(E) an employer that makes enrollment in qualified health plans available to its employees through the small business health options program exchange and that would cease to be a small employer because of an increase in the number of its employees, shall continue to be treated as a small employer for purposes of AS 21.54.200 - 21.54.270 as long as the employer continuously makes enrollment through the small business health options program exchange available to its employees.

* **Sec. 3.** AS 39.25.120(c) is amended by adding a new paragraph to read:

(22) the executive director and employees of the Alaska Health Benefit Exchange Board employed under AS 21.54.210(j).

* **Sec. 4.** AS 39.50.200(a)(9) is amended to read:

(9) "public official" means

(A) a judicial officer;

(B) the governor or the lieutenant governor;

(C) a person hired or appointed in a department in the executive branch as

(i) the head or deputy head of the department;

(ii) the director or deputy director of a division;

(iii) a special assistant to the head of the department;

(iv) a person serving as the legislative liaison for the department;

(D) an assistant to the governor or the lieutenant governor;

(E) the chair or a member of a state commission or board;

(F) state investment officers and the state comptroller in the Department of Revenue;

(G) the chief procurement officer appointed under AS 36.30.010;

(H) the executive director of the Alaska Workforce Investment Board;

(I) each appointed or elected municipal officer; [AND]

(J) the members of the board of trustees, the executive director, and the investment officers of the Alaska Permanent Fund Corporation; **and**

(K) the executive director of the Alaska Health Benefit Exchange employed under AS 21.54.210;

* **Sec. 5.** AS 39.50.200(b) is amended by adding a new paragraph to read:

(64) the Alaska Health Benefit Exchange Board (AS 21.54.210).

* **Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITIONAL PROVISIONS. Notwithstanding AS 21.54.210(c), enacted by sec. 2 of this Act, the initial terms for members of the Alaska Health Benefit Exchange Board appointed by the governor are as follows:

(1) three members shall be appointed to serve for terms ending December 31, 2012;

(2) three members shall be appointed to serve for terms ending December 31, 2013.

* **Sec. 7.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Alaska Health Benefit Exchange Board established under AS 21.54.200, enacted by sec. 2 of this Act, and the director of insurance may adopt regulations necessary to implement their respective powers and duties created by this Act under AS 21.54.250, enacted by sec. 2 of this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before the effective date of the statutory changes.

* **Sec. 8.** Section 7 of this Act takes effect immediately under AS 01.10.070(c).

* **Sec. 9.** Except as provided in sec. 8 of this Act, this Act takes effect July 1, 2012.

ALASKA STATE LEGISLATURE

SENATOR HOLLIS FRENCH

April 1, 2011

Senator Bert Stedman
Co-Chair, Senate Finance Committee
State Capitol, Room 516
Juneau, AK 99801

Senator Stedman,

First, I would like to thank you and the other members of the Senate Finance Committee for your consideration of Senate Bill 70 on Monday, March 28. This letter addresses several questions that came up during that hearing.

What language is required to comply with federal law?

You asked which provisions of SB 70 were mandated by the Patient Protection and Affordable Care Act. What follows is a sectional analysis answering that question.

Section 1 of the legislation

The intent language in paragraphs 1 and 2 comes from section 1311(b)(1) of the PPACA.

The language in paragraphs 3-5 is not mandatory.

Section 2 of the legislation

Sec. 21.54.200 establishes the Alaska Health Benefit Exchange.

The PPACA leaves the choice of structures for the exchange – governmental agency or nonprofit – up to the states in section 1311(d)(1).

Sec. 21.54.210 establishes the Alaska Health Benefit Exchange board.

The PPACA does not mandate a particular exchange governance structure.

Senator_Hollis_French@legis.state.ak.us

Sec. 21.54.220 of the legislation relates to the duties and powers of the Alaska Health Benefit Exchange.

(a)(1) is mandated in section 1311 (b)(1)(A)

(a)(2) is mandated in section 1311(b)(1)(B)

(a)(3) is mandated in section 1311(d)(4)(C)

(a)(4) is mandated in section 1311 (c)(6)

(a)(5) is mandated in section 1311(d)(4)(C)

(a)(6) is mandated in section 1311(d)(4)(A)

(a)(7) is mandated in section 1311(d)(4)(D)

(a)(8) is mandated in section 1302(d)(2)(A)

(a)(9) is mandated in section 1311(d)(4)E)

(a)(10) is mandated in section 1311(d)(4)(F)

(a)(11) is mandated in section 1311 (d)(4)(G)

(a)(12) is mandated in section 1311(b)(1)(B)

(a)(13) is mandated in section 1311(d)(4)(H)

(a)(14) is mandated in section 1311(d)(4)(I)

(a)(15) is mandated in section 1311(d)(4)(J)

(a)(16) is mandated in section 1412(a)(1)

(a)(17) is mandated in section 1311(i)

(a)(18) is mandated in section 1311(e)(2)

(a)(19) is not mandatory

(a)(20) is mandated in section 10108(d)(2)

(a)(21) is mandated in section 1311(d)(6)

(a)(22) is not mandatory

(a)(23) is mandated in section 1313(a)

(a)(24) is mandated in part by section 1313(a)(1).

(a)(25) is mandated in section 1313(a)(2)

(a)(26) is mandated in section 1311(d)(2)(B)(ii)

(a)(27) is not mandatory

(a)(28) is not mandatory

(a)(29) is not mandatory

(b)(1) is not mandatory

(b)(2) is not mandatory

(b)(3) is not mandatory

(c) is mandated in section 1311(d)(5)

(d) is mandated in section 1312(d)(4)

Section 21.54.230 relates to Health Benefit Plan Certification.

(a)(1) is mandated by section 1302(b)(1)(J), 1302 (b)(4)(F) and 1311(d)(2)(ii)

(a)(2) is not mandatory

(a)(3) is mandated in section 1303(e), 1311(c)(3), and 1311(d)(2)

(a)(4) is mandated in section 1302(c)(1) and section 1302(c)(2)

(a)(5) is mandated in section 1301(a)(1)

(a)(6) is mandated in section 1311(c)(1)

(a)(7) is mandated in section 1311(e)(1)(B)

(b) is mandated in section 1311(e)(1)(B)(i through iii)

(c)(1) is mandated in section 1311(e)(2)

(c)(2) is mandated in 1311(e)(3)(A) and (B)

(c)(3) is mandated in 1311(e)(3)(C)

(d) is not mandatory

(e) is mandated in section 1302(b)(1)(J) and 1311(d)(2)(B)(ii)

Section 21.54.240 relates to exchange funding

(a) is mandated in section 1311(d)(5)(A)

(b) is mandated in section 1311(d)(7)

Section 21.54.250 relates to regulations; it is not mandatory

Section 21.54.260 relates to an exchange's relation to other laws; it is mandated by 1321(d)

Section 21.54.270 relates to definitions of terms used in this legislation

Section 3 of the legislation

The PPACA does not mandate the classification of employees in the partial exempt service

Section 4 of the legislation

The PPACA does not mandate that an Exchange's Executive Director is defined as a public official

Section 5 of the legislation

The PPACA does not mandate the exchange governance structure.

Section 6 of the legislation

The PPACA does not mandate the exchange governance structure, or the transitional provisions in this section given the bill's selection of board governance.

Section 7 of the legislation

The PPACA does not require states to grant regulatory authority.

Section 8-10 of the legislation relate to effective dates

The PPACA requires HHS to make a determination on Jan 1, 2013 regarding a state's exchange implementation status. Sec. 10 of the legislation fully implements the exchange starting on July 1, 2012, to ensure 6 months of operation prior to this federal determination, but the specific July 1, 2012 effective date is not mandated by the PPACA.

IHS Recipients

Senator Olson asked how this legislation would affect Indian Health Service (IHS) recipients. As mentioned during the March 28 hearing, health reform considers IHS coverage as benefits which satisfy the requirement to have insurance, so no penalty will be assessed if a beneficiary doesn't carry private insurance coverage. However, participation in the exchange – whether to acquire private health coverage, or get connected with other public programs, like Medicaid – will be an option for IHS beneficiaries.

If an IHS recipient chooses to purchase health insurance through the exchange, the individual is entitled to free medical services - without cost sharing or copayment requirements - if the recipient's household income falls below 300% of the poverty line. While the poverty line is adjusted annually, this year, for a family of four in Alaska, that level of income is $83,000.

During the committee meeting the exchange's enrollment periods were discussed, and it was put on the record that most Alaskans can buy or switch health insurance policies once per year. For IHS recipients, monthly open enrollment periods allow beneficiaries to more readily access health insurance policies, to supplement medical services provided by the Indian Health Service.

In closing, health programs operated by the Indian Health Service, Indian tribes, tribal organizations and Urban Indian organizations are the payer of last resort for services provided through those programs, when private coverage is also carried by an individual. The effect of this provision in the Affordable Care Act will bring needed funds into the IHS system when beneficiaries carry additional coverage, helping to finance health benefits provided to program recipients, while giving added flexibility for IHS beneficiaries.

Uncompensated Care in Alaska

Senator Thomas asked about the quantity of uncompensated care delivered in Alaska each year, to individuals who cannot pay for the care they receive. According to Families USA, total uncompensated health care delivered in Alaska to the uninsured amounted to $174.7 million during 2010. This is up from $124.8 million in 2005, demonstrating that our problem has been growing.

The dollar amounts are calculated based on the average payout for the uncompensated medical services provided, if private insurance had paid the bill.

Families USA is a national nonprofit, non-partisan organization dedicated to the achievement of high-quality, affordable health care for all Americans. For more information, the report can be accessed at this address:

http://www.familiesusa.org/assets/pdfs/Paying_a_Premium_rev_July_13731e.pdf

Dental Coverage

Senator McGuire asked about dental benefits under the Alaska Health Benefit Exchange.

In general, children's oral health benefits will be required as part of an essential health benefit package.

For adults, exchanges have to allow stand-alone dental plans within the exchange. However, these dental policies don't have to meet the actuarial levels as defined for health benefit plans.

To help consumers understand what they can expect from a health plan they select, exchange policies will be ranked by 'actuarial value' within the exchange. Actuarial value is defined as the percentage of total health costs, on average, that a policy will cover for any individual, taking into account all cost sharing provisions under the policy. For the most basic plans, the actuarial value must be greater than 60%, or otherwise the policy will be considered 'catastrophic' coverage. Dental benefits won't be categorized or judged by these standards.

The legislation doesn't currently require dental coverage for adults as a mandated health benefit. States do have an option of mandating benefits beyond the federal essential benefit package, but if they choose to do so, the state will be responsible for the cost of the additional benefit.

Opting Out of Health Reform

Senator McGuire asked about the federal requirement to have health coverage. While the question seemed more philosophical rather than logistical, I'd like to provide additional details about the Exchange's role in the 'opt-out' process.

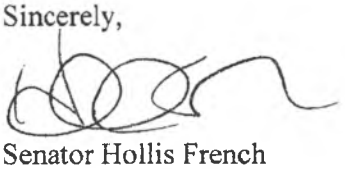
The requirement that all Americans acquire some form of health coverage, with few exceptions, was passed by Congress in the Affordable Care Act. Starting in 2014, financial penalties will be assessed if individuals don't meet that requirement. Senate Bill 70 doesn't change this provision. However, the exchange does have an important role relating to a few 'opt-out' provisions, provided for under federal law.

The penalty for not having health insurance won't be levied if a person is part of a religion opposed to acceptance of benefits from a health insurance policy. Incarcerated individuals and individuals/families that earn less than the threshold where an income tax return must be filed will be exempted. Finally, anyone who will have to pay more than 8% of income for health insurance – after taking into account employer contributions and tax credits to make coverage affordable – will be exempt from the requirement to have health coverage. The health exchange will be charged with administering these exemptions in Alaska.

Those covered by Medicaid, S-CHIP programs, Medicare, TRICARE, or employer provided health insurance will be considered 'insured' for the purposes of the Affordable Care Act, as well, in addition to IHS beneficiaries, as described above.

Regional Exchanges

Senator Hoffman asked during the March 28 hearing about regional health insurance exchanges, and whether they were considered when crafting the legislation. The Affordable Care Act specifically allows for the creation of regional health exchanges, under Sec. 1311(f)(1).



The act requires member states of any regional exchange to consent to such an arrangement, and would require all member states to pass enabling legislation.

A regional exchange, while potentially lowering costs, has added complexities when compared to a state based exchange. In addition to finding partner states who can agree on terms and conditions with Alaska, member states would have to come up with a regional structure that still honors state consumer protection laws, state dispute resolution practices, state mandated benefits, and state insurance oversight, all responsibilities that individual states continue to hold under the Affordable Care Act.

In short, a regional exchange was ruled out by my office during initial drafting of Senate Bill 70 as we felt it required action from the executive branch, which wasn't occurring at the time.

Thank you for consideration of the legislation, and don't hesitate to contact my office if additional questions come to mind.

Sincerely,

Senator Hollis French

Senator Hollis French

Sponsor Statement

SB 70 – Alaska Health Benefit Exchange

Competition improves quality, lowers cost and gives consumers a meaningful choice. The Alaska Health Benefit Exchange will make private health insurance companies more responsive to health care consumers in Alaska.

Buying health insurance can be difficult and complicated. This legislation helps consumers identify and enroll in a health insurance policy that will serve them well, regardless of what their future holds.

The Exchange will promote competition among plans by providing information to consumers on a leveled playing field. Today, individuals shopping for airline tickets can log onto the internet and in minutes view competing itineraries, sorted by route, schedule, carrier and price. In this same way, the web based portal created by this bill will allow health insurance consumers to compare carriers, cost-sharing, benefit design, and premium costs of different plans, all in a manner of minutes.

The legislation helps make health coverage affordable for Alaskans. The exchange will determine eligibility for health insurance tax credits, cost-sharing assistance, and medical assistance programs like Medicaid. Through the Small Business Health Options Program (SHOP), the exchange will connect small businesses with tax incentives and an insurance pooling mechanism, which can stabilize premiums and make coverage more affordable. Finally, the exchange establishes the mechanism to exempt people from the requirement to have health coverage, if affordable insurance products aren't available.

An exchange can open the door to innovative ways that keep health care costs down. For years, the idea of buying and selling health insurance across state lines has been cited as a competitive response to small insurance pools. This legislation will ask the Exchange board to consider interstate compacts, and if one makes sense for Alaskans, legislation can be proposed to make it happen.

Forty-nine other states are working towards the establishment of an exchange, and while other elements of health reform are controversial, the exchange idea is championed by Governors of both parties - even by those who are suing the federal government to stop reform.

"State exchanges are good from a conservative standpoint because they involve consumer choice and markets," said former US Senate Majority Leader Bill Frist, a Tennessee Republican, in an Associated Press article (1/22/11). "Each state can develop the exchange that best meets the needs of their people."

Finally, this legislation is Alaska's chance to create a health insurance exchange on our own terms. By 2014, the state is required to have a consumer-centered exchange that makes buying health insurance easier for individuals and small businesses. If we don't act now, the federal government will create and impose an exchange on us.

Please join me in supporting an Alaskan-based solution which puts Alaskans first.

Alaska State Legislature

Senator Hollis French

SB 70 – Explanation of Changes

The following changes were made in the Senate Labor and Commerce Committee:

- On page 2 of the CS, the legislation reworks the Exchange board. It replaces the original board of 13 voting members with a board of 7 voting members.

  Members of the board include:
  - HSS Commissioner, or their designee
  - A representative of small employers
  - A representative of the health care insurance business
  - A member with expertise in health plan financing
  - A member with expertise in health plan administration
  - A health care actuary, or someone with similar economic experience
  - A consumer representative

  In addition, the director of the Division of Insurance acts as a non-voting member.

- On Page 3 of the CS, new subsection (i) confirms that board members won't be civilly or criminally liable for an act or omission, if it was within the scope of the board member's duties and was done in good faith

- On Page 3 lines 18-20 *of the original draft,* (a)1 and (a)2 had some overlap. The new CS on page 3 only retains a(2), and as a result, renumbers (a)1 through (a)22.

- Page 3 line 31 – Page 4 line 4 require the Division of Insurance to implement procedures relating to health plan certification, recertification and decertification. Before, this was a responsibility of the Exchange board.

- Page 4 lines 5-9 require the Division of Insurance to rate each qualified health plan. Before, this was a responsibility of the Exchange board.

- Page 4 lines 10-14 require the Division of Insurance to determine the level of each qualifying plan. Before, this was a responsibility of the Exchange board.

- Page 6 lines 13-17 places the Navigator grant program under the Division of Insurance. Before, this program was a responsibility of the Exchange board.

- On page 6 line 26-28, the legislation directs complaints about health benefit plans to the Division of Insurance, and not the federal government like the old draft.

- Page 7 lines 1-4 require the Division of Insurance to review the rate of premium growth inside and outside the exchange, and to provide recommendations whether to expand the size of employers who can use the exchange. Before, this was a responsibility of the Exchange board.

- Page 7 lines 5-8 requires the Division of Insurance to develop policies and procedures to minimize adverse selection within the exchange, and between plans sold inside and outside the exchange. Before, this was a responsibility of the Exchange board.

- Page 7 lines 26-29 gives the board the authority to establish advisory groups to provide expertise and input about exchange operations. It doesn't specify the makeup of these advisory groups.

- Page 8 lines 1 – 13 establishes a new annual accounting report. The report reviews new enrollment, changes in enrollment, tax credits, and individual responsibility exemptions, broken down by insurer by benefit plan where applicable.

- Page 8 lines 14-23 now requires the exchange to cooperate with an investigation by the Division of Insurance. The legislation still requires cooperation with federal investigations.

- Page 9 lines 2-5 states that the exchange will rely on the Division of Insurance's determination relating to the potential for interstate compacts. The division will recommend particular compact arrangements for legislative approval.

- Page 9 lines 6-28 requires the exchange board to establish a plan of operation, which is reviewed and approved by the director of the Division of Insurance. If a suitable plan isn't developed, this new subsection allows for the director to adopt reasonable regulations to carry out the responsibilities of the exchange.

- Page 10, lines 10-12 requires public disclosure of grants or donations applied for or received by the exchange within 30 days of the application or receipt of funds, whichever is applicable.

- Page 14 lines 18-21 have been changed to clarify that user fees from health care insurers offering health benefit plans will be relied upon to finance the exchange.

- Page 14 lines 26-31 have been changed to give the Division of Insurance authority to adopt regulations to implement their authority under the legislation.

- Page 19 lines 26-31 have been changed in the section relating to transition regulations. The change gives the director of the Division of Insurance the ability to adopt regulations, but makes it clear that any regulations won't be in effect until the effective date of statutory changes.

- Page 20 line 1 has been modified to make the transitional provisions related to board terms effective on July 1, 2011. Before, the bill gave those transitional provisions an immediate effective date.

For more information about these changes, contact Andy Moderow in Senator French's office at 907-465-3892.

Section by Section Summary of SB 70 *3/23/11- Corresponds with version \I*

Below is a description of key components, section by section, in Senate Bill 70.

***Section 1** of the legislation, found on page 1 through page 2 line 5, provides intent language for this legislation.* It highlights the importance of **connecting individuals and small businesses with quality health insurance policies,** to **reduce the number of uninsured Alaskans.**

***Section 2** of the legislation, found on page 2 line 6 through page 18 line 14, establishes the Alaska Health Benefit Exchange.*

Section 21.54.200 (page 2 lines 8-11) sets up the health benefit exchange as a public corporation of the state, much like the permanent fund corporation.

Section 21.51.210 (Page 2 line 12 through Page 3 line 16) establishes the board which will manage the Alaska Health Benefit Exchange. The board consists of 8 members, with 7 voting members. The Commissioner of Health and Social Services, or their designee, will serve on the committee ex officio, and the Director of the Division of Insurance will hold a non-voting seat.

The remaining language in this section lays out disclosure requirements, procedures in case of a vacancy, and other technical aspects of the board. In addition, it authorizes the board to hire an Executive Director, who can hire staff to implement this legislation.

Section 21.54.220 (Page 3 line 17 to Page 10 line 21) outlines the powers and duties of the Alaska Health Benefit exchange.

(a)1 outlines the primary duty of the exchange, which is **to facilitate the purchase and sale of qualified health plans.** (Definitions of qualified individuals, employers and plans can be found on pages 15 and 16 of this bill.)

(a)2 and (a)12 both establish the **Small Business Health Options Program** (known as SHOP), which connects employees of small business with health coverage in a new 'pool.' In addition, SHOP connects small businesses that offer health coverage to employees with tax credits.

(a)3 provides for a **telephone call center to assist individuals.**

(a)4 requires that 'enrollment periods' are held annually to facilitate the changing of health insurance policies. These **open enrollment periods encourage competition** and allow individuals to move from one plan to another while reducing the potential for 'adverse selection.'

(a)5 provides for the **creation of an internet marketplace** to connect individuals with health insurance coverage.

(a)6 provides for certification and decertification of health plans sold through the exchange.

(a)7 and (a)8 requires the exchange to **compare health plans on metrics of quality and price**.

(a)9 requires the exchange to use a **standardized format of presenting health benefit options** in the exchange, to assist consumers with comparing products.

(a)10 requires the exchange to **determine potential eligibility for state or local medical assistance programs, such as Medicaid and Denali KidCare**. If qualified, **the exchange will assist with the enrollment process**.

(a)11 establishes a **tax credit calculator** to help individuals know the cost of health coverage, after assistance is applied.

(a)13 requires that **the exchange exempts Alaskans from the requirement to retain health insurance if certain criteria is met**. As an example, these exemptions will occur when an affordable insurance policy isn't available to an individual, after tax credits are applied.

(a)(14)(A) shares information about individuals exempted from the health insurance requirement. (a)(14)(B) shares information about employees who aren't offered affordable health coverage through employment. (a)(14)(C) shares information about employees who cease to have employer coverage due to a change in employment.

(a)15 notifies an employer when an employee receives premium assistance from the government, either because the employer doesn't offer a plan, or offers a plan which doesn't meet minimum standards or is unaffordable.

(a)16 explicitly states that the exchange will assist consumers by determining **eligibility for premium tax credits, reduced-cost sharing, or exemptions from the insurance mandate**.

(a)17 sets up the framework for **Navigator Grants**. These grants can be pursued by most organizations or trade groups for the purposes of helping the exchange fulfill its goals. **Navigator duties include enrollment assistance, information sharing, and assistance with dispute resolution.**

(a)18 requires the Division of Insurance to consider the rate of premium growth within and outside the exchange, in an effort to **evaluate the effect and benefit of incorporating larger employers within SHOP exchange**.

(a)19 asks the Division of Insurance to develop policy and procedures that **minimize adverse selection,** both inside the exchange and between plans sold within and outside the exchange.

(a)20 requires the exchange to provide credit for any **'free choice voucher' that an employer provides an employee for the purpose of covering premium costs.**

(a)21 requires the exchange to **consult with stakeholders.**

(a)22 allows the exchange to establish one or more advisory groups, to provide input into exchange operations.

(a)23 **outlines accounting requirements,** and (a)24 requires an annual accounting report to be submitted to federal and state stakeholders. (a)25 allows for cooperation with any investigation or audit by the Division of Insurance or Secretary of Health and Human Services.

(a)26 allows a health insurer to offer a limited dental plan as part of a qualified health plan, so long as pediatric dental benefits are included.

(a)27 requires the exchange to apply for planning and establishment grants for the Exchange. **Grants of up to $1 million have been awarded to each of 48 states** to date for planning.

(a)28 requests that the Division of Insurance offer recommendations about **potential interstate compacts that would permit the sale and purchase of health insurance across state lines.**

(a)29 requires that the Exchange board establish a plan of operation, and submit it to the director of the Division of Insurance for approval.

Proposed subsection (b)1, found on page 9 line 29, allows the exchange to contract out some of the responsibilities outlined in this legislation.

Proposed subsection (b)2 allows the exchange to share information with federal and state agencies, provided that confidentiality protections consistent with state and federal laws are upheld.

Proposed subsection (b)3 allows the exchange to receive grants to finance operations, and it requires prompt disclosure of any financial contributions.

Proposed subsection (c) prohibits certain expenses to keep costs down for consumers.

Subsection (d) ensures individuals won't be penalized if they change coverage because they are newly eligible for that coverage, or if employer sponsored coverage becomes affordable.

Proposed Section 21.54.230 of the legislation, found on page 10 line 22 through page 14 line 15, relates to health plan certification.

Subsection (a) outlines requirements of a qualified health plan, and the insurers offering such plans.

(a)(1) allows flexibility for an insurer to include or not include adult dental benefits, so long as one supplemental dental plan is included within the exchange.

(a)(2) requires that premium rates and plan language are approved.

(a)(3) requires plans to meet certain **quality guidelines in terms of the actuarial value** to a consumer, except in instances where catastrophic plans are sufficient to protect an individual from financial hardship.

(a)(4) meets **cost sharing and deductible assistance requirements** which protect consumers.

(a)(5) and (a)(6) require that an insurer in the exchange offer plans which meet certain quality metrics, and that they charge the **same rates for similar policies inside and outside the exchange**.

(a)(7) requires the exchange to determine that making the plan available through the exchange **is in the interest of employers and individuals**.

Subsection (b) specifies that an exchange cannot exclude a plan because it is fee-for-service, through price controls, or because a plan pays for lifesaving treatments.

Subsection (c)(1) **requires an insurer to justify any premium increase** prior to implementing the premium increase. This justification must be shared with the public, and the exchange will consider these premium increases when determining whether to certify plans.

Subsection (c)2 and (c)3 requires insurers to **provide the public with fiscal, claim, rating, and enrollment data**, in instances when disclosure is consistent with privacy laws. It requires insurers to release cost data, including cost sharing paid by the consumer, for a specific item or service under a health insurance policy.

Subsection (d) makes it clear that state insurance laws regarding solvency and licensing are still applicable to plans within the exchange, and that insurers are treated equally.

Subsection (e) relates to dental benefits under the law, and the flexibility of plans under reform in this area.

Proposed section 21.54.240, found on page 14 lines 16-23, relates to exchange funding. It requires the **exchange to finance itself after being established,** and requires this funding to come from insurers who offer health benefit plans through the exchange. The cost of this financing must be disclosed on the exchange website.

Proposed section 21.54.250, found on page 14 lines 24-29, allows the exchange board and Division of Insurance to adopt regulations.

Proposed section 21.54.260, found on page 14 line 30 to page 15 line 5, requires insurers to honor state health insurance laws as established.

Section 21.54.270, found on page 15 line 6 through page 18 line 14, provide definitions of some terms used in this act.

Section 3 of the legislation, found on page 18 lines 15-17, adds employees of the exchange to the list of partially exempt service.

Section 4 of the legislation, on page 18 line 18 through page 19 line 10, defines the Executive Director of the exchange as a public official.

Section 5 of the legislation, on page 19 lines 11-12, adds the Alaska Health Benefit Exchange Board to the list of state commissions or boards.

Section 6 of the legislation, on page 19 lines 13-21, outlines transitional provisions relating to board terms.

Section 7 of the legislation, on page 19 lines 22-29, gives the ability to draft regulations to the Exchange board and Division of Insurance, under the Administrative Procedure Act, though regulations won't take effect until the effective date of statutory changes.

Sections 8 of the legislation, on page 19 lines 30-31, provides for a July 1, 2011 effective date for the exchange board, the duties of the board, and the board's ability to make regulations.

Section 9 of the legislation, on page 20 line 1, make certain transitional provisions effective immediately.

Section 10 of the legislation, on page 20 line 2, makes the remainder of the act effective on July 1, 2012. This is when health plan certification would begin under the legislation.

CS FOR SENATE BILL NO. 70(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS FRENCH, Davis, Ellis

A BILL

FOR AN ACT ENTITLED

"An Act establishing the Alaska Health Benefit Exchange; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTENT. It is the intent of the legislature in this Act

(1) to facilitate the purchase and sale of qualified health plans in the individual market in this state;

(2) to establish a small business health options program exchange to assist qualified small employers in the state in enrolling employees in qualified health plans offered in the small group market;

(3) to provide consumer education and assist individuals with access to programs, credits, and cost-sharing reductions;

(4) to reduce the number of uninsured Alaskans by creating an organized,

transparent, and easy-to-navigate health insurance marketplace that offers a choice of high value health plans with low administrative costs for individuals and employers; and

(5) that the Alaska Health Benefit Exchange Board recommend to the legislature and the Office of the Governor methods to keep premium costs low and risk pools strong in the health insurance market place.

*** Sec. 2.** AS 21.54 is amended by adding new sections to read:

Article 2A. Alaska Health Benefit Exchange.

Sec. 21.54.200. Alaska Health Benefit Exchange. The Alaska Health Benefit Exchange is established as a public corporation of the state in the Department of Commerce, Community, and Economic Development but with separate and independent legal existence.

Sec. 21.54.210. Alaska Health Benefit Exchange Board. (a) The Alaska Health Benefit Exchange Board is established to manage the exchange.

(b) The board consists of eight members, including six members appointed by the governor, the commissioner of health and social services or the commissioner's designee, serving ex officio, and the director, serving ex officio, without the power to vote. The members of the board appointed by the governor are

(1) a representative of small business employers;

(2) a representative of the health care insurance business;

(3) a person with expertise in health plan finance;

(4) a person with expertise in health plan administration;

(5) an actuary or a person with a background in health care actuarial or economic principles; and

(6) a health care consumer representative.

(c) Except for the commissioner or the commissioner's designee and the director, who serve ex officio, each board member serves for a term of three years beginning on January 1 and until a successor has been appointed. A member is eligible for reappointment.

(d) The board shall select a member to serve as chair and a member to serve as vice-chair for a term and with duties and powers necessary to perform their functions.

(e) A majority of the board constitutes a quorum for transacting business.

(f) If a vacancy occurs, the governor shall make an appointment, effective immediately, for the balance of the unexpired term.

(g) Board members and the executive director hired under (j) of this section shall comply with the requirements of AS 39.50 (public official financial disclosure) and shall disclose an affiliation with an insurer, agent, broker, or other representative of an insurer, a health care provider, or a health care facility.

(h) Members of the board are entitled to per diem and transportation costs under AS 39.20.180.

(i) A member of the board of directors of the exchange may not be held civilly or criminally liable for an act or omission if the act or omission was in good faith and within the scope of the director's duties.

(j) The board shall employ an executive director to administer the exchange. The executive director shall perform duties as prescribed by the board and may employ a staff to assist in the performance of the duties of the executive director. The executive director and staff employed under this subsection are in the partially exempt service under AS 39.25.120.

Sec. 21.54.220. Duties and powers of the Alaska Health Benefit Exchange; limitation. (a) The Alaska Health Benefit Exchange Board shall

(1) facilitate the purchase and sale of qualified health plans;

(2) establish a small business health options program exchange to assist qualified small employers in the state in enrolling employees in a qualified health plan;

(3) provide for the operation of a toll-free telephone hotline to respond to requests for assistance;

(4) provide for enrollment periods under sec. 1311(c)(6), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(5) maintain an Internet website through which enrollees and prospective enrollees of qualified health plans may obtain standardized comparative information on those plans;

(6) implement procedures for the certification, recertification, and

decertification of qualified health plans according to the determination of the division consistent with guidelines developed by the United States Secretary of Health and Human Services under sec. 1311(c), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(7) assign a rating to each qualified health plan offered through the exchange according to the determination of the division in accordance with the criteria developed by the United States Secretary of Health and Human Services under sec. 1311(c)(3), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(8) determine the level of coverage of each qualified health plan according to the determination of the division under regulations issued by the United States Secretary of Health and Human Services under sec. 1302(d)(2)(A), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(9) use a standardized format for presenting health benefit options in the exchange, including the use of the uniform outline of coverage established under 42 U.S.C. 300gg et seq. (sec. 2715, Part A, subpart II, title XXVII, Public Health Service Act);

(10) in accordance with sec. 1413, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, inform individuals of title XIX, Social Security Act eligibility requirements for the Medicaid program under 42 U.S.C. 1396 - 1396w-2, the Children's Health Insurance Program under 42 U.S.C. 1397aa - 1397mm (title XXI of the Social Security Act), or any applicable state or local public program; and, if the exchange determines that any individual is eligible for a program, enroll that individual in that program;

(11) establish and make available by electronic means a calculator to determine the actual cost of coverage after application of any premium tax credit under 26 U.S.C. 36B (Internal Revenue Code of 1986), and any cost-sharing reduction under sec. 1402, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(12) establish a small business health options program exchange

through which qualified employers may access coverage for their employees and which shall enable a qualified employer to specify a level of coverage so that any of its employees may enroll in any qualified health plan offered through the small business health options program exchange at the specified level of coverage;

(13) subject to sec. 1411, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, grant a certification attesting that, for purposes of the individual responsibility penalty under 26 U.S.C. 5000A (Internal Revenue Code of 1986), an individual is exempt from the individual responsibility requirement or from the penalty imposed by that section because

(A) an affordable qualified health plan covering the individual is not available through the exchange or through the individual's employer; or

(B) the individual meets the requirements for another exemption from the individual responsibility requirement or penalty;

(14) provide the following information to the United States Secretary of the Treasury:

(A) the name and taxpayer identification number of each individual issued a certification under (13) of this subsection;

(B) the name and taxpayer identification number of each individual who was an employee but who was determined to be eligible for the premium tax credit under 26 U.S.C. 36B (Internal Revenue Code of 1986) because

(i) the employer did not provide minimum essential coverage; or

(ii) the employer provided the minimum essential coverage, but it was determined under 26 U.S.C. 36B(c)(2)(C) (Internal Revenue Code of 1986), to be unaffordable to the employee or not to provide the required minimum actuarial value; and

(C) the name and taxpayer identification number of each individual who

(i) notifies the exchange under sec. 1411(b)(4), P.L.

111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, that the individual has changed employers; and

(ii) ceases coverage under a qualified health plan during a plan year and the effective date of that cessation;

(15) provide to each employer the name of each employee of the employer described in (14)(B) of this subsection who ceases coverage under a qualified health plan during a plan year and the effective date of the cessation;

(16) perform duties required of the exchange by the United States Secretary of Health and Human Services or the United States Secretary of the Treasury related to determining eligibility for premium tax credits, reduced cost-sharing, or individual responsibility requirement exemptions;

(17) select entities qualified to serve as navigators as determined by the division in accordance with sec. 1311(i), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and standards developed by the United States Secretary of Health and Human Services and award grants to enable navigators to

(A) conduct public education activities to raise awareness of the availability of qualified health plans;

(B) distribute fair and impartial information concerning enrollment in qualified health plans, the availability of premium tax credits under 26 U.S.C. 36B (Internal Revenue Code of 1986), and the availability of cost-sharing reductions under sec. 1402, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(C) facilitate enrollment in qualified health plans;

(D) provide referrals to the division for consumer assistance for a person with a grievance, complaint, or question regarding the person's health benefit plan or coverage, or a determination under that plan or coverage; and

(E) provide information in a manner that is culturally and linguistically appropriate to the needs of the population being served by the exchange;

(18) review the rate of premium growth within the exchange and outside the exchange as determined by the division and rely on the information developed by the division on whether to continue limiting qualified employer status to small employers;

(19) rely on policies and procedures developed by the division to minimize adverse selection among plans sold within the exchange and review policies within the exchange and outside the exchange to monitor the effect of adverse selection between the two marketplaces;

(20) credit the amount of any free choice voucher to the monthly premium of the plan in which a qualified employee is enrolled, in accordance with sec. 10108, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and collect the amount credited from the offering employer;

(21) consult with persons having an interest in the activities of the exchange, including

(A) health care insurers;

(B) health care consumers who are enrollees in qualified health plans;

(C) individuals and entities with experience in facilitating enrollment in qualified health plans;

(D) representatives of small businesses and self-employed individuals;

(E) the division in the Department of Health and Social Services responsible for administering Medicaid; and

(F) advocates for enrolling hard-to-reach populations;

(22) establish one or more advisory groups to consult with the board to provide expertise on and input into operations of the exchange; the membership of an advisory group may include health care providers, hospitals, and persons identified in (21) of this subsection;

(23) maintain an accurate accounting of all activities, receipts, and expenditures;

(24) submit an annual accounting report to the United States Secretary of Health and Human Services, the governor, the director and the legislature; the report must include the following information described by insurer by benefit plan:

(A) the number of covered persons;

(B) the number of covered persons receiving free choice vouchers and the amount of free choice vouchers credited;

(C) the number of individuals exempted from individual responsibility requirements by reason;

(D) the number of individuals eligible for premium tax credit;

(E) the number of employees who terminated coverage and the number of individuals obtaining coverage through the exchange who were covered under an employer health plan in the preceding six months; and

(F) other data specified by the director;

(25) cooperate with an investigation conducted by the division or the United States Secretary of Health and Human Services under the Secretary's authority under P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and allow the division or the Secretary, in coordination with the Inspector General of the United States Department of Health and Human Services, to

(A) investigate the affairs of the exchange;

(B) examine the properties and records of the exchange;

(C) require periodic reports in relation to the activities undertaken by the exchange;

(26) allow a health care insurer to offer a plan that provides limited scope dental benefits under 26 U.S.C. 9832(c)(2)(A) (Internal Revenue Code of 1986), through the exchange, either separately or in conjunction with a qualified health plan, if the plan provides pediatric dental benefits under sec. 1302(b)(1)(J), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(27) apply for planning and establishment grants made available to the exchange under sec. 1311, P.L. 111-148 (Patient Protection and Affordable Care Act),

as amended, and regulations adopted under that Act;

(28) rely on the division's determination relating to the potential for interstate compacts that would permit the sale and purchase of health care insurance across state borders and recommend particular compact arrangements for legislative approval; and

(29) submit to the director a plan of operation to ensure the fair, reasonable, and equitable administration of the exchange; the plan of operation becomes effective on approval in writing by the director, subject to the following:

(A) if the exchange fails to submit a suitable plan under this paragraph, the director may adopt reasonable regulations necessary or advisable to carry out the provisions of AS 21.54.200 - AS 21.54.270; the regulations adopted by the director under this subparagraph must continue in force until modified by the director or superseded by a plan submitted by the exchange and approved by the director;

(B) the plan of operation must

(i) establish procedures for the performance of the duties and powers of the exchange;

(ii) establish procedures for handling assets of the exchange;

(iii) establish the amount and method of reimbursing members of the board of directors;

(iv) establish regular places and times for meetings of the board of directors;

(v) establish procedures for records to be kept of all financial transactions of the exchange, its agents, and the board of directors;

(vi) contain any additional provisions necessary or proper for the execution of the powers and duties of the exchange.

(b) The exchange may

(1) enter into a contract for the performance of the exchange's duties with the Department of Health and Social Services or another entity that has

experience in individual and small group health insurance or benefit administration, or other experience relevant to the responsibilities to be assumed by the entity, except that the exchange may not contract for the performance of its duties with a health care insurer or an affiliate of a health care insurer;

(2) enter into information-sharing agreements with federal and state agencies and other state exchanges to carry out its duties if the agreements include adequate protections with respect to the confidentiality of the information to be shared and comply with all state and federal laws and regulations; and

(3) apply for and receive grants or donations from federal, state, local government, foundation, or private entities; the exchange shall make records of application for or receipt of grants or donations under this paragraph available to the public on the exchange's Internet website within 30 days after application or receipt.

(c) The exchange may not use money intended for the administrative and operational expenses of the exchange for staff retreats, promotional giveaways, or excessive executive compensation.

(d) Neither the exchange nor a health care insurer offering a health benefit plan through the exchange may charge an individual a fee or penalty for termination of coverage if the individual enrolls in another type of minimum essential coverage because

(1) the individual has become newly eligible for that coverage; or

(2) the individual's employer-sponsored coverage has become affordable under the standards of 26 U.S.C. 36B(c)(2)(C) (Internal Revenue Code of 1986).

Sec. 21.54.230. Health benefit plan certification. (a) The exchange may certify a health benefit plan as a qualified health plan if

(1) the plan provides the essential health benefits described in sec. 1302(a), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, except that the plan is not required to provide essential benefits that duplicate the minimum benefits of qualified dental plans if

(A) the exchange has determined that at least one qualified dental plan is available to supplement the plan's coverage; and

(B) the health care insurer makes prominent disclosure at the time it offers the plan, in a form approved by the exchange, that the plan does not provide the full range of essential pediatric benefits, and that qualified dental plans providing those benefits and other dental benefits not covered by the plan are offered through the exchange;

(2) the premium rates and contract language have been approved by the director;

(3) the plan provides at least a bronze level of coverage under AS 21.54.220(a)(7) unless the plan is certified as a qualified catastrophic plan, meets the requirements of P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, for catastrophic plans, and will only be offered to individuals eligible for catastrophic coverage;

(4) the cost-sharing requirements of the plan do not exceed the limits established under sec. 1302(c)(1), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and, if the plan is offered through the small business health options program exchange, the deductible for the plan does not exceed the limits established under sec. 1302(c)(2), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(5) the health care insurer offering the plan

(A) is licensed and in good standing to offer health insurance coverage in the state;

(B) offers at least one qualified health plan that provides a silver level of coverage under AS 21.54.220(a)(7) and at least one plan that provides a gold level of coverage through each small business health options program exchange and exchange for individual coverage in which the health care insurer participates;

(C) charges the same premium rate for each qualified health plan without regard to whether the plan is offered through the exchange and without regard to whether the plan is offered directly from the health care insurer or through an insurance producer;

(D) does not charge cancellation fees or penalties in violation of AS 21.54.220(d); and

(E) complies with the regulations developed by the United States Secretary of Health and Human Services under sec. 1311(d), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and other requirements the exchange establishes;

(6) the plan meets the requirements of certification as adopted by regulation under AS 21.54.250 and by the United States Secretary of Health and Human Services under sec. 1311(c), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, which include minimum standards in the areas of marketing practices, network adequacy, essential community providers in underserved areas, accreditation, quality improvement, uniform enrollment forms, and descriptions of coverage and information on quality measures for health benefit plan performance; and

(7) the exchange determines that making the plan available through the exchange is in the interest of qualified individuals and qualified employers in this state.

(b) The exchange may not exclude a health benefit plan

(1) because the plan is a fee-for-service plan;

(2) by imposing premium price controls; or

(3) because the plan provides treatments necessary to prevent patients' deaths that the exchange determines are inappropriate or too costly.

(c) The exchange shall require each health care insurer seeking certification of a plan as a qualified health plan to

(1) submit to the exchange a justification for any premium increase before implementation of that increase; the health care insurer shall prominently post the justification information on the health care insurer's Internet website; the exchange shall consider the information submitted, along with the information and the recommendations provided to the exchange by the director under 42 U.S.C. 300gg-94 (sec. 2794(b), Part C, title XXVII, Public Health Service Act) when determining whether to allow the health care insurer to make plans available through the exchange;

(2) make available to the public in plain language, as defined in sec. 1311(e)(3)(B), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and submit to the exchange, the United States Secretary of Health and Human Services, and the director accurate and timely disclosure of the following:

(A) claims payment policies and practices;

(B) periodic financial disclosures;

(C) data on enrollment;

(D) data on disenrollment;

(E) data on the number of claims that are denied;

(F) data on rating practices;

(G) information on cost-sharing and payments with respect to any out-of-network coverage;

(H) information on enrollee and participant rights under Title I of P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act; and

(I) other appropriate information as determined by the United States Secretary of Health and Human Services.

(3) permit individuals to learn, in a timely manner on the request of the individual, the amount of cost-sharing, including deductibles, copayments, and coinsurance, under the individual's plan or coverage that the individual would be responsible for paying with respect to the furnishing of a specific item or service by a participating provider; a minimum, that information must be made available to the individual through an Internet website and through other means for individuals without access to the Internet.

(d) The exchange may not exempt a health care insurer seeking certification of a qualified health plan from state licensure or solvency requirements, regardless of the type or size of the health care insurer, and shall apply the criteria of this section in a manner that ensures equality between or among health care insurers participating in the exchange.

(e) The provisions of AS 21.54.200 - 21.54.270 that are applicable to qualified

health plans also apply, to the extent relevant, to qualified dental plans, except as modified under (1) - (3) of this subsection or by regulations adopted by the exchange. Under this subsection,

(1) the health care insurer shall be licensed to offer dental coverage, but need not be licensed to offer other health benefits;

(2) the plan must be limited to dental and oral health benefits, without substantially duplicating the benefits typically offered by a health benefit plan without dental coverage and must include, at a minimum, the essential pediatric dental benefits prescribed by the United States Secretary of Health and Human Services under sec. 1302(b)(1)(J), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and other dental benefits as the exchange or the Secretary may specify by regulation; and

(3) the health care insurer may jointly offer a comprehensive plan through the exchange in which the dental benefits are provided by a health care insurer through a qualified dental plan and the other benefits are provided by a health care insurer through a qualified health plan if the plans are priced separately and are also made available for purchase separately at the same price.

Sec. 21.54.240. Exchange funding; publication of costs of the exchange. (a) The exchange may charge assessments or user fees to a health care insurer offering a health benefit plan or otherwise generate funding necessary to support its operations provided under AS 21.54.200 - 21.54.270.

(b) The exchange shall publish the average costs of licensing, regulatory fees, and any other payments required by the exchange, and the administrative costs of the exchange, on its Internet website. That information must include information on money lost to waste, fraud, and abuse.

Sec. 21.54.250. Regulations. The division or the exchange may adopt regulations to implement their respective authority under the provisions of AS 21.54.200 - 21.54.270. Regulations adopted under this section may not conflict with or prevent the application of regulations adopted by the United States Secretary of Health and Human Services under P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act.

Sec. 21.54.260. Relation to other laws. Provisions of AS 21.54.200 - 21.54.270, and actions taken by the exchange under AS 21.54.200 - 21.54.270 may not be construed to preempt or supersede the authority of the director to regulate the business of insurance in the state. Except as expressly provided to the contrary in AS 21.54.200 - 21.54.270, all health care insurers offering qualified health plans in the state shall comply fully with all applicable health insurance laws of the state and regulations adopted and orders issued by the director.

Sec. 21.54.270. Definitions. In AS 21.54.200 - 21.54.270,

(1) "board" means the Alaska Health Benefit Exchange Board established AS 21.54.210;

(2) "exchange" means the Alaska Health Benefit Exchange established under AS 21.54.200;

(3) "health benefit plan" has the meaning given in AS 21.54.500, except that, notwithstanding AS 21.54.500, it does not include

(A) coverage only for accident or disability income insurance, or any combination of accident or disability income insurance;

(B) coverage issued as a supplement to liability insurance;

(C) liability insurance, including general liability insurance and automobile liability insurance;

(D) workers' compensation insurance or similar insurance;

(E) automobile medical payment insurance;

(F) credit-only insurance;

(G) coverage for on-site medical clinics;

(H) insurance coverage specified in federal regulations issued under the P.L. 104-191 (Health Insurance Portability and Accountability Act of 1996), under which benefits for health care services are secondary or incidental to other insurance benefits;

(I) the following benefits if they are provided under a separate policy, certificate, or contract of insurance or are otherwise not an integral part of the plan:

(i) limited scope dental or vision benefits;

(ii) benefits for long-term care, nursing home care, home health care, community-based care, or any combination of long-term care, nursing home care, home health care, or community based care;

(J) limited benefits specified in federal regulations issued under P. L. 104-191 (Health Insurance Portability and Accountability Act of 1996);

(K) the following benefits if the benefits are provided under a separate policy, certificate, or contract of insurance; there is no coordination between the provision of the benefits and any exclusion of benefits under any group health plan maintained by the same plan sponsor; and the benefits are paid with respect to an event without regard to whether benefits are provided with respect to an event under any group health plan maintained by the same plan sponsor:

(i) coverage for only a specified disease or illness; or

(ii) hospital indemnity or other fixed indemnity insurance;

(L) the following benefits if offered as a separate policy, certificate, or contract of insurance:

(i) Medicare supplemental health insurance as defined in 42 U.S.C. 1395ss(g)(1) (sec. 1882(g)(1) ch. 7, Subchapter XVIII, Part E, Social Security Act);

(ii) coverage supplemental to the coverage provided 10 U.S.C. 1071 - 1110a (Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)); or

(iii) similar supplemental coverage provided to coverage under a group health plan;

(4) "qualified dental plan" means a limited scope dental plan that has been certified under AS 21.54.230(e);

(5) "qualified employer" means a small employer that elects to make its full-time employees and, at the option of the employer, some or all of its part-time employees, eligible for one or more qualified health plans offered through the small

business health options program exchange if the employer

(A) has its principal place of business in this state and elects to provide coverage through the small business health options program exchange to all of its eligible employees, wherever employed; or

(B) elects to provide coverage through the small business health options program exchange to all of its eligible employees who are principally employed in this state;

(6) "qualified health plan" means a health benefit plan that has in effect a certification that the plan meets the criteria for certification described in sec. 1311(c), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and AS 21.54.230;

(7) "qualified individual" means an individual, including a minor, who

(A) is seeking to enroll in a qualified health plan offered to individuals through the exchange;

(B) resides in this state;

(C) at the time of enrollment, is not incarcerated, other than incarceration pending the disposition of charges; and

(D) for the entire period for which enrollment is sought, is and is reasonably expected to be a citizen or national of the United States or an alien lawfully present in the United States;

(8) "small business health options program exchange" means the small business health options exchange under AS 21.54.220(a)(12) and sec. 1321, P.L. 111-148, (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(9) "small employer," notwithstanding AS 21.54.500, means an employer that employed an average of not more than 50 employees during the preceding calendar year; for purposes of this paragraph,

(A) a person treated as a single employer under 26 U.S.C. 414 (b), (c), (m), or (o) (Internal Revenue Code of 1986), shall be treated as a single employer;

(B) an employer and any predecessor employer shall be treated

as a single employer;

(C) all employees shall be counted, including a part-time employee and an employee who is not eligible for coverage through the employer;

(D) if an employer was not in existence throughout the preceding calendar year, the determination of whether that employer is a small employer shall be based on the average number of employees the employer is reasonably expected to employ on business days in the current calendar year; and

(E) an employer that makes enrollment in qualified health plans available to its employees through the small business health options program exchange and that would cease to be a small employer because of an increase in the number of its employees, shall continue to be treated as a small employer for purposes of AS 21.54.200 - 21.54.270 as long as the employer continuously makes enrollment through the small business health options program exchange available to its employees.

* **Sec. 3.** AS 39.25.120(c) is amended by adding a new paragraph to read:

(22) the executive director and employees of the Alaska Health Benefit Exchange Board employed under AS 21.54.210(j).

* **Sec. 4.** AS 39.50.200(a)(9) is amended to read:

(9) "public official" means

(A) a judicial officer;

(B) the governor or the lieutenant governor;

(C) a person hired or appointed in a department in the executive branch as

(i) the head or deputy head of the department;

(ii) the director or deputy director of a division;

(iii) a special assistant to the head of the department;

(iv) a person serving as the legislative liaison for the department;

(D) an assistant to the governor or the lieutenant governor;

(E) the chair or a member of a state commission or board;

(F) state investment officers and the state comptroller in the Department of Revenue;

(G) the chief procurement officer appointed under AS 36.30.010;

(H) the executive director of the Alaska Workforce Investment Board;

(I) each appointed or elected municipal officer; [AND]

(J) the members of the board of trustees, the executive director, and the investment officers of the Alaska Permanent Fund Corporation; **and**

(K) the executive director of the Alaska Health Benefit Exchange employed under AS 21.54.210;

*** Sec. 5.** AS 39.50.200(b) is amended by adding a new paragraph to read:

(64) the Alaska Health Benefit Exchange Board (AS 21.54.210).

*** Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITIONAL PROVISIONS. Notwithstanding AS 21.54.210(c), enacted by sec. 2 of this Act, the initial terms for members of the Alaska Health Benefit Exchange Board appointed by the governor are as follows:

(1) three members shall be appointed to serve for terms ending December 31, 2012;

(2) three members shall be appointed to serve for terms ending December 31, 2013.

*** Sec. 7.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Alaska Health Benefit Exchange Board established under AS 21.54.200, enacted by sec. 2 of this Act, and the director of insurance may adopt regulations necessary to implement their respective powers and duties created by this Act under AS 21.54.250, enacted by sec. 2 of this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before the effective date of the statutory changes.

* **Sec. 8.** Section 7 of this Act takes effect immediately under AS 01.10.070(c).

* **Sec. 9.** Except as provided in sec. 8 of this Act, this Act takes effect July 1, 2012.

SB 70 Comments and Issues

1. Based on the successful experience of other small employer exchanges, it is vital that the Exchange collects all premiums from employers in the employer exchange and pays those to the insurers. Today the small employer writes one check to the insurer each month. It is simple. In the exchange, employees of employers will be able to pick their plan. This creates a complexity whereby the employer would have to write separate checks each month to different insurers. This is a complex new burden small employers will not want. The Connecticut and New York exchanges have proven they can administratively handle this task on behalf of employers and "keep it simple" administratively.

Here is suggested language:

> *(i)Provide consolidated billing and premium payment by employers including detailed information to employers on health plans and costs chosen by their employees;*
> *(ii)Establish an electronic interface and facilitate the flow of funds between insurers, employers, and employees, including subsidies and the use of "free choice vouchers;"*
> *(iii)Provide plan enrollment information to employers.*

2. Utah has established a mechanism whereby employers can contribute an amount on behalf of part-time and seasonal employees to the exchange, without setting up an employer insurance program. They say this is popular with employers. This way an employee can get contributions from multiple employers. Employers might be willing to make a fixed contribution, whereas they are not willing to obligate themselves to full coverage that they see as unaffordable for part-time or seasonal employees. However, overall the entire health system and all participants are better off if employers make even a small or modest contribution to employee health coverage.

Example from the Utah Exchange:

> *What is premium aggregation? Premium aggregation is a mechanism to pay insurance premiums with contributions from multiple sources. The unique feature of the Exchange allows employees aggregate the defined contribution from your employer, your premium contribution, and contributions from other sources, such as second employer, a spouse's employer, state assistance programs, etc.*

3. Will the Alaska Exchange be starting with the current definition of small group and limiting small employers to 50 employees or fewer? Or will you allow larger firms to buy insurance in the exchange, 51-100 or greater? One option is to allow the exchange to get up and running smoothly with employers with 50 or fewer employees (the present small group market definition) and to expand later after the exchange is past the startup phase. A related issue is whether self-employed can purchase from the small employer exchange (12 states currently allow this in their small group market).

4. We recommend based on lessons learned in other states with insurance pools and exchanges that insurance brokers/agents be used for the small employer exchange. Insurance agents are experienced, sell many products to small employers and are trusted advisors to small employers. While some have argued that exchanges could lower their costs by eliminating broker costs, this would create the unintended consequence of brokers steering all the low-risk employers to outside markets and undermining the stability of the exchange.

5. Given the Exchange is an independent agency and considerable funds will be flowing through the Exchange, an independent financial audit is a good idea.

6. Many experts have written on the topic of adverse selection and believe this is the Achilles' heel of insurance pools and exchanges, and why many have historically failed.

(1) One option is to have the Board study, review options and recommend measures to prevent or counter adverse selection.

(2) A second option is provided by the bill before the Montana Legislature that would create a level playing field between the insurance market outside the health insurance exchange and with the exchange pool.

Health plan design requirements inside the exchange—outside the exchange.

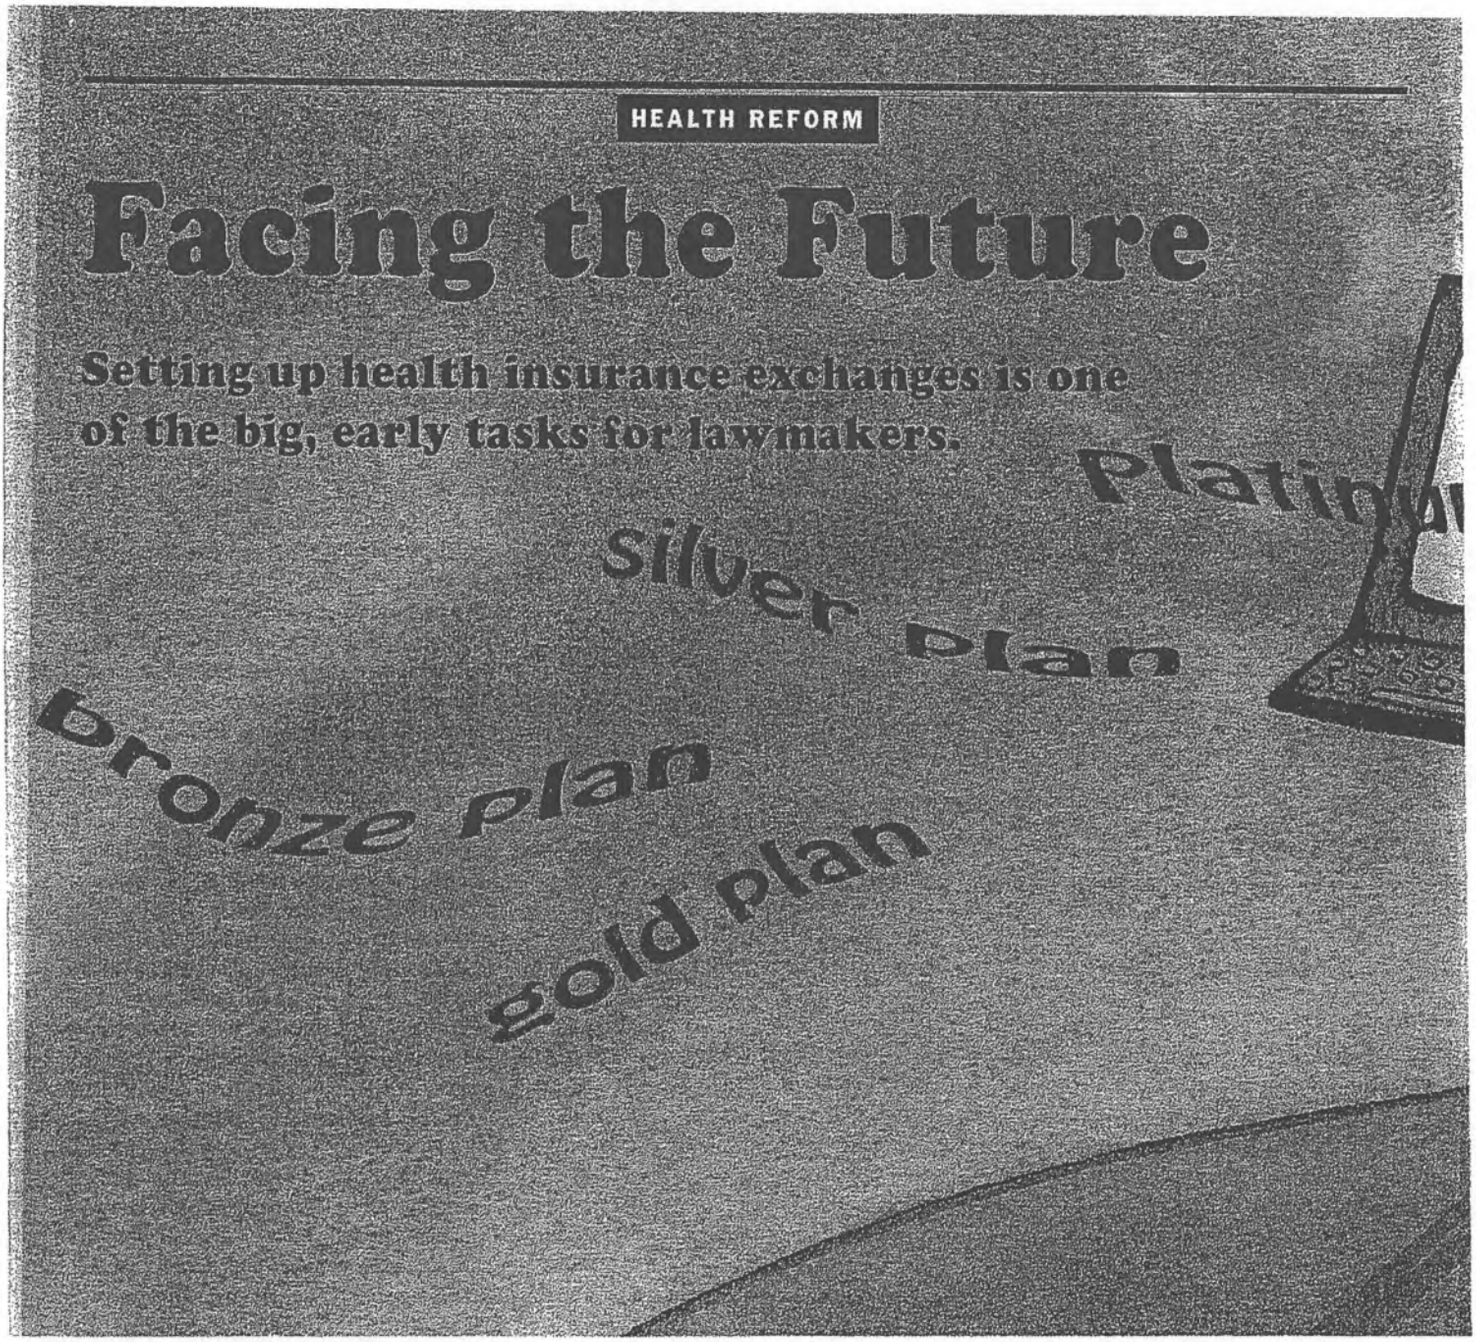
(1) Each health insurance issuer wishing to participate in the exchange may offer up to three different plan designs in each of the following benefit categories: platinum, gold, silver, and bronze (as defined in the federal act) in individual health insurance market and in the small employer group health insurance market.

2) All issuers participating in the exchange must offer at least one gold plan and one silver plan, both inside and outside the exchange, unless the issuer does not operate outside the exchange.

(3) If the issuer offers a bronze plan or a plan with an actuarial value of 60% or less to individuals or small employer groups outside the exchange, it must also offer at least one substantially similar "qualified" bronze plan option inside the exchange.

(4)

(a) All health insurance issuers that participate in the exchange and offer individual or small employer group preferred provider organization (PPO) health plans, other plans with incentives for using particular networks of providers, or managed care plans outside the exchange, must also offer such network-based plans inside the exchange.



(b) Health insurer issuers must comply with the network adequacy rules promulgated under chapter 36, Part 2, or the network adequacy rules for PPOs that the commissioner shall adopt pursuant to 33-22-1707 for plans issued both inside and outside the exchange.

(c) Health insurance issuers must use the same network of providers for their health plans offered inside and outside the exchange.

HEALTH REFORM

Facing the Future

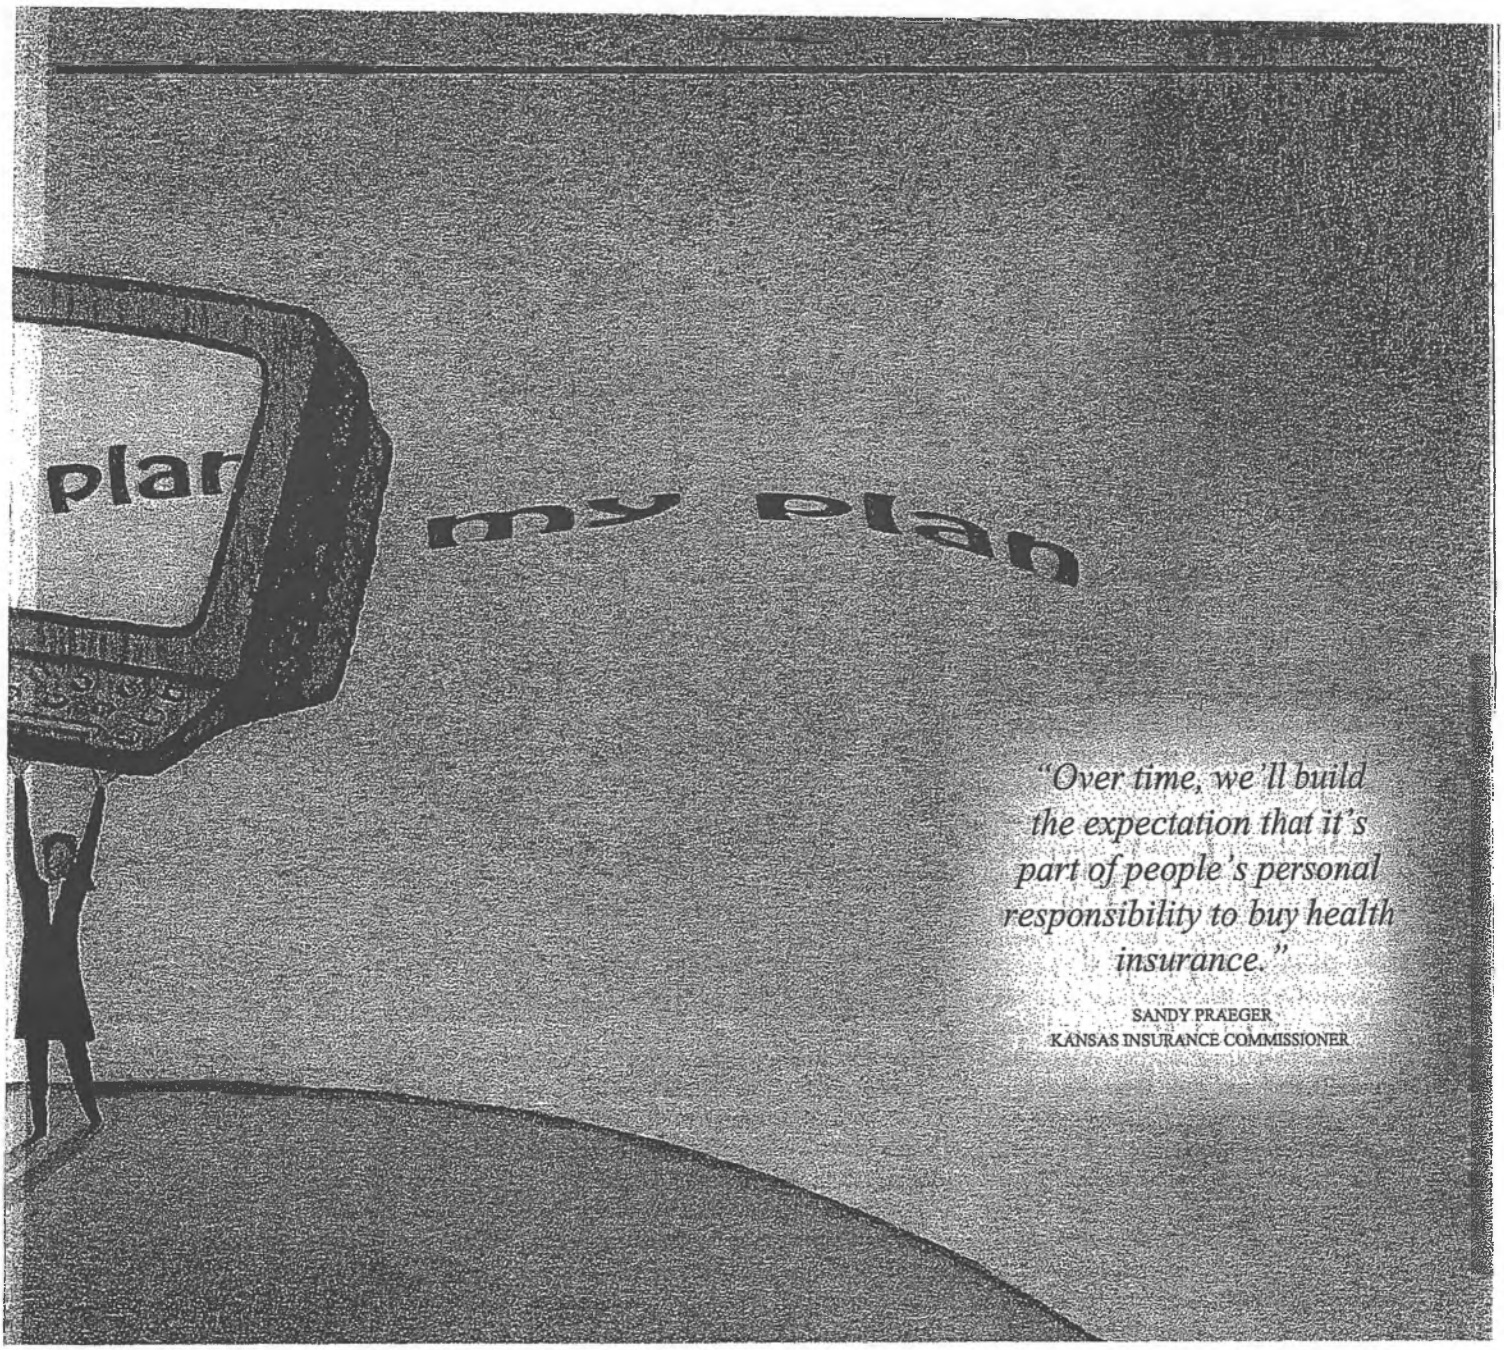
Setting up health insurance exchanges is one of the big, early tasks for lawmakers.

BY RACHEL BRAND

Ada May Roberts worried each year about renewing her health insurance. She feared being told the price had doubled or the insurance company would not renew her policy.

So every fall, the Massachusetts innkeeper spent hours with insurance salespeople, reading the fine print and filling out medical forms. Then she prayed she'd be covered.

All that changed three years ago. On the first day the Massachusetts Health Connector opened, Roberts typed her name, birthday and zip code into a website. In five minutes, she had a list of 22 plans—rated gold, silver or bronze. It took her only 10 minutes to buy health insurance. Since then, her rates have dropped $300 a month, and she never fears being kicked off.



"I'm happy, happy, happy," says the 59-year-old. "The weight of uncertainty has been lifted. Massachusetts got it right."

Welcome to the future of health insurance. In three years, as many as 16 million people will buy inum through such online trading posts, and the number will swell to 31 million by 2020. Insurers won't be able to deny folks coverage because they are in poor health, and plans will be easy to compare.

But state lawmakers have lots to do before that day comes. They must decide whether to offer an exchange, who will run it, and how it will work with insurers.

Then they must launch the exchange into a fiscal environment that is anything but inviting. The overall cost of getting exchanges up and running is expected to be $4.4 billion nationwide, although some federal funds will offset the cost.

Rachel Brand is a freelance writer in Denver and a frequent contributor to State Legislatures.

IT'S THE LAW

A core tenet of federal health care reform passed in March is this: The federal government wants more people to have health insurance.

So in 2014, the government will help 19 million people become insured for the first time. Some will qualify for subsidies, others for an expanded Medicaid program. This help is specifically for people who are unemployed, self-employed or work for companies that don't offer coverage.

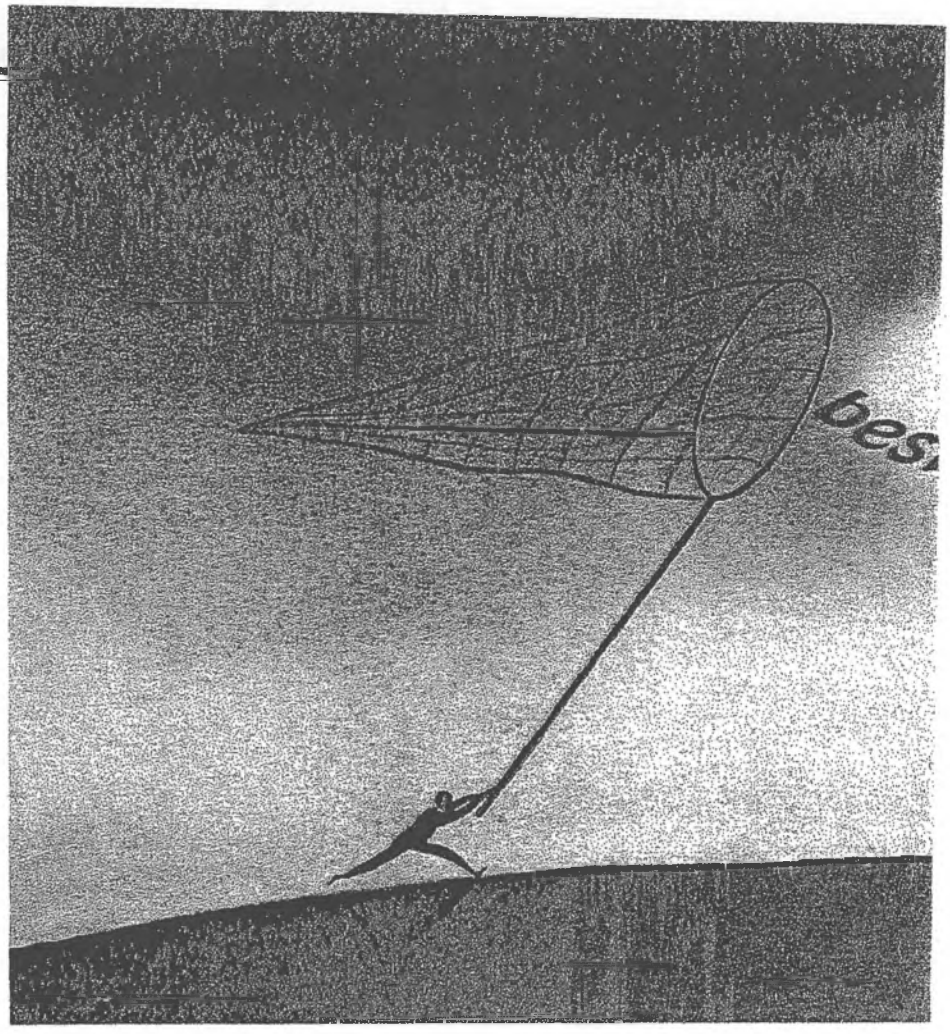
At the same time, it will be against the law not to have health insurance, except in some specific cases. People who flout the law will pay a penalty that varies by income.

Nobody knows how many people will use the carrots or respond to the sticks.

"Over time, we'll build the expectation that it's part of people's personal responsibility to buy health insurance," says Kansas Insurance Commissioner Sandy Praeger.

Regardless, exchanges will play a role. "If you are going to move into a world in which people buy insurance on their own," says Jon Kingsdale, former commissioner of the Massachusetts Connector, "you need a vehicle to make it relatively easy for them to do so."

ONLINE MARKETPLACE



Exchanges are designed to make it easy to shop for and buy insurance. They're often compared to airline ticket websites such as Expedia.com. But exchanges go further.

Imagine if Expedia.com gave shoppers information on the quality of flights—their on-time frequency, customer service ratings and the quality of the food. Exchanges will provide such qualitative information about health plans.

They also will not sell plans that fail to meet minimum quality standards and benefit packages set out by the federal government.

"If you have not already begun to implement, you are behind. A lot of folks are waiting on the political winds, but I would hope your legislative leaders would dig in and get started."

UTAH HOUSE SPEAKER DAVE CLARK

They'll make it easy for consumers to shop by grouping health plans into tiers—bronze, silver, gold and platinum—based on how much of the cost customers take on. Health care reform also requires insurers to justify annual price increases to the exchange board.

Finally, exchanges will be the portal through which people determine if they are eligible for Medicaid, federal subsidies or other programs, such as CHIP, the Children's Health Insurance Program.That's a daunting information technology challenge in the next three years for the existing state IT infrastructure.

"But this is an opportunity to take highly fragmented, at times very inefficient and cumbersome eligibility systems, and bring them into the 21st century," says Kingsdale.

THE CLOCK IS TICKING

The timeline to set up exchanges is short–just three years. So state leaders considering exchanges—the alternative is to allow their citizens to use a federally established exchange—should pass authorizing legislation in 2011, experts say.

"If you have not already begun to implement, you are behind," says Utah House Speaker Dave Clark. "A lot of folks are waiting on the political winds, but I would hope your legislative leaders would dig in and get started."

HOUSE SPEAKER DAVE CLARK UTAH

Here are some key dates.

In September, many state leaders sent letters to the U.S. Department of Health and Human Services asking for $1 million to fund planning for exchanges.

Within months, the federal government is expected to announce details of much larger developmental grants, possibly tens of millions of dollars, to pay for information systems and other exchange-related infrastructure.

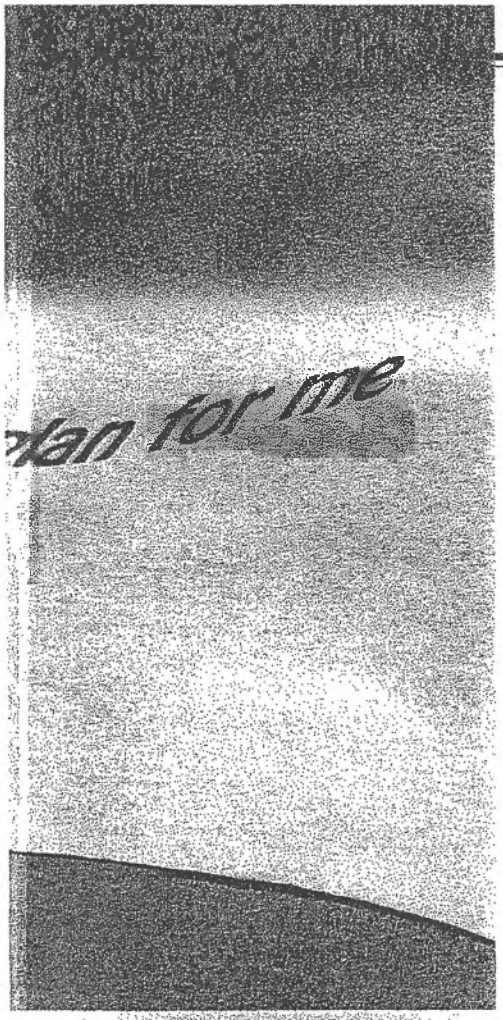
By January 2013, states will have to show the U.S. Department of Health and Human Services they have a "functioning" exchange. If not, state residents will be steered to a federally established exchange.

Exchanges open in January 2014.

"By 2013, states should be well along with having a designated organization and the administrative systems in place," says Richard Curtis, president of the Institute for Health Policy Solutions. He noted that even if exchanges are ready to go then, they will have to wait until complementary parts of health reform go into effect in 2014.

WHO'S LEADING?

Right now, only Massachusetts and Utah have functioning exchanges. Both will need changes to fit federal law.



Other states are taking first steps. This fall, Colorado legislators are holding public meetings on the exchanges. In Iowa and Kansas, executive agency heads are working through early implementation issues.

California lawmakers in September passed legislation to authorize work on the exchange, lay down guiding principles and set up a governing structure. At press time, Governor Arnold Schwarzenegger had not signed the bills.

All this preamble is needed, because once they dig in to writing legislation, lawmakers must make some important, potentially controversial, decisions.

First, who will be in charge of the exchange? The options include a state agency, an independent governmental entity or a nonprofit.

Governance is crucial because an exchange

SENATOR
ELAINE ALQUIST
CALIFORNIA

SENATOR
BETTY BOYD
COLORADO

"We want people with knowledge of the health care marketplace to be on the board because the exchange is, in effect, selling insurance."

CALIFORNIA SENATOR ELAINE ALQUIST

behaves like a business, selling insurance, and a government—determining eligibility. It's e-commerce meets social services.

"Who runs it will determine the direction and flavor," says Kingsdale.

Existing state agencies might flavor the exchange with their own spices. Massachusetts' exchange is run in an independent agency governed by a nine-member board. California's proposed exchange would be run by an independent agency governed by a five-person board of health insurance experts, appointed by the governor's office and the Legislature. To avoid conflicts of interest, there would be no doctors or insurers on the board.

"We want people with knowledge of the health care marketplace to be on the board because the exchange is, in effect, selling insurance," says California Senator Elaine Alquist.

"We chose a small board because we want it to be able to reach consensus quickly and easily. Additionally, because the exchange will be competing in the private insurance market, it will need to make decisions quickly," she says, "but it is still important to have public hearings and to be accessible and accountable to the public."

Utah, by contrast, runs its exchange through the state Office of Consumer Health Services. Other states, such as Kansas and Colorado, are looking at using existing state agencies.

Colorado Senator Betty Boyd says she's "not sure I see another department being created in these fiscal times."

PICK AND CHOOSE?

One of the most controversial decisions legislators will need to make is whether an exchange can pick or, in legislative language, "selectively contract," with health plans.

Go back to the Expedia.com example. Imagine if it could pick a handful of airlines to work with and lock out the rest in the interest of negotiating a better deal for consumers.

Some say that would promote competition, others say the opposite.

Although federal law says exchanges can't dictate price to health insurers, states can go beyond minimum federal requirements on health plans in the best interest of consumers, says Curtis of the Institute for Health Policy Solutions.

"An exchange can say, 'Look, here are our criteria, and we want to see your competitive bids across the board,' " Curtis says. "This introduces two levels of competition, both to get into the exchange and among plans within the exchange."

California's legislation would let the exchange selectively contract with health plans, a provision California health plans strongly oppose.

"The governor's signature on these bills would harm Californians' access to health insurance," John Graham of the Pacific Research Institute wrote in a recent newspaper article. "Limited choice means higher costs."

California policy experts took this approach because they think it will allow them to get the best value for consumers.

"As a bulk purchaser, the exchange will have significant market clout in the individual market, and it should seek to get a good deal on price and on improving quality," says California's Alquist. "Part of the way we do this is by picking plans on the basis of value and quality compared to their competitors."

Kingsdale, who consulted on California's legislation, points out that "while there are no guarantees in life, using discretion in the service of bringing down price and creating value is a good thing."

Other legislators feel selective contracting could stymie market competition, or even shut down some plans.

Selective contracting "becomes a real problem if a state decides the only way individuals and small groups can purchase is through this state exchange," says Praeger of Kansas. "Then the ability to deny some plans access might put them out of business."

Utah's Clark says his state doesn't plan to allow selective contracting. "The [reform] legislation requires the insurance companies to justify premium increases. We have not found the need to interject ourselves into that."

BALANCING THE MARKETS

Finally, legislators must set up exchanges in ways that don't attract all only sicker patients, while healthier people buy insurance

"I believe that if a plan doesn't want to sell on the exchange, then they can't sell insurance in Iowa."

IOWA SENATOR JACK HATCH

on the open market. In insurance language, that's called "adverse selection," or a death spiral.

"This is a big issue," says Joan Henneberry, Colorado's Medicaid director. "It has to do with making sure the rules of engagement are the same in both markets.

"If you require all sorts of bells and whistles inside the exchange and nothing outside, you could have a market outside offering plans that are a lot less expensive with lighter benefits," she says. "The risk is all the people who really need insurance are going to buy it inside the exchange."

The risk of adverse selection is also built into the exchange by design. People receiving subsidies or government-paid health care must buy through the exchange, while wealthier people won't have to. (There's no requirement that individuals buy insurance through the exchange, just that they buy insurance.)

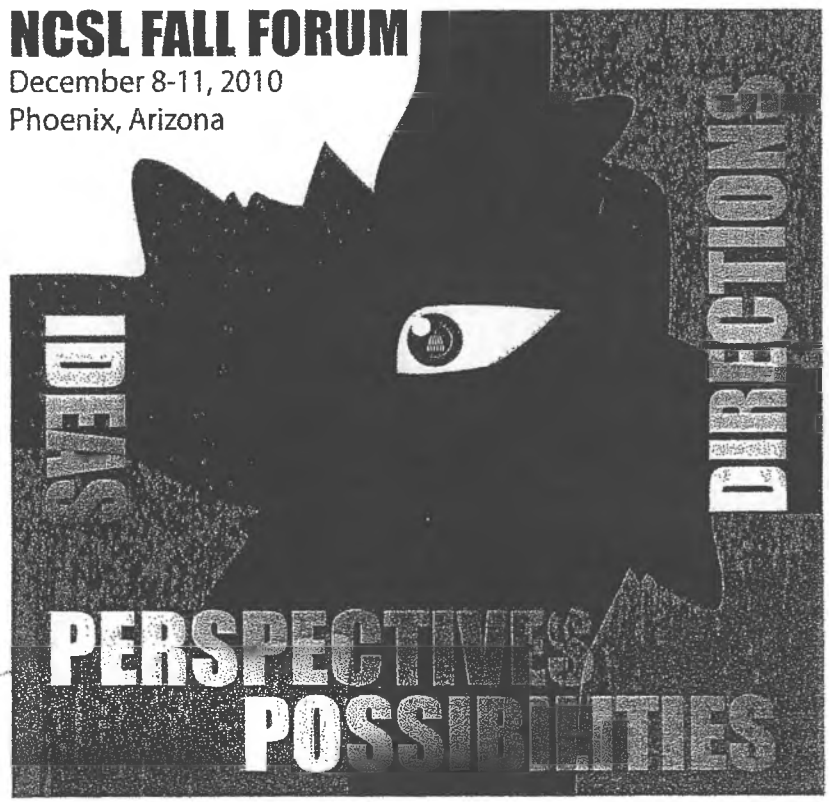
SENATOR JACK HATCH
IOWA

Iowa Senator Jack Hatch says his state may force all plans that sell individual and small group insurance to go through Iowa's exchange. "I believe that if a plan doesn't want to sell on the exchange, then they can't sell insurance in Iowa."

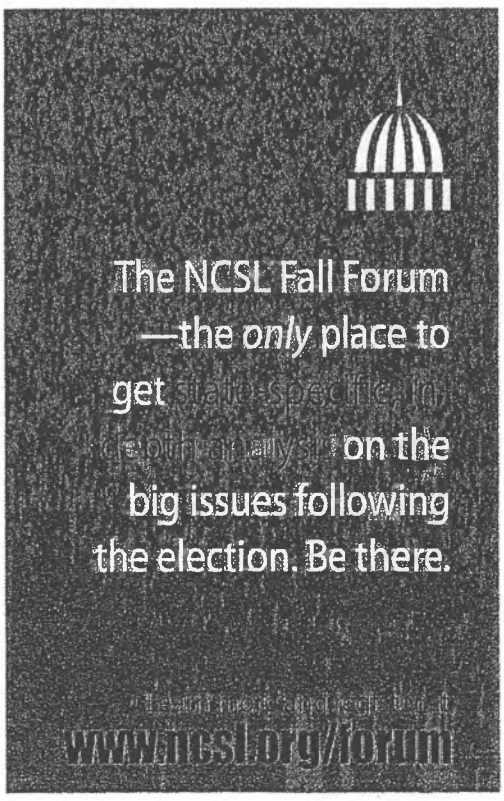
Since California's proposed plan will not take all comers, the legislation set up rules to protect the exchange. Any plan that sells in the exchange must sell all product categories—platinum to bronze—and sell the same products outside it. No carrier, for example, will be able to sell a catastrophic plan outside the exchange only.

IT'S COMPLICATED

If setting up a health insurance exchange sounds complex, that's because it is. Each answer leads to more questions.



"It's like Jell-O," says Praeger. "You push down somewhere, and it pops up somewhere else."



Fortunately, legislators can tap the expertise of colleagues in Massachusetts and Utah.

The National Association of Insurance Commissioners is working closely with the U.S. Department of Health and Human Services on exchange issues. The insurance commissioners organization and the National Academy of Social Insurance, a nonprofit devoted to the role of social insurance in promoting economic security, are each writing model legislation.

"Building this thing will be a mammoth task," says Iowa's Hatch. "But remember, it doesn't have to answer every question. It just has to provide a pathway for a consumer to make a decision about health insurance."

Senator Dennis Egan
Chair, Senate Labor & Commerce Committee
Beltz 105
Juneau, Alaska 99801

Re: SB 70, Alaska Health Benefit Exchanges

Dear Senator Egan and Members of the Senate Labor & Commerce Committee:

My name is Mark Regan. I am Legal Director of the Disability Law Center of Alaska, which is the State-designated organization for protection and advocacy of Alaskans with disabilities. I would like to make three points this afternoon in support of the Labor & Commerce Committee's moving forward with Senate Bill 70, the bill that would establish a health benefit exchange that would help people find coverage in the individual and small group insurance markets.

The first point is that it is hard for people with disabilities who have chronic conditions to find private insurance in the individual and small group health insurance markets, and an Exchange can help them find the coverage they need on the same general terms as everyone else who needs to find individual or small-group health insurance.

The second point is there is nothing about an Exchange that requires the State of Alaska to enforce an individual mandate requiring citizens to have private health insurance coverage. SB 70 is a version of the National Association of Insurance Commissioners' model Act, which reflects federal requirements, but if the individual mandate in federal law survives the court challenges to it, enforcing the mandate will be a federal responsibility, not a State one.

Third, and finally, I want tentatively to suggest that even if the individual mandate is found unconstitutional by the U.S. Supreme Court, there is still likely to be a binding federal requirement that there be Exchanges in every State, whether operated by the State of Alaska or by a nonprofit entity set up by the federal government; and that it probably would be best for Alaskans with disabilities if the State does the operating.

<u>An Alaska Health Benefit Exchange is a good way for people to find health insurance</u>

First, an Exchange would make sure Alaskans with disabilities are in the same system as other people who need help finding affordable private coverage in the individual and small group health insurance markets. According to the Kaiser Commission's 2008-2009 data, 128,000 Alaskans were uninsured in that year, 19% of the total population, which is two percentage points higher than the country as a whole. Alaskans with disabilities sometimes have special trouble getting coverage because they have chronic conditions

MEMBER OF THE NATIONAL DISABILITY RIGHTS NETWORK

that would lead insurance companies either to reject them outright – through a "pre-existing condition exclusion" – or lead private insurance companies to price the coverage that would be available at a level people simply can't afford. But the high cost of coverage can be a problem for everyone. Even if you don't have a chronic condition, it can still be hard to afford coverage without assistance from someone, typically an employer, as anyone who has tried to pay the full cost of insurance under COBRA will remember. The existing individual and small group insurance market is a limited one and it is hard for people to find coverage through it.

An Exchange, like the Exchange contemplated in SB 70, is likely to be helpful in several important ways. People can use it to search for insurance policies that they otherwise wouldn't know about. Insurance companies can compete in terms of price and networks of doctors and other providers of medical services. Because there will be a lot of people participating – we hope – the average cost of coverage should be lower than it would be in a high-risk pool like the pools the State is now operating. Furthermore, the federal government will be assisting people of low- to- moderate incomes with subsidies for premium and cost-sharing payments they need to make, and those subsidies will be available mainly for coverage people would purchase through an Exchange. Again according to Kaiser Commission 2008-2009 data, 90,900 uninsured Alaskan adults had family incomes below 400% of the poverty income guidelines and so, other things being equal, would have been eligible for subsidies under the Act. So an Exchange would be available for people with disabilities on the same terms as everyone else, and the subsidies low-to-moderate income families might need would be available there too.

<u>An Alaska Health Benefit Exchange would not be enforcing a federal health insurance mandate</u>

Second, an Exchange would not be in the business of enforcing any federal requirement that people have insurance coverage. Note that the list of the Board's duties in section 2 of SB 70, proposed AS 21.54.220(a), does not include enforcing a penalty against anyone for not having health insurance coverage. In fact, it's the other way around, Instead of penalizing people, the Board's duties include helping people demonstrate that they would be <u>exempt</u> from any penalty of this sort [proposed AS 21.54.220(a)(14) and (15)], and administering a system through which federal subsidies would be made available so people could afford coverage [proposed AS 21.54.220(a)(17)]. If the individual mandate survives the court challenge to it, the responsibility for enforcing the mandate rests with the federal government, not the State.

That is because the federal health care overhaul's minimum coverage provision is a federal, not a State, requirement. Under the new federal law, employers and other providers of health care make enrollment reports to HHS, not to a State. [PPACA, § 1502(a); see 26 U.S.C. § 6055.] A person who appears not to have enrolled gets a "notice of nonenrollment," but this comes from the Treasury, not from a State. [PPACA, § 1502(c).] The "shared responsibility payment" penalty is a payment to the

federal government to be included with a person's federal tax return. [PPACA, § 1501; see 26 U.S.C. § 5000A(b)(2).] The Secretary of HHS, not a State, serves notice of the penalty. [§ 5000A(g)(1).] The procedure for collecting the penalty, and for defending against collection, is the same general procedure as federal tax procedure. [Id..] The restrictions on criminal prosecution and on liens and levies are restrictions on federal tax enforcement procedures, not on state activities. [§§ 5000A(g)(2)(A) and (B).] Whether or not someone gets a hardship exemption is to be determined by HHS, not by a State. [§ 5000A(e)(5).] There is simply no occasion on which the Alaska Health Benefit Exchange would ever directly impose or collect a penalty on someone who fails to meet the federal minimum coverage provision.

Nor would moving forward with an Exchange force the State of Alaska to drop any argument that the federal individual insurance mandate is unconstitutional. In fact, just about every State which is a plaintiff in the Florida v. U.S. lawsuit has taken steps towards investigating how an Exchange would work – getting Federal planning grants for doing this and considering legislation on the subject – and one State which is challenging the individual mandate, Utah, already has an Exchange statute on its books. (Part of the Utah statute setting up an Exchange on this subject is at Utah Code, § 63M-1-2504, and the website's URL is http://www.exchange.utah.gov/.) In fact, Utah not only has an Exchange statute on its books, but it has a "health care freedom act" that says that no citizen of Utah should be required to purchase health insurance. [Utah Code, § 63M-1-2505.5.] If Utah can move forward with an Exchange under those circumstances, so can Alaska.

An Alaska Health Benefit Exchange in state law would keep Alaskans in charge

Finally, there is a question about what federal law is likely to require States to do – or, more accurately, what Federal law is likely to require to be done in every State by someone, State or nonprofit – once the litigation about the individual mandate is over. In the Florida v. U.S. case, the plaintiffs (including the State of Alaska) raised a direct challenge to the federal Act's Exchange provisions, saying that those provisions commandeered State government into enforcing federal law. Judge Vinson actually rejected that challenge, saying States had an option under the Act: set up an Exchange that satisfies federal standards, or watch and wait while the federal government sets up an Exchange through a public nonprofit agency of its own.

Now, it is possible that if the challenge to the individual mandate succeeds at the U.S. Supreme Court, it will be clear that the Act's current standards for Exchanges would have to be modified. Maybe the whole idea of an individual and small group market where there would be "guaranteed issue" – they can't turn you down because you have a pre-existing condition – and "community rating" – they can't charge you more money simply because you have a chronic health condition – would have to be rethought. The reason for this is that the individual mandate prompts relatively healthy people to participate in the system, and unless relatively healthy people participate in the system along with

people with disabilities and chronic conditions, the average cost of a policy within that system would go way up. So if the mandate is unconstitutional, there would need to be a discussion of other ways to get people to participate in the system. No one can be sure exactly what Congress would decide to do if the U.S. Supreme Court were to throw out the individual mandate.

But the idea of many people participating in the individual and small group health insurance market, and finding out information about which policies would be best for them, and getting subsidies to help them afford insurance, is such a good one that Congress will likely try to encourage this even if the individual mandate disappears. Before the health insurance overhaul passed Congress, there were several suggestions about how to encourage people to participate in the market without actually penalizing them for not doing it. For example, there was a suggestion that people could choose not to have health insurance – but they'd have to promise that they wouldn't ask for any federal subsidies if they did decide to buy insurance, and they'd have to deal with pre-existing condition exclusions if it turned out that they needed insurance after all. It's not clear which of those different suggestions Congress might adopt. But it is quite possible that there would be an Exchange requirement in federal law, no matter what, with the same option for States that is in federal law now – a State could operate an Exchange, or, if the State decided not to operate an Exchange, the federal government would operate one through a nonprofit.

If those turn out to be the circumstances, I'd suggest that Alaskans' preference will be to have the State operate an Alaska Health Benefit Exchange, where the people running the system would be State people who likely would have good ideas about what is best for Alaskans. The alternative would be a federally sponsored nonprofit agency. So, if you want there to be an opportunity for Alaskan control over the Alaskan part of this problem, you should move forward with SB 70.

Thank you very much, again, for the opportunity to testify on this important issue.

Sincerely,

Mark Regan
Legal Director

RE: Hearing by (S) L&C Tuesday, February 8, 2011, 1:30 pm

Doris Robbins
1281 Overhill Dr.
Fairbanks AK 99709-6753
(907) 374-0597 - Cell: 907-687-2174

I support SB 70: *Alaska Health Benefit Exchange*

I understand that this hearing is regarding whether Alaskans will have an opportunity to set up a health benefit exchange which should provide clear options and some competition for health coverage or expenditures. The exchange would make clear information available to Alaskans of what their health care dollars buy.

Currently, Alaskans are not sure of what they are getting for their health dollars. The rules are murky and you never know when an insurer will end coverage or an unexpected medical bill will put you in financial jeopardy. This legislation should shine a light on what you are paying for, and set up options that will allow most Alaskans to know what they are getting without bait and switch tactics.

The exchange will act as a one-stop-shop for Alaskans to make choices that suit their needs and pocketbook. In addition, stipulations should be laid out clearly to show what is acceptable by us of insurance companies who want to do business in our state, as well as eventually providing competition across state lines. There should be no hidden fees, and all the rules on display to indicate what your health expenditures are buying for you.

In addition, while the governor has turned down federal cash for set-up costs, that was not "earmark" money. The available federal money has been taken by 48 other states, some suing against and some accepting the new federal health law. With the cooperation of our governor we can have the exchange start-up costs without dipping into the general fund. This is Alaska's deal and not connected to the federal health care law.

Do we act now to make changes or continue wading in our present expensive health care muddy water? If we do nothing the climate for paying for health care in Alaska will continue deteriorating as it slowly bankrupts us all whether we currently have coverage or not.

If we begin setting our own standards, we will bring more possibilities for all businesses to provide economical coverage for their employees, or allow individuals to get more for their independent health care dollars.

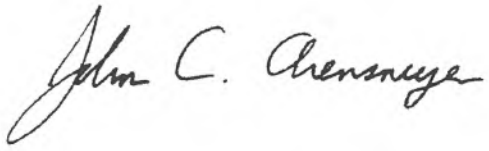
Please take the first step by sending SB 70 on to the next committee to get the conversation rolling. Then it is up to all Alaskans to speak out for an improved climate for medical coverage in this state.

Doris Robbins, speaking in my own behalf
Member of the Retired Public Employees of Alaska (RPEA)

February 8, 2011

Dear Senators:

Alaska's small businesses are being crushed under high healthcare costs, forcing both business owners and workers to pay a heavy price. SB 70, legislation establishing the Alaska Health Benefit Exchange, is under consideration in the Senate Labor and Commerce Committee. It will go a long way toward lowering costs and improving access for small business owners. Alaska can and should take the lead in establishing this marketplace now so small employers can get the relief they need in the form of lower costs and more choice. With fewer dollars going to insurance companies and more kept in the pockets of small business owners, they will be able to invest in their businesses and hire new employees, helping Alaska's economy grow.



In the ongoing effort to ease this burden on small businesses, we urge you to stand up for Alaska's small business community and work to finalize this crucial legislation. Small employer exchanges have been established in Utah, Connecticut, New York City and Massachusetts. They have been supported by members of both parties and are proven to benefit small business owners and their employees. The idea of a small employer exchange has been around for a long time, and has broad support among business groups and members of Congress from both political parties.

A survey of Alaska small businesses we conducted found that only 21% pay for health insurance for their employees. Of those, 79% said they were struggling to do so. Moreover, nearly one-third (32%) of fishermen who are self-employed, a vital part of Alaska's economy, are uninsured. While insurance rates for small employers continue to climb, an exchange will help change this.

A well-run exchange will be the primary vehicle for making healthcare affordable and accessible for small businesses and their employees, as well as the state's self-employed entrepreneurs. It will allow small businesses to band together to purchase insurance, giving them the type of clout that large businesses enjoy when negotiating for coverage. Your leadership on this issue will guarantee the exchange is created the right way so small businesses receive the myriad benefits that a strong, robust exchange will provide. As important job creators in Alaska, small businesses need your quick action now more than ever.

Attached are some specific comments and issues based on our research of other successful exchanges.

Sincerely,

John Arensmeyer
Founder & CEO

Health care overhaul debate now shifts to states

By RICARDO ALONSO-ZALDIVAR
(01/22/11 11:15:06)

True or false: States suing to overturn core requirements of President Barack Obama's health care overhaul are refusing to carry out the law. If you said "true," you'd be wrong.

Republican state legislators and governors are working on how to deliver coverage to more than 30 million people now uninsured, as the law calls for, even as GOP attorneys general lead the legal battle to overturn the law's mandate that most Americans have health insurance.

The result? Perhaps the first practical opportunity for the two political parties to work together on an issue that divide them in Washington.

"I can be philosophically opposed and recognize that we can't be asleep at the switch," said Alabama state Rep. Greg Wren, a Republican playing a national role.

"I for one have no interest in ceding any regulatory or statutory authority to the federal government in this area and allowing our state to default while we pursue the litigation side," said Wren, co-chairman of a National Conference of State Legislatures task force on the health care remake.

The debate in the nation's capital seems headed for a stalemate this year because Senate Democrats have the votes to thwart House Republicans' efforts to repeal the law. Denying the Obama administration money to carry out the law isn't a sure strategy either; most of the money was woven tightly into the legislation Congress passed last year.

"We will see a lot of small battles in Congress, but the real center of gravity will shift to the states," said Mike Leavitt, former Republican governor of Utah and health secretary under President George W. Bush. "Bipartisanship is more vibrant in the states than it is in Washington. That doesn't mean it's plentiful, but at least it's alive."

States have to be ready to take on major responsibilities when the coverage expansion gets going in 2014. If not, the federal government will come in and run things.

States must set up and operate health insurance markets where an estimated 24 million people eventually will buy private coverage, most with the aid of federal subsidies. Also, states must open their Medicaid programs to a broader segment of low-income people.

The Medicaid expansion worries state officials. They're already struggling with the costs of the program, draining money from other services from education to law enforcement. Special added Medicaid payments that Washington funneled to the states in the economic downturn will end this year, worsening the crunch.

About 16 million newly eligible people eventually would get Medicaid under the law, and potentially several million more who are eligible today but not signed up could enroll as well. The law says the

federal government will pick up the full cost of those newly eligible for the first few years, but doesn't deal directly with covering the other group.

If state officials are unsure about the Medicaid expansion, they're intrigued about what they might be able to do with the new insurance markets, known as exchanges.

Consumers will be able to go online and pick a private plan from a range of coverage levels and options. Comparison shopping will be easier because benefits will be standardized.

Nearly every state has applied for an initial round of federal planning grants to explore how to design the markets.

"State exchanges are good from a conservative standpoint because they involve consumer choice and markets," said former Senate Majority Leader Bill Frist, a Tennessee Republican.

"What I would like to see is more flexibility given to states in the regulations that define how the legislation works," said Frist. "Each state can develop the exchange that best meets the needs of their people." Two models already exist: Utah's, which is light on regulation, and Massachusetts', where the state government is more directly involved.

Frist, a heart transplant surgeon, has teamed with Democrat Tom Daschle of South Dakota, also a former Senate leader, to try to change the health care debate by stepping back from the repeal fight and using the law as a foundation that can be improved. They expect to direct many of their recommendations to the states.

In New Jersey, Democratic Assemblyman Herb Conaway is hoping to be able to work with Republican Gov. Chris Christie to design their state's exchange. Conaway, a primary care doctor, heads the health committee and is the Democratic counterpart to Alabama's Wren in national planning efforts by state legislators.

"There will be tangible benefits that come to states for taking on these problems," said Conaway. "Done right, there is a benefit that comes to them from getting their people insured. An insured population uses resources more wisely, instead of going to the emergency room and getting treatment that costs four times as much."

Let Texas control health insurance

By STATE REP. JOHN ZERWAS
HOUSTON CHRONICLE

While it is no secret that I oppose the federal health care reform bill, if we don't act now to create the Texas Health Insurance Connector, our state could be forced to cede regulatory control of a significant chunk of its health insurance market to the federal government. The desire to avoid such oversight has generated broad support for the connector, which I am proposing in House Bill 636. In addition to members of both political parties, a variety of groups that don't usually agree on issues have come forward to support keeping Texas in charge of its health insurance market through the passage of HB 636. Those groups include the Texas Association of Business, Texas Hospital Association, Texas Medical Association, Texas Restaurant Association and two Texas health insurance industry groups.

Why must we do this? Among the provisions of the federal health care reforms is a requirement that an organized health insurance market known as an American Health Benefit Exchange be established in every state to provide coverage for U.S. citizens or legal immigrants who do not have access to affordable employer-based coverage. Each state must demonstrate by 2013 that it will have the structure in place to operate its exchange or the federal government will establish and manage it for that state. The Texas Health Insurance Connector, a simplified health insurance market, would serve as our state's exchange.

Although I support the efforts by Texas Attorney General Greg Abbott and others to have the health care bill ruled unconstitutional, the connector proposal is more about what's best for Texas and less about what the federal government has passed. It's about ensuring that Texas maintains regulatory oversight over what could end up being a large segment of its health insurance market.

The exchange concept did not originate with Obamacare. The idea was first proposed in the 1970s, and the model is being used in such politically opposite

states as Utah and Massachusetts. Because of the federal government's 2013 deadline, our current legislative session may provide us the only opportunity to take action to keep the federal government out of our health-insurance market.

As proposed, the Texas connector will provide managed competition among health insurers with standard coverage available in five categories, making it easier to compare policies, providing uniform rules for pricing, and offering consumers the ability to select a policy that meets their coverage and budget needs. Through the connector, comparing and selecting health coverage could become as easy as shopping for your travel arrangements on one of the Internet-based travel services.

The connector would supplement the state's existing health-insurance market, not replace it. Since policies regulated by the state would continue to be sold outside of the connector market, the state could maintain consistent regulatory oversight both inside and outside the connector, thereby avoiding dual regulatory rules that would result from a federally managed exchange. Consistent regulations are critical to helping the state avoid adverse selection issues and limiting confusion among consumers.

To offer coverage within the connector, health plans must be accredited on clinical-quality measures while meeting other criteria regarding marketing rules, standard formats for presenting benefit options and network adequacy. Policies sold within the exchange will be required to offer a minimum level of essential benefits that cover hospitalization, medical and surgical care, emergency services, ambulatory patient care, maternity and newborn care, treatment for mental health and substance abuse disorders, prescription drugs, rehabilitation services and devices, laboratory services, pediatric care and prevention and wellness services.

Something must be done to rein in the cost of health insurance, and the goal of HB 636 is to bring the cost of coverage down by promoting competition and ensuring that Texas families and Texas employers have the right to choose their own coverage.

I believe the connector concept is one that's worth exploring, especially if it keeps Texans in charge of our state's health insurance market.

I invite you to join me in protecting our state's interest in managing how we select our health care.

Zerwas, a Republican from Richmond, represents Texas House District 28.

Total Unrestricted General Funds	$650,000
Designated General Funds	
Total Designated General Funds	$0
Other Non-Duplicated Funds	
Total Other Non-Duplicated Funds	$0
Federal Funds	
Total Federal Funds	$0
Duplicated Funds	
Total Duplicated Funds	$0

(SECTION 7 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 7.** DEPARTMENT OF ENVIRONMENTAL CONSERVATION. Section 4, ch. 30, SLA 2007, page 89, line 33, through page 90, line 4, is amended to read:

	APPROPRIATION ITEMS	GENERAL FUND	OTHER FUNDS
Comprehensive Oil and Gas	**2,750,000**	**1,375,000**	**1,375,000**
Infrastructure Risk Assessment Phase 1 (HD 1-40)	[5,000,000]	[2,500,000]	[2,500,000]

* **Sec. 8.** DEPARTMENT OF HEALTH AND SOCIAL SERVICES. (a) Section 16(b), ch. 41, SLA 2010, is amended to read:

(b) If the amount of federal receipts **appropriated in sec. 1, ch. 41, SLA 2010,** [FROM P.L. 111-5 (AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009) APPROPRIATED IN SEC. 1 OF THIS ACT] for state Medicaid programs **for an enhanced federal Medicaid assistance percentage rate** for the fiscal year ending June 30, 2011, is not available to the state in the amount appropriated, the appropriation of federal receipts is reduced by the unavailable amount, and the difference between the amount of federal receipts appropriated and the amount received is appropriated from the general fund to the Department of Health and Social Services for Medicaid programs for the fiscal year ending June 30, 2011.

(b) The sum of $167,065.58 is appropriated from the general fund to the Department of Health and Social Services for the purpose of paying a legal settlement entered into between the Department of Health and Social Services and Hope Community Resources, Inc., related to reimbursement rates for home and community-based services for the fiscal year ending June 30, 2011.

(c) The sum of $132,000 is appropriated from the general fund to the Department of Health and Social Services for the purpose of paying a legal settlement entered into between the Department of Health and Social Services and NANA Management Services related to a nursing home facility for the fiscal year ending June 30, 2011.

* **Sec. 9.** DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT. The sum of $75,000 is appropriated from the workers' safety and compensation administration account (AS 23.05.067) to the Department of Labor and Workforce Development, workers' compensation, for establishment of the workers' compensation medical fee schedule for the

fiscal year ending June 30, 2011.

*** Sec. 10.** DEPARTMENT OF LAW. (a) The sum of $253,176.86 is appropriated from the general fund to the Department of Law, civil division, deputy attorney general's office, for the purpose of paying judgments and settlements against the state for the fiscal year ending June 30, 2011.

(b) The amount necessary, after application of the amount appropriated in (c) of this section, to pay judgments awarded against the state on or before June 30, 2011, is appropriated from the general fund to the Department of Law, civil division, deputy attorney general's office, for the purpose of paying judgments against the state for the fiscal year ending June 30, 2011.

*** Sec. 11.** DEPARTMENT OF NATURAL RESOURCES. (a) Section 12, ch. 2, FSSLA 1999, as amended by sec. 30, ch. 135, SLA 2000, sec. 73(b), ch. 61, SLA 2001, sec. 47(b), ch. 1, SSSLA 2002, sec. 24(*l*), ch. 159, SLA 2004, sec. 34(a), ch. 82, SLA 2006, and sec. 31(a), ch. 29, SLA 2008, is amended to read:

Sec. 12. DEPARTMENT OF NATURAL RESOURCES. The unexpended and unobligated balance of the appropriation made in sec. 9, ch. 139, SLA 1998 (DNR appraisal of public school lands - $432,525) is reappropriated for the fiscal years ending June 30, 2000, June 30, 2001, June 30, 2002, June 30, 2003, June 30, 2004, June 30, 2005, June 30, 2006, June 30, 2007, June 30, 2008, June 30, 2009, June 30, 2010, [AND] June 30, 2011, **June 30, 2012, and June 30, 2013,** to the Department of Natural Resources for an appraisal of public school lands to determine the fair market value of the public school trust land where the land was redesignated as general grant land in 1978.

(b) Section 47(c), ch. 1, SSSLA 2002, as amended by sec. 24(m), ch. 159, SLA 2004, sec. 34(b), ch. 82, SLA 2006, and sec. 31(b), ch. 29, SLA 2008, is amended to read:

(c) The sum of $305,000 is appropriated from the public school trust fund (AS 37.14.110) to the Department of Natural Resources for the fiscal years ending June 30, 2002, June 30, 2003, June 30, 2004, June 30, 2005, June 30, 2006, June 30, 2007, June 30, 2008, June 30, 2009, June 30, 2010, [AND] June 30, 2011, **June 30, 2012, and June 30, 2013,** for an appraisal of public school lands to determine the fair market value of the public school trust land where the land was redesignated as

general grant land in 1978.

(c) Section 22(c), ch. 14, SLA 2009, is amended to read:

(c) Section 12**, ch. 14, SLA 2009,** [OF THIS ACT] lapses June 30, **2012** [2011].

*** Sec. 12.** DEPARTMENT OF PUBLIC SAFETY. Section 1, ch. 43, SLA 2010, page 3, lines 8 - 9, is amended to read:

	APPROPRIATION ITEMS	GENERAL FUND
Crime Lab Replacement (HD 17-32)	**70,750,000**	**70,750,000**
	[75,750,000]	[75,750,000]

*** Sec. 13.** DEPARTMENT OF REVENUE. (a) Section 36, ch. 43, SLA 2010, is amended to read:

Sec. 36. DEPARTMENT OF REVENUE. The amount necessary for the purpose, estimated to be $4,766,400, is appropriated from the general fund to the Department of Revenue, State Bond Committee, to pay expenses incident to the sale and issuance of general obligation bonds for library, education, and educational research facilities for the fiscal **years** [YEAR] ending June 30, 2011**, June 30, 2012, and June 30, 2013**.

(b) Section 13(b), ch. 14, SLA 2009, is amended to read:

(b) Section 9, ch. 1, 4SSLA 2008, is amended by adding a new subsection to read:

(c) The appropriation made in sec. 1(b)**, ch. 1, 4SSLA 2008, as amended by sec. 13(a), ch. 14, SLA 2009, lapses June 30, 2011** [OF THIS ACT DOES NOT LAPSE].

*** Sec. 14.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. The unexpended and unobligated balances, not to exceed $4,000,000, of the appropriations made in sec. 22(a) and (b), ch. 41, SLA 2010 (Office of the Governor, distribution to state agencies to offset increased fuel and utility costs) and allocated to the Department of Transportation and Public Facilities under sec. 22(d)(1), ch. 41, SLA 2010, are reappropriated to the Department of Transportation and Public Facilities for Alaska marine highway system vessel and terminal overhaul and rehabilitation.

*** Sec. 15.** FUND CAPITALIZATION. The unexpended and unobligated balance on the effective date of this section of the income assets of the Alaska children's trust fund (AS 37.14.200(a)), estimated to be $204,000, is appropriated to the Alaska children's trust fund grant account (AS 37.14.205(a)) for the purposes allowed by AS 37.14.205(b).

*** Sec. 16.** STATE DEBT AND OTHER OBLIGATIONS. Section 32(n), ch. 41, SLA 2010, is amended to read:

(n) The sum of $50,047,900 is appropriated to the state bond committee for payment of debt service and [TRUSTEE] fees on outstanding international airports revenue bonds for the fiscal year ending June 30, 2011, from the following sources in the amounts stated:

SOURCE	AMOUNT
International Airports Revenue Fund	**$44,640,292**
(AS 37.15.430(a))	[$46,847,900]
Passenger facility charge	**5,200,000**
	[3,200,000]
Build America Bonds interest subsidy receipts	**207,608**

*** Sec. 17.** RATIFICATIONS OF CERTAIN EXPENDITURES. (a) The expenditures by the Department of Natural Resources for fire suppression for the fiscal year ending June 30, 2010, (AR 37313-10 Fire General Fund) are ratified in the amount of $23,458,478.12.

(b) The expenditures by the Department of Public Safety for highway safety for the fiscal year ending June 30, 2010, (AR 47834-10 Bureau of Highway Patrol RSA with DOT/PF) are ratified in the amount of $18,407.80 to reverse the negative account balance in the Alaska state accounting system in the amount listed for the AR number. The appropriation from which those expenditures were actually paid is amended by increasing the appropriation by $18,407.80.

*** Sec. 18.** STATUTORY BUDGET RESERVE FUND. The unobligated balance of the operating general fund (state accounting system fund number 11100) at the close of business on June 30, 2011, is appropriated to the budget reserve fund (AS 37.05.540(a)).

*** Sec. 19.** LAPSE. (a) The appropriation made in sec. 14 of this Act is for a capital project and lapses under AS 37.25.020.

(b) The appropriations made in secs. 15 and 18 of this Act are for the capitalization of

funds and do not lapse.

*** Sec. 20.** CONTINGENCY. The appropriation made in sec. 9 of this Act is contingent on passage by the Twenty-Seventh Alaska State Legislature in the First Regular Session and enactment into law of a version of HB 13.

*** Sec. 21.** This Act takes effect May 17, 2011.

Senate Slow Track Supplemental
April 19, 2011

	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	Governor Supplemental Request						Senate Slow Track Supplemental					
					UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
				Grand Total (excluding ratifications)	**54,655.1**	**(7,629.7)**	**19,409.9**	**90,290.8**		**156,726.1**	**53,783.6**	**(9,278.4)**	**19,389.9**	**71,151.6**	**0.0**	**135,046.7**
1	1	Administration	Administrative Hearings	Increase program receipts authority to allow agency to retain receipts collected from school districts, municipalities and other government entities for hearing officers and related work performed under current statutes. Without this authority to retain the receipts, the agency will be short funded and rates charged to other State agencies will remain higher than necessary. A similar request is in the FY2012 Governor budget.		50.0			GF/PR	50.0		50.0			GF/PR	50.0
2	1	Administration	Retirement and Benefits	A net-zero fund source reallocation is necessary based on the Retirement and Benefits cost allocation plan. This request will adjust the authorization levels for the Teachers Retirement System, the Judicial Retirement System, the National Guard and Naval Militia Retirement System and the Benefits System Receipts appropriations. A similar request is in the FY2012 Governor budget.					(100.0) Ben Sys 150.0 TRS (25.0) Jud Retire (25.0) Nat Guard	0.0					(100.0) Ben Sys 150.0 TRS (25.0) Jud Retire (25.0) Nat Guard	0.0
3	1	Administration	Office of Public Advocacy	This request will allow Office of Public Advocacy to receive and expend fees collected from clients for client services. These additional funds will be used for continued Guardianship programs. A similar request is in the FY2012 Governor budget.			110.0		SDPR	110.0			110.0		SDPR	110.0
4	1	Administration	Office of Public Advocacy	Increase operational caseload costs. The Office of Public Advocacy's (OPA) criminal case assignments increased by 35% and the agency's Child in Need of Aide (CINA) parental representation assignments increased by 39%. To date, the agency has continued to experience caseload increases. The need for a supplemental is attributable to the contractual case costs. The majority of these costs are for services provided in Public Defender Agency conflict cases. The impact of this request is being considered for a FY2012 budget amendment.	900.0					900.0	900.0					900.0
5	1	Administration	Public Defender Agency	Increased Operational Caseload Costs. The Public Defender Agency has experienced consistent caseload increases in all areas in the past several years. Additional funding is needed for unanticipated contract expenses for ongoing efforts to address backlog of appellate matters. The impact of this request is being considered for a FY2012 budget amendment.	300.0					300.0	300.0					300.0
6	1	Commerce, Community and Economic Development	AIDEA	System acquisition and development of software to track, monitor and report AIDEA program activities. This will assist AIDEA in making effective and timely decisions in regard to investments in loan and project development programs. This is a one-time increment.			110.0		AIDEA Rcpts	110.0			110.0		AIDEA Rcpts	110.0

Senate Slow Track Supplemental
April 19, 2011

	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	Governor Supplemental Request						Senate Slow Track Supplemental					
					UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
7	1	Commerce, Community and Economic Development	Alaska Seafood Marketing Institute	The Department of Administration, Division of Finance made a change to the ASMI financial statement presentation to address an audit issue in compliance with government accounting standards and maintain the State of Alaska's certificate of excellence for the Comprehensive Annual Financial Report. This change resulted in a cash flow issue for ASMI as the assessments that support a substantial portion of ASMI's budget are not collected until fiscal year end. To address the cash flow issue in the current year, and avoid a 50% reduction in ASMI domestic marketing activity for FY2011, this one-time adjustment will address the cash flow issue and allow ASMI to push forward industry assessments for spending in the next fiscal year. This will allow ASMI to budget based on actual receipts from the prior year and cash on hand.	6,400.0	(6,400.0)			GF/PR	0.0	6,400.0	(8,054.1)			GF/PR	(1,654.1)
8	1	Corrections	Out-of-State Contractual	Colorado contract increase from 900 to 1,000 beds due to continued inmate population growth - The out-of-state prisoner population was over 970 at the end of December 2010 and in-state population continues to average 100% of maximum capacity.	332.5					332.5	332.5					332.5
9	1	Corrections	Institution Director's Office	Personal services and commodities shortfalls due to continued inmate population growth - Daily average population through the end of December 2010 was 3,826 or 48 above the maximum daily capacity of 3,778, driving an increase in necessary correctional officer overtime, and an increased costs for food, clothing, bedding, etc. The impact of this is being considered for an FY2012 budget amendment.	3,504.4					3,504.4	3,171.9					3,171.9
10	1	Corrections	Institution Director's Office	ACOA arbitration agreement costs - Original calculations of the authority needed to fund the monetary terms of the ACOA bargaining agreement were not sufficient for FY2011. This funding is needed to cover personal services costs for existing correctional officers.	439.4				all	439.4	439.4				all	439.4
11	1	Corrections	Wildwood Correctional Center	The 64-bed expansion is delayed due to conversion of Building 15. These beds will be available in FY2012.	(498.0)	(8.0)			GF/PR	(506.0)	(498.0)	(8.0)			GF/PR	(506.0)
12	1	Corrections	Community Residential Centers	Community residential center contract increase - Contract amounts were increased based on several factors: the recent increase to the Consumer Price Index (CPI), an increase to the negotiated bed rate for Northstar and an increase in the number of contracted beds serving the Fairbanks area. The increase for CPI and negotiated bed rates are proposed in the FY2012 budget. The cost of the additional beds is being considered for an FY2012 amendment.	751.3					751.3	751.3					751.3
13	1	Corrections	Physical Health Care	Physical Health Care costs - The department is obligated to provide essential medical care to incarcerated individuals. Due to numerous position vacancies and staff absences, combined with 24/7 coverage requirements in most of the facilities, costs for premium pay and unbudgeted on-call non-permanent positions are in excess of available authority. Additionally, both the number and cost of catastrophic cases and other contracted services continues to rise. DOC is actively pursuing multiple cost containment measures, while continuing to meet standards of care for prison population. The impact of this supplemental will be considered for an FY2012 amendment.	4,011.5					4,011.5	4,011.5					4,011.5

					UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
14	1	Environmental Conservation	State Support Services	Increased lease costs for the Juneau office building. Statewide, lease costs for the department have increased 87% over the past seven years. The department has taken cost cutting measures to cover increased lease costs, but cannot absorb this increase that was brought to their attention late in December 2010. There is an increase for lease costs included in the FY2012 Governor's budget for the Anchorage office building. An increase for the Juneau office building is also being considered for an FY2012 amendment.		33.6	11.1	43.1	18.7 Oil/Haz Fd 11.1 Clean Air 3.4 CPVE 11.5 Ocn Rngr	87.8		33.6	11.1	43.1	18.7 Oil/Haz Fd 11.1 Clean Air 3.4 CPVE 11.5 Ocn Rngr	87.8
15	1	Fish and Game	Wildlife Conservation Special Projects	Increase Statutory Designated Program Receipts (SDPR) authority to a) accept a $236.0 grant from the National Fish and Wildlife Foundation (NFWF) for Phase 2 of the following project: Reducing Conflicts Between Grizzly Bears and Oil Development; and b) accept a $100.0 contract from the Western Governors' Association to identify, prioritize, and display in geographical information system (GIS) format, crucial wildlife habitats and corridors in the state of Alaska. Receipt of these funds were not anticipated when the FY2011 budget was prepared. It is anticipated that these projects will be completed in FY2011. Sufficient SDPR authority exists should the projects continue into FY2012.			336.0		336.0 SDPR	336.0			336.0		336.0 SDPR	336.0
16	1	Health and Social Services	Foster Care Base Rate	Increase federal economic stimulus funding authority (ARRA) to receivable levels claimed for foster care assistance available through Title IV-E of the Social Security Act. Federal reimbursement of foster care expenses fluctuate depending on the number of children eligible for assistance. The economic stimulus funding (ARRA) will not be available in FY2012 and is not included in the FY2012 budget.				120.0		120.0				120.0		120.0
17	1	Health and Social Services	Foster Care Augmented Rate	Increase federal economic stimulus funding authority (ARRA) to receivable levels claimed for foster care assistance available through Title IV-E of the Social Security Act. Federal reimbursement of foster care expenses fluctuate depending on the number of children eligible for assistance. The economic stimulus funding (ARRA) will not be available in FY2012 and is not included in the FY2012 budget.				100.0		100.0				100.0		100.0
18	1	Health and Social Services	Subsidized Adoptions/Guardians	Increase federal economic stimulus funding authority (ARRA) to receivable levels claimed for foster care and adoption assistance available through Title IV-E of the Social Security Act. Federal reimbursement of adoption expenses fluctuate depending on the number of children eligible for assistance. The economic stimulus funding (ARRA) will not be available in FY2012 and is not included in the FY2012 budget.				260.0		260.0				260.0		260.0
19	1	Health and Social Services	McLaughlin Youth Center	Funding for increased medical costs for youth. The division has experienced unanticipated medical costs, which include one cancer and one cardiac case. If this supplemental request is not approved, the division will have to cut other programs, i.e., probation services, community programs or youth courts to fund this gap.	450.0					450.0	450.0					450.0
20	1	Health and Social Services	McLaughlin Youth Center	Division of Juvenile Justice has experienced very little turnover and few vacancies since the beginning of the fiscal year and higher than anticipated premium pay costs . During the first five months of the fiscal year, McLaughlin Youth Center had very few vacancies; some components had no vacancies. A $500.0 increase is included in the FY2012 budget.	500.0					500.0	500.0					500.0

Senate Slow Track Supplemental
April 19, 2011

					Governor Supplemental Request						Senate Slow Track Supplemental					
	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
21	1	Health and Social Services	Alaska Temporary Assistance Program (ATAP)	Additional federal authority is needed to receive the full funding anticipated to be available under the Temporary Assistance for Needy Families block grant. An increase is being considered in the FY2012 Governor Amended budget.				4,500.0		4,500.0				4,500.0		4,500.0
22	1	Health and Social Services	General Relief Assistance	A 6.3% increase in expenditure growth is projected for FY2011, which results in a shortfall of $250.0. The cost of the program has grown due to a significant increase in the number of burials and increased demand for assistance for emergency services as the result of economic changes. Currently, 91% of program expenditures are used to pay for funeral and burial expenses. A $250.0 increase is included in the FY2012 budget.	250.0					250.0	250.0					250.0
23	1	Health and Social Services	Senior Benefits Payment Program	In FY2011, a 10% increase in expenditures is projected due to caseload growth , which results in a shortfall of $1.3 million. The program has grown significantly as outreach efforts have made more seniors aware of these benefits. The increase for FY2012 is included in a Fiscal Note to legislation extending the Senior Benefits Payment Program.	1,300.0					1,300.0	1,300.0					1,300.0
24	1	Health and Social Services	Energy Assistance Program	Additional federal funding is anticipated to be distributed to the state for FY2011. $2.5 million in federal authority is needed to receive the full anticipated federal allocation for the Low Income Home Energy Assistance Program (LIHEAP). An increase is being considered in the FY2012 Governor Amended budget.				2,500.0		2,500.0				2,500.0		2,500.0
25	1	Health and Social Services	Public Assistance Admin	During the 2009 legislative session, $462,000 in ARRA funds were appropriated for administrative costs associated with increased caseloads and improved benefit processing efficiency. DPA was awarded $464,060 in ARRA for the SNAP program. The division will need an additional $2.1 in ARRA authorization to use the full amount of the federal award. The economic stimulus funding (ARRA) will not be available in FY2012 and is not included in the FY2012 budget.				2.1		2.1				2.1		2.1
26	1	Health and Social Services	Public Assistance Field Svcs	Increased funding is requested to fully implement the salary changes resulting from the recently completed Eligibility Technician class study. The salary analysis based on the study has resulted in range and step increases for approximately 60 positions. A $700.0 increase is included in the FY2012 budget.	300.0			300.0		600.0	300.0			300.0		600.0
27	1	Health and Social Services	Nursing	Federal funds budgeted for positions are uncollectible. This request will maintain the vacancy rate at 12.5%. The division has been able to stay within budget during recent years due to difficulty recruiting nurses, which has resulted in a high vacancy rate. Recent efforts to strengthen recruitment of public health nurses resulted in a decreased vacancy rate from 16% in July of 2006 to 11% in May of 2010. If this request is not approved, the division will need to maintain a 17% vacancy rate, which will require layoffs, closing of health centers, and reduced visits to villages. A $1,000.0 increase is included in the FY12 budget and additional funding is being considered in the FY2012 Governor Amended budget.	1,750.0					1,750.0	1,750.0					1,750.0

Senate Slow Track Supplemental
April 19, 2011

					Governor Supplemental Request						Senate Slow Track Supplemental					
	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
28	1	Health and Social Services	State Medical Examiner	Reforms, begun in FY2010, helped stabilize funding for an increased caseload. However, actual cost increases exceeded estimates, resulting in a $300.0 projected shortfall for FY2011. The number of cases under the Medical Examiner's Office jurisdiction increased 28% from FY2009 to FY2010. Of the 3,300 deaths reported in Alaska during FY2010, the Medical Examiner's Office took jurisdiction in 60% of the cases (1,989), up from 46% in FY2009 (1,556/3,362). The number of cases examined or autopsied doubled from 377 (24%) to 754 (38%) cases. This trend is expected to continue. A $500.0 increase is included in the FY2012 budget.	300.0					300.0	300.0					300.0
29	1	Health and Social Services	Public Health Laboratories	During the past five years, the number of tests performed has nearly doubled from 77,000 to over 148,000. The complexity and cost of these tests have increased exponentially while the budget has remained stable. Additionally, overhead costs have increased more than 25% during the same period. Without additional funding, vital and life-saving testing, such as for tuberculosis, hepatitis, botulism, and rabies, may have to be curtailed or eliminated. A $100.0 increase was included in the FY2012 budget. Additional funding is being considered for an FY2012 amendment.	200.0					200.0	200.0					200.0
30	1	Health and Social Services	Gen'l Relief/Temp Assisted Living	The average cost per recipient in FY2009, for 898 unique recipients, was $7,058. In FY2010, an average of 494 individuals monthly and 961 unique individuals were served at an average expenditure of $7,447 per individual. The division anticipates serving on average minimum of 510 clients monthly during FY2011. The increased utilization is due to longer lengths of stay and higher compensation to providers necessitated by increased medical and behavioral needs of recipients. An increase is being considered in the FY2012 Governor Amended budget.	825.0					825.0	825.0					825.0
31	1	Health and Social Services	Senior/Disabilities Svcs Admin	Increased costs will be incurred to comply with the Centers for Medicare and Medicaid Services (CMS) approved Corrective Action Plan (CAP). The sweeping multi-faceted plan requires diverse expenditures: non-permanent staff to eliminate a significant assessment backlog, travel to complete required assessments, contractual costs for modifying the management information system, and additional supplies and equipment used by the additional employees. Without this funding, required work will not be performed, participants will be at risk, and new applicants will not be able to access the system. Non-compliance with federal requirements may result in non-renewal of waivers and civil litigation. An increase of $1,250.0 is included in the FY2012 budget.	1,400.0					1,400.0	1,400.0					1,400.0
32	1	Health and Social Services	Behavioral Hlth Medicaid Svcs	Growth in projected costs are due to the increases in enrollment and spending over the past eight months. Enrollment has increased 8.3%, from 103,802 in December 2009 to 112,440 in December 2010. Spending during FY2010 was at the upper end of the estimates, so the 2011 projections have increased to reflect this higher baseline. Projected spending for 2011 is 10.6% more than spending in 2010. Spending grew by 10.7% from 2009 to 2010. Projected increases have been included in the FY2012 budget.	556.4			4,061.1		4,617.5	556.4			4,061.1		4,617.5

	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	Governor Supplemental Request						Senate Slow Track Supplemental					
					UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
33	1	Health and Social Services	Adult Prev Dental Medicaid Svcs	Growth in projected costs are due to the increases in enrollment and spending over the past eight months. Enrollment has increased 8.3%, from 103,802 in December 2009 to 112,440 in December 2010. Spending increased by 24.5% when comparing the first half of FY10 to the first half of FY11. Projected increases have been included in the FY2012 budget.	72.1			141.9		214.0	72.1			141.9		214.0
34	1	Health and Social Services	Health Care Medicaid Services	Growth in projected costs are due to the increases in enrollment and spending over the past eight months. Enrollment has increased 8.3%, from 103,802 in December 2009 to 112,440 in December 2010. In addition, spending during FY2010 was at the upper end of the estimates, so the 2011 projections have increased to reflect this higher baseline. Projected spending for 2011 is 8.0% more than spending in 2010. Spending grew by 15.2% from 2009 to 2010. Projected increases have been included in the FY2012 budget.	4,296.1			20,312.2		24,608.3	4,296.1			20,312.2		24,608.3
35	1	Health and Social Services	Senior/Disabilities Medicaid Svc	Growth in projected costs are due to the increases in enrollment and spending over the past eight months. Enrollment has increased 8.3%, from 103,802 in December 2009 to 112,440 in December 2010. In addition, spending during FY2010 was at the upper end of the estimates, so the 2011 projections have increased to reflect this higher baseline. Projected spending for 2011 is 16.7% more than spending in 2010. Spending grew by 14.6% from 2009 to 2010. Projected increases have been included in the FY2012 budget.	4,982.1			15,270.3		20,252.4	4,982.1			15,270.3		20,252.4
36	1	Health and Social Services	Senior/Disabilities Medicaid Svc	Increase funding to implement the new rate methodology for reimbursing providers for Medicaid Home and Community Based Services. A change to the rate system was advocated by the legislature, provider community, recipients and their advocates. Implementation of the new rate system is scheduled for March 1, 2011. $14,000.0 has been included in the FY2012 budget.	1,473.2			2,046.8		3,520.0	1,473.2			2,046.8		3,520.0
37	1	Labor and Workforce Development	AVTEC	Increases the FY2011 statutory designated authorization for Cook Inlet Tribal Council Health Professions Grant that is needed to support health professionals training program expenses. $300.0 in SD/PR is included in the FY2012 budget.			100.0		SDPR	100.0			100.0		SDPR	100.0
38	1	Law	Third JD: Outside Anchorage	Kenai prosecuting district attorneys - Two attorney positions were added in FY2011 with 75% funding approved, based on an assumption that hiring would take some time. The department was able to successfully recruit and fill these positions on 8/2/2010 and 9/1/2010. Full funding for these positions is included in the FY2012 budget.	50.0					50.0	50.0					50.0
39	1	Law	Dep. Attorney General's Office	Legal analysis and litigation on items not anticipated in the FY2011 budget - election matters, public record requests, Planned Parenthood, Nikishka Beach road access, and citation and regulatory changes	705.3					705.3	705.3					705.3
40	1	Law	Environmental Law	Nunamta v. State/Pebble Limited Partnership - Plaintiffs allege that the State committed constitutional violations around authorization of temporary land and water use during mineral exploration activities. Interagency Receipts are from the Department of Natural Resources for ongoing efforts related to this case.			300.0		I/A Rcpts	300.0			300.0		I/A Rcpts	300.0

Senate Slow Track Supplemental
April 19, 2011

	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	Governor Supplemental Request						Senate Slow Track Supplemental					
					UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
41	1	Natural Resources	Mining and Land Development	Litigation support to defend the permitting process on State land - To cover the costs of defending the state's permitting and planning process against litigation related to multiple projects, but centered on the Pebble Project. There is $500.0 included in the FY2012 budget.	328.2					328.2	328.2					328.2
42	1	Natural Resources	Land Acquisition and Title Defense	Oversight of Federal Land Transfers including Native Allotments and ANCSA Conveyances Federal funding from BLM which has paid for these services was eliminated due to federal budget cuts for federal fiscal year 2011. Funding is included in the FY2012 budget.	41.7					41.7	41.7					41.7
43	1	Natural Resources	Water Development	Permitting Water Use Applications Unrealizable federal and CIP funding authorization combined with program receipts not covering the cost of issuing water applications have caused a funding shortfall. This increment will help hire a vacant position to work on the backlog of permit applications. The FY2012 Governor's budget includes a $275.0 fund source change for this program.	22.0					22.0	22.0					22.0
44	1	Natural Resources	Mental Health Trust Lands Administration	Personal Services Costs The Trust Lands Office is vital to the funding of programs and services provided to Mental Health Trust beneficiaries; without adequate staffing, the lands cannot be managed to their fullest potential, which can result in reduced funding for the Trust. The Alaska Mental Health Board of Trustees approved a supplemental request in order to fund cost increases in personal services for the Executive Director, the Deputy Director and to fund a vacant half time position to continue work on the Southeast Land Exchange between the Trust and the U.S. Forest Service. Additional funding is being considered for an FY2012 amendment.			95.0		MHTAAR	95.0			75.0		MHTAAR	75.0
45	1	Natural Resources	RS 2477/Navigability Assertions and Litigation Support	Access Litigation and Recordable Disclaimer of Interest (RDI) Fees Increased costs for defending legal access to state lands and public trust rights, and increased number of cost recovery fees due to BLM with each recordable disclaimer of interest application. An FY2012 amendment is being considered for continuation of this request.	45.0					45.0	45.0					45.0
46	1	Natural Resources	Fire Suppression Activity	Fire Suppression Activity funding for firefighting activity during FY2011. Payment to BLM for their fire fighting efforts on state owned land in 2010 and for estimated costs to fight spring fires.	9,894.7					9,894.7	9,894.7					9,894.7
47	1	Public Safety	ABC Board	Volunteers of America compliance checks - The ABC Board will conduct compliance checks in coordination with Volunteers of America (VoA) youth members, and VoA has agreed to reimburse the wages of a Board investigator and the fees paid to the youths. Receipt authority is needed to accept these funds. This request will have no impact on FY2012.			15.0		SDPR	15.0			15.0		SDPR	15.0
48	1	Revenue	Child Support Services	Fund source change from federal receipts to federal incentive receipts due to the meeting or exceeding of federal performance standards during the prior federal fiscal year. This is a one-time request.				0.0	154.7 Fed Incent (154.7) Fed Repts	0.0				0.0	154.7 Fed Incent (154.7) Fed Repts	0.0

The Honorable Bert Stedman
Co-Chair, Senate Finance Committee
Alaska State Legislature
State Capitol, Room 516
Juneau, AK 99801-1182

Re: FY2011 Supplemental Hearing Follow Up

Dear Co-Chair Hoffman and Co-Chair Stedman,

Thank you for the opportunity to present highlights of the Governor's FY2011 supplemental request before the Senate Finance committee on February 3. The enclosed information is in response to questions posed by the committee for distribution to the finance committee members.

Please provide more detail on the prison population growth by region. Is the Department of Corrections is looking at how other states are managing increased prison populations, higher costs (both of incarceration and medical costs), recidivism, and overall corrections management?

The enclosed letter from the Department of Corrections, dated February 24, 2011, is in response to these questions and includes four charts on prison population growth by region.

Please provide more information regarding the projected annual amount of "special" legal costs as requested by the Department of Law in the $5 million appropriation in the capital budget.

The $5,000.0 Oil, Gas, and Mining outside counsel request in the capital budget provides funding for tariff proceedings ($4,000.0) and taxes ($1,000.0). Previously the funding for outside counsel has been included in the operating budget as a one-time increment. However, the timing of these cases is not under the control of the Department of Law and if the cases are delayed, the funding lapses and the Department is required to request it in the next fiscal year. Delays have resulted in the Department returning $500.0 to the Governor's Office in FY09 and a re-appropriation of $884.0 last year.

The $5,000.0 request provides funding for outside counsel and expert witnesses in oil and gas matters. Matters currently being pursued by the Department of Law are listed on the enclosed 6-page summary.

printed on recycled paper

Please provide more information about the legal costs associated with the recent general election, and how much cost recovery had been collected from candidate Miller, based on the cost of his appeals.

The State has timely moved for a Rule 82 award of attorney's fees in the state superior court case. Rule 82 allows a prevailing party in a case resolved without trial to be awarded 20 percent of its attorney's fees incurred in the superior court case. The State has requested a 20 percent award in the amount of $16, 960.55. Miller has filed an opposition to that motion and the State filed its reply on February 4, 2011. Nothing has been awarded by the court at this point so there is no timeframe yet for reimbursement.

In the Alaska Supreme Court, it was ordered that each side would bear its own costs and attorney's fees. So, the State will not recover any monies for the appellate portion of the case. Attorney's fees relating to the federal court proceedings are not recoverable.

Please contact me if you have additional questions.

Sincerely,

Karen J. Rehfeld
Director

February 24, 2011

The Honorable Bert Stedman
Alaska State Senate
State Capitol, Room 516
Juneau, Alaska 99801

The Honorable Lyman Hoffman
Alaska State Senate
State Capitol, Room 518

Dear Senator Stedman & Senator Hoffman:

Below you will find responses to questions raised in the Senate Finance Committee on the supplemental budget, specific to the Department of Corrections. We hope that the information below will fulfill the committee's inquiries.

More detail on prison population growth by region.

Please see attached graphs with detailed information on population rates by region from 2003 through 2011. *(4 graphs attached)*

Is DOC looking at how other states are managing increased prison populations, higher costs, recidivism and overall corrections management?

Yes. DOC is currently examining what the State of Texas has done to manage their prison populations and costs. The model that Texas used has proven to be successful and is illustrative of what Alaska is able to accomplish with leadership, vision and commitment to invest wisely today in best practices that have been shown to reduce prison growth and to cut state corrections spending.

The Texas Experience
In 2007, the famously "tough on crime" Texas legislature took dramatic, bipartisan action to control crime and corrections costs. This initiative was led by Republican Jerry Madden who was appointed by the majority leader as Chairman of the Corrections Committee. The then speaker of the house instructed Rep. Madden to develop new approaches to slow Texas' rapid prison growth. "Don't build

new prisons. They cost too much".[1] With that directive in mind, Rep. Madden, an engineer and graduate from West Point, gathered the data and the facts to develop a systematic approach to break the cycle of crime.

In 2007, Texas' prison population exceeded 100,000 persons.[2] At the start of 2007, the state's corrections department projected a shortfall of 17,000 prison beds over the next five years and recommended the construction of 4,000 new beds at a cost of more than $900 million. Texas legislators requested assistance from the Pew Center on the States' Public Safety Performance Project and its partner, the Council of State Governments Justice Center (CSG), to identify options to avert prison growth while protecting public safety.

Based on their nonpartisan research and the menu of policy options they prepared, the 2007 Texas legislature approved a plan that provided an historic investment of just over $241 million in treatment and diversion facilities and substance abuse treatment services (just over a quarter of what was being requested to build new prisons) both behind prison walls and in community-based programs.

The components of Texas' new approach included:

- Funding for probation officers to use for outpatient substance abuse treatment for offenders.
- Funding for a mental health Pre-Trial Diversion Program
- Expansion of in-custody substance abuse Therapeutic Communities (like ADOC's RSSAT program).
- A prison dedicated to providing DWI offenders with intensive substance abuse treatment.
- Use of Intermediate sanction facilities for probationers who violate probation conditions.
- Early school intervention programs
- The Nurse Family Partnership program

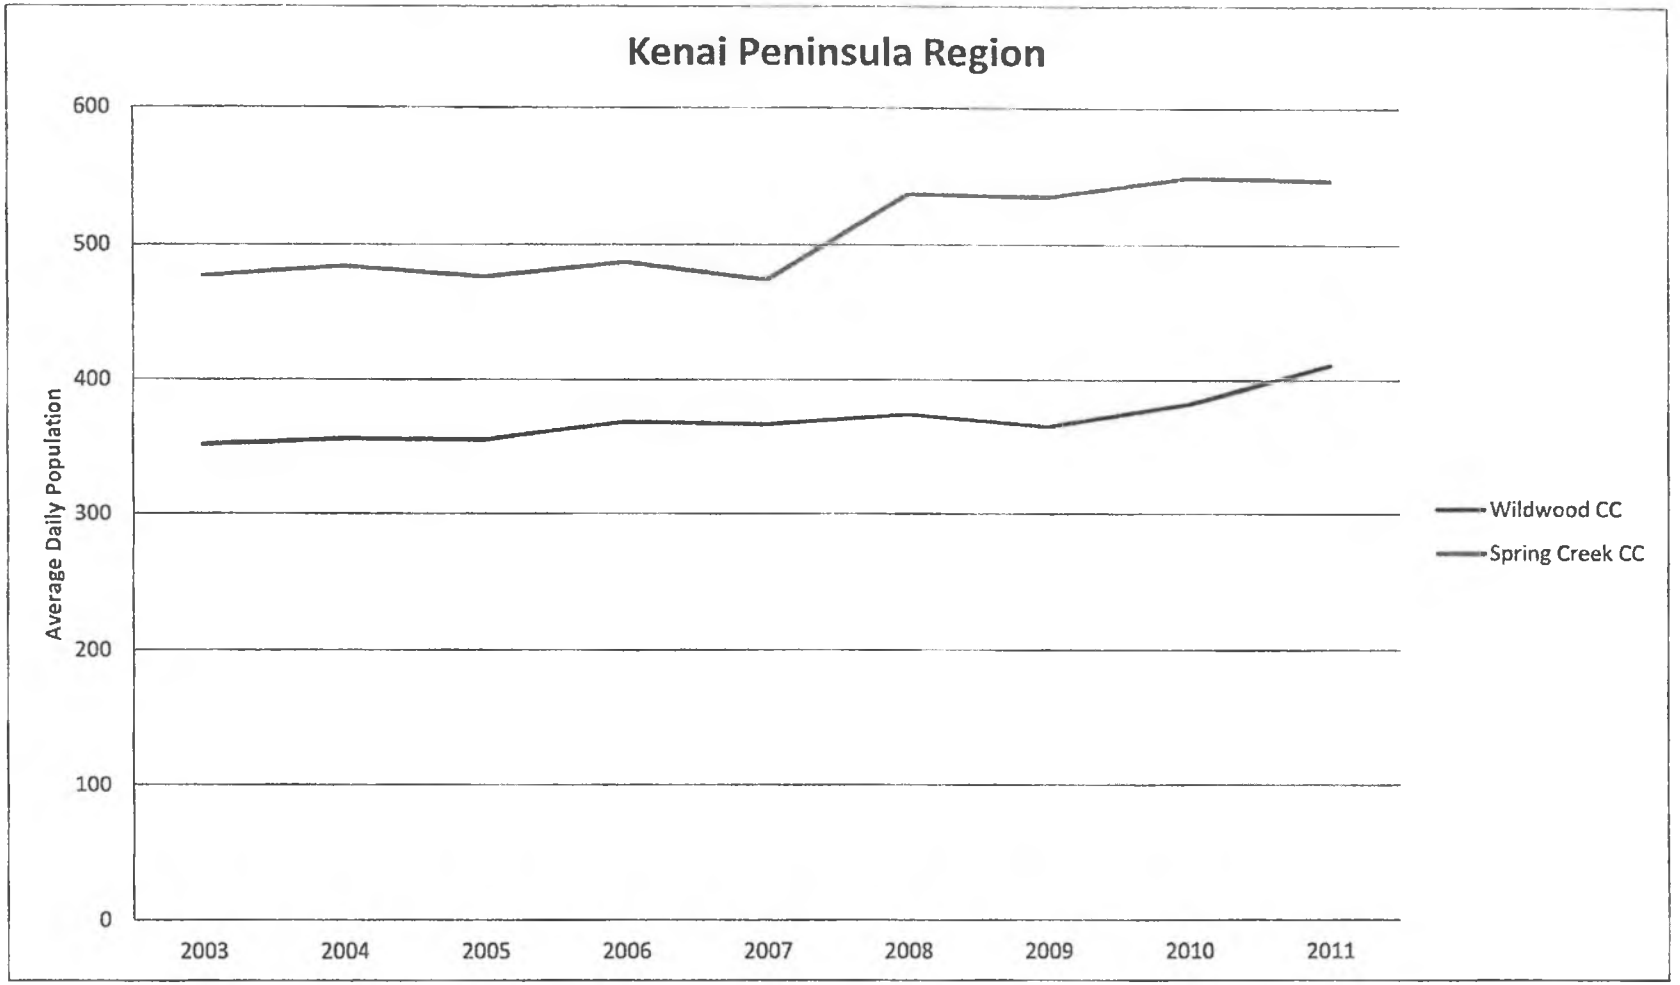
With these and other measures, the Texas legislature successfully averted construction of all of the previously planned prison beds through 2012.[3]

According to Rep. Madden, who spoke at the September Cost-Effective Justice Forum held in Anchorage, the Texas prison population completely leveled off as a result of these initiatives. No shortfall in capacity is predicted until 2013, when the system may need a relatively small number of prison beds compared to the previously predicted need for eight prisons. Moreover, following the adoption of these reforms, Texas' crime rate did not increase, but continued to fall.

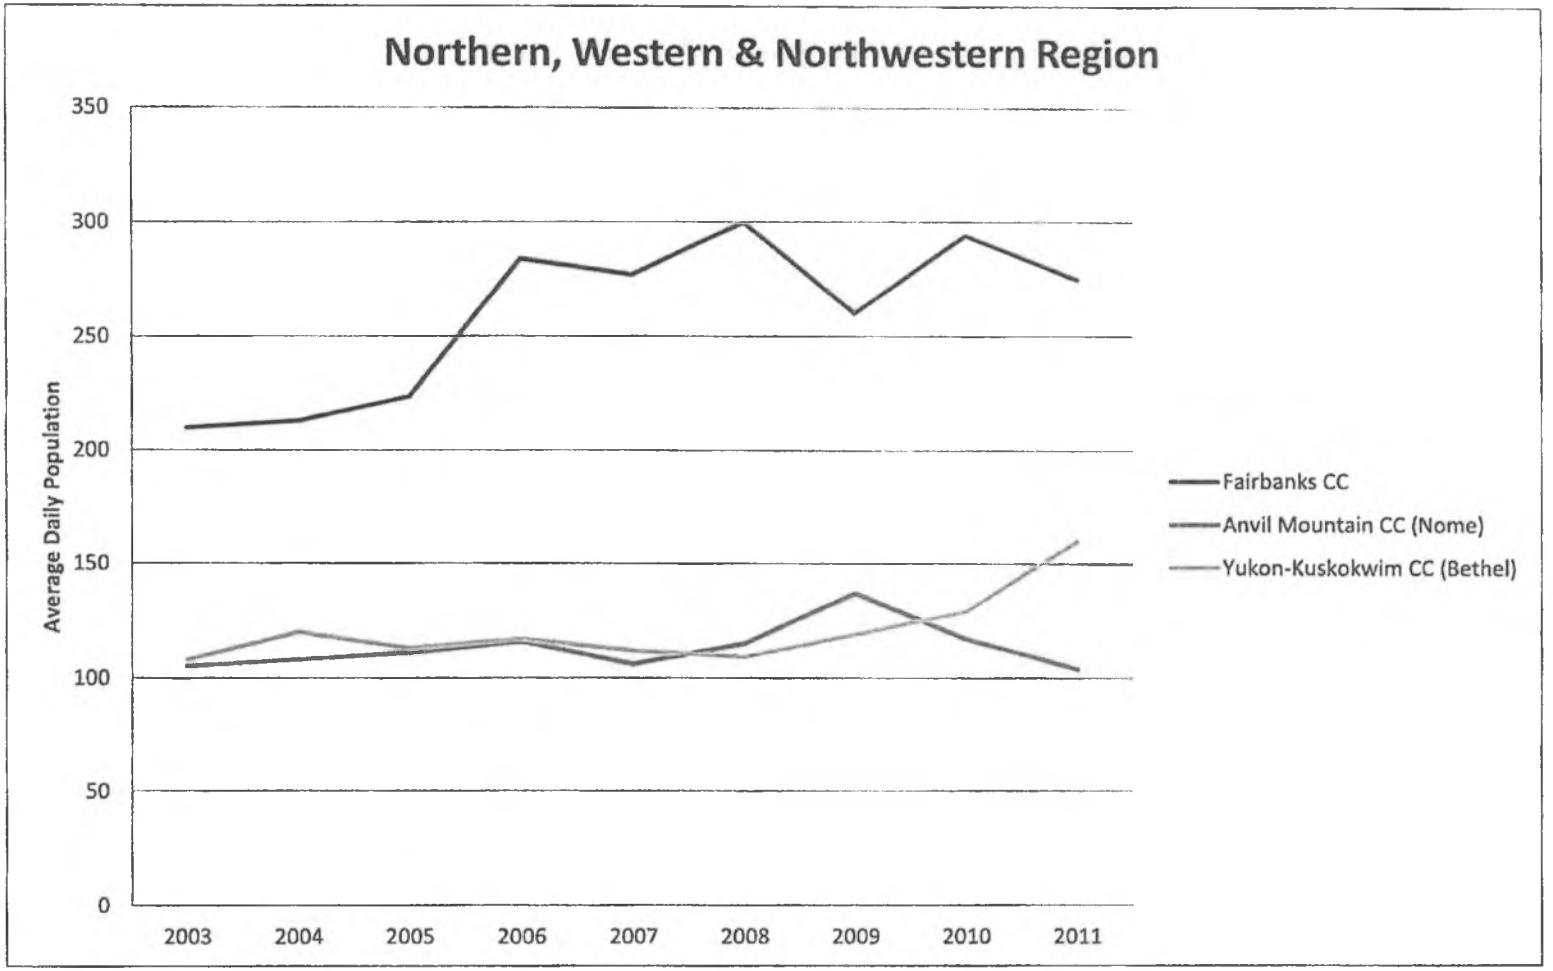
DOC believes that if this model was used in Alaska, we too could have the result of reduced prison population growth and reduced spending.

---

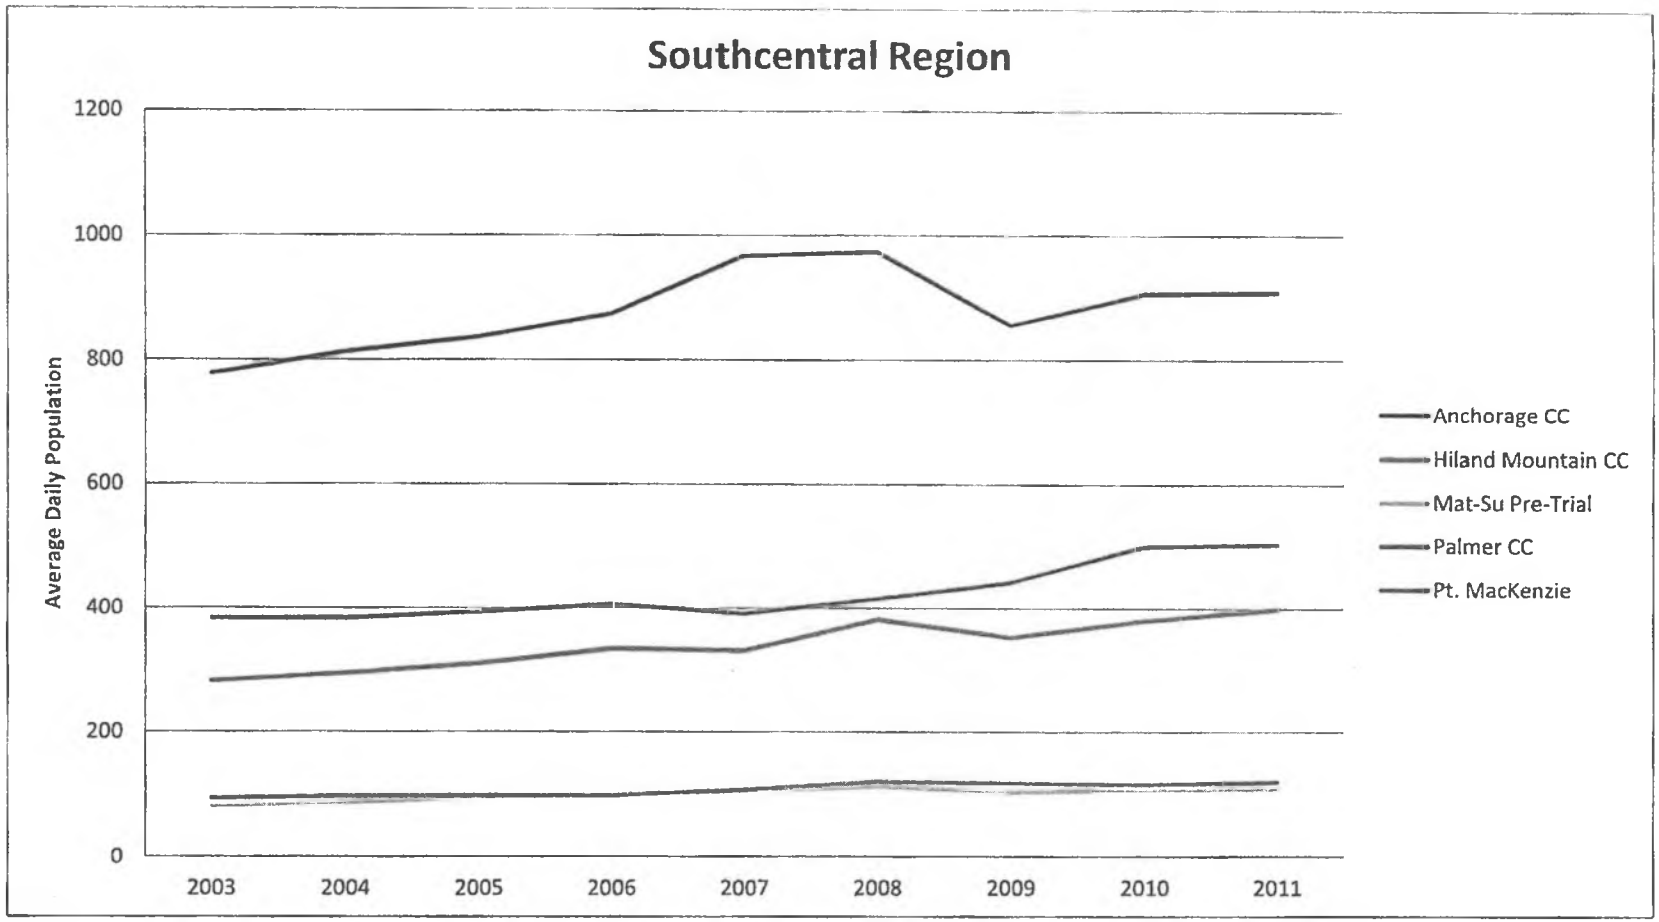
[1] Anchorage Daily News editorial, *Be tough, be smart,* September 19, 2010.



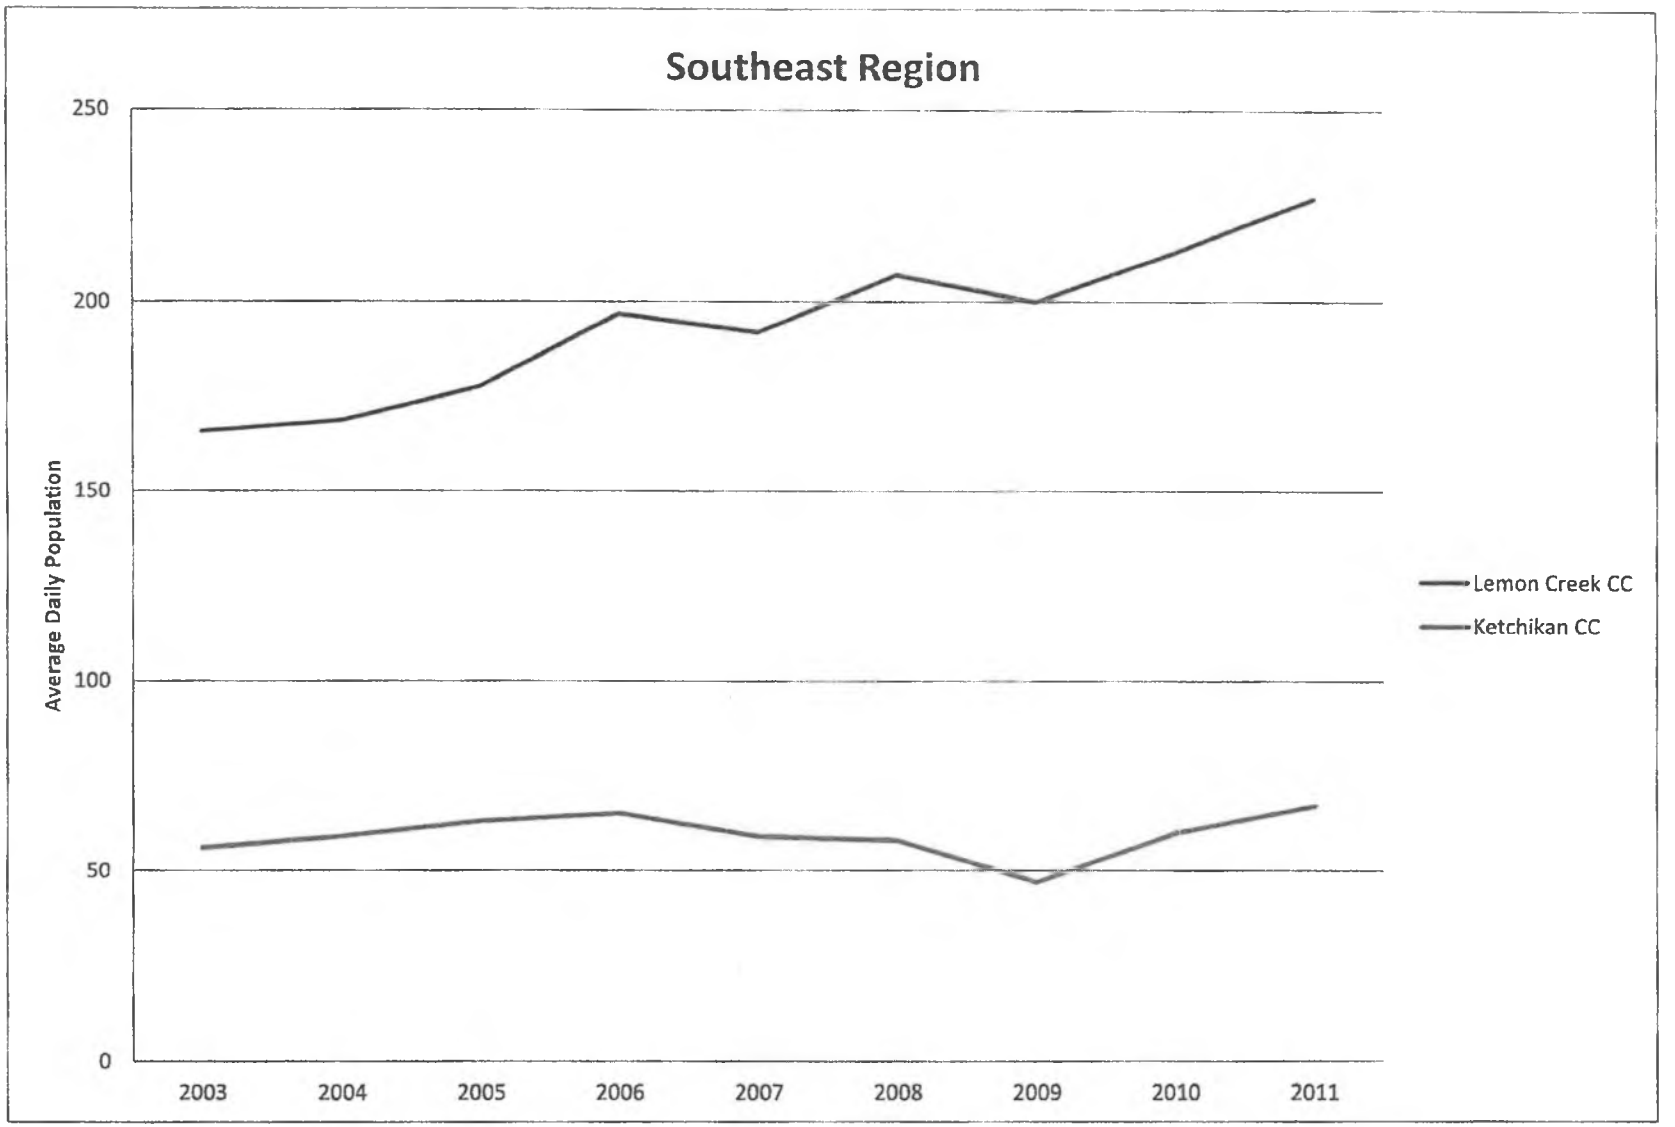
[2] Recent & Projected Growth of the Texas Prison Population, Justice Center (2007), The Council of State Governments, found at: http://justicereinvestment.org/files/texas-growth.pdf



[3] The Texas "justice reinvestment" approach was a dramatic turn in Texas' criminal justice policies. The state legislature committed to ensuring accountability and the continued success of these new measures. Accordingly, the Texas legislature established the Criminal Justice Legislative Oversight Committee to monitor and evaluate the implementation of the new policies and programs and to evaluate their impact on state prison populations.



It is our hope that the information provided has been helpful to the committee. If you have any additional questions or need further information, please feel free to contact my office at any time.



Sincerely,

Joseph Schmidt

DEPARTMENT OF LAW OIL, GAS AND MINING SECTION 1/28/2011
MAJOR LITIGATION

Case	Approx. Start Date	Issue(s) and Status	Costs *	Value
TAPS 2005/2006 Interstate Tariffs	December 2004	**Issue:** FERC found 2005/2006 interstate rates too high -- ordered revised lower rates and refunds. State argues that FERC should have lowered rates further to the RCA level. **Status:** US Court of Appeals affirmed FERC on all counts. Deadline for appeals has not expired.	**DOL Expenditures as of 01/11:** $11,117,995 **Anticipated Future Costs:** $10,000 or less	Refunds have resulted in $600 million increased State royalties and production taxes for 2005 2006.
TAPS Interstate and Intrastate Tariffs Strategic Reconfiguration (SR)	December 2004	**Issue:** Were $100's of millions spent on pipeline capital project prudent expenditures? Project is currently about $500 million over budget at project approval. **Status:** State, shippers, and carriers are scheduled for concurrent FERC and RCA hearings starting in November 2011 in Anchorage. State's case (filed testimony and exhibits) January 21, 2011, with answering and reply testimony rounds through 2011.	**DOL Expenditures as of 01/11:** $5,053,098 **Anticipated Future Costs:** $10 million through hearing before the Federal Energy Regulatory Commission.	$15-20 million in refunds, $100's of millions impact on future royalty and production tax
TAPS 2009-2010 and 2010-Forward Intrastate Tariffs	October 2008	**Issue:** Are newly filed TAPS intrastate rates just & reasonable? **Status:** RCA hearing on rate issues anticipated sometime in 2012.	**DOL Expenditures as of 01/11:** $228,440 **Anticipated Future Costs:** * $500,000 through RCA decision.	$6-700,000 per year at present production levels.

* Costs from inception of case.

** Estimates will change as a result of scheduling and substantive decisions from the tribunal, decisions by client agencies, and positions taken by opposing parties. Some of the cases, such as tariff disputes, property tax litigation, and royalty reopeners recur every year and the new cases may be consolidated with existing cases. These estimates do not reflect costs for the new cases.

Case	Approx. Start Date	Issue(s) and Status	Costs	Value
TAPS 2009-Forward Interstate Tariffs	December 2008	**Issue:** Are newly filed TAPS interstate rates just and reasonable? **Status:** FERC hearing on cost pooling completed October 2010. Awaiting decision.	**DOL Expenditures as of 10/10:** $752,580 **Anticipated Future Costs:** $5,000 or less	State settled primary issues resulting in about $9 million in additional taxes and royalties.
Kuparuk Pipeline (KTC) Tariffs	The State filed a complaint December 1, 2008.	**Issue:** State challenges current rates as not just & reasonable. **Status:** The parties have reached an agreement in principle to settle.	**DOL Expenditures as of 10/10:** $428,432 **Anticipated Future Costs:** * $5,000 or less through settlement.	$100's of thousands per year
Tesoro Corporate Income Tax Case (1994-1998)	2004	**Issue**: Whether a company should have filed its tax returns on a unitary, combined basis and is subject to penalties. **Status:** Office of Administrative Hearings decision issued April 2008 and appealed by Tesoro to Superior Court. Oral argument held in September.	**DOL Expenditures as of 10/10:** $2,311,346 **Anticipated Future Costs:** $30,000 through a final decision at the Alaska Supreme Court.	Approx. $16 million.
Production Tax Case (Confidential, although the issue is a matter of public record)	Confidential	**Issue:** Whether DOR's decision to aggregate the Prudhoe Bay Unit (PBU) satellites with the PBU Initial Participating Area for purposes of the Economic Limit Factor (ELF) tax assessments under the former production tax in AS 43.55, was correct. **Status:** Confidential	**DOL Expenditures as of 10/10:** $31,508 **Anticipated Future Costs:** * $5,000 through a final decision at the Alaska Supreme Court. Final resolution of litigated issues expected in late 2012.	Confidential
Corporate Income Tax Case	Confidential	**Status**: Confidential	**Anticipated Future Costs:** $500,000	Confidential

* Costs from inception of case.

** Estimates will change as a result of scheduling and substantive decisions from the tribunal, decisions by client agencies, and positions taken by opposing parties. Some of the cases, such as tariff disputes, property tax litigation, and royalty reopeners recur every year and the new cases may be consolidated with existing cases. These estimates do not reflect costs for the new cases.

TAPS Property Tax Case (Nonconfidential)	June 2006 June 2007 June 2008 June 2009 June 2010	**Issue:** Whether DOR properly assessed property tax value of TAPS in 2007, 2008, 2009, and 2010. 2007-2009 cases consolidated for trial. **Status:** Eight week trial in September 2011 on consolidated 2007-2009 assessments. 2010 appeal awaiting scheduling for trial. State is defending same methodology Judge Gleason affirmed on trial of the 2006 TAPS valuation, which has been appealed to Alaska Supreme Court.	**DOL Expenditures as of 10/10:** $1,843,602 **Anticipated Future Costs:** * $1.6 million through trial on the 2007-2009 assessments and Alaska Supreme Court appeal of Judge Gleason's 2006 decision.	Decisions on appeal result in property tax revenue of $92 million for 2007, $124 million for 2008, $154 million for 2009, and $194 million for 2010. State directly receives approximately 45% of this property tax revenue with remainder apportioned among North Slope and Fairbanks Boroughs and City of Valdez. Superior court 2006 decision resulted in approx. $112 million in additional property tax revenues.
Point Thomson Unit	The DNR decision from which the producers appealed was issued in September 2005.	**Issue:** Whether DNR's decision to terminate the Point Thomson Unit (PTU) due to the producers' failure to develop the PTU, was correct. **Status:** The Alaska Supreme Court accepted Law's petition for review of Judge Gleason's decision reversing DNR's unit termination decision. Supreme Court briefing is currently stayed with status report on state of settlement negotiations due in early March. Related proceedings before AOGCC, the OAH, and the Supreme and Superior Courts are also stayed pending final decision in the unit termination appeal. Anticipate resolution in 2014 if the state wins petition and termination reinstated but if the case goes to trial de novo then 2018. Parties are engaged in settlement negotiations.	**DOL Expenditures as of 10/10:** $2,690,526 **Anticipated Future Costs:** * It could be as low as $3.5 million for lease terminations, appeals, and related proceedings if there is a remand to DNR, and as high as $10 million if there is a trial de novo.	Hundreds of millions in additional tax and royalty if the PTU is developed.

* Costs from inception of case.

** Estimates will change as a result of scheduling and substantive decisions from the tribunal, decisions by client agencies, and positions taken by opposing parties. Some of the cases, such as tariff disputes, property tax litigation, and royalty reopeners recur every year and the new cases may be consolidated with existing cases. These estimates do not reflect costs for the new cases.

Case	Approx. Start Date	Issue(s) and Status	Costs	Value
Royalties – BP	Late 2008	**Issue**: The State is preparing to assert a claim under the Royalty Settlement reopener provisions regarding capital construction funds and other tax benefits. **Status:** Preparing arbitration claim. Anticipate resolution 2012.	**DOL Expenditures as of 10/10:** $413,401 **Anticipated Future Costs:** $1,000,000 through arbitration.	$15-20 million
BP Interest on Retroactive Tariff Adjustments	Late 2009	**Issue:** A claim for interest on retroactive tariff adjustments. **Status:** The BP audit claim for 2004 through 2006 settled for approximately $10 million. 2007-2010 will be arbitrated. State has filed its opening arbitration brief. BP's is due mid-February 2011.	**DOL Expenditures as of 01/11:** $10,000 **Anticipated Future Costs:** * $50,000 through arbitration.	2004 through 2006 were settled for $10 million. It is anticipated that 2007 through 2010 will yield a similar amount.
BP Colville River Unit Audit	July 2010	**Issue:** Audit issues for 2008 through 2009. **Status:** DNR is preparing the audit with assistance from DOL. Anticipate resolution in 2012.	**DOL Expenditures as of 01/11:** $0 **Anticipated Future Costs:** If arbitrated $600,000 and if tried $1,000,000.	$1 million plus
BP Milne Point NPSL	Late 2010	**Issue:** Milne Point NPSL audit claim. **Status:** DNR is finalizing the audit and working with DOL on various procedural issues. Anticipate prosecution will begin by January 2011, if no settlement.	**DOL Expenditures as of 01/11:** $0 **Anticipated Future Costs:** $200,000	$20 million plus

* Costs from inception of case.

** Estimates will change as a result of scheduling and substantive decisions from the tribunal, decisions by client agencies, and positions taken by opposing parties. Some of the cases, such as tariff disputes, property tax litigation, and royalty reopeners recur every year and the new cases may be consolidated with existing cases. These estimates do not reflect costs for the new cases.

Case	Approx. Start Date	Issue(s) and Status	Costs	Value
ConocoPhillips Tri-Annual Reopener	December 7, 2010	**Issue:** ConocoPhillips reopened their settlement agreement and requested a reduction in royalty destination value of approximately $1.89 per barrel below current levels. The state reopened the RSA on the question of capital allowance for tankers and is seeking a reduction in the allowance. **Status:** The case is currently in the RSA specified negotiation period which will last until March 7. It proceeds to arbitration thereafter. DNR is meeting with ConocoPhillips on January 21, 2011.	**DOL Expenditures as of 01/11:** $40,000 **Anticipated Future Costs:** $2,000,000	$50,000,000 approximate
Anadarko and ConocoPhillips Royalty (Colville River Unit) 2004 – 2007	2010	**Issue:** Audit of new form leases which base value on the high three contracts North Slope wide. **Status:** In negotiation.	**DOL Expenditure:** $5,000 **Anticipated Future Costs:** If the case goes to trial $2,000,000	$1 million plus
Northstar Production Allocation Dispute	Late 2009	**Issue:** Dispute between the state and Murphy Exploration (Alaska) Inc. regarding allocation of production from the Northstar participating area between state and federal leases. **Status:** Preparing for hearing.	**DOL Expenditure as of 10/10:** $54,560 **Anticipated additional expenditure:** $150,000	$100 million plus

* Costs from inception of case.

** Estimates will change as a result of scheduling and substantive decisions from the tribunal, decisions by client agencies, and positions taken by opposing parties. Some of the cases, such as tariff disputes, property tax litigation, and royalty reopeners recur every year and the new cases may be consolidated with existing cases. These estimates do not reflect costs for the new cases.

Gas Pipeline	January 1, 2007	**Issue:** Implementation of AGIA Gas Pipeline, analysis of related state and federal legal issues including AGIA licensee reimbursements, represent state's interests before the FERC and federal agencies for gasline certification. Analysis of Canadian legal issues related to gas pipeline through Canada. **Status:** DOL continues to require assistance of outside counsel with FERC and gas pipeline expertise for AGIA implementation related to Precedent Agreement process and timely FERC Certification as well as Canadian regulatory questions.	**DOL Expenditures as of 10/10:** $1,217,061 Approx. $6.845 million Total to date **Anticipated Future Costs:** * The FY09-19 Gasline Operations Summary sets out DOL's anticipated costs for the next ten years. Please let me know if you need a copy of the Summary.	Timely legal analysis and assistance on gas pipeline issues that may have potential benefits or costs to the State in the billions of dollars.
Quality Bank	There have been a series of cases and decisions on this issue since 1979.	**Issue:** The producers and the State are disputing the method of monetarily accounting for commingling of different quality petroleum streams in TAPS. **Status:** The D.C. Cirsuit decision was issued 1/18/2011. Deadline for appeals has not expired.	**DOL Expenditures as of 10/10:** $734,025 (past 6 years) **Anticipated Future Costs:** * $5,000 or less. (This case has been in litigation since 1979.)	This case affects taxes and royalties to the State. However, the value to the State goes beyond absolute dollar amounts because insuring fair accounting for the value of the petroleum stream tendered to TAPS encourages continued investment in Alaska.

* Costs from inception of case.

** Estimates will change as a result of scheduling and substantive decisions from the tribunal, decisions by client agencies, and positions taken by opposing parties. Some of the cases, such as tariff disputes, property tax litigation, and royalty reopeners recur every year and the new cases may be consolidated with existing cases. These estimates do not reflect costs for the new cases.

Senate Fast Track Supplemental
(SB 76)
March 18, 2011

							Governor Supplemental Request						Senate Fast Track Supplemental					
	2	in or out	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
1	1		1	Administration	Administrative Hearings	Increase program receipts authority to allow agency to retain receipts collected from school districts, municipalities and other government entities for hearing officers and related work performed under current statutes. Without this authority to retain the receipts, the agency will be short funded and rates charged to other State agencies will remain higher than necessary. A similar request is in the FY2012 Governor budget.		50.0			GF/PR	50.0		50.0			GF/PR	50.0
2	2		1	Administration	Retirement and Benefits	A net-zero fund source reallocation is necessary based on the Retirement and Benefits cost allocation plan. This request will adjust the authorization levels for the Teachers Retirement System, the Judicial Retirement System, the National Guard and Naval Militia Retirement System and the Benefits System Receipts appropriations. A similar request is in the FY2012 Governor budget.					(100.0) Ben Sys 150.0 TRS (25.0) Jud Retire (25.0) Nat Guard	0.0					(100.0) Ben Sys 150.0 TRS (25.0) Jud Retire (25.0) Nat Guard	0.0
3	3		1	Administration	ALMR	The department is requesting general funds to cover the cost for communities and non-governmental emergency service providers to use of the Alaska Land Mobile Radio infrastructure. Given the limited resources available to municipal and non-governmental emergency service providers, it is in the State's best interest to ensure that local emergency responders have full access to the system. A similar request is in the FY2012 Governor budget.	150.0	(150.0)			(150.0) GF/PR	0.0					(150.0) GF/PR	0.0
4	4		1	Administration	Office of Public Advocacy	This request will allow Office of Public Advocacy to receive and expend fees collected from clients for client services. These additional funds will be used for continued Guardianship programs. A similar request is in the FY2012 Governor budget.			110.0		SDPR	110.0			110.0		SDPR	110.0
5	5		1	Administration	Office of Public Advocacy	Increase operational caseload costs. The Office of Public Advocacy's (OPA) criminal case assignments increased by 35% and the agency's Child in Need of Aide (CINA) parental representation assignments increased by 39%. To date, the agency has continued to experience caseload increases. The need for a supplemental is attributable to the contractual case costs. The majority of these costs are for services provided in Public Defender Agency conflict cases. The impact of this request is being considered for a FY2012 budget amendment.	900.0					900.0	900.0					900.0
6	6		1	Administration	Public Defender Agency	Increased Operational Caseload Costs. The Public Defender Agency has experienced consistent caseload increases in all areas in the past several years. Additional funding is needed for unanticipated contract expenses for ongoing efforts to address backlog of appellate matters. The impact of this request is being considered for a FY2012 budget amendment.	300.0					300.0	300.0					300.0
7	7		1	Commerce, Community and Economic Development	AIDEA	System acquisition and development of software to track, monitor and report AIDEA program activities. This will assist AIDEA in making effective and timely decisions in regard to investments in loan and project development programs. This is a one-time increment.			110.0		AIDEA Rcpts	110.0			110.0		AIDEA Rcpts	110.0

Senate Fast Track Supplemental
(SB 76)
March 18, 2011

							Governor Supplemental Request						Senate Fast Track Supplemental					
	2	In or out	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
8	8		1	Commerce, Community and Economic Development	Alaska Seafood Marketing Institute	The Department of Administration, Division of Finance made a change to the ASMI financial statement presentation to address an audit issue in compliance with government accounting standards and maintain the State of Alaska's certificate of excellence for the Comprehensive Annual Financial Report. This change resulted in a cash flow issue for ASMI as the assessments that support a substantial portion of ASMI's budget are not collected until fiscal year end. To address the cash flow issue in the current year, and avoid a 50% reduction in ASMI domestic marketing activity for FY2011, this one-time adjustment will address the cash flow issue and allow ASMI to push forward industry assessments for spending in the next fiscal year. This will allow ASMI to budget based on actual receipts from the prior year and cash on hand.	6,400.0	(6,400.0)			GF/PR	0.0	6,400.0	[redacted]			GF/PR	(1,654.1)
9	9		1	Corrections	Out-of-State Contractual	Colorado contract increase from 900 to 1,000 beds due to continued inmate population growth - The out-of-state prisoner population was over 970 at the end of December 2010 and in-state population continues to average 100% of maximum capacity.	332.5					332.5	332.5					332.5
10	10		1	Corrections	Institution Director's Office	Personal services and commodities shortfalls due to continued inmate population growth - Daily average population through the end of December 2010 was 3,826 or 48 above the maximum daily capacity of 3,778, driving an increase in necessary correctional officer overtime, and an increased costs for food, clothing, bedding, etc. The impact of this is being considered for an FY2012 budget amendment.	3,504.4					3,504.4	[redacted]					3,171.9
11	11		1	Corrections	Institution Director's Office	ACOA arbitration agreement costs - Original calculations of the authority needed to fund the monetary terms of the ACOA bargaining agreement were not sufficient for FY2011. This funding is needed to cover personal services costs for existing correctional officers.	439.4				all	439.4	439.4				all	439.4
12	12		1	Corrections	Wildwood Correctional Center	The 64-bed expansion is delayed due to conversion of Building 15. These beds will be available in FY2012.	(498.0)	(8.0)			GF/PR	(506.0)	(498.0)	(8.0)			GF/PR	(506.0)
13	13		1	Corrections	Community Residential Centers	Community residential center contract increase - Contract amounts were increased based on several factors: the recent increase to the Consumer Price Index (CPI), an increase to the negotiated bed rate for Northstar and an increase in the number of contracted beds serving the Fairbanks area. The increase for CPI and negotiated bed rates are proposed in the FY2012 budget. The cost of the additional beds is being considered for an FY2012 amendment.	751.3					751.3	751.3					751.3
14	14		1	Corrections	Physical Health Care	Physical Health Care costs - The department is obligated to provide essential medical care to incarcerated individuals. Due to numerous position vacancies and staff absences, combined with 24/7 coverage requirements in most of the facilities, costs for premium pay and unbudgeted on-call non-permanent positions are in excess of available authority. Additionally, both the number and cost of catastrophic cases and other contracted services continues to rise. DOC is actively pursuing multiple cost containment measures, while continuing to meet standards of care for prison population. The impact of this supplemental will be considered for an FY2012 amendment.	4,011.5					4,011.5	4,011.5					4,011.5

Senate Fast Track Supplemental
(SB 76)
March 18, 2011

	2	in or out	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	Governor Supplemental Request						Senate Fast Track Supplemental					
							UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
15		[redacted]		Education and Early Development	Education Support Services	**3/17 AMD: New request.** Increased costs for legal services provided by the Department of Law for ongoing cases.	200.0					200.0	[redacted]					0.0
16	15	[redacted]	1	Environmental Conservation	State Support Services	Increased lease costs for the Juneau office building. Statewide, lease costs for the department have increased 87% over the past seven years. The department has taken cost cutting measures to cover increased lease costs, but cannot absorb this increase that was brought to their attention late in December 2010. There is an increase for lease costs included in the FY2012 Governor's budget for the Anchorage office building. An increase for the Juneau office building is also being considered for an FY2012 amendment.		33.6	11.1	43.1	18.7 Oil/Haz Fd 11.1 Clean Air 3.4 CPVE 11.5 Ocn Rngr	87.8		33.6	11.1	43.1	18.7 Oil/Haz Fd 11.1 Clean Air 3.4 CPVE 11.5 Ocn Rngr	87.8
17	16	[redacted]	1	Fish and Game	Wildlife Conservation Special Projects	Increase Statutory Designated Program Receipts (SDPR) authority to a) accept a $236.0 grant from the National Fish and Wildlife Foundation (NFWF) for Phase 2 of the following project: Reducing Conflicts Between Grizzly Bears and Oil Development; and b) accept a $100.0 contract from the Western Governors' Association to identify, prioritize, and display in geographical information system (GIS) format, crucial wildlife habitats and corridors in the state of Alaska. Receipt of these funds were not anticipated when the FY2011 budget was prepared. It is anticipated that these projects will be completed in FY2011. Sufficient SDPR authority exists should the projects continue into FY2012.			336.0		336.0 SDPR	336.0			336.0		336.0 SDPR	336.0
18	17	[redacted]	1	Health and Social Services	Foster Care Base Rate	Increase federal economic stimulus funding authority (ARRA) to receivable levels claimed for foster care assistance available through Title IV-E of the Social Security Act. Federal reimbursement of foster care expenses fluctuate depending on the number of children eligible for assistance. The economic stimulus funding (ARRA) will not be available in FY2012 and is not included in the FY2012 budget.				120.0		120.0				120.0		120.0
19	18	[redacted]	1	Health and Social Services	Foster Care Augmented Rate	Increase federal economic stimulus funding authority (ARRA) to receivable levels claimed for foster care assistance available through Title IV-E of the Social Security Act. Senate Fast Track Supplemental
(SB 76)
March 18, 2011

	2	in or out	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	Governor Supplemental Request						Senate Fast Track Supplemental					
							UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
22	21		1	Health and Social Services	McLaughlin Youth Center	Funding for increased medical costs for youth. The division has experienced unanticipated medical costs, which include one cancer and one cardiac case. If this supplemental request is not approved, the division will have to cut other programs, i.e., probation services, community programs or youth courts to fund this gap.	450.0					450.0	450.0					450.0
23	22		1	Health and Social Services	McLaughlin Youth Center	Division of Juvenile Justice has experienced very little turnover and few vacancies since the beginning of the fiscal year and higher than anticipated premium pay costs . During the first five months of the fiscal year, McLaughlin Youth Center had very few vacancies; some components had no vacancies. A $500.0 increase is included in the FY2012 budget.	500.0					500.0	500.0					500.0
24	23		1	Health and Social Services	Alaska Temporary Assistance Program (ATAP)	Additional federal authority is needed to receive the full funding anticipated to be available under the Temporary Assistance for Needy Families block grant. An increase is being considered in the FY2012 Governor Amended budget.				4,500.0		4,500.0				4,500.0		4,500.0
25	24		1	Health and Social Services	General Relief Assistance	A 6.3% increase in expenditure growth is projected for FY2011, which results in a shortfall of $250.0. The cost of the program has grown due to a significant increase in the number of burials and increased demand for assistance for emergency services as the result of economic changes. Currently, 91% of program expenditures are used to pay for funeral and burial expenses. A $250.0 increase is included in the FY2012 budget.	250.0					250.0	250.0					250.0
26	25		1	Health and Social Services	Senior Benefits Payment Program	In FY2011, a 10% increase in expenditures is projected due to caseload growth , which results in a shortfall of $1.3 million. The program has grown significantly as outreach efforts have made more seniors aware of these benefits. The increase for FY2012 is included in a Fiscal Note to legislation extending the Senior Benefits Payment Program.	1,300.0					1,300.0	1,300.0					1,300.0
27	26		1	Health and Social Services	Energy Assistance Program	Additional federal funding is anticipated to be distributed to the state for FY2011. $2.5 million in federal authority is needed to receive the full anticipated federal allocation for the Low Income Home Energy Assistance Program (LIHEAP). An increase is being considered in the FY2012 Governor Amended budget.				2,500.0		2,500.0				2,500.0		2,500.0
28	27		1	Health and Social Services	Public Assistance Admin	During the 2009 legislative session, $462,000 in ARRA funds were appropriated for administrative costs associated with increased caseloads and improved benefit processing efficiency. DPA was awarded $464,060 in ARRA for the SNAP program. The division will need an additional $2.1 in ARRA authorization to use the full amount of the federal award. The economic stimulus funding (ARRA) will not be available in FY2012 and is not included in the FY2012 budget.				2.1		2.1				2.1		2.1
29	28		1	Health and Social Services	Public Assistance Field Svcs	Increased funding is requested to fully implement the salary changes resulting from the recently completed Eligibility Technician class study. The salary analysis based on the study has resulted in range and step increases for approximately 60 positions. A $700.0 increase is included in the FY2012 budget.	300.0			300.0		600.0	300.0			300.0		600.0

Senate Fast Track Supplemental
(SB 76)
March 18, 2011

							Governor Supplemental Request						Senate Fast Track Supplemental					
	2	In or out	Gov Sec. No.	Department	Component or Capital	Description of Supplemental Need	UGF	DGF	Other	Fed	Func Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
30	29		1	Health and Social Services	Nursing	Federal funds budgeted for positions are uncollectible. This request will maintain the vacancy rate at 12.5%. The division has been able to stay within budget during recent years due to difficulty recruiting nurses, which has resulted in a high vacancy rate. Recent efforts to strengthen recruitment of public health nurses resulted in a decreased vacancy rate from 16% in July of 2006 to 11% in May of 2010. If this request is not approved, the division will need to maintain a 17% vacancy rate, which will require layoffs, closing of health centers, and reduced visits to villages. A $1,000.0 increase is included in the FY12 budget and additional funding is being considered in the FY2012 Governor Amended budget.	1,750.0					1,750.0	1,750.0					1,750.0
31	30		1	Health and Social Services	State Medical Examiner	Reforms, begun in FY2010, helped stabilize funding for an increased caseload. However, actual cost increases exceeded estimates, resulting in a $300.0 projected shortfall for FY2011. The number of cases under the Medical Examiner's Office jurisdiction increased 28% from FY2009 to FY2010. Of the 3,300 deaths reported in Alaska during FY2010, the Medical Examiner's Office took jurisdiction in 60% of the cases (1,989), up from 46% in FY2009 (1,556/3,362). The number of cases examined or autopsied doubled from 377 (24%) to 754 (38%) cases. This trend is expected to continue. A $500.0 increase is included in the FY2012 budget.	300.0					300.0	300.0					300.0
32	31		1	Health and Social Services	Public Health Laboratories	During the past five years, the number of tests performed has nearly doubled from 77,000 to over 148,000. The complexity and cost of these tests have increased exponentially while the budget has remained stable. Additionally, overhead costs have increased more than 25% during the same period. Without additional funding, vital and life-saving testing, such as for tuberculosis, hepatitis, botulism, and rabies, may have to be curtailed or eliminated. A $100.0 increase was included in the FY2012 budget. Additional funding is being considered for an FY2012 amendment.	200.0					200.0	200.0					200.0
33	32		1	Health and Social Services	Genl Relief/Temp Assisted Living	The average cost per recipient in FY2009, for 898 unique recipients, was $7,058. In FY2010, an average of 494 individuals monthly and 961 unique individuals were served at an average expenditure of $7,447 per individual. The division anticipates serving on average minimum of 510 clients monthly during FY2011. The increased utilization is due to longer lengths of stay and higher compensation to providers necessitated by increased medical and behavioral needs of recipients. An increase is being considered in the FY2012 Governor Amended budget.	825.0					825.0	825.0					825.0
34	33		1	Health and Social Services	Senior/Disabilities Svcs Admin	Increased costs will be incurred to comply with the Centers for Medicare and Medicaid Services (CMS) approved Corrective Action Plan (CAP). The sweeping multi-faceted plan requires diverse expenditures: non-permanent staff to eliminate a significant assessment backlog, travel to complete required assessments, contractual costs for modifying the management information system, and additional supplies and equipment used by the additional employees. Without this funding, required work will not be performed, participants will be at risk, and new applicants will not be able to access the system. Non-compliance with federal requirements may result in non-renewal of waivers and civil litigation. An increase of $1,250.0 is included in the FY2012 budget.	1,400.0					1,400.0	1,400.0					1,400.0

35	34		1	Health and Social Services	Behavioral Hlth Medicaid Svcs	Growth in projected costs are due to the increases in enrollment and spending over the past eight months. Enrollment has increased 8.3%, from 103,802 in December 2009 to 112,440 in December 2010. Spending during FY2010 was at the upper end of the estimates, so the 2011 projections have increased to reflect this higher baseline. Projected spending for 2011 is 10.6% more than spending in 2010. Spending grew by 10.7% from 2009 to 2010. Projected increases have been included in the FY2012 budget.	556.4			4,061.1		4,617.5	556.4			4,061.1		4,617.5
36	35		1	Health and Social Services	Adult Prev Dental Medicaid Svcs	Growth in projected costs are due to the increases in enrollment and spending over the past eight months. Enrollment has increased 8.3%, from 103,802 in December 2009 to 112,440 in December 2010. Spending increased by 24.5% when comparing the first half of FY10 to the first half of FY11. Projected increases have been included in the FY2012 budget.	72.1			141.9		214.0	72.1			141.9		214.0
37	36		1	Health and Social Services	Health Care Medicaid Services	Growth in projected costs are due to the increases in enrollment and spending over the past eight months. Enrollment has increased 8.3%, from 103,802 in December 2009 to 112,440 in December 2010. In addition, spending during FY2010 was at the upper end of the estimates, so the 2011 projections have increased to reflect this higher baseline. Projected spending for 2011 is 8.0% more than spending in 2010. Spending grew by 15.2% from 2009 to 2010. Projected increases have been included in the FY2012 budget.	4,296.1			20,312.2		24,608.3	4,296.1			20,312.2		24,608.3
38	37		1	Health and Social Services	Senior/Disabilities Medicaid Svc	Growth in projected costs are due to the increases in enrollment and spending over the past eight months. Enrollment has increased 8.3%, from 103,802 in December 2009 to 112,440 in December 2010. In addition, spending during FY2010 was at the upper end of the estimates, so the 2011 projections have increased to reflect this higher baseline. Projected spending for 2011 is 16.7% more than spending in 2010. Spending grew by 14.6% from 2009 to 2010. Projected increases have been included in the FY2012 budget.	4,982.1			15,270.3		20,252.4	4,982.1			15,270.3		20,252.4
39	38		1	Health and Social Services	Senior/Disabilities Medicaid Svc	Increase funding to implement the new rate methodology for reimbursing providers for Medicaid Home and Community Based Services. A change to the rate system was advocated by the legislature, provider community, recipients and their advocates. Implementation of the new rate system is scheduled for March 1, 2011. $14,000.0 has been included in the FY2012 budget.	1,473.2			2,046.8		3,520.0	1,473.2			2,046.8		3,520.0
40	39		1	Labor and Workforce Development	AVTEC	Increases the FY2011 statutory designated authorization for Cook Inlet Tribal Council Health Professions Grant that is needed to support health professionals training program expenses. $300.0 in SD/PR is included in the FY2012 budget.			100.0		SDPR	100.0			100.0		SDPR	100.0
41	40		1	Law	Third JD: Outside Anchorage	Kenai prosecuting district attorneys - Two attorney positions were added in FY2011 with 75% fimding approved, based on an assumption that hiring would take some time. The department was able to successfully recruit and fill these positions on 8/2/2010 and 9/1/2010. Full funding for these positions is included in the FY2012 budget.	50.0					50.0	50.0					50.0

42	41		1	Law	Dep. Attorney General's Office	Legal analysis and litigation on items not anticipated in the FY2011 budget - election matters, public record requests, Planned Parenthood, Nikishka Beach road access, and citation and regulatory changes	705.3					705.3	705.3					705.3
43	42		1	Law	Environmental Law	Nunamta v. State/Pebble Limited Partnership - Plaintiffs allege that the State committed constitutional violations around authorization of temporary land and water use during mineral exploration activities. Interagency Receipts are from the Department of Natural Resources for ongoing efforts related to this case.			300.0		I/A Rcpts	300.0			300.0		I/A Rcpts	300.0
44	43		1	Law	Oil, Gas and Mining	Oil, gas and mining legal cases - Timing of legal cases and securing the necessary experts and outside counsel to support the state's position is difficult to predict. Shortfalls are anticipated in the Strategic Reconfiguration case, and connected to oil and gas royalty issues and TAPS property tax proceedings. Continued funding for these cases and others are included in an FY2012 $5 million capital request.	3,870.0					3,870.0						0.0
45	44		1	Natural Resources	Mining and Land Development	Litigation support to defend the permitting process on State land - To cover the costs of defending the state's permitting and planning process against litigation related to multiple projects, but centered on the Pebble Project. There is $500.0 included in the FY2012 budget.	328.2					328.2	328.2					328.2
46	45		1	Natural Resources	Land Acquisition and Title Defense	Oversight of Federal Land Transfers including Native Allotments and ANCSA Conveyances Federal funding from BLM which has paid for these services was eliminated due to federal budget cuts for federal fiscal year 2011. Funding is included in the FY2012 budget.	41.7					41.7	41.7					41.7
47	46		1	Natural Resources	Water Development	Permitting Water Use Applications Unrealizable federal and CIP funding authorization combined with program receipts not covering the cost of issuing water applications have caused a funding shortfall. This increment will help hire a vacant position to work on the backlog of permit applications. The FY2012 Governor's budget includes a $275.0 fund source change for this program.	22.0					22.0	22.0					22.0
48	47		1	Natural Resources	Mental Health Trust Lands Administration	Personal Services Costs The Trust Lands Office is vital to the funding of programs and services provided to Mental Health Trust beneficiaries; without adequate staffing, the lands cannot be managed to their fullest potential, which can result in reduced funding for the Trust. The Alaska Mental Health Board of Trustees approved a supplemental request in order to fund cost increases in personal services for the Executive Director, the Deputy Director and to fund a vacant half time position to continue work on the Southeast Land Exchange between the Trust and the U.S. Forest Service. Additional funding is being considered for an FY2012 amendment.			95.0		MHTAAR	95.0					MHTAAR	75.0
49	48		1	Natural Resources	RS 2477/Navigability Assertions and Litigation Support	Access Litigation and Recordable Disclaimer of Interest (RDI) Fees Increased costs for defending legal access to state lands and public trust rights, and increased number of cost recovery fees due to BLM with each recordable disclaimer of interest application. An FY2012 amendment is being considered for continuation of this request.	45.0					45.0	45.0					45.0

							UGF	DGF	Other	Fed	Fund Source	Total Funds	UGF	DGF	Other	Fed	Fund Source	Total Funds
94	100		9	Environmental Conservation	Capital	Amend Section 4, ch. 30, SLA 2007, page 89, line 33 through page 90, line 4. The Comprehensive Oil and Gas Infrastructure Risk Assessment Phase 1 project is reduced from $5,000,000 to $2,750,000, as this is the amount needed to complete the project due to a change in scope and in the methodology employed. As a result, the study was confined to the North Slope, and did not include the level of detail initially envisioned. The department is in the process of implementing the recommendations from the risk assessment done under the revised scope of the project. FY11 Negative Supplemental Proposals (Based Primarily on Increments and Fiscal Notes that Funded Positions)

Department	Allocation	Description of Transaction	Proposed GF Dec	Senate Supp (highlight indicates difference from Department response						LFD Notes	Dept. Okay?	Department Comments
				UGF	DGF	Other	Fed	Fund Source	Total Funds			
Administration	Alaska Public Offices Commission	Fiscal Note - Ch. 73, SLA 2010 (HB 36) Initiatives: Contributions/Procedures	(13.6)	0.0					0.0	Total one-time FN = $60.2 with 1 PPT $32.7 of this in Personal Services. PCN 02-0028 was filled on 12/9/10. Five months savings in P. S.	No	The funding for APOC is necessary and justified because while the permanent positions were being created two consecutive short term non-perms were created to do some of the work of the new positions which will leave APOC short funded. The remainder of the work required under HB36 and SB 284 was picked up by the current staff, this was possible because all positions were filled and staff worked extra hours. This was an election year making it necessary to have as many staff as possible for the increased workload, in effect, all positions were filled. This funding is necessary to fund the non-perm positions as well as funding for the lack of vacancies in support of the election.
Administration	Alaska Public Offices Commission	Fiscal Note - Ch. 36, SLA 2010 (SB 284) Initiatives: Contributions/Procedures	(26.2)	0.0					0.0	Total one-time FN = $131.2 with 1 PFT $78.7 of this in Personal Services. PCN 02-0030 was filled on 11/2/10. Four months savings in P. S.	No	(see above)
DCCED	Community & Regional Affairs	FY11 Inc - Funds for Local Government Specialists to provide technical assistance to at risk rural communities (no new positions)	(43.0)	(43.0)					(43.0)	Total Inc = $250.0 UGF (all shown in Personal Services but some funding was to be used for other line item expenditures. Two positions filled (one in Juneau/one in Kotzebue) Kotzebue position was not filled until 12/13/10. Five months savings	No	This increment was authorized to fund Local Government Specialists (LGS) that provide technical assistance to "at-risk" rural communities. A vacant position, transferred to DCRA from within the department, was filled on June 28, 2010 in Juneau. A second position authorized by the administration was established and filled in Kotzebue on December 13, 2010. To date in FY2011, the incumbents of these positions have made 17 on-site assistance trips to seven of the twenty three communities covered by these positions. To reach more of these communities, and address critical training needs, the funds will be used to present regional training and bring the community representatives into the classes. Without the use of these funds, these critical training needs will not be adequately addressed for this fiscal year.
DCCED	Community & Regional Affairs	FY11 IncOTI - Funds for Natural Resource Specialist II Position to provide communities with assistance for ANSCA 14c actions - 1 PFT	(25.3)	(25.3)					(25.3)	IncOTI - $97.0 Total ($76.0 P. S. + $15.0 Travel + $6.0 Commodities) Position filled on 11/1/10. Four months savings	No	This increment funded a Natural Resources Specialist position that started on November 1, 2010. The incumbent is working to become familiar with the ANCSA 14(c)(3) conveyance process. One major accomplishment is the review of existing Municipal Land Trust leases, document expiration dates, renewal clauses and begin processing upcoming lease renewals. Many of these land leases were executed in the 1980's and 1990's and if they expire before they are extended, the trustee will need to undergo a public notice and approval process prior to the lease being reissued. In the interim period, the state could be liable for activities occurring on these developed parcels where site control is not established. The funds are being used for travel to engage in negotiation discussions with more communities than originally planned, and to have public meetings for land disposals that have been requested by the communities.
DCCED	Economic Development (formerly Investments)	Fiscal Note - Ch. 120, SLA 2010 (HB 20) Fisheries Loans: Energy Efficiency/Amount	(54.2)		(54.2)			Comm Fish Ln (1036)	(54.2)	Total FN = $88.6 with 1 PFT $72.3 in Personal Services As of 2/16/11, position has not yet been established. Assume minimum of nine months savings	Yes	This bill, signed August 2010, included a position for assistance in providing low interest loans to qualified Alaskan harvesters who wish to upgrade their existing vessels and gear to improve energy efficiency. The creation of this position was delayed while there was an assessment of the optimal geographic location to accommodate both customer service and ensure adequate back-up of existing Loan Collection positions. The position is currently being established under the Division of Personnel, Department of Administration classification process.

FY11 Negative Supplemental Proposals (Based Primarily on Increments and Fiscal Notes that Funded Positions)

Department	Allocation	Description of Transaction	Proposed GF Dec	Senate Supp (highlight indicates difference from Department response)						LFD Notes	Dept. Okay?	Department Comments
				UGF	DGF	Other	Fed	Fund Source	Total Funds			
DCCED	Banking and Securities	Fiscal Note - Ch. 61, SLA 2010 (SB 279) Mortgage Lending	(32.5)		(32.5)			GF/PR	(32.5)	Total FN = $131.0 with 1 PFT $65.0 in Personal Services Filled in FY11 (date not yet provided)	No	The authorized position is currently being recruited. The primary reason for the delay was a timing issue caused by the requirement that the division draft new regulations to change its licensing of mortgage lenders to comply with new statutes that comply with new federal standards. While this occurred, the workload of setting up and modifying the mortgage lending program and examining the 400 plus licensees was handled by existing staff and overtime. The new regulation package is now complete and the recruitment process is occurring. Given the need to pay overtime, the loss of these funds will impact the divisions ability to continue implementing this program and accomplishing the Consumer Finance section responsibilities of licensing, renewals, investigation support, and examination of businesses.
DCCED	Corporations, Business & Professional Licensing	Fiscal Note - Ch. 49, SLA 2010 (SB 292) Pawnbrokers	(27.0)		(18.0)			Receipt Supported Services (1156)	(18.0)	Total FN = $38.0 With $36.0 in Personal Services. As of 2/16/11, position has not yet been established. Assume minimum of nine months savings	No	This bill has an effective date of July 2011. The division, through the use of existing staff overtime and a temporary employee, is developing regulations to implement new mandates for the pawnbroker profession. The division plans to hire the authorized position prior to July 1, 2011. In the meantime, the division is not able to absorb this work to date or the licensing/investigation function without the funds appropriated for the purpose of this program.
DCCED	Corporations, Business & Professional Licensing	Fiscal Note - Ch. 67, SLA 2010 (HB 315) Public Accounting	(83.7)		(83.7)			Receipt Supported Services (1156)	(83.7)	Total FN = $134.2 With $111.7 in Personal Services. As of 2/16/11, position has not yet been established. Assume minimum of nine months savings	No	This fiscal note funded an Executive Secretary at range 23 for the Alaska Board of Public Accountancy. Three primary issues have delayed hire of this position. First, the bill language required that regulations be drafted prior to hire. Second, a classification rate study needed to be completed by the Department of Administration Division of Personnel. Third, the rate study allocated the position to a range 19 which conflicts with the fiscal note language and intent of the Board. The plan, if approved by the Board, is to proceed with recruitment at the current allocation while awaiting the outcome of two current legislative bills that would adjust the allocation to a range 23. The Division has spent considerable personnel time in efforts to implement this position, to reduce these funds would cause an inappropriate allocation of other funds that exist to serve other division programs and priorities.
Education & Early Development	Student and School Achievement	Fiscal Note - Ch. 14, SLA 2010 (SB 221) Legis. Task Force on Higher Ed/Careers	(32.7)	(32.7)					(32.7)	Total FN = $100.0 with 1 PFT $87.3 of this in Personal Services. Position was filled on 11/15/20. Four and one-half months savings in P.S	Yes	The department has no comment on this reduction.
Education & Early Development	State System of Support	FY11 Increment - Add 3 PFT Content Specialists for Math, Science, and Reading	(105.3)	0.0					0.0	Base increment = $291.7 (all in Personal Services + 3 new PFT positions. Math position filled 9/2/10; Science position filled1/1/11; and Reading position was filled 10/1/10 but vacated again on 12/1/10. Total P. S. savings for approx. 13 mos. @ $8.1/month	No	The department used contractors until the positions were filled and is still using a contractor for the literacy/reading. Any savings would have been replaced by services of a contractor as they continue to build on the state system of support. The recruitment for the content specialist took time in that it was recruited nationwide and still had difficulty in recruitment.
DEC	Food Safety & Sanitation	Environmental Health Technician & Related Costs in Support of Permit and Inspection of New Shellfish Farms - Total $100.4 UGF w/ 1 PFT PCN	(32.9)	(16.0)					(16.0)	PS Total = $78.9 (5 months vacant) PCN 18-7829 Environmental Health Technician -Filled 12/2/2010	No	Immediately upon passing the budget bill, the Department moved a position from Wasilla to Ketchikan to fill the industry's needs. It took time to get the position moved, recruited for and hired. There was a delay in hinng because the food safety program has a high volume of work in the summer and the fall. During the time this position was being recruited for, the Division's Food Safety staff worked overtime to fill the needs, therefore if this funding is repealed there will not be sufficient funding to pay for the hired position for the remainder of the year.

FY11 Negative Supplemental Proposals (Based Primarily on Increments and Fiscal Notes that Funded Positions)

Department	Allocation	Description of Transaction	Proposed GF Dec	Senate Supp (highlight indicates difference from Department response)						LFD Notes	Dept. Okay?	Department Comments
				UGF	DGF	Other	Fed	Fund Source	Total Funds			
DEC	Food Safety & Sanitation	Environmental Health Officer & related Costs to focus on Retail Food Establishment Safety Inspections - Total $100.4 UGF w/ 1 PFT PCN	(52.6)	(32.6)					(32.6)	PS Total = $78.9 (8 months vacant) PCN 18-7830 Environmental Health Officer II/III has been established and the division has been recruiting for this position since 11/26/2010 with no success. It is currently posted on Workplace AK.	Yes at (11.5)	This assumes hiring an EHO II at a Step A which leaves the department with $26.3. If an EHO III at a step C/D is hired, assuming the department may be able to hire/promote someone in March at a higher proficiency level, $31.1 would be needed to cover the expense. To ensure sufficient funding to hire at the non-trainee level of this flex position, possibly including moving costs from out-of-state, the Department would require at least $41.1 in funding. EHO's are often hired from out of state because of the expertise level.
DEC	Drinking Water	Environmental Protection Agency Drinking Water Rule Implementation - 5 new PFT PCN's were requested to conduct the implementation, monitoring, reporting and enforcement work. Legislature approved $600.0 total ($300.0 UGF & $300 Fed) w/ no new PCN's	(150.0)	(75.0)			(75.0)		(150.0)	PS Total = $450.0 (8 months vacant) Five existing positions have been submitted to Division of Personnel for reclassification. No positions filled and recruitment will begin as soon as the classification process is complete.	No	The Department requested $600.0 and 5 positions in the FY2011 budget request. The legislature denied the positions but approved the funding with the understanding that in order to do the work associated with this increment the Department would have to rely heavily on contractual support, non-permanent employees and adjustments/over-time with existing staff which we have done. Therefore, the funding showing available is not available for repeal. The remaining funding will be used to fund the five positions currently in classification/recruitment and reduce the program's reliance on contractual support, non-perms and over-time.
DEC	Air Quality	Federal Environmental Protection Agency Permitting Requirements - 1 New PFT PCN needed for Outer Continental Shelf and Climate Change air quality activities. $150.0 UGF w/ 1 PFT PCN	(72.2)	(32.2)					(32.2)	PS Total = $108.3 (8 months vacant) PCN 18-7831 Environmental Program Specialist III/IV has been established. Recruitment is underway and currently posted to Workplace AK.	No	During the first half of the year, during this recruitment, the funding under this increment was used for contractual expenses in lieu of personal services. If this funding is reduced the position will not be hired this fiscal year as there would not be sufficient funding to fill the position.
DEC	Facility Construction	Federal Resources for Public Water Systems Operator Certification and Training - $240.0 Fed w/ 1 PFT PCN					(18.1)		(18.1)	PS Total = $87.0 (2.5 months vacant) PCN 18-7828 Grants Administrator II - Filled on 9/27/10	Yes	The 2.5 month delay was due to establishing the position and hiring. There will be no impact on the program if this federal authority is reduced for FY2011.
Fish & Game	AYK Region Fisheries Management	Salmon Research and Management Projects for AYK Region - $80.0 UGF for Database Management & 1 PPT PCN	(40.0)	0.0					0.0	Position was filled in January 2011. (6 months vacant) What is the PCN #?	No	The combined reduction for AYK Region is $156.7 Personal services for three new PCNs from two increments. To date, the Research Analyst I and Fisheries Biologist II have been filled, and the Fisheries Biologist IV Position Description (PD) is still pending review and approval by HR. There have been delays in writing and submitting the PDs to HR. The Regional Supervisor has been actively dealing with these new positions and also filling other vacant positions. Approximately $50.0 has already been spent on other personnel costs (additional months for seasonal positions) related to this project, with a plan to spend the remainder during the upcoming field season during the second half of the fiscal year.
Fish & Game	AYK Region Fisheries Management	Fishery Biologists II and IV for Salmon Research and Management Projects for AYK Region -$175.0 UGF & 2 PFT PCNs	(116.7)	(116.7)					(116.7)	PS Total = $175.0 (8 months vacant) Fishery Biologist Ii working in Yukon-Northern Area - currently vacant and recruiting for. Fishery Biologist IV working at regional level - still vacant and recruitment will follow the Fishery Biologist II.	Yes at (66.7)	(see above)
Fish & Game	Wildlife Conservation	Endangered Species Act Listings Coordination -$236.0 UGF to fund one existing Wildlife Biologist position & other related costs	(54.4)	0.0					0.0	PS Total = $81.6 (8 months vacant) Recruitment is currently underway. Used existing PCN -	No	(Note: The Appropriation column should list Wildlife Conservation instead of Commercial Fisheries.) Recruitment is currently underway for this position. The personal services funding from this position was used to support a 2nd position in the unit, the ESA Special Projects Coordinator position (11-T006). During FY2010, it was partially funded by the Division of Sport Fish. For FY2011, Sport Fish no longer requires services of the position and all ESA costs have been consolidated within Wildlife Conservation. This funding has been used, and continues to be needed for ESA issues.

FY11 Negative Supplemental Proposals (Based Primarily on Increments and Fiscal Notes that Funded Positions)

Department	Allocation	Description of Transaction	Proposed GF Dec	Senate Supp (highlight indicates difference from Department response						LFD Notes	Dept. Okay?	Department Comments
				UGF	DGF	Other	Fed	Fund Source	Total Funds			
Fish & Game	Fish & Game Boards and Advisory Committees	Regional Regulatory Program Assistant in Bethel - $84.6 UGF & 1 PFT PCN	(45.7)	0.0					0.0	PS Total = $68.6 (8 months vacant) Currently vacant and recruiting for PCN 11-0608 F&G Regional Pgm Assistant.	No	There were delays in writing and submitting the necessary Positions Description to Division of Personnel. There was one failed recruitment for this position with a second recruitment currently underway. The personal services funding Boards received for this position has been used to fund additional months for seasonal positions and some overtime to cover the duties of the section until the position is filled. An unscheduled joint board meeting and additional BOF meeting have used up all available funding of the section.
H&SS	Family Preservation	Funding and staff for the Independent Living Program to assist with youth with work school, job training, and life skills: $160.5 UGF & 2 pcns	(70.0)	(70.0)					(70.0)	OCS is currently recruiting (and interviewing) for the two positions. $70.0 removes 7 months of funding. Bethel pcn is 06-9301; Anc pcn is 06-9302	Yes	The department is currently recruiting for these two positions, and accepts the FY2011 budget reduction.
Labor	Alaska Vocational Technical Center	Grant Administrator to Pursue Non-General Funds to Support Operations - $83.6 total ($41.8 GF/PR & $41.8 Fed) w/ 1 PFT PCN	(9.6)		(9.6)		(9.6)		(19.2)	PS Total = $76.7 (3 months vacant) PCN 07-4568 Grant Administrator -Filled on 10/1/10	Yes	The department concurs with the LFD analysis and accepts the FY2011 budget reduction.
Law	Child Protection	Kenai Child Protection Attorney & related costs to relieve case overload in Kenai and Homer area -Total $200.0 UGF w/ 1 PFT PCN	(85.0)	(45.0)					(45.0)	PS Total Appropriated = $170.0 (50% recovered insupp) As of January 2011 this position had been offered twice but applicant circumstances changed. The department is actively recruiting and hopes to hire soon. During the first half of FY11, the department has reprogrammed a portion of the funding to assist with the backlog of restitution collections in the Collections and Support allocation. This funding has not crossed appropriation lines as both allocations are under the Civil Division appropriation. The department expects the position to be filled soon.	No	The department, with OMB approval, committed the savings identified by LFD to a "restitution surge" project. Law planned to request a supplemental to provide funding to address a backlog in collections from offenders and payments to victims that has been building in their Collections and Support Section. Instead of requesting supplemental funds, the department identified savings from delays in recruitment and hiring of new positions. They then created and hired 3 long-term non-permanent positions: 2 office assistants to open cases ($25,000 over 5 months); 1 Litigation Assistant to process disbursements to victims ($92.165 over 5 months). The department also sought $8,000 for database support. Total cost of the short term fix was estimated at $125,000. The department has started the surge and requests that these funds not be included in the proposed negative supplemental.
Law	Natural Resources	Endangered Species Issues Attorney & related costs to address the influx of ESA issues	(42.5)	0.0					0.0	PS Total = $170 (25% recovered in supp) This position filled 10/11/10	No	(see above)
DNR	Gas Pipeline Implementation	Professional and Support Staff for Capacity	(467.3)	(283.1)					(283.1)	PS Total - 618.1 (4 positions total) It appears these positions were overfunded by 171.4 (the budget detail for the positions totals $467.3 for the 4 positions, but the PS Line for the INC was 618.1) 2 positions on hold until the hiring of new AGIA Coordinator (coordinator to be hired within a couple weeks); LFD projecting 4th quarter hiring for the 2 positions(9 months vacant); Potential additional reduction due to vacant AGIA Coordinator position, but excluded from this analysis 1 position filled 1/16 (6 months vacant) 1 position filled 2/7(7 months vacant)	Yes at (283.1)	The Legislative Finance Division (LFD) notes state that it appears the four positions included in the increment are overfunded. The position cost for Management Plan for the four new positions is $441.6. The intent of the increment for $618.8 in personal services was to fund an additional Project Manager position that was transferred from the Commissioner's Office ($136.3) during FY2011 Management Plan as well as other personal services expenditures for existing positions in the component. The Gas Pipeline Implementation office combines the base budget and the Support Staff one-time item and uses them both to fund all positions. The total personal services funding for these two appropriations is $1,171.3. Based on the projected need for the remainder of the year, the component does not have adequate funding to allow the removal of $467.3. The anticipated surplus is $283.1.
DNR	Agricultural Development	Plant Health and Pytosanitary Certification	(61.1)	(61.1)					(61.1)	PS Total - $81.5 (1 position) Start date 3/22 (9 months vacant)	Yes	This increment funds PCN 10-3129 – Development Specialist I. The best use of the position had to be determined prior to recruiting for the position. The position has been filled, but the candidate will be unable to start until March 22, 2011. It is acceptable to remove $61.1 from the FY2011 budget.

FY11 Negative Supplemental Proposals (Based Primarily on Increments and Fiscal Notes that Funded Positions)

Department	Allocation	Description of Transaction	Proposed GF Dec	Senate Supp (highlight indicates difference from Department response)						LFD Notes	Dept. Okay?	Department Comments
				UGF	DGF	Other	Fed	Fund Source	Total Funds			
DNR	Agricultural Development	Fiscal Note - Alaska Grown Ag Products	(84.0)	(80.9)					(80.9)	PS Total - $126.1 (2 positions) 1 position filled 12/28 (6 months vacant) 1 position to be filled within 3 months (10 months vacant)	Yes at (80.9)	This increment funds one full-time position and one part-time position (PCN 10-3128 – Development Spec. I and PCN 10-3130 Natural Resource Spec I, respectively). The intent was that the part-time position would be hired once the full-time position was filled and the incumbent could make their own hire. The Development Spec. I was hired December 28, 2010 and will be filling the part-time position within three months. The amount being proposed for deduction from the FY2011 budget seems to assume that the part-time position will not be hired within three months, but at three months. It would be more appropriate to add 1.5 months of funding for the part time position to ensure adequate funding. Removing $80.9 as opposed to $84.0 would leave the division more flexibility.
DPS	AST Detachments	3 Trooper/Investigator positions to focus on domestic violence and sexual assault follow up investigations Palmer position filled Nov. 2010 Fairbanks position filled December 2010 Bethel position bid and hire takes effect March 2011	(120.8)	0.0					0.0	PS Total Appropriated = $255.8 (this would cover 36 months (3 positions @ 12 months). 19 months are filled. This supplemental action would recover funding for the vacant 17 months. Although NOT part of the Governor's $3 million dollar RSA package for DVSA, this funding was considered part of the Domestic Violence and Sexual Assault Initiative.	No	These new positions are part of the Governor's domestic violence and sexual assault initiative. The justification for the negative supplemental assumes 17 months of vacancy and 19 months filled for the combined three positions. This vacancy savings does not exist. From an operational standpoint, these new positions could not be filled until recruits completed field training and could be moved into independent trooper PCNs to free up more experienced troopers to move into the new investigator positions. Recruits in field training are often double-filling PCNs in the three field training locations of Soldotna, Palmer, and Fairbanks. During this time-period, five recruits were in this status. These double-filled PCNs are paid for by vacant PCNs elsewhere. At the same time, recruits at the Sitka Academy, who are coming up behind the recruits in FTEP, are also being paid with savings from vacant trooper positions around the state. There were about 17 recruits at the academy during this same time-period. The department requests these funds not be deleted.
DPS	Alaska Criminal Records and Identification	Fiscal Note - Ch. 18, SLA 2010 (SB 222) Sex Offenses; Offender Regis; Sentencing. One new full-time Criminal Justice Specialist position to manage an enhanced database and reporting mechanism necessitated by the enactment of SB 222.	(55.3)	(55.3)					(55.3)	PS Total Appropriated = $83.8 (8 vacant months recovered in supp) The department has had difficulty filling the position and is in the middle of a recruitment process.	Yes	The department concurs with the LFD analysis and accepts the FY2011 budget reduction.
Revenue	Tax Division	Petroleum Commercial Analyst Positions for Gasline & Production Tax Analysis - 4 PFT exempt PCN's were requested. Legislature approved $400.0 UGF and 2 PFT exempt PCN's.	(266.7)	(266.7)					(266.7)	PS Total = $400.0 (8 months vacant) PCN's 04-039 & 04-X040 have been established and the division is actively recruiting. After a delay due to the change in administration, they are now in the process of making hiring decisions.	No	(See the attached letter from the Department of Revenue.)
Revenue	Permanent Fund Dividend Division	Fiscal Note - Ch. 22, SLA 2010 (SB 171) Permanent Fund Dividend for Deceased - $91.5 UGF & 1 PFT PCN	(70.0)	0.0	0.0			GF/PR	0.0	PS Total = $84.0 (10 months vacant) PCN 04-6105 Analyst Programmer III has been established, however will not be filled until April 2011. SB171 was effective 1/1/11, a complete redesign and rewrite of the online application is now underway. The Pick.Cl	No	(See the attached letter from the Department of Revenue.)
Revenue	Long Term Care Ombudsman Office	Long Term Care Ombudsman Office Investigator -$132.5 total ($64.0 GF & $68.5 GF/PR) & 1 PFT PCN	(48.4)	(10.4)				GF/MH	(10.4)	PS Total = $82.9 (7months vacant) PCN 04-X030 has been established and a new hire will start on 2/1/2011.	No	(See the attached letter from the Department of Revenue.)

FY11 Negative Supplemental Proposals (Based Primarily on Increments and Fiscal Notes that Funded Positions)

Department	Allocation	Description of Transaction	Proposed GF Dec	Senate Supp (highlight indicates difference from Department response						LFD Notes	Dept. Okay?	Department Comments
				UGF	DGF	Other	Fed	Fund Source	Total Funds			
DOTPF	CR Highways and Aviation	Oversight of Street Sweeping and Permit Compliance - EPA	(141.0)	(141.0)					(141.0)	PS Total - 188.0 (2 positions) 25-3802 Environmental Imp Analyst is currently posted on Workplace Alaska through 2/18/11. 25-3803 Engineer Asst will be posted on Workplace Alaska no later than 2/25/11. LFD projecting hire for 4th quarter FY11 (9 months vacant)	Yes	1) Central Region Street Sweeping positions – The whole street sweeping EPA MS4 permit increased requirements for monitoring and performing contracts was new to the department this past year. The region addressed the need with existing staff as a trial, but has found that it is not a sustainable function without the additional positions. Both positions have been established in the Division of Personnel and one is out for recruitment now, with the second going out for recruitment in early March. The partial reduction should not have an impact on the region as the funds were for those positions; however, positions are still needed so adequate funding for remainder of year are needed and the funding and positions are needed on a continuing basis, i.e. into FY2012.
DOTPF	Marine Engineering	Marine Highway Planner Position	(72.0)	(50.4)	(21.6)				(72.0)	PS Total - $108(70% GF, 30% AMHS) Position starts March 1 (8 months vacant)	Yes	The AMHS Planner position was one of the first to get established going into the fiscal year. AMHS went through a lengthy recruitment process (an extension or two) both in-state and out-of-state. They have hired the Planner and she will be starting on March 1st. She and her family are relocating to Ketchikan (where the position is located) so the start date was somewhat delayed. Again, a partial one-time FY2011 reduction is not anticipated to have an impact as long as the funding for the remainder of the year is there and the funding and position carry on in to FY2012.
			(2,601.7)	(1,437.4)	(219.6)	0.0	(102.7)		(1,759.7)

Testimony of Lois Epstein, P.E., prepared for the AK Senate Finance Committee hearing on SB 80

March 26, 2012

loisepstein@gmail.com, 907 748-0448

Thank you, Senator Stedman, Senator Hoffman, and other Committee members, for the opportunity to testify. My name is Lois Epstein and I am a licensed engineer in Alaska. I am here today from Anchorage as a member of the public who is concerned that Southcentral Alaska not make an enormous mistake with huge financial consequences. I also serve on the AMATS Technical Advisory Committee (or TAC), however I am speaking today for myself.

While serving on the AMATS TAC, it became clear to me that the Committee's state and municipal representatives were not asking hard questions of the Knik Arm Bridge and Toll Authority (KABATA) while developing our federally-required Metropolitan Transportation Plan (MTP), so it's up to the legislature to ask those questions. Why else would it be acceptable for a technical committee to assume that daily traffic would be roughly the same in 2035 with a $16 roundtrip toll using KABATA's model vs. no toll as in the AMATS model, i.e., with both models showing around 36,000 Average Annual Daily Traffic (AADT)? Why else would the TAC ignore the fact in the draft plan that it's wholly unlikely that KABATA ever would receive a $300 million federal low-cost TIFIA loan? TIFIA loans – and there aren't many granted - go to areas with high population, serious congestion, and failing infrastructure; the proposed Knik Arm Bridge meets none of those criteria. And to respond to KABATA Board Chair Foster's statement today that the MTP used the same population numbers for the Mat-Su Borough as KABATA, that's because AMATS said it did not have the resources to adequately analyze KABATA's contractors' work.

As a further demonstration of the Parnell Administration's pro-bridge bias, it's extremely problematic that the Fiscal Note for SB 80 is zero for Alaska DOT "as long as projections for ridership…are fulfilled" without the note acknowledging the high end of the cost range if those projections are wrong.

The legislature also should be aware that the two-lane bridge scored very low in terms of the AMATS screening process for project importance, with a score of 12 out of a possible 30 points. Many higher-scoring and more worthy Anchorage-area transportation projects will not be constructed due to federal "fiscal constraint" requirements. Additionally, there have been a number of community council resolutions throughout the city opposing including the bridge in Anchorage's draft plan. These items should be of concern to Anchorage's elected representatives.

The March 2012 Dittman Poll in your packet commissioned by Alaska House Republicans and released last week showed 58% of respondents statewide said the proposed Knik Arm Bridge could "wait until later" or "it should never be built." A minority of only 37% said "now is a good time to build a Knik Arm Bridge."

I'd like to remind the legislature that this bridge has a notorious history outside the state as one of Alaska's two so-called "bridges to nowhere." Should SB 80 become law, the state would receive more bad publicity for the over $100 million in federal funds going to this project. Additionally and importantly, there would be liability up to $2.98 billion in availability payments for the state to make up toll shortfalls in its contract with the private partner. I encourage the Finance Committee to receive a written legal opinion on the liability question.

In contrast to what KABATA Board Chair Foster stated today, growth in the Mat-Su could be accommodated without major Glenn Highway expansion but there is not time today to speak to those relatively inexpensive options including congestion pricing, commuter rail, increased vanpools, telecommuting (not available in the earlier timeframe Foster spoke of regarding traffic doubling on the Glenn), satellite business offices in the Mat-Su, etc.

Perhaps the best reason not to move forward with SB 80 at this time is that the Legislative Budget and Audit Committee currently is working on an audit of the project as the co-chairs know because you serve on the Committee. The audit will review if the "traffic flow assumptions [are] based on reasonable projections" since if those projections are wrong, the state would need to make up several billion dollars in toll shortfalls over a period of several decades. A number of public and private analyses to date have shown serious problems with KABATA's contractor Wilbur Smith Associate's traffic and revenue projections – see the Toll Road News article in your packet showing an overestimate of toll revenues by an average of 118% for the first 5 years after projects open (Appendix A). The consequences of accepting KABATA's projections can be dire financially for both Anchorage and the Mat-Su, i.e., potentially doubling the transportation dollars needed annually for each – see "The Real Finances of the Knik Arm Bridge" report in your packet. For the good of Southcentral, I urge this Committee and the Senate as a whole not to pass SB 80 until LB and A's audit is complete.

Thank you very much for your attention to these comments. I am happy to answer any questions you may have.

The Honorable Joe Thomas
Alaska State Legislature
State Capitol, Room 514
Juneau, AK 99801-1182

Dear Senator Thomas:

In response to your letter dated March 8th, I appreciate the opportunity to provide you with information regarding the Department of Transportation and Public Facilities (DOT&PF) activities, both current and planned, for the Anchorage and Mat-Su Borough areas of the State. As you have noted in your letter, some of these projects have been included in the traffic analysis relative to the Knik Arm Crossing project. Your interest in how this project impacts the State's transportation infrastructure is evident in the thoroughness of your questions.

In response to a statement made in committee by Jeff Ottesen, you have asked which specific projects on the Glenn Highway the State could avoid (or delay) building if the Knik Arm Bridge was constructed. With the bridge predicted to carry 36,000 or more vehicles per day in 2035, at minimum the widening of the Glenn and Parks Highway by at least two lanes could be avoided. This is roughly estimated to cost $300 to $400 million.

You have also asked for vehicle traffic count numbers. The most recent (2009) annual average daily traffic (AADT) figures compiled by the department show 28,495 vehicles on the Glenn Highway at the Eklutna Flats location (prior to the intersection of the Glenn Highway with the Old Glenn Highway). At the bridge carrying the Glenn Highway over the Knik River, the 2009 AADT was 26,220 vehicles. Traffic projections for the Eklutna Flats location on the Glenn Highway have been done using the Highway to Highway traffic model (H2H). For the year 2035, the model predicts an AADT of 54,000 vehicles at the Eklutna location with 37,000 vehicles using the proposed Knik Arm Crossing. The modeling completed by Wilbur Smith Associates for KABATA predicts a 2035 AADT of 48,700 vehicles for the Eklutna Flats location with 36,000 vehicles using the Knik Arm Crossing.

You also ask for project information and cost estimates for the projects DOT&PF believes will be necessary to accommodate projected traffic flow for the Knik Arm Bridge. This information is set out below:

- Burma Road 2-Lanes $49 million
- South Big Lake Road 4-Lanes $45 million
- Pt. MacKenzie Road (6 mile section) $18 million
- Knik-Goose Bay MP 8 to MP 17 $27 million

3/26/12

Other projects in the area, specifically upgrading Vine Road, the Parks Highway widening to Big Lake, and Knik-Goose Bay widening between Parks Highway and Vine Road are not included as they are needed urgently due to traffic volumes and population growth regardless of the bridge decision.

Maintenance costs are estimated at $7,500 per lane mile annually. Depending on the final design of these improvements, it is estimated that approximately 100 lane miles could be added to the transportation network in this area. This would require approximately $750,000 of additional annual maintenance expenditures.

You have asked how much it would cost the state in general funds and / or federal highway funds to pay for the construction of the projects necessary to support the estimated bridge traffic flow. The overall cost of these projects is $139 million. It would be up to the state Legislature to decide whether to appropriate state general funds or federal funds for the projects and on what timetable.

Phase 2 of the Knik Arm Crossing project involves the bridge/viaduct connection with Ingra-Gambell. This is expected to be needed in 2025 at the earliest depending on traffic volumes. The cost estimate prepared by KABATA for this effort is currently $248 million (in 2008 dollars). This work is part of the KABATA project commitments and it is expected to be funded from the toll receipts collected on the bridge. A toll agreement is currently being finalized between the department, KABATA and the Federal Highway Administration (FHWA). Since the Knik Arm Crossing project has been federalized (funded with Federal-aid funds through FHWA) surplus revenue generated by tolls must be used on Federal-aid eligible projects.

Some of the projects identified by Wilbur Smith as part of the planned regional network that may influence the estimated bridge traffic flow and their costs are:

- International Airport Road Extension $34.9 Million
- Abbott Loop Extension $37.5 Million
- Dowling Road Extension $115.0 Million

The full list of almost 40 projects can be found at: www.knikarmbridge.com/TIFIA.html#traffic

KABATA's Traffic and Toll Revenue Update Study prepared by Wilbur Smith Associates included many projects from the AMATS Transportation Improvement Plan and Long Range Transportation Plan. These selected projects were segregated based on expected timeframe for delivery. There were 12 projects listed in the study with 2012 date. All of those projects are complete except for two projects that are still active and under development. There were 18 projects that were included with a date of 2015. Cost estimates developed by AMATS for these 18 projects totaled $486.5 million with $419.8 of that identified as likely to be funded through their Federal Transportation Improvement Program, $46.7 million from bonds and $20 million from State general Funds. Finally, there were 13 projects listed with a date of 2030. Ten of these projects were from the AMATS LRTP with an estimated cost of $749 million. One of those projects, the Glenn Highway Seward Highway Connection project was estimated at $581 million. Three of the projects listed in the Wilbur Smith Associates study for 2030 were from the Mat-Su LRTP and did not include estimated costs.

It is difficult (and potentially inaccurate) to make a statement regarding how much funding will be needed each year from the Legislature since these projects listed in the AMATS LRTP do not carry a schedule nor is the cost estimate provided compiled at a precise enough detail. The information contained in the LRTP is designed to be a best estimate of priorities in the future and demonstrate a level of fiscal constraint based on a system-level estimate of costs and revenue sources that are reasonably expected to be available. The LRTP is intended to be strictly a planning document and not an accounting document. Nor did Wilbur Smith do any modeling that confirms whether each of these network improvements facilitate bridge traffic, have no effect, or in fact reduce bridge traffic. Such modeling is a significant undertaking, and was not part of their scope of work. Wilbur Smith Associates simply assumed that most of the planned network in the AMATS and Mat-Su long range transportation plans consistent with the network ADOT&PF used for the H2H traffic model.

In state fiscal year 2009 the department spent in excess of $108 million dollars (Federal and State funds) in the Anchorage area on transportation improvements. In state fiscal year 2010 the expenditures exceeded $127 million for the Anchorage area. The projects prioritized by the AMATS LRTP in 2007 that Wilbur Smith Associates identified as influencing the viability of the Knik Arm Crossing project total about $1.4 billion through 2030. That equates to approximately $69 million a year. It must be recognized that some of those projects will be funded and delivered by the Municipality as historically they have been proactive in identifying local funding. The projects discussed for the Mat-Su Borough total approximately $330-390 million over 20 years which comes to $16.5-19.5 million a year. Neither of those figures seems unreasonable or disproportionate considering the population growth, current congestion and safety issues or historic appropriations levels. Currently the Federal-aid funds received by the State exceed $400 million annually.

Your final question is how much and what percentage of federal funding it would take to pay for the projects needed to support the bridge traffic flow. The total cost of the projects not covered by toll revenue that influence bridge and general network traffic flow is $1,800 million ($1,400 million in Anchorage and $400 million in Mat-Su) to be constructed over a period of 20 years. Regular federal highway aid funding requires a 10% state match. This leaves $1,620 million that could be funded from regular highway aid dollars. Dividing $1,620 over a period of 20 years results in a hypothetical annual federal highway funding need for these projects of $81 million per year. The State currently receives $400 million in regular federal highway aid funding per year. Allocating $81 million per year for the regional network projects would amount to 20.25% a year of the overall amount.

The Knik Arm Crossing project and the transportation infrastructure improvements currently being considered by the department are not only about passenger vehicles traveling between Anchorage and the Mat-Su Borough. Multi-modal services for the Port of Anchorage and Port MacKenzie are also important links in this equation. Improved connectivity between these two ports and the interior regions of the State will reduce freight movement times and potentially drive increased economic development and job creation. The Knik Arm Crossing project is unique in the sense that it has the potential to generate a large enough revenue stream to pay its own way. No other public transportation system has that expectation yet the Knik Arm Crossing project will possibly exceed that expectation and generate additional revenue that could be used to fund other unrelated transportation projects.

In conclusion, the department feels that the current slate of potential projects for the region holds merit regardless of the disposition of the Knik Arm Crossing. They address identified needs in an environment of continued growth and do not appear to represent an unreasonable or disproportionate cost to the State. I trust that this provides satisfactory answers to your questions and I would be happy to discuss further if you desire.

Sincerely,

Marc Luiken
Commissioner

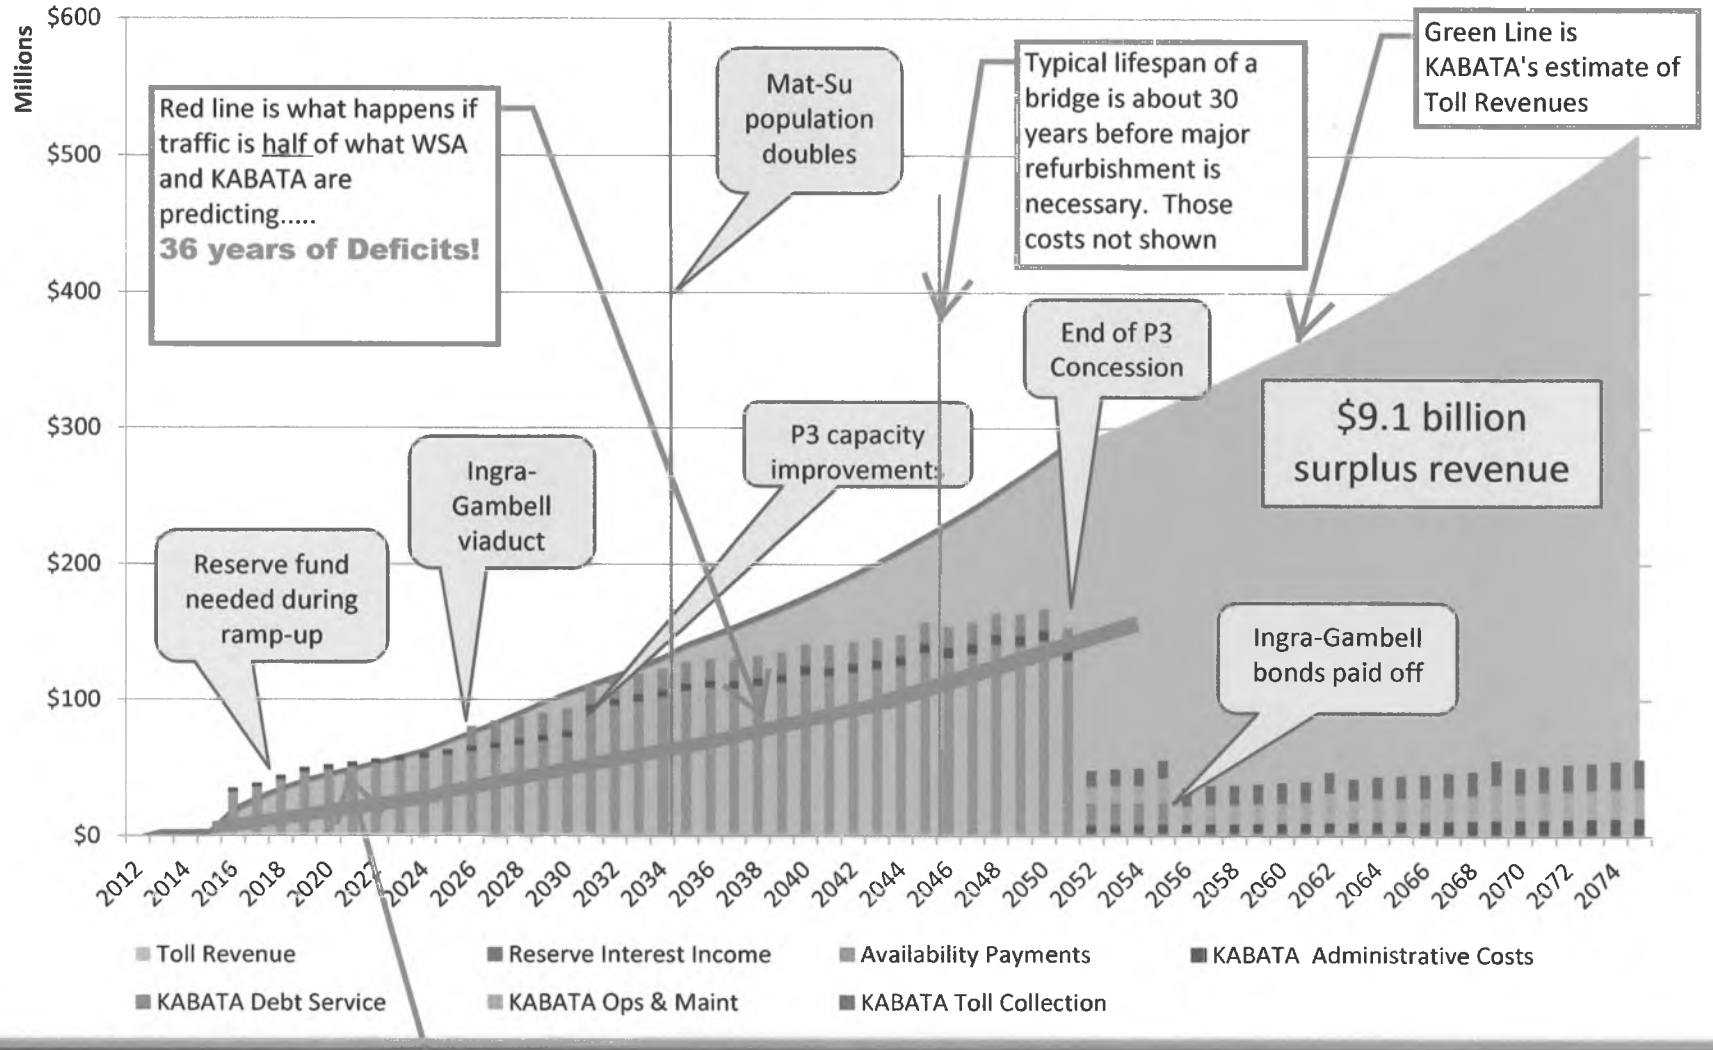
"Reserve Fund" established by SB 80 still provides an unlimited State Guarantee

KABATA's financial descriptions in their "Letter of Interest" from their July 2011 TIFIA Loan Application (which was also included in KABATA's December 2011 TIGER Grant Application, available at KABATA's website at http://www.knikarmbridge.com/2011TIGER/TIFIALOI.pdf) has the following description on the bottom of page 4, under *Sources and Uses of Funds* for what are called "Availability Payments" made by KABATA to the "Private Partner":

> ***"Sources and Uses of Funds:***
>
> Financing for the Project will be achieved through an availability payment concession, whereby the private partner will design, build, finance, operate and maintain the Project under a concession of approximately 35 years after substantial completion in exchange for availability payments from KABATA. The availability payments will be paid from a Project reserve fund that will hold toll revenues as well as any appropriated funds. The Project reserve fund will set forth minimum reserve requirements that, if not met, will trigger a request for appropriation from the State of Alaska. KABATA shall set toll rates (See HB158 and HB159, and SB79 and SB80). The tolls will be collected by the private partner on behalf of KABATA and the State of Alaska. "

Mr. Jeff Stark, of the AG's office was accurate in his statements last Thursday before the House Finance Committee that the "Availability Payment" structure "gives certainty to the Private Partner". Unfortunately the only certainty is that the Private Partner will be paid regardless of whether or not toll revenues will ever exceed those "Availability Payments". While the specific language in SB80 that would have made any obligations of KABATA, "obligations of the State", was removed, KABATA's Federal Loan applications, and their proposed "Pro-Forma" show that if the actual traffic and revenue doesn't meet the highly optimistic forecasts of KABATA and Wilbur Smith & Associates, that $150 Million "Reserve Fund" will need to be "replenished" year after year.

The following pages are taken directly from KABATA's December 2011 TIGER Grant with "explainers".



Page 8, Footnote 1, shows the $50 Million "trigger point" where if the toll revenues are insufficient, KABATA states that "**If ending balance** *(of the "Reserve Fund)* **falls below $50 million, the State will replenish the account back to $50 million."**

Page 7 shows that KABATA is not predicting positive cash flow until 2031. If only half of the traffic shows up, KABATA will be in the red during the entire 35 year life of the P3 Contract.

Refer to the attached information taken from KABATA's November 30, 2011 presentation to the legislature done in Wasilla AK.

These pages are excerpted from KABATA's Nov. 30, 2011 presentation to the Legislature in Wasilla.

60 Year Cost and Revenue Projection

Costs of Phase 1A, expansion from 2 to 4 lanes is NOT shown

www.knikarmbridge.com

KNIK ARM CROSSING

3/26/12

Needed Legislative Action

1) Amend statutes to reflect current market realities

Which apparently is that the P3 "Partners" are not willing to take on the risks of NOT having sufficient Toll Revenues, and therefore need this State Guarantee

2) Clarify KABATA's relationship with the State

Mechanism is clear: Pot of money has 2 basic sources (Tolls and appropriations by the state), and it pays out annual "Availability Payments" to the P3 Contractor

3) Create a reserve fund mechanism to cover KABATA's project obligations

4) Reduce Project cost by lowering the cost of capital

Pending Legislation
SB 80 and HB 158

- P3 contract obligations are state obligations, ~~subject to appropriation~~

Removed the language, but NOT the obligation. Mr. Stark from the AG's office testified in House Finance that the language would be in the RFP and in the contract with the P3 Partner

- Increases bond issuance capacity to $600 mm = PABs allocation

This, along with the RFP and Contract stating that the Legislature WILL Replenish, is where the State Guarantee is made.

- Creates authority for project reserve fund and replenishment mechanism via appropriation
- Confirms property tax exemption under a P3
- Passed out of House and Senate Transportation Committees, pending Finance Committees

Memo

Date: March 22, 2011.

To: Michael Foster, Knik Arm Bridge and Toll Authority

CC. Governor Sean Parnell, Commissioner Marc Luiken, Randall Ruaro

From: Professor Scott Goldsmith, Institute of Social and Economic Research, University of Alaska Anchorage

Subject: Distribution of Misinformation Regarding KABATA Population Predictions

Mr. Foster

Please stop implying that the KABATA population projections for the Matsu Borough, whatever they are, are "in line with other forecasts" including those of the Institute of Social and Economic Research (ISER). Also please stop characterizing the KABATA population prediction as essentially equal to the ISER projections as you did in the Anchorage Daily News (ADN) Compass piece published.on November 2, 2011 and in a recent e-mail to Anchorage community council presidents.

THE KABATA PREDICTION IS NOT WITHIN 1% OF THE ISER PROJECTION, as you have stated. THE ISER 2035 PROJECTION OF 170 THOUSAND IS 12% LOWER THAN YOUR STATED KABATA PREDICTION OF 191 THOUSAND.

I have compiled all the population projections for the Matsu Borough that I can find published since 2005 (see graph). They show a dramatic variation in population projected for the Borough for 2030. In fact the range is from about 130 thousand to 250 thousand—a difference of nearly 100 %. Clearly there has not been concensus among the experts on the expected growth of the Borough. So to say that the KABATA projections are "in line with other forecasts" is not correct.

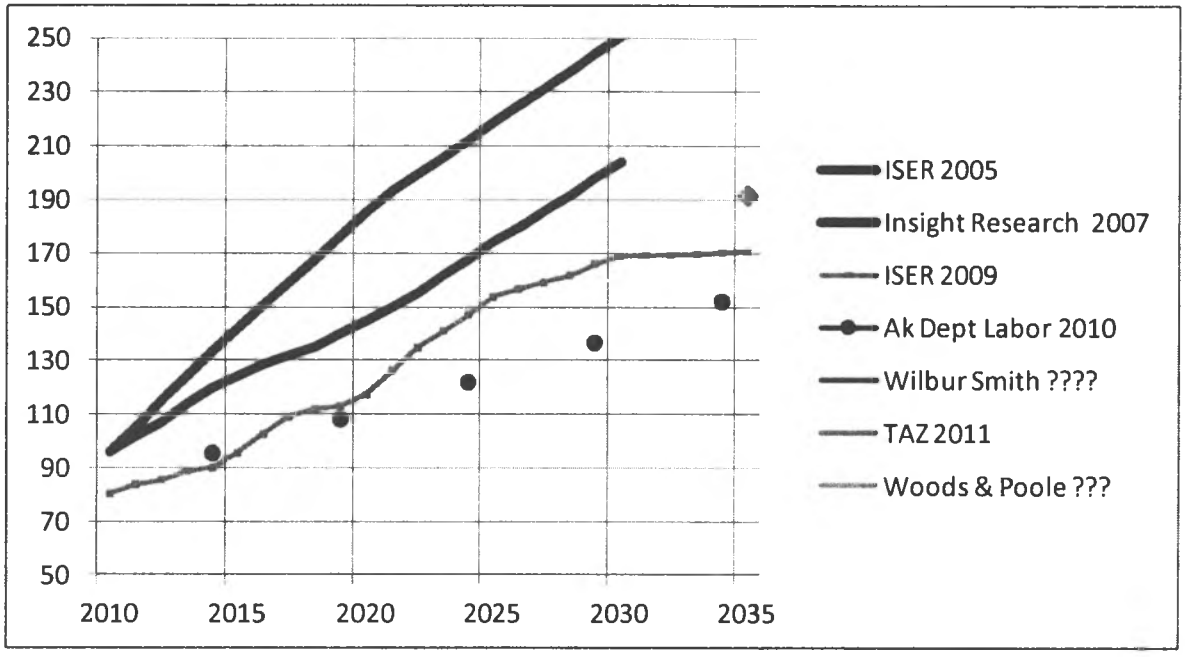
Curiously, there are two projections missing from the graph because, although you mention them, they can not be found. One is the population projections used in the most recent Wilber Smith Update of the Traffic and Toll Revenues Study (2011) done for KABATA. Whatever those projections may be, to the best of my knowledge, they have never been made public. They certainly are not in the published report. As I have indicated elsewhere, it is impossible to assess the validity of the Wilber Smith analysis of traffic and tolls without even this basic information about what is driving their analysis.

The other missing projection is the Woods & Poole projection that you mention on the KABATA website on March 12 of this year, implying that it is "in line" with the KABATA projection. However that projection does not, to the best of my knowledge, appear on your website nor can it be found

3/26/12
Copy on file

elsewhere in the public domain. Again it is impossible to judge the quality of that projection or even what it is without being able to see it.

The graph also shows that the ISER projection of Matsu Borough population for 2035 is 170 thousand. This is 12% or 20 thousand less than the KABATA prediction of 191 thousand reported in the ADN article (but not to be found anywhere in the Wilber Smith report, or as far as I can tell, on the KABATA website. So it is impossible to say if this prediction is for the entire Matsu Borough, or for the AMATS planning region which excludes a portion of the Borough area and population.). THE KABATA PREDICTION IS NOT, as you have stated, WITHIN 1% OF THE ISER PROJECTION. The difference between 170 and 191 thousand is not insignificant but rather equal to several Palmers.



As the author of the ISER report, I stand by the ISER projection based on the assumptions, all publicly available in the written report, which drive the analysis. Although the ISER projection came in low compared to the 2010 census, I do not believe an upward shift in the entire projection is warranted for reasons I recently made clear to the AMATS technical staff. Further evidence that an arbitrary 11% upward adjustment is not warranted is the 2011 Alaska Department of Labor population figure for the Borough which indicates a SLOWER growth rate than the ISER projection.

You of course are free to use any numbers you want in the KABATA analyses. But do not hide the numbers and imply that they are the essentially the same as the ISER projection. Let people see and judge for themselves.

Finally, your statement in the March 2012 KABATA website that "these independent forecasts show that the Matsu borough population will double in the next 25 years" is incorrect. The Alaska Department of Labor projects an increase of only 76% (86 thousand in 2009 to 152 thousand in 2034).

Scott Goldsmith

Matanuska Susitna Borough Population Projections

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

March 8, 2011

Commissioner Bryan Butcher
Department of Revenue
550 W 7th Ave, Suite 1820
Anchorage, AK 99501

Dear Commissioner Butcher,

I am writing to you in your position as a member of the board of the Knik Arm Bridge and Toll Authority as well as Commissioner of the Department of Revenue.

Before the Senate Finance Committee acts on SB 79 and SB 80, it is important that we understand the legislation's potential impact, if any, on the state's bond rating and ability to borrow for other projects.

It is my understanding that a decision by the Authority to issue bonds or enter into contracts or partnerships as authorized by the current statute, would not impact the state's credit rating or ability to take on other debt. However, if the Authority were not able to satisfy the financial obligations it makes, then the state's credit rating would be adversely affected.

Please confirm or correct my analysis of the potential impact of the existing law. Then, please explain how SB 79 and SB 80 would affect the state's financial situation. Specifically, does SB 80 increase the risk to Alaska's credit rating if toll revenue is inadequate and the state chooses not to appropriate additional money? How is the state's responsibility for ensuring the availability payment affected by the language on page 2, line 17 of SB 80 which states, "The monetary obligations incurred by the authority under the partnerships or contracts are obligations of the state, and satisfaction of those obligations from funds other than authority funds is subject to appropriation?" Would the result of the state's failure to meet its "moral obligation" to provide the annual availability payment, be an increase in the cost of borrowing money for other state activities?

January – May: State Capitol – Juneau, Alaska 99801 – (907) 465-2327 – 1 (800) 336-7383 – Fax (907) 465-5241
June – December: 1292 Sadler Way Ste 203 – Fairbanks, Alaska 99701 – (907) 456-8161 – Fax (907) 456-8163
Senator.Joe.Thomas@legis.state.ak.us

Finally, as one of five voting members of the KABATA board, are you confident of the revenue projections and financial analysis in the Knik Arm Crossing Pro Forma Financial Plan and other documents the Authority submitted with its March 1 TIFIA letter of interest, and do you recommend that the legislature pass SB 79 and SB 80 as written?

Thank you for your assistance, Commissioner.

Regards,

Joe J. Thomas

Senator Joe Thomas

Phone: (907) 465-2300
Fax: (907) 465-2389

The Honorable Joe Thomas
Alaska State Senator
State Capitol, Room 514
Juneau, AK 99801-1182

March 30, 2010

Dear Senator Thomas:

This is in response to your March 8, 2011 letter regarding the proposed legislation, SB 79 and SB 80, intended to facilitate the financing of the Knik Arm Crossing.

Your analysis of the current law is essentially correct in that the Knik Arm Bridge and Toll Authority (KABATA) has no authority to obligate the State of Alaska and that the sole legal recourse of a bondholder of KABATA would be the assets and revenues of KABATA. However, it is likely that rating agencies and investors would take some note of the KABATA project even under the current law. Following is a discussion of two kinds of state support for a capital project and where the provisions of SB 80 fall.

MORAL OBLIGATION

The moral obligation structure is used when a more credit worthy entity wants to lend credit support to a less credit worthy entity. The moral obligation is created by mandating a specific structure in law. Specifically, requiring that a reserve dedicated to the liability be created, that the issuer of the reserve have a reporting requirement to the moral obligor, and that in the event of a deficiency in the reserve that a replenishment must be requested from the moral obligor. By creating this legal structure the moral obligor is inferring to investors that while they are not legally guaranteeing the debt, in the event of a shortfall that there will be an appropriation to replenish. If there is a failure of the moral obligor to replenish a reserve based on a moral obligation there would be negative credit ramification, and reduced access to capital. In essence, a moral obligation authority is creating a contingent liability on the moral obligor's balance sheet.

The State of Alaska currently has $1.17 billion of moral obligation debt that is comprised of about $100 million of Alaska Energy Authority utility revenue bonds, about $400 million of Student Loan Corporation bonds, and about $600 million of Alaska Municipal Bond Bank bonds. There has not been a payment under the moral obligation commitment of the state for any of these programs.

Moral obligation debt levels are monitored by rating analysts that review the state, and do go into the calculus of establishing the state's credit rating. As moral obligation debt is generally self supporting and not legal obligations of the State, it has less impact than more direct borrowing structures. A failure to fund a reserve that was established under moral obligation law and depleted due to payment deficiency would subject the state to negative credit rating action.

STATE SUPPORTED

The State Supported structure is used when the state wants to obligate its balance sheet on a subject to appropriation basis rather than a guaranteed basis. Subject to appropriation commitments are made where the State enters into leases or other contracts that obligate the state to pay on a subject to annual appropriation basis, and that lease or contract commitment is fractionalized and sold to third parties. The State of Alaska has most frequently used this structure for the construction of facilities through the issuance of State of Alaska certificates of participation (COP) or through a conduit as lease revenue bonds. The Alaska Seafood & Food Safety Lab was funded through COP and the Goose Creek Correctional Facility was funded through lease revenue bonds.

The State currently has $1.26 billion of state supported debt that is comprised of about $45 million of COPs, $865 million of school debt reimbursement commitment, $30 million of capital project reimbursement, and $315 million of lease revenue bonds. Payments are made annually appropriated for each of these obligations.

State supported debt levels are monitored by rating analysts that review the state and directly impact the state's credit capacity and rating. A failure to appropriate on state supported debt would be viewed as a default of the State of Alaska and result in credit downgrades and significant impediment to future capital market access.

SB 80

The SB 80 Section 1(a)(5)(B) proposed revision provides that monetary obligations under the partnerships or contracts of the Knik Arm Bridge and Toll Authority (KABATA) are obligations of the state and payable on a subject to appropriation basis. This language, in conjunction with other proposed amendment in SB 80, allow up to $600 million of KABATA bonds as well as an unlimited flexibility for private partner bonds to be issued as state supported debt based on a fractionalization of contract payments that are subject to appropriation obligations of the State of Alaska. If contracts are fractionalized and sold to third party investors, by either KABATA or their private partner, they will directly impact the state's debt capacity and credit. In this instance a failure to pay on the contract by the State of Alaska would result in credit downgrades and significant impediment to future capital market access.
The current authorization in SB 80 should be further defined to eliminate the ability of a private party to securitize monetary obligations of KABATA.

It should be clear that SB 80 is authorizing State of Alaska debt of up to $600 million. There can be acknowledgement of the revenue generating nature of the project and the anticipated self sufficiency that is anticipated based on expert analysis, but a firm recognition that the bill as drafted creates a direct line to the State of Alaska's balance sheet for the $600 million of KABATA bonds and unlimited authority for a private partner's bonds is important.

Finally, you asked about my confidence in the revenue projections and financial analysis provided by KABATA in its March 1 TIFIA letter of interest. KABATA has retained CITI, one of the largest and most successful financial services firms in the world, especially as it relates to government financing of infrastructure projects, to develop its financial models. KABATA retained Wilbur Smith, a firm that has advised on many successful projects to do its traffic and toll models. I am confident that the revenue projections and financial analysis are objective and done to the highest of professional standards. This is the type of work that will be accepted and relied upon by the institutional investors that may be interested in financing this project.

Sincerely,

Bryan Butcher
Commissioner

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

March 11, 2011

Mr. Andrew Niemiec, executive director
Knik Arm Bridge and Toll Authority
550 West 7th Ave., Suite 1850
Anchorage, AK 99501

Dear Mr. Niemiec,

Thank you for meeting with me to discuss SB 79 and SB 80 and the Knik Arm Bridge project.

I understand the value of investment in our infrastructure and the importance of projects that create jobs and opportunity for economic development. I have been a consistent supporter of such projects. I also believe it is my responsibility as a legislator to ensure that we clearly understand the financial terms and implications of this legislation, especially because it makes a 35-50 year commitment to appropriate state funds if toll revenue is insufficient.

Due to the complexity and significance of the issues, I felt it would be most efficient to submit my questions to you in writing, so you can prepare a response that can be shared with other Senate Finance Committee members. These detailed questions should not be interpreted as opposition to the Knik Arm Bridge or to state financial involvement. I may, in fact, support the project if these concerns are adequately addressed.

Questions about the KABATA project and SB 79/80

1. SB 80 (page 5, lines 17-31) says the reserve fund, into which the state may deposit $150 million through SB 79 and into which all toll revenue will be deposited, can be used for a wide variety of expenses besides the annual availability payment. Uses include the authority's overhead and administrative costs, any indebtedness of the authority, termination payment obligations, improvement or expansion of the bridge, and construction and operation of projects of the authority or other public entities.

    - Why does KABATA need this broad spending authority if the purpose of the fund is to ensure the annual payment in order to attract lower cost financing?
    - What situations would trigger an obligation to make termination payments, and how large would those payments be?
    - If KABATA is not successful in entering into a contract with a private partner to build and operate the bridge, will the state have to refund money KABATA

January – May: State Capitol – Juneau, Alaska 99801 – (907) 465-2327 – 1 (800) 336-7383 – Fax (907) 465-5241
June – December: 1292 Sadler Way Ste 203 – Fairbanks, Alaska 99701 – (907) 456-8161 – Fax (907) 456-8163
Senator.Joe.Thomas@legis.state.ak.us

received from the federal government, what would be the refund amount, and could the reserve fund be used for that purpose?

- Does the existing statute or SB 80 authorize KABATA to be involved in projects other than the Knik Arm Bridge?
- What other public entities and projects might be funded with the reserve?
- Would the state have to guarantee payment of monetary obligations KABATA may incur in connection with these new projects, in accordance with page 2, lines 17-20 of SB 80?
- What is the legislature's role in approving projects the authority may wish to undertake with excess reserves or earnings?

1. SB 80 (page 6, line 6) says income and interest earned by the fund can be transferred to other accounts and used for other purposes. Page 5, line 8 (current law) says, "The interest earned on or profit derived from these funds and reserves shall be the property of the authority." The state's $150 million deposit into the reserve fund should generate $5-10 million each year. In addition, up to $8 billion in toll revenue is anticipated by the authority and will earn significant interest.
    - Why are earnings not retained in the reserve fund, or deposited in the state General Fund if they exceed the amount needed to meet the reserve fund requirement?

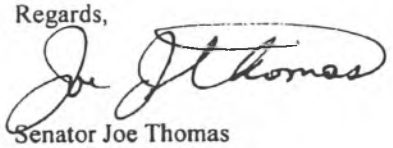
2. SB 80 (page 6, line 4) prohibits using the fund for the design, construction, or operation of projects, if that would reduce the fund to less than the reserve fund requirement. The term "reserve fund requirement" is defined on lines 20-23 as an amount determined by the authority, but there are no guidelines for setting that amount.
    - Please explain what criteria the authority will use to determine if the reserve fund is sufficient.
    - Why does the bill not establish $150 million as the floor for use of the reserve fund for other purposes, or return excess reserves to the General Fund?

3. The authority anticipates that over $8 billion in excess toll revenue will be received by the reserve fund over sixty years, and that those funds will be available for transportation projects statewide.
    - Can the authority board of directors lower the toll to reduce or eliminate this excess revenue?
    - Would excess revenue return to the General Fund for appropriation by the legislature, and through what mechanism?

4. Would the existing "pledge of the state" in AS 19.75.251 limit future legislatures' ability to reappropriate fund earnings or excess reserves from the authority to other state programs?

5. A financial document supporting the March 1, 2011 TIFIA Letter of Interest contains a column entitled "State Replenish" with a footnote stating, "If ending balance falls below $50 million, the State will replenish the account back to $50 million." (page 7 Private Model – Availability Payment Structure – Current Market – State Reserve Fund)
    - What are the implications for the state if KABATA receives TIFIA credit based on that document?

6. KABATA has significant remaining federal funds.
    - What is the amount of remaining KABATA funds?
    - Can that money be used to cover future administrative costs, which the TIFIA LOI documents estimate will be $3 million/year adjusted for inflation, rather than using toll revenue backed by the state to pay administrative costs?



7. The March 1, 2011 TIFIA Letter of Interest includes a document entitled "Annual Employment Impact of Knik Arm Toll Bridge." This document anticipates 2,400 direct bridge construction jobs and 4,000-8,000 direct jobs after construction in fields such as "residential," "retail" and "office."
    - How many full-time and part-time jobs are anticipated in the actual operation and maintenance of the bridge and toll facilities, who will employ those workers, and what percentage are expected to be Alaska residents?
    - Has the authority taken into account the strong financial incentive for the private partner to keep labor costs to a minimum in the on-going operation of the bridge, which could encourage the use of out-of-state workers, perhaps in a week on/week off rotation?
    - Which provisions in the RFP will encourage use of Alaska subcontractors and Alaska workers in construction, maintenance, and operation of the bridge?

8. The March 1, 2011 TIFIA Letter of Interest includes a "pro forma financial plan" with 35 annual availability payments beginning at $36 million in 2016 and ending at $141 million in 2051. However, the KABATA board has the authority to enter into a contract with substantially different terms.
    - What would be the consequences of amending SB 80 to require legislative approval of the final contract, or to establish a maximum length and amount of the availability payments?

I understand the value of expanding the state's transportation network and opening new land to development, so I do not need an explanation of the benefits of the bridge. I would, however, very much appreciate a written response to the questions contained in this letter before SB 79 and SB 80 are considered by the Senate Finance Committee on which I serve.

Thank you for your assistance.

Alaska State Legisiature

CS for SB 80 – Knik Arm Bridge
Explanation of Changes

1. Sec. #1 of the original bill is deleted. This removes the obligation of the state language located on Page 2, beginning on Line 17.
2. The other sections of the original bill are renumbered in the CS, but the same in scope.
3. By these changes, the bill now:
    a. Increases KABATA's conduit bonding issuance authority from $500 million to $600 million.
    b. Provides KABATA the statutory ability to establish a reserve fund for the project to be housed in the Department of Revenue.
    c. Clarifies the tax exempt status of the bridge is like other state roads in Alaska.

Alaska State Legislature

Senate Bill 80 Sponsor Statement

Senate Bill 80 amends the Knik Arm Bridge and Toll Authority's enabling statute to provide for a successful procurement for the Knik Arm Crossing project and to generate the best value for the state. Passing this legislation **this session** is important to seeing the Knik Arm Crossing efficiently move toward a successful and low-cost procurement process and facilitate being open for traffic in 2015. The Knik Arm Crossing will be a significant addition to Alaska's infrastructure that will further facilitate the movement of goods and people in the state.

Senate Bill 80 was written in consultation with the Knik Arm Bridge and Toll Authority (KABATA), which was established in 2003 by the Alaska Legislature. The bill accomplishes many items KABATA has deemed necessary to have a successful public-private partnership procurement. Those items are:

- **Increase in KABATA's Bonding Authority from $500 million to $600 million**
    - The $600 million number represents the same amount authorized under Private Activity Bond (PABs) allocation from FHWA
    - Lowers the cost of capital for the project and ultimately lowers the cost to end users
    - Private partner is the borrower of any PABs issued.

- **Property tax relief** – clarify that the Crossing and associated facilities are exempt from state and local property taxes
    - Like any other transportation project in our State, the roads and bridges are not subject to property taxation.
    - Any private facilities developed outside the crossing will be taxable
    - Property tax exemption reduces the availability payment and reduces the toll
- **Contractual Monetary Obligations**
    - Identifies the *obligations of the State of Alaska* under a P3 process
    - The legislative language applies to "monetary liabilities" which may be incurred by KABATA under a P3 process

Senator_Linda_Menard@legis.state.ak.us

- Any P3 agreement needs to be approved by the KABATA Board of Directors, State AG's office, ADOT&PF
- Serves to lower the cost of debt and equity to finance the project
- Keeps the tolls affordable to the traveling public

Project reserve

- Creation of a reserve fund is to provide a backstop for toll revenue fluctuations.
- Serves to enhance the credit worthiness of the project and reduce overall project costs
- Will be repaid over the project life

All of the above language clarifications and additions serve to lower the cost of capital on this much needed infrastructure project and deliver the benefits in a timely and efficient manner.

Please help me by supporting this legislation so a long-term, long sought after project can be realized.

MEMORANDUM February 3, 2011

SUBJECT: Sectional summary of SB 80 (Work Order 27-LS0430\B)

TO: Senator Linda Menard
Attn: Michael Rovito

FROM: Brian J. Kane BJK
Legislative Counsel

You have requested a sectional summary of SB 80, a bill relating to the Knik Arm Bridge and Toll Authority.

Please note that a sectional summary of a bill is not an authoritative interpretation of a bill. The bill itself is the best statement of its contents.

Section 1 of the bill amends the powers of the Knik Arm Bridge and Toll Authority to add that monetary obligations incurred under a public-private partnership or service contract are obligations of the state that are subject to appropriation.

Section 2 of the bill authorizes the authority to borrow money and lists the means by which the principal and interest on bonds of the authority may be paid.

Section 3 of the bill increases the aggregate amount of bonds the authority may issue to $600,000,000.

Section 4 of the bill restates a portion of what was originally part of AS 19.75.211(a) but was moved to subsection (e) due to drafting constraints. It adds a reference to private revenue under a public-private partnership.

Section 5 of the bill lists what deposits may be made into a reserve fund established under AS 19.75.221(h).

Section 6 of the bill states the purposes for which a reserve fund of the authority may be used and provides for various rules and reports regarding transfers from a reserve fund and amounts of money needed to be in a reserve fund.

Section 7 of the bill states that rights and interests in real and personal property, assets, income, and receipts held by a private person or enterprise under a public-private partnership agreement with the authority, except any rights and interests of the private

person in property serving a business, commercial, or other purpose not necessary to operate the facilities, properties, or projects of the authority, shall be exempt from all taxes and special assessments of the state or a political subdivision of the state.

Section 8 of the bill establishes the Knik Arm Crossing fund as a separate fund in the general fund and states that money from the fund shall be transferred from the fund to a reserve fund of the authority once a public-private partnership agreement is executed.

The Honorable Joe Thomas
Alaska State Legislature
State Capitol
Juneau, Alaska 99801

Re: SB 79 and 80

Dear Senator Thomas:

We appreciate your thoughtful questions and evident interest in the Knik Arm Bridge project. We take this opportunity to provide specific answers to your questions.

1. Your first item 1 includes the following questions.

- *Why does KABATA need this broad spending authority if the purpose of the fund is to ensure the annual payment in order to attract lower cost financing?*

  KABATA does not seek to, and SB 80 will not, expand KABATA's existing spending authority. AS 19.75.111(a)(1) limits KABATA's jurisdiction to "the Knik Arm Bridge and its appurtenant facilities." In the Record of Decision, the FHWA defined the Project to include the bridge and approximately 18 miles of connecting roadway. Future phases will include capacity improvements and a second connection in Anchorage to Ingra and Gambell Streets. We refer to these future appurtenant facilities collectively as "other KABATA project responsibilities."

  The purpose of establishing in SB 80 a broad set of uses of the project reserve fund is to make it abundantly clear to the private party and its lenders that their beneficial interest in the project reserve fund cannot prevent use of surplus funds for other purposes of benefit to the State. It is not to expand KABATA's statutory authority.

  To attract lower cost financing, the trust agreement governing the project reserve fund must set forth sources and uses of funds. The sources of funds in the project reserve will be the $150 million appropriation, toll revenue, and earnings

on deposited funds. The funds in the project reserve will be used according to an established order of priority for use. We anticipate that KABATA's normal overhead and administrative costs and the availability payments will receive top priority. Reserves also need to be built for project contingencies. The trust agreement will also establish the conditions under which KABATA may use surplus funds – i.e. funds not needed for these higher priority uses – for its other KABATA project responsibilities, for release of the $150 million (plus interest) back to the General Fund and for other eligible transportation purposes as decided by the State Legislature. During the procurement KABATA will develop the precise terms and conditions of the trust agreement for the project reserve fund, taking into consideration input from the proposers, their lenders and the ratings agencies.

- *What situations would trigger an obligation to make termination payments, and how large would those payments be?*

Concession agreements involving private financial investment always include termination payments if the concession is terminated before the end of the concession term. It is impossible to raise private debt and equity financing without termination payment provisions.

The amount of termination payments generally falls into three categories. The first category includes termination for convenience by the State or termination due to material uncured public party default. For this category, the payment is intended to compensate the private party for its lost business enterprise (similar to the constitutional requirement for just compensation upon condemnation of private property). It includes an amount sufficient to repay outstanding project debt, outstanding equity investment and the contractual rate of return on the equity investment.

The second category is termination due to uncured, material private party default. The termination payment typically results in loss of the private equity and coverage for less than all (e.g. 80 – 85%) of the outstanding project debt.

The third category is termination for stated reasons beyond either party's control. These can include continuation of excusable delays (e.g. due to earthquake) for an extended period of time, or a final court judgment halting the project or invalidating the public-private agreement. The termination compensation is basically calculated to return the private party to the position it was in before entering into the contract – i.e. the amount of its outstanding project debt, return of expended equity plus a rate of return on expended equity up to the date of termination (sometimes less than the rate stated in the proposal).

Although KABATA will need to take all termination possibilities into account in negotiating the public-private agreement, it is unlikely that any will occur. While the foregoing termination payments can be large, KABATA and the State will have received the value of the developed project in return. In addition, KABATA

would have the authority and capacity to issue toll revenue bonds to raise all or a portion of the money needed to make the termination payment.

It is rare that any termination compensation is provided if termination is due to the bankruptcy of the private party, and the public-private agreement will be structured to preclude or minimize the possibility.

- *If KABATA is not successful in entering into a contract with a private partner to build and operate the bridge, will the state have to refund money KABATA received from the federal government, what would be the refund amount, and could the reserve funds be used for that purpose?*

  Title 23 requires that the ADOT&PF pay back any Preliminary Engineering to FHWA if the project has not advanced to the Real Estate or Construction phase within 10 years from the date the project was authorized. Likewise, real estate funds must be paid back to FHWA if the Construction phase of work has not commenced within 20 years of the date the funding for real estate acquisition was made available. The funding for real estate acquisition has not yet been made available, but is imminent.

  The refund amount would depend upon the amount of federal funds expended at the time. To date, $57,043,987 of federal Title 23 highway funds have been obligated to the project and approximately $46 million have been expended (excluding State matching funds).

  In the unlikely event that FHWA requested that funds be repaid, they would not be paid from the project reserve fund. This is because under SB 80 the $150 million appropriation will not have been released to the project reserve fund. The appropriation is to be held by the Department of Revenue at least until a public-private partnership agreement is signed. Under the circumstances described, no signing will have occurred.

- *Does the existing statute or SB 80 authorize KABATA to be involved in projects other than the Knik Arm Bridge?*

  The existing statute limits KABATA's jurisdiction to "the Knik Arm Bridge and its appurtenant facilities." AS 19.75.111(a)(1). SB 80 does not change the scope of jurisdiction. For further discussion, see the response to the 1st question under this item 1.

- *What other public entities and projects might be funded with the reserve?*

  Federal law and regulations limit the permissible uses of surplus toll revenues from transportation projects funded in whole or in part with federal-aid highway funds to "any purpose for which Federal funds may be obligated by a State under this title [23]," including roads, bridges, trails, transit, ferries, etc. 23 U.S.C. §129(a)(3). The Knik Arm Crossing and the toll revenues from it are subject to

these laws and regulations. Therefore, surplus funds in the reserve could be used to fund or finance other KABATA project responsibilities (described above) and other federally eligible transportation purposes as determined by the State Legislature.

We believe, however, that surplus funds used to repay the $150 million appropriation, as well as a reasonable interest rate on the appropriation, could be returned to the General Fund free of these federal restrictions on use. KABATA will work with the Department of Revenue and the FHWA on arrangements that will facilitate this result.

- *Would the state have to guarantee payment of monetary obligations KABATA may incur in connection with these new projects, in accordance with page 2, lines 17-20 of SB 80?*

No. SB 80 creates no State guarantee of any monetary obligations of KABATA. To do so would be unconstitutional. Rather, SB 80 would mean that although a monetary obligation of KABATA under a public-private partnership agreement – including one for a future, new project – would be treated as a contractual obligation of the state, it could only be satisfied from State funds to the extent a future State Legislature chooses to appropriate funds needed to pay the obligation.

KABATA has no plans to enter into such a future public-private partnership agreement for meeting other KABATA project responsibilities and its statutory authority under AS 19.75 is limited to the Knik Arm Bridge and appurtenant facilities, constraining its ability to contract for other projects. When the time comes, KABATA's board would evaluate whether it is in the public interest to use such an agreement or some other method of contracting for meeting other KABATA project responsibilities.

- *What is the legislature's role in approving projects the authority may wish to undertake with excess reserves or earnings?*

The central reason KABATA is requesting that SB 80 authorize the use for other transportation purposes of reserve funds in excess of those needed to meet project financial obligations is to assure that KABATA's Board and the State Legislature have maximum freedom to decide when, where and how to use the excess funds. We do not want the private party or its lenders to restrict such uses.

Those future uses will be subject to commitments in the Record of Decision for the Knik Arm Crossing. Because AS 19.75 assigns to KABATA the other KABATA project responsibilities and the Record of Decisions and EIS for the Knik Arm Crossing call for these future capacity improvements, it can be expected that the KABATA Board will allocate such future surplus revenues first toward meeting these responsibilities.

The State Legislature will control use of excess revenues for Title 23 eligible transportation projects beyond the other KABATA project responsibilities, as explained at the 1st and 4th questions above.

1. Your second item 1 sets forth the following question.

- *Why are earnings not retained in the reserve fund, or deposited in the state General Fund if they exceed the amount needed to meet the reserve fund requirement.*

Interest earnings will be retained in the project reserve fund and will be subject to the same uses and priority of uses as all other funds in the reserve.

KABATA sized the $150 million appropriation request based on the assumption that earnings would be retained. The financial projections indicate that interest earnings on the $150 million appropriation will be needed in order to keep the project reserve fund at a level that will not require a request for an additional appropriation. Thus, retention of the earnings in the reserve fund until there are surplus funds will enhance the ability to attract low cost, highly rated financing for the project.

Once the reserve fund builds back up to the level that there are excess funds not needed for the project, then interest earnings, like all other surplus funds, will be freed up for other KABATA project responsibilities, repayment to the General Fund of the $150 million appropriation and interest thereon, and other eligible transportation purposes, as described in the 5th and 7th questions under the first item 1 above.

2. Your item 2 includes the following questions.

- *Please explain what criteria the authority will use to determine if the reserve fund is sufficient.*

KABATA's primary criterion will be to set the minimum reserve requirement at the lowest level consistent with obtaining the best financing terms for the project. KABATA's Board and staff will be working with our financial and legal advisors and will consider input from proposers, their lenders and rating agencies to determine this number.

For KABATA's financial plan, we have assumed a $50 million minimum reserve requirement. The financial plan is a pro forma model from the private perspective on the transaction. The minimum reserve requirement in the plan is a hypothetical floor for modeling purposes only, and is only indicative of the final structure for the project reserve fund.

We point out that the minimum reserve requirement is different from the maximum reserve requirement. The latter is the floor above which available funds would be treated as surplus funds that could be used for other KABATA

project responsibilities, for repaying to the General Fund the $150 million reserve appropriation, plus interest, and for other eligible transportation projects chosen by the State Legislature. For KABATA's financial planning purposes, we have assumed a $150 million maximum reserve requirement once the project achieves annual toll revenues at least equal to annual availability payments.

The minimum and maximum requirements will be refined as the project nears the close of financing.

- *Why does the bill not establish $150 million as the floor for use of the reserve fund for other purposes, or return excess reserves to the General Fund?*

  Like the minimum reserve requirement, KABATA's objective is to set the maximum reserve requirement, as described in the immediately preceding paragraph, as low as possible consistent with obtaining the best financing for the project. KABATA believes it is unwise to set a fixed amount as the floor in the bill because it will not be tested and verified by actual financial market conditions. The $150 million floor in the pro forma financing plan is a hypothetical threshold for modeling purposes only, and is only indicative of the final structure for the project reserve. If setting a floor higher than $150 million were to prove beneficial in reducing the overall cost of debt and equity financing for the project, the flexibility to do so would be advantageous to the State. Likewise, if setting a floor lower than $150 million can achieve optimal financing for the project, the flexibility to do so would be to the State's advantage.

2. Your item 3 includes the following questions.

- *Can the authority board of directors lower the toll to reduce or eliminate this excess revenue?*

  Yes, as provided by AS 19.75.111(a)(10). The board has the exclusive authority to set and collect tolls, as provided by AS 19.75.111(b)(6).

  KABATA expects that the public-private agreement and related financing agreements will require KABATA to follow toll rate and toll revenue covenants in order to meet coverage ratios for the availability payments.

- *Would excess revenue return to the General Fund for appropriation by the legislature, and through what mechanism?*

  For potential uses of excess revenue, please refer to the answers to the 5th and 7th questions under your first item 1 above.

  The mechanism for return of excess revenue (i.e. fund balances in excess of the maximum reserve fund requirement) presumably would be through the normal legislative process. Under SB 80 KABATA would make annual reports to the State Legislature and Governor on the status of the project reserve fund, giving the State Legislature the information it will need to decide on legislation to use

and apply the excess reserve funds to projects of their choosing. Consistent with SB 80, the reserve fund terms and conditions will explicitly authorize use of surplus funds for non-project purposes without need for consent of the private party or its lenders.

4. Your item 4 sets forth the following question.

- *Would the existing "pledge of the state" in AS 19.75.251 limit future legislatures' ability to reappropriate fund earnings or excess reserves from the authority to other state programs?*

No. The very purpose of authorizing use of surplus funds in the project reserve for non-project purposes is to assure that the State Legislature has maximum flexibility, consistent with federal regulations and the commitments in the Record of Decision and EIS, to decide on use of the surplus funds free from interference by the private party or its lenders.

5. Your item 5 sets forth the following question.

- *What are the implications for the state if KABATA receives TIFIA credit based on that document [the TIFIA Letter of Interest]?*

The TIFIA letter of interest is only an expression of interest and is not a binding commitment. KABATA submitted it to the TIFIA program for the benefit of the project and the eventual private party. KABATA would not be the borrower. The private party, if it chooses to use TIFIA, will be the borrower and negotiate its own terms and conditions with the FHWA, which administers the TIFIA program. KABATA will not be bound by the credit agreement between the private party and the FHWA.

Regardless of whether the private party uses TIFIA financing, as provided in SB 80, KABATA would request an appropriation if the reserve balance falls below the minimum reserve requirement. The amount of the appropriation would be the amount necessary to restore the fund balance to the minimum reserve requirement. For a further explanation of how the minimum reserve requirement will be set, see discussion at the 1st question under your item 2 above.

6. Your item 6 includes the following questions.

- *What is the amount of remaining KABATA funds?*

The remaining federal Title 23 highway funds previously appropriated but not obligated to the Project are $55,528,355. The State matches just over 9% of eligible costs, for total Title 23 funding of $61,040,294. The $55.5 million figure is included in the sources in the pro forma financing plan within the $112.6 million figure designated *Federal* under Public Funds.

- *Can the money [i.e. KABATA's remaining federal funds] be used to cover future administrative costs, which the TIFIA LOI documents estimate will be $3 million/year adjusted for inflation, rather than using toll revenue backed by the state to pay administrative costs?*

  KABATA's remaining federal funds can be used to cover KABATA administrative costs during construction only. Federal Title 23 funds cannot be used for operations and maintenance post construction.

7. Your item 7 includes the following questions.

- *How many full-time and part-time jobs are anticipated in the actual operation and maintenance of the bridge and toll facilities, who will employ those workers, and what percentage are expected to be Alaska residents?*

  It is estimated that the actual operations and maintenance of the bridge and toll facilities will require between 35 and 75 persons depending on the traffic volume and number of transactions/accounts under management. These workers will be employed by the private partner and/or their subcontractor(s).

  While there may be several supervisory management personnel from outside of Alaska representing the private partner, KABATA believes that all other employees, representing the vast majority (e.g. 95%) of project personnel, will be Alaska residents. KABATA will encourage Alaska hire to the extent allowed by law.

- *Has the authority taken into account the strong financial incentive for the private partner to keep labor costs to a minimum in the on-going operation of the bridge, which could encourage the use of out-of-state workers, perhaps in a week on/week off rotation?*

  Yes. It is very unlikely that rotational work by out-of-state workers would be cost-effective for the private party. The nature and scope of the work requires on-site personnel for bridge operations and for managing customer care for tolling operations. In addition, the travel costs for shuttling a work force in and out of the State would be prohibitive. Strong local hiring is the consistent result for other P3 projects in the United States.

- *Which provisions in the RFP will encourage use of Alaska subcontractors and Alaska workers in construction, maintenance, and operation of the bridge?*

  The RFP will encourage Alaska hire to the extent allowed by law.

  The overwhelming experience with other P3 projects in the United States is that proposers form consortia with substantial participation by local firms. Proposers obtain real advantages by doing so, including local knowledge, local connections, economies of scale and goodwill. As a practical matter, most of the approximately 5,000 FTE's needed to construct the bridge over 3-5 years will be

Alaska hire, including jobs in excavating, gravel trucking and placement, grading and paving, placing armor rock, etc.

8. Your item 8 sets forth the following question.

- *What would be the consequences of amending SB 80 to require legislative approval of the final contract, or to establish a maximum length and amount of the availability payments?*

KABATA wants to leave you with no doubt that a requirement for legislative approval of the final contract would so chill private sector interest in proposing that it would most likely lead to an unsuccessful procurement. The experience of other states like Pennsylvania, Florida and California is informative. In Pennsylvania, the legislature refused, for political reasons, to approve a P3 proposal for the Pennsylvania Turnpike after a successful P3 procurement was completed, sending shock waves through the industry. In Florida and California, this type of legislative provision completely stifled P3 procurements. Only after these states removed this requirement did the private sector take the P3 programs seriously and were these states able to successfully conduct P3 procurements (for the Port of Miami Tunnel project, the I-595 managed lanes project in Ft. Lauderdale, and the Presidio Parkway project in San Francisco).

Prospective private partners will spend in excess of $5 million in preparing proposals. They must prepare conceptual designs in order to assemble a competent, fully priced competitive proposal. They will have a substantially negotiated design-build contract, firm financing commitments, arrangements for operations and maintenance, etc. that all must be considered in preparing a proposal. Even if a stipend is paid, it will not fully compensate them for proposal and opportunity costs of committing scarce resources to a complex proposal process. Subjecting the proposal process to a political decision after substantial investment of money and time will not draw private sector interest. The private sector will not take this kind of political risk.

In short, the requirement for legislative approval of the P3 agreement would deal a major setback to the project.

Regarding a legislatively-mandated maximum length and/or maximum availability payment, while there is some precedent for this in other states, we believe the existing governance structure for KABATA under chapter 19.75 makes this unnecessary. The KABATA Board is composed of the commissioners of the ADOT&PF and the Department of Revenue, and three members from the general public appointed by the Governor and two State Legislators. The state's interests are well represented and well protected. The KABATA Board is under a fiduciary duty to obtain terms that it determines are advantageous to the state. They will make decisions within a disciplined framework, with consultation with and involvement of the ADOT&PF, the Department of Revenue, the Alaska

Department of Law and highly qualified financial, technical and legal consultants for KABATA.

If your office remains interested in a statutory limit for the term and/or the availability payment, we would like the opportunity to discuss it in more detail with you. The structure of those limitations must recognize market realities and the complex nature of these arrangements. Our interest is in obtaining the best results for the state.

Sincerely,

Andrew J. Niemiec
Executive Director

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

March 8, 2011

Commissioner Marc Luiken
Department of Transportation and Public Facilities
P.O. Box 112500
Juneau, AK 99811-2500

Dear Commissioner Luiken,

I am writing to you in your position as a member of the board of the Knik Arm Bridge and Toll Authority as well as Commissioner of the Department of Transportation and Public Facilities. Construction of the Knik Arm Bridge is a very significant transportation decision, and the expertise of your department is essential to evaluate Senate Bills 79 and 80, and to anticipate the impact of the bridge on our transportation system.

During the Senate Transportation Committee hearing on SB 79 and SB 80, Division of Program Development director Jeff Otteson testified in support of the legislation. Mr. Otteson stated that construction of the bridge would reduce the amount of money the state would otherwise have to spend on the Glenn Highway.

If this is the department position, please describe the Glenn Highway maintenance or expansion projects the department anticipates will not be undertaken if the bridge is built, and their estimated cost. I would like to know the department's current count of vehicles crossing the Glenn Highway bridge, your future traffic projections for the Glenn, and how they compare to the estimates in the Authority's February 25, 2011 Traffic and Toll Revenue Update Study prepared by WilburSmith Associates.

I would also appreciate an estimate of the cost of constructing, improving and maintaining the connecting roads carrying vehicles to the bridge, such as Knik Goose Bay Road, Burma Road, South Big Lake Road, and the phase 2 connection across Ship Creek to Ingra-Gambell, or other infrastructure the department thinks will be necessary to generate the bridge traffic anticipated in the toll revenue estimates or to respond to area development.

January – May: State Capitol – Juneau, Alaska 99801 – (907) 465-2327 – 1 (800) 336-7383 – Fax (907) 465-5241
June – December: 1292 Sadler Way Ste 203 – Fairbanks, Alaska 99701 – (907) 456-8161 – Fax (907) 456-8163
Senator.Joe.Thomas@legis.state.ak.us

I read in the Authority's February 25, 2011 Traffic and Toll Revenue Update Study prepared by WilburSmith Associates (page 16) that the traffic demand model assumed the traffic network would include, "All projects listed in the official transportation planning documents" which included the AMATS TIP, the STIP, the Mat-Su Borough Long Range Transportation Plan and the Anchorage Bowl 2025 Long-Range Transportation Plan. It has been my experience that there is often not sufficient funding to complete all projects appearing in those transportation planning documents as scheduled. If toll revenue is dependent on their timely completion, it will be essential to anticipate and plan for those costs.

Please confirm with WilburSmith which road projects they assumed in their model and estimate the amount of state and federal funds the legislature will need to appropriate each year to meet those expectations.

Finally, I would appreciate your assessment of the impact on other department projects, of directing that amount of federal funding to connecting roads. In other words, what percentage of Alaska's anticipated federal highway funding will be needed to complete the traffic network on which toll revenue is based, and will that reduce the amount available for roads in the Northern and Southeast Regions and elsewhere in the Central Region?

I realize that these are not simple calculations, but I believe it is important that the legislature has the information necessary to understand the implications before acting on legislation.

Thank you for your assistance, Commissioner.

Regards,

Joe J. Thomas

Memorandum

SENT BY ELECTRONIC MAIL

Subject: **INFORMATION:** National Highway System Designation of the Knik Arm Crossing Project

Date: January 21, 2011

From: Original Signed by Gabe Rousseau for
Lucy Garliauskas
Director
Office of Human Environment

In Reply Refer To: HEPH-20

To: Mr. David Miller
Division Administrator
Juneau, AK

We have reviewed the request by the State of Alaska Department of Transportation and Public Facilities, dated August 13, 2010 for the proposed addition of the Knik Arm Crossing Project to the National Highway System (NHS), which will connect to the Port of Anchorage Intermodal Connector. Upon review of the supporting documentation, we concur that the proposed crossing and connection meets the secondary eligibility criteria, as defined under Appendix D of 23 CFR 470, as a significant investment in an intermodal facility. However, since the crossing is not yet built and will not be constructed for three to five years, it cannot be classified as an NHS intermodal connector at this time. It does qualify for addition as an Unbuilt NHS Route. We hereby approve your request and will adjust the NHS as follows:

- Add the proposed 9.8-mile segment of unbuilt facilities to the NHS, from the Port Of Anchorage Intermodal Connector to the Port of MacKenzie.

We will make the appropriate changes to the System and update the NHS maps for the State as stated, and upon notification of completion of construction, we will update the NHS classification from Unbuilt NHS Route to NHS Intermodal Connector. If you have any questions or comments, please call Kevin Adderly at (202) 366-5006.

cc: John Lohrey, AK Division

Knik Arm Crossing
Public-Private Partnership and Cost of Capital Overview

Availability Payment Structure

- Private partner responsible for finance, design, build, operate and maintain over life of agreement (e.g. 35 years)
- State makes regular annual payments to private partner that cover its:
  - Debt service
  - Operation and maintenance costs
  - Reasonable return on invested equity
- State owns facility and toll revenues
- State funds annual payments from:
  - Toll revenues
  - Then, if necessary, from reserve fund
  - Then, from appropriations (if necessary)
- Annual availability payment amount fixed, except:
  - A portion is indexed to CPI to account for increases in O&M costs
  - Increases if traffic significantly increases over time, to account for resulting increases in O&M costs
  - Reductions if private partner fails to meet contract standards for keeping facility available for public use and in good and safe condition
- Competition is lowest annual availability payment from State to private partner
- Off balance sheet financing for State

Reduces Cost of Capital

- Private partner's cost of capital a significant factor in amount of annual payments
- Credit that backs State's annual payment obligation is a material factor affecting availability and cost of capital
- Senior debt must receive investment grade credit rating for project to be eligible for low cost, federal loan ("TIFIA" financing)

SB 79 and SB 80 enhance project credit, ensuring an investment grade rating is achieved and that the developer can obtain the lowest cost of capital, thereby providing the lowest availability payment offers to the state

Senator Bert Stedman
State Capitol, Room 516
Juneau, AK 99801-1182

Re: SB 80

Dear Senator ~~Stedman~~ Bert:

Developing and improving transportation infrastructure, such as constructing roads and bridges is critical to the expansion and development of our State's natural resources. Some projects by their location and nature have a statewide significance. The proposed Knik Arm Bridge will provide access to vast undeveloped acreage as well as an alternate route for the transport of people and goods along one of our busiest corridors. It is one of these projects of statewide significance.

The AGC supports a healthy economy and the economic development of Alaska. We look at infrastructure development as crucial for our economy and our future. We believe the Knik Arm Crossing is a project that embodies the sustainable economic development and job creation that we hold at the forefront.

With some of the more difficult federal approvals in hand, the project has gained some new momentum. The three shortlisted "teams" include many Alaskan companies that employ many Alaskans, some of whom you might know.

There is a vocal NIMBYattitude today, which only because of its volume seems pervasive. If that attitude was as loud in the past as it is today, we might not have such important infrastructure as the Parks, the Dalton or the Seward Highways, or even TAPS.

Thank you for considering SB 80 and I urge you to support this project.

Sincerely,

John MacKinnon
Executive Director
Associated General Contractors of Alaska

Knik Arm Bridge–State as Last Sucker?

http://www.alaskapolicyforum.org/2012/03/knik-arm-bridge-state-as-last-sucker/

Fiscal Policy — By Online Editor on March 19, 2012 at 2:31 PM

By: Jamie Kenworthy

There may be no better Alaskan example of a big spending government project misrepresented as a "public-private partnership" than the Knik Arm Bridge, Alaska's second and only surviving "Bridge to Nowhere". This study examines the financial aspects of the Bridge project and looks at the long term financial impact to the State of Alaska.

The Knik Arm Bridge has always been a wholly government-funded project seeking more government funding to get off the ground. Funded early on by an original $230 million Congressional earmark, with the state taking about half for other projects, the Knik Arm Bridge and Toll Authority (KABATA) has spent $60 million to date on studies and salaries.

In March, 2010 KABATA told the Anchorage Assembly that the private sector would assume the financial risk of making up the inevitable toll shortfall to pay off the bonds. In fact, KABATA had already applied for another government $300 million loan declaring that annual appropriations from the State would be needed to backfill the lack of toll revenue. (See p. 7 http://www.knikarmbridge.com/documents/TIFIAcoverandLOI.pdf)

With the toll shortfall, what might the state's liability be over 35 years of cumulative private contractor payments? In KABATA's latest federal loan application, it estimated this liability at $ 3 billion. (See p. 4 http://knikarmbridge.com/TIFIA/2011/12-2011-KABATA-Model-PABs.pdf) And this may even be on the low side.

A public records act request to the State Transportation Department revealed that the toll revenue forecast may be overestimated by a factor of two. When Scott Goldsmith's (University of Alaska, ISER) estimate of future population was modeled into vehicle trips by Ch2M Hill, it concluded 17,700 vehicles would use the Bridge daily in year 2035. However, KABATA's comparable number that it uses for its toll revenue projection is 36,000 trips a day. This is difficult to imagine because today there are less than 30,000 trips now between the Mat Su and Anchorage on the Glenn Highway.

This possible 103% overestimation of toll revenue by KABATA over the ISER-CH2MHill toll numbers is consistent with the study of a retired federal economist. This economist documented a 118% average overestimation error by the KABATA traffic and toll consultant, Wilbur Smith Associates, for the first five years a toll facility was open in all US projects. (See http://www.scribd.com/doc/79582705/RCA-Study-Wilbur-Smith-Traffic-amp-Revenue-Forecasts-012712.%3Cbr%20/%3E.)

The vast majority of the present MatSu commuters would continue to use the Glenn Highway since Palmer and Wasilla are closer to Anchorage via the Glenn than via the proposed Knik Arm Bridge. In addition, these commuters would not have to pay a $5 one-way toll rising 2.5% a year.

An independent estimate of the Knik Arm Bridge costs concludes that it would accumulate $1.1 Billion in deficits by 2035. (See http://knikbridgefacts.org/wp-content/uploads/2012/02/The-Real-Finances-of-the-Knik-Arm-Bridge-v3.pdf).

We will spare ourselves having to debate over population and traffic projections and just focus on which consultants are paid by KABATA and watch who is left holding the bag. If the private sector were willing to finance the project, it is more than likely the project would already have been financed. But there were no takers.

Instead, KABATA went to the legislature last year with two bills tapping the General Fund to provide another $150 million for the project and also to make any contract KABATA would sign with the private contractor "obligations of the state" – the inevitable blank check. As David Boaz of the free market-oriented Cato Institute observed of the Knik Bridge project: "Yes, the largest investment companies — and the largest construction companies — would be delighted to work on this project, if someone else would actually put up the money. " http://www.huffingtonpost.com/david-boaz/bridge-to-nowhere_b_984839.html

Clearly, the private sector is not interested in taking any risk on having sufficient toll revenue to pay off the Bridge bonds and operating costs. Rather, KABATA has promised the two losers of three short-listed consortia bidding for the expected $1.1 billion contract a "stipend" of $2 million each to submit a final proposal. Supposedly, KABATA will pay for the intellectual property of the losers' bids, but industry observers consider this amount excessive.

If the KABATA legislation (HB 158-159 and SB 79-80) passes this session of the legislature, the winning contractor will have 35 years of state-guaranteed "availability payments" that KABATA estimates will total $3 billion. Even this $3 billion assumes KABATA will get $350 million in federal TIFIA and TIGER loans and grants which it failed to get in the past three years.

The next phase in the battle of the Bridge is likely to take place over the approval of the Anchorage Metropolitan Transportation Plan (MTP) beginning with a public hearing April 10, 2012 at the Anchorage Assembly. The Knik Bridge remains in the MTP with the new transportation plan, unlike the existing one, overturning the Assembly's previous position that no further State or local funds would go to support the Bridge.

Unfortunately, readers of the new draft MTP would learn nothing of the size of the downside risk to the State on this $1.1 billion project. The draft "assumes" the KABATA bills will pass and that if the State has to make up what has been independently estimated as an average of $55 million a year in deficits, that none of this expected body blow to State transportation funds will impact funds going to South Central Alaska. (See pp. 6-29-31 http://www.muni.org/Departments/OCPD/Planning/AMATS/Documents/MTPChapter-6_123011.pdf

A diligent reader of the MTP would see only the sources and uses of funds to finance the $1.1 billion project. He would not see any of the overall financing costs and ballooning annual availability payments to the private contractor which go from $34 million in year 1 to $133 million in year 36. (p. 4 http://knikarmbridge.com/TIFIA/2011/12-2011-KABATA-Model-PABs.pdf)

The draft MTP shows an estimated $79 million in private equity from the contractor which may seem impressive. Not disclosed is that under the proposed state-guaranteed contract KABATA estimates a 12% compounded return of net cash flow to repay the contractor's equity. So that $77 million in private contractor equity would end up costing the state a KABATA-estimated $920 million before the bonds are paid off in 2050.

While the final RFP competition may only result in a compounded return to the contractor of, say 10%, the whole proposed deal structure begs an obvious question: Why would a state with a AA credit rating that can borrow long term at 4% guarantee a contract providing a contractor a 10-12 % compounded return? The State assumes all the risk, the private contractor assumes none. Only in the world of crony capitalism would this make sense.

The marketing of the Bridge project has been an ongoing exercise in the euphemisms necessary to mask a typical bottomless government liability. The proposed $150 million in additional State funds is just a loan that will be paid back according to the rosy trip forecast. A small print footnote to KABATA's 12/30/11 federal loan application notes that "if" – more likely "when"– the reserve fund dips below $50 million, it will trigger an automatic appropriation request to the legislature to have the fund "replenished" back to $50 million (see p. 8 in KABATA's latest Financial Plan http://knikarmbridge.com/TIFIA/2011/12-2011-KABATA-Model-PABs.pdf).

So, this reserve fund will apparently be automatically replenished by annual legislative appropriation, regardless of the state of Alaska's budget.

The fundamental misleading description of the selling of the "public-private partnership" project by KABATA is its assurance to the legislature that the contractor will "finance" the project. Technically, the contractor will take the State of Alaska-guaranteed contract to the credit agencies and the State's credit rating will likely be the evidence the contractor needs to provide the investment grade necessary for the firm to then go to the bond market for the funds to build the project. So in reality it's the proposed State guarantee on the KABATA contract – or the continually replenishing $150 million "reserve fund" by the State — that finances the project and not the balance sheet of the contractor which is put at risk.

The original legislation establishing KABATA made clear that the new agency could not pledge the State's credit or sell bonds without earning an investment grade. But in a 11/30/11 legislative briefing, KABATA now seeks to "clarify" that prohibition to make the bonds "obligations of the State" by amending the original statute "to reflect current market realities."

Senate Finance Chairman Bert Stedman (R-Sitka) is opposed to the State guarantee in the current bills but KABATA Board member Senator Linda Menard (R-Wasilla) is now rewriting the KABATA bills to overcome that objection. However, it is still likely that the continual replenishing of the $150 million reserve fund will remain in the bills to provide a backdoor State guarantee. Without the State holding the bag, it is unlikely KABATA will be able to put the RFP on the street this year.

Hopefully, both the Anchorage Assembly and the Alaska Legislature will pay close attention to the risk-free financial arrangement of this "public-private partnership" and recognize it for what it is. Public assumes the risk, private sector assumes the benefits.

(Jamie Kenworthy is the former Executive Director of the Alaska Science and Technology Foundation and has served on the Board and Audit Committee of a $60 million/year remote sensing defense contractor, the former Environmental Research Institute of Michigan. He lives in South Anchorage and has been the volunteer financial analyst opposing state support for the Knik Arm Bridge.)

12/1/51								

2024 is the first year that KABATA estimates higher revenues than payments

Phase 2 with 4 lanes to open in 2030

KABATA is showing positive cash flow only after 2031

Traffic & Toll Forecasts by Wilbur Smith Associates stops at 2039. Note revenue rates apparently use a factor of 1.04657 from the previous year

Calculated Yearly increase in Revenue.

KABATA is counting on revenues from more than 18,000 AADT starting in 2022, but doesn't show any cost to expand from 2 lanes to 4 lanes until 2030

(1) If ending balance falls below $50 million, the State will replenish the account back to $50 million.
(2) In the event of a negative Draws on Reserve balance, the reserve fund will be tapped to make up this shortfall.
(3) If ending balance exceeds $150 million plus state replenishment, if any, the balance over such amount is available for release.

This "guarantee" that the State will replenish the account also appears on Page24.2 of this Pro-Forma, and on Page 7 and page 27.2 of KABATA's October 2011 TIGER Grant application, and on page 7 of KABATA's March 2011 TIFIA application

Remaining pages of this document are not printed, but are available for view at
http://knikarmbridge.com/TIFIA/2011/12-2011-KABATA-Model-PABs.pdf

18) Have you ever heard or read anything about a proposed bridge between Anchorage and the Mat-Su Borough called the Knik Arm Bridge?

Yes	84%
(skip to Q.21) No	16%
(skip to Q.21) Unsure	--

19) Based on what you know about the Knik Arm Bridge, would you say now is a good time to build a Knik Arm Bridge, should we wait until later, or should it never be built?

58% say that "Now" is not the right time to build the Knik Arm Bridge

Now is a good time	37%
(skip to Q.21) Wait until later	32%
(skip to Q.21) Never be built	26%
(skip to Q.21) Unsure	5%

20) Would you still feel that way even if the cost to the state could be over $150 million dollars?

KABATA's Dec 2011 "Pro-Forma" financial plan states the following on Page 8 about the $150 M "Reserve Fund" that would be created by HB159 and SB79. "1) If ending balance falls below $50 million, the State will replenish the account back to $50 million."

Yes	88%
No	8%
Unsure	4%

21) Overall, as far as the Pebble Mine project is concerned, do you believe it should continue through Alaska's environmental impact and permitting process to see if it can be developed safely, or should it be stopped before the permitting process is complete?

Current costs of the Knik Arm Bridge include $1.389 Million for FY 2012 in the Operating Budget. KABATA has spent about $55 Million out of the $114 Million of State and Federal funds that were set aside for KABATA's use in 2006 after the Federal Earmark was removed, which allows the remaining approximately $58 Million to be "re-purposed" to other transportation projects that are eligible for Federal Funding.

The Real Finances of the Knik Arm Bridge

Summary

In contrast to KABATA's predictions of surpluses, this analysis projects a *minimum* $2.5 Billion shortfall for the state in covering the cost of the proposed Bridge before the final contractor payment in 2050. The shortfall between when the Bridge would open in 2016 and 2035 is $1.1 Billion, or an average of $55 million a year. That is about what Anchorage and Mat Su have both received on average over the last ten years in federal and state dollars for all road and pedestrian projects.

KABATA goes out to 2075 to project a huge surplus. In reality, the project is so far "Under Water" in the early years it can never pay for the $672 million Phase 2 costs, so the Bridge will never pay off

Last month an independent study was released that documents that Wilbur Smith Associates, the traffic and toll consultant the Knik Arm Bridge and Toll Authority (KABATA) relies on for its financial plan, has a national track record of *overestimating* toll revenue by 2.27 times the actual revenue received in the first five years a facility is open. This finding is consistent with Wilbur Smith Associates (WSA) projecting *more than twice* the Bridge traffic by 2035 compared to the traffic counts modeled by Ch2MHill based on population estimates by Scott Goldsmith of UAA's ISER.

The huge expected toll shortfall projected in this realistic estimate makes any state guarantee on a Bridge contract or any commitment to *continually* replenish the $150 Million line of credit that KABATA is seeking from the legislature, to be a serious financial commitment of at least $2.5 Billion in State funds.

ANALYSIS

Common Assumptions between the KABATA estimate[1] and this *Realistic* estimate:

- Phase 1 Bridge cost of $713 M and same amount Bridge costs including O&M, tolling operations, capital expenditures, and administrative costs. With having to capitalize interest to pay for the toll shortfall and other bond issuance costs the total cost is $1,086,152,719 plus a cumulative $170 million in cumulative KABATA administrative costs until Phase 1 is paid off in 2050.
- Passage of HB 158-9 or SB 79-80 that provides an additional $150 million "Reserve Fund" to the project and a state guarantee on a KABATA estimated 36 years of availability payments of a cumulative $2.98 Billion for Phase 1 since KABATA obligations would become "obligations of the state."
- Same deal structure, that is a private partner putting in $79 million equity and receiving net cash flow for 36 years estimated to be $920 million in KABATA estimate or $767 million in this realistic estimate
- Same amount of senior debt and capital accretion bonds and same debt schedule to pay off those bonds and same 6.426% in total true interest cost
- One way car toll of $5 and $18 commercial vehicle in Year 1 with tolls rising 2.5% per year to a one way car toll of $12.16 and a $43.79 commercial toll in Year 36. So a commuter driving a car 200 days a year between Anchorage and Mat Su would pay $2000 in Year 1 and $4832 in Year 36.

Three Differing Assumptions between the KABATA estimate and this *Realistic* estimate

The three following changes drive a $2.5 Billion increase in the cost to the state of the guarantee to backstop the toll shortfall and meet the cumulative availability payments to the contractor that KABATA estimates at $2.98 Billion for Phase 1.

1. Loss of Federal Loans and Grants, Add $340 Million to State Cost

KABATA has been turned down for an over $300 Million federal TIFIA loan in 2007, 2010, and 2011 and at least two different TIGER grants for over $40 Million. Both programs are highly competitive with 10-20 times more money applied for than available. KABATA on 12/30/11 again sent in a preliminary application for a $308 million TIFIA loan. *KABATA's financial plan includes receipt of these funds.*

The $308 million TIFIA loan is particularly valuable to making the financial plan work since TIFIA loans bear a low interest rate and do not require repayment to start until five years after the Bridge opens.

Projects that win federal loans and grants usually show: private sector *risk taking*, flat as opposed to *ballooning annual payments* to the concessionaire, and a project which *solves* significant existing *congestion problems*. KABATA's application *fails* each of these key attributes and in addition shows the contractor taking out equity before the federal loan payments start which appears to contradict federal program guidelines.

Politically, the Knik Arm Bridge is *even more challenged.* In his 2011 infrastructure program speech to Congress, the President pledged "no more "Bridges to Nowhere." Last month Senator Coburn (R-OK) highlighted the recent release by the Federal Highway Administration (FHWA) of $15 Million in right of way money to KABATA, and the Senator rated the project # 6 in his list of Top 100 in his "Wastebook" of federal spending.

> Do you believe that <u>any</u> Federal Administration will provide over $353 Million in Federal Loans or Grants to the "Bridge to Nowhere"?

2. *Realistic* Toll Forecast, Add $2.3 Billion to State Cost

Revenue forecasts are based on population and employment projections, which in turn, drive trip and toll projections.

KABATA uses a Mat Su population or household forecast for 2030 that is 30% higher than the state demographer's December 2010 forecast or Scott Goldsmith's Institute of Social and Economic Research's (ISER's) 2009 forecast used for the Highway to Highway project[2]. Also, Wilbur Smith Associates, KABATA's traffic consultant, changed its traffic model between 2007 and 2011 so the same population number now generates 9% more trips and lowered the number of people per household from 2.7 from the 2010 Census to 2.5 in 2035 to appear to be consistent with ISER numbers. The result is higher toll revenue projections than realistic.

In doing the Highway to Highway traffic forecast, CH2M HILL, using Scott Goldsmith's population and employment data, projected 17,700 trips a day on the Bridge in 2035. KABATA's financial plan is based on a traffic forecast of 36,000 trips in 2035, <u>*more than double*</u>. Another forecast where the state Department of Transportation modeled ISER data (falsely labeled AMATS/ISER in the Anchorage Metropolitan Transportation Plan) said there would be 36,600 trips a day in 2035 but that forecast assumed no toll thereby inflating trip numbers.

Since KABATA's population forecast is an outlier and tolls reduce demand, a projected 18,000 daily trips in 2035 paying the higher $8.19 one way auto toll used in KABATA's pro forma seems the best, conservative, *realistic* estimate of toll revenue. It also makes sense to use the 18,000 figure for 2035 since that is about the maximum traffic that a restricted 2 lane highway can serve and KABATA's financial plan included only the cost of a 2 lane Bridge.

A *realistic* toll estimate reduces cumulative toll revenue 2016-2050 by half from $4.525 Billion to $2.263 Billion.

3. Lower Profit to Private Partner, Subtract $153 Million from State Cost

KABATA's financial plan projects that they will pay out a total of $920 Million (labeled as net cash flow) to the winning bidder for their $79 M equity in the project.

This 12% cumulative rate of return is excessive given that the state guarantee (subject to annual legislative appropriation) largely removes the financing risk to the project and leaves the concessionaire with only the customary construction cost risk. The state has traditionally paid no more than 10% when it asks the contractor to front project costs and competition among the three bidding teams and is likely to reduce this return on equity to 10%.

With typical Savings accounts paying less than 1% interest rates, does it make sense to give the P3 contractor 12%? Not if their annual payments are guaranteed by the State of Alaska.

CONCLUSIONS

Totaling the above three items adds an additional $2.5 billion to be paid out by the state over 36 years for Phase 1, which breaks down to be *$1.1 Billion* or an average of $55 million/year between 2016-2035 and $1.4 Billion in the years between 2036-2051. (3) *None of this additional amount would be covered by toll revenue.*

It is unclear how much of that $2.5 Billion would come out of state transportation funds for Anchorage which historically has received 28% of federal and state transportation funds or the Mat-Su which in recent years has received about the same amount of state and federal transportation dollars.

The Anchorage Metropolitan Transportation Plan (MTP) *assumes* KABATA's estimates of toll revenue and Bridge costs are accurate and *further assumes* that KABATA will receive over $300 Million in federal loans it has been turned down on to date. Most importantly, the MTP stated assumption is that *if* there is a toll shortfall that doesn't meet contracted availability payments, and the state must make good on its guarantee, that those funds will not decrease the amount going to Anchorage or Mat-Su or affect the overall state transportation budget.

So, to summarize this paper to *one critical question*: If as here estimated, the state must make up $1.1 Billion in toll shortfall revenues between 2016 to 2035 to meet contractor payments, *how much of that amount will come from Anchorage's or Mat-Su's federal and state transportation funding*?
Even though there are predicted cutbacks in federal funding, including earmarks, the Anchorage 2035 MTP Update counts on the ratio of state funding to federal funding *actually increasing* from 18% state money historically to 56%.state money in the 2035 MTP Update.

RECENT DEVELOPMENTS ADD TO BRIDGE RISKS & COSTS

Three recent developments will likely add to the cost of the project.

1. Bridge Span has increased from 8,200' to 9,200'

In response to U.S. Army Corps of Engineering concerns about the effect of the Bridge on additional siltation challenges in Cook Inlet, in November KABATA signed an agreement with the Corps to increase the Bridge span to 9,200'. While this will reduce a rock-constructed causeway by 1000', it also will require 4 more expensive additional Bridge pilings and spans. Using a rough estimate of the 35% design costs from the TIFIA application, an additional $15 million will be required which is not included in the $713 million Bridge cost which is an unchanged number from the earlier KABATA financial plan showing a 8,200' bridge.

2. KABATA's Financial Plan still assumes 2 lanes of cost, 4 lanes of revenue

Phase 2 had been defined as the expansion of the Bridge and approaches from 2 lanes to 4 lanes and adding the Anchorage connection to the Ingra-Gambell couplet. KABATA estimates the cost of Phase 2 at $673 Million.

Generally, a restricted access highway at around 18,000 trips a day needs to move to 4 lanes to accommodate any increase in traffic; for example, the Glenn Hwy traffic at Eklutna flats, the dividing line between Mat Su and Anchorage, is now about 28,000 trips a day.

The AMATS Technical Advisory Committee in August, 2011 heard my presentation that the KABATA Pro Forma Financial Plan submitted in February, 2011 to the federal government for a TIFIA loan had assumed 4-6 lanes of toll revenue in its toll projection to 2051 but its financial plan included only the cost of a 2 lane Bridge and northern approach roads.

The December, 2011 TIFIA preliminary grant application also includes the revenue from 18,700 trips a day in 2022 rising to 30,300 trips a day in 2030 when they estimate Phase 2 will be implemented at a cost of $672 million that is not included in this realistic or KABATA estimate. For those eight years between 2022-2030, how is it possible to include the revenue from 4 lanes while including only the cost of 2 lanes on the Bridge and the northern approach roads to connect with Knik Goose Bay Road?

In order to count the revenue from over 18,000 trips a day, the financial plan has to include the cost of 4 lanes from downtown Anchorage to Knik Goose Bay Road.

3. National Track Record of KABATA's consultant Wilbur Smith Associates: Revenue projections 127% greater than actual Toll Revenues

Drawing on a 2006 study of the National Transportation Research Board (a division of the National Academy of Sciences) and adding updated information from recent toll facilities, an independent economist last month documented that the track record of Wilbur Smith Associates (WSA) on US projects is to *overestimate revenue* by 2.27 times in the first five years a toll facility is open to project. That is, WSA projected 127% more revenue than actual performance.[3]

The 2012 study "*Wilbur Smith Associates' Traffic and Revenue Forecast: Plenty of Room for Error*" was developed by Terry Maynard, a retired federal economist. The WSA track record is slightly better

than the industry in projecting the first year revenue of projects and worse than industry averages after five years and later.

Maynard made the WSA's work on the Knik Arm Bridge one of his two "case studies" of questionable forecasting methodology and of the use of overly optimistic population data.

Two toll road projects that WSA provided the toll projections for have now gone bankrupt (the Greenville, SC Southern Connector and the San Diego Freeway) and two more have had changes in ownership and/or debt restructuring when insufficient toll revenues took revenue below required minimum bond cover ratios (the San Joaquin Hills Toll Road, CA and the Pocahontas Parkway, VA).

Note: Revisions from earlier posts of this paper reflect slight number changes between the Citigroup 10/17/2011 financial plan for KABATA's TIGER loan application and the 12/16/2011 Citigroup financial plan for KABATA's TIFIA loan application. Also included in this revision is discussion of the January 29, 2012 Maynard paper on the Wilbur Smith Associates' national track record.

Endnotes:

[1]KABATA cost estimate numbers are from the Citigroup financial plan done 12/16/11 for KABATA's TIFIA preliminary federal loan application, see http://knikarmbridge.com/TIFIA/2011/12-2011-KABATA-Model-PABs.pdf

[2] The history of this project's use of population estimates does not inspire confidence in KABATA's revenue forecasts which are based on their consultant trip and toll forecasts.
In 2007, Scott Goldsmith of ISER estimated that 204,400 people would live in the Mat Su in 2030. KABATA then hired the Insight Research Corporation of Dallas, Texas to come up with the number of 250,700 for the Mat Su in 2030, see p. 26 of http://www.knikarmbridge.com/documents/IndependentEconomicOverviewandDevelopmentForecast07022007.pdf.

reston
traffic and revenue forecasts
wilbur smith associates

Wilbur Smith Associates (WSA) record of traffic and revenue forecasting is blasted in a study done by a retired federal government economist Terry Maynard for the Reston Citizens Association (CRA) in northern Virginia. The report supports a call for an independent review of the WSA/CDMSmith traffic and revenue forecast of the Dulles Toll Road.

The analysis titled Traffic and Revenue Forecasts: Plenty of Room for Error by Terry Maynard finds that forecasts of revenue by WSA as it then was (just recently merged to form CDMSmith) are on average 2.27 times - or 127% too high - as compared with subsequently realized toll revenues.

This is based on the first five years of 12 toll projects forecast.

The Full, 105 page report, available at
http://www.scribd.com/doc/79582705/RCA-Study-Wilbur-Smith-Traffic-amp-Revenue-Forecasts-012712
outlines how 2 toll roads that relied on WSA's traffic & revenue forecasts went Bankrupt, and another 2 toll roads needed complete re-financing.

Wilbur Smith Associates'
Traffic and Revenue Forecasts:
Plenty of Room for Error

In addition Maynard finds that WSA had a pattern of understating the sensitive profit maximizing toll initially, then subsequently raising those estimates.

Maynard says that WSA routinely uses the highest population and employment forecasts for forecasting traffic.

Despite poor forecasts tollroads stuck with WSA.

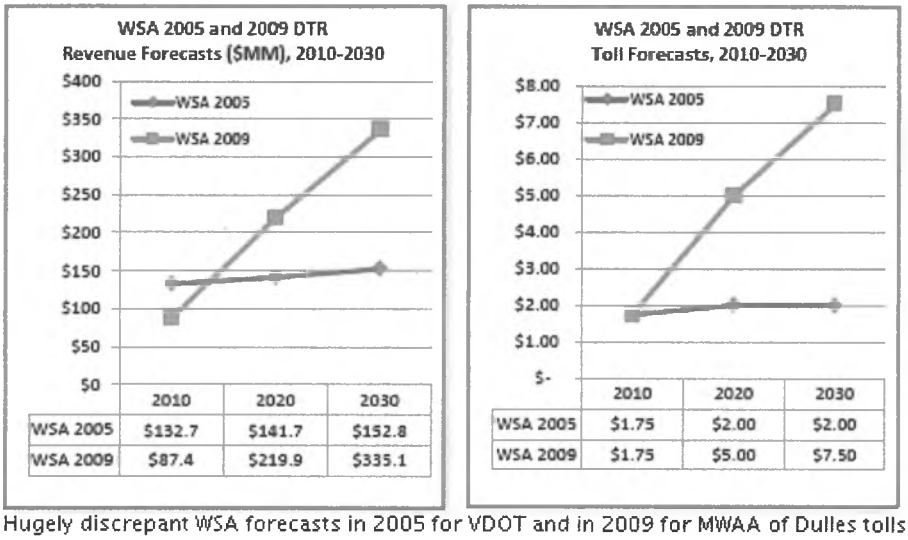
WSA estimates for Dulles Toll Road revenues are suspect, Maynard writes, because they are already using numbers overstating Fairfax County employment by 25%.

What it calls the "pattern of overestimates" in WSA forecasting suggests a "substantial risk" in proceeding with the MWAA financial plan, Maynard writes.

Risks are:

- lenders won't fund the project without state guarantees or at investment grade rates

- tolls much higher than those forecast will emerge



- corridor economic growth will be hampered by the high costs

- MWAA may default and face much higher costs than cited

Terry Maynard: "RCA has long been enthusiastic about Metrorail to Dulles via Reston, but we do not want a rail line at any price, especially one that forces Dulles Toll Road users to absorb most of the financial burden and area communities to absorb added traffic on already crowded local roads. The prospects are even worse if the WSA forecasts overestimate revenues as much as our research suggests. We hope that an independent forecast, combined with 'value engineering' for Phase 2 and restructuring the financial arrangements will lead to a better outcome for everyone."

2nd stage of Dulles Rail at stake

Future Dulles toll road revenues are being used as the security for selling the debt needed to fund a $5 billion Dulles Metrorail branch line from West Falls Church through Reston County to Dulles Airport and out into Loudoun County. Over half the capital cost is proposed to be covered by toll revenue bonds of the Dulles Toll Road issued by the Metropolitan Washington Airports Authority (MWAA) that has a 50 year franchise on the tollroad and is building the rail line.

Hugely discrepant WSA forecasts in 2005 for VDOT and in 2009 for MWAA of Dulles tolls

Half of the rail line is a done deal, financed and under construction but the second half remains to be approved and financed. The WSA/CDMSmith investment grade traffic and revenue study to be released any week now will be key to whether the project proceeds.

A cover letter addressed to Governor Bob McDonnell, FHWA administrator Victor Mendez and top officials of MWAA and the two local counties charges that "WSA has made many very large errors in its forecasts that have been costly to investors, bondholders, governments, and toll road users who have relied on them to approve construction of major toll road projects."

It continues: "we believe that it is imperative that a second, independent T&R forecast be completed by another forecasting group before any decision is made to move forward with the construction of Phase 2 of the Silver (Dulles Rail) Line."

The citizens association says that given Wilbur Smith's record of overestimating revenues and the unexplained discrepancies between the first two WSA studies the various parties to the Dulles project - FHWA, MWAA, the two counties Fairfax and Loudoun as well as Virginia DOT - should defer any further commitments until Wilbur Smith's forecasts have been checked against those of an independent forecaster.

VDOT is called to take the lead in having WSA's results checked out.

It calls on FHWA to develop a process of 'best practices' for traffic and revenue forecasts given that the problem of gross exaggeration of traffic and revenue (T&R) prospects is seen across the whole T&R forecasting business.

Recommendations

We believe the significant number of cases in which WSA has made major errors in its traffic and revenue (T&R) forecasts, including errors in its forecasts for the Dulles Toll Road, warrants a series of actions before MWAA, Fairfax County, and Loudoun County move to approve construction of Phase 2 of the Silver line. These recommendations involve actions by federal, state, local, and MWAA officials.

US Department of Transportation/Federal Highway Administration

- Do *not* approve TIFIA funding for the Metrorail funding partners until a second independent T&R forecast for the DTR has been prepared by Virginia and any material substantive differences between it and WSA's next forecast have been satisfactorily resolved.
- Longer term, oversee a process involving transportation T&R forecasting practitioners, toll facility operators, toll facility bond financing rating and issuing companies, and appropriate federal, state, and local government transportation officials to develop concrete and transparent national "best practice" standards for the forecasting of toll facility traffic demand and revenue forecasts. Make strict adherence to these "best practices" a requirement for federal funding. If necessary, pursue Congressional legislation to implement these "best practices."

Virginia Department of Transportation

- Conduct an independent T&R study from another T&R consultant to be completed before approval of Phase 2 of Metrorail construction.
- Resolve any substantive material differences between the outside T&R forecast and the new WSA T&R forecast before authorizing the use of state funds on Phase 2.

Dulles Metrorail Funding Partners (Fairfax County, Loudoun County, & MWAA)

- Do *NOT* approve work on Phase 2 of Metrorail until a second Virginia state-sponsored independent T&R forecast has been completed and material substantive issues between it and WSA's forecast have been resolved.
- Present the new (third) WSA DTR T&R forecast to the public as soon as possible for comment and feedback, and well before any consideration of approval of Phase 2 of Metrorail.
- Conduct a public outreach program to elicit community comment on toll, tax, and other issues raised by the possible construction of Phase 2, and adjust the current funding agreement accordingly.

Maynard devastating about track record of forecasting

A key finding of the Maynard Report (named after principal author Terry Maynard) is that "optimism bias" is endemic in the toll forecasting business, and that Wilbur Smith which does about half the industry's forecasts is typical of the industry - driven by sponsors to produce the exaggerated forecasts they want. It cites work by Robert Bain, Bent Flyvbjerg, NHCRP, and ourselves but goes into several forecasts with original work.

Bain using work he started at Standard and Poors found that of 100 tollroad forecasts worldwide the average actual traffic was 77% of forecast or an overestimate of about 30% for year 1 and only minor improvement after that.

NCHRP looked at 26 toll road forecasts in the US over the first five years and found worse results.

Writes Maynard: "The atrocious overestimates of revenue by all the forecasters reflected in this data highlight the difficulty in forecasting demand in the 'ramp-up' period of a new toll road. They are inadequate for planning future revenues, financing, and toll rates."

And there is little indication forecasts improve much over time.

On the Dulles Toll Road forecasting WSA starts with an inflated number for current employment in the major county served (900k vs 700k) and then inflates that faster than others with a higher growth rate (see graph nearby). Similarly on the Knik Arm bridge in Alaska WSA used exaggerated population and employment data, claiming to base them on numbers from a local University institute, which has denied its numbers are used.

Maynard picks up on what we reported (2011-04-11) as huge inconsistency in Dulles forecasting between WSA's modest projections of traffic and revenue for VDOT in 2005 and their highly bullish projections in 2009 for the new concessionaire MWAA. (see graphing of the inconsistency nearby)

Growth prospects declined in that period, and forecasts should have been lowered, not raised. WSA has never explained the basis for their large upward revisions.

"Our examination of vital population and employment input data used by WSA in its forecasts indicates it has almost always used the most optimistic data available to make its forecasts.

Appendix A: Revenue Forecast Error in NHCRP Data, WSA and Non-WSA, in Percent

Annual performance within 10% of forecast is in bold.

Revenue Forecast Error = 1/(Revenues/Forecast) - 1 as presented in NHCRP 364 in Table 1 which reports (Revenues/Forecast).

"This includes its 2005 and 2009 forecasts for the Dulles Toll Road. In its 2005 study, it utilized population and employment forecasts provided by GMU CRA which characterized official MWCOG forecasts as understating the area's growth potential. Then, in 2009, it discarded the conclusions of the contractor it hired to do its socio-economic forecast, Linden Street Associates, Inc., of Alexandria, which had discounted the official MWCOG forecasts as overreaching.

"Instead, it used forecast data provided by Woods & Poole, Inc., another local demographic analysis shop, which was much more aggressive. As we have noted, in the one data point from those two studies we were able to check for Fairfax County—data from the US Census Bureau in 2010—the 2005 WSA forecast overstated county employment by 25% and the 2009 study overstated it by 52%. In both cases, all the population forecasts we examined were within a reasonable five percentage points of the US Census 2010 count."

Detroit

In Detroit Michigan Maynard writes that an independent study by Halcrow found that WSA had used population and employment projections that were "far too high" and traffic was likely to be "about half" of WSA forecasts. He has an appendix commenting on the Detroit-Windsor DRIC/NITC bridge project.

Maynard says some of WSA's numbers are wrong, and that Halcrow's modeling is more convincing because it performs well in backward testing - not attempted by WSA.

Full copy of Maynard report:

http://www.scribd.com/doc/79582705/RCA-Study-Wilbur-Smith-Traffic-amp-Revenue-Forecasts-012712

Maynard is contactable at:

terrmayn@yahoo.com

NOTE: we're fully open to any response from WSA or any other forecasters. So far no response from WSA to the invitation to defend their work.

THEN AND NOW: A HISTORY OF THE KNIK ARM CROSSING

KNIK ARM BRIDGE & TOLL AUTHORITY

Southcentral Alaska: 100 Years of Development

Over the last century, Southcentral Alaska has been characterized by drive, determination and development. At the heart of Southcentral is the Anchorage metropolitan area, a region that has experienced continual expansion since the early part of the 20th century.

An important transportation hub, Cook Inlet functioned as a shipping center for the state's mining industry. In 1914, the Alaska Engineering Commission established Ship Creek as a work and supply camp for construction of the Alaska Railroad, creating a town site that is now the city of Anchorage. The Matanuska-Susitna (Mat-Su) Borough also underwent great change and development, including the "New Deal," an agricultural colonization enacted by the federal government in the 1930s, and construction of the Glenn Highway as a way of accessing the colony.

The region continued to expand as the military established a strong presence in Alaska during the 1940s. Because control of Pacific transportation routes was so vital, Gen. Billy Mitchell told Congress in 1935, "I believe that in the future, whoever

Continued from page 1

holds Alaska will hold the world. I think it is the most important strategic place in the world." Anchorage was then established as a major military hub, which brought an increased need for infrastructure. Construction of the Alaska-Canada Highway connected Alaska to the continental highway system and the Glenn Highway was extended to Glennallen, connecting the Anchorage/ Mat-Su area to this important road system.

Alaska was granted statehood in 1959. The discovery of oil in Prudhoe Bay in the 1960s spurred construction of both the Trans-Alaska Pipeline System and the 323-mile Parks Highway. Southcentral Alaska's population surged at this time as workers and their families flooded the region. Many eventually settled in Anchorage and Mat-Su.

The Anchorage metropolitan area now enjoys a more diverse economy with residents employed in a variety of retail, resource development, professional service and city, borough, state and federal occupations. Along with economic diversity comes economic stability. As more individuals move to the area it is imperative we connect Alaska's two largest population centers – Anchorage and Mat-Su – and provide a more direct route to the Interior.

An Early History of the Knik Arm Crossing

More than 80 years of transportation, land use and economic plans and studies for the Upper Cook Inlet region of Alaska have indicated a need to connect the Municipality of Anchorage with the Mat-Su Borough. As early as 1923, Alaska Railroad engineers made preliminary studies of a causeway to shorten the route to Fairbanks. By 1954, a multi-purpose proposal was made by a Seattle engineer for a combination causeway and tidal power plant stretching across Turnagain Arm and Knik Arm and connecting on Fire Island. Just one year later, the Anchorage Chamber of Commerce formed a committee to explore a causeway and commissioned Ivan Bloch and Associates to develop the "Preliminary Appraisal of the Proposed Knik Arm Causeway," a study that reviewed the economic and defense benefits of a Knik Arm crossing.

> ***"We wish to point out very strongly that to make the port 100 percent efficient, the causeway should also be built ... and the Chamber of Commerce could do Anchorage no greater service than to continue to push for it at every opportunity."***
>
> *Anchorage News, July 2, 1957*

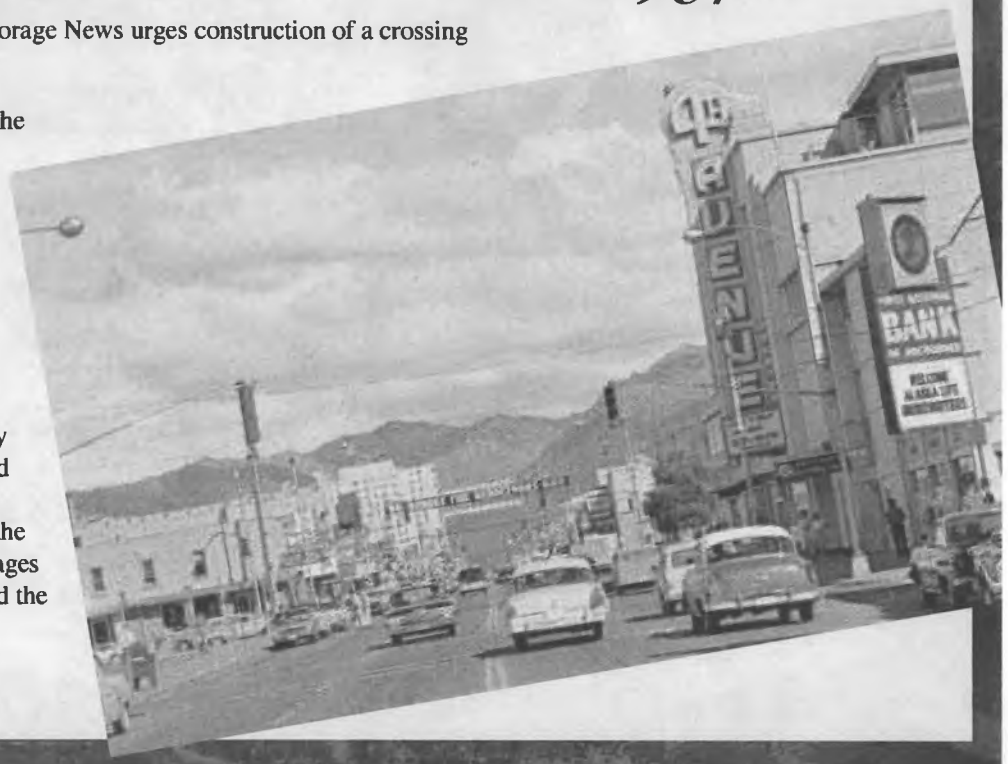
Plate 1. Location map illustrating Seward's Success as related to Greater Anchorage

The Knik Arm Crossing Draws Closer to Reality

In 1970, the Alaska Department of Highways commissioned a study of the general subsurface conditions of Knik Arm to identify geological factors that might influence the location and design of a proposed highway crossing. The department hired consulting engineers to study existing data for technical issues associated with engineering a structure across Turnagain Arm. The study concluded that a bridge crossing was the most economically feasible alternative and had the least negative effect on the natural environment.

By 1983 the Alaska Department of Transportation (ADOT) prepared an Economic Feasibility Report concluding the Knik Arm crossing and approach roads were economically feasible under conservative assumptions and compared favorably with other state transportation and infrastructure investments. The Federal Highway Administration (FHWA) and ADOT evaluated alternative corridors for the best combination of positive features and documented their findings in the Final Corridor Alternatives Report created in support of the 1984 draft Environmental Impact Statement (EIS).

From a historical perspective, the most comprehensive study conducted for the Knik Arm Crossing project was a Draft Environmental Impact Statement (DEIS) prepared by ADOT in 1984 under Gov. Bill Sheffield. An Implementation Options Report by the ADOT was prepared the following year. It presented the design, financial and development options for implementing a Knik Arm crossing. Due to a lack of funding and the dramatic downturn in the state's economy between 1985 and 1990, the project was never advanced beyond the DEIS stage. However, with today's diversified economy and current and projected populations, we are now able to afford this important piece of Alaska infrastructure using tolls.



In 2003, the ADOT produced the Knik Arm Crossing Engineering Feasibility and Cost Estimate Update project that revised 1984 DEIS cost estimates using a general alignment deemed the "Hybrid Alignment." The update included a bridge crossing with connecting roads to the north and south. The state established the Knik Arm Bridge and Toll Authority (KABATA) that same year to begin work. By 2004, Congress appropriated funding for advanced planning efforts to include startup and staffing of KABATA, engineering and environmental studies and initiation of a new DEIS. Today we are closer than ever to reaching our goal and we can begin construction as soon as FHWA issues a Record of Decision (ROD).

Bridge Called 'Desirable' Back in 1957

An article published July 2, 1957 in the Anchorage News urges construction of a crossing over the Knik Arm:

"With the proposed Anchorage port again in the limelight we should not lose sight of the companion proposal which is the construction of a causeway across the narrow channel that connects the Anchorage mainland with the great Susitna valley and its adjacent country north and west."

The author goes on to state that "a land connection between Anchorage and the vast mainland of western and interior Alaska is very desirable from the standpoint of evacuation and dispersion." The article also refers to the 1955 Bloch report, saying "it shows very definitely the tremendous engineering and economic advantages that would come to a deep sea port here, should the causeway become a reality."

Move Over Jetsons: Seward's Success Project is Conceptualized

In 1970, Oklahoma-based Great Northern Corp. proposed construction of a climate-controlled residential plaza for 50,000 people. It was to be built just two miles from downtown Anchorage, across the Knik Arm of Cook Inlet. The plan was to construct commercial and residential malls, a sports area, churches, schools, medical facilities, hotels, recreation facilities and a transportation system – all within a completely controlled, 68-degree habitat.

An automated monorail system was planned to link the new city with Anchorage using a gondola-style aerial tramway. It was ambitiously designed to pass through the commercial mall areas, providing both passenger and freight service. Electric taxis, escalators and moving sidewalks would transport people within the habitat.

Knik Arm Crossing: Bridge to Our Future Video Now Available

Want to see what the Knik Arm Crossing might actually look like, or even fly over as trucks and cars travel across Knik Arm using the bridge? Now you can. The new Knik Arm Crossing project video takes you on a first hand tour of the project – including an animated fly-by of the proposed bridge.

Visit our YouTube channel at www.youtube.com/alaskaKABATA to view the extended or the shorter video as well as individual clips of project information. You can also view it at www.knikarmbridge.com or on GCI's Channel 1 each Tuesday, Thursday and Saturday at 9 p.m., or by tuning into the Municipality of Anchorage's Channel 10.

Please contact KABATA at (907) 269-6698 for more information or to receive a copy of the DVD.

Knik Arm Crossing Day, 1981

"Representatives from the Anchorage Chamber of Commerce, Assembly and the Administration; the Mat-Su Borough, including the Mayors of the Borough and Wasilla; and leaders of the State Legislature flew across the Knik Arm on Saturday, March 21, 1981, to celebrate "Knik Crossing Day." Coordinated by the Anchorage Chamber of Commerce, the helicopter trip was a demonstration of support for the idea of building a crossing that would link Anchorage to Point MacKenzie and the lower Mat-Su Valley region. Most business and political leaders in this part of Alaska have agreed for more than 30 years that the concept is vital to the development and growth of the South Central region."—Greater Anchorage Today, the Monthly News Service of the Anchorage Chamber of Commerce, Vol. 17 No. 8, April 1981

The Knik Crossing Committee pictures above is Chaired by Roger Riddel and includes Jack Spake, Lou Dickinson, Eric Peterson, Conn Murray and Bob Penney.

Time out for refreshments (furnished by Sheffield Hotels, now the Westmark)

ERA Helicopters flight lands on Knik Arm beach-head.

From left, Senate President Jalmar Kertulla, House Minority leader Joe Hayes and Assembly Chairman Ben March survey site of Knik crossing near Point McKenzie.

This is what you will see as you drive back to Anchorage from your day of business with the legislature at the capital in Willow.

SENATE EDUCATION COMMITTEE

Senators Kevin Meyer & Joe Thomas, Co-Chairs

Senate Bill 83

"An Act providing for payment and loan incentives to public school teachers for national board certification."

...teaching is work of the most demanding sort, for teachers must make dozens of decisions daily, command a wide body of knowledge and skill, learn to react instantly, and be disposed to act wisely in difficult situations. And while there are principles and precepts, skills and techniques, to guide the work, teaching is also an activity with artistic aspects, a craft calling for reflection and judgment.

----From *What Teachers Should Know and Be Able to Do*

Teaching is one of the most difficult and important jobs we have in our society. In order to have good schools, we must have good teachers.

Senate Bill 83 provides an incentive for teachers to ramp up their professional knowledge and skills by becoming nationally certified by the National Board of Professional Teaching Standards. Teachers would be provided with zero interest loans designed to pay the expense of enrolling in the program. Once certified they would receive a $1,000 annual stipend for the duration of their certification period (ten years).

If the teacher is serving in a low performing, high poverty area they would receive a $1,000 stipend for enrolling in the program, and $1,500 loan for the rest of the expense. They would also receive an additional $500 annually as long as they remained in a low performing, high poverty area.

Becoming nationally certified is a rigorous and demanding process, and can take up to three years. There are 25 different areas of certification (see page 7 of the packet), and teachers specialize in their specific subject area. The certification process focuses on five aspects of teaching: Students and their learning, the subjects being taught and how to teach them, managing and monitoring student learning, thinking systematically about the practice of teaching, and being members of the learning community.

We appreciate your support on this important bill.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB083

Analysis

SB83 provides for payments and loan incentives to public school teachers for national board certification. This includes a basic incentive payment of $1000 for teachers holding a current and valid national board certification and an additional $500 for teachers holding this certification in high poverty attendance areas that have received a low performance rating as determined by the department.

The count projects 162 teachers anticipated for FY13. The maximum incentive provided under this legislation if all teachers qualified for both incentives would be 162 teachers X $1,500 = $243,000. Each subsequent fiscal year projects an additional 21 teachers receiving the incentives to reflect the anticipated annual growth.

With an average growth rate of 21 teachers per year that would be actively seeking national board certification, not more than $1,000 would be provided annually to pay the national certification board on their behalf. 21 X $1,000 = $21,000. This projection is contained in each subsequent year through FY18.

Using the growth assumption/annual average of 21 teachers per year pursuing certification of professional teaching standards by a nationally recognized board, under the proposed Sec. 14.43.550-555 for the National Board Teacher Certification Loan Program, $2,500 would be provided as loans for eligible teachers. 21 X $2,500 = $52,500 per year.

(Revised 11/28/2011 OMB)

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB083

Analysis

This bill establishes payment and loan incentives intended to assist Alaska public school teachers seeking to earn national board certification. One component is the establishment and funding of a zero interest loan to otherwise eligible teachers who are actively pursuing national certification of professional teaching standards awarded by a nationally recognized board. The loan amount is set at $2,500 and the funds are to be paid directly to the national board from which the certification is being sought.

The Commission anticipates that, based on expected limited demand for the loan, servicing the loan can be accomplished with existing staff resources. Assuming the loans will be funded by an appropriation to the Department of Education and Early Development, no funding is requested for that purpose.

NBPTS
National Board for Professional Teaching Standards

Fields of Certification

NBPTS offers the following 25 certificate areas that cover 16 subject areas and are classified into seven student age categories. As a candidate you can opt for a generalist certificate or one that is subject-specific.

Certificates Currently Available

- Early Adolescence through Young Adulthood (Ages 11-18+)

NBPTS
National Board for Professional Teaching Standards

What is National Board Certification?

What Is National Board Certification?

National Board Certification is an advanced teaching credential. It complements, but does not replace, a state's teacher license. It is valid for 10 years, and renewal candidates must begin the renewal process during their eighth or ninth years as NBCTs.

National Board Certification is achieved upon successful completion of a voluntary assessment program designed to recognize effective and accomplished teachers who meet high standards based on what teachers should know and be able to do. National Board Certification is available nationwide for most preK–12 teachers. As part of the certification process, candidates complete 10 assessments that are reviewed by trained teachers in their certificate areas. The assessments include four portfolio entries that feature teaching practice and six constructed response exercises that assess content knowledge.

Why Standards for Accomplished Teaching?

Every child deserves an accomplished teacher — one who is qualified to equip students with the skills to succeed in the 21st century global community. NBPTS Standards and National Board Certification give teachers and schools the tools to define and measure teaching excellence. NBPTS Standards are based on the Five Core Propositions that form the foundation for what all accomplished teachers should know and be able to do and provide a reference that helps educators link teaching standards to teaching practice.

Five Core Propositions

Teachers are committed to students and their learning.
Teachers know the subjects they teach and how to teach those subjects to students.
Teachers are responsible for managing and monitoring student learning.
Teachers think systematically about their practice and learn from experience.
Teachers are members of learning communities.

What Are the Standards and Certificate Areas?

NBPTS developed standards for accomplished teaching in 16 different subject areas with students at various developmental levels. These standards were developed and validated by representative committees comprised of master teachers, disciplinary organizations and other education experts. Many school systems use the standards as the basis for ongoing teacher and school counselor professional development, and many colleges and universities incorporate them into their undergraduate and graduate teacher-education programs.

Based on these standards, NBPTS offers 25 certificates that are applicable to most teachers in American schools. For more information, see the chart at nbpts.org/certificates.

NBPTS
National Board for Professional Teaching Standards

The Five Core Propositions

This policy set forth our vision for accomplished teaching. The Five Core Propositions form the foundation and frame the rich amalgam of knowledge, skills, dispositions and beliefs that characterize National Board Certified Teachers (NBCTs).

1 Proposition 1: Teachers are Committed to Students and Their Learning

- ✓ NBCTs are dedicated to making knowledge accessible to all students. They believe all students can learn.
- ✓ They treat students equitably. They recognize the individual differences that distinguish their students from one another and they take account for these differences in their practice.
- ✓ NBCTs understand how students develop and learn.
- ✓ They respect the cultural and family differences students bring to their classroom.
- ✓ They are concerned with their students' self-concept, their motivation and the effects of learning on peer relationships.
- ✓ NBCTs are also concerned with the development of character and civic responsibility.

2 Proposition 2: Teachers Know the Subjects They Teach and How to Teach Those Subjects to Students.

- ✓ NBCTs have mastery over the subject(s) they teach. They have a deep understanding of the history, structure and real-world applications of the subject.
- ✓ They have skill and experience in teaching it, and they are very familiar with the skills gaps and preconceptions students may bring to the subject.
- ✓ They are able to use diverse instructional strategies to teach for understanding.

3 Proposition 3: Teachers are Responsible for Managing and Monitoring Student Learning.

- ✓ NBCTs deliver effective instruction. They move fluently through a range of instructional techniques, keeping students motivated, engaged and focused.
- ✓ They know how to engage students to ensure a disciplined learning environment, and how to organize instruction to meet instructional goals.
- ✓ NBCTs know how to assess the progress of individual students as well as the class as a whole.
- ✓ They use multiple methods for measuring student growth and understanding, and they can clearly explain student performance to parents.

4 Proposition 4: Teachers Think Systematically about Their Practice and Learn from Experience.

- ✓ NBCTs model what it means to be an educated person – they read, they question, they create and they are willing to try new things.
- ✓ They are familiar with learning theories and instructional strategies and stay abreast of current issues in American education.
- ✓ They critically examine their practice on a regular basis to deepen knowledge, expand their repertoire of skills, and incorporate new findings into their practice.

5 Proposition 5: Teachers are Members of Learning Communities.

NBCTs collaborate with others to improve student learning.
They are leaders and actively know how to seek and build partnerships with community groups and businesses.
They work with other professionals on instructional policy, curriculum development and staff development.
They can evaluate school progress and the allocation of resources in order to meet state and local education objectives.
They know how to work collaboratively with parents to engage them productively in the work of the school.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Introduction

In 1983, public concern about the state of American education was sharply heightened by the issuance of a federal report titled *A Nation at Risk*. The report provoked a wave of reform initiatives that engulfed the education community. Most of these programs, however, left out a critical element of the education equation: the classroom teacher.

If America is to have world-class schools, it must have a world-class teaching force. Many excellent teachers already work in the schools, but their work often goes unrecognized and unrewarded. As a consequence, many first-rate practitioners leave the schools, and others who could be exceptional teachers never consider teaching. Worse still, the knowledge and skills of the fine teachers who remain are often underutilized, their positive influence allowed only modest scope.

Three years after *A Nation at Risk*, in 1986, the Carnegie Task Force on Teaching as a Profession issued a pivotal report, *A Nation Prepared: Teachers for the 21st Century*. Its leading recommendation called for the establishment of a National Board for Professional Teaching Standards. The following year, this unique institution in the history of American education was born.

The National Board's mission is to advance the quality of teaching and learning by:

- maintaining high and rigorous standards for what accomplished teachers should know and be able to do,
- providing a national voluntary system certifying teachers who meet these standards, and
- advocating related education reforms to integrate National Board Certification in American education and to capitalize on the expertise of National Board Certified Teachers.

National Board Certification®, developed by teachers, with teachers, and for teachers, is a symbol of professional teaching excellence. Offered on a voluntary basis, it complements, not replaces, state licensing. While state licensing systems set entry-level standards for beginning teachers, National Board Certification has established advanced standards for experienced teachers.

Linked to these standards is a new generation of fair and trustworthy assessment processes that honor the complexities and demands of teaching. They focus on teacher work and the difficult issues that accomplished teachers confront on a regular basis. The NBPTS assessments for National Board Certification include having teachers construct a portfolio that represents an analysis of their classroom work and participate in exercises designed to tap the knowledge, skills, disposition and professional judgment that distinguish their practice.

At the time the National Board was founded in 1987, it was understood that a critical first task was the development of a policy that would spell out the National Board's vision of accomplished practice. In 1989, it issued its policy statement, *What Teachers Should Know And Be Able To Do*, which has served as a basis for all of the standards development work NBPTS has conducted. To this day, it remains the cornerstone of the system of National Board Certification and has served as a guide to school districts, states, colleges, universities and others with a strong interest in strengthening the initial and ongoing education of America's teachers. It also holds the promise of being a stimulus to self-reflection on the part of teachers at all levels of accomplishment as well as a catalyst for healthy debate and the forging of a new professional consensus on accomplished practice in each field of teaching.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

What Teachers Should Know and Be Able to Do

In this policy, the National Board presents its view of what teachers should know and be able to do-its convictions about what it values and believes should be honored in teaching. This expression of ideals guides all of the National Board's standards and assessment processes.

The fundamental requirements for proficient teaching are relatively clear: a broad grounding in the liberal arts and sciences; knowledge of the subjects to be taught, of the skills to be developed, and of the curricular arrangements and materials that organize and embody that content; knowledge of general and subject-specific methods for teaching and for evaluating student learning; knowledge of students and human development; skills in effectively teaching students from racially, ethnically, and socioeconomically diverse backgrounds; and the skills, capacities and dispositions to employ such knowledge wisely in the interest of students.

This enumeration suggests the broad base for expertise in teaching but conceals the complexities, uncertainties and dilemmas of the work. The formal knowledge teachers rely on accumulates steadily, yet provides insufficient guidance in many situations. Teaching ultimately requires judgment, improvisation, and conversation about means and ends. Human qualities, expert knowledge and skill, and professional commitment together compose excellence in this craft.

The National Board has led the vanguard effort to develop professional standards for elementary and secondary school teaching. The National Board Certified Teachers® stand for professionalism in the schools. The National Board's responsibility is not only to ensure that teachers who become National Board Certified meet its professional standards of commitment and competence, but also to maintain standards and assessments that are so well regarded that America's accomplished teachers will decide to seek National Board Certification.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Policy Position (Five Core Propositions)

The National Board for Professional Teaching Standards seeks to identify and recognize teachers who effectively enhance student learning and demonstrate the high level of knowledge, skills, abilities and commitments reflected in the following five core propositions.

1. Teachers are committed to students and their learning.

Accomplished teachers are dedicated to making knowledge accessible to all students. They act on the belief that all students can learn. They treat students equitably, recognizing the individual differences that distinguish one student from another and taking account of these differences in their practice. They adjust their practice based on observation and knowledge of their students' interests, abilities, skills, knowledge, family circumstances and peer relationships.

Accomplished teachers understand how students develop and learn. They incorporate the prevailing theories of cognition and intelligence in their practice. They are aware of the influence of context and culture on behavior. They develop students' cognitive capacity and their respect for learning. Equally important, they foster students' self-esteem, motivation, character, civic responsibility and their respect for individual, cultural, religious and racial differences.

2. Teachers know the subjects they teach and how to teach those subjects to students.

Accomplished teachers have a rich understanding of the subject(s) they teach and appreciate how knowledge in their subject is created, organized, linked to other disciplines and applied to real-world settings. While faithfully representing the collective wisdom of our culture and upholding the value of disciplinary knowledge, they also develop the critical and analytical capacities of their students.

Accomplished teachers command specialized knowledge of how to convey and reveal subject matter to students. They are aware of the preconceptions and background knowledge that students typically bring to each subject and of strategies and instructional materials that can be of assistance. They understand where difficulties are likely to arise and modify their practice accordingly. Their instructional repertoire allows them to create multiple paths to the subjects they teach, and they are adept at teaching students how to pose and solve their own problems.

3. Teachers are responsible for managing and monitoring student learning.

Accomplished teachers create, enrich, maintain and alter instructional settings to capture and sustain the interest of their students and to make the most effective use of time. They also are adept at engaging students and adults to assist their teaching and at enlisting their colleagues' knowledge and expertise to complement their own. Accomplished teachers command a range of generic instructional techniques, know when each is appropriate and can implement them as needed. They are as aware of ineffectual or damaging practice as they are devoted to elegant practice.

They know how to engage groups of students to ensure a disciplined learning environment, and how to organize instruction to allow the schools' goals for students to be met. They are adept at setting norms for social interaction among students and between students and teachers. They understand how to motivate students to learn and how to maintain their interest even in the face of temporary failure.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Accomplished teachers can assess the progress of individual students as well as that of the class as a whole. They employ multiple methods for measuring student growth and understanding and can clearly explain student performance to parents.

4. Teachers think systematically about their practice and learn from experience.

Accomplished teachers are models of educated persons, exemplifying the virtues they seek to inspire in students - curiosity, tolerance, honesty, fairness, respect for diversity and appreciation of cultural differences - and the capacities that are prerequisites for intellectual growth: the ability to reason and take multiple perspectives to be creative and take risks, and to adopt an experimental and problem-solving orientation.

Accomplished teachers draw on their knowledge of human development, subject matter and instruction, and their understanding of their students to make principled judgments about sound practice. Their decisions are not only grounded in the literature, but also in their experience. They engage in lifelong learning which they seek to encourage in their students.

Striving to strengthen their teaching, accomplished teachers critically examine their practice, seek to expand their repertoire, deepen their knowledge, sharpen their judgment and adapt their teaching to new findings, ideas and theories.

5. Teachers are members of learning communities.

Accomplished teachers contribute to the effectiveness of the school by working collaboratively with other professionals on instructional policy, curriculum development and staff development. They can evaluate school progress and the allocation of school resources in light of their understanding of state and local educational objectives. They are knowledgeable about specialized school and community resources that can be engaged for their students' benefit, and are skilled at employing such resources as needed.

Accomplished teachers find ways to work collaboratively and creatively with parents, engaging them productively in the work of the school.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Supporting Statement

We each remember the great teachers who touched our lives, kindled our interest and pressed us to do our best. We hold powerful images of such teachers. They exhibited a deep caring and love for children. They conveyed a passion for the subjects they taught, captivating their students with that passion. They approached their work with creativity and imagination, striving constantly to improve. As committed professionals, they were proud to be teachers.

The images of teaching that we share are deceptive as well as compelling. They emphasize teaching's external aspects, not its inner workings. If we fondly recall the great teachers of our past, we also typically see teaching as a humble undertaking. It concerns itself with the least powerful age group in society. It involves such seemingly routine activities as arranging seatwork, lecturing, reviewing and responding to students' efforts, and disciplining their behavior.

Historically, there is an enduring constancy in the organization of schools, of classrooms and of teaching itself. Self-contained classrooms, whole-group, textbook-centered instruction, teaching as telling, learning as the passive acquisition of facts, standardized testing – these patterns of schooling are as familiar as chalk dust. They constitute an unintended national curriculum that, as an unrelieved diet, does not adequately serve the educational needs of a diverse and dynamic society. Good teachers, of course, depart in many ways from these routines.

These pervasive images underestimate teaching's complexities and freeze the enterprise into forms that overlook its non-routine nature and the importance of independent professional judgment in the life of the accomplished teacher. But teaching is work of the most demanding sort, for teachers must make dozens of decisions daily, command a wide body of knowledge and skill, learn to react instantly, and be disposed to act wisely in difficult situations. And while there are principles and precepts, skills and techniques, to guide the work, teaching is also an activity with artistic aspects, a craft calling for reflection and judgment.

Although complicated, teaching nonetheless evokes simple, reductionist analysis. Much of the discourse on teaching and learning pulls apart what must be joined in practice. Chroniclers of teaching, for example, often assign the teacher's primary loyalty to the student or to the subject, with elementary teachers often characterized as "student-centered" and secondary teachers seen as "subject-centered." This dichotomy is false. Sound teaching merges commitment to students with allegiance to knowledge at all grade levels. All teachers must uphold the claims of knowledge, yet strive to build spacious avenues from such knowledge to students' understanding.

There is likewise a tendency to frame teaching either in terms of imparting valuable knowledge or as encouraging the acquisition of skills. But knowledge and skill are not disjoint. Knowledge – in the form of specific facts and organizing principles – is necessary to the exercise of most skills, just as a range of skills is necessary to the acquisition and construction of knowledge. Knowledge and skill cannot be pulled apart, nor can one assume pride of place over the other.

Another commonplace fallacy is to distinguish "basic" from "higher-order" skills, and to regard mastery of the basics as a precondition to advanced forms of reasoning and functioning. Accomplished teachers realize that higher-order thinking is the hallmark of successful learning at all levels. Students, for example, cannot become good writers without engaging in complex problem-solving processes, nor can they effectively learn basic mathematics simply by memorizing rules for manipulating numbers. There can be no neat division of teaching labor along a basic-to-

advanced skills continuum. All teachers must concern themselves with higher-order skills, with the executive functions of reasoning, and with students' capacities to monitor their own learning.

To unify these dichotomies in practice however, requires skill, wisdom and judgment. Accomplished teachers constantly assess and adjust their practice to maintain fidelity to students and to subjects, to knowledge and to skills, and to basic and advanced functions. Professionalism in teaching entails the ongoing pursuit of these unities. Hence, teachers regularly find themselves confronting hard choices -- sometimes sacrificing one goal for another, sometimes making compromises.

While teaching demands crisp reasoning and few settings yield to only a single approach, teachers do not have free rein to select any approach that strikes them as felicitous. Rather, their choices are anchored in their own experience and in the settled ground of the knowledge base that defines both efficacious and flawed practice. Being able to apply steady, disciplined judgment and reflective scrutiny within the bounds set by this constantly expanding body of knowledge is the hallmark of professionalism in teaching. As such, these values will be found at the heart of the standards the National Board will promulgate.

On the Commitment to Professionalism in Teaching

As its title indicates, the National Board is committed to professional standards for teaching. The term "professional" is an honorific in our society, and denotes occupations characterized by certain attributes. Chief among these are a body of specialized, expert knowledge together with a code of ethics emphasizing service to clients. The knowledge base typically provides substantial, but not complete, guidance for professional practice. Professionals possess expert knowledge, but often confront unique, problematic situations that do not lend themselves to formulaic solutions. Professionals must cultivate the ability to cope with the unexpected and act wisely in the face of uncertainty.

Professionals deal with urgent human problems: matters of life and death, justice, hope and opportunity. Essential to their work is the trust of clients. What warrants such trust is the obligation, upheld within the community of professionals, to pursue an ethic of service and to employ special knowledge and expertise in the interests of their clients.

These general observations apply to teaching, but with important distinctions. While teachers employ their knowledge and skill on students, they also strive to empower students to continue the quest for understanding, so that one day the pupil may surpass the instructor. In this regard, teaching is the most democratic of professions. It aims to place within the hands, head and hearts of students the means for them to teach themselves.

The ethical dimensions of teaching also distinguish it from other professions. Unique demands arise because the client's attendance is compulsory and, more importantly, because the clients are children. Thus, elementary, middle and high school teachers are obligated to meet a stringent ethical standard. Other ethical demands derive from the teacher's role as a model of an educated person. Teaching is a public activity; a teacher works daily in the gaze of his or her students, and the extended nature of their lives together in schools places special obligations on the teacher's behavior. Students learn early to read and draw lessons from their teachers' characters. Teachers, consequently, must conduct themselves in a manner students might emulate. Their failure to practice what they preach does not long elude students, parents or peers. Practicing

with this additional dimension in mind calls for a special alertness to the consequences of manner and behavior. Standards for professional teaching ought, therefore, to emphasize its ethical nature.

What the National Board Will Value in Teaching

The rich amalgam of knowledge, skills, dispositions and beliefs that will characterize National Board Certified teachers are clustered under the five core propositions presented above. What follows is an elaboration of these principles that go to the heart of the National Board's perspective on accomplished teaching.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Proposition #1: Teachers are Committed to Students and Their Learning

Fundamental to the teacher's credo is the belief that all students can learn. Furthermore, they act on that belief. Accomplished teachers like young people and are dedicated to and skilled at making knowledge accessible to all students, even as they acknowledge their distinctive traits and talents. Success depends on teachers' belief in the dignity and worth of all human beings and in the potential that exists within each child. Teachers typically do not work one-on-one with students for extended periods of time because they are responsible for groups. But within this constraint, they are attentive to human variability and its influence on learning.

Teachers Recognize Individual Differences in Their Students and Adjust Their Practice Accordingly

To respond effectively to individual differences, teachers must know many things about the particular students they teach: Alex has a stutter, Maria loves science fiction, Toby is anxious about mathematics, Marcus is captivated by jazz. But accomplished teachers know much more - whom their students go home to at night, how they have previously performed on standardized tests, what sparks their interest. This kind of specific understanding is not trivial, for teachers use it constantly to decide how best to tailor instruction.

As diagnosticians of students' interests, abilities and prior knowledge, skillful teachers learn to "read" their students. When planning a unit on aging, for example, they will anticipate what concepts and activities certain students may find problematic. Watching a student work on a computer, they will look for signs of progress. By keeping a finger on the pulse of the class, teachers decide when to alter plans, work with individual students, or enrich instruction with additional examples, explanations or activities.

Proficient teachers learn from their experiences. They learn from listening to their students, from watching them interact with peers, and from reading what they write. The information they acquire about students in the course of instruction subsequently becomes part of their general knowledge of education. Such monitoring and learning is no easy feat. What teachers are able to see, hear and learn is colored by their own prior knowledge and experience. Thus teachers must, in their efforts to work with children different than themselves, monitor both what they see and hear, and what is not so close to the surface. They must strive to acquire a deep understanding of their students and the communities from which they come that shape students' outlooks, values and orientations toward schooling.

Teachers Have an Understanding of How Students Develop and Learn

In addition to particular knowledge of their students, teachers use their understanding of individual and social learning theory, and of child and adolescent development theory, to form their decisions about how to teach. They are familiar with the concepts generated by social and cognitive scientists that apply to teaching and learning. Moreover, they integrate such knowledge with their personal theories of learning and development generated from their own practice. For example, accomplished teachers know that old theories of a monolithic intelligence have given way to more complex theories of multiple intelligences. Current thinking no longer casts "intelligence" as a context-free, one-dimensional trait. Instead, it recognizes different kinds of intelligence - linguistic, musical, mathematical, spatial, kinesthetic, personal. This perspective also holds that there are variations in the sources of intelligence (e.g., practical experience versus formal study) and the forms of intelligence (e.g., procedural skills versus propositional knowledge).

Both their knowledge of these theories and their experiences in classrooms have taught teachers that each student has different strengths, perhaps even gifts. Teachers think about how to capitalize on these assets as they consider how best to nurture additional abilities and aptitudes.

Moreover, teachers recognize that behavior always takes place within a particular setting that, to some extent, defines the behavior. They know, for instance, that students who cannot flawlessly recite multiplication tables may still be able to multiply in other contexts (e.g., in calculating whether they have enough money for items at the grocery store). Accomplished teachers are aware that school settings sometimes obscure a clear vision of students' aptitudes and intelligences. Therefore, they strive to provide multiple contexts in which to promote and evaluate those abilities.

They also recognize the ways in which intelligence is culturally defined. That is, what is considered intelligent behavior is largely determined by the values and beliefs of the culture in which that behavior is being judged. Accomplished teachers recognize that in a multicultural nation students bring to the schools a plethora of abilities and aptitudes that are valued differently by the community, the school and the family. The knowledge, skills, abilities and dispositions that are nurtured in a Native American community in the state of Washington will differ from those valued in an Hispanic community in Florida. Likewise, those cultivated by a suburban community in Utah will differ from those developed in urban New York. Thus, teachers are attuned to the diversity that is found among students and develop an array of strategies for working with it. This includes providing educational experiences which capitalize on and enlarge the repertoires of learning and thinking that students bring to school.

Teachers Treat Students Equitably

As stewards for the interests of students, accomplished teachers are vigilant in ensuring that all pupils receive their fair share of attention, and that biases based on real or perceived ability differences, handicaps or disabilities, social or cultural background, language, race, religion, or gender do not distort relationships between themselves and their students. This, however, is not a simple proposition. Accomplished teachers do not treat all students alike, for similar treatment is not necessarily equivalent to equitable education. In responding to differences among students, teachers are careful to counter potential inequities and avoid favoritism. This requires a well-tuned alertness to such matters and is difficult, as we have only modest knowledge of human differences and how best to respond to them. Hence, accomplished teachers employ what is known about ineffectual and effective practice with diverse groups of students, while striving to learn more about how best to accommodate those differences.

Teachers' Mission Extends Beyond Developing the Cognitive Capacity of Their Students

Teachers are concerned with their students' self-concept, with their motivation, with the effects of learning on peer relationships, and with the development of character, aspiration and civic virtues. These aspects of the student – important as they are in their own right – are also essential to intellectual development. Proficient teachers consider students' potential in this broader sense when making decisions about what and how to teach.

Proposition #2: Teachers Know the Subjects They Teach and How to Teach Those Subjects to Students

If one cardinal precept of teaching is a commitment to the welfare and education of young people, the other is a commitment to subject matter. Accomplished teachers are dedicated to exposing students to the social, cultural, ethical and physical worlds in which they live, and they use the subjects they teach as entrees into those worlds. Thus, elementary teachers know about geography and its relationship to commerce and history. Foreign language teachers know how language and culture interact and fuse. But, it is not sufficient that teachers know the facts that fall into these different content domains. Understanding subject matter entails more than being able to recite lists of dates, multiplication tables, or rules of grammar.

Teachers Appreciate How Knowledge in Their Subjects is Created, Organized and Linked to Other Disciplines

Teachers in command of their subject understand its substance - factual information as well as its central organizing concepts - and the ways in which new knowledge is created, including the forms of creative investigation that characterize the work of scholars and artists.

Physics teachers know about the roles played by hypothesis generation and experimentation in physics; mathematics teachers know the modes of justification for substantiating mathematical claims; art teachers understand how visual ideas are generated and communicated; history teachers know how historians use evidence to interpret past events; and English teachers understand the relationships among reading, writing and oral language. Many special education teachers have a slightly different orientation - focusing on skill development as they work to help moderately and profoundly handicapped students achieve maximum independence in managing their lives.

Understanding the ways of knowing within a subject is crucial to the National Board Certified teacher's ability to teach students to think analytically. Critical thinking does not occur in the abstract, for the thinker is always reasoning about something. Proficient teachers appreciate the fundamental role played by disciplinary thinking in developing rich, conceptual subject-matter understandings. They are dedicated to exposing their students to different modes of critical thinking and to teaching students to think analytically about content.

Teachers represent the collective wisdom of our culture and insist on maintaining the integrity of the methods, substance and structures of disciplinary knowledge. In the face of pressures to portray knowledge in weak and diluted forms, they remain firm. Their role, however, is not just to reinforce the status quo. Rather, appreciative of the fact that there are multiple perspectives and interpretations in each discipline, accomplished teachers encourage students to question prevailing canons and assumptions to help them think for themselves.

It is sometimes assumed that elementary school teachers need not be equipped to approach their subjects critically. But all accomplished teachers, regardless of the ages of their students, are charged with teaching students about something, and in order to do so, they must appreciate its complexity and richness. Teachers must possess such knowledge if they are to help their students develop higher-order thinking skills - the hallmark of accomplished teaching at any level. Being able to engage elementary school children in the broad array of subjects they can profitably come to appreciate makes elementary school practice especially challenging. This does not imply

that fourth-grade teachers should have the same command of biology as high school biology teachers. However, it does mean that they have an understanding of science that allows them to present basic precepts to their students and introduce them to the joy of discovering - and thinking about - the natural world of which they are a part.

Teachers Command Specialized Knowledge of How to Convey a Subject to Students

Knowledge of subject matter is not synonymous with knowledge of how to reveal content to students so they might build it into their systems of thinking. Accomplished teachers possess what is sometimes called "pedagogical content knowledge." Such understanding is the joint product of wisdom about teaching, learning, students and content. It includes knowledge of the most appropriate ways to present the subject matter to students through analogies, metaphors, experiments, demonstrations and illustrations. Subject-specific knowledge also includes an awareness of the most common misconceptions held by students, the aspects that they will find most difficult, and the kinds of prior knowledge, experience and skills that students of different ages typically bring to the learning of particular topics. Proficient science teachers, for example, know that some students have misconceptions about gravity that can influence their learning, while proficient art and music teachers know that young children arrive at school at various stages of maturity with respect to eye-hand coordination. Teachers use this knowledge of their students to structure instruction that facilitates further development.

Thus, subject-specific pedagogical knowledge is not a bag of tricks, but a repertoire of representations that combines instructional techniques with subject matter in ways that take into account the mix of students and school contexts that confront the teacher. Such subject-specific teaching knowledge embodies a way of reasoning through and solving the problems that arise in the daily work of teachers - decisions ranging from what aspects of the subject matter to emphasize to decisions about how to pace instruction. In making these choices, teachers bring to bear their knowledge of students and learning and teaching and subject matter.

Professional teachers' instructional repertoires also include knowledge of available curricular resources such as primary sources, models, reproductions, textbook series, teachers' guides, videotapes, computer software and musical recordings. Their commitment to learning about new materials includes keeping abreast of technological developments that have implications for teaching; for example, how to engage students in the rapidly expanding field of computer technology, as well as how to use the computer to enhance their own teaching. Thus, able teachers keep current with the growing body of curricular materials - including literature available through their professional organizations - and constantly evaluate the usefulness of those materials based on their understanding of curriculum theory, of students, of subject matter, and of the school's and their own educational aims.

Teachers Generate Multiple Paths to Knowledge

Knowledgeable teachers are aware there is value in both structured and inductive learning. That is, while it is useful to teach students about the concepts and principles that scholars have generated in the various disciplines, it is also valuable to engage students in learning by discovery, where they themselves search for problems, patterns and solutions. Proficient teachers help students learn to pose problems and work through alternative solutions, in addition to teaching them about the answers that others have found to similar problems.

The posing and solving of problems on their own is central to the development of true understanding by students - moving far beyond the rote memorization of facts, the easy manipulation

of formulas or the facile playing of a musical scale. Teaching for understanding requires students to integrate aspects of knowledge into their habits of thinking, rather than simply store fragmented knowledge bits. It also means learning to think in a nonlinear way, approaching issues from different angles, weighing multiple criteria and considering multiple solutions. Thus, in the eyes of the proficient teacher, "knowledge" is not conceived narrowly as a lower-level form of understanding. Rather, knowledge is cast in the richest light - as a combination of skills, dispositions, propositions and beliefs - integrated and flexible, elaborate and deep. Furthermore, understanding involves the ability to apply such knowledge to problems never before encountered by teacher or student. Accomplished teachers appreciate that this is the kind of knowledge and understanding that counts, and that this type of learning cannot be rushed.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Proposition #3: Teachers are Responsible for Managing and Monitoring Student Learning

Professional teachers hold high expectations for all students and see themselves as facilitators of student learning. To fulfill these responsibilities, teachers must create, enrich and alter the organizational structures in which they work with young people. They also find ways to capture and sustain the interest of their students. Because time is a precious commodity in schools, teachers attempt to make the most efficient use of it. To accomplish these tasks, teachers seek to master the body of generic pedagogical knowledge.

Teachers Call on Multiple Methods to Meet Their Goals

Accomplished teachers know and can employ a variety of generic instructional skills -- how to conduct Socratic dialogues, how to lecture, how to oversee small cooperative learning groups. Although much of instruction is determined by the content to be taught, there are some commonalities about teaching methods that guide their practice. They are aware of what can reasonably be covered in a 45-minute roundtable discussion, when to hold back and let students figure out their own solutions, and what types of questions provoke the most thoughtful conversation. But it is not sufficient that teachers know about different modes of instruction; they must also know how to implement those strategies. Traditional distinctions between knowing and doing have obscured the fact that thought and action interpenetrate in teaching -- knowing about something and knowing how to do something are both forms of understanding central to teaching.

Because students vary in learning styles and because different settings afford differing learning opportunities, accomplished teachers know when and how to alter the social and physical organizational structure of the learning environment. It is not enough to be a master lecturer, for there are many times when lecturing is not an effective way to teach. An outdoor experiment, a mock trial or an economic simulation, for example, may be more appropriate. Alternatively, a playlet or a debate might be a more effective way to engage students in thinking and learning. Teachers know about the breadth of options available to them, such as innovative instructional formats that involve discovery learning, conceptual mapping, brainstorming, working with computers, as well as more traditional tried-and-true methods.

Teachers not only have the opportunity to vary instructional settings and to employ a range of instructional materials, they also have the opportunity to call on various human resources to custom-tailor the working environment for students. Accomplished teachers know how to mobilize students to tutor their peers and how to engage aides and volunteers as teaching assistants. In schools where staffing arrangements are not fixed and inflexible, teachers also have a good appreciation of their colleagues' skills and the circumstances in which their colleagues' talents can best complement their own. Professional teachers wisely enlist the knowledge and expertise of their fellow faculty members in a variety of ways as they seek to provide their students with as rewarding a learning experience as possible.

Accomplished teachers also know the strengths and weaknesses of these options, and their suitability or incompatibility for certain students and groups. The settings that a teacher chooses are not just matters of personal preference, but are grounded in the literature of teaching. Teaching, to the accomplished teacher, is an elegant web of alternative activities in which students are engaged with the content; sometimes with the teacher, sometimes with each other, sometimes alone.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Teachers Orchestrate Learning in Group Settings

Teachers know how to manage groups of students. They are responsible for setting forth the social norms by which students and teachers act and interact, helping students learn to adopt appropriate roles and responsibilities for their own learning and that of their peers. This includes teaching students to work independently without constant direct supervision by a teacher.

Accomplished teachers have developed systems for overseeing their classrooms so that students and teacher alike can focus on learning, not on controlling disruptive behavior. Discipline and management techniques vary, and no one system has been proven most effective. Hence, proficient teachers consider the desired learning results, their knowledge of their students and the social context, and their own prior experience in selecting management strategies.

Teachers also know that different instructional formats often require different norms of social interaction. Accomplished teachers can alternate among organizational arrangements and understand how different structures cast students and teachers in different roles. Applying their knowledge of the relative strengths and weaknesses of different structures, they weigh these considerations when deciding which instructional strategy and organizational structure will best enhance student learning. They also continually search for new forms of organization that may expand their repertoire and prove effective.

Teachers Place a Premium on Student Engagement

Facilitating student learning is not simply a matter of placing young people in educative environments, for teachers must also motivate them, capturing their minds and hearts and engaging them actively in learning. Thus, the National Board Certified teacher understands the ways in which students can be motivated and has strategies to monitor student engagement. The teacher's role in building upon student interests and in sparking new passions is central to building bridges between what students know and can do and what they are capable of learning.

Proficient teachers also know that motivating students is not always equivalent to making learning fun, for learning can be difficult work. Developing an acute sense of one's body in dance, for example, requires intense intellectual and physical concentration. Writing a short story requires drafting and re-drafting, editing and re-editing, occasionally submitting oneself to the critiques of peers and teachers. To practice effectively, teachers need to know how to encourage students even in the face of temporary failure and the inevitable doubts that students meet as they push themselves to new affective, intellectual and physical planes. With such learning comes the real joy in education, the satisfaction of accomplishment.

Teachers Regularly Assess Student Progress

While teachers are not always the central actors in their students' educational experiences, they are ultimately responsible for the creation and maintenance of those experiences and bear a considerable responsibility for what students learn at school. Proficient teachers, therefore, can judge the relative success of the activities they design. They can track what students are learning (or not learning), as well as what they, as teachers, are learning.

Assessment in teaching is not a simple task; teachers must monitor the successes and failures of individual students and evaluate their classes as collectives of learners. Additionally, they make judgments about themselves as teachers in relation to those students and classes. Although these judgments are interdependent of one another, they are not necessarily synonymous. One of the essential tensions of teaching is that teachers teach individual students, while managing groups.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Accomplished teachers do not treat a class as a monolith. They know that a class does not learn; individual students do. But individuals neither learn the same things, nor learn at the same pace.

Accomplished teachers use information about how the students in their classes are doing "on average" as a guide to making judgments about the relative success or failure of an instructional strategy. But they do not forget that there are few average students. They know that some students have moved far beyond that "average" evaluation, while others trail. And while they have to make decisions about what to do with the class as a whole, proficient teachers find ways to accommodate what they know about individual students and what they are learning in their plans for the whole group.

Accomplished teachers understand that the purposes, timing and focus of an evaluation affect its form. They are astute observers of students - their movements, their words and their minds. Teachers track student progress with a variety of evaluation methods, each with its own set of purposes, strengths and weaknesses. Their knowledge extends to creating their own, sometimes innovative, tools for evaluation, including portfolios, videotapes, demonstrations and exhibitions. In addition, they may use more traditional measures such as quizzes or exams. Sometimes teachers ask questions in the middle of a group discussion in order to assess how well students are following the presentation of information; or they may talk individually with students while they are engaged in independent work. At other times they watch their students' behavior as they read to each other or work in the laboratory.

Teachers frequently do not assign grades, for evaluation is not always for the purpose of recording grades; rather, it allows students and teachers to assess where they stand. Teachers also assess students to determine how much they have learned from a unit of instruction, be it a week on seeds, a semester of photography, or a year of athletic training. Student responses then contribute to teachers' decisions about whether to reteach, review or move on. By continually adding to their repertoire of methods for assessing what students have learned, as well as constantly monitoring student progress, accomplished teachers are able to provide constructive feedback to students, parents and themselves. Finally, such teachers help their students to engage in self-assessment, instilling in them a sense of responsibility for monitoring their own learning.

Teachers Are Mindful of Their Principal Objectives

Teachers also know about planning instruction - identifying and elaborating educational objectives, developing activities to help them meet their goals and drawing upon resources that will serve their purposes. Experienced teachers do not all plan alike. Some do not write elaborate plans prior to teaching, having automated their planning through years of experience in classrooms. Other teachers plan in detail (e.g., creating individual educational plans for special education students). No matter what form their final plans take - scribbles on a scrap of paper or lengthy and detailed outlines accomplished teachers can clearly articulate their goals for students.

Proposition #4: Teachers Think Systematically About Their Practice and Learn from Experience

As with most professions, teaching requires an open-ended capacity that is not acquired once and for all. Because they work in a field marked by many unsolved puzzles and an expanding research base, teachers have a professional obligation to be lifelong students of their craft, seeking to expand their repertoire, deepen their knowledge and skill, and become wiser in rendering judgments. Accomplished teachers are inventive in their teaching and, recognizing the need to admit new findings and continue learning, stand ready to incorporate ideas and methods developed by others that fit their aims and their students. What exemplifies excellence, then, is a reverence for the craft, a recognition of its complexities, and a commitment to lifelong professional development.

Teachers Are Continually Making Difficult Choices That Test Their Judgment

The demands of teaching often present stiff challenges that do not lend themselves to simple solutions. Conflicting objectives regularly require teachers to fashion compromises that will satisfy multiple parties. A Western Civilization teacher, for example, attempting to reconcile demands for coverage with demands for indepth understanding, will do what is necessary to race from Plato to NATO, yet set aside time to develop in students the understanding that history is evolutionary rather than a series of events strung together chronologically. Likewise, a third-grade teacher will find a way to introduce students to the idea that writing is a thinking process, while ensuring that students are learning the basics of spelling and grammar.

Teachers also face choices that force them to sacrifice one goal for another. For instance, teachers who are committed to teaching mathematics for conceptual understanding want to teach students to see number relationships in the real world, to represent them with appropriate symbols, and to use their knowledge of mathematical formulas and computational skills to manipulate those numbers. Such teaching requires giving students time to frame their own problems, find their own solutions, and compare those solutions with alternatives posed by their classmates. Students who have learned through experience that math class involves filling out worksheets and doing problem sets may dislike the uncertainty inherent in problems with multiple or no solutions; they may be troubled that their teacher now wants them to discuss the reasons why a particular solution makes sense. Abandoning speed and accuracy as the criterion of success may temporarily jeopardize students' performance on standardized tests, even as the teacher fosters growth in the depth of students' mathematical competence. In deciding to teach in this way, a teacher risks alienating students, parents and administrators who have their own strong ideas of what math class is supposed to look like and the kind of competence it is supposed to yield.

Such circumstances call on teachers to employ their professional knowledge of what makes for sound practice, with the interest of their students given paramount consideration. While more than one satisfactory path may be derived to balance non-complementary objectives, the teacher's decision will be grounded in established theory and reasoned judgment.

Teachers Seek the Advice of Others and Draw on Education Research and Scholarship to Improve Their Practice

Aware that experience is not always a good teacher, proficient teachers search out other opportunities that will serve to cultivate their own learning. As savvy students of their own teaching, they know the value of asking others to observe and offer a critique of their teaching. They also know the value of writing about their work and of soliciting reactions from parents and students.

Thus, masterful teachers develop specialized ways to listen to their students, colleagues and administrators, and reflect on their teaching in order that they might improve their practice.

Able teachers are also students of education scholarship and are cognizant of the settled and unsettled territory in their field. They stay abreast of current research and, when appropriate, incorporate new findings into their practice. They take advantage of teacher centers and special conferences and workshops. They might conduct and publish their own research, if so inclined, for testing of new approaches and hypotheses is a commonplace habit among adept teachers, even if a normally overlooked and undocumented one.

Wise teachers understand the legitimacy and limitations of the diverse sources that inform teaching and they continuously draw upon them to enrich their teaching. Their enthusiasm for, and commitment to, continued professional development exemplifies a disposition they hope to nurture in students. Hence, the thinking, reasoning and learning that characterize first-rate teaching are doubly valuable: not only are thoughtful teachers able to teach more efficiently and effectively, they are also models for the critical, analytic thinking that they strive to develop in our youth. Teachers who are themselves exemplars of careful reasoning - considering purposes, marshaling evidence and balancing outcomes - are more likely to communicate to students the value and manner of such reasoning. Moreover, they model other dispositions and traits as well, such as a commitment to creativity in their work and the disposition to take risks in exploring new intellectual, emotional, physical or artistic territories.

Proficient teachers, then, are models of educated persons. Character and competence contribute equally to their educative manner. They exemplify the virtues they seek to impart to students: curiosity and a love of learning; tolerance and open-mindedness; fairness and justice; appreciation for our cultural and intellectual heritages; respect for human diversity and dignity; and such intellectual capacities as careful reasoning, the ability to take multiple perspectives, to question received wisdom, to be creative, to take risks, and to adopt an experimental and problem-solving orientation.

What Teachers Should Know and Be Able to Do

National Board for Professional Teaching Standards®

Proposition #5: Teachers are Members of Learning Communities

Teaching most commonly is regarded as the daily conduct of lessons and the provision of learning experiences. But the work of teaching reaches beyond the boundaries of individual classrooms to wider communities of learning. In order to take advantage of the broad range of professional knowledge and expertise that resides within the school, accomplished teachers have a range of duties and tasks outside the direct instruction of students that contribute importantly to the quality of the school and to student learning.

There are two broad areas of responsibility. One involves participation in collaborative efforts to improve the effectiveness of the school. The second entails engaging parents and others in the community in the education of young people.

Teachers Contribute to School Effectiveness by Collaborating with Other Professionals

Teaching is often portrayed as the implementation of policy and curriculum developed by others -- as following orders. The National Board advocates a more proactive and creative role for teachers: engaging them in the analysis and construction of curriculum, in the coordination of instruction, in the professional development of staff and in many other school-site policy decisions fundamental to the creation of highly productive learning communities.

While state authorities and local school district leadership establish broad goals, objectives and priorities for the schools, professional teachers share responsibility with colleagues and administrators for decisions about what constitutes valuable learning for students. This includes their participation in critically analyzing the school curriculum, identifying new priorities and communicating necessary changes to the school community. Teachers' knowledge of curriculum and their students are essential to discharging these responsibilities effectively. But a readiness to work collaboratively on such matters and not blindly accept curricular conventions is also necessary.

Accomplished teachers attend to issues of continuity and equity of learning experiences for students that require school-wide collaboration across the boundaries of academic tracks, grade levels, special and regular instruction and disciplines. Such boundaries, constructed as much out of traditional patterns of school organization as out of instructional rationales, are often dysfunctional and damaging to student learning. National Board Certified teachers cultivate a critical spirit in appraising such schooling commonplaces, together with a willingness to work with administrators toward school-wide improvements that can include revision of organizational as well as instructional features of schooling.

The development of curriculum and the coordination of instruction are particularly important functions shared among teachers and administrators. Proficient teachers collaborate in planning the instructional program of the school to assure continuity of learning experiences for students. They possess the interpersonal skills needed to work on teams and a willingness to work together in the interest of the school community. Their understanding of the technical requirements of a well-coordinated curriculum enables them to participate in planning and decision-making within teams, departments or other educational units outside the classroom, laboratory or studio.

Consonant with their role in curriculum planning and coordination, teachers are aware of the learning goals and objectives established by state and local authorities. Professional practice requires that teachers be knowledgeable about their legal obligation to carry out public policy as

represented by state statute and regulation, school board directives, court decisions and other policies.

Accomplished teachers also participate in the coordination of services to students. Today's schools include a wide variety of educational specialists, and with increasing specialization has come the need for coordination, lest pupils' educational experiences become fragmented. The increased practice of "mainstreaming" special-needs students to assure that they are being educated in the least restrictive environment has meant that general and special education teachers need to work with one another. Compensatory education programs typically involve teaching pupils outside regular school settings. The various forms of English as a second language, bilingual and English-immersion programs often require cooperation among teachers of non- and limited-English-speaking youth. National Board Certified teachers are adept at identifying students who might benefit from such special attention and at working in tandem with specialists.

In addition to working on the improvement of school-wide curricula and the coordination of instruction, teachers work together to strengthen their teaching. Sometimes they observe each other teach; at other times they engage in discussions about teaching; and occasionally they collaborate in trying out new instructional strategies. While the particulars of how teachers choose to improve their instruction will vary according to the structure of opportunity and a teacher's dispositions and interests, the principle underlying such engagement is the continuous pursuit of teaching excellence in the company of peers.

Strong schools emphasize a process of continuous improvement. They are organized to find and solve problems and to locate, invent and experiment with different methods of instruction and school organization. Teachers within such schools work not only on professional development, but also on school-wide improvements. This expectation is part of what constitutes a professional orientation to teaching and part of what distinguishes the professional teacher.

The conventional image of the accomplished teacher as solo performer working independently with students is narrow and outdated. Committed career teachers assume responsibility in cooperation with their administrators for the character of the school's instructional program. They are team players willing to share their knowledge and skill with others and participate in the ongoing development of strong school programs. This participation may take many forms, such as mentoring novices, serving on school and district policy councils, demonstrating new methodologies, engaging in various forms of scholarly inquiry and artistic activity, or forming study groups for teachers.

Teachers Work Collaboratively with Parents

Teachers share with parents the education of the young. They communicate regularly with parents and guardians, listening to their concerns and respecting their perspective, enlisting their support in fostering learning and good habits, informing them of their child's accomplishments and successes, and educating them about school programs. Kindergarten teachers, for example, can help parents understand that reading stories to their children is more important to literacy development than completing worksheets on letters.

In the best of all worlds, teachers and parents are mutually reinforcing partners in the education of young people. But three circumstances complicate this partnership. First, the interests of parents and schools sometimes diverge, requiring teachers to make difficult judgments about how best to fulfill their joint obligations to their students and to parents. Second, students vary in the degree and kind of support they receive at home for their school work. The effects of

culture, language, and parental education, income and aspirations influence each learner. Teachers are alert to these effects and tailor their practice accordingly to enhance student achievement. However, when faced with an unavoidable conflict, the teacher must hold the interest of the student and the purposes of schooling paramount. Third, the behavior and mind-set of schools and families can be adversarial. Some parents are distrustful of the school's values, and the schools sometimes underestimate the family's potential to contribute to their children's intellectual growth. Students get caught in the middle, their allegiance to and affection for each party challenged by the other. Accomplished teachers develop skills and understandings to avoid these traditional pitfalls and work to foster collaborative relationships between school and family.

The changing family structure in our society creates new challenges as well, for there are now more youth with single parents, working parents and parents with inadequate income. Thus, creating home-school partnerships has become more difficult for teachers and parents in many communities. In attempting to work creatively and energetically with families in the interest of students' development, able teachers acquire knowledge and understanding of individual students' lives outside school. A teacher's foremost responsibility is to the intellectual development of our youth, but they are mindful of the broad range of children's needs, including the need for guidance and the strong presence of caring and nurturing adults. This is a difficult set of obligations to fulfill. On the one hand, teachers are prepared neither by training nor by role to serve as parent surrogates or social workers. The distinctive mission of teaching is to promote learning, a complex undertaking in itself. On the other hand, education's broad and humane purposes do not admit any narrow specialization. Students' physical, emotional, and social well-being cannot be separated from their intellectual growth.

Teachers Take Advantage of Community Resources

Professional teachers cultivate knowledge of their school's community as a powerful resource for learning. The opportunities are many for enriching projects, lessons, and study: observing the city council in action; collecting oral histories from senior citizens; studying the ecology of the local environment; visiting a nearby planetarium; drawing the local architecture; or exploring career options on-site. Any community -- urban or rural, wealthy or poor -- can be a laboratory for learning under the guidance of an effective teacher. Moreover, within all communities there are valuable resources such as other teachers and students, senior citizens, parents, business people, and local organizations that teachers can engage to assist, enhance and supplement their work with students. Teachers need not teach alone.

Teachers also cultivate knowledge about the character of the community and its effects on the school and students. They develop an appreciation of ethnic and linguistic differences, of cultural influences on students' aspirations and expectations, and of the effects of poverty and affluence. Cultural and other discontinuities between home and school frequently can confound teachers' efforts to promote learning. Conversely, the cultural diversity represented in many communities can serve as a powerful resource in teaching about other cultures, in encouraging tolerance and understanding of human differences, and in promoting civic ideals. Accomplished teachers seek to capitalize on these opportunities and to respond productively to students' diverse backgrounds.

There is a balance here. Schools and teachers cannot alleviate all the social problems that they encounter. Yet teachers confront the human condition daily in all its variety, splendor and misery. They must be humane, caring and responsive to students and their problems, while they maintain a focus on their distinctive professional responsibilities.

Conclusion

Accomplished teaching involves making difficult and principled choices, exercising careful judgment and honoring the complex nature of the educational mission. Teachers employ technical knowledge and skill, yet must be ever mindful of teaching's ethical dimensions. The primary mission is to foster the development of skills, dispositions and understanding, while responding thoughtfully to a wide range of human needs and conditions. Teachers owe joint allegiance to the forms and standards of knowledge within and across disciplines and to the students they serve.

They must acquire and employ a repertoire of instructional methods and strategies, yet remain critical and reflective about their practice, drawing lessons from experience. Teachers' professional responsibilities focus on instructing the students in their immediate care, while they participate as well in wider activities within the school and in partnership with parents and the community.

Teaching is often portrayed as an activity that conserves valued knowledge and skills by transmitting them to succeeding generations. It is that and more. Teachers also have the responsibility to question settled structures, practices, and definitions of knowledge; to invent and test new approaches; and, where necessary, to pursue change of organizational arrangements that support instruction. As agents of the public interest in a democracy, teachers through their work contribute to the dialogue about preserving and improving society, and they initiate future citizens into this ongoing public discourse. In the development of its assessment procedures and certification standards, the National Board has sought to represent these ideals faithfully and comprehensively.

Assertations about what teachers should know sometimes conceal inadequacies in the current state of knowledge. In this respect, teaching is not unlike other professions where practitioners confront unavoidable uncertainty in their work. However, the knowledge base for teaching is growing steadily. Professional consensus and research findings have begun to provide authoritative support for knowledge related to many of the tasks, responsibilities and results of teaching. But much remains to be learned.

The National Board draws on existing knowledge in developing its standards but also relies on the professional judgment of accomplished teachers and scholars in designing its assessment procedures. Recognizing that new knowledge about teaching is continually being formulated, the National Board continually reviews its work to reflect new findings and to update its standards and assessments as appropriate.

The National Board also considers the effects of school context on standards for teaching. The very existence of a National Board suggests common standards that prevail across teaching's many settings. However, teaching in an Alaskan village exacts demands different from teaching in Chicago. Teachers in both settings, though, blend and adapt their knowledge of teaching with their knowledge of the community in which they work to ensure effective student learning. For accomplished teachers, the wisdom of practice that they accrue depends on the settings in which they work, the communities they serve, and the students they encounter.

The assessment procedures developed by the National Board take context into account in a variety of ways. This is achieved by the use of assessment formats such as essays, videotaping and reflective commentaries. The National Board offers National Board Certification to all qualified

teachers irrespective of the teaching environments in which they work. But the opportunities available to teachers to acquire and exercise many of the professional capacities and responsibilities endorsed by the National Board vary markedly from community to community. Some schools feature strong professional cultures whose norms support collaboration, innovative teaching, a high degree of collegiality, and participation in a broad array of professional activities. Other schools provide few such opportunities, and some even discourage such activity. To address this tension, the National Board's assessments acknowledge that there are multiple paths to meeting the standards, which take into account the diversity of teaching contexts.

These are the touchstones that guide the development of the National Board's certification standards and assessments. Our view of the responsibilities of the National Board Certified Teacher is deliberately complex and demanding, for this is how we see the work of American professional teachers, who are challenged to create excellence in education for all our nation's youth.

Grow great schools.™

Alaska

America's partner in growing great schools - 2011 Statistics for Alaska

In 2011, 6,266 teachers became National Board Certified Teachers (NBCTs) through NBPTS, bringing the total number of NBCTs nationwide to 97,291.

These accomplished teachers comprise approximately 3 percent of the national teaching force - more than half teach in high-need schools and 15 percent are certified in STEM-related areas. This year, 19 states had at least a 10 percent increase in the number of teachers earning certification over the prior year. Nineteen states have more than doubled the number of NBCTs in the past five years. In Washington and Wyoming, NBCT populations have more than quadrupled in the past five years. Research shows that students taught by Board Certified teachers consistently see the highest gains in achievement.

Here are the key 2011 statistics for Alaska.

Increase in Teachers Achieving National Board Certification*			
	Number in 2010-2011	% Increase	Total Number Certified
AK	14	11.6%	135
Total	6,266	6.9%	97,291

"As the nation focuses on building the strongest possible teaching workforce, National Board Certification is the gold standard in affirming excellence in the classroom. These highly qualified teachers are true 'nation builders,' and are the educators who are best positioned to lead the ground-up movement our schools need to reach their potential."

- Ron Thorpe, NBPTS president and CEO

CS FOR SENATE BILL NO. 84(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE EDUCATION COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to funding for high school vocational and technical instruction as a component of funding for public schools; relating to the base student allocation; relating to education tax credits; providing for an effective date by amending the effective date in sec. 57, ch. 92, SLA 2010; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.17.410(b) is amended to read:

(b) Public school funding consists of state aid, a required local contribution, and eligible federal impact aid determined as follows:

(1) state aid equals basic need minus a required local contribution and 90 percent of eligible federal impact aid for that fiscal year; basic need equals the sum obtained under (D) of this paragraph, multiplied by the base student allocation set out in AS 14.17.470; district adjusted ADM is calculated as follows:

(A) the ADM of each school in the district is calculated by applying the school size factor to the student count as set out in AS 14.17.450;

(B) the number obtained under (A) of this paragraph is multiplied by the district cost factor described in AS 14.17.460;

(C) the ADMs of each school in a district, as adjusted according to (A) and (B) of this paragraph, are added; the sum is then multiplied by the special needs factor set out in AS 14.17.420(a)(1) **and the high school vocational education factor set out in AS 14.17.420(a)(3)**;

(D) the number obtained for intensive services under AS 14.17.420(a)(2) and the number obtained for correspondence study under AS 14.17.430 are added to the number obtained under (C) of this paragraph;

(E) notwithstanding (A) - (C) of this paragraph, if a school district's ADM adjusted for school size under (A) of this paragraph decreases by five percent or more from one fiscal year to the next fiscal year, the school district may use the last fiscal year before the decrease as a base fiscal year to offset the decrease, according to the following method:

(i) for the first fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 75 percent of the difference in the district's ADM adjusted for school size between the base fiscal year and the first fiscal year after the base fiscal year;

(ii) for the second fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 50 percent of the difference in the district's ADM adjusted for school size between the base fiscal year and the second fiscal year after the base fiscal year;

(iii) for the third fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 25 percent of the difference in the district's ADM adjusted for school size between the

base fiscal year and the third fiscal year after the base fiscal year;

(F) the method established in (E) of this paragraph is available to a school district for the three fiscal years following the base fiscal year determined under (E) of this paragraph only if the district's ADM adjusted for school size determined under (A) of this paragraph for each fiscal year is less than the district's ADM adjusted for school size in the base fiscal year;

(G) the method established in (E) of this paragraph does not apply to a decrease in the district's ADM adjusted for school size resulting from a loss of enrollment that occurs as a result of a boundary change under AS 29;

(2) the required local contribution of a city or borough school district is the equivalent of a four mill tax levy on the full and true value of the taxable real and personal property in the district as of January 1 of the second preceding fiscal year, as determined by the Department of Commerce, Community, and Economic Development under AS 14.17.510 and AS 29.45.110, not to exceed 45 percent of a district's basic need for the preceding fiscal year as determined under (1) of this subsection.

*** Sec. 2.** AS 14.17.420(a) is amended to read:

(a) As a component of public school funding, a district is eligible for special needs **and high school vocational and technical instruction** funding and may be eligible for intensive services funding as follows:

(1) special needs funding is available to a district to assist the district in providing special education, gifted and talented education, vocational education, and bilingual education services to its students; a special needs funding factor of 1.20 shall be applied as set out in AS 14.17.410(b)(1);

(2) in addition to the special needs funding for which a district is eligible under (1) of this subsection, a district is eligible for intensive services funding for each special education student who needs and receives intensive services and is enrolled on the last day of the count period; for each such student, intensive services funding is equal to the intensive student count multiplied by 13**;**

(3) in addition to the special needs and intensive services funding

available under (1) and (2) of this subsection, high school vocational and technical instruction funding is available to assist districts in providing vocational and technical instruction to students who are enrolled in grades nine through 12; a high school vocational and technical instruction funding factor of 1.01 shall be applied as set out in AS 14.17.410(b)(1); in this paragraph, "vocational and technical instruction" excludes costs associated with

(A) administrative expenses; and

(B) instruction in general literacy, mathematics, and job readiness skills.

*** Sec. 3.** AS 14.17.440(a) is amended to read:

(a) Except as provided in AS 14.17.400(b), funding for state boarding schools established under AS 14.16.010 includes an allocation from the public education fund in an amount calculated by

(1) determining the ADM of state boarding schools by applying the school size factor to the student count as described in AS 14.17.450;

(2) multiplying the number obtained under (1) of this subsection by the special needs factor in AS 14.17.420(a)(1) **and the high school vocational education factor set out in AS 14.17.420(a)(3)** and multiplying that product by the base student allocation; and

(3) multiplying the product determined under (2) of this subsection by the district cost factor that is applicable to calculation of the state aid for the adjacent school district under AS 14.17.460.

*** Sec. 4.** AS 14.17.470 is amended to read:

Sec. 14.17.470. Base student allocation. The base student allocation is **$5,790** [$5,680].

*** Sec. 5.** AS 21.96.070(a) is amended to read:

(a) A taxpayer is allowed a credit against the tax due under AS 21.09.210 or AS 21.66.110 for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or

four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

(4) for a facility by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association**; and**

(5) for education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government.

*** Sec. 6.** AS 43.20.014(a) is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

(4) for a facility by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association**; and**

(5) for education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government.

*** Sec. 7.** AS 43.55.019(a) is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

(4) for a facility by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association**; and**

(5) for education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government.

*** Sec. 8.** AS 43.56.018(a) is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

(4) for a facility by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association**; and**

(5) for education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government.

* **Sec. 9.** AS 43.65.018(a) is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

(4) for a facility by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association**; and**

(5) for education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government.

* **Sec. 10.** AS 43.75.018(a) is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

(4) for a facility by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association**; and**

(5) for education, research, rehabilitation, and facilities by an

institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government.

* **Sec. 11.** AS 43.77.045(a) is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

(4) for a facility by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association**; and**

(5) for education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government.

* **Sec. 12.** AS 21.96.070(a)(5), AS 43.20.014(a)(5), AS 43.55.019(a)(5), AS 43.56.018(a)(5), AS 43.65.018(a)(5), AS 43.75.018(a)(5), and AS 43.77.045(a)(5) are repealed January 1, 2021.

* **Sec. 13.** Section 57, ch. 92, SLA 2010, is amended to read:

Sec. 57. Except as provided in sec. 56 of this Act, this Act takes effect January 1, **2021** [2014].

* **Sec. 14.** This Act takes effect July 1, 2011.

CS FOR SENATE BILL NO. 84(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE EDUCATION COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to funding for high school vocational and technical instruction as a component of funding for public schools; relating to the base student allocation; relating to education tax credits; providing for an effective date by amending the effective date in sec. 57, ch. 92, SLA 2010; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 14.17.410(b) is amended to read:

(b) Public school funding consists of state aid, a required local contribution, and eligible federal impact aid determined as follows:

(1) state aid equals basic need minus a required local contribution and 90 percent of eligible federal impact aid for that fiscal year; basic need equals the sum obtained under (D) of this paragraph, multiplied by the base student allocation set out in AS 14.17.470; district adjusted ADM is calculated as follows:

(A) the ADM of each school in the district is calculated by applying the school size factor to the student count as set out in AS 14.17.450;

(B) the number obtained under (A) of this paragraph is multiplied by the district cost factor described in AS 14.17.460;

(C) the ADMs of each school in a district, as adjusted according to (A) and (B) of this paragraph, are added; the sum is then multiplied by the special needs factor set out in AS 14.17.420(a)(1) **and the high school vocational education factor set out in AS 14.17.420(a)(3)**;

(D) the number obtained for intensive services under AS 14.17.420(a)(2) and the number obtained for correspondence study under AS 14.17.430 are added to the number obtained under (C) of this paragraph;

(E) notwithstanding (A) - (C) of this paragraph, if a school district's ADM adjusted for school size under (A) of this paragraph decreases by five percent or more from one fiscal year to the next fiscal year, the school district may use the last fiscal year before the decrease as a base fiscal year to offset the decrease, according to the following method:

(i) for the first fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 75 percent of the difference in the district's ADM adjusted for school size between the base fiscal year and the first fiscal year after the base fiscal year;

(ii) for the second fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 50 percent of the difference in the district's ADM adjusted for school size between the base fiscal year and the second fiscal year after the base fiscal year;

(iii) for the third fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 25 percent of the difference in the district's ADM adjusted for school size between the

base fiscal year and the third fiscal year after the base fiscal year;

(F) the method established in (E) of this paragraph is available to a school district for the three fiscal years following the base fiscal year determined under (E) of this paragraph only if the district's ADM adjusted for school size determined under (A) of this paragraph for each fiscal year is less than the district's ADM adjusted for school size in the base fiscal year;

(G) the method established in (E) of this paragraph does not apply to a decrease in the district's ADM adjusted for school size resulting from a loss of enrollment that occurs as a result of a boundary change under AS 29;

(2) the required local contribution of a city or borough school district is the equivalent of a four mill tax levy on the full and true value of the taxable real and personal property in the district as of January 1 of the second preceding fiscal year, as determined by the Department of Commerce, Community, and Economic Development under AS 14.17.510 and AS 29.45.110, not to exceed 45 percent of a district's basic need for the preceding fiscal year as determined under (1) of this subsection.

* **Sec. 2.** AS 14.17.420(a) is amended to read:

(a) As a component of public school funding, a district is eligible for special needs **and high school vocational and technical instruction** funding and may be eligible for intensive services funding as follows:

(1) special needs funding is available to a district to assist the district in providing special education, gifted and talented education, vocational education, and bilingual education services to its students; a special needs funding factor of 1.20 shall be applied as set out in AS 14.17.410(b)(1);

(2) in addition to the special needs funding for which a district is eligible under (1) of this subsection, a district is eligible for intensive services funding for each special education student who needs and receives intensive services and is enrolled on the last day of the count period; for each such student, intensive services funding is equal to the intensive student count multiplied by 13;

(3) in addition to the special needs and intensive services funding

available under (1) and (2) of this subsection, high school vocational and technical instruction funding is available to assist districts in providing vocational and technical instruction to students who are enrolled in grades nine through 12; a high school vocational and technical instruction funding factor of 1.01 shall be applied as set out in AS 14.17.410(b)(1); in this paragraph, "vocational and technical instruction" excludes costs associated with

(A) administrative expenses; and

(B) instruction in general literacy, mathematics, and job readiness skills.

* **Sec. 3.** AS 14.17.440(a) is amended to read:

(a) Except as provided in AS 14.17.400(b), funding for state boarding schools established under AS 14.16.010 includes an allocation from the public education fund in an amount calculated by

(1) determining the ADM of state boarding schools by applying the school size factor to the student count as described in AS 14.17.450;

(2) multiplying the number obtained under (1) of this subsection by the special needs factor in AS 14.17.420(a)(1) **and the high school vocational education factor set out in AS 14.17.420(a)(3)** and multiplying that product by the base student allocation; and

(3) multiplying the product determined under (2) of this subsection by the district cost factor that is applicable to calculation of the state aid for the adjacent school district under AS 14.17.460.

* **Sec. 4.** AS 14.17.470 is amended to read:

Sec. 14.17.470. Base student allocation. The base student allocation is **$5,790** [$5,680].

* **Sec. 5.** AS 21.96.070(a) is amended to read:

(a) A taxpayer is allowed a credit against the tax due under AS 21.09.210 or AS 21.66.110 for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or

four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

(4) for a facility by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association**; and**

(5) for education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government.

*** Sec. 6.** AS 43.20.014(a) is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) for vocational education courses, programs, and facilities by a state-operated vocational technical education and training school; [AND]

SENATE EDUCATION COMMITTEE

Senators Kevin Meyer & Joe Thomas, Co-Chairs

Senate Bill 84

"An Act relating to funding for high school vocational education as a component of funding for public schools; increasing the base student allocation used in the public school funding formula; and providing for an effective date."

The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions.

In our country we have accepted a daunting challenge—to provide a quality education to every single child in our nation. For Alaska this is an especially daunting task. The immensity of the state combined with the small scale of many communities poses challenges no other state faces, especially in the economic arena.

In 2008 the 25th Legislature saw fit to pass an annual $100 increase to the Base Student Allocation for three consecutive years to ensure stable and adequate funding of education. 2011 is the last of that three-year cycle. The legislature also revisited funding for intensive needs special education, and provided equitable funding for this program, and incorporated new district cost factors to provide equitable funding across the state. The foresight of the Legislature on these two issues is commendable, and should be emulated by future legislatures.

To that end we are introducing SB 84, which establishes incremental three-year increases in the BSA and sets aside funds for high school vocational education. This additional annual amount added to the BSA allows schools to keep up with the rising cost of educating our children. The incremental increases represent less than two percent a year, which is below the current inflation rate. This bill also sends a clear message to the school districts—this is the amount they will have to work with for the next three years. It allows them to act in fiscally responsible ways by giving them financial parameters for the next three years.

SB 84 also establishes a vocational education factor in the school funding formula. Currently vocational education is combined with bilingual, gifted and talented and special education. Legal mandates require districts to offer certain special education programs, and often those required programs take huge amounts of money, leaving little left over for vocational education.

Throwing money at the educational issues in our state will not solve our problems, but neither will allowing inflation to erode two to three percent of funding every year.

SB 84 is a moderate and responsible piece of legislation designed to provide funding, stability and predictability so school districts can concentrate on the essential work of improving educational outcomes.

We urge you to support this important bill.

SENATE EDUCATION COMMITTEE
Senators Kevin Meyer & Joe Thomas, Co-Chairs

Senate Bill 84
Vocational Education Factor

As proposed in SB 84, the vocational education factor is an addition to the current funding formula. It is calculated after the Adjusted Average Daily Membership and District Cost factor come into play.

Current Formula

Step 1	Adjust the ADM for school size
Step 1a	Review the Hold Harmless eligibility (in case of a greater than 5% decrease in ADM)
Step 2	Apply District Cost Factor
Step 3	Apply Special Needs, Vocational Education, Gifted and Talented and Bilingual Ed factors (1.20)
Step 4	Add Intensive Services Counts
Step 5	Add Correspondence Students Counts

Under SB 84

Step 1	Adjust the ADM for school size
Step 1a	Review the Hold Harmless eligibility (in case of a greater than 5% decrease in ADM)
Step 2	Apply District Cost Factor
Step 3	Apply Special Needs, Vocational Education, Gifted and Talented and Bilingual Ed factors (1.20)
Step 4	**Apply Vocational Education Factor (1.01)**
Step 5	Add Intensive Services Counts
Step 6	Add Correspondence Students Counts

Ref: SB 84, "An Act relating to funding for high school vocational education as a component of funding for public schools; increasing the base student allocation used in the public school funding formula; and providing for an effective date."

Dear Senators Meyer and Thomas:

The Juneau Economic Development Council (JEDC) applauds the Legislature's commitment to Alaska's K-12 public schools. JEDC is home to a statewide K-12 Science Technology, Engineering and Mathematics (STEM) initiative, working to increase student interest and competencies in STEM fields. With funding from the U.S. Department of Defense, the STEM program has directly benefited over 5,000 students, 323 teachers, in 23 school districts over the last four years.

We support the Senate Education Committee's proposal to increase the Base Student Allocation (BSA) within the Foundation formula and urge the Committee to increase the BSA to keep pace with inflation and meet those costs that are beyond a District's direct control – such as rising fuel oil prices. Erosion of schools' purchasing power is counter-productive, and highly unlikely to move schools faster towards the success we all hope for.

JEDC also supports attention to and increase in funding for vocational education, which we understand encompasses STEM courses as well as more traditional vocational education course options.

STEM skills reflect the changing job requirements in our increasingly global and technology-driven economy. These skills are required not only for professional sector jobs, but also, increasingly, infused in and required for mid-level occupations. The Alaska Department of Labor predicts that by 2018 there will be over 8,000 job openings in STEM-related jobs in Alaska (2,700 new STEM jobs and 5,400 more openings as workers retire). Jobs within health occupations add even more jobs to this total.

These jobs require the ability to apply math and science skills in a real world context. Unfortunately, Alaska high school graduates are often ill prepared for the caliber of work required in colleges and technical schools to access these jobs. For example, of the Alaskan students taking the ACT test in 2010,

- Only 47% were prepared for college level math; and
- Only 31% met college-ready benchmarks in science.

In short, vocational education, including STEM programs that include a robust hands-on element and links to real world challenges, opportunities and jobs, are increasingly important to our state's economic health.

We encourage the Committee to expand funding for vocational education into the middle school grades. The middle school years are pivotal in shaping a young person's attitudes towards jobs, future possibilities and their place in the world. Through JEDC's STEM initiative it is clear that for many students, STEM projects such as FIRST robotics and SeaPerch underwater ROV "build" are often a student's first introduction to building, tinkering, designing, redesigning, and messing around with science, technology, engineering and mathematics. It is important there be more hands-on, vocational and STEM opportunities for students in the middle school years.

Thank you for your thoughtful consideration and ongoing work on behalf of the students of Alaska.

Sincerely,

Kurt Fredriksson
Board Chair

Brian Holst
Executive Director

RESOLUTION of the Board of Directors in support of State of Alaska Senate Bill 84
"An Act relating to funding for high school vocational education as a component of funding for public schools; increasing the base student allocation used in the public school funding formula; and providing for an effective date."

Resolution 04-11

WHEREAS, U.S. jobs that demand technical training are growing five times faster than those requiring no technical training. *(National Math & Science Initiative)*

WHEREAS, by 2018, it is projected that 90% of U.S. occupations will require either a bachelor's degree or a combination of college-level technical courses and employer sponsored technical training. *(US Bureau of Labor Statistics)*

WHEREAS, since 2007, JEDC has developed a robust STEM program to support STEM education in 23 school districts across the State which includes teacher professional development, providing an array of summer and after-school enrichment programs, developing and subsidizing the cost of over 750 classroom science kits.

WHEREAS, providing designated funding for vocational education, which has a strong connection to STEM curriculum will further advance JEDC's objectives in the area of workforce development.

WHEREAS, forward funding increases in the per-student base level appropriation will assist school districts across the state to develop sound fiscal plans in an era of rapidly rising costs.

WHEREAS, Senate Bill 84 provides an increase to the per-student base level appropriation for education and provides funding for vocational education.

WHEREAS, Senate Bill 84 is a legislative priority for many school districts across the state, large and small, rural and urban.

NOW, THEREFORE, BE IT RESOLVED THAT:

On this 15th day of Marcy 2011, the Board of Directors of the Juneau Economic Development Council hereby authorizes JEDC to issue appropriate letters of support for Senate Bill 84.

Board President

The Honorable Joe Thomas
Alaska Senate
Co-Chair Senate Education
State Capitol, Room 514
Juneau, Alaska 99801

Dear Senator Thomas

I am writing to urge endorsement of SB 84 by the Education Committee and its forwarding to Finance and eventually the Senate floor. Like virtually all Alaska School Districts we in Sitka are facing major budget shortfalls this year. On a budget of just under $17 million, needed to simply maintain the present program, we are facing a deficit of $1.3 million. Without relief we are facing significant layoffs of teachers and significant increases in pupil-teacher ratios and possible deletion of whole academic programs. SB 84 by increasing the BSA by $110 for FY 2011-12 will help though not solve the problem especially when coupled with the proposal to create categorical funding for Vocational Education. Though we in the educational community have always been somewhat leery of categorical funding, we recognize that dollars going into the 20% Block Grant for Special ED, ESL, Gifted & Talented, & Vocational ED are being siphoned off almost exclusively by Special ED due to federal mandates and leaving Vocational Education seriously short funded; this at a time when it time when its importance is being increasingly recognized.

Thank you to you personally and the committee as a whole for introducing the legislation. It has our strong support.

Sincerely,

Thomas L. Conley

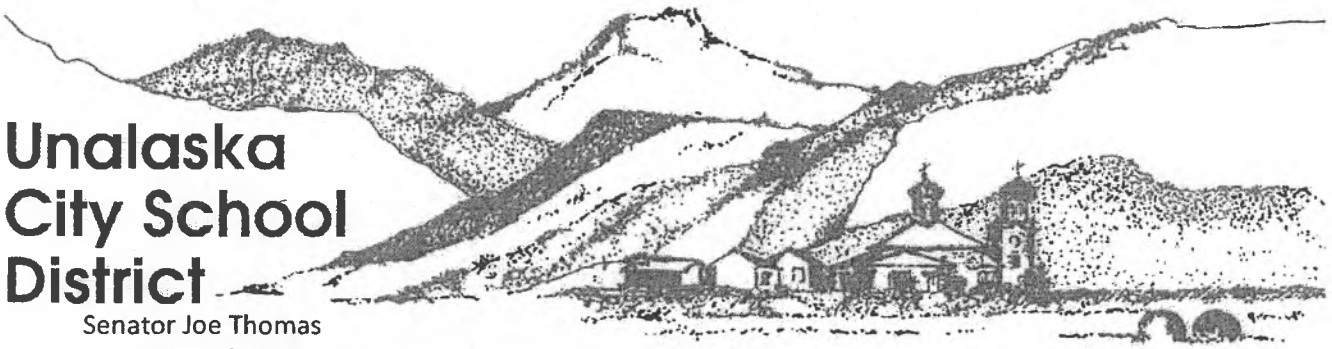
Senator Joe Thomas
State Capital Room 514
Juneau, AK 99801

Dear Senator Thomas:

On behalf of the Board of Education and Administration of the Klawock City School District, I would like to express our support for SB 84.

The passage of SB 84 would address three major concerns of our school district namely increasing the BSA, forward funding, and funding for vocational education.

As a small rural school district we are especially vulnerable to rising "fixed" costs. We are particularly concerned about the cost of energy. We have been recently told by our supplier to expect significant increases in the cost of heating fuel, propane, and gasoline. Clearly world events have a direct impact on our energy budget. In addition, insurance costs continue to increase. We realize that Klawock is not unique in this situation. However, due to the size of our budget (generally less than $3 million) we have an especially difficult time absorbing these costs.



SB 84 also affords us the opportunity to do a better job of sound financial planning. Knowing the Base Student Allocation for the next three years provides school districts with needed information to strategically plan programs, budgets, and staffing, providing for a more efficiently run school district.

For years the Klawock City School District has struggled to keep a quality vocational education program alive. Fortunately due to dedicated staff, creative funding, and the commitment of the Board of Education, our students have been able to enjoy an excellent, though small program. SB 84 provides us with the opportunity to expand our program by increasing course offerings while staying committed to excellence.

SB 84 is an excellent piece of legislation that will decrease the financial burden caused by rising prices, allow for better planning of programs and resources, and allow students opportunities to participate in quality vocational education programs that will help them transition from secondary school to post-secondary training and the Alaska workforce. Therefore, we fully support SB 84.

Sincerely,

Richard E. Carlson
Superintendent

Unalaska City School District

Senator Joe Thomas
State Capitol Room 103
Juneau, AK 99801

February 22, 2011

Dear Senator Thomas,

I am writing on behalf of the Unalaska City School District (UCSD) Board of Education in support of Senate Bill 84. SB 84 provides a modest increase to the Base Student Allocation (BSA) for each of the next three fiscal years and funding for a separate grant program within the foundation formula for high school vocational education. This bill allows school districts to plan their budgets and programs for at least the next three years with greater certainty.

Knowing the education funding outlook for the next three years will enable UCSD to plan for the implementation of additional high school courses needed to meet the eligibility requirements for the Governor's Alaska Performance Scholarship (APS) program. Specifically, the District seeks to hire an additional high school teacher so that students have access to the rigorous core curriculum required for eligibility for the APS.

The vocational education funding component of SB 84 will enable UCSD to build capacity within its Career and Technical Education programs. UCSD would utilize the additional vocational education funding to upgrade equipment, technology, and shop and classroom facilities. The District would expand its Tech Prep Program to include career paths other than welding, which is the only Tech Prep program presently offered through a partnership with UAF.

Like many school districts throughout the state, UCSD is faced with significant budgetary challenges due to rapidly rising health insurance and utilities costs. The increases to education funding proposed in SB 84 would allow UCSD to meet these rising costs and implement programs that fulfill the Governor and legislature's mandates to keep students in school, provide rigorous curriculum, and prepare students to enter Alaska's workforce.

Sincerely,

John P. Conwell

Sen.Joe.Thomas@legis.state.ak.us

Dear Senator Thomas,

Southwest Region School District (SWRS)D, as well as other school districts across the State, is in need of a funding mechanism that allows for a proactive approach to annual budgeting, as well as one that provides adequate funding to meet the needs necessary to educate each of our 634 students. Thank you for your sponsorship of Senate Bill 84 that will raise the Base Student Allocation (BSA) gradually over the next three years. SWRSD also concurs with the Bill's effort to establish a separate grant program within the foundation formula to provide support of high school vocational education.

By creating a forward funding mechanism, SWRSD is able to anticipate future budget allocations during the budget planning process. As with any process that requires stakeholder input, the knowledge of the actual amount of the BSA allows the District to more accurately anticipate its revenues so that each community may provide comment on a more complete proposed budget. This also allows staffing patterns to be set well before the recruitment and selection process so that personnel resources may be more accurately identified.

The additional funds that are provided in SB84 will help to cover the continually rising costs of insurance and energy. As these non-instructional items' costs continue to rise, our instructional program is impacted either through shortages in staff or the reduction in teaching materials in the classroom.

Thank you for your attention in this matter.

Sincerely yours,

Lee Ann Andrew

The Honorable Joe Thomas
State Senate
Capitol Building, Room 103
Juneau, AK 99801

February 24, 2011

Dear Senator Thomas,

I am writing in your support for your important education-funding proposal, Senate Bill 84. I would encourage action on this important legislation raising the BSA from the current $5,680 per student to $5,790 in July 2011, and then to $5,905 in 2012 and to $6,025 in 2013. The increases will be affordable to the state and important to the quality and stability of public education. It will help stabilize the ability of school districts to plan for the future rather then guessing from year to year.

I also support the portion of Senate Bill 84 that proposes the state fund a separate grant program within the foundation formula for high school vocational education. This is an investment that will help keep students in school and be prepared for Alaska jobs upon graduation from high school.

Sincerely,

Charlene Arneson, President
Chugach School District Board of Education

CC: Senator Joe Thomas, co-chair, Education Committee

Subject: Support for SB84

Honorable Sen. Joe Thomas,

As superintendent of DCSD, I am asking for your support to increase the funding for Alaskan schools. As an educator I sincerely appreciate the past funding efforts from our state legislature and hope you continue to assist us. I know you are aware of the ever increasing costs in locations like Dillingham for such items as fuel for energy, rising insurance costs, the need to offer competitive compensation to attract and retain rural teachers, and things as simple as the cost of a loaf of bread. More importantly is the need we have to improve the academic performance of our kids. As a district faced with not meeting AYP, being a level 5 designated school, and recognizing we need to do a better job of meeting the SBA's of the Alaska standards we have begun major initiatives for improvement. We are moving to a standards based instructional program implementing research based best practices for our district. This year we have implemented the DEED recommended model for a universal screening assessment-Measured Academic Performance program, Response to Intervention, curriculum alignment to ensure we are teaching the AK Standards in all assessed areas, and volunteered as one of 16 school district participating in the new school improvement process known by the acronym of STEPP. One result of our efforts has been the identification that we need an additional reading specialist to help our teachers and kids with interventions for success. Without some increase in funding we will not be able to make even this modest effort to help our staff and kids. We are showing gains in our students using the processes I have noted and feel confident that your investment in the kids of Dillingham will not be wasted. We are showing positive results and with a little more help we can move our students ever closer to meeting the standards of Alaska.

Respectfully,

Bill McLeod,
Superintendent of Schools DCSD

State Capitol, Room 103
Juneau, AK 99801

Senator Joe Thomas
State Capitol, Room 514
Juneau, AK 99801

Dear Senators Meyer and Thomas:

On behalf of the Anchorage School District, I want to thank you for co-sponsoring Senate Bill 84. This legislation would insure that the Anchorage School District, and all other districts in the State, would be able to plan responsibly for the next three years, and would allow us to make much needed improvements to our Career and Technical/Vocational Education Programs. I applaud your leadership on this important issue.

The past three years of advance planning for education has allowed the Anchorage School District to advance their efforts in meeting our goal of graduating more of our high school students with a diploma, and reducing the drop-out rate. The efforts of the Joint Education Funding Task Force (JEFTF), chaired by Representative Mike Hawker and Senator Bert Stedman, have made a significant difference in our ability to plan ahead and we are grateful to the legislature and the governor for successful implementation of the three-year forward funding. Even with those significant increases, the Anchorage School District still had a $12 million budget gap in the general fund to maintain current programs, pay for negotiated salary and benefit increases, pay for increased utility and fuel costs. The gap was NOT necessitated by our use of the ARRA (federal stimulus funds), but rather the ongoing general fund costs.

We still have a long way to go to insure that our students are college and/or career ready when they leave the Anchorage School District. We are very appreciative of the legislature's strong support for increases to the Base Student Allocation (BSA), the Intensive Needs Factor, and to pupil transportation. We are also supportive of the phased-in Area Cost Differential for all districts, even though Anchorage does not receive any funding under this part of the education formula. The increases to the Intensive Needs factor has allowed the ASD to use our general fund resources for non-special education students and programs for the first time; we are very grateful for that as many of our over 900+ Intensive Needs students require extra-ordinary services to meet the requirements of their Individual Educational Plans (IEP's).

We support Senate Bill 84's three year increases to the BSA as a way to assist districts in meeting the costs of inflation, fuel and energy cost increases, and to

allow us to retain important programs and staff who are key to increasing our graduation rate over time. We believe the proposed increases are reasonable for the State of Alaska in support of quality education. We know that we must increase the rigor of our course offerings in order to meet the challenges of the Alaska Performance Scholarship; we have a graduation task force reviewing our requirements and soliciting input in where to make needed changes. The additional funding will allow us to retain our effective teachers while keeping class sizes reasonable so our students receive quality education.

The Anchorage School District is also increasing our Career and Technical/Vocational Education offerings in order to better meet the needs of our non-college going student population. We have made great strides in this area at all of our comprehensive high schools, as well as at the King Career Center. We have strong partnerships with Alaska General Contractors, Alaska Works, and CITC at our Construction Academy at the King Career Center. We have incorporated upgrades to our high schools and middle schools in order to offer more CTE courses at home schools, as well as the King Career Center in our upcoming school bond election. Having additional funding to support the necessary teacher positions and the professional development required will go a long way to meeting the needs of our students in this vital area of 21st century education so all of our students are eligible for the Alaska Performance Scholarship for either college and/or career and technical training.

Again, I thank you for your leadership in bringing Senate Bill 84 forward. I urge the Senate Education Committee to hold hearings on the legislation and move it forward to Senate Finance and then hopefully to the floor for a vote of the Senate. At that point, I hope that a similar bill will have worked its way through the House for passage and eventual reconciliation in a joint conference committee.

Please do not hesitate to contact me at comeau_carol@asdk12.org or 907-742-4312.

Subject: Support for SB 84

Subject: Support for SB 84

Dear Senator Thomas,
I want to offer my strong support for Senate Bill 84, an important education funding proposal. This legislation would make a huge different to our district for the following reasons:
1. It allows us to plan three years in advance, 2. it allows us to hire and retain the best teachers with certain funding, 3. it will allow us to keep programmatic staffing including our interventionists who work with children to make sure they meet the benchmarks by third grade, and 4. would allow us to continue our vocational ed programs and add to our successful construction academies.
Our district, the Kenai Peninsula Borough, has worked diligently to cut unnecessary costs. We have an energy incentive plan at each school in the district where students and staff work to decrease energy costs. We have rebid our copy contract to reduce paper copy costs. We took a tough look at our budget and eliminated unnecessary budgeted funds from several different areas. We still have no full time librarians in any of our 44 schools as a result of cost cutting measures in the past several years.
Our district is currently looking at a deficit of $3.5 million for next year - about 42 teachers.
We really appreciate your sponsorship of SB 84.
Sincerely,
Sammy Crawford

Senator Joe Thomas
Alaska State Senate
State Capitol Building
Room 514
Juneau, Alaska 99801-1182

Dear Senator Meyer and Senator Thomas,

I am writing on behalf of the Kenai Peninsula Borough School District (KPBSD) to comment on Senate Bill 84; thank you for your part in sponsoring this legislation. The KPBSD strongly supports passage of this bill and encourages the legislature to give it priority status so that it is considered well before the end of the legislative session. Our urgency for this consideration is due to the timing of our issuance of contracts.

KPBSD prides itself on being fiscally prudent and financially efficient. During the state's previous education fiscal plan that increased the Base Student Allocation (BSA) by $100 each year, we made significant improvements to our students' learning opportunities. We used this new money to expand our vocational offerings, add interventionists to help our struggling students and increase the number of counselors to help students from dropping out. We are preparing a brochure that highlights the positive effect of our improvements; I will share this with you when I am Juneau next week.

KPBSD's FY12 budget is based on rolling forward our existing level of service. With the BSA at its current level and our borough's contribution holding steady, we expect that our FY12 revenue will be 3.5 million dollars less than our budgeted expenditures. The proposed increase to the BSA that is included in SB84 will approximately cut this deficit in half.

I look forward to sharing the mentioned brochure with you and thank you for considering this encouragement to pass SB84.

Sincerely,

Steve Atwater, Ph.D.
Superintendent

Subject: SB 84 VOC ED FUNDING/BASE STUDENT ALLOCATION

RE: Senate Bill 84 VOC ED FUNDING/BASE STUDENT ALLOCATION

Senator Thomas,

Thank you for supporting adequate funding for education. Cutting funding should not be a reaction when student performance does not instantly jump the next year after adequate funding is made available. Because there was more funding last year does not make up for all the compounded lack of resources over the years.

Children are not like cars: You can't pour more "gasoline" in one year and have that jumpstart the stalled vehicle. These little human "vehicles" have to have years of fertilizer, watering and proper pruning which builds on each year until the "plant" is mature and bears fruit.

It is not so different from plants that start out healthy and are later neglected. It is even better if you start working with "the little plants" at a very early start just after they can stand, say at about 3 or 4 years. Even if you give them a good first start, they will wither when you withhold adequate support (funds). They may never completely pull out of their withering just because you invest more dollars one year. They may instead forever bear the marks of neglect.

Look at the little stunted trees along the windswept areas of highway. You can see some that struggled to get through a hard period and survived and some have fallen. Think also of the trees in areas where they always had good growing in a rich soil and protected area. They stand proud and tall. That is not so different from our school children.

Please make sure the education funding level stays at the highest level possible. Also make sure that all children have the kind of education that meets their needs.

A good portion of children need to have Vocational Education. In fact, I am one who believes that all children need to have broad exposure to all kinds of learning. All children need to know how to do basic vocational and home economics skills that will aid them in taking care of themselves and their homes in the future. Some will discover that is an area where they do their best work and others will have some very useful skills that they will find handy all their lives.

Sincerely,

Doris Robbins

Subject: Support for SB84

Dear Chairman Meyer and Chairman Thomas,

Thank you very much for your introduction of SB 84. As the Vice President of the Anchorage School Board and the President of the Association of Alaska School Boards, I can testify to the fact that the increases to the BSA in SB84 will be of great benefit to the Anchorage School District as well as the other school districts in our state.

This week the Anchorage School Board passed a Six Year Fiscal Plan. Two projections in the plan show that if revenues to our district remain status quo or are increased by $100 to the BSA and by one and a half percent from our local tax base, the Anchorage School District will have a $54 - $101 million gap within six years in order to continue to deliver the services to our students that we currently do. Please keep in mind that Anchorage does not benefit from any implementation of the Cost Differential factor but must rely on an increase to the BSA for any relief to the effects of inflation on our educational programs.

Both from the perspective of the Anchorage School District and that of the Association of Alaska School Boards, the addition in SB 84 of targeted funding for vocational programs would be well received. The Association of Alaska School Boards has a resolution crafted and supported by our membership that promotes separate funding outside of the block grant that can be specifically focused on technical/ vocational improvements in our districts. Over the past few years the Anchorage School District has made significant strides in providing greater technical/vocational opportunities to our students and many districts are making similar efforts geared toward helping our students become more prepared for careers and post-secondary education. It is important to continue to improve and expand in our vocational offerings in all of Alaska's school districts and this bill will be very valuable toward that end.

The Anchorage School District has a graduation rate of 70% and has a drop out rate that has been under the 4% mark for the past several years. We have worked diligently to make those improvements and will continue to do so. Passage of SB 84 with the increases to the BSA and the vocational funding program will go a long way toward helping us meet those educational goals and allow our students to be more successful.

Thank you again!

alasbo@gci.net

February 21, 2011

Alaska State Senate Education Committee
The Honorable Joe Thomas and the Honorable Kevin Meyer, Co-Chairs

Senators,

We are writing in support of a new multi-year plan to increase the base student allocation (BSA) in the K-12 foundation funding formula. This type of multi-year plan appears in **SB 84 – Base Student Allocation Increase and High School Vocational Education Funding.**

The Alaska Association of School Business Officials (ALASBO) represents school business professionals from across the state, many of whom are responsible for budgeting and financial planning for their districts.

The multi-year increases to the Base Student Allocation applied during the years FY09-FY11 had a profound effect on the focus of the budget dialogue in school districts across the state. Instead of concern primarily about budget cuts to keep our heads above water, stakeholders participating in the budget process were able to plan instructional programs over a multi-year period. Although education is a long-term project, we can see that these efforts are already beginning to bear fruit, to the benefit of Alaskan students.

ALASBO members also know very well that school districts need regular funding increases to function effectively, in order to keep up with the increases in health insurance, energy, wages, benefits and other costs that are a reality in our current economy.

We believe that a multi-year funding plan for the BSA is one of the most effective actions the Legislature can take to promote continued improvement to the quality of instruction across the state. We'd like to see our districts focus on instructional planning, rather than the debilitating distraction of pink slips and the uncertainty of cuts to promising programs each spring.

We urge your support for a new multi-year funding plan for the Base Student Allocation. Please contact ALASBO Executive Director Amy Lujan using the contact information above if we can provide further assistance to your efforts.

Sincerely,

Luke D. Fulp
ALASBO President

Senator Joe Thomas
State Capitol, Room 514
Juneau, AK
99801

Dear Senators Meyer and Thomas:

Thank you for coauthoring SB84. The provisions of this bill would insure our school district's ability to continue building our capacity to provide a higher quality and more relevant education for our students. The recommendations of the Joint Education Funding Task Force (JEFTF) that met in 2007 and were incorporated into law made a huge contribution to our ability to do our jobs. We have had three years in which we've been able to more accurately budget. Consequently, we spend more time dealing with educational issues rather then trying to anticipate different funding scenarios. This has been huge for us. We have been able to work our strategic plan. We've focused on improving our reading and math curriculum and instruction. We've added additions to our Career and Technical/Vocational Education program. We've improved services to our "high needs" students.

We know that keeping kids in school so they don't drop-out, but continue through and graduate, includes several crucial factors. First they need to have high quality, highly skilled teachers who care about them. Second, they need a strong core curriculum. Third, they need immediate and effective interventions to help them catch-up and keep-up when they are behind. And forth, they need options and relevance in their classes. All these things help them connect to school and experience the success they need that will result in their graduating.

With the rising cost of energy and the consequent increase in goods and services, being able to continue our efforts for our children depends on the provisions SB84 encompasses. We thank you for leading the way in addressing the important issues we face and offering what we feel is a good solution that will allow us to continue our important work in partnership with the legislature, our local government and our immediate community.

Thank you,

Michael Byer
Superintendent, Haines Borough School District

HAINES BOROUGH SCHOOLS

P.O. Box 1289

Haines, Alaska 99827

A Resolution Supporting the Passage of Senate Bill No. 84 Submitted by the Senate Education Committee on 2/4/11

"An Act relating to funding for high school vocational education as a component of funding for public schools; increasing the base student allocation used in the public school funding formula; and providing for an effective date."

Whereas, The Alaska Legislature in 2008 passed HB 273 that put into effect the recommendations of its own Joint Legislative Education Funding Task Force that were based on a reasoned and deliberate discussion of important issues to public education in the state; and

Whereas, these recommendations included 1) forward funding of districts with yearly additions to the BSA, 2) funding the actual costs of "intensive needs students," 3) providing a "hold harmless" provision for districts with dramatic enrollment decreases, and 4) implementation of the "District Cost Factor;" and

Whereas, this legislative support has greatly assisted districts to do early forward planning and provide better educational services to students; and

Whereas, the need for forward funding, vocational education and the other provisions within HB 273 continues on; and

Whereas, Senate Bill No. 84 addresses these important concerns and continues the crucial support already begun by the legislature for the next three years; and

Whereas, flat funding will cause reductions in educational services and further constrain our district's capacity to meet the diverse needs of all students, each of whom are essential for Alaska's future;

THEREFORE BE IT RESOLVED, we respectfully request that Senate Bill No. 84 be passed by the Alaska State Legislature and signed into law by Governor Sean Parnell.

PASSED AND APPROVED this 16th day of March 2011.

Senator Joe Thomas
Co-Chair Senate Education Committee
Alaska State Legislature

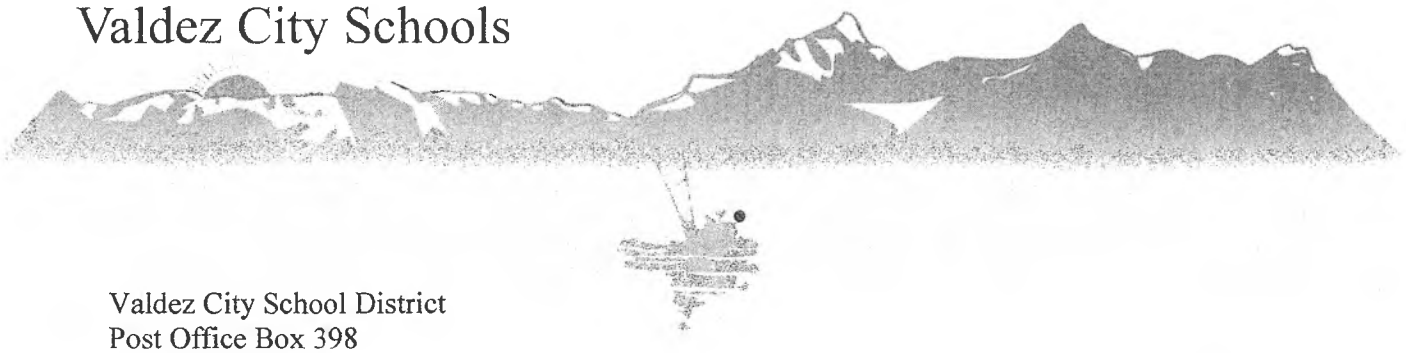
Dear Senator Thomas,

I am writing in support of SB 84 Vocational Education Funding / Base Student Allocation. We in Petersburg have been experiencing declining student enrollment. Our school has stepped up to the challenge and is reducing staff and making fiscally sound changes to our program.

However two items that continue to increase are heating fuel costs and health insurance costs. Through contract negotiations we have significantly increased the medical deductible which lowered our insurance costs however they are increasing again for next year and continue to be a large portion of our budget. Our elementary school (Stedman Elementary) built in the late 60's has single pane windows and uninsulated walls. It is on the DEED CIP list however energy needs receive a low ranking under the current system so it remains far down the list. The high heating fuel costs are hitting us hard.

We are currently projecting a budget shortfall for 2012 of $177,000. An increase to the Base Student Allocation as proposed in SB 84 would not eliminate our shortfall but would be a significant help. Forward funding is extremely beneficial as it allows the School District to make decisions on staffing (job or no job) and programs in a timely manner.

The Vocational Education Funding portion of SB 84 is particularly important. In Petersburg we need more electricians, plumbers, cooks, welders, and the list goes on. We are shortchanging our community and our students by not offering more training in the vocational trades.



Petersburg is a great school with a very low drop out rate, high graduation rate, and high rate of students passing the HSGQE. However funding continues to be a real challenge, passage of SB 84 would greatly benefit our school district and community.

Thanks,

Jean L. Ellis

Re: Support of Senate Bill 84

Dear Senator Thomas:

On behalf of the Valdez City School District Administration, Board of Education, and Staff Members we wish to thank you for your sponsorship of Senate Bill 84. This funding is helpful to our school district in many ways: 1. It allows us to strategically plan for the next three years; 2. It allows the continuation of many new and innovative programs for students; 3. It allows the VCSD to consider the expansion of current highly desired programs.

Over the last few years the VCSD has worked hard to expand and create additional learning opportunities for students. We currently have many programs that are unique to Valdez and we would like to be able to expand on those successes. We have forged a very strong collaboration with Prince William Sound Community College and we are able to offer many concurrent enrollment options for our students. We also are working together with industry professionals to not only prepare our students for college, but also prepare them of the workplace upon graduation.

The VCSD strongly supports Senate Bill 84 and we encourage swift passage to allow us to plan for the future.

Thank you,

Jacob Jensen, Superintendent
Valdez City School District

March 11, 2011

Alaska State Senate Education Committee

The Honorable Joe Thomas and the Honorable Kevin Meyer, Co-Chairs

Senators,

On behalf of the Lake and Peninsula School District I am writing in support of Senate Bill 84 - Base Allocation Increase and High School Vocational Education Funding. The multi-year increases applied during the past several years were very helpful in our strategic planning process. SB 84 proposes a similar multi-year plan.

Along with the ability to plan ahead financially, SB 84 also gives districts much needed funding increases that allow us to better respond to rising costs. In the past several years LPSD has experienced dramatic increases in medical insurance and utility costs. The yearly increase to the base allocation formula allows us to respond to such increases without cutting educational programs.

While the rest of the country is cutting teachers and educational systems are faltering, this is a positive step for Alaska. A sustainable, stronger education system is sure to be the result. On behalf of my Board and School District, I urge your support for multi-year funding of schools.

Sincerely,

Ty Mase

Subject: SB 84 and CSSB 84
Importance: High

Dear Senators Meyer and Thomas and Senate Education Committee members:
I was unable to testify on SB 84 and CSSB 84 this morning due to an emergency death of one of our staff over the weekend. I did want to comment on this important proposed legislation.

First, and foremost, I want to thank all of you for your long-time support for public education; our students, staff, and families have truly benefitted from the past three years of increased funding in the Base Student Allocation, the Intensive Needs factor, and in Pupil Transportation. The increased funding has allowed us to fully pay for our over 900 Intensive Needs students from the increased funding, and not to have to divert other general education funding to provide these required intensive services. In addition, it has allowed us to keep up with the inflationary costs of education. By knowing our funding levels for three years, we were able to more effectively plan to our instructional programs and student needs, as well as negotiate reasonable collective bargaining agreements.

I urge you to support either SB 84 or CSSB 84 with the three years of incremental increases to the Base Student Allocation as well as the increase of a specific factor for career and technical education. For too long, our funding in the block grant which assists us with our bilingual eduation, special needs, gifted, and career and techical/vocational education funding has been used up with the needs of our bilingual (English Language Learners) and special needs students with little left to enhance our career and technical education. Our school board has prioritized career and technical education for the past three years, and we are seeing significant increases in student interest and participation in these courses. We have elements of C and TE in all three bond propositions on our April 5 ballot. We have added C and TE opportunities in our after school and summer school programs due to student interest. We believe that more funding in this vital area will assist us in providing more classes for our students, and thus increasing the graduation rate, and decreasing the drop out rate.

Again, we urge you to support SB 84 or the CSSB 84 in this legislative session. It will make a significant difference in the quality of education for our students.

Thank you,
Carol Comeau
Superintendent

Subject: Support for SB 84

Senator Meyer and Senator Thomas,

Thank you for taking the time to consider support for SB 84. As a secondary special education teacher, I urge you to support SB 84. Often times the students I work with thrive in vocational educational programs and having specific funding for such programs would ensure that students who don't always thrive in traditional classes, can feel success and build employability skills through vocational education programs. I also urge you to support the increase in base allocation for student funding. Being able to anticipate student allocations for the next few years, will help administrators in the budget process. Please continue to support districts throughout Alaska by providing the funding that we need to continue to build and maintain successful programs for our students.

Thank You,
Wendy Jacobsen

Subject: SB 84-BSA increase is needed for improvement to education

Dear Senate Education Committee,

I am a parent of three children in Juneau. One is in college at Dartmouth College and two are in high school. I am also the President of the Arts For Kids board, which has tirelessly fought to keep the arts education in place in the Juneau School District. Our non-profit was instrumental in getting an elementary art program into our school district, after 25 years of having no elementary art across our district.

In looking at our school district, I see success. My son has gone to a very competitive college from Juneau Douglas Highschool. My children are doing well at this school also. This is because the parents, businesses and legislators have also fought tirelessly to keep funding education with inflation considered and cost of fuel considered.

To say that an increase in education money is not showing higher graduation rates, so why fund more money is foolhardy.

Our state must keep up with inflation rates and the rising cost of fuel alone, let alone the cost of drug counselors, high school counselors, art, physical fitness, and the four main core area of study,

If the legislators choose not to do this, then you will pay for incarceration rates, and adults that do not function in this society that is changing at a overwhelming rate. We want our kids to run the government in the future and we must continue to fund them to have this happen. Schools are continuing to look at ways to get test scores up. But you cannot go on test scores and graduation rates alone. You must look at the students that have succeeded and ask yourself why??? I feel it is because the legislature has continued to forward fund education, so our rates of success are not going down.

Simply put, you can feed a kid fruits and vegetables, which cost more than an unhealthy diet of cheerios and Mcdonalds. It simply cost alot to keep up with technology, abuse in the families, fitness and serving our children, that encompasses educating the whole child.

Please see that an increase to our district will keep all the programs that make a child happy and succeed. If this BSA is not increased our district will lose an art elementary specialist that services 2,000 children. This program alone is amazingly sucessful and creates learning with both sides of the brain. I could send lots of info that proves this. We will also loose a high school counselor. My son would never have made it to Dartmouth without a counselor that had time to help him in his high school carreer, but also help him get through the rigorous college application process. We will also loose our elementary EL program. You may think "oh, these smart kids will do fine without this," but studies show

that kids drop out of school that do not have their needs met with EL. These kids are considered special education because they have many needs to survive making it to adult life. I have raised three of these kids, and they have developed in a positive way due to this program.

Please make the right choice and forward fund education. We should have the best schools in the nation; since we don't, we need to let the educators try and still find success with a population base that is so diverse and facing so many issues.

Thank you for your work on this and continued effort on the part of our citizens.

Whenever I write to people I say that I am representing 200 voices because most people are afraid to contact the legislators. The average person on the street thinks that there voice is not heard and actually not worthwhile. They don't see that it matters. I have listened to 200 voices on my own that have relayed what I have said to you in this email.

Sincerely

Shelagh Sands a concerned parent.

Subject: SB 84 CTE support!

Dear Senator Thomas,

My name is Julye Neel and I am the Principal at Hanshew Middle School in Anchorage. I've learned that the Senate Education Committee is preparing to take public testimony on SB 84 increasing the Base Student Allocation and funding for vocational/career and technical-education. I'm so pleased to hear that.

This funding would support the work of educators with students through expanded CTE programs such as programs that currently exist successfully at Hanshew and our local Service Hgh School. Currently, Hanshew offers Applied Technology, directly preparing students for high school and the construction trades, Family Consumer Science directly preparing middle school students for Service High's Pro Start program, Business Education that prepares students for business courses such as accounting and marketing at the high school. We working on offering a course next year that prepares students for Service High's Bio Medical Academy. This purpose and goal would be to prepare students for the many career opportunities in the health field.

The increase in funding will support professional development for educators so that we can continue to support student and community interest. I believe that the CTE programs are relevant to students and their future more than ever before.

Thank you for your time and consideration. Please consider this an invitation to visit our school and learn more about the opportunities we are currently providing for students.

Sincerely,
Julye Neel
Hanshew Principal
Hanshew Middle School

Subject: SB84 K-12 funding

Senators,

I support SB84 but think that it needs to be amended to provide increases in the BSA of $170, 175 and 180 in FY2012, 13, and 14.

My reasons are:
1) The increase you are proposing doesn't even cover the increase the MatSu Borough District has incurred in health insurance expense this year.
2) Our schools need to do a better job of educating students in order to be competitive on the world market. You can't expect better performance without better funding.
3) The increase you are proposing (1.9%) is less than the 10 yr average for inflation of 2.8%. With the price of oil going up, expenses will increase, especially for rural districts which are disproportionately impacted by increases in the cost of diesel and transportation expenses.
4) We can afford it. House Finance passed a budget with a 5.2% increase in spending. A 5.2% increase in the BSA would be $295. Certainly, under those circumstances we can afford a 3% increase for k-12 education.
5) Due to borough ordinance which confiscates 50% of the year-end fund balance of the MSB School District, the MatSu Boro SD has no reserves into which it can dip to cover budget shortfalls.
6) If you can consider giving TWO BILLION DOLLARS to the oil companies with nothing in return, you can give $50 million more to our children who will be supporting more seniors than any other generation of Americans.
7) This is starvation funding. Our children deserve more than a 1.9% increase.
8) Without an increase the MatSu Boro Sch Distr will have to lay off about 35 teachers and class sizes will go up 4 to 6 students.

Thank you for consideration of my concerns,
Anne Kilkenny

2012 LEGISLATIVE SESSION

BILL NO. CSSB086(JUD)

Analysis

This legislation provides additional protections to seniors and other vulnerable adults. The proposed changes in the vulnerable adult statutes add the concept of undue influence as a potential harm. This bill provides additional legal and investigatory tools to the department in order to respond to reports of harm and establish protective services to individuals who need them. There is no fiscal impact anticipated.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB086

Analysis

This bill will enhance the legal protections against fraud and financial abuse available to elders and vulnerable adults. The Office of Public Advocacy wishes to highlight two portions of the bill that will provide new emergency procedures to protect vulnerable adults who may be served by the agency's Elder Fraud or Probate practices.

In Section 7, the bill creates two emergency judicial proceedings to stop and prevent financial exploitation of vulnerable adults. The first is a process for the appointment of temporary conservators. This will allow the court to impose emergency conservatorships to assist vulnerable individuals with their financial affairs to prevent imminent waste or fraudulent dissipation of their estates.

The second creates a process for the imposition of financial protective orders. Individual victims or other concerned parties will be able to apply for the protections of 20 day ex parte protective orders to stop or prevent financial exploitation. The initial ex parte order may be extended for up to six months after notice and a hearing at which the respondent may be heard.

This bill also provides for expanded reporting of financial abuse and enhanced penalties in criminal cases when there is an elderly victim. Additionally, the bill criminalizes violations of the financial protective orders.

The agency does not believe that this will result in significant cost increases to the agency. Accordingly, the Agency is submitting a zero impact fiscal note.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 86

Analysis

This bill adopts 20-day and six-month protective orders for vulnerable adults who are victims of a financial fraud, and a temporary conservatorship process when the need exists during the pendency of a regular petition for conservatorship. The bill also expands the list of mandatory reporters of harm to a vulnerable adult, adds the harm of undue influence, and expands the investigative powers of the Office of Adult Protective Services, including the authority to issue subpoenas, conduct interviews and examine financial and health care records. The bill also amends the crime of violating a protective order by adding the crime of violating a protective order issued to protect a vulnerable adult under AS 13.26.180 or 13.26.209. Violating a protective order is a class A misdemeanor.

There is no anticipated fiscal impact to Department of Law.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB086

Analysis

This bill treats AS 13 protective orders in the same manner as stalking, sexual assault, and domestic violence protective orders under AS 18 and will require the development of new protective order forms with substantial collaboration between DPS, the Alaska Court System, DHSS, the Office of Public Advocacy, and the Department of Revenue. The findings and orders for these new AS 13 protective orders will differ from the AS 18 orders in the existing protection order registry, which address violence and domestic violence situations.

Once the forms are developed, APSIN programming changes will be required to accomodate new fields and types of information required. A separate version of the APSIN central registry must be developed to accomodate these new orders. Note: these new orders do not meet the necessary criteria for entry into the national registry of protection, stalking and sexual assault orders (NCIC) because they do not necessarily involve physical violence.

Programming and analysis for APSIN changes will require 280 hours of contractual work @ $100/hr to evaluate and make recommendations regarding statewide implementation of new processes and procedures for entering and maintaining these new orders into existing APSIN. Additionally, 40 hours of contractual work (at $100/hr) will be required to integrate these new orders into APSIN.

Statewide training will then be required on the new forms and APSIN procedures. Statewide training costs are included.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB086

Analysis

This bill makes several changes to AS 13.26 and AS 47.24 concerning vulnerable adults. It adds fraud as a reason that might necessitate a converatorship, and as a basis for seeking an ex parte financial protective order. This bill also adds the concept of undue influence to the list of reportable harms and adds certain individuals as mandatory reporters of harm to vulnerable adults. Finally, this bill expands the investigatory authority of the Adult Protective Services Office.

Passage of this legislation will have no fiscal impact on the division.

2012 LEGISLATIVE SESSION

BILL NO. CSSB86(JUD)

Analysis

This legislation creates a crime of violating protective orders of victims 65 years or older. Violation of this law does not require a mandatory arrest and therefore would have little to no impact on the Department of Corrections.

There is no anticipated fiscal impact to the Department of Corrections.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 86(JUD)

Analysis

Committee Substitute for Senate Bill 86 (JUD) makes several changes to the statutes that govern protective proceedings. Two of those changes will likely impact the court system, though the extent of the impact is too speculative to support a fiscal note and, in any event, may not be felt immediately.

Sections 8 and 10 allow for temporary conservators to be appointed within 72 hours of the filing of the petition and section 10 further allows for ex parte protective orders when a person believes that an order is necessary to protect a vulnerable person from fraud.

The court's experience with temporary guardianships (AS 13.26.140) and ex parte protective orders in other contexts suggests that passage of this bill will result in more cases being filed that must be heard on short notice. If that increase becomes significant, and it likely will in the future, the court system may need to return to the legislature for additional funding. At this point, however, the number of conservatorship petitions filed each year is not great enough to warrant a fiscal note.

Re: SB 86

Dear Senators:

I am writing to voice my strong support for Senate Bill 86. I can tell you from firsthand experience how urgently our state needs the strengthened protections this bill offers for vulnerable adults.

The Long Term Care Ombudsman is authorized under AS 47.62 and AS 47.24 to investigate and resolve complaints made by or on behalf of older Alaskans in long term care facilities. In Fiscal Year 2011, our office received 824 complaints, a 70% increase in complaints as compared to FY 2010. Every week we conduct investigations in facilities all across Alaska, resulting in substantiations of abuse, neglect, exploitation, or violation of basic human rights.

Most frustrating for us are the cases of financial exploitation. Perpetrators can drain seniors' assets before the State has time to complete investigations and substantiate wrongdoing. Our current statutes do not give the State the authority it needs to freeze financial transactions for the protection of vulnerable seniors. I believe that SB 86 will remedy that problem. No senior should end up on a Medicaid waiver because his assets were stolen by unscrupulous individuals.

Thank you for giving SB 86 your careful consideration for the good of Alaska's most vulnerable citizens.

Sincerely,

Diana Weber

Re: SB 86 "Protection of vulnerable adults"

Dear Senators:

The Office of the Long Term Care Ombudsman investigates and resolves complaints made by, or on behalf of, older Alaskans in long term care facilities. In the first seven months of FY 2011, our office received 13 complaints alleging financial exploitation of seniors in assisted living or nursing homes. These cases can involve a family member or caregiver

- exerting undue influence over a senior's decision-making to access bank accounts.
- charging the senior for services and goods he or she did not receive.
- failing to provide a senior with needed care, so as to save the "family" inheritance, or
- forcing a senior to sign over deeds on houses or land.

While 13 cases may not seem significant, even a few instances of exploitation of seniors can lead to hundreds of thousands of dollars in lost assets.

The frustrating thing about these cases is that the exploitation happens so quickly that the State cannot step in fast enough to preserve the seniors' assets. Not only is it wrong for seniors to be taken advantage of in this way, but once the seniors' assets are gone, Medicaid or General Relief pick up the cost of the care. The State is essentially footing the bill for these losses.

I support SB 86, especially the provisions for financial protective orders, emergency conservatorships, and the addition of "undue influence" as a reportable harm. I hope you will give your support to this bill and protect our older Alaskans from financial predators.

Sincerely,

Diana Weber, MS

Senate Judiciary Committee
Alaska State Capitol, Room 417
Juneau, AK 99801-1182

RE: SB 86 (Governor Parnell)--Support

Dear Chair French:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the Senate Judiciary Committee to support SB 86, sponsored by the Senate Rules Committee at the request of Governor Parnell.

The aging of Alaska's population, particularly the growth in the numbers of our citizens over age 75, presents unique challenges for our criminal justice system.

The National Center on Elder Abuse indicates that 23.4% of substantiated reports of mistreatment of older adults were financial exploitation, another 17% was physical abuse, and 32.5% was caregiver neglect. Emotional/verbal/psychological abuse accounted for 23.6% of the substantiated reports and sexual abuse/other accounted for 3.6%.

Elder abuse occurs without reference to race, religion, income, education, place of residence, or living arrangement. It is real and, unfortunately, all too common.

Detecting and preventing elder abuse involves increasing awareness among the general public and professionals.

Although SB 86 addresses the problems of abuse and exploitation on minors, we will focus on the benefits that we perceive will help older Alaskans.

The bill identifies "mandated reporters." This is very significant and will undoubtedly stop people from "looking the other way" and will also protect them from reporting incidents that might involve supervisory staff over them.

SB 86 also creates vehicles for new emergency procedures to allow courts to immediately protect individuals from financial abuse with temporary conservators and financial protective orders.

Unfortunately there are incidents of trusted advisors like guardians, agents under durable power of attorney, and other fiduciaries who have also committed elder abuse. Adding the concept of "undue influence" should help address this issue.

SB 86 also requires cooperation with Adult Protective Services, DHSS training of investigators, and mandates release of relevant financial and health records necessary for an investigation.

Will SB 86 prevent all elder abuse? No. But it will go a long way in preventing it and punishing those who commit it. It's a strong bill that will help vulnerable older Alaskans, younger Alaskans with disabilities, and minors.

AARP requests an "AYE" vote on SB 86.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Subject: Support for SB 86, Protection of Vulnerable Adults

Dear Chair Stedman & Chair Hoffman:

The Alaska Commission on Aging (ACoA) is pleased to offer our support of SB 86, a bill sponsored by the Senate Rules Committee at the request of Governor Parnell, to enhance protection of vulnerable older adults and persons with disabilities against acts of abuse and financial exploitation. As the number of older Alaskans continues to increase, especially those of the "oldest old" (age 85 and older), so has the number of substantiated reports of harm to Adult Protective Services (APS), the Office of Long-Term Care Ombudsman (OLTCO) and the Office of Elder Fraud and Assistance (OEFA). Legislation is needed to increase safeguards for vulnerable adults who are at increased risk of abuse and financial exploitation. Older people with dementia and other cognitive impairments, those who are confined to their beds, and isolated seniors are particularly vulnerable to elder mistreatment.

Reports of harm against older Alaskans are on the rise. There are several factors responsible that include more awareness of protection resources, a growing senior population, and more prevalent fraud and abuse. According to data from Adult Protective Services, there has been a 90% increase in the number of reports received from FY 2009 to FY 2011. Since cases are often underreported, particularly if the abuser is a family member, it is likely that the magnitude of the problem is far greater than what is reported. Similarly, the OLTCO (2012) reports a 70% increase in the number of complaints filed about treatment of seniors in long-term care facilities over the past year.

Financial exploitation of older adults is a growing problem that may be linked to current economic times. It is sometimes referred to as a "silent crime" or a "crime of opportunity" because there are few external signs and victims are often reluctant to report the offense. In other situations, the victim may be in the early stages of dementia and not realize what has transpired.

SB 86 is a strong bill that will help prevent abuse against vulnerable older Alaskans, Alaskans with disabilities, and minors. The legislation adds two new ways to protect seniors against financial exploitation (by allowing individuals at imminent risk of losing their resources the ability to apply for an emergency conservatorship as well as a 20-day financial protective order without an attorney); provides for a broader definition of "vulnerable adult;" adds mandated reporters (such as employees of nursing homes and other health care facilities, educators, and administrative staff of educational institutions), and expands the definition of reportable harm to include "undue influence" (when a trusted individual uses their position to exploit a vulnerable adult). SB 86 also requires

cooperation with Adult Protective Services, DHSS training of investigators, and mandates release of relevant financial and health records necessary for an investigation.

The cost of elder abuse is significant. When an elder is victimized and needs services from APS, the OLTCO, and law enforcement agencies or loses his/her life-long financial assets and becomes Medicaid-eligible, the State bears the costs to provide this assistance. More disturbing is the personal cost to elderly victims where abuse often compromises a person's independence and feeling of security and can lead to depression, hopelessness, or even suicide.

Thank you for your consideration and support of this legislation. Please feel free to contact Denise Daniello, ACoA's executive director, by phone (465-4879) or email (denise.daniello@alaska.gov) should you have questions or require additional information. Thank you.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

CSSB 86 (JUD) – EXPLANATION OF CHANGES

The following is a description of the changes that have occurred between the originally introduced bill and the version before the Senate Finance Committee. These changes were adopted in the Senate Judiciary Committee. The page references refer to the current bill version.

1. The first two sections of the bill are newly added.

2. Page 2, line 18; Sec. 3. AS 11.56.740(a) – Replaced "**AS 13.26.180"** with "**AS 13.26.207**".

3. Page 2, line 23; Sec. 4. AS 11.56.740(c) - Replaced "**AS 13.26.180**" with "**AS 13.26.207**".

4. Page 2, lines 24-26; Sec. 5. AS 12.55.155(c) – this is a new section.

5. Page 2, line 30; Sec. 6. AS 13.26.165 – Replaced "**make other**" with "**issue another**".

6. Page 3, lines 3-10; Sec. 6 AS 13.26.165(1) – this paragraph was restructured to take the phrases and create subparagraphs A, B and C.

7. Page 3, line 4; Sec. 6. AS 13.26.165(1)(A) – Replaced "**which**" with **"that**".

8. Page 3, line 5; Sec. 6. AS 13.26.165(1)(B) – Added "**the minor**" and replaced "**which**" with "**that**".

9. Page 3, lines 8 and 9; Sec. 6. AS 13.26.165(1)(C) – Deleted two instances of "**that**".

10. Page 3, line 18; Sec. 6. AS 13.26.165(2) - Replaced "**which**" with **"that**".

11. Page 4, lines 6-9; Sec. 9. AS 13.26.185 – this is a new section.

12. Page 4, line 10 – Page 7, line 24 – Provisions regarding temporary conservatorships, ex parte protective orders, temporary protective orders and permanent protective orders are restructured into separate sections and the sections are renumbered. **Temporary conservatorships are now in AS 13.26.206 (pages 4-5). Ex parte protective orders are now in AS 13.26.207. Temporary protective orders; conversions are now in AS 13.26.208 (pages 5-6). Modifications, compliance and forms and fees provisions are now in AS 13.26.209 (pages 6-7).**

13. Page 4, line 22; Sec 10. AS 13.26.206(a) – Following "**attorney**" inserted "**and other persons as ordered by the court.**"

14. Page 4, line 23; Sec. 10. AS 13.26.206(a) – Inserted "**appoint an attorney for a respondent who is unrepresented to be at the hearing and**".

15. Page 5, lines 4-9; Sec. 10. AS 13.26.207(a) - Following "**against**" inserted "**a person other than the protected person. A petition filed on behalf of a protected person by a person other than the protected person must be accompanied by proof of service of the petition on the protected person or the person's attorney unless service would cause an immediate threat of harm to the best interests of the protected person and the petition includes a written explanation of the harm.**"

16. Page 5, lines 25-28; Sec. 10. AS 13.26.207(c) – Replaced "**at the end of a six-month extension if granted by the court under (d) of this section, or upon the appointment of a temporary or permanent conservator or dismissal of the petition for the ex parte order,**" with "**unless dissolved earlier by the court at the request of the petitioner or respondent and after notice and, if requested, a hearing, or on the earlier appointment of a temporary or permanent conservator.**

17. Page 5, line 29; Sec. 10. AS 13.26.208 – Replaced "**Upon**" with "**On**".

18. Page 5, lines 30-31; Sec. 10. AS 13.26.208 – Replaced "**the**" with "**a**" and following "**order**" inserted "**issued under AS 13.26.207,**".

19. Page 5, line 31; Sec. 10. AS 13.26.208 – Replaced "**extend**" with "**convert**".

20. Page 6, line 1; Sec. 10. AS 13.26.208 – Following "**order**" inserted "**to a temporary order effective**".

21. Page 6, line 2; Sec. 10. AS 13.26.208 – Following "**provide**" inserted "**to the protected person and the respondent**".

22. Page 6, lines 2-3; Sec. 10. AS 13.26.208 – Deleted "**to the respondent**".

23. Page 6, line 6; Sec. 10. AS 13.26.208 – Replaced "**extend**" with "**convert**".

24. Page 6, line 7; Sec 10. AS 13.26.208 – Following "**order**" inserted "**to a temporary protective order effective**".

25. Page 6, lines 8-29; Sec. 10. AS 13.26.209 – Subsections a-d are all new subsections.

26. Page 6, line 30; Sec. 10. AS 13.26.209(e) – Replaced "**this section**" with "**AS 13.26.207-13.26.209**".

27. Page 7, lines 1-2; Sec. 10. AS 13.26.209(f) – Following "**party**" inserted "**that has received actual or legal notice of a protective order issued under AS 13.20.207-13.26.209**"

28. Page 7, line 3; Sec. 10. AS 13.26.209(f) - Replaced "**this section**" with "**AS 13.26.207-13.26.209**".

29. Page 7, lines 7-8; Sec. 10. AS 13.26.209(f) - Replaced "**this section**" with "**AS 13.26.207-13.26.209**".

30. Page 7, lines 9-10; Sec. 10. AS 13.26.209(f) – Following "**order.**" Inserted "**As used in this section, "actual or legal notice" means delivery by mail or facsimile at the most recently known place of residence or business of the third party.**"

31. Page 7, lines 15-16; Sec. 10. AS 13.26.209(g) – Replaced "**their use**" with "**use of the forms**" and replaced "**this section**" with "**AS 13.26.207-13.26.209**".

32. Page 7, lines 22-24; Sec. 10. AS 13.26.209(h) – Replaced "**this section**" with "**AS 13.26.207, for an application under AS 13.26.208, or for a request for modification of a protective order under AS 13.26.209(a).**"

33. Page 7, line 29; Sec. 11. AS 13.26.324(2) - Replaced "**theft and related offenses**" with "**offenses against property**".

34. Page 8, line 10; Sec. 12. AS 18.65.530(a)(2) - Replaced "**and**" with "**or**" .

35. Page 8, line 15; Sec. 13. AS 18.65.540(a) – Replaced "**AS 13.26.180,**" with "**AS 13.26.207-**".

36. Page 8, line 22; Sec. 14. AS 18.65.540(b) – Replaced "**AS 13.26.180, 13.26.209**" with **AS 13.26.207, 13.26.208**".

37. Page 8, line 23; Sec. 14. AS 18.65.540(b) – Following "**under**" inserted "**AS 13.26.209,**".

38. Page 8, line 24; Sec. 14. AS 18.65.540(b) – Replaced "**must**" with "**shall**".

39. Page 8, line 27-Page 9, line 7; Sec. 14. AS 44.21.415(g) - this is a new section.

40. Page 10, line 31, Sec 19. AS 47.24.010(d) – Replaced "**their**" with "**the person's**" and replaced "**nor does it**" with "**This section does not**".

41. Page 11, lines 10-11; Sec. 20. AS 47.24.010(e) – Inserted the amending language before the deletion instead of after the deletion.

42. Page 12, line 3; Sec 23. AS47.24.013(a) – Replaced "**regards**" with "**pertains to**".

43. Page 14, lines 2-5; Sec.29. AS 47.24.015(h) - this is a totally redrafted subsection.

44. Page 14, line 9; Sec. 29. AS 47.24.015(j) - Deleted (j) in the original bill and re-lettered the following subsections accordingly.

45. Page 13, line 24; Sec. 29. AS 47.24.015(m) - Replaced "**the following:**" and (1) – (4) with "**any person**"

46. Page 14, line 29; Sec. 30. AS 47.24.016(a) - Following "**guardian,**" inserted "**conservator,**"

47. Page 15, line 7-8; Sec. 30. AS 47.24.016(a)(1) - Replaced "**divorce or dissolution**" with "**divorce, [OR] dissolution, or legal separation**" .

48. Page 16, line 5; Sec. 33. AS 47.24.017(a) - Replaced "**guardian or**" with "**guardian, conservator, [OR]**".

49. Page 16, line 19; Sec. 34. AS 47.24.019(c) - Replaced "**a family member, caregiver, guardian, conservator, attorney-in-fact, trustee, or surrogate decision maker**" with "**any person.**

50. Page 16, line 21; Sec. 34. AS 47.24.019(c) - Replaced "**a family member, caregiver, guardian, conservator, attorney-in-fact, trustee, or surrogate decision maker**" with "**person**".

51. Page 17, line 7; Sec. 35. AS 47.24.050(b) - Following "**guardian,**" inserted "**conservator,**".

52. Page 17 line 10; Sec. 34. AS 47.24.050(b) - Following "**guardian,**" inserted "**conservator,**".

53. Page 18, line 1; Sec. 37. AS 47.24.900(2)(A) - Following "**intentional,**" inserted "**knowing,**" .

54. Page 18, line 18; Sec. 39. AS 47.24.900(4) - Replaced "**means**" with "**includes**".

55. Page 18, line 28; Sec. 40. AS 47.24.900(7)(B) - Following "**deception,**" inserted "**fraud,**" .

56. Page 18, lines 29-30; Sec. 40. AS 47.24.900(7) (B) - Following "**duty;**" inserted "**in this paragraph, "fraud" has the meaning given in AS 13.26.324(1) and (2);**"

Sectional Analysis

CSSB 86 (JUD), "An Act relating to the protection of property of persons under disability and minors; relating to the crime of violating a protective order concerning certain vulnerable persons; relating to aggravating factors at sentencing for offenses concerning a victim 65 years or older; relating to the protection of vulnerable adults; making conforming amendments; amending Rules 12(h) and 45(a), Alaska Rules of Criminal Procedure, Rule 77, Alaska Rules of Civil Procedure, Rule 17, Alaska Rules of Probate Procedure, and Rule 9, Alaska Rules of Administration; and providing for an effective date."

Section 1 — inserts "vulnerable adult" in place of "elder or disabled adult" in AS 08.29.200(b) concerning reporting of harm required by licensed professional counselors. This change will make the statute consistent with similar definitional changes made by the bill. The term "vulnerable adult" more accurately defines and describes the citizens subject to protection.

Section 2 — inserts "vulnerable adult" in place of "elder or disabled adult" in AS 08.63.200(b) concerning reporting of harm required by marriage and family therapists. This change will make the statute consistent with similar definitional changes made by the bill. The term "vulnerable adult" more accurately defines and describes the citizens subject to protection.

Section 3 — makes the knowing violation or attempted violation of a financial protective order (introduced in section 10 of this legislation to protect vulnerable adults and elders) a crime.

Section 4 — amends AS 11.56.740(c), which defines "protective orders," by including financial protective orders issued under AS 13.26.207-13.26.209 to that definition. This change brings financial protective orders within the class of protective orders subject to sanction under the criminal code.

Section 5

amends AS 12.55.155(c) by adding a new paragraph (35) which makes the fact that a defendant knowingly directed criminal conduct at a person 65 years of age or older an aggravating factor at sentencing.

Section 6

amends AS 13.26.165(1) by substantively adding several new paragraphs and changes or additions in definitions to enhance protection of vulnerable persons in conservatorship proceedings as follows:

- amends AS 13.26.165 by deleting the words "make another" and inserting the words "issue another" regarding the authority of the court to issue a protection order for a protected person in conservatorship proceedings;
- creates new paragraph (A) to authorize the court to issue orders protecting a minor with money or property that needs protection or who otherwise needs protection and substitutes the word "that" for the word "which" in the authorizing language;
- creates a new paragraph (B) specifying that the authority of the court to issue protective orders extends to minors with business affairs that may be in jeopardy and substitutes the word "that" for the word "which" in the authorizing language;
- creates a new paragraph (C) ensuring that protection extends to any need to protect a minor's funds or obtain funds for a minor and deletes the unnecessary use of the word "that" twice in the authorizing language;
- amends AS 13.26.165(2)(A) by adding the word "fraud" to the illustrative list of reasons why a person may be found to be unable to effectively manage their own affairs and therefore may be in need of a conservator.

Section 7

amends AS 13.16.180(a) by adding "a person's attorney or other legal representative." to the list of persons who may petition for a conservatorship and further adds "or caregiver, the Department of Health and Social Services" to that list. This change is necessary to broaden the list of specific persons authorized to petition for a conservatorship in aid of a vulnerable adult and specifically to ensure that the Department of Health and Social Services is authorized to do so when necessary.

Section 8 — amends AS 13.26.180 by adding a new sub-section (c) to specifically authorize petitioners to request orders for temporary conservatorships upon showing that the person's money or property will be wasted or dissipated during the pendency of normal conservatorship proceedings. This change is necessary to ensure that the courts have express statutory authority to entertain and grant temporary conservatorships in urgent cases involving financial exploitation.

Section 9 — amends AS 13.26.185 to provide that that section does not apply to a petition or order for an ex parte protective order filed under AS 13.26.207 or a temporary protective order filed under AS 13.26.208

Section 10 — adds four new sections:

- New section AS 13.26.206 authorizes temporary conservatorships to provide immediate protection from imminent waste or dissipation of the person's money or property while the normal conservatorship proceedings are underway. The court is required to impose only the least restrictive orders necessary to protect the money or property from waste or dissipation. The temporary conservatorship expires as a matter of law when the full conservatorship is ordered or when the petition for conservatorship is dismissed.

- New section AS 13.26.207 authorizes a person to apply for an ex parte protection order against financial exploitation without the need for a lawyer, very similar to the authority and procedure presently authorized for domestic violence, sexual assault and stalking protection orders. The new section authorizes a third-party to file a petition on behalf of another where, for example, the vulnerable adult is incapacitated and unable to file for her or himself. The new section requires that notice of the proceedings be provided to the vulnerable adult and for service of any order issued to third-parties, such as financial institutions, at the nearest place of business, or by registering the order with the Department of Public Safety. The new section also requires the Alaska Court System to create appropriate forms for use by the public in filing for such orders and exempts such applications from court filing fees.

- New section AS 13.26.208 specifies that a party may apply and the court may convert a protective order to a temporary order effective for up to six months upon proper application, notice and hearing. That section further provides that if the court finds by a preponderance of

the evidence that the respondent has committed fraud against the victim that the court may convert the ex parte protective order to temporary protective order effective for up to six months.

- New section AS 13.26.209 specifies legal authority and procedures for applying to the court to modify an ex parte protective order issued under AS 13.26.207 or a protective order issued under AS 13.26.185 or a temporary protective order issued under AS 13.26.208.

Section 11 defines "fraud" and adds it to the list of terms defined in AS 13.26.324. The definition used is taken from that currently in statute at AS 44.21.415.

Section 12 excludes the crime of violating a protective order from the list of crimes subject to warrantless arrest in AS 18.65.530(a).

Section 13 adds financial protective orders to registry of protective orders maintained by Public Safety in AS 18.65.540(a).

Section 14 adds financial protective orders to AS 18.65.540(b), which requires peace officers to take reasonable steps to ensure that a protective order is entered into the registry within 24 hours after receipt.

Section 15 changes "theft and related offenses" to "offenses against property" in AS 44.21.415(g)(1)(B), which is part of the definition of "fraud" in the statutes governing the Office of Elder Fraud.

Section 16 adds undue influence to the list of reportable harms to a vulnerable adult. Employees of nursing homes, residential care or health care facilities and the staff of educational institutions are added to the list of mandated reporters in AS 47.24.010(a).

Section 17 requires a reporter to include the contact info of the vulnerable adult in AS 47.24.010(b).

Section 18 adds undue influence to the statute making a mandatory reporter who knowingly fails to report guilty of a class B misdemeanor (AS 47.24.010(c)).

Section 19 adds undue influence to the list of reportable harms and amends AS 47.24.010(d) to permit anyone to make a report of harm, including a mandatory reporter in the reporter's nonoccupational capacity.

Section 20 adds undue influence to the list of harms and amends AS 47.24.010(e) to require a public safety officer to report to APS within 24 hours of receiving a report of harm involving imminent risk of serious physical harm.

Section 21 adds undue influence and abandonment to the list of harms in AS 47.24.010(f), which states that a mandatory reporter's report of harm to the long-term care ombudsman or the department regarding an adult in an out-of-home care facility satisfies that reporter's duty to report under AS 47.24.010(a).

Section 22 adds two new subsections to AS 47.24.010: first, a mandatory reporter is not relieved of duty to report by reporting to supervisor. Second, if someone makes a reckless false report, that person is liable for actual damages suffered by the subject of the report.

Section 23 adds undue influence to AS 47.24.013(a), which requires the department to transfer a report of harm to the long-term care ombudsman if it involves a vulnerable adult aged 60 or older who has been allegedly harmed by a staff member or volunteer of an out-of-home care facility where the adult resides.

Section 24 adds undue influence to AS 47.24.013(b), which requires the department to investigate a report of harm involving a vulnerable adult who is younger than 60 years of age when the harm is alleged to have been committed by a staff member or volunteer of an out-of-home facility where the adult resides.

Section 25 changes the reference to "department" to "office of the department that handles adult protective services" in AS 47.24.013(c), which states what the long-term care ombudsman and the department must do when they receive a report of harm.

Section 26 adds undue influence to AS 47.24.013(d), which requires the long-term care ombudsman to give a report of harm and the result of the ombudsman's investigation to the department's central information and

referral service when the report of harm involves an adult who resides in an out-of-home care facility.

Section 27 adds undue influence to the statute that requires the department to start an investigation once it receives a report of harm that is not transferred from the long-term care ombudsman's office (AS 47.13.015(a)).

Section 28 adds undue influence to AS 47.24.015(c), which describes situations when the department must or must not terminate an investigation following a report of harm. Section 27 also changes the cross reference for the definition of fraud from AS 44.21.415 to AS 13.26.324.

Section 29 adds six new subsections to AS 47.24.015, which governs APS's investigatory power:

- (h) gives the department subpoena power to support its investigative authority, including the power to conduct interviews and examine any health care or financial records related to a vulnerable adult.
- (i) prohibits individuals from interfering with APS's investigation.
- (j) gives APS access to relevant records maintained by another division in DHSS.
- (k) allows APS to audio- or videotape an interview with a vulnerable adult if the adult has capacity and consents.
- (*l*) requires APS to train investigators of reports of harm.
- (m) defines "financial records."

Section 30 updates AS 47.24.016(a) regarding surrogate decision makers by adding new fiduciaries who may serve in that capacity – specifically, conservator, trustee, and surrogate for health care decisions under AS 13.52. It also deletes the requirement that in order for a spouse to be a surrogate decision maker, the spouse and vulnerable adult may not be living in separate domiciles. Section 29 also adds legal separation as a factor that would prohibit a spouse from being a surrogate decision maker for that spouse's vulnerable adult spouse.

Section 31 — adds undue influence to the statute that sets out the exceptions to when a person listed in AS 47.24.016(a) may serve as a surrogate decision maker (AS 47.24.016(b)).

Section 32 — adds a surrogate decision maker serving under AS 13.52.030 to AS 47.24.016(d), which describes when the department must cease providing protective service based on the consent of the surrogate decision maker.

Section 33 — adds conservator, trustee, and surrogate for health care decisions under AS 13.52.030 as individuals who may consent to the provision of protective services to a vulnerable adult and adds undue influence to the list of potential reports of harm.

Section 34 — allows the department under AS 47.24.019(c) to petition the superior court for an injunction restraining any person from interfering with the provision of protective services to a vulnerable adult.

Section 35 — amends AS 47.24.050 to add "undue influence" to the types of harm contained in confidential reports. Trustee and conservator are added to the list of individuals who may consent to release a confidential report and they are also added to the list of individuals who may not receive copies of a report if they are the alleged perpetrator. "Undue influence" is also added to the list of harms that are contained in reports of verified harms that occur in an institution that cares for vulnerable adults or that were the result of actions or inactions of a public home care provider.

Section 36 — clarifies that a person is not considered to be unduly influenced if they choose to consent to treatment by spiritual means only under AS 47.24.130.

Section 37 — redefines "abuse" in AS 47.24.900(2) to include the knowing infliction of emotional distress or fear, including coercion and intimidation.

Section 38 — redefines "caregiver" in AS 47.24.900(3) to include someone who provides some or all responsibility for the care of a vulnerable adult either voluntarily, by contract, by court order or as an employee of a business that provides care in an adult's home.

Section 39 defines "informed decision" as a decision made free from undue influence within the definition of "decision making capacity" in AS 47.24.900(4).

Section 40 redefines "exploitation" in AS 47.24.900(7) to include acts by a person in a position of trust with a vulnerable adult who obtains profit or advantage through undue influence, deception, fraud, intimidation or breach of fiduciary duty.

Section 41 redefines neglect in AS 47.24.900(9) to include the knowing or reckless failure by a caregiver to provide access to services or to carry out a treatment plan necessary to the health of a recipient. "Essential care or services include food, clothing, shelter, medical care and supervision.

Section 42 expands the definition of protective services in AS 47.24.900(11) to include services that obtain basic health care needs, financial assistance services, and protection from abuse, obtaining basic food, shelter and clothing, among others. Undue influence is added to the list of types of harm that may result in the provision of these services.

Section 43 amends the definition of "unable to consent" in AS 47.24.900(15) by adding the concept of "undue influence" and that the inability to consent includes a person's inability to perceive a loss of income or assets, eviction, and physical or mental harm.

Section 44 amends the definition of a vulnerable adult in AS 47.24.900(16) by more clearly defining what constitutes a physical or mental impairment.

Section 45 amends AS 47.24.900 by adding new paragraphs which contain definitions for the following terms:

- Deception
- Fiduciary duty
- Financial institution
- Person who stands in a position of trust or confidence
- Undue influence

Section 46 amends the uncodified law, Rule 12(h), Alaska Rules of Criminal Procedure. The court, when considering a motion for continuance of a trial date, shall consider the victim's circumstances and the effect of a continuance on the victim, particularly a victim of advanced age or extreme youth. The court's findings will be placed on the record.

Section 47 amends the uncodified law, Rule 45(a), Alaska Rules of Criminal Procedure. The courts, when considering a trial date, shall consider the victim's circumstances, particularly a victim of advanced age or extreme youth, in setting the trial date.

Section 48 amends the uncodified law by making five indirect court rule amendments enacted by Section 10 of the bill:

- amending Rule 17, Alaska Rules of Probate Procedure, to allow ex parte orders to be issued to protect persons subject to protective proceedings from financial exploitation.

- amending Rule 9, Alaska Rules of Administration, by not requiring filing fees for an ex parte protective order.

- amending Rule 77, Alaska Rules of Civil Procedure, by requiring a hearing within 72 hours of the filing of a petition for the appointment of a temporary conservator.

- amending Rule 77, Alaska Rules of Civil Procedure, by providing for a hearing on an application for a temporary protective order on 10 days notice.

- amending Rule 77, Alaska Rules of Civil Procedure, by providing for a hearing on a request for modification of a protective order on 20 days notice and for modification of an ex parte protective order on 3 days notice.

Section 49 amends the uncodified law by indicating that Sections 3-5, 46, and 47 of the bill apply to offenses committed on or after the effective date.

Section 50 amends the uncodified law by adding revisor's instructions to change the catch lines of AS 47.24.010 and AS 47.24.013.

Section 51 amends the uncodified law by adding a new section which indicates that the enactment of portions of Section 10 of the bill, having to do with ex parte orders, are contingent upon a two-thirds vote of each house on Section 48 of the bill, referencing court rule amendments.

Section 52 provides for an effective date of September 1, 2011 for sections 16 and 20 of the bill, the two sections that address mandatory reporters and the obligation of peace officers to report to the department within 24 hours.

Section 53 provides for an effective date of July1, 2011.

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 87

Analysis

The following is an analysis of the potential cost to implement SB 87:

Personnel Services of $180.5 is for a Grant Administrator II and III to monitor and check that applicants served are in fact eligible.

Travel of $15.0 is estimated to cover the cost of travel for monitoring the grants, employee training, marketing and outreach.

Services cost of $32.6 fro FY12 include a onetime cost of $15.0 for regulations review and adoption, and an ongoing cost of $17.6 for information technology, telecommunications, postage, printing, and building lease costs.

Commodities of $6.0 consists of onetime set up costs and ongoing standard operating supplies.

$500.0 in grant funds for FY12.

ALASKA STATE LEGISLATURE

SENATOR HOLLIS FRENCH

April 1, 2011

Senator Bert Stedman
Co-Chair, Senate Finance Committee
State Capitol, Room 516
Juneau, AK 99801

Senator Stedman,

Thank you for hearing SB 87 on March 28, 2011 in the Senate Finance committee. We appreciate the detailed review by members of the committee.

During the discussion, Senator Olson asked whether access to dental care and prescription drug coverage would be improved under the legislation. The short answer is 'no.'

Under the bill a health care provider, on page 2 lines 27-29, is defined as including a physician, osteopath, physician assistant, nurse, physical therapist, occupational therapist, or chiropractor licensed in the state and qualified to provide primary care services. At this time, due to the nature of that definition, individuals who are licensed to provide dental care in Alaska aren't eligible to receive grants under the legislation.

On page 2 lines 5-6, the legislation requires a grant application to provide 'adequate proof that a grant is necessary to enable the applicant to provide increased primary care services to seniors.' Given the reference to services at the end of this section, supplementing payment for prescription drugs wouldn't be permissible under the current language.

If you or members of the committee have any questions on these points, please let my office know.

Sincerely,

Senator Hollis French

Sponsor Statement

SB 87 – Grants for Seniors' Medical Care

Our Medicare system is broken in Alaska. Too many seniors cannot find a primary care doctor. Physicians who do accept Medicare patients are losing money with each visit, as the cost of providing care exceeds the federal reimbursement rate.

We can't wait for the federal government to fix Medicare; instead, we need to act today. This legislation will immediately improve seniors' access to primary care services in Alaska.

SB 87 establishes a grant fund for health care providers serving Alaskans who are sixty-five years of age or over. The grants will be paid to medical providers that increase primary care access for Alaska's seniors. All health care providers - including physicians, nurse practitioners, and physician assistants - would be eligible for grants.

Access to primary care improves health outcomes and reduces medical costs. Instead of waiting for small ailments to become serious problems, primary care prevents expensive medical treatments. Instead of requiring an emergency room visit, primary care keeps our seniors healthy.

Without this bill, doctors can't afford to provide seniors with these crucial preventative services. For most primary care visits, a physician receives $60 less from Medicare than they receive from private health insurance. In some instances, physicians lose well over $100 per visit.

This legislation is an ounce of prevention that will prevent the need for a pound of cure. It makes fiscal sense. Our seniors have paid into the Medicare system all their life. I urge your support of this legislation, to make sure that our seniors receive the care that they deserve.

March 5, 2011

The Honorable Dennis Egan, Chair
Senate Labor & Commerce Committee
Alaska State Capitol, Room 510
Juneau, AK 99801-1182

Subject: Support for SB 87, Medical Care for Seniors Grant Program

Dear Chair Egan:

The Alaska Commission on Aging (ACoA) is pleased to offer our support of SB 87, a bill sponsored by Senator French, to establish a grant program in the Department of Commerce, Community and Economic Development for eligible health care providers who serve older Alaskans insured by Medicare to improve their access to primary care services focusing on areas with a high percentage of medically underserved populations and in communities where seniors have been challenged to find a provider who accepts Medicare insurance.

Alaska continues to lead all states in the rate of growth of people age 65 and older; they number 52,263 according to 2009 estimates from the Alaska Department of Labor. Not only are Alaska seniors growing in number but they are living longer, many with chronic medical conditions and physical disabilities, and require more health care. At the same time, Alaska has a growing shortage of primary care physicians and other health care providers who are preparing for retirement.

In recent years, seniors living in Anchorage, the Mat-Su Borough, and Fairbanks have reported difficulty finding primary care physicians who will accept Medicare patients. Recently, ACoA conducted a statewide survey of seniors as part of our efforts to develop an assessment of senior needs that will be used in developing the new four-year plan for Alaska Senior Services, FY 2012-2015. More than 3,000 Alaskans age 50 years and older responded to the survey of whom 2,395 were age 65 years and older. Thirty-one percent of respondents 65 years and older reported having problems finding a primary care doctor. In examining the Medicare refusal issue by region, we found that access to primary health care is most likely to occur in the Anchorage area where one in four seniors responding to the survey reported this problem. Three other regions also reported this barrier to primary care – Fairbanks and the Interior; Southcentral and the Aleutians – where 16% of the respondents from each region noted trouble finding a primary care doctor in their community to care for them. In addition, survey respondents rated health care and financial security as the two priority concerns for seniors.

The ACoA supports SB 87 to improve access to primary health care for older Alaskan Medicare beneficiaries. Limited access to primary care puts older persons at greater risk of developing serious health conditions that could have been abated with timely medical care. Many older Alaskans are struggling to keep up with the rising costs of health care, which threatens their health and financial security. Thank you for your consideration and support of this legislation. Please feel free to contact Denise Daniello, ACoA's executive director, by phone (465-4879) or email (denise.daniello@alaska.gov) should you have questions or require additional information.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Sincerely,

Denise Daniello

How Hard Is It for Alaska's Medicare Patients to Find Family Doctors?

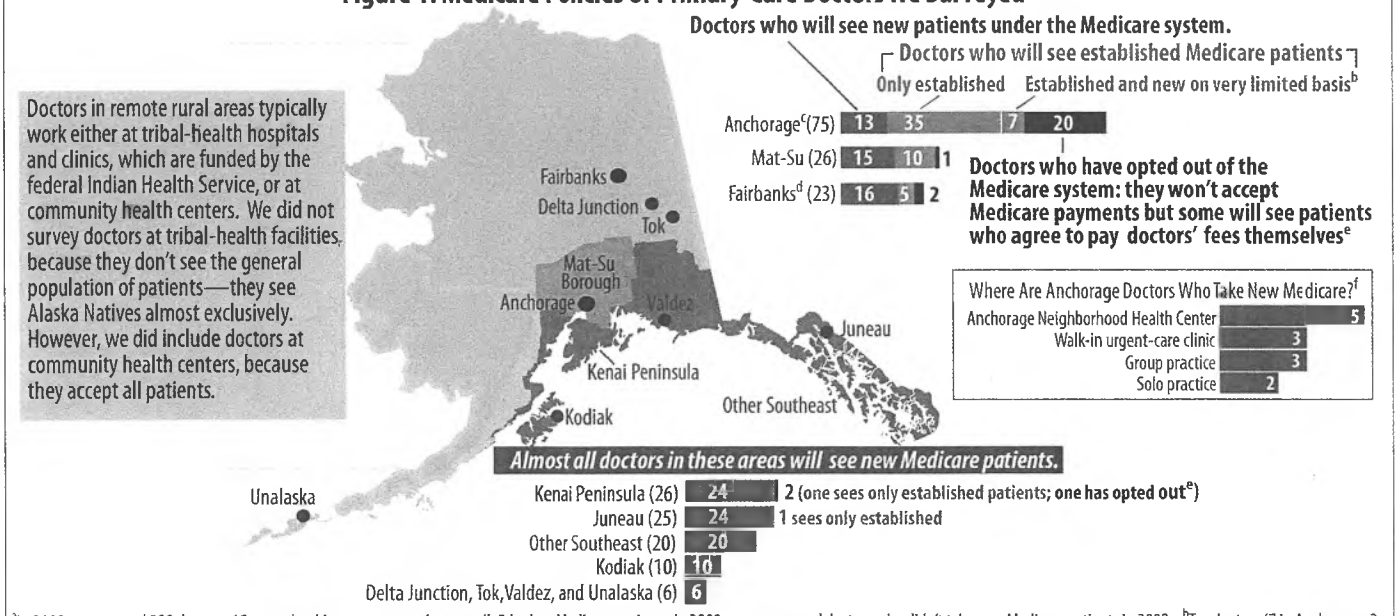
By Rosyland Frazier and Mark Foster

UA Research Summary No. 14 • March 2009
Institute of Social and Economic Research • University of Alaska Anchorage

In the past few years, Alaskans have been hearing reports that some primary-care doctors won't see new Medicare patients. Medicare pays these doctors only about two-thirds of what private insurance pays—and that's after a sizable increase in 2009. But most Americans 65 or older have to use Medicare as their main insurance, even if they also have private insurance. Just how widespread is the problem of Alaska's primary-care doctors turning away Medicare patients? ISER surveyed hundreds of doctors to find out—and learned that so far there's a major problem in Anchorage, a noticeable problem in the Mat-Su Borough and Fairbanks, and almost no problem in other areas.

Medicare is the federal health insurance program for older Americans and for some younger people with disabilities. At issue is what Medicare pays primary-care doctors for their services—not what it pays for other medical costs. Alaska's 50,000 Medicare enrollees are almost all in the "fee for service" plan, which pays doctors standard fees for their services.*

Why is it so worrisome if primary-care doctors won't see Medicare patients? These are the doctors who provide broad care, track patients' overall health, and coordinate care with specialists. That's very important for older people, who often have various medical problems and chronic conditions. And the number of Alaskans over 65 is growing fast—it's expected to double in the next 15 years.



To learn how hard it is for older Alaskans to find primary-care doctors, in 2008 we tried to survey all those who could see the general population of Medicare patients. We were able to interview 229 doctors or their staffs—about 85% of those we tried to reach.

But Medicare payments for Alaska doctors increased in 2009, thanks to efforts of Alaska's U.S. senators. So we recently called back the doctors who had told us they weren't taking new Medicare patients. None of them had opened their doors to significant numbers of new Medicare patients. Four said they now see a very limited number of new Medicare patients, under special circumstances. Two doctors in a joint practice who still didn't see new Medicare patients had hired a nurse practitioner who did.

It's certainly also possible that without the 2009 increase, even more doctors would have decided not to see Medicare patients. Figure 1 shows what our 2008 and 2009 surveys found.

- *It's mainly doctors in Alaska's larger urban areas who are declining to see new Medicare patients.* But that's where the majority of older Alaskans live. Most doctors (even in Anchorage) will still see established patients—that is, patients they've seen in the past.
- *Almost all doctors in smaller communities take new Medicare patients.* Rural places have few doctors—so doctors probably feel more of an obligation to see all patients. For patients (Medicare or otherwise) in rural Alaska, the challenge is more likely to be recruiting and keeping doctors.
- *One in ten doctors we surveyed has opted out of the Medicare system.* Most are in Anchorage. They will not accept Medicare payments, but some will see patients who agree to pay the entire doctor's bill themselves.
- *The Anchorage Neighborhood Health Center,* which accepts all patients, saw twice as many Medicare patients in 2007 as in 2001. It has become the only choice for many of Anchorage's Medicare patients.
- *Medicare patients are not relying more on emergency rooms,* if figures for Providence Hospital's emergency room in Anchorage are typical. Numbers of Medicare patients there haven't changed much in the past several years.

Figure 1. Medicare Policies of Primary-Care Doctors We Surveyed[a]

[a]In 2008 we surveyed 229 doctors; 15 weren't taking any new patients at all; 3 had no Medicare patients. In 2009 we re-surveyed doctors who didn't take new Medicare patients in 2008. [b]Ten doctors (7 in Anchorage, 2 in Fairbanks, 1 in Mat-Su) accept a few new Medicare patients under special circumstances, but don't typically see new Medicare patients. [c]Includes Eagle River/Chugiak. [d]Includes North Pole. [e]See Figure 9. [f]See page 3.

*Nationwide, 21% of beneficiaries have enrolled in Medicare Advantage programs—which means they become members of private health plans, and Medicare then pays the plans a set monthly amount for each Medicare enrollee.

Survey of Primary-Care Doctors

We surveyed only primary-care doctors. So far there hasn't been any sign that specialists are declining to see Alaska's Medicare patients—not surprising, since Medicare tends to pay them closer to private-insurance rates.

We first had to determine how many doctors fit our survey criteria: those who currently practice general, family, or internal medicine at least 20 hours a week and who could see the average Medicare patient, if they chose to.

About 700 primary-care doctors are licensed in Alaska, but most aren't available to see the general population of Medicare patients. Hundreds work for government agencies, are in public health, or see only specific groups (Figure 2).

Among those who didn't fit our criteria are doctors working for tribal-health facilities that provide Indian Health Service programs for Alaska Natives. These doctors do see Alaska Native Medicare patients.

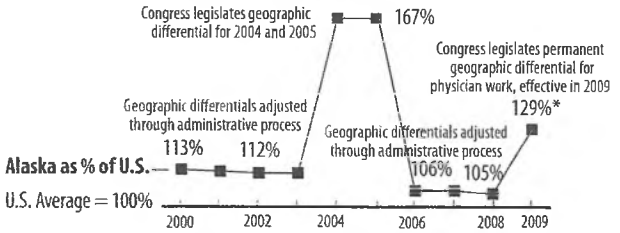
We estimated that 264 doctors were left, after we took out those who didn't fit our criteria. In 2008 we tried to reach all 264. We were able to talk with about 85%—229 doctors or their staffs. We asked them to tell us their policies for seeing Medicare patients and to rank reasons why they might be limiting or turning them away. The top reason they cited was "inadequate reimbursement"—that is, Medicare payments aren't enough to cover the costs of seeing patients.

We also followed up, in 2009, with doctors who had told us in 2008 that they weren't taking new Medicare patients. We reached all but two.

Figure 2. How Many Primary-Care Doctors Are Available to See Medicare Patients?
(Among Alaska Doctors Practicing General, Family, or Internal Medicine at Least 20 Hours per Week)

[a]We excluded pediatricians and obstetrician-gynecologists, who are often included in definitions of primary-care doctors, because they don't routinely see older patients. [b]About 42 doctors were not at the addresses and phone numbers in the medical directory. We tried but weren't able to find them, and we assume they have left the state or are not practicing [c]We excluded doctors working for tribal-health organizations, the military, the Veterans' Administration, and Planned Parenthood, because they don't see the general population of Medicare patients. Doctors who work for tribal-health facilities do see Alaska Native Medicare patients. [d]We interviewed either doctors or members of their staffs.

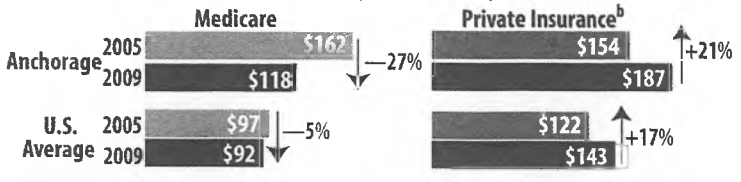
Medicare Versus Private Insurance



The federal Center for Medicare and Medicaid Services (CMS) calculates Medicare payments for doctors under a complex formula that takes into account geographic differences in costs around the country. Alaska's doctors have historically been paid more than the U.S. average for seeing Medicare patients.

The CMS formula actually includes three geographic differentials: one for "physician work" itself, one for doctors' costs of operating practices, and one for doctors' costs of carrying liability insurance.

In 2008, Congress set the Alaska geographic differential for "physician work" at 50% above the U.S. average, effective in 2009. Alaska's U.S. senators Lisa Murkowski and Ted Stevens were instrumental in gaining that increase for Alaska doctors. But combined with the other differentials—set by CMS—the overall Medicare geographic differential for Alaska doctors in 2009 is 29% above the U.S. average. Figure 3 shows the differential since 2000.



- *From 2000 to 2003, the geographic differential for Alaska doctors was about 12% above the U.S. average.* That differential was set entirely under CMS's administrative process.
- *In 2004 and 2005, the differential for Alaska doctors jumped to 67% above the U.S. average.* Ted Stevens, at that time Alaska's senior U.S. senator, spearheaded the legislation that led to the substantial but temporary increase. In those two years, Medicare paid Alaska doctors as much as private health insurance (Figure 4).
- *After that legislation expired, the Medicare differential dropped sharply,* to about 5% above the U.S. average from 2006 to 2008.
- *In 2009, the cost differential for Alaska doctors climbed to 29% above the U.S. average,* due to new federal legislation—as we just discussed. But Medicare still pays doctors less now than it did in 2005 (Figure 4).
- *Medicare pays about two-thirds of what private insurance pays, in Alaska and on average nationwide.* (But in the adjacent markets of Washington state, Medicare pays 68% to 75% of what private insurance pays.)
- *That nationwide gap helps explain why more Medicare patients are having trouble finding doctors.* Recent national surveys sponsored by the Medicare Payment Advisory Commission found that 17% of Medicare patients in the U.S. had "a big problem" finding family doctors in 2007, up from 13% in 2005. Alaska may be the harbinger of a national trend.

Figure 3. Medicare Geographic Cost Differential* for Alaska Doctors

*This is a weighted average of three geographic cost differentials the Center for Medicare and Medicaid Services uses in a complex formula that determines what doctors are paid. One of those is the differential for "physician work," and Congress set that at 150% of the U.S. average for Alaska doctors, effective in 2009. But the other differentials–for physicians' costs of operating their practices and for carrying liability insurance—are set by CMS and can vary from year to year.

Figure 4. Medicare and Private Insurance Payments[a] To Primary-Care Doctors, Anchorage and U.S. Average, 2005 and 2009
(New Patient, 30-Minute Visit)

[a]Figures include the amount Medicare or private insurance pays and the amount the patient pays. [b]Median payments
Source: Ingenix National Fee Analyzer

Where Are the Medicare Patients?

• *Nearly 70% of non-Natives over 65 live in Anchorage, the Mat-Su Borough, and the Fairbanks area.* Figure 5 shows only where older non-Natives live, because older Alaska Native patients have access to doctors through tribal-health care facilities. For them, the issue is not that doctors won't see them but that there may not be enough doctors, especially in rural areas.

Who Accepts Medicare Patients?

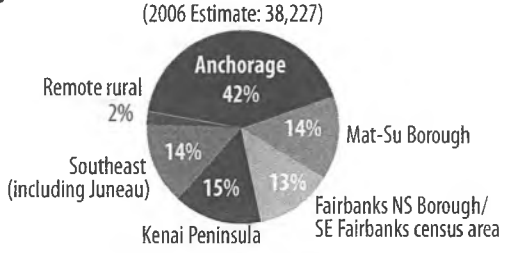
Besides the doctors who will see new or established patients, some doctors have made another choice: they've opted out of the Medicare system. They don't accept any Medicare payments (see Figure 9), but some will see Medicare patients who agree to pay the doctor's fee themselves. Patients who can do that have more choices. But for those who need Medicare to help pay the bill, the access problem is the worst in Anchorage.

• *We found only 13 primary-care doctors seeing the general population of new Medicare patients in Anchorage.* Of those, 3 were at walk-in, urgent-care clinics, which mostly just treat minor injuries and illnesses (Figure 1).

• *Five of the 13 Anchorage doctors seeing new Medicare patients in 2008 were at the Anchorage Neighborhood Health Center.* That's one of dozens of federally funded community health centers in Alaska. There are hundreds more across the U.S. These centers are open to everyone, but they are mainly for medically "under-served" groups of people—poor and uninsured, for instance—or areas of the country without adequate local medical care, like many of Alaska's rural communities.

• *The Anchorage Neighborhood Health Center is the main choice for growing numbers of Medicare patients.* Both the number of Medicare patients coming to the clinic and the percentage they make up of all patients doubled between 2001 and 2007 (Figure 6). That growth did flatten out in 2004 and 2005, when Medicare paid doctors at a level comparable to private insurance. But after that, the numbers climbed. (In Fairbanks, the community health center saw a similar percentage increase. In the Mat-Su Borough, a health center just opened in 2005, so data are limited.)

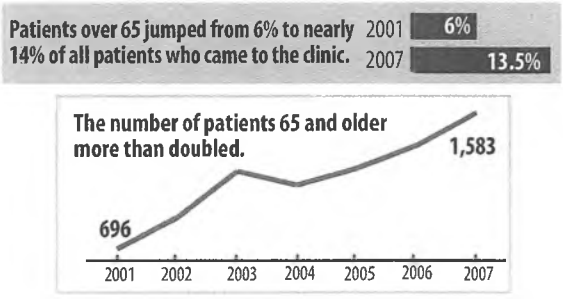
• *Until recently there was another choice for Anchorage's Medicare patients—the Alaska Family Medicine Residency Program*, where some family doctors get their final phase of training. These resident doctors see patients, and they had been accepting growing numbers of Medicare patients. But to make sure the residents see a variety of patients, the program has now capped the number of Medicare patients it accepts.



• *Anchorage's Medicare patients don't seem to be turning more to emergency rooms.* Data from Providence Hospital's emergency room show that visits by older patients have stayed mostly steady, with seasonal variations, since 2004 (Figure 7). But some health-care providers think that Medicare patients may be postponing care they need and coming in only when medical problems get much worse.

Medicare Payments to Doctors and to Health Centers

• *Medicare pays doctors and community health centers differently.* Some people believe that Medicare uniformly pays health centers more than it pays private doctors, making it more feasible for health centers to see Medicare patients. But the reality is more complex.



• *Medicare pays health centers the same fee for seeing Medicare patients for any visit, but private doctors more for longer, more complex visits.* Figure 8 compares payments for 30- and 60-minute visits with new patients, at doctors' offices and the Anchorage Neighborhood Health Center (ANHC). For a 30-minute visit, Medicare pays ANHC $119 and doctors about $95. But for a 60-minute visit, it still pays ANHC $119, but the doctors $189.

Figure 7. Visits to Providence Hospital's Emergency Room in Anchorage, Patients 65 and Older, 2004 to 2008

Source: Providence Alaska Medical Center

Figure 8. Medicare and Patient Payments to Private Doctors and Anchorage Neighborhood Health Center, 2009

[a]Patient co-pay; 20% of total payment. [b]Facility fee charged to patient, but many are not able to pay full charge. Patients with incomes up to 200% of federal poverty line pay on a sliding fee scale.

Sources: Anchorage Neighborhood Health Center; Ingenix National Fee Analyzer

• *What Medicare patients pay at health centers and at doctors' offices is also determined in different ways.* Essentially, Medicare allows the health centers to take their own fees into account when determining what patients are charged. But Medicare doesn't allow doctors to use their own fees; instead, Medicare sets a maximum allowable charge for specific kinds of visits, and patients pay a portion of that (see Figure 9).

• *Neither ANHC nor the doctors' offices necessarily collect the amounts shown in Figure 8 as payments from patients.* At ANHC, patients with incomes up to 200% of the federal poverty line are charged on a sliding fee scale. Likewise, private doctors may not always be able to collect the patient's share. And both private doctors and ANHC report losing money when they see Medicare patients.

Doctors and the System

Primary-care doctors who see Medicare patients have three choices for getting paid. Figure 9 describes those choices among doctors we surveyed.

About 85% choose the standard Medicare process ("participating"). Another 4% still work with the Medicare system but charge patients somewhat more ("non-participating"). The final 11% have opted out of the Medicare system , but will still see patients who agree to foot the bill.

Patients also pay different amounts, depending on their doctors' policies. For a service with an allowable Medicare fee of $100, patients seeing doctors who accept that fee would pay $20—but only after Medicare paid the other $80. Patients seeing "non-participating" doctors would pay the doctors $109.25; Medicare would later reimburse the patients $76, so their final cost would be $33.25. Patients seeing doctors who have opted out of the Medicare system would pay a fee determined by the doctor—perhaps a negotiated fee, but still typically more than Medicare pays.

Figure 9. How Do Alaska Primary-Care Doctors Who See Medicare Patients Deal with the System?
(Among 211 Surveyed Who See New or Established Patients)

Most doctors accept standard Medicare fees and bill Medicare. They are called "participating." Medicare sets maximum allowable charges for various services. Participating doctors agree not to charge more than the allowable rate, and Medicare pays them 80% of that. The patients (and their secondary insurance, if they have any) pay the other 20%.

A few doctors (called non-participating) can charge up to 9% more than the allowable Medicare charge. But Medicare pays less and patients pay more. Here's how it works. The patient pays the entire bill, but the doctor submits a statement to Medicare so the patient is paid for the Medicare share. But instead of paying 80% of the charge, Medicare pays only 76%. The patients (and their secondary insurance, if they have any) pay the rest of the bill.

Some doctors don't accept Medicare payments for their fees. They are said to have "opted out." They will still see Medicare patients, but patients must agree to pay a fee the doctor sets. Medicare doesn't pay either doctors or patients, and patients can't bill any secondary health insurance they may have. Remember that patients pay only the fee for the doctor. They still use Medicare to help pay hospital and other medical costs. Doctors who opt out have to re-confirm their decision with Medicare every two years. They can also apply to come back into the system after two years.

Example: How Much Would Patients Pay for a Service with an Allowable Medicare Charge of $100?

	Participating Doctors Charge $100	Non-Participating Doctors Can Charge $109.25	Doctors Who Have Opted Out Can Set Their Own Fees
Medicare pays	$80	$76	$0
Patient pays	$20[a]	$33.25[a]	Entire doctor's fee[b]

[a]Patients can bill secondary insurance to help pay their share. [b]Patients can't bill secondary insurance to pay any amount.

Sources: American Academy of Family Physicians; Government Accountability Office

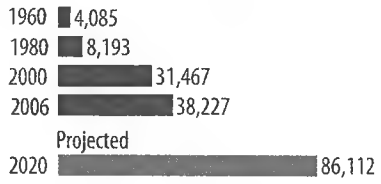
Conclusion

With few exceptions, Americans 65 or older who are retired have to use Medicare as their primary insurance—even if they also carry private health insurance or have retirement benefits that include health-care coverage. Any other insurance they have can *only* be used to help pay *their share of the allowable Medicare charge*. They can't use private insurance to pay doctors more than Medicare allows.

As more Alaskans turn 65, the access problem will get worse, unless something changes. Growing numbers of Medicare patients around the country are also reporting access problems. And the American College of Physicians has reported that a nationwide shortage of primary-care doctors is looming—which would make the problem even worse.

This summary talks about just a very narrow slice of the multitude of issues facing Medicare. It's one of the largest and fastest-growing federal programs, and President Obama has said reforming it will be part of his plan to improve the U.S. health-care system. How potential reforms might affect Medicare patients' access to family doctors isn't clear today.

Because Medicare is a federal program, the state's options for helping improve access are limited. But Alaskans are talking about various possibilities—like recruiting more doctors and offering them bonuses to see Medicare patients, and either establishing an Anchorage clinic for Medicare patients or expanding the Anchorage Neighborhood Health Center.



In a publication later this year, we'll look at the implications of various ways of trying to improve access for Medicare patients. We'll also report what family doctors themselves told us—how they make decisions about seeing Medicare patients and what might make them willing to see more.

ALASKA STATE LEGISLATURE

SENATOR HOLLIS FRENCH
REPRESENTATIVE LES GARA
REPRESENTATIVE LINDSEY HOLMES

March 29, 2010

To: Governor Parnell and All Members of the Alaska State Legislature

Re: Opportunity for State to Increase Access to Medical Care for Seniors

Dear Governor Parnell and Legislative Colleagues:

The recent Federal health legislation includes a provision sponsored by Senator Begich that we believe will help Alaska's seniors. It is aimed at helping Alaska solve the shortage of physicians (and other medical providers) available to seniors in many areas in Alaska. The State of Alaska will have to pass legislation to implement and take advantage of this federal provision. We hope you will consider joining us in working to pass legislation this session, though we understand the remaining time is short. At a minimum, we hope you will consider working with us so we are ready to act when the next session starts.

The Problem: While Medicare has generally provided good coverage for seniors in most places in the country, the federal re-imbursement rate formula used in Alaska under-compensates doctors, nurses and other medical providers in certain regions in the state, especially for primary care services, and for general office visits to both general practitioners and specialists.

Medicare in Alaska most severely under-compensates providers for "office visits". Since most "primary care" is offered at general office visits, and billed under Medicare's "office visit" codes, primary care providers suffer the greatest impact, and patients have the hardest time finding primary care providers to accept Medicare. Specialists, while often compensated more fairly for specialty services, are similarly undercompensated when they bill under Medicare's office visit codes, which they often must use for initial visits. Non-physician medical providers who use these codes face similar problems

Efforts to substantially revise the federal reimbursement rate have been blocked in Congress (Sen. Begich is a co-sponsor of S. 1776), though Congress did pass an important 10% increase in Medicare re-imbursement for Primary Care providers in the recent health care legislation, and expanded funding for health clinics, which have been an important provider of Medicare services in Alaska. These efforts will help ease the present problem.

January-May: State Capitol • Juneau, AK 99801-1182 • (907) 465-2647 • Fax (907) 465-3518
June-December: 716 W. 4th Avenue • Anchorage, AK 99501• (907) 269-0106• Fax (907) 269-0109
Representative_Les_Gara@legis.state.ak.us

Given the reality that a major federal re-imbursement change will continue to be difficult to pass, at least until more states face problems similar to Alaska's under Medicare, we (Reps. Gara and Holmes) began work with Senator Begich for a solution that allows states to supplement Medicare funding in areas where Alaskans were facing a medical care shortage. Historically, the federal Medicare statute has broadly prohibited states, patients or insurance companies from supplementing the Medicare reimbursement rate, and federal authorities have in the past been very strict in their interpretation of that ban. That left states like Alaska little room to help solve their Medicare problems.

The New Legislation: Senator Begich succeeded at gaining support for a provision that was added to the recent federal health care legislation. The amendment he offered provides that a state may establish a "grant" that directs payments to medical providers in areas of a state where there is a medical care shortage. The inclusion of this amendment overcomes federal agency arguments that states may not provide funds to doctors to enable them to treat Medicare patients. Any grant program, however, will likely have to be worded to benefit seniors, not just seniors who utilize Medicare. And, it must be implemented by an agency other than DHHS.

Attached is the new federal legislation, and a copy of proposed language we offer for your consideration.

Our proposed legislation establishes a grant program for medical providers who treat senior citizens in areas where seniors are currently being underserved. Grants would go, in priority, to providers who, with the grant funding, will most efficiently expand their treatment of Alaska's seniors. We would, of course, welcome ideas and welcome any efforts by others to look for their own solutions under this new federal legislation.

Sincerely,

Rep. Les Gara

The Honorable Dennis Egan, Chair
Senate Labor and Commerce Committee
Alaska State Capitol, Room 510
Juneau, AK 99801-1182

RE: SB 87 (French)—Support

Dear Chair Egan:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the Senate Labor and Commerce Committee to support SB 87, authored by Senator Hollis French.

As you are well aware, Medicare beneficiaries report that they have trouble finding a primary care physician who will see them in many parts of our state. Community health centers and some urgent care clinics will see Medicare patients but few physicians in private practice will see new Medicare patients and many inform existing patients that, no matter how long they may have had a physician/patient relationship, upon their 65th birthday they will no longer see them.

SB 87 would create a mechanism for the State of Alaska to provide grants to providers who are willing to see Medicare beneficiaries. These grants would be a supplement to what Medicare is willing to pay a primary care provider.

Medicare beneficiaries have paid taxes while they were working. They also pay monthly premiums and a deducible and co-pays for services. Having paid their fair share, they should be able to see a primary care provider, especially for preventive services. It is unfortunate that they cannot. SB 87 would be one more method to assure that older Alaskans as well as younger Alaskans with disabilities, who are also on Medicare, would be able to see a provider on a regular basis.

AARP recommends an "AYE" vote on SB 87.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 90

Analysis

SB 90 will increase the salary range of the Executive Secretary of the Board of Public Accountancy from a range 19 to a range 23.

House Bill 315, which was passed by the legislature last session and signed into law on June 10, established an Executive Secretary for the Board of Public Accountancy. The funding level provided for an Executive Secretary in the partially exempt service, full-time position, Range 23. However, the salary range was ultimately determined based on internal alignment with job classes of positions providing similar support to other boards and with job classes of positions performing professional accounting work.

Since the funding level was already approved with the passage of HB 315, the agency submits a zero fiscal note.

Sponsor Statement
SB 90 – Board of Public Accountancy Secretary

In 2010, the Alaska State Legislature unanimously passed legislation creating an Executive Secretary position for the Alaska Board of Public Accountancy. Because the Board is charged with ensuring that appropriate standards of accounting competency and practice are established and enforced in the state, a capable and qualified Executive Secretary is necessary to protect the public interest. Setting the Executive Secretary pay at Range 23 will ensure that this newly created position is paid at a rate comparable to other states and commensurate with the requirements of the job.

The pay range was developed based on market standards for the accounting industry and is the range supported by the Alaska Board of Public Accountancy, the Alaska Society of CPAs, and CPAs throughout the state. As this position is paid for directly by the licensing fees of CPAs—not the State—their wide support signals that a Range 23 is the appropriate pay for the position. Indeed, the Range 23 money is already in the current budget, having been appropriated at the time the authorizing legislation passed.

In January 2011 the Department of Administration classified this position as a Range 19. Such a pay range is not adequate considering the expertise and leadership abilities required by the position. Certified Public Accountants (CPAs) are required to have extensive technical and practical knowledge of accountancy. Enforcement cases especially can be exceedingly complex, requiring staff to have broad professional knowledge, experience and leadership skills.

In the past, the Board has been hampered by lack of capable staff. It is crucial that the Board be able to recruit and retain an Executive Secretary with the relevant knowledge and leadership ability that will allow the Board to fulfill its mission. Senate Bill 90 would satisfy that need by setting the Executive Secretary's pay range at the appropriate, competitive level.

RE: Alaska Board of Public Accountancy Position and Salary Range Draft Determination

Dear Commissioner Hultberg;

On January 19, 2011, the Alaska Department of Administration, Division of Personnel issued a draft determination for the salary range for the Executive Administrator position that was created during the 2010 legislative session by HB315. The draft determination for the position is a Range 19 (approximately $58,000 per year).

We understand that the Division of Personnel is bound to follow a prescribed process for making this determination, but believe they did not sufficiently consider important aspects of the responsibilities and requirements for the position which should be considered in order to determine the proper salary range for the position.

The Executive Administrator position was created in and all of the involved parties want it:

- The position is directly paid by licensing fees of Alaska CPA's.
- The fiscal note for HB 315 called for a Range 23.
- In developing the proposal for the bill, the estimate of costs for the new position were developed using a Range 23, based on market standards for our industry, given needed experience and expertise levels.
- These cost estimates were shared with Alaska CPA's through significant public outreach prior to the development of the bill, and creating the position was and is widely supported by the CPA community.
- The Alaska Society of CPA's, who represent the CPA's that pay the licensing fees to pay for this position, unanimously supported HB 315, and continues to strongly support the establishment of the position at a Range 23.
- The Alaska Legislature received numerous letters of support for the passage of HB 315 from CPA's throughout Alaska.
- The Alaska Board of Public Accountancy unanimously supported HB 315, and supports the establishment of the position at a Range 23.

The draft salary determination has not adequately considered the following factors, among others, that should be included in making the final determination.

The body of professional knowledge used by CPAs is vast, technical and comprehensive. Professional standards cover auditor and CPA professional and ethical conduct, federal and state taxation and compliance rules, accounting standards for for-profit, government, non-profit and a multitude of industry standards. Accountancy statutes and regulations are also complex. As a result, enforcement cases can be exceedingly complex, thereby requiring staff with a significant level of education, professional knowledge and experience in order to understand the significance of violations of professional standards. The Alaska Board has been hampered by lack of Board staff able to monitor some of the very complex enforcement cases it encounters. It is critical that the Board be able to recruit and retain an Executive Administrator with these skills. A Range 23 will allow for this to happen, a Range 19 will not.

The National Association of Boards of Accountancy significantly directs and makes changes to accountancy enforcement standards and proposed revisions to statutes and regulations in the States. They have become much more active over the past 10 years, and it is simply critical that the Alaska Board, like other boards, have adequate representation to ensure that proposals that have direct impact on protecting the public in Alaska consider our needs. We simply must be able to attract a person with the requisite experience and credentials to engage with NASBA and other state boards. Given salaries paid to the Executive Secretaries of other boards around the country, we believe that a Range 19 will not attract the level of professional that we need. Our understanding of what other Executive Secretaries are paid will result in this position being paid significantly less than others. This will greatly limit our ability to attract and retain the appropriate level of skills to work with NASBA.

The most important determinant of the State of Alaska's success through the Alaska Accountancy Board in carrying out its public protection responsibilities is the competency and dedication of the Executive Administrator and staff. The relevant knowledge and leadership ability of the Executive Administrator is particularly critical to the Accountancy Board fulfilling its mission of protecting the public. The Accountancy Board's authority, and hence its ability to protect the public, is diminished when it lacks staff with the requisite skills. While HB 315 purposely excluded the need for a licensee to hold the position, it and the regulations we created, call for someone with significant experience. We don't need someone who is licensed right out of college (like the nursing board) or with one or two years of experience. We hope to hire someone with a lifetime of experience in complex environments. In today's market for accountants, in which unlicensed, new professionals right out of college are paid $60,000 per year to start in the profession, the proposed salary will not attract a person with relevant knowledge and leadership.

We appreciate the work that you and your staff do for the State. Thank you for your consideration of this very important matter. Please let me know if you have any questions or if I can provide further information.

Sincerely,

Carla Bassler

Subject: Executive Administrator, BPA Study

Preamble:
In response to the enactment of AS 08.04.055 the Division of Corporations, Business and Professional Licensing in the Department of Commerce, Community & Economic Development requested a new position to serve as the executive secretary of the Board of Public Accountancy.

Class Analysis:
The new position is responsible for providing administrative support to Board of Public Accountancy, providing professional guidance and assistance to individuals licensed, or seeking license, by the Board; and representing the Board to other state and federal agencies, local and national professional organizations, and local and national regulatory organizations.

The state's classification plan provides for the grouping of positions into job classes when they are sufficiently similar with respect to duties and responsibilities, degree of supervision exercised and received, and entrance requirements so that: 1) the same title can be used to clearly identify each position; 2) the same minimum qualifications for initial appointment can be established for all positions; 3) the same rate of basic pay can be fairly applied to all positions; and 4) employees in a particular class are considered an appropriate group for purposes of layoff and recall. Job classes should be constructed as broadly as is feasible as long as the tests of similarity are met.

The existing job classes covering Executive Administrators of occupational licensing boards are all single-position job classes in the partially exempt service defined by their role in supporting a specific board. The agency has requested the position being created be placed in the partially exempt service. House Bill 315 did not amend AS 39.25.120 (c) or specify the service for the position it authorized; therefore, placing the position in the partially exempt service will require action of the Personnel Board under AS 39.25.130. Until the Personnel Board takes action to extend the partially exempt service the position remains in the classified service. Whether the position is in the classified service or the partially exempt service the tests of similarity dealing with entrance requirements apply. The position's requirement for professional knowledge and

skill in public accountancy, and duties and responsibilities that are significantly different than those that define and distinguish the Accountant class series, supports establishing a new job class.

Class Title:
A class title should be the best descriptive title for the work. It is intended to concisely and accurately convey the kind and level of work performed and should be brief, easily recognized, gender neutral, and understood by potential applicants.

A class study conducted in 2003 included each of the Executive Administrators of occupational licensing boards and changed their class titles from Executive Secretaries. In keeping with this practice the new job class is titled "Executive Administrator, Board of Public Accountancy."

Minimum Qualifications:
The minimum qualifications established for a job class must relate to the knowledge, skills, and abilities needed to perform the work and must not create an artificial barrier to employment of individuals in protected classes. Required training should be limited to the basic formal training that customarily prepares individuals for work in the field. Experience requirements are intended to ensure new employees can successfully perform the work after a period of orientation or familiarization. Required experience should be directly related to the actual duties of positions in the class and should not be equivalent to the work to be performed.

In accordance with AS 08.04.070(h), the Board established the qualifications for the position in 12 AAC 04.145. The minimum qualifications have been established based on the final regulation filed by Lieutenant Governor Treadwell on January 5, 2011, and effective February 4, 2011.

Class Code:
A Class Code is assigned based on the placement of the job class in the classification schematic of Occupational Groups and Job Families. Occupational Groups are made up of related Job Families and encompass relatively broad occupations, professions, or activities. Job Families are groups of job classes and class series that are related as to the nature of the work performed and typically have similar initial preparation for employment and career progression.

Based on the requirement for professional knowledge and experience in accountancy, the class is aggregated to the Accounting and Fiscal job family (PB02) in the Administrative and Office Support Occupational Group.

AKPAY Code:
AKPAY Codes are assigned to job classes for use in legacy computer systems which cannot use the six-digit Class Codes. The new class is assigned AKPAY Code K0097

Fair Labor Standards Act
An employee in the position in this study is covered by the minimum wage and maximum hour provisions of the Fair Labor Standards Act of 1938, as Amended (FLSA). The primary duty of providing professional assistance to the Board of Public Accountancy: requires advanced knowledge in the field of accounting; is in the functional areas of budgeting, finance, purchasing, research, public relations, government relations, and legal and regulatory compliance; and

includes the exercise of discretion and independent judgment in matters of significance. When compensated on a salary basis, an employee in the position is exempt from the overtime and minimum wage requirements of the Act as both a professional and administrative employee.

Salary Analysis:

The salary range of a job class is determined based on internal consistency within the state's pay plans, in accordance with merit principles, with the goal of providing fair and reasonable compensation for services rendered and maintaining the principle of like pay for like work. In evaluating internal consistency, the difficulty, responsibility, knowledge, skills, and other characteristics of a job are compared with job classes of a similar nature, kind, and level in the same occupational group and job family or related job families.

In evaluating the salary range for the new class consideration was given to alignment with other Executive Administrator job classes and the professional accounting job classes.

The executive administrators all perform the typical duties of administering their board's activities (ensuring licensing laws are properly administered; interpreting such laws for applicants and the public; planning, attending, and writing minutes/summaries of board meetings; representing the board before the media, legislature, other state agencies, other state and national regulatory agencies and professional organizations; and conducting research and summarizing results for the board's consideration). The executive administrators that do not have a statutory requirement for professional licensure under their own board's occupational area and are not required to have special expertise in the occupation are at salary range 18.

The executive administrator class that requires special expertise in the occupation licensed and in the work of the licensed professionals (the Executive Administrator, Real Estate Commission) is aligned one range higher, at salary range 19.

The executive director with a statutory requirement for licensure (the Executive Director, Board of Nursing) also has additional duties not typical of other executive administrators (supervision of staff overseeing the chemical dependency program activities and the Certified Nurse Aide program activities, as well as coordination of a statewide group working to ensure an adequate number of nurses are available to work in Alaska). These additional responsibilities, along with consideration of other nursing class in the alignment, resulted in the job class being aligned at salary range 21. (The class is in the Nursing job family and its range was changed to 23 when that job family's ranges were adjusted under the Market Based Pay Policy.)

The Executive Secretary, Board of Public Accountancy is required to possess expertise in public accountancy and apply that expertise to effectively represent the Board, provide guidance to applicants and licensees, and assist in investigations of violations by licensees. The requirement for specialized expertise indicates the Executive Secretary, Board of Public Accountancy, should be aligned at salary range 19.

In the Accounting and Fiscal job family range 19 falls between the advanced professional Accountant (range 18) and the first program administration level Accountant (range 20). The scope of responsibilities in supporting the licensing board, level of independence in decision making, and nature of decisions and recommendations, along with the level of professional

knowledge and skill in accounting required to effectively perform, corroborates the alignment at range 19.

Conclusions:
The new job class "Executive Administrator, Board of Public Accountancy" is established, placed in the Accounting and Fiscal job family, and assigned salary range 19.

The new position submitted for this review is assigned PCN 08-2111 and allocated to the new job class.

The effective date of the above actions is 02/04/2011

Additional correspondence on the allocation of PCN 08-2111 is being distributed through the OPD system.

RE: Alaska Board of Public Accountancy Executive Administrator

Dear Commissioner Hultberg;

The Alaska Society of CPAs is discouraged and concerned by the recent developments surrounding the Alaska Board of Public Accountancy Position and Salary Range Draft Determination. As indicated in the letter from the Board of Public Accountancy, this position is imperative to the functioning of our board and our profession. Our members have struggled with the lack of leadership, knowledge and consistency associated with the turnover and limitations of the licensing examiner position.

The consideration of an appropriate pay range needs to be analyzed in conjunction with our profession, as the cost of this position will be funded entirely by those CPAs licensed in the State. If no such consideration is made we risk experiencing the same frustrations as the position will not attract the necessary qualified candidates or help ensure consistency, but will likely create greater problems and frustrations in our profession and continued challenges for the State in its public protection responsibilities. If you need additional industry information to complete your analysis, I assure you there are many within the CPA community willing to provide such information.

Thank you for your additional consideration of this matter.

Sincerely,

John Rodgers, CPA
AKCPA President

STATE OF ALASKA **BILL NO.** SB 91\A
2012 LEGISLATIVE SESSION

Analysis

Senate Bill 91 extends the termination date of the licensing program for sport fishing guide and sport fishing operators from January 1, 2012 to January 1, 2013. The division has budgeted $400.0 in the FY13 Governor's budget to administer the Sport Fish operator/guide/vessel program. The program generates average Fish and Game Fund revenues of $250.0, with the balance of the program expenditures funded with Sport Fishing license sale revenue.

Senator Bert Stedman, Co-Chair
Senate Finance Committee
State Capitol, Room 516
Juneau, AK 99801-1182

Co-Chairman Senator Bert Stedman:

At the hearing on Monday, March 19th for Senate Bill 91, regarding sport fishing guide licenses, Senator Olson requested information on the penalties associated with the sport fishing guide license and reporting program.

The statutes regarding the sport fishing guide license and reporting program are contained within AS 16.40.250 – AS 16.40.299. The provisions within these statutes contain the requirements for sport fishing operator licenses, sport fishing guide licenses, reports, and the penalties associated with failing to meet these requirements. The penalty for failing to be licensed and having license documents in your possession, completing logbook requirements, submitting the logbook, and displaying guide boat decals or annual stickers are considered violations and the fines range from $100 to $200.

Also found within these statutes is language concerning a licensed sport fishing operator or guide who aids in violating a sport fishing statute or regulation. If a licensed sport fishing operator or sport fishing guide aids in the commission of a violation of AS 16.05 – AS 16.40 or a regulation adopted under those statutes, the penalty is considered a misdemeanor and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than six months, or both. Examples of such violations include sport fishing without a license, failing to adhere to bag and possession limits, and sport fishing in closed waters.

If you need any additional information on the penalties associated with the sport fishing guide license and reporting program, or if you have any more questions, please let me know.

Sincerely,

Ben Mulligan

SENATOR LESIL MCGUIRE

SPONSOR STATEMENT FOR SENATE BILL 91

"An Act amending the termination date of the licensing of sport fishing operators and sport fishing guides; and providing for an effective date."

Senate Bill 91 will ensure the continuation of Alaska's sport fish guide licensing and reporting program. Legislation authorizing the program was passed in 2004 and the program has proven beneficial to both the sport fishing industry and resource managers. With more than 1.8 million clients, 88% of whom are nonresidents, taking more than 460,000 guided fishing trips in Alaska annually; guided sport fishing has become an integral part of Alaska's tourism economy. In fact, a study commissioned by the Alaska Department of Fish and Game estimated that nonresident spending on sport fishing was more than $650 million in 2007.

Since the program's inception, an average of 1,670 sport fishing business licenses and 1,981 sport fishing guide licenses have been sold annually. 90% of license holders are Alaska residents and the professionalization of the sport fishing guide industry has benefitted both the industry and the resource. The data collected through the program provides the information state and federal managers need to sustainably manage sport fish populations. The program also allows Alaska to receive an exemption from the National Saltwater Angler Registry; a federal program that would begin levying fees for registration in 2011.

Recognizing the importance of the program, the Alaska legislature extended the program's termination date for one year in 20010; SB 91 proposes to amend the program's associated termination language in existing statutes in order to allow this valuable program to continue serving Alaskans and their valuable fishery resources.

Brief for SB 294: SPORT FISH GUIDE LICENSES
(Reauthorization of Program/Repeal of Sunset)
March 10, 2010

Alaska Department of Fish and Game Contacts:
Charlie Swanton- Charles.Swanton@alaska.gov; phone: 465-6184 or 321-0955
Jennifer Yuhas - Jennifer.Yuhas@alaska.gov; phone: 465-6137 or 388-7951.

Background:

- Original legislation passed in May, 2004; effective January 1, 2005.

- Proposed by the Department for three main reasons:
  1. Information on guide numbers and their fishing activities was either not available or limited in many parts of the state;
  2. Establish minimum standards to operate a business or contract as a guide (safety, liability insurance, US Coast Guard license, etc.) as a means to increase professionalism and reduce speculative entry; and
  3. Provide comprehensive and credible data on guided sport fishing activities to regulatory agencies: Alaska Board of Fisheries (BOF), International Pacific Halibut Commission (IPHC), and North Pacific Fisheries Management Council (NPFMC).

Legislation:

Sec.16.40.260 Sport fishing operator license;
Sec.16.40.270 Sport fishing guide license;
Sec.16.40.280 Reports;
Sec.16.40.290 Penalties for violations.

These legislative sections include licensing provisions and fees (AS. 16.05.340(a)) for sport fishing business owners ($100), sport fishing guides working for the business ($50), and business owners who are also a guide (owner/operator combo $100). The mandatory reporting requirements, logbooks, are for both fresh and saltwater guide activities (freshwater logbooks were instituted in 2005). The penalties for sport fish guiding violations by business owners and guides include possible revocation of their license.

Companion Regulations:

5 AAC 75.075 Sport fishing services and sport fishing guide services; license requirements; regulation of activities.

5 AAC 75.076. Sport fishing services and sport fishing guides reporting requirements.

5 AAC 75.077. Sport fishing guide vessel registration requirements.

Present Benefits and Utility:

- A comprehensive list of all sport fishing guides working in salt water is part of the data requirements that will allow Alaska to receive an exemption from participating in the National Saltwater Angler Registry (up to $25/saltwater angler in 2011).

- The logbook data for saltwater anglers has been used extensively within the IPHC and NPFMC for rule making on Pacific Halibut.

- Both freshwater and saltwater logbook harvest data has been presented and utilized by the Alaska Board of Fisheries. Harvest estimate verification studies are being conducted comparing logbook, statewide sport fish harvest survey, and dock side creel programs.

Participation Statistics:

- An average of **1,647 sport fishing business licenses** (including owner/operator combo) have been sold (2005-2009); 90% of owners are Alaskan residents.

- An average of **1,882 sport fishing guide licenses** have been sold (2005-2009); 73% of guides are Alaskan residents.

- Based on logbook data, over **2.1 million clients took 536,960 guided fishing trips** (from 2005 through 2009); 67% of clients fished in saltwater, 33% fished in freshwater and 88% of all clients were nonresidents.

- An average of **1,334 vessels in saltwater** were used for guided fishing trips (2005-2009).

Electronic Reporting (Modernization initiative):

- One of Commissioner Lloyd's initiatives is modernization and timely reporting of recreational harvest data. We have been actively working on this task:

    - In July, 2009 we developed a scannable saltwater logbook form which will reduce the time lag when logbook data is available from 2 to 3 months to 1 to 2 weeks. This new form will be employed for saltwater forms statewide in 2010. Ten public meetings were held across the state to explain this new format and received nearly unanimous support from user groups and public.

    - In April, 2010 the point of sale hunting and fishing licensing program will be launched at all ADF&G regional offices. This program will be made available to all license vendors shortly thereafter.

    - We will convert the freshwater logbook to a scannable format starting in 2011.

LAWS OF ALASKA

2004

SCS CSHB 452(RES)

Chapter No.
_____

AN ACT

Relating to licensing and regulation of sport fishing operators and sport fishing guides; relating to licensing and registration of sport fishing vessels; authorizing the Department of Fish and Game and the Alaska Commercial Fisheries Entry Commission to release records and reports to the Department of Natural Resources and the Department of Public Safety; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1

AN ACT

Relating to licensing and regulation of sport fishing operators and sport fishing guides; relating to licensing and registration of sport fishing vessels; authorizing the Department of Fish and Game and the Alaska Commercial Fisheries Entry Commission to release records and reports to the Department of Natural Resources and the Department of Public Safety; and providing for an effective date.

---

* **Section 1.** AS 16.05.340(a) is amended by adding a new paragraph to read:

(26) Fishing services licenses

(A) Sport fishing operator license $100

(B) Sport fishing guide license 50

(C) Sport fishing operator and sport fishing guide combined license 100

* **Sec. 2.** AS 16.05 is amended by adding a new section to read:

Sec. 16.05.395. Sport fishing vessel registration. For calendar year 2005 and subsequent calendar years, a person may not use a vessel to provide sport fishing services under AS 16.40.260 - 16.40.299 unless the vessel is registered with the department and proof of registration is attached to and clearly visible on the vessel while the vessel is used to provide sport fishing services. The department shall register vessels used to provide sport fishing services, and provide proof of registration, without charge. The department may adopt regulations as the department finds necessary to implement this section.

*** Sec. 3.** AS 16.05.420 is amended to read:

Sec. 16.05.420. License, tag, [AND] permit, and registration violations. (a) A false statement of a material fact in an application for a license, tag, [OR] permit, **and sport fishing vessel registration** issued under AS 16.05.330 - 16.05.430 voids the license, tag, [OR] permit, **or registration** for which the application is made.

(b) A person may not make a false statement, or omit a material fact, in an application for a license, tag, [OR] permit, **or sport fishing vessel registration** issued under AS 16.05.330 - 16.05.430. A person who without any culpable mental state makes a false statement as to the person's identity or residency in an application for a license, tag, [OR] permit, **or sport fishing vessel registration** issued under AS 16.05.330 - 16.05.430 is guilty of a violation and upon conviction is punishable by a fine of not more than $300. A person who knowingly violates this subsection is guilty of a class A misdemeanor.

(c) A person to whom a license, [OR] tag, **or sport fishing vessel registration** has been issued under this chapter may not alter, change, loan, or transfer the license, [OR] tag, **or sport fishing vessel registration**. A person may not use a license, [OR] tag, **or sport fishing vessel registration** that has been issued under this chapter to another person.

*** Sec. 4.** AS 16.05.490(a) is amended to read:

(a) As a condition to delivery or landing of fish or engaging in commercial fishing in the state, a license is required for a commercial vessel [, INCLUDING A VESSEL USED IN CHARTER SERVICE FOR THE RECREATIONAL TAKING OF FISH AND SHELLFISH].

* **Sec. 5.** AS 16.05.815(a) is amended to read:

(a) Except as provided in (b) and (c) of this section, records required by regulations of the department concerning the landings of fish, shellfish, or fishery products, and annual statistical reports of fishermen, buyers, and processors required by regulation of the department are confidential and may not be released by the department or by the Alaska Commercial Fisheries Entry Commission except as set out in this subsection. The department may release the records and reports set out in this subsection to the Alaska Commercial Fisheries Entry Commission. The department and the Alaska Commercial Fisheries Entry Commission may release the records and reports set out in this subsection to the recipients identified in this subsection if the recipient, other than a recipient under (5) - (9) of this subsection, agrees to maintain the confidentiality of the records and reports. The department and the Alaska Commercial Fisheries Entry Commission may release

(1) any of the records and reports to the National Marine Fisheries Service and the professional staff of the North Pacific Fishery Management Council as required for preparation and implementation of the fishery management plans of the North Pacific Fishery Management Council within the exclusive economic zone;

(2) any of the records and reports to the professional staff of the Pacific States Marine Fisheries Commission who are employed in the Alaska Fisheries Information Network project for the purpose of exchanging information with users authorized by the department;

(3) any of the records and reports to the Department of Revenue to assist the **department** [DEPARTMENT OF REVENUE] in carrying out its statutory responsibilities;

(4) records or reports of the total value purchased by each buyer to a municipality that levies and collects a tax on fish, shellfish, or fishery products if the municipality requires records of the landings of fish, shellfish, or fishery products to be submitted to it for purposes of verification of taxes payable;

(5) such records and reports as necessary to be in conformity with a court order;

(6) on request, the report of a person to the person whose fishing

activity is the subject of the report, or to a designee of the person whose fishing activity is the subject of the report;

(7) on request, annual statistical reports of a fisherman, buyer, or processor to the fisherman, buyer, or processor whose activity is the subject of the report, or to a designee of the fisherman, buyer, or processor whose activity is the subject of the report;

(8) **any of the records and reports** [FISH TICKETS, FISH TICKET INFORMATION, SALTWATER CHARTER LOGBOOKS, SALTWATER CHARTER LOGBOOK INFORMATION, AND ANNUAL STATISTICAL REPORTS OF FISHERMEN, BUYERS, AND PROCESSORS AND INFORMATION IN THOSE REPORTS] to the Department of Public Safety **for law enforcement purposes**;

(9) fish tickets, fish ticket information, and annual statistical reports of fishermen, buyers, and processors and information in those reports to the law enforcement personnel of the National Marine Fisheries Service and the National Oceanic and Atmospheric Administration for the purpose of enforcing fishery laws in waters of this state and in waters of the exclusive economic zone adjacent to this state;

(10) fish tickets and fish ticket information regarding halibut to the International Pacific Halibut Commission; [AND]

(11) any of the records and reports to the child support enforcement agency created in AS 25.27.010, or the child support enforcement agency of another state, for child support purposes authorized under law**; and**

(12) any of the records and reports to the Department of Natural Resources to assist the department in carrying out its statutory responsibilities in regard to sport fishing operations and sport fishing guides within the Kenai River Special Management Area under AS 41.21.500 - 41.21.514.

*** Sec. 6.** AS 16.40 is amended by adding new sections to read:

Article 6. Sport Fishing Services.

Sec. 16.40.260. Sport fishing operator license. (a) The department shall issue an annual sport fishing operator license to a person who

(1) holds a current business license under AS 43.70 to provide services

to sport fishermen;

(2) presents proof satisfactory to the department of a general liability insurance policy or marine protection and indemnity insurance policy, covering the services provided by the person and the person's employees to sport fishermen, that provides coverage of at least $100,000 for each incident, and $300,000 for all incidents in a year;

(3) pays the license fee prescribed by AS 16.05.340(a); and

(4) satisfies all additional requirements adopted in regulation by the Board of Fisheries.

(b) A person may not provide sport fishing services unless the person holds a current sport fishing operator license and has current insurance coverage as required in (a)(2) of this section.

(c) A person who holds a current sport fishing operator license may contract to provide sport fishing guide services to a sport fisherman through an employee who holds a current sport fishing guide license under AS 16.40.270.

(d) A person who holds a current sport fishing operator license may not directly provide sport fishing guide services to a sport fisherman unless the person also holds a current sport fishing guide license under AS 16.40.270(b).

(e) A person who holds a sport fishing operator license may not aid in the commission of a violation of AS 16.05 - AS 16.40 or a regulation adopted under AS 16.05 - AS 16.40, including regulations relating to the proper method to release fish, by a sport fishing guide who is employed by the person or by a sport fisherman who is a client of the person.

Sec. 16.40.270. Sport fishing guide license. (a) A natural person may obtain an annual sport fishing guide license if the person

(1) is a citizen of the United States, Canada, or Mexico, or is a resident alien;

(2) is certified in first aid by the American Red Cross or a similar organization;

(3) holds a license to carry passengers for hire issued by the United States Coast Guard if the person operates a vessel in the provision of sport fishing

guide services and the license is required by the United States Coast Guard for the area in which the fishing guide provides fishing guide services;

(4) holds a current sport fishing license from this state;

(5) pays the license fee prescribed by AS 16.05.340(a); and

(6) satisfies all additional requirements adopted in regulation by the Board of Fisheries.

(b) A natural person may obtain an annual sport fishing operator and sport fishing guide combined license if the person satisfies the requirements for a sport fishing operator license under AS 16.40.260 and for a sport fishing guide license under this section and pays the license fee prescribed by AS 16.05.340(a).

(c) A person may not provide sport fishing guide services unless the person

(1) holds a current sport fishing guide license; and

(2) holds a current sport fishing operator license or is an employee of a person who holds a current sport fishing operator license.

(d) A sport fishing guide may provide sport fishing guide services only to persons who have engaged the services of the sport fishing operator by whom the sport fishing guide is employed. A sport fishing guide may not contract directly with a person to provide sport fishing guide services to a person unless the sport fishing guide also holds a current sport fishing operator license.

(e) While engaged in providing sport fishing guide services, a sport fishing guide shall have readily available for inspection

(1) a current sport fishing guide license;

(2) the current licenses, tags, and permits that are required to engage in the sport fishery for which the sport fishing guide services are being provided;

(3) a driver's license or similar identification card that is issued by a state or federal agency and that bears a photograph of the fishing guide; and

(4) proof of

(A) employment as a sport fishing guide by a person who holds a current sport fishing operator license; or

(B) current licensure as a sport fishing operator.

(f) A sport fishing guide may not

(1) aid in the commission of a violation of AS 16.05 - AS 16.40 or a regulation adopted under AS 16.05 - AS 16.40 by a client of the sport fishing guide; or

(2) permit the commission by a client of the sport fishing guide of a violation of AS 16.05 - AS 16.40 or a regulation adopted under AS 16.05 - AS 16.40 that the sport fishing guide knows or reasonably believes is being or will be committed without

(A) attempting to prevent it, short of using force; and

(B) reporting the violation.

Sec. 16.40.280. Reports. (a) The department may collect information from sport fishing guides, including

(1) the name and license number of each vessel licensed under AS 16.05.490 that is used in providing sport fishing guide services;

(2) the amount of fishing effort, catch, and harvest by clients of a sport fishing guide;

(3) the locations fished during the provision of sport fishing guide services; and

(4) other information that the department or board requires by regulation.

(b) A person who holds a license issued under AS 16.40.260 or 16.40.270 shall comply with the reporting requirements in this section and reporting requirements adopted in regulation by the department or board. The department and the board may adopt by regulation requirements for timely submission of reports required under this section or under regulations adopted by the department or board.

(c) A person who is required to complete reports under this section may not provide false information or omit material facts in a report.

(d) A person who is required to complete reports under this section may not be issued a new license under AS 16.40.260 or 16.40.270 unless the department has received all reports required under this section for the preceding year.

(e) Information collected under this section is confidential to the extent provided under AS 16.05.815.

(f) The department or board may adopt regulations under AS 44.62

(Administrative Procedure Act) that it considers necessary to implement this section.

Sec. 16.40.290. Penalty. (a) Except as provided in (b) and (c) of this section, a person who knowingly violates AS 16.40.260 - 16.40.299 or a regulation adopted under AS 16.40.260 - 16.40.299 is guilty of a class A misdemeanor.

(b) A person who, without any culpable mental state, violates AS 16.40.270(e) is guilty of a violation.

(c) A person who knowingly violates AS 16.40.270(e) or who knowingly fails to comply with a requirement for timely submission of reports required by a regulation adopted under AS 16.40.280(b) is, for a

(1) first offense in a three-year period, guilty of a violation; and

(2) second or subsequent offense in a three-year period, guilty of a class B misdemeanor.

(d) In addition to any other penalty provided by law, a court may revoke the sport fishing guide license of a person who is convicted under (a) or (c)(2) of this section.

(e) In this section, "knowingly" has the meaning given in AS 11.81.900.

Sec. 16.40.299. Definitions. In AS 16.40.260 - 16.40.299,

(1) "sport fishing guide" means a person who is licensed to provide sport fishing guide services to persons who are engaged in sport fishing;

(2) "sport fishing guide services" means assistance, for compensation or with the intent to receive compensation, to a sport fisherman to take or to attempt to take fish by accompanying or physically directing the sport fisherman in sport fishing activities during any part of a sport fishing trip; "sport fishing guide services" does not include

(A) sport fishing services; or

(B) services provided by an assistant, deckhand, or similar person who works directly under the supervision of and on the same vessel as a sport fishing guide;

(3) "sport fishing services" means the indirect provision of assistance, for compensation or with the intent to receive compensation, to a person engaged in sport fishing in taking or attempting to take fish or shellfish by a business that

employs a sport fishing guide to provide sport fishing guide services to the person during any portion of a sport fishing trip; "sport fishing services" does not include

(A) an activity for which a sport fishing guide license is required; or

(B) booking and other ancillary services provided by a tour broker or agent to a sport fishing services operator.

*** Sec. 7.** AS 25.27.244(s)(2)(A) is amended by adding new sub-subparagraphs to read:

(xviii) sport fishing operator license under AS 16.40.260;

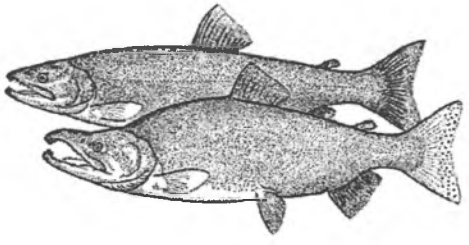
(xix) sport fishing guide license under AS 16.40.270;

*** Sec. 8.** AS 16.05.340(a)(26); AS 16.40.260, 16.40.270, 16.40.280, 16.40.290, 16.40.299; AS 25.27.244(s)(2)(A)(xviii), and 25.27.244(s)(2)(A)(xix) are repealed January 1, 2010.

*** Sec. 9.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION; REGULATIONS. The Board of Fisheries and the Department of Fish and Game each may proceed to adopt regulations necessary to implement the changes made by secs. 1, 3, 4, 5, and 6 of this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before the effective date of the statutory changes.

*** Sec. 10.** Sections 2 and 9 of this Act take effect immediately under AS 01.10.070(c).



*** Sec. 11.** Except as provided in sec. 10 of this Act, this Act takes effect January 1, 2005.

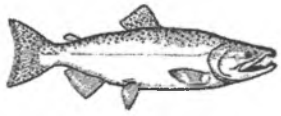
2012 FRESHWATER SPORT FISH
Logbook Sign-Out

SPORT FISH BUSINESS INFORMATION



Must have a <u>current</u> ADF&G Business License Number

NAME OF PERSON TO WHOM THIS LOGBOOK WAS ISSUED

SPORT FISHING BUSINESS NAME

ADF&G LICENSE NUMBER OF BUSINESS *(NOT A "GUIDE ONLY" LICENSE)*

CONTACT PHONE NUMBER

Do you plan to use a <u>vessel</u> while providing sport fishing guided services in freshwater?

No ☐ Yes ☐ (If yes, list vessels on pg. iii)

INSTRUCTIONS TO ADF&G REPRESENTATIVE

Please forward the white copy of this form to:

Sport Fish Research & Technical Services
333 Raspberry Rd., Anchorage, AK 99518

ADF&G area offices **<u>will</u>** keep the pink copy on file.

Do **NOT** issue a logbook unless the applicant has the following:

- 2012 ADF&G Business License;
- Current AK Boat Number issued by DMV **OR** current U.S.C.G. Vessel Documentation number, if applicable.

None of the required information can be "pending." This form must be complete and accurate to the best of your knowledge.

Incomplete forms will be returned to you for follow-up and completion, resulting in a processing delay.

<u>DID YOU PROVIDE A SITE CODE LIST ?</u>

ADF&G REPRESENTATIVE (PRINT)

AREA OFFICE DATE OF ISSUE

LOGBOOK NO.

2012 FRESHWATER SPORT FISH GUIDE
Vessel Registration

NOTE TO ADF&G REPRESENTATIVE

Confirm that the vessel information requested on the bottom of this page is complete. Every vessel that this business is intending to operate while providing sport fishing guided services, must be recorded.

Attach the white (top) copy of this page to the sign-out sheet, whether or not there are registered vessels. Mail the sign-out sheet and the vessel registration page to the Anchorage ADF&G RTS office at 333 Raspberry Rd., Anchorage, AK 99518-1565.

REGISTERING YOUR VESSEL(S)

For each vessel you plan to use to conduct sport fishing guided activities, please fill out the information below.

If a vessel is newly purchased, leased or borrowed at anytime during the guiding season, it must have a current AK Boat Number **or** a U.S.C.G. documentation number. If a vessel is added during the season, call the local ADF&G office or (907) 267-2369.

For purposes of vessel registration, vessels are defined as: **rafts, canoes, kayaks, motorized and nonmotorized water vehicles.**

Registration Exemption: Personal Float Tubes.

MULTIPLE LOGBOOKS?

Note logbook number where vessel information has been provided:

AK BOAT NO. OR U.S.C.G. VESSEL DOC. NO.	PRIMARY AK DRAINAGE/COMMUNITY THE VESSEL WILL OPERATE OUT OF IN 2012

Continue on another sheet if you have more vessels. Transfer the business name and logbook number onto that extra sheet.

2012 FRESHWATER SPORT FISH GUIDE

Logbook Instructions

VESSEL REGISTRATION

The following applies to all **powered and non-powered** vessels being used to conduct sport fishing guided activities:

- Must be currently licensed with the Alaska Division of Motor Vehicles (DMV) and hold a current AK Registration number or hold a current U.S.Coast Guard (U.S.C.G.) Vessel Documentation number.
- Must be registered with the Alaska Department of Fish and Game (ADF&G) and display an ADF&G vessel decal with the current year tag.
- Vessels borrowed or purchased in-season must adhere to the above criteria and display ADF&G sport fish guide vessel decals.

Upon registration, each vessel is issued two charter vessel decals and current year tabs.

See page iii for instructions on vessels that are added midseason.

VESSEL DECALS/YEAR TABS

One set of ADF&G decals will be issued per registered vessel. Decals must be displayed and visible on each side of the vessel. Decals do not have to be applied directly to the hull of the vessel. Decals can be adhered to wood, fiberglass or plexiglas® which in turn is secured to each side of the vessel. Decals can be transferred from one vessel to another, as long as the receiving vessel has a current AK registration number from DMV **or** a U.S.C.G. documentation number and has been registered with ADF&G. Decals are designed to withstand several years of use. Annual tabs will be issued as vessels are registered. Annual year tabs are to be adhered directly to the decal in the designated area.

RESPONSIBILITY OF OWNER & GUIDE

It is the responsibility of the **guide** to ensure that daily trip activity is accurately recorded as described on page v - vii.

It is the responsibility of the **business owner** (owner of the sport fish owner/operators license) to ensure that all data for fishing activities from January 1, 2012 through December 31, 2012 is submitted to ADF&G according to the schedule on the inside the front cover.

WHAT A GUIDE MUST HAVE IN POSSESSION WHILE GUIDING

While engaged in providing sport fish guide services, a sport fishing **guide** shall have the following readily available for inspection upon request of a representative of the Department or a peace officer of the state:

- Valid ADF&G sport fishing guide license;
- Copy of the current ADF&G sport fishing operator's (business owner) license of the guide's employer;
- Valid Alaska sport fishing license, tags, stamps or permits that are required to engage in the sport fishery for which guide services are being provided;
- Identification card issued to the sport fishing guide by a state or federal agency that bears a photo of the sport fishing guide (e.g. driver's license);
- Other agencies may have additional requirements (e.g. U.S.C.G.). It is the guides responsibility to determine what those requirements are.

2012 FRESHWATER SPORT FISH GUIDE

Logbook Instructions

WHEN TO COMPLETE A LOGBOOK

Client Information: The sport fish license number must be recorded for all paying clients, "comped" anglers, and crew that fished during any part of the trip. A **"comped"** angler is an angler who is **not paying** for this trip; it can include family, friends or other acquaintances.

The logbook must be completed at the end of each day of fishing or at the end of each trip within a day as described below through the last trip of the season.

The guide that leads the trip is required to complete this logbook per the schedule described below.

VESSEL USED

Returning to a lodge, camp, dock or mooring location:

Complete the logbook before offloading any fish from the vessel. If no fish were kept, complete the logbook before offloading any clients.

Returning to a boat ramp, launching site, or other client drop off location:

Complete the logbook before the vessel or guide departs the launching /landing site **AND** before offloading any fish from the vessel.

If no fish were kept, complete the logbook before the guide departs the launch/landing site.

NO VESSEL USED

Aircraft, highway vehicles, walk-in, ATVs, etc.

Complete the logbook before the guide leaves the fishing site. Fishing site is defined as the location where the fishing activity took place. Refer to the list of unique freshwater site codes provided with the logbook.

MULTIPLE TRIPS PER DAY

Each trip of multiple trips in a day should be logged on a separate logbook sheet. Complete the logbook at the end of each trip, as described above.

MULTIPLE DAY TRIPS

Complete the logbook at day's end for each day of the trip. Use a separate logbook data sheet for each day of that trip.

MULTIPLE SITES FISHED

If multiple sites were fished on the same day, write down each site fished prior to leaving that fishing site per the instructions above. Each site would have the same date and would require a new logbook page.

RETURN THE LOGBOOK REPORTS WEEKLY

Fishing activity that occurs prior to April 1, 2012 is due to ADF&G by April 9, 2012; all activity, thereafter, must be received by ADF&G offices **EVERY WEEK** as detailed in the schedule provided on the inside of the front cover of this book.

All 2012 logbook data must be received by January 15, 2013.

PINK COPIES ARE TO REMAIN IN THE LOGBOOK.

For fishing activity that occurs in the early winter of 2013, please call the local ADF&G office for logbook instructions if the 2013 logbooks are not yet available.

2012 FRESHWATER SPORT FISH GUIDE

Logbook Instructions

LOGBOOK ASSIGNMENTS/TRANSFERS

Logbooks are issued to individual licensed businesses. Due to the variety of ways that freshwater businesses conduct operations, the number of logbooks issued to a unique business will vary.

The business owner or their representative must determine how many logbooks that business will be required to have in order to comply with the recording requirements outlined in the instructions. For example, an operation that conducts business from a lodge with 6 guides may need more logbooks than a single owner/operator with one vessel that is trailered.

A logbook is assigned by ADF&G to the business; the business owner can distribute individual logbooks to a vessel or to a guide. It is up to the discretion of the business owner to distribute logbooks to employed guides in any manner that facilitates the timely recording of trip information as described previously in the instructions.

Remember: it is the responsibility of the **guide** to complete daily trip activity in the logbook. It is the responsibility of the **business owner** to ensure that all data is submitted to ADF&G in a timely manner.

2012 FRESHWATER SPORT FISH GUIDE

How to Fill Out the Logbook

ADF&G Sport Fish Guide License Number - The current guide license number issued by ADF&G to the guide for a specific year. Only one guide license number should appear on each logsheet page.

Date Fished- The date for each trip taken. If multiple trips to multiple different fishing sites were taken on the same day, that date and unique trip information would appear on as many data sheets as there were unique trips. Although the date would be the same, client information and trip specifics may differ. If there were more than six clients, continue on a separate logsheet with the trip information and individual angler license information carried over to the next page.

River/Stream/Lake (Specify) - The name of the site where fishing activity occurred.

Site Code - Refer to the site code list provided with the logbook for the site code associated with the river, stream or lake where fishing activity occurred. Write the site code down as it appears on this list. If no site code exists for your fishing site, use the code for Other Streams or Other Lakes.

Page Number - On each logsheet, record the page no. if multiple pages were necessary to fit in all the client information. Note the total no. of pages used for that trip.

Other Species Write-In - On the line denoted with an *, write in the name of the "other" species kept or released. Use the last blank column on the right to record this "other" species of fish as long as it does not already have an existing column. If more than one "other" species is kept or released, use an existing column, cross out the existing species of fish not present at this fishing site and write in the name of that second species.

Once a species has been written in, that column becomes dedicated to that species for the remainder of that logsheet.

Examples of Other Species: *pink (or humpy) salmon, chum (or dog) salmon, burbot, and whitefish.*

How to Fill Out the Logbook (cont'd)

Residency - In the columns to the left of each sport fish license number, **circle:**

- **R** for **Resident** or **N** for **Nonresident**.

Sport Fish License Number - Record the current Alaska Sport Fishing License number, resident PID (permanent license number) or DAV (disabled AK veteran license number) of **each client, comped angler, and crew that fished**. A **"comped"** angler is an angler who is **not paying** for this charter; it can include family, friends or other acquaintances.

Record anglers under 16 years of age as **"Youth angler 1 (YA1), Youth angler 2 (YA2)"** etc., uniquely identifying them as 1, 2 or 3 for as many as fished on each trip.

Record the license numbers of those clients that **actively** fished during any part of the trip regardless of whether they caught anything. Use one line per angler, recording the license number and all activity on that line.

Crew Status and "Comped" Anglers should be noted to the right of each angler sport fish license number, if applicable, **circle:**

- **X** if angler is **"Comped"** (nonpaying) or
- **C** if angler is **Crew member**

RECORDING SALMON AND OTHER SPECIES

Fish Kept & Released - Record the total number of fish kept **(K)** in the white row and released **(R)** in the gray row by each angler during that trip. Each angler's license number has a dedicated line assigned on each logbook sheet. If the same angler goes on more than one trip on the same day, that angler's license number will appear on as many logsheets as were used.

PROXY FISHING INSTRUCTIONS

If a paying client is also proxy fishing for a beneficiary, that client **must** have the fishing license of the person for whom he/she is fishing. Write down the license number of the recipient of the fish (beneficiary), followed by a **(P)** to indicate proxy, e.g. **10123456-P**.

Use two lines on the logbook data sheet, one for the angler's license number and one for the beneficiary's license number. Indicate **(R)** for Resident in the adjacent column; beneficiaries and those fishing for them **must** be residents of Alaska.

For permanent licenses (residents only), write down the entire license number, including the preceding alpha character, which can be a **P, D, T or Z**, i.e. **Z50148-P**.

INSTRUCTIONS FOR COMPLETING THE 2012 SALTWATER TRIP LOGBOOK PAGES

WHEN TO COMPLETE A LOGBOOK

A Charter Vessel Fishing Trip is Defined as the time period between the first deployment of fishing gear into the water from a vessel with one or more paying charter vessel clients onboard and the offloading of one or more paying charter vessel clients or any harvested fish from that vessel.

A trip that consists of no paying clients, that is, all anglers are "comped", and the guide is NOT receiving any tips or other compensation, would NOT be considered a chartered trip and a logbook data sheet should not be completed and submitted to the Alaska Dept. of Fish and Game. A licensed guide may be present during a private fishing trip but must NOT be compensated by the angler(s) or by any licensed fishing service or any other party.

Before a Trip Begins (see definition above), the Guide must Record:

- The 2012 sport fishing license number, permanent identification number (PID) or disabled veteran (DAV) license number for anyone that will fish during any part of the trip, including paying and non-paying (comped) anglers and crew.
- The first and last name of each angler in the space provided below their license number.
- The word "Youth" in the fishing license space along with the first and last name on the name line for all anglers under the age of 16. Multiple youth anglers on a trip should be recorded as Youth 1, Youth 2 etc.

Complete the logbook through the last charter trip of the season in the following manner:

Returning to a Dock:

- Complete and sign the logbook data page before offloading any fish from the vessel. If no fish were kept, complete the logbook data page before offloading any clients.

No Docking Facilities (e.g., trailered vessels):

- Complete and sign the logbook data page before the vessel or guide departs the launch/landing site AND before offloading any fish from the vessel.
- If no fish were kept, complete the logbook data page before the vessel or guide departs the launch/landing site.

No Vessel Used (aircraft, highway vehicles, walk-in, ATVs, etc.):

- Complete and sign the logbook data page before the guide leaves the fishing site. Fishing site is defined as the location where fishing activity took place.

Multiple Trips per Day:

Use a separate logbook data page for each trip if multiple trips where taken during the same day. Complete the logbook data page at the end of each trip as described above.

Multiple Day Trips:

Complete a logbook page at the end of each day on which sport fishing guide services were provided. Use a separate page for each day of the trip. Record the port or community of offloading at the end of the multiple-day trip, not the port or location where the vessel anchored or moored each night.

For example, for a five-day trip with only three days of guided fishing, three logbook pages should be submitted, all with the same port of offloading.

RETURN THE LOGBOOK DATA PAGES WEEKLY

Fishing activity that occurs prior to April 1, 2012 is due to ADF&G by April 9, 2012; all activity thereafter must be received by ADF&G **EVERY WEEK** as detailed in the schedule provided on the inside of the front cover of this book. Logbook data pages can be submitted to any regional or area ADF&G office or mailed to the address printed on the back of each logbook page.

INSTRUCTIONS FOR COMPLETING THE 2012 SALTWATER TRIP LOGBOOK PAGES

RESPONSIBILITY OF OWNER & GUIDE

It is the responsibility of the guide to ensure that daily trip activity is accurately recorded as described in these instructions.

It is the responsibility of the business owner (owner of the sport fish business license) to ensure that all data for fishing activities from January 1, 2012 through December 31, 2012 is submitted to ADF&G in the manner previously described.

VESSEL REGISTRATION

All vessels used in sport fishing guide activities must be registered with ADF&G. All vessels must have a current AK registration number issued by the Division of Motor Vehicles (DMV) or a current U.S.C.G. documentation number prior to registering with ADF&G. **If the vessel has an AK number, the AK number must be displayed during guided fishing operations.**

VESSEL DECALS/RENEWAL TAGS

One set of ADF&G decals will be issued per registered vessel. Decals must be applied and visible on both sides of the vessel. Decals do not have to be applied directly to the hull of the vessel. Decals can be adhered to wood, fiberglass or "Plexiglas", which in turn is secured to both sides of the vessel. Decals can be transferred from one vessel to another; as long as the receiving vessel has a current AK registration number from DMV or a current U.S.C.G. documentation number and has been registered with ADF&G. Annual stickers or tags will be issued as vessels are registered and must be adhered directly to the decal in the designated area. Lost decals and tags can be replaced free of charge at any ADF&G office.

TRANSFERRING A LOGBOOK

A logbook is issued to a specific business for a specific vessel. All active vessels must be registered and issued a current year logbook from a local ADF&G office.

Logbooks may not be transferred between businesses. Only the business issued a logbook may use that logbook. If a vessel belonging to a licensed guide business is borrowed by another business, the borrowing business must acquire their own logbook.

If a business substitutes a different vessel for the primary vessel the original logbook can be used on the substitute vessel for up to **seven (7) consecutive days**. A temporary vessel used for a longer period of time must be issued a new logbook. ADF&G must be notified (see contact information on page vii) with the substitute vessel registration information.

All vessels engaged in fishing with clients on board must be registered and display the vessel decals.

WHAT A GUIDE MUST HAVE IN POSSESSION WHILE GUIDING

While providing sport fishing guide services, a sport fishing guide shall have the following readily available for inspection by request of a representative of the Department, a peace officer of the state, or law enforcement representative of the National Marine Fisheries Service:

- Valid sport fishing guide license issued by ADF&G;
- Copy of the current ADF&G sport fishing business license of the guide's employer;
- Valid Alaska sport fishing license, tags, stamps or permits that are required to engage in the sport fishery for which guide services are being provided;
- Identification card issued to the sport fishing guide by a state or federal agency that bears a photo of the sport fishing guide. The identification card MUST match the name on the guide license.

INSTRUCTIONS FOR COMPLETING THE 2012 SALTWATER TRIP LOGBOOK PAGES

TRIP INFORMATION	
Date	Record the month and day for each trip taken. If two or more trips were taken on the same day, that date will appear on all sheets for that day.
Hour Trip Ended	Record the hour in which the trip ended with the offloading of clients and fish. Round to the nearest hour only: trips ending at or after 5:00 pm but before 5:31pm would be logged as 5 pm and trips ending from 5:31pm to 6:00 pm would be logged as 6 pm. Do not indicate minutes. Fill in the circle for AM or PM.
Guide License Number	The 2012 guide license number issued by ADF&G to the guide that led the fishing trip.
Charter Halibut Permit (CHP) Number and multiple Permits	Record the primary Charter Halibut Permit (CHP) number used for the trip on the logbook data page in the space provided. Write the entire number as it appears on the permit followed by the alpha character, **i.e. 1234A**. If more than one CHP is used during a trip, check the box next to the primary CHP number. Complete a separate page for each CHP used during a trip. Unique trip information for each CHP, along with individual angler and catch information must be recorded for each CHP used. Angler license numbers along with kept and released information would be recorded only ONCE per trip. Record all CHP number(s) and CHP Holder(s) names on the front cover of the logbook.
Guided Angler Fish (GAF) Permit Number **(New in 2012 – see page vii for information on the Federal GAF program)**	**DO NOT** record a **GAF** Permit Number until NOAA Fisheries provides notice of the effective date of federal **GAF** halibut regulations. **GAF** halibut will be authorized and available for use ONLY AFTER implementation of federal regulations. IF **GAF** regulations are implemented in 2012, NOAA Fisheries will provide notice to operators on when to begin reporting **GAF** halibut in the logbook. Until such time DO NOT record **GAF** halibut. When GAF regulations go into effect, record the number of GAF halibut kept for each trip on the logbook page and record the number of the GAF permit used on each logbook page.
Port or Community of Off-Loading	The port or community where clients and/or fish were off-loaded at the conclusion of the trip. On a multi-day trip, indicate the community where fish and clients will be off-loaded when the trip is finished.
Primary Stat Area Fished	Report the 6-digit stat area code where most of the fish were caught or targeted. Record the stat area for salmon and/or bottomfish, depending on whether the gear and fishing methods were effectively targeting salmon, bottomfish, or both. Report only stat areas from maps provided with the logbook for this purpose.
No. of Boat Hours Fished	The number of boat hours for which at least one rod/line was fished. Record only the number of hours spent fishing, NOT hours spent running to or from fishing areas. Round to the nearest whole hour.
INDIVIDUAL ANGLER INFORMATION	
Sport Fish License No.	Before a guided sport fishing trip begins (see definition on page iii), record the 2012 Alaska Sport Fishing License number, resident PID (permanent identification number) or DAV (disabled veteran license number) of **each client, comped angler, and crew member** that will be fishing. **See Youth Angler instructions below.**
Residency	Fill in the circle to indicate AK Resident OR Non-Resident for all anglers, including crew and "comped" anglers.
Crew and "Comped" angler status	**If applicable**, next to each angler license number: ➢ fill in the circle if the angler is a **Crew member,** ➢ fill in the circle if the angler is **"Comped"** (the guide service is not compensated for the angler). A **crew member includes** the licensed guide leading the fishing trip as well as any person who, for compensation or the intent to receive compensation, provides assistance to clients on board the vessel.
Angler Name	Angler's first and last name **MUST** be printed **below the angler's license number.**
Youth Anglers	For **anglers** under the age of 16, write the word **"YOUTH"** in the fishing license space AND record the first and last name on the name line. If more than one youth angler is on a trip, record them as Youth 1, Youth 2, etc.
Angler Signatures in 2C	Federal rules require that **all** anglers who harvest (keep) halibut in **IPHC 2C** must sign the logbook to verify that their information and number of halibut reported kept are correct. A signature is also required of youth anglers.
Continuing Trip Information	Complete the Page ☐ of ☐ if more than one page is required for this trip, for example, if two pages are required to list all anglers, they would be numbered Page 1 of 2 and Page 2 of 2.
Guide Signature	The licensed guide who led the trip with clients on board MUST sign at the bottom of each page.

INSTRUCTIONS FOR COMPLETING THE 2012 SALTWATER TRIP LOGBOOK PAGES

RECORDING CATCH INFORMATION	
Recording Catch Information	Indicate the number of fish **Kept** (retained) and **Released** (let go) by species or group. Leave the fields BLANK if no fish were kept or released.
EXAMPLE 1: One target Salmon	If bottomfish were caught while targeting salmon **only**, record the number of bottomfish in the appropriate columns in the bottomfish section. **The stat area and hours fished should be recorded on the salmon target species line under Trip Information.** If salmon were targeted but no salmon were caught, record the stat area and boat hours fished on the salmon target species line under **Trip Information.**
EXAMPLE 2: One target Bottomfish (incl. Halibut)	If salmon were caught while targeting bottomfish **only**, record the number of salmon in the appropriate columns in the salmon section. **The stat area and hours fished should be recorded on the bottomfish target species line under Trip Information.** If bottomfish were targeted but no bottomfish were caught, record the stat area and boat hours fished on the bottomfish target species line under **Trip Information.**
EXAMPLE 3: Two targets Salmon and Bottomfish	Record the maximum number of boat hours spent fishing simultaneously for both salmon AND bottomfish on both the salmon and bottomfish target species lines under **Trip Information.** For example, if mooching or jigging for 7 hours record 7 hours in the salmon effort row, and 7 hours in the bottomfish effort row.

Special Instructions and Definitions	
Charter Halibut Permit (CHP) by Trip and for the Season	Federal regulations require that if one or more anglers are catching and retaining halibut in Area 2C or Area 3A, the guide MUST have a valid charter halibut permit (CHP) for the appropriate regulatory area on board the vessel at all times. Record the **primary** charter halibut permit number used during a **trip** on each page. If more than one CHP is used during a trip, check the box next to the primary CHP number. Complete a separate page for each CHP used during a trip. Unique trip information for each CHP, along with individual angler and catch information must be recorded for each CHP used. Angler License numbers along with kept and released information would be recorded only ONCE per trip. **All** CHP number(s) and CHP Holder(s) used during the fishing season MUST appear on the **front cover** of the logbook with the primary CHP number used during a trip appearing on the individual trip sheet. **A CHP number needs to appear only once on the cover, but recorded on the trip sheet each time it is used.**
(GAF) Guided Angler Fish **(New in 2012 – see page vii for information on the Federal GAF program)**	**DO NOT** record the number of **GAF halibut kept** until NOAA Fisheries provides notice of the effective date of federal **GAF** halibut regulations. Record **GAF halibut kept** ONLY AFTER implementation of federal regulations. IF **GAF** regulations are implemented in 2012, NOAA Fisheries will provide notice to operators on when to begin reporting **GAF** halibut in the logbook. Until such time DO NOT record **GAF** halibut kept. When **GAF** regulations go into effect, record the number of **GAF** halibut kept for each client on each trip within the logbook. If GAF halibut were kept along with Non-GAF halibut, record the number of each within the appropriate category. **NOTE:** record the number of Non-GAF halibut kept AND released.
2C/3A Operators (operators who fish both 2C and 3A for Halibut)	Federal regulations prohibit retention of halibut from Area 2C and Area 3A during the same charter vessel fishing trip. Contact NOAA for additional federal halibut regulations; see page vii for contact information.
Angler Signature	Federal regulations require that every angler (including youth) who keeps halibut caught in IPHC **Area 2C** must sign on the angler signature line directly beneath the angler's first and last name on the front side of each page.
"Shakers"	King salmon under 28" in Southeast Alaska must be released upon capture, unless caught in designated terminal harvest areas, or allowed by emergency order.
Pelagic Rockfish	Includes black, dark and dusky rockfish (commonly called "black bass"), yellowtail, widow and blue rockfish. These species of rockfish are uniformly gray, green, brown, or black (see rockfish ID chart in your regulation booklet).
Yelloweye Rockfish	"Commonly called "red snapper." Adults primarily orange with a pale yellow line running along the lateral line, juveniles with two bold white lateral stripes. Have yellow eyes. Can grow to 36 inches in length.
Other Non-pelagic Rockfish	Includes quillback, copper, silvergray, China, tiger, and other rockfish species.
Sablefish (Black Cod)	Sablefish, commonly known as black cod, have a streamlined, elongated body, black to dark gray above fading to gray or white in the belly, with two dorsal fins and small teeth. Larger fish found in deep water, can grow to 40 inches.
Salmon Shark	This is a single species, *Lamna ditropis*. These sharks are large, firm, dark brown or black on top, with white bellies with dark blotches. **Do not include spiny dogfish ("sand shark") or sleeper sharks ("mud sharks") in this category.**
All Other Fish	DO NOT record any OTHER fish kept that does not fit into any currently listed category of fish.

INSTRUCTIONS FOR COMPLETING THE 2012 SALTWATER TRIP LOGBOOK PAGES

PROXY FISHING INSTRUCTIONS

If an angler is also proxy fishing for a beneficiary, that angler MUST have the fishing license or PID/DAV of the person for whom he/she is fishing. Write down the license number of the recipient of the fish (beneficiary), the beneficiary's first and last name, followed by the word **"Proxy"** on the signature line.

Halibut my not be taken by proxy fishing.

Use two records on the logbook data sheet, one for the angler's license number and name and the other record for the beneficiary's license number and name. Mark AK Resident in the adjacent column for both. Beneficiaries and those fishing for them **must** both be residents of Alaska.

For **permanent** licenses (residents only), write down the entire license number, including the preceding alpha character, which can be a **P, D, T** or **Z**, e.g. **Z50148.**

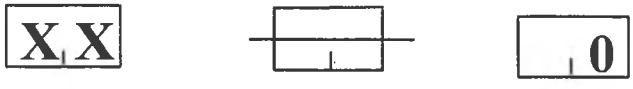
2012 FEDERAL GAF PROPOSAL:

On July 22, 2011, NOAA Fisheries proposed regulations to authorize guided angler fish (GAF) for the Charter halibut fisheries. GAF will be available for use ONLY AFTER publication and implementation of final regulation by NOAA Fisheries. NOAA will provide notice to operators as soon as possible if such regulations are implemented during 2012. Information will also be available on the NOAA Fisheries Alaska Region web site at: http://alaskafisheries.noaa.gov/sustainablefisheries/halibut/sport.htm

NOAA CONTACT INFORMATION:

There are numerous differences between State and Federal regulations that govern charter fishing in 2C and 3A, which all operators must be aware of, and operate under. For Additional information on federal charter logbook requirements for halibut, call NOAA Fisheries Office for Law Enforcement (907) 586-7225.

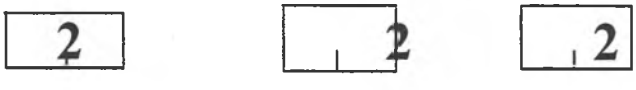
You must comply with the federal halibut regulations described at:



http://alaskafisheries.noaa.gov/regs/summary.htm and http://www.iphc.int

A summary of the charter halibut fishery federal regulations is available at:

http://alaskafisheries.noaa.gov/sustainablefisheries/halibut/sport.htm



LOGPAGE CLARITY: 2012 logbook sheets are designed to be read by an optical scanner. Your cooperation and neatness in reporting minimizes data entry time and cost, and makes the information available sooner.

1. **Use clear and legible handwriting. Print: DO NOT use cursive.**
2. **Use a black ink pen; do NOT use a pencil or other color pen.**
3. **Do not write in the margins.**
4. **Do not write 0's (zero) if a client DID NOT keep or release any fish during a trip, leave the kept and released fields blank.**

NO NO NO

5. **Contain trip information within the boxes and lines provided. Stay within the "bracketed" space allowed:**

NO NO YES

Single digits should appear in the right hand column.

6. **Keep data pages and logbook as clean as possible.**

2012 Saltwater Sport Fishing Charter Trip Logbook Page

RETURN TO: 333 RA[illegible] HORAGE, ALASKA 99518-1565 • QUES[illegible]

120000 – 01
LOGBOOK PAGE

TRIP INFORMATI[illegible]

The hour in which the trip ENDED.

Both salmon and bottomfish were targeted. This was a 7 hour trip, 3 hours were spent targeting salmon, 4 hours were spent targeting bottomfish.

Complete this se[illegible] pages for trips with [illegible] additional same trip.

DATE FISHED: 7 / 12 2012 (Month / Day) — 6 Hour Trip Ended — ○ AM ● PM — 3 Hours Fished

Bottomfish: 1 1 2 1 2 0 (Primary Statistical Area) — 4 Hours Fished

2012 GUIDE LICENSE NUMBER: (assigned to you by ADF&G)
1 2 8 2 8

CHARTER HALIBUT PERMIT (CHP) NUMBE[illegible] (assigned to you by NOAA)
1 2 3 4 A

The complete CHP number MUST be provided. This operator is using more than one CHP on this trip.

Check box if more than one CHP is used on this trip: ☑

COMMUNITY OR PORT WHERE TRIP ENDED: (where fish or clients were off-loaded from vessel)
J U N E A U

GUIDED ANGLER FISH (GAF) NUMBER: (assigned to you by NOAA)

SEE INSTRUCTIONS ON PAGES V - VII

INDIVIDUAL ANGLER AND CATCH INFORMATION

Complete one row below for each angler who fished this trip.
Record sport fishing license number, printed name AND Alaska residency status for all anglers.
Write "YOUTH" in license number field for anglers under 16.

	AK Resident	Non - Resident	Comped	Crew	Kept / Released	SALMON: King (28" & larger)	SALMON: King (under 28")	SALMON: Coho	SALMON: Sockeye	SALMON: Other Salmon	BOTTOMFISH: Halibut	BOTTOMFISH: GAF Halibut	BOTTOMFISH: Lingcod	BOTTOMFISH: Pelagic Rockfish	BOTTOMFISH: Yelloweye Rockfish	BOTTOMFISH: Nonpelagic Rockfish (excluding Yelloweye)	BOTTOMFISH: Sablefish (Black Cod)	BOTTOMFISH: Salmon Shark
1. License Number 2 0 4 2 8 4 5 — LARRY LURE — Larry Lure	○	●	○	○	K						1			1			3	
					R						1							
2. License Number 2 2 3 2 2 5 5 — IGOT HALIBUT — Igot Halibut	○	●	○	○	K										1			
					R													
3. License Number 2 3 5 9 9 6 7 — DOUG DRIFT — Doug Drift	●	○	●	○	K	2					1					4		
					R											1		
4. License Number YOUTH — BRYAN BAITER — Bryan Baiter	●	○	○	○	K													1
					R						2							
5. License Number 2 9 5 5 0 0 2 — FRANK FISHER — Proxy	●	○	○	○	K													
					R	3												
6. License Number	○	○	○	○	K													
					R													

Fill in the circle if the angler is "Comped" or nonpaying.
Fill in "Crew" if the angler is a crew member.
Doug Drift: is a "comped" resident angler.

This angler must provide a signature if halibut were kept in 2C.

Next to **EVERY** fishing license number: Fill in the circle for Nonresident or Resident.

Youth angler kept a halibut and must sign on the signature line.

This license holder had another angler proxy fish for him. Record the beneficiary's license number, first and last name, and write "PROXY" on the signature line.

The guide must sign the bottom of every logsheet for each trip he/she was in charge of.

ABSTRACT

In 2010, 1,452 sport fishing businesses and 3,034 guides licensed under the Alaska Department of Fish and Game guide and business licensing program, signifying intent to provide sport fishing services in Alaska. Of the 1,452 sport fishing businesses registered in 2010, 1,323 were combination owner/guide licenses. Based on the 2010 physical addresses of both the businesses and guides, 88% of the businesses were residents of Alaska, and 12% were from other residency strata (defined as nonresidents), 72% of the guides were residents and 28% were nonresidents.

Of the 2,257 saltwater logbooks issued in 2010, 1,848 were activated, and of the 2,299 freshwater logbooks issued in 2010, 1,476 were activated. Of those businesses that submitted logbook information in 2010, 59% offered saltwater services, and 41% offered freshwater guided services. In 2010, logbook records show that 1,172 saltwater vessels were active. Of those active saltwater vessels, 55% were active in Southeast Alaska and 45% were active in Southcentral Alaska.

A total of 48,742 saltwater charter trips and 246,054 saltwater angler days of fishing occurred in 2010. Of the statewide saltwater trips, 81% of the saltwater angler days were nonresidents, 15% were residents and 4% were crew, comped fishing (nonpaying anglers) or unknown residency. In freshwater, 37,791 trips and 113,239 angler days occurred in 2010. Of the statewide freshwater trips, 88% of the angler days were nonresidents, 10% were residents, and 2% were crew, comped fishing or unknown residency.

2010 saltwater salmon harvests show that coho and king salmon made up 65% and 14% of the total salmon harvest respectively statewide. Saltwater bottomfish harvests in 2010 show that Pacific halibut were the predominant species with 58% of the total saltwater bottomfish harvest statewide. In freshwater, coho salmon were the predominant harvested species, followed by sockeye and then king salmon.

Key words: Sport fishing, guide and business registration, freshwater logbook, saltwater logbook, participation, effort, harvest, sport fishing vessel, Pacific halibut, salmon, bottomfish, Southeast Alaska, Southcentral Alaska

BACKGROUND

The Alaska Department of Fish and Game (ADF&G) Division of Sport Fish (DSF) has operated a program since 1998 to register and license both sport fishing guides and sport fishing guide businesses. Saltwater information on sport fishing participation, effort, and harvest has been collected since 1998. Freshwater information on fishing participation, effort and harvest has been collected since 2005. This report briefly summarizes the approach, history, and results of this program for 2010.

GUIDE AND BUSINESS REGISTRATION AND LICENSING

The activities of the guided sport fishing industry in Alaska have significantly increased in recent years with implications to fish allocation and management decisions. Resolution of related issues was hampered by a lack of information regarding the industry and its impact on fishery resources in many parts of Alaska. The sport fishing guide and business registration and licensing programs were designed to provide a comprehensive system to better define this diverse industry throughout Alaska. A brief history of the statewide registration and licensing process follows.

Beginning in May 1995 the owner(s) of any business that engaged in sport fish guiding of anglers anywhere in Alaska were required to register their business information, employees acting as sport fishing guides for the business, and list all vessels used for guiding. In 1997, sport fishing guides were required to register and provide information about the employing business (Dean 2001; Dean and Howe 1999).

In 1998, the Alaska Board of Fisheries (BOF) adopted new statewide sport fishing guide registration regulations and definitions during their February Statewide Finfish meeting in

Girdwood, Alaska (5 AAC 75.075: *Sport Fishing Services and Sport Fishing Guide Services; License Requirements; Regulations of Activities)*. It should be stressed that this was a registration process, not a licensing process. No fees were required and businesses and guides were allowed to provide services in any area of the state, assuming other regulatory requirements were met. In 1998, ADF&G continued to register guide businesses and guides, but stopped registering charter vessels, because the Commercial Fisheries Entry Commission (CFEC) implemented a licensing program for all vessels to be used for guided sport fishing. From 1998 through 2004, ADF&G continued to register sport fishing businesses and sport fishing guides.

On May 11, 2004, the Alaska Legislature adopted House Bill 452 (HB 452), that established licensing requirements for sport fishing guide business owners and sport fishing guides on a statewide basis. This bill was created to establish minimum professional standards required of both freshwater and saltwater sport fish guides and business owners before a license could be obtained. The standards were established to protect consumers and to promote the viability and legitimacy of a professional sport fish guide industry. Businesses providing sport fish guided services were now required to obtain a State of Alaska Occupational Business License and hold liability insurance with a minimum of $300,000 coverage for all incidents in a year (AS 16.40.260). Licensed sport fishing guides were required (1) to be citizens of the United States, Canada, or Mexico, (2) hold a current first aid card, (3) have a current year Alaska sport fishing license and (4) have a valid U.S. Coast Guard operator's license if they were to operate a motorized vessel in navigable waters. License application forms and the information collected have remained consistent in design since 2006 (Sigurdsson and Powers 2009).

LOGBOOKS

In February, 1998 the BOF adopted regulations (5 AAC 75.076) requiring logbooks for saltwater charter vessels statewide. Information on the amounts and locations of charter activity and actual participation and harvest by individual vessels and businesses was needed by the BOF for allocation and management of Chinook salmon *Oncorhynchus tshawytscha*, rockfish *Sebastes* spp., and lingcod *Ophiodon elongatus*, and by the North Pacific Fisheries Management Council (NPFMC) for allocation of Pacific halibut *Hippoglossus stenolepis*. To meet these information needs ADF&G implemented a saltwater sport fishing charter vessel logbook program for DSF Region I, Southeast Alaska (Southeast), and Region II, Southcentral Alaska (Southcentral; Table 1; Figure 1).

In 1999, the NPFMC was considering proposals to limit the guided sport halibut harvest. Their concerns were: (1) that growth in this fishery was reallocating resources away from the individual fishing quota (IFQ) commercial longline fishery, and (2) that in some areas there was overcapitalization and localized depletion of the halibut resource. NPFMC endorsed a two-prong approach to resolve the perceived impact of increased guided charter halibut fishing. The first was establishment of guideline harvest limits (GHL) for International Pacific Halibut Commission (IPHC) Areas 2C and 3A (Figure 2), and the second was a process to establish local area management plans for halibut fisheries in coastal communities.

Since 1998, the logbook design has undergone annual revisions, driven primarily by changes or improvements in the collection of halibut, lingcod and rockfish data through the logbook program, Statewide Harvest Survey (SWHS), and expanded port sampling programs. House Bill 452, adopted in 2004, not only established new licensing requirements, but also established a logbook reporting requirement for all freshwater businesses in addition to the existing saltwater

reporting requirements. For various reasons, both technical and policy-based, information on halibut harvests was not collected from 2002 through 2005. The collection of halibut data was resumed in 2006. In addition, the 2006 logbook was redesigned to require reporting of angler license numbers and the harvest and release numbers by angler in an effort to improve reporting and facilitate evaluation of the quality of logbook data.

The data from logbooks are compiled to show where fishing effort occurs, the extent of participation, and the species and numbers of fish kept and released by individual clients. This information is used for regulation and the development and management of fisheries, for project evaluation, and for formulation of department policies and priorities that reflect angler needs, concerns, and preferences. It also provides ADF&G with a tool to promote management of Alaska's resources for sustained yield.

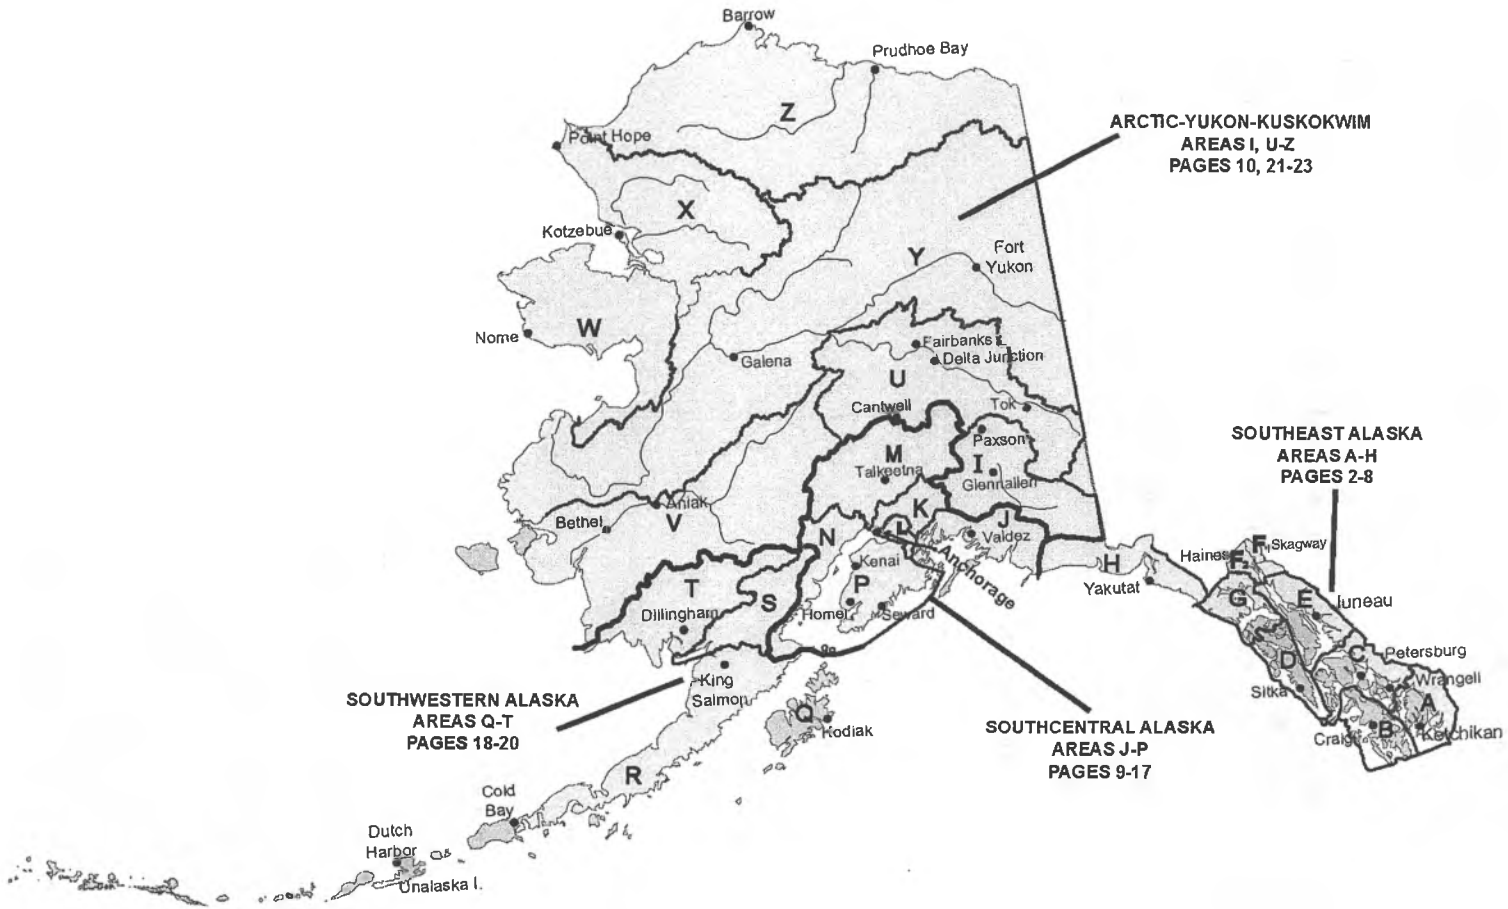

Figure 1.–Map of Alaska and Division of Sport Fish regions and management areas.

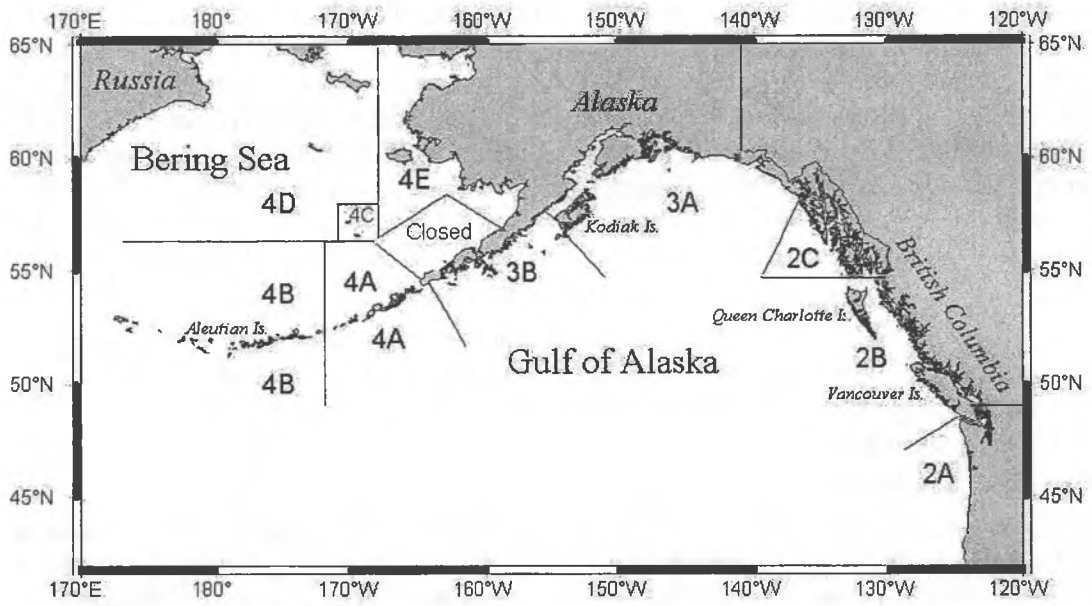

Figure 2.–International Pacific Halibut Commission (IPHC) regulatory areas.

Currently, a logbook record is required for every chartered or guided trip taken with clients, defined as an outing with one group of clients that ends when the clients and their fish (if fish were kept) are offloaded. Each trip is associated with an individual licensed business and guide.

VESSEL REGISTRATION

In addition to establishing a licensing program and statewide freshwater logbook requirement, HB 452 included establishment of a vessel registration program to be conducted by ADF&G as part of the logbook program to monitor the number of vessels used in the guided marine and freshwater fisheries. All boats used in marine or freshwater are referred to as "charter or guide boats" regardless of their size or the manner in which they are used. All vessels used in the charter guide industry were required to be registered with ADF&G.

METHODS

GUIDE AND BUSINESS LICENSING

Businesses and guides can be licensed to provide sport fishing guided services if they meet the minimum qualifications specified in regulation (AS 16.40.260 and AS 16.40.270).

Beginning in 2006, each January the Division of Sport Fish mailed renewal license applications to each sport fishing guide and sport fishing business that was licensed in the previous year. In addition, guides and businesses could obtain a license in person at local ADF&G offices or through the Internet.

The license application could be used in three ways (Appendix A):

- To license a business only,
- To license a guide only,
- To license a combination business and guide (an owner/operator where the owner also conducted the guiding).

The license application collected business owner or guide name, permanent mailing information, permanent and inseason phone number if applicable. Additionally, the name of the business, name of the business owner, occupational business license number, insurance company information and insurance binder or policy number and effective dates were required. A guide is required to be a citizen of the United States, Canada, or Mexico, hold a current first aid card and have a current year Alaska sport fishing license along with any tags or permits required for specific fisheries. If a guide planned to operate a motorized vessel on navigable waters with clients on board, the guide was required to have a current U.S. Coast Guard Operator's License and provide that number and expiration date on the license application.

Unique license numbers were assigned according to how licensing occurred. License numbers did not remain the same in subsequent years. If an operator or guide licensed at an ADF&G office, a pre-numbered application was used and that number became the license number for that year. Renewal or internet license applications are numbered sequentially by the computer database that processed the information

Once the license applications were reviewed for completeness and accuracy, DSF mailed a wallet-sized license to each guide or business. Those applicants who licensed by going to an ADF&G office received a copy of their license, which allowed them to operate immediately. Those who applied on the Internet or with the renewal application, were required to wait until they received their license in the mail prior to operating or providing guiding services.

LOGBOOK DATA COLLECTION

Logbook reporting is a mandatory process governed by regulation (AS 16.40.280). As such, the reporting process was considered to be a census of all charter/guided trips. Logbooks were available and issued from ADF&G area offices located statewide, in addition to a vendor located in Seward.

The statewide logbook has remained consistent in design since 2006, with few annual changes occurring in logbook layout. In 2006, both the freshwater and saltwater logbooks were redesigned to require reporting of angler license numbers and the harvest and release numbers by angler in an effort to improve reporting and facilitate evaluation of the quality of logbook data. Some of the annual design changes in the saltwater logbook were driven primarily by changes or improvements in the collection of halibut and rockfish data, and by requests from the NPFMC for information needed for allocation of halibut. Some changes were made to improve or simplify the use of the forms based on operator input, and to improve the capture of client and crew harvest information. Other than a few minor design changes, both the saltwater and freshwater logbooks collected the same information during all five years.

Saltwater Logbook Forms

A saltwater logbook consisted of the cover page, schedule of reporting deadlines, one logbook check out sheet to show the business to which the logbook was issued and to register the saltwater vessel, a set of instructions for filling out the information on the logbook sheets, and 50 data sheets to record trip information (Appendix B). Data collected on each of the 50 pages consisted of:

- Date that fishing took place;
- Time that trip started;

- ADF&G guide license number for the guide leading the trip;
- Port or community where fishing began;
- Port or community where trip ended,
- Primary statistical area fished while targeting salmon or bottomfish;
- Crew, client, and "comped" angler's current ADF&G sport fishing license or PID (permanent fishing license) number, the word "YOUTH" for anglers under 16;
- First and last name of each client and youth angler;
- Client residency(Alaska resident/nonresident of Alaska);
- Indication if crew fished or if angler was "comped";
- Signature of angler who kept halibut while fishing in 2C only (southeast);
- A breakdown by fish species kept and released by each individual angler.

During a saltwater charter trip, the operator must decide if his/her gear or fishing methods are effectively targeting bottomfish, salmon or both. A 6-digit statistical code where most of the fish were caught or targeted is logged for each trip. Statistical maps were provided to the operator upon logbook issuance.

Saltwater species information collected included kept and released information for "large" Chinook (king salmon) 28" and longer and for "small" Chinook (king salmon) less than 28". Also recorded were coho *O. kisutch*, sockeye *O. nerka*, halibut, lingcod, pelagic rockfish, yelloweye, and other nonpelagic rockfish, salmon shark *Lamna ditropis*, sablefish and a category for the number of all other species not already listed (Appendix B).

To determine the number of businesses and guides that were "active" in the industry, a cross reference of business and guide licenses is made to the logbooks to determine if actual guided trips were provided. If ADF&G received at least one logbook data page that reported targeted effort, the charter operation turning in the form was considered an "active" bottomfish or salmon charter operator with an "active" vessel.

Freshwater Logbook Forms

A freshwater logbook consisted of the cover page, schedule of reporting deadlines, one logbook check out sheet to show the business to which the logbook was issued, a freshwater vessel registration page that collects the unique AK # assigned by the Department of Motor Vehicles (DMV) or a United States Coast Guard (USCG) documentation number and primary drainage, a set of instructions for filling out the information on the logbook sheets, and 50 data sheets to record trip information (Appendix C). Data collected on each of the 50 pages consisted of:

- ADF&G guide license number,
- Date that fishing took place,
- Specific name of river, stream or lake fished,
- Site code of site fished as referenced within a list provided with each logbook,
- Number of logbook pages used for a specific trip,
- Name of any other species kept,
- Crew, client, and "comped" angler's current ADF&G sport fishing license number, and a youth angler designation for anglers under 16 years of age.

- Client residency,
- A breakdown by fish species kept and released by each individual angler.

Upon acquiring a freshwater logbook, the operator registers all vessels that may be used during the course of the fishing season. Freshwater vessel registration requires that the vessel already have a unique AK # assigned by DMV or a USCG documentation number. Freshwater vessels primarily have AK #'s. The operator must provide the AK # and indicate the primary freshwater drainage where the vessel will operate.

The freshwater logbook does not collect targeted species information like the saltwater logbook, it collects information on species kept and released regardless of what was targeted or sought after. A trip is counted if a logbook data page is submitted with effort information regardless of catch. Freshwater trips are assigned a region of the state based on the name of the site fished, each freshwater site is assigned a unique regional alpha code followed by a numeric code within the region in which it is located (Table 1).

Freshwater information collected were: kept and released numbers for king, coho, and sockeye salmon, cutthroat *O. clarkii*, rainbow and steelhead trout *O. mykiss*, lake trout *Salvelinus namaycush*, Dolly Varden *S. malma*, Arctic grayling *Thymallus arcticus*, northern pike *Esox lucius*, sheefish *Stenodus leucichthys* and a category for the number of all other fish not already listed.

Business operators are allowed to and even encouraged to pick up as many logbooks as they anticipated needing during the course of the season. The ability to acquire as many logbooks as are needed prevents them from having to make multiple trips to an ADF&G office. As a result, numerous businesses ended up getting more logbooks than were eventually used. Because of this, ADF&G differentiates between the number of logbooks issued versus the number that are actually used or activated.

Vessel Registration

Vessel registration information was collected when a saltwater or freshwater logbook was issued to a business (Appendix D1 and D2). Registration information included the Department of Motor Vehicles (DMV) number or the U.S. Coast Guard vessel documentation number. Upon completion of vessel registration with ADF&G, each vessel was provided with two decals and year tags to indicate that the vessel is to be used in the guide industry (Appendix D3 and D4). Decals must be applied and visible on both sides of the vessel.

LOGBOOK OUTREACH, VALIDATION AND VERIFICATION

In December 2005, the Commissioner of the ADF&G issued a statement that mandated and detailed strategies for assuring the accuracy of the reporting of Pacific halibut harvest for the saltwater charter logbook through outreach and validation.

Outreach

An outreach program was initiated to reach as many operators as possible to field questions and to ensure compliance with the reporting requirements. The outreach program was conducted on-site (in the field) by ADF&G employees and off-site from the Anchorage ADF&G office.

On-site Logbook Inspections

Logbook outreach occurred in parts of the Southeast and Southcentral regions in conjunction with existing creel survey and port sampling programs. "Courtesy logbook inspections" were

conducted as time allowed by ADF&G creel and port sampling technicians during their regular dockside checks of the primary fisheries from May through September. In addition, management staff continued with periodic checks of charter logbooks while in the field. Logbooks were inspected to make sure that they were filled out correctly, and staff answered any questions about how they should be filled out. These checks were not intended for enforcement or for evaluating the accuracy of data but rather as another opportunity to encourage compliance and completeness and as an indicator of how important logbook data are to ADF&G.

Off-site Logbook Review

The goal of the outreach program was to ensure compliance with all reporting requirements, by emphasizing education early in the season. Off-site outreach was conducted by the Division of Sport Fish, Research and Technical Services (RTS) staff in the Anchorage office. All logbook trip data was subject to a reporting deadline. Logbook data pages were required to be completed and returned to ADF&G on a weekly basis as specified in the instructions of both the saltwater and freshwater logbooks. Timely submission was a requirement to facilitate recall and to allow ADF&G staff to review each data page for completeness and legibility. All logbook data sheets were received by RTS in Anchorage where ADF&G data entry staff date-stamped each data page with the date received, reviewed each page for incomplete, illegible or erroneous information, and conducted phone calls to business owners and guides for follow up and clarification. Calls early in the season were intended to alleviate repeat errors in reporting which were thought to result in fewer calls being necessary later in the fishing season.

As logbook data sheets were received, RTS staff conducted reviews by monitoring all data for completion and legibility prior to data entry. In the event that some of the logbook data sheets required verification from the operator or guide, staff would place phone calls.

Phone calls to the business owners and guides significantly improved the quality of the data, minimized reoccurring mistakes by the guide, increased compliance, and contributed to the outreach portion of this program. Logbook data entry staff contacted charter operators to resolve logbook reporting issues and to improve future reporting. These calls were intended to improve data quality and reinforce the message to the guide industry that logbook data are important and are consistently being reviewed.

Number of follow-up calls to Operators by year.				
2006	2007	2008	2009	2010
3,011	1,415	2,160	780	830

Follow up phone calls have become a valuable outreach tool and will continue to be a standard procedure in the future.

Validation

In-season Saltwater Logbook Editing

Computer routines have been written to check and validate the following saltwater data fields during the fishing season as logbook data pages are returned.

- Validate the guide license is filled in and valid.
- Validate the date is filled in and in 2010.

- Validate the port of landing is entered and is in the valid port site table.
- If hours are listed verify a statistical area is listed for the appropriate effort.
- Verify the statistical area listed is a valid statistical area.
- If there is harvest verify the appropriate statistical area is filled in.
- If a statistical area is filled out verify the appropriate hours field in filled in.
- Verify a statistical area is filled in (both can't be blank).
- Verify hours are filled in (both can't be blank).
- Validate possible incorrect stat areas that appear to be valid;
    - If data entry mistakenly enters the hours info in the statistical area the first statistical area that starts with the same number will be auto populated and accepted as valid.
- Check to see which log pages were turned in more than 7 days after the due date.
- Verify logbooks are checked out to a business and not a guide.
- Check all records with more than 12 hours listed.
- Check for duplicate logbook pages.
- Check trips that don't have paying angler records.
- Verify the date fished is not greater than the date the log page is received by ADF&G.

Post-season Saltwater Logbook Editing

At the end of the fishing season, computer routines check and validate the above listed items in addition to the following saltwater data fields in preparation for developing summaries (Appendix E).

- All of the in-season edits are re-run.
- Check to make sure fish kept are within the limits for the area fished.
- Validate and review excessively large numbers of released fish based on frequency distribution analysis.

In-season Freshwater Logbook Editing

Computer routines have been written to check and validate the following freshwater data fields during the fishing season as logbook data pages are returned.

- Validate the guide license number is filled in and valid.
- Validate the date is filled in and in 2010.
- Validate the site code is entered and is in the valid site code table.
- Check to make sure there are paying clients (not comped or crew) on the trip.
- Check to see which log pages were turned in more than 7 days after the due date.
- Check for duplicate logbook pages.
- Verify the date fished is not greater than the date the log page is received by ADF&G.
- Verify logbooks are checked out to a business and not a guide.
- Verify Kenai River trips weren't taken on Sunday or Monday in May – July.
- Check trip records that don't have angler records.

Post-season Freshwater Logbook Editing

At the end of the fishing season, computer routines check and validate the above listed items in addition to the following freshwater data fields in preparation for developing summaries (Appendix F).

- All of the in-season edits are re-run.
- Check to make sure fish kept are within the limits for the site fished.
- Check to make sure the fish caught are valid species for the site fished.
- Validate excessively large numbers of released fish based on frequency distribution analysis.
- Recode 'Other' site codes to correct values if they exist in the site code table.
- Recode sites with 'System' in the description to a more specific site code if available.
- Check records with 6 clients to verify the next page isn't part of the same trip.

Verification

Logbook data were compared to actual counts of harvested fish (verified) and to reported harvest data (unverified) from onsite interviews. These comparisons are ongoing and are part of a more comprehensive evaluation of logbook data quality (Meyer and Powers *Unpublished*).

Two unique methods will be used to conduct post-season verification of logbook data:

1. A freshwater and saltwater comparison will be made between logbook data and guided trip information collected from the Alaska Statewide Harvest Survey (SWHS; Jennings et al. 2010).
2. The data collected from the logbooks was compared to the data collected in the saltwater creel programs administered through ADF&G. Saltwater creel programs include the *Assessment of Recreational Halibut and Groundfish Harvest in Southcentral Alaska* program in Homer, *Haines Marine Sport Fishery Harvest in Southeast Alaska* (Chapell 2010), and *Harvest estimates for selected marine sport fisheries in Southeast Alaska* (Wendt and Jaenicke *In prep*).

RESULTS

GUIDE AND BUSINESS LICENSING

In 2010, 1,452 sport fishing businesses and 3,034 sport fishing guides were licensed with ADF&G to provide sport fishing services in Alaska. The total number of businesses and guides includes all saltwater and freshwater operators. Of the 1,452 sport fishing businesses licensed in 2010, 1,323 were combination owner/guide licenses. Physical addresses of both the businesses and guides in 2010 indicated that 88% of the businesses reported Alaska residency, and 12% were from other residency strata (defined as nonresidents), 72% of the guides were residents and 28% were nonresidents.

The licensed businesses and guides were subtotaled by region for Southeast, Southcentral, and Other Alaska, including the Arctic-Yukon-Kuskokwim area and nonresident license applicants. In 2010 26% of the licensed businesses had physical addresses in Southeast, 57% in Southcentral, 5% had permanent addresses in other parts of Alaska, and 12% had nonresident addresses based on their license applications. In 2010, 16% of those that licensed as guides only

had permanent addresses in Southeast, 38% in Southcentral, 5% in other parts of Alaska and 41% had nonresident addresses based on their license applications (Table 2).

Based on the submission of logbook data pages with trip information in 2006, 777 businesses provided saltwater services, 503 provided freshwater services and 140 businesses provided both freshwater and saltwater services. In 2007, 786 businesses provided saltwater services, 513 provided freshwater services and 132 businesses provided both freshwater and saltwater services. In 2008, 766 businesses provided saltwater services, 508 provided freshwater services and 122 businesses provided both freshwater and saltwater services (Sigurdsson and Powers 2010). In 2009, 690 businesses provided saltwater services, 474 provided freshwater services and 112 businesses provided both freshwater and saltwater services. In 2010, 660 businesses provided saltwater services, 430 provided freshwater services and 116 businesses provided both freshwater and saltwater services (Table 3 and Table 4).

AYK	71	68	69	67	62	194	224	222	203	200
Total[d]	643	645	630	586	546	1,518	1,579	1,633	1,375	1,348

Note: Data are current as of 05/24/2011

[a] Active Business counts are based on the business number listed on the signout sheet of a logbook (this can be a business only or a combined business/guide license) and the submission of at least one log page from the logbook.

[b] Active Guide counts are based on the guide number written on each log page (this can be a guide only or a combined business/guide license) and the submission of at least one log page showing that guide license number.

[c] Region is based on the site code provided for the site fished on each logbook page.

[d] Total is not additive because a business or guide could operate in multiple regions. Includes businesses and guides that offered both freshwater and saltwater services.

VESSELS

Saltwater

The number of vessels registered to provide saltwater sport fishing charter services was 1,671 in 2006, 1,666 in 2007, 1,601 in 2008, a 1,444 in 2009, and 1,389 in 2010 (Table 5). A vessel, though registered, is not considered "active" unless that vessel was used on one or more guided trip(s) as indicated by the submission of a logbook data page. Of the 1,671 saltwater vessels registered in 2006, 1,368 were active, of the 1,666 vessels registered in 2007, 1,409 were active, in 2007, of the 1,601 registered vessels, 1,353 were active, in 2009, 1,444 saltwater vessels that were registered, 1216 were active, and in 2010, of the 1,389 registered saltwater vessels, 1,172 were actually active. Based on the primary port of operation indicated at registration and port of offloading, 644 saltwater vessels operated in Southeast and 528 operated in Southcentral in 2010, the lowest number recorded in the last five years (Table 5).

Table 5.–Number of registered and active saltwater vessels by region, 2006–2010.

	Registered Vessels[a]					Active Vessels[b]				
Region	2006	2007	2008	2009	2010	2006	2007	2008	2009	2010
SE	926	918	905	807	778	747	768	757	670	644
SC	745	748	697	637	611	622	641	596	547	528
Total[c]	1,671	1,666	1,601	1,444	1,389	1,368	1,409	1,353	1,216	1,172

Note: Data are current as of 05/24/11.

[a] Region is based on primary port of operation listed on the sign-out sheet

[b] Region is based on primary port of off loading, salmon and bottomfish statistical area.

[c] Total is not additive because vessels can operate in both regions.

Logbook data indicate that vessels will target all possible species; bottomfish, salmon and both during the course of a fishing season (Table 6).

Table 6.–Number of active saltwater vessels that made at least one trip in each target category, by region, 2006–2010.

		Target[a]			No Statistical
Year	Region[b]	Salmon	Bottomfish	Both	Area Reported
2006	SE	631	495	637	5
	SC	383	551	486	6
	Total	1,014	1,046	1,123	11
2007	SE	637	494	676	49
	SC	377	576	495	32
	Total	1,014	1,070	1,171	81
2008	SE	622	534	648	55
	SC	325	546	441	22
	Total	947	1,080	1,089	77
2009	SE	538	417	586	27
	SC	269	497	402	17
	Total	807	914	988	44
2010	SE	514	401	567	63
	SC	245	476	385	43
	Total	759	877	952	106

Note: Data are current as of 05/24/2011.

[a] Target is based on salmon and bottomfish statistical areas.

[b] Region is based on primary port of off loading, salmon and bottomfish statistical area.

Freshwater

Based on the primary drainage and sites fished, many more freshwater vessels operate in Southcentral than in other regions between 2006 and 2010 (Table 7).

Table 7.–Number of registered freshwater vessels by year and region[a], 2006–2010.

Year	SE	SC	AYK	Unknown[b]	Total[c]
2006	148	1,717	221	2	2,086
2007	131	1,668	240	2	2,040
2008	122	1,743	262	2	2,128
2009	97	1,642	236	2	1,976
2010	96	1,607	206	4	1,912

Note: Data are current as of 05/24/2011.

[a] Region is based on primary drainage listed on the vessel registration sheet. If region could not be determined based on primary drainage, then the area fished was used.

[b] Insufficient information available during registration and on fishing activity.

[c] Total not additive because a vessel could be registered and operate in more than one region.

TRIPS

Saltwater

Logbook data indicate that 65,671 saltwater charter trips were conducted statewide in 2006, 67,152 trips were conducted in 2007, 62,005 trips were conducted in 2008, 48,506 saltwater trips were conducted in 2009, and 48,742 in 2010. During all five years, a majority of the trips that targeted salmon only, occurred in Southeast Alaska, whereas, the majority of trips that targeted bottomfish only, occurred in Southcentral Alaska. During the same five years, operators in Southeast conducted significantly more trips in which both salmon and bottomfish were targeted on the same trip. If a statistical area fished was not provided or indicated, no targeted species was assigned (Table 8).

Table 8.–Number of saltwater trips by targeted species by region, 2006–2010.

		Species Targeted[a]				
Year	Region[b]	Salmon	Bottomfish	Both	No Statistical Area Reported	Total
2006	SE	14,309	6,146	18,628	5	39,088

	Total	15,635	22,633	28,778	106	67,152
2008	SE	11,338	7,368	18,634	108	37,448
	SC	2,135	15,733	6,617	72	24,557
	Total	13,473	23,101	25,251	180	62,005
2009	SE	8,789	4,842	14,498	45	28,174
	SC	2,008	12,604	5,699	21	20,332
	Total	10,797	17,446	20,197	66	48,506
2010	SE	7,613	5,368	14,740	99	27,820
	SC	2,024	13,219	5,591	88	20,922
	Total	9,637	18,587	20,331	187	48,742

Note: Data are current as of 05/24/2011.

[a] Species targeted is based on the provision of salmon and/or bottomfish statistical areas.

[b] Region is based on the port of offloading, salmon and bottomfish statistical area.

Freshwater

In 2006, 46,781 freshwater guided fishing trips were taken, 48,697 were taken in 2007, and 48,501 were taken in 2008, and 37,554 freshwater trips occurred in 2009. In 2010, 37,791 freshwater trips were conducted statewide, 83% of those trips took place in Southcentral, 11% in the Arctic-Yukon-Kuskokwim (AYK) area, and 6% in Southeast (Table 9).

Table 9.–Number of freshwater trips by region, 2006–2010.

Year	SE	SC	AYK	Total
2006	3,040	39,479	4,262	46,781
2007	3,241	40,557	4,899	48,697
2008	3,113	40,587	4,801	48,501
2009	2,400	31,305	3,849	37,554
2010	2,459	31,267	4,065	37,791

Note: Data are current as of 05/24/2011.

[a] Region is based on the area code of the site code listed on each logbook page.

LOGBOOK TRIP EFFORT AND HARVEST

Statewide saltwater charter trips decreased significantly in 2009 after an increase between 2006 and 2007, and a slight decrease in 2008 (Table 10). Saltwater angler days have steadily decreased from 2006 to 2009 with a very slight increase in 2010 (Table 10). For freshwater guided fishing statewide, the number of trips and angler days fished appeared to remain steady from 2006 to 2008 until 2009 and 2010 when a notable decrease in freshwater trips and angler days occurred (Table 10).

SALTWATER

In 2010, 82% of the saltwater logbooks that were issued were activated (effort or catch reported). From 2006 through 2010, the saltwater logbook collected information on client residency. Records show that in 2010, 87% of the angler days of effort in the saltwater charter salmon fishery were conducted by nonresident anglers, compared with 10% by residents and 3% by crew, comped anglers or those of unknown residency. Records also indicate that for 2010, 79% of the angler days of effort in the saltwater charter bottomfish fishery were conducted by nonresident anglers, 16% by residents and 5% by crew fishing, comped anglers or those of unknown residency (Tables 11-12).

In 2010 coho and king salmon made up 65% and 14% respectively of the harvest statewide, with the remaining 21% consisting of a combination of other salmon (Table 11).

Based on the number of angler days fished in 2010, 65% of the salmon participation took place in Southeast, and 35% in Southcentral. Within that same period, 40% of the bottomfish participation took place in Southeast, and 60% occurred in Southcentral (Table 12).

Of the bottomfish harvested in 2010, halibut were the most harvested species at 264,467 fish, consisting of 58% of the total bottomfish harvest statewide. Statewide, 19% of the halibut harvest occurred in Southeast and 81% occurred in Southcentral (Table 12). It should be noted that in Southeast, IPHC area 2C, anglers fishing from a charter vessel were limited to one halibut per day, whereas in Southcentral, IPHC area 3A, guided anglers were allowed two halibut per day in 2010.

FRESHWATER

In 2010, 64% of the freshwater logbooks that were issued were activated. In 2010, 8% of the freshwater participation occurred in Southeast, 84% occurred in Southcentral, and 8% took place in the Alaska-Yukon-Kuskokwim (AYK) or interior Alaska (Table 13).

Angler days of effort in 2010 indicate that 88% of the anglers in the freshwater guided fishery were nonresident anglers, 10% were residents and 2% were crew fishing, comped anglers or those of unknown residency. In Southeast, 94% of the guided/chartered fishing was conducted by nonresident anglers, 88% were nonresidents in Southcentral, and 90% of the anglers in AYK were nonresidents.

In 2010, coho, sockeye and king salmon were the predominant salmon species, making up 50%, 33% and 13% respectively of the harvest statewide, with the remaining 4% consisting of a combination of other fish (Table 13).

DISCUSSION

GUIDE AND BUSINESS LICENSING

The 2006 through 2010 ADF&G guide and business licensing process differed from the registration process prior to 2005 in terms of the approach used, fees, and the information collected on license applications. The current licensing approach reflects changes made in 2005 to initiate the new minimum requirements established by HB 452. Guides and businesses offering guided fishing services are now held to a higher standard of compliance than previous to 2005. Violations of the guide licensing statutes or regulations adopted under HB 452 are either violations or misdemeanors, and courts are authorized to revoke the license of the guide or business under certain conditions, such as repeated convictions within a three-year period.

ADF&G no longer collects the information collected in earlier years on the type (saltwater vs. freshwater) and location (regions/subareas) of services. The 2006-2010 licensing processes have been similar and provide a basis for establishing a long-term database of licensed businesses and guides. Charter/guide business and guide licensing still reflects the intent to operate, while actual activity is confirmed by the submission of logbook trip data.

LOGBOOKS

ADF&G initiated a mandatory saltwater charter logbook program in 1998. The BOF adopted regulations requiring annual registration of sport fishing guides and businesses, and logbook reporting. The logbook and registration/licensing program was intended to provide information on actual participation and harvest by individual vessels and businesses.

Recent emphasis from ADF&G management staff and NPFMC on more timely saltwater data spurred discussions on how to hasten logbook data availability. Up until 2010, logbook data entry involved collecting logbook sheets from the guide, entering the logbook data into a logbook database, and editing the data. This process could take RTS from six to eight weeks. Discussions included the possibility of an electronic submission option that would provide data to ADF&G and NPFMC staff in a more timely manner. Any option for a logbook change would have to include a design that is appealing and easy for the guide industry to use, such that they would perceive it as beneficial to a process that they already consider "burdensome." Electronic reporting options were, at first, appealing to fulfill both management needs and halibut management needs for more timely information. Further discussions concluded that electronic reporting would still necessitate the use of a paper version of the logbook due to enforcement and trip recording requirements. Data would still need to be verified for errors, be entered accurately into a database, and be available for onsite inspection. There are currently no options for going "paperless", and no perceived benefit to managers or the industry that would result from the process. The "paperless" approach would require a change in regulation for reporting requirements along with extensive research into the cost of electronic reporting. The discussion for going "paperless" will continue however.

Upon further discussion and research, an alternative approach was considered. In 2009, ADF&G programmers researched the option of developing a system that would electronically scan the image of a redesigned logbook data page. Scanned images would minimize data entry time but allow for data entry personnel to fix images flagged as unrecognizable, thus maintaining data accuracy and quality. This option is not any more "burdensome" to the industry and would

likely make the weekly reporting requirement more palatable knowing that the data would be more immediately available.

In 2010, the saltwater logbook data page design change incorporated the ability to use the new scanning software. Due to first year design "glitches" and software troubleshooting, the 2010 saltwater data was not available in as timely a manner as originally hoped. A program review with office assistants and discussions with the project analyst programmer resulted in adjustments to the design format and software to be implemented for 2011.

For 2011, ADF&G and National Marine Fisheries Service (NMFS) will be working collaboratively to modify the logbook requirements associated with the federal Charter Halibut Program (CHP), a program that establishes limited access to the guided halibut fishery.

Preliminary results from verification studies comparing the accuracy of logbook harvest data with the statewide harvest survey estimates, and onsite creel programs are favorable. Logbook data will continue to be compared to counts from those two programs. Comparisons are ongoing and are part of a more comprehensive evaluation of logbook data quality. Logbook halibut data has been used extensively. Saltwater and freshwater logbook data have also been used for a variety of regulatory analyses for state managed species.

ACKNOWLEDGEMENTS

Southeast and Southcentral regional and area staff, especially numerous front counter personnel, have been critical to the success of the ADF&G sport fishing guide and business licensing and logbook program. The above staff along with Bob Chadwick and Mike Jaenicke from Southeast, Scott Meyer, Matt Miller and Tom Vania from Southcentral, and Tom Taube from Fairbanks have also provided valuable comments during the process of licensing and logbook form design.

Doug Vincent-Lang continued to provide valuable insight on the history of the program and facilitated numerous discussions with NOAA and IPHC. Bob Clark's thoughtful insight and direction has been very much appreciated. We also acknowledge the expertise and infinite patience exhibited by Joanne MacClellan in preparing this report. Her knowledge and willingness to assist is invaluable.

Kirk Brogdon of the division's Research and Technical Services section deserves considerable credit for designing and implementing efficient information management systems for data capture, cleaning, storage, and reporting.

Kathy Kush should be acknowledged for her incredible skills in streamlining the licensing process and making sure that all license applications are processed in a timely manner that has allowed the guides and businesses to start operation without delay.

Margaret Nussbaum, Diane Novinska, Raili Kedzior, and Andrea Hamby deserve credit for receiving, editing, scanning, entering, and filing the licensing and logbooks forms. With their perseverance, we met reporting deadlines that seemed nearly impossible with available staffing and workloads.

We also acknowledge the cooperation of the thousands of sport fishing guides and sport fishing businesses that licensed and completed their logbooks in a timely and compliant manner.

Appendix A1.–Sport fish business owner/guide license application, 2010.

-continued-

INSTRUCTIONS FOR THE 2010 SPORT FISH BUSINESS OWNER/ GUIDE LICENSE APPLICATION

Attention: ***The following will apply without exception:***

1. **All applicable sections of the license application must be complete and legible prior to ADF&G validation. No "pending", "unknowns," or blanks will be accepted.**
2. **Incomplete license applications will be returned resulting in a processing delay.**
3. **A signature is required.**
4. **This is a license application only. A *permanent* license will be mailed within 21 business days.**
5. **There may be requirements by other state and federal agencies to operate as a guide in Alaska.**

INSTRUCTIONS:

SECTION A: ALL applicants must complete this section.

SECTION B: BUSINESS OWNER OR THEIR AGENT: Complete this section if you are the owner/agent of the sport fishing business. This section should be filled out even if the owner does not intend to personally guide clients. An agent for this business **CANNOT** apply as a guide on the same application. A separate license application must be submitted.

LIABILITY INSURANCE REQUIREMENT: General liability or marine protection that covers at least $100,000 for each incident and $300,000 for all incidents in a year. Insurance must cover **ALL** periods of time when the owner or owner's employees are providing sport fishing services to clients. Insurance must be current, **NOT** pending.

IMPORTANT NOTICE TO BUSINESS OWNERS

State regulation (5 AAC 75.075) requires that all operators providing sport fishing guide services in Alaska must apply annually for a license with the Department of Fish and Game **before** guiding services begin. Business owners are required to register all charter vessels with ADF&G and acquire a logbook prior to commencement of guiding activities. ***Guides hired by an operator must keep a copy of the ADF&G business license in their possession while guiding.***

SECTION C: GUIDES: Complete this section if you intend to guide for a sport fish operation owned by someone other than you or if you are the business owner who also intends to guide (owner/operator).

U.S. COAST GUARD OPERATOR'S LICENSE: A licensed sport fish guide **must** have, at minimum, a Limited OUPV for Western Waters in Alaska or 6-pak U.S.C.G. operator's license in their possession while operating a motorized vessel with clients or transporting clients in a motorized vessel on navigable waters. Navigable waters are determined by the U.S. Coast Guard (907) 271-6736.

Note: Effective April 20, 2009 the U.S.C.G. began issuing the Merchant Mariner Credentials (MMC). Applicants must provide the U.S.C.G. license number, expiration date and date of birth (DOB).

IMPORTANT NOTICE TO GUIDES

State regulation (5 AAC 75.075) requires that all licensed guides providing sport fishing guide services in Alaska must apply annually for a license with the Department of Fish and Game ***before*** guiding activities begin.

WHAT A GUIDE MUST HAVE IN POSSESSION WHILE GUIDING

A sport fish business owner or guide should be able to present all documents required for licensing upon request by a representative of the department of fish and game, or any peace officer of the state. While engaged in providing sport fishing guide services, a sport fishing guide shall have the following readily available for inspection:

- A current sport fishing guide license;
- A copy of the current ADF&G sport fishing business license of the guide's employer;
- A current Alaska sport fishing license, tags, stamps or permits that are required to engage in the sport fishery for which the guide services are providing;
- An identification card issued to the sport fishing guide by a state or federal agency that bears a photo of the sport fishing guide.

RE: Support for Senate Bill 91

Dear Senators Hoffman, Stedman, and Committee Members,

United Fishermen of Alaska (UFA) represents 37 Alaska commercial fishing organizations from fisheries throughout Alaska and the federal waters off our shores. Altogether our member organizations and individual memberships represent thousands of professional Alaska commercial fishermen.

UFA supports renewal of the licensing of sport fishing operators and sport fishing guides as included in SB 91, and continuation of the logbook program for guided fisheries. Alaska's worldwide reputation for excellence in fisheries management is based in large part on timely and accurate reporting of all harvests, and is also affected by the professionalism of individuals that host our guided visitors. Continuation of these programs is essential to the long term health of fishery resources for all participants.

Based on this level of importance, we also recommend that the committee consider renewing the program for more than the one year that is in the current version of SB 91.

Thank you for your consideration.

Sincerely,

Mark Vinsel
Executive Director

CC: Senator Lesil McGuire

CS FOR SENATE BILL NO. 92(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR EGAN

A BILL

FOR AN ACT ENTITLED

"An Act relating to dental hygienists, dentists, dental assistants, dental hygiene, and dentistry."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 08.32.010 is amended to read:

Sec. 08.32.010. License required. Except as provided in AS 08.32.095, a person may not practice, offer or attempt to practice, or advertise or announce as being prepared or qualified to practice dental hygiene without a license [AND A CURRENT CERTIFICATE OF REGISTRATION].

* **Sec. 2.** AS 08.32 is amended by adding a new section to read:

Sec. 08.32.014. Qualifications for license. (a) An applicant for a license to practice dental hygiene shall

(1) provide evidence to the board that the applicant

(A) has successfully completed an academic program in dental hygiene of at least two years duration that, at the time of graduation, is

accredited by the Commission on Dental Accreditation of the American Dental Association and is approved by the board;

(B) has passed a written theory examination of the American Dental Association Joint Commission on National Dental Examinations or an equivalent examination approved by the board;

(C) has successfully passed a state or regional dental hygiene clinical examination approved by the board;

(D) has not had a license to practice dental hygiene revoked, suspended, or voluntarily surrendered in this state or another state;

(E) is not the subject of an adverse decision based on a complaint, investigation, review procedure, or other disciplinary proceeding within the five years immediately preceding application or of an unresolved complaint, investigation, review procedure, or other disciplinary proceeding undertaken by a state, territorial, local, or federal dental licensing jurisdiction;

(F) is not the subject of an unresolved or adverse decision based on a complaint, investigation, review procedure, or other disciplinary proceeding undertaken by a state, territorial, local, or federal dental licensing jurisdiction or law enforcement agency that relates to criminal or fraudulent activity, dental malpractice, or negligent dental care and that adversely reflects on the applicant's ability or competence to practice as a dental hygienist or on the safety or well-being of patients;

(G) is not the subject of an adverse report from the National Practitioner Data Bank or the American Association of Dental Examiners Clearinghouse for Board Actions that relates to criminal or fraudulent activity or dental malpractice;

(H) is not impaired to an extent that affects the applicant's ability to practice as a dental hygienist;

(I) has not been convicted of a crime that adversely reflects on the applicant's ability or competency to practice as a dental hygienist or that jeopardizes the safety or well-being of a patient; and

(2) meet the other qualifications for a license established by the board

by regulation.

(b) An applicant for a license to practice dental hygiene may be interviewed in person by the board or a designee of the board. The interview must be recorded. If the application is denied on the basis of the interview, the denial shall be stated in writing, with the reasons for it, and the record shall be preserved.

* **Sec. 3.** AS 08.32.030 is amended to read:

Sec. 08.32.030. Licensure by credentials. The board may provide for the licensing without examination of a dental hygienist who

(1) meets the criteria of **AS 08.32.014** [AS 08.32.020(a)];

(2) **submits proof of continued competence as specified in regulations adopted by the board;**

(3) is currently licensed to practice dental hygiene in another state or territory of the United States; and

(4) [HAS SUCCESSFULLY PASSED A STATE OR REGIONAL DENTAL HYGIENE CLINICAL EXAMINATION THAT THE BOARD HAS DETERMINED IS AT LEAST EQUIVALENT IN SCOPE, QUALITY, AND DIFFICULTY TO THE ALASKA CLINICAL EXAMINATION;

(3) HAS BEEN IN ACTIVE CLINICAL DENTAL HYGIENE PRACTICE AVERAGING NOT LESS THAN 700 HOURS A YEAR FOR EACH OF THE TWO YEARS IMMEDIATELY PRECEDING APPLICATION FOR STATE LICENSURE;

(4) HAS NOT FAILED THE CLINICAL DENTAL HYGIENE EXAMINATION OF THIS STATE;

(5) HAS NOT PREVIOUSLY HAD A LICENSE TO PRACTICE DENTAL HYGIENE ISSUED BY ANY STATE OR REGION REVOKED;

(6) HAS COMPLETED NOT LESS THAN 14 HOURS OF CONTINUING EDUCATION RELATED TO CLINICAL HYGIENE IN THE TWO YEARS BEFORE FILING AN APPLICATION WITH THE BOARD; THE CONTINUING EDUCATION REQUIRED UNDER THIS PARAGRAPH MUST BE APPROVED BY THE BOARD, THE AMERICAN DENTAL ASSOCIATION, THE ACADEMY OF GENERAL DENTISTRY, OR THE AMERICAN DENTAL

HYGIENISTS' ASSOCIATION;

(7)] pays the fees **established** [REQUIRED] under **AS 08.01.065** [AS 08.32.097; AND

(8) IS NOT THE SUBJECT OF AN UNRESOLVED COMPLAINT, REVIEW PROCEDURE, OR DISCIPLINARY PROCEEDING UNDERTAKEN BY A DENTAL OR DENTAL HYGIENE LICENSING JURISDICTION].

* **Sec. 4.** AS 08.32.070 is amended to read:

Sec. 08.32.070. Licensing [REGISTRATION AND LICENSING] of dental hygienists. The board shall **issue** [REGISTER] each successful applicant [AND ISSUE THE APPLICANT] a license upon payment of all required fees.

* **Sec. 5.** AS 08.32.071 is amended to read:

Sec. 08.32.071. Renewal of license [REGISTRATION]. At least 60 days before expiration of a **dental hygienist's license** [LICENSEE'S REGISTRATION CERTIFICATE], the Department of Commerce, Community, and Economic Development shall **notify the** [MAIL A FORM FOR RENEWAL OF REGISTRATION TO EACH] licensed dental hygienist. Each licensee who wishes to renew a **dental hygienist's license shall submit a completed license renewal form,** [REGISTRATION CERTIFICATE SHALL COMPLETE THE FORM AND RETURN IT WITH] the appropriate fee, and evidence of continued professional competence as required by the board. The Department of Commerce, Community, and Economic Development shall, as soon as practicable, issue a **dental hygienist license** [REGISTRATION CERTIFICATE] valid for a stated number of years. [EACH LICENSEE SHALL KEEP THE REGISTRATION CERTIFICATE BESIDE OR ATTACHED TO THE LICENSEE'S LICENSE.] Failure to receive **notification from the department under this section** [THE REGISTRATION FORM] does not exempt a licensee from renewing **the licensee's dental hygienist license** [REGISTRATION].

* **Sec. 6.** AS 08.32.081 is amended to read:

Sec. 08.32.081. Lapse and reinstatement of license. A licensed dental hygienist who does not pay the renewal [REGISTRATION] fee **under AS 08.32.071** forfeits the hygienist's license. The board may reinstate the license without examination within two years of the date on which payment was due upon written

application, proof of continued professional competence, and payment of all unpaid renewal fees and any penalty fee established under AS 08.01.100(b).

* **Sec. 7.** AS 08.32.085(a) is amended to read:

(a) The board shall issue a restorative function endorsement to a **licensed** dental hygienist [WHO IS LICENSED UNDER THIS CHAPTER] if the licensee furnishes evidence satisfactory to the board that the licensee has

(1) successfully completed a **course offered by or under the auspices of a** program accredited by the Commission on Dental Accreditation of the American Dental Association or other **equivalent** course **or program** [OF INSTRUCTION] approved by the board; and

(2) passed the Western Regional Examining Board's restorative examination or other equivalent examination approved by the board within the five years preceding the licensee's endorsement application, or the licensee is licensed**, certified, or otherwise permitted** in another state or United States territory to perform restorative functions.

* **Sec. 8.** AS 08.32.095(a) is amended to read:

(a) A person enrolled as a [FULL-TIME] student in an accredited [SCHOOL OF] dental hygiene **program** may perform dental hygiene procedures as part of a course of study without a license if

(1) the procedures are performed under the

(A) general [DIRECT] supervision of a member of the faculty who is licensed under AS 08.36, **and under the direct or indirect supervision of a member of the faculty who is licensed under this chapter;** or

(B) [UNDER THE] direct **or indirect** supervision of a **member of the faculty who** [TEAM OF LICENSED FACULTY DENTISTS, AT LEAST ONE OF WHOM] is licensed under AS 08.36; and

(2) the clinical program has received written approval from the board.

* **Sec. 9.** AS 08.32.110(a) is amended to read:

(a) The role of the dental hygienist is to assist members of the dental profession in providing oral health care to the public. A person licensed to practice the

profession of dental hygiene in the state may,

(1) **under the general supervision of a licensed dentist,**

(A) perform preliminary charting and triage to formulate a dental hygiene assessment and dental hygiene treatment plan;

(B) remove calcareous deposits, accretions, and stains from the exposed surfaces of the teeth beginning at the epithelial attachment by scaling and polishing techniques;

(C) remove marginal overhangs;

(D) use local periodontal therapeutic agents;

(E) perform nonsurgical periodontal therapy;

(F) [(2) APPLY TOPICAL PREVENTIVE AGENTS;

(3) APPLY PIT AND FISSURE SEALANTS;

(4) PERFORM ROOT PLANING AND PERIODONTAL SOFT TISSUE CURETTAGE;

(5)] perform other dental operations and services delegated by a licensed dentist if the dental operations and services are not prohibited by (c) of this section;

(G) [AND (6)] if certified by the board [AND UNDER THE DIRECT, INDIRECT, OR GENERAL SUPERVISION OF A LICENSED DENTIST], administer local anesthetic agents**; and**

(2) if certified by the board and under the direct or indirect supervision of a licensed dentist, administer and monitor nitrous oxide-oxygen conscious sedation.

*** Sec. 10.** AS 08.32.110(c) is amended to read:

(c) This section does not authorize delegation of

(1) **dental diagnosis, comprehensive** [DIAGNOSING,] treatment planning, and writing prescriptions for drugs; writing authorizations for restorative, prosthetic, or orthodontic appliances;

(2) operative or surgical procedures on hard or soft tissues [EXCEPT AS ALLOWED IN (a)(4) OF THIS SECTION]; or

(3) other procedures that require the professional competence and skill

of a dentist.

* **Sec. 11.** AS 08.32.110(e) is amended to read:

(e) This section does not prohibit a **licensed** dental hygienist

(1) with an endorsement issued under AS 08.32.085 from performing the activities authorized under AS 08.32.085; [OR]

(2) who has entered into a collaborative agreement approved by the board under AS 08.32.115 from performing the activities authorized under the collaborative agreement**; or**

(3) from performing a dental operation, procedure, or service a dentist may delegate to a dental assistant under AS 08.36.346.

* **Sec. 12.** AS 08.32.115(a) is amended to read:

(a) If the collaborative agreement is approved by the board under (d) of this section, a **licensed** dental hygienist with a minimum of 4,000 documented hours of clinical experience within the five years preceding application for the board's approval may enter into a collaborative agreement with a **licensed** dentist [LICENSED UNDER AS 08.36] in which the licensed dentist authorizes the **licensed** dental hygienist to perform one or more of the following:

(1) oral health promotion and disease prevention education;

(2) removal of calcareous deposits, accretions, and stains from the surfaces of teeth;

(3) application of topical preventive or prophylactic agents, including fluoride varnishes and pit and fissure sealants;

(4) polishing and smoothing restorations;

(5) removal of marginal overhangs;

(6) preliminary charting and triage **to formulate a dental hygiene assessment and dental hygiene treatment plan**;

(7) **the exposure and development of** radiographs;

(8) use of local periodontal therapeutic agents; and

(9) performance of nonsurgical periodontal therapy, with or without the administration of local anesthesia, subsequent to a licensed dentist's authorization or diagnosis as specified in the licensed hygienist's collaborative agreement.

* **Sec. 13.** AS 08.32.115(d) is amended to read:

(d) The board may approve a collaborative agreement between a licensed dentist and a **licensed** dental hygienist. However, the board may not approve more than five collaborative agreements with a licensed dentist, not including any collaborative agreements that have been terminated. A **licensed** dental hygienist shall notify the board of the termination of a collaborative agreement with a licensed dentist.

* **Sec. 14.** AS 08.32.160 is amended to read:

Sec. 08.32.160. Grounds for discipline, suspension, or revocation of license. The board may revoke or suspend the license of a dental hygienist, or may reprimand, censure, or discipline a licensee, if, after a hearing, the board finds that the licensee

(1) used or knowingly cooperated in deceit, fraud, or intentional misrepresentation to obtain a license**, certificate,** or **endorsement** [REGISTRATION];

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing or billing for professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime that affects the licensee's ability to continue to practice competently and safely;

(5) failed to comply with this chapter, with a regulation adopted under this chapter or under AS 08.36, or with an order of the board;

(6) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) addiction or dependence on alcohol or other drugs that impairs the licensee's ability to practice safely;

(C) physical or mental disability;

[(D) FAILURE TO KEEP INFORMED OF OR USE CURRENT PROFESSIONAL THEORIES AND PRACTICES;]

(7) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(8) performed clinical procedures [FOR COMPENSATION] without being under the supervision of a licensed dentist;

(9) did not conform to professional standards in delivering dental hygiene services to patients regardless of whether actual injury to the patient occurred.

*** Sec. 15.** AS 08.32.180 is amended by adding a new subsection to read:

(b) Notwithstanding AS 08.01.075(a)(8), the board may impose a civil fine not to exceed $25,000 for each violation of this chapter or a regulation adopted under this chapter.

*** Sec. 16.** AS 08.32.187(a) is amended to read:

(a) This chapter applies to a person who practices, or offers or attempts to practice, as a dental hygienist in the state except

(1) a dental hygienist in the military service in the discharge of official duties;

(2) a dental hygienist in the employ of the United States Public Health Service, United States Department of Veterans Affairs, **United States Indian Health** [ALASKA NATIVE] Service, or another agency of the federal government, in the discharge of official duties;

(3) a dental hygienist licensed in another state **or jurisdiction** who is teaching or demonstrating clinical techniques at a meeting, seminar, or limited course of instruction sponsored by a dental or dental auxiliary society or association or by an accredited dental or dental auxiliary educational institution;

(4) a dental hygienist employed in the state by an Indian health program, as that term is defined in 25 U.S.C. 1603, while providing dental hygiene services to a person the Indian health program is entitled to serve under 25 U.S.C. 450 et seq. (Indian Self-Determination and Education Assistance Act), as amended, and 25 U.S.C. 1601 et seq. (Indian Health Care Improvement Act), as amended.

*** Sec. 17.** AS 08.32.190 is amended by adding new paragraphs to read:

(6) "licensed dental hygienist" means a dental hygienist licensed under this chapter;

(7) "licensed dentist" means a dentist licensed under AS 08.36.

* **Sec. 18.** AS 08.36.010(a) is amended to read:

(a) There is created the Board of Dental Examiners consisting of nine members. Six members shall be licensed dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment, two members shall be dental hygienists licensed under AS 08.32 who have been engaged in the practice of dental hygiene in the state for five years immediately preceding appointment, and one member shall be a public member **who does not have a direct financial interest in the health care industry**.

* **Sec. 19.** AS 08.36.010 is amended by adding new subsections to read:

(c) Each member shall take an oath of office. The president or secretary elected under AS 08.36.030 may administer oaths. The oath shall be filed and preserved in the department.

(d) The board shall adopt a seal.

* **Sec. 20.** AS 08.36.030 is amended to read:

Sec. 08.36.030. Election of officers. (a) The board shall elect **from among its members**

(1) a president **who is a licensed dentist or licensed dental hygienist;** and

(2) a secretary**.**

(b) Officers elected under (a) of this section [FROM AMONG ITS MEMBERS, EACH TO] serve for a term not to exceed two years.

* **Sec. 21.** AS 08.36.070 is amended to read:

Sec. 08.36.070. General powers. (a) The board shall

(1) provide for the examination of applicants and **the credentialing and licensure of** [ISSUE LICENSES TO] those applicants it finds qualified;

(2) **maintain a registry of** [REGISTER] licensed dentists**,** [AND] licensed dental hygienists**, and certified dental assistants** who are in good standing;

(3) affiliate with the American Association of Dental **Boards** [EXAMINERS] and pay annual dues to the association;

(4) hold hearings and order the disciplinary sanction of a person who

violates this chapter, AS 08.32, or a regulation of the board;

(5) supply forms for applications, licenses, permits, certificates, and other papers and records;

(6) enforce the provisions of this chapter and AS 08.32 and adopt or amend the regulations necessary to make the provisions of this chapter and AS 08.32 effective;

(7) adopt regulations ensuring that renewal of **a license or certificate under this chapter or a license, certificate, or endorsement under AS 08.32** [REGISTRATION] is contingent upon proof of continued professional competence [BY A LICENSED DENTIST OR LICENSED DENTAL HYGIENIST];

(8) [PROVIDE THE DEPARTMENT WITH THE REQUIREMENTS FOR PROOF OF CONTINUED PROFESSIONAL COMPETENCE AND REQUEST THE DEPARTMENT TO MAKE THESE REQUIREMENTS AVAILABLE TO EACH LICENSED DENTIST AND LICENSED DENTAL HYGIENIST AT LEAST ONE YEAR BEFORE THE DATE ON WHICH THE DENTIST OR DENTAL HYGIENIST MUST RENEW REGISTRATION;

(9)] at least annually, cause to be published **on the Internet and** in a newspaper of general circulation in each major city in the state a summary of disciplinary actions the board has taken during the preceding calendar year;

(9) [(10)] issue permits or certificates to licensed dentists, licensed dental hygienists, and dental assistants who meet standards determined by the board for specific procedures that require specific education and training [;

(11) REGULATE THE REENTRY INTO PRACTICE OF INACTIVE DENTISTS AND DENTAL HYGIENISTS;

(12) REQUIRE, AS A CONDITION OF A LICENSE OR LICENSE RENEWAL ISSUED BY THE BOARD, THAT AN APPLICANT OR LICENSEE HAS, AT THE TIME OF LICENSING OR RENEWAL AND MAINTAINS THROUGHOUT THE PERIOD OF A LICENSE, CURRENT CERTIFICATION IN CARDIOPULMONARY RESUSCITATION TECHNIQUES, EXCEPT THAT THE BOARD MAY WAIVE THIS REQUIREMENT UNDER AN AGREEMENT WITH THE APPLICANT OR LICENSEE IF THE APPLICANT OR LICENSEE

DOCUMENTS, TO THE SATISFACTION OF THE BOARD, THE EXISTENCE OF A PHYSICAL IMPAIRMENT THAT RESULTS IN AN INABILITY TO BE CERTIFIED IN CARDIOPULMONARY RESUSCITATION TECHNIQUES AND THE AGREEMENT SPECIFIES THAT THE APPLICANT OR LICENSEE WILL ENSURE THAT ANOTHER PERSON WHO IS CERTIFIED IN CARDIOPULMONARY RESUSCITATION TECHNIQUES WILL BE IN THE SAME ROOM AS THE APPLICANT OR LICENSEE WHENEVER THE APPLICANT OR LICENSEE IS PRACTICING DENTISTRY ON A LIVING PATIENT WHO IS ALSO PRESENT; THE BOARD MAY INCLUDE IN THE AGREEMENT AN EXPIRATION DATE OR PROVIDE THAT THE AGREEMENT REMAINS IN EFFECT UNTIL REVIEWED BY THE BOARD].

(b) The board may

(1) order a licensed dentist or licensed dental hygienist to submit to a reasonable physical or mental examination if the dentist's or the dental hygienist's physical or mental capacity to practice safely is at issue; [AND]

(2) authorize **a designee of the board or the board's investigator** [ITS REPRESENTATIVE] to inspect the practice facilities or patient or professional records of a dentist at reasonable times and in a reasonable manner to monitor compliance with this chapter and with AS 08.32**; and**

(3) delegate the board's powers to act, hear, and decide matters as authorized by AS 44.62.

*** Sec. 22.** AS 08.36 is amended by adding a new section to read:

Sec. 08.36.073. Investigator. After consulting with the board, the department shall employ a person who is not a member of the board as the investigator for the board. The investigator shall

(1) conduct investigations into alleged violations of this chapter and into alleged violations of regulations and orders of the board;

(2) at the request of the board, conduct investigations based on complaints filed with the department or with the board; and

(3) be directly responsible and accountable to the board, except that only the department has authority to terminate the investigator's employment and the

department shall provide day-to-day and administrative supervision of the investigator.

*** Sec. 23.** AS 08.36.075(a) is amended to read:

(a) **The** [SUBJECT TO (b) OF THIS SECTION, THE] board shall establish standards **that comply with applicable federal law** for the registration**, use,** and inspection of dental radiological equipment, including standards for record keeping relating to the control panels and the use of the equipment. The **board may charge a fee for dental radiological equipment registered under this section** [INSPECTION STANDARDS ADOPTED BY THE BOARD MUST REQUIRE THAT AN INSPECTION BE PERFORMED BY A PERSON WHO HAS QUALIFICATIONS EQUIVALENT TO THE QUALIFICATIONS ESTABLISHED AS OF SEPTEMBER 7, 1998, IN THE "APPLICANT PROFILE AND JOB QUALIFICATION SUMMARY" FOR A STATE RADIOLOGICAL HEALTH SPECIALIST I].

*** Sec. 24.** AS 08.36.091 is amended to read:

Sec. 08.36.091. Records and reports. The board shall maintain

(1) a record of its proceedings;

(2) a **registry** [REGISTER] containing the name, office and home addresses, and other information considered necessary by the board [,] of each person licensed as a dentist or dental hygienist **or certified as a dental assistant**, [AND] a **registry** [REGISTER] of the licenses**, certificates, and endorsements** revoked by the board, and information on the status of each licensee **and each certified dental assistant**.

*** Sec. 25.** AS 08.36.100 is amended to read:

Sec. 08.36.100. License required. Except as provided in AS 08.36.238, a person may not practice, or attempt to practice, dentistry without a license [AND A CURRENT CERTIFICATE OF REGISTRATION].

*** Sec. 26.** AS 08.36.110 is amended to read:

Sec. 08.36.110. Qualifications for license. An applicant for a license to practice dentistry shall

(1) provide certification to the board that the applicant

(A) is a graduate of a dental school that, at the time of graduation, is **approved** [ACCREDITED] by the **board** [COMMISSION ON ACCREDITATION OF THE AMERICAN DENTAL ASSOCIATION];

(B) [HOLDS A CERTIFICATE FROM THE AMERICAN DENTAL ASSOCIATION JOINT COMMISSION ON NATIONAL DENTAL EXAMINATIONS THAT THE APPLICANT] has successfully passed **a** [THE] written **examination approved** [EXAMINATIONS GIVEN] by the **board** [COMMISSION];

(C) has not had a license to practice dentistry revoked, suspended, or voluntarily surrendered in this state or another state;

(D) is not the subject of an adverse decision based upon a complaint, investigation, review procedure, or other disciplinary proceeding within the five years immediately preceding application, or of an unresolved complaint, investigation, review procedure, or other disciplinary proceeding, undertaken by a state, territorial, local, or federal dental licensing jurisdiction [OR A DENTAL SOCIETY];

(E) is not the subject of an unresolved or an adverse decision based upon a complaint, investigation, review procedure, or other disciplinary proceeding, undertaken by a state, territorial, local, or federal dental licensing jurisdiction [, DENTAL SOCIETY,] or law enforcement agency that relates to criminal or fraudulent activity, dental malpractice, or negligent dental care and that adversely reflects on the applicant's ability or competence to practice dentistry or on the safety or well-being of patients;

(F) is not the subject of an adverse report from the National Practitioner Data Bank or the American Association of Dental **Boards** [EXAMINERS] Clearinghouse for Board Actions that relates to criminal or fraudulent activity, or dental malpractice;

(G) is not impaired to an extent that affects the applicant's ability to practice dentistry;

(H) has not been convicted of a crime that adversely reflects on the applicant's ability or competency to practice dentistry or that jeopardizes

the safety or well-being of a patient;

(2) pass, to the satisfaction of the board, written, clinical, and other examinations administered or approved by the board; and

(3) meet the other qualifications for a license established by the board by regulation.

* **Sec. 27.** AS 08.36.110 is amended by adding a new subsection to read:

(b) An applicant for licensure shall be interviewed in person by the board or by a member of the board before a license is issued. The interview must be recorded. If the application is denied on the basis of the interview, the denial shall be stated in writing, with the reasons for it, and the record shall be preserved.

* **Sec. 28.** AS 08.36.234(a) is repealed and reenacted to read:

(a) The board may waive the examination requirement and license by credentials if the dentist applicant meets the requirements of AS 08.36.110, submits proof of continued competence as required by regulation, pays the required fee, and has

(1) an active license from a board of dental examiners established under the laws of a state or territory of the United States issued after thorough examination; or

(2) passed an examination as specified by the board in regulations.

* **Sec. 29.** AS 08.36.234(b) is amended to read:

(b) A dentist applying for licensure without [CLINICAL] examination is responsible for providing to the board all materials required by [THIS SECTION OR BY] the board to implement this section to establish eligibility for a license without [CLINICAL] examination. In addition to the grounds for revocation of a license under AS 08.36.315, the board may revoke a license issued without [A CLINICAL] examination upon evidence of misinformation or substantial omission.

* **Sec. 30.** AS 08.36.238(a) is amended to read:

(a) A person enrolled as a [FULL-TIME] student in an accredited school of dentistry may perform procedures as part of a course of study without a license if

(1) the procedures are performed under the direct supervision of a member of the faculty who is licensed under this chapter, or under the direct

supervision of a team of licensed faculty dentists, at least one of whom is licensed under this chapter; and

(2) the clinical program has received written approval from the board.

* **Sec. 31.** AS 08.36.250(a) is amended to read:

(a) At least 60 days before expiration of a **license issued under this chapter** [LICENSEE'S REGISTRATION CERTIFICATE], the department shall **notify the** [MAIL A FORM FOR RENEWAL OF REGISTRATION TO EACH] licensed dentist. A licensee who wishes to renew a license shall **submit a completed license renewal form.** [COMPLETE THE FORM AND RETURN IT WITH] the appropriate fee, and evidence of continued professional competence as required by the board. The department shall, as soon as practicable, issue a **new license** [REGISTRATION CERTIFICATE] valid for a stated number of years. [A LICENSEE SHALL KEEP THE REGISTRATION CERTIFICATE BESIDE OR ATTACHED TO THE LICENSEE'S LICENSE.] Failure to receive **notification from the department under this subsection** [THE REGISTRATION FORM] does not exempt a licensee from renewing **a license to practice dentistry under this chapter** [REGISTRATION].

* **Sec. 32.** AS 08.36.250 is amended by adding a new subsection to read:

(c) A licensed dentist who does not pay the license renewal fee forfeits the dentist's license. The board may reinstate the license without examination within two years after the date on which payment was due upon written application, proof of continued professional competence, and payment of all unpaid renewal fees and any penalty fee established under AS 08.01.100(b).

* **Sec. 33.** AS 08.36.315 is amended to read:

Sec. 08.36.315. Grounds for discipline, suspension, or revocation of license. The board may revoke or suspend the license of a dentist, or may reprimand, censure, or discipline a dentist, or both, if the board finds after a hearing that the dentist

(1) used or knowingly cooperated in deceit, fraud, or intentional misrepresentation to obtain a license;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing or billing for professional dental services or engaging in professional activities;

(3) advertised professional dental services in a false or misleading manner;

(4) received compensation for referring a person to another dentist or dental practice;

(5) has been convicted of a felony or other crime that affects the dentist's ability to continue to practice dentistry competently and safely;

(6) engaged in the performance of patient care, or permitted the performance of patient care by persons under the dentist's supervision, **regardless of whether actual injury to the patient occurred,**

(A) that **did** [DOES] not conform to minimum professional standards of dentistry [REGARDLESS OF WHETHER ACTUAL INJURY TO THE PATIENT OCCURRED]; **or**

(B) when the dentist, or a person under the supervision of the dentist, did not have the permit or certificate required under AS 08.32 or this chapter;

(7) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(8) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) [FAILURE TO KEEP INFORMED OF OR USE CURRENT PROFESSIONAL THEORIES OR PRACTICES;

(C)] addiction or dependence on alcohol or other drugs that **impair** [IMPAIRS] the dentist's ability to practice safely;

(C) [(D)] physical or mental disability;

(9) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(10) permitted a dental hygienist or dental assistant who is employed by the dentist or working under the dentist's supervision to perform a dental procedure in violation of AS 08.32.110 or **AS 08.36.346** [AS 08.36.070(a)(10)];

(11) failed to report to the board a death that occurred on the premises used for the practice of dentistry within 48 hours**;**

(12) falsified or destroyed patient or facility records or failed to maintain a patient or facility record for at least seven years after the date the record was created.

* **Sec. 34.** AS 08.36.344(a) is amended to read:

(a) The board shall issue a restorative function certificate to a dental assistant if the dental assistant furnishes evidence satisfactory to the board that the dental assistant has

(1) successfully completed a **course offered by or under the auspices of a** program accredited by the Commission on Dental Accreditation of the American Dental Association or other **equivalent** course **or program** [OF INSTRUCTION] approved by the board; and

(2) passed the Western Regional Examining Board's restorative examination or other equivalent examination approved by the board within the five years preceding the dental assistant's certificate application, or the dental assistant has legal authorization from another state or jurisdiction to perform restorative functions.

* **Sec. 35.** AS 08.36 is amended by adding a new section to read:

Sec. 08.36.347. Exemption from certificate requirement. (a) A person enrolled in a program or course of study may perform dental assisting procedures as part of that program or course of study without a certificate if the procedures are performed

(1) under the direct supervision of a member of the faculty who is licensed under this chapter or AS 08.32; and

(2) as part of a clinical program that has received written approval from the board.

(b) A person performing dental assisting procedures under (a) of this section is subject to all other provisions of this chapter and statutes and regulations that apply to the practice of dental assisting by a certified dental assistant.

* **Sec. 36.** AS 08.36.350(a) is amended to read:

(a) This chapter applies to a person who practices, or offers or attempts to practice, dentistry in the state except

(1) a dental surgeon or dentist in the military service in the discharge

of official duties;

(2) a dentist in the employ of the United States Public Health Service, United States Department of Veterans Affairs, **United States Indian Health** [ALASKA NATIVE] Service, or other agency of the federal government, in the discharge of official duties;

(3) [A PHYSICIAN OR SURGEON;

(4) A DENTIST PROVIDING CARE IN AN ISOLATED AREA BY AUTHORITY OF A PERMIT ISSUED UNDER AS 08.36.271;

(5)] a dentist licensed in another state who is teaching or demonstrating clinical techniques at a meeting, seminar, or limited course of instruction sponsored by a dental or dental auxiliary society or association or by an accredited dental or dental auxiliary educational institution;

(4) [(6)] a dentist licensed in another state who provides emergency care to an injured or ill person who reasonably appears to the dentist to be in immediate need of emergency aid in order to avoid serious harm or death if the care is provided without remuneration**;**

(5) a dentist employed in the state by an Indian health program, as that term is defined in 25 U.S.C. 1603, while providing dental services to a person the Indian health program is entitled to serve under 25 U.S.C. 450 et seq. (Indian Self-Determination and Education Assistance Act), as amended, and 25 U.S.C. 1601 et seq. (Indian Health Care Improvement Act), as amended.

* **Sec. 37.** AS 08.36 is amended by adding a new section to read:

Sec. 08.36.367. Ownership of a dental office or facility. (a) Only a person who holds a valid license issued under this chapter may own, operate, or maintain a dental practice, office, or clinic. This restriction does not apply to

(1) a labor organization or a nonprofit organization formed by or on behalf of a labor organization for the purpose of providing dental services;

(2) an institution of higher education recognized by the board;

(3) a local government;

(4) an institution or program accredited by the Commission on Dental Accreditation of the American Dental Association to provide education and training;

(5) a nonprofit corporation organized under state law to provide dental services to rural areas and medically underserved populations of migrant, rural community, or homeless individuals under 42 U.S.C. 254b or 254c or health centers qualified under 42 U.S.C. 1396d(*l*)(2)(B) operating in compliance with other applicable state and federal law;

(6) a nonprofit charitable corporation described in 26 U.S.C. 501(c)(3) (Internal Revenue Code) and determined by the board to be providing dental services by volunteer licensed dentists to populations with limited access to dental care at no charge or a substantially reduced charge.

(b) For the purpose of owning or operating a dental practice, office, or clinic, an entity described in (a) of this section shall

(1) name a licensed dentist as its dental director, who shall be subject to the provisions of AS 08.36.315 and 08.36.317 in the capacity of dental director; the dental director, or an actively licensed dentist designated by the director, shall have responsibility for the entity's practice of dentistry; and

(2) maintain current records of the names of licensed dentists who supervise dental hygienists, dental assistants, and other personnel involved in direct patient care who are employed by the entity; the records must be available to the board upon written request.

(c) Nothing in this chapter precludes a person or entity not licensed by the board from

(1) ownership or leasehold of any tangible or intangible assets used in a dental office or clinic, including real property, furnishings, equipment, and inventory, but not including dental records of patients related to clinical care;

(2) employing or contracting for the services of personnel other than licensed dentists; or

(3) management of the business aspects of a dental office or clinic that do not include the practice of dentistry.

(d) If all of the ownership interests of a dentist or dentists in a dental office or clinic are held by an administrator, executor, personal representative, guardian, conservator, or receiver of the estate of a former shareholder, member, or partner, the

administrator, executor, personal representative, guardian, conservator, or receiver may retain the ownership interest for a period of 24 months following the creation of the ownership interest. The board shall extend the ownership period for an additional 24 months upon 30 days' notice and may grant additional extensions upon reasonable request.

(e) In this section, "labor organization" means an organization, not for pecuniary profit, constituted wholly or partly to bargain collectively or deal with employers, including the state and its political subdivisions, concerning grievances, terms or conditions of employment, or other mutual aid or protection in connection with employees that has existed for at least three years and that has a constitution and bylaws.

*** Sec. 38.** AS 08.36.370 is amended by adding new paragraphs to read:

(7) "certified dental assistant" means a person who holds a current coronal polishing certificate or restorative function certificate issued by the board;

(8) "licensed dental hygienist" means a dental hygienist licensed under AS 08.32;

(9) "licensed dentist" means a dentist licensed under this chapter.

*** Sec. 39.** AS 08.32.020, 08.32.035, 08.32.040, 08.32.060, 08.32.097, 08.32.100, 08.32.120, 08.32.130, 08.32.140, 08.32.190(2); AS 08.36.075(b), 08.36.075(c), 08.36.075(d), 08.36.075(e), 08.36.114, 08.36.230, 08.36.244, 08.36.246, 08.36.247, 08.36.248, 08.36.260, 08.36.271, and 08.36.290 are repealed.

*** Sec. 40.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes shall change the catch line of AS 08.36.250 from "Renewal of registration" to "License renewal, lapse, and reinstatement."

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSSB 92 (L&C)

Analysis

Senate Bill 92 amends the licensing requirements for dental hygienists. The enactment of this legislation will require a full-time Investigator III for a total cost of $114.2.

The following is a detailed cost analysis:

Personal Services - $87.6 consists of one full-time Investigator III position, Range 18 to conduct investigations into alleged violations and be directly responsible and accountable to the board.

Travel - $2.0 for investigative work consistent with the duties outlined in the legislation.

Services - $18.1 cost for lease space, professional services, communications and utilities.

Commodities - Standard cost of $1.0 for supplies normally consumed or expended.

Capital Outlay - Standard one time set up cost of $5.5 include furniture, computer, telephone, ect.

Under the self-sufficiency statute of AS 08.01.065, regulatory programs are required to pay the cost of regulation through licensing fees. The funding source in establishing this position is Receipt Supported Services funded entirely from licensing fees.

CS FOR SENATE BILL NO. 92(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR EGAN

A BILL

FOR AN ACT ENTITLED

"An Act relating to dental hygienists, dentists, dental assistants, dental hygiene, and dentistry."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 08.32.010 is amended to read:

Sec. 08.32.010. License required. Except as provided in AS 08.32.095, a person may not practice, offer or attempt to practice, or advertise or announce as being prepared or qualified to practice dental hygiene without a license [AND A CURRENT CERTIFICATE OF REGISTRATION].

*** Sec. 2.** AS 08.32 is amended by adding a new section to read:

Sec. 08.32.014. Qualifications for license. (a) An applicant for a license to practice dental hygiene shall

(1) provide evidence to the board that the applicant

(A) has successfully completed an academic program in dental hygiene of at least two years duration that, at the time of graduation, is

accredited by the Commission on Dental Accreditation of the American Dental Association and is approved by the board;

(B) has passed a written theory examination of the American Dental Association Joint Commission on National Dental Examinations or an equivalent examination approved by the board;

(C) has successfully passed a state or regional dental hygiene clinical examination approved by the board;

(D) has not had a license to practice dental hygiene revoked, suspended, or voluntarily surrendered in this state or another state;

(E) is not the subject of an adverse decision based on a complaint, investigation, review procedure, or other disciplinary proceeding within the five years immediately preceding application or of an unresolved complaint, investigation, review procedure, or other disciplinary proceeding undertaken by a state, territorial, local, or federal dental licensing jurisdiction;

(F) is not the subject of an unresolved or adverse decision based on a complaint, investigation, review procedure, or other disciplinary proceeding undertaken by a state, territorial, local, or federal dental licensing jurisdiction or law enforcement agency that relates to criminal or fraudulent activity, dental malpractice, or negligent dental care and that adversely reflects on the applicant's ability or competence to practice as a dental hygienist or on the safety or well-being of patients;

(G) is not the subject of an adverse report from the National Practitioner Data Bank or the American Association of Dental Examiners Clearinghouse for Board Actions that relates to criminal or fraudulent activity or dental malpractice;

(H) is not impaired to an extent that affects the applicant's ability to practice as a dental hygienist;

(I) has not been convicted of a crime that adversely reflects on the applicant's ability or competency to practice as a dental hygienist or that jeopardizes the safety or well-being of a patient; and

(2) meet the other qualifications for a license established by the board

by regulation.

(b) An applicant for a license to practice dental hygiene may be interviewed in person by the board or a designee of the board. The interview must be recorded. If the application is denied on the basis of the interview, the denial shall be stated in writing, with the reasons for it, and the record shall be preserved.

*** Sec. 3.** AS 08.32.030 is amended to read:

Sec. 08.32.030. Licensure by credentials. The board may provide for the licensing without examination of a dental hygienist who

(1) meets the criteria of **AS 08.32.014** [AS 08.32.020(a)];

(2) **submits proof of continued competence as specified in regulations adopted by the board;**

(3) is currently licensed to practice dental hygiene in another state or territory of the United States; and

(4) [HAS SUCCESSFULLY PASSED A STATE OR REGIONAL DENTAL HYGIENE CLINICAL EXAMINATION THAT THE BOARD HAS DETERMINED IS AT LEAST EQUIVALENT IN SCOPE, QUALITY, AND DIFFICULTY TO THE ALASKA CLINICAL EXAMINATION;

(3) HAS BEEN IN ACTIVE CLINICAL DENTAL HYGIENE PRACTICE AVERAGING NOT LESS THAN 700 HOURS A YEAR FOR EACH OF THE TWO YEARS IMMEDIATELY PRECEDING APPLICATION FOR STATE LICENSURE;

(4) HAS NOT FAILED THE CLINICAL DENTAL HYGIENE EXAMINATION OF THIS STATE;

(5) HAS NOT PREVIOUSLY HAD A LICENSE TO PRACTICE DENTAL HYGIENE ISSUED BY ANY STATE OR REGION REVOKED;

(6) HAS COMPLETED NOT LESS THAN 14 HOURS OF CONTINUING EDUCATION RELATED TO CLINICAL HYGIENE IN THE TWO YEARS BEFORE FILING AN APPLICATION WITH THE BOARD; THE CONTINUING EDUCATION REQUIRED UNDER THIS PARAGRAPH MUST BE APPROVED BY THE BOARD, THE AMERICAN DENTAL ASSOCIATION, THE ACADEMY OF GENERAL DENTISTRY, OR THE AMERICAN DENTAL

HYGIENISTS' ASSOCIATION;

(7)] pays the fees **established** [REQUIRED] under **AS 08.01.065** [AS 08.32.097; AND

(8) IS NOT THE SUBJECT OF AN UNRESOLVED COMPLAINT, REVIEW PROCEDURE, OR DISCIPLINARY PROCEEDING UNDERTAKEN BY A DENTAL OR DENTAL HYGIENE LICENSING JURISDICTION].

* **Sec. 4.** AS 08.32.070 is amended to read:

Sec. 08.32.070. Licensing [REGISTRATION AND LICENSING] of dental hygienists. The board shall **issue** [REGISTER] each successful applicant [AND ISSUE THE APPLICANT] a license upon payment of all required fees.

* **Sec. 5.** AS 08.32.071 is amended to read:

Sec. 08.32.071. Renewal of license [REGISTRATION]. At least 60 days before expiration of a **dental hygienist's license** [LICENSEE'S REGISTRATION CERTIFICATE], the Department of Commerce, Community, and Economic Development shall **notify the** [MAIL A FORM FOR RENEWAL OF REGISTRATION TO EACH] licensed dental hygienist. Each licensee who wishes to renew a **dental hygienist's license shall submit a completed license renewal form,** [REGISTRATION CERTIFICATE SHALL COMPLETE THE FORM AND RETURN IT WITH] the appropriate fee, and evidence of continued professional competence as required by the board. The Department of Commerce, Community, and Economic Development shall, as soon as practicable, issue a **dental hygienist license** [REGISTRATION CERTIFICATE] valid for a stated number of years. [EACH LICENSEE SHALL KEEP THE REGISTRATION CERTIFICATE BESIDE OR ATTACHED TO THE LICENSEE'S LICENSE.] Failure to receive **notification from the department under this section** [THE REGISTRATION FORM] does not exempt a licensee from renewing **the licensee's dental hygienist license** [REGISTRATION].

* **Sec. 6.** AS 08.32.081 is amended to read:

Sec. 08.32.081. Lapse and reinstatement of license. A licensed dental hygienist who does not pay the renewal [REGISTRATION] fee **under AS 08.32.071** forfeits the hygienist's license. The board may reinstate the license without examination within two years of the date on which payment was due upon written

application, proof of continued professional competence, and payment of all unpaid renewal fees and any penalty fee established under AS 08.01.100(b).

* **Sec. 7.** AS 08.32.085(a) is amended to read:

(a) The board shall issue a restorative function endorsement to a **licensed** dental hygienist [WHO IS LICENSED UNDER THIS CHAPTER] if the licensee furnishes evidence satisfactory to the board that the licensee has

(1) successfully completed a **course offered by or under the auspices of a** program accredited by the Commission on Dental Accreditation of the American Dental Association or other **equivalent** course **or program** [OF INSTRUCTION] approved by the board; and

(2) passed the Western Regional Examining Board's restorative examination or other equivalent examination approved by the board within the five years preceding the licensee's endorsement application, or the licensee is licensed**, certified, or otherwise permitted** in another state or United States territory to perform restorative functions.

* **Sec. 8.** AS 08.32.095(a) is amended to read:

(a) A person enrolled as a [FULL-TIME] student in an accredited [SCHOOL OF] dental hygiene **program** may perform dental hygiene procedures as part of a course of study without a license if

(1) the procedures are performed under the

(A) general [DIRECT] supervision of a member of the faculty who is licensed under AS 08.36, **and under the direct or indirect supervision of a member of the faculty who is licensed under this chapter;** or

(B) [UNDER THE] direct **or indirect** supervision of a **member of the faculty who** [TEAM OF LICENSED FACULTY DENTISTS, AT LEAST ONE OF WHOM] is licensed under AS 08.36; and

(2) the clinical program has received written approval from the board.

* **Sec. 9.** AS 08.32.110(a) is amended to read:

(a) The role of the dental hygienist is to assist members of the dental profession in providing oral health care to the public. A person licensed to practice the

profession of dental hygiene in the state may,

(1) **under the general supervision of a licensed dentist,**

(A) perform preliminary charting and triage to formulate a dental hygiene assessment and dental hygiene treatment plan;

(B) remove calcareous deposits, accretions, and stains from the exposed surfaces of the teeth beginning at the epithelial attachment by scaling and polishing techniques;

(C) remove marginal overhangs;

(D) use local periodontal therapeutic agents;

(E) perform nonsurgical periodontal therapy;

(F) [(2) APPLY TOPICAL PREVENTIVE AGENTS;

(3) APPLY PIT AND FISSURE SEALANTS;

(4) PERFORM ROOT PLANING AND PERIODONTAL SOFT TISSUE CURETTAGE;

(5)] perform other dental operations and services delegated by a licensed dentist if the dental operations and services are not prohibited by (c) of this section;

(G) [AND (6)] if certified by the board [AND UNDER THE DIRECT, INDIRECT, OR GENERAL SUPERVISION OF A LICENSED DENTIST], administer local anesthetic agents**; and**

(2) if certified by the board and under the direct or indirect supervision of a licensed dentist, administer and monitor nitrous oxide-oxygen conscious sedation.

*** Sec. 10.** AS 08.32.110(c) is amended to read:

(c) This section does not authorize delegation of

(1) **dental diagnosis, comprehensive** [DIAGNOSING,] treatment planning, and writing prescriptions for drugs; writing authorizations for restorative, prosthetic, or orthodontic appliances;

(2) operative or surgical procedures on hard or soft tissues [EXCEPT AS ALLOWED IN (a)(4) OF THIS SECTION]; or

(3) other procedures that require the professional competence and skill

of a dentist.

*** Sec. 11.** AS 08.32.110(e) is amended to read:

(e) This section does not prohibit a **licensed** dental hygienist

(1) with an endorsement issued under AS 08.32.085 from performing the activities authorized under AS 08.32.085; [OR]

(2) who has entered into a collaborative agreement approved by the board under AS 08.32.115 from performing the activities authorized under the collaborative agreement**; or**

(3) from performing a dental operation, procedure, or service a dentist may delegate to a dental assistant under AS 08.36.346.

*** Sec. 12.** AS 08.32.115(a) is amended to read:

(a) If the collaborative agreement is approved by the board under (d) of this section, a **licensed** dental hygienist with a minimum of 4,000 documented hours of clinical experience within the five years preceding application for the board's approval may enter into a collaborative agreement with a **licensed** dentist [LICENSED UNDER AS 08.36] in which the licensed dentist authorizes the **licensed** dental hygienist to perform one or more of the following:

(1) oral health promotion and disease prevention education;

(2) removal of calcareous deposits, accretions, and stains from the surfaces of teeth;

(3) application of topical preventive or prophylactic agents, including fluoride varnishes and pit and fissure sealants;

(4) polishing and smoothing restorations;

(5) removal of marginal overhangs;

(6) preliminary charting and triage **to formulate a dental hygiene assessment and dental hygiene treatment plan**;

(7) **the exposure and development of** radiographs;

(8) use of local periodontal therapeutic agents; and

(9) performance of nonsurgical periodontal therapy, with or without the administration of local anesthesia, subsequent to a licensed dentist's authorization or diagnosis as specified in the licensed hygienist's collaborative agreement.

* **Sec. 13.** AS 08.32.115(d) is amended to read:

(d) The board may approve a collaborative agreement between a licensed dentist and a **licensed** dental hygienist. However, the board may not approve more than five collaborative agreements with a licensed dentist, not including any collaborative agreements that have been terminated. A **licensed** dental hygienist shall notify the board of the termination of a collaborative agreement with a licensed dentist.

* **Sec. 14.** AS 08.32.160 is amended to read:

Sec. 08.32.160. Grounds for discipline, suspension, or revocation of license. The board may revoke or suspend the license of a dental hygienist, or may reprimand, censure, or discipline a licensee, if, after a hearing, the board finds that the licensee

(1) used or knowingly cooperated in deceit, fraud, or intentional misrepresentation to obtain a license**, certificate,** or **endorsement** [REGISTRATION];

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing or billing for professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime that affects the licensee's ability to continue to practice competently and safely;

(5) failed to comply with this chapter, with a regulation adopted under this chapter or under AS 08.36, or with an order of the board;

(6) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) addiction or dependence on alcohol or other drugs that impairs the licensee's ability to practice safely;

(C) physical or mental disability;

[(D) FAILURE TO KEEP INFORMED OF OR USE CURRENT PROFESSIONAL THEORIES AND PRACTICES;]

(7) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(8) performed clinical procedures [FOR COMPENSATION] without being under the supervision of a licensed dentist;

(9) did not conform to professional standards in delivering dental hygiene services to patients regardless of whether actual injury to the patient occurred.

*** Sec. 15.** AS 08.32.180 is amended by adding a new subsection to read:

(b) Notwithstanding AS 08.01.075(a)(8), the board may impose a civil fine not to exceed $25,000 for each violation of this chapter or a regulation adopted under this chapter.

*** Sec. 16.** AS 08.32.187(a) is amended to read:

(a) This chapter applies to a person who practices, or offers or attempts to practice, as a dental hygienist in the state except

(1) a dental hygienist in the military service in the discharge of official duties;

(2) a dental hygienist in the employ of the United States Public Health Service, United States Department of Veterans Affairs, **United States Indian Health** [ALASKA NATIVE] Service, or another agency of the federal government, in the discharge of official duties;

(3) a dental hygienist licensed in another state **or jurisdiction** who is teaching or demonstrating clinical techniques at a meeting, seminar, or limited course of instruction sponsored by a dental or dental auxiliary society or association or by an accredited dental or dental auxiliary educational institution;

(4) a dental hygienist employed in the state by an Indian health program, as that term is defined in 25 U.S.C. 1603, while providing dental hygiene services to a person the Indian health program is entitled to serve under 25 U.S.C. 450 et seq. (Indian Self-Determination and Education Assistance Act), as amended, and 25 U.S.C. 1601 et seq. (Indian Health Care Improvement Act), as amended.

*** Sec. 17.** AS 08.32.190 is amended by adding new paragraphs to read:

(6) "licensed dental hygienist" means a dental hygienist licensed under this chapter;

(7) "licensed dentist" means a dentist licensed under AS 08.36.

* **Sec. 18.** AS 08.36.010(a) is amended to read:

(a) There is created the Board of Dental Examiners consisting of nine members. Six members shall be licensed dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment, two members shall be dental hygienists licensed under AS 08.32 who have been engaged in the practice of dental hygiene in the state for five years immediately preceding appointment, and one member shall be a public member **who does not have a direct financial interest in the health care industry**.

* **Sec. 19.** AS 08.36.010 is amended by adding new subsections to read:

(c) Each member shall take an oath of office. The president or secretary elected under AS 08.36.030 may administer oaths. The oath shall be filed and preserved in the department.

(d) The board shall adopt a seal.

* **Sec. 20.** AS 08.36.030 is amended to read:

Sec. 08.36.030. Election of officers. **(a)** The board shall elect **from among its members**

(1) a president **who is a licensed dentist or licensed dental hygienist;** and

(2) a secretary**.**

(b) Officers elected under (a) of this section [FROM AMONG ITS MEMBERS, EACH TO] serve for a term not to exceed two years.

* **Sec. 21.** AS 08.36.070 is amended to read:

Sec. 08.36.070. General powers. (a) The board shall

(1) provide for the examination of applicants and **the credentialing and licensure of** [ISSUE LICENSES TO] those applicants it finds qualified;

(2) **maintain a registry of** [REGISTER] licensed dentists**,** [AND] licensed dental hygienists**, and certified dental assistants** who are in good standing;

(3) affiliate with the American Association of Dental **Boards** [EXAMINERS] and pay annual dues to the association;

(4) hold hearings and order the disciplinary sanction of a person who

violates this chapter, AS 08.32, or a regulation of the board;

(5) supply forms for applications, licenses, permits, certificates, and other papers and records;

(6) enforce the provisions of this chapter and AS 08.32 and adopt or amend the regulations necessary to make the provisions of this chapter and AS 08.32 effective;

(7) adopt regulations ensuring that renewal of **a license or certificate under this chapter or a license, certificate, or endorsement under AS 08.32** [REGISTRATION] is contingent upon proof of continued professional competence [BY A LICENSED DENTIST OR LICENSED DENTAL HYGIENIST];

(8) [PROVIDE THE DEPARTMENT WITH THE REQUIREMENTS FOR PROOF OF CONTINUED PROFESSIONAL COMPETENCE AND REQUEST THE DEPARTMENT TO MAKE THESE REQUIREMENTS AVAILABLE TO EACH LICENSED DENTIST AND LICENSED DENTAL HYGIENIST AT LEAST ONE YEAR BEFORE THE DATE ON WHICH THE DENTIST OR DENTAL HYGIENIST MUST RENEW REGISTRATION;

(9)] at least annually**,** cause to be published **on the Internet and** in a newspaper of general circulation in each major city in the state a summary of disciplinary actions the board has taken during the preceding calendar year;

(9) [(10)] issue permits or certificates to licensed dentists, licensed dental hygienists, and dental assistants who meet standards determined by the board for specific procedures that require specific education and training [;

(11) REGULATE THE REENTRY INTO PRACTICE OF INACTIVE DENTISTS AND DENTAL HYGIENISTS;

(12) REQUIRE, AS A CONDITION OF A LICENSE OR LICENSE RENEWAL ISSUED BY THE BOARD, THAT AN APPLICANT OR LICENSEE HAS, AT THE TIME OF LICENSING OR RENEWAL AND MAINTAINS THROUGHOUT THE PERIOD OF A LICENSE, CURRENT CERTIFICATION IN CARDIOPULMONARY RESUSCITATION TECHNIQUES, EXCEPT THAT THE BOARD MAY WAIVE THIS REQUIREMENT UNDER AN AGREEMENT WITH THE APPLICANT OR LICENSEE IF THE APPLICANT OR LICENSEE

DOCUMENTS, TO THE SATISFACTION OF THE BOARD, THE EXISTENCE OF A PHYSICAL IMPAIRMENT THAT RESULTS IN AN INABILITY TO BE CERTIFIED IN CARDIOPULMONARY RESUSCITATION TECHNIQUES AND THE AGREEMENT SPECIFIES THAT THE APPLICANT OR LICENSEE WILL ENSURE THAT ANOTHER PERSON WHO IS CERTIFIED IN CARDIOPULMONARY RESUSCITATION TECHNIQUES WILL BE IN THE SAME ROOM AS THE APPLICANT OR LICENSEE WHENEVER THE APPLICANT OR LICENSEE IS PRACTICING DENTISTRY ON A LIVING PATIENT WHO IS ALSO PRESENT; THE BOARD MAY INCLUDE IN THE AGREEMENT AN EXPIRATION DATE OR PROVIDE THAT THE AGREEMENT REMAINS IN EFFECT UNTIL REVIEWED BY THE BOARD].

(b) The board may

(1) order a licensed dentist or licensed dental hygienist to submit to a reasonable physical or mental examination if the dentist's or the dental hygienist's physical or mental capacity to practice safely is at issue; [AND]

(2) authorize **a designee of the board or the board's investigator** [ITS REPRESENTATIVE] to inspect the practice facilities or patient or professional records of a dentist at reasonable times and in a reasonable manner to monitor compliance with this chapter and with AS 08.32**; and**

(3) delegate the board's powers to act, hear, and decide matters as authorized by AS 44.62.

* **Sec. 22.** AS 08.36 is amended by adding a new section to read:

Sec. 08.36.073. Investigator. After consulting with the board, the department shall employ a person who is not a member of the board as the investigator for the board. The investigator shall

(1) conduct investigations into alleged violations of this chapter and into alleged violations of regulations and orders of the board;

(2) at the request of the board, conduct investigations based on complaints filed with the department or with the board; and

(3) be directly responsible and accountable to the board, except that only the department has authority to terminate the investigator's employment and the

department shall provide day-to-day and administrative supervision of the investigator.

*** Sec. 23.** AS 08.36.075(a) is amended to read:

(a) **The** [SUBJECT TO (b) OF THIS SECTION, THE] board shall establish standards **that comply with applicable federal law** for the registration**, use,** and inspection of dental radiological equipment, including standards for record keeping relating to the control panels and the use of the equipment. The **board may charge a fee for dental radiological equipment registered under this section** [INSPECTION STANDARDS ADOPTED BY THE BOARD MUST REQUIRE THAT AN INSPECTION BE PERFORMED BY A PERSON WHO HAS QUALIFICATIONS EQUIVALENT TO THE QUALIFICATIONS ESTABLISHED AS OF SEPTEMBER 7, 1998, IN THE "APPLICANT PROFILE AND JOB QUALIFICATION SUMMARY" FOR A STATE RADIOLOGICAL HEALTH SPECIALIST I].

*** Sec. 24.** AS 08.36.091 is amended to read:

Sec. 08.36.091. Records and reports. The board shall maintain

(1) a record of its proceedings;

(2) a **registry** [REGISTER] containing the name, office and home addresses, and other information considered necessary by the board [,] of each person licensed as a dentist or dental hygienist **or certified as a dental assistant**, [AND] a **registry** [REGISTER] of the licenses**, certificates, and endorsements** revoked by the board, and information on the status of each licensee **and each certified dental assistant**.

*** Sec. 25.** AS 08.36.100 is amended to read:

Sec. 08.36.100. License required. Except as provided in AS 08.36.238, a person may not practice, or attempt to practice, dentistry without a license [AND A CURRENT CERTIFICATE OF REGISTRATION].

*** Sec. 26.** AS 08.36.110 is amended to read:

Sec. 08.36.110. Qualifications for license. An applicant for a license to practice dentistry shall

(1) provide certification to the board that the applicant

(A) is a graduate of a dental school that, at the time of graduation, is **approved** [ACCREDITED] by the **board** [COMMISSION ON ACCREDITATION OF THE AMERICAN DENTAL ASSOCIATION];

(B) [HOLDS A CERTIFICATE FROM THE AMERICAN DENTAL ASSOCIATION JOINT COMMISSION ON NATIONAL DENTAL EXAMINATIONS THAT THE APPLICANT] has successfully passed **a** [THE] written **examination approved** [EXAMINATIONS GIVEN] by the **board** [COMMISSION];

(C) has not had a license to practice dentistry revoked, suspended, or voluntarily surrendered in this state or another state;

(D) is not the subject of an adverse decision based upon a complaint, investigation, review procedure, or other disciplinary proceeding within the five years immediately preceding application, or of an unresolved complaint, investigation, review procedure, or other disciplinary proceeding, undertaken by a state, territorial, local, or federal dental licensing jurisdiction [OR A DENTAL SOCIETY];

(E) is not the subject of an unresolved or an adverse decision based upon a complaint, investigation, review procedure, or other disciplinary proceeding, undertaken by a state, territorial, local, or federal dental licensing jurisdiction [, DENTAL SOCIETY,] or law enforcement agency that relates to criminal or fraudulent activity, dental malpractice, or negligent dental care and that adversely reflects on the applicant's ability or competence to practice dentistry or on the safety or well-being of patients;

(F) is not the subject of an adverse report from the National Practitioner Data Bank or the American Association of Dental **Boards** [EXAMINERS] Clearinghouse for Board Actions that relates to criminal or fraudulent activity, or dental malpractice;

(G) is not impaired to an extent that affects the applicant's ability to practice dentistry;

(H) has not been convicted of a crime that adversely reflects on the applicant's ability or competency to practice dentistry or that jeopardizes

the safety or well-being of a patient;

(2) pass, to the satisfaction of the board, written, clinical, and other examinations administered or approved by the board; and

(3) meet the other qualifications for a license established by the board by regulation.

*** Sec. 27.** AS 08.36.110 is amended by adding a new subsection to read:

(b) An applicant for licensure shall be interviewed in person by the board or by a member of the board before a license is issued. The interview must be recorded. If the application is denied on the basis of the interview, the denial shall be stated in writing, with the reasons for it, and the record shall be preserved.

*** Sec. 28.** AS 08.36.234(a) is repealed and reenacted to read:

(a) The board may waive the examination requirement and license by credentials if the dentist applicant meets the requirements of AS 08.36.110, submits proof of continued competence as required by regulation, pays the required fee, and has

(1) an active license from a board of dental examiners established under the laws of a state or territory of the United States issued after thorough examination; or

(2) passed an examination as specified by the board in regulations.

*** Sec. 29.** AS 08.36.234(b) is amended to read:

(b) A dentist applying for licensure without [CLINICAL] examination is responsible for providing to the board all materials required by [THIS SECTION OR BY] the board to implement this section to establish eligibility for a license without [CLINICAL] examination. In addition to the grounds for revocation of a license under AS 08.36.315, the board may revoke a license issued without [A CLINICAL] examination upon evidence of misinformation or substantial omission.

*** Sec. 30.** AS 08.36.238(a) is amended to read:

(a) A person enrolled as a [FULL-TIME] student in an accredited school of dentistry may perform procedures as part of a course of study without a license if

(1) the procedures are performed under the direct supervision of a member of the faculty who is licensed under this chapter, or under the direct

supervision of a team of licensed faculty dentists, at least one of whom is licensed under this chapter; and

(2) the clinical program has received written approval from the board.

* **Sec. 31.** AS 08.36.250(a) is amended to read:

(a) At least 60 days before expiration of a **license issued under this chapter** [LICENSEE'S REGISTRATION CERTIFICATE], the department shall **notify the** [MAIL A FORM FOR RENEWAL OF REGISTRATION TO EACH] licensed dentist. A licensee who wishes to renew a license shall **submit a completed license renewal form.** [COMPLETE THE FORM AND RETURN IT WITH] the appropriate fee, and evidence of continued professional competence as required by the board. The department shall, as soon as practicable, issue a **new license** [REGISTRATION CERTIFICATE] valid for a stated number of years. [A LICENSEE SHALL KEEP THE REGISTRATION CERTIFICATE BESIDE OR ATTACHED TO THE LICENSEE'S LICENSE.] Failure to receive **notification from the department under this subsection** [THE REGISTRATION FORM] does not exempt a licensee from renewing **a license to practice dentistry under this chapter** [REGISTRATION].

* **Sec. 32.** AS 08.36.250 is amended by adding a new subsection to read:

(c) A licensed dentist who does not pay the license renewal fee forfeits the dentist's license. The board may reinstate the license without examination within two years after the date on which payment was due upon written application, proof of continued professional competence, and payment of all unpaid renewal fees and any penalty fee established under AS 08.01.100(b).

* **Sec. 33.** AS 08.36.315 is amended to read:

Sec. 08.36.315. Grounds for discipline, suspension, or revocation of license. The board may revoke or suspend the license of a dentist, or may reprimand, censure, or discipline a dentist, or both, if the board finds after a hearing that the dentist

(1) used or knowingly cooperated in deceit, fraud, or intentional misrepresentation to obtain a license;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing or billing for professional dental services or engaging in professional activities;

(3) advertised professional dental services in a false or misleading manner;

(4) received compensation for referring a person to another dentist or dental practice;

(5) has been convicted of a felony or other crime that affects the dentist's ability to continue to practice dentistry competently and safely;

(6) engaged in the performance of patient care, or permitted the performance of patient care by persons under the dentist's supervision, **regardless of whether actual injury to the patient occurred,**

(A) that **did** [DOES] not conform to minimum professional standards of dentistry [REGARDLESS OF WHETHER ACTUAL INJURY TO THE PATIENT OCCURRED]; **or**

(B) when the dentist, or a person under the supervision of the dentist, did not have the permit or certificate required under AS 08.32 or this chapter;

(7) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(8) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) [FAILURE TO KEEP INFORMED OF OR USE CURRENT PROFESSIONAL THEORIES OR PRACTICES;

(C)] addiction or dependence on alcohol or other drugs that **impair** [IMPAIRS] the dentist's ability to practice safely;

(C) [(D)] physical or mental disability;

(9) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(10) permitted a dental hygienist or dental assistant who is employed by the dentist or working under the dentist's supervision to perform a dental procedure in violation of AS 08.32.110 or **AS 08.36.346** [AS 08.36.070(a)(10)];

(11) failed to report to the board a death that occurred on the premises used for the practice of dentistry within 48 hours**;**

(12) falsified or destroyed patient or facility records or failed to maintain a patient or facility record for at least seven years after the date the record was created.

*** Sec. 34.** AS 08.36.344(a) is amended to read:

(a) The board shall issue a restorative function certificate to a dental assistant if the dental assistant furnishes evidence satisfactory to the board that the dental assistant has

(1) successfully completed a **course offered by or under the auspices of a** program accredited by the Commission on Dental Accreditation of the American Dental Association or other **equivalent** course **or program** [OF INSTRUCTION] approved by the board; and

(2) passed the Western Regional Examining Board's restorative examination or other equivalent examination approved by the board within the five years preceding the dental assistant's certificate application, or the dental assistant has legal authorization from another state or jurisdiction to perform restorative functions.

*** Sec. 35.** AS 08.36 is amended by adding a new section to read:

Sec. 08.36.347. Exemption from certificate requirement. (a) A person enrolled in a program or course of study may perform dental assisting procedures as part of that program or course of study without a certificate if the procedures are performed

(1) under the direct supervision of a member of the faculty who is licensed under this chapter or AS 08.32; and

(2) as part of a clinical program that has received written approval from the board.

(b) A person performing dental assisting procedures under (a) of this section is subject to all other provisions of this chapter and statutes and regulations that apply to the practice of dental assisting by a certified dental assistant.

*** Sec. 36.** AS 08.36.350(a) is amended to read:

(a) This chapter applies to a person who practices, or offers or attempts to practice, dentistry in the state except

(1) a dental surgeon or dentist in the military service in the discharge

of official duties;

(2) a dentist in the employ of the United States Public Health Service, United States Department of Veterans Affairs, **United States Indian Health** [ALASKA NATIVE] Service, or other agency of the federal government, in the discharge of official duties;

(3) [A PHYSICIAN OR SURGEON;

(4) A DENTIST PROVIDING CARE IN AN ISOLATED AREA BY AUTHORITY OF A PERMIT ISSUED UNDER AS 08.36.271;

(5)] a dentist licensed in another state who is teaching or demonstrating clinical techniques at a meeting, seminar, or limited course of instruction sponsored by a dental or dental auxiliary society or association or by an accredited dental or dental auxiliary educational institution;

(4) [(6)] a dentist licensed in another state who provides emergency care to an injured or ill person who reasonably appears to the dentist to be in immediate need of emergency aid in order to avoid serious harm or death if the care is provided without remuneration**;**

(5) a dentist employed in the state by an Indian health program, as that term is defined in 25 U.S.C. 1603, while providing dental services to a person the Indian health program is entitled to serve under 25 U.S.C. 450 et seq. (Indian Self-Determination and Education Assistance Act), as amended, and 25 U.S.C. 1601 et seq. (Indian Health Care Improvement Act), as amended.

* **Sec. 37.** AS 08.36 is amended by adding a new section to read:

Sec. 08.36.367. Ownership of a dental office or facility. (a) Only a person who holds a valid license issued under this chapter may own, operate, or maintain a dental practice, office, or clinic. This restriction does not apply to

(1) a labor organization or a nonprofit organization formed by or on behalf of a labor organization for the purpose of providing dental services;

(2) an institution of higher education recognized by the board;

(3) a local government;

(4) an institution or program accredited by the Commission on Dental Accreditation of the American Dental Association to provide education and training;

(5) a nonprofit corporation organized under state law to provide dental services to rural areas and medically underserved populations of migrant, rural community, or homeless individuals under 42 U.S.C. 254b or 254c or health centers qualified under 42 U.S.C. 1396d(*l*)(2)(B) operating in compliance with other applicable state and federal law;

(6) a nonprofit charitable corporation described in 26 U.S.C. 501(c)(3) (Internal Revenue Code) and determined by the board to be providing dental services by volunteer licensed dentists to populations with limited access to dental care at no charge or a substantially reduced charge.

(b) For the purpose of owning or operating a dental practice, office, or clinic, an entity described in (a) of this section shall

(1) name a licensed dentist as its dental director, who shall be subject to the provisions of AS 08.36.315 and 08.36.317 in the capacity of dental director; the dental director, or an actively licensed dentist designated by the director, shall have responsibility for the entity's practice of dentistry; and

(2) maintain current records of the names of licensed dentists who supervise dental hygienists, dental assistants, and other personnel involved in direct patient care who are employed by the entity; the records must be available to the board upon written request.

(c) Nothing in this chapter precludes a person or entity not licensed by the board from

(1) ownership or leasehold of any tangible or intangible assets used in a dental office or clinic, including real property, furnishings, equipment, and inventory, but not including dental records of patients related to clinical care;

(2) employing or contracting for the services of personnel other than licensed dentists; or

(3) management of the business aspects of a dental office or clinic that do not include the practice of dentistry.

(d) If all of the ownership interests of a dentist or dentists in a dental office or clinic are held by an administrator, executor, personal representative, guardian, conservator, or receiver of the estate of a former shareholder, member, or partner, the

administrator, executor, personal representative, guardian, conservator, or receiver may retain the ownership interest for a period of 24 months following the creation of the ownership interest. The board shall extend the ownership period for an additional 24 months upon 30 days' notice and may grant additional extensions upon reasonable request.

(e) In this section, "labor organization" means an organization, not for pecuniary profit, constituted wholly or partly to bargain collectively or deal with employers, including the state and its political subdivisions, concerning grievances, terms or conditions of employment, or other mutual aid or protection in connection with employees that has existed for at least three years and that has a constitution and bylaws.

* **Sec. 38.** AS 08.36.370 is amended by adding new paragraphs to read:

(7) "certified dental assistant" means a person who holds a current coronal polishing certificate or restorative function certificate issued by the board;

(8) "licensed dental hygienist" means a dental hygienist licensed under AS 08.32;

(9) "licensed dentist" means a dentist licensed under this chapter.

* **Sec. 39.** AS 08.32.020, 08.32.035, 08.32.040, 08.32.060, 08.32.097, 08.32.100, 08.32.120, 08.32.130, 08.32.140, 08.32.190(2); AS 08.36.075(b), 08.36.075(c), 08.36.075(d), 08.36.075(e), 08.36.114, 08.36.230, 08.36.244, 08.36.246, 08.36.247, 08.36.248, 08.36.260, 08.36.271, and 08.36.290 are repealed.

* **Sec. 40.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes shall change the catch line of AS 08.36.250 from "Renewal of registration" to "License renewal, lapse, and reinstatement."

MEMORANDUM

TO: Senator Stedman, Co-Chair
Senator Hoffman, Co-Chair
Senate Finance Committee

DATE: April 1, 2011

FROM: Don Habeger, Division Director
Corporations, Business and Professional Licensing

RE: Department Response to Questions regarding SB 92: Dental Practice

---

In response to the Committee's questions on SB92 – Dental Practice, regarding investigative case number comparison the Division of Corporation, Business and Professional Licensing has the following information to offer.

Time period for case numbers for the Medical Board and the Dental Board is January 1, 2009 through March 30, 2011:

- Dental Board cases are: Total cases = 40: 19 have been closed; 21 open status, of these none involve AAG or litigation.

- Medical Board cases are: Total cases = 162: 85 have been closed; 77 open status, of these 4 are with AAG and 4 are in litigation.

Notes: Open status may include the following: initial notification of an alleged violation, intakes, receiving of formal complaint, fact gathering (interviews, records review, etc.); expert witness review and advice as to case merits; board subcommittee review for case merits; accusations filing, Consent Agreements, and presentation to Boards and Commissions for final action.

Currently there are 21 open matters concerning Dental and Dental Hygienist. The open matter includes complaints and intakes. Intakes are when Investigations receive a telephone call or letter alleging a complaint against a licensed practitioner. Investigations respond by sending out a complaint packet and once it is returned, turn the intake into a complaint. It does not turn into an "open" investigation, until we have evidence of a violation. Of the 21 only 5 are considered "open" investigations, the rest are in the intake or complaint stages. This process, although discussed specifically in relation to the Dental Board's investigation activity, is similar for all boards and commissions.

Please let me know if you have any further questions or concerns.

Southcentral Foundation

March 7, 2011

David Logan, DDS
Legislative Chairman
Alaska Dental Society
9170 Jewel Lake Road #203
Anchorage, AK 99502

Dear Dr. Logan:

Thank you for your email suggesting language to further amend Section 16 of SB 92. Southcentral Foundation (SCF) agrees with you that the language in the bill as introduced, adding an exemption under AS 08.32.187(a) for certain dental hygienists, needs additional work. Your suggestion was that it read:

> (4) a dental hygienist employed in the state by an Alaska Native organization that is recognized by and eligible to receive services from the United States Department of the Interior, Bureau of Indian Affairs, while providing dental hygiene services to a member of a tribe that is recognized by the United States Secretary of the Interior under 25 U.S.C. 479a (Federally Recognized Indian Tribe List Act of 1994).

You asked SCF to identify any problems it might have with that language and it is happy to do so.

Operation of health programs by Alaska Native tribes and tribal organizations is governed by two laws: the Indian Self-Determination and Education Assistance Act (ISDEAA), Pub. L. 93-638, (codified as amended at 25 U.S.C. 450 *et seq*), and the Indian Health Care Improvement Act (IHCIA), Pub. L. 94-437, (codified as amended 25 U.S.C. 1601 *et seq.*). The ISDEAA specifies which tribal entities are allowed to operate services of the Indian Health Service (IHS). These entities include tribes, tribal organizations, and inter-tribal consortia. There is no process by which the Department of Interior, Bureau of Indian Affairs, recognized "Alaska Native Organizations," as the language above suggests, and the definition of tribe in the latter clause is inconsistent with the definition of tribe in either the ISDEAA or IHCIA.

This is a matter of great concern to SCF, and very likely many other tribal organizations throughout the State, since the proposed language would exclude all of the regional tribal health organizations and would also narrow who may be served significantly over that authorized under applicable Federal law, specifically the ISDEAA and IHCIA.

SCF appreciates the interests that the Alaska Dental Society is attempting to address, however,

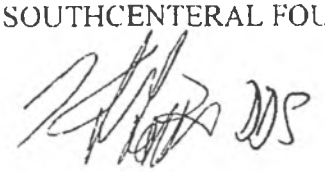
and wants to help find the correct language. A really simple version could read:

> (4) a dental hygienist employed in the state by an Indian health program, as that term is defined at 25 U.S.C. 1603(12), while providing dental hygiene services to a person that the Indian health program is entitled to serve under the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638, as amended, and the Indian Health Care Improvement Act, Pub. L. 94-437, as amended.

An alternative version that would spell out the provisions somewhat more could read:

> (4) a dental hygienist
>
> > (A) employed in the state by
> > (i) the Indian Health Service;
> > (ii) an Indian tribe or tribal organization that operates any health program, service, function, activity, or facility funded, in whole or part, by the [Indian Health] Service through, or provided for in, a contract or compact with the Service under the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.); or
> > (iii) any Indian tribe or tribal organization to which the Secretary [of Health and Human Services] provides funding pursuant to section 23 of the Act of June 25, 110 (25 U.S.C. 47) (commonly known as the "Buy Indian Act"); and
> >
> > (B) while providing dental hygiene services to a person that the Indian health program is entitled to serve under the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638, as amended, and the Indian Health Care Improvement Act, Pub. L. 94-437, as amended.

SCF encloses the definitions of terms used in either of these versions for your reference since whatever we might agree on, the language will have to be sent to Legislative Counsel for final drafting. As you can see in these definitions, the complexities of Indian health programs are many.



SCF appreciates the effort to clearly define the new exemption, but also needs to assure that the exemption does not inadvertently limit the population SCF and other Indian health programs may serve under their compact with the Indian Health Service. Accordingly, SCF also changed the last part of your proposed amendment. SCF did not try to detail every section of the IHCIA that addresses who can be served in an Indian health program. This is a complex matter in which

that addresses who can be served in an Indian health program. This is a complex matter in which one must refer to multiple sections of the law and Federal regulations. SCF is concerned that that level of detail would bog down the limitation on who can be served to the point that the Legislature would exclude that language entirely.

SCF looks forward to continuing to work with you, other stakeholders, and the Legislature on this important piece of legislation.

Sincerely,

SOUTHCENTERAL FOUNDATION

Kevin Gottlieb, DDS
Vice President/Chief of Staff

enclosure

APPLICABLE LEGAL DEFINITIONS

Under 25 U.S.C. 1603(12), "Indian health program" means:

> (A) any health program administered directly by the [Indian Health] Service;
> (B) any tribal health program; and
> (C) any Indian tribe or tribal organization to which the Secretary [of Health and Human Services] provides funding pursuant to section 23 of the Act of June 25, 110 (25 U.S.C. 47) (commonly known as the "Buy Indian Act").

"Tribal health program" is defined in 25 U.S.C. 1603(25) as meaning

> an Indian tribe or tribal organization that operates any health program, service, function, activity, or facility funded, in whole or part, by the [Indian Health] Service through, or provided for in, a contract or compact with the Service under the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.).

"Tribal organization" is defined in the IHCIA, at 25 U.S.C. 1603(26) by reference to "the term in section 4 of the [ISDEAA] (25 U.S.C. 450b)." "Indian Tribe" is defined in 25 U.S.C. 1603(14), as follows:

> The term "Indian tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or group or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 State. 688), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

MEMORANDUM March 23, 2011

SUBJECT: Sectional summary of CSSB 92(L&C)
(Work Order No. 27-LS0403\D)

TO: Senator Dennis Egan
Chair of the Senate Labor and Commerce Committee
Attn: Dana Owen

FROM: Alpheus Bullard 193
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Removes a requirement that a person practicing dental hygiene, or who is offering to practice dental hygiene, must have a current certificate of registration.

Section 2. Establishes the qualifications necessary for licensure as a dental hygienist.

Section 3. Amends the qualifications necessary for a dental hygienist to be licensed by credentials.

Section 4. Edits the dental hygiene licensing provision to provide that successful applicants for licensure will no longer be registered by the Board of Dental Examiners (board) (see sec. 25 for a parallel provision applicable to dentists).

Sections 5 - 6. Conform the "renewal of license" and "lapse and reinstatement of license" provisions to the bill's removal of the registration requirement for dental hygienists.

Section 7. Allows a dental hygienist who has completed a course offered by or under the auspices of a program accredited by the Commission on Dental Accreditation of the American Dental Association or other equivalent course or program to receive a restorative function endorsement from the board.

Section 8. Changes the levels of supervision required for a dental hygiene student performing dental hygiene procedures. Makes the section applicable to all students enrolled in dental hygiene programs.

Sections 9 - 11. Change the permitted scope of practice for a dental hygienist and clarify what practices and procedures may not be delegated to a dental hygienist by a dentist.

Section 12. Clarifies what practices and procedures a dental hygienist, who has entered into a collaborative agreement with a dentist, may be authorized by the dentist to perform.

Section 13. Makes stylistic changes.

Section 14. Permits the board to sanction a dental hygienist who used or knowingly cooperated in deceit, fraud, or intentional misrepresentation to obtain a certificate or endorsement and amends the other grounds for discipline, suspension, or revocation of a dental hygienist's license.

Section 15. Gives the board the authority to impose a civil fine of up to $25,000 for a violation of AS 08.32 or a regulation adopted under the chapter.

Section 16. Amends the list of dental hygienists to whom the provisions of AS 08.32 do not apply.

Section 17. Provides new definitions applicable to AS 08.32 for "licensed dental hygienist" and "licensed dentist."

Section 18. Adds a qualification for the public member of the board.

Section 19. Requires the members of the board to take an oath. Requires the board to adopt a seal.

Section 20. Requires the president of the board to be a dentist or dental hygienist.

Section 21. Amends the powers of the board.

Section 22. Requires the Department of Commerce, Community, and Economic Development to employ an investigator for the board.

Section 23. Requires the board to establish standards for dental radiological equipment that comply with applicable federal law. Permits the board to charge a fee for equipment registered under the section. Removes a requirement that inspections of radiologic equipment be performed by a person with certain qualifications.

Section 24. Requires the board to maintain a registry of persons licensed as dentists or dental hygienists and persons certified as dental assistants, and a registry of licenses, certificates, and endorsements revoked by the board.

Section 25. Edits the dentist licensing provision to provide that successful applicants for a license will no longer be registered by the board (see sec. 4 for a parallel provision applicable to dental hygienists).

Section 26. Amends the qualifications for a license to practice dentistry in the state.

Section 27. Requires that an applicant for licensure as a dentist must be interviewed in person by the board.

Sections 28 - 29. Amend what is necessary for a dental hygienist to be licensed by credentials.

Section 30. Permits all persons enrolled as students in an accredited school of dentistry to perform dental procedures without a license if certain conditions are met.

Section 31. Conforms the "renewal of registration" provision to the bill's removal of the registration requirement for dentists.

Section 32. Provides that a dentist who does not pay the license renewal fee forfeits the dentist's license. Permits the board to reinstate a license upon certain conditions.

Section 33. Amends the grounds for discipline, suspension, or revocation of a license to practice dentistry.

Section 34. Permits a dental assistant who has completed a course offered by or under the auspices of a program accredited by the Commission on Dental Accreditation of the American Dental Association or other equivalent course or program to receive a restorative function endorsement from the board.

Section 35. Adds a new provision allowing persons enrolled in a program or course of study to perform dental assisting procedures as part of that course of study or program without a certificate if certain conditions are met.

Section 36. Adds a new section that provides who may own, operate, or maintain a dental practice, office, or clinic.

Section 37. Provides new definitions applicable to AS 08.36 for "certified dental assistant," "licensed dental hygienist," and "licensed dentist."

Section 38. Repeals AS 08.32.020, 08.32.035, 08.32.040, 08.32.060, 08.32.097, 08.32.100, 08.32.120, 08.32.130, 08.32.140, 08.32.190(2); AS 08.36.075(b), 08.36.075(c), 08.36.075(d), 08.36.075(e), 08.36.114, 08.36.230, 08.36.244, 08.36.246, 08.36.247, 08.36.248, 08.36.260, 08.36.271, 08.36.290, 08.36.350(a)(3), and 08.36.350(a)(4).

Section 39. Instructs the revisor of statutes to change the catch line for AS 08.36.250.

SENATOR DENNIS EGAN

CSSB 92 (L&C)
"An Act relating to dental hygienists, dentists, dental assistants, dental hygiene, and dentistry."

SPONSOR STATEMENT

CSSB92 (L&C) clarifies the statutes for dental hygienists, dentists and the board of dental examiners.

The dental statutes set the requirements to obtain and renew a dental license, specify the grounds for discipline and set the requirements for training of a dental assistant.

The dental hygiene statutes also set the requirements to obtain and renew a dental hygiene license, list the procedures that a dental hygienist may perform and specify the grounds for discipline.

The board meets at least four times a year and consists of nine members appointed by the governor. Six members are dentists, two members are dental hygienists and one member is from the general public. The statutes governing the board of dental examiners specify the makeup of the board, the times the board shall meet and the powers of the board.

The board adopts regulations to carry out the laws governing the practice of dentistry and dental hygiene in Alaska. It makes final licensing decisions and takes disciplinary action against people who violate the licensing laws.

While incremental changes have been made to these statutes from time to time, it has been many years since anyone comprehensively reviewed them. CSSB 92 (L&C) represents the work of a committee of dentist and dental hygienists who seek to bring the laws governing those professions into line with current standards and practice.

CSSB 92 (L&C) DENTISTS/DENTAL HYGIENISTS/ASSISTANTS

Changes from the Original Bill

Sec. 1. No change.

Sec. 2. Clarifies that the educational program requirement for a license be at least two years and accredited at the time of graduation.

Sec. 3. Re-establishes that fees will be set by the Department of Commerce, Community and Economic Development (maintains the status quo).

Sec. 4. No change.

Sec. 5. Expands the means by which the department must notify a license holder that the license will soon expire. The original bill required mailing; the CS does not specify a method, thereby allowing electronic communications.

Sec. 6. No change.

Sec. 7 and 8. Clarify that an accredited program is what is meant, not a school; programs are accredited, not schools.

Sec. 9. Clarifies that (a)(1)(A) refers to a treatment plan for dental hygiene.

Sec. 10. Adds the word "comprehensive" to the term treatment plan to conform to standard usage within the profession.

Sec. 11. No change.

Sec. 12. Clarifies that (a)(6) refers to a treatment plan for dental hygiene.

Sec. 13 – 15. No change.

Sec. 16. Adds language intended to except dental hygienists working for Alaska Native organizations. NOTE: *This language overlooks current practice in rural areas where such clinics serve people who are not Alaska Natives. The Senate L&C Committee proposes an amendment that will clarify that current practice would be allowed under the bill.*

Sec. 17 – 19. No change.

Sec. 20. A new section specifying that the president of the board must be either a licensed dentist or dental hygienist.

Sec. 21 – 33 (old 20 – 32). No change.

Sec. 34 (old 33). Clarifies that an accredited program is what is meant, not a school; programs are accredited, not schools.

Sec. 35 (old 34). Removes the requirement that a student dental assistant be enrolled in an accredited program.

Sec. 36 (old 35). Extends the time certain persons may retain ownership interest in a clinic or dental office after the death of a previous owner.

Sec. 37 – 39 (old 36 – 38). No change.

Senate Bill 94 Sponsor Statement

Senate Bill 94 would add a second verse to The Alaska's Flag Song. The late Carol Beery Davis wrote a beautiful second verse, which gives recognition to Alaska Natives and to Benny Benson, who designed the Alaskan flag.

Similar bills have been introduced in the past. Last year The Alaska's Flag Song was performed with both verses as the Senate gaveled in on the first day of session. Also last year, the Senator from District G introduced SB 43. It passed the Senate, but stalled in the House.

This year is the year to join me in supporting a long overdue addition of the second verse to the Alaska Flag Song. By passing this bill you will be recognizing history, our progress as a state and our first people.

Bill # SB 94 Second Verse of Alaska's State Song

"An Act adding a second verse to the official Alaska state song." BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA: Section 1. AS 44.09.040 is amended to read: **Sec. 44.09.040. State song.** The song "Alaska's Flag," with music composed by Elinor Dusenbury and words **to the first verse** by Marie Drake **and words to the second verse by Carol Beery Davis,** is the official song of the state. The words of the second verse are as follows:

A native lad chose our Dipper's stars
for Alaska's flag that there be no bars
among our cultures. Be it known
through years our natives' past has grown
to share our treasures, hand in hand,
to keep Alaska our Great Land.
We love the northern midnight sky,
our mountains, lakes and the streams nearby;
Our Great North Star with its steady light
will guide our cultures clear and bright
with Nature's flag to Alaskans dear -
The simple flag of a last Frontier.

SB 99 BACKGROUND MATERIAL

A Resolution to Support the Second Stanza of the Alaska Flag Song

Resolution #87-01

WHEREAS, Denakkanaaga' Inc. represents all the Elders of the Athabascan region, and

WHEREAS, the term "Natives" means anybody born to a person of this country or state, and

WHEREAS, the second stanza would pay homage to Alaskan Natives,

NOW THEREFORE BE IT RESOLVED that the Denakkanaaga' Inc. supports the proposal of adding the second stanza of the Alaska Flag Song to honor all Native Alaskans.

Certification

I hereby certify that this resolution was duly passed by the Denakkanaaga' Inc. Board of Directors on June 4, 1987, at Northway, Alaska.

Secretary/Treasurer
Denakkanaaga' Inc.

6/87-70.4

SB 94
BACKGROUND
MATERIAL

Why a second verse for 'Alaska Flag Song'?

Editor's Note: A copy of the following letter to Betty Kjara, secretary of Pioneers of Alaska Auxiliary No. 8 in Fairbanks, was submitted for publication.

Dear Be[illegible]:

I have received your letter dated March 27, in which you objected to the adoption of the second verse of the "Alaska Flag Song."

I would like to explain to you why I introduced HB 117 and why I hope you will change your decision to oppose the bill.

No one loves the flag song any more than I do. For many years, I have sung it for groups, meetings, conventions, commencements and even for Gov. Bill Egan's memorial service here in Juneau. I offer the second verse out of deep respect for the first verse and for its recognition of Alaska's history. I believe the second verse complements the first verse and gives recognition not to one ethnic group, but to all Alaskans and their ability to work together in a unified and harmonious way.

The addition of a second verse has been discussed for many years by various groups. At one time, funds were inserted into the House's version of the budget to hold a contest for selecting a second verse. Carol Beery Davis was asked to write another verse to the flag song to recognize the contribution of Native Alaskans, who were here long before you or I, or even the Pioneers. She did so, and offered it as a gift to the State of Alaska. I was asked to support its adoption and to introduce a bill to make it officially recognized by the state. I did so, and it has passed the House.

In order to understand the special significance of this verse, you must know about Carol Beery Davis, a former poet laureate of Alaska. She is a 60-year resident of Juneau. Her husband, Trevor, was born here 84 years ago, and is the only living member of the original selection committee for the design of Alaska's flag, which selected Benny Benson's North Star and Big Dipper (to whom the second verse refers in lines 1 and 2). Carol has written dozens of books about Alaska, including "The Alaska Flag Song" book which is credited with helping to make the song so well-known. I have enclosed a copy of this book. She now personally both Elinor Dusenbury and Marie Drake, the two women who decided to write the song and offer it to the state, just as Carol [illegible] done.

oneer, is still contributing to her loved state by offering this beautiful verse, a tribute to unity of all Alaskans:

"A Native lad chose the Dipper's stars
For Alaska's flag that there be no bars
Among our cultures..."

She is recognizing history and our progress as a state:

"Be it known
through years, the Natives' past has grown.
To share life's treasures, hand in hand,
To keep Alaska our Great Land."

She is focusing our attention on the natural beauty of our land and reminds us of the treasures of its beauty:

"We love the northern, midnight sky,
The mountains, lakes, and streams nearby.
The great North Star with its steady light
Will guide all cultures, clear and bright,
With nature's flag to Alaskans dear,
The simple flag of a last frontier."

It is hard for me to understand why anyone who has read these words could object to them. It is impossible for me to understand how anyone who knows who Carol Beery Davis is and the contributions she has made to art, music and literature in Alaska could object to her offering this beautiful gift.

Why did this legislator propose HB 117? Out of respect for a beautiful Alaskan lady who has offered a beautiful verse to a beautiful song about a great state.

Sincerely,
Rep. Fran Ulmer
Juneau

SB 95

Frank Palmer Ferry Terminal

Frank Palmer was an icon who worked for nearly five decades at the Auke Bay Ferry Terminal. Palmer, who died last year at the age of 69, first began pulling trailers off the Alaska Marine Highway System's ferries in 1962, the year service from Prince Rupert started. Since then, Palmer drove trucks and met ferries for Lynden Incorporated, Orme Transfer, Douglas Trucking (of which he was also a co-owner), and Alaska Marine Trucking. No matter which company he was working for, Palmer's reliable presence at the Auke Bay Ferry Terminal was a constant.

He was well known as a man who could skillfully get large vehicles on and off of ferries with ease. Although most of them are completely unaware, the list of Alaskans whose lives were touched indirectly by Palmer as he helped move their goods on and off of ferries is long.

Frank Palmer grew up in Auke Bay and for the entirety of his working life (47 years) he was a staple at the Auke Bay Ferry Terminal. Through his decades of work loading and unloading ferries, he was an integral part of the marine highway system that serves as the road that connects the communities of Southeast Alaska.

It would be a fitting and appropriate tribute to a man so intertwined with the Auke Bay Ferry Terminal to rename it the Frank Palmer Ferry Terminal.

Frank Palmer

Sunday, March 07, 2010

Story last updated at 3/7/2010 - 2:52 am

Frank Palmer
Juneau Empire

Juneau resident Frank Edward Palmer died Feb. 28, 2010, when he drowned while swimming in the ocean during a family vacation in Kauai, Hawaii. His beloved wife, Patti, adored son Billie, cherished grandson Bill, and dear friends, Bud and Joy Hansen, were with him. He was 69.

He was born March 3, 1940, in Tacoma, Wash., to Clayburn F. "Bill" and Nona Palmer and grew up along the shores of Auke Bay. He attended elementary and high schools in Juneau, playing organized baseball and basketball throughout his youth, and he was a member of the Juneau Crimson Bear 1958 State Championship basketball team.

In his youth, he enjoyed fishing and hunting and relished learning those skills from his father. Except for attending college in North Dakota and a short stint in the Air Force, he spent most of his life in Alaska, which he loved. His passion for the outdoors enhanced his excitement for his annual hunting trip to Swan Island with his buddies and fishing with family and friends.

His work passion was the trucking industry, and he was widely known for his expert ability to spot and remove large vans from the Alaska ferries. All his working life, he worked with or for trucking companies. He worked for Orme Transfer, was part owner in Douglas Trucking for many years, and later worked for Lynden Transport and Alaska Marine Lines. The familiar sight of Frank traveling up and down Egan Highway in his truck, will be sorely missed.

"Frank was a beloved husband, father, grandfather, brother and friend," his family wrote. "His love for his family and friends is cherished by all who knew him, and his great spirit and zest for life will live on forever."

He was preceded in death by his parents.

He is survived by his wife, Patti Palmer; son, Bill Palmer; step-daughters, Kate and Leslie Becker, and Karen Ford Powell; step-sons, Randy and Rick Ford; grandson, Bill Palmer; granddaughters, Katie, Linda and Lisa Palmer, of Juneau, and Greta Olson, Margot and Hazel Liebrecht, of Portland, Ore.; sister, Marlene Palmer Ciraulo and husband, Joe, of Issaquah, Wash.; brother, Earl "Bosco" Palmer and wife, Sheila, of Shelton, Wash.; uncle, Earl L. Palmer and aunt, Geraldine Palmer, of Tacoma; and many nieces and nephews, as well as an endless group of friends.

A memorial service is planned for 2 p.m. March 20 at the Chapel by the Lake, followed by a celebration of Frank's life at the Sandbar. In lieu of flowers, the family is setting up a trust fund for the grandkids in his memory. The family can be contacted c/o Patti Palmer, P. O. Box 240204, Douglas, AK 99824-0204.

To Whom It May Concern:

I understand that there is a resolution to consider naming the Juneau Ferry Terminal after Frank Palmer.

Our Company and its people would be thrilled to see Frank honored in this way. It would be wonderful for his family and for all of us who knew and respected him.

I doubt that records have been kept, but it would be reasonable to assume that no one driver has ever moved or ever will move more equipment on to and off of Alaska Marine Highway System vessels than Frank.

Arrowhead Transfer, Inc. would be in strong support of this resolution.

Respectfully submitted,

G. S. Harang

LYNDEN

Friends of Frank Palmer:

I understand that there is consideration of naming the Juneau Ferry terminal after Frank Palmer. This is a wonderful tribute to a great man and I strongly endorse the idea.

Frank began pulling Lynden Trailers off the Alaska Ferry's in 1962, when the 1st. vessels began operating from Prince Rupurt. He began driving for Orme Transfer, then as an owner of Douglas trucking (when Orme went out of business) and finally for Alaska Marine Trucking, a Lynden Company. He met ferries in Juneau, at all hours of the day and night, in any type of weather, safely, reliably and professionally for 47 years.

Frank is well known by AMHS personnel for 5 decades, as the guy who was always there, and who could thread a needle with a tractor trailer.

Thank you for your consideration of our long term friend and fellow Lynden professional, Frank Palmer.

Jim Jansen
CEO
Lynden Inc.

ALASKA MARINE TRUCKING

RE: HB 95
Dear Senator Egan:

We are writing to express our support for renaming the Auke Bay Ferry Terminal after Frank Palmer.

Besides being a local business owner for 25 years, Frank was our co-worker, our mentor and our friend. The importance of the Alaska Marine Highway system to the commerce of Southeast Alaska was always in the forefront of his thoughts. Frank was well known to personnel at the Alaska Marine Highway Auke Bay Terminal and to vessel crews. He made himself available to help many passengers' equipment on and off the Marine Highways vessels over his long tenure meeting the ferry.

Thank you for initiating this bill.

Sincerely,
The Crew at Alaska Marine Trucking

ALASKA MARINE TRUCKING

February 24th, 2011

To Whom It May Concern;

I have been in communication with the office of Senator Dennis Egan to provide information and support his efforts to name the Auke Bay Ferry Terminal after a dear friend of mine, Frank Palmer. Those of us that were blessed to work with him feel that this gesture would be a fitting tribute to this man and his family. A man that has meant so much to this community and other communities throughout Southeast Alaska serviced by the Alaska Marine Highway.

It would be impossible to even guess the number of trailers he pulled off and put on the ferries over the course of his 47 plus years in transportation here in Juneau. Think of the lives he touched either directly or indirectly by being the one there at all hours of the day or night moving the mail, moving the freight and moving our lives.

Frank Palmer was a special person who was perfectly matched for the career he chose, and especially loved working the ferries of the Alaska Marine Highway. Thank you for considering this honor for my friend.

To Whom It May Concern

Re: SB 95 -- "An Act naming the ferry terminal located at Auke Bay in Juneau the Frank Palmer Ferry Terminal."

It is with great personal pleasure that I write in support of this bill and the proposed name change from the Auke Bay Ferry Terminal to the Frank Palmer Ferry Terminal.

I knew Frank since the early 1960s and considered him a good friend. In 1969 my wife and I purchased a home "out beyond the ferry terminal" on Lena Loop Road. Thus my life and the life of my wife and 3 daughters began each day and ended each day with a trip past the Auke Bay Ferry Terminal. Over the years since, my family and I have used the ferry system far more than the average Southeast citizen. We traveled regularly on the ferries using them for access to places like Anchorage, Mat-Su, Tok, Haines & Skagway. Our trips north number in the hundreds. The trips were for pleasure but also for business and education. All this travel required that I spend many hours at the ferry terminal waiting to be loaded or waiting to pick up family or friends arriving.

During all this time at the terminal there was one thing that was a constant and that was Frank Palmer. Be it 3 in the morning or 3 in the afternoon -- be it raining, snowing, blowing or (occasionally) sunny -- Frank was always there. He was always pleasant and never too busy to say hello with a hand shake or a good natured headlock. It seems that not only when we were traveling on the ferry but also when just driving by -- there was Frank pulling in with a load or pulling out with one.

When traveling one would see different AMHS employees at the terminal depending on their shift but Frank was always there. Watching him was always interesting as he had the skills to load those trailers quickly into the tightest places. I learned the difficulty of his task and appreciated his skills by having had to personally load horse trailers on and off the ferries -- sometimes by backing up or backing down a steep ramp -- doing so gave me a great appreciation for Frank's skills.

It seemed impossible to think about the Auke Bay Ferry Terminal without thinking about Frank Palmer. He was a good person with great skills and a pleasant manner that set standards for all of us to strive for in life. Your support for this name change will be appreciated.

Sincerely,

George W. Davidson PE, LS
Juneau, Alaska

Re: SB 95 - Frank Palmer Ferry Terminal

Dear Senator Egan,

I am writing to express my appreciation for your introduction of this bill. Frank Palmer was my brother, his two passions in his life were his family and driving trucks. Other than his yearly hunting trip, Frank rarely left Juneau, in part because of his dedication to his job. In the times that I was able to ride with him as he worked, I saw the flawless talent he had for loading and unloading the ferries. His love and commitment to his job was seen everyday by those around him.

The ferry captains and dock workers could never say enough about the job he did for them. Once the ferry was loaded if needed, he would move the containers around to ensure that the ferry was balanced if they needed him to. He would remain until the ferry was not only loaded, but ready to leave, ensuring that he could make any last minute changes that they asked of him. He was never too busy to help the dock workers move the equipment and other heavy containers when the weather wouldn't let them do it with their machines. If passengers or other truck drivers had problems loading or unloading he was always there to help them on their way.

Frank's love and dedication to not only his job, but to the community of Juneau goes without saying. Ask most anyone, and they could tell you about Frank Palmer waving as he moved his big AML truck down the road, and if you need help, didn't matter what, just ask and he was there to help.

The renaming of the ferry terminal in his name would be a great honor, and in many ways fitting, since Frank grew up across from it. He loved the water and working the ferries was his life. Thank you again for sponsoring this bill.

Sincerely,

Bosco Palmer

Re: SB 95

Dear Senator Egan:

I would like to express total support for Senate Bill 95, naming the ferry terminal located at Auke Bay in Juneau the Frank Palmer Ferry Terminal."

For nearly fifty years, Frank faithfully met nearly every ferry—day and night—to skillfully load and unload containers. His kindness, skills, and work ethic were reflected in the admiration of not only his fellow truck drivers but also by the ferry employees.

One of the real joys of arriving back in Juneau on the ferry was seeing Frank in his tractor truck, ready to unload and load those many containers that kept Juneau businesses supplied with inventory.

I applaud you for recognizing the talents and goodness of Frank.

Sincerely,

Carla B. Seibel

Senator Dennis Egan
State Capitol Room 510

March 21, 2011

Dear Senator Egan,

I want to thank you for sponsoring SB 95 Frank Palmer Ferry Terminal. Frank Palmer was a tireless advocate of the AMH System, defending it against any and all criticism.

During his 35 years as an owner of Douglas Trucking, Frank Palmer met 99% of the AMH Ferries that stopped in Juneau, pulling on and off vans of freight and mail at all times of the day and night. He would voluntarily help AMH personnel in every way possible to keep the ships on schedule.

Frank would often pull stalled vehicles off or on the ships, or snow bound vehicles out of the stuck positions with his own company tractor, never asking for anything in return, even when the extra stress on his vehicle caused mechanical problems.

I cannot think of anyone better to be honored by having his name attached the Auke Bay Ferry Terminal.

Respectfully,

Gerald Kuelbs

RE: Proposed Naming of
Juneau's Auke Bay Ferry Terminal

Dear Chairman & Committee Members:

It is my understanding that Senator Egan has sponsored a bill to name the State's Auke Bay Terminal after Frank Palmer. As a 70 year resident of Juneau I would like convey our **whole-hearted support for this action**.

Frank was a high-school classmate, teammate and friend. Although as life typically has it we took different paths after graduation, it was clear from the response to his death that he was admired by so many. This included not only his classmates, peers (including those her competed with), the many young drivers he mentored, visitors using the marine transportation system he came to the aid of, and just as important those operating the marine transportation system which held him in such high regard. Frank, like his father before him, and who in the 50's was our little league and American Legion coach, had a positive affect on so many. The proposed naming of terminal for Frank seems even more appropriate in light of the fact that in the 50's the Palmers resided just across the street from what is now the ferry terminal.

Please accept my apology for having had to direct this though Senator Eagen's Office.

Sincerely,

Andrew Pekovich

Subject: Frank Palmer Ferry Terminal

Dear Senator Egan:

I am writing to you to show my overwhelming support toward renaming the Auke Bay ferry terminal in Juneau in honor of my good friend and business associate Frank Palmer.

I knew Frank Palmer for over 20 years and know him to be a highly valuable member of the community and a gold plated asset to the trucking industry in Southeastern Alaska. I worked for Lynden Transport in various locations throughout Alaska over roughly 17 years. 6 of those years were spent domiciled in Juneau in charge of Lynden's daily activities throughout all of Southeastern.

Frank Palmer at that time was an owner of Douglas Transfer in Juneau and had been for many years. Frank came through the ranks along with Pat Orme through Orme Transfer. Douglas Trucking was Lynden's Juneau agent. The most famous and well liked of all the Douglas hands was certainly Frankie. No one could match the expert driving ability that Frank had going on and off any ferry under the most adverse weather and technical conditions.

Often times Frank would be called out ship side to untangle the messiest car deck transportation problems one has ever encountered. All AMHS masters, Tow Boat masters, First Mates and deck hands knew Frank Palmer because of his friendly spirit, attitude and driving ability. Frank was a man with a wonderful imagination and humorous, always ready to get the job done no matter under what conditions or time of the day. Palmer had a heart of gold.

I strongly support Senator Egan effort in proposing renaming the Auke Bay Ferry terminal to show Frank Palmer Ferry Terminal. It is an honor truly befitting a gentleman of Juneau and the transportation industry.

Sincerely,
/s/ Jim Weber

888-288-3473
FAX 907-465-2827

SPONSOR STATEMENT

CSSB 96 (C&RA): "An Act relating to the Village Safe Water Act"

This bill makes the following changes to the Village Safe Water Act:

1. Raises the maximum population eligible for funding from 600 to 1000 for villages and first-class cities. This would allow those municipalities which are still facing clean water and sanitation issues to receive VSW grants despite their population growth. First Class cities Sand Point, King Cove, Hoonah and Klawock would become eligible for VSW grants.

2. Adds home rule municipalities whose population is below 1000 residents. This would allow Nenana (a Home Rule city) and the borough of Yakutat to become eligible to apply for VSW funding.

3. Changes the definition of village from "unincorporated community" to a village listed in 43 U.S.C. 1610 or 15 (ANCSA). This would make it mandatory for an applicant to have a structured government in place.

These changes to the Village Safe Water Act would direct the program funding to those regions of Alaska it was intended to help. Many villages in Alaska lack basic sanitation needs including safe sources of drinking water or hygienic means of sewage disposal.

The Department of Environmental Conservation is in full support of this bill. I urge your support the passing of this bill.

Explanation of Changes

The original intent of this bill was to change the statutory language to add "home rule cities" to the Village Safe Water (VSW) program so the city of Nenana would be eligible for the program. Since introduction there were three changes that occurred to the bill;

- Increasing the maximum population from 600 to 1,000. This recommendation came from the DEC, it was recommended because there are a number of cities that are close to the maximum and a couple that are barely over the limit.
- Adding "home rule municipality" was also a recommendation of DEC and that would enable both the City of Nenana and Yakutat city and Borough to be eligible.
- Changing the definition of village from "unincorporated community" to U.S.C. 1610 or 15 (ANCSA). This was also a recommendation from the DEC, it makes it mandatory for a structured government to be in place, to be eligible for the grant.

These recommendations were added by the DEC/VSW to expand the services they provide.

Re: Request for Statutory Language Change

Dear Senator,

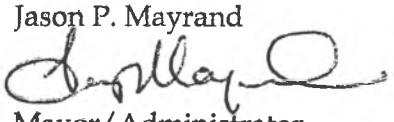
The City of Nenana requests that legislation be submitted for approval to add a section to AS 46.07.080 as identified below.

Current Language

AS 46.07.080 Definitions
In this chapter

1) "commissioner' means the commissioner of environmental conservation.
2) "village" means an unincorporated community that has between 25 and 600 people residing within a two-mile radius, a second class city, or a first class city with not more than 600 residents.

We request that the second section be revised as follows



2) "village' means an unincorporated community that has between 25 and 600 people residing within a two-mile radius, a second class city, or a first class <u>or home rule city</u> with not more than 600 residents.

The City makes this request in order for the community to be specifically eligible for Village Safe Water capital improvement programs.

Nenana has previously applied and been approved for a grant from VSW for an extensive renovation of our failing water and sewer system. At some point after the grant was awarded, it was brought to our attention that it was a mistake as Nenana, being a Home Rule City, was not eligible under the current language. We therefore request that this language change be submitted so as to restore our grant eligibility.

Please contact me with any questions you or your office may have. I am happy to share the history and background information with you and your colleges.

Sincerely,
Jason P. Mayrand

State Capital Room 11
Juneau, AK 99801

Re: Support for SB96

Dear Senator Kookesh,

I am writing this letter on behalf of the community of Klawock to express our support for SB96. The change in the language of SB96 to a population of 1,000 residents would make Klawock eligible for the Village Safe Water Act funds.

By making Klawock eligible for the Village Safe Water Act program, we will be able to more effectively address the issue of our aging infrastructure. In small villages around the State there exists a real need to fund projects that address our aging infrastructure. By addressing these needs we will be able to enhance the health and welfare of the people of Klawock.

Thank you for introducing this language change and for your support.

Sincerely,

Donald Marvin
Mayor of Klawock

Sen. Kookesh
State Capitol Room 11
Juneau AK, 99801

Re: Support for SB 96

Dear Senator,

The Nenana Native Council expresses its support for adoption of a language change to add Home Rule organized communities to the Statute.

Making the community eligible for inclusion in this program will enable us to greatly enhance the health and welfare of the members of the community.

Thank you for your support.

Re: SB 96

Dear Senator Kookesh;

The City and Borough of Yakutat would like to lend its support to SB 96 in that legislation's attempt to stabilize funding under the Village Safe Water Act.

Significant, temporary, population fluctuations occur in the State of Alaska as a result of development decisions made by one or more of the many large land owners who characterize property ownership in Alaska in general and Southeast in particular. Seldom are those fluctuations a reflection of core village society and economics.

The changes suggested by SB 96 will help address temporary population "bubbles" as well as guarantee continuity of project work from one building season to the next.

Thank you for your good work and continued concern for your constituency.

Sincerely,

Frank L. "Skip" Ryman
Manager, City and Borough of Yakutat

CS FOR SENATE BILL NO. 97(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE FINANCE COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act authorizing additional appropriations for public education and for community revenue sharing based on the price of Alaska North Slope crude oil, and adjusting the formula for payments to communities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.17 is amended by adding a new section to read:

Sec. 14.17.305. Additional education funding based on oil prices. (a) The legislature may appropriate to the Department of Education and Early Development for distribution during the following fiscal year as state aid to public school districts, according to the district average daily membership adjusted under AS 14.17.410(b)(1)(A) - (D), an additional amount equal to $5,000,000 multiplied by the amount, rounded to the nearest whole dollar, that the average price of Alaska North Slope crude oil for each fiscal year exceeds the trigger price for oil for each fiscal year calculated under (b) of this section.

(b) For the purpose in (a) of this section, the legislative finance division shall

calculate the trigger price of oil for each fiscal year by

(1) determining the amount appropriated from the unrestricted general fund for the fiscal year, excluding the amount appropriated

(A) for community revenue sharing under AS 29.60.855(d);

(B) for additional state aid to public schools under this section; and

(C) to the budget reserve fund (AS 37.05.540(a));

(2) estimating the price of oil necessary to fund the appropriations under (1) of this subsection using the most recent oil price and production figures available from the Department of Revenue;

(3) rounding the price of oil estimated under (2) of this subsection to the nearest whole dollar; and

(4) adding $2 to the estimated price of oil under (3) of this subsection.

(c) This section does not create a dedicated fund.

*** Sec. 2.** AS 29.60.850(b) is amended to read:

(b) Each fiscal year, the legislature may appropriate to the community revenue sharing fund an amount equal to 20 percent of the money received by the state during the previous calendar year under AS 43.55.011(g). The amount may not exceed

[(1) $60,000,000; OR

(2)] the amount that, when added to **two-thirds of** the fund balance on June 30 of the previous fiscal year, equals $180,000,000.

*** Sec. 3.** AS 29.60.855(a) is amended to read:

(a) The department shall calculate the basic amount used for determining the basic community revenue sharing payment for a fiscal year by applying the following formula: the amount available for payments for that fiscal year under AS 29.60.850(c) **and (d) of this section**, minus 60,000,000, divided by 60,000,000, plus one, multiplied by 384,000. However, if the amount calculated is less than $220,000, the basic amount for that fiscal year is $220,000.

*** Sec. 4.** AS 29.60.855 is amended by adding a new subsection to read:

(d) The legislature may appropriate an additional amount to the Department of Commerce, Community, and Economic Development for community revenue sharing

payments equal to $5,000,000 multiplied by the amount that the average price of Alaska North Slope crude oil, rounded to the nearest whole dollar, for each fiscal year exceeds the trigger price for oil for the fiscal year calculated under this subsection, subject to the following:

(1) the legislative finance division, using the most recent oil price and production figures available from the Department of Revenue, shall calculate the trigger price of oil for each fiscal year by

(A) determining the amount appropriated from the unrestricted general fund for the fiscal year, excluding the amount appropriated

(i) for community revenue sharing under AS 29.60.855(d);

(ii) for additional state aid to public schools under AS 14.17.305; and

(iii) to the budget reserve fund (AS 37.05.540(a));

(B) estimating the price of oil necessary to fund the appropriations under (A) of this paragraph;

(C) rounding the price of oil estimated under (B) of this paragraph to the nearest whole dollar; and

(D) adding $2 to the estimated price of oil under (C) of this paragraph;

(2) the amount appropriated under this subsection shall be distributed under (a) of this section during the immediately following fiscal year;

(3) this subsection does not create a dedicated fund.

*** Sec. 5.** This Act takes effect July 1, 2012.

Goal: Increase Community Revenue Sharing when there is a GF Surplus

Dollars in millions unless otherwise noted

1 Enter price of oil from March through June in Plan sheet to determine avg price for the year (highlighted in col A)

2 Enter supplemental spending in Plan sheet to determine FY11 surplus

3 The numbers chosen for 1 and 2 determine the breakeven price of oil

4 Enter the spread between breakeven and trigger price of oil

5 Enter the amount of supplemental revenue sharing for each dollar the avg price exceeds the trigger price

$110.00	1,153.2		$ 2.00	5.00					
$92.74

Goal: Increase Community Revenue Sharing when oil prices are high

Options:

1. **Deposit money in the fund**
   only one third of the fund balance is distributed each year so the option is relatively expensive and does not adjust to the price of oil
2. **Appropriate money to DCCED to be distributed on a per capita basis under AS 29.60.860**
   not a statutory fix
3. **Revise law to include a temporary trigger so the amount distributed increases with the price of oil**
   statutory but temporary, amount computed by formula and is dependent on the price of oil each year

The table below is for option 3, with trigger points and the amount added by the trigger determined by these cells

Dollars in millions unless otherwise noted

RECEIVED
MAR 14 2011

March 14, 2011

Senator Bert Stedman
Senator Lyman Hoffman
Senate Finance
Juneau, Alaska 99811

Dear Senators Stedman and Hoffman,

This is just a quick note to thank you both for your introduction of SB97. While we understand there may be changes and/or even pushback, we certainly appreciate your willingness to help municipalities as they realize the financial ramifications that high oil prices bring with regards to their ability to provide basic services.

I think you would agree that municipalities are much healthier than they were before Revenue Sharing was reinstated by the leadership of your committee (and specifically, the two of you). All of the municipalities acknowledge and realize that you have done much to improve their condition and quality of life.

The rising cost of fuel, however, makes every dollar worth far less than it was previously. Also, as municipalities often see mandatory property tax exemption bills introduced, other means of revenue must be identified to make up the difference.

Again, we appreciate your willingness to introduce this bill and promise to do all possible to see this bill succeed. We will be in contact with you and take your lead as to what you might need from us.

Thank you so much for your support for Alaska's municipalities.

Sincerely,

Kathie Wasserman

Kathie Wasserman
Executive Director

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 97

Analysis

Senate Bill 97 would provide additional funding for public education, allocated on the adjusted average daily membership and to communities through the Community Revenue Sharing program based on the price of oil that exceeds $89 a barrel on July 1 of the fiscal year multiplied by $2,000,000.

The fiscal note assumes a July 1 oil price of $100 per barrel and the cost is calculated as follows:

$100 - $89 = 11 * $2,000,000 = $22 million.

Under this estimate, the cost of SB97 is $22 million for public education. The Department of Education & Early Development does not expect any additional costs to administer the program.

Under this estimate, the total cost of SB97 with an oil price of $100 on July 1 is $44 million - $22 million for public education and $22 million for communities.

If the program were implemented as of March 17, 2011, with the closing price of oil at $114 per barrel, the total cost would be $100 million - $50 million for education and $50 million for communities.

$114 - $89 = 25 * $2,000,000 = $50 million.

Listed below are the calculations for what the appropriation to public education would be at various oil price levels.

Price of Oil on July 1	Amount Over $89	Multiplier	Total Amount For Education
95	6	2,000,000	12,000,000
100	11	2,000,000	22,000,000
105	16	2,000,000	32,000,000
110	21	2,000,000	42,000,000
115	26	2,000,000	52,000,000
120	31	2,000,000	62,000,000
125	36	2,000,000	72,000,000

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 97

Analysis

Senate Bill 97 would provide additional funding for public education allocated on the adjusted average daily membership and to communities through the Community Revenue Sharing program based on the price of oil that exceeds $89 a barrel on July 1 of the fiscal year multiplied by $2,000,000.

The Department of Commerce, Community, and Economic Development administers the Community Revenue Sharing Program and does not expect any additional costs to administer the program.

The fiscal note assumes a July 1 oil price of $100 per barrel and the costs is calculated as follows:
$100 - $89 = 11 * $2,000,000 = $22 million

Under this estimate, the total cost of SB97 with an oil price of $100 on July 1 is $44 million - $22 million for education and $22 million for communities.

If the program were implemented as of March 17, 2011, with the closing price of oil at $114 per barrel, the total cost would be $100 million - $50 million for education and $50 million for communities.
$114 - $89 = 25 * $2,000,000 = $50 million.

Listed below is the calculation of the cost of the Community Revenue Sharing program at various oil prices.

Price of Oil on July 1	Amount above $89	Multiplier	Total Amount *
95	6	2,000,000	12,000,000
100	11	2,000,000	22,000,000
105	16	2,000,000	32,000,000
110	21	2,000,000	42,000,000
115	26	2,000,000	52,000,000
120	31	2,000,000	62,000,000
125	36	2,000,000	72,000,000

*the total amount would be doubled to include the allocations under Education and Community Revenue Sharing.

Sponsor Statement

SB 99: Heating Fuel Energy Relief

"An Act relating to a heating fuel energy relief program; and providing for an effective date."

The residents of Alaska who rely on heating oil to keep warm during the long Alaskan winter need a specific short-term solution that meets their unique needs, in addition to the many other promising long-term solutions that are currently being considered and implemented.

Senate Bill 99 puts a solution in place in case the price of heating oil rises as rapidly as it has declined. In recent years, many Alaskans' discretionary income has evaporated, consumer debt has risen sharply, and the cost of heating oil is still beyond the ability of many Alaskans to pay. A sharp rise in heating oil now, while beneficial to the State budget, would economically devastate individual Alaskans, business owners, and their families.

Senate Bill 99 will require the State of Alaska to offset home and commercial heating costs *when the price of a barrel of crude rises to a point where the State of Alaska is enjoying budget surpluses*. If – *and only if* – the price of heating oil triggers the measures outlined in Senate Bill 99, it is reasonable to ask the people of Alaska to pay $2.50 per gallon while the state pays the balance from its surplus directly to the home heating oil dealers.

With that temporary solution in place, Alaskans can focus attention on long-term solutions that will restore optimism about our economic future, protect our families and businesses, and allow us to concentrate on our #1 priority – renewable and sustainable energy solutions for the State of Alaska.

Senate Bill 99 is easily administered. The dealers of home heating oil, as part of their current reporting requirements, send the State of Alaska a monthly breakdown of the quantities of the various petroleum products they sell, including home heating oil. The quantities of heating oil are easily verifiable and objectively determinable.

Senate Bill 99 is efficient. It does not create a bureaucracy of paperwork or require massive government employment to operate effectively. Rather than distributing checks or debit cards to tens of thousands of individuals, the State would make a payment directly to heating oil dealers. It is a relatively simple way to utilize a surplus in the State's bank account, due to the high cost of crude, to reduce the cost of heating oil for the Alaskans who need it most.

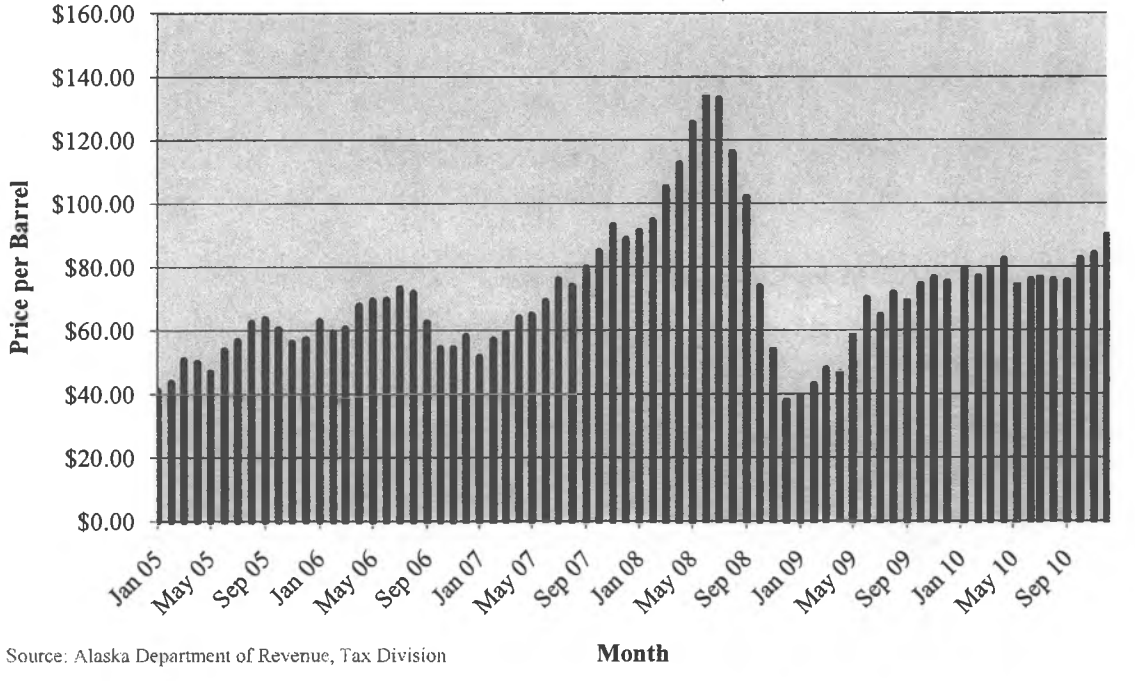
Senate Bill 99 requires the consumer price of heating oil to increase each of the next three years, reinforcing the need for Alaskans to conserve and plan for long-term solutions.

I urge your support of this legislation.

DEPARTMENT OF COMMERCE, COMMUNITY, AND ECONOMIC DEVELOPMENT

DIVISION OF COMMUNITY AND REGIONAL AFFAIRS

REPORT TO THE DIRECTOR



CURRENT COMMUNITY CONDITIONS:

FUEL PRICES ACROSS ALASKA

JANUARY 2011 UPDATE

INTRODUCTION

Figure 1. Alaska North Slope Crude: January 2005 to December 2010

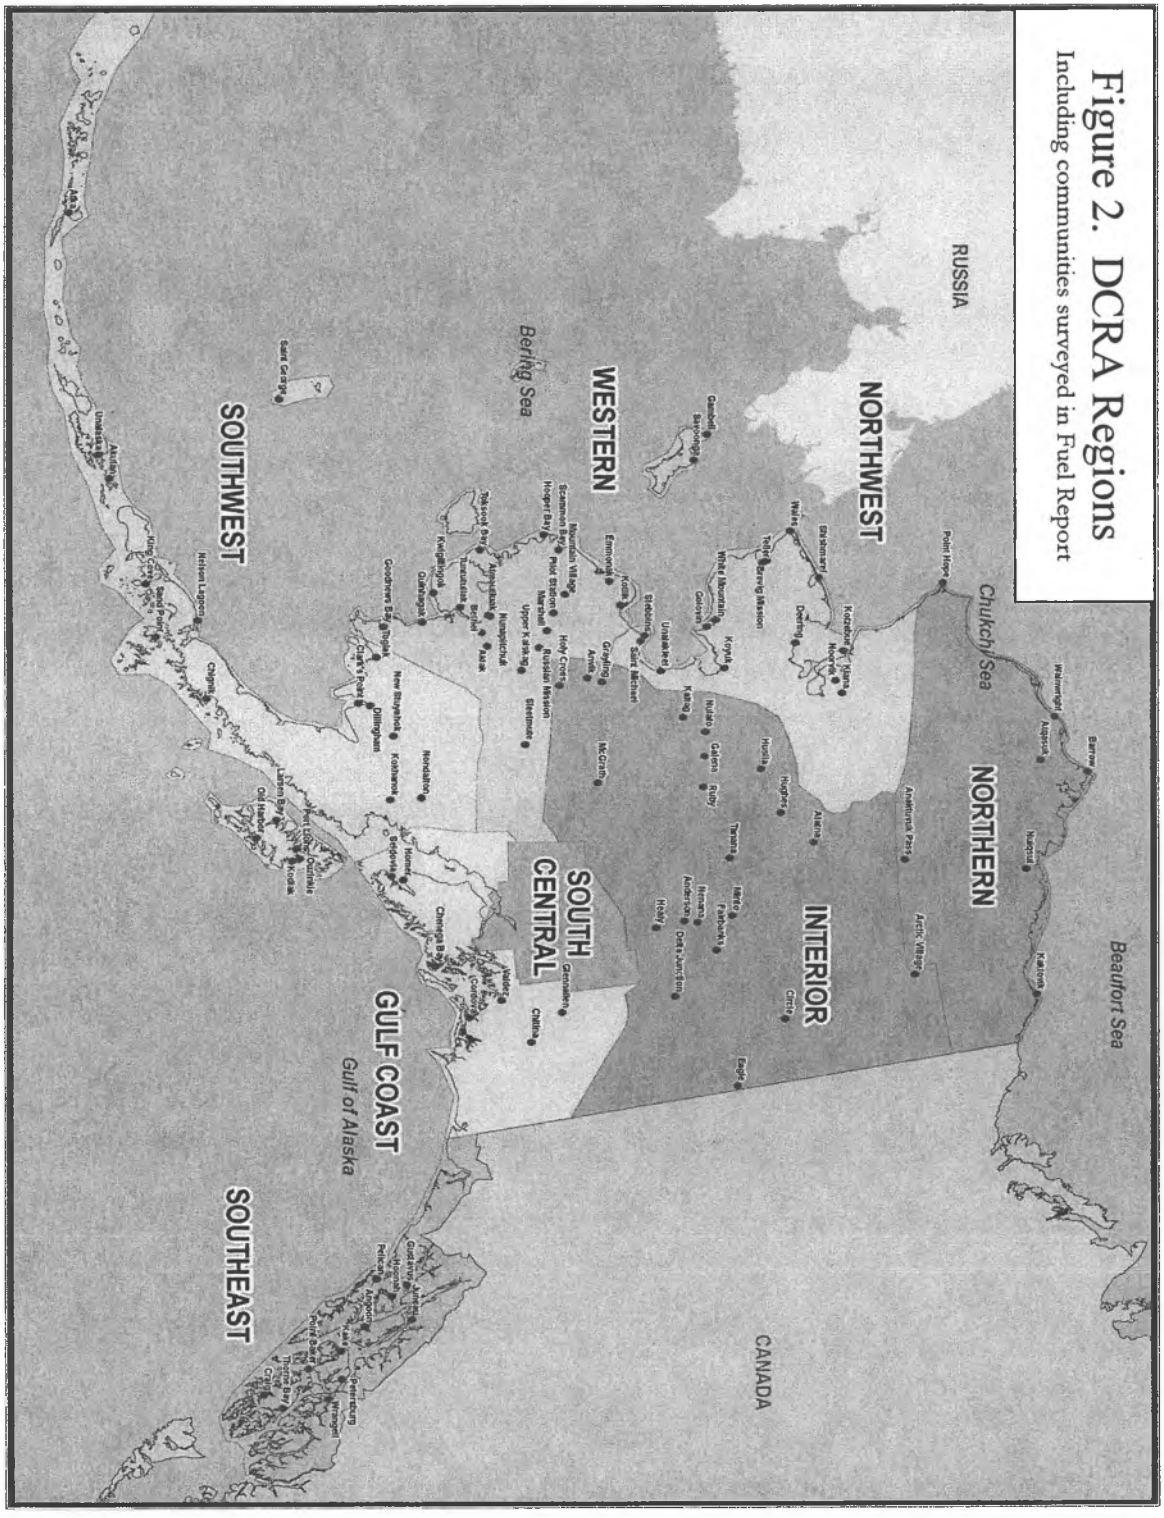
Source: Alaska Department of Revenue, Tax Division

In December 2008, the price of Alaska North Slope (ANS) crude dropped to $37.70, its lowest price since June 2004. During the latter half of 2009 and most of 2010, oil prices remained stable. However, in the the last few months of 2010, ANS crude oil prices rose from $75.27 in September to $89.75 in December, its highest price since September 2008. Although this was the highest price in over two years, it was still markedly lower than the price in June 2008, when ANS crude oil reached a record average monthly price of $133.78 per barrel (Figure 1).

The national average price of gasoline peaked at $4.11 per gallon in mid-July 2008 and dropped to $1.65 per gallon by the end of December 2008. In early June 2009, the price rose to $2.54 per gallon and remained mostly level until December of 2010, when the price once again rose above $3.00 per gallon. As of the last week of January 2011, the average price is $3.11 per gallon.

National average heating fuel prices are only tracked from October to March. Those prices peaked at an all-time high of $3.85 per gallon in March 2008. However, by December 2008, the prices had fallen to $2.33, similar to the average heating fuel prices in 2006 and 2007 before prices spiked.[1] Prices remained at that level from January to March of 2009. Since then, prices have risen. This winter, the average price was $2.96 when tracking began again in October 2010. In January of 2011, the average price was $3.43.

In January 2011, the Division of Community and Regional Affairs (DCRA) repeated a statewide survey of retail heating fuel and gasoline prices in a cross-section of 100 select Alaska communities, first initiated during 2005 (*Community Conditions: Fuel Prices Across Alaska*). This report, *Current Community Conditions: Fuel Prices Across Alaska, January 2011 Update*, summarizes fuel survey findings, discusses changes in fuel prices during the recent past, lists fuel prices in each community on the date of contact, and provides a current and historical perspective on fluctuating fuel prices.



METHODOLOGY

The DCRA Research and Analysis Section and Local Government Assistance Section developed a survey and selected a community sample during 2005. Communities were strategically selected to represent differing socioeconomic conditions in rural Alaska regions, including the Interior, Gulf Coast, Northern, Northwest, Southeast, Southwest, and Western regions (Figure 2). Selected communities had generally been recipients of an Alaska Energy Authority bulk fuel project.

To accurately and consistently track longitudinal changes in fuel prices, the 2005 survey and community sample were used to collect 2006, 2007, 2008, 2009, 2010, and 2011 fuel information – the communities and core questionnaire items have remained the same since 2005.

DCRA Research and Analysis staff conducted the survey between January 18 and January 24, 2011. In total, local fuel retailers serving 100 communities were contacted (via telephone) and asked to provide current per gallon prices on heating fuel (#1) and gasoline (Figure 2). All fuel price quotes reflect prices at the vendors' pump stations. Survey results are one-time

[1] Source: United States Department of Energy, Energy Information Administration. Note: Heating fuel prices are only recorded from October to March. Gasoline prices are recorded year-round.

measurements and representative of retail fuel prices on the particular day of contact. Heating fuel and gasoline prices may have changed between the time of contact and the publication of this report.

CURRENT FUEL PRICES ACROSS ALASKA

Table 1. January 2011: Heating Fuel #1 Prices per Gallon across Alaska

	Gulf Coast	Interior	Northern	Northwest	Southeast	Southwest	Western
High	$6.16	$10.00	$2.60	$8.06	$5.09	$6.80	$6.26
Low	$3.30	$3.45	$1.40	$4.03	$3.59	$3.16	$4.27
Average	$4.19	$4.94	$1.83	$5.65	$4.16	$4.91	$5.46

Average heating fuel prices per gallon vary by region (Table 1). Alaska communities in the Northwest Region reported the highest average heating fuel retail price at $5.65 per gallon, while Northern communities reported the lowest average retail price at $1.83 per gallon. The North Slope Borough subsidizes residential heating fuel costs in six of its seven communities. Excluding the Northern Region, Southeast communities experienced the lowest heating fuel prices, at an average of $4.16 per gallon. This is because of its relatively short distance to fuel distribution centers and year-round marine access, which is also true for communities in the Gulf Coast Region, which has the next-lowest average price. Although the Southwest Region has year-round marine access, its greater distance from distribution centers causes higher prices. In other parts of the state, many rural communities are located off the road system and have limited waterway transportation. Such isolation contributes to higher fuel costs. In the Northern, Northwest, and Western regions, most communities depend on a few bulk fuel barge deliveries per year. Sometimes, fuel must be flown into the community.

Table 2. January 2011: Northern Region Heating Fuel (#1) and Gasoline Retail Prices

Community	Community Retailer	Heating Fuel Retail Price		Gasoline Retail Price
		Residential	Commercial	
Anaktuvuk Pass	Nunamiut Corporation	$1.55	$9.25	$8.10
Atqasuk	Atqasuk Corporation	$1.40	$4.90	$4.10
Barrow	BUEC, Inc	Natural Gas	Natural Gas	$4.25
Kaktovik	Kaktovik Inupiat Corporation	$2.60	$6.95	$4.00
Nuiqsut	Kuukpik Corporation	$2.30	$6.70	$5.00
Point Hope	Tigara Corporation	$1.64	$6.35	$4.83
Wainwright	Olgoonik Corporation	$1.50	$7.30	$5.89

Of noteworthy importance, the North Slope Borough (Northern Region) has village corporations that distribute fuel to residents throughout the Northern Region and, within the community, charge only a delivery fee on a per gallon basis. The North Slope Borough does not subsidize heating fuel for commercial use. Consequently, the retail price of heating fuel for commercial entities is significantly higher than for residences (Table 2). One Northern Region community, Barrow, heats with natural gas, although Nuiqsut is in the process of converting to natural gas. A new pipeline will transport natural gas from the Alpine Oil Field on the North Slope to the community.

To accurately summarize statewide heating fuel prices, it is appropriate to exclude Northern Region communities because of the North Slope Borough subsidy for residential use heating fuel and natural gas connections. On average, excluding the seven Northern communities, heating fuel retailed for $4.98 per gallon across the remaining surveyed Alaska communities. The Arctic Village Traditional Council in Arctic Village (Interior Region) reported the highest heating fuel retail price at $10 per gallon (see Appendix). In contrast, the City of Akutan (Southwest Region) reported the lowest heating fuel retail price at $3.16 per gallon.

Table 3. January 2011: Gasoline Prices per Gallon across Alaska

	Gulf Coast	Interior	Northern	Northwest	Southeast	Southwest	Western
High	$6.56	$10.00	$8.10	$8.00	$5.18	$7.25	$6.62
Low	$3.37	$3.67	$4.00	$4.55	$3.40	$3.41	$5.09
Average	$4.47	$5.27	$5.17	$5.99	$4.15	$5.26	$5.92

As Table 3 illustrates, average gasoline prices per gallon varied across Alaska by region. Communities in the Northwest Region reported the highest average gasoline retail price at $5.99 per gallon, while Southeast Region communities reported the lowest average retail price at $4.15 per gallon. Statewide retail prices indicated significant variation in gasoline retail price. Specifically, the Arctic Village Traditional Council in Arctic Village (Interior Region) reported the highest gasoline prices at $10 per gallon. North Pacific in Valdez (Gulf Coast Region) reported the lowest gasoline retail price at $3.37 per gallon. On average, gasoline retailed for $5.29 per gallon across the 99 surveyed Alaska communities.[2]

In the Gulf Coast and Interior regions, some communities lie on the road system, and others do not. This causes heating fuel prices to differ between the two groups (Table 4). This contrast is stronger in the Interior, where the average prices for heating oil and gasoline for communities off the road system were $1.97 and $1.89 higher, respectively, than the average prices for communities on the road system. In the Gulf Coast Region, where many of the communities can be served year-round by road or barge, the average price was $0.88 higher (heating fuel) and $1.09 (gasoline) higher for communities off the road system than the average price for communities on the road system.

[2] Gasoline is not sold in Ouzinkie.

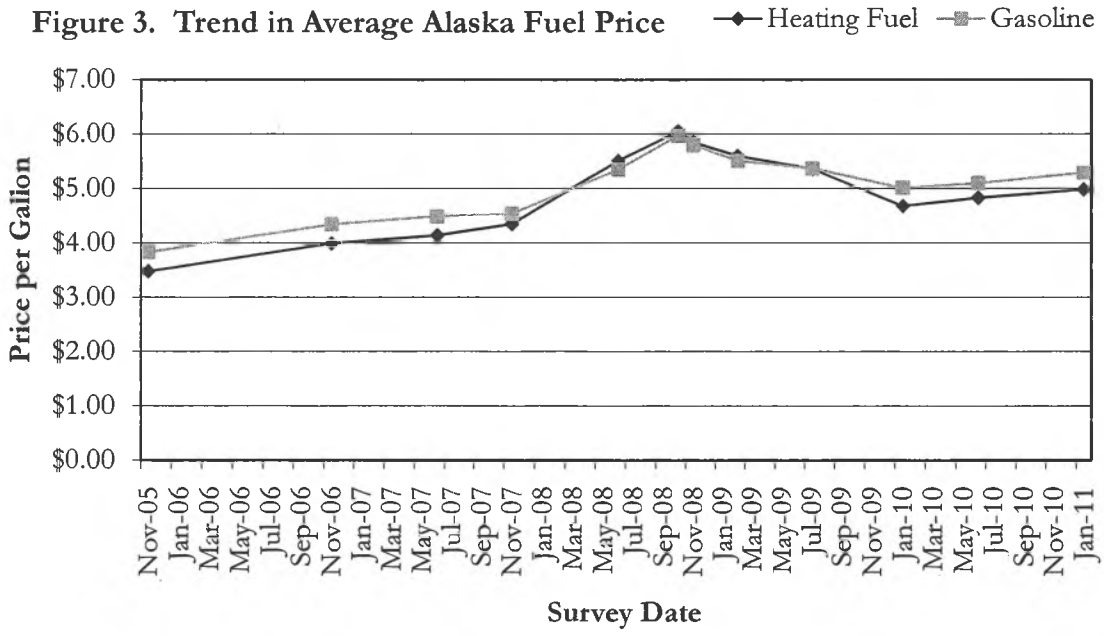

Table 4. January 2011: On the Road System and Off the Road System: Prices in the Gulf Coast and Interior Regions

Gulf Coast	On Road System	Off Road System	Interior	On Road System	Off Road System
Heating Fuel:			Heating Fuel:		
High	$3.73	$6.16	High	$4.15	$10.00
Low	$3.56	$3.30	Low	$3.45	$4.10
Average	$3.61	$4.49	Average	$3.66	$5.63
Gasoline:			Gasoline:		
High	$4.13	$6.56	High	$4.95	$10.00
Low	$3.37	$3.46	Low	$3.67	$4.75
Average	$3.78	$4.87	Average	$4.10	$5.99

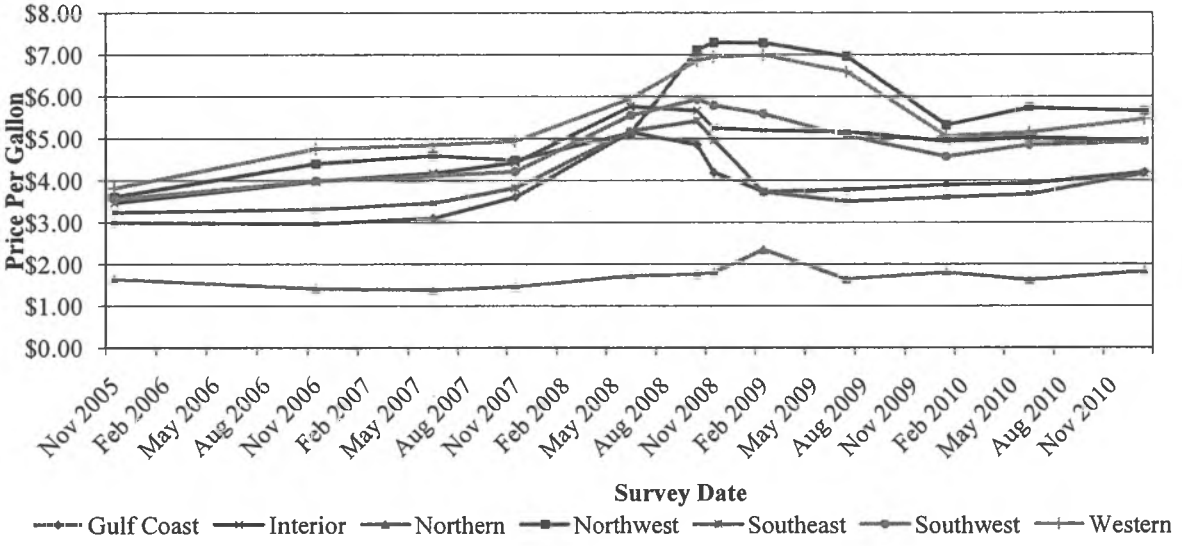
CHANGE IN FUEL PRICES ACROSS ALASKA

Alaska fuel prices have continued to increase (Figure 3). Excluding Northern communities, the statewide average per gallon heating fuel price rose from $4.85 in June 2010 to $4.98 in January 2011. This $0.13 per gallon price change represented a 3% increase in the statewide average heating fuel price per gallon. Prices in the Northern (+13%), Southeast (+13%), Gulf Coast (+7%), Western (+6%), and Southwest (+1%) regions increased from June 2010 to January 2011. Prices in the Interior (-2%) and Northwest (-1%) regions declined (Figure 4).

Figure 3. Trend in Average Alaska Fuel Price

The statewide average gasoline price also increased from June 2010 to January 2011, rising from $5.10 to $5.29 per gallon (Figure 3). This $0.19 per gallon average price increase represents a 4% increase in the statewide average price per gallon of gasoline. Gasoline prices per gallon in the Northwest (+9%), Gulf Coast (+8%), Southeast (+5%), Western (+4%), Northern (+2%), and Southwest (+1%) regions all increased. Prices in the Interior Region (-1%) decreased from June 2010 to January 2011 (Figure 5).

Figure 4. Heating Fuel Prices by Region



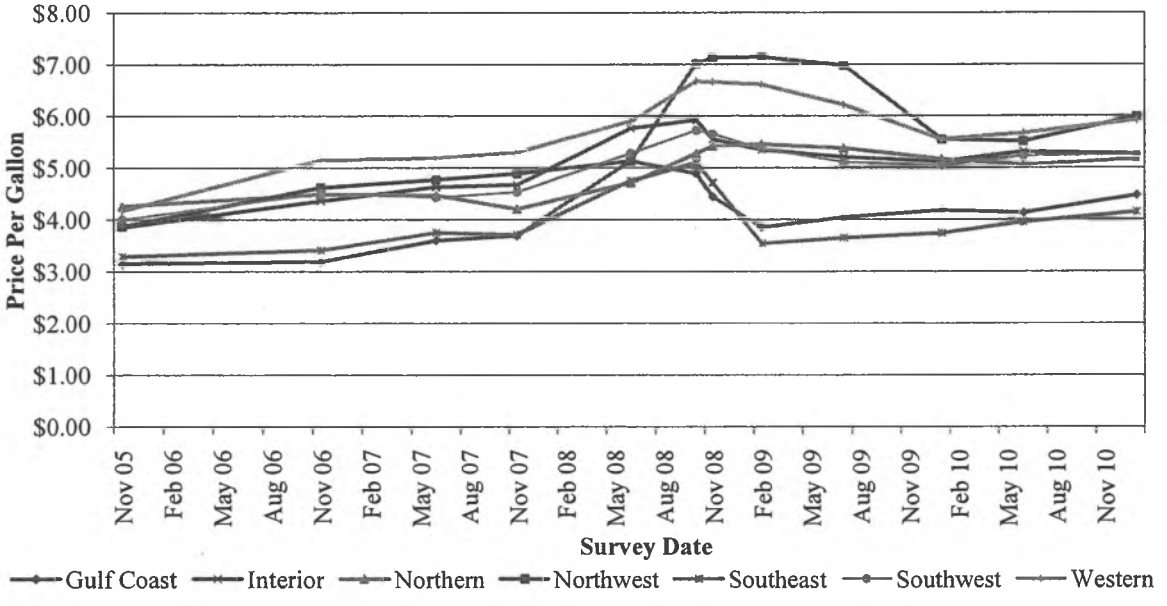


Figure 5. Gasoline Prices by Region

SUMMARY

During January 2011, current retail heating fuel (#1) and gasoline prices were collected from 100 select communities across Alaska. Heating fuel retail prices per gallon ranged from $3.16 (Akutan) to $10.00 (Arctic Village), and the statewide average price was $4.98 per gallon. Gasoline retail prices per gallon ranged from $3.37 (Valdez) to $10.00 (Arctic Village), and the statewide average price was $5.29. In general, average heating fuel and gasoline prices are lower than their peak in the summer of 2008. They have, however, increased by 3% and 4%, respectively, since June 2010. Although fuel prices are lower than in 2008, they are still significantly higher than in 2005. Since November 2005, the statewide average cost of heating fuel has increased 43% from $3.48, and the statewide average cost of gasoline has increased 38% from $3.83.

These increased fuel and energy costs, combined with high unemployment rates, limited local economies, and local governments struggling to provide basic local services, continue to present rural Alaska communities and households with challenging circumstances.

EXECUTIVE SUMMARY

Many Alaskans face extremely high, volatile fuel prices. Little is publicly known about the actual structure of Alaska's rural fuel markets and what drives prices at the community level. The Alaska State Senate Finance Committee asked economists at the University of Alaska Anchorage, Institute of Social and Economic Research (ISER) to investigate rural Alaska fuel markets and identify policy options that could be considered for legislative action to reduce fuel prices. This study is *both* an update *and* an evolution of previous ISER *Components of Fuel Costs* studies.[1] It does not include road-accessible communities.

Western Alaska Fuel Market

The Western Alaska fuel "market" is comprised of North Aleutian villages beginning with Nelson Lagoon proceeding north along the coast to Kotzebue Sound. Also included are ports of call on tributary rivers, the most prominent being the Yukon and Kuskokwim Rivers (Figure 1).

Figure 1. Alaska Fuel Markets

Three major competitors historically served the Western Alaska fuel distribution market, Crowley Marine Services, Yukon Fuel Company, and Delta Western. Crowley bought Yukon Fuel in 2005 and Ruby Marine, LLC (currently serving Yukon River customers) began operation in 2007, making a current total of three competitors.

While it is possible to fly fuel to most locations, it can only be done cost effectively to communities within a few hundred miles of Kenai or Fairbanks refineries and then only in quantities of less than five thousand gallons. Marine transportation remains the most cost-effective way to deliver fuel to most Western Alaska communities. Due to the shallow waters

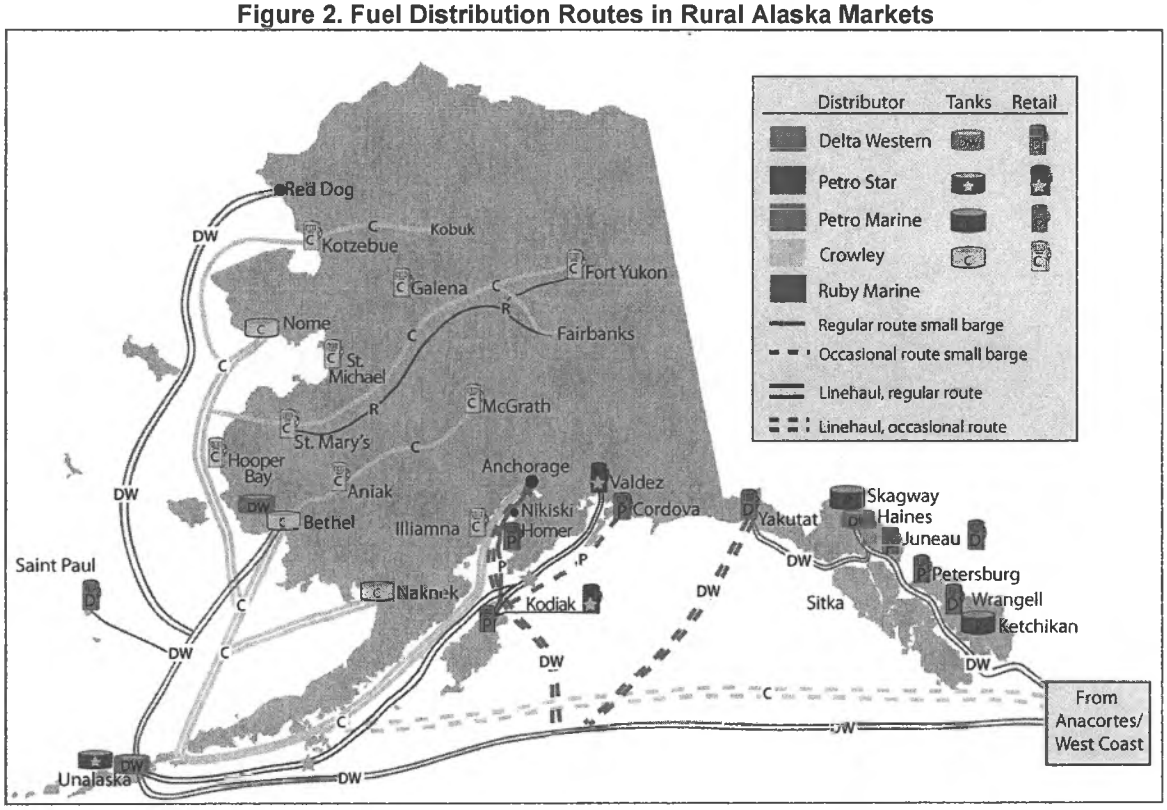
University of Alaska Anchorage Institute of Social and Economic Research. Available at: http://www.iser.uaa.alaska.edu/Publications/fuelpricedeliveredupdate.pdf

of most ports of call, only a tug and barge combination is a viable method for delivery. Seasonal ice and remoteness are major factors influencing fuel transportation costs.

The competitive landscape in the marine delivery market has changed significantly over the last fifteen years. In the mid 1990s, Yukon Fuel's activity was primary on the Yukon River, and Delta Western and Crowley served the rest of the Western Alaska market. Beginning in the late 1990s and after a failed attempt to buy Yukon Fuel, Delta Western started to exit the small delivery market to focus on linehaul and tank farm operations. Also, during the late 1990s Yukon Fuel started an aggressive pricing program to expand its service territory. This plan was successful and took Yukon Fuel's small-delivery volume from seven million gallons in 1995 to nineteen million gallons in 2002. This increase in volume came from securing former Crowley customers and by picking up old Delta Western customers.

During this time both Crowley and Yukon Fuel charged some customers rates below cost, trying to secure additional market share. The strategy was to try to gain efficiencies and economies of scale that would lower the costs for all deliveries. One part of the plan benefited customers with larger tank farms.

By 2002 this strategy had increased Yukon Fuel's market share but resulted in relatively low profitability. In 2005, Yukon Fuel was sold to Crowley. As a direct result of very low profits, the market saw almost no reinvestment in equipment that would be expected to occur in a healthy market.



Since Yukon Fuel's purchase in 2005 prices have been increasing. However, evidence of prices remaining at depressed levels is the continued absence of Delta Western in the majority of the market. Delta Western has the capital and operational knowledge to compete for fuel sales in small Western Alaska communities yet they have had a relativity small role in the market from 2006 to 2009. When comparing current fuel delivery prices to fuel delivery prices from more than five years ago it must be factored in that prices from that time period were not sustainable, as evidenced by the sale of Yukon Fuel and the lack of participation by Delta Western.

There are many physical movements to transport fuel from the refinery to the end user's tanks.

1. Fuel is purchased from the refinery and shipped via a linehaul barge (the term used to reflect a large ocean-going barge) or trucked, as is the case for the upper Yukon River.
2. Fuel is put into a tank farm at a regional terminal or fuel hub or a smaller barge for storage.
3. Fuel is loaded from the terminal/fuel hub into smaller barges for delivery of fuel to each smaller community's local tank farm.
4. Local tank farms sell fuel to individual customers either at the tank farm or by truck distribution.

Figure 2 shows the fuel distribution routes of the major distributors in both the Western Alaska and ice-free coastal fuel markets.

Figure 2. Fuel Distribution Routes in Rural Alaska Markets

The estimated average cost of delivering fuel from Cook Inlet to Western Alaska communities is approximately $1.00 per gallon. These costs can easily increase by $0.20 per gallon for docking and fuel off-loading deficiencies that increase the time, safety, and environmental risks of fuel handling. Another estimated average of $1.60 in costs occurs once the fuel is delivered to communities, to cover the cost of fuel storage tanks, working capital of holding fuel until sold, and tank-farm operations such as fuel sales. If, in our hypothetical example, the refinery price of fuel was $2.00, the final average cost of transporting and selling the fuel in the "average" community served by the small barge fleet would be $4.60. More risky or challenging delivery circumstances would increase these costs.

This analysis found no evidence of excessive charges by fuel distributors. Most of the variation in fuel prices appears to be variations in retail price-setting practices at the community level. Potential reasons for variations in prices include differences in fuel sale operating hours and costs; differences in safety and environmental compliance implementation levels; differences in collections for tank-farm repair and replacement and operation and maintenance practices; differences in the cost of debt for bulk fuel loans; and mark-ups to collect revenues for other community purposes. Information on retail mark-up practices is proprietary, and most of the communities we contacted would not provide the requested information.

Ice-Free Coastal Alaska Fuel Market

The fuel markets of the Ice-Free Coastal Alaska (IFCA) region have a different logistic and price structure than the fuel markets in Western Alaska and fuel markets on the Alaska road system. The IFCA region spans Southeast Alaska, Prince William Sound, the Kodiak area, the Alaska Peninsula, and the Aleutian Islands. The major characteristics of fuel markets in the IFCA region are:

1. Ice-free ports allow for year round delivery, reducing communities' storage requirements.
2. Fuel distributors are more likely to operate retail stores than they are in Western Alaska and more likely to face less competition than on the Alaska road system.
3. If the fuel distributer sells to an independent retailer, the sale is less likely to be under a contract with a predetermined pricing formula, which is typical in Western Alaska.

Fuel in IFCA is typically less expensive than fuel in Western Alaska but more expensive than fuel on the Alaska road system. The costs of transporting, storing, and retailing fuel in the ICFA are also all less than the costs of similar activities in Western Alaska but higher than costs on the Alaska road system.

Three companies distribute most of the fuel in the IFCA region: Harbor Enterprises (Petro Marine, Petro Express, and Shoreside Petroleum), Delta Western, and Petro Star. The only communities served by more than one of these fuel distributers are Dutch Harbor, Kodiak, Ketchikan, and Juneau. In the other IFCA communities it appears all fuel is supplied by only one fuel distributor.

Vertically integrated fuel markets eliminate clear transaction points along the supply chain that reveal the cost of each segment to move fuel from the refinery to the end user. Further, many ICFA community submarkets only have one distributor. A sole distributor in a market is a price setter, and this price does not necessarily reflect the cost of distributing fuel. This erodes the relationship between distributors' selling prices and their costs.

The price of fuel sold under contract, as in Western Alaska, is determined by a formula, accounting for the refinery lift price and the cost of transporting fuel to the community. As a result, Western Alaska landed wholesale fuel prices fluctuate with refinery gate and world oil prices.[2] No formula exists for most fuel sales in the IFCA region, since most fuel is not sold under contract. The lack of a fuel contract does not in itself increase fuel prices, but it does significantly reduce the transparency of fuel distributors' costs.

Most communities in Southeast Alaska have fuel supplied by one of the large three distributors. The independent fuel retailers have little control over the price of fuel they purchase from the fuel distributor because most fuel is not sold under a contractually determined price. Independent retailers do not pick the source refineries, the brand of fuel purchased, whether it is purchased on contract from a refinery, or the way it is delivered to the

[2] For more information on refinery and world crude oil markets and prices see, Wilson, Meghan, Ben Saylor, Nick Szymoniak, Steve Colt and Ginny Fay, 2008, *Components of Delivered Fuel Prices in Alaska*, prepared for Alaska Energy Authority, Institute of Social and Economic Research, University of Alaska Anchorage, June. Available at: http://www.iser.uaa.alaska.edu/Publications/Finalfuelpricedelivered.pdf

community. As a result, the price the independent fuel retailer pays for fuel is determined entirely by the fuel distributor. The only component of the cost that is not determined by the fuel distributor is the retail markup.

The fuel distributors know the amount of the retail markup of independent fuel retailers, because it is simply the price of the fuel they sold the retailer, subtracted from the retailer's posted price. Knowing the retailer's markup allows the distributor to essentially determine the retail price of an independent fuel retailer. The distributor can set the wholesale price of the fuel it sells to the retailer at exactly the known retail markup, subtracted from the desired final retail price. This allows a fuel distributor to exert monopoly pricing power in a market where it is the only fuel distributor but not the only fuel retailer. The retail fuel price is further influenced by the fuel distributor, because often neither the independent fuel retailer nor the community has fuel-purchase contracts with the distributor.

In the IFCA region fuel distributors do not sell their fuel on contracts that include a pricing formula. Instead, they usually have full freedom to set their price at their retail stores or in sales to other retailers. There is no legal commitment to sell their fuel at a predetermined price or with a predetermined transportation charge. In addition, it appears that in some community submarkets, especially in Southeast Alaska, there are only distributors selling at their own retail outlets and no one else competing to supply fuel at the wholesale or retail level. This creates a fuel-distribution monopoly in those community submarkets. The exception to this is Juneau, which has two distributors as well as multiple independent retailers.

IFCA fuel markets facilitate natural monopolies because significant economies of scale exist and potential competitors face a high cost of entering the market. Economies of scale exist because many of the costs of distributing fuel, such as barges and storage tanks, are relatively fixed. The result is decreasing "per gallon" costs of distributing fuel as the amount of fuel that a company distributes increases. For example, one fuel distributor could import two million gallons of fuel on a linehaul tanker cheaper than two fuel distributors can import one million gallons each on smaller fuel barges. A single large, fuel distributor in a region is probably able to distribute fuel at a lower cost than multiple smaller distributors. This naturally leads to consolidation to the point where the entire IFCA market is only served by a small number of distributors, in this case three.

While consolidating fuel distributors may lower *costs* of fuel, it does not necessarily lower *prices* paid by the consumers. Instead, a sole fuel distributor would be capable of exercising its market power and charging a price higher than would be expected in a competitive market.

Without access to proprietary information, it is unclear whether fuel distributors in the IFCA region generate a larger than expected return on investment (profit) or charge monopolistic prices. The structure of fuel markets in the IFCA allows for fuel distributors to price fuel higher than they could in a competitive market. However, the State of Alaska Attorney General's Office recently investigated—with access to proprietary information— that question, and the resulting report indicates that fuel distributors in the ICFA region are not exercising

their market power and pricing fuel significantly higher than would be expected in a fully competitive market.[3]

IFCA fuel markets with only one distributor may also be exposed to a higher risk of fuel price shocks. In a competitive market, a fuel distributer wants to avoid purchasing fuel at the peak of a short-term fuel price increase. If it did, and a competitor was able to purchase fuel at a lower price, the distributor would have to reduce its fuel selling price below its purchase price to maintain market share.

The fact that Western Alaska and the IFCA rural fuel markets are less than competitive means retail fuel customers absorb the full impacts of high and volatile fuel prices— because fuel distributors can pass on these costs. Recent higher prices for fuel delivered to Western Alaska communities seem to result from the sudden convergence of several factors:

- Higher crude oil prices
- Price recovery among fuel distributors, after earlier competition for market share pushed prices below sustainable levels
- Repair and replacement of aging tugs and barges, including federally required use of double-hulled tankers
- Construction of new fuel tank farms in many communities, with business plans that require pricing to include costs of tank repair and replacement.

Community Fuel Survey Results

ISER surveyed 10 communities around Alaska in 2008, 2009, and 2010 to get information on local fuel prices. The major findings of the third round of community surveys are:

- Increases in fuel prices persisted from January 2009 to January 2010, despite the lower cost of crude oil during most of 2009.
- Fuel prices in rural Alaska vary significantly and are inconsistent across communities at the retail level.
- Some communities have much larger retail price mark ups than others.
- For some communities, delivery costs and retail markup are a large portion of the fuel price.
- Getting reliable local information on fuel sales and practices remains a challenge.
- Residents of surveyed communities are frustrated because they have limited options for coping with high fuel prices.

From January 2009 (date of last update) to January 2010, crude oil prices decreased on average 37%. Refinery gate prices in Anchorage increased 13% for gasoline and decreased 7% for diesel for heating (DF#1). In Anacortes, refinery gate prices decreased 7% for gasoline and 54% for diesel for heating (Ultra Low Sulfur, DF#1). On average across the surveyed communities, retail prices for gasoline decreased 6% and diesel for heating decreased 13%. Nonetheless, only five of the study communities surveyed paid lower prices for gasoline and

diesel for heating (DF#1).Because the crude oil and refinery components of costs comprise a relatively small portion of final fuel prices (less than 50% in Western Alaska), these declines result in much smaller declines in retail prices, even if passed on fully to customers.

Policy Options

The conventional interventions are unlikely to produce optimal results. There is currently sufficient competition—or threat of new market entrants—to keep businesses minimizing costs. Regulation of fuel prices would be administratively burdensome, and most likely result in higher prices, because fuel distributors would be free to replace aging capital with a more certain return on investment. Fuel price subsidies remove market signals that encourage people to conserve when prices increase. That said, maintaining and funding the Low Income Home Energy Assistance Program to offset to a base amount of fuel costs is critical, especially during price spikes that result in families paying close to 50% of their incomes for home energy use. Improvements and consolidation of state bulk fuel loan programs, and expansion of their fuel sales and management training components, would address retail-pricing issues. Also, continued funding of municipal assistance would reduce the need for fuel price markups to support other community services. Continued funding of the weatherization program provides both short- and long-term relief by reducing the amount of fuel purchased by households, though the high fixed costs of transporting and storing fuel will be distributed over fewer gallons. Infrastructure improvements, such as replacing marine headers and interconnecting clustered communities with transmission lines and roads, may provide the most long-term benefits to lowering energy prices and maintaining rural communities.

INTRODUCTION

Many Alaskans face extremely high, volatile fuel prices. Little is publicly known about the actual structure of Alaska's rural fuel markets and what drives prices at the community level. The Alaska State Senate Finance Committee asked economists at the University of Alaska Anchorage, Institute of Social and Economic Research (ISER) to investigate rural Alaska fuel markets and identify any fuel market inefficiencies that could be considered for legislative action to reduce fuel prices.

This study is *both* an update *and* an evolution of previous ISER *Components of Fuel Costs* studies.[4] It updates the most recent *Components of Fuel Costs* study by collecting and reporting the most recent fuel prices in the ten previously surveyed rural communities. It is an evolution of the previous investigations, providing greater detail and scope on rural fuel markets. (It does not include fuel markets in road-accessible communities.) In addition, at the request of the Alaska Senate Finance Committee we present potential policy options and their potential impacts for addressing the cost of fuel in rural Alaska.

Fuel is sold in rural Alaska communities through two distinct markets. The first market area includes the (seasonally) ice-bound portion of Western Alaska. The presence of winter ice exerts tremendous influence on marine and river navigation to these non-road-accessible areas. The second market area is comprised of the ice-free coastal regions. Results are presented first for ice-influenced Western Alaska and then for the ice-free coastal area. An update of the previous ten community analyses follows. The final section is a summary and discussion of potential policy options.

To conduct this analysis, ISER researchers collaborated with a number of Alaska's fuel market participants including refineries, distributors, retailers, fuel purchasing cooperatives, and government agencies involved in community fuel purchases. Participation in this study by previously active players in the Western Alaska fuel market provided new access to information on that market. We did not have the same level of participation in the ice-free coastal market so were unable to provide an equivalent level of detail.

WESTERN ALASKA FUEL MARKET

This section includes background and detailed cost information regarding the downstream fuel market in Western Alaska. This region's referenced "market" is comprised of North Aleutian villages beginning with Nelson Lagoon proceeding north along the coast to Kotzebue Sound. Also included are ports of call on tributary rivers, the most prominent being the Yukon and Kuskokwim Rivers (see Figure 1). It draws on more than 30 years of combined experience of former owner/operators and executives at major fuel distribution companies and independent research done to evaluate market opportunities.[5] The numbers used in this report reflect the best estimates and memories of historical costs but should not be considered exact without confirming data with current fuel distribution companies.

---

[4] See footnote 1.

[5] The majority of this Western Alaska section was researched and written by Justin Charon and Mark Smith who worked for Crowley Marine Services and Yukon Fuel.

Three major competitors historically served the Western Alaska fuel distribution market, Crowley Marine Services, Yukon Fuel Company, and Delta Western. Crowley bought Yukon Fuel in 2005 and Ruby Marine, LLC (currently serving Yukon River customers) began operation in 2007, making a current total of three competitors.

While it is possible to fly fuel to most locations, it can only be done cost effectively to communities within a few hundred miles of Kenai or Fairbanks and then only in quantities of less than five thousand gallons. With current aviation fuel prices, the most competitive air deliveries have a transportation component of ~$1.25 per gallon per hundred air miles. The price is even higher for the many villages with airports unable to accommodate the 4,900 gallon DC-6 transport planes operated by Everts Air Cargo.

Marine transportation remains the most cost-effective way to deliver fuel to most Western Alaska communities. Due to the shallow waters of most ports of call, only a tug and barge combination is a viable method for delivery.

The competitive landscape in the marine delivery market has changed significantly over the last fifteen years. In the mid 1990s, Yukon Fuel's activity was primary on the Yukon River, and Delta Western and Crowley served the rest of the Western Alaska market. Beginning in the late 1990s, and after a failed attempt to buy Yukon Fuel, Delta Western started to exit the small delivery market to focus on linehaul and tank-farm operations. Also, during the late 1990s Yukon Fuel started an aggressive pricing program to expand its service territory. This plan was successful and took Yukon Fuel's small-delivery volume from seven million gallons in 1995 to nineteen million gallons in 2002. This increase in volume came from securing former Crowley customers and by picking up old Delta Western customers.

During this time both Crowley and Yukon Fuel charged some customers rates below cost trying to secure additional market share. The strategy was to try to gain efficiencies and economies of scale that would lower the costs for all deliveries. One part of the plan benefited customers with larger tank farms— such as the Alaska Village Electric Cooperative (AVEC)— in a major way. Most customers only had enough tanks for eight months of storage, meaning they all needed fuel first thing in the spring and as late as possible in the fall. In order to meet that demand, more sets of equipment were needed than if the deliveries could have been scheduled more systematically. As a result, there was too much equipment in the market during the mid-summer months. Given the high fixed costs, taking the equipment out of service did not help. Instead, very low-priced fuel was sold to AVEC and others who had 12 months of storage and could take mid-summer deliveries.

By 2002 this strategy had increased Yukon Fuel's market share but resulted in relatively low profitability. The company changed directions and began dropping accounts that were losing money, or increasing prices to reach a break-even point. This resulted in small-boat volume dropping from nineteen million gallons in 2002 to twelve million gallons in 2005. Also, during this time the effects of the Denali Commission's new tank farms began to change the demand for midsummer deliveries, as more customers had twelve months of storage capacity—making spring deliveries less critical. In 2005, Yukon Fuel was sold to Crowley.

As a direct result of very low profit, the market saw almost no reinvestment in equipment, such as would be expected to occur in a healthy market. Yukon Fuel's fleet was over 40 years old and well beyond its useful life of 27 years.[6] Under healthy market conditions, assets would be replaced on a systematic basis, with the average asset age close to half the useful life of the asset, 13.5 years in this case.[7]

Since Yukon Fuel's purchase in 2005 prices have been increasing. But evidence of prices remaining at depressed levels is found in the continued absence of Delta Western in the majority of the market. Delta Western has the capital and operational knowledge to compete for fuel sales in small Western Alaska communities, yet it had a relativity small role in the market from 2006 to 2009. As profitability returns to the market place, expect to see Delta Western build a greater presence. The fact that Crowley has actively been building new tugs and barges to operate in Western Alaska is a sign of economic improvement or long-term view of the market. Another positive sign is that in 2006 Ruby Marine was formed and began competing with Crowley for fuel sales on the Yukon River. Ruby Marine is owned and operated by a former executive of Yukon Fuel, and it competes with Crowley in that market.

When comparing current fuel delivery prices to fuel delivery prices from more than five years ago, it must be factored in that prices from that time period were not sustainable, as evidenced by the sale of Yukon Fuel and the lack of participation by Delta Western.

Fuel Movement Process

There are many physical movements to transport fuel from the refinery to the end user's tanks:

1. Fuel is purchased from the refinery and shipped via a linehaul barge (the term used for large ocean-going barges) or trucked, as is the case for the upper Yukon River.
2. Fuel is put into a tank farm at a regional terminal or fuel hub or a smaller barge for storage.
3. Fuel is loaded from the terminal/fuel hub into smaller barges for delivery of fuel to each smaller community's local tank farm.
4. Local tank farms sell fuel to individual customers, either at the tank farm or by truck distribution.

Fuel Purchasing

Process Description

None of the distribution companies in Western Alaska possess refinery capabilities, so the fuel movement process begins when the distribution company purchases fuel from a refinery.[8] The Alaska refineries providing the most of the fuel to Western Alaska are located in Valdez (Petro Star), North Pole (Flint Hills), and Nikiski (Tesoro). Additionally, Tesoro, Flint Hills and Chevron terminals in Anchorage can off-load to fuel delivery barges. The Cook Inlet area serves Western Alaska from either Nikiski or Anchorage. The product is sold "free on board"

[6] Office of Management and Budget, Circular No A-76 Appendix 3 item 1930.
[7] In the case with a 27 year life, 1/27 of the fleet should be getting replaced each year.
[8] Most of the fuel distribution companies have had some experience over the years with bringing in international tank ships with fuel products. The per-ship quantities are large (10 million+ gallons) and this method is common for Dutch Harbor seafood processors and the Red Dog Mine in Northwest Alaska. We know of no other tankers actually bringing fuel into this market.

or FOB[9] at the refinery or Port of Anchorage dock.[10] The Yukon River is supplied by fuel trucked to the Port of Nenana from a North Pole refinery.

Typical Costs

Unlike retail markets in Anchorage, wholesale barge prices are indexed to major markets with Los Angeles (LA) or Anacortes typically used. Los Angeles, in particular, is a major port where arbitrage ties the U.S. West coast with the world market represented by Singapore. Two major companies maintain Los Angeles and Anacortes pricing indexes, OPIS[11] and Platts.[12] Both yield similar results in "price discovery," by canvassing commercial customers daily to establish going rates.

Typical Cook Inlet Diesel #1[13] costs are LA Platts Jet plus approximately $0.06 per gallon. Over the last ten years, refineries at times offered prices based on other related products and city indexes, but LA remains the most common reference. On the rare occasions when pricing has been made public, different fuel distribution companies all post similar prices for similar volume purchases. Even when considering different indexes and different companies, the range of prices likely varies only +/- $0.02 per gallon when averaged over the last ten years. In other words, the Lower 48 refinery market is competitive.

Linehaul Transportation

Process Description

The next stage of delivery is transporting the product from Cook Inlet to Western Alaska. It is not cost-effective to take smaller delivery equipment (typical barge capacity of 275,000 gallons) to Cook Inlet to pick up fuel. Instead a larger linehaul barge is used (typical capacity of 2.5 million to 3.5 million gallons) to bring the fuel closer to the market place. The linehaul barge then delivers fuel to the smaller barges and terminals with tank farms. Linehaul equipment being positioned in Alaska for the summer season usually carries fuel from west coast refineries on the trip north. Delta Western also brings fuel directly from the west coast to Dutch Harbor[14] but the majority of fuel to the Western Alaska market is transported from Cook Inlet.

Several industrial customers who own tank farms large enough to accommodate a fuel load of over a million gallons receive their fuel directly from the linehaul barge. The largest of this type is Teck Alaska at the Red Dog mine, which takes ~18 million gallons per year. Another example is the Western Alaska Fuel Group (WAFG), which includes the large utilities in Nome, Dillingham, Naknek, and Kotzebue. The WAFG takes approximately 7 million gallons total. The role of the fuel distribution companies is largely to coordinate the buying and

---

[9] FOB stands for "Free On Board", and is used in conjunction with a port of loading. Indicating "FOB port" means that the seller pays for transportation of the goods to the port of shipment, plus loading costs. The buyer pays the costs of marine freight transport, insurance, unloading, and transportation from the arrival port to the final destination. The passing of risks occurs when the goods pass the ship's rail at the port of shipment.

[10] Tesoro did sell some fuel FOB Bethel in 1998 but discontinued that option.

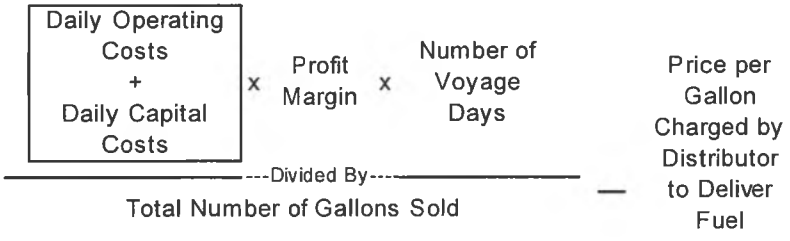
[11] Oil Price Information Services, www.opisnet.com

[12] Platts, www.platts.com

[13] Diesel #1 (DF1) is commonly used as heating fuel throughout most of rural Alaska. This is same fuel the refineries sell as Jet fuel (Jet A), and in many tank farms it is stored as Jet A until sold as DF1. Because Diesel #2 (DF2) is more common through the rest of the U.S., DF2 is often used as the index price with an adder for the higher priced DF1.

[14] Mike O'Shea, Delta Western, personal communication, January 2010.

delivery process, so the gross margins[15] for these industrial customers are very thin (estimates of $0.04-0.06 per gal). The major motivation for the fuel distribution companies to sell to the large industrial companies is not the margin but the economies of scale and to maximize linehaul equipment utilization.



Each of the fuel distribution companies handles linehaul services differently. Crowley Marine Services largely meets its needs internally by having a division of the company that owns linehaul equipment and charging itself a quasi-market price. Delta Western had a sister company (Sea Coast Towing), which handled its needs until 2005, when Sea Coast Towing was sold to K-Sea Transportation. K-Sea Transportation continues to provide service to Delta Western under charter agreements. Yukon Fuel largely out-sourced all of its linehaul needs. One of Yukon Fuel's major linehaul providers was Sirius Maritime, which was also sold to K-Sea Transportation in 2007.

The current landscape of linehaul providers in Western Alaska consists of Crowley and K-Sea Transportation. This is unlikely to change without a major change in market conditions.

Typical Costs

Economies of scale are the biggest factor in linehaul pricing. The providers as a whole have been fairly efficient in keeping prices to the rough formula shown in Figure 3.

Figure 3. Fuel Distributor's Charge Formula

This formula favors the largest volumes and the shortest routes. The traffic between Valdez and Dutch Harbor, for instance, provides significant economies of scale and customers along the route benefit from this more efficient supply line. On the other end of the spectrum are customers on the North Slope. That route takes several weeks to transit and the barges must wait several days for lightering-barges to off-load the larger barges over the course of several days. The current rates range from a few cents per gallon between Valdez and Anchorage to over 40 cents per gallon for transportation to the Beaufort Sea.

Another consideration in pricing the seasonal gallons delivered to Western Alaska and the North Slope is the fact that the ports of call are very far from the home ports of the linehaul fleet. Whereas a trip from Puget Sound to Ketchikan may take a few days, the trip from Puget Sound to Barrow takes a few weeks. Because of the cost of mobilization, the only cost-effective linehaul scenario is to deploy a tug and barge pair, known as a "set," for the five to six month ice-free season. Current fuel distributors estimate the fixed cost of a tug and barge set at $2.5 million for the season. Vessel

[15] Selling price less cost of the fuel. This ignores taxes and operating expenses.

delivery operations may be by charter or by a subsidiary. In addition to these fixed costs, the costs of tug fuel and other miscellaneous items for a six-to-seven trip season between Cook Inlet and the Bering Sea ports is another $3.5 million. A typical linehaul barge carries three million gallons of fuel, for a total of eighteen million gallons for a six-trip season. This results in approximately $0.19 per gallon in cost for transportation only. An alternative metric is the cost per "useful" day of the linehaul that starts with the ice opening of the Kuskokwim River approximately June 1 and ends approximately October 1 when deliveries are wrapping up. The applicable math is $3.5 million divided by 120 days, for a daily rate of almost $30,000.

Linehaul costs increased after the late 1990s and will continue to do so. The Oil Pollution Act of 1990 (OPA 90)[16] requires that all single-hull barges over 1,600 tons (smaller barges are exempt in Western Alaska) be replaced by double-hull barges by 2015. In the late 1990s, Western Alaska saw linehaul rates of less than $0.09 per gallon due to a surplus of single-hull barges in the market.[17] From 2000 to 2005, rates increased to the $0.13-0.15 per gallon range, and much of the equipment used was still single-hull. On October 29, 2009, K-Sea Transportation announced it would accelerate the retirement of its single-hull linehaul barges. That news, plus a poor market for fuel delivery, led to the share price of the company declining by half in two days—thus the company lost half its market capitalization. This suggests that K-Sea Transportation is not making excessive profit in the linehaul market.

Given that the cost of a new double-hull barge is more than three times the value of an older single-hull barge, we expect the linehaul cost of shipping fuel from Cook Inlet to Western Alaska to rise inevitably, from the current $0.19-$0.22 per gal to over $0.25 per gallon or higher in the near future.

Trucking

Process Description

In the case of the Yukon River, fuel is trucked to the Nenana terminal from a North Pole refinery. This is a straightforward process with costs of less than $0.05 per gallon. There are a number of trucking companies active in this market. From the Tanana River at Nenana, fuel is shipped to the Yukon River, supplying fuel to communities as far downstream as Mountain Village and as far upstream as Fort Yukon.

Terminal Operations

Process Description

The distinction between a regular tank farm and a "terminal" lies in the ease with which the tank farm can accept fuel and reload it to other barges at a later date. Generally, that means the tank farm needs the capacity to accept linehaul barges. The tank farms in that class in Western Alaska are Dillingham, Naknek, Bethel, Nome, and Kotzebue. Of those, only Nome and Naknek can handle a fully loaded linehaul barge. The draft (depth) limitations of the other ports require the linehaul to off-load to smaller barges first, lightening the linehaul and enabling them to complete the transit to port. For instance, the controlling depth for river transit into the port of Bethel is 12 feet, requiring typically loaded linehaul barges with drafts

[16] http://epw.senate.gov/opa90.pdf

[17] Note that one company providing these low rates, Newport Petroleum, went out of business. These rates were likely a contributing factor.

of 18 to 20 feet to lighter off one-third of their cargo. Any time fuel needs to be transferred it adds to the costs of delivery.

Not all fuel being delivered to Western Alaska goes through a terminal. The fuel off-loaded from the linehaul to the small barges often goes directly to the customer. In general, the delivery strategy is to avoid terminal use whenever possible. However, it is not possible to avoid using a terminal for all gallons, because that would require a much larger fleet of equipment in order to transfer and deliver all the fuel from a linehaul. That equipment could not be fully utilized because of the short ice free season. This, in turn, would drive up the cost of small barge operations.

Typical Costs

With nearly all terminals in Western Alaska, the tank farm also stores locally used community fuels in addition to serving as a regional fuel hub. The costs associated with those needs are discussed in a later section entitled "Variation in Retail Markups in Western Alaska". The costs described here are in addition to those normal local operating costs:

1. The barge fleet runs 24 hours a day and is also subject to tides and weather. So when a fuel delivery is scheduled outside a normal work day, a tank farm employee must come to work to accept the fuel. A linehaul offload can take as long as 24 hours and requires multiple people/shifts to work the shore-side end of the delivery. These incremental costs are in the range of $0.04-$0.06 per gallon.
2. In several cases in Western Alaska, a distribution company owning the terminal must pay the city, which owns the dock, a per gallon fee. This fee is usually in the range of $0.02-$0.04 per gallon.
3. When only one fuel distribution company owns a terminal at a location, it is common for that the owner company to make space available to other distribution companies. This terminal fee, which is in addition to the fee described in number two above, typically ranges from $0.07 - $0.15 per gallon.

Small Lighterage Delivery

Process Description

The most difficult and challenging part of the delivery process is getting the fuel from a linehaul or terminal to the specific community. The smaller tugs and barges that carry fuel from linehaul barges or terminals to the delivery point are sometimes referred to as "lighterage" equipment. A typical coastal set carries about 275,000 gallons fully loaded. A barge contains many separate compartments, in order to haul several types of fuel at the same time. All risk of a fuel spill is borne by the fuel distribution company until the fuel passes through the customer's header pipe upon delivery. The time it takes to get to each community varies not only by distance from the terminal but also by a host of other operational challenges. These challenges are discussed in detail in the June 2008 "Components of Fuel Costs" report (available at www.iser.uaa.alaska.edu).

Typical Costs

The cost structure for the fuel distribution lighterage fleet is complex. The first factor to consider is capital cost. A new set (tug and barge) for coastal operations costs about $6 million. That set could deliver between 2.5 million to 3.5 million gallons over 120 to 135 days, depending where it is put into service.

A costal set of equipment would have direct operating costs of about $750,000 per year. Those costs are largely made up of labor, running fuel, insurance, and regulatory compliance. In this estimate, fuel makes up $100,000 of annual operating costs (approximately 40,000 gallons of fuel at $2.50 per gallon). An increase in the price of barge fuel of one dollar results in an operating cost increase of about 5%, or $40,000. Labor is a large portion of these costs—about 40% or $300,000—and has grown significantly in the last five years. Industry rates for labor from deck hands to captains range from $225 to $550 per day, respectively. The tax and benefits burden rate is a minimum of 45% on top of the daily pay rates. These wage rates reflect the premium for the high skills required to operate in these challenging delivery environments.

Another challenge faced by the fuel distribution company is that these costs are largely fixed.[18] In order to break even, the set of equipment must be fully utilized. A coastal tug and barge combo can handle a maximum of approximately three million gallons in a shipping season. Table 1 shows a simple cost structure of operating a fully utilized coastal tug and barge set for one year. It assumes a 10% return on capital investment.

Table 1. Annual Barge Costs

Capital Costs	$	600,000
Operating Costs	$	750,000
Total Costs	**$**	**1,350,000**
Gallons Delivered		3,000,000
Cost per Gallon	**$**	**0.45**

Delivering three million gallons of fuel with one tug and barge set would be considered excellent utilization and can only be accomplished if the equipment is making shorter trips close to a terminal. More often than not, a set will work in several different areas over a season. Rather than charge everyone the same price, rate tables are developed based on actual experience and average delivery times.

The final landed wholesale prices charged in communities vary significantly because distances and travel times vary significantly between terminals and different communities. These wholesale price variations reflect delivery cost variations. Delivering fuel to more remote communities requires a longer trip, resulting in the barge being unable to deliver its potential maximum of three million gallons per season. There are other loading conditions that can prevent a barge from maximum capacity (e.g., it must carry running fuel for the tug). The example given in Table 2 assumes the 275,000 gallon barge is delivering 250,000 gallons to communities that require a 15-day round trip per delivery.

[18] Analysis conducted at YFC showed small boat operations had a fixed costs of 70% and variable cost of 30%,

Table 2. Barge Cost per Trip

Annual Barge Cost	$	1,350,000
Operating Days		135
Daily Cost	$	10,000
Trip Length (days)		15
Cost per Trip	$	150,000
Gallons per Trip		250,000
Cost per Gallon	**$**	**0.60**

The example in Table 2 is for a coastal tug and barge set operating in a more efficient area of the market. Areas such as the Yukon and Upper Kuskokwim rivers have operating seasons that are about 30 days shorter due to a longer ice season, and barges often deliver less than two million gallons per year—a 50% reduction from easier to serve coastal areas. Extremely difficult deliveries in rivers around Kotzebue Sound, the rivers of Bristol Bay, or communities such as Huslia require very time-consuming deliveries with very low volumes. As seen in Table 3, those changes drive the cost up to $0.77 per gallon for the tug and barge set.

Table 3. Alternative Barge Cost per Trip

Annual Barge Cost	$	1,350,000
Operating Days		105
Daily Cost	$	12,857
Trip Length (days)		15
Cost per Trip	$	192,857
Gallons per Trip		250,000
Cost per Gallon	**$**	**0.77**

Some rivers have an additional price variable because barges commonly carry deck freight. Freight has a higher delivery charge per ton than a ton of fuel,[19] but requires that other equipment, such as forklifts, be on board, slowing down the trip. Given the lower margins on fuel, it is likely that deck freight subsidizes fuel margins in some markets during years with large freight projects.

Based on the best information available, the estimated range of costs for Western Alaska small barge deliveries is $0.40-$0.80 per gallon for most locations.

Other Costs of Delivery

There are a host of other costs outside of the direct costs of transportation. These include working capital and administration. These costs contribute significantly to the costs of delivering fuel, but it can be difficult to attribute some of these costs to specific gallons of fuel delivered. As a result, they are often spread over all of the gallons delivered. These other costs are discussed briefly below.

Working Capital

While fuel distributors are in possession of fuel, it ties up large amounts of cash that could be invested elsewhere. This opportunity cost of cash is calculated as the working capital cost of transporting fuel, and it increases as the length of time increases between the time the refinery

[19] A ton of fuel is about 294 gallons.

is paid for the fuel and when the final customer pays for the delivered fuel. The fuel distribution company gets relatively short payment terms from the refinery, which adds to the distributor's costs. The potential impact of these short terms can be illustrated in an example, which assumes a term of 15 days.[20] The fuel takes about 10 days to get from the refinery to a terminal, and it could be another 30 days before it gets to the customer. So the delivery process takes as much as 40 days for Western Alaska. Add to the delivery process an invoice collection time to the customer of 30 days,[21] and the amount of time the fuel distribution company must cover the costs for the fuel purchases increases to 55 days (10+30+30=55). Assuming a fuel cost of $2.20 and an interest rate of 8%, this working capital cost is $0.026 per gallon.[22]

Administration

There are many administrative functions that are critical to the fuel delivery process, including spill response preparedness, safety, sales, dispatch and collections. These costs are spread over all the gallons in the system and are estimated at $0.05-$0.10 per gallon.

Safety and Environmental

The fuel delivery business is highly regulated by many government agencies. Keeping up-to-date on changes and reporting takes several full-time employees. OPA 90 requires that all fuel distributors have spill clean-up plans in place. In Western Alaska, the non-profit organization Chadux provides spill preparedness, response, and training services. All fuel distributors in the region are Chadux members.

Sales

The sales solicitation process starts in the winter. Distributors contact known customers to see if they will be using the supplier for the year. Usually several contacts are made before the distributor secures a confirmed order. The sales department stays in contact with the customer as the delivery date gets closer. Orders change frequently. The sales department also works with the larger customers who request bids. This is a time-consuming process that requires several full-time employees.

Dispatch

Coordinating linehaul barges meeting the small boats and keeping all the equipment working (critical to being able to make a profit) is a difficult task. This also takes several well-trained employees.

Collections

A large number of customers pay their fuel bills with government assistance such as bulk fuel loans or revenue sharing. Helping customers through the process and getting payment is another difficult process.

Marine Delivery Cost Build

Fuel distribution companies charge for delivering fuel to local community tank farms. The customer is quoted a single price that reflects the costs to deliver fuel. The customer's final

[20] Each refinery has a different policy and it has varied over the last 10 years.
[21] Some customers are on COD basis while others have terms.
[22] $2.20 x 8% divided by 365 days x 55 days

delivered price combines the distributor's transportation charge with the price the distributor paid for the fuel at the refinery. The reported price of fuel at the refinery is usually pegged to a major index such as OPIS or Platts.

Table 4 pulls estimates from previous examples to construct the distribution cost structure for a hypothetical community. If LA Platts Jet fuel was $2.00 per gallon when the distributor purchased it, then the wholesale price would be $2.98 per gallon. This does not include any applicable taxes.

Table 4. Distribution Cost Structure Example (per gallon)

Purchase differential	$	0.06
Linehaul	$	0.19
Terminal use	$	0.03
Small barge operations	$	0.60
Working capital	$	0.03
Administration	$	0.07
Total Distribution Cost	**$**	**0.98**

This cost structure depends on the location. The fuel distribution company can make small adjustments to this structure to reflect the costs of the customer's order. Use caution in assuming this is the general cost of each site—because Alaska is a very large place with extreme variations in cost structure.

Variation in Delivered Prices

The variations in the price that distributors charge for delivered fuel to different communities cannot always be explained by the barging costs alone. The price may vary between two communities because of the timing of when the distributor lifted the fuel at the refinery, or other factors that change the transportation charge directly.

The community/retailer has no influence on world crude oil prices or the market for refined fuel. However, for every $10 per barrel crude oil price change there is an approximately $0.24/gallon price change in refined product. The oil market has been extremely volatile over the last few years. Communities that receive fuel even a few weeks apart could have a cost difference of $0.50/gallon. Some communities try to time the market to purchase fuel when they think the prices will be the lowest. These efforts are largely unsuccessful and do not help with fuel costs over time. What communities could do to control the impact of volatile refinery lift prices, caused by volatile crude oil prices, is use financial instruments to hedge against price increases. The use of these instruments is discussed in the sections on Ice-Free Coastal Alaska and Policy Options. However, this is a sophisticated strategy out of the realm of the technical capabilities of most Alaska communities.

The transportation charge is the component of the delivered fuel price that the fuel distributor charges to transport fuel for the community. In Western Alaska, it is generally negotiated from fuel contract to fuel contract and reflects the fuel distributor's costs and risks of delivering fuel to each customer. Two villages that may be close together on the map may have very different delivery challenges. Missing header or pipelines and docking issues are not uncommon. This

could represent a $0.10-0.15 per gallon difference in the price the fuel distribution company charges a community.

There are usually multiple fuel purchases in each community. The electric utility, the fuel retailer, the school district, and the government buildings may all purchase fuel directly from the fuel distributor and the fuel distributor may charge each entity a different price. The price differences are generally based on the quantity ordered and whether the order was placed far enough in advance to coordinate the least expensive delivery. A multitude of other characteristics of customers can be expected to influence the sales price, such as whether customers pays their bills promptly or whether they can be depended on to meet the delivery barge—however, fuel distributors claim to not charge premiums for these things.

Most retail fuel buyers must have the cash on hand to purchase fuel during the shipping season when the fuel distributor's barge is in the area. If a community does not have enough money or is late applying for a loan, it may not have the cash to pay for the fuel when the barge arrives. In these cases, the distributor must do a special barge trip later in the year to deliver fuel, which forces the transportation costs to be spread over fewer gallons and thus increasing the cost of fuel. In an even worse scenario, if a community is unable to purchase fuel during the barge-shipping season, it is forced to fly in fuel after the rivers freeze. The cost of flying fuel is much higher than the cost of barge delivery. A similar scenario occurs if a community buys an inadequate supply of fuel for the winter season because it didn't have sufficient funds during the barge delivery season. The community is then forced to fly in fuel before spring breakup.

Cost to Retail Fuel in Western Alaska

Once the fuel reaches the tank farm by barge, it is stored until purchased by the end customer. In order to make it through the winter, tank farms need eight to nine months of fuel in storage. Having such large storage requirements is expensive both in terms of the capital costs for the tanks and the working capital for the fuel inside the tanks.

Fuel distribution companies own terminal tank farms in hub Western Alaska communities.[23] Crowley is the only fuel distribution company with small local tank farms off the road system; it has eight of these sites. The rest of the 150 small tank farms in Western Alaska are owned by local entities, usually the city or local tribal entity.[24] Since there is no common ownership, tank farms—even ones in close proximity—are operated differently. Each community usually has several tanks farms. The electrical generation provider has tanks for its own needs, the school districts have their own tanks, and finally, there is a tank farm for retail sales.

The pricing of fuel begins with the price charged by the fuel distribution company. When new fuel arrives, prices are adjusted. For the fuel distribution companies that own tank farms, the new price is most often based on the weighted average of the previous fuel in the tanks and the incoming product. This leads to very different pricing in each community, due to varying amounts of last year's fuel remaining in the tanks. After adjusting the fuel price for existing

[23] The exceptions are in Nome where Bonanza Fuel owns one of two terminals and in Dillingham where Alliance Fuel owns one of two terminals.
[24] Assuming about 50 villages with three tank farms in each village.

fuel on hand, tank farm costs must be added to the price. For the most sophisticated sellers, a target margin is added on to the cost-build of the tanks to determine the final price of fuel.

Fixed Capital Costs

The condition of tanks in many locations is poor and often out of compliance with state and federal environmental regulations, although that situation is improving with Denali Commission assistance and increased regulatory enforcement. In 1998, the Denali Commission was formed to help bring up the standards of these tank farms. The purpose of the program is to replace environmentally unsound storage tanks that were not properly maintained because repair and replacement (R&R) funds were either not collected or saved to replace the tanks. Since 1999, the commission has competed projects in about 100 locations of the 175 statewide identified as in need of repair or replacement.[25]

While the Denali Commission requires a community to draft an approved business plan outlining the R&R and O&M collection and expects the community to follow the business plan, there are no provisions to ensure that occurs. It is unclear how many communities collect R&R and O&M funds. A community that does not maintain its tanks or set aside revenue for future R&R will have lower fuel costs than a community that does. This is true of all communities, not just those receiving a Denali Commission tank farm.

Tank farms in each community were built at different times, and the farms are different sizes, which makes comparisons difficult. Using Denali Commission cost estimates,[26] a 350,000-gallon tank farm costs between $2.6 million and $2.9 million to build. A responsibly designed tank farm would have at least a ten-month storage capacity.[27] This means a 350,000-gallon tank farm could have sales of 420,000 gallons per year. Assuming a 10% return on capital, the owner would need to add $0.61 per gallon to the price to cover the cost of the tank.[28] Larger tank farms have a clear advantage, since the construction cost per gallon decreases and there are more gallons over which to spread the costs.

As mentioned previously, not factoring in the cost of capital and resulting underinvestment (and under pricing) of the capital value of the storage tanks was a contributing factor to the widespread problem of tank farms that were out of compliance. Larger companies and the fuel distribution companies are held to a higher standard for environmental compliance and fund these investments privately, resulting in higher prices.

Working Capital Costs

A tank farm owner must have eight to ten months of fuel on hand in the fall. In the springtime the inventory on hand is small and then starts to work its way back up. This results in an average inventory level of about half the tank's capacity. So in this example that would result in an additional $0.10 per gallon needing to be added to the price.[29]

[25] https://www.denali.gov/dcpdb/index.cfm?fuseAction=IndicatorDisplay.ShowBulkFuelProgress

[26] Denali Commission. Final Denali Commission Project Costs Containment Assessment Projects in Various Alaska Villages. April 2002.

[27] The Denali Commission uses even a higher number of 13 months storage capacity.

[28] $2.6M x 10% divided by 420,000 gallons

[29] 350K gallons of storage is 175,000 of average inventory. Assuming the price of $2.98/gallon used in the marine example that is $521,000 of average working capital investment. If the borrowing cost were 8% that is $42,000 in interest each year. Spreading the interest costs over all 420,000 gallons results in a $10/gallon cost.

Operation Costs

Tank farm costs are similar in nature to marine delivery costs in that labor, insurance, and regulatory compliance make up a large part. They are also very fixed in nature. For smaller tank farms in the 200,000 to 800,000 gallons per year size range, we estimate annual operating costs of $350,000 to $400,000. Given that these costs are fixed, this significantly favors the larger tank farms that only need to add $0.50/gallon to cover expenses. In contrast, the 200,000-gallon facility would need to add $2.00/gallon to cover these operating costs. It should also be noted that when a facility exceeds 420,000 gallons in capacity, it falls under increased state environmental regulations, which also affects the cost structure. Assuming operating costs of $350,000, if a tank farm sells 420,000 gallons, the cost increases $0.83 per gallon.

Summary for Costs

$2.98 Fuel purchased from the fuel distribution company
$0.61 Tank farm capital cost
$0.10 Working Capital
$0.83 Tank farm operations
$4.52 per gallon before tax

Again, note that this summary is for example purposes only. Because capital and operating costs are fixed, small changes in a community's annual volume can significantly change the cost structure.

Other community costs include facility compliance training for operators in proper spill management and other safety training. This training is expensive and time-consuming. Different communities tend to have different levels of training and compliance.

Some communities have tank farms that are open long hours every day, while others might be open only a few hours a day or not every day. Some locations include charges for trucking home heating fuel in the price, while others add it separately or do not have a delivery option. Service differences could account for up to $0.30/gallon variations in prices.

In some communities, the city or local tribal entity may own the tank farm and prices are set as part of a "larger financial picture." One community may charge high prices to fund community services, while another may charge very low prices and fund the difference from other city revenue.[30] Since these operations may be co-mingled with other services, determining the margin from fuel sales may be difficult. What is known, however, is that each spring most communities do not have much money with which to buy new fuel supplies.

Variation in Retail Markups in Western Alaska

It appears the majority of the fuel price variability—after accounting for the effects of volatile world crude oil prices—is the result of local fuel retailer practices. The reasons for the price

[30] The Alaska Energy Authority training manual for operating community tank farms states that: "The use of business funds to subsidize other operations (such as street maintenance, fire and police) is OK only if all of the fuel business's costs, including long-term repair and renewal, also are being included in the price." page 2.

variability are as diverse as the communities themselves. For every community, there appears to be a different set of circumstances that influence the retail price of fuel. These factors are also constantly changing within and across communities.

Cost of Debt

A significant portion of many communities retail fuel price is debt costs. When a community does not collect sufficient revenue from fuel sales to cover its costs and to purchase fuel the following year, it must use a loan to finance the next fuel purchase. Fuel distributors used to allow a community to purchase fuel on credit, but this practice has been largely abandoned or scaled back due to the increasing risk of default resulting from higher prices. Fuel distributors have reported that their credit collection costs increase with the price of fuel, but they charge no credit risk premium to communities that have struggled paying off credit the in past. Instead, the extra cost of this risk is spread across communities.

Also, the state and federal governments have taken on more of this financial risk through fuel loan programs. The Alaska Energy Authority manages the state Bulk Fuel Revolving Loan Fund and program. The purpose of the Bulk Fuel Revolving Loan Fund is to assist small rural communities, utilities, or fuel retailers to purchase emergency, semi-annual or annual bulk fuel supplies. Each community is allowed a maximum loan of $750,000. The first year the interest rate on the fuel loan is zero; the second year it is 5%; and the third year it is an average municipal bond rate. Some communities complain that the loan application process is cumbersome, and that the time to receive the loan puts the community at risk of not securing funds in time to pay fuel bills. Applying for the loan also increases the retailer's administrative costs.

The Bulk Fuel Bridge Loan program is a state program administered under contract by Rural Alaska Fuel Services (RAFS). RAFS is a not-for-profit organization that was initially capitalized by the Denali Commission to provide operation and maintenance training in communities receiving bulk fuel tank farms financed by the commission. The commission provided the first two years of operating funding and capitalization for RAFS. RAFS offers its fuel sales operation management and training as a part of the bulk fuel bridge loan program.

The Bulk Fuel Bridge Loan program targets distressed communities that do not qualify for an AEA bulk fuel loan. These communities do not have enough cash to purchase the fuel for the upcoming season and are not sufficiently credit worthy to qualify for the AEA Bulk Fuel Revolving Loan Program. RAFS pays the distributor for the community's fuel and then works with the community to develop a plan to repay the loan, as well as any existing debt, so the community can qualify for a Bulk Fuel Revolving Loan Fund loan in the future—or better yet, price fuel accurately to collect sufficient revenue to pay for future fuel deliveries without loans.

The RAFS bridge loan has no interest charges. It is mandated that RAFS provide training and guidance on retail operating and price setting to ensure that the community is able to pay back the loan and purchase fuel in the future. In order to receive this training from RAFS, a community must first fail to collect enough revenue from fuel sales enough times to become ineligible for an AEA loan. By the time that happens, the community may be deep in debt and must significantly raise the price of its fuel to pay it off. There is also a reverse incentive in this

loan system, because the only way fuel retailers can obtain the training and zero-interest financing they need to address their problems is by first letting the problems get worse.

Accurately Pricing Fuel

Pricing fuel properly requires a significant amount of accounting sophistication, to price it in a manner that recovers all costs while also generating a reasonable return or profit. Rural fuel retail bookkeeping is a complicated task, and many communities struggle to retain qualified employees. Interviews with rural fuel experts indicate that many communities struggle to price fuel properly. Some common problems are listed here.

Problems with fuel inventory

It can be difficult matching the recorded inventory of fuel written in the books with the actual amount fuel in the tanks. It is vital for local owners to know how much fuel remains when they're ordering fuel for the next year. If the existing inventory is not known, the community risks not ordering enough or ordering too much fuel the following shipping season.

Getting expenses right

All expenses associated with retailing fuel must be accounted for so they can be included in the price of fuel. This allows for accurate cost recovery when fuel is sold. Expenses commonly include tank farm O&M, tank farm R&R, administration and operating costs (including salaries for employees), and insurance.

Pricing

The price of fuel should include all costs associated with storing and retailing fuel, as well as generate enough revenue to purchase fuel the next shipping season. This means that current fuel prices should be raised if the price is expected to be higher next year. Fuel retailers often have difficulty accounting for all associated costs and properly distributing them over the number of gallons of fuel sold.

Accounting for revenue

Simply collecting enough revenue to purchase fuel the following year is not the only task facing retailers; they must also ensure that the collected revenue is retained and identified for purchasing the next fuel shipment. Inadequate accounting can result in the funds being spent during the course of the year. This is the case when fuel and other revenues are held in the same account and that account is used to purchase inventory for the grocery store or for other community purchases and services.

Fuel-price training is vital for the success of rural fuel retailers and is provided by two relatively autonomous providers: The Denali Commission bulk fuel farm upgrade program and Rural Alaska Fuel Services. The fuel purchasing cooperative Northstar Gas also provides less formal guidance.

Retail fuel price training is provided in connection with bulk fuel farms constructed by the Denali Commission. The commission historically funded this training through the State of Alaska's Department of Labor and Workforce Development (DLWD). The Alaska Energy Authority applies for this training money, hires a contractor to teach the course, and facilitates the training course. This training course was not offered last year due to lack of state financing,

and its future is in doubt. The DLWD fund can only be used if the training creates new jobs, as opposed to retaining jobs. Since the fuel training program cannot prove that it creates new jobs, it is not eligible for the DLWD funds. Interviews with trainers indicate that the training program is successful if there is both follow up and continual training, as there is a high turnover rate for fuel retail operator positions.

The goal of RAFS operation management and training is to get the community fuel retailer in a financial standing that allows it to purchase each year's fuel with cash. Communities in need of a RAFS fuel loan generally either have not been charging enough for the fuel— preventing them from building necessary cash reserves for future orders—or failing to save the money they do collect on fuel sales for future fuel purchases.

ICE-FREE COASTAL ALASKA FUEL MARKET

The fuel markets of the Ice-Free Coastal Alaska (IFCA) region have a very different logistic and price structure than the fuel markets in Western and Arctic Alaska and fuel markets on the Alaska road system. The IFCA region includes Southeast Alaska, Prince William Sound, the Kodiak area, the Alaska Peninsula and the Aleutian Islands. The major characteristics of fuel markets in the IFCA region are:

1. Ice-free ports allow for year-round delivery, reducing communities' storage requirements.
2. Fuel distributors are more likely to operate retail stores than they are in Western Alaska and more likely to face less competition than on the Alaska road system.
3. If fuel the fuel distributor sells to an independent retailer, the sale is less likely to be sold under a contract with a predetermined pricing formula, which is typical in Western Alaska.

Fuel in IFCA is typically less expensive than fuel in Western Alaska but more expensive than fuel on the Alaska road system. The costs of transporting, storing, and retailing fuel in the ICFA are also all less than costs of similar activities in Western Alaska but higher than on the Alaska road system.

Vertically integrated fuel markets eliminate clear transaction points along the supply chain that reveal the cost of each segment to move fuel from the refinery to the end user. Further, many ICFA community sub-markets only have one distributor. A sole distributor in a market is a price setter, and this price does not necessarily reflect the cost of distributing fuel. This erodes the relationship between distributors' selling prices and their costs.

The price of fuel sold under contract, as in Western Alaska, is determined by a formula, accounting for the refinery lift price and the cost of transporting fuel to the community. As a result, Western Alaska landed wholesale fuel prices fluctuate with refinery gate and world oil prices.[31] No formula exists for most fuel sales in the IFCA region, as most fuel is not sold under contract. The lack of a fuel contract does not in itself increase fuel prices, but it does significantly reduce the transparency of fuel distributors' costs.

The Western Alaska section of this report benefited from contributions of experts from the fuel distribution industry in that market. No similar expert on the IFCA fuel distribution industry contributed to this section on the IFCA market. Current industry employees and agents supplied generous amounts of information on the structure of ICFA fuel markets. But information on the level we were able to get for Western Alaska fuel markets is generally considered a trade secret or proprietary information. Despite the lack of specific and detailed information on fuel cost components in the IFCA region, the following description of the structure of the IFCA fuel market provides insight into why fuel prices in IFCA are what they are.

[31] For more information on refinery and world crude oil markets and prices see, Wilson, Meghan, Ben Saylor, Nick Szymoniak, Steve Colt and Ginny Fay, 2008, *Components of Delivered Fuel Prices in Alaska*, prepared for Alaska Energy Authority, Institute of Social and Economic Research, University of Alaska Anchorage, June.

Fuel Supply

Within the IFCA region, each fuel distributor and subregion has different supply chains. These supply chains are also relatively fluid, as they change depending on the location of the community, price differences of many refineries, and the current location of the fuel barge fleet. The supply chain for a typical IFCA community is:

1. Fuel is purchased from the refinery and shipped via a linehaul tanker or barge. Fuel for Southeast Alaska typically comes from the south, while communities in the area from Prince William Sound to the Aleutian Islands also receive fuel from Alaska refineries and foreign refineries in Asia.
2. Fuel is off loaded into a regional terminal tank farm or "fuel hub."
3. Fuel is loaded from the fuel hub tank farm into smaller barges that go to each community to deliver fuel to the local tank farm.
4. Local tank farms sell fuel to individual customers either at a retail station at the tank farm or by truck distribution.

In Southeast Alaska most fuel is imported from refineries in California, Washington, and British Columbia. Most of the fuel Petro Marine sells in Southeast Alaska south of Juneau is distributed out of Ketchikan, its regional fuel hub. Table 5 shows the amount of gasoline and distillate fuel oil (diesel and heating fuel) that is barged into and out of major Southeast Alaska ports. The U.S. Army Corp of Engineers data does not include information on all Southeast ports. It is also reported that Skagway received eleven million gallons of naptha. Petro Marine operates a fuel farm in Skagway, and it is likely that this fuel was transported inland to serve Petro Marine's Yukon Territory fuel brand North 60°.

Table 5. 2007 Fuel Shipments to Southeast Alaska ports (thousands of gallons)[32,33]

Wrangell	946	-	946	811	1	810

Analysis of the Corp of Engineers' Waterborne Statistics suggests that in 2007, 36 million gallons of gasoline and 34 million gallons of distillate fuel oil were imported into Alaska through Revillagigedo Channel. The data also suggests that eight million gallons of gasoline and six million gallons of distillate fuel oil were shipped into Southeast Alaska through Icy Strait from Alaska refineries from the north.

[32] U.S. Army Corp of Engineers. Waterborne Commerce of the United States. Available at: http://www.iwr.usace.army.mil/ndc/index.htm

[33] ISER Calculations

Much of the fuel for the ICFA west of Southeast Alaska is distributed from the ports of Anchorage, Nikiski, and Valdez (Table 6). These three ports are primarily fuel exporters, but Anchorage and Nikiski also import significant amounts of fuel, especially gasoline. In this regard, Anchorage and Nikiski act as both fuel exporters and fuel hubs for the IFCA. Dutch Harbor is the only pure fuel hub in this subregion.

Table 6. 2007 Fuel Shipments to Southcentral and Western Alaska ice-free ports (thousands of gallons)[34,35]

	Gasoline			Distillate Fuel Oil		
	Receipts	Shipments	Net	Receipts	Shipments	Net

Whittier	-	-	-	38	-	38

Most IFCA communities receive fuel shipments throughout the year. Communities with large fuel markets generally receive at least one fuel shipment per week, while smaller communities may receive a fuel delivery every few months. This reduces the amount of fuel storage capacity required by a community. Frequent deliveries also reduce the retail cost of fuel, by spreading the fixed cost of storage over more gallons of fuel. In communities with just seasonal barge access—such as those in Western Alaska—the entire annual cost of storage must be spread over one or two deliveries of fuel.

The frequency of fuel deliveries in ICFA communities is limited by the cost of shipping fuel on barges. Economies of scale exist, making it cheaper to linehaul ship large amounts of fuel at a time. This means that when shipping fuel in barges or tankers, the shipping cost per gallon of fuel decreases as more gallons of fuel are delivered. Sailing a barge to a community from a refinery or storage hub costs about the same regardless of how full the barge. Filling the barge to capacity reduces the shipping costs, as the fixed costs are spread over more gallons of fuel. In addition, the cost per gallon to ship fuel decreases as the size of the barge or tanker increases. The result is that the cheapest way to transport fuel is by moving as much as possible at a time, resulting in larger, more infrequent deliveries.

[34] US Army Corp of Engineers. Waterborne Commerce of the United States. Available at: http://www.iwr.usace.army.mil/ndc/index.htm
[35] ISER Calculations

Shipping larger quantities at a time, however, must be balanced against storage costs. As a result, the optimal frequency of fuel deliveries finds a balance between shipping and storage costs. The logistic model most frequently employed in IFCA involves using large barges or tankers to transport fuel from the refinery to a fuel hub, where it is stored and transferred into smaller barges for deliveries throughout the region. The fuel is transported into the region as cheaply as possible and the amount of needed storage is minimized. Ketchikan is the fuel hub for Southeast Alaska, receiving fuel shipped from refineries in the Lower 48 and Canada. Dutch Harbor is the fuel hub for the Aleutian Island and Alaska Peninsula submarkets.

The fuel hub model is ideal for minimizing shipping and storage costs, but results in a lag between when fuel is lifted from the refineries to when it is sold to the final consumer. Rapidly changing world oil prices can drastically change the value of a distributor's inventory of fuel between the time it is lifted and the time it is retailed. Distributors must choose to price their fuel either to reflect the cost incurred to purchase the fuel or the cost to replace the fuel at current market prices. The lack of contract-based prices allows fuel distributors to price their inventory either way, at any time.

Distributors

Three companies distribute most of the fuel in the IFCA region, Harbor Enterprises (Petro Marine, Petro Express, and Shoreside Petroleum), Delta Western, and Petro Star. The only communities served by more than one of these fuel distributers are Dutch Harbor, Kodiak, Ketchikan and Juneau (Table7). In the other IFCA communities it appears all the fuel is supplied by only one fuel distributor. The only significant independent fuel retailers appear to be Anderes Oil in Ketchikan and Taku Oil in Juneau.

Table 7. Communities Served by Fuel Distributors[36,37,38,39]

[36] Petro Marine Services, www.petromarineservices.com
[37] Delta Western, www.deltawestern.com
[38] Petro Star, www.petrostar.com
[39] Communication with regional fuel retailers

Petro Marine is the largest distributor of fuel in the IFCA. Petro Marine is a wholly-owned subsidiary of Harbor Enterprises, Incorporated of Seward, Alaska. Petro Marine distributes fuel throughout Southeast Alaska, Prince William Sound, the Kenai Peninsula, and Kodiak Island. Petro Marine distributes fuel to company-owned retail stores, independent retailers carrying the Petro Marine/Express brand, and independent fuel retailers using their own brand name. Harbor Enterprises previously distributed fuel in Dutch Harbor, but exited the market in the mid 1990s.

Petro Marine's fuel for Southeast Alaska is purchased from refineries in Washington, California, or British Columbia. The fuel is shipped into Alaska on linehaul barges capable of carrying 2.5 to 3.4 million gallons of fuel. These linehaul barges generally unload in Ketchikan, Juneau, and Skagway. Linehaul barges typically do not visit smaller communities. Instead, fuel from linehaul barges is stored in Ketchikan until a smaller barge can distribute the fuel to smaller communities throughout the Southeast. Such smaller barges have a capacity of one million gallons of fuel.

Petro Marine also purchases fuel from the Tesoro and Flint Hills refineries. This fuel is lifted either from the bulk fuel storage farm at the Port of Anchorage or directly from the Tesoro refinery in Nikiski. This fuel is used for all of Petro Marine's markets in Homer, Kodiak Island, and, at times, Southeast Alaska and the southern coast of the Alaska Peninsula. The Petro Marine barge servicing this area has a capacity of two million gallons. K-Sea Transportation operates all of Petro Marine's fuel barges though the smaller barges are owned by Petro Marine.

Delta Western has the largest distribution area of any distributor in Alaska. It distributes fuel from Wrangell in Southeast Alaska to Dutch Harbor in the Aleutians to Red Dog Mine in Northwest Alaska. Delta Western purchases most of its fuel from West Coast refineries, but will at times purchases fuel from Alaska refineries and refineries in Asia. Delta Western distributes fuel in Southeast Alaska with a 1.7 million gallon linehaul barge that transfers fuel directly from West Coast refineries to Southeast communities. Delta Western also transports fuel from West Coast refineries to Dutch Harbor and other markets in Western Alaska in linehaul barges. Its largest barge servicing this route is a 3.4 million gallon, double-hull barge. K-Sea Transportation also operates barges carrying fuel for Delta Western.

The third large distributor in the IFCA region is Petro Star. Petro Star, a subsidiary of Arctic Slope Regional Corporation, is a vertically integrated fuel company, owning refineries in North Pole and Valdez. Petro Star distributes fuel in Valdez, Kodiak, Dutch Harbor, and St. Paul. Petro Star does not own its own fleet of tankers and barges. Instead, it contracts with Crowley Marine Services to transport its fuel to markets.

Market Conditions

Every community in Southeast Alaska has fuel supplied by one of the three large distributors, and they appear to distribute most of the fuel in IFCA. The only significant exceptions appear to be Taku Oil in Juneau and Anderes Oil in Ketchikan. Most of the fuel in Southeast Alaska is either retailed by the fuel distributor itself or sold to an independent fuel retailer. The independent fuel retailers have little control over the price of fuel they purchase from the fuel

distributor, because most fuel is not sold under a contractually determined price. Independent retailers do not choose the source refineries, the brand of fuel purchased, whether it is purchased on contract from a refinery, or the way it is delivered to the community. As a result, the price the independent fuel retailer pays for fuel is determined entirely by the fuel distributor. The only component of the cost that is not determined by the fuel distributor is the retail markup.

But the fuel distributors know the amount of the retail markup of independent fuel retailers, because it is simply the price of the fuel they sold the retailer, subtracted from the retailer's posted price. Knowing the retailer's markup allows the distributor to essentially determine the retail price of an independent fuel retailer—by setting the wholesale price of the fuel sold to the retailer at exactly the known retail markup, less the desired final retail price. This would allow a fuel distributor to exert monopoly pricing power in a market where it is the only fuel distributor but not the only fuel retailer.

The retail fuel price is further influenced by the fuel distributors because often neither the independent fuel retailer nor the community has fuel-purchase contracts with the fuel distributor. As previously mentioned, these fuel-purchase contracts are common in Western Alaska. In Western Alaska the fuel purchaser and fuel distributor agree on a contract price, based on an index of refinery prices at the time fuel leaves the refinery, or the fuel is "lifted," plus a transportation premium. This premium is comprised of the cost of delivery, including return on capital investment plus a profit reflecting the risk of the operation. Fuel distributors bid for the contract based on their costs of transporting fuel.

In the IFCA region fuel, distributors do not sell their fuel on contracts that include a pricing formula. Instead, they usually have full freedom to set their price at their retail stores or in sales to other retailers. There is no legal commitment to sell their fuel at a predetermined price or with a predetermined transportation charge. In addition, it appears that in some community submarkets, especially in Southeast Alaska, there are only distributors selling at their own retail outlets and no one else competing to supply fuel at the wholesale or retail level. This creates a fuel distribution monopoly in those community submarkets. The exception to this is Juneau, which has two distributors as well as multiple independent retailers.

IFCA fuel markets facilitate natural monopolies because significant economies of scale exist and potential competitors face a high cost of entering the market. Economies of scale exist because many of the costs of distributing fuel, such as barges and storage tanks, are relatively fixed. The result is decreasing "per gallon" costs of distributing fuel as the amount of fuel that a company distributes increases. For example, one fuel distributor could import two million gallons of fuel on a linehaul tanker cheaper than two fuel distributors can import one million gallons each on smaller fuel barges. A single large, fuel distributor in a region is probably able to distribute fuel at a lower cost than multiple smaller distributors. This naturally leads to consolidation to the point where the entire IFCA market is only served by a small number of distributors, in this case three.

While consolidating fuel distributors may lower *costs* of fuel, it does not necessarily lower *prices* paid by the consumers. Instead, a sole fuel distributor would be capable of exercising its market power and charging a price higher than would be expected in a competitive market.

Without access to proprietary information, it is unclear whether fuel distributors in the IFCA region generate a larger than expected return on investment (profit) or charge monopolistic prices. The structure of fuel markets in the IFCA allows for fuel distributors to price fuel higher than they could in a competitive market. However, a recent investigation by the State of Alaska Attorney General's Office suggests that fuel distributors in the ICFA region are not exercising their market power and pricing fuel significantly higher than would be expected in a competitive market.

IFCA fuel markets with only one distributor may also be exposed to a higher risk of fuel price shocks. In a competitive market, a fuel distributor wants to avoid purchasing fuel at the peak of a short-term fuel price increase. If it did, and a competitor was able to purchase fuel at a lower price, the distributor would have to reduce its fuel selling price below its purchase price to maintain market share. In a market with only one fuel distributor, the distributor's prices do not need to reflect the cost of bringing new fuel into the market, allowing it to pass on the full cost of the fuel purchased.

Fuel distributors in competitive markets must compete for market share with other distributors who may have purchased fuel on a different day at a lower price and must lower their prices to match their competitors. They avoid the financial losses associated with finding themselves with a higher priced fuel inventory in two ways: 1) contracts with refineries and 2) financial tools. An unintended effect of fuel distributors' protecting themselves with these tools is a more stable price for consumers.

Most of the gasoline in the U.S. is sold under contract. The contract between the distributor and the refinery generally guarantees that the distributor has access to a certain quantity of fuel at a predetermined price. The contract price is determined by either a fixed rate or a formula that relates it to spot or futures markets. Contracted fuel prices are slightly more expensive then spot prices under normal market conditions, but most distributors in competitive markets pay this premium and utilize them to insulate themselves from price and supply shocks.

It appears (the actual fuel purchasing procedure is proprietary) that the fuel distributors in the IFCA region purchase fuel on spot markets and do not utilize fuel contracts. Petro Star is the exception, as it is a vertically integrated company, owning the refining, distribution, and retail components. When a supply shock occurs and a spot market price spike ensues, the refinery price also spikes. The distributors are rarely in significant danger of losing market share or of not being able to move their high priced inventory, because they operate in many non-competitive community submarkets. Their customers do not have the option to purchase fuel from a company purchasing lower-priced contract fuel. In this situation, the end user and not the fuel distributor carries the price rise risk burden.

Another method of insulating a fuel distributor from price spikes is participation in financial markets buying and selling futures and options contracts. Futures and options markets are

structurally different but both can be utilized to hedge against price spikes or drops. Most commonly they are used to protect fuel distributors from the risk of the price of fuel dropping after a large purchase of inventory. In this case, the fuel distributor may have to sell the fuel for less than it was purchased for in order to compete with other sellers. The loss incurred on the sale of the physical product can be made up for by profits made by hedging in the financial markets, by "betting" that the price of fuel will decrease.

Fuel intensive industries generally use financial markets in order to hedge against the increased business costs associated with price increases. A common example is an airline company that bets in the financial market that fuel prices will increase. If prices do in fact increase, then the airline will lose money by flying people with higher priced fuel but will still have earnings in financial markets that offset the operational losses. Alternatively, if prices decrease, they will lose money in the financial market but the losses will be offset by higher revenues resulting from flying people with less expensive fuel. Without financial markets, the airline will make more money when prices go down but risk losing money when prices increase. Financial instruments can ensure more steady revenues. Though financial markets are primarily used by fuel intensive industries, they can also be used by a small fuel distributor to protect against the financial risk of purchasing fuel on the spot market.

Using fuel purchase contracts and financial markets to protect against fuel price volatility generally comes at a significant transaction cost. This cost is generally accepted in most markets as a premium paid to ensure supply and price stability. Using fuel contracts and financial markets in Alaska would create an additional cost to be passed on to the consumer in the final price of fuel. The result would be reduced price shocks and risks that prices may increase substantially, but at the cost of prices that are generally slightly higher. The net difference between what customers pay for fuel in a less competitive market in which they shoulder the risk of price shocks and what they would pay in a more competitive market with financial hedging and options is uncertain.

Fuel Pricing

Fuel distributors in IFCA typically sell fuel in either their own retail stations or to independent retailers without a contract determined pricing formula. This leaves the fuel distributors a large degree of freedom to set prices. Researchers were unable to obtain the proprietary pricing policies of ICFA fuel distributors, but analysis of existing data provides some clues into how prices are structured.

The Fisheries Economic Data Program has collected monthly marine diesel prices from over a dozen IFCA communities since 1999. An analysis of this data provides an indication as to how fuel is priced in IFCA. A comparison with the State of Alaska Community Fuel Price Survey indicates that the price of marine diesel fuel and heating fuel in a community is highly correlated in this region (see Figures 4-7). Marine diesel and home heating fuel are typically the same fuel sold to different users. The relationship between their prices are not exact but are sufficiently correlated to allow marine diesel to act as a proxy.

Figure 4. Price Comparison of Heating Fuel and Marine Diesel: Kodiak[40,41]

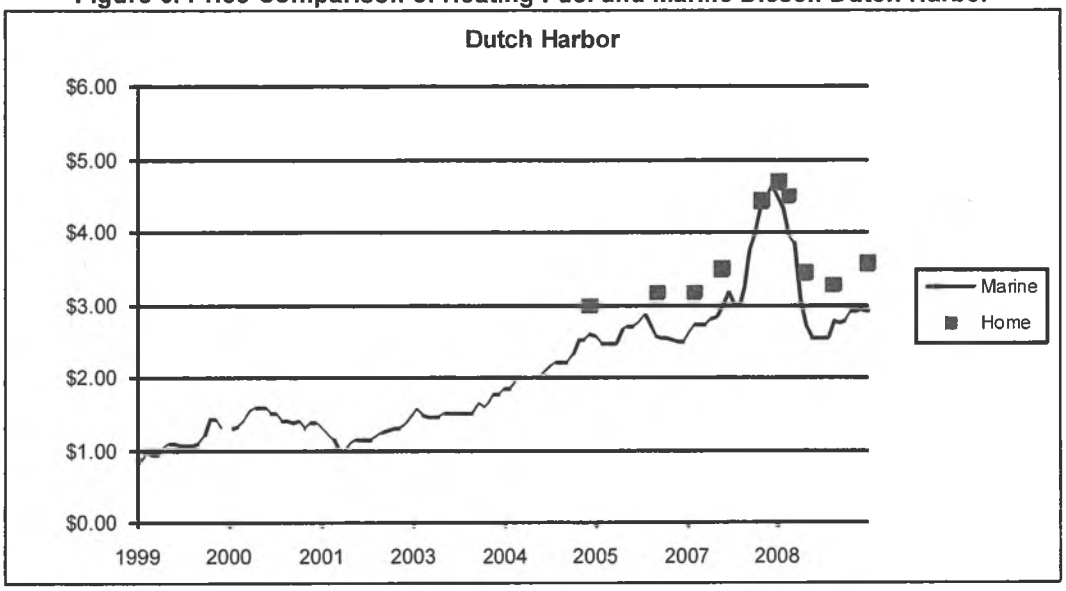
Figure 6. Price Comparison of Heating Fuel and Marine Diesel: Dutch Harbor



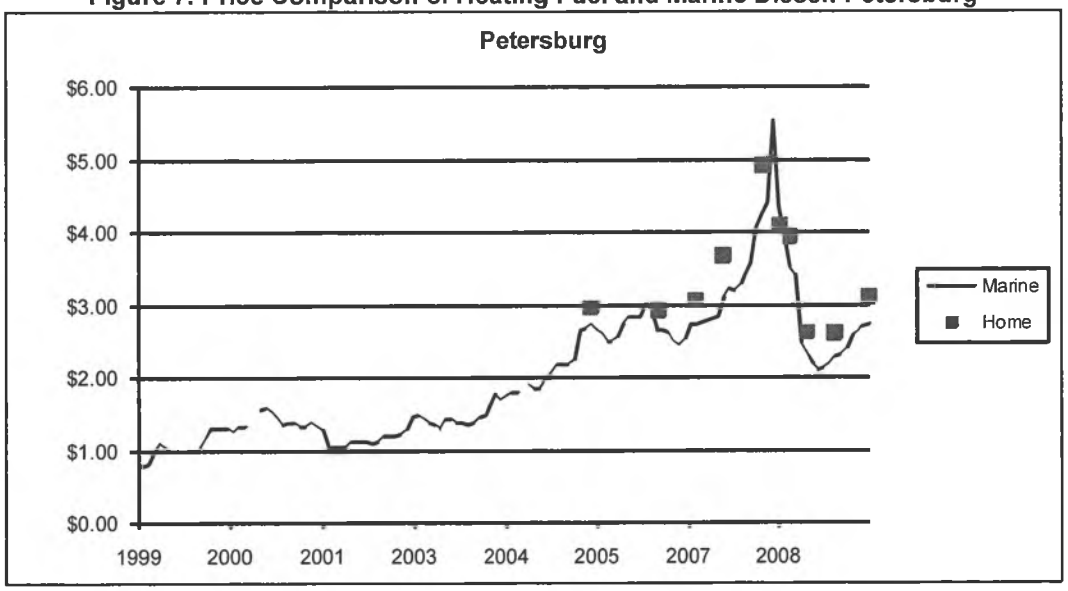


Figure 7. Price Comparison of Heating Fuel and Marine Diesel: Petersburg

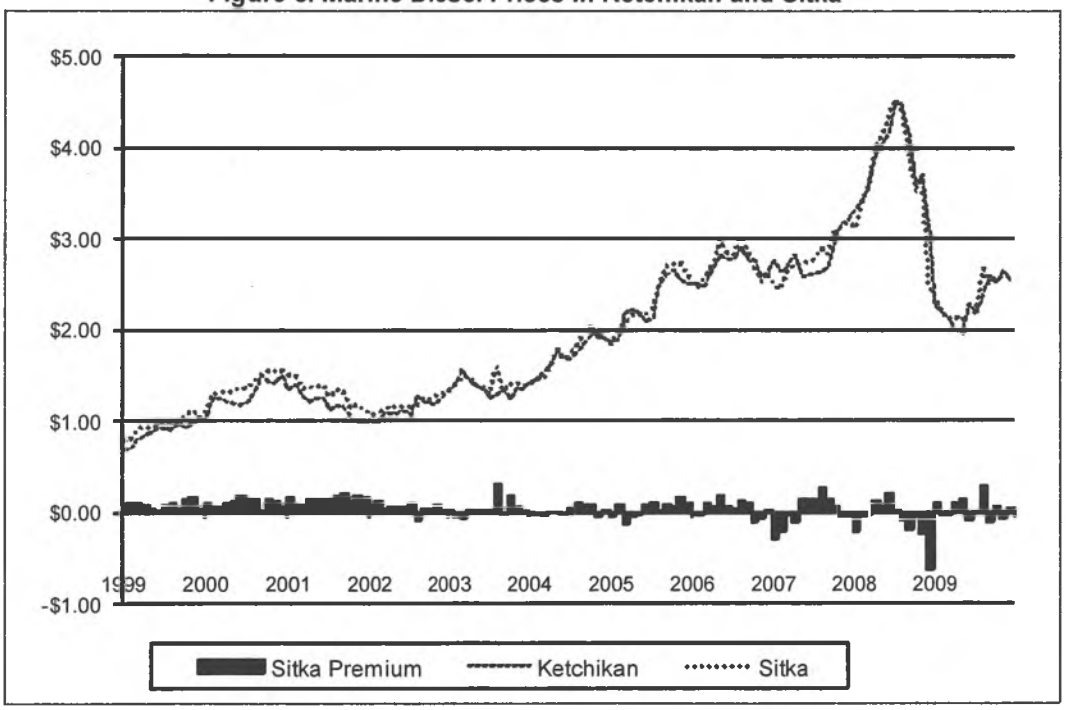

In Southeast Alaska it appears that the retail price of fuel is not solely based on the cost of supplying fuel to a community. It is unclear exactly how prices are determined, but a comparison of marine diesel costs for Sitka and Ketchikan reveal that these two markets tend to have similarly priced fuel (Figure 8). If fuel prices were based on costs, we would expect Sitka to have consistently higher fuel prices, as these two fuel community submarkets appear to have clearly different cost structures. All of Sitka's fuel is first transported to Ketchikan by linehaul barges and stored in Ketchikan fuel tanks until a smaller fuel barge transfers it to

Sitka. The cost of fuel in Sitka includes all the costs of getting fuel to Ketchikan, plus the additional barge costs and storage costs in Sitka.

Before 2005, fuel prices were more stable and Sitka appeared to be paying an average of $0.08 more per gallon. This is the price difference that would reasonably be expected if prices were based primarily on the cost of distribution. Since 2005, the price differential between Sitka and Ketchikan decreased to an average of $0.01 per gallon, although no major change in cost structure is apparent.

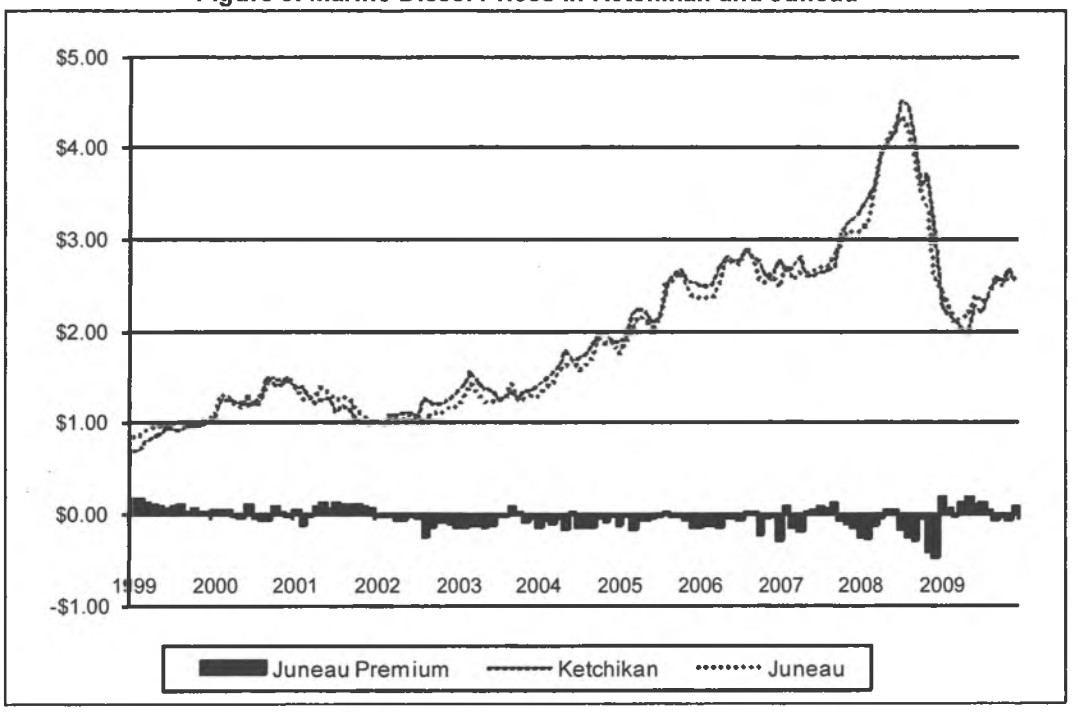

Figure 8. Marine Diesel Prices in Ketchikan and Sitka[42]

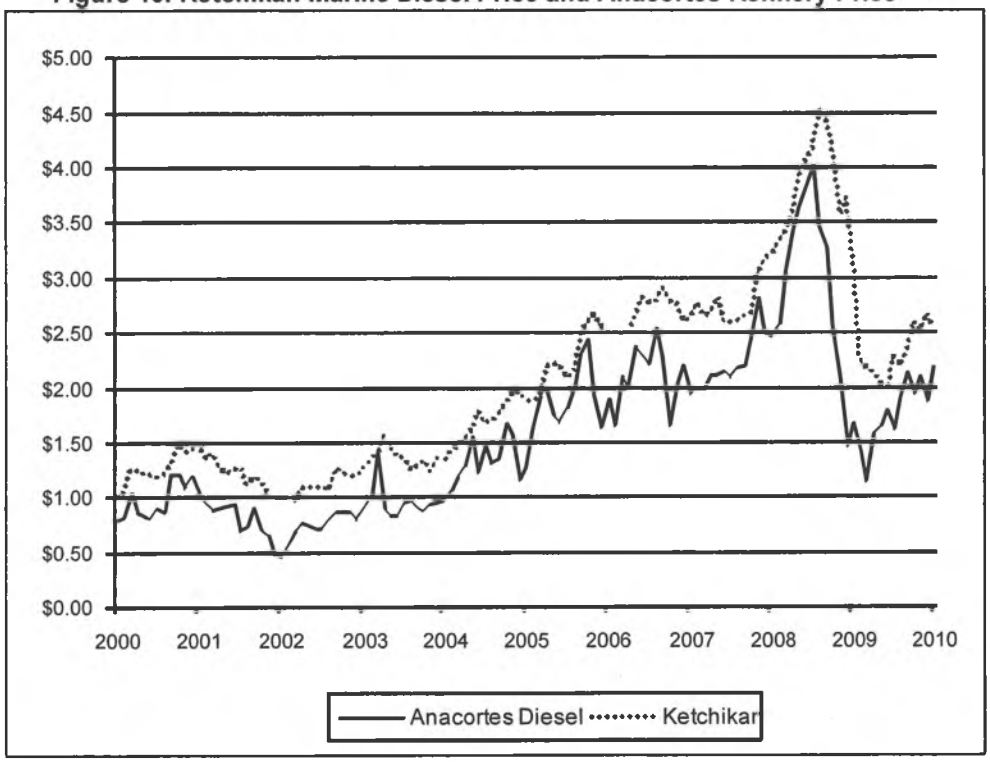
The relationship between the fuel price in Juneau and Ketchikan followed a similar pattern. Prior to 2005, fuel prices were an average of $0.02 less per gallon in Juneau. After 2005, fuel prices were an average of $0.06 cents cheaper per gallon in Juneau (Figure 9). Again, no known changes in the costs of distributing fuel are apparent, suggesting that fuel prices in Southeast Alaska are somewhat independent of costs.

[42] Fisheries Economic Data Program, Monthly Marine Fuel Prices. Available at: http://www.psmfc.org/efin/data/fuel.html

Figure 9. Marine Diesel Prices in Ketchikan and Juneau[43]

This analysis suggests that prices are not established only on the basis of community specific costs. This could be the result of two pricing strategies by fuel distributors. First, fuel distributors are setting prices based on what individual community submarkets can bear, regardless of the actual costs to distribute fuel to that submarket. Second, fuel distributors may not be allocating the costs of distributing fuel in the region to specific community submarkets. As a result, prices in different community submarkets may reflect more the total costs of distributing fuel in the region than they do the specific costs of distributing fuel to that specific community. Fuel prices are most likely based on a combination of both strategies. In addition, the fact that individual community submarket prices may not be based solely on direct costs does not necessarily mean that distributors are earning exceptionally high margins and profits. The cost of analysis to calculate purely cost-based retail prices is likely high and not a "necessary" cost of doing business in a less than competitive market.

Further analysis of the marine diesel price data suggests that changes in the price of fuel in Southeast Alaska significantly lag behind changes in the price of fuel at the refinery. Price lags are common in all fuel markets, but the magnitude of this lag suggests that fuel prices are based on the cost the distributor paid when they purchased the fuel at the refinery, not the cost to replace the fuel at current market prices. This means that the fuel distributors are not taking on any fuel price risks. If they were, pricing at "replacement costs," or the current cost of fuel on the world market, they would be at risk of prices dropping between the time they purchase the fuel and the time they sell it, resulting in them selling the fuel for less than they paid for it. By basing the final price of fuel on the initial cost to procure it from the refineries, the



[43] Fisheries Economic Data Program, Monthly Marine Fuel Prices. Available at: http://www.psmfc.org/efin/data/fuel.html

distributors avoid exposing themselves to any financial risk if the price changes. Again, this is a "luxury" usually only available in less than fully competitive markets.

The long supply chain of fuel markets in the ICFA region can mean that the lag between changes in the world market price for fuel are not reflected in ICFA fuel prices for weeks or even months.

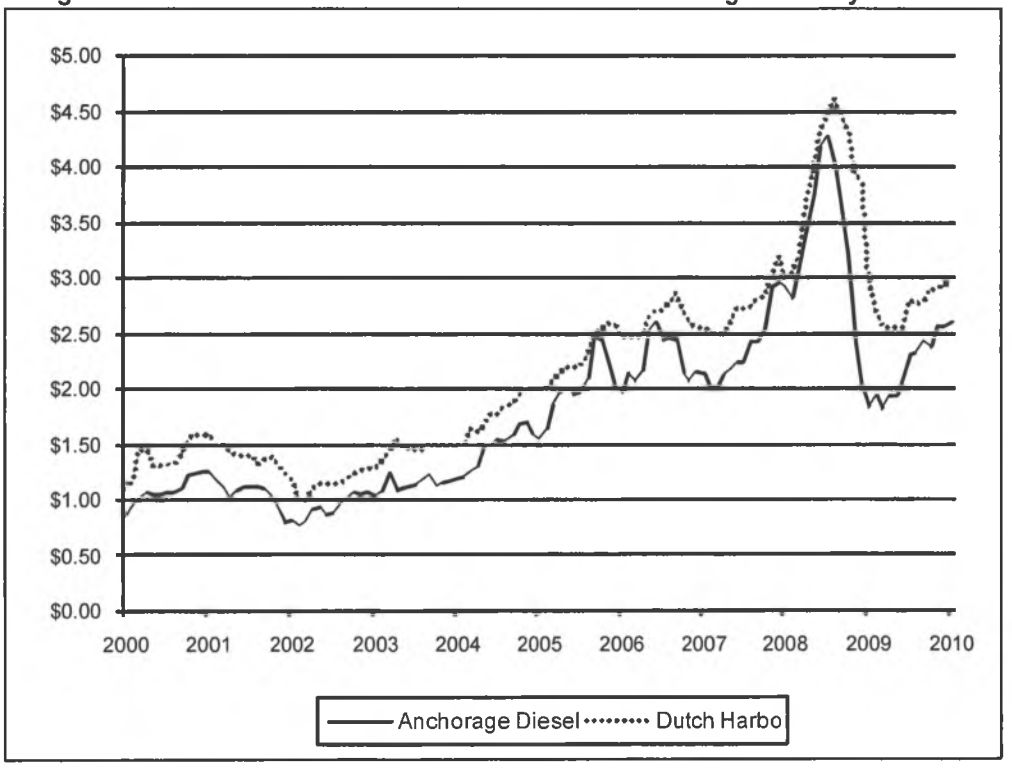


Figure 10 compares the price of Anacortes diesel and Ketchikan marine fuel. Figure 11 compares the price of Anchorage diesel and Kodiak marine fuel. A lag in the time it takes for changes in the refinery price to appear in the retail price is visually apparent. Anacortes diesel is the blended price of ultra-low sulfur diesel and regular diesel at the Anacortes refinery. Anchorage diesel is the price of regular diesel at the Anchorage rack at the Port of Anchorage.

Figure 10. Ketchikan Marine Diesel Price and Anacortes Refinery Price[44,45]

[45] Fisheries Economic Data Program, Monthly Marine Fuel Prices. Available at: http://www.psmfc.org/efin/data/fuel.html

Figure 11. Dutch Harbor Marine Diesel Price and Anchorage Refinery Price[46,47]

The exact length of the price lag is not clear with the level of data available, but statistical analysis indicates that prices in Ketchikan and Dutch Harbor lagged behind Anacortes and Anchorage refineries, respectively, by about two months. A statistical analysis, which also includes Kodiak and Juneau, compared the correlation between refinery prices and retail prices of fuel lagged zero, one, two, three, and four months. For example, a one month lag would be February retail prices reflecting January refinery prices; a two month lag would be March retail prices reflecting January refinery prices. The results indicate that refinery prices are most correlated with retail prices with a one or two month lag (Table 8).

Table 8. Correlation between Rack Prices and Retail Prices with Lags

	Rack	No Lag	1 Month	2 Month	3 Month	4 Month
Dutch Harbor	Anchorage	0.958	0.979	0.980	0.966	0.939
Kodiak	Anchorage	0.964	0.984	0.981	0.962	0.932
Juneau	Anacortes	0.937	0.973	0.973	0.952	0.919
Ketchikan	Anacortes	0.929	0.965	0.974	0.961	0.928

The analysis of rack prices and retail prices also revealed that margins have increased over time. Figure 12 and Table 9 show the margin for each community and the closest rack prices with no lag. Figure 13 and Table 10 show the margins with a two month lag. Both approaches clearly illustrate that margins have increased over time, as well as the variance in the amount

[46] OPIS Standard Rack Prices Weekly for Anacortes, monthly average price for all diesel price
[47] Fisheries Economic Data Program, Monthly Marine Fuel Prices. Available at: http://www.psmfc.org/efin/data/fuel.html

of the margin. Both the increased margin and variance seem to correspond to increases in oil prices. It also appears that refinery rack prices decline more slowly than they increase.

Figure 12. Fuel Margins with No Time Lag

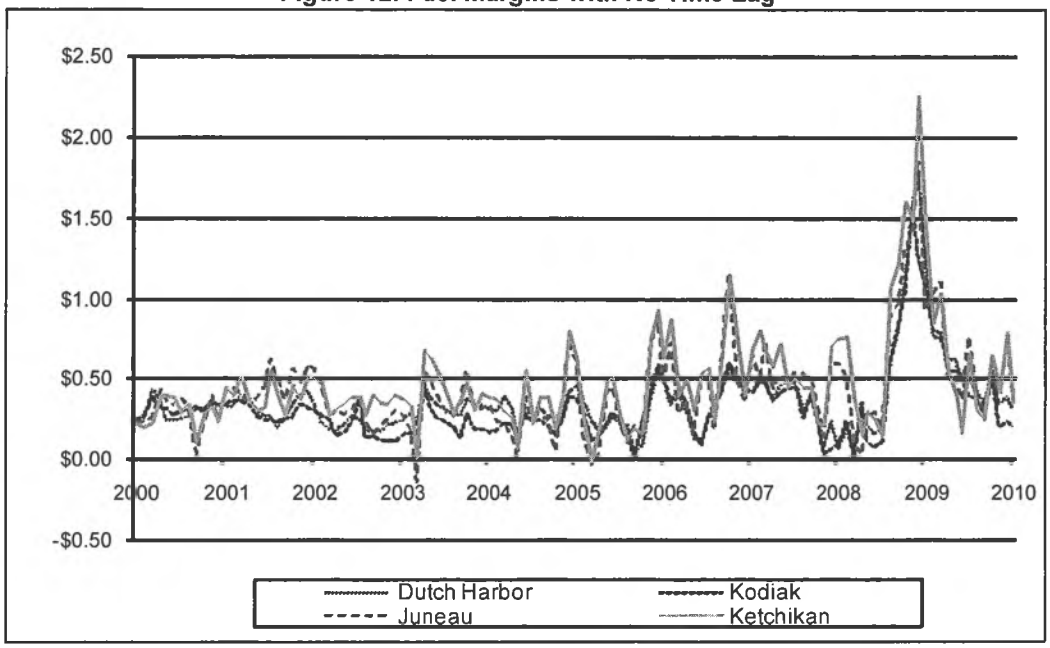

Figure 13. Fuel Margins with Two Month Time Lag

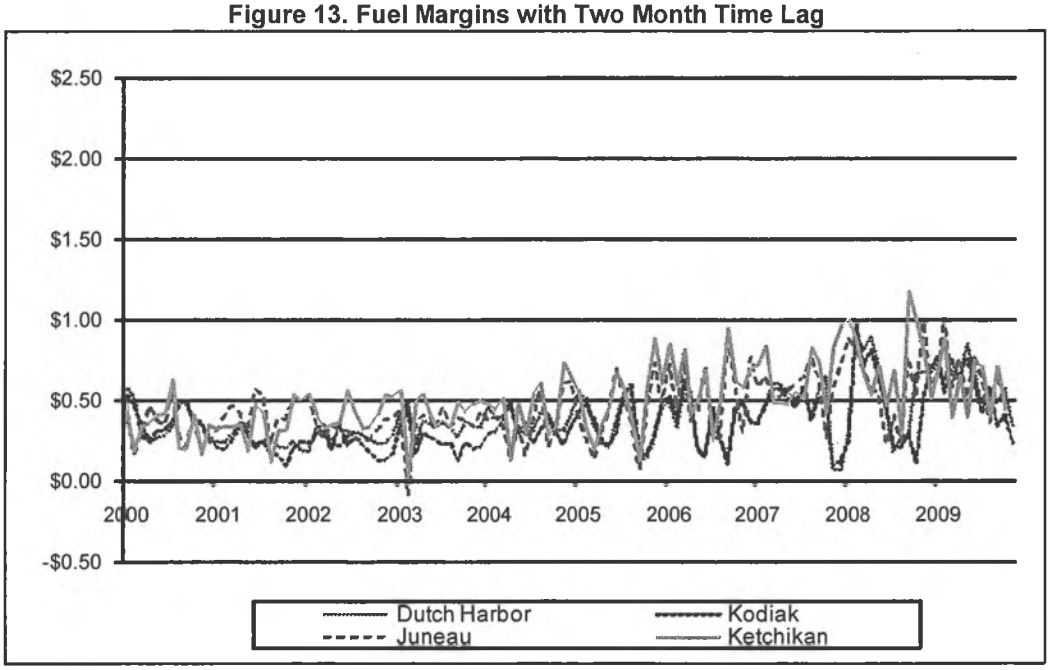

Table 9. Average Fuel Margin with No Time Lag

	2000 to 2004	2005 to 2010	2000 to 2010
Dutch Harbor	$0.29	$0.43	$0.36
Kodiak	$0.25	$0.40	$0.33
Juneau	$0.33	$0.53	$0.43
Ketchikan	$0.37	$0.59	$0.48

Table 10. Average Fuel Margins with Two Month Time Lag

	2000 to 2004	2005 to 2010	2000 to 2010
Dutch Harbor	$0.27	$0.46	$0.39
Kodiak	$0.27	$0.43	$0.35
Juneau	$0.35	$0.55	$0.45
Ketchikan	$0.39	$0.61	$0.50

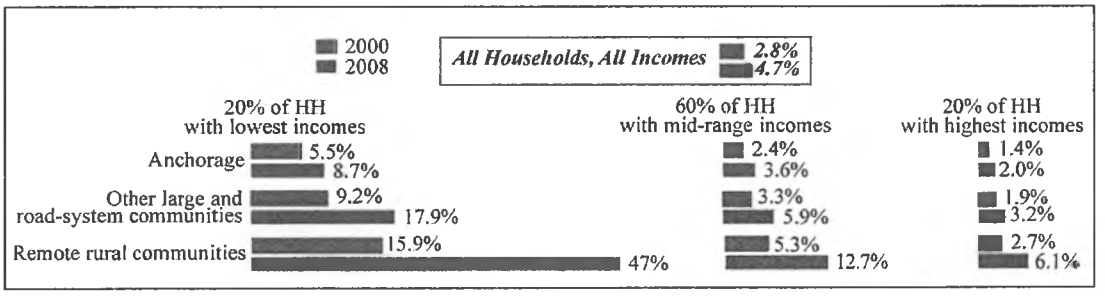
It is unclear what caused the increased margin between refinery and retail prices. It may have been caused by an increase in the costs to transport and distribute fuel, or by an increase in profit margin. Some increase in the distribution costs is expected, as transporting fuel is a fuel intensive industry and the costs will increase with the cost of fuel. It is clear that some change in the structure of fuel prices has taken place in the last few years beyond an increase in the refined price of fuel. It may be that capital replacement lagged in the IFCA similar to the way it did in Western Alaska, and this necessary "catch up" is reflected in recent prices.

COMMUNITY FUEL SURVEY RESULTS

The major findings of the third round of community surveys are:

- Increases in fuel prices persisted from January 2009 to January 2010, despite the lower cost of crude oil during most of 2009.
- Fuel prices in rural Alaska vary significantly and are inconsistent across communities at the retail level.
- Some communities have much larger retail price markups than others.
- For some communities, delivery costs and retail markups are a large portion of the fuel price.
- Getting reliable local information on fuel sales and practices remains a challenge.
- Residents of surveyed communities are frustrated because they have limited options for coping with high prices.

From January 2009 (date of last update) to January 2010, crude oil prices decreased on average 37%. Refinery gate prices in Anchorage increased 13% for gasoline and decreased 7% for diesel for heating (DF#1). In Anacortes, refinery gate prices decreased 7% for gasoline and 54% for diesel for heating (Ultra Low Sulfur, DF#1). On average across the surveyed communities, retail prices for gasoline decreased 6% and diesel for heating decreased 13%. Nonetheless, only five of the surveyed communities paid lower prices for gasoline and diesel for heating (DF#1). But because the crude oil and refinery components of costs comprise a relatively small portion of final fuel prices (less than 50% in Western Alaska), these declines result in much smaller declines in retail prices, even if passed on fully to customers.



POLICY OPTIONS

The fuel delivery and storage processes in rural Alaska, and especially Western Alaska, are labor and capital intensive and have a very limited number of gallons over which to spread the costs. As a result, there are no easy solutions. This section identifies current programs and some additional policy options and their potential impacts. This discussion is by no means exhaustive.

Weatherization, Conservation and Energy Efficiency

From an individual household perspective, reducing fuel use provides immediate savings. From a regional and community perspective, some of the savings to an individual household would be offset by the need to spread the fixed costs of delivery and storage across fewer gallons. Purchasing smaller quantities of fuel is a protection against the impacts of volatile fuel prices on household budgets (Figure 14).[48] Continued state investment in programs such as weatherization, conservation, and energy efficiency can reduce the impact of high and uncertain fuel prices in both the short and long term.

Figure 14. Estimated median share of income Alaska households spend for home energy use, 2000 and 2008

State Bulk Fuel Loans

The state offers two bulk fuel loans programs. The Alaska Energy Authority administers a revolving bulk fuel loan, and the Division of Community and Regional Affairs, through a contract with Rural Alaska Fuel Services (RAFS), offers the Bulk Fuel Bridge Loan program. These programs have been effective in insuring that communities have access to the necessary cash to buy fuel. These programs offer loans with either no interest or a low, subsidized interest rate. If the fuel distribution companies or private banks were funding this credit, the interest costs would be higher and passed on in higher fuel prices per gallon. In addition, offering fuel on credit significantly increases the working capital requirements of fuel distributors, which would need to be recovered in fuel prices. By shouldering the financing risk, lowering fuel distributor working capital costs, and eliminating or lowering interest costs, these programs reduce fuel market transaction costs.

Consolidating the bulk fuel revolving loan and RAFS bulk fuel program would improve operational efficiency, which could free administrative costs to be shifted to loan capitalization. The Bulk Fuel Bridge Loan program appears to be both a more effective and

[48] Haley, Sharman, Ben Saylor, and Nick Szymoniak, 2008, *Estimated Household Costs for Home Energy Use*, May 2008, Web Note No. 1, Revised June 24, 2008.

efficient program. It is more effective because as a condition of receiving a state subsidized loan, the community/borrower receives fuel sales operations and management training, to help the community learn how to collect sufficient revenue to purchase fuel without a loan in the future. It appears to be more efficiently administered, through a contract with a not-for-profit organization.

As it currently structured, a community is not eligible for a RAFS loan until rejected for a Bulk Fuel Revolving Fund loan, and every year the community must reapply for loans. Originally, receiving a RAFS loan was a three-year process and RAFS worked with a community/borrower to be debt-free at the end of three years. The current loan system encourages chronic debt financing of fuel and provides no support or training to develop sound management and pricing of fuel sales. Coupling subsidized fuel loans with business and accounting training provides the tools for future self-sufficient fuel sales operations. These same business and accounting skills are valuable and transferable assets in rural Alaska.

However, if the programs are not consolidated, the process for applying for a loan could still be streamlined by moving to one shared application and by making a loan application good for a three-year period. Each interim year the community/borrower would complete a shortened version of the application. This would lower administrative costs and reduce the risk of loans not being approved in time to purchase fuel. But since this would make it easier to obtain loans each year, it might encourage habitual use of the AEA bulk fuel loan. This problem could be addressed by expanding the RAFS training program.

Municipal Assistance and Revenue Sharing and Energy Assistance

The dual problems of high energy costs and low incomes can distress communities and local organizations that provide public services (local governments, public utilities, and village corporations). The state can provide financial assistance to local governments to help address the financial burden and stress of high fuel costs. Municipal Assistance and Revenue Sharing and the Community Energy Assistance program can help local governments provide public services when high energy prices consume much of their budgets. State Revenue Sharing funds were vetoed for FY04; no additional appropriations were made to the program until FY 10, when three years of funding were appropriated. These years without Revenue Sharing coincide with years of rising and volatile fuel prices.

In addition to helping local governments fund public services and operations, revenue sharing may also help stabilize fuel prices. There is anecdotal evidence of local governments, tribal councils, or local village corporations selling fuel at higher mark up to raise revenues to provide other local public services. They may do this because they have a small tax bases or it is administratively easier to collect revenue on fuel sales than on other services (e.g., washeteria, water and sewer). Revenue sharing can provide communities with a stable revenue source, reducing the need to collect revenue by increasing fuel prices. By contrast, a community energy assistance program that allocates funds to communities based on their price of fuel would create an incentive for communities to increase prices.

Fuel Cooperatives

There have been fuel cooperatives in the market for more than 10 years.[49] Fuel cooperatives hope to reduce the price of fuel by increasing the market share of the fuel buyer and thus increase their leverage in negotiating rates. Fuel cooperatives have also been suggested to reduce administrative costs by allowing the fuel distributor to only do business with one entity instead of many. A fuel cooperative can also assist communities by providing business support to help ensure that each community has the cash on hand to purchase fuel each year. This could reduce the risk of needing special barge trips later in the year or extra financial costs associated with using loans to purchase fuel.

Despite the possible benefits of fuel cooperatives, in actual practice they have had mixed results, as they face significant challenges in rural fuel markets. Some of the challenges include: credit risk, cost shifting, and reduced competition.

Credit Risk

In the past, the fuel cooperative would purchase all the fuel for the group. If one member of the cooperative failed to pay the cooperative, this threatened to take the whole organization under. This was the case with Wave Fuels through much of the mid-2000s, until the model was changed. Starting then, the cooperative did not own the fuel and only provided marketing services.

Cost Shifting

The market is already highly concentrated among organized buying groups. Customers such as AVEC, North Star Gas, and various school districts make up the bulk of the gallons sold in the market. Given that the industry is not excessive in profit, any further consolidation of fuel buying would most likely yield no concessions from the fuel distribution companies. Without excess profits, any price concessions given to larger buying groups mean the fuel distribution companies must raise prices for another group of customers to maintain a reasonable margin for its operations as a whole. This cost shifting results in a zero sum gain for the market as a whole. In general, it is the smaller, less sophisticated segments of the market that tend to lose out with cost shifting. This is already occurring to some extent, with larger buyers generally paying lower prices. But increased consolidation would likely exacerbate the situation.

Reduced Competition

If a new or larger fuel cooperative was created and purchased all its fuel from only one distributor, the likely effect is that since only Crowley has the necessary equipment to service the whole group, the only bid would come from Crowley. While this may seem counterintuitive, the end result is to decrease competition because it removes from the market smaller volumes that smaller operators and/or new operators could service. This realization resulted in the market actually going in the other direction. AVEC, the largest fuel purchaser for small communities, allowed its volume to split in the last bidding cycle to allow a new market entrant, Ruby Marine, a chance to bid in the market area it services.[50] Northstar Gas also attempts to purchase fuel from multiple distributors, though the only market not served entirely by Crowley is Bethel. In Bethel Northstar Gas purchases its fuel from Delta Western.

---

[49] Wave Fuels reorganized as North Star Gas.

[50] Ruby Marine was the successful bidder.

Infrastructure Improvements

Opportunities exist for lowering the cost of fuel by making investments in infrastructure projects that the private sector or local governments would otherwise not make. These projects are expensive, but further investigation may reveal the costs are outweighed by the associated social benefits.

Community Connections

Investment in roads and power lines connecting communities may present the most important potential option for reducing energy costs (indeed, all costs) in rural Alaska and in promoting the development of economic activity in rural communities. For example, if two communities are connected by a road, then only one bulk fuel farm and one barge delivery is required. The associated fixed costs are shared by both communities and spread over more gallons of fuel. A truck can transport fuel from one community to the other as needed. Additionally, a power line connecting the two communities would reduce the need for multiple power plants. The remaining power plant will have a larger and potentially more stable load, allowing it to operate at higher efficiencies. Renewable energy systems could be scaled to potentially be more economically viable.

A research project could assess the capital and operational costs of road and transmission expansion between communities. This should focus on community clusters, as opposed to connection to the road system as an initial opportunity. This would mitigate local opposition, since connections will be limited, but still allow for economies of scale and reductions in other capital investments that will offset the cost of roads and wires. The cost of constructing roads and power lines in rural Alaska is high but the benefits would surely expand beyond lower fuel and energy costs. While not all communities would welcome these connections, there are likely a sufficient number that would welcome the opportunity to test this sustainability model.

Denali Commission Tank Farms

In over 100 communities with previously inadequate fuel storage capabilities, the Denali Commission has constructed new fuel storage capacity. These new storage facilities are environmentally sound, reducing the risk of environmental costs associated with a spill. The increased storage capability also reduces the amount of expensive fuel that needs to be flown in due to inadequate storage. However, in order for the new Denali Commission tank farms to be sustainable into the future, some entity needs to ensure that business plans associated with each new tank farm are followed. Otherwise two things can happen: 1) The tank farm falls out of compliance or minimum safety standards due to lack of maintenance. 2) Prices become unfairly competitive to surrounding villages. This does not represent a true competitive advantage, but instead, neglect.

Marine Facilities

The state could invest in improvements that would lower the cost of delivering fuel, such as consolidated and safe marine headers in each community or a terminal that could take large international fuel tankers. The Denali Commission recently partnered with the U.S. Army Corp

of Engineers to investigate potential improvements to barge landings in the Alaska.[51] Improvements to barge landings could reduce the environmental risk of delivering fuel, reduce fuel costs by shortening the time it takes to deliver fuel, and increase competition by making it easier to deliver fuel for newcomers into the market. Before improving barge landings for the sake of fuel costs, a cost analysis should be performed as the cost of fuel may increase if the cost of the projects is greater than their savings. However, it may be difficult to value the environmental benefits of reduced spill risk.

By improving and consolidating marine headers the state could reduce the cost of delivering fuel to small communities served by barges. Currently, in some communities each fuel entity has a separate marine header. This requires that for the barge to deliver to each entity it must pull up to a separate area of the beach. In communities where deliveries are constrained by tides this can add significantly to delivery times.

Further, the state could reduce marine transportation costs by investing in improved maritime support. Any actions to reduce risk or decrease delivery times in the transportation industry could result in lower transportation differentials. Currently Alaska lags behind the rest of the U.S. in ocean and river charting, aids to navigation (e.g., lights, buoys, channel markers), and dredging of critical channels that constrict draft and related efficiency. The lack of these critical maritime tools adds costs and risks to carriers.

Fuel Price Risk Management

In recent years the price of petroleum and its refined products has become increasingly more volatile. Volatile prices create financial risk for participants in the fuel market. In rural Alaska fuel markets, it appears that the entire fuel price risk falls on the final consumer.

Fuel distributors in rural Alaska bear none of the financial risk, as they are able to pass on the entire price of the refined products. When fuel is purchased on contract, as it generally is in Western Alaska, the contract stipulates that the price the distributors sells to the community is based on the price of the refined product at the time it was purchased plus a transportation differential. If the price of fuel increases or decreases while during transport, it does not impact the fuel distributor's sales price. In ICFA, where fuel is less likely to be purchased under a contract determined pricing formula, communities still bear the full risk of volatile fuel prices, as the distributor has no competition and is able to pass on the full purchase cost of the fuel, even if world market prices have fallen since the fuel was lifted at the refinery.

By bearing the full risk of fuel price volatility, rural communities do not necessarily pay higher prices. They do not, however, pay stable prices. When a community in Western Alaska enters into a fuel contract in early spring, the fuel distributor provides a quote for the expected delivered price of fuel. If prices are higher at the time the distributor purchases fuel from the refinery, the community will have more expensive fuel than expected. When a community does not know how much its fuel will cost, it is difficult to financially plan for the year, especially when fuel prices constitute such a large portion of household income. IFCA communities have the same exposure to price risk, but the risk is less because frequent

[51] Denali Commission, Barge Landing Report Executive Summary. http://denali.gov/index.php?option=com_docman&task=doc_download&gid=283&Itemid=101

deliveries mean that the next shipment results in another round of prices. Unlike Western Alaska communities, IFCA communities are not locked in at one price for an entire year.

A state sponsored fuel price hedging service would not reduce the price of fuel a community pays, but it would create certainty about the price of fuel a community would pay. A state sponsored financial institute could purchase financial instruments in the spring when communities are putting fuel contracts to bid. These instruments, such as the purchase of a futures contract to buy fuel at a future date at specific prices, could be used to ensure that communities know how much fuel will cost when it arrives during the summer. If a community participates in the financial program it may be locked into fuel either more or less expensive than it would be otherwise. On average, fuel would actually be slightly more expensive as purchasing futures contracts would involve a small premium. The benefit would be that the community would know exactly how much cash it needs to have on hand when the barge arrives and its residents would know exactly how much their heating bill and electricity would be the following year. Everyone would know how much they have to save, and whether they will have enough money to make other investments or purchases (e.g., a new outboard or a trip to Anchorage).

A similar policy option would be to require more transparency on the fuel invoices that communities pay when they purchase fuel from distributors under contract. Currently, distributors disclose the cost of the refined product at the refinery but, unless asked, do not supply the lift date of the fuel. There is also no clear chain of custody that ensures that the fuel purchased by the community was actually lifted on the day the distributor claims. It is not expected that the fuel distributors are unfairly reporting the refinery lift price of the fuel they sell, but this research could not find evidence of accounting practices that could prove that they were not. The state could implement standards that would require increased accounting transparency for fuel purchased under contract. This would have little impact on prices unless fuel distributors are inaccurately reporting refinery prices and lift dates.

Community Assistance

Direct Subsidization

Direct subsidies can take three forms: a price subsidy, baseline subsidy, and income subsidy. Each type of subsidy tends to have different impacts on market efficiencies, benefactor well being and perceived benefactor well being. While it appears there is little the state can do to actually reduce the cost of fuel in rural communities the state has the option to offer energy relief with subsidies and has done so in the past.

Price Subsidy

The Power Cost Equalization program is an example of a price subsidy. It reduces the price of electricity for residences and community facilities in communities with high electricity costs. Consumers use more of a commodity with price subsidies than when paying the full cost. The PCE program caps the amount of electricity a residential customer can use at 500 kWh per month in an effort to reduce overuse.

The price of fuel is already indirectly subsidized in rural communities. The Denali Commission tank farms, and AEA and RAFS fuel loans and training programs, all indirectly reduce the cost

of fuel by offering services and capital to fuel retailers below actual costs. The state could use a subsidy to directly reduce the cost of fuel in rural communities in any number of ways. The state could create a maximum price cap for fuel and pay the difference between actual cost and the desired price, or it could simply reduce the price of every gallon by a certain amount for all communities. Either method would distort market price signals; economic theory suggests people would purchase more fuel than economically efficient. A price cap would cause more price distortion than a fixed price reduction, as communities with the highest cost fuel would have no incentive to purchase less fuel than communities with cheaper fuel.

A price subsidy tends to be appealing to the affected communities (and their political leaders) because their residents no longer feel the "sting" of price signals. When people do not pay a price for fuel that is representative of the high cost of supplying it, they are not likely to complain about fuel prices, though the underlying problems of high costs and low incomes go unaddressed. A price subsidy is akin to treating the symptom instead of the disease.

Baseline Subsidy

A baseline subsidy, for lack of a better term, refers to the type of subsidy where a certain quantity of good necessary to basic survival is given free to households. The aim is to give the household a sufficient "survival" supply of the good. The Venezuelan state-owned oil company CITGO heating fuel program that gave 100 gallons of heating fuel to each household in rural Alaska in past winters is a good example of a baseline subsidy.

The state could duplicate this type of subsidy and purchase a number of gallons of heating fuel for each household in rural Alaska. Customers could purchase fuel and the retailer could simply bill the state for a set number of gallons for each customer. This would not likely result in significant over-use of fuel, as households would have to pay full price for all additional fuel. This type of subsidy would ensure that every household has a critical minimum amount of heating fuel, regardless of the household's income or the price of fuel.

Large amounts of fuel purchased by the state government would reduce incentives for local retailers and distributors to keep fuel prices low. Communities might actually have an incentive to increase the price of fuel, if the state were paying for a large share of it. If the retailer artificially increases the price per gallon by one dollar, then every gallon purchased by the state brings in one new dollar to the local economy. Anecdotal evidence exists that some communities may have increased the price of fuel in anticipation of CITGO purchasing fuel for residents. This increases the cost of the program for CITGO, but the increased costs results in increased new money in the community.

Income Subsidy

An income subsidy provides cash for households to purchase fuel. The federally funded Low Income Heating Assistance Program (LIHEAP) is an example of an income subsidy. The program provides a direct income transfer to low income households to assist with their heating costs. Beginning in the spring of 2008 the State of Alaska began to financially supplement and expand LIHEAP with the legislatively created Alaska Heating Assistance Program. The $1,200 "energy rebate" included in the 2008 Alaska Permanent Fund Dividend check is another example of an income subsidy. Though this was not tied to income and may have offset higher energy prices, it freed up income for "quality of life" purchases (such as

airline tickets to Hawaii) that some income groups might otherwise have needed for energy costs.

Economists generally prefer income subsidies over price subsidies, as they preserve price signals. That means households receiving the subsidy still have incentive to conserve heating fuel and purchase an economically efficient amount. Every dollar of assistance they do not spend on heating fuel, they are free to spend on something else, so they weight the value of additional heating fuel against the value of another good.

An income subsidy equal to a price or baseline subsidy increases the benefactors' sense of well-being the most, as they are still free to spend the money in the manner they feel is best. The price signal still stings when they purchase fuel, so while they are better off, they still feel that high fuel prices are a problem. An income subsidy only makes a person more able to pay for fuel. It does not ease the impact of spending $6.50 per gallon for fuel when they used to only pay $2.25, for example. Income subsidies are the most efficient way to solve the economic problem associated with high fuel costs and low incomes, but they are ineffective at alleviating the associated social and political pressure associated with high prices.

Regulation

As a result of the utility-like nature of fuel deliveries, there has been talk of price regulation for many years. Assuming the regulations were based on some approved rate of return on assets, there are a number of issues to be considered.

1. Competitive Forces Reduction. When prices are regulated there is less incentive for competitors to try to win market share. In fact, regulation over the last ten years would have likely cost consumers $90 million.[52]
2. Burden of Regulation. The entrance of Ruby Marine into the market illustrates that a small operator can overcome the barriers to entry. Complying with a regulated market is going to require specialized manpower and is going to favor the larger operators who can afford to hire these specialists.
3. Service Area Reduction. Currently, fuel companies serve unprofitable locations and try to make up the loss in other places. There is a chance regulation could result in fuel companies discontinuing unprofitable service to some locations. This would force these locations to fly in fuel at a much higher cost to the customer.
4. Efficiency Moral Hazard. Currently the fuel distribution companies are motivated to use the least amount of equipment to deliver the most amount of fuel. If their return is based on investment (assets) then a likely reaction will be to increase the number of assets. It would be nearly impossible to determine if a company was 'overinvesting' in delivery equipment.

Increasing Competition

There is typically only one tank farm in a community, so it is not uncommon to hear the assertion that competition is needed to reduce prices. An example of this occurred in Bethel during 2003. Yukon Fuel purchased the 10 million gallon facility from the local operator in 2000. The exact purchase amount is proprietary, but based on Denali Commission price

[52] The Western Alaska small delivery market is about 30 million gallons. The price was undervalued by about $0.30 per gallon. (30 million x $.3 x 10 years) per Charon and Smith.

guidelines the cost would be approximately $25 million. The market size was about 12 million gallons per year. The cost to run a facility this size is about $1.5 million per year. So the basic cost structure, excluding working capital and corporate overhead, would be:

$0.20/gallon Capital Costs ($25 million x 10% / 12 million gallons)
$0.13/gallon Operating Costs ($1.5 million / 12 million gallons)
$0.33/gallon Total

In 2003, Crowley built a new 5 million gallon tank farm. Using Denali Commission prices, this represents an investment of $12.5 million. Assuming Yukon Fuel could scale expenses by only 30%, its new operating costs would have been about $1 million per year. Assuming Crowley's smaller facility was a little less expensive to operate, operating expenses of $750,000 per year are assumed.

The new cost structure for the communities combined facilities was:

$0.31/gallon Capital Costs ($25 million+$12.5 million) x 10% /12 million gallons
$0.14/gallon Operating Costs ($1 million+$.750 million / 12 million gallons)
$0.45/gallon Total

Starting in 2003, prices to consumers at both tank farms began to increase over index costs. When costs and market size are fixed, adding capital into the marketplace may have the opposite effect as was the intention. This is especially true when costs are not linear but decline with size, as is the case with tank farms.

GLOSSARY OF TERMS

Diesel #1: Also known as DF1 or Jet A. Diesel #1 is commonly used as heating fuel throughout most of northern rural AK. Diesel #1 has a lower gel temperature than Diesel #2 which is sold for heating fuel in warmer climates. Diesel #1 is same fuel the refineries sell as Jet fuel (Jet A), and in many tank farms it is stored as Jet A until sold as DF1.

Diesel #2: Is commonly used throughout the US. In Alaska it is used for marine and highway diesel as well as heating fuel in warmer regions. Diesel #2 is preferred over #1 where it is warm enough as it has a higher energy content.

Distillate Fuel Oil: A generic name for a refined petroleum product. It can refer to diesel, heating fuel or jet fuel.

Economies of Scale: Economies of scale exist when the per unit cost decreases as the number of units increase. This is typically the result of large fixed costs that are independent of quantity. As the number of units are increased, the fixed costs are spread of more units, bring down the fixed cost per unit.

FIFO, or First In First Out: An inventory accounting technique which each addition to the existing stock of inventory retains the price it was purchased at when it is sold. The oldest inventory in stock is the first to sell.

Fixed Cost: A cost of doing business that does not increase as more business is done. For example, the lease a store pays does not increase if it sells more or less product.

Fuel Distributor: Transports fuel from refineries to fuel retail stores in Alaska communities. Some distributors actually own the fuel and resell it and others just act as a contracted transporter.

Fuel Hub: A community with a large storage capacity. Fuel is delivered to the fuel hub from the refinery on a linehaul barge. Smaller barges lift fuel from the fuel hub and distribute to communities in the region. The fuel can also be a called or serve as a fuel terminal.

Fuel Retailer: Fuel retailers sell fuel to final consumers. They can be gas stations, marine fuel docks or heating fuel deliverers.

Futures Contract: A futures contract is an agreement to purchase or sell fuel at a predetermined price. Futures contracts can be used to hedge against an undesirable change in the price of a commodity or to profit on speculation of future prices of a commodity.

Ice Free Coastal Alaska: The region along Alaska's southern coast. Ice Free Coastal Alaska communities have year round ice free ports and are not on the Alaska road system.

Independent Retailer: Independent retailers are retailers that are not owned by a fuel distributer, refiner or oil company. Independent retailers can either carry their own brand or carry the brand of a distributor.

Jobber: A fuel wholesaler that purchases fuel from wholesale racks and transports to third party retailers. A jobber may or may not own its own retail store.

LIFO, or Last In First Out: An inventory accounting technique which each addition to the existing stock of inventory retains the price it was purchased at when it is sold. The newest inventory in stock is the first to sell.

Lift: The act of purchasing fuel from a refinery. A lift date is the day the fuel was physically transferred from the refinery to the barge or fuel truck.

Lighter: To use smaller tugs and barges to transport fuel from linehaul barges or fuel terminals into smaller communities or shallow ports. The smaller barges are sometimes called the lighterage fleet.

Linehaul Barge: A large ocean going barge used to transport fuel in bulk from the refinery into a fuel hub. Linehaul barges are the largest barge in a fuel distributor's fleet and generally don't deliver fuel to communities that are not fuel hubs.

Market Share: The percent of total sales of a certain good that one seller supplies. When fuel retailers maintain steady price differences they often are able to also maintain steady market shares.

Naphtha: A generic name for a refined petroleum product. It is heavier than natural gas liquids but lighter than kerosene.

Natural Monopoly: In economics, a natural monopoly occurs when, due to the economies of scale of a particular industry, the maximum efficiency of production and distribution is realized through a single supplier. Electric utilities are a common example of a natural monopoly.

OPA 90 (Oil Pollution Act of 1990): A bill signed into law in response to the Exxon Valdez oil spill in Prince William Sound. OPA 90 mandates that all fuel shippers have spill response plans and that all single hull tankers and barges be fazed out by 2015.

OPIS (Oil Price Information Service): A for fee services that supplies information on wholesale rack prices for petroleum fuel.

Option Contract: An option contract gives the purchaser of a contract the right but not the obligation to purchase or sell a commodity at a particular price in the future. A purchaser of an option contract generally must pay a fee for the right to buy or sell at a predetermined price.

Platts: A provider of energy and energy price information.

Price Setter: A company with monopolistic supply with the power to set the price of a good in a market.

Rack Price: Price at which the majors and independent refineries sell branded or unbranded gasoline to jobber/wholesalers. It is related to the commodity spot price, but adjusted for transportation, overhead, and profit.

Refinery: A plant used to separate the various components present in crude oil and convert them into usable products or feedstock for other processes.

Spot Market: A market where commodities are sold for cash and delivered immediately.

Tank Farm: A collection of fuel tanks that store enough fuel to last a community between fuel deliveries.

Terminal: A large tank farm capable of handling a full linehaul barge full of fuel. Terminals often serve as a fuel hub for a region, storing fuel from a linehaul barge until a smaller barge can transport it to neighboring communities.

Vertically Integrated Company: A company that owns multiple links in the supply chain of an industry. An example is an oil company that owns refineries, distributors and retail stores. Since every link is owned by the same company the fuel never experiences a sale as it moves from the oil fields to the gas station.

Western Alaska: The area of Alaska that is not on the road system and without access to year round marine access due to seasonal icing. It includes North Aleutian villages beginning with Nelson Lagoon proceeding north along the coast to Kotzebue Sound. Also included are ports of call on tributary rivers, the most prominent being the Yukon and Kuskokwim.

Working Capital: The fuel owned by a distributor. The fuel ties up cash while the distributor waits to sell it. This cash could be used for other investments and while the cash is owned by the distributor it must earn a similar return. The result is increasing prices the longer a distributor must hold fuel before selling.

APPENDIX A. RESULTS OF COMMUNITY FUEL PRICE SURVEY JANUARY 2010

Rural communities across Alaska continue to face high fuel prices. People in these remote, cold places need large quantities of fuel for heat, electricity, and transportation. The estimated household cost for energy in remote rural Alaska increased significantly since 2000—increasing from approximately 16% of total household income in 2000 to 47% in 2008 for the lowest income rural households. Compared to Anchorage, energy costs are a higher portion of income for all income levels in remote rural Alaska.[53] High energy costs exacerbate the issues of a shortage of cash paying jobs, limited local economic bases, and local governments struggling to provide basic services to residents and businesses.[54] Even though the crude oil components of the retail price for fuel were generally lower in 2009, rural communities continue to pay higher prices for fuel. Of the eleven[55] communities surveyed for this report, six communities paid the same or higher prices for fuel; only in five communities fuel prices decreased.

Transportation costs are a critical factor affecting fuel prices in Alaska rural communities. Fuel sold in these communities is transported by air, barge, truck or a combination of these methods which increase the price as many communities must purchase their fuel prior to "freeze up" in the cold winter months in order to allow time for delivery to remote villages. Other factors affecting fuel prices are limited and costly storage, small market size and financing costs associated with holding large inventories.

The surveyed communities are:

1. Alatna/Allakaket[3]
2. Angoon
3. Bethel
4. Chitina
5. False Pass
6. Fort Yukon
7. Lime Village
8. Mountain Village
9. Unalakleet
10. Yakutat

In the previous editions of this report, Alatna and Allakaket were treated as one community because they are very similar, fuel for both communities is delivered to Allakaket, and retail fuel prices were generally the same. As we continue to identify more of the components of fuel

[54] Division of Advocacy – Report to the Commissioner. January 2007. *Current Community Conditions – Fuel Prices across Alaska Fall – Winter 2006 Update.*

[55] We surveyed the same communities as in the previous studies but this time surveyed Alatna and Allakaket separately.

prices some differences in their price structure have become more apparent. Therefore, in this report they appear in the same section but we have identified some of the differences. At the end of this section updated methodology information is included.

Figure 1. Map of Eleven Case Study Communities

The major findings of the third round of community surveys are:

- Increases in fuel prices persisted from January 2009 to January 2010 despite the lower cost of crude oil during most of 2009.
- Fuel prices in rural Alaska vary. We surveyed the same communities as in the previous studies but this time surveyed Alatna and Allakaket separately.
- Fuel prices vary significantly and are inconsistent across communities at the retail level.
- Some communities have much larger retail price mark ups than others.
- For some communities delivery costs and retail markup are very large portion of the fuel price.
- Availability and reliability of local information remains a challenge.
- A general sentiment in these communities towards their fuel cost situation is frustration, as they have limited options to cope with high fuel prices.

From January 2009 (date of last update) to January 2010, crude oil prices decreased on average 37%. Refinery gate prices in Anchorage[56] increased 13% for gasoline and decreased 7% for diesel for heating (DF#1). In Anacortes,[57] refinery gate prices decreased 7% for gasoline and 54% for diesel for heating (Ultra Low Sulfur, DF#1). On average across the surveyed communities, retail prices for gasoline decreased 6% and diesel for heating decreased 13%. Nonetheless, only five of eleven communities paid lower prices for gasoline and diesel for heating (DF#1).

In January 2010, retail prices in rural communities vary significantly. Alatna and Allakaket paid the highest price for gasoline and diesel for heating (DF#1) at $7 and $6.50 per gallon, respectively. Chitina paid the lowest price for gasoline at $3.80 per gallon, and False Pass paid the lowest price for diesel for heating (DF#1) at $3.45 per gallon. Most of the key factors affecting delivered fuel prices have been identified; however these factors do not fully explain variations in retail fuel prices in rural Alaska communities. For instance between January 2009 and January 2010, in Alatna the crude oil and refining components decrease from 35% to 30% for gasoline and retail price remain the same. The diesel for heating price also remained despite the crude oil and refining components increasing from 35% to 52%.

Obtaining local data from these communities continues to be difficult. We called repeatedly and sometimes were never able to contact the most knowledgeable person—this is especially true in publicly owned and operated fuel outlets. Some communities do not seem to systematically track their fuel sales and inventories. The willingness to share information that is available also varies. Some communities are willing to share their information in an effort to educate the public of their situation. Others are reluctant to give any information because they feel nothing can be done to remedy the high prices or that the information is proprietary. Because of these challenges, the information used for the communities' analysis was gathered from varied sources such as distributors, governmental offices and retailers. Despite these limitations, in the following pages we provide a detailed description of the eleven communities surveyed.

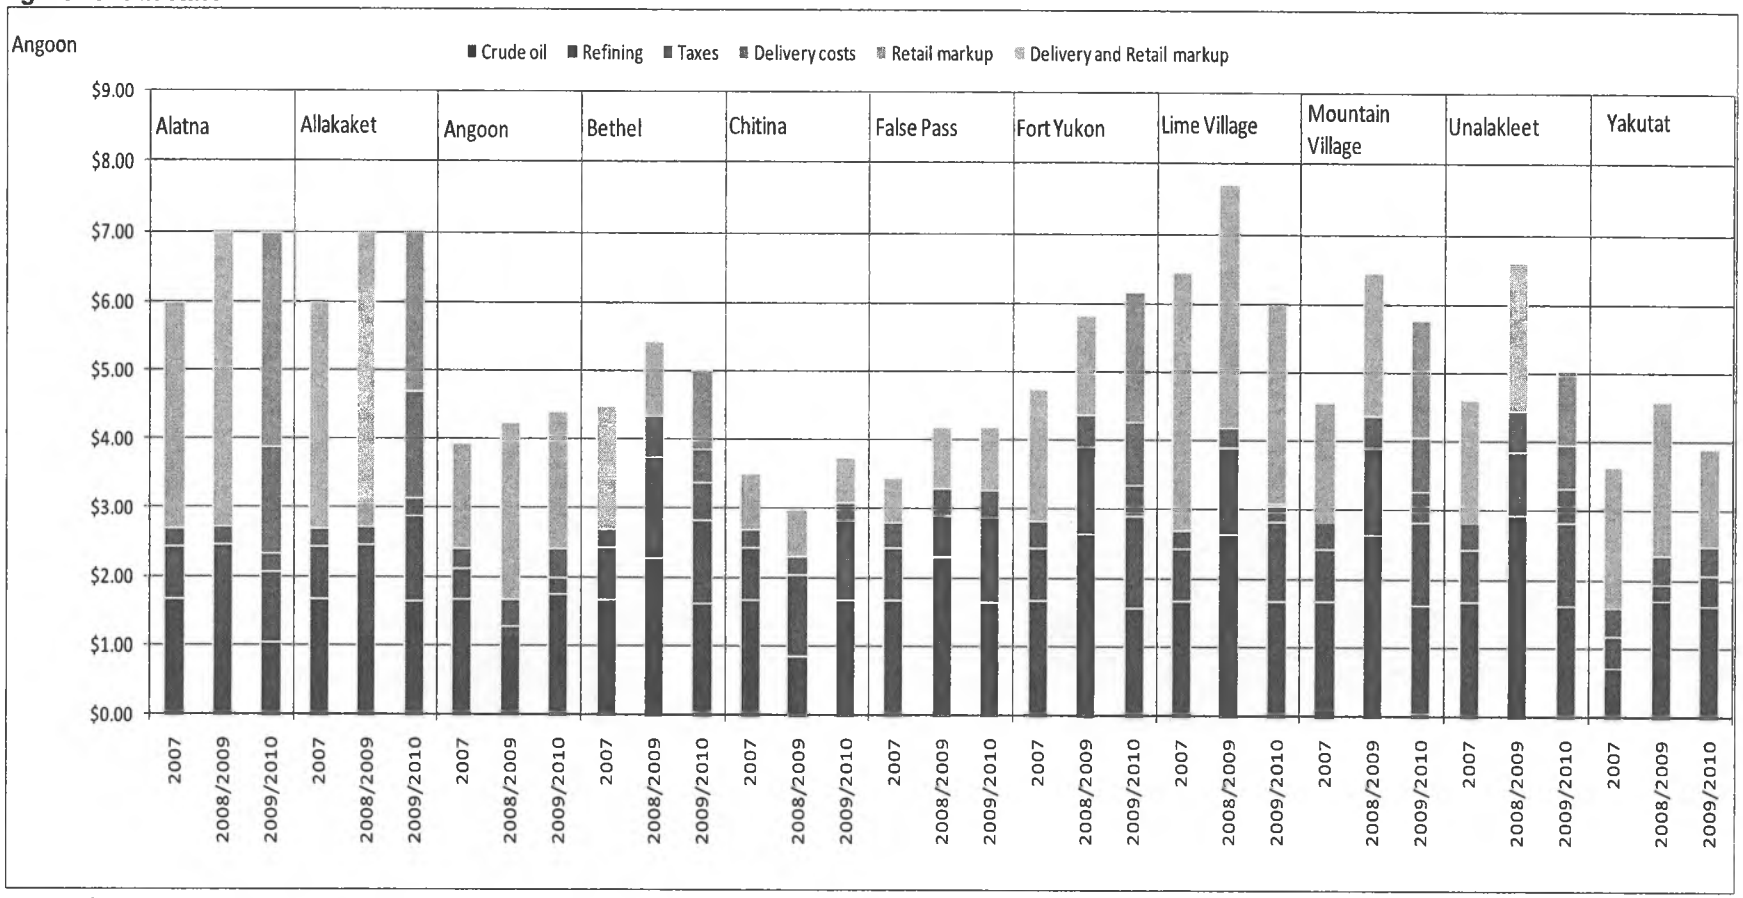

Table 1 provides a summary matrix of the factors affecting fuel prices in the eleven case study communities. The table includes previous and current prices of fuel (gasoline, diesel for heating (DF) #1 and diesel fuel #2) as well as updated local tax and recent delivery information. Unless otherwise noted, other data are from the original 2007 study and the January 2009 update and has not been updated. Figures 2 and 3 provide summary comparisons of fuel prices in 2007, 2008/2009 and 2009/2010. These figures are followed by community summaries and figures.

[56] Estimate using Anchorage refinery gate prices. The "refining" component is calculated as the difference between the OPIS wholesale rack price and the EIA reported U.S. crude price.
[57] Estimate using Anacortes refinery gate prices (calculated as described in footnote 1)

Alatna/Allakaket

The neighbor communities of Allakaket and Alatna are located in northern Alaska, above the Arctic Circle, across from each other on the Koyukuk River. Alatna has a population[1] of 22 and Allakaket of 137. Both communities receive their fuel by airplane (from Fairbanks), because fuel barges cannot navigate the upper Koyukuk River. Fuel is trucked from Allakaket to Alatna when the river is frozen.

In November 2007, gasoline retailed for $6.00 per gallon and diesel for heating (DF #1) was $5.50 per gallon in Alatna and Allakaket. In January 2009, gasoline retailed for $7.00 per gallon for both communities and diesel for heating (DF#1) was $6.50 per gallon for Alatna. In January 2010, the price of gasoline and diesel for heating remained at the same price of $7.00 and $6.50 per gallon, respectively in both communities. There is no local sales tax in either community. Several factors tend to increase or ameliorate the "other" components of prices in these locations:

Increasing factors:

- Only method of transportation is by air. The communities no longer purchase their fuel from Everts Air. Therefore, there is only one supplier of fuel, Brooks Fuel Inc. that delivers fuel to these communities.
- Due to the small populations, delivered quantities are small hence the delivery charge is spread across fewer gallons, raising the price per gallon.
- Barriers to entry in air transportation are low compared with those in barging allowing potential for competition. However, competition is hindered by the small village's purchasing power and the lack of supplier interest.
- Alatna gets fuel about six times a year and only when the river is frozen. Allakaket receives fuel about once a month year round. The last shipment of fuel to Alatna was April 2009 and to Allakaket was November 2009.

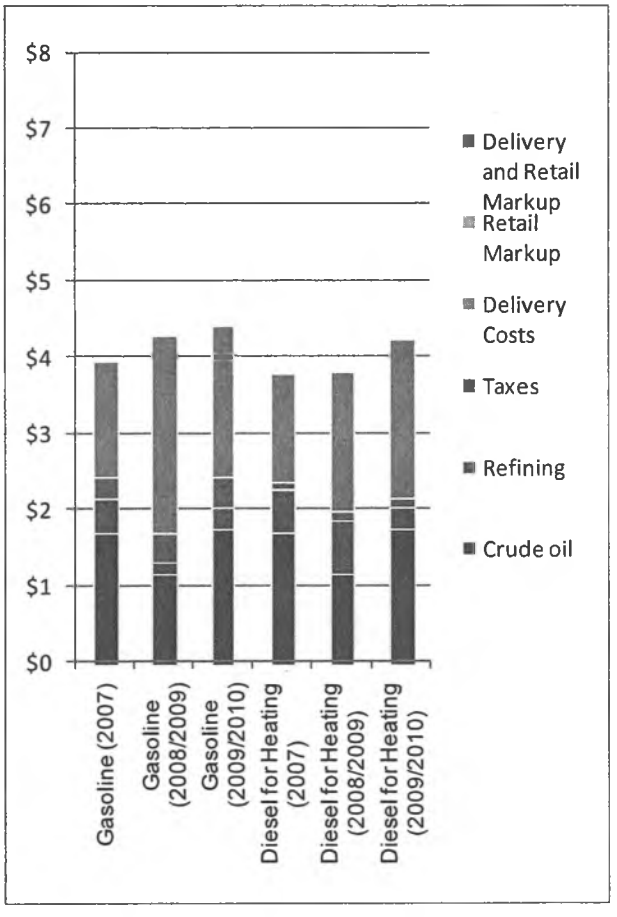
Ambivalent factors:

- In Alatna fuel is sold by the Village Council. In Allakaket, fuel is sold by the city government.
- Alatna's storage capacity is about 20,000 gallons and the tanks are located in Allakaket; but this does not seem to be a constraint on deliveries, because the quantity delivered in 2009 was 18,000 gallons. Allakaket received about 36, 000 gallons of fuel in 2009.

Crude oil prices were significantly higher during fall 2007 accounting for $1.70 of the final retail refined product price as compared to $1.16 in November 2008—a $0.54 or 32% decline per gallon. Despite this decline in crude oil prices, the price of gasoline increased $1.00 or 17% per gallon and diesel #1 increased $1.00 or 18% per gallon. By fall 2009, crude oil price decrease for Alatna to $1.06 or 9%; and for Allakaket crude oil price increase $1.67 or 44%, but retail prices for both gasoline and diesel for heating remain the same as in November 2008, $7.00 and $6.50 respectively at both communities.

Angoon

Angoon is located on Admiralty Island in Southeast Alaska, southwest of Juneau. Angoon has a current population of 442; the population has decreased over the past few years. Fuel is barged to Angoon by Petro Marine.



In November 2007, gasoline retailed for $3.96 per gallon and heating oil (DF #1) for $3.79 per gallon. In January 2009, gasoline retailed for $4.27 per gallon and diesel for heating (DF #1) for $3.82. In January 2010, prices continue to increase; gasoline retailed for $4.42 and diesel for heating (DF#1) for $4.22. Angoon has a local tax of 3% that is not included in these cited fuel prices. Factors tending to increase or ameliorate these "other" costs include:

Ambivalent factors:

- Only fuel delivery method is by barge from Petro Marine about every three weeks. Most recent shipment was January, 2010.
- Fuel is sold in the community by a private entity, Angoon Oil and Gas.

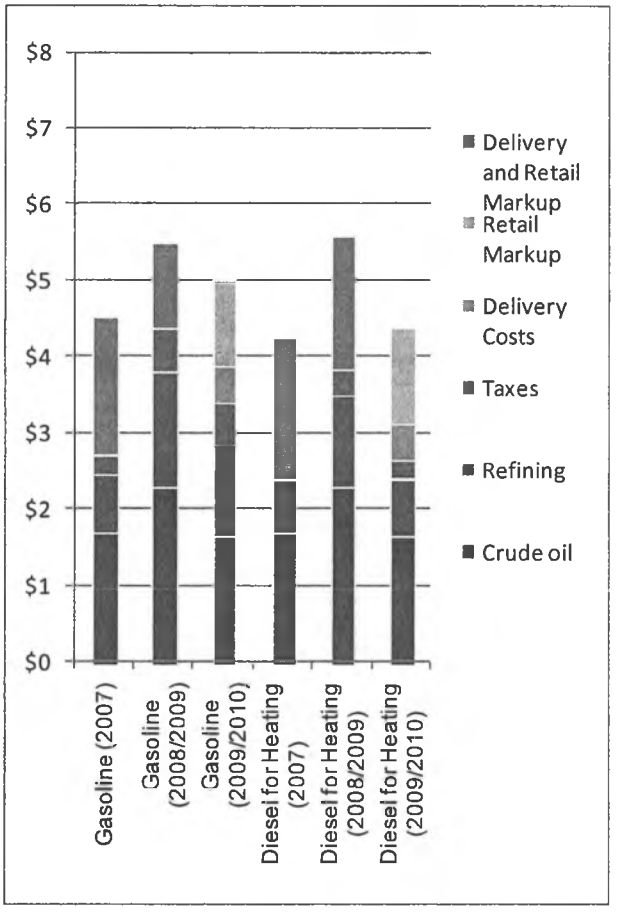
Decreasing factors:

- Ice-free port in Southeast Alaska, roughly 900 miles from both Anacortes and Anchorage.
- Fuel can be delivered any time; typically there are eight deliveries per year.
- Tlingit/Haida Energy program is helping to provide fuel in community.

Crude oil prices were significantly higher during fall 2007, accounting for $1.70 of the final retail refined product price as compared to $1.16 in December 2008—a $0.54 or 32% decline per gallon. By November 2009, crude oil prices increased above September 2007 levels by $0.61 or 53% per gallon. Despite the crude oil price decline between fall 2007 and December 2008, gasoline prices in January 2009 were $0.31 or 8% per gallon higher than fall 2007.One year later, in January 2010, gasoline price declined $0.15 or 3.5% per gallon. Diesel #1 increased $0.03 or less than a 1% between November 2007 and January 2009 and $0.40 or $11% by January 2010.

Bethel

Bethel is located at the mouth of the Kuskokwim River and has a population of 5,803. All fuel for Bethel is barged on the Kuskokwim River. It is a regional fuel distribution hub with a storage capacity of almost 15 million gallons.



In November 2007, gasoline retailed for $4.52 per gallon and diesel for heating (DF #1) for $4.25 per gallon. In January 2009, gasoline retailed for $5.48 per gallon and diesel for heating (DF #1) for $5.58 per gallon. In January 2010, retail prices decreased to $5.03 for gasoline and $$4.37 for diesel for heating. Bethel has a 6% sales tax that is included in the price of fuel. Factors affecting the costs include:

Increasing factors:

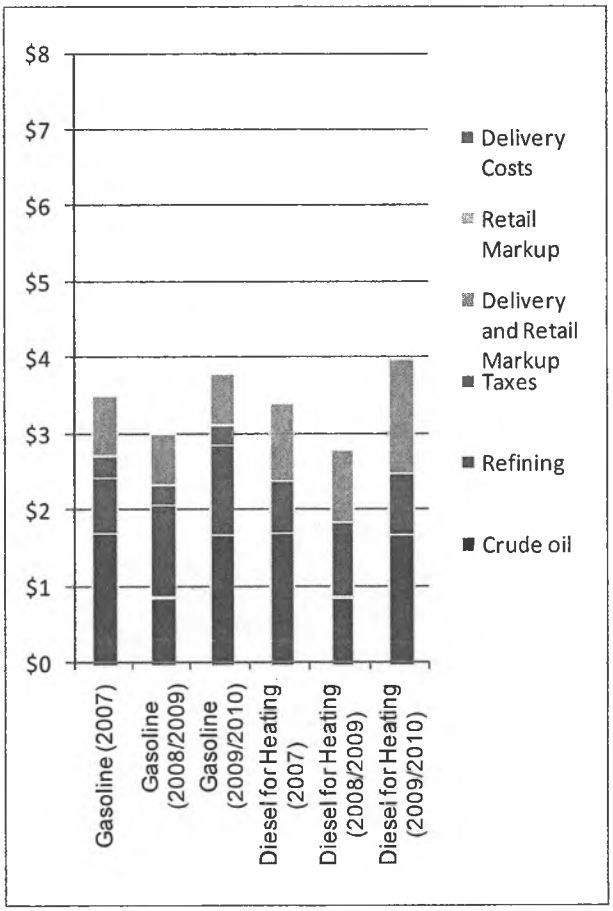
- Port and river both freeze in winter.

Ambivalent factors:

- Large fuel hub community and large storage facility owned by Crowley Marine Services. Costs for Bethel are spread across more gallons because of its status as a fuel hub. We do not know what portions of fuel stored in the community is distributed to other regional communities versus goes to Bethel residents.
- Can receive multiple shipments per year about 6 to 8 from May to September/October when the river is not frozen. The most recent fuel delivery was September 2009.

In contrast to Alatna, Allakaket and Angoon, Bethel's October 2008 fuel delivery coincided with higher crude oil prices as compared to fall 2007. The estimated September 2008 crude oil component of final retail fuel prices was $2.31 as compared with $1.70 per gallon, a $0.61 or 36% increase. In addition, the September 2008 refinery gate fuel price was $0.74 per gallon higher on gasoline and $0.52 per gallon higher on diesel for heating than in fall 2007. In August 2009, crude oil prices decreased $0.66 or 28.5% compared to September 2008. The price per gallon of gasoline increased $0.96 or 21% than fall 2007. It later decreased $0.45 or 8% in August 2009. Diesel for heating increased by $1.33 per gallon or 31%, higher than fall 2007. It then decreased by $1.21 or 22% in August 2009.

Chitina



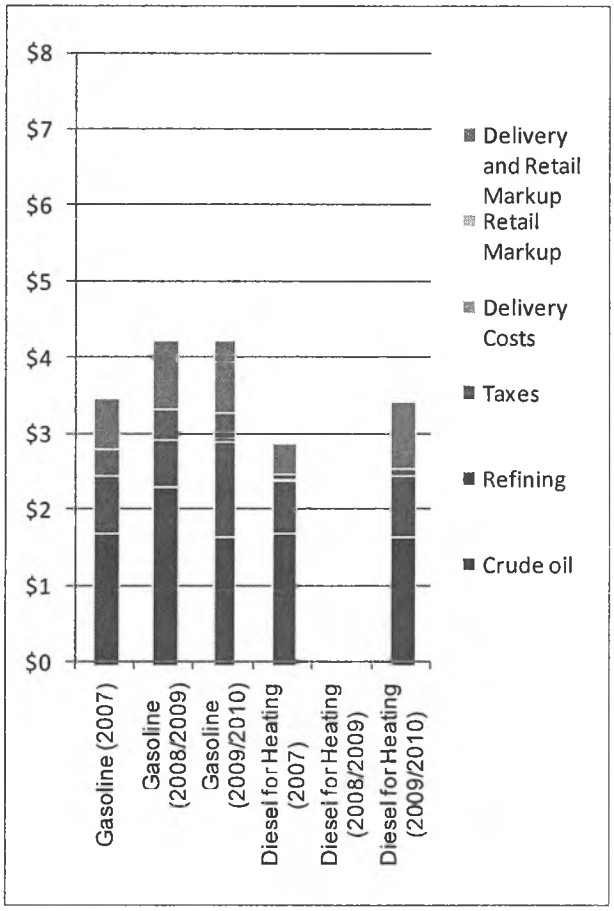
Chitina is on the road system in Southcentral Alaska. Chitina and has a population of 117. All fuel in Chitina is transported by road from Anchorage via Glenallen.

Gasoline retailed for $3.52 per gallon and diesel for heating (DF #1) was $3.41 per gallon in November 2007. The price in January 2009 for gasoline was $3.03 per gallon and $2.79 per gallon for heating fuel (DF #1). One year later, in January 2010, the retail price for gasoline increased to $3.80 and for heating fuel to $3.99 per gallon. Chitina does not have a local tax. Various factors tend to increase or decrease the "other costs" components:

Decreasing factors:

- On the road system only 247 miles from Anchorage.
- Can receive fuel any time; not weather dependent. Fuel comes by truck. The most recent fuel delivery was January 2010.

Similar to Angoon, Chitina had fuel deliveries in January 2009 when crude oil prices had dropped. Crude oil prices were significantly higher during fall 2007 accounting for $1.70 of the final retail refined product price as compared to $0.88 in December 2008—a $0.82 or 48% decline per gallon. In January 2010, crude oil prices increased 92% to September 2007 levels of $1.69 per gallon. The retail price of gasoline decreased $0.49 or 14% from November 2007 to January 2009. It rose by $0.77 or 25% per gallon in January 2010. The price of diesel for heating (DF #1) declined $0.62 or 18% from November 2007 to January 2009, and it significantly increased $1.20 or 43% per gallon for heating fuel by January 2010.



False Pass

False Pass is on Unimak Island in the Aleutian Chain. It has a year-round population of about 41, the population increases when fishermen and fish processors arrive for the fishing season. All fuel for False Pass is barged.

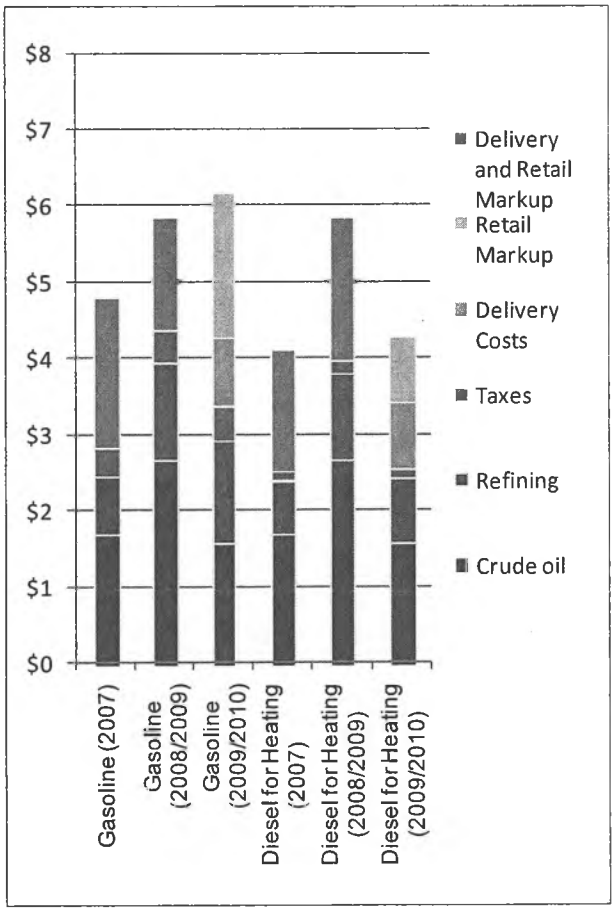
In November 2007, gasoline retailed for $3.49 per gallon and fuel oil (DF #2) for $2.85 per gallon. In January 2009, gasoline retailed for $4.23 per gallon and fuel oil (DF#2) for $4.18 per gallon. In October 2009, retail price for gasoline continues to be $4.23 per gallon and fuel oil (DF#2) decreased to $2.70. The community has a 3% sales tax that is not included in the fuel price. Several factors tend to increase or hold down costs:

Decreasing factors:

- Only receives one delivery per year but has a large storage capacity to serve many commercial fisherman and fish processors in the area.
- Storage facility is owned by Peter Pan Seafood. Large throughput due to fishing fleet and location near multiple fishing grounds.
- Fuel is sold by a private entity, Peter Pan Seafoods.
- Can only receive fuel directly from linehaul barge.
- Ice-free port.
- Relatively close to large ports (Dutch Harbor and Anchorage).
- Small marine distance from larger facilities.

Most recent delivery was November 2009. The April 2008 delivery was prior to the July peak in crude oil prices but still higher than fall 2007 when the crude oil component of delivered fuel prices was an estimated $1.70 rather than the March 2008 $2.33, a $0.63 per gallon or 37% increase. The price of gasoline increased $0.74 per gallon or 21%; fuel oil (DF #2) increased $1.33 per gallon or 47%. Compared to the other communities surveyed, the fall 2007 False Pass diesel fuel price was a comparatively low price. In October 2009, crude oil prices decreased $0.66 or 28% per gallon since March 2008, and there was no change in retail price for gasoline and a $1.48 or 35% decrease per gallon on fuel oil (DF#2).

Fort Yukon



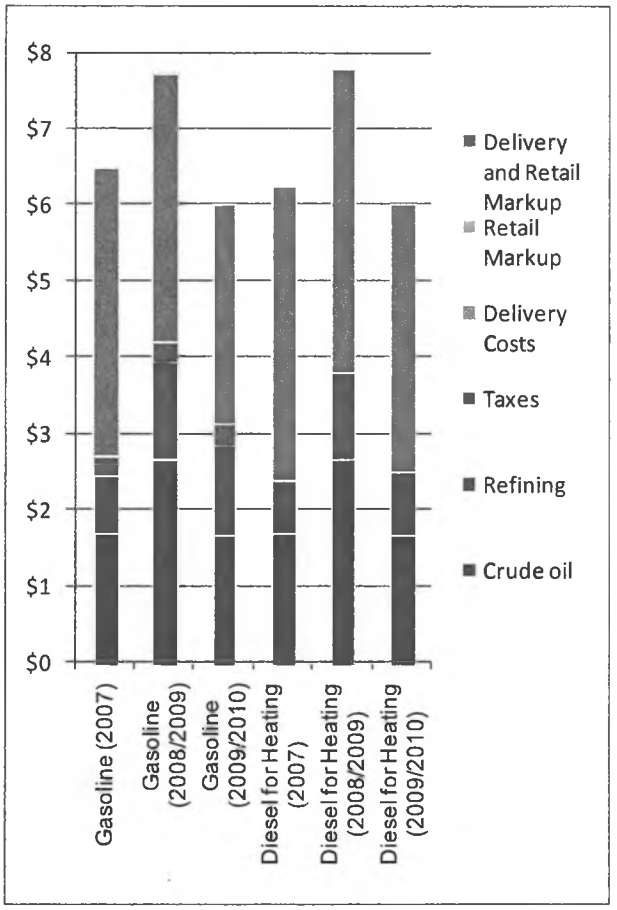
Fort Yukon is on the upper Yukon River northeast of Fairbanks and has a population of 585. All fuel for Fort Yukon is barged upriver from Nenana by Crowley Marine Services. Ruby Marine also services this area of the river.

Gasoline retailed for $4.79 per gallon and heating fuel (DF #1) for $4.12 per gallon in November 2007. In January 2009, gasoline retailed for $5.85 per gallon and heating fuel (DF #1) for $5.87 per gallon. In January 2010, gasoline retailed for $6.18 and heating fuel (DF#1) for $4.29. The community has a 3% tax not included in the price of fuel. Costs can largely be attributed to several factors:

Increasing factors:

- River and port freeze up during winter.
- Fuel barged 400 river miles upriver from Nenana.

Fort Yukon's estimated most recent fuel delivery was October 2009. In August 2008, crude oil prices accounted for $2.67 per gallon of refined fuel prices as compared to $1.70 in fall 2007—a $0.97 per gallon or 57% increase. By September 2009, the crude oil price had significantly decrease to $1.59 – a $1.08 or 40% less than in August 2008. In January 2009, the price of gasoline was $1.06 per gallon higher or 22% higher and diesel for heating #1 was $1.75 per gallon or 42.5% higher than in November 2007. In January 2010, retail price for gasoline increased $0.33 or 6% and diesel for heating #1 decreased $1.58 or 27%.



Lime Village

Lime Village is on the Stony River in the Kuskokwim Delta of western Alaska. It has an estimated total population of 19; the population has declined over the past few years due to lack of jobs and the school closing. All fuel for Lime Village is delivered by air.

In November 2007, gasoline retailed for $6.50 per gallon and fuel for heating (DF #1) for $6.25 per gallon. In January 2009, gasoline retailed for $7.75 per gallon and fuel for heating (DF #1) for $7.80 per gallon. In January 2010, both gasoline and diesel for heating prices decrease to $6.00 per gallon each. The community does not have a local tax. Several things account for these costs:

Increasing factors:

- All fuel has to come by air, because barges cannot navigate the Stony River to Lime Village
- Very short runway for airplanes; can only handle small shipments per trip.
- Fuel was barged from Bethel to Sleetmute and then transferred to planes for delivery to Lime Village. Most recently, Sound Aviation delivers fuel purchased in the retail Anchorage market. In an effort to keep transportation cost to a minimum fuel is only delivered when Lime Village residents are flying to and from Anchorage.
- Storage facility is publicly owned, but is very small (only 1,800 gallon capacity for the community).
- Small population means delivery charges are spread over fewer gallons. Each fuel shipment is between 150 and 200 gallons. The community's diminish purchasing power has caused them to be without fuel for periods of time.

Ambivalent factors:

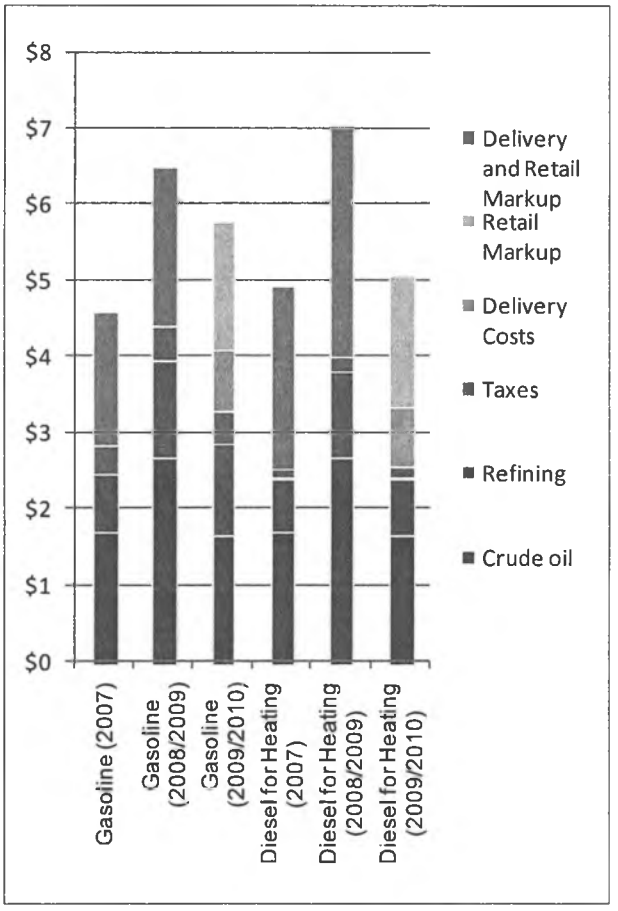
- Fuel is sold by the Traditional Council.
- Can receive fuel shipments any time of the year. It receives about 6 to 8 shipments of fuel per year.

Lime Village's most recent fuel delivery was January 2010. Crude oil component of fuel prices increased from $1.70 in fall 2007 to $2.67 per gallon in August 2008, a $0.97 per gallon or 57% increase. In December 2009, crude oil prices decrease to $0.98 or 38%. Gasoline prices increased $1.25 per gallon or 19% from November 2007 to January 2009 and decreased $1.75 or 22.5% per gallon in January 2010. Similarly, the price of diesel for heating #1 increased $1.55 per gallon or 25% from November 2007 to January 2009 and later decrease to $1.80 or 23% in January 2010.

Mountain Village

Mountain Village is on the Yukon River in Northwest Alaska, close to Norton Sound and the Bering Sea. About 782 people live there. Most fuel for Mountain Village is barged down the Yukon River from Nenana, but occasionally deliveries are lightered from ocean-going vessels at the mouth of the Yukon and shipped upstream.

In November 2007 gasoline retailed for $4.60 per gallon and diesel for heating (DF #1) for $4.92 per gallon. In January 2009, gasoline retailed for $6.50 per gallon and diesel for heating (DF #1) for $7.02 per gallon. In January 2010, retail price for gasoline was $5.79 per gallon and diesel for heating (DF#1) for $5.07. The community has a 3% tax that is not included in the fuel price. Several things tend to influence costs:



Increasing factors:

- Can only deliver during times of the year when river is not frozen. Mountain Village receives fuel two times a year, once in the spring and once in the fall.
- Fuel has to be transported in a shallow draft barge; Nenana is main hub port, roughly 1,200 miles upriver.

Ambivalent factors:

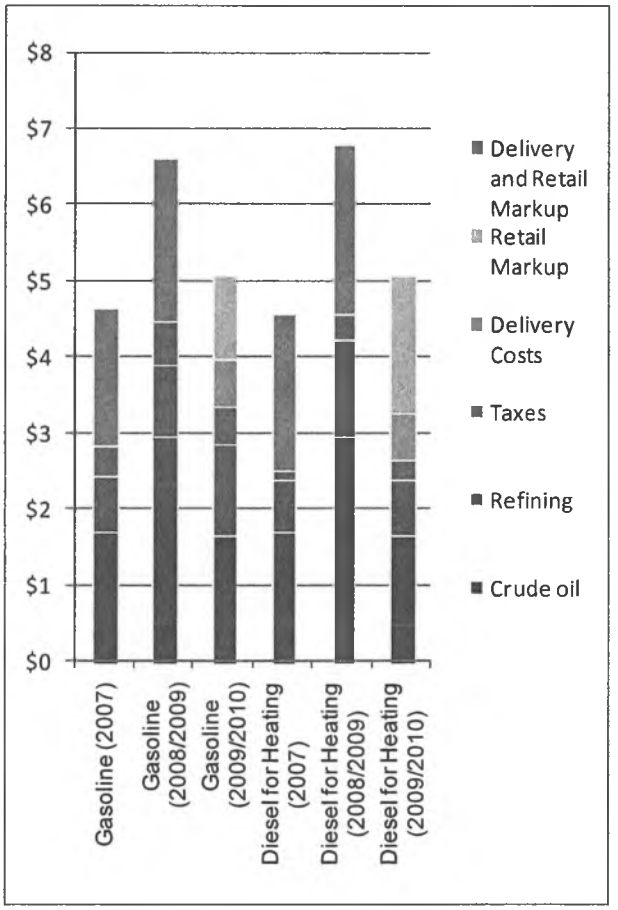
- Fuel is sold by the city government.
- Publicly-owned storage facility, with a capacity of 200,000 gallons.

Mountain Village received its most recent fuel delivery in September 2009.In August 2008, crude oil prices accounted for about $2.67 per gallon of refined fuel prices as compared to $1.70 in fall 2007—a $0.97 per gallon or 57% increase. Crude oil prices then decreased $1.02 or 38% per gallon in August 2009. In January 2009 the price of gasoline was $1.90 per gallon or 40% higher than in November 2007.It later decreased $0.71 or 11%. For diesel for heating (DF #1), the price increased $2.10 or 43% from November 2007 to January 2009. It later decreased $1.95 or 28% per gallon in January 2010.

Unalakleet

Unalakleet is in northwestern Alaska, on Norton Sound. Unalakleet has an estimated population of 725 residents. All fuel is first barged to Nome in a line-haul vessel and then transported to Unalakleet in a shallow draft lighterage vessel.

Gasoline retailed for $4.65 per gallon and fuel oil (DF #2) for $4.58 per gallon in November 2007. In January 2009, gasoline retailed for $6.64 per gallon and fuel oil (DF #2) for $6.81 per gallon. In January 2010, retail prices decreased to $5.07 per gallon for both gasoline and fuel oil (DF#2). The community has a 5% tax included in the price of fuel. Several things tend to add to or hold down those other costs:



Increasing factors:

- Norton Sound freezes in winter; deliveries only during ice-free months.
- Barge is the only method of fuel delivery.
- Fuel is transported from Nome in a lighterage vessel and pumped directly to a storage facility.
- Community receives three or more shipments per year during ice-free months.
- Publicly-owned storage facility with a capacity of 420,000 gallons.

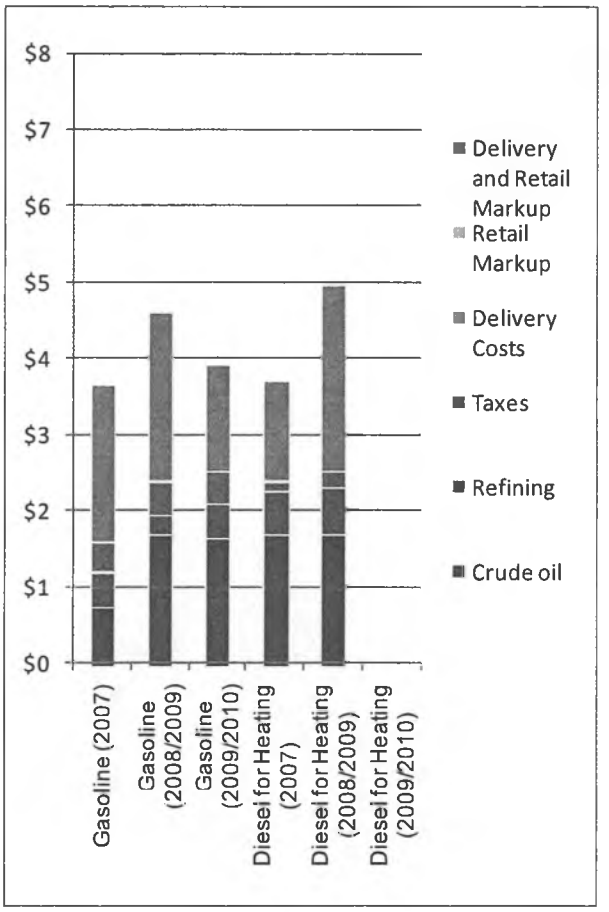
Ambivalent factors:

- Fuel is sold by Unalakleet Native Corporation.

Most recent delivery was September 2009.
In June 2008, the crude oil component of fuel prices reached $2.96 per gallon as compared to $1.70 in fall 2007, a $1.26 or 74% increase. In August 2009, the crude oil price decreased $1.31 or 44% per gallon. Gasoline prices increased $1.99 or 43% per gallon between November 2007 and January 2009. The retail price of gasoline decreased $1.57 or 24% per gallon by January 2010. Diesel #2 increased $2.23 or 47% per gallon between November 2007 and January 2009; its price later decrease about $1.74 or 26% per gallon by January 2010.

Yakutat

Yakutat is in Southeast Alaska, on the Gulf of Alaska north of the capital city of Juneau. Yakutat has an estimated population of 608 residents. All fuel is barged to Yakutat by Delta Western, which also owns a 6.5 million gallon storage facility in the community.



In November 2007, gasoline retailed for $3.67 per gallon and fuel for heating (DF #1) for $3.72 per gallon. In January 2009, gasoline retailed for $4.64 per gallon, diesel for heating (DF #1) for $4.98 per gallon and fuel oil (DF#2) was $4.85 per gallon. In January 2010, retail price for gasoline was $3.94 per gallon, and fuel oil (DF#2) was $4.29 per gallon. The community has a 4% tax included in the price of fuel. Aspects that influence the "other costs" of fuel prices are:

Ambivalent factors:

- Fuel is sold by the Village Council.

Decreasing factors:

- Fuel transportation method is by barge, but no river barging is required and Yakutat can receive shipments from either Anchorage or Seattle, allowing for more potential fuel sources and thus, competition.
- Ice-free port allows year-round fuel deliveries.
- Large storage facility maintained by one transportation company. Large volume of fuel throughput due to Alaska Airlines' twice daily service to the community.
- Deeper harbor accessible by larger shipments.

Yakutat's most recent fuel delivery was in October 2009. Crude oil prices accounted for $1.70 of the final retail refined product price as compared to $1.72 in December 2008. In August 2009, crude oil prices had decreased by $0.07 or 4% per gallon. From November 2007 to January 2009 retail prices for gasoline increased 0.97 or 26% per gallon, and by January 2010 prices decreased $0.70 or 15% per gallon. Between November 2007 and January 2009 heating fuel (DF#1) increased $1.26 or 34% per gallon. And between January 2009 and January 2010 the price for fuel oil (DF#2) increased $0.43 or 37% per gallon.

Method

Data on the price of fuel and the components of that price were collected for the ten communities in November 2007. In January 2009 a second update on fuel price data was collected for the ten communities that confirmed many of the characteristics of fuel purchases and sales remained the same as in fall 2007, and recorded any significant changes. In this third update, fuel price data was collected between the November 2009 and January 2010. The methods and questions about fuel prices used were the same for the November 2007 and January 2009 update. In this January 2010 update, in order to provide a more accurate portrayal of these communities part of the methodology has been refined but remained consistent with the previous reports. The first report on the components of delivered fuel costs in Alaska released in June 2008 can be viewed on the ISER webpage: (http://www.iser.uaa.alaska.edu/Publications/Finalfuelpricedelivered.pdf). And the second update released in January 2009 can be viewed at (http://www.iser.uaa.alaska.edu/Publications/fuelpricedeliveredupdate.pdf).A research summary with interactive maps and maps of fuel delivery to each study community can be viewed at: http://www.iser.uaa.alaska.edu/Home/ResearchAreas/fuelcosts2.html

In the November 2007 analysis, crude oil and refinery gate prices were relatively stable and communities had received their winter fuel supplies. As a result, we did not ask for specific fuel delivery dates for each community. Given the dramatic escalation of crude oil prices peaking in July 2008 (~$140/ barrel) and the crash in prices over the fall (~$34 in January 2009), the timing of when communities ordered and received fuel and how they priced remaining inventories most likely had a significant impact on retail prices. However, most of the survey respondents did not have sufficient information on these details. Given the variability in both delivery timings and rapidly changing prices, for the January 2009 update we recorded the most recent fuel delivery date and collected crude oil and refinery gate prices for that month. While we did not know community fuel tank inventories at the time of delivery or the lags between orders and deliveries among the communities, this simple approach attempts to determine the extent to which rapidly changing crude oil and refinery gate prices affect delivered retail fuel prices. For this January 2010 update, we used the same methodology of recording the disclosed most recent delivery and arbitrarily lagged crude oil and refining cost one month to allow for differences in pricing between delivery and ordering and transportation. Angoon and Yakutat were lagged two months as supported by our findings.

We also used different data sources for crude oil and refinery rack wholesale prices. In the initial report, we used Refiner Acquisition Cost of Crude Oil for PADD 5 (West Coast), and Refiner Petroleum Product Prices by Sales Type, Sales for Resale, Alaska, both from the U.S. Energy Information Administration. However, these data series at the time of writing for the January 2009 were complete only through October, 2008. Therefore, we used the best available data available through January 2009: weekly spot prices for U.S. crude oil from EIA, and wholesale rack prices for Anchorage from the Oil Price Information Service. For consistency, we changed the 2007 numbers in the matrix and charts to use the same datasets. We believe this approach allows for a fair comparison of figures for 2007 to the same data for 2008/2009. In this update we continued to use the same methodology: weekly spot prices for U.S. crude oil from EIA, and wholesale rack prices for Anchorage and Anacortes from the Oil Price

Information Service. A notable change is that because Angoon and Yakutat have the unique ability to purchase fuel from Anacortes, for this report we use the Anacortes ultra low sulfur #1 and #2 refining cost estimates from the Oil Price Information Service (all three years have been updated to reflect this change).

LEGISLATIVE RESEARCH REPORT

APRIL 11, 2011

REPORT NUMBER 11.262

CRUDE OIL AND RETAIL HEATING FUEL PRICES IN ALASKA

PREPARED FOR SENATOR JOE PASKVAN

BY CHUCK BURNHAM, LEGISLATIVE ANALYST

CRUDE OIL AND RETAIL FUEL OIL PRICES IN ALASKA 2

Table 1: Monthly Average Price Comparison: Alaska North Slope Crude, NYMEX Light Sweet Crude, and Alaska Number 2 Distillate Retail, January 2004-March 2011 4

Figure 1: Comparison of Price Changes for ANS Spot, NYMEX Light Sweet, and Alaska Fuel Oil, January 2004-March 2011 7

FUEL OIL USE IN ALASKA 8

Table 2: Household Heating Oil Use and Estimated Consumption in Alaska, 2009 9

You asked us to update a previous report by this agency on the price history for crude oil commodities and retail heating oil prices in Alaska. Specifically, for the period beginning January 2004 through the present, you wanted a comparison of monthly average prices for Alaska North Slope (ANS) crude oil, "light sweet" crude oil traded on the New York Mercantile Exchange (NYMEX), and retail heating oil in the City of Fairbanks. You also asked what volume of home heating oil is sold in the interior, rural, and statewide areas of Alaska.[1]

To the extent that specific data are available, we present the information you requested below. Unfortunately, we were unable to locate a source for monthly average residential heating oil prices in

[1] Our most recent previous report on this topic, LRS Report 09.136, is available online at *http://archives2.legis.state.ak.us/PublicImageServer.cgi?lra/2009/09-136m.pdf.*

Fairbanks.[2] Instead, we discuss the Alaska statewide monthly average prices for "Number 2 distillate," which is a grade of fuel oil commonly used for residential heating purposes.[3]

Briefly, our updated research generally leads us to conclusions in line with those of our previous report on this topic. Specifically, we found that the main driver of variability in heating oil prices in Alaska communities is the underlying cost of crude oil. With that said, a great deal of the price variability among communities is driven by costs related to transportation and storage of fuel oil. This is especially true in remote rural communities not directly accessible by road.[4]

With these prime drivers of variability in mind, it is nonetheless clear that there exists substantial variability in "downstream" components of retail fuel oil prices that do not appear to be uniformly related to crude oil prices or any other easily identifiable cause. These downstream components include, for example, costs and profits for refiners, transporters, distributers, and retailers.

Due to the proprietary nature of certain information, downstream costs are generally difficult to analyze and, therefore, when retail prices are high, these components often earn scrutiny from consumers and policymakers. Typically, increases in crude oil prices bring about higher downstream costs as well. This makes sense insofar as the operating costs for businesses involved in downstream activities rise with the price of oil, since petroleum products power certain refineries, barges and delivery trucks, and provide power and heating for associated facilities. However, the positive correlation between prices for crude oil and the downstream components of fuel oil prices is not uniform. From this perspective, circumstances such as those that existed in mid-to-late 2008, when rapidly decreasing crude oil prices did not result in similarly steep decreases in retail prices, can be particularly difficult to explain.

Crude Oil and Retail Fuel Oil Prices in Alaska

Table 1 compares average monthly commodity prices for ANS and NYMEX light sweet crude oils and the average monthly retail price in Alaska for No. 2 distillate heating oil from January 2004 through March 2011. We summarize the main points of comparison contained in Table 1 as follows:

- The average monthly price of a barrel of ANS crude oil varied from $33.10 in January 2004 to an all-time high of $133.78 in June 2008, a range of about 300 percent. The overall average price for the 87-month time period in question was $67.67 per barrel; therefore, the $115.11 average price for ANS crude in March 2011 was over 70 percent higher than monthly averages over the last seven-plus years;
- The average monthly price of a barrel of NYMEX light sweet crude oil experienced volatility similar to that of ANS crude, varying from $34.22 in January 2004 to its all-time high of $134.02 in June 2008;

[2] We found no government or industry sources for community-specific fuel oil price information.

[3] We use the terms "No. 2 distillate," "fuel oil," and "heating oil" interchangeably. "Number 1 distillate" is also used for home heating, typically in smaller portable "space heaters" or fixed high-efficiency stoves such as those manufactured by the Toyotomi USA ("Toyo") corporation. Unless otherwise noted, all information on heating oil consumption and costs is from the U.S. Department of Energy, Energy Information Administration (EIA). The EIA publishes information on a wide variety of energy-related topics on its website at *http://www.eia.doe.gov/*.

[4] Both this agency and the Institute of Social and Economic Research (ISER) at the University of Alaska Anchorage have previously compiled information on the drivers of petroleum prices in Alaska. The archives of Legislative Research are available online at *http://w3.legis.state.ak.us/laa/research/public.cgi*. The ISER's 2008 report "Components of Delivered Fuel Prices in Alaska," is available at *http://www.iser.uaa.alaska.edu/Publications/*.

- In December 2004, the spread between NYMEX and ANS oil prices reached a high of 18 percent. Since that time, however, the difference between the two prices has typically been much lower than that. Between December 2004 and December 2008, average prices for NYMEX light sweet were about four percent higher than those of ANS crude. Recent prices have narrowed the price spread to just 0.9 percent for the entire time period in question. In March 2011, ANS crude sold for approximately 10.5 percent more than NYMEX light sweet; and
- The average monthly price of No. 2 distillate heating oil in Alaska ranged from $1.30 in January 2004 to a high of $4.47 in July 2008—a variation of about 245 percent. Although heating oil prices for March 2011 have not yet been published, based on increased prices over the past two months over the $3.22 per gallon cost in January, we expect the March statewide average price to come in at roughly $3.77 per gallon. That price is approximately 51 percent higher than the average monthly price for the entire time period in question.

Figure 1 (following Table 1) illustrates the relationship between ANS and NYMEX light sweet spot prices and the retail price of heating oil in Alaska. As you can see, these prices share a clear relationship; however, the correlation is not uniform. For instance, as oil costs increased dramatically in mid-2007 and early 2008, the spread between crude oil and retail prices at first shrank, then remained fairly steady through spring 2008 when the spread increased substantially as crude oil prices hit all-time highs. The difference between the prices of crude oil and heating oil continued to increase through October as oil prices plummeted. Again, with the information available to us, we are unable to completely explain this degree of volatility and variability in downstream costs.[5]

[5] We discuss the challenges of analyzing these costs with regard to gasoline prices in detail in Legislative Research Report 09.053. In that report we summarized the limitations we faced as follows: "Information on profits for individual petroleum refineries in Alaska and elsewhere is considered proprietary. Using the data available to us, we attempted a number of approaches to estimate the operating costs and profits of refineries . . . Unfortunately, those efforts were largely unsuccessful. Key points of crucial information unavailable to us include crude oil acquisition costs disaggregated by refinery, operating costs, and precise . . . output figures.

Table 1: Monthly Average Price Comparison: Alaska North Slope Crude, NYMEX Light Sweet Crude, and Alaska Number 2 Distillate Retail, January 2004-March 2011

Month	ANS Spot[1] (per barrel)	NYMEX Light Sweet[2] (per barrel)	Difference NYMEX over ANS	ANS Month to Month Percent Change	NYMEX Month to Month Percent Change	Alaska Average No. 2 Distillate[3] (per gallon)	Distillate Month to Month Percent Change
Jan-04	*$33.10*	*$34.22*	3.4%	N/A	N/A	*$1.30*	N/A

FUEL OIL USE IN ALASKA

According to the U.S. Census Bureau, in 2009, approximately 79,298 Alaska households, or about one-third of households statewide, used heating oil as their primary heating source.[6] This marks a slight decrease from the proportion of households heated with fuel oil in 2006. Statewide figures are skewed, however, by the population of the Anchorage and the Matanuska Susitna (Mat-Su) Boroughs, which collectively hold over half of Alaska households, and where natural gas is widely available for home heating. Excluding those boroughs, about 68 percent of the remaining Alaska households used heating fuel as their primary heating source in 2009. This also marks a decrease from 2006, a year in which about 71 percent of households outside of the Anchorage/Mat-Su area used fuel oil for heat. Census data show that as fuel oil use decreased between 2006 and 2009, the use of other home heating sources increased. Among the largest such increases occurred in the Fairbanks-North Star Borough, where the use of wood for home heating increased by nearly 90 percent over that four-year period.

Although we do not have data that definitively confirm the reasons that some Alaska households have decreased or eliminated their dependence on oil for heat, it appears likely that spikes in oil prices, particularly in 2008, motivated some homeowners to install less expensive sources of home heating. Nonetheless, large majorities of households outside of Anchorage and the Mat-Su remain dependant on oil for heat. This is particularly true in the Fairbanks area and in Rural Alaska, where about 80 percent of homes use oil heat.[7] Consequently, should oil prices remain near historically high levels, household finances and local economies in these areas are likely to suffer as a result.

We located no one source for community-specific fuel oil consumption in Alaska. Instead, we calculated average household consumption by using 2009 statewide fuel oil consumption figures from EIA data and divided that figure by the number of households that used oil as the primary heat source in a given geographic area. Our estimates assume a constant level of consumption statewide and make no allowances for climactic effects, variations in use related to heating oil costs, or other factors. As such, our calculations, the results of which are shown in Table 2, should be viewed only as rough estimates.

[6] The U.S. Census Bureau's "American Fact Finder" is the online interface for data collected through the American Community Survey (ACS). According to the Bureau, the ACS "is a survey that is sent to a small percentage of our population on a rotating basis. These data previously were collected only in census years in conjunction with the decennial census. Since the ACS is conducted every year, rather than once every ten years, it will provide more current data throughout the decade." Please note, however, that the ACS relies on survey samples that are small relative to the full decennial census. As a result the margins of error for ACS data are higher than those of the census, particularly in areas with small populations such as rural Alaska. Therefore, estimates of households and heating fuel sources should be viewed as rough estimates. We expect that more robust data will become available as information from the 2010 Census are released throughout this year. The American Fact Finder is available at *http://factfinder.census.gov*.

[7] "Rural Alaska" households in this context are those contained in U.S. Census Bureau Public Use Microdata Area (PUMA) 400. Specifically, this PUMA contains the boroughs/census areas of Aleutians East, Aleutians West, Bethel, Dillilngham, Kodiak Island, Lake and Peninsula, Nome, North Slope, Northwest Arctic, Prince of Wales-Outer Ketchikan Skagway-Hoonah-Angoon, Yakutat, Yukon-Koyukuk, Wade Hampton, and Wrangell-Petersburg. The Denali, Fairbanks-North Star, Southeast Fairbanks, and Valdez-Cordova boroughs comprise PUMA 300.

TABLE 2: HOUSEHOLD HEATING OIL USE AND ESTIMATED CONSUMPTION IN ALASKA, 2009

Location	Households	Households Heated with Fuel Oil		Estimated Fuel Oil Consumption[1]
		Number	Percent	
Alaska	234,779	79,298	33.8%	64,596,000
Anchorage/Mat-Su Boroughs	125,558	5,618	4.5%	4,576,412
Alaska excluding Anchorage/Mat-Su	109,221	73,680	67.5%	60,019,588
Fairbanks-North Star Borough	32,211	23,657	73.4%	19,270,947
PUMA 300[(a)]	61,124	44,432	72.7%	36,194,223
PUMA 400[(b)]	28,494	21,552	75.6%	17,556,218

Notes: Location-specific fuel oil consumption figures do not sum to statewide totals becuase the Fairbanks-North Star Borough is also included in PUMA 300.

1) We calculated average household consumption using the total statewide fuel oil consumption figures for 2009 and dividing that figure proportionally by the number of households that used fuel oil as their primary heat source in that year. Our estimates assume a constant level of consumption statewide and make no allowances for climactic effects, variations in use related to heating oil costs, or other factors. As such, our calculations should be viewed only as rough estimates.

a) "PUMAs" are Public Use Microdata Areas used by the U.S. Census Bureau to group populations in non-overlapping pools. PUMA 300 includes the Denali, Fairbanks-North Star, Southeast Fairbanks, and Valdez-Cordova boroughs.

b) PUMA 400 contains most of what are typically considered Alaska's rural communities. Specifically included are the boroughs/census areas of Aleutians East, Aleutians West, Bethel, Dillilngham, Kodiak Island, Lake and Peninsula, Nome, North Slope, Northwest Arctic, Prince of Wales-Outer Ketchikan Skagway-Hoonah-Angoon, Yakutat, Yukon-Koyukuk, Wade Hampton, and Wrangell-Petersburg.

Sources: Number of households and their primary heating sources, U.S. Census Bureau, "American Fact Finder," 2009 *American Community Survey* data tables; available at *http://factfinder.census.gov*.

Statewide fuel oil consumption data are from the U.S. Department of Energy, Energy Information Administration; *http://www.eia.doe.gov/*.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB100

Analysis

This bill acts to repeal AS 39.35.625 and AS 39.35.958(f) and annuls regulation 2 AAC 35.235 which require employers who eliminate participation in the Public Employee' Retirement System (PERS) for some or all of their employees to pay the costs associated with changes in vesting and retirement behavior due to the termination process (termination costs). Both changes lead to liability for benefits occurring earlier than calculated by the Division Actuary during valuation of the plan. The termination costs represent an unfunded liability to the system.

In addition to termination costs, AS 39.35.625 requires employers to pay continuing contributions towards the unfunded liability at the past service rate established each year times the salaries of the eliminated positions. Contributions are required from the employer until the past service liability is extinguished. The past service rate for FY 12 is 22.48% and for FY 13 is 24.16%.

The termination costs and the ongoing requirement for contributions toward the unfunded liability are in addition to the requirements for employer contributions in AS 39.35.255.

For employers who have terminated all participation with the PERS, this bill would require payment of 22% of the total base salaries of all covered employees as of the fiscal year ending June 30, 2008 until the plan does not have a past service liability, regardless of the actual past service rate calculated by the actuary.

Employers who eliminate participation for some but not all of their employee will pay no termination costs and make no contribution toward the unfunded liability unless their total base salaries fall below the total salaries the employer reported to the PERS as of June 30, 2008. The liability created by the termination will not be paid by the employer who took the action but will be placed upon all the employers in the plan. Since employer contributions are capped at 22% with the State of Alaska General Fund paying the remainder of the contributions due to fully fund the PERS for the year, the costs are ultimately shifted to the State of Alaska.

The estimated costs, in thousands, to the State as determined by the Division actuary, Buck Consultants, are as follows:

PERS DB Plan	FY 15	FY16	FY17	FY18	FY19
Increase in Normal Cost	$(457.0)	$(472.0)	$(488.0)	$(506.0)	$(525.0)
Increase in Past Service Cost Amortization Payment	$1,600.0	$1,652.0	$1,709.0	$1,772.0	$1,839.0
Total Increase in Annual Employer Contribution Amt.	$1,143.0	$1,180.0	$1,221.0	$1,266.0	$1,314.0

Results shown above are based on the 2010 actuarial valuation for PERS. Assuming the bill becomes effective July 1, 2012, increase costs will be first reflected in the FY 15 rates. Future terminated employees have been assumed to follow a similar pattern as past terminated employees for which termination costs have been completed. If future experience of terminating groups from PERS increases, the costs shown above will also increase.

Due to the retroactive provisions contains in Sections 9 and 10 of the bill, five PERS employers will be reimbursed for termination costs already paid to the plan. Total cost of reimbursement is $86,582.00 and will incur in FY 13.

A BILL

FOR AN ACT ENTITLED

"An Act relating to employer contributions to the Public Employees' Retirement System of Alaska; relating to requirements that employers who terminate some or all participation in the Public Employees' Retirement System of Alaska pay termination costs; and making the changes retroactive."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 39.35.255 is amended by adding a new subsection to read:

(i) After an employer's participation in the plan terminates with regard to some or all of the employer's employees who are active members of the system, the employer remains obligated to make contributions under (a) of this section until the plan does not have a past service liability.

* **Sec. 2.** AS 39.35.625 is repealed and reenacted to read:

Sec. 39.35.625. Termination costs. An employer that terminates participation in the plan of more than 20 percent of the employer's paid employees within any one-year period shall pay for a termination cost study that is directly related to the costs of

that termination.

*** Sec. 3.** AS 39.35.958(c) is amended to read:

(c) When an employer's participation in the plan **terminates** [IS TERMINATED, OR WHEN AN EMPLOYER TERMINATES COVERAGE OF A DEPARTMENT, GROUP, OR OTHER CLASSIFICATION OF EMPLOYEES UNDER AS 39.35.957(c)], the administrator shall assess the employer a termination cost that the administrator determines is actuarially required to fully fund the costs to the plan for employees whose coverage is terminated, including the cost of providing the employer's share of retiree health benefits under AS 39.35.880, occupational disability and occupational death benefits under AS 39.35.890 and 39.35.892, and pension benefits elected under AS 39.35.890(h)(2).

*** Sec. 4.** AS 39.35.958(e) is amended to read:

(e) An employer **whose** [TERMINATING] participation in the plan **terminates** shall pay termination costs determined **under (c) of this section** [BY THE ADMINISTRATOR], or enter into a payment plan acceptable to the administrator, within 60 days after the employer receives notice of its termination costs from the administrator. Termination costs not paid within the prescribed time limit or in accordance with the approved payment plan shall be collected by the administrator in accordance with AS 39.35.610(b). Termination of participation by an employer in the plan does not bar future participation by the employer if the employer has paid in full its prior termination costs.

*** Sec. 5.** AS 39.35.958(f) is repealed and reenacted to read:

(f) An employer that terminates participation in the plan of more than 20 percent of the employer's paid employees within any one-year period shall pay for a termination cost study that is directly related to the costs of that termination.

*** Sec. 6.** 2 AAC 35.235 is annulled.

*** Sec. 7.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPLICABILITY. Notwithstanding sec. 8 of this Act, secs. 3 and 4 of this Act do not apply to AS 39.35.958, for termination costs paid before the effective date of this Act for payroll periods or partial payroll periods that occur before the effective date of this Act.

*** Sec. 8.** The uncodified law of the State of Alaska is amended by adding a new section to read:

RETROACTIVITY. Sections 1 and 2 of this Act are retroactive to July 1, 2008, secs. 3 - 5 of this Act are retroactive to June 7, 2007, and sec. 6 of this Act is retroactive to January 13, 2010.

Senate Bill 100
PERS Termination Costs

Senate Bill 100 addresses the future financial stability of all PERS employers - the State, municipalities, school districts and the University of Alaska - and their ability to efficiently and effectively manage the delivery of programs and services.

Due to a variety of historical circumstances and decisions, the PERS defined benefit system evolved from being fully funded to being underfunded by billions of dollars. A solution embraced by all parties to address the unfunded liability was incorporated into Senate Bill 125 and was passed by the legislature in 2008. SB 125 set into law that the PERS system is a consolidated system and that the combined defined benefit (DB) and defined contribution (DC) salary base would be required to pay down the unfunded obligation, which in turn would provide for sustainable, predictable and affordable employer rates.

Paying off the unfunded obligation is predicated upon a stable, reasonably growing, system-wide salary base. A concern at the time SB 125 was adopted was that employers might en-masse elect to convert PERS salaried positions to contracted positions to reduce or avoid their PERS cost, thus shrinking the PERS salary base needed to pay off the unfunded obligation. To address this concern, it was agreed that employers would pay the *greater of* 22 percent on their combined DB and DC salary base, or, 22 percent on their total payroll for the period ending 6/30/2008. This effectively set the minimum contribution, or floor, that an employer would pay once PERS converted to a consolidated system.

Additional language relating to termination studies was added at the time to prevent employers from intentionally reducing their fair share contribution toward paying off the unfunded obligation. The application of the termination studies law is the cause for concern and the introduction of SB 100.

Current law requires an employer who terminates participation of a department, group, or other classification of employees to pay the following bills:

1. the cost associated with obtaining a termination study from the PERS actuary;

2. the actuarial cost to the employer for future benefits due employees whose coverage is terminated; and

3. the past service cost, annually, on each position terminated until the unfunded obligation is paid off decades from now.

Enforcement of the termination studies law is making it difficult for employers to manage their delivery of services, discriminates against small municipalities even though their impact is immaterial, and is costly and nearly impossible to implement in an equitable manner. These mandated termination studies fail to recognize that we do *not* have a single-agent, multiple employer system in which different employers pay different net rates. SB 125 provided for one integrated system of accounting; the unfunded obligation is to be shared among all employers, with each paying a single, uniform contribution rate of 22 percent.

All agree that the unfunded obligation must be paid off. All agree that the entire PERS salary base - both DB and DC - is needed to pay off the unfunded obligation, and that it must be sustained and have reasonable growth. The fear that employers would act in a manner jeopardizing the payment of the unfunded obligation has not materialized; in fact, the system-wide salary base has grown steadily. The law providing for termination studies is not needed and is repealed through SB 100.

SB 100 maintains the 6/30/2008 floor as the base salary amount upon which PERS payments must be calculated as this is the most efficient, cost effective and equitable method of ensuring the unfunded obligation is paid off.

Bill Number: SB 100

Version: 27-LS0272\D

Sponsor(s): Senator Paskvan

Title: "An Act relating to employer contributions to the Public Employees' Retirement System of Alaska; relating to requirements that employers who terminate some or all participation in the Public Employees' Retirement System of Alaska pay termination costs; and making the changes retroactive."

This legislation is effective July 1, 2008 for Sections 1-3 and 6; June 7, 2007 for Sections 4, 5 and 7; January 13, 2010 for Section 8.

Analysis of Repeals

The bill acts to repeal AS 39.35.625 effective July 1, 2008, AS 39.35.958(f) effective June 7, 2007 and annuls regulation 2 AAC 35.235 as of its adoption date, January 13, 2010.

- Repealing AS 39.35.625 removes the requirement for the employer to pay ongoing contributions toward the past service liability of the PERS; eliminates a termination cost study and the ability to establish a payment plan to pay termination costs. Repealed retroactive to July 1, 2008.

  The termination study calculates the unanticipated and unfunded costs resulting from both vesting behavioral changes that occur because of the termination. Employees in the defined benefit plan who are not vested with 5 years of paid up PERS service become vested and eligible for pension, and depending on tier, medical benefits after termination of coverage. This action creates unfunded liability.

  Currently, the plan experience demonstrates members who are close to retirement age will work at least two years past normal retirement. This experience is part of the assumptions used to value the plan each year. Termination of coverage changes this behavior resulting in members drawing retirement at the soonest eligible point. This unanticipated change creates unfunded liability.

  Employers are required by AS 39.35.625 to continue payment towards the unfunded liability based on the salary of the terminated position(s) multiplied by the past service rate for the system. The past service rate for FY 11 is 18.63%. The rate increases to 22.48% in FY 12. These payments toward the unfunded liability would stop with repeal.

  Repeal of AS 39.35.625 results in a cost shift of liability from the employer to the State of Alaska.

- Repeal of AS 39.35.958(f) removes the requirement for the employer to pay for a termination study to determine the costs associated with the termination. Repealed retroactive to June 7, 2007.

- 2 AAC 35.235 is a regulation that clarifies the termination costs as defined in AS 39.35.625 and AS 39.35.625. Repealed as of adoption date of January 13, 2010

  Retroactive repeal dates presents administrative problems for the division as payments have been made by employers to Buck Consultants. The division may need an appropriation to refund the costs back to employers depending on a determination of the Dept. of Law regarding the appropriate use of the trust funds for this purpose.

Analysis of Sections

Section 1. Amends AS 39.35.255 which governs contributions required by employers by adding a new subsection (i) stating the employer remains obligated to make contributions of 22% based on the total base salaries of the greater of the active employees in the plan, or the total base salaries of all covered employees as of fiscal year ending June 30, 2008 in the event of a termination. The contribution floor for active employees established in AS 39.35.255(a) will not be triggered until the overall employer salaries fall below the June 30, 2008 thresh hold. As salaries increase in the future, it will become less likely that the removal of single or a moderate number of positions will result in an employer falling beneath the contribution floor.

Section 2. Amends AS 39.35.615(i) to remove the requirement for an employer seeking future coverage of terminated employees to be current in payments for costs resulting from the termination study before coverage is granted. Costs arising from the termination study have been removed with the repeal of AS 39.35.625.

Memorandum

To: Mike Barnhill, Deputy Commissioner, DOA
From: Larry Semmens, Soldotna City Manager
Date: February 11, 2011
Subject: Termination Study Impacts

You asked that I summarize my concerns regarding termination studies. My concerns are in the areas of equity, materiality, accuracy, and enforcement.

There is a much higher likelihood of the provisions of 39.35.625 applying to a small municipality than a large employer. Adjusting staffing levels for budgetary purposes can easily result in the termination of a group, department or other classification (group) in a small municipality. A large employer could eliminate many positions, thus having a material dollar impact on PERS contributions but not trigger the provisions of either .625 or .255 (2008 floor). Since small municipalities are often challenged fiscally, these provisions make it very difficult to effectively manage staffing levels. Staff costs are usually 75% or more of total budget making staffing the only area to effectively deal with revenue shortfall. Small municipalities are affected materially but the impact on the system is immaterial. Large employers that stay above the 2008 floor can make many position cuts without incu rring the cost of either termination studies or past service cost on the salary of a group that has no continuing salary. Thus the termination provisions have minimal impact on the large employers. Shouldn't all employers be treated equally by application of the 2008 salary floor in section .255 rather than subjecting small employers to termination costs in section .625?

Regarding past service liability, when total payroll of an employer is up from 2008, one could argue that the PERS has not been negatively impacted by that employer eliminating a group. However DRB doesn't consider this. If the employers total payroll exceeds the 2008 floor they should be considered to have met the responsibility to pay the past service liability. I think the 2008 floor is the fairest way to deal with past service liability.

If .625 is brought into play there are many variables which have to be given consideration:

1. When a position is eliminated it doesn't always mean the person in the position was terminated from employment, furthermore, they could get a PERS position in the future which would negate the termination cost that was previously assessed. If a group of several employees is involved it would seem that those still employed would be exempt from the termination study and from past service cost payments. I think you refer to this as double counting. It will be very complicated to keep up with.
2. Paying the past service rate on the salary of a terminated group for the next 30 years could easily exceed any possible actual past service liability generated by the group. **If all of the group were Tier IV there would be almost no past service liability generated, but the employer is obligated to pay the**

past service liability generated, but the employer is obligated to pay the past service rate on the salary of the terminated group until the unfunded liability is paid off. This is not reasonable. Consider that if the employees affected were short term DB employees the past service liability would also be low. If Buck is calculating normal cost correctly any employee hired since Buck was employed should have little or no past service liability.

3. The methodology of Buck's calculation does not consider all relevant facts. The Ketchikan example is a good one. The subject was Tier I, 59 years old with 34 years in the system. My thought is the person is generating an actuarial surplus since he didn't retire at 30 years of service. Buck doesn't consider this in their calculation. Instead they ignore these facts and calculate the present value of the benefits which will be paid out 'early' based on the assumption that the subject is going to work well beyond age 55. Buck knows that only a fraction will continue to work beyond retirement age, but I don't think they apply any probability factor to their calculation of the termination cost. Instead they simply calculate the present value cost of the person retiring compared to what it would have cost at some point in the future. It would be interesting to query the data to find out how many Tier I's with 34 years keep on working to whatever age Buck assumed this person was going to be if he didn't retire when he did. Consider that every time someone retires at age 55, or at any age younger than Buck's assumed age, there is a hit to the system that Buck apparently has not considered. The conclusion to be drawn is that the total liability they are reporting is grossly understated. They calculated that the system took a hit of $123,000 when the Ketchikan person retired. This is not reasonable for this set of facts and should be carefully considered in light of the liability estimates they have made.

Another big issue is that DRB believes the State is exempt from compliance with section .625 because the State doesn't have a participation agreement with PERS. This is a thin argument which is clearly not equitable to the other members of the plan. This means that the entity that has over half of the total payroll of the system and therefore over half of the past service liability that drives the past service cost rate, can eliminate departments, groups or other classifications without paying the costs. The impact of this is born by the other members of PERS. The thought that the State's actions only impact the State is not correct. When the State does not properly contribute to PERS according to the same rule every other employer has to follow, the system doesn't get the funds the actuary is anticipating and the result is higher rates for longer periods. All employers are going to participate in rectifying this. Note that the past service rate is going above 22% in FY 2012. I wonder how much of this is caused by the State not contributing according to the actuarial assumptions.

As I mentioned, I think the State is underfunding PERS with contract employees that do not meet the IRS test of independent contractors and by employing retired PERS members in long term temporary positions that would normally be filled with a PERS employee. The State does this because they have to in order to hire competent staff. Why shouldn't municipalities be allowed the same ability to manage?

I continue to argue against requiring a termination study, but if one is required all relevant facts need to be considered. Currently the methodology of the calculation is designed to deliver the highest possible termination cost.

I hope that you and your staff will recognize:

1. that .625 termination studies are making it difficult to manage staffing levels,
2. that application of the requirement discriminates against small municipalities even though their impact is immaterial, and
3. that enforcement is going to be costly and nearly impossible to do equitably.

With two auditors that have apparently only accomplished 12 field audits since 2003, it seems unlikely that the State is properly staffed to deal with the workload that this law imposes. Employers do not understand the requirements, do not consider the requirements or alternatives available to them when dealing with staffing changes, and consequently will often be out of compliance with the law.

In conclusion I reiterate that a simple requirement such as maintaining and enforcing the 2008 floor as the base salary amount on which PERS payments must be calculated will be equitable and easy to administer and enforce. Such a requirement will have minimal impact on the PERS compared to the cost of properly enforcing the current law.

Senator Paskvan's bill accomplishes this so I am in support of the bill.

If you have any questions of me I am available at your convenience.

PERS Termination Studies

What Is The Issue?

PERS says: If you reduce your employee count because you made a decision to alter or suspend one of your programs or services, we just might send you three bills*. It doesn't matter to us (PERS) why the reduction occurred, nor, does it matter that you are a small employer that could end up having to reduce your programs and services because you owe us hundreds of thousands of dollars, to millions of dollars.

One bill we (PERS) will send you will be for the cost of doing a termination study. The second bill will be what the study says you owe the System, due to the employee change(s) you made. The big bill we'll send you, number three, is the one that may require you to pay the past service cost (PSC) on each position we said you needed to opt out of PERS. Just to be clear, you will be required to pay the PSC (currently 18.63%) on the salary(s) we said you needed to opt out until the unfunded obligation goes away, maybe 30 years from now.

The future financial stability of PERS employers, and their ability to efficiently and effectively manage the delivery of their programs and services, is being directly impacted and undermined by how PERS interprets 2 AAC 35.235.

What Employers Are Subject To The Termination Study Regulation?

All PERS employers: the State, boroughs, cities, school districts, and the university system. There are no statutory exclusions for any PERS employer. We are all -- subject to the negative compounding effect that the 2 AAC 35.235 imposes.

---

* **2 AAC 35.235. Calculation of termination costs**: ***(a) An employer that proposes to terminate coverage of a department, group, or other classification of employees*** under AS 39.35.615 or 39.35.957, or terminate participation of the employer under AS 39.35.620 or 39.35.958, ***must have a termination study completed by the plan actuary*** to determine the actuarial cost to the employer for future benefits due employees whose coverage is terminated.
(b) In addition to the costs calculated in (a) ... the employer under AS 39.35.620 or 39.35.958, ***is required to pay to the plan until the past service liability of the plan is extinguished an amount calculated by applying the current past service rate adopted by the board to salaries of the terminated employees as required by AS 39.35.625*** (a). ***This payment shall be made each payroll period*** or the employer may enter into a payment plan acceptable to the administrator for each fiscal year.

What Is The Abbreviated History That Led To The Studies?

Due to a variety of historical circumstances and decisions, the PERS and TRS defined benefit systems evolved from being fully funded to being in a state of being billions of dollars underfunded.

The main questions became: Whose debt is it, and how will "we" pay the unfunded obligation down? Great consideration and weight were given the concepts of predictable, affordable, and stable rates.

In the end, the resolution embraced by all parties as acceptable (meaning most affected parties were equally unhappy), and generally incorporated into SB 125:

- set in law that the PERS system is a consolidated system,
- set in law that there would be a flat maximum PERS employer combined normal rate and past service cost rate of 22%,
- set in law that the State would pay the difference in the actuarially determined combined rate and the 22%,
- set in law that PERS employers would pay 22% on defined contribution (DC) salaries as well, with the difference between the 22% and specific DC benefits (approximately 10%) would go toward paying down the DB unfunded obligation,
- and set in law that the State would pay all of the past service cost rate for the TRS system.

If That Was The History, Then Why The Termination Studies?

The combined DB and DC salary base will be required to pay down the unfunded obligation, and sustain predictable, affordable, and stable employer rates. This understanding takes into account that over time the defined benefit (DB) salaries would decrease, due to the establishment of the defined contribution (DC) plan, PERS Tier IV.

Paying off the unfunded obligation is predicated upon a stable and a reasonably growing salary base. A concern at the time SB 125 was adopted was that PERS employers might en-masse elect to convert PERS salaried positions to contracted positions to avoid/reduce their PERS cost.

If enough employers made enough wholesale major changes in the way they deliver their programs and services by converting from a salary based labor force to contract based labor force, the salary base to pay off the PERS unfunded obligation would shrink. Shrinking the PERS salary base jeopardizes the ability to pay off the unfunded obligation.

How Did SB 125 Address The Salary Base Shrinkage Concern?

PERS employers pay 22% on the total of their current combined DB and DC salaries, ***or, pay the greater of 22% times the payroll period that ended on 6/30/08.*** This basically ***set the minimum contribution*** amount that a PERS employer would pay, once PERS converted to a consolidated system. ***This provision sets a future, per pay period, contribution floor for all PERS employers, and it was, and is, appropriate and fair. This provision deals with an employer's need to modify their programs!***

However, other language was added to deal with employers that might try to purposely reduce their benefit costs, and therefore, reduce their fair share contribution toward paying off the unfunded obligation.

So, The Concern Was A Shrinking Salary Base. Has It Shrunk?

No. ***In fact, it has grown steadily.*** The fear that employers would act in a manner that jeopardized payment of the unfunded obligation has not materialized. The table below clearly shows a strong salary base growth, not a decline.

Take note: The underlying fear that certain employers would shrink the salary base has simply not happened! ***The termination language was a solution to a problem that never materialized****, and it's not needed.* But even worse, the negative consequences, ***the additional charges and payments that result from what PERS interprets as being required from the termination language, were never contemplated or intended, and they are destructive***.

What Are Some Termination Study Fact Pattern Examples?

City of Ketchikan:

Terminated Position(s): Eight employees of Gateway Center for Human Services.

Positions(s) Funding Source: Grants, patient fees, and sales taxes.

Reason for Termination(s): In addition to reduced federal and state grant funding, the City Council determined that it was no longer appropriate for the City of Ketchikan to operate a health care clinic. The mental health and substance abuse treatment services offered by Gateway Center for Human Services were not typical local government services and the City was ill equipped to deliver the services in a cost effective and efficient manner.

Termination Cost:

1) $ 5,000 to Buck for the termination study,
2) 10,364 to the State for liability increase to the System
3) 2,235,421 = ($399,968/yr) x (18.63% PSC rate) x (30 years) = estimate

$ 2,250,785

Observations:

The City Council was forced to alter its services as a direct result of reductions in critical grant funding, and the questioned appropriateness of the City continuing this program. The loss of grant funding levels has led to a potential $2.3 million obligation. The City plans to divert resources, approximately $74,514/year, from its Hospital Sales Tax Fund to make the annual past service cost payments, thus negatively impacting future hospital funding and possibly other paid positions.

What about communities that rely on law enforcement grants, domestic violence grants, fire fighting grants, Homeland Security grants, education grants, etc.? Will entities need to stop accepting critical grants out of fear that the grant will end sometime in the future, and then, they'll have to pay benefits on salaries they no longer get grant funding for?

City of Craig:

Terminated Position(s): Five and a half employees were transferred to the City to staff the Craig Clinic, a primary health care clinic (2 DB and 3.5 DC employees).

Positions(s) Funding Source: Fees for services with shortfall covered by general government funds.

Reason for Termination(s): In 2000, the City of Craig assumed operation of a clinic. Two prior operators of the clinic had abruptly halted their operation of the clinic, citing the inability to collect revenues sufficient to cover their operating costs. The City Council directed staff to develop a plan to keep the clinic open.

Financially, the clinic was a mixed bag for the City of Craig. Some years revenues exceeded expenses, in other years expenses exceeded revenues. The trend for the past four years was one of operating losses. The City never wanted to be in the clinic business, and got out of it as soon as it could, while still ensuring that the service would continue to be available locally. In April, 2010, the City of Craig turned over operation of the clinic to a private non-profit corporation. The City is not paying the new clinic operator to run the clinic, nor is the operator paying the City to run the clinic.

Termination Cost:

1) $? to Buck for the termination studies
2) ? to the State for liability increase to the System
3) 2,065,694 = ($396,600/yr) x (18.63% PSC rate) x (30 years) = estimate $2,065,694 plus unknown study and termination liability costs

Observations: This was not a "municipal service" that was "contracted out" to the private sector, nor was this a service the City decided to contract out to avoid PERS costs. It was a medically necessary service that the City provided on a temporary basis between 2000 and 2010. In short, the clinic was an operation not suited for the City. For community based health and safety reasons, the City took over for a temporary period. Staff were not long term PERS participants, but a combination of Tier III and IV members, and therefore, the City could not have built up any huge obligation to the DB system for the two DB employees. But, the City is faced with possibly having to pay into the System over $2 million for those temporary clinic positions. Where will the funding come from? The PSC rate (18.63%) times 5.5 employees salaries ($68,756/year) equates to possibly terminating another employee in order to have enough funds to pay the System.

Other Issues for the City of Craig:

Not as a consequence of, but, at about the same time that the City stopped operating the Clinic, the City of Craig's EMS Coordinator applied for a transfer from the EMS Department to the Police Department, to work as a dispatcher. The City Administrator is considering refilling the EMS Coordinator position with a part time employee, rather than a full-time employee. He asked PERS staff if this transition, in their view, might also trigger some sort of payment to the PERS system. PERS staff stated that it might, and said they would need to make a determination on the matter.

City of Skagway:

Terminated Position(s): Single position, Fire Chief

Positions(s) Funding Source: General government funds

Reason for Termination(s): Skagway changed its Fire Chief position from paid to volunteer due to budget reasons. The fire department will have a paid administrator position instead. Extract from State e-mail: "As a volunteer, *the position is no longer eligible for PERS. Therefore, you must amend your participation agreement to exclude the Fire Chief." "Even if the Fire Chief position is vacant, the termination study must still be done."*

Termination Cost:

1) $ 2,500 to Buck for the termination study,
2) 17,470 to the State for liability increase to the System
3) 416,643 = ($74,547/yr) x (18.63% PSC rate) x (30 years) = estimate $436,613

- ***Observations:*** Here was a PERS employee that only worked for Skagway for 4.73 years. Skagway didn't even have this person employed long enough for this employee to become vested if the person had worked as a PERS employee only for Skagway. Yet, Skagway will have to pay huge sums in the future as though they were that person's sole PERS employer, and as if, the entire benefits due that employee were created during their years of service at Skagway; but that's not the case! Skagway's future payments will cover past service costs for other employers, costs that should be paid (under a single-agent, multiple employer system) by the other employer(s), not by Skagway. This was one of the very issues (one employer's decisions financially affecting another employer) that was the basis for going to a consolidated system. Extract from State e-mail: "Benefits due to terminated employees must be funded by the employer..." "In addition to this cost, you will continue to make contributions toward the unfunded liability for this position (Tiers I, II and III) each pay period by the amount determined by applying the past service rate times the salary of the individual you are removing, or the salary of the person that last held the position. The current past service rate is 18.19%. The past service rate changes every fiscal year."

Ketchikan Gateway Borough:

Terminated Position(s): Single position, Borough Manager

Positions(s) Funding Source: General government funds

Reason for Termination(s): 34+ year PERS employee that wanted to draw retirement. The Assembly wanted to keep the manager, so it changed the position from employee to contracted.

Termination Cost:

1) $ 2,500 to Buck for the termination study,
2) 12,392 to the State for liability increase to the System
3) 676,269 = ($121,000/yr) x (18.63% PSC rate) x (30 years) = estimate $691,161

Observations: Here was a PERS employee that only worked for the KGB for less than three years of their over 34 years in the System. For a little over 27 years the person was employed by the State. The employee and the employee's employers paid into the System four years beyond when that employee had reached 30 years of employment, able to retire with full benefits. This also means the employee did not draw on the System for over four years that they could have, had they retired at 30 years. And yet, KGB still owed money to the System for this person. KGB didn't even have this person employed long enough to vest, yet, it could possibly have to pay $700,000 into the System for this employee? It is interesting that although this person and the employers paid into the System for 34 years, KGB might have to pay into the System for another 30 years, and therefore the System will have received just under 65 years of contributions to fund this person's retirement! Something just does not seem right about this!!

City of Palmer:

Terminated Position(s): City Manager

Positions(s) Funding Source: General Fund

Reason for Termination(s): Change in managers with newly hired manager wishing to retain current retirement status.

Termination Cost:

1) $ 2,500 to Buck for the termination study,
2) 12,483 to the State for liability increase to the System
3) 582,212 = ($104,171/yr) x (18.63% PSC rate) x (30 years) = estimate

$ 597,195

Observations: The termination costs are based on the wages of the last individual holding the position being removed from PERS. In the City of Palmer's case, the former manager had approximately 17 years in the PERS system equally distributed between the State of Alaska, Fairbanks North Star Borough and the City of Palmer. The last employer is the entity with the financial burden even though only three years of service were provided to the City.

City of Cordova:

Terminated Position(s): Police Chief

Positions(s) Funding Source: General Fund

Reason for Termination(s): Change in Police Chief with new proposed Chief wishing to retain current retirement status. Previous Chief was employed for two years. Proposed new Chief is a retired State Trooper.

Termination Cost:

1) $?? to Buck for the termination study,
2) ?? to the State for liability increase to the System
3) 381,768 = ($68,307/yr) x (18.63% PSC rate) x (30 years) = est. $ 381,767 + one-time cost to be determined to PERS

Observations: The termination costs are based on the wages of the last individual holding the position being removed from PERS. In the City of Cordova's case, this individual came from Louisiana, had approximately two years in the PERS system, was not vested, and moved back to Louisiana. The City began a search and determined that the best candidate for the position was a retired State Trooper. The City had no knowledge of the changes in PERS rules and proceeded to ask the State what needed to be done to remove the Chief position from PERS. The City was informed about the changes in the process that includes the termination study and liability payments. The City was unable to fund those amounts, the City is currently operating with an Interim Chief (Temporary employee) while hoping the Legislature will remove the termination study and liability during the 2011 legislative session.

2 AAC 35.235 says that an employer ***"... must have a termination study completed by the plan actuary to determine the actuarial cost to the employer for future benefits due employees whose coverage is terminated."*** In this case, there is absolutely no additional cost to the PERS System as a result of the Louisiana individual's termination, yet the City is being charged anyway.

The result of the new PERS rule is that a highly qualified Alaska State Trooper can go to work in any other state without impact to his/her Alaska retirement, and without impact to his/her non-Alaska employer. However, if the Trooper wants to work in Alaska they must give up their retirement while working in Alaska, or their Alaska employer must pay excessive costs to PERS for a study and liability expense. The consequence of this is that the most qualified employees are being driven out of Alaska if they want to continue to work.

What Are Some Of The Unintended Termination Study Consequences?

1) Equitable and consistent application of the State's termination law does not seem to be occurring, nor likely can it ever occur given the uniqueness of all PERS employers' positions. A law like this that has such a material financial impact on PERS employers should at a minimum be able to be fairly, equitably, and consistently applied to all PERS employers. Looking at which entities have had termination studies done, and what drove those studies to be done, versus studies not done and the reasons behind them not being done, there is a clear and valid question as to is there really any equal treatment under the law?

How is the State complying with these termination laws, how has it applied the termination laws unto itself, as the administrator of the PERS System? You may also wonder: How many termination studies has the State had conducted on itself? When thinking about what the answer should be, keep in mind that the State is the largest PERS employer, with about 50% of the salary base, about $1 billion per year. Keep in mind that the State opens and closes offices all the time, and contracts out work which it cannot hire salaried staff to do. So again, how many studies? According to the State, none have been done for State positions! ***Further, according to the State, they don't even know how they'd administer the law, these regulations, unto themselves.***

Does it seem like an equitable and consistent application of the law when the entity that drafted the regulations, and has the largest salary base in the System, doesn't even apply the regulations to itself, and yet, it imposes them on others?

2) There is an inescapably inequitable impact to small PERS employers. This State law, or its application by PERS creates a clear and unconscionable inequitable impact on small PERS employers, versus larger PERS employers. Many smaller communities only have "one" employee for a program or service. If they lose a grant, or simply are faced with budget constraints and they have to cut a person, say a nurse in a school, they'd be required to have a termination study done, then pay all of the related costs because they actually cut a "function or a group." However, applying the law to a larger PERS employer that loses some grant money or is faced with budget constraints does not result in the same impact from the loss of the only nurse. The larger employer has more than one nurse, so they are not required to do a termination study.

So, the small employer gets financially punished with the requirement to opt that position (function/group of one) out of PERS. Then they get hit with all of the related termination costs that the large employer doesn't get. Even though they both paid, say, $50,000 a year for those nurse employees they had to lay off, one gets a bill for the

salaries they aren't paying, and the other one doesn't get a bill. Both are not paying an equal $50,000 into the PERS system!

Imagine now that the large employer cut five nurses and therefore, reduced by $250,000 the salary used to pay down the unfunded obligation. The small employer impacted the System by $50,000, the large employer by $250,000. No termination study or past service costs for the large employer, the small employer, they're (excuse the language) screwed. Going back to consequence #1 just made above, does this seem like a fair and equitable application of the law, or the intent of the law? Obviously, no. But worse, there is clearly not a fair and equitable financial impact on these two different employers for taking the exact same action, for the exact same reason, with the exact same impact on the System? The little PERS employer gets financially punished for taking the same action as the larger employer!

3) Termination studies negatively impact our decision, and our ability to accept grants because of the potential future liability. Grant funded positions may become subject to the termination studies, once the positions are terminated due to grant funding ending. Employers will find themselves paying the past service cost rate on former grant funded position salaries with other revenues. Essentially, if you accept a grant it is possible, depending upon the circumstances, that once those grant funded positions are ended that you'll need to use other dollars to pay the PSC on those former grant funded salaries that you're no longer paying. This will force diverting dollars from the actual delivery of other necessary services and programs to paying benefits on grant salaries no longer being paid until the unfunded obligation is gone. This result clearly raises the question of whether or not an entity should accept any grants that might have new positions attached to them. Look at the City of Ketchikan set of facts. Shall we talk about public safety grants, shall we talk about Homeland Security grants, shall we talk about Emergency Medical Services grants, shall we talk about air quality grants, shall we talk about, say ARRA grant funded positions at our schools and the university system?

4) As administered, there are no offsets taken into account for salary increases in one area, for decreases in other areas. In other words, the ability for entities to adjust their programs and services to meet their constituent's needs is negatively impacted. If an employer needs to cut in Area A, and add in Area B, that employer could find itself paying the PSC rate times the salary(s) it is no longer paying in Area A because it shifted its employees to Area B where there is more need, whether driven by local need or a mandate. An employer could keep/maintain the exact same salary base, but, by

stopping some service completely and simply moving those employees to an existing or a new service, they could get hit with a demand for a termination study as that group is no longer providing that program or service (such as your only EMS Coordinator going to the Police Department). As currently administered, the PERS program only really allows for an upwards spiraling increase in PERS salaries, and those total salary dollars will be subject to either the statutory 22%, or, the PSC rate on opted out salaries.

5) Over time, more and more resources will go toward paying down the unfunded obligation than go to the delivery of services such as fire protection, law enforcement, teaching, recreational services, landfill services, library services, flood control services, emergency response services, and the list goes on from here. Once you start shifting employee resources from one area of responsibility to another, you start a negative downward spiraling in your programs and services. If an employer, for example, lost their grant funding for a healthcare program that had 6 staff that averaged $50,000 per year, they could possibly have to cut another position to cover the termination costs. The math is: $50k x 6 employees x 18.63% PSC rate = $57k/year in past service costs on salaries no longer being paid. To get the $57k an employer could very well need to lay off another employee. Over time, there is a terrible compounding effect and an undermining of an entity's ability to deliver its programs and services.

6) An employer will pay more toward the unfunded obligation every pay period on positions that no longer exist than they will for existing paid positions. This is true because the rate set by statute is capped at 22%. The 22% first covers the current normal cost rate then the difference is applied to the unfunded obligation. The current (FY '11) normal cost rate is 9.33%, therefore, an employer pays 11.67% times the working employee's salary toward the unfunded obligation. This same employer is required to pay 18.63% times the salary of an employee they are no longer paying toward the unfunded obligation. That employer is paying almost 7% more for positions that no longer exist because of the unfunded obligation than it pays on salary dollars for existing positions.

7) Termination studies nullify the intent of SB 125 that employers pay the exact same rate. *"**INTENT.** It is the intent of this Act to change the public employees' retirement system to a cost-sharing plan and provide for one integrated system of accounting for all employers. Under the integrated system, the public employees' retirement system defined benefit plan's unfunded liability will be shared among all employers, and **each employer will pay a single, uniform contribution rate** of 22 percent.* It is clear that one result of these termination studies is

that different employers will in fact be paying different net rates, and therefore, there will not be a single uniform contribution rate for PERS employers. The adoption of SB 125 was based on the acknowledgement that we do not have a single-agent, multiple employer PERS system, but rather we have had a consolidated un-equitable cost share system. The intent of SB 125 was that all employers would pay the same exact rate. That cannot happen when each employer pays a different termination cost amount, or pays none at all.

8) Will "terminated" salaries pay a higher rate than that set in Statute? What happens to these "termination" payments when the PSC rate is greater than the 22% employer rate set out in Statute, which is projected to be the case for FY 2012?

Are There Things That We All Agree On?

Clearly, and absolutely, the answer is yes. We agree on most everything:

- We all agree that we want to see the unfunded obligation paid off.
- We all agree that the entire PERS salary base is needed to pay off the unfunded obligation, and that it must be sustained and have reasonable growth, which it has to the tune of about 19% since the floor was set.
- We all agree after looking at the history that PERS employers have been loyal to the System and have not made material and purposeful changes in the way they deliver their programs and services from employees to contracted persons.
- We all want and need predictable, affordable, and stable PERS rates.
- We all agree, given the PERS history, that PERS is a consolidated system, and we all need to share as fairly as is reasonably possible in paying off the unfunded obligation.
- We all agree that we want to effectively and efficiently as possible deliver our programs and services. But, we all want and need the ability to adjust our programs and services over time as deemed prudent and necessary, without adding the financial penalty that the termination studies thrust upon us.
- We all agree that the fear of a shrinking salary base has not materialized, and thus the termination studies are not needed.
- We all agree that our legislators, in struggling hard to come up with a fair and equitable solution to a problem that most of them didn't create; never envisioned, intended, nor wanted to see any inequitable financial damage nor any inequitable application of the termination studies law.

Remember: The Termination Language Was A Solution To A Problem That Never Materialized. It's Simply Not Needed!

What Should Be Done? What Does AML Support As A Solution?

1) AML supports a sustainable salary base to pay off the PERS unfunded obligations.
2) A.S. 39.35.625, that requires termination studies, and any other similar statutes or regulations, should be repealed.
3) Amending A.S. 39.35.255(a)(2) (***this is the 6/30/08 salary floor language***) to include inflation adjustment language will provide a more efficient, cost effective, and equitable method of ensuring that the required PERS salary base is maintained.
4) Talk with your legislators. They never wanted to harm our communities! Ask them to remove the termination language this legislative session.

Appendix

2 AAC 35.235. Calculation of termination costs (Impacts DB & DC employees, not just DB EE's)

(a) An employer that proposes to terminate coverage of a department, group, or other classification of employees under AS 39.35.615 or 39.35.957, or terminate participation of the employer under AS 39.35.620 or 39.35.958, ***must have a termination study completed by the plan actuary*** to determine the actuarial cost to the employer for future benefits due employees whose coverage is terminated. ***The employer shall pay the termination costs determined by the study*** either in a lump sum or under a payment plan acceptable to the administrator. ***The employer shall pay the cost of the study***.

(b) In addition to the costs calculated in (a) of this section, an employer that proposes to terminate coverage of a department, group, or other classification of employees under AS 39.35.615 or 39.35.957. or termination of participation of ***the employer*** under AS 39.35.620 or 39.35.958, ***is required to pay to the plan until the past service liability of the plan is extinguished an amount calculated by applying the current past service rate adopted by the board to salaries of the terminated employees as required by AS 39.35.625*** (a). This payment shall be made each payroll period or the employer may enter into a payment plan acceptable to the administrator for each fiscal year.

(c) Interest as provided under AS 39.35.610 (a) is applied to the termination costs if an employer defaults in the payments under (a) or (b) of this section.

RE: ***RESOLUTION NO. 2011-27***
City of Kenai

Dear Senator Paskvan:

At its April 6, 2011 meeting, the Kenai City Council unanimously passed its Resolution No. 2011-27 supporting Senate Bill 100, which if passed, will end requirements for termination studies (in limited circumstances) for PERS employers who terminate some or all participation in the Public Employees' Retirement System of Alaska to pay termination costs as well as continue to pay the past service rate on the salaries of the terminated employees until the unfunded liability of the system is paid off.

A copy of Resolution No. 2011-27 is enclosed for your information and record.

If you have any questions with regard to the action taken by our City Council in supporting Senate Bill 100, please contact our offices.

CITY OF KENAI

Suggested by: Administration

CITY OF KENAI

RESOLUTION NO. 2011-27

A RESOLUTION OF THE COUNCIL OF THE CITY OF KENAI, ALASKA SUPPORTING SENATE BILL 100, WHICH WOULD END REQUIREMENTS FOR TERMINATION STUDIES IN LIMITED CIRCUMSTANCES.

WHEREAS, legislation passed by the State of Alaska in 2008 changed the Public Employee Retirement System (PERS) to a cost-sharing plan and established that municipalities and school districts would pay 22% of eligible payroll to PERS; and,

WHEREAS, after adopting regulations, the State of Alaska recently began enforcing provisions in State statutes which require employers that terminate a department, group or other classification (group) from participation in PERS to pay the costs determined by a termination study completed by the State's actuary as well as continue to pay the past service rate on the salaries of the terminated employees until the unfunded liability of the system is paid off; and,

WHEREAS, these costs can amount to hundreds of thousands of dollars even on a single position; and,

WHEREAS, in small municipalities a group is often made up of a single position, therefore small municipalities are impacted by these regulations far more often than larger municipalities; and,

WHEREAS, small municipalities are finding it difficult to make appropriate staffing decisions due to the substantial cost of termination studies and past service payments on terminated positions; and,

WHEREAS, the State of Alaska Department of Administration, Division of Retirement and Benefits has stated that a vacant position, if it constitutes a group, is the same as a group formally eliminated by amendment of the participation agreement with PERS; and,

WHEREAS, a single vacant position can subject the municipality or school district to large and unknown future liability even though there is no continuing salary for the position; and,

WHEREAS, municipalities are statutorily bound to make PERS contributions on no less than the June 30, 2008 salary base thus protecting other plan members from underpayment of the past service liability; and,

WHEREAS, PERS employers that terminate all participation would still be subject to termination costs and past service liability payments; and,

WHEREAS, recent enforcement of the regulations has put municipalities in the untenable position of not being able to properly manage staffing levels, which means not being able to deal with budget shortfalls and because the application of the regulations are so blatantly unfair to small municipalities.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA, supports passage of Senate Bill 100 which eliminates termination studies required by AS 39.35.625 and which makes other changes which protect the State of Alaska and other PERS employers from an employer that terminates coverage completely or reduces eligible payroll below the 2008 salary base.

PASSED BY THE COUNCIL OF THE CITY OF KENAI, ALASKA, this sixth day of April, 2011.

MIKE BOYLE, VICE MAYOR

ALASKA MUNICIPAL LEAGUE
RESOLUTION #2011-03

A RESOLUTION SUPPORTING A SUSTAINABLE SALARY BASE TO PAY OFF THE PERS UNFUNDED OBLIGATIONS AND REPEALING AS 39.35.625, A STATUTE REQUIRING TERMINATION STUDIES

WHEREAS, the Alaska State Legislature has helped Alaska's municipalities tremendously in adopting the 22% rate of salary to help fund the current costs and the unfunded liability of the PERS/TRS system; and

WHEREAS, AS 39.35.625 states that:

(a) Notwithstanding AS 39.35.255, an employer that terminates participation of a department, group, or other classification of employees in the plan, under AS 39.35.615 or that terminates participation in the plan under AS 39.35.620, shall pay to the plan each payroll period until the past service liability of the plan is extinguished, an amount calculated by applying the current past service contribution rate adopted by the board, to the greater of total base salaries paid.....
    (1) during the payroll period to employees in positions for which coverage has been terminated;
    (2) at the time of termination to employees in positions for which coverage has been terminated; or
    (3) during the corresponding payroll period for the fiscal year ending June 30, 2008, to employees in positions for which coverage has been terminated.

(b) Notwithstanding (a) of this section, the administrator may enter into a payment plan acceptable to the administrator for payment of an employer's liability for termination costs. Termination costs not paid as prescribed by (a) of this section, or in accordance with an approved payment plan, may be collected by the administrator in accordance with AS 39.35.610(b).

(c) An employer requesting termination of all participation in the plan, termination of participation in the plan of a department, group, or other classification of employees, or a payment plan for payment of termination costs, shall pay the cost associated with obtaining a termination cost study associated with the employer's termination; and

WHEREAS, the Alaska Municipal League believes that the above statute should be repealed, as it removes equitable and consistent application of state law; and

ALASKA MUNICIPAL LEAGUE

217 Second Street, Suite 200 • Juneau, Alaska 99801
Tel (907) 586-1325 • Fax (907) 463-5480 • www.akml.org

WHEREAS, this application also creates an inequitable impact on small PERS employers versus larger PERS employers; and

WHEREAS, grant funded positions may become subject to termination studies, thus raising the question as to whether municipalities should accept grants that will entail personnel; and

WHEREAS, municipalities, in the future, will find themselves paying more towards the unfunded obligation every pay period for positions that no longer exist, than they will for existing and/or current positions.

NOW, THEREFORE BE IT RESOLVED that the Alaska Municipal League, while supporting a sustainable salary base to pay of the PERS unfunded obligation, believe that AS 39.35.625 and any other similar statutes or regulations that require termination studies, should be repealed.

BE IT FURTHER RESOLVED that the Alaska Municipal League urges the Legislature to amend AS 39.35.255(a)(2), with inflation adjustment language, to provide a more efficient, cost-effective and equitable method of ensuring that the required PERS salary base is maintained.

PASSED AND APPROVED by the Alaska Municipal League on this 19th day of November, 2010.

ALASKA GOVERNMENT
FINANCE OFFICERS ASSOCIATION

RESOLUTION NO. 11-01

A RESOLUTION OF THE ALASKA GOVERNMENT FINANCE OFFICERS ASSOCIATION SUPPORTING SENATE BILL 100 TO END REQUIREMENTS THAT EMPLOYERS WHO TERMINATE SOME OR ALL PARTICIPATION IN THE PUBLIC EMPLOYEES' RETIREMENT SYSTEM OF ALASKA PAY TERMINATION COSTS, AND MAKING THE CHANGES RETROACTIVE

WHEREAS, the Alaska State Legislature, in SB 125, assisted Alaska's PERS employers tremendously by adopting the flat statutory 22% rate of salary to help fund current costs and the unfunded liability of the PERS system; and

WHEREAS, 2 AAC 35.235. Calculation of termination costs states: (a) An employer that proposes to terminate coverage of a department, group, or other classification of employees under AS 39.35.615 or 39.35.957, or terminate participation of the employer under AS 39.35.620 or 39.35.958, must have a termination study completed by the plan actuary to determine the actuarial cost to the employer for future benefits due employees whose coverage is terminated. And (b): In addition to the costs calculated in (a) ...the employer under AS 39.35.620 or 39.35.958, is required to pay to the plan until the past service liability of the plan is extinguished an amount calculated by applying the current past service rate adopted by the board to salaries of the terminated employees as required by AS 39.35.625 (a). This payment shall be made each payroll period or the employer may enter into a payment plan acceptable to the administrator for each fiscal year; and

WHEREAS, the above could potentially cost a PERS employer a great deal of expense for the reduction of even one employee position; and

WHEREAS, in small municipalities a group is often made up of a single position, therefore small municipalities are impacted by these regulations far more often than larger municipalities; and

WHEREAS, small municipalities are finding it difficult to make appropriate staffing decisions due to the substantial cost of termination studies and past service payments on terminated positions; and

WHEREAS, the future financial stability of PERS employers, and their ability to efficiently and effectively manage the delivery of their programs and services, is being directly and negatively impacted by 2 AAC 35.235; and

NOW, THEREFORE, BE IT RESOLVED, that the Alaska Government Finance Officers Association, while supporting the June 30, 2008 sustainable salary base to pay off the PERS unfunded obligation, supports the adoption and passage of Senate Bill 100.

CITY OF NOME, ALASKA

RESOLUTION NO. R-11-03-02

A RESOLUTION SUPPORTING A BILL TO END REQUIREMENTS THAT EMPLOYERS WHO TERMINATE SOME OR ALL PARTICIPATION IN THE PUBLIC EMPLOYEES' RETIREMENT SYSTEM OF ALASKA PAY TERMINATION COSTS, AND MAKING THE CHANGES RETROACTIVE

WHEREAS, the Alaska State Legislature, in SB 125, helped Alaska's PERS employers tremendously by adopting the flat statutory 22% rate of salary to help fund current costs and the unfunded liability of the PERS system, and

WHEREAS, our legislators, in crafting SB 125 struggled hard to come up with a fair and equitable solution to a problem that most of them did not create. Further, in crafting SB 125, legislators never envisioned, intended, nor did they want to create any inequitable financial damage to any PERS member employer, nor negatively interfere with the current or future delivery of any member's services or programs because of SB 125, which the termination studies law does do, and

WHEREAS, 2 AAC 35.235. Calculation of termination costs states: (a) An employer that proposes to terminate coverage of a department, group, or other classification of employees under AS 39.35.615 or 39.35.957, or terminate participation of the employer under AS 39.35.620 or 39.35.958, **must have a termination study completed by the plan actuary** to determine the actuarial cost to the employer for future benefits due employees whose coverage is terminated. And (b): **In addition** to the costs calculated in (a) ...**the employer** under AS 39.35.620 or 39.35.958, **is**

required to pay to the plan until the past service liability of the plan is extinguished an amount calculated by applying the current past service rate adopted by the board to salaries of the terminated employees as required by AS 39.35.625 (a). This payment shall be made each payroll period or the employer may enter into a payment plan acceptable to the administrator for each fiscal year, and

WHEREAS, if a PERS employer reduces its employee count because it made a decision to alter or suspend one of its programs or services, per 2 AAC 35.235 PERS might send it three bills. The first bill will be for the cost of doing a termination study. The second bill will be what the study says you owe the System, due to the employee change(s) you made. The third bill, the big bill, is the one that will require the employer to pay the past service cost (PSC) on each position's salary PERS said needed to be opted out of PERS. The employer will be required to pay the PSC (currently 18.63%) on the salary(s) of the position(s) PERS said the employer needed to opt out, until the unfunded obligation is paid off, maybe 30 years from now. These three bills cumulatively can run from hundreds of thousands of dollars to several millions of dollars, and

WHEREAS, the underlying fear that certain employers would purposely act in a manner that jeopardized payment of the unfunded obligation, and thus shrink the salary base that pays off the unfunded obligations, has simply not happened. The total PERS salary base must be sustained and have reasonable growth, which it has to the tune of about 19% since the 6/30/2008 last pay period floor was set, and

WHEREAS, the future financial stability of PERS employers, and their ability to efficiently and effectively manage the delivery of their programs and services, is being directly impacted and undermined by 2 AAC 35.235, and

WHEREAS, equitable and consistent application of the State's termination law does not seem to be occurring, nor likely can it ever occur given the uniqueness of all PERS employers' positions. A law like this that has such a material financial impact on PERS employers should at a minimum be able to be fairly, equitably, and consistently applied to all PERS employers, yet the Division of Retirement and Benefits has taken the position that the State, with half of the PERS salary base is exempt from termination studies and their financial impacts, and

WHEREAS, there is an inescapably inequitable impact to small PERS employers. This State law, or its application by PERS creates a clear and unconscionable inequitable impact on small PERS employers, versus larger PERS employers. Many smaller communities only have "one" employee for a program or service. If they lose a grant, or simply are faced with budget constraints and they have to cut a person, say a nurse in a school, they'd be required to have a termination study done, then pay all of the related costs because they actually cut a "function or a group," and

WHEREAS, termination studies negatively impact our decision, and our ability to accept grants because of the potential future liability. Grant funded positions may become subject to the termination studies, once the positions are terminated due to grant funding ending. Employers will find themselves paying the past service cost rate on former grant funded position salaries with other revenues. Essentially, if an employer accepts a grant it is possible, depending upon the circumstances, that once those grant funded positions are ended that employer will need to use other dollars to pay the PSC on those former grant funded salaries that the employer is no longer paying, and

WHEREAS, there are no offsets taken into account for salary increases in one area, for decreases in other areas. In other words, the ability for entities to adjust their programs and services to meet their constituent's needs is negatively impacted. If an employer needs to cut in Area A, and add in Area B, that employer could find itself

paying the PSC rate times the salary(s) it is no longer paying in Area A because it shifted its employees to Area B where there is more need, whether driven by local need or a mandate, and

WHEREAS, over time, more and more resources will go toward paying for positions that no longer exist than go to the delivery of services such as fire protection, law enforcement, teaching, recreational services, landfill services, library services, flood control services, emergency response services, and the list goes on from here. Once you start shifting employee resources from one area of responsibility to another, you start a negative downward spiraling in your programs and services, and

WHEREAS, an employer will pay more toward the unfunded obligation every pay period on positions that no longer exist than they will for existing paid positions. This is true because the rate set by statute is capped at 22%. The 22% first covers the current normal cost rate then the difference is applied to the unfunded obligation. The current (FY '11) normal cost rate is 9.33%; therefore, an employer pays 11.67% times the working employee's salary toward the unfunded obligation. This same employer is required to pay 18.63% times the salary of an employee they are no longer paying toward the unfunded obligation. That employer is paying almost 7% more for positions that no longer exist because of the unfunded obligation than it pays on salary dollars for existing positions, and

WHEREAS, termination studies nullify the intent of SB 125 that employers pay the exact same rate. It is clear that one result of these termination studies is that different employers will in fact be paying different net rates, and therefore, there will not be a single uniform contribution rate for PERS employers. The adoption of SB 125 was based on the acknowledgement that we do not have a single-agent, multiple employer PERS system, but rather we have had a consolidated un-equitable cost share system. The intent of SB 125 was that all employers would pay the same exact rate. That

cannot happen when each employer pays a different termination cost amount, or pays none at all, and

WHEREAS, the ~~Borough~~ City supports a sustainable salary base to pay off the PERS unfunded obligations, and

WHEREAS, the termination language in SB 125 was a solution to a problem that never materialized, and it's not needed. The negative consequences, the additional charges and the payments that result from the termination language, were never contemplated or intended by the legislature, and they are destructive, and

WHEREAS, A.S. 39.35.625, that requires termination studies, and any other similar statutes or regulations, should be repealed.

NOW, THEREFORE, BE IT RESOLVED that the City of Nome while supporting a sustainable salary base to pay off the PERS unfunded obligation, believe that AS 39.35.625 and any other similar statutes or regulations that require termination studies, should be repealed and supports adoption and passage of a bill removing termination study requirements from the law.

PASSED AND **SIGNED** THIS 28TH DAY OF March, 2011.

March 24, 2011

Senator Joe Paskvan
Alaska State Capitol, Room #115
Juneau, AK 99801

Dear Senator Paskvan:

As the Mayor of the City of Palmer, please accept the City's support for Senate Bill 100: An Act Relating to Employer Contributions to the Public Employees' Retirement System of Alaska; Relating to Requirements that Employers who Terminate Some or All Participation in the Public Employees' Retirement System of Alaska Pay Termination Costs; and Making the Changes Retroactive.

The City recognizes the work of previous legislators in crafting Senate Bill (SB) 125 and their efforts to find fair and equitable solutions concerning the unfunded PERS mandate and support the adoption of the flat statutory 22% rate of salary to fund current and unfunded costs. *However we do not support the unintended negative consequences of the language which has inflicted financial damage on PERS member employers and interfered with the current and future delivery of services of programs.*

For example, in 2010, the Palmer City Council began the recruitment process for a new city manager. After a lengthy process, the council hired the most qualified candidate, who happened to be a PERS retiree. We contacted the proper authorities and were told that the City must pay for and complete a termination study. We went through the study process and then received a bill for $2500 for the study and a $12,000 termination fee. Additionally, we are required to pay 18.63% of the Manager's salary into PERS each pay period for the position for the entire time that the position was opted out of PERS and/or until the unfunded obligation was paid.

Without questioning the costs, we accepted the process and moved forward. However, in a blatant attempt to interfere with our delivery of services, now PERS has contacted us regarding long standing contracts with our contracted service providers. PERS maintains that the City is attempting to avoid paying PERS costs through the contracts. We simply are not.

City of Palmer

We understand the underlying concern that some municipalities, in an effort to thwart the system, eliminate PERS positions to avoid paying the related PERS costs, thus reducing the overall salary base. However, this simply has not happened. The PERS salary base has had a 19% growth since June 30, 2008.

The current law assumes government administration always expands. When restructuring a department or cutting personnel budget, our city retains an ongoing PERS liability for each position, even the eliminated positions, for an estimated 30 years.

The language in SB 125 takes away our ability to run our City in a manner in which we see fit. The language limits our ability to adjust our programs and services to meet our resident's needs.

The City of Palmer encourages your support of SB 100 and requests that the Bill, as written, remain intact because we believe it rectifies the unintended consequences. Thank you for your assistance in this matter.

Kind regards,

DeLeha Johnson

Re: Support for Senate Bill 100

Dear Honorable Legislators:

Over the past decade, the State Legislature and Administration took the initiative to tackle the PERS liability in a variety of ways, including a complete revamping of the system by passage of SB 125 in 2008 and successful litigation against the prior system actuary. Dramatic changes have been made, all with the goal of eventually reducing the PERS future liability.

Senate Bill 100 fine tunes part of the remodeling process. It recognizes that municipalities may need to eliminate particular programs or shift emphasis from one function to another so long as overall PERS payroll does not drop below the June 30, 2008 level. I recognize that there are divergent points of view regarding the PERS structure. Fixing this small issue is prudent and independent of the larger debates.

I am introducing a Resolution in support of SB 100 at the April 11th City Council meeting.

Thank you for your work on this and the many other difficult issues facing our state.

Sincerely,

Mayor Jerry Cleworth

RE: Senate Bill 100 – PERS Termination Costs

Dear Senators Egan and Paskvan:

Please be advised that the City of Ketchikan would like to go on record as being in support of Senate Bill 100.

Since the adoption of Senate Bill 125, the City has been required to undertake two PERS termination studies to address PERS termination costs arising from the spin-off of its mental health and substance abuse clinic and the potential sale of its telecommunications utility. In May 2010, the City transferred the operations of its mental health and substance abuse clinic to another entity better suited to serve the patients of the clinic. The City was required to pay $5,000 for a termination study, $10,364 in termination costs at the time of the transfer and $89,852 in past service costs for the remaining eight months of 2010. Under current statutes, the City will be required to pay approximately $136,000 annually for the past service cost of the 13 employees who were terminated for the next 25-30 years. The City has identified a buyer for its telecommunications utility but has yet to reach an agreement.

The City believes that the current statutory requirements for the determination and payment of termination and past service costs affects the future financial stability of municipal governments and their ability to efficiently and effectively manage the delivery of their programs and services. It also appears that the statutes are not being applied in an equitable and consistent manner. The City believes that the current law is seriously flawed and that SB 100 is a good faith effort to correct the deficiencies and provide a reasonable basis for addressing the costs associated with the sound management of the municipal labor force.

334 Front Street / Ketchikan, AK 99901 / PH: 907-225-3111 / FX: 907-225-5075

We thank you for bringing this bill forth for consideration by the Alaska State Legislature and hope that it will receive the support that it deserves.

Sincerely,

Robert E. Newell, Jr., CPA
Finance Director

Re: SB100 – PERS Termination Study

To whom this may concern:

The City of Wasilla is most troubled by the ridiculous unmanageable and most unaffordable onset of the PERS Termination Study has caused.

Limited type funding, such as grants or donations can produce excellent opportunities for municipalities to create jobs and produce additional quality of life service to its local residents and surrounding population. When the funding ceases to exist (at no fault of the municipality), the municipality is FORCED into notifying PERS, which triggers a termination study. This costs between $12,000 to $15,000, (which is never budgeted and must come from the municipalities fund balances) just for the study. Then ADD an additional 18.96% (current rate) of the individual's past service cost in perpetuity. This amount can be extremely unbearable by a municipality. Additionally PERS ultimately controls the when, how, and who a municipality can hire or programs a municipality may administer. Municipalities will be forced NOT to accept funds whereby funding may be impaired. This will result in lost jobs and municipalities using current resources to provide better quality of life services to its residents.

What is additionally troublesome to this municipality is when our questions have arisen and contact is made to the R&B office, R&B is unable to answer the questions and we are redirected to the Department of Law for a determination. If the office managing the system can't answer the questions, how are the municipalities suppose to manage its ongoing programs? How is this system going to get the unfunded liability PERS has resolved? It won't! How is this system helping Alaska create jobs and attract new hires to government service? It won't!

The City of Wasilla urges this committee and the entire Alaska Legislature to remove this termination study implication.

Sincerely,

Troy Tankersley
Director of Finance

March 14, 2012

Honorable Governor Sean Parnell
State Capitol Building
Juneau, Alaska 99801

Dear Governor Parnell,

The Alaska Municipal League has been working with your administration and the Legislature on changes that have affected municipalities through the PERS system. I am writing to you in hopes that you will consider our suggestions which will allow us to retain our ability to manage our municipalities in a more efficient and effective manner.

Back in 2007, SB 125 and SB 141 were written and passed in order to attempt to "stop the bleeding" with regards to the PERS/TRS liability. To simplify, three methods ended up being imposed on municipalities in order to help pay off that liability;

1. PERS municipalities are required to pay 22% of salary which is credited to the present costs and the past service liability.
2. The State recorded all 2008 base salaries, with the provision that any PERS employer who did not meet the 2008 floor would be charged 22% on the shortfall amount between the current base salary and the 2008 floor.
3. When a group or classification is removed from the base salary, that removal would trigger a termination study which would determine the financial impact to the system. This liability would be paid, as well as the past service rate on the salary of the eliminated position, by the employer, until the entire PERS unfunded liability is paid off.

Most municipalities appreciate the fact that their PERS rate is capped at 22%, even though this is a huge cost for them. They also agree that one employer should not be able to "manipulate" the system and avoid paying their fair share of the liability by substantially reducing their payroll through contracting or some other means. Although nobody anticipated the number of employers (51) that would today have salaries that are less than the 2008 floor, that provision is a reasonable part of the deal.

The requirement that greatly concerns us is #3 above, which only happens when an entire group or classification of employees is eliminated. This circumstance rarely occurs in a medium or large municipality. Unfortunately, it happens with some frequency in small municipalities and school districts because of the small staff size. Often, there is a single position that represents a group or classification in a small municipality. Elimination of a receptionist position due to budgetary shortfalls results in the whole termination study requirement, the payment of the resultant liability, and payment of the past service rate on a position which is now eliminated for a period of decades, until the total unfunded liability is paid

off. Elimination of grant funded positions due to termination of the grant results in the same process and even a greater impact since funding for the program came from outside sources, but the payment of these PERS liabilities will come from general fund resources.

I believe this is an unintended consequence of the law. It simply doesn't make sense that a small municipality can be severely impacted by the elimination of a single position, yet a large employer could eliminate many positions with no additional PERS costs, as long as a single member of a group or classification is left. The impact on the PERS would be much greater in this large employer example, yet they are not required to pay for a termination study or pay the past service rate on the eliminated positions unless their total salary fell below the 2008 floor.

For the small municipality, it is conceivable that by eliminating a single position, their total salary would also drop below the 2008 floor. In which case they would have to pay the termination study costs and make contributions based on the 2008 floor rather than the current salary base.

Paying the shortfall from the 2008 floor accomplishes what we think was the intent of SB 125. We don't, however, feel that everyone was aware of the ramifications of also imposing termination studies and applicable charges. With municipalities being charged termination costs and making PERS contributions on eliminated positions for decades in the future, it has taken away the ability of Alaska's municipalities to manage their work force, contain costs, or to make necessary changes to their organizational structure.

Due to the sharp downturn to the U.S. economy, and due to grant funding that has disappeared, most municipalities are faced with cutting either staff or services (or both). It is now possible to cost a municipality more to cut costs through downsizing staff than it is to leave programs they cannot afford, in place. This is a crazy way to manage!

The municipalities of AML are asking that the State of Alaska seriously look at the implications of municipality's responsiblity for both the 2008 floor shortfall and termination studies and the costs imposed on local governments. We believe that SB 100, which eliminates the requirement for termination studies, is a reasonable solution and we would be happy to work with anyone from your Administration to help solve this difficult problem.

Sincerely,

Kathie Wasserman
Executive Director

SB 101

<TARGET><BILL>SB 101</BILL><SUBJECT>SB 101</SUBJECT><COMM>SFIN27</COMM></TARGET>

Senator Joe Paskvan

Alaska State Senate • District E • Fairbanks • Ft Wainwright

Sponsor Statement
Senate Bill 101: Entity Transactions Act

Senate Bill 101 conforms to the Uniform Law Commissioners' Model Entity Transaction Act (META). If implemented in the State of Alaska, this legislation will help facilitate transactions between more than one form of entity, improve the existing business climate in Alaska, and help reduce unnecessary administrative and legal burdens currently imposed on Alaska companies.

During the past twenty years many new types of business entities – including limited liability companies, limited liability partnerships, and limited liability limited partnerships – have been recognized under state law. As a result of the proliferation of new entity forms, many businesses now utilize various types of entities in their organizational structures. The relaxation of federal tax rules governing entity classification has led to an increase in the volume of restructuring and acquisition transactions by and among the various types of entity forms.

Because of the lack of clear statutory authority allowing transactions between more than one form of entity, these transactions have often required the use of multiple indirect steps, as opposed to a single transaction.

Senate Bill 101 will offer new statutory authority to permit cross-entity transactions in order to remain responsive to the needs of Alaskan companies and should be enacted in order to allow Alaska businesses the opportunity to engage in cross-entity transactions.

Adopting SB 101 will be an important step towards bringing Alaska more into the mainstream of statutory business law.

I urge your support of this legislation.

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 101

Analysis

The financial impact to the Division for implementing the Alaska Entity Transaction Act (Act) is nominal.

Two states have adopted the Model Entity Transaction Act, Kansas and Idaho. Kansas was not able to provide statistics regarding how many entities have Merged, Converted, Domesticated, or Interest Exchanged in accordance with the Act. Idaho adopted the Act in July of 2007 and has had 196 entities take advantage of the Act.

The filings generated by the Act with be easily absorbed into the staff's normal document processing duties and no additional staff would be required. The Division receives a combined average of 200 regular mergers and conversions annually so a few more will have no impact.

Regulations for fees will need to be established. This should not be costly or time consuming since the fee language used throughout current regulations is adequate to establish fees for the Act.

MEMORANDUM March 30, 2011

SUBJECT: Corrected sectional summary of SB 101 relating to the Alaska Entity Transactions Act (Work Order No. 27-LS0437\A)

TO: Senator Joe Paskvan
Attn: Jeff Stepp

FROM: Theresa Bannister
Legislative Counsel

This sectional summary corrects a citation in the sectional summary of the above-described bill sent to you on March 24, 2011. For sec. 1 of the bill, the citation in parentheses should be changed to AS 06.26.670. No correction is needed for the bill itself.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. In this sectional summary, "new chapter" or "chapter" means the Alaska Entity Transactions Act to be numbered AS 10.55, and "department" means the Department of Commerce, Community, and Economic Development. Please be aware that many terms in the new chapter are defined at the end of the new chapter.

Section 1. Conforming change (AS 06.26.670 repealed).

Section 2. Adds two sections to the article on organic change in AS 10.06, the for-profit corporations chapter. Sec. 10.06.595 allows, with exceptions, corporations to enter into mergers, interest exchanges, conversions, or domestications under the new chapter (the Alaska Entity Transactions Act). States that specific provisions do not apply to certain transactions covered by the new chapter. Sec. 10.06.600 defines terms for the article to conform to the application of the new chapter.

Section 3. Conforming and editorial change (AS 10.15.450 repealed).

Section 4. Adds AS 10.20.285 as a new section in the nonprofit corporations chapter to state that a corporation may, under the new chapter, enter into mergers, interest exchanges, conversions, and domestications that are not covered by certain sections of the nonprofit corporations chapter.

Section 5. Adds AS 10.30.058 as a new section in the chapter on cemetery organizations to state that cemetery associations and nonprofit cemetery corporations may enter into mergers, interest exchanges, conversions, and domestications under the new chapter.

Section 6. Adds a new section to the chapter on religious corporations (AS 10.40) to state that a corporation formed under AS 10.40 may enter into mergers, interest exchanges, conversions, and domestications under the new chapter.

Section 7. Amends AS 10.45.240, a section of the professional corporations chapter, to state that the provision in the state's for-profit corporations code relating to entering into mergers, interest exchanges, conversions, and domestications under the new chapter applies to professional corporations.

Section 8. Adds a new section to the limited liability company chapter to state that a limited liability company may, under the new chapter, enter into mergers, interest exchanges, conversions, and domestications that are not covered by certain sections of the limited liability company chapter.

Section 9. Conforming change (AS 10.50.570 has been repealed).

Section 10. Adds definitions to AS 10.50, the chapter on limited liability companies, conforming to the application of the new chapter.

Section 11. Adds the new chapter containing the Alaska Entity Transactions Act.

Sec. 10.55.103. Indicates how the new chapter relates to other laws, including principles of law and equity.

Sec. 10.55.104. Requires entities to satisfy certain governmental notice or approval requirements for mergers when involved in an interest exchange, conversion, or domestication. Addresses the diversion of property held for charitable purposes.

Sec. 10.55.105. Includes a filing under the chapter in an entity's public record.

Sec. 10.55.106. Provides that achieving a result under the new chapter does not prevent achieving the same result under another law.

Sec. 10.55.107. Allows a transaction plan (under certain conditions) to refer to facts that can be found outside the plan, even if the facts are not within the control of a party to the transaction.

Sec. 10.55.108. States that approval of a transaction by the unanimous vote or consent of an entity's interest holders satisfies the chapter's transaction approval requirements, unless, for a domestic entity, the organic law or organic rules state otherwise.

Sec. 10.55.109. Addresses when dissenters' rights are available to an interest holder. As a default provision, states that the interest holder may use the procedures under AS 10.06.576.

Sec. 10.55.110. Lists the entities that may not take part in a transaction under the chapter. Includes, among others, financial institutions and insurers.

Sec. 10.55.120. Requires that the name that a domestic entity takes under this chapter comply with certain requirements.

Sec. 10.55.201. Provides the general authorization for mergers. Lists certain excluded transactions.

Sec. 10.55.202. States that a domestic entity may become a party to a merger by approving a plan of merger. States what the plan must contain and allows it to contain any other provision not prohibited by law.

Sec. 10.55.203. States that a plan of merger is not effective unless it has been approved. Describes what approval is required.

Sec. 10.55.204. Describes how a plan merger for a domestic merging entity may be amended. Allows the plan to be abandoned and states how this may be done, depending on whether the statement of merger has become effective or been filed.

Sec. 10.55.205. Requires a statement of merger to be signed and filed with the department. Identifies what the statement of merger must contain and allows it to contain any other provision not prohibited by law. Requires, if a domestic entity is the surviving entity, that the surviving entity's public organic document satisfy this state's requirements, with certain exceptions. Allows a signed plan of merger with the required contents to be filed with the department instead of a statement of merger and to have the same effect as a statement of merger. States when the statement of merger becomes effective.

Sec. 10.55.206. Lists the effects of a merger on the entities involved. States, with exceptions, that a merger does not give the rights that an interest holder, governor, or third party would otherwise have when there is a dissolution, liquidation, or winding up. Addresses interest holder liability when a merger becomes effective. For foreign entities that are the surviving entities, allows for service of process on the entity regarding liabilities and provides for appointment of the department as the entity's agent for the service of process. When a merger becomes effective, cancels the foreign qualification of a foreign merging entity that is not the surviving entity.

Sec. 10.55.301. Provides the general authorization for a domestic or foreign entity to acquire the interests of other entities or for its interests to be acquired by other entities. Conditions the foreign entity's authorization on the authorization of the foreign entity's

jurisdiction or organization. Provides a special interest exchange rule for certain protected agreements that have domestic entity merger provisions but no interest exchange provisions. Excludes certain share exchanges under AS 10.06 (the for-profit corporations code).

Sec. 10.55.302. States that a domestic entity may be an acquired entity in an interest exchange by approving an interest exchange plan. States what the plan must contain and allows it to contain any other provision not prohibited by law.

Sec. 10.55.303. States that a plan of interest exchange is not effective unless it has been approved. Describes what approval is required.

Sec. 10.55.304. Describes how an interest exchange plan for a domestic acquired entity may be amended. Allows the plan to be abandoned and states how this may be done, depending on whether the statement of interest exchange has become effective or been filed.

Sec. 10.55.305. Requires a statement of interest exchange to be signed and filed with the department. Identifies what the statement of interest exchange must contain and allows it to contain any other provision not prohibited by law. Allows, for a domestic acquired entity, a signed plan of interest exchange with the required contents to be filed with the department instead of a statement of interest exchange and to have the same effect as a statement of interest exchange. States when the statement of interest exchange becomes effective.

Sec. 10.55.306. Lists the effects of an interest exchange on the entities involved. States, with exceptions, that an interest exchange does not give the rights that an interest holder, governor, or third party would otherwise have when there is a dissolution, liquidation, or winding up. Addresses interest holder liability.

Sec. 10.55.401. Provides the general authorization for conversion of domestic and foreign entities. Conditions the conversion authorization of foreign entities to the law of the foreign jurisdiction. Provides a special rule for certain protected agreements that have domestic entity merger provisions but no conversion provisions.

Sec. 10.55.402. States that a domestic entity may convert to a different type of entity by approving a plan of conversion. States what the plan must contain and allows it to contain any other provision not prohibited by law.

Sec. 10.55.403. States that a plan of conversion is not effective unless it has been approved. Describes what approval is required.

Sec. 10.55.404. Describes how a plan of conversion may be amended. Allows the plan to be abandoned and states how this may be done, depending on whether the statement of conversion has become effective or been filed. Indicates what the statement of

abandonment must contain when done after a statement of conversion is filed but the filing is not yet effective.

Sec. 10.55.405. Requires a statement of conversion to be signed and filed with the department. Identifies what the statement of conversion must contain and allows it to contain any other provision not prohibited by law. Requires, if the converted entity is a domestic entity, the entity's public organic document to satisfy this state's requirements, with certain exceptions. Allows, for a domestic converting entity, a signed plan of conversion with the required contents to be filed with the department instead of a statement of conversion and to have the same effect as a statement of conversion. States when a statement of conversion becomes effective.

Sec. 10.55.406. Lists the effects of a conversion on the entities involved. States, with exceptions, that a conversion does not give the rights that an interest holder, governor, or third party would otherwise have when there is a dissolution, liquidation, or winding up. Addresses interest holder liability. Provides that a foreign entity that is the converted entity may be served with process in this state regarding liabilities and appoints the commissioner as the agent to receive the process. Provides that the foreign qualification of a converting entity that is a qualified foreign entity is cancelled when the conversion becomes effective. Provides that a conversion does not require an entity to wind up its affairs and does not constitute or cause a dissolution of the entity.

Sec. 10.55.501. Provides the general authorization for a domestic entity to become a foreign entity of the same type, if the law of the foreign jurisdiction authorizes the domestication. Provides the general authorization for a foreign entity to become a domestic entity of the same type in this state, if the law of the foreign jurisdiction authorizes the domestication. Provides a special rule for certain protected agreements that have merger provisions relating to domestic entities but no domestication provisions.

Sec. 10.55.502. States that a domestic entity may become a foreign entity in a domestication by approving a plan of domestication. States what the plan must contain and allows it to contain any other provision not prohibited by law.

Sec. 10.55.503. States that a plan of domestication is not effective unless it has been approved. Describes what approval is required.

Sec. 10.55.504. Describes how a plan of domestication of a domestic entity may be amended. Allows the plan to be abandoned and states how this may be done, depending on whether the statement of conversion has become effective or been filed. Indicates what the statement of abandonment must contain after the statement of conversion has been filed.

Sec. 10.55.505. Requires a statement of domestication to be signed and filed with the department. Identifies what the statement of domestication must contain and allows it to contain any other provision not prohibited by law. Requires, if the domesticated entity is

a domestic entity, the entity's public organic document to satisfy this state's requirements, with certain exceptions. Allows, for a domestic domesticating entity, a signed plan of domestication with the required contents to be filed with the department instead of a statement of domestication and to have the same effect as a statement of domestication. States when a statement of domestication becomes effective.

Sec. 10.55.506. Lists the effects of a domestication for the entities involved. States, with exceptions, that a domestication does not give the rights that an interest holder, governor, or third party would otherwise have when there is a dissolution, liquidation, or winding up. Addresses interest holder liability. Provides that a foreign entity that is the domesticated entity may be served with process in this state regarding liabilities and appoints the commissioner as the agent to receive process. Provides that the foreign qualification of a domesticating entity that is a qualified foreign entity is cancelled upon domestication. Provides that a domestication does not require an entity to wind up its affairs and does not constitute or cause a dissolution.

Sec. 10.55.601. States the requirements for a document to meet in order to be entitled to be filed by the department under this chapter. Requires payment, or arrangement for payment, of the filing fee and any other required tax, license fee, or penalty.

Sec. 10.55.602. Allows the department to establish and furnish non-mandatory forms for the documents filed under this chapter.

Sec. 10.55.603. Directs the department to collect fees for being served with process, for copying documents, for certifying documents, and for filing documents under this chapter. Directs the department to establish the amount of the fees by regulation.

Sec. 10.55.604. Establishes when a document accepted for filing becomes effective.

Sec. 10.55.605. Allows an entity to correct a filed document under certain circumstances. Indicates how to make the correction. States when the correction is effective.

Sec. 10.55.606. Directs the department to file eligible documents. Indicates how the department is to file a document. Addresses the situation when the department refuses to file a document. Describes the department filing duty as ministerial and as not affecting the validity of the document or the correctness of the information in the document, and as not creating a presumption of validity, invalidity, or information correctness or incorrectness.

Sec. 10.55.607. Allows an appeal if the department refuses to file a document. Allows the court's decision to be appealed as in other civil proceedings.

Sec. 10.55.608. Provides that a department certificate (delivered with a copy of the filed document) conclusively establishes that the original is on file.

Sec. 10.55.609. Establishes a criminal penalty for signing a document knowing it is false for delivery to the department.

Sec. 10.55.610. Allows the department to submit interrogatories (formal questions) to an entity that is a party to a transaction to determine if the entity has complied with the chapter. Indicates when the answers are due and establishes certain criteria for the answers, including who is to answer the questions. Allows a court petition to be filed about the due date, modification, or setting aside of the questions.

Sec. 10.55.615. Establishes that the questions requested by the department and the answers are confidential. Establishes when the department may disclose information from them.

Sec. 10.55.620. Establishes a criminal penalty for failing to answer interrogatories from the department. Allows the department to delay or base its filing of a document on receiving proper answers and on the information in the answers.

Sec. 10.55.625. Gives the department the necessary power to implement the chapter.

Sec. 10.55.701. Requires that, when applying and construing this chapter, consideration must be given to promoting consistency among enacting states.

Sec. 10.55.702. Indicates how the chapter relates to the Electronic Signatures in Global and National Commerce Act.

Sec. 10.55.901. Defines terms for the new chapter.

Sec. 10.55.902. Gives the new chapter a short title: Alaska Entity Transactions Act.

Section 12. Amends a section in the partnership chapter to create an exception for the new chapter relating to the consent required to become a partner.

Section 13. Amends a section in the partnership chapter to create an exception for the new chapter that relates to a partner's transferable interest. States that a partner's interest is personal property, whether or not transferable.

Section 14. Conforming change (AS 32.06.902, 32.06.903, and 32.06.904 are repealed).

Section 15. Conforming change (AS 32.06.902, 32.06.903, and 32.06.904 are repealed).

Section 16. Amends the partnership chapter to remove the ability of a partnership to merge with a limited partnership under that chapter.

Section 17. Amends the partnership chapter to conform merger plans to the change in bill section 16.

Section 18. Amends the partnership chapter to conform the merger approval requirements to the change in bill section 16.

Section 19. Amends the partnership chapter to provide that a merger between a partnership and another form of entity is covered by the new chapter.

Section 20. Amends the partnership chapter to conform the provisions about the effect of a merger to the change in bill section 16.

Section 21. Amends the partnership chapter to conform the statement of merger to the change in bill section 16.

Section 22. Conforming change (AS 32.06.902, 32.06.903, and 32.06.904 are repealed). Deletes reference to AS 32.06.908. States that partnerships or limited partnerships may enter into mergers, interest exchanges, conversions, and domestications under the new chapter or in any other manner provided by law.

Section 23. Adds a definition of "domestic limited liability partnership."

Section 24. Adds definitions to the partnership chapter.

Section 25. Adds a provision allowing for amending a limited partnership certificate by filing a plan of merger, interest exchange, conversion, or domestication under the new chapter.

Section 26. Amends the limited partnership chapter to state that a partner's interest is personal property, whether or not the interest is transferable.

Section 27. Amends the limited partnership chapter to require that a limited partnership keep at its office a copy of any statement of merger, interest exchange, conversion, or domestication filed under the new chapter.

Section 28. Amends the limited partnership chapter to remove conversions from the application of the partnership chapter (AS 32.06) and to make the application of AS 32.06 to cases not covered by the limited partnership chapter subject to the new chapter.

Section 29. Amends the limited partnership chapter to change the definition of "limited partnership" to exclude certain entities and to limit the term to entities under the chapter.

Section 30. Repeals certain statutes.

Section 31. Describes how certain changes in the bill make indirect court rule amendments.

Section 32. Allows the department to get started on regulations for the Act.

Section 33. Provides a saving clause for actions and proceedings that are begun, or rights that have accrued, before the bill's effective date.

Section 34. Makes bill section 32 go into effect immediately.

Section 35. Gives the bill, except as provided in sec. 34, an effective date of July 1, 2013.

If I may be of further assistance, please advise.

Re: Update of Alaska Business Statutes

BACKGROUND

During the past twenty years many new types of business entities – including limited liability companies, limited liability partnerships, and limited liability limited partnerships – have been recognized under state law. As a result of the proliferation of new entity forms, many businesses now utilize various types of entities in their organizational structures. The relaxation of federal tax rules governing entity classification has led to an increase in the volume of restructuring and acquisition transactions by and among the various types of entity forms. These transactions have often required the use of multiple indirect steps, as opposed to a single transaction, because of the lack of clear statutory authority allowing transactions between more than one form of entity.

Many states have addressed this need by providing new legislation to facilitate transactions between more than one form of entity. Some states have added provisions in their individual entity laws to authorize entities organized under each law to convert to other forms of entities or to allow mergers between entity forms. For example, Delaware has adopted separate provisions in both its General Corporation Law and its Limited Liability Company Act that, functioning together, allow a merger between a corporation and a limited liability company. See DEL. CODE ANN. tit. 8, §§ 263,264 (2008) (corporations), DEL. CODE ANN. tit. 6, §§ 18-209 (2008) (limited liability companies). Other states have taken a more comprehensive approach and have chosen to enact new statutes that address cross-entity mergers and conversions in one act and central location. These statutes, known as "junction box" statutes, contain provisions allowing all types of corporate and unincorporated entities to engage in mergers, conversions,

and, in some cases, interest exchanges and domestication transactions. See ALA. CODE §§I 10-15-1 to -7 (2007); COLO. REV. STAT. ANN. §§ 7-90-101 to -604 (West 2008).

ALASKA LAW

As noted above, many states have adopted new or amended existing provisions to facilitate transactions between different entity forms. While states have taken varying approaches to inter-entity transactions, virtually all states have addressed certain types of transactions. In fact, Alaska is the ***only*** state that does not authorize a limited liability company to merge with another form of entity.

Currently Alaska law authorizes only the following mergers, consolidations and conversions:

- two or more domestic corporations may merge, Alaska Stat. § 10.06.530;
- one or more foreign corporations and one or more domestic corporations may be merged or consolidated, or participate in an exchange, Alaska Stat. § 10.06.562;
- a limited liability company may merge or consolidate with or into a limited liability company or a foreign limited liability company, Alaska Stat. § 10.50.500;
- any other entity may convert to a limited liability company, Alaska Stat. § 10.50.570;
- any other entity may convert to a limited partnership, Alaska Stat. § 32.11.095; and
- a partnership may be merged with one or more partnerships or limited partnerships. Alaska Stat. § 32.06.905.

As a result of the limited provisions governing inter-entity transactions, Alaska businesses are required to complete restructuring transactions in two or three indirect steps rather than directly in a single transaction. For example, an Alaska limited liability company cannot merge directly into an Alaska corporation. Nevertheless, a similar result can be obtained by (i) forming a foreign limited liability company; (ii) merging the Alaska limited liability company with and into the foreign limited liability company; (iii) converting the surviving entity of the merger, the foreign limited liability company, into a foreign corporation pursuant to the provisions of that state's business laws; and (iv) merging the foreign corporation with and into an Alaska corporation. Likewise, an Alaska limited liability company could be converted into an Alaska corporation through the use of foreign entities to facilitate the conversion.

While it may be theoretically possible to attain many of the same results accomplished by a comprehensive inter-entity merger or conversion statute without having such a statute

available, it is certainly much more efficient and economical to accomplish inter-entity transactions in a single step. As noted by the National Conference of Commissioners on Uniform State Laws ("NCCUSL") in connection with the adoption of the Model Entity Transactions Act (discussed infra):

> The problem with mergers, conversions, interest exchanges and changing the location of entities is that an entity involved may have to be dissolved to accomplish the desired end. This means technically winding down the business, satisfying creditors and interest holders in the wind down, and potentially incurring adverse tax consequences. This is a burden when the objective is not to dissolve the business but to continue it in another form or another location. The hazards of the process are many and very costly. A statute that allows these events to occur without dissolving at least one of the entities involved will increase efficiency and lower costs . . . Cross-entity transactions should be available.

Model Entity Transactions Act Summary, (2007), at http://www.nccusl.org/Update/ActSearchResults.aspx. Adopting new legislation in Alaska to facilitate transactions between more than one form of entity would improve the existing business climate in Alaska and help reduce unnecessary administrative and legal burdens currently imposed on Alaska companies.

MODEL & STATE LAW PROVISIONS

Both NCCUSL and the American Bar Association ("ABA") have undertaken efforts in recent years to facilitate transactions between entities. NCCUSL included provisions permitting entities to engage in mergers with other entity forms and authorizing the conversion of one form of entity to another in the Uniform Limited Liability Company Act (1996 and 2006), Uniform Limited Cooperative Association Act (2007), Uniform Partnership Act (1997) and Uniform Limited Partnership Act (2001). Similarly, the ABA amended the Model Business Corporation Act in 1999 to authorize mergers between corporations and other forms of entities, and again in 2002 to authorize the conversion of entities into and out of the corporate form. Unlike a junction box statute, which applies to transactions between multiple entities, each of these statutes only apply if an entity of the type formed under the statute is a party to the transaction.

Given the inherent limitations in the acts previously adopted, NCUSSL and the ABA set out to draft a comprehensive junction box statute that would allow differing forms of entities to merge with each other or convert to other entity forms. The Model Entity Transactions Act ("META"), the most recent version of which is attached to this memorandum as Appendix A, originally was adopted by NCCUSL and the ABA in 2004 and provides a comprehensive statutory framework that addresses all varieties of cross-entity transactions. Under META, all types of corporate and unincorporated organizations may engage in mergers, conversions, interest exchanges (essentially a triangular merger accomplished without the use of a transitory

third party), and domestications (a transaction in which an existing entity moves is jurisdiction of organization to another state while still retaining whatever form it had before the domestication).

Implementation of META or a similar junction box statute would require conforming amendments and repeals to Alaska's existing business statutes. Appendix 2 of META provides a guide for analyzing existing statutes to determine which statutes should be amended or repealed and whether additional provisions should be added. As noted in Appendix 2, two goals should be paramount in deciding how to approach revisions to existing state laws: "(1) avoiding any potential inconsistency between META's provisions and similar provisions in the state's entity statutes; and (2) making the interplay between META and the state's various entity laws relatively easy to navigate." Model Entity Transactions Act, Appendix 2, (2007), at http://www.nccusl.org/Update/ActSearchResults.aspx. The appendix sets forth four separate approaches to achieving this cohesion. The simplest method would likely be to be limit existing Alaska entity laws to "same-type transactions". This approach would likely require the least amount of alterations to existing Alaska entity laws, as few amendments should be necessary for entity laws that do not have any cross-type merger provisions. Id. At 91.

Some states have found it useful to expand the coverage of their junction box statutes beyond inter-form mergers and conversions to include administrative matters such as entity names, registered agent, effects of dissolution, filings with the filing officer and treatment of foreign entities. These statutes seek to coordinate the non-substantive rules applicable to differing organizational forms, where appropriate, into a comprehensive junction box statute in order to eliminate inadvertent differences that may be set forth in existing entity laws. For instance, "where one statute speaks of a sixty-day grace period for filing a corrective report while another speaks of a two-month period, most would agree that it makes sense to coordinate the provisions..." Robert R. Keatinge, Plumbing and Other Transitional Issues. 58 Bus. Law 1051, 1058 (2003).

Although Alaska's need to act is greatest in the area of inter-entity mergers and conversions, it may be prudent to undertake efforts to coordinate the administrative rules governing Alaska business organizations in connection with any proposed legislation. Attached as Appendix B is a copy of Colorado's Corporations and Associations Act, COLO. REV. STAT. ANN. §§ 7-90-101 to -604. The Corporations and Associations Act is an example of a comprehensive junction box statute that addresses both inter-entity mergers and conversions and administrative matters such as filings, annual reports, entity names and registered agents. As with the adoption of META, implementation of a more comprehensive junction box statute would require a thorough analysis of the overall existing statutory framework in Alaska and could require significant amendments to existing state law.

RECOMMENDATIONS & CONCLUSION

Alaska is in need of new statutory authority to permit cross-entity transactions in order to remain responsive to the needs of Alaskan companies. While Alaska could adopt a patchwork of legislative amendments to its existing entity laws, adoption of a comprehensive junction box statute would help to avoid inconsistencies and conflicts between existing statutes. META is a general statute that is designed to fit with any state's existing entity laws and should be enacted

in an appropriate form in Alaska in order to allow Alaska businesses the opportunity to engage in cross-entity transactions. Adopting META, or enacting similar provisions adopted by other states, would be an important step towards bringing Alaska more into the mainstream of statutory business law.

Entity Transactions Act Summary

The Uniform Law Commissioners have provided unincorporated organization law to the states since the first Uniform Partnership Act in 1914. The current portfolio of uniform acts on unincorporated organizations includes the Uniform Partnership Act (1997), the Uniform Limited Partnership Act (2001), the Uniform Limited Liability Company Act (1996) and the Uniform Unincorporated Nonprofit Organization Act (1996). Corporate law has been the focus of the American Bar Association for at least 50 years. It is responsible for the Model Business Corporation Act and the Model Not-for-Profit Corporation Act. It also prepared a Prototype Limited Liability Company Act. Partnerships, limited partnerships, limited liability partnerships, limited liability limited partnerships, limited liability companies and corporations are the basic entities under American law (business trusts and cooperatives are also growing in importance) that provide the means to aggregate capital, and limit liability where applicable, along with the structure to organize an enterprise, whether it is for profit or nonprofit.

All of this uniform and model act work has made American law particularly efficient for entrepreneurs. Anyone who establishes and develops a business has choices available for the entity that may be chosen to do business. As a business grows, these options also allow for some changes in form and location of the entity chosen. For example, a small enterprise that chooses to be a partnership initially has the opportunity to reorganize as a corporation when the business is big enough to want the advantage of the corporate form. Not-for-profit activities also have a greater array of organizational forms, now including the limited liability company and the limited partnership along with the not-for-profit corporation. American law is particularly flexible and responsive to the needs of both the for-profit and the not-for-profit sectors. American business organization law is the envy of the rest of the world for this reason.

However, more can be done. There is no comprehensive statutory framework for changing entity form, whether for merger of entities, conversion of one entity to another, exchanging interests to merge businesses without merging the entities (called an interest exchange), or for changing the location of the entity (called a domestication). The newest uniform acts on limited liability companies and limited partnerships have limited provisions. The Model Business Corporation Act has been modified to do some of these kinds of transactions. The comprehensive effort had not been done until the Model Entity Transactions Act (META), promulgated by the Uniform Law Commissioners and the American Bar Association in 2004.

The Uniform Law Commissioners and the American Bar Association have a long relationship going back to the founding of the Commissioners. Every drafting committee the Commissioners authorize to work on an act has advisors from the American Bar Association. However, in this instance the need to draw together corporate law with the law of unincorporated organizations, meant a more formal joint relationship was necessary. META is a product of this joint relationship.

The problem with mergers, conversions, interest exchanges and changing the location of entities is that an entity involved may have to be dissolved to accomplish the desired end. This means technically winding down the business, satisfying creditors and interest holders in the winding down, and potentially incurring adverse tax consequences. This is a burden when the objective is not to dissolve the business but to continue it in another form or another location. The hazards of the process are many and very costly. A statute that allows these events to occur without dissolving at least one of the entities involved will increase efficiency and lower costs. A general statute, not limited in scope to less than all of the kinds of entities commonly involved in these transactions, is highly desirable. Cross-entity transactions should be available. That statute should also be one that can be fit with the existing entity law in a state so that it is not necessary to repeal all the existing entity law to accomplish the objective. META is the general statute that is designed to fit in with a state's existing entity law to accomplish the objective.

META governs the course of four kinds of transactions: merger of one entity with another, conversion of an entity to another kind of entity, an interest exchange between two entities so that one of them is controlled by the other without actually merging the two entities and the domestication of an entity originally organized in one state in another state. A merger occurs when one entity acquires another entity and the result is a single entity composed of both the original entities. A conversion occurs when one kind of entity converts to another kind, i.e., a limited liability company converts into a business corporation. An interest exchange occurs when interest holders transfer their interests in one entity to another for interests in the second entity. For example, the holders of all interests in a limited partnership transfer their interests to a corporation in return for shares of stock in the corporation. A domestication occurs when an entity formed under the laws of one state becomes an entity formed in another state, extinguishing its entity status in the first state. The articles of META essentially provide the procedures to accomplish each of these transactions.

META authorizes each of these kinds of transactions. It authorizes different entities to merge, i.e., a corporation may merge with a limited partnership. It authorizes a partnership to convert to a limited liability company. An interest swap may occur between a limited partnership and a limited liability company. A corporation may change its place of organization from one state to another. These are examples of the kinds of transactions authorized. They can occur between an entity in one state and a foreign entity formed originally in another state, providing that the law of the foreign state permits such a transaction.

In each kind of transaction, there must be a plan that is approved by the interest holders in the entities. The plan generally describes the transaction and its effect in detail. Approval of the plan proceeds according to the organic statute and rules that govern the pre-existing entities, or if none, by unanimous consent of all interest holders. If, for example, a partnership agreement governing a limited partnership provides for consent of partners to one of the kinds of transactions subject to META, the agreement would be the organic rules that would determine the approval of the plan. Otherwise all the partners would have to consent.

Once a plan is approved, a statement relevant to the transaction must be filed in the office in a state in which entity statements or charters are normally filed. The filing puts the transaction and the identity of the entity that survives in public records. That entity becomes the entity with the capacity to do business and it has the applicable liability shield from that time onward.

The objective in these procedures is to make sure that no interest is extinguished in the process of any of the transactions under META, whether a merger, conversion, interest exchange or domestication. This is true for an interest holder such as a shareholder in a corporation or holder of a partnership interest. It is also true for creditor interests that pre-existed the given transaction. The point of the procedures is to end with an entity that continues the business of those entities it succeeds without extinguishing obligations incurred by these entities in a seamless, nondisruptive transfer.

There are a few exclusions from META. If mergers in a state are already governed by the merger provisions in a state's enactment of a uniform or model act, META will not apply or displace those provisions. The same is true for interest exchanges when a state has the Model Business Corporation Act. Not all entities will necessarily be governed by META. There are special corporations, for example, that should not be included, depending upon their status in a state. META allows for them to be specifically excluded.

META is a model act, not a uniform act, although several of the acts affected are uniform acts. Although there is some uniformity in entity law, i.e., partnership law, it is not true across the full spectrum of entity law. This means that using META from state to state is likely to mean much adaptation of META provisions. The effect of utilizing META may have the impact of introducing more uniformity of law relating to entities from state to state, but use of its language in a uniform way cannot be expected.

Business organization law and the law relating to not-for-profit organizations has been much refurbished, updated and improved in the 30 years preceding 2004, the year of META. Development has been dynamic and good for economic function in the entire United States. META adds another element to this dynamic progression of law relating to these entities. It is good for business and not-for-profit ventures alike. It should be studied, adapted and enacted in every state as soon as practicable.

Model Entity Transactions Act

According to the Uniform Law Commissioners (ULC), anyone who establishes and develops a business in America has choices available for the entity that may be chosen to do business. As a business grows, these options also allow for some changes in form and location of the entity chosen. For example, a small enterprise that chooses to be a partnership initially has the opportunity to reorganize as a corporation when the business is big enough to want the advantage of the corporate form. Not-for-profit activities also have a greater array of organizational forms, now including the limited liability company and the limited partnership along with the not-for-profit corporation. American law is particularly flexible and responsive to the needs of both the for-profit and the not-for-profit sectors.

However, until recently, there was no comprehensive statutory framework for changing entity form, whether for merger of entities, conversion of one entity to another, exchanging interests to merge businesses without merging the entities (called an interest exchange), or for changing the location of the entity (called a domestication). The problem with mergers, conversions, interest exchanges and changing the location of entities is that an entity involved may have to be dissolved to accomplish the desired end. This means technically winding down the business, satisfying creditors and interest holders in the winding down, and potentially incurring adverse tax consequences. This is a burden when the objective is not to dissolve the business but to continue it in another form or another location. The hazards of the process are many and very costly. A statute that allows these events to occur without dissolving at least one of the entities involved will increase efficiency and lower costs. A general statute, not limited in scope to less than all of the kinds of entities commonly involved in these transactions, is highly desirable. Cross-entity transactions should be available. That statute should also be one that can be fit with the existing entity law in a state so that it is not necessary to repeal all the existing entity law to accomplish the objective. The ULC/American Bar Association Model Entity Transaction Act (META) is a general statute that is designed to fit with a state's existing entity law to accomplish the objective.

META governs four kinds of transactions: *merger* of one entity with another, *conversion* of an entity to another kind of entity, an *interest exchange* between two entities so that one of them is controlled by the other without actually merging the two entities and the *domestication* of an entity originally organized in one state in another state. A merger occurs when one entity acquires another entity and the result is a single entity composed of both the original entities. A conversion occurs when one kind of entity converts to another kind, i.e., a limited liability company converts into a business corporation. An interest exchange occurs when interest holders transfer their interests in one entity to another for interests in the second entity. For example, the holders of all interests in a limited partnership transfer their interests to a corporation in return for shares of stock in the corporation. A domestication occurs when an entity formed under the laws of one state becomes an entity formed in another state, extinguishing its entity status in the first state. The articles of META essentially provide the procedures to accomplish each of these transactions.

META authorizes each of these kinds of transactions. It authorizes different entities to merge, i.e., a corporation may merge with a limited partnership. It authorizes a partnership to convert to a limited liability company. An interest swap may occur between a limited partnership and a limited liability company. A corporation may change its place of organization from one state to another. These are examples of the kinds of transactions authorized. They can occur between an entity in one state and a foreign entity formed originally in another state, providing that the law of the foreign state permits such a transaction.

In each kind of transaction, there must be a plan that is approved by the interest holders in the entities. The plan generally describes the transaction and its effect in detail. Approval of the plan proceeds according to the organic statute and rules that govern the pre-existing entities, or if none, by unanimous consent of all interest holders. If, for example, a partnership agreement governing a limited partnership provides for consent of partners to one of the kinds of transactions subject to META, the agreement would be the organic rules that would determine the approval of the plan. Otherwise all the partners would have to consent.

Once a plan is approved, a statement relevant to the transaction must be filed in the office in a state in which entity statements or charters are normally filed. The filing puts the transaction and the identity of the entity that survives in public records. That entity becomes the entity with the capacity to do business and it has the applicable liability shield from that time onward.

The objective in these procedures is to make sure that no interest is extinguished in the process of any of the transactions under META, whether a merger, conversion, interest exchange or domestication. This is true for an interest holder such as a shareholder in a corporation or holder of a partnership interest. It is also true for creditor interests that pre-existed the given transaction. The point of the procedures is to end with an entity that continues the business of those entities it succeeds without extinguishing obligations incurred by these entities in a seamless, nondisruptive transfer.

META is a model Act, not a uniform Act. This means states generally will have to adapt some META provisions to their own statutes. To do this, states must first identify all of the existing statutory provisions that allow for same-type (all of the entities involved are the same, e.g., a merger between two corporations) and cross-type (more than one type of entity is involved in the transaction, e.g., a merger between a corporation and a partnership), mergers, interest exchanges, conversions, and domestications for any kind of entity. An entity is defined in Section 102 to include all types of partnerships (general partnerships, limited liability partnerships, limited partnerships, and limited liability limited partnerships), limited liability companies, all types of corporations (including non-profit corporations, close corporations in those states that have separate statutes for close corporations, and professional corporations), business trusts, cooperatives, and unincorporated nonprofit associations (at least in states that have the Uniform Unincorporated Nonprofit Associations Act or have statutes that allow an unincorporated nonprofit organization to hold property in its own name). Many states have statutes governing other types of business organizations. Texas, for example, has special statutory provisions for real estate investment trusts (in most other states, REITs would be considered a type of business trust). These special types of entities should also be included in the review process.

The next step is to analyze the overall existing statutory framework for same-type and cross-type transactions. This analysis will reveal that there are gaps in coverage for many of the types of transactions covered by the act, either directly or by default, even in those states that have adopted Chapter 9 and 11 of the Model Business Corporation Act and the uniform unincorporated organization acts.

Every state will have provisions for mergers of corporations into other corporations but not all states authorize interest exchanges between corporations (the corporate statutes generally refer to these as share exchanges) and only a few states specifically authorize corporations to enter into merger or interest exchange transactions with other types of organizations. Moreover, very few existing corporate statutes have provisions for conversions of corporations into other types of entities or authorize corporations to domesticate in another state.

The same-type and cross-type landscape with respect to unincorporated entities is even less complete. The Uniform Partnership Act (1997) (RUPA), which has been adopted in approximately 2/3 of the states (and in the District of Columbia, Puerto Rico and the Virgin

Islands) only authorizes mergers and conversions of general partnerships and limited partnerships. It does not allow conversions into any other type of entity or mergers with any other type of entity; nor does it authorize interest exchange or domestication transactions. Several states that have adopted RUPA have provisions allowing same-type and cross-type conversions and mergers of general partnerships with not only limited partnerships but also with corporations and limited liability companies; and a few RUPA states have expanded the list to include any business entity (it is unclear in many of these states, however, whether these statutes apply to non-profit entities). With the exception of Ohio, which authorizes mergers and consolidations of general partnerships with other partnerships and "other domestic or foreign entities," there are apparently no same-type or cross-type provisions in the general partnership statutes of the approximately one-third of the states that still have the 1914 Uniform Partnership Act.

The statutory framework for limited partnership same-type and cross-type transactions is also quite varied. Most states have the Uniform Limited Partnership Act (1976 with 1985 Amendments). That act has no provisions dealing with merger, interest exchange, conversion, or domestication transactions. According to Volume 6A of Uniform Laws Annotated (Supp. 2004), 19 states have adopted provisions authorizing limited partnerships to merge with or convert into some other types of entities. Arizona, for example, only authorizes limited partnerships to convert into general partnerships, but also authorizes limited partnerships to merge with any other type of business entity. Some states allow conversions of limited partnerships into limited liability companies and a few states expand the conversion list to include corporations; most also allow mergers of limited partnerships into other limited partnerships and some other types of entities. Several states appear to exclude non-profit organizations, business trusts, and cooperatives from their cross-form list.

As of October 2007, the Uniform Limited Partnership Act (2001) had been adopted in 16 states. It authorizes a conversion of a limited partnership into any other type of organization, conversion of any other organization into a limited partnership, a merger of a limited partnership with any other type of organization and a domestication (which is a type of conversion under ULPA (2001)). It does not, however, have any specific provisions for interest exchanges.

Most limited liability company statutes have provisions authorizing mergers and conversions, although the scope of coverage is quite varied. The Uniform Limited Liability Company Act (1997) (ULLCA), which has been adopted in eight states and the Virgin Islands, authorizes the conversion of a limited liability company into a general or limited partnership (but not into a corporation or any other type of entity) and a merger of a limited liability company with other limited liability companies or any "other domestic or foreign entities." ULLCA does not, however, have any provisions authorizing limited liability companies to enter into interest exchange or domestication transactions. In the other 42 states there are substantial differences from the ULLCA scheme with respect to same-type and cross-type transactions. The recently-adopted revised Uniform Limited Liability Company Act (2006) authorizes cross-type mergers, conversions, and domestications, but does not provide for interest exchanges; and the Uniform Limited Cooperative Association Act (2007) authorizes cross-type mergers and conversions.

There are no same-type or cross-type provisions in the Uniform Unincorporated Nonprofit Associations Act. Moreover, there are very few same-type or cross-type provisions in statutes governing all the other types of entities that exist under state law. There are some exceptions, however, such as the Delaware Statutory Trust Act which allows mergers and conversions of business trusts into other entities, and the Minnesota cooperative statute which allows farm cooperatives to convert into limited liability companies.

Once the analysis of the existing same-type and cross-type statutes has been made, decisions need to be made as to which ones should be amended or repealed and whether to add

additional provisions to these statutes. Under META, if the statute governing an entity has same-type provisions, those provisions govern the transaction in question. META provides default rules, however, if the other applicable entity statute has no same-type provisions for the transaction in question. META also applies to cross-type transactions (but defaults to applicable state entity law for approval requirements and the like).

In deciding how to amend, repeal or add to the existing entity statutes, states should avoid any potential inconsistency between META's provisions and similar provisions in the state's entity statutes and make the interplay between META and the state's various entity laws relatively easy to navigate. There are several ways to achieve these goals. First, states can limit existing laws to same-type transactions. One method, which it is anticipated will be the method chosen by most states, is as follows:

With respect to the state's corporation statutes:

(i) Repeal any cross-type provisions from the state's corporation merger statutes. The amendments necessary for this purpose in a state that has adopted the Model Business Corporation Act and the Model Nonprofit Corporation Act are found in Sections A2-1 and A2-2, respectively, In states whose corporate codes do not have any cross-type merger provisions no amendments to the state's corporate merger provisions will be necessary. Most state also may not have interest exchange provisions in their corporate codes. If that is the case, same-type provisions for interest exchanges do not need to be added to the corporate codes because under META the requirements for approval of a merger and other rights that a shareholder would have in a merger, for example, dissenters' rights, apply. See Sections 203(a) (mergers) and 303(a) (interest exchange).

(ii) Repeal any conversion provisions in the state's corporation statutes. Article 3 of META will, therefore, govern all conversions.

(iii) Retain any existing domestication provisions in the state's organic laws. As is pointed out in the Legislative Note to META Section 501, these entity specific domestication provisions will be listed in Section 501(e) with the result being that Article 5 of META will apply to those types of entities whose organic laws do not already have domestication provisions.

With respect to the state's other entity statutes:

(i) Amend all the merger, interest exchange, and conversion provisions in the state's other entity statutes by stripping out all of the cross-type provisions in the merger provisions, and by repealing any interest exchange or conversion provisions. Any existing domestication provisions would be retained and an appropriate reference to those provisions would be included in Section 501(e). The appropriate amendments for states that have adopted the Uniform Partnership Act (1997), the Uniform Limited Partnership Act (2001), the Uniform Limited Liability Company Act (1996) or the ABA Prototype Limited Liability Company Act are found in Sections A2-3, A2-4, A2-5, and A2-6, respectively.

(ii) The existing requirements for approval of mergers, interest exchanges, conversions, domestications, and amendment of the organic rules in the state's existing organic laws for unincorporated entities need to be carefully reviewed. If they require unanimity (or they are silent on what vote is required), then the suggested amendments in this appendix will make all the voting requirements for both same-type and cross-type transactions involving unincorporated entities consistent. The situation is more complicated, however, if there is not complete consistency among those organic laws; for example, as is sometimes the case, if the state's partnership statutes require unanimity but its LLC statute requires only a majority vote for some or all transactions. If there is not complete consistency, decisions will need to be made whether to retain the differences or to make all of the voting requirements either unanimous or majority. Other issues that will need to be resolved are what the appropriate vote should be for transactions other than mergers (i.e., interest exchanges, conversions, and domestications) where

there are no existing voting provisions other than for mergers; what is the appropriate voting requirement for a transaction under META where an unincorporated entity organic law does not have any same-type or cross-type provisions for that type of transaction; and how the voting requirements under META relate to the vote required to amend an unincorporated entity's organic rules. Once this analysis is completed, it will be possible to construct the appropriate amendments to the state's existing unincorporated entity organic laws.

Another method of integrating META with a state's organic laws is to delete from the existing organic laws any provisions that deal with cross-type transactions and add same-type merger and interest exchange, and domestication provisions to every organic law that does not currently have these provisions. Thus all same-type entity transactions would be governed by the state's organic laws and all cross-type transactions would be governed by META. This approach will require a large number of changes to existing organic laws in most states because same-type merger and interest exchange, and domestication provisions would have to be added to many of the state's organic laws, including its unincorporated nonprofit, cooperative, and business trust statutes. Article 5 of META would also not be enacted because the organic laws for each type of entity would have domestication provisions.

States can also repeal all the existing same-type and cross-type transaction provisions in all of the organic laws and add to META all the corporate merger approval and related statutory provisions such as appraisal rights, as well as substantially modifying Sections 203, 303, 403, and 503 so that there will be one set of approval provisions for a corporation engaging in a META transaction and a second set of approval provisions for unincorporated entities engaging in a META transaction. Making all of these modifications will be a monumental task.

Finally, integrating META with a state's existing organic laws could be achieved by repealing any provisions for cross-type transactions from the corporation laws (see Sections A2-1 and A2-2 for the appropriate amendments in a state that has enacted the Model Business Corporation Act and the Model Nonprofit Corporation Act) and, in addition by repealing all of the provisions for same-type and cross-type transactions in all of the state's unincorporated entity organic laws. This approach, which is a variant of avoids the problem of incorporating the corporation law voting requirements and related provisions such as appraisal rights. It will work best, however, in a state where all of the existing unincorporated entity organic laws require unanimity for approval of a merger or similar transaction (and where unanimity is also required to amend each type of entity's organic rules), since that is the ultimate default rule in META. This approach will be quite cumbersome if the state's unincorporated entity organic laws require less than unanimous consent for some types of entities, because the less than unanimous approval requirements would have to be incorporated into META.

The ULC suggests states place a reference to META in the state's entity statutes specifying the transactions that are governed by META. As an alternative to the statutory references proposed in this appendix, legislative notes could be used in those states that follow that practice. A note would be placed in the corporate statutes at the end of the merger and share exchange provisions stating that META is the primary statute that applies to reorganization transactions involving a corporation and another form of entity. For other entities whose organic laws have merger provisions, the legislative notes would appear at the end of those provisions stating META is the primary statute for any cross-type merger involving that type of entity and also is the primary statute governing both same-type and cross-type interest exchange and domestication transactions where that type of entity is a party. Finally, if there are no merger provisions for a particular type of entity, a legislative note should be placed at the end of the governing statute stating that META is the statute that governs merger, interest exchange, conversion and domestication transactions where that type of entity is involved.

Interested readers can see how one state adopted META by viewing amendments Kansas

made to its law when it adopted META as SB 132 in 2009. However, the text in this *SSL* volume is the model ULC language, includes legislative notes about the act, and excludes line numbers. Readers can access official commentary about the act and detailed suggestions about how to implement the Act vis-à-vis existing business entity laws at this Web address: http://www.law.upenn.edu/bll/archives/ulc/ueta/2007_final.htm or at www.nccusl.org.

Submitted as:
Kansas
SB 132
Status: Enacted into law in 2009.

Comment:

Notes about ULC Acts:

For information on the specific drafting rules used by the ULC, the ULC *Procedural and Drafting Manual* is available online at www.nccusl.org.

In general, the use of bracketed language in ULC acts indicates that a choice must be made between alternate bracketed language, or that specific language must be inserted into the empty brackets. For example: "An athlete agent who violates Section 14 is guilty of a [misdemeanor] [felony] and, upon conviction, is punishable by [ ].

A word, number, or phrase, or even an entire section, may be placed in brackets to indicate that the bracketed language is suggested but may be changed to conform to state usage or requirements, or to indicate that the entire section is optional. For example: "An applicant for registration shall submit an application for registration to the [Secretary of State] in a form prescribed by the [Secretary of State]. [An application filed under this section is a public record.] The application must be in the name of an individual, and, except as otherwise provided in subsection (b), signed or otherwise authenticated by the applicant under penalty of perjury."

The sponsor may need to be consulted when dealing with bracketed language.

Suggested State Legislation

(Title, enacting clause, etc.)

MODEL ENTITY TRANSACTIONS ACT
(Last Revised or Amended in 2007)

[ARTICLE] 1
GENERAL PROVISIONS

SECTION 101. SHORT TITLE. This [act] may be cited as the Model Entity Transactions Act.

SECTION 102. DEFINITIONS. In this [act]:

(1) "Acquired entity" means the entity, all of one or more classes or series of interests in which are acquired in an interest exchange.

(2) "Acquiring entity" means the entity that acquires all of one or more classes or series of interests of the acquired entity in an interest exchange.

(3) "Approve" means, in the case of an entity, for its governors and interest holders to take whatever steps are necessary under its organic rules, organic law, and other law to:

(A) propose a transaction subject to this [act];

(B) adopt and approve the terms and conditions of the transaction; and

(C) conduct any required proceedings or otherwise obtain any required votes or consents of the governors or interest holders.

(4) "Business corporation" means a corporation whose internal affairs are governed by [the Model Business Corporation Act].

(5) "Conversion" means a transaction authorized by [Article] 4.

(6) "Converted entity" means the converting entity as it continues in existence after a conversion.

(7) "Converting entity" means the domestic entity that approves a plan of conversion pursuant to Section 403 or the foreign entity that approves a conversion pursuant to the law of its jurisdiction of organization.

(8) "Domestic entity" means an entity whose internal affairs are governed by the law of this state.

(9) "Domesticated entity" means the domesticating entity as it continues in existence after a domestication.

(10) "Domesticating entity" means the domestic entity that approves a plan of domestication pursuant to Section 503 or the foreign entity that approves a domestication pursuant to the law of its jurisdiction of organization.

(11) "Domestication" means a transaction authorized by [Article] 5.

(12) "Entity" means:

(A) a business corporation;

(B) a nonprofit corporation;

(C) a general partnership, including a limited liability partnership;

(D) a limited partnership, including a limited liability limited partnership;

(E) a limited liability company;

(F) a business trust or statutory trust entity;

(G) an unincorporated nonprofit association;

(H) a cooperative; or

(I) any other person that has a separate legal existence or has the power to acquire an interest in real property in its own name other than:

(i) an individual;

(ii) a testamentary, inter vivos, or charitable trust, with the exception of a business trust, statutory trust entity or similar trust;

(iii) an association or relationship that is not a partnership solely by reason of [Section 202(c) of the Uniform Partnership Act (1997)] or a similar provision of the law of any other jurisdiction;

(iv) a decedent's estate; or

(v) a government, a governmental subdivision, agency, or instrumentality, or a quasi-governmental instrumentality.

(13) "Filing entity" means an entity that is created by the filing of a public organic document.

(14) "Foreign entity" means an entity other than a domestic entity.

(15) "Governance interest" means the right under the organic law or organic rules of an entity, other than as a governor, agent, assignee, or proxy, to:

(A) receive or demand access to information concerning, or the books and records of, the entity;

(B) vote for the election of the governors of the entity; or

(C) receive notice of or vote on any or all issues involving the internal affairs of the entity.

(16) "Governor" means a person by or under whose authority the powers of an entity are exercised and under whose direction the business and affairs of the entity are managed pursuant to the organic law and organic rules of the entity.

(17) "Interest" means:

(A) a governance interest in an unincorporated entity;

(B) a transferable interest in an unincorporated entity; or

(C) a share or membership in a corporation.

(18) "Interest exchange" means a transaction authorized by [Article] 3.

(19) "Interest holder" means a direct holder of an interest.

(20) "Interest holder liability" means:

(A) personal liability for a liability of an entity that is imposed on a person:

(i) solely by reason of the status of the person as an interest holder; or

(ii) by the organic rules of the entity pursuant to a provision of the organic law authorizing the organic rules to make one or more specified interest holders or categories of interest holders liable in their capacity as interest holders for all or specified liabilities of the entity; or

(B) an obligation of an interest holder under the organic rules of an entity to contribute to the entity.

(21) "Jurisdiction of organization" of an entity means the jurisdiction whose law includes the organic law of the entity.

(22) "Liability" means a debt, obligation, or any other liability arising in any manner, regardless of whether it is secured or whether it is contingent.

(23) "Merger" means a transaction in which two or more merging entities are combined into a surviving entity pursuant to a filing with the [Secretary of State].

(24) "Merging entity" means an entity that is a party to a merger and exists immediately before the merger becomes effective.

(25) "Nonprofit corporation" means a corporation whose internal affairs are governed by [the Model Nonprofit Corporation Act].

(26) "Organic law" means the statutes, if any, other than this [act], governing the internal affairs of an entity.

(27) "Organic rules" means the public organic document and private organic rules of an entity.

(28) "Person" means an individual, corporation, estate, trust, partnership, limited liability company, business or similar trust, association, joint venture, public corporation, government, or governmental subdivision, agency, or instrumentality, or any other legal or commercial entity.

(29) "Plan" means a plan of merger, interest exchange, conversion, or domestication.

(30) "Private organic rules" mean the rules, whether or not in a record, that govern the internal affairs of an entity, are binding on all of its interest holders, and are not part of its public organic document, if any.

(31) "Protected agreement" means:

(A) a record evidencing indebtedness and any related agreement in effect on the effective date of this [act];

(B) an agreement that is binding on an entity on the effective date of this [act];

(C) the organic rules of an entity in effect on the effective date of this [act]; or

(D) an agreement that is binding on any of the governors or interest holders of an entity on the effective date of this [act].

(32) "Public organic document" means the public record the filing of which creates an entity, and any amendment to or restatement of that record.

(33) "Qualified foreign entity" means a foreign entity that is authorized to transact business in this state pursuant to a filing with the [Secretary of State].

(34) "Record" means information that is inscribed on a tangible medium or that is stored in an electronic or other medium and is retrievable in perceivable form.

(35) "Sign" means, with present intent to authenticate or adopt a record:

(A) to execute or adopt a tangible symbol; or

(B) to attach to or logically associate with the record an electronic sound, symbol, or process.

(36) "Surviving entity" means the entity that continues in existence after or is created by a merger.

(37) "Transferable interest" means the right under an entity's organic law to receive distributions from the entity.

(38) "Type," with regard to an entity, means a generic form of entity:

(A) recognized at common law; or

(B) organized under an organic law, whether or not some entities organized under that organic law are subject to provisions of that law that create different categories of the form of entity.

SECTION 103. RELATIONSHIP OF [ACT] TO OTHER LAWS.

(a) Unless displaced by particular provisions of this [act], the principles of law and equity supplement this [act].

(b) This [act] does not authorize an act prohibited by, and does not affect the application or requirements of, law other than this [act].

(c) A transaction effected under this [act] may not create or impair any right or obligation on the part of a person under a provision of the law of this state other than this [act] relating to a change in control, takeover, business combination, control-share acquisition, or similar transaction involving a domestic merging, acquired, converting, or domesticating corporation unless:

(1) if the corporation does not survive the transaction, the transaction satisfies any requirements of the provision; or

(2) if the corporation survives the transaction, the approval of the plan is by a vote of the shareholders or directors which would be sufficient to create or impair the right or obligation directly under the provision.

SECTION 104. REQUIRED NOTICE OR APPROVAL.

(a) A domestic or foreign entity that is required to give notice to, or obtain the approval of, a governmental agency or officer in order to be a party to a merger must give the notice or obtain the approval in order to be a party to an interest exchange, conversion, or domestication.

(b) Property held for a charitable purpose under the law of this state by a domestic or foreign entity immediately before a transaction under this [act] becomes effective may not, as a result of the transaction, be diverted from the objects for which it was donated, granted, or devised unless, to the extent required by or pursuant to the law of this state concerning cy pres or other law dealing with nondiversion of charitable assets, the entity obtains an appropriate order

of [name of court] [the attorney general] specifying the disposition of the property.

Legislative Note: As an alternative to enacting subsection (a), a state may identify each of its regulatory laws that requires prior approval for a merger of a regulated entity, decide whether regulatory approval should be required for an interest exchange, conversion, or domestication, and make amendments as appropriate to those laws. As with subsection (a), an adopting state may choose to amend its various laws with respect to the nondiversion of charitable property to cover the various transactions authorized by this act as an alternative to enacting subsection (b).

SECTION 105. STATUS OF FILINGS. A filing under this [act] signed by a domestic entity becomes part of the public organic document of the entity if the entity's organic law provides that similar filings under that law become part of the public organic document of the entity.

SECTION 106. NONEXCLUSIVITY. The fact that a transaction under this [act] produces a certain result does not preclude the same result from being accomplished in any other manner permitted by law other than this [act].

SECTION 107. REFERENCE TO EXTERNAL FACTS. A plan may refer to facts ascertainable outside of the plan if the manner in which the facts will operate upon the plan is specified in the plan. The facts may include the occurrence of an event or a determination or action by a person, whether or not the event, determination, or action is within the control of a party to the transaction.

SECTION 108. ALTERNATIVE MEANS OF APPROVAL OF TRANSACTIONS. Except as otherwise provided in the organic law or organic rules of a domestic entity, approval of a transaction under this [act] by the unanimous vote or consent of its interest holders satisfies the requirements of this [act] for approval

SECTION 109. APPRAISAL RIGHTS.

(a) An interest holder of a domestic merging, acquired, converting, or domesticating entity is entitled to appraisal rights in connection with the transaction if the interest holder would have been entitled to appraisal rights under the entity's organic law in connection with a merger in which the interest of the interest holder was changed, converted, or exchanged unless:

(1) the organic law permits the organic rules to limit the availability of appraisal rights; and

(2) the organic rules provide such a limit.

(b) An interest holder of a domestic merging, acquired, converting, or domesticating entity is entitled to contractual appraisal rights in connection with a transaction under this [act] to the extent provided:

(1) in the entity's organic rules;

(2) in the plan; or

(3) in the case of a business corporation, by action of its governors.

(c) If an interest holder is entitled to contractual appraisal rights under subsection (b) and the entity's organic law does not provide procedures for the conduct of an appraisal rights proceeding, [Chapter 13 of the Model Business Corporation Act] applies to the extent practicable or as otherwise provided in the entity's organic rules or the plan.

***Legislative Note**: Section 109(a) preserves appraisal rights (sometimes referred to as "dissenters' rights") granted by other laws. As an alternative to enacting subsection (a), a state may amend the appraisal rights provisions of its organic laws to specify which transactions under this act will give rise to appraisal rights. See the suggested amendments in Appendix 2. If that alternative approach is adopted, subsections (b) and (c) should be designated as subsections (a) and (b).*

SECTION 110. EXCLUDED ENTITIES AND TRANSACTIONS.

(a) The following entities may not participate in a transaction under this [act]:

(1)

(2)

(b) This [act] may not be used to effect a transaction that:

(1)

(2)

(3).]

***Legislative Note**: Subsection (a) may be used by states that have special statutes restricted to the organization of certain types of entities. A common example is banking statutes that prohibit banks from engaging in transactions other than pursuant to those statutes.*

Nonprofit entities may participate in transactions under this act with for-profit entities, subject to compliance with Section 104(b). If a state desires, however, to exclude entities with a charitable purpose from the scope of the act, that may be done by referring to those entities in subsection (a).

More limited provisions that exclude certain types of domestic entities just from certain provisions of this act are set forth in Sections 201(d) (mergers), 301(e) (interest exchanges), 401(d) (conversions), and 501(e) (domestications).

Subsection (b) may be used to exclude certain types of transactions governed by more specific statutes. A common example is the conversion of an insurance company from mutual to stock form. There may be other types of transactions that vary greatly among the states.

[ARTICLE] 2
MERGER

SECTION 201. MERGER AUTHORIZED.

(a) Except as otherwise provided in this section, by complying with this [article]:

(1) one or more domestic entities may merge with one or more domestic or foreign entities into a domestic or foreign surviving entity; and

(2) two or more foreign entities may merge into a domestic entity.

(b) Except as otherwise provided in this section, by complying with the provisions of this [article] applicable to foreign entities a foreign entity may be a party to a merger under this [article] or may be the surviving entity in such a merger if the merger is authorized by the law of the foreign entity's jurisdiction of organization.

(c) This [article] does not apply to a transaction under:

(1) [Chapter 11 of the Model Business Corporation Act];

(2) [Chapter 11 of the Model Nonprofit Corporation Act];

(3) [Article 9 of the Uniform Partnership Act (1997)];

(4) [Article 11 of the Uniform Limited Partnership Act (2001)];

(5) [Article 12 of the Prototype Limited Liability Company Act];

(6) [Article 9 of the Uniform Limited Liability Company Act (1996)];

(7) [Article 10 of the Uniform Limited Liability Company Act (2006)]; or

(8) [Article 15 of the Uniform Limited Cooperative Association Act (2007)] [; or

(9) Cite provisions of any other organic law that has merger provisions for entities of the same type.]

[(d) The following entities may not participate in a merger under this [article]:

(1)

(2).]

***Legislative Note**: The text of subsection (c) will depend on which choice a state makes with respect to the scope of the act. It is anticipated that most states will choose to retain all of the merger provisions for entities of the same type it currently has in its organic laws and will repeal any merger provisions for entities of different types in those laws. The end result will be that the merger provisions in the organic laws will apply to mergers of entities of the same type and this act will apply to mergers involving entities of more than one type. If a state chooses to add merger provisions for entities of the same type to all of its organic laws and the list of statutes in subsection (c) will need to be expanded.*

If a state chooses option (d), the list of statutes in subsection (c) will probably include only the business and nonprofit corporation act merger provisions since under option (d) this act will apply to mergers of unincorporated entities involving entities of the same type, as well as mergers involving different types of entities.

If a state chooses option (c), subsection (c) is not necessary because this act will govern all mergers whether involving the same type of entity or different types of entities.

SECTION 202. PLAN OF MERGER.

(a) A domestic entity may become a party to a merger under this [article] by approving a plan of merger. The plan must be in a record and contain:

(1) as to each merging entity, its name, jurisdiction of organization, and type;

(2) if the surviving entity is to be created in the merger, a statement to that effect and its name, jurisdiction of organization, and type;

(3) the manner of converting the interests in each party to the merger into interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing;

(4) if the surviving entity exists before the merger, any proposed amendments to its public organic document or to its private organic rules that are, or are proposed to be, in a record;

(5) if the surviving entity is to be created in the merger, its proposed public organic document, if any, and the full text of its private organic rules that are proposed to be in a record;

(6) the other terms and conditions of the merger; and

(7) any other provision required by the law of a merging entity's jurisdiction of organization or the organic rules of a merging entity.

(b) A plan of merger may contain any other provision not prohibited by law.

SECTION 203. APPROVAL OF MERGER.

(a) A plan of merger is not effective unless it has been approved:

(1) by a domestic merging entity:

(A) in accordance with the requirements, if any, in its organic law and organic rules for approval of:

(i) in the case of an entity that is not a business corporation, a

merger; or

(ii) in the case of a business corporation, a merger requiring approval by a vote of the interest holders of the business corporation; or

(B) if neither its organic law nor organic rules provide for approval of a merger described in subparagraph (A)(ii), by all of the interest holders of the entity entitled to vote on or consent to any matter; and

(2) in a record, by each interest holder of a domestic merging entity that will have interest holder liability for liabilities that arise after the merger becomes effective, unless, in the case of an entity that is not a business corporation or nonprofit corporation:

(A) the organic rules of the entity provide in a record for the approval of a merger in which some or all of its interest holders become subject to interest holder liability by the vote or consent of fewer than all of the interest holders; and

(B) the interest holder voted for or consented in a record to that provision of the organic rules or became an interest holder after the adoption of that provision.

(b) A merger involving a foreign merging entity is not effective unless it is approved by the foreign entity in accordance with the law of the foreign entity's jurisdiction of organization.

SECTION 204. AMENDMENT OR ABANDONMENT OF PLAN OF MERGER.

(a) A plan of merger of a domestic merging entity may be amended:

(1) in the same manner as the plan was approved, if the plan does not provide for the manner in which it may be amended; or

(2) by the governors or interest holders of the entity in the manner provided in the plan, but an interest holder that was entitled to vote on or consent to approval of the merger is entitled to vote on or consent to any amendment of the plan that will change:

(A) the amount or kind of interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing, to be received by the interest holders of any party to the plan;

(B) the public organic document or private organic rules of the surviving entity that will be in effect immediately after the merger becomes effective, except for changes that do not require approval of the interest holders of the surviving entity under its organic law or organic rules; or

(C) any other terms or conditions of the plan, if the change would adversely affect the interest holder in any material respect.

(b) After a plan of merger has been approved by a domestic merging entity and before a statement of merger becomes effective, the plan may be abandoned:

(1) as provided in the plan; or

(2) unless prohibited by the plan, in the same manner as the plan was approved.

(c) If a plan of merger is abandoned after a statement of merger has been filed with the [Secretary of State] and before the filing becomes effective, a statement of abandonment, signed on behalf of a merging entity, must be filed with the [Secretary of State] before the time the statement of merger becomes effective. The statement of abandonment takes effect upon filing, and the merger is abandoned and does not become effective. The statement of abandonment must contain:

(1) the name of each merging or surviving entity that is a domestic entity or a qualified foreign entity;

(2) the date on which the statement of merger was filed; and

(3) a statement that the merger has been abandoned in accordance with this section.

SECTION 205. STATEMENT OF MERGER; EFFECTIVE DATE.

(a) A statement of merger must be signed on behalf of each merging entity and filed with the [Secretary of State].

(b) A statement of merger must contain:

(1) the name, jurisdiction of organization, and type of each merging entity that is not the surviving entity;

(2) the name, jurisdiction of organization, and type of the surviving entity;

(3) if the statement of merger is not to be effective upon filing, the later date and time on which it will become effective, which may not be more than 90 days after the date of filing;

(4) a statement that the merger was approved by each domestic merging entity, if any, in accordance with this [article] and by each foreign merging entity, if any, in accordance with the law of its jurisdiction of organization;

(5) if the surviving entity exists before the merger and is a domestic filing entity, any amendment to its public organic document approved as part of the plan of merger;

(6) if the surviving entity is created by the merger and is a domestic filing entity, its public organic document, as an attachment;

(7) if the surviving entity is created by the merger and is a domestic limited liability partnership, its [statement of qualification], as an attachment; and

(8) if the surviving entity is a foreign entity that is not a qualified foreign entity, a mailing address to which the [Secretary of State] may send any process served on the [Secretary of State] pursuant to Section 206(e).

(c) In addition to the requirements of subsection (b), a statement of merger may contain any other provision not prohibited by law.

(d) If the surviving entity is a domestic entity, its public organic document, if any, must satisfy the requirements of the law of this state, except that it does not need to be signed and may omit any provision that is not required to be included in a restatement of the public organic document.

(e) A plan of merger that is signed on behalf of all of the merging entities and meets all of the requirements of subsection (b) may be filed with the [Secretary of State] instead of a statement of merger and upon filing has the same effect. If a plan of merger is filed as provided in this subsection, references in this [act] to a statement of merger refer to the plan of merger filed under this subsection.

(f) A statement of merger becomes effective upon the date and time of filing or the later date and time specified in the statement of merger.

SECTION 206. EFFECT OF MERGER.

(a) When a merger becomes effective:

(1) the surviving entity continues or comes into existence;

(2) each merging entity that is not the surviving entity ceases to exist;

(3) all property of each merging entity vests in the surviving entity without assignment, reversion, or impairment;

(4) all liabilities of each merging entity are liabilities of the surviving entity;

(5) except as otherwise provided by law other than this [act] or the plan of merger, all of the rights, privileges, immunities, powers, and purposes of each merging entity vest in the surviving entity;

(6) if the surviving entity exists before the merger:

(A) all of its property continues to be vested in it without reversion or impairment;

(B) it remains subject to all of its liabilities; and

(C) all of its rights, privileges, immunities, powers, and purposes continue to be vested in it;

(7) the name of the surviving entity may be substituted for the name of any merging entity that is a party to any pending action or proceeding;

(8) if the surviving entity exists before the merger:

(A) its public organic document, if any, is amended as provided in the statement of merger and is binding on its interest holders; and

(B) its private organic rules that are to be in a record, if any, are amended to the extent provided in the plan of merger and are binding on and enforceable by:

(i) its interest holders; and

(ii) in the case of a surviving entity that is not a business corporation or a nonprofit corporation, any other person that is a party to an agreement that is part of the surviving entity's private organic rules;

(9) if the surviving entity is created by the merger:

(A) its public organic document, if any, is effective and is binding on its interest holders; and

(B) its private organic rules are effective and are binding on and enforceable by:

(i) its interest holders; and

(ii) in the case of a surviving entity that is not a business corporation or a nonprofit corporation, any other person that was a party to an agreement that was part of the organic rules of a merging entity if that person has agreed to be a party to an agreement that is part of the surviving entity's private organic rules; and

(10) the interests in each merging entity that are to be converted in the merger are converted, and the interest holders of those interests are entitled only to the rights provided to them under the plan of merger and to any appraisal rights they have under Section 109 and the merging entity's organic law.

(b) Except as otherwise provided in the organic law or organic rules of a merging entity, the merger does not give rise to any rights that an interest holder, governor, or third party would otherwise have upon a dissolution, liquidation, or winding-up of the merging entity.

(c) When a merger becomes effective, a person that did not have interest holder liability with respect to any of the merging entities and that becomes subject to interest holder liability with respect to a domestic entity as a result of a merger has interest holder liability only to the extent provided by the organic law of the entity and only for those liabilities that arise after the merger becomes effective.

(d) When a merger becomes effective, the interest holder liability of a person that ceases to hold an interest in a domestic merging entity with respect to which the person had interest holder liability is as follows:

(1) the merger does not discharge any interest holder liability under the organic law of the domestic merging entity to the extent the interest holder liability arose before the merger became effective;

(2) the person does not have interest holder liability under the organic law of the domestic merging entity for any liability that arises after the merger becomes effective;

(3) the organic law of the domestic merging entity continues to apply to the release, collection, or discharge of any interest holder liability preserved under paragraph (1) as if the merger had not occurred and the surviving entity were the domestic merging entity; and

(4) the person has whatever rights of contribution from any other person as are provided by the organic law or organic rules of the domestic merging entity with respect to any

interest holder liability preserved under paragraph (1) as if the merger had not occurred.

(e) When a merger becomes effective, a foreign entity that is the surviving entity:

(1) may be served with process in this state for the collection and enforcement of any liabilities of a domestic merging entity; and

(2) appoints the [Secretary of State] as its agent for service of process for collecting or enforcing those liabilities.

(f) When a merger becomes effective, the certificate of authority or other foreign qualification of any foreign merging entity that is not the surviving entity is canceled.

[ARTICLE] 3
INTEREST EXCHANGE

SECTION 301. INTEREST EXCHANGE AUTHORIZED.

(a) Except as otherwise provided in this section, by complying with this [article]:

(1) a domestic entity may acquire all of one or more classes or series of interests of another domestic or foreign entity in exchange for interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing; or

(2) all of one or more classes or series of interests of a domestic entity may be acquired by another domestic or foreign entity in exchange for interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing.

(b) Except as otherwise provided in this section, by complying with the provisions of this [article] applicable to foreign entities a foreign entity may be the acquiring or acquired entity in an interest exchange under this [article] if the interest exchange is authorized by the law of the foreign entity's jurisdiction of organization.

(c) If a protected agreement contains a provision that applies to a merger of a domestic entity but does not refer to an interest exchange, the provision applies to an interest exchange in which the domestic entity is the acquired entity as if the interest exchange were a merger until the provision is amended after the effective date of this [act].

[(d) This [article] does not apply to a transaction under:

(1) [Chapter 11 of the Model Business Corporation Act]; or

(2).]

[(e) The following entities may not participate in an interest exchange under this [article]:

(1)

(2).]

***Legislative Note**: It is anticipated that most states will choose to limit any existing interest exchange provisions to same-type transactions, for example interest exchanges where all of the entities are corporations. Any interest exchange provisions added to entity statutes should similarly be limited to same-type transactions. The net effect will be that the interest exchange provisions in the various entity statutes will govern same-type interest exchanges and Article 3 will govern cross-type interest exchanges. In the event a state does not have any existing interest exchange legislation and chooses not to add interest exchange provisions to any of its entity statutes, Article 3 will govern and will cover both same-type and cross-type interest exchanges. See Section 2 of the Prefatory Note and Appendix 2.*

SECTION 302. PLAN OF INTEREST EXCHANGE.

(a) A domestic entity may be the acquired entity in an interest exchange under this

[article] by approving a plan of interest exchange. The plan must be in a record and contain:

(1) the name and type of the acquired entity;

(2) the name, jurisdiction of organization, and type of the acquiring entity;

(3) the manner of converting the interests in the acquired entity into interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing;

(4) any proposed amendments to the public organic document or private organic rules that are, or are proposed to be, in a record of the acquired entity;

(5) the other terms and conditions of the interest exchange; and

(6) any other provision required by the law of this state or the organic rules of the acquired entity.

(b) A plan of interest exchange may contain any other provision not prohibited by law.

SECTION 303. APPROVAL OF INTEREST EXCHANGE.

(a) A plan of interest exchange is not effective unless it has been approved:

(1) by a domestic acquired entity:

(A) in accordance with the requirements, if any, in its organic law and organic rules for approval of an interest exchange;

(B) except as otherwise provided in subsection (d), if neither its organic law nor organic rules provide for approval of an interest exchange, in accordance with the requirements, if any, in its organic law and organic rules for approval of:

(i) in the case of an entity that is not a business corporation, a merger, as if the interest exchange were a merger; or

(ii) in the case of a business corporation, a merger requiring approval by a vote of the interest holders of the business corporation, as if the interest exchange were that type of merger; or

(C) if neither its organic law nor organic rules provide for approval of an interest exchange or a merger described in subparagraph (B)(ii), by all of the interest holders of the entity entitled to vote on or consent to any matter; and

(2) in a record, by each interest holder of a domestic acquired entity that will have interest holder liability for liabilities that arise after the interest exchange becomes effective, unless, in the case of an entity that is not a business corporation or nonprofit corporation:

(A) the organic rules of the entity provide in a record for the approval of an interest exchange or a merger in which some or all of its interest holders become subject to interest holder liability by the vote or consent of fewer than all of the interest holders; and

(B) the interest holder voted for or consented in a record to that provision of the organic rules or became an interest holder after the adoption of that provision.

(b) An interest exchange involving a foreign acquired entity is not effective unless it is approved by the foreign entity in accordance with the law of the foreign entity's jurisdiction of organization.

(c) Except as otherwise provided in its organic law or organic rules, the interest holders of the acquiring entity are not required to approve the interest exchange.

(d) A provision of the organic law of a domestic acquired entity that would permit a merger between the acquired entity and the acquiring entity to be approved without the vote or consent of the interest holders of the acquired entity because of the percentage of interests in the acquired entity held by the acquiring entity does not apply to approval of an interest exchange under subsection (a)(1)(B).

***Legislative Note**: An issue that needs to be analyzed under this section is what approval requirements apply to an interest exchange if there are no interest exchange provisions for entities of the same type in the organic law for a particular type of entity. If an entity's organic law, and also its organic rules, are silent on approving an interest exchange, subsection (a)(1)(B) provides that the required approval is the approval required for a merger under the entity's organic law. If the entity's organic law required a majority vote of the entity's interest holders, the approval of an interest exchange if the entity is the acquired entity would also require a majority vote of its interest holders. If the organic law, on the other hand, required a unanimous vote of the entity's interest holders to approve a merger, a unanimous vote would also be required to approve an interest exchange. As a result, differences between entity laws on the vote required to approve a merger will be carried over into this act. It is important, therefore, that states review any differences in the merger approval requirements in their organic laws to determine if those differences are supported by appropriate policy considerations.*

If an entity's organic law does not provide for approval of either a merger or an interest exchange, and if the entity's organic rules are also silent on approval of a merger or interest exchange, then subsection (a)(1)(C) requires approval of an interest exchange by all of the entity's interest holders. States should evaluate how that approval requirement compares to any approval requirements it has adopted for mergers or interest exchanges in any of its other organic laws.

This article permits the organic rules of an acquired entity to be amended in the context of an interest exchange. The other articles in this act also permit the organic rules to be amended in the contexts of the other types of transactions that may be accomplished under this act. When states conduct the analysis described in this Legislative Note of what approval requirement to adopt, they should also evaluate that question from the perspective of what approval requirements they provide in their organic laws for amending the organic rules of each type of entity.

The analysis described in this Legislative Note needs to be undertaken with respect to Sections 403 and 503 as well.

SECTION 304. AMENDMENT OR ABANDONMENT OF PLAN OF INTEREST EXCHANGE.

(a) A plan of interest exchange of a domestic acquired entity may be amended:

(1) in the same manner as the plan was approved, if the plan does not provide for the manner in which it may be amended; or

(2) by the governors or interest holders of the entity in the manner provided in the plan, but an interest holder that was entitled to vote on or consent to approval of the interest exchange is entitled to vote on or consent to any amendment of the plan that will change:

(A) the amount or kind of interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing, to be received by any of the interest holders of the acquired entity under the plan;

(B) the public organic document or private organic rules of the acquired entity that will be in effect immediately after the interest exchange becomes effective, except for changes that do not require approval of the interest holders of the acquired entity under its organic law or organic rules; or

(C) any other terms or conditions of the plan, if the change would adversely affect the interest holder in any material respect.

(b) After a plan of interest exchange has been approved by a domestic acquired entity and before a statement of interest exchange becomes effective, the plan may be abandoned:

(1) as provided in the plan; or

(2) unless prohibited by the plan, in the same manner as the plan was approved.

(c) If a plan of interest exchange is abandoned after a statement of interest exchange has been filed with the [Secretary of State] and before the filing becomes effective, a statement of abandonment, signed on behalf of the acquired entity, must be filed with the [Secretary of State] before the time the statement of interest exchange becomes effective. The statement of abandonment takes effect upon filing, and the interest exchange is abandoned and does not become effective. The statement of abandonment must contain:

(1) the name of the acquired entity;

(2) the date on which the statement of interest exchange was filed; and

(3) a statement that the interest exchange has been abandoned in accordance with this section.

SECTION 305. STATEMENT OF INTEREST EXCHANGE; EFFECTIVE DATE.

(a) A statement of interest exchange must be signed on behalf of a domestic acquired entity and filed with the [Secretary of State].

(b) A statement of interest exchange must contain:

(1) the name and type of the acquired entity;

(2) the name, jurisdiction of organization, and type of the acquiring entity;

(3) if the statement of interest exchange is not to be effective upon filing, the later date and time on which it will become effective, which may not be more than 90 days after the date of filing;

(4) a statement that the plan of interest exchange was approved by the acquired entity in accordance with this [article]; and

(5) any amendments to the acquired entity's public organic document approved as part of the plan of interest exchange.

(c) In addition to the requirements of subsection (b), a statement of interest exchange may contain any other provision not prohibited by law.

(d) A plan of interest exchange that is signed on behalf of a domestic acquired entity and meets all of the requirements of subsection (b) may be filed with the [Secretary of State] instead of a statement of interest exchange and upon filing has the same effect. If a plan of interest exchange is filed as provided in this subsection, references in this [act] to a statement of interest exchange refer to the plan of interest exchange filed under this subsection.

(e) A statement of interest exchange becomes effective upon the date and time of filing or the later date and time specified in the statement of interest exchange.

SECTION 306. EFFECT OF INTEREST EXCHANGE.

(a) When an interest exchange becomes effective:

(1) the interests in the acquired entity that are the subject of the interest exchange cease to exist or are converted or exchanged, and the interest holders of those interests are entitled only to the rights provided to them under the plan of interest exchange and to any appraisal rights they have under Section 109 and the acquired entity's organic law;

(2) the acquiring entity becomes the interest holder of the interests in the acquired entity stated in the plan of interest exchange to be acquired by the acquiring entity;

(3) the public organic document, if any, of the acquired entity is amended as provided in the statement of interest exchange and is binding on its interest holders; and

(4) the private organic rules of the acquired entity that are to be in a record, if any, are amended to the extent provided in the plan of interest exchange and are binding on and enforceable by:

(A) its interest holders; and

(B) in the case of an acquired entity that is not a business corporation or nonprofit corporation, any other person that is a party to an agreement that is part of the acquired entity's private organic rules.

(b) Except as otherwise provided in the organic law or organic rules of the acquired entity, the interest exchange does not give rise to any rights that an interest holder, governor, or third party would otherwise have upon a dissolution, liquidation, or winding-up of the acquired entity.

(c) When an interest exchange becomes effective, a person that did not have interest holder liability with respect to the acquired entity and that becomes subject to interest holder liability with respect to a domestic entity as a result of the interest exchange has interest holder liability only to the extent provided by the organic law of the entity and only for those liabilities that arise after the interest exchange becomes effective.

(d) When an interest exchange becomes effective, the interest holder liability of a person that ceases to hold an interest in a domestic acquired entity with respect to which the person had interest holder liability is as follows:

(1) the interest exchange does not discharge any interest holder liability under the organic law of the domestic acquired entity to the extent the interest holder liability arose before the interest exchange became effective;

(2) the person does not have interest holder liability under the organic law of the domestic acquired entity for any liability that arises after the interest exchange becomes effective;

(3) the organic law of the domestic acquired entity continues to apply to the release, collection, or discharge of any interest holder liability preserved under paragraph (1) as if the interest exchange had not occurred; and

(4) the person has whatever rights of contribution from any other person as are provided by the organic law or organic rules of the domestic acquired entity with respect to any interest holder liability preserved under paragraph (1) as if the interest exchange had not occurred.

[ARTICLE] 4
CONVERSION

SECTION 401. CONVERSION AUTHORIZED.

(a) Except as otherwise provided in this section, by complying with this [article], a domestic entity may become:

(1) a domestic entity of a different type; or

(2) a foreign entity of a different type, if the conversion is authorized by the law of the foreign jurisdiction.

(b) Except as otherwise provided in this section, by complying with the provisions of this [article] applicable to foreign entities a foreign entity may become a domestic entity of a different type if the conversion is authorized by the law of the foreign entity's jurisdiction of organization.

(c) If a protected agreement contains a provision that applies to a merger of a domestic entity but does not refer to a conversion, the provision applies to a conversion of the entity as if the conversion were a merger until the provision is amended after the effective date of this [act].

[(d) The following entities may not engage in a conversion:

(1)

(2).]

***Legislative Note**: Many states have provisions in their corporate and unincorporated entity statutes that allow conversions. These statutes, however, vary greatly. A few allow conversion of one type of entity into any other type of entity. Most, however, allow only limited types of conversions, e.g., general partnerships to limited partnerships (and limited partnerships to general partnerships) but not to all other types of entities. If a state has conversion provisions, the recommended course of action is to repeal all those statutes. See Appendix 2. The net effect will be that this act will apply to all conversions. Leaving the existing conversion provisions in place will create confusion for practitioners because in some cases there will be two applicable conversion statutes, the existing conversion statute and Article 4 of this act, but in other situations only Article 4 of this act will apply.*

SECTION 402. PLAN OF CONVERSION.

(a) A domestic entity may convert to a different type of entity under this [article] by approving a plan of conversion. The plan must be in a record and contain:

(1) the name and type of the converting entity;

(2) the name, jurisdiction of organization, and type of the converted entity;

(3) the manner of converting the interests in the converting entity into interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing;

(4) the proposed public organic document of the converted entity if it will be a filing entity;

(5) the full text of the private organic rules of the converted entity that are proposed to be in a record;

(6) the other terms and conditions of the conversion; and

(7) any other provision required by the law of this state or the organic rules of the converting entity.

(b) A plan of conversion may contain any other provision not prohibited by law.

SECTION 403. APPROVAL OF CONVERSION.

(a) A plan of conversion is not effective unless it has been approved:

(1) by a domestic converting entity:

(A) in accordance with the requirements, if any, in its organic rules for approval of a conversion;

(B) if its organic rules do not provide for approval of a conversion, in accordance with the requirements, if any, in its organic law and organic rules for approval of:

(i) in the case of an entity that is not a business corporation, a merger, as if the conversion were a merger; or

(ii) in the case of a business corporation, a merger requiring approval by a vote of the interest holders of the business corporation, as if the conversion were that type of merger; or

(C) if neither its organic law nor organic rules provide for approval of a conversion or a merger described in subparagraph (B)(ii), by all of the interest holders of the entity entitled to vote on or consent to any matter; and

(2) in a record, by each interest holder of a domestic converting entity that will have interest holder liability for liabilities that arise after the conversion becomes effective, unless, in the case of an entity that is not a business or nonprofit corporation:

(A) the organic rules of the entity provide in a record for the approval of a conversion or a merger in which some or all of its interest holders become subject to interest

holder liability by the vote or consent of fewer than all of the interest holders; and

(B) the interest holder voted for or consented in a record to that provision of the organic rules or became an interest holder after the adoption of that provision.

(b) A conversion of a foreign converting entity is not effective unless it is approved by the foreign entity in accordance with the law of the foreign entity's jurisdiction of organization.

Legislative Note: *The analysis of approval requirements in the Legislative Note to Section 303 should also be undertaken with respect to conversions.*

SECTION 404. AMENDMENT OR ABANDONMENT OF PLAN OF CONVERSION.

(a) A plan of conversion of a domestic converting entity may be amended:

(1) in the same manner as the plan was approved, if the plan does not provide for the manner in which it may be amended; or

(2) by the governors or interest holders of the entity in the manner provided in the plan, but an interest holder that was entitled to vote on or consent to approval of the conversion is entitled to vote on or consent to any amendment of the plan that will change:

(A) the amount or kind of interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing, to be received by any of the interest holders of the converting entity under the plan;

(B) the public organic document or private organic rules of the converted entity that will be in effect immediately after the conversion becomes effective, except for changes that do not require approval of the interest holders of the converted entity under its organic law or organic rules; or

(C) any other terms or conditions of the plan, if the change would adversely affect the interest holder in any material respect.

(b) After a plan of conversion has been approved by a domestic converting entity and before a statement of conversion becomes effective, the plan may be abandoned:

(1) as provided in the plan; or

(2) unless prohibited by the plan, in the same manner as the plan was approved.

(c) If a plan of conversion is abandoned after a statement of conversion has been filed with the [Secretary of State] and before the filing becomes effective, a statement of abandonment, signed on behalf of the entity, must be filed with the [Secretary of State] before the time the statement of conversion becomes effective. The statement of abandonment takes effect upon filing, and the conversion is abandoned and does not become effective. The statement of abandonment must contain:

(1) the name of the converting entity;

(2) the date on which the statement of conversion was filed; and

(3) a statement that the conversion has been abandoned in accordance with this section.

SECTION 405. STATEMENT OF CONVERSION; EFFECTIVE DATE.

(a) A statement of conversion must be signed on behalf of the converting entity and filed with the [Secretary of State].

(b) A statement of conversion must contain:

(1) the name, jurisdiction of organization, and type of the converting entity;

(2) the name, jurisdiction of organization, and type of the converted entity;

(3) if the statement of conversion is not to be effective upon filing, the later date and time on which it will become effective, which may not be more than 90 days after the date of filing;

(4) if the converting entity is a domestic entity, a statement that the plan of conversion was approved in accordance with this [article] or, if the converting entity is a foreign entity, a statement that the conversion was approved by the foreign converting entity in accordance with the law of its jurisdiction of organization;

(5) if the converted entity is a domestic filing entity, the text of its public organic document, as an attachment;

(6) if the converted entity is a domestic limited liability partnership, the text of its [statement of qualification], as an attachment; and

(7) if the converted entity is a foreign entity that is not a qualified foreign entity, a mailing address to which the [Secretary of State] may send any process served on the [Secretary of State] pursuant to Section 406(e).

(c) In addition to the requirements of subsection (b), a statement of conversion may contain any other provision not prohibited by law.

(d) If the converted entity is a domestic entity, its public organic document, if any, must satisfy the requirements of the law of this state, except that it does not need to be signed and may omit any provision that is not required to be included in a restatement of the public organic document.

(e) A plan of conversion that is signed on behalf of a domestic converting entity and meets all of the requirements of subsection (b) may be filed with the [Secretary of State] instead of a statement of conversion and upon filing has the same effect. If a plan of conversion is filed as provided in this subsection, references in this [act] to a statement of conversion refer to the plan of conversion filed under this subsection.

(f) A statement of conversion becomes effective upon the date and time of filing or the later date and time specified in the statement of conversion.

SECTION 406. EFFECT OF CONVERSION.

(a) When a conversion becomes effective:

(1) the converted entity is:

(A) organized under and subject to the organic law of the converted entity; and

(B) the same entity without interruption as the converting entity;

(2) all property of the converting entity continues to be vested in the converted entity without assignment, reversion, or impairment;

(3) all liabilities of the converting entity continue as liabilities of the converted entity;

(4) except as provided by law other than this [act] or the plan of conversion, all of the rights, privileges, immunities, powers, and purposes of the converting entity remain in the converted entity;

(5) the name of the converted entity may be substituted for the name of the converting entity in any pending action or proceeding;

(6) if a converted entity is a filing entity, its public organic document is effective and is binding on its interest holders;

(7) if the converted entity is a limited liability partnership, its [statement of qualification] is effective simultaneously;

(8) the private organic rules of the converted entity that are to be in a record, if any, approved as part of the plan of conversion are effective and are binding on and enforceable by:

(A) its interest holders; and

(B) in the case of a converted entity that is not a business corporation or

nonprofit corporation, any other person that is a party to an agreement that is part of the entity's private organic rules; and

(9) the interests in the converting entity are converted, and the interest holders of the converting entity are entitled only to the rights provided to them under the plan of conversion and to any appraisal rights they have under Section 109 and the converting entity's organic law.

(b) Except as otherwise provided in the organic law or organic rules of the converting entity, the conversion does not give rise to any rights that an interest holder, governor, or third party would otherwise have upon a dissolution, liquidation, or winding-up of the converting entity.

(c) When a conversion becomes effective, a person that did not have interest holder liability with respect to the converting entity and that becomes subject to interest holder liability with respect to a domestic entity as a result of a conversion has interest holder liability only to the extent provided by the organic law of the entity and only for those liabilities that arise after the conversion becomes effective.

(d) When a conversion becomes effective:

(1) the conversion does not discharge any interest holder liability under the organic law of a domestic converting entity to the extent the interest holder liability arose before the conversion became effective;

(2) a person does not have interest holder liability under the organic law of a domestic converting entity for any liability that arises after the conversion becomes effective;

(3) the organic law of a domestic converting entity continues to apply to the release, collection, or discharge of any interest holder liability preserved under paragraph (1) as if the conversion had not occurred; and

(4) a person has whatever rights of contribution from any other person as are provided by the organic law or organic rules of the domestic converting entity with respect to any interest holder liability preserved under paragraph (1) as if the conversion had not occurred.

(e) When a conversion becomes effective, a foreign entity that is the converted entity:

(1) may be served with process in this state for the collection and enforcement of any of its liabilities; and

(2) appoints the [Secretary of State] as its agent for service of process for collecting or enforcing those liabilities.

(f) If the converting entity is a qualified foreign entity, the certificate of authority or other foreign qualification of the converting entity is canceled when the conversion becomes effective.

(g) A conversion does not require the entity to wind up its affairs and does not constitute or cause the dissolution of the entity.

[ARTICLE] 5
DOMESTICATION

SECTION 501. DOMESTICATION AUTHORIZED.

(a) Except as otherwise provided in this section, by complying with this [article], a domestic entity may become a domestic entity of the same type in a foreign jurisdiction if the domestication is authorized by the law of the foreign jurisdiction.

(b) Except as otherwise provided in this section, by complying with the provisions of this [article] applicable to foreign entities a foreign entity may become a domestic entity of the same type in this state if the domestication is authorized by the law of the foreign entity's jurisdiction of organization.

(c) When the term domestic entity is used in this [article] with reference to a foreign

jurisdiction, it means an entity whose internal affairs are governed by the law of the foreign jurisdiction.

(d) If a protected agreement contains a provision that applies to a merger of a domestic entity but does not refer to a domestication, the provision applies to a domestication of the entity as if the domestication were a merger until the provision is amended after the effective date of this [act].

(e) The following entities may not engage in a domestication under this [article]:

(1) [a business corporation – if the state has adopted Subchapter 9B of the Model Business Corporation Act];

(2) a limited liability company, if the state has enacted Article 10 of the Uniform Limited Liability Company Act (2006)]; or

(3).]

Legislative Note: *A few states have domestication provisions in their organic laws. The only uniform or model organic laws authorizing domestications are Subchapter 9B of the Model Business Corporation Act and Article 10 of the Uniform Limited Liability Company Act (2006). Because a domestication is a transaction involving entities of the same type, as opposed to a transaction involving entities of different types, a state may choose to keep any existing domestication provisions in its organic laws and it may decide to add domestication provisions to its other organic laws. Any domestication provisions in other organic laws should be listed in subsection (e). In that case, Article 5 will apply only to domestications of an entity whose organic law does not authorize a domestication. If a state does not have domestication provisions in its organic laws, subsection (e) should be omitted.*

SECTION 502. PLAN OF DOMESTICATION.

(a) A domestic entity may become a foreign entity in a domestication by approving a plan of domestication. The plan must be in a record and contain:

(1) the name and type of the domesticating entity;

(2) the name and jurisdiction of organization of the domesticated entity;

(3) the manner of converting the interests in the domesticating entity into interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing;

(4) the proposed public organic document of the domesticated entity if it is a filing entity;

(5) the full text of the private organic rules of the domesticated entity that are proposed to be in a record;

(6) the other terms and conditions of the domestication; and

(7) any other provision required by the law of this state or the organic rules of the domesticating entity.

(b) A plan of domestication may contain any other provision not prohibited by law.

SECTION 503. APPROVAL OF DOMESTICATION.

(a) A plan of domestication is not effective unless it has been approved:

(1) by a domestic domesticating entity:

(A) in accordance with the requirements, if any, in its organic rules for approval of a domestication;

(B) if its organic rules do not provide for approval of a domestication, in accordance with the requirements, if any, in its organic law and organic rules for approval of:

(i) in the case of an entity that is not a business corporation, a

merger, as if the domestication were a merger; or

(ii) in the case of a business corporation, a merger requiring approval by a vote of the interest holders of the business corporation, as if the domestication were that type of merger; or

(C) if neither its organic law nor organic rules provide for approval of a domestication or a merger described in subparagraph (B)(ii), by all of the interest holders of the entity entitled to vote on or consent to any matter; and

(2) in a record, by each interest holder of a domestic domesticating entity that will have interest holder liability for liabilities that arise after the domestication becomes effective, unless, in the case of an entity that is not a business corporation or nonprofit corporation:

(A) the organic rules of the entity in a record provide for the approval of a domestication or merger in which some or all of its interest holders become subject to interest holder liability by the vote or consent of fewer than all of the interest holders; and

(B) the interest holder voted for or consented in a record to that provision of the organic rules or became an interest holder after the adoption of that provision.

(b) A domestication of a foreign domesticating entity is not effective unless it is approved in accordance with the law of the foreign entity's jurisdiction of organization.

Legislative Note: *The analysis of approval requirements in the Legislative Note to Section 303 should also be undertaken with respect to domestications.*

SECTION 504. AMENDMENT OR ABANDONMENT OF PLAN OF DOMESTICATION.

(a) A plan of domestication of a domestic domesticating entity may be amended:

(1) in the same manner as the plan was approved, if the plan does not provide for the manner in which it may be amended; or

(2) by the governors or interest holders of the entity in the manner provided in the plan, but an interest holder that was entitled to vote on or consent to approval of the domestication is entitled to vote on or consent to any amendment of the plan that will change:

(A) the amount or kind of interests, securities, obligations, rights to acquire interests or securities, cash, or other property, or any combination of the foregoing, to be received by any of the interest holders of the domesticating entity under the plan;

(B) the public organic document or private organic rules of the domesticated entity that will be in effect immediately after the domestication becomes effective, except for changes that do not require approval of the interest holders of the domesticated entity under its organic law or organic rules; or

(C) any other terms or conditions of the plan, if the change would adversely affect the interest holder in any material respect.

(b) After a plan of domestication has been approved by a domestic domesticating entity and before a statement of domestication becomes effective, the plan may be abandoned:

(1) as provided in the plan; or

(2) unless prohibited by the plan, in the same manner as the plan was approved.

(c) If a plan of domestication is abandoned after a statement of domestication has been filed with the [Secretary of State] and before the filing becomes effective, a statement of abandonment, signed on behalf of the entity, must be filed with the [Secretary of State] before the time the statement of domestication becomes effective. The statement of abandonment takes effect upon filing, and the domestication is abandoned and does not become effective. The statement of abandonment must contain:

(1) the name of the domesticating entity;

(2) the date on which the statement of domestication was filed; and

(3) a statement that the domestication has been abandoned in accordance with this section.

SECTION 505. STATEMENT OF DOMESTICATION; EFFECTIVE DATE.

(a) A statement of domestication must be signed on behalf of the domesticating entity and filed with the [Secretary of State].

(b) A statement of domestication must contain:

(1) the name, jurisdiction of organization, and type of the domesticating entity;

(2) the name and jurisdiction of organization of the domesticated entity;

(3) if the statement of domestication is not to be effective upon filing, the later date and time on which it will become effective, which may not be more than 90 days after the date of filing;

(4) if the domesticating entity is a domestic entity, a statement that the plan of domestication was approved in accordance with this [article] or, if the domesticating entity is a foreign entity, a statement that the domestication was approved in accordance with the law of its jurisdiction of organization;

(5) if the domesticated entity is a domestic filing entity, its public organic document, as an attachment;

(6) if the domesticated entity is a domestic limited liability partnership, its [statement of qualification], as an attachment; and

(7) if the domesticated entity is a foreign entity that is not a qualified foreign entity, a mailing address to which the [Secretary of State] may send any process served on the [Secretary of State] pursuant to Section 506(e).

(c) In addition to the requirements of subsection (b), a statement of domestication may contain any other provision not prohibited by law.

(d) If the domesticated entity is a domestic entity, its public organic document, if any, must satisfy the requirements of the law of this state, except that it does not need to be signed and may omit any provision that is not required to be included in a restatement of the public organic document.

(e) A plan of domestication that is signed on behalf of a domesticating domestic entity and meets all of the requirements of subsection (b) may be filed with the [Secretary of State] instead of a statement of domestication and upon filing has the same effect. If a plan of domestication is filed as provided in this subsection, references in this [act] to a statement of domestication refer to the plan of domestication filed under this subsection.

(f) A statement of domestication becomes effective upon the date and time of filing or the later date and time specified in the statement of domestication.

SECTION 506. EFFECT OF DOMESTICATION.

(a) When a domestication becomes effective:

(1) the domesticated entity is:

(A) organized under and subject to the organic law of the domesticated entity; and

(B) the same entity without interruption as the domesticating entity;

(2) all property of the domesticating entity continues to be vested in the domesticated entity without assignment, reversion, or impairment;

(3) all liabilities of the domesticating entity continue as liabilities of the domesticated entity;

(4) except as provided by law other than this [act] or the plan of domestication, all of the rights, privileges, immunities, powers, and purposes of the domesticating entity remain in the domesticated entity;

(5) the name of the domesticated entity may be substituted for the name of the domesticating entity in any pending action or proceeding;

(6) if the domesticated entity is a filing entity, its public organic document is effective and is binding on its interest holders;

(7) if the domesticated entity is a limited liability partnership, its [statement of qualification] is effective simultaneously;

(8) the private organic rules of the domesticated entity that are to be in a record, if any, approved as part of the plan of domestication are effective and are binding on and enforceable by:

(A) its interest holders; and

(B) in the case of a domesticated entity that is not a business corporation or nonprofit corporation, any other person that is a party to an agreement that is part of the domesticated entity's private organic rules; and

(9) the interests in the domesticating entity are converted to the extent and as approved in connection with the domestication, and the interest holders of the domesticating entity are entitled only to the rights provided to them under the plan of domestication and to any appraisal rights they have under Section 109 and the domesticating entity's organic law.

(b) Except as otherwise provided in the organic law or organic rules of the domesticating entity, the domestication does not give rise to any rights that an interest holder, governor, or third party would otherwise have upon a dissolution, liquidation, or winding-up of the domesticating entity.

(c) When a domestication becomes effective, a person that did not have interest holder liability with respect to the domesticating entity and that becomes subject to interest holder liability with respect to a domestic entity as a result of the domestication has interest holder liability only to the extent provided by the organic law of the entity and only for those liabilities that arise after the domestication becomes effective.

(d) When a domestication becomes effective:

(1) the domestication does not discharge any interest holder liability under the organic law of a domesticating domestic entity to the extent the interest holder liability arose before the domestication became effective;

(2) a person does not have interest holder liability under the organic law of a domestic domesticating entity for any liability that arises after the domestication becomes effective;

(3) the organic law of a domestic domesticating entity continues to apply to the release, collection, or discharge of any interest holder liability preserved under paragraph (1) as if the domestication had not occurred; and

(4) a person has whatever rights of contribution from any other person as are provided by the organic law or organic rules of a domestic domesticating entity with respect to any interest holder liability preserved under paragraph (1) as if the domestication had not occurred.

(e) When a domestication becomes effective, a foreign entity that is the domesticated entity:

(1) may be served with process in this state for the collection and enforcement of any of its liabilities; and

(2) appoints the [Secretary of State] as its agent for service of process for collecting or enforcing those liabilities.

(f) If the domesticating entity is a qualified foreign entity, the certificate of authority or other foreign qualification of the domesticating entity is canceled when the domestication becomes effective.

(g) A domestication does not require the entity to wind up its affairs and does not constitute or cause the dissolution of the entity.

[ARTICLE] 6
MISCELLANEOUS PROVISIONS

SECTION 601. CONSISTENCY OF APPLICATION. In applying and construing this [act], consideration must be given to the need to promote consistency of the law with respect to its subject matter among states that enact it.

SECTION 602. RELATION TO ELECTRONIC SIGNATURES IN GLOBAL AND NATIONAL COMMERCE ACT. This [act] modifies, limits, and supersedes the federal Electronic Signatures in Global and National Commerce Act,15 U.S.C. § 7001, et seq., but does not modify, limit, or supersede Section 101(c) of that act,15 U.S.C. § 7001(c), or authorize electronic delivery of any of the notices described in Section 103(b) of that act,15 U.S.C. § 7003(b).

SECTION 603. CONFORMING AMENDMENTS AND REPEALS. [See Appendix 2.]

SECTION 604. SAVINGS CLAUSE. This [act] does not affect an action or proceeding commenced or right accrued before the effective date of this [act].

SECTION 605. EFFECTIVE DATE. This [act] takes effect [January 1, 20__.]

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB102
2011 LEGISLATIVE SESSION

Analysis:

The intent of this bill is to suspend the calculation of payments based on the dollar value of community heating points mandated in 47.25.623 and allow the proration of heating assistance benefits when appropriations are insufficient to pay benefits through the Alaska Affordable Heating Program at the levels described in Chapter 83, SLA10.

Senator Lyman Hoffman

Alaska State Legislature

Sponsor Statement for SB 102

SB 102 amends the State's Affordable Heating Program. Last year, the legislature combined the Low Income Heating and Energy Assistance Program (LIHEAP) and Alaska Heating Assistance Program to form the Affordable Heating Assistance Program. This change was to more closely align the cost of energy as measured by the cost of a barrel of North Slope crude oil with the amount of assistance an eligible family would receive.

In creating that program, the bill contained language that would allow the Department of Health and Social Services to prorate benefits should that become necessary as a result of a shortage of funds. However, the Department is concerned that this language does not offer them sufficient discretion needed to do this.

SB 102 eliminates this ambiguity by assuring that the Department may prorate benefits, if necessary, regardless of a recipient's income or the price of oil upon which their benefit is based.

Heating assistance is one of the most critical programs to Alaskan's who rely on oil heat. In rural areas, a family may pay up to fifty percent of its income to heat its home in winter. That scenario occurs in other parts of the State as well, giving this program a critical statewide focus. Therefore, we urge that this critical program continue to be fully funded, particularly considering the potential rise in fuel costs next winter.

However, with this amendment, the Department of Health and Social Services will have the authority to prorate benefits to eligible families should this become necessary.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB103

Analysis

The University of Alaska (UA) would be financially impacted by this proposed legislation.

UA Risk Services data show there were 41 reported claims by UAF firefighters over the past 5 years, or an average of 8.2 claims per year. The National Council on Compensation Insurance stated in its 2008 analysis for HB 200 that Alaska could see an increase in frequency of claim due to cancer of 26.9%, increasing the estimated number of annual firefighter claims to 10.25 assuming the bill passes. This would be an increase of 2.05 claims per year.

UA's average cost of firefighter claims over the past 5 years is $37,755, therefore UA would likely experience an increase of $77,400 per year.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB103

Analysis

Risk Management (RM) would be financially impacted by this proposed legislation.

RM reports show there were 73 reported claims by Certified I firefighters over the last five years or an average of 14.6 claims per year. NCCI stated back in 2008 when doing an analysis for HB 200, that Alaska could see an increase in frequency of claims due to cancer of 26.9%, or a total claim count assuming the bill passes, of 18.54 claims per year. This would be an increase of 3.94 claims per year. Our average cost of claims is $17,729 therefore RM would likely experience an increase of $69,700 per year.

Due to the type of injury RM would anticipate additional legal work would need to be done, however, we do not anticipate the costs to be substantial

The Honorable Hollis French
Alaska State Senate
Alaska State Capitol
Juneau, AK 99811

Sent by email to Senator_Hollis_French@legis.state.ak.us

Re: CSSB 103 (L&C)

Dear Senator French:

Alaska Public Entity Insurance (APEI) is a joint insurance arrangement, or pool, organized under AS 21.76 and filed as an Alaska nonprofit corporation. APEI provides property, liability, auto and workers' compensation insurance to approximately 70 Alaska municipalities and school districts. We offer the following comments in opposition to Senate Bill 103, and in response to questions raised and statements made at the hearing last Friday before the Senate Finance Committee.

In response to a question from Senator Thomas, you stated that this bill is designed to apply only to "professional firefighters," by which I believe you meant full-time or paid municipal employees. You stated, "There are thousands of Alaskans who are volunteer firefighters... We're not talking about that class." You further stated that the requisite state Class 1 Firefighter certification would preclude application of this presumption to most volunteers.

Unfortunately, the bill is not limited in the way you stated. In Alaska, literally thousands of volunteer firefighters are Class 1 Certified. [1] Although it may be true that many of those on the list are paid professionals, particularly in the larger cities, many of those listed are simple volunteers who may have fought few, if any, structural fires.

[1] See attached. The attachment lists all Class 1 Certified firefighters as of 2008, when AS 21.30.121 was under consideration. I presume the department can provide a more recent list. With the enactment of AS 21.30.121 in 2008, it is likely that many more volunteers are now becoming certified to bring themselves under the protection of the presumption

The city of Petersburg is a good example. As you can see from this list, in 2008 there were 69 Class 1 certified firefighters in Petersburg. However, the city of Petersburg has just 2 paid firefighters. I may not agree with the theory behind the presumption in AS 21.30.121, but I can understand its intent when it applies, as you stated, to "professional firefighters." However, expanding this presumption to volunteer, or casual, firefighters who fight few if any fires (and none where they actually entered a burning structure) creates a significant and unjustified exposure to the workers' compensation system.

Senator Olson asked about the financial impact this change may have on municipalities. Contrary to the statements of the NCCI in their Preliminary Cost Analysis, in my opinion the impact is likely to be substantial, for several reasons. First, this bill will now expand coverage to perhaps thousands of volunteers who were not covered under the original law , specifically those who did not receive the requisite medical examinations prior to enactment of the presumption. It was the exclusion of those individuals that prevented the original statutory enactment from having a huge immediate financial impact on municipal insurance rates.

Second, the bill appears to extend the presumption to those who are not even now getting exams. The bill language seems to say that if you were in the system as of the enactment of AS 21.30.121, you receive the presumption, *even if you do not receive requisite examinations after the statute's effective date*. This may not be the sponsor's intent, but the impact, particularly on smaller Alaska communities, is significant. As you can see from the attached list, many smaller communities have volunteer firefighters with Class 1 certification. These communities are probably not offering medical examinations to these volunteers that meet the requirements of AS 21.30.121 and may, in many cases, have never provided any medical exams to their firefighters. Grandfathering in these volunteers for coverage under the presumption will have a significant impact on the small communities' workers' compensation exposure, and hence their rates.

APEI is currently trying to analyze the impact that this bill may have on workers' compensation rates. Presently, the rate for each volunteer firefighter is very low, under the assumption that volunteers do not fight a significant number of fires. However, if this bill passes, the exposure for each volunteer increases substantially. With the passage of this bill, in setting rates we will need to take into account the number of Class 1 certified firefighters in each community. For smaller communities, where the number of volunteer firefighters is large in comparison to total city employees, the impact on overall worker's compensation premium will be much harsher.

If it is your intent to require firefighters to undergo the requisite examinations after the original statutory effective date, I suggest that Section 1, line 25 be revised to:

... **the presumption set out in this section, *for that period of qualifying service* before August 19, 2008, the firefighter** ...

If it is your intent to only include the paid professional firefighters, I suggest that Section 2 be revised to:

Sec. 2. AS 23.30.121(f) is amended to read:

(f) In this section, "firefighter" **means a person employed by a state or municipal fire department or who is a full time paid member of a fire department registered with the state fire marshal.**

These amendments will alleviate much of the significant financial impact of this bill on smaller Alaska communities, and make the bill consistent, I believe, with your position as stated at the hearing.

Thank you for taking these comments into consideration.

Sincerely,

Jeffrey W. Bush
Executive Director

RE: Oppose SB 103

Dear Senators:

The Alaska Municipal League Joint Insurance Association (AMLJIA) opposes CSSB 103(L&C).

The AMLJIA is a not-for-profit risk pool formed in 1988 under AS 21.76. The AMLJIA administers a self-insurance program for 153 member local governments and school districts in Alaska. Within the membership, there are 38 local government members that have State of Alaska registered fire departments. These include professional and volunteer fire departments ranging from Coffman Cove to Yakutat, from Chefornak to Healy, from Barrow to Kotzebue, and from Fairbanks to Seldovia. The members fund their losses with contributions to the AMLJIA, which in turn purchases excess coverage on a group basis for the workers' compensation claims to provide statutory limits. It is important to understand that the costs of this legislation will be borne by the owner/members of the AMLJIA and other self-insured entities, including the State of Alaska.

As a direct result of the passage of the heart/lung presumption bill in 2008, the self-insured retention within the AMLJIA has now been increased to $2 million. Based on negative experience elsewhere in the country, our largest excess workers' compensation carrier does not want to touch the firefighter exposure in Alaska. As I understand it, the Municipality of Anchorage, the Fairbanks North Star Borough and the State of Alaska have also had similar experiences. The constituents of self-insured entities are bearing these increased costs of both retained losses and increased premiums for excess coverage. Passing CSSB 103(L&C) and expanding the current law retroactively to firefighters that may not have ever had a qualifying medical exam will only exacerbate the problem.

At last week's hearing on this bill, the sponsor referred to the Preliminary Cost Impact Analysis offered by the National Council on Compensation Insurance (NCCI). He explained that the increase in loss cost rates may be "negligible." A closer reading of that preliminary analysis reveals that NCCI "assumed that there would be no cost difference for firefighters hired before and after August 19, 2008." That overlooks the possibility that there may be more firefighters in the equation.

Most of the volunteer fire departments did not offer any medical screenings prior to the enactment of the presumption. Would this then mean that the firefighter "received all the medical examinations provided by the department?" The current language in CSSB 103(L&C) can be read to eliminate the requirement for a qualifying medical exam for those who were volunteers prior to the presumption if the department did not offer medical exams. If that is not the intent of the bill, then that language should be made less ambiguous.

If the intent it is to offer a presumption for firefighter that did not actually take medical exams because the department did not offer them, then the retroactive nature of the bill means that insurance companies or programs like the AMLIA that use actuaries to formulate contributions in advance, will bear the medical costs for firefighters that were never contemplated in the rates charged to their clients. The costs of this unfunded mandate will be borne by the constituents of the self-insured governments, forcing municipalities to make financial decisions that could result in decreasing or even in extreme cases eliminating their volunteer fire departments.

As you know, Alaska's workers' compensation rates are among the highest in the nation. Now is the time to fix our workers' compensation problems, not make them worse by expanding benefits. Please consider the negative financial impacts this legislation would have on the State's political subdivisions.

Sincerely,

Kevin

Kevin Smith
Executive Director

The Honorable Joe Paskvan
The State Senate
Alaska State Capitol
Room 115
Juneau, AK 99801

3 April, 2011

Dear Senator Paskvan,

Senate Bill 103 "An Act amending the medical examination requirements for firefighters entitled to a presumption of compensability for a disability resulting from certain diseases" will be heard by the Labor and Commerce Committee on Tuesday, 5 April. SB 103 seeks to address apparent technical problems in Alaska Statute 23.30.121, "Presumption of coverage for disability from diseases for certain fire fighters" that were identified after the statute took effect. I am writing to draw your attention to the determination that the full-time career fire fighters of the University Fire Department are apparently not covered by AS 23.30.121, the presumptive coverage law.

AS 23.30.121 (f) specifies that Alaska's presumptive law applies to certain Alaskan firefighters as defined by AS 09.65.295 "Liability involving a peace officer or fire fighter." Paragraph (f) defines a "fire fighter" as a person employed by a municipal fire department or who is a member of a registered volunteer fire department. The University Fire Department at UAF employs nine professional career fire fighters who are full-time employees of the University of Alaska. Accordingly, they are neither employed by a municipal fire department nor are they volunteer fire fighters, and thusly are not covered by the presumptive coverage law.

I can think of no reason why AS 09.65.295 or AS 23.30.121 would have intentionally excluded this small set of professional fire fighters. I understand that a Substitute version of SB103 is being considered to add language that would affirm coverage of State-employed fire fighters, including career members of the University Fire Department. If I can be of any assistance, please do not hesitate to contact me.

Respectfully,

Douglas Schrage

Douglas Schrage, Fire Chief

National Council on Compensation Insurance, Inc.

PRELIMINARY COST IMPACT ANALYSIS

Alaska Senate Bill 103

As Introduced on 3/16/2011

NCCI has completed a preliminary cost impact analysis of Alaska Senate Bill 103 (SB 103). This analysis includes a description of the change, an indication as to the approximate magnitude and direction of its cost impact, and identifies potential unintended consequences or other notable items.

The analysis was completed in an expedited manner and is considered preliminary. NCCI may supplement this document with a complete and final analysis of the proposal at a later date. It is possible that the estimated impact of the final analysis will differ materially from what is provided in this document. Note that the absence of an update to the preliminary analysis does not signify that this is NCCI's final assessment of the cost impact of the proposal.

Preliminary Cost/Directional Impact

If SB 103 is enacted, the impact on Alaska's firefighter class codes and the overall workers compensation system costs would be negligible[1]. However, there may be some savings in litigation costs for these class codes.

Summary and Comments

Currently, a firefighter needs to receive a qualifying medical examination upon becoming a firefighter, and receive an annual medical examination showing no evidence of disease during each of the first 7 years of employment to have certain illnesses presumed to be work related.

SB 103 proposes to amend the medical examination requirements in AS 23.30.121(b), which ascertains the eligibility for presumption of compensability for a firefighter hired before August 19, 2008. According to SB 103, medical examinations provided by the department employing the firefighter would satisfy the requirements for presumption as long as the result shows no evidence of disease during the first 7 years of employment.

When NCCI estimated the impact of Alaska House Bill 200 (HB 200) in 2008, that introduced the presumption of compensability for firefighters, the analysis implicitly assumed there would be no cost difference for firefighters hired before and after August 19, 2008.

---

[1] Negligible means the impact is within +/-0.2%.

In the analysis of HB 200, NCCI noted that additional disputes might result over the rebuttable presumption of compensability included in the bill. If SB 103 is enacted, the disputes that arise out of the medical examination requirements could be reduced, and some savings in litigation costs for the firefighter class codes might be realized.

Miscellaneous

The changes to Alaska's Administrative Code, that went into effect on February 20, 2011, codified the specific requirements for medical examination for certain firefighters and defined the use and exposure to tobacco for presumption removal.

Sponsor Statement
SB 103 Workers' Compensation for Firefighters

In 2008, the Alaska Legislature passed statutory changes to the Workers' Compensation program to provide firefighters with the presumption of compensability for certain diseases that are documented to occur as a result of occupational exposures to smoke and chemicals in the performance of their duties. It was the intent of the legislature that this benefit be available to firefighters who had served for seven years and who had received any required physical examinations during that seven year period. However, a wording change made by one committee had the unanticipated effect of narrowing the scope of covered firefighters only to those who had had an initial physical exam at the time of hire. This effect was not intentional and was never discussed in that committee or in any following committees. Instead, it became an issue when the Workers' Compensation Board established program regulations.

Recognizing the problem, the Workers' Compensation Board passed a resolution supporting an amendment to the law to allow any firefighter who entered active service as a firefighter prior to the effective date of AS 23.30.121 the presumption of compensability if during the years prior to enactment, the firefighter received all required examinations and those examinations did not show evidence of the diseases in the first seven years of employment. In addition, the National Council on Compensation Insurance has reviewed the bill for cost impact and indicated that this change is not anticipated to have a cost impact and in fact may save possible litigation costs that might otherwise arise.

The second change the bill makes is to clarify that the law applies to state as well as municipal firefighting agencies. The original bill had referred to a definition by reference, and that definition did not specifically include state firefighters.

SB103 makes these important corrections, and I urge your support.

MEMORANDUM

Summary of Changes Between SB 103\A and SB 103\M

The CS for SB 103 incorporates a definition of firefighters covered by the worker's compensation presumption of compensability and amends it to include the words "state or" to clarify that the provisions also apply to the University of Alaska firefighters who were inadvertently left out of this provision as a result of the current wording.

This definition was originally cited by reference (AS 09.65.295). The language of the definition otherwise remains identical to language incorporated by reference in the bill.

RESOLUTION NUMBER 11-01

RESOLUTION IN SUPPORT OF EXTENDING THE PRESUMPTION OF COVERAGE FOR DISABILITY FROM DISEASES FOR CERTAIN FIRE FIGHTERS UNDER THE ALASKA WORKERS' COMPENSATION ACT

WHEREAS, the Alaska Workers' Compensation Board is a public organization accountable through its members and staff to the residents, the Legislature, and the Governor of Alaska;

WHEREAS, the Alaska Workers' Compensation Board acts as the lead state agency for adjudicating disputes under the Alaska Workers' Compensation Act, to ensure quick, efficient, fair and predictable provision of benefits to injured workers at a reasonable cost to employers;

WHEREAS, the presumption of coverage for disability from diseases for certain fire fighters under AS 23.30.121 only applies to fire fighters who were given a qualifying medical examination upon becoming a fire fighter and an annual medical exam during each of the first seven years of employment;

WHEREAS, the regulations adopted by the Alaska Workers' Compensation Board defining the type and extent of the qualifying medical examination do not apply to individuals already in active service as fire fighters;

NOW THEREFORE BE IT RESOLVED that the Alaska Workers' Compensation Board supports an amendment to AS 23.30.121 to allow any fire fighter who entered active service as a firefighter prior to the effective date of AS 23.30.121 entitlement to the presumption of compensability of that section if during the years prior to enactment of AS 23.30.121 the fire fighter received all medical examinations provided by the department for which they were employed and those examinations did not show evidence of the diseases in any of the first seven years of employment.

CERTIFICATION

The Alaska Workers' Compensation Board held a meeting duly and regularly called, noticed, and convened the 12th day of January, 2010, and the foregoing Resolution was adopted at the meeting.

Signed this 13th day of January, 2010

_____

Michael P. Monagle, Chair
Alaska Workers' Compensation Board

Workers' Compensation Committee of Alaska

PO BOX 200361 ANCHORAGE, ALASKA 99520

January 19, 2012

Dear Senators Hoffman, Olson, Egan, Thomas, Ellis and McGuire

RE: SB 103 and HB 232

I understand SB 103 is being heard tomorrow by the Senate Finance Committee. The Workers' Compensation Committee of Alaska, an employer advocacy group, strongly opposes SB 103 and HB 232.

Under the Alaska Workers' Compensation Act, all employees of the State of Alaska have enjoyed a presumption that, in the absence of substantial evidence to the contrary, a workers' compensation claim comes with the provisions of the Alaska Workers' Compensation Act and is thus compensable. (See, AS 23.30.120.) In 2008, however, the legislature passed AS 23.30.121, which created another presumption that eight types of cancer as well as respiratory disease and "cardiovascular events" were compensable if contracted by a firefighter who had undergone a medical examination at the time of hire and in each of the subsequent seven years that did not show evidence of the disease. The statute was to apply to "claims made on or after the [August 19, 2008] effective date." Section 2, ch. 26, SLA 2008. According to a recent decision from the Alaska Workers' Compensation Board, contrary medical evidence is insufficient to rebut this presumption. As such, the presumption is arguably irrebuttable and hence unconstitutional.

The program developed under the new statute was not supposed to be "mandatory" (HL&C 4/27/07 and 4/30/07; House Judiciary 5/4/07; SL&C 5/4/07; SL&C 2/5/08), was advanced as likely to have "no [financial] impact" (SL&C 4/12/07; HB 200 Sponsor Statement), and therefore was "not an unfunded mandate." (SL&C 5/3/07.)

Additionally, much testimony was taken from Firefighters and union management in 2007 and 2008 declaring that medical science conclusively established Firefighters were at greater risk than the general population for all of the cancers listed in AS 23.30.121. (*See* legislative history, HB 200, SB 117.) The record, however, is utterly devoid of any research. Not one research article was presented. The only testimony in the record was not from medical experts but rather from firefighters and their union lobbyists and officials claiming a link existed.

The reason the record lacks such "research" is obvious: credible and substantive scientific evidence simply does not exist linking the cancers to the occupation of Firefighting. (*See* April 2009 study "Assessing State Firefighter Cancer Presumption Laws and Current Firefighter Cancer Research" available at nic.org) Of the thousands of cancer studies conducted between 1995 and 2008, only 17 studies looked at firefighting as a possible risk factor in contracting

SHELBY L. NUENKE-DAVISON, PRESIDENT; DAISY SAFFIR, VICE PRESIDENT;
TERRY SHURTLEFF, TREASURER; BECKY MCLOUD, SECRETARY

cancer and none of them established any substantive causal relationship indicating firefighters were at any greater risk for developing these cancers than the general public.

Despite the above, the amendments to AS 23.30.121 currently before the legislature (SB 103 and HB 232) now seek to expand the scope of the statute to include ALL firefighters who received any "medical examinations provided by the department" and "the examinations did not show evidence of the disease." (SB 103 and HB 232, Sec. (b)(4)). Most municipalities or smaller villages, however, probably did not require examinations and many local governments still do not have annual examinations.

More importantly, testing for many of the listed conditions did not exist before the mid-1990's and many still are either costly prohibitive or are simply not available. Yet, under this amendment, the presumption will arguably apply as "the examinations provided by the department" "did not show evidence of the disease." Never mind that testing for the condition was not even conducted much less available.

Finally, the greatest concern to the WCCA is the increased costs to employers who are subjected to this Firefighter presumption statute and proposed amendments and whether coverage can be obtained. Alaska is currently ranked as either number one or number two in the Nation with the highest workers' compensation insurance premium rates. Thus, any proposed amendments to the AWCA should be focused on providing a fair, just yet affordable, workers' compensation system and to reduce costs to employers so Alaska can attract and keep more businesses.

While WCCA appreciates Firefighters for the critical role they play in the safety of our cities and towns, the legislature must evaluate this issue objectively and scientifically. The statute and the current amendments simply do not and the WCCA urges you to vote against these bills. Thank you.

Very truly yours,

Shelby L. Nuenke-Davison
President of WCCA

SPONSOR STATEMENT for Senate Bill 108

"An Act naming the Dowling Road overpass at milepost 123.7 on the New Seward Highway the Spc. Stephen "Max" Cavanaugh, Jr., Memorial Overpass."

This bill was created to commemorate the Dowling Overpass in Spc. Stephen 'Max' Cavanaugh Jr.'s memory as a tribute to this hero who continues to save lives.

S t e p h e n 'Max' Cavanaugh Jr. had recently returned from Iraq after surviving 300 convoys where he manned a .50 caliber machine gun. He was driving down New Seward highway, near the Dowling Overpass, when he hit a cow moose, two weeks before his discharge, which resulted in the loss of his life. Max was an organ donor and it was mentioned in his obituary that he continues to save lives even after the loss of his. This loss was the 6th human life lost to moose collisions with cars during2007 and, though no human life is more important than any other, this loss really hit home.

A project was put together to help increase safety in the very corridor where this particular tragedy occurred. This effort was greatly assisted by the Department of Transportation, Highway Safety Office, SAGA (AmeriCorps youth program), the Department of Public Safety and the Department of Fish & Game. The project area was the West side of New Seward Highway between Dimond and O'Malley. The work area was between the bike trail and the highway right-of-way. This effort was performed for 4 days in October, 2008 where we cut, hauled and chipped 11 dumpsters worth of willow, cottonwood, birch and aspen trees.

The effort now is to commemorate the Dowling Overpass in Spc. Stephen 'Max' Cavanaugh Jr.'s memory as a tribute to this hero who continues to save lives.

Governor Sean Parnell
P.O. Box 110001
Juneau, Alaska 99811-0001

March 30, 2010

Dear Governor Parnell,

I hope that you are doing well, and by now settled in as Governor of Alaska.

You may recall that our son, SPC Stephen (Max) Cavanaugh, assigned to the Warrior Transition Unit at Fort Richardson, was killed in a collision with a moose in December, 2007.

You and I met in 2008 when we worked together to clear brush along the New Seward Corridor near where Max was killed. Thanks for being there with us. It meant a lot to Susan and me to know that you would take the time to show your support.

I received a note from Gary Olson at Alaska Moose Federation that he had been called to assist at a moose collision at the very spot where Max lost his life in December, 2007. It seems that, despite our efforts, the moose problem remains in the New Seward Corridor.

Governor Parnell, losing a son or daughter is more painful than anyone can imagine. It was especially tragic that Max was killed while waiting his military discharge after surviving 300 missions as a turret gunner in Iraq. Even after two years, there isn't a day when we don't wonder what might have been, had he come home.

This letter is to thank you for supporting programs like those conducted by AMF and to ask for your continued support. AMF has planned a number of programs, including one to perform the complete removal of all moose browse along New Seward.

Please do what you can to support moose mitigation through whatever means are possible. No one in Alaska should lose a family member if it can be avoided through such efforts.

As always, let me know if there is anything I can do to help. My contact info is below.

Sincerely,

Steve Cavanaugh
4820 Edinburgh Drive
Smyrna, GA 30082

Cell: 404-307-1987

P.O. Box 110741, Anchorage, Alaska 99511 (907) 317-2300

MISSION STATEMENT: Believing in the value of healthy moose populations for all Alaskans, The Alaska Moose Federation will be the leader in the effort to both initiate and maintain the quantity and quality of Alaska's moose population.

March 8, 2011

Honorable Congressman Don Young
United States Congress
2314 Rayburn House Office Building
Washington, DC 20515

Dear Congressman Young,

The Alaska Moose Federation (AMF) is asking for your assistance with a request to honor Spc. Stephen 'Max' Cavanaugh Jr. by renaming the Dowling Overpass on the New Seward Highway in his memory. Spc. Cavanaugh. returned from Iraq in 2007 after surviving 300 convoys where he manned a .50 caliber turret gun. Two weeks before receiving his discharge papers, he was driving down New Seward highway near Dowling when he hit a cow moose which resulted in the loss of his life.

This loss was the 6th human tragedy during 2007 and, though no human life is more important than any other, this loss really hit home. The AMF has been working with the soldier's parents, Stephen Sr. & Susan Cavanaugh of Atlanta, Georgia, the Parnell Administration and key members of the Alaska Legislature on this effort. It has become very apparent that we need your help, given the status of this highway as being a corridor under Federal Highway Administration's oversight.

Attached is a detailed description of the tragedy as well as an effort that involved the soldier's parents, Governor Parnell and others who worked to remove moose browse in 2008 from the New Seward corridor in an effort to reduce future moose collisions.

Thank you for your time and please consider championing this request because, not only is this important for all service men and women, including those who have served in Iraq and Afghanistan, but also for the Alaskans who have either lost their lives or have lost their loved ones to moose collisions.

If you have questions, please contact myself at (907) 529-5567 or Gary Olson, Executive Director of the AMF at (907) 317-2300.

Sincerely,

Bob Henrichs, Chairman

Cc: Senator Lisa Murkowski
Senator Mark Begich
Governor Sean Parnell
Lt. Governor Mead Treadwell
Senator Lesil Mcguire
Senator Charlie Huggins

Spc. Stephen 'Max' Cavanaugh Jr. Memorial

The Anchorage section of the New Seward Highway is a known moose collision corridor in the heart of Anchorage. This corridor has a problem of moose browse located within the fenced corridor which allow moose to winter in the area. If you had forgotten, this area was the scene of an unacceptable tragedy in December of 2007.

THIS HERO CONTINUES TO SAVE LIVES!

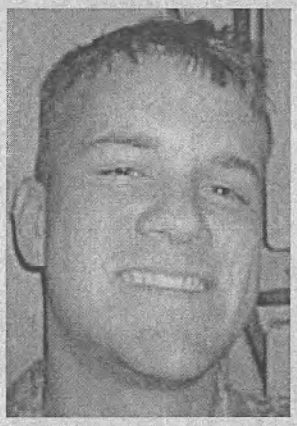
Stephen 'Max' Cavanaugh Jr. had recently returned from Iraq after surviving 300 convoys where he manned a .50 caliber machine gun. He was driving down New Seward highway, near the Dowling Overpass, when he hit a cow moose, two weeks before his discharge, which resulted in the loss of his life. Max was an organ donor and it was mentioned in his obituary that he continues to save lives even after the loss of his. This loss was the 6th human life lost to moose collisions with cars during 2007 and, though no human life is more important than any other, this loss really hit home.

A project was put together to help increase safety in the very corridor where this particular tragedy occurred. This effort was greatly assisted by the Department of Transportation, Highway Safety Office, SAGA (AmeriCorps youth program), the Department of Public Safety and the Department of Fish & Game.

The project area was the West side of New Seward Highway between Dimond and O'Malley. The work area was between the bike trail and the highway right-of-way. This effort was performed for 4 days in October, 2008 where we cut, hauled and chipped 11 dumpsters worth of willow, cottonwood, birch and aspen trees.

Many volunteers helped with the brush cutting effort including the following workers: Governor Sean Parnell; Cliff Judkins, Chairman of the Board of Game; Colonel Holloway of the State Troopers and also the parents of the fallen soldier Steve Sr. and Susan Cavanaugh who traveled up from Atlanta to help with this effort. We also had solid help from private partners in this effort which included Alaska Waste for disposal cans, Absolute Environmental Services for the donated Ford truck and the donated dump trailer and also the Department of Transportation for the use of the Morbark tree chipper.

The effort now is to commemorate the Dowling Overpass in Spc. Stephen 'Max' Cavanaugh Jr.'s memory as a tribute to this hero who continues to save lives.



Moose browse removed from New Seward Hwy

After 300 Iraq missions, Fort Richardson soldier killed by moose

THE ASSOCIATED PRESS

ANCHORAGE, Alaska -- Spc. Stephen Cavanaugh survived more than 300 missions in Iraq, but was killed when his car hit a moose months after his return to Alaska.

The 24-year-old Fort Richardson soldier was in a coma when he was taken off life support Thursday.

When he returned to Fort Richardson in March, Cavanaugh had brain trauma from the many explosions around him in Iraq and was diagnosed with post-traumatic stress disorder, according to the soldier's father, also named Stephen Cavanaugh.

The younger Cavanaugh, who deployed to Iraq with the 98th Maintenance Company, was still trying to heal when his car struck the moose Sunday night on the Seward Highway in South Anchorage.

That stretch of the highway isn't well-lit, and seeing something alongside the roadway can be difficult, said police Lt. Nancy Reeder.

"There was a moose - a mom and a calf - that ran out in front of him," Reeder said. "It's one of those things that happens in Alaska. A moose runs out in the dark and there's nothing you can do."

Reeder said the impact flung the moose on top of Cavanaugh's Camaro convertible, crushing him. The moose died and its calf ran off.

Cavanaugh was rushed to a local hospital in critical condition.

The soldier's family was notified and caught a flight from Atlanta.

As time passed, Cavanaugh's condition wasn't improving, his father said. Cavanaugh - known as Max to family members - never woke up and doctors said he never would, according to his father.

Cavanaugh's family decided that taking him off life support and donating his organs would be the right thing to do, and what he would have wanted, his father said. Cavanaugh died at 2:17 p.m. Thursday.

He joined the Army in June 2004 and deployed to Iraq in March 2006, Army officials said. Cavanaugh was stationed outside of Baghdad, where he staffed a .50-caliber machine gun on a convoy escort, his father said.

His family is planning a funeral Mass in Atlanta for Dec. 15. A memorial ceremony also is being arranged on post.

Spc. Stephen "Max" Cavanaugh

PAO staff report

A Soldier from Fort Richardson's Warrior Transition Unit died Dec. 6 from injuries sustained in a car accident Dec. 2.

Spc. Stephen "Max" Cavanaugh was driving north on the Seward Highway in Anchorage when he hit a moose with his vehicle. Cavanaugh suffered severe head injuries in the accident as was on life support.

According to his family, four days after the accident, he was showing no signs of improvement and they decided to remove him from life support and donate his organs.

Cavanaugh, 24, of Lawrenceville, Ga., was a mechanic who joined the Army in June 2004 and was assigned to Fort Richardson in May 2005.

He completed a one-year deployment to Iraq with 98th Maintenance Company in March 2007.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 115 (L&C)

Analysis

SB 115 defines portable electronics insurance and the information that must be given in writing to consumers. It provides that the insurance may be offered as a group policy. The bill also provides for a limited producer license to be issued and allows a seller or servicer to authorize employees to sell portable electronics insurance under that license if there is a training program in place, if the limited producer licensee maintains a register of each employee and if the limited producer certifies that the employees are in compliance with 18 U.S. C. 1033.

The division does not anticipate any fiscal impact as a result of this legislation.

SB 115 Portable Electronics Insurance

Sponsor Statement

As cell phones, tablet computers and other portable electronic devices proliferate and become necessary to commerce and communication, insurers have begun to create products to cover the loss or damage of these valuable and important possessions. Because most electronic devices are sold through retailers who are not usually in the insurance business, and because most portable electronics insurance is sold where the devices are purchased, without regulation wildly divergent standards have evolved under which these policies are sold. There is at present a chaotic market for such insurance.

Under these circumstances, the possibility exists that less well capitalized, or less scrupulous, companies may not survive in the marketplace or otherwise may not be able to make good on their promises. Similarly, sales personnel working for vendors of electronic devices may not understand these products well enough to explain them to customers, and they may well not understand the disclosure laws under which sellers of insurance must operate, leaving consumers vulnerable to liabilities they do not fully comprehend.

To guard against the excesses of a marketplace frontier, reputable companies seek regulation that protects both the customer and the reputation of the products being marketed. SB 116 seeks to provide both sellers and buyers the confidence to enter the market for portable electronics insurance--buyers that the product will be both appropriate and dependable, sellers that their products will be trusted and sought after.

CSSB 115 (L&C)\I Portable Electronics Insurance

Sectional Analysis

Sec. 1. Establishes that portable electronics insurance is not a service contract.

Sec. 2. Adds an applicant for a license under AS 21.27.150(a)(800—electronics limited produced license—to the list of persons to whom AS 21.27.060(d)—requiring a successful applicant for a license to sell insurance—to pass an examination, does not apply.

Sec. 3 Adds a vendor that sells or offers portable electronics insurance to the list of persons to whom the Director of Insurance may issue a license, in this case a portable electronics limited producer license. This section also allows an employee or authorized representative of the licensee to transact portable electronic insurance at each site that the licensee does business. Additionally, under this section an employee or representative of a licensee need not themselves be licensed provided certain criteria are met.

Sec. 4. Establishes the conditions under which portable electronics insurance may be sold and defines the terms "portable electronic insurance" and "vendor" for the purposes of this section of statute.

The Honorable Dennis Egan, Chair, Senate Labor & Commerce Committee
Honorable Members, Senate Labor & Commerce Committee
Alaska Senate
Juneau, Alaska 99801

Re: Committee Substitute for SB 115 (Labor & Commerce) – SUPPORT

AT&T requests your support of the committee substitute for SB 115 when it comes before the Committee for consideration. AT&T provides the product that is at the heart of this bill—portable electronics insurance—to its customers at its locations across the country. Asurion, a partner of AT&T, administers the program of providing portable electronic device insurance coverage to individuals purchasing portable electronic devices and services from AT&T.

AT&T supports this bill because it modernizes existing law in the Insurance Code, which covers the licensure of limited lines insurance agents, by modifying existing law to provide for appropriate oversight specifically tailored to insurance protection for consumer "portable electronics." The portable electronics concept authorizes a broad scope of coverage for consumer devices in a rapidly evolving market so that a law change is not necessary every time a new product or device is brought to the market.

The bill provides clarity and certainty for AT&T and its partner regarding the licensure of wireless carriers for the sale of portable electronics insurance.

We have and are supporting this legislation in numerous other states and passing this bill will be consistent with the national trend for the modernization of insurance law for the coverage of portable electronic devises.

Again, AT&T would appreciate your favorable support of this legislation. If you have any questions, please feel free to contact me.

Sincerely,

Jason Olson
Director – Regulatory

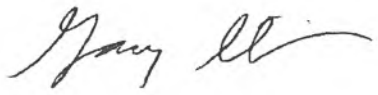
The Honorable Dennis Egan
Chair, Senate Labor & Commerce Committee
AK State Capitol, Room #510
Juneau, AK 99801

Members, Senate Labor & Commerce Committee

Re: Committee Substitute for SB 115 (Labor & Commerce) – SUPPORT

Dear Senator Egan:

On behalf of Liberty Mutual I would like to request your support of the committee substitute for SB 115 when it comes before the Senate Labor and Commerce Committee for consideration. Liberty Mutual is a partner of Asurion, which administers a program providing portable electronic device insurance coverage to individuals purchasing portable electronic devices and services.



We are in support of this bill because it modernizes existing law in the Insurance Code, which covers the licensure of limited lines insurance agents, by expanding the current law to appropriately regulate the offering of insurance covering "portable electronics." The portable electronics concept authorizes a broad scope of coverage for consumer devices so that a law change is not necessary every time a new product is brought to the market.

The bill provides clarity and regulatory certainty to the regulated community regarding the licensure of wireless carriers for the sale of portable electronics insurance. We also support the consumer protections the bill offers, including training requirements for a vendor's employees and authorized representatives selling this product, disclosure requirements at the point of sale, and others.

We have and are supporting this legislation in numerous other states and passing this bill will be consistent with the national trend for the regulation of portable electronic insurance coverage.

Again, Liberty Mutual, Inc. would appreciate your favorable support of this legislation. If you have any questions, please feel free to contact me.

Sincerely,

Gary Strannigan
AVP, Public Affairs
Liberty Mutual Group

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSSB119
2012 LEGISLATIVE SESSION

Analysis

This bill provides for regulation and licensure of athletic trainers by the Department of Commerce, Community and Economic Development under a new chapter in AS title 8. Under AS 44.64.030(a)(6), the Office of Administrative Hearings (OAH) conducts hearings in licensing matters, including disciplinary actions, arising under AS Title 8, and in some cases provides administrative law judges to serve as mediators in the cases. OAH does not anticipate that addition of this licensure category would increase the office's caseload or the cost of providing hearings for this function beyond OAH's capacity to handle the cases at currently approved staffing levels. The cost to OAH of performing the services would be recovered from the department through interagency receipts, based on the time commitment required for hearings and mediations.

(Revised 11/28/2011 OMB)

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSSB 119 (L&C)
2012 LEGISLATIVE SESSION

Analysis

SB 119 creates a new program within the Department of Commerce, Community, and Economic Development for the professional licensing of Athletic Trainers.

This fiscal note includes Services costs for printing of applications, communications, advertising, legal fees, and the initial IT costs to configure, program, and implement the licensing program.

Under AS 08.01.065, this program will be required to cover its costs with licensing fees. The initial biennial licensing fee will be around $900 with subsequent licensing fees around $80.

Senate Finance Committee

DATE: February 7, 2012

FROM: Don Habeger, Division Director
Corporations, Business and Professional Licensing

RE: Department Response to Questions regarding SB 119: Athletic Trainer Licensing

---

In response to the Committee's questions on SB 119: Athletic Trainer Licensing, the Division of Corporations, Business and Professional Licensing offers the following information:

1) What are the initial fees for other occupational license groups that do not have a board?
   - To look at all professions is a daunting task as some of our professions are decades old and initial fee information would take a great deal of time to try and research. However, the Pawnbroker license is a new program that is the result of the passage of SB 292 in 2010. The cost of this license when first issued (and continues to be) is $500. This is further broken down to a $100 Application Fee and a $400 License Fee.

2) What are the penalties if there is a complaint or a revoked license?
   - If the division needed to impose a penalty on a licensee we would first consult the program chapter within Title 8 to see if the program had specified penalty language. If the program chapter did not have specific language addressing the issue the division would fall back to centralized licensing statutes in which "impose a civil fine not to exceed $5000" is seen. Currently SB 119 does not specify penalty language so the division would rely on its general licensing statute if the Athletic Trainer Program be implemented.

3) What would you anticipate as being the process for an investigation or revoking a license?
   - Generally the following is the investigative pathway: The division is made aware of a possible violation by a licensee through the public complaint process. The division takes an initial complaint and determines if they have jurisdiction over the issue and there is merit to the complaint: this is our "Intake" stage. If the answer to initial review is 'yes', then the issue is moved into "Complaint" status for additional work to determine whether or not it is likely a violation. Once established that it is likely a violation has occurred, then the case reaches its "Investigation" stage where all supporting evidence is gathered and the division is in the best position to prove our case.

   - In all cases compliance with statute and regulation by a licensee is the goal. To obtain compliance, a number of tools may be employed. One tool is a Consent Agreement, with which the division and the licensee may settle the issue prior to a hearing process. This tool leads to compliance and is generally less costly to the division, licensee and profession. If an agreement cannot be reached by the parties then the division proceeds to tool number two, which is a formal Allegation through the Department of Law. This process generally leads to a hearing before an Administrative Law Judge and is more time intensive and costly. If

Website: http://www.commerce.alaska.gov/occ

after a hearing the Law Judge determines a violation has been committed, they recommend to a board or the department sanctions, including suspension/revocation. Generally, these are adopted by the board or the department.

4) Testimony during the hearing made reference to a $25 licensing fee for state licensed nutritionist.
   - It is true that at the end of FY11 there were five licensed Nutritionists. It is also true that current licensing fees for a Nutritionist is $50 per biennial licensing cycle ($25 per year). The division believes, however, a broader context to these facts is warranted to provide the Committee the best information from which to compare program costs. This additional information is below.

   - The Division issues a biennial license to both Nutritionists and Dietitians. This program, established by Chapter 38 of Title 8, reports 185 licenses at year end FY11. As the division has biennial licensing cycles, it also watches program costs on a corresponding biennial cycle. The last two fiscal years for Dietitian and Nutritionist include program expenses of $22,120. The division does not believe licensing Athletic Trainers, should SB 119 pass the Legislature, would have program costs equal to licensing 185 Dietitians and Nutritionists, but if they had to pass these same costs on to Athletic Trainers, the biennial licensing fee for the reported 40 licensees would become approximately $550. To also add perspective to the issue of licensing fees, the division points out that Dietitians and Nutritionist paid a licensing fee of $200 during the FY08-09 licensing cycle.

Senator Kevin Meyer
Senate District O

SPONSOR STATEMENT FOR SB 119

"An Act relating to the licensing and regulation of athletic trainers"

SB 119 would amend current statutes to establish licensing and regulation of athletic trainers in the State of Alaska.

Athletic Trainers are certified, health care professionals who practice in the field of sports medicine. This profession plays a significant role in the management, prevention, recognition and rehabilitation of injured athletes under the supervision of a licensed physician. As people become increasingly more active, athletic trainers are a vital resource in administering immediate emergency care as well as injury prevention and treatment programs.

The National Athletic Trainer's Association (NATA), which was founded in 1950, is the professional membership association for certified athletic trainers. According to NATA, Alaska is one of the few states that do not currently license athletic trainers. Should SB 119 pass, athletic trainers would be required to have a license to practice in the State of Alaska.

National Athletic Trainers' Association®

Health Care for Life & Sport

ATHLETIC TRAINING EDUCATION OVERVIEW

This document provides a brief overview of the education and credentialing process for entry-level athletic trainers. Athletic Training programs typically fall into three categories: a baccalaureate degree in Athletic Training; a baccalaureate degree with a major in athletic training; or graduate-level program with a major in athletic training. Academic programs are accredited by the Commission on Accreditation of Athletic Training Education (CAATE). The minimum entry point into the profession of Athletic Training is at the baccalaureate level; by 2014-2015, all accredited education programs in Athletic Training will lead to a degree in Athletic Training. Upon completion of a CAATE-accredited Athletic Training education program, students become eligible to obtain national certification granted by the NATA Board of Certification, Inc. (BOC).

ENTRY-LEVEL EDUCATION

Entry-level athletic training education uses a competency-based approach in both the classroom and clinical settings. Using a medical-based education model, Athletic Training students are educated to provide comprehensive preventive services and care in six domains of clinical practice: prevention; clinical evaluation and diagnosis; immediate care; treatment, rehabilitation and reconditioning; organization and administration; and professional responsibility. The educational requirements for CAATE-accredited Athletic Training Education Programs include not only cognitive (knowledge) and psychomotor (skill) content, but also a broad scope of foundational behaviors of professional practice, as well as a comprehensive clinical learning requirement that is embodied in the clinical proficiencies (professional, practice-oriented outcomes) as identified in the *Athletic Training Educational Competencies and Clinical Proficiencies*.

Students must receive formal instruction in the following specific subjects

Basic and Applied Sciences	Professional Content
• Human anatomy • Human physiology • Biology • Statistics and research design Rehabilitation • Exercise Physiology • Kinesiology/Biomechanics • Chemistry* • Physics* **Recommended but not required by some ATEP*	• Risk Management and Injury Prevention • Pathology of Injuries and Illnesses • Orthopedic Clinical Examination and Diagnosis • Medical Conditions and Disabilities • Acute Care of Injuries and Illnesses • Therapeutic Modalities • Conditioning, Rehabilitative Exercise & Pharmacology • Psychosocial Intervention and Referral • Nutritional Aspects of Injuries & Illnesses • Health Care Administration

CLINICAL EDUCATION

Students are required to participate in a minimum of two years of academic clinical education. Through these experiences, students gain clinical experiences associated with a variety of different patient populations defined but not limited to: gender, varying levels of risk, utilization of protective equipment, and general medical conditions (e.g. diabetes, asthma) that address the continuum of care.

Clinical experiences provide students with opportunities to practice, under the direct supervision of qualified Clinical Instructors (i.e., Certified Athletic Trainer [ATC®] or other credentialed health care professionals).

THE ATC® CREDENTIAL

The ATC® credential and the BOC requirements are currently recognized by 46 states for eligibility and/or regulation of the practice of athletic trainers. The credibility of the BOC program and the ATC® credential it awards are supported by three pillars: (1) the BOC certification examination; (2) the BOC Standards of Professional Practice, and Disciplinary Guidelines and Procedures; and (3) continuing competence (education) requirements.

BOC certification is recognized by the National Commission for Certifying Agencies and is the only accredited certification program for athletic trainers. To be certified, an individual must demonstrate that he/she is an athletic trainer capable of performing the required duties without threat of harm to the public. The BOC traditionally conducts annual examination development meetings during which certified athletic trainers and recognized experts in the science of athletic training develop, review and validate examination items and problems. The knowledge, skills, and abilities required for competent performance as an entry-level athletic trainer fall into three categories:

1. Understanding, applying, and analyzing;
2. Knowledge and decision-making;
3. Special performance abilities.

BOC certified athletic trainers are educated, trained and evaluated in six major practice domains:

1. Prevention
2. Clinical Evaluation and Diagnosis
3. Immediate Care
4. Treatment, Rehabilitation and Reconditioning
5. Organization and Administration
6. Professional Responsibility

For more information regarding the educational, certification, and licensure requirements for athletic trainers visit:

The Board of Certification – www.bocatc.org
The Commission on the Accreditation of Athletic Training Education Programs–www.caate.net

Athletic Trainers

Significant Points

- A bachelor's degree is usually the minimum requirement, but many athletic trainers hold a master's or doctoral degree.
- Long hours, sometimes including nights and weekends, are common.
- Job prospects should be good in the healthcare industry and in high schools, but competition is expected for positions with professional and college sports teams.

Nature of the Work

Athletic trainers help prevent and treat injuries for people of all ages. Their patients and clients include everyone from professional athletes to industrial workers. Recognized by the American Medical Association as allied health professionals, athletic trainers specialize in the prevention, diagnosis, assessment, treatment, and rehabilitation of muscle and bone injuries and illnesses. Athletic trainers, as one of the first healthcare providers on the scene when injuries occur, must be able to recognize, evaluate, and assess injuries and provide immediate care when needed. Athletic trainers should not be confused with fitness trainers or personal trainers, who are not healthcare workers, but rather train people to become physically fit. (Fitness workers are discussed elsewhere in the Handbook.)

Athletic trainers try to prevent injuries by educating people on how to reduce their risk for injuries and by advising them on the proper use of equipment, exercises to improve balance and strength, and home exercises and therapy programs. They also help apply protective or injury-preventive devices such as tape, bandages, and braces.

Athletic trainers may work under the direction of a licensed physician, and in cooperation with other healthcare providers. The extent of the direction ranges from discussing specific injuries and treatment options with a physician to performing evaluations and treatments as directed by a physician. Some athletic trainers meet with the team physician or consulting physician once or twice a week; others interact with a physician every day. Athletic trainers often have administrative responsibilities. These may include regular meetings with an athletic director, physician practice manager, or other administrative officer to deal with budgets, purchasing, policy implementation, and other business-related issues.

Work environment. The industry and individual employer are significant in determining the work environment of athletic trainers. Many athletic trainers work indoors most of the time; others, especially those in some sports-related jobs, spend much of their time working outdoors. The job also might require standing for long periods, working with medical equipment or machinery, and being able to walk, run, kneel, stoop, or crawl. Travel may be required.

Schedules vary by work setting. Athletic trainers in nonsports settings generally have an established schedule—usually about 40 to 50 hours per week—with nights and weekends off. Athletic trainers working in hospitals and clinics may spend part of their time working at other locations doing outreach services. The most common outreach programs include conducting athletic training services and speaking at high schools, colleges, and commercial businesses.

Athletic trainers in sports settings have schedules that are longer and more variable. These athletic trainers must be present for team practices and competitions, which often are on evenings and weekends, and their schedules can change on short notice when games and practices have to be rescheduled. In high schools, athletic trainers who also teach may work 60 to 70 hours a week, or more. In National Collegiate Athletic Association Division I colleges and universities, athletic trainers generally work with one team; when that team's sport is in season, working at least 50 to 60 hours a week is common. Athletic trainers in smaller colleges and universities often work with several teams and have teaching responsibilities. During the off-season, a 40-hour to 50-hour work week may be normal in most settings. Athletic trainers for professional sports teams generally work the most hours per week. During training camps, practices, and competitions, they may be required to work up to 12 hours a day.

There is some stress involved with being an athletic trainer. The work of athletic trainers requires frequent interaction with others. They consult with physicians as well as have frequent contact with athletes and patients to discuss and administer treatments, rehabilitation programs, injury-preventive practices, and other health-related issues. Athletic trainers are responsible for their clients' health, and sometimes have to make quick decisions that could affect the health or career of their clients. Athletics trainers also can be affected by the pressure to win that is typical of competitive sports teams.

Training, Other Qualifications, and Advancement

A bachelor's degree is usually the minimum requirement, but many athletic trainers hold a master's or doctoral degree. In 2009, 47 States required athletic trainers to be licensed or hold some form of registration.

Education and training. A bachelor's degree from an accredited college or university is required for almost all jobs as

Athletic trainers apply protective devices such as tape, bandages, and braces.

Projections data from the National Employment Matrix

Occupational Title	SOC Code	Employment, 2008	Projected Employment, 2018	Change, 2008-2018 Number	Change, 2008-2018 Percent
Athletic trainers	29-9091	16,300	22,400	6,000	37

(NOTE) Data in this table are rounded. See the discussion of the employment projections table in the *Handbook* introductory chapter on *Occupational Information Included in the Handbook.*

an athletic trainer. In 2009, there were about 350 accredited undergraduate programs nationwide. Students in these programs are educated both in the classroom and in clinical settings. Formal education includes many science and health-related courses, such as human anatomy, physiology, nutrition, and biomechanics.

According to the National Athletic Trainers' Association, almost 70 percent of athletic trainers have a master's degree or higher. Athletic trainers may need a master's or higher degree to be eligible for some positions, especially those in colleges and universities, and to increase their advancement opportunities. Because some positions in high schools involve teaching along with athletic trainer responsibilities, a teaching certificate or license could be required.

Licensure and certification. In 2009, 47 States required athletic trainers to be licensed or registered; this requires certification from the Board of Certification, Inc. (BOC). For BOC certification, athletic trainers need a bachelor's or master's degree from an accredited athletic training program and must pass a rigorous examination. To retain certification, credential holders must continue taking medical-related courses and adhere to the BOC standards of practice. In Alaska, California, West Virginia, and the District of Columbia where licensure is not required, certification is voluntary but may be helpful for those seeking jobs and advancement.

Other qualifications. Because all athletic trainers deal directly with a variety of people, they need good social and communication skills. They should be able to manage difficult situations and the stress associated with them, such as when disagreements arise with coaches, patients, clients, or parents regarding suggested treatment. Athletic trainers also should be organized, be able to manage time wisely, be inquisitive, and have a strong desire to help people.

Advancement. There are a few ways for athletic trainers to advance. Some athletic trainers advance by switching teams or sports to gain additional responsibility or pay. Assistant athletic trainers may become head athletic trainers and, eventually, athletic directors or physician, hospital or clinic practice administrators where they assume a management role. Some athletic trainers move into sales and marketing positions, using their expertise to sell medical and athletic equipment.

Employment

Athletic trainers held about 16,300 jobs in 2008 and are found in every part of the country. Most athletic trainer jobs are related to sports, although an increasing number also work in nonsports settings. About 39 percent were found in public and private educational services, primarily in colleges, universities, and high schools. Another 38 percent of athletic trainers worked in healthcare, including jobs in hospitals, offices of physicians, and offices of other health practitioners. About 13 percent worked in fitness and recreational sports centers. Around 5 percent work in spectator sports.

Job Outlook

Employment is projected to grow much faster than average. Job prospects should be good in the healthcare industry and in high schools, but competition is expected for positions with professional and college sports teams.

Employment change. Employment of athletic trainers is projected to grow 37 percent from 2008 to 2018, much faster than the average for all occupations, because of their role in preventing injuries and reducing healthcare costs. Job growth will be concentrated in the healthcare industry, including hospitals and offices of health practitioners. Fitness and recreation sports centers also will provide new jobs, as these establishments grow and continue to need additional athletic trainers to provide support for their clients. Growth in positions with sports teams will be somewhat slower, however, as most professional sports clubs and colleges and universities already have complete athletic training staffs.

The demand for healthcare, with an emphasis on preventive care, should grow as the population ages and as a way to reduce healthcare costs. Increased licensure requirements and regulation has led to a greater acceptance of athletic trainers as qualified healthcare providers. As a result, third-party reimbursement is expected to continue to grow for athletic training services. Athletic trainers will benefit from this expansion because they provide a cost-effective way to increase the number of health professionals in an office or other setting.

In some States, there are efforts underway to have an athletic trainer in every high school to work with student-athletes, which may lead to growth in the number of athletic trainers employed in high schools. In addition, as more young athletes specialize in certain sports, there is increasing demand for athletic trainers to deal with repetitive stress injuries.

As athletic trainers continue to expand their services, more employers are expected to use these workers to reduce healthcare costs by preventing work-related injuries. Athletic trainers can help prevent injuries and provide immediate treatment for many injuries that do occur. For example, some athletic trainers may be hired to increase the fitness and performance of police and firefighters.

Job prospects. Job prospects should be good for athletic trainers in the healthcare industry and in high schools. Those looking for a position with a professional or college sports team may face competition.

Because of relatively low turnover, the settings with the best job prospects will be the ones that are expected to have the most job growth, primarily positions in the healthcare and fitness and recreational sports centers industries. Additional job opportunities may arise in elementary and secondary schools as more

positions are created. Some of these positions also will require teaching responsibilities.

There are relatively few positions for professional and collegiate sports teams in comparison to the number of applicants. Turnover among professional sports team athletic trainers is also limited. Many athletic trainers prefer to continue to work with the same coaches, administrators, and players when a good working relationship already exists.

There also are opportunities for athletic trainers to join the military, although they would not be classified as an athletic trainer. Enlisted soldiers and officers who are athletic trainers are usually placed in another program, such as health educator or training specialist, in which their skills are useful. (For information on military careers, see the *Handbook* statement on job opportunities in the Armed Forces.)

This occupation is expected to continue to change over the next decade, including more administrative responsibilities, adapting to new technology, and working with larger populations, and jobseekers must be prepared to adapt to these changes.

Earnings

Most athletic trainers work in full-time positions, and typically receive benefits. The salary of an athletic trainer depends on experience and job responsibilities, and varies by job setting. Median annual wages for athletic trainers were $39,640 in May 2008. The middle 50 percent earned between $32,070 and $49,250. The lowest 10 percent earned less than $23,450, while the top 10 percent earned more than $60,960.

Many employers pay for some of the continuing education required for athletic trainers to remain certified, although the amount covered varies from employer to employer.

Related Occupations

Other American Medical Association allied health professionals include:

Chiropractors
Emergency medical technicians and paramedics
Licensed practical and licensed vocational nurses
Massage therapists
Occupational therapists
Physical therapists
Physician assistants
Physicians and surgeons
Podiatrists

ALASKA ATHLETIC TRAINERS ASSOCIATION

April 1, 2011

Alaska Athletic Trainers Association
PO Box 872710
Wasilla, AK 99687

Honorable Senator Meyer,

On behalf of the Alaska Athletic Trainers Association, I would like to thank you for the sponsorship of Senate Bill 119 for the licensure of athletic trainers in Alaska. We are honored to have your leadership in support of this important legislation.

The Alaska Athletic Trainers Association is requesting the licensure of athletic trainers in Alaska. Forty-seven states have some form of athletic training regulation verifying the knowledge, skills and abilities required for competent performance of athletic training. Senate Bill 119 works with the pending youth sports concussion legislation to provide comprehensive and high quality athletic training in Alaska.

You can see by the letters of support that this legislation has the support of many medical professionals such as physicians and physician's assistants. It is supported by athletic directors, coaches and school administrators.

The Alaska Athletic Trainers Association will dedicate the time and energy needed to make this a successful legislative process. Again, we thank you for your leadership role in our Senate Bill and your support of our licensing efforts.

Sincerely,

B. Shelden 4/12

Brenda Shelden
President of the Alaska Athletic Trainers Association

ALASKA ATHLETIC TRAINERS ASSOCIATION

September, 2011

Alaska Athletic Trainers Association
PO Box 872710
Wasilla, AK 99687

The Alaska Athletic Trainers Association, on behalf of Alaska athletic trainers, is working toward professional licensure in Alaska. Legislation was introduced in the 2011 session with sponsorship by Senator Kevin Meyer.

- The language of the bill states that anyone calling themselves *an athletic trainer* must be licensed by the state of Alaska Division of Occupational Licensing.
- The requirements for licensure are exactly the same as those required by the Board of Certification. The BOC is the postgraduate certification program for the National Athletic Trainers Association. The state of Alaska will not add to the already rigorous requirements of the BOC.
- The fees imposed by the Alaska Division of Occupational Licensing are not cost prohibitive.
- Alaska is one of only 3 states that does not license athletic trainers.
- Presently, athletic trainers are not covered by the Alaska Statue 09.65.300 *Immunity for Providing Free Health Care Services* (Alaska's version of *the Good Samaritan Law)*. This prevents athletic trainers from volunteering their services at schools, community or nonprofit events.

I support the role of the athletic trainer in Alaska and sign this document in support of licensure.

The Alaska Athletic Trainers Association, on behalf of Alaska athletic trainers, is working toward professional licensure in Alaska. Legislation was introduced in the 2011 session with sponsorship by Senator Kevin Meyer.

- The language of the bill states that anyone calling themselves *an athletic trainer* must be licensed by the state of Alaska Division of Occupational Licensing.
- The requirements for licensure are exactly the same as those required by the Board of Certification. The BOC is the postgraduate certification program for the National Athletic Trainers Association. The state of Alaska will not add to the already rigorous requirements of the BOC.
- The fees imposed by the Alaska Division of Occupational Licensing are not cost prohibitive.
- Alaska is one of only 3 states that does not license athletic trainers.
- Presently, athletic trainers are not covered by the Alaska Statue 09.65.300 *Immunity for Providing Free Health Care Services* (Alaska's version of *the Good Samaritan Law)*. This prevents athletic trainers from volunteering their services at schools, community or nonprofit events.

I support the role of the athletic trainer in Alaska and sign this document in support of licensure.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSSB121
2012 LEGISLATIVE SESSION

Analysis

The Division of Retirement and Benefits will require two non-permanent employees to complete the preparation work to account for and produce the necessary documents and forms for the inception of the new tiers. Education to employers will be required to properly electronically report service and salaries of new employees and existing employees of the defined contribution plans who elect to convert to the new tier. Education to employees will be required for defined contribution employees to make an informed decision during the election period and for new members of the new tiers.

The division will be required to reprogram its existing system, the Combined Retirement System, which tracks all service and salaries reported by employers to the system, to accommodate the new provisions of the new tiers.

The estimated administrative costs by fiscal year are as follows:

Dollars are in thousands

	FY13	FY14	FY15	FY16	FY17	FY18
PERSONAL SERVICES

RE: Fiscal Note for Committee Substitute Senate Bill No. 121, Draft Version "R"
New Tier for PERS and TRS Healthcare

Dear Jim:

As requested, we are providing the following information for a Fiscal Note on Committee Substitute SB 121, Draft Version "R" which allows current Defined Contribution Retirement (DCR) members and future members to have a choice between the DCR Plan and the Defined Benefit (DB) Plan. Current DCR members or any future members that elect to go into the DB Plan will enter Tier V for PERS and Tier IV for TRS. These tiers will have the same pension benefits as the latest DB tier but all members will be contributing at 8% of pay and they will have different healthcare benefits.

Under the new tiers, members will share the cost of healthcare benefits initially based on the same retiree premium sharing schedule as Tier IV for PERS and Tier III for TRS. Retiree pays full premium until Medicare eligible age (age 65) or retired with 25 years of service for TRS and PERS Peace Officer/Firefighters (30 years for PERS Others) instead of at age 60. On or after July 1, 2018 and every five years thereafter, the retiree premium sharing schedule percentages shall be adjusted, maintaining the five percent differences that exist in the current retiree premium sharing schedule, to cover the changes in the employer normal cost rates for members retiring on or after the date of the change in the schedule.

This bill affects the State of Alaska Public Employees' Retirement System Defined Benefit Plan (PERS DB) and the Teachers' Retirement System Defined Benefit Plan (TRS DB). We are assuming the proposed benefit changes would become effective as of July 1, 2013 and will first impact contribution rates during FY16 considering the two-year delay in budgeting contribution payments. Our results are based on the 2010 actuarial valuation data.

The table below shows the employer cost/(savings) of the bill for Fiscal Years 2016 through 2020. Dollars are in thousands.

PERS DB Plan	**FY16**	**FY17**	**FY18**	**FY19**	**FY20**
Increase in Normal Cost Amount	$ (7,162)	$ (7,229)	$ (6,793)	$ (6,506)	$ (4,432)
General Fund Transfer to Pay Unfunded Past Service Cost	$ 0	$ 0	$ 0	$ 0	$ 0
Total Increase in Annual Employer Contribution Amount	$ (7,162)	$ (7,229)	$ (6,793)	$ (6,506)	$ (4,432)

1200 17th Street, Suite 1200 • Denver, CO 80202
720.359.7700 • 720.359.7701 (fax)

TRS DB Plan	FY16	FY17	FY18	FY19	FY20
Increase in Normal Cost Amount	$ (1,451)	$ (1,616)	$ (1,555)	$ (1,601)	$ (1,670)
General Fund Transfer to Pay Unfunded Past Service Cost	$ 0	$ 0	$ 0	$ 0	$ 0
Total Increase in Annual Employer Contribution Amount	$ (1,451)	$ (1,616)	$ (1,555)	$ (1,601)	$ (1,670)
Total PERS and TRS	$ (8,613)	$ (8,845)	$ (8,348)	$ (8,107)	$ (6,102)

Comments on Actuarial Analysis

Our actuarial analysis indicates that the employer costs of the healthcare benefit are projected to increase faster than payroll for the future new employees expected to choose the DB plan benefits due to healthcare cost trend rates that are higher than the payroll growth rate. The DB pension benefit is projected to cost employers less due to a lower employer normal cost rate than the employer contribution rate to the DCR plan. The initial savings in employer costs for pension more than compensate for the cost of the healthcare benefit, resulting in a net savings over the five-period shown above. Without any changes, we would expect the rising healthcare benefit cost to exceed the pension savings resulting in a net employer cost some point in the future.

The latest Draft "R" of CS SB 121 includes a provision that allows for adjustments in the retiree premium sharing schedule to cover the costs associated with increasing employer normal cost rates. This increasing cost is then paid by members retiring after the date of the change in the schedule. This provision should prevent increases in employer costs due to anticipated rising healthcare benefit normal costs. However, a future increase in the retiree premium sharing schedule is likely to reduce enrollment in the healthcare benefit, resulting in only higher users of healthcare continuing to participate in the healthcare benefit. This will then exacerbate the need for future adjustments to the retiree premium sharing schedule. This provision has not been valued as part of this fiscal note since the first change in the retiree premium sharing schedule would not affect costs until FY21.

In addition, these calculations assume the assets of the funds achieve an annual investment rate of return of 8%. Volatility of returns due to the investment risk may periodically create actuarial losses, which may result in unfunded liabilities that will increase the employer costs not covered by the adjustments to the retiree premium sharing schedule.

Summary for Analysis Continuation Section of Fiscal Note

The data, assumptions, plan provisions and methods used for the costs are described in the actuarial valuation reports for PERS and TRS as of June 30, 2010. The assets are based on the June 30, 2010 information provided by Christina Maiquis. We have assumed that the bill will become effective July 1, 2013. We have also assumed that 60% of current DCR members will elect to convert to the DB Plan and that 80% of future members will choose the DB Plans either by choice or by default. We have attached a detailed summary of the allocation of DB costs and DCR savings as a result of the expected elections.

Please let us know if you need any further information.

Sincerely,

David H. Slishinsky

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSSB121
2012 LEGISLATIVE SESSION

Analysis

Actuarial Cost Analysis

The actuary for the PERS and TRS retirement systems, Buck Consultants, has prepared an actuarial analysis of CSSB 121(STA) under AS 24.08.036. Attachment A. This analysis shows that under the actuarial assumptions currently adopted by the Alaska Retirement Management Board (ARM Board), this bill will impose normal costs that are less than or equal to the normal costs of the defined contribution tiers created by SB 141 in 2005. CSSB 121(STA) accomplishes that by requiring that projected healthcare cost growth that exceeds current defined contribution (DC) employer normal costs be borne by future retirees in the form of increased premiums and increased premium cost share percentages.

Among the ARM Board-adopted actuarial assumptions that underlie this analysis is the investment rate of return assumption of 8 percent/year. The appropriateness of this return assumption has recently been challenged within the legislature in the context of the existing defined benefit tiers. It has been suggested that something closer to a 5 percent/year return assumption would be more appropriate when structuring a defined benefit system. Moreover, the investment advisor for the ARM Board, Callan and Associates, recently testified to the ARM Board and Senate Finance that over the next 5-10 years, an 8 percent/year investment return is not likely and that a 7 percent/year return would be a challenge to achieve.

The attached actuarial analysis assumes that all contributions to the new defined benefit tiers will be invested and return 8 percent/year. Should a lesser rate of return be assumed, that would normally result in an increase to the employer normal cost rate. But since the employer cost rate is essentially capped under CSSB 121 at the existing DC employer normal cost rate, the reduction of the investment return assumption will probably create a long-term unfunded liability. Unfunded liabilities are recovered by imposing a past-service cost rate on employers. If the normal employer cost rate under the bill equals the normal DC employer cost rate, then any additional employer past service cost rate will necessarily impose higher costs on employers than the existing DC tiers.

The actuary has not computed an analysis of the impact of a lesser rate of return assumption.

Because of the apparent uncertainty regarding the appropriate rate of return assumption, the actuarial cost analysis for this committee substitute is indeterminate at this time.

FISCAL NOTE #2

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 121(STA)

Analysis

SB 121 allows future and current defined contribution PERS and TRS members an opportunity to choose between a defined contribution (DC) and a defined benefit (DB) plan. Current DC members will have a one-time opportunity to convert to the DB plan. The DC member's employee and employer contributions will be transferred to the DB plan.

Assumptions:
60% of the current defined contribution plan will be elected by DC members to convert to the DB plan. 80% of future members will elect to be in the DB plan.
Rate of return assumed to be 8%
Management fees assumed at 35 basis points.

PTA PENSION TRUSTEE ADVISORS

Alaska Senate Finance Hearing of SB 121

William B. Fornia

March 30, 2012

William B. Fornia Credentials

- Highest Actuarial Credentials
  - Fellow of the Society of Actuaries (1986)
  - Enrolled Actuary under ERISA (1984)
  - Member of the American Academy of Actuaries (1983)
  - Active in national actuarial organizations
- Author and Frequent Speaker
  - "A Better Bang for the Buck" (with National Institute on Retirement Security), 2008
  - "New Developments in DB/DC Plans", National Council on Teacher Retirement, Anchorage, 2002
  - Frequent Testimony to Legislatures and City Councils
  - Regular Expert Witness

Sample Work History

- Corporate actuary for Boeing 1980-1984
- Alaska related experience
  - ARMB first ongoing review actuary 2005-2006
  - Audited Alaska PERS/TRS actuarial valuations 2009
  - Former leader of Buck Consultants' Denver retirement practice
- Consulting services for 22 statewide retirement systems in Alaska, Colorado, Missouri, North Dakota, Oklahoma, Puerto Rico, Utah, Texas, Wyoming and others.
  - Served as system actuary for most of these (including CO, MO, ND, OK, PR, UT, WY, Houston)
  - Currently working on pension reform with Ohio Retirement Study Council
- Expert testimony and consulting for pension systems, governments, and labor groups
- Other clients have included the US Department of State, Cities of Baltimore, Oakland and Philadelphia, IBM, US WEST and Ford Motor Company

Agenda

- Overview of SB 121
- Advantages of Including Defined Benefit Plan Option
- Financial Analysis of Defined Benefit Plan Option
- History of SB 121 Fiscal Notes and responses
- Discussion

Findings

- DB plan option is more economical for Alaska
  - DB more efficient delivery of retirement benefits
  - Helps keep jobs in Alaska
  - Provides the safety net others have from Social Security

- Have structured DB choice alternative at $9,000,000 FY 2015 savings
  - Health cost risk shifted to employees
  - Higher employee contributions than current DB
  - Employee health cost sharing

SB 121 – History & Background

- Two general types of retirement programs
  - Defined Benefit (DB): Annual pension or health care benefit are fixed in statute, contributions based on actuarial calculations
  - Defined Contribution (DC): Periodic contribution to account is statutory, benefits depend on what account accumulations will provide
- SB 141 closed defined benefit retirement and health benefits to those hired after July 1, 2006
  - Workers hired since then have DC accounts only
  - No secure retirement option or Social Security

More Background on SB121

- Several proposals have been introduced to permit DB program for those hired after June, 2006
- Extensive modifications have been made to achieve cost neutrality and concerns of risk
  - Continued opportunity for DC approach for those who choose
  - No adjustment for 2006-2012 DCR investment returns; can only purchase service based on actual DCR account balances
  - Costs set to be same or lower than latest DC tier
  - Increased worker contributions versus latest DB tier
  - Reduced health care benefits – retirees pay larger share of costs
  - Further reductions in benefits if health care costs increase beyond break-even cost levels

Key Features of SB 121

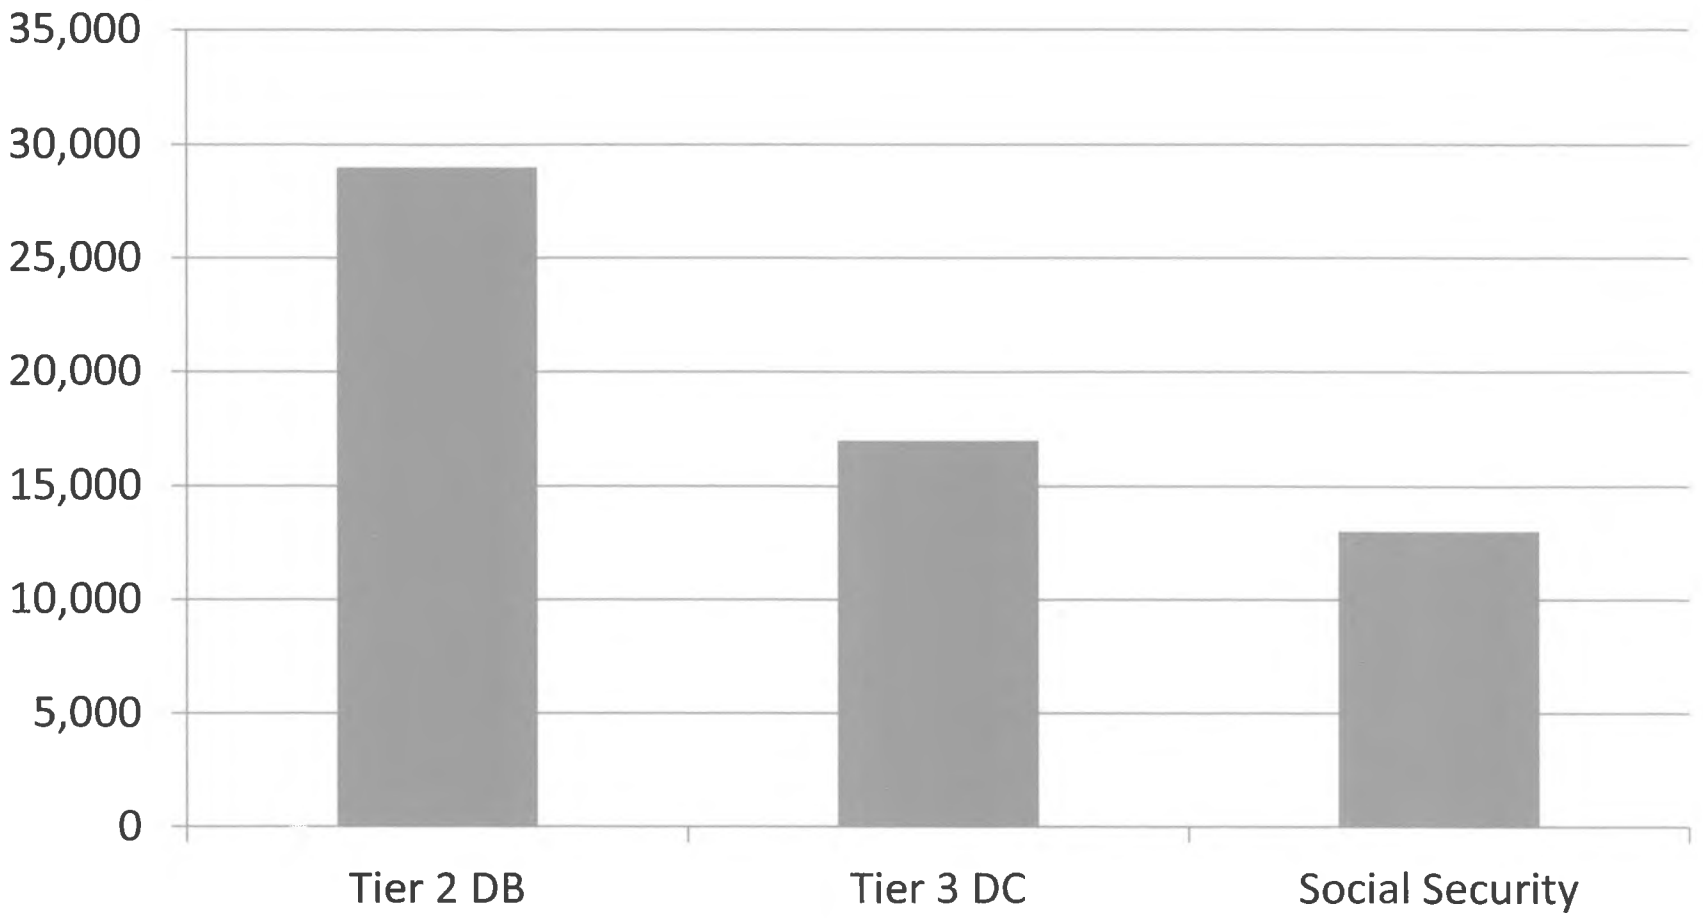
- Gives employees a choice between DC and DB
  - DC tends to be preferred by shorter service & younger workers
  - DB still very popular, particularly for full career workers
- SB 121 structures DB option to be cost neutral
  - Costs will not be more than current tier DC program
  - Worker contributions same as current DC tier
  - SB 121 also shifts much of the risk from the employers to the workers
  - Healthcare benefit will be reduced if employer normal costs increase

Other motives for SB 121

- Alaska public servants not covered by Social Security
  - Every state other than Alaska and Michigan offers Defined Benefit Option
    - Michigan public servants get Social Security, Alaska public servants don't
  - All private US employers pay at least 6.2% to Social Security; Alaska PERS employers pay 5.22%
  - Soon, Alaska will be largest employer in America with workers not covered by any safety net DB plan
- Current DC structure facilitates short service workers leaving Alaska public service for DB plan after a few years of service
- Retirement in Alaska is good for the State economy

Why should Alaska public servants have a Defined Benefit Option?

- By their nature, Defined Benefit (DB) plans provide workers what they need for retirement
- DB plans deliver benefits more efficiently than Defined Contribution (DC) plans, thereby saving money for same retirement benefit
- Particularly necessary because vast majority of Alaska public servants not covered by Social Security



Why DB option? – Secure Retirement Benefit

- Because DB plans "define" the "benefit" received by retirees, they can ensure appropriate benefit levels
- Individuals do not need to be concerned with investment volatility under DB plans
- Individuals do not need to be concerned with outliving their savings under DB plans
- Because DC returns tend to be lower, greater contributions would be required to attain same benefit level as DB

Benefits Available from DCR Program are Substantially Lower than from Latest DB Tier

	Teachers	Police & Fire	Other PERS
Hire Age	34	31	37
Retirement Age	59	56	60
Years of Service	25	25	23
DB Benefit as Percent of Final Average Compensation (defined under the terms of the plan)	58%	63%	55%
DCR Benefit as Percent of Final Average Compensation (calculated based on assumptions above)	34%	30%	30%
Reduction of Benefit % due to DCR program	24%	33%	25%

Illustration of Hypothetical Teacher Benefits - $50,000 Final Average Salary

Why DB option? – Economic Impact

- Pensions account for more than $1 billion in Alaskan economy
- Retirement System provides health care benefits
- DB option can provide inflation protection
- Provide benefits consistent with objective of worker retention and job stability
- DB Plan eliminates the risk of destitute former employee citizens becoming a burden on the State, as "Payer of Last Resort"

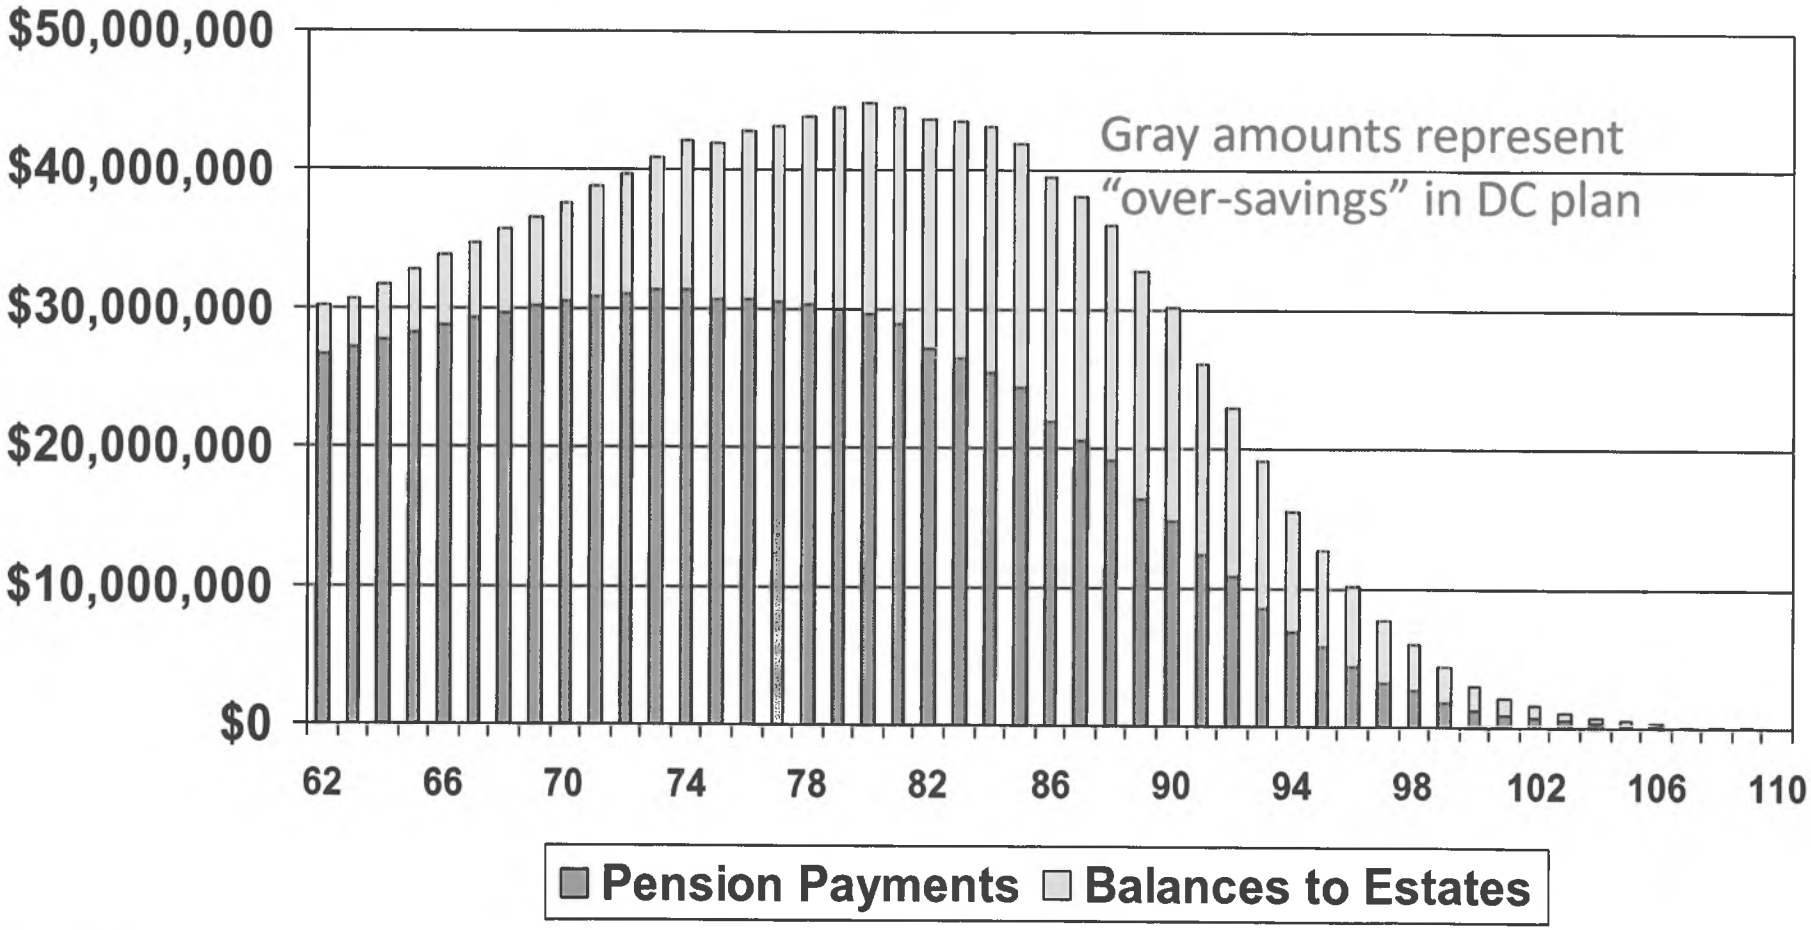
DB Plans Provide a "Better Bang for the Buck"

- The DB approach saves money compared to the DC approach. Three reasons …

1. DB pension plans pool "longevity risks"

2. DB pension plans can maintain a better diversified portfolio because, unlike individuals, they do not age

3. DB pension plans achieve better investment returns because of professional asset management and lower fees

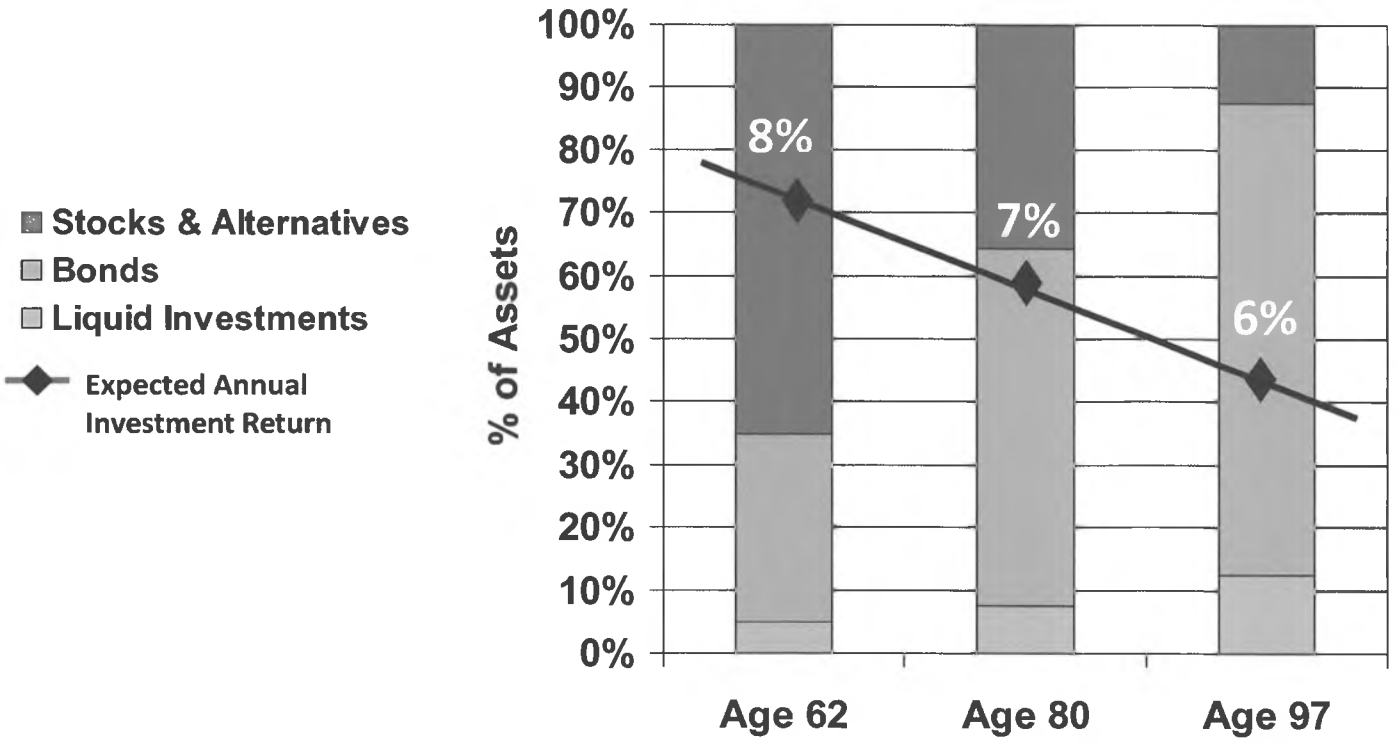


Why DB? – More Economically Efficient

- ***Longevity Risk Pooling***
  - DB plans better manage longevity risk, or the chance of running out of money in retirement
  - DB plans avoid the "over-saving" dilemma and do more with less
- ***Maintenance of Portfolio Diversification***
  - DB plans are able to take advantage of the enhanced investment returns that come from a balanced portfolio throughout an individual's lifetime
- ***Superior Returns***
  - DB plans, which are professionally managed, achieve greater investment returns versus those of individual accounts

1st Strength of DB Plans
Longevity Risk Pooling

- Because they cover large numbers of retirees, DB plans can pay out over the *average* life expectancy, not *maximum* life expectancy
- An individual under a DC plan will want to avoid the risk of running out of money if they live a long life
- Because individuals must plan for a maximum life expectancy, much more money must be accumulated in a DC plan, compared to a DB plan



Under a DC Plan 24% of Assets Are Not Used for Retirement – 1,000 Sample Teachers

2nd Strength of DB Pension Plans
More Effective Portfolio Diversification

- DB plans can maintain a well diversified portfolio over time – unlike individuals, DB plans do not age
- To protect against market shocks, individuals in DC plans are advised to shift toward more conservative investments as they age, sacrificing some expected return
- Lower returns mean more money must be contributed to deliver the same level of benefits

As Individuals Shift DC Portfolio Allocation, Expected Return Reduced

3rd Strength of DB Pension Plans Pooled, Professionally-Managed Assets

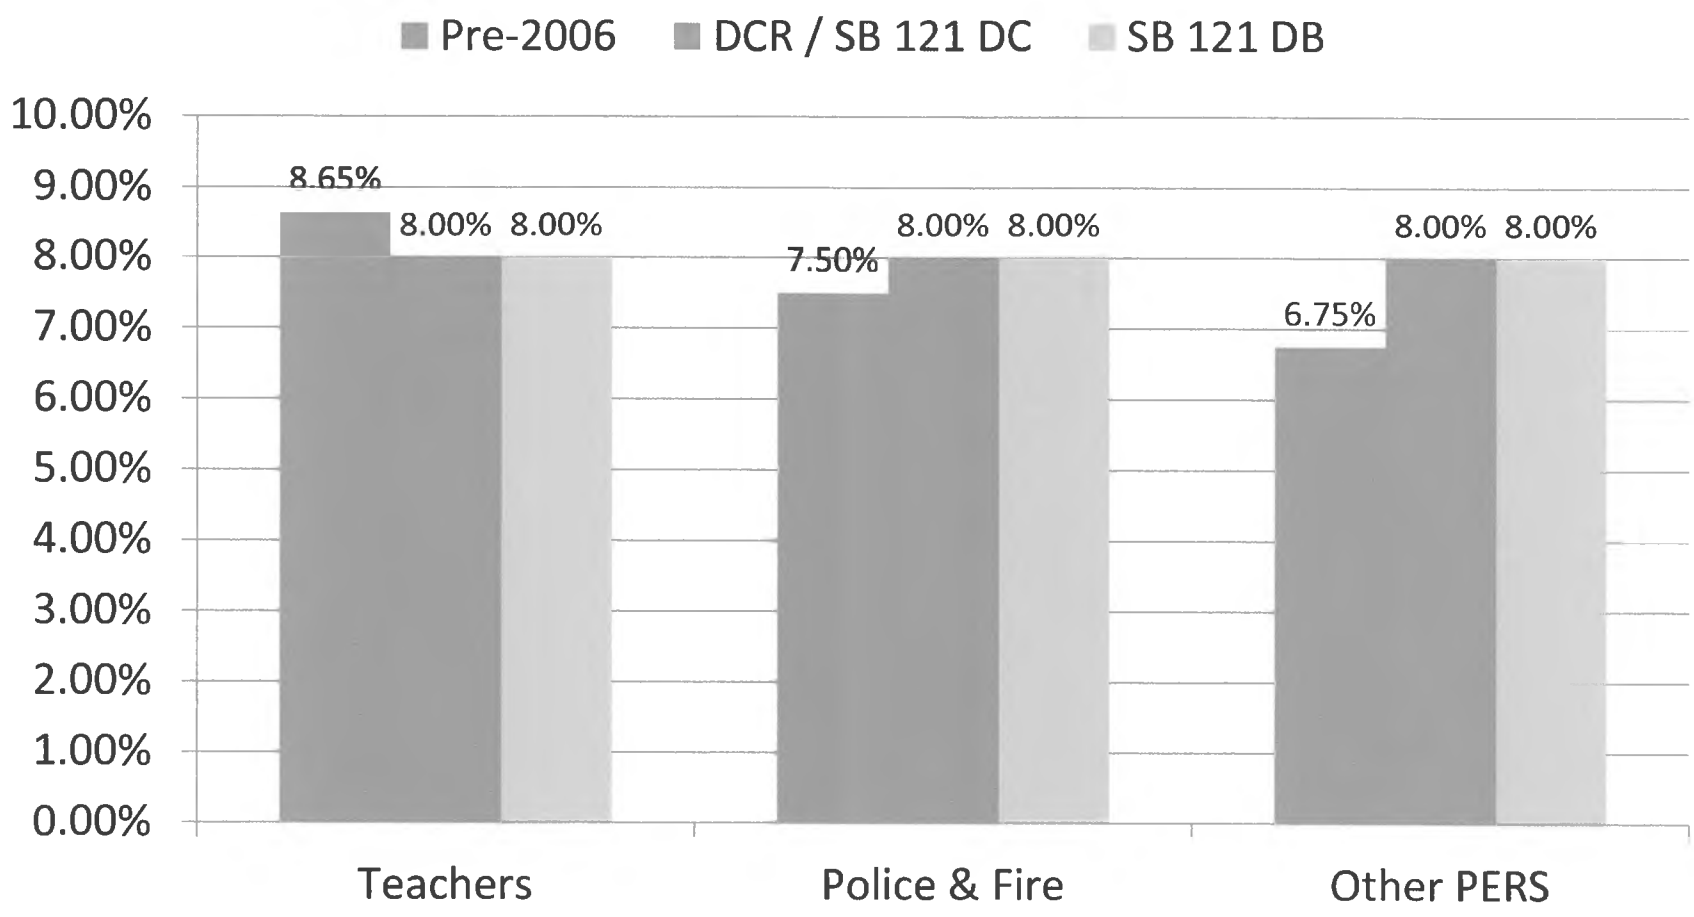
- Assets in DB plans are professionally managed. Despite their best efforts, individuals tend to underperform when it comes to investing in DC plans
- Pooled investments in DB plans can lower expenses
  - Large group pricing negotiation
  - Avoid expenses of individual recordkeeping, investment education, investment transactions
- Studies generally have shown that DB plan returns outperform DC plans by at least 1% annually
  - Towers Watson 1995-2008 large plans 1.27% outperformance
  - CEM Benchmarking 1998-2005 found 1.80% difference
  - Recent Alaska experience shows even larger DC shortfall
  - Even a mere 1% differential generates tremendous efficiencies – more than 20%

What about Unfunded Liabilities?

- Unfunded Liability has grown by more than $5 billion since 2005
  - "Unfunded Liability" is attributable to prior benefits, not future benefits
  - SB 141 DC approach was not designed to solve unfunded liability
  - Several safeguards have been introduced to manage unfunded liability
- Addition of DB option not anticipated to increase unfunded liabilities
  - To the extent that actuarial assumptions' conservatism is borne out, would actually decrease unfunded liabilities
- DB systems are advance funded, not left to future generations

Findings

- DB plan option is more economical for Alaska
  - DB more efficient
  - Helps keep jobs in Alaska
  - Provides the safety net others have from Social Security
- Have structured DB choice alternative at $9,000,000 FY 2015 savings
  - Health cost risk shifted to employees
  - Higher employee contributions than current DB
  - Employee health cost sharing



Challenge is to Design DB Option at Costs Comparable to DC Plan

- The actuary for the Alaska Department of Administration Division of Retirement Benefits regularly reports on the financial condition of the Alaska Public Employees' Retirement System (PERS) and Alaska Teachers' Retirement System (TRS).
- These analyses are conducted primarily through an "actuarial valuation", which calculates the plans costs and liabilities.
- The actuary has calculated the Normal Cost under both the prior tier DB plans as well as under the DCR program.
  - "Normal Costs" are the cost of ongoing future benefits, not including cost to pay off "Unfunded Liability"
  - "Unfunded Liability" is attributable to prior benefits, not future benefits
- SB 121 has been modified to address initial cost concerns

Major implications of the proposal for those who elect DB

- Pension benefits will be the same as the prior defined benefit plan tiers for those hired prior to July 1, 2006
  - The tiers which were reduced in the 1990's
- Retiree DB health benefits will be stronger than those under DCR, but not as strong as those provided under the latest tier DB plans.

Contributions for Various Members

Retiree Medical Coverage

- Retirees eligible to receive retiree major medical coverage with subsidized premiums, under the following conditions:
  - Retired teachers are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
  - Retired peace officers and firefighters are eligible with 25 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
  - Other PERS retirees are eligible with 30 years of service or at the age of Medicare eligibility [65] with at least 10 years of service.
- Retiree share of premiums range from 10% to 30% based on service at retirement
  - This range may increase or decrease in future based on experience

Cost Comparison Estimates - Teachers

Teachers Retirement System	DB Plan Tier 2	DCR Plan Tier 3	Proposed Tier 4
Total Retirement Normal Cost (including refunds)	11.39%	NA	10.84%
Member Contributions	(8.65%)	(8.00%)	(8.00%)
Net Employer Retirement Normal Cost	2.74%	NA	2.84%
DC Employer Contribution Rate	NA	7.00%*	NA
Medical Normal Cost Rate	5.33%	0.49%	6.39%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	8.07%	10.49%	9.23%
DCR Payroll during FY 2015	NA	$116,432,000	$116,432,000
Total Employer Cost on FY 2015 Basis	NA	$12,213,000	$10,748,000
Cost difference vs. DCR	NA		Saves $1,465,000

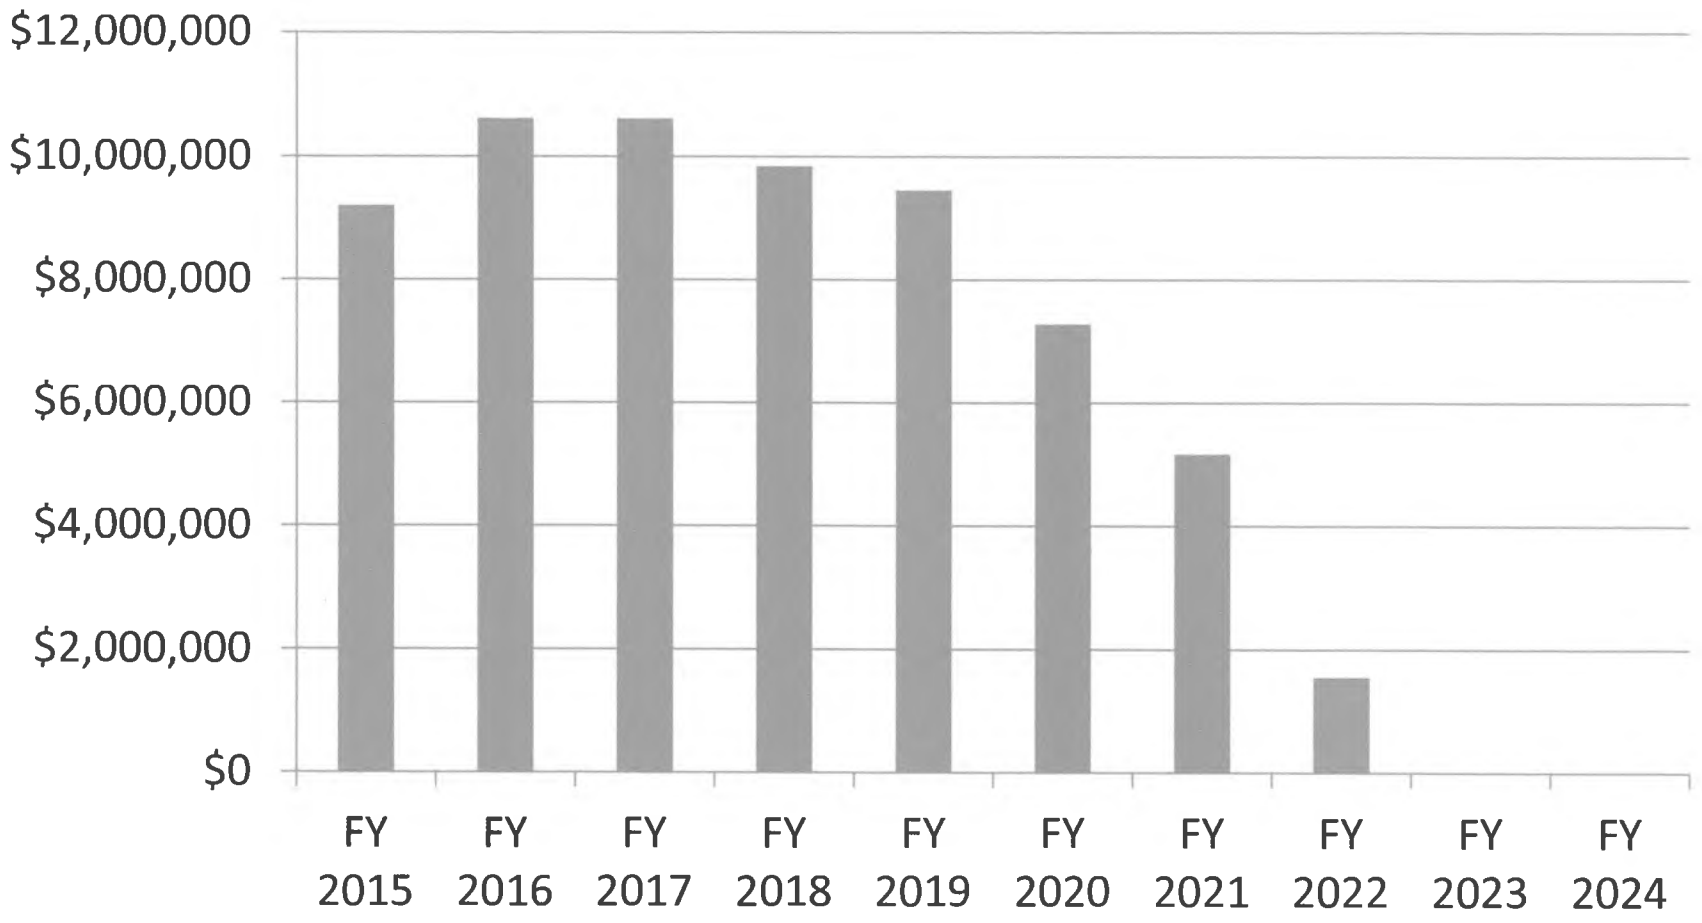
* Includes DCR Occupational Death and Disability

Cost Comparisons – PERS Police Officers and Firefighters

Public Employees Retirement System – Peace Officers & Firefighters	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost (including refunds)	12.30%	NA	12.08%
Member Contributions	(7.50%)	(8.00%)	(8.00%)
Net Employer Retirement Normal Cost	4.80%	NA	4.08%
DC Employer Contribution Rate	NA	5.22%*	NA
Medical Normal Cost Rate	5.90%	0.48%	6.00%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	10.70%	8.70%	10.08%
DCR Payroll during FY 2015	NA	$35,710,000	$35,710,000
Total Employer Cost on FY 2015 Basis	NA	$3,107,000	$3,598,000
Cost difference vs. DCR	NA		Costs $491,000

* Includes DCR Occupational Death and Disability

Cost Comparisons – Other PERS Members



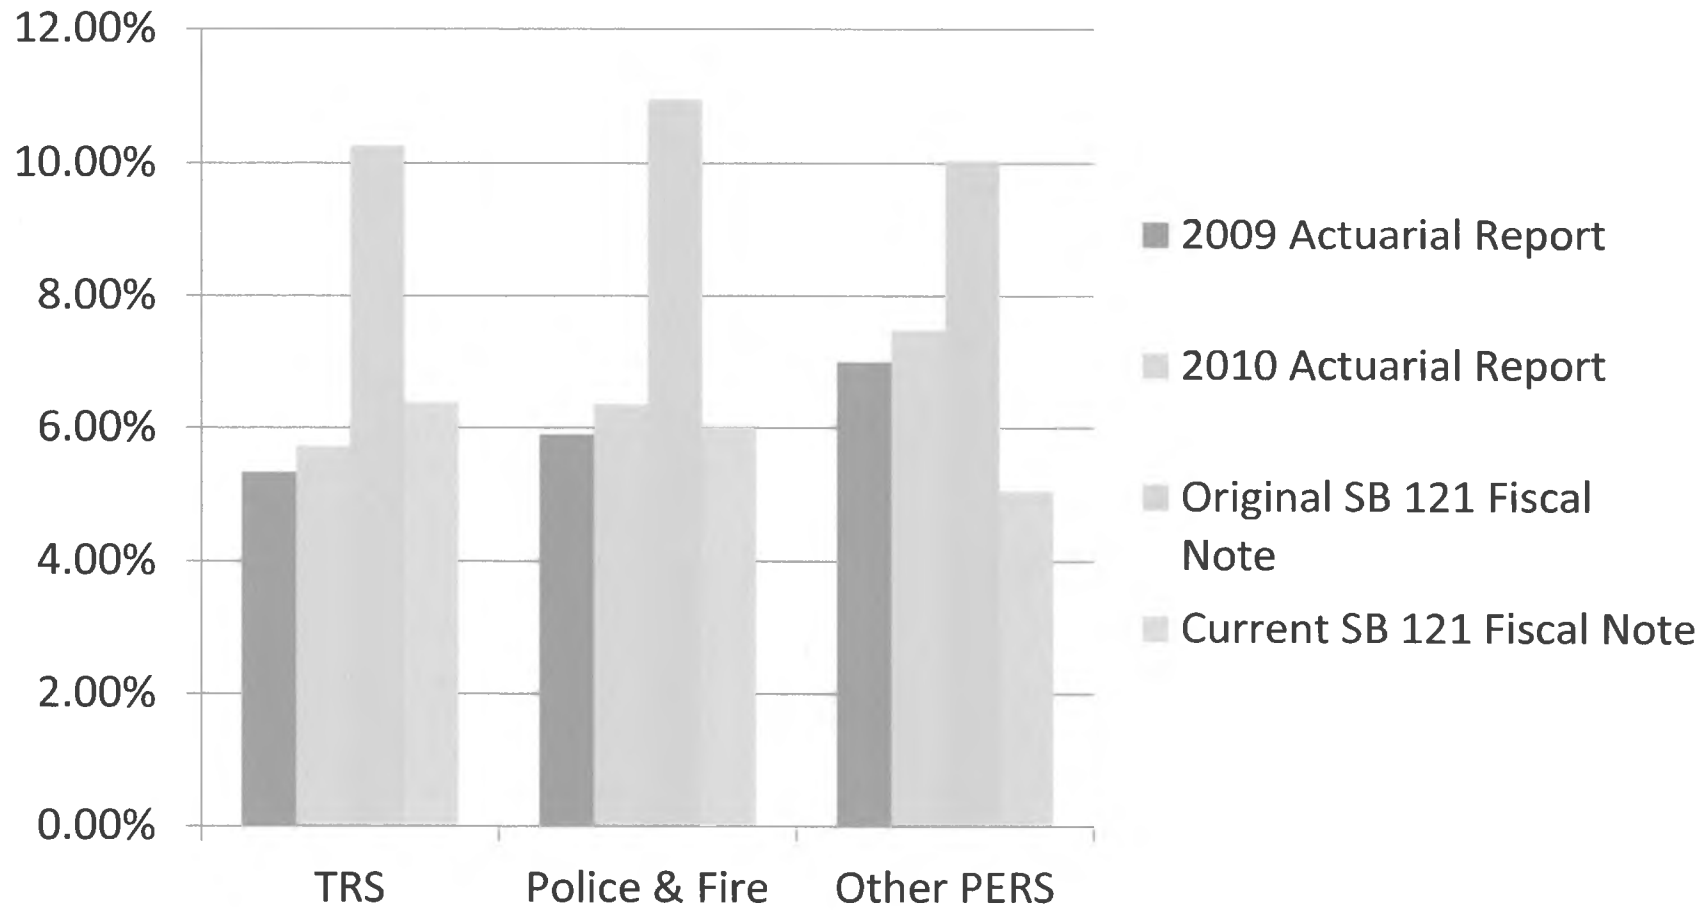
Other Public Employees Retirement System Members	DB Plan Tier 3	DCR Plan Tier 4	Proposed Tier 5
Total Retirement Normal Cost (including refunds)	9.58%	NA	9.45%
Member Contributions	(6.75%)	(8.00%)	(8.00%)
Net Employer Retirement Normal Cost	2.83%	NA	1.45%
DC Employer Contribution Rate	NA	5.22%*	NA
Medical Normal Cost Rate	7.00%	0.48%	5.06%
HRA Contribution Rate	NA	3.00%	NA
Total Employer Cost	9.83%	8.70%	6.51%
DCR Payroll during FY 2015	NA	$374,608,000	$374,608,000
Total Employer Cost on FY 2015 Basis	NA	$32,591,000	$24,355,000
Cost difference vs. DCR	NA	NA	Saves $8,236,000

* Includes DCR Occupational Death and Disability

Results from Cost Comparison

- Stronger pension benefits through a Defined Benefit option for members hired since 2006.
- It would provide improved health care plan benefits, but no future HRA contributions.
- In total, 2015 employer costs would fall by about $9 million.
  - More than $60 million over eight years

Total savings anticipated of more than $60 million over eight years



By 2023, based on fiscal note estimates, healthcare will decrease to maintain cost neutrality

Summary of Revisions to SB121

- Initial SB 121 essentially was return to prior tier
  - But with choice
  - Members could trade DCR accounts to get prior DB service
  - Future pension costs were neutral
  - But some past pension costs due to transition
  - And health costs were not neutral due to anticipated rapid increase in health care costs
- Revisions include
  - DB prior service can be purchased only, if DCR accounts not adequate, service limited
  - Increased worker contributions
  - Reduced healthcare benefits
    - premium share rather than full premium paid
    - only for full career retirees or post-Medicare
    - if normal costs increase, sharing would be reduced

Comparison of Healthcare Normal Costs

Conclusions

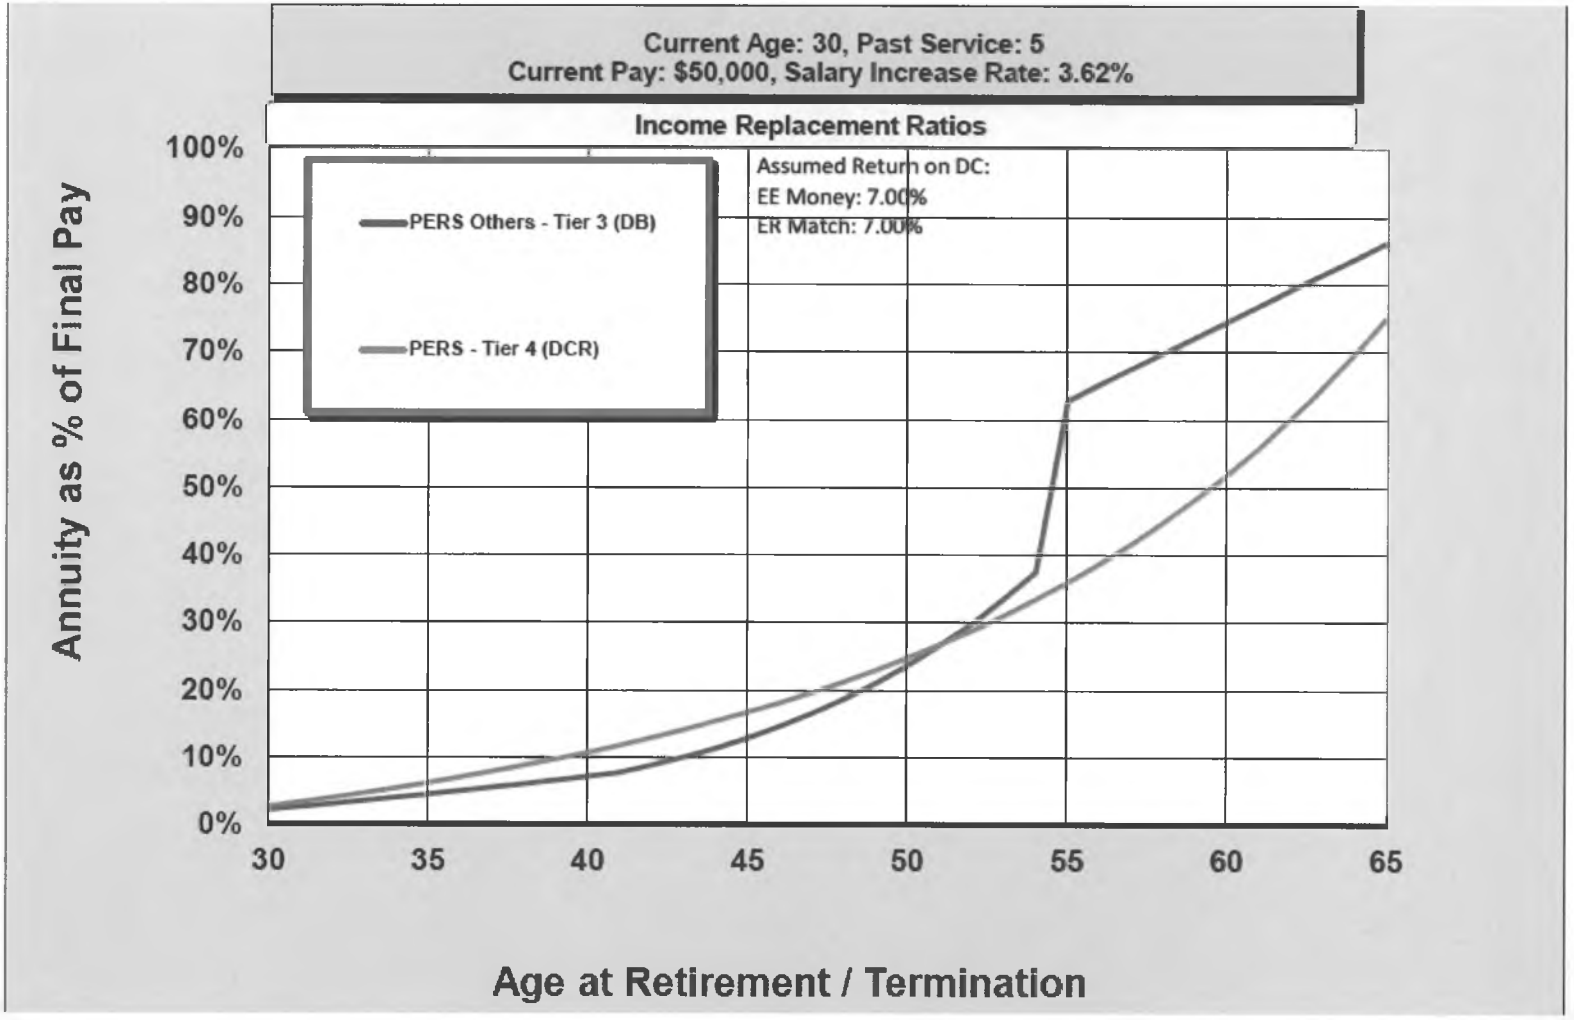
- DB plan option is more economical for Alaska
  - DB more efficient
  - Helps keep jobs in Alaska
  - Provides the safety net others have from Social Security
- Have structured DB choice alternative at $9,000,000 FY 2015 savings
  - Health cost risk shifted to employees
  - Higher employee contributions than current DB
  - Employee health cost sharing

SB 121
Alaska Pensions

Retirement choices for the Last Frontier

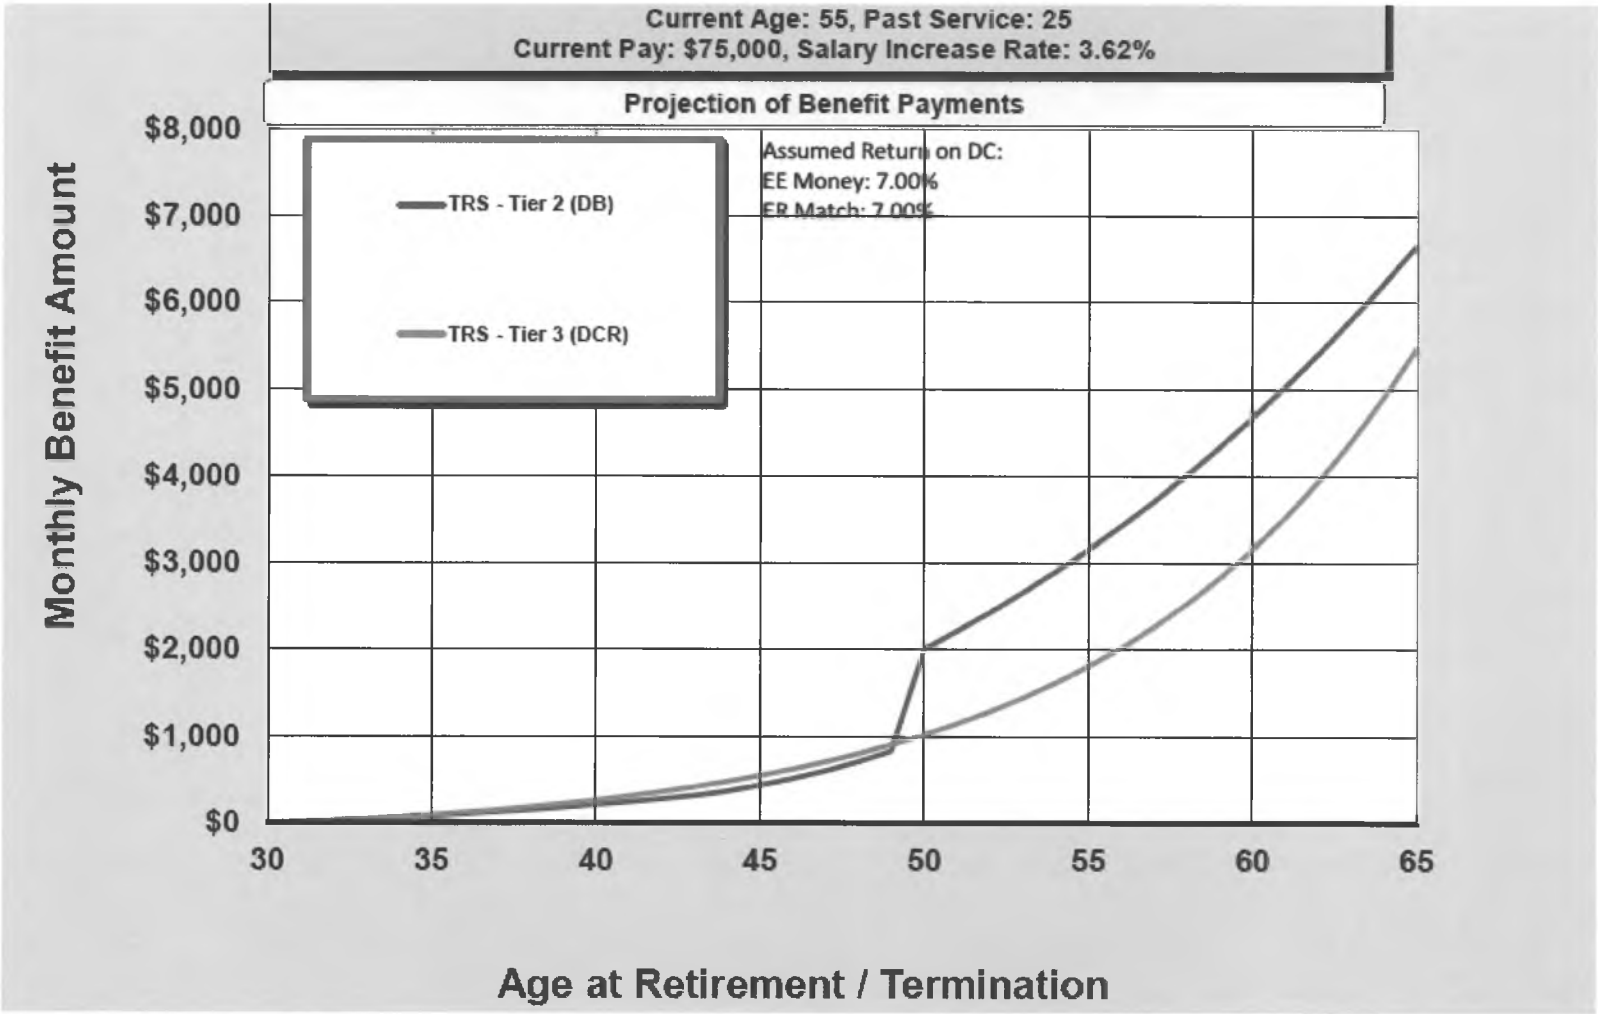
New hires get a choice

- SB 121 creates a new defined benefit tier
  - New hires can choose a guaranteed benefit or to control their money
- The new tier is:
  - cost neutral
  - more predictable
  - shares risk
- Those who serve Alaskans can choose the retirement plan that fits their service



All Alaskans Benefit

- A choice of retirement plans gives states & cities the tools to recruit and retain.
  - They can deliver the best value for public dollars.
- The national employment situation is improving.
  - How does Alaska remain competitive?
  - Keeping good employees and attracting better.
- Economic impact of Defined Benefit pensions – total economic impact to Alaska of $1.4 billion.



A balanced approach

- Each system has strengths:
  - Defined benefits means knowing how much you'll have
    - But you can't strike it rich
    - And it takes a long time to earn
  - Controlling your investments lets you 'beat the street'
    - And you can take it with you when you leave
    - But there are no guarantees

Two PERS employees:

Two TRS Employees:

What Stays the Same?

- The Defined Contribution systems do not change.
- The 2005 safeguards remain in place
- DB pension benefits
- Health plan coverage.

What's different?

- Most employees pay more into the new tier
- It takes longer to earn retiree health insurance
  - Medicare eligibility for most
  - Cost sharing
  - Risk Sharing
- DB retirement eligibility similar to DC tiers.
- DC employees get one chance to switch.

A responsible approach

- SB 121's new tier adjusts so it doesn't cost more than DC tiers
- SB 121 takes longer to earn retiree health insurance
  - Eliminates the most expensive years for most retirees
  - Shares the cost
  - Shares the risk until the employee retires
- Conversions to the new tier at employee's option – and cost.
- All the 2005 safeguards remain:
  - Review by a second actuary
  - Minimum salaries for elected officials
  - Experience studies
  - ARM Board
  - No paying less than the cost
  - Refunding DB contributions is permanent

More for Alaskans' Money

- Professional managers earn more
- No added costs – we're already running two systems
- $762 million/year in DB benefits are a shock absorber for the Alaska economy
- Employees who prefer portability and control have a choice
- Cities, school districts, and the state have excellent recruiting tools

Cost Neutral

State of Alaska

Alaska Department of Administration

SB 121: Making Promises And Keeping Pro

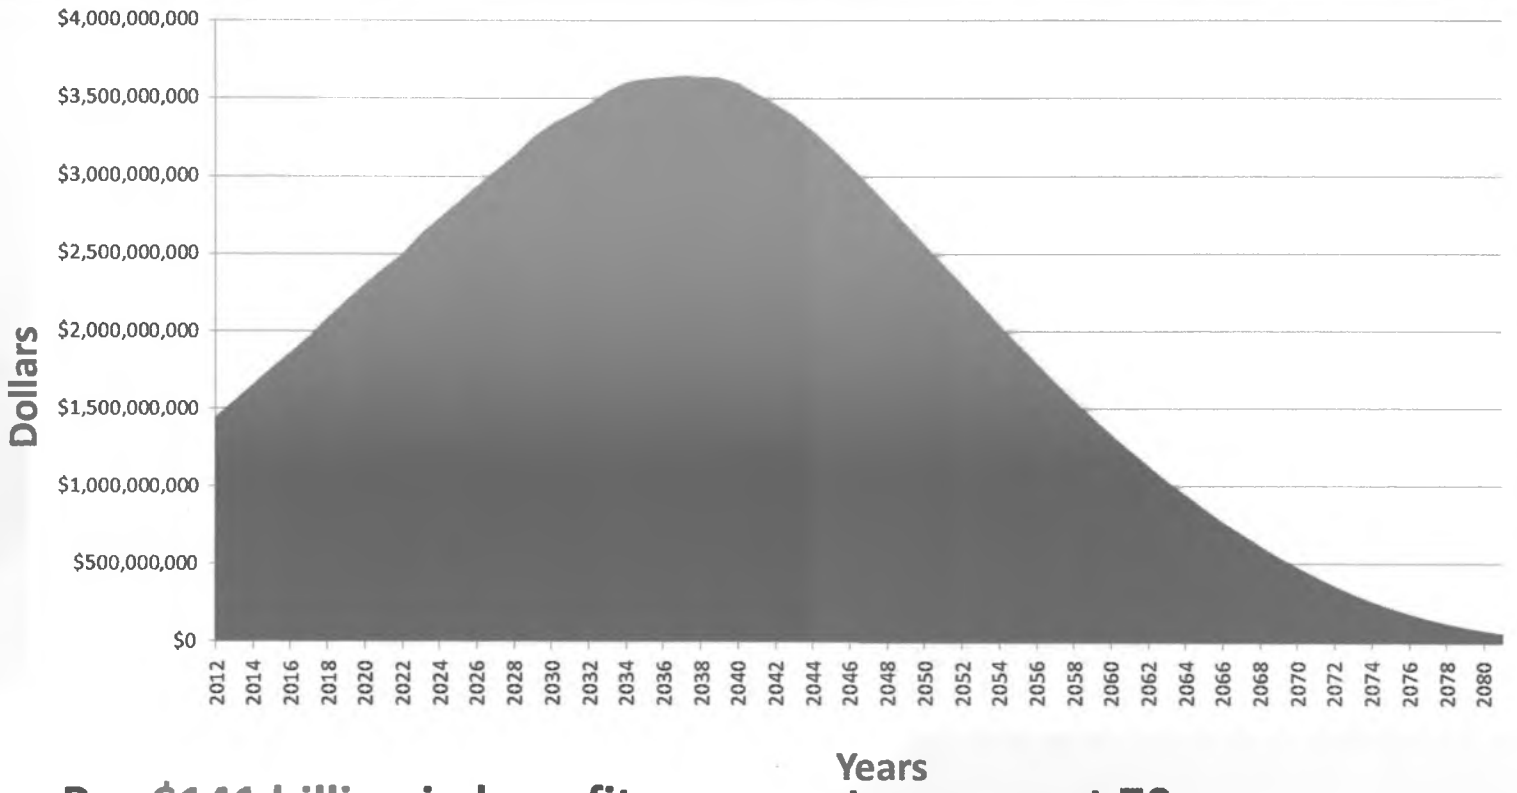
Senate Finance

Mike Barnhill, Deputy Commissioner

March 30, 2012

Making DB Promises

- Defined Benefit Plan Promises
  - Pension up to 67% of average salary
  - Annual cost of living increases
  - System-paid medical premiums
- Membership: 95,667



PERS	TRS
Tier I: 29,832	Tier I: 12,124
Tier II: 16,738	Tier II: 9,771
Tier III: 27,202	

Current DB Promises Must be Kept

- "Accrued benefits of these [retirement] systems shall not be diminished or impaired." Alaska Constitution, Article XII, Section 7

- Benefit payments –
  -at least $1 billion per year from now until 2063
  -$3 billion per year from 2027-2046

Cost of keeping existing PERS and TRS promises

Pay $141 billion in benefits payments over next 70 years

Current PERS/TRS account balance: $15.4 billion

Unfunded Liability: $11.1 billion

How Long Will We Keep DB Promises?

At least through 2080…probably longer…

02/10/2012

U.S. Government Still Pays Two Civil War Pensions

By LAUREN FOX

Despite the fact that the Civil War ended April 9, 1865 (53,630 days ago, for reference), the government is still paying out veterans' pensions.

Records from the Department of Veterans' Affairs show that two children of Civil War veterans, as of September, are receiving pensions from their fathers' service.

The Civil War ended 147 years ago….

Lessons Learned: DB Pensions Need Revenue Backstops

- Alaska's experience from the 2000s
- Unfunded liabilities arise for a variety of reasons, negligent and non-negligent
  - Rising medical costs
  - Longer life spans
  - Actuarial negligence
  - Investment loss
- When unfunded liabilities have developed in the Alaska, by and large the GF has provided the solution

Breaking Promises

- Retirement promises have been broken elsewhere
- Private employer retirement plan defaults prompted federal passage of ERISA in 1974
- Current threat of public pension defaults across the country (Jefferson County, AL; Vallejo, CA; Central Falls, RI; Harrisburg, PA)
- Some states have broken promises and cut benefits to retirees
- Alaska has moral and constitutional obligation to keep its promises

Reduced Post-Retirement Benefit Increases Enacted in 2010 and 2011 (NCSL)

SB 121: Making New DB Promises

- SB 121 makes new DB retirement promises to the next generation of state employees
- The State will need to keep those promises until at least 2080-2090
- $3 billion in current annual DB payment obligations will extend beyond 2047
- Where is the GF income in the future to backstop these new DB retirement promises in 2070, 2080, 2090….?

What is the Long-Term Future of GF Revenues?

Can we make new promises that retirees and their families will be able to rely on in 2060-2090?

Will SB 121 Save Money?

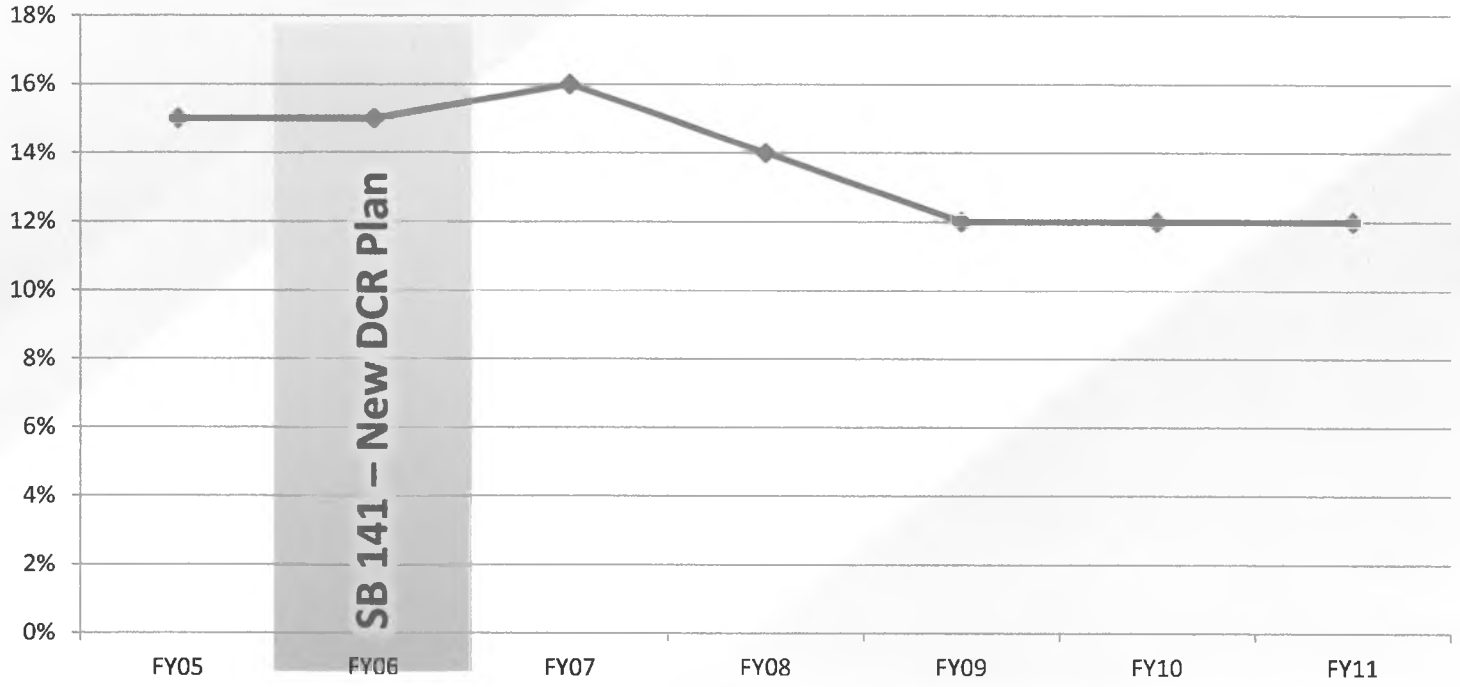
- SB 121 will cost employers the same or less than the current DCR plan if all of the ARMB-adopted actuarial assumptions remain true indefinitely
  - Inflation
  - Mortality
  - Retirement date
  - Investment return

PERS / TRS Annualized Returns

Annualized Returns through 6/30/2011	PERS	TRS	Average
1 Year	21.18%	21.36%	21.27%
3 Year	2.36%	2.41%	2.39%
5 Year	4.32%	4.36%	4.34%
10 Year	5.43%	5.46%	5.44%

Source: Callan Associates

What is the appropriate rate of return?



- ARM Board: 8.0 %
- CalPERS: 7.5 %
- Fitch: 7.0%
- Prof. Josh Rauh: 4.0%

- Senate Finance ??

Impact of DCR Plan on Retention?

Executive Branch – Separation Total

Source: http://doa.alaska.gov/dop/resources/publications/

Retirement security is important

Defined Contribution Retirement (DCR) Contributions...

	Employee	Employer
DCR Contributions	5%	8%
SBS Contributions	6.13%	6.13%
Total Contributions	11.13%	14.13%

25.26% of payroll for State of Alaska employees goes to individual retirement accounts

Administration Position re SB 121

- Keep the retirement promises we have made to date
- Don't make the problem worse
- Don't make new DB retirement promises that we are not sure we can keep
- A revenue backstop is necessary to ensure new promises are kept; until Alaska's long term fiscal situation is solved this discussion is premature

SB 121 Actuarial Fiscal Note Timeline

AS 24.08.036:

Before a bill which would have an effect on the retirement systems of the state is reported to the rules committee, there shall be attached to the bill an analysis of the long-term and short-term costs to the state if the bill is adopted, as well as the impact of the bill on the actuarial soundness of the fund. The analysis is in addition to the fiscal note requirements of AS 24.08.035.

04/07/2011: SB 121 introduced (version I)

04/14/2011: Hearing Senate State Affairs

04/17/2011: Regular session adjourns

08/04/2011: Governor's legislative office transmits actuarial fiscal note (version I) to sponsor and Senate State Affairs

09/07/2011: Kiehl asks DRB whether actuary (Buck) correctly understands bill

09/15/2011: Hearing Senate State Affairs; DOA acknowledges actuarial fiscal note in error

10/07/2011: DOA transmits revised actuarial fiscal note (version I) to sponsor and Senate State Affairs

10/13/2011: Hearing in Senate State Affairs; revised actuarial fiscal note discussed; actuary explains why the actuarial note is positive; DOA agrees to make actuary available to achieve neutral actuarial note

01/26/2012: Hearing in Senate State Affairs; version R. introduced

02/07/2012: DOA provides Buck 30 year actuarial analysis on version R to sponsor and Senate State Affairs; analysis shows that note will remain positive; DOA offers to refrain from filing a second positive fiscal note pending amendment to version R.

02/9/2012: Hearing in Senate State Affairs; amendment R.2 introduced

02/16/2012: Hearing in Senate State Affairs; version R, amended, moved from committee

03/09/2012: Governor's legislative office transmits indeterminate actuarial fiscal note (version R, amended) to sponsor and Senate Finance

Thank you!

www.DOA.alaska.gov for more information.

Questions?

Major Changes in SB 121

Substantive changes in Sen. L&C "U" version:

- The changes in the bill take effect 7/1/2013
- All employees in the new tier contribute eight percent of pay to the system.
- Employees currently in the DC plan who convert are not automatically entitled to credit for all the time they've worked:
    - The actuarial 'time value' of the DC account will be credited automatically.
    - The employee may choose to create an indebtedness to make up any shortage, up to the actual years of service.
- Retirees in the new Defined Benefit tiers will pay a share of medical insurance premiums. These initially follow the same schedule as DC retirees:
    - If the retiree is eligible for Medicare, the retiree pays:
        - 30 percent with 10-15 years of service
        - 25 percent with 15-20 years of service
        - 20 percent with 20-25 years of service
        - 15 percent with 25-30 years of service
        - 10 percent with 30 or more years of service
