligibility. In this notice, the department will state whether the student is eligible for a scholarship, and, if eligible, the student's maximum level of scholarship eligibility.

(c) A student who is denied eligibility for a scholarship under this section or wishes to dispute the department's determination of the student's maximum level of scholarship eligibility may appeal the department's determination by sending a written request for appeal no later than 15 days after the department issues the notice of eligibility.

(d) A request for appeal under (c) of this section must include

(1) the name, mailing address, and telephone number of the appellant;

(2) the relief requested in the appeal;

(3) a short and concise statement identifying the reasons supporting a reversal or modification of the department's eligibility determination; and

(4) all documents, papers, or other materials that support a reversal or modification of the department's eligibility determination.

(e) The commissioner will designate a reviewer who did not participate in the department's initial determination of scholarship eligibility to review a timely request for appeal received under (c) of this section. The reviewer shall consider all information and materials submitted and issue a written decision that determines the student's eligibility for a scholarship, and if eligible, the student's level of eligibility. The reviewer's decision is the final decision of the department. Notice of the department's decision will be sent to the student no later than 45 days after the department receives the notice of appeal. (Eff. __/__/____, Register __)

Authority: AS 14.07.060 AS 14.43.810

4 AAC 43.900. Definitions. In this chapter, unless context indicates otherwise,

(1) "ACT" means the ACT high school achievement and college admissions examination administered by ACT, Inc.;

(2) "Alaska performance scholarship" means the scholarship program established under AS 14.43.810 – 14.43.850;

(3) "Alaska performance achievement scholarship" means an Alaska performance scholarship at the award level described under AS 14.43.825(a)(2);

(4) "Alaska performance honors scholarship" means an Alaska performance scholarship the top award level described under AS 14.43.825(a)(1);

(5) "Alaska performance opportunity scholarship" means an Alaska performance scholarship the award level described under AS 14.43.825(a)(3);

(6) "commissioner" means the Commissioner of Education and Early Development;

(7) "home-based education program" means an educational program that qualifies the student for an exemption under AS 14.30.010(b)(12) from the compulsory education requirement of AS 14.30.010(a);

(8) "SAT" means the SAT high school achievement and college admissions test administered by College Board, Inc.;

(9) "standardized examinations" means the ACT, SAT, or WorkKeys examinations;

(10) "unit of credit" has the meaning given in 4 AAC 06.075(e);

(11) "WorkKeys" means the WorkKeys Job Skills Assessment administered by ACT, Inc. (Eff. __/__/____, Register __)

Will be effective
2/25/2011
DEED

4 AAC 43.030 is amended by adding new subsections to read:

(b) For a student graduating from high school in 2012, the curriculum requirements for the Alaska performance achievement scholarship and Alaska performance opportunity scholarship are completion of either the 2012 mathematics and science curriculum or the 2012 social studies and language curriculum. The required courses are as follows:

(1) for the 2012 mathematics and science curriculum,

(A) either of the following:

(i) mathematics - four units of credit, and science - three units of credit;

(ii) mathematics - three units of credit, and science - four units of science;

(B) language arts - four units of credit;

(C) social studies - four units of credit; however, one unit of a foreign language, an Alaska Native language, fine arts, or cultural heritage may substitute for one of the four units of credit of social studies;

(2) for the 2012 social studies and language curriculum,

(A) mathematics - three units of credit;

(B) science - three units of credit;

(C) language arts - four units of credit;

(D) social studies - four units of credit; and

(E) foreign, Alaska Native, or American sign language - one unit of credit.

(c) For a student graduating from high school in 2012, the curriculum requirements for the Alaska performance honors scholarship are completion of either, as described in (d) of this section,

(1) the 2013 and after mathematics and science curriculum;

(2) the 2013 and after social studies and language curriculum.

(d) For a student graduating from high school in and after 2013, the curriculum requirements for all levels of the Alaska performance scholarship are completion of either the mathematics and science curriculum or the social studies and language curriculum described in this subsection. The required courses are as follows:

(1) for the 2013 and after mathematics and science curriculum,

(A) mathematics - four units of credit;

(B) science - four units of credit;

(C) language arts - four units of credit;

(D) social studies - four units of credit; however, one unit of a foreign language, an Alaska Native language, fine arts, or cultural heritage may substitute for one of the four units of credit of social studies;

(2) for the 2013 and after social studies and language curriculum,

(A) mathematics - three units of credit;

(B) science - three units of credit;

(C) language arts - four units of credit;

(D) social studies - four units of credit;

(E) foreign, Alaska Native, or American sign language - two units of credit.

(e) The curriculum requirements described in this section do not excuse a student from compliance with the high school graduation requirements in 4 AAC 06.075 or graduation requirements imposed by the student's district. (Eff. 11/4/2010, Register 196; am 2/25/2011, Register 197)

Authority: AS 14.07.060 AS 14.43.810 **Sec. 8, ch. 14, SLA 2010**

4 AAC 43 is amended by adding a new section to read:

4 AAC 43.035. Grace period for curriculum requirements. (a) The commissioner may grant a student a grace period to meet curriculum requirements for the Alaska performance scholarship, if the standards set out in this section are met. A grace period grants the applicant one extra year of eligibility after the date of the applicant's high school graduation to complete the curriculum requirements of 4 AAC 43.030. A student who is granted a grace period is not eligible for the scholarship during the year in which the grace period is granted.

(b) In order to be eligible for a grace period, a student must

(1) apply on a form prescribed by the department and the form must be received by the department no later than 30 days after the student graduates from high school;

(2) have graduated from a high school in this state in 2011 or 2012;

(3) have attained the required grade point average and ACT, SAT, or WorkKeys score as described in 4 AAC 43.020; and

(4) be unable to complete the curriculum requirements described in 4 AAC 43.030 because of circumstances outside of the control of the student; those circumstances

(A) include the required curriculum not being reasonably available to the student because the student attended a small and remote high school in the state;

(B) do not include the student's attendance at a high school outside of the state.

(c) The commissioner will issue a written decision denying or granting the application for a grace period. In evaluating the application, the commissioner must consider the curriculum requirements of 4 AAC 43.030 that were available to the student at the student's school.

(d) If the application for a grace period is granted, the student shall

(1) obtain a passing grade on a course to meet the curriculum requirement for which the grace period was granted; and

(2) submit documentation to the commissioner of compliance with (1) of this subsection, no later than 30 days after the one-year anniversary of the granting of the grace period.

(e) A student who received a grace period and does not satisfy the requirements of (d) of this section is not eligible for the scholarship. (Eff. 2/25/2011, Register 197)

Dear President Stevens and Speaker Chenault,

This report is submitted to the Legislature by the Joint Legislative Higher Education Scholarship Funding Task Force, established by the 26th Alaska State Legislature under Senate Bill 221 to "examine higher education costs and identify the best approach in providing financial aid to assist students in the state".

Pursuant to this purpose, the Task Force has spent the interim performing three of the duties outlined in SB 221. These included evaluating how best to provide long-term and sustainable funding for state provided financial aid, evaluating proposals pertaining to financial aid opportunities and taking public comments on financial aid opportunities in the state.

Having completed all these assigned duties, the Task Force now respectfully submits the attached report in fulfillment of its fourth and final duty: "recommend improvements or additions to the laws providing for financial aid at postsecondary institutions." Those recommendations, along with supporting justifications and documentation, as included herein.

Respectfully,

Kevin Meyer

Senator Kevin Meyer,
Chairman, Joint Legislative Higher Education Scholarship Funding Task Force

Alaska State Legislature Joint Legislative Higher Education

Scholarship Funding Task Force

Report to the Legislature

Task Force Recommendations on

The Alaska Scholarship Program and

State-supported Educational Financial Assistance

Fall 2010

Executive Summary

Throughout the fall of 2010, the Scholarship Funding Task Force, established by Senate Bill 221 during the 26th Alaska State Legislature, performed an analysis of higher education financial aid policy in an effort to arrive at a set of recommendations for providing financial assistance for the post-high school education and training of Alaska students.

Specifically, the Task Force had been asked to consider options to ensure a long-term and sustainable funding stream for the newly created Alaska Scholarship program (Scholarship) and other state-provided financial aid. To do this, the Task Force solicited input from professionals with knowledge and expertise in education, administration, financial aid and governmental budgeting. It also took public testimony from groups and individuals (including current postsecondary students) who would benefit from or be impacted by the new program. The Task Force performed an in-depth analysis of the existing and potential components of the Scholarship and then, finally, reviewed the budgetary means and mechanisms available to the State to sustain programs like the Scholarship.

In a series of meetings, the Task Force reviewed the legislative history of the Scholarship, from inception to passage into law, and examined the form and function of the merit-based scholarship program created in statute with passage of SB 221. The Task Force also considered needs-based financial aid and examined the State's existing needs-based education assistance program – the AlaskAdvantage education grant program. Finally, the Task Force reviewed the budgetary tools available for supporting state-sponsored programs and analyzed structures the State might use to fund and finance the Scholarship.

Within the context of these reviews, evaluations and analyses, the Task Force formulated a consensus opinion on the funding strategy members agreed would be most efficient and effective in placing the Scholarship on a firm and enduring financial footing. It also considered numerous structural conditions and modifications through which the State's scholarship and financial aid systems might be strengthened to support the optimal functioning of the Scholarship.

This work of the Task Force formed the basis for the following recommendations to the Legislature and the State.

Implementation of these recommendations is expected to provide the structure necessary for the Scholarship to meet its two great promises: Its promise to Alaska that it can raise student academic performance by raising expectations, and its promise to students that, if they challenge themselves and achieve academic success under a highly rigorous curriculum, the State will reward them with a Scholarship.

Summary of Recommendations

Funding and Finance

- The Legislature should immediately create a Scholarship Fund for the Scholarship program.
- If possible, the Scholarship Fund should be immediately capitalized to the point where it can be both self-sufficient and self-sustaining.
- Otherwise, the Scholarship Fund should be incrementally capitalized to a minimum balance of $160 million using sources which have been positively identified and with revenues that have been affirmatively designated.

Merit-Based Component

Curriculum:

- No immediate amendment should be made to the Scholarship curriculum until its yearly reporting can provide the data to serve as a factual basis for such alterations.
- The Department of Education & Early Development should specify the "required courses" not specifically delineated in statute for each curricular subject area and define the content requirements and standards for those courses.

Distance Delivery:

- The Legislature should do an assessment of the State's existing distance delivery capacity and, should it be necessary, develop a plan (including cost estimates) for upgrading the Department of Education & Early Development's capacity to provide virtual program or distance-delivered secondary courses.

Needs-Based Component

- To directly support Scholarship awardees, a capped needs-based supplement should be reintegrated into the Scholarship.
- To assist all students, however, the Legislature should continue its support of the AlaskAdvantage grant program but do so at higher than historic levels.
- The supplemented Scholarship and AlaskAdvantage grant programs should be programmatically separate but should be funded through the same mechanism, under a funding formula which ensures adequate support for both.

Other Policy Recommendations

- Any institution which accepts Scholarship awards should integrate an advisor/advocate program to assist Scholarship awardees in expediting the students' time to education program completion.

Summary of Recommendations

- Institutions accepting Scholarship awardees should make their best effort to provide course delivery structures that allow for two and/or four year certificate/degree completion timelines.

Introduction

Throughout the fall of 2010, the Joint Legislative Higher Education Scholarship Funding Task Force (hereafter referred to as the "Task Force"), established by Senate Bill 221 during the 26th Alaska State Legislature and in accordance with the Purpose and Duties described therein (Attachment 1), performed an examination of higher education financial aid policy options relative to student success in its effort to arrive at a set of recommendations for providing state financial assistance to Alaska students for post-high school education and training. Specifically, the Task Force was asked to consider options for securing a long-term and sustainable funding stream for the Alaska Scholarship (hereafter referred to as the "Scholarship"), and other state-provided financial aid meant to assist students in attending postsecondary institutions within the State, and to offer guidance to the Legislature on how it might best achieve that goal.

In furtherance of its statutory mandate, the Task Force solicited input from professionals with knowledge and expertise in education, administration, financial aid and governmental budgeting, and took public testimony from impacted groups and individuals, as it performed an in-depth analysis of the existing and potential components of the Scholarship and the means and mechanisms available to the State to sustain it.

The Task Force reviewed the legislative history of the Scholarship (Attachments 2 – 6):

- the Taylor Plan, which served as its preliminary model
- the proposal submitted by the Governor
- the versions created by the House and Senate Education Committees
- the Alaska Performance Scholarship codified in statute today

The Task Force discussed the merit-based component of the Scholarship:

- how students become eligible
- how they apply and the level of awards they can achieve
- where and how recipients can use their scholarships
- how many students are likely to apply for and receive awards
- how much it is likely to cost the State to provide those awards (Attachment 7)

The Task Force discussed the needs-based complement to the Scholarship (Attachment 8):

- the rationale for needs-based assistance
- the proposals on the issue vetted by the Legislature
- the vehicle the Legislature used to mitigate the Scholarship's lack of an integrated needs-based assistance component - the AlaskAdvantage education grant program
- an estimate of the annual full cost of funding the current AlaskAdvantage grant program to serve as the state's needs-based assistance component

- potential modification of the AlaskAdvantage grant program to better align it with the student performance goals of the Scholarship

The Task Force discussed the budgetary tools available to the State for funding and financing the Scholarship (Attachment 9):

- the revenues available for appropriation for its support
- the fund and account structures the State can create or maintain to securely hold those funds
- the methods available to the State of ensuring the directed distribution of monies
- the advantages and disadvantages relative to each budgetary structure in relation to the goals of the Task Force

The Task Force analyzed, as representative examples, funding and financing structures submitted to the Task Force (Attachments 10 - 14):

- Two forms of Endowments
- Two Rolling-Account proposals
- the default, annual General Fund appropriation option

Finally, The Task Force discussed ideas for possible "improvements and additions" to the Scholarship, in areas including:

- mandatory curriculum
- assessment alternatives
- access to education programs through distance delivery
- the postsecondary educational system

Having concluded its fact finding and subsequent deliberations, and in accordance with its statutory mandate, the Task Force has generated a list of consensus recommendations regarding the State's postsecondary financial aid system in general and the Scholarship in particular. Those recommendations, and their supporting rationales, are included in the following report under their corresponding subject heading.

Funding and Finance

The first duty and priority for the Task Force was to "evaluate how best to provide long-term and sustainable funding for state provided financial aid for postsecondary institutions in the state" with particular emphasis being given to the performance-based Alaska Scholarship.

The Task Force analyzed – as representative examples – a number of funding and financing structures which were submitted to the Task Force. Those structures included: heavily capitalized, constitutionally protected endowment funds; heavily capitalized, statutorily created General Fund sub-accounts; moderately capitalized rolling-fund accounts; and, as a control group, the pay-as-you-go default case of annual General Fund appropriations. The Task Force also considered both the numerous revenue sources which could be tapped to provide monies for scholarships and the appropriation mechanisms available for directing such monies to specific programs, as well as the opportunities and challenges associated with each approach.

Relatively speaking, the ideal structure for ensuring a secure, long-term, sustainable funding source for the Scholarship would be a constitutional account, not unlike the Permanent Fund or Constitutional Budget Reserve, specific to the Scholarship and capitalized at a level where revenues generated from investment of the corpus would be sufficient to not only fully fund annual scholarship awards but also sufficient to inflation-proof the fund itself through reinvestment. Though subject to market volatility, such a mechanism (essentially a constitutionally protected endowment) would be highly durable, self-sustaining, more able to attract private donations through the newly augmented education tax-credit system and more likely to provide an adequate, predictable funding stream for the program.

However, such a constitutionally protected endowment account, due to the need for overwhelming legislative support and a further vote of the people, would be difficult and time consuming to create. Another substantial challenge would be capitalizing the account – identifying and appropriating the hundreds of millions of dollars in initial investment necessary to place the fund on the desired self-financing and self-sustaining footing.

One alternative to the constitutionally protected account was reflected in the Governor's original Scholarship proposal. Senate Bill 224 and House Bill 297 each called for the establishment of a "scholarship fund" - a statutorily created sub-account of the General Fund, to hold appropriations, donations and income earned on investments of fund assets. Such a statutory account would have offered, though to a lesser degree, many of the same benefits as its constitutionally protected counterpart yet, because it could be created through a purely legislative process, would have been far easier to make and could have been established on a timeline as compressed as a single legislative session.

This option, however, suffered from the same fund capitalization shortcomings (both in immediacy and scale) as its counterpart. As described in Fiscal Note 2 of SB 224, the purely

statutory endowment would still have required an initial, immediate, investment of no less than $400 million to approach fund self-sustainability.

Attempts to mitigate these capitalization challenges resulted in proposals which functionally resembled the revised School Bond Debt Reimbursement program. Under these designs, termed rolling-fund accounts by the Task Force, the fund capitalization threshold was reduced and the investment timeline extended. Under draft legislation requested for the Task Force (Attachments 15 and 16), the Scholarship Fund would be incrementally capitalized up to $160 million over a series of years as monies were deposited into the fund in excess of those required for distribution as scholarship awards. Such a system would represent a moderate continuing strain on the State's finances but would allow the Legislature to capitalize the fund without the budgetary shock of a large, one-time appropriation. Also, though a smaller account balance would not afford the fail-safe, in perpetuity funding security of a heavily capitalized endowment, the corpus of a rolling-fund would provide a reasonable level of mid-term programmatic funding assurance; allowing the State the potential of a program wind-down while still having sufficient funds to meet its obligations to Scholarship awardees already in the training/education pipeline.

The Task Force considered all of these account options to be preferable to the pay-as-you-go default case of making no specific accommodation for the Scholarship and simply allowing the Administration to submit yearly funding requests for legislative consideration.

Therefore, ***it is the recommendation of the Task Force that the Legislature immediately create, through statute, a Scholarship Fund as a sub-account within the General Fund***. As an account capitalization goal, ***the Task Force recommends the Scholarship Fund account balance to be an amount sufficient to allow the Scholarship Fund to be wholly self-sustaining both for award distribution and inflation-proofing replenishment***. As an optimal capitalization strategy, ***the Task Force would prefer, should sufficient funds be available, immediate account capitalization***. However, recognizing this may not be possible, ***the Task Force recommends, as an alternative, incremental capitalization of the Scholarship Fund to a minimum balance of $160 million***, or whatever amount the Legislature deems sufficient for it to act as a surety account for already obligated awards.

Possible funding sources for the Scholarship are many since the State has multiple sources from which it collects revenue (like severance taxes and corporate income taxes), multiple ways it generates income (like investment returns, dividends and program receipts) and dozens of existing accounts in which it is already holding money. Much of this income flows into the General Fund and is as available for appropriation to the Scholarship as it is for any other state program.

However, relying primarily on General Funds for support of a program is to subject it to the uncertainty of the budgetary process by placing it in competition with all other programs for yearly legislative prioritization and appropriation. This is a situation the Task Force, with an

overarching interest in assuring an adequate, secure and predictable funding stream to the Scholarship, would hope to avoid. Therefore, the Task Force advocates a funding regime which would require General Funds as supplemental funds only, if at all.

In general, and as much as is practicable, ***the Task Force recommends that sources of funding for the Scholarship by positively identified, "funds-in" revenue be affirmatively designated*** and General Funds be used as necessary and in supplement only. In order of preference, from "first place to go" to last, the Task Force advises the Legislature to fund the Scholarship Fund as follows:

1. Designating Interest from Specific, Existing Accounts
2. Designating Program Receipts and Dividends Revenue Sharing
3. Designating Revenues from Specific, External Sources Corporate Tax
4. Re-appropriated Assets from Liquidated Accounts
5. General Funds

Merit-based Component

Curriculum

It is the intent of the Scholarship (Attachment 17), through "increased academic rigor", to improve the academic performance of Alaska students in grades kindergarten through 12 and thereby improve preparedness for postsecondary education and successful performance at postsecondary educational institutions. As such, many Task Force discussions focused on the dual curricular offerings embedded in the codified Scholarship.

To some, the inclusion of a "liberal arts" option, allowing for the taking of three years of mathematics, four years of language arts, three years of science, four years of social studies, and two years of a foreign language or Alaska Native language, represented a diminishment of programmatic rigor, and it was argued that the State should return to the single curricular option described in House Bill 297. To others, the inclusion of the two curricular options better reflected the reality of individual scholastic propensity and represented no such diminishment.

Recognizing that other states, with longer established Taylor Plan-based scholarship programs, have wrestled with this issue, and that future adjustments regarding these broad curricular categories are always within the State's power, ***the Task Force recommends making no immediate amendment to the curricula of the Scholarship until its yearly reporting can provide the data to serve as a factual basis for alteration.***

The Task Force does, however, further recognize that broad statements regarding years of required schooling by discipline are relatively meaningless, and the State's goal of increasing academic proficiency is less likely to achieve success, without a clearer definition of precisely what courses are to be taken and what content is expected to be taught and learned. Succinctly, course rigor is dependent on content not course titles. Therefore, to ensure the quality and uniformity of statewide Scholarship curricular offerings, ***the Task Force recommends the Legislature direct, and statutorily allow, the Alaska State Department of Education & Early Development, in consultation with the Alaska State School Board and any other public or private parties deemed necessary or beneficial, to specify the required courses not specifically delineated in statute for each educational category*** (Ex. 4yrs Math = Algebra 1, Algebra 2, Geometry and Trigonometry, etc.) ***and define the content requirements and standards for those courses in regulation***. Although the State might experience resistance to such a move, the voluntary nature of the Scholarship vis-á-vis student curricular choices, coupled with the size of the State's required investment and the customary ability of scholarship sponsors to set whatever requirements it feels most likely to achieve its desired ends, are compelling justifications for such a move.

Distance Delivery

There is concern the State, due to a lack of physical infrastructure and/or virtual secondary-level educational content, may currently be unable to deliver, on a consistent basis, all facets of the rigorous curriculum required by the Scholarship to all students in all locations throughout Alaska. Therefore, recognizing that a robust, reliable distance delivery system is essential to ensuring all students will have a reasonable opportunity to compete for Scholarship awards, and to ensure equity in the Scholarship Program, ***the Task Force recommends the Legislature, in partnership with the State Department of Education and Early Development, the University of Alaska, and any other public or private parties deemed necessary or beneficial, do an assessment of the State's existing distance delivery capacity and,*** *should it be necessary,* ***develop a plan*** (including cost estimates***) for upgrading the Department's capacity to provide virtual program or distance-delivered secondary courses.***

Needs-Based Component

The original scholarship proposal (SB 224/HB297), as submitted, provided only for merit-based financial assistance but was later amended to include a needs-based component that was supplemental to the merit-based Scholarship. By supplemental, it is meant that the needs-based component was integrated within the merit-based Scholarship, creating a single program whereby a student would have to be a Scholarship recipient to be eligible to receive needs-based assistance. The goal of integrating a needs-based component into the merit scholarship was to ensure that the lesser socio-economically advantaged students who qualified for the merit scholarship would have the ability to use their merit-based award.

However, the statute that created the Scholarship (SB 221) used the AlaskAdvantage education grant program – an existing, stand alone program which, as a function of historic funding levels, had only been able to provide grants to those students demonstrating the highest level of financial need based on the methodology used in the Free Application for Federal Student Aid: primarily non-traditional, older students - to address the possible necessity for added assistance by Scholarship awardees specifically and the acknowledged insufficiency of state-funded needs-based financial assistance in Alaska generally.

This was not a perfect fit as these programs were not designed to work in concert and generally target groups which are not aligned. The AlaskAdvantage grant program has much broader eligibility standards than the Scholarship. Seeking to make the Scholarship's qualifications the same as for AlaskAdvantage would greatly impair, or even eliminate, its efficacy related to its broad-based programmatic goals just as seeking to amend AlaskAdvantage education grant's qualifications to mirror those of the Scholarship would render it unavailable to many of the groups it currently serves. However, the Task Force recognizes the value of the programs, their complementary natures and the statewide benefit of maintaining them both.

Therefore, ***the Task Force recommends the creation of a second needs-based assistance program: a needs-based component, similar or identical to the one proposed in Education Committee versions of SB224/HB297, to be reintegrated into the Scholarship.*** Such a supplement will allow the Scholarship to more fully serve its high achieving, traditional student population. However, recognizing the indeterminate funding liability potential of the need-based supplement, ***the Task Force recommends the integrated needs-based component be capped***, either at a 2010 amount of $4,755 (as the merit-based portion of the Scholarship award has been capped at the 2010 UA tuition amount) or some other reasonable figure. ***The Task Force further recommends continued funding, at a level commensurate with its full functioning, of the AlaskAdvantage grant program***, allowing it to serve the non-traditional, General Education Development (GED), and older students as prioritized for grants under the program's current criteria. Finally, though they are to be programmatically separate***, the Task***

Force recommends the supplemented Scholarship and AlaskAdvantage grant programs be funded through the same mechanism, perhaps, though not necessarily, ***under a funding formula which will ensure adequate support for both***.

Other Policy Recommendations Regarding Scholarship Investments

It is recognized that remedial courses delivered at the postsecondary level may entail public and/or private expense but do not count for degree credit. Also, by delaying progress toward completion, the need for remediation substantially reduces the probability a student will ever complete a degree/certificate program. Therefore, a goal of the Legislature in establishing a merit scholarship program was to create a source of transformational pressure on Alaska's K-12 system - a renewed impetus for it to adequately prepare students for successful entry into college and career/tech - and, in so doing, ensure scholarship awardees will not need to expend time or personal capital on developmental education (remedial) courses.

Degree/certificate completion – not simply attendance – is the investment objective of the State. It should therefore look at factors that produce delay in progress or otherwise contribute significantly to non-completion. What other policies should be instituted in the scholarship program to stimulate postsecondary education changes to incentivize completion and make our money count? On-time completion will also become vital to Alaska institutions as a scholarship program becomes fully implemented because the anticipated growth in student enrollment may well overwhelm available capacity if students do not progress more rapidly. The following suggestions are programmatic recommendations to advance that goal:

The Task Force recommends that any institution which accepts Scholarship awards should integrate an advisor/advocate program to assist Scholarship awardees.

Evidence shows that advisor/advocate programs work at all education levels. Many designs are in use across the nation. Private institutions with traditionally high completion rates almost always incorporate a rigorous advising model. The University of Nevada even aids students through a Course Concierge program (Attachment 18). Some initiatives such as Complete College America presume advising programs as evidenced in discussion of retention rate metrics by the statement that colleges "can actively work to better engage those students during their first year...." The Task Force heard testimony that University of Alaska Fairbanks (UAF), with mandatory advising for all degree seekers, has a five-year completion rate which is 50% higher than University of Alaska Anchorage (UAA) with optional advising for degree candidates. As the State will be making a significant investment in the scholarship student, it is reasonable for the State to request that institutions receiving those funds advise that student on how to remain on track toward graduation.

The Task Force recommends that institutions accepting Scholarship awardees should assist them in maximizing the value of their awards by providing timely course offerings (or courses

of study) that allow for completion of certificate and/or degree programs within a two- or four-year course of study.

This would not guarantee that all students would progress perfectly but would mean that those who desire to move forward would be provided that opportunity. The diversity of methods for providing access to courses for on-time completion has never been more available to Alaska institutions. Programs such as the Western Interstate Commission for Higher Education's Internet Course Exchange (WICHE ICE) or other programs through participating institutions permit students to take courses not otherwise available to them. It will be important for all programs requiring more than 60 units for an AA certificate and more than 120 credits for a BA/BS degree to provide students the estimation of time for completion so they can reasonably assess the probability of their Scholarship funding their education through completion and make further arrangements as appropriate or necessary.

Joint Legislative
Higher Education Scholarship Funding
Task Force

Membership:

Chair: Senator Meyer
Vice-chair: Representative Seaton

Senate	House
Senator Johnny Ellis	Representative Peggy Wilson
Senator Lyman Hoffman	Representative Wes Keller
Senator Gary Stevens	Representative Anna Fairclough
Senator Joe Thomas	Representative Chris Tuck

Administration

Department of Education: Eddy Jeans, Education Policy Coordinator
University of Alaska: Saichi Oba, Associate Vice President
OMB: Karen Rehfeld, Director
ACPE: Diane Barrans, Director
AK State Board of Education: Esther Cox, Chair

Purpose: Examine higher education costs and identify the best approach in providing financial aid to assist students in the state.

Duties:

- Evaluate how best to provide long-term and sustainable funding for state provided financial aid for postsecondary institutions in the state, including scholarship opportunities
- Evaluate proposals that are based on available facts and conclusions pertaining to financial aid opportunities at postsecondary institutions in the state.
- Recommend improvements or additions to the laws providing for financial aid at postsecondary institutions.
- Take public comments on financial aid opportunities in the state.

Attachment 2

TAYLOR PLAN – Louisiana (2014 Graduates)

*CURRICULUM**

Four (4) years of math
Four (4) years of Language Arts
Four (4) years of Science
Four (4) years of Social Studies
One (1) year Fine Arts
Two (2) years Foreign Language

*Specific required courses spelled out in publications

MINIMUM ACHIEVEMENT

- 2.5 or higher cumulative GPA
- Composite ACT of 20 or above

STANDARD AWARD

State-paid tuition at any public two- or four-year college, university or vocational/technical school or equivalent award at any in-state private institution.

ADDITIONAL AWARDS

- $400 for students with a GPA of 3.5 or better, and ACT of 23 or higher
- $800 for students with a GPA of 3.5 or better, and ACT of 27 or higher

Attachment 3

GOVERNOR'S PERFORMANCE SCHOLARSHIP

QUALIFICATIONS OF APPLICANTS

- Alaska Residents who have applied, or will apply, no more than six (6) months before or after date of graduation.
- Will use the scholarship at a qualified (Alaskan) post secondary institution no later than 6 years after the beginning of the first school year after graduation.

ELIGIBILITY

- Completed Core Curriculum
- Met minimum grade-point average threshold
- Met minimum career-skills assessment or college entrance examination threshold
- Be enrolled in a certificate or degree-seeking program

*CURRICULUM**

Four (4) years of math
Four (4) years of Language Arts
Four (4) years of Science
Three (3) years of Social Studies

*Specifics TBA

AWARD LEVELS ***

- 3.5 and up - 100% of qualified tuition
- 3.0-3.49 - 75% of qualified tuition
- 2.5-2.99 - 50% of qualified tuition

*Minimum test scores per tier, and how they would impact awards, TBA
**Career Scholarship award not to exceed $3,000 per school year

ESTIMATED PROGRAMMATIC COST

FY 2012 - $8,221,935
FY 2016 - $20,556,621

Attachment 4

SENATE EDUCATION COMMITTEE

QUALIFICATIONS OF APPLICANT

- Alaska Residents who have applied, or will apply, no more than six (6) months before or after date of graduation.
- Will use the scholarship at a qualified (Alaskan) post secondary institution no later than 6 years after the beginning of the first school year after graduation.

ELIGIBILITY

- Completed Core Curriculum
- Met minimum grade-point average threshold
- Met minimum career-skills assessment or college entrance examination threshold
- Be enrolled in a certificate or degree-seeking program

Attachment 8

Attachment 8

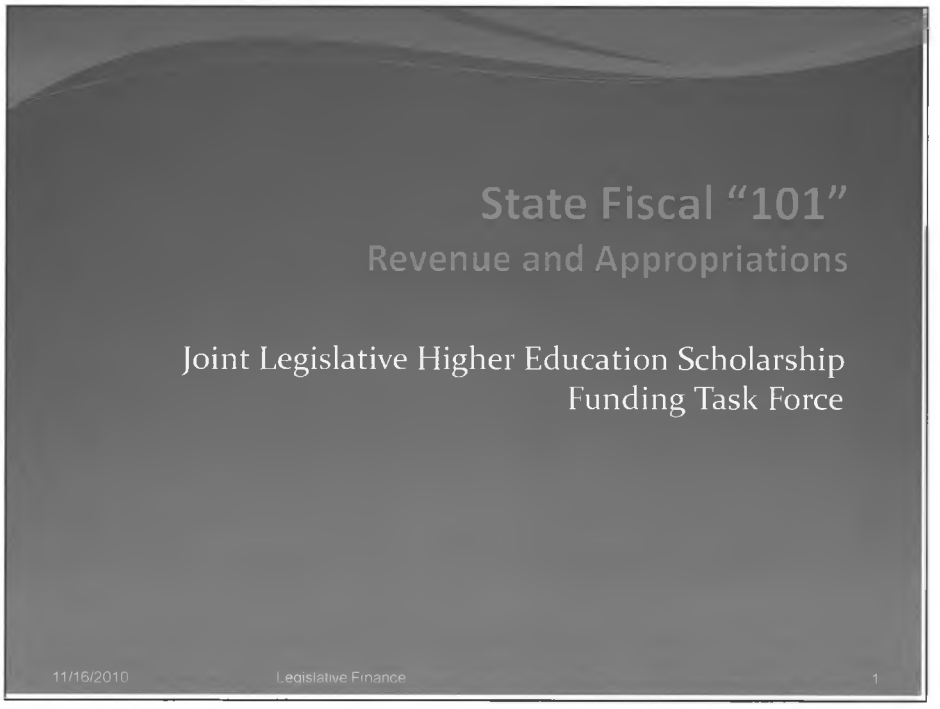
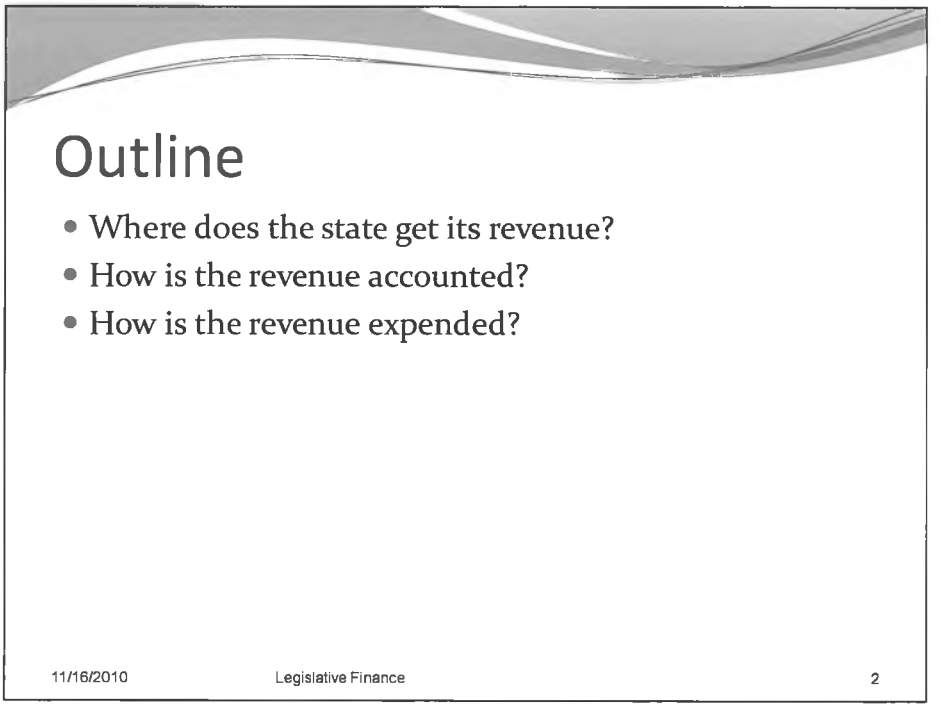
Attachment 9

Legislative Finance ***State Fiscal "101"*** Presentation:





Attachment 9

Revenue Sources

- Oil
- Non-Oil (excluding Investment)
- Investment
- Federal

Oil Revenue

- Royalty
  - Leasing of state land and royalty payment as land owner
- Production Tax
  - Net profits tax on production
- Petroleum Property Tax
  - Property tax on oil and gas property in state
- O&G Corporate Income Tax
  - Income tax on oil and gas corporations

Attachment 9

Non-Oil (excluding investment)

- Corporate Income Tax (non-oil companies)
- Excise Taxes
  - Tobacco, alcoholic beverages, motor fuel
- Licenses and Permits
  - Fishing Hunting, Motor Vehicle
- Charges for Services
  - Marine Highway, other program receipts

Investment Income

- GF Earnings (relatively new)
- CBR
- Permanent Fund

Attachment 9

How is revenue accounted?

- The primary operating fund of the state is the General Fund
  - The general fund has numerous sub-funds created by law
- Other fund types outside the general fund include (but not limited to):
  - Permanent Funds
  - Fiduciary Funds
  - Component Units

11/16/2010 Legislative Finance 7

Accounting ≠ Budgeting

Both accounting and budgeting are fiscal systems

- Accounting focuses on recording financial transactions
- Budgeting is more the enactment of a fiscal plan
  - Budget processes are dependent upon the accounting of past and current year expenditures and revenue
- Accounting follows generally accepted accounting practices (GASB)
- Budgeting does not follow a stringent set of rules

11/16/2010 Legislative Finance 8

Attachment 9

How is revenue expended?

- Legislature has the **Power of Appropriation**
  - No expenditure of state funds w/o an appropriation
- Legislature appropriates funds based on levels of discretion

Levels of Discretion (Highest to Lowest)

Fund sources (revenues) grouped according to levels of discretion

- Unrestricted General Funds
- Designated General Funds
- Other State Funds
- Dedicated Funds

Attachment 9

Dedicated

- Very little discretion how appropriated
- Article IX, Section 7 of the Constitution prohibits the dedication of revenue to any special purpose
  - Exceptions:
    - Article IX, Section 15 – Permanent Fund
    - Dedication prior to Statehood
    - Federal

Other State Funds

- Little discretion how appropriated
- Although not dedicated, funding sources in the group typically are restricted in some fashion
  - Contractual obligation
    - Bonds
  - Held in trust
    - PERS, TRS, etc.
  - Court order
    - Mental Health Trust
  - Legal separation
    - Corporate receipts

Attachment 9

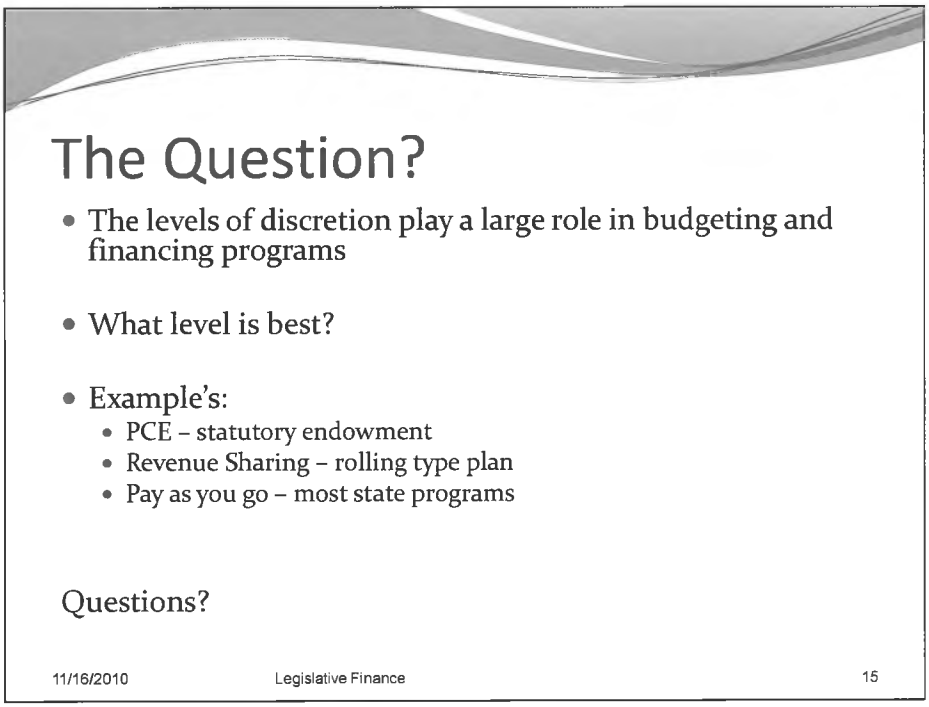
Designated General Funds

- Designated General funds consist of fund sources that have been "designated" for a special purpose in statute
- Constitutional prohibition "trumps" statutory designation
- Therefore, Legislature has complete discretion on use of funding
- However, Legislature typically follows statutory "guidelines"

Unrestricted General Funds

- Complete discretion how appropriated
- Typically referenced as a measure of state spending
- Utilized when calculating the Fiscal Surplus or Fiscal Gap
  - General Fund Revenue less General Fund Appropriations = Fiscal Surplus or (Gap)
- Approximately 90% of GF revenue is derived from Oil

Attachment 9



Attachment 10

Endowment Structure

Example A: **$400 Million Constitutional Fund**

Equivalent: Permanent Fund

Operation:

- $400 deposited to capitalize constitutionally created fund
- Invested for long-term return
- Earnings ($20 M/yr at assumed 5% ROI) accrue to account
- Excess earnings inflation-proof fund
- Account pays scholarships

STRENGTHS	WEAKNESSES
• Highest potential for long-term programmatic sustainability • Principal is safe • Inflation proof • Earnings provide predictable pay-out funding stream • Earnings: Very safe from "raiding" if const. protected	• Necessity for large Initial investment • Necessity for constitutional amendment • Account is rare • Higher administrative cost? • Subject to market volatility • Questionable base for programmatic evolution
OPPORTUNITIES	**THREATS**
• High profile focal point for State investment • Highest likelihood of attracting outside donations	• Pandora's box and the Christmas tree effect • Earnings susceptible to "raiding" if not const. protected • Subject to market volatility

Attachment 11

Endowment Structure

Example B: **$400 Million Statutory Fund (General Fund Sub-account)**

Equivalent: Power Cost Equalization Fund

Operation:

- $400 deposited to capitalize fund
- Invested for long-term return
- Earnings ($20 M/yr at assumed 5% ROI) accrue to account
- Excess earnings inflation-proof fund
- Account pays scholarships

STRENGTHS	WEAKNESSES
• High potential for long-term programmatic sustainability • Tried mechanism • Principal offers strongest programmatic insurance policy of unprotected fund-types • Earnings provide predictable pay-out funding stream	• Necessity for large initial investment • Higher administrative cost? • Subject to market volatility • Questionable base for programmatic evolution
OPPORTUNITIES	**THREATS**
• High profile focal point for State investment • Strong base for programmatic evolution • Likelihood of attracting outside donations	• Principal susceptible to "raiding" • Earnings susceptible to "raiding"

Attachment 12

"Rolling Fund" Structure

Example A: **Progressive Capitalization**

Equivalent: Community Revenue Sharing

Operation:

- Progressive fund capitalized up to $160 million
- Interest bearing fund
- Principal and interest earnings pay for scholarships
- Yearly appropriations used to maintain value of fund corpus

STRENGTHS	WEAKNESSES
• Low capitalization hurdle • Tried mechanism • Lower administrative cost than endowment • Greater pay-out stream predictability than Default • Principal acts as fixed-term programmatic insurance policy	• Susceptible to budget volatility • Susceptible to budgetary process • Less than predictable pay-out funding stream • Lower likelihood of attracting outside donations than Endowment
OPPORTUNITIES	**THREATS**
• Responsive to programmatic evolution • Some likelihood of attracting outside donations	• Declining oil production/revenue • Declining federal spending • Increasing demand for services • Principal susceptible to "raiding" • Earnings susceptible to "raiding"

Attachment 13

"Rolling Fund" Structure

Example B: **Immediate Capitalization**

Equivalent: Community Revenue Sharing

Operation:

- Immediate fund capitalized up to $200 million
- Interest bearing fund
- Principal and interest earnings pay for scholarships
- Yearly appropriations* used to maintain value of fund corpus
  *Dividends, program receipts and other funds (AIDEA, AK Housing, ACPE) designated to Scholarship Fund

STRENGTHS	WEAKNESSES
• Moderate capitalization hurdle • Tried mechanism • Identified fund replenishment stream • Lower administrative cost than Endowment • Greater pay-out stream predictability than Default • Principal acts as fixed-term programmatic insurance policy	• Necessity for substantial Initial investment • Susceptible to budget volatility • Susceptible to budgetary process • Less than predictable pay-out funding stream • Lower likelihood of attracting outside donations than Endowment
OPPORTUNITIES	**THREATS**
• Responsive to programmatic evolution • Some likelihood of attracting outside donations	• Declining oil production/revenue • Declining federal spending • Increasing demand for services • Principal susceptible to "raiding" • Earnings susceptible to "raiding"

Attachment 14

Default Structure

Example: **Pay-As-You-Go**

Equivalent: Senate Bill 221

Operation: Yearly appropriation to support programmatic costs

STRENGTHS	WEAKNESSES
• Most routine funding mechanism • No need for account creation • Lowest administrative cost • Yearly funding most directly matches yearly programmatic cost • Leaves greatest level of budgetary flexibility	• Most susceptible to budget volatility • Most susceptible to budgetary process • Least predictable pay-out funding stream • Lowest likelihood of attracting outside donations
OPPORTUNITIES	**THREATS**
• Most responsive to programmatic evolution	• Declining oil production/revenue • Declining Federal spending • Increasing demand for services

9/7/10

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Introduced:
Referred:

A BILL

FOR AN ACT ENTITLED

"An Act relating to Alaska scholarship awards; and establishing the Alaska scholarship award income account and the Alaska scholarship fund."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.43.825(f) is repealed and reenacted to read:

(f) Payment of a scholarship is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible scholarships, the commission may not award a scholarship to a new applicant and the commission shall pay existing awards on a pro rata basis for that fiscal year.

*** Sec. 2.** AS 14.43 is amended by adding a new section to read:

Sec. 14.43.835. Alaska scholarship award income account. The Alaska scholarship award income account is created as an account in the general fund. Money may be appropriated into the account from the Alaska scholarship fund under AS 37.14.750 and from other sources. The commission may use the money in the

Attachment 15

account to pay scholarships awarded to students under AS 14.43.810 - 14.43.849. The amount determined under AS 37.14.750(c) each year and deposited into the account is the maximum amount that may be used to pay scholarships for the immediately succeeding fiscal year.

*** Sec. 3.** AS 37.14 is amended by adding a new section to read:

Article 8A. Alaska Scholarship Fund.

Sec. 37.14.750. Alaska scholarship fund established. (a) The Alaska scholarship fund is established in the general fund for the purpose of making scholarship payments to qualified postsecondary institutions and students under AS 14.43.810 - 14.43.849. The fund consists of money appropriated to the fund. Income earned on money in the fund and donations to the fund may be appropriated to the Alaska scholarship income account established in AS 14.43.835. Money in the fund does not lapse.

(b) Each fiscal year, the legislature may appropriate to the Alaska scholarship fund an amount equal to 20 percent of the money received by the state during the previous calendar year under AS 43.55.011(g). The amount may not exceed the greater of

(1) $40,000,000; or

(2) the amount that, when added to the fund balance on June 30 of the previous fiscal year, equals $160,000,000.

(c) The balance in the Alaska scholarship fund shall be determined on June 30 of each year. The department shall distribute one-third of that amount or $40,000,000, whichever is less, for deposit into the account established in AS 14.43.835. If the fund balance is less than $80,000,000 in a fiscal year, payments may be made only to satisfy obligations from previous fiscal years.

(d) Notwithstanding the limitation in (b) of this section, the legislature may appropriate any amount to the Alaska scholarship fund. Nothing in this section creates a dedicated fund.

(e) In this section, unless the context requires otherwise, "fund" means the Alaska scholarship fund established in (a) of this section.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to

Attachment 15

read:

TRANSITION: ALASKA SCHOLARSHIP FUND BALANCE. Notwithstanding the $40,000,000 limit in AS 37.14.750(b), the following amounts shall be substituted for that amount as follows for

(1) fiscal year 2012, $15,000,000;

(2) fiscal year 2013, $30,000,000.

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Introduced:
Referred:

A BILL

FOR AN ACT ENTITLED

"An Act relating to AlaskAdvantage education grant funding and to Alaska scholarship funding; and establishing an account and fund for those purposes."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.43.410 is amended by adding a new subsection to read:

(c) Notwithstanding the provisions of this section, payment of a grant is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible grants, the commission may not award a grant to a new applicant, and the commission shall pay existing awards on a pro rata basis for that fiscal year.

*** Sec. 2.** AS 14.43.825(f) is repealed and reenacted to read:

(f) Payment of a scholarship is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible scholarships, the commission may not award a scholarship to a new applicant, and the commission shall pay existing awards

Attachment 16

on a pro rata basis for that fiscal year.

*** Sec. 3.** AS 14.43 is amended by adding a new section to read:

Sec. 14.43.915. AlaskAdvantage education grant and Alaska scholarship award income account. The AlaskAdvantage education grant and Alaska scholarship award income account is created as an account in the general fund. Money may be appropriated into the account from the AlaskAdvantage education grant and Alaska scholarship fund under AS 37.14.750 and from other sources. The commission may use the money in the account to pay grants awarded under AS 14.43.400 - 14.43.420 and scholarships awarded to students under AS 14.43.810 - 14.43.849. The amount determined under AS 37.14.750(c) each year and deposited into the account is the maximum amount that may be used to pay scholarships for the immediately succeeding fiscal year.

*** Sec. 4.** AS 37.14 is amended by adding a new section to read:

Article 8A. AlaskAdvantage Education Grant and Alaska Scholarship Fund.

Sec. 37.14.750. AlaskAdvantage education grant and Alaska scholarship fund established. (a) The AlaskAdvantage education grant and Alaska scholarship fund is established in the general fund for the purpose of making grant payments under AS 14.43.400 - 14.43.420 and scholarship payments to qualified postsecondary institutions and students under AS 14.43.810 - 14.43.849. The fund consists of money appropriated to the fund. Income earned on money in the fund and donations to the fund may be appropriated to the AlaskAdvantage education grant and Alaska scholarship award income account established in AS 14.43.915. Money in the fund does not lapse.

(b) Each fiscal year, the legislature may appropriate to the AlaskAdvantage education grant and Alaska scholarship fund an amount equal to 20 percent of the money received by the state during the previous calendar year under AS 43.55.011(g). The amount may not exceed the greater of

(1) $40,000,000; or

(2) the amount that, when added to the fund balance on June 30 of the previous fiscal year, equals $160,000,000.

(c) The balance in the AlaskAdvantage education grant and Alaska

Attachment 16

scholarship fund shall be determined on June 30 of each year. The department shall distribute one-third of that amount or $40,000,000, whichever is less, for deposit into the account established in AS 14.43.915. If the fund balance is less than $80,000,000 in a fiscal year, payments may be made only to satisfy obligations from previous fiscal years.

(d) Notwithstanding the limitation in (b) of this section, the legislature may appropriate any amount to the AlaskAdvantage education grant and Alaska scholarship fund. Nothing in this section creates a dedicated fund.

(e) In this section, unless the context requires otherwise, "fund" means the AlaskAdvantage education grant and Alaska scholarship fund established in (a) of this section.

* **Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: ALASKADVANTAGE EDUCATION GRANT AND ALASKA SCHOLARSHIP FUND BALANCE. Notwithstanding the $40,000,000 limit in AS 37.14.750(b), the following amounts shall be substituted for that amount as follows for

(1) fiscal year 2012, $15,000,000;

(2) fiscal year 2013, $30,000,000.

SENATOR DONALD OLSON

SENATOR GARY STEVENS

Letter of Intent for Senate Bill 224

An Act establishing the Alaska Student Achievement Program...

It is the intent of the legislature to establish a scholarship program with the following goals:

(1) improving preparedness of Alaska students for postsecondary education;

(2) improving the postsecondary academic achievement;

(3) improving the postsecondary graduation rates of students in the state;

(4) providing a rigorous curriculum in all high schools in the state;

(5) improving the quality of the educational programs offered by high schools in the state;

(6) improving academic performance of students in grades kindergarten through 12 in the state;

(7) increasing high school graduation rates in the state;

(8) increasing the scores of high school students in the state on college entrance examinations;

(9) expanding the pool of high school students in the state who pursue postsecondary opportunities;

(10) increasing participation of Alaska high school graduates in Alaska postsecondary institutions; and

(11) increasing job training opportunities in the state

Need That Class, Desperately? The Course Concierge Will See You Now

Jean Dixon, University of Nevada

Paul Neill, whom students think of as the "course concierge" at the U. of Nevada at Reno, can cut red tape that might be beyond advisers' reach.

By Eric Hoover

Paul Neill's title is director of the core curriculum at the University of Nevada at Reno, but students there know him as the "course concierge." He's the one they contact when they can't get into a class they need.

A few years ago, officials at the university decided that they had to do more to reduce the hassles of registering for courses. They imagined a kind of registration czar, someone who could communicate well with faculty members but who had the authority of an administrator. Mr. Neill, a faculty member who works in the provost's office, fit the bill.

Soon Nevada was promoting Mr. Neill as the course concierge, the man advisers and students could turn to when stuck. Each semester, he helps 50 to 60 students solve their scheduling problems, working one on one with those who need a particular course to graduate, or who have trouble getting into classes they must take in a sequence. Often he creates a spot in a class that's full, or steers students to suitable alternatives.

"In the past, it was often left up to the student and the professor to see who could get in where," Mr. Neill says. "It was very informal."

Attachment 18

Even in times of plenty, students often learn a tough lesson when they register for courses: You can't always get what you want. In this era of budget cuts, however, students on some campuses have scrambled to get not only the courses they would like but also those they need for their majors and to satisfy core requirements.

As colleges pack more students into fewer courses, the scheduling puzzle has become more challenging for administrators, instructors, and students alike. Institutions are using a variety of strategies to alleviate the course crunch, and often that begins with improving the registration process.

Nevada's president, Milton D. Glick, proposed the course-concierge program as a way to improve timely progression toward degrees at the university, which has about 13,000 undergraduates. Over the years he has learned that even small scheduling snags can discourage students, delay their progress, and make them more likely to transfer or drop out.

After he arrived, in 2006, Mr. Glick developed a plan to improve Nevada's retention and graduation rates. He pledged publicly that students would get the courses they needed to graduate on time. To that end, his course-concierge program provides a backstop for the university's academic advisers.

Mr. Neill is not a replacement for advisers, who continue to meet with students and help them select courses. But they sometimes encounter dilemmas that they can't handle on their own. "They don't always have the ability to cut through red tape, to get through to the department, to get something done," Mr. Glick says. "Paul can get a phone call through."

'A Relief Valve'

When Natica Rudavsky contacted Mr. Neill this winter, she was frantic. Ms. Rudavsky, a transfer student who has a bachelor's degree from another university, wanted to pursue a second degree, in nutrition, at Nevada, but she was confused about which core requirements would apply to her. Would the university waive that required mathematics course?

By the time she and her adviser had sorted that out, it was late in the registration cycle, and all the courses she needed were full. Mr. Neill evaluated her record, then discussed her options with her. Ultimately, he found Ms. Rudavsky a spot in three of the four courses she sought. "If he hadn't helped, " Ms. Rudavsky says, "I probably would have just waited until the next semester to enroll."

Attachment 18

The course concierge doesn't cater to whims. A student who just wants to avoid that 8 a.m. class would not get help from Mr. Neill. The same might go for a senior who had never bothered to register for a required course that he had every opportunity to take.

The service does cater to those who truly have a need, or are simply stuck or confused. "We've taken some of the burden off the shoulders of advisers," he says. "It's a relief valve."

The course concierge has also helped the university plan more effectively during a difficult time. For the current fiscal year, the state cut the university's budget by $33-million, or 15 percent. Last semester, Nevada offered 96 fewer course sections than it did in the fall of 2008, a 6-percent reduction.

Recently, Mr. Neill's work with students helped him identify scheduling conflicts that made it difficult for them to register for the right courses. For instance, freshmen and sophomores taking biology or chemistry courses are supposed to enroll simultaneously in Math 127. Yet Mr. Neill realized that that math lecture overlapped with several of the laboratory sections.

He discussed the issue with the three departments, which adjusted their schedules accordingly. "The departments probably would have become aware of this," he says, "but the concierge service helped them understand it quickly."

Better Communication

Elsewhere, administrators have looked for ways to make small but meaningful changes in the registration process. This fall the University of California at Santa Barbara, which has seen substantial budget cuts and an enrollment surge, created an online waiting list for courses. The system formalized the process of determining who gets a spot, allowing advisers to better evaluate students' needs and communicate with them more effectively.

"It was a huge help," says Mary Nisbet, acting dean of undergraduate education. "Now faculty aren't getting hundreds of e-mails, and students know there is somewhere to go where advisers will get back to them."

This past fall, the university reduced the number of credits students could sign up for during the second round of registration. As a result, juniors and seniors, who have priority, can snag a total of four classes, instead of five, at that time.

Attachment 18

In the past, many students eventually dropped their fifth course anyway. The new policy has encouraged older students to focus on getting the courses they really need, and the change recently freed up at least 1,500 class spots for other students, Ms. Nisbet says.

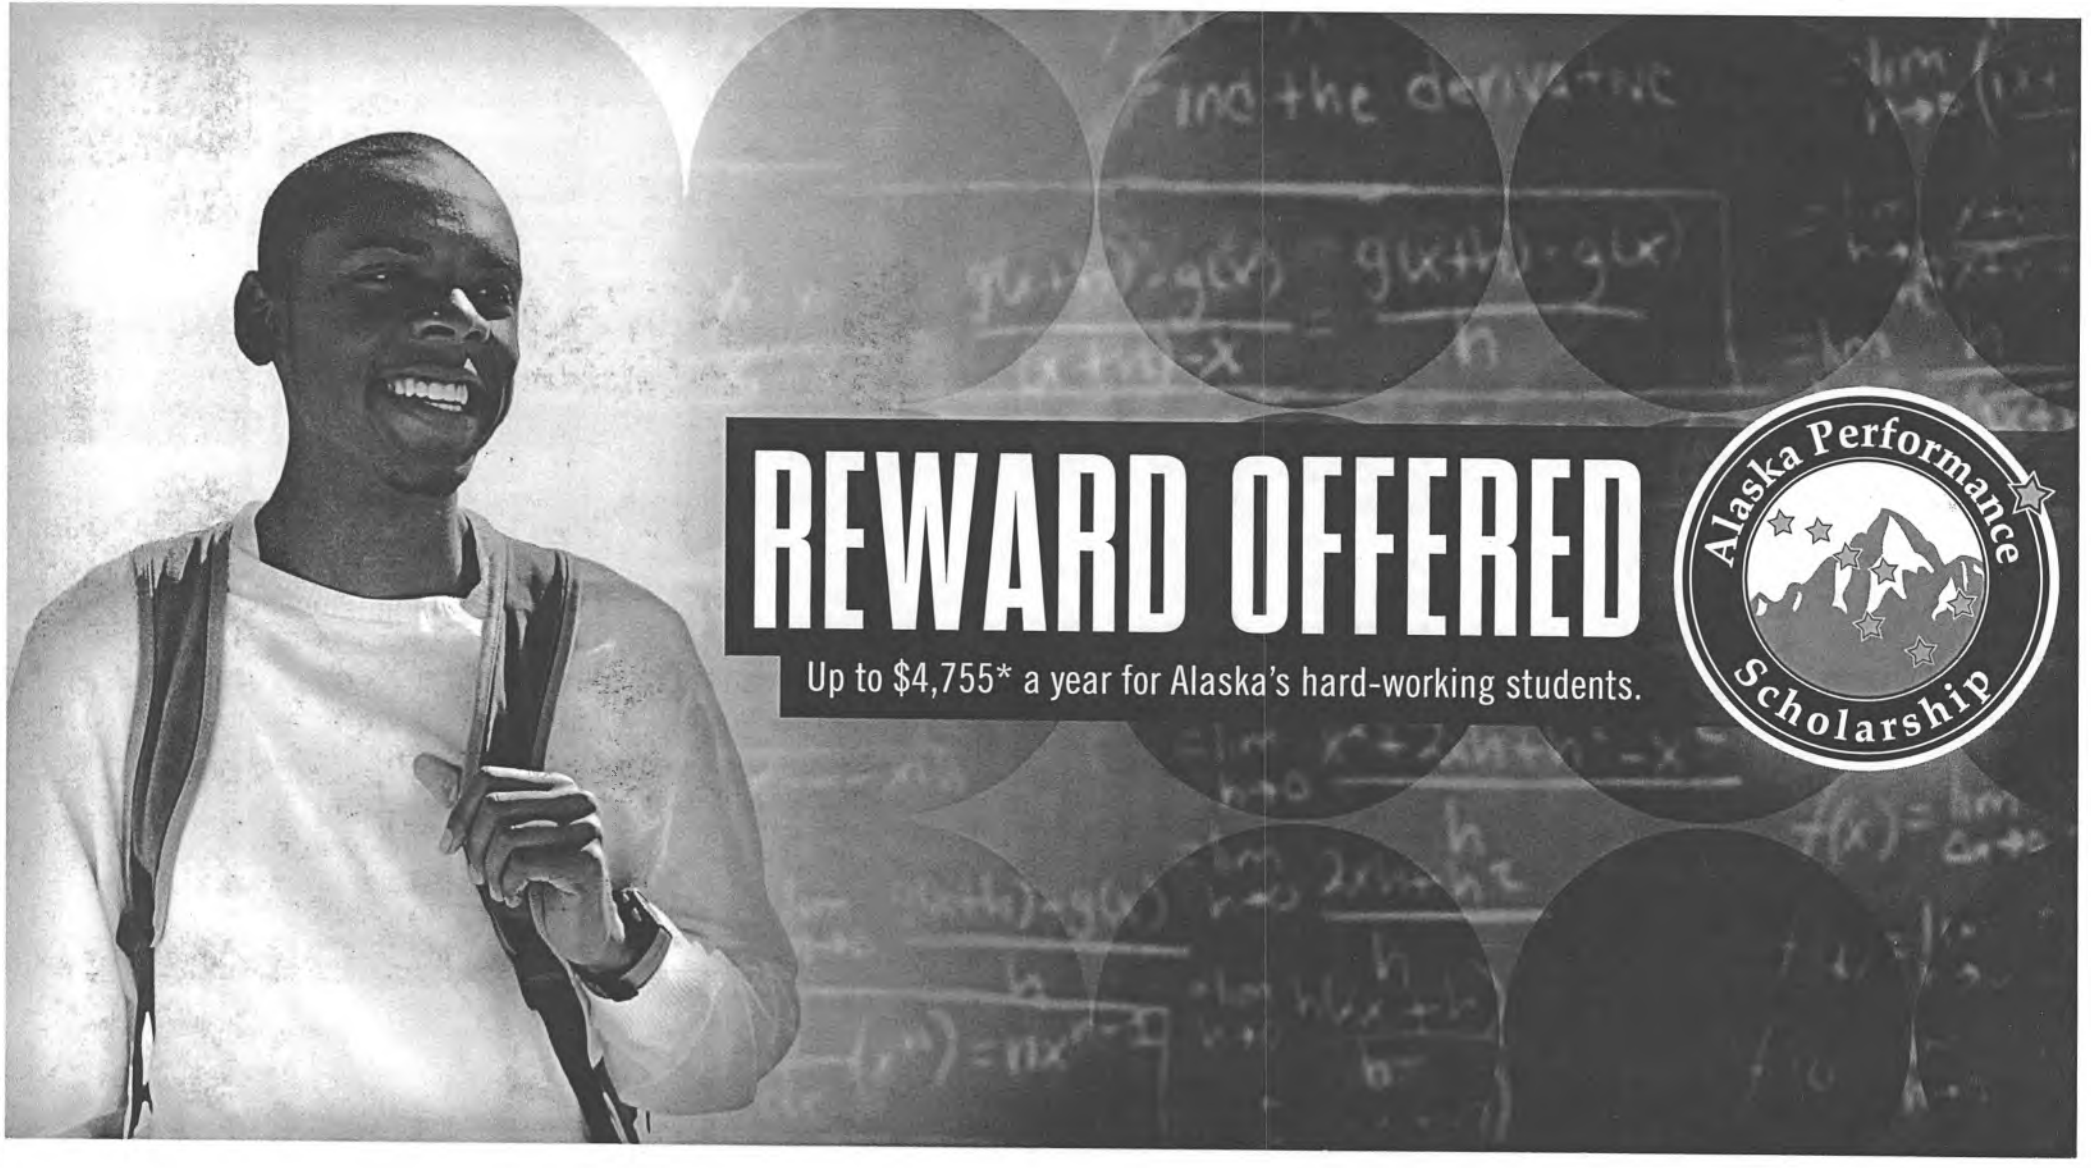
For the first time, the university is offering schedule-planning workshops, in which students learn how to prioritize. "We're trying to help students weather a storm," she says.

Many institutions have turned to sophisticated data analysis to better anticipate course demand. At the University of California at Berkeley, Catherine P. Koshland helps lead a task force that will determine which courses students will need—and how many—in the coming years.

To do that, Ms. Koshland and her colleagues have begun to examine a decade's worth of enrollment data, which help them predict how many freshmen will need to take a specific math sequence, for instance, or how many sections of pre-med physics courses the university will need.

"We can bring some rationality to the offerings, rather than having departments guesstimate," says Ms. Koshland, vice provost for teaching, learning, academic planning, and facilities. "We're bringing more and more discipline to something that could grow organically before, when there was elasticity in the system. There's no elasticity now."

(Head Count explores the changing enrollment landscape. Please send ideas to eric.hoover@chronicle.com)



REWARD OFFERED
Up to $4,755* a year for Alaska's hard-working students.
Alaska Performance Scholarship

Alaska Performance Scholarship

What should I do now ?

- ✓ Discuss the APS curriculum with your high school counselor or academic advisor.
- ✓ Sign up for the SAT and/or ACT ASAP! Have your scores sent to your high school. They must be received before you graduate.

The Alaska Performance Scholarship (APS) is an invitation to excellence for Alaska's students, parents, and educators. To be eligible, students must take a specific, rigorous high school curriculum; earn a minimum 2.5 GPA; and do well on a qualifying college or career-readiness exam. Three award levels are offered and any future Alaska high school graduate may become eligible!

For more information and specific requirements go to: **APS.alaska.gov**

To apply, most qualified students need to complete only the Free Application for Federal Student Aid (FAFSA). Awards can be used at participating colleges or universities in Alaska, or for approved career and technical education programs in the state.

***Administered by the Alaska Commission on Postsecondary Education, the APS is a program of the State of Alaska and subject to annual approval of funding**

Chapter No.
_____

AN ACT

Relating to the AlaskAdvantage education grant program; relating to professional student exchange program availability; establishing the Alaska merit scholarship program and relating to the program; relating to student records; making conforming amendments; establishing a Joint Legislative Higher Education Scholarship Funding Task Force; establishing an advisory task force on higher education and career readiness in the legislative branch of government; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1

AN ACT

Relating to the AlaskAdvantage education grant program; relating to professional student exchange program availability; establishing the Alaska merit scholarship program and relating to the program; relating to student records; making conforming amendments; establishing a Joint Legislative Higher Education Scholarship Funding Task Force; establishing an advisory task force on higher education and career readiness in the legislative branch of government; and providing for an effective date.

---

* **Section 1.** AS 14.03 is amended by adding a new section to read:

Sec. 14.03.113. District determination of scholarship eligibility. A school district shall determine whether a student who graduates from a high school in the district is eligible for an award of an Alaska merit scholarship program scholarship under AS 14.43.810 - 14.43.850. If a student is eligible, the district shall state in the student's permanent record the highest level of funding for which the student is

eligible. A district shall provide a student with an opportunity to request that the district correct an error in the eligibility determination.

* **Sec. 2.** AS 14.42.030(e) is amended to read:

(e) The commission may

(1) adopt regulations under AS 44.62 (Administrative Procedure Act) to

(A) carry out the purposes of

(i) **AS 14.43.091 - 14.43.850** [AS 14.43.091 - 14.43.750], 14.43.990, AS 14.44, and AS 14.48; and

(ii) AS 14.43.910 and 14.43.920 as they relate to the purposes of **AS 14.43.091 - 14.43.850** [AS 14.43.091 - 14.43.750], 14.43.990, AS 14.44, and AS 14.48;

(B) ensure compliance with the requirements imposed by state and federal statutes and regulations governing the guaranty, insurance, purchase, or other dealings in eligible loans by federal agencies, instrumentalities, or corporations; and

(C) establish standards for the

(i) administration of hearings conducted under AS 14.43.153; and

(ii) administrative enforcement of collection orders under AS 14.43.151 - 14.43.155;

(2) delegate to the executive director of the commission or a subcommittee of the commission any duty imposed on or power granted to the commission by this chapter, AS 14.43, AS 14.44, or AS 14.48, except its power to adopt regulations and its duty to consider appeals under AS 14.43.100(b) and AS 14.48.120;

(3) establish task forces, committees, or subcommittees, not necessarily consisting of commission members, to advise and assist the commission in carrying out its functions;

(4) contract with or use existing institutions of postsecondary education or other individuals or organizations to make studies, conduct surveys,

submit recommendations, or otherwise contribute to the work of the commission;

(5) establish fees for the review of an out-of-state institution that

(A) requests approval for participation in the programs under AS 14.43.091 - 14.43.750, 14.43.990, and AS 14.44; and

(B) is not accredited by a national or regional accreditation association recognized by the Council for Higher Education Accreditation; and

(6) collect all fees and costs incurred in collection of the amount owed on a loan or repayment obligation if the loan or repayment obligation becomes delinquent or in default; in this paragraph, fees and costs include attorney fees, court costs, and collection fees charged by a collection agency.

* **Sec. 3.** AS 14.43.420(a) is amended to read:

(a) A grant made under AS 14.43.400 - 14.43.420 may not be in an amount less than $500 nor more than **$3,000** [$2,000] for each school year.

* **Sec. 4.** AS 14.43.420(c) is amended to read:

(c) A student may receive not more than a total of **$12,000** [$8,000] in grants awarded under AS 14.43.400 - 14.43.420.

* **Sec. 5.** AS 14.43 is amended by adding new sections to read:

Article 11A. Alaska Merit Scholarship Program.

Sec. 14.43.810. Alaska merit scholarship program established; regulations. (a) The Alaska merit scholarship program is established to provide scholarships for high school graduates who are Alaska residents to attend a qualified postsecondary institution in the state.

(b) The department shall, in consultation with the commission, adopt regulations necessary to implement the program. The commission shall administer the daily operations of the program and financing of the program, including the procedures for applying for the scholarships, establishing standards for and ensuring continuing compliance with programmatic standards, and requiring students to apply for other nonloan financial aid, consistent with federal law.

Sec. 14.43.820. Alaska merit scholarship program; eligibility. (a) Subject to appropriation, the commission shall award an Alaska merit scholarship program scholarship to an applicant who

(1) is a resident of the state as defined in AS 01.10.055;

(2) graduated or will graduate within six months from a high school in the state;

(3) has completed a core academic curriculum in high school that includes

(A) four years of mathematics, four years of language arts, four years of science, and four years of social studies, one year of which may include a foreign language, an Alaska Native language, fine arts, or cultural heritage; or

(B) three years of mathematics, four years of language arts, three years of science, four years of social studies, and two years of a foreign language or an Alaska Native language;

(4) has a minimum grade-point average in high school of 2.5 or higher; the department shall set by regulation minimum requirements based on a substantially similar standard for districts that do not assign grades;

(5) has achieved a minimum score on a

(A) college entrance examination; or

(B) standardized examination designed to measure a student's level of preparedness to make the transition to work, as selected by the department; and

(6) is enrolled in good standing in a course of study at a qualified postsecondary institution in this state that is intended to result in the award of a certificate or degree.

(b) The commission shall establish in regulation standards for continuing and regaining eligibility for a scholarship.

Sec. 14.43.825. Maximum annual awards. (a) The maximum annual awards for the Alaska merit scholarship program scholarships are as follows:

(1) the first award level is $4,755 and requires a 3.5 grade-point average or above and a very high minimum score on a college entrance examination;

(2) the second award level is $3,566 and requires a 3.0 grade-point average or above and a high minimum score on a college entrance examination;

(3) the third award level is $2,378 and requires a 2.5 grade-point average or above and a moderately high minimum score on a college entrance examination.

(b) A student's eligibility for a scholarship terminates six years after the date the student graduated from high school unless the student qualifies for an extension of time allowed by the department by regulation.

(c) Except as provided in (b) of this section, a student receiving a scholarship may remain eligible for up to eight semesters of enrollment in good standing at a qualified university or college, which may include graduate courses.

(d) Scholarships may be awarded to a full-time student or, if a student is enrolled part time, prorated based on the number of credits. In this subsection, "full time" means enrollment in a course of study that is not less that 12 credits, and "part time" means enrollment in a course of study that is not less than six credits but less than 12 credits.

(e) The amount of a scholarship award may not exceed the amount of the student's costs of attendance as certified by the postsecondary institution for the purposes of federal financial aid, less any other scholarships or nonloan financial aid awarded to the student.

(f) Payment of a scholarship is subject to appropriation. If insufficient funds are appropriated to pay all eligible scholarships, the commission shall pay existing awards on a pro rata basis.

Sec. 14.43.830. Qualified postsecondary institutions. (a) The following institutions are qualified postsecondary institutions for purposes of awarding an Alaska merit scholarship program scholarship:

(1) a university or college physically located in the state that is

(A) authorized to operate in the state under AS 14.48.020 or is exempt from authorization under AS 14.48.030(b)(1); and

(B) accredited by a regional accreditation association;

(2) a career and technical school program physically located in the state that has been included on a list of certified career and technical school programs received from the Department of Labor and Workforce Development; the commission

shall publish the list on or before June 30 of the year preceding enrollment.

(b) The Department of Labor and Workforce Development shall, in consultation with the Department of Education and Early Development, adopt regulations under AS 44.62 (Administrative Procedure Act) establishing criteria under which the Department of Labor and Workforce Development shall certify career and technical school programs in the state as eligible to participate in the Alaska merit scholarship program.

Sec. 14.43.840. Report to the legislature. (a) To the extent permitted under law, the department, the commission, the University of Alaska, and the Department of Labor and Workforce Development shall share data necessary to prepare public reports regarding the program.

(b) Not more than 10 days after the convening of each regular legislative session, the department, the commission, the University of Alaska, and the Department of Labor and Workforce Development shall present an annual report to the public, the governor, and the legislature containing information of public interest regarding the program, including

(1) the number of applicants and number and types of scholarships awarded;

(2) the dollar amount of scholarships awarded in past years and the dollar amount expected to be awarded for the next year; and

(3) data and trends in the data regarding high school and postsecondary student performance, programmatic changes, and retention and graduation rates over time.

Sec. 14.43.850. Definitions. In AS 14.43.810 - 14.43.850, unless the context requires otherwise,

(1) "department" means the Department of Education and Early Development;

(2) "grade-point average" means the average of all grades on a four-point scale, or five-point scale for advanced placement classes, obtained by the student in high school;

(3) "high school" means a public or accredited secondary school in the

state and a home school program that is approved by the department;

(4) "program" means the Alaska merit scholarship program established under AS 14.43.810 - 14.43.850;

(5) "school district" means a borough school district, a city school district, a regional educational attendance area, and a state boarding school.

*** Sec. 6.** AS 14.44.025 is amended by adding a new subsection to read:

(b) Notwithstanding the funding priorities established under (a) of this section, the Alaska Commission on Postsecondary Education shall provide adequate funding for not fewer than five students each year to attend four-year programs in each of the following fields:

(1) dentistry;

(2) optometry; and

(3) pharmacy.

*** Sec. 7.** AS 14.45.130(a) is amended to read:

(a) A religious or other private school that elects to comply with AS 14.45.100 - 14.45.130 shall maintain permanent student records reflecting immunizations, physical examinations, standardized testing, academic achievement, [AND] courses taken at the school**, and level of eligibility for an Alaska merit scholarship program scholarship under AS 14.43.810 - 14.43.850**.

*** Sec. 8.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: PROGRAM STANDARDS AND IMPLEMENTATION FOR INITIAL SCHOOL YEARS. Notwithstanding any contrary provision of this Act, the Department of Education and Early Development and the Department of Labor and Workforce Development, after consultation with the Alaska Commission on Postsecondary Education, may adopt regulations under AS 44.62 (Administrative Procedure Act) to implement their respective duties under the Alaska merit scholarship program established in AS 14.43.810, enacted by sec. 5 of this Act, so that a student

(1) may be eligible for the program even though the student did not fully meet the required core academic curriculum for the school years beginning July 1, 2010, through June 30, 2014; and

(2) who graduated from high school in this state after January 1, 2011, and before July 1, 2011, and meets eligibility requirements for the program may apply for a scholarship on or after January 1, 2011, for enrollment in a program of study beginning on or after July 1, 2011.

* **Sec. 9.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Education and Early Development, the Department of Labor and Workforce Development, and the Alaska Commission on Postsecondary Education may proceed to adopt regulations necessary to implement changes made to their respective authorities by secs. 1, 2, 5, 7, and 8 of this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before July 1, 2011, except that regulations pertaining to applications for scholarships may take effect on or after January 1, 2011.

* **Sec. 10.** The uncodified law of the State of Alaska is amended by adding a new section to read:

JOINT LEGISLATIVE HIGHER EDUCATION SCHOLARSHIP FUNDING TASK FORCE. (a) The legislature finds that

(1) there is a growing problem of students entering degree programs at postsecondary institutions in Alaska but not completing the degree programs;

(2) at 22.4 percent, Alaska ranks last in the nation for first-time full-time bachelor degree-seeking students who complete their degrees within six years;

(3) it is estimated that, by 2025, 50 percent of all jobs in the United States will require a college-level degree;

(4) having an educated population is integral to economic development and promotion of lifetime success;

(5) the cost of attending postsecondary institutions continues to rise while financial aid for students fails to alleviate their unmet financial need so that they may attend college;

(6) improving financial aid opportunities for Alaska students would likely improve postsecondary graduation rates in the state; and

(7) establishing a state scholarship program to improve access to student

financial aid requires a more thorough examination by the legislature.

(b) The Joint Legislative Higher Education Scholarship Funding Task Force is established in the legislative branch for the purpose of examining higher education costs and identifying the best approach in providing financial aid to assist students in the state.

(c) The duties of the task force established under this section include

(1) evaluating how best to provide long-term and sustainable funding for state-provided financial aid for postsecondary institutions in the state, including scholarship opportunities;

(2) evaluating proposals that are based on available facts and conclusions pertaining to financial aid opportunities at postsecondary institutions in the state;

(3) recommending improvements or additions to the laws providing for financial aid at postsecondary institutions; and

(4) taking public comments on financial aid opportunities in the state.

(d) The task force consists of 15 members, as follows:

(1) five members of the senate appointed by the president of the senate;

(2) five members of the house of representatives appointed by the speaker of the house of representatives; and

(3) five members appointed by the governor, as follows:

(A) the commissioner of education and early development or the commissioner's designee;

(B) the president of the University of Alaska or the president's designee;

(C) the director of the office of management and budget or the director's designee;

(D) a member of the state Board of Education and Early Development;

(E) the executive director of the Alaska Commission on Postsecondary Education.

(e) The president of the senate and the speaker of the house of representatives shall jointly appoint the chair and vice-chair of the task force.

(f) The task force shall meet during the interim between legislative sessions.

(g) The task force shall submit a report of its findings and proposed legislative

changes to the governor, the Alaska Commission on Postsecondary Education, the Department of Education and Early Development, and the legislature by December 1, 2010, and may make any additional reports it considers advisable.

(h) The Joint Legislative Higher Education Scholarship Funding Task Force is terminated on January 1, 2011.

* **Sec. 11.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ESTABLISHMENT OF ADVISORY TASK FORCE ON HIGHER EDUCATION AND CAREER READINESS; COMPOSITION. (a) An advisory task force on higher education and career readiness is established in the legislative branch of state government for the purpose of compiling data and advising the legislature on matters pertaining to college and career readiness of students who graduate from public secondary schools in the state and students who are nontraditional students.

(b) The task force established under this section consists of 20 members, as follows:

(1) the governor or the governor's designee;

(2) the executive director of the Alaska Commission on Postsecondary Education or the executive director's designee;

(3) the commissioner of education and early development or the commissioner's designee;

(4) one member appointed by the governor who represents vocational, technical training, or apprenticeship programs in the state;

(5) a student representative appointed by the state Board of Education and Early Development;

(6) the student member of the Board of Regents of the University of Alaska or the student's designee;

(7) the president of the University of Alaska or the president's designee;

(8) the executive director of the Association of Alaska School Boards or the executive director's designee;

(9) the executive director of the Alaska Association of School Administrators or the executive director's designee;

(10) the president of the National Education Association of Alaska or the

president's designee;

(11) the president of the Alaska Federation of Natives or the president's designee;

(12) two members of the house of representatives, appointed by the speaker of the house of representatives, one of whom shall be appointed co-chair;

(13) two members of the senate, appointed by the president of the senate, one of whom shall be appointed co-chair;

(14) one member appointed by the governor who represents private colleges or universities;

(15) one member appointed by the governor who represents public postsecondary institutions and who is not affiliated with the University of Alaska;

(16) three members appointed by the governor who have specialized knowledge, skill, or experience in education remediation and who are employed as faculty at postsecondary institutions located in separate major administrative units in the state, at least one of whom resides outside of Anchorage, Fairbanks, and Juneau.

(c) A majority of the members of the task force constitutes a quorum. A vacancy on the task force shall be filled in the same manner as the original selection or appointment.

(d) Members of the task force serve without compensation but are entitled to per diem and travel expenses authorized for boards and commissions under AS 39.20.180, except that per diem and travel expenses shall be paid from the budget of the agency or institution the member represents on the task force. The agency or institution may opt out of participating to avoid payment of per diem and travel expenses. The staff of the legislative members of the task force shall serve as staff for the task force.

(e) The task force shall meet at the call of the chair not less than once every three months. The co-chairs shall call the first meeting of the task force not later than 30 days after the effective date of this section. The members of the task force shall elect other officers as needed to conduct the business of the task force.

(f) The task force shall

(1) compile research conducted in the state and nationally on reducing remediation, improving retention, and increasing college and postsecondary vocational or technical program graduation rates;

(2) summarize data on

(A) types of testing used to determine college and career readiness;

(B) remediation rates;

(C) effectiveness of remediation for students entering college or postsecondary vocational or technical training programs with skill deficits;

(D) characteristics of programs that are most effective in addressing skill deficits;

(3) create a definition of remediation to ensure consistency in reporting of remediation rates by postsecondary institutions in the state;

(4) identify the contributing causes of a lack of college and career readiness of students who graduate from public secondary schools in the state and the course topics taken in college or postsecondary vocational or technical training programs for which students require remediation;

(5) identify best practices examples of school systems, colleges, and postsecondary vocational or technical training programs that are succeeding in reducing the need for remedial education;

(6) explore new approaches that may be effective in producing increased levels of college and career readiness;

(7) determine the availability of broadband and Internet capabilities and the effect of the use of electronic, Internet, and virtual instruction on student learning and success in schools;

(8) determine the role various types of postsecondary institutions may play in addressing the need for remediation;

(9) review graduation rates of colleges, universities, and postsecondary vocational or technical training programs located in the state for the six years preceding the effective date of this section;

(10) prepare for the legislature a set of written recommendations to improve remediation, retention, and graduation rates at colleges, universities, and postsecondary vocational or technical training programs in the state;

(11) review completion rates for career skill certificate programs, disaggregated by program and postsecondary campus.

(g) The task force shall submit the assessment and recommendations developed under (f) of this section in a report to the legislature not later than April 1, 2011.

* **Sec. 12.** Section 11 of this Act is repealed on July 1, 2011.

* **Sec. 13.** Sections 3, 4, 6, and 8 - 11 of this Act take effect immediately under AS 01.10.070(c).

* **Sec. 14.** Except as provided in sec. 13 of this Act, this Act takes effect July 1, 2011.

Effective 11/4/2010
DEED

4 AAC is amended by adding a new chapter to read:

Chapter 43. Alaska Performance Scholarship Program.

Section

10. Requirements for school districts and certain religious or private schools

20. Standardized testing and grade point average requirements

30. Curriculum requirements

40. Procedures for home-based education and certain religious or other private schools

900. Definitions

4 AAC 43.010. Requirements for school districts and certain religious or private schools. In administering a school district's duties under the scholarship program established in AS 14.43.810 – 14.43.850, a school district, or a religious or other private school accredited under 4 AAC 04.300(c) that elects to comply with AS 14.45.100 - 14.45.130, shall

(1) determine a student's level of eligibility for the Alaska performance scholarship based on curriculum, standardized examination scores, and grade point average for each of its graduating students;

(2) record a student's level of eligibility on the student's permanent record;

(3) require a student seeking Alaska performance scholarship eligibility certification to provide proof of results achieved on one of the standardized examinations required for scholarship eligibility; and

(4) no later than July 15 of each year, transmit to the department an electronic version of each graduating student's permanent record that describes the student's eligibility for the Alaska performance scholarship. (Eff. __/__/____, Register __)

Authority: AS 14.07.060 AS 14.43.810

4 AAC 43.020. Standardized examination and grade point average requirements. (a) A student is eligible for an Alaska performance honors scholarship if the student meets the curriculum requirements of 4 AAC 43.030, obtains a grade point average of 3.5 or higher, and provides proof of

(1) an ACT score of 25 or higher;

(2) an SAT score of 1680 or higher; or

(3) a WorkKeys score of five or higher in each of the following areas:

(A) applied mathematics;

(B) reading for information;

(C) locating information.

(b) A student is eligible for an Alaska performance achievement scholarship if the student meets the curriculum requirements of 4 AAC 43.030, obtains a grade point average of 3.0 or higher, and provides proof of

(1) an ACT score of 23 or higher;

(2) an SAT score of 1560 or higher; or

(3) a WorkKeys score of five or higher in each of the following areas:

(A) applied mathematics;

(B) reading for information;

(C) locating information.

(c) A student is eligible for an Alaska performance opportunity scholarship if the student meets the curriculum requirements of 4 AAC 43.030, obtains a grade point average of 2.5, and provides proof of:

(1) an ACT score of 21 or higher;

(2) an SAT score of 1450 or higher; or

(3) a WorkKeys score of five or higher in each of the following areas:

(A) applied mathematics;

(B) reading for information;

(C) locating information.

(d) A student who qualifies for a scholarship using the WorkKeys examination must use the scholarship award in a career and technical program that results in the award of a certificate. (Eff. __/__/____, Register __)

Authority: AS 14.07.060 AS 14.43.810

4 AAC 43.030. Curriculum requirements. (a) For a student graduating from high school in 2011, the curriculum requirements for all levels of the Alaska performance scholarship are completion of

(1) the subject matter requirements for high school graduation under 4 AAC 06.075(b); and

(2) one additional unit of credit from any of the following:

(A) mathematics – one unit of credit;

(B) science – one unit of credit;

(C) mathematics and science – one-half unit of credit in mathematics and one-half unit of credit in science. (Eff. __/__/____, Register___)

Authority: AS 14.07.060 AS 14.43.810

4 AAC 43.040. Procedures for home-based education and certain religious or other private schools. (a) To establish eligibility for an Alaska performance scholarship, a student who is not enrolled in a public school program and who completes a home-based education program in the state, or who graduates from a religious or other private school accredited under 4 AAC 04.300(c) that does not elect to comply with AS 14.45.100 - 14.45.130, shall apply to the department no later than July 1 of the year the student intends to enroll at an eligible postsecondary institution. The application must be in writing, on a form provided by the department, and must include documentation demonstrating

(1) proof of results achieved on a standardized examination that meet the requirements of 4 AAC 43.020(a), (b), or (c); and

(2) completion of the curriculum requirements in 4 AAC 43.030.

(b) No later than 15 days after receipt of a complete application under (a) of this section, the department will provide the student with a written notice of eligibility. In this notice, the department will state whether the student is eligible for a scholarship, and, if eligible, the student's maximum level of scholarship eligibility.

(c) A student who is denied eligibility for a scholarship under this section or wishes to dispute the department's determination of the student's maximum level of scholarship eligibility may appeal the department's determination by sending a written request for appeal no later than 15 days after the department issues the notice of eligibility.

(d) A request for appeal under (c) of this section must include

(1) the name, mailing address, and telephone number of the appellant;

(2) the relief requested in the appeal;

(3) a short and concise statement identifying the reasons supporting a reversal or modification of the department's eligibility determination; and

(4) all documents, papers, or other materials that support a reversal or modification of the department's eligibility determination.

(e) The commissioner will designate a reviewer who did not participate in the department's initial determination of scholarship eligibility to review a timely request for appeal received under (c) of this section. The reviewer shall consider all information and materials submitted and issue a written decision that determines the student's eligibility for a scholarship, and if eligible, the student's level of eligibility. The reviewer's decision is the final decision of the department. Notice of the department's decision will be sent to the student no later than 45 days after the department receives the notice of appeal. (Eff. __/__/____, Register __)

Authority: AS 14.07.060 AS 14.43.810

4 AAC 43.900. Definitions. In this chapter, unless context indicates otherwise,

(1) "ACT" means the ACT high school achievement and college admissions examination administered by ACT, Inc.;

(2) "Alaska performance scholarship" means the scholarship program established under AS 14.43.810 – 14.43.850;

(3) "Alaska performance achievement scholarship" means an Alaska performance scholarship at the award level described under AS 14.43.825(a)(2);

(4) "Alaska performance honors scholarship" means an Alaska performance scholarship the top award level described under AS 14.43.825(a)(1);

(5) "Alaska performance opportunity scholarship" means an Alaska performance scholarship the award level described under AS 14.43.825(a)(3);

(6) "commissioner" means the Commissioner of Education and Early Development;

(7) "home-based education program" means an educational program that qualifies the student for an exemption under AS 14.30.010(b)(12) from the compulsory education requirement of AS 14.30.010(a);

(8) "SAT" means the SAT high school achievement and college admissions test administered by College Board, Inc.;

(9) "standardized examinations" means the ACT, SAT, or WorkKeys examinations;

(10) "unit of credit" has the meaning given in 4 AAC 06.075(e);

(11) "WorkKeys" means the WorkKeys Job Skills Assessment administered by ACT, Inc. (Eff. __/__/____, Register __)

Authority: AS 14.07.060 AS 14.43.810

Will be effective
2/25/2011
DEED

4 AAC 43.030 is amended by adding new subsections to read:

(b) For a student graduating from high school in 2012, the curriculum requirements for the Alaska performance achievement scholarship and Alaska performance opportunity scholarship are completion of either the 2012 mathematics and science curriculum or the 2012 social studies and language curriculum. The required courses are as follows:

(1) for the 2012 mathematics and science curriculum,

(A) either of the following:

(i) mathematics - four units of credit, and science - three units of credit;

(ii) mathematics - three units of credit, and science - four units of science;

(B) language arts - four units of credit;

(C) social studies - four units of credit; however, one unit of a foreign language, an Alaska Native language, fine arts, or cultural heritage may substitute for one of the four units of credit of social studies;

(2) for the 2012 social studies and language curriculum,

(A) mathematics - three units of credit;

(B) science - three units of credit;

(C) language arts - four units of credit;

(D) social studies - four units of credit; and

(E) foreign, Alaska Native, or American sign language - one unit of credit.

(c) For a student graduating from high school in 2012, the curriculum requirements for the Alaska performance honors scholarship are completion of either, as described in (d) of this section,

(1) the 2013 and after mathematics and science curriculum;

(2) the 2013 and after social studies and language curriculum.

(d) For a student graduating from high school in and after 2013, the curriculum requirements for all levels of the Alaska performance scholarship are completion of either the mathematics and science curriculum or the social studies and language curriculum described in this subsection. The required courses are as follows:

(1) for the 2013 and after mathematics and science curriculum,

(A) mathematics - four units of credit;

(B) science - four units of credit;

(C) language arts - four units of credit;

(D) social studies - four units of credit; however, one unit of a foreign language, an Alaska Native language, fine arts, or cultural heritage may substitute for one of the four units of credit of social studies;

(2) for the 2013 and after social studies and language curriculum,

(A) mathematics - three units of credit;

(B) science - three units of credit;

(C) language arts - four units of credit;

(D) social studies - four units of credit;

(E) foreign, Alaska Native, or American sign language - two units of credit.

(e) The curriculum requirements described in this section do not excuse a student from compliance with the high school graduation requirements in 4 AAC 06.075 or graduation requirements imposed by the student's district. (Eff. 11/4/2010, Register 196; am 2/25/2011, Register 197)

Authority: AS 14.07.060 AS 14.43.810 **Sec. 8, ch. 14, SLA 2010**

4 AAC 43 is amended by adding a new section to read:

4 AAC 43.035. Grace period for curriculum requirements. (a) The commissioner may grant a student a grace period to meet curriculum requirements for the Alaska performance scholarship, if the standards set out in this section are met. A grace period grants the applicant one extra year of eligibility after the date of the applicant's high school graduation to complete the curriculum requirements of 4 AAC 43.030. A student who is granted a grace period is not eligible for the scholarship during the year in which the grace period is granted.

(b) In order to be eligible for a grace period, a student must

(1) apply on a form prescribed by the department and the form must be received by the department no later than 30 days after the student graduates from high school;

(2) have graduated from a high school in this state in 2011 or 2012;

(3) have attained the required grade point average and ACT, SAT, or WorkKeys score as described in 4 AAC 43.020; and

(4) be unable to complete the curriculum requirements described in 4 AAC 43.030 because of circumstances outside of the control of the student; those circumstances

(A) include the required curriculum not being reasonably available to the student because the student attended a small and remote high school in the state;

(B) do not include the student's attendance at a high school outside of the state.

(c) The commissioner will issue a written decision denying or granting the application for a grace period. In evaluating the application, the commissioner must consider the curriculum requirements of 4 AAC 43.030 that were available to the student at the student's school.

(d) If the application for a grace period is granted, the student shall

(1) obtain a passing grade on a course to meet the curriculum requirement for which the grace period was granted; and

(2) submit documentation to the commissioner of compliance with (1) of this subsection, no later than 30 days after the one-year anniversary of the granting of the grace period.

(e) A student who received a grace period and does not satisfy the requirements of (d) of this section is not eligible for the scholarship. (Eff. 2/25/2011, Register 197)

Speaker of the House Mike Chenault
State Capitol Room 208
Juneau, AK 99801-1182

Dear President Stevens and Speaker Chenault,

This report is submitted to the Legislature by the Joint Legislative Higher Education Scholarship Funding Task Force, established by the 26th Alaska State Legislature under Senate Bill 221 to "examine higher education costs and identify the best approach in providing financial aid to assist students in the state".

Pursuant to this purpose, the Task Force has spent the interim performing three of the duties outlined in SB 221. These included evaluating how best to provide long-term and sustainable funding for state provided financial aid, evaluating proposals pertaining to financial aid opportunities and taking public comments on financial aid opportunities in the state.

Having completed all these assigned duties, the Task Force now respectfully submits the attached report in fulfillment of its fourth and final duty: "recommend improvements or additions to the laws providing for financial aid at postsecondary institutions." Those recommendations, along with supporting justifications and documentation, as included herein.

Respectfully,

Kevin Meyer

Senator Kevin Meyer,
Chairman, Joint Legislative Higher Education Scholarship Funding Task Force

Alaska State Legislature Joint Legislative Higher Education

Scholarship Funding Task Force

Report to the Legislature

Task Force Recommendations on

The Alaska Scholarship Program and

State-supported Educational Financial Assistance

Fall 2010

Executive Summary

Throughout the fall of 2010, the Scholarship Funding Task Force, established by Senate Bill 221 during the 26th Alaska State Legislature, performed an analysis of higher education financial aid policy in an effort to arrive at a set of recommendations for providing financial assistance for the post-high school education and training of Alaska students.

Specifically, the Task Force had been asked to consider options to ensure a long-term and sustainable funding stream for the newly created Alaska Scholarship program (Scholarship) and other state-provided financial aid. To do this, the Task Force solicited input from professionals with knowledge and expertise in education, administration, financial aid and governmental budgeting. It also took public testimony from groups and individuals (including current postsecondary students) who would benefit from or be impacted by the new program. The Task Force performed an in-depth analysis of the existing and potential components of the Scholarship and then, finally, reviewed the budgetary means and mechanisms available to the State to sustain programs like the Scholarship.

In a series of meetings, the Task Force reviewed the legislative history of the Scholarship, from inception to passage into law, and examined the form and function of the merit-based scholarship program created in statute with passage of SB 221. The Task Force also considered needs-based financial aid and examined the State's existing needs-based education assistance program – the AlaskAdvantage education grant program. Finally, the Task Force reviewed the budgetary tools available for supporting state-sponsored programs and analyzed structures the State might use to fund and finance the Scholarship.

Within the context of these reviews, evaluations and analyses, the Task Force formulated a consensus opinion on the funding strategy members agreed would be most efficient and effective in placing the Scholarship on a firm and enduring financial footing. It also considered numerous structural conditions and modifications through which the State's scholarship and financial aid systems might be strengthened to support the optimal functioning of the Scholarship.

This work of the Task Force formed the basis for the following recommendations to the Legislature and the State.

Implementation of these recommendations is expected to provide the structure necessary for the Scholarship to meet its two great promises: Its promise to Alaska that it can raise student academic performance by raising expectations, and its promise to students that, if they challenge themselves and achieve academic success under a highly rigorous curriculum, the State will reward them with a Scholarship.

Summary of Recommendations

Funding and Finance

- The Legislature should immediately create a Scholarship Fund for the Scholarship program.
- If possible, the Scholarship Fund should be immediately capitalized to the point where it can be both self-sufficient and self-sustaining.
- Otherwise, the Scholarship Fund should be incrementally capitalized to a minimum balance of $160 million using sources which have been positively identified and with revenues that have been affirmatively designated.

Merit-Based Component

Curriculum:

- No immediate amendment should be made to the Scholarship curriculum until its yearly reporting can provide the data to serve as a factual basis for such alterations.
- The Department of Education & Early Development should specify the "required courses" not specifically delineated in statute for each curricular subject area and define the content requirements and standards for those courses.

Distance Delivery:

- The Legislature should do an assessment of the State's existing distance delivery capacity and, should it be necessary, develop a plan (including cost estimates) for upgrading the Department of Education & Early Development's capacity to provide virtual program or distance-delivered secondary courses.

Needs-Based Component

- To directly support Scholarship awardees, a capped needs-based supplement should be reintegrated into the Scholarship.
- To assist all students, however, the Legislature should continue its support of the AlaskAdvantage grant program but do so at higher than historic levels.
- The supplemented Scholarship and AlaskAdvantage grant programs should be programmatically separate but should be funded through the same mechanism, under a funding formula which ensures adequate support for both.

Other Policy Recommendations

- Any institution which accepts Scholarship awards should integrate an advisor/advocate program to assist Scholarship awardees in expediting the students' time to education program completion.

Summary of Recommendations

- Institutions accepting Scholarship awardees should make their best effort to provide course delivery structures that allow for two and/or four year certificate/degree completion timelines.

Introduction

Throughout the fall of 2010, the Joint Legislative Higher Education Scholarship Funding Task Force (hereafter referred to as the "Task Force"), established by Senate Bill 221 during the 26th Alaska State Legislature and in accordance with the Purpose and Duties described therein (Attachment 1), performed an examination of higher education financial aid policy options relative to student success in its effort to arrive at a set of recommendations for providing state financial assistance to Alaska students for post-high school education and training. Specifically, the Task Force was asked to consider options for securing a long-term and sustainable funding stream for the Alaska Scholarship (hereafter referred to as the "Scholarship"), and other state-provided financial aid meant to assist students in attending postsecondary institutions within the State, and to offer guidance to the Legislature on how it might best achieve that goal.

In furtherance of its statutory mandate, the Task Force solicited input from professionals with knowledge and expertise in education, administration, financial aid and governmental budgeting, and took public testimony from impacted groups and individuals, as it performed an in-depth analysis of the existing and potential components of the Scholarship and the means and mechanisms available to the State to sustain it.

The Task Force reviewed the legislative history of the Scholarship (Attachments 2 – 6):

- the Taylor Plan, which served as its preliminary model
- the proposal submitted by the Governor
- the versions created by the House and Senate Education Committees
- the Alaska Performance Scholarship codified in statute today

The Task Force discussed the merit-based component of the Scholarship:

- how students become eligible
- how they apply and the level of awards they can achieve
- where and how recipients can use their scholarships
- how many students are likely to apply for and receive awards
- how much it is likely to cost the State to provide those awards (Attachment 7)

The Task Force discussed the needs-based complement to the Scholarship (Attachment 8):

- the rationale for needs-based assistance
- the proposals on the issue vetted by the Legislature
- the vehicle the Legislature used to mitigate the Scholarship's lack of an integrated needs-based assistance component - the AlaskAdvantage education grant program
- an estimate of the annual full cost of funding the current AlaskAdvantage grant program to serve as the state's needs-based assistance component

- potential modification of the AlaskAdvantage grant program to better align it with the student performance goals of the Scholarship

The Task Force discussed the budgetary tools available to the State for funding and financing the Scholarship (Attachment 9):

- the revenues available for appropriation for its support
- the fund and account structures the State can create or maintain to securely hold those funds
- the methods available to the State of ensuring the directed distribution of monies
- the advantages and disadvantages relative to each budgetary structure in relation to the goals of the Task Force

The Task Force analyzed, as representative examples, funding and financing structures submitted to the Task Force (Attachments 10 - 14):

- Two forms of Endowments
- Two Rolling-Account proposals
- the default, annual General Fund appropriation option

Finally, The Task Force discussed ideas for possible "improvements and additions" to the Scholarship, in areas including:

- mandatory curriculum
- assessment alternatives
- access to education programs through distance delivery
- the postsecondary educational system

Having concluded its fact finding and subsequent deliberations, and in accordance with its statutory mandate, the Task Force has generated a list of consensus recommendations regarding the State's postsecondary financial aid system in general and the Scholarship in particular. Those recommendations, and their supporting rationales, are included in the following report under their corresponding subject heading.

Funding and Finance

The first duty and priority for the Task Force was to "evaluate how best to provide long-term and sustainable funding for state provided financial aid for postsecondary institutions in the state" with particular emphasis being given to the performance-based Alaska Scholarship.

The Task Force analyzed – as representative examples – a number of funding and financing structures which were submitted to the Task Force. Those structures included: heavily capitalized, constitutionally protected endowment funds; heavily capitalized, statutorily created General Fund sub-accounts; moderately capitalized rolling-fund accounts; and, as a control group, the pay-as-you-go default case of annual General Fund appropriations. The Task Force also considered both the numerous revenue sources which could be tapped to provide monies for scholarships and the appropriation mechanisms available for directing such monies to specific programs, as well as the opportunities and challenges associated with each approach.

Relatively speaking, the ideal structure for ensuring a secure, long-term, sustainable funding source for the Scholarship would be a constitutional account, not unlike the Permanent Fund or Constitutional Budget Reserve, specific to the Scholarship and capitalized at a level where revenues generated from investment of the corpus would be sufficient to not only fully fund annual scholarship awards but also sufficient to inflation-proof the fund itself through reinvestment. Though subject to market volatility, such a mechanism (essentially a constitutionally protected endowment) would be highly durable, self-sustaining, more able to attract private donations through the newly augmented education tax-credit system and more likely to provide an adequate, predictable funding stream for the program.

However, such a constitutionally protected endowment account, due to the need for overwhelming legislative support and a further vote of the people, would be difficult and time consuming to create. Another substantial challenge would be capitalizing the account – identifying and appropriating the hundreds of millions of dollars in initial investment necessary to place the fund on the desired self-financing and self-sustaining footing.

One alternative to the constitutionally protected account was reflected in the Governor's original Scholarship proposal. Senate Bill 224 and House Bill 297 each called for the establishment of a "scholarship fund" - a statutorily created sub-account of the General Fund, to hold appropriations, donations and income earned on investments of fund assets. Such a statutory account would have offered, though to a lesser degree, many of the same benefits as its constitutionally protected counterpart yet, because it could be created through a purely legislative process, would have been far easier to make and could have been established on a timeline as compressed as a single legislative session.

This option, however, suffered from the same fund capitalization shortcomings (both in immediacy and scale) as its counterpart. As described in Fiscal Note 2 of SB 224, the purely

statutory endowment would still have required an initial, immediate, investment of no less than $400 million to approach fund self-sustainability.

Attempts to mitigate these capitalization challenges resulted in proposals which functionally resembled the revised School Bond Debt Reimbursement program. Under these designs, termed rolling-fund accounts by the Task Force, the fund capitalization threshold was reduced and the investment timeline extended. Under draft legislation requested for the Task Force (Attachments 15 and 16), the Scholarship Fund would be incrementally capitalized up to $160 million over a series of years as monies were deposited into the fund in excess of those required for distribution as scholarship awards. Such a system would represent a moderate continuing strain on the State's finances but would allow the Legislature to capitalize the fund without the budgetary shock of a large, one-time appropriation. Also, though a smaller account balance would not afford the fail-safe, in perpetuity funding security of a heavily capitalized endowment, the corpus of a rolling-fund would provide a reasonable level of mid-term programmatic funding assurance; allowing the State the potential of a program wind-down while still having sufficient funds to meet its obligations to Scholarship awardees already in the training/education pipeline.

The Task Force considered all of these account options to be preferable to the pay-as-you-go default case of making no specific accommodation for the Scholarship and simply allowing the Administration to submit yearly funding requests for legislative consideration.

Therefore, ***it is the recommendation of the Task Force that the Legislature immediately create, through statute, a Scholarship Fund as a sub-account within the General Fund***. As an account capitalization goal, ***the Task Force recommends the Scholarship Fund account balance to be an amount sufficient to allow the Scholarship Fund to be wholly self-sustaining both for award distribution and inflation-proofing replenishment***. As an optimal capitalization strategy, ***the Task Force would prefer, should sufficient funds be available, immediate account capitalization***. However, recognizing this may not be possible, ***the Task Force recommends, as an alternative, incremental capitalization of the Scholarship Fund to a minimum balance of $160 million***, or whatever amount the Legislature deems sufficient for it to act as a surety account for already obligated awards.

Possible funding sources for the Scholarship are many since the State has multiple sources from which it collects revenue (like severance taxes and corporate income taxes), multiple ways it generates income (like investment returns, dividends and program receipts) and dozens of existing accounts in which it is already holding money. Much of this income flows into the General Fund and is as available for appropriation to the Scholarship as it is for any other state program.

However, relying primarily on General Funds for support of a program is to subject it to the uncertainty of the budgetary process by placing it in competition with all other programs for yearly legislative prioritization and appropriation. This is a situation the Task Force, with an

overarching interest in assuring an adequate, secure and predictable funding stream to the Scholarship, would hope to avoid. Therefore, the Task Force advocates a funding regime which would require General Funds as supplemental funds only, if at all.

In general, and as much as is practicable, ***the Task Force recommends that sources of funding for the Scholarship by positively identified, "funds-in" revenue be affirmatively designated*** and General Funds be used as necessary and in supplement only. In order of preference, from "first place to go" to last, the Task Force advises the Legislature to fund the Scholarship Fund as follows:

1. Designating Interest from Specific, Existing Accounts
2. Designating Program Receipts and Dividends Revenue Sharing
3. Designating Revenues from Specific, External Sources Corporate Tax
4. Re-appropriated Assets from Liquidated Accounts
5. General Funds

Merit-based Component

Curriculum

It is the intent of the Scholarship (Attachment 17), through "increased academic rigor", to improve the academic performance of Alaska students in grades kindergarten through 12 and thereby improve preparedness for postsecondary education and successful performance at postsecondary educational institutions. As such, many Task Force discussions focused on the dual curricular offerings embedded in the codified Scholarship.

To some, the inclusion of a "liberal arts" option, allowing for the taking of three years of mathematics, four years of language arts, three years of science, four years of social studies, and two years of a foreign language or Alaska Native language, represented a diminishment of programmatic rigor, and it was argued that the State should return to the single curricular option described in House Bill 297. To others, the inclusion of the two curricular options better reflected the reality of individual scholastic propensity and represented no such diminishment.

Recognizing that other states, with longer established Taylor Plan-based scholarship programs, have wrestled with this issue, and that future adjustments regarding these broad curricular categories are always within the State's power, ***the Task Force recommends making no immediate amendment to the curricula of the Scholarship until its yearly reporting can provide the data to serve as a factual basis for alteration.***

The Task Force does, however, further recognize that broad statements regarding years of required schooling by discipline are relatively meaningless, and the State's goal of increasing academic proficiency is less likely to achieve success, without a clearer definition of precisely what courses are to be taken and what content is expected to be taught and learned. Succinctly, course rigor is dependent on content not course titles. Therefore, to ensure the quality and uniformity of statewide Scholarship curricular offerings, ***the Task Force recommends the Legislature direct, and statutorily allow, the Alaska State Department of Education & Early Development, in consultation with the Alaska State School Board and any other public or private parties deemed necessary or beneficial, to specify the required courses not specifically delineated in statute for each educational category*** (Ex. 4yrs Math = Algebra 1, Algebra 2, Geometry and Trigonometry, etc.) ***and define the content requirements and standards for those courses in regulation***. Although the State might experience resistance to such a move, the voluntary nature of the Scholarship vis-á-vis student curricular choices, coupled with the size of the State's required investment and the customary ability of scholarship sponsors to set whatever requirements it feels most likely to achieve its desired ends, are compelling justifications for such a move.

Distance Delivery

There is concern the State, due to a lack of physical infrastructure and/or virtual secondary-level educational content, may currently be unable to deliver, on a consistent basis, all facets of the rigorous curriculum required by the Scholarship to all students in all locations throughout Alaska. Therefore, recognizing that a robust, reliable distance delivery system is essential to ensuring all students will have a reasonable opportunity to compete for Scholarship awards, and to ensure equity in the Scholarship Program, ***the Task Force recommends the Legislature, in partnership with the State Department of Education and Early Development, the University of Alaska, and any other public or private parties deemed necessary or beneficial, do an assessment of the State's existing distance delivery capacity and,*** *should it be necessary,* ***develop a plan*** (including cost estimates***) for upgrading the Department's capacity to provide virtual program or distance-delivered secondary courses.***

Needs-Based Component

The original scholarship proposal (SB 224/HB297), as submitted, provided only for merit-based financial assistance but was later amended to include a needs-based component that was supplemental to the merit-based Scholarship. By supplemental, it is meant that the needs-based component was integrated within the merit-based Scholarship, creating a single program whereby a student would have to be a Scholarship recipient to be eligible to receive needs-based assistance. The goal of integrating a needs-based component into the merit scholarship was to ensure that the lesser socio-economically advantaged students who qualified for the merit scholarship would have the ability to use their merit-based award.

However, the statute that created the Scholarship (SB 221) used the AlaskAdvantage education grant program – an existing, stand alone program which, as a function of historic funding levels, had only been able to provide grants to those students demonstrating the highest level of financial need based on the methodology used in the Free Application for Federal Student Aid: primarily non-traditional, older students - to address the possible necessity for added assistance by Scholarship awardees specifically and the acknowledged insufficiency of state-funded needs-based financial assistance in Alaska generally.

This was not a perfect fit as these programs were not designed to work in concert and generally target groups which are not aligned. The AlaskAdvantage grant program has much broader eligibility standards than the Scholarship. Seeking to make the Scholarship's qualifications the same as for AlaskAdvantage would greatly impair, or even eliminate, its efficacy related to its broad-based programmatic goals just as seeking to amend AlaskAdvantage education grant's qualifications to mirror those of the Scholarship would render it unavailable to many of the groups it currently serves. However, the Task Force recognizes the value of the programs, their complementary natures and the statewide benefit of maintaining them both.

Therefore, ***the Task Force recommends the creation of a second needs-based assistance program: a needs-based component, similar or identical to the one proposed in Education Committee versions of SB224/HB297, to be reintegrated into the Scholarship.*** Such a supplement will allow the Scholarship to more fully serve its high achieving, traditional student population. However, recognizing the indeterminate funding liability potential of the need-based supplement, ***the Task Force recommends the integrated needs-based component be capped***, either at a 2010 amount of $4,755 (as the merit-based portion of the Scholarship award has been capped at the 2010 UA tuition amount) or some other reasonable figure. ***The Task Force further recommends continued funding, at a level commensurate with its full functioning, of the AlaskAdvantage grant program***, allowing it to serve the non-traditional, General Education Development (GED), and older students as prioritized for grants under the program's current criteria. Finally, though they are to be programmatically separate***, the Task***

Force recommends the supplemented Scholarship and AlaskAdvantage grant programs be funded through the same mechanism, perhaps, though not necessarily, ***under a funding formula which will ensure adequate support for both***.

Other Policy Recommendations Regarding Scholarship Investments

It is recognized that remedial courses delivered at the postsecondary level may entail public and/or private expense but do not count for degree credit. Also, by delaying progress toward completion, the need for remediation substantially reduces the probability a student will ever complete a degree/certificate program. Therefore, a goal of the Legislature in establishing a merit scholarship program was to create a source of transformational pressure on Alaska's K-12 system - a renewed impetus for it to adequately prepare students for successful entry into college and career/tech - and, in so doing, ensure scholarship awardees will not need to expend time or personal capital on developmental education (remedial) courses.

Degree/certificate completion – not simply attendance – is the investment objective of the State. It should therefore look at factors that produce delay in progress or otherwise contribute significantly to non-completion. What other policies should be instituted in the scholarship program to stimulate postsecondary education changes to incentivize completion and make our money count? On-time completion will also become vital to Alaska institutions as a scholarship program becomes fully implemented because the anticipated growth in student enrollment may well overwhelm available capacity if students do not progress more rapidly. The following suggestions are programmatic recommendations to advance that goal:

The Task Force recommends that any institution which accepts Scholarship awards should integrate an advisor/advocate program to assist Scholarship awardees.

Evidence shows that advisor/advocate programs work at all education levels. Many designs are in use across the nation. Private institutions with traditionally high completion rates almost always incorporate a rigorous advising model. The University of Nevada even aids students through a Course Concierge program (Attachment 18). Some initiatives such as Complete College America presume advising programs as evidenced in discussion of retention rate metrics by the statement that colleges "can actively work to better engage those students during their first year...." The Task Force heard testimony that University of Alaska Fairbanks (UAF), with mandatory advising for all degree seekers, has a five-year completion rate which is 50% higher than University of Alaska Anchorage (UAA) with optional advising for degree candidates. As the State will be making a significant investment in the scholarship student, it is reasonable for the State to request that institutions receiving those funds advise that student on how to remain on track toward graduation.

The Task Force recommends that institutions accepting Scholarship awardees should assist them in maximizing the value of their awards by providing timely course offerings (or courses

of study) that allow for completion of certificate and/or degree programs within a two- or four-year course of study.

This would not guarantee that all students would progress perfectly but would mean that those who desire to move forward would be provided that opportunity. The diversity of methods for providing access to courses for on-time completion has never been more available to Alaska institutions. Programs such as the Western Interstate Commission for Higher Education's Internet Course Exchange (WICHE ICE) or other programs through participating institutions permit students to take courses not otherwise available to them. It will be important for all programs requiring more than 60 units for an AA certificate and more than 120 credits for a BA/BS degree to provide students the estimation of time for completion so they can reasonably assess the probability of their Scholarship funding their education through completion and make further arrangements as appropriate or necessary.

Joint Legislative
Higher Education Scholarship Funding
Task Force

Membership:

Chair: Senator Meyer
Vice-chair: Representative Seaton

Senate	House
Senator Johnny Ellis	Representative Peggy Wilson
Senator Lyman Hoffman	Representative Wes Keller
Senator Gary Stevens	Representative Anna Fairclough
Senator Joe Thomas	Representative Chris Tuck

Administration

Department of Education: Eddy Jeans, Education Policy Coordinator
University of Alaska: Saichi Oba, Associate Vice President
OMB: Karen Rehfeld, Director
ACPE: Diane Barrans, Director
AK State Board of Education: Esther Cox, Chair

Purpose: Examine higher education costs and identify the best approach in providing financial aid to assist students in the state.

Duties:

- Evaluate how best to provide long-term and sustainable funding for state provided financial aid for postsecondary institutions in the state, including scholarship opportunities
- Evaluate proposals that are based on available facts and conclusions pertaining to financial aid opportunities at postsecondary institutions in the state.
- Recommend improvements or additions to the laws providing for financial aid at postsecondary institutions.
- Take public comments on financial aid opportunities in the state.

Attachment 2

TAYLOR PLAN – Louisiana (2014 Graduates)

*CURRICULUM**

Four (4) years of math
Four (4) years of Language Arts
Four (4) years of Science
Four (4) years of Social Studies
One (1) year Fine Arts
Two (2) years Foreign Language

*Specific required courses spelled out in publications

MINIMUM ACHIEVEMENT

- 2.5 or higher cumulative GPA
- Composite ACT of 20 or above

STANDARD AWARD

State-paid tuition at any public two- or four-year college, university or vocational/technical school or equivalent award at any in-state private institution.

ADDITIONAL AWARDS

- $400 for students with a GPA of 3.5 or better, and ACT of 23 or higher
- $800 for students with a GPA of 3.5 or better, and ACT of 27 or higher

Attachment 3

GOVERNOR'S PERFORMANCE SCHOLARSHIP

QUALIFICATIONS OF APPLICANTS

- Alaska Residents who have applied, or will apply, no more than six (6) months before or after date of graduation.
- Will use the scholarship at a qualified (Alaskan) post secondary institution no later than 6 years after the beginning of the first school year after graduation.

ELIGIBILITY

- Completed Core Curriculum
- Met minimum grade-point average threshold
- Met minimum career-skills assessment or college entrance examination threshold
- Be enrolled in a certificate or degree-seeking program

*CURRICULUM**

Four (4) years of math
Four (4) years of Language Arts
Four (4) years of Science
Three (3) years of Social Studies

*Specifics TBA

AWARD LEVELS ***

- 3.5 and up - 100% of qualified tuition
- 3.0-3.49 - 75% of qualified tuition
- 2.5-2.99 - 50% of qualified tuition

*Minimum test scores per tier, and how they would impact awards, TBA
**Career Scholarship award not to exceed $3,000 per school year

ESTIMATED PROGRAMMATIC COST

FY 2012 - $8,221,935
FY 2016 - $20,556,621

Attachment 4

SENATE EDUCATION COMMITTEE

QUALIFICATIONS OF APPLICANT

- Alaska Residents who have applied, or will apply, no more than six (6) months before or after date of graduation.
- Will use the scholarship at a qualified (Alaskan) post secondary institution no later than 6 years after the beginning of the first school year after graduation.

ELIGIBILITY

- Completed Core Curriculum
- Met minimum grade-point average threshold
- Met minimum career-skills assessment or college entrance examination threshold
- Be enrolled in a certificate or degree-seeking program

*CURRICULUM**

Four (4) years of math	Three (3) years of math
Four (4) years of Language Arts	Four (4) years of Language Arts
Four (4) years of Science	Three (3) years of Science
Four (4) years of Social Studies, one may include a non-English language, art, etc.	Four (4) years of Social Studies
	Two (2) years of foreign or Alaska Native language

*Specifics TBA

AWARD LEVELS ***

Academic

- 3.5 and up - 100% of qualified tuition
- 3.0-3.49 - 75% of qualified tuition
- 2.5-2.99 - 50% of qualified tuition

Need

- 50% of outstanding "unmet financial need" after grants, awards and $2,000 student contribution

*Minimum test scores per tier, and how they would impact awards, TBA

**Career Scholarship award not to exceed $3,000 per school year

ESTIMATED PROGRAMMATIC COST

FY 2012 - $25,341,600*

FY 2015 - $40,106,600

*Reflects inclusion of 2010 graduates in first cohort

Attachment 5

HOUSE EDUCATION COMMITTEE

QUALIFICATIONS OF APPLICANTS

- Alaska Residents who have applied, or will apply, no more than six (6) months before or after date of graduation.
- Will use the scholarship at a qualified (Alaskan) post secondary institution no later than 6 years after the beginning of the first school year after graduation.

ELIGIBILITY

ALASKA SCHOLARSHIP PROGRAM

QUALIFICATIONS OF APPLICANTS

- Alaska Residents who have applied, or will apply, no more than six (6) months before or after date of graduation.
- Will use the scholarship at a qualified (Alaskan) post secondary institution no later than 6 years after the beginning of the first school year after graduation.

ELIGIBILITY

- Completed Core Curriculum
- Met minimum grade-point average threshold
- Met minimum career-skills assessment or college entrance examination threshold
- Be enrolled in a certificate or degree-seeking program

*CURRICULUM**

Four (4) years of math
Four (4) years of Language Arts
Four (4) years of Science
Four (4) years of Social Studies, one may include a non-English language, art, etc.

Three (3) years of math
Four (4) years of Language Arts
Three (3) years of Science
Four (4) years of Social Studies
Two (2) years of foreign or Alaska Native language

*Specifics TBA

*AWARD LEVELS**

Academic

- 3.5 and up - $4,755
- 3.0-3.49 - $3,566
- 2.5-2.99 - $2,378

Need

- $400,000 one-time appropriation to AlaskAdvantage to accommodate increased maximum award

*Minimum test scores per tier, and how they would impact awards, TBA

ESTIMATED PROGRAMMATIC COST

FY 2012 - $9,321,900
FY 2016 - $21,656,600

Attachment 7

Department of Education Updated Scholarship Cost Estimate – 8/17/10:

District_Name	2010 Graduates	3.5+	3.0-3.49	2.5-2.99	3.5 +	3.0-3.49	2.5-2.99	Percentage of Graduates with GI 2.5 or better
North Slope Borough School District	81	9	19	23	11.11%	23.46%	28.40%	62
Northwest Arctic Borough School District	99	16	19	19	16.16%	19.19%	19.19%	54

Attachment 8

Attachment 8

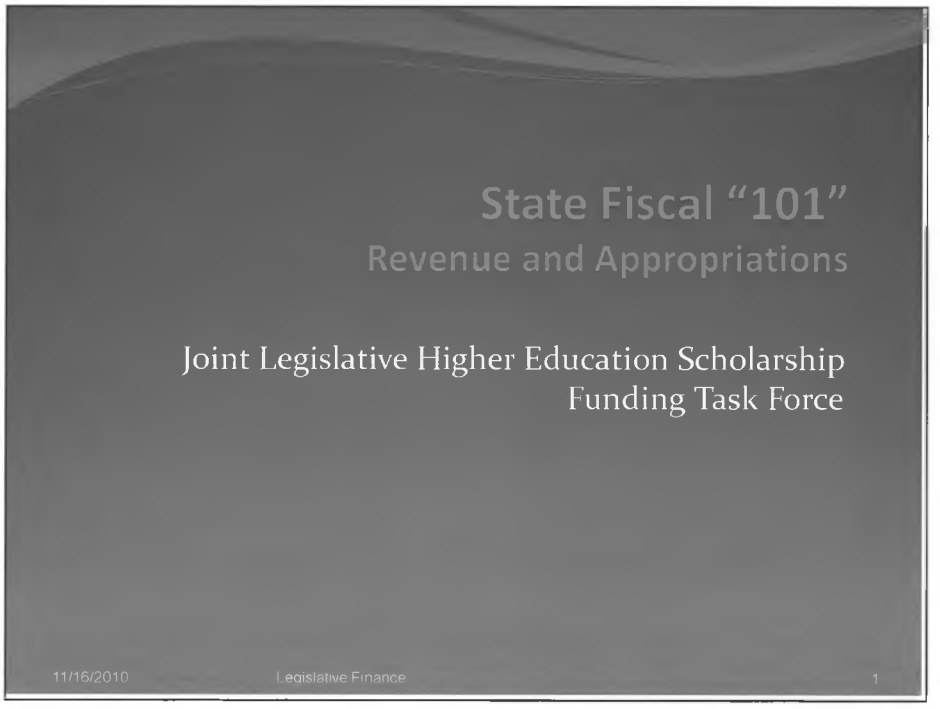
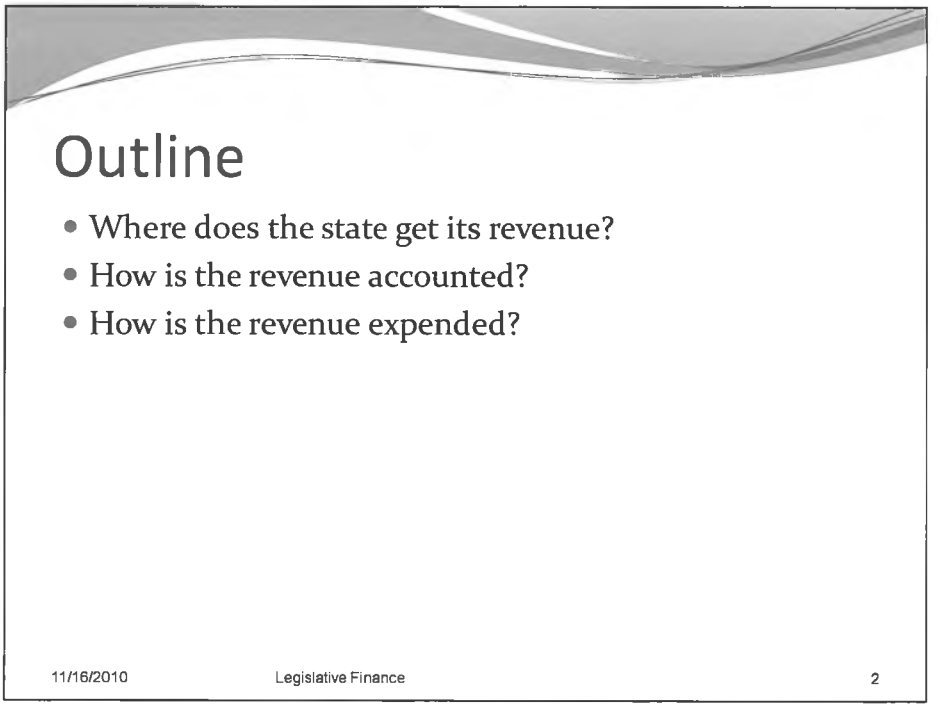
Attachment 9

Legislative Finance ***State Fiscal "101"*** Presentation:





Attachment 9

Revenue Sources

- Oil
- Non-Oil (excluding Investment)
- Investment
- Federal

Oil Revenue

- Royalty
  - Leasing of state land and royalty payment as land owner
- Production Tax
  - Net profits tax on production
- Petroleum Property Tax
  - Property tax on oil and gas property in state
- O&G Corporate Income Tax
  - Income tax on oil and gas corporations

Attachment 9

Non-Oil (excluding investment)

- Corporate Income Tax (non-oil companies)
- Excise Taxes
  - Tobacco, alcoholic beverages, motor fuel
- Licenses and Permits
  - Fishing Hunting, Motor Vehicle
- Charges for Services
  - Marine Highway, other program receipts

Investment Income

- GF Earnings (relatively new)
- CBR
- Permanent Fund

Attachment 9

How is revenue accounted?

- The primary operating fund of the state is the General Fund
  - The general fund has numerous sub-funds created by law
- Other fund types outside the general fund include (but not limited to):
  - Permanent Funds
  - Fiduciary Funds
  - Component Units

11/16/2010 Legislative Finance 7

Accounting ≠ Budgeting

Both accounting and budgeting are fiscal systems

- Accounting focuses on recording financial transactions
- Budgeting is more the enactment of a fiscal plan
  - Budget processes are dependent upon the accounting of past and current year expenditures and revenue
- Accounting follows generally accepted accounting practices (GASB)
- Budgeting does not follow a stringent set of rules

11/16/2010 Legislative Finance 8

Attachment 9

How is revenue expended?

- Legislature has the **Power of Appropriation**
  - No expenditure of state funds w/o an appropriation
- Legislature appropriates funds based on levels of discretion

Levels of Discretion (Highest to Lowest)

Fund sources (revenues) grouped according to levels of discretion

- Unrestricted General Funds
- Designated General Funds
- Other State Funds
- Dedicated Funds

Attachment 9

Dedicated

- Very little discretion how appropriated
- Article IX, Section 7 of the Constitution prohibits the dedication of revenue to any special purpose
  - Exceptions:
    - Article IX, Section 15 – Permanent Fund
    - Dedication prior to Statehood
    - Federal

Other State Funds

- Little discretion how appropriated
- Although not dedicated, funding sources in the group typically are restricted in some fashion
  - Contractual obligation
    - Bonds
  - Held in trust
    - PERS, TRS, etc.
  - Court order
    - Mental Health Trust
  - Legal separation
    - Corporate receipts

Attachment 9

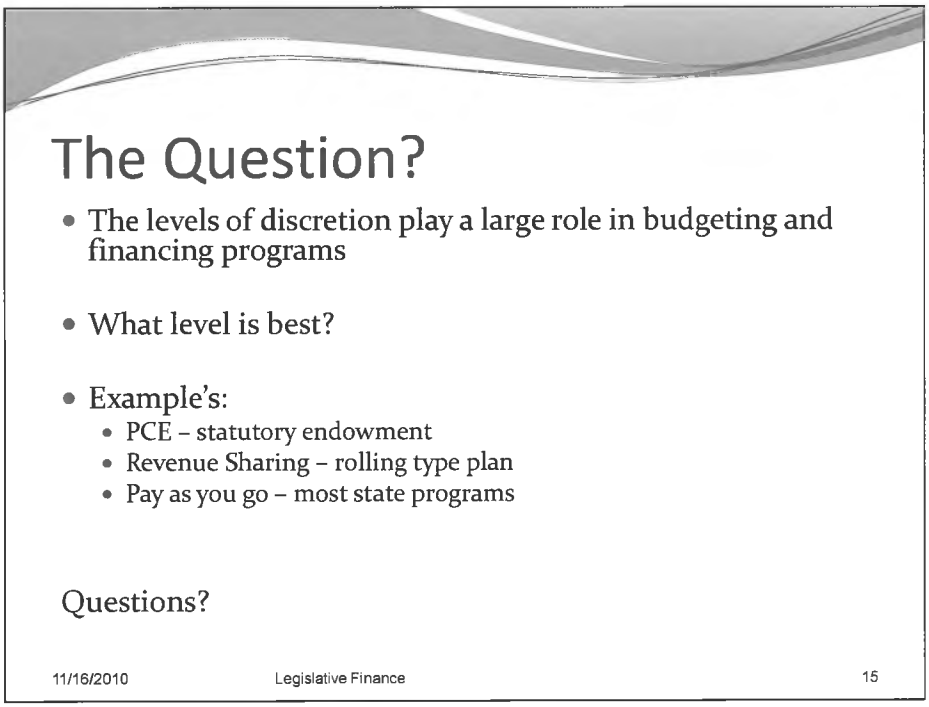
Designated General Funds

- Designated General funds consist of fund sources that have been "designated" for a special purpose in statute
- Constitutional prohibition "trumps" statutory designation
- Therefore, Legislature has complete discretion on use of funding
- However, Legislature typically follows statutory "guidelines"

Unrestricted General Funds

- Complete discretion how appropriated
- Typically referenced as a measure of state spending
- Utilized when calculating the Fiscal Surplus or Fiscal Gap
  - General Fund Revenue less General Fund Appropriations = Fiscal Surplus or (Gap)
- Approximately 90% of GF revenue is derived from Oil

Attachment 9



Attachment 10

Endowment Structure

Example A: **$400 Million Constitutional Fund**

Equivalent: Permanent Fund

Operation:

- $400 deposited to capitalize constitutionally created fund
- Invested for long-term return
- Earnings ($20 M/yr at assumed 5% ROI) accrue to account
- Excess earnings inflation-proof fund
- Account pays scholarships

STRENGTHS	WEAKNESSES
• Highest potential for long-term programmatic sustainability • Principal is safe • Inflation proof • Earnings provide predictable pay-out funding stream • Earnings: Very safe from "raiding" if const. protected	• Necessity for large Initial investment • Necessity for constitutional amendment • Account is rare • Higher administrative cost? • Subject to market volatility • Questionable base for programmatic evolution
OPPORTUNITIES	**THREATS**
• High profile focal point for State investment • Highest likelihood of attracting outside donations	• Pandora's box and the Christmas tree effect • Earnings susceptible to "raiding" if not const. protected • Subject to market volatility

Attachment 11

Endowment Structure

Example B: **$400 Million Statutory Fund (General Fund Sub-account)**

Equivalent: Power Cost Equalization Fund

Operation:

- $400 deposited to capitalize fund
- Invested for long-term return
- Earnings ($20 M/yr at assumed 5% ROI) accrue to account
- Excess earnings inflation-proof fund
- Account pays scholarships

STRENGTHS	WEAKNESSES
• High potential for long-term programmatic sustainability • Tried mechanism • Principal offers strongest programmatic insurance policy of unprotected fund-types • Earnings provide predictable pay-out funding stream	• Necessity for large initial investment • Higher administrative cost? • Subject to market volatility • Questionable base for programmatic evolution
OPPORTUNITIES	**THREATS**
• High profile focal point for State investment • Strong base for programmatic evolution • Likelihood of attracting outside donations	• Principal susceptible to "raiding" • Earnings susceptible to "raiding"

Attachment 12

"Rolling Fund" Structure

Example A: **Progressive Capitalization**

Equivalent: Community Revenue Sharing

Operation:

- Progressive fund capitalized up to $160 million
- Interest bearing fund
- Principal and interest earnings pay for scholarships
- Yearly appropriations used to maintain value of fund corpus

STRENGTHS	WEAKNESSES
• Low capitalization hurdle • Tried mechanism • Lower administrative cost than endowment • Greater pay-out stream predictability than Default • Principal acts as fixed-term programmatic insurance policy	• Susceptible to budget volatility • Susceptible to budgetary process • Less than predictable pay-out funding stream • Lower likelihood of attracting outside donations than Endowment
OPPORTUNITIES	**THREATS**
• Responsive to programmatic evolution • Some likelihood of attracting outside donations	• Declining oil production/revenue • Declining federal spending • Increasing demand for services • Principal susceptible to "raiding" • Earnings susceptible to "raiding"

Attachment 13

"Rolling Fund" Structure

Example B: **Immediate Capitalization**

Equivalent: Community Revenue Sharing

Operation:

- Immediate fund capitalized up to $200 million
- Interest bearing fund
- Principal and interest earnings pay for scholarships
- Yearly appropriations* used to maintain value of fund corpus

  *Dividends, program receipts and other funds (AIDEA, AK Housing, ACPE) designated to Scholarship Fund

STRENGTHS	WEAKNESSES
• Moderate capitalization hurdle • Tried mechanism • Identified fund replenishment stream • Lower administrative cost than Endowment • Greater pay-out stream predictability than Default • Principal acts as fixed-term programmatic insurance policy	• Necessity for substantial Initial investment • Susceptible to budget volatility • Susceptible to budgetary process • Less than predictable pay-out funding stream • Lower likelihood of attracting outside donations than Endowment
OPPORTUNITIES	**THREATS**
• Responsive to programmatic evolution • Some likelihood of attracting outside donations	• Declining oil production/revenue • Declining federal spending • Increasing demand for services • Principal susceptible to "raiding" • Earnings susceptible to "raiding"

Attachment 14

Default Structure

Example: **Pay-As-You-Go**

Equivalent: Senate Bill 221

Operation: Yearly appropriation to support programmatic costs

STRENGTHS	WEAKNESSES
• Most routine funding mechanism • No need for account creation • Lowest administrative cost • Yearly funding most directly matches yearly programmatic cost • Leaves greatest level of budgetary flexibility	• Most susceptible to budget volatility • Most susceptible to budgetary process • Least predictable pay-out funding stream • Lowest likelihood of attracting outside donations
OPPORTUNITIES	**THREATS**
• Most responsive to programmatic evolution	• Declining oil production/revenue • Declining Federal spending • Increasing demand for services

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Introduced:
Referred:

A BILL

FOR AN ACT ENTITLED

"An Act relating to Alaska scholarship awards; and establishing the Alaska scholarship award income account and the Alaska scholarship fund."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.43.825(f) is repealed and reenacted to read:

(f) Payment of a scholarship is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible scholarships, the commission may not award a scholarship to a new applicant and the commission shall pay existing awards on a pro rata basis for that fiscal year.

*** Sec. 2.** AS 14.43 is amended by adding a new section to read:

Sec. 14.43.835. Alaska scholarship award income account. The Alaska scholarship award income account is created as an account in the general fund. Money may be appropriated into the account from the Alaska scholarship fund under AS 37.14.750 and from other sources. The commission may use the money in the

Attachment 15

account to pay scholarships awarded to students under AS 14.43.810 - 14.43.849. The amount determined under AS 37.14.750(c) each year and deposited into the account is the maximum amount that may be used to pay scholarships for the immediately succeeding fiscal year.

*** Sec. 3.** AS 37.14 is amended by adding a new section to read:

Article 8A. Alaska Scholarship Fund.

Sec. 37.14.750. Alaska scholarship fund established. (a) The Alaska scholarship fund is established in the general fund for the purpose of making scholarship payments to qualified postsecondary institutions and students under AS 14.43.810 - 14.43.849. The fund consists of money appropriated to the fund. Income earned on money in the fund and donations to the fund may be appropriated to the Alaska scholarship income account established in AS 14.43.835. Money in the fund does not lapse.

(b) Each fiscal year, the legislature may appropriate to the Alaska scholarship fund an amount equal to 20 percent of the money received by the state during the previous calendar year under AS 43.55.011(g). The amount may not exceed the greater of

(1) $40,000,000; or

(2) the amount that, when added to the fund balance on June 30 of the previous fiscal year, equals $160,000,000.

(c) The balance in the Alaska scholarship fund shall be determined on June 30 of each year. The department shall distribute one-third of that amount or $40,000,000, whichever is less, for deposit into the account established in AS 14.43.835. If the fund balance is less than $80,000,000 in a fiscal year, payments may be made only to satisfy obligations from previous fiscal years.

(d) Notwithstanding the limitation in (b) of this section, the legislature may appropriate any amount to the Alaska scholarship fund. Nothing in this section creates a dedicated fund.

(e) In this section, unless the context requires otherwise, "fund" means the Alaska scholarship fund established in (a) of this section.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to

Attachment 15

read:

TRANSITION: ALASKA SCHOLARSHIP FUND BALANCE. Notwithstanding the $40,000,000 limit in AS 37.14.750(b), the following amounts shall be substituted for that amount as follows for

(1) fiscal year 2012, $15,000,000;

(2) fiscal year 2013, $30,000,000.

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Introduced:
Referred:

A BILL

FOR AN ACT ENTITLED

"An Act relating to AlaskAdvantage education grant funding and to Alaska scholarship funding; and establishing an account and fund for those purposes."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.43.410 is amended by adding a new subsection to read:

(c) Notwithstanding the provisions of this section, payment of a grant is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible grants, the commission may not award a grant to a new applicant, and the commission shall pay existing awards on a pro rata basis for that fiscal year.

*** Sec. 2.** AS 14.43.825(f) is repealed and reenacted to read:

(f) Payment of a scholarship is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible scholarships, the commission may not award a scholarship to a new applicant, and the commission shall pay existing awards

Attachment 16

on a pro rata basis for that fiscal year.

*** Sec. 3.** AS 14.43 is amended by adding a new section to read:

Sec. 14.43.915. AlaskAdvantage education grant and Alaska scholarship award income account. The AlaskAdvantage education grant and Alaska scholarship award income account is created as an account in the general fund. Money may be appropriated into the account from the AlaskAdvantage education grant and Alaska scholarship fund under AS 37.14.750 and from other sources. The commission may use the money in the account to pay grants awarded under AS 14.43.400 - 14.43.420 and scholarships awarded to students under AS 14.43.810 - 14.43.849. The amount determined under AS 37.14.750(c) each year and deposited into the account is the maximum amount that may be used to pay scholarships for the immediately succeeding fiscal year.

*** Sec. 4.** AS 37.14 is amended by adding a new section to read:

Article 8A. AlaskAdvantage Education Grant and Alaska Scholarship Fund.

Sec. 37.14.750. AlaskAdvantage education grant and Alaska scholarship fund established. (a) The AlaskAdvantage education grant and Alaska scholarship fund is established in the general fund for the purpose of making grant payments under AS 14.43.400 - 14.43.420 and scholarship payments to qualified postsecondary institutions and students under AS 14.43.810 - 14.43.849. The fund consists of money appropriated to the fund. Income earned on money in the fund and donations to the fund may be appropriated to the AlaskAdvantage education grant and Alaska scholarship award income account established in AS 14.43.915. Money in the fund does not lapse.

(b) Each fiscal year, the legislature may appropriate to the AlaskAdvantage education grant and Alaska scholarship fund an amount equal to 20 percent of the money received by the state during the previous calendar year under AS 43.55.011(g). The amount may not exceed the greater of

(1) $40,000,000; or

(2) the amount that, when added to the fund balance on June 30 of the previous fiscal year, equals $160,000,000.

(c) The balance in the AlaskAdvantage education grant and Alaska

Attachment 16

scholarship fund shall be determined on June 30 of each year. The department shall distribute one-third of that amount or $40,000,000, whichever is less, for deposit into the account established in AS 14.43.915. If the fund balance is less than $80,000,000 in a fiscal year, payments may be made only to satisfy obligations from previous fiscal years.

(d) Notwithstanding the limitation in (b) of this section, the legislature may appropriate any amount to the AlaskAdvantage education grant and Alaska scholarship fund. Nothing in this section creates a dedicated fund.

(e) In this section, unless the context requires otherwise, "fund" means the AlaskAdvantage education grant and Alaska scholarship fund established in (a) of this section.

* **Sec. 5.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: ALASKADVANTAGE EDUCATION GRANT AND ALASKA SCHOLARSHIP FUND BALANCE. Notwithstanding the $40,000,000 limit in AS 37.14.750(b), the following amounts shall be substituted for that amount as follows for

(1) fiscal year 2012, $15,000,000;

(2) fiscal year 2013, $30,000,000.

Letter of Intent for Senate Bill 224

An Act establishing the Alaska Student Achievement Program...

It is the intent of the legislature to establish a scholarship program with the following goals:

(1) improving preparedness of Alaska students for postsecondary education;

(2) improving the postsecondary academic achievement;

(3) improving the postsecondary graduation rates of students in the state;

(4) providing a rigorous curriculum in all high schools in the state;

(5) improving the quality of the educational programs offered by high schools in the state;

(6) improving academic performance of students in grades kindergarten through 12 in the state;

(7) increasing high school graduation rates in the state;

(8) increasing the scores of high school students in the state on college entrance examinations;

(9) expanding the pool of high school students in the state who pursue postsecondary opportunities;

(10) increasing participation of Alaska high school graduates in Alaska postsecondary institutions; and

(11) increasing job training opportunities in the state

Need That Class, Desperately? The Course Concierge Will See You Now

Jean Dixon, University of Nevada

Paul Neill, whom students think of as the "course concierge" at the U. of Nevada at Reno, can cut red tape that might be beyond advisers' reach.

By Eric Hoover

Paul Neill's title is director of the core curriculum at the University of Nevada at Reno, but students there know him as the "course concierge." He's the one they contact when they can't get into a class they need.

A few years ago, officials at the university decided that they had to do more to reduce the hassles of registering for courses. They imagined a kind of registration czar, someone who could communicate well with faculty members but who had the authority of an administrator. Mr. Neill, a faculty member who works in the provost's office, fit the bill.

Soon Nevada was promoting Mr. Neill as the course concierge, the man advisers and students could turn to when stuck. Each semester, he helps 50 to 60 students solve their scheduling problems, working one on one with those who need a particular course to graduate, or who have trouble getting into classes they must take in a sequence. Often he creates a spot in a class that's full, or steers students to suitable alternatives.

"In the past, it was often left up to the student and the professor to see who could get in where," Mr. Neill says. "It was very informal."

Attachment 18

Even in times of plenty, students often learn a tough lesson when they register for courses: You can't always get what you want. In this era of budget cuts, however, students on some campuses have scrambled to get not only the courses they would like but also those they need for their majors and to satisfy core requirements.

As colleges pack more students into fewer courses, the scheduling puzzle has become more challenging for administrators, instructors, and students alike. Institutions are using a variety of strategies to alleviate the course crunch, and often that begins with improving the registration process.

Nevada's president, Milton D. Glick, proposed the course-concierge program as a way to improve timely progression toward degrees at the university, which has about 13,000 undergraduates. Over the years he has learned that even small scheduling snags can discourage students, delay their progress, and make them more likely to transfer or drop out.

After he arrived, in 2006, Mr. Glick developed a plan to improve Nevada's retention and graduation rates. He pledged publicly that students would get the courses they needed to graduate on time. To that end, his course-concierge program provides a backstop for the university's academic advisers.

Mr. Neill is not a replacement for advisers, who continue to meet with students and help them select courses. But they sometimes encounter dilemmas that they can't handle on their own. "They don't always have the ability to cut through red tape, to get through to the department, to get something done," Mr. Glick says. "Paul can get a phone call through."

'A Relief Valve'

When Natica Rudavsky contacted Mr. Neill this winter, she was frantic. Ms. Rudavsky, a transfer student who has a bachelor's degree from another university, wanted to pursue a second degree, in nutrition, at Nevada, but she was confused about which core requirements would apply to her. Would the university waive that required mathematics course?

By the time she and her adviser had sorted that out, it was late in the registration cycle, and all the courses she needed were full. Mr. Neill evaluated her record, then discussed her options with her. Ultimately, he found Ms. Rudavsky a spot in three of the four courses she sought. "If he hadn't helped, " Ms. Rudavsky says, "I probably would have just waited until the next semester to enroll."

Attachment 18

The course concierge doesn't cater to whims. A student who just wants to avoid that 8 a.m. class would not get help from Mr. Neill. The same might go for a senior who had never bothered to register for a required course that he had every opportunity to take.

The service does cater to those who truly have a need, or are simply stuck or confused. "We've taken some of the burden off the shoulders of advisers," he says. "It's a relief valve."

The course concierge has also helped the university plan more effectively during a difficult time. For the current fiscal year, the state cut the university's budget by $33-million, or 15 percent. Last semester, Nevada offered 96 fewer course sections than it did in the fall of 2008, a 6-percent reduction.

Recently, Mr. Neill's work with students helped him identify scheduling conflicts that made it difficult for them to register for the right courses. For instance, freshmen and sophomores taking biology or chemistry courses are supposed to enroll simultaneously in Math 127. Yet Mr. Neill realized that that math lecture overlapped with several of the laboratory sections.

He discussed the issue with the three departments, which adjusted their schedules accordingly. "The departments probably would have become aware of this," he says, "but the concierge service helped them understand it quickly."

Better Communication

Elsewhere, administrators have looked for ways to make small but meaningful changes in the registration process. This fall the University of California at Santa Barbara, which has seen substantial budget cuts and an enrollment surge, created an online waiting list for courses. The system formalized the process of determining who gets a spot, allowing advisers to better evaluate students' needs and communicate with them more effectively.

"It was a huge help," says Mary Nisbet, acting dean of undergraduate education. "Now faculty aren't getting hundreds of e-mails, and students know there is somewhere to go where advisers will get back to them."

This past fall, the university reduced the number of credits students could sign up for during the second round of registration. As a result, juniors and seniors, who have priority, can snag a total of four classes, instead of five, at that time.

Attachment 18

In the past, many students eventually dropped their fifth course anyway. The new policy has encouraged older students to focus on getting the courses they really need, and the change recently freed up at least 1,500 class spots for other students, Ms. Nisbet says.

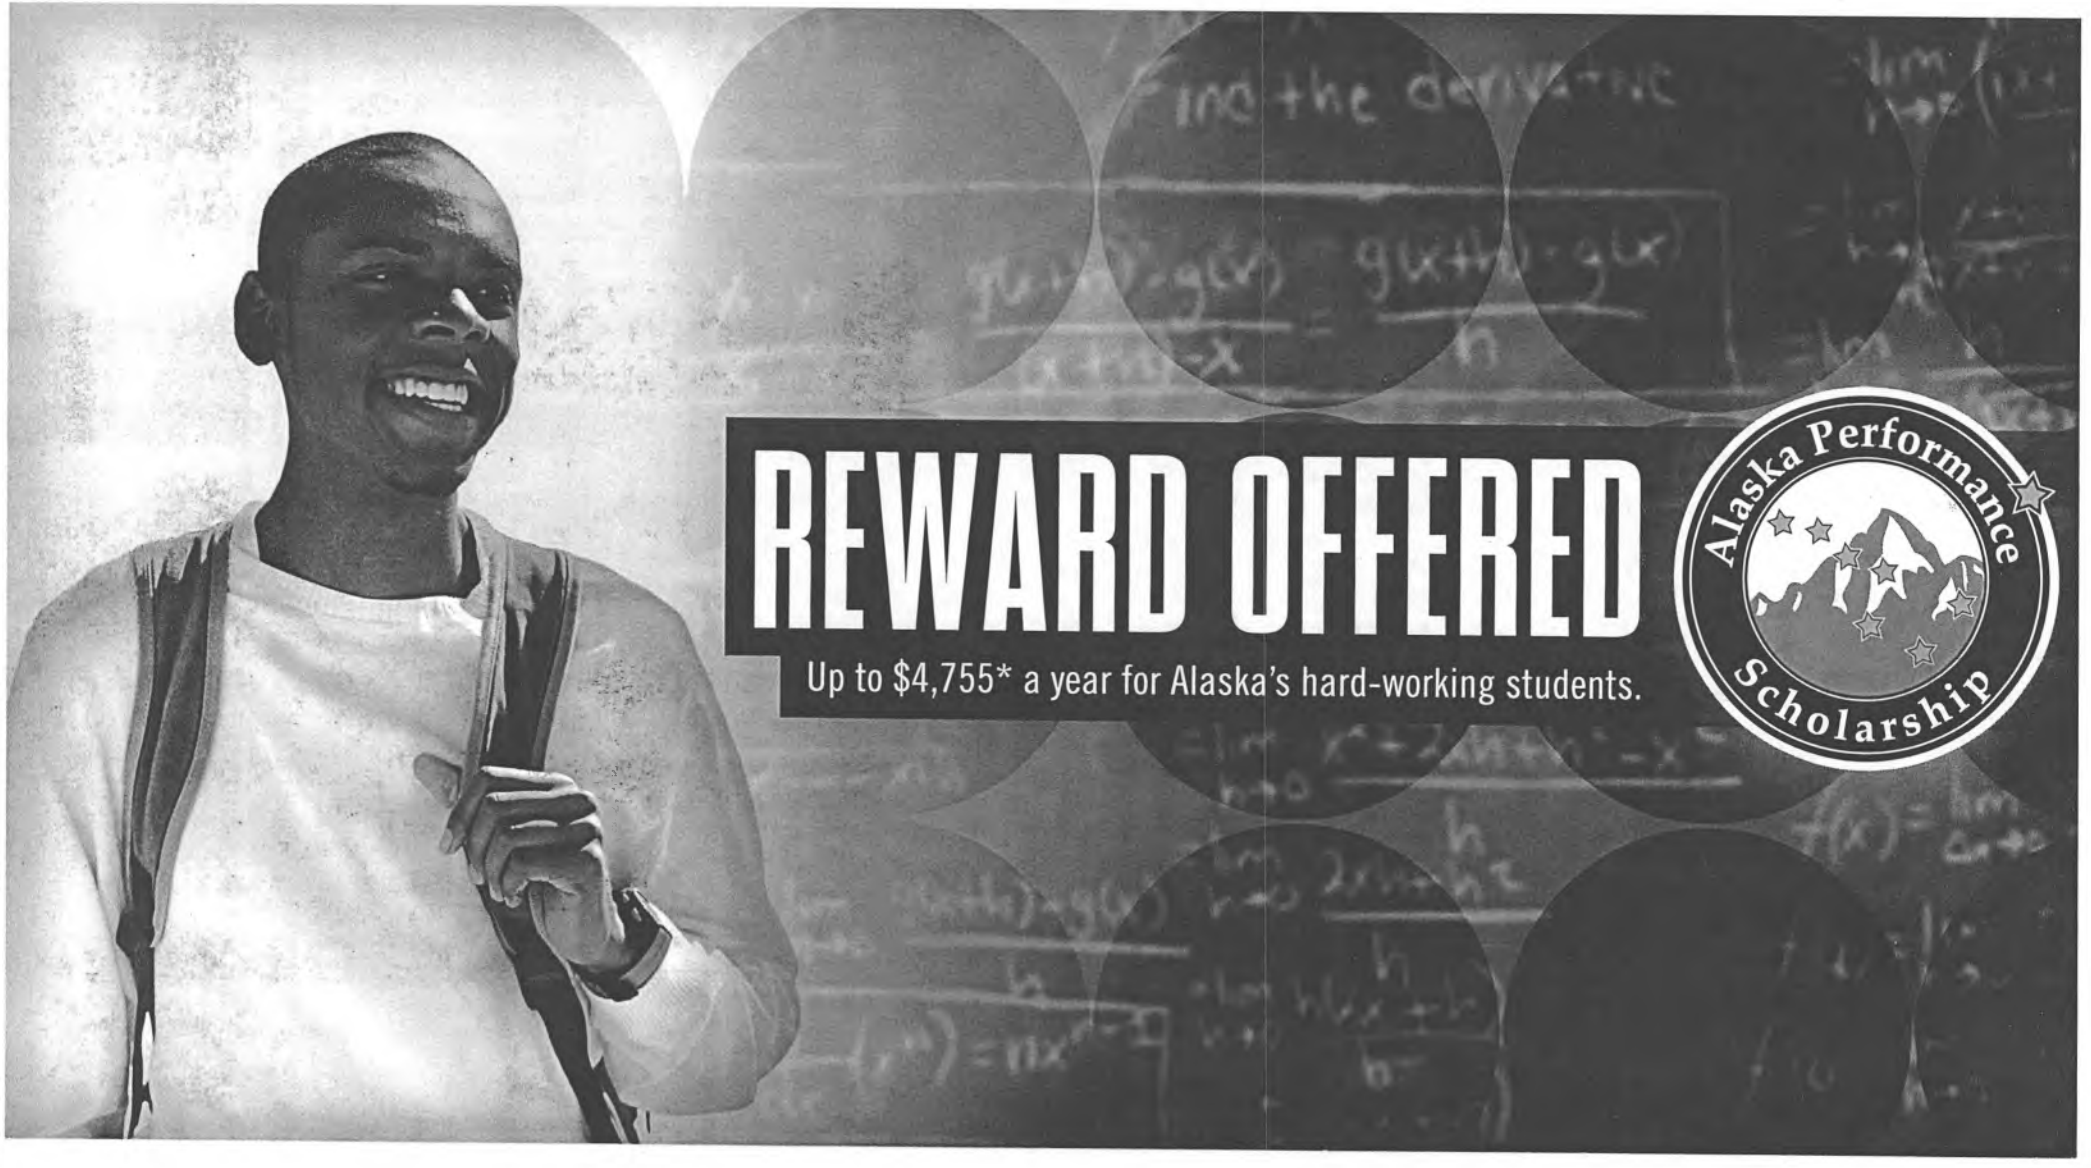
For the first time, the university is offering schedule-planning workshops, in which students learn how to prioritize. "We're trying to help students weather a storm," she says.

Many institutions have turned to sophisticated data analysis to better anticipate course demand. At the University of California at Berkeley, Catherine P. Koshland helps lead a task force that will determine which courses students will need—and how many—in the coming years.

To do that, Ms. Koshland and her colleagues have begun to examine a decade's worth of enrollment data, which help them predict how many freshmen will need to take a specific math sequence, for instance, or how many sections of pre-med physics courses the university will need.

"We can bring some rationality to the offerings, rather than having departments guesstimate," says Ms. Koshland, vice provost for teaching, learning, academic planning, and facilities. "We're bringing more and more discipline to something that could grow organically before, when there was elasticity in the system. There's no elasticity now."

(Head Count explores the changing enrollment landscape. Please send ideas to eric.hoover@chronicle.com)



REWARD OFFERED
Up to $4,755* a year for Alaska's hard-working students.
Alaska Performance Scholarship

Alaska Performance Scholarship

What should I do now ?

- ✓ Discuss the APS curriculum with your high school counselor or academic advisor.
- ✓ Sign up for the SAT and/or ACT ASAP! Have your scores sent to your high school. They must be received before you graduate.

SAT	Fall Test Dates	Registration Deadlines
	Oct 1	Sep 9
	Nov 5	Oct 7
	Dec 3	Nov 8

sat.collegeboard.org

ACT	Fall Test Dates	Registration Deadlines
	Sep 10	Aug 12
	Oct 22	Sep 16
	Dec 10	Nov 4

actstudent.org

The Alaska Performance Scholarship (APS) is an invitation to excellence for Alaska's students, parents, and educators. To be eligible, students must take a specific, rigorous high school curriculum; earn a minimum 2.5 GPA; and do well on a qualifying college or career-readiness exam. Three award levels are offered and any future Alaska high school graduate may become eligible!

For more information and specific requirements go to: **APS.alaska.gov**

To apply, most qualified students need to complete only the Free Application for Federal Student Aid (FAFSA). Awards can be used at participating colleges or universities in Alaska, or for approved career and technical education programs in the state.

***Administered by the Alaska Commission on Postsecondary Education, the APS is a program of the State of Alaska and subject to annual approval of funding**

\+ Representative Dick – State Intervention in Schools (HB 256)

* First Hearing
= Previously Heard
\+ Teleconferenced

Introduction and Background Preceding Testimony Regarding Intervention in Alaskan Schools

Statewide, there are many districts that need help. Some are in intervention status.

Under NCLB, *EVERY* district in the Nation will be out of compliance by 2014.

Our current Intervention model needs a huge change-
from punitive to cooperative.

During the interim, I did my best to work with DEED to resolve the problems, but failed.

Therefore, we are here today.

Intervention School Districts

Elements that impact Alaska's intervention model

- History of REAA's
- NCLB
- Moore/Kasaylie Cases

Brief History of REAA's

- 1905 Territorial and Federal systems.
- 1951 Shift began from BIA to Territorial schools.
  (Johnson-O'Malley Act 1931-34)
- 1971 SOS Created- Rural schools only
- 1975 AUBSD …… a time of transition
- 21 REAA's created in 1976 (Tobeluk Consent Decree. Anna Tobeluk)

In 1985 Akiak, Akiachak and Tuluksak became Yupiit School District. Other shuffling went on.

- The good, total local control the bad, & the school boards

  (AASB 1957/ Carl Rose 1988)

- 1991 Former Governor Walter Hickel directed former Commissioner of Ed. Jerry Covey to develop a plan to improve state schools including content standards.

During the early years of REAA's, we discovered that school districts need accountability.

During more recent years, we have also discovered that total authority cannot be given to DEED. The Department also needs accountability.

The Problem

DEED strategies are not working in Yupiit and other intervention districts.

Test scores have gone down in Yupiit in the past three years.

The frustration level on the ground is high.

DEED personnel have brought division between the local administration and teachers.

Teacher turnover is high, so professional development brings only short term benefit.

Simple requests for cooperation have been ignored.

Judge Gleason in the Moore Case:

- Called for a trustee to oversee the workings of the district
- Insisted, over fifty times, on cooperation and collaboration.

DEED installed a trustee that has not been able to work with the district, yet DEED continues to ignore requests for collaboration and cooperation by the district.

School Board Relationships

Originally, the Alaska State Legislature was the school board for the REAAs.

In 1975 the Alaskan Legislature delegated that authority to an elected school board of each REAA district, providing local control and oversight for local schools.

Each REAA school has an advisory school board that makes recommendations to the REAA Board.

The State of Alaska has a Board of Education to whom the Department of Education answers.

Not one member of Alaska BOE lives in a REAA.

Not one BOE member lives in an intervention district… *Good folks*, but little personal knowledge of intervention districts.

NCLB (2001-2002)

States must show a timeline of how every student will be proficient by 2014.

Fact: By 2014 every district in the Nation will be out of compliance.

Schools must make AYP (Annual Yearly Progress)

All states choose their own tests and decide what "proficient" means.

Students are tested in grades 3-8, and again in HS.

There are a few (+) and many (-) of NCLB.

NCLB: If a district doesn't make AYP

- Year 1 Notification
- Year 2 Right to transfer schools
- Year 3 Free Tutoring
- Year 4 Corrective Action: Change staff or curriculum
- Year 5 Restructure. The district must choose from the following:
    1. Convert to charter school
    2. Replace principal and staff
    3. Turn over to private management
    4. Turn over to the State
    5. Other Restructuring.

Again, by 2014, *no* district will be in compliance with NCLB.
There is a real *and* deep fear in Alaska, even among some of the best school districts that, as 2014 approaches, DEED will use its authority to intervene and interfere with the local school budget.

MOORE & KASAYLIE CASES

KASAYLIE CASE 1997 said: State's method of funding capitol projects for education violates the education clause and the equal protection clause of the Alaska State Constitution and Title VI of the Federal Civil Rights Act of 1964.

The Kasaylie Case is about buildings.

MOORE CASE 2007 said: State violated Education Clause… it failed to identify the schools that are not according children a meaningful opportunity and is not providing a concerted effort to remedy the situation. (CEAAC- Citizens for the Educational Advancement of Alaska's Children.)

The Moore Case is about instruction.

Governor Parnell, Former Attorney General John Burns and Commissioner Hanley must truly be congratulated for their efforts on both cases.

Moore Case

State said "You wanted and got local control. Now you want us to fix your problem?" "We have spent a tremendous amount of money on this case, and that money could have gone to instruction."

CEAAC said, "Every child, both urban and rural has a right to a quality education in preparation for higher education or a meaningful career of choice. The State has a role in insuring that teachers are prepared, and districts receive the support they need to provide that education." "If you had worked with us in the beginning, we would not have needed this court case."

The educational atmosphere has been highly toxic with emotion and contention. Educational issues have gone to court that should have been settled "in house."

Other

- $7M from 2010. How $ dispersed? Over $4M went back to the Public School fund with three districts still in intervention.
- Trustee Darrel Sanborn. Icon of Department's authority. $193K/year for 10-14 days a month on the ground.

My strategy

- Show how DEED in Intervention districts, especially Yupiit, is counterproductive and has not followed its own SOSS manual.
- Suggest positive strategies for helping the districts that need it.

SOSS Ops Manual

6 domains- 10 elements

6 Domains:

1. Curriculum
2. Assessment
3. Instruction
4. Professional Development
5. Leadership
6. Supportive learning environment

1) Alignment of Curriculum to Standards
2) Accurate Assessment
3) Educational and Financial Plans
4) Expertise Through Coaches
5) Good Instructional Techniques
6) Supportive Learning Environment
7) Parent Involvement
8) Good Professional Development
9) Visionary Leadership
10) Instructional strategies that are aligned to curriculum and address the needs of diverse learners.

Coming...

- Demonstration of how I believe DEED has not followed its own manual for the best interest of intervention districts.
- Positive suggestions for action in intervention districts that must include collaboration and cooperation.
- "What's wrong and how to fix it." Aligning Mission, methodology and metric in all of Alaska's schools.

Just as tone of voice is important in interpersonal communication,

the “Spirit” in which intervention is carried out is critical in dealing with school districts that need help.

Alaska Early Childhood Coordinating Council

Presentation to Joint House and Senate Education Committees

January 25, 2012

Acknowledgement of Council Members

Establishment of Council

As part of the Head Start Reauthorization Act of 2007, states were required to establish State Advisory Councils on Early Childhood Education and Care, which have also come to be known as Early Childhood Advisory Councils

Mission

Promote positive development, improved health outcomes, and school readiness for children prenatal through age eight by creating a culturally responsive, comprehensive, and accessible service delivery system that links service providers, empowers families, and engages communities. The AECCC shall support the creation of a unified, sustainable system of early care, health, education, and family support for young children and their families.

Purpose of Council

Facilitate the integration and alignment of services, planning efforts, resources, policy development, and funding as well as establish connections between health, mental health, education, and family support systems and public and private partners.

Accomplishments of Council

- Met face-to-face four times
- Committees established to carry out Council work between meetings
- Identified Council priorities
- Inventory Project
- Early Childhood Resource Directory

Council Priorities

1. Expand early childhood services to 5,000 new children and families through in home and out of home services.

2. Identify methods to increase the pay in early childhood settings, particularly for those with higher degrees.

3. Implement the QRIS (Quality Rating and Improvement System) plan including an implementation time-line of activities and funding.

Priorities continued

4. Increase awareness of the Alaska Early Learning Guidelines (ELGs) by coordinating efforts (public and private) to include the "universal" early care and learning workforce (parents; extended family, community).

5. Embed "Strengthening Families" protective factors through systems across the board to include grant proposals, policies, materials development, and sustainability of long-term funding efforts.

Priorities continued

6. Support and promote a local partnerships grant process to invest in early childhood and family support.

7. Seek to ensure every child will have full access to well-child exams that follow the Alaska Periodicity Schedule which is based on the recommendations of the American Academy of Pediatrics.

Committees

- Policy
- Workforce Development
- Family Support
- Early Care and Learning
- Health and Mental Health

Inventory Project

- Identify early care and learning services
- Program types identified in the Inventory include:
  - Head Start/Early Head Start
  - Licensed Child Care Centers, Homes, and Group Homes
  - Military Child Care Centers and Homes
  - Parents as Teachers
  - Infant Learning/Early Intervention
  - Pre-elementary programs including:
    - Pilot Pre-elementary Programs (AP3)
    - School District Pre-elementary Programs
    - Private Pre-elementary Programs

Inventory continued

- Three phases to date:
  - Early Care and Learning Program Inventory [June 2011]
    - 394 communities in 53 school districts across 9 program types
  - Regional Analysis [Fall/Winter 2011-2012]
    - Regional numbers & percentages of children participating in programs by program type as compared to statewide numbers
  - Community Analysis [Winter/Spring 2011-2012]
    - numbers & percentages of children who participate in these programs by community
    - distribution by program type of all children participating in those programs
    - For communities of 2000 or more compare enrollment and distribution with aggregate regional and state data

Early Childhood Resources Directory

Strategic Report

The Council will produce a report for the Governor and Legislature that will:

- identify opportunities for, and barriers to, collaboration and coordination of early childhood programs and services.
- provide recommendations for:
  - increasing the overall participation of children in early childhood programs
  - a unified, statewide early childhood data collection system
  - a statewide professional development system
  - developing and improving high-quality comprehensive early learning standards
- assess the capacity and effectiveness of public and private institutions of higher education to prepare early childhood workforce

Purpose and Mission

The mission of the State System of Support (SSOS) is to support districts as they build their capacity to implement sustainable school improvement strategies with fidelity. Authority for developing and implementing a system of support for districts and schools comes from both State and Federal law (see Appendices B and C). This document provides an overview of the SSOS program and resources that are available to districts and schools in Alaska.

SSOS was established to help all students (AS 14.03.015):

- Succeed in education and work,
- Shape a personally worthwhile and satisfying life,
- Exemplify the best values of society, and
- Be effective in improving the character and quality of the world.

The SSOS program goal is for all districts and schools to:

- Demonstrate yearly increases in student achievement in all subgroups,
- Show improvement in the school value table index growth score, and
- Exhibit gains in the growth of individual student achievement with the eventual goal of two consecutive years of meeting Adequate Yearly Progress (AYP).

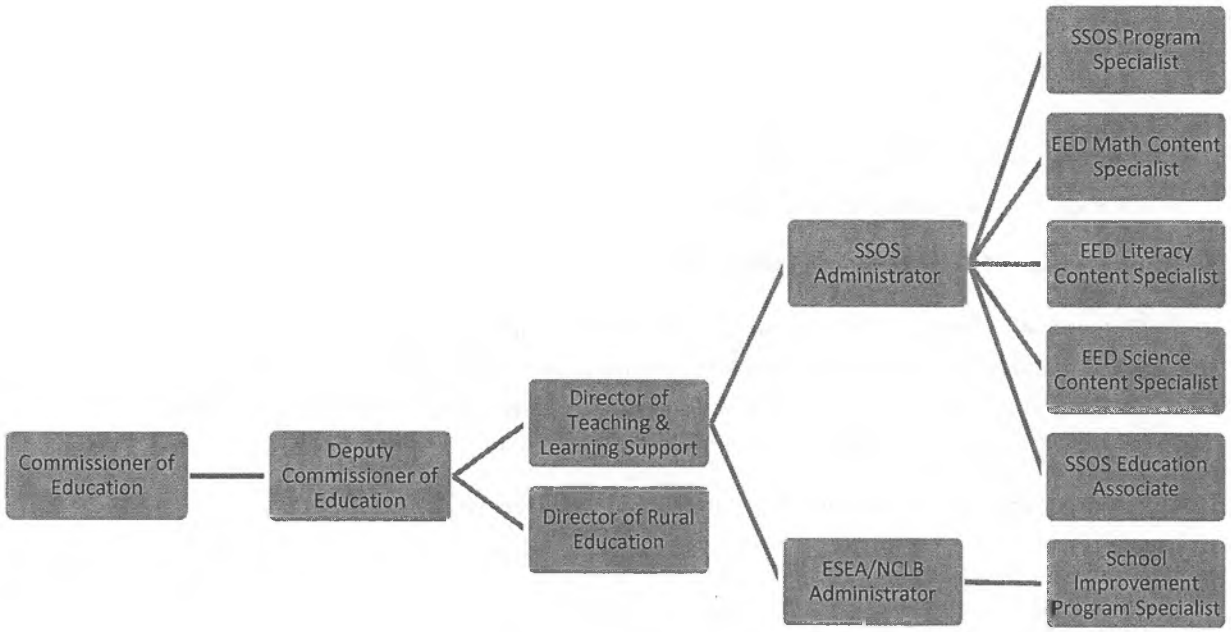
The SSOS specializes in helping Alaskan districts, schools, and school boards:

- Develop, sustain, and monitor improvement efforts,
- Build local capacity and increase staff retention rates,
- Align curriculum with Alaska Grade Level Expectations (GLEs),
- Gain meaningful exposure to all content areas,
- Use formative and summative assessment to make decisions and to inform instruction,
- Develop a multi-tiered approach to curriculum delivery that incorporates quality instruction and effective interventions for all students,
- Implement effective instructional strategies that are aligned to curriculum as well as addressing the needs of diverse learners,
- Implement effective High School Graduation Qualifying Exam (HSGQE) Remediation Plans,
- Foster a positive school climate and learning environment that is attentive to local culture,
- Foster staff collaboration through weekly staff meetings that discuss individual student progress,
- Align professional development policies and practices with resources and academic goals,
- Utilize instructional leaders to model and reinforce behavioral expectations, and
- Understand their role in improving student achievement.

SSOS Organizational System

The SSOS primary mission is to help districts build their capacity to sustain student growth. State and Federal government statutes require growth in student achievement and provide funds to ensure that the Alaska Department of Education & Early Development (EED) supports and holds districts accountable for the same.

EED's departmental SSOS organizational system is as follows:

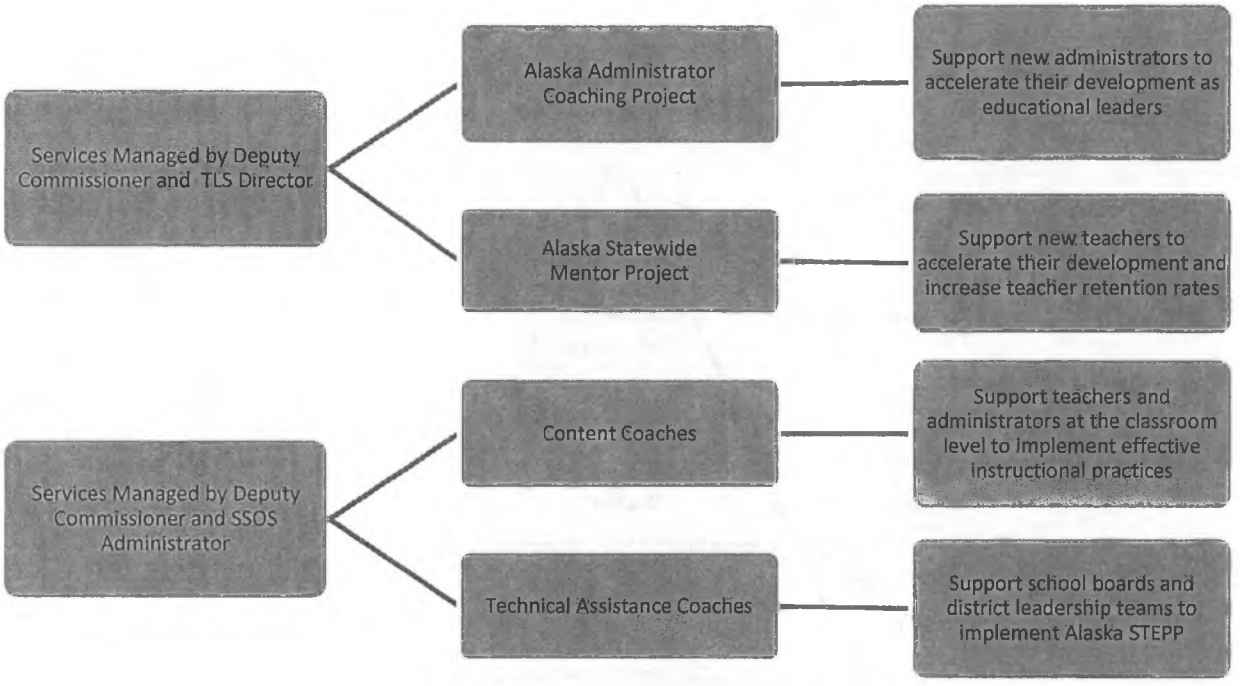


The SSOS collaborates with all divisions and sections of EED and works in partnership with the following agencies:

- Alaska Administrator Coaching Project (AACP)
- Alaska Comprehensive Center (ACC)
- Alaska Parent Information Resource Center (AKPIRC)
- Alaska Staff Development Network (ASDN)
- Alaska Statewide Mentor Project (ASMP)
- Alaska State Writing Consortium (ASWC)
- Assessment & Accountability Comprehensive Center (AACC)
- Association of Alaska School Boards (AASB)
- Center on Innovation and Improvement (CII)
- Consortium on Reading Excellence (CORE)
- Education Northwest
- Mid-Continent Research for Education & Learning (McRel)
- Measured Progress
- Rural Alaska Principal Preparation & Support (RAPPS)
- Special Education Service Agency (SESA)
- WestEd

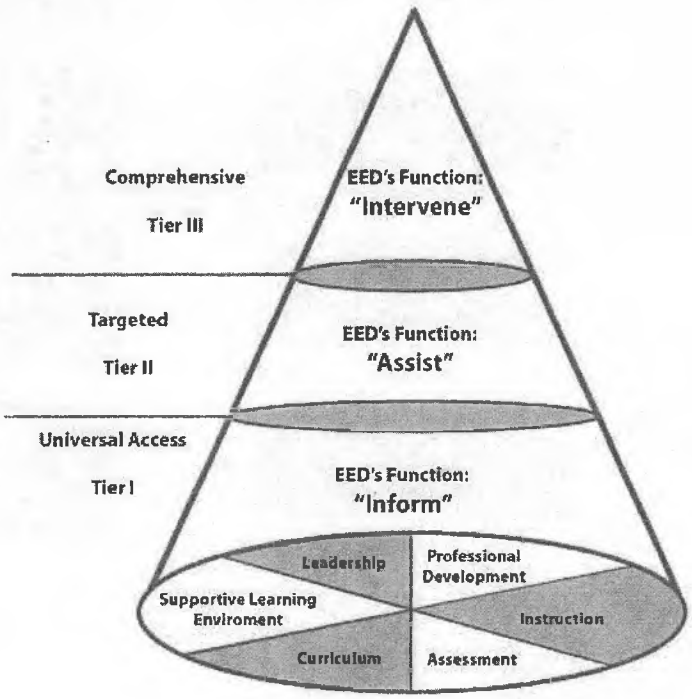
In addition, the SSOS is comprised of service providers who work in the field:

Alaska Administrative Coaches who work with new administrators to accelerate their development as educational leaders, Alaska Statewide Mentors who work with new teachers to accelerate their development and increase teacher retention rates, Content Coaches (CCs) who work at the classroom level with teachers and administrators to implement effective instructional practices, and Technical Assistance Coaches (TACs) who work with school boards and district leadership teams to implement Intervention District Improvement Plans (I-DIPs) created by Alaska STEPP (see Appendix H) or the Self-Study Tool (see Appendix G).



Tri-Tiered Model of Support

The SSOS uses a tri-tiered model to represent SSOS efforts to help districts build their capacity to implement sustainable school improvement strategies. EED provides aligned resources, information, professional development, content coaches, and technical assistance within six domain areas that represent aspects of best practices that substantially influence school and student performance. The six domains are: curriculum, assessment, instruction, supportive learning environment, professional development, and leadership (see Appendix D). Depending on which tier a district is in, EED provides the district with varying degrees of support within each domain.



SSOS Services Available to Districts by Tier

While all districts have access to the SSOS, the schools and districts designated at higher levels of accountability through more years of not making AYP, or as audit-identified "872" schools, will have targeted support or may be required to participate in comprehensive support activities.

At the Universal Access level of support, all districts and schools have access to information that supports the six domain areas. Examples of support provided at the Universal Access level are information provided through the ACC and EED websites (visit http://dev.alaskacc.org/ssos or http://www.eed.state.ak.us/), through audio or web conferences, and through regional or State conferences offered to participants from all districts. At the Targeted level of support, EED provides increased resources and support available to schools and districts identified in greater need. Examples of this support are on-site visits or workshops provided by CCs. At the Comprehensive level of support, EED provides focused support and requirements through the I-DIP for those districts and schools at the highest level of need. Examples of this support include CCs, TACs, and on-site professional development or training.

Tier I: Universal Access

- **Description:** Designed to provide **all** districts with access to information about the best practices in the six domains of effective schools (curriculum, assessment, instruction, supportive learning environment, professional development, and leadership).
- **Example:** Districts and schools meeting AYP.
- **EED Expectations:** Tier I sites use most effective practieds to improve student achievement and ask for support when they need it.
- **Support Provided by EED:** SSOS is available to help identify and leverage resources for school and district improvement. In addition, EED offers access to our website, audio and web conferences, and regional or State conferences.

Tier II: Targeted

- **Description:** Designed to provide districts and schools in **greater need** with additional assistance.
- **Example:** Districts and schools not meeting AYP, "872" schools, and most Level 4 Districts in Corrective Action.
- **EED Expectations:** Tier II schools and districts submit District Improvement Plans (DIPs), "872" schools and Title I schools at AYP Level 2 or above are required to submit School Improvement Plans (SIPs).
- **Support Provided by EED:** SSOS staff ensures that leadership teams identify the evidence of implementation as well as its impact on students. In addition to providing Tier II with a centralized pool of resources, EED offers expertise provided by Content Coaches (CCs) who work directly with teachers and administrators, in districts with limited capacity, on implementing effective instructional practices.

Tier III: Comprehensive

- **Description:** Designed to provide districts in the **highest level of need** with rigorous and explicit interventions.
- **Example:** High needs "872" schools; Level 4 Districts in Intervention.
- **EED Expectations:** Tier III schools and districts focus on key areas that will have an immediate impact on student achievement and to collaborate regularly to discuss assessment data and student work. Site leaders practice instructional leadership and implement: a core curriculum aligned to Alaska GLEs; a framework for Response to Instruction (RTI); a Curriculum Based Measure (CBM) system to monitor student growth; and to participate in a facilitated Self-Study process.
- **Support Provided by EED:** In addition to providing Tier III schools and districts with a centralized pool of resources and Content Coaches (CCs), SSOS provides on-site trainings and Technical Assistance Coaches (TACs) who work directly with school boards and district leadership teams to facilitate the Self-Study and to implement their intervention district improvement plan (I-DIP). Support teams composed of CCs and TACs visit assigned sites on a regularly scheduled basis.

Responsibilities of the Content Coaches and Technical Assistance Coaches

Content Coaches	Technical Assistance Coaches
Extend expertise in improving instructional practices at the building leadership and teacher level by: • Supporting curriculum alignment to Alaska standards • Modeling exemplary teaching • Advancing classroom implementation of DIP instructional components: content area curriculum, instruction, and assessment • Content focused staff/professional development • Support for GLE walkthroughs Content Coaches **are not** operational substitutes for school staff.	Extend expertise in improving instructional practices at the district or building leadership level by: • Advancing implementation of DIP components • Monitoring district-wide instructional practices • Briefing superintendents, district staff, the deputy commissioner with assessment data • Supporting site GLE walkthroughs • Coordinating (ead technical assistance coach) coaching team efforts assigned to district Technical Assistance Coaches **are not** operational substitutes for district staff.

Tier Identification Process

All schools and districts are in one of three tiers; the following diagram outlines the tier identification process.

School Level Desk Audit

School Level Desk Audit based on SBA Results

- Each August, EED performs a desk audit on all schools. **4 AAC 06.840 (j)(1).** The purpose of performing a desk audit is to identify "872" schools that belong in Tier II: schools that did not make AYP; and have fewer than 50% of their full-academic-year students proficient in reading, writing, or math; and have a school index point value of 85 or lower. **4 AAC 06.872.** NOTE: while some of these schools may be served as Title I schools, they're **not** required to be a Title I school to become an "872" school.

Conversation with Superintendent about "872" Schools

- In September and October EED has a conversation with superintendents about "872" schools. If superintendents have planned to do what EED would have recommended, **and** they commit to implementing these plans, EED offers them support to achieve their objectives. If it's apparent that districts could use additional support with their school improvement efforts, EED may intervene and require: weekly collaborative meetings of teaching staff to discuss individual student progress; regular use of assessements that provide feedback for adjustment of ongoing teaching and learning; and school-level instructional management that provides professional development and technical assistance to staff. **4 AAC 06.872 (c)(1)(2)(3).**

District Level Audit

District Level Desk Audit

- After a district has been designated as Level 2 or higher under 4 AAC 06.835(b), the department may conduct a desk audit or an instructional audit of the district or one or more schools within the district; these district level desk audits take place in August and September. **4 AAC 06.840 (j)(1).**

District Level Instructional Audit

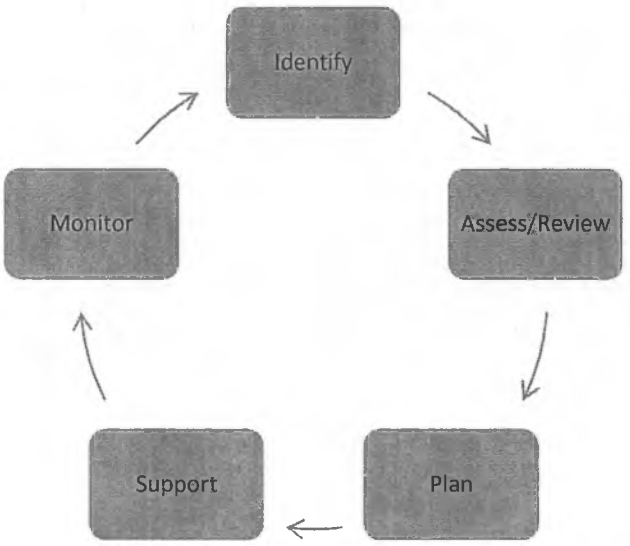
- When the prior year's Standards Based Assessment (SBA) results are released in August, EED compares the SBA results to the desk audit results to determine whether or not growth is occuring. If the comparison reveals that students are maintaining or declining in growth, EED may or may not conduct an instructional audit. In February and March EED may contract with independent consultants to perform instructional audits in identified districts. **4 AAC 06.840 (j)(2).** The team is trained in the components of the Instructional Audit Tool (see Appendix F) and they complete an on-site examination of selected schools within the district. The team gathers information about the district's curriculum, including whether the curriculum is aligned with the State's standards and grade level expectations; assessment policy and practice; instruction; supportive learning environment; professional development policy and practices; and leadership. The team examines documents, observes classroom instruction, and interviews teachers, administrators , and students. The team leader submits a Report of Findings (ROF) to the Commissioner of Education; EED reviews the ROF and shares it with the district.

Instructional Audit Findings Compared to SBA Results

- When the current year's SBA results are released in May, EED compares the SBA results to the ROF results to determine whether or not intervention is necessary. If intervention **is** necessary, districts move into Tier III status; if it **is not** necessary, districts remain in Tier II and EED works in concert with them to identify additional measures they might take to improve student achievement. For example, Title I districts in Level 4 Corrective Action are in Tier II, but if the State intervenes, they move to Tier III status.

The Cycle of Support

In an effort to support sustainable school improvement in Alaskan schools, EED's Cycle of Support is outlined below:



Identify

- Review SBA and desk audit results
- Identify Tier II and Tier III schools and districts
- Notify schools and districts of status

Assess/Review

- EED Commissioner or designee has a conversation with "872" schools to find out the components of their program to improve instruction practices, their needs, what their action plans are, and how EED can best support their efforts to implement their plans
- EED reviews I-DIPs, and Title I DIPs and SIPs
- SSOS Support Teams are assigned to Tier III schools and districts

Plan

- Lead TAC begins site visits to help modify I-DIP as needed
- Lead TAC works with district to schedule regular site visits for SSOS Support Team
- EED approves I-DIP or provides district with additional support to refine I-DIP

Support

- Direct services provided as required in I-DIP
- State-approved vendor services for academic programs provided as required by I-DIP

Monitor

- CCs report to TAC and EED on district's progress towards implementing effective classroom practices
- Lead TAC reports to district and EED on district's progress towards meeting I-DIP requirements
- EED provides district and SSOS Support Team with continual feedback on efforts to meet I-DIP objectives

*** NOTE: districts participating in Alaska STEPP will have a more unique implementation timeline and process.**

Considerations made by the SSOS

EED asks service providers to report back regularly on their districts' progress towards meeting the following targets/objectives:

1. Districts and schools will demonstrate yearly increases in student achievement in all subgroups, will show improvement in the school index score, and will exhibit gains in the growth of student achievement, with the eventual goal of two consecutive years of meeting AYP.
2. Districts and schools will provide evidence of curriculum aligned to Alaska GLEs and Content and Performance Standards, use of progress monitoring assessments and using data to make instructional decisions, use of effective instructional strategies, promotion of supportive learning environments, executing professional development based on district needs, and supporting effective instructional leadership.

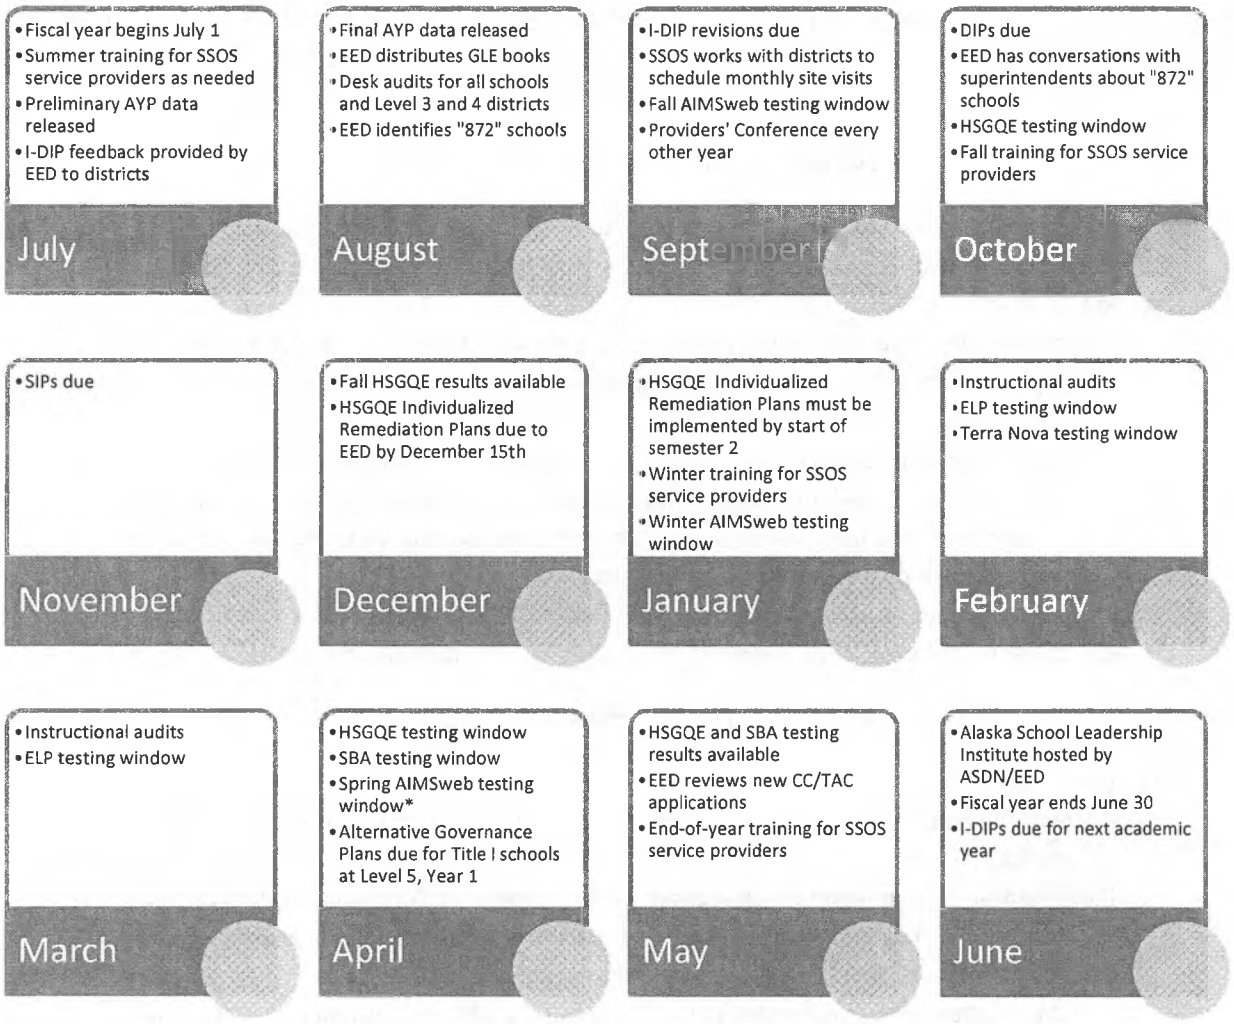
In an effort to create sustainable school improvement in Alaskan schools, service providers have considered the following concepts to help districts meet the above-stated targets/objectives:

Communication	1.	Find ways to address Federal mandates while removing burdens from the district.
	2.	Reinforce the value of the services available in order to identify and remove barriers.
	3.	Establish a single point of contact for the district and team.
	4.	Establish transparent communication between all stakeholders (District, EED, TACs, and CCs).
	5.	Promote inter-district collaboration on improvement efforts.
	6.	Emphasize results-driven consultation.
	7.	Emphasize sites' progress on I-DIP goals while celebrating growth.
	8.	Develop a time-bound framework for reassessing and reprioritizing work as needed.
Deployment	9.	Make time in the spring to map out how the stakeholders will work together throughout the year. Identify details related to dates, sites, goals/purpose for visits, types of service, and how these services are connected to the goals stated in the I-DIP/SIP.
	10.	Ensure that all parties can articulate the vision stated in the I-DIP and that the I-DIP is a continuous improvement process which is evaluated and revised, not rewritten every year.
	11.	Schedule site visits and professional development opportunities in advance.
	12.	Make informed decisions based on district needs and capacity.
	13.	Facilitate prioritization of needs within the school/district.
	14.	Provide districts with coordinated and explicit efforts versus offering "random acts of service".
Assessment	**15.**	Get the necessary AIMSweb* passwords for the appropriate staff (EED, TACs, and CCs).
	16.	Schedule AIMSweb* professional development sessions for TACs, CCs, and district personnel.
	17.	Schedule quarterly data driven debriefing sessions to examine and share performance data with EED.
		*** NOTE: or other curriculum based measurement system utilized by the district**
Leadership	18.	Reinforce school reform to improve student achievement.
	19.	Emphasize results-driven leadership and instill systems-wide change.
	20.	Reinforce the need for GLE walkthroughs and providing teachers with feedback related to their work.
	21.	Assist districts in their efforts to improve staff retention rates.
	22.	Collaborate with school boards and community members.
	23.	Plan and support the implementation of the I-DIP and other needs as defined.

It is helpful for the SSOS team when district personnel:

24. Reinforce teacher, site leader, and district buy-in for research-based best practices and implementation of programs designed to increase student achievement.
25. Establish an open communication system about the intervention plan, players, process, and progress.
26. Differentiate coaching assignments based on site needs and identifying goals to be addressed before receipt of services.
27. Identify a contact person who can provide information about local accommodations, local customs, and logistical travel information.
28. Provide all Content Coaches and Technical Assistance Coaches with access to the appropriate staff, materials, and data information management systems.
29. Ensure that services provided to the district become embedded in the district's ways of practice.

Appendix A: School Improvement Planning Calendar



*** NOTE: the Spring AIMSweb testing window provides districts with teacher-centered results; should districts choose not to conduct spring universal AIMSweb screening, they are strongly encouraged to work with EED to analyze the prior year's AIMSweb data in comparison to final SBA results.**

Appendix B: Alaska Statutes and Federal Law Related to the SSOS

AS 14.03.015. State education policy.

It is the policy of this state that the purpose of education is to help ensure that all students will succeed in their education and work, shape worthwhile and satisfying lives for themselves, exemplify the best values of society, and be effective in improving the character and quality of the world about them.

AS 14.03.123. School and district accountability.

(a) By September 1 of each year, the department shall assign a performance designation to each public school and school district and to the state public school system in accordance with (f) of this section.

(f) In the accountability system for schools and districts required by this section, the department shall
  (1) implement 20 U.S.C. 6301 – 7941 (Elementary and Secondary Education Act of 1965), as amended;
  (2) implement state criteria and priorities for accountability including the use of
    (A) measures of student performance on standards-based assessments in reading, writing, and mathematics, and including competency tests required under AS 14.03.075;
    (B) measures of student improvement; and
    (C) other measures identified that are indicators of student success and achievement; and
  (3) to the extent practicable, minimize the administrative burden on districts.

AS 14.07.020. Duties of the department.

(a) The department shall
  (1) exercise general supervision over the public schools of the state except the University of Alaska;
  (16) establish by regulation criteria, based on low student performance, under which the department may intervene in a school district to improve instructional practices, as described in AS 14.07.030 (14) or (15); the regulations must include
    (A) a notice provision that alerts the district to the deficiencies and the instructional practice changes proposed by the department;
    (B) an end date for departmental intervention, as described in AS 14.07.030(14)(A) and (B) and (15), after the district demonstrates three consecutive years of improvement consisting of not less than two percent increases in student proficiency on standards-based assessments in math, reading, and writing as provided in As 14.03.123(f)(2)(A); and
    (C) a process for districts to petition the department for continuing or discontinuing the department's intervention;
  (17) notify the legislative committees having jurisdiction over education before intervening in a school district under AS 14.07.030(14) or redirecting public school funding under AS 14.07.030(15).

(b) In implementing its duties under (a)(2) of this section, the department shall develop

(1) performance standards in reading, writing, and mathematics to be met at designated age levels by each student in public schools in the state; and
(2) a comprehensive system of student assessments, composed of multiple indicators of proficiency in reading, writing, and mathematics...

AS 14.07.060. Regulations.

The board shall adopt regulations that are necessary to carry out the provisions of this title. All regulations shall be adopted under AS 44.62 (Administrative Procedure Act).

AS 14.50.080. Consent to reasonable conditions.

The governor or the board as the federal law may require may accept all reasonable conditions which may be required by the federal government as a condition to receiving federal money for education purposes.

NCLB. Section 1116. Academic assessment and local educational agency and school improvement.

NCLB. Section 1117. School support and recognition.

Appendix C: Alaska Administrative Codes Related to the SSOS

4 AAC 06.800-899. School and district accountability.

4 AAC 06.759. High school graduation qualifying examination: remediation.

(a) A district shall provide remediation to a student who has not passed one or more subtests of the state high school graduation qualifying examination (HSGQE) after the fall administration of the HSGQE in the student's 11th grade year. Remediation must begin no later than the start of the student's 11th grade year and continue as necessary for the student to pass all subtests of the HSGQE. Nothing in this subsection prevents a district from offering remediation at an earlier time.

4 AAC 06.800. Purpose.

The purpose of the school and district accountability system is to ensure that by school year 2013-14, all students will reach proficiency or better in language arts and mathematics.

4 AAC 06.840. Consequences of not demonstrating adequate yearly progress.

(j) At any time after a district has been designated as Level 2 or higher under 4 AAC 06.835(b), the department may conduct a desk audit or an instructional audit of the district or one or more schools within the district. The department may require a district to provide information, including a self-assessment, as part of either audit process. To the extent permitted under federal law, the department will use federal programmatic funds allocated to the district to pay the cost of an instructional audit.

(1) "desk audit" means a review of data to determine the reasons a district has not demonstrated adequate yearly progress;

(2) "instructional audit" means an on-site review of the instructional policies, practices, and methodologies of the district or one or more schools within the district; an instructional audit may include a review of the district's or school's

(A) curriculum, including whether the curriculum is aligned with the state's standards and grade level expectations adopted in 4 AAC 01.140 and 4 AAC 04.150;

(B) assessment policy and practice;

(C) instruction;

(D) school learning environment;

(E) professional development policy and practices; and

(F) leadership.

(k) If a district is designated under 4 AAC 06.835(b) as Level 3, the department will prepare to take corrective action in the district consistent with this subsection. If the district is designated as Level 4, by the end of the school year in which the district receives the designation, the department will implement one or more of the following corrective actions in the district:

(3) defer programmatic funds or reduce administrative money provided to the district from federal sources;

(4) institute and implement a new curriculum based on state content standards adopted in 4 AAC 04.140 and performance standards adopted in 4 AAC 04.150, including the provision, for all relevant staff, of appropriate professional development that
   (A) is grounded in scientifically-based research; and
   (B) offers substantial promise of improving educational achievement for low-achieving students;
(5) replace the district personnel who are relevant to the district's receipt of the designation;
(6) remove schools from the jurisdiction of the district and provide alternative arrangements for public governance and supervision of these schools;
(7) in conjunction with at least one other action in this subsection
   (A) authorize students to transfer from a school operated by the district to a higher-performing public school operated by another district; and
   (B) provide to these students transportation, or the costs of transportation, to the other school;
(8) appoint a receiver or a trustee to administer the affairs of the district in place of the chief school administrator, and school board.

(l) Following the audit process described in (j) of this section, or, if no audit has been conducted, before implementing corrective action in a district under (k) of this section, the department will give notice to the district regarding the possible corrective actions, if any, under consideration for the district. A district has 15 days after receipt of notice to submit comments and evidence to the department before corrective action is implemented. When determining the appropriate corrective action under (k) of this section, the department will consider
   (1) the results of any audit conducted under (j) of this section;
   (2) the actions taken by the district to address the district's failure to demonstrate adequate yearly progress;
   (3) the growth that the district has shown in the proficiency level of its students;
   (4) the public interest; and
   (5) comments and evidence submitted by the district.

4 AAC 06.845. School improvement plan

(a) A school required to submit a school improvement plan under 4 AAC 06.840(c) shall submit the plan to its district for approval not later than 90 days after designation under 4 AAC 06.835(a).

(b) After receiving a plan from a school under (a) of this section, a district shall
   (1) establish a peer review process to assist with a prompt review of the plan;
   (2) work with the school as necessary to modify the plan; and
   (3) no later than 45 days after receiving a plan from a school, approve the plan for submission to the department if the plan meets the requirements of this section.

(c) In developing a school improvement plan, a school must
   (1) consult with parents, school staff, and other interested persons;

(2) cover a two-year period;
(3) incorporate strategies based on scientifically based research that will strengthen the core academic subjects in the school and address the specific academic issues that caused the designation;
(4) adopt policies and practices concerning the school's core academic subjects that have the greatest likelihood of ensuring that all students will meet a proficiency level of proficient or advanced on the state assessments by school year 2013-14;
(5) provide assurance that the school will allocate and spend at least 10 percent of the funding allocated to the school under 20 U.S.C. 6301 - 6339 (Part A of Title I of the Elementary and Secondary Education Act) to provide the school's teachers and principal with high-quality professional development that directly addresses the academic performance problem that caused the designation;
(6) explain how the high-quality professional development will directly address the academic performance problem that caused the designation;
(7) establish specific annual, measurable objectives for continuous and substantial progress by all students collectively and each subgroup of students enrolled in the school that will ensure that all students will meet a proficiency level of proficient or advanced on the state assessments by school year 2013-14;
(8) describe how the school will provide written notice about the designation of the school to parents of each student enrolled in the school, in a format and, to the extent practicable, in a language that the parents can understand;
(9) specify the responsibilities of the school and district, and the responsibilities agreed to by the department, in implementing the improvement plan;
(10) include strategies to promote effective parental involvement in the school;
(11) incorporate, as appropriate, activities for students before school, after school, during the summer, and during any extension of the school year; and
(12) incorporate a teacher mentoring program.

(d) A school shall implement its plan immediately after receiving approval from the district. If the department determines that changes in the plan will improve the performance and progress of students at the school, the department will require changes to the plan at any time, including after implementation.

4 AAC 06.850. District improvement plan.

(a) A district required to submit a district improvement plan under 4 AAC 06.840(h) shall submit the plan to the department for approval not later than 90 days after designation under 4 AAC 06.835(b).

(b) In developing a district improvement plan, a district shall
(1) cover a two-year period;
(2) consult with parents, school staff, and other interested persons;

(3) incorporate scientifically based research strategies that strengthen the core academic program in the schools served by the district;
(4) identify actions that have the greatest likelihood of improving the achievement of students in meeting the academic performance requirements in 4 AAC 06.810;
(5) address professional development needs of the instructional staff;
(6) include specific measurable achievement goals and targets for all students collectively and each subgroup of students;
(7) address the fundamental teaching and learning needs in the schools of the district, and the specific academic problems of low-achieving students, including a determination of why any of the district's prior plans failed to bring about increased student academic performance;
(8) incorporate, as appropriate, activities before school, after school, during the summer, and during an extension of the school year;
(9) specify the responsibilities of the department under the plan, including specifying the technical assistance to be provided by the department; and
(10) include strategies to promote effective parental involvement in the school.

(c) For each district for which the department has conducted an instructional audit under 4 AAC 06.840(j), the department will, after consultation with the district, draft a district improvement plan unless the department finds that the district has adequate instructional policies, practices, and methodologies. The district improvement plan may include
(1) adoption of the program described in 4 AAC 06.872(c);
(2) technical assistance to the district regarding the implementation of a program for improvement under the improvement plan; or
(3) one or more corrective actions described in 4 AAC 06.840, 4 AAC 06.865, or 4 AAC 06.870 for the district as a whole or at a school in the district.

(d) The technical assistance required under (c)(2) of this section may be provided by department personnel or by a contractor, and may include a site visit. The department may redirect the district's funding under AS 14.17 to provide money to pay for services by a contractor that the commissioner determines are necessary under this section. If a district fails to take an action required under the district improvement plan, the commissioner may, after notice to the district and an opportunity for the district to respond, cause the district's funding under AS 14.17 to be redirected to pay for the action or to a holding account for the district until the action is completed. The department will not redirect a district's funding under this subsection, and will not impose corrective action that involves personnel under (c)(3) of this section, if in each of the three previous years the district demonstrated increases of at least two percentage points in the standards-based assessment in mathematics, reading, and writing under 4 AAC 06.737.

(e) A district may petition the department at any time to cease or continue an intervention taken by the department under this section. In considering whether to grant a petition under this subsection, the department will consider the
(1) factors described in 4 AAC 06.840(j)(2); and

(2) public interest.

(f) The department will not take action under (c) - (d) of this section unless it has reached a conclusion, after consideration of the evidence, that its action will likely improve student achievement.

(g) Compliance with (c) - (f) of this section does not necessarily constitute compliance with a district's other responsibilities for school or district improvement under 4 AAC 06.800 - 4 AAC 06.899.

4 AAC 06.852. Technical assistance.

(a) If a school is designated as Level 2 or higher under 4 AAC 06.835(a), the district within which the school is located shall ensure that the school receives appropriate technical assistance as the school develops and implements its improvement plan under 4 AAC 06.845 and throughout the plan's duration.

(b) A district may arrange for the technical assistance to be provided by one or more of the following:
- (1) the district;
- (2) the department;
- (3) an institution of higher education;
- (4) a private or not-for-profit organization, a private for-profit organization, an educational service agency, or another entity with experience in helping schools improve academic achievement.

(c) Technical assistance must be based on scientifically based research and include assistance in
- (1) analyzing data from the state assessments, and other examples of student work, to identify and develop solutions to problems in
  - (A) instruction;
  - (B) implementing the requirements for parental involvement and professional development; and
  - (C) implementing the school improvement plan, including district-level and school-level responsibilities under the plan.
- (2) identifying and implementing professional development and instructional strategies and methods that have proved effective, through scientifically based research, in addressing the specific instructional issues that caused the district to designate the school; and
- (3) analyzing and revising the school's budget so that the school allocates its resources more effectively to the activities most likely to
  - (A) increase student academic achievement; and
  - (B) remove the school from its designation.

4 AAC 06.872. School-level desk audits.

(a) Each year, at the same time the department is conducting district desk audits under 4 AAC 06.840(j), the department will conduct a school-level desk audit of all schools in the state. The department will identify a school as needing additional analysis if the school
- (1) did not make adequate yearly progress under 4 AAC 06.805;

(2) has fewer than 50 percent of its full-academic-year students score proficient or higher on the mathematics, reading, or writing standards-based assessment under 4 AAC 06.737; and

(3) has a school index point value under 4 AAC 33.540 of 85 or lower.

(b) The department will determine whether the schools identified in (a) of this section would benefit from being placed on a program for improvement of instructional practices as described in (c) of this section. In making this determination, the department will consult with the superintendent of the district in which the school is located and will consider

(1) the reasons the school has been identified, including whether the school serves a special population;

(2) whether the state has imposed a district improvement plan under 4 AAC 06.850(c) as a result of an instructional audit under 4 AAC 06.840(j);

(3) whether the district has implemented a comparable program in the school;

(4) whether the school has shown substantial growth in student achievement; and

(5) for a school with fewer than 20 tested students, multiple years of data.

(c) After the department has determined under (b) of this section that a school would benefit from a program for improvement of instructional practices, the department will send notice of this determination to the district in which the school is located. In the notice, the department will inform the district of the deficiencies that need to be remedied and a timetable for implementation of the program and for amendment of the school improvement plan developed under 4 AAC 06.845 for the school. Within 30 days after receiving the notice, the district shall take action under the timetable as required by the department, and shall verify in writing to the department that it has taken that action. A program for improvement of instructional practices must include

(1) weekly collaborative meetings of teaching staff to discuss individual student progress; logs of the meeting shall be recorded and sent to the superintendent;

(2) regular use of assessments that provide feedback for adjustment of ongoing teaching and learning in order to improve achievement of intended instructional outcomes; and

(3) school-level instructional management that provides professional development and technical assistance to staff and addresses grade-level expectations in the instruction.

(d) The department will provide technical assistance to the district regarding the implementation of the program in (c) of this section, unless the commissioner determines that technical assistance is not required. Technical assistance may be provided by department personnel or by a contractor, and may include a site visit. The department may redirect money from the district's funding under AS 14.17 to pay for services by a contractor that the commissioner determines are necessary under this section.

(e) The commissioner may require the district to implement or amend at a school under a program for improvement of instructional practices

(1) corrective action described in 4 AAC 06.840 or 4 AAC 06.865; or

(2) a remediation plan under 4 AAC 06.759 for students at the school who have not passed the state high school graduation qualifying examination (HSGQE).

(f) If a district fails to take the action required under this section, the commissioner may, after notice to the district and an opportunity for the district to respond, cause the district's funding under AS 14.17 to be redirected to pay for the action or to a holding account for the district until the action is completed. Before requiring action under this subsection, the commissioner will consider the

(1) comments from the superintendent of the district;

(2) action taken by the district to improve the school;

(3) number of years the school has been identified under this section; and

(4) factors listed in (b) of this section.

(g) The department will not redirect a district's funding under (d) or (f) of this section, and will not impose corrective action that involves personnel under (e) of this section, if in each of the three previous years the district demonstrated increases of at least two percentage points in the standards-based assessment in mathematics, reading, and writing under 4 AAC 06.737.

(h) A district may petition the department at any time to cease or continue an intervention taken by the department under this section. In considering whether to grant a petition under this subsection, the department will consider the
    (1) factors described in (b) and (f) of this section; and
    (2) public interest.

(i) Notwithstanding any other provision of this section, the department will not take action under this section unless it has reached a conclusion, after consideration of the evidence, that its action will likely improve student achievement.

(j) Compliance with this section does not necessarily constitute compliance with a district's other responsibilities for school or district improvement under 4 AAC 06.800 - 4 AAC 06.899.

Appendix D: Six Domains of Effective Schools & Districts

Curriculum

A school or district curriculum is an educational plan that defines the content to be taught, the resources and instructional methods to be used, and the assessment processes to be employed to document student progress and achievement. It is aligned with Alaska Performance Standards and GLEs and allows for the collection of data to inform instruction. Ideally, the curriculum (a) coheres across grade levels so that the goals and objectives can be met, and (b) attends to the Cultural Standards for Alaska Students (Appendix N).

Assessment

Assessment is the process of collecting, recording, scoring, monitoring, and interpreting information about a student's progress, a teacher's instruction, and a school's overall effectiveness. Some assessments are used for a record of accountability, but a primary purpose of assessment at the classroom level is to inform instructional decisions and ultimately to improve student achievement. In addition to summative data collected through State assessments, each school must be engaged in formative assessments and assessments to monitor progress that provide ongoing information to teachers. Formative measures provide the basis for decisions about what each student is learning. Teachers must be supported in their efforts to collect progress monitoring data for students at regular increments throughout the school year.

Instruction

Instruction concerns the methods that are used to teach curriculum and to help students achieve performance targets. Effective instruction recognizes that every student has individual needs, interests, and learning styles. Therefore, it incorporates a variety of instructional strategies and progress monitoring techniques to further learning for all students, as well as targeted remediation for some students in areas of need as determined by data from progress monitoring and formative assessments.

Supportive Learning Environment

Factors that contribute to creating a supportive learning environment include safety and order, an emphasis on academic achievement, parent/community involvement strategies, attention to local culture, and attention to assessment and monitoring. Schools that foster a positive school climate create a culture of cohesiveness and a high level of morale among students as well as staff.

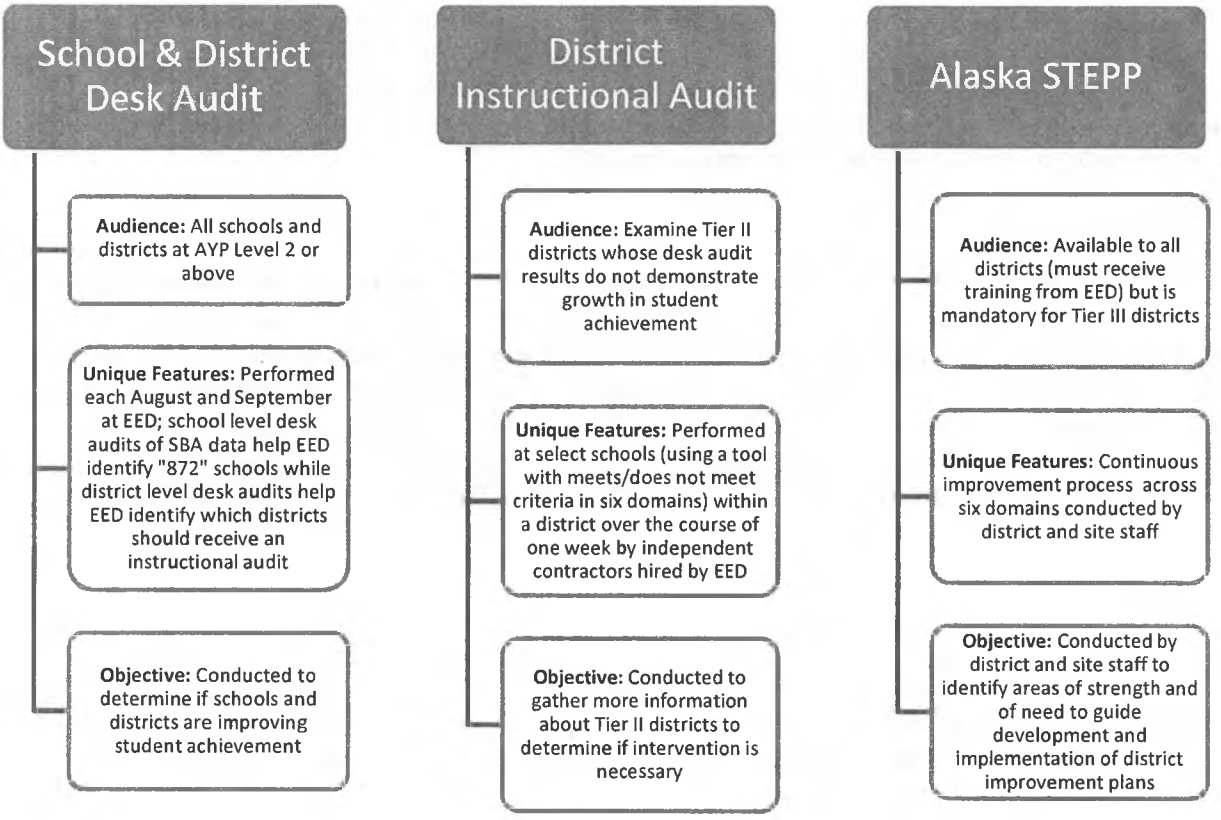
Professional Development

Well-planned, ongoing professional development involves school personnel in their own learning and ultimately leads to improved student achievement. It is practical, job-embedded, and results-oriented. Professional learning communities support effective staff development and allow for coaching, mentoring, collaborating, and a collective responsibility for student learning.

Leadership

School leadership is a process of influence leading to effective teaching and learning. Successful leaders develop a vision for their schools based on their personal and professional values. They choose to articulate this vision at every opportunity and they encourage their staff and community to share that vision. Management of the school's structures and activities is focused toward the achievement of this shared vision.

Appendix E: Desk Audit vs. Instructional Audit vs. Alaska STEPP



Appendix F: Elements of the Instructional Audit Tool

1.0 Curriculum.

1.1 Alaska state standards and GLEs are aligned with school/district curriculum.
1.2 A system is used regularly to measure implementation of Alaska state standards and GLEs.
1.3 There is a schedule for the review and/or development of the curriculum based on the Alaska content standards for each curriculum area and the schedule is consistently followed.
1.4 Statewide assessment data are used each year to identify gaps/areas of curriculum that are not being taught.
1.5 A review process is used to make the curriculum more responsive to the needs of the school's student population.

2.0 Assessment.

2.1 Assessments are aligned with Alaska's Performance Standards, GLEs, and district curriculum.
2.2 The school uses established systems for collecting, managing, analyzing, and reporting data.
2.3 Data from classroom assessments are used by school staff members as a source of information about student learning and to guide instructional decisions.
2.4 Assessments are administered in an ongoing fashion, multiple times a year, in order to determine student progress.
2.5 Formative assessments are used on a regular basis to inform instruction and to address the instructional needs of students.
2.6 School administrative leaders and instructional staff members review SBA data to evaluate school programs and student performance.

3.0 Instruction.

3.1 There is a system in place to ensure that classroom instructional activities are aligned to Alaska's content and performance standards and GLEs.
3.2 There are coordinated, school wide efforts to help low-performing students become proficient.
3.3 There is a system in place to provide timely/early instructional intervention to help low-performing students.
3.4 The use of research-based instructional practices dominates instructional planning and teaching.
3.5 Classroom instruction addresses diverse student learning needs.
3.6 High academic expectations for student learning are routinely conveyed to students so that they know what is needed for them to achieve at proficient levels.
3.7 Teachers use formative assessments to measure the effectiveness of instruction and to monitor student progress.
3.8 Teacher daily lesson plans demonstrate an alignment of instruction with Alaska content standards and GLEs.

4.0 Supportive Learning Environment.

4.1 Effective classroom management strategies that maximize instructional time are evident throughout the school.
4.2 School wide operational procedures are in place to minimize disruptions to instructional time.
4.3 School wide behavior standards are consistently communicated by staff and understood by the students.
4.4 The school has an established attendance policy that is used consistently.
4.5 Extended learning opportunities are made available and are utilized by students in need of additional support.
4.6 School and classroom environment reflects awareness and an understanding of local cultural values.

4.7 School staff communicates with parents about learning expectations, and ways to reinforce learning at home.
4.8 School staff members communicate with parents and community members to inform them about school priorities and to engage their support.
4.9 Physical facilities are safe and orderly.

5.0 Professional Development.

5.1 Student achievement data are a primary factor in determining professional development opportunities.
5.2 Written policies and procedures are consistently used in the evaluation of all personnel.
5.3 The teacher evaluation process is aligned to the Alaska Professional Teaching Standards.
5.4 Professional development is embedded into the daily routines and practices of school staff.
5.5 All teachers receive ongoing and systematic feedback and support for instructional improvement.
5.6 There is a mentoring program in place that supports new teachers in the development of instructional and classroom management skills.
5.7 Sufficient time and resources are allocated to support professional development and growth geared toward the goals outlined in the school improvement plan.

6.0 Leadership.

6.1 School administrative leaders facilitate the development and implementation of the school's goals.
6.2 School administrative leadership regularly analyzes assessment and other data, and uses the results in planning for improved achievement for all students.
6.3 School administrative leadership actively assists staff members in understanding formative and summative student achievement data and in how to use these data to make changes in instruction.
6.4 School improvement goals are Specific, Measureable, Attainable, Realistic, and Time-bound (SMART) and are based on student achievement data.
6.5 School administrative leaders systematically monitor the implementation of the school improvement plan.
6.6 School administrative leaders ensures that staff members, including new staff members, have access to and are trained to implement Alaska Content and Performance Standards and GLEs.
6.7 School administrative leaders conduct formal and informal observations and provide timely feedback to staff members on their instructional practices.
6.8 School administrative leaders build a positive relationship with parents and community members regarding school improvement efforts.
6.9 There is a process for the principal to receive support and guidance as part of the administrator evaluation procedures.
6.10 School administrative leaders oversee the progress of students who do not meet adequate yearly progress.

Appendix G: Overview of the Self-Study Tool

The Self-Study Tool (SST) was developed to help schools conduct an internal review as part of their school improvement effort. The SST materials are based on the Instructional Audit Tool that has been used throughout Alaska to conduct on-site school audits by external teams of educators. The SST process provides teams from a school community an opportunity to engage in discussion and evidence-based inquiry. It is not intended to be the basis for evaluation or for making comparisons across schools. The end product is not a score, but the identification of current strengths and limitations, which can assist school staff members in their school improvement efforts.

The tool is organized around six domains that represent important areas of successful school functioning: curriculum, assessment, instruction, supportive learning environment, professional development, and leadership.

Each domain consists of a series of key elements that are grounded in school improvement literature. It is not necessary for a school team to conduct the self-study across all six domains at once. For instance, a team might choose to begin by examining only one or two domains, such as instruction and/or supportive learning environment.

To complete this self-study, the entire school faculty, or a smaller leadership team, works in small groups to locate evidence, make ratings, and summarize findings. Parents, community members, and students may also be involved. When a team engages in the self-study process, it is important for each team member to begin with an open mind, setting aside assumptions and relying on evidence to make ratings on each of the elements. Some of the options for use of the SST include:

- Teams may start by examining a single domain area, using the initial discussion questions and then dividing up the elements they wish to tackle. In a subsequent meeting they can share their evidence, and then the whole group can come to a consensus on the rating of each element. Ultimately, the entire group needs to agree.
- Teams may focus on one or more, but not all, domains. Different teams might each work on the same domain and then compare their ratings, or the teams might "jigsaw" the effort so that each group looks at a different domain.
- Larger school districts with the capacity to do so, may wish to employ one team or several smaller teams in the use of the SST to review their status in all domains. Because this option requires collecting evidence to make ratings, it is the most thorough, yet time consuming of all the options.

The findings from any of these options can be useful for determining school direction and goal setting for school improvement planning. The three essential aspects of the process, which should remain consistent, are that 1) all ratings are based on evidence; 2) teams reach a consensus on the ratings; and 3) the process is transparent- findings are presented back to the entire school faculty and to the school community.

For complete details, please see the instructions in the Self-Study Tool booklet.

Appendix H: Outline of Alaska STEPP

Alaska STEPP is an online tool for school and district improvement planning. Implemented statewide in stages over three years, Alaska STEPP will be used by all districts and schools for improvement planning.

Alaska STEPP substitutes for the paper-based:

- District Improvement Plans (DIP)
- School Improvement Plans (SIP)
- Self Study Tool (SST)
- Title 1 Comprehensive Schoolwide Plan
- District and School Accreditation processes

Planning for improvement leads districts and sites to assess respective strengths and challenges, to celebrate strengths and to address needs effectively. Improvement plans have required elements in order to be in compliance with state and federal law. Alaska STEPP includes all state and federal requirements in the form of SMART indicators and of supplemental forms.

Alaska STEPP uses the research based indicators of the Instructional Audit Tool as its foundation. It then guides districts and schools into plan implementation to affect student learning in a positive manner.

This tool changes improvement planning in the following ways:

- Completed online in web-based environment instead of on paper
- Links self assessment and planning
- Provides research based ideas in areas of need
- Encourages constant and consistent use as a continuous improvement model
- Leads users through assessment, goal setting and task writing to break down big ideas into concrete tasks assigned to specific people with due dates
- Provides a longitudinal set of information that shows progress toward goals
- Links several programs and/or requirements of the state and federal programs so that schools/districts have less overall "paperwork" to complete

The Process of Alaska STEPP

Alaska STEPP includes 6 steps.

1. **Register a district or school** (done once).

2. **Enter District/School Information**. This information includes contact and demographic data (done yearly).

3. **Form a Team**. Each site forms a team made up of a cross-section of people. At a school this team should include the principal, a mix of staff, and parents of students. The optimal size for a team is 5-10. At the district level the team should include district administrators, parents, community members, site staff. The team may change from year to year, as needed. However, all the information about who was responsible for tasks will remain in STEPP for a record that can be referenced as needed.

4. **Assess Indicators**. There are 42 research based indicators to identify specific attributes, actions, and processes that lead to improvement in student achievement. Alaska STEPP uses a rubric or scoring guide

format in which schools/districts assess themselves on a four point scale. The process includes discussion of possible evidence that may lead the team to choose one rating over another.

The indicators are grouped into 6 domains: curriculum (what we teach), assessment (how we know how students know the material), instruction (how we teach), supportive learning environment (how we set up a school to optimize learning), professional development (how we support teachers to do their best work), leadership (how we organize, support, and lead school communities towards great student achievement).

The indicators are further grouped into two categories that specifically link to their use in STEPP. These are labeled Key and SMART.

- Key indicator: first step of a process and/or a high leverage activity.
- SMART indicator: state and federal school improvement requirements.

All participating schools and districts are required to complete the Key and SMART indicators in Alaska STEPP.

5. **Create School Plan**. Once an indicator is assessed the team creates a plan to improve or sustain efforts in that area. Alaska STEPP has a step-by-step process for creating tasks that include due dates, time frames, persons responsible, time frames, and notes.

   A powerful element of Alaska STEPP is the built-in resource called "WiseWays." These are research based, practical strategies linked to each indicator. They are accessed by clicking on the WiseWays button on the planning page.

6. **Monitor School Plan.** Alaska STEPP is a continuous improvement model. It calls for district or school self-monitoring of progress toward task completion by active review of data changes in data. The self-monitoring provides the essential action for continuous or ongoing improvement of a school/district.

EED Support For The Process

EED supports districts in this improvement planning model by offering onsite training for principals and other leaders in improvement planning and the use of the tool. Participating districts also will take part in monthly webinars that review technical aspects of the tool, present further information on school improvement, and encourage collegial support and problem solving across the district to work towards common goals.

Role of Technical Assistance Coaches and Content Coaches

In intervention districts the coaches will support implementation in several ways.

- Attend district trainings and supporting staff learn new process
- Attend/facilitate PLC meetings for which indicators are being assessed or planned,
- Read and reference site plans to support their advance
- Provide coaching comments on site plans as appropriate
- Provide feedback to EED to support these sites/districts more effectively

Appendix I: Elements of the Alaska Peer Review Guidance Document

Introduction

An Alaska school or district curriculum is an educational plan that defines the content to be taught, the resources (e.g., textbooks, kits, atlases, resource guides, etc) and instructional methods to be used, and the assessment processes to be employed for documenting student progress and achievement. Further, a district curriculum must include a plan for staff development. Overall, the curriculum is expected to be aligned with Alaska Performance Standards and Grade Level Expectations (GLEs) and allow for the collection and use of data to inform instruction. The Department of Education & Early Development also supports the inclusion of Alaska Cultural Content Standards adopted by the Alaska State Board of Education in school and district curricula.

Alignment of curriculum, instruction, and assessment with the Alaska GLEs is an essential element of focus for districts. Ideally, curricula are vertically aligned across grade levels and content areas. If standards-aligned curriculum is implemented with fidelity in each classroom, student achievement is fostered and instructional goals and objectives are met.

Purpose of Guidance

The Department of Education & Early Development (EED) issues this Guidance to provide districts with information to prepare for the department's peer review, as designated by state regulation 4 AAC 05.080 and enforced through regulation 4 AAC 06.840.

This Guidance represents the department's current thinking on this topic. Based on feedback from Alaska Peer Reviewers or other invited experts, new critical elements or important sources of evidence may be added to the Guidance. It does not create or confer any rights for or on any person. This Guidance does not impose any requirements beyond those required under applicable law and regulations. This document is intended to guide districts through a peer review process focused on examining evidence about curriculum-to-standards alignment but not to teach or instruct districts about the methods for performing curriculum-to-standards or curriculum-to-assessment alignment studies.

District Curricular System

A district may include in its curricular system multiple approaches to its design.

- A district's curricular system may employ either a uniform set of materials district-wide or a combination across schools. Districts using a combination of materials and resources must address issues of comparability and equivalency. For example, a student attending one elementary school must be able to continue to progress toward proficiency in the standards even if moved into another elementary school within the district that uses different materials.
- A district's curricular system may be supplemented through the use of correspondence course materials. These correspondence materials are approved by the Commissioner when evidence of alignment to standards and comparability and equivalency to other district course materials has been collected.
- A district's curricular system may include local standards which incorporate the local culture.

A district may support curriculum-to-standards alignment and fidelity of implementation of standards-based instruction by

- Identifying key resources and materials to be used for each grade and content area and verifying their alignment to state standards;
- Identifying or developing appropriate measures for gauging student progress toward achievement targets for each grade and content area and verifying their alignment to state standards;
- Indicating the processes for ensuring alignment to the state's academic content standards in each content area and grade and the timeframe for review;
- Providing information regarding the progress of teachers relative to staff development goals for effective curriculum implementation ;
- Establishing criteria to ensure that curricular materials, resources, and assessments are coherent, comprehensive, and synchronized with the levels of cognitive complexity (depth) and content breadth embodied by the state's academic standards;
- Demonstrating that all materials can be sufficiently differentiated to address the instructional needs of all students, including those who are currently performing at far below proficient, below proficient, proficient, and advanced levels;
- Receiving school board approval per regulation 4 AAC 05.080; and
- Receiving the department's final approval per state regulation 4 AAC 06.840.

The Peer Review Process

To determine whether districts have met curriculum-to-standards alignment requirements, EED will be using the Alaska Peer Review process. This process relies on involvement of local, state, and national experts and colleagues in the fields of standards and curriculum. The Alaska Peer Reviewers will evaluate districts' curricular systems only against state regulations and requirements. In other words, peer reviewers examine characteristics of a district's curricular system that will be used to hold the district accountable under regulation 4 AAC 06.840 *Consequences of not demonstrating adequate yearly progress.*

The Alaska Peer Review process does not directly examine a district's local standards or formative assessment instruments. Rather, it examines *evidence* compiled and submitted by each district that is intended to show that all facets of its curricular system (resources, materials, instruction, and assessment) meet state requirements. Such evidence may include, but is not limited to, final aligned curriculum documents, results from alignment studies, adopted policies, and curriculum committee meeting minutes. Peer reviewers will advise the department on whether a district's curricular system meets a particular level of sufficiency based on the totality of evidence submitted. Peer reviewers also provide constructive feedback to help districts strengthen their systems.

Role of Peer Reviewers

With this Guidance document as a framework, peer reviewers will use expert professional judgment to evaluate the evidence supplied by the district and determine the degree to which the district's final curricular system complies with the state requirements. Their evaluation of the final curricular system serves two purposes. First, the peer reviewers' comments are sent to the district as a technical assistance tool to support improvements in the system. Second, the peer reviewers' comments are used to inform the EED during final decision-making about each district's compliance status.

Review Process

- The Alaska Peer Review teams are trained in advance of the review process. They are facilitated through a mock review process by curriculum and instruction specialists and calibrated to ensure common understanding and interpretation of each critical element in the Guidance prior to reviewing any district's evidence.
- Districts will submit evidence of compliance consistent with the peer review schedule announced by the department. The evidence is then distributed by the department to each member of the Peer Review team in advance of a review meeting to allow for a thorough independent review based on the Guidance. At the review meeting, a team of at least three peer reviewers discusses the evidence provided by the district and records their opinions. Sufficient evidence must be provided to convince these experienced professionals that the curricular system is being implemented in a manner that meets state requirements.
- During this process, this Guidance is used as a framework to support a series of analytic judgments by peer reviewers. The review team addresses each of the critical elements in the Guidance document, evaluating the status of each component of the district's curriculum based on the evidence provided.
- To ensure common understanding of the value or usefulness of different pieces of evidence, decision rules will be recorded by peer reviewers. Decision rules are guidelines related to the application of Guidance criteria that explain how or why reviewers assigned a particular rating or reached a particular decision about a piece or type of evidence. That same rationale then is applied in all situations in which that type of evidence is presented, thereby promoting consistency in decisions over time and across reviewers.
- For each district evaluated, the peer reviewer team will provide a brief statement of the degree to which the curricular system meets state requirements and a summary of the changes needed, if any, to meet those requirements. The peer reviewers are responsible for providing feedback to each district that is informative and is consistent with professional standards and best practice. Generally, if changes in a district's curricular system are required in order to meet state requirements, peer reviewers present options rather than prescriptive instructions.
- The Alaska Peer Review team then prepares a report based on its examination of the evidence for all districts in that round of review.
- To ensure reliability of decisions over time (i.e., across rounds of review) and across peer reviewers, decisions will be monitored by the department. Peer reviewers also will be monitored to ensure ongoing calibration.

Review Teams

On each team, one person is designated team leader; this person is responsible for seeing that peer notes are clear, complete, and delivered to EED staff at the end of the review meeting. An EED staff person, assigned as a resource to each Peer Review Team, is responsible for (1) assisting the review team in obtaining adequate and appropriate information from the district prior to the review meeting; (2) contacting the district during the review meeting to obtain clarification or additional information needed by the reviewers; (3) securing resources needed to support the team during the meeting; and (4) accurately reporting the review team's deliberations as EED determines the district's compliance status. Department staff may question or even challenge the peer reviewers in order to promote clarity and consistency with the Guidance; they will not, however, impose their views or require substantive changes to the peer reviewers' judgments.

Role of the School District

Districts should familiarize themselves with instructions for completing the review document. To facilitate the peer review process, a district should organize its evidence with a brief narrative response to each of the critical elements in the Guidance (e.g., 1.1, 1.2, etc.). In the Guidance, the department has provided a suggested submission model to help districts develop their narratives and identify documents that constitute appropriate evidence of meeting the requirements for each critical element.

Districts are urged when possible to provide all acceptable evidence listed in the Guidance. In some occurrences the same evidence may be referenced in multiple sections. Further, districts can submit evidence that is not listed in the Guidance. Some sections identify specific evidence the department is requiring with the submission. These are marked with an asterisk.

Districts then submit final review documents and all evidence to the department in electronic and hard copy (one) formats.

Each district will be asked to designate a representative who can be contacted by telephone during the review process to provide clarification or additional information, if requested.

Once peer reviewers complete their review, feedback will be forwarded to the department and then to districts. If any critical elements are missing information that could not be secured through a telephone conversation with the designated representative, districts will be given a timeline for resubmitting evidence to meet the peer review requirements.

Section 1.0 School/district curriculum are aligned with Alaska Standards and Grade Level Expectations (GLEs).

Overview and Definitions

To establish common expectations for the academic achievement of all students, the State expects all public school districts to adhere to a set of challenging academic content standards and grade level expectations. These standards should guide the selection of appropriate district resources and materials for classroom instruction. Those materials and resources selected for use must be aligned to state standards and adaptable to allow for differentiated instruction and ensure inclusion of those students with disabilities and students who are not yet proficient in English.

Standards

Content standards are the overarching goals that describe, in the broadest terms, what all students in Alaska should know and be able to do. Performance standards state what students should know and be able to do at grades 5-7, 8-10, 11-14, and 15-18. Grade-level expectations are specific statements of the knowledge and/or skills that students are expected to demonstrate at each grade level. They serve as checkpoints that monitor progress toward the performance standards and ultimately the content standards. The grade-level expectations do not replace the performance standards; rather, they serve to explicate and clarify the standards. They also serve to define and communicate eligible content, or the range of knowledge and skills from which priorities for instruction and state assessment are drawn.

Stakeholders

Participants in the alignment process should be drawn from district personnel. These staff should be using the curriculum and know the GLEs and the content addressed. They may be experienced teachers, administrators, and other specialists working directly with students. In some cases, they may be drawn from a broader group of community stakeholders. Districts should consider cultural diversity and other demographic considerations when identifying alignment participants.

Proficiency Descriptors

Proficiency level descriptors are statements that describe the knowledge and skills expected at different proficiency levels with respect to the content standards, performance standards, and grade-level expectations. Alaska has four

proficiency levels: far below proficient, below proficient, proficient, and advanced. The proficiency level descriptors describe the expected level of performance at each of these four levels.

Evidence-Based Research

All materials/resources require a decision making process supported by the appropriate balance of sound theory and relevant empirical evidence. Most publications reference evidence of research. Overall, a district's decision needs to be thoughtful showing evidence of diligence in selecting materials.

Cognitive Complexity/Depth of Knowledge/Level of Rigor

Cognitive complexity, also known as depth of knowledge, refers to the level of rigor or cognitive demand required for a student to demonstrate mastery of a particular standard or GLE. Typically, standards for any grade or content area will include a range of levels of cognitive complexity (i.e., some more complex and some less complex). District curriculum should encourage the teaching of advanced skills as well as foundational skills and show a balanced progression toward higher levels of cognitive complexity as GLEs carry into the next grade.

Response to Instruction/Intervention

Response to Instruction/Intervention (RTI) is a framework for instruction that has a purpose: to improve the academic achievement and educational outcomes of *every student*. The RTI model supports the practice of providing high-quality instruction and interventions matched to students' individual needs, monitoring progress frequently to guide decision making about changes in instruction or educational goals, and using data to monitor each child's response to instructional strategies or interventions. The RTI concepts supported by EED make use of a multi-tiered approach that incorporates quality instruction and effective interventions for all students. The use of 'tiered' models is common in both education and mental health. The RTI model can be applied in all academic content areas, such as math, written language and reading. It can also be applied to social behavior and school environment.

Differentiation

To differentiate instruction is to recognize students varying background knowledge, readiness, language, preferences in learning, interests; and to react responsively. Differentiated instruction is a process to approach teaching and learning for students of differing abilities in the same class. The intent of differentiating instruction is to maximize each student's growth and individual success by meeting each student where he or she is, and assisting in the learning process.

1.0 School/district curriculum are aligned with Alaska Standards and Grade Level Expectations (GLEs).

1.1 A process was used to identify appropriate resources and materials available for each GLE.

a) Who were the stakeholders involved and how often did they meet? Of the stakeholders, which have experience and knowledge in the content and GLEs?
b) How did proficiency descriptors guide resource selection?
c) What was the process to identify and select aligned, evidence-based researched materials? How were gaps in the resources and materials determined? How were materials selected to address gaps?
d) How are the resources/materials used in your district? Are the ways in which they are being used consistent with the developers' (or vendors') stated purpose?
e) What evidence supports claims that the materials are aligned to state standards? At what level were they found to align (e.g., was the unit of analysis the standard or GLE level)?

1.2 All learners were considered in the selection of resources and materials.

a) What considerations were made for students with disabilities, English language learners, and advanced learners?

1.3 A process was used to ensure that the full range of content (breadth) represented in the GLEs is represented in the collection of resources/materials.
   a) Who were the stakeholders and how often did they meet?
   b) How did the stakeholder group determine a full range of content for the collection of materials?

1.4 A process was used to ensure the full range of depth of knowledge (DOK) or cognitive complexity represented in the GLEs is represented in the collection of resources/materials.
   a) Who were the stakeholders involved and how often did they meet?
   b) How did stakeholders assign/identify the cognitive complexity (i.e., Blooms taxonomy descriptors or Webb's depth of knowledge levels) for each GLE?
   c) How did the stakeholder group determine an appropriate range of cognitive levels for the collection of materials?
   d) How does the curriculum framework show progression in student understanding?
   e) How do the materials support differentiated instruction so that the needs of struggling learners and gifted students can be addressed?

Section 2.0 School/district curriculum has aligned formative/summative assessment components.

Overview and Definitions

To ensure that districts are able to evaluate whether all students are progressing toward proficient and advanced levels, aligned formative and summative assessments are required to support classroom instruction and monitor student progress. All public school students must participate in the district assessment system, including those with disabilities and those who are not yet proficient in English.

Districts may choose to implement a variety of formative/summative assessments. The evaluative system might include common assessments, interim formative assessments, curriculum-based measures, and end-of-course assessments. If a district only uses assessments referenced against national norms at a particular grade (i.e., norm-referenced curriculum based measures), those assessments must be augmented with additional items to ensure the tool accurately measures the full depth and breadth of the state academic content standards.

Formative Assessments

Formative assessment is part of the instructional process. When embedded in classroom practice, formative assessment provides the information needed to adjust teaching strategies during the time of instruction to support optimal learning outcomes. In this sense, feedback from formative assessment informs both teachers and students about student understanding at a point where instruction can be adjusted and interventions implemented as needed.

Summative Standards-Based Assessments

Summative assessments are given periodically to determine at a particular point in time what students know and do not know in relation to state standards. Summative assessment at the district/classroom level is an accountability measure that is generally used at the end of a unit or course of instruction as part of the grading process.

Although the information that is gleaned from this type of assessment is important, it can only help in evaluating certain aspects of the learning process. Because they are administered (1) at the end of instruction, not during, and (2) at less frequent intervals, e.g., every few weeks, months, or once a year, results from summative assessments can be used to help evaluate the effectiveness of programs, school improvement goals, alignment of curriculum, or student placement in specific programs. Summative assessments happen too far down the learning path to provide the finely-grained information to guide instruction at the classroom level or to make adjustments and interventions to teaching strategies *during* the learning process.

2.0 School/district curriculum has aligned formative/summative assessment components.

2.1 Ongoing use of aligned classroom assessments document student progress and achievement.
- a) a) What types of formative assessment practices are used in your district?
- b) How are results from formative assessments used in your district? Are they providing instructional feedback to students and teachers?
- c) What evidence supporting claims of instructional sensitivity of formative assessments has been collected? Or means to support the implementation of instructional-sensitive formative assessments?

2.2 A structure is in place to support continued use of aligned formative/summative assessments.
- a) What is the process for collaboratively examining student work for alignment to proficiency descriptors and GLEs?
- b) How are tools and strategies for formative/summative assessments shared?
- c) How are formative/summative assessments connected to other school improvement initiatives?

Section 3.0 School/district curriculum is implemented with fidelity.

Overview and Definitions

The governing body of a district shall adopt, in the manner required by AS 14.14.100(a) a curriculum that describes what will be taught students in grades kindergarten through grade 12. The district curriculum can incorporate local standards along with required state standards.

Comparability and Equivalency

Students who move between schools must receive comparable instruction through materials that are equally aligned to the grade level expectations. Assurances are necessary that schools are pacing through materials at rates that are equivalent over time so students are able to maintain comparable progress toward the standards regardless of school attended.

Stakeholders

District level participants must include experienced teachers, administrators, and other specialists working directly with students at each grade level. Districts involving stakeholders in this process ensure cultural identities and other demographic considerations when designing or adopting a curriculum.

Fidelity

Fidelity (or integrity) of implementation is the delivery of instruction in the way in which it was designed to be delivered, i.e., in keeping with the intent of the standards, district and school policies for effective instruction, and community expectations.

3.0 School/district curriculum is implemented with fidelity.

3.1 The curriculum is fully adopted by the school board.
- a) The curriculum contains a statement that the document is used to guide for planning instructional strategies. Does the audience for the statement point to the teachers? Does the statement express the purpose of the curriculum?
- b) The curriculum contains a statement of goals that the curriculum is expected to accomplish. Will the listed goals be measured? Where do the goals reflect district philosophy?

c) The curriculum must set out content that can reasonably be expected to accomplish the goals. How does the curriculum support instruction in preparation of the summative spring assessments?
d) There is a review process to determine if the curriculum is responsive to the learning needs of all students. How will data be used to determine the curriculum is meeting the needs of all earners? Who are the stakeholders involved in reviewing the curriculum? What assurances exist that all subgroups are represented in the curriculum?
e) A schedule or plan to address each content area undergoing review at least once every six years. How does the timeline address grades K-12 in each specific content area?

3.2 A system is in place that guarantees teachers are prepared to use district curriculum.
a) How are teachers prepared to use curriculum materials with fidelity? How does this preparation provide multiple entry points for novice as well as experienced teachers?
b) How are new teachers to the district prepared to implement the curriculum with fidelity?
c) How does district leadership programs support and monitor for implementation of curriculum?

Appendix J: Consequences of Not Meeting Adequate Yearly Progress

For Schools Receiving Title I, Part A Funds

Level 1	**Alert:** Prepare and implement a school plan, consult with district and EED to receive technical assistance to meet AYP in next year.
Level 2	**School Improvement Status Year 1:** Develop a school improvement plan. After district review and approval, implement plan. District sends plan to EED. Provide school choice, if choice is available, or supplemental educational services (SES) and inform parents of designation and choice (or SES) options as appropriate.
Level 3	**School Improvement Status Year 2:** Continue to implement school improvement plan (revised as necessary), continue to provide choice, offer supplemental services if not already provided due to limited choice, and inform parents.
Level 4	**Corrective Actions:** Continue school improvement plan, choice, SES, and inform parents. *In addition, district must take one of the following actions:* replacement of staff; implementation of a new curriculum; decrease management authority at school level; appoint an outside expert; extend the school day or year; or restructure the internal organization of the school. [4 AAC 06.865 & NCLB 1116(b)(7)]
Level 5	**Restructuring: Year 1 -** Continue school improvement plan, choice and SES, and inform parents. *District required to prepare a restructuring plan for alternative governance using one of the following actions:* reopen as a charter school, replace all or most of the staff, enter into a contract with a management company, turn over operation of the school to the state, or any other major restructuring of a school's governance arrangement consistent with section 1116 of NCLB. **Restructuring: Year 2 -** Implement restructuring plan for alternative governance. Continue to implement school improvement plan, continue to provide school choice and supplemental services, inform parents. [4 AAC 06.870 & NCLB 1116(b)(8)]

For Schools Not Receiving Title I, Part A Funds

Level 1	**Alert:** Prepare and implement a school plan, consult with district and Department to receive technical assistance to meet AYP in next year.
Level 2 & Above	**School Improvement:** School shall develop & implement school plan, and notify parents.

For Districts

Level 1	**Alert:** Consult with the Department regarding reasons for not meeting AYP.
Level 3	**District Improvement:** District shall develop & implement a district improvement plan, submit the plan to EED, request technical assistance from EED, and provide notice to parents. [4 AAC 06.840(h), 06.850, & NCLB 1116(c)]
Level 4	**District Corrective Action:** Continue district improvement plan. *EED must take at least one corrective action:* defer programmatic funds or reduce administrative money from federal sources; institute new curriculum; replace district personnel; remove schools from jurisdiction of district; authorize students to transfer to another district; or appoint trustee to administer districts in place of school board. [4 AAC 06.840(k) & NCLB 1116(c)(10)(C)]

Financial Consequences

District	Set-aside 20% (or amount equal to) of district's Title IA allocation to provide choice/SES if **any** Title I school is in Level 2 or above
District	Spend 10% of district's Title IA allocation to provide professional development if **district** is identified at Level 2 or above and receives IA funds (may include 10% school-level allocation for professional development).
School	Spend 10% of school's Title IA allocation for professional development if school is in Level 2 or above.

Appendix O: Cultural Standards for Alaska Students

Standard A

Culturally knowledgeable students are well grounded in the cultural heritage and traditions of their community.

Students who meet this cultural standard are able to:
1) assume responsibilities for their role in relation to the well-being of the cultural community and their lifelong obligations as a community member;
2) recount their own genealogy and family history;
3) acquire and pass on the traditions of their community through oral and written history;
4) practice their traditional responsibilities to the surrounding environment;
5) reflect through their own actions the critical role that the local heritage language plays in fostering a sense of who they are and how they understand the world around them;
6) live a life in accordance with the cultural values and traditions of the local community and integrate them into their everyday behavior; and
7) determine the place of their cultural community in the regional, state, national, and international political and economic systems.

Standard B

Culturally knowledgeable students are able to build on the knowledge and skills of the local cultural community as a foundation from which to achieve personal and academic success throughout life.

Students who meet this cultural standard are able to:
1) acquire insights from other cultures without diminishing the integrity of their own;
2) make effective use of the knowledge, skills, and ways of knowing from their own cultural traditions to learn about the larger world in which they live;
3) make appropriate choices regarding the long-term consequences of their actions; and
4) identify appropriate forms of technology and anticipate the consequences of their use for improving the quality of life in the community.

Standard C

Culturally knowledgeable students are able to actively participate in various cultural environments.

Students who meet this cultural standard are able to:
1) perform subsistence activities in ways that are appropriate to local cultural traditions;
2) make constructive contributions to the governance of their community and the well-being of their family;
3) attain a healthy lifestyle through which they are able to maintain their social, emotional, physical, intellectual, and spiritual well-being; and
4) enter into and function effectively in a variety of cultural settings.

Standard D

Culturally knowledgeable students are able to engage effectively in learning activities that are based on traditional ways of knowing and learning.

Students who meet this cultural standard are able to:

1) acquire in-depth cultural knowledge through active participation and meaningful interaction with Elders;
2) participate in and make constructive contributions to the learning activities associated with a traditional camp environment;
3) interact with Elders in a loving and respectful way that demonstrates an appreciation of their role as culture-bearers and educators in the community;
4) gather oral and written history information from the local community and provide an appropriate interpretation of its cultural meaning and significance;
5) identify and utilize appropriate sources of cultural knowledge to find solutions to everyday problems; and
6) engage in a realistic self-assessment to identify strengths and needs and make appropriate decisions to enhance life skills.

Standard E

Culturally knowledgeable students demonstrate an awareness and appreciation of the relationships and processes of interaction of all elements in the world around them.

Students who meet this cultural standard are able to:

1) recognize and build upon the interrelationships that exist among the spiritual, natural, and human realms in the world around them, as reflected in their own cultural traditions and beliefs as well as those of others;
2) understand the ecology and geography of the bioregion they inhabit;
3) demonstrate an understanding of the relationship between world view and the way knowledge is formed and used;
4) determine how ideas and concepts from one knowledge system relate to those derived from other knowledge systems;
5) recognize how and why cultures change over time;
6) anticipate the changes that occur when different cultural systems come in contact with one another;
7) determine how cultural values and beliefs influence the interaction of people from different cultural backgrounds; and
8) identify and appreciate who they are and their place in the world.

Appendix P: Listing of Persons in the SSOS Structure (2010-2011)

Commissioner of Education and Early Development — Mr. Larry LeDoux

Deputy Commissioner of EED — Mr. Les Morse

Director of Rural Education — Ms. Phyllis Carlson

Director of Teaching and Learning Support — Ms. Cynthia Curran

ESEA/NCLB Administrator — Ms. Margaret MacKinnon

ESEA School Improvement Program Specialist

Ms. Angela Love — angela.love@alaska.gov

SSOS Administrator

Mr. Jon Paden — jon.paden@alaska.gov

SSOS Program Specialist

Ms. Elizabeth Davis — elizabeth.davis@alaska.gov

SSOS Content Specialist: Literacy

Ms. Maria Offer — maria.offer@alaska.gov

SSOS Content Specialist: Math

Ms. Cecilia Miller — cecilia.miller@alaska.gov

SSOS Content Specialist: Science

Dr. Bjorn Wolter — bjorn.wolter@alaska.gov

SSOS Education Associate

Ms. Dena Iutzi-Mitchell — dena.iutzi-mitchell@alaska.gov

Glossary

"872" School – School that meets specific criteria, per 4 AAC 06.872, indicating need for EED and district consultation.

AACP- Alaska Administrator Coaching Project. Is part of the ASMP; it is a state initiative in which principals and superintendents receive support through leadership institutes, workshops, and coaches. The goals are to develop instructional leaders, increase student achievement, and reduce administrator turnover. Under the AACP, inexperienced administrators or those new to Alaska are paired with a coach for one or two years. The administrators receive guidance in organization and facilitation, teacher observation and evaluation, the use of data to improve instruction, and the use of effective school-level and classroom practices.

ACC – Alaska Comprehensive Center. Supports EED with high quality, research-based resources. The ACC is one of sixteen centers funded by the U.S. Department of Education to support states in increasing student achievement. The website presented by the ACC is for all educators serving Alaska's K-12 schools. It brings together in one place current information about improvement planning and strategies that districts can use to meet the provisions of NCLB and increasing student performance. For more information visit http://dev.alaskacc.org/ssos.

ACFA- Alaska Computerized Formative Assessments. ACRA are computer-based formative assessments using the CAL online computer test delivery and reporting system. Items are linked to specific Alaska performance standards and grade level expectations (GLEs). The system is intended to provide feedback that can be used to adapt teaching and learning to meet student needs.

AIMSweb- A 3-tier progress monitoring system based on direct, frequent and continuous student assessment which is reported to teachers and administrators via a web-based management and reporting system for the purpose of determining response to instruction.

AIMSweb Diagnosing- Looking for reading vulnerabilities within each student.

AIMSweb Early Literacy Assessment Schedule -

Kindergarten			First Grade		
Fall	**Winter**	**Spring**	**Fall**	**Winter**	**Spring**
Beginning Sound Fluency (optional)	Beginning Sound Fluency				
Letter Naming Fluency	Letter Naming Fluency	Letter Naming Fluency	Letter Naming Fluency		
	Letter Sound Fluency	Letter Sound Fluency	Letter Sound Fluency		
	Phonemic Segmentation Fluency	Phonemic Segmentation Fluency	Phonemic Segmentation Fluency	Phonemic Segmentation Fluency	
	Nonsense Words Fluency (optional)	Nonsense Words Fluency	Nonsense Words Fluency	Nonsense Words Fluency	Nonsense Words Fluency
				R-CBM Fluency	R-CBM Fluency

AIMSweb Progress Monitoring- Assessing intervention efforts and its impact on student achievement. Conducted every 2-3 weeks to identify how individual students are responding to instruction. Is the intervention having a positive impact?

AIMSweb Universal Screening- Commonly referred to as benchmarking. Testing all students, usually three times a year, measures performance compared to students of their own age.

Alaska Reading Course- EED developed a scientifically based Alaska Reading Course focusing on the five critical elements of reading: phonemic awareness, phonics, fluency, vocabulary, and comprehension. It includes word study and comprehension through writing of text. The course gives any teacher necessary skills to deliver reading instruction.

Alaska STEPP- Steps To Educational Progress and Partnership, an entirely web-based school improvement system used by district and school improvement teams to inform, coach, sustain, track, and report improvement activities.

AMO – Annual Measurable Objective. AMO is the percentage of students that must score at a proficient level or higher on state assessments. By year 2013-14 the AMOs for language arts and math are 100%.

ASMP- Alaska Statewide Mentor Project. EED created the ASMP in partnership with the University of Alaska in support of their shared mission to improve academic achievement for students in Alaska. The ASMP includes two components: teacher mentoring for beginning teachers; and principal coaching for new school principals. The goals of the program are to increase teacher retention, increase student achievement, and equip principals with the skills to be instructional leaders and effective managers.

AYP - Adequate Yearly Progress. When a school or district meets the state's goals for reading/language arts and mathematics, it makes AYP.

Best practice - A best practice is a technique or methodology that, through experience and research, has proven to reliably lead to a desired result. A commitment to using the best practices is a commitment to using all the knowledge and technology at one's disposal to ensure success.

CBM – Curriculum Based Measurement. Assessment of student progress aligned to the GLEs.

Desk Audit – A review of assessment data to determine the reasons a district or school has not demonstrated adequate yearly progress.

DIASA- Data Interaction for Alaska Student Assessments. An online database, allows for dynamic access to SBA student performance results. It is password protected with hierarchical access to varying levels of depth into the data, in order to protect individual students. The data interaction system permits approved users to create their own reports, graphs or data files; conduct ad hoc data queries and analysis; disaggregate on user-selected subgroup variables; drill down from summaries to individual students; and print reports in PDF format or export to other software programs.

Domain – Broad area of policy or practice related to effective and successful school functioning.

EED – Alaska Department of Education & Early Development.

Formative Assessment - An assessment conducted at the classroom level intended to be used by teachers to monitor and adjust instruction based on student need.

GLE - Grade Level Expectations. GLEs are based on Alaska's Content and Performance Standards, provide teachers with grade level teaching roadmaps, and for what may be assessed in the Standards Based Assessments (SBA).

GLE Walkthroughs- A process developed for principals to monitor the coverage of the grade level expectations in math, reading, writing, and science during classroom instruction. GLE recording sheets are distributed to principals and also available electronically upon request. GLE walkthrough training has been offered on-site by visiting classrooms, as well as through observing teaching episodes on DVD. Teachers are encouraged to use the GLE recording sheets when

planning lessons.

Instructional Audit – An on-site review of the instructional policies, practices, and methodologies in the six domains of effective practice.

LEA – Local Education Agency. In Alaska, school districts are LEAs.

NCLB - No Child Left Behind Act. NCLB is the latest version of the federal Elementary and Secondary Education Act, signed into law January 8, 2002.

PBS – Positive Behavior Support. School-wide behavioral supports for positive environments.

RTI - Response to Instruction/Intervention. In Alaska, RTI provides a framework to support all students using a tri-tiered triangle model that addresses both academic instruction and behavioral support.

SESA- Special Education Service Agency. A non-profit, political subdivision of the Alaska Department of Education & Early Development. Specializes in offering Positive Behavior Support (PBS) services at the school-wide level.

SESA's PBS System- A three-tiered positive behavior support (PBS) system of intervention with a primary focus on prevention. Tier 1 emphasizes the use of universal supports for all students to increase pro-social behavior, while decreasing problem behaviors. School-wide PBS offers targeted interventions for at-risk students at Tier 2, and provides individualized, intensive interventions for students at Tier 3. The PBS Center staff will provide the necessary professional development and coaching support to schools and districts with following general outcome goals for students: decreases in problem behavior, increases in pro-social skills, increases in positive school climate, and increases in academic performance.

SSOS - State System of Support. State and federal law requires EED to provide a system of intensive and sustained support to districts and schools that are in need of improvement, in corrective action, or in restructuring.

SEA – State Education Agency. In Alaska, the SEA is the Department of Education & Early Development.

Title I – The key program of the Elementary and Secondary Education Act (ESEA, formerly known as No Child Left Behind, NCLB) law that provides federal funding aid focused toward schools with high-poverty.

2/08/12 PRESENTATIONS: UNIVERSITY OF ALASKA BOARD OF REGENTS, ALASKA GATEWAY SCHOOL DISTRICT AND STATE BOARD OF EDUCATION

<TARGET><BILL></BILL><SUBJECT>2-08-12 PRESENTATIONS UNIVERSITY OF ALASKA BOARD OF REGENTS, ALASKA GATEWAY SCHOOL DISTRICT AND STATE BOARD OF EDUCATION</SUBJECT><COMM>HEDC27</COMM></TARGET>

Alaska State Legislature

Rep. Lance Pruitt, Vice-Chairman
Rep. Sharon Cissna
Rep. Eric Feige

Rep. Peggy Wilson
Rep. Paul Seaton
Rep. Scott Kawasaki

Rep. Alan Dick, Chairman

HOUSE EDUCATION COMMITTEE

Agenda

February 8, 2012
8 a.m.
Ramona Barnes Committee Room - 124

I. JT. HOUSE/SENATE EDUCATION MEETING - Call to Order
II. Presentation by Regent Michael Powers – UA Board of Regents Report on teacher preparation, retention and recruitment

HOUSE EDUCATION COMMITTEE:

III. Superintendent Presentation
    a. Todd Poage – Alaska Gateway School District
IV. State Board of Education – Annual Report to the Legislature (Cont'd)
    a. Esther Cox, Chairman Board of Education & Early Development
V. Adjourn

State Capitol, Room 104 Juneau, AK 9980 - Phone: 465-4527 - Fax: 465-2197 - Toll Free (800) 491-4527
Representative_Alan_Dick@legis.state.ak.us

SB 241 Testimony
Alaska's University 2012 Report
Mike Powers – UA Regent
February 8, 2012

I am here today to share with you Alaska's University for Alaska's Schools 2012 Report

- Prepared in accordance with Senate Bill 241 of the 25th legislative Session
- A Report to the legislature on teacher preparation/retention/ and recruitment by the Board of Regents of the University of Alaska

I am joined by:

Diane Hirshberg, Assoc Prof of Education Policy, with UAA's Institute of Social and Economic Research & Provost Rick Caufield of the University of Alaska South East

Report was prepared by:

Patricia Chesbro, Interim Dean, College of Education UAA
Paula Donson, Associate VP of Academic Affairs, UA
Gwen Gruenig, Associate VP of Institutional Research and Analysis, UA
Lexi Hill, Data Analyst, ISER, UAA
Diane Hirshberg, Associate Professor of Education Policy, ISER, UAA
Deborah Lo, Dean of School of Education, UAS
Allan Morotti, Interim Dean, School of Education, UAF

Intent is to:

1. Provide a brief overview of the numbers of teaching education graduates
2. Identify the shortage areas in the Alaskan teaching workforce
3. Highlight each of U of A's MAU's efforts to attract, train, and retain qualified teachers

Here are some of the relevant numbers you will 1st see in the report:

1. In the past 5 years, between 2006 and 2011, U of A has graduated about 200 new teachers annually
2. On average, half of U of A graduates begin teaching in AK the fall after graduation, rising to 60% within 3 years
3. U of A graduates made up 12% of new hire teachers across the state in 2011
4. Number of principals prepared by U of A has increased substantially w/ new UAS educational program
5. Special Education remains a hard-to-fill challenge area
    a. Nevertheless, between 2006 and 2011, the U of A more than doubled the annual number of special education graduates, from 29 in 2006 to 68 in 2011

6. Math and certain positions are also hard to fill. The numbers fluctuate, but – in general- The number of newly hired math teachers has remained steady over past 7 years: 12-15 math teachers are hired annually.
7. Relative to Efforts to Attract – Train – and Retain qualified teachers:
    a. The U of A provides an umbrella of programs and strategies through:
        i. UAA College of Education
        ii. UAF School of Education
        iii. UAS School of Education
        iv. Alaska Teacher Placement System
        v. Future Educators of Alaska program
        vi. And the Alaska Statewide Mentor Project
    b. In addition, U of A offers:
        i. A variety of college-bridging programs-help with transition to post secondary education
        ii. Programs are found on both main and branch campuses
    c. As a fairly new regent, I have been struck by the level of cooperation across all three campuses, and specifically point to:
        i. Teacher Education Plan which the Deans and Provosts at the three MAUs developed, laying out 4 common goals:
            1. Recruit and retain more AK students in Education
            2. Increase program access through multiple delivery methods
            3. Enhance Educator Preparation programs in Special Ed and Math and Science
            4. Conduct research to identify causes/solutions for Ed challenges...I have been very impressed with shared strategy planning sessions
8. Brief description of some challenging areas
    a. Significant efforts have focused on attracting and prepare AK Native and other diverse populations
    Teacher turnover is often cited as a concern, especially in rural areas
    b. Consequently, many districts are forced to recruit from out-of-state
    c. These out-of-state recruits often struggle with adjusting to their new environment...and to address this challenge:
        i. Each MAU has specific outreach efforts
        ii. Distance education technologies have been instrumental
        iii. The number of AK Native students has been fairly steady
        8.7% of new teacher graduates are Alaskan Native, vs. 4.5% of all teachers currently in AK schools
    d. **At UAA**, the Department of Teaching and Learning is supporting a cohort of paraprofessionals who want to become elementary teachers
        i. An advisory group made up of College of Education, College of Arts & Science, Kenai Peninsula College and educators in the village of Chee-vak are working to provide coursework for 15 individuals pursuing AA and BA degrees
        ii. Department has established a "concierge" service to help students navigate the system ... same in healthcare
        iii. This program has been funded by a private donor who wants to see rural expansion in teacher education efforts

e. **UAS** has two US Department of Education teacher programs for AK Natives
    i. Pee-tas: Preparing Indigenous Teachers and Administrators for AK Schools...and a
    ii. Village Teacher program focused on providing AK Native teachers in obtaining advanced degrees. Roughly 20 AK Native Teachers are beginning a Reading Specialist Masters program this spring.
f. **UAF** has a variety of outreach efforts to attract, prepare and retain teachers:
    i. All certification and degree programs are offered through distance education and....Faculty continues to develop additional online course offerings...as well champion efforts to modernize its IT systems for enhanced connectivity
    ii. School of Education maintains staff advisor dedicated to rural student needs
    iii. On rural visits, faculty meet with school and community officials to understand and construct solutions to local needs
    iv. School of Education collaborates with Rural Student Services to assist w/ special requests
    v. School of Education also offers a one-week rural practicum for Fairbanks-based elementary & secondary candidates
    vi. School of Education recently internally funded a $12k grant to study teacher retention factors in Northern AK
    vii. School of Education continues to house the AK Native Teacher Preparation Program grant that provided financial support to AK Natives in final 3 years of their programs...Grant is a partnership between UAS school of Education, AK Native Education Association, Association of Interior Native Educators, and UAF College of Rural and Community Development....again, another clear signal of inter-campus and community collaboration

The 2012 report also speaks to 5 other Key Efforts to Attract/Train and Retain Educations

1. **AK Teacher Placement Service**.
    a. University established a the service in 1978
    b. It is a partnership between school districts across the state and U of A
    c. Serves as a statewide clearinghouse to match interested teachers/principals with positions throughout Alaska
    d. Responds to thousands of inquiries annually

2. **Future Educators of AK Program**
    a. Statewide collaborations of AK Native K-12 students interested in teaching
    b. Partnership among U of A, K-12 school districts and community orgs such as Alaska Native Education Association
    c. Funded by the US Dpt of Education since 2005
    d. Works with 23 school districts across the state
    e. 600 Students are currently enrolled
    f. Recently all MAUs approved a 100-level course transferable across all MAUs
3. **Alaska Statewide Mentor Program**
    a. An individualized support program for 1st and 2nd year teachers

b. Focus on the diverse academic and cultural backgrounds of AK students
c. This Academic year, the program has 24 mentors, working in 34 school districts
d. Project was recently award a $15 million grant by US Dpt of Ed, matched by $1.5M in private Donations

4. **University of Alaska Outreach and College & Career Bridging Program**
   a. Last year U of A conducted a career bridging survey -- 266 programs analysed related to 1) program description 2) program organization and location and 3) funding source
   b. Findings:
      i. 168 Outreach/Bridge programs use U of A general funds
      ii. 82 programs receive federal funding
      iii. 68 programs receive state funding
      iv. 34 programs receive private funding
      v. 72 Programs designed to lead students to a degree program
      vi. 77 programs were considered partnerships, including dual credit collaborations with school districts
      vii. There are 117 youth outreach programs – not resulting in credit –but strong public information: job fairs, college nights, on-campus education sessions
      viii. 24 percent of the programs focus on STEM issues: Science, Technology, Engineering and Math
      ix. Roughly 43 programs specifically note the integration of cultural and indigenous knowledge and are funded by Us Dpt of Education
      x. "Efforts are underway to better track and measure the effectiveness of these programs"...Core to the mission of the university

5. **A fifth area of general focus related to attracting, training and retaining teachers relates to Alternative Certification in Alaska**
   a. This is an area which allows teacher candidates who already hold a BA, to be employed as a teacher while earning their certificates.
   b. As of this past summer, 6 educators had completed this program, and 23 others were pursing their certificates
   c. UAF has graduated 51 educators using this alternative certification process.
   d. UAA operated a program from 2005 to 2010 and graduated 21 secondary teachers.

Finally, I will touch on **Recommendations for Educational Policy Research**

- In summer of 2010, U of A Foundation awarded ISER—the Institute of Social and Economic Research at U of A -- funding to start the "Center for AK Education Policy Research – CAEPR
- CAEPR's mission is to conduct collaborative, interdisciplinary research and analysis around issues of:
  - Educational access
  - Equity and Excellence in the "Alaska Context," across early childhood, primary, secondary, higher and adult education.

In October this past year, CAEPER set the following priorities for research in the coming year:

1. Identification of learning readiness models
2. Exploration of system change in education, especially related to students at-risk.
3. Identification of models for preparing AK Native teachers and administrators
4. Identification of educator retention models
5. Identification of indigenous language models that lead to successful learning

With that, I'd like to simply recap the objectives of the University of Alaska for Alaska's Schools 2012 report, conclude my remarks and ask if we can answer questions you may have:

1. Relative to a brief overview of teaching education graduates, specifically related to key number
    a. U of A tends to graduate 200 Alaskan teachers per year
    b. Alaskan graduates make up 12% of new hires
2. Relative to shortage areas in the Alaskan teaching workforce
    a. Special Education is particularly hard to fill, but Special Education hiring's have doubled in last 5 years
    b. Math and Science difficult to fill...and like most of Lower 48, will likely continue to be challenging area.
3. Finally, some of the key programs that highlight U of A's efforts to attract, train, and retain qualified teachers...include:
    - Alaska Teacher Placement Service: 33 yr clearing house effort which ... responds to thousands of inquiries annually about teaching opportunities across Alaska
    - Future Educators of Alaska Program: 66 Alaska native students participating in the program
    - The Alaska Statewide Mentor Program: Project recently awarded a $15mill grant of US Dpt of Ed...and an additional $1.5M private donations to enhance and support teaching profession in Alaska
    - University Outreach and College & Career Bridging Programs: A 266-program-analysis with special focus on: 1) college readiness, 2) school district partnerships and 3) youth outreach and information
    - The Alternative Certification Programs for those already holding a degree, and who would like to become teachers, especially in rural Alaska
    - And finally, from a research perspective – a core feature of the UA mission – U of A's efforts to attract, train and retain qualified teachers will be enhanced by acting on the 2010 U of A Foundation award to establish the Center of Alaska Education Policy Research

That concludes my remarks. And speaking for other university representatives here in attendance, would be happy to answer questions you may have.

EXECUTIVE SUMMARY

Introduction

In 2008, the 25th Alaska State Legislature passed Senate Bill 241. The legislation requires the University of Alaska Board of Regents to deliver a report titled "Alaska's University for Alaska's Schools" no later than the 30th legislative day of each regular session of the legislature that "describes the efforts of the university to attract, train, and retain qualified public school teachers. The report provides a brief overview of teacher education graduates from the University of Alaska, a gap analysis that documents the shortage areas in the Alaska teaching workforce, and a description of some of the University of Alaska's efforts to attract, prepare, and retain school teachers and educators for Alaska. Highlights of the report include the following:

- Between 2006 and 2011, the University of Alaska graduated about 200 new teachers each year.
- On average, about half of UA teacher education graduates begin teaching in Alaska the fall after graduation; that number rises to over 60% three to four years later.
- University of Alaska graduates made up about 12% of new hires across the state in 2011.
- The number of principals prepared by the University of Alaska has increased substantially with the addition of a new program at UAS as well as growth in UAA's numbers.
- Special education positions are especially hard to fill in Alaska. Between 2006 and 2011, the University of Alaska system slightly more than doubled the annual number of special education graduates, from 29 in 2006 to 68 in 2011.
- Math and certain science positions are also hard to fill in Alaska. The number of University of Alaska graduates hired in these fields fluctuates some, but in general has remained fairly steady over the past seven years.
- The University of Alaska has a number of initiatives across the three campuses aimed at increasing the number of Alaska Native educators as well as teachers from other underrepresented groups. These efforts include programs targeting Alaska Natives who wish to become teachers, an initiative aimed at helping paraprofessionals in one rural school become certificated teachers, targeted outreach and support for rural students studying education via distance, and rural practicum options for teacher candidates at the main campuses.
- The University of Alaska also oversees the Future Educators of Alaska initiative, operating in 23 school districts, Alaska Teacher Placement which serves as a statewide education job clearinghouse in collaboration with districts statewide, and the Alaska Statewide Mentor Project, which was recently awarded a $15 million grant by the U.S. Department of Education, which has been matched by $1.5 in private donations.

INTRODUCTION

In 2008, the 25th Alaska State Legislature passed Senate Bill 241. The legislation requires the University of Alaska Board of Regents to deliver a report titled "Alaska's University for Alaska's Schools" no later than the 30th legislative day of each regular session of the legislature that "describes the efforts of the university to attract, train, and retain qualified public school teachers. The report must include an outline of the university's current and future plans to close the gap between known teacher employment vacancies in the state and the number of state residents who complete teacher training."

This is the fourth year this report has been prepared for the legislature. It provides a brief description of teacher education programs in the system, an overview of teacher education graduates from the University of Alaska, a gap analysis that documents the shortage areas in the Alaska teaching workforce, and a description of some of the University of Alaska's efforts to attract, prepare, and retain school teachers and educators for Alaska.

University of Alaska Education Programs

The University of Alaska offers teacher preparation at all three Major Academic Units (MAUs), via both in person and distance education delivery. All three campuses offer programs that lead to elementary and secondary education initial certification. UAA and UAS offer initial certification in early childhood education. UAF offers initial certification in special education, and UAA in early childhood special education. All three campuses also offer special education degrees and certificates for teachers interested in moving into that area.

UAA and UAS offer principal certification programs, while UAA and UAF provide counselor education. In addition, across the three campuses, there are many programs for educators wishing to add endorsements to their licensure or obtain masters degrees or certificates in specialized areas, including (but not limited to) reading specialist and cross-cultural education masters degrees and a superintendents certificate. The majority of these programs are offered via distance education. All three campuses also offer professional development opportunities to educators across the state and beyond, many in collaboration with school districts or professional organizations.

All students in University of Alaska teacher education programs must take the Praxis I and Praxis II exams. Students must pass the Praxis I (Pre-Professional Skills Test) with scores that meet or exceed state standards before they enter student teaching, and they must pass one or more Praxis II content area exams with scores that meet or exceed state standards in order to receive an institutional recommendation for state licensure. This helps ensure that University of Alaska teacher education graduates meet national standards for content knowledge in their areas of specialization.

The UA System Education Schools and College are accredited by the National Council for Accreditation of Teacher Education (NCATE), and 26 separate programs within those schools and college are nationally recognized by their relevant Specialty Professional Associations (SPAs), thus ensuring that the programs and the institutions in which they operate meet or exceed national standards. NCATE is one of two organizations recognized by the U.S.

Department of Education as an accrediting institution specific to teacher education and it currently represents over 3 million individuals. To meet the necessary standards for initial and advanced programs, education institutions engage in a self-study, followed by a rigorous information review and site visit.

In 2010, the Deans of Education and provosts at the three MAUs developed a "Teacher Education Plan," which lays out the following shared goals:

A. Recruit and retain more students in education, particularly Alaska residents
B. Increase program access through multiple delivery methods.
C. Enhance educator preparation programs in Special Education and in Math and Science teaching.
D. Conduct research to identify causes and propose solutions for education challenges in Alaska.

The three Colleges and Schools have taken a number of actions toward achieving these goals, some of which are laid out in more detail in the last part of this report. These efforts include aligning special education program credit requirements and courses, implementing innovative programs aimed at increasing the number of Alaska Native teachers, and collaborating with the Center for Alaska Education Policy Research at the UAA Institute of Social and Economic Research (ISER) to increase faculty research capacity, among others.

The Teacher Education Plan is available online at:
http://www.alaska.edu/files/research/TeachPrepPlan_101112.pdf

EDUCATION GRADUATION DATA

Each year, the University works to improve the accuracy and completeness of the data in this report. Before 2008, several programs for educators didn't result in a formal graduation record in the University's Banner database. Program codes change as programs make changes, and students move in and out of school. It can be challenging to identify all the codes with students enrolled at any given time, as students may return, grandfathered into program codes that are otherwise no longer used. In addition, students are occasionally mistakenly assigned to old program codes. The education deans and data managers have worked both within their schools and with the registrars of their campuses to improve data quality and consistency. As a result, this year we have both updated the report with 2011 numbers and made minor revisions to numbers from previous years.

Initial Teacher Preparation

The graph below shows how many new teachers the University of Alaska system prepared each year from 2006 to 2011. Across the system, the programs that prepare new teachers include bachelor's degree and post-baccalaureate programs for elementary and early childhood teachers, and post-baccalaureate and Master's degree programs for secondary teachers. While the number has fluctuated somewhat, the average number of new teachers prepared annually has been near 200.

	AY06	AY07	AY08	AY09	AY10	AY11
K12	2	0	3	6	2	5
Secondary	87	115	67	84	82	81
Elementary	91	121	99	127	104	119

The University graduates slightly more elementary than secondary teachers -- on average elementary teachers make up about 55% of the total graduates, secondary teachers about 43%, and K12 teachers (such as art, music, and physical education teachers) about 2%.

Most of the initial program graduates–over 90 percent–obtain an Alaska teacher certification the year that they graduate. Fewer go on to immediate teaching positions in Alaska's schools–about half in the fall after graduation, rising to over 60% three to four years later. The table below shows the number and percent of UA's initial teacher preparation program graduates (excluding a few we could not track) who obtained certification and those who were working in Alaska public schools FY2012.

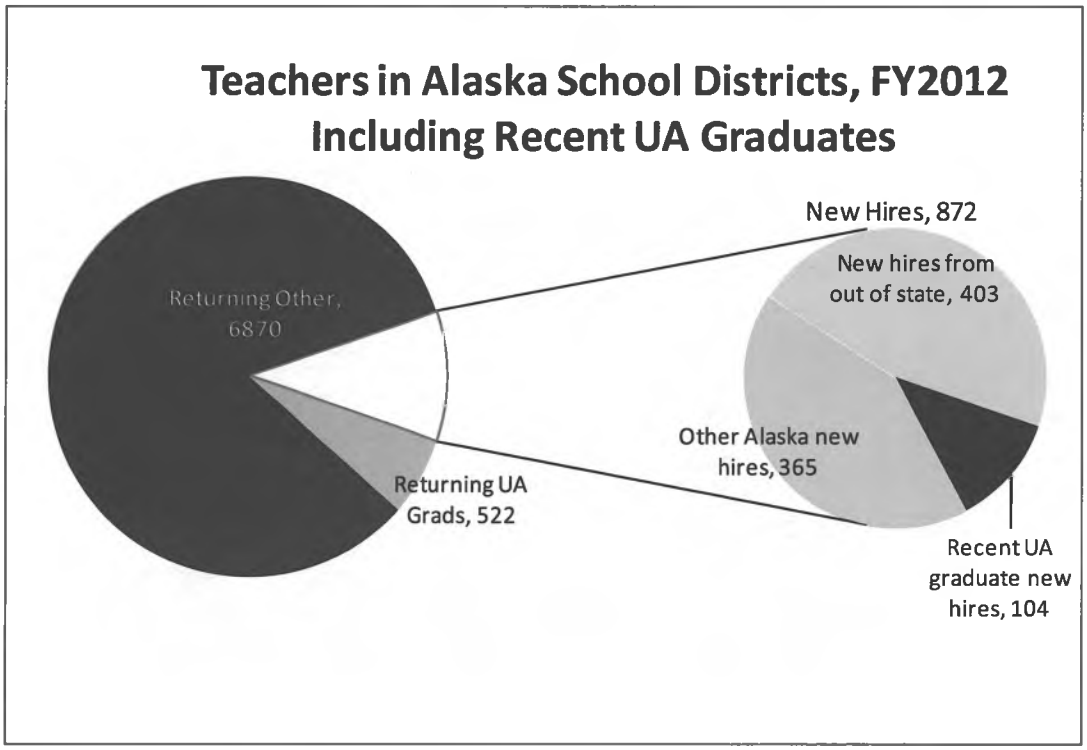
Graduates of UA initial teacher preparation programs, 2006-2011 certification and employment in FY2012

Academic Year	# program graduates*	With Alaska Certification**		In AK Schools Oct 2011	
		number	percent	number	percent
2006	174	161	92.5%	94	54.0%
2007	232	215	92.7%	137	59.1%
2008	166	158	95.2%	106	63.9%
2009	212	197	92.9%	124	58.5%
2010	176	158	89.8%	91	51.7%
2011	195	n/a**		86	44.1%

*Excludes early childhood special education programs and graduates for whom no SSN was recorded.
**Certification data as of March 2011, which does not include most of the AY 2011 graduates

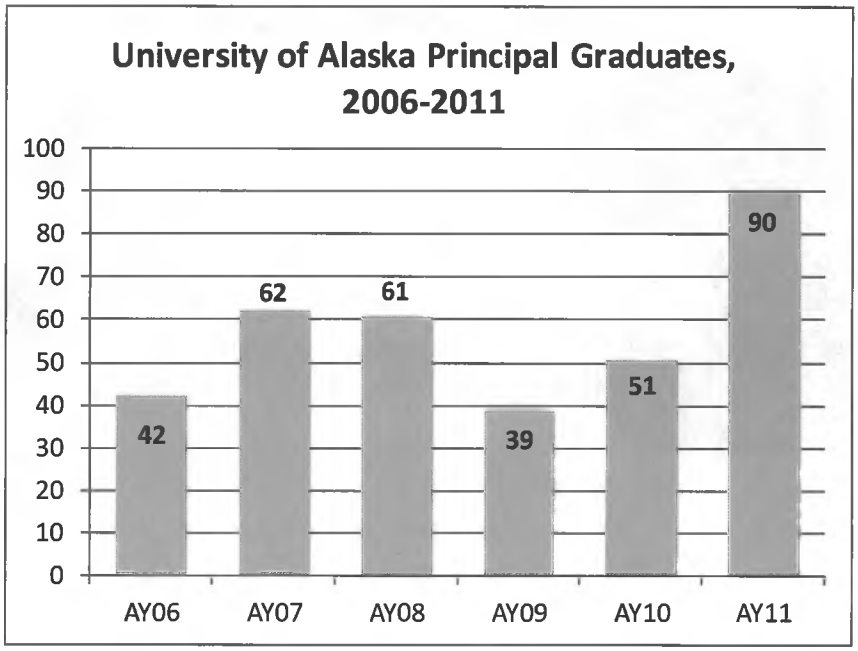
There are many reasons that graduates don't immediately move into teaching jobs; they may be waiting for an opening in their preferred subject, grade, or location (or all three). Some teacher program graduates don't enter the teacher profession at all – personal or family reasons may keep them out of the labor force, and some decide after student teaching that the profession is not for them. We cannot tell from our data whether the graduates who did not enter teaching immediately were seeking jobs in education but were unsuccessful in obtaining them, whether they had decided not to teach at all, or whether they had chosen to wait before entering the classroom. The three Education deans, with support from the Center for Alaska Education Policy Research (CAEPR), have committed to supporting a 2012 faculty research project to understand why graduates do or do not teach in Alaska public schools after they complete teacher preparation programs. Of the 654 UA 2006-2011 teacher program graduates teaching in Alaska public schools in the fall of 2011, 530 were located in the five large districts closest to the UA campuses (Anchorage, Mat-Su, Kenai, Fairbanks and Juneau) and 124 were teaching in 41 other districts throughout the state.

From the school district perspective, recent university graduates are still a small part of their total hires. As the graph below shows, in October 2011, only about 104 (12 percent) of district's 872 new hires of teachers were recent UA graduates; however, many more of those graduates (522) were already working for the districts.



New Principals for Alaska

The University of Alaska Anchorage and University of Alaska Southeast both offer degree programs to prepare principals. Both programs are offered largely through on-line courses. UA Southeast offers a cohort program with on-campus summer courses and on-line courses during the year. UAA offers both a fully on-line principal certification program for educators anywhere in Alaska (and beyond), and district-based cohorts that combine face-to-face sessions with online coursework. The number of students who graduate each year varies widely, and increased in 2010-2011 as the first group from UAS's new Educational Leadership program graduated.



While almost all graduates of the University's principal preparation program are employed in Alaska schools when they finish the program, the percent drops off sharply in subsequent years. Fewer than half actually have positions as principals, assistant principals, or lead teachers; anecdotal evidence indicates that many of these graduates never intended to become principals but wanted to obtain an advanced degree.

Graduates of UA principal preparation programs, 2006-2010 employment and jobs in FY2012					
		In Alaska Public Schools, FY2012		In Principal, Assistant Principal and Lead Teacher positions	
Year	Total	Number	%	Number	%
2006	42	29	69.0%	16	38.1%
2007	62	42	67.7%	21	33.9%
2008	61	42	68.9%	19	31.1%
2009	39	32	82.1%	17	43.6%
2010	51	47	92.2%	22	43.1%

Total Education Graduates

Somewhat more than one-third of all the UA education graduates each year are neither new teachers nor new principals. Many are experienced teachers or administrators seeking a new or more advanced endorsement or degree (such as special education, math, or technology); some are becoming master teachers, reading specialists, counselors or superintendents. In addition to the degree and certificate program graduates shown below, each MAU delivers thousands of credit hours of instruction to teachers who are not enrolled in a formal program of study. That group accounts for most of the "professional" credit hours in the bottom graph, and many of the graduate credit hours as well.

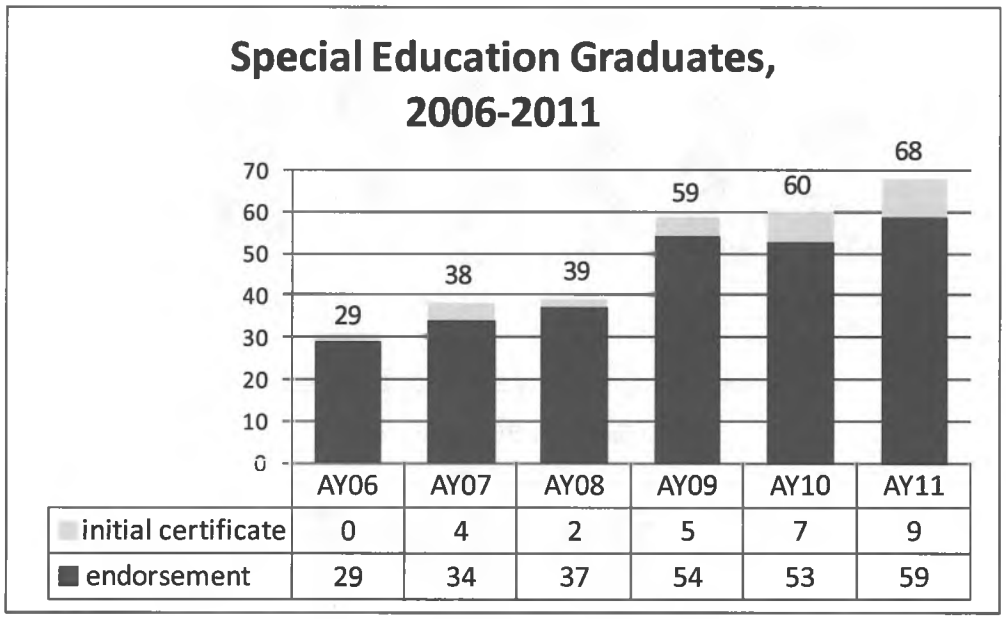
	AY06	AY07	AY08	AY09	AY10	AY11
Lower Division	3,114	2,705	2,867	3,298	3,069	3,938
Upper Division	5,555	6,143	6,231	5,706	5,451	6,031
Professional	12,709	12,647	12,347	13,327	13,528	12,929
Graduate	9,945	11,743	11,045	11,744	12,065	13,067

HARD TO FILL POSITIONS

Three fields are consistently the most difficult to fill both nationally and in Alaska: special education, math, and science. We present here data on the numbers of teachers hired from in-state and out of state in each of the fields.

New Special Education Teachers

All of the University of Alaska education units now offer degree programs in special education. From 2006 to 2011, the system slightly more than doubled the annual number of special education graduates. In order to increase the number of graduates, UAA and UAS assisted UAF in developing a Special Education program, so that there are special education programs at all three MAUs. In addition, to address issues of students moving between campuses, the special education faculty and the Deans from each MAU agreed to (1) a common core of courses; (2) the same credit requirements for the Post-Baccalaureate certifications and Master's programs; (3) make it easier to transfer courses between programs, and (4) share supervision of clinical practice students to save on the cost of travel. The group continues to meet on a regular basis and is working on coordinating course schedules to give students across the state more options. Despite the growth of Alaska's special education programs, high turnover in this field (often by teachers moving to regular education positions in the same district) means that special education remains a hard-to-fill area for school districts.

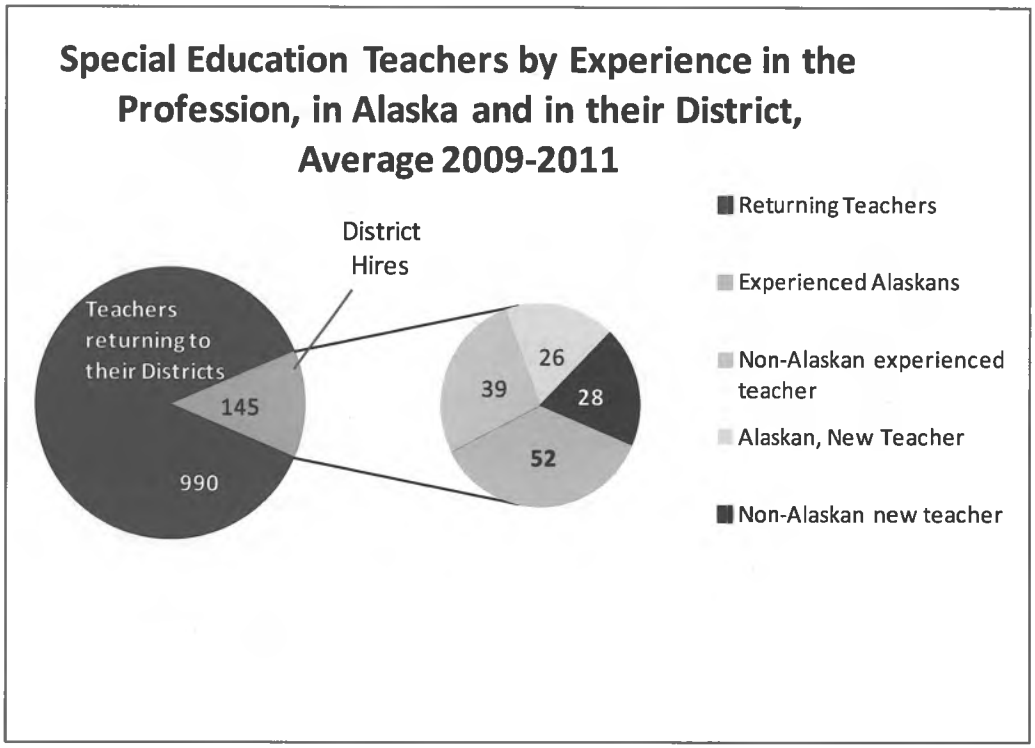


Recent changes in how the University records Special Education endorsements will improve our ability to track these graduates into the workforce. However, only about 70 percent of the graduates between 2006 and 2011 are easily tracked. We used those graduates to estimate the percent of all our graduates who were teaching in Alaska schools in FY2012, and the percent who held positions as special education teachers. As the table below shows, about 60 percent of special education graduates from 2006 to 2011 were working in Alaska's public schools in FY2012, but only 40 to 50 percent held jobs as special education teachers.

Special Education graduates, 2006-2011 working in Alaska public schools and working as special education teachers, FY2012			
	Total Graduates	% in Alaska Schools	% who are Special Education Teachers
2006	29	61.1%	38.9%
2007	38	59.1%	45.5%
2008	39	61.5%	46.2%
2009	59	59.1%	52.3%
2010	60	57.1%	38.1%
2011	68	63.2%	54.4%

As with initial teacher positions, even though the number of UA graduates has grown, they make up only a small portion of district hires. The table and chart below show that most new special education teachers hired in Alaska still come from outside the state.

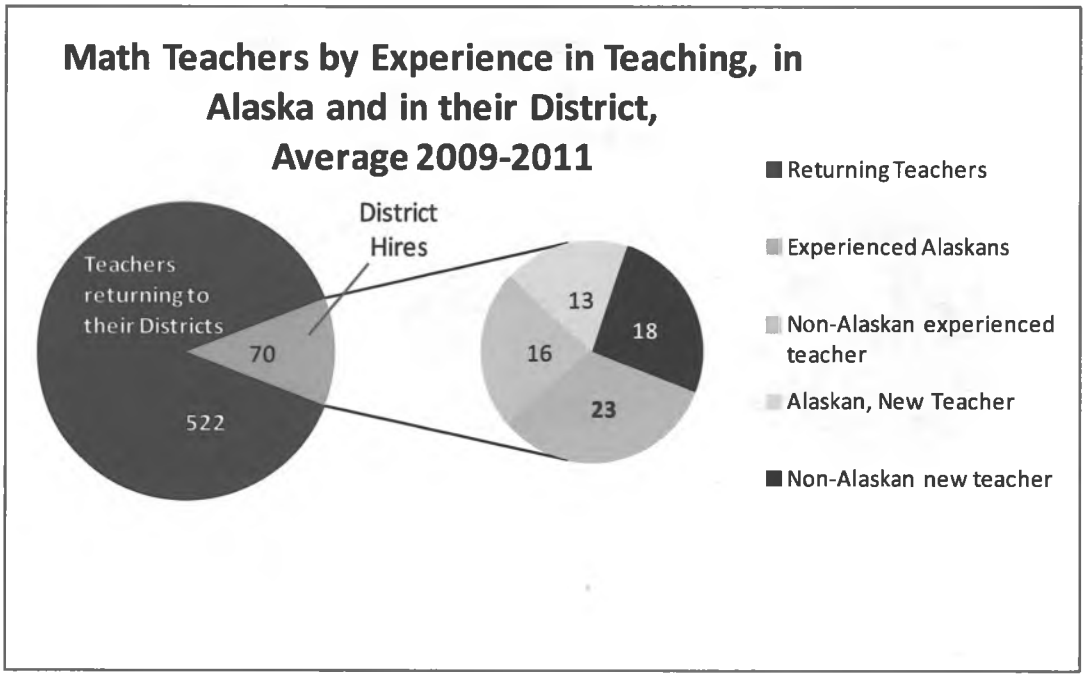
Special Education teachers in Alaska Schools by experience in special education, in Alaska and in their district, FY 2005-2011						
		Returning from previous year		New Hires		
				Alaskan		From out of state
Year	Total	Number	Percent	New teacher	Experienced teacher (movers)	Other new hires
2005	924	799	86.5%	18	34	73
2006	1,077	895	83.1%	24	59	100
2007	1,087	920	84.6%	43	68	57
2008	1,040	906	87.1%	30	61	43
2009	1,111	996	89.7%	13	44	57
2010	1,131	987	87.3%	35	52	57
2011	1,164	989	85.0%	29	60	86



The tables and charts on the following two pages show a similar pattern for secondary mathematics and science teachers. The great majority of those teachers return to their districts each year. To hire the new teachers they need, district still have to bring many from outside Alaska. However, while in 2006 and 2007, the majority of new district hires were from out of state, that has not been the case in 2008-2011.

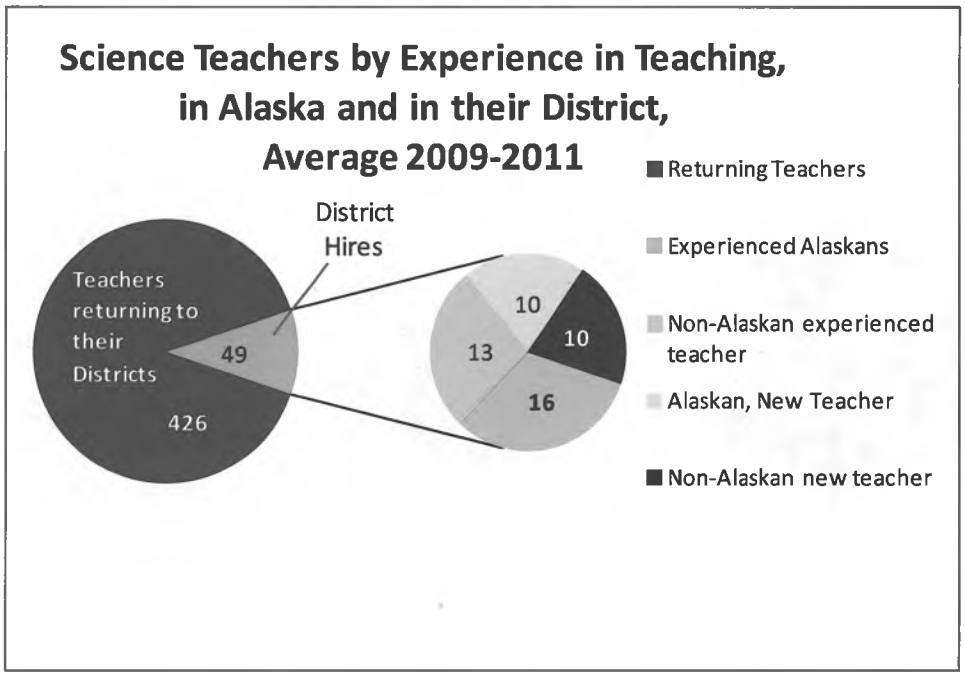
Math Teachers

Math teachers in Alaska schools by experience in teaching, in Alaska and in their district, FY 2005-2011						
		Returning from previous year		New Hires		
				Alaskan		From out of state
Year	Total	Number	Percent	New teacher	Experienced teacher (movers)	Other new hires
2005	532	447	84.1%	12	27	46
2006	596	511	85.7%	12	28	44
2007	595	524	88.1%	15	29	26
2008	588	513	87.3%	17	30	28
2009	598	540	90.3%	9	18	31
2010	588	517	87.9%	13	20	38
2011	588	508	86.3%	16	31	33



Science Teachers

Science teachers in Alaska schools by experience in teaching, in Alaska and in their district, FY 2005-2011						
		Returning from previous year		New Hires		
				Alaskan		From out of state
Year	Total	Number	Percent	New teacher	Experienced teacher (movers)	Other new hires
2005	458	403	88.1%	12	14	28
2006	488	425	87.1%	11	20	32
2007	508	448	88.1%	10	25	26
2008	487	424	87.0%	19	17	28
2009	495	451	91.0%	7	14	23
2010	465	417	89.8%	11	17	19
2011	465	410	88.2%	12	16	27



UNIVERSITY OF ALASKA GRADUATES IN ALASKA SCHOOLS

Teachers who received their initial teacher preparation from the University of Alaska work in 52 of Alaska's 54 school districts. Statewide, UA-prepared teachers make up 28 percent of the teaching force. The percent of all certified staff that received any education degree or endorsement from UA is slightly higher – about 32 percent. The table below shows the 15 districts with the highest number of UA-prepared teachers.

	Number of AY10 teachers whose initial preparation was at UA		
School District	Total UA	Total Teachers	Percent prepared at UA
Anchorage	846	3,020	28%
Fairbanks Borough	416	861	48%
Mat-Su	263	999	26%
Juneau	146	367	40%
Kenai Peninsula	142	615	23%
Lower Kuskokwim	57	296	19%
Kodiak Island	38	195	19%
Ketchikan	28	158	18%
Sitka	28	109	26%
Northwest Arctic	23	145	16%
Galena	21	64	33%
Lower Yukon	20	150	13%
Yukon Koyukuk	20	55	36%
Bering Strait	19	180	11%
North Slope	16	174	9%
Remaining 39 School Districts	256	1,073	24%
Alaska Total	**2,339**	**8,461**	28%

EFFORTS TO ATTRACT, TRAIN, AND RETAIN QUALIFIED SCHOOL TEACHERS AND EDUCATORS FOR ALASKA

To increase the number of educators for Alaska's schools, the University of Alaska system provides programs and strategies through the University of Alaska Anchorage College of Education, University of Alaska Fairbanks School of Education, University of Alaska Southeast School of Education, Alaska Teacher Placement, Future Educators of Alaska, and the Alaska Statewide Mentor Project. In addition, the university offers a variety of college-bridging programs designed to help students' transition to post secondary education. All of these efforts are an integral part of the system. Programs that serve future education students can be found on both the main campuses and branch campuses. The following is a synopsis of the programs outlined above, as well as a brief description of alternative certification options in Alaska.

Efforts to attract and prepare Alaska Native and other diverse populations
Educator turnover is often cited as a concern in Alaska, especially in rural sites. Since our educator preparation institutions do not meet the current need for educators in Alaska, many districts are forced to recruit educators from outside the state. Often, these educators do not understand Alaska and have difficulty coping with some of the challenges, especially in rural Alaska.

Many initiatives have focused on recruiting rural residents to fill education positions throughout Alaska. There is also a need to provide advanced studies for rural educators. Currently, each MAU has outreach efforts. The advent of distance education technologies has been instrumental in these efforts. As the table below shows, the number and percent of minority students in general and Alaska Native students in particular has been fairly steady since 2006. The average of 8.7 percent Alaska Native new teacher graduates is above the average of Alaska Native teachers currently in Alaska schools (about 4.5% in 2009-2010)

Graduates of UA initial teacher preparation programs by ethnicity, 2006-2011

Year	Alaska Native		Other Minority		Non-Minority*		Total
2006	18	10.0%	10	5.6%	152	84.4%	180
2007	16	6.8%	11	4.7%	209	88.6%	236
2008	13	7.7%	8	4.7%	148	87.6%	169
2009	21	9.7%	16	7.4%	180	82.9%	217
2010	16	8.5%	6	3.2%	166	88.3%	188
2011	17	8.3%	10	4.9%	178	86.8%	205
Total/Average	101	8.5%	61	5.1%	1,033	86.4%	1,195

*Non-Minority includes 111 students in "other" and "unknown" categories

At UAA, the Department of Teaching and Learning (DTL) is supporting a cohort of paraprofessionals in Chevak who want to become elementary teachers. An advisory group, made up of College of Education, College of Arts and Sciences, Kenai Peninsula College and Chevak

educators works together to provide coursework and support for 12-15 individuals who are pursuing AA and BA degrees. The goal of the program is to develop teachers who can teach through their own language and culture to better reach the students in Chevak. We have learned that it is vital to employ a "concierge" to help students navigate the unfamiliar university structures. This initiative is funded by a private donor who wants to see the program expanded to other rural districts in Alaska. The College is pursuing ways to fund this expansion. The College also offers advanced programs by distance and has, for example, principal and superintendent candidates from districts all over the state.

UAS has two US Department of Education funded teacher education programs for Alaska Natives who are or wish to become teachers. The Preparing Indigenous Teachers and Administrators for Alaska Schools (PITAAS) program supports both teacher candidates and teachers who are working toward advanced degrees. The Village Teacher program is focused on providing experienced Alaska Native teachers an opportunity to obtain advanced degrees and additional training for supporting students. Approximately 20 Alaska Native teachers will begin the Reading Specialist masters program during the Spring 2012 semester. UAS faculty members supervise teacher candidates in all 54 Alaska school districts.

UAF has a variety of outreach efforts that include:

1. Courses for all certification and degree programs are offered through distance education with the exception of the two counseling courses (Individual Practicum and Group Counseling);
2. Faculty members are continuing to develop online course offerings, including an online M.Ed. concentration in Innovation and Design;
3. SOE maintains staff advisor who works only with rural students;
4. During rural site visits for supervision purposes faculty meet with school/community officials to promote positive working relationships between the university and the school/community;
5. SOE collaborates with Rural Student Services to assist rural students who are both on and off campus to succeed academically;
6. Continue to modernize our IT so as to be able to offer rural students a menu of options for how to participate in distance education courses;
7. One-week rural practicum for Fairbanks-based elementary and secondary education candidates;
8. $12,000.00 SOE internal grant to new faculty member to study teacher retention factors in northern Alaska;
9. SOE continues to house the Alaska Native Teacher Preparation Project Grant that provides financial support to AN/AI students in the final two years of their education programs, and seeks to develop a "circle of mentoring that includes experienced and new AN/AI educators." The grant is a partnership between the UAF SOE and the Alaska Native Education Association, the Association of Interior Native Educators, and the UAF College of Rural and Community Development

Alaska Teacher Placement (ATP)

Alaska Teacher Placement was established in 1978 as a partnership between school districts and the University of Alaska to serve as a statewide education job clearinghouse for Alaska. For over 28 years ATP has matched teachers and administrators seeking positions with the districts who need them. Alaska Teacher Placement provides leadership in identifying, attracting, and placing highly qualified educators for our state. ATP works collaboratively with Alaska school districts,

university leaders, and other educational entities to promote the teaching profession in Alaska.

Alaska Teacher Placement provides a wide range of services to job candidates for teaching and school administration jobs. ATP responds to thousands of inquiries annually regarding teaching in Alaska. ATP serves as the official liaison between educators seeking employment and the schools and districts seeking educators.

Future Educators of Alaska – (FEA)
FEA is a statewide collaborative effort to inspire and support Alaska Native K-12 students to go into the education profession – we work to *grow our own educators*. The fostering of prospective Alaska Native teachers and administrators involves a partnership among K-12 school districts, University of Alaska campuses and community organizations, such as Alaska Native Education Association (ANEA).

Funded by the US Department of Education since 2003, FEA works with 23 school districts in every cultural region of the state and has an estimated 600 students participating in the program. Most recently, the program has created and distributed a dual credit curriculum designed to support high school students explore the education profession. The Exploring Education Careers (EEC) curriculum has been approved by all MAUs as an ED 100 level course and is transferrable across campuses. This curriculum is a step for FEA to transition into a Career and Technical Student Organization (CTSO), which would help further FEA's effort to support career development for Alaska Native students and act as a bridge for rural Alaska students to enter college.

Alaska Statewide Mentor Project
The Alaska Statewide Mentor Project exists to enhance and support the profession of teaching in Alaska. The project provides individualized support to first- and second-year teachers with the objective of developing an effective teaching force that is responsive to the diverse academic needs and cultural backgrounds of all students. In the 2011/2012 school year, the Alaska Statewide Mentor Project has 24 mentors (22.5FTE) working with 330 first- and second-year teachers in 34 school districts across Alaska. The project goals include:

- Improved teacher retention
- Enhanced quality of instruction
- Improved student achievement

The Project was recently awarded a $15 million grant by the U.S. Department of Education, which has been matched by $1.5 in private donations.

University of Alaska Outreach and College & Career Bridging Programs
In 2011, a survey of University of Alaska Outreach and College & Career Bridging Programs was conducted. 266 program specific reports were collected. Each report includes a program description, the location of where the program is administered, and the funding sources used to administer the program.

- Roughly half of the programs report a combination of funding sources to cover the cost of program implementation.

- 168 programs use UA general funds to fully support or supplement program costs or services; in some cases fees were generated for services.
- 82 programs receive federal funding, 52 of which report federal funding as the only source to support program costs or services.
- 68 programs receive state funding, which could include funding from state departments, school districts, or both.
- Only 34 programs receive private funding, and rarely is private funding the only source of support, in most cases private funding is used to supplement program costs.

Programs were classified as a college/career ready program, a partnership, or an outreach program or activity.

- College Readiness can include college and career preparation programs that typically provide direct academic support to students. Programs may result in college coursework that leads to a degree program. Roughly 72 programs are coded as college/career ready, yet may also be considered a partnership and engage in outreach activities.
- Partnerships include dual credit, collaborations with school districts and/or state agencies, as well as federal agencies. A total of 77 programs are coded as partnerships, many with school districts or state agencies.
- Youth outreach generally includes programs that provide informational publications, services to schools or in the community, and resources to youth, educators, or general public. Most of these programs do not result in credit towards a degree program. Examples include attending local job fairs, participating in college and career awareness activities, and hosting events on campus to promote post secondary education. 117 programs are coded as outreach.

Most programs could fall into two or more categories, or in some cases be considered a partnership designed to promote college and career awareness with an academic component that awarded college credit for participation.

Other program focus areas include:

- Science, Technology, Engineering, and Mathematics (STEM). STEM was determined by reviewing a list of program descriptions and names. It is estimated that 64 of the 266 programs, 24 percent, focus on Science, Technology, Engineering, or Math as part of their core service.

- Roughly 43 program descriptions note the integration of culture and indigenous knowledge. The University of Alaska is a recipient of federal grants; some grants such as the Alaska Native Education funding and the Indian Education grant from the U.S. Department of Education require a specific emphasis on Alaska Natives or American Indians as a program requirement. That does not mean to imply that other programs do not serve Alaska Native students, nor are programs funded by these grants exclusive to serving only Alaska Natives. The University of Alaska is an equal employment opportunity/affirmative action employer and educational institution.

Efforts are underway to better track, review and measure the effectiveness of the many outreach programs and college bridging activities that promote post secondary education. Providing these

services is key to the university mission and with so many programs in place, the President is convening a small team to develop a tracking mechanism that will provide both data and information to the general public regarding the outcomes of the various programs being offered across the state.

Alternative Certification in Alaska

There are two alternative certification options in Alaska. The Alaska Department of Education and Early Development runs the Alaska Transition to Teaching (AKT^2) program, which focuses on preparing teachers for rural Alaska. This program allows teacher candidates who already hold a bachelor's degree in a secondary core content area[1] to be employed as teachers of record while earning their certificates, and covers most participant costs. Teachers must be willing to work in one of the 15 program partner districts. As of summer 2011, six educators had completed this relatively new program, and twenty-three more were in the process of getting their certificate.

The state also allows individuals in approved post-baccalaureate teacher preparation programs (such as the University of Alaska programs) to pursue initial teacher certification while working as the teacher of record if they hold a bachelor's degree in the field in which they are teaching. The teacher must be enrolled in an in an accredited institution, and must complete the program in no more than two years.

UAF has an ongoing program, and has graduated 51 educators via this alternative route since 2002. These students taught in communities across the state, from Barrow to Buckland to Chevak and even Anchorage. All but one student completed a secondary credential.[2] UAA operated a program from 2005 to 2010, in partnership with the Anchorage and Mat-Su School Districts, and graduated 21 secondary teachers in the six years of the program.

[1] excluding social studies/government

[2] The one elementary post-baccalaureate student who completed her licensing requirements while teaching was in a unique situation where the school and district could demonstrate clear need for her skills.

RECOMMENDATIONS FOR EDUCATIONAL POLICY RESEARCH

In summer 2010, the University of Alaska Foundation awarded the Institute of Social and Economic Research funding to start the Center for Alaska Education Policy Research (CAEPR).

The Center's mission is:

> The Center for Alaska Education Policy Research enhances decision-making by policymakers, education professionals, and the public through collaborative, interdisciplinary research, analysis, and dissemination. The center conducts non-partisan research on policy issues around educational access, equity and excellence in the Alaska context, across early childhood, primary and secondary, higher and adult education.

CAEPR works with an Advisory Board to help determine research priorities for the center, identify potential projects and partners and participate in awarding faculty mini-grants. Advisory board members include the Alaska Commissioner of Education, a representative of the First Alaskans Institute, the chairs of the Education Standing Committees of the Alaska State Legislature, the executive director of the Alaska Association of School Administrators, a representative of the University of Alaska Statewide Administration, school and district administrators, representatives from the Alaska Native Educators Association, a private industry representative, the Association of ANCSA Regional Corporations and others. The University of Alaska's three Deans of Education serve as CAEPR's steering committee. The deans ensure that the center is effectively building education policy research capacity across the university and that CAEPR research is coordinated with and supportive of research conducted in the schools and colleges of education.

The CAEPR Advisory Board met in October 2011, and set the following priorities for research in the coming year. The board determined that CAEPR should identify successful models and identify why they are successful and how they can be implemented accordingly:

- Identify successful learning readiness models, explore why they are successful and what might be implemented accordingly
- Explore models for systemic change in education, in order to better serve all students, especially culturally and socially unique students who are at risk
- Identify successful models for preparing Alaska Native teachers, administrators and superintendents, explore why they are successful and what might be implemented accordingly
- Identify successful educator and administrator retention models, explore why they are successful and what might be implemented accordingly
- Identify indigenous language models that lead to successful learning

REQUESTS FOR ADDITIONAL INFORMATION

For additional information on specific items, questions or copies of the report, please contact Paula Donson, Associate Vice President of Academic Affairs at the University of Alaska at 907.786.7729.

PRESENTATION TO JOINT EDUCATION COMMITTEES 2012

- **GOOD MORNING MR CHAIRMAN AND SENATORS AND REPRESENTATIVES OF THE JOINT EDUCATION COMMITTEES.**

- **MY NAME IS ESTHER COX, AND I AM CHAIR OF THE ALASKA BOARD OF EDUCATION AND EARLY DEVELOPMET.**

- **I AM HERE TODAY TO BEGIN THE IMPLEMENTATION OF SENATOR DAVIS' BILL---SB 1---WHICH WAS PASSED LAST LEGISLATIVE SESSION AND IN ESSENCE STATES THAT "THE ALASKA BOARD OF EDUCATION CHAIR WILL GIVE AN ANNUAL REPORT TO THE LEGISLATURE WITHIN THE FIRST 30 DAYS OF THE SESSION."**

- **I AM DELIGHTED TO BE HERE, BECAUSE AS I HAVE TESTIFIED IN THE PAST, I LOOK FORWARD TO ANY OPPORTUNITY FOR OUR BOARD TO COMMUNICATE WITH THE LEGISLATURE.**

- **AND OF COURSE, FOR THOSE OF YOU WHO KNOW ME, THIS WILL COME AS NO SURPRISE, BUT I ALSO LOOK FORWARD TO THIS OPPORTUNITY TO GIVE COUNSEL TO MY SENATOR. I ALWAYS FEEL THAT GIVES HIM A HEADS UP FOR HIS BUSINESS IN THE COMING MONTHS!**

- **A WRITTEN REPORT HAS BEEN PROVIDED TO THE COMMITTEES, AND MY COMMENTS WILL SUMMARIZE HIGHLIGHTS FROM THAT REPORT.**

- **AFTER THE REPORT, I WILL BE HAPPY TO ENTERTAIN QUESTIONS.**

- **IN THE EVENT THAT I CAN'T ANSWER A QUESTION SATISFACTORALLY, I HAVE TERRIFIC BACK UP. COMMISSIONER HANLEY, DEPUTRY COMMISSIONER MORSE, AND MANY PEOPLE FROM THE DEPARTMENT OF EDUCATION SENIOR STAFF ARE HERE TO HELP ME GIVE YOU CLEAR AND CONCISE RESPONSES.**

ALASKA PERFORMANCE SCHOLARSHIP

- **THE IMPLEMENTATION OF THIS NEW SCHOLARSHIP HAS HAD THE ATTENTION OF THE BOARD AND THE DEPARTMENT FOR SEVERAL MONTHS, BUT ALL THE ATTENTION CONTINUES TO BE WORTH IT FOR THE OPPORTUNITY THAT IT PROVIDES FOR ALASKA STUDENTS.**

• THROUGH REGULATION THE BOARD ESTABLISHED ELIGIBILITY CRITERIA INCLUDING GPA, CUT SCORES ON THE SAT/ACT/WORK KEYS, QUALIFYING COURSES, WITH A PHASE IN SCHEDULE SO ALL DISTRICTS WOULD HAVE TIME TO BEEF UP CURRICULUM AS WELL AS GIVE SCHOLARSHIP OPPORTUNITIES TO STUDENTS WHO GRADUATED THIS PAST YEAR AND FOR THE NEXT TWO YEARS AND WHO WILL NOT HAVE HAD THE OPPORTUNITY TO ACCESS THE FINAL CREDIT REQUIREMENTS.

• ACCESS TO RIGOROUS COURSES CONTINUES TO BE A CONCERN OF THE BOARD, AND MANY STUDENTS ARE SUPPLEMENTING THEIR SCHOOL CURRICULUM WITH ON-LINE COURSES. THIS OPPORTUNITY NOT ONLY PROVIDES THE RIGOROUS CURRICULM DICTATED BY THE SCHOLARSHIP ELIGIBILTIY, BUT IT PROVIDES A STRONG AND POSITIVE LEARNING EXPERIENCE FOR OUR STUDENTS.

• IT IS ENCOURAGING TO KNOW THAT DISTRICTS AS SMALL AS HYDABURG WITH ONLY 4 GRADUATES HAVE STILL BEEN ABLE TO PROVIDE THE NECESSARY COURSES TO QUALIFY , AND IN FACT, DOES HAVE A STUDENT WHO QUALIFIED.

• THE BOARD APPROVED A NUMBER OF COURSE TITLES THAT WOULD FIT THE APS CRITERIA IN DECEMBER, AND AS SOON AS THEY GO THROUGH THE DEPARTMENT OF LAW AND LIEUTANENT GOVERNOR REVIEW, THEY WILL BECOME REGULATION.

• THE BOARD WILL CONTINUE TO MONITOR AND TWEEK THE IMPLEMENTATION OF THE APS AS ISSUES OR CONCERNS ARISE.

THIS YEAR:

• AS OF JANUARY 1, 2012, THE APS HAS AWARDED OVER $3 MILLION TO OVER 900 ALASKA HIGH SCHOOL GRADUATES FROM THE CLASS OF 2011.

• NEARLY 29% OF ALL PUBLIC HIGH SCHOOL GRADUATES IN 2011 WERE ELIGIBLE TO RECEIVE THE APS. OF THOSE ELIGIBLE, 36% TOOK ADVANTAGE OF THE APS FOR THEIR FIRST SEMESTER AFTER GRADUATING.

• CONSISTENT WITH THE STATE'S POPULATION DISTRIBUTION, SOUTHCENTRAL ALASKA HAD THE MOST STUDENTS ELIGIBLE TO RECEIVE AN APS. IN THE FAR NORTH AND INTERIOR—BERING STRAIT, NOME, NORTH SLOPE, AND NORTHWEST ARCTIC--- NEARLY ONE HALF OF ALL ELIGIBLE STUDENTS ARE USING THEIR SCHOLARSHIPS

• THE VAST MAJORITY OF AWARDS WENT TO STUDENTS WHO ENTERED UAA AND UAF TO STUDY FULL TIME TOWARD A BACHELOR'S DEGREE.

• IMPRESSIVELY, THE PERCENTAGE OF ALASKA GRADS WHO TOOK THE SAT OR THE ACT GREW FROM 77% IN 2010 TO AN UNHEARD OF 85% IN 2011.

• BASED UPON PRELININARY DATA FROM THE UNIVERSITY, APS STUDENTS WHO ENTERED THE UA SYSTEM WERE LESS LIKELY TO NEED REMEDIAL COURSES WHICH CERTAINLY MAKES A STATEMENT IN REGARD TO REQUIRED RIGOROUS CURRICULUM.

• AND MORE GOOD NEWS IS THAT DISTRICTS ARE REPORTING MORE STUDENTS ENROLLED IN MATH AND SCIENCE.

• SO IF THERE IS A QUESTION IN YOUR MIND IF YOU HAVE CREATED A GOOD THING, PLEASE BELIEVE ME THAT YOU TRULY HAVE.

ASSESSMENTS

• THE BOARD ADOPED SEVERAL AMENDENTS REGARDING WORK KEY ASSESSMENTS WHICH ARE CAREER READY TESTS GIVEN TO ALL 11TH GRADERS EACH YEAR. ACT WHICH OWNS WORK KEYS, HAS CREATED THOUSANDS OF JOB PROFILES WHICH ANALYZE SKILL LEVELS NEEDED FOR SPECIFIC JOBS, SO ASSESSED STUDENTS ARE ABLE TO COMPARE THEIR SKILL LEVEL WITH THE SKILL LEVEL OF THOSE JOBS. STUDENTS WITH QUALIFYING SCORES RECEIVE NATIONAL CAREER READINESS CERTIFICATES, AND THE TESTS MAY BE USED TO QUALIFY FOR THE ALASKA PERFORMANCE SCHOLARSHIP IF THE STUDENT IS GOING TO ATTEND A POST SECONDARY CERTICATE PROGRAM IN ALASKA.

• THE BOARD ALSO DECIDED THAT IT WAS THE IEP TEAM OF STUDENTS WITH SIGNIFICANT COGNITIVE DISABILITIES DECISION IF THE STUDENT SHOULD BE REQUIRED TO TAKE THE WORK KEYS ASSESSMENT. IN SEPTEMBER THE BOARD PUT OUT FOR PUBLIC COMMENT THE ALASKA SUPPLEMENT FOR WORK KEYS ASSESSMENT WHICH CLARIFIES THE APPROPRIATE USE OF ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES AND STUDENTS WITH LIMITED ENGLISH PROFICIENCY. FINAL ACTION WAS TAKEN JANUARY 2012.

• OF THE 9007 ALASKA STUDENTS WHO TOOK WORK KEYS IN THE 2010-2011 SCHOOL YEAR, 7665 (85%) EARNED A NATIONAL CAREER READINESS CERTIFICATE.

• BECAUSE WIDA ----WORLD CLASS INSTRUCTIONAL DESIGN AND ASSESSMENT----PROFICIENCY STANDARDS ARE RESEARCH BASED AND OF HIGH QUALITY, THE BOARD ADOPTED THE WIDA STANDARDS FOR ENGLISH LANGUAGE LEARNERS FOR PRE-KINDERGARTEN THROUGH GRADE 12.

• AND THE BOARD AND DEPARTMENT DO RESPOND TO OUR CONSTITUENCIES WHEN A REGULATION CAN BE IMPOVED UPON TO LIGHTEN THE BURDEN ON DISTRICTS AND TEACHERS. THE BOARD EXTENDED THE TIME FOR DISTRICTS TO DISTRIBUTE RESULTS OF THE STATE'S STANDARDS BASED ASSESSMENT (SBA's) AND THE HIGH SCHOOL GRAUATION QUALIFYING EXAM TO TEACHERS AS THE PREVIOUS 20 DAY DEADLINE WAS BURDENSOME.

• THE BOARD AMENDED TWO REGULATIONS REGARDING STATE ASSESSMENTS AND ADOPTED REVISED PARTICIPATION GUIDELINES FOR STUDENTS WITH DISABILITIES. THIS ALLOWED FOR RESPONSE TO SUGGESTIONS FROM STAKEHOLDERS, CONTINUED TO IDENTIFY NEW RESOURCES, AND PROVIDED FOR KEEPING UP TO DATE ON PRACTICES IN ACCOMMODATIONS.

• THE BOARD ADDRESSES SEVERAL HOUSE KEEPING ITEMS THROUGH OUT THE COURSE OF A YEAR INCLUDING THE CLARIFICATION THAT THE SBA IS THE ASSESSMENT USED FOR CALCULATING STUDENTS' PARTICIPATION RATE IN REPORTING ADEQUATE YEARLY PROGRESS.

• THE ONE ASSESSMENT THAT MANY OF YOU ARE INTERESTED IN IS THE HIGH SCHOOL GRADUATION QUALIFYING EXAM. IT TRULY IS A MINIMUM COMPETENCY TEST OF BASIC SKILLS, AND ONCE STUDENTS HAVE PASSED IT, THEY KNOW THAT THEY CAN MOVE ALONG WITH THEIR CURRICULUM. IF A STUDENT DOES NOT PASS, THEN HE/SHE KNOWS WHAT AREAS MUST BE ADDRESSED FOR ADDITIONAL WORK. AFTER MUCH DELIBERATION, THE BOARD VOTED TO RECOMMEND KEEPING THE HSGQE FOR SEVERAL REASONS: IT DOES GIVE STUDENTS A BASE LINE IN BASIC SKILLS, AND IN THIS DAY OF ACCOUNTABILITY, IT IS ANOTHER INFORMATION TOOL THAT CAN BE USED TO ADJUST PROGRAM AND/OR A STUDENT'S CURRICULUM ROAD MAP. THE BOTTOM LINE IS THAT IT DOES SHOW THAT STUDENTS HAVE DEMONSTRATED MINIMUM COMPETENCIES IN ESSENTIAL SKILLS NEEDED TO FUNCTION IN OUR SOCIETY.

• IN THE 2010-2011 HSGQE, 83% OF GRADE 10 STUDENTS PASSED READING, 71% PASSED WRITING, AND 76.9% PASSED MATH. STUDENTS HAVE FURTHER OPPORTUNITIES TO PASS THE EXAM IN GRADES 11 AND 12 AND AFTER LEAVING HIGH SCHOOL.

ADEQUATE YEARLY PROGRESS

• FOR THE PURPOSE OF REPORTING ADEQUATE YEARLY PROGRESS, THE BOARD AMENDED A REGULATION TO ALLOW DISTRICTS TO INCLUDE IN THE LIMITED ENGLISH PROFICIENCY SUBGROUP THOSE STUDENTS WHO EXITED THE PROGRAM IN THE PRIOR TWO YEARS SO DISTICTS COULD HAVE CREDIT FOR SUCCESSFULLY TRANSITIONING STUDENTS OUT OF THE PROGRAM.

• THE BOARD WAS BRIEFED ON SCHOOL AND DISTRICT ADEQUATE YEARLY PROGRESS RESULTS AT THE SEPTEMBER MEETING. THREE CHANGES TO THE CALCULATION OF 2011 DATA SIGNIFICANTLY AFFECTED THE RESULTS:

• PERCENTAGE OF STUDENTS WHO SHOULD BE PROFICIENT INCREASED FROM 77.18% TO 82.88% IN LANGUAGE ARTS; FROM 66% TO 74.57% IN MATH. PLEASE REMEMBER THAT ACCORDING TO THE FEDS, WE WILL BE 100% PROFICIENT BY 2014! I HAVE BEEN IN THIS BUSINESS A VERY LONG TIME, AND TRUST ME, I HAVE NEVER SEEN 100% OF ANYTHING!

TEACHER CERTIFICATION/TEACHER QUALITY

• THE BOARD ADOPTED SEVERAL AMENDMENTS TO REGULATIONS PERTAINING TO TEACHER CERTIFICATION.

• BRIEFLY, THE BOARD REQUIRED TEACHERS MOVING FROM AN INITIAL (3 YEAR) CERTIFICATE TO A PROFESSIONAL (FIVE YEAR RENEWABLE) CERTIFICATE TO HAVE BEEN EMPLOYED AS A TEACHER FOR AT LEAST TWO YEARS. THOSE WHO HAVE NOT TAUGHT FOR TWO YEARS MAY APPLY FOR ANOTHER INITIAL CERTIFICATE. THE BOARD FELT STRONGLY THAT NO ONE SHOULD HOLD THE STATE'S PROFESSIONAL TEACHER CERTIFICATE WITHOUT HAVING WORKED AS A TEACHER FOR AT LEAST TWO YEARS.

• BECAUSE THE STATE GIVES TEACHERS AN INITIAL PERIOD TO COMPLETE CREDITS BEFORE RECEIVING A PROFESSIOINAL CERTIFICATE, THE BOARD ADOPTED AN AMENDMENT THAT WILL NO LONGER REQUIRE EDUCATORS SEEKING PROVISIONAL (2 YEAR) ADMINISTRATIVE, SPECIAL EDUCATION ADMINISTRATIVE AND SPECIAL SERVICES CERTIFICATES TO COMPLETE SIX SEMESTER HOURS OF CREDIT BEFORE RECEIVING THE CERTIFICATE. THOSE CREDITS MUST BE COMPLETED BEFORE THE NEXT STAGE OF CERTIFICATION HOWEVER.

• THE BOARD ALSO ACTED UPON THE RECOMMENDATION OF THE TEACHER QUALITY WORKING GROUP TO :

• CHANGE THE NAME OF VOCATIONAL EDUCATION TO CAREER AND TECHNICAL EDUCATION; REQUIRE DISTRICTS TO MAKE AVAILABLE TO THE PUBLIC THE BLANK FORMS USED IN TEACHER AND ADMINISTRATOR EVALUATION; REQUIRE DISTRICT EMPLOYMENT APPLICATIONS TO REQUIRE TEACHERS TO DISCLOSE ANY PRIOR TEACHING EXPERIENCE IN ALASKA.

• THE BOARD ALSO APPROVED TEACHER PREPARATION PROGRAMS FOR ELEMENTARY K-5 MATH AT THE UNIVERSITY OF ALASKA SOUTHEAST, FOR AN ELEMENTARY ENDORESEMENT AT ALASKA PACIFIC UNIVERSITY, AND ADDED AN ENDORESMENT IN THE CAREER AND TECHNICAL EDUCATION CERTIFICATE PROGRAM AT THE UNIVERSITY OF ALASKA ANCHORAGE.

• ALASKA'S TYPE M CERTIFICATE MUST BE INITIATED BY A DISTRICT WHO WANTS TO HIRE AN INDUSTRY PROFESSIONAL WHO HAS NOT MATRICULATED THROUGH A TEACHER PREPARATION PROGRAM. THE ASD MIGHT WANT TO HIRE A WELDER TO TEACH WELDING FOR EXAMPLE. THERE IS A REGULATION THAT IS NOW UNDER REVIEW BY THE DEPARTMENT OF LAW THAT REQUIRES CTE ENDORSED TYPE M TEACHERS TO DEMONSTRATE COMPETENCY IN READING, WRITING, AND MATH BY PASSING THE PRAXIS 1 WITHIN ONE YEAR OF OBTAINING THE CERTIFICATE AND TO DEMONSTRATE INSTRUCTIONAL SKILLS.

• IN ORDER TO RENEW A TYPE M LIMITED CTE CERTIFICATE FOR FIVE YEARS, THE LOCAL SCHOOL BOARD MUST SUBMIT ON THE APPLICANT'S BEHALF A RENEWAL APPLICATION WHICH CONTAINS THE EVIDENCE OF THE FOLLOWING:

- THREE SEMESTER HOURS OF CREDIT RELATED TO THE APPLICANT'S EMPLOYMENT

- 135 HOURS OF WORK EXPERIENCE IN THE SPECIALITY FIELD OUTSIDE OF WORK WITH STUDENTS.

- A STATEMENT OF SATISFACTORY TEACHING PERFORMANCE UNDER THE LIMITED CERTIFICATE.

• THESE NEW REGLUATIONS ONLY APPLY TO THE TYPE M LIMITED CTE CERTIFICATE. TEACHERS IN THE SPECIALITY AREAS OF ALASKA NATIVE LANGUAGE OR CULTURE AND ROTC ARE EXEMPT.

• AND THE BIGGIE! FOR RECERTIFICATION, TYPE A CERTIFICATED TEACHERS MUST TAKE CREDITS IN SUBJECTS RELATED TO THEIR EMPLOYMENT, ENDORSEMENT AREA, OR PROGRAM LEADING TO AN ENDORSEMENT. BELIEVE IT OR NOT, THIS HAS NOT BEEN A REQUIREMENT FOR RECERTIFICATION IN THE PAST.

STATE STANDARDS

• ONE OF THE CONSTITUTIONAL RESPONSIBILITIES OF THE STATE IS TO SET PROPER STANDARDS FOR ITS STUDENTS.

• THE STATE BOARD OF EDUCATION HAS SET THE DIRECTION FOR DEVELOPING AND IMPLEMENTING STUDENT STANDARDS FOR NEARLY 20 YEARS. STUDENT STANDARDS CURRENTLY INCLUDE BROAD CONTENT STANDARDS AND DETAILED GRADE LEVEL EXPECTATIONS; ENGLISH LANGUAGE PROFICIENCY STANDARDS; ALTERNATE PERFORMANCE STANDARDS FOR STUDENTS WITH SIGNIFICANT COGNITIVE DISABILTITIES, AND CULTURAL STANDARDS.

• SINCE FEBRUARY 2010, THE DEPARTMENT, ALASKA EDUCATORS, AND INDUSTRY REPRESENTATIVES HAVE ENGAGED IN A PROCESS TO REPLACE THE CURRENT CONTENT STANDARDS IN READING, WRITING, AND MATH WITH MORE RIGOROUS GRADE LEVEL STANDARDS. THE FOCUS HAS BEEN TO ENSURE THAT THE STANDARDS OUTLINE A PATH FOR STUDENTS TO GRADUATE HIGH SCHOOL COLLEGE-READY AND CAREER-READY, AND THE NEW ALASKA STANDARDS WLL BE INCLUSIVE OF ALL GRADES K-12 UNLIKE THE CURRENT K-10 STANDARDS. THE REVISION OF GRADE LEVEL EXPECTATION WILL FOLLOW AFTER THE STANDARDS ADOPTION BY THE BOARD.

• UNDOUBTEDLY, YOU ARE AWARE OF THE COMMON CORE STANDARDS THAT HAVE COME DOWN AS A NATIONAL MOVEMENT. MANY STATES HAVE ADOPTED THESE STANDARDS, BUT ALASKA DID NOT. WE DECIDED EARLY ON THAT WE WOULD USE OUR ALASKA STANDARDS AS A BASE LINE TO IMPROVE AS WELL AS COMPARE TO THE COMMON CORE. WHAT HAS BEEN DEVELOPED IS MORE RIGEROUS THAN THE COMMON CORE, AND THE DEVELOPMENT HAS BEEN DONE BY ALASKANS FOR ALASKAN STUDENTS.

• I WOULD LIKE TO GIVE YOU A BRIEF CHRONOLOGY OF STANDARD DEVELOPMENT SO THAT YOU FULLY UNDERSTAND THAT THESE STANDARDS WERE NOT SIMPLY CREATED BY THE BOARD OR THE DEPARTMENT BUT INDEED, ARE A PRODUCT OF ALASKANS FROM EDUCATION, INDUSTRY, AND THE COMMUNITY.

• BETWEEN FEB. 2010 AND NOV. 2010, A STANDARDS REVIEW COMMITTEE WAS FORMED. THIS COMMITTEE WAS MADE UP OF K-12 EDUCATORS, AND THEY MET TO COMPARE ALASKA STANDARDS WITH THE COMMON CORE STANDARDS.

• FROM JAN. 2011 THROUGH NOV. 2011, INPUT WAS GATHERED FROM ENGLISH/LANGUAGE ARTS TEACHERS GRADES 3-12; MATH TEACHERS GRADES 3-12; SPECIAL EDUCATION TEACHERS, OTHER EXPERIENCED EDUCATORS, COACHES FROM THE STATE SYSTEM OF SUPPORT, UNIVERSITY FOLK, CTE PROGRAM TEACHERS AND INDUSTRY REPRESENTATIVES.

• REPRESENTATIVES WHO WORK WITH STUDENTS WITH DISABILITIES, ENGLISH LANGUAGE LEARNERS, ECONOMICALLY DISADVANTAGED STUDENTS, AND STUDENTS FROM ETHNIC SUBGROUPS MET TO ENSURE THAT ALL HAVE EQUAL ACCESS TO THE NEW ALASKA STANDARDS.

• THE NEW ALASKA STANDARDS:

- ARE ALIGNED WITH COLLEGE-READY AND WORK-READY TRAINING EXPECTATIONS
- INCLUDE RIGOROUS CONTENT AND APPLICATION OF KNOWLEDGE THROUGH HIGHER-ORDER SKILLS
- BUILD UPON STRENGTH AND LESSONS OF CURRENT STATE STANDARDS
- EQUAL OR MORE RIGOROUS THAN THE COMMON CORE STANDARDS
- RELATE TO REAL WORLD APPLICATION

• AT NO TIME IN THE DESIGN OF THE ALASKA STANDARDS WERE THEY ALLOWED TO DIP BELOW THE RIGOR OF THE COMMON CORE.

• AT THE DECEMBER, 2011, MEETING OF THE BOARD OF EDUCATION, A MOTION WAS PASSED TO OPEN UP AN EXTENDED PEROD OF PUBLIC COMMENT FOR THE DRAFT ALASKA CAREER-READY AND COLLEGE READY STANDARDS. AFTER REVIEWING AND DISCUSSING ALL PUBLIC COMMENT, THE BOARD ANTICIPATES TAKING FINAL ACTION ON THE STANDARDS IN JUNE, 2012.

• NEW STANDARDS WILL MEAN NEW ASSESSMENTS, SO WORK BEGINS ON THAT ASPECT IMMEDIATELY. STUDENTS WILL MOST LIKELY NOT BE ASSESSED ON THE NEW STANDARDS UNTIL SPRING 2016.

GRADUATION RATE

• ALASKA'S GRADUATION RATE METHODOLOGY HAS RECENTLY CHANGED TO REFLECT A FEDERAL MANDATE REQUIRING ALL 50 STATES TO USE A UNIFORM GRADUATIOIN RATE THAT IS TO BE REPORTED FOR ALL PUBLIC HIGH SCHOOLS.

• I WILL NOT PRESUME TO TAKE YOU THROUGH THAT PROCESS BECAUSE I WOULD ONLY GET YOU AS CONFUSED AS I AM; HOWEVER, MR. MCCORMICK, DIRECTOR OF ASSESSMENT AND ACCOUNTABILITY IS HERE, AND HE COULD ADDRESS ANY QUESTIONS AT THE CONCLUSION OF MY REMARKS.

• GRADUATION RATES ARE CALCULATED ACROSS 4 YEARS. DROPOUT RATES ARE CALCULATED OVER 1 YEAR AND BECAUSE THE TWO RATES ARE CALCULATED INDEPENDENTLY, THEY ARE NOT THE INVERSE OF EACH OTHER. MOST PEOPLE WILL TELL YOU THAT IF A STUDENT DID NOT GRADUATE FROM HIGH SCHOOL, HE/SHE IS A DROP OUT, AND THAT IS NOT NECESSARILY TRUE.

• I AM HAPPY TO REPORT THAT OUR GRANDUATION RATE HAS INCREASED SIGNIFICANTLY OVER THE PAST 7 YEARS. 2011 GRADUATION RATE WAS 68% IN COMPARISON TO 2005 AT 61%.

MENTOR PROGRAM

• TEACHER RETENTION IN RURAL ALASKA IS A VERY REAL ISSUE. WHEN JIM HICKERSON WAS SUPERINTENDENT AT BERING STRAIT, HE TOLD ME THAT 85% OF THEIR TEACHERS COME FROM OUTSIDE. THERE ARE SO MANY ISSUES FOR THEM TO DEAL WITH: A WHOLE NEW CULTURE, ISOLATION, COLD, TRANSPORTATION, ETC., THAT MANY SPEND THE YEAR AND LEAVE.

• IN 2004, THE MENTORSHIP PROGRAM WAS INITIATED TO INCREASE TEACHER RETENTION BY HELPING NEW RURAL TEACHERS BECOME MORE EFFECTIVE IN THEIR INSTRUCTIONAL PRACTICES WITHIN THEIR FIRST 2 YEARS IN THE CLASSROOM.

• YOU AND I TALKED BRIEFLY LAST YEAR ABOUT THE BUDGET CUTS TO THIS PROGRAM. THIS PROGRAM DOES HAVE A POSITIVE IMPACT ON TEACHER RETENTION AND A PROMISING IMPACT ON STUDENT ACHIEVEMENT.

• THIS SCHOOL YEAR, 24 MENTORS (DOWN FROM 28 LAST YEAR) ARE WORKING WITH 330 TEACHERS (DOWN FROM 401 LAST YEAR) IN 142

SCHOOLS (DOWN FROM 187 SCHOOLS LAST YEAR) IN 34 SCHOOL DISTRICTS (DOWN FROM 43 LAST YEAR).

• THIS PROGRAM DOES WORK! FROM AN AVERAGE RURAL TEACHER RETENTION RATE OF 68%, THE MENTORED TEACHERS HAVE RETAINED AT 84% IN 2010-2011.

• AT THE AMERICAN EDUCATION RESEARCH ASSOCIATION CONFERENCE ON MAY 4, RESULTS WERE PRESENTED THAT SHOW THAT ALTHOUGH MENTORING NEW TEACHERS DID NOT BRING THE STUDENTS' STANDARDIZED SCORES OF NEW TEACHERS UP TO THE SAME LEVEL AS STUDENTS IN VETERAN TEACHERS' CLASSES, THEY ARE MUCH CLOSER THAN EXPECTED FOR READING, WRITING, AND SCIENCE.

• IN THE CASE OF MATH, STUDENTS IN CLASSROOMS OF MENTORED TEACHERS PERFORM THE SAME AS THOSE IN CLASSROOMS OF VETERAN TEACHERS.

• THERE ARE PROMISING RESULTS TO START CLOSING THE ANCHIEVEMENT GAP TYPICALLY SEEN BETWEEN THE STUDENTS OF NEW AND VETERAN TEACHERS.

• THROUGH A GRANT FROM THE US DEPARTMENT OF EDUCATION, EDUCATION NORTHWEST AND UA STATEWIDE WILL EVALUATE THE EFFECTS OF MENTORING ON TEACHER RETENTION AND TEACHER EFFECTIVENESS AND STUDENT ACHIEVEMENT. THE DETAILS FOR THIS EVALUATION ARE NOW BEING WORKED OUT.

EARLY LEARNING

• THERE IS A WHOLE LOT GOING ON IN THIS ARENA. IN 2009, THE LEGISLATURE PROVIDED $2 MILLION FOR A PILOT PRE-KINDERGARTEN PROGRAM THAT WOULD INCLUDE SIX SITES. PROPOSALS FROM DISTRICTS WERE SUBMITTED AND SIX SITES WERE SELECTED. THE LEGISLATURE THEN ADDED TWO ADDITIONAL SITES. THE PURPOSE WAS TO ALLOW VARIED SCHOOL DISTRICTS TO CREATE PRESCHOOL PROGRAMS THAT INCORPORATE ALASKA'S EARLY LEARNING GUIDELINES IN WAYS TAILORED TO THEIR LOCAL COMMUNITIES.

• THE TWO YEAR REPORT WAS A PART OF THE BOARD PACKET FOR OUR JANUARY TELECONFERENCE. I AM NOT GOING TO GO THROUGH ALL THE FINDINGS EXCEPT TO STATE THAT MANY CHILDREN SHOWED

EXCEPTIONAL GROWTH, BUT THERE ARE STILL CHILDREN PERFORMING BELOW EXPECTATIONS.

• FOR ALL ALASKA'S CHILDREN TO CLOSE THE GAP BY THEIR THIRD GRADE ASSESSMENTS , CONTINUOUS GROWTH MUST BEGIN IN EARLY CHILDHOOD AND BE SUSTAINED THROUGH THE PRIMARY GRADES.

• COOPERATON AND COLLABORATION BETWEEN HEAD START AND SCHOOL DISRICTS POSITIVELY AFFECTS THE LEARNING AND DEVELOPMENT OF YOUNG CHILDREN.

• THE BOARD ENDORSED THE DEPARTMENT'S FAMILY ENGAGEMENT PLAN WHICH INCLUDES ACTION STEPS FOR PARENTS, TEACHER AND COMMUNITY MEMBERS THAT WILL ULTIMATELY IMPACRT STUDENT ACHIEVEMENT. THIS IS IN CONJUNCTION WITH THE EARLY LITERACY PLAN THAT PROVIDES ACTIONS THAT PARENTS, CAREGIVERS, PRESCHOOL TEACHERS, AND COMMUNITY MEMBERS CAN DO THAT WILL HELP STUDENTS COME TO SCHOOL READY TO LEARN.

• I HAVE TO TELL YOU LADIES AND GENTLEMENT, THAT I AM CONVINCED THAT SCHOOL READINESS AND PARENT INVOLVEMENT COUPLED WITH QUALITY TEACHERS ARE THE ONLY THINGS THAT WILL POSITIVELY IMPACT STUDENT ACHIEVEMENT.

STATE SYSTEM OF SUPPORT

• THROUGHOUT THE YEAR, THE BOARD HEARD REPORTS ON STATE SYSTEM OF SUPPORT ACTIVITIES: THE THIRD LEADERSHIP INSTITUTE AND THE ALASKA LITERCY INSTITUTE, WHICH WAS SPONSORED FOR INTERVENTION DISTRICTS AND INCLUDED REPRESENATIVES FROM PRE-K PROGRAMS AND HEAD START PROGRAMS; THE CURRICULOUM EXPOSURE ANALYSIS DONE BY THE STATE; AND ACTIVITIES OF THE YUPIIT SCHOOL DISTRICT.

THE BOARD RECEIVED UPDATES TO THE DEVELOPMENT OF A RUBRIC ON CULTURAL STANDARDS FOR EDUCATORS AS A FOLLOW UP TO OUR ADOPTION OF THIS SECTION FROM THE PUBLICATION "ALASKA STANDARDS FOR CULTURALLY RESPONSIVE SCHOOLS."

THE DEPARTMENT IS RESPONDING TO ITS CONSTITUTIONAL RESPONSIBILITIES : FUNDING, STANDARDS, ASSESSMENTS, AND OVERSIGHT AND SUPPORT. WE ARE CURRENTLY INTERVENING IN THREE DITRICTS IN DIRECT RESPONSE TO THE OVER SIGHT

RESPONSIBILITY WHERE STUDETNS HAVE CHRONICALLY LOW PERFORMANCE. TWO DISTRICTS HAVE COME OUT OF THE INTERVENTION STATUS AFTER RAISING STUDENT PERFORMANCE AND BUILDING CAPACITY.

DISTANCE EDUCATION

- **ALASKA'S LEARNING NETWORK IMPROVES STUDENT ACHIEVEMENT BY PROVIDING DISTANCE COURSES TAUGHT BY HIGHLY QUALIFIED ALASKA TEACHERS; A NETWORK OF SUPPORT FOR EDUCATORS AND STUDENTS TO COLLABORATE AND SHARE RESOURCES IN A DIGITAL REPOSITORY; PROFESSIONAL DEVELOPMENT FOR TEACHERS. ALASKA'S LEARNING NETWORK PROVIDES RIGOROUS COURSES THAT MEET ELIGIBLITY REQUIREMENTS OF THE ALASKA PERFORMANCE SCHOLARSHIP.**

MT EDGECUMBE HIGH SCHOOL

- **MT. EDGECUMBE HIGH SCHOOL IS A STATE OPERATED BOARDING SCHOOL IN SITKA FOR APPROXIMATELY 400 HIGH SCHOOL STUDENTS FROM AROUND THE STATE. SEVENTY EIGHT PERCENT OF THE STUDENTS BODY SELF- IDENTIFY AS ALASKA NATIVE.**

- **THE STATE BOARD WHICH SERVES AS THE BOARD OF EDUCATION FOR MT. EDGECUMBE RECENTLY WORKED ON SOME CREDIT REQUIREMENT CHANGES WITH SUPERINTENDENT RANDY HAWK.**

- **IN ORDER FOR MT. EDGECUMBE STUDENTS TO MEET THE CREDIT REQUIREMENT OF THE ALASKA PERFORMANCE SCHOLARSHIP, THE BOARD REDUCED THE REQUIRED CREDITS IN SOCIAL STUDIES FROM 5 TO 4 AND ADDED A REQUIRED CREDIT OF EITHER SOCIAL STUDIES OR MATH OR SCIENCE BEYOND COURSES ALREADY REQUIRED. THE TOTAL NUMBER OF REQUIRED CREDITS REMAINS AT 24.**

END

- **IN NOVEMBER, COMMISSIONER HANLEY, DEPUTY COMMISSIONER MORSE, BOARD FIRST VICE CHAIR JIM MERRINER, AND I ATTENDED ANCHORAGE MAYOR DAN SULLIVAN'S TWO DAY EDUCATION SUMMIT.**

- **THE UPSHOT OF THE SUMMIT WAS EXACTLY WHAT OUR BOARD AND DEPARTMENT ARE DEDICATED TO :**

    - **WORLD CLASS LEADERSHIP: TEACHERS AND PRINCIPALS**

- **COMMUNITY ENGAGEMENT AND COMMITMENT**

- **GREATER EXPECTATIONS FOR STUDENT SUCCESS**

- **EXPAND CHOICE, OPPORTUNITY FOR ALL STUDENTS.**

- **WHERE HAVE YOU HEARD THAT BEFORE? SEEMS THAT WE ARE ALL ON THE SAME WAVE LENGTH WHICH BASICALLY IS PROVIDING THE BEST EDUCATIONAL OPPORTUNITY FOR EACH AND EVERY STUDENT IN OUR STATE.**

WHAT'S ON THE HORIZON?

- **TEACHER EVALUATION TIED TO STUDENT ACHIEVEMENT.**

- **IF WE ARE GOING TO WANT TO CONTINUE RECEIVING FEDERAL DOLLARS, THIS IS A REALITY. AND LADIES AND GENTLEMEN, IT IS A MUCH MORE CONVOLUTED IDEA THAN AT FIRST BLUSH, BUT THE TEACHER QUALITY COMMITTEE IS WRESTLING WITH THIS WHOLE CONCEPT AS WE SPEAK.**

- **CONTINUE TO MONITOR THE DEPARTMENT WORK WITH INTERVENTION DISTRICTS.**

- **DIALOGS WITH THE BOARD AND SUPERINTENDENTS OF INTERVENTION DISTRICTS.**

- **REPORT FROM DISTRICTS WHO HAVE EXITED INTERVENTION STATUS.**

- **HOW DID IT GO? WHAT WAS GOOD? WHAT COULD BE DONE BETTER?**

- **A BOARD SESSION ON STRATEGIC PLANNING**

- **CONTINUATION OF THE IMPLEMENTATION OF THE STATE CAREER/TECHNICAL EDUCATION PLAN.**

- **CERTAINLY MORE WORK ON THE NEW ALASKA STANDARDS AND THE ASSESSMENTS TO GO WITH THOSE STANDARDS.**

- **MONITOR AND/OR AMEND REGULATIONS AS NEEDED FOR THE APS.**

- **AND SENATORS AND REPRESENTATIVES.....**

• WHILE I STILL HAVE YOUR ATTENTION, I WANT TO TELL YOU ABOUT A BURR THAT HAS BEEN UNDER MY SADDLE BLANKET EVER SINCE I HAVE BEEN ON THIS BOARD, AND BELIEVE ME, I HAVE LEANED ON EVERY COMMISSIONER ABOUT THIS, BUT THERE IS AN OLD ADAGE: YOU CAN'T GET BLOOD OUT OF A TURNIP!

• I KNOW THAT REPRESENTATIVE DICK HAS QUESTIONED THE MAKE UP OF THE BOARD, BUT OUR BOARD HAD NOTHING TO DO WITH THAT. RIGHT HERE I WOULD LIKE TO CLEAR UP SOME MISINFORMATION. YOU HAVE BEEN TOLD THAT THE BOARD NEVER HAS HAD A MEMBER FROM A DISTRICT IN INTERVENTION. NORTHWEST ARCTIC WAS IN INTERVENTION STATUS, AND BUNNY SHAEFFER WAS A MEMBER OF THE BOARD THE WHOLE TIME. THE DISTRICT HAS COME OFF INTERVENTION, AND BOARDMEMBER SHAEFFER IS STILL ON THE BOARD.

• WE DO HAVE EVERYTHING TO DO WITH WHERE WE MEET, HOWEVER,

• THIS IS A STATEWIDE BOARD THAT WE ARE TALKING ABOUT, AND BECAUSE OF BUDGET CONSTRAINTS, WE ONLY MEET IN ANCHORAGE, FAIRBANKS (NOT OFTEN) AND JUNEAU. WE DID WANDER UP TO THE MAT-SU THIS YEAR, BUT IN ANYBODY'S DEFINITION, THAT IS NOT RURAL ALASKA.

• I THINK IT IS IMPERATIVE THAT THIS BOARD MEET IN RURAL ALASKA ONCE A YEAR

• IN MY TENURE ON THE BOARD, WE HAVE MET IN GALENA, KOTZEBUE, AND AT MT. EDGECUMBE. I TRULY THINK THAT THE ARGUMENT COULD BE MADE THAT THIS BOARD SHOULD ALSO MEET AT MT. EDGECUMB ONCE A YEAR. MEETING IN THESE PLACES WAS A GREAT EDUCATION FOR ALL THE BOARD MEMBERS. EVEN THOUGH WE ARE BROAD AND OPEN MINDED INDIVIDUALS, IT IS DIFFICLT TO REPRESENT THE DIVERSITY OF OUR STATE WHEN WE DON'T HAVE THE OPPORTUNITY TO EXPERIENCE IT.

• THE OPERATION OF THE BOARD FALLS WITHIN THE EXECUTIVE ADMINISTRATIVE PORTION OF THE DEPARTMENT'S BUDGET, AND SPECIFICALLY, THE TRAVEL PORTION HAS BEEN CUT. EVEN THOUGH OUR COMMISSIONER'S TRAVEL EXPENSES ARE DOWN FROM PREVIOUS YEARS, WE ARE UNABLE TO FIND IN THE DEPARTMENT'S BUDGET FUNDING FOR THIS BOARD TO GAIN A FIRST HAND UNDERSTANDING OF AREAS OF ALASKA IN WHICH WE DON'T LIVE OR MEET.

- **THE OBVIOUS QUESTIONS WILL BE AROUND COSTS AND WHY THE DEPARTMENT CANNOT TRAVEL THE BOARD IN THE CURRENT BUDGET. PERSONALLY, I CANNOT ANSWER ALL THOSE QUESTIONS, BUT I DO KNOW THAT FOR THE BOARD TO TRAVEL TO RURAL ALASKA WE ARE LOOKING AT $15-20,000. THAT DOES NOT INCLUDE DEPARTMENT STAFF.**

- **SO I WOULD ASK----NO, I WOULD IMPLORE YOU TO CONSIDER MY REQUEST DURING THIS LEGISLATIVE SESSION. IT CERTAINLY WOULD HELP US BECOME AN EVEN MORE EFFECTIVE BOARD.**

- **AND BEFORE I WRAP UP, I NEED TO TELL YOU THAT AS I PUT TOGETHER THIS REPORT, I WAS AMAZED AND PROUD OF WHAT THIS BOARD HAS ACCOMPLISHED. WE ARE A VOLUNTEER BOARD AND WE MEET FACE TO FACE FOUR TIMES A YEAR ONLY. I CONTINUE TO BE VERY PROUD TO SERVE.**

- **THANK YOU.**

- **QUESTIONS?**

Alaska State Constitution Education Clause

Section 7.1 - Public Education.
The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

Mission of the State Board of Education & Early Development

To ensure quality standards-based instruction to improve academic achievement for all students.

Regulations adopted/revised/repealed in 2011

Alaska Performance Scholarship

The Board adopted amendments to 4 AAC 43 regarding the Alaska Performance Scholarship. The Board allowed eligible students to receive an Alaska Performance Scholarship during a one-year grace period in which they complete the scholarship's curricular requirements. The Board also allowed school districts to receive state funding for courses taken by students who have a grace period. This provision will be in effect only in the scholarship program's first two years of existence. The rationale is that students in these first graduating classes could not know – and therefore fully prepare for -- the scholarship's credit requirements until the law had passed and regulations were adopted.

The Board adopted amendments to 4 AAC 43.030 regarding course requirements for the Alaska Performance Scholarship. The Board set the allowable courses for scholarship eligibility, and created a process for school districts to submit other courses for eligibility. The regulation would first take effect for the high school graduating class of 2015. The rationale is to maintain the intended rigor of the Alaska Performance Scholarship.

Standards and Assessment

The Board adopted amendments to 4 AAC 06.707 regarding the WorkKeys assessments, which are career-ready tests given to all 11th-graders each year. Students with qualifying scores receive national career-readiness certificates. The tests may be used to qualify for an Alaska Performance Scholarship if the student is going to attend a postsecondary certificate program. In the amendments, the Board required WorkKeys to be administered between August 1 and December 30 of each year, so that the scores will be available in time for scholarship determinations and the state's data-collection deadlines. Additionally, the Board will allow 12th-graders to take or retake the test once at no cost to the student or district. The rationale is that

12th-graders should be encouraged to improve their scores and possibly qualify for a career-readiness certificate or Alaska Performance Scholarship. The Board also allowed districts to determine whether students with significant cognitive disabilities should be required to take WorkKeys assessments. The rationale is that such students' individualized education program teams know best whether WorkKeys meets the students' needs.

The Board adopted amendments to 4 AAC 04.155 regarding standards for English language proficiency for students who are English language learners. The Board adopted the WIDA English Language Proficiency Standards, 2007 Edition, Pre-Kindergarten through Grade 12. The rationale is that Alaska has joined WIDA -- World Class Instructional Design and Assessment – a consortium of 27 states. WIDA standards are research-based and known for their high quality.

The Board amended 4 AAC 06.710 regarding the statewide student assessment system. The Board added the new English language proficiency assessment and WorkKeys to the list of assessments. House-keeping.

The Board amended 4 AAC 06.738 and 06.758 regarding state assessments. The Board extended the amount of time districts may take to distribute to classroom teachers results from the state's Standards Based Assessment and the High School Graduation Qualifying Examination. The rationale is that the previous deadline of 20 days was too burdensome to districts.

The Board amended 4 AAC 06.750 regarding state assessments. The Board changed the required grade levels to reflect the current grade levels assessed on the TerraNova assessment. House-keeping.

The Board amended 4 AAC 06.755 regarding state assessments. The Board designated the hours in which the High School Graduation Qualifying Examination would begin, and added clarifying language about test security. School districts asked the state to set the starting time.

The Board amended 4 AAC 06.761 regarding state assessments. The Board added a new section to consolidate multiple references to test security. House-keeping.

The Board amended 4 AAC 06.765 regarding state assessments. The Board added WorkKeys to the list of assessments whose contents are confidential. It also required districts to train relevant staff in test procedures. The rationale is to maintain high standards in test security.

The Board amended 4 AAC 06.771 regarding state assessments. The Board required re-tests of the High School Graduation Qualifying Examination to be administered under the same conditions as the original test. The rationale is to maintain high standards for test security and reliability.

The Board amended 4 AAC 06.775 and AAC 06.776 regarding state assessments. The Board adopted revised participation guidelines for students with disabilities. The rationale is to respond to suggestions from stakeholders, identify new resources, and keep up-to-date on practices in accommodations. Additionally, when districts determine testing accommodations for students

with limited English proficiency, they are required to include a teacher with experience in teaching students with limited English proficiency, when practicable. The rationale is to use the most qualified sources when serving students.

The Board amended 4 AAC 06.805 regarding state assessments. The Board clarified that the state Standards Based Assessment is the assessment used for calculating students' participation rate in reporting Adequate Yearly Progress under the No Child Left Behind Act. House-keeping.

Adequate Yearly Progress

The Board amended 4 AAC 06.830 regarding state assessments. The Board allowed districts, for the purposes of reporting Adequate Yearly Progress, to include in the limited-English-proficiency subgroup those students who exited the program in the prior two years. The rationale is to give credit to districts for successfully transitioning students out of the program.

School Finance

The Board adopted amendments to 4 AAC 09.160 regarding school districts' fund balances. The Board redefined the exceptions to the type of funds that may be in a district's year-end fund balance. The rationale was to align the state's regulation with the nationwide Governmental Accounting Standards Board's new criteria for classifying fund balances into specifically defined categories.

Teacher Certification

The Board adopted amendments to 4 AAC 12.305 regarding renewal of teacher certificates. The Board required teachers moving from an initial (three-year) certificate to a professional (five-year renewable) certificate to have been employed as a teacher for at least two years. Those who have not taught for two years may apply for another initial certificate. The rationale is that no one should hold the state's professional teacher certificate without having worked as a teacher for at least two years.

The Board adopted amendments to 4 AAC 12.345 regarding provisional certificates. The Board will no longer require educators seeking provisional (two-year) administrative, special education administrative and special services certificates to complete six semester hours of credit before receiving the certificate. Such educators still must complete the credits to receive the next stage of certification, which is a five-year certificate. The rationale is that the state similarly gives teachers an initial period to complete credits before receiving a professional certificate.

The Board adopted amendments to 4 AAC 12.405 regarding teacher certification. The Board mandated that teachers fulfill the college credits required for renewal of their certificates in subjects related to their employment, endorsement area, or program leading to an endorsement.

The rationale is that the credits should relate to subjects that the teacher teaches or intends to teach.

The Board adopted amendments to 4 AAC 12.370 regarding limited teacher certificates in specialty subjects, known as Type M. Such certificates may be granted when no teacher with a bachelor's degree in the specialty is available. The Board created new requirements for Career and Technical Education Type M certificates. The Board required CTE-endorsed Type M teachers to demonstrate competency in reading, writing and math within one year of obtaining the certificate and to demonstrate instructional skills. The rationale is that many students use career and technical courses for credit in core academic subjects.

Alaska State Museums

The Board amended 4 AAC 58.010 regarding fees at the Alaska State Museums. The Board increased the summer fee from $5 to $7 at the Alaska State Museum in Juneau, and from $4 to $5 at the Sheldon Jackson Museum in Sitka. However, the Board added a $1 discount to visitors age 65 and older. The rationale was to raise revenues to offset labor and operating costs.

Other

The Board repealed 4 AAC 05.070, which required districts to submit an Education Plan under an obsolete state accountability system. House-keeping.

Resolutions in 2011

There were none.

State Standards

The State Board of Education & Early Development has set the direction for developing and implementing student standards for nearly 20 years. Student standards currently include content standards, which are broad, and Grade Level Expectations, which are more detailed; English language proficiency standards; alternate performance standards for students with significant cognitive disabilities; and cultural standards.

The standards for English language arts and mathematics were last revised in 2005. The department's contract for assessments aligned to those standards expires in 2015. Since February 2010, the department, Alaska educators and industry representatives have engaged in a process to replace the current content standards and Grade Level Expectations in reading, writing and math with rigorous grade-level standards. The focus has been to ensure that the standards outline a path for students to graduate high school college-ready and career-ready. The new Alaska standards will be inclusive of all grades, K-12, unlike the current K-10 standards.

In developing the proposed new standards, the department has held the following meetings:

February 2010 – Met with the newly established Standards Review Committee to compare and contrast the current Grade Level Expectations with the national Common Core Standards (recently adopted by many states) for reading/literature, math and writing. The Standards Review Committee consisted of K-12 educators from across Alaska who have an in-depth knowledge of, and experience with, reading, writing and math standards.

October 2010 – Met with the Standards Review Committee and participants of the August 2010 Content Item Review Committee. Together, they reviewed in greater detail the Common Core Standards and identified considerations when transitioning to new standards, such as the need for professional development for teachers.

November 2010 – Met with personnel working in state universities and vocational programs, industry representatives, and high school staff to assist the department in defining what it would take for high school graduates to be prepared to go to college or enter the workforce.

January 2011 – Met with English/language arts teachers in grades 3-12, special education teachers, and English language learner teachers to determine how to refine Alaska's standards so that students are on track to be college-ready and career-ready as they move on to high school.

February 2011 - Met with math teachers in grades 3-12, special education teachers, and English language learner teachers to determine how to refine Alaska's standards so that students are on track to be college-ready and career-ready as they move on to high school.

June 2011 – Met with experienced educators and coaches from the State System of Support, which works with struggling districts, to review recommended revisions to the Alaska standards with a focus on coherence, alignment and clarity.

October 2011 – Met with K-12 English/language arts and math teachers, librarians, and high school career/technology instructors to further refine the new Alaska standards to be college-ready and career-ready.

November 2011 – Met with representatives working with students with disabilities, English language learner students, economically disadvantaged students, and students from ethnic subgroups to ensure that all learners will have equal access to the new Alaska standards.

The Board was briefed on the status of the standards-revision process at each of the quarterly meetings in 2011, culminating with a review of the draft career-ready and college-ready standards in English language arts and mathematics at the December 2011 meeting. The Board opened a period of public comment for the draft standards. The Board anticipates taking final action on the standards in June 2012. If the standards are adopted, students likely will not be assessed on them until spring 2016 at the earliest.

Graduation Rate

The state's graduation rate methodology has recently changed to reflect a federal mandate requiring all 50 states to use a uniform graduation rate that is to be reported for all public high schools. This rate, known as the Four Year Adjusted Cohort Graduation Rate, was first implemented in Alaska with the 2010-2011 school year. All states are required to use the new adjusted cohort graduation rate for accountability purposes in the 2011-2012 school year. Specifically, the accountability measures would include Adequate Yearly Progress calculations at the school, district and state level as well as public reporting of school district report card data.

Under this new methodology, a cohort graduation year is assigned to each ninth-grade student in the fall of his or her initial entry. The expectation of the adjusted cohort graduation rate is that the student will graduate within four years. For example, a student who entered ninth grade in the 2009-2010 school year would be considered part of the 2013 graduation cohort group. Students are included in the cohort if they transfer into the public school system, and are removed from the cohort if they transfer to an education program with a secondary school diploma track.

A graduate is defined as a student who has received a regular diploma from a state-approved or district- approved education program as evidenced by receipt of a secondary school diploma from school authorities. Any student that receives a diploma under a waiver from the competency examination required under AS 14.03075(a), as specified by the state Board, is considered to be a graduate. This does not include a student who receives a Certificate of Achievement or a General Educational Development certificate.

The Adjusted Cohort Graduation Rate is reported as a fraction. The numerator is the sum of the number of graduates within the cohort who receive a regular diploma on or before June 30. The denominator is the sum of all students assigned to the cohort. The statewide count of high school graduates has increased significantly over the last seven years.

School Year	Graduation Rate*	Graduate Count
2005	61.4%	6,905
2006	61.6%	7,361
2007	63.0%	7,666
2008	62.6%	7,855
2009	67.5%	8,008
2010	67.4%	8,245
2011	68.0%	8,060**

*Note: Prior to the 2011 school year, the graduation calculation used the methodology below: *The Graduation Rate is reported as a fraction. The numerator is the sum of the number of graduates receiving a regular diploma before June 30. The denominator is the sum of the number of graduates, plus the number of dropouts in grade nine three school years prior, plus the number of unduplicated dropouts in grade ten two school years prior, plus the number of*

unduplicated dropouts in grade eleven in the prior school year, plus the number of unduplicated dropouts in grade 12 during the current year, plus the number of grade 12 continuing students. **Graduate count represents any student who graduated with a regular diploma during the school year (July 1-June 30).

There is often confusion between graduation rates and dropout rates. Dropout rates are event rates, meaning they are calculated across a single year. The graduation rates are measures of cohort groups across four years. Dropout rates are calculated by dividing the total number of students dropping out of public school in grades 7-12 by the October 1 enrollment count for all students in grades 7-12. Graduation rates and dropout rates are calculated independently from each other and are not the inverse of each other. Also, a student counted as a dropout in one reporting year may be counted as a dropout in another year.

Assessments

Public school students in Alaska are required to pass the High School Graduation Qualifying Examination -- in addition to meeting minimal state and local curriculum credit requirements -- in order to obtain a high school diploma. The Board discussed the relevancy of the HSGQE to Alaska's students, options for high-stakes testing, and the impact of the HSGQE on graduation rates across the state. In September 2011, the Board agreed to continue support of the HSGQE. The exam was supported both as a measure of student accountability and as an indicator that a student receiving a diploma has demonstrated minimum competencies in essential skills needed to function in our society.

The Board has engaged in multiple work sessions and conversations related to the relevancy and use of each assessment required by law in Alaska's Comprehensive State System of Assessment. In addition to the HSGQE, specific discussions were conducted regarding the Standards Based Assessments, the Development Profile, the TerraNova, WorkKeys, the alternate assessment for students with severe cognitive disabilities, the English language proficiency exam, and the federally required National Assessment of Educational Progress test.

The Board was briefed on preliminary 2011 HSGQE and Standards Based Assessment results at the June meeting. Passage of all three sections of the HSGQE is required in order for a student to receive a high school diploma. The Standards Based Assessment is required by federal law and is the primary assessment used to calculate Adequate Yearly Progress in the No Child Left Behind accountability system.

In the HSGQE, 83.4% of the grade 10 students passed reading, 71.1% passed writing, and 76.9% passed math. Students have two further opportunities each year to pass the exam in grades 11 and 12 and after leaving high school.

In the Standards Based Assessment in reading, grade-level scores ranged from 74.3% proficient in grade 4 to 83.3% proficient in grade 8.

In the Standards Based Assessment in writing, grade-level scores ranged from 70.4% proficient in grade 6 to 77.0% proficient in grade 8.

In the Standards Based Assessment in math, grade-level scores ranged from 60.1% proficient in grade 9 to 75.2% proficient in grade 4.

The Board was briefed on school and district Adequate Yearly Progress results at the September meeting. Three changes to the calculation of 2011 data significantly affected the results: The targets for the percentage of students who should be proficient increased from 77.18% to 82.88% in language arts and from 66.09% to 74.57% in math. Also, the newly adopted Four Year Adjusted Cohort Graduation Rate went into effect in 2011.

In 2011, 12 of 54 districts met Adequate Yearly Progress (22%), a reduction of eight districts from 2010. In 2011, 231 schools met Adequate Yearly Progress (45.7%) and 274 schools did not meet. This marked a decrease of 74 schools meeting Adequate Yearly Progress from 2010.

WorkKeys

WorkKeys is a career-ready assessment that measures fundamental skills employers have identified as critical to success in the workforce. WorkKeys is owned by the not-for-profit American College Testing (ACT) organization. For WorkKeys, ACT created thousands of job profiles, which analyze the level of skills needed for entry to specific jobs. Assessed students are able to compare their skill level with the skill level of those jobs.

The Board had previously approved the implementation of WorkKeys as a tool to measure the career-readiness of students preparing to transition from high school to higher education and employment. The Board held multiple work sessions to discuss the need for the assessment in our public school system. Students in Alaska are required to take this assessment in the 11th grade, and they have the option to re-take the assessment in the 12th grade. The assessment requirement first went into effect during the 2010-2011 school year. Additionally, in 2010 the Board approved the use of WorkKeys as a qualifying assessment for the Alaska Performance Scholarship for those students who are seeking a career or technical certificate in their postsecondary education.

In Alaska, students participate in three WorkKeys assessments: Applied Mathematics, Reading for Information, and Locating Information (in visual formats). Students who attain qualifying scores on the three assessments receive ACT's National Career Readiness Certificate. The certificate is a nationally recognized credential that indicates ACT's assurance that an individual has certain skills that are important across a range of jobs. The higher the level of skills attained, the more jobs for which the individual can expect to be considered. Dozens of employers in Alaska currently either require, request or recognize the certificate or WorkKeys assessments in their hiring or placement processes.

Of the 9,007 Alaska students who took WorkKeys in the 2010-2011 school year, 7,665 (85%) earned a National Career Readiness Certificate. Twenty-one percent of all test-takers received a bronze certificate; 42.6% received a silver certificate; 21% received a gold certificate; and 0.5% received a platinum certificate.

In September 2011, the Board approved the Alaska Supplement for WorkKeys Assessment, 2011 edition. The supplement clarifies the appropriate use of accommodations for students with disabilities and students with limited English proficiency. It is a supplement to the Participation Guidelines for Alaska Students in State Assessments.

Mentor Programs

In response to high teacher turnover in parts of the state, the department in 2004 created the Alaska Statewide Mentor Project in partnership with the University of Alaska and school districts. The Board continues to support the project's efforts to increase teacher retention and help ensure that teachers new to the profession are supported in becoming more effective in their instructional practices within their first two years in the classroom.

Similarly, the department's Administrative Coaching Program helps new school administrators in their first two years understand the context in which they work and become effective instructional leaders who support teachers and students as they work toward increasing achievement levels.

This school year, 12 administrator coaches are serving 76 principals and four superintendents. In the previous school year, 12 administrator coaches served 78 principals and 11 superintendents. Additionally, in each of these school years, 15 University of Alaska Anchorage interns receive services through the Rural Administrator Principal Preparation and Support grant in conjunction with the Alaska Staff Development Network.

In June, the Board discussed the Legislature's cuts to the mentor program. Discussion revolved around the program's impact on teacher and principal retention and the promising impact on student achievement. For example, in mathematics, Alaska students in classrooms of mentored teachers perform the same as those in classrooms of veteran teachers, according to a study published in 2010. Board members suggested the department present more program data to the Legislature. This school year, 24 mentors are working with 330 early-career teachers in 142 schools in 34 school districts. In the previous school year, 28 mentors served 401 teachers in 187 schools in 43 districts.

Teacher Quality

The Board has discussed teacher quality at length this year and considered recommendations from the Teacher Quality Working Group (convened by the department) regarding teacher

quality, certification, and preparation. Recognizing the impact that high-quality teachers have on student achievement, the Board acted on the recommendations of the working group to:

- Amend teacher certification regulations to clarify the requirements to renew teacher, administrator and special services certificates; change the name of the Vocational Education Endorsement to Career and Technical Education; require districts to make available to the public the blank forms used in teacher and administrator evaluation; and require district employment applications to require teachers to disclose any prior teaching experience in Alaska.

- Approve teacher preparation programs for Elementary K-5 Math at the University of Alaska Southeast and for an Elementary endorsement at Alaska Pacific University; and add an endorsement in the Career and Technical Education certificate program at the University of Alaska Anchorage.

Career and Technical Education

In December 2010, the Board adopted the Career and Technical Education Plan, created by the Department of Labor and Workforce Development, the University of Alaska Statewide, the Department of Education & Early Development, and other stakeholders. The plan outlines actions that can be taken to improve Career and Technical Education opportunities for students from kindergarten through postsecondary.

In June, the Board heard a report on agencies' progress implementing the Career and Technical Education Plan. The Board also discussed the Department of Labor and Workforce Development's Career and Technical Education grants to districts. Board members expressed concern that there would be accountability for the expenditures made and wanted to make sure that these grants benefitted students in Career and Technical Education.

The board continued its support of the plan through the following actions:

- Approving the Graduate Certificate program at the University of Alaska Anchorage for teachers wishing to add an endorsement in Career and Technical Education to their certificates;

- Adopting regulations regarding the qualifications for Type M teachers who obtain endorsements in Career and Technical Education.

Early Learning

In 2009, the Legislature provided $2 million for a pilot pre-kindergarten program that would include six sites. The purpose was to allow varied school districts to create preschool programs that incorporate Alaska's Early Learning Guidelines in ways tailored to their local communities.

In 2011, the Board heard reports on the Alaska Pre-K Pilot Program, the progress being made with Head Start grantees using a common assessment across the state, and the increasing number of Head Start teachers who are certified. The Board also was informed about the work of the recently formed Alaska Early Childhood Coordinating Council.

Recognizing the importance of children coming to school ready to learn, the Board endorsed the department's Family Engagement Plan and its Early Literacy Plan. The Family Engagement Plan includes action steps for parents, teachers and community members that will ultimately impact student achievement. The Early Literacy Plan encourages early literacy activities in all settings where young children interact with adults. It provides actions that parents, caregivers, preschool teachers and community members can do that will help students come to school ready to learn. The Board also approved the Birth-Graduation Literacy Blueprint, the culmination of work done by literacy experts in Alaska to provide a roadmap for improving literacy outcomes for all Alaska students. The Blueprint included work previously done on the Early Literacy Plan.

State System of Support

The State System of Support assists districts as they build their capacity to implement sustainable school improvement strategies with fidelity. The State System of Support provides aligned resources, information, professional development, content coaches, and technical assistance within six domain areas that represent aspects of best practices that substantially influence school and student performance.

Throughout the year, the Board heard reports on State System of Support activities: the Third Leadership Institute and the Alaska Literacy Institute, which was sponsored for intervention districts and included representatives from pre-k programs and Head Start programs; the curriculum exposure analysis done by the state; and activities of the Yupiit School District trustee.

The Board received updates to the development of a rubric on Cultural Standards for Educators as a follow-up to their adoption of this section from the publication *Alaska Standards for Culturally Responsive Schools.*

Distance Education

The Board received updates on the progress of Alaska's Learning Network throughout the year. Alaska's Learning Network is an outgrowth of the department's Virtual School Working Group. Alaska's Learning Network enhances educational opportunities by providing: 1) distance courses taught by highly qualified Alaska teachers, 2) a network of support for educators and students to collaborate and share resources in a digital repository, and 3) professional development for teachers. Alaska's Learning Network provides rigorous courses that meet eligibility requirements of the Alaska performance Scholarship.

The Alaska Literacy Blueprint

In March, the Board endorsed the Alaska State Literacy Blueprint Birth to Graduation, created by Alaska educators. The blueprint provides guidance to policymakers, educators, community leaders, and families about ways to support all children in becoming literate and therefore prepared to fully participate in their chosen work and activities. The blueprint is organized into the key areas of instruction, assessment, leadership, professional development, and family and community engagement.

Mt. Edgecumbe High School

Mt. Edgecumbe High School is a state-operated boarding school in Sitka for approximately 400 students from around the state, 78 percent of whom self-identify as Alaska Native or American Indians and another 11 percent who self-identify as mixed race. The State Board, which serves as the Board of Education for Mt. Edgecumbe, approved a change to the credits required for Mt. Edgecumbe graduates. The Board reduced the required credits in social studies from four to three and added a required credit of either social studies or math or science beyond courses already required. The total number of required credits remains at 24. The rationale was to provide scheduling flexibility for students who want to meet the credit requirements of the Alaska Performance Scholarship.

The Board appointed an ad hoc committee to review the Mt. Edgecumbe Policy Manual. The rationale is to update the manual and remove outdated policies and procedures.

2/10/12 PRESENTATION EDUCATION FUNDING FROM SCHOOL DISTRICTS PERSPECTIVE

Alaska Council of School Administrators

February 28, 2012

TO: House Education Members
House Finance Subcommittee for Education Members
FR: Bruce Johnson
ACSA/AASA Executive Director
RE: Materials Promised

The ACSA membership would once again like to thank you for the opportunity provided for four Alaska School Business Officials to share their FY13 school district projected budgets earlier this month. We trust that you found the presentations informative and helpful in better understanding the complexities of school district budgets.

Two of the presenters, Laura Hylton, Lake and Peninsula School District, and David Arp, Sitka School District, were asked to provide follow-up information. Attached you will find the requested information:

- Lake and Peninsula School District Utility and Energy Information
- Lake and Peninsula School District Vocational Offerings and Partnerships
- Sitka School District FY12 Average Class Size
- Sitka School District Opinion on HB313 – Student Count Estimates

Again, thank you for the opportunity.

The Lake and Peninsula School District
Utility and Energy Information as Requested by Rep. Tammie Wilson February 10, 2012

$320 increase to the Base Student Allocation would increase Foundation Funding for FY13 by $548,608.

LAKE and PENINSULA SCHOOL DISTRICT

On the vocational front, LPSD is working in partnership with UAF Extension and the Bristol Bay School District to provide relevant and meaningful vocational education experiences for our students. We have also approached Dillingham and Southwest Region School Districts related to partnering to provide more robust programs.

We are working under the Alaska Educational Tax Credit Program to solicit support and have received small contributions which along with the vocational education multiplier incorporated in the foundation formula last year are being used to provide vocational experiences much like those provided at the Northwestern Alaska Career and Technical Center (NACTEC), a joint-venture regional vocational training center located in Nome.

Course offerings for February's Career and Technical Education Session include:

February 18-24, 2012

Primary Courses: Word Processing/Power Point/Job Readiness -- 3 UAF credits

Basic Welding – 1/4 HS credit

Additional evening offerings:

Driver Education, Behind-the-Wheel portion-- only students with a learner permit

Written Test Tutoring for Driver Education – for all students wishing to participate

Basic First Aid/CPR—for all students without a current First Aid Card

Photography—for all students wishing to participate

Sunday afternoon:

Water Safety—all students

Sitka School District

FY2012 Average Class Size - By School and District

February 15, 2012

School	Classroom Teachers (FTE)*	Enrolled Students**	Average Class Size

February 16, 2012

Representative Eric Feige
C/O State Capitol
Room 126
Juneau, AK 99801-1182

Dear Representative Feige,

On February 10, 2012 I, along with 3 other school business officials from throughout the State, presented our financial situations to the House Education Committee and the House Education Finance Committee. After the presentations and question/answer session concluded you approached me and some of the others with a request that we review and respond with our opinions to your proposed HB 313. Here are my thoughts, please bear in mind they are not intended to be representative of the other members of our presenting party or the ALASBO/ACSA organizations:

- The underlying concept of allowing districts to use current year enrollment figures to determine the subsequent year funding is a very positive step in the direction of strengthening schools abilities to do future financial planning and smooth out so of the difficulties with hiring practices.
- In the scenario you have presented the main issue I see is a situation where a district was faced with rapidly increasing enrollment. You did help remedy some of this issue by including the 5% hold harmless clause.
    - A suggestion I would offer is to consider decreasing the hold harmless percentage. In very large school districts such as Anchorage, Mat-Su, or Fairbanks each one percent of their enrollment is still a very significant number.
- The hold harmless provision in the bill does not directly address the scenario of a sharp increase in intensive needs students. Currently intensive students qualify for a 13X multiplier so their impact on a district's budget is significant.
- As stated before, while this scenario is a strong step in the right direction, it does not address the issue that districts only true funding sources are the federal, state, and local governments. With the current funding structures in place districts are subject inflationary pressures on expenses with no offset for revenues. Outside of lobbying governments directly districts have no real ability to increase their revenue side of the equation. That said, the other major change I would suggest is adding some language tying the funding stream to a mechanism for offsetting inflation.

I fully understand my suggestions may be unrealistic given the current political climate at the State level and in no way want them to discourage you from continuing to pursue this particular bill or line of thinking. Any step in the direction of solidifying schools abilities to financial plan are desired and truly appreciated.

Thank you again for all the work you have done and are doing for Alaska's schools. If you have any questions please feel free to contact me via phone at 907-966-1254 or Email at arpd@sitkaschools.org.

Sincerely,

David Arp, Business Manager
Sitka School District

"Educating Today's Children to Become Tomorrow's Leaders"

Date: March 25, 2012

To: Representative Bill Thomas, Co Chair
Representative Bill Stoltze, Co Chair

Members of the House Finance Committee
27th Alaska State Legislature

From: Michael Swain, Jr.
President, Bristol Bay Borough School District

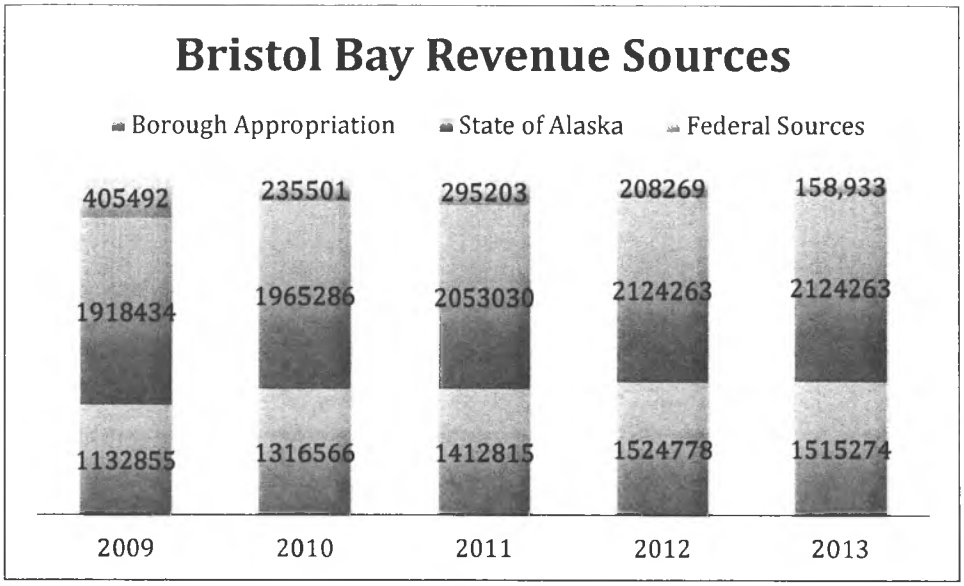
Thank you for the opportunity to provide a perspective on the financial situation and challenges we face in the Bristol Bay Borough School District. As a District that serves approximately 150 students in grades k-12 from the southwest communities of Naknek, South Naknek, and King Salmon, we have a history of providing a quality academic and extra curricular program for the students.

In 2011, we joined an ever-growing list of schools and districts that did not make Adequate Yearly Progress (AYP) as prescribed under the No Child Left Behind (NCLB) legislation. This was the first time we fell short of that measure. It is important to mention we hit all of the academic targets at every grade level and in every subject. We did not reach the 85% graduation rate and only achieved a 72% level. Obviously, this is a rate we will be working on and hope to improve on. I think that graduation rate is also a statistic that puts a complicated matter in an easily calculated metric. It leaves considerable realities out of the discussion.

We were asked to respond to specific questions and to prepare written testimony in advance of the testimony before the Committee.

- **What is your FY13 total school district budget?**
  - In 2013, our total budget is $4,144,778.
  - In 2012, our total budget was $3,856,653.
- **What percentage goes to personnel?**
  - Personnel costs this year represent 68% of our total budget. Historically, that number had been 60-65% for the greater part of a decade in Bristol Bay. In the last 5 years we have moved that number up, knowing that our salaries and benefits were not as competitive as necessary and that was a position of not only the district, but the 2007 Education Funding Task Force that the State Legislature had created.

- **Provide a graph that shows your total school district budget from FY09-FY13 (5 years), broken down by funding source (state/local/fed/mix)**



- **Did you fund to the <u>total allowable</u> local contribution in FY 12?** No
    - **In FY13?** No, the borough has never gone to the cap, yet they continue to fund at a level that is above the 4 mill commitment they are required to make. Their initial discussions this year starts at an equivalent of 4.4 mill. In some years their cash and in-kind contributions have been above a 5 mill level.

- **If not, how much below were you?** On average the Borough contribution is generally $200,000 plus below the cap. **Why?**
    - The Borough has many priorities and like the legislature, there are times when education is not the top or only priority.
    - Members of the community and Assembly hear what individuals like the Governor say about schools being failed systems and bad investments, often echoed by other elected officials, the University of Alaska system, and a national media, and they have a harder time believing we need more money.
    - There are many who believe the rhetoric that schools are failing and are not helping prepare kids for the future. In asking the district to accept the same funding for two years, the fy12 contributions of the borough amounted to a reduction as no costs would stay the same as in FY11.
    - We also recognize that our declining student numbers is also an indicator of the fact that fewer homes in our Borough contain children who attend our schools and as their other expenses continue to escalate it is harder for them to continue to support education at a level they may have.
- **How much has the state contributed to the PERS/TRS unfunded liability on behalf of your school district in FY12?**
    - TRS- $329,150, PERS $55,262, Total- $384,412
- **How much is the state scheduled to contribute for PERS/TRS unfunded liability costs on behalf of your district in FY13?**
    - TRS- $424,175, PERS $57,539, Total- $491,714

- To suggest that this amount of money is an on-behalf amount that we as a district owed is a slightly tilted opinion. This is, and always has been an obligation of the State as a result of creating a Teacher Retirement System or a Public Employee Retirement System. The fact that it was never reported in school district budgets until 2004 supports that same position. This chart illustrates the TRS/PRS liability numbers since it was first required to be reported in 2008.

	2008	2009	2010	2011	2012	2013
TRS On behalf	399,322	289,255	232,688	251,034	329,150	**424,175**
PRS On behalf	102,327	63,695	28,234	34,219	55,262	**67,539**
total	501,649	352,950	260,922	285,243	384,412	**491,714**

- **When was your most recently ratified teacher contract put into place?**
  - We settled a three-year contract in June of 2010. Next January we will begin new negotiations with our teachers.
- **What were the terms? (salary and benefits increases/decreases per year, in percentages {or dollars, if appropriate}**
  - In the last negotiations, salaries increased by 2% for 2010-11, 3% for 2011-12, and 3% for 2012-13 with similar insurance splits above the cap begun in 2008.
  - In the 2007-2008 school year we had also settled a three-year agreement with our teachers and that settlement included a 4% settlement in each year and a requirement that teachers and other staff would begin to pick up a share of their insurance premium.
- **What is your average teacher salary?**
  - In 2012, average teacher salary: $53,068
  - Lots of recent turnover and retirements in recent years. Average salary number is a limited snapshot of where we are. Remains flat or regressing as a result.
- **What is your starting teacher salary?**
  - In the 2011-2012 school year our starting salary was $43,914
  - Next year that starting salary will be $45,231
- **Did you negotiate significant salary increases in you labor contracts for FY2013?**
  - It will be another 3% increase next year
  - Depending on the increase to health insurance costs, the teacher share of the amount paid per month will also go up and cut into that raise.
- **If yes, why did you do that given the current funding situation/debate?**
  - Is 3% significant? Not when people get $400 month electric bills in Naknek and King Salmon, gas for an auto has been over $5.25 a gallon for 5 plus years, and a gallon of milk is sold locally at $12.00. Current round trip airfares to Anchorage from King Salmon are nearly $600.00.
  - When state employees and other federal employees living in the same region are provided differentials equal to 20-30% more than colleagues in Anchorage to address the high cost of living, shouldn't a similar system exist for the teachers living in those same conditions.
- **What are the cost drivers in your budget?**

- Energy costs are big and there is no controlling those costs. The facility has millions in deferred maintenance to complete and that will grow significantly in next 6 years.
- Transportation costs, the shipping costs associated with supplies and materials, travel for our own staff, professional development presenters, and visiting special education related services personnel who are required to be on-site are all significant.
- Health insurance costs continue to escalate in ways that are significant, as are other insurance costs.

- **How much were your energy costs in FY11?** $373,744.53
- **How much do you project them to be in FY13?** $421,000
- **Do you have a system in place to make budget adjustments when enrollment drops—how do you approach this?**
  - We are in a declining enrollment mode and have two large cohorts of @ 20 graduating in fy13 and fy14 and only 5-7 children coming into kindergarten.
  - We are reducing staff as a result, but the next reductions will cause us to restructure our elementary grade level instruction and that will create new challenges that will require significant retraining of teachers and the community.
- **What are your biggest instructional challenges?**
  - Math and writing are big challenges for our district, and science scores remain well below what we would like them to be.
  - In recent years we have dedicated considerable efforts to a review and update of our language arts curriculum, which resulted in the purchase of new instructional materials for grades k-5 and professional development for staff.
  - We are looking into our math program and if there might be a better set of materials for our teachers to use. This is a big undertaking and requires some research so we avoid the mistakes others occasionally make.
  - High turnover demands a greater commitment to professional development for all staff. In a 2-3 year period you could have no teacher trained in the use of specific materials and programs the district has committed to and if we don't change that, academic success will suffer..
- **What grade would you give your school district (A-F)?**
  - We are a district that gets a B or B-. We have high performing teachers and students and understand what the state standards require. We know we can always do better, and while we continue to meet the NCLB academic targets, when the required graduation rate jumped to 85% this year, we did not make that target.
  - In 2010 and 2011 a total of 3 students who did not graduate in 4 years came back to take the last parts of the graduation exam in the fall semester and they passed. That allowed them to earn their diplomas, but there is no credit given to the student or school for that success.
  - We know that every student, every parent, staff member, and community member wants every child to graduate and we will do better in this area. Our small numbers do mean that every single child represents about 10% in that calculation, so we must make sure every child is successful.
- **What are you proposing to do differently to improve student performance?**

- Continue the good things we are doing. The fact that 70-90% of our children are proficient in every academic area, is an indicator that many things we do, our families do, and our students do are working.
- Continue to raise the bar on rigor and implement a plan for most students to have the opportunity to qualify for the Governor's Performance Scholarship and to be better prepared for post secondary pursuits.
- We will be looking at more distance options and using those resources to implement programs for our highest performing students, and all others.

- **Is the state providing the kind of planning and curriculum support that is helpful to your school district?**
  - DEED is a much more regulatory and compliance agency then an agency that can provide supports in curriculum and planning.
  - In recent years a growing focus of their services has been to provide support for those districts and schools identified as the lowest performing, and thankfully, that is not an issue we are dealing with.
  - Our district typically turns to the Anchorage, Mat-Su, and Kenai districts for those supports as they have much more evolved and robust expertise in these areas.
  - We have sought federal grants for additional support in this area and it has been very helpful.
- **How can the DEED, the Board of Education or other state agencies help you achieve better results, other than just providing you with more money?**
  - Truly eliminate the items we regularly suggest are of no value, to us or the state- (ie the 70/30 requirements or waiver letters, a graduation exam that limits any individual students from earning a diploma, help families do a better job of parenting and getting their children to school and learning the importance of that basic skill by enforcing statutes on truancy and having law enforcement and courts fulfill their statutory obligations in this matter, etc)
  - Hold the university system accountable to a higher standard. If they are concerned about k-12 preparation, establish a standard of admission standards that goes beyond open enrollment so everyone understands the competitive world of today and tomorrow will require skills and training beyond high school.
  - Help to support the Department of Labor realize that teacher and administrative shortages in our rural areas are real concerns for the present and future. These shortages will only get worst if we don't take a serious look at what can be done to better invest in recruiting and support for those willing to accept that challenge.
- **How much ARRA funding did you receive over the past few years?**
  - Bristol Bay received just over $120,000, which included both the ARRA and State Stabilization funding, and the Education Jobs dollars.
- **How did you invest any ARRA funds you received?**
  - We used the one-time ARRA funding for some of the professional development, instructional materials including some technology purchases, and other infrastructure needs we had set aside in recent years.

- Some of this money designated for special education needs allowed us to extend our related services agreements to include an additional visit or provide support for the related costs.
- We used the funds from the Ed Jobs to help offset increasing health costs and other benefits. At $12,000, it was not enough money to save any position.

Cc Representative Bryce Edgmon

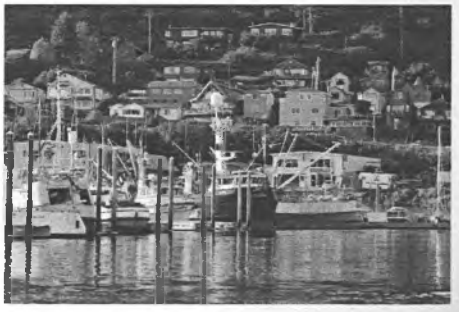
FY13 Preliminary Budget

Kodiak Island Borough School District

Luke Fulp
Chief Financial Officer
February 10, 2012

KIBSD by the Numbers

- 2,500 students
- 420 Employees
- 14 "Brick & Mortar" Schools
- 1 Correspondence Program
- 9 Communities
  - Kodiak (6 schools)
  - Akhiok
  - Chiniak
  - Danger Bay
  - Karluk
  - Larsen Bay
  - Old Harbor
  - Ouzinkie
  - Port Lions



Budget Assumptions

Revenue

- Enrollment will decline by 7 students
  - 2,512 Students
- Reduced funding from Kodiak Island Borough
- No increase to BSA
  - $5,680
- No increase in pupil transportation funding

Expense

- No salary schedule increases
- 7.2% increase to health insurance
- Town Utilities
  - Power: $0.18-0.20/KWH
  - Fuel: $3.50/gallon
- 5% increase to property/general liab. insurance

What is known…

- The Governor's budget included no new increases for K-12 education
  - HB 273 (enacted in 2008): $476,950
  - HB 108 (energy funding): $425,298
- Salary costs will increase as a result of regular movement on the salary schedule

What is unknown…

- Whether or not assumptions will hold true
- The outcome of collective bargaining
- Level of funding from KIB and State of Alaska

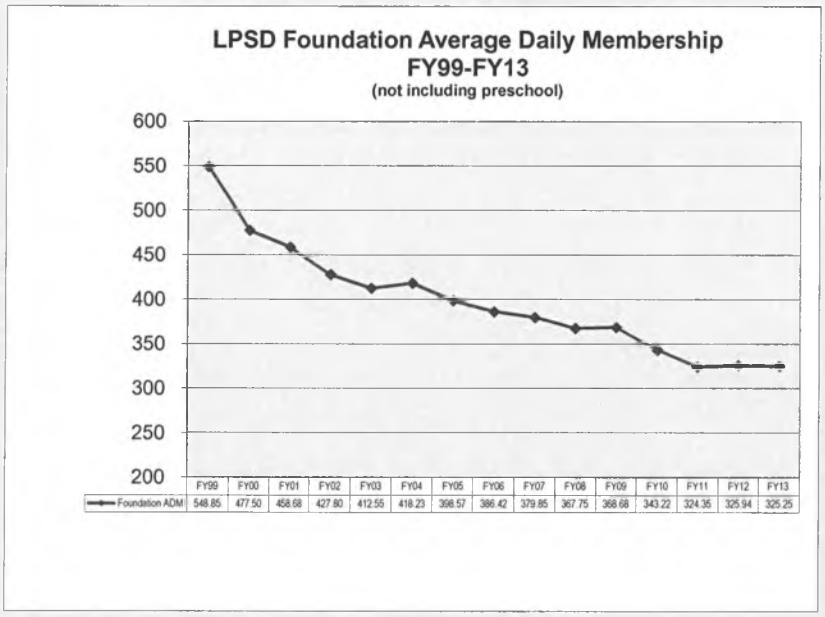
Presentation to House Education Committee and House Finance Sub-Committee for Education

February 10, 2012

LPSD Perspective

- Located on the Alaska Peninsula – LPSD operates 13 schools serving 14 communities
- LPSD covers 32,000 square miles
- Our communities are small and remote with school year access limited to air service at 13 locations
- Our community populations are declining as well as student enrollment



LPSD Student Achievement

LPSD implemented a Standards Based System in the 2000-2001 school year. While the process has had its share of ups and downs, 10 years later there is no ignoring the results.

Benchmark (proficient or advanced) Student Comparison							
	2005	2006	2007	2008	2009	2010	2011
% Benchmark in Math	33%	34.7%	46.3%	48.5%	58.4%	66.8%	67.7%
% Benchmark in Reading	55.1%	60.9%	67.8%	66.1%	67.3%	75.5%	71%
% Benchmark in Writing	46.1%	54.1%	51.1%	56.2%	62.1%	67.6%	69.4%

What are the factors creating our student success?

Individual education plans as part of the standards based system
Recruitment and retention of quality teachers – in 2010 LPSD implemented a longevity bonus for teachers
Targeted professional development and research-based curriculum
Early literacy programs distribute age appropriate books to children from birth – 3 years of age
Literacy coaches providing classroom instructional support
Certified tutors providing intensive individual instruction for students

Revenue Assumptions:

- No Base Student Allocation Increase
- Federal Impact Aid program – expected 8-10% reduction
- Increase in Borough funding due to increase in property valuation
- ISER increase from 1.941 to 1.994
- Hold Harmless – 5% reduction in student count from FY11 at final level of 25%
- Reduction in Federal grant funds and grants ending
- E-rate overall funding decreasing from 86% to 81%
- PERS on-behalf increase from 8.76% to 13.84%
- TRS on-behalf increase from 30.05% to 40.11%

THE LAKE AND PENINSULA SCHOOL DISTRICT

Revenue By Source

	Budgeted 2011-2012	Projected 2012-2013	Change
Borough Appropriation	1,028,792	1,172,513	143,721
Local Revenue	265,617	265,617	0
State Foundation	8,964,776	8,856,865	(107,911)
One-time Energy Funding	139,321	0	(139,321)
Federal - Impact Aid & ERATE	2,952,079	2,698,886	(253,193)
	13,350,585	12,993,881	(356,704)

Reduction in general fund revenue: $356,704

Reduction in federal grant revenues: $873,925

Overall Program shortfall for FY13: $844,387

THE LAKE AND PENINSULA SCHOOL DISTRICT
Expenditures by Function

	Budgeted 2011-2012	Projected 2012-2013	Change
GENERAL INSTRUCTION	4,649,766	4,579,502	(70,264)
SPECIAL EDUCATION	910,607	940,300	29,693
SPECIAL ED-SUPPORT SERV.	106,652	119,150	12,498
SUPPORT SERVICES-PUPILS	99,280	200,500	101,220
SUPPORT SERV.-INSTRUCTION	1,385,550	1,652,255	266,705
SCHOOL ADMINISTRATION	727,570	722,400	(5,170)
SCHOOL ADMIN SUPPORT	51,550	53,650	2,100
BOARD & ADMINISTRATION	610,577	616,519	5,942
DISTRICT ADMIN SUPPORT SERV.	464,450	500,792	36,342
MAINTENANCE	3,010,250	3,221,000	210,750
PUPIL ACTIVITIES	404,600	482,200	77,600
TRANSFERS	791,110	750,000	(41,110)
TOTAL BUDGETED	13,211,962	13,838,268	626,306

Our shortfall is a result of:

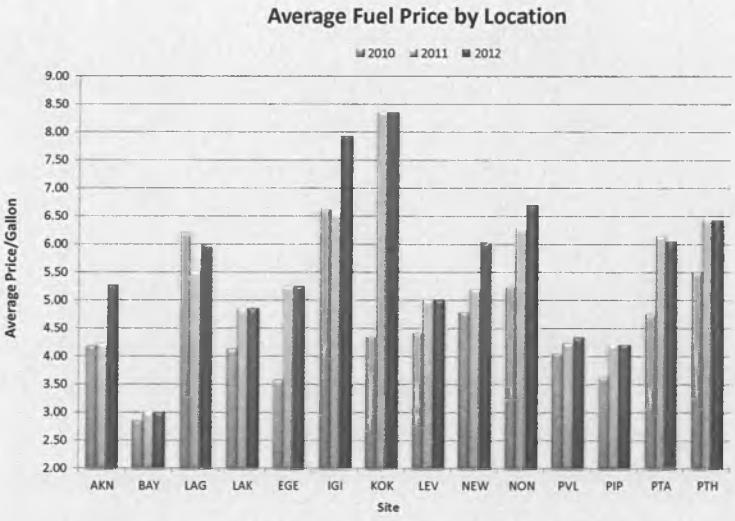
- Expected reduction in impact aid
- No anticipated increase in BSA
- Continued increase in utility and energy costs
- Expected loss of FY12 one-time energy funding
- Expiring federal grant dollars
- Increase in general transportation and postal expenses for transporting staff and materials

Planned cost saving measures:

- Explore outsourcing food service
- Reduce principals: 5 FTE to 4
- Reduce teachers: 5.26 FTE from 48 to 43.74
- Reading Coaches: 1.5 FTE from 2.64 to .5
- Eliminate district counselors: 2 FTE
- Reduce supplies & materials: $100,000
- Reduce travel of district iterant staff
- Reduce professional development travel

Major Budget Impacts:

- Utility and energy costs are increasing at staggering rates despite efficiency measures; costs continue to increase in spite of reduced usage
- Electricity costs in FY12 have increased on average $0.10 per kilowatt hour over FY11 increasing electricity costs by $129,400
- Fuel prices continue to rise and ranging from $2.99 to $8.00



LPSD Reality:

- LPSD has reduced administrative and maintenance positions over the last few years and worked to increase efficiencies in energy usage and travel.
- The fact remains that we cannot keep pace with the general inflationary costs any longer without cutting classroom staff and reducing educational programs resulting in fewer opportunities for our students.

- LPSD strives to operate as effectively as possible and absorb budget reductions in non-instructional areas. However, with anticipated reductions necessary for FY13, the core of our instructional program will be impacted.

Thank you for this opportunity to share our budget information and our specific circumstances related to educating our students.

Sitka School District

Stat Sheet

Compiled and Presented By: David Arp, Business Manager

Community Facts:

- 5th largest city in Alaska
- Population in the 8,800's since 2000
- Located on the outer coast of Baranof Island, in Southeast Alaska
- Major Industries:
    - Commercial fishing and fish processing
    - Tourism
    - Health care
    - Education
    - Government agencies
- Serviced by both Alaska Airlines and the Alaska Marine Highway System
    - No roads on/off the island

District Facts:

- 1,306 full time students
- Approximately 200 full time equivalent employees
- 6 volunteer School Board Members, including 1 voting student member
- 7 District Buildings (all located within 5 miles of each other)
    - 5 School Buildings
        - Baranof Elementary
            - Also houses the District REACH home school program
        - Keet Gooshi Heen Elementary
        - Blatchley Middle School
        - Sitka High School
        - Pacific High School
    - 2 Non-School Buildings
        - Community Performing Arts Center
        - Southeast Alaska Career Center
- The District also oversees the local Community Schools, AmeriCorp, 21st Century Learning Center, Community Recycling, and after school Ventures programs

If would like more information about the Sitka School District you can visit our website at ***www.sitkaschools.org***

	Total Gain/(Loss)	**-151,215**	**-1,290,991**	

Assumptions:

Revenues:

A City and Borough Appropriation remains unchanged from FY2012 to FY2013
B Misc Local Revenue remains unchanged from FY2012 to FY2013
C E-Rate reimbursement remains unchanged from FY2012 to FY2013
D Quality Schools is adjusted to reflect the decrease in enrollment, 34 intensive students, and the final ISER increase
E State of AK HB108 Allocation is reduced to zero assuming it will not be reauthorized
F Foundation is adjusted to reflect the decrease in enrollment, 34 intensive students, and the final ISER increase
G Federal Impact Aid remains unchanged from FY2012 to FY2013
H Federal Secure Rural Schools funding is reduced to zero assuming it will not be reauthorized

Expenditures:

I Salaries are adjusted to account for current employees rolled into the FY2013 negotiated agreement scales.
J Health Insurance premiums remain unchanged from FY2012 to FY2013. Workers Compensation Insurance is increased by 12.5% and all others insurances (non-health) are increased by 2.5% based on estimates from agents
K Heating fuel costs are increased by $20,000 as fuel prices are currently forecasted to drop in FY2013. The increase is from the anticipation of using more diesel fuel vs. heating electricity. Electricity is increased by $15,035 to prepare for anticipated increases from the City Electric Department The custodial contract is increased by 5% from FY2012
L School and Program discretionary budgets remain unchanged from FY2012 to FY2013
M Technology includes a $75,000 increase to continue the School Board's 5 year plan
N Activities budgets are set at the FY2012 budget process level (reduced by $50,000 from FY2011)

Note: The $1.29MM anticipated deficit for FY2013 equates to 14.26 full time certified teaching positions

SITKA SCHOOL DISTRICT
FY2013 PRELIMINARY BUDGET
ASSUMPTIONS

Revenue Elements include:

- Full Time Enrollment decreases from 1306 to 1295
  - 34 Intensive Needs Students (down from 37 in FY12)
  - 30 Correspondence Students
  - 8 Raven's Way Students

- The Foundation formula:
  - BSA = Remains at $5,680
  - ISER Multiplier = Increases from 1.173 to 1.195

- The annual City and Borough appropriation remains flat - $5,460,734

• Operational Funding	5,026,975
• Pool Operations	44,529
• Pool Utilities	77,147
• Community Schools Janitorial	29,067
• Community Schools Appropriation	150,796
• Student Activity Travel/Intramural	132,220

- Secure Rural Schools funding and HB108 are reduced to zero in anticipation that they will not be reauthorized

- ERate will remain $130,000, Miscellaneous Revenue and Impact Aid Revenue will both remain at $30,000

Expense Elements include:

- 3 paraprofessional positions reduced to offset the assumed reduction in intensive needs students. All other current Full Time Employee levels remain unchanged

- Salaries and wages roll up to FY2013 negotiated agreement levels

- Benefits:
  - Health Insurance does not increase
  - Workers Compensation Insurance increases by 12.5%
  - TRS (12.56%), PERS (22%), FICA (1.45%), SBS (6.13%) all remain unchanged

- Property/Liability/D&O Insurances are increased by 2.5%.

- Utilities:
  - Heating Fuel increases by $20,000 and Electricity increases by $15,035
  - Water/Sewage/Garbage, Communications, Electric and Other Utilities are equal to the FY2012 revised budget

- Special Education contract services increase by $20,000 due to an increased need of speech/language and physical therapy specialists, all other School and Program budgets remain unchanged

- Custodial contract increases by 5%

- Indirect Cost Rate will increase from 3.59% to 5.37%

- Technology is increased by $75,000 to continue the 5 year funding plan

Fund Balance Elements include:

- $500,000 transferred out of unreserved fund balance to reduce the initial deficit per School Board approval

Explanation of the revenue categories as presented in the budget:

State Funding
Foundation – The formula appropriation of State funding for school districts based on enrollment

School Improvement Grant – State grant based on enrollment – will not be receiving in FY2013

Energy Relief – State grant to assist with energy costs – will not be receiving in FY2013

Quality Schools Grant – State funds, based on enrollment, to be used for professional development

HB 108 Allocation – A one-time revenue sharing appropriation from the State out of their operating budget for communities and school districts – will not be receiving in FY2013

Miscellaneous State Revenue – Reimbursements from the State for various expenditures – do not anticipate receiving in FY2013

ISER – State funding formula that allocates a cost factor into the Foundation formula – included in the Foundation for FY2013

Local Funding
Borough Appropriation – Local support for from the City and Borough for education

Miscellaneous – Refunds from previous years, COBRA insurance payments, restitution payments, reconciliation adjustments, other local revenue

E Rate Revenue – The discounted refund of telecommunications and internet access fees

Federal Funding
Title VIII Impact Aid – Federal Impact Aid paid to districts for the impact that Federal property has on local property tax of the community

Secure Rural Schools – Federal funds to communities to support schools and roads

Medicaid – Funds for District provided services which are reimbursed by Medicaid – do not anticipate receiving in FY2013

Fund Balance
Fund Transfers – Operating Account Fund Balance funds the Board has approved in advance to be used to balance the budget

Employee Expenditures

Explanation of the non-employee expense categories as presented in the budget:

School and Program Budgets
Baranof, Keet Gooshi Heen, Blatchley, Sitka High, Pacific High – Discretionary funds allocated to each school

REACH – Materials, curriculum, textbooks, and equipment for the District operated correspondence program

Special Education – Expenditures for contracted services, supplies, equipment, and travel for the District's regular special education program and the summer ESY program

Library Discretionary – Funds allocated to the District libraries for discretionary purchases. One time allocation in FY2010, do not anticipate a recurring expenditure in FY2013

Cultural Program Discretionary – Funds allocated to the District cultural program for discretionary purchases

Maintenance
Supplies – Funds for general maintenance, services, supplies, gasoline, and equipment for the District

Property Insurance – Premiums paid for property insurance

Utilities – Electric, Heating Fuel and Heating Electric, Water/Sewage/Gas, and other utility services

Custodial Contract – Fees paid to NANA Corporation for contract custodial services

District Administration
Travel/Professional Development – Expenditures for District approved travel and Staff Professional Development

Telephone/Communication – Charges for communications including phones and network services

Liability Insurance & Bonding – Premiums for Directors and Officers and the Errors and Omissions policies

Legal Settlement – Fees for resolving legal disputes, none since FY2007

Audit/Legal Fees – General legal consultation fees and expenses associated with the annual audit

Health Services – Equipment and supplies for the District Nurse and charges associated with wellness plan

Districtwide Programming and Supplies – Fees for financial software support, postage, copier maintenance, professional association dues, testing supplies, etc required for general District operations

Indirect Cost Rate Revenue – Revenue generated by the Federal Programs Indirect Cost rate
- *Technically a revenue but the State requires that it is represented as a negative expense*

Technology – Services (anti-virus, firewall, etc), supplies, and equipment funds for technology

Professional/Technical Contract Services – Expenses for professional services used by the District.
Examples are: Cold Water Survival, CPI Common Remitter Services (403b), Library Network (OCLC), First Aid training, Strategic Planning, Improvement Instruction, Schoolmaster/Pinnacle/Phonemaster fees

School Board – Expenses associated with the operations of the Board and Board Meetings
Examples are: Board travel expenses, fees for media services, advertising, and legal notices

Student Activities – These are District expenditures directed to sporting programs and athletic association membership fees, also included here are the charges for the auditorium management company

Transfers
SNEP – The District's annual allocation to support the Sitka Native Education Program

AmeriCorp – Transfers to the Community Schools operated AmeriCorp program, none anticipated in FY2013

Community Schools – Transfers to the Community Schools Program, none anticipated in FY2013

Pool – Transfers to operate and maintain the Blatchley pool, none anticipated in FY2013

Ventures – Transfers to the Community Schools operated before and after school latch key program, none anticipated in FY2013

SEACC – The District contribution to the Sitka Education Consortium, the program was discontinued in FY2012

Hames – Transfers to assist with the daily operations of the Hames PE Center. The District discontinued supporting the program in FY2012

Successes & Challenges

- 2 National Merit Award Semi-Finalist Scholars out of a class size of 97 students
- Students that equal or outperform the average student in Alaska in all subject areas (Reading by 7%, Writing by 4%, Math is equal, and Science by 10%)
- Alternative high school serves 88% poverty, 40% homeless, and 25% pregnant or parenting population, that has graduated 140 students over the past 20 years who otherwise would have dropped out
- Vibrant K-12 music program which includes exposing students to annual music festivals which feature nationally acclaimed acts
- State Champions in Softball, Debate Sweepstakes, Wrestling. State runner ups in Girls Basketball, Girls Cross Country, Boys Swimming, and Drama/Debate/Forensics
- Special Education Department successfully manages a large number of intensive needs students (2.8% of student population) and continues to see a trend of student referrals to be in Sitka for special services
- Provides flexibility for the increased number of non-traditional students through our REACH home school program
- Continually increasing levels of English as a Second Language students with no dedicated funds to help provide the services and supports that are needed
- The addition of a Native Cultural Program which has grown in size and respect in the short 2 years it's been in existence
- Diminishing local revenues
- Over the last ten years the community of Sitka has supported, by 66% approval of bond issuance, funding for our state of the art Performing Arts Center and renovation of every school facility
- 100% of our teaching staff are highly qualified in their subject area
- Experienced School Board with 27+ combined years and a Superintendent with 10 years of experience
- Middle school grant focused on professional development in technology integration was highlighted as one of the best in the nation by the State Ed Tech Directors Association
- Ongoing need for systemic and sustained professional development for teaching and administrative staff in order to transform schools to meet student learning needs
- Inability to financially plan long term due to inconsistent funding streams (anticipated FY13 deficit of more than $1.2MM)
- Increasing Federal mandates with decreasing federal funding
- Growing number of Homeless students and students with food and shelter insecurities

FY13 Funding Study

Teachers collaborating during a professional development opportunity

Background

In August, 2011, the Commissioner for the Department of Education and Early Development (DEED) requested the Alaska Association of School Administrators (AASA) provide him with the projected base student allocation (BSA) needed for Alaskan school districts for FY2013.

To accommodate this important request for factual unbiased information, AASA worked with the Alaska School Business Officials Association (ALASBO), in cooperation with the Department of Education, and 48 of the 54 school districts throughout the state to collect the necessary data to conduct the study.

Results

The analysis of data collected for this intensive study indicates that in order for Alaska's school districts to be able to meet projected cost increases, an equivalent to a **$320 increase** in the Base Student Allocation of would be required.

AASA has decided to focus on one priority: increasing the FY13 BSA by $320.

This must be the highest priority in order to avoid staff and program cuts in FY13, which will have compounding detrimental effects to students, communities, and public education throughout Alaska.

Middle school students individually and collectively working on academic content

Progress of Alaskan Public Education

According to Alaska's DEED:

- Alaska's graduation rate has increased 5% over the past seven years with more than 1,000 additional graduates today
- Alaska's dropout rate has steadily decreased from 6% to 4.7% over this same seven year period
- Alaska's public schools continue to produce productive students and prepared citizens
- School districts are making progress and the voting public is proud of public education in Alaska, which demonstrate the sound return on investment in education

Multi-Year Forward Funding is Essential

Without multi-year forward funding, Alaska public schools are facing an extremely challenging FY13 budget development environment due to increasing costs and revenue losses.

Local Reality

For FY2013 the Sitka School District is facing a **$1.29MM deficit** in order to provide the same level of services as provided in FY2012 while our enrollment is expected to hold steady at approximately 1300 students. Given that 80% of our budget is in personnel it stands to reason that this deficit, which equates to more than **14 full time certified teaching positions**, would come from the ranks of our employees who have the most direct contact with the students.

When increased regulations in both education and food service programs are factored in our District is faced with increased demands with a **13% smaller teaching force with the same number of students.**

Statewide Reality

Anticipated cost increases throughout the State:

- **Increased health insurance** costs of 7%-15%
- **Increased energy costs** effecting utilities, supplies and transportation
- **Increased employee salary and benefits** which have been negotiated
- Increased costs related to the projected **CPI inflation rate of 2.7%**

Anticipated revenue losses throughout the State:

- **Federal Secure Rural Schools and Community Act** (Forest Receipts) will no longer provide funding to 24 Alaska school districts
- **Federal decrease of 7.8%** in many programs including NCLB, e-rate, impact aid and other federal programs
- **Elimination of FY12 $20M energy funds** to offset rising energy costs

FY13 SSD Budget Estimates

	FY2011-2012	FY2012-2013	Difference
Estimated Number of Students	*1306*	*1295*	*-11*
Revenues			
2013 City/Boro Appropriation	5,026,975	5,026,975	0
Misc Local Revenue	30,000	30,000	0
E-Rate	130,000	130,000	0

HB108 Allocation	220,639	0	-220,639
Foundation	12,039,137	11,920,556	-118,581
Impact Aid	30,000	30,000	0
Federal Secure Rural Schools	517,912	0	-517,912
Total Revenues	18,038,546	17,181,251	-857,295
Expenditures			
Salaries and Wages	10,674,733	10,952,329	277,596
Benefits	3,942,498	3,989,053	46,555
Maintenance	1,583,716	1,664,660	80,944
School/Program	649,988	647,595	-2,393
District Administration	518,181	466,803	-51,378
Technology	394,200	427,200	33,000
Prof/Tech/Contract Services	157,700	138,100	-19,600
School Board	57,100	47,100	-10,000
Student Activities	158,645	111,402	-47,243
Transfers Out	53,000	28,000	-25,000
Total Expenditures	18,189,761	18,472,242	282,481
Total Gain/(Loss)	-151,215	-1,290,991	

Multi-year forward funding would benefit school districts by:

- Facilitating the process where districts can prepare fiscally sound budgets based on actual revenues for public education
- Providing opportunities for districts to develop sound education programs through long plans and partnerships
- Enabling districts to serve students better through more effective use of resources

Most budgets decisions will be made prior to the adjournment of the 27th Legislature causing heartache and disruption for employees, families, and students. Learning happens best when the environment is secure and stable.

Representative Alan Dick, Chair
Education Committee
Alaska State House of Representatives
State Capitol, Room 104
Juneau, Alaska 99801

Dear Representative Dick:

Thank you for the opportunity for Commission staff Brian Rae to present the 2012 Alaska Performance Scholarship (APS) Outcomes Report to your committee earlier this week. During the discussion around the data, Representative Seaton requested different aggregation of the data specific to relevant school sizes. The following information is provided in response to his request. Please bear in mind that these statistics are based on the data as of October 2011 and will be subject to change through the end of the 2011-12 academic year.

2011 Alaska Public High School Graduates

Size of School Graduating Class	Total Graduates	Eligible Graduates	Received Scholarship	# of Schools
All Schools	8,064	2,338	835	
Greater than 100	4,729	1,680	560	20
51 to 100	1,659	363	143	22
21 to 50	690	204	93	22
11 to 20	405	48	20	29
6 to 10	278	21	10	37
5 or fewer	303	22	9	116

printed on recycled paper

Size of School Graduating Class	% of All Graduates Eligible	% of All Graduates Receiving APS	% of Eligible Graduates Who Received APS
All Schools	29.0%	10.4%	35.7%
Greater than 100	35.5%	11.8%	33.3%
51 to 100	21.9%	8.6%	39.4%
21 to 50	29.6%	13.5%	45.6%
11 to 20	11.9%	4.9%	41.7%
6 to 10	7.6%	3.6%	47.6%
5 or fewer	7.3%	3.0%	40.9%

Thank you again for your interest in APS and its potential to transform access to higher education in Alaska. I hope this information is responsive to your questions and encourage you to contact me if have any additional information requests.

Sincerely,

Diane Barrans
Executive Director

EXECUTIVE SUMMARY

As set forth in Alaska Statute 14.43.840, the state's departments of Education & Early Development (EED) and Labor and Workforce Development (DOLWD), the University of Alaska (UA), and the Alaska Commission on Postsecondary Education (ACPE) present this first annual report on the Alaska Performance Scholarship (APS) to the public, the Governor, and the Legislature. In its first year, as of January 1, 2012 the APS has awarded over $3,000,000 to over 900[1] Alaska high school graduates from the class of 2011, with over 1,400 additional students who qualified and will remain eligible to receive the APS in coming years.

Described as "an invitation to excellence," the scholarship's intent is to inspire students to push themselves academically in areas that correlate to success in college and career training. While it is still too early to measure the full effects of the scholarship, some students have indicated that the APS has had an effect on them. While the graduating class of 2011 had very little time to change their classes or study habits in order to qualify for the scholarship, in a recent survey of APS-eligible students, 16% said they had worked harder in school in order to increase their GPA, 20% said they either took or retook a standardized test in order to become eligible, and 10% made changes to the classes they were taking. Perhaps most importantly, over one-quarter of the survey respondents said that the scholarship was extremely important in influencing their decision on whether or not to pursue postsecondary education.

APS recipients come from all regions of the state, though their eligibility and use of the scholarship vary by gender, race/ethnicity, and region. And, while there are a variety of approved training providers throughout the state at which students may use the APS, over 98% of the students in this first year are using their scholarships at one of the University of Alaska campuses. Over 96% of APS funds go to pay for students enrolled full time, and 86% of APS funds go to students pursuing a bachelor's degree.

In future years, as APS recipients progress through their academic careers and join the labor force, a more complete picture of APS' impacts on students will begin to form, and there will be additional evidence to determine how the scholarship is influencing Alaska students and providing additional opportunities for them to pursue postsecondary education and succeed in the workforce. Until then, the following report provides some preliminary information on this, the inaugural class of recipients of the Alaska Performance Scholarship, including characteristics of who is receiving the APS, where they came from, where they are pursuing their postsecondary studies, how much was spent, and some preliminary indicators of how these recipients are faring in their first year of studies.

[1] The full report references APS data as of November 14, 2011, the date information on students' APS eligibility and usage was collected and distributed to the agencies partnering in the writing of this report. At that time, APS had awarded 870 recipients approximately $2.94 million.

"I am so grateful for the APS scholarship, as I was not completely sure I was willing to take on a student loan to attend full time. Because of the APS scholarship, in conjunction with the UAA Scholars scholarship, I am able to attend full time without any loans. I am very fortunate for the timing of the APS!"

Level 1 APS Recipient, in response to APS Outcomes Survey

"I am very thankful that the APS was available for me. I definitely have a hard time paying for school, especially as a full time student working part time hours, with full time working parents who have never received higher than a high school education. I am a full time student, daughter, and eldest sibling. I am also a part time employee. Paying for tuition on top of textbooks and other fees is almost near impossible for me. Thank you APS for this opportunity, I would be struggling to make ends meet without this scholarship!"

Level 2 APS Recipient, in response to APS Outcomes Survey

"I believe the Alaska Performance Scholarship promoted the competitiveness of the University of Alaska system in its attempt to endorse post-secondary education in the state. Also, I would also want to mention that the customer service was remarkably great. I was surprised that those answering my calls were knowledgeable and did everything to help my cause, so I commend them for that!"

Level 1 APS Recipient, in response to APS Outcomes Survey

ALASKA PERFORMANCE SCHOLARSHIP INAUGURAL YEAR'S OUTCOMES REPORT

As set forth in Alaska Statute 14.43.840, Alaska's Departments of Education & Early Development (EED) and Labor and Workforce Development (DOLWD), the University of Alaska (UA), and the Alaska Commission on Postsecondary Education (ACPE) present this first annual report on the Alaska Performance Scholarship to the public, the Governor, and the Legislature. While the legislatively authorized framework of the Alaska Performance Scholarship, or APS, has been in place for little more than one year, by mid-November 2011 the program had provided $2,959,913 to 870 Alaskans from the 2011 high school graduating class[2] to provide assistance in paying for their postsecondary education. An additional 1,452 graduates qualified in 2011 and will remain eligible to receive the APS, and may take advantage of its benefit in coming years.

The APS has been described as "an invitation to excellence," in that students must strive to meet certain education milestones, which correlate to success in college and career training, in order to be eligible for a scholarship. (Information on the requirements is included in Appendix A.) Students' eligibility was verified by their school districts. The final list of eligible APS students, with relevant information, was then provided to EED. School districts were not required to report to EED the underlying details relative to each student's APS award eligibility for academic year 2011 (AY11), as such information was not readily available or easily compiled for the initial reporting period. However, this information was voluntarily provided for approximately one-third of APS-eligible students[3].

AN ANALYSIS OF HIGH SCHOOL GRADUATES, APS-ELIGIBLE GRADUATES, AND RECIPIENTS

Data Sources for the AY11 APS Outcomes Report

Information on AY11 graduates is available from several sources. EED maintains information on public school students in its K-12 data system known as OASIS (the On-line Alaska School Information System), and collects some information on a small number of graduates from outside of the public school systems who applied for an APS. As the primary source of information on all Alaska public high school graduates, including those who decide not to pursue postsecondary education, EED's data was used to identify socioeconomic and demographic characteristics of students. In order to provide comparisons between the AY11 graduating class and prior years' graduates, EED provided several years of high school graduation data for the APS outcomes report. For the graduating class of 2011, the EED data can be considered to be in its final form, with no future updates or changes expected. For all other sources of information on these students, the data available is preliminary and in some cases is likely to see significant future revisions.

For students pursing postsecondary education at one of the University of Alaska campuses, UA's BANNER system is the primary source of information about their progress toward attaining their degree or certificate. Incorporating the information on Alaska high school graduates provided by EED, the Institutional Research & Analysis (IRA) unit at UA provided some characteristics of APS-eligible students, including preliminary findings on enrollments for students attending any UA school. Data included in this report was collected early in the fall semester, and will almost certainly change once complete semester data becomes available. In future years, such information on students' rates of college attendance, retention and completion will provide valuable measures of the APS' impacts on students' educational outcomes.

DOLWD is able to link its labor force and wage data to high school and postsecondary graduates, a capability that will provide valuable information on the effects of the APS in years to come as graduates

---

[2] Public high school graduate information comes primarily from EED's summer OASIS data collection, and represents information confirmed by October 4, 2011. APS recipient information comes from ACPE's Alaska Student Aid Portal system (ASAP), and is current as of November 14, 2011. Information in both databases has been subject to slight changes since the substantive data used in this report was collected. Some information contained in this report may reflect more recent data, and slight differences in reported data may exist due to record matching disparities among the four agencies. The most recent data is available from these agencies, and on the APS webpage at *aps.alaska.gov*.

[3] EED is coordinating with school districts to build capacity for reporting individual-level data, including student GPA, completed course information, and SAT, ACT or WorkKeys scores for those students who have their scores reported to their district.

enter the workforce. While such information will not be available for APS recipients for several years, DOLWD's Research & Analysis Section has conducted several similar studies to date, looking at characteristics such as comparative wages, workers' occupations, place of work, and unemployment insurance use. This information will provide the benchmark against which to measure APS recipients in the future.

ACPE collects information on those students who complete the Free Application for Federal Student Aid (FAFSA) and other information on students receiving the APS, as well as students receiving other grants and loans it administers. ACPE also contracts with the National Student Clearinghouse (NSC) to receive information on Alaska students and their pursuit of postsecondary education, either in or outside the state[4]. For this year's APS outcomes report, ACPE also conducted a survey of APS-eligible students to gain some understanding of how the scholarship affected them. By combining the data available from these different sources, this first annual report derives a preliminary profile of the state's most recent graduates, of APS-eligible students, and of APS recipients.

Where Do APS-Eligible and Recipient Students Reside?

Consistent with the state's population distribution, the majority of APS-eligible students and recipients come from the Anchorage School District, the largest city in the state and the school district which accounted for nearly 40% of the state's public school graduates in AY11. At the other extreme, in AY11 there were 12 of Alaska's 54 school districts which graduated fewer than 10 students[5], two of which had no seniors. (See Exhibit 1.)

EXHIBIT 1. 2010-2011 APS Eligibility and Acceptance by District/Region

District Name / Region	Class of 2011 High School Graduates	APS-Eligible Graduates	Percent Eligible	APS Recipients	APS $ Awarded

[4] NSC states that 93% of all U.S. higher education students from 3,300 postsecondary institutions are reported to the Clearinghouse. NSC is more likely to miss students in smaller schools and those pursuing certificates and vocational licenses. For Alaska, the NSC database contains information only from the UA system and from Alaska Pacific University. The algorithm to match students is also prone to slight errors, in both erroneously matching records for different students, and in not matching records for the same student. These errors affect only a small percentage of students, but numbers may not equal other reported results due to these matching issues.

[5] There are 53 local public school districts in Alaska plus the Mount Edgecumbe boarding school in Sitka, which is managed by EED.

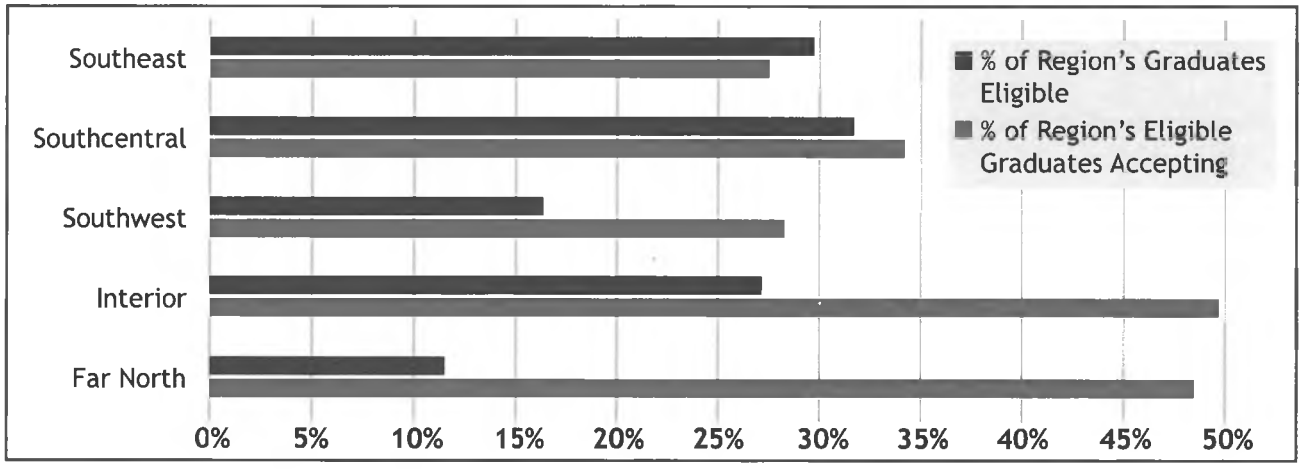
It is informative to look at differences in the rates of eligibility and students' use of the APS across regions of the state. Regions referenced in this report are shown in Appendix E.

EXHIBIT 2. AY11 Graduates' APS Percentage Eligibility and Use by Region



Alaska's Southcentral region not only had the most students eligible to receive an APS, but, as shown in Exhibit 2, it had the highest percentage of graduates eligible to receive a scholarship as well, at 31.7%. Southeast and Interior Alaska trailed Southcentral, and Southwest Alaska's eligibility rate was just more than one-half that of Southcentral's. The Far North region had the lowest percentage of graduates eligible for the APS. However, when we consider the percentage of APS-eligible students who actually made use of it in their first year after graduation, the Far North and Interior regions led the state with nearly one-half of all eligible students actually receiving the scholarship, 48.6% and 49.9%, respectively. This compares to the Southeast region, where just over one-quarter, 27.5%, of eligible students took advantage of the APS in this first year.

Who is Eligible for the APS, and Who Is Using It?

To determine who is benefiting from the APS, we need to make comparisons across three different populations of students: all AY11 high school graduates; the subset of students who were academically eligible to receive the APS; and those students who actually received the scholarship. In certain cases, these three populations show only slight differences, and in other cases there are significant contrasts.

Exhibits 3 and 4 provide two examples of the similarities and the differences among these three groups. When we consider all public high school graduates in AY11, nearly 29% were academically eligible to receive the APS. Of those eligible, slightly more than one-third, or 36%, took advantage of the APS during their first semester after graduating from high school.

EXHIBIT 3. APS Eligibility and Recipients by Gender

	Public School Graduates	Eligible		Recipients	
		Count	% of Graduates	Count	% of Eligible
Totals	8,064	2,322	28.8%	835	36.0%
Male	4,012	1,060	26.4%	380	35.8%
Female	4,052	1,262	31.1%	455	36.1%

Female graduates were slightly more likely to be eligible for the APS as compared to their male counterparts. However, in terms of those eligible students who go on to receive an APS in the first year after graduation, the two genders are nearly identical.

Such similarities are not the case when we analyze APS eligibility by race/ethnicity. For the eligible populations based on race, Caucasian students are four and one-half times more likely to be academically eligible for the APS than are Alaska Native/American Indian students, at 37.9% versus 8.3%.

EXHIBIT 4. APS Eligibility and Recipients by Ethnicity

	Public School Graduates	Eligible		Recipients	
		Count	% of Graduates	Count	% of Eligible
Total	8,064	2,322	28.8%	835	36.0%
Caucasian (White)	4,764	1,807	37.9%	652	36.1%
Alaska Native/American Indian	1,463	122	8.3%	44	36.1%
Asian	575	143	24.9%	44	30.8%
Hispanic	427	78	18.3%	33	42.3%
Native Hawaiian or Pacific Islander	402	112	27.9%	40	35.7%
African-American (Black), not Hispanic	292	50	17.1%	18	36.0%
2 or more races (not Hispanic)	141	10	7.1%	4	40.0%

However, similar to our gender analysis, once a student becomes eligible for the APS, differences in its usage across ethnic groups nearly disappear. Almost all groups take advantage of the APS at the same rate, 36%, within the first year after graduating from high school. The two outliers in the use of the APS are Hispanics, with 42% of eligible students using the APS in the first year after graduation, and Asians, with only 31% making use of the APS. However, given the small size of the student populations within these ethnic groups, care should be taken in drawing conclusions about their propensity to use, or not use, the APS to pursue postsecondary education opportunities. Additional information over the next several years will help identify if there are any significant differences in the use of the APS among ethnic groups.

Still, there are instances when there are observed differences in the percentages of the eligible populations making use of the APS their first year after graduation. One of the most striking is in the use of the scholarship based on the award level. (See Exhibit 5.) Even though a Level 1 award is, in its dollar value, one-third larger than a Level 2 award, students are 50% more likely to use the Level 2 award than they are a Level 1, at 43.1% compared to 28.4%.

EXHIBIT 5. APS-Eligible Public School Graduates by Award Level[6]

	Total Eligible	Recipients	
		Count	Percent
Total	2,322	835	36.0%
Level 1	922	262	28.4%
Level 2	687	296	43.1%
Level 3	713	277	38.8%

Part of the difference in APS use by award level can be attributed to competition from non-Alaska postsecondary institutions. Using information available through the NSC, it is possible to identify many of the students academically eligible to receive the APS who pursued postsecondary education at an out-of-state institution. For the graduating class of 2011, NSC data identified 30% of all high school graduates as attending a postsecondary institution in Alaska, while 17% were found to attend out-of-state institutions.

[6] Exhibit excludes non-public school APS recipients, because of a lack of information on the total number of non-public school students who were eligible for an award but who failed to apply by completing an Alternative Eligibility Determination Application.

(See Exhibit 6.) Just over one-half of the total graduating class was not found in the NSC database, either because they did not pursue postsecondary education, or because they attended an institution that does not report to NSC. Nevertheless, given the scope of the NSC database (see footnote 4, page 6), it is unlikely the number of graduates attending non-reporting institutions would be material.

EXHIBIT 6. AY11 Public School Graduates' In-state and Out-of-state Attendance Patterns

	Headcounts			
	AY11 Graduates	Attended In AK	Attended Outside	Not Found / Not Attending
Total Graduates	**8,064**	**2,437**	**1,401**	**4,226**
Not APS Eligible	**5,742**	**1,439**	**467**	**3,836**
Total APS Eligible	**2,322**	**998**	**934**	**390**
Level 1	922	298	518	106
Level 2	687	350	215	122
Level 3	713	350	201	162

	Percentages			
	AY11 Graduates	Attended In AK	Attended Outside	Not Found / Not Attending
Total Graduates	**8,064**	**30%**	**17%**	**52%**
Not APS Eligible	**5,742**	**25%**	**8%**	**67%**
Total APS Eligible	**2,322**	**43%**	**40%**	**17%**
Level 1	922	32%	56%	11%
Level 2	687	51%	31%	18%
Level 3	713	49%	28%	23%

In AY11, nearly as many APS-eligible graduates decided to attend out-of-state as did in-state, 934 versus 998, while only 390 eligible students are unaccounted for in the NSC data. For students eligible for the Level 1 awards, their tendency to attend an out-of-state institution is much greater than those students eligible for Levels 2 or 3 awards. Also, this group of highest academic performing students is more likely to pursue postsecondary training somewhere, whether in-state or out-of-state, with over 88% of these students being found in the NSC data. This compares to Level 3-eligible students, where only 77% were found to be attending any postsecondary institution.

Finally, there are some differences in the eligibility for and use of the APS based on students' (and their parents') financial capacity. While information on students' finances is not available consistently across the three student populations being considered - high school graduates, APS-eligible and APS-recipient students - there are two sources of financial information available to shed some light on which students are most likely to be eligible to receive the scholarship, and which are most likely to make use of it. For APS-eligible students, information collected by EED allows for the identification of those public school students considered economically disadvantaged in their senior year of high school. In AY11, 30% of all high school graduates were considered economically disadvantaged, or 2,420 total graduates. (See Exhibit 7.) Of these students, 10.9% were APS-eligible, compared to the total student eligibility of 28.8%.

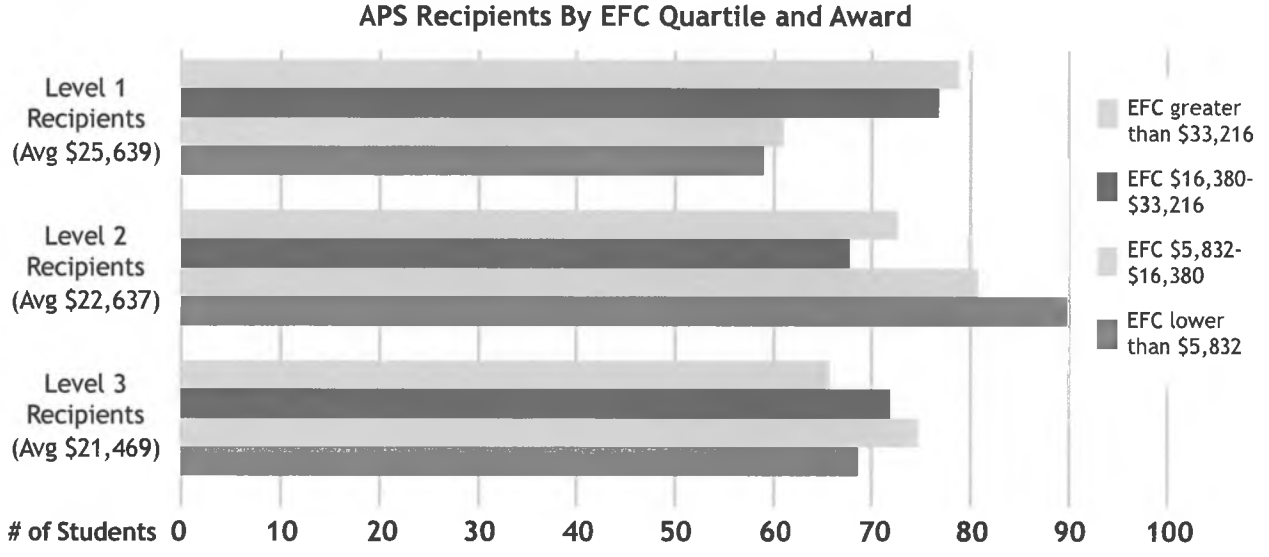
However, if an economically disadvantaged student was eligible for an APS, they were nearly as likely to use it as the total student population, at 34% versus 36%.

EXHIBIT 7. AY11 Public School Graduates and APS-Eligible Students by Financial Status

	Total AY11 Graduates	% of Total Graduates	APS Eligible	Eligible/ Total	APS Recipients	Recipients /Eligible
Total Students	8,064	n/a	2,322	28.8%	835	36.0%
Economically Disadvantaged	2,420	30.0%	253	10.9%	86	34.0%
Not Economically Disadvantaged	5,644	70.0%	2,069	36.7%	749	36.2%

The second source of financial data comes from students' FAFSA filings. To determine a student's eligibility for certain financial aid opportunities, the FAFSA collects information on the student's and their parents' (relative to dependent students) income and assets. This is used by the United States Department of Education to determine how much, according to a federal formula, the family is expected to pay toward a student's education on an annual basis (the Expected Family Contribution or EFC). Because the FAFSA is the primary application for the APS we have this information for both public- and private-school graduates. It should be noted that the EFC is not a factor in determining APS *eligibility*; however, it is used for purposes of this analysis as a proxy for student income status.

EXHIBIT 8. AY11 APS Recipients by Expected Family Contribution and Award Level



In Exhibit 8, the 870 APS recipients were sorted by their EFC and then divided into four equally sized groups, or quartiles. One quartile contained families expected to contribute at least $33,216 to their postsecondary education. Another contained families expected to contribute at least $16,380, but less than $33,216. The third quartile families were to contribute at least $5,832, but less than the second group. The final quartile was expected to contribute less than $5,832. Each quartile's use of the APS by award level was then analyzed.

Those students in the highest EFC quartile, and to a lesser extent those students in the second quartile, were slightly more likely to be Level 1 award recipients. Those in the two lower quartiles, who were expected to contribute less than $16,380, were less likely to receive a Level 1 award. Those students in

the lowest EFC quartile were most likely to receive a Level 2 award, followed by a Level 3 and finally by a Level 1 award. When we calculate the average EFC by award level received, Level 1 recipients' average $25,639 compared to Level 3 recipients, whose families are expected, according to the federal methodology, to contribute an average of $21,469 annually toward their postsecondary education.

Where are APS Recipients Pursuing Their Postsecondary Studies?

For the high school graduating class of AY11, in addition to regionally accredited institutions, 13 career and technical education institutions in the state were approved for students to attend and receive the APS[7]. However, only eight institutions were attended by APS award recipients in their first year after graduation. (See Exhibit 9.)

Because APS funds are available for up to six years after graduation from high school, and because many students pursuing career and technical training do so after having already entered the labor force, it is expected that the number of students using the APS for certifications and vocational licensure will increase in the future. However, a surprisingly low number of APS-eligible students used their scholarships to pursue certificates and licenses their first year after graduation. Of the 870 students who received a scholarship immediately after graduating, only 22 pursued a certificate.

EXHIBIT 9. APS Recipients and Postsecondary Attendance by Institution

Institution	Total # of Awards
Alaska Bible College	5
AVTEC	7
UAA	497
UAF	316
UAS	40
Other Institutions	5

As noted earlier, nearly as many eligible students pursued their postsecondary studies outside of Alaska as did in the state. (See Exhibit 6, page 10.) The largest number of students, both in terms of overall graduates and in the number of APS-eligible students, attended a postsecondary institution in Washington, followed closely by Oregon. Colorado was the only other state attracting at least 100 graduates from the class of AY11, while Montana, California, Idaho and Arizona each attracted more than 50 graduates. A list of those states where 10 or more recent graduates were attending can be found in Appendix B.

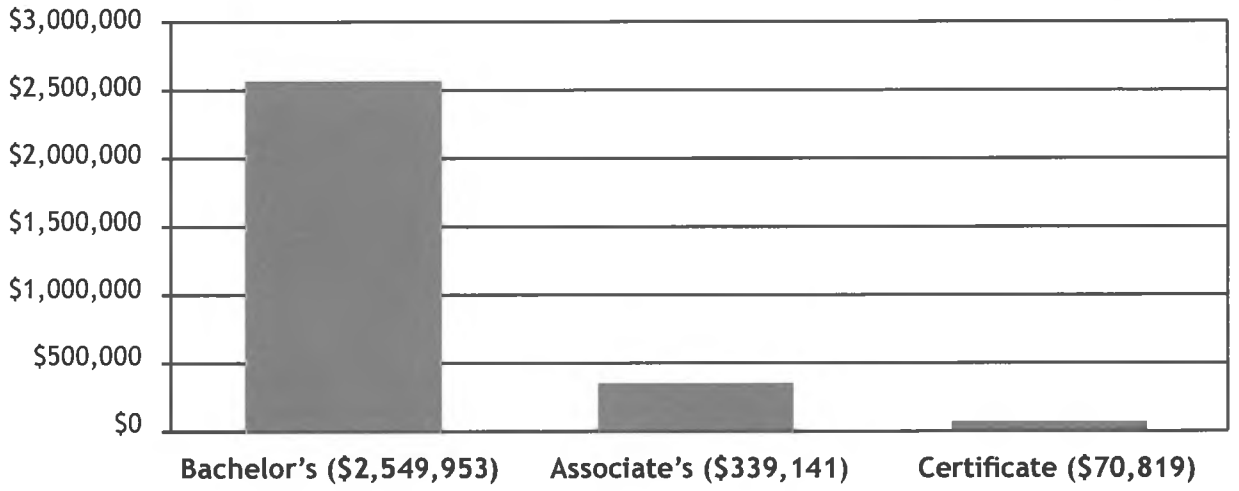
How Much In APS Funds Was Awarded, And For What Types Of Enrollment?

As of November 14, 2011, the APS program had paid out $2,959,913 to 870 recipients pursuing postsecondary education at a qualified institution in Alaska, for an average award amount of $3,402 per APS recipient[8]. As mentioned above, the majority of students used the APS to pursue degrees, either associate's or bachelor's, and so very little of the nearly $3 million was used to pursue certificates. (See Exhibit 10.)

[7] For a list of participating institutions and programs, see Appendix B.

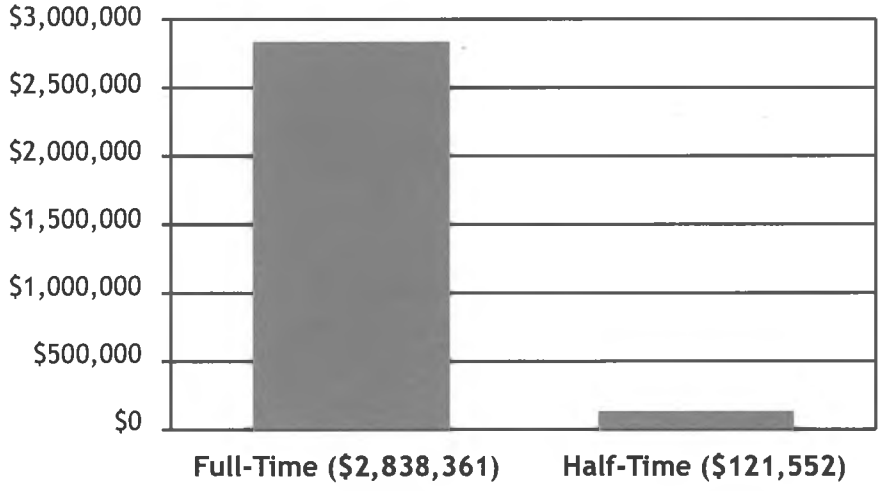
[8] As of December 20, 2011, the total amount awarded has risen to $3,006,713, with 902 recipients receiving funds.

EXHIBIT 10. APS Award Amounts by Degree/Certificate



APS recipients decided overwhelmingly to pursue postsecondary studies on a full-time basis. Because the APS can be used to pay for only four years (eight semesters or twelve quarters of studies), and because the award is reduced by 50% for attending less than full-time, students may be attempting to maximize the amount of the award they are eligible to receive. However, there are additional benefits to students for attending full-time - they are able to complete their degree sooner and therefore enter the workforce sooner, maximizing the return on their educational investment. Moreover, students who attend full time are more likely to complete their degree or certificate than those who attend less than full time.

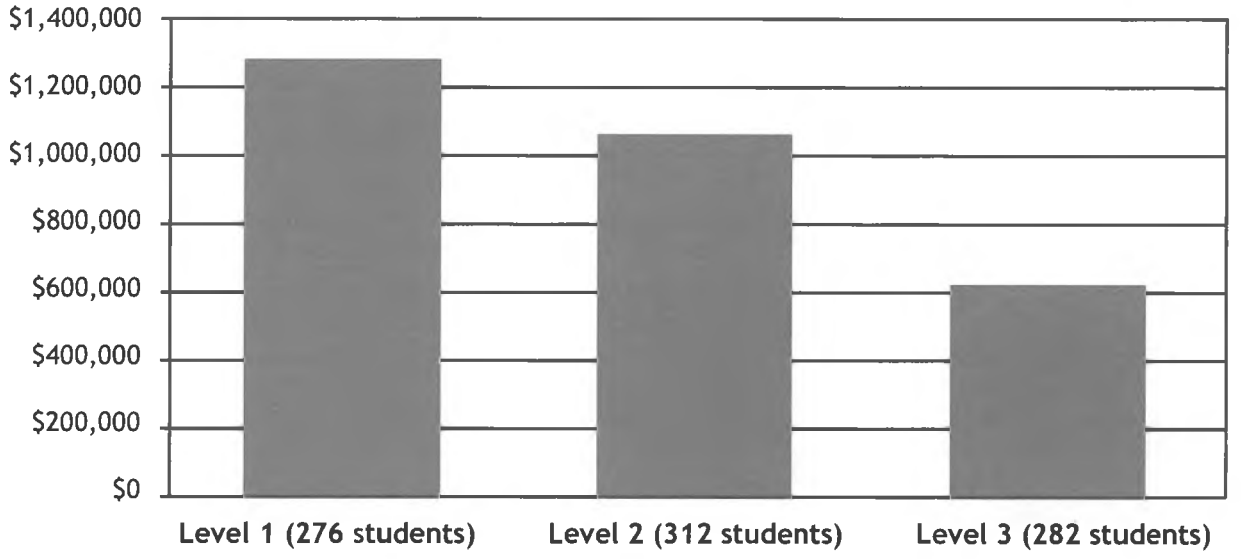
EXHIBIT 11. APS Award Amounts by Enrollment Status



As shown in Exhibit 12, given the differences in the amounts awarded at each level, most APS funds were expended for the top award level, even though this level had the fewest recipients[9].

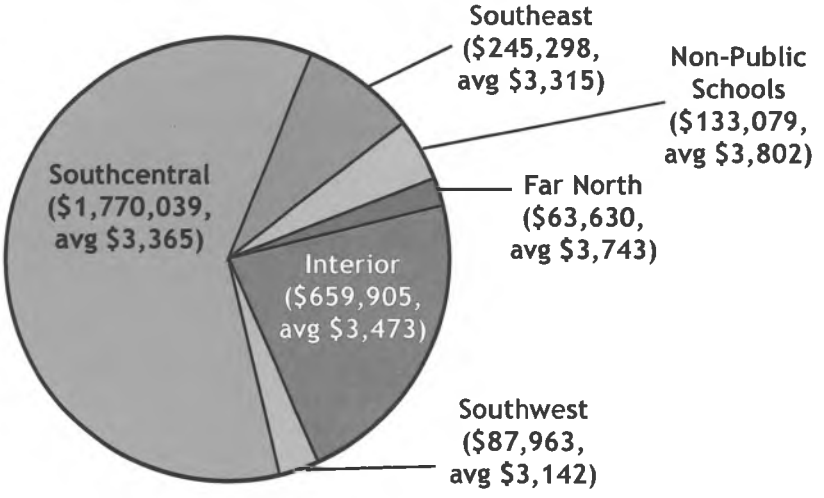
[9] Numbers of recipient students do not match those in Exhibit 3, which included only public school eligible and recipient students.

EXHIBIT 12. APS Award Amounts by Award Level



The Southcentral region receives funding roughly proportional to the number of APS recipients who come from the region, though the average award in the region is slightly less than the statewide average of $3,402. (See Exhibit 13.) Note that while 35 non-public school graduates from the class of 2011 received an APS award and were included in the chart, these students were not allocated to a region.

EXHIBIT 13. APS Total and Average Awards by Region



How Does the APS Affect Educational Attainment?

The APS goals include improving students' high school performance and preparing them for postsecondary education and career success. Evaluating progress in achieving these goals will require several years of information comparing APS recipients to non-recipients in their postsecondary education and labor force performances.

Given the program's short history, AY11 high school graduates had few opportunities to change behaviors in order to be eligible for an APS award. In future years, as the APS eligibility requirements for rigorous

curricula are completely phased in, students will have more time to align their course plans. We will then be better able to measure if the APS motivates students to push themselves academically, and if the APS' "invitation to excellence" is broadly accepted and reflected in the performance of the recipients. (For more information on how the APS affected students' behaviors in high school, see the section "APS Survey Findings" on page 19.)

Determining the appropriate measures to evaluate APS outcomes can be complex. For example, with regard to postsecondary education, three typical measures of success are: reduced remediation, increased student retention from one year to the next, and an increase in graduation rates. However, much of the information required to determine how successful the class of AY11 has been in these regards is not yet available.

There is preliminary information available on the patterns of UA first-time freshmen who enroll in preparatory (remedial) courses during the most recent fall semester. Nearly two-thirds of those who were not APS eligible enrolled in some type of preparatory classes. More than one-half of these APS-ineligible students were enrolled in preparatory mathematics courses, and more than one-third were enrolled in preparatory English classes. By comparison, just over one in four APS eligible students took any preparatory classes in their first semester at UA. (See Exhibit 14.) As would be expected, those APS-eligible students at the higher award levels were less likely to take preparatory classes, with fewer than one in 10 students eligible for the top collegiate APS award taking any type of preparatory classes.

Not only did APS-eligible students take fewer preparatory courses, but they also enrolled in more credit hours in their first semester than did the ineligible students. Ineligible students attempted, on average, 11.3 credit hours in their first semester in AY12, of which 2.9 hours were preparatory classes. APS eligible students attempted on average 13.6 credit hours in their first semester, only one of which was in a preparatory class. Because preparatory courses do not count toward degree requirements, the average APS student, if they successfully complete their first semester course load, ends up with 12.6 credit hours to apply toward a degree, compared to 8.4 hours for an ineligible student who successfully completes their first semester classes.

EXHIBIT 14. UA First-Time Freshmen in AY12 Taking Preparatory Courses and Average Credit Hours Attempted[10]

Total Headcount of First-Time Freshman, AY12 = 3,631	Non-APS-Eligible First-Time Freshmen	APS-Eligible First-Time Freshmen				
		Total Eligible	College Level 1	College Level 2	College Level 3	All Vocational
Total Student Headcount	**2,751**	**880**	**262**	**310**	**287**	**21**
Students Taking Any Preparatory Courses	**1,784**	**241**	**23**	**86**	**124**	**8**
Percent of Total Headcount	64.8%	27.4%	8.8%	27.7%	43.2%	38.1%
Students Taking Preparatory Math	1,504	207	21	71	108	7
Percent of Total Headcount	54.7%	23.5%	8.0%	22.9%	37.6%	33.3%
Students Taking Preparatory English	1,003	52	2	15	32	3
Percent of Total Headcount	36.5%	5.9%	0.8%	4.8%	11.1%	14.3%
Average Total Hours Attempted	11.3	13.6	14.5	13.6	13.0	12.8
Avg. Preparatory Hours Attempted	2.9	1.0	0.3	0.9	1.6	1.7
Avg. Preparatory Hours - Math	1.7	0.7	0.2	0.7	1.2	1.1
Avg. Preparatory Hours - English	1.1	0.2	0.0	0.2	0.4	0.5

[10] Data reflect student enrollments for the opening of the fall semester, and credit hours are credit hours attempted. Preparatory Studies and Preparatory Science courses are not included in the analysis above, and numbers are subject to change once closing data for the fall semester becomes available.

The benefits from the APS will occur if more students are successfully motivated to study harder in order to maintain a high GPA and to take rigorous classes to become APS eligible. These two factors will contribute to higher standardized test scores, and therefore less need for remediation and greater success in postsecondary pursuits.

One future measure of such motivation will be the number of students who take college entrance examinations. There was only a limited opportunity for AY11 graduates to increase their test taking during this first year of the scholarship. However, information is available from both ACT and College Board, the organization which administers the SAT, on the number of students in each graduating class taking their tests over the past several years. As future years' graduates prepare to qualify for the scholarship, it is expected that the numbers and percentage of students taking one or both tests should increase. Historically, as the percentage of students taking these tests increases, the average scores decrease. Tracking the test-taking patterns and average scores of future graduates will provide some insights into the scholarship's ability to motivate students to pursue higher education, and also on how well increased rigor and the emphasis on higher performance in secondary school translates into higher scores on college entrance examinations. As a benchmark, for the graduating class of 2011, 40% of those graduates had taken the ACT, and of these 54% scored 21 or higher on the composite score, the minimum score to become APS-eligible using the ACT[11].

EXHIBIT 15. Number and Percentage of Alaska High School Graduates Taking College Entrance Examinations by Year, 2006-2011[12]

Numbers and Percentages of ACT & SAT Test Takers By Year

	2006	2007	2008	2009	2010	2011
AK High School Graduates	7,361	7,666	7,855	8,008	8,245	8,064
ACT Test Takers	1,987	2,106	2,047	2,254	2,228	3,022
% taking ACT	27%	27%	26%	28%	27%	37%
SAT Test Takers	(not available)	4,050	4,060	3,899	4,089	3,866
% taking SAT		53%	52%	49%	50%	48%

UA data was also able to capture how quickly recent high school graduating classes' students began work on their degree. Exhibit 16 again uses the most recent three years' public high school graduating classes, noting how many students in each class began their postsecondary studies within one year of graduation, and the types of degree or certificate they pursued. For AY11, UA was able to match its APS-eligible students to EED's AY11 graduation data, and to the types of endorsements they pursued. Of UA's 880 APS eligible students, 852 had graduated from public schools. Over the past three years, the percentage of Alaska public school graduates attending UA within one year of their high school graduation has remained relatively stable, between 26% and 29%. However, for the population of APS-eligible students in AY11, 36.7% attended one of the UA schools in the fall semester following their high school graduation.

[11] ACT Profile Report - Alaska, Graduating Class 2011. Similar statistics were not yet available for SAT test takers.

[12] Percentages of test takers will not match those as reported by the testing agencies. ACT and the College Board use the Western Interstate Commission for Higher Education's (WICHE) projections of high school graduates by year. Percentages calculated in Exhibit 15 represent the number of test takers divided by the number of public school graduates receiving diplomas as reported by EED.

EXHIBIT 16. High School Graduates Pursuing Postsecondary Degree/Certificate at UA Within One Year of Graduation[13]

	Public School Graduates			APS Eligible, AY11		Percentage of Public School Graduates			Percentage APS Eligible, AY11
	AY09	AY10	AY11	Public	Other	AY09	AY10	AY11	Public
Total Graduates	7,997	8,249	8,064	2,322					
Total Degree/ Certificate Seekers	2,093	2,374	2,144	852	27	26.2%	28.8%	26.6%	36.7%
Bachelor's Degree Seekers	1,387	1,532	1,442	697	20	17.3%	18.6%	17.9%	30.0%
Associate's Degree Seekers	653	793	651	121	7	8.2%	9.6%	8.1%	5.2%
Certificate Seekers	53	49	51	10	0	0.7%	0.6%	0.6%	0.4%
Pending Endorsement	n/a	n/a	n/a	24	1	n/a	n/a	n/a	1.0%

In addition, these APS-eligible public school graduates exhibit a tendency to pursue higher degrees, thus committing to stay in school longer to attain their degrees. For all Alaska public school graduates in the last three years, between 17% and 19% pursued a bachelor's degree within a year after their high school graduation. For the inaugural class of APS-eligible students, 30% enrolled in a bachelor's degree program. In addition, because the AY11 cohort data is based only on fall semester enrollments, the percentage of AY11 students seeking a degree or certificate within one year of graduation will likely go up.

Some of these students' tendencies may be based on the fact that APS recipients have shown a history in secondary school of achieving good grades and high test scores, so these students could be more likely to pursue postsecondary education than an average student. APS recipients' higher first year attending rates could also be driven by the APS rewarding them to attend school in Alaska. Still, it appears that APS recipients are more likely to pursue postsecondary education within their first year after graduation, and at a rate substantially above the average rate for all students.

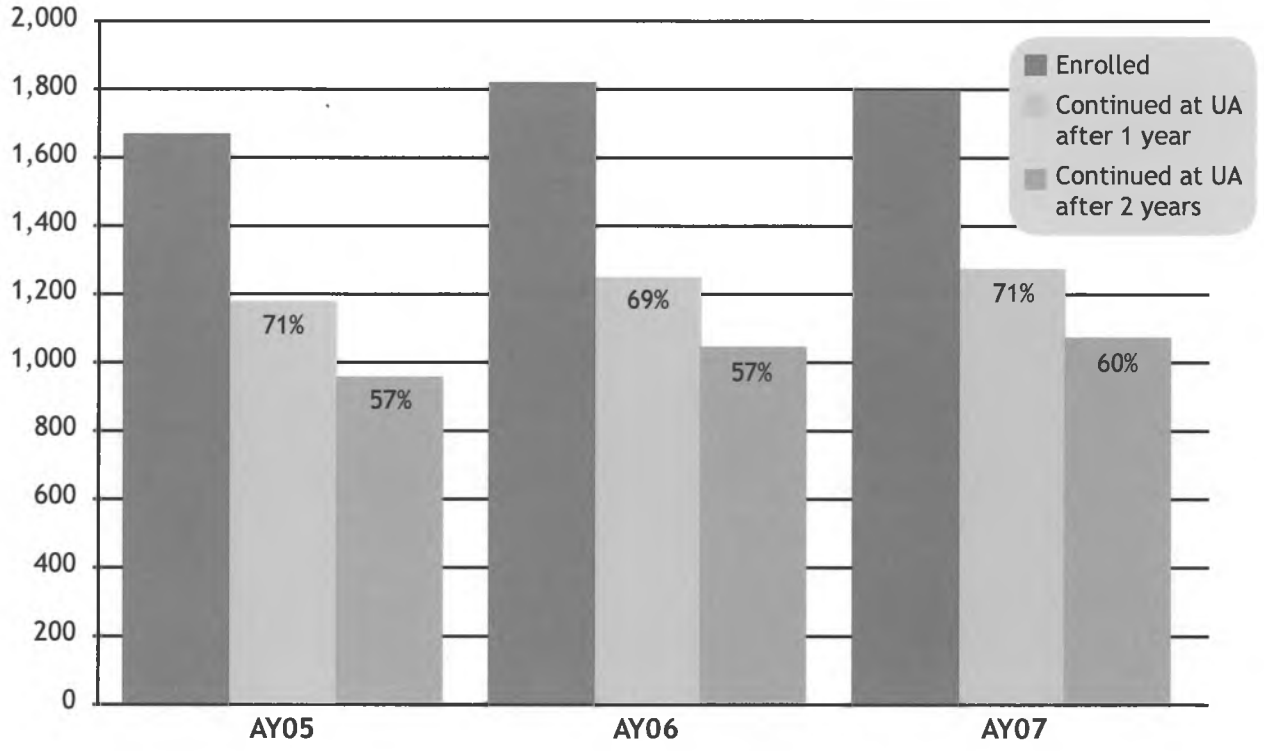
Pursuing postsecondary education soon after graduating from high school can have several benefits for students. Students' retention of information learned in high school diminishes over time, so attending a postsecondary institution early can reduce the need for remediation. Students also complete their degrees sooner, the earlier they begin their pursuit of one, giving them more years to reap the rewards of higher education.

With only one semester of postsecondary data available for review, first year attendance and remedial classes taken are the only two measures of postsecondary performance available at this time. The next potentially measurable effect of the APS, second year student retention rates, will not be available until the fall of 2012[14]. Still, historical data is available, and can be used to illustrate current student retention rates in order to create the benchmark that the APS program will be compared against. Exhibit 17 shows Alaska high school graduates from AY05 through AY07 enrolling within one year of their high school graduation (so enrolling at UA in AY06 through AY08.)

[13] AY11 data is based on information gathered at the beginning of the semester, while previous years' data reflects information gathered at the close of the semester. In the table, "Public" indicates APS students matched to AY11 EED data. "Other" includes those students graduating from non-public schools in AY11 who are eligible to receive an APS award. Because the total number of non-public school graduates in Alaska is not known, no percentages were calculated for this student population. "Pending Endorsement" includes students awaiting admission into a degree or certificate program.

[14] Going forward, NSC data can help measure whether the APS has affected students' decisions on where to attend school, and if the APS makes students more likely to pursue their postsecondary studies in Alaska.

EXHIBIT 17. Retention of AY05-AY07 High School Graduates Attending UA Within One Year of Graduation



Without linking those students who end up not returning to UA after one or two years to other data sources, most notably the NSC data, we cannot determine if these students actually stopped pursuing their postsecondary education, or if they continued at another postsecondary institution. Still, more than one in four students did not return to their declared degree program at UA after their first year, and more than one in three were no longer pursuing their degree after two years.

For AY11 high school graduates, the 2013 APS outcomes report will be able to provide comparable retention rate measures for all students attending UA, and for the subset of APS recipients. Similar to the first year postsecondary attendance rates, APS recipients may have other factors that affect their retention rates, but it is reasonable to believe the scholarships will incent students to remain in school and complete their degree. As recipients progress through their postsecondary studies, data from their attending institutions and the NSC will help provide additional measures as to the scholarship's influence on recipients.

Educational attainment data even further into the future will include APS recipients' graduation rates, how they compare to the overall student population, and how quickly they earn their degree or certificate. However, a sufficient number of years must elapse before the data on this measure of the APS' success is available.

In preparation for future reports on the outcomes of APS students, UA's IRA unit compiled UA graduation rate data on Alaska high school students using the most recent graduating class for which complete information is available, AY05[15]. Comparable data for AY06 and AY07 is not yet available, since these students have had less than six years in which to complete their degrees. Information presented for AY07

[15] Completion information and graduation rates are generally calculated based on 150% of the normal time to completion for the degree or certificate. For a bachelor's degree, which normally takes four years to complete, graduation and completion data is then based on six years after the student begins their postsecondary education. Similarly, associate's degree and two-year certificate programs are calculated after three years. For the high school graduating class of AY11, comparable completion and graduation rates information for four-year programs will not be available until after AY17, but completions will be reported in the first year data is available.

completers represents those students who completed either a bachelor's or associate's degree within four years (graduating with their degree in AY11).

In Exhibit 18, we can compare AY05 completion rates to AY07. At 31.6% versus 14%, it is obvious that a significant share of students take more than four years to complete their degree. While comparable data for APS recipients is several years away, APS' effect on degree completion and the average number of years required to complete a degree will be an important measure.

EXHIBIT 18. UA Degree and Certificate Completion by AY11, for AY05-AY07 High School Graduates Attending UA Within One Year of Graduation

Graduates Pursuing a Degree	AY05	AY06	AY07
Total Enrolled in a Degree Program	1,674	1,824	1,802
Total Completing Program	529	397	253
Percentage Completing Program	31.6%	21.8%	14.0%
Average Years to Completion	4.42	4.03	3.48

Graduates Pursuing a Certificate	AY07
Total Enrolled in a Certificate Program	38
Total Completing Program	9
Percentage Completing Program	23.7%
Average Years to Completion	1.44

How Does the APS Affect Workforce Success?

As a part of the analysis of how the APS affects students, DOLWD will in the future be able to provide information relative to several indicators of workforce success and how receipt of the APS changes students' behavior while in school. For example, one effect of the APS might be that the additional funds provided allow students to focus more on their studies and less on earning money to pay for school. We know that the majority of APS recipients are attending school full time, and we can compare recipients' wage earnings while in school to similar non-recipients to see if the APS allows a student to focus on their studies.

DOLWD will also be able to provide the average earnings of APS recipients, determine if their occupation is related to their degree, and determine how many remain in Alaska versus leaving the state to pursue a career elsewhere. Labor outcomes can be measured among the three eligibility levels for both recipients and non-recipients, and between eligible and ineligible students. Similar to graduation rates, however, this information will be available only after the APS cohorts are more fully matured.

APS Survey Findings

In December, ACPE surveyed approximately 1,800 students who met the academic requirements to receive an APS award. These students were a subset of the 2,322 APS-eligible students - they had filed a FAFSA and included an email address in that application. Students did not have to have received an APS award in order to be included in the survey, though students filing a FAFSA are those most likely to pursue postsecondary education. Therefore the selection process was biased toward those students intending to be enrolled in postsecondary studies in 2011-12 and therefore more likely to have received the scholarship.

The survey included several multiple choice and scaled questions, as well as opportunities for responders to provide their own comments. Selected comments gathered through the survey have been interspersed throughout this report. Not all comments received were positive, though most negative ones focused on the scholarship's requirement that it be used only at in-state schools, and in some cases on the confusion and lack of information available about the scholarship in this its first year. (Representative comments, both pro and con, are included in Appendix C.)

Responses were collected from 357 students, or 20% of the students who were asked to participate. Response rates ran from a high of 23% for award Level 1-eligible students, down to 16% for award Level 3-eligible students. Nearly 90% of respondents were pursuing a degree, and 5% were not pursuing postsecondary education. Of those pursuing postsecondary education, just over one-quarter were attending school outside of Alaska and were therefore not eligible to receive the award in AY12.

Two-thirds of the survey respondents, 237 students, said that the APS affected their decision to attend school. Nearly two-thirds of these students said the APS affected their decision to pursue their education in Alaska, and over 20% said that it made them consider doing so, even though they eventually went to an out-of-state school. Over one-quarter of the respondents said it was extremely important in influencing their decision on whether or not to pursue postsecondary education.

When asked about their use of the APS, 58% of respondents said it was extremely likely that they would make use of their entire APS award within six years of graduating, and 44% said they were extremely likely to do this within four years. Two-thirds of respondents said that it is extremely likely that they will attend school full-time.

Although the APS program was new this year, and final outcomes regarding funding were not available until the spring, 55% of students knew that they could become eligible for the APS before or near the beginning of their last semester during their senior year. Another 19% found out shortly before their graduation, and only 5% discovered they were eligible after having arrived at their postsecondary institution. Nearly 10% of students surveyed stated that they weren't aware that they were eligible to receive the APS until they received the ACPE survey, but this high level was partially due to confusion in their interpretation of the question - 29 of these 34 students were attending an out-of-state institution, so while they were academically eligible they did not meet all requirements to actually receive an APS award. Thirty-nine percent of students learned about the APS through a teacher or school counselor, and 29% through a parent or guardian.

Students were seemingly well-informed about the program and their status. Two-thirds knew the award level they were eligible to receive, and 40% knew the dollar value of their award. (See Exhibit 19.)

EXHIBIT 19. Survey Respondents' Knowledge About the APS and their Eligibility Status

Knew the award level for which they were eligible	67.5%
Knew the amount of their award	40.4%
Knew the APS was available only if they attended a qualifying Alaska school	78.1%
Knew they must attend at least half time to receive the scholarship	38.4%
Knew that they would be eligible to receive up to four years of funding	57.3%
Knew that they had six years in which to use the APS	24.8%

The high school graduates in AY11 had little opportunity to change their approach to the classes they took or the effort they expended in order to become eligible for the APS - 69% said they made no changes. Almost 16% said they worked harder to increase their GPA, 12% said they retook a standardized test in hopes of increasing their score, 10% made changes to the classes they had planned to take, and 8% took a standardized test when they would not have done so otherwise.

Conclusion

With the first-ever APS recipients just finishing the first semester of their postsecondary studies, it is impossible to determine the long-term effects of the scholarship, and it is too early to tell if the eligibility and enrollment patterns seen in this first year were caused by the APS, or if they will continue into the future. Because the information available at this early date is so preliminary, it will be subject to revision as a more complete picture of these students' performance during their first semester of postsecondary studies becomes available.

Until comparative data for APS recipients versus non-recipients becomes available, some of the best information comes directly from students who are eligible to receive the scholarship, and their thoughts on how the APS program has affected them. A significant number of recipients expressed their belief that the scholarship had allowed them to pursue postsecondary education, with one-quarter saying that it was extremely important in their decision to even pursue postsecondary education. Two-thirds of surveyed students responded that it strongly influenced their decision to attend school, and most credited the APS with their choice to attend school in Alaska.

In future years, as more data becomes available, additional assessments of APS' effectiveness will be possible, and a better determination can be made as to what extent the scholarship is meeting its intended goals. For the 2013 report, examples include preliminary information on students' retention rates and more complete information on the number of remedial credit hours being taken by AY11 graduates. Information on satisfactory annual progress of APS recipients will also be available, and can be compared to non-recipients' progress. There will also be data on the number of graduates beginning their pursuit of postsecondary training in their second year after high school graduation, and on those students initially attending institutions outside of Alaska and then returning in their second year. In subsequent years, information on degree/certificate completions and labor force participation will become available, and will offer even more meaningful measures of the success and value of the Alaska Performance Scholarship.

"I think it is an amazing thing to offer a scholarship to encourage students to stay in Alaska. I love Alaska and find it sad that a lot of students my age are so eager to flee the state after graduating."

Level 3 APS Recipient, in response to APS Outcomes Survey

"I really appreciate that I get APS. It really helps me pursue my education and life goals. It is extremely hard to work and study and any financial assistance helps a lot. Thank you very much for helping me pursue my goals. I'm greatly thankful for the opportunities I have."

Level 3 APS Recipient, in response to APS Outcomes Survey

"Thank you for rewarding my efforts in high school with this scholarship. Every bit of financial aid encourages and empowers Alaskans to pursue a higher education. If the state invests in us, the youth, we will invest in the state with the power of our minds and ideas. It is because of programs like this that advocates for positive change are born."

Level 2 APS Recipient, in response to APS Outcomes Survey

"It was a very nice surprise to see that I did not have to pay for school at all with this scholarship and all of my others. It is helping my family very much not to have to get a loan. It is a nice way to see that the state wants their children to go to college and will help you with that."

Level 2 APS Recipient, in response to APS Outcomes Survey

"This scholarship program is opening up so many doors I never thought would be open and available to me. Thank you so much!"

Level 1 APS Recipient, in response to APS Outcomes Survey

"You have changed my life and future. Thank you for investing in me. I will do my best to use your faith in me well. My home is here; and hopefully will always be here."

Level 1 APS Recipient, in response to APS Outcomes Survey

APPENDIX A.

Determining APS Eligibility

For the high school graduating class of 2011, a student could become eligible for the APS by:

- ✓ maintaining a minimum grade-point average in high school of 2.5 or higher;
- ✓ achieving a minimum score on a college entrance exam to be eligible for an APS which could be used to pursue a degree or a certificate, or achieving a minimum score on a standardized examination designed to measure a student's level of preparedness to transition to the workforce to pursue a certificate or professional licensure; and
- ✓ completing a rigorous core curriculum that included four years of language arts, three years of social studies, a minimum of two years of each and five years combined of mathematics and science, and one year of physical education.

The APS rigorous curriculum is being phased in over four years to give school districts time to incorporate changes to meet the new requirements. Therefore curriculum requirements for the class of 2011 were less rigorous than ultimately established by the APS legislation. In 2013, students must complete:

- ✓ either four years of mathematics, science, language arts, and social studies; or
- ✓ four years of language arts and social studies, three years of science and mathematics, and two years of a foreign language or an Alaska Native language.

If a student met the rigorous curriculum requirements, their GPA and college entrance and standardized test scores were used to determine the APS award level the student could receive, and therefore the amount of their scholarship. (See Exhibit 1.) A student is eligible only for the lowest award level based on their GPA and test scores. For example, consider a student with an SAT score of 1710 and a GPA of 2.6. Although the SAT score would qualify for an APS Level 1 award, it must be combined with a GPA that also qualifies for Level 1. In this example, the lower GPA drops the student's eligibility to a Level 3.

EXHIBIT 1. APS Award Levels and Minimum Requirements

APS Award Level	Minimum GPA	Minimum Standardized Test Scores (only one test required)			Award Amounts
		Collegiate & Career/Technical		Career/Technical Only	
		SAT	ACT	WorkKeys	
Level 1	3.5	1680	25	5 in three subject areas	$ 4,755
Level 2	3.0	1560	23		$ 3,566
Level 3	2.5	1450	21		$ 2,378

The type of standardized test the student takes affects the award type they are eligible to receive. Scores from the two college entrance exams, the SAT and the ACT, can be used to determine a student's eligibility for both a collegiate award and a career/vocational award. In the example described earlier, the student would be eligible to pursue either a degree or a certificate or vocational license and receive a Level 3 award. However, the WorkKeys test scores can only be used to determine a student's eligibility to receive a scholarship to pursue a certificate or vocational licensure program. WorkKeys scores will not qualify a student for a collegiate award. To become eligible for a collegiate award, the student would need to take a college entrance exam.

RECEIVING THE SCHOLARSHIP

To actually receive the APS scholarship, a student must:

- ✓ submit a FAFSA or an approved alternative application no later than June 30 for the following academic year[16];
- ✓ enroll in a qualified postsecondary program at one of the 23 participating institutions, or pursue an approved certificate or vocational licensure program at one of 13 career and technical education institutions in the state;
- ✓ enroll in:
  - ❖ at least 12 credit hours for each semester to receive the full amount of their APS award during their freshman year, and 15 credit hours in subsequent years; or
  - ❖ at least 6 credit hours to receive a half-time award[17]; or
  - ❖ a qualifying clock-hour CTE program.
- ✓ have an unmet cost of attendance[18] of $500 or more in order to receive the scholarship.

[16] For AY11 graduates, the FAFSA and alternative application deadlines were extended to December 15, 2011, because of the availability of funding to provide additional scholarships after the June 30 filing deadline.

[17] Students pursuing graduate degrees have lower credit hour limit requirements.

[18] The cost of attendance includes tuition, fees, books, required tools and supplies, room, board and transportation. This amount is reduced by all other non-loan aid (scholarships, grants, etc.) for which a student is eligible to calculate the unmet cost of attendance. If the unmet cost of attendance is less than $500, a student does not receive any APS funds. If the unmet cost of attendance is greater than $500 but less than the available APS award amount, the student receives only the amount of their unmet cost of attendance.

APPENDIX D.

Sample APS Recipients' Comments to Survey

Responders to the APS survey had an opportunity to provide comments on how their eligibility to receive the APS affected their decision on whether and where to pursue their postsecondary education, and were asked if they had any additional thoughts on the scholarship. In total there were 335 comments provided by responders, with a sampling of them below. Responses have been separated into generally positive and generally negative ones.

Examples of responders' positive comments on the APS program:

I was going to transfer after a year or two, but now I'll probably stay in Alaska all four years.

It made me stay in Alaska instead of leave the state for a different college.

The scholarship was appreciated and is a great initiative on the part of the State of Alaska. Suggest that even though a student doesn't study in Alaska, if the student comes back to Alaska and works for five years that the APS be awarded to pay student's college loans. Alaska is still benefiting from having a college educated worker in Alaska; just as if the worker studied in Alaska.

I was excited to learn that I can use it for two year of graduate school after I graduate from an out-of-state university. It has given me an incentive to return to Alaska. I like having plans for my future!

It was a huge deciding factor on whether or not I would be going to college, and if I would stay in-state.

I was going to attend Brown University, but the financial aid I received for studying within the state has encouraged me to stay in Alaska.

The APS scholarship is helping me stay in school. I could have gone to just the certification on the previous scholarship money and money I had saved. Now I will apply the APS money toward my associate's and my bachelor's degrees. I will be in the aviation industry and am convinced that a 4 yr degree is important. I thank the APS board for this assistance.

Since my family is low-income, my parents would not have been able to pay for my education. The APS Scholarship encouraged me to continue with my post-secondary plans and gave me a means to do so. It is a great idea =).

It made it possible. I graduated a year early from high school. It was important to me to start taking a core classes right away and work into seeing what field I really want to study. The APS made this possible....THANK YOU!

Knowing that I had this extra help of funding for school, I decided to go for my full bachelor's degree instead of just my associate's.

I was considering other-out-of state schools, but I believed that this scholarship opportunity was too big to miss. Thus the APS was the deciding factor for me attending college in Alaska.

It was not advantageous to me to attend an in-state school before the APS became available. I was offered the top scholarship at Covenant College in Georgia and half tuition scholarships at two or three other schools. However, as an independent home school student I was not eligible for the UA Scholars program. Thank you for providing this merit-based program to Alaskans of all walks of life!

The APS helped me take a closer look at the field of study that I plan on pursuing (Applied Engineering) and see the excellent opportunities available at Alaskan universities.

I am a UA Scholar, so I knew that $11,000 of my tuition and fees would be covered if I chose to stay in-state. However, when I heard about the APS, I knew that it would cover any remaining tuition costs. This really closed the deal for me to stay in Alaska.

I would've attended the University of Washington in Seattle if there was no scholarship. I conducted a cost-benefit analysis of whether I should attend the University of Alaska Fairbanks or the University of Washington, and UAF proved to reap more benefits if attended. Also, this decision to decline the University of Washington was made in late June because I found out I was eligible for my scholarship level only then.

My candid opinion is that the APS is a step in the right direction; obviously, it is in its first stage, so the coordination problems are inherently understandable. However, more needs to be done. Higher education is too expensive, still, even in-state.

This scholarship is a great idea for helping low-to-middle-income students get through college. In general, this segment of students falls through the cracks, insofar that need-based scholarships seldom accept them and their family's income often prevents them from going to a choice school without taking out costly loans. Furthermore, the scholarship is well-rounded in its brackets, however I know of a few students who missed out on it by falling short in only one of the admission factors. A little more leniency would go very far, as poor test-takers are often not poor students.

I believe the Alaska Performance Scholarship promoted the competitiveness of the University of Alaska system in its attempt to endorse post-secondary education in the state. Also, I would also want to mention that the costumer service was remarkably great. I was surprised that those answering my calls were knowledgeable and did everything to help my cause, so I commend them for that!

I wasn't sure who to contact in an effort to thank you all for this scholarship, but I am very grateful for this award. I plan to use it all, and I'm working towards maintaining my GPA so I can use it.

Examples of responders' negative comments on the APS program:

I felt cheated. I worked hard, took difficult classes and did well. Why should I be discriminated against and denied access to these public funds because I am going to school Outside? I actually cost the State of Alaska less since I am out of state. UAA tuition is already subsidized by the state.

Since I was misinformed and made my plans accordingly, I have to come up with a different plan that will now take longer and cost me more money than anticipated! Very disappointed!

I was already pretty certain about going to school in Alaska. I think high school should inform students better about how the program works. I know a lot of girls who didn't know they could get it with their grade 3.0's and so they didn't take the ACT or the SAT.

I had already applied and gotten in to out of state schools by the time that I knew about APS, so it didn't affect my decision much, but may in the future since I can use it for up to six years after graduating.

It did not offer me much and indicated I would get more by going out-of-state. I already knew I would be pursuing a postsecondary education. I already had full-tuition waivers, honors program offers, and other scholarship opportunities that were much better.

I think high-achieving students should be able to receive the APS even if they attend school out of state. Although I understand the appeal of keeping these students in Alaska, the fact remains that those students eligible for the APS who wish to pursue higher education out of state usually have to pay more for school than they would remaining in Alaska without the APS. There should be a level of APS that can be given regardless of the location of the chosen university of the student.

Originally I had trouble receiving this scholarship. I was eligible, but I had a few complications with the school and with my FAFSA. I ended up receiving the scholarship about a month late, but I was pleased that I was still able to receive it. After I emailed the APS through the website they were very helpful.

I could not receive the APS because I was over-awarded by many other scholarships I applied and competed for. If I knew that the APS scholarship would have been funded earlier, I could have spent less time on scholarship applications and more time studying or doing athletic sports.

I wish I had received more information on the APS. I didn't realize this award was different from some of the other scholarships offered to Alaska students, so I didn't think to look further into it.

It is a great scholarship, but I would like to see more scholarships for Alaska residents pursuing other studies that are not available in Alaska.

We had a very complicated experience with getting the 2nd set of SAT/ACT scores from the high school to the state. Each thought the other was responsible for getting scores from one place to the other. If it wasn't for the perseverance of my mother facilitating and phone calling everywhere my APS opportunity would have slipped through the cracks and I would not have gotten it! No one really understood the process or procedures at the time and it was very frustrating and messy. Maybe next year it will go smoother for students and families! Thank you very much for helping me and my family pay for college in Alaska. We are grateful for the support at home here in Alaska.

APPENDIX E.

Alaska Regions Referenced in the APS Report

March 9, 2012

Alaska House Education Committee:

The House Education Committee, through Chair Alan Dick, asked the department to be prepared to discuss with the House Education Committee the proposed Alaska mathematics standards on March 12, 2012, and the proposed language arts standards on March 16, 2012. Several specific questions were posed, as referenced in the accompanying letter. I will take advantage of this opportunity to address issues raised in this letter, and deeper discussion can occur during the upcoming hearings.

Between February 2010 and November 2011 the department held eight meetings to develop the standards. Two-hundred twenty-eight people participated in those meetings. Most of the participants were educators from diverse regions across the state, as documented in an email sent to Representative Dick's staff on November 22, 2011. Twenty-eight of the individuals who participated were from non-K-12 programs, including industry, career-technical education programs and universities. Many people from industry were invited, and approximately ten industry and career-technical training stakeholders participated.

As requested, I am enclosing in this letter as one of the attachments a document, previously provided to Representative Dick's staff, which outlines who participated in the development of these standards during the eight meetings conducted by the department. This listing provides the name, affiliation, and home city of each participant. I have not provided contact information, however, as I did not seek their permission to do so when they agreed to serve.

In December the State Board, at their quarterly meeting, reviewed the standards and voted to put them out for public comment until May 2012. During the period of public comment the department has deployed multiple strategies to seek additional comment from stakeholders, including holding webinars about the standards. The department will have conducted six webinars each on the mathematics and language arts standards prior to April 17. The department will host meetings seeking input from industry in different regions of the state, including one via audio/webinar to allow for people to participate regardless of location. In June the State Board will review the entirety of the written public comment, take public comment in person, and will consider taking action.

The next webinar regarding the language arts standards will take place March 20, and the mathematics standards webinar will be March 21. To register go to:
http://www.eed.state.ak.us/tls/assessment/2012AKStandards.html

printed on recycled paper

The question was also asked who is the audience is for the standards. Academic standards are technical documents written for teachers, writers of curriculum, and writers of assessments -- those responsible for implementing the standards. The proposed standards use the technical terms of education, language arts and mathematics. Mathematics in particular, especially in the higher grades, uses complicated technical terms and concepts.

If the State Board approves the standards, the department will create parent guides for each grade containing a summary in plain English of what students should know and be able to do in English language arts and mathematics. Note that even the National PTA's parent guides use technical terms to describe higher mathematics.

I have attached a document, titled "Memo on standards to the House Education Committee." This document explains what academic standards are, what are meant by college and career ready, and provides an excellent link for additional information. I am also attaching slides from a PowerPoint that provides an overview to the standards, and Deputy Commissioner Morse will address these slides during the March 12, 2012, House Education hearing.

I also want to make the committee aware of a research study commissioned by the department, and being conducted by the Center for Alaska Educational Policy Research (CAEPR) at UAA. This is a validity study examining courses at career and technical certificate-granting institutions as well as two- and four-year degree-granting institutions. The instructors in these institutions will provide specific information about their respective courses in relation to the proposed standards in reading, writing, and mathematics, ranking the standards by importance for entering students to know. Additionally, each instructor will be able to add comments that will address standards they feel are missing. This validity study will help the State Board know, prior to taking final action, if the standards match up with the expectations necessary to enter career-technical education programs and universities in Alaska.

In the letter there are several questions about the standards documents as well as the standards themselves. I believe the webinars, which were previously addressed in this letter, will provide an excellent background in the standards; however, to really address these questions in an authentic manner it would be best to see content standards in practice. To have an academic discussion about the standards may be interesting, but to see the standards in the context of a classroom where teachers are having children address complex problems is much more instructive. We had the opportunity to see state standards implemented in both math and science when the Task Force on Theme Based Education met in Barrow. Both lessons used the Inupiaq Learning Framework as the basis for instruction. I would be happy to work with the Juneau School District to identify teachers that could provide this experience to the full committee by conducting a field visit to a local school. I am confident that we could do that in a timely manner.

The discussion regarding how the standards are assessed will provide an outline of the next step involved in building or selecting an assessment tool. Ideally the department would conduct this process following board action and be prepared to use a new assessment in 2016. To develop the

test items, test blueprints and then item proposals will have to be built and vetted by Alaskans prior to field testing the items with Alaska students. This process, which engages educators and experts from the field of behavioral measurement, must be carefully crafted to ensure that a valid and reliable test is created for Alaska students.

Finally, let me address how the adopted Cultural Standards become a part of the content standards. The Cultural Standards, as well as many elements and values that are important to local communities -- such as geography, local industry, weather patterns, and community norms -- all become part of the curriculum and instruction. The standards are a statement of the content that must be learned by students; however, the curriculum provides the rich context in which those standards and many other important elements to learn are outlined. When students perform well on their local curriculum, they also will perform well on the statewide assessments as long as we build those assessments in a valid, reliable, and transparent manner.

I apologize but I will not be able to attend the hearing as I have accepted an invitation from the Chief Justice of the Alaska Supreme Court to participate in a National Leadership Summit on School Justice. In my absence Deputy Commissioner Les Morse will be present, and will be prepared to address the committee.

Sincerely,

Mike Hanley
Commissioner

Re: **New Math Standards**

Dear Commissioner Hanley:

On Monday March 12, the House Education Committee will begin hearings on the proposed Alaska State Educational Standards. We will begin with the Math Standards, and go through them with appropriate detail.

Please be prepared to comment on and answer questions regarding the following:

How many public hearings for the proposed State Educational Standards have already occurred?

Who was the target audience for the proposed standards? Teachers, curriculum coordinators, parents?

Please give the names and contact numbers for those who 1) participated in the development of the proposed Alaska State Educational Standards **and** 2) were ***not*** educators.

In the introduction to the Mathematics standards (p.3), is the statement that "They (the standards) simply establish a strong foundation of knowledge and skills all students need *for success* after graduation." As we discuss these standards, please be prepared to show how each of these skills will prepare students "for success," ie. real-life problems.

Please be prepared to explain and give examples for the *Standards for Mathematical Practice* on pages 4-15 in the proposed Alaska Mathematics Standards.

In the *Description of Mathematics Standards* (p. 3) it states: The high school standards set a rigorous definition of readiness by helping students develop a depth of understanding and ability to apply mathematics to novel situations, as college students and employees *regularly* do.

Please give a few examples of applying mathematics to novel situations.

On Page 4 of the same section of the Mathematics Standards, is the statement: These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. The first of these are the NCTM process standards of problem solving, reasoning and proof, communication, representation, and connections. The second are the strands of mathematical proficiency specified in the National Research Council's report Adding It Up: adaptive reasoning, strategic competence, conceptual understanding (comprehension of mathematical concepts, operations and relations), procedural fluency (skill in carrying out procedures flexibly, accurately, efficiently and appropriately), and productive disposition (habitual inclination to see mathematics as *sensible, useful, and worthwhile,* coupled with a belief in diligence and one's own efficacy).

Please explain the above and give examples of "productive disposition" that will be promoted by these standards.

Also on Page 4 of the Mathematics Standards:
What is meant by the following? How is a teacher to apply them?
3. Construct viable arguments and critique the reasoning of others
5. Use appropriate tools strategically
7. Look for and make use of structure
8. Look for and express regularity in repeated reasoning

From Pages 4-5 of the Mathematics Standards for the following, please give examples. Pick any real life situation.

1. Make sense of problems and persevere in solving them.
Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?"

Please describe examples of the following. **In grades 3-5 mathematically proficient students will**:

- explain correspondences between equations, verbal descriptions, tables, and graphs
- draw diagrams of important features and relationships, graph data, and search for regularity or trends
- understand the approaches of others to solving complex problems
- identify correspondences between different approaches
- check if the solution makes sense

Please describe examples of the following. I can see teachers doing these, but struggle seeing all students doing them. How would a teacher approach teaching these strategies?

In grades 6-8 mathematically proficient students will:

- explain correspondences between a new problem and previous problems
- represent algebraic expressions numerically, graphically, concretely/with manipulatives, verbally/written
- explain connections between the multiple representations
- determine the question that needs to be answered
- make a plan for attempting a problem
- choose a reasonable strategy
- identify the knowns and unknowns in a problem
- solve a problem in more than one way

Please give examples of the following using real life problems. How would a teacher approach teaching these strategies?

I**n grades 9-12 mathematically proficient students will:**

- make connections between a new problem and previous problems
- determine the question that needs to be answered
- make a plan for attempting a problem
- choose a reasonable strategy
- identify the knowns and unknowns in a problem
- break a problem into manageable parts or simpler problems

- represent algebraic expressions numerically, graphically, concretely/with manipulatives, verbally/written
- explain connections between the multiple representations
- solve a problem in more than one way
- explain the meaning of a problem and look for an entry point
- analyze a problem and make a plan for solving it
- explain correspondence between differing approaches to identify regularity and trends
- check answer using a different method
- identify correspondence between different approaches
- monitor and evaluate progress and change course if necessary
- check the answers to problems using a different method and continually ask, "Does this make sense?"

For the above, how would DEED assess the student's performance on the Standards Based Assessment and the High School Graduation Qualification Exam?

As the standards call for districts to implement the Cultural Standards, please give three examples of how they might do that using the high school standards. Use examples from any of the five Alaska Native cultural areas.

I look forward to our discussion.

Sincerely,

Representative Alan Dick Chairman

MEMORANDUM

State of Alaska
Department of Education
& Early Development

To: House Education Committee

Date: March 8, 2012

Phone: 465-2802

Fax: 465-4156

From: Mike Hanley
Commissioner

Subject: State standards

What are academic standards?

Academic standards are technical documents written for teachers, writers of curriculum, and writers of assessments. The proposed standards use the technical terms of education, language arts and mathematics. Mathematics in particular, especially in the higher grades, uses complicated technical terms and concepts.

If the State Board approves the standards, the department will create parent guides for each grade containing a summary in plain English of what students should know and be able to do in English language arts and mathematics. Note that even the National PTA's parent guides use technical terms to describe higher mathematics.

The proposed state standards answer the question of what we should strive to teach in each grade, with one grade building on previous grades and leading to the next grades, in English language arts and mathematics. For example, the standards tell us what fifth-graders should be taught in mathematics. That is a technical question. To answer it, you need to know mathematics, know how to teach mathematics, and understand the development of children.

To answer that sort of question, you also need to know what you're aiming for in English language arts and mathematics skills in a high school graduate. We do know what the end-users of our graduates want. More than half of our graduates need remedial courses in English and/or mathematics at the University of Alaska. Nationwide, a quarter of high school graduates who apply to the military cannot pass its entrance exam, the Armed Services Vocational Aptitude Battery. Across the country, business groups have expressed dissatisfaction with high school graduates.

Alaska's proposed standards are detailed. It takes 13 years for students to work their way through the standards and complete their public education. It takes skilled teachers a full school year to teach a year's worth of standards by translating these complicated ideas into terms that students can understand. That is the art and craft of being a teacher.

State standards do not introduce complexity and change in education. Those qualities have always existed. If we did not have state standards and had only district-level curricula, teachers would still have the task of translating complicated ideas into terms that students can understand. Districts would still have to indoctrinate newly hired teachers into their curricula, and districts would still revise their curricula every few years -- just as they did before state standards existed.

Complexity and change are part of private enterprise, as well. Some businesses practice a model of continuous improvement.

What do states mean by the terms "college ready" and "career ready"?

When we say "college," we mean every type of schooling and training after high school: the military, union apprenticeships, vocational certificate programs, associate's degrees in careers, and bachelor's degrees in careers and academic fields. Specifically, when we say "college-ready," we mean that high school graduates should not need remedial courses in their postsecondary institutions.

Many occupations require some sort of training beyond high school. Thus, the term "college-ready" applies to the needs of many students, far more than the few Alaskans who complete a bachelor's degree. There is an overlap in required skills for postsecondary technical training and academic degrees.

For example, the construction technology associate's degree from the University of Alaska Southeast requires students to take an algebra course that compares to an intermediate high school algebra course. If you ask that student when he's 14 years old whether he wants to study algebra, he might say no. He would not know whether algebra would be relevant to his adulthood.

What does "career ready" mean? There are hundreds of careers, and obviously students don't graduate high school ready to be electricians and doctors.

National associations that promote career and technical education list three criteria of career readiness: 1) academic preparation in high school; 2) personal traits and skills that employers value, such as being on time, behaving and dressing appropriately, being able to problem-solve and collaborate with others; and 3) training for a specific career.

The proposed standards in English language arts and mathematics meet the first criteria for those two fundamental subjects. The standards are not intended to deal with the second criteria, but they do not preclude schools from dealing with workplace readiness

in other ways. The standards prepare students to be able to enter postsecondary training and meet the third criteria.

It is important to note what the proposed standards are and what they are not. Standards in English language arts and mathematics do not preclude having other sets of standards such as for STEM, culture, career and technical education, entrepreneurship, or workplace readiness. In fact, the English language arts and mathematics standards could be partly taught through those subjects. For example, mathematics is a good preparation for engineering; English and mathematics have value for entrepreneurs.

Why have academic standards?

The goal of formal education is not to meet students where they are and leave them there. If only 7% of our ninth-graders receive a bachelor's degree within six years of leaving high school, that is a cause for alarm. It is not a target to aim for. Nor should it be interpreted as a reflection of student desires. Rather, it reflects the limits that all of us responsible for public education have placed on those students.

An indication of student desires is the retention rates at the University of Alaska. Only about a quarter of freshmen seeking a B.A. at UA graduate within six years. Only about a third of freshmen seeking a technical certificate, associate's degree or bachelor's degree graduate within six years. In other words, three times as many Alaskans try for a UA certificate or degree as actually receive one. And we don't know how many other students wanted a credential but never entered postsecondary education.

Surely, there are many causes of this. We believe that some of the students' limitations are academic. Our evidence is that UA itself requires at least half of its students to take remedial (meaning high school-level) courses in English and mathematics. For example, in fall of 2009 UA had 3,587 first-time freshmen, of which 1,902 took remedial courses -- about 53%.

The proposed standards in English language arts and mathematics set high expectations for students and the public education system. The mathematics standards distinguish between standards that all students should strive for and standards for students taking advanced courses. The goal is to give students choices in life after high school.

We did not propose the English language arts and mathematics standards because we think they are the only important subjects in school, or because we think that school is the only source of valued knowledge.

We proposed the English language arts and mathematics standards because:

1) those subjects are fundamental to other school subjects and to training after high school on the job, in a technical school, the military, or college; and

2) the study of those subjects develops students' minds and habits of thought.

Students who study English language arts and mathematics learn to practice attentiveness, attention to detail, perseverance, creativity, problem-solving, individual and group learning, and complex and nuanced thinking.

One of the flaws of educating children for what seems relevant now is that as adults they might need to be very flexible in moving from job to job as the economy shifts. We must educate children for an adulthood that they and we cannot fully anticipate. The study of English language arts and mathematics is part of such a foundation.

State standards are an important element in equitable public education. Some of the strongest supporters of No Child Left Behind have been civil rights and disabilities organizations because they want schools to act on the premise that all children can learn and all will be held to the same standards.

We cannot agree with the characterization of standards as a fad. Every industrialized nation has them. Forty-five states and D.C. have adopted the Common Core standards, which generally are more rigorous than the states' original standards were. Over time, educational materials will be geared to the Common Core and similar standards. College and career-ready standards may be required under a reauthorized federal Elementary and Secondary Education Act. They are certainly required for a waiver from No Child Left Behind. They have been required for certain federal education funds.

Standards alone are ineffective

Admittedly, standards alone do not increase student achievement. School districts' curricula, professional development and teachers' instruction must incorporate the standards, or there will be no effect on the students.

Randi Weingarten, president of the American Federation of Teachers, recently published a statement called "Implementation Will Move the Needle." She said the Common Core standards (which are similar to Alaska's proposed standards) "are an essential building block for a better education system – not a new educational craze, a federal intrusion, or an untested idea." Weingarten said the standards must be supported by development of aligned curriculum, professional development, instructional materials, collaborative planning, and aligned assessments that inform instruction but are not used excessively or punitively. We agree.

Massachusetts set high standards more than a decade ago and worked through the challenges of implementing them. The result today is that Massachusetts is the highest-scoring state on the National Assessment of Educational Progress in its overall student body and in every subgroup of students. In other words, the percentage of African-American students in Massachusetts who score proficient on the NAEP is the highest of the states and D.C. The same is true of their Hispanic students, students with disabilities,

low-income students, and English language learners. Massachusetts is the only American state whose students score comparably on international assessments with leading nations such as Finland, Japan, Taiwan and South Korea.

It is important not to overpromise the effect of standards. Massachusetts has raised all boats, but it still has achievement gaps. Some of its students still need remedial courses in college. In fact, many of its students still don't score proficient on assessments (which is equally true of high-scoring nations). But Massachusetts has seen progress in proficiency rates, and it is giving parents and students an accurate understanding of whether a student is proficient.

Final thoughts

The costs of implementing more rigorous standards must be weighed by the costs of standing still. The costs of standing still will be borne by families. Every time an Alaska high school graduate spends money to attend UA and leaves without a diploma, his or her family has lost their investment. Every Alaskan high school graduate who is undereducated and has not reached his or her potential faces a greater risk of reduced earnings, unemployment, and reliance on public support.

For more information on Alaska's proposed standards, see
http://www.eed.state.ak.us/standfaqs.html

For comments on the Brookings Institution report, which criticized the effectiveness of standards, see
http://education.nationaljournal.com/2012/02/common-cores-good-bad-and-ugly.php

Alaska proposes new standards for English language arts and mathematics in the public schools

Speak out about Alaska's student standards

The State Board of Education & Early Development welcomes your comments on proposed new standards in English language arts and mathematics for public school students.

All public comments will go to the State Board for their consideration. The State Board, which has the authority to adopt state standards, is scheduled to decide the issue in June 2012. The State Board could choose to adopt the standards as proposed, adopt them with changes, or not adopt them.

If the new standards are adopted in June 2012, the state will work with school districts to align their curriculum to the new standards. The department expects that students would first be assessed in the new standards in spring 2016.

Why are new standards being proposed?

The new standards would guide the education of students from kindergarten through grade 12 so that Alaska's high school graduates are ready for postsecondary education, career training and the workplace. Alaska's current standards do not reach this goal for two main reasons: they stop at grade 10, and they are not rigorous enough.

Currently, many Alaska's high school graduates who enter bachelor degree programs at the University of Alaska need remedial courses in English and/or mathematics. Those students are more likely to drop out of college. Employers also say high school graduates are not fully prepared for the workplace. Only about a third of Alaska students score proficient or above on the National Assessment of Educational Progress, a rigorous test in English and math given to large samples of fourth-graders and eighth-graders in each state.

Alaska's high school graduates must be prepared to compete for jobs, even within Alaska, with people from across the United States and the globe. The proposed standards would increase our students' skills in academic English and mathematics. These skills are important in business, industry, government, and science and technology.

Briefly, how do the proposed standards differ from current standards?

The proposed standards for English language arts cover reading, writing, vocabulary, and speaking and listening. Our current grade-level standards cover only reading and writing. Speaking and listening are important skills in postsecondary classrooms and the workplace. In addition, the proposed standards expect students to develop their language skills in the context of many subjects, not just literature. This is important because employers say that employees are not always skilled in reading and writing informational documents.

Finally, as an appendix to the standards, Alaska educators will provide lists of recommended literary and informational texts that challenge students to build knowledge, gain insights, and broaden their perspective.

In mathematics, students will be taught the content of some standards a grade earlier than they are now so that students in the earlier grades are well-prepared for high school. In high school, students will develop a depth of understanding and the ability to apply mathematics to new situations, as college students and employees must do. The proposed standards align with expectations for students from the National Council of Teachers of Mathematics and the National Research Council of the National Academy of Sciences and the National Academy of Engineering.

How were the proposed new standards created?

For nearly two years, the Alaska Department of Education & Early Development has worked on the standards with rural and urban Alaskans from around the state, including representatives of universities, career and technical programs, and industries. Working groups also included teachers and other specialists in English and mathematics; school districts' curriculum coordinators; librarians; high school teachers of career and technical subjects; and teachers who work with struggling schools, students with disabilities, English language learners, economically disadvantaged students, and students of diverse ethnicities.

The Alaska reviewers compared Alaska's current standards with new nationwide standards in reading, writing and math for each grade from kindergarten to 12, and with new nationwide college-ready and career-ready standards, which define what students must know and be able to do to be ready for postsecondary education or careers.

The review process incorporated the best of Alaska's current standards, added new standards, and revised standards for clarity. Reviewers paid attention to what was developmentally appropriate to each grade level. They made sure that each grade level gradually built toward a high level of skill and understanding in grade 12 students.

The nonprofit National Center for the Improvement of Educational Assessment reviewed Alaska's proposed standards in detail. The University of Alaska will review the standards to determine whether they will lead to high school graduates who are ready for college without remediation.

The result is a set of standards created by Alaskans but comparable in rigor to new standards that are being adopted around the United States. The department expects that many curricular materials that will be developed for the new nationwide standards would be relevant to Alaska's proposed standards.

How would the new standards be used?

The proposed new standards provide a consistent, clear understanding of what students are expected to learn so that teachers and parents know what they need to do to help students.

School districts would use the standards as the framework for their curriculum in English language arts and mathematics. In turn, teachers would use their district's curriculum to determine their lesson plans.

The standards do not tell teachers how to teach. The standards do not preclude the use of culturally relevant teaching methods. The standards represent a goal. Educators locally will determine how to meet this goal.

The standards in English language arts and mathematics are not meant to imply that those are the only important subjects in school, or that school-based knowledge is the only important type of knowledge. The department proposed new standards in English language arts and mathematics because those subjects are fundamental to many other subjects in school and to many occupations and aspects of daily life.

The department would use the standards to develop assessments for students. The results of these assessments will show whether students have advanced skills, proficient skills, or less than proficient skills in English language arts and mathematics.

For families, the assessments help you understand your students' readiness for postsecondary education and careers. Classroom grades and the observations of teachers and families also show how students are performing in school.

For all Alaskans, the assessments allow us to see how students are doing schoolwide, districtwide and statewide. Citizens, policymakers and administrators locally and at the state level will be able to see the bigger picture of student achievement. At the same time, educators can look at results for subgroups of students, such as economically disadvantaged students or students with disabilities. That helps school districts understand where to target their resources.

The assessments allow Alaskans to see whether more students are becoming proficient over time. The federal government currently requires states to have standards and assessments, and to use the assessment results to hold school districts accountable for increasing student achievement. Alaska has a similar statute.

If the State Board approves the proposed new standards, what are the next steps?

The Alaska Department of Education & Early Development will prepare brochures that summarize the standards at each grade level for families and for educators. Parents, students and teachers will be able to understand the expectations for students in English language arts and mathematic at each grade.

Just as Alaskans have high expectations for students, we must have high expectations for the educational system at the local and state level. Implementing new standards requires a transition period. Students will be educated for nearly four years under the new standards before they are assessed in them.

This provides time for school districts to closely align what is taught in the classroom to the new standards. The state, as well, must align new assessments with the standards.

The department will provide school districts with a clear understanding of the differences between Alaska's former standards and the new standards, and offer online guidance in making the transition. Additionally, the department will continue to provide districts twice-yearly institutes on curriculum and alignment.

How can I comment on proposed new standards?

You can review the proposed new standards online at http://www.eed.state.ak.us/regs/, where you also can submit comments electronically.

If you would like a copy of the standards mailed to you, contact Eric Fry at 907-465-2851 or eric.fry@alaska.gov or Dorothy Knuth at 907-465-2802 or Dorothy.knuth@alaska.gov.

You may submit comments in writing by fax or mail. Fax comments to 907-465-4156 attention Dorothy Knuth. Mail comments to Alaska Department of Education & Early Development, Attn: Dorothy Knuth Regulation Comments, 801 West 10th Street, Suite 200, P.O. Box 10500, Juneau, AK 99811-0500.

The deadline to submit comments prior to the State Board meeting is May 12. If you would like to make your comments in person or telephonically at the June 7-8, 2012,

State Board meeting in Anchorage, see http://www.eed.state.ak.us/State_Board/ in late May, when the agenda will be posted.

How can I read more about it?

The current standards and the proposed standards are at http://www.eed.state.ak.us/tls/assessment/2012AKStandards.html

Summary of proposed English language arts standards

The reading standards require students to read increasingly complex texts so that by the end of high school they are ready for the demands of college-level and career-level reading. The standards require that students grow in their reading comprehension; as they advance through the grades, they are able to gain more from whatever they read. The reading standards assume that students must be able to read well in all their courses. Students are expected to read challenging informational texts in subjects such as social studies and science, as well as literature.

The cornerstone of the writing standards is the ability to write logical arguments based on substantive claims, sound reasoning, and relevant evidence. The standards begin to teach these skills in the earliest grades. Students will be expected to conduct research in short, focused projects and longer in-depth projects. Research skills – in order to gather information before writing or speaking -- are emphasized throughout the language arts standards.

The language standards provide opportunities for students to develop their vocabularies through conversation, direct instruction, and reading. The standards emphasize word meanings and nuances of words, steadily expanding students' repertoires of words and phrases. Thus students build an ability to communicate with greater precision and complexity.

Oral uses of language are common in postsecondary education and the workplace. The speaking and listening standards require students to gain, evaluate, and present complex information, ideas and evidence through speaking and listening. An important focus of the speaking and listening standards is discussion of academic topics in one-on-one, small-group and whole-class settings. Formal presentations are valued. But so are informal discussions in which students collaborate to answer questions, build understanding, and solve problems.

Summary of the proposed mathematics standards

The mathematics standards stress both procedural skills and conceptual understanding. This ensures that students absorb the critical information they need to succeed at higher levels. When students have deep understanding, they do not need prior instruction to be taught again the following year.

The mathematics standards seek to develop the following types of expertise: 1) make sense of problems and persevere in solving them; 2) reason abstractly and quantitatively; 3) construct viable arguments and critique the reasoning of others; 4) apply mathematics to solve problems in everyday life; 5) use appropriate tools strategically; 6) pay attention to precision; 7) look for and make use of structure; and 8) notice repeated calculations and look for general methods and shortcuts.

In kindergarten, the standards follow successful international models and recommendations by focusing on the number core: how numbers correspond to quantities and how to put together numbers and take them apart (the beginnings of addition and subtraction).

The standards for kindergarten to grade 5 provide students with a solid foundation in whole numbers, addition, subtraction, multiplication, division, fractions, and decimals. With this foundation, students in kindergarten to grade 5 can do hands-on learning in geometry, algebra, probability and statistics.

The middle school standards are robust and provide a coherent and rich preparation for high school mathematics. Students who have mastered the mathematics skills through grade 7 will be well-prepared for algebraic concepts in grade 8.

The high school standards set a rigorous definition of readiness for postsecondary education and careers. Students develop a depth of understanding and the ability to apply mathematics to new situations, as college students and employees do.

Please note

This document will be updated to be responsive to questions from the public. This version was posted online on Jan. 19, 2012.

Presentation developed by the Department of Education &Early Development

January 2012

Need to Know

The department has proposed new standards for reading, writing, and mathematics

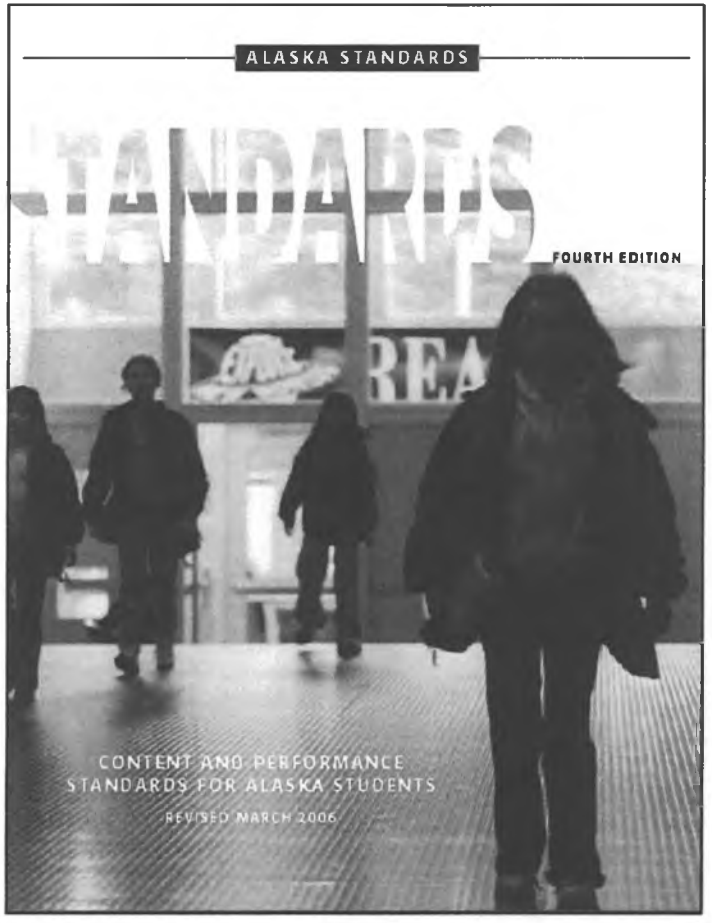
- Who participated in the development of the proposed standards?
- What is included in the proposed standards for Alaska?
- What is the timeline?
- Where is information for districts?
- Who are the contacts to support districts?

History of Alaska's Standards

1990s: Alaska standards in reading, writing, and mathematics were developed by age spans (K-2, 3-5, 6-8, and 9-12)

2004: Grade Level Expectations (GLEs) in reading, writing, and mathematics were developed to further define standards at each grade level (grades 3 – 10)

2006: Grade Level Expectations were expanded to include kindergarten through second grade



The content in red is expected to change with the new proposed standards.

Table of Contents

I. Content Standards
- English/Language Arts
- Mathematics
- Science
- Geography
- Government and Citizenship
- History
- Skills for a Healthy Life
- Arts
- World Languages
- Technology
- Employability
- Library/Information Literacy

II. Cultural Standards

III. Performance Standards/Grade Level Expectations
- Reading
- Writing
- Mathematics
- Science
- Alaska History

June – November 2011, Alaska educators along with national experts shared their knowledge and assisted with the revision to create the proposed standards.

The proposed Alaska standards:

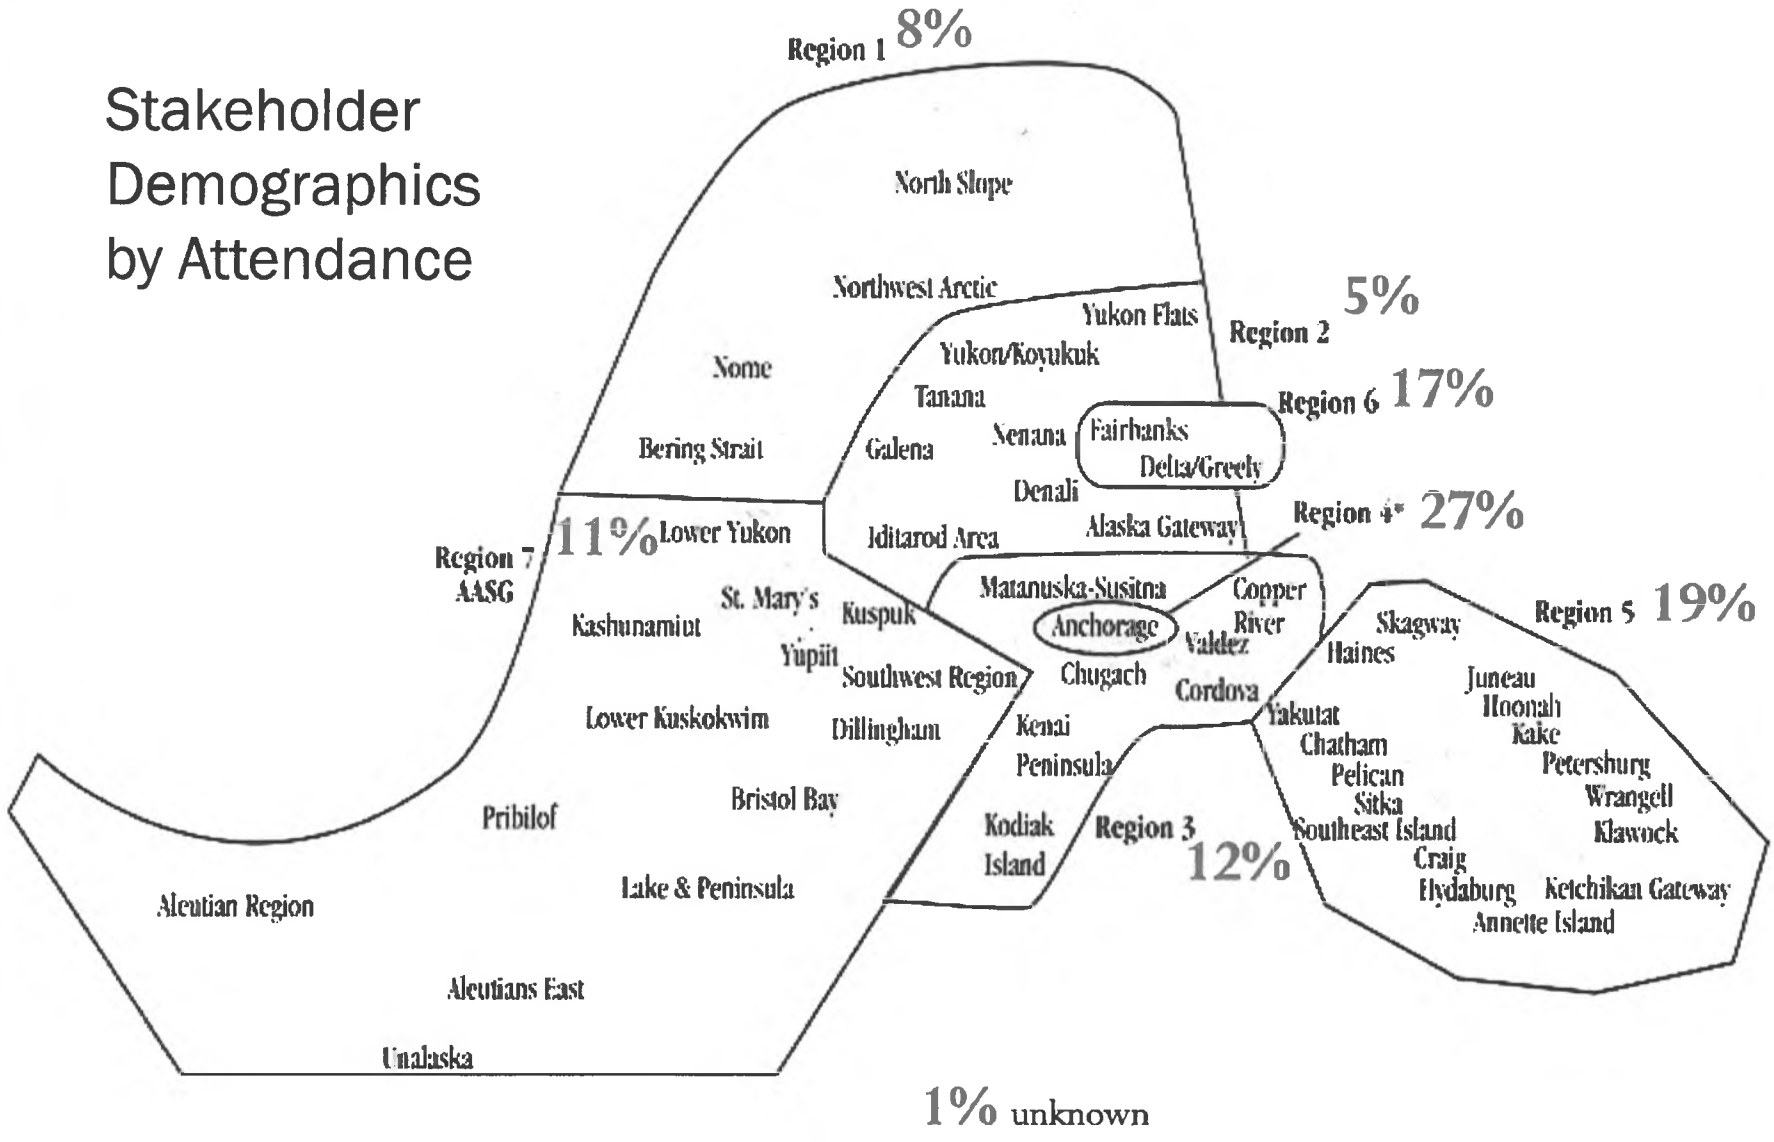
1. align with college and work readiness.
2. include rigorous content.
3. build upon strength and lessons of the GLEs.
4. outline instructional expectations for grades K-12.
5. equal in rigor to national common standards.
6. relate to real world application.

Alaska Stakeholders

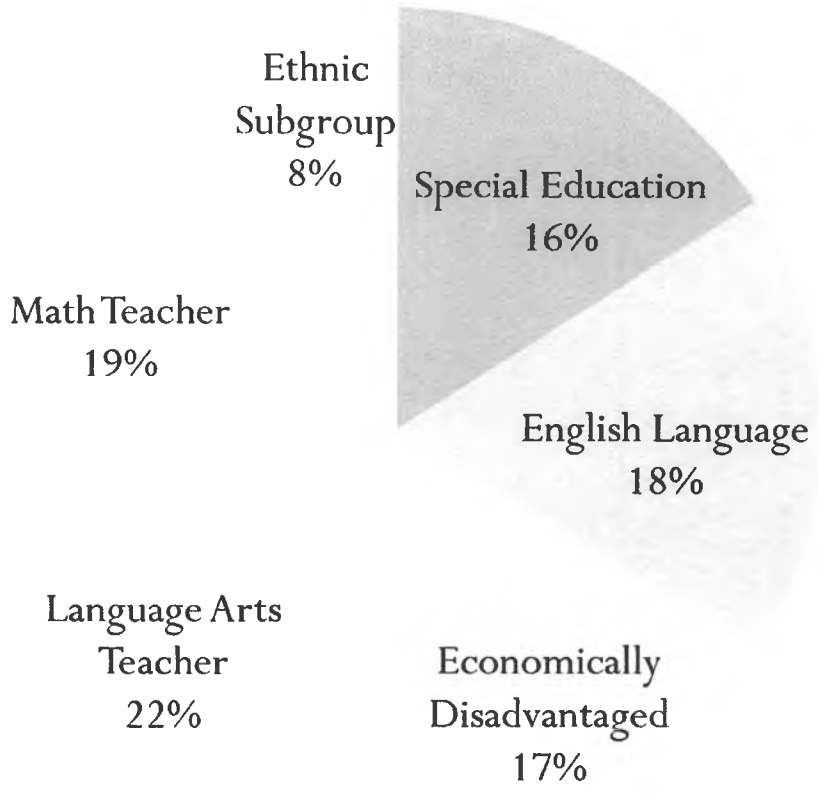
What was the representation of the stakeholders?

- Classroom teachers in reading, writing, and mathematics – kindergarten through high school
- University instructors representing multiple content areas
- Career and technical education instructors
- Alaska industry and business representatives
- District administrators
- Educators representing students with disabilities, English language learners, economically disadvantaged, and ethnic groups

Stakeholder Demographics by Attendance



Stakeholder Demographic Educational Emphasis



Tools for Alaska's Graduates

1. Increased text complexity will bridge the gap between high school and college/work readiness.
2. Connections between writing and reading will strengthen research skills.
3. Speaking and listening standards promote collaboration and clear communication.
4. Rigorous math content will have application to real world problems.
5. In-depth analysis of mathematical and logical arguments will increase critical thinking skills.

Relevancy

The new proposed standards align with the uniqueness of Alaska. Combined with the Cultural Standards and local educators, relevant learning experiences will continue.

- Same relevancy as the GLEs
- Allow for relevancy at a greater level

The proposed standards establish a strong foundation of knowledge and skills all students need for success after graduation. It is up to schools and teachers to decide how to put the standards into practice and incorporate other state standards, including the cultural standards.

Timeline

January –May 12, 2012	Public comment period
February– April 2012	Webinars and presentations about the new standards scheduled
June 2012	New standards potentially adopted
Fall 2012 – Spring 2015	Transition from GLEs to new standards
Spring 2016	New assessments potentially administered

Support for Districts

EED Website provides information and updated weekly

http://www.eed.state.ak.us/tls/assessment/GLEHome.html

Frequently asked questions have been created for distribution
http://www.eed.state.ak.us/standfaqs.html

Webinars have been scheduled for an in-depth review of the proposed standards (dates are posted on the website)

Publications for parents, teachers, and the community will be available.

Curriculum and Alignment Institute will support districts with the transition of curriculum.

Glossary for Alaska Mathematics Standards 98

Introduction

High academic standards are an important first step in ensuring that all of Alaska's students have the tools they need for success. These standards reflect the collaborative work of Alaska educators and experts in the education community, and are also informed by public comments. Alaska teachers have played a key role in this effort, ensuring that the standards reflect the realities of the classroom. Since work began more than a year ago, the standards have undergone a thoughtful and rigorous drafting and refining process.

These standards do not tell teachers how to teach, nor do they attempt to override the unique qualities of each student and classroom. They simply establish a strong foundation of knowledge and skills all students need for success after graduation. It is up to schools and teachers to decide how to put the standards into practice and incorporate other state standards, including the cultural standards.

Description of Mathematics Standards

The standards stress procedural skills and conceptual understanding; this ensures students are learning and absorbing the critical information they need to succeed at higher levels. Often current practices suggest students learn enough to get by on the next test, only to forget the information later. This practice creates the need for prior instruction to be taught again the following year.

In kindergarten, the standards follow successful international models and recommendations by focusing kindergarten work on the number core: learning how numbers correspond to quantities, and learning how to put numbers together and take them apart (the beginnings of addition and subtraction).

The K-5 standards provide students with a solid foundation in whole numbers, addition, subtraction, multiplication, division, fractions and decimals--which help young students build the foundation to successfully apply more demanding math concepts and procedures, and move into applications.

Having built a strong foundation, K-5 students can do hands-on learning in geometry, algebra and probability and statistics. Students who have completed 7th grade and mastered the content and skills through the 7th grade will be well-prepared for algebra in grade 8.

The middle school standards are robust and provide a coherent and rich preparation for high school mathematics.

The high school standards set a rigorous definition of readiness by helping students develop a depth of understanding and ability to apply mathematics to novel situations, as college students and employees regularly do.

Alaska Standards for Mathematical Practice

The Standards for Mathematical Practice describe varieties of expertise that mathematics educators at all levels should seek to develop in their students. These practices rest on important "processes and proficiencies" with longstanding importance in mathematics education. The first of these are the NCTM process standards of problem solving, reasoning and proof, communication, representation, and connections. The second are the strands of mathematical proficiency specified in the National Research Council's report Adding It Up: adaptive reasoning, strategic competence, conceptual understanding (comprehension of mathematical concepts, operations and relations), procedural fluency (skill in carrying out procedures flexibly, accurately, efficiently and appropriately), and productive disposition (habitual inclination to see mathematics as sensible, useful, and worthwhile, coupled with a belief in diligence and one's own efficacy).

1. Make sense of problems and persevere in solving them
2. Reason abstractly and quantitatively
3. Construct viable arguments and critique the reasoning of others
4. Model with mathematics
5. Use appropriate tools strategically
6. Attend to precision
7. Look for and make use of structure
8. Look for and express regularity in repeated reasoning

Each Standard for Mathematical Practice listed below is followed by a set of grade-span descriptors. These descriptors of the Standards of Mathematical Practice are meant to help students, parents and educators to picture how these practices might be demonstrated by students and should not serve as a checklist. Within the grade span, students should apply the practices using specific grade-level content. Additionally, students at higher grade spans may revisit earlier grade-span proficiencies as the rigor of the content increases.

1. Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal

descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

In grades K-2 mathematically proficient students will:

- focus on the problem and check for alternate methods
- check if the solution makes sense

In grades 3-5 mathematically proficient students will:

- explain correspondences between equations, verbal descriptions, tables, and graphs
- draw diagrams of important features and relationships, graph data, and search for regularity or trends
- use concrete objects or pictures to help conceptualize and solve a problem
- understand the approaches of others to solving complex problems
- identify correspondences between different approaches
- check if the solution makes sense

In grades 6-8 mathematically proficient students will:

- explain correspondences between a new problem and previous problems
- represent algebraic expressions numerically, graphically, concretely/with manipulatives, verbally/written
- explain connections between the multiple representations
- determine the question that needs to be answered
- make a plan for attempting a problem
- choose a reasonable strategy
- identify the knowns and unknowns in a problem
- use previous knowledge and skills to simplify and solve problems
- break a problem into manageable parts or simpler problems
- solve a problem in more than one way

In grades 9-12 mathematically proficient students will:

- make connections between a new problem and previous problems
- determine the question that needs to be answered
- make a plan for attempting a problem
- choose a reasonable strategy
- identify the knowns and unknowns in a problem
- use previous knowledge and skills to simplify and solve problems
- break a problem into manageable parts or simpler problems
- represent algebraic expressions numerically, graphically, concretely/with manipulatives, verbally/written
- explain connections between the multiple representations
- solve a problem in more than one way
- explain the meaning of a problem and look for an entry point
- analyze a problem and make a plan for solving it
- explain correspondence between differing approaches to identify regularity and trends
- check answer using a different method
- identify correspondence between different approaches
- monitor and evaluate progress and change course if necessary
- check the answers to problems using a different method and continually ask, "Does this make sense?"

2. Reason abstractly and quantitatively.

Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to *decontextualize*—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to *contextualize*, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects.

In grades K-2 mathematically proficient students will:

- represent a situation symbolically and/or with manipulatives
- create a coherent representation of the problem
- use units of measurement consistently

In grades 3-5 mathematically proficient students will:

- represent a situation symbolically
- create a coherent representation of the problem
  have the ability to show how problem has a realistic meaning
- reflect during the manipulation process in order to probe into the meanings for the symbols involved
- use units consistently

In grades 6-8 mathematically proficient students will:

- represent a situation symbolically and carry out its operations
- create a coherent representation of the problem
- translate an algebraic problem to a real world context
- explain the relationship between the symbolic abstraction and the context of the problem
- compute using different properties
- consider the quantitative values, including units, for the numbers in a problem

In grades 9-12 mathematically proficient students will:

- decontextualize to abstract a given situation and represent it symbolically and manipulate the representing symbols.
- reflect during the manipulation process in order to probe into the meanings for the symbols involved
- create a coherent representation of the problem
- make sense of quantities and their relationships in problem situations
- attend to the meanings of quantities
- use flexibility with different properties of operations and objects
- translate an algebraic problem to a real world context
- explain the relationship between the symbolic abstraction and the context of the problem
- compute using different properties
- consider the quantitative values, including units, for the numbers in a problem

3. Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

In grades K-2 mathematically proficient students will:

- construct arguments using concrete referents such as objects, drawings, diagrams, and actions
- justify conclusions, communicate conclusions
- listen to arguments and decide whether the arguments make sense

In grades 3-5 mathematically proficient students will:

- construct arguments using concrete referents such as objects, drawings, diagrams, and actions
- justify conclusions, communicate conclusions, listen and respond to arguments, decide whether the argument makes sense, and ask questions to clarify the argument
- reason inductively about data, making plausible arguments that take into account the context from which the data arose

In grades 6-8 mathematically proficient students will:

- construct arguments using both concrete and abstract explanations
- justify conclusions, communicate conclusions, and respond to the arguments
- listen to arguments, critique their viability, and ask questions to clarify the argument
- compare effectiveness of two arguments by identifying and explaining both logical and/or flawed reasoning
- recognize general mathematical truths and use statements to justify the conjectures
- identify special cases or counter-examples that don't follow the mathematical rules

- infer meaning from data and make arguments using its context

In grades 9-12 mathematically proficient students will:

- construct arguments using both concrete and abstract explanations
- justify conclusions in a variety of ways, communicate the methodology, and respond to the arguments
- reason inductively about data and make plausible arguments that take into account the context from which the data arose
- understand and use stated assumptions, definitions, and previously established results in constructing arguments
- make conjectures and build a logical progression of statements to explore the truth of the conjectures
- analyze situations by breaking them into cases and recognize and use counter-examples
- recognize general mathematical truths and statements to justify the conjectures
- identify special cases or counter-examples that don't follow the mathematical rules
- infer meaning from data and make arguments using its context
- compare effectiveness of two arguments by identifying and explaining both logical and/or flawed reasoning

4. Model with mathematics.

Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose.

In grades K-2 mathematically proficient students will:

- apply mathematics to solve problems in everyday life
- identify important quantities in a practical situation and model the situation with manipulatives or pictures
- interpret mathematical results in the context of the situation and reflect on whether the results make sense

In grades 3-5 mathematically proficient students will:

- apply mathematics to solve problems arising in everyday life
- identify important quantities in a practical situation and model the situation using such tools as manipulatives, diagrams, two-way tables, graphs or pictures
- interpret mathematical results in the context of the situation and reflect on whether the results make sense
- apply mathematical knowledge, make assumptions and approximations to simplify a complicated situation

In grades 6-8 mathematically proficient students will:

- apply mathematics to solve problems arising in everyday life and society
- identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, and formulas
- interpret their mathematical results in the context of the situation and reflect on whether the results make sense
- make assumptions and approximations to simplify a situation, realizing the final solution will need to be revised
- analyze quantitative relationships to draw conclusions
- reflect on whether their results make sense
- improve the model if it has not served its purpose

In grades 9-12 mathematically proficient students will:

- apply mathematics to solve problems in everyday life, society, and workplace
- identify important quantities in a practical situation and map the relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas
- consistently interpret mathematical results in the context of the situation and reflect on whether the results make sense
- apply knowledge, making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later
- make assumptions and approximations to simplify a situation, realizing the final solution will need to be revised
- identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, and formulas
- analyze quantitative relationships to draw conclusions
- improve the model if it has not served its purpose

5. Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

In grades K-2 mathematically proficient students will:

- select the available tools (such as pencil and paper, manipulatives, rulers, and available technology) when solving a mathematical problem
- be familiar with tools appropriate for the grade level to make sound decisions about when each of these tools might be helpful
- identify relevant external mathematical resources and use them to pose or solve problems
- use technological tools to explore and deepen their understanding of concepts

In grades 3-5 mathematically proficient students will:

- select the available tools (such as pencil and paper, manipulatives, rulers, calculators, a spreadsheet, and available technology) when solving a mathematical problem
- be familiar with tools appropriate for their grade level to make sound decisions about when each of these tools might be helpful
- identify relevant external mathematical resources and use them to pose or solve problems
- use technological tools to explore and deepen their understanding of concepts
- detect possible errors by strategically using estimation and other mathematical knowledge
- know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data

In grades 6-8 mathematically proficient students will:

- select and use tools appropriate to the task: pencil and paper, protractor, visual and physical fraction models, algebra tiles, geometric models, calculator, spreadsheet, and interactive geometry software.
- use estimation and other mathematical knowledge to confirm the accuracy of their problem solving
- identify relevant external and digital mathematical resources and use them to pose or solve problems
- represent and compare possibilities visually with technology when solving a problem
- explore and deepen their understanding of concepts through the use of technological tools

In grades 9-12 mathematically proficient students will:

- select and accurately use appropriate, available tools (such as pencil and paper, concrete or virtual manipulatives such as geoboards and algebra tiles, graphing and simpler calculators, a spreadsheet, and available technology) when solving a mathematical problem
- identify relevant external and digital mathematical resources and use the resources to pose or solve problems
- detect possible errors by strategically using estimation and other mathematical knowledge
- use technology to visualize the results of varying assumptions, exploring consequences, comparing predictions with data, and deepening understanding of concepts

6. Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

In grades K-2 mathematically proficient students will:

- give thoughtful explanations to each other
- use clear definitions and reasoning in discussion with others
- state the meaning of symbols they choose, including using the equal sign consistently and appropriately

In grades 3-5 mathematically proficient students will:

- give carefully formulated explanations to each other

- use clear definitions and reasoning in discussion with others
- state the meaning of symbols, including using the equal sign consistently and appropriately
- specify units of measure, and label axes to clarify the correspondence with quantities in a problem
- calculate accurately and efficiently
- express numerical answers with a degree of precision appropriate for the problem context

In grades 6-8 mathematically proficient students will:

- use clear definitions in explanations
- understand and use specific symbols accurately and consistently: equality, inequality, ratios, parenthesis, for multiplication and division, absolute value, square root
- specify units of measure, and label axes to clarify the correspondence with quantities in a problem
- calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context

In grades 9-12 mathematically proficient students will:

- communicate precisely to others
- use clear definitions in explanations
- use symbols consistently and appropriately
- specify units of measure, and label axes to clarify the correspondence with quantities in a problem
- calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context
- examine claims and make explicit use of definitions

7. Look for and make use of structure.

Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see 7×8 equals the well remembered $7 \times 5 + 7 \times 3$, in preparation for learning about the distributive property. In the expression $x2 + 9x + 14$, older students can see the 14 as 2×7 and the 9 as $2 + 7$. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see $5 - 3(x - y)^2$ as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers x and y.

In all grade levels mathematically proficient students will:

- discern a pattern or structure
- understand complex structures as single objects or as being composed of several objects
- check if the answer is reasonable

8. Look for and express regularity in repeated reasoning.

Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation $(y - 2)/(x - 1) = 3$. Noticing the regularity in the way terms cancel when expanding $(x - 1)(x + 1)$, $(x - 1)(x^2 + x + 1)$, and $(x - 1)(x^3 + x^2 + x + 1)$ might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results.

In all grade levels mathematically proficient students will:

- identify if calculations or processes are repeated
- use alternative and traditional methods to solve problems
- evaluate the reasonableness of their intermediate results, while attending to the details

Connecting the Standards for Mathematical Practice to the Standards for Mathematical Content

The Standards for Mathematical Practice describe ways in which developing student practitioners of the discipline of mathematics increasingly ought to engage with the subject matter as they grow in mathematical maturity and expertise throughout the elementary, middle and high school years. Designers of curricula, assessments, and professional development should all attend to the need to connect the mathematical practices to mathematical content in mathematics instruction. The Standards for Mathematical Content are a balanced combination of procedure and understanding. Expectations that begin with the word "understand" are often especially good opportunities to connect the practices to the content. Students who lack understanding of a topic may rely on procedures too heavily. Without a flexible base from which to work, they may be less likely to consider analogous problems, represent problems coherently, justify conclusions, apply the mathematics to practical situations, use technology mindfully to work with the mathematics, explain the mathematics accurately to other students, step back for an overview, or deviate from a known procedure to find a shortcut. In short, a lack of understanding effectively prevents a student from engaging in the mathematical practices. In this respect, those content standards which set an expectation of understanding are potential "points of intersection" between the Standards for Mathematical Content and the Standards for Mathematical Practice. These points of intersection are intended to be weighted toward central and generative concepts in the school mathematics curriculum that most merit the time, resources, innovative energies, and focus necessary to qualitatively improve the curriculum, instruction, assessment, professional development, and student achievement in mathematics.

Coding for K-8 Mathematical Domains:

1. Counting, Cardinality, and Ordinality – CC
2. Operations and Algebraic Thinking – OA
3. Number and Operations in Base Ten – NBT
4. Measurement and Data - MD
5. Number and Operations—Fractions - NF
6. Geometry - G
7. Ratios and Proportional Relationships – RP
8. The Number System - NS
9. Expressions and Equations - EE
10. Functions - F
11. Statistics and Probability - SP

Instructional Focus: Kindergarten through Second Grade

Kindergarten	Grade 1	Grade 2
In Kindergarten, instructional time should focus on two critical areas: (1) representing, relating, and operating on whole numbers, initially with sets of objects; (2) describing shapes and space. More learning time in Kindergarten should be devoted to number than to other topics. (1) Students use numbers, including written numerals, to represent quantities and to solve quantitative problems, such as counting objects in a set; counting out a given number of objects; comparing sets or numerals; and modeling simple joining and separating situations with sets of objects, or eventually with equations such as 5 + 2 = 7 and 7 – 2 = 5. (Kindergarten students should see addition and subtraction equations, and student writing of equations in kindergarten is encouraged, but it is not required.) Students choose, combine, and apply effective strategies for answering quantitative questions, including quickly recognizing the cardinalities of small sets of objects, counting and producing sets of given sizes, counting the number of objects in combined sets, or counting the number of objects that remain in a set after some are taken away. (2) Students describe their physical world using geometric ideas (e.g., shape, orientation, spatial relations) and vocabulary.	In Grade 1, instructional time should focus on four critical areas: (1) developing understanding of addition, subtraction, and strategies for addition and subtraction within 20; (2) developing understanding of whole number relationships and place value, including grouping in tens and ones; (3) developing understanding of linear measurement and measuring lengths as iterating length units; and (4) reasoning about attributes of, and composing and decomposing geometric shapes. (1) Students develop strategies for adding and subtracting whole numbers based on their prior work with small numbers. They use a variety of models, including discrete objects and length-based models (e.g., cubes connected to form lengths), to model add-to, take-from, put-together, take-apart, and compare situations to develop meaning for the operations of addition and subtraction, and to develop strategies to solve arithmetic problems with these operations. Students understand connections between counting and addition and subtraction (e.g., adding two is the same as counting on two). They use properties of addition to add whole numbers and to create and use increasingly sophisticated strategies based on these properties (e.g., "making tens") to solve addition and subtraction problems within 20.	In Grade 2, instructional time should focus on four critical areas: (1) extending understanding of base-ten notation; (2) building fluency with addition and subtraction; (3) using standard units of measure; and (4) describing and analyzing shapes. (1) Students extend their understanding of the base-ten system. This includes ideas of counting in fives, tens, and multiples of hundreds, tens, and ones, as well as number relationships involving these units, including comparing. Students understand multi-digit numbers (up to 1000) written in base-ten notation, recognizing that the digits in each place represent amounts of thousands, hundreds, tens, or ones (e.g., 853 is 8 hundreds + 5 tens + 3 ones). (2) Students use their understanding of addition to develop fluency with addition and subtraction within 100. They solve problems within 1000 by applying their understanding of models for addition and subtraction, and they develop, discuss, and use efficient, accurate, and generalizable methods to compute sums and differences of whole numbers in base-ten notation, using their understanding of place value and the properties of operations. They select and accurately apply methods that are appropriate for the context and the numbers involved to

Kindergarten	Grade 1	Grade 2
They identify, name, and describe basic two-dimensional shapes, such as squares, triangles, circles, rectangles, and hexagons, presented in a variety of ways (e.g., with different sizes and orientations), as well as three-dimensional shapes such as cubes, cones, cylinders, and spheres. They use basic shapes and spatial reasoning to model objects in their environment and to construct more complex shapes.	By comparing a variety of solution strategies, children build their understanding of the relationship between addition and subtraction. (2) Students develop, discuss, and use efficient, accurate, and generalizable methods to add within 100 and subtract multiples of 10. They compare whole numbers (at least to 100) to develop understanding of and solve problems involving their relative sizes. They think of whole numbers between 10 and 100 in terms of tens and ones (especially recognizing the numbers 11 to 19 as composed of a ten and some ones). Through activities that build number sense, they understand the order of the counting numbers and their relative magnitudes. (3) Students develop an understanding of the meaning and processes of measurement, including underlying concepts such as iterating (the mental activity of building up the length of an object with equal-sized units) and the transitivity principle for indirect measurement.[1] (4) Students compose and decompose plane or solid figures (e.g., put two triangles together to make a quadrilateral) and build understanding of part-whole relationships as well as the properties of the original and composite shapes. As they combine shapes, they recognize them from different perspectives and orientations, describe their geometric attributes, and determine how they	mentally calculate sums and differences for numbers with only tens or only hundreds. (3) Students recognize the need for standard units of measure (centimeter and inch) and they use rulers and other measurement tools with the understanding that linear measure involves an iteration of units. They recognize that the smaller the unit, the more iterations they need to cover a given length. (4) Students describe and analyze shapes by examining their sides and angles. Students investigate, describe, and reason about decomposing and combining shapes to make other shapes. Through building, drawing, and analyzing two- and three-dimensional shapes, students develop a foundation for understanding area, volume, congruence, similarity, and symmetry in later grades.

Kindergarten	Grade 1	Grade 2
	are alike and different, to develop the background for measurement and for initial understandings of properties such as congruence and symmetry [1]Students should apply the principle of transitivity of measurement to make indirect comparisons, but they need not use this technical term.	

Grade K	Grade 1	Grade 2
Counting and Cardinality K.CC **Know number names and the count sequence.** K.CC.1. Count to 100 by ones and by tens. K.CC.2. Count forward beginning from a given number within the known sequence. K.CC.3. Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects). **Count to tell the number of objects.** K.CC.4. Understand the relationship between numbers and quantities to cardinality. a. When counting objects, say the number names in standard order, pairing each object with one and only one number name and each number name with one and only one object. b. Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted. c. Understand that each successive number name refers to a quantity that is one larger.	**Counting, Cardinality, and Ordinality 1.CC** **Skip count and know ordinal names.** 1.CC.1. Skip count by 2s and 5s. 1.CC.2. Use ordinal numbers correctly when identifying object position (e.g., first, second, third, etc.). **Count to tell the number of objects.** 1.CC.3. Count a large quantity of objects by grouping into 10s and counting by 10s and 1s to find the quantity.	

Grade K	Grade 1	Grade 2
K.CC.5. Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array or a circle, or as many as 10 things in a scattered configuration; given a number from 1-20, count out that many objects.		
Compare numbers. K.CC.6. Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group (e.g., by using matching, counting, or estimating strategies). K.CC.7. Compare and order two numbers between 1 and 10 presented as written numerals.	**Compare numbers.** 1.CC.4. Use the symbols for greater than, less than or equal to when comparing two numbers or groups of objects. 1.CC.5. Order numbers from 1-100. 1.CC.6. Estimate how many and how much in a given set to 20 and then verify estimate by counting.	
Operations and Algebraic Thinking K.OA **Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.** K.OA.1. Represent addition and subtraction with objects, fingers, mental images, drawings, sounds (e.g., claps) acting out situations, verbal explanations, expressions, or equations.	**Operations and Algebraic Thinking 1.OA** **Represent and solve problems involving addition and subtraction.** 1.OA.1. Use addition and subtraction strategies to solve word problems (using numbers up to 20), involving situations of adding to, taking from, putting together, taking apart and comparing, with unknowns in all positions, using a number line(e.g., by using objects, drawings and equations). Record and explain using equation symbols and a symbol for the unknown number to represent the problem.	**Operations and Algebraic Thinking 2.OA** **Represent and solve problems involving addition and subtraction.** 2.OA.1. Use addition and subtraction strategies to estimate, then solve one- and two-step word problems (using numbers up to 100) involving situations of adding to, taking from, putting together, taking apart and comparing, with unknowns in all positions (e.g., by using objects, drawings and equations). Record and explain using equation symbols and a symbol for the unknown number to represent the problem.

Grade K	Grade 1	Grade 2
K.OA.2. Add or subtract whole numbers to 10 (e.g., by using objects or drawings to solve word problems). K.OA.3. Decompose numbers less than or equal to 10 into pairs in more than one way (e.g., by using objects or drawings, and record each decomposition by a drawing or equation). K.OA.4. For any number from 1-4, find the number that makes 5 when added to the given number and, for any number from 1-9, find the number that makes 10 when added to the given number (e.g., by using objects, drawings or 10 frames) and record the answer with a drawing or equation. K.OA.5. Fluently add and subtract numbers up to 5.	1.OA.2. Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20 (e.g., by using objects, drawings and equations). Record and explain using equation symbols and a symbol for the unknown number to represent the problem. **Understand and apply properties of operations and the relationship between addition and subtraction.** 1.OA.3. Apply properties of operations as strategies to add and subtract. (Students need not know the name of the property.) Examples: If 8 + 3 = 11 is known, then 3 + 8 = 11 is also known (Commutative property of addition.) To add 2 + 6 + 4, the second two numbers can be added to make a ten, so 2 + 6 + 4 = 2 + 10 = 12 (Associative property of addition.) Demonstrate that when adding or subtracting zero to any number, the quantity does not change (Identity property of addition.) 1.OA.4. Understand subtraction as an unknown-addend problem. *For example, subtract 10-8 by finding the number that makes 10 when added to 8.*	

Grade K	Grade 1	Grade 2
	Add and subtract using numbers up to 20. 1.OA.5. Relate counting to addition and subtraction (e.g., by counting on 2 to add 2). 1.OA.6. Add and subtract using numbers up to 20. Use strategies such as • counting on • making ten (8 + 6 = 8 + 2 +4 = 10 + 4 = 14) • decomposing a number leading to a ten (13 - 4 = 13 -3 -1 =10 -1 = 9) • using the relationship between addition and subtraction, such as fact families, (8 + 4 = 12 and 12 - 8 = 4) • creating equivalent but easier or known sums (e.g., adding 6 + 7 by creating the known equivalent 6 + 6 + 1 = 12 + 1 = 13). **Work with addition and subtraction equations.** 1.OA.7. Understand the meaning of the equal sign (e.g., read equal sign as "same as") and determine if equations involving addition and subtraction are true or false. *For example, which of the following equations are true and which are false? 6 = 6, 7 = 8 - 1, 5 + 2 = 2 + 5, 4 + 1 = 5 + 2)* 1.OA.8. Determine the unknown whole number in an addition or subtraction equation. *For example, determine the unknown number that makes the equation true in each of the equations 8 + ? = 11, 6 + 6 = ?, 5 = ? - 3.*	**Add and subtract using numbers up to 20.** 2.OA.2. Fluently add and subtract using numbers up to 20 using mental strategies. Know from memory all sums of two-digit numbers. **Work with equal groups of objects to gain foundations for multiplication.** 2.OA.3. Determine whether a group of objects (up to 20) is odd or even (e.g., by pairing objects and comparing, counting by 2s). Model an even number as two equal groups of objects and then write an equation as a sum of two equal addends. 2.OA.4. Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns. Write an equation to express the total as repeated addition (e.g., array of 4 by 5 would be 5 + 5 + 5 + 5 = 20).

Grade K	Grade 1	Grade 2
Identify and continue patterns. K.OA.6. Recognize, identify and continue simple patterns of color, shape, and size. **Number and Operations in Base Ten K.NBT** **Work with numbers 11-19 to gain foundations for place value.** K.NBT.1. Compose and decompose numbers from 11 to 19 into ten ones and some further ones (e.g., by using objects or drawings) and record each composition and decomposition by a drawing or equation (e.g., 18=10 +8); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight or nine ones.	**Identify and continue patterns.** 1.OA.9. Identify, continue and label patterns (e.g., aabb, abab). Create patterns using number, shape, size, rhythm or color. **Number and Operations in Base Ten 1.NBT** **Extend the counting sequence.** 1.NBT.1. Count to 120. In this range, read, write and order numerals and represent a number of objects with a written numeral. **Understand place value.** 1.NBT.2. Model and identify place value positions of two digit numbers. Include: a. 10 can be thought of as a bundle of ten ones, called a "ten". b. The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight or nine ones. c. The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90, refer to one, two, three, four, five, six, seven, eight or nine tens (and 0 ones). 1.NBT.3. Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols >, =, <.	**Identify and continue patterns.** 2.OA.5. Identify, continue and label number patterns (e.g., aabb, abab). Describe a rule that determines and continues a sequence or pattern. **Number and Operations in Base Ten 2.NBT** **Understand place value.** 2.NBT.1. Model and identify place value positions of three digit numbers. Include: a. 100 can be thought of as a bundle of ten tens --called a "hundred". b. The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones). 2.NBT.2. Count up to 1000, skip-count by 5s, 10s and 100s. 2.NBT.3. Read, write, order up to 1000 using base-ten numerals, number names and expanded form. 2.NBT.4. Compare two three-digit numbers based on the meanings of the hundreds, tens and ones digits, using >, =, < symbols to record the results.

Grade K	Grade 1	Grade 2
	Use place value understanding and properties of operations to add and subtract. 1.NBT.4. Add using numbers up to 100 including adding a two-digit number and a one-digit number and adding a two-digit number and a multiple of 10. Use: • concrete models or drawings and strategies based on place value • properties of operations • and/or relationship between addition and subtraction; Relate the strategy to a written method and explain the reasoning used. Demonstrate in adding two-digit numbers, tens and tens are added, ones and ones are added and sometimes it is necessary to compose a ten from ten ones. 1.NBT.5. Given a two-digit number, mentally find 10 more or 10 less than the number without having to count. 1.NBT.6. Subtract multiples of 10 up to 100. Use: • concrete models or drawings • strategies based on place value • properties of operations • and/or the relationship between addition and subtraction Relate the strategy to a written method and explain the reasoning used.	**Use place value understanding and properties of operations to add and subtract.** 2.NBT.5. Fluently add and subtract using numbers up to 100. Use: • strategies based on place value • properties of operations • and/or the relationship between addition and subtraction. 2.NBT.6. Add up to four two-digit numbers using strategies based on place value and properties of operations. 2.NBT.7. Add and subtract using numbers up to 1000. Use: • concrete models or drawings and strategies based on place value • properties of operations • and/or relationship between addition and subtraction. Relate the strategy to a written method and explain the reasoning used. Demonstrate in adding or subtracting three-digit numbers, hundreds and hundreds are added or subtracted, tens and tens are added or subtracted, ones and ones are added or subtracted and sometimes it is necessary to compose a ten from ten ones or a hundred from ten tens.

Grade K	Grade 1	Grade 2
		2.NBT.8. Mentally add 10 or 100 to a given number 100-900 and mentally subtract 10 or 100 from a given number. 2.NBT.9. Explain or illustrate the processes of addition or subtraction and their relationship using place value and the properties of operations.
Measurement and Data K.MD **Describe and compare measurable attributes.** K.MD.1. Describe measurable attributes of objects (e.g., length or weight). Match measuring tools to attribute (e.g., ruler to length). Describe several measureable attributes of a single object. K.MD.2. Make comparisons between two objects with a measurable attribute in common, to see which object has "more of"/"less of" the attribute, and describe the difference. *For example, directly compare the heights of two children and describe one child as taller/shorter.* **Classify objects and count the number of objects in each category.** K.MD.3. Classify objects into given categories (attribute). Count the number of objects in each category (limit category counts to be less than or equal to 10).	**Measurement and Data 1.MD** **Measure lengths indirectly and by iterating length units.** 1.MD.1. Measure and compare three objects using standard or non-standard units. 1.MD.2. Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps.	**Measurement and Data 2.MD** **Measure and estimate lengths in standard units.** 2.MD.1. Measure the length of an object by selecting and using standard tools such as rulers, yardsticks, meter sticks, and measuring tapes. 2.MD.2. Measure the length of an object twice using different length units for the two measurements. Describe how the two measurements relate to the size of the unit chosen. 2.MD.3. Estimate, measure and draw lengths using whole units of inches, feet, yards, centimeters and meters. 2.MD.4. Measure to compare lengths of two objects, expressing the difference in terms of a standard length unit. **Relate addition and subtraction to length.** 2.MD.5. Solve addition and subtraction word problems using numbers up to 100 involving length that are given in the same units (e.g., by using drawings of rulers). Write an equation with a symbol for the unknown to represent the problem.

Grade K	Grade 1	Grade 2
Work with time and money. K.MD.4. Name in sequence the names of the week. K.MD.5 Tell time to the hour using both analog and digital clocks. K.MD.6. Identify coins by name.	**Tell and write time and work with money.** 1.MD.3. Tell and write time in hours and half hours using both analog and digital clocks. 1.MD.4. Read a calendar distinguishing yesterday, today and tomorrow. Read and write a date. 1.MD.5. Recognize and read money symbols including $ and ¢. 1.MD.6. Identify values of coins (e.g., nickel = 5 cents, quarter = 25 cents). Identify equivalent values of coins up to $1 (e.g., 5 pennies = 1 nickel, 5 nickels = 1 quarter).	**Work with time and money.** 2.MD.6. Tell and write time to the nearest five minutes using a.m. and p.m. from analog and digital clocks. 2.MD.7. Solve word problems involving dollar bills and coins using the $ and ¢ symbols appropriately.
	Represent and interpret data. 1.MD.7. Organize, represent and interpret data with up to three categories. Ask and answer comparison and quantity questions about the data.	**Represent and interpret data.** 2.MD.8. Collect, record, interpret, represent, and describe data in a table, graph or plot. 2.MD.9. Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put together, take-apart and compare problems using information presented in a bar graph.

Grade K	Grade 1	Grade 2
Geometry K.G **Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).** K.G.1. Describe objects in the environment using names of shapes and describe their relative positions (e.g., *above*, *below*, *beside*, *in front of*, *behind*, *next to)*. K.G.2. Name shapes regardless of their orientation or overall size. K.G.3. Identify shapes as two-dimensional or three-dimensional. **Analyze, compare, create, and compose shapes.** K.G.4. Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices), and other attributes (e.g., having sides of equal lengths). K.G.5. Build shapes (e.g., using sticks and clay) and draw shapes. K.G.6. Put together two-dimensional shapes to form larger shapes (e.g., join two triangles with full sides touching to make a rectangle).	**Geometry 1.G** **Reason with shapes and their attributes.** 1.G.1. Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes. Identify shapes that have non-defining attribute (e.g., color, orientation, overall size). Build and draw shapes given specified attributes. 1.G.2. Compose (put together) two-dimensional or three-dimensional shapes to form larger (composite) shapes. Compose new shapes from the composite shapes. 1.G.3. Partition circles and rectangles into two and four equal parts. Describe the parts using the words, *halves, fourths*, and *quarters* and phrases *half of, fourth of* and *quarter of*. Describe the whole as two of or four of the parts. Understand for these examples that decomposing (break apart) into more equal shares creates smaller shares.	**Geometry 2.G** **Reason with shapes and their attributes.** 2.G.1. Identify and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces compared visually, not by measuring. Identify triangles, quadrilaterals, pentagons, hexagons and cubes. 2.G.2. Partition a rectangle into rows and columns of same-size squares and count to find the total number of them. 2.G.3. Partition circles and rectangles into parts, describe the shares using the words *halves*, *thirds*, *half of*, *a third of*, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.

Instructional Focus: Third Grade though Fifth Grade

Grade 3	Grade 4	Grade 5
In Grade 3, instructional time should focus on four critical areas: (1) developing understanding of multiplication and division and strategies for multiplication and division within 100; (2) developing understanding of fractions, especially unit fractions (fractions with numerator 1); (3) developing understanding of the structure of rectangular arrays and of area; and (4) describing and analyzing two-dimensional shapes. (1) Students develop an understanding of the meanings of multiplication and division of whole numbers through activities and problems involving equal-sized groups, arrays, and area models; multiplication is finding an unknown product, and division is finding an unknown factor in these situations. For equal-sized group situations, division can require finding the unknown number of groups or the unknown group size. Students use properties of operations to calculate products of whole numbers, using increasingly sophisticated strategies based on these properties to solve multiplication and division problems involving single-digit factors. By comparing a variety of solution strategies, students learn the relationship between multiplication and division. (2) Students develop an understanding of fractions, beginning with unit fractions. Students view fractions in general as being built out of unit fractions, and they use fractions along with visual fraction models to represent parts of a whole. Students understand that the size of a fractional part is relative to the size of the whole. For example, 1/2 of the paint in a small bucket could be less paint than 1/3 of the paint in a larger	In Grade 4, instructional time should focus on three critical areas: (1) developing understanding and fluency with multi-digit multiplication, and developing understanding of dividing to find quotients involving multi-digit dividends; (2) developing an understanding of fraction equivalence, addition and subtraction of fractions with like denominators, and multiplication of fractions by whole numbers; (3) understanding that geometric figures can be analyzed and classified based on their properties, such as having parallel sides, perpendicular sides, particular angle measures, and symmetry. (1) Students generalize their understanding of place value to 1,000,000, understanding the relative sizes of numbers in each place. They apply their understanding of models for multiplication (equal-sized groups, arrays, area models), place value, and properties of operations, in particular the distributive property, as they develop, discuss, and use efficient, accurate, and generalizable methods to compute products of multi-digit whole numbers. Depending on the numbers and the context, they select and accurately apply appropriate methods to estimate or mentally calculate products. They develop fluency with efficient procedures for multiplying whole numbers; understand and explain why the procedures work based on place value and properties of operations; and use them to solve problems. Students apply their understanding of models for division, place value, properties of operations, and the relationship of division to multiplication as they develop, discuss, and use efficient, accurate, and generalizable procedures	In Grade 5, instructional time should focus on three critical areas: (1) developing fluency with addition and subtraction of fractions, and developing understanding of the multiplication of fractions and of division of fractions in limited cases (unit fractions divided by whole numbers and whole numbers divided by unit fractions); (2) extending division to 2-digit divisors, integrating decimal fractions into the place value system and developing understanding of operations with decimals to hundredths, and developing fluency with whole number and decimal operations; and (3) developing understanding of volume. (1) Students apply their understanding of fractions and fraction models to represent the addition and subtraction of fractions with unlike denominators as equivalent calculations with like denominators. They develop fluency in calculating sums and differences of fractions, and make reasonable estimates of them. Students also use the meaning of fractions, of multiplication and division, and the relationship between multiplication and division to understand and explain why the procedures for multiplying and dividing fractions make sense. (Note: this is limited to the case of dividing unit fractions by whole numbers and whole numbers by unit fractions.) (2) Students develop understanding of why division procedures work based on the meaning of base-ten numerals and properties of operations. They finalize fluency with multi-digit addition, subtraction, multiplication, and division. They apply their understandings of models for decimals, decimal notation, and properties of operations to

Grade 3	Grade 4	Grade 5
bucket, but 1/3 of a ribbon is longer than 1/5 of the same ribbon because when the ribbon is divided into 3 equal parts, the parts are longer than when the ribbon is divided into 5 equal parts. Students are able to use fractions to represent numbers equal to, less than, and greater than one. They solve problems that involve comparing fractions by using visual fraction models and strategies based on noticing equal numerators or denominators. (3) Students recognize area as an attribute of two-dimensional regions. They measure the area of a shape by finding the total number of same-size units of area required to cover the shape without gaps or overlaps, a square with sides of unit length being the standard unit for measuring area. Students understand that rectangular arrays can be decomposed into identical rows or into identical columns. By decomposing rectangles into rectangular arrays of squares, students connect area to multiplication, and justify using multiplication to determine the area of a rectangle. (4) Students describe, analyze, and compare properties of two-dimensional shapes. They compare and classify shapes by their sides and angles, and connect these with definitions of shapes. Students also relate their fraction work to geometry by expressing the area of part of a shape as a unit fraction of the whole.	to find quotients involving multi-digit dividends. They select and accurately apply appropriate methods to estimate and mentally calculate quotients, and interpret remainders based upon the context. (2) Students develop understanding of fraction equivalence and operations with fractions. They recognize that two different fractions can be equal (e.g., 15/9 = 5/3), and they develop methods for generating and recognizing equivalent fractions. Students extend previous understandings about how fractions are built from unit fractions, composing fractions from unit fractions, decomposing fractions into unit fractions, and using the meaning of fractions and the meaning of multiplication to multiply a fraction by a whole number. (3) Students describe, analyze, compare, and classify two-dimensional shapes. Through building, drawing, and analyzing two-dimensional shapes, students deepen their understanding of properties of two-dimensional objects and the use of them to solve problems involving symmetry.	add and subtract decimals to hundredths. They develop fluency in these computations, and make reasonable estimates of their results. Students use the relationship between decimals and fractions, as well as the relationship between finite decimals and whole numbers (i.e., a finite decimal multiplied by an appropriate power of 10 is a whole number), to understand and explain why the procedures for multiplying and dividing finite decimals make sense. They compute products and quotients of decimals to hundredths efficiently and accurately. (3) Students recognize volume as an attribute of three-dimensional space. They understand that volume can be measured by finding the total number of same-size units of volume required to fill the space without gaps or overlaps. They understand that a 1-unit by 1-unit by 1-unit cube is the standard unit for measuring volume. They select appropriate units, strategies, and tools for solving problems that involve estimating and measuring volume. They decompose three-dimensional shapes and find volumes of right rectangular prisms by viewing them as decomposed into layers of arrays of cubes. They measure necessary attributes of shapes in order to determine volumes to solve real world and mathematical problems.

Grade 3	Grade 4	Grade 5
Operations and Algebraic Thinking 3.OA **Represent and solve problems involving multiplication and division.** 3.OA.1. Interpret products of whole numbers (e.g., interpret 5 × 7 as the total number of objects in 5 groups of 7 objects each). *For example, show objects in rectangular arrays or describe a context in which a total number of objects can be expressed as 5 × 7.* 3.OA.2. Interpret whole-number quotients of whole numbers (e.g., interpret 56 ÷ 8 as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each). *For example, deconstruct rectangular arrays or describe a context in which a number of shares or a number of groups can be expressed as 56 ÷ 8.* 3.OA.3. Use multiplication and division numbers up to 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities (e.g., by using drawings and equations with a symbol for the unknown number to represent the problem).	**Operations and Algebraic Thinking 4.OA** **Use the four operations with whole numbers to solve problems.** 4.OA.1. Interpret a multiplication equation as a comparison (e.g., interpret 35 = 5 × 7 as a statement that 35 is 5 groups of 7 and 7 groups of 5). (Commutative property) Represent verbal statements of multiplicative comparisons as multiplication equations. 4.OA.2. Multiply or divide to solve word problems involving multiplicative comparison (e.g., by using drawings and equations with a symbol for the unknown number to represent the problem or missing numbers in an array). Distinguish multiplicative comparison from additive comparison. 4.OA.3. Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.	**Operations and Algebraic Thinking 5.OA** **Write and interpret numerical expressions.** 5.OA.1. Use parentheses to construct numerical expressions, and evaluate numerical expressions with these symbols.

Grade 3	Grade 4	Grade 5
3.OA.4 Determine the unknown whole number in a multiplication or division equation relating three whole numbers (e.g., $8 \times ? = 48$, $5 = ? \div 3$, $6 \times 6 = ?$, and find $32 \div 8$ by finding the number that makes 32 when multiplied by 8). **Understand properties of multiplication and the relationship between multiplication and division.** 3.OA.5. Make, test, support, draw conclusions and justify conjectures about properties of operations as strategies to multiply and divide. (Students need not use formal terms for these properties.) • Commutative property of multiplication) If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. • Associative property of multiplication $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$, then $15 \times 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. • Distributive property) Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, one can find 8×7 as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$. • Inverse property (relationship) of multiplication and division.	**Gain familiarity with factors and multiples.** 4.OA.4. • Find all factor pairs for a whole number in the range 1–100. • Explain the correlation/differences between multiples and factors. • Determine whether a given whole number in the range 1–100 is a multiple of a given one-digit number. • Determine whether a given whole number in the range 1–100 is prime or composite.	

Grade 3	Grade 4	Grade 5
Multiply and divide within 100. 3.OA.6. Fluently multiply and divide numbers up to 100, using strategies such as the relationship between multiplication and division (e.g., knowing that 8 ×5 = 40, one knows 40 ÷ 5 = 8) or properties of operations. **Solve problems involving the four operations, and identify and explain patterns in arithmetic.** 3.OA.7. Solve and create two-step word problems using the any of the four operations. Represent these problems using equations with a symbol (box, circle, question mark) standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. 3.OA.8. Identify arithmetic patterns (including patterns in the addition table or multiplication table) and explain them using properties of operations. *For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.*	**Generate and analyze patterns.** 4.OA.5. Generate a number or shape pattern, table, t-chart, input/output function that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. Be able to express the pattern in algebraic terms. *For example, given the rule "Add 3" and the starting number 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.* 4.OA.6 Extend patterns that use addition, subtraction, multiplication, division or symbols, up to 10 terms, represented by models (function machines), tables, sequences, or in problem situations (L)	**Analyze patterns and relationships.** 5.OA.2. Generate two numerical patterns using two given rules. Identify apparent relationships between corresponding terms. Form ordered pairs consisting of corresponding terms from the two patterns, and graph the ordered pairs on a coordinate plane. *For example, given the rule "Add 3" and the starting number 0, and given the rule "Add 6" and the starting number 0, generate terms in the resulting sequences, and observe that the terms in one sequence are twice the corresponding terms in the other sequence. Explain informally why this is so.*

Grade 3	Grade 4	Grade 5
Number and Operations in Base Ten 3.NBT **Use place value understanding and properties of operations to perform multi-digit arithmetic.** 3.NBT.1. Use place value understanding to round whole numbers to the nearest 10 or 100. 3.NBT.2. Use strategies and/or algorithms to fluently add and subtract with numbers up to 1000, demonstrating understanding of place value, properties of operations, and/or the relationship between addition and subtraction. 3.NBT.3. Multiply one digit whole numbers by multiples of 10 in the range 10-90 (e.g., 9 x 80, 10 x 60) using strategies based on place value and properties of operations.	**Number and Operations in Base Ten 4.NBT** **Generalize place value understanding for multi-digit whole numbers.** 4.NBT.1. Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. *For example, recognize that 700 ÷ 70 = 10 by applying concepts of place value and division.* 4.NBT.2. Read and write multi-digit whole numbers using base-ten numerals, number names, and expanded form. Compare two multi-digit numbers based on the value of the digits in each place, using >, =, and < symbols to record the results of comparisons. 4.NBT.3. Use place value understanding to round multi-digit whole numbers to any place using a variety of estimation methods; be able to describe, compare, and contrast solutions. **Use place value understanding and properties of operations to perform multi-digit arithmetic.** 4.NBT.4. Fluently add and subtract multi-digit whole numbers using any algorithm. Verify the reasonableness of the results.	**Number and Operations in Base Ten 5.NBT** **Understand the place value system.** 5.NBT.1. Recognize that in a multi-digit number, a digit in one place represents 10 times as much as it represents in the place to its right and 1/10 of what it represents in the place to its left. 5.NBT.2. Explain and extend the patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain and extend the patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10. 5.NBT.3. Read, write, and compare decimals to thousandths. a. Read and write decimals to thousandths using base-ten numerals, number names, and expanded form [e.g., 347.392 = 3 x 100 + 4 x 10 + 7 x 1 + 3 (1/10) + 9 (1/100) + 2 (1/1000)]. b. Compare two decimals to thousandths place based on meanings of the digits in each place, using >, =, and < symbols to record the results of comparisons.

Grade 3	Grade 4	Grade 5
	4.NBT.5. Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models. 4.NBT.6. Find whole-number quotients and remainders with one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	5.NBT.4. Use place values understanding to round decimals to any place. **Perform operations with multi-digit whole numbers and with decimals to hundredths.** 5.NBT.5. Fluently multiply multi-digit whole numbers using a standard algorithm. 5.NBT.6. Find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, number lines, real life situations, and/or area models. 5NBT.7. Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between the operations. Explain their reasoning in getting their answers.

Grade 3	Grade 4	Grade 5
Number and Operations—Fractions 3.NF **(limited in this grade to fractions with denominators 2, 3, 4, 6, and 8)** **Develop understanding of fractions as numbers.** 3.NF.1. Understand a fraction $1/b$ (e.g., 1/4) as the quantity formed by 1 part when a whole is partitioned into b (e.g., 4) equal parts; understand a fraction a/b (e.g., 2/4) as the quantity formed by a (e.g., 2) parts of size $1/b$. (e.g., 1/4) 3.NF.2. Understand a fraction as a number on the number line; represent fractions on a number line diagram. a. Represent a fraction $1/b$ (e.g., 1/4) on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it into b (e.g., 4) equal parts. Recognize that each part has size $1/b$ (e.g., 1/4) and that the endpoint of the part based at 0 locates the number $1/b$ (e.g., 1/4) on the number line. b. Represent a fraction a/b (e.g., 2/8) on a number line diagram or ruler by marking off a lengths $1/b$ (e.g., 1/8) from 0. Recognize that the resulting interval has size a/b (e.g., 2/8) and that its endpoint locates the number a/b (e.g., 2/8) on the number line.	**Number and Operations—Fractions 4.NF** **(limited in this grade to fractions with denominators 2, 3, 4, 5, 6, 8, 10, 12, and 100)** **Extend understanding of fraction equivalence and ordering.** 4.NF.1. Explain why a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions. 4.NF.2. Compare two fractions with different numerators and different denominators (e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as ½). Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols >, =, or <, and justify the conclusions (e.g., by using a visual fraction model).	**Number and Operations—Fractions 5.NF** **Use equivalent fractions as a strategy to add and subtract fractions.** 5.NF.1. Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. *For example, 2/3 + 5/4 = 8/12 + 15/12 = 23/12. (In general, a/b + c/d = (ad + bc)/bd.)* 5.NF.2. Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators (e.g., by using visual fraction models or equations to represent the problem). Use benchmark fractions and number sense of fractions to estimate mentally and check the reasonableness of answers. *For example, recognize an incorrect result 2/5 + 1/2 = 3/7, by observing that 3/7 < 1/2.*

Grade 3	Grade 4	Grade 5
3.NF.3. Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size. a. Understand two fractions as equivalent if they are the same size (modeled) or the same point on a number line. b. Recognize and generate simple equivalent fractions (e.g., 1/2 = 2/4, 4/6 = 2/3). Explain why the fractions are equivalent (e.g., by using a visual fraction model). c. Express and model whole numbers as fractions, and recognize and construct fractions that are equivalent to whole numbers. *Examples: Express 3 in the form 3 = 3/1; recognize that 6/1 = 6; locate 4/4 and 1 at the same point of a number line diagram.* d. Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with the symbols >, =, or <, and justify the conclusions (e.g., by using a visual fraction model).	**Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers.** 4.NF.3. Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$. a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole. b. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions (e.g., by using a visual fraction model). *Examples: 3/8 = 1/8 + 1/8 + 1/8 ;3/8 = 1/8 + 2/8 ; 2 1/8 = 1 + 1 + 1/8 = 8/8 + 8/8 + 1/8.* c. Add and subtract mixed numbers with like denominators (e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction). d. Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators (e.g., by using visual fraction models and equations to represent the problem).	**Apply and extend previous understandings of multiplication and division to multiply and divide fractions.** 5.NF.3. Interpret a fraction as division of the numerator by the denominator ($a/b = a \div b$). Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers (e.g., by using visual fraction models or equations to represent the problem). *For example, interpret 3/4 as the result of dividing 3 by 4, noting that 3/4 multiplied by 4 equals 3, and that when 3 wholes are shared equally among 4 people each person has a share of size 3/4. If 9 people want to share a 50-pound sack of rice equally by weight, how many pounds of rice should each person get? Between what two whole numbers does your answer lie?* 5.NF.4. Apply and extend previous understandings of multiplication to multiply a fraction or whole number by a fraction. a. Interpret the product $(a/b) \times q$ as a parts of a partition of q into b equal parts; equivalently, as the result of a sequence of operations $a \times q \div b$. *For example, use a visual fraction model to show (2/3) × 4 = 8/3, and create a story context for this equation. Do the same with (2/3) × (4/5) = 8/15. (In general, (a/b) × (c/d) = ac/bd.)* b. Find the area of a rectangle with fractional side lengths appropriate unit fraction side lengths, and show that the area is the same as would be found by multiplying the side lengths. Multiply fractional side lengths to find areas of rectangles, and represent fraction products as rectangular areas.

Grade 3	Grade 4	Grade 5
	4.NF.4. Apply and extend previous understandings of multiplication to multiply a fraction by a whole number. a. Understand a fraction a/b as a multiple of $1/b$. *For example, use a visual fraction model to represent 5/4 as the product 5 × (1/4), recording the conclusion by the equation 5/4 = 5 × (1/4).* b. Understand a multiple of a/b as a multiple of $1/b$, and use this understanding to multiply a fraction by a whole number. *For example, use a visual fraction model to express 3 × (2/5) as 6 × (1/5), recognizing this product as 6/5. (In general, n × (a/b) = (n × a)/b.)* c. Solve word problems involving multiplication of a fraction by a whole number (e.g., by using visual fraction models and equations to represent the problem). Check for the reasonableness of the answer. *For example, if each person at a party will eat 3/8 of a pound of roast beef, and there will be 5 people at the party, how many pounds of roast beef will be needed? Between what two whole numbers does your answer lie?*	5.NF.5 Interpret multiplication as scaling (resizing), by: a. Comparing the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication. b. Explaining why multiplying a given number by a fraction greater than 1 results in a product greater than the given number (recognizing multiplication by whole numbers greater than 1 as a familiar case); explaining why multiplying a given number by a fraction less than 1 results in a product smaller than the given number; and relating the principle of fraction equivalence $a/b = (n \times a)/(n \times b)$ to the effect of multiplying a/b by 1. (Division of a fraction by a fraction is not a requirement at this grade.) 5.NF.6. Solve real world problems involving multiplication of fractions and mixed numbers (e.g., by using visual fraction models or equations to represent the problem).

Grade 3	Grade 4	Grade 5
	Understand decimal notation for fractions, and compare decimal fractions. 4.NF.5. Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to add two fractions with respective denominators 10 and 100. *For example, express 3/10 as 30/100, and add 3/10 + 4/100 = 34/100.* 4.NF.6. Use decimal notation for fractions with denominators 10 or 100. *For example, rewrite 0.62 as 62/100; describe a length as 0.62 meters; locate 0.62 on a number line diagram.* 4.NF.7. Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are valid only when the two decimals refer to the same whole. Record the results of comparisons with the symbols >, =, or <, and justify the conclusions (e.g., by using a visual model).	5.NF.7. Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions. a. Interpret division of a unit fraction by a non-zero whole number, and compute such quotients. *For example, create a story context for (1/3) ÷ 4, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that (1/3) ÷ 4 = 1/12 because (1/12) × 4 = 1/3.* b. Interpret division of a whole number by a unit fraction, and compute such quotients. *For example, create a story context for 4 ÷ (1/5), and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that 4 ÷ (1/5) = 20 because 20 × (1/5) = 4.* c. Solve real world problems involving division of unit fractions by non-zero whole numbers and division of whole numbers by unit fractions (e.g., by using visual fraction models and equations to represent the problem). *For example, how much chocolate will each person get if 3 people share 1/2 lb of chocolate equally? How many 1/3-cup servings are in 2 cups of raisins?*

Grade 3	Grade 4	Grade 5
Measurement and Data 3.MD **Solve problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects.** 3.MD.1. Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes or hours (e.g., by representing the problem on a number line diagram or clock). 3.MD.2. Estimate and measure liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). (Excludes compound units such as cm^3 and finding the geometric volume of a container.) Add, subtract, multiply, or divide to solve and create one-step word problems involving masses or volumes that are given in the same units (e.g., by using drawings, such as a beaker with a measurement scale, to represent the problem). (Excludes multiplicative comparison problems [problems involving notions of "times as much."])	**Measurement and Data 4.MD** **Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit, and time.** 4.MD.1. Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two column table. *For example, know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36).* 4.MD.2. Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.	**Measurement and Data 5.MD** **Convert like measurement units within a given measurement system. Solve problems involving time.** 5. MD.1. Identify, estimate measure, and convert equivalent measures within systems English length (inches, feet, yards, miles) weight (ounces, pounds, tons) volume (fluid ounces, cups, pints, quarts, gallons) temperature (Fahrenheit) Metric length (millimeters, centimeters, meters, kilometers) volume (milliliters, liters), temperature (Celsius), (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real world problems using appropriate tools. 5. MD.2. Solve real-world problems involving elapsed time between world time zones. (L)

Grade 3	Grade 4	Grade 5
3.MD.3. Select an appropriate unit of English, metric, or non-standard measurement to estimate the length, time, weight, or temperature (L)	4.MD.3. Apply the area and perimeter formulas for rectangles in real world and mathematical problems. *For example, find the width of a rectangular room given the area of the flooring and the length, by viewing the area formula as a multiplication equation with an unknown factor.* 4.MD.4. Solve real-world problems involving elapsed time between U.S. time zones (including Alaska Standard time) (L)	
Represent and interpret data. 3.MD.4. Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step "how many more" and "how many less" problems using information presented in scaled bar graphs. *For example, draw a bar graph in which each square in the bar graph might represent 5 pets.* 3.MD.5. Measure and record lengths using rulers marked with halves and fourths of an inch. Make a line plot with the data, where the horizontal scale is marked off in appropriate units—whole numbers, halves, or quarters. 3.MD.6. Explain the classification of data from real-world problems shown in graphical representations .Use the terms minimum and maximum. (L)	**Represent and interpret data.** 4.MD.5. Make a line plot to display a data set of measurements in fractions of a unit (1/2, 1/4, 1/8). Solve problems involving addition and subtraction of fractions by using information presented in line plots. *For example, from a line plot find and interpret the difference in length between the longest and shortest specimens in an insect collection.* 4.MD.6. Explain the classification of data from real-world problems shown in graphical representations including the use of terms mean, range, median and mode with a given set of data. (L)	**Represent and interpret data.** 5.MD.3. Make a line plot to display a data set of measurements in fractions of a unit (1/2, 1/4, 1/8). Solve problems involving information presented in line plots. *For example, given different measurements of liquid in identical beakers, find the amount of liquid each beaker would contain if the total amount in all the beakers were redistributed equally.*

Grade 3	Grade 4	Grade 5
Geometric measurement: understand concepts of area and relate area to multiplication and to addition. 3.MD.7. Recognize area as an attribute of plane figures and understand concepts of area measurement. a. A square with side length 1 unit is said to have "one square unit" and can be used to measure area. b. Demonstrate that a plane figure can be covered without gaps or overlaps by *n* (e.g., 6) unit squares is said to have an area of *n* (e.g., 6) square units. 3.MD.8. Measure areas by tiling with unit squares (square centimeters, square meters, square inches, square feet, and improvised units).	**Geometric measurement: understand concepts of angle and measure angles.** 4.MD.7. Recognize angles as geometric shapes that are formed wherever two rays share a common endpoint, and understand the following concepts of angle measurement: a. An angle is measured with reference to a circle with its center at the common endpoint of the rays, by considering the fraction of the circular arc between the points where the two rays intersect the circle. An angle that turns through 1/360 of a circle is called a "one-degree angle," and can be used to measure angles. b. An angle that turns through *n* one-degree angles is said to have an angle measure of *n* degrees. 4.MD.8. Measure and draw angles in whole-number degrees using a protractor. Estimate and sketch angles of specified measure. 4.MD.9. Recognize angle measure as additive. When an angle is divided into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems (e.g., by using an equation with a symbol for the unknown angle measure).	**Geometric measurement: understand concepts of volume and relate volume to multiplication and to addition.** 5.MD.4. Recognize volume as an attribute of solid figures and understand concepts of volume measurement. a. A cube with side length 1 unit, called a "unit cube," is said to have "one cubic unit" of volume, and can be used to measure volume. b. A solid figure which can be packed without gaps or overlaps using *n* unit cubes is said to have a volume of *n* cubic units. 5.MD.5. Estimate and measure volumes by counting unit cubes, using cubic cm, cubic in, cubic ft, and non-standard units.

Grade 3	Grade 4	Grade 5
3.MD.9. Relate area to the operations of multiplication and addition. a. Find the area of a rectangle with whole-number side lengths by tiling it, and show that the area is the same as would be found by multiplying the side lengths. *For example, after tiling rectangles, develop a rule for finding the area of any rectangle.* b. Multiply side lengths to find areas of rectangles with whole number side lengths in the context of solving real world and mathematical problems, and represent whole-number products as rectangular areas in mathematical reasoning. c. Use area models (rectangular arrays) to represent the distributive property in mathematical reasoning. Use tiling to show in a concrete case that the area of a rectangle with whole-number side lengths a and $b + c$ is the sum of $a \times b$ and $a \times c$. d. Recognize area as additive. Find areas of rectangular figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts, applying this technique to solve real world problems. *For example, the area of a 7 by 8 rectangle can be determined by decomposing it into a 7 by 3 rectangle and a 7 by 5 rectangle.*		5.MD.6. Relate volume to the operations of multiplication and addition and solve real world and mathematical problems involving volume. a. Estimate and find the volume of a right rectangular prism with whole-number side lengths by packing it with unit cubes, and show that the volume is the same as would be found by multiplying the edge lengths, equivalently by multiplying the height by the area of the base. Demonstrate the associative property of multiplication by using the product of three whole-numbers to find volumes (length x width x height). b. Apply the formulas $V = l \times w \times h$ and $V = b \times h$ for rectangular prisms to find volumes of right rectangular prisms with whole number edge lengths in the context of solving real world and mathematical problems. c. Recognize volume as additive. Find volumes of solid figures composed of two conjoined right rectangular prisms by adding the volumes of the non-overlapping parts, applying this technique to solve real world problems.

Grade 3	Grade 4	Grade 5
Geometric measurement: recognize perimeter as an attribute of plane figures and distinguish between linear and area measures. 3.MD.10. Solve real world and mathematical problems involving perimeters of polygons, including: • finding the perimeter given the side lengths, •finding an unknown side length, • exhibiting rectangles with the same perimeter and different areas • exhibiting rectangles with the same area and different perimeters.		
Geometry 3.G **Reason with shapes and their attributes.** 3.G.1. Categorize shapes by different attribute classifications and recognize that shared attributes can define a larger category. Generalize to create examples or non-examples. 3.G.2. Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. *For example, partition a shape into 4 parts with equal area, and describe the area of each part as 1/4 of the area of the shape.*	**Geometry 4.G** **Draw and identify lines and angles, and classify shapes by properties of their lines and angles.** 4.G.1. Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular, parallel, and intersecting line segments. Identify these in plane figures. 4.G.2. Classify plane figures based on the presence or absence of parallel or perpendicular lines, or the presence or absence of angles of a specified size. Recognize right triangles as a category, and identify right triangles. 4.G.3. Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded along the line into matching parts. Identify line-symmetric figures and draw lines of symmetry.	**Geometry 5.G** **Graph points on the coordinate plane to solve real-world and mathematical problems.** 5.G.1. Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., *x*-axis and *x*-coordinate, *y*-axis and *y*-coordinate).

Grade 3	Grade 4	Grade 5
		5.G.2. Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation. **Classify two-dimensional figures into categories based on their properties.** 5.G.3. Understand that attributes belonging to a category of two dimensional figures also belong to all subcategories of that category. *For example, all rectangles have four right angles and squares are rectangles, so all squares have four right angles.* 5.G.4. Classify two-dimensional figures in a hierarchy based on attributes and properties

Instructional Focus: Sixth Grade though Eighth Grade

Grade 6	Grade 7	Grade 8
In Grade 6, instructional time should focus on four critical areas: (1) connecting ratio and rate to whole number multiplication and division and using concepts of ratio and rate to solve problems; (2) completing understanding of division of fractions and extending the notion of number to the system of rational numbers, which includes negative numbers; (3) writing, interpreting, and using expressions and equations; and (4) developing understanding of statistical thinking. (1) Students use reasoning about multiplication and division to solve ratio and rate problems about quantities. By viewing equivalent ratios and rates as deriving from, and extending, pairs of rows (or columns) in the multiplication table, and by analyzing simple drawings that indicate the relative size of quantities, students connect their understanding of multiplication and division with ratios and rates. Thus students expand the scope of problems for which they can use multiplication and division to solve problems, and they connect ratios and fractions. Students solve a wide variety of problems involving ratios and rates. (2) Students use the meaning of fractions, the meanings of multiplication and division, and the relationship between multiplication and division to understand and explain why the procedures for dividing fractions make sense. Students use these operations to solve problems. Students extend their previous understandings of number and the ordering of numbers to the full system of rational numbers, which includes negative rational numbers, and in particular negative integers. They	In Grade 7, instructional time should focus on four critical areas: (1) developing understanding of and applying proportional relationships; (2) developing understanding of operations with rational numbers and working with expressions and linear equations; (3) solving problems involving scale drawings and informal geometric constructions, and working with two- and three-dimensional shapes to solve problems involving area, surface area, and volume; and (4) drawing inferences about populations based on samples. (1) Students extend their understanding of ratios and develop understanding of proportionality to solve single- and multi-step problems. Students use their understanding of ratios and proportionality to solve a wide variety of percent problems, including those involving discounts, interest, taxes, tips, and percent increase or decrease. Students solve problems about scale drawings by relating corresponding lengths between the objects or by using the fact that relationships of lengths within an object are preserved in similar objects. Students graph proportional relationships and understand the unit rate informally as a measure of the steepness of the related line, called the slope. They distinguish proportional relationships from other relationships. (2) Students develop a unified understanding of number, recognizing fractions, decimals (that have a finite or a repeating decimal representation), and percents as different representations of rational numbers. Students extend addition, subtraction,	In Grade 8, instructional time should focus on three critical areas: (1) formulating and reasoning about expressions and equations, including modeling an association in bivariate data with a linear equation, and solving linear equations and systems of linear equations; (2) grasping the concept of a function and using functions to describe quantitative relationships; (3) analyzing two- and three-dimensional space and figures using distance, angle, similarity, and congruence, and understanding and applying the Pythagorean Theorem. (1) Students use linear equations and systems of linear equations to represent, analyze, and solve a variety of problems. Students recognize equations for proportions ($y/x = m$ or $y = mx$) as special linear equations ($y = mx + b$), understanding that the constant of proportionality (m) is the slope, and the graphs are lines through the origin. They understand that the slope (m) of a line is a constant rate of change, so that if the input or x-coordinate changes by an amount A, the output or y-coordinate changes by the amount $m \cdot A$. Students also use a linear equation to describe the association between two quantities in bivariate data (such as arm span vs. height for students in a classroom). At this grade, fitting the model, and assessing its fit to the data are done informally. Interpreting the model in the context of the data requires students to express a relationship between the two quantities in question and to interpret components of the relationship (such as slope and y-intercept) in terms of the situation. Students strategically choose and efficiently

Grade 6	Grade 7	Grade 8
reason about the order and absolute value of rational numbers and about the location of points in all four quadrants of the coordinate plane. (3) Students understand the use of variables in mathematical expressions. They write expressions and equations that correspond to given situations, evaluate expressions, and use expressions and formulas to solve problems. Students understand that expressions in different forms can be equivalent, and they use the properties of operations to rewrite expressions in equivalent forms. Students know that the solutions of an equation are the values of the variables that make the equation true. Students use properties of operations and the idea of maintaining the equality of both sides of an equation to solve simple one-step equations. Students construct and analyze tables, such as tables of quantities that are in equivalent ratios, and they use equations (such as $3x = y$) to describe relationships between quantities. (4) Building on and reinforcing their understanding of number, students begin to develop their ability to think statistically. Students recognize that a data distribution may not have a definite center and that different ways to measure center yield different values. The median measures center in the sense that it is roughly the middle value. The mean measures center in the sense that it is the value that each data point would take on if the total of the data values were redistributed equally, and also in the sense that it is a balance point. Students recognize that a measure of variability (interquartile range or mean absolute deviation) can also be useful for summarizing data because two very different sets of data can have the same mean and median yet be distinguished by their	multiplication, and division to all rational numbers, maintaining the properties of operations and the relationships between addition and subtraction, and multiplication and division. By applying these properties, and by viewing negative numbers in terms of everyday contexts (e.g., amounts owed or temperatures below zero), students explain and interpret the rules for adding, subtracting, multiplying, and dividing with negative numbers. They use the arithmetic of rational numbers as they formulate expressions and equations in one variable and use these equations to solve problems. (3) Students continue their work with area from Grade 6, solving problems involving the area and circumference of a circle and surface area of three-dimensional objects. In preparation for work on congruence and similarity in Grade 8 they reason about relationships among two-dimensional figures using scale drawings and informal geometric constructions, and they gain familiarity with the relationships between angles formed by intersecting lines. Students work with three-dimensional figures, relating them to two-dimensional figures by examining cross-sections. They solve real-world and mathematical problems involving area, surface area, and volume of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes and right prisms. (4) Students build on their previous work with single data distributions to compare two data distributions and address questions about differences between populations. They begin informal work with random sampling to generate data sets and learn about the importance of representative samples for drawing inferences.	implement procedures to solve linear equations in one variable, understanding that when they use the properties of equality and the concept of logical equivalence, they maintain the solutions of the original equation. Students solve systems of two linear equations in two variables and relate the systems to pairs of lines in the plane; these intersect, are parallel, or are the same line. Students use linear equations, systems of linear equations, linear functions, and their understanding of slope of a line to analyze situations and solve problems. (2) Students grasp the concept of a function as a rule that assigns to each input exactly one output. They understand that functions describe situations where one quantity determines another. They can translate among representations and partial representations of functions (noting that tabular and graphical representations may be partial representations), and they describe how aspects of the function are reflected in the different representations. (3) Students use ideas about distance and angles, how they behave under translations, rotations, reflections, and dilations, and ideas about congruence and similarity to describe and analyze two-dimensional figures and to solve problems. Students show that the sum of the angles in a triangle is the angle formed by a straight line, and that various configurations of lines give rise to similar triangles because of the angles created when a transversal cuts parallel lines. Students understand the statement of the Pythagorean Theorem and its converse, and can explain why the Pythagorean Theorem holds, for example, by decomposing a square in two different ways. They apply the Pythagorean Theorem to find distances

Grade 6	Grade 7	Grade 8
variability. Students learn to describe and summarize numerical data sets, identifying clusters, peaks, gaps, and symmetry, considering the context in which the data were collected. Students in Grade 6 also build on their work with area in elementary school by reasoning about relationships among shapes to determine area, surface area, and volume. They find areas of right triangles, other triangles, and special quadrilaterals by decomposing these shapes, rearranging or removing pieces, and relating the shapes to rectangles. Using these methods, students discuss, develop, and justify formulas for areas of triangles and parallelograms. Students find areas of polygons and surface areas of prisms and pyramids by decomposing them into pieces whose area they can determine. They reason about right rectangular prisms with fractional side lengths to extend formulas for the volume of a right rectangular prism to fractional side lengths. They prepare for work on scale drawings and constructions in Grade 7 by drawing polygons in the coordinate plane.		between points on the coordinate plane, to find lengths, and to analyze polygons. Students complete their work on volume by solving problems involving cones, cylinders, and spheres.

Grade 6	Grade 7	Grade 8
Ratios and Proportional Relationships 6.RP **Understand ratio concepts and use ratio reasoning to solve problems.** 6.RP.1. Write and describe the relationship in real life context between two quantities using ratio language. *For example, "The ratio of wings to beaks in the bird house at the zoo was 2:1, because for every 2 wings there was 1 beak." "For every vote candidate A received, candidate C received nearly three votes."* 6.RP.2. Understand the concept of a unit rate (a/b associated with a ratio $a:b$ with $b \neq 0$, and use rate language in the context of a ratio relationship) and apply it to solve real world problems (e.g., unit pricing, constant speed). *For example, "This recipe has a ratio of 3 cups of flour to 4 cups of sugar, so there is 3/4 cup of flour for each cup of sugar." "We paid $75 for 15 hamburgers, which is a rate of $5 per hamburger."*	**Ratios and Proportional Relationships 7.RP** **Analyze proportional relationships and use them to solve real-world and mathematical problems.** 7.RP.1. Compute unit rates associated with ratios of fractions, including ratios of lengths, areas and other quantities measured in like or different units. *For example, if a person walks 1/2 mile in each 1/4 hour, compute the unit rate as the complex fraction 1/2/1/4 miles per hour, equivalently 2 miles per hour or apply a given scale factor to find missing dimensions of similar figures.* 7.RP.2. Recognize and represent proportional relationships between quantities. Make basic inferences or logical predictions from proportional relationships. a. Decide whether two quantities are in a proportional relationship (e.g., by testing for equivalent ratios in a table or graphing on a coordinate plane and observing whether the graph is a straight line through the origin). b. Identify the constant of proportionality (unit rate) in tables, graphs, equations, diagrams, and verbal descriptions of proportional relationships in real world situations.	

Grade 6	Grade 7	Grade 8
6.RP.3. Use ratio and rate reasoning to solve real-world and mathematical problems (e.g., by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations). a. Make tables of equivalent ratios relating quantities with whole number measurements, find missing values in the tables, and plot the pairs of values on the coordinate plane. Use tables to compare ratios, and understand equivalencies. b. Solve unit rate problems including those involving unit pricing and constant speed. *For example, if it took 7 hours to mow 4 lawns, then at that rate, how many lawns could be mowed in 35 hours? At what rate were lawns being mowed?* c. Find a percent of a quantity as a rate per 100 (e.g., 30% of a quantity means 30/100 times the quantity); solve problems involving finding the whole, given a part and the percent. d. Use ratio reasoning to convert measurement units between given measurement systems (e.g., convert kilometers to miles); manipulate and transform units appropriately when multiplying or dividing quantities.	c. Represent proportional relationships by equations and multiple representations such as tables, graphs, diagrams, sequences, and contextual situations. *For example, if total cost t is proportional to the number n of items purchased at a constant price p, the relationship between the total cost and the number of items can be expressed as t = pn.* d. Understand the concept of unit rate and show it on a coordinate plane. Explain what a point *(x, y)* on the graph of a proportional relationship means in terms of the situation, with special attention to the points (0, 0) and (1, *r)* where *r* is the unit rate. 7.RP.3. Use proportional relationships to solve multistep ratio and percent problems. *Examples: simple interest, tax, markups and markdowns, gratuities and commissions, fees, percent increase and decrease, percent error.*	

Grade 6	Grade 7	Grade 8
The Number System 6.NS **Apply and extend previous understandings of multiplication and division to divide fractions by fractions.** 6.NS.1. Interpret and compute quotients of fractions, and solve word problems involving division of fractions by fractions (e.g., by using visual fraction models and equations to represent the problem). *For example, create a story context for (2/3) ÷ (3/4) and use a visual fraction model to show the quotient; use the relationship between multiplication and division to explain that (2/3) ÷ (3/4) = 8/9 because 3/4 of 8/9 is 2/3 (In general (a/b) ÷ (c/d) = ad/bc.) How much chocolate will each person get if 3 people share 1/2 lb of chocolate equally? How many 3/4-cup servings are in 2/3 of a cup of yogurt? How wide is a rectangular strip of land with length 3/4 mi and area 1/2 square mi?*	**The Number System 7.NS** **Apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers.** 7.NS.1. Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram. Multiply and divide rational numbers and include other models to the representation. a. Show that a number and its opposite have a sum of 0 (additive inverses). Describe situations in which opposite quantities combine to make 0. *For example, a hydrogen atom has 0 charge because its two constituents are oppositely charged.* b. Understand addition of rational numbers ($p + q$ as the number located a distance $\|q\|$ from p, in the positive or negative direction depending on whether q is positive or negative). Interpret sums of rational numbers by describing real-world contexts. c. Understand subtraction of rational numbers as adding the additive inverse, $p - q = p + (-q)$. Show that the distance between two rational numbers on the number line is the absolute value of their difference, and apply this principle in real-world contexts. d. Apply properties of operations as strategies to add and subtract rational numbers.	**The Number System 8.NS** **Know that there are numbers that are not rational, and approximate them by rational numbers.** 8.NS.1. Classify real numbers as either rational (the ratio of two integers, a terminating decimal number, or a repeating decimal number) or irrational. 8.NS.2. Order real numbers, using approximations of irrational numbers, locating them on a number line. *For example, show that √2 is between 1 and 2, then between 1.4 and 1.5, and explain how to continue on to get better approximations.* 8.NS.3. Identify or write the prime factorization of a number using exponents. L

Grade 6	Grade 7	Grade 8
Compute fluently with multi-digit numbers and find common factors and multiples. 6.NS.2. Fluently multiply and divide multi-digit whole numbers using the standard algorithm. Express the remainder as a whole number, decimal, or simplified fraction; explain or justify your choice based on the context of the problem. 6.NS.3. Fluently add, subtract, multiply, and divide multi-digit decimals using the standard algorithm for each operation. Express the remainder as a terminating decimal, or a repeating decimal, or rounded to a designated place value. 6.NS.4. Find the greatest common factor of two whole numbers less than or equal to 100 and the least common multiple of two whole numbers less than or equal to 12. Use the distributive property to express a sum of two whole numbers 1–100 with a common factor as a multiple of a sum of two whole numbers with no common factor. *For example, express 36 + 8 as 4 (9 + 2).*	7.NS.2. Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers and use equivalent representations. a. Understand that multiplication is extended from fractions to rational numbers by requiring that operations continue to satisfy the properties of operations, particularly the distributive property, leading to products such as $(-1)(-1) = 1$ and the rules for multiplying signed numbers. Interpret products of rational numbers by describing real-world contexts. b. Understand that integers can be divided, provided that the divisor is not zero, and every quotient of integers (with non-zero divisor) is a rational number. If p and q are integers, then $-(p/q) = (-p)/q = p/(-q)$. Interpret quotients of rational numbers by describing real-world contexts. c. Apply and name properties of operations used as strategies to multiply and divide rational numbers. d. Convert a rational number to a decimal using long division; know that the decimal form of a rational number terminates in 0s or eventually repeats. e. Convert between equivalent fractions, decimals, or percents.	

Grade 6	Grade 7	Grade 8
Apply and extend previous understandings of numbers to the system of rational numbers. 6.NS.5 Understand that positive and negative numbers describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explain the meaning of 0 in each situation. 6.NS.6. Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates. a. Recognize opposite signs of numbers as indicating locations on opposite sides of 0 on the number line; Recognize that the opposite of the opposite of a number is the number itself [e.g., –(–3) = 3] and that 0 is its own opposite. b. Understand signs of numbers in ordered pairs as indicating locations in quadrants of the coordinate plane; recognize that when two ordered pairs differ only by signs, the locations of the points are related by reflections across one or both axes. c. Find and position integers and other rational numbers on a horizontal or vertical number line diagram; find and position pairs of integers and other rational numbers on a coordinate plane.	7.NS.3. Solve real-world and mathematical problems involving the four operations with rational numbers. (Computations with rational numbers extend the rules for manipulating fractions to complex fractions.) *For example, use models explanations, number lines, real life situations, describing or illustrating the effect of arithmetic operations on rational numbers (fractions, decimals).*	

Grade 6	Grade 7	Grade 8
6.NS.7. Understand ordering and absolute value of rational numbers. a. Interpret statements of inequality as statements about the relative position of two numbers on a number line diagram. *For example, interpret –3 > –7 as a statement that –3 is located to the right of –7 on a number line oriented from left to right.* b. Write, interpret, and explain statements of order for rational numbers in real-world contexts. *For example, write –3 °C > –7 °C to express the fact that –3 °C is warmer than –7 °C.* c. Understand the absolute value of a rational number as its distance from 0 on the number line; interpret absolute value as magnitude for a positive or negative quantity in a real-world situation. *For example, for an account balance of –30 dollars, write |–30| = 30 to describe the size of the debt in dollars.* d. Distinguish comparisons of absolute value from statements about order. *For example, recognize that an account balance less than -30 dollars represents a debt greater than 30 dollars.* 6.NS.8. Solve real-world and mathematical problems by graphing points in all four quadrants of the coordinate plane. Include use of coordinates and absolute value to find distances between points with the same first coordinate or the same second coordinate.		

Grade 6	Grade 7	Grade 8
Expressions and Equations 6.EE **Apply and extend previous understandings of arithmetic to algebraic expressions.** 6.EE.1. Write and evaluate numerical expressions involving whole-number exponents *For example multiply by powers of 10 and products of numbers using exponents. ($7^3 = 7•7•7$)* 6.EE.2. Write, read, and evaluate expressions in which letters stand for numbers. a. Write expressions that record operations with numbers and with letters standing for numbers. *For example, express the calculation "Subtract y from 5" as $5 - y$.* b. Identify parts of an expression using mathematical terms (sum, term, product, factor, quotient, coefficient); view one or more parts of an expression as a single entity. *For example, describe the expression 2 (8 + 7) as a product of two factors; view (8 + 7) as both a single entity and a sum of two terms.* c. Evaluate expressions and formulas. Include formulas used in real-world problems. Perform arithmetic operations, including those involving whole number exponents, in the conventional order with or without parentheses. (Order of Operations)	**Expressions and Equations 7.EE** **Use properties of operations to generate equivalent expressions.** 7.EE.1. Apply properties of operations as strategies to add, subtract, factor, expand and simplify linear expressions with rational coefficients. 7.EE.2. Understand that rewriting an expression in different forms in a problem context can shed light on the problem and how the quantities in it are related. *For example, $a + 0.05a = 1.05a$ means that "increase by 5%" is the same as "multiply by 1.05."* **Solve real-life and mathematical problems using numerical and algebraic expressions and equations.** 7.EE.3. Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form and assess the reasonableness of answers using mental computation and estimation strategies. *For example: If a woman making $25 an hour gets a 10% raise, she will make an additional 1/10 of her salary an hour, or $2.50, for a new salary of $27.50. If you want to place a towel bar 9 3/4 inches long in the center of a door that is 27 1/2 inches wide, you will need to place the bar about 9 inches from each edge; this estimate can be used as a check on the exact computation.*	**Expressions and Equations 8.EE** **Work with radicals and integer exponents.** 8.EE.1. Apply the properties (product, quotient, power, zero, negative exponents, and rational exponents) of integer exponents to generate equivalent numerical expressions. *For example, $3^2 \times 3^{-5} = 3^{-3} = 1/3^3 = 1/27$.* 8.EE.2. Use square root and cube root symbols to represent solutions to equations of the form $x^2 = p$ and $x^3 = p$, where p is a positive rational number. Evaluate square roots of small perfect squares and cube roots of small perfect cubes. Know that $\sqrt{2}$ is irrational. 8.EE.3. Use numbers expressed in the form of a single digit times an integer power of 10 to estimate very large or very small quantities, and to express how many times as much one is than the other. *For example, estimate the population of the United States as 3×10^8 and the population of the world as 7×10^9, and determine that the world population is more than 20 times larger.* 8.EE.4. Perform operations with numbers expressed in scientific notation, including problems where both standard notation and scientific notation are used. Use scientific notation and choose units of appropriate size for measurements of very large or very small quantities. Interpret scientific notation that has been generated by technology.

Grade 6	Grade 7	Grade 8
6.EE.3. Apply the properties of operations to generate equivalent expressions. Model (e.g., manipulatives, graph paper) and apply the distributive, commutative, identity, and inverse properties with integers and variables by writing equivalent expressions. *For example, apply the distributive property to the expression 3 (2 + x) to produce the equivalent expression 6 + 3x.* 6.EE.4. Identify when two expressions are equivalent (i.e., when the two expressions name the same number regardless of which value is substituted into them). *For example, the expressions y + y + y and 3y are equivalent because they name the same number regardless of which number y stands for.*	7.EE.4. Use variables to represent quantities in a real-world or mathematical problem, and construct multi-step equations and inequalities to solve problems by reasoning about the quantities. a. Solve word problems leading to equations of the form $px + q = r$ and $p(x + q) = r$, where p, q, and r are specific rational numbers. *For example, the perimeter of a rectangle is 54 cm. Its length is 6 cm. What is its width?* b. Solve word problems leading to inequalities of the form $px + q > r$ or $px + q < r$, where p, q, and r are specific rational numbers. Graph the solution set of the inequality and interpret it in the context of the problem. *For example: As a salesperson, you are paid $50 per week plus $3 per sale. This week you want your pay to be at least $100. Write an inequality for the number of sales you need to make, and describe the solutions.*	**Understand the connections between proportional relationships, lines, and linear equations.** 8.EE.5. Graph linear equations such as $y=mx+b$, interpreting m as the slope or rate of change of the graph and b as the y-intercept or starting value. Compare two different proportional relationships represented in different ways. *For example, compare a distance-time graph to a distance-time equation to determine which of two moving objects has greater speed.* 8.EE.6. Use similar triangles to explain why the slope m is the same between any two distinct points on a non-vertical line in the coordinate plane; derive the equation $y = mx$ for a line through the origin and the equation $y = mx + b$ for a line intercepting the vertical axis at b.

Grade 6	Grade 7	Grade 8
Reason about and solve one-variable equations and inequalities. 6.EE.5. Understand solving an equation or inequality as a process of answering a question: which values from a specified set, if any, make the equation or inequality true? Use substitution to determine whether a given number in a specified set makes an equation or inequality true. *For example: does 5 make 3x > 7 true?* 6.EE.6. Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set. 6.EE.7. Solve real-world and mathematical problems by writing and solving equations of the form x + p = q and px = q for cases in which p, q and x are all nonnegative rational numbers. 6.EE.8. Write an inequality of the form x > c or x < c to represent a constraint or condition in a real-world or mathematical problem. Recognize that inequalities of the form x > c or x < c have infinitely many solutions; represent solutions of such inequalities on number line diagrams.		**Analyze and solve linear equations and pairs of simultaneous linear equations.** 8.EE.7. Solve linear equations in one variable. a. Give examples of linear equations in one variable with one solution infinitely many solutions, or no solutions. Show which of these possibilities is the case by successively transforming the given equation into simpler forms, until an equivalent equation of the form $x = a$, $a = a$, or $a = b$ results (where a and b are different numbers). b. Solve linear equations with rational coefficients, including equations whose solutions require expanding expressions using the distributive property and combining like terms. 8.EE.8. Analyze and solve systems of linear equations. a. Show that the solution to a system of two linear equations in two variables is the intersection of the graphs of those equations because points of intersection satisfy both equations simultaneously. b. Solve systems of two linear equations in two variables and estimate solutions by graphing the equations. Simple cases may be done by inspection. *For example, 3x + 2y = 5 and 3x + 2y = 6 have no solution because 3x + 2y cannot simultaneously be 5 and 6.* c. Solve real-world and mathematical problems leading to two linear equations in two variables. *For example, given coordinates for two pairs of points, determine whether the line through the first pair of points intersects the line through the second pair.*

Grade 6	Grade 7	Grade 8
Represent and analyze quantitative relationships between dependent and independent variables. 6.EE.9. Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. *For example, in a problem involving motion at constant speed, list and graph ordered pairs of distances and times, and write the equation $d = 65t$ to represent the relationship between distance and time.*		

Grade 6	Grade 7	Grade 8
		Functions 8.F **Define, evaluate, and compare functions.** 8.F.1. Understand that a function is a rule that assigns to each input (the domain) exactly one output (the range). The graph of a function is the set of ordered pairs consisting of an input and the corresponding output. *For example, use the vertical line test to determine functions and non-functions.* 8.F.2. Compare properties of two functions function each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). *For example, given a linear function represented by a table of values and a linear function represented by an algebraic expression, determine which function has the greater rate of change.* 8.F.3. Interpret the equation $y = mx + b$ as defining a linear function, whose graph is a straight line; give examples of functions that are not linear. *For example, the function $A = s^2$ giving the area of a square as a function of its side length is not linear because its graph contains the points (1,1), (2,4) and (3,9), which are not on a straight line.*

Grade 6	Grade 7	Grade 8
		Use functions to model relationships between quantities. 8.F.4. Construct a function to model a linear relationship between two quantities. Determine the rate of change and initial value of the function from a description of a relationship or from two (x, y) values, including reading these from a table or from a graph. Interpret the rate of change and initial value of a linear function in terms of the situation it models, and in terms of its graph or a table of values. 8.F.5. Given a verbal description between two quantities, sketch a graph. Conversely, given a graph, describe a possible real-world example. *For example, graph the position of an accelerating car or tossing a ball in the air.*

Grade 6	Grade 7	Grade 8
Geometry 6.G **Solve real-world and mathematical problems involving area, surface area, and volume.** 6.G.1. Find the area of right triangles, other triangles, special quadrilaterals, and polygons by composing or decomposing into other polygons (e.g., rectangles and triangles). Apply these techniques in the context of solving real-world and mathematical problems. 6.G.2. Apply the standard formulas to find volumes of prisms. Use the attributes and properties (including shapes of bases) of prisms to identify, compare or describe three-dimensional figures including prisms and cylinders. 6.G.3. Draw polygons in the coordinate plane given coordinates for the vertices; determine the length of a side joining the coordinates of vertices with the same first or the same second coordinate. Apply these techniques in the context of solving real-world and mathematical problems.	**Geometry 7.G** **Draw, construct, and describe geometrical figures and describe the relationships between them.** 7.G.1. Solve problems involving scale drawings of geometric figures, including computing actual lengths and areas from a scale drawing and reproducing a scale drawing at a different scale. 7.G.2. Draw (freehand, with ruler and protractor, and with technology) geometric shapes including polygons and circles with given conditions. Focus on constructing triangles from three measures of angles or sides, noticing when the conditions determine a unique triangle, more than one triangle, or no triangle. 7.G.3. Describe the two-dimensional figures, i.e., cross-section, that result from slicing three-dimensional figures, as in plane sections of right rectangular prisms and right rectangular pyramids.	**Geometry 8.G** **Understand congruence and similarity using physical models, transparencies, or geometry software.** 8.G.1. Through experimentation, verify the properties of rotations, reflections, and translations (transformations) to figures on a coordinate plane). a. Lines are taken to lines, and line segments to line segments of the same length. b. Angles are taken to angles of the same measure. c. Parallel lines are taken to parallel lines. 8.G.2. Demonstrate understanding of congruence by applying a sequence of translations, reflections, and rotations on two-dimensional figures. Given two congruent figures, describe a sequence that exhibits the congruence between them. 8.G.3 .Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates.

Grade 6	Grade 7	Grade 8
6.G.4. Represent three-dimensional figures (e.g., prisms) using nets made up of rectangles and triangles, and use the nets to find the surface area of these figures. Apply these techniques in the context of solving real-world and mathematical problems. 6. G.5. Identify, compare or describe attributes and properties of circles (radius, and diameter) L	**Solve real-life and mathematical problems involving angle measure, area, surface area, and volume.** 7.G.4. Know the formulas for the area and circumference of a circle and use them to solve problems; give an informal derivation of the relationship between the circumference and area of a circle. 7.G.5. Use facts about supplementary, complementary, vertical, and adjacent angles in a multi-step problem to write and solve simple equations for an unknown angle in a figure. 7.G.6. Solve real-world and mathematical problems involving area, volume and surface area of two- and three-dimensional objects composed of triangles, quadrilaterals, polygons, cubes, and right prisms.	8.G.4. Demonstrate understanding of similarity, by applying a sequence of translations, reflections, rotations, and dilations on two-dimensional figures. Describe a sequence that exhibits the similarity between them. 8.G.5. Justify using informal arguments to establish facts about • the angle sum of triangles (sum of the interior angles of a triangle is 180°) • measures of exterior angles of triangles, • angles created when parallel lines are cut be a transversal (e.g., alternate interior angles) and • angle-angle criterion for similarity of triangles. **Understand and apply the Pythagorean Theorem.** 8.G.6. Explain the Pythagorean Theorem and its converse. 8.G.7. Apply the Pythagorean Theorem to determine unknown side lengths in right triangles in real-world and mathematical problems in two and three dimensions.

Grade 6	Grade 7	Grade 8
		8.G.8. Apply the Pythagorean Theorem to find the distance between two points in a coordinate system. **Solve real-world and mathematical problems involving volume of cylinders, cones, and spheres.** 8.G.9. Identify and apply the formulas for the volumes of cones, cylinders, and spheres and use them to solve real-world and mathematical problems.
Statistics and Probability 6.SP **Develop understanding of statistical variability.** 6.SP.1 Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. *For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.* 6.SP.2 Understand that a set of data has a distribution which can be described by its center (mean, median, or mode), spread (range), and overall shape and can be used to answer a statistical question.	**Statistics and Probability 7.SP** **Use random sampling to draw inferences about a population.** 7.SP.1. Understand that statistics can be used to gain information about a population by examining a reasonably sized sample of the population; generalizations about a population from a sample are valid only if the sample is representative of that population. Understand that random sampling tends to produce representative samples and support valid inferences. 7.SP.2. Use data from a random sample to draw inferences about a population with an unknown characteristic of interest. Generate multiple samples (or simulated samples) of the same size to gauge the variation in estimates or predictions. *For example, estimate the mean word length in a book by randomly sampling words from the book; predict the winner of a school election based on randomly sampled survey data. Gauge how far off the estimate or prediction might be.*	**Statistics and Probability 8.SP** **Investigate patterns of association in bivariate data.** 8.SP.1. Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantities. Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association. 8.SP.2. Explain why straight lines are widely used to model relationships between two quantitative variables. For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.

Grade 6	Grade 7	Grade 8
6.SP.3 Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation (range) describes how its values vary with a single number. **Summarize and describe distributions.** 6.SP.4. Display numerical data in plots on a number line, including dot or line plots, histograms and box (box and whisker) plots. 6.SP.5 Summarize numerical data sets in relation to their context, such as by: a. Reporting the number of observations (occurrences). b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range), as well as describing any overall pattern and any outliners with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. 6.SP.6 Analyze whether a game is mathematically fair or unfair by explaining the probability of all possible outcomes. L	**Draw informal comparative inferences about two populations.** 7.SP.3. Informally assess the degree of visual overlap of two numerical data distributions with similar variabilities, measuring the difference between the centers by expressing it as a multiple of a measure of variability. *For example, the mean height of players on the basketball team is 10 cm greater than the mean height of players on the soccer team, about twice the variability (mean absolute deviation) on either team; on a dot plot, the separation between the two distributions of heights is noticeable.* 7.SP.4. Use measures of center and measures of variability for numerical data from random samples to draw informal comparative inferences about two populations. *For example, decide whether the words in a chapter of a seventh-grade science book are generally longer than the words in a chapter of a fourth-grade science book.*	8.SP.3. Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and y-intercept. *For example, in a linear model for a biology experiment, interpret a slope of 1.5 cm/hr as meaning that an additional hour of sunlight each day is associated with an additional 1.5 cm in mature plant height.* 8.SP.4. Construct and interpret a two-way table summarizing data on two categorical variables collected from the same subjects and use relative frequencies to describe possible association between the two variables. *For example, collect data from students in your class on whether or not they have a curfew on school nights and whether or not they have assigned chores at home. Is there evidence that those who have a curfew also tend to have chores?*

Grade 6	Grade 7	Grade 8
6.SP.7. Solve or identify solutions to problems involving possible combinations (e.g., if ice cream sundaes come in 3 flavors with 2 possible toppings, how many different sundaes can be made using only one flavor of ice cream with one topping?) L	**Investigate chance processes and develop, use, and evaluate probability models.** 7.SP.5. Understand that the probability of a chance event is a number between 0 and 1 that expresses the likelihood of the event occurring. Larger numbers indicate greater likelihood. A probability near 0 indicates an unlikely event, a probability around 1/2 indicates an event that is neither unlikely nor likely, and a probability near 1 indicates a likely event. 7.SP.6. Approximate the probability of a chance event by collecting data on the chance process that produces it and observing its long-run relative frequency, and predict the approximate relative frequency given the probability. *For example, when rolling a number cube 600 times, predict that a 3 or 6 would be rolled roughly 200 times, but probably not exactly 200 times.* 7.SP.7. Develop a probability model and use it to find probabilities of events. Compare probabilities from a model to observed frequencies; if the agreement is not good, explain possible sources of the discrepancy. a. Design a uniform probability model by assigning equal probability to all outcomes, and use the model to determine probabilities of events. *For example, if a student is selected at random from a class, find the probability that Jane will be selected and the probability that a girl will be selected.*	

Grade 6	Grade 7	Grade 8
	b. Design a probability model (which may not be uniform) by observing frequencies in data generated from a chance process. *For example, find the approximate probability that a spinning penny will land heads up or that a tossed paper cup will land open-end down. Do the outcomes for the spinning penny appear to be equally likely based on the observed frequencies?* 7.SP.8. Find probabilities of compound events using organized lists, tables, tree diagrams, and simulation. a. Understand that, just as with simple events, the probability of a compound event is the fraction of outcomes in the sample space for which the compound event occurs. b. Represent sample spaces for compound events using methods such as organized lists, tables and tree diagrams. For an event described in everyday language (e.g., "rolling double sixes"), identify the outcomes in the sample space which compose the event. c. Design and use a simulation to generate frequencies for compound events. *For example, use random digits as a simulation tool to approximate the answer to the question: If 40% of donors have type A blood, what is the probability that it will take at least 4 donors to find one with type A blood?*	

Alaska High School Mathematics Standards

The high school standards specify the mathematics that all students should study in order to be career ready. Additional mathematics that students should learn in order to take advanced courses such as calculus, advanced statistics, or discrete mathematics is indicated by the symbol +.

Math domains for high school are not courses but conceptual categories, which are intended to portray a coherent view of high school mathematics. A student's work with any set of standards crosses a number of traditional course boundaries. For example, the Functions Standards would apply to many courses. It is a district decision how to design course offerings covering the mathematics standards. Districts can use the traditional approach of Algebra I, Geometry, and Algebra II or implement an integrated approach.

Standards with connections to modeling are indicated by *. Modeling is best interpreted in relation to other standards. Making mathematical models is a Standard for Mathematical Practice. If the star symbol appears on the heading for a group of standards, it should be understood to apply to all standards in that group.

Coding for High School Mathematical Domains:

1. Number and Quantity - N
2. Algebra - A
3. Functions – F
4. Modeling - M
5. Geometry - G
6. Statistics and Probability - P

Narrative of Standards - Number and Quantity

Numbers and Number Systems. During the years from kindergarten to eighth grade, students must repeatedly extend their conception of number. At first, "number" means "counting number": 1, 2, 3... Soon after that, 0 is used to represent "none" and the whole numbers are formed by the counting numbers together with zero. The next extension is fractions. At first, fractions are barely numbers and tied strongly to pictorial representations. Yet by the time students understand division of fractions, they have a strong concept of fractions as numbers and have connected them, via their decimal representations, with the base-ten system used to represent the whole numbers. During middle school, fractions are augmented by negative fractions to form the rational numbers. In Grade 8, students extend this system once more, augmenting the rational numbers with the irrational numbers to form the real numbers. In high school, students will be exposed to yet another extension of number, when the real numbers are augmented by the imaginary numbers to form the complex numbers.

With each extension of number, the meanings of addition, subtraction, multiplication, and division are extended. In each new number system—integers, rational numbers, real numbers, and complex numbers—the four operations stay the same in two important ways: They have the commutative, associative, and distributive properties and their new meanings are consistent with their previous meanings.

Extending the properties of whole-number exponents leads to new and productive notation. For example, properties of whole-number exponents suggest that $(5^{1/3})^3$ should be $5^{(1/3)3} = 5^1 = 5$ and that $5^{1/3}$ should be the cube root of 5.

Calculators, spreadsheets, and computer algebra systems can provide ways for students to become better acquainted with these new number systems and their notation. They can be used to generate data for numerical experiments, to help understand the workings of matrix, vector, and complex number algebra, and to experiment with non-integer exponents.

Quantities. In real world problems, the answers are usually not numbers but quantities: numbers with units, which involves measurement. In their work in measurement up through Grade 8, students primarily measure commonly used attributes such as length, area, and volume. In high school, students encounter a wider variety of units in modeling, e.g., acceleration, currency conversions, derived quantities such as person-hours and heating degree days, social science rates such as per-capita income, and rates in everyday life such as points scored per game or batting averages. They also encounter novel situations in which they themselves must conceive the attributes of interest. For example, to find a good measure of overall highway safety, they might propose measures such as fatalities per year, fatalities per year per driver, or fatalities per vehicle-mile traveled. Such a conceptual process is sometimes called quantification. Quantification is important for science, as when surface area suddenly "stands out" as an important variable in evaporation. Quantification is also important for companies, which must conceptualize relevant attributes and create or choose suitable measures for them.

Number and Quantity Standards

The Real Number System	N –RN

Extend the properties of exponents to rational exponents.

1. Explain how the definition of the meaning of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents. For example, we define $5^{1/3}$ to be the cube root of 5 because we want $(5^{1/3})^3 = 5(^{1/3})^3$ to hold, so $(5^{1/3})^3$ must equal 5.

2. Rewrite expressions involving radicals and rational exponents using the properties of exponents.

Use properties of rational and irrational numbers.

3. Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational.

Quantities*	N –Q

Reason quantitatively and use units to solve problems.

1. Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays.

2. Define appropriate quantities for the purpose of descriptive modeling.

3. Choose a level of accuracy appropriate to limitations on measurement when reporting quantities.

The Complex Number System — N -CN

Perform arithmetic operations with complex numbers.

1. Know there is a complex number i such that $i^2 = -1$, and every complex number has the form $a + bi$ with a and b real.

2. Use the relation $i^2 = -1$ and the commutative, associative, and distributive properties to add, subtract, and multiply complex numbers.

3. (+) Find the conjugate of a complex number; use conjugates to find moduli and quotients of complex numbers.

Represent complex numbers and their operations on the complex plane.

4. (+) Represent complex numbers on the complex plane in rectangular and polar form (including real and imaginary numbers), and explain why the rectangular and polar forms of a given complex number represent the same number.

5. (+) Represent addition, subtraction, multiplication, and conjugation of complex numbers geometrically on the complex plane; use properties of this representation for computation. *For example,* $(1 - \sqrt{3}i)^3 = 8$ *because* $(1 - \sqrt{3}i)$ *has modulus* 2 *and argument* 120°.

6. (+) Calculate the distance between numbers in the complex plane as the modulus of the difference, and the midpoint of a segment as the average of the numbers at its endpoints.

Use complex numbers in polynomial identities and equations.

7. Solve quadratic equations with real coefficients that have complex solutions.

8. (+) Extend polynomial identities to the complex numbers. *For example, rewrite* $x^2 + 4$ *as* $(x + 2i)(x - 2i)$.

9. (+) Know the Fundamental Theorem of Algebra; show that it is true for quadratic polynomials.

Vector and Matrix Quantities — N –VM

Represent and model with vector quantities.

1. (+) Recognize vector quantities as having both magnitude and direction. Represent vector quantities by directed line segments, and use appropriate symbols for vectors and their magnitudes (e.g., $\boldsymbol{v}$, $|\boldsymbol{v}|$, $||\boldsymbol{v}||$, $\boldsymbol{v}$).

2. (+) Find the components of a vector by subtracting the coordinates of an initial point from the coordinates of a terminal point.

3. (+) Solve problems involving velocity and other quantities that can be represented by vectors.

Perform operations on vectors.

4. (+) Add and subtract vectors.

   a. Add vectors end-to-end, component-wise, and by the parallelogram rule. Understand that the magnitude of a sum of two vectors is typically not the sum of the magnitudes.

   b. Given two vectors in magnitude and direction form, determine the magnitude and direction of their sum.

   c. Understand vector subtraction $\boldsymbol{v} - \boldsymbol{w}$ as $\boldsymbol{v} + (-\boldsymbol{w})$, where $-\boldsymbol{w}$ is the additive inverse of $\boldsymbol{w}$, with the same magnitude as $\boldsymbol{w}$ and pointing in the opposite direction. Represent vector subtraction graphically by connecting the tips in the appropriate order, and perform vector subtraction component-wise.

5. (+) Multiply a vector by a scalar.

   a. Represent scalar multiplication graphically by scaling vectors and possibly reversing their direction; perform scalar multiplication component-wise, e.g., as $c(v_x, v_y) = (cv_x, cv_y)$.

   b. Compute the magnitude of a scalar multiple $c\boldsymbol{v}$ using $||c\boldsymbol{v}|| = |c|\boldsymbol{v}$. Compute the direction of $c\boldsymbol{v}$ knowing that when $|c|\boldsymbol{v} \neq 0$, the direction of $c\boldsymbol{v}$ is either along $\boldsymbol{v}$ (for $c > 0$) or against $\boldsymbol{v}$ (for $c < 0$).

Perform operations on matrices and use matrices in applications.

6. (+) Use matrices to represent and manipulate data, e.g., to represent payoffs or incidence relationships in a network.

7. (+) Multiply matrices by scalars to produce new matrices, e.g., as when all of the payoffs in a game are doubled.

8. (+) Add, subtract, and multiply matrices of appropriate dimensions.

9. (+) Understand that, unlike multiplication of numbers, matrix multiplication for square matrices is not a commutative operation, but still satisfies the associative and distributive properties.

10. (+) Understand that the zero and identity matrices play a role in matrix addition and multiplication similar to the role of 0 and 1 in the real numbers. The determinant of a square matrix is nonzero if and only if the matrix has a multiplicative inverse.

11. (+) Multiply a vector (regarded as a matrix with one column) by a matrix of suitable dimensions to produce another vector. Work with matrices as transformations of vectors.

12. (+) Work with 2 × 2 matrices as a transformations of the plane, and interpret the absolute value of the determinant in terms of area.

Narrative of Standards - Algebra

Expressions. An expression is a record of a computation with numbers, symbols that represent numbers, arithmetic operations, exponentiation, and, at more advanced levels, the operation of evaluating a function. Conventions about the use of parentheses and the order of operations assure that each expression is unambiguous. Creating an expression that describes a computation involving a general quantity requires the ability to express the computation in general terms, abstracting from specific instances.

Reading an expression with comprehension involves analysis of its underlying structure. This may suggest a different but equivalent way of writing the expression that exhibits some different aspect of its meaning. For example, p + 0.05p can be interpreted as the addition of a 5% tax to a price p. Rewriting p + 0.05p as 1.05p shows that adding a tax is the same as multiplying the price by a constant factor.

Algebraic manipulations are governed by the properties of operations and exponents, and the conventions of algebraic notation. At times, an expression is the result of applying operations to simpler expressions. For example, p + 0.05p is the sum of the simpler expressions p and 0.05p. Viewing an expression as the result of operation on simpler expressions can sometimes clarify its underlying structure.

A spreadsheet or a computer algebra system (CAS) can be used to experiment with algebraic expressions, perform complicated algebraic manipulations, and understand how algebraic manipulations behave.

Equations and inequalities. An equation is a statement of equality between two expressions, often viewed as a question asking for which values of the variables the expressions on either side are in fact equal. These values are the solutions to the equation. An identity, in contrast, is true for all values of the variables; identities are often developed by rewriting an expression in an equivalent form.

The solutions of an equation in one variable form a set of numbers; the solutions of an equation in two variables form a set of ordered pairs of numbers, which can be plotted in the coordinate plane. Two or more equations and/or inequalities form a system. A solution for such a system must satisfy every equation and inequality in the system.

An equation can often be solved by successively deducing from it one or more simpler equations. For example, one can add the same constant to both sides without changing the solutions, but squaring both sides might lead to extraneous solutions. Strategic competence in solving includes looking ahead for productive manipulations and anticipating the nature and number of solutions.

Some equations have no solutions in a given number system, but have a solution in a larger system. For example, the solution of $x + 1 = 0$ is an integer, not a whole number; the solution of $2x + 1 = 0$ is a rational number, not an integer; the solutions of $x^2 - 2 = 0$ are real numbers, not rational numbers; and the solutions of $x^2 + 2 = 0$ are complex numbers, not real numbers.

The same solution techniques used to solve equations can be used to rearrange formulas. For example, the formula for the area of a trapezoid, $A = ((b_1+b_2)/2)h$, can be solved for h using the same deductive process.

Inequalities can be solved by reasoning about the properties of inequality. Many, but not all, of the properties of equality continue to hold for inequalities and can be useful in solving them.

Connections to Functions and Modeling. Expressions can define functions, and equivalent expressions define the same function. Asking when two functions have the same value for the same input leads to an equation; graphing the two functions allows for finding approximate solutions of the equation. Converting a verbal description to an equation, inequality, or system of these is an essential skill in modeling.

Seeing Structure in Expressions	A-SSE

Interpret the structure of expressions

1. Interpret expressions that represent a quantity in terms of its context.*

   a. Interpret parts of an expression, such as terms, factors, and coefficients.

   b. Interpret complicated expressions by viewing one or more of their parts as a single entity. *For example, interpret* $P(1+r)^n$ *as the product of P and a factor not depending on P.*

2. Use the structure of an expression to identify ways to rewrite it. *For example, see* $x^4 - y^4$ *as* $(x^2)^2 - (y^2)^2$*, thus recognizing it as a difference of squares that can be factored as* $(x^2 - y^2)(x^2 + y^2)$.

Write expressions in equivalent forms to solve problems

3. Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression.*

   a. Factor a quadratic expression to reveal the zeros of the function it defines. *For example,* $x^2 + 4x + 3 = (x + 3)(x + 1)$.

   b. Complete the square in a quadratic expression to reveal the maximum or minimum value of the function it defines. For example, $x^2 + 4x+3 = (x+2)^2 - 1$.

   c. Use the properties of exponents to transform expressions for exponential functions. *For example the expression* 1.15^t *can be rewritten as* $(1.15^{1/12})^{12t} \approx 1.012^{12t}$ *to reveal the approximate equivalent monthly interest rate if the annual rate is 15%.*

4. Derive the formula for the sum of a finite geometric series (when the common ratio is not 1), and use the formula to solve problems. *For example, calculate mortgage payments.**

Arithmetic with Polynomials and Rational Expressions — A -APR

Perform arithmetic operations on polynomials

1. Add, subtract, and multiply polynomials. Understand that polynomials form a system similar to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication.

Understand the relationship between zeros and factors of polynomials

2. Know and apply the Remainder Theorem: For a polynomial $p(x)$ and a number a, the remainder on division by $x - a$ is $p(a)$, so $p(a) = 0$ if and only if $(x - a)$ is a factor of $p(x)$.

3. Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial.

Use polynomial identities to solve problems

4. Prove polynomial identities and use them to describe numerical relationships. *For example, the polynomial identity* $(x^2 + y^2)^2 = (x^2 - y^2)^2 + (2xy)^2$ *can be used to generate Pythagorean triples.*

5. (+) Know and apply the Binomial Theorem for the expansion of $(x + y)^n$ in powers of x and y for a positive integer n, where x and y are any numbers, with coefficients determined for example by Pascal's Triangle.

Rewrite rational expressions

6. Rewrite simple rational expressions in different forms; write $a(x)/b(x)$ in the form $q(x) + r(x)/b(x)$, where $a(x)$, $b(x)$, $q(x)$, and $r(x)$ are polynomials with the degree of $r(x)$ less than the degree of $b(x)$, using inspection, long division, or, for the more complicated examples, a computer algebra system.

7. (+) Add, subtract, multiply, and divide rational expressions. Understand that rational expressions form a system similar to the rational numbers, closed under addition, subtraction, multiplication, and division by a nonzero rational expression.

Creating Equations* A –CED

Create equations that describe numbers or relationships

1. Create equations and inequalities in one variable and use them to solve problems. *Include equations arising from linear and quadratic functions, and simple rational and exponential functions.*

2. Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.

3. Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context. *For example, represent inequalities describing cost constraints in various situations.*

4. Solve literal equations or formulas for a variable involving multi-steps. *For example, solve for h when* $A = \frac{1}{2}h(b_1 + b_2)$.

Reasoning with Equations and Inequalities A –REI

Understand solving equations as a process of reasoning and explain the reasoning

1. Apply properties of mathematics to justify steps in solving equations in one variable.

2. Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise.

Solve equations and inequalities in one variable

3. Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.

4. Solve quadratic equations in one variable.

   a. Use the method of completing the square to transform any quadratic equation in x into an equation of the form $(x - p)^2 = q$ that has the same solutions. Derive the quadratic formula from this form.

b. Solve quadratic equations by inspection (e.g., for $x^2 = 49$), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm bi$ for real numbers a and b.

Solve systems of equations

5. Show that, given a system of two equations in two variables, replacing one equation by the sum of that equation and a multiple of the other produces a system with the same solutions.

6. Solve systems of linear equations exactly and approximately, e.g., with graphs or algebraically, focusing on pairs of linear equations in two variables.

7. Solve a simple system consisting of a linear equation and a quadratic equation in two variables algebraically and graphically. *For example, find the points of intersection between the line* $y = -3x$ and the circle $x^2 + y^2 = 3$.

8. (+) Represent a system of linear equations as a single matrix equation in a vector variable.

9. (+) Find the inverse of a matrix if it exists and use it to solve systems of linear equations (using technology for matrices of dimension 3×3 or greater).

Represent and solve equations and inequalities graphically

10. Understand that the graph of an equation in two variables is the set of all its solutions plotted in the coordinate plane, often forming a curve (which could be a line).

11. Explain why the x-coordinates of the points where the graphs of the equations $y = f(x)$ and $y = g(x)$ intersect are the solutions of the equation $f(x) = g(x)$; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.*

12. Graph the solutions to a linear inequality in two variables as a half-plane (excluding the boundary in the case of a strict inequality), and graph the solution set to a system of linear inequalities in two variables as the intersection of the corresponding half-planes.

Narrative of Standards - Functions

Functions describe situations where one quantity determines another. For example, the return on $10,000 invested at an annualized percentage rate of 4.25% is a function of the length of time the money is invested. Because we continually make theories about dependencies between quantities in nature and society, functions are important tools in the construction of mathematical models.

In school mathematics, functions usually have numerical inputs and outputs and are often defined by an algebraic expression. For example, the time in hours it takes for a car to drive 100 miles is a function of the car's speed in miles per hour, v; the rule T(v) = 100/v expresses this relationship algebraically and defines a function whose name is T.

The set of inputs to a function is called its domain. We often infer the domain to be all inputs for which the expression defining a function has a value, or for which the function makes sense in a given context.

A function can be described in various ways, such as by a graph (e.g., the trace of a seismograph); by a verbal rule, as in, "I'll give you a state, you give me the capital city;" by an algebraic expression like f(x) = a + bx; or by a recursive rule. The graph of a function is often a useful way of visualizing the relationship of the function models, and manipulating a mathematical expression for a function can throw light on the function's properties.

Functions presented as expressions can model many important phenomena. Two important families of functions characterized by laws of growth are linear functions, which grow at a constant rate, and exponential functions, which grow at a constant percent rate. Linear functions with a constant term of zero describe proportional relationships.

A graphing utility or a computer algebra system can be used to experiment with properties of these functions and their graphs and to build computational models of functions, including recursively defined functions.

Connections to Expressions, Equations, Modeling, and Coordinates. Determining an output value for a particular input involves evaluating an expression; finding inputs that yield a given output involves solving an equation. Questions about when two functions have the same value for the same input lead to equations, whose solutions can be visualized from the intersection of their graphs. Because functions describe relationships between quantities, they are frequently used in modeling. Sometimes functions are defined by a recursive process, which can be displayed effectively using a spreadsheet or other technology.

Interpreting Functions	F-IF

Understand the concept of a function and use function notation

1. Understand that a function from one set (called the domain) to another set (called the range) assigns to each element of the domain exactly one element of the range. If f is a function and x is an element of its domain, then $f(x)$ denotes the output of f corresponding to the input x. The graph of f is the graph of the equation $y = f(x)$.

2. Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context.

3. Recognize that sequences are functions, sometimes defined recursively, whose domain is a subset of the integers. *For example, the Fibonacci sequence is defined recursively by $f(0) = f(1) = 1$, $f(n+1) = f(n) + f(n-1)$ for $n \geq 1$.*

Interpret functions that arise in applications in terms of the context

4. For a function that models a relationship between two quantities,

   - interpret key features of graphs and tables in terms of the quantities, and
   - sketch graphs showing key features given a verbal description of the relationship.

   *Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; and end behavior.**

5. Relate the domain of a function to its graph and, where applicable, to the quantitative relationship it describes. *For example, if the function h(n) gives the number of person-hours it takes to assemble n engines in a factory, then negative numbers would be an appropriate domain for the function.**

6. Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph.*

Analyze functions using different representations

7. Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases.*

   a. Graph linear and quadratic functions and show intercepts, maxima, and minima.

   b. Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.

   c. Graph polynomial functions, identifying zeros (using technology) or algebraic methods when suitable factorizations are available, and showing end behavior.

   d. (+) Graph rational functions, identifying zeros and discontinuities (asymptotes/holes) using technology, and algebraic methods when suitable factorizations are available, and showing end behavior.

   e. Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude.

8. Write a function defined by an expression in different but equivalent forms to reveal and explain different properties of the function.

   a. Use the process of factoring and completing the square in a quadratic function to show zeros, extreme values, and symmetry of the graph, and interpret these in terms of a context.

   b. Use the properties of exponents to interpret expressions for exponential functions. *For example, identify percent rate of change in functions such as* $y = (1.02)^t$, $y = (0.97)^t$, $y = (1.01)^{12t}$, $y = (1.2)^{t/10}$, *and classify them as representing exponential growth or decay.*

9. Compare properties of two functions each represented in a different way (algebraically, graphically, numerically in tables, or by verbal descriptions). *For example, given a graph of one quadratic function and an algebraic expression for another, say which has the larger maximum.*

Building Functions	**F-BF**

Build a function that models a relationship between two quantities

1. Write a function that describes a relationship between two quantities.*

a. Determine an explicit expression, a recursive process, or steps for calculation from a context.

b. Combine standard function types using arithmetic operations. *For example, build a function that models the temperature of a cooling body by adding a constant function to a decaying exponential, and relate these functions to the model.*

c. (+) Compose functions. *For example, if T(y) is the temperature in the atmosphere as a function of height, and h(t) is the height of a weather balloon as a function of time, then T(h(t)) is the temperature at the location of the weather balloon as a function of time.*

2. Write arithmetic and geometric sequences both recursively and with an explicit formula, use them to model situations, and translate between the two forms.*

Build new functions from existing functions

3. Identify the effect on the graph of replacing $f(x)$ by $f(x) + k$, $k\,f(x)$, $f(kx)$, and $f(x + k)$ for specific values of k (both positive and negative); find the value of k given the graphs. Experiment with cases and illustrate an explanation of the effects on the graph using technology. *Include recognizing even and odd functions from their graphs and algebraic expressions for them.*

4. Find inverse functions.

a. Solve an equation of the form f(x) = c for a simple function f that has an inverse and write an expression for the inverse. *For example, $f(x) = 2x^3$ for $x > 0$ or $f(x) = (x+1)/(x-1)$ for $x \neq 1$.*

b. (+) Verify by composition that one function is the inverse of another.

c. (+) Read values of an inverse function from a graph or a table, given that the function has an inverse.

d. (+) Produce an invertible function from a non-invertible function by restricting the domain.

5. (+) Understand the inverse relationship between exponents and logarithms and use this relationship to solve problems involving logarithms and exponents.

Linear, Quadratic, and Exponential Models* F –LE

Construct and compare linear, quadratic, and exponential models and solve Problems

1. Distinguish between situations that can be modeled with linear functions and with exponential functions.

   a. Show that linear functions grow by equal differences over equal intervals, and that exponential functions grow by equal factors over equal intervals.
   b. Recognize situations in which one quantity changes at a constant rate per unit interval relative to another.
   c. Recognize situations in which a quantity grows or decays by a constant percent rate per unit interval relative to another.

2. Construct linear and exponential functions, including arithmetic and geometric sequences, given a graph, a description of a relationship, or input-output table of values.
3. Observe using graphs and tables that a quantity increasing exponentially eventually exceeds a quantity increasing linearly, quadratically, or (more generally) as a polynomial function.

4. For exponential models, express as a logarithm the solution to $ab^{ct} = d$ where a, c, and d are numbers and the base b is 2, 10, or e; evaluate the logarithm using technology.

Interpret expressions for functions in terms of the situation they model

5. Interpret the parameters in a linear or exponential function in terms of a context.

Trigonometric Functions F-TF

Extend the domain of trigonometric functions using the unit circle

1. Understand radian measure of an angle as the length of the arc on the unit circle subtended by the angle.

2. Explain how the unit circle in the coordinate plane enables the extension of trigonometric functions to all real numbers, interpreted as radian measures of angles traversed counterclockwise around the unit circle.

3. (+) Use special triangles to determine geometrically the values of sine, cosine, tangent for $\pi/3$, $\pi/4$ and $\pi/6$, and use the unit circle to express the values of sine, cosines, and tangent for $\pi - x$, $\pi + x$, and $2\pi - x$ in terms of their values for x, where x is any real number.

4. (+) Use the unit circle to explain symmetry (odd and even) and periodicity of trigonometric functions.

Model periodic phenomena with trigonometric functions

5. Choose trigonometric functions to model periodic phenomena with specified amplitude, frequency, and midline.*

6. (+) Understand that restricting a trigonometric function to a domain on which it is always increasing or always decreasing allows its inverse to be constructed.

7. (+) Use inverse functions to solve trigonometric equations that arise in modeling contexts; evaluate the solutions using technology, and interpret them in terms of the context.*

Prove and apply trigonometric identities

8. Prove the Pythagorean identity $\sin^2(\theta) + \cos^2(\theta) = 1$ and use it to calculate trigonometric ratios.

9. (+) Prove the addition and subtraction formulas for sine, cosine, and tangent and use them to solve problems.

Narrative of Standard – Modeling

Modeling links classroom mathematics and statistics to everyday life, work, and decision-making. Modeling is the process of choosing and using appropriate mathematics and statistics to analyze empirical situations, to understand them better, and to improve decisions. Quantities and their relationships in physical, economic, public policy, social, and everyday situations can be modeled using mathematical and statistical methods. When making mathematical models, technology is valuable for varying assumptions, exploring consequences, and comparing predictions with data.

A model can be very simple, such as writing total cost as a product of unit price and number bought, or using a geometric shape to describe a physical object like a coin. Even such simple models involve making choices. It is up to us whether to model a coin as a three-dimensional cylinder, or whether a two-dimensional disk works well enough for our purposes. Other situations—modeling a delivery route, a production schedule, or a comparison of loan amortizations—need more elaborate models that use other tools from the mathematical sciences. Real-world situations are not organized and labeled for analysis; formulating tractable models, representing such models, and analyzing them is appropriately a creative process. Like every such process, this depends on acquired expertise as well as creativity.

Some examples of such situations might include:

- Estimating how much water and food is needed for emergency relief in a devastated city of 3 million people, and how it might be distributed.
- Planning a table tennis tournament for 7 players at a club with 4 tables, where each player plays against each other player.
- Designing the layout of the stalls in a school fair so as to raise as much money as possible.
- Analyzing stopping distance for a car.
- Modeling savings account balance, bacterial colony growth, or investment growth.
- Engaging in critical path analysis, e.g., applied to turnaround of an aircraft at an airport.
- Analyzing risk in situations such as extreme sports, pandemics, and terrorism.
- Relating population statistics to individual predictions.

In situations like these, the models devised depend on a number of factors: How precise an answer do we want or need? What aspects of the situation do we most need to understand, control, or optimize? What resources of time and tools do we have? The range of models that we can create and analyze is also constrained by the limitations of our mathematical, statistical, and technical skills, and our ability to recognize significant variables and relationships among them. Diagrams of various kinds, spreadsheets and other technology, and algebra are powerful tools for understanding and solving problems drawn from different types of real-world situations.

One of the insights provided by mathematical modeling is that essentially the same mathematical or statistical structure can sometimes model seemingly different situations. Models can also shed light on the mathematical structures themselves, for example, as when a model of bacterial growth makes more vivid the explosive growth of the exponential function.

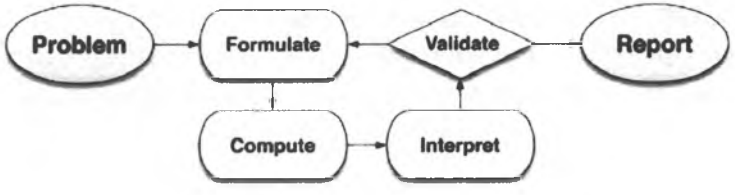
The basic modeling cycle is summarized in the diagram (below). It involves (1) identifying variables in the situation and selecting those that represent essential features, (2) formulating a model by creating and selecting geometric, graphical, tabular, algebraic, or statistical representations that describe relationships between the variables, (3) analyzing and performing operations on these relationships to draw conclusions, (4) interpreting the results of the mathematics in terms of the original situation, (5) validating the conclusions by comparing them with the situation, and then either improving the model or, if it is acceptable, (6) reporting on the conclusions and the reasoning behind them. Choices, assumptions, and approximations are present throughout this cycle.

In descriptive modeling, a model simply describes the phenomena or summarizes them in a compact form. Graphs of observations are a familiar descriptive model— for example, graphs of global temperature and atmospheric CO2 over time.

Analytic modeling seeks to explain data on the basis of deeper theoretical ideas, albeit with parameters that are empirically based; for example, exponential growth of bacterial colonies (until cut-off mechanisms such as pollution or starvation intervene) follows from a constant reproduction rate. Functions are an important tool for analyzing such problems.

Graphing utilities, spreadsheets, computer algebra systems, and dynamic geometry software are powerful tools that can be used to model purely mathematical phenomena (e.g., the behavior of polynomials) as well as physical phenomena.

Modeling Standards. Modeling is best interpreted not as a collection of isolated topics but rather in relation to other standards. Making mathematical models is a Standard for Mathematical Practice, and specific modeling standards appear throughout the high school standards indicated by a star symbol (*).



Narrative of Standard - Geometry

An understanding of the attributes and relationships of geometric objects can be applied in diverse contexts—interpreting a schematic drawing, estimating the amount of wood needed to frame a sloping roof, rendering computer graphics, or designing a sewing pattern for the most efficient use of material.

Although there are many types of geometry, school mathematics is devoted primarily to plane Euclidean geometry, studied both synthetically (without coordinates) and analytically (with coordinates). Euclidean geometry is characterized most importantly by the Parallel Postulate, that through a point not on a given line there is exactly one parallel line. (Spherical geometry, in contrast, has no parallel lines.)

During high school, students begin to formalize their geometry experiences from elementary and middle school, using more precise definitions and developing careful proofs. Later in college some students develop Euclidean and other geometries carefully from a small set of axioms.

The concepts of congruence, similarity, and symmetry can be understood from the perspective of geometric transformation. Fundamental are the rigid motions: translations, rotations, reflections, and combinations of these, all of which are here assumed to preserve distance and angles (and therefore shapes generally). Reflections and rotations each explain a particular type of symmetry, and the symmetries of an object offer insight into its attributes—as when the reflective symmetry of an isosceles triangle assures that its base angles are congruent.

In the approach taken here, two geometric figures are defined to be congruent if there is a sequence of rigid motions that carries one onto the other. This is the principle of superposition. For triangles, congruence means the equality of all corresponding pairs of sides and all corresponding pairs of angles. During the middle grades, through experiences drawing triangles from given conditions, students notice ways to specify enough measures in a triangle to ensure that all triangles drawn with those measures are congruent. Once these triangle congruence criteria (ASA, SAS, and SSS) are established using rigid motions, they can be used to prove theorems about triangles, quadrilaterals, and other geometric figures.

Similarity transformations (rigid motions followed by dilations) define similarity in the same way that rigid motions define congruence, thereby formalizing the similarity ideas of "same shape" and "scale factor" developed in the middle grades. These transformations lead to the criterion for triangle similarity that two pairs of corresponding angles are congruent.

The definitions of sine, cosine, and tangent for acute angles are founded on right triangles and similarity, and, with the Pythagorean Theorem, are fundamental in many real-world and theoretical situations. The Pythagorean Theorem is generalized to nonright triangles by the Law of Cosines. Together, the Laws of Sines and Cosines embody the triangle congruence criteria for the cases where three pieces of information suffice

to completely solve a triangle. Furthermore, these laws yield two possible solutions in the ambiguous case, illustrating that Side-Side-Angle is not a congruence criterion.

Analytic geometry connects algebra and geometry, resulting in powerful methods of analysis and problem solving. Just as the number line associates numbers with locations in one dimension, a pair of perpendicular axes associates pairs of numbers with locations in two dimensions. This correspondence between numerical coordinates and geometric points allows methods from algebra to be applied to geometry and vice versa. The solution set of an equation becomes a geometric curve, making visualization a tool for doing and understanding algebra. Geometric shapes can be described by equations, making algebraic manipulation into a tool for geometric understanding, modeling, and proof. Geometric transformations of the graphs of equations correspond to algebraic changes in their equations.

Dynamic geometry environments provide students with experimental and modeling tools that allow them to investigate geometric phenomena in much the same way as computer algebra systems allow them to experiment with algebraic phenomena.

Connections to Equations. The correspondence between numerical coordinates and geometric points allows methods from algebra to be applied to geometry and vice versa. The solution set of an equation becomes a geometric curve, making visualization a tool for doing and understanding algebra. Geometric shapes can be described by equations, making algebraic manipulation into a tool for geometric understanding, modeling, and proof.

Congruence	G-CO

Experiment with transformations in the plane

1. Demonstrates understanding of key geometrical definitions, including angle, circle, perpendicular line, parallel line, line segment, and transformations in Euclidian geometry. Understand undefined notions of point, line, distance along a line, and distance around a circular arc.
2. Represent transformations in the plane using, e.g., transparencies and geometry software; describe transformations as functions that take points in the plane as inputs and give other points as outputs. Compare transformations that preserve distance and angle to those that do not (e.g., translation versus horizontal stretch).

3. Given a rectangle, parallelogram, trapezoid, or regular polygon, describe the rotations and reflections that carry it onto itself.

4. Develop definitions of rotations, reflections, and translations in terms of angles, circles, perpendicular lines, parallel lines, and line segments.

5. Given a geometric figure and a rotation, reflection, or translation, draw the transformed figure using, e.g., graph paper, tracing paper, or geometry software. Specify a sequence of transformations that will carry a given figure onto another.

Understand congruence in terms of rigid motions

6. Use geometric descriptions of rigid motions to transform figures and to predict the effect of a given rigid motion on a given figure; given two figures, use the definition of congruence in terms of rigid motions to decide if they are congruent.

7. Use the definition of congruence in terms of rigid motions to show that two triangles are congruent if and only if corresponding pairs of sides and corresponding pairs of angles are congruent.

8. Explain how the criteria for triangle congruence (ASA, SAS, SSS, AAS, and HL) follow from the definition of congruence in terms of rigid motions.

Prove geometric theorems

9. Using methods of proof including direct, indirect, and counter examples to prove theorems about lines and angles. *Theorems include: vertical angles are congruent; when a transversal crosses parallel lines, alternate interior angles are congruent and corresponding angles are congruent; points on a perpendicular bisector of a line segment are exactly those equidistant from the segment's endpoints.*

10. Using methods of proof including direct, indirect, and counter examples to prove theorems about triangles. *Theorems include: measures of interior angles of a triangle sum to 180°; base angles of isosceles triangles are congruent; the segment joining midpoints of two sides of a triangle is parallel to the third side and half the length; the medians of a triangle meet at a point.*

11. Using methods of proof including direct, indirect, and counter examples to prove theorems about parallelograms. *Theorems include: opposite sides are congruent, opposite angles are congruent, the diagonals of a parallelogram bisect each other, and conversely, rectangles are parallelograms with congruent diagonals.*

Make geometric constructions

12. Make formal geometric constructions with a variety of tools and methods (compass and straightedge, string, reflective devices, paper folding, dynamic geometric software, etc.). *Copying a segment; copying an angle; bisecting a segment; bisecting an angle; constructing perpendicular lines, including the perpendicular bisector of a line segment; and constructing a line parallel to a given line through a point not on the line.*

13. Construct an equilateral triangle, a square, and a regular hexagon inscribed in a circle.

Similarity, Right Triangles, and Trigonometry	**G-SRT**

Understand similarity in terms of similarity transformations

1. Verify experimentally the properties of dilations given by a center and a scale factor:

   a. A dilation takes a line not passing through the center of the dilation to a parallel line, and leaves a line passing through the center unchanged.

   b. The dilation of a line segment is longer or shorter in the ratio given by the scale factor.

2. Given two figures, use the definition of similarity in terms of transformations to explain whether or not they are similar.

3. Use the properties of similarity transformations to establish the AA criterion for two triangles to be similar.

Prove theorems involving similarity

4. Prove theorems about triangles. *Theorems include: a line parallel to one side of a triangle divides the other two proportionally, and conversely.*

5. Apply congruence and similarity properties and prove relationships involving triangles and other geometric figures.

Define trigonometric ratios and solve problems involving right triangles

6. Understand that by similarity, side ratios in right triangles are properties of the angles in the triangle, leading to definitions of trigonometric ratios for acute angles.

7. Explain and use the relationship between the sine and cosine of complementary angles.

8. Use trigonometric ratios and the Pythagorean Theorem to solve right triangles in applied problems.*

Apply trigonometry to general triangles

9. (+) Derive the formula $A = 1/2\ ab\ \sin(C)$ for the area of a triangle by drawing an auxiliary line from a vertex perpendicular to the opposite side.

10. (+) Prove the Laws of Sines and Cosines and use them to solve problems.

11. (+) Understand and apply the Law of Sines and the Law of Cosines to find unknown measurements in right and non-right triangles (e.g., surveying problems, resultant forces).

Circles	**G-C**

Understand and apply theorems about circles

1. Prove that all circles are similar.

2. Identify and describe relationships among inscribed angles, radii, and chords. *Include the relationship between central, inscribed, and circumscribed angles; inscribed angles on a diameter are right angles; the radius of a circle is perpendicular to the tangent where the radius intersects the circle.*

3. Construct the inscribed and circumscribed circles of a triangle, and prove properties of angles for a quadrilateral inscribed in a circle.

4. (+) Construct a tangent line from a point outside a given circle to the circle.

Find arc lengths and areas of sectors of circles

5. Use and apply the concepts of arc length and areas of sectors of circles. Determine or derive using similarity the fact that the length of the arc intercepted by an angle is proportional to the radius, and define the radian measure of the angle as the constant of proportionality; derive the formula for the area of a sector.

Expressing Geometric Properties with Equations **G-GPE**

Translate between the geometric description and the equation for a conic section

1. Determine or derive the equation of a circle of given center and radius using the Pythagorean Theorem; complete the square to find the center and radius of a circle given by an equation.

2. Determine or derive the equation of a parabola given a focus and directrix.

3. (+) Derive the equations of ellipses and hyperbolas given foci and directrices.

Use coordinates to prove simple geometric theorems algebraically

4. Perform simple coordinate proofs. *For example, prove or disprove that a figure defined by four given points in the coordinate plane is a rectangle; prove or disprove that the point (1, √3) lies on the circle centered at the origin and containing the point (0, 2).*

5. Prove the slope criteria for parallel and perpendicular lines and use them to solve geometric problems (e.g., find the equation of a line parallel or perpendicular to a given line that passes through a given point).

6. Find the point on a directed line segment between two given points that partitions the segment in a given ratio.

7. Use coordinates to compute perimeters of polygons and areas of triangles and rectangles, e.g., using the distance formula.*

Geometric Measurement and Dimension — G-GMD

Explain volume formulas and use them to solve problems

1. Explain how to find the formulas for the circumference of a circle, area of a circle, volume of a cylinder, pyramid, and cone.

2. (+) Give an informal argument using Cavalieri's principle for the formulas for the volume of a sphere and other solid figures.

3. Use volume formulas for cylinders, pyramids, cones, and spheres to solve problems.*

Visualize relationships between two-dimensional and three-dimensional objects

4. Identify the shapes of two-dimensional cross-sections of three-dimensional objects, and identify three-dimensional objects generated by rotations of two-dimensional objects.

Modeling with Geometry — G-MG

Apply geometric concepts in modeling situations

1. Use geometric shapes, their measures, and their properties to describe objects (e.g., modeling a tree trunk or a human torso as a cylinder).*

2. Apply concepts of density based on area and volume in modeling situations (e.g., persons per square mile, BTUs per cubic foot).*

3. Apply geometric methods to solve design problems (e.g., designing an object or structure to satisfy physical constraints or minimize cost; working with typographic grid systems based on ratios).*

Narrative of Standard - Statistics and Probability*

Decisions or predictions are often based on data—numbers in context. These decisions or predictions would be easy if the data always sent a clear message, but the message is often obscured by variability. Statistics provides tools for describing variability in data and for making informed decisions that take it into account.

Data are gathered, displayed, summarized, examined, and interpreted to discover patterns and deviations from patterns. Quantitative data can be described in terms of key characteristics: measures of shape, center, and spread. The shape of a data distribution might be described as symmetric, skewed, flat, or bell shaped, and it might be summarized by a statistic measuring center (such as mean or median) and a statistic measuring spread (such as standard deviation or interquartile range). Different distributions can be compared numerically using these statistics or compared visually using plots. Knowledge of center and spread are not enough to describe a distribution. Which statistics to compare, which plots to use, and what the results of a comparison might mean, depend on the question to be investigated and the real-life actions to be taken.

Randomization has two important uses in drawing statistical conclusions. First, collecting data from a random sample of a population makes it possible to draw valid conclusions about the whole population, taking variability into account. Second, randomly assigning individuals to different treatments allows a fair comparison of the effectiveness of those treatments. A statistically significant outcome is one that is unlikely to be due to chance alone, and this can be evaluated only under the condition of randomness. The conditions under which data are collected are important in drawing conclusions from the data; in critically reviewing uses of statistics in public media and other reports, it is important to consider the study design, how the data were gathered, and the analyses employed as well as the data summaries and the conclusions drawn.

Random processes can be described mathematically by using a probability model: a list or description of the possible outcomes (the sample space), each of which is assigned a probability. In situations such as flipping a coin, rolling a number cube, or drawing a card, it might be reasonable to assume various outcomes are equally likely. In a probability model, sample points represent outcomes and combine to make up events; probabilities of events can be computed by applying the Addition and Multiplication Rules. Interpreting these probabilities relies on an understanding of independence and conditional probability, which can be approached through the analysis of two-way tables.

Technology plays an important role in statistics and probability by making it possible to generate plots, regression functions, and correlation coefficients, and to simulate many possible outcomes in a short amount of time.

Connections to Functions and Modeling. Functions may be used to describe data; if the data suggest a linear relationship, the relationship can be modeled with a regression line, and its strength and direction can be expressed through a correlation coefficient.

Statistics and Probability Standards*

Interpreting Categorical and Quantitative Data	S-ID

Summarize, represent, and interpret data on a single count or measurement variable

1. Represent data with plots on the real number line (dot plots, histograms, and box plots).

2. Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets.

3. Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers).

4. Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve.

Summarize, represent, and interpret data on two categorical and quantitative variables

5. Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data.

6. Represent data on two quantitative variables on a scatter plot, and describe how the variables are related.

   a. Fit a function to the data; use functions fitted to data to solve problems in the context of the data. *Use given functions or choose a function suggested by the context. Emphasize linear, quadratic, and exponential models.*

   b. Informally assess the fit of a function by plotting and analyzing residuals.

   c. Fit a linear function for a scatter plot that suggests a linear association.

Interpret linear models

7. Interpret the slope (rate of change) and the intercept (constant term) of a linear model in the context of the data.

8. Compute (using technology) and interpret the correlation coefficient of a linear fit.

9. Distinguish between correlation and causation.

Making Inferences and Justifying Conclusions	**S-IC**

Understand and evaluate random processes underlying statistical experiments

1. Understand statistics as a process for making inferences about population parameters based on a random sample from that population.

2. Decide if a specified model is consistent with results from a given data-generating process, e.g., using simulation. *For example, a model says a spinning coin falls heads up with probability 0.5. Would a result of 5 tails in a row cause you to question the model?*

Make inferences and justify conclusions from sample surveys, experiments, and observational studies

3. Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.

4. Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.

5. Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.

6. Evaluate reports based on data.

Conditional Probability and the Rules of Probability	**S-CP**

Understand independence and conditional probability and use them to interpret data

1. Describe events as subsets of a sample space (the set of outcomes) using characteristics (or categories) of the outcomes, or as unions, intersections, or complements of other events ("or," "and," "not").

2. Understand that two events *A* and *B* are independent if the probability of *A* and *B* occurring together is the product of their probabilities, and use this characterization to determine if they are independent.

3. Understand the conditional probability of *A* given *B* as *P*(*A* and *B*)/*P*(*B*), and interpret independence of *A* and *B* as saying that the conditional probability of *A* given *B* is the same as the probability of *A*, and the conditional probability of *B* given *A* is the same as the probability of *B*.

4. Construct and interpret two-way frequency tables of data when two categories are associated with each object being classified. Use the two-way table as a sample space to decide if events are independent and to approximate conditional probabilities. *For example, collect data from a random sample of students in your school on their favorite subject among math, science, and English. Estimate the probability that a randomly selected student from your school will favor science given that the student is in tenth grade. Do the same for other subjects and compare the results.*

5. Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations. *For example, compare the chance of having lung cancer if you are a smoker with the chance of being a smoker if you have lung cancer.*

Use the rules of probability to compute probabilities of compound events in a uniform probability model

6. Find the conditional probability of *A* given *B* as the fraction of *B*'s outcomes that also belong to *A,* and interpret the answer in terms of the model.

7. Apply the Addition Rule, P(A or B) = P(A) + P(B) – P(A and B), and interpret the answer in terms of the model.

8. (+) Apply the general Multiplication Rule in a uniform probability model, P(A and B) = P(A)P(B|A) = P(B)P(A|B), and interpret the answer in terms of the model.

9. (+) Use permutations and combinations to compute probabilities of compound events and solve problems.

Using Probability to Make Decisions	**S-MD**

Calculate expected values and use them to solve problems

1. (+) Define a random variable for a quantity of interest by assigning a numerical value to each event in a sample space; graph the corresponding probability distribution using the same graphical displays as for data distributions.

2. (+) Calculate the expected value of a random variable; interpret it as the mean of the probability distribution.

3. (+) Develop a probability distribution for a random variable defined for a sample space in which theoretical probabilities can be calculated; find the expected value. *For example, find the theoretical probability distribution for the number of correct answers obtained by guessing on all five questions of a multiple-choice test where each question has four choices, and find the expected grade under various grading schemes.*

4. (+) Develop a probability distribution for a random variable defined for a sample space in which probabilities are assigned empirically; find the expected value. *For example, find a current data distribution on the number of TV sets per household in the United States, and calculate the expected number of sets per household. How many TV sets would you expect to find in 100 randomly selected households?*

Use probability to evaluate outcomes of decisions

5. (+) Weigh the possible outcomes of a decision by assigning probabilities to payoff values and finding expected values.

   a. Find the expected payoff for a game of chance. *For example, find the expected winnings from a state lottery ticket or a game at a fast-food restaurant.*

   b. Evaluate and compare strategies on the basis of expected values. *For example, compare a high-deductible versus a low-deductible automobile insurance policy using various, but reasonable, chances of having a minor or a major accident.*

6. (+) Use probabilities to make fair decisions (e.g., drawing by lots, using a random number generator).

7. (+) Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game).

Glossary for Alaska Mathematics Standards

Addition and subtraction within 5, 10, 20, 100, or 1000. Addition or subtraction of two whole numbers with whole number answers, and with sum or minuend in the range 0-5, 0-10, 0-20, or 0-100, respectively. Example: 8 + 2 = 10 is an addition within 10, 14 – 5 = 9 is a subtraction within 20, and 55 – 18 = 37 is a subtraction within 100.

Additive inverses. Two numbers whose sum is 0 are additive inverses of one another. Example: 3/4 and – 3/4 are additive inverses of one another because 3/4 + (– 3/4) = (– 3/4) + 3/4 = 0.

Bivariate data. Pairs of linked numerical observations. Example: a list of heights and weights for each player on a football team. Box plot. A method of visually displaying a distribution of data values by using the median, quartiles, and extremes of the data set. A box shows the middle 50% of the data.[1]

Cardinality/Ordinality. Cardinal numbers, known as the "counting numbers," indicate quantity. Ordinal numbers indicate the order or rank of things in a set (e.g., sixth in line; fourth place).

Complex fraction. A fraction A/B where A and/or B are fractions (B nonzero).

Computation algorithm. A set of predefined steps applicable to a class of problems that gives the correct result in every case when the steps are carried out correctly. *See also:* computation strategy.

Computation strategy. Purposeful manipulations that may be chosen for specific problems, may not have a fixed order, and may be aimed at converting one problem into another. *See also:* computation algorithm.

Congruent. Two plane or solid figures are congruent if one can be obtained from the other by rigid motion (a sequence of rotations, reflections, and translations).

Counting on. A strategy for finding the number of objects in a group without having to count every member of the group. For example, if a stack of books is known to have 8 books and 3 more books are added to the top, it is not necessary to count the stack all over again. One can find the total by counting on—pointing to the top book and saying "eight," following this with "nine, ten, eleven. There are eleven books now."

Dot plot. *See*: line plot.

Dilation. A transformation that moves each point along the ray through the point emanating from a fixed center, and multiplies distances from the center by a common scale factor.

Expanded form. A multi-digit number is expressed in expanded form when it is written as a sum of single-digit multiples of powers of ten. For example, 643 = 600 + 40 + 3.

Expected value. For a random variable, the weighted average of its possible values, with weights given by their respective probabilities.

First quartile. For a data set with median M, the first quartile is the median of the data values less than M. Example: For the data set {1, 3, 6, 7, 10, 12, 14, 15, 22, 120}, the first quartile is 6.[2] *See also:* median, third quartile, interquartile range.

Fraction. A number expressible in the form a/b where a is a whole number and b is a positive whole number. (The word fraction in these standards always refers to a non-negative number.) *See also:* rational number.

Independently combined probability models. Two probability models are said to be combined independently if the probability of each ordered pair in the combined model equals the product of the original probabilities of the two individual outcomes in the ordered pair.

Integer. A number expressible in the form a or –a for some whole number a.

Interquartile Range. A measure of variation in a set of numerical data, the interquartile range is the distance between the first and third quartiles of the data set. Example: For the data set {1, 3, 6, 7, 10, 12, 14, 15, 22, 120}, the interquartile range is 15 – 6 = 9. *See also:* first quartile, third quartile.

Line plot. A method of visually displaying a distribution of data values where each data value is shown as a dot or mark above a number line. Also known as a dot plot.[3]

Mean. A measure of center in a set of numerical data, computed by adding the values in a list and then dividing by the number of values in the list.4 Example: For the data set {1, 3, 6, 7, 10, 12, 14, 15, 22, 120}, the mean is 21.

Mean absolute deviation. A measure of variation in a set of numerical data, computed by adding the distances between each data value and the mean, then dividing by the number of data values. Example: For the data set {2, 3, 6, 7, 10, 12, 14, 15, 22, 120}, the mean absolute deviation is 20.

Median. A measure of center in a set of numerical data. The median of a list of values is the value appearing at the center of a sorted version of the list—or the mean of the two central values, if the list contains an even number of values. Example: For the data set {2, 3, 6, 7, 10, 12, 14, 15, 22, 90}, the median is 11.

Midline. In the graph of a trigonometric function, the horizontal line halfway between its maximum and minimum values. Multiplication and division within 100. Multiplication or division of two whole numbers with whole number answers, and with product or dividend in the range 0-100. Example: $72 \div 8 = 9$.

Multiplicative inverses. Two numbers whose product is 1 are multiplicative inverses of one another. Example: 3/4 and 4/3 are multiplicative inverses of one another because $3/4 \times 4/3 = 4/3 \times 3/4 = 1$.

Number line diagram. A diagram of the number line used to represent numbers and support reasoning about them. In a number line diagram for measurement quantities, the interval from 0 to 1 on the diagram represents the unit of measure for the quantity.

Percent rate of change. A rate of change expressed as a percent. Example: if a population grows from 50 to 55 in a year, it grows by 5/50 = 10% per year.

Probability distribution. The set of possible values of a random variable with a probability assigned to each.

Probability. A number between 0 and 1 used to quantify likelihood for processes that have uncertain outcomes (such as tossing a coin, selecting a person at random from a group of people, tossing a ball at a target, or testing for a medical condition).

Probability model. A probability model is used to assign probabilities to outcomes of a chance process by examining the nature of the process. The set of all outcomes is called the sample space, and their probabilities sum to 1. *See also:* uniform probability model.

Random variable. An assignment of a numerical value to each outcome in a sample space. Rational expression. A quotient of two polynomials with a non-zero denominator.

Rational number. A number expressible in the form a/b or – a/b for some fraction a/b. The rational numbers include the integers.

Rectilinear figure. A polygon all angles of which are right angles.

Rigid motion. A transformation of points in space consisting of a sequence of one or more translations, reflections, and/or rotations. Rigid motions are here assumed to preserve distances and angle measures.

Repeating decimal. The decimal form of a rational number. *See also:* terminating decimal.

Sample space. In a probability model for a random process, a list of the individual outcomes that are to be considered.

Scatter plot. A graph in the coordinate plane representing a set of bivariate data. For example, the heights and weights of a group of people could be displayed on a scatter plot.[5]

Similarity transformation. A rigid motion followed by a dilation.

Tape diagram. A drawing that looks like a segment of tape, used to illustrate number relationships. Also known as a strip diagram, bar model, fraction strip, or length model.

Terminating decimal. A decimal is called terminating if its repeating digit is 0.

Third quartile. For a data set with median M, the third quartile is the median of the data values greater than *M*. Example: For the data set {2, 3, 6, 7, 10, 12, 14, 15, 22, 120}, the third quartile is 15. *See also:* median, first quartile, interquartile range.

Transitivity principle for indirect measurement. If the length of object A is greater than the length of object B, and the length of object B is greater than the length of object C, then the length of object A is greater than the length of object C. This principle applies to measurement of other quantities as well.

Uniform probability model. A probability model which assigns equal probability to all outcomes. *See also:* probability model.

Vector. A quantity with magnitude and direction in the plane or in space, defined by an ordered pair or triple of real numbers.

Visual fraction model. A tape diagram, number line diagram, or area model.

Whole numbers. The numbers 0, 1, 2, 3,...

CONFIR-MATIONS 2011

<TARGET><BILL></BILL><SUBJECT>CONFIRMATIONS 2011</SUBJECT><COMM>HEDC27</COMM></TARGET>

CONFIRMATION COMMITTEE REPORT

Action date: March 28, 2011

The **Education Committee** has reviewed the qualifications of the Governor's appointee(s) as shown on the attached Referral for Confirmation forms(s) and recommends that the name(s) be forwarded to a joint session for consideration:

This does not reflect intent by any of the members to vote for or against this individual during any further sessions for the purposes of confirmation.

Signature:	**Printed Last Name**
	CISSNA
	Wilson
	SEATON
	Proitt
	Dick
Co-Chair:	
Co-Chair:	

Please attach appointee Referral for Confirmation form(s) and return to the Chief Clerk's office.

MEMORANDUM

Date: February 2, 2011

To: Representative Dick, Chair
Education Committee

From: Suzi Lowell, Chief Clerk

Subject: Governor's Appointment(s)

The Speaker referred the following Governor's appointment(s) to the Education Committee:

Board of Education and Early Development

Patrick Shier – Juneau
Appointed: 3/1/2007
Reappointed: 3/1/2011 Term Expires: 3/1/2016

Professional Teaching Practices Commission

Stephen Atwater – Soldotna
Appointed: 3/1/2011 Term Expires: 3/1/2014

Richard Lum – Eagle River
Appointed: 1/29/2008
Reappointed: 3/1/2011 Term Expires: 3/1/2014

The Referral for Confirmation page(s), resume(s), and signature page(s) are attached for your use. In addition, copies of the resume(s) are also being sent electronically.

Attachments as noted

Shier, Patrick

Board of Educ. and Early Dev.

Patrick Shier

OBJECTIVE:

Director, Retirement and Benefits: Leverage recently acquired program knowledge to provide outstanding support to the Administration. To improve economic and social well-being of Alaskans and Alaskan families through efficient and reasonable administration of the Division.

EXPERIENCE:

4/2007 to present

Director, Division of Retirement and Benefits Alaska Department of Administration, Juneau, AK.

Full authority and responsibility for the operation of the Division of Retirement and Benefits in the Alaska Department of Administration, including all personnel actions, budget preparation and execution (over $13 million/yr), law and regulation compliance for programs affecting over 72,000 health plan participants in Alaska and out of state, 32,000 retirees receiving monthly benefits and 260 employers within the State who report wages, service and pay retirement system contributions of over $250 million, annually. Administer, account for and oversee health plan spending exceeding $500 million annually.

Support the Commissioner in the role of Alaska Retirement Management Board trustee, and acts as staff to the Board for the purposes of annual retirement system rate-setting and analysis.

During my tenure we have improved services, secured data and improved division systems independently and in concert with other divisions and departments, all during a time of growing customer bases (approx. 4% retiree growth/yr) and simultaneously handling several significant events such as a contractor security breech and sweeping federal health care law changes. The Division achieved several Denali Awards and adopted the Character First curriculum for improving Division culture and performance. I also supported Administration legislative efforts under the supervision of the Commissioner and Deputy Commissioner, and have developed a positive reputation among most legislators and staff.

Constituent groups include public employees, retirees, municipalities, school districts, labor organizations, medical providers, other departments, legislators and staff and various nonprofit organizations.

Several fundamenta, systemic overhaul initiatives in the Division are underway including data system remediation, document imaging, distance delivery of services, Division integration (removing silos) and system accountabilty. These initiatives are thoroughly described in the Division strategic plan, and promise to permit the customer base to grow (retirees) without adding additional employees.

SUBJECT: Governor's Appointment(s)

The Speaker referred the following Governor's appointment(s) to the Education Committee:

University of Alaska Board of Regents

Jyotsna "Jo" Heckman - Fairbanks
Appointed: 2/7/2011 Term Expires: 2/3/2019

Michael K. Powers - Fairbanks
Appointed: 2/7/2011 Term Expires: 2/3/2019

The Referral for Confirmation page(s), resume(s), and a signature page are attached for your use. In addition, copies of the resume(s) are also being sent electronically.

Attachments as noted

Jyotsna Heckman

Education
BBA, MBA from UAF, Alaska
Graduate School of Banking, Georgetown Univ. Washington DC
Graduate School of Lending, Southern Methodist University, Dallas TX

Bio
President and CEO
Denali State Bank
Jo Heckman, born and raised in India, came to Fairbanks in 1975 in order to attend the University of Alaska, Fairbanks. Her academic career culminated in 1985 and includes a Master's degree in Business.

One of the original founders of Denali State Bank, which opened its doors in 1986; Heckman occupied various positions within the bank including administration, operations, information systems, marketing, and human resources. In 2003 Heckman succeeded Gary Roth as bank president and thus enjoyed the unique distinction of becoming the first female bank president and CEO in Alaska. That very same year, U.S. Banker magazine declared Heckman one of 25 women to watch in banking. Today, she oversees over 90 employees and five branches in interior Alaska.

In addition to her professional accomplishments, Heckman is active in various community and civic organizations, including the United Way, Foraker Group, Alaska Community Fund, UAF Alumni Association, Rotary, and Greater Fairbanks Chamber of Commerce. Heckman also sits on UAF Chancellor's Board of Visitors.

Jo Heckman has received recognition throughout her professional career, including the University of Alaska Alumni Association's William Cashen Service Award, the Farthest North Girl Scouts Council's Woman of Distinction honor, and the University of Alaska Fairbanks Distinguished Alumnus Award. In 2008, the University of Alaska Fairbanks Associated Students of Business organization honored Heckman with the Business Leader of the Year Award.

MICHAEL K. POWERS, MBA, FACHE, FHFMA

EDUCATION
1984 MA - Business, University of Wisconsin, Madison WI
1980 HD - Anglo-Irish Literature, University of Dublin Trinity, Dublin, Ireland
1978 BA - English Literature, Lawrence University, Appleton, WI

EXPERIENCE
1986 BANNER HEALTH - Fairbanks Memorial Hospital & Denali Center, Fairbanks, AK
A non-profit 152-bed hospital and 90-bed skilled nursing facility. Gross revenue of $350M, 250,000
Present square mile service area, and over 1,200 employees. FMH/DC is owned by the Greater Fairbanks Community Hospital Foundation, and leased to and operated by Banner Health.

CEO/Administrator (1995 to Present); CFO/Associate Administrator (1986-1995)

Responsibilities: Provide overall strategic, operational and financial direction and analysis of FMHDC activities to ensure stability and access to acute patient care in Interior Alaska. FMHDC was awarded the American Hospital Association's "Living the Vision Award" which was one of two such awards given to American hospitals in 2006 based on their outreach and support to their communities.

Accomplishments:
• Led Fairbanks Memorial Hospital through four unique 3-year strategic planning cycles, helping to transform a 152-bed acute care hospital into a vertically integrated health system providing acute, long term, and critical outpatient care with affiliation with the state's largest primary care clinic.

• Championed master site planning efforts to construct and design a new diagnostic imaging center. Opened $36M, 57,000sf, Fairbanks Imaging Center on July 1, 2005. Met all targets for timing and project budget. Nationally recognized in 2008 as the single Vista Award Recipient for New Construction by the American Society for Healthcare Engineering of the American Hospital Association and American Institute of Architects Academy of Architectures for Healthcare. This is a distinction and honor recognizing the importance of teamwork in the design and construction of healthcare facilities.

• Cultivated positive workplace culture that engages direct reports as indicated by steady rise in employee satisfaction, placing FMHDC in the 98th percentile of all hospitals nationwide in the Gallup organization database. The Alaska Journal

of Commerce named FMHDC back-to-back in 2008 and 2009 as one of the Top 10 Workplaces for Alaska, based on eight key criteria:
- Creating a culture of fair treatment
- Satisfaction and belief in the organization
- Confidence in leadership
- Creating a clean, safe place to work
- Positive relationships with supervisors
- Support for training and education
- Fair pay and benefits
- Employee commitment to the organization

• Partnered with the University of Alaska-Fairbanks to create nursing and radiology schools on campus, as part of our "Grow Our Own" workforce initiative. Since 2003, Nursing has graduated five nursing cohorts of 15 students. Hired 80%+ of these students, reducing our nurse vacancy rate from 17% to 7% and saving FMH roughly $4M in recruiting and training costs. Radiology class graduated 5-6 students in May of 2004 -- 2009.

• Championed a hospital-wide update of the facility's Information Technology systems, creating a fully functional electronic medical record, including numerous Cerner clinical applications, upgrades to Seimens MedSeries 4, and Fuji Synapse PACS, lifting FMHDC into the top 10% of hospitals nationwide with electronic patient care records.

• Championed through a master facility plan, efforts for the $38M remodel and expansion for the ED and IP/ED Imaging project. Construction began June 12, 2006 completed in 2008 phases with little or no disruption to existing operations.

• Lobbied successfully to preserve and strengthen state health planning regulations. Successful CON submissions for Laboratory expansion, Imaging Center, and ED and IP/ED Imaging remodel and expansion.

Administrative Fellow (1985 to 1986)
Medical College of Virginia, Richmond, VA.

LICENSURE AND CERTIFICATIONS
American College of Healthcare Executives – Fellow (2006)
Healthcare Financial Management Association – Fellow (2004)
State of Alaska Nursing Home Administrator License – (1997)

ALASKA CONSTITUTION

HEALTH, EDUCATION AND WELFARE

Section 7.1 - Public Education.

The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

Section 7.2 - State University.

The University of Alaska is hereby established as the state university and constituted a body corporate. It shall have title to all real and personal property now or hereafter set aside for or conveyed to it. Its property shall be administered and disposed of according to law.

Section 7.3 - Board of Regents.

The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session. The board shall, in accordance with law, formulate policy and appoint the president of the university. He shall be the executive officer of the board.

ALASKA STATUTES

Sec. 39.05.080. Procedure for all appointments.

Except as otherwise provided in a law relating to the positions or memberships on a specific board or commission, appointment to a position or membership shall be made in the following manner:

(1) Each governor shall present to the legislature the names of the persons appointed by that governor; each governor may present the name of a person appointed by a previous governor; only presentment that occurs during the time that the legislature is in regular session constitutes presentment under this section. The governor shall, within the first 15 days after the legislature convenes in regular session, present to the legislature for confirmation the names of the following persons: (A) persons appointed to a position or membership who have not previously been confirmed by the legislature, and (B) persons to be appointed to fill a position or membership the term of which will expire on or before March 1 during that session of the legislature. If an appointment is made after the first 15 days after the convening of the regular session but while the legislature is in regular session, the governor shall immediately present to the legislature for confirmation the name of the person appointed.

(2) When appointments are presented to the legislature for confirmation,

(A) the presiding officer of each house shall assign the name of each appointee to a standing committee of that house for a hearing, report, and recommendation; standing committees of the two houses assigned the same person's name for consideration may meet jointly to consider the qualifications of the person appointed and may issue either a separate or a joint report and recommendation concerning that person; then

(B) the legislature shall, before the end of the regular session in which the appointments are presented, in joint session assembled, act on the appointments by confirming or declining to confirm by a majority vote of all of the members the appointments presented.

(3) When the legislature declines to confirm an appointment, the legislature shall notify the governor of its action and a vacancy in the position or membership exists which the governor shall fill by making a new appointment. The governor may not appoint again the same person whose confirmation was refused for the same position or membership during the regular session of the legislature at which confirmation was refused. The person whose name is refused for appointment by the legislature may not thereafter be appointed to the same position or membership during the interim between regular legislative sessions. Failure of the legislature to act to confirm or decline to confirm an appointment during the regular session in which the appointment was presented is tantamount to a declination of confirmation on the day the regular session adjourns.

(4) Pending confirmation or rejection of appointment by the legislature, persons appointed shall exercise the functions, have the powers, and be charged with the duties prescribed by law for the appointive positions or membership. However, the duration of an appointment made during the time period between regular sessions of the legislature by a person who is not still the governor on the first day of the next regular session ends on the date during the next regular session that the sitting governor presents for confirmation an appointment to the office. For the purpose of applying laws that limit the number of terms or parts of terms that may be served by a member of a board or commission, the part of the term of office that is served under an interim appointment immediately before the member is reappointed under this paragraph is considered to be merged with the part of the term of office that is served immediately after reappointment so that the two periods of service constitute only one part of a term. The duration of an appointment made during

a regular session of the legislature and not presented to the legislature by the governor during that session ends no later than the last day of that session. The duration of an appointment made during an interim by a governor who is not in office at the beginning of the next regular session of the legislature ends no later than the last day of that regular session unless the governor who is in office during that session presents the person's name for confirmation. The same governor may not appoint the same person to the same position or membership if the person's appointment ends because of the governor's failure to present the person's name for confirmation.

Sec. 14.40.150. Appointment of regents.

(a) The governor shall appoint the regents subject to confirmation by a majority of all the members of the legislature in joint session. The names of those appointed shall be sent to the legislature within five days after the opening of the session, for confirmation or rejection. If a person appointed is not confirmed by a majority vote of all the members of the legislature, the appointment ceases and the name of another person shall be submitted within three days after the rejection. If the legislature adjourns without confirming the nominee, or if an interim vacancy occurs, the governor may appoint a qualified person to fill the vacancy. However, the person who has failed to be confirmed may not be appointed. The term of office of the appointee expires on the fifth day of the session of the legislature following the appointment.

(b) At least one member of the Board of Regents must be a student. The student shall be appointed from a list of nominees submitted to the governor. The governor shall make the appointment from the list within 60 days after it is submitted. The list shall consist of the names of two students from each campus of the University of Alaska after an election is held at each campus. Elections shall be conducted under rules established by the Office of the Governor. The term of office of the regent appointed from the general student body, University of Alaska, is for two years. The term of office begins June 1 of the year in which the appointment is made. An appointment made under AS 14.40.130 (d) shall be for the unexpired term of the original appointee. The term "campus" used in this subsection means a portion of the University of Alaska designated as a "campus" by the Board of Regents.

MEMORANDUM

TO: All Committees

FROM: Suzi Lowell, Chief Clerk

DATE: 2012

SUBJECT: Confirmation Committee Report (Signature Page) for Governor's Appointments

The attached Confirmation Committee Report (signature page) should be used in conjunction with the Referral for Confirmation form for the Governor's appointments to boards and commissions requiring legislative confirmation. After a committee has reviewed the qualifications of the appointee(s), the Referral for Confirmation form(s) should be dated and attached to a signature page. Have members sign the signature page and return the confirmation packet to the Chief Clerk's office.

Please use a single signature page for multiple appointees if the names of all members signing the report are the same for each attached referral. This allows members to sign once for multiple appointments.

Attached are several signature pages for your use. We used colored paper to make them easier to identify. If you anticipate needing more forms or need assistance, please call Nancy McMullen at 465-6809.

Note: A separate report, including the signatures, will be used for department commissioners.

Freitag, Mari
University of Alaska
Board of Regents

March 4th, 2011

Office of the Governor
P.O. Box 110001
Juneau, AK 99811-0001

Honorable Governor Parnell:

I would like to thank you for the opportunity to be considered for the position of University of Alaska Student Regent. Over the past three years I have been increasingly involved with student government and campus activities at UAF, culminating in my election as Vice President of the Associated Students of UAF in the spring of 2011. I have learned effective time management skills through my positions so far, and I feel that I would be an exceptional addition to the Board of Regents.

I know that this position will give me knowledge and experience unique to the State of Alaska and the University system. I am excited for the amount I will learn as regent, and how it would prepare me for my future in law school and consequently within the Alaska state government.

I am confident in my ability to fulfill the responsibilities involved with the student regent position, most importantly effective student outreach. Within UAF, I am well known because of my continuous involvement in student government, as well as having taken classes in different departments spanning from chemistry to justice. In addition, I am from Southeast Alaska and continue to keep in touch with students at the UAS campuses and outlying communities. I have also had the good fortune to work with other student leaders from around the state. For all of these reasons, I feel that I can assure the student body of the entire University of Alaska that I will be an effective and approachable student representative on the board.

Finally, I would like to thank you for your time in considering me for the position of University of Alaska Student Regent. I am an excellent candidate for the position and I feel that my passion for the University and Alaska will show in the enclosed materials.

Sincerely,

Mari B. Freitag

Mari B Freitag

2007	Ketchikan Theater Ballet Senior Company Volunteer

Student Regent - Job Description

Consider this position the greatest volunteer work EVER!

The student Regent serves a two-year term beginning in June through May. The student Regent participates in all of the duties and responsibilities of a Regent (i.e. attends all meetings of the Board and its Committees) and has full voting powers on the Board of Regents.

The ultimate authority in governance of the University of Alaska System is vested in the Board of Regents. The Regents establish policy in areas such as personnel, campus development, student fees, admissions, and financial aid. The duties of the Regents include overseeing the financial management of the University, its investments, and its property holdings as well as appointing the President of the University.

Necessary Characteristics

- the ability to communicate effectively with a wide range of people
- the ability to think in the abstract, seeing the big picture
- the ability to apply strong analytical thinking to policy issues
- the ability to process large volumes of information
- the ability to reach consensus on complex issues
- a willingness to take a very public role
- skills and comfort level required to interact with various policy-makers, business, political, and civic leaders
- a willingness to devote large amounts of time working on complex academic and administrative issues

Responsibilities

The Student Regent is a full member of the board. This includes participation in all meetings and voting in all matters. Some of the items the Board of Regents consider include setting tuition and fees for attendance at the institutions; approving capital and operating budgets; issuing bonds; approving new degree programs; and reviewing and approving mission statements of the System institutions.

The Board of Regents meets eight times a year, usually, in two day meetings. Occasionally there are topics that warrant special meetings of the board between regular meetings. Further, the Student Regent will be appointed to serve on board committees. These committees typically meet during the regularly scheduled meetings.

The Student Regent is expected to attend all meetings of the Board of Regents and the committees assigned. The Student Regent also serves as head of the Coalition of Student Leaders giving reports on the activities of the Coalition. The Student Regent can then act as a conduit to the Board of Regents. The Student Regent is expected to advance the concerns of all students in the System and to approach issues with a system-wide perspective. Because of this responsibility, the Student Regent is expected to limit his/her role in home institution activities and issues.

The Student Regent routinely interacts with various leading Alaskans and policy-makers. This includes state and local elected officials: the Governor and administration, and significant local officials. The Student Regent also interacts with officials in higher education and UA System institution administrators. Lastly, the Student Regent participates in activities that involve business and civic leaders, dignitaries, and special guests. Since the Student Regent represents the University of Alaska at ceremonial events, and at other times and places where such representation is deemed desirable, it is imperative that the Student Regent positively represent students and the University of Alaska System to all people he/she interacts with.

The Student Regent serves without compensation but will be reimbursed for expenses incurred.

Time Commitment

The time commitment required of the Student Regent is significant. Duties of the office may require the Student Regent to routinely miss scheduled classes and make other schedule adjustments. The time required to effectively serve as Student Regent will vary from week to week. Time is required to prepare for meetings, participate in meetings, follow-up, visit System institutions, and various other activities.

Some previous student Regents have completed their studies in the original projected time frame. Other student Regents have selected to take a reduced work load and extend their studies by a semester or year. Some student Regents have even been able to maintain a part-time job in addition to the duties of the Board of Regents, yet others chose to invest their non-classroom time focusing only on Regent duties.

For questions or comments regarding this website, contact **sybor@alaska.edu**

This site was created by the **System Web Coordinator**. The University of Alaska Statewide System is an affirmative action/equal opportunity employer and educational institution.

Fine Print - (The RULES)

Requirements for the Positions and Rules Governing the Election of Nominees for Student Regent (University of Alaska) and Student Commissioner (Alaska Commission on Postsecondary Education)

Alaska law stipulates that each campus will select two nominees for student regent and student commissioner through an election held under rules established by the Governor. The following are the requirements for the position and rules to carry out the election of nominees. ***The appointment term is June 1, 2011 through May 31, 2013.***

POSITION REQUIREMENTS

A student must:

- be enrolled and remain enrolled as a full-time student (12 credits undergraduate, 9 credits graduate) [Alaska Statutes 14.40.130 and 14.42.015.e].
- carry a cumulative 2.5 G.P.A. (or if freshman status, must have proof on high school transcript of 2.5 cumulative G.P.A.) [Office of the Governor]
- be a student at the particular campus [Alaska Statutes 14.40.150 and 14.42.015.e].
- be a United States citizen [Alaska Statute 14.40.130].
- be a resident of Alaska [Alaska Statute 14.40.130].
- if 18 years of age or older prior to the last general election, must be a registered voter in the State of Alaska [Alaska Statute 39.05.100].

(For copies of excerpts of these statutes, email **sybor@alaska.edu**)

REQUIRED APPLICATION MATERIALS

Failure to submit the below listed documentation will result in deletion from the list of nominees submitted to the Governor!

- election certification;
- names of all candidates in the local election and the number of votes they each received;
- letters of recommendation;
- proof of cumulative 2.5 G.P.A.;
- resume or brief personal biography.
- copy of Alaska Driver's License or other Alaska State I.D.

ELECTION RULES/PROCEDURES

- The University of Alaska Board of Regents' Office will disseminate instructions regarding the nomination, election and reporting of the student regent and student commissioner elections. The campus director or chancellor will appoint an ad-hoc student appeal board in cases of alleged voting irregularities.
- Only students may appear on the ballot and be nominated for the position of student regent.
- An election will be held on each campus; this may occur in the fall or spring semester. A campus is defined by the Board of Regents as a university institution in any of the following locations: Anchorage, Bethel, Dillingham, Fairbanks, Homer, Juneau, Ketchikan, Kodiak, Kotzebue, Nome, Palmer, Sitka, Soldotna, and Valdez. For the student representative position on the Alaska Commission on Postsecondary Education, Alaska Pacific University is included as a campus.
- Elections will be conducted by local student associations on each campus. In the case where no established student association exists, an ad-hoc student group will be appointed by the local administration (campus director or chancellor).
- Each local student association or group will provide nominating petitions, advertising, and adequate polling time(s) and place(s) for the election.
- The nominating petitions will contain the requirements for the position, a minimum of three signatures of students who endorse the nomination of the candidate, the deadline for submitting the petition, and the date of the election.
- The local student association or group will establish an election committee to oversee the election, polls, and counting of ballots if such is not provided for in the organization of the group. Voting discrepancies will be resolved by the election committee or appealed to the ad-hoc student appeal board for final settlement within 24 hours after the election. If not appealed, the election results will be attested to by the election committee and become final 24 hours after the election.
- The local student group is responsible for meeting the following timetable in relation to the election:
    - Nominating Petition Deadline - minimum of one week prior to election.

  - Elections should be advertised at least one week prior to election. Nomination petition availability should be advertised at least one week prior to petition deadline.
  - **Elections must be conducted by February 18, 2011.**
  - Results and application material must be received by the Board of Regents' Office **at the close of business on March 4, 2011.**

- Each student may vote as determined by the requirements of local student associations or groups. No student may vote more than once. Each student will cast a vote for only one candidate for each position. Students may vote only for candidates from their respective campus.
- All elections will be by secret ballot.
- Each voter must satisfy election or polling officials of their status as qualified students to vote in the election.
- A campus will be allowed to submit, through the Board of Regents' Office to the Office of the Governor, the names of two nominees for each position who receive the greatest number of student votes in a campus election.
- In a situation where there is a tie vote between a second and third place candidate, the local student association will elect, or if there is no organized group, the ad-hoc student group will elect, by secret ballot, the second candidate for its campus from among the tied candidates.
- Local student associations are responsible for forwarding results to the Board of Regents' Office. The requested information will be forwarded to the Board of Regents' Office, University of Alaska, Suite 202A Butrovich Building, Fairbanks, AK 99775-5300 or faxed to (907) 450-8012. The office telephone number is (907) 450-8010. If faxed, the information must be legible to be accepted.
- The Board of Regents' Office will be responsible for delivering the names of the candidates to the Office of the Governor by **March 18, 2011.**

Questions regarding the process should be directed to Ms. Jeannie D. Phillips, Board of Regents' Office, University of Alaska Statewide System, (907) 450-8010, or by electronic mail to **svbor@alaska.edu**.

AK TIF Winter 09

Partner Districts
- Chugach
- Kuspuk
- Lake & Peninsula

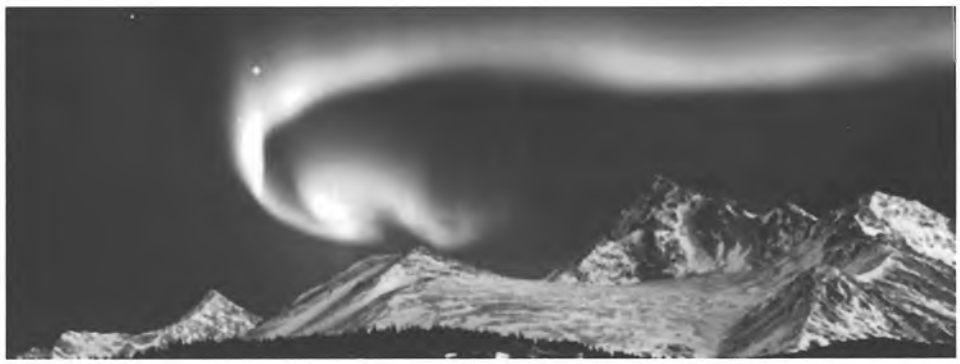
TIF has given me a chance to brush up on some higher math and work collegially with others across the district on math concepts. For remote sites, this form of collegiality is necessary to see that all our students become proficient in skills that will have to see them through a lifetime.

Debi Rubera, Gusty Michael

Stony River Students Working On TIF Individual Learning Plans

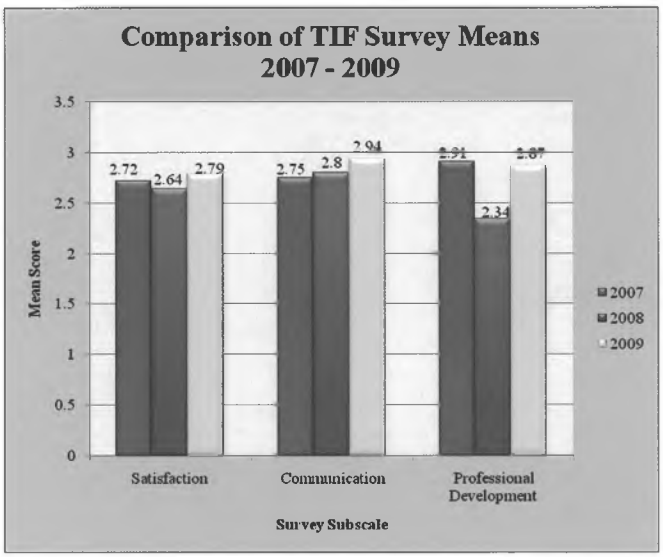
Alaska Teacher incentive fund Mission

To increase student success in mathematics through the recognition and rewarding of educational professionals for demonstrated quality performance



TIF: Listening & Learning

Monitoring what works and what needs to be improved within the TIF program is an essential component of our success. Teacher input on the annual TIF survey provides guidance for adjustments along the way. A comparison of the overall TIF survey means from year one to year three show that satisfaction with the project has grown in year three. Participant satisfaction with TIF communication has increased in each project year. While Professional Development satisfaction declined in year two, it rebounded substantially in year three. A big Thanks To Teachers Who were Able to Participate in The Annual TIF Survey.

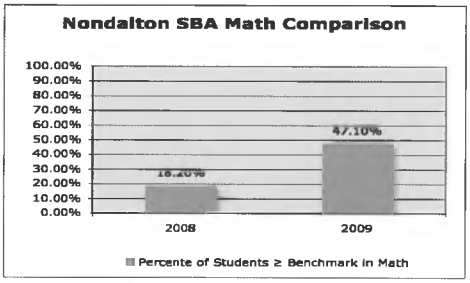


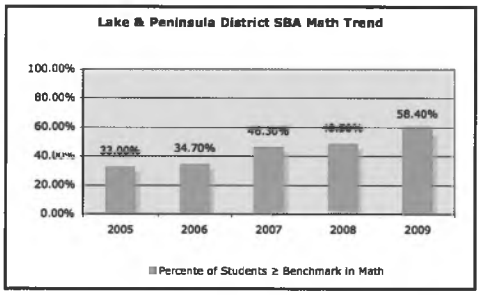
The contents of this Newsletter were developed under a grant from the U.S. Department of Education.

Stony River Students Completing TIF Individual Learning Plans

Math: Great Growth In Nondalton; Sustained Growth Across Lake & Peninsula

TIF has been the "Energizer Bunny" for Nondalton. Six of the seven certified staff members have taken advantage of the TIF incentive to pass the Praxis and are now highly qualified in math. TIF is not the reason there are after school study groups, but it is a much-appreciated reward for the effort. All facets of TIF encourage student growth along with collegiality and professional development.
Ed Cox
Principal
Nondalton School





Kuspuk: The Power of Individual Learning Plans

• The strength is that ILP's empower kids to have some choice & ownership of their own learning, which is very important at a Jr. High level. It is a real transitional time in life. They (students) love them!! They keep me hopping! They get easier and easier for them (students) to write.
Judy Hager, Aniak
Junior/Senior High Schook.
Aniak

• This is my third year attempting to implement ILPs and I am finally having success... after they (students) understand what they are doing and what is expected of them...it is amazing how they work on their ILPs. Some of my students who have the most trouble doing traditional schoolwork are doing the best jobs on their ILPs.
Richard Spencer, George Morgan Senior High School, Kalskag

• ILP's give my students a chance to see mathematics from a different angle. While they are challenging for students who cannot follow directions or work independently, I can see slow but steady progress in independence in many areas, as well as mathematical concepts.

Debi Rubera, Gusty Michael School, Stony River

Kuspuk Earns 21 Point Increase & LPSD Earns a 100.6 District-Wide Math Growth Index

All three TIF School Districts saw increases in District-wide SBA Math Growth Index Scores from 2009 to 2010. Kuspuk earned an increase of over 21 Points, which is the single largest increase in the Alaska TIF program to date. The Lake & Peninsula District Earned a Math Growth Index greater than 100 which has only been done once before when in 2007 Chugach earned a math growth index of 102. The LPSD score of 100.6 means that on average, 2009-2010 LPSD students learned slightly more than one year of math during the school year. Congratulations to all three School Districts and a big Thank you to All Teachers And staff Who helped Students Excel in learning math.

April 10, 2011

Dear Representative Dick:

Throughout my career of fifteen years in rural Alaska, I have never met a mother who did not love and want what is best for her children. I have met many mothers who did not have the tools to help their children. But I have never met one mother who did not want what is best, who did not pray in her heart for her child to be successful in school. The Bering Strait School District Board of Education is committed to building partnerships. It is with enthusiasm that I welcome you into our circle of support. I sincerely hope you accept my invitation to get to know the kind and caring people of our communities, and begin to understand how easy it is to become a part of the solution.

I am sorry to report that as a new superintendent this school year, we have had six suicides of young people under the age of twenty-one years old. Let us not forget these lost young men and women in our conversation about school funding and vocational education. For all its noble and political intent, NCLB has effectively eradicated vocational education from our schools in rural Alaska. Our vocational education classrooms have become storage facilities, as we have by necessity diverted funding away from vocational education to a failed model of education that was developed in another age and intended for a very different purpose. I am also sorry to report that our graduation rate is 47%. If McDonalds were losing as many customers as we are losing, they would stop selling hamburgers. Yet, we as an educational community continue to offer the same old menu. In an age when teachers and students are forced into the unrealistic pursuit of unobtainable and meaningless standards, it is time to recognize that the path to achievement requires only simplicity and diligence, depth and focus, relationships and relevance.

As you grapple with the important decisions you must make in this legislative session, it is my hope that you do not look at things the way they are and ask why, but that you instead look at things that never were and ask why not. I am encouraged by the efforts I witness every day throughout the Bering Strait School District. Please support SB 84 and invest in Alaska's future by investing in Alaska's children. I have faith that all things are possible when good people surround a common vision and do what is right for kids. If we all come together and become one single heartbeat, we will pump life into the educational dreams of all children.

Thank You,

Rob Picou
Superintendent

Bristol Bay Borough School District

Serving the communities of Naknek, King Salmon, and South Naknek in Southwest Alaska

2011-2012 School District Overview
for House Education Committee

What is Bristol Bay Borough School District?

Our District Vision:
Educating Our Children for the Future

Our District Mission:
To provide learning opportunities to ALL students, enabling them to secure the essential knowledge and skills necessary to become positive and productive members of society.

Visit our website: http://bbbsd.net/

What are our priorities for the 2011-2012 School Year?

- Improving student achievement and performance in all academic areas
- Recruiting and retaining the best teachers and continuing our professional development commitment to all staff.
- Expanding and improving vocational programming and career planning for all students.

What has the state and local investment in Bristol Bay Borough School District produced?

- District has continued to make required Adequate Yearly Progress (AYP) as defined by state and federal rules every year.
- Our Alaska Native students (as a group) outperformed our own other students in % proficient or above during last school year.
- Our Alaska Native students achieved the highest percentage proficient (93%) among all districts in Alaska for 2009-2010.
- 92% of our other students achieved proficient or above status on the spring 2010 testing.
- We are among the top performing districts in Alaska according to these indicators.

What else has BBBSD produced for students and families?

FEA & Student Council Students prepared a luncheon for Elders at their residence

- Graduation rates currently at 80%. (still short of where we hope to get)
- Dropout rates currently at 2.7%. (any dropouts hurt, and we need to pay better attention to every child)
- Students better prepared for life after high school with many options. (still short of where we hope to get)

What warnings must be mentioned?

- We are nearing 2014 when all students must be proficient or above.
- AYP bar is raised by 7% this year. That will be a challenge for us to make. In math we have never performed at that next level.
- Each year after this the bar goes up again till it reaches 100% in the 2013-2014 school year.
- Performance in science is well below where we want to be.

NSRC staff & Avant Garde visit Naknek to talk science curriculum

What else are we proud of?

- New clubs and activities; FEA, Running Club, after school programs
- New Native Ed Grant- Cultural Activities, summer school, school counselor and transition specialist- $1.2 million over three years
- Vocational programs- culinary arts, van project, woods program, in middle school and high school (see web site & blogs)
- Pre-K program, Transition Camp, Fitness Trail Project, and Professional Development with Lake and Pen

Final thoughts…

- Bristol Bay is a school district that regularly asks; who we are, what we do for children, and how we could be better.
- We are proud of our students, our families, staff, and alumni and we know that we are the successful school district we are because of a long term commitment to education in the region.
- We will always be looking for ways to improve and to provide greater opportunities for children.
- We appreciate the work of our legislators to support BBBSD and schools throughout Alaska that are striving to prepare our next generation of leaders.

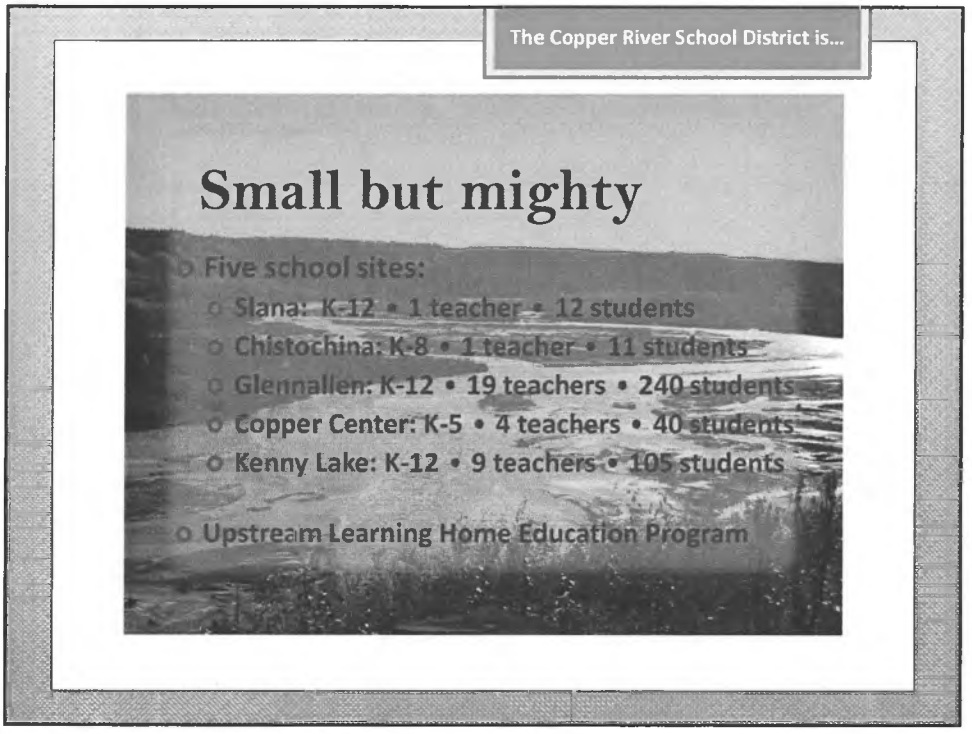
Providing a Quality Education in a Rural Environment
Copper River
School District
Chistochina • Copper Center • Glennallen
Kenny Lake • Slana • Upstream Learning



The Copper River School District is...
Small but mighty
Five school sites:
Slana: K-12 • 1 teacher • 12 students
Chistochina: K-8 • 1 teacher • 11 students
Glennallen: K-12 • 19 teachers • 240 students
Copper Center: K-5 • 4 teachers • 40 students
Kenny Lake: K-12 • 9 teachers • 105 students
Upstream Learning Home Education Program

480/36

The Copper River School District is...

Proud of our communities and rich cultural heritage

- Strong community partnerships
- Parent involvement
- Positive relationships with local village councils and Native organizations

The Copper River School District is...

Proud of our accomplishments

- One of Alaska's highest performing districts
- Two Blue Ribbon Schools (2005 & 2009)
- Excellent Teachers & Administrators
  - Members of local, state, regional, and national boards, organizations, and committees
  - National Board Certified Teacher
  - Alaska Teacher of the Year
  - Region II Principal of the Year
  - Milken Family Educator

Clarity
SM?

The Copper River School District is...

Focused on Five Essential Questions

- What do our students need to know?
- How will they learn it?
- How will we know if they have learned it?
- What will we do if they haven't learned it?
- What will we do if they already knew it?

The Copper River School District is...

Focused on student achievement

- Early Literacy
- Rigorous Academics
- Vocational Education
- Meaningful Enrichment

The Copper River School District is...

Focused on improvement

- Consistent and Aligned Curriculum
- Professional Development designed to Increase Student Achievement

The Copper River School District is...

Actively seeking solutions

- Expansion of Digital Learning Opportunities
- Career & Technical Education [illegible] Offerings
- Enhanced Support for Struggling Learners
- College & Career Readiness Activities

The Copper River School District is...

A place where EXCELLENCE isn't everything...

it's the *only* thing.

Subject: Innovative Learning Program of Cordova

Greetings Representatives,
Thank you for the opportunity to visit with you today about the many great things that are happening in Cordova Schools. For those of you with remaining questions regarding our Innovative Learning Program (ILP) I have attached a brief summary for your convenience.
I have also included our instructor, Ms. Pamela Moe, should you desire to contact her directly as well.
Thank you for your endurance as you address the many challenges surrounding support for Alaska's children.

Cordova School District
Innovative Learning Program

The Cordova School District Innovative Learning Program (ILP) was created to better meet the needs of students who have been unsuccessful in the regular education program. The Innovative Learning Program is intended to lead students toward success in education through the use of innovative teaching techniques, more individualized course study, flexible scheduling, a lower student/teacher ratio and a supportive classroom atmosphere.

Goals: The goals of the Innovative Learning Program include: (1) A reduced drop-out rate; (2) An increase in the number of academic credits earned; (3) A decrease in the number of classes failed; (4) A reduction in absences; (5) An increase in grade point averages; (6) An improvement in criterion-referenced test scores, such as the HSGQE; (7) An improvement in decision-making and study skills; (8) To strengthen 21st century skills; and, (9) Attain ability to graduate.

Program Components:

Alternative School: Alternative school meets every day for a portion of the day. The alternative teacher develops individual learning programs and teaches all subjects. Alternative School students must also spend time doing schoolwork at home.

Credit Recovery: The students participating in this part of the ILP program are working to regain one or more credits lost or missed in the regular school for various reasons.

Extended Absences: The alternative teacher coordinates work with the regular classroom teachers for students going on extended absences or travel for more than 10 days. Early notification by the parents to the school of these extended absences is critical to the success of this part of the Innovative Learning Program.

Home School: The alternative teacher is the liaison and teacher of record for the Cordova School District's Home School Program. The alternative teacher meets with the home school parents at the beginning of the school year to go over the home school requirements, discuss the educational plans and materials to be used, and to clarify both the school and parental responsibilities. Throughout the year, the alternative teacher monitors the work being done, collects work samples and grades, and in some cases, goes out on home visits.

Application Information: Application forms for the ILP programs are required and can be obtained from the counselor at the high school, from the alternative school teacher, from the school secretaries at the elementary and high school, and from the ILP website at *www.cordovasd.org/~pmoe.* Once the application is received, the student's academic records are reviewed and interviews are conducted. The student, their parents or guardians, the school administrator, the school counselor, and when possible, the alternative teacher, participate in the initial meetings.

For more information contact: Pamela Moe, Alternative Teacher, pmoe@cordovasd.org, (907)424-3266 or 3265.

Galena City School District

Offering Choices in Public Education

Galena City School District

- One District – Three Distinct Programs of Choice
  - Galena Interior Learning Academy
  - Interior Distance Education of Alaska
  - Sidney C. Huntington School

Galena Interior Learning Academy

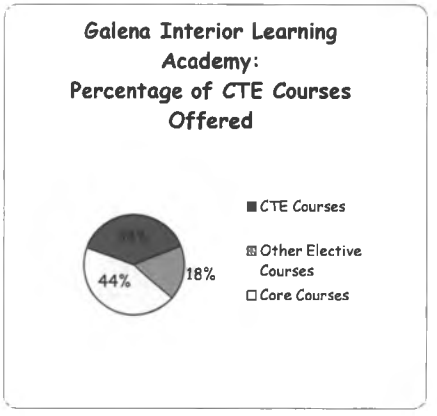
- 14 year success story
- Strong AYP scores
- Over 90% Alaska Native
- High graduation rate
- 198 students from 58 Alaskan communities during the 2010-11 school year

Galena Interior Learning Academy

- District run statewide boarding school
- Accredited to provide secondary and post-secondary CTE programs
- Provides an alternative educational option for many rural Alaska Native students at risk of dropping out
- Provides access for our state's most "at-risk" students to CTE and academic programs not typically found in rural communities

Galena Interior Learning Academy

- CTE Programs
  - Aviation
  - Cosmetology
  - Culinary Arts
  - Automotive
  - Small Engines
  - Welding
  - Carpentry
  - Electricity
  - Computer Technology



Interior Distance Education of Alaska

- 14 year success story
- Supports strong family partnerships
- Strong AYP scores
- High graduation rate
- Flexible course scheduling
- Many students receive dual high school and college credit

Interior Distance Education of Alaska

- Serving 3510 students from 6 regions
- Serving 200 rural Alaskan students from 24 communities
- Provides educational opportunities for 186 preschool students

Sidney C. Huntington School

- Serving the community of Galena
- Alaskan "School of Choice"
- Fully accredited since 1980
- Named for renowned Galena elder Sidney Huntington

Sidney C. Huntington School

- Made AYP every year since the inception of NCLB
- 78% Alaska Native
- High graduation rate
- 105 students from K through 12th grade
- Serving 11 preschool students

Galena City School District

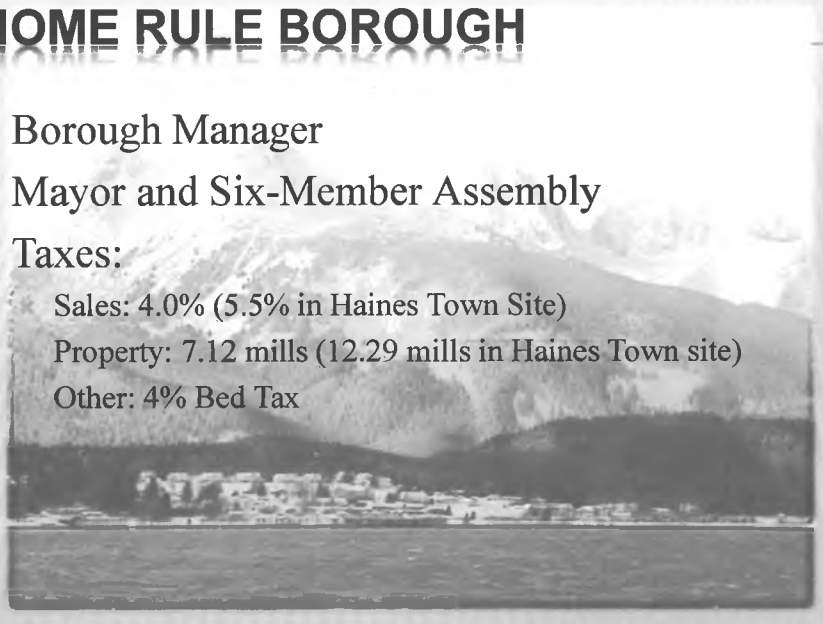
- Three Programs with One Critical Focus:
  - Providing educational choice, access, and opportunity for families statewide
- Serving students from over 70 rural Alaskan communities

HAINES BOROUGH SCHOOL DIST.

CONNECTED BY LAND AND SEA

HOME RULE BOROUGH

- Borough Manager
- Mayor and Six-Member Assembly
- Taxes:
  - Sales: 4.0% (5.5% in Haines Town Site)
  - Property: 7.12 mills (12.29 mills in Haines Town site)
  - Other: 4% Bed Tax



SERVING THE CHILKAT VALLEY

- Population ≅ 2500
- Economy
  - Commercial fishing,
  - Tourism (drive-in, ferry, & cruise ship)
  - Government
  - Commute & Telecommute
  - Retirement
  - Logging (in recent history)

COMMUNITY COMPOSITION

- Very diverse population composed of:
  - Original Tlingit inhabitants of the Chilkat Valley
  - Waves and Trickles of others who came for:
    - The Resources
    - The Beauty
    - Tourism
    - Retirement
    - The Community
    - Quality of Life
    - School

RESOURCE #1 - OUR CHILDREN

- Tremendous Support for Education
- Including a rich curriculum of
  - Core Classes
  - Career and Tech./Vocational Ed.
  - Physical Education
  - Art
  - Music

DISTRICT ACHIEVEMENTS

- Have sustained a varied curriculum:
  - Digital Photography
  - Gourmet Cooking
  - Spanish
  - Construction
  - Work Experience
  - Power Systems Engineering

CONSTRUCTION CLASS

GRADUATION REQUIREMENTS

English	4.0	Fine Arts	1.0
Social Studies.	3.5	Health	.5
Science	3.0	**Financial Literacy**	.5
Math	3.0	Electives	7.0
Computer	.5	**TOTAL**	24.5
Physical Ed.	1.5		

DISTRICT ACHIEVEMENTS

- Many extracurricular activities:
  - X-Country, Wrestling
  - Volleyball, Basketball
  - Debate Drama & Forensics
  - Archery
  - MS Basketball
  - MS Wrestling
  - MS Exploratories, etc.
  - Cheerleading
  - Track & Field
  - Student Council
  - National Honor Society
  - Chilkat Blizzard (Yearbook)
  - Pep Band
- (Community heavily involved)

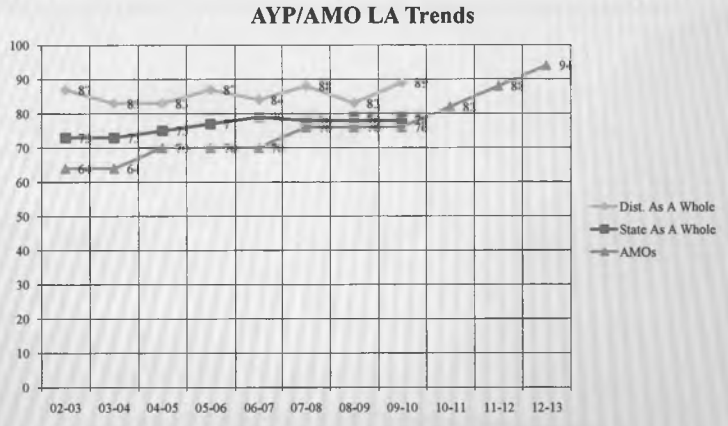
POST SECONDARY SUCCESS

- **Class of 2010 profile**
  - 65% planned to attend a college or university
  - 15% planned to receive vocational/technical training
  - 8% planned to join the military
  - 12% had other immediate plans such as work or travel
- **Recent graduates have attended:**
  - UAA, UAF, UAS, AVTEC, Northern Arizona, Washington State, Gonzaga, Seattle Univ., Humboldt State, Naval Academy, Cornell, Marquette, and the Air Force Academy.

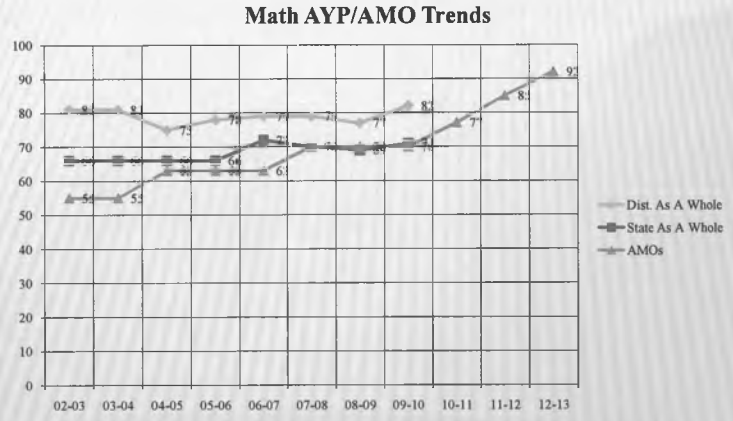
FISCAL DISCIPLINE

- Watching expenditures.
- Prioritizing resources to the classroom.
- Conserving resources.
- Maintaining our facilities
- An adequate funding stream is still required.

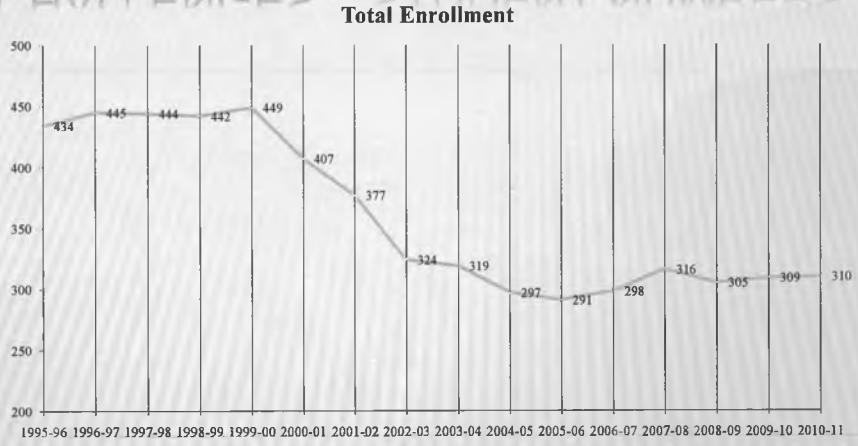
ACHIEVING AYP – LANGUAGE ARTS



ACHIEVING AYP -- MATH

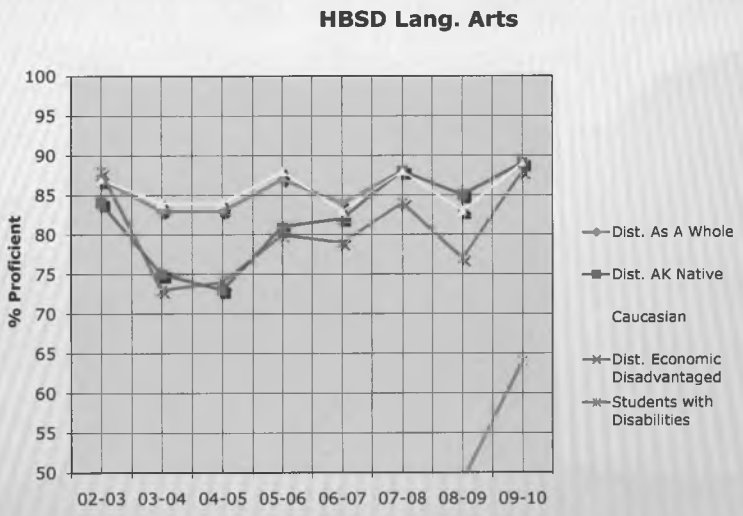


CHALLENGES – STUDENT NUMBERS

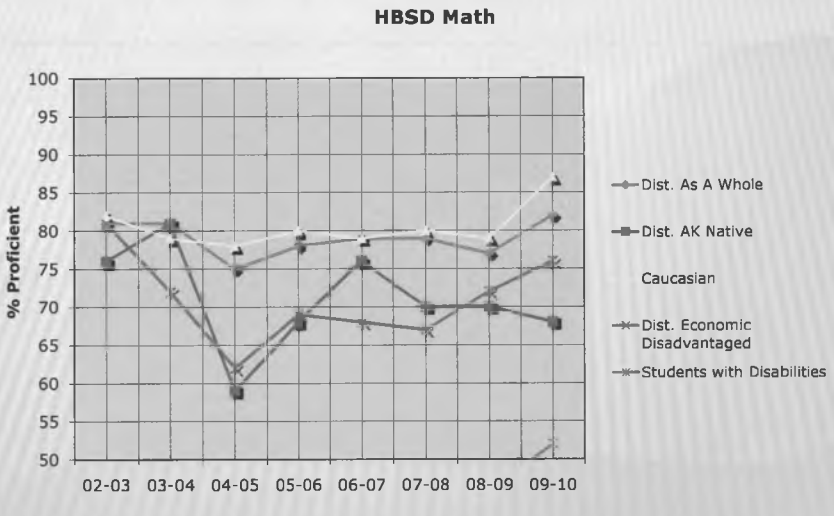


We've declined but stabilized out around 300 in 2002-03

CHALLENGES – MAINTAINING AYP



CHALLENGES – MAINTAINING AYP



FOLLOWING OUR STRATEGIC PLAN

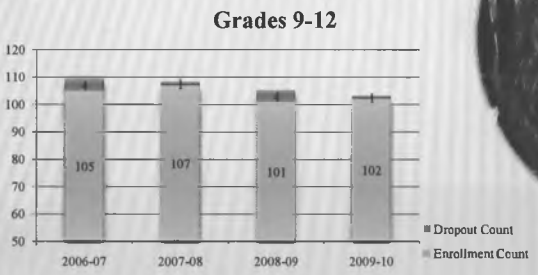
- ***We will enhance and expand educational opportunities.***
  - Establish ongoing curriculum review.
  - Integrate current technologies into the curriculum and daily instruction.
  - Strengthen and diversify career and technical education (CTE).
  - Increase program offerings to make courses attractive to more students.
  - Establish ongoing, meaningful professional development (may be included with each specific objective as appropriate).
  - Provide early identification and intervention to maximize student success in reading and math.

FOLLOWING OUR STRATEGIC PLAN

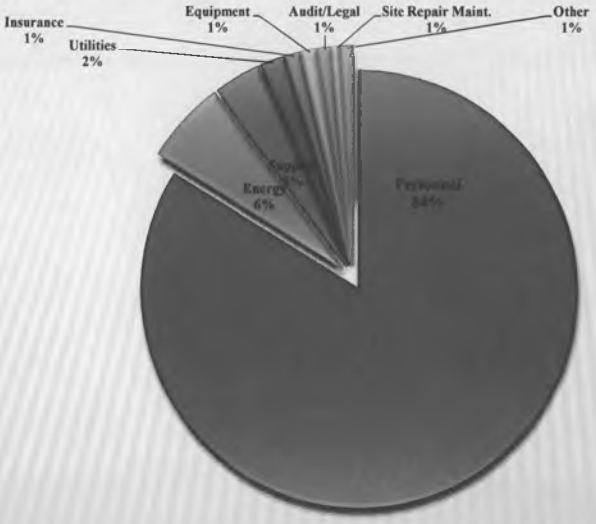
- ***We will consciously create and sustain a supportive school environment.***
  - Establish an effective school advisory council that provides support and input to the school board, students, teachers and administration and helps to build bridges between the school and community.
  - Sustain formal partnerships with community agencies/organizations that benefit students.
  - Develop and implement a system(s) to identify, provide support to, and monitor the progress of students exhibiting at-risk behaviors.

CHALLENGE - GRADUATE ALL STUDENTS

- 2010 Cohort Total = 22
- Drop-outs = 3
- Continuing = 1
- 2010 Grad. Rate = 81.8%



MAINTAINING ADEQUATE RESOURCES



GO BEARS!

29

Iditarod Area School District

Presentation to the House Education Committee

Karen Ladegard, Superintendent

February 9, 2011

GEOGRAPHY

- IASD - 43,000 sq. miles - an area the size of Ohio
- Separated from the main road system by the Alaska Range
- No connecting roads into or out of any of our villages
- Two river systems separated by the Beaver Mountains:
  - -Yukon (Holy Cross, Anvik, Grayling, Shageluk)
  - -Kuskokwim (McGrath, Nikolai, Takotna)
- Temp. range -75 to +85

More About IASD

- Seven Schools (brick and mortar)
- One distance learning program
- IASD Central Office in McGrath - 219 air miles west of Anchorage - reachable by air only
- Six villages on the Iditarod Trail

Demographics

- Five indigenous languages
- All Title 1 Schools
- 78% Qualify for Free and Reduced Lunch
- K-8 Enrollment - 160 Students
- High School Enrollment - 40
- 4 schools under 20 students
- 3 schools under 60 students
- Distance Learning Program - 117

One of Our Yukon Sites

- David-Louis Memorial School in Grayling.
- Capacity - 120 students
- Today's enrollment-45
- No scheduled air service between the Kuskokwim and the Yukon villages.
- $1200: Charter cost from one side of the district to the other

Shared Goals

- Student Proficiency
- Early Intervention
- Student Engagement in Relevant Programs
- Collaboration at all levels
- Professional Development

Technology Connects Staff and Students

Connecting Staff: Building a Professional Learning Community

Collaboration and Peer Mentoring accelerates Professional Growth. Time is built into the work week for Weekly VTC and eLive curriculum meetings that:

- **Join staff who share best teaching practices, and collaborate on optimal delivery of curriculum and State Standards.**
- **Reduce professional isolation as staff network with their peers from 7 sites.**
- **Provide on-going professional development without the high cost of travel and time away from home.**

Connecting Students

Technology brings experiences and services to students such as:

- **Bi-Monthly IASD Student Government Meetings via VTC.**
- **Daily VTC Secondary Classes.**
- **District-Wide Science Fair via VTC.**
- **Student interventions thru VTC with Specialists and online programs.**
- **Counseling and Speech Therapy delivered via Skype.**

Right: A student presents his science fair project to students, judges, parents and staff who are viewing the presentation from all seven (7) sites throughout IASD.

SOME EVENTS MUST BE FACE-TO-FACE

Sports, Arts, Culture

- **4th Grade Trip to Anchorage**
- **Fine Arts Camp**
- **Science Camp**
- **Ski Meet**

Annual IASD Prom and Formal Dinner

Each year a different site hosts the prom for middle and high school students. Students help raise money for their travel.

CHALLENGE

- High school students are migrating to state supported boarding schools as they increase in capacity and in program offerings.
- Our commitment to serving the few who choose to remain in the village, or who are sent home is steadfast.
- IASD schools average five high school students each, with the smallest having one high school student and the largest having ten high school students.
- Secondary teachers are stretched by mandates to become Highly Qualified for all subjects taught, when they are often the only secondary teacher teaching all 6^{th}-12^{th} Grade subjects.
- Our challenge is to creatively adjust our high school program to connect students with a comprehensive academic and skill-based program.
- Partnerships with local agencies broaden resources and opportunities for students and further engage communities in the joint responsibility to educate our youth.

Our Commitment

Meeting each student's needs and each staff member's professional goals.

Glacier Valley Elementary School

Juneau School District
2010-2014 Strategic Plan

Student Achievement

1. Align grade level core standards in math and literacy with world-class goals in mind.
2. Implement an assessment system that informs instructional practice.
3. Engage all staff in the study and use of effective instruction and intervention strategies for all students.
4. Provide support systems to implement instructional programs with fidelity.

Highly Qualified Staff

5. Create a coordinated professional development system that is responsive to achievement data, aligns with school and district improvement efforts, and maximizes the investment of district resources.
6. Study and practice leadership behaviors that are linked to increases in student success.
7. Strengthen our human resources strategy with improved hiring, orientation, training, feedback, and evaluation processes.

Community Commitment

8. Strengthen community partnerships to enhance relevance in career technical programs, service learning, civic education, and across the curriculum.

Culture of Service and Support

9. Develop and implement a service culture and efficient system of support at the District Office.

Early Learning

- ***Pre-K Pilot Program***
- Integrated Preschool
- Kindergarten Kick-off
- Kinder Camp
- All Day Kindergarten
- Staggered Kindergarten School Day

Instruction

- Literacy
- Math
- Instructional Coaches
- Early Release Mondays

Battle of the Books

Professional Learning Communities

- What do we want students to know?
- How will we know?
- What will we do if they don't? If they do?

Career Pathways

- Expanding Career Technical Ed
- Dual Credit/Tech Prep Agreements
- AVID
- Small Learning Communities

Number of Schools Meeting Adequate Yearly Progress (AYP)

Juneau School District

Tech Prep agreements with UAS and UAA

School Year 2010-2011-2012

The Juneau School District has established technical preparation course agreements with UAS and UAA campus programs that align high school courses with University courses. Courses are taught by high school teachers in the high school setting and are fully aligned with the curriculum of the university course. Students who take the high school courses are able to pay a reduced fee, $25 a credit, and enroll in the University course at the same time they are taking the high school course. They must also pass the course with a minimum of a C grade.

The district currently has program alignments with the UAS Career Tech programs in Construction, Mechanics, Health Sciences, and Accounting at UAS, and Culinary Arts at UAA. New agreements are in development for Engineering and Fisheries Tech programs at UAS, UAA and UAF.

Tech Prep and dual enrollment course agreements: 20 established, 4 in process/development

JDHS/TMHS/YADHS Course =	UAS/UAA Course
Creative Woods I (JDHS) (TMHS)	CT S100 Woodworking I, 3 credits UAS

- Carpenters Union

College Connection Scholarship Program

The Juneau School District has a scholarship fund to support high school students to take university courses at UAS through the College Connection Scholarship Program. The purpose of this program is to allow qualified high school students to simultaneously earn high school and university credit while enrolled in a university course, otherwise known as "dual enrollment". Students must be enrolled in a Juneau School District high school, exhausted related course offerings at their high school, have at least a GPA of 2.5 or higher, a staff recommendation, application form, and personal statement. Selected seniors or juniors may take up to two courses per semester; selected freshmen and sophomores may take up to one course per semester. The College Connection fund pays for tuition, fees and books for the student. Students must attain a C or better in the course or the costs paid by the district must be reimbursed by the parent to the district. Funds are available on a first come-first served basis. Information and applications are available from each high school's counseling office.

Dual Enrollment

High School students may enroll in university courses and simultaneously earn university and high school credit. To be recognized on the student's high school transcript, three college credits for a course equates to .5 high school credit. Six college credits for a course equates to one high school credit. Any university courses less than three credits, can be noted on a transcript as a course taken at the university but are not eligible for high school credit. Exceptions may be granted when reviewed by school administrators based on content and course hours of university courses. The university must send the high school registrar an official transcript and notice for credits and grades to be recorded on a student's transcript.

Juneau School District

2010-2014 Strategic Plan

Student Achievement

1. Align grade level core standards in math and literacy with world-class goals in mind.
2. Implement an assessment system that informs instructional practice.
3. Engage all staff in the study and use of effective instruction and intervention strategies for all students.
4. Provide support systems to implement instructional programs with fidelity.

Highly Qualified Staff

5. Create a coordinated professional development system that is responsive to achievement data, aligns with school and district improvement efforts, and maximizes the investment of district resources.
6. Study and practice leadership behaviors that are linked to increases in student success.
7. Strengthen our human resources strategy with improved hiring, orientation, training, feedback, and evaluation processes.

Community Commitment

8. Strengthen community partnerships to enhance relevance in career technical programs, service learning, civics education, and across the curriculum.

Culture of Service and Support

9. Develop and implement a service culture and efficient system of support at the District Office.

JUNEAU SCHOOL DISTRICT
CITY AND BOROUGH OF JUNEAU

Kenai Peninsula Borough School District

Presentation to the House Education Committee

Steve Atwater, Superintendent

January 31, 2011

KPBSD- A Diverse District

9,000 Students
- 8,000 in brick and mortar buildings
- 1,000 enrolled in Connections Homeschool Program (borough students only)

44 Schools
- 37 general education schools
- 4 charter schools
- 2 alternative schools
- 1 performance-based school

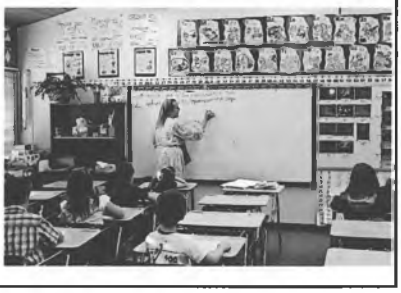
42% of students receive free or reduced lunch

1200 employees

FY11 budget = $151,000,000

What does a KPBSD school look like? It depends.

- 34 schools on the road system
  - From small (Hope 14 students) to large Soldotna High School (505 students
- 4 fly-in schools (Port Graham, Nanwalek, Seldovia, Tyonek)
- 4 Schools in Russian Old Believer Communities (Kachemak Selo, Nikolaevsk, Razdolna, Voznesenka)
- 2 schools in correctional facilities (Spring Creek and Kenai Youth Facility)



KPBSD's Assets

- Students generally do well
  - Many students attend top colleges across the country
  - Proficiency percentages on SBAs are well above state averages
- Experienced staff
  - teachers retire from KPBSD
- Involved Community,
  - good local support
- Improvement efforts
  - leading Alaska in RTI process and teacher evaluation process

Our Challenges

- Making it work with so many different kinds of schools
  - Wide dispersion of schools across Peninsula makes it difficult to align our efforts
- Economy of scale of our small schools

  5 schools with 20 or fewer students

  13 schools with 100 or fewer students
- Funding- currently using fund balance to make it work

What We Are Working On

- District level improvement by moving our organization to a tight-loose-tight structure
  - Tight-processes for district level activity, e.g., intervention (non-negotiable)
  - Loose- site identity, pedagogy, grading
  - Tight- the "what," outcomes are the same for all schools (non-negotiable)

Questions or Comments?

Kodiak Island Borough School District

Presentation to the House Education Committee

February 10, 2010

Kodiak has:

2,556 Students

14 Schools
- 4 Town Elementary Schools
- 1 Town Middle School
- 1 Town High School
- 7 K-12 Village Schools

In-District Travel
- Barge Service 1-2x/Year
- Float Plane/Bush Plane

Connection to All Schools
- Internet
- Video Teleconference
- Phone/Fax Lines

44% of Students Receive Free or Reduced Lunch

350+ Migrant Fishing/Logging Students

500+ Students who are English Language Learners

350+ Students who have Special Needs

14 Student Languages

460 Employees

$42,000,000 Operating Budget

Challenges:

Delivering relevant, rigorous (higher math and science classes), high quality instruction for all students including remote, small K-12 schools and the instructional technology resources onsite as well as distance learning.

Keeping up with cost increases in fuel, health insurance, technology infrastructure, and competitive salaries.

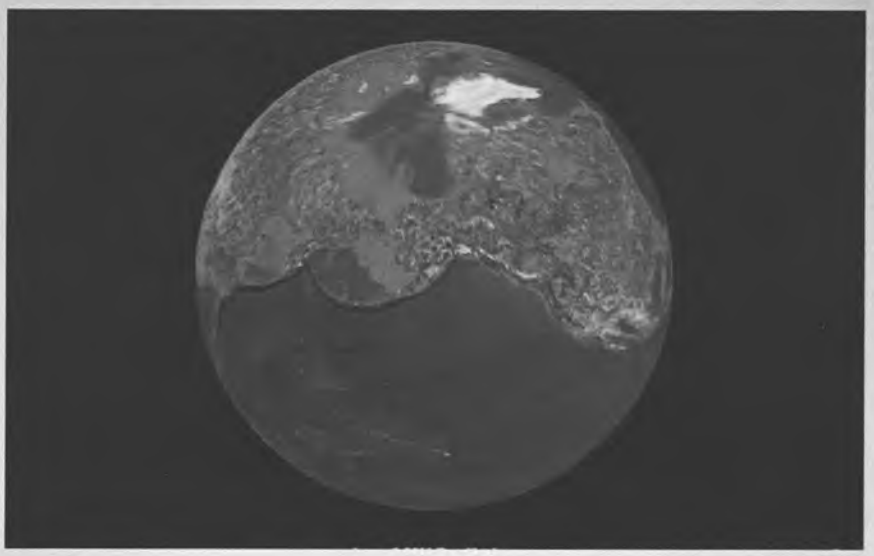
Providing the career and technical education students need.

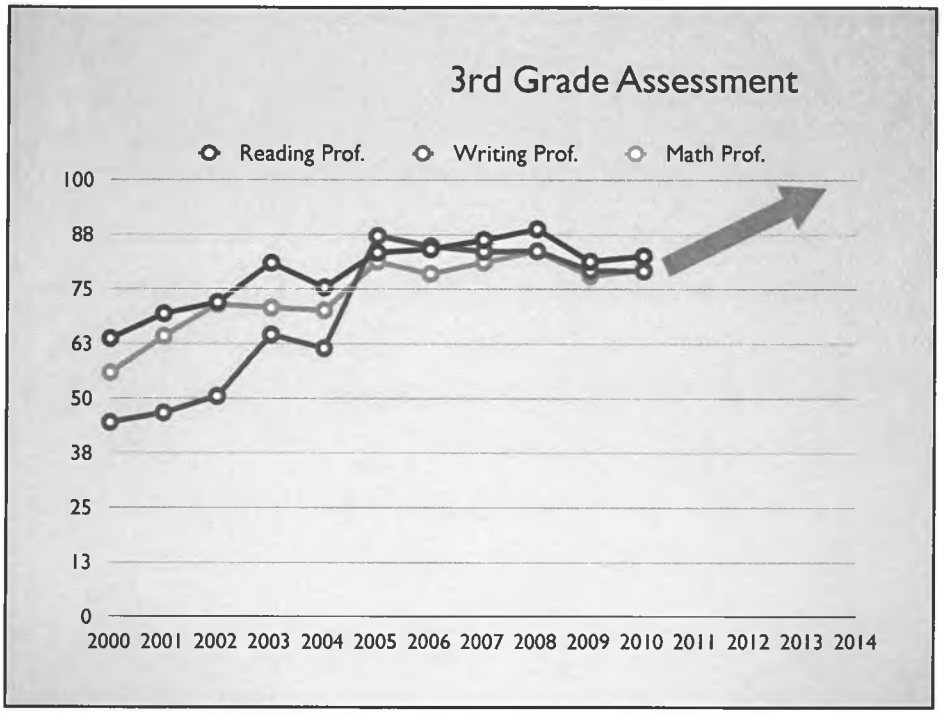
Adequately supporting the unique island transportation costs, diversity of languages and cultures, and teacher housing in remote sites.

Kodiak Island Borough School District

House Education Committee Presentation
Stewart McDonald, Superintendent

February 2011





Language Arts and Math Proficiency

According to State and Federal Regulations

The target for language arts proficiency increases by 5.7% every year for the next 4 years

That's a 23.1% gain over the next 4 years

The target for math proficiency increases by 8.5% every year for the next 4 years

That's a 33.9% gain over the next 4 years

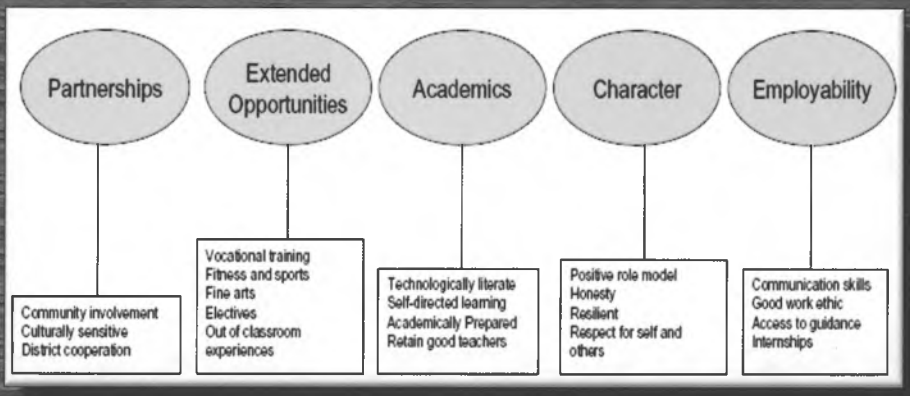
Lake and Peninsula Shared Vision



Standards Based Education w/o the RISC

- It has been ten years since LPSD reformed its instructional model.
- The implementation process has had its share of ups and downs but there is no ignoring the results.
- Student achievement has more than doubled on State testing and our graduates undoubtedly are leaving us better prepared for the road ahead.
- For most of our students, this performance based system of schooling is all they know.
- Our student body knows exactly what is expected of them and that they have to perform in order to stay on track to graduate.

OVERVIEW OF LAKE AND PENINSULA'S STANDARDS BASED SYSTEM

Instead of measuring "seat time" in the classroom and promoting students from grade to grade, whatever their skills, LPSD students proceed through a set of standards (GLEs) at their own pace. Time is not a factor in student success. LPSD student performance is the measure of academic achievement – not a grade or time spent in class.

Teachers continuously monitor student progress and push, encourage and teach students. Some students may excel in completing district requirements and reach graduation level a year or two early while others stay with us and graduate a year or two later.

LPSD Students work through the levels of our standards in 8 content areas:

Reading **Writing**
Math **Science**
Social Studies **Technology**
Cultural Awareness
Employability

(H.S. Graduate Level is 10)

Measuring Up – A Standards-Based Success Story

	2005	2006	2007	2008	2009	2010
% Benchmark in Math	33%	34.7%	46.3%	48.5%	58.4%	66.8%
% Benchmark in Reading	55.1%	60.9%	67.8%	66.1%	67.3%	75.5%
% Benchmark in Writing	46.1%	54.1%	51.1%	56.2%	62.1%	67.6%
District-Wide Enrollment	398	387	379	368	370	344

*District enrollment for the 2011 school year is predicted at 306 students.

Successes

Academic Growth
in Language Arts and Math

LYSD Intervention Program

- Special intervention efforts are currently implemented at six schools to help academically-deficient students based on their SBA scores.
- High-quality intervention teachers are hired for 12 weeks to organize special interventions that will be conducted during the school day at a variety of times.

- Identified students will receive special instruction daily for 30 to 60 minutes in small groups and in one-on-one sessions from the intervention teachers and/or from the teacher aide under the direction of the intervention teacher.
- Instruction will be focused on specific standards and GLEs of need as indentified by the regular education teachers, intervention teacher, and/or by the collaborative team.

Decreased Teacher Attrition Rates

New Schools

2002: Kotlik
2002: Pilot Station

Educational Change

- Short-term goals may take 1-3 years for change to occur.
- Long-term goals may take 4-6 years for change to occur.
- Overall impact for change may take 7-10 years.
- In most schools, the systems themselves are too impatient and don't allow enough time for change to actually occur.

Mission: Mat-Su Borough School Prepares for Success

Educational Transformation and Innovation Response to Governor Parnell & House Education Committee

Introduction – Real Change for Challenging Times

- **Mastery as the Constant**
- **Transparent Accountability**
- **Relevance to Student Achievement and Performance**
- **Substantial Investment into Professional Development**
- **Student with Academic & Employability Skills**
- **Outcome: Career, College, Workforce and Military Ready Graduates**

Introducing the Mat-Su Borough School District

- Located 35 miles North of Anchorage
- Spanning approximately 25,000 square miles, an area larger than the entire state of West Virginia
- Home to 44 schools ranging in enrollment from 11 to 1,247 with a total enrollment of 17,098
- Second largest District in Alaska
- Largest employer in the Mat-Su Borough
- Buses run an average of 5,500 miles per day transporting 8,000 students
- Special education buses run 2,500 miles per day transporting 500 students
- 39% of Mat-Su students are eligible for free and/or reduced lunch

Matanuska-Susitna Borough School District

Vision, Mission, Beliefs, Values, Goals and Objectives

Vision

Mat-Su Borough School District will be a model of excellence in teaching, learning, and engaging all students.

Mission

Mat-Su Borough School District prepares students for success.

Beliefs

We believe that….

- All students can and want to learn: success breeds success
- The needs and best interests of students drive all decisions
- Stakeholders' participation is crucial to student success

Core Values

- Stewardship
- Accountability
- Empathy
- Quality
- Integrity
- Efficiency
- Respect
- Lack of reprisal

Goals

- We will improve student success, achievement, and performance by focusing on their career and college readiness.
- We will increase the graduation rate.
- Our schools will welcome families and community members in the education of our youth.
- We will create and maintain a safe and healthy environment for our students and staff.

Annual Objectives/Accountability

MSBSD PROGRAMS

Mat-Su schools are organized to put students and families first! The Mat-Su School Board and Administration set high academic standards for Valley students and promote top-notch efforts to achieve them.

OPEN ENROLLMENT

Offers parents an annual opportunity to enroll their children in any school that is not overcrowded. Mid-year transfers are discouraged because they may negatively impact student learning.

ELEMENTARY SCHOOLS (20)

Building the foundation for academic excellence, elementary schools focus on literacy and other fundamentals. The District has 20 elementary schools.

MIDDLE SCHOOLS (5)

The District uses the middle school model which provides for small learning communities for students, enrichment and intervention classes, and exploratory classes.

HIGH SCHOOLS (6)

In our large comprehensive high schools, Mat-Su schools offer a wide variety of academic programs for students, including the International Baccalaureate Program in its eleventh year at Palmer High School, and the Advanced Placement (AP) Program at Palmer, Colony, and Wasilla High schools, allows students to earn college level credit or placement while still in high school. Active learning--both in and out of the classroom--is provided through the World Languages Program (study in Russian, Japanese, Spanish, French, and English languages).

CHARTER SCHOOLS (6)

Academy Charter School (K-8)—the District's first, opening in 1996. Academy Charter's program is based on Core Knowledge curriculum.

Midnight Sun Charter School (K-8) opened in 1998, and features a multi-age structure with integrated Core Knowledge, steeped in technology.

Twindly Bridge Charter School (K-12) is "A bridge between home, school, and community learning." It supports both home and school learning.

Birchtree Charter School opening this Fall. Birchtree Charter School is a Waldorf-inspired school.

Fronteras Spanish Immersion Charter School is a Spanish immersion K-8 academic center that promotes high academic success in a nurturing, creative, multiage environment, and fosters increased cultural understanding, communication and citizenship in our community, nation and world.

American Charter Academy School (Grade 6-12) is the District's newest charter school. The school focuses on the whole child, including academics, family connections, addressing risky behaviors, and helping students know that they are valued and have adults who care.

MSBSD PROGRAMS—Alternative Schools

The District's goals are to meet every student's needs to the greatest extent possible. To ensure that students and families have the broadest opportunities, we offer three alternative schools:

Burchell High School opened in 1988 and is a Choice School. A research-based alternative school, Burchell offers flexible scheduling and credit recovery, limiting barriers for students.

Valley Pathways incorporates flexible scheduling, individual instruction, and credit recovery, while maintaining high standards through curriculum, course offerings, and extended learning.

Mat-Su Secondary School is a cooperative learning center operating under the State of Alaska's Restorative Justice framework. The community's participation in the facility's work continues through an active Citizens Advisory Board and strong partnerships with organizations such as the Mat-Su Borough School District, the Mat-Su Recovery Center, the Juvenile Assessment Center, and others.

MSBSD PROGRAMS—K-12 Schools

Mat-Su schools serve diverse populations—in ethnicity and population needs. There are four schools serving K-12 student populations:

Beryozova is the District's special mission Russian speaking school. These students are from Old Believer families that are homogeneous in the midst of diverse surrounding communities. It has been a part of the District for almost 20 years.

Glacier View School, located at Mile Marker 104 on the Glenn Highway, is nestled between the Chugach and Talkeetna Mountain Ranges. Opened in 1962, the school services families from Chickaloon (Milepost 76) to Mendeltna (Milepost 150) and provides public Kindergarten through 12th grade education.

Mat-Su Day School s an educational placement (K-12) for students with IEPs who require a separate school for special circumstances including dropout prevention, transitions, safety concerns, and behavior challenges. The goal for all students is full community and educational reintegration. Each student has an Individualized Education Plan (IEP).

Mat-Su Central School (formerly Mat-Su Correspondence School) is teacher-guided, home-based education with parent-driven curriculum. The Mat-Su Central School Program is based on the belief that parents have the right to educate their children and they have the right to be supported by the public education system as they provide educational opportunities for their children.

Constants: Core curriculum, Response to Instruction/Intervention (RTI) Framework, 5 Year Curriculum Review, Professional Development Initiatives, Learning to Mastery, Employability Enhancement, Student Success

Systemic Initiatives – The What

- **Board governance**
  - Policy governance
  - Monitor and evaluate by their strategic plan, annual objectives, metrics, and timelines
- **Mastery replaces time as a constant**
  - Guarantee 80% subject matter mastery of viable curriculum
  - Multiple options provided to students to achieve mastery
  - Students promoted based on their academic achievement, soft skills, and social emotional readiness
  - Graduation tied to mastery not time
- **Develop student employability skills such as:**
  - Being on time
  - Attendance
  - Having proper materials
  - Managing a calendar to produce papers study for exams
  - Being a productive citizen
- **Innovative instruction designed to meet the needs of students, parents, and the community**
  - Instruction focused on student achievement and performance
  - Curriculum designed to prepare students to compete in the global society

- **Student and parent options for schooling**
  - Innovative customer responsive Pre-K-12 schools
  - Elementary Early Career/College Academy
  - Science Technology Engineering Math – STEM
  - AdvancePath individualized learning system
  - Career and Technical High School
  - Increased opportunities for registered apprenticeships in skilled occupations
  - Increased opportunities for development of appropriate training programs for operations, technical, and management workers
  - Health Academies providing health career focused instruction
  - Charter Schools
  - Magnet Schools
  - Special Mission Schools
  - Early College Alliance
  - Advanced Placement and International Baccalaureate
  - Reserve Officer Training Corps
- **Research based instructional programs**
  - Programs, curriculum, and instruction researched and evaluated by third party neutral
- **School Principal emphasis on instructional leadership**
- **Programs from Pre-School through Career and Early College Alliance**

AdvancePath ACADEMICS

AdvancePath Academies offer multiple pathways to graduation. The academies serve students ages 15-19, tuition free, with the possibility of earning accelerated credits and graduation. Mat-Su has three AdvancePath Academies—Wasilla High School, Valley Pathways, and American Charter Academy

Classrooms Before AdvancePath Makeover

Classrooms After AdvancePath Makeover
Over the summer the district's Operations & Maintenance crew worked hard to make the big switch from a portable classroom to a technology-rich learning lab.

Summary – A District Wide Blueprint For Real Change

- Educational Transformation and Innovation
- Mastery as the Constant
- Transparent Accountability
- Relevance to Student Achievement and Performance
- Substantial Investment into Professional Development
- Academic & Employability Skills
- Outcome: Career, College, Workforce and Military Ready Graduates

North Slope Borough School District

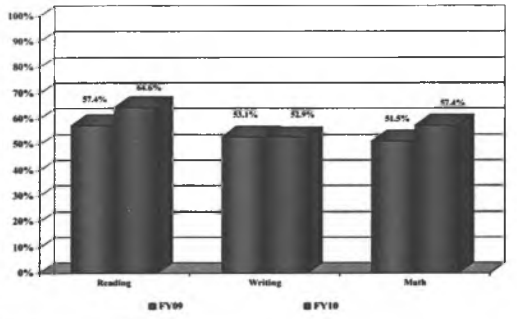
- Nation's largest school district
- 89,000 square miles
- Northernmost school district in the United States
- 11 schools in eight villages serving K3-K4 through 12th grade

NSBSD Accountability Summary

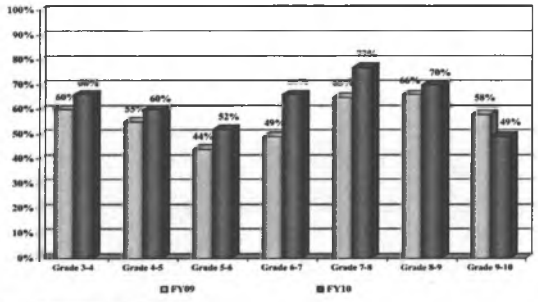
- Sustained 6 schools making AYP
- Reading—overall gain of 7.2%
  - double-digit gains, grades 3, 4, 5, & 8
  - % proficient grades 7-8-9 highest since SBA testing began.
- Writing – overall decline of 0.2%
- Math—overall gain of 5.9%.
  - Seven schools improved; 3 showed double-digit gains
- 6-year trend line in language arts & math indicates district is now on a growth path
- Overall scores and individual scores not high enough

NORTH SLOPE BOROUGH SCHOOL DISTRICT

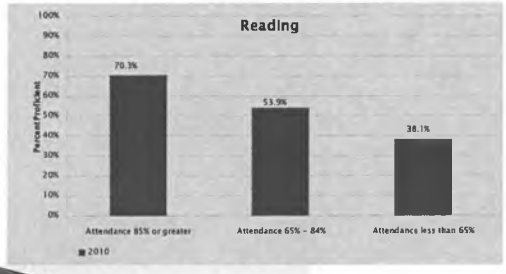
SBA Two Year Trend



NSBSD
SBA Two Year Matched Cohort
READING



FY10 Reading Performance Impacted by Attendance



Summary

- Student performance on state assessments continues to improve.
- Student performance on state assessments and district administered tests are not high enough.
- Student attendance must improve in order to increase student achievement.
- The district appreciates & depends on community and parent support.

Eben Hopson

... we of the North Slope are the only Iñupiaq people who have achieved true self-government...We have the greatest opportunity to direct our own destiny...Possibly the greatest significance of home rule is that it enables us to regain control of the education of our children.

Mission Statement

Learning in our schools is rooted in the values, history and language of the Iñupiat. Students develop the academic and cultural skills and knowledge to be:

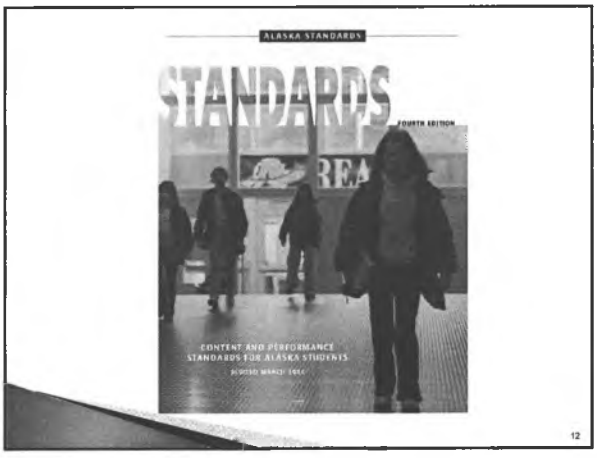
- Critical and creative thinkers able to adapt in a changing environment and world;
- Active, responsible, contributing members of their communities; and
- Confident, healthy young adults, able to envision, plan and take control of their destiny.

Strategic Priorities and District Goals

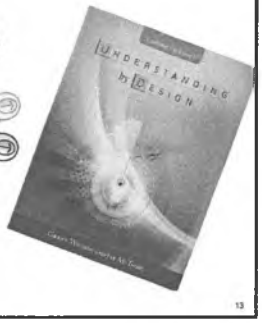
Strategic Plan 2010-2015

Instructional Focus

All students will reach their intellectual potential and achieve academic success through integrating Iñupiaq knowledge systems into the core content areas.



Iñupiaq Learning Framework & Understanding by Design



13

Process

- Board approved framework
- Secured budget for effort through budget process
- Principals recommended veteran, highly skilled core content area teachers
- Created teams representing every school site and every grade level
- Met with leadership Curriculum Development Team to plan for May throughout the year
- "District-wide" inservices led by site teams

14

Essential Questions

- How will we honor Iñupiaq values, history, culture, and language while developing academic knowledge and skills?
- How will we prepare students for success in their chosen life pursuits?
- How will healthy confident young adults contribute to their communities?

15

Iñupiaq Education Initiative

- Build trust between school and community
- Acknowledge historical trauma associated with schools and schooling
- What are community expectations of school?

16

Iøiññiaånikun Apqusiuqtit

- What knowledge needs to be acquired to truly live as a healthy Iñupiaq?
- What does a well-educated, well-grounded 18 year-old Iñupiaq look like?

17

Iøiññiaånikun Apqusiuqtit

- Comprised of ten members from across the North Slope of Alaska
- Four day-long gatherings during 2009-2010 school year
- Continuing support and guidance as we move ahead

18

Iñupiaq Learning Framework

Rebuilding our educational system according to inua-our philosophi history, language and interconnectedness with all living things.

19

Environmental Realm

20

Environmental Realm Core Themes

- Food Preparation and Care
- Hunting and Survival
- Sewing
- Tools
- Medicines and Healing
- Environment

21

Community Realm

22

Historical Realm

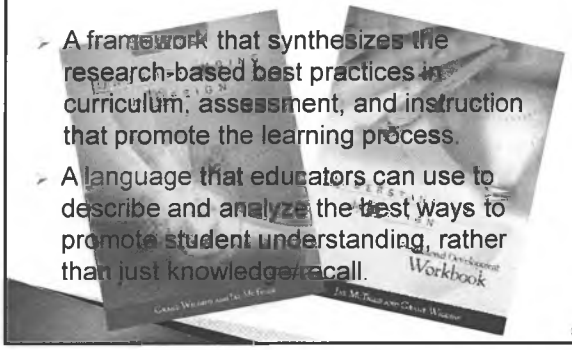
23

Individual Realm

24

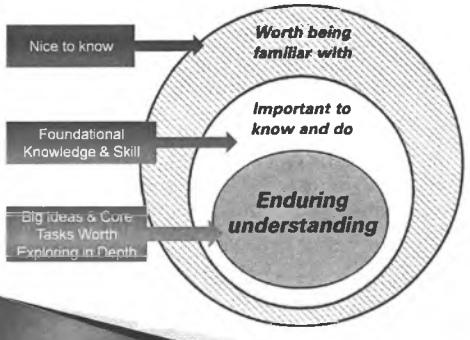
What is Understanding by Design (UbD)?

- A framework that synthesizes the research-based best practices in curriculum, assessment, and instruction that promote the learning process.
- A language that educators can use to describe and analyze the best ways to promote student understanding, rather than just knowledge/recall.



25

40-40-40



26

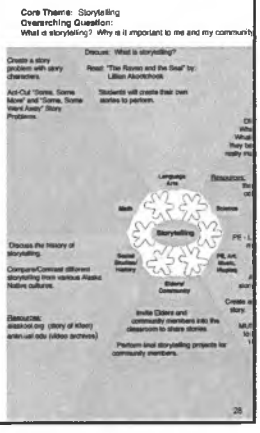
Sample Enduring Understandings

- **Storytelling**
  - Stories reveal the ways in which cultures perceive their creation, origin and history and how the world and all in it is interpreted.
  - Stories enhance the development of socialization strategies.

27

Transitioning

- Things We've Been Working On
  - Snowflake exercise: developing activities corresponding to Core Themes from the ILF and identifying which state Grade Level Expecations are met through those activities



28

Algebra II Comprehensive Assessment

[ILF Core Themes: Food Preparation & Care/ Celebrations & Ceremonies/ Values & Beliefs]

Student Directions:

- As you have learned throughout your high school mathematics studies, Galileo Galilei was a famous scientist who made many contributions in the areas of astronomy and physics.
- One of his most important discoveries was **vertical motion- when an object is dropped or falls, the distance it travels is a function of the time squared. Any object thrown, launched, or shot upward can be modeled by the equation:**

$$s = -\frac{1}{2}at^2 + v_0t + s_0$$

$$s = -\frac{1}{2}at^2 + v_0t + s_0$$

- We can use this equation to model the path of a person during Nalukataq where **"a" is the acceleration from gravity, "v_0" is the initial velocity of the person, "s_0" is the initial distance above the ground, and "s" is the height of the person after "t" seconds.**

- For instance, a person being tossed has an initial velocity of approximately 41 feet per second. The acceleration due to gravity is 32 feet per second squared and the initial height of the person above the ground is 3 feet. Use the given information to write an equation to model the height of the person being tossed in relation to time.
- Answer: $s = -16t^2 + 41t + 3$

Tasks

Answer the following questions using complete sentences and show your work to justify your solution.

- Question 1
  - How high will the person be after 1 second?
  - How high will the person be after 2 seconds?
  - How high will the person be after 10 seconds?
- Question 2
  - At what time(s) will the jumper be on the blanket (3 feet above the ground)?
  - 15 feet above the ground?

- Question 3
  - Do all of your answers from questions 1 and 2 make sense in the context of this situation? Why or Why not?

Tasks (cont.)

- During this scenario the jumper was initially traveling at a velocity of 41 feet per second. What conditions might affect the velocity of the jumper?

Summary & Next Steps

- Current Areas
  - Math, science, and language arts concepts and State Standards are being aligned to the Iñupiaq Learning Framework.
- Academic Work Next Step
  - Development of comprehensive course assessments in which students demonstrate their learning using Understanding by Design.
- Community Feedback
  - Resume Iḷiaññiagnikun Apqusiuqtit work
  - Solicit public input and feedback across the North Slope

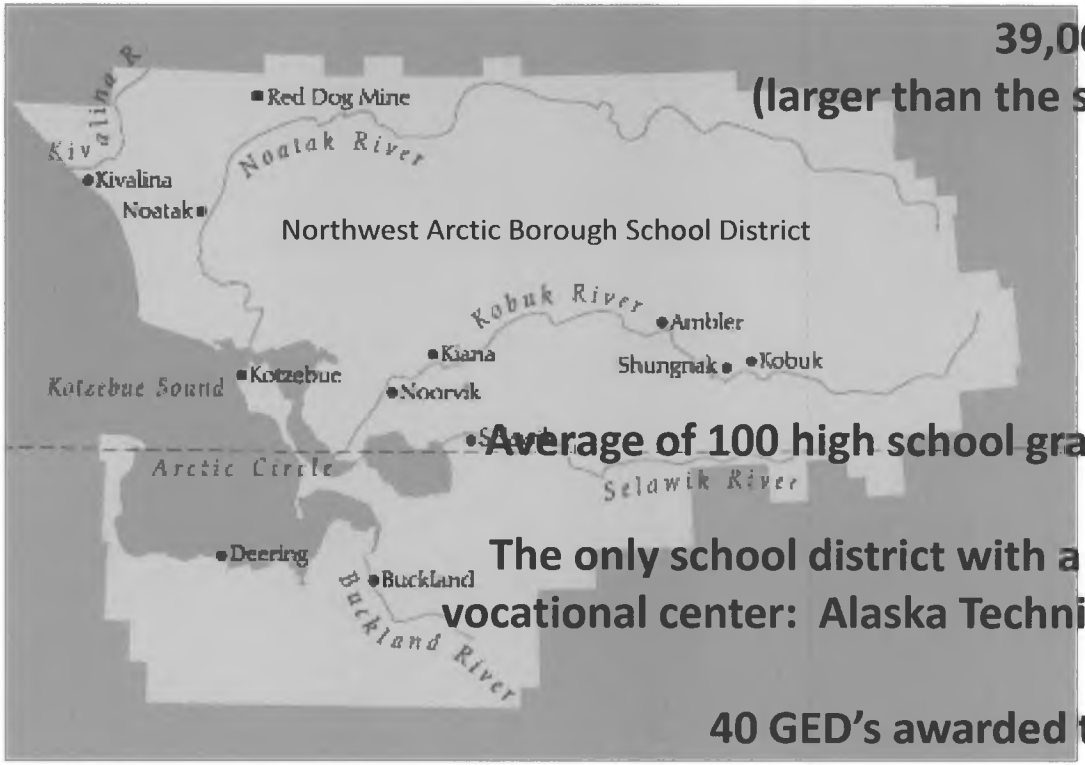
Selawik	239
Shungnak	62
Total	**1778**

From 2006 to the present, NWABSD has 274 fewer students. This represents a loss of several millions of dollars in revenues.

Student Population is 95% Alaska Native & 88% Free and Reduced Lunch

Northwest Arctic Borough School District facts:



39,000 Square Miles
(larger than the state of Indiana)

410 Employees
•190 Certified
•220 Classified

Average of 100 high school graduates per year 74%

The only school district with a post-secondary vocational center: Alaska Technical Center (ATC)

40 GED's awarded through the ATC

12 Schools in 11 villages
The 11th largest District in Alaska
Annual operations budget of about $55 million

Northwest Arctic Borough School District
Vision and Mission

Mission

To graduate students with the skills and knowledge to be good citizens.

Vision

To be a leader in Pre-K-14 education based on student achievement and graduation rates.

Five Strategic Goals of our 2010 – 2015 Strategic Plan

NWABSD STRATEGY MAP

February 2010

STRATEGIC GOAL 1 *Student Learning*

DEVELOP STUDENT VISION/OWNERSHIP
- Support Student-Centered Learning Environments

STRATEGIC GOAL 2 *Stakeholder Satisfaction*

STAKEHOLDER SATISFACTION
- Connect Parents With Their Local Schools

STRENGTHEN PARTNERSHIPS
- Increase Advisory School Committee Engagement

STRATEGIC GOAL 3 *Employee Development*

SUPPORT STAFF AND DEVELOP A QUALITY WORKFORCE
- Assist New Employees In Adjusting Successfuly To School And Community

STRATEGIC GOAL 4 *Support Systems*

IMPROVE DISTRICT COMMUNICATION
- Build And Operate A District Intranet Syetem

ASSURE QUALITY PROGRAMS AND PROCESSES
- Develop And Implement A Continuous Improvement Process

STRATEGIC GOAL 5 *Fiscal Responsibility*

DEVELOP BUDGET ALIGNMENT AND ACCOUNTABILITY
- Develop Budget Transparency
- Align Resources With Strategic Plan

Northwest Arctic Borough School District

2010 Alaska School Board of the Year!

In November, 2010, the Northwest Arctic Borough School Board was honored by the Alaska Association of School Boards as the *Alaska School Board of the Year*

Northwest Arctic Quality Improvements Made

- All instruction to follow Alaska state instructional standards
- Northwest Arctic high quality curriculum, standardized, in all 12 schools
- One district-wide school calendar
- High quality inservice training for all teachers
- Standardized high school schedules to facilitate distance delivery classes

Academic Achievement

According to a recent article in ***Education Week***, only 1% of schools or districts having been placed under intervention status, have been released from that intervention. NW Arctic has accomplish what only 1% of other such districts have!

In 2003, 36% of our students were proficient in language arts, by 2008 that percentage had risen to 51%. During the same time frame on the same assessment, our math scores have risen from 32% to 51%.

This represents a 42% growth in language arts and a 59% growth in math.

Teamwork

Northwest Arctic Borough School District

Originally in 2006, NW Arctic was one of 5 school districts placed under Intervention by the Department of Education.

Last August we received a letter from Deputy Commissioner, Les Morse, releasing NW Arctic from Intervention Status! Below is the opening and closing of that letter.

August 2, 2010

Dr. Norman Eck, Superintendent
Northwest Arctic Borough School District
PO Box 51
Kotzebue, AK 99752

Dear Dr. Norman Eck:

This letter has two purposes. First, I wish to confirm the conversation we had this morning to inform you and congratulate you on Northwest Arctic Borough School District being removed from intervention status. We share with you your stated enthusiasm for this action. Second, I want to begin discussions with

Again, congratulations on the efforts of you and your staff to improve instructional practices in Northwest Arctic School District.

Sincerely,

Les Morse

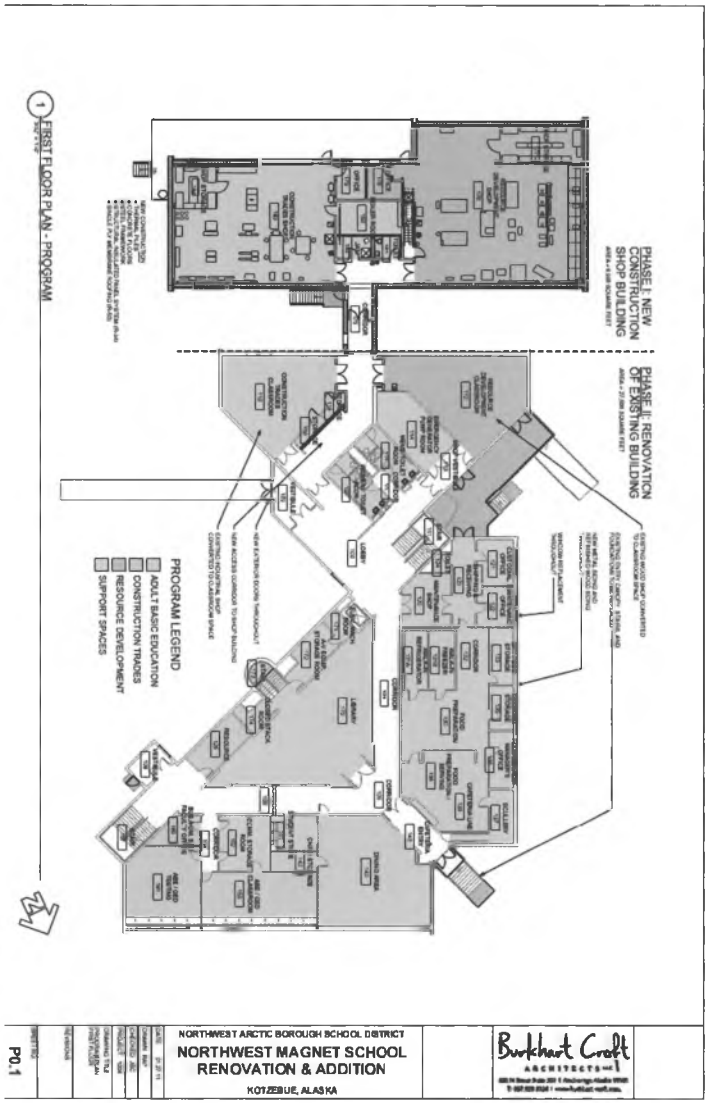
Expanding Horizons



With the help of a $1.5 million 3-year grant from the US Office of Education, NW Arctic began its pilot program for the *Star of the Northwest Magnet School.*

- **Small Regional boarding high school with a 75 – 100 bed dorm**
- **Grades 11 – 14**
- **3 areas of Emphasis (Legacy Careers for people of NW Arctic):**
  - **Public School Teaching**
  - **Health Careers to Registered Nursing**
  - **Process Technology (Mining and Petroleum)**

Funding from the Alaska Legislature is bringing the program into reality.

Kotzebue Middle High School Earns Academic Honors
US News and World Report - 2009

According to the *US News and World* report of July 12, 2009, Kotzebue High School was listed as one of the "Top 12" high schools in Alaska.

Schools were evaluated on the performance of all students, even the least advantaged. The schools were ranked by student achievement levels in the core subject areas of reading and math on state accountability tests that exceed statistical expectation given their levels of student poverty.

Re: District Overview

The District theme of Petersburg City School District for the 2009/2010 school year was "**Rekindle The Spirit**". Our primary goal last year was to revisit the reason schools exist: To provide a safe and creative environment where students learn and where they are our number one priority. A second goal, related to staff, was to thoroughly enjoy what we are doing and to know that we are making a positive difference in the lives of young people.

The District theme for the 2010/2011 school year is "**Fan the Flame**". As a district, we have successfully Rekindled The Spirit. We are now committed to keeping that fire alive and growing.

I am pleased to have the opportunity to share with you, in the short time available on Friday morning, some of the "facts" about Petersburg City School District and our educational program.

Accompanying this cover is a one-page district overview and some pertinent district "fast facts".

Superintendent: Dr. Robert Thomason

Board Chair: Ms. Jean Ellis

Petersburg City School District is located on Mitkof Island, in the southeast panhandle of Alaska, approximately 700 miles north of Seattle. The community is largely of Norwegian decent and this is reflected in the foods, culture and building facades of the community. The Alaskan nickname for the community of Petersburg is "Little Norway". The school district serves approximately 466 (2011/2012 estimate) students in grades kindergarten through twelve. The district currently employs 46 licensed staff and 47 support staff.

The City of Petersburg has been recognized as one of the top ranking ports in the United States for quantity and value of fish landed. Commercial fishing is key to the economy of the area. In addition to the permanent 3,000 residents, the population increases by about 1,000 additional people who are employed by the canneries and custom packing services during peak fishing season. Tourism also plays an important economic role during the summer months.

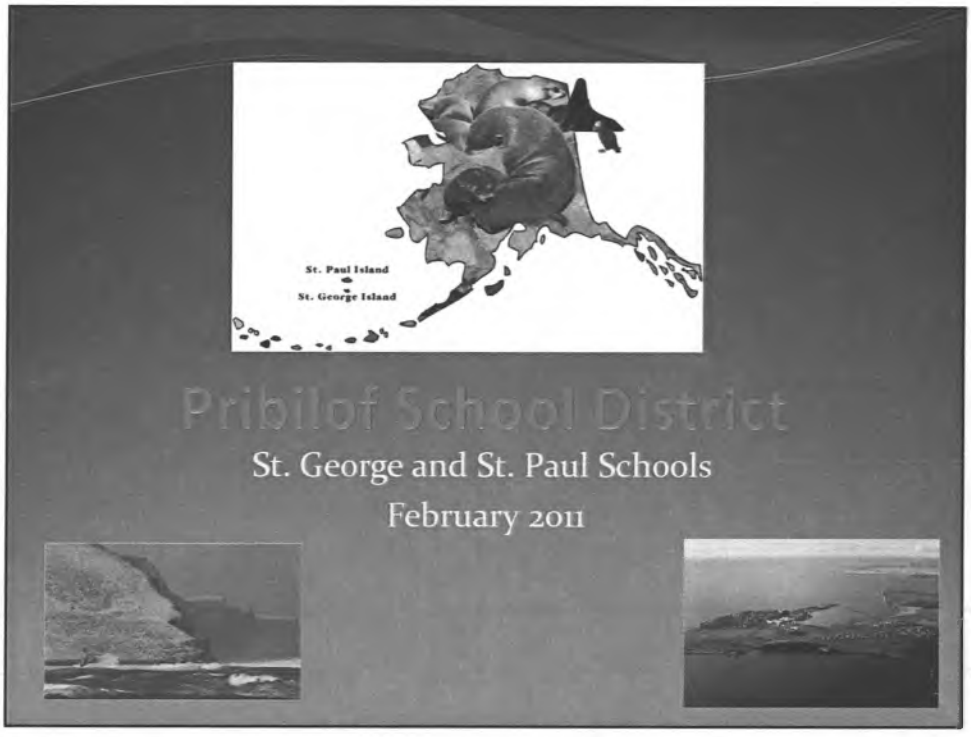
Mild winters, cool summers and year-round rainfall characterize Petersburg's climate. Annual precipitation averages 106.3 inches. Transportation to and from Petersburg is limited to air and water; there is no road access. Residents and visitors rely on the state ferry system, commercial flights and float planes.

Petersburg City School District enjoys very strong community support. This is demonstrated by community attendance at and participation in school events (sports, plays, music performances, conferences, special meetings), support and passage of two local bond issues in recent years, radio and newspaper coverage for student achievement and district activities, and consistently strong donations to school fund-raising.

Petersburg High School was recognized by US News and World Report as a Silver Medal School in 2010. The high school also recently received an exemplary program award from Apple computer. This award was given to only 40 schools in the nation this year. Petersburg High School is the only high school in Alaska to receive the award.

PETERSBURG CITY SCHOOL DISTRICT "FAST FACTS"

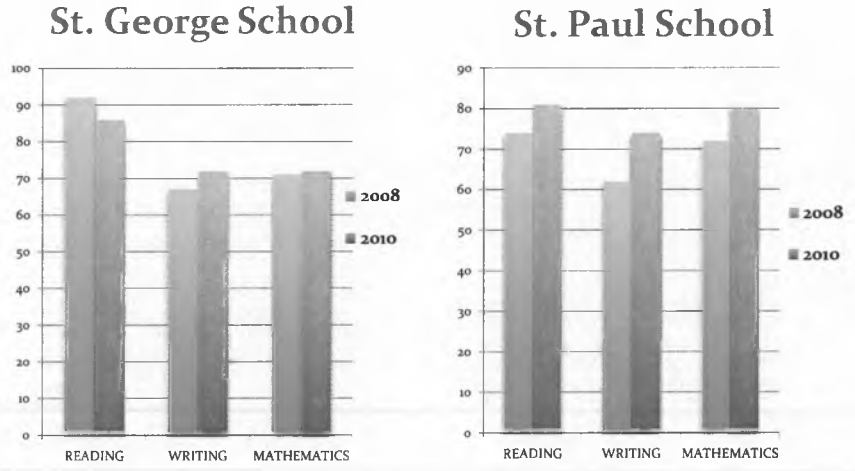
Number of students (2011/2012 projected)	466
District Area	46 sq. miles
Community Population	3000
Free/Reduced Lunch Rate	51.6%
2010 Graduation Rate	87.5
2010 Attendance Rate	93
2009/2010 District Met "AYP"?	Yes
2009/2010 All Schools Met "AYP"? (Adequate Yearly Progress)	Yes
Average Per Pupil Expenditure (2009/2010 Total Budget [***all*** Funds]/Total # Students)	$15,945
Average Teacher Salary (2010/2011)	$60,937
2010 Teacher Maximum Salary	$76,777
2010 Teacher Minimum Salary	$42,199



Many Positives

- **100% highly qualified staff**
- **97% Aleut student population**
- **Continued to meet AYP in 2009-2010**
- **Culturally responsive teaching**
- **Fiscally sound**
- **Overall great staff and families**
- **Supportive parents, community and school board**

2010 Academic Progress



Community Partnerships

- **Preschool Programs in both schools**
  - **St. Paul Montessori Preschool (2-5 yrs.) – funded by Central Bering Sea Fisherman's Association (CBSFA)**
  - **St. Paul HeadStart – Aleutian Pribilof Islands Association (APIA)**
  - **St. George Preschool – funded by St. George Traditional Council**
- **$120,000 raised for student activities in 2010**
- **St. Paul Tribal Government – building elder relationships with AASB grant**

State Grants and Programs

- Library Grants – St. Paul and St. George
- Artist in Schools Grant
- CDL Grant – computers for students and staff development
- UAA AEIN Partnership – staff development
- AASB staff & student training to promote social emotional learning.

- Carpentry Grant -- Denali Commission –
- UAF Future Educators Grant – UAF
- Housing Grant/Denali commission - $400,000 matching grant to renovate older teacher housing units
- E2T2 Grant—$92,000 for staff development and technology purchases

Federal Grants and Programs

- St. George roof repair – $2.4 m
- Education Law funds - $24,000
- E-Rate funds 90% of communication telephone, Internet & video
- Carl Perkins – funding for vocational programs
- Indian Education –Bilingual Program

Staff: Our Greatest Resource

- 40% of teachers with Master's
- Dedicated
- Enjoy working with kids
- Technologically savvy
- Involved with students activities
- Low staff/teacher turnover – many 10+ years in Pribilofs
- Clean, well maintained school buildings

Serious Concerns

- **Declining Student Enrollment**
  - FY09 enrollment – 110; FY10 – 98, an 11% decrease from FY09
  - FY11 projected enrollment – 86, a 12% decrease from FY10
  - Hold Harmless funding sustains budgets
  - St. George School has only 11 students currently enrolled
- **St. Paul School Building Concerns**

  Gymnasium must be remodeled because it is becoming a safety issue for students.

Effects of Declining Enrollment

- Relying on Hold Harmless funding from the state to maintain current budget
- Fewer opportunities for students

- Fewer staff members means everyone must wear more hats and accomplish more with less
- Possible future closure of St. George school

2010-2011 Focus Areas

- Work to meet the goals of the new Strategic Plan
- Continue to work to improve student achievement
- Continue to improve school climate
- Continue professional development in technology
- Continue data analysis for individualized instruction
- Continue to base instruction on state standards
- Improve parent and community involvement
- Continue to build strong community collaborations
- Teachers and district will work together to reach agreement on a new 3-year contract
- Remodel St. Paul Gymnasium

The final Parent Teacher Conferences of the 2010-2011 school year will be held on Saturday, February 26. Contact Mrs. Brenda with questions about schedules.

Happy Valentine's Day!

Valentine's Day was celebrated at St. Paul School on Friday, February 11, 2011. The High School Basketball Team sponsored the entire Carnival this year which included Fish and Roast Beef Pie sales in the kitchen. Parents, teachers and students worked the booths at the event, served food and sold tickets. The cake walk was a usual favorite, as was the bouncy house and basketball shoot. Ms. Rodgers offered a cake decorating class the night before the Carnival for those interested in baking cakes for the cake walk. Over $2500 was raised at the Carnival for the ball team! Thanks to everyone who supported the Sea Parrots by attending and spending money at the event. Enjoy the pictures below!

Plant Science Class Grows Veggies

Ms. Rodgers' Plant Science Class will soon have fresh vegetables! The 10th grade students in this class have been working on a small greenhouse project using hydrophonics and LED lighting. They are using the LED lighting because it has been found to use approximately 90% less energy. They will be conducting experiments with lighting and temperature to grow cucumbers, basil, lettuce, peppers and tomatoes. Ukuda Wa will have more updates on this project as it develops.

Marine Science Students to Showcase Learning in Seattle

The Pribilof Marine Science Camp students (St. Paul & St. George) have received an invitation to present at the International ESSAS Open Science Conference in Seattle, WA, May 22-26. In their presentation, they will share about their learning's over the past four years in Marine Science Camp. They will showcase their "place based" science curriculum, king crab research and more. Mrs. Stacks noted that, "This is a huge honor for our students to be presenting in an international venue."

5 Ways To Be Happier In The New Year

1. Look forward, not backward. If you've had a setback or hit an unexpected bump in the road, stay positive and ask yourself what you can do to move ahead. Optimism will also rub off on your family, friends and colleagues.

2. Set realistic goals. Acknowledge that you are better at some things than others and focus on your strengths. When you've completed an important project give yourself credit and enjoy the satisfaction of crossing it off your list.

3. Seek help when you need it. Balancing a career or school with taking care of chores, children or parents is too much responsibility for just one person.

4. Find practical ways to simplify your life. Buy clothes that don't need to be ironed or dry-cleaned. Do all your errands and shopping in one day. Instead of trying to remember everything, write things down. Keep a single calendar for work and personal commitments.

5. Start a new project, take up a new hobby, or give yourself permission to do something you've always wanted to try.

Source: NEA Alaska Health Letter

Sea Parrot Basketball 2011

The High School Basketball team has played 3 games so far this season against a team made up of staff members and local players. The games took place on January 21, 28 and February 4. The Sea Parrots won the first two games handily, and fell short in the third game after a fierce battle in overtime. Each night, the staff helped to organize and sell hot dogs, nachos, spaghetti and desserts to help the team raise enough money to travel to the Regional Tournament.

Although they may be small in numbers (they only have 6 players on the team), they make up for it in hard work and talent. This year's team includes: Cara Lestenkof-Mandregan, Senior (captain), Jonathan Merculieff, Sophomore (co-captain), Dimitri Dino Zacharof Jr., Sophomore (co-captain), and Shawn Hanson, Feofaneya Rukovishnikoff and Taylor Kauffman all in the 8th grade. Since the team only has six players, Coach Baldwin asked some 6th and 7th grade students, Dallas Roberts, Ermogen Merculief, James Simeonoff, and Andronika Emanoff to practice with the team. The team will be playing games every Friday night until the end of the season. They will travel to New Stuyahok, Alaska to compete in the Regional Tournament on February 25. Stats from the three home games played to date are shown here:

January 21 game:
Shawn Hanson—33 points
Dino Zacharof—14 points
Jonathan Merculieff—6 points
Cara Mandregan—4 points
Dallas Roberts—5 points

January 28 game:
Dallas Roberts—25 points
Dino Zacharof—19 points
Shawn Hanson—15 points
Jonathan Merculieff—15 points
Ermogen Merculief—4 points

February 4 game:
Dino Zacharof—29 points
Shawn Hanson—15 points
Jonathan Merculieff—12 points
Cara Mandregan—4 points
Dallas Roberts—3 points
Faneya Rukovishnikoff—2 points
Taylor Kauffman—2 points

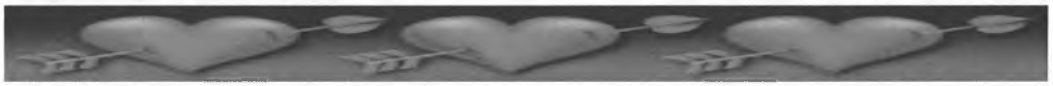
Student Council Sponsors Family Fun Night

Family Fun Night was held on Friday, February 4, after the high school basketball game in the gym. It was also sponsored by the High School Basketball Team, and the Student Council. Members of this year's Student Council, advised by Mrs. Ferrari, sold goodies and beverages in the lobby, while games and dances were played in the gym. Timothy Melovidov and Grace Rukovishnikoff operated the sound system and Taylor Kauffman was master of ceremonies. Taylor did an excellent job leading the games and dance activities, and everyone had a great time! The money raised from the event was all donated to the basketball team. A few pictures of the many parents and students at the event are shown below:

Spelling Bee & Community Meeting

The February School Family Community Partnership Meeting was held Tuesday, February 8, 2011 @ 6:30 p.m. in the library. The meeting began with the Spelling Bee participants competing for the 2011 St. Paul School Spelling Bee Championship. Eight students competed in the event: Naomi Edenshaw, Savannah Stacks, Teresa Baker, Andronika Emanoff, Kiana Melovidov, Sasha Isaac Courtney Lestenkof, and Clara Chapman. In the end, Naomi and Savannah were left standing and eventually Naomi was crowned the winner!

Those who stayed after the Bee for the Partnership Meeting discussed several topics. 1) The Artist in Residence will be at St. Paul School late February through early March. He is a professional book maker and will be working with students to design and illustrate books. 2) David Merculieff gave a condensed KUHB report. He is one of the seventh grade students who is working at the radio station each day during school. He and his classmates are recording the Postcard and other announcements daily, and they will soon be interviewing teachers and other community members. Mrs. Stacks reminded the students who were present, that KUHB continues to encourage students to work at the station in the evenings. Students can earn$10 per hour for up to ten hours per week. 3) The Summer Science Camp will be offered again this year during the month of August on St. Paul. St. George students will also attend. It will be held in conjunction with the 100 Year Celebration of the Fur Seal Treaty. Aquilina's planning the summer camp activities and it will once again be funded by APICDA and CBSFA. Mrs. Stacks informed the group that summer camp participants have been invited to present at the PICES International Science Conference in Seattle during May. This is a huge honor that will require a great deal of planning and commitment on behalf of the students. More information will be made available soon about this opportunity. 4)Terra Nova Testing is taking place this week and will continue through Friday for students in grades 1, 2, 5 & 7. 5) Aquilina is actively planning Bering Sea Days that will take place April. 6) Taughney Rukovishnikoff is currently working on a summer food service program through Americorp. She explained how this process will work, and it will likely take place this summer. She also discussed her hopes for starting a Girl Scouts group and plans for other youth activities. 7) Ms. Rodgers presented the district Technology Plan and those attending were given an opportunity to suggest changes/modifications. 8) Mrs. Stacks informed everyone that the district has offered a job to John Holcomb for the 2011-2012 school year. Mr. Holcomb will be SPED director, teach high school science and will eventually replace Mrs. Stacks as K-12 Principal. Nine adults and 3 students stayed for the meeting.



Kayumixtakuchan (Young Warriors)

Cara Lestenkof-Mandregan, Dallas Roberts, and Selena Rukovishnikoff traveled to Anchorage the week of February 8 for the Alaska Tobacco Advocacy Initiative Conference. The conferences began on Friday, and ended Saturday evening. The purpose of this trip was to get together with other groups, across Alaska, that are involved in the initiative, and to share what types of things they've been doing in their community to prevent tobacco use. Also at the conferences, the students discussed different ways to approach people about tobacco, such as Guerilla Marketing. The objective of Guerrilla Marketing is to create a unique, engaging, and thought-provoking concept to generate 'buzz', and consequently turn viral. Cara said, "I had tons of fun, it was a great opportunity to meet other people who have the same opinions and goals as myself. I learned a lot about other communities and their issues with tobacco; for example, last week, in New Stuyahok, Alaska, they caught a child in kindergarten chewing snuff, that's really bad. Hopefully we can use what we learned out there, in our community." The students plan to share the techniques and information they learned with their peers.

Exciting Activities In Elementary

The elementary classes have had several engaging activities going on this semester in addition to their normal classroom academics. Mr. Baldwin's kindergarten and first grade class recently put on their chef's hats and whipped up a Shape Salad. The students looked for triangles, circles, cylinders, etc. as they sliced the many fruits and one vegetable (celery). They also explored how the salad fixings could be cut in halves or quarters. After enjoying their salads, the students wrote a paragraph about the experience. This was a fun and tasty math/writing activity. Thanks to Debbie Barner for bringing in the fruits and vegetables and helping with the activity.

Mrs. Kauffman's class is enjoying a Flat Stanley exchange with students from Heights Elementary School in Sharon, Massachusetts. The second grade students in Sharon, a suburb of Boston, will soon be receiving the Flat Stanleys made by Mrs. Kauffman's 2nd & 3rd grade students. The Flat Stanleys from Massachusetts have already arrived here and the students have taken them for a tour of some of their favorite places on the island. Both classes will post pictures and write about their experiences. The students will also be able to ask each other questions on the shared Wiki for this activity. You can watch the progress by checking flatstanleyexchange2.wikispaces.com.

Deb Vanasse, an author of books for children, teens, and adults, has visited with our K-8 students via video conference. These students have read many of her books and have had the opportunity to learn more about the author, where she gets her ideas, and her writing process. Deb has enriched the reading experience for our students, and there will be more opportunities to interact with her. On February 18, Deb will meet online with students in grades 7-12 who have just finished her book, A Distant Enemy. Also. a date is being set for a SKYPE visit with the students on St. George. After many online visits, Deb plans to travel to St. Paul Island for a teacher Inservice in April and students will have an opportunity to meet her during her brief visit.

Author speaks about her book.

Casper and Maxim with Flat Stanley.

Jaycee with her clay boat like the one in the book.

Miron enjoys the delicious "Shape Salad" created by his class.

Students Learn From Visiting Superior Court Judge

The Honorable Beverly Cutler volunteered her time at St. Paul School in January. Judge Cutler was presiding over a case on St. Paul and graciously agreed to work with students in the school when she was not in court. She visited several of the classrooms and met with students to discuss the in's and out's of a courtroom. Students were divided into defense and prosecution teams and "argued" cases that were based upon actual past court cases in Alaska.

Judge Cutler explained many of the rules and terms that are often used in a courtroom and took questions from the audience. She encouraged interested students to apply for the ***Color of Justice*** program that will take place in Anchorage during June 22-24.

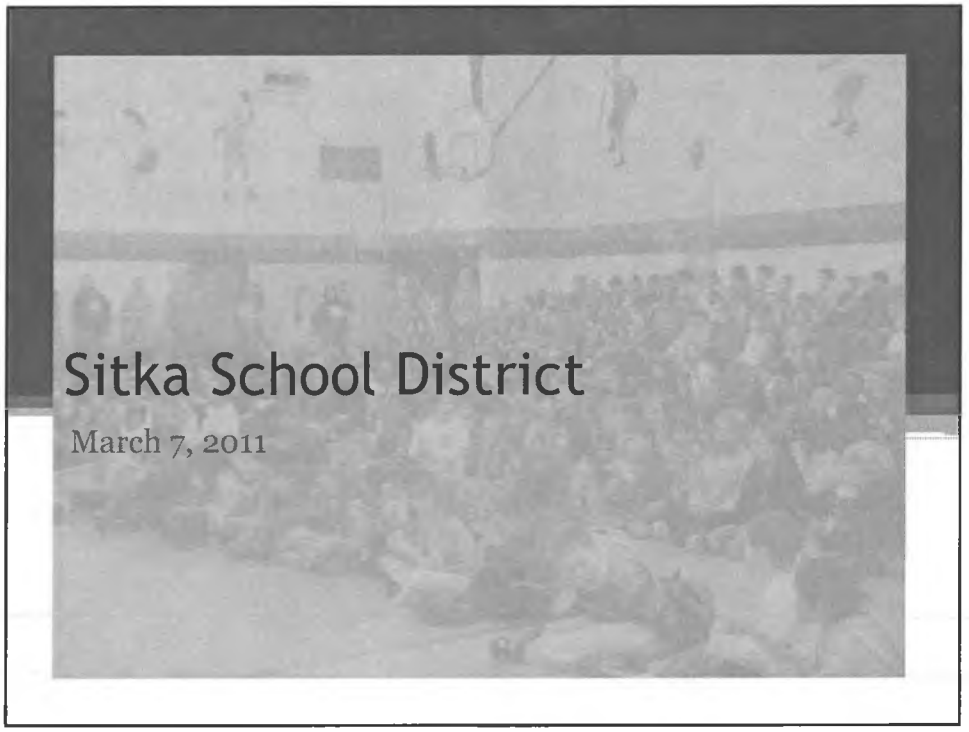
The ***Color of Justice*** program brings diverse high school and college students from across the state together for exciting workshops and activities designed to encourage them to consider legal and judicial careers.

Interested students are encouraged to visit www.courts.alaska.gov or see Mrs. Kushin for more information. St. Paul students and staff would like to thank Judge Cutler for taking the time to visit our school.

Students Continue Work In SEL

The week of January 17, Anne Caulfield, a counselor with the Association of Alaska School Boards (AASB), visited St. Paul School. Anne worked the entire week with students in grades 6-12 on team building and social and emotional learning (SEL). Anne is a life-long educator and is tremendously gifted when it comes to relating to students. She spent many hours talking to students about their personal and academic concerns and questions. Everyone shared stories and participated in activities that encouraged tolerance, acceptance and respect.

The Pribilof School District has been a partner with AASB for many years. The focus over the past few years has been around social and emotional learning and culturally responsive teaching. Anne will continue to work with students and staff in these areas, and plans are being made for a culminating activity to take place during Pribilof Days in May. Thank you, Anne! Photos of the time spent with Anne are shown here:



Sitka School District Enrollment

- 1306 students enrolled including Home School
  - 52.2 % White
  - 21.1% Alaska Native
  - 9.1% Asian
  - 8.2% American Indian
  - 4.2% Hispanic
  - 4.0% 2 or More races
  - 1.1% Black
  - 0.2% Pacific Islander

Dear Representative Dick:

Enclosed is the 2010-2011 Superintendent's Annual Report to the Board of Education and the Kenai Peninsula community. The report outlines some of last year's achievements made by our staff, district, and students. We continue to be proud of our accomplishments and positive direction of the District. As always, please feel free to contact me with questions.

Sincerely,

Steve Atwater, Ph.D.

Welcome to the Kenai Peninsula Borough School District

Message from the Superintendent

We are pleased to present KPBSD's 2010-11 Annual Report. This publication is our opportunity to step back and review last year's accomplishments and highlights, celebrate our areas of excellence including students, staff and graduates, and share what we are planning for our new school year.

Our challenge to meet the learning needs of all our students is at the heart of what we do. Each school day more than 1,200 dedicated employees work hard to meet this challenge. Although you will see that we are making good progress and that most of our students are doing well, we recognize that more work needs to be done to help every student have success at school. We must do all that we can to ensure that a student's ethnicity, disability, language proficiency or economic status does not predict his or her academic performance. As a way to do this, we are more critical of our instruction, driven by our need to prepare our students for the world of tomorrow.

As we strive to expand our culture of continuous improvement, we work to sustain our effective partnerships that include strong family and community involvement. Together we can help our students take another step toward graduation.

I am honored to serve as KPBSD's superintendent and look forward to working with you in the coming year to do all that we can to make our students' experience at school as successful as it can be.

— **Dr. Steve Atwater, Superintendent**

Strategic Goals Update

Last year, the District focused improvement efforts on two goals: increase student achievement though collaboration and increase student engagement through effective instructional practices. I am pleased to report that we made progress toward meeting each of these.

Our staff now devotes more time to sharing and analyzing their teaching strategies and, in turn, making improvements to better meet the learning needs of our students. We are also doing more to integrate technology into instruction and are more critically determining when a student is proficient in mastering the taught concept.

When you look at the country's highest performing school districts, you find that they avoid the temptation to endlessly chase the latest education discovery or newest program and instead, relentlessly pursue just a few improvement targets. This year, we will follow this approach by again focusing on collaboration and effective instruction.

We are convinced that by building our internal capacity we will be able to help our students move up the learning continuum. We took this year's first step of improvement in June when teams of principals and teachers met to analyze last year's assessment results.

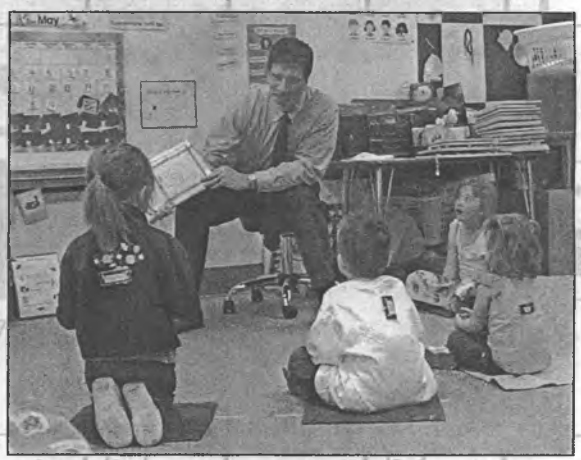
The teams identified areas of weakness and began planning how to address these deficits. A comprehensive report of our assessment results will be released to the School Board in September as part of the annual Assessment Report.

2010-2011 District Goals

Kenai Peninsula Borough School District

❑ **KPBSD will...** increase student achievement by being responsive to individual student needs through structured collaborative practices districtwide with our richly diverse communities.

❑ **KPBSD will...** increase student engagement by implementing quality instructional practices with embedded, 21st-century skills districtwide.



Sen. Lisa Murkowski meets with the Kenai Peninsula Borough School District Board of Education.

Board President Message

As we move into the new school year, it is important, of course, to look back on where we have been. However, this year it is the intention of the board to look forward to where we would like to be. We are always mindful of the enormous responsibility placed upon us every time a family sends their child to our neighborhood schools. We must also be willing to identify and adapt to the changes that are occurring all around us on a daily basis. During the course of this new year the School Board and the District will be attempting to define and redefine what we consider to be the essence of a successful student — and, by extension, a successful district. We look forward to this very focused effort as well as to another successful year in KPBSD schools.

Kenai Peninsula Borough School District Board of Education Goals 2011-12

The Board will...

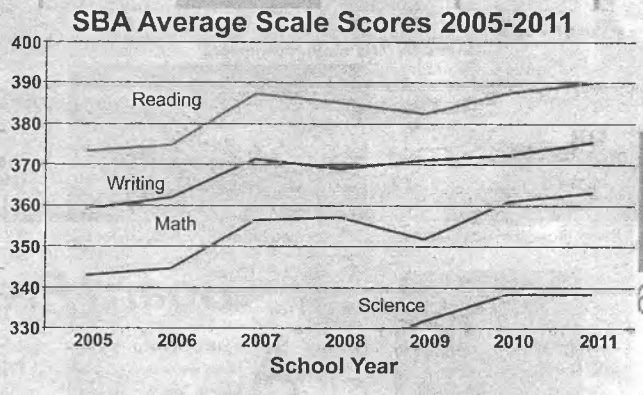
- ❑ ... support the 2011-12 District Goals.
- ❑ ... review and revise Board Policy 0210, Goals for Student Learning, by December 2011.
- ❑ ... work with the district administration to implement recommendations of the curriculum management audit.
- ❑ ... continue to work with the Kenai Peninsula Borough Assembly to develop a long-term funding process to guide the local contribution to the school district.
- ❑ ... support and participate in the District Communication Strategic Plan.

High achievement of students

Quest programs

The KPBSD philosophy supports a gifted program that provides alternatives for students dependent on their grade level, academic achievement, potential and social/emotional needs. The focus of all services is to help students grow and fulfill their potential with the goal of finding ways to support and advance a student's learning by providing appropriate daily challenges and experiences.

❑ **Mind-A-Mazes 2010** was held at Soldotna Middle School on Oct. 9. Sponsored by the KPBSD Quest Program and coordinated by Gail Moore, this problem-solving competition was attended by more than 200 students and coaches from schools all over KPBSD. Student teams demonstrated their solutions to two problems. Students designed and constructed a device using simple machines to meet the challenge posed in the Long-Term Problem. The Spontaneous Problem required on-the-spot planning and teamwork to design and build the tallest structure, using playing cards and paperclips that would support the greatest number of coins.

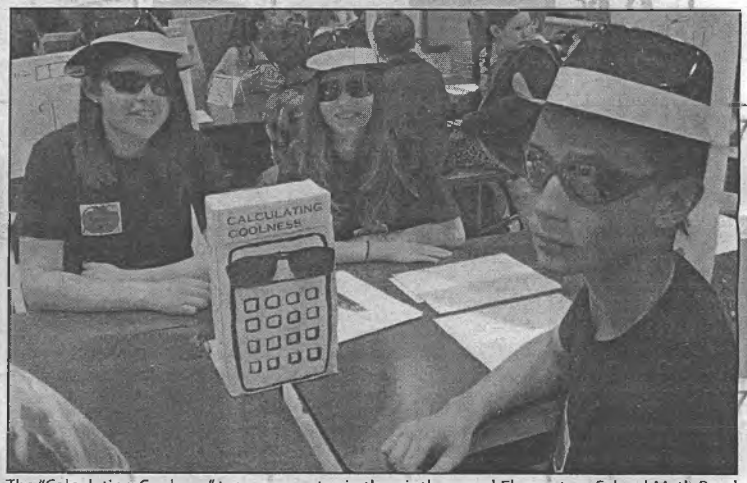


❑ **The 2010/2011 Future Problem Solving competition** included challenges of scenario writing, community problem solving, individual problem solving and team problem solving. The Future Problem Solving program is coordinated by Sara Hepner, the program regional director and a retired KPBSD Quest teacher. The State Bowl took place in Soldotna and included 10 teams from KPBSD, as well as many out-of-district teams. KPBSD Junior and Intermediate teams that won first place are going with their parents or coach to compete in the International FPS Conference in La Crosse, Wisc.

Adding up to fun

❑ **The sixth annual KPBSD Middle School Math Meet** offered a challenging math experience to 84 students from 10 District schools April 1 at Homer Middle. The math meet, based on the national Math Counts competition format, was coordinated by Sara Reinert, math professor at Kenai Peninsula College's Kachemak Bay campus, and Suzanne Haines of Homer Middle School.

❑ **The ninth annual Elementary School Math Bowl,** coordinated by Agusta Lind, took place May 5 at Seward Elementary School. Thirty-three teams of four to five students each, in grades three to six, tested their skills. The math bowl consists of three components: Math skills — problems that require a strong knowledge of basic math; team problems — multi-step word problems; and a lightning round. An honorary adult team, the Golden Numbers, consisting of Superintendent Dr. Steve Atwater and School Board members Bill Holt and Lynn Hohl also competed.



The "Calculating Coolness" team competes in the ninth annual Elementary School Math Bowl on May 5 at Seward Elementary School.

Kenai Peninsula Native Youth Leaders

Sixteen 10th- and 11th-grade students from across KPBSD were selected to begin the development of the Kenai Peninsula Native Youth Leaders (KPNYL) program during the 2010-11 school year. The focus of the council is developing leadership skills, providing for community service and establishing contacts with other youth across the state.

The group was tasked with the development of their vision statement, bylaws, constitution and goals, as well as election of leadership. They gathered four times during the school year and were involved in a number of leadership activities. By attending Close-Up in Juneau, they had the opportunity to meet with leaders of the Kenai Peninsula Borough, as well as members of the Alaska Legislature, Gov. Sean Parnell and the leadership of the Alaska Federation of Natives.

KPBSD Native Youth Leaders students meet with Speaker of the House Mike Chenault, R-Nikiski, during a Close-Up trip to Juneau

KPNYL members presented to the Title VII Parent Advisory Group, the KPBSD Board of Education and created a recruiting presentation that will be used at the beginning of the 2011-12 school year to encourage more KPBSD Native youth to join the council.

Five members will be involved in leadership opportunities during the summer, including a leadership institute at the University of Alaska Fairbanks and Close-Up in Washington, D.C.

In 2011-12 KPNYL plans to kick off the year with a membership drive. Council members will visit KPBSD schools to meet with students interested in becoming a part of this leadership group.

Schools score points in state sports

Baseball

State Championships

Soldotna High — tied for seventh place

Basketball

Class 4A girls state tournament

Soldotna High — tied for seventh, Academic Award (3.74 GPA)

Class 3A girls state tournament

Seward — fifth place, Academic Award (3.79 GPA)

Class 3A boys state tournament

Seward — fourth place

Class 2A girls state tournament

Seldovia — sixth place

Cross-Country Running

1-2-3A state girls championship

Seward High — second place

1-2-3A state boys championship

Seward High — second place

Miles Knotek, Seward, fourth place

Brett Chase, Seward, sixth place

Football

Small-schools championship

Soldotna High — champion, Academic Award (2.91 GPA)

Kenai Central High — runner-up

Homer High — tied for third, Sportsmanship Award

Nordic Skiing

State skiing

Bree Mucha, Soldotna, 10th-place, 7.5-kilometer classic

Brett Chase, Seward, second Class 2-3A skiers

MacKenzie Barnwell, Seward, second, Class 2-3A classic skiers; third, Class 2-3A freestyle skiers

Soccer

Girls state championships

Soldotna High — tied for seventh

Softball

Small-school state championship

Homer High — runner-up, Academic Award (3.46 GPA)

Soldotna High — fourth place

Swimming

State swimming and diving championships

Kenai Central High women — Academic Award (3.91)

Ryan O'Leary, Seward, men's outstanding swimmer; first place 50-yard freestyle; and first place 100-yard freestyle

Winter Heaven, Kenai, first place 200-yard freestyle; and first place 100-yard butterfly

Track and Field

Class 4A girls state championships

Kenai Central High — Academic Award (3.89 GPA)

Class 4A Boys State Championships

Tyler Spalding, Kenai, high jump champion, triple jump champion, discus champion

Class 1-2-3A Boys State Championships

Seward High — first place

Seward High — 1,600 relay and 3,200 relay champion

Austin Gillespie, Seward, 400-meter dash champion

Andrew Buchanan, Seward, 300-meter hurdles

Class 1-2-3A Girls State Championships

Tessa Adelmann, Seward, shot put champion

Volleyball

3A championships

Seward High School — fifth place, Academic Award (3.63)

Wrestling

Class 1-2-3A state tournament

Nikiski — second place

Voznesenka — Sportsmanship Award

Joe Martishev, Voznesenka, 140-pound champion

Kaden Spurgeon, Nikiski, 145-pound champion

Class 4A state tournament

Hope Steffensen, Kenai, 103-pound champion

Auston Tennis, Soldotna, 145-pound champion

Mitch Wyatt, Homer, 171-pound champion

KPBSD students shine

Hannah Watkins

❑ **Hannah Watkins,** a 2007 Kenai Central High School graduate, has been selected as a 2011-12 Fulbright Scholar providing the opportunity to study, teach and conduct research abroad. She is one of only 35 scholars selected from a national pool of 700 applicants.

Hannah attends the University of Rochester, majoring in biomedical engineering with minors in biology and chemical engineering. She will study at the Institute of Biomedical Engineering at Imperial College in London, and will continue her research focus on delivery methods of chemotherapy.

❑ **National Merit Semifinalists*** — KPBSD had three students qualify as semifinalists in the 56th annual National Merit Scholarship Program for 2011: Alder Fletcher, senior at Homer High School; Ari Bennett, senior at Nikiski High School; and Angela Ramponi, senior at Soldotna High School.

❑ **AP Scholar Awards*** — Ten KPBSD students earned 2010 AP Scholar Awards, from the College Board's Advanced Placement program. About 18 percent of the 1.8 million students worldwide who took AP Exams performed at a sufficiently high level to also earn an AP Scholar Award.

❑ **AP Scholar with Distinction Award*** (scored at least 3.5 on a five-point scale on all AP exams): William McDermid, Soldotna High; and Jason Baird, Homer High.

**(Names reported from 2010-11 school year)*

❑ **AP Scholar with Honor Award** (scored at least 3.25 on all AP exams) — Alexander Kauffman, Soldotna High; Mark Walsworth, Homer High; and Tyler Wentz, Homer High.

❑ **AP Scholar Award** (scored at least 3 on all AP exams): Jenna Jensen, Soldotna High; Angela Ramponi, SoHi; Jasmine Woodland, So Hi; Benjamin Blue, Homer High; and Corinne Ogle, Homer High.

Meeting student needs

Curriculum Management Plan

KPBSD has begun work on a comprehensive Curriculum Management Plan that provides the structure to ensure quality control of the curriculum and instructional process. The plan will help KPBSD obtain the educational and economic benefits of a coordinated and focused program for students, both to enhance learning, which is complex and multi-year in its dimensions, and to employ economies of scale where applicable. It will also provide a strong directional focus for instruction to facilitate the design, delivery and assessment of the curriculum.

We have policies in place that guide development, selection and adoption of major instructional materials. Future policies will provide guidelines for implementing, evaluating and revising the District's written curriculum for all content areas of instruction. Our work will also create the expectation and the context for well-articulated curriculum documents that contain aligned assessments to provide equity of instruction across the District.

The Curriculum Management Plan conveys the intent of the School Board and District leadership that guides the development, scope, alignment and evaluation of the written curriculum in all subject areas. The plan will link the budgeting process and outlines cyclical curriculum examination to assure students matriculate through the educational system prepared, upon graduation, to meet varied life roles.

Response to Intervention

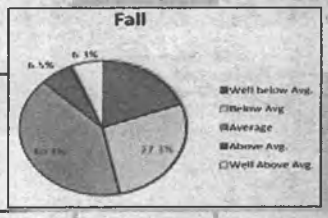
KPBSD uses the Response to Intervention (RTI) model to identify students of greatest need in specific academic areas. RTI is the practice of team review of student achievement data to identify needs for researched-based interventions that are implemented during the school day. This provides additional time and specific support for students to catch up academically in the identified area of need.

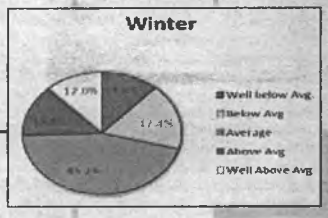
Frequent progress monitoring allows the team to reevaluate data and make decisions about focused changes to the supports provided, and to monitor success. The time and support needed for each student is adjusted based on student progress and targeted to meet the academic deficit. Maximum learning occurs when student deficits are specifically addressed. Many of our schools employ an interventionist who facilitates academic interventions and progress monitoring. Results show students are catching up.

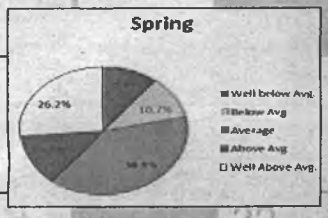
Catching problems and addressing them early helps advance student success.

2010/2011 math computation data from Aimsweb

Note: The target changes each period. Students must make annual growth plus catch-up growth for sections to change.







Technology impact

With KPBSD's recent efforts to provide additional technology equipment to all schools also comes an increased emphasis on active student learning. Within the past two years, KPBSD has placed 374 SMART Boards and added 617 new computers in classrooms, bringing the total computers in the District to about 6,800.

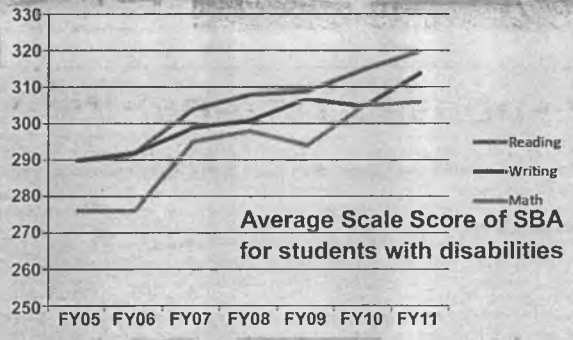
The additional technology has resulted in teachers having the ability to prepare lessons based on real-time current facts, resources and news, as well as tools to integrate resources, such as visual media, into daily learning experiences. These tools also support student interaction and control over their own learning as they team with their teachers in exploring supplemental resources that are available to support the District-approved textbooks and materials.

Professional development is an integral component of implementing any new technology. KPBSD strives to ensure that teachers understand the scope of the technological tools and the importance of establishing time to explore learning with their students, rather than using that valuable time to plan teacher-driven lessons.

Special Education

The KPBSD Pupil Services Department believes that all students will reach their individual potential to be productive, life-long learners, who possess strong social skills and are healthy members of our community. KPBSD Pupil Services provides a solid educational experience to all pre-kindergarten through 12th-grade students needing specialized services in our 44 schools. We are committed to using evidence-based instructional practices and programs for all students in need of academic intervention.

Yearly, students with disabilities in KPBSD continue to make strong gains on the state standard-based assessments and rank at or near the top among all school districts in Alaska. We believe in developing strong partnerships with our families and community organizations in order to achieve positive student outcomes.



Portraits of our personnel

MaryLynn Barnwell, fifth grade, Seward El

As MaryLynn Barnwell knows, the standards of good teaching can be applied anywhere — in Seward, Bristol Bay, Venezuela or the Caribbean. Yet for Barnwell, one of those standards is all about the specific location you're teaching in.

Barnwell is integrating the iTREC! (Iditarod Trail in Every Classroom) place-based service-learning program into her fifth-grade classroom at Seward Elementary.

"The important part is taking what's in your local environment and using it as a basis of instruction for your students and taking it a step farther, utilizing all your community partners and giving back to them in some real, meaningful way," Barnwell said. "And I totally believe in that. Kids can relate to their environment because they live there, and then you take it to being productive in the community, so that's really powerful."

Two years ago Barnwell's class toured around Seward, studying the environment to choose an area they could help enhance and protect. They chose Scheffler Creek, a salmon stream running from Mt. Marathon Bowl toward the boat harbor and along the original Iditarod Trail. Except the stream didn't have many salmon in, so the class set about learning why.

"Once a month we walk over and collect water-quality samples. We also do observations and pictures and pick up garbage and keep it clean," Barnwell said. "They really, really like being outside. They really like being involved and taken seriously. I think any one of my students could tell you what good water quality is and what's supposed to be in a salmon stream and what shouldn't be. The most powerful point is they're learning how to contribute to society. They're really being part of a bigger thing that they feel very strongly about."

Barnwell certainly knows about bigger pictures in education. She's done adult nutritional education while working with social services in the Aleutian and Pribilof islands; she and her husband, Robert, taught for four years in Venezuela; followed by a year of home schooling their three daughters while traveling the Caribbean on a sailboat. In 2005 they moved back to Alaska for jobs at Seward Elementary, with Barnwell teaching fifth grade and her husband teaching sixth.

She especially likes teaching kids to learn about their local community and environment. With iTREC!, there's no end to that lesson.

"I've got that project mapped out for the next 10 years," Barnwell said.

Wally Hufford, speech pathologist, Nikiski North Star El.

Reading, writing, math, science — those are all important platforms of education from which students launch into learning. But with students facing hurdles in communication, it can be a stumbling block keeping them from reaching the levels of achievement they otherwise could.

That's where Wally Hufford comes in. As a speech pathologist, Hufford helps students address challenges with communication early on, so they can set off on a lifelong trajectory of success.

"I just love it when kids get the sound they've been working on for months. It all of a sudden comes to them, they can tell they're doing it correctly now and you can tell they feel so great about it," Hufford said. "That's something a student will take with them for the rest of their life, and it's something I helped them with, so I like that."

Hufford just finished his 25th year as a speech language pathologist for KPBSD, having worked at Tyonek, Nikiski Elementary, North Star Elementary, Nikiski Middle-High School and Kenai Middle schools. Currently he's at Nikiski North Star Elementary. He grew up in Wyoming and Montana and got a master's degree in speech pathology.

"I kind of knew right at that time that this was for me. I thought that it was a good way to help people live better lives, which is important to me," Hufford said. "Communication is vital to our happiness as human beings. The better we are at it, the happier we are, I think."

Hufford came to work for KPBSD after graduate school and got hooked on Alaska. He met his wife, Elizabeth, who retired from teaching two years ago. They have two daughters, Laura, who is entering ninth grade at Nikiski Middle-High School, and Emily, who is entering third grade at Nikiski North Star.

Hufford said it's his goal to do more than just his job, and he finds many ways to contribute to the culture of his schools, like leading various clubs, such as fly-tying, snowshoeing and bird watching. At Nikiski North Star he helped implement the Character Counts program.

"You become a real part of the building and community where you work and live and what not. To that end I've tried to do a lot of different things over the years in addition to my regular job," he said.

Debbie Tressler, head secretary, K-Beach El

Debbie Tressler's position as head secretary at Kalifornsky Beach Elementary School may not change from year to year, but her job is never the same.

"The most rewarding thing — and I know it's cliché — is the kids, because your job is never boring. Everybody has things about their job that are so mundane, that you do over and over, but with kids they always change, and you're always learning. The kids are always showing you something you didn't know," she said.

The tradition of "Friday hugs" has become a special high point in her week, where Bill Vedders brings his third-grade class to the office to visit.

"That is really cool. One little girl this year told me, 'You're like everybody's mom.' You can't replace that kind of stuff. And that was just this year. I have 19 years of this. I can't imagine not working around children," she said.

Each year holds new lessons. One she learned long ago is to never pigeonhole kids, because they have endless capacity for growth and surprises.

"When you watch a kid come into kindergarten and just cannot behave. Then you see him in fifth grade and he has become this intelligent, well-behaved, fun, maybe a little eccentric kind of kid, and you like to see him every day. To see them grow, that's pretty good stuff," she said.

Seeing the future unfold and adapting to it is one of the interesting challenges of the job, but Tressler aims to preserve a perspective on the past, as well. Tressler grew up in the Kasilof area and graduated from Kenai Central High School, moving to the central Kenai Peninsula here when she was 9. She moved back after a few years of college with her husband, and was drawn to work in the school District, since her mother had worked there for years before.

She got certified as a substitute secretary in the early 1980s. Her first several years with KPBSD involved being a substitute secretary at KCHS, in central office and at the warehouse. In 1992 she hired on as a part-time secretary at K-Beach and moved up to the head secretary position in the mid-1990s.

"I just think that a lot of us get focused on the negative sometime, because there's so much negative out there, but I want people to know good things are happening. We have great kids. There are really neat kids in school, and they're going to be neat adults. Positive things are going to happen in the world. If we could all focus on that a little, I think we'll all feel a little better," she said.

Matt Walton, English, SoHi

The day Matt Walton stops learning is the day he'll stop teaching. After 16 years teaching English at Soldotna High School, it's clear that retirement will get him before a lack of learning ever does.

"I always find myself learning new things, and my greatest instructors have been my students," he said.

Though his first year teaching, in Phoenix, Ariz., in some respects was his most memorable, his time in Soldotna has been his most enriching. After college in New Mexico and a year teaching in Arizona, he and his wife, Patricia, knew they wanted to get back to Alaska — Walton grew up in Anchorage — to raise their son, Ryan, now a commissioned lieutenant in the Air Force, and daughter, Sarah, a student currently on the dean's list at Kenai Peninsula College. He got a job at Soldotna High School in 1995.

Walton likes a challenge, both to himself and his students. None of his freshmen or sophomores can pass the first semester of his class without first earning a 90 percent on a specific grammar test.

"I've never had a student not pass — eventually. They might say a D is passing. Not in my book. You set that bar high and they'll achieve to that bar. If you set it low, they'll aim for low and they'll settle for low. So raise the bar and they'll get there," Walton said.

His particular forte is teaching students with disabilities or who have struggled in academics for one reason or another.

"As a teacher, you learn there's nothing you can't teach, and there are no students who can't be taught. You just have to find a way that works for them. In turn, though, I have to admit that these amazing kids have taught me even more: perseverance, courage, and creativity in both teaching and learning," Walton said.

He's created extensive web pages and online tutorials that students, parents and other teachers can access anytime they need extra help or a new way to look at information. Technology makes that type of replication possible — it literally puts both teaching and learning at everyone's fingertips.

"You're building something and adding to it and revising it and you're constantly asking yourself, 'How can I make this better?' I think the day I quit asking myself that question is the day I say, 'I'm done,'" Walton said.

Anisia White, bilingual tutor, Voznesenka School

Anisia White, a bilingual tutor at Voznesenka School, knows what it's like to have to relearn your native language while learning a new one.

Coming from an Old Believer family, her first language was Russian. But as part of the exodus of Old Believers from Russia seeking a new home, she was born in China, had moved to Australia when she was 1 year old, to New Zealand by age 4 and to Brazil when she was 12.

"We, the kids, barely spoke Russian by then, even though our parents tried really hard to teach us our native language at home," White said.

She was 18 when her family moved to Oregon. When she was 21, in 1979, she got a job at a kindergarten home school, which provided an opportunity to get her GED. She's been working in schools ever since, though it was part time while her five kids were in school. She's been at Voznesenka School since just after it opened, having moved with her family to the Old Believer village on the southern Kenai Peninsula 20 years ago. Her husband, Stan White, retired from teaching at Voznesenka School, and one of their sons, Essaia, is moving into his dads' teaching position.

"I like working with the kids, and I see the need for it," she said. "It's changing now. In the past, at home they mostly spoke Russian and they'd come to school and they'd be confused learning English. But now they come from homes where they speak more English, but the thing is they're picking up the English language kind of from siblings, from watching TV or radio, and when they're speaking it they don't learn it the way they should. When they're talking in the schools sometimes it seems like they've understood everything, but when you really start talking to them in their own language, you realize how much they have actually missed."

White is a proponent of culturally diverse students having a solid start in Russian — or whatever their native language — as well as learning English in school.

"I find that when the kids are stronger in their native language, when they start to learn the second language, that comes to them much easier," she said. "They build a foundation on something solid. Everything on top is easier."

Graduating to new horizons

Coty Beck

Football took Coty Beck away from Seward; family brought him home, and now he's considering where in Alaska he'll touch down next.

Born in Minnesota, Beck grew up in Seward, graduating from Seward High in 2006 after being active in basketball, wrestling, soccer and football. He wanted to play college ball and attended Valley City State University in North Dakota, bouncing around a bit before he settled into a major.

"Initially I actually went into fisheries and wildlife. I took the first class and all they talked about was ducks and geese and I got kind of bored. I was more into the fisheries part," Beck said.

Next he tried business classes.

"Punching numbers wasn't my best thing, I didn't find it too interesting," he said.

Then he tried education — his mother, Angela Hammer, has been a teacher for more than 20 years. He graduated in 2010 with a degree in elementary education and a minor in physical education. Then it was home to Seward, where he hoped to find a job, but knew he'd find his family and the landscape he loved.

"I missed Alaska. Out in North Dakota I saw flat mland," he said.

In Seward, Beck and his girlfriend, Jean Garcia, ve plenty of family to help raise their new baby, nden Beck. Most of her aunts, uncles and cousins e in the area, as do Beck's mom, Angela Hammer, stepfather, John Grimes, and Beck's brother, Dylan ck (Seward class of 2009), who is completing a inary arts degree from AVTEC. Beck and Garcia ew each other from elementary school. She moved, they reconnected when she came back to Seward summer after she graduated high school in 2006.

Beck was hoping for a teaching position in KPBSD, but hasn't yet landed one.

Coty Beck, Jean Garcia and Landen Beck.

"I applied to most of positions here on the peninsula, but my first year right out of college, it's tough. There were 89 applicants for the position in Seward. That gives you a little bit of a picture of how hard it is," he said.

Beck recently landed a job as the recreation coordinator for the Mountain Haven senior citizens center. It's a good opportunity to use his skills and he's looking forward to the job, he said. Garcia will graduate college in December with a teaching degree. In the future the two hope to find positions as a teaching couple. Beck would like to end up working with primary grades.

"I like to see the progress that they make. You see someone who's at a certain level and you bring them up to where they should be at, and even beyond that. I think, with the younger kids, you can see the progression even more," he said.

Whitney Schollenberg

Whitney Schollenberg's life since graduating from Nanilchik School in 2003 is inextricably intertwined with an array of friends and family, which is fitting, considering how important personal ties are in her life.

"I am definitely a small-town girl. We call Anchorage a big city. Growing up in a small town, having the community feel and really having your family here, not everybody has that, with grandparents, aunts, uncles, cousins and everybody here. We had the opportunity here to do a lot of things that not many families get to do. We basically spend half our lives on the beach (her dad is a fisherman). That's something you don't get everywhere."

Schollenberg, daughter of Dan and Jamie Leman and sister of Tasha Boin (Nanilchik Class of 2000) and Krista Leman (Nanilchik Class of 2007), was a prominent basketball player at Nanilchik School, and went on to play for the Seawolves at University of Alaska Anchorage.

She transferred to Eastern Oregon University with her boyfriend since high school, and now husband, Jason Schollenberg (Nanilchik Class of 2004). A big draw was continuing her Nanilchik basketball roots, playing with her cousin Amanda Matson (Nanilchik Class of 2004).

An injury her senior year kept her off the court, but she was involved in sports in other ways. Since college she's been an assistant high school basketball coach, played city league basketball and softball and hopes to coach again.

"Sports have always been a big part of my life. It there's one thing that's going to be part of my life forever, it's sports in some way shape or form. And family," she said.

All three graduated from EOU in 2008, with Schollenberg obtaining a bachelor's degree in media arts with a minor in business. T

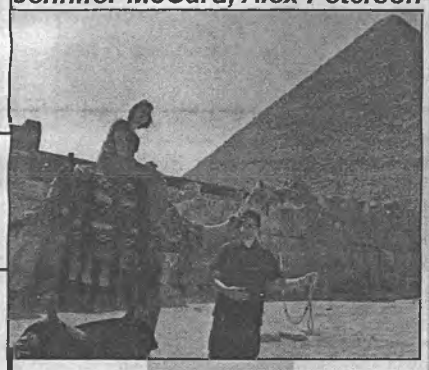
he Schollenbergs moved to Anchorage, where Jason is a surveyor with Edge, and Whitney works for the CIRI Foundation as a program assistant, helping students navigate the scholarship process. She can certainly relate.

"It's all about the work you put into it. Going to college doesn't just plop into somebody's lap. If you want to go to college or vocational school, there're resources out there to help you. If you want to go, you need to go do it, make it happen," she said.

The Schollenbergs would like to move back to Nanilchik to be closer to family one day, especially when they have their own additions to the clan.

"I really think that you need to make the most of where you are because sometimes, being from a small town, it has its perks and it has its downfalls. You need to decide which way you're going to go with it. You need to make the most of it," she said.

Jennifer McCard, Alex Peterson



Attending the University of Southern California in Los Angeles was a significant culture shock for Alex Peterson and Jennifer McCard, having grown up in Soldotna. After that, the jump to life abroad for this married couple was not such an intimidating leap.

Peterson graduated from Soldotna High School in 2003, and McCard in 2001, and both attended USC. Peterson graduated in 2005 with a degree in international relations and a minor in business, and McCard in 2006 with a degree in environmental studies and a minor in international relations. The couple returned to Soldotna, finding positions mirroring their interests. Peterson worked in the information technology department at KPBSD, and McCard was a watershed scientist for the Kenai Watershed Forum.

Although people from Outside may consider Alaska an exotic locale, these two wanted to put their international studies to use somewhere new to them. Peterson accepted a position with the U.S. Foreign Service in Kigali, Rwanda. He is an information management specialist for the U.S. State Department inside the U.S. Embassy in Rwanda, where he supports classified and unclassified communications, including radio, phone, mail and computers. By working at a small post, Peterson has been able to participate in projects to promote U.S. exports to Rwanda and serve as the resident telecommunications policy officer.

McCard is the deputy operating officer at Manna Energy Limited, an international business that develops sustainable technologies to improve environmental and public health conditions for impoverished communities around the world. She works mostly from home, managing day-to-day operations of the company's Rwanda office, including financial matters, liaising with U.S.-based management and public relations. She said she enjoys working on projects like utilizing solar energy to purify drinking water and designing efficient cook stoves because it allows her to mitigate the impacts of climate change while simultaneously improving the quality of life for Rwandans.

They have been in Rwanda for about two years and the experience has not failed to expand their horizons.

"Our house is on a typical African dirt road featuring a steep driveway that's luckily ice free year-round. Rwanda has nearly perfect weather all year," McCard said.

In October, the couple will transfer to Brasilia, Brazil.

"This career path fits us well because of our love to travel," McCard said. "We both had teachers during our KPBSD academic studies that encouraged us to push our boundaries and follow our passions."

Katie Bauer

Out of everything Katie Bauer learned in high school — a science and math background, and emergency medical technician experience, for example — she gained a work ethic that is even more applicable.

Bauer graduated from Homer Flex School in 2007. She brought a self-directed work ethic to her secondary schooling developed from being home schooled for most of her education, by her parents Adam and PJ Bauer, of Homer. She attempted Homer High School and realized it wasn't a good fit for her, and gravitated to the most personalized opportunities of the standards-based Flex program.

"I think Flex is a great school. If you are the kind of person who knows you want to go to college, Flex will definitely help you achieve that," Bauer said.

Graduating at the top of her class, she qualified for the University of Alaska Scholars program and used it to further her training in the health care field.

Photo courtesy of McKibben Jackinsky, Homer News

"I became a volunteer EMT in Homer when I was 17. It was a way of volunteering in the community," she said.

She split her schooling between Kenai Peninsula College Kachemak Bay Campus and the University of Alaska Fairbanks, and graduated as valedictorian of KBC in 2011 with an associate of arts degree and an associate of applied science degree in paramedicine.

In checking out advanced-track nursing programs across the country, where she can take her clinical hours from her paramedic degree and apply it to a nursing degree, Florida had immediate appeal.

She plans to spend the next two years obtaining a bachelor's degree in nursing while her husband, Daniel Turner, who graduated from Homer High School and from the University of Alaska with an associate of applied science degree in municipal fire control, works as a firefighter. Long-term, Bauer would like to become a neonatal intensive care nurse and expects that she and her husband will end up back in Alaska.

For now, though, she's excited to getting the most out of their time in Florida. "I'm looking forward to living next to Walt Disney World," she said.

Central to the Community

Partners in growth

The primary purpose of school buildings in the Kenai Peninsula Borough School District is to facilitate the education of the youth of the peninsula, but that is far from the only purpose they serve.

The buildings have a much broader life, enhancing the quality of life and functionality of the communities in which they are located. Through partnerships with governments, nonprofit organizations, churches, businesses, public safety agencies and other entities, school facilities are utilized for gatherings, recreational activities, community education, trainings and workshops, arts and cultural events, and even as Red Cross-designated shelters in case of emergencies.

Especially in smaller towns, schools can be among the most centralized, heavily used buildings in a community. Often they are the only facilities large enough to accommodate communitywide events and gatherings — such as festivals, concerts, meetings or even funerals. Schools also can be the only facilities outfitted with specialized equipment or technology — like swimming pools, theaters, computer labs and basketball courts. As such, community members, even without any kids in their lives, still feel a sense of connection and ownership in their local schools.

Rugby is one of many activities offered by Soldotna Community Schools at Soldotna Middle School.

Community Schools

Soldotna Community Schools and Homer Community Recreation are thriving education and activity programs that offer much-needed enrichment and learning opportunities. The Soldotna program is over 30 years old and holds 60 to 70 classes each winter and spring session in arts and crafts, sports, conditioning and other physical activities, technology, fishing, cooking and about anything else community members would want to learn or teach.

It's run through the city of Soldotna, but simply would not exist as extensively as it does without the use of KPBSD facilities, said Carmen Triana, program director.

"Without the schools, it would definitely mean the program wouldn't look at all like this," she said.

Most programs are held at Soldotna Middle School, with others at Skyview and Soldotna high schools.

"We use everything, from the gym to the home economics room, the computer lab, the library. One of the coolest things about using a school is you've got these great buildings that have these really specialized rooms. To be able to open a building like that up to the community is huge. You can have a community computer class and actually have a computer for each student to use," Triana said. "The partnership makes it possible for us to develop a lot higher quality of a program with a lot lower funds necessary. What I'm really passionate about is about how cool it is that we can use a building like that and have the whole community benefit."

In Homer, the community recreation program offers over 120 programs a year, with over 3,000 participants and over 80 volunteers putting in over 2,300 hours of volunteer service. Most programs are recreational, held at Homer High or Homer Middle Schools. Of the 3,038 participants in 2010, 1,292 were youth, said Mike Illg, program coordinator.

"In Homer, we don't have a teen center. We don't have a recreation center. There's a history of the high school as a community center where so many things are happening, which is why we have a lot of support and a lot of participation," Illg said.

"Not every single School District student participates in school activities or sports or teams, so we offer casual recreation opportunities. And we all know the benefits of why we need to keep our youth active and healthy and busy, so we have been filling a need for over 35 years that this program has been around."

Ninilchik Pool

In the central Kenai Peninsula, a portion of Ninilchik School unites all ages of the surrounding area.

"If the pool weren't open there would be an outcry," said Ginny Johnson, pool manager. "We're just open for anybody who wants to come in. In the winter it's boring around here so, we have lots swimmers coming in."

Her regulars are "the mafia," as they call themselves — a group of senior citizen ladies who come in for regular exercise sessions, with water aerobics taught by a 92-year-old instructor.

"She tells me, 'That's the only thing that keeps me alive.' I have to get to work and keep the pool open — Maxine will die," Johnson joked.

The Ninilchik Traditional Council sponsors a preschool swim program and free, after-school swim once a week that is always packed. It's used by Alaska State Troopers for water-rescue trainings and by SCUBA divers working on their licenses. Babies are baptized in the pool, home-school students use it for physical education, and all Ninilchik School students are well-versed in swimming skills and water safety, including kayaking and canoeing classes, and a junior high marine tech class where students practice wearing survival suits and practicing what to do if they're on a sinking boat.

"A lot of kids and adults around here fish in the summer," Johnson said. "The pool is the hub of our community."

Kasilof Public Library

Residents of Kasilof, Clam Gulch, Ninilchik and points south looking for a good book to take home or the newest issue of a magazine to flip through may take it for granted that they'll have to drive to Kenai or Soldotna to find a library to suit their needs.

They'd do well to check that assumption, and check out the Kasilof Public Library.

"Some people don't know we're here, but we're trying to change that," said librarian Katja Wolfe.

Located inside Tustumena Elementary School, the Kasilof Public Library boasts a collection of books, magazines, graphic novels and audio books in a variety of genres.

With the exception of a few campgrounds in summer, the Kasilof Public Library is also the local area's only source of public wireless Internet access.

"We're getting more and more people coming in just to use the Internet, either our Wi-Fi, or one of the three public computers. We're also hoping to have a few more computers for people to use," she said.

The library hosts monthly classes, events and community meetings. It also participates in the inter-library loan program, so even if it doesn't have a title, Wolfe can get it upon request for free. Though serving the educational needs of the school is the first priority, keeping up with the community is a close second. Dozens of new titles are added monthly.

"Some are purchased by request. I purchase some that are on various best-seller lists, and I read several reviews. I have a pretty good idea of what people here like," she said.

KPBSD makes good sense

Economic impact

A new study assessing the economic significance of the Kenai Peninsula Borough School District on the Kenai Peninsula Borough has found that KPBSD adds up to a sizable effect on the borough economy. Findings indicate that for each School District job, 0.43 jobs are created in the borough through indirect and induced economic activity. The study also determined that for every dollar of School District payroll, 30 cents of additional payroll is created in the borough.

The Institute of Social and Economic Research (ISER) of the University of Alaska Anchorage (UAA) conducted the study, based on an Alaska-specific input/output model created by Dr. Scott Goldsmith of ISER and using data from the fiscal year 2010 budget. Kim Pitney, of the Office of Undergraduate Research and Scholarship at UAA, created a poster of the findings, which is available through KPBSD for anyone interested in more information.

Programmatic Staffing

Programmatic Staffing was implemented starting in fiscal year 2009, after the Alaska Legislature enacted changes to the funding formula to better support education and help address funding inequities affecting KPBSD and other school districts. Rather than adjust only the pupil/teacher ratio, KPBSD created targeted programs that were implemented with the expectation they would be evaluated and adjusted depending on effectiveness.

A student takes aim in Sterling's archery class.

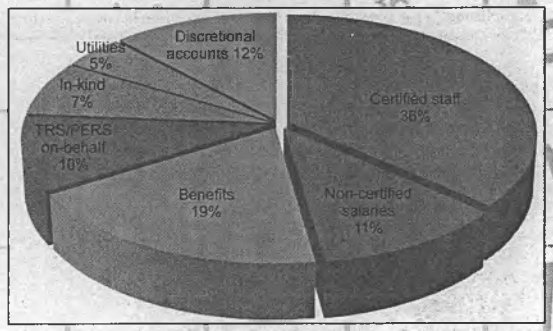
Changes included an increase in staffing at middle and high schools for electives, such as vocational education, creative/practical arts, foreign languages and credit recovery; reduction in the high school counselor/pupil ratio; addition of intervention staff districtwide for kindergarten through eighth grade; and implementation of the Read 180 program at all middle schools.

Revenues, expenditures

More than three quarters, 76 percent, of the General Fund budget is spent on salaries and benefits. About 10 percent of that is a payment made by the state of Alaska on behalf of the District to pay down part of the unfunded liability in the Teachers Retirement System (TRS) and Public Employees Retirement System (PERS) retirement accounts. To comply with accounting requirements, this payment is reflected on School District financial statements both as revenue and expenditure. TRS and PERS on-behalf payments are made by the state for all participants in the programs and are scheduled to continue for 20 years.

In-kind expenditures by the Kenai Peninsula Borough are also reported as revenues and as corresponding expenditures on the School District financial statements, as required by accounting rules. The in-kind payments comprise 10 percent of the Expenditure budget and are devoted to property, liability and workers compensation insurance payments, maintenance on school buildings and audit services, as well as custodial services and utilities at District Office.

Of the remaining 17 percent, 5 percent is dedicated to utility payments for schools and departments, including electricity, water and sewer, fuel for heating and natural/bottled gas. That leaves 12 percent for supplies, software, contract services, phone, postage, travel and other discretional accounts.



The state of Alaska requires that 70 percent of funding for education be spent on instructional functions. When the fiscal year 2011 budget is sorted by function, it shows that KPBSD exceeds that requirement, as 72.9 percent of the budget is dedicated to instruction.

For every operating dollar spent in the general fund in 2010-11:

$0.66 was spent on salaries and benefits

$0.12 was spent on all other discretional accounts

$0.10 was spent on TRS/PERS on-behalf

$0.05 was spent on utilities

$0.07 was spent on in-kind services

Snapshot of kpbsd

where kids come first

Mission:

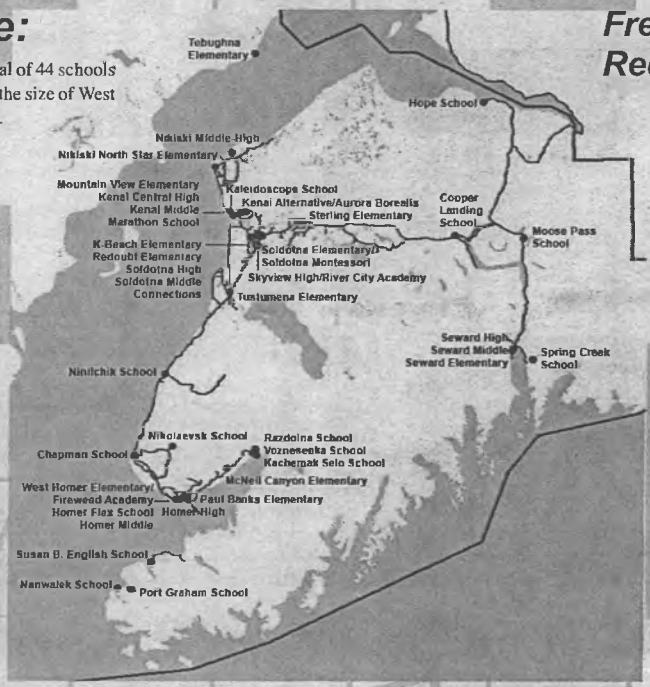
The mission of the Kenai Peninsula Borough School District, in partnership with its richly diverse communities, is to develop creative, productive learners who demonstrate the skills, knowledge and attitudes to meet life's challenges, by providing stimulating, integrated learning opportunities in a safe, supportive environment.

District size:

The School District has a total of 44 schools and covers a land area roughly the size of West Virginia (25,600 square miles).

Student transportation statistics:

Each school day, 2,679 students are transported a total of 7,507 miles on school buses throughout the District.



Free and Reduced Lunch:

A total of 3,346 KPBSD students, or 44% of the student body enrollment, qualified for free or reduced-price meals during the 2010-11 school year. Across the state roughly 40% of students enrolled in Alaska schools that sponsor school meal programs qualify for free or reduced-price meals.

Homeless:

As of May 10, 2011, 300 students were identified as homeless in the District. This number reflected a 7% increase from May 2010.

Enrollment, fiscal year 2011:

Preschool	195
Kindergarten-6th grades	4,649
7th-8th grades	1,400
9th-12th grades	2,884
Total projected enrollment for 2011-12 school year	9,148

Teaching Excellence:

56.43% of KPBSD teachers have an advanced degree. 83.80% of KPBSD teachers are Highly Qualified in the subject in which they teach.

Student Statistics *(ethnicity and race)*:

White	78.5%
Black or African American	0.6%
Hispanic or Latino	3.0%
Asian	1.4%
American Indian	1.2%
Alaska Native	10.9%
Native Hawaiian or Pacific Islander	0.5%
Two or more races	3.9%

Average Years Experience with KPBSD:

Teachers	10 years
Support staff	8 years

Staffing Ratios:

Type of School	Pupil/Teacher Ratio
Elementary schools with more than 200 enrolled students: Kindergarten	1:20
Elementary schools with more than 200 enrolled students: Grades 1-3	1:22
Elementary schools with more than 200 enrolled students: Grades 4-6	1:24
Middle and high schools	1:24
Small schools with less than 200 enrolled students: Grades K-6	1:17

IMPLEMENTING THE MODEL

ALASKA HEALTH WORKFORCE COALITION
ACTION PLAN OBJECTIVES

- Develop an integrated Program of Study framework with a focus on Health careers by June 2012.

- Implement the Health Program of Study in three local school districts beginning in fall 2012.

- Share results and extend opportunity to additional schools / districts throughout Alaska with emphasis on rural schools.

Questions?

Cathy LeCompte
calecompte@uaa.alaska.edu
Diane Maples
dsmaples@uaa.alaska.edu

Building a Systemic Framework for Education and Workforce Development in Alaska

Alaska Tech Prep Consortium

- Forty four school districts
- Twelve university campuses & Regional Training Centers
- Business/industry
- DOLWD, AKDEED

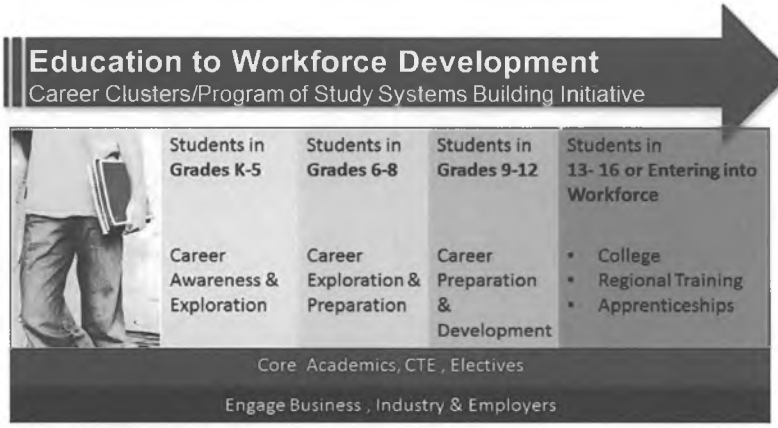
Alaska Tech Prep Consortium since 2004 has been providing the opportunity for high school students to:

- **Earn college credit while they are still in high school** – over 35,000 college credits earned by students in high school since 2007 – through aligned curriculum.
- **Save money on college tuition** – over $3.5 million in tuition savings since 2007 - with reduced tuition for college courses taught in the high school.
- **Reduce their need for remediation** and be better prepared for college and careers through rigorous course content.
- **Save time to completion** of a certificate, degree or industry credential with up to six college credits earned on their college transcript when they graduate high school.

What are we proposing?

A Systemic Framework

Alaska Tech Prep Consortium envisions a systemic change that will impact all students in Alaska through the implementation of the Career Pathways process and Program of Study framework.



Career Pathways/Program of Study is a nationally recognized and researched process that continues students the opportunity to earn college credit in high school, save time and money and reduce their need for remediation **PLUS** engage business, industry and employers in meaningful conversation and education to workforce development.

Implementation

June 2012

The creation and implementation of the **Health Career Pathway** in direct response to the **Alaska Health Workforce Coalition (AHWC) Action Plan** focus on Systems Change and Capacity Building priority "Engage and prepare Alaskan youth for health careers". The Career Pathway program specifically addresses the following objectives:

- Develop an integrated **Program of Study framework** with a focus on healthcare careers by June 2012.
- Implement the Health Program of Study in three local school districts beginning in fall 2012.

Already in a collaborative relationship, the Alaska Tech Prep Consortium and the AHWC will align secondary and post-secondary institution offerings closely with industry coalition member **skill** requirements. The program design leverages AHWC and Alaska Tech Prep to link education with local employer needs for a skilled workforce.

Return on Investment

Benefits to State & Students

STATE OF ALASKA

- Saves the state $$$
- Links and leverages school resources, courses, teachers ; connects efforts
- Provides a systemic gap analysis for funding decisions
- Faster time completion to work
- Education is bridged to workforce
- Addresses State CTE plan objectives

STUDENTS

- Reduced mediation
- Early engagement in a career pathway
- Early attainment of credentials
- Faster time completion; non-duplication of courses
- Increased access to courses/credentials
- Early advising & intervention

The **Personal Learning and Career Plan** (PLCP) is a process that allows students to develop and map out a list of the academic courses and experiences they need to complete to achieve their career goals, and a place to store a record of the courses, experiences and highlights of what they have already completed, so they can show what they have accomplished to others.

Career Clusters are groupings of occupations/career specialties in a specific field that require a set of common knowledge and interconnected skills. There are 16 career clusters recognized nationally. In Alaska, the University of Alaska Statewide has identified 14 career clusters. For more information go to: http://careerclusters.org/ or http://www.alaska.edu/research/wp/career-clusters/.

Career Pathways include a more narrow range of occupations in a career cluster tl use common skills and knowledge. Each career cluster contains 2 to 9 career pathwa For example, the Health Sciences career cluster contains Therapeutic Services, Diagnos Services, Support Services, Biotechnology Research and Development, and Health Informat career pathways.

A **Program of Study** (PoS) identifies the sequence of instruction, courses and activities tl is possible for students to complete beginning in high school and continuing past high sch graduation that provides the academic and skill competencies and credentials to qua for employment in a student's chosen career pathway. This sequence leads to an indus credential, certificate, degree, including advanced placement in a registered apprenticesh

Based on a program of study, **Alaska Tech Prep** helps to connect high school and colle programs and workforce training in a career field so students won't have to duplicate th studies/training later on. Students get an early start in a degree/training program, earni high school and college credit simultaneously while still in high school. The end resul an industry certification, endorsement or associate degree in a career field or a feder recognized apprenticeship, quicker and at a lesser cost.

School to Registered Apprenticeship provides a high school student who wants go directly into a career without closing the door on their education the opportunity advanced placement in apprenticeship. For more information go to: http://earnandlearn org/.

Choose a Career Cluster. For help go to http://www.careertech.org/resources/clusters/interest-survey.html or http://www.akcis.intocareers.org/ to take an interest survey.

High Utility, Travel, and Shipping Costs

Questions

Aleutians East

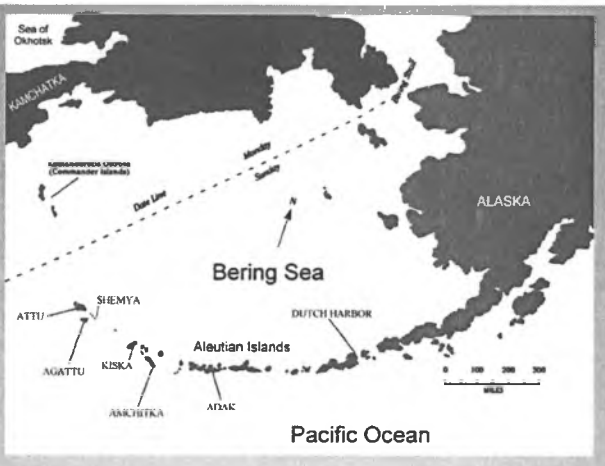
Aleutian Region School District

Serving two hemispheres: geographically, culturally and intellectually

Who We Are

Aleutian Region School District – REAA #8 - was created by the Alaska Legislature (after dissolution of the State Operated Schools (SOS) system) to serve the unincorporated areas of the Aleutian Islands.

Currently, ARSD serves communities west of Dutch Harbor/ Unalaska



Serving an area from 166°44" West to 173°11" East Longitude

Aleutian Region serves the western Aleutian Islands from its eastern border with the Aleutians East Borough (approximately 166.44 West Longitude) to its western boundary with the Russian Far East (approximately 173.11 East Longitude at Attu Island).

This makes Aleutian Region School District both the farthest west and farthest east school district in the United States.

Where We Are Located

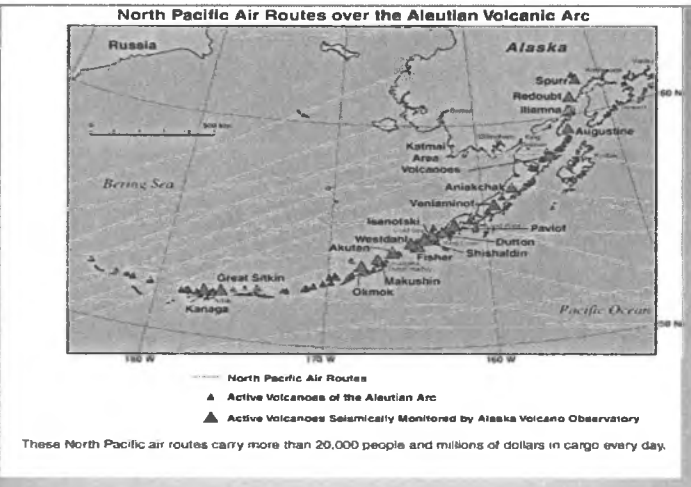
Currently, there are only two communities west of Unalaska/ Dutch Harbor with schools; these are Yakov Netsvetov School on Atka Island and Adak School on Adak Island.

- Adak airport serves as a crucial alternate airfield for trans-Pacific flights coming to/from Anchorage and flights transiting over the North Pole from Europe to the Far East.

Nikolski School was closed in 2010 after failing to attain the minimum enrollment (10) to count as a funding community for two consecutive years.

- **Nikolski is a community with a documented history of 8,000+ years**, maybe the oldest continually settled community in the US.
- Currently, the school is under a long term loan to the local IRA council with plans to use it as a clinic, post office and community store.
- The school site continues to serve as a critical link for both tele-communications and FAA navigational equipment.

Who We Serve



Air Routes - Anchorage, Seattle and Europe – to/from the Far East

How We Are Doing

- For over a decade, the District has conducted an on-going professional development program, focused upon aligning its curriculum and instructional delivery systems with State and National standards.
- To date, all curriculum areas have been aligned (and some re-aligned) using a rubric-based assessment system.
- To date, all graduates have passed all three sections of the High School Graduation Qualifying Exam.
- Test results show that ARSD students perform at or above anticipated levels on standardized achievement tests when aptitude is compared with performance.
- Truancy is not and issue in Aleutian Region, and students can best be described as actively engaged and self-motivated learners.

Challenges

- The Aleutian region, as well almost every community down the Alaska Peninsula, has experienced a significant decline in school enrollment which mirrors declines in community populations.
- The quality of telecommunications services (quality and affordable broadband internet) has actually deteriorated since the loss of StarBand (DISH Internet) service in 2009. This regularly makes broadband instructional delivery difficult and often times impossible.
- The District continues to search for high quality supplemental courses to extend educational opportunities that can be delivered on-site.
- Training and retaining teachers who have the requisite skills and knowledge to deliver multi-age and grade services for students and who have the personal qualities to live in such a remote location remains a major effort, concern and expense outlay.

Wrap Up

- Aleutian Region students are well-served by the curriculum and instructional program delivered at its sites. Likewise, the communities are well served by the school and it is encouraging to see graduates return to assume leadership positions.
- The District has an on-going program to review, re-align and otherwise improve its curriculum and instructional delivery systems.
- A strength of the District is its ability to make quick, systemic changes in response to new circumstances. However, care must be taken to maintain a narrow focus in what it chooses to do. This means attention to the quality of rather than the number of programs offered. This is exemplified by a new K-12 science curriculum now being implemented.
- Both Atka and Adak may have turned an economic corner, looking to a brighter future; ***APICDA's*** investment in **Atka** quadruples the size of the fish plant. Another $10m expansion was recently announced. The fish plant at **Adak** has been re-opened under ***Icicle Seafoods***. Hopefully, these will translate into community growth.
- Both Atka and Adak are - by far - net contributors to the Alaska economy and providers of high quality seafood to the world market. This contributes to Aleutian Region students being globally aware and actively engaged learners.

Presented by
Superintendent Jim Thomas
April 9, 2012

STUDENT PROFILE

- **K-12 – 316 STUDENTS**
- **CRAIG H.S. GRADUATION RATE – 100%**
- **DROPOUT RATE – 0**
- **HIGH PERCENTAGE OF STUDENT INVOLVEMENT IN EXTRA-CURRICULAR ACTIVITIES**

POSITIVE DEVELOPMENTS

- CONSTRUCTING NEW PRINCE OF WALES' VOC/TEC CENTER
- PARTNERSHIP WITH ALL 4 POW SCHOOL DISTRICTS
- CENTER WILL PROVIDE CTE TRAINING FOR BOTH YOUTH AND ADULTS
- CURRENTLY IN THE DESIGN STAGE
- GREAT COMMUNITY SUPPORT

ENERGY COST REDUCTION

- EFFECTIVE WOOD HEAT BOILER SYSTEM PARTNERSHIP WITH LOCAL TIMBER INDUSTRY
- HEATING SAVINGS OF OVER $20,000 IN 2011
- HEATS CITY POOL & ELEMENTARY & MIDDLE SCHOOLS
- PLUMBED FOR CRAIG TRIBAL OFFICE

CHALLENGES:

- MAINTAINING STAFFING LEVELS IN CURRENT ECONOMIC CLIMATE
- ENSURING LONG-TERM SUSTAINABILITY OF THE NEW POW CTE FACILITY
- LONG TERM EFFECT OF FEDERAL SECURE RURAL SCHOOL FUNDING (TIMBER RECEIPTS) LOSS
- INCREASED COSTS FOR HEALTH INSURANCE, TRANSPORTATION HEATING, SUPPLIES, FOOD, ETC.

CHALLENGES:

- PREVENTIVE MAINTENANCE
  - ROOFS
  - GYM FLOOR
  - HANDICAP ACCESS

- PACE CORRESPONDENCE – 329 students
- PACE CORRESPONDENCE
  - GRADUATION RATE
  - HOME SCHOOL/PRIVATE SCHOOL

Educational Goals

- 1. Ensure proficiency in Reading, Writing, Mathematics and Science.
- 2. Ensure our curriculum is aligned with the Alaska Standards.
- 3. Monitor and evaluate the quality of instruction.
- 4. Ensure educators incorporate research based practices.
- 5. Use achievement data to strengthen classroom instruction.
- 6. Seek ways to effectively communicate with parents and community.

DILLINGHAM CITY SCHOOL DISTRICT

Achievements

- Positive trends in reading and writing scores.
- 3rd Grade Reading Proficiency increased from 55% in 2005 to 78% in 2011.
- 3rd Grade Writing Proficiency increased from 54% in 2005 to 70% in 2011.
- Adequate Yearly Progress in "Safe Harbor" met by all three of our schools.
- We have moved 10% of our non-proficient students to proficiency in one year.

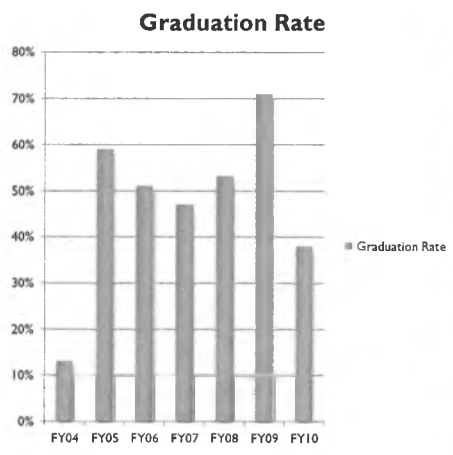
DILLINGHAM CITY SCHOOL DISTRICT

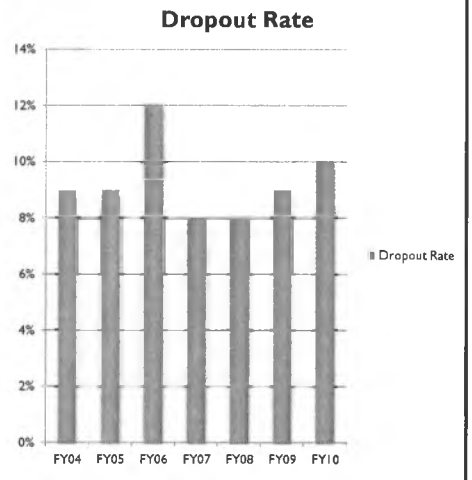
Renovations

- $15 Million Project
  - Elementary
  - Middle/High

DILLINGHAM CITY SCHOOL DISTRICT

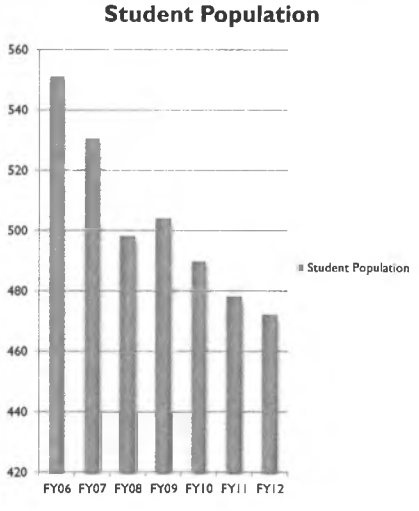
Challenges





Challenges

- Fiscal
  - Enrollment
  - Health Insurance 24% Increase ($224,000)
  - Employee Salary & Benefits
  - Rural Cost Factors (Energy)
  - BSA Flat Funding



Challenges

Instruction/Student Achievement

- Elementary AYP Level 5 Year 2
- Middle/High School AYP Level 5 Year 3

DILLINGHAM CITY SCHOOL DISTRICT

Challenges

- Facilities (Renovation Maintenance and Repair)
  - Mechanical and HVAC
  - Roofs
  - Bleachers
  - Territorial School

Student Stories

Fairbanks student's project is start of an unmanned journey

FAIRBANKS — Last spring, while many high school seniors were worrying about passing tests and posing for senior portraits, Hutchison High School student Corey Upton's ambitions were a little higher. Literally. That's because Upton spent about 14 hours per day during spring break working on his senior project: an unmanned aerial vehicle, or UAV.

This isn't your father's model airplane. Upton built the drone from scratch, complete with an auto-pilot feature, and rigged it up with a GoPro HD video camera so that it could record video high in both altitude and quality. It's fair to say Upton put a lot in to this UAV.

"It was my spring break and my PFD," Upton said.

Hutchison High School requires all senior projects to have a public service component. For Upton, that meant building a plane drone that could be used by law enforcement, emergency responders or fire fighters to provide critical visual information without risking a human life. Upton said he got the idea to build the drone while he was visiting a friend in San Luis Obispo, Calif. Currently, UAV's are used predominantly by the U.S. military to perform reconnaissance and precision strikes.

Student Stories

BEST graduates represent diverse backgrounds, achievements

FAIRBANKS — One of the advantages of a small graduating class is not having to stand in long lines and climbing to an auditorium stage to receive a diploma.

The 27 Fairbanks BEST (Building Educational Success Together), graduates of the Fairbanks North Star Borough School District's Homeschool and Online Learning programs, only had to take a short stroll across the stage since all were seated behind the speakers podium.

Though small in number, the graduates represent a cross-section of the community, but a bit heavy with hockey players, two of which are members of the Fairbanks Ice Dogs hockey team.

And therein lies the reason or reasons some students with different educational goals or time consuming jobs or extracurricular activities enroll in the BEST learning programs to meet their personal needs.

Student Stories

New North Pole graduates will travel to Michigan to meet with Ford

FAIRBANKS — Two of this season's many high school graduates aren't quite done with tests.

Kyle Evans and Calvin Gustafson, both 18, have another major exam on the calendar, but this one's reward isn't an A+ if they get everything correct. It could mean an internship or job at Ford Motors Company — even part of $11.4 million in prize money.

The pair is headed to Dearborn, Mich., for the Ford/AAA Student Auto Skills Competition in June.

Evans and Gustafson were in North Pole High School's advanced auto shop class and were two of about 12 students to take a written test from Ford. They had the highest scores in their class, so they traveled to Anchorage to compete against teams from Ketchikan, Juneau, King Career Center in Anchorage and Hutchison High School.

Lathrop robotics team celebrates successful competition

FAIRBANKS — The machine is deceptive. It looks like a metal cube with little wheels mounted around the outside edges. A pushover, right?

What competitors didn't see, though, helped a Lathrop High School's robotics team go all the way to the world championship Division II finals at the 2011 FIRST Robotics Competition last week in St. Louis, Mo.

The Lathrop team, dubbed ICY (short for "I see why"), included Heather Parsons, Jaguar Kristeller, Rohan Weeden and Aven Brose.

They set their multi-wheeled creation loose on a 12-foot-square mat, where it competed against other robots to put the most batons in goals, climb small hills and balance on teeter-totters. To earn the most points, robots competed in alliances, allowing one robot to score goals while the other pushed other robots around, running interference.

West Valley Academic Decathlon team heads to nationals

FAIRBANKS — Ten West Valley High School students are heading to Charlotte, N.C., this week to compete in the U.S. Academic Decathlon. The West Valley team recently took the state's overall winner title, beating Lathrop High School.

The students were quizzed on 10 different academic categories. Students on the team were of A-, B- and C-grade averages for balance.

Beginning April 27, the West Valley team will compete with schools from across the nation. Last year, Lathrop took fourth place in Division II. Robin Feinmann and Coby Haas are coaches.

Lathrop senior to represent Alaska in national Poetry Out Loud competition

FAIRBANKS — When 17-year-old Lakeidra Chavis recites lengthy, involved poetry from memory, her voice takes on a different cadence and tone.

Her friends call it "Lakeidra's poetry voice."

However it is characterized, Lakeidra's poetry voice, combined with her good memory and self-confident presence in front of an audience has morphed into a trip to Washington D.C., April 28-29, as Alaska's representative in the national Poetry Out Loud competition.

The Lathrop High School senior successively won three local competitions before taking first place at the state competition Feb. 23, in Juneau.

Cara Heitz Named Alaska Teacher of the Year

Begich Middle School teacher named alternate Teacher of the Year

JUNEAU - Cara Heitz, a science and health teacher at Cordova Jr./Sr. High School, was named Alaska Teacher of the Year 2012 at a presentation Sunday at the annual conference of the Association of Alaska School Boards in Anchorage. The Alaska award is given by the Alaska Department of Education & Early Development as part of a nationwide program sponsored by the Council of Chief State School Officers.

Scott McKim, a teacher of science, math and applied technology at Begich Middle School in the Anchorage School District, was named Alternate Teacher of the Year 2012.

"It is a pleasure to recognize two excellent science educators," said Alaska Education Commissioner Mike Hanley in a statement. "Ms. Heitz and Mr. McKim represent all of those teachers whose infectious enthusiasm for, and knowledge of, their subjects brings out the best in their students."

Heitz has taught for 10 years, five in her present position. She holds a bachelor's degree in zoology from Miami University of Ohio and completed her coursework toward a medical doctorate at the MCP/Hahnemann School of Medicine in Philadelphia.

When Heitz was a medical student, she worked with high school students and found her calling as an educator. "I want my students to first and foremost feel that they are safe and valued in my class," Heitz said in her application for Teacher of the Year. "They should be empowered to think freely, as well as encouraged and supported in their learning. I want my students to realize that learning can be both enlightening and thrilling, and that science is an important and relevant aspect of their life, past present and future."

McKim, the Teacher of the Year alternate, holds a bachelor of science degree in meteorology from Lyndon State College in Vermont, a master of science degree in watershed science from Colorado State University, and a master of arts in teaching degree from the University of Alaska Anchorage. He has taught for four years.

In McKim's application, he cited as his contributions "getting students excited to learn, involved in authentic and meaningful experiences, and creating an environment where students are comfortable in their own skin and taking responsibility for their education."

The Alaska Teacher of the Year may be called upon to speak at education conferences and participate in various statewide education working groups. The teacher is the Alaska nominee for national teacher of the year. The alternate teacher of the year would serve as Alaska teacher of the year if the latter were named national teacher of the year.

Additionally, the Alaska Teacher of the Year receives technology for his or her school, awards a college scholarship to a student, receives a scholarship to pursue an advanced degree, and attends an international space camp.

The Alaska Teacher of the Year and the alternate were chosen by a committee composed of members of major educational associations and the current Teacher of the Year, who is Lorrie Heagy of Juneau. The committee considered a written application, a video snapshot of the teacher in the classroom, and an interview.

The Transformation From Static To *Dynamic Education*

Cara Heitz

2012 Alaska Teacher of the Year

Static…

- Inactive
- Changeless
- Lifeless
- Inert
- Inanimate

What A Static Classroom Might Entail…

- Memorization
- Regurgitation
- Lectures
- Book work
- Unimaginative

How A Static Classroom Might Look…

"It is possible to store the mind with a million facts and still be entirely uneducated."
Alec Bourne

Dynamic…

- Active
- Vigorous
- Zestful
- Enterprising
- Vital

What A Dynamic Classroom Might Entail…

- Engaging
- Innovative
- Empowering
- Hands-on
- Progressive

How A Dynamic Classroom Might Look…

"The great teacher is not the man who supplies the most facts, but the one in whose presence we become different people."
Ralph Waldo Emerson

Over The Past 11 Years…

"If a child is to keep alive his inborn sense of wonder, he needs the companionship of at least one adult who can share it, rediscovering with him the joy, the excitement, and the mystery of the world we live in."
Rachel Carlson

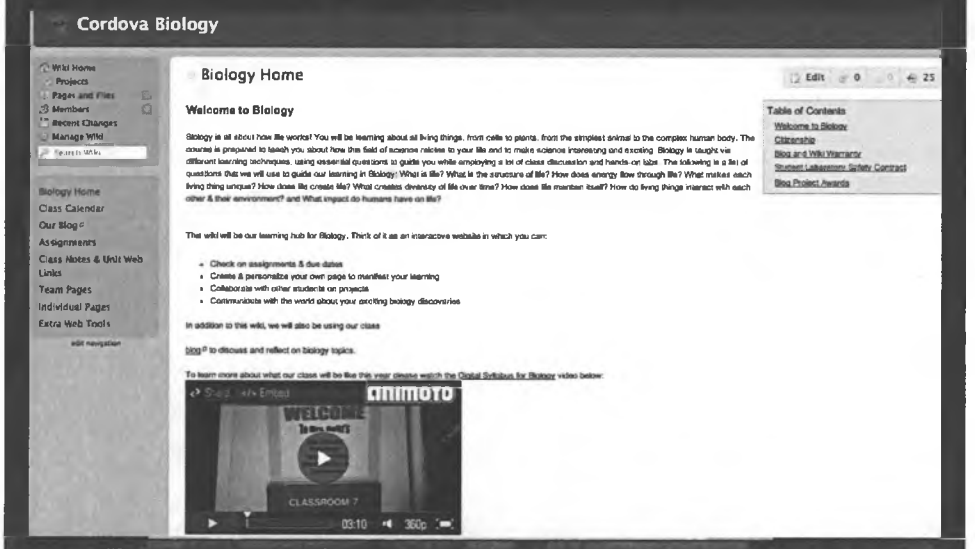
Over The Past 11 Years…

"The aim (of education) must be training of independently acting and thinking individuals who, however, can see in the service to their community their highest life achievement."
Albert Einstein

My Inspiration For Change…

"When the students of tomorrow sit in the classrooms of yesterday it is our teachers who are failing ."
Bill Ferriter

The Transformation…



"In common with other leaders, teacher leaders seek challenge, change and growth."
Meena Wilson

About Me
Hi, my name is Patrick. I'm 12 years old and I live in Cordova, AK. I'm really smart, and I'm good at most sports like basketball, baseball, and football. I like to play video games when it's yucky outside. My favorite games are Halo and Call of Duty. I have a little brother. My dad is in the Coast Guard so we move around a lot. My favorite color is PURPLE.

10,957,500 Days is a Long Time!
Posted on February 28, 2012 by curnpau
Categories: Science News.
If you are 15 years old you have only lived a seven hundred and thirty thousand five hundredth of that time! Think about how long that is. In spite of all of this, Russian scientists have recently grown plants from fruit that old! How do you get fruit that old? The story goes that a long time ago (30,000 years to be exact) Arctic ground squirrels in Siberia stashed the fruit of Silene stenophylla in their burrow. Their burrow then froze into the permafrost and has never thawed since.
The fruit scientist obtained from the burrow contained seeds. To the scientists dismay, however, they could not get them to grow. But they didn't give up so easily. They knew that the fruit contained lots of sucrose (a natural preservative) and they had passed something similar to Mrs. Heitz's biology class. Eventually they were able to get a plant to grow by taking placental tissue from the fruit and putting it in a Petri dish. Amazingly a plant started growing via vegetative propagation!
What interested me about this article (besides the fact that it beat the previous revival of a plant record by 28 thousand years) was how it connected to our biology class in so many ways. Weren't we just studying vegetative propagation? The other interesting connection is to our current topic, evolution. After the plant had grown, the scientists naturally conducted a very thorough examination of it and the modern plant. They found very subtle differences in the shape of the leaves and the 'size of flowers' (< - that seems undefined to me). This is very interesting from an evolutionary stand point. We apparently owe all of this (a wealth of evolutionary and biological data) to an unusual hero: the Arctic ground squirrel.
Scientists are optimistic about using this new technique to bring back extinct plants from the same time period. At that age, what factors determine whether or not they can bring a particular plant back to life?
What exactly are the differences between the old plant and modern plants and what selective pressures might have caused this?

Representative Alan Dick
Alaska State Legislature
Alaska State Capitol
Juneau, Alaska 99801

Dear Representative Dick,

Dr. Alex Hwu is the director for the Center for Distance Education (CDE) at UAF. He assumed this role in August of 2008, and we are fortunate to have him on staff to utilize his expertise and knowledge to address delivery of quality distance education courses.

Dr. Hwu takes his role very seriously. His background includes a decade of work in this field of distance delivery throughout the course of his education and work history. Along with managing CDE, he is responsible for development and implementation of our online courses and faculty training and coordination. He oversees 29 staff and 110 online instructors. He manages an annual budget of over $5 million and his center is 'self-supporting,' meaning he receives no general fund dollars for running the center.

Dr. Hwu established the UAF Online Learning strategic plan and has implemented it to increase student access, success, increase online enrollment and degree program offerings. He works with UAF deans and faculty to establish online programs, certifications and endorsements, including quality improvement and marketing. He chairs the College of Rural and Community Development's Task Force for Online learning, and co-chairs the Chancellor's eLearning Committee.

He is working to establish high school online advanced placement courses to meet the Governor's new Performance Scholarship criteria. He will not put a course on line until it meets his 'quality' standards and is fully vetted with faculty and course developers. I understand Dr. Hwu is working with the Alaska Department of Education & Early Development to consider how UAF can work collaboratively to provide these types of courses to high school students, who otherwise would have no opportunity to take them, to be eligible for the Governor's Performance Scholarship. This is challenging indeed, as most of the online courses in this area are from outside sources and are not necessarily applicable to Alaska teaching and learning requirements.

Dr. Hwu is an expert in his field of educational computing, design, and online learning. I know he is very candid in his assessment of course development and delivery before implementing any plan or course offering, and we value his expertise and knowledge in this field very much.

Sincerely,

Brian Rogers
Chancellor

Attachment – Alex Hwu resume

eLearning at UAF: Now and Beyond

By Alex Hwu, Director of CDE

CDE Facts

- Total 27 staff at CDE
- Enrollment in courses delivered through CDE is approximately 7300 annually, generating more than 24,000 student credit hours (SCH).
- CDE's enrollment has increased by an average of 15% each of the last 3 years.
- CDE serves over 4300 individual students annually, 65% of them UAF main campus students or students residing in the Fairbanks area, 26% outside Fairbanks, and 9% outside Alaska.
- CDE's student age distribution: 53% are 19-25, 19% are 26-30, and 28% are 30+ years old.

CDE Facts

- CDE offers around 184 courses, which includes some print based courses.
- CDE student services staff processed nearly 65,000 individual student lessons last year
- CDE facilitated courses (from this point on referred to as simply "CDE Courses") are offered cooperatively through 41 UAF academic departments.
- Currently there are approximately 115 instructors teaching for CDE, approximately 90% of whom teach —or have taught—at UAF or other higher education institutions.

COURSE MANAGEMENT

- Department approval before CDE begins development of a course
- Department approval of the developer (faculty who will be developing or revising the course)
- CDE course design review and approval by instructional designers utilizing the CDE Rubric and design checklist
- Department review and approval of the course content, verifying that it meets department academic standards and outcomes for the course designator, as defined by department curriculum group(s)
- Department approval of the *instructor(s)* for a course (usually the same faculty who developed it, but not always)

THE COURSE DESIGN FRAMEWORK

- "Reverse Engineering" from outcomes to activities by way of evidence-based assessment of understanding, turning the process away from disconnected activities that are not coherently tied to learning objectives
- Development emphasis on:
  - Learning community within the classroom
  - Facilitating the three vectors of interaction between student, instructor and curriculum
  - Integrating place-based knowledge, information and activities
  - Creating activities that bring the "real world" and media into the classroom
  - Providing access to—and practices for working within—socially networked environments, inside the classroom and out

THE COURSE DESIGN FRAMEWORK

- A foundation for online courses that promotes "Information Fluency"—the combination of:
  - discipline/course specific information and resources
  - application of critical thinking skills and techniques
  - presentation and participation tools and skills
- Consideration of how activities and materials promote development of the students' Personal Learning Environments (PLE) and Project Based Learning (PBL)

CDE STUDENT SERVICES: WHO DO WE SERVE

- Traditional students are comprised of:
  - Semester-based/UAF degree seeking students who register using UAOnline or their local registrar and purchase materials from the CRCD Book Store
  - Semester-based/(UAA and UAS) degree seeking students who register using UAOnline or their local registrar and the CRCD Book Store mails books and materials
  - Semester-based/Non-degree seeking students from all three UA campuses as well as other institutions who transfer credits to their home institution later or take advantage of existing articulation agreements

CDE STUDENT SERVICES: WHO DO WE SERVE

- CDE also services non-traditional students with "yearlong" courses which do not require formal admission to UAF and for which all students are charged in-state tuition. Non-traditional students include:
  - Students wanting core courses out of the way before they become degree seeking
  - Students who cannot attend a campus course; i.e. single parent, full-time working people, continuing education
  - Students wanting to take refresher courses
  - Teachers seeking re-certification and step increases
  - High school students—both home schooled and students from Fairbanks or surrounding areas—taking courses they can't otherwise acquire (higher levels of math, for instance)
  - Senior citizens
  - Military Personnel

CDE Initiatives

- Faculty Development for Specific School and College.
  - Two days workshop on how technology can facilitate teaching.
- CDE tuition revenue sharing with School and College
  - Partnership with departments to meet students' need and demand
  - Increase online instruction capacity within each department
  - Assist department on potential TA and RA funding

COLLABORATING ACROSS THE UNIVERSITY

- **iTeach (Week Long in Summer)**
- **iTeach-Mini (Two Weekend per semester)**

iTeach is the flagship of faculty development at the University of Alaska providing intensive, personalized, practical faculty development in teaching and learning technology and pedagogy. More than 250 faculty members from every region of the state have participated in iTeach seminars.

COLLABORATING ACROSS THE UNIVERSITY

- **IDESIGN**
  - The annual iDesign conference hosted by CDE pulls together instructional designers from within the University of Alaska as well as other educational and vocational institutions around the state who provide similar types of faculty support for distance education courses. Through face to face workshops, Elluminate Live! web conferencing and audio conference meetings, and provision of internet resources, this group has the opportunity to learn from one another and to explore topics that affect the philosophy, process, and production of curriculum for higher education.

COLLABORATING ACROSS THE UNIVERSITY

- **DISTANCE EDUCATION GATEWAY**
  - The statewide Distance Education Gateway continues to be developed, maintained and operated by CDE staff in conjunction with UA Statewide. The Gateway provides the only centralized point for students and prospective students to learn about distance learning options across the entire University system and will play a major role in the future.

LOOKING TO THE FUTURE

- CDE continues to seek improvement in their offerings and take advantage of emerging pedagogies and technologies to meet student and institutional needs.
- The administration, staff and instructors at CDE look forward to new opportunities including investigating new models of course delivery and instructor compensation,
- Working on creating open resources for students and faculty, extending the functionality and services of the Distance Gateway.
- And cooperative service agreements with departments with an eye toward helping departments reach their goals while offering more options for distance education students including complete degree programs.

CDE New Initiatives

- Increase both online student retention and success rate.
  - Increase interaction between students and instructor through social networking.
  - Create more synchronized learning activities.
  - Create online orientation for students and faculty.
  - Establish CDE ticket system to track students' issues and resolution.
- CDE new quality improve program (QIP).
  - Provide additional professional development for all online instructors.
  - Create faculty online communities.
  - Hiring additional instructional designer, LMS Coordinator and student academic advisor.
- Increase collaboration with school/college based on new 60/40 tuition funding model.
  - Increase academic oversight on both online courses and programs.
  - Grow online teaching capacity within each school and college.
  - Develop new online programs and certificates.

Tuition revenue sharing between CDE and College/School.

House Education Committee Presentation

March 14th, 2012

THE MISSION OF KGBSD IS TO PROVIDE HIGH QUALITY INSTRUCTION TO <u>EVERY</u> STUDENT WITHIN A POSITIVE ENVIRONMENT REFLECTIVE OF OUR COMMUNITY NEEDS.

Ketchikan Gateway Borough School District

Strategic Plan

Vision "every student acquires the skills and knowledge to succeed."

Mission "to provide high quality instruction to every student within a positive environment reflective of our community needs."

Instruction

- Responsive- data driven
- Rigorous- meets Adequate Yearly Progress
- Relevant- meets challenges of 21st Century

Environment

- Emotionally secure
- Physically safe
- Fosters success

Community

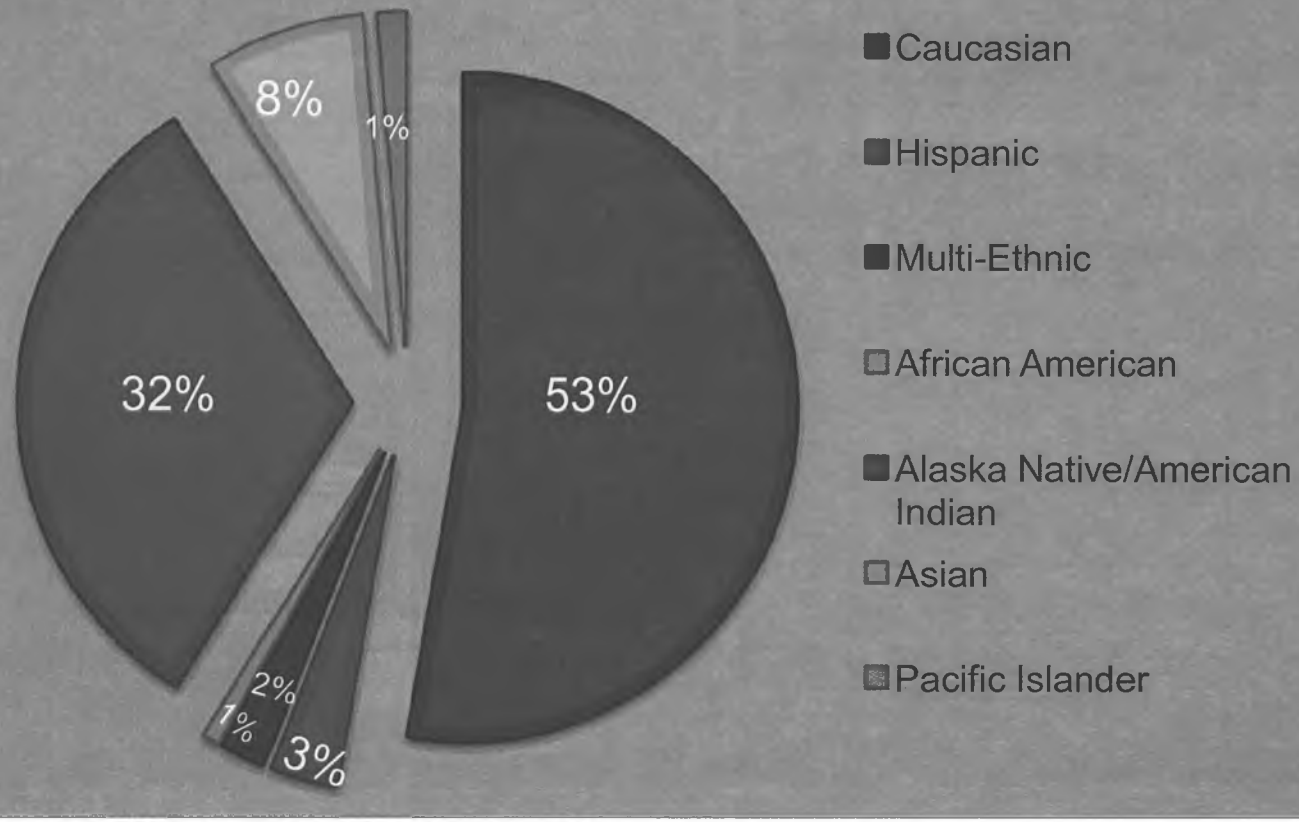
- Fiscal responsibility
- Facilities
- Vocational and academic partnerships

Success measures

Attendance rate increases
Graduation rate increases
Student Achievement increases

THE KETCHIKAN GATEWAY BOROUGH SCHOOL DISTRICT SERVES OVER 2,000 STUDENTS IN FIVE ELEMENTARY SCHOOLS, TWO HIGH SCHOOLS, AND THROUGH DISTANCE LEARNING.

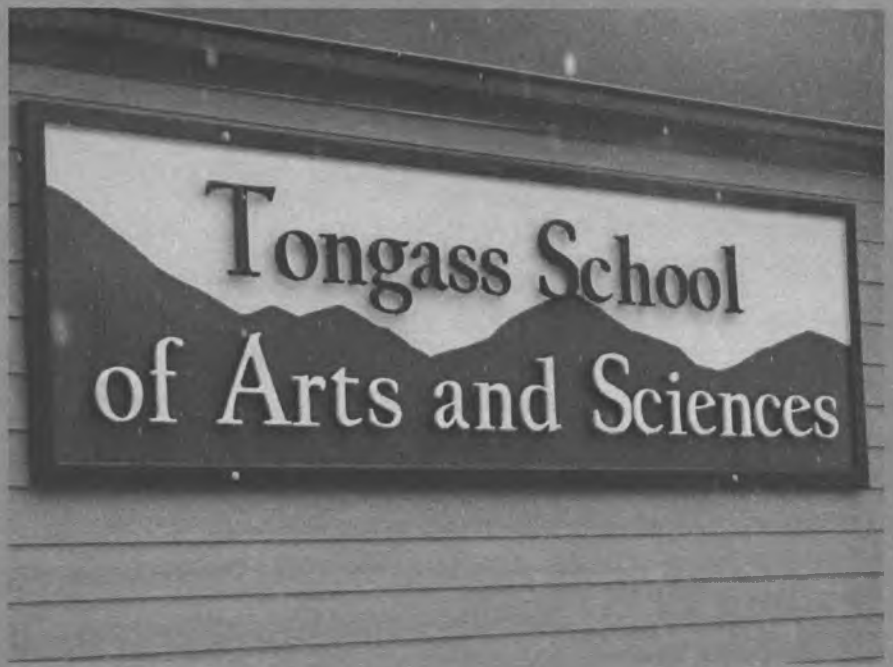
Preschool-12 Grade Enrollment by Ethnicity



PRESCHOOL

5 ELEMENTARY SCHOOLS

2 Blue Ribbon Nominations



OUR VISION:

EVERY STUDENT ACQUIRES THE SKILLS AND KNOWLEDGE TO SUCCEED.

All Elementary Schools Achieved AYP

SCHOENBAR MIDDLE SCHOOL

Our middle school has the opportunity to offer every student a laptop.

Schoenbar was awarded the prestigious ING Award

KETCHIKAN HIGH SCHOOL

OUR INSTRUCTIONAL PROGRAMS MUST MEET THE VARYING NEEDS OF ALL STUDENTS AND PREPARE THEM FOR SUCCESSFUL FUTURES AS PRODUCTIVE CITIZENS IN THE 21ST. CENTURY.

STUDENT ACHIEVEMENT

- Gates Failing is an alternate for the US Senate Youth Leadership award.
- Brittany Thompson will be awarded a Coca Cola Scholarship.
- Brendan Stanton is the American Legion Oratorical Representative for Southeast Alaska.
- Brendan Stanton will is the only Alaskan selected to attend the OPASTCO Leadership Through Learning Conference in DC this year.
- Alec Pankow is 1 of 35 semifinalist out of 7,000 applicants to be invited to apply for a full ride at Puget Sound University. He has also been selected as a candidate for the Presidential Scholar's Program.
- Case Kuikhoven has been offered a full ride for the US merchant Marine Academy
- Janelle Stacy has been offered a full ride at the University of Idaho.

STAFF AWARDS

- Rebecca Bowling – Great Books Great Teachers Award
- Chad Fry – Alaska Social Studies Teacher of the Year
- Susan Stone – VFW Teacher of the Year
- Shawmarie Carpenter – Alaska Health Teacher of the Year.
- Mark Woodward – ASTE Technology Contest Winner.
- Marian Gonzales – ASTE Technology Contest Winner.
- Robert McClory – Finalist for the School Counselor of the Year award, given by the American School Counselor Association.
- Katy Hook – NEA-AK ESP of the Year

WORKING TOGETHER

Ketchikan Gateway Borough School District

Klawock City School District

District Information

- K-12 Enrollment: 136
- Staff
  - Certified: 18
  - Classified: 14.5
- Ethnic Background
  - Native Alaskan: 76%
  - Caucasian: 23%
  - Other 1%
- Free And Reduced Lunches: 73%
- Special Education Population: 19%

Our Mission Statement

- Our Mission Statement guides everything we do. We believe in a "Well rounded education" focusing on educating the whole child.
- The mission of the Klawock City School District is to provide an exemplary, well-rounded, educational program that forms a strong foundation in basic academic areas, as well as to provide opportunities for creative expression, career and technical learning experiences, and to inspire students to become life-long learners. We emphasize the development of responsible, ethical and social behavior, a strong work ethic, leadership, and a sense of respect for themselves and others. We expect every student to become a concerned and active member of his or her community.

Accomplishments

- **Academic Performance**: 2010-11 marked eight out of the last nine years that we met "Adequate Yearly Progress", a measurement used by the federal and state government to measure academic achievement.
- **Drop Out Rate**: We have consistently had an extremely low drop out rate. In 2010-11 we had a 0% drop-out rate. No Drop Outs.
- **Attendance Rate**: Our attendance rate is always 90%+. Our attendance for the 2010-11 school year was 92.9%, which ranks us above the state average according to the latest data.
- **Graduation Rate**: Graduation rate is a somewhat complex statistic which tracks students from 9th grade up to graduation. Our graduation rate is always high, last year it was 91.7% which puts us near the top in the State (State average was 68% in 2010-11 last data on file).

Other Accomplishments

- In 2010-11 100% of our staff were "highly qualified" as defined by NCLB. "Highly Qualified" is a term used in the No child left Behind Act.
- Named among "America's Best High School's" in 2009 by U.S. News and World Reports.
- Teacher turnover consistently under 10%.
- Regional and State Champion athletic teams
- Student Council Award of Excellence over the past several years.

Youth Employability Skills

- We believe in preparing our students for real world experiences.
- The real world requires more than knowledge but also a set of skills and attitude that are prerequisites to success. Therefore we teach employability skills and require at least 10% of all high school grades are based on YES which includes attendance, punctuality, being prepared, time on task, respect, cooperation, teamwork, and productivity.

Activities

Klawock offers an extensive variety of extra-curricular activities including:

- Academic Decathlon, Band, Baseball/Softball, Basketball, Battle of the Books, Cross Country, Band/Choir, Native Arts, Spelling Bee, Student Council, Volleyball, and Wrestling.

Communication And Recognition

- Every Monday morning all 7-12 students attend a gathering to inform them about activities and events for the coming week and recognize excellence from the week past. We celebrate success in the classroom, art program, music program, sports, etc.
- Every Friday morning students from K-6 have this weekly gathering.
- The Principal leads the meeting but all teachers attend.

Technology

- Every student 1st grade thru 12th grade has their own laptop computer.
- Students in Kindergarten have easy access to iPads in the classroom.

Native Arts

- We believe our Native Arts program is one of the best in the State and we have the awards to prove it. Our teacher Jon Rowan is recognized as one of the finest wood carvers in the Northwest.

Vocational Education

- Klawock has a long history of providing a quality vocational educational program. The program focuses not only on the development of the technical skills but also on work ethnic, cooperation, and pride in your work.

Teacher Saturday Committee Meetings

- We believe strongly in empowering our staff by providing them with time to collaborate, learn from each other, and be inspired with decision making. Realizing that this is time consuming and not wanting to impact the instructional day, for the past 11 years we have held meetings on Saturdays. We generally meet about once a month to discuss topics such as technology, school improvement, staff development, and career and technical education.

The School As The Community Center

- Like many schools in small communities our school is the center of community activities. Our school and gym are used for such events as: community meetings, basketball, family celebrations, funerals, and even some weddings.

Challenges

- The loss of Federal funding from the Secure Reserve School Act (Forest Receipts) and flat funding from the State will mean serious staff deductions. At the current time we are preparing for 20 – 25% cut in teaching staff.
- The lack of jobs is causing families to move resulting in declining enrollment.
- Keeping up with State and Federal regulations
- We are proud of our accomplishments but we are aware that we can and must continue to improve. The future depends on it!

WE ARE KLAWOCK!

Kuspuk School District

Presentation to the Alaska State House Education Committee

March 21, 2012

District Demographics

- District covers over 12,000 sq. miles.
- Total District student population = 336 students
- 95% of student population is Alaska Native (Yup'ik Eskimos and Athabaskans)

Demographics continued…

Nine schools in six villages along the mid-Kuskokwim River.

- Joseph & Olinga Gregory School - Kalskag (grades K-3, 46 students)
- Zachar Levi Elementary School - Lower Kalskag (grades 4-6, 33 students)
- George Morgan Sr. High School - Kalskag (grades 7-12, 56 students)
- Auntie Mary Nicoli Elementary School - Aniak (grades K-6, 65 students)
- Aniak Jr/Sr High School - Aniak (grades 7-12, 64 students)
- Crow Village Sam School - Chuathbaluk (grades K-12, 28 students)
- Johnnie John Sr. School - Crooked Creed (grades K-12, 23 students)
- Jack Egnaty Sr. School - Sleetmute (grades K-12, 13 students)
- Gusty Micheal School - Stony River (grades K-12, 9 students)

Mission Statement: Kuspuk School District: Where all children learn - whatever it takes!

District Motto: Motivating, Engaging, and Supporting ALL Students in Learning.

Shared Vision: Kuspuk School District will work with community members to graduate all students who will be successful in both the traditional and global society.

Kupsuk Highlights

- We are a standards based, project based district where students progress based on learning as demonstrated by mastery of the standards in the ten content areas through projects and assessments.
- Students progress at an individualized pace so their achievement is not based on "seat time".
- All students have ILP's to assist with learning.

Trends

The district is focusing on several trends to take our students and district to the next levels of learning:

- Continuous improvement
- Low staff turnover
- Professional development
- Increasing standards and educational opportunities for students
- Providing quality educational and vocational programs
- Implementation of technology based learning
  - Part of the AASB CDL "one-to-one" laptop program
  - Recipient of HD 6 iPad program
  - SmartBoard technology in every classroom in the district
  - Various computer/internet based programs to assist with learning

Partnerships

Chugach School District
- Voyage to Excellence
- Excel Camp
- Outdoor Leadership Camp
- Pre-School Program

UAF
- Camp Kick Ash
- Math/Science Expedition
- Career Academy

Nome
- NACTEC

Challenges

- The rising cost of energy (fuel and electrical costs) and the ripple effects that these have in the district.
- Declining enrollment.
- Continuing to provide a quality educational program for our students in our remote, isolated locations.
- Providing early interventions for students to ensure that they are on level when they enter school as well as making sure they are at grade level as they progress through our educational model.
- Quality Pre-K programs to assist with this last challenge.

Summary...

- We are resolved in our duty to educate the students of Kuspuk School District and will continue to do everything that we can to help accomplish this task. Our students are accomplishing more each year through the efforts of our staff and the increased rigor of the programs that we offer.
- Thank you for the opportunity to present to you this morning.

  Brad Allen - Superintendent, Kuspuk School District

Lower Kuskokwim School District

Presentation for the House Education Committee
March 28, 2012

Gary Baldwin,
Superintendent

About LKSD

LKSD is the Largest Rural School District with 3,970 students in 27 schools located in 23 communities.

Our students are:
- 95% Native Alaskan
- 82% Economically Disadvantaged
- 67% Limited English Proficient

LKSD 6 year performance summary

Fiscal Year	# of Grads	Grad Rate	% proficient Lang	% proficient Math
2006	86	39%	42	38
2007	132	53%	45	42
2008	134	53%	44	41
2009	141	64%	40	36
2010	142	52%	41	37
2011	150	41%	34	32

Challenges

We have many challenges. Two of the greatest are:

1. Student Motivation
2. Significant Facilities Needs

We are problem solvers and not victims of circumstances beyond our control.

Assets

We also have many assets:

- Stable and Supportive School Board
- Great Students and Staff (Reduced Teacher Turnover)
- Robust and Targeted Professional Development
- New Construction
- School Social Workers

Solutions

Comprehensive School Reform Framework

1. SIOP (Sheltered Instruction Observation Protocol)
2. CPM/RTI – Dual Language
3. Improved School Climate and Positive Behavior

Innovative Academic Programs

- 2 Way Video Courses
- Robotics Courses and Competitions
- Integrating Arts into the Curriculum
- RANSEP

"RANSEP" 101

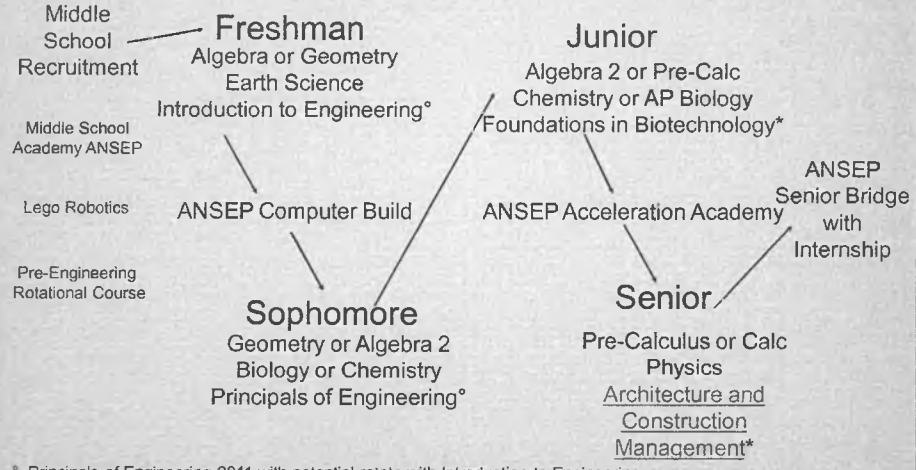
...Or, What are we doing here?

Goal

GOAL: Meet academic needs of students from surrounding village schools while allowing students and families to be closely connected to the rich cultural experience of the village.

Culturally Grounded + Academically Strong = Post Secondary Success

Description Flow Chart



° Principals of Engineering 2011 with potential rotate with Introduction to Engineering
* Tentative planned courses- team will continue to investigate most appropriate STEM 101 courses

Partners

- Rasmuson Foundation
- ANSEP-Alaska Native Science and Engineering
- Lower Kuskokwim School District/ BRHS
- Yuut Elitnaurviat- People's Learning Center-- Non profit that includes 9 partners-- will provide housing and coordination of students from villages

Components by Partner Lead

BRHS

- Engineering Courses
- Math and Science Courses
- Junior High recruitment through robotics and engineering rotational

ANSEP

- Middle School Academy
- Computer Build
- Acceleration Academy
- Summer Bridge- includes internship
- Post secondary support - includes internship

LKSD

- Early Recruitment through Robotics and District Recruitment
- distance delivery prep courses
- financial support for travel for ANSEP and Semester in Bethel

Yuut Elitnaurviat

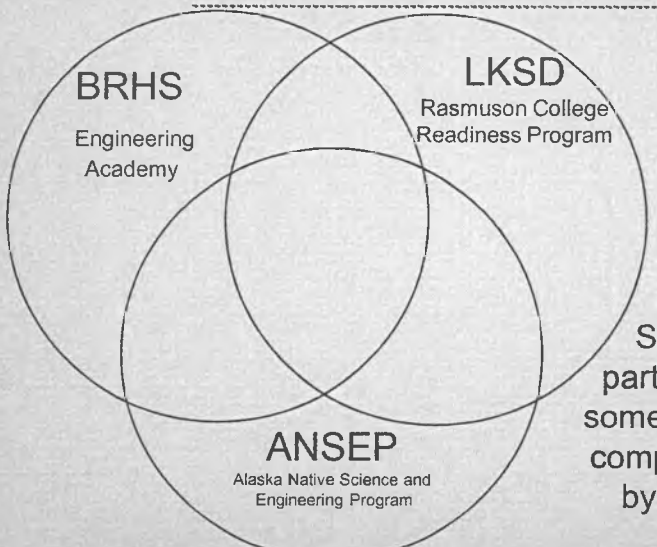
- Housing and afterschool coordination for Village students

LKSD Village students

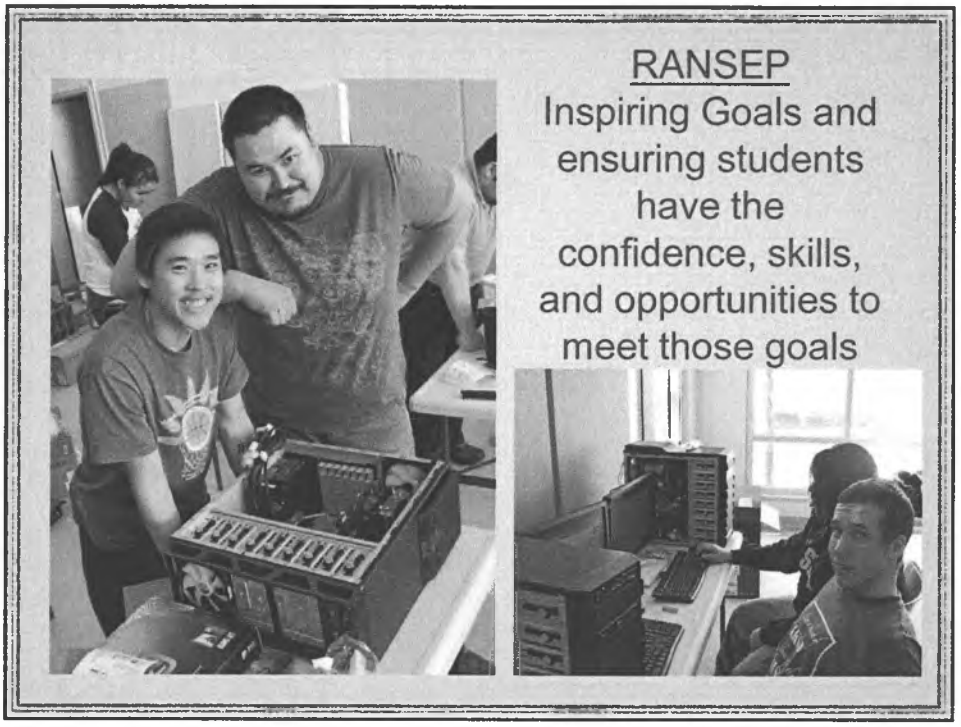
Typical Path- each village site has its own schedule.

- Freshman
  - Literature 1, Composition 1, Pre-Algebra or Algebra I, Earth Science, PE/Health, World History
- Summer School Bethel- complete Algebra 1 if needed
- Sophomore
  - Literature 2, Composition 2, Geometry, Biology, US History, Engineering, + elective
- Summer School Bethel-Principles of Engineering, Complete Geometry if needed
- Junior
  - Semester 1 in Bethel: Blocked Chemistry, Blocked Algebra 2, Blocked Engineering Course + study group or elective
  - Semester 2 at site: Advanced Composition (S1 or 2), Literature, PE or Health, AK Studies or Govt
  - ANSEP Acceleration Academy
- Senior*
  - Semester 1 in Bethel: Blocked Physics, Blocked Pre-Calculus or Calculus, Blocked Engineering Course + study group or elective
  - Semester 2 at site: Advanced Composition (S1 or 2), PE or Health, AK studies or Govt

Partner Programs work in Sync



Students may participate in all or some of the program components offered by each partner



RANSEP
Inspiring Goals and ensuring students have the confidence, skills, and opportunities to meet those goals

MSBSD Education

Matanuska-Susitna Borough School District

Preparing Students for Success
Career, College, Military –
Ready Graduates

Superintendent, Deena Paramo, Ed.D.
April 3, 2012

Mat-Su Borough School District

- Located 35 miles north of Anchorage alongside Matanuska and Susitna rivers
- Spans 25,000 miles
- Largest employer in Borough
- Passed its largest bond in October 2011
- Educates 17,500 students
- Annual enrollment growth of 425 students over last 10 years
- Operates in 44 schools
- Allows for parent and student choice

Return-on-Investment

- Of the 984 students in the 2011 graduating cohort, 964 passed all three sections of the High School Graduation Qualifying Exam (HSGQE) for a pass rate of **97.96%**.

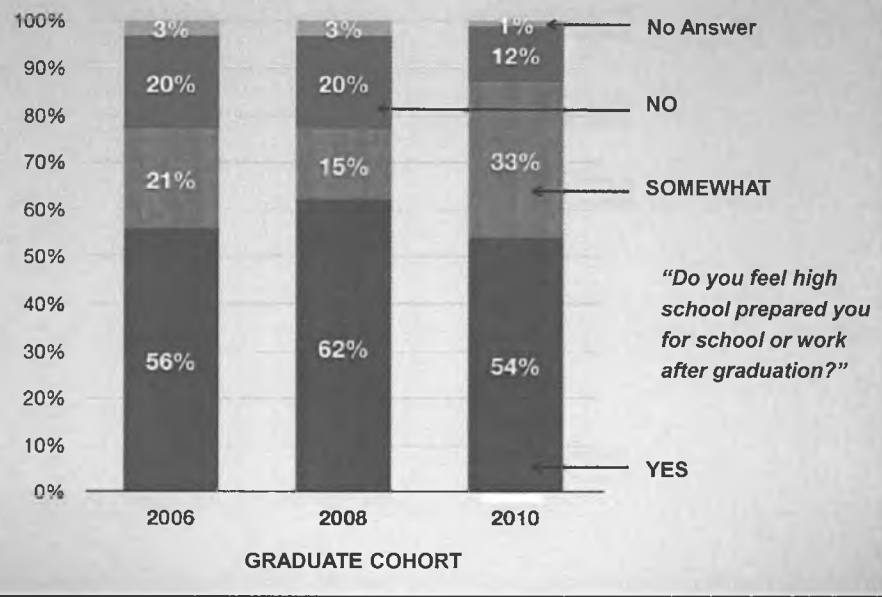
PERCEPTION OF PREPAREDNESS



Take Away Results

- 77% of our graduates go on to postsecondary education; including 2 or 4 year college, career and technical training, short term employment training
- 2006 cohort: 59% went to higher ed, 20% graduated, 28% still enrolled, 11% dropped out
- 50% of our graduates are competitively employed 5 years after high school; 14% are earning a living wage ($60,000/year)
- 77% of our students feel high school prepared them or somewhat prepared them for school or work after graduation (2006 and 2008 cohorts)
- 87% felt prepared from the 2010 cohort

Next Steps

- Current Programs addressing student post-school success
  - Technical Writing
  - Civics
  - Financial Literacy
- Mat-Su eLearning
- Alaska Middle College School

NENANA CITY SCHOOL DISTRICT

"A community of opportunity – Preparing Students for Life"

Presentation to:
HOUSE EDUCATION COMMITTEE
Date: March 5, 2012

NENANA CITY SCHOOL DISTRICT

- NCSD serves the community of Nenana, the surrounding area, and the State of Alaska through:
  - The Nenana City Public School (K – 12)
  - The Nenana Student Living Center
  - CyberLynx K – 12 state-wide Correspondence Program

Providing Professional Educational Support for Home School Parents

NENANA CITY PUBLIC SCHOOL

"A COMMUNITY OF OPPORTUNITY – PREPARING STUDENTS FOR LIFE"

- Core Class Offerings
- K – 12 Music Education
- Voc. Ed.
  - Including welding, Auto, Small Engines, construction trades, culinary
  - ETT/EMT Certifications
- Full-service Library
- Elementary School: I-Pads for Literacy project
- Dual Credit Offerings in College Algebra and College English in cooperation with Western Oregon University

NENANA CITY PUBLIC SCHOOL

"PROVIDING ALL STUDENTS WITH THE TOOLS AND LEARNING ENVIRONMENT NECESSARY TO COMMIT TO ACHIEVING SUCCESS"

- Resources
  - Excellent teachers with low turnover
  - Stable administration with high quality support staff
  - Connectivity
    - Fiber optic line connected directly to the school (GCI)
  - Old, but well-kept facilities to meet program needs

NENANA CITY PUBLIC SCHOOL

THE NENANA S.T.E.M. INITIATIVE

- Started in Aug 2011: Awarded an Alaska Native Education Grant
- Goals
  - 1) enhance educational services
  - 2) improve academic performance
  - 3) increase readiness to pursue STEM careers.

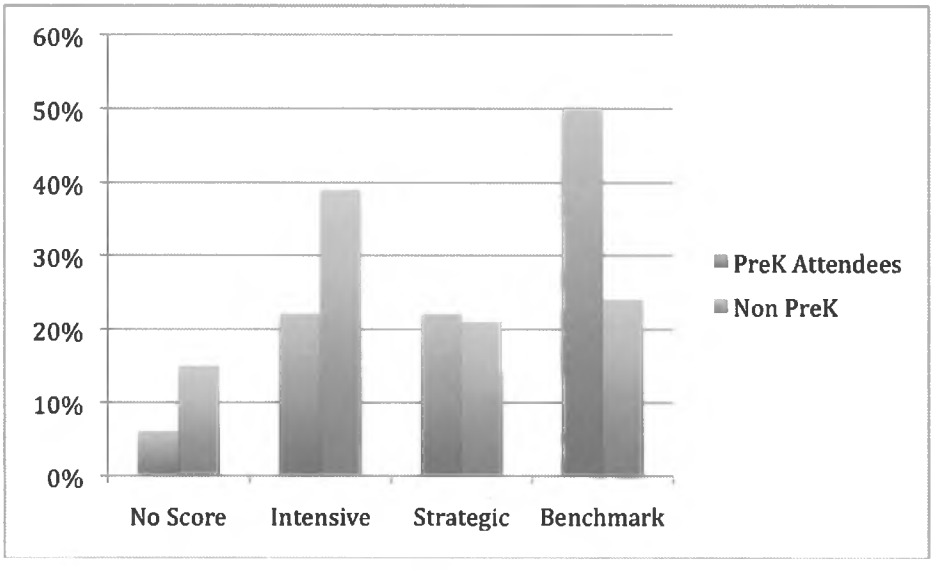
Comparison of Kindergarten Students Who
Pre K Attendees
To
Non Pre K Attendees

The 2010-2011 school year was the second year of the Nome Public Schools Pre K Pilot Grant. Nearly 50% of students entering Kindergarten had participated in the Pilot Pre-K Program. The remaining students entering Kindergarten had attended either a pre-school program, a home preschool program or no preschool. At the beginning of the 2011-2012 school year, students entering Kindergarten received a DIBELS assessment measuring academic readiness. Provided below are the scores of PreK Attendees compared to Non PreK Attendees.



Score Descriptions:
No Score = students scored too low to be measurable
Intensive = the lowest score measurable indicating intense need of supports
Strategic = the mid-level score indicating extra supports needed
Benchmark = the on grade level score

March 30, 2012

Southeast Island School District is a REAA with 9 schools. Our largest site has 75 students; the remaining 8 schools have about 10 students each. Total count this year is 164. Our numbers have stabilized and have been increasing. We expect to lose one school this year and have cut 20% of our teaching staff. (Primarily due to the anticipated loss of Forestry Receipts)

Issue 1: We are too successful

By any standard, our students are doing great. Test scores are good and our graduation rates far exceed the state average. We meet AYP and several years ago when financial rewards were given to schools for excellence, eight of our nine schools were recognized. About half were in the top ten over the two years of funding. Parents and students are happy with their experience. With the current State and Federal funding priorities, we struggle to compete for grant funding. While our poverty rate is high, our academic success drops us out of the running for most grants. Federal grants have shifted toward large districts and failing schools. With the settlement of the Moore case, State money is about to target the 40 poorest performing schools.

Our schools have been successful because we invest everything into our kids.

- We overstaff instructional aides to increase one on one education.
- We seek activities to engage students when typical opportunities are not available or too costly. These activities include:
    - Archery. We dominate the State (top elementary, middle school and high school teams last three years) and are Nationally competitive (33rd in 2011)
    - Alaska Society of Technology in Education (ASTE) iDidaContest. Port Alexander School, with just 11 students, won 11 of the 36 first place awards this year.
    - Marksmanship.
    - Wii competitions between school sites.
    - Battle of the Books.
    - Non-traditional PE activities such as kayaking, snowshoeing, and mountain biking.
- We are constantly looking for inexpensive ways to engage kids. Many competitions now take place over the Internet or by distance.
- We maintain vehicles at our road-accessible sites so students can commute to play sports (four high school students commuted four hours a day to play on a team this year).
- We fund breakfast and lunch programs at an average loss of $10,000.00 per site.
- We treat parents and students as consumers and respond to their needs.

- We hire teachers who are the best possible fit for the community and students.
- We expect staff to bring additional opportunities to their students, to perform far beyond minimum requirements and to extend those opportunities district wide.
- We empower our parent organizations (Advisory School Councils at each school site) to influence staffing and policy.
- We find ways for students to work to raise money for things we cannot afford. Examples include:
    - Splitting firewood for wood-fired boilers
    - Performing appropriate school maintenance and custodial duties
    - Growing greenhouse produce
    - Running a school business (Coffman Cove Bakery, Thorne Bay Entrepreneur Class)
    - Assisting with Construction Projects (3-sided shelters for Sea Trails and the Forest Service, second floor construction in district's bus barn)
- We invested in laptops for students even before it was fashionable and have been doing our own distance delivery for the same period of time. This allows us to provide a quality education to single teacher sites.

We are constantly looking for ways to reduce costs and improve service

- We are working to encourage other small districts to share services, which will reduce costs and improve services.
- We contract services for Business Manager, Technology Director, and some administrative services to reduce these costs by about 50%.
- When possible, staff and students perform maintenance or construction, which reduces these costs by 50%.
- We purchase used vehicles through a broker in Washington rather than buying new. Savings allow us to have a vehicle at most sites to encourage student participation in activities outside their school walls.
- We installed wood-fired boilers in two sites and plan to install them in our other sites as funding allows. The boilers reduce heating fuel costs, and provide local jobs and opportunities for students to raise money. (We cannot fund sports travel. Student athletes must raise $40,000 each year despite 70% poverty)
- Once wood-fired boilers are in place, we plan to install greenhouses, allowing students to improve student lunches and raise money (our lunch program loses $100,000 each year. We can't possibly improve the quality of lunches unless we grow our own produce)
- We are looking for alternative electrical energy sources. We are currently pursuing a hydroelectric project in Thorne Bay and would like to implement wind projects at Kasaan and Coffman Cove.
- Our classified union contract remained status quo when the contract expired this year. They retain a modest step increase of 3.5% if not at the top of the scale.
- We hire contract workers as much as possible, and limited individual hours to reduce fringe benefit costs for certified and classified.
- Teachers are in the third year of their union contract and receive a 3.5% yearly salary increase and $1,081 for a step increase, if they are eligible.
- If there is a more cost-effective way to do something, we are on it like a shark.

We strive for about a 3% carry over. This is not because we can't spend the money, but just to keep enough money to stay ahead of bankruptcy when a boiler fails or a water system breaks. Our unmet needs are legendary, but we do our best. There is no fat and there has not been any. We don't get out much and no money is stashed away.

Despite our success, unattainable expectations for academic results are about to crash us. We will never reach 100% proficiency for our most challenging students and students who do not speak English. Thus far, our biggest challenge in meeting AYP has been families leaving town during testing. We will not make AYP in Port Protection this year and did not make AYP in Edna Bay last year for this reason. Since neither of us can force parents to have their children at school during testing, the one thing that would help would be for **Alaska Airlines to move their blackout dates for cheap tickets to testing week**.

Issue 2: Tenure

I can't help noticing that there is a suggestion, whether stated or implied, that our financial woes result from giving in to our unions when we should be balancing our budgets on their backs. We have to compete for good teachers with the rest of the state and the nation. Our schools are successful if we can attract good teachers who have energy and the drive to excel. If we hire average or low performing teachers, we fail and are in jeopardy of closing our schools. If you want to compare our successful schools to those that are not, compare teacher turnover. Yes, we could try to beat down the union, but an arbitrator will settle any unresolvable disagreements. We would not save much in the end, but would instead risk alienating staff, losing our most capable teachers, and reducing our ability to attract good candidates.

What is killing us is tenure. What in the world do I do with a teacher who isn't performing, is toxic to co-workers or students, or drives parents to pull their students out of school? I have few or no options if the teacher is just a minimalist, irritates parents, fails to engage kids and knocks people over to get to the door at 3:30. I hope most of you have seen the documentary *Waiting for Superman*. The documentary refers to "dancing with lemons" when districts keep moving their poorest performers from site to site to avoid parent rebellion. Every district has them and they can, and have, closed schools in my district already. Placement of this type of teacher at a school can close the school before the end of the count period. I had a parent actually fall backwards out of her chair when I just hinted at a staffing possibility. We cannot do more with less unless you help us deal with the 5-10% of teachers who need to do something different than teaching. I have found myself moving teachers from site to site to keep them from bringing down any one site's test scores for two years in a row. We simply do not have the resources to create nothing positions just to keep ineffective teachers from doing harm. In fairness, I wish to point out we have a great local union and most of our staff are magnificent. We have no burning desire to fire teachers and ruin careers. There will always be a handful needing a fire lit under them to move them to a higher level of effort. Reducing their ability to hide behind their union. Unions get forced into protecting the very worst teachers for the very worst reasons. It has to be distasteful even for the unions.

How you can help

Address tenure at the legislative level. Until tenure is addressed, any cushion in funding must first be used to protect our students. It is a frightful waste. If you do not understand how hard it is to contain unions at our level, just say the word "tenure" out loud in your world or try to tame your own unions and see what happens. Don't think we did not notice what it cost Metlakatla to release half a dozen teachers (around $400,000 plus legal fees, and I don't think they were even tenured teachers).

Issue 3: Staff Utilization

In addition to the costs of the tenure system, we also have pressure from another direction. One full-time person is needed just to ensure that we are meeting Federal and State program requirements. Perhaps large districts have programs that can make reports in 15 seconds. We can't afford $200,000 to have high-end, "Cadillac" systems. When State or Federal program managers ask for something, our staff gets out a pencil and goes to work. We are buried in "accountability".

Money is available for many of the things that could benefit our district, but that person does not even have time to chase it. Funding is available for housing, greenhouses and alternative energy. We don't have the capital for grants that require large dollar matches, especially when the requirements of the grants add to the costs. We simply cannot allocate the time to chase money when we need to use all of our resources to provide a quality education to our students. We only keep our doors open by individualizing education and being responsive to parent needs. To skimp on student service, with so many alternatives available and neighboring districts willing to transport or provide perks, will close our schools when every parent has the tenth student.

Many small grants of $1,000 to $5,000 are available for a multitude of projects, and they have reasonable success ratios. We already expect about 1.5 effort from every 1.0 employee. It takes more than someone taking the afternoon to write it. Someone also has to coordinate the project between nine schools, get buy-in at each, and connect that funding to chasing the next step. Using "low performers" for these tasks has not worked any better than it did in the classroom.

What you can do

Keep working on universal systems that will produce the needed data without huge human labor or force us to buy expensive programs.

Encourage state funding sources to make it easier for small districts to get smaller chunks of funding for worthwhile projects.

Issue 4: Funding

Even at the Department of Education, I have found a fundamental lack of understanding of how small schools are funded. Alaska Statute, Section 14.17.410. Public School Funding (E) …if a school district's ADM adjusted for school size under (A) of this

paragraph decreases by five percent or more from one fiscal year to the next fiscal year, the **school district may use the last fiscal year before the decrease as a base fiscal year to *offset* the decrease**....

This does not take into account the closure of a school due to not having ten students. If one of our schools does not make the ten-student minimum at the end of the count period, those students will generate zero dollars for that very year despite our sizable investment in the school and a teacher contract that I cannot break.

Alaska Statute, Section 14.17.450. School size factor. (b) If the ADM in a school is less than 10, those students shall be included in the ADM of the school in that district with the lowest ADM...

What that means is that those 9 students are counted in with a school that just made the 10-student standard and no, it does not mean if we had 2 schools of 9 that we get to count them as 1 school total. What it means is that we count it as 19 students somewhere and there is zero additional funding until you have 20 students. With count being determined for the year already in session, in November we can easily see the loss of $365,000 about nine months after we hired the teacher, who we cannot now fire, and purchased fuel and supplies. In fact, if we lose the tenth student on the last day of count, we have 9.95 students and no funding. No rational business would carry the risk of any school approaching 10 students and we should close them all. There is simply no way to predict right now what the count will be next October. There are many ways to crash these numbers. Let me identify **a few that have closed our schools before**.

- The PFD coming in October. This impact is magnified if the PFD is large.
- Any family crisis, death, legal issues, custody battles, job problems.
- Correspondence Programs. They can provide Internet and phone service to an isolated float house, causing a student to transfer as late as the last day of count.
- Alaskan Boarding Schools raid the count and close schools.
- Neighboring districts can and do run a bus into our district to raid students.
- Neighboring districts have paid mileage to parents taking our students to their district.
- Not knowing if we have funding and having to hire late. Many of our late hires have not even finished the year.

If the goal is to close as many small schools as possible, don't mess with a thing as we are doing a pretty good job of that across the state. If our goal is to provide a quality education to the students of Alaska or to retain our communities, then we need to find solutions to this issue. I know this is a daunting task for you. Many legislators view small schools as black holes sucking funding from their own more worthy constituents. I do not know what to suggest to you for failing schools, just don't let them throw successful programs under the bus.

As a district, we feel an obligation to keep communities whole. Once a school closes, the community crumbles and becomes summer home for mostly out-of-state visitors that bring little to the economy. Business ventures quickly fail, resulting in a skeleton town with no one to pay for maintenance or repairs. In our own district, this has

happened to Hyder, Myers Chuck and is about to happen in Port Protection. Year-round resident numbers plummet and families move when schools close. Seven other communities in our district hang by a thread. We are in a part of the state with some economic potential. We keep building roads and infrastructure, but I am not sure I see the point if we do not try to support viable communities.

We advocate for an addition to the safety net provided for district-wide drops in student count. The existing plan does not address the financial consequences of dropping below ten students at a specific site if district numbers did not fall as well. **Our recommendation is 90%-80%-70% funding, based on the number of students at that small site.** In this scenario, a school with between 9 students would receive 90% funding, a school with between 8 students would receive 80% funding and a school with between 7 students would receive 70% funding. We can't predict what the numbers will be during the count period, let alone any other time of year. One day it may be 12, a week later it could be 8, then it might climb to 14 before the month is out. No one can tell. We can't know that just because the student count drops to nine one year that a school will not recover. I can promise that just my suggestion that we are thinking of closing a school stops new students from coming and starts an exodus of those who can afford to attend elsewhere. I can also promise that if I have an exceptional teacher and I commit to a school, families begin to appear as if by magic. If I hesitate, that exceptional teacher is gone like a shot and everything crashes. Our teacher in whale Pass just told me that projections for next fall are for between 6 and 14 students. How can you plan for that?

How you could help

- **Rein in these correspondence programs and the perks they offer parents**
- **Not allow money to follow the student for commuters to another district or Boarding School**
- **Adjust the existing safety net in Section 14.17.410. Public School Funding to protect small schools with the 90-80-70 plan**
- **Let us know our funding first thing in the session**
- **Stop thinking we can keep doing more with less. We crossed that threshold a while ago**

Issue 5: Housing

We are all aware of problems with teacher housing in remote sites. We need a means to address this issue ourselves. We have staff and students capable of building housing units. We can't seem to acquire funding through AHFC and we simply cannot afford to build housing units their way. We don't have the funds to pay the required wages and to jump through the hoops, as we could never charge the rents needed to recover the costs to the district. We need access to funding that would support constructing these units ourselves. Programs like Habitat for Humanity only come with ideas and encouragement. Someone has to have the money. Teachers are living in trailers now we could not even give away. We hardly need $200,000.00 dollar units. They would be happy to be done with black mold, firetraps and water that does not freeze.

It is not just about teacher housing. The real handicap for community growth in southeast Alaska is affordable housing. Families want to move here, but reasonable housing is not available. Both housing issues need to be addressed.

How you can help

Look for ways to encourage the construction of housing for teachers and for new families outside of the AHFC model.

Issue 6: Push to form a Borough

Prince of Wales Island is a poster child for a borough. We cannot make that happen. Much like the tenure issue, there is nothing we can do about it without stronger legislative intervention. If left to nature, Ketchikan and Wrangell will eventual nibble at the island to get at mining revenues and avoid the communities and associated costs (Ketchikan grabbed up half of our district including the National Forest Receipts, but refused to annex the one community, Hyder, with a school that needed funding). I do not believe there will be any statistical evidence to suggest forming a borough would reduce the costs of schools, as union power increases and some type of administration is still required at each site. (It would be hard not to notice which districts you asked this week to explain their budgets and union contracts) Do you think it a coincidence that they have trouble holding down their unions? The bigger they get, the more they will drive the train. I have not noticed any better success with state unions.

It does save money for the state, as the borough must now cover some of the district's costs. People did not move to these more remote areas to vote new taxes upon themselves. Unless someone at your level is going to step up and force the issue, it will not happen except by predatory neighbors.

If we were looking to combine districts, we have nothing in common with larger schools like Craig, Klawock, Wrangell or Ketchikan. We would do better to combine with districts that are not even on our island. With technology, distance is not the issue that it once was. We have much more in common with Hydaburg, Chatham, Hoonah and Pelican School Districts, but the rules keep us from considering consolidating districts. There are enormous costs connected to combining districts. Unions will demand the highest salary scale; curriculum will need attention, and the energy to make it happen will require much time and energy. We could not afford to pursue combining districts even if it were possible.

How you can help

Find a way to make it possible for small districts to combine and encourage sharing of services.

Provide funds so it does not simply become an additional financial hardship to jump through all of the hoops.

Either force the borough or stop suggesting it is the district's fault that we don't have one.

Issue 7: Governor's Performance Scholarship Program

We have spent years trying to build electives back into our schools. In one quick moment the Governor's Scholarship swept those out the door. While this was an unintended consequence, it is obvious that the old system worked fine for district's that have few graduates from each site. While not every student feels the need for the extra science or math, the flood to other classes left elective classes too small to justify financially. This risks the loss of students that are the hardest to serve and puts our graduation rates at greater risk. While our graduation rates are outstanding, would you care to guess which students we lose? It is not the students racing to these additional required core classes. My favorite part is that now I have hired additional staff for these required classes, while I cannot figure out what to do with tenured teachers that "were" teaching the classes students wanted to be in and which kept them in school.

For small schools, the system was not broken to start with. It would seem to be targeted at districts that already were able to offer more classes so that more than 10% of their seniors could secure funding. It will not improve graduation rates in small schools and will have the opposite effect. We are fine with the program. You cannot expect students to rise to low expectations, but there are always unintended consequences if you try to address specific problems whether they are problems for SISD or different problems for Anchorage.

You have a difficult task and I applaud your efforts to sort it all out in a world where no good deed goes unpunished. Thank you for your tireless efforts.

Sincerely,

Lauren Burch

EDUCATION

What is the most important way education should prepare the youth in this community for their lives?

37%	Graduating with skills needed for success in college or vocational schools
30%	Developing adaptable skills for living and working anywhere
20%	Knowing how to think things through and solve problems

Families are our children's first teachers. My top choice for creating successful students is to:

44%	Teach, show, and live what we expect for them
21%	Get our children to school on time, fed and well-rested
18%	Read to our children at home every day, especially from birth to age 5

The best way to create excellent schools is:

41%	We communicate with our schools to reflect local values and priorities
30%	Schools/districts offer higher-level courses to prepare students for college
17%	Families and community members welcome school staff to the community

Leading the Way

Northwest Arctic Borough School District

"Educating Our Children to Lead Successful Lives"

P.O. Box 264 • Kotzebue, Alaska, 99752 • Phone (907) 442-3472 • Fax (907) 442-2392

Mission:

To graduate students with the skills and confidence to be good citizens.

Vision:

"To be a leader in Pre-K – 14 education based on student achievement and graduation rates."

March 14, 2012

House Education Committee
Testimony: Star of the Northwest Magnet School

Dear Honorable Education Committee Members:

I was honored to be able to have this opportunity to be able to tell you about the excellent working relationship that the Northwest Arctic Borough School District has with the Alaska Technical Center (ATC) and Chukchi College (extension of the University of Alaska, Fairbanks). This is an exemplary K-12 and post-secondary cooperative association that enriches opportunities for high school students.

Enclosed, please see the 9 minute video entitled, "Star of the Northwest" that I would like you to watch this morning. Also, there are 10 copies of our "Star of the Northwest Magnet School" booklet so each committee member can have one.

I am sorry not to be there in person with you this morning, but I will be in town this coming Friday and hope to see you.

We are remodeling the Alaska Technical Center with money the legislature appropriated, over the last 2 years, so it can serve high school as well as adult students in its programs, and be the *Star of the Northwest*. Chukchi College has been a great partner in offering classes taught by university staff, school district teachers, or ATC instructors with students receiving dual high school/college credit and vocational certificate hours.

The three "magnets" of the Star of the Northwest are Process Technology, Health Care, and Public School Teaching. After the video I will be pleased to answer any questions you might have.

Sincerely Yours,

Norman Eck

Norman Eck, Ph.D.
Superintendent

STAR OF THE NORTHWEST
MAGNET SCHOOL

A Unique School

Star of the Northwest Magnet School will be Alaska's first dedicated statewide residential high school and post-secondary institution.

The Northwest Arctic Borough School District is taking a creative approach to addressing the need for specialized education in rural Alaska by establishing a unique new school in Kotzebue. Star of the Northwest Magnet School will provide students in grades 11-14 with curricula tailored to preparing them for careers in rural Alaska's high-demand fields, such as health care, resource development and education.

Rural Alaska is characterized by small, isolated communities that each rely on one school to provide a general curriculum for all students K-12. Although career opportunities exist in and near these communities, small, rural high schools are unable to provide students with the specialized education necessary to qualify for those opportunities.

Star of the Northwest Magnet School is open to students from anywhere in Alaska, but its primary purpose is to give rural students access to high-quality academic and vocational programs that are often absent or insufficient in their local schools. With that in mind, the school will eventually build a dormitory to house students from remote villages.

This new school maximizes existing educational resources and capitalizes on a successful, long-standing partnership within the Northwest Arctic Borough School District that includes Kotzebue High School, Alaska Technical Center and Chukchi College, which is a community campus of the University of Alaska Fairbanks College of Rural and Community Development.

A Creative Solution

The district envisions Star of the Northwest Magnet School as a catalyst that will prepare rural students for careers in Alaska's classrooms, health clinics, hospitals and resource development industry. This new school will produce generations of teachers and professionals who were born and raised in rural communities and, therefore, are more likely to stay in their villages to form a stable foundation of long-term educators, health care providers and technical experts.

By combining career-oriented curricula with campus housing, Star of the Northwest will be a uniquely valuable facility that strengthens Alaska's workforce by developing the talents of rural students.

What is a Magnet School?

A magnet school is a public school that has a specialized curriculum or courses focused on specific areas. The term "magnet" refers to the fact that such a school attracts students from outside the school district in which it is located.

A magnet school gives each student the freedom and opportunity to concentrate on a single discipline, rather than a generalized course of study. This gives students the same opportunities urban students have to access advanced and specialized programs that provide a head start on their chosen careers.

According to the U.S. Department of Education, in many communities, magnet schools are the highest-performing schools in their systems. In general, they are known for higher student achievement, increased parent and community involvement, and staff and curricular coherence.

Alaska continues to import over 70% of its education workforce. On average, teacher turnover in rural communities exceeds 20%, double the rate in urban communities.

The Star of the Northwest Magnet School Advantage

Most public schools offer a standardized curriculum to provide all students with a general, broad-based education. Star of the Northwest Magnet School allows students to concentrate on one discipline, much like a college major.

This tailored approach allows the school to attract highly qualified educators who have expert knowledge in specific areas. In addition, the school has access to uniquely valuable resources because it has multifaceted support from federal and state agencies, borough departments, and private and Native corporation organizations.

Star of the Northwest Magnet School utilizes the following resources:

- Strategic plan
- Dedicated career and technical education staff
- Community infrastructure
- World-class mine nearby
- Regional hub community
- Support of regional corporation (NANA)
- Pre-K-14 governance of all operational services
- Federal investment
- State investment

High School and College in One

Star of the Northwest Magnet School has a unique structure in that the coursework covers the last two years of high school and continues for two years of post-secondary education, leading to an associate's degree (i.e. grade 14). Classroom study is combined with hands-on or field study through cooperation with several regional partners.

Education

- Instructional aide
- Early childhood aide
- K-12 teacher

The Northwest Arctic Borough School District is a member of the Future Educators of Alaska program. In addition to academic coursework, Star of the Northwest Magnet School students gain experience in classrooms.

Health care is the state's largest growth industry, expected to add more than 7,000 jobs by 2018.

Health care

- Prep for nursing school (to become a registered nurse)
- Aide
- Orderly
- Attendant
- Personal care assistant
- Home care assistant
- Medical coding technician
- Certified nurse's assistant

Star of the Northwest Magnet School partners with Maniilaq Association to provide students with hands-on experience in hospitals, doctors' offices and village medical clinics.

Process Technology

- Millwright
- Mill operator
- Welder
- Commercial driver
- Construction (various trades)

As a part of the Northwest Arctic Borough School District, Star of the Northwest Magnet School partners with Red Dog Mine, which allows students to get hands-on technical education and serve apprenticeships at the mine.

Progress to Date

Star of the Northwest Magnet School has opened its doors and is educating students on a limited basis. However, until funding is in place and a dormitory is built, the school cannot fulfill its primary function of housing and educating students from rural communities.

The school and district have made outstanding progress towards their goal of establishing Alaska's most innovative and effective magnet school. The curricula have been developed and are currently being implemented. The federal government has provided funding through a $1.5 million Expanding Horizons grant and construction is underway on shop and classroom space with $14 million in funding from the state of Alaska.

The next step is to move forward with plans to construct a 100-student dormitory.

Admission

Admission to Star of the Northwest Magnet School is granted upon approval of a student's application and differs from other public schools in that enrollment is limited to students entering 11th grade. The application and enrollment process will be consistent with Alaska's residential high schools.

Student Activities

Star of the Northwest Magnet School 11th and 12th grade students are enrolled as full-time students at Kotzebue High School and have equal opportunity to participate in all KHS programs and activities.

Jobs in the mining industry are among the highest-paying in the state and are often located in rural areas, where employment need is the greatest.

Long-Term Benefits

The long-term benefits of an innovative magnet school that prepares rural students for lasting careers will be critical to improving the economies and quality of living in both rural communities and the state overall.

At its full level of enrollment, Star of the Northwest Magnet School will graduate 50 students from high school and 50 or more students from Alaska Technical Center and Chukchi College programs every year. These graduates will provide a steady stream of qualified employees for Alaska's health care, resource development and education workforce.

Star of the Northwest Magnet School is positioned to both improve the lives of individual students and help the state grow its economy by inspiring Alaska's best and brightest to live and work right here at home.

Quality Teachers providing quality instruction

- Over half of our teaching staff has been in Valdez over 16 years.
- The vast majority of teachers have their Master's Degrees in education.
- Our teachers are always looking for possible changes to enhance the education of the student of Valdez.
- Our school district is currently investigating the possibility of a four day school week.

Valdez High School

- Current enrollment is 225 and has been relatively steady the last 4 years
- Students receive 5 hours 36 minutes of daily instruction
- A Career Center was established in 1999 to counsel students on career and post secondary choices
- Career and Technical Education classes have been expanded in response to student interest and industry needs
- VHS began offering dual credit classes in partnership with Prince William Sound Community College in 1995
- Surveys are given to alumni after 5 years out of VHS to track their success and gather information on their opinions on how VHS had prepared them for their future endeavors.

Gilson Junior High

- School Motto is "Success is the only Option"
- Current enrollment is 99, and has declined slightly the last 4 years
- Grades 7 and 8 are housed in our oldest building which was constructed after the 1964 Earthquake when the town was moved
- Students receive 5 hours and 50 minutes of instruction each day due to shortened lunch and an added MARS (Mentoring, Advisory, Reading, Study Skills) time
- Student get the choice of having core curriculum taught in single sex or mixed classes
- There is one period of electives, each run a semester
- Each student has a personal education plan where they establish their goals and develop a plan to achieve those goals
- After the Bell Program tutors students afterschool
- 2010-2011, the class of 2015 (55 students) raised their SBA scores an average of 139.4 points/student in two years. 64% of students met the national and presidential fitness challenge.

Hermon Hutchens Elementary

- Current enrollment is 350 and has been relatively steady the last 4 years
- Grade levels are pre-K through 6th
- Pre-K is our early intervention strategy for developmentally delayed children ages 3 – 5 allowing some typical peers to attend
- Kindergarten is a full day model
- There are either 2 or 3 classes per grade level
- Students receive 5 hours and 35 minutes of daily instruction
- The smallest class size is 17 and largest is 25
- Extra enrichment classes include Technology, PE, Positive Action, Library, and Music
- Identified students are given intervention in reading, math, writing and small group counseling
- Enrichment is provided by the Extended Learning Opportunities Teacher (G/T)

Curriculum and Professional Development

Curriculum Development Model

- Review curriculum for top three schools in the nation. - Blue Ribbon Schools of Excellence
- Use State/National Standards as guide
- Use the developed 6 year curriculum cycle to ensure current research and best practices are employed
- Provide ongoing training for teachers to correctly implement new strategies and material
- Hire top notch teachers and keep them trained continually
- Excellent materials, effective delivery, alignment with state, national standards, and effective articulation through the grade levels is a MUST
- Keep targeting student learning needs through a variety of assessment strategies and keep finding new ways to do this

CS FOR HOUSE BILL NO. 5( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVE KELLER

A BILL

FOR AN ACT ENTITLED

"An Act requiring school districts to develop and require a history of American constitutionalism course and examination in secondary schools in the state; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SHORT TITLE. This Act may be known as the American Constitutionalism History Literacy Act.

*** Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS. The legislature finds that

(1) the adoption of the Declaration of Independence, the Articles of Confederation, the Constitution of the United States, and the Bill of Rights were seminal events in the history of the United States of America;

(2) American constitutionalism represents this country's greatest gift to human freedom; its ideals, ideas, and institutions have influenced different people in different lands at different times;

(3) an early understanding of American constitutionalism empowers students to make rational, evidence-based decisions regarding their civic judgments, rights, and duties;

(4) a number of historical written documents that appeared over a span of 15 years continue to serve to define our national identity and our constitutional republic form of government: the Declaration of Independence, the first state constitutions, the Articles of Confederation, the Constitution of the United States, the Federalist Papers, and the Bill of Rights; a general understanding of the philosophies and historical context that generated those documents is an essential element in the education of Alaska students;

(5) the Citizens' Advisory Task Force on Civics Education Policy, in its report dated January 2008, made a strong case for improving civics education; this Act should be applied in the context of school district response to the recommendations in the report.

* **Sec. 3.** AS 14.14 is amended by adding a new section to read:

Sec. 14.14.095. Secondary school history of American constitutionalism course and examination. (a) The chief school administrator of a school district shall develop and submit to the governing body of a school district for approval a syllabus for a one-semester course and final examination in the history of American constitutionalism to be taught to all students enrolled in grade 12 in the district. An approved syllabus must ensure and test students' understanding of the history of American constitutionalism as portrayed in the Declaration of Independence, the first state constitutions, the Articles of Confederation, the Constitution of the United States, the Federalist Papers, the Bill of Rights, and other historical documents produced in the founding of our constitutional republic model of government.

(b) A district may not issue a secondary school diploma to a student who does not successfully complete the course and examination described in (a) of this section. A school district may not grant a waiver of this requirement.

(c) In this section, "district" has the meaning given in AS 14.17.990.

* **Sec. 4** This Act takes effect July 1, 2012.

Sec. 3. AS 14.03 amendments:
Sec. 14.03.072. Statewide history of American constitutionalism curriculum and examination; annual report;
Sec. 4. AS 14.03.075(a) is amended to read: (a) A student may not be issued a secondary school diploma unless the student passes a competency examination in the areas of reading, English, ***history of American constitutionalism...***
Section 14.03.072 would require the department to revise the current Government and Citizenship content standards; create Performance Standard Grade Level Expectations (PSGLE) for these standards, and, create a Standards Based Assessment (SBA), specifically only measuring strand B of the current standards.

American Constitutionalism Standards development estimated cost for grades 4, 8, and 10 are $84,300 (four statewide meetings).
Item review, cut score determination estimated at $84,300 (four statewide meetings).
SBA development and implementation in 4, 8, and 10 is estimated at $645,000.

In addition to the SBA requirement, the High School Graduation Qualifying Exam (HSGQE) would have to be modified to include this strand.
The HSGQE grade 10 estimated additional assessment cost is $390,000.
Grade 11 and 12 estimated additional assessment cost is $390,000.

Beginning FY2012, estimated annual assessment cost: $665,000 (grades 4, 8, and 10); HSGQE $780,000.

Establishing FY2012 as the base year to begin assessments, an annual cost increase estimate of 5% has been added to FY2014 - FY2017 for the test contract administration.

House Bill 5
Sponsor Statement

"An Act requiring a standardized statewide history of American constitutionalism curriculum and a secondary school history of American constitutionalism examination in public schools in the state; and providing for an effective date."

The Spanish American philosopher George Santayana once said, "Those who cannot remember the past are condemned to repeat it."[1] It would be an unthinkable tragedy to repeat the human oppression that existed before our country's greatest gift to humankind: The gift of awareness that we all have fundamental rights that belong to us by virtue of the fact that we are human and that the only valid government is what is allowed by the governed. These and other profound foundational truths need to be understood and preserved.

House Bill 5 presumes we are in danger of forgetting, and requires American History education to include teaching of "**American Constitutionalism**" as defined by six founding documents that established the most prosperous and powerful nation on earth: the Declaration of Independence; Early State Constitutions; the Articles of Confederation; The US Constitution, the Federalist, and the Bill of Rights.

HB 5 requires Alaska School Districts to teach American Constitutionalism and to monitor and report student learning. It also requires the Department of Education to provide a curriculum and a standard student proficiency measurement tool as a resource to be made available to school districts. Presumably, this curriculum, and even the testing process, will be efficiently made available digitally, on-line, in a format that will be usable to students, teachers, and school administrators anywhere in Alaska, any time of the day. School districts would have the option of using these resources as a curriculum or as a supplement to enhance existing district curricula to enable compliance.

Students will be required to demonstrate a level of proficiency as part of their exit exam. The Department will provide a report on the effectiveness of this mandate in it's annual communication with the Governor and Legislature.

The goal of House Bill 5 is to keep Alaska and America strong and to preserve the principles that have provided the greatest prosperity and liberty this world has ever known.

MEMO

To: Members of the Alaska Legislature

Date: February 15, 2011

Re: Sectional of CS for House Bill 5 (27-LS0018\D)

CS for House Bill 5 is broken into four sections:

1. Established the title of the Act.

2. Legislative Findings that stress the importance of the founding documents to this country. Those documents include the Declaration of Independence, the first state's constitutions, the Articles of Confederation, the Constitution of the United States, the Federalists Papers and the Bill of Rights. It is critical that students understand these documents and their historical context as part of their education.

3. Local school districts will establish a one semester course and final exam that represents one-half credit during the senior year of high school on these documents and historical context which will supplement the U.S. government course also taught in the senior year.

4. Effective date

MEMO

To: Members of the House Education Committee

Fm: Representative Wes Keller

By: Jim Pound

Date: March 01, 2011

Re: Response to questions on Constitutionalism

Members of the Committee asked on Friday for a definition of Constitutionalism of which I indicated it is a fairly common term. We conducted some research using both legal and search engines. A simple Google Search generated nearly 2-million potential references. Based on research using legal and generic on-line search engines Constitutionalism is a commonly used term in both professional and non-professional circles.

This memorandum provides several scholarly examples of the discussion of Constitutionalism that should provide answers to the committee questions in preparation for the next hearing and passage from committee of CSHB 5.

If we can be of any assistance please do not hesitate to call.

The information contained in this memo is **CONFIDENTIAL** and/or privileged. This memo is intended to be reviewed initially by only the individual named above. If the reader of this page is not the intended recipient or a representative of the intended recipient, you are hereby notified that any review, dissemination, or copying of this memo or the information contained herein is prohibited. If you have received this memo in error, please immediately notify the sender by telephone and return this memo to the sender at the above address.

Thank you

In his book Constitutionalism, political scientist and constitutional scholar David Fellman (1907 – 2003), writes:

> "Constitutionalism is descriptive of a complicated concept, deeply imbedded in historical experience, which subjects the officials who exercise governmental powers to the limitations of a higher law. Constitutionalism proclaims the desirability of the rule of law as opposed to rule by the arbitrary judgment or mere fiat of public officials.... Throughout the literature dealing with modern public law and the foundations of statecraft the central element of the concept of constitutionalism is that in political society government officials are not free to do anything they please in any manner they choose; they are bound to observe both the limitations on power and the procedures which are set out in the supreme, constitutional law of the community. It may therefore be said that the touchstone of constitutionalism is the concept of limited government under a higher law."

Professor Fellman continues:

> "Whatever particular form of government a constitution delineates, however, it serves as the keystone of the arch of constitutionalism, except in those countries whose written constitutions are mere sham. Constitutionalism as a theory and in practice stands for the principle that there are—in a properly governed state—limitations upon those who exercise the powers of government, and that these limitations are spelled out in a body of higher law which is enforceable in a variety of ways, political and judicial. This is by no means a modern idea, for the concept of a higher law which spells out the basic norms of a political society is as old as Western civilization. That there are standards of rightness which transcend and control public officials, even current popular majorities, represents a critically significant element of man's endless quest for the good life.")

(David Fellman, "Constitutionalism"), vol 1, p. 485, 491-92 (1973-74)

Constitutionalism goes far beyond what can be perceived as just a legal term as it is in fact an "ism". We fully understand this concept since most of what we deal with in our daily lives involves beliefs. When you sit in a committee room or on the floor, you are surrounded by individuals with their beliefs, "isms" if you will. On a larger scale, the question that needs to be asked; What is the United States of America? What was the Soviet Union or is the Peoples Republic of China other than an "ism"? We believe our form of government is the best in the world and are very glad to export it to other countries by various means.

Constitutionalism in this country is not an unknown evil. Our founding documents created a nation that by world standards are is fairly new, although their roots can be traced back to even the Roman Empire.

> Constitutionalism has prescriptive and descriptive uses. Law professor Gerhard Casper captured this aspect of the term in noting that: "Constitutionalism has both descriptive and prescriptive connotations. Used descriptively, it refers chiefly to the historical struggle for constitutional recognition of the people's right to 'consent' and certain other rights, freedoms, and privileges.... Used prescriptively ... its meaning incorporates those features of government seen as the essential elements of the ... Constitution."
>
> **Leonard Levy, ed., *Encyclopedia of the American Constitution*, (Gerhard Casper, "Constitutionalism"), vol 2, p. 473, 473 (1986) ISBN 9780028648804**

Understanding of the two applications of constitutionalism is further explored by the following authors:

Descriptive use

One example of constitutionalism's descriptive use is law professor Bernard Schwartz's 5 volume compilation of sources seeking to trace the origins of the Federal bill of rights. Beginning with English antecedents going back to the Magna Carta (1215), Schwartz explores the presence and development of ideas of individual freedoms and privileges through colonial charters and legal understandings. Then, in carrying the story forward, he identifies revolutionary declarations and constitutions, documents and judicial decisions of the Confederation period and the formation of the federal Constitution. Finally, he turns to the debates over the federal Constitution's ratification that ultimately provided mounting pressure for a federal bill of rights. While hardly presenting a "straight-line," the account illustrates the historical struggle to recognize and enshrine constitutional rights and principles in a constitutional order.

Bernard Schwartz, *The Roots of the Bill of Rights* (5 vols., Chelsea House Publisher, 1980) [ISBN 9780877542070].

Prescriptive use

In contrast to describing what constitutions are, a prescriptive approach addresses what a constitution should be. As presented by Canadian philosopher Wil Waluchow, constitutionalism embodies "the idea ... that government can and should be legally limited in its powers, and that its authority depends on its observing these limitations. This idea brings with it a host of vexing questions of interest not only to legal scholars, but to anyone keen to explore the legal and philosophical foundations of the state."

***Stanford Encyclopedia of Philosophy*, Wil Waluchow (Constitutionalism) (Intro Jan 2001 (revised Feb 20, 2007).**

Conclusion

As indicated earlier in this memo, the term Constitutionalism is, in the right circles a very common term. The concept dates back to Roman times but begins to be more properly defined by today's standards in the Magna Carta (1215). Historically, the United States' is founded on documents generally created during a 15 year period of time. These documents represent the true law of the land and rule of law. It is critical that our youth have a working knowledge of these documents, what they mean to this country, and how they should be read. Like many historical documents it takes an interpretative ability to read and fully understand the intent in the writing style of the time. Three hundred years from now people will do the same thing with our words. The key to interpretation is not to second guess the intent but to look at it from the perspective in which it is written.

Committee Substitute for House Bill Five will give our children the opportunity to learn how to review, understand, and lead using our countries founding documents. Public comment on the bill will go far beyond these halls, as it will trickle down to school boards around the state. What will end up in the classroom may look very much different than what we are visualizing. Some districts may impose a strict set of guidelines and examinations as they feel it is that important. Others may feel it is only a supplement to their current curriculums. The key is Constitutionalism will be in the forefront, and Alaskan's will be the leaders in bringing the goals of this country back to life.

MATANUSKA-SUSITNA BOROUGH SCHOOL DISTRICT
RESOLUTION NO. 11-011

A RESOLUTION OF THE MATANUSKA-SUSITNA BOROUGH SCHOOL DISTRICT RECOMMENDING CIVICS BE A REQUIRED COURSE IN ALASKA'S PUBLIC HIGH SCHOOLS

WHEREAS, the United States Constitution is the fundamental law of the United States; and

WHEREAS, too many people in the United States fail tests of civic literacy; and

WHEREAS, many high school students know little of our founding fathers and their contributions to our country and way of life; and

WHEREAS, the percentage of eligible voters voting in local and State elections is unacceptably low; and

WHEREAS, fewer than half of all people in the United States can name the three branches of the United States Government or know the differences and duties; and

WHEREAS, our democratic process and republican form of government are at risk due to the low voter turnout; and

WHEREAS, research shows that an increase in civic knowledge, including that of the United States Constitution, supporting documents such as the Declaration of Independence and the Bill of Rights almost invariably leads to the beneficial use of that knowledge; and

WHEREAS, research shows that greater civic learning leads to more active citizenship, and people in the United States who fulfill their civic obligations beyond voting are more knowledgeable about their country's history and institutions:

NOW THEREFORE BE IT RESOLVED, it is the position of the Matanuska-Susitna Borough School District that:

1. High school students across Alaska should be required to take at least .5 credit of civics that focuses on learning about the Alaska Constitution, the United States Constitution and documents such as the Declaration of Independence, the Bill of Rights and the Federalist Papers, acknowledgment of these historic documents which constitute the very foundation of our state and country, is critical to being an responsible citizen and that this class also includes non-partisan and detailed information about the branches and functions of local, state and US government; their differences, the duties of elected officials and the judiciary, public elections, political parties and duties of US citizens as voters, and

2. Upon reaching voting age, high school seniors should engage in civic learning activities on an issue of importance to them to demonstrate their understanding of their rights and responsibilities as citizens of the United States;

NOW THEREFORE BE IT FURTHER RESOLVED, it is also the position of the Matanuska-Susitna Borough School District that the State of Alaska adopt by law the requirement that each high school student be required to successfully complete .5 credit of civics with the founding documents as a basis of such a requirement as a condition for graduation.

ADOPTED by the Matanuska-Susitna Borough School Board this 2nd day of February, 2011.

Michael Dunleavy, Board President

Kenneth Stephen Burnley, Ph.D., Superintendent

ATTEST:

Stacy Escobedo, Board Secretary

From: James Mabry [redacted]
Sent: Wednesday, February 09, 2011 6:46 PM
To: Rep. Wes Keller
Subject: Constitutional Studies

Hello,
Love your idea about teaching kids about our founding documents. ... I posted the bit below on KTUU's website. Thought you might appreciate my thoughts about "the cost".

First, This is a great idea. Not only would it help our society in general but it will make liberals flop and twitch... which will be worth the effort to do it!
Second, what the heck? How much would it cost??? You don't need much as far as class materials go. You don't need any special facilities, etc. Get on the web and get some public domain materials and go for it.
Of course, the real problem is very few public school teachers know diddly squat about the material, so that will be a problem. Bring in guest teachers working as volunteers. I could prep for the first class in a few hours time and do rather well at it. It all is just one big combination of vocabulary and mindset. Money, as an item that needs much consideration for this, is a laughable ruse to delay.

My two cents, mileage varies. Good Luck To You!
Thanks for your efforts.
James Mabry
Anchorage

Chief Justice Walter L. Carpeneti
Closing Comments To The First Session of The Twenty-Seventh Alaska Legislature
March 9,2011

... I would like to close these remarks with a note about a topic that in recent years has become, I believe, central to our democracy: the need to foster civic education and engagement in America ... for the young people who will carry them forward into the future. As citizens in a democracy, we all have a responsibility to understand how our government functions and the role we each play in the success of our country. Yet a recent national poll found that while over two-thirds of America can name at least one judge on the TV program "American Idol", less than one third can name the three branches of government! **James Madison**, the founding father often hailed as the father of the U.S. Constitution, anticipated the challenge of educating for democracy by reminding us that ***"knowledge will forever govern ignorance, and a people who mean to be their own governors must arm themselves with the power which knowledge gives."***

...I would like to conclude today with an invitation to each of you--- legislators and... anyone watching this speech--- to join me in the effort to instill in our young people the same knowledge and respect for the laws and institutions of our country that we are all privileged to share. Log on to ***civics.org*** and check out the games, web quests, and lesson plans for yourself. And, after you have done that, let the educators in your communities know about the opportunity and urge them to visit the website and use it in their classrooms... Check it out.

... **Thomas Jefferson** said ***that "the qualifications for self government are not innate.... [T]hey are the result of habit and long training."***. As we work together to advance cost-effective justice, we must remember that the greatest guarantee of a strong future for all three branches of government is a citizenry that understands and embraces the fundamental principles of democracy.

Mister President, Mister Speaker, Thank You...

Chapter 04
Statewide Goals

4 AAC 04.010. Purposes and responsibilities

(a) This chapter sets out statewide goals for public education, and adopts, by reference, content standards for several subject areas, and performance standards for reading, writing, and mathematics.

(b) The purposes of the goals are to

(1) encourage the school districts to envision and develop local educational plans that are unique to each district's culture, geography, and climate, and that will graduate world-class students;

(2) empower the public with the knowledge that the skills and subjects included in this chapter are of great importance to education so that the public can participate in local educational planning with more authority and effect; and

(3) set standards against which the public, school districts, teachers, and students can measure the quality of education that students receive.

(c) The content standards and goals referred to in this chapter identify student abilities that evidence mastery of a subject area. The content standards are not graduation requirements or components of a curriculum, but they establish what constitutes excellent educational results. The content standards and goals are intentionally broad to allow a school district to tailor its curriculum to the conditions, goals, and expectations of its community. A school district board, working with the public, teachers, and students shall choose and implement effective teaching strategies so that its students will achieve high performance in a subject area. These strategies should be reflected in

(1) the development, selection, and implementation of the school district board policies;

(2) the curriculum and assessment required by 4 AAC 05.080; and

(3) teaching methodology, textbooks and instructional materials, and management practices.

4 AAC 04.020. Skills for graduating students

(a) A goal of the state public school system is to graduate students who will

(1) possess a broad knowledge base;

(2) communicate effectively;

(3) use technology skills;

(4) think logically and critically;

(5) be healthy;

(6) recognize, value and use creativity;

(7) be responsible and ethical citizens and community members; and

(8) be enthusiastic learners.

(b) The department's publication, *World-Class Students Graduation Outcomes*, as revised as of March 19, 2009, is adopted by reference. The goals expressed in *World-Class Students Graduation Outcomes* represent goals of the state public school system.

4 AAC 04.140. Content standards

(a) The content standards for the subjects listed in this subsection, as set out in the department's publication entitled *Alaska Standards: Content and Performance Standards for Alaska Students*, as revised as of March 2006, are adopted by reference. The subjects are

(1) English/language arts;
(2) mathematics;
(3) science;
(4) geography;
(5) government and citizenship;
(6) history;
(7) skills for a healthy life;
(8) arts;
(9) world languages;
(10) technology; and
(11) employability.

(b) The content standards for physical education, as set out in the department's publication entitled *Alaska Physical Education Standards*, as revised as of March 9, 2010, are adopted by reference.

History: Eff. 3/2/2000, Register 153; am 11/10/2005, Register 176; am 5/18/2006, Register 178; am 8/18/2010, Register 195
Authority: AS 14.03.015 AS 14.03.120 AS 14.07.020 AS 14.07.060 AS 14.07.165

Sec. 14.03.075. Secondary student competency testing.

(a) A student may not be issued a secondary school diploma unless the student passes a competency examination in the areas of reading, English, and mathematics or receives a waiver from the governing body. A governing body may not grant a waiver to a student before the student's final semester of attendance. The department shall determine the form and contents of the examination and shall score completed examinations.

(b) A student who fails the examination required under this section shall be retested at least once during a school year on those portions of the examination that the student has not passed. A student who passes any portion of the test may not retake that portion of the test. A student who, when retested, passes the portions of the test not previously passed and who meets any other graduation requirements shall receive a diploma from the school district. This subsection does not apply to a student who is a child with a disability if the student's individualized education program team recommends that the student not be retested.

(c) Notwithstanding (a) of this section,

(1) a student who is a child with a disability and who does not achieve a passing score on the examination required under (a) of this section, with or without accommodation, is eligible to receive a diploma if the student successfully completes an alternative assessment program required by the student's individualized education program or required in the education plan developed for the student under 29 U.S.C. 794; an alternative assessment program must, to the maximum extent possible, conform to state performance standards established for the competency examination required under (a) of this section; this paragraph does not apply to a student unless the department determines that the student has taken and failed to pass the competency examination with or without accommodations and the department approves the student's alternative assessment program described under this paragraph; and

(2) a student who transfers into a public high school in this state shall receive a diploma if the student

(A) meets graduation requirements imposed by the governing body and the state; and

(B) has passed a competency examination in the state from which the student transferred.

(d) A student who fails to qualify for the issuance of a diploma under (a) of this section or a retest under (b) of this section by the end of the student's final semester of attendance, but who has met all other graduation requirements of a governing body and the state, shall be awarded a certificate of achievement. A certificate of achievement may include the following information:

(1) the portions of the examination described under (a) of this section that were passed;

(2) the student's attendance record; and

(3) other information indicating the qualifications of the student that the governing body determines appropriate.

(e) The department shall by regulation establish uniform standards for

(1) pre-examination study materials; and

(2) procedures to be followed during administration of an examination.

(f) The department shall by regulation establish uniform standards for an alternative assessment program required under (c)(1) of this section. The alternative assessment program required under (c)(1) of this section applicable to an individual student may not be changed after February 1 of the student's junior year of study.

(g) In this section,

(1) "child with a disability" has the meaning given in AS 14.30.350;

(2) "individualized education program team" means a group of people that translates child assessment information regarding a child into a practical plan for specially designed instruction and delivery of services for the child, consisting of the persons necessary to qualify the team under appropriate federal regulations applicable to a child with a disability who is eligible for special education services under AS 14.30.

((1 ch 58 SLA 1997; am 2 ch 94 SLA 2001; am 24 ch 35 SLA 2003; am 14 ch 41 SLA 2009))

Administrative Code. - For statewide student assessment, see 4 AAC 6, art. 4.

Effect of amendments. The 2001 amendment rewrote subsections (a) and (b) and added subsections (c)-(g). The amendment to subsections (a) and (b) by section 2, ch. 94, SLA 2001 amended those subsections before they became effective. Sections 7 and 11, ch. 94, SLA 2001 amend 3, ch. 58, SLA 1997 to make this entire section effective February 1, 2004.

The 2003 amendment, effective February 1, 2004, at the end of paragraph (1) of subsection (g), substituted "in AS 14.30.350" for "'children with disabilities' in AS 14.30.350".

The 2009 amendment, effective June 21, 2009, in (g), rewrote (g)(2), which read, "'individualized education program team' has the meaning given in AS 14.30.350."

Effective dates. Section 3, ch. 58, SLA 1997 made this section effective January 1, 2002. However, 7, ch. 94, SLA 2001 changes the effective date of the section to February 1, 2004.

Editor's notes. AS 14.30.350, cited in (g)(2) of this section, was repealed by 41, ch. 67, SLA 2001.

Companion Bill S. 504

108TH CONGRESS
1ST SESSION

H. R. 1078

To establish academies for teachers and students of American history and civics and a national alliance of teachers of American history and civics, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

MARCH 4, 2003

Mr. WICKER introduced the following bill; which was referred to the Committee on Education and the Workforce

---

A BILL

To establish academies for teachers and students of American history and civics and a national alliance of teachers of American history and civics, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "American History and Civics Education Act of 2003".

SEC. 2. DEFINITIONS.

In this Act:

(1) AMERICAN HISTORY AND CIVICS.—The term "American history and civics" means the key events,

key persons, key ideas, and key documents that shaped the institutions and democratic heritage of the United States.

(2) CHAIRPERSON.—The term "Chairperson" means the Chairperson of the National Endowment for the Humanities.

(3) INSTITUTION OF HIGHER EDUCATION.—The term "institution of higher education" has the meaning given the term in section 101(a) of the Higher Education Act of 1965 (20 U.S.C. 1001(a)).

(4) KEY DOCUMENTS.—The term "key documents" means the documents that established or explained the foundational principles of democracy in the United States, including the United States Constitution and the amendments to the Constitution (particularly the Bill of Rights), the Declaration of Independence, the Federalist Papers, and the Emancipation Proclamation.

(5) KEY EVENTS.—The term "key events" means the critical turning points in the history of the United States (including the American Revolution, the Civil War, the world wars of the twentieth century, the civil rights movement, and the major court decisions and legislation) that contributed to

extending the promise of democracy in American life.

(6) KEY IDEAS.—The term "key ideas" means the ideas that shaped the democratic institutions and heritage of the United States, including the notion of equal justice under the law, freedom, individualism, human rights, and a belief in progress.

(7) KEY PERSONS.—The term "key persons" means the men and women who led the United States as founding fathers, elected officials, scientists, inventors, pioneers, advocates of equal rights, entrepreneurs, and artists.

(8) NONPROFIT EDUCATIONAL INSTITUTION.—The term "nonprofit educational institution"—

(A) means—

(i) an institution of higher education; or

(ii) a nonprofit educational research center; and

(B) includes a consortium of entities described in subparagraph (A).

(9) STATE.—The term "State" means each of the 50 States and the District of Columbia.

SEC. 3. PRESIDENTIAL ACADEMIES FOR TEACHING OF AMERICAN HISTORY AND CIVICS.

(a) ESTABLISHMENT.—From amounts appropriated under subsection (j), the Chairperson shall award grants, on a competitive basis, to nonprofit educational institutions to establish Presidential Academies for Teaching of American History and Civics (in this section referred to as "Academies") that shall offer workshops for teachers of American history and civics—

(1) to learn how better to teach the subjects of American history and civics; and

(2) to strengthen such teachers' knowledge of such subjects.

(b) APPLICATION.—

(1) IN GENERAL.—A nonprofit educational institution that desires to receive a grant under this section shall submit an application to the Chairperson at such time, in such manner, and containing such information as the Chairperson may require.

(2) CONTENTS.—An application submitted under paragraph (1) shall—

(A) include the criteria the nonprofit educational institution intends to use to determine which teachers will be selected to attend workshops offered by the Academy;

(B) identify the individual the nonprofit educational institution intends to appoint to be the primary professor at the Academy; and

(C) include a description of the curriculum to be used at workshops offered by the Academy.

(c) NUMBER OF GRANTS.—Except as provided in subsection (e)(2)(B), the Chairperson shall award not more than 12 grants to different nonprofit educational institutions under this section.

(d) DISTRIBUTION.—In awarding grants under this section, the Chairperson shall ensure that such grants are equitably distributed among the geographical regions of the United States.

(e) GRANT TERMS.—

(1) IN GENERAL.—Grants awarded under this section shall be for a term of 2 years.

(2) GRANTS AFTER FIRST TWO YEARS.—Upon completion of the first 2-year grant term, the Chairperson shall—

(A) renew a grant awarded under this section to a nonprofit educational institution for one more term of 2 years; or

(B) award a new grant to a nonprofit educational institution having an application ap-

proved under this section for a term of 2 years, notwithstanding the 12 grant award maximum under subsection (c).

(f) USE OF FUNDS.—

(1) WORKSHOPS.—

(A) IN GENERAL.—A nonprofit educational institution that receives a grant under this section shall establish an Academy that shall offer a workshop during the summer, or during another appropriate time, for kindergarten through grade 12 teachers of American history and civics—

(i) to learn how better to teach the subjects of American history and civics; and

(ii) to strengthen such teachers' knowledge of such subjects.

(B) DURATION OF WORKSHOP.—A workshop offered pursuant to this section shall be approximately 2 weeks in duration.

(2) ACADEMY STAFF.—

(A) PRIMARY PROFESSOR.—Each Academy shall be headed by a primary professor identified in the application submitted under subsection (b) who shall—

(i) be accomplished in the field of American history and civics; and

(ii) design the curriculum for and lead the workshop.

(B) CORE TEACHERS.—Each primary professor shall appoint an appropriate number of core teachers. At the direction of the primary professor, the core teachers shall teach and train the workshop attendees.

(3) SELECTION OF TEACHERS.—

(A) IN GENERAL.—

(i) NUMBER OF TEACHERS.—Each year, each Academy shall select approximately 300 kindergarten through grade 12 teachers of American history and civics to attend the workshop offered by the Academy.

(ii) FLEXIBILITY IN NUMBER OF TEACHERS.—An Academy may select more than or fewer than 300 teachers depending on the population in the region where the Academy is located.

(B) TEACHERS FROM SAME REGION.—In selecting teachers to attend a workshop, an Academy shall select primarily teachers who

teach in schools located in the region where the Academy is located.

(C) TEACHERS FROM PUBLIC AND PRIVATE SCHOOLS.—An Academy may select teachers from public schools and private schools to attend the workshop offered by the Academy.

(g) COSTS.—

(1) IN GENERAL.—Except as provided in paragraph (2), a teacher who attends a workshop offered pursuant to this section shall not incur costs associated with attending the workshop, including costs for meals, lodging, and materials while attending the workshop.

(2) TRAVEL COSTS.—A teacher who attends a workshop offered pursuant to this section shall use non-Federal funds to pay for such teacher's costs of transit to and from the Academy.

(h) EVALUATION.—Not later than 90 days after completion of all of the workshops assisted in the third year grants are awarded under this section, the Chairperson shall conduct an evaluation to—

(1) determine the overall success of the grant program authorized under this section; and

(2) highlight the best grantees' practices in order to become models for future grantees.

(i) NON-FEDERAL FUNDS.—A nonprofit educational institution receiving Federal assistance under this section may contribute non-Federal funds toward the costs of operating the Academy.

(j) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section $7,000,000 for each of fiscal years 2004 through 2007.

SEC. 4. CONGRESSIONAL ACADEMIES FOR STUDENTS OF AMERICAN HISTORY AND CIVICS.

(a) ESTABLISHMENT.—From amounts appropriated under subsection (j), the Chairperson shall award grants, on a competitive basis, to nonprofit educational institutions to establish Congressional Academies for Students of American History and Civics (in this section referred to as "Academies") that shall offer workshops for outstanding students of American history and civics to broaden and deepen such students' understanding of American history and civics.

(b) APPLICATION.—

(1) IN GENERAL.—A nonprofit educational institution that desires to receive a grant under this section shall submit an application to the Chairperson at such time, in such manner, and containing such information as the Chairperson may require.

(2) CONTENTS.—An application submitted under paragraph (1) shall—

(A) include the criteria the nonprofit educational institution intends to use to determine which students will be selected to attend workshops offered by the Academy;

(B) identify the individual the nonprofit educational institution intends to appoint to be the primary professor at the Academy; and

(C) include a description of the curriculum to be used at workshops offered by the Academy.

(c) NUMBER OF GRANTS.—Except as provided in subsection (e)(2)(B), the Chairperson shall award not more than 12 grants to different nonprofit educational institutions under this section.

(d) DISTRIBUTION.—In awarding grants under this section, the Chairperson shall ensure that such grants are equitably distributed among the geographical regions of the United States.

(e) GRANT TERMS.—

(1) IN GENERAL.—Grants awarded under this section shall be for a term of 2 years.

(2) GRANTS AFTER FIRST TWO YEARS.—Upon completion of the first 2-year grant term, the Chairperson shall—

(A) renew a grant awarded under this section to a nonprofit educational institution for one more term of 2 years; or

(B) award a new grant to a nonprofit educational institution having an application approved under this section for a term of 2 years, notwithstanding the 12 grant award maximum under subsection (c).

(f) USE OF FUNDS.—

(1) WORKSHOPS.—

(A) IN GENERAL.—A nonprofit educational institution that receives a grant under this section shall establish an Academy that shall offer a workshop during the summer, or during another appropriate time, for outstanding students of American history and civics to broaden and deepen such students' understanding of American history and civics.

(B) DURATION OF WORKSHOP.—A workshop offered pursuant to this section shall be approximately 4 weeks in duration.

(2) ACADEMY STAFF.—

(A) PRIMARY PROFESSOR.—Each Academy shall be headed by a primary professor identified in the application submitted under subsection (b) who shall—

(i) be accomplished in the field of American history and civics; and

(ii) design the curriculum for and lead the workshop.

(B) CORE TEACHERS.—Each primary professor shall appoint an appropriate number of core teachers. At the direction of the primary professor, the core teachers shall teach the workshop attendees.

(3) SELECTION OF STUDENTS.—

(A) IN GENERAL.—

(i) NUMBER OF STUDENTS.—Each year, each Academy shall select approximately 300 eligible students to attend the workshop offered by the Academy.

(ii) FLEXIBILITY IN NUMBER OF STUDENTS.—An Academy may select more than or fewer than 300 eligible students depending on the population in the region where the Academy is located.

(B) ELIGIBLE STUDENTS.—A student shall be eligible to attend a workshop offered by an Academy if the student—

(i) is recommended by the student's secondary school principal (or other head of such student's secondary school) to attend the workshop; and

(ii) will be a junior or senior in a public or private secondary school in the academic year following attendance at the workshop.

(C) STUDENTS FROM SAME REGION.—In selecting students to attend a workshop, an Academy shall select primarily students who attend secondary schools located in the region where the Academy is located.

(g) COSTS.—

(1) IN GENERAL.—Except as provided in paragraph (2), a student who attends a workshop offered pursuant to this section shall not incur costs associated with attending the workshop, including costs for meals, lodging, and materials while attending the workshop.

(2) TRAVEL COSTS.—A student who attends a workshop offered pursuant to this section shall use

non-Federal funds to pay for such student's costs of transit to and from the Academy.

(h) EVALUATION.—Not later than 90 days after completion of all of the workshops assisted in the third year grants are awarded under this section, the Chairperson shall conduct an evaluation to—

(1) determine the overall success of the grant program authorized under this section; and

(2) highlight the best grantees' practices in order to become models for future grantees.

(i) NON-FEDERAL FUNDS.—A nonprofit educational institution receiving Federal assistance under this section may contribute non-Federal funds toward the costs of operating the Academy.

(j) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section $14,000,000 for each of fiscal years 2004 through 2007.

SEC. 5. NATIONAL ALLIANCE OF TEACHERS OF AMERICAN HISTORY AND CIVICS.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—From amounts appropriated under subsection (e), the Chairperson shall award a grant to an organization for the creation of a national alliance of elementary school and secondary school teachers of American history and civics.

(2) PURPOSE.—The purpose of the national alliance is—

(A) to facilitate the sharing of ideas among teachers of American history and civics; and

(B) to encourage best practices in the teaching of American history and civics.

(b) APPLICATION.—An organization that desires to receive a grant under this section shall submit an application to the Chairperson at such time, in such manner, and containing such information as the Chairperson may require.

(c) GRANT TERM.—A grant awarded under this section shall be for a term of 2 years and may be renewed after the initial term expires.

(d) USE OF FUNDS.—An organization that receives a grant under this section may use the grant funds for any of the following:

(1) Creation of a website on the Internet to facilitate discussion of new ideas on improving American history and civics education.

(2) Creation of in-State chapters of the national alliance, to which individual teachers of American history and civics may belong, that sponsors American history and civics activities for such teachers in the State.

(3) Seminars, lectures, or other events focused on American history and civics, which may be sponsored in cooperation with, or through grants awarded to, libraries, States' humanities councils, or other appropriate entities.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section $4,000,000 for each of fiscal years 2004 through 2007.

Sponsor: Sen Alexander, Lamar [TN] (introduced 3/4/2003) Cosponsors (37)
Related Bills: H.R.1078
Latest Major Action: 7/21/2003 Referred to House subcommittee. Status: Referred to the Subcommittee on Select Education.
Senate Reports: 108-71

SUMMARY AS OF:
6/20/2003--Passed Senate amended. (There are 2 other summaries)

American History and Civics Education Act of 2003 - Directs the National Endowment for the Humanities (NEH) to award competitive grants to educational institutions to establish: (1) Presidential Academies for Teaching of American History and Civics to offer workshops for teachers of American history and civics; and (2) Congressional Academies for Students of American History and Civics to offer workshops for outstanding students of American history and civics.

Requires such Academies to describe how they will include teachers and students from schools receiving assistance for educationally disadvantaged children under the Elementary and Secondary Education Act of 1965, particularly those schools with high concentrations of students from low-income families.

Directs the NEH to award a grant to an organization for the creation of a national alliance of elementary school and secondary school teachers of American history and civics.

Individual liberty cannot survive a republic of dunces

In an era noteworthy for Muslim terrorists plotting future 9/11s and nukes in the hands of fanatical nut jobs like Iran's Mahmoud Ahmadinejad and North Korea's Kim Jong il, you might think there couldn't possibly be a more serious problem to ponder.

You would be wrong.

Consider what happened recently when the Intercollegiate Studies Institute gave a 60-question civic literacy test to more than 28,000 college students:

"Less than half knew about federalism, judicial review, the Declaration of Independence, the Gettysburg Address, and NATO. And this was a multiple-choice test, with the answers staring them right in the face," said political scientist Richard Bake, co-chairman of ISI's Civic Literacy Board.

"Ten percent thought that 'we hold these truths to be self-evident, that all men are created equal' came from the Communist Manifesto," Bake added during a recent interview with my *Examiner* colleague Barbara Hollingsworth.

Even the smart kids at Harvard failed the test, scoring on average 69, which is a D. Since the vast majority of the students tested are products of public schools, the results represent a comprehensive indictment of public education, the National Education Association and the American Federation of Teachers.

These are the people who year after year graduate classes in which one of every four kids cannot read at even a basic level. If you can't read the Constitution, or the Declaration, or The Federalist Papers, you won't understand their essential concepts or why they represent so much wisdom.

When even our elite colleges and universities aren't teaching the next generation the basic concepts of the American republic like federalism or the difference between Thomas Jefferson and Karl Marx, it ought to be obvious that American public education is failing American democracy.

Does anybody on America's college faculties remember or care that once liberty is lost, it is almost never regained?

As with so much else, James Madison captures in a wonderfully succinct couple of sentences the profoundly serious implications of raising a generation that is politically crippled by its gross civic ignorance. Madison wrote of the difference between Europe and America, saying: "In Europe, charters of liberty have been granted by power. America has set the example ... of charters of power granted by liberty."

If you don't grasp how Madison's simple equation makes all the difference in the world for the manner in which this country is governed, then you probably don't understand why liberals and conservatives disagree on just about everything that is fundamental to contemporary public policy.

Take health care. Liberals love the European welfare state, epitomized by Britain's National Health Service, aka a "single-payer system" or the "public option." That is why Obamacare erects hundreds of new bureaucratic agencies to regulate every detail of health care research, delivery and pricing.

That includes hiring thousands of new Internal Revenue Service agents to enforce the individual mandate federal District Judge Roger Vinson just declared unconstitutional. And those 1,040 waivers granted so far under Obamacare are the modern illustration of those European "charters of liberty ... granted by power."

For conservatives, the ideal health care reform is embodied in the Health Savings Account that puts the power of choice in the hands of individuals. That makes insurance providers compete to satisfy customers instead of government bureaucrats.

The bureaucrats are limited to enforcing contracts honestly made and assuring sufficient transparency of services and products to enable individuals to make informed choices. Or, as Madison would say, those with liberty grant a limited charter of power to government to do specific things and only those things.

But a generation that is not taught to recognize the irreconcilable differences represented by the Declaration of Independence and the Communist Manifesto, between Madison and Marx, the Federalist Papers and Rules for Radicals is doomed to be ruled, not to rule.

Individual liberty will not long survive in a republic of civic dunces.

Handouts, Morality and Common Sense

By Walter E. Williams · Wednesday, March 9, 2011

Whether Americans realize it or not, the last decade's path of congressional spending is unsustainable. Spending must be reined in, but what spending should be cut? The Republican majority in the House of Representatives fear being booted out of office and are understandably timid. Their rule for whom to cut appears to be: Look around to see who are the politically weak handout recipients.

The problem is that those cuts won't put much of a dent in overall spending. The absolute last thing a Republican or Democrat congressmen wants to do is to cut handouts to, and thereby anger, recipients who vote in large numbers. To spare myself ugly mail, I'm not going to mention that handout group, but members of Congress know of whom I speak.

More than 200 House members and 50 senators have co-sponsored a balanced budget amendment to our Constitution. A balanced budget amendment is no protection against the growth of government and the loss of our liberties. Estimated federal tax revenue for 2011 is $2.2 trillion and federal spending is $3.8 trillion leaving us with a $1.6 trillion deficit. The budget could be balanced simply by taking more of our earnings, making us greater congressional serfs. True protection requires an amendment limiting congressional spending.

You say, "OK, Williams, what would be your rule for getting our fiscal house in order?" We need a rule that combines our Constitution with simple morality and plain common sense. I think it immoral for Congress to forcibly take one American's earnings and give them to another American to whom they do not belong. If a person did the same thing privately, he'd be convicted of theft and jailed. We might ask ourselves whether acts that are clearly immoral and despicable when done privately are any less so when done by Congress. Close to two-thirds of the federal budget, so-called entitlements, represent what thieves do: redistribute income.

Some people might say, "Williams, the programs that you'd cut are vital to the welfare of our nation!" When someone says that, I always ask what did we do before. For example, our nation went from 1787 to 1979 and during that interval produced some of the world's most highly educated people without a Department of Education. Since the department's creation, American primary and secondary education has become a joke among industrialized nations.

What about the Department of Energy; how much energy has it produced?

From our founding in 1787 to 1965, our nation went from a Third World status to building the world's mightiest first-class cities such as New York, Chicago, Los Angeles, Detroit and Philadelphia without the benefit of Department of Housing and Urban Development (HUD). After HUD was created in 1965, many of our formerly great cities are in decline. No one is saying that HUD is responsible for the decline, but neither was HUD responsible for their rise.

There is a distinct group of Americans who bear a large burden for today's runaway government. You ask, "Who are they?" It's the so-called "greatest generation." When those Americans were born, federal spending as a percentage of GDP was about 3 percent, as it was from 1787 to 1920 except during war. No one denies the sacrifices made and the true greatness of a generation of Americans who suffered through our worst depression, conquered the meanest tyrants during World War II and later managed to produce a level of wealth and prosperity heretofore unknown to mankind.

But this generation of Americans also laid the political foundation for the greatest betrayal of our nation's core founding principle: limited federal government exercising only constitutionally enumerated powers. It was on their watch that the foundation was laid for today's massive federal spending that tops 25 percent of GDP.

A good part of that generation is still alive. Before they depart, they might do their share to help us have a federal government exercising only constitutionally enumerated powers.

CS FOR HOUSE BILL NO. 6( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVES GRUENBERG, Peggy Wilson

A BILL

FOR AN ACT ENTITLED

"An Act authorizing the governor to remove or suspend a member of the Board of Regents of the University of Alaska for good cause; and establishing a procedure for the removal or suspension of a regent."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE FINDINGS AND PURPOSES. (a) The legislature finds that

(1) the framers of the Constitution of the State of Alaska intended to insulate the University of Alaska and the Board of Regents from politics, but did not intend to immunize the University of Alaska and the Board of Regents from appropriate nonpolitical legislative and executive branch oversight;

(2) the legislature has the power to pass laws that pertain to the University of Alaska; and

(3) under AS 14.40.170(b)(1). the legislature has delegated to the Board of

Regents the power to regulate itself, but the Board of Regents has not adopted self-governance rules that authorize the board to remove or suspend a regent in appropriate circumstances.

(b) The purposes of AS 14.40.155, added by sec. 2 of this Act, are to

(1) clarify that the governor may remove a regent only with good cause;

(2) prescribe a due process procedure under which the governor may remove a regent for good cause;

(3) prescribe a due process procedure under which, in certain circumstances, the governor may suspend a regent; and

(4) accomplish each of the above purposes in a manner that ensures the University of Alaska and the Board of Regents remain insulated from politics.

* **Sec. 2.** AS 14.40 is amended by adding a new section to read:

Sec. 14.40.155. Suspension and removal of regents. (a) The governor may, after providing notice and an opportunity for a hearing, suspend a member of the Board of Regents while final disposition is pending on

(1) a criminal complaint, presentment, information, or indictment involving a felony in any jurisdiction;

(2) an information or formal criminal charges of a misdemeanor described under (g)(3) of this section;

(3) allegations of an ethics violation described under (g)(1) of this section under consideration by the Alaska Public Offices Commission; or

(4) allegations of malfeasance or nonfeasance in office described under (g)(4) of this section under consideration by the governor.

(b) The governor may remove a member of the Board of Regents for good cause by providing to the member an accusation and an opportunity for a hearing and judicial review.

(c) Notwithstanding the procedure under AS 44.62.390, a regent who has been suspended under (a) of this section may, at any time, request a hearing to

(1) defend against the grounds for the suspension stated in the accusation; or

(2) lift the suspension.

(d) The governor may delegate the conduct of a hearing under this section to the office of administrative hearings under AS 44.64.030(b). If a hearing is requested, the hearing officer may prepare a proposed decision under AS 44.62.500(b) to

(1) remove a regent based on clear and convincing evidence of good cause for removal;

(2) not remove a regent; or

(3) continue a suspension or lift a suspension of a regent.

(e) AS 44.62.330 - 44.62.630 applies to all proceedings under this section.

(f) After a final decision by the governor that removes a regent for good cause under (b) of this section, the governor shall file with the lieutenant governor a copy of the allegations made against the former regent, the governor's findings on each of the allegations, and a complete record of the removal proceedings.

(g) In this section, "good cause" means

(1) a violation of AS 39.52 (Alaska Executive Branch Ethics Act);

(2) conviction of a felony in any jurisdiction;

(3) conviction of a misdemeanor in any jurisdiction if the misdemeanor involves

(A) dishonesty;

(B) breach of trust; or

(C) the University of Alaska;

(4) malfeasance or nonfeasance in office, including

(A) misconduct in office;

(B) an inability to serve;

(C) neglect of duty;

(D) incompetence;

(E) unjustified failure to perform the duties of the Board of Regents;

(5) misconduct resulting in the revocation or suspension of a professional or occupational license issued under state law;

(6) failure to possess the qualifications of a regent under AS 14.40.130.

* **Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to

read:

APPLICABILITY. AS 14.40.155, added by sec. 2 of this Act, applies to all conduct and acts occurring before, on, or after the effective date of this Act.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 6

Analysis

This bill authorizes the governor to remove a member of the University of Alaska Board of Regents for good cause and establishes procedures for removal. The procedures include an opportunity for a hearing. Under section 2, the hearing function could be delegated by the governor to the office of administrative hearings. Removals likely would be infrequent. OAH, therefore, does not anticipate that this bill would result in an appreciable increase in caseload and expectsto be able to provide any hearing-related services required with existing authorized personnel. The cost to OAH of performing the services would be recovered from the Office of the Governor through interagency receipts, based on the time commitment required for hearings.

House Bill 6:
Removing a Regent
Sponsor Statement

This bill creates a statutory due process procedure under which the governor may suspend or remove a University of Alaska regent for good cause.

This bill is in response to a 2007 incident in which a regent was federally indicted on multiple counts of fraud. He refused to resign his position until impeachment proceedings began. The board of regents' by-laws do not set forth a procedure remove a regent. The legislative legal counsel has concluded that regents serve at the pleasure of the governor and thus can be removed. An informal attorney general's opinion states that the governor does not have the authority to remove a regent without cause. That AG opinion concluded that the governor does have the authority to remove a regent so long as cause is established and due process granted.

It should be noted that during the 25th legislature letters were sent to the board of regents asking that it, under the authority of 14.40.170(b)(1), adopt procedures for the removal and/or suspension of a regent, but it has not done so.

It is important to acknowledge that the constitution does bear upon this bill due to the governor's powers being enumerated in Article III of the Alaska Constitution while the board of regents is established in Article VII, section 6. The Alaska Supreme Court has ruled that the UA is subject to a degree of legislative control. For example, the legislature can, without approval of the regents, dispose of UA land. Additionally, the legislature has, through law, provided the UA with a broad degree of autonomy; however, this implies the UA is still subject to laws enacted by the legislature. The legislature has been given broad authority under the constitution, indeed the only constitutional constraints on the power of the legislature to make laws regarding other agencies of the State of Alaska deal with the rules of court and the repeal of initiatives. In effect this legislation provides a check upon the powers of the university.

This bill secures the state's interest and the university's interest. This legislation will keep a cloud from hovering over the UA in a future scenario in which a regent must be removed or suspended for cause.

AS 14.40.155(e) states that the Administrative Procedures Act (AS 44.62.330-44.62.630) applies to all of the proceedings of this section.

AS 14.40.155(f) sets out that the governor must file a copy of the allegations against the regent, the findings of the governor, and a complete record of the removal proceedings with the lieutenant governor.

Because this law deals with the conduct of the board of regents during their entire term in office it must apply retroactively to ensure that past violations do not go unchecked. **Section 3**[3] is an applicability clause that allows AS 14.40.155 to apply to conduct occurring before, on or after the effective date of this Act.

House Bill 6:
Removing a Regent
Sectional Analysis

Section 1[1] sets forth the legislative findings and purposes of the bill. The legislature finds that the framers of the Alaskan Constitution intended to insulate the University of Alaska from politics, that the legislature delegated the power of self-governance to the UA under AS 14.40.170(b), and that the legislature has the power to create a statutory procedure for the to remove a regent for good cause. The purposes of the bill are to clarify that the governor may remove a regent for good cause, and that the governor may not remove a regent in the absence of good cause. Finally, the legislative findings in this section affirm the political insulation of the university and the board of regents.

Section 2[2] adds a new section, AS 14.40.155, to AS 14.40 the chapter that governs the University of Alaska's Board of Regents. AS 14.40.155 is patterned after other statutory removal procedures for other boards, including the workers compensation appeals commission. See AS 23.30.007(j).

AS 14.40.155(a) sets forth the procedure for the governor to remove a regent for good cause. The governor must provide the regent with the reasons for removal, and an opportunity for a hearing with at least 30 days notice. Good cause is defined in subsection (g) to include a violation of the Executive Branch Ethics Act, a conviction of a felony, conviction of a misdemeanor involving a crime of dishonesty or the University of Alaska, nonfeasance in office, or failure to continue to meet the qualification requirements of a regent.

AS 14.40.155(b) requires the governor to file with the lieutenant governor a complete record of the removal proceedings, including a decision detailing the governor's findings.

AS 14.40.155(c) and (e) detail the procedure for the governor to suspend a regent. The governor must provide the regent with notice and an opportunity to be heard. The governor may suspend a regent who has been indicted for a felony, charged with a misdemeanor for a crime involving dishonesty or the University of Alaska, or for allegations of nonfeasance in office. However, the suspension may be lifted following a dismissal of the allegations at the hearing.

---

[1] Page 1, lines 5-14 through page 2, lines 1-16
[2] Page 2, lines 17-31 through page 3, lines1-28

AS 14.40.155(d) allows a suspended regent to request a hearing to lift the suspension. AS 14.40.155(f) permits the governor to delegate the conduct of the hearing to the Office of Administrative Hearings.

Because this law deals with the conduct of the board of regents during their entire term in office it must apply retroactively to ensure that past violations do not go unchecked. **Section 3**[3] is an applicability clause that allows AS 14.40.155 to apply to conduct occurring before, on or after the effective date of this Act.

House Bill 6:
Removing a Regent
Sectional Analysis for CS for HB 6 ( ) (27-LS0027\D)

Section 1[1] sets forth the legislative findings and purposes of the bill. The legislature finds that the framers of the Alaskan Constitution intended to insulate the University of Alaska from politics, that the legislature delegated the power of self-governance to the UA under AS 14.40.170(b), and that the legislature has the power to create laws that pertain to the university. The purposes of the bill are to clarify that the governor may only remove a regent with good cause and that the governor must afford a regent due process in the proceedings dealing his or her removal or suspension. Finally, the legislative findings in this section affirm the political insulation of the university and the board of regents.

Section 2[2] adds a new section, AS 14.40.155, to AS 14.40 the chapter that governs the University of Alaska's Board of Regents. AS 14.40.155 is patterned after other statutory removal procedures for other boards, including the workers compensation appeals commission. See AS 23.30.007(j).

AS 14.40.155(a) sets forth the procedure for the governor to suspend a regent for good cause . The governor must provide the regent with notice and an opportunity for a hearing. Good cause is defined in subsection (g) to include a violation of the Executive Branch Ethics Act, a conviction of a felony, conviction of a misdemeanor involving a crime of dishonesty or the University of Alaska, malfeasance or nonfeasance in office, or failure to continue to meet the qualification requirements of a regent.

AS 14.40.155(b) allows the governor to remove a regent for good cause by providing the regent with an accusation and opportunity for a hearing and judicial review.

AS 14.40.155(c) details the procedure for a regent to either defend against a possible suspension or lift a suspension once it has been imposed.

AS 14.40.155(d) permits the governor to delegate the conduct of the hearing to the Office of Administrative Hearings. The standard of proof to be used in the hearing for removal for "good cause" is "clear and convincing," one of the highest standards.

---

[1] Page 1, lines 5-14 through page 2, lines 1-11
[2] Page 2, lines 12-31 through page 3, lines1-30

AS 14.40.155(e) states that the Administrative Procedures Act (AS 44.62.330-44.62.630) applies to all of the proceedings of this section.

AS 14.40.155(f) sets out that the governor must file a copy of the allegations against the regent, the findings of the governor, and a complete record of the removal proceedings with the lieutenant governor.

Because this law deals with the conduct of the board of regents during their entire term in office it must apply retroactively to ensure that past violations do not go unchecked. **Section 3**[3] is an applicability clause that allows AS 14.40.155 to apply to conduct occurring before, on or after the effective date of this Act.

House Bill 6:
Removing a Regent
Explanation of changes between
HB 6 (27-LS0027\A) to CS for HB 6 ( ) (27-LS0027\D)

There are a number of changes between the "A" and "D" versions, including minor grammatical and stylistic changes, and substantive changes.

There was one major change to **Section 1** of the bill. Subsection (a) paragraph (3) of the "A" version (page 2 lines 2-7) was deleted and subsection (a) paragraph (2) of the "D" version (page 1 lines 12-13) was added. The effect of this change is to show that the legislature has legislative authority over the University of Alaska.

There were a few changes to **Section 2** of the bill. Subsection (e) of the "A" version (page 3 lines 7-10) was deleted, as with the addition of new subsections and language in the "D" version it was unnecessary. Specifically, with designation that the proceedings in this section fall under the guidelines of the Administrative Procedures Act, the language in subsection (e) was not needed.

The other major change to **Section 2** of the "A" version was a reordering of the subsections to better reflect the flow of the proceedings.

MEMORANDUM January 28, 2011

SUBJECT: Separation of powers issue (HB 6; Work Order No. 27-LS0027\A)

TO: Representative Alan Dick
Chair of the House Education Committee
Attn: Sheila Peterson

FROM: Jean M. Mischel
Legislative Counsel

You have asked about the possibility of a separation of powers issue resulting from the restrictions and procedures for removal of a member of the University Board of Regents provided for in HB 6. You have also asked about the similarity of the issue for the Board of Trustees of the Alaska Permanent Fund Corporation whose members are subject to removal only for cause as provided under AS 37.13.070(a). The constitutional authority of the legislature to restrict or otherwise control the removal or suspension of a regent appointed by the governor is the subject of considerable debate. Unlike boards and commissions controlled by art. III, sec. 26 of the constitution, nothing in art. VII, sec. 3, which establishes the Board of Regents, provides for legislative control over removal of the regents and, therefore, the governor's removal authority appears to be unrestricted.

Article VII, sec. 3 provides:

> The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session. . . .

A limitation on removal of some executive officers may be interposed by law, but arguably only as to persons who hold appointment under art. III, sec. 26 of the state constitution. Article III, sec. 26 states:

> When a board or commission is at the head of a principal department or a regulatory or quasi-judicial agency, its members shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, *and may be removed as provided by law*. . . .

(Emphasis added) The removal of a public member of the Board of Trustees of the Permanent Fund Corporation is the subject of AS 37.13.070(a), which provides:

> The governor may remove a public member of the board from office only for cause. A removal by the governor must be in writing and must state

> the reason for the removal. A member who is removed by the governor may not participate in board business and may not be counted for purposes of establishing a quorum after the member receives written notice of removal from the governor.

A 2004 amendment to the statute that was proposed by the governor added the word "public" and the phrase "only for cause" to the first sentence.

In addition, in the past the Board of Trustees of the Alaska Permanent Fund Corporation was subject to legislative confirmation under former AS 24.20.206(1), which provided:

> Sec. 24.20.206. DUTIES. The Legislative Budget and Audit Committee shall:
>
> (1) report to the legislature its recommendations relating to the confirmation of appointees to the Board of Trustees of the Alaska Permanent Fund Corporation; . . .

AS 24.20.206(1) was enacted as part of the 1980 Act, ch. 18, SLA 1980, establishing the Alaska Permanent Fund Corporation and providing for legislative oversight of the permanent fund. AS 37.13.050 originally contained the confirmation requirement also, but that was amended out in 1982 and, apparently, a conforming amendment to AS 24.20.206(1) was overlooked until 2003 when it was repealed.

The Alaska Permanent Fund Corporation is established as a public corporation under AS 37.13.040. Our position is that legislative confirmation and removal may not be required for the members of the board of directors of a public corporation because they are not described in art. III, sec. 26 of the state constitution.[1]

---

[1] The Alaska constitutional convention proceedings (ACCP) are helpful in determining whether a public corporation could be considered a "regulatory board," subject to legislative control. The convention specifically addressed the relationship between sec. 26 and the University of Alaska, a public corporation, and public corporations generally. Discussion of sec. 26 includes this statement by Delegate Sundborg:

> This whole section applies only to three classes of agencies. It applies to principal departments of the state, to regulatory bodies and quasi-judicial bodies. It is inconceivable to me that no matter what the legislature did it could ever put the University of Alaska under one of those three headings, and I am very much afraid here that if we read in here an exception saying that it shall not apply to the University of Alaska, that it would apply or that it could be construed to apply to any other state corporation because we had not excepted that from the language.

ACCP, at p. 2257.

Even with the additional legislative authority over sec. 26 boards, the Alaska Supreme Court interpreted that authority very narrowly. When the Court was faced with the question of the extent of legislative authority over sec. 26 boards and commissions, the Court found that the confirmation power of the legislature provided in art. III, secs. 25 (principal department heads) and 26, is merely a limited delegation of the executive appointment power to the legislature and stated:

> As to this issue, we think the provision of Sections 25 and 26 of Article III are clear and unambiguous. Thus, we conclude that Sections 25 and 26 mark the full reach of the delegated, or shared, appointive function to Alaska's legislative branch of government.

Bradner v. Hammond, 553 P.2d 1, 7 (Alaska 1976).

The University's status as a "body corporate" does not imply a legislative role in removal of a regent apart from the impeachment process available to the legislature as to all civil officers. Though the University, alone in the constitution, expressly holds corporate status, the Alaska Supreme Court has said that members of other public corporations established by law, such as the Board of Trustees of the Alaska Permanent Fund Corporation, serve at the pleasure of the governor. (Walker v. Alaska State Mortgage Association, 416 P.2d 245 (Alaska 1966)) The Court stated:

> The Association's three board members from the Board of Commissioners of the Alaska Housing Authority are appointed by the governor and serve at his pleasure. Therefore, the governor is empowered to remove any member of the governing board of the Association at his pleasure.

Id. at 250 (citations omitted).

I think it is unlikely that the restrictions placed on removal of a member of either the Board of Trustees of the Permanent Fund Corporation or the Board of Regents will be challenged and that a court would uphold them if challenged. The missing language in art. VII, sec. 3 of the constitution and the status as a public corporation both suggest that the membership of the Board of Regents is uniquely controlled by the governor; the public corporation status of the Board of Trustees of the Alaska Permanent Fund Corporation indicates that legislative restrictions on removal are vulnerable under the 1966 Alaska Supreme Court precedent. I am aware, however, of an informal attorney general opinion that suggests in a footnote, without any judicial support, that the legislature currently has some authority over removal of a regent in addition to its

---

Delegate Walsh stated that after checking with a couple of attorneys he believed that the University of Alaska was not subject to the requirements of sec. 26 because it was a public corporation. ACCP, at p. 2246. Delegate Riley stated the he believed that the University of Alaska was clearly beyond the reach of sec. 26. ACCP, at p. 2248. A similar comment was made by Delegate V. Rivers while entertaining questions about the Committee on the Executive Branch's report. ACCP, at p. 2033-34.

impeachment authority. I do not know how a court would view the kind of intrusion proposed in HB 6 into the governor's appointment and removal authority, but perhaps the court would be persuaded by the governor's support of this concept.

If I may be of further assistance, please advise.

MEMORANDUM April 17, 2007

SUBJECT: Removal of a University Regent (HB 237)
(Work Order No. 25-LS0839\A)

TO: Representative Bob Lynn
Attn: Nancy Manly

FROM: Jean M. Mischel
Legislative Counsel

You asked whether the governor may remove a University regent. In my opinion, the answer is yes. In fact, the constitutional authority of the legislature to restrict or otherwise control the removal or suspension of a regent by the governor is the subject of considerable debate. Unlike boards and commissions controlled by art. III, sec. 26 of the constitution, nothing in art. VII, sec. 3, which establishes the Board of Regents, provides for legislative control over removal of the regents and therefore the governor's removal authority appears to be unrestricted.

Article VII, sec. 3 provides:

> The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session . . . .

A limitation on removal of some executive officers may be interposed by law, but arguably only as to persons who hold appointment under art. III, sec. 26 of the state constitution. Article III, sec. 26 states:

> When a board or commission is at the head of a principal department or a regulatory or quasi-judicial agency, its members shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, *and may be removed as provided by law* . . . .

Even with the additional legislative authority over sec. 26 boards, the Alaska Supreme Court interpreted that authority very narrowly. When the Court was faced with the question of the extent of legislative authority over sec. 26 boards and commissions, the Court found that the confirmation power of the legislature provided in art. III, secs. 25 (principal department heads) and 26, is merely a limited delegation of the executive appointment power to the legislature and stated:

> As to this issue, we think the provision of Sections 25 and 26 of Article III are clear and unambiguous. Thus, we conclude that Sections 25 and 26

> mark the full reach of the delegated, or shared, appointive function to Alaska's legislative branch of government. (Bradner v. Hammond, 553 P.2d 1, 7 (Alaska 1976))

The University's status as a "body corporate" does not imply a legislative role in removal of a regent (apart from the impeachment process available to the legislature as to all civil officers). Though the University, alone in the constitution, expressly holds corporate status, the Alaska Supreme Court has said that members of other public corporations established by law serve at the pleasure of the governor. (Walker v. Alaska State Mortgage Association, 416 P.2d 245 (Alaska 1966)) The Court stated:

> The Association's three board members from the Board of Commissioners of the Alaska Housing Authority are appointed by the governor and serve at his pleasure. Therefore, the governor is empowered to remove any member of the governing board of the Association at his pleasure.

Id. at 240 (citations omitted).

I am aware of a recent informal attorney general opinion that suggests in a footnote that the legislature has some authority over removal of a regent without any judicial support for that position. The addition of legislative control over suspension of a regent is even more questionable. I do not know how a court would view the kind of intrusion proposed in HB 237 into the governor's appointment and removal authority, but perhaps the court would be persuaded by the governor's support of this concept.

If I may be of further assistance, please advise.

Subject: Governor's Power to Remove a University of Alaska Regent

We have been asked whether the Governor has the power to remove a University of Alaska regent without cause. In our view, the answer is no.

We acknowledge that this question has been posed to different counsel and different conclusions reached. Legislative counsel has concluded in a written opinion that regents serve at the pleasure of the governor and may be removed at any time. University of Alaska counsel has concluded in a verbal opinion that a regent may be removed only through impeachment by the legislature.

For the reasons set forth below, we do not fully agree with the conclusions of either legislative counsel or university counsel. That being said, we do agree with both legislative counsel and university counsel that impeachment is an option that may be pursued in order to remove a regent. But we disagree with university counsel that it is the only option.

The basis for our views is grounded primarily in the constitution and discussions of the framers regarding the University of Alaska during the constitutional convention. We start there.

I. Historical Background

The University of Alaska was created by the territorial legislature in 1935. ch. 49, SLA 1935. The Board of Regents was created at that time as well, with the governor empowered to appoint regents subject to confirmation by a joint session of the legislature. *Id.* at sec. 3. The term of a regent was eight years and a regent was to serve "until their successors are appointed and have qualified." *Id.* The original statute made no mention

of how a regent should be removed. This law has essentially remained unchanged through today, though the number of regents was increased to eleven in 1975. *See* AS 14.40.120; 14.40.140; AS 14.40.150.

From the University's inception through statehood we are aware of no instance of a governor removing a regent prior to the end of a regent's term. We recognize that it is possible such could have happened, but it would take further historical research to determine this.

The constitutional convention considered the University of Alaska several times during the course of the convention. Before considering these passages, however, it is important to understand that the territory of Alaska had suffered from a fragmented executive branch with several elected officials and multiple governing boards designed to erode the power of the federally appointed governor. A fundamental goal of the convention was to establish a strong governor who was completely in control of the executive branch of government.[1]

During the consideration of the executive branch article, however, concerns were raised regarding the appropriate place for the University of Alaska within the constitutional design for the new government. These concerns were often expressed in terms of the need to insulate education from politics. Alaska Constitutional Convention Proceedings at 2043, 2246. During the discussions of the provisions that ultimately

---

[1] Delegate Fischer later wrote, "[Territorial] government was neither responsible nor responsive to the people. As a result, convention delegates were ready to make basic structural changes so the people could hold the governor wholly responsible for the conduct of state administration." V. Fischer, Alaska's Constitutional Convention at 106 (1975).

became sections 25 and 26 of Article III,[2] questions were raised concerning the extent to which these sections governed appointments to the Board of Regents. The chair of the Executive Branch Committee, Victor Rivers, and a member of that Committee, Katherine Nordale, both responded that section 26 of Article III only applied to "principal departments" and that the University of Alaska was not a principal department. Alaska Constitutional Convention Proceedings at 2034, 2037, 2246. Therefore, in their mind, the University of Alaska did not fall under section 26 of Article III.

Other delegates, however, remained concerned that in order to insulate the University from politics it needed to be made explicit that the University was not subject to section 26 of Article III. In particular, certain delegates were concerned that if section 26 did apply to the University, that the Board of Regents' appointment of a president would be subject to approval by the governor. Accordingly, these delegates sought to amend section 26 to state that the provision did not apply to the University of Alaska. Alaska Constitutional Convention Proceedings at 2245-2258. Ultimately, these attempts failed because the members of the Executive Branch committee persuaded the convention that section 26 simply did not apply to the University of Alaska. Alaska Constitutional Convention Proceedings at 2246, 2257. Moreover, several delegates noted that a separate article was being drafted to govern the University of Alaska. *Id.* at 2247-48, 2250, 2255.

During the debate, some delegates expressed observations as to the status of the University. The chair of the Executive Committee, Victor Rivers, stated that the Executive Branch article would have no impact on the University:

---

[2] Section 25. Department Heads. The head of each principal department shall be a single executive unless otherwise provided by law. He shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, and shall serve at the pleasure of the governor, except as otherwise provided in this article with respect to the secretary of state.

Section 26. Boards and Commissions. When a board or commission is at the head of a principal department or a regulatory or quasi-judicial agency, its members shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session, and may be removed as provided by law. They shall be citizens of the United States. The board or commission may appoint a principal executive officer when authorized by law, but the appointment shall be subject to the approval of the governor.

> Walsh: May I ask a question, Mr. Rivers? I think to clarify in the minds of several people here it might be well for me, that [as] one of those serving on the Board of Regents of the University of Alaska, composed of eight members, and the Board of Regents select the President of the University. The governor, as I understand it, does not have the power of the removal of the president of the University. It is a matter for the Board. Would this situation change that, Mr. Rivers?
>
> Rivers: No, in regard to the University, this would not affect their present setup. They are a private corporation, or rather a nonprofit corporation, and under the specific law providing for their make-up, and you would still have a board of regents appointed by the governor and confirmed by the legislature, and the powers as you now have them would be identical to what they now are as I visualize them.

Id. at 2033-34. Delegate Taylor stated that the "University is not a part of the Territorial government whatsoever; it is an independent agency." *Id.* at 2253. Notably, Delegate Nordale expressed the view that by explicitly putting the University in a separate article it would "make it very clear that it can never be dissolved and that it is not part of the executive branch of government." *Id.* at 2256.

Later in the convention, the Executive Branch committee proposed language regarding the University. Chair Rivers introduced the language as follows:

> Mr. President, you have heard the reading of this article and it was considered important that in the constitution there be included an article of this type. It gives the University, as a corporate body, the authority to receive and hold property which will be granted to them under the enabling act. It also gives them the authority for administering and disposing of that according to law. It sets up the board of regents and the governing body of the University, and I think the main point of this article has is that constitutionally the University of Alaska shall be the only state university in Alaska.

Id. at 2792. Perhaps notably, the Executive Branch committee saw fit to clear the language of the proposed article with the President of the University prior to bringing it to the floor of the convention.[3] *Id.*

II. Analysis

With this summary of the constitutional history of the University in mind, we think it is fair to draw the following conclusions. First, the convention intended to create a very strong governor with full appointive power. Second, despite the strong governor model, the convention nevertheless intended to insulate the University from politics, including the governor. Third, the convention intended that the University would not be subject to section 26 of Article III of the Alaska Constitution. Fourth, the convention intended to constitutionalize the existence of the University. Finally, some members of the convention believed that the University resided outside the executive branch of government in 1955 and that the constitution preserved that status.[4]

Nowhere in the convention minutes is there any discussion regarding removal of a regent.[5] But the above conclusions are sufficient to give us pause that the governor's power to remove certain executive branch appointees without cause extends to the University Board of Regents. This view is consistent with the views previously expressed by this office. In 1979, we opined:

> Under the state constitution, the University of Alaska is 'governed' by the Board of Regents. Alaska Const., art. VII, § 3. The regents are appointed by the governor, subject to confirmation by the legislature. Id. They serve for terms of eight years. Thus, while the regents are appointed by and are responsible to the governor, they do not serve at his pleasure but rather for fixed terms, and they may, therefore, be

---

[3] In other words, it is doubtful that President Patty, the University president at the time, would have approved this language if he thought it allowed the governor to remove a regent without cause.

[4] By observing this latter point, we do not conclude that in fact the convention succeeded in fully removing the University from the executive branch.

[5] Though at one point, Chair Rivers states that "[t]he law could provide no doubt for means of removal . . ." *Id.* at 2255-56. He appears to be referring to the chief executive of the University, not the regents, however.

> removed from office solely for cause. 67 C.J.S. Officers § 120 (1978); 63 Am. Jur.2d Public Officers and Employees § 189 (1972). As a result, the governor's supervision over the university is made distinctly indirect. Unless the members of the Board of Regents commit acts of malfeasance, misfeasance, or nonfeasance sufficient to constitute cause for their removal, the governor possesses no check upon them and no power to direct their activities.

1979 Inf. Op. Att'y Gen. 1 (Jan. 23; J-66-103-79). We have reiterated this view over the years[6] and see no reason to stray from it today.

For the reasons expressed above, the University is accorded unique constitutional status. We must be mindful of these reasons when considering the applicability of Alaska Supreme Court precedents. A number of these cases have been cited by other counsel, but we doubt that a court would find them controlling on the issue of whether the governor may remove a regent without cause. For instance, *Walker v. Alaska State Mortgage Assoc.*, 416 P.2d 245 (Alaska 1966) does not involve the University of Alaska, but rather pertains to a board of a public corporation that does not have a unique constitutional status. The cases involving the University do not have issues that directly implicate the political independence of the University, one of the reasons for the University's unique constitutional status. *See, e.g., University of Alaska v. Nat'l Aircraft Leasing,* 536 P.2d 121 (Alaska 1975) (University is instrumentality of state for purposes of sovereign immunity); *McGrath v. University of Alaska,* 813 P.2d 1370 (Alaska 1991) (legislature may subject University to Administrative Procedures Act). Instead, we think a court if faced with the issue of whether the governor may remove a regent without cause would be more likely to focus on the constitutional history of the University set forth above.

Finally, legislative counsel contends that under AS 39.05.060(d) regents serve at the pleasure of the governor and may be removed at any time. This interpretation is at odds with the express intention of the constitutional convention that the University be insulated from politics. Moreover, review of the fairly lengthy legislative history of this statute demonstrates that the legislature never intended AS 39.05.060(d) to reach the

---

[6] In 1998, an assistant attorney general stated that, "Regents are considered to be sort of in a class by themselves. We've always advised the governor that it's inadvisable to remove the regents at a change of an administration. Legal complications may ensue." 1998 Anchorage Daily News (quoting AAG James Baldwin).

Board of Regents. This statute was originally enacted as part of the State Organization Act of 1959, under which the executive branch of the new State of Alaska was formed. *See* ch. 64, SLA 1959. The University of Alaska is not within the scope of this Act—it was not mentioned in the Act and was left out of the organization of the executive branch accomplished by this Act. *Id.* When initially enacted, AS 39.05.060 only referred to boards that were explicitly mentioned in the State Organization Act of 1959. While the scope of AS 39.05.060 has both expanded and contracted over the years, it has never been broadened to include the Board of Regents.[7]

In summary, we conclude that the Governor may only remove a regent if cause is established, preferably at a hearing prior to removal. We would be happy to address in another memo the evidence necessary to establish cause, and the criteria for an appropriate hearing process.

MAB:ajh

---

[7] We note, however, that it may be possible for the legislature to provide for removal of a regent through enactment of a statute consistent with the constitution. Such a statute would have to preserve the University's politically independent constitutional status and probably could only provide for removal if it were for some cause that was established at a hearing prior to removal.

CS FOR HOUSE BILL NO. 15( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY

Offered:
Referred:

Sponsor(s): REPRESENTATIVES DOOGAN, Kerttula, Johnson, Muñoz, Gruenberg

A BILL

FOR AN ACT ENTITLED

"An Act relating to prevention and evaluation of and liability for concussions in student athletes."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

CONCUSSIONS IN STUDENT ATHLETES; FINDINGS. The legislature finds that

(1) concussions rank among the most commonly reported traumatic brain injuries in children and adolescents who participate in sports and recreational activities;

(2) the United States Centers for Disease Control and Prevention estimates that as many as 3,900,000 concussions occur each year in the United States as a result of sports and recreational activities;

(3) a concussion is caused by a blow to or jarring of the head or body that causes the brain to move rapidly inside the skull, resulting in a mild to severe traumatic brain injury, which may occur with or without loss of consciousness, and may disrupt normal brain

function;

(4) a concussion may occur during an organized or unorganized sport or recreational activity as a result of a fall or from players colliding with each other or another obstacle;

(5) the risk of catastrophic injury or death from a concussion or other head injury increases when the injury is not properly evaluated and managed, and the athlete is allowed to continue to participate in sports or recreational activities following the concussion;

(6) although voluntary nationwide guidelines for managing concussion in sports recommend assessing concussions on an individual basis, with gradual return to play, athletes continue to be returned to play prematurely, putting them at risk for greater injury or death.

* **Sec. 2.** AS 14.30 is amended by adding new sections to article 3 to read:

Sec. 14.30.142. Concussions in student athletes: prevention and reporting. (a) The governing body of a school district shall consult with the Alaska School Activities Association to develop and publish guidelines and other information to educate coaches, student athletes, and parents of student athletes regarding the nature and risks of concussions. Guidelines developed under this section must include a description of the risks of return to play and standards for return to play, including the procedures required under (c) and (d) of this section.

(b) A school shall annually provide to a student and the parent or guardian of a student who is under 18 years of age written information on the nature and risks of concussions. A student may not participate in school athletic activities unless the student and the parent or guardian of a student who is under 18 years of age have signed a verification of receipt of the information required under this subsection.

(c) A student who is suspected of having sustained a concussion during a practice or game shall be immediately removed from the practice or game.

(d) A student who has been removed from participation in a practice or game for suspicion of concussion may not return to play until the student has been evaluated and cleared for participation in writing by a qualified person who has received training and is currently certified in the evaluation and management of concussions. In this subsection, "qualified person" means either a

(1) licensed health care provider; or

(2) person who is acting at the direction and under the supervision of a licensed physician.

(e) A person who conducts an evaluation under (d) of this section and who is not paid for conducting the evaluation may not be held liable for civil damages resulting from an act or omission during the evaluation, except that the person may be held liable for reckless or intentional misconduct and for gross negligence.

Sec. 14.30.143. Concussions in student athletes: school district immunity. (a) A school district may not be held liable for an injury to or the death of a person resulting from the action or inaction of a person employed by or under contract with a nonprofit youth organization if

(1) the action or inaction occurred on school property during the delivery of services by the district or organization;

(2) the organization is under contract with the district to provide the services; and

(3) before the provision of services, the organization provided to the district written verification of

(A) a valid insurance policy covering the injury or death in an amount not less than $50,000 for each person and $100,000 for each incident;

(B) compliance with the protocol for prevention and reporting of concussions required in AS 14.30.142.

(b) This section may not be construed to impair or modify the ability of a person to recover damages for harm caused by the negligent or reckless actions of an employee or contractor of a school district or by the existence of a condition, equipment, program, or structure known by the school district or organization to be unsafe.

(c) In this section, "youth organization" means a public or private entity qualified to do business in the state that provides a program or service to persons under 19 years of age.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 15

Analysis

This legislation has no fiscal impact on the Department of Education and Early Development.

Alaska State Legislature

Mike Doogan
Representative
District 25, Anchorage

SPONSOR STATEMENT

HB 15

An Act relating to prevention and evaluation of and liability for traumatic brain injuries in student athletes

More than 60,000 high school student athletes sustain concussions each year. The number is much greater when you include middle school and younger children. The National Football League has recently begun focusing on concussions and brain trauma, raising public awareness of this serious problem, and many states are now moving to add protections for students who participate in sports or other potentially dangerous activities. While concussions and brain trauma are more prevalent in football, many other sports and activities are also dangerous, with girls' soccer resulting in the second-most concussions.

A concussion results from the brain striking the inside of the skull, and can be caused by a blow to the head, or by violent motion of the head. Though the risk can be somewhat reduced with a helmet, it cannot be prevented with external equipment. While it is nearly impossible to completely prevent an initial concussion or brain trauma, this legislation seeks to minimize complications and more permanent conditions that can be caused when athletes continue to practice or play after receiving a concussion.

HB 15 is modeled after legislation that recently passed in Washington State, known as the Zackery Lystedt Law. Zackery was a middle-school football player who was returned to a game after suffering a concussion. He sat out for about 15 minutes, and then returned to the game, forcing a game-saving fumble, but suffering a further head injury on the play. The second injury caused a brain hemorrhage that ultimately lead to the removal of both sides of Zackery's cranium, leaving him drifting in and out of a coma for three months. He has battled his way back to some sense of normalcy, but will never fully recover from this avoidable injury.

HB 15 simply requires school districts, in consultation with the Alaska School Activities Association, to develop and publish guidelines and information to educate coaches, student athletes and parents about the nature and risks of concussions and traumatic brain injuries. The bill will require that a student athlete suspected of suffering a concussion or brain trauma be removed from practice or play, and not be allowed to return until cleared by a licensed health care professional.

While there is no way to completely prevent concussions or traumatic brain injuries, we can strive to prevent the serious complications and potentially life-altering or life-threatening ramifications that can occur from continuing to practice or compete once a brain injury has occurred. This is a critical public health issue, and a responsibility to our children we should take seriously.

SECTIONAL ANALYSIS

HB 15
An Act relating to prevention and evaluation of and liability for traumatic brain injuries in student athletes.

Section 1: Adds a new section to the uncodified law of the State of Alaska that will explain statistics, risks and challenges related to youth-related concussions, including:

(1) Concussions rank high in reported brain trauma injuries to children participating in sports and recreational activities.
(2) The CDC estimates nearly 4 million sports- and rec-related concussions in the US every year.
(3) Provides the definition of a concussion and some of the consequences of concussions – the effects may or may not include loss of consciousness; disruption of normal brain function.
(4) Explains how concussions may occur during organized or unorganized sports and rec. activities – such as through a fall or from a collision with another player.
(5) Explains that the risks of catastrophic injury or death from head injuries increase without proper evaluation and management, and if the athlete is allowed to continue participating following the concussion.
(6) Explains that, in spite of nationwide guidelines recommending individual assessment and gradual return to play following concussions, athletes continue to be returned to play prematurely – increasing risk of greater injury.

Section 2: Amends AS 14.30 by adding new sections to article 3 that would establish requirements for school district governing bodies relating to prevention and reporting. It also clarifies points of liability and damages (more details below, if needed):

Sec. 14.30.142. Concussions in student athletes: prevention and reporting.
(a) Requires school district governing body to consult with Alaska School Activities Association to develop and publish guidelines, etc. to educate coaches, student athletes and parents about the nature and risks of concussions.
(b) A student suspected of having a concussion or traumatic brain injury is immediately removed from the practice or game.
(c) Before returning to play or practice, the student must be cleared by a licensed health care provider who has received training in evaluating and managing traumatic brain injuries, including concussions.
(d) This provision explains that an evaluator may not be held liable for civil damages, except where he/she acted recklessly or with intentional misconduct or gross negligence.

Sec. 14.30.143. Concussions: school district immunity.
(a) Explains that a school district may not be held liable for injury or death resulting from the action or inaction of an employee or contractor with a non-profit youth organization if –
(1) the action/inaction occurred on school property during the delivery of services by the district or organization;

(2) the organization is under contract with the district to provide the services, and

(3) before the provision of services, the organization provided to the district written verification of –

(A) a valid insurance policy covering the injury or death in an amount not less than $50,000 per person and $100,000 per incident;

(B) compliance with the protocol for prevention and reporting of traumatic brain injury required in AS 14.30.142.

(b) This section may not be construed to impair or modify a person's ability to recover damages for harm due to negligent or reckless actions of a school or district employee or contractor or by the existence of a condition, equipment, program or structure known by the school district or organization to be unsafe.

(c) "Youth organization" means a public or private entity, qualified to do business in the state, that provides a program or service to persons under 19 years old.

Provided by Rep. Doogan's Office

Rep. Feige Question:

Rep. Feige expressed concern that such narrow language could fail to protect school districts or contractors if the game or activity is taking place off of school property – such as a cross country race on the roadway or an American Legion game on community fields, etc. We agree that the language is too narrow there, so I'm having an amendment drafted to remove that language. With the language removed, the protection will be extended to all school athletic events, regardless of where they are played. If Rep. Feige would be willing to offer the amendment, we would greatly appreciate that. Please let me know if that will work for you.

Rep. Wilson Question

First a little background. The bill is modeled after the legislation that passed in Washington state about a year ago. The intent is to reduce the potential for long-term traumatic brain injuries that result from receiving a second concussion on top of an initial one. It requires athletes, coaches and parents to know the dangers, causes and proper responses to concussions; requires athletes suspected of receiving a concussion to be removed from play, and requires that before returning to play or practice, they must be cleared by a qualified person. It's that last part that creates some challenges – particularly in largely-rural states like ours.

The section of the bill that deals with return to play tries to make reasonable exceptions for rural communities. It initially said an athlete could be cleared for return to play "by a licensed health care provider." We've made a couple of changes that will now allow for rural doctors who are exempt from occupational licensing for a "person who is acting at the direction and under the supervision of a licensed health care provider." The intent of that last group was to open the door for village nurses and certified athletic trainers. Rep. Wilson and some others wondered if that would also cover village health aides. I talked with someone from the program, and she says it would, as long as the person confers with a doctor before making the diagnosis. It would not preclude them from participating as long as they work with a doctor on these particular cases.

While there's unfortunately no easy way to increase access to physicians in rural Alaska, we think these exemptions make it as easy as possible for kids to return to play and practice in rural communities, while also ensuring the same level of protection for them as we do for urban kids.

Rep. Seaton's Question

Rep. Seaton's primary concerns centered around prevention of concussions. In talking with the NFL, people from the Brain Injury Network and the Association of Athletic Trainers the consensus is that the incidence of initial concussions can be reduced, but can never be eliminated. All athletic associations (including ASAA) follow the national guidelines, which include requirements for correct wear of the proper safety equipment for each sport. Of course, there are also rules in place that can help reduce initial concussions. Unfortunately, even when following the rules and wearing the proper equipment, there is always the risk of an initial concussion. One of the problems is that a concussion happens inside the skull, so there's a limit to what can be accomplished by protecting the outside of the head. Because the brain is basically floating in a protective fluid inside the skull, any sharp movement of the head can cause the brain to impact the inside of the skull, whether you're wearing protective head gear or not. In fact, some past and present NFL players are even advocating for a return to leather helmets, if you can

Prepared by Rep Doogan's Office

believe that. Not because they offer better protection, but because they contend the new helmets encourage a false sense of security, leading to harder and more savage hits.

Some initial concussions are very severe, but most are less severe and players can easily recover. The danger increases however when someone receives a second brain injury on top of the first – or even when someone simply continues to stress the body and brain after receiving a concussion. HB 15 seeks to reduce that danger by educating players, parents and coaches about the dangers, symptoms and proper responses. So, while there's no way to guarantee a student athlete won't receive an initial concussion, this bill will go a long way to ensure they won't suffer long-term brain damage resulting from further trauma.

Alaska Athletic Trainers Association
PO Box 872710
Wasilla, AK 99687

March 15, 2011

Representative Doogan,

The Alaska Athletic Trainers Association fully supports the language of House Bill 15 and Senate Bill 22, *Student Athlete Traumatic Brain Injuries*. This legislation serves to raise awareness and protect youth athletes from the risks of concussions. The Alaska Athletic Trainers Association pledges to support the following key elements: (1) concussion education for young athletes, parents and coaches; (2) immediate removal of a student athlete who appears to have suffered a concussion from play or practice; and (3) mandatory clearance of that student by a health care professional who is trained in the evaluation and management of concussions before returning to play or practice.

Athletic trainers are health care professionals who specialize in the prevention, diagnosis, treatment and rehabilitation of injuries and sport-related illnesses. We prevent and treat chronic musculoskeletal injuries from sports, physical and occupational activity, and provide immediate care for acute injuries. Athletic trainers offer a continuum of care that is unparalleled in health care.

The Alaska Athletic Trainers Association is also working toward licensing athletic trainers in the state of Alaska. A licensed athletic trainer is one who has established qualifications and works within a scope of practice. Alaska is one of only three states that do not regulate athletic trainers and we feel it is time to change that. We hope you will support our professional endeavor for licensing athletic trainers in Alaska.

Sincerely,

B. Shelden

The Honorable Mike Doogan
Alaska House of Representatives
Alaska State Capitol, Rm 400
Juneau, Alaska 99801

Dear Representative Doogan,

Thank you for introducing HB 15, an act relating to prevention and evaluation of and liability for concussions in student athletes.

The Alaska Brain Injury Network, Inc (ABIN) is a non-profit organization dedicated to Alaskans whose lives have been changed by brain injury. ABIN's eighteen member board represents all regions of Alaska and at least 50 percent are TBI survivors or family members. We fully support HB 15.

ABIN has become the leader in understanding the needs of Alaskans with brain injury. ABIN has heard from 800 Alaskans requesting brain injury services since 2007. In addition, ABIN has heard public testimony from hundreds of Alaskans from Anchorage, Juneau, Fairbanks, Kenai, Barrow, Nome, Kodiak, Dillingham, Bethel, Copper River Basin, Tok, Ketchikan, Sitka, Homer, and more.

There are an estimated 10,000 Alaskans who have experienced long-term difficulties from a moderate to severe brain injury. The number of Alaskans experiencing a concussion or Mild TBI (mTBI) who visit the emergency department is estimated at 3,000 per year. Concussion and brain injury need to be taken seriously. With proper diagnoses, management, and treatment, research shows 80-90 percent of people experiencing a concussion or mTBI will recover fully. HB 15 is vital to ensuring our youth athletes have the best chance of recovery after an injury. When a concussion is not properly managed, prolonged recovery or even death from a second impact may result.

The National Football League, National Hockey League, the United States Olympic teams, majority of collegiate teams, and most recently in many states, even high school and youth sports teams have protocols and guidelines for concussion identification and return to play. Many of the leagues also require a cognitive baseline which is the first step to providing the best data to assess for a concussion when symptoms appear. If an athlete is suspected of a concussion, the assessment guidelines and return to play protocol are in place for the safety of the athlete, as well as ensuring the team has the strongest players in the game. A player who is normally elite, but then suffers a concussion, may temporarily have difficulty making quick decisions, their speed and reaction time may be compromised, and they may clumsily handle the ball. This compromised state caused by the concussion may hinder the team, and more importantly may put the athlete at risk for serious, life-long disability. No one wants to see an athletic child or young adult become disabled due to a decision to keep a kid in the game for a win or because of lack of education of what concussion symptoms may look like.

HB 15 will ensure that coaches have a basic understanding of concussion, student athletes will begin to understand the seriousness of concussion on and off the field, and parents may begin to understand brain injury better as well. This legislation is an opportunity to improve the public's awareness of the seriousness of concussion and brain injury, and keep our student athletes safe.

The future of our state depends on the brains of the individuals that reside here. HB 15 is one tool to giving Alaska's youth the best opportunity to become community and business leaders as adults.

The Alaska Brain Injury Network appreciates your leadership in sponsoring this important legislation. You have our support.

Sincerely,

Jill Hodges
Executive Director

HEADS UP!

NFL Commissioner Roger Goodell talks about the importance of protecting student athletes from traumatic head injuries.

Roger Goodell, the eighth chief executive in the NFL's 90-year history, took office in 2006. He spoke with State Legislatures about the importance of laws to help prevent young athletes from suffering traumatic brain injuries.

STATE LEGISLATURES: Why is the NFL working with state legislatures on laws dealing with youth sports concussions?

Goodell: Together, we can make sports, which are essential for so many of our kids, safer. Sports teach teamwork, perseverance, dedication and commitment that will serve kids well throughout their lives. Youth sports are safe, but we can make them even safer, especially with regard to head injuries.

We are changing the culture in the NFL with regard to concussions. Doctors—not coaches—are making the decisions regarding when a player returns to a game. When we in the NFL change our approach, we are told by youth coaches and parents that others on all levels take notice and follow.

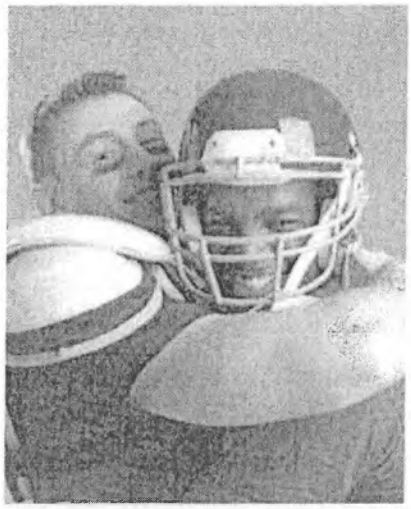
As more is learned about the ways to manage concussions, the NFL will continue to lead by example. The medical literature says risks associated with concussion are greatest when the brain is still developing, so the greatest care must be taken with young athletes.

We have made it a priority to support laws that address youth concussions across the country. We are building on the work done in the Washington Legislature with the 2009 Zackery Lystedt law, which is a model we encourage all states to follow.

SL: What are the primary elements of a substantive law?

Goodell: It is a remarkably simple idea, but one that protects our young athletes from the worst risks of concussion. The law contains three core principles:

- Educate athletes and their parents or guardians about concussions.



- Remove an athlete who may have suffered a concussion from play.
- Allow athletes to return to play only after being cleared by a licensed health care provider.

The law requires every child, as well as the parent or guardian, to sign an information sheet regarding concussions and their symptoms every year. Second, since children are at risk if they have suffered a concussion, they must be removed from competition immediately. Finally, only a licensed health care provider trained in the management of concussions should determine whether the child is able to return to play. These three simple steps will help prevent unnecessary head injuries to our children.

SL: Why should states pass this law?

Goodell: Concussions are brain injuries. They are an important public health concern in all sports. Girls experience concussions at significant rates in soccer; boys who play football, wrestle or play hockey suffer concussions as well. Experts also tell us that removing children immediately from play or practice and allowing them to recover completely is the best way to keep concussions from having long-term effects. We owe it to our children to adopt this law.

SL: Why aren't medical guidelines sufficient?

Goodell: In a matter as important as the health of our children's brains, we owe them the best, most comprehensive response. Laws raise awareness. Laws mandate change. Laws create uniform application of these standards. Guidelines are a second best alternative but they risk sporadic or inconsistent enforcement in different regions in a state.

SL: What does this law cost?

Goodell: There is no cost. There are no state expenditures, or costs borne by the school district. Washington Governor Christine Gregoire has told us that her state passed this law without creating any new costs to the taxpayers. There is, however, a significant cost associated with the emergency care and long-term rehabilitation in the tragic circumstances when a child suffers a traumatic brain injury. This law helps prevent burdens on the health care system and on the school district. Most important, this law spares the emotional cost to the family and the child associated with these injuries.

SL: Which states have passed these laws?

Goodell: New Jersey, in December 2010, became the ninth state to pass a substantive law. The other states are Connecticut, Massachusetts, New Mexico, Oklahoma, Oregon, Rhode Island, Virginia and Washington. We congratulate all of them and thank these legislators for their leadership.

SL: What can the NFL do?

Goodell: First of all, we can help raise awareness in a positive way on this issue. I am on record that we will help pass laws in at least 10 more states in 2011. My office and the 32 NFL clubs will contribute to legislative advocacy around youth concussions in the states that choose to address this important public health issue this year.

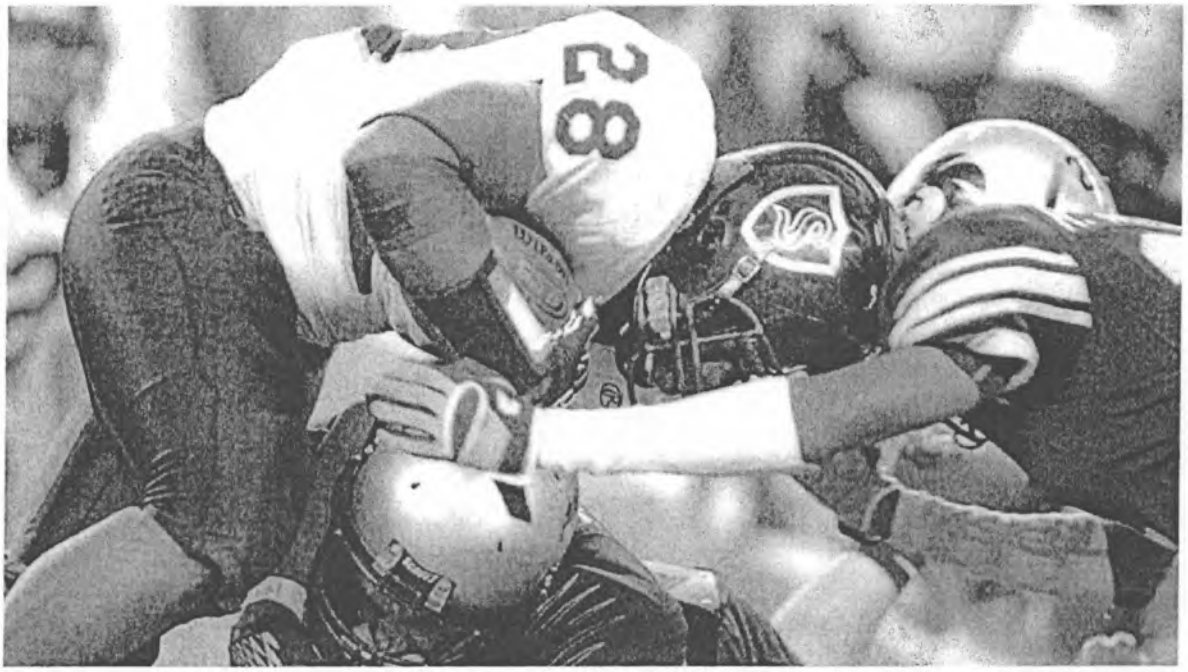
Doctors Throw Flags On High School Concussions

by JON HAMILTON



Matt Strasen/AP

Malcom Brown (left) is hit by Jake Smith on a kickoff return during a high school state championship game in Arlington, Texas, in December. Sports medicine professionals and the NFL are calling for tougher regulations on head injuries sustained by young athletes.

February 2, 2011

text size A A A

In the Super Bowl this weekend, any player who takes a shot to the head and shows signs of a concussion will be taken out of the game. But it's a different story for high school athletes, who sometimes play on despite a head injury.

So the NFL, the American College of Sports Medicine and a long list of other groups are joining together to support state laws designed to protect the brains of young athletes.

Enlarge Bill Pugliano/Getty Images

The groups say they're concerned because each year more than 60,000 high school athletes sustain a concussion. It's an injury that temporarily affects brain function, though it may or may not cause a person to lose consciousness.

It's not just football players who get concussions — it's male and female athletes involved in soccer, wrestling, basketball, baseball, field hockey — even volleyball. Many of these athletes never get an evaluation that would reveal their injury.

Steve Cohen, a member of the House Judiciary Committee, examines the helmet of Lem Barney, a former player for the Detroit Lions. A committee hearing last year evaluated steps taken at the professional, college and high school levels to deal with football brain injuries.

"Unfortunately, kids at the youth sports level don't have neurosurgeons, neurologists and some of the finest doctors on the sidelines," says Jeff Miller, a senior vice president of the National Football League. "It's just not practicable."

The coalition wants every state to have a law like the Lystedt Law, passed in Washington in 2009 and named after Zackery Lystedt, a teenager who sustained a serious brain injury during a middle school football game in 2006. Lystedt's head struck the ground in the first half, but he was allowed to keep playing. When he took another shot to the head late in the game, the result was devastating.

The Lystedt Law says an athlete suspected of having a head injury must be removed from competition. That's because even a minor injury to the brain can make it highly vulnerable to further damage.

You don't want coaches making medical decisions. That isn't their core competency.

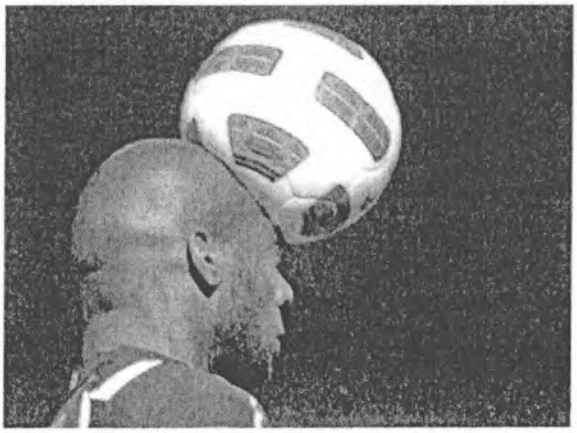
- Jim Whitehead, executive vice president, American College of Sports Medicine

Easing Back Into The Classroom

A concussion law might have helped Sarah Rainey, a high school soccer player in Alexandria, Va., who took a violent hit during a game 10 months ago.

"I thought I just got the wind knocked out of me, and I told my coaches and the trainer that I was OK," she says. "I passed the sideline evaluation. I played the remaining five minutes and then two overtime periods."

But after the game, Rainey began experiencing headaches, nausea and fuzzy thinking. Her father took her to an emergency room where doctors told her she'd suffered a concussion and sent her home.



Damien Meyer/AFP/Getty Images

Not only football players are at risk for head injuries — soccer, basketball and volleyball players can sustain concussions, too. Michael Ciani, a defender for the French soccer team Bordeaux, heads the ball during a French Cup match on Jan. 22.

When she returned to school just a few days after the injury, she found that trying to read small print, looking at a computer screen and even her teachers' voices could trigger headaches and nausea.

It was two months before Rainey could get through a full day of school, and four months before her brain was back to normal.

She was treated by Gerry Gioia, who runs the Safe Concussion Outcome Recovery & Education (SCORE) Program at Children's National Medical Center in Washington, D.C. Gioia is also part of the coalition pushing for concussion laws.

No law could have prevented Rainey's concussion, Gioia says. But a law might have helped limit the damage.

"The problem is that she was let back into the game later on," he says. "It's hard to know exactly the contribution of that. She didn't take another hit, but certainly she was overworking that body and brain during the period of this metabolic crisis."

Rainey also returned to class too soon — something else a law could have prevented, Gioia says. He says an injured brain is like a sprained ankle. It heals faster if you don't use it too much.

"As you're learning and thinking and doing all that good performance activity in the school, that's demanding more from your brain than it can handle," Gioia says. "It's taking away the important energy toward recovery, and it basically then is affecting negatively your recovery."

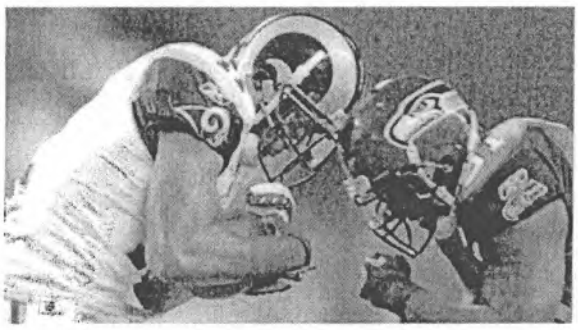
Unfortunately kids at the youth sports level don't have neurosurgeons, neurologists and some of the finest doctors on the sidelines.

- Jeff Miller, senior vice president, NFL

The coalition wants concussion laws to include provisions for easing injured students back into the classroom.

Relying On Medical Professionals

But for any of the laws to work, athletes who take a blow to the head need a proper evaluation from a trained medical professional, says Jim Whitehead, executive vice president of the American College of Sports Medicine.



Otto Greule Jr./Getty Images
Seahawks defensive end Chris Clemons (right) hits Brandon Gibbons during a game on Jan. 2 in Seattle. Clemons' head-first hit drew a personal foul.

"You don't want coaches making medical decisions," he says. "That isn't their core competency. So you want to take any of those things out of the hands of people who really aren't qualified to make those judgments, and put it in the hands of professionals who are."

That's why the coalition supports laws that call for training coaches and others on the sideline not to diagnose a concussion, but to recognize subtle signs in an athlete that could mean a concussion.

"And if there's any doubt whatsoever, you sit the athlete until he or she has been cleared by a health professional," Whitehead says.

About 10 states, including Virginia, have passed youth concussion laws. The coalition's goal is to get laws in at least 10 more states by the end of the year.

National Athletic Trainers' Association Press Release

Contacts

The National Football League, USA Football, the Brain Injury Association of Washington, and the American College of Sports Medicine, among many other organizations, strongly support the adoption of laws to prevent traumatic brain injury in youth athletes in all fifty states. The Zackery Lystedt law, passed in Washington state, through the efforts and hard work of advocates in the medical, educational and athletic fields represents model legislation. The bill includes three elements essential to protecting youth athletes in all sports:

(1) Inform and educate youth athletes, their parents and guardians and require them to sign a concussion information form;
(2) Removal of a youth athlete who appears to have suffered a concussion from play or practice at the time of the suspected concussion; and
(3) Requiring a youth athlete to be cleared by a licensed health care professional trained in the evaluation and management of concussions before returning to play or practice.

This packet of materials includes information about the Zackery Lystedt law and frequently asked questions regarding it. In addition, educational materials on the topic of youth concussions are included. These documents published by the Centers for Disease Control and Prevention and USA Football and endorsed by the American College of Sports Medicine, the National Football League, USA Football, and the Brain Injury Association of Washington will provide significant information about youth concussions.

As of November 2010, nine states have adopted laws containing the three key provisions of the Zackery Lystedt law. We encourage you to adopt a similar law in your state and encourage you to reach out to our organizations if we can be of assistance.

FREQUENTLY ASKED QUESTIONS ABOUT CONCUSSION-PREVENTION LAWS

How widespread are concussions among youth athletes?

An estimated 400,000 high school athletes sustained concussions while participating in five major male sports and four major female sports during the 2005-2008 school years[i]. In addition, experts believe that the prevalence of sports-related concussions among young people in all sports is significantly higher than reported.

Moreover, the number of youth athletes taken to emergency rooms with sports-related concussions doubled during the 10-year-period from 1997 to 2007[ii]. Meanwhile, among youth aged 14 to 19, emergency room visits for concussions sustained during team sports more than tripled over the same period[iii].

What dangers do these head injuries pose to young athletes?

A concussion is a type of traumatic brain injury, or TBI, which changes the way the brain normally works. Recognizing and responding to concussions when they first occur help to aid recovery and to prevent prolonging concussion symptoms, chronic brain damage or even death. Yet, a recent study estimated that more than 40 percent of high school athletes return to participate in school athletics before they have fully recovered from these serious head injuries[iv].

Do concussions involve youth athletes in all sports and at any age or is it just an injury sustained by boys who play football?

Concussions can occur in athletes of any age and in any sport or recreational activity. In fact, each year, U.S. emergency departments treat an estimated 135,000 sports-related and recreation-related TBIs, including concussions, among children ages 5 to 18[v]. In addition, children and teens are more likely to get a concussion and take longer to recover than adults. While youth sports concussions often are associated with football, the rate of concussions in girl's high school soccer is almost as high. Research also indicates that there may be gender differences in how boys and girls recover from concussions.[vi]

How many states have enacted laws related to concussion-awareness, prevention and management?

As of October 2010, eight states have adopted similar concussion-awareness and prevention laws initially adopted in Washington, known as the Zackery Lystedt law, including Oregon, New Mexico, Connecticut, Oklahoma, Virginia, Massachusetts and Rhode Island. In many other states, active coalitions are pushing to enact similar legislation.

What are the key elements of a concussion-prevention and management bill?

An effective concussion-prevention bill follows the example of the State of Washington's Zackery Lystedt law. It includes three essential elements: (1) inform and educate student athletes, their parents and guardians and require them to sign a concussion information form; (2) removal of a student-athlete who appears to have suffered a concussion from play or practice at the time of the suspected

concussion; and (3) requiring an athlete to be cleared by a licensed medical professional trained in the evaluation and management of concussions before returning to play or practice.

There is an international consensus on return to play guidelines for youth, adopted at the 3rd International Conference on Concussion in Sport in Zurich, in November 2008, which states that "It is not appropriate for a child or adolescent athlete with concussion to RTP on the same day as the injury regardless of the level of athletic performance."[vii]

What is the cost of implementing a concussion prevention and awareness bill?

Zero. The bill is revenue neutral. There are no mandates in the bill and no requirements that resources be spent to hire or train medical professionals or to purchase equipment. Free information on concussions for high school and youth coaches, parents, athletes, as well as school professionals is publicly available on the Centers for Disease Control and Prevention's (CDC) website at www.cdc.gov/Concussion, including a youth concussions poster found at www.cdc.gov/concussion/pdf/poster_Eng.pdf designed to hang in every locker room across the country.

What are the penalties for violating the concussion prevention and awareness law? Who is liable if the law is not followed?

There is no liability attached to Washington's Zackery Lystedt law. It does not mandate any civil or criminal penalties, nor does it create greater liability for individuals and/or organizations. Indeed, the education and awareness efforts and requirement of medical clearance before return to play has decreased the variability of care and decreased liability. Wherever the law is passed, the community can determine if and how to monitor and enforce the law.

What about implementing the law in rural areas where it may be more challenging to find medical professionals?

The law does not require a specific medical specialist to participate in every evaluation. Rather, the language of the Washington statute requiring an athlete "to be cleared by a licensed medical professional trained in the evaluation and management of concussions before returning to play or practice" permits a wide range of qualified individuals to determine a youth athlete's suitability for returning to play. For example, in Washington State, the Washington Interscholastic Activities Association decided that qualifying medical professionals included: medical doctors, osteopaths, nurse practitioners, athletic trainers, and physician assistants.

What is the impact of concussion-prevention laws on private sports organizations?

These laws may be written in such a way as to apply not only to public sports organizations but also to private sports organizations, many of which maintain public-sector connections/affiliations (such as the use of public facilities). For example, in Washington private sports groups are required by law to carry insurance to play on publicly-owned playing fields. The Zackery Lystedt law amended that insurance-based law to require private nonprofits to comply with the policies on the management of concussions and head injuries in youth sports.

What impact have concussion-prevention laws had in states that have passed them?

The Zackery Lystedt law was the first concussion-prevention state law to pass in 2009. While no comprehensive and detailed assessment can yet be made, early and anecdotal data suggests that the law is having an immediate and positive impact. It is helping meet a critical goal -- preventing preventable brain injuries and making sports and recreational activities safer for youth.

What organizations have supported such measures?

A broad coalition of groups representing teachers and parents, sports medicine, medical professionals, school administrators, the disability community and athletic organizations have supported concussion-prevention legislation at the state and federal level. These organizations include the National Football League, American College of Sports Medicine, USA Football, National School Boards Association, Parent Teacher Association, National Association of School Nurses, National Council of Youth Sports, The Sarah Jane Brain Foundation, National Disability Rights Network, National Athletic Trainers' Association, National Association of Health and Fitness, the Brain Injury Association of America, the Brain Injury Association of Washington, and many others.

What law, if any, has Congress proposed or passed regarding concussion prevention and awareness?

The "Protecting Student Athletes from Concussions Act of 2010" incorporates the same core principles of the Lystedt law and was introduced in Congress in September of 2010. If passed, the bill would require school districts to develop and implement a minimum standard, community-based plan for concussion safety and management. Of course, states would be able to implement standards far exceeding these basic, minimum standards.

Where may I find/read a copy of the Zackery Lystedt law?

The Zackery Lystedt law may be found in this packet. It may also be found online by visiting: http://www.leg.wa.gov/CodeReviser/documents/sessionlaw/2009pam3.pdf

Where may I find more information about the dangers of concussions and passing a law in my state?

More information about concussions may be found on the website of the CDC. You also may watch an NFL-produced video about enacting a concussions-prevention law in your state, which is available at NFL.com/youthconcussions and on the CDC's website as well.

CHRISTINE GREGOIRE

Governor of the State of Washington

CERTIFICATE

I, Barbara Baker, Chief Clerk of the House of Representatives of the State of Washington, do hereby certify that the attached is **ENGROSSED HOUSE BILL 1824** as passed by the House of Representatives and the Senate on the dates hereon set forth.

BARBARA BAKER

Chief Clerk

FILED

May 18, 2009

Secretary of State
State of Washington

ENGROSSED HOUSE BILL 1824

AS AMENDED BY THE SENATE

Passed Legislature - 2009 Regular Session

State of Washington 61st Legislature 2009 Regular Session

By Representatives Rodne, Quall, Anderson, Liias, Walsh, Pettigrew, Priest, Simpson, Kessler, Rolfes, Johnson, Sullivan, and Morrell

Read first time 01/30/09. Referred to Committee on Education.

AN ACT Relating to requiring the adoption of policies for the management of concussion and head injury in youth sports; amending RCW 4.24.660; and adding a new section to chapter 28A.600 RCW.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

Sec. 1. RCW 4.24.660 and 1999 c 316 s 3 are each amended to read as follows:

(1) A school district shall not be liable for an injury to or the death of a person due to action or inaction of persons employed by, or under contract with, a youth program if:

(a) The action or inaction takes place on school property and during the delivery of services of the youth program;

(b) The private nonprofit group provides proof of being insured, under an accident and liability policy issued by an insurance company authorized to do business in this state, that covers any injury or damage arising from delivery of its services. Coverage for a policy meeting the requirements of this section must be at least fifty thousand dollars due to bodily injury or death of one person, or at least one hundred thousand dollars due to bodily injury or death of two or more persons in any incident. The private nonprofit shall also

provide a statement of compliance with the policies for the management of concussion and head injury in youth sports as set forth in section 2 of this act; and

(c) The group provides proof of such insurance before the first use of the school facilities. The immunity granted shall last only as long as the insurance remains in effect.

(2) Immunity under this section does not apply to any school district before January 1, 2000.

(3) As used in this section, "youth programs" means any program or service, offered by a private nonprofit group, that is operated primarily to provide persons under the age of eighteen with opportunities to participate in services or programs.

(4) This section does not impair or change the ability of any person to recover damages for harm done by: (a) Any contractor or employee of a school district acting in his or her capacity as a contractor or employee; or (b) the existence of unsafe facilities or structures or programs of any school district.

NEW SECTION. **Sec. 2.** A new section is added to chapter 28A.600 RCW to read as follows:

(1)(a) Concussions are one of the most commonly reported injuries in children and adolescents who participate in sports and recreational activities. The centers for disease control and prevention estimates that as many as three million nine hundred thousand sports-related and recreation-related concussions occur in the United States each year. A concussion is caused by a blow or motion to the head or body that causes the brain to move rapidly inside the skull. The risk of catastrophic injuries or death are significant when a concussion or head injury is not properly evaluated and managed.

(b) Concussions are a type of brain injury that can range from mild to severe and can disrupt the way the brain normally works. Concussions can occur in any organized or unorganized sport or recreational activity and can result from a fall or from players colliding with each other, the ground, or with obstacles. Concussions occur with or without loss of consciousness, but the vast majority occurs without loss of consciousness.

(c) Continuing to play with a concussion or symptoms of head injury leaves the young athlete especially vulnerable to greater injury and

even death. The legislature recognizes that, despite having generally recognized return to play standards for concussion and head injury, some affected youth athletes are prematurely returned to play resulting in actual or potential physical injury or death to youth athletes in the state of Washington.

(2) Each school district's board of directors shall work in concert with the Washington interscholastic activities association to develop the guidelines and other pertinent information and forms to inform and educate coaches, youth athletes, and their parents and/or guardians of the nature and risk of concussion and head injury including continuing to play after concussion or head injury. On a yearly basis, a concussion and head injury information sheet shall be signed and returned by the youth athlete and the athlete's parent and/or guardian prior to the youth athlete's initiating practice or competition.

(3) A youth athlete who is suspected of sustaining a concussion or head injury in a practice or game shall be removed from competition at that time.

(4) A youth athlete who has been removed from play may not return to play until the athlete is evaluated by a licensed health care provider trained in the evaluation and management of concussion and receives written clearance to return to play from that health care provider. The health care provider may be a volunteer. A volunteer who authorizes a youth athlete to return to play is not liable for civil damages resulting from any act or omission in the rendering of such care, other than acts or omissions constituting gross negligence or willful or wanton misconduct.

(5) This section may be known and cited as the Zackery Lystedt law.

Passed by the House April 20, 2009.
Passed by the Senate April 2, 2009.
Approved by the Governor May 14, 2009.
Filed in Office of Secretary of State May 18, 2009.

(INSERT SCHOOL/ORGANIZATION NAME HERE)
Concussion Information Sheet

A concussion is a brain injury and all brain injuries are serious. They are caused by a bump, blow, or jolt to the head, or by a blow to another part of the body with the force transmitted to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even though most concussions are mild, **all concussions are potentially serious and may result in complications including prolonged brain damage and death if not recognized and managed properly.** In other words, even a "ding" or a bump on the head can be serious. You can't see a concussion and most sports concussions occur without loss of consciousness. Signs and symptoms of concussion may show up right after the injury or can take hours or days to fully appear. If your child reports any symptoms of concussion, or if you notice the symptoms or signs of concussion yourself, seek medical attention right away.

Symptoms may include one or more of the following:	
• Headaches • "Pressure in head" • Nausea or vomiting • Neck pain • Balance problems or dizziness • Blurred, double, or fuzzy vision • Sensitivity to light or noise • Feeling sluggish or slowed down • Feeling foggy or groggy • Drowsiness • Change in sleep patterns	• Amnesia • "Don't feel right" • Fatigue or low energy • Sadness • Nervousness or anxiety • Irritability • More emotional • Confusion • Concentration or memory problems (forgetting game plays) • Repeating the same question/comment

Signs observed by teammates, parents and coaches include:
• Appears dazed • Vacant facial expression • Confused about assignment • Forgets plays • Is unsure of game, score, or opponent • Moves clumsily or displays incoordination • Answers questions slowly • Slurred speech • Shows behavior or personality changes • Can't recall events prior to hit • Can't recall events after hit • Seizures or convulsions • Any change in typical behavior or personality • Loses consciousness

What can happen if my child keeps on playing with a concussion or returns too soon?

Adapted from the CDC and the 3rd International Conference on Concussion in Sport
Document created 6/15/2009

(INSERT SCHOOL/ORGANIZATION NAME HERE)

Concussion Information Sheet

Athletes with the signs and symptoms of concussion should be removed from play immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after that concussion occurs, particularly if the athlete suffers another concussion before completely recovering from the first one. This can lead to prolonged recovery, or even to severe brain swelling (second impact syndrome) with devastating and even fatal consequences. It is well known that adolescent or teenage athletes will often fail to report symptoms of injuries. Concussions are no different. As a result, education of administrators, coaches, parents and students is the key to student-athlete's safety.

If you think your child has suffered a concussion

Any athlete even suspected of suffering a concussion should be removed from the game or practice immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without medical clearance. Close observation of the athlete should continue for several hours. The new "Zackery Lystedt Law" in Washington now requires the consistent and uniform implementation of long and well-established return-to-play concussion guidelines that have been recommended for several years:

> "a youth athlete who is suspected of sustaining a concussion or head injury in a practice or game shall be removed from competition at that time"
>
> and
>
> "…may not return to play until the athlete is evaluated by a licensed heath care provider trained in the evaluation and management of concussion and received written clearance to return to play from that health care provider".

You should also inform your child's coach if you think that your child may have a concussion. Remember it's better to miss one game than miss the whole season. And when in doubt, the athlete sits out.

Governor

STATE OF WASHINGTON
OFFICE OF THE GOVERNOR
P.O. Box 40002 • Olympia, Washington 98504-0002 • (360) 753-6780 • www.governor.wa.gov

December 8, 2010

Roger Goodell, Commissioner
National Football League
280 Park Avenue, Floor 12W
New York, NY 10017-1206

Dear Commissioner Goodell:

From the time I was first approached to support a law to protect youth athletes from the risks of concussions, I have focused on, and learned much about, this important issue. We all share the desire to protect our children from serious, yet preventable, health risks. This is why I am pleased to share Washington State's experience with the Zackery Lystedt Law.

I feel it is my responsibility to protect the health and safety of our young athletes while carefully limiting the cost to Washington State taxpayers. Our state, like many others in our country, is facing significant budget challenges, so any new expenditures have to be carefully scrutinized.

I am thrilled to report that the Zackery Lystedt Law is working. We are seeing a decrease in concussions and other head injuries in our student athlete population. I believe the adoption of this important legislation has saved our state money in emergency medical care, rehabilitation, and other services children need when they suffer the consequences of untreated brain injuries. In addition, school districts have not been required to hire medical professionals or trainers, and no additional significant investments were needed to comply with this law.

Thank you for your leadership in working to have a version of the Zackery Lystedt Law adopted around the country. Please feel free to share this with other states as you work to keep our country's children active and safe.

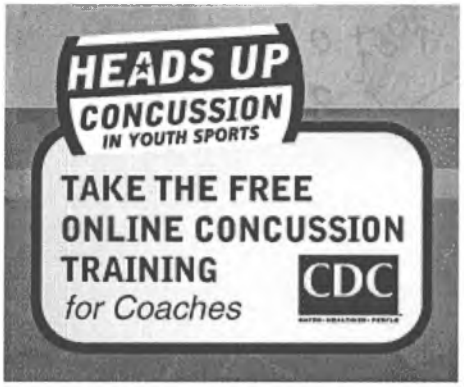
Sincerely,

Chris

Christine O. Gregoire
Governor

Happy holidays!

Centers for Disease Control and Prevention
Your Online Source for Credible Health Information



Heads Up Online Training Course

Heads Up: Concussion in Youth Sports is a free, online course available to coaches, parents, and others helping to keep athletes safe from concussion. It features interviews with leading experts, dynamic graphics and interactive exercises, and compelling storytelling to help you recognize a concussion and know how to respond if you think that your athlete might have a concussion.

What You Will Learn

This course will help you:

- Understand a concussion and the potential consequences of this injury,
- Recognize concussion signs and symptoms and how to respond,
- Learn about steps for returning to activity (play and school) after a concussion, and
- Focus on prevention and preparedness to help keep athletes safe season-to-season.

You can help make your league and school sports safer and healthier for all athletes. Learn when to make the call to pull an athlete off the field, ice, court, or track, and work with athletes, parents, and league and school officials to implement a concussion action plan and prevention strategies.

Course Highlights

Concussion Basics

- Understand concussion and what happens to the brain,
- Discover what causes a concussion, and
- Learn the potential consequences of concussion.

Recognize and Respond to a Suspected Concussion

- Focus on what to look for and when to pull athletes out of play,
- Watch for danger signs and seeking immediate medical attention, and
- Learn the four-step, "Heads Up" action plan when a concussion is suspected.

Helping Athletes Get Back to Play and to School

- Characterize the gradual steps for returning to activity (play and school), and
- Review a concussion preparedness checklist to guide you through pre-, mid-, and post-seasons.

Resource Center

- Access additional concussion information, videos, presentations by leading experts, fact sheets, communication strategies for talking with parents and athletes, and other tools.

Click here to take the training

HEADS UP CONCUSSION IN HIGH SCHOOL SPORTS

A FACT SHEET FOR PARENTS

What is a concussion?

A concussion is a brain injury. Concussions are caused by a bump, blow, or jolt to the head or body. Even a "ding," "getting your bell rung," or what seems to be a mild bump or blow to the head can be serious.

What are the signs and symptoms?

You can't see a concussion. Signs and symptoms of concussion can show up right after the injury or may not appear or be noticed until days after the injury. If your teen reports ***one or more*** symptoms of concussion listed below, or if you notice the symptoms yourself, keep your teen out of play and seek medical attention right away.

Signs Observed by Parents or Guardians	Symptoms Reported by Athlete
• Appears dazed or stunned	• Headache or "pressure" in head
• Is confused about assignment or position	• Nausea or vomiting
• Forgets an instruction	• Balance problems or dizziness
• Is unsure of game, score, or opponent	• Double or blurry vision
• Moves clumsily	• Sensitivity to light or noise
• Answers questions slowly	• Feeling sluggish, hazy, foggy, or groggy
• Loses consciousness *(even briefly)*	• Concentration or memory problems
• Shows mood, behavior, or personality changes	• Confusion
• Can't recall events *prior* to hit or fall	• Just not "feeling right" or is "feeling down"
• Can't recall events *after* hit or fall	

How can you help your teen prevent a concussion?

Every sport is different, but there are steps your teens can take to protect themselves from concussion and other injuries.

- Make sure they wear the right protective equipment for their activity. It should fit properly, be well maintained, and be worn consistently and correctly.
- Ensure that they follow their coaches' rules for safety and the rules of the sport.
- Encourage them to practice good sportsmanship at all times.

What should you do if you think your teen has a concussion?

1. **Keep your teen out of play.** If your teen has a concussion, her/his brain needs time to heal. Don't let your teen return to play the day of the injury and until a health care professional, experienced in evaluating for concussion, says your teen is symptom-free and it's OK to return to play. A repeat concussion that occurs before the brain recovers from the first—usually within a short period of time (hours, days, or weeks)—can slow recovery or increase the likelihood of having long-term problems. In rare cases, repeat concussions can result in edema (brain swelling), permanent brain damage, and even death.
2. **Seek medical attention right away.** A health care professional experienced in evaluating for concussion will be able to decide how serious the concussion is and when it is safe for your teen to return to sports.
3. **Teach your teen that it's not smart to play with a concussion.** Rest is key after a concussion. Sometimes athletes wrongly believe that it shows strength and courage to play injured. Discourage others from pressuring injured athletes to play. Don't let your teen convince you that s/he's "just fine."
4. **Tell all of your teen's coaches and the student's school nurse about ANY concussion.** Coaches, school nurses, and other school staff should know if your teen has ever had a concussion. Your teen may need to limit activities while s/he is recovering from a concussion. Things such as studying, driving, working on a computer, playing video games, or exercising may cause concussion symptoms to reappear or get worse. Talk to your health care professional, as well as your teen's coaches, school nurse, and teachers. If needed, they can help adjust your teen's school activities during her/his recovery.

If you think your teen has a concussion:
Don't assess it yourself. Take him/her out of play. Seek the advice of a health care professional.

It's better to miss one game than the whole season.

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES
CENTERS FOR DISEASE CONTROL AND PREVENTION

June 2010

U.S. Department of Health and Human Services
Centers for Disease Control and Prevention

A Fact Sheet for **ATHLETES**

WHAT IS A CONCUSSION?

A concussion is a brain injury that:

- Is caused by a bump or blow to the head
- Can change the way your brain normally works
- Can occur during practices or games in any sport
- Can happen even if you haven't been knocked out
- Can be serious even if you've just been "dinged"

WHAT ARE THE SYMPTOMS OF A CONCUSSION?

- Headache or "pressure" in head
- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Bothered by light
- Bothered by noise
- Feeling sluggish, hazy, foggy, or groggy
- Difficulty paying attention
- Memory problems
- Confusion
- Does not "feel right"

WHAT SHOULD I DO IF I THINK I HAVE A CONCUSSION?

- **Tell your coaches and your parents.** Never ignore a bump or blow to the head even if you feel fine. Also, tell your coach if one of your teammates might have a concussion.
- **Get a medical check up.** A doctor or health care professional can tell you if you have a concussion and when you are OK to return to play.
- **Give yourself time to get better.** If you have had a concussion, your brain needs time to heal. While your brain is still healing, you are much more likely to have a second concussion. Second or later concussions can cause damage to your brain. It is important to rest until you get approval from a doctor or health care professional to return to play.

HOW CAN I PREVENT A CONCUSSION?

Every sport is different, but there are steps you can take to protect yourself.

- Follow your coach's rules for safety and the rules of the sport.
- Practice good sportsmanship at all times.
- Use the proper sports equipment, including personal protective equipment (such as helmets, padding, shin guards, and eye and mouth guards). In order for equipment to protect you, it must be:
  - > The right equipment for the game, position, or activity
  - > Worn correctly and fit well
  - > Used every time you play

July 2007

It's better to miss one game than the whole season.

For more detailed information on concussion and traumatic brain injury, visit:
www.cdc.gov/injury

CONCUSSION

A Must Read for Young Athletes | Let's Take Brain Injuries Out of Play

CONCUSSION FACTS

- A concussion is a brain injury that affects how your brain works.
- A concussion is caused by a blow to the head or body:
  - from contact with another player, hitting a hard surface such as the ground, ice, or court, or
  - being hit by a piece of equipment such as a lacrosse stick, hockey puck, or field hockey ball.
- A concussion can happen even if you haven't been knocked unconscious.
- If you think you have a concussion, you should not return to play on the day of the injury and until a health care professional says you are OK to return to play.

CONCUSSION SYMPTOMS

- Concussion symptoms differ with each person and with each injury, and may not be noticeable for hours or days. Common symptoms include:
  - Headache
  - Confusion
  - Difficulty remembering or paying attention
  - Balance problems or dizziness
  - Feeling sluggish, hazy, foggy, or groggy
  - Feeling irritable, more emotional, or "down"
  - Nausea or vomiting
  - Bothered by light or noise
  - Double or blurry vision
  - Slowed reaction time
  - Sleep problems
  - Loss of consciousness

During recovery, exercising or activities that involve a lot of concentration (such as studying, working on the computer, or playing video games) may cause concussion symptoms to reappear or get worse.

WHY SHOULD I REPORT MY SYMPTOMS?

- Unlike with some other injuries, playing or practicing with concussion symptoms is dangerous and can lead to a longer recovery and a delay in your return to play.
- While your brain is still healing, you are much more likely to have another concussion. Repeat concussions can increase the time it takes for you to recover and the likelihood of long term problems.
- In rare cases, repeat concussions in young athletes can result in brain swelling or permanent damage to your brain. They can even be fatal.

"For more information about concussion and other types of traumatic brain injuries, go to

www.cdc.gov/Concussion

A part of CDC's Heads Up series

What Should I Do if I Think I Have a Concussion?

DON'T HIDE IT, REPORT IT. Ignoring your symptoms and trying to "tough it out" often makes symptoms worse. Tell your coach, parent, and athletic trainer if you think you or one of your teammates may have a concussion. Don't let anyone pressure you into continuing to practice or play with a concussion.

GET CHECKED OUT. Only a health care professional can tell if you have a concussion and when it's OK to return to play. Sports have injury timeouts and player substitutions so that you can get checked out and the team can perform at its best. The sooner you get checked out, the sooner you may be able to safely return to play.

TAKE CARE OF YOUR BRAIN. A concussion can affect your ability to do schoolwork and other activities. Most athletes with a concussion get better and return to sports, but it is important to rest and give your brain time to heal. A repeat concussion that occurs while your brain is still healing can cause long-term problems that may change your life forever.

All concussions are serious. *Don't hide it. report it. Take time to recover.*

It's better to miss one game than the whole season.

USA Football serves as the sport's national governing body on youth and amateur levels. An independent non-profit based in downtown Indianapolis, USA Football leads the game's development, inspires participation and ensures a positive experience for all youth and amateur players. USA Football was endowed by the NFL Youth Football Fund in 2002.

Working in partnership with the Centers for Disease Control and Prevention since 2007 as well as other credentialed medical organizations and doctors regarding player health and safety, USA Football stands among leaders in youth sports concussion education, particularly in youth football. The organization has built the first football-specific online youth football coaching course that includes chapters and comprehension quizzes encompassing concussion education and management, heat and hydration preparedness and equipment fitting guidelines. USA Football's members – youth football coaches, players, league commissioners and game officials – reside in all 50 states.

USA Football partners with collegiate athletic conferences, the NFL and its teams to promote concussion education through its 80-plus annual football training events and national campaigns. Dozens of articles, downloadable online resources and video promoting concussion education and management reside at usafootball.com and are available at no cost. Approximately 1 million visitors reach usafootball.com annually.

What Youth Football Coaches Should Know About Concussions

By Michael D. Goodlett, M.D., Lawrence J. Lemak, M.D.
March 11, 2009, revised December 28, 2009

Recognize the signs and symptoms of a concussion to ensure your players' safety. An easy rule of thumb to follow is when in doubt, sit them out.

WHAT COACHES SHOULD KNOW

*A concussion is any change in an athlete's behavior, awareness, and/or physical feelings caused by a direct or indirect blow to the head.

*Any concussion has the potential to be a serious injury.

*Before letting an athlete go back to play, a concussion should be evaluated by a doctor.

*An athlete should never return to play while exhibiting any signs or symptoms of a concussion either at rest or with exertion. When in doubt, sit them out!

*There is an increased risk of suffering subsequent concussions after a first concussion.

*Any head injury associated with loss of consciousness must be treated as a suspected head, neck, or back injury.

Knowing the signs and symptoms of a concussion will help a youth football coach feel more comfortable and be more prepared in case of an emergency.

*The only instances in which an athlete's helmet and shoulder pads should be removed is when a medical authority believes that it is necessary for the care of the athlete, or if the equipment interferes with the rescuers' ability to provide required CPR.

*If necessary to provide care for life-threatening conditions, it is recommended that the facemask be removed rather than the whole helmet. A tool to remove the facemask should be in the first aid kit.

*For any head injury, activate the Emergency Action Plan and follow the emergency action steps, Check-Call-Care.

When a player is hit, he may receive a blow to the head and become unconscious or demonstrate changes in behavior. If the player regains consciousness, seems to be alert and oriented, and is eager to play, a coach may feel the player is fully recovered and allow him back into the game or practice. However, the player has suffered a concussion. Failure to recognize a concussion can potentially lead to coma and death particularly if a second impact occurs. Coaches need to be aware of the signs of concussions and treat the situation properly.

Concussions are caused by a force being transmitted to the head. The force may be caused by any direct or indirect hit to the head or body and can cause changes in behavior, awareness, or physical feeling in the injured person. Concussions often go unrecognized by coaches because they are underreported by athletes who want to continue competing. Athletes often will minimize or deny symptoms. Maintaining a high level of suspicion and having some knowledge of the individual athlete's personality helps coaches in early detection of the signals of concussion. This awareness can prevent additional concussive injury, potential long-term brain damage, or other possible catastrophic outcomes.

On-The-Field Evaluations
If there is a forceful blow to the head, with or without loss of consciousness, the coach should suspect a head injury and also be concerned that the neck or back has been injured. When caring for the player on the field, tell him not to nod or shake his head during the assessment, but to say yes or no. The player's helmet should also be left in place. The goal is to minimize movement. If the head impact has caused the player to become unconscious or show the signs of concussion listed below, activate the Emergency Action Plan and follow the emergency action steps, **Check-Call-Care**. **Check** the scene for safety and check the ill or injured athlete, **Call** 9-1-1 or the local emergency number when needed, and

Care for the injured player until EMS personnel arrive.

To Care For Serious Injuries To The Head, Neck, And Back
Follow basic precautions to prevent disease transmission.

Minimize movement of the player's head, neck, and back by putting your hands on both sides of the player's helmet or head. Maintain an open airway using a jaw-thrust maneuver. Have the player remain in the position that you found him until EMS personnel arrive and take over.

Monitor the player's airway, breathing, and circulation.

If life-threatening symptoms are present, it is recommended that the facemask of the athlete's helmet be removed, rather than removing the entire helmet. This will allow access to an airway should the athlete stop breathing.

A tool for removing the facemask should be in the team's first aid kit.

The coach should evaluate the symptoms listed below if he suspects a player may have a concussion requiring immediate care.

The only instance in which an athlete's helmet and shoulder pads should be removed is when a medical authority believes that it is necessary for the care of the athlete, or if the equipment interferes with the rescuers' ability to provide CPR.

Symptoms that require immediate activation of the Emergency Action Plan and immediate removal to a medical facility are:

- *Period of unconsciousness;
- *Confusion, disorientation to time and place;
- *Severe headache or vomiting;
- *Appears sleepy, pale, and is sweating;
- *Blurred vision, slurred speech, and muscle weakness;
- *Neck pain.

Checking For Concussion
If the player is removed from the field after receiving a head impact, it is important to continue evaluating the player every five minutes for at least 30 minutes.

Look at the facial expression of the athlete.

- *Does the athlete have a vacant stare or a confused facial expression?

Check the athlete's behavior.

- *Is the athlete easily distracted or slow to answer questions or follow directions?
- *Does the athlete display unusual emotional reactions, such as *crying or laughing?
- *Does the athlete have a headache or complain of nausea?
- *Is the athlete irritable and easily frustrated?
- *Does the athlete appear unusually anxious or depressed?
- *Does the athlete appear sleepy?
- *Does the athlete have significantly decreased playing ability from earlier in the contest?

Check the athlete's orientation and memory.

- *Is the athlete aware of the time of day and date?
- *Is the athlete generally confused? Questions to ask
- *Which quarter or period is it?
- *Where are we? Which field or arena?
- *Which team are we playing?
- *Which side scored the last points?
- *Which team did the athlete play in the last game?
- *Did the athlete's team win or lose in the last game?

Check for posttraumatic amnesia (the athlete's ability to remember events after the injury).

- *Ask the athlete how he got injured?
- *Ask the athlete the first thing he remembers after the injury?
- *Ask the last thing the athlete remembers before the injury?

Medical attention is required if the athlete's expression, behavior, or memory is affected. Attention should be immediate if symptoms show a deteriorating situation. When an athlete has had a concussion, he should not be allowed to return to the current game or practice, and should not be left alone. Medical evaluation following the concussion is required before a return to participation is permitted.

Postconcussion syndrome
After a player is removed from the field, he may develop symptoms of postconcussion syndrome. This can occur immediately after the injury or many hours or days later. Symptoms of postconcussion syndrome include:

- *Blurred vision
- *Fatigue
- *Ringing in the ears
- *Trouble falling asleep
- *Dizziness

- *Sleeping more or less than usual
- *Headache
- *Increased sensitivity to light and noise
- *Nausea and vomiting
- *Feeling more emotional than normal
- *Poor coordination or balance
- *Difficulty concentrating
- *Increased irritability
- *Difficulty remembering
- *Slurred speech
- *Feeling dazed or stunned
- *Seeing stars or flashing lights
- *Having double vision.

A physician may conduct neuropsychological testing or neuroimaging to assess exactly when the athlete has recovered from a concussion. No athlete should go back to play before being free of all symptoms and signs, both at rest and during exertion, and a physician has indicated the player is ready to return to competition.

CDC, NFL unite national governing bodies of sport to teach young athletes about concussions

By Joe Frollo
October 11, 2010, revised October 28, 2010

Free poster available for download and distribution to all youth leagues

The Centers for Disease Control and Prevention (CDC), the NFL and 14 national governing bodies of sport, including USA Football, are promoting a free poster designed to increase concussion awareness among young athletes, parents and coaches.

Players, coaches and parents can better recognize concussion symptoms thanks to a poster being distributed by the Centers for Disease Control and Prevention, NFL, USA Football and other national governing bodies of sport.

The poster, created by the NFL's Head, Neck and Spine Medical Committee, the CDC and the NFL Players Association, is similar to the one displayed in NFL locker rooms but geared toward a younger audience. It stresses the importance of recognizing a concussion, taking time to recover and not returning to play too soon. By walking through the steps to recognize if the athlete - or a teammate - has suffered a concussion, the goal is increased concussion awareness in all sports.

"The NFL understands its obligation to educate and inform parents, teachers, coaches and especially young athletes about the risks of concussions," NFL Commissioner Roger Goodell said. "This poster is one element of the NFL's program to assist in the development and broad dissemination of reliable medical information on concussions, which will give players, parents, coaches and others the information they need."

The poster is available online for download and order at no cost at CDC's website or by calling (800) CDC-INFO. Information on recognizing and reacting to concussions also can be found at usafootball.com and through USA Football's Put Pride Aside For Player Safety program as well as through the following national governing bodies:

USA Football's Certified Coaching Education Program, employed by youth football coaches in all 50 states, includes chapters on concussion awareness and management as well as hydration and proper equipment fitting. Health and safety videos also are available at USA Football's Health and Safety page.

"Having more than one dozen different sports be part of this initiative underscores the point that coaches, athletes and parents across all youth athletics need to be informed about this issue," USA Football Executive Director ScottHallenbeck said.

"USA Football has worked with the CDC on concussion education since 2007, and we will continue to emphasize it while teaching coaches and players proper football fundamentals for fun and safe play."

Concussion Awareness

Redskins and USA Football Welcome High School Coaches for Concussion Education

By Steve Alic
April 23, 2010, revised April 29, 2010

The Washington Redskins and USA Football partnered for the Redskins' inaugural Concussion Awareness and Education Forum on April 17 at Redskins Park.

Redskins Park has a history of preparing football teams for success.

Successful preparation at the football training facility earned a new and vital definition on April 17 when the Washington Redskins and USA Football partnered for the Redskins' inaugural Concussion Awareness and Education Forum for Maryland, Virginia and Washington, D.C. high school head football coaches.

Nearly 200 high school coaches traveled to Redskins Park as guests of the team to watch minicamp practice and participate in a 90-minute concussion education seminar led by USA Football's Peter Gonzalez, M.D.

Dr. Gonzalez is the director of the Eastern Virginia Medical School Sports Concussion Program in Norfolk, Va.

Dr. Peter Gonzalez, director of the Eastern Virginia Medical School Sports Concussion Program, spoke on behalf of USA Football regarding concussion awareness and management to 170 high school head football coaches at Redskins Park. The session was part of a full-day minicamp invitation that the Washington Redskins extended to high school coaches throughout Maryland, Virginia and Washington, D.C. (Photo courtesy of Ned Dishman/Washington Redskins)

Redskins General Manager Bruce Allen opened the day by welcoming the coaches and introduced Dr. Gonzalez. Each coach received a USA Football/CDC concussion awareness clipboard sticker listing concussion signs, symptoms and an action plan. This same material is given to thousands of coaches who attend USA Football's full-day coaching schools across the country. Concussion-related information is available at no cost throughout usafootball.com.

"The coaches asked good questions," Dr. Gonzalez said after the presentation. "The Redskins are to be commended - this was a great discussion and also was the largest group of high school coaches I've spoken to at any one time."

"I came to learn all I can," said Jason Meade, head football coach of Lee-Davis High School in Mechanicsville, Va., a two-hour drive from Redskins Park. Coach Meade enters his eighth season as head coach this fall. "Learning more when it comes to putting our players in a better, safer situation is important to us."

"We can't allow high school athletes who suffer concussions to return to play too soon," Dr. Gonzalez added. "If there's one thing a coach takes away from our session today, it's not allowing an athlete to return to play while still possessing the symptoms of a concussion.

"And if we even suspect someone to have suffered a concussion, there is no same-day return to play."

Concussion awareness and management is an important part of USA Football's online coaching education courses and its 80-plus training events held across the country for players, coaches and youth league commissioners.

USA Football is the official youth football development partner of the NFL, its 32 teams and the NFL Players Association. More than 60 of USA Football's events in 2010 are conducted in partnership with NFL clubs.

NATIONAL FOOTBALL LEAGUE AND THE NATIONAL ATHLETIC TRAINERS' ASSOCIATION TEAM TO PASS STATE LAWS TO PROTECT YOUTH ATHLETES FROM THE RISKS OF CONCUSSIONS

Washington, D.C., December 7, 2010 – The National Football League and the National Athletic Trainers' Association today announced a joint effort to promote legislation to raise awareness and protect youth athletes from the risks of concussions. The new partnership was announced during the Youth Sports Safety Summit in the nation's capital.

"We are pleased to team with the National Athletic Trainers' Association on a state-based legislative effort to protect youth athletes," said Jeff Miller, the NFL's vice president of government relations. "We will advance a simple, but significant shared goal -- to help prevent concussions and make sports and recreational activities safer for young athletes around the country."

The NFL and NATA have agreed to work together to pass concussion awareness and prevention laws in every state throughout the country. The league and the association will promote laws modeled on the Zackery Lystedt law in Washington State, which contains three key elements: (1) concussion education for young athletes, parents and coaches on an annual basis; (2) immediate removal of a student athlete who appears to have suffered a concussion from play or practice; and (3) mandatory clearance of that student by a health care professional who is trained in the evaluation and management of concussions before returning to play or practice.

Marjorie J. Albohm, MS, ATC, president of the National Athletic Trainers' Association added, "We know from recent cases and studies that far too many youth athletes are either playing with undiagnosed symptoms of concussions or returning to play before fully recovering from them. That's why our organization of trained health care professionals supports legislation in every state that will help coaches, youth athletes, their parents and school officials to recognize and respond appropriately to concussions. Doing so will help prevent injury, chronic impairment and even death."

-more-

The NFL and NATA also have pledged to encourage and enlist the participation of other stakeholders and advocates. Organizations already supporting the adoption of such laws include USA Football, the American College of Sports Medicine and the Brain Injury Association of Washington. To date, nine states have enacted adequate concussion awareness and prevention laws including Washington, Oregon, New Mexico, Virginia, Rhode Island, Massachusetts, Oklahoma, Connecticut and New Jersey.

National Athletic Trainers' Association (NATA) – Health Care for Life & Sport

Athletic trainers are health care professionals who specialize in the prevention, diagnosis, treatment and rehabilitation of injuries and sport-related illnesses. They prevent and treat chronic musculoskeletal injuries from sports, physical and occupational activity, and provide immediate care for acute injuries. Athletic trainers offer a continuum of care that is unparalleled in health care. The National Athletic Trainers' Association represents and supports 32,000 members of the athletic training profession. Visit www.nata.org

Headbanger Nation

By Jeffrey Kluger

I didn't get a good look at the little boy who injured my daughter in the science museum in Mexico City. He seemed to be about 7, my daughter Elisa was not yet 3, and the two of them were part of a scrum of kids playing on an indoor patio. At precisely the wrong moment, she turned left, he turned right, and they collided. Physics being physics, the smaller mass yielded to the larger one, and my daughter fell down. She landed first on her bottom, then tipped backward and hit her head on the floor.

The sound was one that parents dread: the singular clunk of skull striking cement. I winced, Elisa wailed, and I gathered her up. Soon she stopped crying and went off to play, but even as she did, a dangerous process had begun to unfold inside her skull. (Read Dr. Mehmet Oz's column about concussions.)

When Elisa's head hit the floor, the deceleration was sudden, but — physics again — her brain stayed in motion for an instant, moving through the small intracranial space until it collided with the back of the inside of her skull. Concussive energy radiated through the tissue. As it did, channels in the neurons opened wide, allowing calcium ions to flow into the cells, depressing their ability to metabolize energy. Brain tissue began swelling, but with nowhere to go, it squeezed up against the skull wall. Shearing forces tore axons connecting the cells, damaging their myelin sheathing, which can disrupt nerve signals. All of that was the best-case scenario. The worst case was a brain bleed, which could be fatal without immediate surgery.

Within 20 minutes, Elisa grew withdrawn. An hour later, back in our hotel, she vomited and then began thrashing convulsively. We rushed her to a hospital, where doctors struggled to get a line into one of the tiny veins in her arm, shouting at her to stay awake.

"Open your eyes!" I shouted at her in English. "*Abre tus ojitos!*" my wife echoed. Elisa understood both languages; she answered in neither.

Finally, the doctors got her into a CT scanner, then administered an EEG. There was no bleeding, but there was swelling. Elisa spent three days in the hospital taking antiseizure and antiswelling medication and finally was released. On the flight home, she was a terror — but only in the way a toddler is supposed to be. (See a graphic on the physics behind concussions.)

For us, that was a first-time — and, we dearly hoped, last-time — experience, but we're hardly alone in having gone through it. In the U.S., concussions are an alarmingly commonplace injury, particularly among kids and most particularly among active, athletic ones. Up to 3.8 million Americans are getting concussed per year, according to the Centers for Disease Control and Prevention, and even that big a figure is a moving target. In 2005, the number of children who visited emergency rooms for treatment of concussions was more than twice what it had been in 1997, according to a new study in the journal *Pediatrics*. High school football players alone sustain 100,000 full-blown, diagnosed concussions per year. Flying under the radar are injuries mild enough to get passed off by coaches as a mere ding or ignored by players anxious to get back on the field.

According to a study by neuroscientist Kevin Guskiewicz of the University of North Carolina, the average college football player sustains a breathtaking 950 to 1,100 subconcussive blows per season — hits that are enough to do cumulative damage to young brain tissue but not enough to cause immediate symptoms. "There's what we call a dose response," Guskiewicz says. "After a certain number of hits, the damage starts to show."

But while football is responsible for more than half the concussions kids suffer playing team sports, there's a lot more blame to go around. The success of Title IX, which forbids gender discrimination in scholastic athletics, has led to a 900% increase in girls' sports teams since the law's passage in 1972. But guaranteeing girls equal access to sports also guarantees them equal access to injuries. Girls' soccer accounts for nearly 12% of total team-sports concussions, compared with just 6.6% for boys' soccer. Girls' basketball causes 7%. Even volleyball weighs in at 1.1%. (See a special report on women and health.)

What's more, a third of all concussions among kids are caused by nonteam activities such as ice skating, bicycling and playground recreation. Gaining fast too are newer head-cracking activities like snowboarding and extreme skateboarding. Kids may be the first group to fall in love with such sports, but they're the last group — neurologically speaking — that should engage in them.

"The immature brain is still developing," says Julian Bailes, a neurologist at West Virginia University and the medical director for the Pop Warner Youth Football program. "That makes it more susceptible to damage and more likely to suffer repetitive injury." How this shapes overall development is unknown. A child's brain is like a ship en route to somewhere: a concussion can blow it off course.

The severity of the damage — both acute and chronic — is what researchers are now trying to understand and what legislators and the sports-equipment industry are trying to control. Even as scientists look deeper into the physics, neurochemistry and genetics of brain injury, lawmakers are imposing new rules governing how kids should be assessed for concussions and when they should and should not be eligible to play. Equipment manufacturers, particularly those who make football helmets, are being pushed to redesign their product lines and reform the testing standards that essentially allow the industry to police itself. Pro teams too are feeling the heat for selling an elbow-throwing, stick-swinging, head-butting ethos that may be

fine for millionaire athletes who know what they're getting into but is hurting, and in some cases killing, the kids who emulate them.

"I keep telling kids, Your brain is not your knee. It's not your shoulder. It's your future," says neuropsychologist Gerard Gioia, chief of pediatric neuropsychology at Children's National Medical Center in Washington. "We have to protect it better than we are." (See TIME's special report "How to Live 100 Years.")

The Science of a Hit

If it's football that receives most of the attention in conversations about concussions, it's partly because the hits inflicted in the game can be so shocking. In soccer, basketball or even hockey, violence is typically a by-product of aggressive play. In football, it is the play. Guskiewicz conducts his studies by placing accelerometers in players' helmets and recording not just how often they get hit but also how hard. The unit of measure he uses is g-force. Liftoff of a Saturn V moon rocket exposed its crew to a maximum of four g's. A roller coaster may exceed six g's. College football players, by contrast, collide with each other with an impact of nearly 23 g's — and that's the average. Higher-end blows range from 85 to 100 g's. "The highest we ever recorded was 180 g's," says Guskiewicz.

Worse, it's not necessary to be hit in the head for that kind of impact to do concussive damage. A player struck in the chest can suffer whiplash just like a passenger in a car accident, and when the head snaps back and forth, the brain sloshes around with it. "One sign," says Gioia, "is when a player complains of neck pain. That's often an indicator that the head has moved around hard."

Many of those blows don't necessarily lead to a concussion, and in a way, that's unfortunate. Only about 10% of concussions lead to loss of consciousness, but the other signs are hard to miss, including headache, vomiting, dizziness, balance problems, sensitivity to light or noise, confusion, irritability and amnesia. A player with any of those symptoms is likely to be sent to the bench — at least for a while. A player whose brain has been jolted at a subconcussive level is much likelier to stay on the field and return there week after week with no recuperation time. The damage that does can be deadly. (Read Dr. Mehmet Oz's column about concussions.)

In April 2010, University of Pennsylvania football star Owen Thomas committed suicide in his off-campus apartment, having never before exhibited any sign of mental illness. When researchers at Boston University examined his brain, they found it flecked with what are called tau proteins, telltale signs of a condition known as chronic traumatic encephalopathy (CTE), which is often seen among dementia patients and NFL players with a lifetime of concussions behind them. Thomas had never sustained a concussion, but that might not have mattered.

"He'd been playing since he was 9," says neuropsychologist Robert Stern, part of the team that conducted the analysis. "That suggests he had a great deal of exposure to repeated subconcussive blows."

The link between tau and brain damage is straightforward. The protein is one of the major structural materials of nerve tissues. When the brain is shaken too hard, nerve fibers are torn and the tau is released. The brain tries to clean up the mess, and given enough time, it could. If the hits keep coming, however, the proteins just accumulate. "I describe [the tau deposits] as a form of sludge," says Bailes.

It's not unusual for players like Thomas suffering from CTE to die in violent or otherwise dramatic ways. Bailes was part of a team that found tau protein in the brain of Chris Henry, a player for the Cincinnati Bengals who was killed in 2009 when he got into an argument with his fiancée and jumped on the back of her pickup truck as she drove away — taking a fatal tumble onto the road. In 2007 wrestler Chris Benoit murdered his wife and son and then hanged himself. In 2004 former Pittsburgh Steeler Justin Strzelczyk, who suffered from hallucinations, died when he drove his car into a tractor trailer while fleeing police. Both Benoit and Strzelczyk had CTE. "This disease starts young and progresses through life," says Stern.

Until recently, doctors didn't know just how young, but they're getting an idea. Michael (not his real name) is a ninth-grade football player visiting an outpatient concussion clinic Gioia runs in Rockville, Md. Michael got clobbered in a game in mid-September, suffered many of the immediate concussion symptoms and four months later is still not well. Recovery time varies for all patients, though three months is a good benchmark; four months suggests trouble. Michael's sleep remains disturbed, his temper remains erratic, and his school performance has cratered. An honor-roll student in eighth grade, he has gotten mostly D's and F's this year. "The change," says his mother, "it's shocking."

It's not possible to diagnose anything like CTE from just those symptoms, particularly because Michael's recent academic problems began before his concussion. But he already had a history of what he calls stingers, or head blows — none of which kept him off the field. What's more, his coach allowed him to return to play only a month or so after his recent concussion, a game in which he took another blow to the head, then lost his temper and got ejected.

Michael is hardly the only student athlete playing roulette with his brain, and his coach is hardly alone in abetting such recklessness. One study has shown that up to 40% of players who experience a concussion are back on the field before their brains have fully healed. That, Gioia says, is especially worrisome since sometimes two mild injuries can do more damage than one severe one. In some cases — mercifully rare — players who return to the field before they're fully recovered may even suffer what is known as malignant brain edema, or second-impact syndrome, in which another blow to the head leads to a fatal brain bleed. About half a dozen kids per year die from second impact. (Read Dr. Mehmet Oz's column about concussions.)

It's easy enough to make the case that any person who has suffered a brain injury needs a long period of recuperation before returning to vigorous physical activity. But what about vigorous intellectual activity? The brain is a cognitive machine, and it requires an enormous amount of energy to keep its gears moving. That's a fact concussed kids often confront when they resume their classwork after an injury and find that their symptoms return the moment they crack a book. "Cognitive exertion requires a high degree of

metabolic activity," says Gioia. "If you have a brain that's already impaired, that ability is going to be reduced."

Mary, a high school junior and another patient at Gioia's clinic, has suffered three concussions over the past three years as a goalie for her soccer team. Surprisingly, it is not heading the ball that leads to most concussions in soccer — though the limited studies that have been done have looked only at young adults, and none have explored subconcussive injury. Rather, the damage is done mostly by collisions with other players or, as in Mary's case, with equipment. Her third concussion came last November, when she hit her head against the frame of the goal. She remains an honors student in the International Baccalaureate program in her high school, but the struggle to keep up that level of academic excellence has been grueling.

"I didn't have any exams until two months after the injury," she says. "But when I did, the headaches and fatigue came back immediately. I lost focus during one test and had no idea what I'd just written." She got through all the same and has gone back to school full time, but every day is a battle with pain, exhaustion and sensitivity to noise and light. She has also accepted that soccer — which was a passion — is just not an option anymore. "I can't afford another concussion," she says. (See a graphic on the physics behind concussions.)

Digging Deep

The fact that no two concussions follow the same recovery arc is one of the things that makes them so challenging to diagnose and treat. But that same particularity of injury also provides scientists insights into which people are at the greatest concussive risk.

Gender, for one thing, seems to play a role. Mary may be recovering faster from her injury than Michael is, but on the whole, females are both more susceptible to concussions than males are and suffer more-severe symptoms. So far, the reason for that gap is unclear. There is some thought that a girl's comparatively weaker neck muscles may leave her head more susceptible to violent shock. Hormones too may play a role. Among epileptic girls and women, rising and falling estrogen levels are known to make the brain more or less vulnerable to seizures. The thinking is that this may apply to concussion symptoms as well — though it's unclear whether a girl's hormonal makeup leaves her more concussion-prone throughout the month or just during menstruation. (See a special report on women and health.)

Genes may also be involved. The fact is, plenty of athletes make it through their careers battered and scarred but cerebrally intact, while others who may not get hit with any greater frequency suffer all manner of brain damage. Researchers at the Children's National Medical Center are studying the genomes of both concussed and nonconcussed kids, looking for markers that may explain the difference.

"There could be a genetic predisposition that affects metabolic activity," says geneticist Susan Knoblach. "People always assume that there's a genetic component in degenerative conditions but not acute ones, but of course there can be."

Maryland's Fairfax County has instituted a program in which student athletes spit into cups so their genetic profiles can be taken. The genomes of the ones who come down with concussions can then be compared for key similarities. Early attention is focusing on a gene that codes for a protein called ApoE, which has been implicated in Alzheimer's disease. In the long run, teasing out concussion genes could lead to better drugs or gene therapy to treat or prevent the injury. In the short run, it could help parents and coaches determine in advance which sports kids are best suited to play. Says Gioia: "We may actually find out, 'You know what? You're not set up to be a football player. You might be a better tennis player.'"

Newer brain-scanning technology is also making a difference, helping doctors diagnose concussions and track recovery. The microscopic size of tau proteins and nerve fibers makes them impossible to see without a postmortem exam, but three noninvasive techniques can help sidestep that problem. Magnetic resonance spectroscopy measures not direct damage to the brain but its metabolic activity — a good way to evaluate the very system that breaks down first when a brain is concussed. Diffusion tensor imaging can observe transmission along nerve-fiber tracks, providing a sense of the integrity of the neural wiring. And resting fMRI allows physicians to watch the brain when it's not performing a task, providing a look at basic function. (See TIME's special report "How to Live 100 Years.")

Changing the Rules

Smart medicine, of course, can do only so much to reverse the number of concussions. Smart policy must do the rest. To keep kids from hurting themselves — and to prevent coaches from enabling them — 10 states, including New Jersey, Oregon, Virginia and football-mad Oklahoma, have passed return-to-play laws requiring kids who have sustained even a suspected concussion in any sport to be pulled from play and not returned until a doctor or certified athletic trainer declares them fit. A handful of other states are considering similar legislation, and last year two separate bills along the same lines were introduced in the House of Representatives. Both will have to be resubmitted under the new GOP majority. Still, the national trend is clear: "When in doubt, sit them out" is how the advocates put it.

Most major professional sports leagues in the U.S., as well as most large universities and 4,000 high schools, now also use a computer program known as ImPACT (for Immediate Post-Concussion Assessment and Cognitive Testing) that measures such basic skills as memory, word recognition and pattern recognition. Players are required to take a baseline test at the beginning of the season and are periodically retested, especially postconcussion, to determine if there's been any erosion of skills. "I used to sit across from athletes doing paper-and-pencil memory tests," says ImPACT developer Mark Lovell, a neuropsychologist at the University of Pittsburgh Medical Center. "That would never work with large groups of kids. There aren't that many neuropsychologists alive."

Reform is also coming — slowly — to the major manufacturers of football helmets, driven mostly by the NFL, which has imposed much stricter concussion and tackling rules in the past season. The NFL is anxious both to protect its players and to shake its image as a weekly tutorial for student athletes learning all the wrong safety lessons from pros who should know better. Currently, the group that certifies helmets is the National Operating Committee on Standards for Athletic Equipment (NOCSAE), which sounds

reassuringly official except for the fact that it's essentially funded by the manufacturers themselves. NOCSAE has come under fire not only for this seeming conflict of interest but also for what critics consider unreliable testing. The larger problem, though, is that the standard football helmet was designed to prevent only lacerations and fractures — a job it does very well — and to do little or nothing to prevent concussions. "The science just isn't there today," says Dr. Robert Cantu, a neurosurgeon at Boston University and a member of NOCSAE's board. (See a graphic on the physics behind concussions.)

That's not NOCSAE's or the NFL's fault, but they're trying to do something about it. In December the league and the helmet manufacturers convened a sort of head-injury summit in New York — a gathering that also included officials from NASCAR and the military — to consider helmet modifications that could reduce the concussive carnage. For football, those modifications could include better padding, stronger chin straps and redesigned face masks that distribute shock differently. Kids' helmets must also be more than simply smaller versions of those used by adults. The padding inside all helmets is designed to compress at the forces generated by colliding adult bodies. With the smaller forces kids produce, the padding stays rigid, essentially becoming one more hard surface for the head to strike. Innovations introduced in football could ripple out to other sports' playing fields, to say nothing of battlefields.

Athletics will never be stripped of all danger, and terrible as the blown knee or wrecked elbow may be, there is always an assumption of those risks when you elect to play the game. But the brain is more than a joint or a limb. It's the seat of the self. We overlook that fact at our peril and — much worse — at our children's.

BRAIN INJURY ASSOCIATION OF WASHINGTON

Journey Toward Understanding: Concussion & Mild Brain Injury

Introduction

Three little monkeys jumping on the bed.
One fell off and bumped his head.
Took him to the doctor and the doctor said,
"That's what you get for jumping on the bed!"

This nursery rhyme tells a story about concussion--the bumps, bangs and shakings to the brain that many adults and children experience. Unfortunately, just like the monkeys jumping on the bed, professionals may not understand concussion well enough to offer support and to help individuals who sustain concussions. People with concussions may just try and "shake it off" and, thus, not be evaluated and treated properly by professionals. It is not uncommon for individuals to be sent home from emergency rooms (ERs) with no follow-up care or to end up with long-term problems that no one understands. This paper will define concussion, present the common symptoms of concussions and discuss ways to help people who sustain concussions.

Each year, it is estimated that approximately 1.5 million people experience concussions. Vehicular crashes (cars, motorcycles, bicycles), sports/recreational activities (football, hockey, playgrounds), abuse/assault (shaken baby syndrome, beatings), falls (young children and the elderly) and other events all have been implicated. It is easy to see that almost any activity can put a person at risk for a concussion. It is a little surprising that people do so well avoiding concussions and equally not surprising that many of us have had concussions.

It is important to note that concussions clearly are associated with lifestyle and parallel other similar lifestyle injuries. If you are involved actively in sports that put your body at risk for muscle pulls, strains, sprains and broken bones, then your chances of a concussion also are great. The Centers for Disease Control and Prevention (CDC) estimates 300,000 sports-related concussions in the United States each year. The more risk to your body, the more risk of serious harm and permanent damage, and the greater the chances that a concussion or more permanent brain injury can occur.

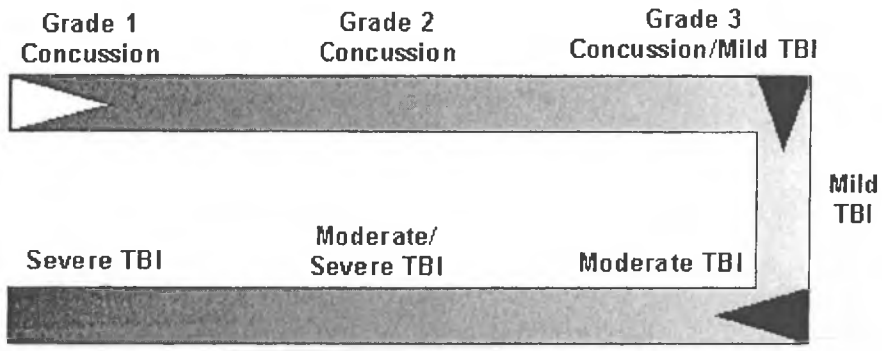
If your job involves heavy labor in farm or construction settings, your chances of physical injury increase and the chances of a concussion increases as well. The use of substances, such as alcohol, that alter your judgment and coordination about everyday activities, like driving or even walking, put you at risk for physical injury and, therefore, at similar risk for a concussion or more serious brain injury. Children--especially younger children--are susceptible to sustaining concussions from falls, play activities and abuse. Lastly, older individuals with balance problems may be prone to falls that can result in not only broken hips, but concussions as well.

What is Concussion?

It is important to understand that a concussion is a physical injury to the brain that causes a disruption of normal functioning just like any other physical injury disrupts your normal functioning. For example, some ankle injuries (i.e., sprains and fractures) are more disruptive

than others, just as some brain injuries are more disruptive than others. The better we understand any injury, the better our chances are for a speedier and healthier recovery.

There is some confusion as to the definition of a concussion and the definition of a mild traumatic brain injury (MTBI). Brain injury can be viewed along a continuum that incorporates concussion, mild brain injury, moderate brain injury and severe brain injury. Each type of brain injury varies depending upon: 1) whether the person was unconscious, 2) how long he/she was unconscious, 3) the length of their amnesia, 4) the resulting cognitive, behavioral and physical problems and 5) the recovery. Viewed as a continuum, the severity of brain injuries can be represented as follows:



As one can see, the definition for a Grade 3 concussion and a MTBI tend to overlap on this continuum.

To further clarify, a concussion is defined as a trauma (i.e., a blow to the head or a serious whiplash) that induces an alteration in mental status (physical or cognitive abilities) that may or may not involve a loss of consciousness.
Concussion as detailed by guidelines developed by the American Academy of Neurology (AAN) and the Brain Injury Association (BIA), commonly is divided into three different types.

Grade 1 Concussion

- Person is confused but remains conscious.
- SIGNS: Temporarily confused, dazed, unable to think clearly, has trouble following directions
- TIME: Symptoms clear within 15 minutes

Grade 2 Concussion

- Person remains conscious, but develops amnesia .
- SIGNS: Similar to Grade 1
- TIME: Symptoms last more than 15 minutes

Grade 3 Concussion

- Person loses consciousness
- SIGNS: Noticeable disruption of brain function exhibited in physical, cognitive and behavioral ways.
- TIME: Unconsciousness for seconds or minutes

It is important to note that a person can sustain a concussion (Grades 1 & 2) without losing consciousness. A Grade 3 concussion involves the loss of consciousness, even if only briefly. As defined by the American Congress of Rehabilitation Medicine, MTBI is a traumatically induced physiological disruption of brain function as manifested by some or all of the following:

- Any period of loss of consciousness
- Any loss of memory for events immediately before or after the incident
- Any alteration in mental state at the time of incident
- Focal neurological deficits that may or may not be transient but does not exceed:
  1. Loss of consciousness of approximately 30 minutes or less
  2. An initial Glasgow Coma Scale score of 13-15 after 30 minutes
  3. Post-traumatic amnesia (PTA) of no more than 24 hours

If concussion and MTBI are seen as part of the brain injury continuum, with Grade 3 concussion and MTBI overlapping, one can get a better understanding of how these definitions compliment each other and enhance our understanding. BIA estimates that approximately 75% of all brain injuries fall in the "concussion-MTBI continuum."

The Functional Mechanics of Concussion

Two mechanisms currently are believed to underlie the changes following concussion. In the first, a sudden movement or direct force applied to the head can set the neural matter of the brain in motion even though the brain is well protected in the skull and very resilient. This motion squeezes, stretches and sometimes tears the neural cells, changing the precise balance and distance the cell's axons and dendrites maintain to transmit or process information.

The second mechanism involves changes that occur in the neuron's ability to produce energy for the cell's vital functions in structures called mitochondria. An initial increase in energy production occurs followed by a dramatic decrease that affects the ability of the cell to produce structural proteins to preserve the diameter of the axon. This change occurs gradually after the time of impact and may be responsible for the delay in symptoms sometimes observed.

The changes that occur affect the electrical or chemical aspects of neural cell functioning and result in unusual processing of normal information. (For this reason, radiologic studies that look at the structure of the brain, such as CT scans and MRI, are most frequently read as normal after concussion/MTBI.) This actually is quite adaptive because the brain cells automatically keep working to reconnect or establish normal impulse transmission. Even the loss of consciousness is adaptive, because the brain shuts down all unnecessary functions until the most important life sustaining neural adjustments are made. Unfortunately, sometimes these neural adjustments cannot be made quickly enough and death can occur.

As a person recovers, the cells re-establish the precise balance needed to ensure effective information processing, but this may mean some compensation or adjustments to the neural cell's original alignments. The more often neural cells must compensate or adjust to injury, the more likely the task takes longer and may not be as complete. For example, when a person sprains or fractures an ankle, professionals recommend cold/heat treatments, rest and supports (i.e., cast, brace) and specific exercises to help the ankle adjust to the injury and recover maximal function. Depending on the severity of the ankle injury (i.e., sprain, fracture) and what is required after recovery (i.e., long distance running, ballet), the severity of the injury to the ankle can disrupt a person's life. Obviously, a human brain is much more complicated than an ankle. Yet similarly, rest, supports (i.e., compensations, modifications) and "exercises" (i.e., therapies, education) for the brain may be recommended to rehabilitate and restore useful

function. Depending on the severity of the concussion and what the person needs to do (i.e., care for a family, return to work or school, manage a large company), a concussion can disrupt a person's life for a short period of time or even longer.

To review, a concussion causes a disruption of normal brain function that may be a temporary inconvenience or result in permanent changes in brain function. Where there are complicating factors, the disturbance in brain function can be fatal. Because of the potential life-threatening danger associated with brain injury, the severity of any brain injury--including concussion--is determined at the time of the injury, based on measures of physical, cognitive and behavioral responsiveness. Again, the three categories commonly used to describe brain injury--mild, moderate and severe--indicate only how seriously impaired the person was at the time of the injury. Thus, on the brain injury scale of severity, a concussion usually is classified as a MTBI because the alterations in brain function are not severe enough or do not last long enough to be classified as moderate or severe brain injury. In the moderate and severe classifications, there appears to be direct damage to the brains neural network with long-term difficulties related to the sites of the damage. The long-term effects of MTBI on brain cell recovery and functioning and behavior vary across individuals. However, for most individuals, no long-term neuronal changes are noted after three to four months and the cognitive and behavioral adjustments return to normal.

Exceptions to this rule exist. Studies indicate that age (i.e., 40 years or older), the presence of a systemic disease (i.e., diabetes mellitus), and possibly female gender affect the recovery process. Other risk factors for delayed recovery include a history of previous brain injury or when situational and personality factors play a role in recovery. For example, individuals who sustain a second concussion while still symptomatic from the first one may sustain what is termed "second impact syndrome." This condition is very serious and can result in lifelong impairments, coma and even death. Individuals who sustain a series of multiple concussions over time (i.e., boxers, abused children) may be left with permanent impairments and disabilities. People who have mental health issues or other disabilities (i.e., attention deficits, learning disabilities) may find that a concussion further complicates their behavioral and learning challenges. Also, even litigation issues may complicate a person's recovery.

The symptoms of concussions cover a wide range of perceptual, sensory, cognitive, emotional and behavioral features. The TABLE below lists the common early and late symptoms of concussion:

Early Symptoms:

- Headache
- Dizziness or vertigo
- Lack of awareness of surroundings
- Nausea with or without memory dysfunction
- Vomiting

Later Symptoms:

- Persistent low grade headache
- Lightheadedness
- Poor attention and concentration
- Excessiveness or easy fatigue
- Intolerance of bright light or difficulty focusing vision
- Intolerance of loud noises
- Ringing in the ears

- Anxiety and depressed mood
- Irritability and low frustration tolerance

As you can see, many of the symptoms listed above are common to a variety of other natural human experiences. Feeling scared or anxious can make our vision change and cause dizzy feelings and numerous "fight or flight" reactions. Muscle cramps in the neck can give headaches, just as not having our usual dose of caffeine causes headaches. A virus can make us feel "spaced-out" and affect our balance. Depression can affect our cognitive abilities and memory. Being angry over changes due to an injury such as a broken arm can make us irritable and affect our motivation. And, as with concussion, if everyone else feels you "should be over it by now," being treated unfairly may cause hopelessness that makes it difficult to concentrate and sleep.

Recovery Variations after Concussion

Concussions vary, depending upon the type and the individual, hence, recovery varies as well. Some commonly asked questions by individuals who sustained concussions include:

Why is there so much variation in symptom presentations? This variation can best be explained because people differ and their perceptual experience of sensations such as pain and distress remains subjective. Without a technology (i.e., more sophisticated CT/MRI scanning technology) to measure these individual experiences, it remains difficult to determine when the brain's coping or healing has taken place and when the individual's reaction to the process has left perceptual and learned phenomena. Thus, we need to monitor the symptoms of concussion in order to monitor recovery. The following checklist can help individuals and their families monitor their recovery one to three months after a concussion so they can report this information to their physician or therapist. Symptoms that persist beyond the usual recovery time for concussion need to be evaluated and treated more carefully.

Physical Symptoms

- Headache, dizziness, lightheadedness
- Vomiting or nausea
- Numbness or tingling
- Balance problems, clumsiness, drops things, trips often
- Fatigue, tires easily, needs extra sleep, drowsiness, trouble falling asleep or staying asleep
- Sensitivity to light and noise
- Blurry vision
- Ringing in ears

Cognitive Symptoms

- Confusion, in a "fog," has befuddled expression, gets mixed up about time and place
- Attention or concentration problems, inability to do more than one thing at a time, unable to return to a task if interrupted
- Memory problems, forgets things
- Takes longer to get things done or complete assignments
- Has problems organizing thoughts or words, misunderstands things

Behavioral Symptoms

- Restless, irritable, fussy
- Acts without thinking

- Becomes upset easily, loses temper
- Sadness, depressed mood
- Anxiety, nervousness

Why some people adjust better after a concussion than others? Research in cognitive-behavioral therapy supports the notion that: 1) looking at the positive aspects of recovery, 2) taking steps to gain control of your rehabilitation and 3) knowing that fundamental healthy behavior requires a focused rehearsed plan all can contribute to dealing better with the many sensations and feelings that often follow concussion. Concussion needs to be taken seriously and modifications to a person's life (i.e., home, work, school) need to be made during the recovery period. Just because a person "looks great" does not mean that they are recovered fully. Having a good plan for recovery and knowledge about concussion helps individuals feel more in control and lessens their anxiety.

Why do concussive symptoms change over time? It now appears that during the first months after concussion the brain begins to heal and evidence suggests that there is little trace of brain damage after three to four months. During this period of time, sleep patterns return to normal, sensations mirror the brains recovery and efforts to return to normal and develop a sense of self are influenced by the rehabilitation process. For example, many strange sensations accompany recovery from a sprained or fractured ankle, including pain from the efforts a person makes to accommodate the recovery time (such as muscle atrophy), as well as sleeping and exercise changes due to limitations. Brain function is much more complex to understand and monitor. Yet, just as an ankle can "return to normal" over time, so can the brain after concussion.

Why can't professionals tell if there is permanent brain injury over time? Without doing an autopsy, brain function can only be estimated. For example, neurological testing can provide information about what a person might be able to do at this point in time, but without the same information from before the concussion, it is only possible to estimate how a concussion affected performance. Many professionals use various tools to help them understand the degree of brain damage (i.e., CAT scans, MRI, neuropsychological batteries, neurolinguistic assessment, functional behavioral analysis), but these tools are only approximations and it is difficult to predict the total impact a brain injury may have on a person's life. The best "predictor" is the person with the injury working with a dedicated team of professionals to identify and compensate for permanent damage.

Is permanent brain damage always bad? This is a trick question because the easy answer is that damage always means a loss of brain cells. Yet, many people can attest that the loss of brain cells does not mean that they themselves are "lost". Rather, many individuals have found the strategies and techniques they have used to cope with brain injury have been helpful in assisting them to become the person they felt they wanted to be all along--happy, loved, productive and important. The experience of coping with a rehabilitation or treatment program has helped them: 1) appreciate their talents, 2) give up bad habits and 3) become more mindful of what they truly wanted out of life. This is not to minimize the tremendous changes brain injury causes for people and their families, but rather to emphasize the importance of good treatment programs and community support to help people re-define their lives.

Treatment Recommendations

The only cure for brain injury is prevention. Obviously, the treatment of concussion starts with prevention. Thoughtful preparation before activities--knowing your limits; minimizing risk to one's head by wearing protective gear such as seat belts, helmets, hard hats; and being

substance free when activities require concentration such as driving, bicycling, swimming, boating and skiing--all will reduce the likelihood of injury. Unfortunately, concussions often are difficult to prevent even with careful preparation and protective gear.

Immediately after a concussion, emergency care may be required. Since life-threatening complications--usually due to brain swelling and bleeding--can occur from any brain injury regardless of the type, all brain injuries must be taken seriously. The proper assessment of concussion by emergency medical professionals and physicians is critical.

AAN and the BIA have developed a clear, scientifically based set of guidelines for the medical management of concussion in sports that is used by team physicians, coaches and athletic trainers and can easily be adapted for all concussions. Thus, after the type of concussion has been determined, management guidelines are implemented. If an adult sustains a Grade 1 or 2 concussion, it may be wise for that person to rest for two or three days before returning to regular activities and not operate a motor vehicle for at least a week. If a child crashes a bicycle and the physician has examined and given them a clean bill of health, it is wise to keep the child off the bicycle for a week. As always with children, the rule should be that if it has wheels, you need a helmet.

The potential danger with concussion is sustaining a second one before allowing the brain time to rest and recovery from the first one (as we would for a broken ankle). The chart below summarizes AAN's management recommendations for athletes returning to play after concussion, but reworded for the general audience. Please remember that all concussions are potentially serious and an individual should be examined by a physician if there is any doubt about their safety.

Grade 1 Concussion Management Guidelines

If the person has no symptoms or mental status abnormalities 15 minutes after the injury, he/she can resume normal activities. All symptoms from the concussion must have disappeared, first at rest and then with exertional testing, before the individual can return to regular activities.

Grade 2 Concussion Management Guidelines

The individual should refrain from activities for at least one week, again only after the person is asymptomatic at rest and during exertion. Additionally, a physician should perform a neurological exam before the individual is allowed to go back to regular activities. If the individual experiences a worsening in headaches and other concussion symptoms and/or these symptoms last longer than a week, a CT scan or MRI is recommended.

Grade 3 Concussion Management Guidelines

One month should be the minimum period for an individual to return to rigorous activity. For an individual with a brief loss of consciousness (i.e., seconds), he/she can return to regular activities only after being asymptomatic for at least one week. For a person who had a prolonged loss of consciousness (i.e., minutes), he/she can resume normal activities no sooner than after two weeks of rest. A thorough neurological examination and a neuro-imaging study (i.e., CT scan, MRI) should be performed on all individuals who have been rendered unconscious for brief periods of time. The individual should be admitted to the hospital if any signs of pathology are detected and/or the mental status of the person remains abnormal.

Recovery after concussion--just like a sprained or fractured ankle--takes time. An individual with a broken ankle would not go out the next day and run a marathon. That individual likely would take time out from work, rest and put the leg up, use crutches, attend therapy, if necessary, and allow the ankle time to recover. Too often after concussion, many individuals immediately return to work or school, push themselves to think as well and as quickly as they did before and expect that in a day or two they are recovered fully. One of the problems with concussion is that people try and "get back on the horse" too quickly. The danger in doing this is that the person could sustain a second concussion (i.e., the athlete returns to the game; the child gets back on his/her bicycle; the person resumes driving a car) that could cause more serious injury to the brain. Or, if individuals push themselves to perform and/or are expected to perform by their colleagues and family too soon after the concussion, the symptoms may become exacerbated.
After a concussion, it is wise for people to modify their lives by: 1) reducing workloads, 2) building in rest periods, 3) giving more time to finishing projects, 4) developing a written plan to refer to when confused or uncertain, 5) using a notebook/calendar to write things down and check-off when completed, 6) writing down schedules with time, place and person and 7) avoiding the use of alcohol or other substances that may slow recovery.

It is also important to monitor symptoms over the next one to three months and report this data to one's physician and other treating professionals. Family members can become more knowledgeable about concussion and help the person make accommodations, monitor symptoms and ensure that--just like with a broken ankle--the person is given ample healing time. The use of other professionals, such as a Neuropsychologist, can help through testing to determine a person's strengths, needs and preferences. Psychologists and counselors may be extremely beneficial in helping people with more serious injuries to understand and adjust to any changes caused by the concussion. BIA, its chartered state affiliates and support groups may provide the person with education about concussion and where to go for additional help.

Conclusion

Concussion is the most common of all brain injuries. It needs to be better understood, evaluated and treated. Individuals who sustain concussions may experience an array of symptoms, both short, and long term. The important thing is to take any concussion seriously and recognize that recovery is dependent on many things.

About the Authors...

William Frey, PhD, maintains a private clinical psychology practice in Rutland, VT, specializing in behavioral medicine with a focus on traumatic brain in jury rehabilitation. He received his BA from Villanova University (1967) and his MS (1969) and PhD (1976) from the University of Vermont. In addition to his clinical practice, he has held faculty positions at the University of Vermont, St. Michael's College and Middlebury College and, most recently, had been interim Dean of Student Development at Green Mountain College in Poultney, VT. He has been a President of the Vermont Psychological Association (1985-1987) and a founding board member or the Vermont Head Injury/Stroke Independence Project (1983-1986). He has published articles on mild traumatic brain injury and the impact of brain injury on sense of self and has developed an ecologically-based rehabilitation model for traumatic brain injury.

Ronald C. Savage, EdD, has worked with children, adolescents and young adults with neurological injuries and disabilities for over 25 years. Presently, Dr. Savage is Executive Vice President for Professional Development at Bancroft NeuroHealth in New Jersey. He is the former Senior Vice President of Behavioral Health and Rehabilitative Services at The May

Institute in Massachusetts and the former Director of Clinical Services for Rehabilitative Services of New York and the company's for rehabilitation facilities. In addition, Dr. Savage has taught at the elementary and secondary school level as a classroom teacher and as a special educator, as well as teaching at several colleges and universities. Dr. Savage presently holds academic appointments at Tufts University, Department of Rehabilitation Medicine; Northeastern University, Department of Psychology; The George Washington University School of Education; and the Laboratorio de Neuropsicologia, Universidad de Sevilla, Spain. Dr. Savage has presented at over 200 conferences, training seminars and grand rounds presentations in the past four years. He has published numerous articles, chapters, manuals and books on children, adolescents and adults with traumatic brain injuries and other neurological disabilities.

BOSTON UNIVERSITY AND DEPARTMENT OF VETERANS AFFAIRS RESEARCHERS DISCOVER BRAIN TRAUMA IN SPORTS MAY CAUSE A NEW DISEASE THAT MIMICS ALS

Two former NFL players died after being diagnosed with Lou Gehrig's Disease; New findings suggest they had a new disease associated with repetitive brain trauma

(BOSTON) – The Center for the Study of Traumatic Encephalopathy (CSTE) at Boston University School of Medicine (BUSM) and Department of Veterans Affairs (VA) announced today that they have provided the first pathological evidence that repetitive head trauma experienced in collision sports is associated with motor neuron disease, a neurological condition that affects voluntary muscle movements. The most common form of motor neuron disease is amyotrophic lateral sclerosis (ALS) or Lou Gehrig's disease. The findings will be published in the September issue of the *Journal of Neuropathology and Experimental Neurology* (**http://journals.lww.com/jneuropath**).

The finding was discovered by Ann McKee, MD, and colleagues at the CSTE. McKee, a CSTE Co-Director, is an associate professor of neurology and pathology at BUSM, as well as Director of Neuropathology for the Department of Veterans Affairs at the Bedford VA Medical Center, where this research was conducted.

McKee and the CSTE researchers made this groundbreaking pathological discovery while examining the brains and spinal cords of 12 athletes donated by family members to the CSTE Brain Bank at the Bedford VA Medical Center. Three of these 12 athletes, including former professional football players Wally Hilgenberg and Eric Scoggins, as well as an unidentified former military veteran and professional boxer, developed motor neuron disease late in their lives. The former football players were diagnosed clinically with ALS, which is a progressive neurodegenerative disease that attacks motor nerve cells in the brain and spinal cord, resulting in muscle weakness and atrophy. ALS affects fewer than two in 100,000 patients annually, and 30,000 Americans currently live with the disease. The majority of ALS cases (90-95 percent) are considered "sporadic," meaning of unknown cause, although it has long been suspected to involve a complex interaction between multiple genetic and environmental risk factors.

In this study, funded in part by an unrestricted gift from the National Football League (NFL) to the CSTE, McKee found that when they died, all 12 athletes showed neuropathological evidence of chronic traumatic encephalopathy (CTE), a progressive degenerative brain disease characterized by deposits of an abnormal form of *tau* protein and believed to be caused by repetitive head trauma. In the three athletes with motor neuron disease, abnormal *tau* protein deposits were not only found throughout the brain, but also in the spinal cord.

CSTE researchers also discovered that 10 of 12 CTE victims had a second abnormal protein, TDP-43, in their brains. Of those 10, only three had TDP-43 in the brain *and* the spinal cord, and those were the three athletes diagnosed with motor neuron disease. TDP-43 is also found in individuals with sporadic ALS although in the athletes with repetitive brain trauma, the TDP-43 pathology was more severe than found in sporadic ALS and was accompanied by extensive *tau* pathology. The brains and spinal cords of normal individuals show no TDP-43 or *tau* deposition.

These new findings suggest that the motor neuron disease that affected the three athletes is similar to, but distinct from sporadic ALS and represents a disease never described previously in the medical literature. This new disease, referred to as chronic traumatic encephalomyopathy (CTEM) by McKee and colleagues is likely caused by the repetitive head trauma experienced by athletes in contact sports.

The association between head trauma and ALS is supported by the medical literature, in which the risk of ALS has been reported to be higher among contact sport athletes and veterans. A study of professional soccer players in Italy found that the incidence rate of ALS was 6.5 times higher than in the general population. An increased incidence of ALS has also been reported in American football players, including three players from the 1964 San Francisco 49ers who died from ALS. Based on the number of retired NFL players with ALS, it is estimated that the risk is at least 8 times higher than in the adult male population. Among Veterans with a history of head injuries, their risk of ALS was 2.3 times higher than normal, and Gulf War Veterans have a twofold increased risk. In fact, since 2008, the US Department of Veterans Affairs has considered ALS as a presumptively compensable illness for all veterans. The discovery of this new ALS-like disease by the BU CSTE investigators suggests that one possible reason for the increased risk of clinically diagnosed ALS in veterans and in contact sport athletes may be the exposure to repetitive head trauma, including concussions, subconcussive blows and blast injuries.

These findings raise the question of whether head injuries may have contributed to Lou Gehrig's motor neuron disease, and whether he also suffered from CTEM. Gehrig, nicknamed the "Iron Horse," played football at Columbia University before becoming a legendary member of the New York Yankees and playing in 2,036 consecutive games, a record that stood for more than 60 years. Gehrig suffered at least five documented concussions and was reported to have been knocked unconscious for five minutes after taking a pitch to the head while not wearing a helmet. He played the next day.

"When we read reports about cases of the disease being linked to specific activities or experiences, such as the increased risk associated with military service, or this one regarding professional athletes, we are reminded of just how complex of a disorder ALS is. We're hopeful that this new work may shed light on potentially exciting new possibilities for biomarker and therapy development," said Steve Perrin, PhD, CEO and Chief Scientific Officer of the ALS Therapy Development Institute.

Responding to these new findings, Hunt Batjer, MD and Richard Ellenbogen, MD, the co-chairmen of the NFL's new Head, Neck and Spine Committee, stated, "We are pleased that the NFL has provided the support necessary for this research and look forward to continued discussion of the findings within our medical committee and with other researchers to better understand their clinical implications."

McKee now has analyzed the brains of more than 35 athletes and found evidence of CTE in 12 of 13 former NFL players. These brains were acquired primarily through the efforts of CSTE co-director Chris Nowinski who is also president of the non-profit Sports Legacy Institute. The CSTE maintains a registry of more than 350 living athletes who have agreed to donate their brain and spinal cord following death and to undergo telephone-based interviews and assessments during life. Robert Stern, PhD, CSTE co-director and an associate professor of neurology at BUSM, oversees the CSTE registry as well as a study about to begin of retired NFL players who undergo extensive neurological, cognitive, psychiatric, cerebrospinal fluid and neuroimaging studies. Robert Cantu, MD, a clinical professor of neurosurgery at BUSM and co-director of the CSTE, was recently appointed senior advisor to the NFL Head, Neck and Spine Committee.

COORDINATES WOULD BE PLACED HERE

****

Wally Hilgenberg died in 2008 at the age of 66 after a three-year battle with ALS. After graduating from the University of Iowa, Mr. Hilgenberg played 12 seasons with the Minnesota Vikings and three with the Detroit Lions as a linebacker.

Eric Scoggins died in 2009 at the age of 49 after a two-year battle with ALS. After graduating from the University of Southern California, he played one season for the San Francisco 49ers before playing two seasons in the United States Football League, for the Los Angeles Express and the Houston Gamblers.

Early symptoms of ALS often include increasing muscle weakness, especially involving the arms and legs, and progressive problems with speech, swallowing and breathing. Because voluntary muscle action is progressively affected, patients in the later stages of the disease may become totally paralyzed. In nearly all cases, ALS is fatal.

The CSTE (**www.bu.edu/cste/**) was founded in 2008 and is the leading center in the world studying the long-term effects of repetitive brain trauma in sports and the military. The CSTE was created as a collaboration between Boston University (BU), Sports Legacy Institute (SLI) and the Department of Veterans Affairs. Co-directors of the BU CSTE include Robert Cantu, MD, a clinical professor of neurosurgery at BUSM, Ann McKee, MD, an associate professor of neurology and pathology at BUSM, Chris Nowinski, and Robert Stern, PhD, an associate professor of neurology at BUSM. The mission of the CSTE is to conduct state-of-the-art research of CTE, including its neuropathology and pathogenesis, the clinical presentation, biomarkers, and course, the genetics and other risk factors for CTE, and ways of preventing and treating this cause of dementia. Brain trauma is increasingly seen as a public health crisis due to the discovery of CTE in a number of recently deceased athletes, most of whom have been studied at the CSTE. McKee also identified CTE in the only former NHL player examined, Reggie Fleming. The CSTE's groundbreaking research created a dramatic change in the understanding of and response to brain trauma and concussions in all sports, especially football. The BU CSTE has received grants from the National Institute on Aging and the National Operating Committee on Standards in Athletic Equipment (NOCSAE), and has received an unrestricted gift from the NFL.

CTE, originally referred to as "dementia pugilistica" because it was believed to only affect boxers, is a progressive brain disease believed to be caused by repetitive trauma to the brain, including concussions and subconcussive blows. It is characterized by deposits of an abnormal protein called *tau* in the form of neurofibrillary tangles, glial tangles, and neuropil threads throughout the brain, and, in some cases, the presence of another abnormal protein – associated with motor neuron disease – known as TDP-43. These abnormal proteins are associated with the impaired functioning and eventual death of brain cells. Early on, CTE sufferers may display symptoms such as memory impairment, emotional instability, erratic behavior, depression and problems with impulse control. CTE may eventually progress to full-blown dementia. Although similar to Alzheimer's disease, CTE is pathologically distinct, and it is the only known preventable cause of dementia.

CSTE co-directors Cantu, McKee and Nowinski serve on the NFL Players Association Mackey/White Traumatic Brain Injury Committee, which includes, and is chaired by, CSTE registry member Sean Morey. In addition, Cantu serves as a senior advisor to the newly created NFL Head, Neck and Spine Committee.

Sports Legacy Institute is a 501(c)(3) nonprofit corporation founded in 2007 to solve the sports concussion crisis. SLI is dedicated to education, prevention, treatment and research on the effects of concussions and other brain injuries in athletes and the military. SLI partnered with Boston University School of Medicine to form the Center for the Study of Traumatic Encephalopathy in 2008.

Subject: HB15 Traumatic Brain Injuries (Concussions) in Student Athletes

Representative Dick

I wish to convey the Anchorage School Districts support of HB15. We have been monitoring the issue of student concussions and how they effect on our students for some time. We would like to be included on the list of School Districts that support certified medical attention for concussion injuries and assurance from the medical providers that students can return as healthy participants in our school programs

If we can be of assist in the passing of this bill please contact my office or the office of the Superintendent Carol Comeau.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB38

Analysis

The fiscal impact of HB38 can not be accurately determined at this time. The cost of establishing a medical school and a law school in the State of Alaska are dependent upon the results of a demand study. It is not possible for the University to accurately estimate the cost of establishing these schools of higher education until this demand study is completed. The University of Alaska estimates a cost of up to $1 million to conduct separate studies on each a medical school and a law school.
Included in the study may be factors such as:
Medical School
Industry Demand
Student Demand
Community Resources (Availability of residencies)
Facility Resources
Staff and Faculty Resources
Research opportunities
Alternative models for medical school
Accreditation Requirements

Law School
Industry Demand
Student Demand
Community Resources
Facility Resources
Staff and Faculty Resources
Research opportunities
Accreditation Requirements (law library)

FY12-FY17 costs are listed as indeterminate pending results of the study.

Representative Scott Jiu Wo Kawasaki
Alaska State Legislature District 9 Fairbanks

House Bill 38
Sponsor Statement

"An act authorizing the establishment of institutes of medicine and law at the University of Alaska."

Alaska remains one of only six states that have no medical school and the only state without a law school. Alaska has a shortage of doctors which is likely to worsen as the state's population increases and ages. The cost of healthcare and legal services will only continue to rise. That is why it is time to invest in education and build the workforce Alaska will need for the next 20 years.

Law and medical students are required to go out of state for their education, therefore Alaska suffers even more. Most students tend to remain in the area in which they earn their degrees. Conversely, the 'Alaska Family Medicine Residency' has an extremely high rate of return in which 70% of the 55 graduates have remained in Alaska. By enabling the University of Alaska to build schools of medicine and law; it creates a better foundation for future doctors and lawyers to stay in Alaska for their higher education.

Alaska shouldn't deny opportunity to the best and brightest and export their talents, nor import professionals from the lower 48 who don't have a connection to the state. They deserve the chance to attend medical or law school, without the high cost of transferring out of state, possibly moving back, tuition, and without the limitations set on programs such as WWAMI which only allows 20 students per year into medical school. I urge your support encouraging the University of Alaska to train the next generation of Alaskan doctors and lawyers through House Bill 38.

Hon. Scott Kawasaki
State Capitol, Rm 428
Juneau, AK, 99801-1182

RE: An Alaska Law School

Dear Scott,

Back in 1975, the Regents and the Legislative Council jointly contracted with me to do a study of whether Alaska should have a law school. The results of my study were published in a book-sized report entitled, *Legal Education for a Frontier Society.* A copy of that report should be available to you in one of the libraries at your disposal, presumably also in the archive of the Legislative Council itself. In preparing the report, I engaged with the American Bar Association, the Association of American Law Schools and the deans of several law schools, including UCLA, Puget Sound (now U of Seattle Law School), Stamford, Hawaii and Denver.

To summarize the report, I found that the establishment of a law school at that time would be marginally feasible at best and concluded that a greater need existed at the time for legal education for various careers closely connected with the law. An emphasis was given particularly to police and corrections education because the Law Enforcement Assistance Administration was then in top form and was handing out grants. The report enjoyed some kudos within national legal education circles.

As a result of this study, the University appointed me Director of Legal Studies for the University to implement the plan. This was done. I obtained an LEAA grant, hired five professors on soft money and, with a few faculty that were working at the time on community college Police Administration courses, established a Justice Center at UAA, focusing on research, and a state wide major in Justice. To my great satisfaction, the program has grown, prospered and become a regular part of U of A curricula. Ten years after I began, the University offered one of those retirement programs that was too good to turn down and I retired, returning to the practice of law, in which I am still engaged, if on a reduced schedule.

From this account, you can see why I would have a special interest in your proposal and the strategies that might be taken to determine whether now, thrity-five years later, with the state's population grown and the economy of Alaska having increased several fold in size and complexity, the question should be reviewed in a professional manner. If it is found that a law school is now justified, (given an analysis of issues including the comparative demands for educational resources), then there are complex questions still ahead on how exactly, a law school program should be implemented, particularly to assure quality.

There have been some very preliminary, well-meaning efforts by others in the Alaska community to develop a law school outside of the context of the University of Alaska, the American Bar Association section on legal education, the Association of American Law Schools and their support and approval systems. I have spoken against these proposals to the Alaska Bar Board of Governors and others, fearing that a third rate law school is worse than none.

Needless to say, as I have sustained my own interest in an Alaska Law School, in a desultory way over the years (including a column in the Anchorage Daily News, where I am published monthly), I am regularly met with comments like, "Who needs any more lawyers" and "Don't existing law schools provide a steady supply?" There are answers to these questions and others, but they need careful development. I do not think that whether Alaska should have a law school is a totally closed question. I prefer to approach any complex question with an open mind. But it is certainly time that the issue was raised again and I am grateful to you for raising it.

I am uncertain of the direction and strategy that you are taking with your bill, but of course I wish you well. (It appears to be too early for me to obtain a copy locally.) I have discussed this issue with a few members of the Anchorage delegation and, of course, they all refer me to you. I offer my support in your endeavor.

It may be that the route you need to follow is to retrace the work done in Education for a Frontier Society. Obviously, it would take a somewhat larger appropriation today, and I am unsure whether you could obtain the support of the Regents, this time around, since my impression is that their attitude recently has been negative- one lawyer member being quite interested. I don't remember precisely, but I think I did the report for around $100,000. Some survey work was done in support of the study (a finding that may interest you: the law school idea enjoyed wide support among the Alaskan public) as well as interviewing the Deans in question and personal contacts

with ABA and AALS officials. This time probably more work would need to be included on the development of a preliminary law school plan. I would hope for an appropriation closer to $250,000 today for an equivalent product. Of course, any study can be tailored to the money available. You get what you pay for.

At any rate, to repeat, thank you for raising the issue and taking a leadership role. I hope I may find some supporting role as you proceed.

Sincerely,

John Havelock

Alaska Medical Library
UNIVERSITY of ALASKA ANCHORAGE

January 13, 2011

State Representative Scott Kawasaki
State Capitol Room 428
Juneau AK, 99801

Dear Sir,
I read in the ADN January 1, 2011 edition that you plan to file legislation before the Alaska Legislature that would create two graduate programs, a laws school and a medical school. As you move forward with this goal, I thought you might find the following pieces of information useful.

1) UA's Master Academic Plan for Spring 2011 to Fall 2015 includes the statement that UAA will be the lead MAU for coordinating health academic programs. The WWAMI program was moved from UAF to UAA many years ago when the decision was made to focus health programs in Anchorage.

2) Health programs need strong library support. The Alaska Medical Library (AML) is part of the Consortium Library at UAA. As the Head of the Alaska Medical Library, I can attest that we have the strongest collection of both print and online resources to support the existing health programs in the state. I must also inform you that the existing budget allocation for the medical library is woefully inadequate to support a medical shool. The existing medical school students access the University of Washington's medical library. If we were to separate from that university, our existing library would need a large infusion of ongoing funds to support the medical school.

3) Another reason the health programs live in Anchorage is the need to provide clinical training through rotations as hospitals and preceptors with healthcare providers. The one hospital in Fairbanks would not be able to provide this funtion adequately. Anchorage has the three largest hospitals in the state and they are already supporting nursing and medical students and medical residents ongoing training needs.

The article mentions that the research focus in Fairbanks is the reason to locate the medical school in that community. I believe the need in Alaska is for healthcare providers – family practice physicians in particular – not medical researchers. Anchorage is the only viable option as a location for a medical school in Alaska.

If you have any questions or would like to know more about the services the Alaska Medical Library provides to healthcare providers throughout the state, please read the enclosed brochure or contact me by email at afktm@uaa.alaska.edu or phone at 786-1611.

Sincerely,

Professor Kathleen Murray
Head, Alaska Medical Library

Rep. Kawasaki,

I was encouraged by the news yesterday that you want to introduce a plan to create a law school and medical school in Alaska. As you are well aware Alaska is the only state without a law school, and this puts us in a disadvantage. Every attorney practicing in Alaska learned their trade outside, and during that time did not learn the intricacies of our system. Earlier in the decade ISER put out a revised study that concluded Alaska did not need nor have the population base to sustain a law school. I don't believe this for a second, if a state like Wyoming with a smaller population can maintain a law school, than so can we. Two years ago, myself and group of colleagues put together a feasibility study for a law school, I have attached that study for you to look over.

If you have any questions, want to discuss what we have found, or need our help in any way please feel free to contact me anytime.

Regards,

Wally Hickel III
Vice President
Hickel Investment Company

University of Alaska Review

January 2011

James L. Fisher, Ltd.

"It appears that the further programmatic development of UAA is inevitable and certainly in the long run this is a good thing for the state's largest metropolitan region. However, not all paths to additional programmatic development for UAA are equally sound from the standpoint of the State of Alaska. **(2) We recommend that the UA System: (A) respect the lessons of specialization in graduate work and research and identify a limited number of academic disciplines that will receive special resources and commitment, whether at UAF or UAA; (B) continue to focus UAF on its traditional strengths in the sciences and engineering; (C) focus advanced graduate work and research at UAA on the social and behavioral sciences and education and avoid replicating UAF's primary areas of expertise; (D) locate any future law school—the state does not have one currently—at UAA; and, (E) support and expand WWAMI–type programs (WWAMI is a collaborative medical school among universities in five northwestern states (Washington, Wyoming, Alaska, Montana, and Idaho) and the University of Washington School of Medicine) in expensive disciplines and courses of study."**

Fisher, James L. *University of Alaska Review.* January 2011. (13).

February 7th, 2011

Hello Mr. Scott Kawasaki:

My name is Alena Robson. I am an Alaskan-born resident who was raised to be proud of my home-state. Ever since graduating from high school, the lawyer path struck my fancy. In order to fulfill my dream, I had to enroll in a private school, out of state. The tuition costs are far more than I could handle but thanks to generous scholarships, finances are at a manageable level. I am going to finish up my undergraduate here in the next year. I currently hold a 3.8 GPA in all of my classes, volunteer with a refugee organization, work as a tutor in mathematics and find *a little* time to play sports. I recently returned from India where I taught German to Tibetan refugees who wanted to move out of India and into Europe in hopes of finding a better life. I am telling you all of these accomplishments, in order to help you understand that I am a dedicated person. I have been quite focused in undergraduate schooling, just as I will be fully dedicated to Law school when the time comes.

I have been following your proposal of establishing both a law school and medical school in Alaska. Now that it has become Bill 38, I will watch this bill as it navigates its way through the Alaska respective houses. I saw this proposal as a hope for me. I would very much want to attend that law school in Alaska, if it were to transpire. I am tired of paying thousands of dollars to a private school that my home state will not even benefit from. I want to be able to take the LSATS and mark those scores to be sent to UAA's law school. When I finish law school, I will be living in Alaska. I do not desire to move out of state again, only to move back in three years. People argue that it will ruin the monopoly that we have so feverishly built up, but they are not considering the amount of revenue a new law school and Medical school will create. Yes, I understand that it will cost millions of dollars to start, but I am an Alaskan tax payer, and paying a small bit more each year will be worth it for every graduating doctor or lawyer. Lawyers and engineers are by far the most popular profession in Alaska. UAA already has an engineering program, so why not support the other popular professions in Alaska?

I wrote to you, to state that you have my full support on this bill. In addition, I will be in the first class to apply to the new law school in Alaska. I love Alaska. It is my home. Please help keep it that way.

Sincerely,

Alena L. Robson

To: Rep. Scott Kawasaki
Cc: Janet Kennedy
Subject: Law School for UAA at MSC in Palmer.

Categories: Med/Law School

Dear Honorable Representative Scott Kawasaki:

Thank you for suggesting a law school for Alaska. You and I met a couple of years ago. We were both judging "We the People" competition at the Hotel Capt. Cook. Accordingly, I am interested in helping you accomplish the goal of a law school in Alaska.

Mat-Su

I respectfully wish to offer the campus of Mat-Su College. UAA's MSC has bond funds of over $20 million for a possible new theater, which may be in direct conflict with a similar endeavor (please see more below). Therefore, what if the UA use the fonds to build a law school rather than a performing arts theater?

As an adjunct faculty of MSC (I teach business law I & II - BA241 & BA242), I would kindly like to work with you on the concept of coordinating the law school at MSC with the Alaska Court system at Palmer. There could be excellent economies and education value with a working relationship with the Palmer Court. I frequent utilize attorneys, as guest lecturers, and field trips to the Palmer Court. Thanks, Dan

Background on the Possible MSC Conflict with Valley Performing Arts

Please know that Valley Performing Arts (VPA) has been selected for the Pre-Development grant from the Rasmuson Foundation to build a new community theatre in the Mat-Su Valley. VPA is currently in full due diligence planning for a new facility that will seat approximately 300 theatre enthusiasts. VPA has provided quality entertainment to the Southcentral Alaska for 35 years. Our origins as a non-profit community theatre began in Palmer in 1976 to in an old log church where our audiences were limited to 64 patrons. We have been in our current facility in Wasilla since 1996 and provided top notch theatre productions to over 11,000 patrons last season. This season continues to be a stellar year for VPA with sold out performances for "Pride and Prejudice", "King Island Christmas" and "Nunsense II". VPA is known for its quality productions and community spirit with hundreds of volunteers assisting it in its mission of presenting and promoting community participation in live theatre to enhance the cultural and intellectual spirit of the community.

The Board of Directors and staff of VPA have made a commitment to building a new theatre that can continue to meet the demands of the community and its patrons that come from all over Alaska including Anchorage, Fairbanks, Talkeetna and the Kenai Peninsula. VPA outgrew its current cramped facilities many years ago.

Janet is a past board president of VPA and served on the board for six years. Both Dan and Janet continue to serve as volunteers with VPA and serve on several committees. Building a new community theater has been a top goal of VPA for over five years. The effort has taken time. VPA is now in position to finally seriously study the opportunity with the Pre-Development efforts through the Foraker Group. Through sound financial planning, VPA has savings of almost $200,000 for the project.

We simply wish to make you aware of VPA's private sector endeavors. VPA's operations have thrived almost exclusively through patron and community support. Less than ten percent of its resources come from any governmental support. Although additional avenues of support may be needed to build the infrastructure for a

quality community asset, be aware that the operations of such a facility has been and can be self sustaining in the future.

We appreciate your time in becoming aware of VPA's efforts to building a new community theatre in the Mat Su Valley. We look forward to communicating more with you in the future as our efforts progress.

Please feel free to let me know if you have any questions or concerns.

Sincerely,
Janet C. Kennedy, CPA and Dan F. Kennedy, CPA, MBA

Mr. Scott Kawasaki

I am writing to you as an Alaskan who is currently training to become an osteopathic physician at Pacific Northwest University in Yakima, Wa. I applaud your movement to attain schools of higher education in Alaska (ie medical and law), there is a great need. Because there is such a great need I would like to encourage you to include the College of Osteopathic Medicine as a collaborating partner in filling these voids in the health care system. If everyone works together many problems can be solved. Thank you for your time.

Sincerely,

Toby Currin

Scott: I am a life long Alaskan and UAA grad. If you need help on a citizens work group or other type of initiative to further the Medical and Law School idea, just let me know as I would be happy to help.

I was in Wally Hickel's Public Admin Class and I specifically asked him if he favored a medical and law school in Alaska, he said yes. I also spoke to Charlie Cole who said no (as I would expect).

Any way, please let me know how I can help. I am 56 years old and lived without these local education opportunities...we owe the next generation these opportunities within the state and it willl be the better for it!

Thanks again.

Dear Sir:

This is an outstanding idea. I have spent a fair amount of time in Alaska and have never understood why the state has not developed its own law school.

If the law school comes to pass, I would welcome an opportunity to participate as a founding faculty member. My expertise is in employment law, but I am prepared to expand to meet such a school's needs.

My sanitized CV are attached. I will identify myself if there is ever a serious interest.

Hello Mr. Kawasaki,
My name is Amanda Hanson, and I am planning on pursuing a Law career. However, when I discovered that I had to move out of state, I thought about not pursuing a law degree. The logistics are just too difficult. But if there isn't any other option, what am I (and other prospective Alaskan lawyers) supposed to do? I did not move up to Alaska just so I could move out, again. I heard on the radio today that you were proposing law and medical school programs for the UA system. IT'S ABOUT TIME! I support your proposed legislation 100% (and I'm a Republican!). If you need a resident of Alaska to testify, just let me know (I will travel to Juneau, if necessary). I am a working mom living in Fairbank who wants to better myself, my family, and my community, but the stress of moving out of state and then hoping to move back weighs heavy on my shoulders. Also, please don't listen to the naysayers. I know that if given the choice there would be plenty of students more than willing to stay in Alaska if the state offered a med and law program. If there are more people I can try to persuade to pass this legislation, please let me know. Send me a list and I will contact all of them. It is time for Alaska to compete with the rest of the United States! Thank you for your time.

Sincerely,
Amanda Hanson

Representative: Kawasaki

Representatives,

Support for HB 38: University Institutes of Law and Medicine

Please accept this letter of support as I am unable to get to an LIO.

I have been aware of the need for more physicians and especially more Alaska grown physicians for years. In the 80's I moved to Juneau, after making Alaska my home in 1965. Moving to Juneau I had a problem finding a dedicated physician but got in to one who had an opening.

Eventually, after winding up in the ER, I sought out a different doctor and had to have a referral from a specialist to get in to see a competent doctor because, even then, practices were so full that the only doctors who had openings were the ones who were not given glowing reports by their patients.

Eventually, I learned how to tell if a doctor was just in Alaska long enough to get the bonus money from higher pay rates, or really wanted to practice in Alaska. I would look for things like navigation charts or telling pictures and artifacts and then talk about Alaska a little when I went in for the first visit. It did not take long to learn how the chips fell.

Right now it is difficult for our students living here and, want to remain, to train as a physician because they have to compete with space in outside programs. In addition, with the high cost of medical education it is so much better to be able to start out in your state school where there is no additional tuition costs and where you may be able to continue to live at home as you train.

Aside from that, statistics show that doctors practice where they train and have developed relationships in the community. Few return home to try to make new connections from scratch. We know that starting your own medical practice is an expensive proposition and you have a big bill to pay back for such an expensive education.

Healthcare is a big business in Alaska and growing all the time. We must find a way to grow our own doctors. A medical school will also attract other supporting people and jobs to Alaska. The biggest benefit will be, of course, finding a physician locally who is not here because of a big bonus fee that a hospital had to pay to get them. While most physicians care about their patients, home grown ones will be really grounded.

I don't know much about the Law and the availability of lawyers. I suspect they are scarce but someone else will have to speak to that.

It is time we had a medical school and all that it brings by way of added investment and resources in the community beyond the obvious access to medical care. As a final plea, I hope you understand that most people I know in Fairbanks feel fortunate to just have access to a Physician's Assistant or a Nurse Practitioner. We have a chronic lack of providers. I have spoken to doctors who lament at how they have to work down their waiting list of Medicare patients as space becomes available for them to afford to take another one on. More physicians will spread the load.

Thank you for supporting this legislation!

Doris Robbins

Dear Representative Kawasaki, I would like to take a minute to share with you my support for HB 38. I strongly believe if Alaska wants to become a State that can attract our own brilliant minds and encourage them to higher education, then, stay here in our beloved State to provide services we so desperately need; we as Alaskans have a responsibility to provide the means necessary to do so.

Alaskans always boast that we are different and separate in our own way from the Lower 48. That Alaska is unique and unlike any other place in the U.S. We enjoy what is becoming a World renown science institution, new facilities are being built as we speak to support the growing needs of the University of Alaska.

With Alaskans need for self reliance, I feel these facilities would only benefit Alaska and Alaskans alike. An invaluable return would be immediate upon the graduation of the first class, as you cannot put a price on education. These facilities would put the punctuation mark at the end of -The University of Alaska[!]- Law and Medicine are some of the oldest higher education known, there is no reason we as Alaskans shouldn't have the opportunity for these fields of learning.

You have the full support of myself and my family for seeking the funding and construction of these desperately needed facilities. If we are going to make Alaska competitive, let's start in our education process.

My best regards,
Scott C. Eickholt

Scott: I am a life long Alaskan and UAA grad. If you need help on a citizens work group or other type of initiative to further the Medical and Law School idea, just let me know as I would be happy to help.

I was in Wally Hickel's Public Admin Class and I specifically asked him if he favored a medical and law school in Alaska, he said yes. I also spoke to Charlie Cole who said no (as I would expect).

Any way, please let me know how I can help. I am 56 years old and lived without these local education opportunities...we owe the next generation these opportunities within the state and it willl be the better for it!

Thanks again.

Categories: Med/Law School

Mr. Scott Kawasaki

I am writing to you as an Alaskan who is currently training to become an osteopathic physician at Pacific Northwest University in Yakima, Wa. I applaud your movement to attain schools of higher education in Alaska (ie medical and law), there is a great need. Because there is such a great need I would like to encourage you to include the College of Osteopathic Medicine as a collaborating partner in filling these voids in the health care system. If everyone works together many problems can be solved. Thank you for your time.

Sincerely,

Toby Currin
OMS-I
Pacific Northwest University of Biomedical Sciences

Date: March 31, 2011

To: Governor Sean Parnell, Congressman Don Young, Senator Lisa Murkowski, Senator Mark Begich, Representative Scott Kawasaki, and members of the Alaska Legislature

From: Anchorage Residents

Re: House Bill 38 "Alaska Institutes of Medicine and Law"

To Whom It May Concern,

We are writing in support of Representative Kawasaki's House Bill 38, "Alaska Institutes of Medicine and Law." As practicing attorneys and future lawyers we feel the need for Alaska to have an accredited law school. Currently, Alaskan residents wishing to practice law are forced to incur unnecessary student-loan debt, leave their jobs, move out of state and leave their families for law school. By having a local law school all of these obstacles would be removed.

We agree with Rep. Kawasaki's position that an Alaskan institute of law would benefit our great state by keeping future students in Alaska.

Sincerely,

Can Alaska grow doctors, lawyers?

SCHOOLS: Legislator hopes colleagues OK at least one.

By SEAN COCKERHAM
scockerham@adn.com
Published: February 6th, 2011 10:28 PM
Last Modified: February 6th, 2011 10:28 PM

Alaska is short on doctors and has legal issues faced by no other state. So why is it the only state that doesn't have a law school and just one of five states without its own medical school?

It's something Alaskans have talked about for decades. But the idea of starting the schools has never gone far, with skeptics objecting to the costs and questioning whether they're really needed.

The latest proposal is from Rep. Scott Kawasaki. His House Bill 38 is aimed at starting a medical school at the University of Alaska's Fairbanks campus and a law school at the Anchorage campus.

It's not getting much support in the Legislature. Kawasaki said he plans to try a new tack. If legislators don't want both a medical school and a law school, maybe they would support one or the other.

"If we get to divide the question perhaps, and talk separately about a law school program and a medical school program, we'll start to get some traction with legislators here," the Fairbanks Democrat said.

House Finance co-chairman Bill Stoltze said he thinks Kawasaki is just looking for headlines.

"I don't think that there is any serious consideration," Stoltze said. "We're struggling to make sure we have nursing programs, struggling to do things like the Medicare clinic in Anchorage. We're just trying to keep our heads above water."

Stoltze, a Republican from Chugiak, said other states have a lot of things Alaska might want.

"Why don't we have our own amusement park up here so Alaskans don't have to (go Outside)? It's probably just about as serious as his measure," Stoltze said.

IT'S NOT GOING AWAY

ADVERTISEMENT

×

But even if the bill goes nowhere, the issue will be back. The law school idea, especially, has proponents, including a member of the University of Alaska board of regents. They say it would be cheaper than a medical school and Alaska law students now have no choice other than to leave home and go into big debt for out-of-state tuition or private school in the Lower 48.

Getting the Legislature to support an Alaska law school would be a challenge, though.

"I don't think there are a lot of legislators who personally think we want more lawyers in this state," Kawasaki said.

Kawasaki said he's heard more legislative interest in a medical school. But then it becomes a cost issue. Kawasaki figured it would cost about $60 million for the facilities and $40 million for the teaching staff to start with 200 students.

"We know that we've got an issue; we know we need more physicians," Kawasaki said. "And the only way to address that is either by adding more incentives, making Alaska a more attractive place to practice, or growing our own here. I think that ultimately is the way we need to go."

Rep. David Guttenberg, another Democratic legislator from Fairbanks, said he once considered putting in a bill to start a medical school. But that was before he started looking into it.

"When I talk to doctors and other people about doing it, they bring me to the reality of the situation," Guttenberg said. "It's a very expensive school. We don't have the economy of scale and the number of teaching doctors and stuff like that."

Guttenberg said he's glad Kawasaki is keeping the idea of a medical school alive for the future, though.

The Alaska State Medical Association doesn't have a position on starting a medical school in the state. Director Jim Jordan said there has to be a study of factors like demand, availability of residencies and research opportunities. He's not aware of any real analysis being done before.

"There needs to be a good, hard look at it to determine whether an Alaska-based medical school would be better than what we currently have," Jordan said.

The state now subsidizes 20 Alaska medical students a year through the University of Washington School of Medicine. The program is called WWAMI for the five states it represents - Washington, Wyoming, Alaska, Montana and Idaho.

Those students can complete the first year of the program at the University of Alaska Anchorage. They go to the University of Washington the second year and can come back to Alaska for rotations the third and fourth years.

UNIVERSITY NOT ON BOARD

But nothing like WWAMI is available for Alaska law students. A member of the University of Alaska board of regents, Kirk Wickersham, has tried to convince his colleagues the state needs a law school.

Wickersham, a Yale law school graduate, will also make the case Monday at a presentation at the University of Alaska Anchorage. "Law is different from one state to another, especially Alaska ... Our constitution, ANCSA, ANILCA. Our foundational laws are unique," he said.

The Institute of Social and Economic Research at UAA concluded in a 2004 report that a law school wasn't feasible in the state. ISER said it would take 250 students to support a law school and that not enough Alaskans would attend.

ISER based its conclusion on the number of Alaskans who took the Law School Admission Test each year. Wickersham said the report was flawed. Many Alaskans don't bother to take the LSAT because they have no way to leave Alaska for law school, he said.

"My son-in-law would go to law school if he could do it here," Wickersham said. "But he didn't take the LSAT because he knows he can't go to school here. He has a job, he has a family. He can't just quit and go off to law school."

Wyoming, the Dakotas and Montana have viable law schools, he said. Alaska has a wealthier and better educated population than those states, as well as a bigger urban center in Anchorage, he said. He argues jobs are available and they can either go to Alaskans or to imports from the Lower 48.

Juneau Democratic Rep. Beth Kerttula, an attorney, supports the creation of an Alaska law school. Kerttula said rural Alaskans in particular should have a chance to go to law school and it would create a community of lawyers grounded in Alaska law.

Skeptics point to the grim job market for law school graduates nationally, with stories of lawyers dragged down by heavy debt and struggling to find work. There's also a certain attitude about lawyers.

"We always need doctors; I'm not sure about lawyers," said House Speaker Mike Chenault.

Reports exist of law schools often acting as cash cows for their universities, subsidizing other programs. ISER figured in its 2004 report an Alaska law school could cost $45 million, with annual operating costs of $6 million. The researcher supposed tuition might cover a third of annual costs.

The idea of starting either a law or a medical school in Alaska will have a hard time becoming a reality if the university doesn't begin pushing it. Wickersham took pains to say he's advocating for an Alaska law school on his own -- not speaking as a regent or for the University of Alaska.

University spokeswoman Kate Ripley said Kawasaki's proposal is being looked at:

"(We're) evaluating work force need, numbers of expected students, costs, how would it stack up against other existing priorities for students and programs."

Starting a medical school or a law school is clearly not a priority for the Board of Regents.

The board hasn't taken a position on Kawasaki's proposal.

"I personally think it's a great idea but we just don't have the money," said Fuller Cowell, board chair.

It's a very complex problem. Alaska absolutely needs more qualified doctors - the elderly specialties of cardio-vascular, pulmonary/respiratory, neurological, rheumatology, etc are in high demand with low available resources. For anyone who's interested in the "business" of medicine, check out this New Yorker article. It illuminates the situation well. http://www.newyorker.com/repor...

mrmuldrow

The vast majority of doctors are NOT "making millions of dollars a year." This is one of the most ignorant yet persistent myths circulating in our society today. Doctors spend a decade in training after college, during which time they accrue hundreds of thousands in debt while working the equivalent of 2+ full-time jobs and postponing marriage, child-bearing, home-owning, etc. After that, let's say that some hypothetical and rather well-compensated doctor

Do We Need More Physicians or Efficient Health Care?

In the 1990s, workforce analysts were predicting a physician surplus. Today, the pendulum has swung in the other direction, with the AAMC calling for a 30 percent increase in medical student enrollment.

Baby-boomer physicians are nearing retirement at the same time the patient population is growing, aging, and demanding more specialized services, asserts Edward Salsberg of the AAMC Center for Workforce Studies. In addition, many young physicians are choosing to work fewer hours -- especially true of the growing number of women in medicine.

Nonetheless, some still question the need for a dramatic increase. "There's a lot of shroud waving and fear mongering that's not based on evidence and will lead us on a costly expansion," said David C. Goodman, MD, of Dartmouth Medical ("A Growth Spurt for MedicalSchools," Chronicle of Higher Education, Jan. 12). "Rather than spending more resources on training more physicians, we should be focusing on building more efficient delivery systems."

Added author Daniel S. Greenberg, a self-professed "longtime skeptic of the need for more physicians," much of the need can be met by expanding the pool of advanced health care workers, like physician assistants or nurse practitioners. "We don't need to have people trained as brain surgeons taking splinters out of people's feet," he told the Chronicle.

Even so, the nonphysician pool needs to grow significantly. A recent roundtable discussion hosted by the Association of Academic Health Centers found that workforce shortages are a key challenge across all health professions, not just medicine.

In the February issue of the GME e-Letter, we asked for feedback on this issue. Below are the responses we received from readers, with identifying information removed.

Do you have any answer to why so often the "experts" are dead wrong? I think it is because they want to be known and make an impact so they say things that are interesting and attention-getting with little veracity or data to back up their positions. Look at all the experts that advised consolidation of medical centers like UCSF and Stanford. This trend is now over because virtually every merger attempt was a disaster.

Remember the days when the experts said we need to generate more doctors so there would be more competition and lower costs? They gave medical schools additional funds to take more medical students. What happened? We generated many more doctors, but this just caused more money consumed by health care in our society rather than driving down costs.

I guess the other question is why do we the leaders in academic medicine) ever listen to these so called experts when they prove to be dead wrong so often. Consider the ACGME's six general competencies. [illegible]

I could make the same point about a lot of other regulatory bodies. So often they generate a regulation or mandatory requirement that is expensive without data to show that they will be helpful. How about a small local pilot project first to show that these things make a positive difference? Why does organized medicine go out of its way to shoot itself in the foot and add extra costs that in the end serve to jack up the cost of medical care to the public?

I see no shortage if physicians were freed from the bureaucratic morass that "providers" have put us in, whose only purpose is to curtail the delivery of care for their own financial gain. Health care is not a commodity. If we treat it as such, it'll go the way our inner-city educational system has gone.

Clearly we need more health care providers to address patients' growing needs however, the key word is "providers." Efficient and effective treatment for basic health care issues can be provided by nonphysicians, such as advanced nurse practicioners or physician assistants. Importing physicians from other countries or training more physicians is not necessary when there are many US citizens who could fill our health care needs. I agree with Daniel S. Greenberg.

Kaiser, VA, and other large health systems use the "provider" model of care. Clearly, it works. We should train more nonphysicians as this would take less training time and dollars.

I cannot give you numbers and statistics to support my thoughts, but I can offer years of experience in private practice, public health settings, medical administration, and academic work. And based on that, I feel just the opposite of Daniel Greenberg--I am more concerned about those trained to take out splinters being pressed into brain surgery.

This is obviously an exaggeration, just as his comment is, but I have seen good, nonphysician clinicians get pushed into doing more than their comfort zone allows, and since they are helpful people by nature, they try to do what they're asked. It can end in poor care at best, and at worst, dangerous care.

The medical delivery system of today seems more impressed by how much money rather than how many lives it can save. I have worked with many excellent physician assistants and advanced practice nurses in my 30+ years of practice, but they and I always felt better that I was around to advise and assist when needed.

All professions that require time to train go through cycles in their available numbers--it has happened with teachers and nurses, and there is no reason to suppose that the physician supply would be immune to such cycles. It is clear that we need more physician availability in small, rural communities, and that is a matter of distribution rather than simply supply. But the only ways to accomplish a redistribution within our freedom-loving, capitalistic system are incentives to locate in such areas or market forces driven by additional numbers.

I agree with your points: governors need to be educated about the economic impact of physician shortages; GME needs more support if the educational system as a whole is to continue to turn out physicians in any numbers who are well trained, let alone in larger numbers; and medical education centers need more faculty members to accomplish their missions of education, research, and clinical service.

Replacing physicians with nurse practitioners and physician assistants is one approach to addressing the shortage of physicians, but begs the question of what type of health care system we want.

With regard to Daniel Greenberg's profession of higher education, I am sure we could replace most college professors with lower-cost graduate students if we wanted to, but I doubt he would argue that that would improve the quality of a college education.

Replacing more highly educated professionals with paraprofessionals is [illegible]

taken the position that the mismatch between advanced training versus service needs required primary attention. There is already widespread use of physician assistants and nurse practitioners, and that contribution to health care delivery will continue to grow. But I don't see evidence for a physician surplus now any more than 10 years ago, and in any event physician supply should at least track (more or less) the growth in the US population.

Our analysis focused on the different controls that patients, physicians, employers, insurers, and government exerted on the availability and payment for medical services. I don't think that supply can be separated from quality, and we advocated developing surrogate measures of quality such as time with patients and wait time. Since time with patients is a function of compensation schemes, this too must enter into national planning for physician training both at the undergraduate and specialization level. I see a danger in developing a national agenda that may look simplistically at supply and demand, without being able to address quality.

*Michael Gochfeld, Joanna Burger and Bernard Goldstein *Medical Care as a Commons*, pp. 253-272 in "Protecting the Commons" (Island Press, Washington DC: 2001)

Always neglected in such discussions is the issue of the number of international medical graduates (IMGs) practicing in the US.

A principal reason that one may argue we have a sufficient number of physicians is because more than half of all physicians licensed in this country are educated in foreign countries. Whole regions of the US have a majority of physicians in practice who are not graduates of US medical schools (eg, the central valley/Fresno area of California.

Does the US want to deprive so many of its citizens the opportunity to go to medical school in order to provide medical positions for graduates from foreign countries that often that place no limits, as the US does, on the number of medical school positions? Admission to a US medical school is a very rigorous process. Not only does this severely limit the number of US-educated physicians practicing in the US, but may also (as an unintended consequence) narrow the pool of applicants, which in turn may be adversely affecting the quality and character of the graduates.

Becoming a medical doctor remains a highly respected occupation in the US. Do we wish to continue to deny so many US citizens the opportunity to become medical doctors, thereby creating a large need filled by IMGs?

The time has come to address the most important implication of the ever-increasing numbers of IMGs providing care in this country. The problem is not the IMGs themselves. It is denying US citizens the opportunity to compete for these highly valued positions in our society.

Let the competition begin.

Although I agree that more PAs and NPs will meet many health care needs, Mr. Greenberg should not exaggerate his point, as it makes his argument less valid. "Neurosurgeons have no interest in removing splinters from anywhere except the central/peripheral nervous system."

What Does It Cost to Start a Medical School, Anyway?

The U.S. went more than 30 years without a new med school (not counting osteopathic schools, which grant the D.O. degree). But in the last few years, a dozen or so institutions have set out to create new schools to mint MDs.

Just last week, Hofstra University and North Shore-LIJ Health System on Long Island, east of New York City, picked a founding dean for their med school, with the hope of having the first class enter in 2011.

The Health Blog spoke with Lawrence G. Smith, dean of the school-to-be, to find out how (and why) to start a medical school. Before he went to North Shore-LIJ a few years back, Smith was dean of medical education at the Mount Sinai School of Medicine in New York. Here are the highlights of our conversation.

Why all these new medical schools?

There are approx 17,000 [M.D.] graduates per year and 25,000 first-year residency positions in this country. That gap has been closed by a combination of foreign-trained foreign doctors, osteopathic graduates and foreign-trained U.S. citizens.

The majority of U.S. kids studying abroad are in these unregulated, for-profit medical schools. Most of these kids are more than qualified to become physicians. But they're not studying in really well established, top-flight schools.

What's going to set your school apart?

In the old way of teaching the non-clinical activities in medical school, there were many departments. There were departments of physiology, anatomy, pharmacology and on and on. Those departments came into being 100 years ago because that was the structure of research at the time. That is no longer the case, yet the tenacious ownership of pieces of the curriculum [by the old departments] has prevented schools from presenting information in a more logical format.

We are not going to create any of those departments. I want to link things so if we're learning anatomy and physiology of the heart, we let students get into the operating room and look at open heart surgery to see not the perfect world of the textbook but the real world.

How much does it cost to start a medical school?

There are two real costs to the startup of a medical school. One is the cost of staff and faculty prior to collecting tuition from students. That's in the $15-$20 million range.

And then you have to build a medical education center and a living facility. That's the heart and soul of the medical school. Capitalizing both of the buildings together is going to be between $50 and $100 million. Nobody's going to come up with money for that. That's going to be a debt-service issue.

Are you looking to sell the med school's naming rights to a big donor?

What's your middle initial?

"Health Blog School of Medicine" does have a nice ring to it.

Long term, we have to create an endowment for the medical school to have the freedom to be really creative. One way to start the endowment is to have somebody have the medical school named for them. But there are other strategies that may get the endowment rolling at a lower price than selling the name forever.

But we'd love to sell the name if we could.

<TARGET><BILL>HB 49</BILL><SUBJECT>HB
49</SUBJECT><COMM>HEDC27</COMM></TARGET>

Conceptual Amendments for HB 49
Early Childhood Education: Parents as Teachers

1. A report is required to be submitted to the Legislature no later than Jan 1, 2014 on the effectiveness of the programs authorized under HB 49.

   The report shall include a comparison of those who participated in the programs to those who did not participate.

2. If room is available in a school building, the participants in the programs authorized under HB 49 may use the available space free of charge.

Rep. Eric Feige is the sponsor amendment #1 and Rep. Peggy Wilson is the sponsor for amendment #2. Please feel free to contact the sponsors of the amendments if you have any questions.

Thank you for your help.

CS FOR HOUSE BILL NO. 49(EDC)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE HOUSE EDUCATION COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES TUCK, KAWASAKI, GARA, AND PETERSEN, Gruenberg, Muñoz, Thomas

A BILL

FOR AN ACT ENTITLED

"An Act establishing in the Department of Education and Early Development a voluntary parent and early childhood education program for pre-elementary aged children."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SHORT TITLE. This Act may be known as the Alaska Parents as Teachers Act.

* **Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

PARENTS AS TEACHERS PROGRAM ESTABLISHED. (a) The department shall devise and implement a statewide parents as teachers program for the benefit of children who are under five years of age. The program must provide a system of early childhood education that

(1) is evidence-based;

(2) involves parents;

(3) is consistent with available research and best practices for high quality early childhood education;

(4) incorporates guidelines adopted by the department for early learning that

(A) enhances school readiness;

(B) increases parent understanding of child development and developmental milestones;

(C) reduces the incidence of child abuse and neglect;

(D) increases identification of health problems and developmental delays through regular screenings;

(E) improves child health indicators, including immunization rates;

(F) increases parental involvement;

(5) provides for effective and efficient coordination with or expansion of pre-elementary education programs operating in the state, to the extent permitted by law; and

(6) to the extent needed and space is available, provides for the use of a room in a school at no charge.

(b) The department shall develop and enter into local partnerships to implement the program established under this section.

(c) On or before January 1, 2014, the department shall provide a report to the legislature on the effectiveness and participation rates of the program established in this section. The report must include a comparison of school performance of participants and nonparticipants.

(d) The program established under this section terminates on July 1, 2014.

(e) In this section, "department" means the Department of Education and Early Development.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** HB 49
2011 LEGISLATIVE SESSION

Analysis

This bill establishes a statewide parents as teachers program for children who are under 5 years of age. The department is charged with developing and entering into local partnerships to implement the program.

Costs were determined as follows:
FY12-FY13:
53,000 children ÷ 1.34 average Pre-K per household = 39,552 families
39,552 families x 4.4% qualifying families = 1,740 families
1,740 families - 800 Federally funded families = 940 families
940 families x $4,000 = **$3,760,000 Total Grant.**

In addition to the grant the department will need to hire one position to oversee and service this program.
Education Administrator I at $109,800 plus travel at $20,000 = **$129,800**
Contractual Services costs allocated to position counts for centralized services = **$8,500**
Supplies to support general office activities of the program = **$2,500**

The program will sunset in FY2014.

HB 49 – Alaska Parents as Teachers Act

Sponsor Statement

Parents are a child's first and most important teachers. Research has clearly shown that parental involvement in a child's early years are critical for development and lay the foundation for success in school and in life.

HB 49, the Alaska Parents as Teachers Act, will empower parents with knowledge and resources to help their children develop into successful students with stronger scholastic achievements.

The bill allows the Department of Education and Early Childhood Development to offer the successful Parents as Teachers parental involvement, early childhood learning system as an education option for families with children ages 0-5.

HB 49:

- Requires evidence-based education, parental involvement, and adherence to accepted best practices and early learning guidelines;
- Directs the Department of Education and Early Development to develop local partnerships to implement Parents as Teachers; and
- Includes a 3-year sunset clause.

Parents as Teachers is completely voluntary for families. It succeeds by engaging families and communities in understanding the way children's brains develop and how to create a learning environment for the child. Because Parents as Teachers is about how children learn, not what they learn, it fits with any educational philosophy and mode, from religious, charter and public school, to home schooling or other education types. Parents as Teachers helps build a community of learning, and assists in early detecting of impairments.

Parents as Teachers is the most cost-effective early education model available in Alaska. Further, it enhances local control and involvement, with partnerships ensuring cooperation towards education goals.

Funds invested in early education pay dividends in the long run. Research shows that children who receive early education earn more money as adults than their peers lacking early education. Children who receive early education also enter the job market in much larger numbers, obtain college education in higher numbers, and remain off public assistance and out of jail in greater numbers.

Alaska's children are our future workforce, and the key to our state's prosperity. Alaska's plumbers, doctors and teachers of tomorrow are the youth in our neighborhoods today. Helping parents boost the skills and natural ingenuity of their children will point the way to Alaska's growth.

Parents as Teachers enjoys statewide support and will help grow stronger Alaskan families, better students and safer communities. It is a proven successful solution for our children and our state's future.

Thank you for your support of HB 49, the Alaska Parents as Teachers Act.

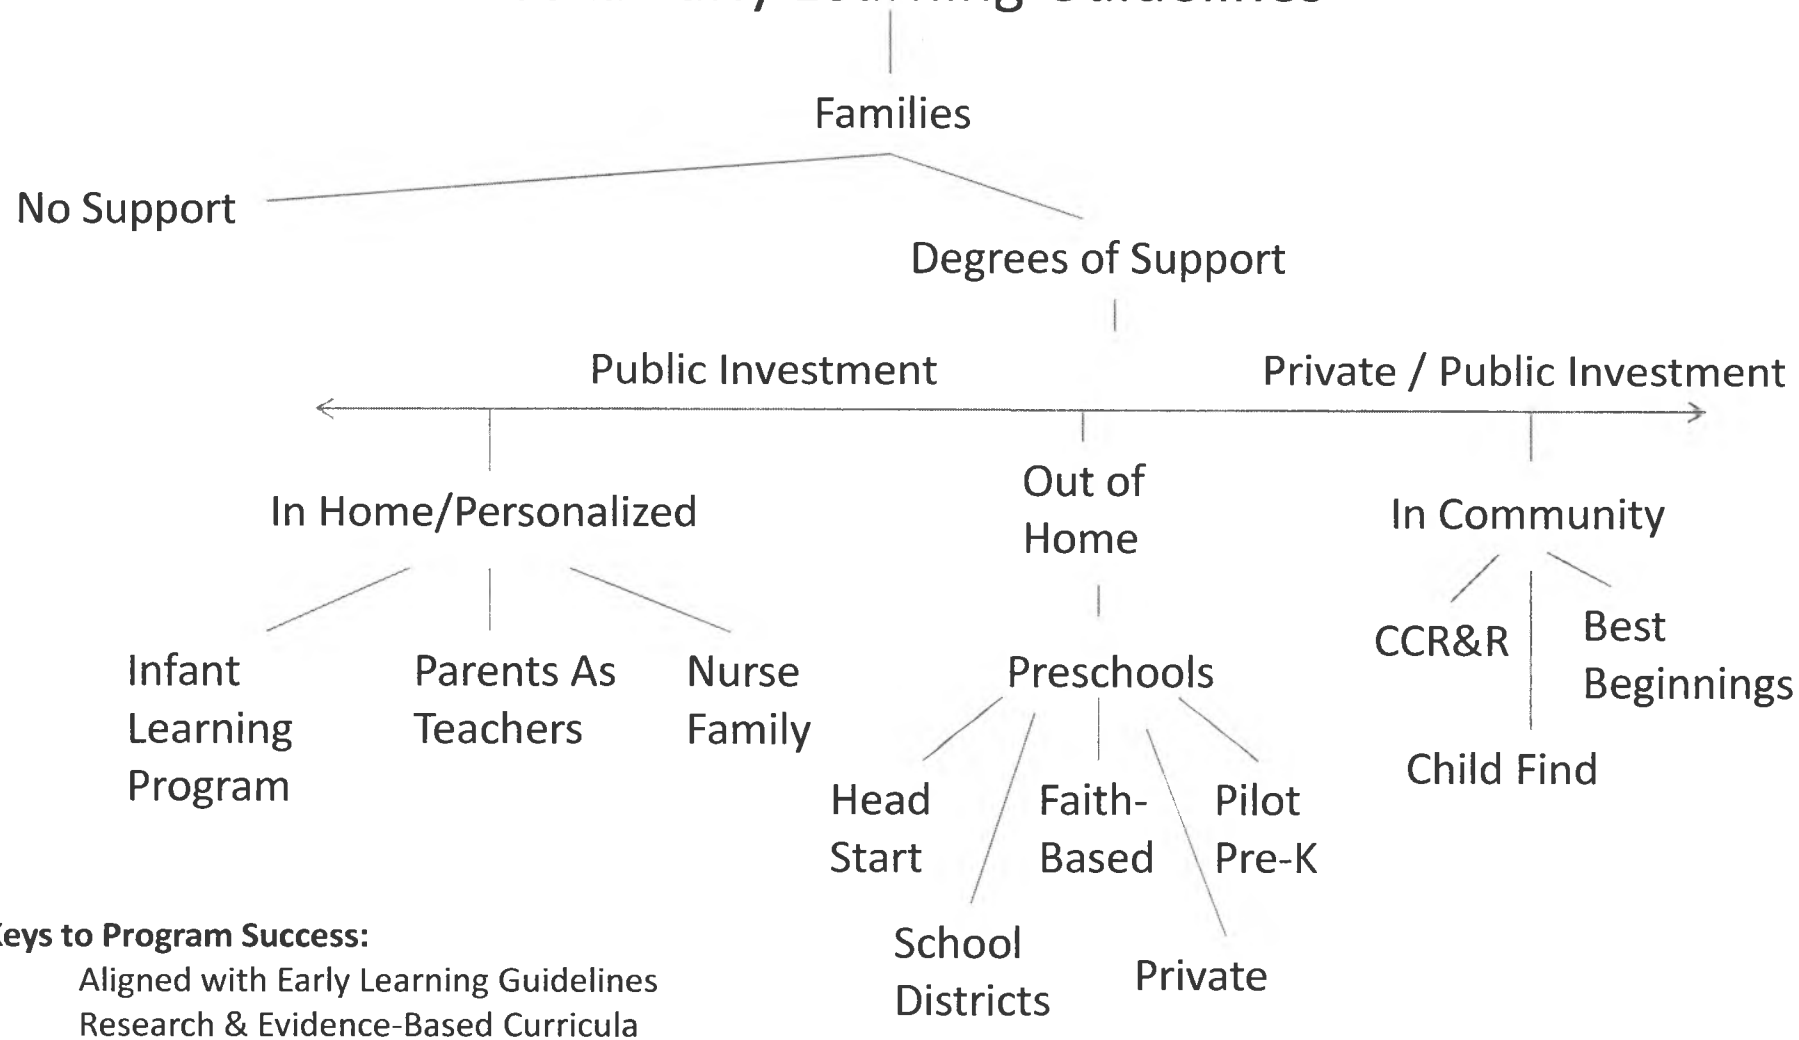
School Readiness

Alaska Early Learning Guidelines



Keys to Program Success:

- Aligned with Early Learning Guidelines
- Research & Evidence-Based Curricula
- Training &Technical Assistance
- Monitoring & Accountability
- Parental Engagement

Compiled by Debi Baldwin, RurAL CAP, (907) 865-7317

Parents as Teachers

All children will learn, grow and develop to realize their full potential.

Mission: To provide the information, support and encouragement parents need to help their children develop optimally during the crucial early years of life.

Parents as Teachers Program Goals

1. Increase parent knowledge of early childhood development and improve parenting practices.
2. Provide early detection of developmental delays and health issues.
3. Prevent child abuse and neglect.
4. Increase children's school readiness and school success.

PARENTS AS TEACHERS COMPONENTS

- PERSONAL VISITS
- SCREENING
- GROUP CONNECTIONS
- RESOURCE REFERRALS

Parents as Teachers services are provided by local parent educators.

Personal Visits: the heart of Parents as Teachers

- Each family decides who will participate in visit and where the visit will take place.
- Personal visits are individualized for each family.
- Visits are adapted to reflect cultures of each family and each community.

What happens during a Parents as Teachers personal visit?

AREAS OF EMPHASIS

- Parent-Child Interaction
- Development-Centered Parenting
- Family Well-Being

Literacy is a component of every personal visit.

Group Connections

St. Louis, MO

(314) 432-4330

www.parentsasteachers.org

What is Parents as Teachers?

Parents as Teachers is:

- A parent education and family support program serving families through out pregnancy until their child enters kindergarten. Services to families include personal visits, group socialization opportunities with other families, developmental screenings to ensure a child's development is on track, and referrals to other services as appropriate.
- Designed to enhance child development and school achievement through parent education.
- A free voluntary program for families.

Why Parents as Teachers?

- Research has clearly shown that the early years are critical in a child's development and lay the foundation for success in school and in life.
- Parents are the most influential people in their children's lives; they are their children's first teachers. If we want to make a positive difference in the lives of children, we must make an impact with their parents.
- Extensive analysis by economists has shown that investing in effective early childhood programs, such as Parents as Teachers, produces great returns. These returns benefit the community through reduced crime, welfare and educational remediation.

Why Focus on the Years Before School Starts?

- Brain development that takes place before age 1 is rapid and extensive; the influence of the early environment on brain development is long lasting.
- Developmental "windows of opportunity" are periods of time when children are especially adept at learning specific skills including:
    - Motor skills such as turning over, walking, drawing;
    - Sensory skills such as seeing and hearing;
    - Communication skills including language; and
    - Social skills such as playing and interacting with other children.
- During these windows of opportunity, it is important to provide positive experiences for young children at the appropriate times to ensure optimal development.

Why Focus on the Parent?

- Parent education helps parents to understand what to expect during each stage of development and how to promote the best development in their child.
- Research shows that parental involvement in their child's learning is linked to the development of the child's academic skills, including reading and writing.

How is Parents as Teachers Adapted for Alaska?

- The majority of Parents as Teachers programs in Alaska hire people from within the communities being served to be trained as Parent Educators. This helps to ensure the people presenting the curriculum have a solid understanding of the community and the local culture.
- Alaska has its own Nationally Certified Parents as Teachers Curriculum Training Team. These trainers reside in Alaska and are experienced in providing Parents as Teachers services to families from a wide range of cultural backgrounds.
- Parent Educators are trained to adapt activities from the Parents as Teachers Curriculum to reflect the local community and culture of the family.
- Visits are provided in the family's home language.

What Outcomes has Parents as Teachers Achieved?

- At age 3, children who have been enrolled in Parents as Teachers are more advanced in language, social development, problem solving and other cognitive abilities.
- Children enrolled in Parents as Teachers score higher on kindergarten readiness tests.
- Children who participate in Parents as Teachers score higher standardized measures of reading, math and language in grades first through fourth.
- Parents who participate in Parents as Teachers are more confident about their parenting skills.
- Parents who participate in Parents as Teachers are involved in their child's education beginning at birth and they maintain this involvement in their child's schooling. Parent involvement has been shown to be a key component of a child's success in school.

Parents as Teachers Alaska

2010 FACT SHEET

Parents as Teachers (PAT) is an evidence based international home visitation program dedicated to providing parent education services to families with children prenatal to five years of age through personal visits and group meetings. Families enrolled in Parents as Teachers programs receive personal visits, parent group meetings, and screenings resource referrals.

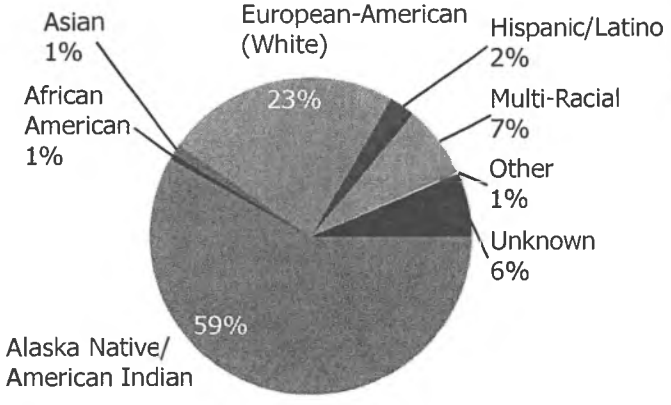
ETHNICITY OF CHILDREN SERVED



2010 HIGHLIGHTS

Services for Children and Families 2009-2010:

- 5,978 personalized personal visits
- 967 children served
- 885 children received developmental screenings with 113 found to need further evaluation
- 781 families served
- 586 Alaska Native/American Indian children served
- 498 parent-child group meetings
- 236 families linked to other services
- 44 prenatal women served
- 39 communities served
- 24 teen parents served

Percentages of Enrolled Children by Agency/Organization:

- 29% school districts
- 71% non-profit organizations

Professional Development:

- Trained and certified 41 Parent Educators and 9 supervisors in the Prenatal to 3 Years Curriculum
- Certified and trained 27 Parent Educators in the 3 Years to Kindergarten Curriculum
- 249 participants from 49 communities attended PAT workshops/training institutes

This information is provided by the PAT Alaska State Office. The PAT Alaska State Office is located within the Child Development Division of the Rural Alaska Community Action Program, Inc. and funded through the Alaska Parent Information and Resource Center. The role of the State Office is to plan and coordinate curriculum training institutes, conduct annual recertification, collate data for statewide reports and provide on-going communication and technical assistance for affiliated programs.

All children will learn, grow and develop to realize their full potential.

The Parents as Teachers program: its impact on school readiness and later school achievement

A Research Summary

Based on a report[1] by:

Judy Pfannenstiel, M.A., President and Senior Research Associate, Research & Training Associates, Inc.

Edward Zigler, Ph.D., Sterling Professor of Psychology, Emeritus, Yale University

Parents as Teachers
national center

April 2007

Schools, communities and families all share the common goal of wanting children to succeed in school. Being a competent reader by third grade is one key indicator of children's academic success. Children who do well in the early grades of elementary school are more likely to graduate from high school and to go on to be successful in life.[2]

How can we increase the likelihood that children will do well in elementary school? Research shows that school readiness predicts later school achievement. **Therefore, we should provide positive experiences for children, starting at birth or earlier, that maximize school readiness.**

Since education begins at home and parents are their children's first and most influential teachers, supporting and educating parents is a logical strategy. Parents who are involved in their children's early care and education have children who are better prepared for school. The Parents as Teachers *Born to Learn*™ program is one key way to ensure that children enter school ready to learn.[3]

This research summary reports results from a 2006 study of Missouri children who participated in Parents as Teachers and other early childhood experiences. Researchers investigated the impact of pre-kindergarten services on 7,710 Missouri children's readiness for school and performance on state assessments at the end of the early elementary years.

Key Findings

Participation in Parents as Teachers predicts children's school readiness and third grade achievement, regardless of income level.

- Parents in the Parents as Teachers program read more frequently to their young children and were more likely to enroll their children in preschool, both of which were positively linked to school readiness and later school achievement.
- A large percentage (82%) of poor children who participated with high intensity in both Parents as Teachers and preschool entered kindergarten ready to learn, as compared to only 64% of poor children who had no involvement in either service. A similar pattern emerged for more affluent children (93% vs. 81%).
- At third grade, 88% of poor children who participated with high intensity in both Parents as Teachers and preschool reached a benchmark level of performance on the Missouri Assessment Program (MAP) Communication Arts test, as compared to 77% of poor children who had no involvement in either service Here again, the pattern of results was similar for more affluent children (97% vs. 93%).

In addition, Parents as Teachers combined with preschool shows promise for narrowing the much-discussed achievement gap between low income students and more affluent students.

- For poor children, high intensity Parents as Teachers and preschool participation appears to narrow the achievement gap at kindergarten entry and third grade. Eighty-two percent of these poor children were ready for kindergarten, as compared to 81% of their more affluent peers with no preschool experience or Parents as Teachers participation. At third grade, a similar pattern emerged (88% vs. 93%).

Participants and Study Design

This study involved public school students from a stratified random sample of Missouri districts and schools who entered kindergarten between 1998 and 2000. Of 9,410 kindergartners assessed at school entry, 82% were matched to the third-grade MAP state assessment in Communication Arts, yielding a combined sample of 7,710 children who were assessed at kindergarten entry and again in third grade.

A secondary analysis of two existing multi-year data sets—the Missouri School Entry Assessment data and the MAP state assessment data—was used to examine the impact of pre-kindergarten services, including the Parents as Teachers program, on the school readiness and later school success of children in the early elementary years. Path analysis was used to test and support a causal model that predicts that Parents as Teachers has both direct and indirect effects on school readiness and third grade achievement.

Measures

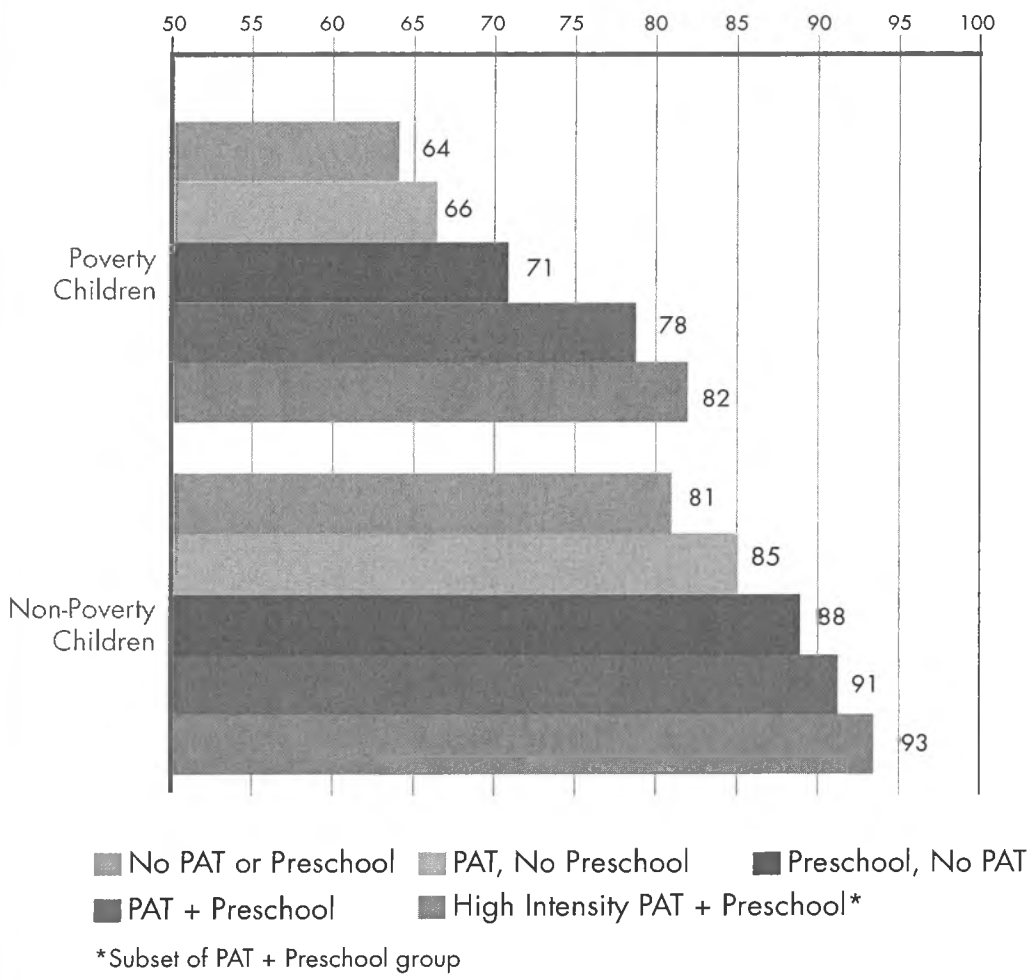
Children's preparation for kindergarten was assessed by their kindergarten teachers using a 65-item School Entry Profile. The School Entry Profile reflects areas of performance and skills appropriate to kindergarten entry that are observable within the first six to eight weeks of school. Teachers used a three-point scale—almost always, occasionally/sometimes, and not yet/almost never—to measure (1) symbolic development, (2) communication, (3) working with others, (4) mathematical/physical knowledge, and (5) learning to learn. They scored items yes or no in (6) physical development and (7) conventional knowledge. To maintain consistency, the teachers focused on one domain at a time, rating all children in their class on those items before proceeding to the next domain. Because of high inter-correlations among the seven scales, the ratings were summed to form an overall school readiness score with high reliability.

The MAP is a standardized performance-based assessment system used by all public schools in the state. The data reported here are from the MAP Communication Arts test given to all public school third graders in the spring of each year.

Parents completed a survey about their children's health issues, preschool attendance and home literacy activities prior to kindergarten entry. Parents reported whether, and the number of years, children had participated in a number of preschool experiences, including Parents as Teachers, First Steps, Early Childhood Special Education, Early Head Start, Head Start, public preschool, private preschool, center-based child care, child care in own home, child care in other private home, and remained at home with parent. Parents reported on how often someone in the home read to the child and how often their child read or looked at books.

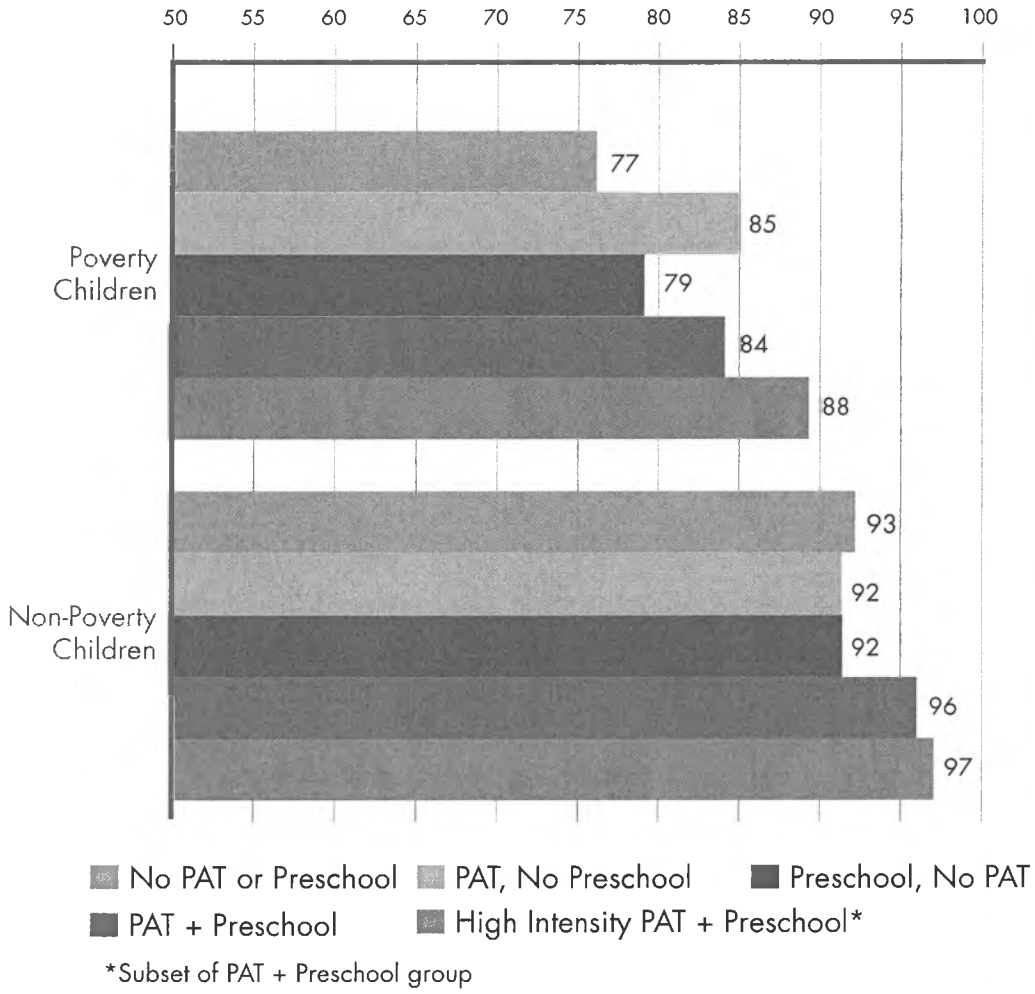
The figures show the impact of Parents as Teachers (PAT) and preschool participation on children's school readiness and later success. For this study, children assessed as "not ready" for kindergarten scored one standard deviation below the average entering kindergartner. Children scoring at the lowest level on the third grade MAP Communication Arts test scored one standard deviation below the average third grader.

Figure 1. Percentage of Children Entering Kindergarten "Ready" by Poverty Status and Pre-K Experiences



The graph illustrates that increasing percentages of both poverty and non-poverty children are ready for school with more intensive participation in Parents as Teachers and preschool. Specifically, if children in poverty participated with high intensity in Parents as Teachers and preschool (a minimum of two years in Parents as Teachers and one year in preschool), virtually the same percentage of them (82%) were ready for kindergarten as were their non-poverty peers with no preschool experience or Parents as Teachers participation (81%).

Figure 2. Percentage of Children Scoring Above the Lowest Levels of the Third Grade MAP Communication Arts Test by Poverty Status and Pre-K Experiences



The concept for Parents as Teachers was developed in the 1970s when Missouri educators noted that children were beginning kindergarten with varying levels of learning readiness. With funding from the Missouri Department of Elementary and Secondary Education and the Danforth Foundation, Parents as Teachers began in 1981 in Missouri as a pilot project for first-time parents of newborns. Convinced of the program's benefits and cost effectiveness, the state has offered Parents as Teachers services to all residents through every school district since 1985.

The added value of Parents as Teachers carries over to third grade achievement, particularly for poor children. Again, more intensive participation in both Parents as Teachers and preschool resulted in a similar percentage of poverty children (88%) scoring above the lowest level on the MAP Communication Arts test as non-poverty children with no Parents as Teachers or preschool (93%).

Parents as Teachers Goals

- Increase parent knowledge of early childhood development and improve parenting practices.
- Provide early detection of developmental delays and health issues.
- Prevent child abuse and neglect.
- Increase children's school readiness and school success.

The Parents as Teachers *Born to Learn*™ model includes four components

- Personal visits
- Group meetings
- Screening
- Resource network

Parents as Teachers (HB 49) is good for Alaska's military families

Passing HB 49 will greatly help our military families with the sacrifice and stress they face with frequent moves and deployment.

HB 49 could help 8602 active duty children in Alaska between under the age of 5, plus the children of active members of the guard and reserve.

1. **Parents as Teachers helps families cope with deployment**

    - Military deployments take a toll on families, especially those with young children. Behavior is a key communicator for very young children, so being prepared for potential behavioral changes, and having places to turn to and ideas to try with the youngest members of military families is crucial to 'dealing' with separation that's part of many terms of service for our military families.

    - Families parenting singly because of deployment often struggle with regimented, school-based programs because of financial and scheduling constraints. Providing parents with resources to create a learning environment in any situation helps their children gain the fundamentals needed to enter school at par with their peers.

    - The Parents as Teachers social evenings offer isolated parents an excellent opportunity to form connections with other families. Social time also helps parents develop support networks necessary for dealing with deployment, frequent moves and other stresses unique to military families.

2. **Parents as Teaches helps reduce barriers facing children of military personnel as they transition from one school system to another.**

    - The average military family student will move from six to nine times from kindergarten to 12th grade. When parents are equipped to engage in their children's education, they can better stabilize their families through the moves and help their children transition through difficult changes.

    - While the armed services has done much to ease the transition for children of military personnel, there is much that can be done at the state and local levels to ensure that these children are afforded the same opportunities for educational success as other children.

3. **Parents as Teachers had been operating on Fort Wainwright for years, but is now gone.** Staff say that the Parents as Teachers system is essential for helping Guard members and their families cope with the stress and confusion of deployment and the absence of a loved one.

Information based on conversations with specialists on education for military families, including the United States Department of Defense, DUSD (Military Community and Family Policy), Alaska National Guard, Alaska Department of Military and Veterans Affairs, Alaska's Congressional Delegation, Fort Wainwright Parents as Teachers program, Anchorage School District Liaisons for Military Families, and elementary schools serving military families. (Pursuant to the prohibitions set forth in 18 U.S.C. 1913, the Joint Ethic Regulations, Part 6-202, 5 C.F.R. 2635, and DoD Directive 1344.10, active duty members of the military are not permitted to engage in lobbying on legislation.)

Prepared by Rep. Tuck's Office

Parents as Teachers™

HOW DOES PARENTS AS TEACHERS SUPPORT SCHOOL READINESS?

Parents as Teachers helps all children enter school ready to learn.

Children who are prepared for kindergarten continue to do well in the early grades of elementary school, are more likely to graduate from high school and to go on to be successful in life.

Parents who participate in Parents as Teachers are more confident about their parenting and are more involved in their children's schooling...a key component of a child's success in school.

Research shows that participation in Parents as Teachers, together with preschool, not only positively impacts children's school readiness and school achievement scores, but also narrows the achievement gap between children in poverty and non-poverty households.

When children had at least two years of Parents as Teachers combined with a year of preschool, 82 percent of poor children were ready for school at kindergarten entry—a level identical to non-poverty children who had no Parents as Teachers or preschool experience.[1]

Parents as Teachers children continue to achieve beyond kindergarten:

> They scored significantly higher on standardized measures of reading and math at the end of first grade than did comparison children. In addition, teachers rated Parents as Teachers children's achievement progress higher than control group children's progress in all areas.[2]

> They continued to perform better than non-Parents as Teachers children on standardized tests of reading and math achievement in second grade. Compared to non-Parents as Teachers children, PAT children required half the rate of remedial and special education placements in third grade.[3]

Did You Know...

Children who participate in Parents as Teachers:

> Are more advanced at age 3 in language, social development, problem solving and other cognitive abilities;

> Score higher on kindergarten readiness tests;

> Score higher on standardized measures;

> Show better school readiness at the start of kindergarten;

> Achieve higher reading and math readiness at the end of kindergarten;

> Achieve higher kindergarten grades; and

> Require fewer remedial education placements in first grade.[4]

Committee for Economic Development

DEVELOPMENTAL EDUCATION:

The Value of High Quality Preschool Investments as Economic Tools

A Working Paper by
the Committee for Economic Development

September 2004

inside front cover

SUMMARY

Job creation and economic development have become a centerpiece of state and local policy. Each year, billions of state and local tax dollars are committed to local development projects in the U.S., often in the form of providing inducements to high-profile companies, subsidizing entertainment infrastructure (such as arenas or stadiums), or creating "cluster" developments. Though these investments are increasingly common, their returns are risky, if at all positive, and their benefits are frequently aimed at a small segment of the local population.

Early childhood education, in contrast, appears to offer greater potential returns and substantially less risk, and should be included by state and local leaders as a component of their economic development policy toolkit. ***CED encourages local development policy-makers to view early education as a development tool and appreciate its lasting benefits.*** It is time that early education is implemented with the same energy, urgency, and funding that is currently being applied to other, less-promising, development projects.

This publication was created by the Committee for Economic Development (CED) as part of The Pew Charitable Trusts' initiative to advance high quality prekindergarten for all of the nation's three and four year olds through objective, policy-focused research, state public education campaigns, and national outreach. The views expressed are those of the authors and not necessarily of The Pew Charitable Trusts.

Ev Ehrlich, former CED Research Director, and Tracy Kornblatt, a former CED Research Associate, prepared the text. As a "Working Paper," this publication is intended as an interim report which summarizes current research on the economic benefits of early education. As such, it will set the stage for the next CED policy statement on early childhood education planned for 2006.

The authors would like to make special note of the contributions of Arthur Rolnick, who not only co-authored a seminal paper on early childhood development as an economic development tool (with Rob Grunewald, accessible at http://minneapolisfed.org/research/studies/earlychild/earlychild.pdf), but has worked to call business leaders' attention to these results in Minnesota and elsewhere.

PUBLIC INVESTMENT IN DEVELOPMENT

The rise of state and local investment in development

State and local economic development policies have been around since the beginnings of the Republic, but the precursors to current local development policies surfaced during the 1970s when an energy crunch, global competition, and high unemployment forced state and local governments to take action to attract economic development and jobs.[1] Since then, added employment pressures and increased mobility of labor and capital have further expanded "territorially competitive" development policies, and by 1994 states averaged twenty-four inducement programs per state.[2]

The scale of state and local "inducement" policies

State and local developmental policies contain vast amounts of funding for inducement and marketing packages, including:

- Grants to communities for business loans and loan guarantees;
- Provision of job training specific to business or industry request;
- Infrastructure provision;
- Tax relief; and
- Site/building provision

Annual city government spending for such economic development initiatives is usually between $7–$16 per capita, which is about $2–$4 billion each year, nationwide. However, tax exemptions probably cost local governments much more — a study in Michigan estimated that tax relief to promote development costs about $40 per capita annually.[3]

Measuring the returns to local "inducement" policies

Estimating the total social returns to development inducements is an unreliable exercise. The social returns depend on the definition of benefits, estimates of the life and details of the projects (which are often subject to change), and the point of view from which benefits are calculated (for example, from the local, state, or national perspective). Many of the benefits are difficult to quantify and benefit definitions are controversial. Despite these problems, however, there is substantial evidence that the returns to territorially competitive investments are minimal, if not negative, especially if viewed from a wider (state or national) perspective.[4]

The problems with a territorially competitive approach to investing in development have been widely documented.* The current bidding wars put companies and athletic teams

Gordon, "Territorial Competition: Some Lessons for Policy," *The Annals of Regional Science*, vol. 32, no. 3 (1998); Andrés Rodríguez-Pose and Glauco Arbix, "Strategies of Waste: Bidding Wars in the Brazilian Automobile Sector," *International Journal of Urban and Regional Research*, vol. 25, no. 1 (2001).

in a powerful position, able to comparison shop for the best package of tax relief and inducements, often accepting benefits packages for a short-term commitment, and then able to (threaten to) relocate, accepting more inducements after the original incentives run out. The cost of inducements drives the net social benefits from "winning" corporate investment down to a minimum, if they are positive at all. Any benefit derived from the relocation of jobs is experienced at the local level. On a larger scale, the U.S., for example, derives no social benefit when jobs move from Missouri to Mississippi,† and any tax dollars spent to fund such a move result in a net loss of social welfare.

Not only are benefits of territorially competitive policy minimized and localized, but also they are often unrealized, as compared to predictions at the start of the investment. Though development incentives are made in anticipation of gains in the form of direct jobs, secondary jobs, and future growth in tax revenue, many of these benefits are predicted using assumptions about the time horizon and size of the investment to which the firm will commit over time, and firms often do not meet their commitments (i.e., a sports team demands a new stadium after twenty years instead of thirty, a firm employs only half the number of employees it originally promised). Sometimes firms fail to meet commitments not because of poor intent. Instead, the incentives themselves may distort the location process so much that the firm chooses a location that is not economically viable long-term. Furthermore, an unpredictable number of jobs created go to in-migrants, and, depending on the capacities of existing schools and other public infrastructure, there may be additional public costs to job creation and resultant growth.

The idea that pursuing such zero-sum gain policy is not in the nation's best interests underlies Melvin L. Burstein and Arthur J. Rolnick's demand that Congress outlaw territorially competitive policy.[5] Though quantification of benefits from development inducement is unclear, it is clear that analysts question the returns to such policy, and find ample reason to believe that the returns are low, if positive. Examining three popular categories of public investment in more detail provides a better picture of the questions surrounding social benefits of development policy.

Clusters/Industrial Parks Since Michael Porter's seminal work on clusters, many localities have turned to clusters or industrial parks as a source of self-sustaining economic development.[6] Defining a cluster is challenging (academics admit the vagueness and breadth of the term), but the general idea is that a network of firms interacts and becomes interdependent, creating linkages and collective assets that tie firms to the cluster location, and attract similar firms requiring similar inputs, specialized services, labor, etc.[7] Clusters have garnered much attention because they can seemingly transform a lagging region into a thriving, self-sustaining one.[8] This prospect has caused local policymakers to attempt to create clusters, by inducements and other policies. But there are few, if any, examples of policy-led clusters achieving success.[9] The true preconditions for successful clusters seem to be more deeply-rooted characteristics of the region, such as education level of the population, access to educational and other resources, access to required inputs/outputs, and existing culture of trust/cooperation between business leaders.[10] Inducements such as tax cuts and subsidies do not seem to yield the desired, self-sustaining economic development.

Often, though not necessarily, cluster developments contain firms in similar industries — such as Silicon Valley or the Route 29 Technology Corridor in Eastern Massachusetts — and high-tech science parks have garnered the most attention. In 1998, an estimated 135 science parks were located around the U.S., and most received public subsidization.[11]

Scott Wallsten found no significant positive effect of science parks on regional development, measured in terms of jobs, number of firms, and invested venture capital.[12] Though many communities attempt to replicate the success of Stanford Research Park in Silicon Valley, Silicon Valley's success is a rarity in the field, and it was not initiated by public (or private) design. Silicon Valley's success appears more the result of the intense nature of competition in the region than public subsidization. The majority are parks such as the Texas Research Park in San Antonio, which broke ground in the mid-1980s, with predictions of 50,000 jobs in thirty years. As of 2004, the park has created 300 jobs. A research park that began in the 1980s in Prince George's County, Maryland, has been deemed a failure, and the state is seeking a refund on some of the millions it poured into the infrastructure.[13] In sum, policies designed to create science parks or clusters are unlikely to be successful or have positive returns to investment.

Professional Sports Investments Public investment in sports teams, namely building/renovating arenas and stadiums has grown rapidly over the last fifteen years. Between 1990-1998, forty-six major league stadiums/arenas were built, and between 1998–1999 an additional forty-nine facilities were under construction or in active planning.[14] The cost of these facilities averaged $21.7 billion, roughly two-thirds of which was funded publicly. Though studies funded by the teams or local chambers of commerce assert net benefits to the community from team investment, the calculations are often based on unrealistic assumptions about local value added.[15] Benefits that are derived from the new stadium go largely to the team's management and players, and, though such benefits would still be counted as social benefits (total benefits to anyone in the society), they bring up distributional concerns and promise large-scale out-of-town leakage of benefits (rather than the assumed in-town spending and multiplier effects). Additionally, any benefits are based on assumptions about how long the team stays in its new facility, how big of a public draw the team will be (which can be based somewhat on performance), the entertainment choices of consumers in the absence of new stadia, and other factors that are sub-

† Assuming no differences in productivity, etc.

ject to change. John Siegfried and Andrew Zimbalist conclude, "...independent work on the economic impact of stadiums and arenas has uniformly found that there is no statistically significant positive correlation between sports facility construction and economic development."[16]

Incentives to High-Profile Companies

Table 1 shows a sample of the inducement packages that have been offered to high-profile companies. The size of these subsidies is quite large, and, even if the location that "wins" the company or firm receives net social benefits, the likelihood of net social benefits on a larger scale (which would only occur if the incentives prevented a socially-beneficial company from locating outside the U.S., or from choosing an inefficient U.S. location) are quite small. There are an estimated 1,500 major corporate expansions or relocations in the U.S. per year and an estimated 15,000 economic development organizations courting them — which places businesses in a good position for capturing benefits.[17] In fact, there is a popular view that inducements to large-scale plants reduce the welfare of local residents (a winners' curse of sorts), but Michael Greenstone and Enrico Moretti have found evidence to the contrary, explaining why local interests in subsidization schemes remains high.[18]

But while there may be incentives at the local level to subsidize million-dollar plants, from the larger perspective the benefits erode, as the plant likely would have located somewhere in the U.S. (or maybe even the same state), even without subsidization, and would have contributed (more) to the tax base and funded its own implementation.

There is also the risk that inducements create losses by distorting the firm's location decision, causing it to choose a strategically weak location. In such instances, firms derive benefit from subsidization, rather than economic efficiency, and are forced to relocate when the subsidy runs out. Furthermore, inducements may stratify large-scale industries that otherwise may naturally cluster and form a global competitive advantage. Take, for example, the automobile industry. After subsidizing a major plant to the tune of $250 million or so, a state finds itself unable to bid for another auto plant, so the major auto manufacturers end up scattered over several states (Tennessee, Alabama, South Carolina), rather than clustered together where they may share transport hubs, input manufacturers, and technological knowledge transfers. If U.S. manufacturers lack these competitive assets, unsubsidized, naturally-clustered sites in other countries may be more efficient and competitive, by comparison.[‡] On a federal level, the loss incurred by companies operating at otherwise undesirable locations is a serious concern in the long run. Undistorted, market-based location decisions are a better path to U.S. economic growth.

Table 1 gives an idea of the subsidization of large-scale projects — not all jobs created are subsidized to this degree. For example, Timothy Bartik estimates that a new job created should cost about $7,000/year in public subsidization or tax revenue forgone.[19] The problem is that these numbers do not indicate net social benefits. For example, it cannot be known if a $7,000 subsidy per new job created is a good deal for local residents or not — the benefits and spillover benefits are highly individualized by project, difficult to quantify, and depend on the life of the company, which can be subject to drastic change.[20]

Table 1: Local Subsidization of Sample Corporations

Company Receiving Subsidy	Location	Year	Subsidization	Comments
Micron Technology	Lehi, UT	1995	$80 million	
Mercedes Benz	Alabama	1993	$250-$300 million	Estimated subsidization of $170,000/job
Blue Water Fibre	Michigan	1994	$80 million	With 34 employees, subsidization per job [a] $2.4 million
Volkswagen	Pennsylvania	1978	$70 million	Factory promised 20,000 jobs, but only employed 6,000 and closed after a decade
Northwest Airlines	Minnesota	1992	$700 million	Northwest promised 2,000 jobs at 2 facilities, but later scaled back to 1 facility and 1,000 jobs. Subsidization per job [a] $558,000.
Toyota	Georgetown, KY	Late 1980s	$200 million	Subsidization per job [a] $80,000
Boeing	Chicago, IL	2001	$50 million	Subsidization per job [a] $100,000
BMW	Greenville/ Spartanburg, SC	1992	$115 million	Predicted jobs created: 2,000 direct, 2,000 indirect
United Airlines	Indianapolis, IN	1992	$320 million	United promised to invest $500 million, but only put in $229 million, and closed the facility in 2003. The city currently owns the facility and tools, and pays $34 million/year to retire the bond issue and $6 million/year to maintain the empty facility
Nissan	Tennessee	1980		Subsidization per job [a] $11,000

Though the precise effects of development investments cannot be accurately quantified, we can tell that competitive bidding and subsidization minimizes the net social benefits of development investments, creates potentially harmful market distortion, and makes the investments high risk. We can further conclude that there is active interest in public investment in economic development, even if it is at a high cost and with low expected net benefits. CED recommends channeling this interest and public funding into projects that promise even greater returns — namely early childhood education.

EARLY EDUCATION AS A DEVELOPMENT TOOL

October 2000 U.S. Census data reveal that only 52 percent of all children ages three to five (not yet enrolled in kindergarten) were enrolled in "nursery school."[§ 21] Additionally, enrollment was substantially less frequent in low-income households, and children of low-income families were overwhelmingly (89 percent) enrolled in public programs like Head Start, while 77 percent of children from families with incomes of $75,000 or more attended private schools. These data support concerns regarding overall low attendance rates and inequity of services being provided to America's children. Unlike several Western European countries, many children in the U.S. do not have access to preschool programs, and the quality of current offerings, especially for children of low-income families, is questionable. CED first raised these concerns in *Preschool for All: Investing in a Productive and Just Society*.

Low pre-kindergarten enrollment rates and unequal access to pre-kindergarten are a concern because experimental, high-quality, intensive preschool programming, when tested under accepted experimental conditions, can be shown to produce substantial net social benefits.[22] Two such experiments, the High Scope/Perry Preschool project and the Carolina Abecedarian project, are estimated to have produced benefits in the range of $2–$8 per dollar invested.

High/Scope Perry Preschool Project The Perry program served children of low-income families in Ypsilanti, Michigan from 1962 to 1967, and participants received extraordinary preschool offerings. Most participants received two years of services, which included a 2.5 hour/day, nine-months/year classroom component, as well as a ninety-minute teacher home visit once per week. Additionally, student/teacher ratios were unusually low, and teachers were more qualified than most, being both certified public teachers and trained in child development. The experiment contained a total of 123 children. Participants and members of the experimental control group have been followed extensively, providing a comprehensive look into the broad range of costs and benefits associated with the program. As estimated by Steven Barnett, by the time participants reached 27 years of age, the results in Table 2 had been obtained. The 3 percent discount rate analysis indicates benefits of $8.74 per dollar invested. Assuming a different discount rate, of course, changes the net benefits, but the net benefits still remain positive. At a 5 percent discount rate, benefits are estimated at $5.58/dollar invested, and at a 7 percent discount rate, social benefits are predicted to be $3.75/dollar invested.[23] Worthy of note is the substantial portion of benefits attributed to crime reduction. These benefits are quantified including estimates of costs both to the judicial system and estimates of losses (financial and emotional) to victims.

Carolina Abecedarian Early Intervention The Abecedarian educational child care project, like the Perry Preschool, was a true experimental project, and included 111 students in Chapel Hill, North Carolina, beginning in 1972. Also like Perry, participants were children in low-income and often African-American families. Those allocated to the treatment group attended a year-round, full-day center, which provided free transportation

[‡] The losses incurred by subsidizing an auto industry into fragmentation are well documented in a study of Brazil: Andrés Rodríguez-Pose and Glauco Arbix, "Strategies of Waste: Bidding Wars in the Brazilian Automobile Sector," *International Journal of Urban and Regional Research*, vol. 25, no. 1 (2001).

[§] "Nursery school" is defined as "a group or class that is organized to provide educational experiences for children during the year or years preceding kindergarten." This definition includes Head Start programs.

and included staff at unusually high student/teacher ratios (3:1 for infants/toddlers; 6:1 for older children). The most recent assessment of participants was made at age twenty-one, and the cost-benefit analysis breaks down as shown in Table 3. The Abecedarian program reveals benefits of $3.78 for each dollar invested, assuming a 3 percent discount rate, and $2.20 and $1.45 in benefit per dollar invested, assuming a 5 percent and 7 percent discount rate, respectively.

The net benefits in both analyses, of course, are subject to question and interpretation. Estimation and quantification of social benefits, such as less fear of crime, is an imprecise exercise. Some benefits may be overstated, and others may be excluded, including benefits to siblings and future generations.** The sample sizes of the programs were small and the environments unique. The cost-benefit analysis may not be exact, but the best evidence by professionals consistently indicates that these programs yield extraordinary benefits, and certainly have more promise of positive return to investment than professionals estimate for territorially competitive inducements.

The cost-benefit analyses of Perry and Abecedarian are a first indicator of a larger discovery about early education programs: the real benefits are not from making children smarter, but from nurturing children's noncognitive skills, giving them social, emotional, and behavioral benefits that lead to success later in life.[24] Early education programs have proven to temporarily raise participants' IQs, but those effects dissipate early on in elementary school, while affects on children's behavior and self-discipline are lasting.[25] Evidence indicates that these positive effects are more persistent when a program is preventative, intensive, and starts at a very early age.[26] And, according to Pedro Carneiro and James J. Heckman, *skill begets skill* in a dynamic process, so skills gained early help students gain more skills in the next stage of development, and missing out on skills early is hard to compensate for later.[27] This theory is supported by Perry and Abecedarian participants: those receiving the treatment had more positive achievement scores, educational attainment, employment, and social outcomes (for example rates of crime and teen pregnancy).

Because of low participation rates and unequal access, we should be concerned that children, and society, are missing out on these key benefits of early education. With only half of children ages 3-5 involved in early education programs at all, and with many of those programs of insufficient quality to prepare children for school success,†† we can assume that many children are being underserved, and that investing in broader and more intense offerings would yield positive returns.

Perry or Abecedarian is not the only solution for other communities, nor would replication guarantee similar effects when applied in other environments. The results of Perry and Abecedarian cannot be generalized to larger and different program applications. Unfortunately, the evidence is limited. More research is needed to determine optimal program designs and targeting, and, in particular, there is a need to evaluate larger samples.[28]

But we can be certain that early childhood education offers *much* more promise of positive net social benefits than many of the territorially competitive incentive packages in which state and local governments invest billions each year, despite their frequent negative returns.

We understand that, given the current inducement-based system, it would be political and economic suicide for a state not to compete for economic development with incentive packages.[29] We cannot expect state and local governments to instantly substitute childhood investments for their current development initiatives. But we can educate policy-makers about the role of early childhood education as an economic development tool, with better expected return, less risk, and less damaging distortion than existing inducement programs, and demand slow but steady change. The evidence makes early education an easy sell. We hope to see policy-makers funding the further research that is needed and then appropriately investing in early education as a developmental priority.

CED is a nonprofit, nonpartisan organization that for 60 years has worked with the business and academic communities to address the critical economic and social issues facing American society.

Early Childhood Education:
A Call to Action from the Business Community

Why America Needs High-Quality Early Childhood Education

Over the past two decades, business leaders have invested time, expertise, and resources in efforts to improve K-12 education in the United States. What we have learned leads us to conclude that America's continuing efforts to improve education and develop a world-class workforce will be hampered without a federal and state commitment to early childhood education for 3- and 4-year-old children.

As states implement the No Child Left Behind Act, designed to ensure that all students are proficient in reading and math by 2013-14, we also need to ensure that children enter school ready and able to succeed. Research shows, however, that far too many children enter school ill-prepared.

Studies document a wide gap between lower- and higher- income children before they enter kindergarten. When children begin school behind, they tend to continue to fall further and further behind. High-quality early childhood education can help close this gap. Long-term positive outcomes and cost-savings include improved school performance, reduced special education placement, lower school dropout rates, and increased lifelong earning potential (see the Appendix for a summary of this research).

Not only does high-quality early childhood education make a difference for children, it matters to their employed parents. Employers increasingly find that the availability of good early childhood programs is critical to the recruitment and retention of parent employees.

In today's world, where education and skill levels determine future earnings, the economic and social costs to individuals, communities, and the nation of not taking action on early childhood education are far too great to ignore, especially when the benefits far outweigh the costs. Estimates of the return on investment of high-quality programs for low-income children range from $4 to $7 for every $1 spent. However the research is clear: the return on investment is linked to quality; simply increasing participation without ensuring program quality will not produce positive results.

As business leaders, we see the discussion around early childhood programs for 3- and 4-year-olds as largely an education issue. Since states have primary responsibility for education, we believe that states need to take the lead in developing and funding a coherent early childhood education system from the patchwork of programs and services that exist today. The federal government also must play a leadership role. It must make high-quality early childhood education a national priority, and continue its historic role in focusing on the children most in need. Federal and state investments in early education must be coordinated in order to improve program quality and to serve more children.

Statement of Principles

The Business Roundtable (BRT) and Corporate Voices for Working Families (CVWF) believe federal and state efforts to develop early childhood education systems for 3- and 4-year-olds must be based on a set of guiding Principles that define the components of a successful system and high-quality programs. These Principles draw on current early childhood research, lessons from K-12 education reform efforts, and applicable lessons from the nation's experience in building a voluntary system of higher education. Although our focus is on 3- and 4-year-old children, we fully recognize the importance of quality improvement efforts for early childhood programs serving children under 3.

The six principles below are interconnected; they are not listed in priority order. BRT, CVWF, and others will use these Principles to assess existing early education programs, consider philanthropic priorities, evaluate policy proposals on Pre-K, Head Start, and other programs, and formulate policy positions.

1. LEARNING. *A successful early childhood education system* views children's learning as the central mission. It should:

- Provide positive learning experiences that foster the interconnections among children's social, emotional, and cognitive development and nurture children's innate joy in learning;
- Engage children in developmentally appropriate experiences with English language literacy and numeracy, and encourage family literacy programs to reinforce these experiences;
- Hold the same high expectations for success for all children while also respecting and supporting the diversity of children's families, cultures, races, socio-economic backgrounds, as well as the different ways that young children learn and the rates at which they progress; and
- Include healthy nutrition, safe environments, facilities conducive to learning, and diagnostic screening with effective follow-up services to treat disabilities or health problems that might affect children's ability to learn.

2. STANDARDS. *A successful early childhood education system* articulates standards for children's learning and program quality that align with state K-12 academic standards. It should:

- Align the objectives of the early childhood education system and the state's standards in the early grades of school;
- Adopt research-based curriculum options and program standards that enable early childhood education to achieve and sustain results for children;
- Endorse research-based indicators for what children need to know and be able to do when they enter school that respect the diverse ways that children grow and learn; and
- Use the results of regular and appropriate diagnostic assessments of children's performance to improve instructional practice.

3. **TEACHERS.** ***A successful early childhood education system*** **ensures that teaching staff possess the skills, knowledge, and attitudes to help young children enter school prepared to succeed. It should:**

- Employ skilled teaching staff who have a college degree and/or demonstrated knowledge and skill commensurate with the requirements of the position and meet performance criteria such as English verbal skills and the ability to connect with and teach young children;

- Require effective preparation as well as ongoing professional development that helps staff improve the quality of their teaching, become ongoing learners, and move through an articulated, degree-granting system, where appropriate; and

- Institute differentiated salaries based on the experience and competencies of teachers that, given the importance of consistent relationships to children's learning, are adequate to attract and retain a qualified teaching staff.

4. **PARENTS.** ***A successful early childhood education system*** **supports parents as their children's first teachers and provides high-quality program options to parents who choose to enroll their children. It should:**

- Provide access to high-quality early childhood programs for families seeking out-of-home early childhood education for their 3- and 4-year-old children, regardless of their socio-economic status;

- Offer seamless ways to meet the need of some families for care during the time they are working as well as the need for early learning experiences for their children; and

- Promote practical and effective strategies for parents to be involved in and support their children's learning at home and in early education programs.

5. **ACCOUNTABILITY.** ***A successful early childhood education system*** **embraces accountability for measurable results. It should:**

- Collect the data and conduct the research needed to identify best practices, assess system performance, and report these results to stakeholders;

- Evaluate the progress of children who have participated in early childhood education programs on the state's annual assessments required by the No Child Left Behind Act;

- Implement continuous improvement processes that put the lessons learned from research and evaluation into program standards and practice; and

- Establish incentives for meeting or exceeding objectives as well as consequences for persistent failure to achieve intended outcomes for children.

6. **PARTNERSHIPS.** ***A successful early childhood education system*** **builds crosscutting partnerships to govern, finance, sustain, and improve the system. It should:**

- Create effective and efficient governance mechanisms that support community planning, program development and oversight;
- Involve key stakeholders at the federal, state, and local levels, and encourage public/private partnerships to improve effectiveness, efficiency, and accessibility;
- Include participation among all sectors of the early childhood field within the state, including public and private programs as well as those that take place in schools, centers, and homes; and
- Insist on adequate, efficient, and shared financing mechanisms that minimize duplication of effort and identify priorities for public investments in times of budgetary constraints as well as a blueprint for future expansion.

From Principles to Policy

In 1990, the nation's governors and the Administration set as their first National Education Goal, "By the year 2000, all children will start school ready to learn." Thirteen years later, there has been progress—45 states are now providing some early childhood education services and programs, using both federal and state funding sources. The reality of today's families—including those with working parents and those with a parent at home—is that 69 percent of 3-year-old children and 82 percent of 4-year-old children are in some form of early childhood program on a regular basis. Yet most of these programs are not high quality, despite the research that shows that only high-quality programs produce a strong return on investment. Thus, the goal of school readiness remains largely unmet.

Three groundbreaking initiatives pave the way toward realizing this goal. Two reports by the National Research Council of the National Academy of Sciences summarize current research on early development and early learning: *From Neurons to Neighborhood: Applying the Science of Early Childhood Development* in 2000 and *Eager to Learn: Educating Our Preschoolers* in 2001. In addition, the Committee for Economic Development developed a vision for applying this knowledge in its publication, *Preschool for All: Investing in a Productive and Just Society* in 2002.

The Principles outlined in this statement take us the next step in formulating federal and state policies. As noted earlier, education is largely a state responsibility, but the federal government has always played a very significant financial role in early childhood programs and must continue to do so. Although the federal role in early childhood is different from its role in K-12 and higher education, policymakers should examine relevant lessons from federal initiatives that have strengthened both higher education and K-12 education.

In higher education, the federal government's first priority is to help low-income students gain access to postsecondary studies. The federal government also helped states build a voluntary higher education system that is the envy of the rest of the world. The federal government could take a similar role in the early childhood arena, supporting low-income children's participation in high-quality programs while also helping states to build the infrastructure for high-quality programs—including building staff capacity.

In elementary and secondary (K-12) education, the federal government only provides 7 percent of the overall resources, but influences the entire system because these resources link their assistance for low-income students in low-performing schools with requirements for rigorous state accountability systems that include all students. Although early childhood education is very different from the public K-12 system because it is has a higher percent of federal funding and a mix of public and private providers, we believe that the federal government could use a similar model of linking resources with accountability by pairing federal investments with requirements for strong state accountability systems that measure results, ensure high program standards, and expand the numbers of children served.

We are well aware that economic conditions, budgets, and political considerations can hinder or hasten domestic policy initiatives. But even in uncertain times, we can begin to plan for the future. We urge decision makers in the public and private sectors—the U.S. Congress, the Administration, local and state governments, school boards, the business community, and other leaders —to make early childhood education a high priority by supporting and endorsing these Principles and launching a multi-sector planning process to identify incremental and additional revenue streams required for implementation. BRT and CVWF are committed to working with all stakeholders to build a quality early learning system for today's and tomorrow's young children.

About The Business Roundtable

The Business Roundtable (BRT) is an association of 150 chief executive officers of leading corporations committed to advocating public policies that foster vigorous economic growth and a dynamic global economy. In 1990, the BRT adopted a nine-point policy agenda, "Essential Components of a Successful Education System," which outlined the framework for standards-based education reform. One of the nine essential components includes high-quality pre-kindergarten education for disadvantaged children. BRT member companies created or joined state business coalitions to promote higher standards, and business leadership has been a critical factor in many of the states that have significantly improved student achievement. The BRT also strongly supported the passage of the No Child Left Behind Act of 2001, which creates a national imperative to raise student achievement and close the achievement gap, and the Roundtable's Task Force on Education and the Workforce is actively involved in the law's implementation.

About Corporate Voices for Working Families

Corporate Voices for Working Families (CVWF) is a coalition of 36 leading corporations that have been engaged in listening to and addressing the challenges of their employee families for over two decades. The CVWF coalition was created in 2001 to bring this private sector voice and experience into the public dialogue on issues affecting their working families. CVWF is focused on communicating the business case for early learning to policymakers, corporations, and other stakeholders interested in strengthening working families. CVWF's partner companies believe that the care and education of young children is critical to the attraction, recruitment and engagement of today's parent employees as well as a key to economic growth. CVWF recently released an issue brief outlining why early education is an important business issue.

Appendix: Supporting Research

By the time children enter kindergarten, there already is a wide gap in their readiness for school.

- At age 3, high socio-economic status (SES)[1] children have average vocabularies of 1100 words, middle SES children have average vocabularies of 750 words, and low SES children have average vocabularies of 480 words (Hart and Risley, 1995).

- Lower SES children enter school with much poorer skills in the major areas of development and learning. Average achievement scores for kindergarten children in the highest SES group are 60 percent higher than those in the lowest SES group (Lee and Burkam, 2002).

- Only 47 percent of low SES kindergarteners are likely to have attended a center-based program (including Head Start) prior to kindergarten entry, compared with 66 percent of higher SES children. Moreover, higher SES children have access to higher-quality programs, further benefiting them (Lee and Burkam, 2002).

When children begin kindergarten behind, they continue to fall further and further behind.

- During the kindergarten year, children who are deemed at risk for later school failure because of their family backgrounds make gains in basic skills such as letter recognition, counting, and comparing object size. Yet these children remain farther behind children with fewer at-risk factors because the more advantaged children make even greater gains in reading and math skills in school than their less advantaged counterparts (West, Denton, and Reaney, 2001).

High-quality early childhood programs can make a difference in school readiness despite poverty and other risk factors in children's backgrounds.

- Children, including those of low and high SES, who attend high-quality centers, score significantly higher on measures of skills and abilities that are important for school success compared with children from lower quality centers. While children's abilities are typically related to their families' income level, the quality of the early childhood experiences can make a difference over and above the effects of family characteristics (Bryant, Maxwell, Taylor, Poe, Peisner-Feinberg, and Bernier, 2003).

High-quality early childhood education programs have a high return on investment for low-income children.

- In the short term, longitudinal studies of high-quality early childhood programs, including the Perry Preschool Program, the Abecedarian Early Childhood Intervention Project, and the Chicago Child Parent Center Program find increased achievement test scores, decreased rates of being held back in school, and decreased placement in special education among low-income children. In the

[1] Throughout this report we refer to the effects of socio-economic status (SES) and family income, which are different. In addition to income, SES takes into account such characteristics as parental education and social status.

longer term, studies also find increased high school graduation and decreased crime and delinquency rates (Schweinhart, Barnes, and Weikart, 1993; Campbell, Ramey, Pungello, Sparling, and Miller-Johnson 2002; Reynolds, Temple, Robertson, and Mann, 2001).

- Cost-benefit analyses of Perry Preschool and the Chicago Child Parent Center Programs find a cost savings of $7 for every dollar invested (Barnett, 1996; Reynolds, Temple, Robertson, and Mann, 2002). Cost-benefit analysis of the Abecedarian Early Childhood Intervention Project finds a cost savings of $4 for every dollar invested (Masse and Barnett, 2002).

- When using an internal rate of return, which compares public and private return on investments, high-quality early childhood programs fare well. The internal rate of return for the Perry Preschool Program has been calculated at 16 percent, supporting the notion that early education can be a good investment (Rolnick and Grunewald, 2003).

There is evidence that high-quality programs will benefit middle-class children as well.

- At the beginning of kindergarten, the gap between middle and higher SES children is larger than the gap between lower and middle SES children in achievement scores assessing literacy and mathematics (Lee and Burkam, 2002).

- An indication that middle-class[2] children might substantially benefit from preschool education is that they have relatively high rates of being held back in school and school dropout rates—problems that early childhood education has been found to reduce. Middle-income children have a 12 percent rate of being held back in school compared with 17 percent for low-income children and 8 percent for high-income children. Likewise, middle-income children have an 11 percent school dropout rate, compared with 23 percent for low-income children and 3 percent for high-income children (Barnett, 2003).

High-quality early childhood education is important to business.

- Numerous studies reveal that there is a cost to business in not responding to its employees' need for reliable and good-quality early childhood programs. Employees are likely to miss work when they spend long hours trying to find early childhood programs or when they deal with the often-tenuous arrangements they have, especially when these arrangements fall apart. When employees with these problems are at work, they have difficulty concentrating because they are worried about their children (Galinsky and Johnson, 1998).

- Companies have also found that there are business benefits in providing their own employees assistance with early childhood programs, including improved recruitment and retention (Galinsky and Johnson, 1998; Galinsky and Bond, 1998). Employees with access to family-supportive programs and policies are more likely to be satisfied with their jobs, to be loyal, to go the extra mile to help their companies succeed, and to stay at their jobs (Bond, Galinsky and Swanberg, 1998).

---

[2] In this calculation, low-income children are in the bottom 20 percent of family income levels, middle-class children are in the 20-80 percent range, and high-income children are in the top 20 percent.

Re: Support for HB 49, Parents as Teachers

Dear Representative Tuck,

On behalf of the Alaska Mental Health Board and Advisory Board on Alcoholism and Drug Abuse, I express our support for the Parents as Teachers program and HB 69. The key to preventing the many individual, family, and community problems associated with mental health and substance use disorders is prevention and early intervention. Strengthening young families so that they raise strong and resilient children is an excellent form of prevention.

We support HB 49 because it would provide support to families as they raise their children and prepare them for academic success. Certified parent educators provide information and tools to parents to help them help their children reach their full potential. This program educates and empowers parents to engage with their children in everyday ways that will enhance their early development. It provides personalized family-oriented supports that help young parents provide a safe appropriate environment in which their children can grow. Parent educators can connect parents to appropriate community resources to help address risk factors for domestic violence and help parents learn healthy ways to communicate with their children and each other.

We appreciate your and your co-sponsors' work on behalf of Alaska's children, and encourage establishment of a Parents as Teachers program.

Sincerely,

J. Kate Burkhart

Senator Al Kookesh
State Capitol, Room 11
Juneau, AK 99801

Dear Senator Kookesh,

I am writing in support of the Parent as Teachers program. I have been familiar with the program for approximately 10 years, initially through my friend and neighbor, Jan Carlson, who is a long-time PAT parent educator in the Copper Valley and more recently a PAT trainer in Alaska. Jan is an extraordinary person, and any program she is affiliated with demonstrates 'quality' because of her involvement. I learned more about PAT when I was the Teacher/Director at Kluti-Kaah Head Start in Copper Center for two years (2007-2009), as both of our programs were administered by RurAL CAP in Anchorage. For the past two years I have been working as the teacher/coordinator of Upstream Learning, Copper River School District's home education program. Cynthia Buchanan, the Copper Center/Glennallen area PAT parent educator, has her office right across the hall from mine, so is my "neighbor". We share conversation, ideas, and even our space at times, and it's been fun to see her interacting with children and families as they sometimes drop in to visit during the week.

PAT and home-schooling share a common premise – that parents indeed are a child's first and most influential teachers. As a former home educator myself (I taught my own 3 children at home for 20 years), I believe in PAT's individualized, home-based support of parents. I am grateful that their program is well established in the Copper Valley, and I trust it will continue to thrive in this rural area of Alaska. Giving parents tools that will encourage and give them confidence in their very important role of training their young children is the primary purpose of PAT, and I am behind them 100%!

Thank you for learning more about PAT. I trust you will support funding requests that will give the program a firmer foundation for continuing their worthwhile service to Alaska's families in the future.

Sincerely,

Ramona Henspeter

February 22, 2011

Dear Representative Paul Seaton,

This letter is in support of RurAL CAP's Parents as Teachers (PAT) program to provide home-based services for families with children aged prenatal to five years old. Since the loss of our Head Start program, there continues to be a critical need in our community for an early childhood program that helps to build school readiness skills for our children and provides support for families, especially in the three to five year old populations. PAT's ability to work with families that are pregnant (particularly teen parents) has been such an asset to the community.

PAT, the Infant Learning Program, and Seward Community Library along with some funding from the Seward Community Foundation and the City of Seward collaborate together to provide a weekly play group for any family in Seward with children under the age of five. These groups offer an opportunity for parents to understand the growth and development of their children and to learn age-appropriate activities that they can do at home with their children to foster optimal development. PAT also provides health and developmental screenings of children, identifying children who may need additional support at an early age and makes appropriate referrals to our program as well as others in the community. I believe that RurAL CAP's PAT program provides families information and support that will be presented in a way that is appropriate for the variety of cultures in our area.

Not having the PAT program in Seward would be a great loss for this community. I would like to support the need for continued funding for PAT in Seward.

Sincerely,

Monica Luther

To Sen. Al Kookesh and Rep. Alan Dick,

I am writing with great concern of the news that the funding for the "Parents as Teachers" program is being cut. As the principal in the small rural community of Kenny Lake, I am disappointed to know that this essential, early-developmental program is being taken from our families and toddlers.

"Parents as Teachers" has been a key piece for our school and community to reach out and come together, to help strengthen relationships with families, to get parents involved early in their children's education, and to help Pre-K students transition more smoothly into their first Kindergarten classroom setting. Parents bring their toddlers once a week to participating side-by-side in "Tot-Time" as well as visiting the K/1 classroom and participating in their "Circle-Time" for sharing and building friendships.

We have very limited resources out here and, realistically, we are around 35 miles away from the nearest Head Start facility. It's essentially the only weekly Pre-K experience that many of our toddlers have the benefit of attending. Research has proven that the earlier you have students involved in the education process, the more success you'll see in their future!

Thank you for your consideration in continuing this "Parents as Teachers" funding and continuing to help us increase student achievement here at Kenny Lake School.

Sincerely,

Miss Stansell

Miss Stansell
Principal

Excellence is the gradual result of always striving to do better.

8th March 2011

Dear Mr. Alan Dick,

I work for the Parent as Teachers program in Tok, Alaska. I also offer services to nearby villages such as Tanacross and Tetlin. This highly successful program has been implemented by RurALCap, the Rural Alaska Community Action program. Predominantly the population around Tok is Athabaskan and the program is very centered on traditional Athabaskan values that apply to raising a young child. There is little employment in the winter months and families rely on welfare and subsistence hunting to survive. As well as almost zero employment in the long winter there are also other problems with alcohol and substance abuse.

This vibrant program takes toys and activities to families in their own homes. I work with the parents to help them understand what the young child is learning, what to expect next and ways that they can enhance the development and positive interactions they have with the child. We have a strong literary component and I have been writing books in the Athabaskan language for our families to use. These have been well received and add another depth to the quality of our services.

My program is fully enrolled and I have a waiting list. Due to the high unemployment we have a high number of fathers attend the visits I conduct at in homes. Parents truly embrace the opportunity to learn more about their developing child and I can see them making life changing choices about their problems and perspective on life.

Fathers are stepping up to fulfill the parenting role so needed. My fathers are reading more to their children, getting involved in group activities and joining in with the sessions we have. This is a wonderful outcome for families in my region.

Not only fathers benefit, I see teenagers who are developing parenting skills, support a grandmother who is raising her small granddaughter, one of my younger mothers who is a convicted felon is changing her life around and volunteering in my program to clean toys. There are so many stories.

Please come to Tok/ Tanacross and Tetlin to see how my families are doing. I am sure you will see the wonderful benefits that I am seeing with the work I am doing to engage families of young children. Please support the vital work being carried out to assist all Alaskans in this remote area of the interior. Early childhood work is highly valued and well utilized in the Tok region of our state.

Yours sincerely

Jane Teague,

Parent Educator for Tok, Tanacross & Tetlin, PO Box 391 Tok AK 99780

TO: Whom It May Concern
FROM: Gerald Pickner, Principal Stebbins School
DATE: 2/15/2011
RE: Parents as Teachers Program

It is my pleasure to be given an opportunity to show support for the Parents As Teachers program.

The program provides for a great deal of contact time with parents of our pre school age children and their parents. The work that they do in regards to the children of our community is developmentally appropriate activities and the support and direction they give to new parents is excellent.

Their efforts, to engage parents in the parenting process, is noted as a significant - accomplishment. They have worked hand in hand with the school on several occasions to assist students that are about to have children prepare for the rigors of becoming a parent. Their effort in this regard has shown successes and continues to be a positive first steps approach to future parenting.

This program is needed in our village and is developing into a quality program more each day. I cannot speak highly enough of the program and the Tukurngailnguk School in Stebbins, Alaska is proud to be in partnership with the **"Parents As Teachers"** organization.

With Respect,

Gerald Pickner

Senator Al Kookesh
State Capitol, Room 11
Juneau, Alaska 99801

Dear Senator Kookesh:

Hydaburg Cooperative Association would like to express our support for the PAT (Parents As Teachers) Program in Hydaburg, Alaska. This program has been very helpful and successful since there is no Head Start Program in Hydaburg. The students show how much they've learned at the end of their year and during programs for special occasions such as Thanksgiving/Hydaburg's Birthday.

The PAT Program has been a positive place for young children. The children are our future and deserve all they help they can be given. Your help to keep this program going will help greatly.

If you have any questions please don't hesitate to call. Thank you.

Sincerely,

Doreen Witwer
Tribal Administrator

Kake City School District

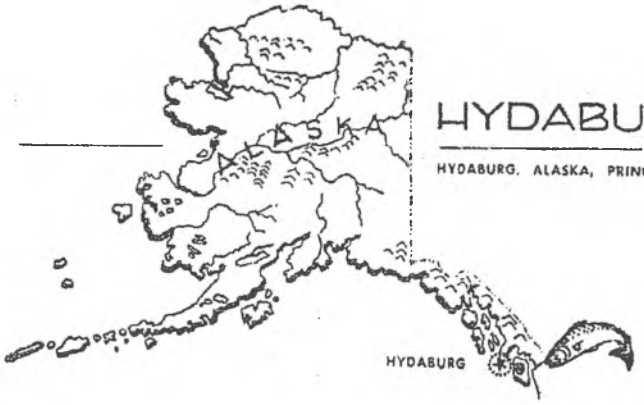
Superintendent

Re: Parents as teachers

Please accept this correspondence as a letter of support for future funding for the Parents as Teacher's program. In Kake, because of our high poverty we have a definite need to continue this program. The Parents as Teacher coordinator for the city of Kake has done an outstanding job educating parents in the importance of early childhood development. She has provided materials, specific outcomes for parents on recommended learning growth models and provides time for developmental games as well as giving parents real life examples for parents of meeting the needs of their children.

We have seen a difference is the student's academic achievement and are able to pin point individual student needs at an earlier age.

Again if there is anything you need from me for the support of this program don't hesitate to ask.



HYDABURG CITY SCHOOL

HYDABURG, ALASKA, PRINCE OF WALES ISLAND 99922

February 17, 2011

Dear Senator Albert Kookesh:

It is a pleasure to be writing a letter of support for the Parents As Teachers (PAT) program in Hydaburg. I have been involved with the program since its onset. It is an integral part of our community and an extremely valuable part of our educational system in Hydaburg.

Most of our families with children from birth through age five are comprised of parents who are themselves very young. The skills that the PAT program teaches these young parents are critical to the development of the children, the family, and ultimately, to the development of the community. We are in desperate need of the early childhood parent education and family support program designed to empower parents to give their children the best start in life that the PAT program offers us. This quality program, both center and home-based, promotes activities and opportunities to train children and their parents in the areas of speech/language, fine and gross motor, social/emotional and cognitive skills. This wonderful training has helped our children and our families to thrive!

The PAT program has a powerful relationship with the Hydaburg City School District, both at the local and administrative levels. It is an integral part of a three-way partnership including the Early Learning program, (ages birth to three). These relationships enable effective early detection of developmental delays, assessment, and individual educational program planning. The goals and objectives for our children with developmental delays are implemented collaboratively. Our children are well served with this program and their individual needs met. They gain the readiness skills necessary to transition into the kindergarten program successfully.

We are very appreciative of your support thus far and ask that you would continue to sustain this vital program in Hydaburg. Together we can continue "living, learning and growing together" to form strong children, families and community.

Most Sincerely,

Pamala Penrose
Special Education Coordinator

Senator Donald Olson
State Capitol, Room 508
Juneau, Ak 99801

Dear Senator Olson,

The Emmonak School is an enthusiastic supporter of RurAl Cap's Parents As Teachers Program. This project is aimed at providing services for families with children aged prenatal to three years old..

The PAT program helps build school readiness skills for our children and provides support for families. Since conception in 2003, Emmonak's PAT coordinator has been able to organize childrens' families and perform referrals to address domains that are delayed.

One of our schools main priorities is to prepare children for kindergarten with skills necessary for success. Research has proven (Kennewick School District, 2008) that children who are not at reading proficiency by the third grade will be challenged in school the remainder of their educational career. Students who are delayed in reading have a high correlation to "at risk behaviors" and high frequency of not completing high school.

Continued funding for this valuable program is highly recommended.

We look forward to collaborating on this project. Please contact us with any questions.

March 7, 2011

Representative Tuck
Alaska State Legislature
State Capitol Bldg.
4th Floor, Room 426
Juneau, AK 99801

Greetings,

This letter is on behalf of the Alaska Staff Development Network, in support of establishing state funding and coordination for Parents As Teachers programs.

Alaska Staff Development Network provides professional development for teachers across the state. On of the major areas of need is positive behavioral and remediation support for children that enter school unprepared and with undeveloped social skills.

James Heckman, a Nobel Prize-winning economist from the University of Chicago makes the case that the most cost effective way to improve schools is to support early childhood programs in his February, 2011 report "***The American Family in Black and White:***"

> *Schools do little to reduce or enlarge the gaps in skills that are present when children enter school. Parenting matters, and the true measure of child advantage and disadvantage is the quality of parenting received. A growing fraction of American children across all race and ethnic groups is being raised in dysfunctional families.*
>
> *Investment in the early lives of children in disadvantaged families will help close achievement gaps. America currently relies too much on schools and adolescent remediation strategies to solve problems that start in the preschool years. Policy should prevent rather than remediate. Voluntary, culturally sensitive support for parenting is a politically and economically palatable strategy that addresses problems common to all racial and ethnic groups.*

We urge the Alaska State Legislature to invest in proven program such as Parents As Teachers to ensure more children are ready to succeed by the time they enter school.

Sincerely,

JKTonsmeire

PARTNERSHIPS for families & children

March 2, 2011

Representative Tuck,

This letter is in support of establishing funding and state coordination for existing and new Parents As Teachers programs in communities throughout Alaska.

Partnerships for Families and Children is a Best Beginnings Partnership. The coalition of over 16 organizations meets throughout the year to coordinate outreach to families, address gaps in services, and increase public awareness and support of young children and families.

We conducted a comprehensive needs assessment and strategic planning process to increase kindergarten readiness, strengthen families, and increase the healthy development of young children. One of the top priorities identified during this two year community wide process is to establish a Parents As Teachers option for Juneau families.

We strongly believe this "gold standard" heavily evaluated program will move us toward all three of our goals. The Parents As Teachers program is effective in increased school readiness, reducing stress and isolation in families, and connecting families to resources to support healthy development such as vision, hearing, and developmental screenings.

Thank you for your foresight and vision in supporting implementation of Parents As Teachers in Alaska.

Carolyn Garcia
Program Associate
Partnership for Families and Children

Mission Statement: Partnerships for families and children works collaboratively to promote shared broad-based community support for young children and their families.

thread connecting early care & education to alaska

March 2, 2011

Representative Tuck
Alaska State Legislature

March 2, 2011

Representative Tuck,

We have been talking about the need for a Parents as Teachers program in Juneau for over ten years. Though we are experienced grant writers, in order to start a program, there needs to be some level of sustainability beyond a two year foundation grant cycle that will then be looking to fund another new innovative project, rather than continuation funds for a proven program. Support from the State of Alaska would allow us to proceed with confidence in securing additional funds to administer a long term successful high impact program.

This letter is in support of establishing funding and state coordination for existing and new Parents as Teachers programs in communities throughout Alaska.

AEYC Southeast Alaska is part of the thread Child Care Resource and Referral Network, serving early care and learning programs and assisting parents in finding child care in order to work. We are also the lead agency in our Best Beginnings Partnership, and coordinate the Dolly Parton Imagination Library in Southeast Alaska.

AEYC Southeast Alaska offers parent education and family literacy events throughout the year, and we produce a monthly bulletin which is distributed to over 1,000 families with young children in Juneau. We have the structure in place to further engage parents in serving as the first and most important teachers for their children.

We were encouraged that the Alaska House of Representatives passed legislation last year to implement a Parents as Teachers program in Alaska, and appreciate your continued support in working toward this highly effective approach to strengthening families and promoting kindergarten readiness.

Joy Lyon, M.A.

Executive Director
