Alternative Education Programs through Home and Hospital Teaching: The Office of Home and Hospital Teaching provides alternative education services for a variety of reasons in different locations, including the student's home, a hospital, or alternative sites. *The Teen Parent Alternative program provides instructional services at two sites to girls who have given birth and are in need of childcare in order to attend school. *Pathways Drug Treatment Center provides educational services to students throughout the state. *Anne Arundel County Detention Centers receive services for confined students.	All students in need of services
Mary E. Moss Academy: Works with families and communities to provide academic and behavioral support services to students who have not met with success in their previous academic setting.	Referred students
Phoenix Center: A regional special education center for students who have been diagnosed with the disability "Emotionally Disturbed." Staff conveys realistic behavioral expectations, models and teaches age-appropriate social skills, and prepares students for transition to general education or to the workplace.	"Emotionally Disturbed" students K–12

Evening High School: Credit recovery and original program for students presently in comprehensive schools, transfer students from day school, and assigned students on extended suspension or expulsion. Evening High School hours are 3 to 9 p.m.	Serves grades 10 to 12 if the student is over 16, unless he/she is assigned for discipline sanction. Evening High School is a diploma-granting school serving an increasing number of non-concurrent, full-time Evening High School students.
Summer School: Credit recovery with a small number of original credits.	Serves grades 6 to 12 for four and a half weeks each summer. Summer school primarily gives students remediation opportunities so they can move on to the next grade and make progress toward graduation.
Twilight School: Credit-recovery program for ninth graders and seniors; organized by each school with the support of the principal of Evening High School. Twilight school hours are usually 2 to 3:30 p.m.	Each semester, twilight school offers remedial opportunities for courses not passed the previous semester. Helps ninth graders with difficulty acclimating to high school and seniors needing credit recovery to support graduation.
Prep Programs: Tutoring programs offered to high schools with large numbers of students failing tested area courses. Prep programs are run by individual schools with the support of the principal of Evening High School. Hours are from 2 to 3:30 p.m.	Students in grade 10 English and Algebra 1 who do not pass the first marking period, and other students as determined by the school. Runs continuously through the school year up to the May administration of the High School Assessments.
Annapolis High School Attendance Supports: School social worker conducts home visits, contacts families, leads support counseling groups, encourages students to share contact information with each other and provides incentives for improved attendance.	High school students with truancy and school absences
Community Ambassadors: Engages professionals in the Annapolis community to assist selected students with attendance, behavior, and academic difficulties.	
Positive Behavioral Intervention Strategies (PBIS): Schoolwide behavioral intervention program at Old Mill High School.	Secondary students at risk of dropping out due to academic and behavior difficulties
Old Mill High School FBA/BIP Process—A psychologist works with implementing behavioral interventions.	Individual counseling and behavioral intervention programming for Old Mill High School students
Ninth Grade Academy: To increase probability for promotion, ninth graders are grouped into smaller learning communities, and teachers are grouped into interdisciplinary teams, rather than by subject area. Two staff people address improved family and school communication.	Ninth-grade students with a goal of promotion to grade 10
Schools participate in attendance communities. Should social or emotional concerns be "uncovered" during those meetings, the school psychologists and social worker become involved	Secondary students with emotional needs
Alternative Evening Mid-School (3 sites in high school): Social workers provide direct counseling services and consult with teachers about students' learning profiles. A social worker advises students about behavior changes to be successful upon return to the home school.	Students with disabilities placed on extended suspension or expulsion

NCHS Recovery Program: Academic and clinical interventions. Two designated teachers and one social worker. Academic intervention in reading and math recovery in one-on-one contacts and small groups. Social workers meet individually to discuss low grades and non-attendance, develop behavioral incentives, review progress sheets, work on organizational skills, communicate with parents, teachers, and staff.	Students at risk of failing; first-time ninth graders; "yellow zone" kids with grades of high E through C
Project Attend: Multi-agency program that aims to reduce the absence rate of chronically truant students.	Chronically truant students under the age of 16
Collaborative Supervision and Focused Enforcement (CSAFE): A collaborative effort between state and local public safety agencies to reduce crime and ensure public safety.	Identified students in areas that contribute to the most significant crime levels
Allegany County	
Program	**Population served**
Project Y.E.S. (Youth Experiencing Success)	Students in grades 8, 9, and 10 identified by the Pupil Services Team as at risk for dropping out (based on grades, attendance, home environment). Eleventh and twelfth graders monitored.
	Sixth- to 12th-grade students are placed on a community work site when suspended from school. Students work five hours and are tutored for two hours each day they are suspended. Placed through Board of Education hearing or by school administrator. Students are not on streets unsupervised and return to school with assignments completed.
Academic Village	Sixth- to 12th-grade students are placed with a certified teacher when attendance, grades, or behavior prevents them from working successfully in a regular classroom. They work their way back into the regular schedule.
Math School	Grades 6–8
Algebra School	Grades 9–11
SRA Corrective Reading	Grades 9 and 10
HSA Preparation for High School	Grades 9 and 10
Extended Learning Opportunities	
Co-teaching	
Alternative School	Grades 7–12
Pregnant/Parenting Program at YMCA	Grades 8–12
General Education and Special Education Cohesive Programming	Grades 6–12
Baltimore County Public Schools	
Program	**Population served**
Afternoon Middle School Learning Centers	Students in grades 6 to 8 who are on expulsion, administrative transfer, or program review status when alternative schools are at capacity

Alternative Middle and High Schools provide innovative curriculum, counseling, and social skills to assist students when returning to comprehensive schools.	Students in grades 6 to 12 who are on expulsion administrative transfer, or program review status
Evening/Saturday High School Program offers courses to continue credit classes and/or accelerate credit programs. A graduation ceremony is held for students who complete their graduation requirements.	High school students and individuals between 16 and 21 years of age (students in grades 9 through 12 who are on expulsion, administrative transfer, or program review status)
Life Works program offers support to alternative school students in grades 11 and 12. Focus is on assistance with transitioning back to their home school, finding employment, and graduating.	Students in alternative school (Rosedale Center) in grades 11 and 12
Home and Hospital services students restricted for reasons of physical or emotional health. The students are taught either by distance learning or individual instruction in the home, hospital, or therapeutic center.	Students in grades K-12 (regular education) or ages 3 to 21 (special education), who are unable to attend school for reasons of physical or emotional health
Home Teaching provides individualized instruction at the home or a community location.	When appropriate, students in grades K-12 who are on expulsion, administrative transfer, or program review status
Maryland's Tomorrow/Advance Path Academy is an in-school alternative program that provides a flexible schedule and curriculum based on technology.	Students in grades 9–12 who are at risk of dropping out of school.
Maryland's Tomorrow program's primary goal is to increase the number of students who graduate from high school. This program is offered in targeted high schools.	Students in grades 9–12 who are at risk of dropping out of school
Neglected and Delinquent Youth Grant provides instruction to incarcerated youth, 21 and under, to assist their return to a comprehensive school or to help prepare them to pass the GED.	Youth 21 and under who are incarcerated at the Baltimore County Detention Center (must be an Adult Center)
Summer School program offers specific, grade-level instruction in preparation for the Maryland School Assessment and High School Assessments.	Students in grades 3–12 who are in need of help with acceleration, promotion, or credits
Therapeutic Services program offers individual, family, and group counseling, home visits, and case management services to qualified students and families.	Selected students based on need and/or recommendation
Secondary Academic Intervention Model (SAIM) focuses on academic and behavioral intervention to address the needs of students who are the lowest academic performers, most disruptive, and at greatest risk of dropping out of school.	Grades 6–10
Bridge Center provides support for secondary students transitioning into Baltimore County Public Schools.	Students who are entering or returning to BCPS after a long absence, being released from incarceration, or in foster care
Baltimore City Public Schools	
Program	**Population served**
Novell Credit Recovery program offers review credit opportunities during and after school to help students recover credits from courses they have previously failed.	High school students in grades 9–12 who have failed courses required for graduation

Calvert County Public Schools	
Program	**Population served**
Calvert County Alternative School offers students an opportunity to continue education services toward graduation in a non-traditional setting.	Middle school students, grades 6–8, who need an alternative setting as a result of disciplinary action or special education needs High school students, grades 9–12, who need additional support through disciplinary actions, special education services, or behavioral interventions
Alternative programs are located in each of the county's four high schools and two regional programs housed in the county's middle schools. The programs serve as an intervention for students with various needs that are struggling in a regular education setting.	Grades 6–8: Regional programs at two of six middle schools assist students who require an alternative setting to meet their educational needs Grades 9–12: High school students who need an alternative setting to continue with high school courses toward graduation
Twilight School focuses on students who need extra support to complete coursework toward graduation. The intervention is focused on state-assessed courses.	Grades 9–12: High school students who are in danger of failing a state-assessed course needed for graduation
Ninth Grade Academy is used to assist with transitioning of students from middle school to high school and to focus on small learning communities that address students' individual needs.	Grade 9—High school students that are involved in the standard curriculum are placed in cohorts with a core group of teachers to assist with the transitioning to high school.
Sixth-grade teams assist the fifth graders in transitioning to middle school with a focus on small learning communities with the same core of teachers.	Grade 6—Middle schools work with students in cohorts with a group of teachers to assist with academic, social, and emotional needs of transitioning students.
Saturday for Middle School is a program in middle schools that works with students who need additional academic support. Enrichment programs are offered to allow students to explore additional information and points of interest.	6th–8th graders are involved in the program to work on academic remediation and enrichment.
Saturday School for High School program provides additional opportunities for students to get academic assistance in core courses.	9th–12th graders can be assigned or volunteer to come and receive academic assistance.
Algebra Enhancement program provides remediation to enhance students' Algebra skills in preparation for the High School Assessments.	9th–12th graders will receive instruction based on the skills and content covered on the High School Assessments.
Cecil County Public Schools	
Program	**Population served**
Detour: Offers after-school tutorial, anger-management counseling, career guidance, drug/alcohol counseling, and community referral.	Grades 8–12, students referred through school, agency, or family
ASP (Alternative Suspension Program): Provides for suspension reduction through community services, anger-management counseling, and schoolwork recovery.	Grades 6–12, students referred by school administrator and parent
Cecil Alternative Program is an alternative school for students referred for inappropriate behaviors and those entering from a nonpublic placement.	Grades 6–12

High School After School is a grade recouping program that offers students failing core subjects the opportunity of tutorial instruction and test retaking.	Grades 9–12. Students who are failing core classes may stay after school for instruction and test retaking.
Evening High School offers review credit as well as original credit.	Grades 9–12. Students may enroll in Evening High School to pick up additional or review credits for graduation.
High Roads School is a nonpublic day program for emotionally disturbed students with a credit program and behavior intervention.	Grades 6–12
High School Academic Intervention Team: An in-school team that provides academic intervention to identified students. Provides direct and referral services.	Grades 9–12
Charles County Public Schools	
Program	**Population served**
Case Management Pilot Project at Henry Lackey High School: Individualized interventions are being developed by case managers at a pilot high school to retain special education students at risk of dropping out of school.	Special education students at risk for dropping out
Check and Connect Pilot Project at General Smallwood Middle School: Students are assigned mentors who monitor engagement with school, then intervene to reestablish connections and enhance social and academic competencies.	Students who exhibit dropout indicators, including low academic performance, poor attendance, and unproductive behaviors
21st Century Community Learning Center at Malcolm is a once weekly after-school mentoring program.	Malcolm neighborhood students in grades 3–12 who exhibit dropout indicators, including: low academic performance, poor attendance, or unproductive behaviors
Maryland's Tomorrow offers academic support and encouragement throughout the high school experience. Assistance is geared toward improving attendance, academic performance, and career objectives.	Students who are experiencing difficulty maintaining a satisfactory level of academic performance, and identified by their 8th grade guidance counselor as at risk of dropping out of school
Student Support Teams function in each school to identify students who are not being successful academically or socially.	K–12
Summer Youth Achievement program is designed to meet the needs of at-risk middle school students. Summer school students, alternative school students, and students referred by outside agencies in grades 6,7, and 8 are eligible to participate. Students receive academic assistance, social skills training, recreational trips, and planned field trips.	At-risk middle school students (approximately 100 students)
Freshman Seminar is designed to promote a successful transition from eighth to ninth grade and to promote academic and social success for all students. Freshman seminar will examine skills all students need for success in school and life. This course will provide students with opportunities to develop skills and knowledge.	Entering ninth graders

Positive Behavioral Interventions and Supports (PBIS) is a system-based approach to enhancing the capacity of schools to educate all children by developing research-based schoolwide and classroom discipline systems. The process focuses on improving a school's ability to teach and support positive behavior.	PBIS impacts all students K through 12 with a strong focus on students exhibiting difficulties in social and academic development.
Behavior Education Program: The Check-IN/Check-Out program is a school-based program providing daily support and monitoring for students who are at risk of developing serious, chronic behaviors. It incorporates core principles of positive behavior support and enhances communicating among teachers, improves school climate, increases consistency among staff, and helps teachers feel supported.	Students who demonstrate persistent patterns of problem behavior K through 12
Southern Maryland College Access Network: Academic support provided through weekly individual meetings with a trained site advisor, as well as group activities aimed at increasing academic success, encouraging career exploration, and planning for college admissions and the financial aid process.	Serving La Plata High School students (and one high school from each adjoining southern Maryland county) who are identified as low income and minority, to encourage college preparation and attendance
College of Southern Maryland's Education Talent Search program: Academic support, along with high school and college orientation and advisement. College tours and assistance with college admissions procedures are also provided.	Available to all Charles County middle and high school students
STAY program assures that all students develop the necessary social, behavioral, and academic skills to become responsible members of society. Consistency, setting high behavioral standards, and expecting positive outcomes for each student accomplish these goals. Individual, group, and family therapy/parent training are essential components of the program. Collaboration between home, school, and community service providers is critical to each student's success.	Serving children, both regular and special education, grades K–8, whose behavioral needs have not been within their home school setting
Juvenile Intervention Officer (JIO) develops and serves in the role of the law enforcement liaison to assigned primary and secondary schools in Charles County that include enforcement, intelligence gathering, prevention and intervention strategies. The role also includes serving as a student mentor which has proven to be a very positive influence for many students in both middle and high school.	All middle and high schools
Garrett County Public Schools	
Program	**Population served**
Evening High School provides opportunity for students to enroll in classes in which they have lost credit.	High school students
J-ROTC provides the opportunity to gain leadership and achievement skills by students.	High school students
Freshman Seminar provides instruction in various skills needed by high school students.	9th graders
Academic Remediation/After school Tutoring provides the opportunity for tutoring and remediation in challenge subjects.	K–12
Maryland's Tomorrow provides classes and interventions for identified students.	High school, at-risk students
Back to School is a re-entry program for returning students.	High school students who re-enroll
Family Worker/STAR/PBIS –Student-family, school intervention	K–12, at-risk students

Drop-out prevention case managers	Grades 6–12, at-risk students
Instructional Consultation Teams provide review and intervention for students experiencing academic or behavioral difficulty.	K–8 students
Harford County Public Schools	
Program	**Population served**
Online Credit Recovery System uses an assessment and curriculum generation tool to produce an individualized prescriptive remediation specific to each student.	High school students who have failed courses required for graduation
PBIS is a schoolwide system of support that includes proactive strategies for defining, teaching, and supporting appropriate student behaviors to create positive school environments.	Students in the Alternative Education Programs
Reconnecting Youth and Techs Bridge	Students who have already dropped out of high school
Math and reading intervention programs, intervention specialists, after school programs, and home visitors (Title 1 schools) are various academic interventions designed to assist at-risk students.	All eligible students
Capturing Kids' Hearts and other grade 9 Freshman Academy strategies focus on adults and their developing relationships with students in order to help them make strong connections in high schools.	All 9th grade students
Peer Helpers program: Leadership training program in all secondary schools. Peer helpers are available to help new students, provide tutoring, facilitate mediation, and assist their fellow students.	All middle and high school students
Student 2 Student is a specific type of peer-helper program focusing on transitioning military students, supported by the military child education coalition (MCEC) and a partnership with Aberdeen Proving Ground.	Aberdeen High School and Edgewood High School students
Howard County Public Schools	
Program	**Population served**
In School Alternative Education Programs (AEPs) provide behavioral and academic support, parent outreach services, and intensive case management for students at risk of school failure. These entry-level alternative education programs are designed to provide resources that allow students with challenging behaviors to remain in their districted school.	K-12 students exhibiting significant behavioral and academic difficulties in school
Maryland's Tomorrow is a high school dropout-prevention program. Facilitators employed at five high schools work in tandem with AEP staff to provide academic tutoring and supplementary instruction to students at risk of dropping out of school.	High school students exhibiting significant difficulties, inconsistent attendance, and low motivation to succeed in school
Gateway High School is one of the programs that comprise the Homewood Center. Homewood is a countywide alternative learning center. Gateway provides behavioral and academic support services to students whose needs exceed what can be provided at the districted schools. Gateway provides a more individualized approach to teaching and learning, counseling, and socio-emotional support and a high level of structure and supervision for participating students.	High school students exhibiting significant difficulties whose needs cannot be met in their districted schools

Evening School program provides academic and behavioral support services for students in the middle and high schools who exhibit behaviors that require their removal from the districted school. Some students may attend by choice.	Middle and high school students serving extended suspensions or who are expelled but continue to qualify for educational services; High school students that elect to attend original credit courses in lieu of or in addition to attending classes during regular school hours; Students 18 years of age or older who have dropped out and then request re-enrollment
Teen Parenting and Childcare is a teen parenting program that provides academic guidance, support, childcare, and counseling for teens and their children. The program enables pregnant and parenting teens to complete their high school education while receiving instruction, job skills, and daycare services. Pregnant and parenting teens are able to attend school fulltime.	High school students; Outreach component of the program serves pregnant and parenting teens at middle and high school levels
Other Academic Intervention Services include extended day, extended week, and extended year programs, the Black Student Achievement Program, and Community Based Learning Centers. These programs are designed to implement effective practices to accelerate the achievement of students performing below grade level. High school programs enable students to score at the proficient level or higher on the Maryland School Assessment and to pass the High School Assessments.	
Montgomery County Public Schools	
Program	**Population served**
Pupil Personnel Workers (PPWs): Each school has an assigned PPW to monitor students with absentee rates of 20 percent or greater. PPWs work with school staff and families to investigate these cases and to provide supports and resources to improve school attendance.	K–12
HAPIT (Honors Advanced Placement Identification Tool) was developed locally to examine a variety of data points for each high school student to determine/verify the appropriateness of course levels. Not only does this assist staff in determining when more rigorous coursework is appropriate, it allows staff to ensure that struggling students receive more interventions and supports.	All students grades 9–12
Reading and Mathematics Interventions: Programs, including Read 180 and Challenge Reading, to help students who are struggling with reading.	Students grades 3–12 who are in need of academic support
Extended Day/Extended Year Programs: Individual schools are provided funding to offer extended day and school year programs for students who are struggling with academics, have failed courses, or are at risk of not passing assessments required for graduation. These programs offer low student-to-teacher ratios and make use of research-based programs proven to positively impact learning. At the high school level credit-recovery programs are being piloted.	Students grades 3–12 on Saturday mornings
George B. Thomas Learning Academy: The mission of this tutoring and mentoring program is to accelerate student mastery of academics, specifically reading, language arts, and mathematics.	Students grades 1–12 on Saturday mornings

Alternative Programs: MCPS operates a continuum of intervention services for middle and high school students who are unsuccessful in their home schools. Level 1 programs are provided in every secondary school. These programs provide intervention strategies and supports to students in their home schools. Level 2 programs are available for students who are successful in their home schools, even with the support of a Level 1 program. Each of these programs provides academic instruction as well as behavioral and social skills instruction. The goal of Level 2 programs is to provide students with the skills needed to successfully return to their home schools. Level 3 programs are available to students in lieu of expulsion.	Students grades 6–12 who are unsuccessful in their home schools
Gateway to College is a program at Montgomery College for high school students who have stopped attending MCPS high schools and for whom high school completion is at risk. The program gives students an opportunity to earn a high school diploma while transitioning to a college campus. Students may simultaneously accumulate high school and college credits, earning their high school diploma while progressing toward an associate degree or certificate.	16- to 20-year-olds who have stopped attending MCPS high schools and for whom high school completion is at risk
Student Withdrawal Interview: School staff contact parents and interview any student who wishes to withdraw from school after age 16, but prior to graduation. During the interview, school staff presents instructional interventions and alternatives available to encourage the student to remain in school. All information is documented on a MCPS form specifically designed for this purpose.	Any student over age 16 considering withdrawal from school prior to graduation
Interagency Truancy Review Board: The purpose of the Truancy Review Board hearing is to motivate parents of habitually truant students to send their children to school. The hearing is essentially an "end stage" strategy when a sequence of interventions implemented by the school has failed to gain results.	Students through age 15 who are habitually truant
Queen Anne's County Public Schools	
Program	**Population served**
Alternative Program at the Learning Center, Queen Anne's County High School	Grades 9–12 in county high schools
Midshore Alternative Program Collaboration with Caroline County Public Schools	Grades 6–8
Saturday School	9–12th grade students in lieu of in-school suspension
Character Counts! is a joint effort of the Local Management Board and Board of Education of Queen Anne's County to promote a program of character education to all students. Embedding character education into curriculum and the language of the school makes a difference in the school climate.	All grade levels in all QACPS
Positive Behavioral Intervention Supports (PBIS) is a schoolwide system of support that includes proactive strategies for defining, teaching, and supporting appropriate student behaviors to create positive school environments.	K–12

St. Mary's County Public Schools	
Program	**Population served**
Credit Recovery Program allows students to recover credits for classes they previously failed.	9–12th graders who have failed a course
Evening High School offers students the opportunity to receive original credit for courses previously failed or for courses that could not be taken during the school day.	9–12th graders who have failed required courses for graduation receiving a percentage grade of 44 percent or below 9–12th graders who need original credit for required courses for graduation but cannot fit courses into their schedule during the normal school day
Baby Talk offers students with children, infants up to age 3, daycare within the student's high school during school hours.	9–12th graders who have infants and toddlers and are in need of daycare in order to remain in school
Evening Counseling Center offers free counseling services to public school students who are struggling with issues that impact their ability to be successful in school.	K–12 students struggling with personal issues that negatively impact their ability to be successful at school
School Counseling program: High school counselors and pupil service team members meet with 9–12th grade students at risk of dropping out and develop individual intervention plans.	9–12th graders who demonstrate excessive absences, fail multiple courses, or are not scheduled to graduate within the four-year time frame
Talbot County Public Schools	
Program	**Population served**
Educational Options Computer Curriculum offers independent study courses for a variety of subjects. This program is used in several different situations.	Middle and high school students
Independent study classes are part of the regular school day during the second, third, and fourth periods.	Students who have failed a number of courses to recover credit
Extended day program runs two hours after the regular school day.	Students who have failed a number of courses to recover credit
Adult High School Diploma program is offered four nights a week at two locations and five days a week during the day.	Students 16 years of age and in lieu of dropping out
Talbot Family Support Center provides daycare.	Students who have children
Alternative Educational Center (AEC): Extended services for chronically disruptive students beyond existing programs and in-school programs.	Students of any age are scheduled for a morning and afternoon session
Tutoring	Available to all students participating in the program
Washington County Public Schools	
Program	**Population served**
High School Dropout Prevention Program: Develop caseload of students most at-risk for dropping out; build positive relationships; develop strategies and provide intervention; Student Support Team; Maintain and analyze academic, behavioral, and demographic data in order to target appropriate students and provide meaningful intervention.	All WCPS high school students who are at risk of dropping out

Middle School Dropout Prevention Program: Develop caseload of students most at-risk for dropping out; build positive relationships; develop strategies and provide intervention; Student Support Team; maintain and analyze academic, behavioral, and demographic data in order to target appropriate students and provide meaningful intervention. Work to ensure effective transition to high schools.	All WCPS middle school students
Washington County Family Center administers a high school credit program for pregnant and parenting students, provides case management, childcare, and parenting instruction.	Parenting students
WC Evening High School (WCEHS) is an alternative high school educational program that offers up to two courses each semester, original and credit recovery; dual enrollment at home high school and WCEHS.	WCPS high school students
Nova Net Computer/Web-based Instruction: Provides credit recovery and original credit in non-assessed courses; serves selected students at WCEHS, Antietam Academy Alternative Learning Center, and Washington Family Center.	15 to 30 at-risk high school students
Wicomico County Public Schools	
Program	**Population served**
Mentoring Project: Matches a student and an adult to meet one hour per week in the school setting.	Students K-12 who are identified by administration as at risk of failure due to attendance, behavior, or academics
Evening High School enables students to recover credits for promotion or to maintain credit count. Can be used as original credit.	Students 16 or older who have not passed a course
Dropout Reduction: Work with students on a daily basis to offer assistance on grades, attendance, conduct issues, and other matters that affect student performance and advancement.	9–12th grade high school students who have failed courses required for graduation; suggested rising eighth graders who are at risk of struggling in high schools
HSA Remediation: Assist students in areas of weakness in preparation for retaking the test.	Students who fail to pass a required course or test
College Tutors offer in-class tutoring for students during the school day to help students get caught up with work and increase their understanding of core subjects.	Volunteer students who feel they need additional help in core subject areas
Middle School Visits to High School gives middle school students an opportunity to visit Career Technology Educational Center to experience firsthand the types of crafts/careers that are offered. (Motivation to keep students in school to be able to attend one of these programs.)	8th grade middle school students
After School Tutoring program offers individual and group assistance after school to help students work on core and elective courses that they are experiencing difficulty with.	High school students

Subcommittee Three: Practical Implications and Resources

Subcommittee Charge

Task Force Subcommittee Three was charged with examining the adequacy of resources for and developing an action plan to accomplish the implementation of an initiative to raise the compulsory age of attendance. Assessing the fiscal impact on the State and local governments seems imperative as families, business leaders, politicians, and educators consider raising the compulsory age of attendance from 16 to 18 years of age. The appropriateness of mandating students return to or continue to attend educational settings from which they desire to drop out is the primary charge of other subcommittees. Our charge is to clarify the fiscal impact of continuing education for an additional two years without changing the instructional program, class size, mode of delivery, or length of the school day/year.

Findings

ADEQUACY OF RESOURCES

To examine the adequacy of resources we collected current information and data on dropouts, statewide enrollment projections, high school state rated capacity, costs per pupil belonging, and estimated construction costs for permanent construction of additional classrooms and costs for portable classrooms. A projection was made to determine the number of students who would potentially return to school buildings by the change in the age of compulsory attendance. The resources required by these additional students and the projected fiscal impact of these additional students in Maryland schools were extrapolated from this data.

To this end, the Subcommittee's research included determining:

- The additional number of students who would be continuing for at least two years;
- An analysis of present classroom capacity to accommodate the additional students and the funding necessary to provide additional classrooms;
- The additional funding necessary to staff schools to accommodate these additional students and to purchase necessary textbooks and instructional supplies.

To calculate the fiscal impact on the State and local school systems, we made certain critical assumptions. An initial assumption is that these students will be returning to the same

schools from which they dropped out. This assumption would allow for a base price cost estimate for returning students without any change in staffing ratio, program, resources, or length of instructional day/year. Based on figures from the Maryland State Department of Education, the average number of students dropping out of Maryland's public schools each year is approximately 10,500. For calculation purposes we projected that this number would remain unchanged so that a two-year total would be approximately 21,000 students. Facility analysis was based on an assumption that students would return to a typical classroom with 20 to 25 students. Based on the present Public School Construction Program facilities capacity formula (25 students per teaching station at 85 percent utilization), we assumed 21.25 students per classroom. The committee took into account each system's present overall high school capacity without regard for the fact that some geographical areas of a local school system might be more heavily impacted by returning students than other neighborhoods. Statewide usage capacity is already at 100 percent with 11 systems above 100 percent. The number of high school students is projected to decline in the state through 2014, but the total public school enrollment in Maryland in 2015 is trending up. To calculate the staffing needs, we used the statewide average of one instructor for every 19 students. Recognizing that "new construction" often takes years to come to fruition, the subcommittee decided to provide both the cost to provide newly constructed classroom space and the cost to provide portable classrooms to expand facility capacity in the short term. New construction costs and portable classroom costs are based on current Public School Construction Program budget estimates. New construction was calculated at $247 per square foot. The purchase and installation of portable classrooms is estimated at $80,000 per unit. The more likely approach of purchasing portable classrooms to accommodate the additional 21,000 students totals approximately $46 million. Additional space is required in 15 of the 24 school systems.

The total additional costs for providing educational and related services to the additional students are approximately $200 million per year. This figure varies in the projected impact on local jurisdictions from a low of $385,000 in Talbot County to a high of $60 million in Baltimore City. See tables 1-6 for specific district information and table 7 for a state summary.

ACTION PLAN, PROFESSIONAL DEVELOPMENT, AND PARTNERSHIPS

Task Force Subcommittee Three was also charged with making recommendations that would support successful implementation of an initiative to raise the compulsory public school attendance age from 16 to 18 across Maryland. The Subcommittee had three primary areas of focus: an action plan, professional development that would assure success of the action plan, and partnerships that would enhance opportunities for students to successfully complete high school.

According to the National Youth Employment Coalition (2005), nearly one third of the students in the United States are not completing high school in four years. The result of this failure to complete high school means that approximately 5.4 million young people between the ages of 16 and 24 are out of school and out of work in this country.

In order to develop an action plan for the implementation of such an initiative, infrastructure must be constructed. That infrastructure must be based on what the students need, rather than on what schools traditionally have offered in a new location or with new labels.

Researchers and educational writers differ markedly about what students need to keep them in school and to earn a diploma. Rather than sift through conflicting opinions, the Subcommittee found it most useful to explore the question of why students drop out in the first place. Knowing those reasons will dictate program design.

In a survey (Bridgeland, Dijulio, & Morison, 2006) of nearly 470 dropouts throughout the country, nearly 50 percent said they left school because their classes were boring and not relevant to their lives or career aspirations. A majority said schools did not motivate them to work hard, and more than half dropped out with just two years or less to complete their high school education.

Two-thirds of those surveyed said they would have worked harder to graduate if their schools had demanded more of them and provided the necessary academic and personal supports

to help them succeed. Others said that as they grew older, increased freedom and other distractions drew them away from school. Sixty-two percent reported they had grades of C's or better when they left school; 70 percent were confident they could have met their school's graduation requirements; and 74 percent would have stayed in school if they had to do it over again. Significant reasons given by students for dropping out included not being sufficiently challenged, and feeling unmotivated, bored, and unsupported. Other, more personal reasons, were also significant: needing a job, becoming a parent, taking care of a sick family member.

"Most students don't wake up on a single morning and decide to drop out of school. Rather, dropping out is the end of a long-term process of disengagement, as students find school to be disconnected from—even at odds with—the rest of their lives," said Geoff Garin, President of Peter D. Hart Research Associates.

While these former students accept some responsibility for not completing high school, they say that there are "supports" that can be provided at school and at home. More than 70 percent believe that the problem could be addressed through better teachers, real world learning opportunities, smaller classes, increased supervision, and improved communication between parents and schools.

"As we work to improve our nation's high schools for all students, it is vital for us to consider the insights and reflections of the young people who were failed by our schools," said Jim Shelton, Education Divison Program Director at the Bill and Melinda Gates Foundation. "Our education system needs to respond by ensuring all students—no matter where they go to school—have access to the challenging, relevant and supportive education to ensure their success in this tough new economy." (Bridgeland et al., 2006).

The Subcommittee reviewed current practices and programs, collected data from school systems on existing programs, analyzed the evidence shared by districts, and examined the findings of national longitudinal dropout studies in order to consider the most effective responses to the questions of implementation of action plans, professional development and the fostering of partnerships. From our examination of practices in Maryland we found:

- There is significant discrepancy among districts in what is identified as an alternative education or dropout-prevention program.
- A lot of programs exist in the name of dropout prevention, yet one-third of entering high school students leave high school before graduation with no viable options for gaining their diploma or equivalent.
- The data evaluating these programs are inconsistent.
- It is difficult, if not impossible, to compare the costs per student of these programs.
- While Maryland's demographics may mirror the national demographics to some extent, there are unique factors in Maryland's data; a significant number of

Maryland's dropouts are not members of the traditional subgroups. The majority (more than 60 percent) of students dropping out in Maryland are students of color. Only 40 percent of the dropouts are in subgroups of special education, FARMS, LEP, migrant, or 504.

- Structures to engage the families of potential dropouts appear to be insufficient based on the review of program information from districts.
- There is recognition that meeting the needs of students who are most likely to drop out is not the same as preventing students from dropping out of school by changing the compulsory age of attendance.

School climate, adult expectations, scaffolding for learning, and content relevance have much to do with the student's decision to drop out. These points constitute the design principles for an action plan to keep students moving toward a diploma until their eighteenth year.

ACTION PLAN

Following the design principles itemized above, an action plan to keep youth productively engaged in working toward a diploma would be something other than more of what schools offer now. After all, if schools do the same things, why should we expect different results?

An action plan to accomplish the goal could do any combination of things to support positive climate, high expectations, scaffold learning, and relevant content for students.

According to the National Youth Employment Coalition (2005), students between the ages of 16 and 18 who are likely to drop out will need some support to stay engaged in school. The support these students will need is often identified as alternative education.

Currently, the State of Maryland has no formal definition of alternative education. Such a definition is found, however, in several other states, Wisconsin for one. Too often, alternative education programs have developed a reputation in their respective communities as programs for "bad kids." This view must be changed as an infrastructure is put into place. While much of the work to prevent students from dropping out of school must be done in pre-kindergarten through grade nine, the question of how to best serve those students who leave school when they reach the age of 16 must be addressed. A review of the literature and current practices across the nation indicates the following:

Alternative education programs can be:

- A separate room or teacher within a comprehensive high school where additional services are provided;
- A school within a comprehensive high school; or,

- A separate facility.

(Source: State of Wisconsin, Department of Public Instruction)

Elements of Quality Practice and Programming:

- Offer low student/teacher ratio
- Are accredited
- Grant credentials (High School Diplomas or GED)
- Offer credit recovery
- Hire certified teachers
- Provide flexible scheduling
- Negotiate strong relationships at the local level
- Secure private funding

(Source: State of Wisconsin, Department of Public Instruction)

Models of Alternative Education need to offer anger management; small group instruction; some individualized instruction; computerized, self-paced instruction; guidance services; and study skills. Strong, consistent, and persistent support services are critical to these students' success.

PROFESSIONAL DEVELOPMENT

Any professional development discussion related to dropouts must address two separate areas: ongoing growth of all staff who meet and teach students throughout their public school experiences, and the fine-tuned professional development of staff devoted to alternative programming focused on those students least likely to earn a diploma.

Professional teaching staff as well as administrative staff are at a premium due to national shortages in both work forces. Before considering professional development needs, the Subcommittee recognized initially that adequate staff may not be available for a plan of this scope, even if funding would be.

According to the Maryland Teacher Staffing Report 2006–2008 (Maryland State Department of Education, 2006), the State is experiencing a critical shortage of non-classroom positions: principal, reading specialist, and speech/language pathologist. Also in short supply are teachers who are: male, members of minority groups, and certified in critical content areas (including mathematics, science, ESOL, foreign language, career and technology, and special education).

Each of Maryland's 24 school systems is projected to have a shortage of certified teachers. This continuing employee shortage, coupled with a successful plan to keep students in school, suggests a need for alternate approaches to teaching certification and for alternative

delivery of instruction as well. While it is not the purview of this report to suggest restructuring of Maryland Higher Education, it is also true that Maryland must begin to move toward producing more certified teachers to meet the instructional needs of its students. At the same time, Maryland must implement strategies to welcome college graduates with relevant job skills and experiences to instruct our most vulnerable youth at risk of not earning a high school diploma. In light of continuing high-stakes requirements for a diploma in Maryland, alternative programming for youth who currently drop out is a complex issue. Those youth must meet the same High School Assessment and graduation requirements as all other students, so their program is not a difference of content as much as it is a difference of delivery. Finding adequate numbers of staff who can fulfill this requirement during a time of shortage is more than a professional development question.

PARTNERSHIPS

In order to ensure the success of an initiative to meet the needs of students who are in the age range of 16 to 18 years, and who, for whatever reason, have been unable to complete high school, an extensive and sophisticated network of interagency collaboration needs to be in place. Critical guiding principles to consider include these from the National Youth Employment Coalition (Mala & Henry, 2005):

- Partner with community-based organizations and higher education for the good of all students;
- Access multiple funding streams to protect programming;
- Provide support services, such as case management and counseling, to assure continued student attendance;
- Provide contextual, applied, experiential, and project-based learning to engage the learner;
- Offer a personalized learning environment embedded in youth development principles; and
- Integrate community service and service-learning opportunities which offer connections to employment, training, and postsecondary education.

Without a solid foundation of well articulated and established partnerships, the initiative has a greatly diminished possibility for success. Certainly, the school systems have a great deal of responsibility for providing the most appropriate service to all students. However, the federal, state and local governments, a multitude of social service agencies and the private sector all share in this responsibility. Each in some way provides support and acts as a barrier to providing appropriate programming and experiences for the students who are not completing high school.

In reviewing the current state of America's dropouts, the National Youth Employment Coalition (Mala & Henry, 2005) addressed the issue of dropouts by observing:

- Given the new economy and global competition, the goal for the American High School must be to graduate the overwhelming majority of students with proficient skills.
- School districts and the State will need to develop a portfolio of secondary school options—all having the highest standards—while customizing to the needs of a diverse population.
- Funding and policy must be realigned to support the re-invention of the American High School, which would include expansion of educational options. While the American High School works for about two-thirds of all students, it clearly does not work for a large section of the student population.

According to the National Longitudinal Study conducted by the U.S. Department of Education Statistics (Kaufman et al., 1999), the key reasons why eighth- to tenth-grade students dropped out were school-related: did not like school (51 percent), could not get along with teachers (35 percent), and were failing school (39 percent). While some reasons were job-related or family-related, the primary reasons resided in the structure, pacing, time of instructional delivery, and the overall feeling about being in school. To stay in school, some of our students need a different type of school experience.

Subcommittee Recommendations

RECOMMENDATION ONE

Factors other than age must be addressed in any program or legislation that attempts to reduce the dropout rate.

RECOMMENDATION TWO

A definition of alternative education must be developed by the State Board that addresses different modes of instruction and age-appropriate implementation of strategies targeted to the population likely to, or who has already, voluntarily dropped out of school.

RECOMMENDATION THREE

Establish a state-wide initiative that will:

a) Be flexible while providing a consistent philosophy of approach in addressing the needs of 16- to 18-year-old dropouts regardless of where they live or attended school;
b) Establish and evaluate pilot programs based on proven or promising approaches prior to statewide implementation. Consideration should be given to geographic location, size, and diversity of school systems.
c) Provide an infrastructure (people, organization, time of day, location, resources, community and family involvement) and identify reallocation of funding and new funding that guarantees effective services that are interagency and assures increased numbers of students who stay in school and graduate;
d) Examine articulation and funding agreements and formulas among agencies and institutions to determine which of these enhance students' opportunities and which serve as barriers.

RECOMMENDATION FOUR

Expand the data collection work on existing dropout prevention and re-entry programs that has been done, and design and implement a program to analyze the effectiveness of these dropout prevention programs.

RECOMMENDATION FIVE

Use what has been learned in previous studies (African American Males, AEMMS, MPAC report) to address the disproportionate rate of dropouts in minority populations and the need for greater parental involvement.

Subcommittee Four: Special Populations

Subcommittee Charge

Subcommittee Four was to address Subsection (e)(5) of House Bill 36: "Examine the implications for raising the compulsory public school attendance age to 18 on standards-based outcomes, students with disabilities, and students with limited English proficiency."

The Subcommittee examined carefully the impact of any change in the compulsory public school attendance age on special population students, specifically on students with disabilities receiving special education and students with limited English proficiency (LEP). Students with disabilities receive special education and related services that are specifically designed to meet the unique needs of the student. These services and specialized instruction are provided to the student at no cost to the parents. The Individuals with Disabilities Education Act (IDEA 2004) is the federal law that mandates that all children residing in the state with disabilities are entitled to a free appropriate public education (FAPE) between the ages of 3 and 21.

Limited English Proficient students are students who have a primary or home language other than English, and who have been assessed as having limited or no ability to understand, speak, read, or write English. Those LEP students are also entitled to a public education between the ages of 3 and 21 (COMAR 13A.01.04.02 (11)). As described in the Findings section of this report, some research and data indicate that being entitled to FAPE until age 21 does not necessarily result in a higher rate of school completion for these special populations.

Both the Individuals with Disabilities Education Act of 2004 and the No Child Left Behind Act of 2001 have established goals that will improve the education and preparation of young adults for employment and independence upon exiting school. The success of these legislative initiatives depends on change, i.e. change in educational standards, student expectations, instruction, and assessments. According to Knokey (2006), "What happens in classrooms every day is what students experience directly and it is the mechanism through which educational interventions are most likely to produce the desired changes in improved student achievement." To meet the needs of this diverse subgroup of students, appropriate educational program options, services, and supports are necessary.

For consistency of understanding throughout this report, definitions of special education participant/student with disabilities, Limited English Proficient, Dropout, and Graduation, as defined by the Maryland Report Card (2007) are listed in Appendix A.

To accomplish its assigned task, the subcommittee reviewed and discussed research and data regarding:

- Current federal and State law pertaining to Special Education and non- English proficient/limited English proficient (NEP/LEP) students;
- Graduation and dropout rates for the identified subgroups;
- Factors contributing to student dropout;
- Existing and potential alternate educational opportunities to meet the needs of the identified subgroups; and,
- Post school outcomes of the students in the identified subgroups.

Findings

The IDEA 2004 emphasizes that post school success is the ultimate outcome of the FAPE guaranteed to students with disabilities by declaring that its purpose is "To ensure that all children with disabilities have available to them a FAPE that emphasizes special education and related services designed to meet their unique needs and prepare them for further education or, employment, and/or independent living." To determine if services provided to students with disabilities are effectively preparing them to meet the goals of IDEA, the Maryland State Department of Education, Division of Special Education/Early Intervention Services has been conducting the Maryland Longitudinal Transition Study (MD LTS). It is a parallel study of the National Longitudinal Transition Study – 2 (NLTS2) being conducted by the U.S. Department of Education, Office of Special Education Programs. These two studies began in 2000 and will conclude in 2009. The Maryland study began with 1000 students with disabilities with Individualized Education Programs (IEPs) between the ages of 13 and 18. The MD LTS has been divided into Waves, or sections, focusing on student school age experiences and bands of post school year outcomes. The first Wave looked at students while in school, concentrating on educational instruction and support along with out-of-school activities such as home life, part-time employment, recreational activities, and social relationships. The MD LTS Wave 1 and Wave 2 Final Report is included as Appendix B to the Subcomitte's report.

All data and findings are weighted estimates of the total population of youth who received special education support during their public education. The MD LTS includes both youth who exited school with a diploma or a certificate of program completion, and those who dropped out.

Wave 2 is the first look at the post-school activities of the participants. Those participants have been out of school for up to two years. The majority are male, 18 or 19 years of age. The following table provides information on the modes of post school engagement of the study participants (Cameto, 2006).

TABLE 1

Post School Engagement Activities

from Wave 2 of the Maryland Longitudinal Transition Study

Activity	*Graduate/Certificate*	*Dropout*
Employment Only	42.8%	46.6%
Postsecondary Education Only	4.8 %	0%
Job Training Only	11.4%	11.1%
Employment and Postsecondary Education	29.8%	18.8%

While it is important to keep in mind that these students have only been out of school for up to two years, it is alarming that the number of young adults engaged in post school activities is so low. Responses listed in the chart above do not equal 100 percent since respondents could check off more than one activity, or could indicate that none of the options were applicable. Therefore, the data indicate that approximately 50 percent of "school leavers" in this subcategory (students with disabilities) were engaged in employment, job training, and/or postsecondary education at the time of the report.

The rate of students with disabilities completing their education programs proved to be a concern to the Subcommittee. The following tables summarize trend data for dropout and graduation rates for the school years 2001-02 to 2005-06. Based on these data, it becomes obvious that few young adults with disabilities are engaged in postsecondary activities.

TABLE 2

Maryland Dropout Data—Students with Disabilities

Summary of trend data for the 2001-02 to 2005-06 school year

Source: Maryland Report Card

Year	*Special Education*	*Regular Education*	*Difference*
2006	5.65%	3.38%	+ 2.27%
2005	5.13%	3.50%	+ 1.63%
2004	4.12%	3.81%	+ 0.31%
2003	4.10%	3.30%	+ 0.8%
2002	3.71%	3.68%	+ 0.03%

TABLE 3

Maryland Graduation Rate Data—Special Education

Summary of trend data for the 2001-02 to 2005-06 school years

Source: Maryland Report Card

Year	Special Education	Regular Education	Difference
2006	76.77%	86.21%	- 9.44%
2005	77.56%	85.47%	- 7.91%
2004	77.56%	84.89%	- 7.33%
2003	78.35%	85.20%	- 6.85%
2002	80.71%	84.08%	- 3.37%

For Limited English Proficient (LEP) students, several factors were identified that may explain the striking differences between rates of drop out and graduation compared to students with disabilities. One important difference is the extreme diversity of students comprising the total LEP population. Local school system personnel who are actively engaged with these students and their families note that there are subgroups that choose to migrate to Maryland specifically for the educational opportunities available and who have high expectations for their children's academic achievement. There are also subgroups that migrate to Maryland for employment opportunities and, due to economic necessity, may be forced to work for long hours to meet their family's basic needs, leaving less opportunity to focus on their children's academic progress. While these are just two simplistic explanations, those factors do not negate the fact that dropout and graduation rates are significant issues for LEP students.

TABLE 4

Maryland Dropout Data—Limited English Proficient

Summary of trend data for the 2001-02 to 2005-06 school years

Source: Maryland Report Card

Year	Limited English Proficient	Regular Education	Difference
2006	1.22 percent	3.38%	- 2.16%
2005	1.44%	3.50%	- 2.06%
2004	1.13%	3.81%	- 2.68%
2003	1.03%	3.30%	- 2.27%
2002	1.79%	3.68%	- 1.89%

TABLE 5

Maryland Graduation Rate Data—Limited English Proficient

Summary of trend data for the 2001-02 to 2005-06 school years

Source: Maryland Report Card

Year	Limited English Proficient	Regular Education	Difference
2006	85.41%	86.21%	- 0.8%
2005	91.74%	85.47%	+ 6.27%
2004	86.41%	84.89%	+1.52%
2003	82.57%	85.20%	- 2.63%
2002	88.61%	84.08%	+ 4.53%

Dropping out of high school is related to a number of negative outcomes:

- The median income of high school dropouts age 18 and older was $12,184 in 2003 (U.S. Census Bureau, 2005).
- The median income for those who completed their education was $20,431 (U.S. Census Bureau, 2005).
- Dropouts make up a disproportionately high percentage of the nation's prison inmate population (Harlow, 2003).

Dropping out of high school is not a sudden act, but a gradual process of disengagement. Most students drop out because of significant academic challenges, lack of connection to school community, a belief that school is boring, the need to get a job, pregnancy, or the necessity to care for a family member. There are many warning signs that a student has begun the process of school disengagement. Signs may include:

- Downward spiral of grades;
- Poor attendance;
- Increase in discipline referrals;
- Lack of participation in classes; and,
- Non-adherence to school policies.

One Maryland school system conducted a survey of young adults who dropped out of school during recent years. The survey included, but was not limited to, students with disabilities and LEP students. The following chart provides concrete examples that reflect national research listed above. (For purposes of this survey, similar and repeated responses were combined.)

TABLE 6

Results of Maryland School System Survey of Recent Dropouts

Question	*Responses*
Why did you leave school?	Family conflict
	Hate school
	Medical issues
	Quicker to get GED
	Bullied by others
	Drugs
	Boy issues
	Attendance failure
	Just wanted out
	Split home
	Teachers don't like me
	Wanted to work
What kept you from succeeding in your school program?	Did not want to repeat a grade
	Pregnancy
	Need more one-on-one
	Did not try
	Did not feel comfortable
	Needed too many credits
	Hard to sit still
	No math help
	Always in trouble
What did you like about school?	Nothing
	No idea
	Helping out
	Everything
	Office staff
What courses or programs could we have offered that would have caused you to stay in school?	Smaller classes
	Shorter or later day
	Flexible schedule for medical issues
	Nothing

What are you doing now?	Vo-Tech in grade 8 Classes are not the issue Special education Accelerated diploma Free night school None Nothing GED class Trying to save money Waiting for an opening at the Bridges Program Two month waiting list for the GED program Looking for a job Going to court Working
What do you like about what you are doing now?	Being on my own Freedom Making money Finished GED Don't have to deal with the drama and immaturity Don't have to get up until 10:00 and GED class is over at 2:00 Will finish GED faster than getting a diploma Taking care of my baby Nothing

Recommendations

RECOMMENDATION

The Subcommittee recommends that the age of compulsory attendance be increased along with an earlier starting age. Compulsory attendance should begin at age 4 and end at age 18. Research is proving that early education/intervention leads to greater success.

RATIONALE

The No Child Left Behind Act of 2001 and the 2004 reauthorization of IDEA have placed new focus on educational outcomes. This focus provides Maryland with the opportunity to reexamine how education is delivered. The Maryland Report Card is providing us with annual data on the progress of children to meet these desired outcomes using existing educational frameworks. Dr. Ruby Payne, in her body of work on "Understanding and Working with Students and Adults from Poverty" (1996), strongly advocates beginning formal education at age 4. Building a solid educational and social foundation will lead to students achieving their desired post school outcomes. As stated earlier, federal and State law requires public education be available at age 3 for children with disabilities and LEP children. Because of this entitlement, children are meeting with much greater success. The opportunity to begin education earlier should be made available to all children. The additional years at the end of public education will provide the opportunity for the establishment of five-year high school programs and alternative formats for delivering instruction.

FIVE YEAR HIGH SCHOOL PROGRAMS.

An additional year of high school could be used to address some of the reasons given by students for dropping out of school in the survey discussed earlier, such as:

- Students could receive additional help in academic subjects;
- Work-study could be more easily built into student schedules beginning at an earlier age;
- Additional time would be available to meet graduation requirements, including the High School Assessments.

ALTERNATIVE FORMATS FOR THE DELIVERY OF INSTRUCTION.

Alternative formats for instructional delivery may enable students to complete their education. For example:

- Schedules may use part-time day classes;
- Schedules may combine part-time day classes in combination with night school;
- Schedules could include work study and technical and/or post-secondary education.

The increased age of compulsory attendance would allow LEP students to enroll at an older age. Many families immigrating have children ages 16 and older. Too often they are discouraged from enrolling because of their age and lack of prior schooling.

Students could be provided with activities that demonstrate the importance of their coursework, such as internships and cooperative education opportunities.

Appendix A: Maryland Report Card Definitions

From http://mdreportcard.org

Special Education Program Participants: The number and percentage of special education program participants—students with disabilities who have current Individualized Education Plans (IEPs).

Limited English Proficient (LEP) Program Participants: LEP students have a primary or home language other than English and have been assessed as having limited or no ability to understand, speak, read, or write English.

Graduation Rate: The percentage of students who receive a Maryland high school diploma during the reported school year. This is an estimated cohort group. It is calculated by dividing the number of high school graduates by the sum of the dropouts for grades 9 through 12, respectively, in consecutive years, plus the number of high school graduates.

Dropout Rate: The percentage of students dropping out of school in grades 9 through 12 in a singular year.

The number and percentage of students who leave school for any reason, except death, before graduation or completion of a Maryland-approved educational program, and who are not known to enroll in another school or State-approved program during the current school year. The year is defined as July through June and includes students dropping out over the summer and students dropping out of evening high school and other alternative programs. The dropout rate is computed by dividing the number of dropouts by the total number of students in grades 9–12 served by the school.

Note—Students who re-enter school during the same year in which they dropped out of school are not counted as dropouts.

Appendix B: Maryland Longitudinal Transition Study, Wave 1, Components 1 and 2, Final Report Summary, April 13, 2004

BACKGROUND

As part of a comprehensive longitudinal research related to the Individuals with Disabilities Education Act (IDEA), the National Longitudinal Transition Study (NLTS2) is being conducted by SRI International. SRI is conducting this study under contract with the U.S. Department of Education. Baltimore City, Baltimore County, and Allegany County students and their families are taking part in the study. OSEP asked that states be offered the opportunity to augment the sample of students selected for the NLTS2 with additional students to conduct a state-level companion study. The Maryland State Department of Education elected to participate and is conducting the Maryland Longitudinal Transition Study (MD LTS). 1,200 students, their parents/guardians, teachers, and school administrators from 9 local school systems are participating in the Maryland Longitudinal Transition Study (MD LTS). These students were ages 13 through 16 on December 1, 2000. The sample includes enough youth in the following disability categories to report findings for them separately: learning disabilities, speech/language impairments, mental retardation, emotional disturbance, other health impairments, autism and multiple disabilities.

The framework of the MD LTS is the same as the NLTS2. There are to be 5 components within this wave. Component 1 of the study is a look at the characteristics of students with disabilities and their households. The demographic characteristics shall depict the diversity of the students. The second component addresses the extracurricular activities of the students. It looks at all out of school activities. Component 3 and 4 focus on the school. Component 3 summarizes findings regarding the characteristics of schools attended by secondary school-age students with disabilities. Component 4 will focus on the school programs of students, including courses taken, placements, and access to the general education curriculum. Component 5 will address student achievement in multiple domains such as: academic achievement in the general curriculum, areas of independence, and employment. Component 5 will also report on absenteeism and dropout.

The nearly 1,200 MD-LTS students represent **all** students in Maryland who were ages 13 through 16 on December 1, 2000, and receiving special education services. All of the descriptive statistics presented are weighted estimates of the population of students with disabilities. We should also be cautious when interpreting the results due to the low actual number of youth in a given group, e.g., disability category or racial/ethnic group.

The MD LTS was initiated in August 2001 and will conclude in August 2010. Maryland has now received the report for Wave 1, Components 1 and 2. This is a summary of these two reports.

WAVE 1 COMPONENT 1: INDIVIDUAL AND HOUSEHOLD CHARACTERISTICS

Component 1 addresses key questions regarding the characteristics of students with disabilities and their households. The demographic characteristics will depict the diversity of the population of students with disabilities. A detailed description of their functional abilities and their prior service histories will illustrate what students bring to their educational experiences. A thorough understanding of the characteristics of students and their households is the foundation for effective policy and practice. The data for this component was reported by parents using telephone interviews and from school data reports. Five areas are discussed in Component 1 of the MD LTS.

1. Demographic characteristics of youth with disabilities

- The distribution of youth with disabilities in the MD LTS differs from that of the nation as a whole, as represented in the NLTS2.

	NLTS2	MD LTS
Learning Disability	62%	54%
Mental Retardation	12%	8%
Speech/language Imp.	4%	9%
Emotional disturbance	11%	14%
Multiple disabilities	2%	14%

- 71 percent of youth with disabilities in the MD LTS age range were male.
- 91 percent of youth with autism were males.
- Maryland youth with disabilities represented by MD LTS differed only slightly from the general state population in terms of their racial/ethnic backgrounds. These findings are contrary to considerable evidence that "disability has long been linked to the conditions of poverty, family structure, and minority status."
- English is the predominate language.

2. Characteristics of Students' Households

- Living arrangements of students with disabilities closely mirrored those of the general population in the U.S.
- Only about half of youth with mental retardation or emotional disturbance lived in two-parent households, where as 61 to 71 percent of youth in most other categories of disabilities were living with two parents.

- Among youth with disabilities, 53 percent who lived with their parents lived in households in which another individual was reported to have a disability or special need.
- 12 percent of youth with disabilities had mothers without high school diplomas compared with 18 percent of youth in general population.
- 49 percent of youth with disabilities have private health insurance and 19 percent have government insurance.
- One in nine youth with disabilities were receiving SSI and four percent were in households receiving TANF.
- Youth with mental retardation stand out as being among the most disadvantaged.
- 15 percent of parents reported that their insurance had refused to cover some type of service needed by the youth.

3. Disability Profiles

- This data was reported by the parents, and in many cases reports of disabilities did not include the primary disability classification identified by schools.
- Parents of more then 40 percent of youth reported that they had attention deficit or attention deficit / hyperactivity disorder. Although there is much debate concerning the true prevalence of an appropriate diagnosis of these conditions, the rate at which parents perceived them as part of students' disability profile is telling and may be unaccounted for in the way school staff interact with youth with disabilities.

4. Functional Abilities

- 10 percent or fewer of youth with disabilities were reported to have difficulties in mobility, vision, or hearing.
- 25 percent of youth reported to have problems in one or more of the areas related to conversing, speaking, or understanding others.

5. Daily Living and Social Skills

- There were considerable ranges in parents' perception of students' daily living, social abilities, and strengths.
- Males were more likely to take on household responsibilities.
- Females were more likely to excel at the performing arts.

WAVE 1 COMPONENT 2: LIFE OUTSIDE THE CLASSROOM FOR YOUTH WITH DISABILITIES

Although school is a critically important learning environment for children and youth, the majority of their time is spent at home with family, interacting with peers, taking part in

extracurricular activities, pursuing individual interests or various forms of recreation. These activities provide opportunities for learning through real life experiences. The choices youth make about how they spend their time outside of school can reap important benefits or result in serious negative consequences, both of which may affect their transition to adulthood. Component 2 describes the lives of youth with disabilities in their non-school time, focusing on the following aspects of their experiences: a broad look at the use of free time, interaction with friends, participation in extracurricular activities, and employment. Analyses also explore the question of how participation in friendships, extracurricular activities, and employment relate to the level of social skills youth possessed as reported by parents.

1. **Use of Free Time**
   - The activities listed by parents were very typical of young teenagers. The activities ranged from playing on computers to hanging out to listening to music.
   - For youth with mental retardation, autism, or multiple disabilities, watching television was the most commonly named activity.
   - Using the computer was the most commonly named activity for youth with learning disabilities.

2. **Interaction with Friends**
   - 90 percent of youth with disabilities visited with friends outside of school at least once a week. (We do not know if these are friends with or without disabilities.)
   - 80 percent of youth with access to a computer used it to communicate with friends.
   - There are differences in the social activities associated with primary disability categories, which demonstrate how functional limitations can have significant effects on social interactions. Youth with learning disabilities tended to be the most socially active. Youths with autism or multiple disabilities have less frequent contacts with friends; approximately 20 percent of them had none of the interactions with friends that were investigated.

3. **Participation in Extracurricular Activities**
   - 80 percent of youth with disabilities had participated in extracurricular activities and programs through which they could explore interests, learn skills, develop friendships, and participate actively as members of their school and community.
   - Youth with learning disabilities, speech impairments, or mental retardation were the most likely to participate in volunteer activities.

4. **Employment**
   - Employment was broken into two categories: work-study and non-school related.
   - 18 percent of youth with disabilities had employment through work-study programs.
   - 48 percent of students in work-study programs received school credit but no pay.
   - 40 percent of youth with autism had work-study jobs.
   - 2/3 of all students were employed in food services, maintenance, or personal care positions.
   - 60 percent of youth with disabilities worked at 1 non-school job during a 12-month period spanning 2001 and 2002.

FISCAL NOTE #1

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 13(RES)

Analysis

The current statute (AS 41.21.026(d)) provides an exemption to disabled veterans from paying fees for overnight camping in a state park facility. SB 13 would expand the exemption from state park fees for disabled veterans to include the following additional park fees:

- Rental of public use cabins
- Use of an RV dump station
- Admission or guided tours to a visitor center or historic site
- Use of an approved boat ramp
- Day use
- Attendance to educational programs

It would cost approximately $10,000 in programming charges to the online cabin reservation system to implement the exemption from fees for disabled vets.

This legislation would result in an annual loss of revenue to the state of up to $252,000 in park user fees. This fiscal note includes $252,000 in general funds to replace the anticipated loss of revenue, to allow the same level of service in state parks to continue. If the lost fees are not replaced, the Division of Parks and Outdoor Recreation could lose approximately three park ranger positions.

It is likely some public use cabins could be vacant but not available to the public because they would be reserved by disabled vets but not used. There may be an increase in use and demand of park facilities as a result of this legislation.

A BILL

FOR AN ACT ENTITLED

"An Act providing for the waiver or reduction of certain fees and charges in state parks for disabled veterans."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 41.21.026(a) is amended to read:

(a) Notwithstanding (b) of this section **and except as provided in (d), (f), and (g) of this section**, the department may charge or collect a fee in a park unit for

(1) rental of public use cabins or other overnight lodgings;

(2) overnight use of a developed campsite;

(3) special park use permits;

(4) competitive and exclusive commercial use permits;

(5) noncompetitive and nonexclusive commercial use permits;

(6) use of a sewage holding tank dump station;

(7) admission to or guided tours of visitor centers and historic sites;

(8) use of an improved boat ramp in a park facility developed

principally for boat launching;

(9) sale of firewood;

(10) sale of merchandise for informational or educational purposes related to public use and understanding of parks, including maps, plans, and other graphic materials;

(11) use of a developed facility that has developed parking and rest rooms; and

(12) presentation or attendance at programs related to natural or cultural history, outdoor skills or education, or other topics concerned with public use, enjoyment, or understanding of parks.

* **Sec. 2.** AS 41.21.026(d) is amended to read:

(d) The department shall issue free of charge to **a** disabled **veteran** [VETERANS] of this country an annual state park developed campsite permit. The permit shall allow **the** [A] disabled veteran to use a state park developed campsite for personal recreation use without a charge or fee under (a)(2) of this section. While utilizing a developed campsite without charge under this subsection, the disabled veteran shall comply with all other statutes or regulations pertaining to the use of the developed campsite. The department shall provide a form for use by a disabled veteran when applying for a permit under this section. Not later than February 1 of each year, the department shall prepare a report on the number of permits issued to disabled veterans under this subsection during the previous calendar year and notify the legislature that the report is available.

* **Sec. 3.** AS 41.21.026(e) is amended to read:

(e) In this section,

(1) "developed campsite" means a campsite having access to the following public facilities:

(A) [(1)] restrooms;

(B) [(2)] a picnic table;

(C) [(3)] an outdoor cooking facility; and

(D) [(4)] an approved water source**;**

(2) "veteran" has the meaning given in AS 38.05.067.

* **Sec. 4.** AS 41.21.026 is amended by adding new subsections to read:

(f) The department may not charge or collect a fee under (a)(6) - (8), (11), or (12) of this section from a resident who is a disabled veteran.

(g) The department may not charge or collect a fee from a resident who is a disabled veteran for the rental of a public use cabin under (a)(1) of this section that is more than 50 percent of the fee that would be charged or collected from a person that is not a disabled veteran.

Sponsor Statement

CSSB 13(RES) – Waive Park Fees for Disabled Veterans

Alaska's veterans served our country with pride. This legislation shows a small token of our appreciation, by providing disabled veterans with free and discounted access to state park facilities.

Our parks provide all Alaskans with the opportunity to explore and recreate in Alaska's wild places. To provide these opportunities to those with disabilities, many park facilities are compliant with ADA standards. Six cabins have been modified to include features like wheelchair ramps. Two boat launches, 14 campgrounds, 10 historic sites and dozens of day use locations provide handicap accessible facilities. Regardless of disability, the system is truly open to all Alaskans.

In 1991, Alaska passed a law which created a special disabled veteran camping permit, providing disabled veterans with free camping in state park campgrounds. Senate Bill 13 extends this free benefit to boat ramps, RV facilities and day parking, and provides at least a 50 percent discount for public use cabins.

Please join me and support this meaningful piece of legislation.

CSSB 13 (RES) – Sectional Analysis

Section 1. Amends AS 41.21.026(a) to reference the exceptions in AS 41.21.026(d), (f), and (g).

Section 2. Amends AS 41.21.026(d) to refer to a veteran in the singular to conform to the amendment to AS 41.21.026(e) in sec. 3 of the bill, and to new subsections AS 41.21.026(f) and (g) that would be added by sec. 4 of the bill.

Section 3. Amends AS 41.21.026(e) by adding a definition of "veteran" for purposes of AS 41.21.026.

Section 4. Adds a new subsection, AS 41.21.026(f), to describe the fees in AS 41.21.026(a) that may not be charged or collected from a resident who is a disabled veteran.

Section 5. Adds a new subsection, AS 41.21.026(g), to describe the fee that may be charged or collected from a disabled veteran for rental of a public use cabin under AS 41.21.026(a)(1) – the fee may not be more than 50 percent of the fee that would be charged or collected from a person that is not disabled.

January 26, 2012

Explanation of Changes in CS for Senate Bill 13 (RES)

A new subsection (g) was added to SB 13 in response to concerns raised by the Department of Natural Resources. The Division of Parks testified that for public use cabin reservations, when someone cancels a reservation, they are issued a credit they can use for future reservations. The division expressed concern that with a full fee waiver, there would be no incentive for a veteran to cancel a reservation and this would tie up a cabin that could be used by someone else.

Sec. 41.21.026(g) was added to provide a discounted fee for a disabled veteran for rental of a public use cabin. Under subsection (g), the fee that may be charged or collected from a disabled veteran for rental of a public use cabin may not be more than 50 percent of the fee that would be charged or collected from a person that is not a disabled veteran.

In regard to the addition of subsection (g), conforming amendments were made to Sec. 41.21.026(a) and Sec. 4, subsection (f).

ADA Facilities

This listing is alphabetized by facility type, such as trails, cabins or campgrounds. The Alaska State Parks Statewide Brochure has facilities listed by town with a notation marking facilities with accessible features. Click here for the statewide brochure.

If a park or cabin is underlined, click on the name for more information on that park or cabin. Click on the town name for park location and other facilities, as shown in the statewide brochure pages.

For more detailed information, visit the State's ADA Coordinator's Office ADA Parks Accessibility Survey 2002.

Disclaimer: Accessibility standards change over time as guidelines are being developed. When a facility is built or remodeled, it meets guidelines current at the time of construction. Although access issues are addressed, some persons with particular disabilities may have difficulty with, for example, the signing, window latches or stoves. It is recommended that the disabled park visitor bring along a fully able companion on his or her first visit to a park facility in case of difficulties or problems. Solo trips can be taken later, knowing the facility and terrain. If anyone using facilities listed here encounters difficulties not mentioned, please contact local park staff or email: dnr.pksweb@alaska.gov Suggestions and comments are welcomed.

Related Sites

Boat Launches

- Kenai River Special Management Area - Cooper Landing Boat Launch, near Sterling
  A 250 foot boardwalk connects parking, toilets and the boat ramp. The boardwalk has a maximum gradient of 5%. There are also viewing areas and interpretive displays. Pressurized water is available.
- Kenai River Special Management Area - The Pillars Boat Launch, near Kenai
  Accessible dock with a less than 5% gradient to it. Dock is only for boat exit/entry - no fishing allowed from dock. There is paved parking with easy access to viewing deck with interpretive displays. Pressurized water is available.

Cabins

- Chena River State Recreation Area - Chena River Cabin, near Fairbanks with road access
  There is a ramp up to the porch and a ramp from the cabin to the latrine. North Fork Cabin, in the same park, also has road access, but is not fully accessible.
- Chena River State Recreation Area - Twin Bears Camp, near Fairbanks with road access
  This facility has 12 rustic cabins, mess hall and recreation hall. It can be rented by an individuals or group. Ramps exist between three cabins, mess hall, recreation hall and main latrine.
- Chugach State Park State Park - Yuditnu Cabin, near Anchorage
  The cabin is accessible, but the latrine is not. Therefore, help may be needed when

using the latrine. The trail to access the cabin is an old road. Motorized access is allowed, by snowmachines in the winter (all week) and ATVs in the summer (Sunday thru Wednesday only). Bicycles are also allowed (all week).

- Kachemak Bay State Park - Halibut Cove Lagoon East Cabin, remote park near Homer
  Cabin and latrine are along a boardwalk with a maximum gradient of 5%. Assistance may be needed on the ramp from the dock to the cabin boardwalk system. At low tide, the ramp is very steep.
- Shoup Bay State Marine Park - Kittiwake Cabin, remote park near Valdez
  Recommend inner lagoon drop off. Assistance may be needed from boat to hard-pack gravel trail. Click on park name above for more information.
- Thumb Cove State Marine Park - Spruce Glacier Cabin, remote park near Seward
  Assistance may be needed from the beach to boardwalk system. Boardwalk extends from fire ring on beach to the cabin and latrine.

Return to top of page

Fishing Access

- Buskin River State Recreation Site, near Kodiak
  Accessible fishing platform at river's edge. Parking and trail to platform is paved.
- Chugach State Park - Bird Creek, near Anchorage
  Fishing is from a pier over the river. Best to use at high tide. At low tide, the water is beyond the pier. Paved access to the pier.
- Crooked Creek State Recreation Site, near Soldotna
  May need assistance getting to and from the river due to a steep grade.
- Deep Creek State Recreation Area - Deep Creek North Campground, near Homer
  Trail is gravel path to river, may need assistance. Parking and viewing area with interpretive displays is paved.
- Matanuska Lakes State Recreation Area (formerly Kepler-Bradley Lake State Recreation Area) - Matanuska Lake, near Palmer
  Trail to accessible fishing dock is a 500 foot gravel path with a 8.3% maximum gradient and handrails.
- Kenai River Special Management Area - Bings Landing Campground, near Sterling
  Accessible boardwalk along river.
- Quartz Lake State Recreation Area, near Delta Junction
  At Quartz Lake Campground, gravel trail with less then 5% grade to accessible fishing dock. At Lost Lake Campground, gravel trail with less then 5% grade to accessible boat/fishing dock.

Return to top of page

Historic Sites

- Baranof Castle State Historic Site, near Sitka
  An accessible, 700 foot, concrete sidewalk with handrails leads from the street level to interpretive displays and viewpoint at the top of Castle Hill. The maximum gradient is 8.3% and the elevation gain is 40 feet.
- Big Delta State Historical Park, near Delta Junction
  The visitor center, called Rika's Roadhouse, has accessible ramp. Trails are hard-pack gravel with interpretive sites. Pressurized water is available.
- Denali State Park - Alaska Veteran's Memorial, near Trapper Creek
  Parking, trails, picnic sites, interpretive shelter and the memorial are paved with a less than 5 % slope. Pressurized water is available.
- Fort Abercrombie State Historical Park, near Kodiak
  Kodiak Military History Museum are accessible.
- Independence Mine State Historical Park, near Palmer
  Visitor Center is accessible by ramp. Parking, nearby trails and interpretive site with

spotting scopes are paved.

- Old Sitka State Historic Park, near Sitka
  Trails are hard-pack gravel, with sections of boardwalk. Approximately 100 feet of trail has a 14% gradient. The rest of the trail has a gradient of 12% or less. Parking is paved.
- Petroglyph Beach State Historic Site, in Wrangell
  An accessible boardwalk leads to a viewing deck and interpretive displays overlooking Petroglyph Beach. The boardwalk has a maximum gradient of 8.3% and is approximately 220 feet.
- Potter Section House State Historical Site, near Anchorage
  Trails around the house are paved. Nearby viewing deck and boardwalk has a 8% maximum gradient. The house itself is park office space and not open to the public.
- Totem Bight State Historical Park, near Ketchikan
  The trails are hard-pack gravel - may need assistance on steep portions. Buildings are accessible.
- Wickersham State Historic Site, in Juneau
  The Wickersham House Museum is accessible.

Return to top of page

Picnic Shelters

- Anchor River State Recreation Area - Slidehole Campground, near Homer
  Pressurized water.
- Big Lake North State Recreation Site, near Wasilla
  Paved parking, gravel path.
- Captain Cook State Recreation Area - Stormy Lake Day Use, near Kenai
- Chena River State Recreation Area - Red Squirrel Campground, near Fairbanks
  Paved parking, gravel path.
- Chena River State Recreation Site, in Fairbanks
- Chugach State Park - Eklutna Lake Campground, near Anchorage
- Clam Gulch State Recreation Area, near Soldotna
- Delta State Recreation Site, near Delta Junction
  Pressurized water is available.
- Fort Abercrombie State Historical Park, near Kodiak
- Harding Lake State Recreation Area, near Fairbanks
- Johnson Lake State Recreation Area, near Soldotna
- Kenai River Special Management Area - Bings Landing Campground, near Sterling
- Lake Louise State Recreation Area, near Glennallen
- Lower Chatanika River State Recreation Area, near Fairbanks
- Ninilchik State Recreation Area - Ninilchik River Campground, near Homer
- Quartz Lake State Recreation Area - Quartz Lake Campground, near Delta Junction
- Settlers Cove State Recreation Site, near Ketchikan
- Tok River State Recreation Site, near Tok

Restrooms

Most restrooms facilities in state parks are pit latrines. Those that are accessible are shown in the statewide brochure pages mentioned at the top of the page. A small number of facilities have flush toilets and are listed here. If the facility is listed elsewhere on this page, flush toilets are mentioned there as well.

- Chena River State Recreation Site, in Fairbanks
- Chugach State Park - Eagle River Campground, near Anchorage
  Flush toilets in overflow area only.

Return to top of page

Trailheads and Trails

- Chilkat Bald Eagle Preserve, near Haines
  1.75 mile trail of pavement and boardwalk for viewing eagles along the Chilkat River.
- Chugach State Park - Bird Creek to Indian Bike Trail, near Anchorage
  A paved trail starts at Indian Creek at mile 103.0 of the Seward Highway and goes east along Turnagain Arm to Bird Creek Campground and beyond to mile 99.2 of the Seward Highway. Grade exceeds 5% in the Bird Creek area. The trail is eight feet wide with no shoulder.
- Chugach State Park - Bird Point to Girdwood Bike Path, near Anchorage
  The trail is the Old Seward Highway between Bird Point and Girdwood, and is now a paved, multi use path for pedestrians, bicycles and other non-motorized use. It starts at Mile 96.1 of the Seward Highway (Bird Point) and ends at mile 90.1, near the Girdwood turnoff, with a total length of six miles. The typical width is 10 feet with wide unpaved shoulders for runners. Twice, the path exceeds a 5% gradient with a maximum of 7%: for 800 feet at 0.2 miles east of Bird Point, and for 500 feet at 3 miles, halfway between Bird Point and Girdwood. Where the gradient exceeds 5%, the paved width is 12 feet. Restrooms and picnic shelters are at approximately one mile east of Bird Point, and two miles west of Girdwood.
- Chugach State Park - Bird Ridge Trailhead, near Anchorage
  Lower section of trail is paved, a distance of approximately 0.3 miles. Viewing areas at either end of pavement, with accessible restrooms at the upper end. Average gradient is 4.7% with the entire trail less than 8%. There is no cross slope and the trail width is 4.74 feet/1.4 meters. Elevation gain is 66 feet. Parking is paved. Upper section of trail is steep and unimproved. This trail has a trail guide with Universal Access Information. Request one from the DNR Public Information Center.
- Chugach State Park - Eagle River Nature Center, near Anchorage
  The center itself is accessible. Surrounding area and trails are hard-pack gravel. Beginning section of trail has a long, 8% maximum gradient. Parking is paved
- Chugach State Park - Eklutna Lake, near Anchorage
  The Lakeside Trail is an old, gravel road bed, with some large ruts and rocks. Sections have been rebuilt due to damage from the lake and have a steep gradient. ATVs (Sunday thru Wednesday only) and bicycles (all week) use the trail.
- Chugach State Park - Potter Creek Interpretive Trail, near Anchorage
  Paved parking, with interpretive panels and spotting scope. The first 220 feet of this 0.46 mile trail is paved, with accessible restrooms at the end. The 5.3% is the maximum gradient for this section. The trail continues from there as hard-pack gravel and has a greater than 8% gradient, with 17% maximum gradient. There is no cross slope and the trail width is 5 feet/1.5 meters. Elevation gain is 240 feet. Trail connects to the unimproved Turnagain Arm Trail. This trail has a trail guide with Universal Access Information. Request one from the DNR Public Information Center.
- Denali State Park - Alaska Veteran's Memorial, near Trapper Creek
  Trails are paved throughout the Memorial.
- Denali State Park - Denali View North, near Trapper Creek
  Approximately 1200 feet of paved trail with interpretive panels.
- Independence Mine State Historical Park, near Palmer
  Visitor Center is accessible by ramp. Trails to the center core of the mine compound are paved with less than 5% gradient. Trail to the mine portal is paved with a 15% gradient. Other trails are hard-pack gravel.
- Matanuska Lakes State Recreation Area (formerly Kepler-Bradley Lake State Recreation Area) - Matanuska Lake, near Palmer
  Trails are hard-pack gravel.
- Lake Louise State Recreation Area, near Glennallen
  Trail is hard-pack gravel.
- Old Sitka State Historic Park, near Sitka
  Trails are hard-pack gravel, with sections of boardwalk. Approximately 100 feet of trail has a 14% gradient. The rest of the trail has a gradient of 12% or less. Parking is paved.
- Settlers Cove State Recreation Site, near Ketchikan
  A short portion of the trail is accessible for approximately 200 yards to the Lunch Creek Bridge.
- Totem Bight State Historical Park, near Ketchikan
  The trails are hard-pack gravel - may need assistance on steep portions. Buildings are accessible.

- Willow Creek State Recreation Area - Willow Creek Campground, near Wasilla
  Trail is hard-pack gravel down to the river.

Viewpoints

- Chugach State Park - Beluga Point, near Anchorage
  At Mile 110.5 of the Seward Highway along Turnagain Arm. Paved parking, spotting scopes, interpretive panels.
- Chugach State Park - Bird Point, near Anchorage
  At Mile 95 of the Seward Highway along Turnagain Arm. Paved parking, spotting scopes, interpretive panels, accessible restrooms.
- Chugach State Park - Glen Alps, near Anchorage
  On the Hillside, off Upper Huffman. Paved and hard-packed gravel trails leads to viewpoint on hill that overlooks Anchorage, Cook Inlet and the Alaska Range. Accessible restrooms.
- Denali State Park - Denali View North, near Trapper Creek
  At Mile 162.7 of the Parks Highway. Paved parking and approximately 1200 feet of paved trail with interpretive panels. Accessible restrooms
- Denali State Park - Denali View South, near Trapper Creek
  At Mile 135.2 of the Parks Highway. Paved parking, interpretive panels, accessible restrooms.

Visitor Centers

- Big Delta State Historical Park, near Delta Junction
  The visitor center, called Rika's Roadhouse, has a ramp. Trails are hard-pack gravel with interpretive sites. Pressurized water is available.
- Chugach State Park - Eagle River Nature Center, near Anchorage
  The center is accessible. Parking is paved. Surrounding grounds and trails are hard-pack gravel. Beginning section of trail has 8% maximum gradient.
- Independence Mine State Historical Park, near Palmer
  Visitor Center has a ramp. Trails to the center core of the mine compound are paved with less than 5% gradient. Trail to the mine portal is paved with a 15% gradient. Other trails are hard-pack gravel.

Disabled Veteran's Annual Camping Pass

The legislature granted Disabled Alaskan Veterans (DAV) the right to receive one Alaska State Park Camping Pass free of charge. The DAV Camping Pass, which is valid in all developed Alaska State Park campgrounds, is good for two years. There is no DAV pass for boat launch or day use, nor can the DAV camping pass be used to purchase a boat launch or day use pass as the second pass at the discount rate.

To receive a free DAV camping pass, an eligible disabled veteran must present proof of a **service connected disability and Alaska residency** at either the Anchorage or Fairbanks DNR Public Information Centers (see below). Alaskan resident is defined as a person who is physically present in the state with the intent to remain indefinitely and to make a home in the state, has maintained the person's domicile in the state for the 12 consecutive months prior to requesting the issuance of a Disabled Alaska Veteran (DAV) camping pass, is not claiming residency in another state, territory or country, and is not obtaining benefits under claim of residency in another state, territory or country. Proof of residency can be in the form of an Alaskan Driver's License, Alaska Sport Fishing or hunting License, Alaska Voters Registration Card, or other documentation suitable to the department that proves Alaska residency.

Evidence of service connected disability can be provided by the presentation of a Veteran's Administration Patient Data Card (red, white, and blue) imprinted with "service connected disability" under the photo identification, or a current year letter from the US Department of Veteran's Affairs, which states the person has a service-connected disability and is signed by the Veteran Services Officer. Other types of VA cards exist, but cannot be accepted as proof of disability. Information on obtaining either the card or the letter can be found through the local Veteran's Administration office or calling 1-800-827-1000. Please note: A Veterans Universal Access Identification card with the veteran's social security number and birth date printed on the card will no longer be accepted, in compliance with the Personal Information Protection Act which passed the Alaska Legislature in 2008. .

The Disabled Alaska Veteran camping pass is non-transferable. If the qualified DAV's vehicle is sold, the decal must be removed. Or, if the windshield is broken and must be replaced, the individual is requested to scrape as much of the decal off as possible and return the remains to any area office. In either of these cases, a replacement decal will be issued for $10 upon receipt of the removed decal. If the decal is lost or if no remains of a previous decal can be produced, and the DNR has record of the owner's previous issuance of the DAV decal, a one-time replacement decal may be purchased for $100.

For further information, please contact the Anchorage or Fairbanks Public Information Center.

FISCAL NOTE #2

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSSB 15(HSS)

Analysis

SB 15 raises one level the severity of offenses for providing alcohol to persons under 21 years of age if the offender is a sex offender or child kidnapper. For example, a nonlicensee who furnishes alcohol to a person under 21 years of age commits a class A misdemeanor for a first offense. SB 15 would make this offense a class C felony if the offender was a sex offender or child kidnapper.

This would have an indeterminate fiscal impact on the Department of Law. Any time an offense is raised from a misdemeanor to a felony there is an impact. Felony prosecutions require more time – for example, a felony requires a grand jury indictment and a jury of 12 persons.

Senator Kevin Meyer

Senate District O

SPONSOR STATEMENT FOR CSSB 15 (JUD)

"An Act relating to penalties for certain alcohol offenses involving persons under 21 years of age committed by a sex offender or a child kidnapper."

Senate Bill 15 increases penalties on a registered sex offender or child kidnapper providing alcohol for individuals under 21 years of age.

If SB 15 is enacted, penalties will increase as follows:

- A Violation to a Class B Misdemeanor
- A Class A Misdemeanor to a Class C Felony
- A Class C Felony to a Class B Felony

According to the Anchorage Police Department, alcohol is involved in over 51.2% of sexual assaults reported in Anchorage between 2006 and 2007. Almost a fourth of those sexual assaults were perpetrated against victims between the ages of 15 and 19. Law enforcement and social service agencies all recognize a strong pattern in the use of drugs and alcohol as a "grooming" tool in an attempt to lure young people into sexual activity.

Dear Senator Meyer:

On behalf of our respective organizations, we would like to thank you for introducing SB 15, an Act relating to penalties for certain alcohol offenses involving persons under 21 years of age committed by a sex offender or child kidnapper.

We met recently to review proposed legislation and decided to unanimously support this bill.

Again, thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515 if there is anything our organizations can do to assist in the passage of this bill.

Sincerely,

John Lucking Jr., President

Re: SB 15 – Alcohol Offenses Committed by Sex Offenders, Child Kidnappers

Dear Senator Meyer,

On behalf of the Advisory Board on Alcoholism and Drug Abuse, I would like to express our support for your efforts to protect children and youth from falling victim to sexual exploitation, trafficking, and kidnapping. While there is no specific data reflecting how often a young person gains access to alcohol through a convicted sex offender or child kidnapper, there is data that shows that young people gain access to alcohol at least one third of the time from adults or friends.

The Center for Behavioral Health Statistics and Quality reported in February 2011 that, between 2006 and 2009, 93.4% of the 709,000 adolescents aged 12-14 who reported drinking alcohol gained access to the alcohol — for free — from other people. Of those, 13.5% were given the alcohol by an unrelated adult. In Alaska, 34.7% of traditional high schools students participating in the 2009 Youth Risk Behavior Survey reported that they had used alcohol in the past thirty days and that they got that alcohol from someone else. While we don't know who provided that alcohol, or whether they were a convicted sex offender or child kidnapper, we do know there is connection between providing alcohol to minors and victimization.

Recent new coverage of sexual exploitation of young Alaskan women by Channel 2, KTUU news highlighted the role of drugs and alcohol in this form of victimization. Young people are often ensnared in human trafficking and sexual exploitation through the provision of drugs and alcohol, among other "grooming" efforts. By creating an aggravating factor to target individuals who use alcohol to coerce, induce, or otherwise attempt to engage a young person in sexual activity will help to address this problem.

Given the traumatic and potentially lifelong harm that can result from situations in when predators use alcohol (and other drugs) to prey upon young people, SB 15 provides a balanced approach to increasing the penalty for individuals who engage in this sort of victimization and exploitation. We appreciate your efforts on behalf our most vulnerable youth.

Sincerely,

J. Kate Burkhart
Executive Director

Why this fiscal note differs from previous version

Initial version of fiscal note did not show fiscal impact. This version shows fiscal impact of bill but does not request funding.

Prepared by: Shane Miller, Finance Manager — Phone 465-6626
Division: Administrative Services Division — Date/Time 3/7/11 11:22 AM
Approved by: Pamela Varni, Executive Director — Date 3/7/2011
Legislative Affairs Agency

(Revised 12/29/2010 OMB)

Analysis

CSSB 18 increases the number of days of the 2nd regular session of a Legislature from 90 days to 120 days, beginning with the second session of the 27th Legislature which convenes in January 2012.

When the session was reduced from 120 to 90 days, the cost savings were redesignated into the special session contingency account in the event that reducing the number of session days resulted in more or longer special sessions. It is the intent of the Senate Finance Committee that the cost of adding 30 additional days to the legislative session be included in this fiscal note and the special session contingency account will pay for these additional session days. No increment appropriation is requested by this fiscal note.

The increased cost of session per diem for the additional 30 days is approximately $413.0.

Session per diem cost would increase per the formulas below:

57 Non-Juneau Legislators * $232/day * 30 days =	$397.0
3 Juneau Legislators * $174/day * 30 days =	$16.0
Total:	$413.0

CS FOR SENATE BILL NO. 18(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR STEVENS

A BILL

FOR AN ACT ENTITLED

"An Act relating to the convening and duration of regular sessions of the legislature; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 24.05.090 is amended to read:

Sec. 24.05.090. Duration of legislature; sessions. [THE LEGISLATURE SHALL CONVENE AT THE CAPITAL EACH YEAR ON THE THIRD TUESDAY IN JANUARY AT 1:00 p.m.] Each legislature has a duration of two years and consists of a "First Regular Session" that meets in the odd-numbered years, and a "Second Regular Session" that meets in the even-numbered years, and any special session that the governor or legislature calls. **The legislature shall convene a First Regular Session at the capital on the third Tuesday in January at 1:00 p.m. and shall convene a Second Regular Session at the capital on the second Tuesday in January at 1:00 p.m.**

*** Sec. 2.** AS 24.05.150(b) is amended to read:

(b) The legislature shall adjourn from a **first** regular session within 90 consecutive calendar days, including the day the legislature first convenes in that [REGULAR] session. **The legislature shall adjourn from a second regular session within 120 consecutive calendar days, including the day the legislature first convenes in that session.**

* **Sec. 3.** AS 24.05.150 is amended by adding a new subsection to read:

(c) Notwithstanding (b) of this section, the legislature may extend a first or second regular session once for up to 10 consecutive calendar days. An extension of the regular session requires the affirmative vote of at least two-thirds of the membership of each house.

* **Sec. 4.** Sections 1 and 2 of this Act take effect January 1, 2014.

* **Sec. 5.** Section 3 of this Act takes effect immediately under AS 01.10.070(c).

SPONSOR STATEMENT
Senate Bill 18

Senate Bill 18 strikes a compromise by maintaining a 90-day first session, and a 120-day second session during each Alaska Legislature.

In the Fall of 2006, Alaskan voters narrowly passed ballot measure #1 to limit legislative sessions to 90 days. The Legislature has since worked under a 90-day session for 4 sessions. We've tried it. However, the best interests of Alaskans are not being served, nor are the arguments supporting passage of the ballot measure being proven true.

The most compelling argument in favor of shortening the session was the notion it would save money by reducing the cost of government. Obviously the costs of having regular legislative sessions have been reduced. However, the overall annual costs of the legislature have actually increased. Legislative salaries are still paid out, paper and copy costs accrue for more interim committee meetings, and legislator travel expenses accrue throughout the year, not just during session. There has not been a significant cost savings, if any, by reducing legislative sessions to 90 days.

It's very common to look at what other states are doing and to embrace or dismiss their policies depending on what side of an issue a person stands. Comparatively, Alaska is in the middle of the road on this issue and SB 18 would move us even closer to the middle.

There's also the idea that less time in Juneau means less time away from the home district, away from family, and normal interim activities (private sector work, etc), and thus greater "competition" among candidates who will have more incentive to run for office. Unfortunately there has been a steady decline in the total number of candidates running for state office since 2000, with the 2008 & 2010 election seasons showing the lowest number of candidates in a primary since 1998.

The bottom line is, the roughly $50 million spent on administering the Legislative ("Peoples') Branch of government, the watchdog of the Executive Branch, is a drop in the bucket compared to the $10 *billion* being spent by the executive agencies. And while the legislature respects and acknowledges the initiative process in Alaska, particularly the 90-day session vote in 2006, it is within the confines of Alaska's Constitution to resume a 120-day legislative session, at least partially as SB 18 proposes, to balance the power structure of Alaska's state government, and better serve the public.

Thank you for your support of this important issue.

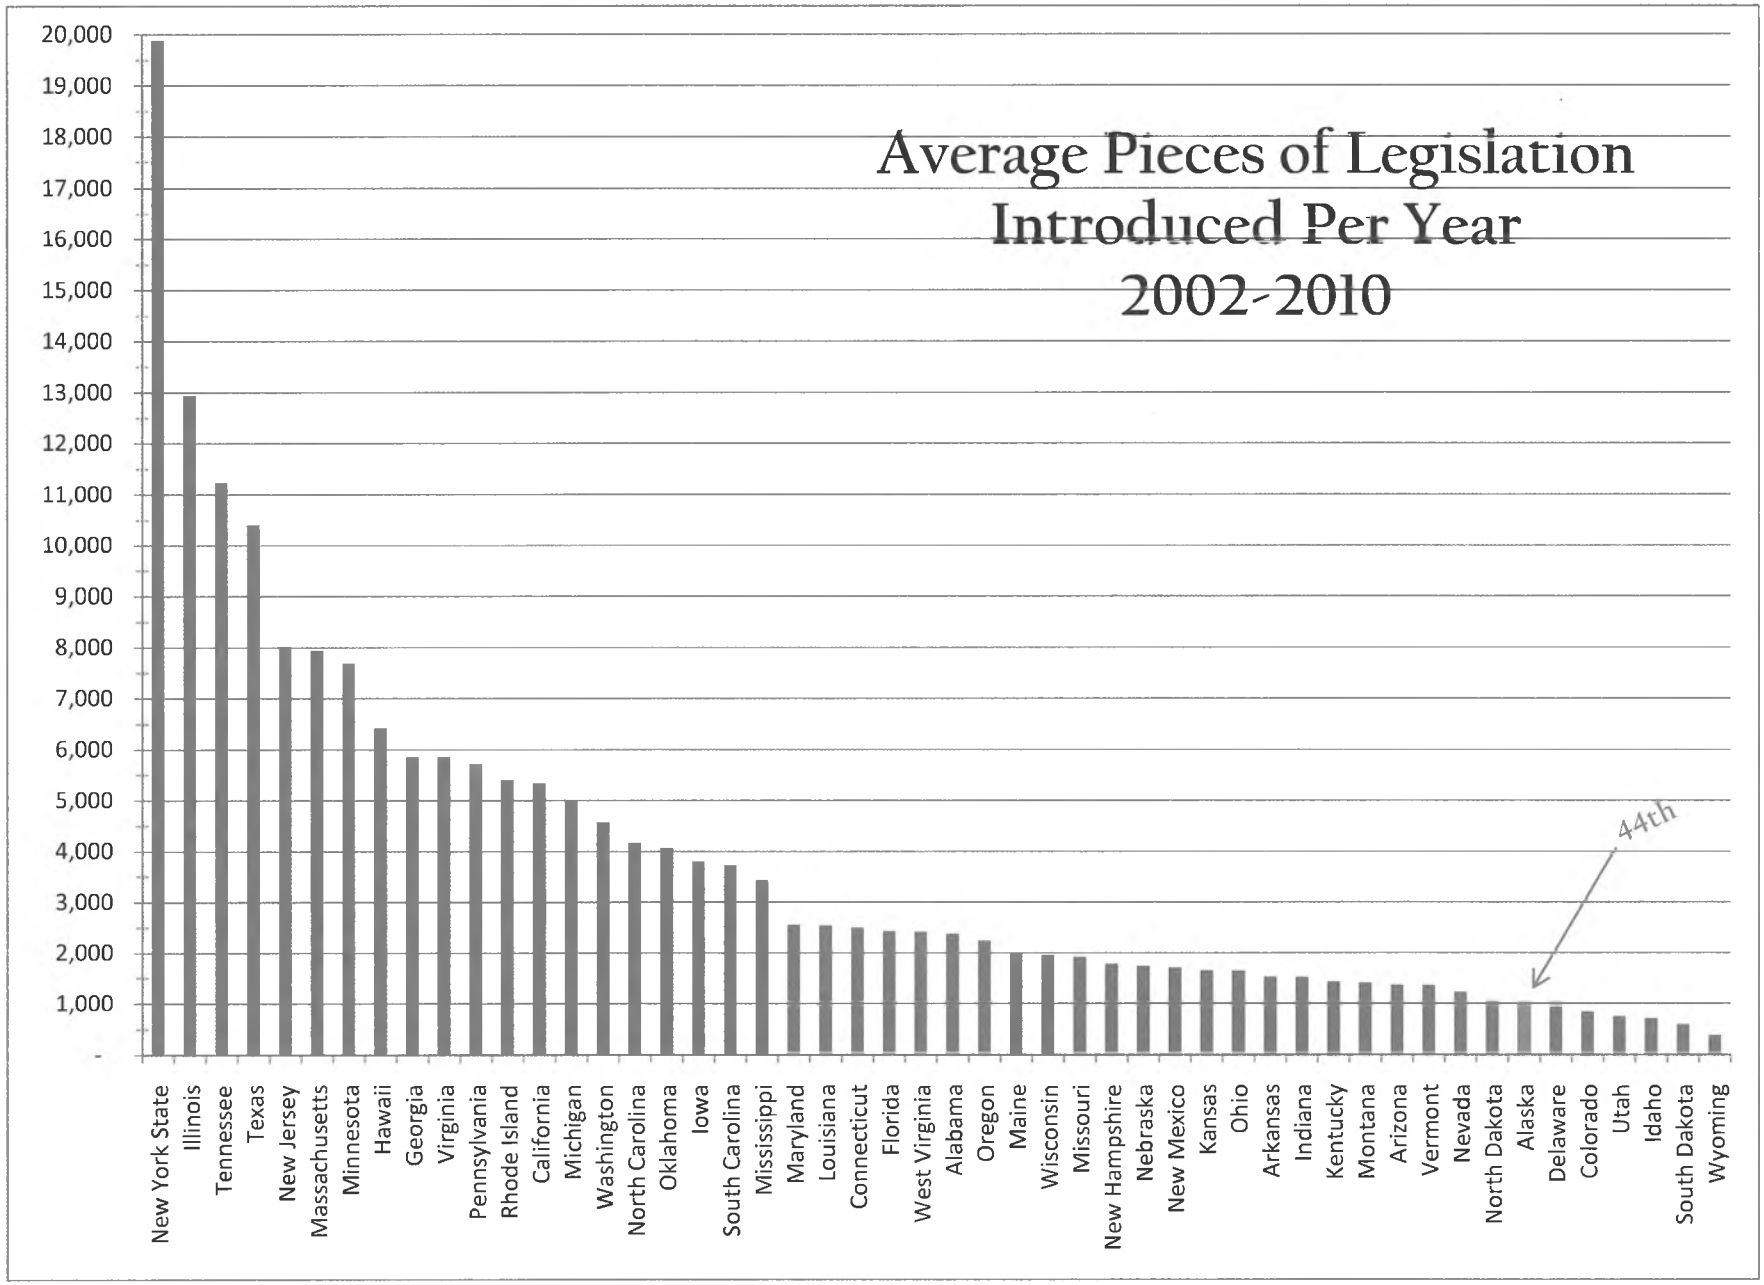
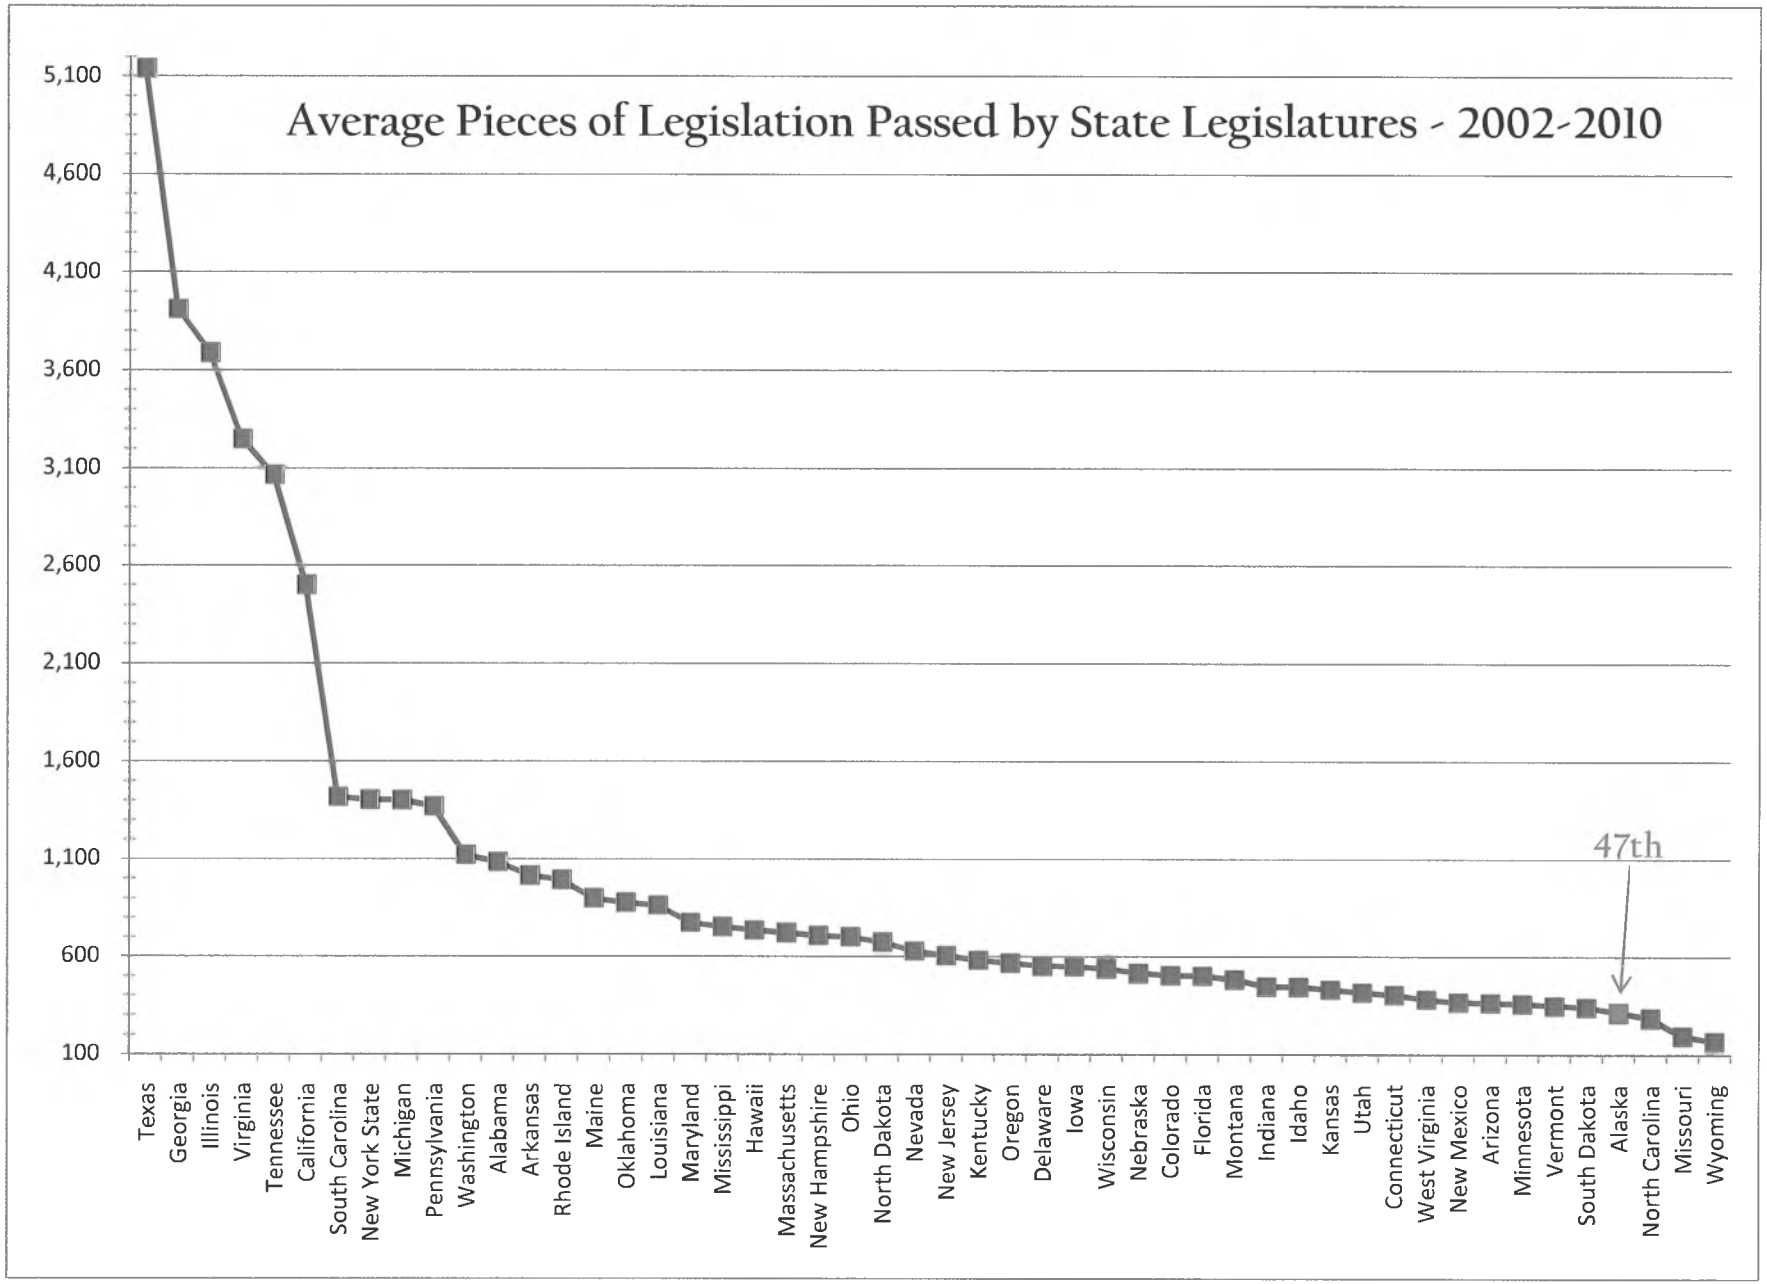
SECTIONAL ANALYSIS
Senate Bill 18
CS (STA) Version "I"



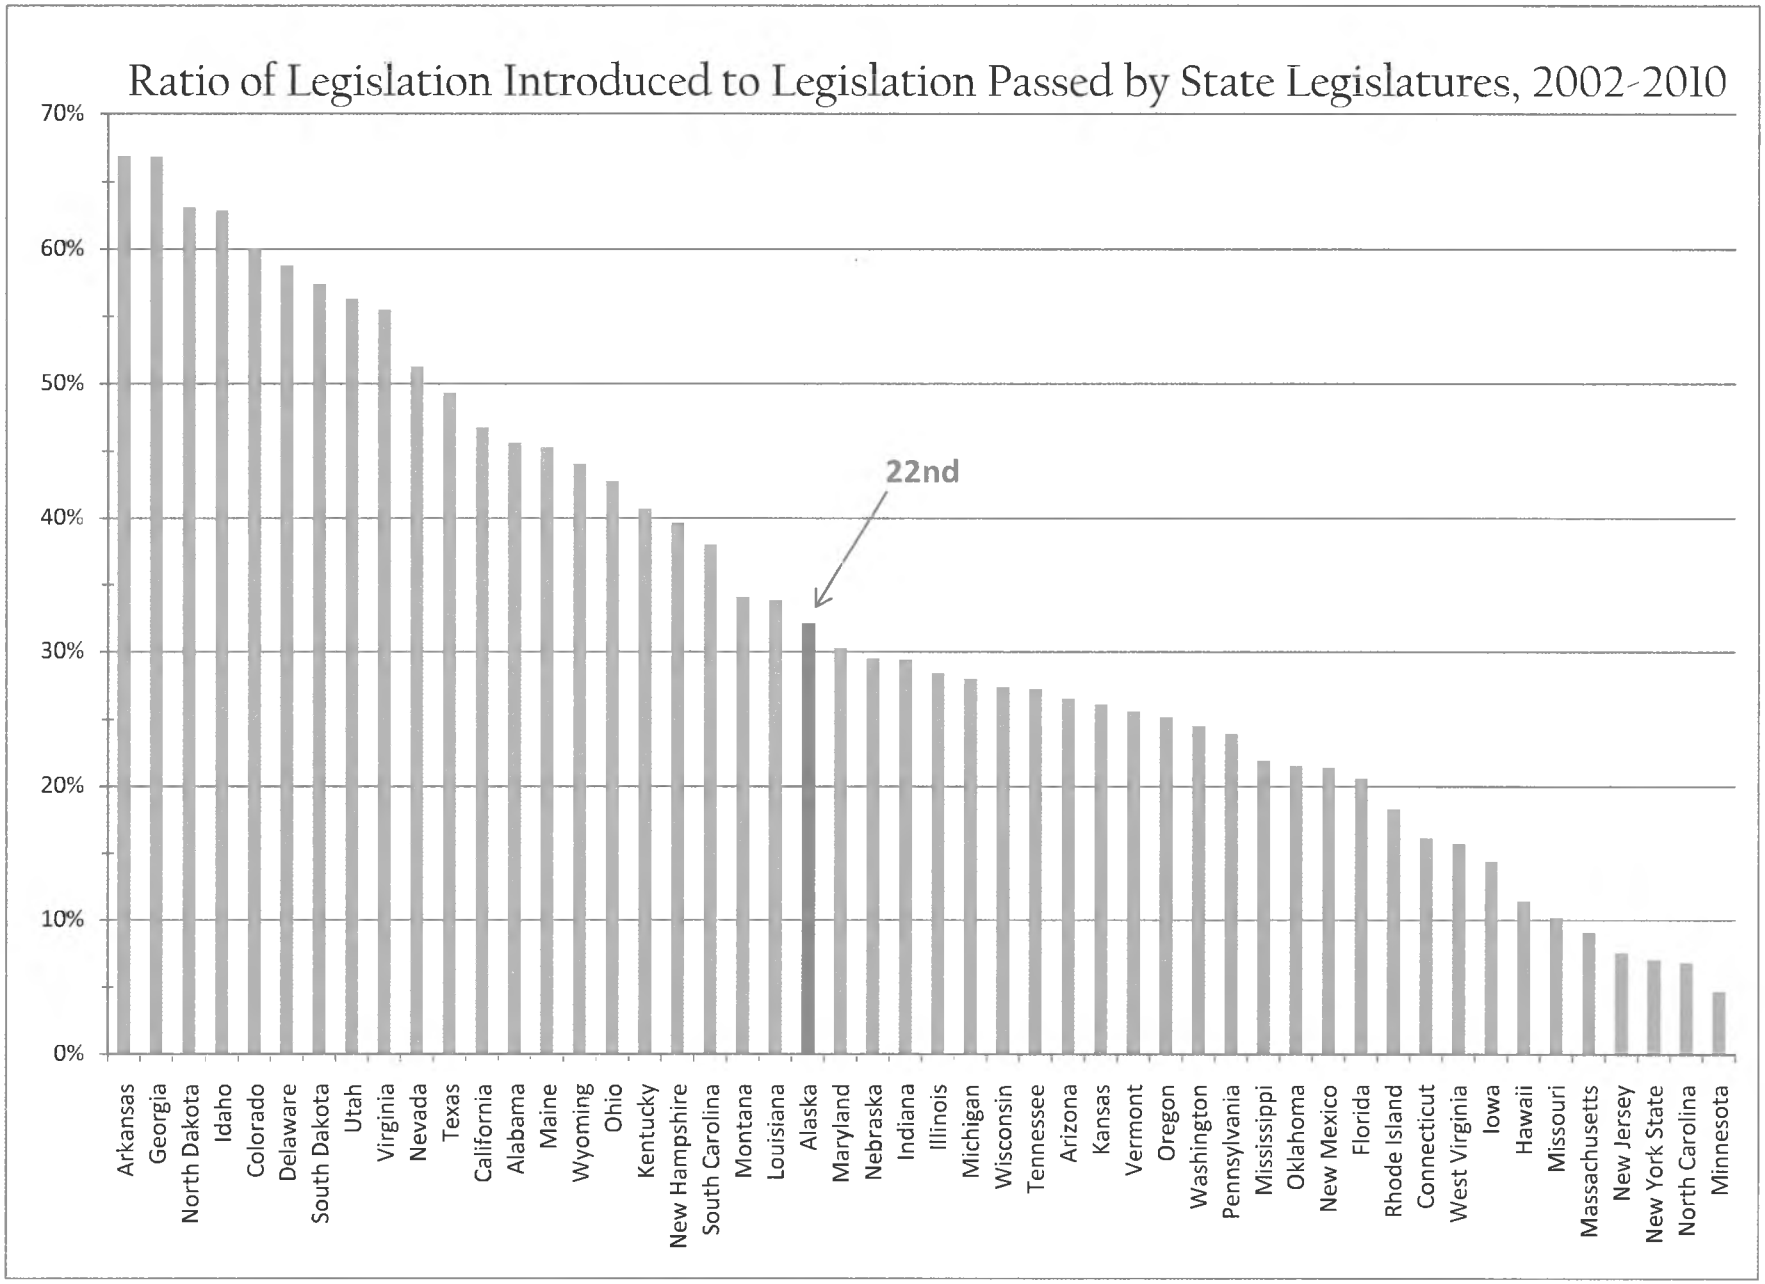
SECTION 1: AS 24.05.090
Establishes that during even-numbered years and a 120-day session, the legislature will convene on the second Tuesday in January. During odd-numbered years and a 90-day session, the legislature will convene on the third Tuesday of January.

SECTION 2: AS 24.05.150(b)
Establishes that the legislature shall adjourn its first regular session within 90 calendar days and its second regular session within 120 calendar days from the time it convenes.



SECTION 3: AS 24.05.150 (c)
Adds a new subsection (c) that reiterates Article 2, Section 8 of the Alaska State Constitution, providing for a 10-day extension of a regular session if made by an affirmative vote of two-thirds of the membership of each house.

SECTION 4:
Establishes the effective date of Sections 1 and 2 of the bill to be January 1, 2012.



SECTION 5:
Establishes an immediate effective date of Section 3 of the bill.

Poor turnout: Scheduling conflicts left Alaskans unheard in Juneau

03.03.11 - 07:32 pm
Editorial

Once every legislative session, for about a week, the Alaska Legislature almost guarantees it won't been seen in a good light by Alaskans. That's because, during that week, they're not seen much at all.

Almost half the Legislature went to Washington, D.C., this week for the annual Energy Council meeting. The council is a loosely organized association of legislators from energy-producing states and Canadian provinces. They all get together to hear presentations about trends in the energy business. Some Alaska legislators also use the trip to Washington, D.C., to visit other officials and share viewpoints on various issue.

Even if the Energy Council meeting seems a bit over-attended, legislators can legitimately defend its educational value. And, while travel and expenses for last year's trip set the state back almost $50,000, it's not a terribly expensive educational seminar.

However, legislators do themselves no favors when they allow the trip to interfere with the business back home. That's what happened Wednesday. The House Finance Committee scheduled a full afternoon of public testimony from specific communities around the state, including Fairbanks. But only a handful of legislators were there to listen. The rest either were in D.C. or didn't attend for some other reason.

That's unfortunate. When a committee schedules a hearing to invite testimony from specific areas, it should do so at a time when more than a skeleton crew of legislators can attend. Skipping out makes for bad public relations, if nothing else.

Of course, this is a two-way street. Alaskans should take opportunities to attend such events when invited. That doesn't always happen; people sometimes seem happier to grouse privately than testify up front.

Part of the problem is that it's difficult to schedule everything into the Legislature's 90-day session. If nothing else, attendance at the Finance hearing this week illustrated again why the 90-day session limit should be returned to the 120 days called for by the Constitution.

Empire editorial: Stevens' longer Legislature measure deserves consideration

Wednesday, February 16, 2011

Story last updated at 2/15/2011 - 10:57 pm

Empire editorial: Stevens' longer Legislature measure deserves consideration
JUNEAU EMPIRE

Sen. Gary Stevens, R-Kodiak, has pitched a proposal to extend the legislative session to 120 days every other year. We are encouraged by the desire captured in Senate Bill 18 to find a middle ground between those who say the Legislature is constrained in its efforts by a 90-day session and others who believe 90 days is adequate to perform the people's business, and we are hopeful both cabinets and the governor will give Stevens' plan serious consideration.

In 2006, a slim majority of voters — less than 51 percent of the 51 percent of registered voters who cast ballots — decided to impose a 90-day maximum on the length of each legislative session. However, that vote put state law at odds with Alaska's Constitution, which allows the legislature to meet for 120 days each session. This creates tension between the constitution and state statute.

One main argument against the shorter gathering is hurried committee meetings do not allow for complete consideration of legislation. Proposals in front of the House and Senate are often complex, and the less time legislators can spend hashing out the finer points means more time the details are left to unelected staff. Lobbyists, whose jobs are to master all of the intricacies of their respective pet issues, remain 30 days smarter and better informed on legislation as well, allowing their influence to grow.

The counter from proponents of 90-day meetings is that lawmakers could be more efficient with their time. Complaints of committee meetings starting late are common, and such meetings are occasionally wasted on silly discussions and even sillier legislation. As the clock ticked away on the final day of last year's session, when the Legislature rushed to complete its work before 90 days elapsed (they missed by about 35 minutes), it took up measures giving the Malamute status as the state dog and naming a bridge in Petersburg.

Stevens' bill is one that splits the difference between the two camps, and would give each side half a loaf. Legislators, many screaming for more time to get their work done, would get 30 more days every other year. Backers of shorter sessions would still have accomplished their goal as well, getting both the voters and lawmakers — in a representative democracy, it's important to have both — to sign off on less than 240 days of debate for each Legislature, and this proposal is a better effort to strike a balance between the two camps than the effort gaining traction in the House which would return sessions to 120 days a year. That option is always available if Stevens' middle ground proves not to be enough.

Both sides in this debate have a point — a much more common occurrence, generally, than our present state of political discourse would lead someone to believe. We are pleased with Stevens' reasonable proposal to address the concerns of the parties. It's a sensible solution to a legal tension that needs resolution.

Alaska State Legislature
Senator Gary Stevens
State Capitol Room 111
Juneau AK, 99801

RE:SB18

Dear Senator Stevens,

It is my pleasure to tell you what a great job your aide Tim Lamkin did last week at chamber lunch presenting information on SB18 extending the second session of the Legislature back to 120 days.

I have represented the Juneau Chamber of Commerce as well as served on the Marine Transportation Advisory Board for the past 6 years. I have had the honor of visiting many legislators during this time regarding issues important to my community as well as all other communities served by the Alaska Marine Highway.

Before the legislative sessions were shortened to 90 days I could call on not only my delegation but legislators from around the state and felt confident that they would have time to hear what I had to say.

Since the change from 120 to 90 days I seldom go directly to any of my legislators during session. If I do I must be prepared to chase them down the hall or if I get lucky I might get 5 minutes of their time. Legislators and their staff seem to be racing from one meeting to the next. I can only imagine how difficult this must be for folks traveling to Juneau to see their legislators especially when I know legislators want to spend time with their constituents.

In conclusion, we whole heartedly support SB18 and hope that at least one year of each session is extended to 120 days. The ideal would be to revert back to 120 days every year.

Thank you so much for your service to the State of Alaska.

Respectfully,

Cathie Roemmich, CEO
Juneau Chamber of Commerce

From: Frances Ulmer [affau@uaa.alaska.edu]
Sent: Friday, February 11, 2011 11:08 AM
To: Sen. Gary Stevens
Subject: sessions
Attachments: image001.jpg

Dear Gary,

I understand that you have introduced legislation to provide a compromise between the 90-day session limit and the 120-day session limit. Based on my personal experience as a legislator, I think that makes sense.

The 90-day session is very popular with the public, and in many ways it helps focus the attention of legislators on the most important business of that year.

What it does not do is allow much time for the public to weigh in on important policy decisions, or enable the legislature to delve more deeply into long-term issues that need the attention of our elected representatives and senators. Some issues are complicated and require both analysis and deliberation. That can be much more challenging when you need to watch the clock and pass a budget.

One other way that the legislature could achieve this goal is with more focused special committee work during the interim. But that approach tends to limit the number of legislators who can effectively participate.

Someday, I hope that the legislature will address the inefficiencies associated with annual budgeting. A two-year cycle for agencies and the legislature would save a lot of time and paper. There will always have to be mid-course (annual) adjustments, but the underlying legal, policy, and program choices can and should be made, in my opinion, with a twenty-four month horizon.

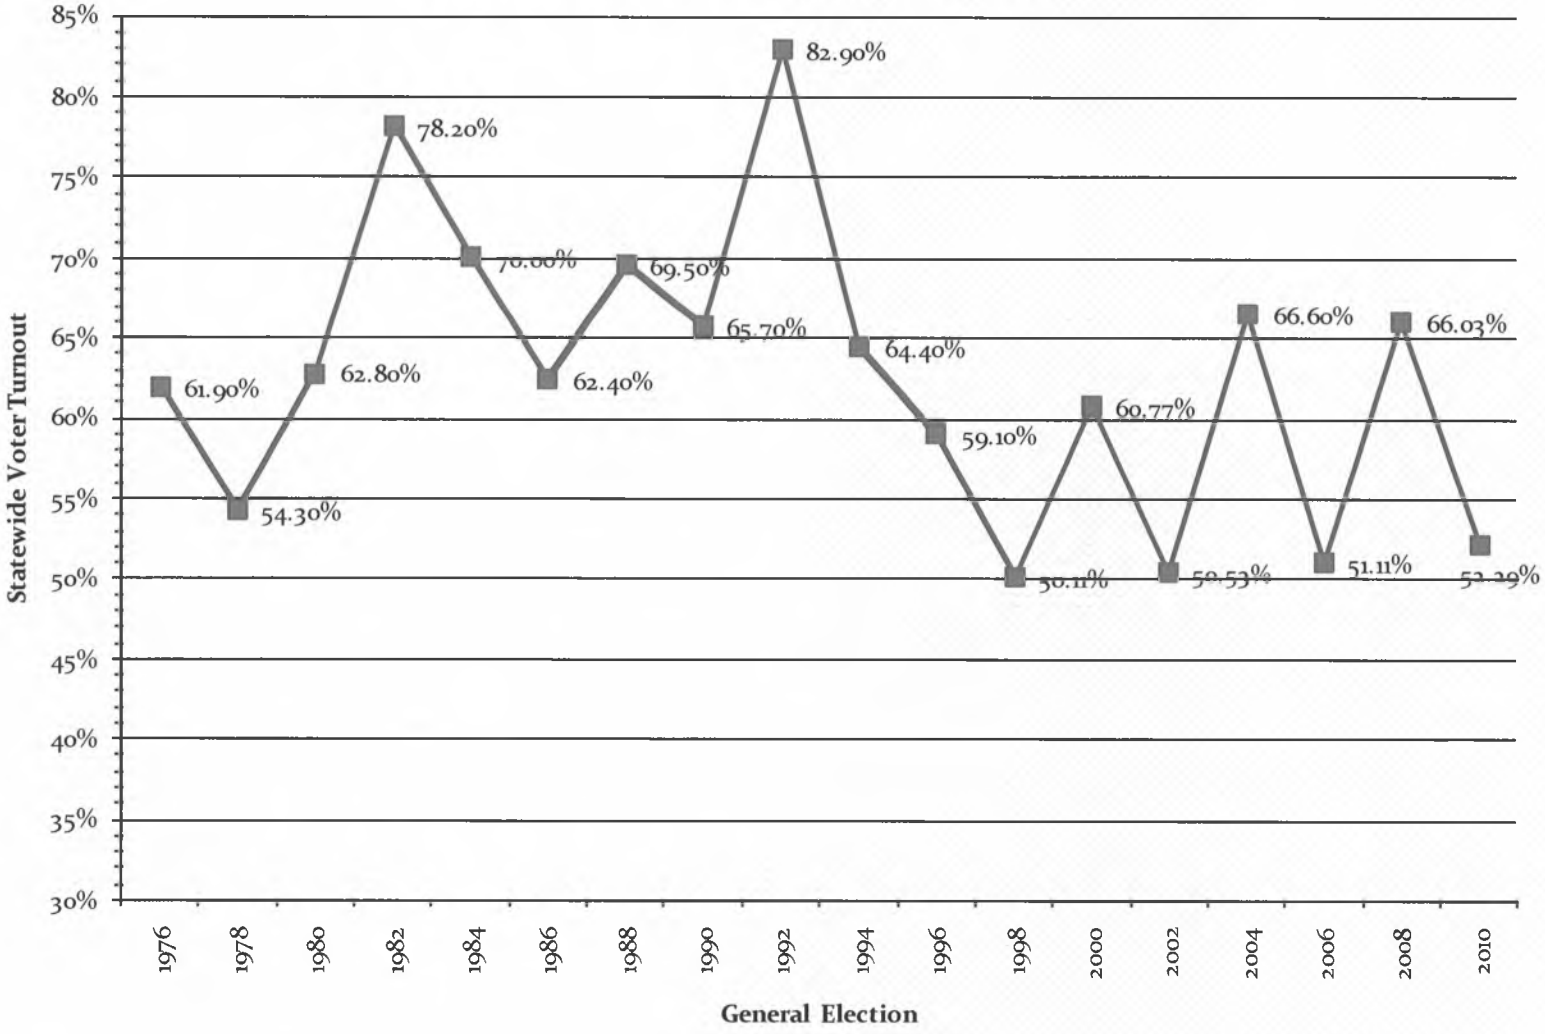
I want to clarify that I am certainly not speaking on behalf of the University of Alaska or UAA or anyone except myself. You asked my opinion and I am happy to share it, although it is based primarily on my experience in a very different decade.

Wishing you a successful session.

Fran

Fran Ulmer

Duration of Alaska's Legislative Sessions



Senate Bill 18

Senator Gary Stevens

SB 18 Strikes A Compromise

- 90-day first session, 120-day second session
- In 2006 voters passed Ballot Measure #1, reducing the legislative sessions to 90 days.
- BM#1 passed by a margin of 50.8% in favor, in what was a notable low voter turnout.

Alaska Voter Turnout 1976-2010

The 90-Day Session vote passed by 3,843 votes.

There were 238,307 total cards cast (voters) statewide during the 2006 general election.

There were 231,507 total cards cast (voters) statewide on BM#1

There were 6,800 people who took a ballot, but didn't vote on BM#1.

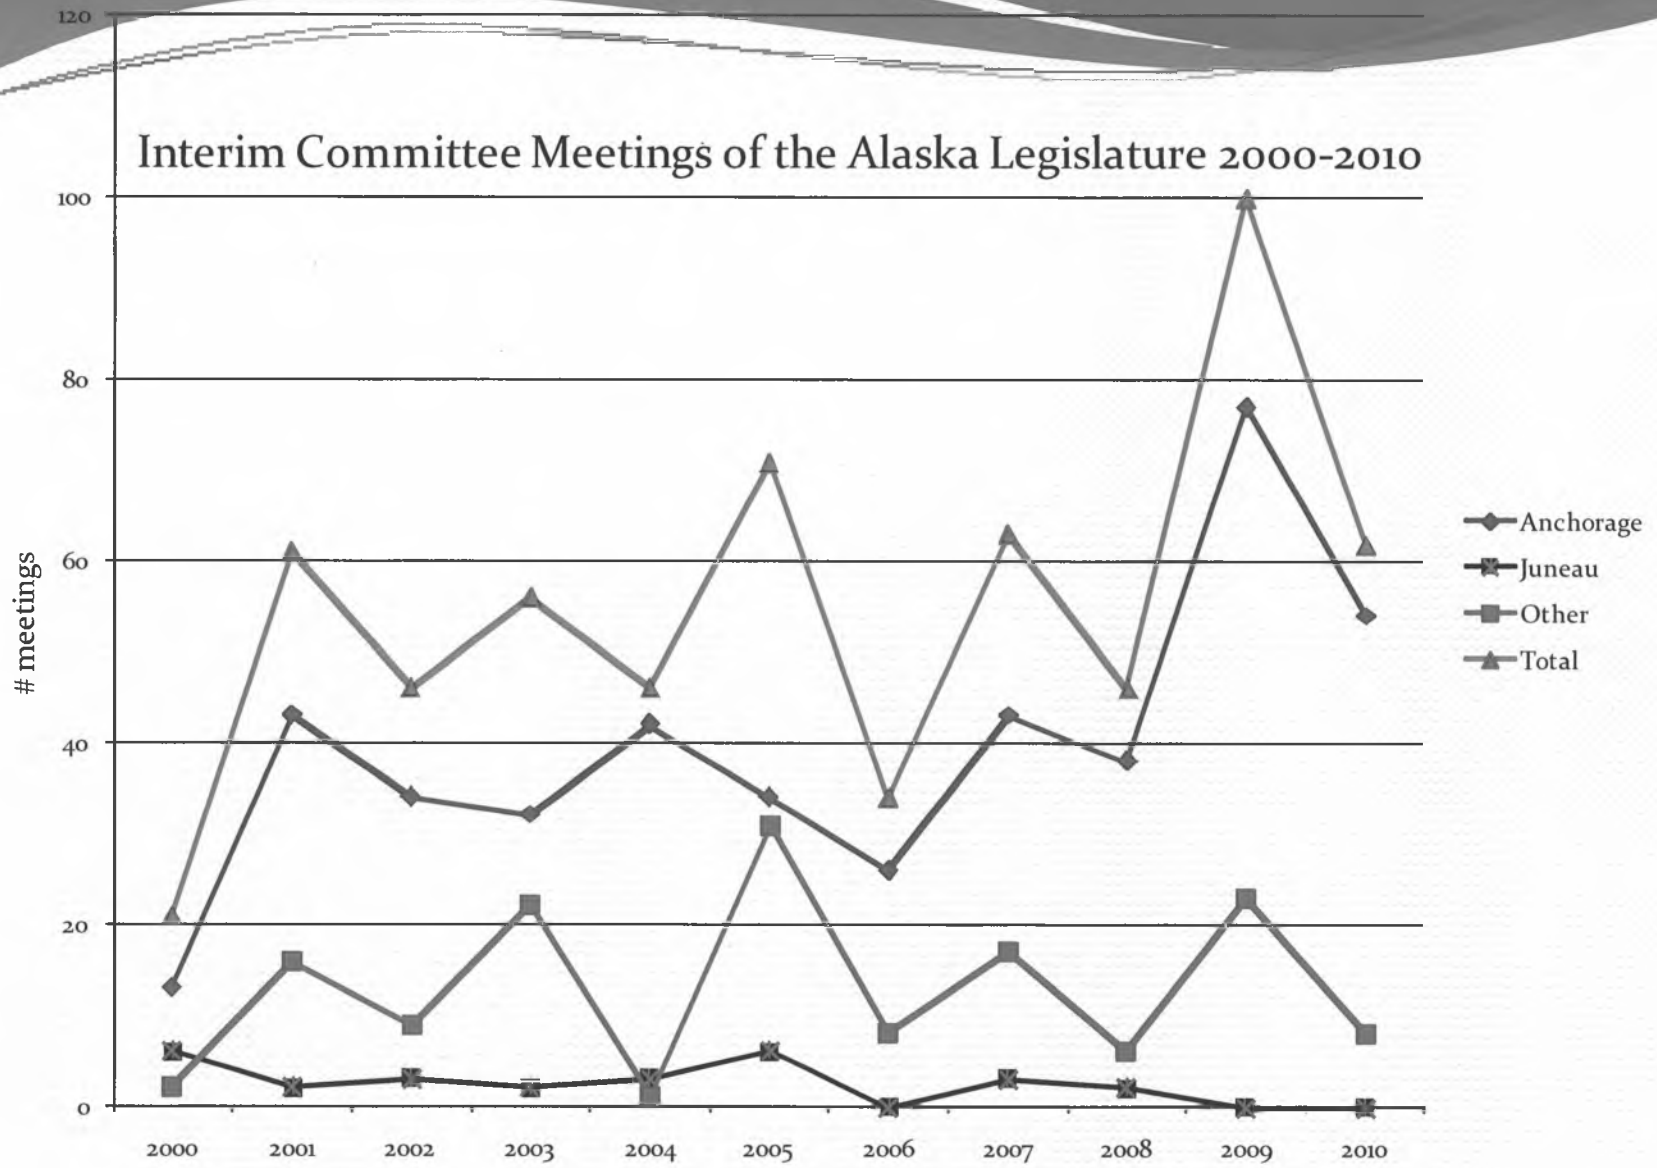
Nonetheless, a vote is a vote, and majority rules. So, we've tried it.

This year will be the 4th session the Legislature has worked under a 90-day limit since that vote took place.

However, the best interests of Alaskans are not being served, nor are the arguments made to support passing BM#1 in the first place being proven valid.

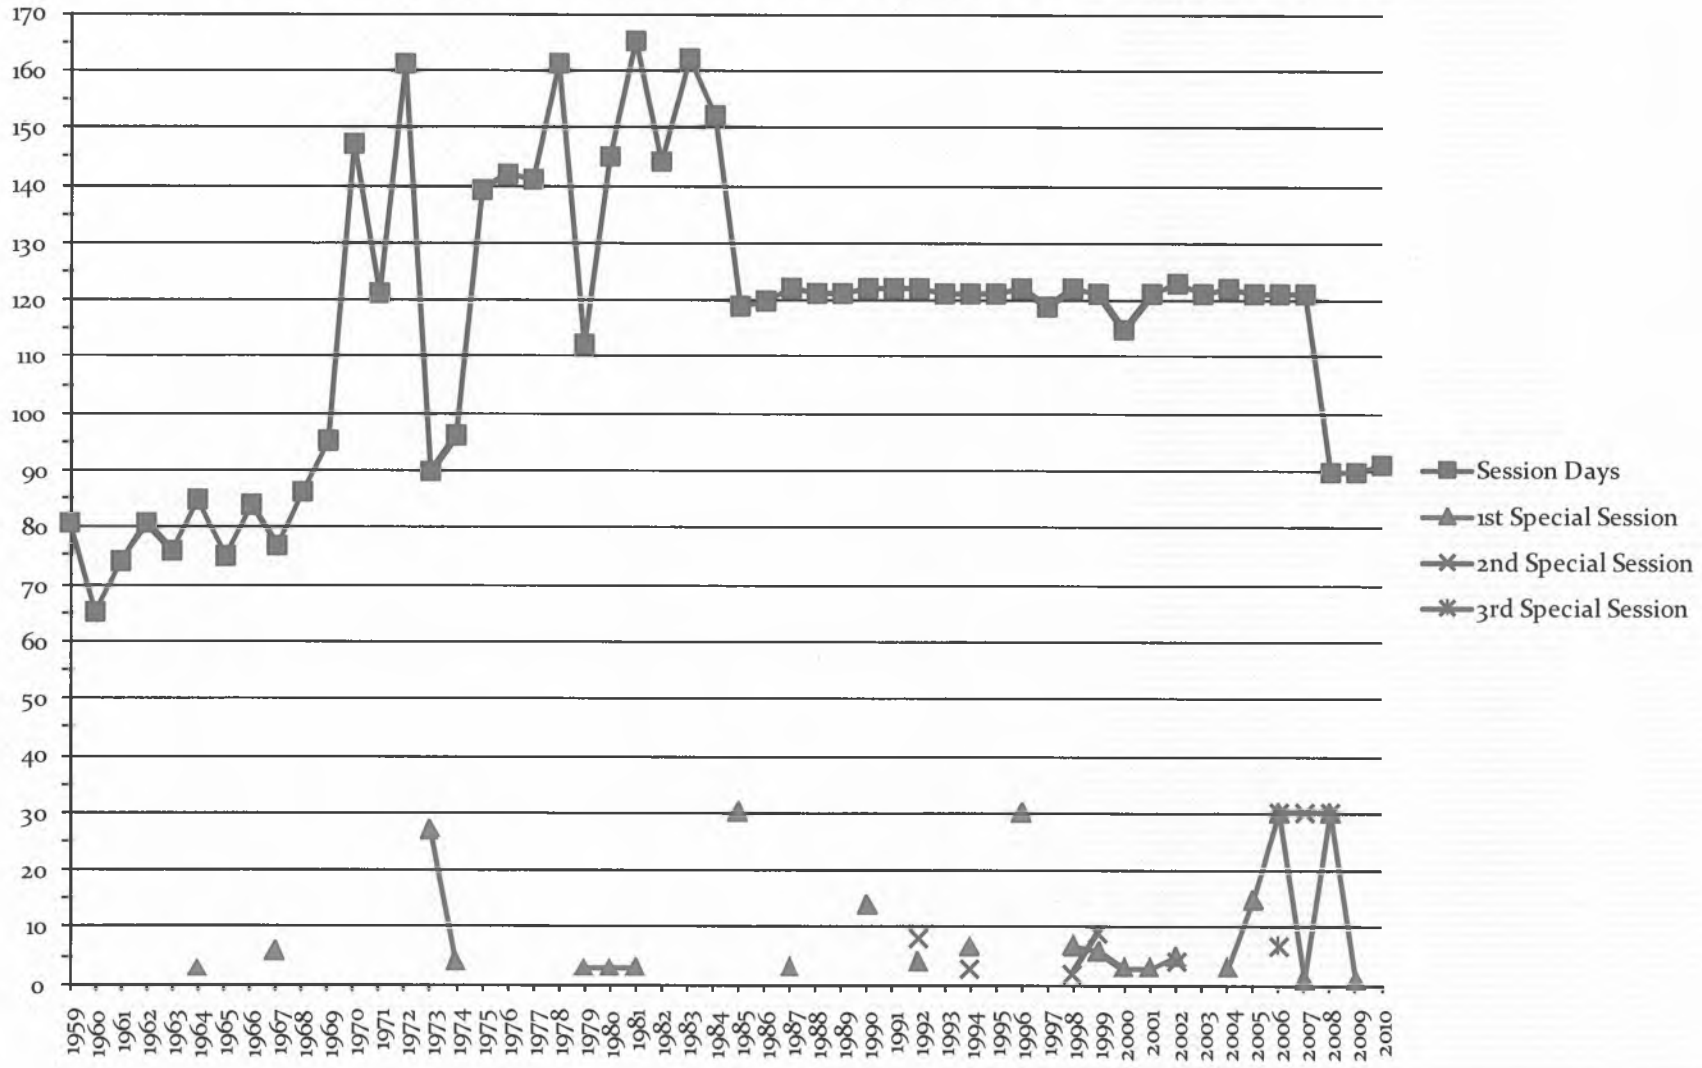
Arguments Made In Favor of Shortening the Session

1) Reduce the cost of government.
2) 27 other states had shorter sessions than Alaska.
3) Legislation to shorten the session had been introduced 24 times since 1990 with no action taken.
4) Less time in Juneau would reduce time away from home, family, private sector work, etc, and thus incentivize more quality individuals to run for office.



Reducing the Cost of Government

Specifically in the election pamphlet it was stated that "we save 30 days of per diem and expenses of operation of the legislature - paper, copy costs, transportation, etc."



Actual session costs have been reduced, but the overall operating budget of the Legislature has increased.

Legislative salaries, session per diem, and travel expenses have increased, and much of it accrues throughout the year, not just during session.

Following our first 90-day regular session, there were two 30-day special sessions in 2008. There has also been an increase in traveling roadshow-style interim committee hearings.

Analysis

SB 18 increases the number of days of the second session of a Legislature from 90 days to 120 days, beginning with the 28th Legislature which convenes in January 2013. The second session would convene in 2014.

When the session was reduced from 120 to 90 days, the cost savings were redesignated into the special session contingency account in the event that reducing the number of session days resulted in more or longer special sessions. It is the intent of Senate Leadership that funding in the special session contingency account be used to absorb the cost of the additional 30 days of regular session.

This will reduce the funding available for special sessions after a second session of a Legislature and would result in a supplemental request for additional funds to cover a special session if one were called.

Basically, the money expected to be "saved" was put aside in anticipation of increased special sessions and interim costs.

The fiscal note didn't say it won't cost anything. Rather that the costs will be absorbed by the existing budget. It has been built into the base. No new appropriation is necessary.

The "savings" represent about 2% of the Legislature's total operating budget.

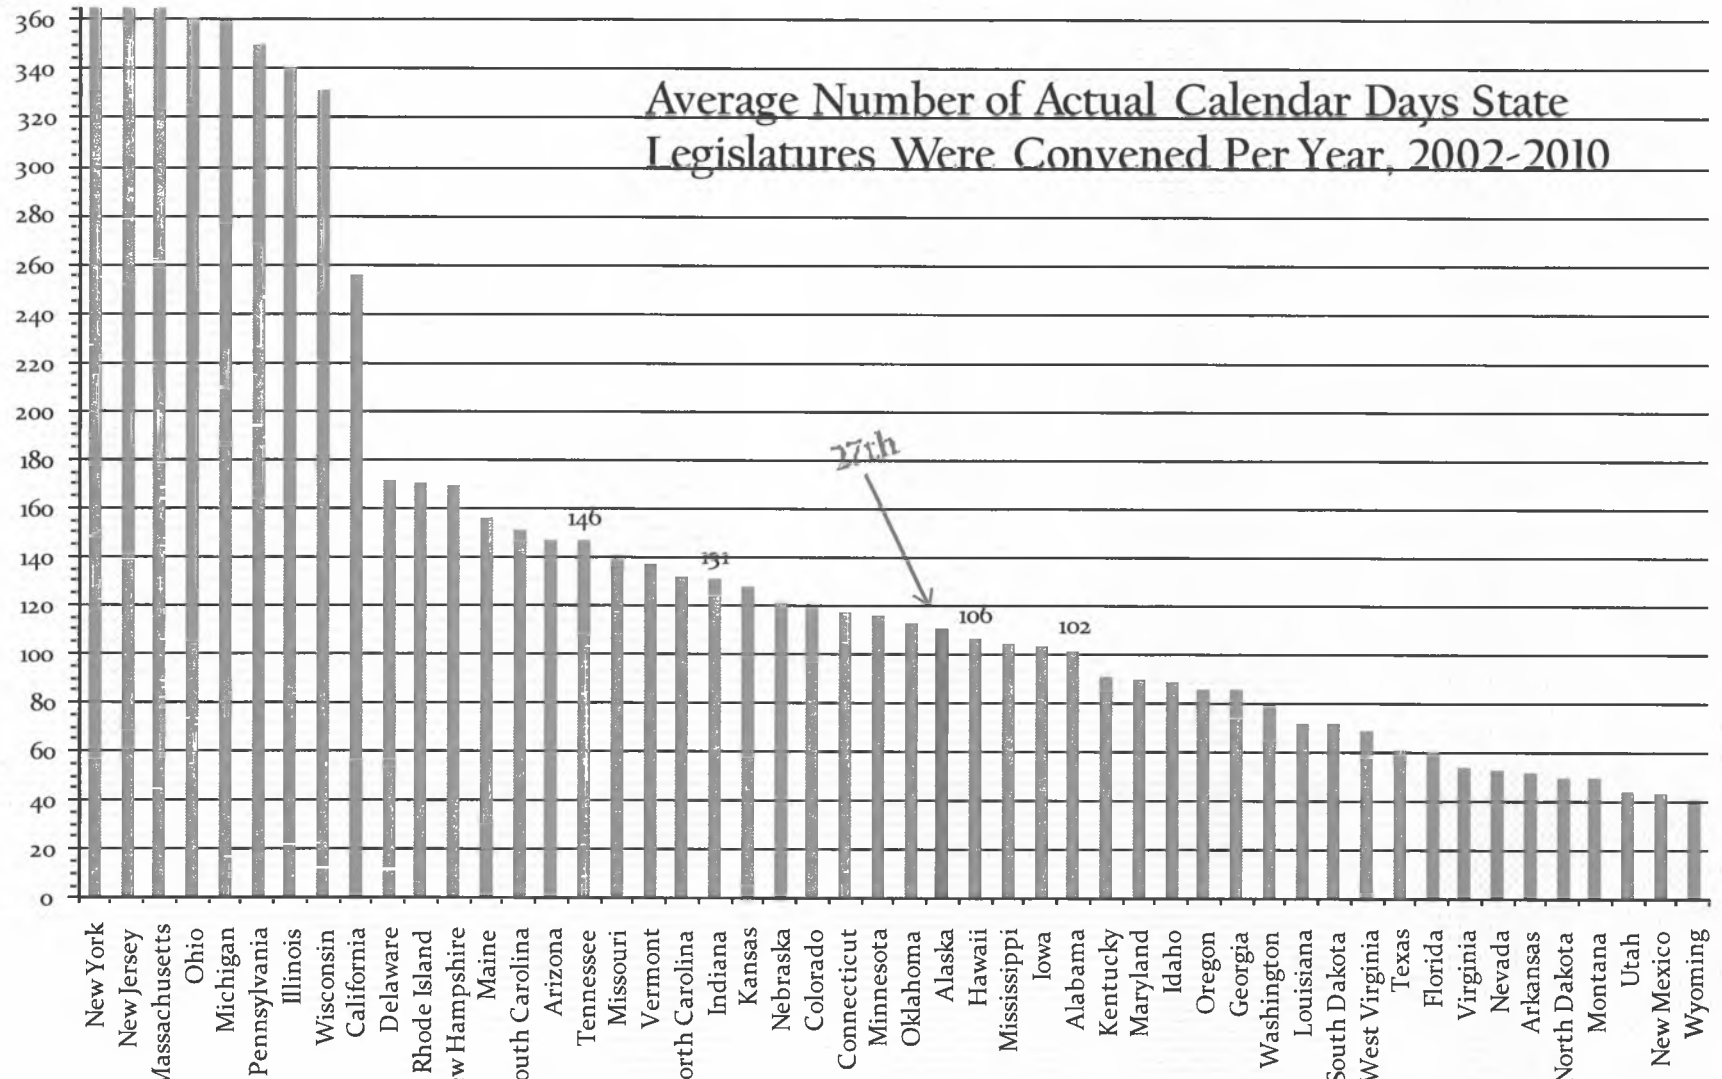
The roughly $50 million spent to operate the Legislative ("People's") Branch of government is a drop in the bucket compared to the approx. $10 *billion* spent by the executive branch agencies.

Point #1

There is not a significant, if any, cost "savings" (reduction in the cost of government) by maintaining a 90-day legislative session.

Point #2

What about there being so many other states limiting the duration of their legislative sessions?



Very common question.

"27 OTHER STATES HAVE SESSIONS SHORTER THAN ALASKA'S

STATE	DAYS OF SESSION		POPULATION

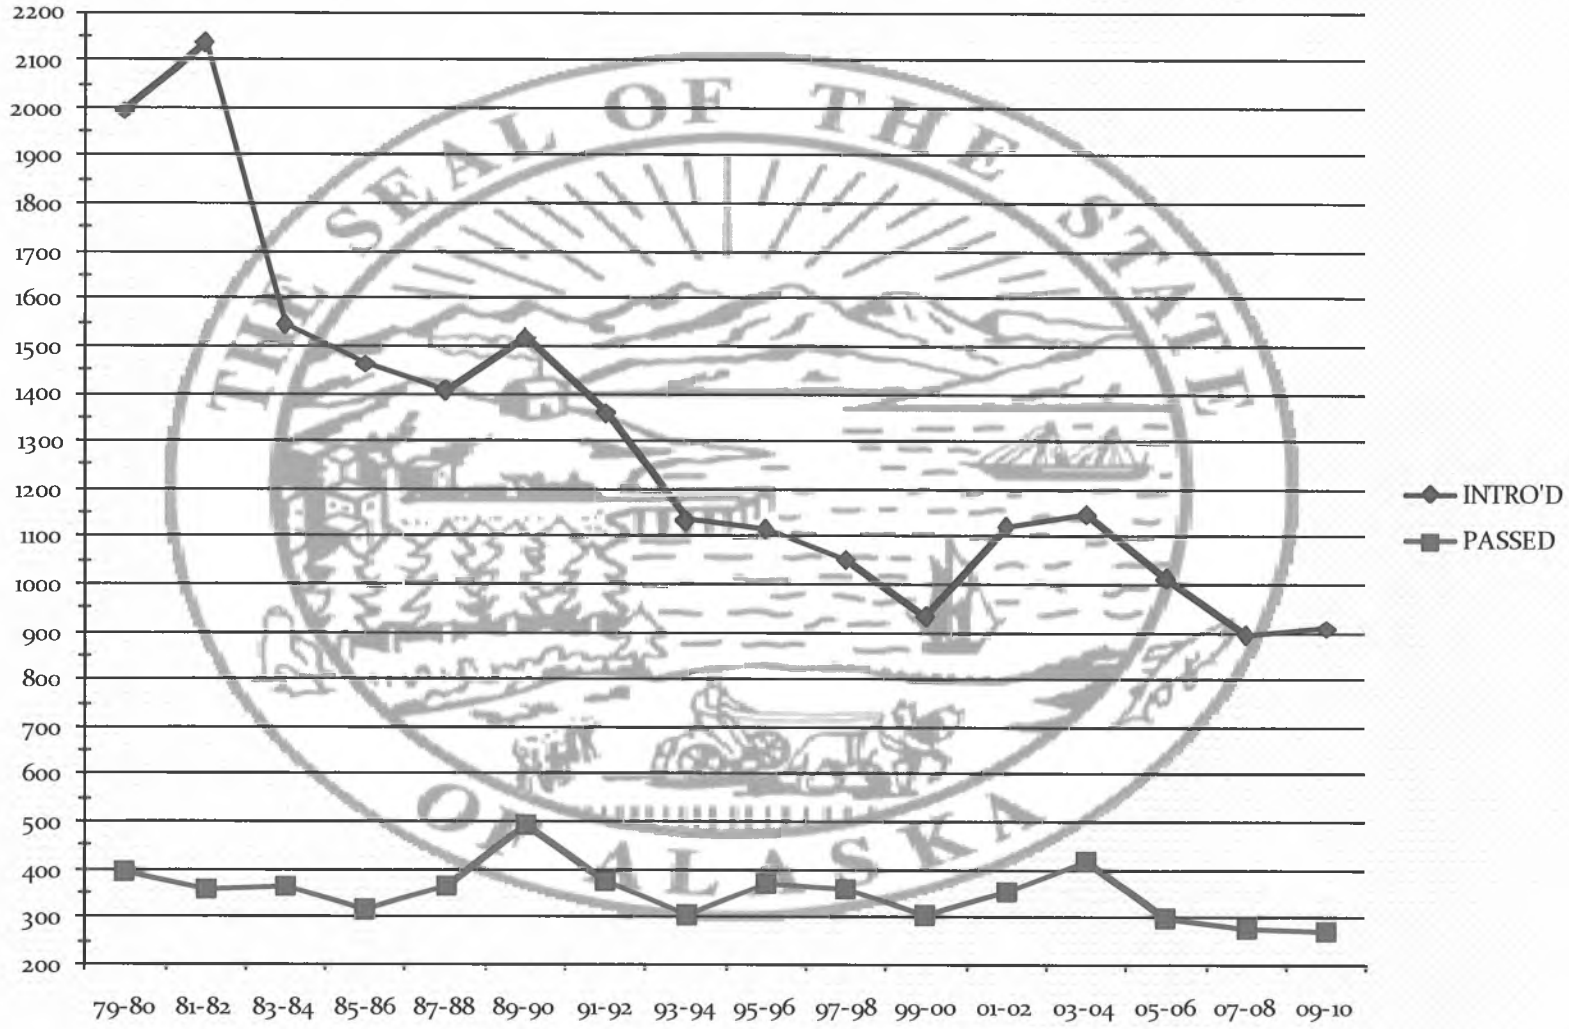
Every state is different, unique and has its own reasons for choosing to operate its legislature the way it does.

Similarly, Alaska is known as a do-it-yourself type state, so in this case why not say..

Point #2

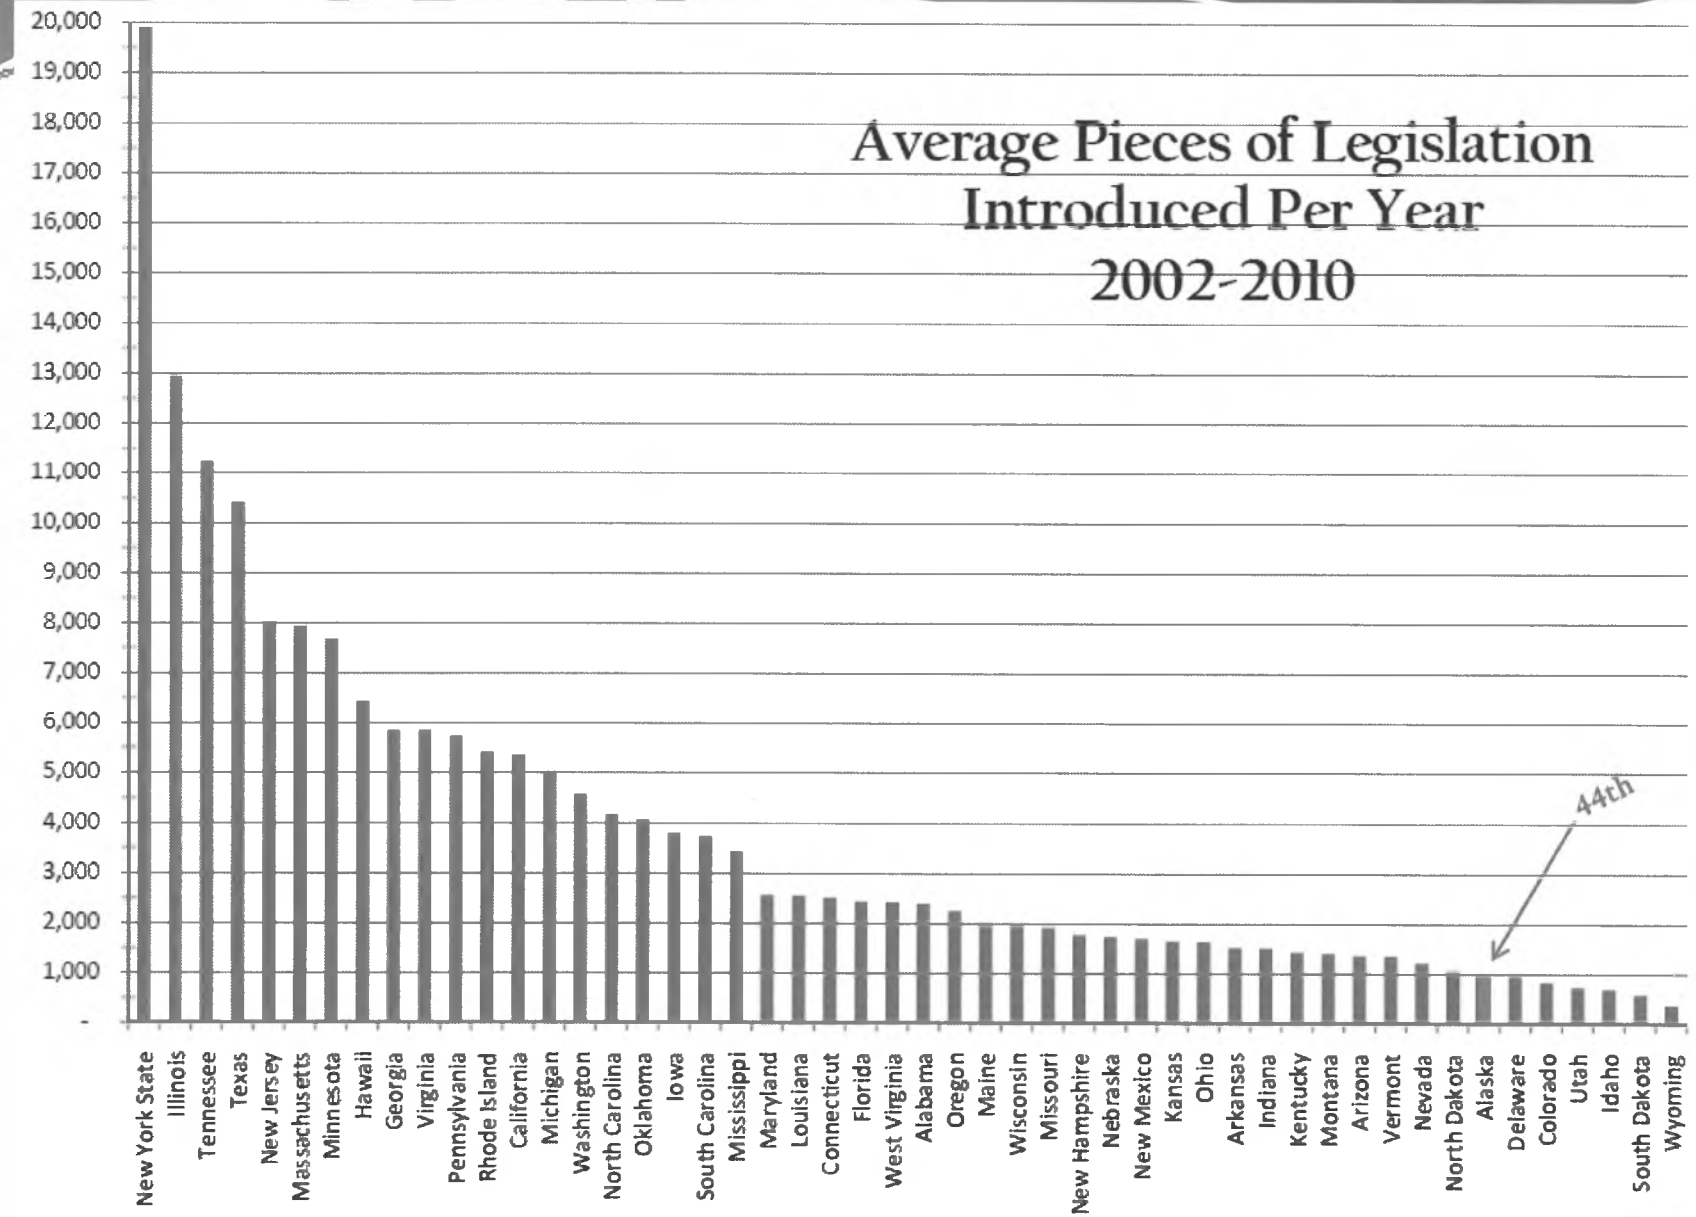
Who cares what the other states are doing?

We're in the middle of the road on this issue, and SB 18 moves us even closer to the middle.

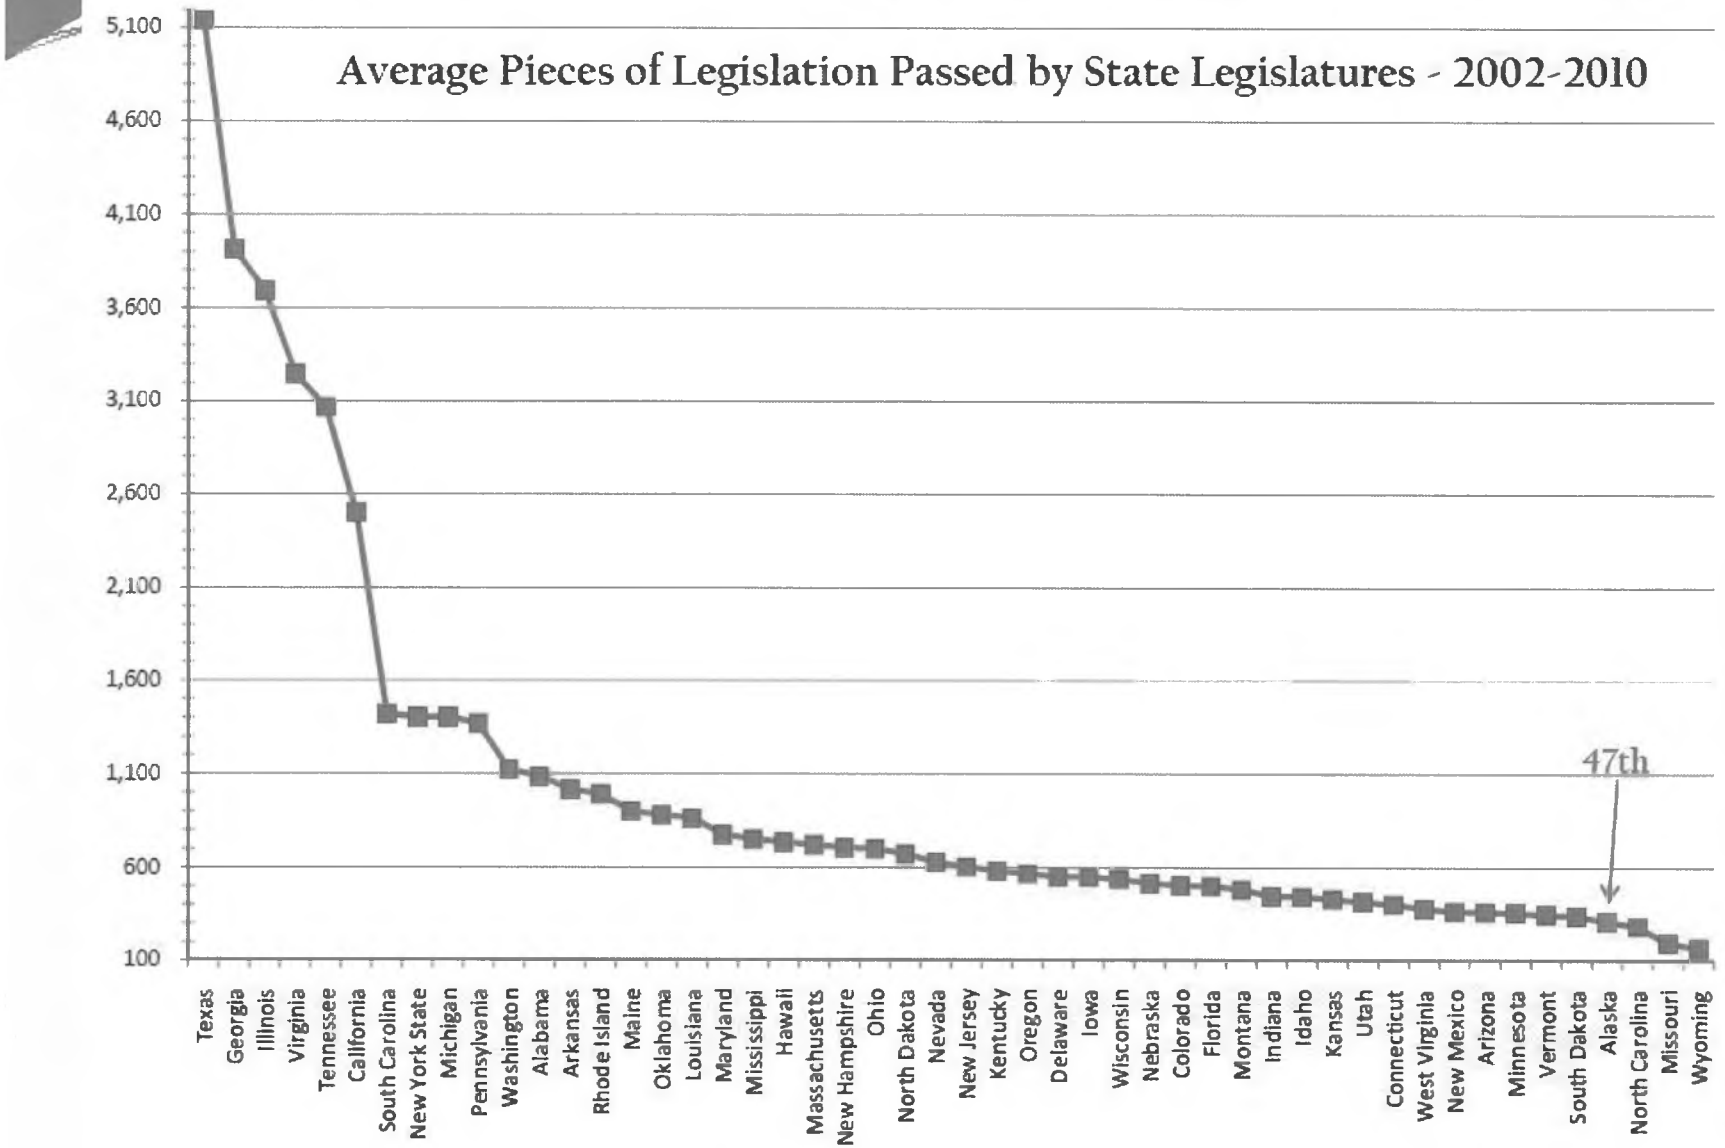


Point #3

But legislation was introduced 24 times since 1990 in an effort to shorten the session, and each attempt failed.



Legislation that has no likelihood of passing is introduced almost every day of session.



The Legislature has the prerogative to act or not act on any issue, and there are always more issues than there are actions.

Legislation that has no likelihood of passing is introduced almost every day of session.

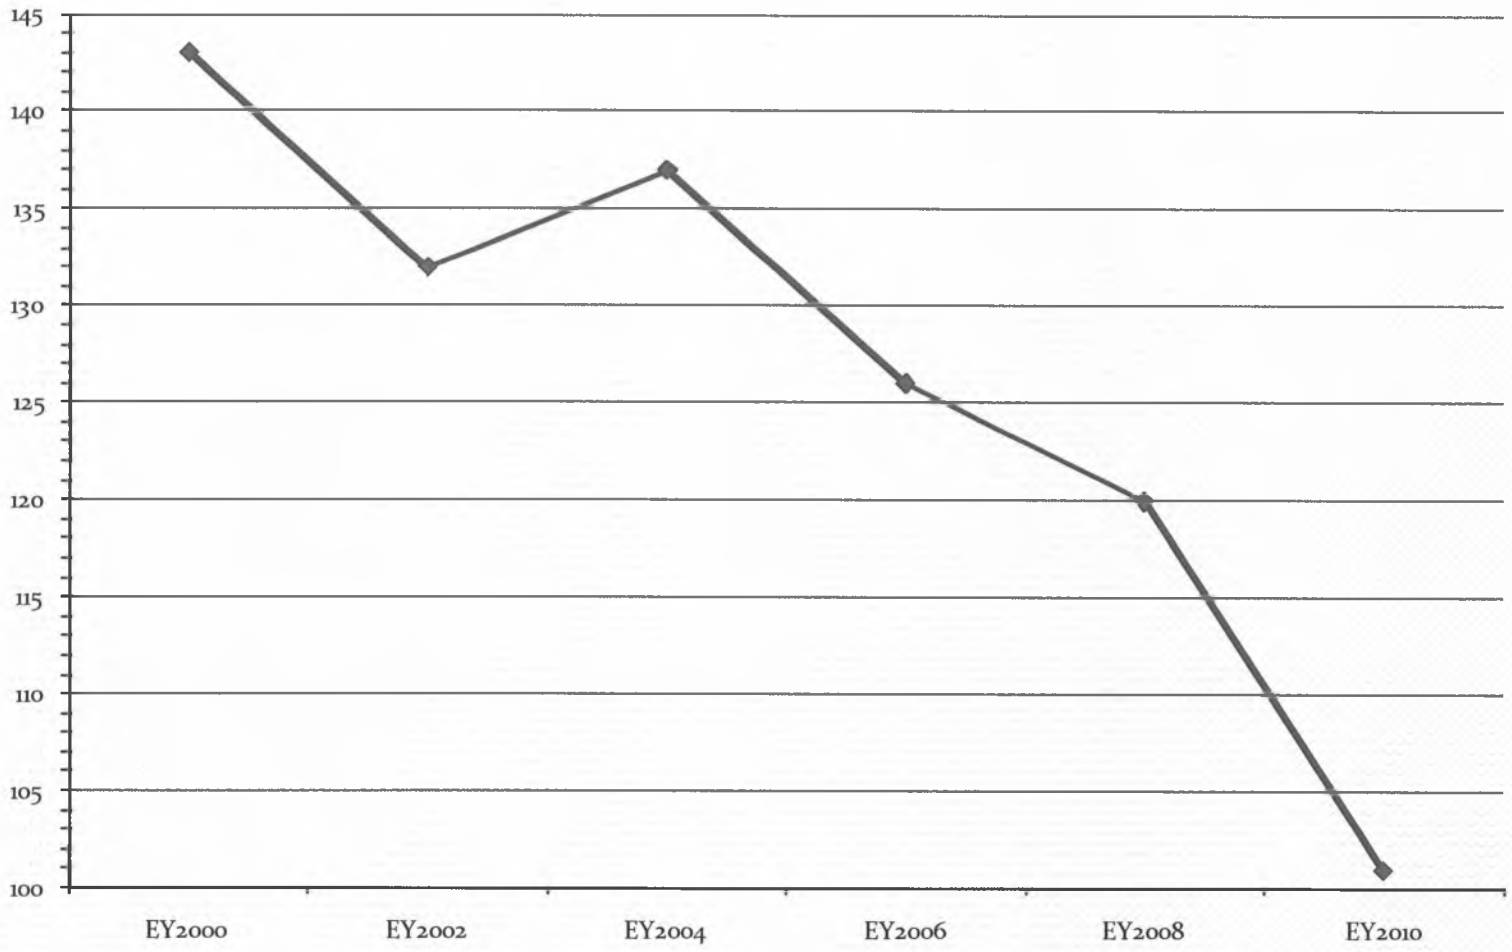
Perennial Issues:

Abortion
Move the Capitol
Oil & Gas Taxation
Subsistence
Coastal Zone Management
School Truancy
Mining Taxes
Etc etc

Point #3

By the reasoning of this argument supporting BM#1, should any bill that fails to pass the Legislature after X number of attempts be automatically forwarded to the ballot box for a vote?

Point #3



It is not a valid argument to say something should become law simply because the Legislature has consistently chosen not to make it a law on its own.

Point #4

A shorter session means less time away from home, away from family, away from work in the private sector, etc, and thus will incent more "competition" between quality individuals to run for office.

Total Candidates Filed For Alaska State House & Senate

2000-2010

Point #4

Since the 2006 vote to shorten the legislative sessions, the candidate pool has shrunken 20%; the opposite of what was argued in favor of passing BM#1 .

Other considerations to restore a 120-day session:

1. Public testimony & the deliberative process
2. Staff workloads
3. House Subcommittee Evaluation Survey
4. Balance of Power – Executive Branch

SB 18 Strikes A Compromise

CS FOR SENATE BILL NO. 19(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR FRENCH

A BILL

FOR AN ACT ENTITLED

"An Act specifying the vehicle rental tax for motorcycles and motor-driven cycles; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 43.52.030 is amended to read:

Sec. 43.52.030. Levy of recreational vehicle, motorcycle, and motor-driven cycle rental tax. There is imposed an excise tax on the charge for the lease or rental of a recreational vehicle, **motorcycle, or motor-driven cycle** in this state if the lease or rental of the recreational vehicle, **motorcycle, or motor-driven cycle** does not exceed a period of 90 consecutive days.

*** Sec. 2.** AS 43.52.040 is amended to read:

Sec. 43.52.040. Rate of recreational vehicle, motorcycle, and motor-driven cycle rental tax. The rate of the tax levied in AS 43.52.030 is three percent of the total fees and costs charged for the lease or rental of the recreational vehicle, **motorcycle, or motor-driven cycle**.

* **Sec. 3.** AS 43.52.060 is amended to read:

Sec. 43.52.060. Applicability of the tax. The provisions of AS 43.52.010 - 43.52.099 apply to a passenger **vehicle,** [OR] recreational vehicle**, motorcycle, or motor-driven cycle** whether or not the vehicle is registered and licensed in this state.

* **Sec. 4.** AS 43.52.099(2) is amended to read:

(2) "passenger vehicle" means a motor vehicle as defined in AS 28.90.990 that is driven or moved on a highway or other public right-of-way in the state, but does not include

(A) a commercial motor vehicle as that term is defined in AS 28.90.990;

(B) emergency or fire equipment that is necessary to the preservation of life or property;

(C) a farm vehicle that is controlled and operated by a farmer, used to transport agricultural products, farm machinery, or farm supplies to or from that farmer's farm, not used in the operations of a common or contract motor carrier, and used within 150 miles of the farmer's farm;

(D) a recreational vehicle;

(E) a taxicab;

(F) a rental truck; in this subparagraph, "rental truck" means a motor vehicle with a gross vehicle weight rating greater than 8,500 pounds that is designed, used, or maintained primarily for the transportation of personal property; [OR]

(G) a vehicle provided by an automobile dealer to a customer as replacement transportation during warranty, recall, or service contract repairs if the dealer does not receive compensation from the customer**; or**

(H) a motorcycle or a motor-driven cycle;

* **Sec. 5.** AS 43.52.099 is amended by adding new paragraphs to read:

(6) "motorcycle" has the meaning given in AS 28.90.990;

(7) "motor-driven cycle" has the meaning given in AS 28.90.990.

* **Sec. 6.** This Act takes effect immediately under AS 01.10.070(c).

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSSB19(FIN)

Analysis

Bill Language:
This bill would reduce the tax rate on rental of motorcycles from 10% to 3%.

Revenues:
The state receives approximately $12,000 each year in vehicle rental tax from the rental of motorcycles in the state. Revenue would drop by approximately $8,400 to about $3,600 in total vehicle rental tax each year as a result of this legislation.

Expenditures:
The department can implement the provisions of the bill with existing resources.

March 9, 2011

The Honorable Bert Stedman
Senate Finance Committee
Alaska State Legislature
State Capitol
Juneau, AK 99801

Dear Senator Stedman,

During the March 8th hearing on SB 19 (exempting motorcycles from the vehicle rental tax), you asked for the following information:

Question: How many motorcycle rental businesses are in Alaska?
Answer: We have identified four motorcycle rental businesses.

Question: Why wasn't the tax collected?
Answer: At the time the vehicle rental tax was first implemented (January 1, 2004), we were not aware that motorcycles were rented in Alaska. We sent a letter to all known passenger and recreational vehicle rental places, but did not include a letter to motorcycle rental businesses. In August 2009, one of our investigators informed our auditor that one of the motorcycle sales places was also renting motorcycles. We initially assumed that motorcycles were not passenger vehicles and turned to the Department of Law to research the issue for us. The Department of Law informed us that the definition of "passenger vehicle" within the vehicle rental tax statutes includes motorcycles.

Question: What policies were taken by the Department to rectify the uncollected tax and what is the plan moving forward?
Answer: Once we determined that motorcycles were subject to the tax, we sent letters to all known motorcycle dealers and informed them that they are subject to the vehicle rental tax for all motorcycle rentals made since the inception of the vehicle rental tax. In early 2010, we identified approximately 4 companies that are renting motorcycles and have been working with these companies to bring them into compliance. As far as moving forward, we will continue to work with any company that has not complied with the vehicle rental tax. Those companies are assessed tax, interest, and penalties for failing to file and pay the tax. As with all other taxpayers, they have the right to appeal and each taxpayer will be reviewed on a case-by-case basis.

Other relevant information:
The vehicle rental tax went into effect on January 1, 2004. At that time, taxicabs, moving vans and trucks (such as U-Hauls), and vehicles rented while a consumer is having warranty work done on their owned vehicle were subject to the vehicle rental tax. During the 2004 legislative session, taxicabs were exempted from the definition of a "passenger vehicle". During the 2005 legislative session, moving

vans and trucks, and vehicles rented while having warranty work done on an owned vehicle were also exempted from the definition of "passenger vehicle." It is interesting to note that the Municipality of Anchorage specifically excludes motorcycles from their vehicle rental tax.

If you have further questions, please feel free to contact Johanna Bales at Johanna.bales@alaska.gov at (907) 269-6628.

Sincerely,

VBlaisdell

Ginger Blaisdell

MEMORANDUM

Date: 2/21/2011

To: Senator Bert Stedman, Co-Chair
Senate Finance Committee

From: Senator Hollis French

RE: Hearing Request for SB 19 – Passenger Vehicle Rental Tax

No changes have been made to SB 19 since it was introduced.

Senator Hollis French

Sponsor Statement

SB 19 – Passenger Vehicle Rental Tax

Senate Bill 19 will remove the 10% tax on motorcycle rentals. With our short summer and the economic benefits of independent tourism, the legislature should support this emerging industry.

Motorcycle tourism brings independent travelers to our small businesses and restaurants. While cruise ships ensure that large hotels are full, motorcycle travelers go off the beaten path, traveling to remote bed and breakfasts or staying in smaller hotels. In contrast to RV renters (who pay a smaller 3% rental tax), motorcycle riders are more likely to eat at restaurants, since it is difficult to cook a meal in one's motorcycle.

With a short rental season, plenty of challenges exist for Alaskan businesses that rent motorcycles. On top of the seven or eight winter months where rental income isn't earned, fleet storage adds to the cost of doing business in Alaska. These factors increase the price of rentals, making it difficult to draw in customers. Adding a 10% state tax makes renting motorcycles even more challenging for rental businesses.

Passing this legislation corrects the accidental inclusion of motorcycles to our existing rental vehicle tax. In 2003, the legislature passed a motor vehicle rental tax for rental cars. No talk of motorcycles was placed on the record at that time. Also illustrating that point, the Department of Revenue didn't even collect the tax until several years after the law became effective.

Please join me in supporting this legislation, to benefit independent tourism in Alaska.

Existing Statutes in Title 43 (Revenue and Taxation Title)

Sec. 43.52.010. Levy of passenger vehicle rental tax.

There is imposed an excise tax on the charge for the lease or rental of a passenger vehicle in this state if the lease or rental of the passenger vehicle does not exceed a period of 90 consecutive days.

Sec. 43.52.020. Rate of passenger vehicle rental tax.

The rate of the tax levied in AS 43.52.010 is 10 percent of the total fees and costs charged for the lease or rental of the passenger vehicle.

Sec. 43.52.030. Levy of recreational vehicle rental tax.

There is imposed an excise tax on the charge for the lease or rental of a recreational vehicle in this state if the lease or rental of the recreational vehicle does not exceed a period of 90 consecutive days.

Sec. 43.52.040. Rate of recreational vehicle rental tax.

The rate of the tax levied in AS 43.52.030 is three percent of the total fees and costs charged for the lease or rental of the recreational vehicle.

Sec. 43.52.050. Liability for payment of vehicle rental taxes.

(a) The taxes imposed by AS 43.52.010 - 43.52.099 shall be collected and paid to the department

(1) by the person who provides the leased or rented vehicle; and

(2) in the manner and at the times required by the department by regulation.

(b) The tax shall be stated as a separate item on the lease or rental contract or other document invoicing payment.

Sec. 43.52.060. Applicability of the tax.

The provisions of AS 43.52.010 - 43.52.099 apply to a passenger or recreational vehicle whether or not the vehicle is registered and licensed in this state.

Sec. 43.52.070. Relationship to municipal levies.

The taxes imposed by AS 43.52.010 - 43.52.099 are in addition to taxes that may be imposed on vehicle rentals by a municipality under AS 29.45.

Sec. 43.52.080. Administration of tax.

(a) The department shall administer the taxes imposed by this chapter and may adopt necessary regulations.

(b) The proceeds of the vehicle rental taxes imposed by AS 43.52.010 - 43.52.099 shall be deposited into a special vehicle rental tax account in the general fund.

(c) The legislature may appropriate the actual balance of the vehicle rental tax account for tourism development and marketing. This section is not intended to create a dedicated fund.

Sec. 43.52.090. Exemption.

The tax imposed in AS 43.52.010 - 43.52.099 does not apply to leases or rentals for official use to federal, state, or local government agencies or employees.

Sec. 43.52.099. Definitions.

In AS 43.52.010 - 43.52.099,

(1) "fees and costs" means all charges incurred by the renter before the tax imposed under AS 43.52.010 - 43.52.099 except

(A) fees from the sale of automobile liability insurance, loss damage waiver insurance, and personal accident insurance;

(B) parking tickets;

(C) sales or excise taxes;

(D) payment for damages to the vehicle during the rental period;

(E) concession fees paid to an airport;

(F) customer facility charges set by the commissioner of transportation and public facilities under AS 02.15.090 ; and

(G) customer facility maintenance charges set by the commissioner of transportation and public facilities under AS 02.15.090 ;

Sec. 43.52.099. Definitions (cont.)

(2) "passenger vehicle" means a motor vehicle as defined in AS 28.90.990 that is driven or moved on a highway or other public right-of-way in the state, but does not include

(A) a commercial motor vehicle as that term is defined in AS 28.90.990;

(B) emergency or fire equipment that is necessary to the preservation of life or property;

(C) a farm vehicle that is controlled and operated by a farmer, used to transport agricultural products, farm machinery, or farm supplies to or from that farmer's farm, not used in the operations of a common or contract motor carrier, and used within 150 miles of the farmer's farm;

(D) a recreational vehicle;

(E) a taxicab;

(F) a rental truck; in this subparagraph, "rental truck" means a motor vehicle with a gross vehicle weight rating greater than 8,500 pounds that is designed, used, or maintained primarily for the transportation of personal property; or

(G) a vehicle provided by an automobile dealer to a customer as replacement transportation during warranty, recall, or service contract repairs if the dealer does not receive compensation from the customer;

(3) "recreational vehicle" means

(A) a motor vehicle or trailer for recreational dwelling purposes;

(B) a motor home or other vehicle with a motor home body style;

(C) a one-piece camper vehicle; and

(D) any other self-propelled vehicle with living quarters;

(4) "tax" means the excise tax levied under AS 43.52.010 - 43.52.099 on the charge made for the rental of a passenger or recreational vehicle;

(5) "vehicle" means a device in, upon, or by which a person or property may be transported or drawn upon or immediately over a highway or vehicular way or area; "vehicle" does not include

(A) devices used exclusively upon stationary rails or tracks;

(B) mobile homes; or

(C) watercraft.

Existing Statutes in Title 28 (Motor Vehicle Title)

Chapter 28.90. GENERAL AND MISCELLANEOUS PROVISIONS

Sec. 28.90.990. Definitions for title.

(a) Unless otherwise specifically defined or unless the context otherwise requires, in this title and in regulations adopted under this title

(16) "motor vehicle" means a vehicle which is self-propelled except a vehicle moved by human or animal power;

(17) "motorcycle" means a vehicle having a seat or saddle for the use of the rider and designed to travel on not more than three wheels in contact with the ground; the term does not include a tractor;

(18) "motor-driven cycle" means a motorcycle, motor scooter, motorized bicycle, or similar conveyance with a motor attached and having an engine with 50 or less cubic centimeters of displacement;

Example itinerary of an Alaska motorcycle tour

The tour below will be offered twice during the summer of 2011. For more information about it, visit:
http://www.motoquesttours.com/guided-alaska-motorcycle-tours.php

Tour Price:

- Rider sharing twin room *: US$ 7,800
- Rider with own room *: US$ 9,800
- Couples *: US$ 11,300
- Own Bike with shared room: US$ 5,800
- Own Bike with own room: US$ 7,800
- * Includes basic bike rental

Northern Expedition Motorcycle Adventure

See wildlife, ride unmapped mining roads, and meet colorful "sourdough" locals. We will be staying in hotels, historic roadhouses and rugged work camps (that's all they have in Deadhorse!). Get your gear ready, we are headed north!

Day 1 - ***Anchorage***
Please arrive in Anchorage by mid-afternoon. Hotel check-in. Welcome Dinner at one of the finest restaurants in Alaska. Stay in Anchorage.

Day 2 - ***Anchorage to Trapper Creek***- *155 miles paved (20 miles dirt option)*
Visit the small town of Talkeetna or ride the mining roads of the Petersville Road. Stay in Trapper Creek area. Dinner in Trapper Creek.

Day 3 - ***Trapper Creek to Fairbanks*** - *251 miles paved*
Ride through the Alaska Range, and have a chance of seeing North America's tallest peak: Mt. McKinley. Stay in Fairbanks.

Day 4 - **Fairbanks to Central** - 128 miles (100 miles dirt)
We ride the Steese Highway to Central. Along the way, we will be exploring some historic mining roads, which branch off this dirt highway.

Day 5 - **Free Day in Central** (Up to 150 miles of dirt riding)
This day is up to you: Rest, read, relax, or explore around the area. You can ride to the native town of Circle City, located on the Yukon River (35 miles). You can also join our guides and explore some of the mining roads in the area. You may also check out a working gold mine! Stay in Central.

Day 6 - **Central to Yukon River** - 280 miles (170 miles dirt)
We will retrace our ride on the Steese Highway and head north to the Yukon River. This will be our longest day of riding and will take us to the banks of the famous Yukon River! Stay on banks of the Yukon River.

Day 7 - **Yukon to Coldfoot-** 133 miles (45 miles dirt)
We cross the Arctic Circle on this day. Though not a long day of touring, there is the town of Wiseman to explore in the Coldfoot area or perhaps fishing for grayling along the way.

Day 8 - **Coldfoot to Deadhorse-** 239 miles (200 miles dirt)
One of our longest days of touring, we will be riding the most northerly road in North America! We will cross the remote Brooks Range at Atigun Pass. Scenery is world-class, and the chance of seeing wildlife (from Grizzlies, Dall sheep, Caribou, to Moose) is high. Stay in Deadhorse.

Day 9 - **Transfer Day in Deadhorse**
Riders done with the trip may take the morning tour of Prudhoe Bay and the Arctic Ocean before flying back to Anchorage. (Alaska Airlines runs daily flights)
Riders arriving this day may take the Arctic Ocean Tour in the afternoon before joining us for a welcome dinner.

Day 10 - **Deadhorse to Coldfoot** - 239 miles (200 miles dirt)
We will be riding from the most northerly point on the road system in North America. We will cross the remote Brooks Range at Atigun Pass. Scenery is world-class, and the chance of seeing wildlife (from Grizzlies, Dall Sheep, Caribou, to Moose) is high. Stay in Coldfoot.

Day 11 - **Coldfoot to Manley Hot springs** - 240 miles (100 miles dirt)
Cross the Arctic Circle and the Yukon River, on your way to the historic mining town of Manley Hot springs. Stay in Manley Hotsprings.

Day 12 - **Free day in Manley Hotsprings.**
This day is up to you: Rest, relax, soak in the hot springs or explore around the area on your motorcycle with the guides. We have a chance to check out some of the mining roads in the area, exploring some fantastic areas. Other activities include Pike fishing or visiting a dog sled kennel. Stay in Manley Hotsprings.

Day 13 - **Manley Hot springs to Chatanika** - 182 miles, (80 miles dirt)
We will make the "run to Rampart" on the Yukon River, in search of Wyatt Earp's alleged Cabin! Stay in Chatanika. Explore an abandoned dredge, visit a native village. Stay in Chatanika.

Day 14 - **Chatanika to Paxson Area** - 195 miles paved
Ride through the Alaska Range at Isabel Pass. Enjoy spectacular scenery while riding the paved Richardson Highway. You can even stop in and say "hi" to Santa in North Pole! Stay in Paxson Area.

Day 15 - **Paxson area to Denali Highway** - 60 miles (59 miles dirt)
Today is our day to ride the dirt! The Denali Highway offers dramatic sweeping views of the Alaska Range, with its looming peaks and scenic glaciers. Ride epic mining roads off the Denali Highway. Stay on the Denali Highway.

Day 16 - **Gracious House to Anchorage** - 262 miles (50 miles dirt)
The Denali Highway: superb views of the Alaska Range from the south and chance to see Mt. McKinley from the Denali and Parks Highways. In Anchorage you're sure to enjoy the farewell party at our shop this evening. A catered dinner and hotel room within walking distance are also included for the night.

MotoQuest 4346 Spenard Road Anchorage, Alaska

February 4th, 2011

Dear Senator French,

Thank you for introducing Senate Bill 19.

I was born and raised in Alaska and own a company called Alaska Rider Tours (recently changed to MotoQuest). It has been in existence for 12 years. We provide organized motorcycle tours, self-guided motorcycle tours and motorcycle rentals for independent travelers.

The vehicle rental tax of 10% is inappropriate for the motorcycle rental industry.

1. Motorcycles are NOT cars:

The Anchorage Municipality defines this as such, why not the state? We have a lower carbon footprint. We do not cause roadway damage like cars. Our rental season is much shorter than cars and motor homes.

2. Why were we not notified of the TAX?

At the inception of this tax, none of the motorcycle rental operators were notified. Within the parameters of this tax, motorcycles fell into the passenger vehicle category, and therefore became part of this law. 80% of or our clients do not carry a passenger. When I went into the state revenue office to explain why we have not paid our taxes for the past 4 years, they exempted me with the comment "our lawyers weren't even thinking about motorcycle when we drafted the bill."

3. Seasonality:

In Alaska, the motorcycle industry has the shortest rental season in the world. We are operating in the red to this date, and now a TAX? We already charge $230 per day for our premium bike, and now we will price ourselves out of the market. We already charge more than double what other operators do in the lower 48.

4. Competition:

Rental operators conducting motorcycle tours in our state can bring up their own bikes during our short season, and compete with us without paying this tax!

5. Income to Mom and Pop:

We send many folks to the out-of-the-way mom and pop roadhouses, not on the Princess Radar. These places are hurting, and are very happy to have our business. I will be happy to organize a petition with them signing it.

Here is a list of lodges that we regularly visit. I invite you to contact them and discuss our long standing relationship with them, and the needed income we generate for these remote locations.

- Chatanika Lodge, Chatanika
- Copper Center Lodge, Copper Center
- Steese Roadhouse, Central
- Gracious Lodge, Denali Highway
- Sheep Mountain Lodge, Glenn Highway
- Magestic Valley Lodge, Glenn Highway
- Tangle River Inn, Paxson
- The Perch, Cantwell
- Manley Hotsprings Roadhouse, Manley Hotsprings
- Coldfoot Camp, Coldfoot
- Arctic Caribou Inn, Prudhoe Bay
- Land's End Resort, Homer
- Alaska Wildland Adventure, Cooper Landing
- Harbor View Inn, Valdez

6. Job Loss

As of now, I am running in the red. How can I shoulder this tax? It drives customers away from us. I have 10 employees during the summer months and pay state and federal taxes for them. Their jobs are in jeopardy.

7. To Whom it May Concern: What can you do? Please consider nullifying this tax for motorcycles! The municipality of Anchorage clearly defines motorcycle in a different category. Why NOT the State of Alaska? Can you help us change the law to NOT include motorcycles?

Senator French, I am a long standing resident and entrepreneur in Alaska...indeed, I have lived here longer than most, and want to continue living here. I am appalled at this TAX and thank you for your efforts in supporting and protecting the motorcycle rental industry in Alaska.

Sincerely,

Philip Freeman

February 4, 2011

Honorable Senators and Representatives:

We are writing to you to ask for your support of Senate Bill 19 and House Bill 62 regarding Passenger Vehicle Rental Tax.

http://www.legis.state.ak.us/basis/get_bill.asp?session=27&bill=SB19
http://www.legis.state.ak.us/basis/get_bill.asp?session=27&bill=hb62

We are the owners of Alaska Motorcycle Adventures. A small business located in the Palmer, Alaska. We have been renting motorcycles in Alaska since 1994. Yes, 2011 will be our 18th summer providing a great service for Alaskan tourists that would choose to vacation elsewhere if it were not for the availability of motorcycle rentals.

In 2003, the Alaska legislature passed HB 271, a vehicle rental tax on passenger vehicles, without any knowledge or discussion of the motorcycle rental businesses that were operating at that time.

According to AS.28.90.990, motorcycles are not "passenger vehicles" just as farm vehicles are not "passenger vehicles". By not specifically addressing motorcycles and motorcycle rental business in 2003, the Alaska Legislature has allowed the Department of Revenue to make a very open interpretation of the "passenger vehicle rental tax" and this has had "unintended consequences" for our customers and businesses.

Please consider the following:

Alaska's motorcycle rental businesses were unknowingly omitted from all discussion concerning the Vehicle Rental Tax when was passed in 2003 under HB 271. The Alaska Legislature, the Senate Transportation Committee, and the Department of Revenue were completely unaware that our businesses existed, even though Alaska Motorcycle Adventures had been in business since 1994. We were completely unaware such a tax had been discussed and passed in HB 271.

Therefore, from 2004 – 2009 (SIX years) our customers were not taxed. In 2008, a Department of Revenue employee was driving on Spenard Road in Anchorage and saw the store front for one of the motorcycle rental companies (Alaska Rider Tours/MotoQuest). Soon after, most of us were contacted by DOR, and told to start collecting the 10% tax. In addition, the Department of Revenue requested the back taxes, from 2005 to 2009 - 5 years of taxes that we did not collect - something that

would have bankrupt every one of our small businesses! After much discussion, the back taxes were forgiven as we had never collected them and we were completely unaware we required to do so.

When HB 271 was discussed in 2003, motorhome and RV rental companies received word that such a tax was being considered. This group of locally owned businesses had a spokesperson present the facts of their rate and fee structure. As a result of their lobbying and inclusion in the discussion, the Vehicle Rental Tax on motor home and RV rentals was reduced to 3%. In addition, there are specific exemptions from the motorhome rental's "fees and costs" such as pots, pans, linens, GPSs, cell phones, child seats, etc. The RV per day rate structure is very similar to ours, yet our customers pay the 10%. Our rentals also include items such as helmets, riding jackets, GPS's, cell phones, tank bags and remote riding surcharges. Per the Department of Revenue, all of our customer's fees and costs are taxed at the 10% - NO EXEMPTIONS!

Below is a chart of examples from actual rentals in 2010. Please compare to the tax for a motorcycle rental to the tax for a same cost motorhome/RV rental:

Customer	Hometown	Total Rental Amount	VRT – Motorcycle @ 10%	VRT – RV / Motorhome @ 3%
Mr. and Mrs. P 2 Motorcycles / 11 days	Seward, Alaska	$3860.00	$386.00	$115.80
Mr. B 1 Motorcycle / 12 days	Groveland, Mass.	$2280.00	$228.00	$68.40
Mr. I 1 Motorcycle / 11 days	Denver, Colorado	$1765.00	$176.50	$52.95
Mr. K 1 Motorcycle / 6 days	Scottsdale, Arizona	$1230.00	$123.00	$36.90

Mr. E's Motorcycle Tours (Sweden) **
7 motorcycles - total Vehicle Rental Tax $1,435.00
$14,350.00 = Total Charge --- $1,4350.00 * 10% = $1,435.00 in Vehicle Rental Tax
Same rental for an motorhome/RV = $430.50 tax

**** MotoQuest (another Alaskan motorcycle rental company) provided an additional 5 motorcycles with a Vehicle Rental Tax of approximately $1000.00 to $1200.00. So, Mr. E's total Vehicle Rental Tax could have been over $2400.00 ($1435.00 + $1000.00 = $2435.00 – YIKES!)**

As you can see from our rate structure, the Vehicle Rental Tax is extremely high - especially when applied to a 6, 12 or 14 day rental. Please note that there is no tax cap that would help Mr. & Mrs. P of Seward, Alaska ($386.00 tax) or Mr. E. of Sweden ($1,435.00 tax) for their motorcycle rentals in Alaska.

In 2010, the Cruise industry's punitive and damaging head tax was reduced from $46.00 per person ($92.00 per couple) to $34.50 (69.00 per couple). Comparatively, we believe the original $92.00 per couple head tax for use of Alaskan facilities and marketing efforts was quite reasonable.

Also consider that our motorcycle rental customers put more dollars per tourist into the local economies than the motorhome rentals or cruise ship passengers do. Motorhome rental customers do not use the local hotels, restaurants and facilities that are frequented by our motorcycle rental customers. Our motorcycle rental customers frequent remote locations like Chicken, Wiseman, Tangle River, Paxson, McCarthy, Eagle, Gracious House, Central, Circle and the list goes on. Businesses in these locations rarely see an RV or motorhome and almost never see a cruise ship passenger!

In 2004, **HB347** was introduced to correct the unintended inclusion of Taxi cabs. This was passed into law and the exemption was granted. In 2005, **SB174** was introduced for the local moving van companies (i.e. U-Haul) to ask for an exemption and correct their unintended inclusion, because Alaskan residents should not be taxed to move their belongings. This was passed into law and the exemption was granted. These two Bills asking for changes and exemptions should be proof and verification to the current Transportation Committee and Alaska legislature that a few rental markets were not evaluated upon implementation of the Vehicle Rental Tax in 2003.

We believe that if the Transportation Committee and the Alaska legislature had been aware of our motorcycle rental businesses in 2003, they would have addressed the issue that motorcycles are not "passenger vehicles" and not left this to open interpretation by the Department of Revenue.

The unintended consequence of the excessive Vehicle Rental Tax is that our customers choose to rent the motorcycle(s) for fewer days to cover or reduce their rental tax. Or they choose not to visit Alaska at all! When we have fewer rental days, we need fewer employees, we buy fewer lattes and we spend fewer dollars in other Alaskan businesses. This hurts all of the small, locally owned businesses that are so vital to our Alaskan economy. A simple estimate for the gross receipts for all of the motorcycle rental companies would be approximately $500,000 for the summer of 2011. This would be only $50,000 in the Alaska State coffers - a very, very small amount of money! However, a very large amount of money when collected from a very small number of Alaskan tourists!

Thank you for your heartfelt consideration of passing into law HB 62 and SB 19. Please contact me if you need further information or have any questions.

Kind regards,
Nancy and Keith Hull
Owners, Alaska Motorcycle Adventures

The House of Harley-Davidson 4334 Spenard Road Anchorage Alaska 99517

February 1, 2011

Senator Hollis French
State Senate
State of Alaska

Dear Senator French,

Thank you for introducing SB19 to exclude motorcycles from the passenger vehicle rental tax law. As we discussed before, I believe the law was originally written without the consideration of motorcycle rentals. However, as it is written, it does not specifically exclude them.

We are going into our third year as a Harley-Davidson motorcycle rental operator in Alaska. Like most other things, it is "different in Alaska". We have only three months in which we take care of 90% of our rental customers. To do so, we need to maintain a fleet of 12 to 15 new Harley-Davidson motorcycles. Just to break even, we have to charge twice as much or more as rental dealers in the lower 48. When you consider depreciation, it is easy to see this is not a very lucrative part of our business.

There is a lot of demand for this rental program in Alaska. The biggest complaint of course, is the price, and we do lose a lot of potential rental days each season because of it. We had over 200 rental customers in 2010 – most from the lower 48. The motorcycle rental customers spend more time and money while traveling in Alaska than those who rent cars or motor homes. They are likely to stop more often and spend more nights in hotel/motel rooms and restaurants throughout the state.

We add two seasonal employees for 6-months each summer to maintain our rental business. We also incur additional payroll expenses for our core employees to get the bikes ready, ridden for 500 miles and serviced in time for the start of the season. We are just now being invoiced for and receiving our new fleet for the 2011 season. Of course, the interest charges start immediately.

Because of customer requests and the desire of the Harley-Davidson Motor Company to have a rental operator in Alaska, we have agreed to continue with the program. However, if we incur additional expenses, we will have to consider giving it up.

Thank you for your time and support.

Sincerely,
Barry Matteson

CS FOR SENATE BILL NO. 23(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS ELLIS, McGuire, French, Davis

A BILL

FOR AN ACT ENTITLED

"An Act relating to transferable film production tax credits and film production tax credit certificates; requiring the legislative audit division to audit the Alaska film production incentive program; and providing for an effective date by amending the effective dates of secs. 3 and 4, ch. 63, SLA 2008."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 24.20.271 is amended to read:

Sec. 24.20.271. Powers and duties. The legislative audit division shall

(1) conduct a performance post-audit of boards and commissions designated in AS 44.66.010 and of those programs and activities of agencies subject to termination as determined in the manner set out in AS 44.66.020 and 44.66.030, and make the audit, together with a written report, available to the legislature not later than the first day of the regular session of the legislature convening in each year set out with reference to boards, commissions, or agency programs whose activities are subject to termination as prescribed in AS 44.66; the division shall notify the

legislature that the audit and report are available;

(2) audit at least once every three years the books and accounts of all custodians of public funds and all disbursing officers of the state;

(3) at the direction of the Legislative Budget and Audit Committee, conduct performance post-audits on any agency of state government;

(4) cooperate with state agencies by offering advice and assistance as requested in establishing or improving the accounting systems used by state agencies;

(5) require the assistance and cooperation of all state officials and other state employees in the inspection, examination, and audit of state agency books and accounts;

(6) have access at all times to the books, accounts, reports, or other records, whether confidential or not, of every state agency;

(7) ascertain, as necessary for audit verification, the amount of agency funds on deposit in any bank as shown on the books of the bank; no bank may be held liable for making information required under this paragraph available to the legislative audit division;

(8) complete studies and prepare reports, memoranda, or other materials as directed by the Legislative Budget and Audit Committee;

(9) have direct access to any information related to the management of the University of Alaska and have the same right of access as exists with respect to every other state agency;

(10) conduct an audit every two years of information found in the annual reports required under AS 42.05.211 and AS 42.06.220 regarding compliance by the Regulatory Commission of Alaska with the requirements of AS 42.05.175(a) - (e) and of the timeline extensions made by the commission under AS 42.05.175(f), and of other performance measures adopted by the commission;

(11) conduct audits of the Alaska film production incentive program (AS 44.33.231 - 44.33.239) for the periods September 2, 2008, through June 30, 2013; July 1, 2013, through June 30, 2018; and July 1, 2018, through June 30, 2023.

*** Sec. 2.** AS 43.98.030(a) is amended to read:

(a) In cooperation with the film office in the Department of Commerce, Community, and Economic Development, the department shall provide a transferable film production tax credit **certificate** to a producer, as defined in AS 44.33.239, for qualified production expenditures under AS 44.33.231 - 44.33.239.

*** Sec. 3.** AS 43.98.030(b) is amended to read:

(b) A tax credit **certificate** provided under (a) of this section may be sold, assigned, exchanged, conveyed, or otherwise transferred in whole or in part.

*** Sec. 4.** AS 43.98.030(c) is amended to read:

(c) A taxpayer acquiring a transferable **tax** credit **certificate** may use the credit or a portion of the credit to offset taxes imposed under AS 43.20 (Alaska Net Income Tax Act). **Except as provided in (e) of this section, any** [ANY] portion of the credit not used may be used at a later period or transferred under (b) of this section.

*** Sec. 5.** AS 43.98.030(e) is amended to read:

(e) A **transferable film production tax** credit **certificate** provided under (a) of this section, whether sold, assigned, exchanged, conveyed, or otherwise transferred, in whole or in part, must be used within **six** [THREE] years after being provided by the department.

*** Sec. 6.** AS 43.98.030(f) is amended to read:

(f) The **amount** [NUMBER] of tax credits provided [IN THE AGGREGATE] under this section may not exceed

(1) $100,000,000 **before July 1, 2018;**

(2) $200,000,000 in the aggregate.

*** Sec. 7.** AS 43.98.030 is amended by adding new subsections to read:

(g) The total amount of tax credits for a single production may not exceed 44 percent of the qualified production expenditures.

(h) A person acquiring two or more film production tax credit certificates provided under (a) of this section may combine the unused amounts of the credits for sale, assignment, exchange, conveyance, or other transfer. At the request of a person holding a film production tax credit, the department shall replace a certificate that represents the full amount of tax credit available with multiple certificates that each

represent a portion of the total tax credit available for the purpose of sale, assignment, exchange, conveyance, or other transfer under this subsection, or, on request, shall provide one tax credit certificate that represents the combined value of multiple tax credit certificates. A tax credit certificate provided by the department under this subsection must state the expiration date and the amount of each credit that is included in the certificate. Combining or splitting unused amounts of credits under this subsection does not change or extend the time period in which each credit that is included in the combination or split must be used.

*** Sec. 8.** AS 44.33.231(b) is amended to read:

(b) The film office shall make available to the legislature, within 30 days after the start of each regular session, a report of the activities conducted by the film office under AS 43.33.231 - 43.33.239. The report must include

(1) the number of applications received under AS 44.33.234;

(2) the number of applications approved by the film office; [AND]

(3) the number of, and amount of, tax credits disbursed under AS 44.33.232**; and**

(4) the total amount of qualified expenditures that were paid by productions qualifying for the film production tax credit to Alaska

(A) businesses; and

(B) residents as wages.

*** Sec. 9.** AS 44.33.231 is amended by adding a new subsection to read:

(d) The film office shall design a logo that represents the film office and must be included in a film qualifying for a film production tax credit under AS 44.33.231 - 44.33.239.

*** Sec. 10.** AS 44.33.233(a) is amended to read:

(a) A film production is eligible for a tax credit under AS 43.98.030, if the

(1) producer has $100,000 or more in qualified expenditures in a consecutive **36-month** [24-MONTH] period under AS 44.33.236;

(2) film office determines that the production is not contrary to the best interests of the state; and

(3) production is approved by the film office.

* **Sec. 11.** AS 44.33.233(b) is amended to read:

(b) In determining under (a) of this section whether a production is not contrary to the best interests of the state, the film office may consider

[(1)] the effect of the production on

(1) both the immediate and long-term prospects for the film industry in Alaska;

(2) [THE EFFECT OF THE PRODUCTION ON] the employment of Alaska residents; [AND]

(3) [THE EFFECT OF THE PRODUCTION ON] the economy of the state**; and**

(4) natural resource development in the state.

* **Sec. 12.** AS 44.33.234 is amended by adding a new subsection to read:

(c) Information submitted in an application under (a) of this section is confidential and is not subject to inspection or copying under AS 40.25.110 - 40.25.125.

* **Sec. 13.** AS 44.33.235(a) is amended to read:

(a) Subject to AS 43.98.030(f) **and (i) of this section**, the film office, in cooperation with the Department of Revenue, shall determine the amount of the tax credit under AS 43.98.030 available to a producer who has obtained a notice of qualification under AS 43.33.234(b), based on the qualified expenditures of the production under AS 44.33.236.

* **Sec. 14.** AS 44.33.235(b) is amended to read:

(b) The base amount of a tax credit awarded under this section is equal to 30 percent of the qualified expenditures of **a** [THE] production **other than a nonfiction production produced for television and 20 percent of the qualified expenditures for a nonfiction production produced for television**.

* **Sec. 15.** AS 44.33.235(c) is amended to read:

(c) In determining the amount of the tax credit, the **applicable** percentage provided by (b) of this section shall be increased by the film office based on the following criteria:

(1) an additional 10 percent of qualified expenditures that are wages

paid to Alaska residents;

(2) an additional **six** [TWO] percent of qualified expenditures made in a rural area; and

(3) an additional two percent of qualified expenditures made in the state between October 1 and March 30.

*** Sec. 16.** AS 44.33.235(d) is amended to read:

(d) After completion of the production, the producer shall provide the film office with a production cost report detailing the qualified expenditures of the production, with verification by an independent certified public accountant approved by the film office that the costs claimed in the report are qualified expenditures under AS 44.33.236 **and that there is no outstanding balance for a qualified expenditure that is due to a person in the state**.

*** Sec. 17.** AS 44.33.235 is amended by adding new subsections to read:

(i) To qualify for the tax credit under AS 43.98.030, a producer shall include,

(1) in the end credits of each qualified film, the film office logo designed under AS 44.33.231(d) and the words, "Filmed in Alaska with the Support of the State of Alaska and the Film Office, Alaska Department of Commerce, Community, and Economic Development"; or

(2) on each DVD or other media produced for distribution, a short Alaska promotional video or advertisement approved by the film office.

(j) The Department of Revenue may not provide a tax credit certificate under AS 43.98.030 to a producer that fails to meet the requirements in (i) of this section.

*** Sec. 18.** AS 44.33.236(a) is amended to read:

(a) Expenditures made by a production company in connection with a film production approved by the film office that shall be considered qualified expenditures must be directly related to the production and be incurred in the state. Only expenditures that are ordinary, reasonable, and not in excess of fair market value and that are for real or tangible property, fees, services, or state or municipal taxes shall be considered. Expenditures may include

(1) costs of set construction and operation;

(2) costs of wardrobes, make-up, accessories, and related services;

(3) costs associated with photography and sound synchronization;

(4) costs of lighting and related services and materials;

(5) costs of editing and related services;

(6) rental of facilities and equipment;

(7) leasing of vehicles;

(8) costs of food and lodging;

(9) costs of digital or tape editing, film processing, transfer of film to tape or digital format, **transfer of digital media to film or tape,** sound mixing, and special and visual effects;

(10) the total aggregate payroll for services performed in Alaska, including all salaries, wages, compensation, and related benefits provided to producers, directors, writers, actors, and other personnel that are directly attributable to services performed in Alaska;

(11) the costs of the use of an Alaska business for processing qualified payroll and related expenditures;

(12) costs of music, if performed, composed, or recorded by an Alaska musician, or released or published by an Alaska business;

(13) costs of intrastate travel, if provided by an Alaska business;

(14) costs relating to the design, construction, improvement, or repair of a film, video, television, or digital production or postproduction facility or related property, infrastructure, or equipment, except commercial exhibition facilities, as determined by the film office;

(15) costs of state or municipal taxes levied in Alaska on the lease or rental of passenger or recreational vehicles or the rental of rooms or other lodging; or

(16) other similar production expenditures as determined by the film office in cooperation with the Department of Revenue.

* **Sec. 19.** AS 44.33.239(7) is amended to read:

(7) "rural area" means a community with a population of 1,500 or less or a community with a population of **10,000** [5,500] or less that is not connected by road or rail to Anchorage or Fairbanks.

* **Sec. 20.** The uncodified law of the state of Alaska enacted in sec. 5(a), ch. 63, SLA 2008,

is amended to read:

(a) Subject to AS 43.98.030(f), enacted by sec. 1**, ch. 63, SLA 2008** [OF THIS ACT], secs. 3 and 7**, ch. 63, SLA 2008,** [OF THIS ACT] do not prevent the film office from determining a film production's qualified expenditures, awarding a tax credit, or reviewing a tax credit under the provisions repealed by secs. 3 and 4**, ch. 63, SLA 2008,** [OF THIS ACT] to a film production that has received a notice of qualification under AS 44.33.234(b), enacted by sec. 2**, ch. 63, SLA 2008** [OF THIS ACT], before **July 1, 2023** [JULY 1, 2013].

* **Sec. 21.** The uncodified law of the state of Alaska enacted in sec. 6, ch. 63, SLA 2008, is amended to read:

Sec. 6. NOTIFICATION. When the **amount** [NUMBER] of tax credits provided under AS 43.98.030(f), enacted by sec. 1**, ch. 63, SLA 2008** [OF THIS ACT], in the aggregate and the estimated amount of tax credits that could be claimed based on notices of qualification issued by the film office under AS 44.33.234(b), together equal **$200,000,000** [$100,000,000], the commissioner shall notify the presiding officers of each house of the legislature and the revisor of statutes in writing.

* **Sec. 22.** Section 7, ch. 63, SLA 2008, is amended to read:

Sec. 7. Section 3**, ch. 63, SLA 2008,** [OF THIS ACT] takes effect on the earlier of the following:

(1) July 1, **2023** [2013]; or

(2) the date of the commissioner of revenue's notification to the presiding officers of each house of the legislature and to the revisor of statutes under sec. 6**, ch. 63, SLA 2008** [OF THIS ACT].

* **Sec. 23.** Section 8, ch. 63, SLA 2008, is amended to read:

Sec. 8. Section 4 of this Act takes effect on the earlier of the following:

(1) July 1, **2024** [2014]; or

(2) one year after the date of the commissioner of revenue's notification to the legislature and to the revisor of statutes under sec. 6**, ch. 63, SLA 2008** [OF THIS ACT].

CS FOR SENATE BILL NO. 23(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS ELLIS, McGuire, French, Davis

A BILL

FOR AN ACT ENTITLED

"An Act relating to transferable film production tax credits and film production tax credit certificates; requiring the legislative audit division to audit the Alaska film production incentive program; and providing for an effective date by amending the effective dates of secs. 3 and 4, ch. 63, SLA 2008."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 24.20.271 is amended to read:

Sec. 24.20.271. Powers and duties. The legislative audit division shall

(1) conduct a performance post-audit of boards and commissions designated in AS 44.66.010 and of those programs and activities of agencies subject to termination as determined in the manner set out in AS 44.66.020 and 44.66.030, and make the audit, together with a written report, available to the legislature not later than the first day of the regular session of the legislature convening in each year set out with reference to boards, commissions, or agency programs whose activities are subject to termination as prescribed in AS 44.66; the division shall notify the

New Text Underlined [DELETED TEXT BRACKETED]

legislature that the audit and report are available;

(2) audit at least once every three years the books and accounts of all custodians of public funds and all disbursing officers of the state;

(3) at the direction of the Legislative Budget and Audit Committee, conduct performance post-audits on any agency of state government;

(4) cooperate with state agencies by offering advice and assistance as requested in establishing or improving the accounting systems used by state agencies;

(5) require the assistance and cooperation of all state officials and other state employees in the inspection, examination, and audit of state agency books and accounts;

(6) have access at all times to the books, accounts, reports, or other records, whether confidential or not, of every state agency;

(7) ascertain, as necessary for audit verification, the amount of agency funds on deposit in any bank as shown on the books of the bank; no bank may be held liable for making information required under this paragraph available to the legislative audit division;

(8) complete studies and prepare reports, memoranda, or other materials as directed by the Legislative Budget and Audit Committee;

(9) have direct access to any information related to the management of the University of Alaska and have the same right of access as exists with respect to every other state agency;

(10) conduct an audit every two years of information found in the annual reports required under AS 42.05.211 and AS 42.06.220 regarding compliance by the Regulatory Commission of Alaska with the requirements of AS 42.05.175(a) - (e) and of the timeline extensions made by the commission under AS 42.05.175(f), and of other performance measures adopted by the commission;

(11) conduct audits of the Alaska film production incentive program (AS 44.33.231 - 44.33.239) for the periods September 2, 2008, through June 30, 2013; July 1, 2013, through June 30, 2018; and July 1, 2018, through June 30, 2023.

* **Sec. 2.** AS 43.98.030(a) is amended to read:

(a) In cooperation with the film office in the Department of Commerce, Community, and Economic Development, the department shall provide a transferable film production tax credit **certificate** to a producer, as defined in AS 44.33.239, for qualified production expenditures under AS 44.33.231 - 44.33.239.

*** Sec. 3.** AS 43.98.030(b) is amended to read:

(b) A tax credit **certificate** provided under (a) of this section may be sold, assigned, exchanged, conveyed, or otherwise transferred in whole or in part.

*** Sec. 4.** AS 43.98.030(c) is amended to read:

(c) A taxpayer acquiring a transferable **tax** credit **certificate** may use the credit or a portion of the credit to offset taxes imposed under AS 43.20 (Alaska Net Income Tax Act). **Except as provided in (e) of this section, any** [ANY] portion of the credit not used may be used at a later period or transferred under (b) of this section.

*** Sec. 5.** AS 43.98.030(e) is amended to read:

(e) A **transferable film production tax** credit **certificate** provided under (a) of this section, whether sold, assigned, exchanged, conveyed, or otherwise transferred, in whole or in part, must be used within **six** [THREE] years after being provided by the department.

*** Sec. 6.** AS 43.98.030(f) is amended to read:

(f) The **amount** [NUMBER] of tax credits provided [IN THE AGGREGATE] under this section may not exceed

(1) $100,000,000 **before July 1, 2018;**

(2) $200,000,000 in the aggregate.

*** Sec. 7.** AS 43.98.030 is amended by adding new subsections to read:

(g) The total amount of tax credits for a single production may not exceed 44 percent of the qualified production expenditures.

(h) A person acquiring two or more film production tax credit certificates provided under (a) of this section may combine the unused amounts of the credits for sale, assignment, exchange, conveyance, or other transfer. At the request of a person holding a film production tax credit, the department shall replace a certificate that represents the full amount of tax credit available with multiple certificates that each

represent a portion of the total tax credit available for the purpose of sale, assignment, exchange, conveyance, or other transfer under this subsection, or, on request, shall provide one tax credit certificate that represents the combined value of multiple tax credit certificates. A tax credit certificate provided by the department under this subsection must state the expiration date and the amount of each credit that is included in the certificate. Combining or splitting unused amounts of credits under this subsection does not change or extend the time period in which each credit that is included in the combination or split must be used.

*** Sec. 8.** AS 44.33.231(b) is amended to read:

(b) The film office shall make available to the legislature, within 30 days after the start of each regular session, a report of the activities conducted by the film office under AS 43.33.231 - 43.33.239. The report must include

(1) the number of applications received under AS 44.33.234;

(2) the number of applications approved by the film office; [AND]

(3) the number of, and amount of, tax credits disbursed under AS 44.33.232**; and**

(4) the total amount of qualified expenditures that were paid by productions qualifying for the film production tax credit to Alaska

(A) businesses; and

(B) residents as wages.

*** Sec. 9.** AS 44.33.231 is amended by adding a new subsection to read:

(d) The film office shall design a logo that represents the film office and must be included in a film qualifying for a film production tax credit under AS 44.33.231 - 44.33.239.

*** Sec. 10.** AS 44.33.233(a) is amended to read:

(a) A film production is eligible for a tax credit under AS 43.98.030, if the

(1) producer has $100,000 or more in qualified expenditures in a consecutive **36-month** [24-MONTH] period under AS 44.33.236;

(2) film office determines that the production is not contrary to the best interests of the state; and

(3) production is approved by the film office.

* **Sec. 11.** AS 44.33.233(b) is amended to read:

(b) In determining under (a) of this section whether a production is not contrary to the best interests of the state, the film office may consider

[(1)] the effect of the production on

(1) both the immediate and long-term prospects for the film industry in Alaska;

(2) [THE EFFECT OF THE PRODUCTION ON] the employment of Alaska residents; [AND]

(3) [THE EFFECT OF THE PRODUCTION ON] the economy of the state**; and**

(4) natural resource development in the state.

* **Sec. 12.** AS 44.33.234 is amended by adding a new subsection to read:

(c) Information submitted in an application under (a) of this section is confidential and is not subject to inspection or copying under AS 40.25.110 - 40.25.125.

* **Sec. 13.** AS 44.33.235(a) is amended to read:

(a) Subject to AS 43.98.030(f) **and (i) of this section**, the film office, in cooperation with the Department of Revenue, shall determine the amount of the tax credit under AS 43.98.030 available to a producer who has obtained a notice of qualification under AS 43.33.234(b), based on the qualified expenditures of the production under AS 44.33.236.

* **Sec. 14.** AS 44.33.235(b) is amended to read:

(b) The base amount of a tax credit awarded under this section is equal to 30 percent of the qualified expenditures of **a** [THE] production **other than a nonfiction production produced for television and 20 percent of the qualified expenditures for a nonfiction production produced for television**.

* **Sec. 15.** AS 44.33.235(c) is amended to read:

(c) In determining the amount of the tax credit, the **applicable** percentage provided by (b) of this section shall be increased by the film office based on the following criteria:

(1) an additional 10 percent of qualified expenditures that are wages

paid to Alaska residents;

(2) an additional **six** [TWO] percent of qualified expenditures made in a rural area; and

(3) an additional two percent of qualified expenditures made in the state between October 1 and March 30.

*** Sec. 16.** AS 44.33.235(d) is amended to read:

(d) After completion of the production, the producer shall provide the film office with a production cost report detailing the qualified expenditures of the production, with verification by an independent certified public accountant approved by the film office that the costs claimed in the report are qualified expenditures under AS 44.33.236 **and that there is no outstanding balance for a qualified expenditure that is due to a person in the state**.

*** Sec. 17.** AS 44.33.235 is amended by adding new subsections to read:

(i) To qualify for the tax credit under AS 43.98.030, a producer shall include,

(1) in the end credits of each qualified film, the film office logo designed under AS 44.33.231(d) and the words, "Filmed in Alaska with the Support of the State of Alaska and the Film Office, Alaska Department of Commerce, Community, and Economic Development"; or

(2) on each DVD or other media produced for distribution, a short Alaska promotional video or advertisement approved by the film office.

(j) The Department of Revenue may not provide a tax credit certificate under AS 43.98.030 to a producer that fails to meet the requirements in (i) of this section.

*** Sec. 18.** AS 44.33.236(a) is amended to read:

(a) Expenditures made by a production company in connection with a film production approved by the film office that shall be considered qualified expenditures must be directly related to the production and be incurred in the state. Only expenditures that are ordinary, reasonable, and not in excess of fair market value and that are for real or tangible property, fees, services, or state or municipal taxes shall be considered. Expenditures may include

(1) costs of set construction and operation;

(2) costs of wardrobes, make-up, accessories, and related services;

(3) costs associated with photography and sound synchronization;

(4) costs of lighting and related services and materials;

(5) costs of editing and related services;

(6) rental of facilities and equipment;

(7) leasing of vehicles;

(8) costs of food and lodging;

(9) costs of digital or tape editing, film processing, transfer of film to tape or digital format, **transfer of digital media to film or tape,** sound mixing, and special and visual effects;

(10) the total aggregate payroll for services performed in Alaska, including all salaries, wages, compensation, and related benefits provided to producers, directors, writers, actors, and other personnel that are directly attributable to services performed in Alaska;

(11) the costs of the use of an Alaska business for processing qualified payroll and related expenditures;

(12) costs of music, if performed, composed, or recorded by an Alaska musician, or released or published by an Alaska business;

(13) costs of intrastate travel, if provided by an Alaska business;

(14) costs relating to the design, construction, improvement, or repair of a film, video, television, or digital production or postproduction facility or related property, infrastructure, or equipment, except commercial exhibition facilities, as determined by the film office;

(15) costs of state or municipal taxes levied in Alaska on the lease or rental of passenger or recreational vehicles or the rental of rooms or other lodging; or

(16) other similar production expenditures as determined by the film office in cooperation with the Department of Revenue.

*** Sec. 19.** AS 44.33.239(7) is amended to read:

(7) "rural area" means a community with a population of 1,500 or less or a community with a population of **10,000** [5,500] or less that is not connected by road or rail to Anchorage or Fairbanks.

*** Sec. 20.** The uncodified law of the state of Alaska enacted in sec. 5(a), ch. 63, SLA 2008,

is amended to read:

(a) Subject to AS 43.98.030(f), enacted by sec. 1**, ch. 63, SLA 2008** [OF THIS ACT], secs. 3 and 7**, ch. 63, SLA 2008,** [OF THIS ACT] do not prevent the film office from determining a film production's qualified expenditures, awarding a tax credit, or reviewing a tax credit under the provisions repealed by secs. 3 and 4**, ch. 63, SLA 2008,** [OF THIS ACT] to a film production that has received a notice of qualification under AS 44.33.234(b), enacted by sec. 2**, ch. 63, SLA 2008** [OF THIS ACT], before **July 1, 2023** [JULY 1, 2013].

*** Sec. 21.** The uncodified law of the state of Alaska enacted in sec. 6, ch. 63, SLA 2008, is amended to read:

Sec. 6. NOTIFICATION. When the **amount** [NUMBER] of tax credits provided under AS 43.98.030(f), enacted by sec. 1**, ch. 63, SLA 2008** [OF THIS ACT], in the aggregate and the estimated amount of tax credits that could be claimed based on notices of qualification issued by the film office under AS 44.33.234(b), together equal **$200,000,000** [$100,000,000], the commissioner shall notify the presiding officers of each house of the legislature and the revisor of statutes in writing.

*** Sec. 22.** Section 7, ch. 63, SLA 2008, is amended to read:

Sec. 7. Section 3**, ch. 63, SLA 2008,** [OF THIS ACT] takes effect on the earlier of the following:

(1) July 1, **2023** [2013]; or

(2) the date of the commissioner of revenue's notification to the presiding officers of each house of the legislature and to the revisor of statutes under sec. 6**, ch. 63, SLA 2008** [OF THIS ACT].

*** Sec. 23.** Section 8, ch. 63, SLA 2008, is amended to read:

Sec. 8. Section 4 of this Act takes effect on the earlier of the following:

(1) July 1, **2024** [2014]; or

(2) one year after the date of the commissioner of revenue's notification to the legislature and to the revisor of statutes under sec. 6**, ch. 63, SLA 2008** [OF THIS ACT].

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 23

Analysis

Bill Language:
This bill extends the current film production tax credit, which will expire effective July 1, 2013, to June 30, 2023. Under current law, the film production tax credit expires the earlier of July 1, 2013 or when total credits issued by the Film Office exceed $100,000,000 in the aggregate. This bill limits the total amount of credits allowed to be awarded to $100,000,000 before July 1, 2018 and an additional $100,000,000 before July 1, 2023 with total aggregate credits limited to $200,000,000.

Revenues:
This bill increases the total film production tax credit from $100,000,000 to $200,000,000 and extends the current film credit program another 10 years to June 30, 2023. The current program is set to expire July 1, 2013. It is difficult to determine the total affect on state revenues as a result of this bill. However, due to the limitations established in the bill, total decrease in corporate income tax revenue cannot exceed $100,000,000 as a result of this bill.

Expenditures:
The department can implement the provisions of the bill with existing resources.

FISCAL NOTE #2

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 23

Analysis

Senate Bill 23 would extend the film incentive program for 10 years. The legislation will provide an additional $100 million in tax credits for the first five years of the extension and $100 million for the final five years.
The department does not anticipate any additional operating costs as a result of this legislation.

MEMORANDUM March 18, 2011

SUBJECT: Sectional summary for CSSB 23( ), Draft Version "X", relating to film production tax credits (Work Order No. 27-LS0252\X)

TO: Senator Johnny Ellis
Attn: Matthew Moser

FROM: Donald M. Bullock Jr.
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Amends AS 43.98.030(a) to require the Department of Revenue to provide a certificate for a film production tax credit.

Section 2. Amends AS 43.98.030(b) to refer to the certificate provided under sec. 1 of the bill.

Section 3. Amends AS 43.98.030(c) to refer to the certificate provided under sec. 1 of the bill; adds a reference to AS 43.98.030(e) that limits the period in which the credit may be used.

Section 4. Amends AS 43.98.030(e) to refer to the certificate provided under sec. 1 of the bill; expands the period in which the credit may be used from three years to six years.

Section 5. Amends AS 43.98.030(f) to increase the total amount of film production tax credits that may be authorized.

Section 6. Adds AS 43.98.030(g) to AS 43.98.030 to authorize a person to combine film production tax credits for sale, assignment, exchange, conveyance, or other transfer. Authorizes the Department of Revenue to combine multiple tax credit certificates into a single certificate, or to divide a single tax credit certificate into multiple tax credit certificates. States that combining or splitting the tax credits does not change the period during which the credits must be used.

Section 7. Amends AS 44.33.231 to require the film office to design a logo that represents the film office, which is to be included in a film qualifying for the film production tax credit.

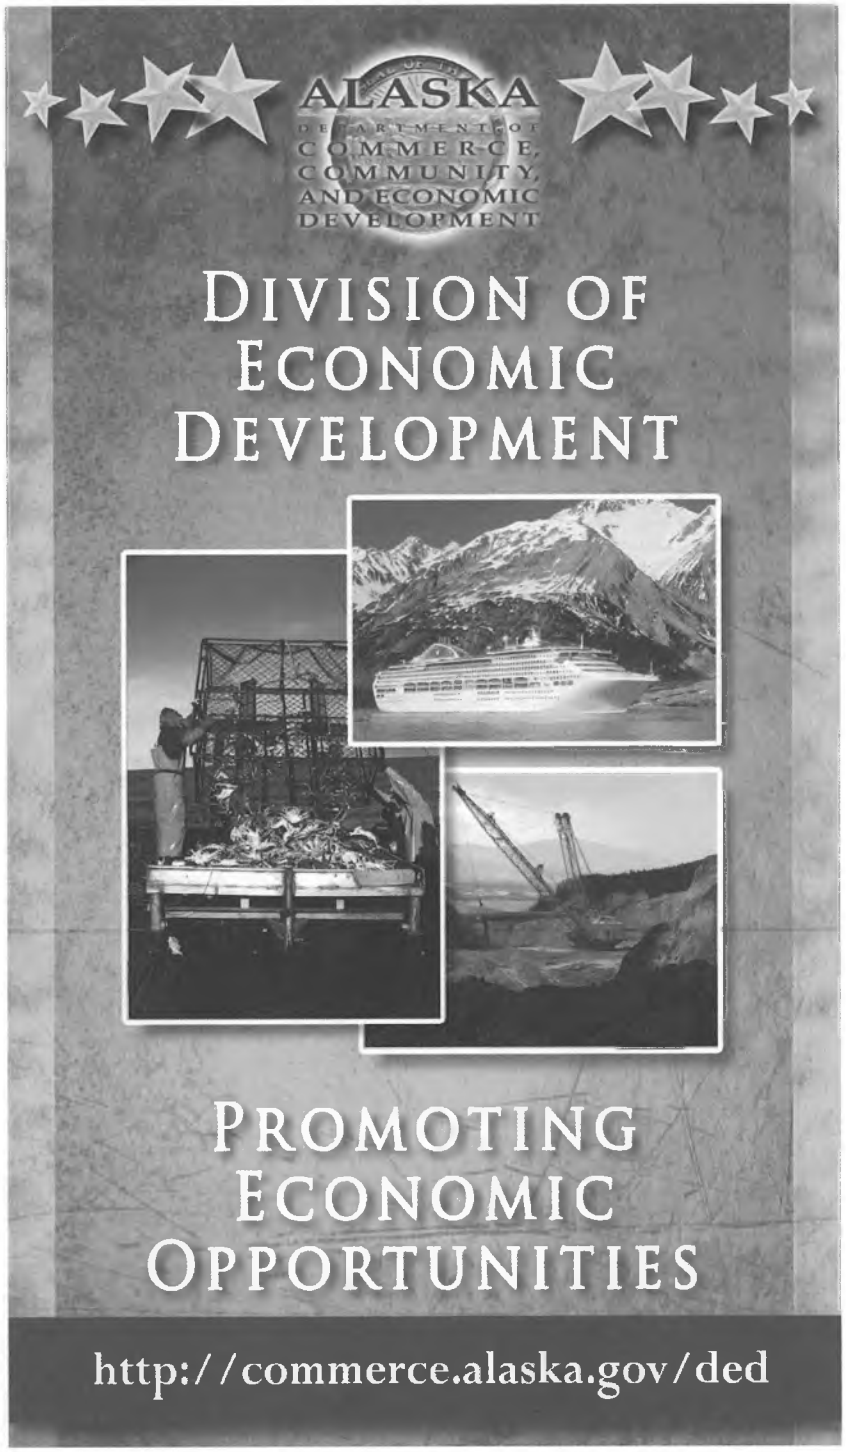
Section 8. Amends AS 44.33.233(a) to allow qualified expenditures to be incurred during a 36-month period rather than the current 24-month period.

Section 9. Adds AS 44.33.234(c) to AS 44.33.234 to make information on the application for a film production tax credit confidential.

Section 10. Amends AS 44.33.235(a) by adding a reference to AS 44.33.235(i) that is added by sec. 11 of the bill.

Section 11. Adds AS 44.33.235(i) to AS 44.33.235 to require that the film office logo and special film office acknowledgement text must be included in a qualified film, or that a short Alaska promotional video or advertisement must be included in a DVD or other media produced for distribution.

Section 12. Amends AS 44.33.236(a) by adding the cost of transferring digital media to film or tape as a qualified expenditure.



Section 13. Amends uncodified law to authorize the film office to determine a film production's qualified expenditures, award a tax credit, or review a tax credit that has been provided to a film production that has received a notice of qualification under AS 44.33.234(b) before July 1, 2023.

Section 14. Amends uncodified law that requires the commissioner of revenue to notify the presiding officers of each house of the legislature and the revisor of statutes in writing when the amount of tax credits provided under AS 43.98.030(f) and the estimated amount of tax credits that can be claimed, based on notices of qualification issued under AS 44.33.234(b), together equal $200,000,000.

Section 15. Amends uncodified law to extend the sunset date for the transferable film tax credit program to July 1, 2023, unless the amount of tax credits awarded under the program has reached the maximum amount of $200,000,000 before that time.

Section 16. Amends uncodified law to extend the period in which the film office, in cooperation with the Department of Revenue, may review, audit, and bring legal proceedings to recover any amount of a tax credit issued under AS 44.33.235.

Alaska Film Office

Statutory Authority:

The enabling legislation (AS 44.33.231-AS 44.33.239) instructs the Alaska Film Office to:

1. cooperate with organizations in the private sector for the expansion and development of the film production industries in the state;
2. promote Alaska as an appropriate location for film production;
3. provide production assistance through connecting film directors and makers, and producers with Alaska location scouts and contractors, including contractors providing assistance with permit applications;
4. certify Alaska film production internship training programs and promote the employment of program interns by eligible productions; and
5. in cooperation with the Department of Revenue, administer the Alaska Film Production Incentive Program.

Here is a summary of Alaska's Tax Credits:

TAX CREDIT	VALUE	REQUIREMENTS
Base Credit	30 percent	Production expenditures must be made in Alaska.
Alaska Hire	+ 10 percent	Wages paid to Alaska residents receive an additional 10 percent credit.
Seasonal	+ 2 percent	Production expenditures made between Oct. 1 and Mar. 30 receive an added 2 percent credit.
Rural Location	+ 2 percent	Production expenditures made in a rural area also receive an added 2 percent credit.
Maximum Possible Credit	**44 percent**	**Portions of a production with an Alaskan crew, filmed in rural Alaska between October and March.**

ALASKA
FILM.ALASKA.GOV

Alaska Film Office

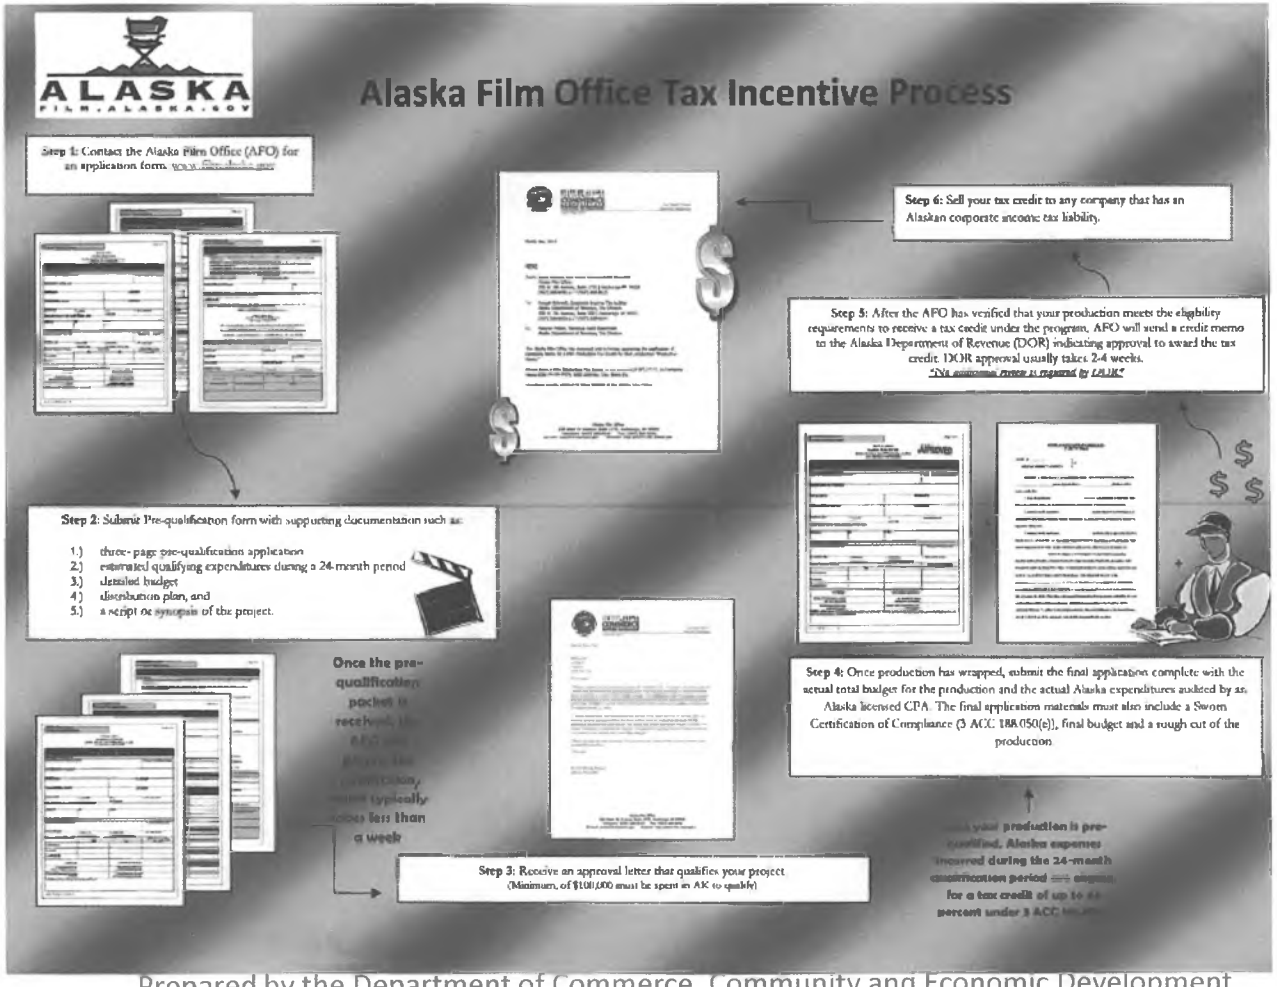
Provide Assistance:

AFO and DCCED Staff

- Respond to daily inquiries about filming in Alaska
- Conduct follow-up and outreach with contacts developed through advertising, trade show and other promotional activities
- Meet with producers and provide introductions to state and local contacts
- Explain the Incentive Program and assist producers with the application process
- Provide alternatives and creative solutions to production challenges
- Work with Alaskan businesses, community representatives and other stakeholders regarding prospective projects

ALASKA FILM OFFICE

Workforce Development:



The AFO is working with a variety of organizations to develop a skilled film industry workforce in Alaska:

- Dept of Labor: working to develop apprenticeships that would lead to technical careers in the film industry
- University of Alaska to provide the academic programs leading to certificates and degrees recognized by the film industry
- Private sector efforts to provide the on-the-job training
- Youth training programs
- Rural outreach efforts
- Skilled trades: provide workers with the training necessary to work in set construction, electrical/lighting and other specialized film industry jobs

SENATE BILL 23

Extending the Alaska Film and Television Production Tax Incentives

Senate Finance Committee

March 21, 2011

Goals of SB23 – Building on our success

- Continue the growth and success of Alaska's burgeoning film industry
- Offer a clear signal to the film and television production industry and Alaska businesses that Alaska is open for business
- Develop our workforce and train Alaskans. Productions have an economic interest in hiring and training Alaskans.

SINCE 2008
Approved Credits
18 productions have received tax credits
These productions filmed in Alaska for 910 Days and spent nearly $19 Million in Alaska
Pre-Approved Credits
28 productions are pre-qualified for incentives
If all of these productions are completed they will have an estimated Alaska spend of nearly $85 million dollars

Projected Potential Boost to Alaska's economy

$100 Million Dollars

A recent study by Ernst and Young showed for every $1 dollar the state spends on film incentives it generates $6 in economic activity.

Source: February 2011 Ernst and Young Report – Economic and fiscal impacts of the Michigan film tax credit

Since 2008- Who has Benefitted?

Wage earners

- Cast and crew
- Electricians
- Carpenters
- Truck Drivers
- Plumbers

Filming and production have taken place in 35 Alaska communities

Since 2008- Who has Benefitted?

Businesses large and small

- Construction Companies
- Air Service Providers
- Catering Companies
- Hotels
- Retailers
- Freight Companies
- Maintenance Firms
- Rental Companies
- Security Companies
- Tourism Businesses

Economic Impacts – Everybody Loves Whales

- A total of 1,300 Alaskans earned income directly related to Everybody Loves Whales
- Alaskans earned a total of $4 million in wages during the 58 day filming effort

Source: McDowell Group Report – Initial Assesment of the Impact of Everybody Loves Whales

Economic Impacts – Everybody Loves Whales

Filming of Everybody Loves Whales included spending with at least 80 different Alaska businesses

The total economic impact of filming Everybody Loves Whales was an estimated $16.5 million

Source: McDowell Group Report – Initial Assesment of the Impact of Everybody Loves Whales

Looking Ahead

- Many exciting projects on the horizon
- Train and develop an Alaska film and television workforce
- Other states are struggling

Senate bill 23 - Overview

- Simple extension
- Extends for 10 years the Alaska Film and Television Production Incentives
- Offers an additional $100 million dollars in tax incentives for each 5 year period

By Extending the incentives
• We can continue to bring new money in to our economy
• Keep our businesses busy and put Alaskans to work
• Diversify our economy and grow and develop this new and multi-million dollar business in our state

RULES COMMITTEE CHAIR

Sponsor Statement

SB 23: Alaska Film Production Incentive Program Extension

Senate Bill 23 ensures Alaska's competitiveness with other states and countries by continuing the successful Alaska Film Production Incentive Program. Since its inception, the film incentive program has brought millions of production dollars to Alaska. Productions have also created hundreds of jobs and provided marketing and promotional opportunities for Alaskan businesses, products, and the tourism industry. The continuation of these incentives will create the economic stability required for the private sector to better plan and invest in Alaska's growing film industry infrastructure.

The law currently sunsets after five years or after $100 million in tax credits have been issued. The program offers an incentive of 30% on all qualified spending in Alaska, with an additional 10% for Alaskan hire, 2% for shooting in rural Alaska and 2% for working in the winter months. Eligible productions earn a transferrable tax credit certificate which they can sell to any company with an Alaska corporate income tax liability, offering tax relief to industries as varied as commercial fishing, mining and other business owners. Tax credits are issued only after the film production money has been spent in Alaska, the filming has been completed, and an independent CPA has verified all expenditures.

We have already seen the enormous benefits of "Everybody Loves Whales," a feature film project with an estimated $30 million production budget. On any given day of production, there were more than 100 Alaskans working both in front of and behind the camera. Over 1,000 Alaskans were employed as extras representing towns and villages across the state. Local businesses enjoyed a boost of more than 12,100 hotel nights, 8,800 car rental days and 7,900 security man-hours during what are typically the quietest months of the year.

Businesses that benefitted from this production included construction companies, towing companies, aerial charters, hardware stores, lumber yards, communication companies, landscaping, restoration companies, dumpster services and rentals, plumbing, heating, rental equipment companies, truck leasing, crane companies, paving companies, catering, cleaning, boat charters, diving companies, survey companies, engineering firms, printing, office supplies, motor-home rentals, shipping companies, airlines, hotels, and restaurants.

Although the legislation creating the film incentives passed in April of 2008, it took quite a while to get this new program up and running. The regulations took more than a year to write and implement,

and the current film office director wasn't hired until mid-2009. The first feature film project, "Everybody Loves Whales", didn't even begin filming until the fall of 2010. As has been reported recently in the press, some states with huge budget deficits have been cutting their film incentive programs. Alaska is fortunate that our finances are in good shape, and this only helps to make Alaska and our program all that more attractive to producers.

Senate Bill 23 would extend the film incentive program for 10 years. The legislation will provide an additional $100 million in tax credits for the first five years of the extension and $100 million for the final five years. Passage of Senate Bill 23 will continue to attract this new industry to Alaska. It will build on the jobs and business opportunities created by the existing film incentives and bring our state positive attention and substantial investment. It will continue to help in developing a strong and diversified economy that will entice our graduates to remain in Alaska instead of looking for jobs elsewhere.

MEMORANDUM February 8, 2011

SUBJECT: Sectional summary (SB 23 (Work Order No. 27-LS0252\M))

TO: Senator Johnny Ellis
Attn: Matthew Moser

FROM: Alpheus Bullard
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Doubles the amount of transferable film production tax credits that the Department of Revenue, in cooperation with the film office in the Department of Commerce, Community, and Economic Development, may provide a producer for certain qualified production expenditures. Limits the amount of credits that the Department of Revenue may provide before July 1, 2018, to $100,000,000.

Section 2. Permits a film production to be eligible for a tax credit if the producer has $100,000 or more in qualified expenditures in a consecutive 36-month period. At present, a producer must have $100,000 or more in qualified expenditures in a consecutive 24-month period.

Section 3. Makes certain information submitted to the film office by a producer confidential.

Section 4. Adds the cost of transferring digital media to film or tape to the list of expenditures that may qualify as a "qualified expenditure" in calculating a tax credit.

Section 5. Permits the film office to determine a film production's qualified expenditures, award a tax credit, or review a tax credit that has been provided to a film production that has received a notice of qualification under AS 44.33.234(b) before July 1, 2023.

Section 6. Requires the commissioner of revenue to notify the presiding officers of each house of the legislature and the revisor of statutes in writing when the amount of tax credits provided under AS 43.98.030(f) and the estimated amount of tax credits that can be claimed, based on notices of qualification issued under AS 44.33.234(b), together equal $200,000,000.

Section 7. Extends the sunset date for the transferable film tax credit program to July 1, 2023, if the amount of tax credits awarded under the program has not reached $200,000,000 before that time.

Section 8. Extends the period that the film office, in cooperation with the Department of Revenue, may review, audit, and bring legal proceedings to recover any amount of a tax credit issued under AS 44.33.235.

Summary 23

Executive Summary

The Anchorage Economic Development Corporation contracted with McDowell Group, an Alaska research and consulting company, to assess the economic impacts of the 2010 filming in Anchorage, Barrow, and Seward of the Universal Studios motion picture *Everybody Loves Whales.* The production, which included several well-known actors and hundreds of cast and crew, had high visibility during the months of shooting, but there is likely little understanding about the full economic impact it had on the economy and the large number of vendors whose businesses were directly affected during the two-month filming effort.

Summary of Findings

Alaska's film Industry

- Based on data provided by the Alaska Film Office, $14.9 million was spent in Alaska in FY2010 and FY2011 year-to-date on the production of feature films, documentaries, television programs, and commercials. It does not include *Everybody Loves Whales* or other production efforts this year that have not submitted spending data to the state for the state's film production tax credit.
- Filming or other production-related activities occurred in 35 Alaska communities over the past two years.

The U.S. Film Industry

- The motion picture industry's global box office revenue in 2009 totaled $29.9 billion (U.S. dollars), an increase of 7.6 percent from 2008. Approximately one-third of that amount came from the U.S. and Canada ($10.6 billion, up ten percent from 2008 and 20 percent from 2003).
- The U.S. film industry supported 2.4 million jobs and over $140 billion in total wages in 2008. This included 296,000 jobs in the core business of producing, marketing, manufacturing, and distributing motion pictures and television shows, and 453,000 jobs in related businesses including theaters, rental stores, television broadcast companies, cable companies, and online ventures.
- In 2008, there were over 95,000 businesses in total related to the film industry, which made more than $40 billion in purchases of goods ands services. The industry paid an estimated $15.7 billion in federal taxes.[1]

Film-Based Tourism

Alaska tourism marketers are attempting to capitalize on movie and television program-generated publicity by running ads during the programs featuring Alaska wildlife, scenery, and activities including fishing, kayaking, and rafting. While it is difficult to quantify the effect on visitor travel of this type of exposure, experience elsewhere in the country suggests there is potential for it to help stimulate tourism growth.

[1] *The Economic Contributions of the Motion Picture and Television Industry to the U.S. Economy,* 2009

Economic impact of Everybody Loves Whales

The total economic impact of the filming of *Everybody Loves Whales* on the Alaska economy was an estimated $16.5 million.[2] Of that amount, $6.2 million consisted of labor income (payroll and benefits). In other words, Alaska workers earned an extra $6.2 million because *Everybody Loves Whales* was filmed in the state, and the state as a whole generated $16.5 million more in output than otherwise would have been the case. Specific economic impacts include:

- A total of over 1,300 Alaskans earned income directly related to filming of *Everybody Loves Whales.* This includes 175 crew, 48 Alaska resident cast members (with speaking parts), and 1,100 extras. Based on hours worked and wages earned, the *Everybody Loves Whales* workforce translates into the annual equivalent of 110 jobs.

- Alaskans (actors, extras, and crew) earned a total of $4 million in wages during the 58-day filming effort, the equivalent of about $70,000 for each day of production in Alaska.

- Filming of *Everybody Loves Whales* included spending with at least 80 different Alaska businesses and organizations. This spending on goods and services totaled $7.7 million.

- A wide variety of businesses provided goods and services to the film production project, including hotels, rental car companies, restaurants, security firms, construction and engineering companies, realtors, boat charters, diving companies, sled dog operations, hardware stores, clothing stores, dumpster rental companies, plumbing and heating companies, caterers, grocery stores, seafood processing companies (ice), and dozens of other businesses.

- Including payroll earned by Alaska residents and purchases of goods and services from Alaska businesses, filming of *Everybody Loves Whales* directly accounted for $11.7 million in Alaska spending.

- Most of the economic impact of filming was in Anchorage, but Barrow also benefitted from the week of filming that was done there. Impacts also extended specifically to the Kenai Peninsula, as well, as a result of brief filming in Seward and the significant purchases of ice from area seafood processing companies.

- Production company spending in Alaska on goods and services, coupled with local spending of new payroll dollars generated by the film project, supported additional jobs and income throughout the Alaska economy. Including indirect and induced effects (the multiplier effect), the economic impact of filming *Everybody Loves Whales* equaled the annual-equivalent of 180 jobs and $6.2 million in labor income.

[2] These estimates are based on a preliminary analysis conducted prior to the filing of detailed financial documents required to obtain the film tax credit.

- Both the labor income and total output estimates are conservative to the extent they do not capture all of the spending by non-Alaskan cast and crew members. Spending on accommodations, transportation, and meals was captured, but incidental spending by non-resident cast and crew members while in Alaska was not. Anecdotally, at least some of the visiting cast and crew spent freely on visitor activities, entertainment, and cold-weather clothing while in Alaska.

Estimated Economic Impact of *Everybody Loves Whales*

	Direct	Indirect and Induced	Total
Employment	**110**	**70**	**180**
Labor Income	$4,000,000	$2,200,000	$6,200,000
Spending on Goods and Services	$7,700,000	$2,600,000	$10,300,000
Output	$11,700,000	$4,800,000	$16,500,000

- Including direct and indirect labor income, filming of *Everybody Loves Whales* generated approximately $107,000 in income for Alaskan workers for each day of filming.

- Total direct and indirect output (the sum of all direct and indirect payroll and non-payroll spending) related to filming *Everybody Loves Whales* in Alaska was approximately $16.5 million.

- Filming of *Everybody Loves Whales* created approximately $285,000 in economic activity for each day of filming in Alaska.

Methodology

Compared to other economic impact studies of this type, this study is unusual in its timing and, consequently, the amount of primary research required to gather the necessary information on direct spending related to filming of *Everybody Loves Whales*. Typically, studies are conducted after all of the accounting has been finalized and that information is available, either from the studio or production company itself or from state agencies that administer film tax credit or other incentive programs.

Eventually that detailed information regarding *Everybody Loves Whales* will be available from the Alaska Film Office, the state government entity that manages Alaska's tax film tax incentive programs, but in the interim, most of the information gathered for this study was collected from the various Alaska production services companies involved, and from direct contact with a large number of actual vendors. Most of the data used was collected directly from a vendor or production company, but in some cases the numbers were estimated based on conversations with industry professionals.

To calculate the multiplier effect of the direct spending – which included both wages and benefits to people hired to work on the film and direct vendor spending on everything from hotel rooms to security – the study team used IMPLAN[3], a well-known input/output modeling program. Both direct spending and multiplier spending is calculated for Alaska as a whole, although the vast majority of the spending and economic impact was in Anchorage.

[3] Minnesota IMPLAN Group, Inc.

Direct Economic Impacts of Everybody Loves Whales

Overview of the Movie

Everybody Loves Whales is set in 1988 and tells the story of a non-profit activist and a government employee working together to free three California gray whales trapped below the sea ice near Barrow, Alaska.[4] The movie is directed by Ken Kwapis, and the cast includes Drew Barrymore as the nonprofit aid worker, John Krasinski as a local reporter, Stephen Root as the Alaska governor, and Kristen Bell, Ted Danson, and Dermot Mulroney in supporting roles. Distributed by Universal Pictures, a division of NBC Universal and subsidiary of the conglomerate General Electric/Vivendi SA, the film is slated for a 2012 release.

Filming began in Alaska on September 16, 2010 and concluded in November 2010. The film was shot in 58 days, had 48 speaking parts, and about 1,100 extras. The first unit location was in Anchorage, where a replication of parts of Barrow was built in the Ship Creek area. The second unit filmed in and around Barrow. Additional re-shoots are set to film in late February or early March with a small contingent of cast and crew.

Preparation and Shooting

The casting company began searching for the 48 speaking part actors and 1,000-1,200 non-speaking extras in Barrow in May 2010. They subsequently traveled around the state, holding casting calls in Kotzebue, Nome, Fairbanks, Juneau, Sitka, Homer, Seldovia, and Bethel. A total of twenty casting sessions were also held in Anchorage and the Mat-Su Valley.

The roles of the extras equated to 2,600 "man days" for those hired (approximately 2,500 in Anchorage). The term "man days" is an industry term used to track the demand and use of extras; "man days" are not necessarily eight hour days and are often longer because of the compressed timelines of movie making. All extras were paid union wages.

Actors cast in speaking parts were paid Screen Actors Guild (SAG) union rates. About half the actors with speaking parts were from Anchorage and the other half came from other parts of the state. The majority of the speaking parts cast worked an average of one day. One of Alaska's Native corporations provided assistance to the production company by providing a database of shareholders who were interested in being cast in Alaska Native roles in the movie and artists who could create authentic Native artwork, clothing, and other elements of set design.

Crew members working with the actors and extras included hairdressers, makeup artists, and wardrobe experts, among a variety of other trade professionals. Supervisors for the various departments came from Los Angeles, but extra hairstylists and makeup people were hired locally. The specially outfitted hair, makeup, and wardrobe trailers were brought from California by barge.

[4] Internet Movie Database (IMDb)

The cast, extras, and crew were all fed by catering and craft services companies. Warm meals prepared by the catering chefs included two or three entrees, salads, rolls, desserts, etc. The catering company fed an average of 225 people a day (cast and crew). Separate from catering services, craft services provided snacks such as coffee, soups, cheese and crackers, juice, and nuts – snacks that could be eaten while working – throughout the work day.

The production company sent staff to shop locally for 1980's wardrobe items, furniture, and accessories. What they could not find in town, construction crews built from scratch. For example, they hired Inupiat seamstresses to fabricate native costumes and artwork. Local laundry and dry cleaning businesses were frequented to clean wardrobe as well as the crew's own clothing items.

Alaska Vendors

Everybody Loves Whales directly generated business for hundreds of Alaska vendors of goods and services. In total, at least $7.7 million was spent with Alaska businesses as part of the effort to film the movie. The major categories of vendor spending are detailed below.

Transportation

The small army involved in the filming of *Everybody Loves Whales* spent at least $1.2 million on Alaska transportation companies including more than $500,000 on car and motor home rentals (including rental car taxes), $160,000 on fuel, and at least $300,000 in transporting equipment and supplies.

Accommodations

One of the most obvious economic impacts of *Everybody Loves Whales* was the large demand it created for accommodations. An Anchorage hotel provided rooms to the cast and crew that totaled 12,100 room nights. Two Anchorage homes were also rented for six months each. During the production team's shooting in Seward and Barrow, local hotels provided rooms. Total spending on accommodations equaled $1.1 million.

Construction

Another large beneficiary of big-budget movie making is the construction industry. Local vendors that participated in construction efforts related to *Everybody Loves Whales* included engineering firms, crane rental companies, fence builders, pavers, and renovating and restoration construction companies. An estimated $850,000 was spent in Alaska on construction-related services.

Location Fees

At least 20 locations in Anchorage, Barrow, and Seward were leased or paid location fees during filming. Beneficiaries included the Municipality of Anchorage, Anchorage School District, Alaska Railroad, Merrill Field, the Alaska Sealife Center in Seward, the Anchorage Daily News, and several other private building owners. In all, at least $730,000 was paid for locations used in filming.

Security/Safety

Over $300,000 was spent on security and safety considerations, including over $200,000 for security on the sets and at the Port of Anchorage, and an estimated $100,000 for diving support and emergency services for scenes in and around the water (such as shooting at the Jewel Lake location). The production also paid about $13,000 for police and fire department support (off-duty personnel signed up for the overtime).

Wardrobe and Props

An estimated $200,000 was spent in the state, primarily in Anchorage, on wardrobe and costumes used in the movie. Alaska purchases for props and other items used on the various sets are estimated to have produced well over $400,000 in Alaska spending.

Production Services

The producers of *Everybody Loves Whales* used several Alaska-based film production companies to assist in the filming of the movie. These companies earned an estimated combined total of $350,000.

Ice and Miscellaneous

To produce the desired Barrow-like background in Anchorage, the production company spent an estimated $500,000 on ice purchased from several seafood processing companies – which extended their season by a few months for some workers. The ability to produce ice in such large quantities was reportedly a surprise for the movie makers who were not aware of Alaska's well-developed seafood processing industry and its industrial strength ice-making capacity. The production at first thought they would have to transport ice from a much farther distance at greater expense.

Other miscellaneous expenses to make *Everybody Loves Whales* included portable toilet rentals, electricity and other city utilities. Additionally, although much of the specialized equipment used to make movies was brought from outside Alaska, equipment rentals from Anchorage and other Alaska companies still totaled an estimated $1 million.

Alaska Resident Participation

Aside from all of the Alaska vendors that sold goods or services to the production, an estimated 1,300 Alaskans participated directly as either cast or crew. The Alaska-based crew averaged about 175 people per day over the two months of shooting – typically 12 hours or more per day – which is considered normal when filming a movie or television program. The hundreds of Alaskans hired to be in the film as extras or for brief speaking roles generally worked only a few days each. In total, Alaskans earned an estimated $4 million in wages and benefits.

Multiplier Effects of Everybody Loves Whales

Any infusion of new money into an economy, such as the wages and wide variety of vendor purchases associated with filming *Everybody Loves Whales*, circulates throughout the economy in additional rounds of spending and supports additional jobs and wages in the process. The total amount of this subsequent spending, hiring, and payment of wages is described as the multiplier effect.

One of the most frequently used methods for determining multiplier effects is the IMPLAN[5] input/output model, which uses historical relationships between industries to assess the effects changes within one industry will have on the overall local economy. Typically, more developed industries have larger multipliers because supply chains tend to deepen and expand over time. Alaska's film industry multipliers are considerably smaller than they would be in Los Angeles or Vancouver, for instance, because those cities have well developed supply chains to provide much of what is required to make movies and television shows.

To the extent the film industry was to grow and expand in Anchorage and Alaska, the multiplier effects of the industry could also be expected to grow. To illustrate this point, a Michigan study of the economic impacts of the film industry found a 2008 employment multiplier of 1.66 could grow to 1.90 by 2012.[6]

There are two types of multiplier effects:

Indirect impacts are those generated by the businesses and individuals in the local economy that provided goods or services to *Everybody Loves Whales*. For example, the jobs and payroll created at the hotel where the non-resident cast and crew stayed are part of the indirect impacts.

Induced impacts are those created as a result of the subsequent spending by people who earned wages working directly on *Everybody Loves Whales*. An example of this would be the groceries purchased by someone hired to build sets for the movie.

Total Employment

Although an estimated 1,300 Alaskans worked and earned money during the filming of *Everybody Loves Whales*, the annualized job count[7] is much smaller, since the 1,100 Alaskan cast members involved worked for very brief periods, on average, and had modest earnings. Direct employment was estimated to be 110 annualized jobs, which in turn generated 70 additional jobs for a total employment impact of 180 jobs.

[5] Minnesota IMPLAN Group, Inc. produces the IMPLAN data and software. IMPLAN was developed in the 1970s as part of an effort by the U.S. Forest Service to assess the potential impacts of various resource management plans on local communities.

[6] *The Economic Impact of Michigan's Motion Picture Production Industry and the Michigan Motion Picture Credit,* February 6, 2009.

[7] IMPLAN uses annualized job numbers from federal and state labor statistics. An annualized job is one that is held for twelve months of the year. To convert the brief periods of work into annual equivalent employment, total payroll for the two different categories – cast and crew – was divided by typical annual earnings in Alaska for those types of jobs. That calculation produced an annualized job count of 20 cast jobs and 90 crew jobs. The employment multiplier was then added to that direct job count to produce the final estimated employment impact of 180 jobs.

Total Labor Income

Total labor income (payroll and benefits) generated by *Everybody Loves Whales* was $6.2 million, including the $4 million spent by the production directly, and an additional $2.2 million generated as portions of the direct vendor spending and labor income was spent and re-spent in the Alaska and Anchorage economies.

Total Output

The filming of *Everybody Loves Whales* including total direct spending of $11.7 million, including wages and purchases of goods and services. When the multiplier effects are added to these direct expenditures, the total economic impact of *Everybody Loves Whales* in terms of total output[8] equaled $16.5 million.

Both the labor income and total output estimates are conservative to the extent they do not capture all of the spending by non-Alaskan cast and crew members. Spending on accommodations, transportation, and meals was captured, but incidental spending they may have done while in Alaska was not.

While not possible to measure this type of spending within the scope of this project, anecdotally, visiting cast and crew spent a significant amount on some of Alaska's unique visitor-industry experiences, including dog sled rides, fishing trips, and flight seeing. Cast and crew from outside Alaska also were reported to have spent freely on coats, boots, gloves and other cold-weather clothing. Although catered meals were provided for cast and crew, downtown restaurants reported a noticeable boost in sales that they attributed to the filming of *Everybody Loves Whales*. The timing of the increased business was also a benefit in that the summer visitor season was winding down in September when filming began.

Estimated Economic Impact of *Everybody Loves Whales*

	Direct	Indirect and Induced	Total
Employment	**110**	**70**	**180**
Labor Income	$4,000,000	$2,200,000	$6,200,000
Spending on Goods and Services	$7,700,000	$2,600,000	$10,300,000
Output	$11,700,000	$4,800,000	$16,500,000

[8] Output is defined in IMPLAN as the value of industry production. For service providers, this equates to sales, for retailers, their gross margin (rather than their gross sales), and for manufacturers, their sales plus or minus changes to their inventories.

Profile of Alaska's Film Industry

Based on data provided by the Alaska Film Office, $14.9 million was spent in Alaska in FY2010 and FY2011 year-to-date on the production of feature films, documentaries, television programs, and commercials. This tally includes productions that have submitted detailed accounting to the state for the state's film production tax credit. It does not include *Everybody Loves Whales* or other production efforts this year that have not submitted spending data. Filming or other production-related activities occurred in 35 Alaska communities.

Alaska Film Productions, FY 2010 and FY 2011 to Date*

Type	Fiscal Year	Qualified Spending	# Alaska Jobs Created	Total # Days Filming	Total # AK Filming Days	AK Communities Involved
Feature Film						
Beyond	2011	$6,602,752	38	20	20	Anchorage and surrounding areas
On the Ice	2011	$524,628	8	25	25	Anchorage, Barrow

* Table does not include *Everybody Loves Whales* because spending data has not yet been submitted.

In 2009, Alaska had 34 companies with employees operating in the motion picture and sound recording business. Combined, these companies provided 367 jobs and paid $4.7 million in salaries.[9] An additional 112 sole proprietors (self-employed workers or companies without employees) earned $2 million.[10] The numbers have not changed significantly either up or down for the last five years.

By occupational classification, 52 Alaskans worked as camera operators in television, video, or motion picture productions in 2008.[11] An additional 26 worked as film and video editors, and 11 worked as sound engineering technicians. Many of the employees of motion picture and sound recording businesses are classified occupationally under more general categories such as administrative support workers, which explains why the number of people working in film-related occupations is significantly smaller than the number of jobs in the industry.

Alaska Film Industry Infrastructure Needs

To the extent Alaska can deepen its supply chain in the film industry and develop a trained and experienced workforce, it can increase the impact the industry has on the state's economy. In other words, it can create bigger multiplier effects from the initial round of direct spending.

Hawaii's film office, for example, divides its history of film making into two parts: the first 70 years, then everything since 1968 when the television show "Hawaii Five-O" filmed its first of 12 seasons.[12] During the pre-Hawaii Five-O years, Hawaii provided beautiful locations and memorable settings, but little else. After Hawaii Five-O, the state had a production infrastructure that both helped attract additional films and helped increase the economic impact that movies and television shows had on the state's economy. The production facilities and experienced workforce created a legacy that includes television programs such as Magnum P-I and a modern version of Hawaii 5-O, but also a whole host of movies and a mature movie-making industry as an important part of the state's economy.

In Alaska, the most obvious enhancements to the state's movie-making infrastructure would include a sound stage, customized film-making equipment for lighting, filming, and support of cast and crew (specialized trailers for makeup, wardrobe, and catering, for example), and a trained and experienced workforce.

Sound Stage

A sound stage is a sound-proof building, ranging in size from a room or small building to 50,000 square feet. Soundstages are multi-purpose buildings that provide a customizable location for indoor filming in addition to offices, dressing and make-up rooms, mill shops (carpentry and set design), and various rooms to store props and other equipment. Soundstages allow sets to be built to exact specifications, sometimes negating the need for multiple physical filming locations. Production costs can be cut significantly by reducing the number of locations where filming is done.

Due to the extensive soundproofing required for a soundstage, and the fact that older buildings sometimes cannot bear the extra load, it is sometimes cheaper to build a new building designed to take the weight of soundproof walls and ceilings. The building must be able to take massive amounts of stress on its power, as it will be providing electricity to the cameras, lights, and sound equipment.

The primary benefit of sound stages is the increased flexibility they provide in a shooting schedule. Especially in a state like Alaska, where weather is often inclement and unpredictable, and with varying hours of daylight, the lack of sound stages can be a significant impediment to large productions. In the absence of sound stages, the *Everybody Loves Whales* production team used a variety of small sets and warehouses scattered throughout the city, which added to production costs and took extra time.

Light, Sound, and Other Customized Equipment

Research interviews for this study revealed that much of the customized equipment needed to film *Everybody Loves Whales* was barged to Alaska because it was not available locally. Specialized film-making equipment

[12] *Hawaii's Film & Television Legacy*, Hawaii Film Office

includes a vast array of grip (electrical) equipment and a variety of cranes and dollies (moving camera platforms). In addition, film making on this scale requires a fleet of specialized trailers for wardrobe, makeup, and catering, among other things.

Trained and Experienced Industry Professionals

A skilled, experienced workforce is a key element in attracting companies to an economy for any industry, including the film industry. A film-making workforce includes technical crew and specialized support service companies as well as the actual cast members and extras that appear on camera.

College and University Programs

Currently, Alaska does not have a dedicated film school or program, although efforts are underway at University of Alaska Fairbanks (UAF) to start a film degree program that will focus on providing students with the skills necessary to start a career in cinema and other media. The Journalism and Communications Department at the University of Alaska Anchorage (UAA) is also in discussions with a local film studio regarding the placement of interns on an upcoming production.

Crew Training

Having trained professionals in lighting, sound, and film production in place means a production does not have to transport and house the necessary professionals while in production. Among Alaska's current efforts to address the shortfall of trained crew members is a series of educational workshops provided by a nonprofit film advocacy group. Training is available at both the introductory and more advanced levels and a film degree or other specialized training is not required to participate in the workshops. So far, over 100 Alaskans have participated.

Obviously, the best way to get and keep a trained and experienced film crew workforce is to generate a regular stream of work in the industry and offer on-the-job training. As noted above, much of Hawaii's success in attracting both movie and television productions is traced back to the trained crew and infrastructure that was the legacy of Hawaii 5-O's successful 12-year run. Similarly, a major benefit to New Zealand from the filming of three *Lord of the Rings* movies there was the large supply of trained crew members that it generated.

Potential for Film-Induced Tourism

The Film Industry's Connection to Tourism

Research on "film tourism" is one of the newer areas of study in the tourism industry and falls into several broad categories, including:

1. How does a movie or television program impact decisions to travel?
2. What are the profiles of movie or television program tourists?
3. How can a state or region market destinations through their connections to movies and television?

In some cases, the link between a movie or television program and a destination's success as a tourist destination is obvious. For example, it is safe to assume the 1995 movie *Braveheart* was largely responsible for a 300 percent increase in visitors to the William Wallace Monument in Scotland in the years immediately following its release (William Wallace's stylized history was the subject of the movie). Similarly, the baseball field built in the middle of Iowa cornfields for the 1988 baseball movie *Field of Dreams* can safely trace the source of its more than one million tourist visits to the successful movie for which it was constructed.

Often the link is less obvious, but plausible. Tourism visits to Fort Hayes, Kansas increased by 25 percent after the 1990 movie *Dances with Wolves* was partly filmed there. Another example of this type is the 1991 movie *Thelma and Louise, which* featured Utah's Arches National Park prominently in its climactic scenes. The movie was released in the spring and that same year the park saw a 19 percent increase in visitors.[13]

Two movies among many that highlight Alaska's wilderness and natural beauty and raise awareness for the state are the 1991 film *White Fang*, and the 2007 film *Into the Wild*. More recently, *On the Ice*, one of 16 feature-length films selected to compete in the 2011 Sundance Film Festival, is set in and around Barrow and joins *Everybody Loves Whales* as a film that could generate tourism interest in Alaska's far north.

Another example is the 2009 film *The Proposal* starring Sandra Bullock. The film was set in Sitka, but was actually filmed in Massachusetts. The fact that the movie was set in an actual Alaska location generated name recognition for Sitka and likely some tourism interest (unlike the fictional town of Cicely, Alaska where the successful television program *Northern Exposure* was set though filmed in Washington.)

Alaska's spectacular natural scenery and iconic status as The Last Frontier create significant opportunity for film-induced tourism. People who visit the state because of a connection to movies or television may come to see a specific featured location or because they are more broadly attracted by mountain ranges, glaciers, wildlife, or expanses of wilderness of the type that first captured their imagination on the big or small screen.

[13] *Promoting Destinations via Film Tourism: An Empirical Identification of Supporting Marketing Initiatives*, Journal of Travel Research, May 2006.

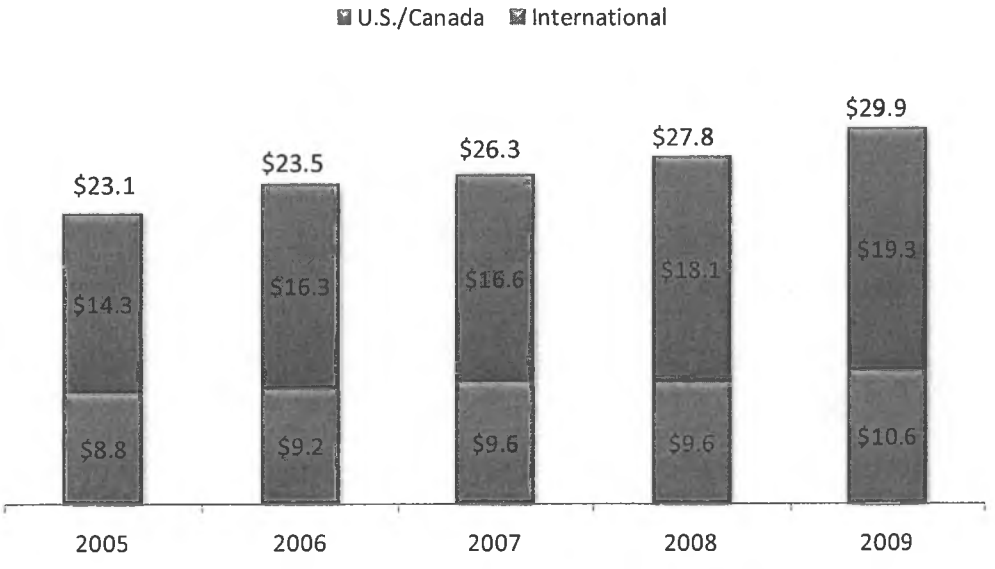
Television Programs in Alaska

The last several years have brought growing interest in reality television series based in Alaska. "Deadliest Catch" and "Ice Road Truckers" tap into the Alaska mystique of extreme weather conditions and work environments and "Sarah Palin's Alaska" showcases the state's wildlife and rugged beauty as Alaska's former governor and 2008 vice presidential candidate travels around the state with her family.

"Gold Rush Alaska" documents a group of men from Oregon who prospect for gold in Southeast Alaska after they lose their jobs and businesses during the recession. "Out of the Wild: The Alaska Experiment" follows small groups of people with urban backgrounds as they try to live in back-country Alaska locations during fall and winter months.

Alaska tourism marketers are attempting to capitalize on the publicity by running ads during the programs featuring Alaska wildlife, scenery, and activities including fishing, kayaking, and rafting. Kathy Dunn, the Alaska Travel Industry Association's marketing director, has been quoted as saying, "Obviously, any time you put Alaska in front of people, no matter the context, it's a good thing."[14] As with movie-based tourism, it will be difficult to quantify the effect of this type of exposure with precision, but there is significant potential for it to help stimulate tourism growth.

[14] *Alaska Looks to Cash in on Palin, 'Deadliest Catch,"* Associated Press, December 29, 2010



Overview of U.S. Motion Picture Production

According to the Motion Picture Association of American (MPAA), the motion picture industry's global box office revenue in 2009 was estimated to be $29.9 billion (U.S. dollars), an increase of 7.6 percent from 2008. Approximately one-third of that amount came from the U.S. and Canada ($10.6 billion, up ten percent from 2008 and 20 percent from 2003).

A total of 217.1 million different people bought movie tickets in the U.S. and Canada in 2009. On average, they bought 6.5 tickets during the year and purchased a total of 1.4 billion tickets. The arrival of 3D movies in 2008 is responsible for much of 2009's U.S./Canada growth (of the $1 billion increase, ninety percent came from 3D box office).

The movie industry was more resistant than most to the deep national recession. Domestic growth was minimal in 2008, but then resumed again in 2009, and international growth slowed in 2007 before quickly picking up again in 2008. The movie industry is also an important exporter for the U.S. economy, with a large positive balance of trade (exports minus imports).

Worldwide Box Office (U.S. $ Billions)

Source: Motion Picture Association of America

Substantial additional growth for the industry appears almost certain, given that the U.S. accounts for about 6 percent of the world's population, but approximately 50 percent of consumer dollars spent on movies and television. International growth is expected to be strong for the foreseeable future, likely far outpacing domestic growth.

Hollywood's Beginnings

The first full-length feature film was actually made in Australia. *The Story of the Kelly Gang*, was an 80-minute silent film made in 1906. It was not until 1911, after 16 films had already been made in Australia, that other countries began film production.

The first American film companies were established in New Jersey and New York. However, at the time, productions were shot in glass studios using natural sunlight, something that could not be guaranteed in the New Jersey-New York area. Los Angeles, on the other hand, had clear days, dry weather, a variety of natural landscapes – oceans, deserts, mountains, forests, and hills – and no enforcement of motion picture patents, making it the perfect place to develop the industry.

Present Day Film Industry

The United States has the oldest and largest film industry in the world, in terms of revenue, but other major film-making locations include India, Hong Kong, Egypt, and Nigeria. India's multi-lingual film industry is the world's largest, measured by ticket sales and number of films produced. Hong Kong is the film hub for the Chinese-speaking world and is unique for having little to no direct government support. Egypt has been called the "Hollywood of the East," and has recently branched out from restrictive religious taboos, allowing it to grow substantially. Nigeria is home to Africa's largest film industry and is second only to India in number of films produced.

While Los Angeles is often thought of as the center of the US film business industry, only one of the six major film studios, the Walt Disney Company, is fully based there. Sony Pictures Entertainment is also headquartered in California, but its parent company, Sony Corporation, is located in Tokyo. The other four film studios, Time Warner, News Corporation, Viacom, and General Electric/Vivendi SA, are all headquartered on the East Coast.

US Film Industry Jobs and Employment

According to a Motion Picture Association of American (MPAA) study[15], the U.S. film industry supported 2.4 million jobs and over $140 billion in total wages in 2008. The average salary in the industry was $55,600. The job counts include 296,000 jobs in the core business of producing, marketing, manufacturing, and distributing motion pictures and television shows, and 453,000 jobs in related businesses including theaters, rental stores, television broadcast companies, cable companies, and online ventures. In 2008, there were over 95,000 businesses in total related to the film industry, which made more than $40 billion in payments to more than 144,000 businesses. The industry paid an estimated $15.7 billion in federal taxes alone.

Domestic Competition for Filming Locations

While 60 percent of all movies and television shows are filmed in California or New York, filming occurs in all 50 states and Washington, D.C. In 2008, film industry employment grew by 8 percent in New Jersey, 31 percent in Georgia, 33 percent in Pennsylvania, and 45 percent in Massachusetts.

[15] *The Economic Contributions of the Motion Picture and Television Industry to the U.S. Economy*, 2009

In 2008, 208 movies were filmed in New York and 160 were filmed in California. More television shows were filmed in California, however (320 compared to 143 for New York). California's direct film industry employment was nearly 210,000 in 2008, and wages totaled $16.7 billion. New York's film industry job count was 87,000, with $7.6 billion in wages.

Obviously, Alaska's film industry is very small by comparison. In 2008, there was only one movie and three television shows filmed in the state. This resulted in 806 direct jobs and $11.1 million in estimated wages, according the MPAA study.

Hawaii, with the similar logistical challenge as Alaska of being remote from North America population centers, had nine movies and nine television shows filmed in 2008, bringing nearly 3,000 jobs and $96.2 million in wages[16] to the state. The growing number of television shows being filmed in and about Alaska holds promise for Alaska's film industry to become more like Hawaii's, with its long and steady history of television programs.

The Film Industry in Select States, 2008

State	Movies Filming	TV Shows Filming	Direct Jobs	Est. Wages
Alaska	**1***	**3**	**806**	**$11.1 million**
California	160	320	209,946	$16,700 million
Hawaii	9	9	2,998	$96.2 million
New York	208	143	86,637	$7,600 million
Massachusetts	13	14	11,524	$584.4 million
Michigan	35	8	15,161	$510 million
New Mexico	35	12	4,055	$146.8 million
Washington	11	2	11,290	$347.8 million

Source: Motion Picture Association of America

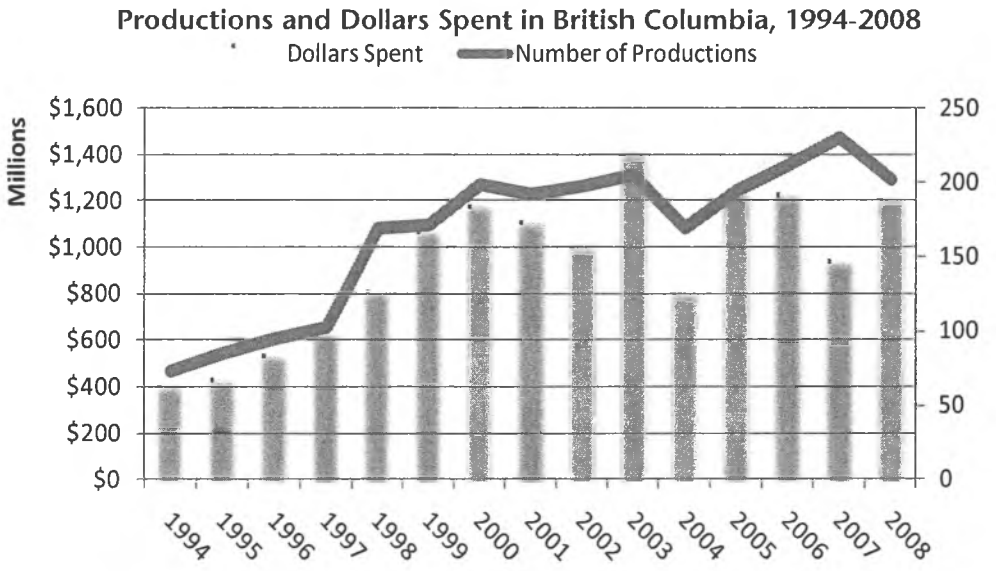
* *Into the Wild*

[16] One advantage Hawaii has is its supply of soundstages and studios, facilities Alaska is generally lacking.

Film Incentive Programs

It is outside the scope of this report to examine the costs and benefits of film incentive programs or to evaluate their role in drawing film production to Alaska. However, because these incentive programs are very much part of the national and international film-making landscape, they are briefly described here.

International Competition for Filming Locations of U.S. Productions



As of 2010, according to the MPAA, 39 states, Washington, D.C., and Puerto Rico have some type of film industry tax incentives program. Still, cheaper production costs have resulted in the filming of many U.S. movies in Canada, the United Kingdom, Australia, New Zealand, and Eastern European countries. Much of the time, the movies are actually set in the U.S., but filmed in these countries on sets designed to look like U.S. locations.

Canada

Canada's largest film studio centers are located in Vancouver, Toronto, and Montreal. Lower costs and tax breaks have helped create strong growth for Canada's film industry. Movie production incentives were first implemented in Canada in the late 1990s and include combinations of tax credits, cash rebates, grants, sales tax exemptions, lodging exemptions, free locations, and other miscellaneous perks. British Columbia and Vancouver in particular have seen dramatic growth in film production spending since implementing incentive programs. That success is of special relevance to Alaska since many of the films that are set in Alaska are filmed in British Columbia because of its similar geography.

Productions in British Columbia rose from less than 100 in 1996 to over 200 by 2003 (*refer to table on the next page).* Total dollars spent increased from around $500 million in 1996 to $1.4 billion in 2003. Dollars spent fell significantly in 2004 and have stayed below 2003 levels since, although the 2008 totals are impressive by any measure: $1.2 million in production spending (which was estimated to have generated 20,000 direct jobs and 15,000 indirect jobs).[17]

[17] British Columba Film Commission Production Statistics, 2008

Source: British Columbia Film Commission

Canada's success in using incentives to generate film industry growth was a contributing factor to similar efforts by Australia, New Zealand, and individual US states.

Australia

Australia's umbrella film-promotion organization, "Screen Australia," coordinates the Australian government's generous film subsidies and incentive programs. Some Australian states also offer additional incentives. Victoria, for example, has a grant system that provides cash rebates at the end of film production for a portion of filming costs. Cities sometimes provide incentives as well. Melbourne, which is part of the state of Victoria, offers city incentives in conjunction with federal incentives, but will not provide additional subsidization if Victoria has already done so.

According to Australia's Department of Foreign Affairs and Trade, "government funding represented 17 percent of the total funding for Australian produced and co-produced feature films in production." Most productions are filmed in and around Australia's two major cities, Sydney and Melbourne. Other cities could also handle the productions, but suffer from not having direct flights to and from Los Angeles.

New Zealand

New Zealand film production began in the 1920s, but stayed small until the 1970s. With the rise in prominence of feature films, directors, and actors connected to New Zealand, and the building of soundstages and studios, more productions were filmed here in the 1990s.

Tax incentives and subsidies were an important part of attracting major feature films in recent years including the *Lord of the Rings* trilogy, *Whale Rider*, the *Chronicles of Narnia* series, and *King Kong*. Due especially to the large production demands of the *Lord of the Rings*, and the hiring of many locals for crew and support, New Zealand now has a large film industry workforce of well-trained and skilled workers.

Alaska Efforts to Attract U.S. Film Production

Alaska Film Office

After being active in the 1980s and early 1990s, and then cut in the mid-1990s, the Alaska Film Office was reinstated in 2008 with the passage of the new incentives legislation. Part of the Alaska Department of Community, Commerce, and Economic Development, the film office's mission is to: 1) cooperate with the private sector for the expansion and development of the film production industries in Alaska; 2) promote Alaska as a film production location; 3) provide production assistance by furthering the relationships between film makers and producers with Alaska contractors; 4) certify Alaska film production internship training programs and promote the employment of program interns by eligible productions; and 5) administer the Alaska Film Production Incentive Program, in cooperation with the Alaska Department of Revenue.

As a relatively small organization, staffed by only a manager and administrative assistant, the film office is seeking ways to leverage its promotional and marketing efforts. These efforts include networking more closely with sister organizations such as the Alaska Seafood Marketing Institute and the Alaska Travel Industry Association to use their established connections and media infrastructures. The film office also intends to create additional promotional and marketing material, retool its website, and broaden its participation in future film location and industry conventions and trade shows.

Alaska Film Incentives Program

The Alaska Film Incentives is based on legislation passed in 2008 as part of an economic development initiative. The program is due to sunset in 2013. The film production incentive consists of transferable tax credit for qualifying production expenditures made in Alaska during a consecutive 24-month period. Projects that are eligible include films, documentaries, commercials and video promotion.

Interested productions must apply to the program. During pre-production, producers must submit an application that includes an estimated budget, a distribution plan, and a script or treatment of the project. Applicants who apply are eligible for up to 44 percent in transferable tax credit, including a base credit of 30 percent with 10 percent added for Alaskan hire, 2 percent added if filmed between October 1 and May 30, and another 2 percent added for filming in rural locations. In order to qualify, there must be a minimum of $100,000 spent in Alaska.

Upon completion of the production, and after an audit and review by the Alaska Film Office, the Alaska Department of Revenue issues a tax credit. The production can then sell its tax credit to any company that has corporate income tax liability in Alaska.

There are currently about 30 productions that have pre-qualified for the tax incentives. They include everything from the feature film, "Beyond," with a large Alaska spending impact, and the high-profile television programs "Deadliest Catch" and "Ice Road Truckers," to feature films with a much smaller impact in Alaska such as "The Proposal." Communities from throughout the state are represented and filming days range from two for "The Proposal" to over one hundred for the television programs "Deadliest Catch" and "R5Sons."

Tax Credits Issued in 2010-2011

In the last two fiscal years, Alaska film production spending has reached nearly $15 million and generated tax credits of nearly $5 million.

Alaskan Productions Tax Credits, Spending, and Credit/Spend by Fiscal Year

Fiscal Year	Tax Credits	Qualified Spending	Credit/Spend
2010	$244,547	$713,691	34.3%
2011 YTD	$4,664,869	$14,197,119	32.9%
Total	**$4,909,415**	**$14,910,810**	**32.9%**

Source: Alaska Film Office

Summary

By all measures, *Everybody Loves Whales* had a significant economic impact on Anchorage and a lesser, though noteworthy impact, on Barrow and other parts of the state. The production spent $7.7 million on goods and services with Alaska companies and an additional $4 million on payroll and benefits to Alaska residents who worked on the film as either cast or crew. Adding the indirect and induced effects to the direct spending generated an estimated total economic impact of $16.5 million.

The production generated an average of $285,000 for each of the 58 days of filming and included more than 1,300 Alaskans as either cast or crew. The timing of filming was also a benefit, considering that Alaska's strongly seasonal economy was just winding down from its summer peak when filming began in September.

With nearly $30 billion in global box office revenue, and substantially more growth expected, the industry has attracted the interest of most U.S. states and many countries eager for these types of economic benefits. It is outside the scope of this report to assess the effectiveness of the various incentive programs that have been created to attract film production, but there can be no question that the economic impact of the industry on an economy are substantial.

Testimony, March 21, 2011

Senate Bill 23

Senate Finance Committee

John Rense

My name is John Rense. I am the sector leader for engineering, construction and real estate for NANA Development Corporation.

Our passion is to expand our job base. We support Senate Bill 23 because it will promote investment in Alaska and create employment. Some of the jobs will be new, in a new industry in a State where diversifying the economy is important if not crucial. The bill will divert money that would otherwise be paid back in taxes, but that diversion creates an important flow back to the State's private economy.

I joined NANA in 1985. I came to help lead the Red Dog effort; at the time, the mine was still an un-permitted dream.

But by looking forward, we gained success in mining, oil and other business and today we have 2800 employees living in 70 Alaskan communities.

But we have learned you cannot rest. Economies are built on decade-long cycles and resource extraction can't do it all. We have to keep our eyes on the future.

We started looking at the film business several years ago when we were introduced to Evergreen Films, who had just opened a studio in Anchorage. Led by Mike Devlin, their move to Alaska was driven by our State's special social and physical presence.

I have to admit; at first we took the conversations lightly, thinking this was a business for other people, not us.

But what we found, once you cut through the glitz, is a very interesting economic story.

What are some characteristics?

- like natural resources, this is a platform industry. What I mean is it produces primary products including films, TV series and other programs. A fundamental revenue generator, it is a stand-alone industry. It requires support services similar to what we do today, like construction, food, hospitality, and security. It also creates specialized job opportunities not yet widespread in Alaska.

- another characteristic we like is its ability to find every nook and cranny. This industry has wide geographic application.

- we also find this industry goes way beyond whale movies. While the big productions get attention, there are hundreds of cable channels around the world trying to fill up 24

hours each day. There are documentaries and reality shows and national ads and more. There are many niches that an entrepreneur can headquarter and do in Alaska.

- we found an industry going through a fundamental change, with traditional film moving to digital formats and technological solutions. It's the way of the future, and it brings Alaska into the game in part because digital travels over the Internet. Perhaps we can stop sending our university students to California, and start doing this business here.

We started out as skeptics, and ended up investing in Evergreen Films. And we are willing to invest in other ways. NANA wants to invest in people via training, and in necessary infrastructure such as sound stages and specialized equipment.

This brings us to the tax credit concept. Investments in training and facilities are made at our risk, and are not tax credit eligible. But we need the credits to secure the industry we want to serve. The credits help equalize costs, encourage local film makers and attract outside productions.

We need this now, because the first film credit program expires in just two years. Like in any business, long term investment decisions require some level of certainty. The rapid increase in Alaskan film and TV productions proves the 2008 Film Production Tax Credit is working. Now we can start building for the long term.

Mr. Chairman, we are supporting Senate Bill 23 because we want to make a long-term commitment to the business. The legislation would provide credits for two, five-year periods under terms generally similar to the current law. A total of ten years, with a credit at the same $20 million/year average as in the current program – that's a $100 million cap for each 5 year period – this will give the industry assurance that the future is solid. This is a good proposal.

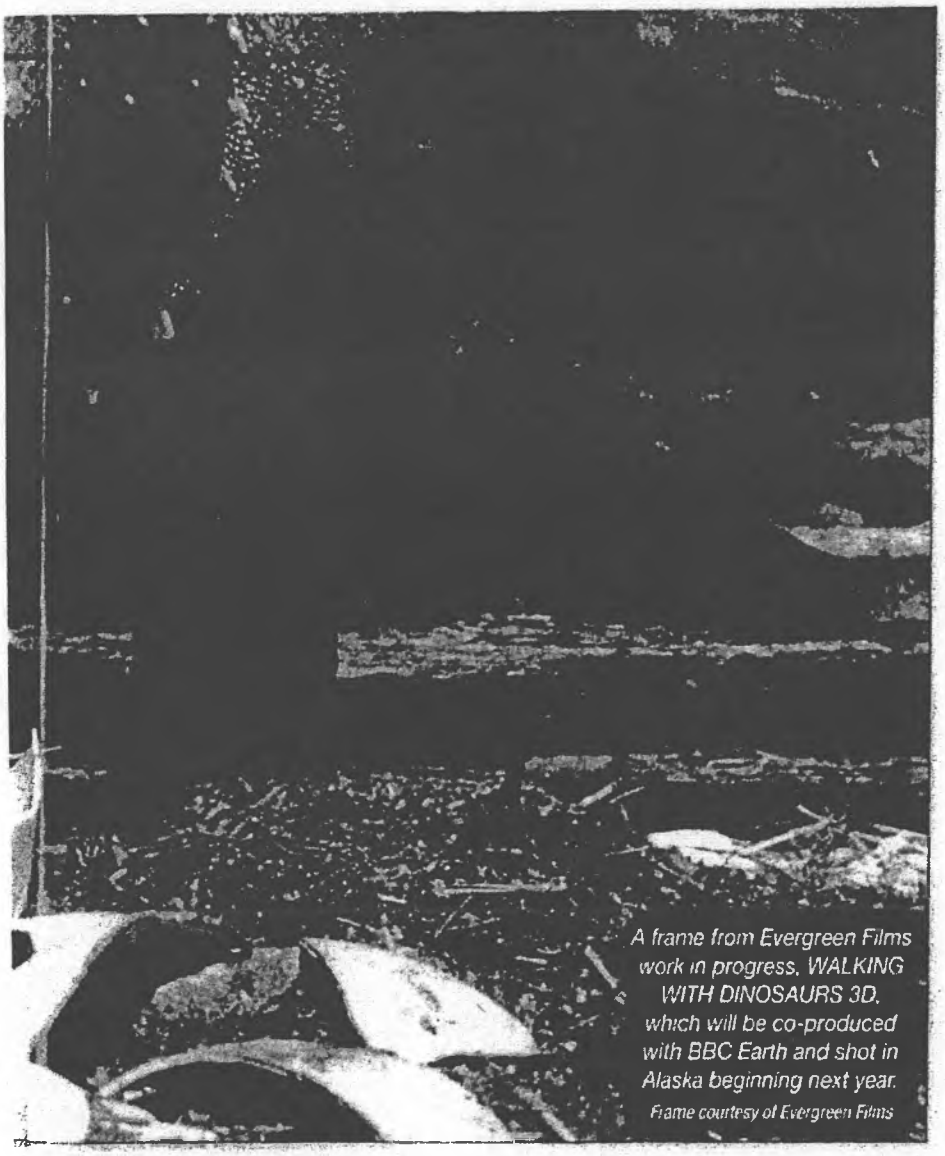
In conclusion, I will say that NANA is a conservative company. We spent a long time researching the film industry before we invested. What we see goes beyond the Hollywood stereotype. Films about Alaska should be made in Alaska. Unlike most states, Alaska is a wonderful global brand and with the right catalyst we can be a longtime industry participant. Thank you very much for the opportunity to comment.

Tax incentive program improves economy

By Heidi Bohi

Shortly after the movie "Everyone Loves Whales" began filming in September, Uptown Blossoms, a popular flower shop in midtown Anchorage, had its own brush with fame when the set decorator called to talk about flower needs for various scenes in the movie.

"When we first met him we were sort of nervous, but really he's just a person like you and me," shop owner Carol Trout says, adding that her business was recommended to the studio coordinators. "Wherever there was a need for flowers, we supplied them."



Set in Cold War era 1988, the film tells the true story of a small-town news reporter and a Greenpeace volunteer, played by Drew Barrymore, who enlist the help of rival superpowers to save three gray whales trapped under the ice of the Arctic Circle as they made their way to Mexico for the winter. The national media, environmental activists, and the United States and Soviet Union – then in the middle of the Cold War – quickly descended on Barrow in an effort to escort the whales into open water.

Trout says flower needs all had to be designed to reflect what was in style in the 1980s, and included centerpieces and arrangements for various scenes in the film. Some of the flower orders required working with the production person responsible for props any of the actors or actresses touched.

What it meant for Uptown Blossoms was about $4,000 in orders. Although Trout says her business is fortunate to have a steady stream of customers year-round, it was nice to have the extra bump.

Alaska's Newest Industry

Since beginning to offer financial incentives to studios that decide to film their movies in Alaska, as is the case with "Everybody Loves Whales," the State's resurrected Film Office is optimistically watching what is being dubbed as Alaska's newest industry. The hope is the economic development initiative will attract projects that mean millions of dollars in economic impact resulting from increased receipts for small and large businesses and local hire.

A frame from Evergreen Films work in progress, WALKING WITH DINOSAURS 3D, which will be co-produced with BBC Earth and shot in Alaska beginning next year.
Frame courtesy of Evergreen Films

which in the case of "Everyone Loves Whales," meant hiring 3,000 Alaskans statewide, though most were hired in the Anchorage area. Other businesses that stand to measurably benefit are airlines, hotels, freight handling and air cargo, along with smaller enterprises that include everything from courier businesses to seamstresses.

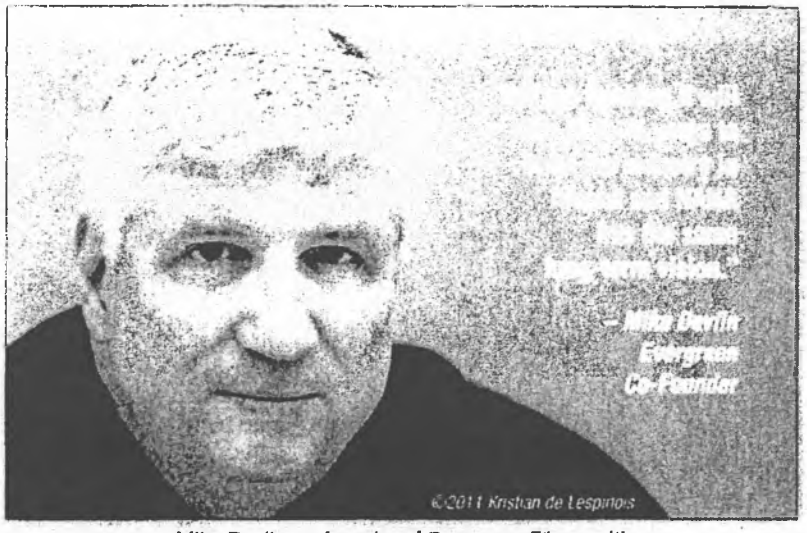
About 30 productions have been prequalified by the State Film Office, meaning studios have submitted applications, estimated budgets, distribution plans and script treatments for the projects. With $100 million available and a minimum spending requirement of $100,000, most projects qualify, including films, documentaries, commercials and video productions.

According to the legislation behind the Alaska Film Production Incentive Program, up to a 44 percent transferable tax credit is awarded within weeks once a rough-cut of the production is submitted and an Alaska-licensed CPA has audited the project. In addition to the 30 percent base rate, additional percentages are awarded for local hire, off-season production and filming in rural areas.

Although final numbers are still being tabulated to determine how much Alaska benefited from the recent production's use of local crew and services, after 10 weeks of watching those associated with the project frequent local restaurants, shops and hotels, Alaskans are seeing the potential contributions of the industry, especially during the off-season months. "Everybody Loves Whales" filmed for 12 hours a day, five days a week for almost three months. (It takes about one day to shoot two to four minutes of film.)

As the preferred hotel for 200 cast and crew, the Captain Cook cannot discuss its agreement with Universal Pictures, though it has been estimated the property had 12,100 bed nights booked from September to December, which is historically a slow time after the peak visitor season. Add meals and incidental expenses, along with side trips that crew took on their days off, and it is easy to see how a film project can quickly contribute to the state's economic development.

Evergreen Films



"It's been a long time since there was a new industry in Alaska trying to build from the ground up," said Kate Tesar, business development director for Evergreen Films.

Evergreen, though not associated with "Everyone Loves Whales," is one of the industry's most watched developments. The Anchorage-based production company continues to make substantial investments in Alaska and is positioning itself to take advantage of the growing industry.

It has several productions in the works, one which will likely be the Kate Shugak television series based on Alaska author Dana Stabenow's mystery novels, including "A Cold Day for Murder," which won the Mystery Writers of America's Edgar Award. Other titles that will be made into the series are "Whisper to the Blood," which made the New York Times bestseller list, and "A Night Too Dark," which is the 17th in the series.

Based in Anchorage with offices in Los Angeles, Calif., Evergreen was founded by Mike Devlin and Pierre De Lespinois. Devlin has a computer engineering background and Lespinois is an award-winning television and film director. Devlin fell in love with Alaska and decided to build his Anchorage Hillside film editing studio after selling his software company. The team also has a yacht in Seward with adaptations that can accommodate filming both on and under water.

Another of Evergreen's biggest market advantages is the company's state-of-the-art digital and 3D studios, including 3D camera systems, groundbreaking LIDAR scanning technology, photo-real 3D Computer Generated Imagery (CGI), and an integrated 3D post-production workflow. The technology allows them to create a realistic portrayal of any location. This technology will also be used in "Walking With Dinosaurs," the Alaska-scripted and -produced, live-action dinosaur feature. That production will highlight photo-realistic 3D dinosaurs immersed in real, live-action 3D environments. This will launch in 2013 with 20th Century Fox securing the distribution rights. Evergreen is partnering with BBC Earth to produce the $65 million feature film. Devlin says most of the live action for "Walking with Dinosaurs" will be filmed in Alaska to take advantage of the beautiful exteriors and the State's film incentives. The franchise model of the film means a new movie will be produced every two to three years. Evergreen and BBC are also partnering on the production of the $25 million feature film "Africa 3D."

Mike Devlin co-founder of Evergreen Films, with offices in Anchorage and Los Angeles.

NANA Partnering

Responsible for helping create the incentive legislation, Tesar says Evergreen is committed to developing the industry statewide so that many communities benefit from the economic boost. To that end, it recently partnered with NANA Development Corp., an Alaska Native corporation based in Anchorage, which offers infrastructure and services that will help grow the industry and employ more Alaskans, including NANA shareholders.

"We are thinking it will take 10 to 15 years to build the industry in Alaska and NANA has the same long-term vision," Devlin says. "Together, the two of us are making a mutual investment to build the industry – we focus on film, they focus on building the service industry, and we will involve them in every production we're doing."

By making a financial investment, NANA is about a one-third owner and the company's partner in films that are shot in the Arctic environment, meaning it is the preferred vendor for those services it offers. The partnership is expected to create a lot of opportunity for shareholders – whether they are hired to work on a film project, or they simply benefit from dividends resulting from this newest investment.

When Evergreen approached NANA in 2009, it was looking for corporate involvement in specific high-budget films. NANA was less interested in being involved in specific films and more likely to invest in the company as a whole, says Robin Kornfield, vice president of communication and marketing for NANA Development Corporation. Although being involved in the film industry is not an area NANA has experience in, as it researched the opportunity it quickly became apparent that many of the services it had built up over the past 38 years are the same ones required in film production, including remote camp services, food service, security, transportation and staffing services.

"We already provide many of the back-of-the-house things that make it possible for those in the front to get their work done," Kornfield says. "We realized it was a better fit than we thought when we first went in – with just one phone call the industry can access all the film support services it needs."

Although the idea of partnering with Evergreen may seem like a big stretch to the business community, Kornfield says that, in fact, the board of directors was not completely unfamiliar with the benefits of the film industry. The group travels to Vancouver, British Columbia, Canada, regularly for business associated with Red Dog Mine and is used to seeing film crews shooting in the middle of the street. "The prospect of doing something in Anchorage was not foreign to them at all," Kornfield says.

One big draw for NANA was that the film industry offers more opportunities in areas younger shareholders will be interested in such as computer graphics.

Although acting is an obvious opportunity for shareholders, Kornfield says, the greater opportunity is for them to be involved in the service industries, which is the backbone of the corporation's success. Although the partnership will evolve over time, Kornfield says NANA will do whatever it takes to make film support services available, and at the same time will offer these same services to other film production companies that come to Alaska.

"Every time a shareholder gets a paycheck – that's part of what we do," Kornfield says, adding that part of NANA's plan is to eventually develop a line of services specific to the film industry that shareholders can be trained in.

Partnerships like the NANA-Evergreen one embody the intent of the original incentive legislation, which was designed to develop new business opportunities in Alaska by pairing the supply with the demand. From there, Tesar says, the jobs and on-the-job training for Alaskans will follow.

Lights, camera, Alaska! Tax credit could draw $100M

By Andrew Jensen
Alaska Journal of Commerce

Reality television struck gold in Alaska long ago, but a package of film tax credits passed in 2008 has the state ready to take its act to the big screen.

The Tweto family (from left), Ayla, Ariel, Jim and Ferno are featured in the reality TV show, "Flying Wild Alaska," a series on the Discovery Channel about Bush pilots. It is one of dozens of productions filmed in Alaska, many of which are taking advantage of the state's tax incentive. *AP Photo/Discovery Channel*

Two Hollywood films — "Beyond" starring Jon Voigt and "Everybody Loves Whales" starring Drew Barrymore — wrapped in 2010. An independent film shot in Barrow — "On the Ice" — by local director Andrew MacLean competed at the prestigious Sundance Film Festival this January.

"Everybody Loves Whales" has not yet submitted its final application for the tax credit, which will reveal how much the production spent in Alaska while shooting in Seward, Anchorage, Barrow and Fort Richardson. The movie had a reported $30 million budget and the production was one of the first to apply for the Alaska film credit in May 2009.

Completed projects ($14.9 million) and pre-approved projects ($88 million) push the potential spending in Alaska to more than $100 million.

"Beyond," which had a reported budget of $10 million, spent $6.6 million filming in Anchorage last fall and received a tax credit of $2.14 million, the largest to date. The tax credits, which have averaged about 32 percent of total Alaska spending, are issued based on how and where companies work.

The base credit is 30 percent of Alaska expenditures, with a total incentive of 44 percent available with a 10 percent Alaska hire credit, 2 percent seasonal credit for shooting between October and March, and another 2 percent for shooting in rural Alaska. The credits are transferrable, which means production companies can sell the credits to Alaska companies for reductions in their state corporate income taxes.

Alaska has no state sales or income tax, so the credits will exceed a company's tax liabilities. According to the state Film Office website, the credits can fetch 80 percent to 90 percent of their value and provide an additional cash stream for production companies.

The largest credit by percentage issued to date was 37.67 percent to the production of "Disaster on K2" completed in 2009. The documentary, which did some shooting in Nepal, took advantage of Alaska's scenery to recreate the 2008 expedition that left 11 of 15 climbers dead.

Since the introduction of the credits, 15 productions have wrapped after spending $14.9 million in Alaska. Tax credits have totaled $4.9 million to date.

There are now 29 active projects pre-approved for the credit, including "Everybody Loves Whales," with total proposed Alaska spending of about $88 million and $29.4 million in potential tax credits.

Alaska Film Office director Dave Worrell cautioned that it is unlikely all $88 million actually will be spent, but it indicates the growing interest in Alaska's film incentive program.

"As we see some productions happening, particularly feature films, it kind of feeds off of that," Worrell said. "People are a little hesitant to be the first on the block. Now

we've seen a couple feature films come in and be successful here, I think the word will get out that, yes you can make a movie in Alaska."

Worrell was particularly excited about "On the Ice," which was shot on a budget of $524,628 and earned a credit of $171,145. MacLean is a native of Barrow who attended film school in New York and shot his senior project "short" in his hometown.

The short also qualified for Sundance, and MacLean was encouraged to shoot it as a full-length feature.

"That's exactly what we want to see," Worrell said. "We want to see Alaskans telling Alaskans' story."

With 43 states (including Alaska) and every Canadian province having some kind of film incentives, Worrell said it was "critical" for the Legislature to pass the credits.

"With the global economy the way it is right now, films are having a hard time getting a green light," he said. "It's an indispensible part of the business now. If Alaska is going to be competitive, we have to have some kind of incentive."

Alaska has work do to, though, in having sufficient numbers of qualified crew and movie infrastructure if it wants to attract additional big budget studio films. A variety of tacks are being pursued from the Department of Labor and Workforce Development, to the University of Alaska system, the nonprofit Alaska Crew Training Inc. and the recent partnership between NANA Corp. and Evergreen Films.

Being able to shoot indoors is another need, Worrell said.

"Right now we have to rely on what Alaska has always relied on, our amazing locations," he said. "That right now is the huge draw for us. But filmmakers need something to keep their crew busy on rainy days. Having sound stages where they can do interiors will be a big help for the industry. We recognize this is something that has to pencil in, so it's a little bit of building slowly. We think there's interest and a market for Alaska, but a business case has to be made to build the infrastructure."

The incentive has benefitted the wide array of reality shows that were already home in Alaska such as "Deadliest Catch" and "Ice Road Truckers."

In its sixth season, "Deadliest Catch" spent $1.75 million in Alaska and received a $584,562 credit. The third and fourth seasons of "Ice Road Truckers" wrapped in 2010 with a total Alaska spend of $3.9 million and a credit of $1.3 million.

A slew of new reality programs also hit the air in 2010 and 2011, including "Alaska State Troopers," "Gold Rush: Alaska," "Flying Alaska Wild" and "Sarah Palin's Alaska." Other shows such as "Ax Men," "Man vs. Wild" and "Top Gear" dropped in to film episodes.

Deadliest Catch, now filming its seventh season, has been a ratings giant for Discovery Channel. It ranked No. 1 in the coveted 25-54 demographic for 14 straight weeks on cable last season, drawing a record average of 5.4 million viewers and 8.5 million for the final episode that recounted the untimely death of Cornelia Marie Capt. Phil Harris.

Ice Road Truckers has steadily drawn more than 3 million viewers; Gold Rush: Alaska attracted 3.7 million viewers for its Jan. 7 premier episode; Alaska State Troopers pulled 6.2 million total viewers for the debut of its second season.

The state tourism office is trying to capitalize on the Alaska fascination with new promos running during the shows, and Worrell noted the boom to New Zealand tourism after the "Lord of the Rings" was filmed there.

"Having Alaska visible on the big screen and small screen, it reminds people, 'that's someplace I've always wanted to go,'" Worrell said. "Maybe the constant presence of Alaska will spur that little extra and 'OK, this is the year I'm going to go.'"

We're ready for our close-up, Mr. DeMille

COMPASS: ***Other points of view***

By SUSAN BELL

(01/05/11 19:08:04)

Alaska's film industry has received much notice lately thanks to two feature films that have recently finished production here. Alaskans love watching as Hollywood discovers our state. We love the economic impact, too -- including jobs, spending on hotel rooms, rental cars and other goods and services - that comes when hundreds of people become our neighbors, if only for a short time.

Through the leadership of Sen. Johnny Ellis, the concurrence of the Alaska Legislature, and the support of Gov. Parnell, the state's recently implemented film industry tax credit has been instrumental in spurring the growth of this new economic sector. The film industry has the potential to provide diversity and meaningful contributions to the state's economy. When the film tax incentive bill was passed in 2008, the law provided a base credit of 30 percent to companies that film in Alaska and spend at least $100,000 during a 24-month period. Additional credit could be earned for wages paid to Alaskans, as well as for productions made in rural areas or shot between Oct. 1 and March 30.

Tax credits have been a standard part of economic development strategy for years, as they stimulate additional investment and bring new businesses into the marketplace. Alaska offers similar incentives for mineral exploration, certain types of oil and gas production, and value-added salmon product development.

In the case of the film industry, attracting Hollywood north will help the state accomplish several outcomes:

- Encouraging and protecting a new industry in Alaska;
- Enhancing the economic viability of film projects attracted to Alaska;
- Boosting Alaska businesses and creating jobs for Alaskans; and
- Increasing interest in Alaska tourism from Outside audiences who are inspired to visit after watching movies filmed here.

From a competitive standpoint, it is important that we continue to build the physical infrastructure and human capital necessary to host major motion pictures and television programming. Growing this industry to the point that it is self-sustaining may take years to come to full fruition. But look what has already happened in the 30 months since the tax incentive was implemented:

- Two Alaska children are lead actors in two major feature films that will be released in 2012;
- Dozens of other Alaskans have earned speaking roles;
- Hundreds have signed on as extras, crew members, or both;

• Private industry is planning for a soundstage, a fundamental piece of infrastructure that will make Alaska more attractive to production companies;

• Films made by Alaskans are being screened at the prestigious Sundance Film Festival;

• Alaska's own film festival is growing rapidly;

• Film production management companies are starting to develop;

• Alaska cinematographers are working side by side with Hollywood's best directors of photography; and

• Alaska producers are busy working on films large and small.

What's next? We need to work hard to attract more productions and create paths of opportunity for Alaskans. The Department of Commerce, Community and Economic Development, which houses the Alaska Film Office, needs to ensure that a trained workforce is ready for action. We are working to develop job-training programs for as many Alaskans as possible, in conjunction with the private sector, other state agencies and the university system.

These aren't going to be overnight, "just add water" accomplishments. We're nurturing this industry with plans for it to develop and contribute to Gov. Parnell's vision for a legacy economy that provides opportunity for this generation and beyond. It is time. For years we have watched as other locations, pretending to be Alaska, stood in our spotlight and reaped the benefits of jobs, spending and invaluable promotional exposure. No more. Alaska is ready for its close-up.

Susan Bell is the commissioner of the state Department of Commerce, Community and Economic Development. Information about the state's film industry tax credits can be found at www.film.alaska.gov/incentive-program.htm.

Boosters hope Alaska will be "Hollywood Far North"

Sat, Oct 2 2010

By Yereth Rosen

ANCHORAGE, Alaska (Reuters) - On a crisp autumn day, as office workers went about their business, one of Anchorage's major hotels became the temporary hub of what state leaders consider a promising new Alaska industry.

The lower level of the Hotel Captain Cook was occupied by a Hollywood film crew that converted rooms into movie sets, makeup and dressing areas and equipment-packed work sites.

In progress was filming for Universal Features' "Everybody Loves Whales," a movie starring Drew Barrymore and recounting a 1988 rescue mounted for three gray whales trapped in Arctic ice.

In a departure from past history, this Alaska-based movie is being filmed on location, rather than in a make-believe Alaska set constructed in British Columbia or elsewhere.

Alaska officials hope this and other projects will help diversify the state's economy from its precarious dependence on dwindling oil production.

"We wouldn't be 'Hollywood North.' Vancouver claims that. We'd be 'Hollywood Far North,'" said state Senator Johnny Ellis, an Anchorage Democrat and self-professed movie buff who authored 2008 legislation that established a special tax credit for big film projects and revived a state film office that had been eliminated during a past austerity push.

Ellis' measure entitles film companies spending $100,000 or more in Alaska to transferable credits of 30 percent of those costs, plus 10 percent of money spent hiring Alaskans. Extra credits are given for expenditures in rural areas or outside of the summer tourist season.

Film companies in the past have largely avoided Alaska, citing the state's high costs, remoteness and overall inconvenience.

But the tax incentive has made a difference, said David Linck, unit publicist for "Everybody Loves Whales," a project Ellis refers to as "Northern Exposure Meets Free Willy."

"It's dollars and cents," Linck said.

Filming will run through November, he said. It has been an economic boon to Alaska, with several key roles filled by Alaska Natives selected after casting calls in remote rural sites, he said.

Among those sharing in the bounty is Su Gamble, owner of a hair salon in an Anchorage strip mall the producers selected for three days of filming because of its retro-1980s look. Gamble herself was cast as an extra, an experience that still thrills her.

"It's such a blast that they chose my place, and they chose me," she said.

OSCAR HEADED NORTH?

She recounted the two hours crew members spent creating her 1980s big-hair look, proclaimed the film producer and crew "so sweet" and "so patient," and predicted an Academy Award for the project.

"Drew Barrymore's going to be the best actress for the year 2012," she said.

It will be several years before Alaska is able to develop its own industry support system, with skilled workers and specialized contractors, anywhere on par with what exists in British Columbia, said Mike Devlin, chief executive of Los Angeles-based Evergreen Films.

Still, each new project moves the state incrementally toward that standard, he said.

"Every film means some Alaskans are in on the production," he said.

Evergreen Films is so bullish on Alaska it has located a studio in Anchorage. The studio occupies a vast and elegant house perched in the mountains overlooking the city, glacier-fed Cook Inlet and a panorama of snowy mountains, including active volcanoes and Mount McKinley.

The studio doubles as Devlin's residence.

"I'd rather get up in the morning here than in L.A.," he quipped, taking in the view from a bank of windows.

Evergreen Films has produced nature documentaries, among other projects, and is working on a television series based on mystery novels by Alaska author Dana Stabenow.

Last month, NANA Corp., owned by Inupiat Eskimos from the state's northwestern region, announced it was investing in a joint venture with Evergreen. The project will "create jobs and economic growth," a NANA statement said.

Alaska already is experiencing a boomlet in reality-TV productions such as "The Deadliest Catch," the fishing series produced by the Discovery Channel, and former Gov. Sarah Palin's controversial series being produced by TLC.

"Alaska is the talk of the nation, in many ways, good and bad. But most of it good," Ellis said.

For some Alaskans, the desire to lure film projects goes beyond money.

Hollywood's habit of using non-Alaska sites to film Alaska stories -- even the iconic television series "Northern Exposure," which was filmed in Washington state -- has long been an irritant.

Some on-screen results made Alaskans cringe. Pine forests and wooded hillsides stood in for what was supposed to be open Arctic tundra. Asian actors portrayed Alaska Natives. And there were improbable story lines, like running gags about snake problems in the reptile-free far north.

The final insult, said Ellis, was learning that a major romantic comedy starring Sandra Bullock was being filmed in Massachusetts even though the story was set in Sitka, Alaska.

"That aggravated me, and it aggravated others," the senator said, referring to "the Proposal," released in 2009. "There's a long, sad history of Alaska losing out. But I hope we're starting to change that."

Here's Looking At You Alaska

Alaska's film and television industry has received a lot of attention lately due to the recently wrapped filming of "Everybody Loves Whales" and "Ghost Visions" along with several Alaska-specific television shows.

In addition to the pioneer of Alaska reality television, "Deadliest Catch", Alaska has been featured in "The Alaska Experiment", "Gold Rush Alaska", "Flying Wild Alaska", "Alaska State Troopers", "Ax Men", the recently debuted "Flying Wild Alaska" and many others.

Thanks to the Alaska Film Production Incentive Program, what may have been a small one time occurrence has started to take hold in Alaska and is on its way to becoming a full formed industry. The Alaska Film Production Incentive Program was created by legislation sponsored by Senator Johnny Ellis and supported by the legislature and the governor's office. Implemented by the state Department of Commerce, Community and Economic Development through the Alaska Film Office, the program offers eligible television and film productions tax credits from 30-44% depending on several factors including the time of the year the production is filmed, where in Alaska it is filmed and Alaska hire.

Alaska Film Industry Tax Credits are also helping Alaska businesses with their tax liabilities. Because film and television productions are unlikely to owe Alaska Corporate Income Taxes, producers sell their tax credits to Alaska businesses at a discount (usually 80 to 90 cents on the dollar). Those businesses receive full "face value" for those credits, thus saving 10% to 20% on their Alaska Corporate Income Taxes. The film office is building a list of interested companies, with more asking to be added regularly.

As of January 1, 2011, fourteen film industry tax credits have been approved for $2.14 million based on qualified Alaska spending of $6.6 million, and that is only the tip of the iceberg. Currently there are 30 productions pre-qualified for estimated tax credits of $29.5 million based on over $88.5 million of in-state spending if all projects complete production within their estimated budgets. That represents a large amount of money spent in state that in the past would have gone to other places like British Columbia, Maine or other states that have often stood in as Alaska.

The current program has a credit cap of $100 million and is set to expire July 1, 2013, but Senator Ellis has introduced legislation to extend the program by ten years and continue the $100 million incentive funding for each five year period.

TAX CREDIT	VALUE	REQUIREMENTS
Base Credit	30%	Production expenditures must be made in Alaska.
Alaska Hire	+ 10%	Wages paid to Alaska residents receive an additional 10% credit.
Seasonal	+ 2%	Production expenditures made between Oct. 1 and Mar. 30 receive an added 2% credit.
Rural Location	+ 2%	Production expenditures made in a rural area also receive an added 2% credit.
Maximum Possible Credit	**44%**	Portions of a production with an Alaskan crew, filmed in rural Alaska between October and March.

GCI Goes Hollywood

Peerless cell phone coverage has its advantages. Ask the cast and production crew from the movie *Everybody Loves Whales* starring Drew Barrymore, John Krasinski, Dermot Mulroney and Ted Danson. GCI was the exclusive Alaska telecommunications company for the production providing cell phones, Internet, and office phones for the cast and crew of this major motion picture. The movie is based on an attempt to rescue three gray whales trapped by sea ice near Barrow in 1988.

Because of GCI's coverage across Alaska, they were a perfect fit, as the crew worked throughout the state. Actor Dermot Mulroney said in an online interview, "It's a huge cast with tons of scheduling. It's a real producers' movie, in a lot of ways, 'cause there's so many elements." The relationship provided GCI with daily challenges but also had its benefits.

GCI was given permission to shoot commercials on the set of the film in Anchorage. The commercials demonstrated a GCI cell phone helping a harried production assistant to navigate through the myriad challenges to be conquered during a shoot of a major motion picture.

An opportunity which led to a unique and humorous challenge for GCI.

While GCI's crew was shooting their spots, the movie production was taking place simultaneously at the same location. Complications arose when the film crew ate the snacks that were set out as a prop for one of the GCI commercials. The GCI crew didn't want to appear rude, when the movie production company was generously allowing them to film on the set, but they also needed the food for the shoot. In the end, the crew managed to save the food table without ruffling any feathers. Only in Hollywood, and now Alaska.

Rochelle Marshall, GCI director, commercial marketing, said the crew enjoyed the wonderful service from GCI. "I hope in some way, that we contributed to the success of the movie. We're proud to be a part of that."

Sundance 2011: 'On the Ice' Spotlights Alaska

Plenty of independent films that play the Sundance Film Festival can boast of being shot in remote and exotic locations, but Andrew Okpeaha MacLean's coming-of-age drama "On the Ice" is probably the only film this year that required an AK47-wielding guard to monitor the set for wild animals.

Having grown up in Barrow, Alaska, the setting of "On the Ice," MacLean knew that bears were going to around and had his production coordinator on polar bear watch. "I wasn't overly concerned about it because we were such a big group of people and normally they'd stay clear of us," he said. "But if you get a juvenile or one that's especially hungry, they can get a lot more aggressive."

Poster for "On the Ice"

Based on MacLean's award-winning short "Sikumi," "On the Ice" follows the story of Iñupiaq teenagers Qalli and Aivaaq, who accidentally kill their friend James during a seal hunt. Scared and worried, the boys decide to ditch their friend's body and pretend he died in an accident. Qalli, the college-bound friend who actually pulled the knife, must deal with his guilt as Aivaaq beats himself up, his father gets suspicious, and he decides what kind of man he wants to become.

We recently spoke to MacLean about his debut narrative film, premiering this week at Sundance.

The Wall Street Journal: Did you write your short with the idea of turning it into a feature film?

Andrew Okpeaha MacLean: My short was first written as writing exercise. I had a pretty bad case of writer's block when I was working on a different script, so I took those characters and put them in a weird situation and wondered what would happen if they stumbled on a murder. As I started working on the short and started showing first the script, and then edited cuts to people, a lot of them had the response of wanting to know what happens next, or if this could be part of a larger story. So, by at the time the short was done, I was aware of the possibility of continuing the story.

Tell me about your background.

I was born in Fort Wainwright, an army base [in Alaska] and I grew up in Barrow and Fairbanks, the town near Fort Wainwright. It's a university town; my parents were both university professors.

When did you know you wanted to be a filmmaker?

About 10 years ago, I decided to apply to film school. I'd been living in Seattle for a few years after getting my undergrad degree at the University of Washington in theater. I was more in the theater world when I decided to move back home to Barrow. I moved for a number of different reasons, but part of it was that I wanted to reconnect and learn to speak Iñupiaq better because a lot my generation is losing the language skill.

When I was growing up there, there was no real system for teaching it — my generation is the first generation not to take it as our first language; we were the first generation to grow up with television and that might have been part of it. In fact, there was a pretty strong sentiment at the time that it was bad to teach kids anything other than English; my parent's generation was punished for speaking Iñupiaq at school.

So, I wanted to try to correct that and came home. While living at home, a cousin of mine who's very active in the community said to me, 'You've been doing theater, I did a play once in school — let's do plays together and let's do them in Iñupiaq. So we started adapting old stories and coming up with our own, and getting them translated with the help of our elders. Performing them was great — I felt really connected to my culture but we would put a lot of work into these shows and only four or five hundred people would come and then it would die. So I started thinking about film as something that has a lot more permanence and potential to reach people. I decided to apply to film school and looked for ones that didn't require film experience. I barely knew the front end of a camera from the back, and NYU is one of those schools and they accepted me and offered me a scholarship. Next thing you know, I was moving from Barrow to New York City.

Shooting in Alaska can be tricky given the absence and abundance of light, given the season. Did you have to shoot within a very specific time frame?

We shot in April and little bit of May... the timing was vital — that was one of the things that both caused us a lot of stress, but also propelled us into making it happen because we could only shoot during one season: spring. It was partly because of the temperature, but also for the combination of sea ice and light. In the summertime, the sea ice melts and the script called for a lot of ice — I mean, it's called 'On the Ice' — so we needed it. By the time the sea ice forms in the winter, it's completely dark all day long and remains dark out for several months. It's not until March that you start getting the 12 hours of sunlight, then darkness, so it shifts very rapidly from there. By the time we finished, we were in 24 hours in daylight. which was a lot of fun for the film crew.

Your cast consisted primarily of first-time actors — was it a challenge to find the right combination of players?

We did a fairly long casting process. My producer Cara [Marcous] and I flew all over arctic Canada and all around Alaska looking for potential actors, including Anchorage and Fairbanks and Nome and Point Hope and finished in Barrow — we went to at least 10 to 12 cities.

The actor who plays Qalli's dad is quite good.

We didn't even see him in the first round of auditions. Someone had told him about the auditions and we had casting information on our website. He sent us an email and I sent him a copy of the script — more specifically, the sides we were working from — and then called him and I directed him from the phone. He then taped himself and uploaded it to YouTube. I really liked what he did and I liked his look, and based on that, we flew him along with the top contenders from the casting process to Anchorage. We did a week-long intensive casting process that doubled as a basic acting workshop, so we were able to really put them through a lot of work and see how they would respond to different ways of working. At the same time, we able to start working on the characters with them. Everything really paid off later. That whole casting experience was key to getting the film done — we did casting before we had the money to shoot the film. Afterward, we got a grant from Princess Grace USA Foundation that allowed us to go and make the film.

There's a lot of original music in the film. Were the featured songs written prior to filming, or were they improvised?

No, that was written out. The dances at the very beginning of the film were traditional dances that are kind of in the public domain. There are a lot of those dances that are personal and owned by specific people and we would have needed permission to use those, but the two we used are fun dances for anybody to do. The Singspiration — a hymn that translated into Iñupiaq — was a song by the actual church choir up there, and the rap [the one of the characters performs at a party] was written pretty much by the actor and it's meant to be a moment of just freestyle improv — he's not supposed to be coming off as Lil Wayne. I just thought that that's an interesting aspect of the youth culture up there and was interested in how people express the culture through music. It's three very different ways of performing music and it's coming from three different sources — but they're all being kind of appropriated, being taken into the culture.

"Everybody Loves Whales" film crew coming to Barrow

Published on October 21, 2010 4:34 pm

By ALASKA NEWSPAPERS STAFF

Anchorage's Grace Olrun of the Casting Department is calling for Barrow Inupiat and non-Inupiat residents to register with her this weekend to portray the many rescuers and reporters who went out to the ice to help free the whales or report on the story. Filming will occur on Oct. 29, 30 and 31.

Registration will take about five minutes, no audition is required - some paperwork and a photo. Grace will be at the Tuzzy Library Friday, Oct. 22, from 1:30 to 5 pm and Saturday, Oct. 23, from noon to 5 p.m. to sign up adult residents. Filming on Saturday October 30 will last approximately 10 to 12 hours with a hot catered lunch with fellow cast and crew at mid-day.

Come be part of the largest feature film to ever come to Alaska. Help us Alaskans show how robust and giving Barrow is. Please contact Grace by email at cupikwarriorproductions@gmail.com to secure a part in the movie. Only 72 residents will be hired to be in the film, slots are filling up fast.

Grace Olrun, Casting Dept. for "Everybody Loves Whales"

Student filmmaker brings project home

BY MICHAEL ARMSTRONG
STAFF WRITER

Photo by Michael Armstrong

Homer News Katherine Brennan, cinematographer for "What May Be True."

New filmmakers making films on a tight budget often get creative. Some max out their credit cards, hoping the film will win awards at Sundance or other film festivals. Others get arts grants. Almost all recruit family and friends to help out. Katherine Brennan, a 2005 Homer High School graduate in her senior year at the Academy of Art University, San Francisco, has come up with a new twist.

Pay your own way to Alaska and help me with my film, she told friends from San Francisco, and I'll get you room and board for 10 days.

"I've been so lucky and so blessed to work with so many talented people," she said of the students and teachers she's met in San Francisco.

Brennan, 25, graduates this spring with a bachelor of fine arts in cinematography. She's the director of photography — the woman behind the camera — of "What May Be True," a 7 to 10 minute short film about "how people cope with betrayal," Brennan said.

Born and raised in Homer, Brennan, 25, is the daughter of Patricia Brennan and the late Hugh Brennan. In December and January she has been visiting family and friends in Homer and scouting locations for "What May Be True," to be filmed this June. One scene will be shot at the Homer Harbor and another in a forest. She also needs an office or room that can pass as a therapist's office.

"What May Be True" has about five or six acting roles, including the main character, Gabriella, a girl about 16, and a woman therapist about 40 to 50. On her film's website, Brennan describes the project as "a powerful story about a woman who goes through emotional and physical trauma and the journey that she goes through to overcome the after effects."

A small-town woman starting a career in film is just part of a growing film industry in Alaska. Under the Alaska Film Production Incentive Program, Alaska offers generous tax credits to motion picture companies filming in the state. Last week, Sen. Johnny Ellis, D-Anchorage, and Representatives Bob Herron, D-Bethel, and Chris Tuck, D-Anchorage, prefiled legislation to extend those tax credits past its sunset date of 2013 (see Business, p. 6).

"The recent film industry boom in Alaska has benefited Alaskans and local businesses across the state, and it could grow much more," Ellis said. "Extending these incentives shows film producers Alaska is serious about building this industry for the long run."

Brennan wants Homer to be part of that boom, particularly for its scenic setting. For "What May Be True," she wants to use the landscape as a strong part of the film.

"I think Homer has a lot of potential and doesn't get the attention it deserves beyond 'Deadliest Catch' and 'Sarah Palin's Alaska,'" she said.

As a cinematographer, Brennan would like to see more Alaskans — and more women — behind the lens. Alaska only has about 25 professional camera operators that she knows of, Brennan said. It's also hard to rent professional quality cameras. Brennan plans to shoot her film using a Canon 5D high-definition, single-lens reflex video camera, one of the more common high-end cameras used in the industry. She's been lucky that the Academy of Arts has so many cameras for students to use, she said.

"I feel like a gear head nerd with cameras and not cars," Brennan said.

After graduation and making "What May Be True," Brennan said she plans to work for a while here to get ahead on bills. Eventually she'd like to get an entry-level job in the film industry — which could mean moving to Los Angeles. Although the Academy of the Arts is an art school, she said her education feels more like going to trade school. It's a lot of hands-on, learn-the-craft work.

"Every day I am doing something with film or video production," Brennan said about the school.

It's an art where the education continues.

"You're going to be learning, no matter what profession you're in," she said.

Brennan has a website set up through IndieGoGo, a web service that allows filmmakers, writers, musicians and other artists to make a pitch for support. Artists describe their projects, what they need in cash and other support, and how contributors will be acknowledged. While Brennan's new San Francisco friends will be helping her out, she's also looking for some hometown help. Anything locals can do in providing meals, lodging and other support would be appreciated.

She also has a site on vimeo.com showing some of the films she photographed or was involved in.

Michael Armstrong can be reached at michael.armstrong@homernews.com.

Alaska National Guard helps out with "Whales" shoot

Joshua Saul | Oct 12, 2010

An Alaska Army National Guardsman acting as a stand-in for the upcoming movie "Everybody Loves Whales" is seen climbing the ladder of a CH-54 Skycrane helicopter during filming at Bryant Army Airfield, October 4. Stand-ins are used as temporary replacements for stars providing the production crew a chance to rehearse before filming. Photo by Pfc. Karina Paraoan, Alaska National Guard Public Affairs Office

Here's the presser, and here's a story I wrote about the movie yesterday.

Alaska National Guard assists Hollywood in major movie production

CAMP DENALI, Alaska - The Alaska National Guard is working closely with production crews here in Alaska in the filming of a Universal Studios movie based on a whale rescue that captured the world's attention near the end of the Cold War.

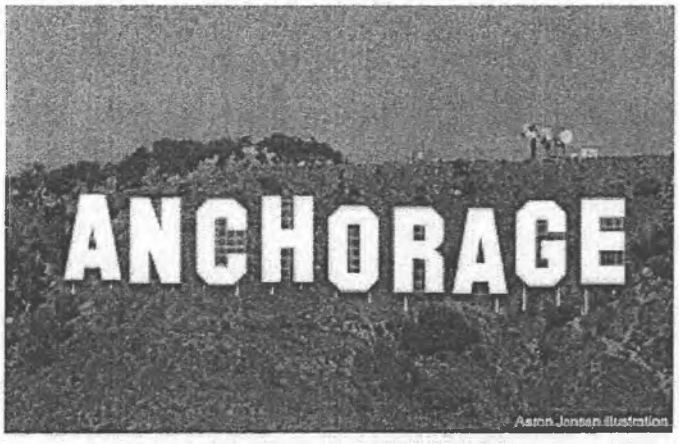
The movie "Everybody Loves Whales," starring well known actors Drew Barrymore, Kristen Bell, Ted Danson, John Krasinski, Dermott Mulroney and Vinessa Shaw, brings together a Hollywood storyline with the true story of how people from around the globe came together in 1988 to free three gray whales trapped in arctic sea ice 18 miles northeast of Barrow.

The stranded whales were discovered Oct. 7, 1988 by an Alaska Inupiat hunter after changing weather conditions and shifting ice trapped them in shallow water before they began their journey south to warmer waters.

Alaska Army National Guard State Command Sgt. Maj. Gordon Choate prepares a pair of Army cold weather gloves to be worn by an Alaska National Guardsman as an extra in the upcoming movie "Everybody Loves Whales." A team of Alaska National Guardsmen work daily to assist the production team with the military scenes to ensure the accuracy, attention to detail and correct portrayal of the

At the forefront of this international incident, the Alaska National Guard was pivotal in its role to help free the whales utilizing a CH-54 Skycrane helicopter, while working closely with members of President Ronald Reagan's administration and with the former Soviet Union.

Twenty-two years later, Hollywood has come to Alaska and has asked the Alaska National Guard to assist them in the filming of the movie.



"We usually have a Department of Defense representative from our Los Angeles office providing the coordination, advice and daily assistance to the production company," said Vicente "Vince" Ogilvie, deputy director of entertainment media, office of the assistant secretary of defense for public affairs. "However, for "Everybody Loves Whales," that role is being provided by the Alaska National Guard."

Behind the scenes as Hollywood meets Alaska

Joshua Saul | Oct 11, 2010

Early on a Saturday morning in early October, inside an Anchorage middle school dressed up to play Barrow's high school, 140 extras sweated in bunny boots, parkas, and kuspuks. Extras playing Alaska Native villagers sat facing the front of the room, where a half-dozen somber whaling captains sat with two huge Panavision cameras behind them. I stood among the virtually all-white press corps clustered in behind the villagers: an Alaska reporter dressed up to play an out-of-state photographer.

When Drew Barrymore breezed onto the set, the extras burst into applause. Barrymore hid her face in her hands, feigning embarrassment, then told the Alaska Native extras they wouldn't like her after we heard her character arguing against the head whaling captain.

She was right. The scene being filmed -- a pivotal plot twist in "Everybody Loves Whales," a $30 million movie that recreates a real 1988 event -- portrayed a community meeting in Barrow held to decide whether three whales trapped in the ice should be killed and eaten or freed. Barrymore played a Greenpeace activist fighting for the whales' release while the Alaska Native extras professed to like the taste of whale and said they hate being told what to do by white environmentalists from the Lower 48.

When filming began, Barrymore argued with a handsome young whaling captain in a red bandanna and Sorel boots. The press corps pretended to jot notes and take photographs of the confrontation. The extras playing villagers followed the director's instructions to "be a little impolite." When Barrymore's character said it would be wrong to kill the whale and its "babies," the villagers shouted her down. They cheered on the whaling captain as he replied that whales are what he feeds his family, what his whole village feeds its babies.

"What you're saying is ridiculous. You're a white girl. Go back to California. This is Inupiat country," the captain said, drawing the loudest cheers of the scene. But Barrymore's character wasn't finished. You don't need to hunt, she said, not when you all get big stipends from the oil companies and have enough money to buy all the food you need.

"Those stipends last just a few months," the young captain shot back. "We have to hunt. One day that oil's going to run out. And when that happens, who will feed our children? Will you?"

Real Alaska conflict comes to the silver screen

The scene reflected a real conflict between the subsistence lifestyle practiced by some Alaska Natives and the sometimes condescending environmentalism of urban and Outside interests.

Subsistence is a touchy issue in Alaska. Urban sport hunters and rural subsistence hunters clash over hunting quotas, the wanton waste of caribou on the tundra near Point Hope resulted in criminal cases that were covered by the Alaska media, and the decision of an Alaska Native state legislator to overfish his subsistence permit

became a high-profile court case.

Usually that conflict is misunderstood or ignored by the outside media and entertainment industries, so a mainstream Hollywood movie that appreciates the complexities of the conflict is something new. The film's directors did show at least some awareness of the divisions that sometime define Alaska. At one point, the first assistant director walked back to two white extras playing Barrow villagers. You don't have to be as angry as everyone else when Barrymore makes her points, he told them, adding that as white villagers, they wouldn't necessarily be agreeing with the Natives.

At the risk of drawing too broad a conclusion from one scene, "Everybody Loves Whales" does seem to have a clearer take on Alaska issues than most Lower 48 films and news reports. And it nailed the scene right down to the coffee urn and Sailor Boy Pilot Bread set up as props.

The movie's realism is only enhanced by its extras, many of whom brought their own kuspuks and fur-lined parkas instead of waiting to be outfitted by the wardrobe department. One of the extras playing a whaling captain is even part of a real whaling crew way out on Little Diomede, just two miles from Russian soil. Sylvester Ayek, a well-known Alaska Native artist who hunts walrus from his home in Nome, was scheduled to play another of the whaling captains but was "demoted," as he laughingly put it, when he showed up late for the shoot on Saturday.

A day in the life of an extra

Being an extra is harder than it looks; not like digging ditches in permafrost, sure, but tiring and monotonous all the same. During my stint on set the first weekend in October I was assigned, coincidentally, to play a press photographer. I was handed a dated Nikon with a big Speedlight SB-16 flash. To round things out, I was outfitted with black snowpants, black boots, a green pullover and a green down vest. It was easy to look the part, but more difficult to keep from sweating like a polar bear in a sauna. My press pass read "Dean Wilson, U.P.I." Positioned between a Wasilla medical biller playing a news reporter and an Arctic Slope Regional Corp. communications manager playing a cameraman, I had a good view of the room.

Actor John Krasinski, who plays Jim Halpert on the popular television show "The Office," was the tallest man on set, standing about 6 feet 3 inches with an impressive pompadour adding to his height and enormous brown boots on his feet that looked to be about a size 14. Between takes, he checked NFL scores on his iPhone and argued about "the best football movie ever" with co-star Tim Blake Nelson, who in 2000 put on a brilliant performance as the simplest-minded of the crooks in the movie "O Brother Where Art Thou." Actress Kristen Bell -- gorgeous, blonde, and the size of a middle schooler -- fanned herself with a reporter's notebook and laughed with Krasinski even while makeup artists were sponging foundation onto their faces.

There were local notables on hand to play reporters, too. Channel 2 weekend anchor Rebecca Palsha and Channel 13 anchor Natasha Sweatte were in the crowd, along with former Channel 2 reporter Julie Hasquet, now the spokeswoman for U.S. Sen. Mark Begich. Accepting high-fives from Krasinski before almost every take was Ahmaogak Sweeney, the 10-year-old son of Kevin Sweeney, campaign manager for U.S. Sen. Lisa Murkowski. Dressed in a blue track jacket and carrying a tape recorder slung over his shoulder, Sweeney appears to hold the substantial kid role in the movie.

After the morning filming broke for lunch -- which included chicken masala and orange roughy -- but before the

extras returned to the set, two men beat on traditional drums while four women in bright kuspuks danced a Yupik blessing for the people in the middle-school cafeteria. Many of the extras were Yupik or Cupik instead of the northern Inupiat they were playing in the movie, but it makes sense when you consider the realities of geography: Barrow is 725 miles north of Anchorage, while Bethel, the air hub of the Yupik regions, is just 400 miles west.

Elders among the extras treated with respect

The film crew seemed aware of the great respect with which Alaska Natives treat their elders. When the herd of extras was held up in the school's halls, elders were asked multiple times if they would like a chair so they could sit down for the few minutes it would take to get the group moving. And elders were shuttled to the front of every line, whether they were at lunch waiting to serve themselves or in wardrobe waiting to return their parkas and boots.

The elders, like most everyone else, seemed to be enjoying the shoot. As much as the extras shouted down Barrymore's character, it's impossible to stay mad at perky Drew. Sunday morning, on the second day of shooting the scene, an elderly Alaska Native woman sitting in the front row hollered for everyone's attention so she could organize a greeting for Barrymore. When the actress walked onto the set, carrying a copy of Jonathan Safran Foer's non-fiction book "Eating Animals," the crowd of extras boomed out "Good morning, Drew!"

Drew blushed again, then answered "That's the nicest good morning I've ever had in my life."

Then it was back to the filming. The director coached the extras on how he wanted them to react to the arguments made by the young whaling captain and Barrymore's character, telling them "It shouldn't feel choreographed" and "Try not to know where the scene's going."

While the extras playing villagers feign anger and the extras playing press snap their flashbulbs, the rest of Alaska waits to see whether the finished movie turns out to a realistic portrait of a complicated state and the people who live there or a shallow vehicle for a cheesy romance that sidesteps the pressing issues that bubble up in the 49th state.

Alaska NEWS

NANA gets into showbiz

By **Victoria Barber**
Sep 20th, 2010

Published in ***the Arctic Sounder***

Alaska is jumping on the movie business bandwagon, and Native corporation NANA is hoping to help lead the charge.

The company announced that it's invested "several million" to purchase 33 percent ownership of Evergreen Films, a high-tech Alaska production house with studios in Anchorage and Hollywood.

"Frankly this is a pretty exciting field," said Helvi Sandvik, president of NANA Development of NANA Regional Corp.

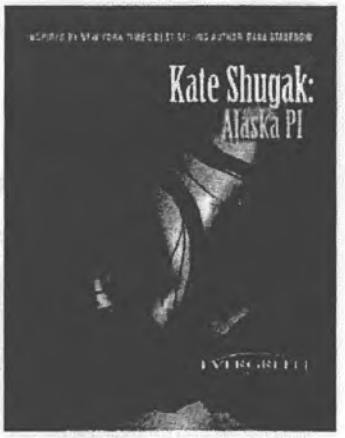
Sandvik said Evergreen approached NANA Development about a year ago with a proposal and business model. NANA has several subsidiaries that look likely to benefit from the partnership, including those that supply catering, construction and remote camp services. However, NANA doesn't have exclusive rights to those contracts.

Sandvik said that she also hopes NANA Development's stake in the film industry will open up an exciting new career field for shareholders.

"Really the sky is the limit. Sometimes it's a matter of helping people visualize what those opportunities may hold," Sandvik said.

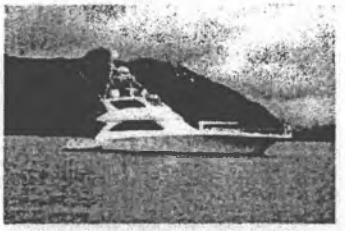
Building a movie pipeline

NANA's announcement came just days before filming in Anchorage began on "Everybody Loves Whales," a movie starring Drew Barrymore and John Krasinski (star of "License to Wed" and the TV show "The Office"). The film is based on the true story of three grey whales stranded in the sea ice off Point Barrow in 1988.



"Loves Whales" is the first high-profile movie to come out of the tax incentive program introduced by Sen. Johnny Ellis in 2008. Senate bill 230 rebuilt the Alaska Film Office and created a program that offers tax credit to movies, documentaries, commercials, and video projects that spend at least $100,000 in Alaska.

Stories about Alaska have long attracted filmmakers and movie-goers, in large part because of the state's spectacular and risk-filled landscapes. But before the incentive program, the vast majority of movies about Alaska were filmed far away.



Recent thrillers "30 days of Night" and "The Fourth Kind," were set in Barrow and Nome but filmed in New Zealand and Bulgaria, respectively. The 2009 blockbuster "The Proposal," starring Sandra Bullock, was set in Sitka but filmed in Massachusetts.

That means the state is losing out on a lot of money that could be going to Alaskans, said Carolyne Robinson, owner and executive producer at Sprocketheads LLC, an Anchorage-based film company.

A major production like "The Proposal" spends, on average, about $100,000 a day, Robinson said. Not only does that pump money into local businesses - from hair salons to construction companies - it also creates jobs for young professionals who would otherwise have to leave state to work in that industry.

NANA Development has invested "several million" into minority ownership of Evergreen Films, an Alaska production house that is creating a TV series based on Dana Stabenow's popular series about a Native woman detective. (*Courtesy Photo, Evergreen Films*)

Evergreen is a production house seeking to rival high-tech production houses. Part of its outfit is the Strider, a Viking 74 Sport Fisher with mounted and underwater cameras. (*Courtesy Photo, Evergreen Films*)

"Think of this can of movie film as a barrel of oil," Robinson said, waving a reel at a recent meeting of Anchorage businesses. "We can build a new kind of pipeline."

Robinson said we'll be seeing more movies - and moolah - coming down the pipeline soon. An movie executive and an "international team" were scouting locations for another big film earlier this year. The trip included a dog sled ride at Iditarod champion Martin Buser's kennel. Details are still under wraps, Robinson said, but discussions are underway with leading men Viggo Mortensen, Liam Neeson and Jeff Bridges.

Pre-production might begin as early as this fall, and filming in early 2011. But that's not because of the scenery or any dog sled ride, Robinson said. In the end it's all due to the incentive program.

"The film executive told me flat out that they did a multi-country, multi-state comparison. And calculating in our film incentive program, the bottom line was - shoot in Alaska."

That was the same bottom line that decided the NANA board to invest, said a very un-star-struck sounding Sandvik.

"We're very analytical in everything we do. NANA has an incredible number or opportunities that are presented to us today. This was no different than any of the rest of those," Sandvik said.

New Hollywood North

Anchorage will never be Hollywood - and most Alaskans would agree, that's a good thing. But Mike Devlin, one of the founders of Evergreen Films, said Alaska might look instead to Vancouver as a portent of what's to come if all goes well.

Since "The X-Files" began filming in Vancouver in the early '90s, the Canadian city has built up the infrastructure to pull in over a billion dollars a year (British Columbia has sometimes been the stand-in for Alaska in the movies). The number of productions taking place there has earned it the nickname "Hollywood North."

Alaska still has a long way to go until it can rival that kind of success. It still lacks the things that are critical to the film industry, such as a CGI shop, trained personnel and sound stages (Robinson said Anchorage needs at least four).

Also, Alaskans would have to get used to how Hollywood works - fast. And with "a high level of customer service," Robinson said.

NANA's investment in Evergreen Films means they'll participate in building up that capacity. Evergreen is a high-tech studio that specializes in digital 3-D technology. The company is partnering with BBC Earth to produce "Dinosaurs 3-D" and released a few 3-D concert videos for bands including Phish and Dave Matthews.

"We can do Avatar class films, and we can do them for a much lower budget and we can them here in Alaska, which is very different than the way the world was 10 years ago," Devlin said.

Evergreen also films for television. The company has optioned Dana Stabenow's best-selling Kate Shugak mystery novels. The books' heroine is an Aleut woman who solves crimes on the last frontier with help from her Mutt, her half-wolf, half-dog partner.

But whether it's for big or small screen, Devlin said that the more Alaska can encourage high-quality, scripted shows, the more the state will reap the benefit of its inherent charisma for movie-goers.

"This will not be a short job. It'll be a 10-year job to build this industry. But it'll be a lot of fun," Devlin said.

Producers scout Alaska for action film with big budget

'THE PEAK': Production of film, with climber rescuing family, hinges on economics, tax break.

By KYLE HOPKINS
khopkins@adn.com
(02/25/11 14:29:25)

Alaska movie-watchers: This one could be bigger than "Whales."

A team of action-movie producers is in Anchorage this week researching a feature film about mountain climbing that they hope to film in Alaska as early as next year.

The movie is tentatively titled "The Peak," and it would tell the fictional story of a girl and her woefully unprepared parents who crash in the mountains wearing tennis shoes and jeans. A skookum rescue climber attempts to save the family.

"We set it here because we want to make it here," producer David Greathouse said Thursday as the group prepared to scout potential production buildings in Anchorage.

It's unclear how much the film would cost. Another producer, Lucas Foster, estimated the budget in the "many tens of millions."

The price tag would far exceed the more than $30 million spent on "Everybody Loves Whales," said Foster, whose producer credits include "Bad Boys," "Law Abiding Citizen" and the Brad Pitt, Angelina Jolie shoot-'em-up "Mr. & Mrs. Smith."

The producers arrived in Alaska on Tuesday. They spent Wednesday flying by helicopter to Matanuska Glacier, Lake George and other locations as they prepare to tweak a long-simmering script about a dangerous mountain rescue.

"It's not like you've got to go to some place and try to help them imagine what it might be like with enough special effects and whatnot," said Colby Coombs, a founder of the Alaska Mountaineering School who traveled with the group. "The mountains do the talking."

Simon Crane, stunt coordinator on "Mr. & Mrs. Smith," "Salt" and the upcoming "Men in Black III," is set to direct, Foster said.

As the state Legislature considers extending or tweaking a generous tax subsidy that allows filmmakers to recover as much as 44 percent of their in-state spending, Alaska film-boosters are courting producers like Foster in hopes of landing another major production.

Like all big-budget films, there's no guarantee the mountain-climbing movie will be made -- or made in Alaska.

"As long as it makes economic sense to shoot it here, we'll shoot it here," Foster said over a pancake breakfast at the Hotel Captain Cook.

Alaska's tax incentive is a major factor in the decision, he said. The producer, a blunt-spoken man in a faded Yankees cap and black North Face jacket, literally gave the finger to the state of Michigan at the breakfast table to show what he thought of Michigan Gov. Rick Snyder's move to slash that state's film incentives.

When producers find a place to film that works, they come back, he said. If filming "The Peak" goes well in Alaska, the producer said, he'd consider shooting more movies here in the future.

"I can make an action movie that I was going to shoot in Louisiana in Alaska, if I want to," Foster said.

A RESCUE STORY

"The Peak," which also has been called "The Tooth" and may end up with another title altogether, is an action thriller. Filming could take 13 or 14 weeks, with pre- production beginning months earlier.

Filming is at least a year away and would likely take place in the summer, Foster said.

In the script, a journalist takes his wife and 11-year-old daughter into the mountains to write a feature or lifestyle story. Kind of a family vacation on the boss's dime, the producers said.

"He's a little bit of a jerk in the sense that he brings his family to a place that he really shouldn't have brought them," Foster said. "They're really sort of ill-equipped to be here."

An experienced mountain climber serves as the family's guide and becomes protective of the girl. "It's not her fault she has (idiot) parents," Foster said.

While flying home in a Bush plane, the journalist pushes for his pilot to fly higher and higher for photos. Disaster follows.

"(The plane) drills itself into the mountain; the fuselage breaks up," Foster said.

The mountain climber -- who the producers said would likely be played by a male movie star in his 30s or early 40s -- must lead a rescue team to the crash site.

"We're deciding whether we want to make those climbers PJs (parajumpers) or not. Park rangers. We're not sure yet, as we adjust the script to the reality that we're learning about," Foster said.

The climber tries to keep the isolated girl's spirits up, possibly in a series of a satellite phone conversations, and the story revolves around her connection with the rescue climber, the producers said.

The film has not been cast, they said.

SCOUTING TRIP

A recent draft of the script was set in the Himalayas. Foster and Greathouse, with line producer Bill Wilson and development executive Gregory Veeser, are researching Alaska in an effort to set the story here.

The producers are scouting locations similar to those in the story, talking with Alaskan mountain climbers and rescue experts and looking for potential soundstages in Anchorage.

"We really liked Talkeetna. That is a cool little town," Greathouse said.

Coombs, co-founder of the Talkeetna-based mountaineering school, flew with the group in a pair of R44 helicopters from Girdwood to visit glaciers, icebergs and Hatcher Pass, he said.

"What's different in Alaska compared to other places is you don't have to improvise," Coombs said. Want mountains and glaciers? They're right out the back door, he said.

The producers expect the action movie to appeal to international audiences.

"Our movies get seen by 80 million people around the world or more," said Foster, whose producer credits also include "Jumper," "Walking Tall" and "Crimson Tide."

"Our point of view is there hasn't really been a climbing movie that had an authenticity to it," he said. "The last climbing movie that was made, that was a major theatrical release in North America, was 20 years ago."

That film, "Vertical Limit," was well cast but unrealistic, the producers said.

"It had a guy jumping across a crevasse with two ice axes and slamming into the side of the mountain and saving himself," Greathouse said.

Film added $16.5 million to state's economy

The Associated Press
(02/26/11 20:43:32)

A new report says the filming in Alaska of the Drew Barrymore-Ted Danson movie "Everybody Loves Whales" brought an estimated $16.5 million to the state economy. The report released Thursday by the Anchorage Economic Development Corp. said the film employed more than 1,300 Alaskans over the 58-day shoot last year. That number includes 48 cast members with speaking parts and about 1,100 extras.

The estimate also includes production company spending in Alaska.

The movie has applied for the state's film production tax credit.

The pending movie is a fictional retelling of a 1988 attempt to rescue California gray whales trapped under the ice near Barrow.

Municipality of Anchorage

2011 State Legislative Program

(State Fiscal Year 2012)

Dan Sullivan, Mayor

who may have no way to supplement current income or cut costs. Current law provides sufficient fiscal protection without legislative repeal of the program: Cash assistance provided under the Alaska Senior Benefits Payment Program is explicitly subject to appropriation under AS 47.45.302(c). The program should not be made subject to sunset June 30, 2011. The sunset should be extended or repealed.

Energy

- ✓ **Natural Gas:** Support legislation that promotes natural gas development in the Cook Inlet, and modernizes aging Railbelt electrical transmission facilities.

- ✓ **Oil Production:** The MOA strongly supports all efforts to maximize oil production to maintain Trans Alaska Pipeline Service (TAPS) viability; and encourages a competitive analysis be performed to address the existing regulatory and fiscal framework to identify whether Alaska is globally positioned to attract maximum development.

Private Sector Development

- ✓ **Film Credits:** Because of the proven economic benefits that film production is providing Alaskan communities, MOA supports extension of the Alaska Film Production Incentive Program and full funding of the transferable film production tax credits for Alaska corporations.

- ✓ **Little Davis Bacon:** Consistent with the Alaska Municipal League priority, the MOA supports raising the limit from $2,000 to $50,000 on Little Davis Bacon projects.

Public Safety

- ✓ **Drug Legislation:** The MOA has identified the need for strong legislation that criminalizes the use of Tetrahydrocannabinol (THC) mimicking drugs or synthetic marijuana products, to include the incense commonly sold as "Spike", "Spice" or "K2."

- ✓ **Involuntary Commitment:** Amend AS 47.27.190 on Involuntary Commitment, Section (a) by adding language to make the statute more consistent with AS 47.37.180 on Emergency Commitment.

- ✓ **Prosecution Surcharge:** Under the philosophy that cost-causers should be cost-payers, add a surcharge for prosecution similar to that for law enforcement to allow law departments to capture at least a portion of the funds expended in the interest of public safety. Under AS 12.55.039, a surcharge is assessed to defendants in the amount of $75, $50, or $10, depending on the type of offense.

- ✓ **Indigent Defense Fee:** Make the indigent defense fee assessed to defendants post-conviction or plea a mandatory, not discretionary, fee to allow local jurisdictions to capture at least a portion of the funds expended

I have lived in Girdwood for the past 32+ years. I own and operate a business that has provided support for Alaskan film, TV, and commercial photography production for 2 1/2 decades.

I'm writing to you with concerns about HB 67 & SB 23, The "film production incentives bill".

I believe the existing film production incentives regulations need to be reexamined. Perhaps it is too early to say, but it is possible the current regulations maybe having some unintended effects. Perhaps the existing regulations need to be reviewed and further study is in order before this program is extended another 10 years.

My concerns are as follows-

Since the opening of the Alaskan Film Office my business revenues has fallen off over 75%. Part of the reason for this slow down may stem from the general economic state of the country however since the office has opened the call volume has all but dried up. Former clients are now calling the Alaska Film office for guidance and incentives information. The Film Office has disrupted the natural flow of information and business contacts. I now seem to be in competition with the State of Alaska. The State now provides services free of charge that previously I was able to make a living at.

The only time I have previously experienced anything of this nature was the when the last "film office" was in operation. Since the previous office shut its doors I had a thriving production support businesses. That business took a severe nose dive since the advent of the new film office and the film production incentives.

How could this be??

The incentives and the current regulations maybe having some unintended effects.

The film production subsidies are first of all crafted to attract feature film business that would probably not come to Alaska without them. The subsidies seem to ignore the smaller productions that have always come to Alaska without incentives. If the spend limits were lowered to say 50K then it is my belief we would see more of the productions that belong up in Alaska and want to come to Alaska and that the current infrastructure can support. These smaller productions typically are inclined to hire a larger percentage of Alaskans for their support crew. They also rent their production equipment locally. They additionally are more likely to venture further a field in Alaska thus providing benefits statewide and to smaller communities. This has been the bread and butter of Alaskan film production and it is very likely, with the help of incentives, we would see more of it. Lower the spend limit to encourage more commercials and small productions. Tighten the regulations to protect Alaskan jobs and businesses.

With the help of the film incentives and the current regulations the larger, longer productions get subsidies to bring their crew personnel and equipment up from the lower 48. The out of state crews are willing to work for less and often on a flat rate with no overtime, etc. This maybe attractive to the travel and hospitality industry but it does nothing for the majority of legitimate Alaskan film support venders and businesses

The film incentives were intended to allow the Alaskan infrastructure to grow. At this point it is difficult for me to invest much in what is likely to be an artificial bubble, which is likely to deflate quickly if (when) the incentives are removed.

The Film Office needs to be prohibited from providing support information to potential productions. I do not want to be in competition with the state. They should only be facilitating and monitoring the incentives programs

The Film Office needs to be transparent. The Film Office should be required to immediately post all of the contacts that are made so that all Alaskan business has equal access to this information. Currently the film office is a black hole for all contact information. The Film Office claims that it is required to keep this contact information confidential to protect the interests of the out of state production companies. If these Production Companies are being subsidized with public funds it would seem that the public along with Alaskan business have a right to the contact information. Due to the lack of transparency and oversight no one knows how contracts are ultimately awarded.

Prior to the opening of the new film office, all film contacts that came into the state office were immediately passed on to the Alaskan film professionals. This system worked well and did not interfere or redirect the natural flow of business. It additionally provides the necessary transparency to this process. All the contacts that come into the state film office need to be passed on immediately. If the potential clients require secrecy then they should be doing their business through an Alaskan business in the first place. If a state office and public funds are being used then it needs to be a transparent process. If the production companies don't like it then they should not expect a hand out.

Going forward the current regulations need to be modified

No more subsidies for out of state workers, actors, directors, producers. Instead increase incentives for Alaskan resident hire and training and investment in infrastructure.

Eliminate incentives that allow out of state companies to ship their production equipment to Alaska. Why should public funds be used for this while existing Alaskan equipment is not being rented. Why would I invest in equipment knowing that the state is going to subsidize out of state companies to ship cheaper equipment up here.

Demand that the film office follow the directive outlined in the film incentive bill-

The Alaska Film Office was created by the 25th Legislature through SB 230. It was signed into law on June 4, 2008. The enabling legislation (AS 44.33.231-AS 44.33.239) instructs the Alaska Film Office to:

(1) cooperate with organizations in the private sector for the expansion and development of the film production industries in the state;
(2) promote Alaska as an appropriate location for film production;
(3) provide production assistance through connecting film directors and makers, and producers with Alaska location scouts and contractors, including contractors providing assistance with permit applications;
(4) certify Alaska film production internship training programs and promote the employment of program interns by eligible productions; and
(5) in cooperation with the Department of Revenue, administer the Alaska Film Production Incentive Program.

Directive # 3 clearly states the film office is provide production assistance through the Alaskan film professionals. The film office should not be allowed to provide any production service or direction of any kind, including permit applications, otherwise they are in direct competition with Alaskan businesses.

The Film Office claims that it has fulfilled these duties by linking to an on line service called reel Scout. However this service is not designed to meet the needs of Alaskan production, it is however an easy way for the film office to appear that they are fulfilling the 3rd directive.

I do believe that with some changes to the regulations that the Alaskan Film production incentive program could be beneficial to Alaskans and the industry. However, the devil is likely to be in the details so it is very important to get the details right before committing to another 10 years of this program.

Senate Bill 23:

Letters of Support

EVERGREEN

March 16, 2011

Senator Johnny Ellis
Chairman, Senate Rules Committee
State Capitol, Rm. 119
Juneau, AK 99801-1182

Re: SB 23 relating to the extension of the film production tax credits and transferrable tax credits

Dear Senator:

On behalf of Evergreen Films, I would like to add our support for passage of SB 23. Evergreen Films is an Alaska-based film company with state-of-the art 3D production studios in both Anchorage and Los Angeles. We are focused on producing content that combines *AVATAR*-quality technological innovation with Pixar-quality storytelling. Evergreen is currently in pre-production on the feature film *WALKING WITH DINOSAURS 3-D*, a co-production with BBC Earth. We are shooting exteriors in Alaska this summer, with the film slated for worldwide release in 2013 by Twentieth Century Fox, a global leader in film marketing and distribution.

The extension of the current film incentives will be a primary factor as Evergreen Films and our Alaska business partners decide whether to proceed with further private infrastructure investments in the film industry. This legislation will also continue to attract other producers, and sends a strong message to local businesses and investors that a huge opportunity exists for growth in Alaska, as this new film industry is successfully developed for the long-term.

The economic impact and jobs experienced in Alaska with the small studio production, *EVERYBODY LOVES WHALES* (direct, indirect and induced spending was estimated at $16.5 million), is just the beginning of what could be a successful new business platform for Alaska. Signs of this are already appearing throughout the state. The Board of Regents recently approved a Bachelor of Arts Degree program in film at the University of Alaska, Fairbanks. Financial institutions in Alaska are exploring how to become involved in supporting the film industry. Alaska corporations, such as NANA Development Corporation, are developing film services companies. This June, high school students from the Lower Kuskokwim School District will be participating in a work-study program revolving around filmmaking. And most importantly, producers are currently scouting locations in Alaska for a number of future projects.

The positive message of stability created by the long-term extension and funding for the film incentive and tax credits, cannot be overstated in an industry where development, finance packaging, production and distribution of a film project can often take many years. Alaska is finally on film producer's radar and we are successfully competing with other film-friendly states. Passage of this pro-business legislation, which supports and fosters the new, non-resource based film industry, sends the message that our state is in this for the long haul.

Most sincerely,

Mike Devlin, CEO

Senator Burt Stedman, Co-Chair
Senator Lyman Hoffman, Co-Chair
Senate Finance
State Capitol
Juneau, Alaska 99801

March 4, 2011

Dear Senators Stedman and Hoffman:

I write to you today in support of SB 23, "An Act relating to transferable film production tax credits; and providing for an effective date by amending the effective dates of secs. 3 and 4, ch. 63, SLA 2008", which will encourage diversification of the Alaska economy through an extension of the Alaska Film Industry Tax Credit.

The mission of the Anchorage Economic Development Corporation (AEDC) is to grow and diversify the Anchorage economy and although AEDC's mission is narrowly focused on Anchorage, we know that a more robust, diversified state economy is an integral part of achieving our mission. An expanded Alaska film industry does just that.

This fact is supported by the economic impacts study of Everybody Loves Whales that AEDC recently released. The study found that an estimated $16.5 million was spent in the state with $11.7 million accounting for wages and the purchases of goods and services from Alaska businesses. The additional $4.8 million represents production company spending in Alaska, coupled with local spending of new payroll dollars generated by the project.

The study also estimates that more than 1,300 Alaskans earned income directly related to the filming of "Whales." This includes 175 crew, 48 cast members with speaking parts and about 1,100 movie extras. Based on hours worked and wages earned, the production workforce translates into the equivalent of 110 full time jobs and a total of $4 million spent on Alaska wages. And these jobs weren't just in Anchorage, but in multiple areas of the state.

One of the things heard multiple times from producers was that they want to shoot their films in Alaska, but will go to other states or countries that offer the most competitive environment for total cost of production. With this program, Alaska is

one of those places. But, in order to grow and expand this new industry, many infrastructure needs such as a sound stage and a resident labor pool are needed. Without certainty of the program continuing past the original sunset date, the financing of such hard assets and programs are a very hard sell. By passing this legislation and extending the program, we will work to overcome those concerns and to develop a new and growing industry in Alaska, rather than a one-time flash in the pan.

Sincerely,

Bill Popp
President & CEO

March 8, 2011

Senator Burt Stedman
Co-Chair, Senate Finance Committee
State Capitol Room 516
Juneau, AK 99801

Re: SB 23 Alaska Film Incentive Program Extension

Dear Senator Stedman:

On behalf of our approximately 6000 Teamster members, I would like to thank you for your proactive approach to incentivizing the Alaska Film Industry. Your legislation, which was passed overwhelmingly by the legislature in 2008, has been a success from the onset.

In March 2008, prior to the passage and implementation of SB 230, Paramount Studios-DreamWorks produced some background shots for a Star Trek movie. The shoot lasted approximately one week and employed five of our members, who worked approximately 190 man-hours.

Since the passage of the tax incentive, we have seen a substantional increase in the number of jobs in the film industry. One of the larger productions, "Everybody Loves Whales", employed at peak approximately forty Teamster members who worked approximately 20,000 man-hours. Many of these workers earned nearly $35,000 each for their work over a three to four month period. We continue to have Teamsters employed on other shoots as well.

I would also like to note that the film incentive program has not just increased jobs for union members, but non-union workers as well. We have found that some of the smaller productions have not been signatory to a labor agreement, but they also

generate dollars into our economy- Alaskans working in Alaska on Alaskan jobs.

We would note, however, that training workers in this field of industry would assist in assuring that more of the technical jobs are done by Alaskans. For example, in addition to van drivers, cast drivers, steak beds, and generator trucks, there are also set dressers, grips, set electricians, production crews, construction crews, and special effects teams, to name a few. I am currently working with our Training Trust director and industry representatives to focus our program specifically toward some of the film industry needs, and I am sure others are as well. Working together to assure a well-rounded training program will go far in assuring that Alaskan workers with new skills will be working in this new and exciting industry in our state.

In summary, we will assist where necessary in support SB 23. This legislation is an excellent example of an incentive program that has increased the number of Alaskan jobs and improved our overall economy in a very brief period of time. Your approval of the continuation can only further improve those numbers and the ongoing economic growth of our state.

Sincerely,

GENERAL TEAMSTERS LOCAL 959

Re: Film Incentive Credit SB23/HB67

Dear Senator Ellis:

The Juneau Convention & Visitors Bureau (JCVB) supports SB23/HB67. We understand the importance of creating jobs and diversifying the economy for Alaska and for Alaskans.

As a destination marketing organization with over 275 business members, we appreciate the economic impact that the visitor industry (both leisure and business) brings to our community. As has been demonstrated with "Everybody Loves Whales," the film industry is an economic stimulator that relies heavily on the hospitality industry and brings much-needed business to hotels, restaurants, catering, and transportation services.

As stated in the bill, the film incentive program creates transferable tax credits for eligible corporate tax payers. The subsequent tax relief this brings to a variety industries is another form of economic stimulus for our state.

We support the objective of SB23/HB67 to make Alaska more competitive in attracting film production business, to create new jobs and generate business opportunities.

Sincerely,

Lorene Palmer

February 17, 2011

Senator Johnny Ellis
Chair, Senate Rules Committee
Alaska State Senate
State Capitol, Room 119
Juneau, AK 99801-1182

Dear Senator Ellis:

It is with pleasure I present you with the enclosed Anchorage Convention & Visitors Bureau (ACVB) Resolution 2011-01 in support of SB 23/HB 67, Extension of Alaska Film Production Incentive Program. Our Board of Directors unanimously approved the film efforts in Alaska and go on record supporting the incentive program, providing a written resolution. As you know, the economic impact resulting from film productions will flow into our Alaska communities, presenting new business opportunities resulting in a positive impact on our economy.

We appreciate the groundbreaking efforts you began in 2007, resulting in the current program in place, and look forward to our state reaping these benefits for years to come. Thank you for your continued support of this program and your commitment to bring new industry to Alaska.

ACVB wholeheartedly supports SB 23/HB 67 and the opportunity to bring the film industry to Alaska through this incentive program.

Sincerely,

Julie Saupé

ANCHORAGE CONVENTION & VISITORS BUREAU BOARD OF DIRECTORS

RESOLUTION 2011-01

A Resolution in support of SB 23/HB 67 - Extension of Alaska Film Production Incentive Program

WHEREAS, since its inception in 2008 Alaskan communities have benefitted greatly from the Alaska Film Production Incentive program as a result of productions large and small filming in Alaska with the positive financial impacts from the film production felt across the community; and,

WHEREAS, film and television projects also offer millions of dollars worth of marketing and promotion for Alaska businesses, products and Alaska tourist destinations; and,

WHEREAS, SB 23/ HB 67 seeks to continue the success of the Alaska Film Production Incentive Program by extending the opportunities created in Alaska for economic development and diversification; and,

WHEREAS, as some other states are struggling with budget deficits and have been cutting their film incentives, Alaska is in a uniquely strong fiscal position to capitalize on this opportunity in the short and medium term by signaling our commitment to keep Alaska open for the film and television business; and,

WHEREAS, SB 23/ HB 67 seeks to continue the positive economic development of the Alaska Film Production Incentive Program by creating a climate that fosters the growth of the television and film production industry and encourages the incremental capital investments necessary to support this multi-million dollar industry; and,

WHEREAS, SB 23 / HB 67 extends the Film Production Tax Incentive Program for 10 years, offering $100 million in transferable tax credits in the first 5 years of the extension and $100 million in credits for the final 5 years of the extension; and,

WHEREAS, tax credits will be issued after the production has completed filming in Alaska and only after a thorough audit of those Alaska expenses by an independent auditor.

NOW THEREFORE be it resolved that the Board of Directors of the Anchorage Convention & Visitors Bureau strongly supports the continuation and extension of the film incentive program via SB 23/ HB 67.

Maggie Kelly
Chairman for the Board of Directors

RE: Senate Bill 23 Film Production Tax Credit

Dear Senator Ellis:

On behalf of the Kodiak Chamber of Commerce , I would like to offer our support for Senate Bill 23, the extension of the Alaska Film Production Tax Incentive Program. Since its inception in 2008 the Film Production Tax Incentive program has created jobs for Alaskans and economic opportunities for Alaska businesses small and large. Film and television projects offer invaluable marketing and promotion for Alaska tourism, products and businesses. Continuing and extending this program offers a clear signal to the multi-billion dollar film and television industry that Alaska is open for business

Financial incentives have changed the way filming decisions are made. Alaska faces aggressive and long established film incentives from provincial governments in Canada and 45 other states. These regions understand the economic benefits that this industry can bring to our businesses and communities.

We support the extension of the Alaska Film Production Tax Incentive program for ten years with $100 million available in incentives during the first five years and $100 million in incentives for the final five years. Senate Bill 23 will continue the economic diversification and economic development success of the film tax incentives while also providing a clear signal that offers Alaska businesses the opportunity to better plan for and capitalize on Alaska's newest multi-million dollar industry.

For all of these reasons, the Kodiak Chamber of Commerce fully supports the Film Credit Tax Credit Bill and thanks the Alaska State Legislature for working towards a more prosperous Alaska.

Sincerely,

Trevor Brown
Executive Director
Kodiak Chamber of Commerce

Re: Senate Bill 23

Dear Senator Ellis,

Thank you for introducing Senate Bill 23, *"An Act relating to transferable film production tax credits; and providing for an effective date by amending the effective dates of secs. 3 and 4, ch. 63, SLA 2008."*

I fully support the passage of SB 23 that would extend the Alaska Film Tax Incentive program for 10 years. The early success of the incentive program created jobs and stimulated our local economies, and it should be continued. With other countries and states competing for opportunities, it is important to show the film industry that Alaska is a stable place to do business.

Please contact Sara Gill, Intergovernmental Affairs Director, if you have questions. She can be reached at 343-7117 or GillSN@muni.org.

Sincerely,

Dan Sullivan
Mayor

Re: SB 23 – Extension of film production tax credits

Dear Senator Ellis:

On behalf of General Communication, Inc. (GCI), I add the company's support for SB 23 which extends the film production incentive program and film tax credits in Alaska.

GCI was involved in the recent production of EVERYBODY LOVES WHALES. As a major sponsor of this film we observed first-hand the impact this small studio production had on the economies of Anchorage and Barrow.

Some economic impacts can be easily measured – such as those in the recently released report by the Anchorage Economic Development Corporation (AEDC) – but it's more difficult to quantify the effect on a business such as ours. From a corporate perspective, our association with the film engendered good will with Alaskans, who recognize the need to build economic opportunities within the State.

It's our goal to repeat the positive experience we had working with the producers on EVERYBODY LOVES WHALES. In fact, we will be partnering with the producers of THE PEAK, a major motion picture with a much higher budget, and look forward to working with other producers throughout the years as they bring their film business to Alaska.

The cache of working with a feature film in Alaska provides GCI an excellent marketing tool, and just as a high tide lifts all ships, we expect that any Alaskan business that provides goods and services would likewise see a financial boost.

GCI wholeheartedly supports SB 23 and the continuation of the film production incentive program and tax credits.

Sincerely,

Paul Landes
Senior Vice President of Consumer Services

Delivered via electronically

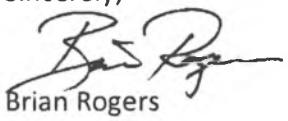
Dear Senators and Representatives,

Preparing Alaskans for Alaska jobs; that is a big part of what we do at the University of Alaska Fairbanks (UAF) and why we support expanding the Alaska Film Production Tax Incentive Program. UAF has just added a film major to our list of bachelor degrees and we are committed to preparing our students for a growing film industry in Alaska. Senate Bill 23 and House Bill 67 will help diversify Alaska's economy and UAF is excited to be a part of training the people who help make that happen.

The University of Alaska Fairbanks has actively been working with film industry partners long before the tax-incentive program was established to broaden the skills of our students and provide opportunities for on-the-job training. We have supplied talent, crew, logistical support, and even equipment for Discovery Channel, Sundance Institute, Universal Pictures, CNN, the History Channel, BBC, and dozens of smaller film production companies from all over the world.

Our students have worked with industry from television commercials to feature films. Since the establishment of the Alaska Film Production Tax Incentive Program, the number of these opportunities has dramatically risen. One of the impetuses for the new film major is to help prepare homegrown talent for an industry that is expanding here.

These incentives have changed the way filming decisions are made. Alaska faces aggressive and long established film incentives from Canada and 45 other states. They understand the economic benefits that this industry can bring to their businesses and communities.



UAF is an Equal Opportunity Employer/Affirmative Action Educational Institution

The National Science Foundation has funded UAF Film students for work with the International Polar Year, recognized by the Legislature for their broadcasts from Iraq as embedded journalists, and have been cast in roles as actors from Barrow to Anchorage. We have been proud partners and associates in two films screened at Sundance, and others that have been seen in International Film Festivals the world over. Enrollment in UAF Film Courses has grown 60% in the past four years, and continues to grow.

We support the extension of the Alaska Film Production Tax Incentive program for ten years with $100 million available in incentives during the first five years and $100 million in incentives for the final five years. Senate Bill 23 and House Bill 67 will provide a clear signal that offers Alaska businesses the opportunity to better plan for and capitalize on Alaska's newest multi-million dollar industry.

For all of these reasons, UAF fully supports the Film Credit Tax Credit Bill and thanks the Alaska State Legislature for working towards a more prosperous Alaska.

Sincerely,

Brian Rogers

March 16, 2011

The Honorable Johnny Ellis
Alaska State Senate

Dear Senator Ellis -

I am writing in support of SB 23, the film incentive bill, and want to add my voice to the many who favor extending the program for 10 years as well as increasing the amount available to tax credits by an additional $100 million.

My company, Kaladi Brothers Coffee Co., had a front row seat to the making of *Everybody Loves Whales.* Whether it was all-Alaskan coffee, lattes, cappuccinos or chai tea, we had the privilege of serving our products to the cast and crew for nearly four months. Our coffee cups and our baristas were on the set every day, and our home roasted coffee kept the production rolling. We donated our time and our product 24 hours a day / 7 days a week not because we wanted the recognition, but because we believed in doing everything we could to encourage productions like *Whales* to choose Alaska as a film location. We knew that good word of mouth back in Hollywood about Alaska's hospitality [and good coffee] would go along way toward convincing other productions that Alaska could host their needs. By encouraging more feature films, we believed it would be good for the long-term economic development of the state.

As was recently reported in a study done for the Anchorage Economic Development Corporation, because of *Everybody Loves Whales*, the state as a whole saw $16.5 million more in output between August and November 2010 than otherwise would have been the case. That's just the economic impact of this one movie! I can imagine a time when Alaska will host three or four or five movies a year.

Of course, as you so well understand, no feature film or television show would film here if not for the tax credit incentives. Alaska must be competitive with other states and do whatever it can to attract more feature films, television shows and documentaries to the state. And so I applaud your vision and your effort to extend the tax credits with hope that it will be supported and passed by the legislature this session.

Sincerely,

Dale Tran
Chief Operating Officer

RE: Senate Bill 23 Film Production Tax Credit

Dear Senator Ellis:

On behalf of the Juneau Chamber of Commerce, we would like to offer our support for Senate Bill 23, the extension of the Alaska Film Production Tax Incentive Program.

Since its inception in 2008, the Film Production Tax Incentive program has created jobs for Alaskans and economic opportunities for Alaska businesses small and large. Film and television projects offer invaluable marketing and promotion for Alaska tourism, products and businesses. Continuing and extending this program offers a clear signal to the multi-billion dollar film and television industry that Alaska is open for business

The fact is, financial incentives have changed the way filming decisions are made. Across the U.S. forty-five states currently have incentive programs of some type in place; demonstrating recognition by those states of the economic benefit this industry offers its labor force, area businesses and communities. Internationally, Alaska faces aggressive and long established film incentives from provincial and federal governments in Canada and around the globe. In order to stay competitive in this global industry Alaska needs to send a clear message.

We support the extension of the Alaska Film Production Tax Incentive program for ten years with $100 million available in incentives during the first five years and $100 million in incentives for the final five years. Senate Bill 23 will continue the successful economic diversification and development it has already shown while providing Alaska businesses opportunities to properly plan for and capitalize on Alaska's newest multi-million dollar industry.

For all of these reasons, the Juneau Chamber of Commerce fully supports the Film Credit Tax Credit Bill and thanks the Alaska State Legislature for working towards a more prosperous Alaska.

Sincerely,

Cathie Roemmich, CEO

Juneau Chamber of Commerce

Senator Johnny Ellis
Chair, Senate Rules Committee
State Capitol, 119
Juneau, AK 99801

February 7, 2011

Honorable Senator Ellis,

Thank you for taking the initiative to introduce Senate Bill 23 to the current legislative session. Extending the film production tax credits for an additional ten years will allow the State to continue developing this industry in a comprehensive fashion. Establishing a workforce, infrastructure, and proving our talents is part of the long-term strategy.

The University of Alaska Fairbanks has actively been working with film industry partners since 2007 to broaden the skills of our students and provide opportunities for on-the-job training. We have supplied talent, crew, logistical support, and even equipment for Discovery channel, Sundance Institute, Universal Pictures, CNN, the History Channel, BBC, and dozens of smaller film production companies from all over the world. Our students have worked with industry from television commercials to feature films.

UAF Film students have been funded by the National Science Foundation for work with the International Polar Year, recognized by the Legislature for their broadcasts from Iraq as embedded journalists, and have been cast in roles as actors from Barrow to Anchorage. We have been proud partners and associates in two films screened at Sundance, and others that have been seen in International Film Festivals the world over. Enrollment in UAF Film Courses has grown 60% in the past four years, and continues to grow.

The Alaska State Film Tax Incentives are the first step in attracting established film companies, producers, directors, and talent to Alaska. In so doing, they are providing local Alaskans opportunities to not only work on the set, but also provide services in direct support of productions. From hotels and restaurants to transportation and equipment, ripples are cast wide when a film comes to town.

It takes several years to develop a film production from concept to screen. We have really only seen two years to prove what could be done in our state with the incentive program in place. Once the timeline is extended, more filmmakers will commit to developing their projects here and we will see a surge in productivity and revenue as a result.

The film industry is a green, renewable, and lucrative industry to attract to our state. The benefits of tax incentive programs have been proven; New Mexico, North Carolina, New Orleans, and Michigan have seen substantial revenue growth due to the film industry presence.

Fortunately for us, Alaska is ALASKA! Filmmakers want to share its beauty with the world. Let's help them do that, keep the revenue in state, give Alaskans the jobs, and share our stories with the world.

Thank you for your service to this Great State.

Sincerely,

Maya Salganek
Assistant Professor, Theatre & Director, Film Studies
University of Alaska Fairbanks

AR No. 2011-54

A RESOLUTION IN SUPPORT OF THE SB 23/HB 67 - AN EXTENSION OF ALASKA FILM PRODUCTION INCENTIVE PROGRAM.

WHEREAS, since its inception in 2008 Anchorage has benefitted greatly from the Alaska Film Production Incentive program as a result of productions large and small filming in Anchorage with the positive financial impacts from productions felt across the community and state; and,

WHEREAS, the film and television industry offers an opportunity to diversify our economy and creates jobs and opportunities for business large and small; and

WHEREAS, local businesses that have benefited from recent film and television productions have included construction companies, towing companies, hardware stores, lumber yards, communication companies, landscaping, restoration companies, dumpster services and rentals, plumbing, heating, rental equipment companies, truck leasing, crane companies, paving companies, catering, cleaning, boat charters, diving companies, survey companies, engineering firms, printing, office supplies, motor-home rentals, shipping companies, airlines, hotels, and restaurants; and

WHEREAS, film and television projects also offer millions of dollars worth of marketing and promotion for Alaska businesses, products and Alaska tourist destinations; and,

WHEREAS, SB 23/HB 67 seeks to continue the success of the Alaska Film Production Incentive Program by extending the opportunities created in Alaska for economic development and diversification; and,

WHEREAS, as some other states are struggling with budget deficits and have been cutting their film incentives, Alaska is in a uniquely strong fiscal position to capitalize on this opportunity in the short and medium term by signaling our commitment to keep Alaska open for the film and television business; and,

WHEREAS, SB 23/HB 67 seeks to continue the positive economic development of the Alaska Film Production Incentive Program by creating a climate that fosters the growth of the television and film production industry and encourages the incremental capital investments necessary to support this multi-million dollar industry; and,

WHEREAS, SB 23/HB 67 extends the Film Production Tax Incentive Program for 10 years, offering $100 million in transferable tax credits in the first 5 years of the extension and $100 million in credits for the final 5 years of the extension; and,

WHEREAS, tax credits will be issued after the production has completed filming in Alaska and only after a thorough audit of those Alaska expenses by an independent Alaska auditor now, therefore,

THE ANCHORAGE ASSEMBLY RESOLVES: that the Anchorage Municipal Assembly strongly supports the continuation and extension of the film incentive program via SB 23/HB 67.

Re: HB 67/SB 23-Extension of AK Film Production Incentive Program

The Fairbanks Economic Development Corporation supports SB 23/HB67 and your efforts to continue to diversify the economy by extending the AK Film Production Incentive Program. Fairbanks has attracted the interest of producers over the years, with projects ranging from INTO THE WILD to documentaries and commercials. It is our hope that by extending current film incentives, we will have the opportunity to enjoy the positive economic impacts experienced in other areas of the state that secured locations for studio productions.

We understand that this is still a fledgling industry for Alaska. The Dept. of Commerce, Community and Economic Development are currently developing a full-scale marketing plan and strategy in under discussion for possible public-private marketing opportunities at film-related venues in the future.

Our members come from all areas of the business sector in Fairbanks and can provide many of the services needed to support a film production. In addition, the impact on tourism-related businesses as an area serves as a location for a film production is well documented.

We support the economic development brought about by the current film incentive program. By extending and expanding the program, Alaskans can continue to benefit from new jobs and the business opportunities that come with welcoming this multi-million dollar industry to our state.

Sincerely,

Jim Dodson

SUPPORT OF SB 23: Alaska Film Incentive Program Extension

Dear Senator Ellis,

At its recent monthly meeting, the Board of Directors of the Southwest Alaska Municipal Conference (SWAMC) voted its support in favor of SB 23 to extend the Alaska Film Incentive Program. The Board feels that this program has offered many economic benefits to the residents of Alaska, and it has the potential to do more.

With estimates ranging from $2-3 delivered to local economies for every dollar spent by the film industry, that represents a good return on investment for Alaskans, especially in some of the more rural and economically challenged areas of the state.

We hope to see the level of film activity increase in Alaska, and SWAMC is heartened that a portion of the tax credit program is geared toward spurring more economic development in our rural areas. We hope the bill sponsors and those within the Alaska Film Office will continue to encourage more filming and production in rural Alaska, where our scenery is unmatched.

SWAMC's Board of Directors feel that an extension of the program may develop the certainty and help spur the necessary infrastructure for the film industry to continue to prosper in the state. We must remember, however, that this program is about more than films, and several types of productions qualify for the incentive that could bring more dollars into all areas of Alaska.

Thank you for the opportunity to comment, and thank you for introducing this legislation.

Sincerely,
SOUTHWEST ALASKA MUNICIPAL CONFERENCE

Re: SB 23 Film Production Tax Credit

Dear Senator Ellis:

We are writing to express our support for Senate Bill 23, the extension of the Film Production Tax Credit. We applaud your efforts for not only this current effort but also for the groundbreaking work you accomplished to get the original legislation in place.

Alaska Rent A Car, Inc (Avis) and our 110 statewide employees benefit from the film production companies that bring their film/commercial shoots to Alaska. We are just a small example of the various types of businesses that benefit from the film industry.

One point not to be overlooked is the additional revenues that come into the state and various municipalities from similar organizations as Avis. The revenue generated by the 10% State Vehicle Rental Tax is collected by all car rental companies and passed along to the State of Alaska. Various municipal vehicle rental taxes/hotel bed tax/general sales taxes are also collected by Avis and others and used to support local governments and their citizens. We can all grasp the idea that productions coming to the state spend money in the state, and businesses enjoy this influx of new business... but we must also remind others that taxes collected are an economic boon to various governmental bodies.

Alaska has always strived to diversify its base economy. The long-term commitment to the film industry is one such tool the state can use. A long-term commitment will drive further needed investment by the private sector, create employment, create new or strengthen existing businesses, and lead to further interest in Alaska (business and tourism); all which means great things for this state.

Again, we applaud your efforts to bring a new industry to Alaska. The employee owners of Alaska Rent A Car, Inc. are fully behind the efforts of the Alaska State Legislature to pass SB 23.

Sincerely,

Gary Zimmerman

Re: Film Incentive Credit SB23/HB67

Dear Senator Ellis:

The Juneau Convention & Visitors Bureau (JCVB) supports SB23/HB67. We understand the importance of creating jobs and diversifying the economy for Alaska and for Alaskans.

As a destination marketing organization with over 275 business members, we appreciate the economic impact that the visitor industry (both leisure and business) brings to our community. As has been demonstrated with "Everybody Loves Whales," the film industry is an economic stimulator that relies heavily on the hospitality industry and brings much-needed business to hotels, restaurants, catering, and transportation services.

As stated in the bill, the film incentive program creates transferable tax credits for eligible corporate tax payers. The subsequent tax relief this brings to a variety industries is another form of economic stimulus for our state.

We support the objective of SB23/HB67 to make Alaska more competitive in attracting film production business, to create new jobs and generate business opportunities.

Sincerely,

Lorene Palmer

Re: Senate Bill 23 – Alaska Film Production Incentive Program Extension

Dear Senator Ellis:

The Alaska Railroad Corporation (ARRC) supports Senate Bill 23, which extends the Alaska Film Production Tax Incentive Program. During 2010, ARRC worked with the Alaska Film Office by offering ARRC property on very short notice because the initial filming site for the film "Everybody Loves Whales" fell through. Unless a new site was found, the filming would have been moved to Canada.

The film company not only used ARRC property for the primary "Barrow" scene, which involved extensive development and construction, it also used our newly renovated Historic Freight Shed for several film sets, feeding the crew, make-up and wardrobe. ARRC's property provided a perfect venue for this film. Numerous Alaskans were put to work in the construction activity in addition to the actors. Local workers were involved in building sets, providing equipment rentals, transportation and meals. Local businesses benefited from the increased level of dollars spent in the community. It was a group effort and everyone worked hard to welcome the film industry. I believe this effort helped to put Alaska on the map as a state that has the ability to support the film industry.

During the same period, the filming of "Ghost Visions" used ARRC property for a portion of a feature film. This film also used the property of an ARRC tenant, where several segments of the movie were filmed.

Film and television projects offer invaluable marketing and promotion for Alaska tourism, products and businesses. Continuing and extending this program offers a clear signal to the multi-billion dollar film and television industry that Alaska is open for business.

For all of these reasons, ARRC fully supports the Film Credit Tax Credit Bill and thanks the Alaska State Legislature for working to develop a new industry in Alaska.

Sincerely,

James W. Kubitz

James W. Kubitz

Dear Senator Ellis,

Thank you for sponsoring Senate Bill 23/House Bill 67. We are in full support of the Film Tax Incentive legislation. We were one of the many fortunate businesses to benefit from film crews coming to Alaska this past year. Besides the obvious tourism advantage, we know that the film crews spent huge sums of money in Alaska. We had some folks come to take tours and buy merchandise. Beyond the direct spending in our state, the exposure Alaska receives is truly priceless. We have gotten messages expressing awe from all over the world with many people deciding to finally make that "Dream Trip" to Alaska.

We appreciate your being involved in perpetuating this CLEAN, RENEWABLE Resource development.

Happy Trails,
Kathy Chapoton and Martin Buser

RE: Senate Bill 23 Film Production Tax Credit

Dear Senator Ellis:

On behalf of the ALASKA FILM GROUP and our statewide membership, I would like to offer our support for Senate Bill 23, extending the Alaska Film Tax Credit Incentive Program for ten years.

Since it's inception in 2008, Alaskan jobs in the film industry have increased and Alaska businesses have seen their bottom lines improve. In addition, film and television projects to our state offer invaluable marketing and promotion for Alaska tourism....all contributing factors to the diversification of Alaska's economy.

Many ALASKA FILM GROUP crewmembers worked on two recent feature films, "Everybody Loves Whales" and "Ghost Vision". They traveled from Fairbanks, Homer, Juneau, Girdwood, Kenai and Palmer to participate. Vendor members from rental car companies, hotels, shipping companies to film rental houses were contracted to provide services. Seeing this unfold from our efforts leading up to passage of SB230 in 2008 to where we are now has been truly amazing. Our membership has grown nearly 40% from enactment in 2008 to present day.

Forty-five other states currently have incentive programs of some type in place; demonstrating recognition by those states of the economic benefit this industry offers its labor force, area businesses and communities. Internationally, we face stiff competition from provincial and Federal Governments in Canada and around the globe. In order to remain competitive in this global industry Alaska needs to send a clear message.

We support the extension of the Alaska Film Production Tax Credit program for 10 years with $100 million available in incentives during the first five years and $100 million available in the final five years. This allows Producers to plan with expectations the program will still be in place; and for local business investors interested in building infrastructure to be assured they can amortize their investment over a period of time.

The ALASKA FILM GROUP fully supports the Film Tax Credit Bill and sincerely thanks the Alaska State Legislature for creating a program that benefits all Alaskans.

Sincerely,
ALASKA FILM GROUP

Bob Crockett

RE: Senate Bill 23 Film Production Tax Credit

Dear Senator Ellis:

On behalf of **Ascending Path and Glacier Productions LLC**, I would like to offer our support for Senate Bill 23, the extension of the Alaska Film Production Tax Incentive Program.

As a board member of the Alaska Film Group and the owner of a company which received a lucrative contract with Icebreaker Films/"Everybody Loves Whales", I personally experienced the benefit of this valuable incentive program. In 2010 my wife and I put 3 Alaskan employees on salary to run our small tourism business while she and I dedicated our time to *Whales*.

Because of the Film Incentive Program, my small Alaskan company was able to negotiate a licensing agreement with a LA based entertainment services company so Alaska can provide the accounting and payroll services that Hollywood producers are accustomed. Alaska has some growing pains in order to become a financially sustainable location for feature films, but I have confidence in the private sectors ability to accommodate, if the State commits to this Incentive.

Since its inception in 2008, the Film Production Tax Incentive program has created jobs for Alaskans and economic opportunities for Alaska businesses small and large. Film and television projects offer invaluable marketing and promotion for Alaska tourism, products and businesses. Continuing and extending this program offers a clear signal to the multi-billion dollar film and television industry that Alaska is open for business

The fact is, financial incentives have changed the way filming decisions are made. Across the U.S. forty-five states currently have incentive programs of some type in place; demonstrating recognition by those states of the economic benefit this industry offers its labor force, area businesses and communities. Internationally, Alaska faces aggressive and long established film incentives from provincial and federal governments in Canada and around the globe. In order to stay competitive in this global industry Alaska needs to send a clear message.

We support the extension of the Alaska Film Production Tax Incentive program for ten years with $100 million available in incentives during the first five years and $100 million in incentives for the final five years. Senate Bill 23 will continue the successful economic diversification and development it has already shown while providing Alaska businesses opportunities to properly plan for and capitalize on Alaska's newest multi-million dollar industry.

For all of these reasons, **Ascending Path and Glacier Productions LLC** fully supports the Film Credit Tax Credit Bill and thanks the Alaska State Legislature for working towards a more prosperous Alaska.

Sincerely,

Matt Szundy

Re: Letter of Support for SB23: Alaska Film Incentive Program Extension

February 08, 2011

Dear Senator Ellis,

I'm writing in support of SB23. First off, I would again like to thank you for your support of the statewide film industry with your promotion and the passage of SB230. Over the last year, the state has seen millions of dollars pumped into the local economy as a direct result of that bill.

As an Alaskan and as a filmmaker, I support the extension of the tax incentive. To me, it is a way to grow the economy of Alaska by capitalizing on its natural beauty with minimal spending by the state. As the legislation currently stands, the state returns $1 to the production for every $3 that is brought into the economy. This is math that works in favor of Alaskans.

Since returning to Alaska in 2008 and testifying in support of SB230, I've started my own business and have taken a vested interest in the film industry here. My growth as a skilled tradesmen didn't end when I graduated from Columbia College in Chicago. I've shared my knowledge with the community by teaching lighting classes to high school students and involving myself in local unpaid productions with other filmmakers, as well as projects at the church I attend. I'm an active member of the AFG, and as a member of the Digital Cinema Society, I keep current with production trends in the industry world wide.

As a business owner and a freelancer, I've worked on various projects that come to Juneau, example: worked on an ACS commercial; as well as work with local clients, example: currently working with University of Alaska Southeast. In addition, I did scouting work locally for *Everybody Loves Whales* and traveled to Anchorage to work as a grip on *Ghostvision.*

The extension of the tax incentive would create an environment for myself and others to continue increasing the size our skill sets as well as our tool belts, but not because of eating well, rather it would be a result of working on many top level productions and building up our tools to match the level of any professional working in Hollywood. With the passage of this extension, I believe that we can continue the growth of a well trained and highly skilled Alaskan work force, as well as encourage the private sector to construct necessary infrastructure, such as a sound stage.

Thank you for your time.

Regards,

Brice Habeger

Senator Ellis,
I'm writing to support you and your efforts with SB 23. For a little over 3 months I worked as a " propmaker" for Icebreaker Films in Anchorage for the movie "Everybody Loves Whales" I normally work as a cabinetmaker/woodworker and as a consultant on a variety of residential and commercial construction projects. I delayed scheduled projects in order to work on "the show" and I'm glad I did.

The first thing I was told when I got hired was that the reason why this particular movie was being filmed in Alaska was that the production company was saving $11 million in permits and fees . That's not chump change, and it definitely made an impression on the movie's makers. Towards the end of production I asked if the logistical problems and weather conditions would effect their decision in the future and I was told "we would come back in a heartbeat if it made us money", and was told that they only have good things to say.

I worked side by side with workers that were imported from North Carolina, which I soon learned was #3 in movie and television production and known as Hollywood East. They also claimed to be the advance crew here to "train Alaskans" to work in the movie industry. The Alaskan artists and craftspersons I worked with more than answered that challenge and I dare say taught the crewmembers from outside a few things as well.

Good luck with your endeavors,
Ron Hedge

Subject: SB23

Dear Senator Ellis:

In the 1990s to early 2000s I was a fixture in the Capitol. I worked shooting TV news for all three Anchorage stations and later shot video for the Governor's Office. Being so familiar with you, I spotted you as soon as you walked over to visit the "Everybody Loves Whales" filming. I was a crew member on the movie from before the first day of shooting until after it wrapped. I worked very long hours, but my paychecks were big.

The movie would never have come to Alaska if not for the Film Incentive. Talk about an 'economic engine'! The production brought a lot of money from Outside to Alaska and provided people like me great employment. Alaska needs much more of the same. I strongly support Senate Bill 23.

Sincerely,

MARK SABEL

Senator Johnny Ellis

Chair, Senate Rules Committee

State Capitol, 119

Dear Senator Ellis,

I am writing to show my support for Senate Bill 23.

Without this important incentive program it would have been much more difficult to raise funding for our feature film, 'The Doppelganger Principle.' With the exception of our star, Ed Asner, all cast and crew will be pulled from the talent we have here in Alaska. Further, since our investors are local, as well, all revenues from our film go right back into our local economy.

The tax incentive program has kick-started a long undeveloped industry here. Not only are we seeing big-budget feature films coming in with many jobs for Alaskans, but some of our own young film makers are now encouraged to try to ply their craft here, rather than make the usual pilgrimage Outside. I was recently invited to take part in a new web-series, 'Alaska Film Makers,' a continuing web-accessed program reporting on what is happening in our local film community. This is all quite heartening.

As the first-ever elected Alaska representative of the Screen Actors Guild, I have recently been able to help add several new members to our ranks. I fully expect that our membership in Alaska will double before the end of this year. Perhaps even more rewarding, as I now sit on the SAGIndie National Committee, we have been able to show local film makers how to develop their work as a SAG signatory project..

Good things are happening here as a direct result of this program. Extending it should be a no-brainer.

Let's not blow it!

RE: Senate Bill 23

Dear Senator Ellis:

On behalf of Prince William Sound Economic Development District, I would like to offer our support of Senate Bill 23, the Alaska Film Tax Incentive legislation. Since these incentives were created in 2008, millions of film production dollars have been spent in Alaska, creating many jobs and business opportunities across our beautiful and unique state. (It's very annoying to see a film about the Alaska experience that was filmed in British Columbia or Wyoming!)

We support the extension of Alaska Film Tax Incentive program for ten years with $100 million available in incentives during the first five years and $100 million for the following five years. These incentives will establish a positive statement to the film and television industry that Alaska is a welcoming environment for production, marketing and promotion.

Sincerely,

Sue Cogswell, Executive Director

ARDOR

To
Senator Johnny Ellis
Chair, Senate Rules Committee
State Capital, 119
Juneau, AK 99684

Dear Senator Ellis,

I am an adjunct instructor of physics live here at Unalakleet and teach online physics class for UAF-NW Campus, Nome. I am writing you because I want to share my thoughts on Alaska's new emerging film industries with you. The film industries should make films about Alaska those shot here in Alaska, not somewhere else. It would promote our Alaskan image around the world. It is good for our local business and tourism industries. As you know many of our jobs depend on the tourism business.

So, I am humbly letting you know I am in favor of **SB23** bill. This bill extent tax incentives for the film industries to make film about Alaska not in BC, Canada or Washington or elsewhere but in Alaska.

Thank you.
Sincerely,

Hello,

I wanted to take time out of my day to write my very first letter to my State legislature.

I am a life-long Alaskan, invested in my community - my great-grandparents immigrated in 1917, landing in Douglas, then relocating to Spenard in 1954; my daughter currently goes to O'Malley elementary, and my wife works for the Anchorage School District.

I have been active in the arts community for over 25 years, and have seen, and felt, the ups and downs of the economy's impact on the arts.

Recently, I have been given the opportunity to take part in two major motion pictures that were filmed here in Anchorage: Everybody Loves Whales, and Ghost Visions (aka Beyond)

While my contribution to the film was small, the economic and social impact to the community was tremendous - and very positive.

I am encouraging you to extend your support for Senate Bill 23 and House Bill 67, which will extend the Alaska Film Tax Incentive program.

Oregon is a wonderful example of how tax incentives can bring the film and TV industry into a community, and help drive the economy by offsetting failing-industry income dollars.

Our state needs to be known for more than just oil, seafood, and gold:
we need an image and income that will last through the ups-and-downs of non-renewable resources.

I believe that the Film Tax Incentive can play a part in Alaska's future, and I ask that you, too, play a part.

Leif Sawyer
6251 East 112th Ave

Sir,
I must tell you what a great experience the film "Everybody Loves Whales" was. I have been a stage hand in Anchorage for fifteen years and have worked on a number of commercial and film projects. But this level of work has not come my way and the training and experience is still appreciated.
Thank you and your associates for that opportunity. I sincerely hope this initiative will continue.
Thanks

February 7, 2011

Honorable Senator Ellis,

Thank you for taking the initiative to introduce Senate Bill 23 to the current legislative session. Extending the film production tax credits for an additional ten years will allow the State to continue developing this industry in a comprehensive fashion. Establishing a workforce, infrastructure, and proving our talents is part of the long-term strategy.

The University of Alaska Fairbanks has actively been working with film industry partners since 2007 to broaden the skills of our students and provide opportunities for on-the-job training. We have supplied talent, crew, logistical support, and even equipment for Discovery channel, Sundance Institute, Universal Pictures, CNN, the History Channel, BBC, and dozens of smaller film production companies from all over the world. Our students have worked with industry from television commercials to feature films.

UAF Film students have been funded by the National Science Foundation for work with the International Polar Year, recognized by the Legislature for their broadcasts from Iraq as embedded journalists, and have been cast in roles as actors from Barrow to Anchorage. We have been proud partners and associates in two films screened at Sundance, and others that have been seen in International Film Festivals the world over. Enrollment in UAF Film Courses has grown 60% in the past four years, and continues to grow.

The Alaska State Film Tax Incentives are the first step in attracting established film companies, producers, directors, and talent to Alaska. In so doing, they are providing local Alaskans opportunities to not only work on the set, but also provide services in direct support of productions. From hotels and restaurants to transportation and equipment, ripples are cast wide when a film comes to town.

It takes several years to develop a film production from concept to screen. We have really only seen two years to prove what could be done in our state with the incentive program in place. Once the timeline is extended, more filmmakers will commit to developing their projects here and we will see a surge in productivity and revenue as a result.

The film industry is a green, renewable, and lucrative industry to attract to our state. The benefits of tax incentive programs have been proven; New Mexico, North Carolina, New Orleans, and Michigan have seen substantial revenue growth due to the film industry presence.

Fortunately for us, Alaska is ALASKA! Filmmakers want to share its beauty with the world. Let's help them do that, keep the revenue in state, give Alaskans the jobs, and share our stories with the world.

Thank you for your service to this Great State.

Sincerely,

Maya Salganek
Assistant Professor, Theatre & Director, Film Studies

BILL NO. CSSSSB 25(L&C)

Analysis

SB 25 adds legislative intent language to re-capitalize AIDEA with $250 million for FY 13 and FY14 that would be used to fund a new loan and loan guarantee program to finance energy projects. This fiscal note represents the zero operating expenses required to administer this fund.

The bill accomplishes these goals by: (1) an appropriation of $250,000,000 for FY13 and FY14 to carry out the agency's statutory purposes; (2) setting up a new loan fund in AIDEA; (3) making changes to AIDEA's general powers to add energy projects as a development goal; (4) amending AIDEA's powers so that it can make direct loans or offer loan or bond guarantees for qualified energy projects s; and (5) amending the definitional section of the agency's statutes to add and define the term "energy project".

CS FOR SPONSOR SUBSTITUTE FOR SENATE BILL NO. 25(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS MCGUIRE, Davis, Giessel, Menard, Wagoner, Dyson, Huggins, Ellis, Thomas

A BILL

FOR AN ACT ENTITLED

"An Act establishing the sustainable energy transmission and supply development program in the Alaska Industrial Development and Export Authority; relating to the interest rates of the Alaska Industrial Development and Export Authority; and relating to taxes paid on interests in property owned by the Alaska Industrial Development and Export Authority and to the local contribution for public education funding related to that property."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SHORT TITLE. This Act may be known as the Alaska Sustainable Strategy for Energy Transmission and Supply (ASSETS) Act.

* **Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE INTENT. The legislature intends to appropriate, during fiscal years 2013 and 2014, amounts that total $250,000,000 to carry out the purposes of this Act.

* **Sec. 3.** AS 14.17.410(b) is amended to read:

(b) Public school funding consists of state aid, a required local contribution, and eligible federal impact aid determined as follows:

(1) state aid equals basic need minus a required local contribution and 90 percent of eligible federal impact aid for that fiscal year; basic need equals the sum obtained under (D) of this paragraph, multiplied by the base student allocation set out in AS 14.17.470; district adjusted ADM is calculated as follows:

(A) the ADM of each school in the district is calculated by applying the school size factor to the student count as set out in AS 14.17.450;

(B) the number obtained under (A) of this paragraph is multiplied by the district cost factor described in AS 14.17.460;

(C) the ADMs of each school in a district, as adjusted according to (A) and (B) of this paragraph, are added; the sum is then multiplied by the special needs factor set out in AS 14.17.420(a)(1) and the high school vocational education factor set out in AS 14.17.420(a)(3);

(D) the number obtained for intensive services under AS 14.17.420(a)(2) and the number obtained for correspondence study under AS 14.17.430 are added to the number obtained under (C) of this paragraph;

(E) notwithstanding (A) - (C) of this paragraph, if a school district's ADM adjusted for school size under (A) of this paragraph decreases by five percent or more from one fiscal year to the next fiscal year, the school district may use the last fiscal year before the decrease as a base fiscal year to offset the decrease, according to the following method:

(i) for the first fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 75 percent of the difference in the district's ADM adjusted for school size between the base fiscal year and the first fiscal year after the base fiscal year;

(ii) for the second fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 50 percent of the difference in the district's ADM adjusted for school size between the base fiscal year and the second fiscal year after the base fiscal year;

(iii) for the third fiscal year after the base fiscal year determined under this subparagraph, the school district's ADM adjusted for school size determined under (A) of this paragraph is calculated as the district's ADM adjusted for school size, plus 25 percent of the difference in the district's ADM adjusted for school size between the base fiscal year and the third fiscal year after the base fiscal year;

(F) the method established in (E) of this paragraph is available to a school district for the three fiscal years following the base fiscal year determined under (E) of this paragraph only if the district's ADM adjusted for school size determined under (A) of this paragraph for each fiscal year is less than the district's ADM adjusted for school size in the base fiscal year;

(G) the method established in (E) of this paragraph does not apply to a decrease in the district's ADM adjusted for school size resulting from a loss of enrollment that occurs as a result of a boundary change under AS 29;

(2) the required local contribution of a city or borough school district is the equivalent of a four mill tax levy on the full and true value of the taxable real and personal property in the district**, excluding property owned by the Alaska Industrial Development and Export Authority that is exempt from city or borough tax,** as of January 1 of the second preceding fiscal year, as determined by the Department of Commerce, Community, and Economic Development under AS 14.17.510 and AS 29.45.110, not to exceed 45 percent of a district's basic need for the preceding fiscal year as determined under (1) of this subsection.

*** Sec. 4.** AS 14.17.410(c) is amended to read:

(c) In addition to the local contribution required under (b)(2) of this section, a

city or borough school district in a fiscal year may make a local contribution of not more than the greater of

(1) the equivalent of a two mill tax levy on the full and true value of the taxable real and personal property in the district**, excluding property owned by the Alaska Industrial Development and Export Authority that is exempt from city or borough tax,** as of January 1 of the second preceding fiscal year, as determined by the Department of Commerce, Community, and Economic Development under AS 14.17.510 and AS 29.45.110; or

(2) 23 percent of the district's basic need for the fiscal year under (b)(1) of this section.

*** Sec. 5.** AS 14.17.490(b) is amended to read:

(b) A city or borough school district is not eligible for additional funding authorized under (a) of this section unless, during the fiscal year in which the district receives funding under (a) of this section, the district received a local contribution equal to at least the equivalent of a four mill tax levy on the full and true value of the taxable real and personal property in the district**, excluding property owned by the Alaska Industrial Development and Export Authority that is exempt from city or borough tax,** as of January 1 of the second preceding fiscal year as determined by the Department of Commerce, Community, and Economic Development under AS 14.17.510 and AS 29.45.110.

*** Sec. 6.** AS 44.88.010(a) is amended to read:

(a) The legislature finds, determines, and declares that

(1) there exist areas of the state in which seasonal and nonseasonal unemployment exist;

(2) this unemployment is a serious menace to the health, safety, and general welfare, not only to the people in those areas, but also to the people of the entire state;

(3) the state lacks the basic manufacturing, industrial, **energy,** export, small business, and business enterprises and the other facilities referred to in this subsection necessary to permit adequate development of its natural resources and the balanced growth of its economy;

(4) the establishment and expansion of industrial, manufacturing, **energy,** export, small business, and business enterprises in **the state** [ALASKA] and the other facilities referred to in this subsection are essential to the development of the natural resources and the long-term economic growth of the state, and will directly and indirectly alleviate unemployment in the state;

(5) the expansion of export trade is vital to the health and growth of the state's economy;

(6) many **state** [ALASKA] businesses could benefit from additional financial and technical assistance with respect to the exportation of their products and services;

(7) the [UNITED STATES] Export-Import Bank **of the United States** has been mandated by the Export-Import Bank Act Amendments of 1983 to provide technical assistance and export financing support to small businesses in cooperation with state export finance agencies;

(8) Alaska-based exporters can be effectively assisted through the establishment, as part of the Alaska Industrial Development and Export Authority, of an export financing program designed to work with the [U.S.] Export-Import Bank **of the United States** and other federal, state, and private institutions;

(9) the achievement of the goal of full employment, and of establishment and continuing operation and development of industrial, manufacturing, **energy,** export, small business, and business enterprises in the state will be accelerated and facilitated by the creation of an instrumentality of the state with powers to incur debt, to own and operate facilities, to make and insure loans to finance and to assist private lenders to make loans to finance the establishment, operation, and development of industrial, manufacturing, **energy,** export, small business, and business enterprises;

(10) it is in the public interest to promote the prosperity and general welfare of all citizens of the state by

(A) stimulating commercial and industrial growth and expansion by encouraging an increase of private investment by banks, investment houses, insurance companies, and other financial institutions, including pension and retirement funds, to help satisfy the need for economic

expansion;

(B) encouraging the production of raw materials and goods for export, the expansion of exports and raw materials and goods, and the rendering of services abroad by residents of the state through the establishment of a program that provides financial assistance in cooperation with federal, state, and private institutions for these purposes in the form provided in this chapter;

(C) creating the Alaska Industrial Development and Export Authority with the powers necessary to accomplish the objectives stated in this paragraph, including the power to issue taxable and tax-exempt bonds and to acquire ownership interests in projects as provided in this chapter;

(11) it is in the state's interest to import private capital to create new economic activity which would not otherwise take place in the state.

* **Sec. 7.** AS 44.88.010(b) is amended to read:

(b) It is declared to be the policy of the state, in the interests of promoting the health, security, and general welfare of all the people of the state, and a public purpose, to increase job opportunities and otherwise to encourage the economic growth of the state, including the development of its natural resources, through the establishment and expansion of manufacturing, industrial, **energy,** export, small business, and business enterprises and the other facilities referred to in (a) of this section by creating the Alaska Industrial Development and Export Authority with the powers, duties, and functions as provided in this chapter.

* **Sec. 8.** AS 44.88.155(d) is amended to read:

(d) A loan participation purchased by the authority with assets of the enterprise development account or with proceeds of bonds secured by assets of the enterprise development account

(1) may not exceed $20,000,000; however, in the case of a loan participation for **qualified energy development** [A POWER TRANSMISSION INTERTIE], the loan participation may exceed $20,000,000 with legislative approval;

(2) may not be purchased unless

(A) the project applicant is not, or, if the applicant is not a

single proprietorship, all members of the business enterprise or enterprises constituting the project applicant are not, in default on another loan made by the state or by a public corporation of the state; and

(B) at least 10 percent of the principal amount of the loan is retained by the loan originator**, or the loan is for financing improvements in energy efficiency**;

(3) may not be purchased if the loan to be purchased exceeds 75 percent of the appraised value of the collateral offered as security for the loan unless the amount of the loan in excess of this limit is federally insured or guaranteed or is insured by a qualified mortgage insurance company, except that the loan to be purchased under this paragraph may not exceed the total of loan proceeds used to refinance an existing debt plus the cost of new construction, expansion, or acquisition unless the proceeds from the additional amounts of the loan to be purchased are restricted to uses approved by the authority to finance commercial activity in the state by a business enterprise;

(4) may not be purchased if the participation in the loan to be purchased is for a term longer than the following, except that a loan under (A) or (C) of this paragraph may not have a term longer than three-quarters of the authority's estimate of the life of the collateral offered as security for the loan:

(A) 40 years from the date the loan is made in the case of a loan participation for a project described in AS 44.88.900(9)(E);

(B) 50 years from the date the loan is made in the case of a loan participation for **qualified energy development** [A POWER TRANSMISSION INTERTIE];

(C) 25 years from the date the loan is made in the case of a loan participation for other projects;

(5) may be made only if the participation in the loan to be purchased contains amortization provisions; the amortization provisions

(A) must be complete and satisfactory to the authority and require periodic payments by the borrower;

(B) may allow the loan originator to amortize the portion of the

loan retained by the loan originator using a shorter amortization schedule than the amortization schedule for the portion of the loan held by the authority if

(i) in the authority's opinion, the project financed can support the increased debt service; and

(ii) the accelerated amortization schedule is required to induce the originator to make the loan;

(6) may be made only if the participation in the loan to be purchased is in the form and contains the terms and provisions with respect to insurance, repairs, alterations, payment of taxes and assessments, default reserves, delinquency charges, default remedies, acceleration of maturity, secondary liens, and other matters the authority prescribes; and

(7) may be made only if the participation in the loan to be purchased is secured as to repayment by a mortgage or other security instrument in the manner the authority determines is feasible to assure timely repayment under the loan documents entered into with the borrower.

*** Sec. 9.** AS 44.88.155(g) is amended to read:

(g) Notwithstanding any other provision of this section, the authority may waive or modify the requirements of this section as it considers appropriate and prudent in order to finance a project if the authority intends to own the project or in order to finance **qualified energy development** [A POWER TRANSMISSION INTERTIE PROJECT].

*** Sec. 10.** AS 44.88.159(a) is amended to read:

(a) The interest rate on **a loan purchased from the proceeds of tax-exempt bonds secured by the sustainable energy transmission and supply development fund (AS 44.88.710) under AS 44.88.700 - 44.88.740 or** a loan participation purchased from the proceeds of tax-exempt bonds or expected by the authority to be purchased from the proceeds of tax-exempt bonds **under AS 44.88.155** shall be determined under the regulations adopted by the authority under AS 44.88.085(g)(2)(C) and shall be not less than the cost of funds to the authority. In this subsection, "cost of funds" means the true interest cost expressed as a rate on tax-exempt bonds of the authority plus an additional percentage as determined by the

authority to represent the allocable expenses of operation, costs of issuance, and loan servicing costs.

*** Sec. 11.** AS 44.88.159(b) is amended to read:

(b) The interest rate on **a loan purchased from the proceeds of taxable bonds secured by the sustainable energy transmission and supply development fund (AS 44.88.710) under AS 44.88.700 - 44.88.740 or** a loan participation purchased from the proceeds of taxable bonds **under AS 44.88.155** or expected by the authority to be purchased from the proceeds of taxable bonds **under AS 44.88.155** shall be determined under the regulations adopted by the authority under AS 44.88.085(g)(2)(C) and shall be not less than the cost of funds to the authority. In this subsection, "cost of funds" means the true interest cost expressed as a rate on taxable bonds, plus an additional percentage as determined by the authority to represent the allocable expenses of operation, costs of issuance, and loan servicing costs.

*** Sec. 12.** AS 44.88.159(d) is amended to read:

(d) The provisions of this section apply only to a loan participation purchased under AS 44.88.155 - 44.88.159 **or to a loan made under AS 44.88.700 - 44.88.740**.

*** Sec. 13.** AS 44.88.159(e) is amended to read:

(e) The interest rate on **a loan made under AS 44.88.700 - 44.88.740 or** a loan participation purchased directly from the assets of the authority shall be determined under the regulations adopted by the authority under AS 44.88.085(g)(2)(C) and shall be not less than the total of a percentage as determined by the authority to represent the allocable expenses of operation and costs of loan origination and servicing, plus the cost of funds. In this subsection,

(1) "comparable financial security" means a type or category of financial security the authority identifies in the regulations adopted by the authority under AS 44.88.085(g)(2)(C) that has a term and financial conditions comparable to the term and financial conditions of a loan participation **or a loan made under AS 44.88.700 - 44.88.740** and for which a regularly published, nationally recognized market index is available;

(2) "cost of funds" means the earnings, expressed as an annual interest

rate, the authority would receive on a comparable financial security, and, for a loan participation **or a loan made under AS 44.88.700 - 44.88.740** with a fixed interest rate, the cost of funds must equal or exceed the minimum interest rate;

(3) "minimum interest rate" means the five-year return on investment funds of the authority, expressed as an annual interest rate, achieved by all internal and external investment managers of the authority combined.

*** Sec. 14.** AS 44.88.159(f) is amended to read:

(f) In determining an interest rate under the regulations adopted by the authority under AS 44.88.085(g)(2)(C), the authority may determine to disregard the minimum interest rate required under (a), (b), or (e) of this section for a loan participation purchased by the authority **or a loan made under AS 44.88.700 - 44.88.740** to resolve lending limits or reserve restrictions imposed on the financial institution and may instead determine to retain the interest rate existing at the time the authority **makes the loan or** purchases **the authority's loan participation** [A PORTION OF THE LOAN].

*** Sec. 15.** AS 44.88.159(g) is amended to read:

(g) The authority may, in the regulations adopted by the authority under AS 44.88.085(g)(2)(C), establish a program to pay to borrowers of loan participations determined by the authority to meet sufficient job creation, rural development, **renewable energy development,** or other economic development criteria incentive rate rebates of not more than one percent of the interest rate charged on the authority's portion of a loan participation. The following standards apply to the program:

(1) the payment of an incentive rate rebate may reduce the interest rate to a rate that is less than the minimum interest rate required under (a), (b), or (e) of this section;

(2) the authority may not commit to pay an incentive rate rebate for a proposed loan participation if the total of the amount of the proposed loan participation plus the combined outstanding balance of all loan participations for which the authority has committed to pay incentive rate rebates would exceed five percent of the total of the amount of the proposed loan participation plus the combined outstanding balance of all loan participations of the authority;

(3) an incentive rate rebate may not accrue for more than five years after the date the loan participation is purchased;

(4) the authority may establish a separate account for the incentive rate rebate program.

* **Sec. 16.** AS 44.88 is amended by adding new sections to read:

Article 7A. Sustainable Energy Transmission and Supply.

Sec. 44.88.700. Sustainable energy transmission and supply development program. The sustainable energy transmission and supply development program is created in the authority to promote and provide financing for qualified energy development in the state to alleviate unemployment and contribute to the state's economic welfare, economic diversity, and economic development.

Sec. 44.88.710. Alaska Industrial Development and Export Authority sustainable energy transmission and supply development fund. The Alaska Industrial Development and Export Authority sustainable energy transmission and supply development fund is established in the authority. The development fund consists of appropriations made to the development fund by the legislature, money or other assets transferred to the development fund by the authority, and unrestricted loan repayments, interest, or other income earned on loans, investments, or assets of the development fund. The development fund is not an account in the revolving loan fund established in AS 44.88.060, and the authority shall account for the development fund separately from the revolving fund. The authority may create additional accounts in the development fund. Subject to agreements made with the holders of the authority's bonds or with other persons, the authority may transfer amounts in an account in the development fund to another account in the development fund. Amounts deposited in the development fund may be pledged to the payment of bonds of the authority or expended for the purposes of AS 44.88.700 - 44.88.740. The authority has the powers and responsibilities established in AS 37.10.071 with respect to the investment of amounts held in the development fund.

Sec. 44.88.720. Use of fund balance. Subject to the requirements of AS 44.88.710 - 44.88.740, the authority may use money in the Alaska Industrial Development and Export Authority sustainable energy transmission and supply

development fund to assist in the construction, improvement, rehabilitation, and expansion of qualified energy development.

Sec. 44.88.730. Qualified energy development; powers and duties of the authority. (a) Subject to the limitations of AS 44.88.740, for qualified energy development, the authority may

(1) use the Alaska Industrial Development and Export Authority sustainable energy transmission and supply development fund to finance qualified energy development, insure project obligations, guarantee loans or bonds, and establish reserves;

(2) acquire real or personal property by purchase, transfer, or foreclosure when the acquisition is necessary to protect the authority's interest in financing;

(3) defer principal payments or capitalize interest on qualified energy development financing;

(4) subject to AS 36.30.085(e), enter into lease agreements, sales-lease-back agreements, build-operate-transfer, and operate-transfer agreements, or any similar project financing agreement for a qualified energy development;

(5) enter into agreements with government entities for the transfer and control of infrastructure, facilities, rights-of-way, and studies;

(6) contract for services with a professional advisor, including an attorney, bond counsel, engineer, or other technical expert necessary to fulfill the purposes of the program;

(7) subject to AS 44.88.090, borrow money and issue bonds; and

(8) pay off the principal of and interest on bonds issued by a municipality to acquire, construct, improve, or equip a public utility if the municipality continues to pay the authority the bond payments due under the terms of the bonds; the authority shall retain the payments from the municipality in a sinking fund, and the municipality may apply to use the funds for qualified energy development.

(b) The authority shall adopt regulations to implement AS 44.88.700 - 44.88.740, including

(1) an application process for acquiring financing under this section;

(2) qualifications for qualified energy development projects applying for financing under this section; and

(3) fiscal controls and accounting procedures for the development fund.

Sec. 44.88.740. Limitations on financing. (a) Unless the authority has obtained legislative approval by law, the authority may not finance or participate in financing of

(1) more than one-third of the capital cost of qualified energy development; or

(2) a loan guarantee that exceeds $20,000,000.

(b) Financing under AS 44.88.730 is limited to the life of qualified energy development, which may not be more than

(1) 30 years; or

(2) 50 years for a transmission line or hydroelectric qualified energy development.

*** Sec. 17.** AS 44.88.900 is amended by adding new paragraphs to read:

(15) "development fund" means the sustainable energy transmission and supply development fund created in AS 44.88.710;

(16) "qualified energy development" means a project in the state that involves

(A) transmission, generation, conservation, storage, or distribution of heat or electricity;

(B) liquefaction, regasification, distribution, storage, or use of natural gas;

(C) distribution or storage of refined petroleum products.

*** Sec. 18.** Sections 2 and 8, ch. 10, SLA 2010, are repealed.

*** Sec. 19.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. References to "this chapter" in AS 44.88 apply to sec. 16 of this Act and so should not be changed.

Changes to CS SS SB 25 (27-LS0290\X) in CS SS SB 25 (27-LS0290\S)

Please note that this analysis is not an authoritative interpretation of changes to the bill. The bill itself is the best statement of its contents.

The following page and line references are to the S version of CS SS SB 25

Description: The proposed CS makes five changes to the X version of CS SB 25. The changes described below were made to clarify the treatment of "energy projects" financed under the proposed SETS program (AS 44.88.700-740) from the definition of "project" in existing AIDEA statutes by renaming "energy projects" "*qualified energy developments*." The definition of "*qualified energy development*" was refined and section 5, authorizing a moral obligation of the state was removed. Interests in projects owned by AIDEA were exempted from municipal taxation for the purposes of calculating the local contribution required for public education funding and an additional power to cooperate with a municipal utility on financing.

Title The following changes were made to the Title of the bill:

1. Inserted new language reflecting the change creating a new section 3.

Section 1 The following changes were made to section 1:

1. No changes.

Section 2 The following changes were made to section 2:

1. No changes.

New Sect. 3 A new section 3 was added to the bill that made the following change:

1. Amended AS 14.17.410(b) to exempt an interest in property owned by the Alaska Industrial Development and Export Authority from the full and true value of the taxable real and personal property in a district.
2. The sections were then renumbered accordingly.

New Sect. 4 A new section 4 was added to the bill that made the following change:

1. Amended AS 14.17.410(c) to exempt an interest in property owned by the Alaska Industrial Development and Export Authority from the full and true value of the taxable real and personal property in a district.
2. The sections were renumbered accordingly.

SENATOR LESIL MCGUIRE

New Sect. 5 A new section 5 was added to the bill that made the following change:

1. Amended AS 14.17.490(b) to exempt an interest in property owned by the Alaska Industrial Development and Export Authority from the full and true value of the taxable real and personal property in a district.
2. The sections were renumbered accordingly.

Section 6 The following changes were made to new section 6/old section 3:

1. No changes

Section 7 The following changes were made to new section 7/old section 4:

1. No changes.

Deletion Section 5 (page 4 lines 1-15 of the X version) was removed from the bill:

1. The subsequent sections were renumbered accordingly.

Section 8 The language in section 8 retains the language found in section 6 of the X version with the following changes:

1. Replaced "energy project" with "qualified energy development" on page 6, line 28 and page 7, line 23.

Section 9 The language in section 9 retains the language found in section 7 of the X version with the following change:

1. Replaced "energy project" with "qualified energy development" on page 8, line 20.

Section 10 The language in section 10 retains the language found in section 8 of the X version with no changes.

Section 11 The language in section 9 retains the language found in section 9 of the X version with no changes.

Section 12 The language in section 9 retains the language found in section 10 of the X version with the following change:

1. Deleted the word "energy" preceding "loan" on page 9, line 17.

SENATOR LESIL MCGUIRE

Section 13 The language in section 13 retains the language found in section 11 of the X version with the following changes:

1. Deleted the word "energy" preceding "loan" on page 9, line 19.
2. Deleted the word "energy" preceding "loan" on page 9, line 28.
3. Deleted the word "energy" preceding "loan" on page 10, line 12.

Section 14 The language in section 14 retains the language found in section 12 of the X version with the following change:

1. Deleted the word "energy" preceding "loan" on page 10, line 11.

Section 15 The language in section 15 retains the language found in section 13 of the X version with no changes.

Section 16 The language in section 14 retains the language found in section 14 of the X version with the following changes:

1. Replaced "energy projects" with "qualified energy development" on page 11, line 9-10.
2. Replaced "energy projects" with "qualified energy development" on page 12, line 2.
3. Replaced "energy projects" with "qualified energy development" on page 12, line 3.
4. Replaced "energy projects" with "qualified energy development" on page 12, line 7-8.
5. Replaced "energy projects" with "qualified energy development" on page 12, line 13-14.
6. Replaced "energy projects" with "qualified energy development" on page 12, line 17.
7. **Inserted New Subsection (8)** granting AIDEA the power to pay off the principal and interest on bonds issued by a municipal public utility and retain the payments from the utility in a sinking fund.
8. Replaced "energy projects" with "qualified energy development" on page 13, line 1.
9. Replaced "energy projects" with "qualified energy development" on page 13, line 8-9.

SENATOR LESIL MCGUIRE

Sect. 16 (Cont.)

10. Replaced "energy project" with "qualified energy development" on page 13, line 11-12.
11. Replaced "energy project" with "qualified energy development" on page 13, line 14-15.

Section 17 Section 17 retains the language previously found in section 15 of the X version with the following changes:

1. Replaced "energy project" with "qualified energy development" on page 13 line 19.
2. Inserted "conservation" preceding "storage" on page 13, line 21.
3. Removed the conversion of natural gas, coal or biomass to liquids (page 11, line 8), the processing, refining, or upgrading of oil (page 11, line 9) and enhanced oil recovery or carbon sequestration (page 11, line 11) from the definition of "qualified energy development."

New Sect. 18 Added a new section 16 repealing Sections 2 and 8 of ch. 10, SLA 2010 (the language exempting an integrated transportation and port facility owned by the authority from taxation and the sunset of the exemption.)

Section 19 Section 19 retains the language previously found 16 of the X version.

April 2, 2012

Senator Bert Stedman, Co-Chair, Senate Finance Committee
Senator Lyman Hoffman, Co-Chair, Senate Finance Committee
Alaska State Capitol
Juneau, Alaska 99801-1182

Dear Senators Stedman and Hoffman:

Alaska Power Association (APA) is the statewide trade association representing utilities that supply power to a majority of Alaskans from Barrow to Unalaska, through the Interior and Southcentral, and down the Inside Passage.

APA supports Senate Bill 25, establishing a $250 million energy loan program at the Alaska Industrial Development and Export Authority (AIDEA).

In furtherance of the goals set forth in recent years by the legislature though the Alaska Sustainable Energy Act, state energy policy, and the renewable energy program, the Alaska electric utility sector needs sources of capital for power supply infrastructure — both generation and transmission. The energy loan program envisioned by Senate Bill 25 will help ensure that our state's electric utilities have access to affordable financing to keep us moving forward with much needed infrastructure statewide. Additionally, the AIDEA program under Senate Bill 25 will have the tangible benefit of keeping interest payments for power supply loans within Alaska instead of going to lenders in other states, as is currently the case.

APA and its members urge the legislature to pass Senate Bill 25.

Sincerely,

Marilyn Leland
Executive Director

cc: Senator Lesil McGuire

SENATOR LESIL MCGUIRE

SPONSOR STATEMENT FOR SENATE BILL 25: A.S.S.E.T.S
Alaska's Sustainable Strategy for Energy Transmission and Supply

"An Act relating to participation by the Alaska Industrial Development and Export Authority in energy projects."

Alaskans once again find themselves confronting the familiar paradox of high oil prices, which deliver windfall revenues to the treasury while burdening Alaskan communities with increased energy costs. Recognizing this, the Legislature made energy policy a priority issue and focused state resources on finding solutions. To date, we have invested millions in making our schools, homes, and public facilities more energy efficient. We have started work on an in-state gas pipeline and reinvigorated activity in Cook Inlet with targeted tax incentives and regulatory changes. We have begun developing the Susitna hydroelectric project, encouraged exploration for geothermal energy, and opened the door for emerging technologies like biomass, wind, and even small nuclear facilities.

Although each of these energy initiatives contributes to a more sustainable future for Alaska, the recent declining throughput in the trans-Alaska pipeline reminds us of how precarious our present condition is. Declining oil production and increasing demands on the treasury challenge us as policymakers to craft new strategies that to do more with less and to find sustainable ways to use Alaska's resources to grow our local economy. That is why I have introduced Senate Bill 25, *Alaska's Sustainable Strategy for Energy Transmission and Supply ("*ASSETS").

With ASSETS I am proposing that the State recapitalize the Alaska Industrial Development and Export Authority (AIDEA) and expand AIDEA's existing authority to finance, or facilitate the financing of, energy infrastructure projects. AIDEA is already invested in energy projects such as the Snettisham hydroelectric project, which has provided low-cost, renewable power to Juneau for years. With a stronger balance sheet and greater access to credit markets, AIDEA could help finance or facilitate the financing of energy projects in Alaska. Senate bill 25 creates a new fund within AIDEA: the sustainable energy transmission and supply development fund (SETS) and proposes $250,000,000 be invested in the fund.

Senate Bill 25 also expands the powers of AIDEA to finance, or facilitate the financing of energy projects through the SETS fund by granting the authority the ability to:

1. Insure project obligations and guarantee loans or bonds for projects.
2. Defer principle payments and capitalize interest.

3. Offer financing terms of up to 30 years for energy projects or 50 years for transmission and hydroelectric projects.
4. Enter into lease agreements, sales-lease-back agreements, build-operate-transfer agreements and other agreements to finance energy projects.
5. Offer a reduced interest rate for renewable projects, projects in rural areas or projects that promote economic development.

These additional powers will provide flexible terms that can reduce the ultimate cost of energy to consumers and enable projects to move forward toward construction. However, SB 25 also requires legislative approval is required for investments that are more than one-third of a project's capital costs or if a loan guarantee exceeds $20 million. By subjecting certain investments to legislative approval, SB 25 maintains an appropriate level of due diligence for projects.

By making credit available we empower communities and give utilities an alternative to the traditional grant model that too often underfunds projects and leads to delays. Relying on credit also ensures that project sponsors have some skin in the game and a stake in a project's success or failure. Most importantly, we start to put some of Alaska's assets to work growing the economy within our state. Currently, Alaska's savings accounts are invested in stocks and bonds that drive economic activity outside Alaska. ASSETS suggests instead that some of those savings be invested here in Alaska through AIDEA, not as blank checks to development projects but as loans for energy infrastructure.

With ASSETS, Alaska has the chance to break the colony model and sustainably grow its economy. As each loan is repaid, the capital becomes available to recycle into new loans. The recently completed Railbelt Integrated Resource Plan alone identified more than $5 billion in infrastructure that will need to be financed. Without ASSETS, debt interest payments made by Alaskan utilities will continue to leave the state. With ASSETS, on the other hand, Alaska will actually make money. AIDEA currently pays a dividend to the treasury of between $20 and $30 million per year. A larger balance sheet would increase AIDEA's earnings and thus its annual dividend to the state.

Together, the Legislature's commitment to fiscal prudence and its focus on energy issues lay the foundation for a bright future for our state. By putting more of our assets to work locally, we can create opportunities, develop our resources and create a sustainable economy for generations to come.

Changes to SS SB 25 (27-LS0290\D) in CS SS SB 25 (27-LS0290\E)

Please note that this analysis is not an authoritative interpretation of changes to the bill. The bill itself is the best statement of its contents.

The following references are to the D version of SS SB 25

Title The following changes were made to the Title of the bill:
1. No changes.

Section 1 The following changes were made to section 1:
1. No changes.

Section 2 The following changes were made to section 2:
1. No changes.

Section 3 The following changes were made to section 3:
1. No changes

Section 4 The following changes were made to Section 4:
1. No changes.

Section 5 The following changes were made to Section 5:
1. No changes.

Section 6 The following changes were made to Section 6:
1. No changes.

Section 7 The following changes were made to Section 7:
1. No changes.

Section 8 The following changes were made to **NEW** Section 8:
1. Inserted new section 8 amending AS 44.88.159(a) to clarify that the interest rates on a loan participation for an energy project are consistent with current practice.

SENATOR LESIL MCGUIRE

Section 9 The following changes were made to **NEW** Section 9:

1. Inserted new section 9 amending AS 44.88.159(b) to clarify that the interest rates on a loan purchased with the proceeds of taxable bonds for an energy project are consistent with current practice.

Section 10 Section 10 retains the language previously found in section 8:

1. No changes.

Section 11 The following changes were made to **NEW** section11:

1. Inserted new section amending AS 44.85.159(e) to clarify that the interest rates, financial securities, cost of funds and minimum interest rates for energy projects financed through the SETS program are consistent with current practice.

Section 12 The following changes were made to **NEW** Section 12:

1. Inserted a new section amending AS 44.88.159(g) to clarify that loans for an energy project qualify for the incentive rate provisions of AS 44.88.085(g)(2)(C) consistent with current practice.

Section 13 Section 13 retains the language previously found in section 9:

1. No changes.

Section 14 Section 14 retains the language previously found in section 10 with the following changes:

1. To **sec. 44.88.730(3)** deleted the words "subject to lender approval" because the language was unnecessary given that AIDEA is the lender.
2. To **sec. 44.88.730** added new (7) clarifying that AIDEA can borrow money or issue bonds subject to AS 44.88.090 to carry out the purposes of this section.

Section 15 Section 15 retains the language previously found in section 11 with the following changes:

1. Inserted "heat or" before "electricity" in the definition of an energy project to clarify that projects which generate heat are included in the definition of an energy project.

Section 16 Section 16 retains the language previously found in section.

Alaska's Sustainable Strategy for Energy Transmission & Supply

A.S.S.E.T.S

Committee Substitute for Sponsor Substitute for Senate Bill 25 (27-LS0290\X)

Senator Lesil McGuire (District N)

March 28, 2012

Disclaimer

* The following presentation contains slides which present estimates of capital spending based on projects identified in reports prepared for or by the Alaska Energy Authority. This presentation should not be considered an endorsement of any particular project, fuel source, or combination of projects identified by the authority and/or its contractors.

Legislative History: 2008

1. The Legislature responded to high oil prices and the subsequent impact on residents by:
    1. Establishing the Home Weatherization/Energy Rebate Programs (Ch. 73, SLA 08)
    2. Establishing the Renewable Energy Grant Fund (Ch. 31, SLA 08)
    3. Offering Energy Assistance (Ch. 2 4SSLA 08)
    4. Establishing Special Committees on Energy (Senate Resolve 8)

Senate Energy and Resources Committees in Tanana 2009.

Agenda

* Description of the problem A.S.S.E.T.S is intended to address:
  * Legislative history (2008-2012)
  * Highlights from selected reports: capital
  * Highlights from selected reports: financing
* Introduction to SB 25
  * Sections of the bill.
  * Powers and limitations for S.E.T.S
  * AIDEA

Legislative History 2009-2010

1. Senate Bipartisan Working Group held hearings across Alaska to develop draft energy programs and policy recommendations.
2. The Legislature passed the Omnibus Energy Bill (SB 220 - Ch. 83 SLA 10) that addresses a wide range of energy issues, ranging from energy efficiency for public facilities to an emerging energy technology fund and from heating assistance to the leasing of state land for renewable energy projects.

Senate Energy and Resources Committees in Ruby. A draft of the Senate's Energy Programs and Policy Recommendations is available at: www.energy.aksenate.org

Legislative History: Summary

1. The Senate Bipartisan Working Group has aggressively led on energy issues through the establishment of sound policies based on public input and the investment of material state resources in energy projects.
2. Significant challenges remain and SB 25 is an additional component of the comprehensive strategy the Bipartisan Working Group has developed to address the energy needs of Alaskans.

Run of the river hydrokinetic turbine. Ruby Alaska 2009.

The Problem

Significant capital investment will be required to develop the energy infrastructure Alaska needs.

Alaska Energy Pathway; Toward Energy Independence

http://www.akenergyauthority.org/southeastIRP.html

10

Summary: Capital Estimates

* Alaska Energy Pathway (AEA 2010) near term:
  * $1.999 billion.
* Railbelt Integrated Resource Plan (AEA 2010) long term:
  * $13.625 - $21.109 billion.
* Southeast Integrated Resource Plan (AEA 2011) long term:
  * $1.407 billion

* ***Takeaway: there will be substantial spending on energy infrastructure in Alaska over the next five to ten years.***

Financing: Legislative Intent

LAWS OF ALASKA

2011

FIRST SPECIAL SESSION

HCS CSSB 46(FIN)

Chapter No.

AN ACT

Making and amending appropriations, including capital appropriations, savings deposits in the form of appropriations to the statutory budget reserve fund, and other appropriations; making appropriations to capitalize funds; and providing for an effective date.

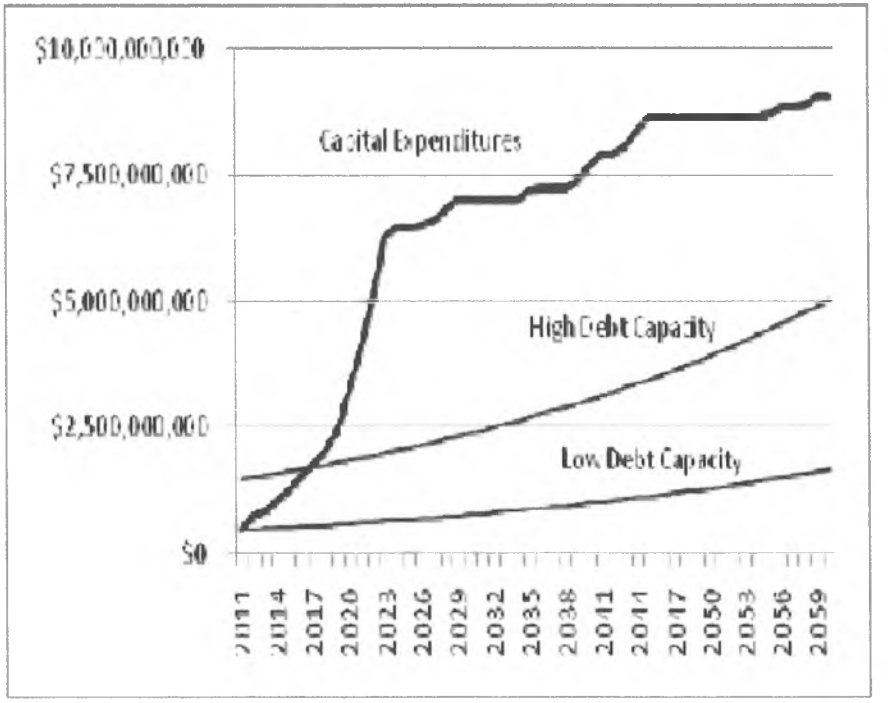
BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1

"It is the intent of the legislature that the state's capital investment into energy generation projects not exceed 50% of the total investment required to fully complete those projects."

Page 136, Chapter 5 SSLA 11

Financing



Alaska Energy Pathway: AEA July 2010

"The largest identified challenge is how to finance projects that have been identified as economic. There is a financial gap between the projected capital expenditures and the debt capacity of the Railbelt utilities. This gap is apparent in Figure 1, excerpted from the Railbelt IRP document. The debt capacity curve indicates a low capacity of $1 billion and a high capacity of $2.5 billion. These debt capacities leave a Financing Gap from $4.5 billion to $6.5 billion for the Railbelt electric infrastructure alone.

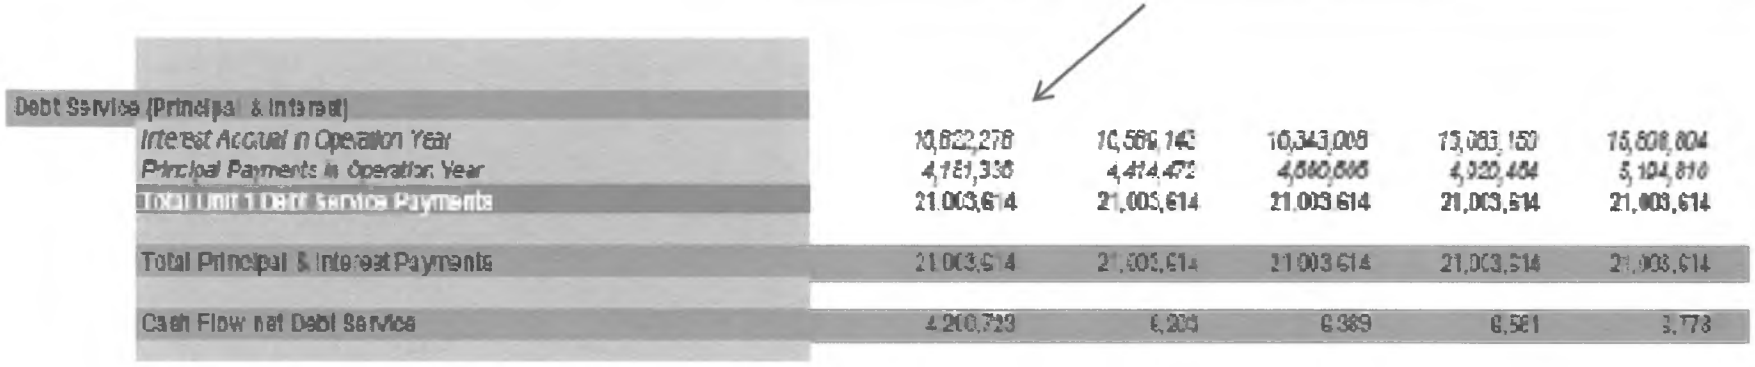
There are three options to close the financial gap:

1. *Reduce capital expenditures by reducing the number and size of projects.*
2. *Increase debt capacity by building a healthy economic base, **obtaining favorable financing terms such as loan guarantees, low interest rates or grant assistance.***
3. *Obtain grant funding from state, federal or other outside sources."*

Figure 1-9
Required Cumulative Capital Investment (Scenarios 1A/1B) Relative to Railbelt Utility Debt Capacity

Source: SNW Report included in Appendix C.

Source: http://www.akenergyauthority.org/alaska-energy-plan.html



Financing: continued

Southeast Integrated Resource Plan: Appendix B AEA July 2010

Selected Inputs into the model:

* Project Cost: $250,000,000
* Long Term Debt: $306,890,758
* Interest Rate: 5.5%
* Generation: 25 MW
* Capacity Factor: 65%
* Project Life: 50 years

Debt Service	Operation Year 1
Interest Accrual in Operation Year	$16,822,278
Principal Payments in Operation Year	$4,181,330
Total Principal & Interest Payments	$21,003,614
Debt Service as % of Revenue	78.1%

Debt Service (Principal & Interest)					
Interest Accrual in Operation Year	16,822,278	16,589,142	16,343,009	16,083,150	15,808,804
Principal Payments in Operation Year	4,181,336	4,414,472	4,660,605	4,920,464	5,194,810
Total Unit 1 Debt Service Payments	21,003,614	21,003,614	21,003,614	21,003,614	21,003,614
Total Principal & Interest Payments	21,003,614	21,003,614	21,003,614	21,003,614	21,003,614
Cash Flow net Debt Service	4,200,729	6,209	6,389	6,561	3,778

Source: Southeast Integrated Resource Plan; Appendix B: http://www.akenergyauthority.org/SEIRP/12-23-2011_Vol3_SoutheastAlaskaIRP.pdf

Summary: Financing

* The legislature has expressed the intent that state funding for generation projects not exceed 50% of the total investment required for the projects; necessitating financing.

* AK Energy Pathway: "*The largest identified challenge is how to finance projects that have been identified as economic.*"

* Financing costs represent a significant portion of the revenues of any energy project.

* ***Takeaway: financing is an important part of project development and a challenge in Alaska.***

Senate Bill 25: A.S.S.E.T.S

Alaska's Sustainable Strategy for Energy Transmission and Supply

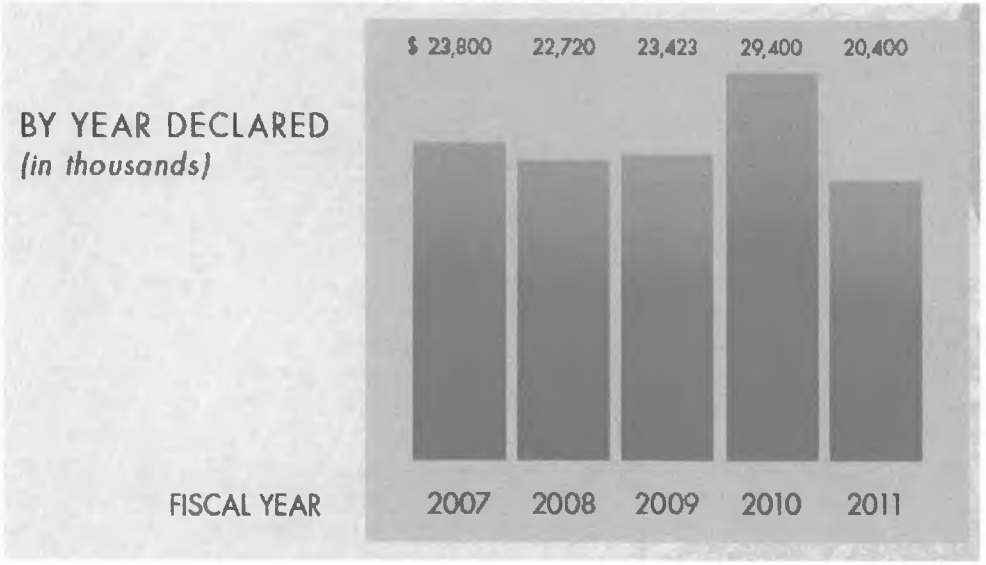
1. Sections
    1. Creates a new *Sustainable Energy Transmission and Supply* (SETS) development program and fund within the Alaska Industrial Development and Export Authority (AIDEA) [sections 14 & 15]
    2. Proposes the SETS fund be capitalized with $250,000,000 [section 2]
    3. Makes conforming changes to AIDEA's mission by including **energy** in the legislative findings of AIDEA's enabling statutes AS 44.88.010(a) [section 3].
    4. Makes changes to AIDEA's loan participation program AS 44.88.155(d) [section 6].
    5. Allows for an incentive interest rate for "renewable energy development" in addition to the existing rural and economic development criteria [section 13].

SB 25: Powers and Limitations of SETS

1. Section 10 a new *Sustainable Energy Transmission and Supply* (SETS) development program and fund within the Alaska Industrial Development and Export Authority (AIDEA). Some of the powers granted to AIDEA are to use the SETS fund to:
    1. To finance qualified projects, insure project obligations, guarantee loans or bonds and establish reserves.; and
    2. Defer principal payments or capitalize interest on project financing; and
    3. Enter into project financing agreements; and
    4. Finance projects up to a term of 30 years or 50 years for a hydroelectric or transmission project; but
    5. AIDEA must obtain legislative approval if it finances:
        1. More than one-third of the capital cost of an energy project; or
        2. Guarantees a loan that exceeds $20 million.

Why AIDEA?

AIDEA's obligations are **not** obligations of the State.



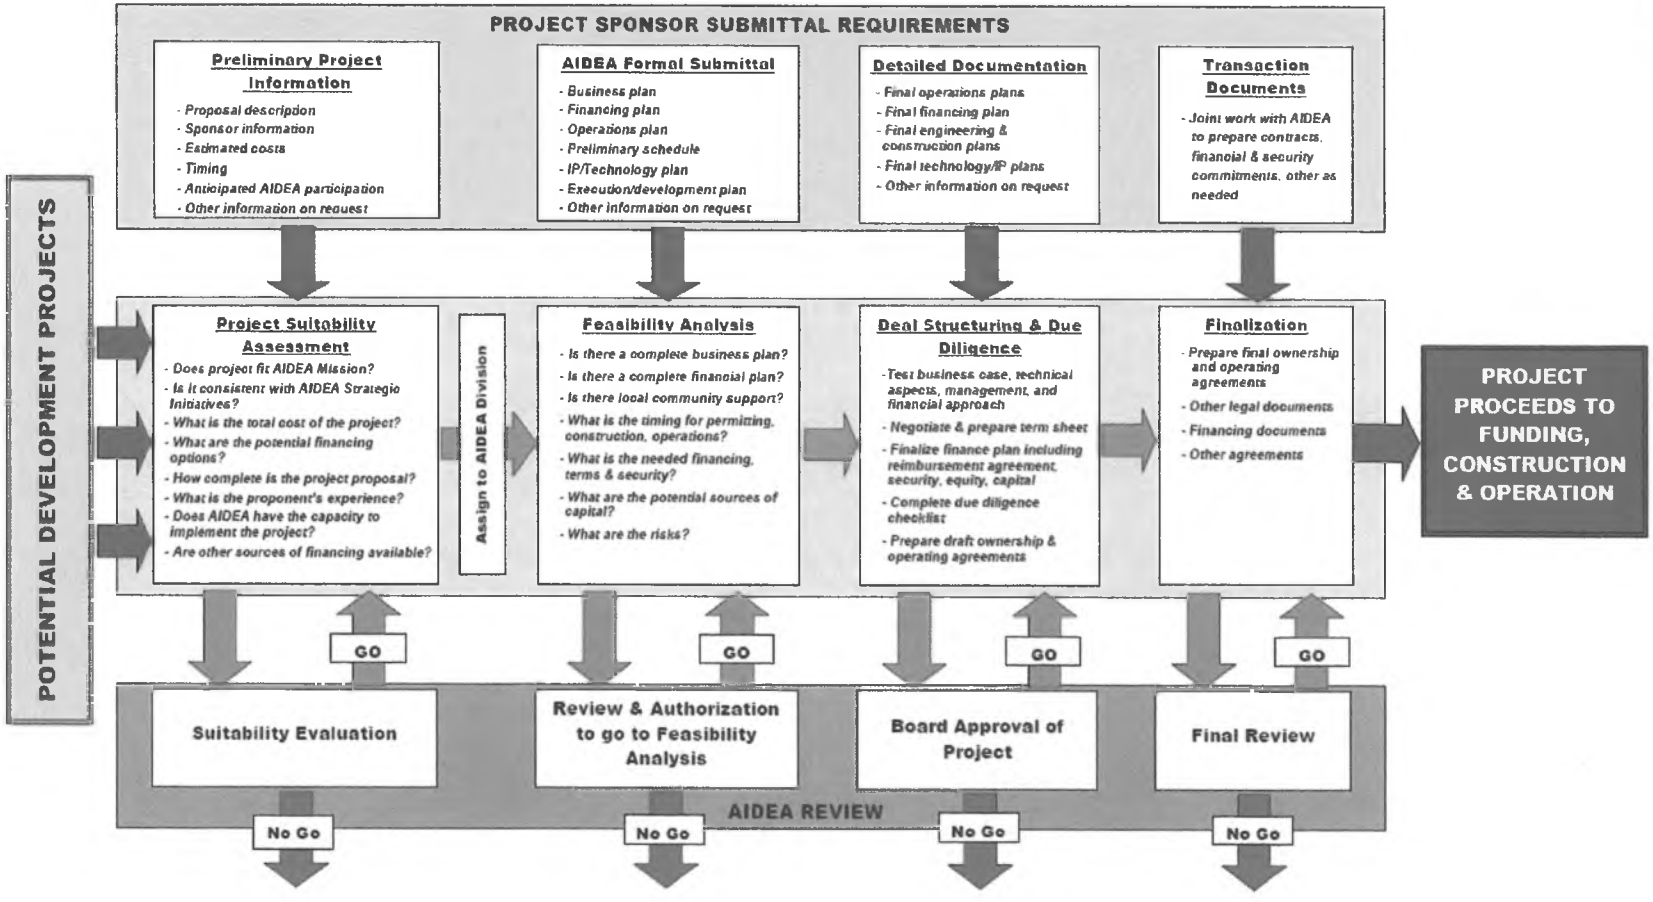
Sec. 44.88.120. Nonliability on bonds.

* (a) Neither the members of the authority nor a person executing the bonds are liable personally on the bonds or are subject to personal liability or accountability by reason of the issuance of the bonds.
* (b) The bonds issued by the authority **do not constitute an indebtedness or other liability of the state** or of a political subdivision of the state, except the authority, but shall be payable solely from the income and receipts or other funds or property of the authority. The authority **may not pledge the faith or credit of the state or of a political subdivision of the state,** except the authority, to the payment of a bond and the issuance of a bond by the authority does not directly or indirectly or contingently obligate the state or a political subdivision of the state to apply money from, or levy or pledge any form of taxation whatever to the payment of the bond.

AIDEA pays a dividend.

Source: AIDEA Annual Report 2011

Since inception, AIDEA has paid $324,500,000 in dividends to the state of Alaska and has net assets of nearly $1 billion. AIDEA was capitalized with the transfer of $384,500,000 in general funds and loans beginning in 1981.



AIDEA has a strong credit rating.

The most recent ratings report for AIDEA (Standard and Poor's, December 13, 2010) reaffirmed AIDEA's "AA-" rating due to:

1. "A pledged portfolio of private activity economic development loans;
2. A currently low loan delinquency rate;
3. Projected cash flows and debt service coverage that meet Standard and Poor's requirements for the 'AA' category for state revolving fund programs;
4. Strong legal covenants, including an additional bonds test requiring either in excess of 1.50x annual debt service, or the maintenance of unrestricted surplus equal to $200 million or principal outstanding and never less than $100 million; and
5. Covenants to maintain what we view as good liquidity in the authority's unrestricted cash equivalents balance."

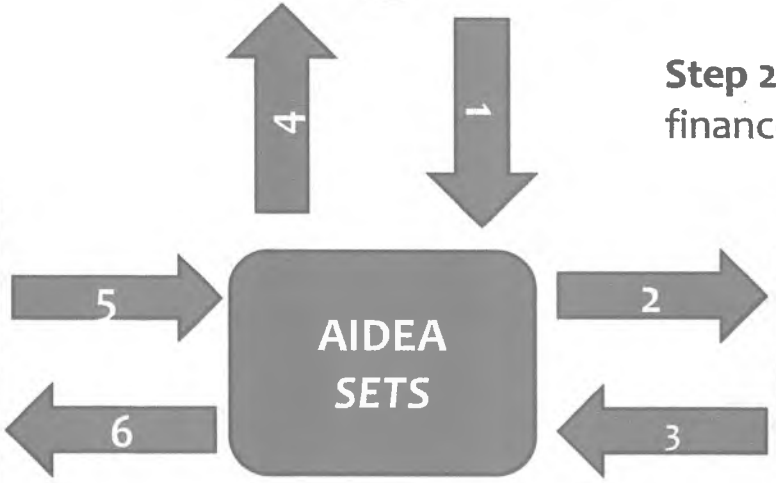
AIDEA has a developed process for evaluating and initiating financing decisions.

AIDEA DEVELOPMENT RELATED PROJECT INTAKE, ANALYSIS & DECISION MAKING PROCESS

How SETS will work within AIDEA

Step 1: the state of Alaska establishes SETS and capitalizes the fund.

Step 2: AIDEA uses SETS to finance an energy project.



Step 3: the energy project repays the loan/investment from AIDEA.

Step 4: AIDEA pays dividends to the state.

Step 5 & 6: AIDEA can access the financial markets to make more credit available through SETS.

Summary

1. Senate Bill 25 creates a sustainable strategy for energy transmission and supply by putting some of Alaska's financial assets to work within the state in order to fund energy projects.
2. The strategy is sustainable because each investment is an asset that will generate revenues for AIDEA and the state and earnings that can be reinvested in future projects.
3. Senate Bill 25 is **not** the answer to Alaska's energy challenges. The high costs, vast distances and small populations will often require direct state participation in energy projects for generations to come.
4. However, Senate Bill 25 does provide a tool that will help facilitate the development of energy projects in Alaska and is complimentary to the work the legislature and the Governor have done to date to address the energy needs of Alaska.

MEMORANDUM February 10, 2012

SUBJECT: Sectional summary of SSSB 25 (Work Order No. 27-LS0290\D)

TO: Senator Lesil McGuire
Attn: Michael Pawlowski

FROM: Lisa Moritz Kirsch
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, please note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill -- the bill itself is the best statement of its contents.

Section 1. Gives the bill a short title.

Section 2. States intent to appropriate in future years.

Section 3. Amends the legislative findings and policy in the chapter that created the Alaska Industrial Development and Export Authority (AIDEA) to include energy enterprises and amends language for consistency.

Section 4. Adds the term "energy" to the list of enterprises in the policy declaration.

Section 5. Replaces "power transmission intertie" with "an energy project" and amends language for consistency.

Section 6. Replaces "power transmission intertie" with "energy project." Adds loans for improvements in energy efficiency to the list of loans that may be purchased by AIDEA.

Section 7. Replaces "power transmission intertie" with "an energy project."

Section 8. Adds references to new sections creating the sustainable energy transmission and supply development fund.

Section 9. Adds renewable energy development to the list of the types of projects that may qualify for payment for loan participation.

Section 10. Creates the sustainable energy transmission and supply program.

Section 11. Defines "development fund" and "energy project" for chapterAS 44.88.

Section 12. Instruct the revisor that the existing references to "this chapter" in AS 44.88 will apply to the new article 7A created in section 10.

Long Term Rating	AA-/Stable	New

Rationale

Standard & Poor's Ratings Services assigned its 'AA-' rating to the Alaska Industrial Development and Export Authority's revolving fund bonds, series 2010B and affirmed its 'AA-' rating on the authority's revolving fund bonds outstanding.

The ratings reflect our opinion of:

- A pledged portfolio of private activity economic development loans;
- A currently low loan delinquency rate;
- Projected cash flows and debt service coverage that meet Standard & Poor's requirements for the 'AA' category for state revolving fund programs;
- Strong legal covenants, including an additional bonds test requiring either in excess of 1.50x annual debt service, or the maintenance of unrestricted surplus equal to $200 million or principal outstanding and never less than $100 million; and
- Covenants to maintain what we view as good liquidity in the authority's unrestricted cash equivalents balance.

The bonds are a general obligation (GO) of the authority for which the full faith and credit of the authority's revolving fund are pledged. The authority intends to issue the series 2010B bonds to fund a loan for the construction of a wastewater facility that will serve a state prison near Wasilla.

The authority has a number of programs through which it carries out its economic development activities. It conducts the majority of its business through its revolving fund, the net income and assets of which serve as the source of repayment on the bonds. As of June 30, 2010, the revolving fund had total assets of $1.2 billion, of which $1.09 billion were available to contribute toward satisfying obligations on revolving fund bonds outstanding. Total available assets included $383.8 million of unrestricted cash and investments. Other assets consist of $377.7 million in loans that had been purchased by the authority through a loan participation program, and $326.1 million of projects owned directly by the authority under its development finance program, including $224 million for an ore transportation system and $45.8 million for a clean coal generating project, which has suspended operations.

Overall financial trends for the authority have been positive, with historical annual debt service cash basis coverage in the last five years ranging from 4.00x in fiscal 2006 to 9.0x in fiscal 2010, including $31.8 million of revenue from three directly owned development projects. Coverage by loan repayments alone was more than 5.0x in 2010. At fiscal year-end June 30, 2010, less than 1% of revolving fund loans were delinquent. The authority projects debt service coverage of 7.36x in fiscal 2011 by all revenues, and 3.10x by loan revenues alone. It currently projects debt service to peak in 2014 at $14.4 million and to be covered by authority-projected revenues 6.43x, and 2.74x by loan revenues alone, commensurate with our 'AA' category rating level after being stress tested using Monte Carlo

837743 | 300920538

modeling techniques.

We anticipate debt service coverage to remain strong based on the authority's currently limited additional debt plans. The authority has $330 million in existing bond authorization for various specific projects around the state. It has indicated no immediate plans to bond for additional revolving fund loans or projects.

Legal provisions provide operational and asset-based protection to existing debt by limiting the issuance of additional parity debt unless certain provisions are met. Operationally, annual net income must produce 1.5x annual debt service in any year in which the authority has debt outstanding. Alternatively, the authority may maintain an unrestricted surplus equivalent to the lesser of $200 million or principal outstanding of bonded indebtedness. Regardless of which of the above tests apply to authority debt, the authority further pledges that at no time will it maintain a balance of the lesser of $50 million in unrestricted cash equivalents or 25% of the amount outstanding of revolving fund bonds. Allowed short-term investments were previously expanded to include 'AAA' rated money market investment funds and 'A-1' or higher rated commercial paper in addition to cash and U.S. Treasuries. All cash and cash equivalent investments must have maturity schedules of one year or less.

Outlook

The stable outlook reflects Standard & Poor's expectation of adequate debt service coverage and active program management. The outlook is also supported by the strong performance in the authority's underlying loan pool. We could lower the rating if the state's significant economic development projects fail to produce adequate revenue or experience significantly high loan delinquencies, or if there was a significant change in the reserves maintained by the authority.

Loan Participation Program

Through the enterprise development program, the authority purchases participations in loans made by financial institutions to their customers. Currently, the authority's loan portfolio consists of 283 loans with principal outstanding of $401.8 million. Revenues from loan repayments represent approximately 40% of total annual cash flows available for debt service. Loan performance is in our view strong, with a very low delinquency rate of less than 1.0%. The loan portfolio has good borrower diversity with 25% of borrowers in the tourism sector, 20% in retail, 16% in office or warehousing, and 13% in office or business condos. The 10 largest borrowers comprised 30% of loans, with the largest loan to the Anchorage Community Development LLC at $22.9 million for an office/warehouse. Geographically, the portfolio is more concentrated, with 59% of loans to borrowers in the Anchorage area. This does not include the revolving fund's $224 million direct investment and ownership in the DeLong Mountain Transportation System in support of lead/zinc mining activities in northwestern Alaska. Loan parameters and policies are good and include the following provisions:

- Participation is not to exceed 90% of the loan amount or $20 million, whichever is lesser.
- Total loan to value is not to exceed 75%.
- The term on the authority's portion of the loan may be up to 25 years when the loan is secured by real property, and up to 15 years when secured by personal property, but in either case, not more than 75% of the remaining economic life of the collateral.

Economic Development Account

Through the economic development program, the authority has the ability to own and operate facilities for economic development purposes in the state. These projects represented $326.1 million of net book value at June 30, 2010, and generated $31.8 million of net annual cash flow in fiscal 2010, or 31% of total cash flows available for debt service. Some of the major projects conducted under this program are the following:

- DeLong Mountain Transportation System (DMTS) is a 52-mile industrial haul road and shallow draft port to transport ore. The DMTS is operated by Teck Alaska Incorporated and guaranteed by Teck Resources Ltd. ('BBB' issuer credit rating) and serves the mining district that includes the Red Dog Mine, the world's largest zinc/lead producer. The authority's revolving fund interest in DMTS consists of direct ownership valued at $223.9 million as of June 30, 2010, which the authority projects will bring in a minimum of $17.7 million of net revenues per year.
- Federal Express Aircraft Maintenance Facility is a wide-body aircraft hanger at the Ted Stevens Anchorage International Airport. The authority owns the hanger and leases the space to the FedEx Corporation for $2.99 million per year. The authority's current net investment for the revolving fund in the hanger was valued at $11.5 million as of June 30, 2010. FedEx's current lease expires in March 2015.
- Ownership of the Ketchikan Shipyard, which was originally developed by the state Department of Transportation and Public Facilities, was transferred to the authority in 1997. The authority subsequently entered an operating agreement with the Alaska Ship and Drydock. The value of the shipyard stood at $35.6 million at June 30, 2010. Payments from the shipyard are uncertain and are determined on a percentage of revenues basis, with revenues first applied to reimbursing the authority for administrative costs, then to a repairs and replacements fund, and then to the authority and to other contributing local governments.
- The authority reports its Skagway Ore Terminal is substantially complete with a direct investment of $9.4 million, although completion may require further investment. The authority projects annual revenues of $3.1 million from this project.

Investment Portfolio

Interest earnings and amortized principal from the revolving fund's $383.8 million (June 30, 2010) unrestricted investment portfolio are also pledged to bond repayment and bolster coverage considerably, albeit with significant variance. In some years, investment earnings represent as much as 34% of annual cash flows, although in 2010 earnings were a lower 13.7% of pledged income. An additional $18.9 million of revolving fund investments were restricted and not available for bond debt service. Asset management is conducted both internally (23% of assets) and externally (77%) and is governed by the authority's investment policy as well as restrictions in state statute. The authority reports that as of June 30, 2010, 42% of its investment portfolio consisted of either U.S. Treasuries or U.S. guaranteed agencies or securities rated 'AAA', while an additional 25% was in government-sponsored securities, 4% was rated 'AA', 16% 'A', 10% 'BBB', and 1% 'BB'. At June 30, 2010, 26% was invested in U.S. Treasuries, 6% in U.S. agencies and government-supported entities, and 6% in cash. In addition, 30% was invested in corporate securities, 30% in mortgage-backed securities, 1% in asset-backed securities, and 1% in municipal bonds. The authority's internal investment policy objective is safety and liquidity, and limits investments to those of investment-grade credit quality ('BBB-' and higher) and precludes investment of more than five percent of the portfolio in unrated securities. Duration is limited to two years for internally managed portfolios. For externally

837743 | 300920538

managed assets, the authority's goal is safety and return.

Memorandum

TO: Senator Lesil McGuire

FROM: Susan Haymes, Legislative Analyst

DATE: December 5, 2011

RE: State Investment in the Seward Grain Terminal and the Alaska Seafood International Manufacturing Facility
LRS Report 12.059

You asked about the state's investment in the Seward grain terminal and the Alaska Seafood International manufacturing facility. Specifically, you asked for a history of each project including the lessons learned from the state's experience.

The state of Alaska invested $8 million in the Seward grain terminal and over $50 million in the Alaska Seafood International (ASI) manufacturing facility. Both projects were failures. The Seward grain terminal was never built, while the ASI facility never became fully operational and eventually closed after several attempts at restructuring. Both projects were attempts to diversify the state's economy and to create jobs for Alaskans. While the desire to diversify the economy is natural, especially given the state's reliance on the oil industry, attempts at instantaneous diversification have been problematic. Both of these projects failed primarily because of their large scale, although other issues such as changes in the administration and legislative priorities led to a decline in support. In the case of the Seward grain terminal, the construction of a competing grain terminal, and an unexpected and precipitous decline in barley prices also contributed to the project's failure.

Seward Grain Terminal

In the 1970s and 1980s, the state of Alaska invested millions of dollars to develop a large-scale agricultural industry. The state was flush with oil revenue and Governor Jay Hammond supported the development of an agricultural industry in Alaska as a way to broaden the economic base of the state, stabilize food costs, provide alternative job opportunities, and improve rural life. In a 1975 study, the Federal-State Land Use Planning Commission for Alaska recommended the development of a large-scale demonstration project to test the feasibility of grain production in the state. As a result, in 1978, the Delta Barley project (known as Delta I) was initiated and, in 1979, the Alaska Agricultural Action Council (AAAC) was created to manage the Delta project and recommend future projects to the legislature.[1] Delta was designed to produce feed grain for the in-state livestock industry and eventually for export markets. Alaska's livestock industry could not be price-competitive with imported meat products unless the industry had a reliable source of feed grain available at a competitive price. Barley was selected as the main crop because it matures at cool temperatures and has a short growing cycle.[2]

A grain terminal at port was considered not only a necessity to the success of a grain export industry, but also to the development of a livestock industry in Alaska. To ensure the existence of a reliable source of feed grain at a competitive price, the supply had to be large enough so that local demand would not force the price of barley upward. Before farmers could increase production, however, they needed assurance that there was a market for any surplus barley. A tidewater grain terminal would provide the means to export the surplus barley to Asian markets, thereby providing the necessary safety valve by assuring a market for all the barley the farmers could grow. A secondary function of the terminal would be to reduce grain costs to Kenai Peninsula and Kodiak livestock producers by reducing the costs of transporting grain to those areas.[3] The AAAC

[1] The AAAC was created as a separate agency and included the commissioners of the Departments of Natural Resources (DNR) and Commerce and Economic Development (DCED), two private citizens, and the special projects coordinator from the Governor's office who served as chair. The DNR retained authority over land disposal as directed by the state constitution and related statutes. We note that DCED is now called the Department of Commerce, Community and Economic Development (DCCED).

[2] Alaska Agricultural Action Committee, "First Report to the Legislature on the Development of a Plan for Alaska Agricultural Development," February 1982.

[3] David Teal, "Seward Grain Terminal," House Legislative Research Report 83.034, March 8, 1983.

estimated that a minimum of 250,000 acres needed to be available for barley production to make for a viable livestock industry and export trade.[4]

Selection of Seward as the Site for a Grain Terminal

Once the decision was made that an export grain terminal was needed, the question became where to locate such a facility. After two years of study and debate, the AAAC selected Seward as the grain terminal site. The decision, however, was not without its detractors. A 1979 report, "Transportation and Grain Assessment for the Delta Agricultural Project" considered five potential candidates for the grain port–Anchorage, Haines, Seward, Valdez, and Whittier.[5] The report did not clearly recommend a site, but discussed transportation costs associated with each city, and concluded that overall, Anchorage and Seward had the most favorable attributes. Seward and Anchorage were accessible by both rail and truck transport, and could serve agricultural development from both the Nenana and Delta areas. In contrast, Valdez was served by truck only and Whittier by rail only and neither were accessible to the Nenana markets. Seward also had the benefit of a continuous ice-free, deep water port and reduced sailing time compared to the Anchorage alternative.

In a 1980 report, the Alaska Agricultural Action Council Transportation Committee focused on solely the Anchorage and Seward alternatives but again made no firm recommendation. The report noted that because of the uncertainty regarding volumes through a port facility, the investment should be kept at a minimum, and therefore the existing loading facilities in Seward were attractive. On the other hand, the additional $2.00 per ton rail cost to move the grain to Seward was a mitigating factor, so Anchorage might be more cost-effective.

In early February 1981, legislation was introduced (HB 49 and SB 162) that appropriated $8.2 million for a grain terminal, loading facilities and railroad cars.[6] Later that month, the AAAC Transportation Committee recommended Anchorage as the location for the grain terminal, if the cost of site preparation and facility construction were within $2 million of the estimated costs to build at Seward. The decision was based on the lower cost of transporting grain from Delta and Nenana to Anchorage. At the same time, the Alaska Railroad, which owned the Port of Seward, noted its interest in development of the terminal. The Committee eliminated Valdez and Whittier primarily because of the absence of multiple transportation corridors, which eliminated all possibility of competition between transportation modes.

In March 1981, after the Alaska Railroad agreed to absorb the cost of the conveyor and ship loading system, saving $2 million, and reducing the rate differential between Anchorage and Seward from $2.00 a ton to as low as $.50 a ton, the AAAC reversed its decision and recommended Seward as the preferred location for the grain terminal.[7]

Meanwhile, in June the Senate adopted the conference committee report on SB 162. The House adjourned one week later without voting on the conference committee report. On July 6, the Attorney General ruled that the appropriations bill had passed and that the effective date was 90 days after it was signed by the governor. On July 16, the Senate president signed the bill and sent it to the House. The Speaker of the House did not sign the conference committee report but signed a bill that was identical except for the effective date. The AAAC signed a contract for construction of the foundation of the terminal and purchased 20 rail cars with payment to be deferred until after the effective date. On August 24, 1981, Governor Hammond signed the appropriations bill.

On August 27, 1981, Representative Ramona Barnes and others filed suit to stop construction of the Seward grain terminal, contending that SB 162 had not become law with the governor's signature because the bill had not passed the House. Representative Barnes argued the question involved a separation of powers between the two branches of government; however, she had also made it clear that the AAAC had overstepped its legislative mandate by choosing to construct the grain

---

[4] The state disposed of the rights to 60,000 acres of agricultural land in the Delta I lottery. The state auctioned an additional 25,000 acres as part of the Delta II land disposal. The goal was to have 500,000 acres in production by 1990.

[5] Haines was eliminated from extensive analysis because 1) access was limited to trucks; 2) a significant portion of the road to Haines from Delta was unpaved; and 3) the distance from Delta to Haines is the longest of the five sites.

[6] Chapter 120, SLA 1981. In the legislation, $6.5 million was appropriated for a grain terminal, an additional $700,000 was appropriated for a grain sub-terminal and elevator facility between Fairbanks and Delta Junction, and $1 million for railroad hopper cars.

terminal in Seward and not Anchorage.[8] The Court issued a provisional ruling that the appropriation bill had not passed and a temporary restraining order to stop construction. Appealing to the Supreme Court, the state admitted that contracts were signed before the bill was signed by the governor. In October 1981, the Supreme Court refused to hear the case. In November, the Attorney General again determined that SB 162 was in effect. Also, in November, the City of Valdez entered the lawsuit as a plaintiff intervener and challenged the AAAC's choice of Seward as the site for the grain terminal. On July 13, 1982, the Superior Court ruled in the state's favor; funds were made available for construction of the terminal. Although issues were resolved in a settlement agreement signed in January 1983, the delay in the project allowed other events to intercede and helped to derail the project.

Competing Project: Valdez Grain Terminal

At the same time the AAAC was beginning its site selection process, the city of Valdez began aggressively pursuing an export grain terminal. Valdez was interested in a grain terminal for the "backhaul" that barley would give to trucking operations between Valdez and interior Alaska. According to Mark Lewis, then City Manager of Valdez, a grain export terminal would lower the cost of freight into and out of Valdez because trucks delivering freight to the interior could then carry grain on the haul back to Valdez.[9] In 1979, the city first approached the AAAC to formally request the export terminal be built in Valdez, and hinted that the city might pay a portion of the costs for the terminal. In a January 8, 1981 letter, Mr. Lewis proposed to waive all dock and wharf fees for a period of five years if the terminal was built in Valdez. On March 23, 1981, the Valdez Port Director claimed Valdez could store and handle grain at a price not to exceed $4 per ton for the next 15 years. The AAAC noted that the offer should not be taken seriously because it was much lower than comparable charges in the Pacific Northwest. After not getting far with the AAAC, Valdez proceeded with plans to build a grain export terminal concurrently with the Seward terminal. In the fall of 1981, Valdez voters approved a $10,000,000 bond issue to construct a grain storage and handling facility for the export of grain produced in Delta. The City Council awarded the bonds in February 1982, and the facility was completed in December 1982 with a capacity for about 14,000 tons of grain.[10] No grain, however, was ever exported using the Valdez grain terminal.

The construction of the Valdez grain terminal appears to have been a significant factor in the decision to stop construction of the Seward facility. Soon after taking office, Governor Sheffield appointed new members to the AAAC, which met on January 13, 1983, to recommend that construction on the terminal cease because an export market was not available and alternatives were available which "preclude the economic wisdom of completion now."[11] Commission member Peter McDowell, then director of Office of Management and Budget, stated that a major issue for the administration was whether the state should directly compete with the Valdez grain terminal, a private sector and local government project. The two agricultural members of the AAAC noted that the cost of shipping grain to Valdez could be prohibitively expensive for farmers, and further that the decision to terminate the Seward project appeared to be more political than economic.[12] Clearly, there was an issue whether the Valdez terminal made economic sense in the development of a grain industry; however, by this time the new administration and many legislators no longer supported the state's investment in the agricultural industry.

Interagency Conflicts and Changes in Administration

Prior to the AAAC, the Department of Natural Resources (DNR) had managed all agricultural programs. Although DNR retained its authority over state lands, the AAAC was created as a special projects entity in the governor's office to oversee the

[10] The completed facility had one-half of the capacity originally envisioned. In addition, the building site was chosen poorly, and the terminal needed approximately $500,000 in dredging to allow barges close enough to load grain. Memorandum from House Community and Regional Affairs staff to Representative Barbara Lacher, "Valdez Grain Terminal Summary," May 12, 1983.

[11] The *Anchorage Daily News* reported that the AAAC's decision was a done deal before the meeting because on January 11, 1983, two days before the January 13 meeting, the state signed a settlement agreement to resolve the remaining issues in the Barnes lawsuit, and as part of the settlement agreed to close the Seward grain terminal. As a result a second public meeting was held a week later, which the governor attended. The decision, however, remained the same. Steve Seplocha, "Senator: Secret Pact Axed Terminal," *Anchorage Daily News*, May 20, 1983.

[12] The city of Valdez and its partner in the terminal, Alaska Grain, had lobbied Representative Barnes and other lawmakers to support the Valdez terminal over the Seward site. Memorandum from House Community and Regional Affairs staff to Representative Barbara Lacher, "Valdez Grain Terminal Summary," May 12, 1983.

Delta barley project and to pursue new agriculture projects. Agricultural supporters argued that the economic future of the industry depended on the continuous and rapid expansion of agricultural lands and the development of infrastructure projects such as the grain export terminal. Thus, the development of an agricultural industry depended to a large extent on cooperation between AAAC and DNR. Tensions between the two agencies became apparent as the AAAC began implementing Delta I. The AAAC became frustrated with the perceived lack of cooperation among DNR staff to disperse land for agricultural use in a timely manner. In an analysis of Alaska agricultural policy implementation, the authors conclude that much of the tension between DNR and the AAAC resulted from conflicting objectives. The DNR's responsibility was comprehensive management including planning and disposal of all state lands, while AAAC's responsibility was to get land into agricultural production quickly.[13] The AAAC had difficulty accepting the complexity of existing statutes and regulations that underscored many actions of DNR and, at the same time, DNR's regulations did impede AAAC's actions.

Furthermore, most resource decisions by DNR required coordination with other state agencies such as the Alaska Department of Fish and Game (ADF&G). The shift of decision-making to AAAC also undermined this inter-departmental cooperation. All of these problems were highlighted during the Delta II land disposal. Getting more land into production was seen as critical to the export grain market as well as the livestock industry. The Delta II land sale was postponed due to ADF&G concerns regarding the free-ranging bison herd and crop damage, and conflicts over timber and agriculture. Staff of ADF&G publicly opposed the Delta west land sale and urged their commissioner to reverse his endorsement of the project. The Delta II east sale finally occurred; however, the governor postponed indefinitely the Delta II west sale due in part to inter-agency conflicts and the public perception that the Delta east sale was not handled well.

To proceed with any degree of success, a government-induced agricultural industry, or any large government project, requires strong and consistent support from the legislature, the governor, and the affected bureaucracy. In this case, the attempts by the AAAC to implement Delta I and II led to resistance from DNR and other established departments. Initially, agricultural projects had strong public and legislative support. Alaska, however, had no sizeable political base that supported agriculture, and as projects were delayed and setbacks occurred, support diminished quickly.

In addition, as an entity in the governor's office, AAAC's power to implement stemmed from the strong individual connection between its chairman and the governor. When a new governor took office in 1982, he appointed new members to the AAAC who immediately took action to cancel the Seward grain terminal project. No additional appropriations were ever made to fund the construction and the terminal elevator was never realized.

Grain Prices

In 1981 and 1982, the barley harvest was less than expected due to a multitude of problems ranging from early snowstorms, crop depredation from bison, lack of grain drying and storage facilities, and grasshopper infestations. Farmers were able to meet in-state demand but there was little barley for an export market, which led to declining support for the construction of the Seward grain terminal and the development of an export market. The production of barley in Alaska reached its peak in 1984; unfortunately at the same time the commodity prices for small grains declined dramatically. The drop in international prices made imported grain cheaper than barley produced in Alaska. In short, too little barley was being produced to export, and prices were too low for that to be an economical solution. As debt mounted, the number of farmers in Delta began decreasing.[14] At the same time, the state was facing increasing fiscal constraints due to declining oil prices in the 1980s.

Even if the Seward grain terminal had been constructed, the potential for success of an in-state livestock and export barley industry is debatable. The decline in commodity prices in 1984, coupled with the difficulty in creating a large-scale agricultural industry essentially out of nothing, would have been difficult to overcome.

Alaska Seafood International Manufacturing Facility

Alaska's commercial fisheries are currently worth $1.5 billion to fishermen and have a wholesale value of $3.6 billion. Alaska's fisheries support a large processing industry with over 500 licensed processors, more than half of which are catcher-processor vessels that both harvest and process seafood. The remaining processors are located shoreside, and of those about 30 handle most of the harvest. The majority of processing in Alaska consists of *primary processing*, which usually involves heading, gutting and freezing. In contrast, most *secondary processing,* which adds value to the product by creating skinless/boneless fillets, fish patties, and other products, occurs outside of the state. The Alaska Seafood International (ASI) manufacturing facility was to represent Alaska's entry into the secondary processing industry, thus creating jobs and revenue for Alaskans.

Howard Benedict, president of Alaska Seafood Center, began promoting a large-scale Anchorage seafood processing facility in the 1980s.[15] Mr. Benedict organized a small group of private investors and approached the Alaska industrial Development and Export Authority (AIDEA) about the state's interest in investing in such a project. In 1992, Alaska lawmakers introduced legislation (HB 417), which provided AIDEA the authority to issue bonds for up to $50 million for an Anchorage seafood processing facility. The bill's sponsors decided to delay action on the bill to allow time for Alaska Seafood Center to find additional investors for the project and to develop a business plan. The following year legislation was again introduced and passed that provided AIDEA with bonding authority not to exceed $50 million to construct and own a seafood manufacturing facility to be located in Anchorage (ch 27 SLA 93).[16] Mr. Benedict testified that the Center had lined up additional financing from a New York investment bank, and a market for all of the products appeared to be available. He further testified the facility would provide approximately 200 jobs during the construction phase and 450 year-round jobs once the facility was operational. The Center would not compete with existing primary processors, but would make major, year-round purchases from Alaska's primary processors for use in secondary processing. The "ready-to-heat" products would then be shipped to domestic and international markets. Mr. Benedict noted the company was not seeking a subsidy, but would repay AIDEA as it would commercial lenders. He further noted the project would bring $100 to $115 million in outside money to the state.[17] The Department of Commerce and Economic Development (DCED) also supported the project because of its value in creating jobs, diversifying seafood exports, and providing a 45 million pound public cold storage facility.[18]

When asked why the project was not located in Dillingham or Dutch Harbor, Mr. Benedict explained that already the facility would experience a $2.5 million disadvantage per year per 100 million pounds of production for being located in Alaska. To overcome this disadvantage, the facility would be equipped with the latest in processing technology to increase efficiencies, and the City of Anchorage had agreed to provide electricity at a rate that was 38 percent below Seattle's cost. Construction of the facility in another part of the state would not have the transportation advantage provided by the Anchorage Airport, and the cost of power outside of Anchorage would put the cost of electricity totally out of the economic picture.

Construction and Early Years

Several years passed before Mr. Benedict secured a large investor for the project. In 1996, the Alaska Seafood Center joined with Central Investment Holdings (CIH), a Taiwan investment company, to form Alaska Seafood International. In November 1998, AIDEA and ASI signed an agreement whereby AIDEA would provide interim financing for construction of the facility.[19] The 184,000 square foot plant–the largest seafood processing facility in the country–was built to turn 80-100 million pounds of fish a year into "ready to heat" seafood meals. On September 23, 1999, AIDEA purchased the completed facility with its own funds without use of the bonding authority provided by the legislature in 1993. After six months of delay, ASI claimed it was ready to start operations in December 1999, with plans to start shipping products to customers by the end of January.

---

[15] Mr. Benedict, previously a Connecticut real estate developer, moved to Alaska in 1981. He founded the Alaska Seafood Center, the precursor to ASI.

[16] In 1993, Senator Johnny Ellis introduced SB 16 to provide AIDEA with the authority to issue bonds for an Anchorage seafood facility. Later in the session, the language from SB 16 was included in SB 171 and passed the legislature.

[17] Senate Finance Committee meeting minutes on SB 16, April 5, 1993. The minutes can be accessed at *www.legis.state.ak.us/basis/get_single_minute.asp?ch=S&beg_line=0416&end_line=0665&session=18&comm=FIN&date=19930405&time=0810.*

[18] Department of Commerce and Economic Development (DCED) Position Paper signed by then Commissioner Paul Fuhs on March 16, 1993.

[19] The total cost for the project was $125 million. The AIDEA provided $50 million for construction and long-term financing of the processing building, land and power plant, private sector investment financed equipment, the cold storage facility, working capital and provided other required funds.

The company had hired only ten workers, but planned to add more as production increased. At the time, there was some speculation as to how many customers ASI actually had and how much raw fish they had for processing. ASI reassured the state and other investors that the company had found a market and had purchased millions of pounds of frozen fish which was waiting in the adjacent cold storage facility.[20]

Nonetheless, many in the seafood industry questioned whether ASI could ship seafood to Anchorage, process it, and transport the product to national and international markets, while selling it cheaply enough to compete with similar seafood products produced out of the state. According to Stephanie Madsen, then vice president of Pacific Seafood Processors Association, other processors had looked at value-added product and found that it was not economically feasible to produce in Alaska. Other seafood processors called the venture too ambitious and questioned its success because of the formidable distance from the fishing grounds to Anchorage and outside suppliers.

The plant never became operational or produced any product for market in early 2000 due to the loss of operating cash. According to AIDEA and ASI, in February 2000, due to a change in political parties in Taiwan, CIH was directed to withdraw money from foreign investments. Central Investment Holdings was the largest private investor in the plant and provided the operating cash for the business. With the loss of operating cash, the plant was idle or operated at a very low capacity, and AIS began seeking a new equity investor.[21] We note that AIS never explained why the company did not begin processing the millions of pounds of already purchased seafood for its customers in December and January.

Three Restructuring Plans

The AIDEA began working with ASI on the first of three restructuring plans that would be attempted to keep the company afloat. During the summer of 2000, AIDEA had been reluctant to provide more money unless the operation could meet certain conditions, which included finding a new investor with seafood experience. At the same time, a number of legislators wrote to AIDEA in support of providing additional funding for ASI. Representative Gail Phillips, among others, argued too much private and public money had been invested to just walk away. Wilson Hughes, then AIDEA board chairman, noted that weighing whether giving the seafood company additional funds made good business sense, as opposed to political sense, was essential.[22]

In October 2000, the AIDEA board narrowly voted to lend $6.5 million in cash and rent concessions to ASI. The vote was 3-2, with representatives from DCED and the Department of Revenue voting against the proposal. The plan included the AIDEA contribution of $6.5 million in exchange for 22.5 percent ownership of the venture; the private investment group headed by Howard Benedict would slip from 38 percent to 5 percent ownership and Mr. Benedict would lose his board seat; AIDEA would seek a new investor with food-processing expertise to contribute $5 million for a five percent ownership; and CIH would contribute $10.5 million in new money and own the remainder of Alaska Seafood International. The plant was to restart production of fish portions and meals in January of 2001.[23]

The vote allowed the restructuring efforts to continue and, in January 2001, ASI announced the company's finances had been restructured, resulting in $14 million in new cash and a fresh commitment from the Taiwanese. The AIDEA became a 25.4 percent owner in ASI in exchange for $2.5 million and forgiveness or deferral of $8 million in rent. Jeff Bush of DCED, who had previously voted against the deal that made AIDEA an owner, became chairman of the new, nine-member board. Mr. Bush acknowledged the company had significant issues but thought the venture could be salvaged. The company needed not only a new line of credit to buy raw processing materials, including fish, seasonings, and packing materials, but also needed to reformulate a sales and marketing plan to generate orders.[24] Under the restructuring plan, the Benedict investors were left with less than one percent of ownership in ASI.

A series of lawsuits followed filed by Howard Benedict, the company's founder; a marketing firm; and a Kodiak fish processor. The AIDEA continued to recruit a new investor and to restart production. According to news reports at the time, relations between the Benedict investors and CIH were strained, and new management at CIH did not like the investment and couldn't understand why their predecessors made it in the first place.[25]

In May of 2001, ASI announced a second restructuring of the company's finances. At this time, a new investor, Sunrise Capital, a New York-based investment firm that specialized in turning around troubled companies, assumed a 51 percent interest and management control of ASI. At the same time, ownership shares of the other investors decreased, so AIDEA had to assume a 29 percent equity share. A new CEO, Russell Schreck, was appointed and Sunrise pledged to line up operating cash to buy raw fish. In all, Sunrise pledged $32.5 million to revive the plant. Joseph Julian, a principal with Sunrise in New York, commented that ASI's original concept was good, just poorly executed.[26] Mr. Schreck replaced senior managers with a management team experienced in food manufacturing and fisheries. He also established a sales staff in markets in the lower 48, the first time sales representatives had been hired. Several new buyers signed contracts and the company's prospects seemed to be improving.[27] The company filled a number of large orders for Sam's Clubs and Albertson's grocery stores under The Great Alaska Seafood Co. brand. By August 2002, however, all of the orders had been filled and only 40 workers remained.[28] While Sunrise had shown ASI could be a viable concept with sales to large retailers, the lack of steady customers and supply problems doomed the company again.

The third restructuring occurred in the fall of 2002. According to AIDEA, staff alerted the board that ASI was facing liquidity problems and advised that it could be time to begin an orderly wind-up of the company. Under direction from the Governor's office, however, AIDEA agreed to a third restructuring of ASI in October 2002. This restructuring provided additional capital to carry the company through June 2003. As part of the deal, AIDEA invested $2.5 million by acquiring adjacent property valued at $2.6 million, and agreed to purchase additional shares in the company up to $500,000, which was to be paid in monthly installments of $100,000.[29] At this point, AIDEA had invested $50 million in ASI and owned title to the company's building and land, had another 20 percent stake in the company through unpaid rent, as well as the land parcel valued at $2.6 million.[30] In the spring of 2003, AIDEA's new board and management informed ASI that after the last installment of $100,000 was paid in June 2003, ASI could expect no further contributions from AIDEA.

The new management at ASI recast the company as a smaller, less ambitious operation, and for the first time the company had a steady customer in BJ's Wholesale Club, an east coast retailer similar to Costco. The one customer, however, was not enough to keep the company going and ASI conceded they had neither the money nor the sales to sustain operations for more than a year. The company employed about 50 people and the small operation, set up inefficiently on either end of the building, took up only about 20 percent of the 184,000 square foot facility.[31]

The End and Lessons Learned

As ASI's debt mounted, in May 2003, the company again asked the governor for help. Specifically, ASI asked for $100,000 a month to pay utility, insurance and other costs for upkeep of the building and asked the state to defer the $360,000 monthly rent payments for nine-months. In addition, ASI asked for some of the $50 million allocated for the salmon industry marketing and revitalization plan.[32] In June 2003, ASI secured additional capital from Sunrise and Grandway Investments

International Corporation. The AIDEA declined the presumptive right to purchase additional membership under the agreement. The infusion of cash did not help, and in September 2003, ASI voted to dissolve the company.

The demise of ASI resulted in significant financial losses to the state and other creditors. Doug Bell, president of ASI, said that secured creditors were owed about $20 million and unsecured creditors were owed at least $1 million. Many were never paid as ASI's equipment, meager cash reserves and seafood supplies were not nearly enough to pay secured creditors. Officials at the AIDEA estimated the state had invested about $53 million in the venture.[33]

The AIDEA regained possession of the building and was responsible for oversight of the facility. The ASI conducted a public sale of the processing equipment and other personal property for approximately $3 million, which was used in part to satisfy past due property taxes owed by ASI to the Municipality of Anchorage. The AIDEA wrote off at least half of the investment as a loss and, in 2005, sold the facility to Anchorage Community Development for $24.5 million.

The overriding criticism from the beginning of the ASI venture was simply that it was too large. Constructed as the largest fish manufacturing facility in the country, the company had to immediately produce product for numerous customers on a large scale to sustain the operation. Instead, ASI from the outset had management problems and difficulty finding customers and maintaining a steady supply of fish for product. As ASI president Doug Bell said, the venture "just started on too grand a scheme instead of starting small and building." The original model of starting large-scale with the intent of immediately taking a big bite of the processed seafood business proved to be a mistake.[34]

Others noted that politics exacerbated the problems. Mike Barry, AIDEA board chairman in 2005, reflected that the AIDEA board would better serve the public by being more independent of politics. He suggested this could be accomplished by adding two more independent directors on rotating terms. He noted that this was not a reflection on the present governor's relationship with the board, but that "There are always going to be lobbyists and special interests that will try to take advantage of opportunities, and the public, to be protected from that, has to have a more independent board than we have today." He also emphasized that numerous people in the fishing industry had warned the project was ill-advised but those voices had been ignored.[35] Under the second restructuring, Sunrise had some success operating a smaller scale facility, but by that time mounting debt made any venture unsustainable.

We hope this is helpful. If you have questions or need additional information, please let us know.

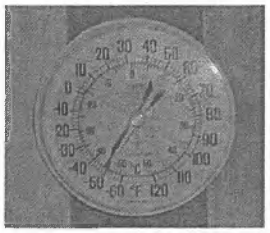
Copper Valley Electric Association

Vision: To reduce or eliminate our dependence on fossil fuel and stabilize the Cooperative's cost of generation with regional, sustainable resources

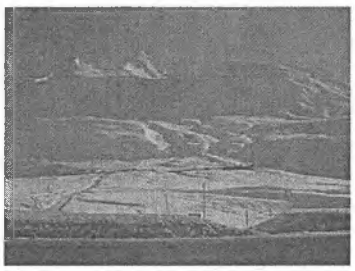
Mission: To provide exceptional customer service through safe, reliable, cost-effective electric service and programs

January 2012



About CVEA

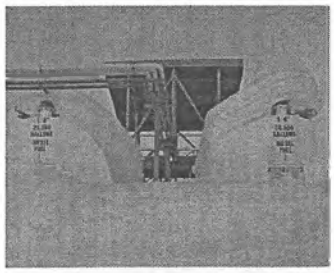
- CVEA provides electric service to over 3,800 business and residential customers in the Copper River Basin and Valdez regions of the state
- CVEA covers a large area: 160 miles north to south and 100 miles east to west; we provide service from Valdez to Kenny Lake to Sourdough to Sheep Mountain
- Dependent on fossil fuel (50% of the annual generation requirement)
- CVEA does not participate in the Power Cost Equalization program
- CVEA is not interconnected electrically to any other utility

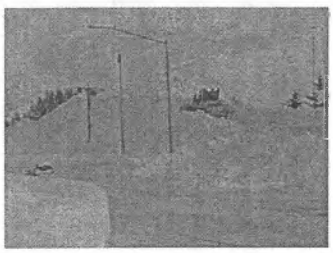


CVEA Assets

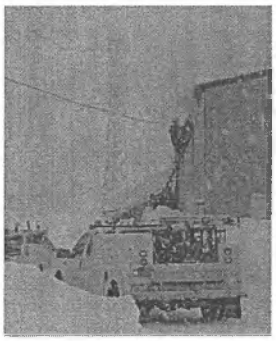
- 45 Alaskan employees
- Over 500 miles of distribution and transmission line
- 8 substations
- Solomon Gulch hydro, Cogen Plant, 2 Diesel Plants
- SCADA system with remote control of all four generating plants from one main station
- Density of 9 customers per mile

The Winter of 2011-2012





In the Copper Basin we get COLD!



In Valdez we get SNOW!

Major Undertakings

- Build Allison Creek
- Move transmission line out of avalanche zone in Thompson Pass
- Implement 2011 Rate Study
- Evaluate mid-system hydro opportunity
- Participate in Regional Energy Plan
- Find ways to deal with fuel costs

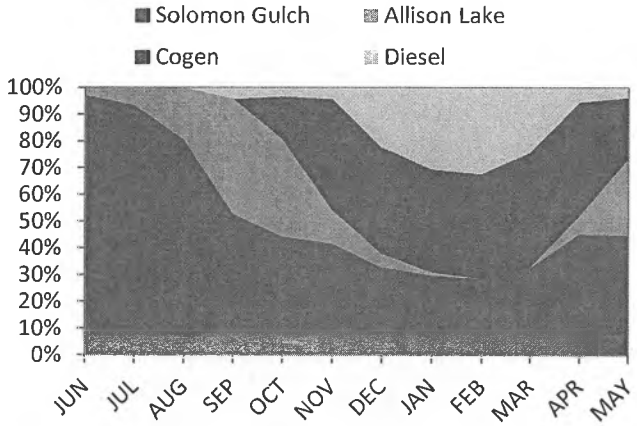
Hydro Cogen Diesel

January 2012

ALLISON CREEK HYDROELECTRIC PROJECT – Will provide members of the Cooperative with 23 million kilowatt hours of sustainable, environmentally clean energy



2011 Progress & Milestones

- CVEA chose Run of River alternative in October 2010
- Retooled engineering and environmental effort in early 2011
- Formed Aquatic Resources Task Force to focus on fish issues
- FERC review of preliminary draft application for license, found complete
- Filed application for original license on August 29, 2011
- FERC noticed application for filing on August 30, 2011
- FERC found application acceptable for filing on December 9, 2011
- Final design underway, procurement strategy being developed
- Plan of Finance development is ongoing

Renewable Energy Benefits

- Allison Creek will displace 1.1 million gallons of fuel annually when it is commissioned in 2015
- Allison Creek will eliminate 13,000 tons per year (TPY) of carbon dioxide, 9 TPY of carbon monoxide, 39 TPY of nitrogen oxide, and 6 TPY of sulfur dioxide annually
- At current fuel cost ($.25/kwh) Allison Creek will lower annual power cost by $1.44 million per year

Seasonal Effect - Summer vs. Winter

Project Economics

- In 2010 dollars, the project is expected to cost $39 million
- $14 million of project financing is in place including a $10 million State grant obtained in 2011
- CVEA estimates the first year cost of power to be 16¢/kwh
- This cost assumes borrowing $25 million at 7%
- A 1% reduction in interest rates would reduce power cost by .6¢; every $1 million in grant funds received reduces power cost by .5¢

Re: SB25, AIDEA Sustainable Energy Program

Dear Senator Egan:

On behalf of the Resource Development Council for Alaska, Inc., (RDC), I am writing in support of SB25, which expands the authority of AIDEA to make loans to energy projects and establishes a dedicated fund for the purpose of capitalizing

RDC is a statewide, non-profit, membership-funded organization founded in 1975. The RDC membership is comprised of individuals and companies from Alaska's oil and gas, mining, timber, tourism, and fisheries industries, as well as Alaska Native corporations, local communities, organized labor, and industry support firms. RDC's purpose is to link these diverse interests together to encourage a strong, diversified private sector in Alaska and expand the state's economic base through the responsible development of our natural resources.

Energy production and transmission projects are vital to grow our economy and provide the needed energy for resource development projects and community development. SB25 builds on the success of AIDEA in providing a means for in-state financing of a portion of the capital needs for energy projects. This bill provides a new financing strategy to do more with less, a welcome tool in helping capitalize needed projects in a climate of declining revenues and increasing demands on the treasury.

We encourage the Committee to vote in favor of this bill. Thank you for your consideration.

Sincerely,

Rick Rogers
Executive Director

Re: SB 25

Dear ~~Senator McGuire~~ Lesil:

On behalf of the Associated General Contractors of Alaska, a construction trade association of over 650 business members, representing the majority of the construction industry in Alaska, thank you for your sponsorship of SB 25.

SB 25 would establish and capitalize a revolving loan program within AIDEA and give them the authority to finance energy projects.

This model departs from the more traditional Alaska model of outright grants for projects, by making credit available for project owners and sponsors. This assures that others have a stake in the success of the project. It also assures that there be more eyes of due diligence on the investment thus minimizing the risk to AIDEA and the State.

The availability and cost of energy is one of the largest expenses in Alaskan households. Energy, along with transportation, is also the greatest impediment to resource development. As you know, our hope of keeping a healthy economy in Alaska for our citizens depends on development of our resources.

While we'll never return to those halcyon days of cheap energy, as a State we can make wise investments that will help to hold down the inevitable future increases in energy costs for our residents.

Thank you for sponsoring SB 25.

Sincerely,

John MacKinnon
Executive Director
Associated General Contractors of Alaska

SUBJECT: Senate Bill 25 Letter of Support

Dear Senator McGuire:

Copper Valley Electric Association enthusiastically supports your recently introduced sponsor substitute for SB 25 establishing the Sustainable Energy Transmission and Supply Development Program within the Alaska Industrial Development & Export Authority.

CVEA is the certificated electric utility serving Valdez and the Copper River Basin along 260 miles of the Richardson and Glenn Highways. I refer you to the attached brochure which provides background about the cooperative and summary information about the Allison Creek Run of the River Hydroelectric Project that we are currently developing.

With the growing number of energy infrastructure projects contemplated or in the development stage throughout our State, the financing program under SB 25 fills a significant void in state energy policy. Presently, many electric utilities and other energy project developers are able to secure funding for reconnaissance, feasibility and other preliminary studies through the Renewable Energy Fund but no source of construction funding exists for viable medium sized projects such as the $40 million Allison Creek Hydro.

Large grants are becoming increasingly scarce and on the federal level are almost non-existent. Reliance on sufficient, reasonably priced credit will certainly increase. For energy projects such as CVEA's, we must rely on specialized lending institutions out of State. Our payments go to banks in the Washington, DC area, when those dollars could be retained in Alaska for reinvestment.

SB 25 will go a very long way toward resolving the dual issues of tailored credit sources and of keeping our money in-state while providing for Alaskans' long term energy needs, in most cases with renewable resources. SB 25 is tailored to the needs of the electric industry and other energy providers in the following ways:

- meaningful funding ($250 million authorized)
- meaningful amounts available for individual projects (up to one third of capital costs, or $20 million)
- longer amortization (up to 50 years for hydro or transmission projects)
- AIDEA ability to defer principal payments, permit capitalized interest, and interest rebate incentives of up to one percent for renewable energy projects

As the Legislature knows, much of Alaska electric power supply infrastructure is aging and in need of replacement, at the very time renewable and alternative energy technology offers cleaner and more efficient ways to generate and transmit this vital resource. Moreover, continued dependence on fossil fuel sources drains valuable resources from communities which instead could be used to support development of renewable energy. At CVEA we applaud your initiative to provide a program to support this difficult and costly transition away from oil in favor of renewable energy. SB 25 could not have come at a more opportune time. CVEA urges lawmakers to enact this law without delay.

Sincerely,

Robert A. Wilkinson
Chief Executive Officer

Re: Senate Bill 25

Dear Senator McGuire:

Golden Valley Electric Association (GVEA) would like to express its support for the passage of Senate Bill 25, "An Act establishing the sustainable energy transmission and supply development program in the Alaska Industrial Development and Export Authority."

The expansion, rehabilitation and replacement of energy generation and distribution infrastructure are critical if we are to grow the state's economy. SB 25 proposes to help address these needs by expanding the power of AIDEA to finance, or facilitate the financing of, energy projects. This increased authority is paired with additional flexibility that may be necessary as the state's energy players develop new options. The ability for the state to assist with the financing of more energy infrastructure means the interest paid by Alaska communities would be retained in-state and made available for additional Alaska investments.

GVEA appreciates the time and effort you and your staff have dedicated to the introduction and advancement of this legislation. If passed and signed into law, it will do much to restore the state's ability to support commercially viable energy projects.

As SB 25 proceeds through the committee process, please do not hesitate to contact me if I may be of assistance to you.

Sincerely,

Brian Newton
President and CEO

ALASKA PARTNERSHIP
FOR ECONOMIC DEVELOPMENT

A RESOLUTION OF THE ALASKA PARTNERSHIP FOR ECONOMIC DEVELOPMENT BOARD OF DIRECTORS SUPPORTING SENATE BILL NUMBER 25; "AN ACT ESTABLISHING THE SUSTAINABLE ENERGY TRANSMISSION AND SUPPLY DEVELOPMENT PROGRAM IN THE ALASKA INDUSTRAIL DEVELOPMENT AND EXPORT AUTHORITY: AND PROVIDING FOR AN EFFECTIVE DATE."

Resolution #12-11_____

Whereas; the Alaska Regional Development Organizations (ARDOR) was established by the Alaska Legislature in 1988; and

Whereas; the ARDOR's statutory mandate is to encourage the formation of regions development organizations to prepare and implement regional development strategies; and

Whereas; the ARDOR's represent a diverse network of public, private and economic development groups that drive local initiatives and advance economic diversification through partnerships with state and local governments; and

Whereas; the ARDOR's established the Alaska Partnership for Economic Development, (APED), in 2009, to advance economic development and address initiatives affecting development and to help develop a state-wide comprehensive strategic plan; and

Whereas; the ARDOR/APED programs have established partnerships with more than 300 local, regional, private, municipal and public organizations to pool resources, decrease duplication and foster new businesses; and

Whereas; the APED now comes in support of the following legislation being considered by the Alaska State Legislature:

NOW THEREFORE BE IT RESOLVED; the Alaska Partnership for Economic Development supports ***Senate Bill Number 25;*** **"AN ACT ESTABLISHING THE SUSTAINABLE ENERGY TRANSMISSION AND SUPPLY DEVELOPMENT PROGRAM IN THE ALASKA INDUSTRAIL DEVELOPMENT AND EXPORT AUTHORITY: AND PROVIDING FOR AN EFFECTIVE DATE."**

BE IT FURTHER RESOLVED that a copy of this resolution be sent to the SENATOR MCGUIRE, the prime sponsor of SB25.

APPROVED THIS 24th DAY of FEBRUARY 2012.

RE: CSSSSB 25(L&C)

Dear Senator McGuire:

On behalf of the Associated Builders and Contractors of Alaska (ABC of Alaska), a construction trade organization that represents the merit shop construction industry in Alaska, I submit this letter of support for CSSSSB 25(L&C).

ABC of Alaska supports policy initiatives that will assist in lowering the long term cost of energy in Alaska communities. The high cost of energy is causing financial hardship for many Alaska families and has a profound impact on business in our state. It is imperative to the health of our overall economy to have access to reliable, affordable energy. Reducing the high cost of energy will foster economic development and growth for our state.

The passage of SB 25 will extend AIDEA's existing authority to finance, or facilitate the financing of energy infrastructure projects through Alaska. We think that this is a positive departure from the current path that the State of Alaska has been on in awarding grants to entities and local communities to fund energy infrastructure projects. By making credit available, communities and project sponsors assume a greater stake in the project's success or failure. As each loan is repaid, the capital becomes available to recycle into new loans, creating a financing mechanism to assist with Alaska's aging infrastructure, as well as provide for new energy projects aimed at lowering overall energy costs in our state.

The Alaska State Legislature has made energy policy a priority issue and has focused a significant amount of state resources on finding solutions to the problems that plague our communities, businesses, and families. ABC of Alaska believes that SB 25will provide an additional tool for Alaska communities and energy project sponsors working towards affordable energy solutions.

Thank you for your consideration of this matter.

Sincerely,

Suzanne Armstrong

Why this fiscal note differs from previous version (if initial version, please note as such)

This fiscal note has been revised to correct a typo, incorrectly including one part-time position. The part-time position has been removed. This fiscal note differs (reduced) from the initial fiscal note put forth by the department in 2011 because the CS SB 27 (HSS) removed several requirements from DEC. Additionally, this fiscal note has been entered into the 2012 form and has been revised to reflect updated personal service costs.

Division: Environmental Health — Date/Time 12/9/11 9:55 AM
Approved by: Lynn Kent, Deputy Commissioner — Date 2/21/2012

(Revised 8/17/2011 OMB)

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CS SB 027 (HSS)

Analysis

The prohibition and regulation of products containing flame retardants will require a public campaign to educate the public about the risks associated with brominated flame retardants and evaluation and analysis of alternative flame retardants. One position, an Environmental Program Specialist IV, will handle both the toxicology analysis and the information to the public. The position will be filled for 10 months the first year to allow for classification and recruitment time, and for 12 months each year thereafter.

Why this fiscal note differs from previous version (if initial version, please note as such)

CSSB027 (HSS) removed two sections in the original bill that required DHSS involvement: Sections 18.31.670 (Review by departments) and 18.31.680 (List of toxic chemicals).

Prepared by: Ward Hurlburt, MD, MPH - Chief Medical Officer / Director — Phone 269-6680
Division: Public Health — Date/Time 12/29/11 1:00 PM
Approved by: Nancy Rolfzen, Assistant Commissioner — Date 1/13/2012
DHSS Finance & Management Services

(Revised 11/18/2011 OMB)

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB027(HSS)

Analysis

This bill, which addresses flame retardants, requires the Department of Environmental Conservation under Section 18.31.610 to consult with the Department of Health and Social Services (DHSS) prior to prohibiting by regulation the manufacture, sale, and distribution of flame retardant materials under specified circumstances. This limited involvement of DHSS that would involve the Division of Public Health would result in no fiscal impact and would be accomplished with existing resources.

In the original bill, DEC would seek consultation from DHSS in two situations when: (1) proposing to prohibit a flame retardant under Section 18.31.610; and (2) establishing a list every three years of persistent bioaccumulative toxic chemicals that occur or are used in products used by human beings, under Section 18.31.680. Additionally, DHSS and DEC would perform a one-time review of brominated flame retardants under Section 18.31.670. These previous provisions would have resulted in increased costs to the Division of Public Health of $26.0 for 0.25 FTE of a Health Program Manager III and $0.5 for office supplies. However, as mentioned, with the removal of Sections 18.31.670 and 18.31.680 from the original bill, the fiscal impact of the revised bill on DHSS is reduced to zero.

SB 27
SPONSOR STATEMENT

> "Still one thing more, fellow-citizens -- a wise and frugal Government, which shall restrain men from injuring one another, shall leave them otherwise free to regulate their own pursuits of industry and improvement, and shall not take from the mouth of labor the bread it has earned. This is the sum of good government, and this is necessary to close the circle of our felicities."
>
> Thomas Jefferson, First Inaugural Address, March 4, 1801[1]

SB 27 will support Safer Homes and Healthier Families by banning the use of polybrominated fire retardants (PBDEs) in mattresses, upholstered furniture and the plastic housing of electronics. In addition, it will give the Department of Environmental Conservation the authority to prohibit the use of other toxic flame retardants when safer alternatives exist. It will also move Alaska a step forward in protecting people from a variety of toxins by allowing the Department to participate with other states in learning about and sharing information on toxins.

PBDEs are persistent toxins that are included in furniture and electronics found in households to enhance flame retardancy. These toxins bio-accumulate, becoming more concentrated in humans and animals high in the food chain. Fetuses and infants are at particular risk as accumulated toxins are transferred from mother to child in utero and through breast milk. Pre-natal exposure may have lifelong health impacts that are not manifested until decades later.

Alaskans are particularly vulnerable for three reasons: 1) we spend a lot of time indoors with little ventilation, increasing our exposure to and ingestion of the microscopic particles of toxins found in household dust that are released from our furniture and electronics; 2) we eat subsistence foods that may concentrate toxins; and 3) through a process known as global distillation, toxins such as PBDEs are carried in the atmosphere for great distances from points of manufacture and concentrate in cold climates.

The impact and legacy of 30 years of producing and using these chemicals is yet to be fully realized and revealed. Alaska should join the 12 other states that have stepped forward to protect their citizens without delay in the face of federal inaction.

SENATOR BILL WIELECHOWSKI

CS SB 27 (HSS)

Sectional Analysis

Section 1. Adds a new article on toxic chemicals in products.

Sec. 18.31.600. Prohibits a person from manufacturing, selling, or distributing certain products that contain a specified percentage of the brominated flame retardants pentaBDE, octaBDE, or decaBDE. Prohibits a person from manufacturing, selling, or distributing a product that the Department of Environmental Conservation prohibits under sec. 18.31.610.

Sec. 18.31.610. Authorizes the department to prohibit the manufacture, sale, and distribution of certain products that contain a flame retardant that is not already prohibited under sec. 18.31.600(a) - (c) if the department makes certain determinations regarding public health, the environment, and alternatives to the flame retardant. Requires the department to consult with the Department of Health and Social Services (DHSS). Requires the state fire marshal to determine whether an alternative satisfies fire safety standards.

Sec. 18.31.620. Lists five exemptions from the prohibitions in sec. 18.31.600.

Sec. 18.31.630. Requires a person who manufactures products whose sale and distribution are prohibited by sec. 18.31.600 to inform its retailers in the state of the prohibition and the penalty.

Sec. 18.31.640. Authorizes the department to request that the manufacturer of a product it suspects of being sold in violation of sec. 18.31.600 either (1) provide the department with a sworn certificate indicating the sale does not violate sec. 18.31.600, or (2) notify its retailers in the state that the sale is prohibited and provide the department with a list of the retailers notified.

Sec. 18.31.650. Establishes a civil penalty for violating sees. 18.31.600 - 18.31.640.

Sec. 18.31.660. Requires the department to participate in a multistate chemicals clearinghouse to build capacity to identify and promote safer chemicals and products; avoid duplication and enhance efficiency and effectiveness; and ensure access to high quality and authoritative information on chemicals.

Sec. 18.31.670. Authorizes the department to adopt regulations to implement the new sections.

Sec. 18.31.690. Defines terms for the new sections.

Section 2. Authorizes the department to begin adopting regulations for these provisions.

Section 3. Directs the Revisor of Statutes to make a conforming change to the existing statutes in AS 18.31.

Section 4. Gives participation in the chemicals clearinghouse and bill sec. 2 an immediate effective date.

Section 5. Gives the Act (except chemical clearinghouse participation and and sec. 2) an effective date of January 1,2013.

Prepared by Karla Hart, 2/28/11

SB 27 - An Act Relating to Flame Retardants

CS FOR SENATE BILL NO. 27(HSS) Before the Senate Finance Committee

Q. Why do we need this bill?

A. To protect the health of Alaskans by reducing our exposure to PBDEs .

Q. What are PBDEs?

A. Polybrominated diphenyl ethers (PBDEs) are a class of chemicals added to foams, electrical appliances and other materials to reduce flammability. PBDEs are easily released from products as microscopic dust, which can be ingested, inhaled and absorbed. These toxic chemicals remain in the environment for extended periods of time, build up in fatty tissues, and concentrate as they move up the food chain. PBDEs are neurotoxins that can act as endocrine disruptors and impact thyroid hormone regulation.

FACT. Alaskans are especially at risk from PBDEs because:

- Seasonally, we spend a lot of time indoors, increasing exposure to PBDE dust in households.
- Cold climates concentrate toxins, including PBDEs, that are carried in global air currents.
- Alaskans eat wild foods that concentrate PBDEs – marine mammals and some fish species are of special concern.

Q. What Alaskans are most at risk from PBDEs?

A. Children. PBDEs are transferred from mother to child during pregnancy and nursing. Exposure to small concentrations of toxins at critical stages of development can have permanent effects on development. A growing body of literature associates PBDEs with neurodevelopmental impairments, thyroid disruption and other adverse effects on humans.

Q. Why isn't the Environmental Protection Agency imposing a ban?

A. They can't. They don't have adequate authority under current law. As a result, states are taking action to protect their residents from PBDEs, including Washington, Oregon, California and Hawaii.

Q. Will a ban compromise fire safety?

A. No. Changes in product design have reduced the need for chemical flame retardants and resorcinol bis diphenyl phosphate (RDP), identified as a safer alternative, has passed the scrutiny of the Washington state fire marshall.

Q. Will a PBDE ban hurt Alaskan businesses?

A. No. Existing bans on PBDEs include Washington, Oregon, 11 other states , the entire Walmart/Sam's Club retail chain, and the European Union. Products that are free of PBDEs are now widely available. One major Alaska furniture retailer has surveyed his suppliers and reports that the products his stores carry are already free of PBDEs. The Western Home Furnishings Association, with 1,000 members, reports no complaints with implementation of the PBDE bans in Washington, Oregon, Hawaii and California. The Washington Retail Association also reports no difficulties with implementation of the Washington ban.

Supporters of an Alaska ban on PBDEs include:

- Alaska Fire Chief's Association
- Association of Village Council Presidents
- The Arc of Anchorage
- Nome Eskimo Community
- Alaska Professional Fire Fighters
- Alaska Inter-Tribal Council
- Alaska Nurses Association
- Alaska Conservation Alliance
- Native Village of Savoonga
- Kristin Cox, Naturopathic Doctor
- Dr. Lauren Heine, Clean Production Action
- Karen McLane, Nome Health Care Provider
- Roxanne Chan, Spring Wind Acupuncture
- Marc Esslinger, Firefighter/Paramedic
- Peter Brigham, U.S. burn injury community
- Dr. Frank Von Hippel, University of Alaska Anchorage

Q. How much is it going to cost?

A. About 20 cents per Alaskan per year - $139,000.

Although Alaska faces human and environmental risks from an array of airborne, waterborne, household and industrial toxins, the State's Division of Environmental Health has no toxicologist. The DEC fiscal note for this bill includes one toxicologist who would leverage resources and exchange knowledge with other toxicologists through the Interstate Chemicals Clearinghouse to better enable Alaska to respond quickly to health threats from other toxic chemicals. DHSS and DPS fiscal notes are zero.

From the office of Senator Wielechowski, prepared 3/14/11

Chairman Stedman
Senate Finance Committee
Capitol Building
Juneau

February 21, 2012

Mr. Chairman:

I just want to express a few thoughts on a bill you're considering, SB 27, dealing with the composition of fire retardant materials that some claim unknowingly affect our daily environment and consequently, our health.

I've got a lot of friends who are environmental advocates and most of the time I agree with them but this time I think maybe they are going too far too fast.

As you know, fire is a huge, terrible issue in Alaska, especially in rural Alaska. I'm really not convinced this bill addresses the real solution to our problem here. I think we need to focus our time, energy and money on prevention and awareness and co-ordinate our concerns on this issue with a focus on a national solution to ingredients included in consumer products Our market is too small to have an impact and they'll just cut us off and things could be even worse.

Matt Collins

Anchorage, Ak. 99502

2/22/12

Alaska State Senate
Finance Committee
Capitol Bldg.
Juneau, Alaska 99801

Dear Senate Finance:

I understand your committee is considering passing SB 27, a bill that would ban the use of a chemical essential for effective fire retardant in building materials and consumer products.

It is my understanding the use of this chemical is being addressed by the federal EPA. It seems silly to me that we are considering creating a state standard that we have little or no expertise in before the EPA, taking into consideration solid scientific evidence, addresses the issue on a national level. Then, after the national experts create a standard, is when we should address how that accommodates Alaska.

The bill is premature. Please don't pass it yet.

Kyle Farrell

436 E. 11th Ave. #26
Anchorage, Ak. 99501

Alaska Senate Finance Committee
State Capitol Building
Juneau, Alaska 99801

February 21, 2012

Honorable Committee Members:

I'm considering remodeling my home. My contractor tells me the legislature is considering passing a bill, SB 27, that will change the composition of fire retardant components in building materials and end up increasing the cost of construction.

I understand the issue is being addressed by the federal EPA and new national standards developed if in fact it is necessary.

I don't understand why we feel we need to pass SB 27, or legislation like it, until the new federal standards are established. We should wait so we don't have to go through this all over again.

Seems like passing it now is a waist of time and money.

Neil Tolpuiano

1431 North Bluff Dr.
Anchorage, Alaska 99501

February 19, 2012

Chairman
Alaska State Senate Finance Committee
Juneau, Alaska 99801

Dear Finance Committee

In regard to SB 27, the bill banning a chemical essential to effective fire retardant materials and products.

I don't understand why we in Alaska, who, because of our extreme weather conditions, face extraordinary residential fire challenges that endanger us more than any other state in the country, would even consider legislation that would increase our chance of survival.

Please don't pass this bill.

Clayton Dale

4938 E. 43rd. Ave. #B2
Anchorage, Ak. 99548

February 20, 2012

Sen. Stedman
Chairman
Senate Finance Committee
Capitol Building
Juneau, Alaska 99501

Mr. Chairman & member of the Finance Committee,

SB 27 will put Alaska out in front of the rest of the country when it comes to the composition of fire retardant components included in a myriad of products, both consumer and commercial, sold in Alaska.

I understand the health concerns proponents have raised and share them if they are in fact real. The issue is being addressed on the national level by the EPA and also voluntarily by manufacturers. Their proposed solution is due sometime next year.

I think this bill is premature.

Thank you.

Brian Ross

9715 Independence Dr. #B203
Anchorage, Ak. 99507

February 21, 2012

Alaska State Senate Finance Committee
Room 520
State Capitol
Juneau, Alaska 99801

Dear Alaska State Senate Finance Committee Members:

We would like to express our opposition to SB 27. The EPA and industry have already reached an agreement to phase out old fire retardant products and safely transition to the next generation of fire safety products. As burn physicians and former presidents of the American Burn Association, we have come to recognize the absolute necessity of flame retardants. The truth is that fire retardants save lives. They add minutes to a would-be victim's escape time. The relationship between time of exposure and the extent of the injury is well known. The greater the surface are burns, the higher the mortality. We are committed to saving lives and preventing burns any way possible. Thus we are deeply concerned about any reckless and unscientific attempt to weaken standards and put millions of people at risk for serious burn injuries and death. Any individual state bill that would immediately ban fire safety protections without the development and proper implementation of alternatives is dangerous.

Devastating fires affect every person in every industry. According to a recent UC Davis study, some 2 million fires occur each year in the United States alone. These fires result in about 5,000 deaths, 54,000 hospitalizations and 1.4 million injuries, including 300 to 400 child deaths. The medical community sees the trauma of burns and the lifelong effect on the lives of victims on a daily basis. The brave firefighters and EMT's that are the first to respond to a scene depend on flame retardants to allow valuable seconds for rescue. The business community will be forced to change their manufacturing process and will incur much higher costs, leading smaller enterprises to bankruptcy. Universities and school systems will face a significantly larger risk for hundreds of thousands of students. Industries simply cannot afford to ban a life-saving product without developing alternatives.

The EPA agreement sets forth a rational, effective transition to newer alternatives, while allowing critical services such as police, fire and airlines to continue to use existing fire safety products that are critically important to saving lives. Manufacturers have already announced the production of environmentally-friendly fire retardants which minimize the use of raw materials, energy, byproducts and waste. We believe that fire safety manufacturers will hold fast to their decision to safely phase out existing products, and we commend them for their proactive development of new technologies.

As we make this transition, we must ensure that there is no unsafe lapse in fire protection. Therefore, we oppose any preemptive state bans as we believe the timeline that has been worked out with the EPA is the most appropriate. A national solution considers the interest of all Americans rather than just those of individual states, and this is the only way to safely progress in national fire protection.

Thank you for your time and effort concerning this extremely important matter, and we hope that you will join us as we continue to hold our nation to the highest fire protection standard.

Sincerely,

Roger E. Salisbury, MD

David Heimbach, MD, FACS

Past President American Burn Association

Past President International Society for Burn Injury

Alan Dimick, M.D., FACS
Past President, American Burn Association

Alaska Nurses Association (AaNA)
2010 Resolution #7
Resolution on Polybrominated Diphenylethers (PBDEs)
10/17/2010

Whereas, PBDEs are toxic, endocrine-disrupting flame retardant chemicals added to plastics, foam products and textiles; and

Whereas, prenatal exposures to PBDEs at levels commonly found in households have been shown in studies to be associated with adverse neurodevelopmental effects in young children; and

Whereas, people living in North America have levels of PDBEs that are 10-40 times higher than individuals living in Europe or Japan and people living in northern regions are particularly vulnerable to PBDE exposure; and

Whereas, safer and economically viable alternatives are available and are already being used by some manufacturers of computers and other products; and

Whereas, the American Public Health Association and International Association of Fire Fighters have urged the phase-out of PDBEs and other harmful chemicals when safe alternatives are readily available;

Therefore be it resolved, that the Alaska Nurses Association supports the passage of SB295.

Preventing Human Exposure to Polybrominated diphenyl ether (PBDE) Flame Retardants to Protect Public Health

Policy Date: 11/9/2004
Policy Number: 2004-05

This policy, acknowledging that polybrominated diphenyl ether (PBDE) flame retardant compounds are widely used and chemically similar to PCBs, and noting more recent recognition that PBDEs are environmentally persistent, rapidly bioaccumulate in human tissue including breast milk and function as developmental neurotoxicants in animals, urges proactive steps to reduce human exposure citing especially APHA policy (#200011) encouraging "precautionary action to prevent potential harm to reproductive health, infants, and children, even if some cause and effect relationships have not been established with scientific certainty."1

More specifically, PBDEs are commonly used flame retardants found in foam products, textiles, electrical equipment, building materials and transportation. Penta-BDE, octa-BDE and deca-BDE are three of the most common commercial classes, with varying numbers of bromine atoms per molecule. Chemically, they look very much like PCBs, which were banned in 1976 due to their high toxicity and persistence and now conclusive evidence that they cause neurodevelopmental problems in children.2 Aside from their fire-retardant properties, PBDES are potent toxins that persist in the environment and bioaccumulate in the food chain and in human tissues.3 Like PCBs, PBDEs are lipophilic and have been found in fish, bird eggs and marine mammals as well as in human milk, fat and blood. While PCB levels in fish and breast milk have slowly declined since being banned, PBDE levels are increasing at an exponential rate. A 100-fold increase in total PBDEs was noted in Lake Ontario trout between 1978 and 1998.4 Body burdens of PBDEs in San Francisco Bay Harbor seals increased by a factor of 100 between 1989 and 1998.5 Total PBDE levels in human milk, blood and tissues have increased by a factor of 100 during the past 30 years, doubling about every five years.6 PBDE levels in U.S. women's breast milk are typically 10-100 times higher than levels in European women7,8 and are now approaching concentrations at which health effects have been observed in laboratory animals.9-17 Although human data on health effects are still lacking for PBDEs, ample data on toxicity are available from animal studies. These studies document that PBDEs are toxic to the brain, reproductive system and liver and disrupt thyroid function.18 Effects on thyroid function provide a plausible mechanism for PBDEs' possible adverse effects on child development. Human studies already document adverse effects on intelligence and psychomotor skills in children with disruptions in thyroid levels in the womb through the second year of life.19-22 One study found that workers exposed to PBDEs experienced higher prevalence of hypothyroidism.23 Concurrent exposure to both PBDEs and PCBs, as from consuming some fatty fish, may present an increased risk since some researchers have found additive or synergistic effects between the two chemicals.24

PBDEs have been detected in household dust,25 food, and in air drawn from a warm TV,26 but the major human exposure pathways have yet to be identified. PBDEs with fewer bromines, such as penta, have the highest potential for bioaccumulation and are typically the most common classes found in humans, fish and other wildlife. Scientists, however, have increasingly been finding deca-BDEs and other higher brominated congeners in biota.27-29 Moreover, it is clear that deca can debrominate and convert to the more bioavailable forms in the environment and potentially during metabolism as well, making them a greater health risk than originally thought.

Global PBDE production totaled 150 million pounds in 1999, over 50 percent of which was used in the Americas.30 Deca-BDE is the most widely used class of BDE at 80 percent of worldwide production.31 Like PCBs, PBDEs flame retardants are now ubiquitous in the environment. The European Chemicals Bureau estimates that 75 percent of penta-BDE emissions will end up in soil and 24.9 percent in surface water and sediment.32 Measured levels of PBDEs in U.S. sewage sludge are 40 times that of European sludge.33

Eliminating most uses of PBDE flame retardants is possible, and a prudent step to protect public health. Concerns about rising levels of PBDEs in the breast milk of Swedish women led to efforts by industrial users in both Sweden and Germany to phase out the use of these chemicals. These actions have led to a decline in PBDE levels in breast milk of Swedish women.34 The European Union has enacted a ban on penta and octa-BDEs and is considering a ban on deca-BDEs as well. The states of California, Hawaii, New York, and Maine have enacted phase-outs of penta and octa-BDEs. Minnesota, Massachusetts, Michigan, Washington and Maryland have proposed similar state-level phase-outs.

Alternatives to the use of PBDE flame retardants are available and cost effective. Alternatives include: product redesign to

eliminate the need for added chemicals; use of naturally flame retardant materials like wool and leather or plastics containing sulfur; and use of less toxic alternatives.35 The German Environmental Agency selected red phosphorus, ammonium polyphosphate and aluminum trihydroxide as alternatives with the least adverse environmental impact.36

Some computer and electronics manufacturers like Apple, Ericsson, IBM, Intel, Motorola, Panasonic, Phillips, and Sony are using alternatives. For example, Motorola now uses a halogen-free laminate that is cost effective, while meeting fire safety standards.37 Toshiba has replaced BFR-containing plastic casings in electronic parts with inherently flame-resistant polyphenylene sulfide. IKEA furniture, Crate and Barrel and Eddie Bauer are requesting PBDE-free polyurethane foam from their manufacturer Hickory Springs.

Although global manufacturers of these compounds continue to produce, as well as export, their products to the United States, one of the two U.S. manufacturers of PBDEs, Great Lakes Chemical, has already announced that they will phase out production of penta and octa-BDEs by 2005. The remaining U.S. manufacturer, Albemarle, continues to manufacture deca-BDE. By calling for a reasonable time frame for phase-out of deca-BDEs, impacts on businesses and workers could be minimized. Phasing out these compounds and substituting safer alternatives protects U.S. manufacturers of PBDEs and companies that use them in their products from potential liability and helps maintain a European market for products requiring flame retardant properties. Since exposure to PBDEs may include an inhalation route of exposure, phasing out the manufacture of these chemicals should better protect the health of workers in industries dealing with PBDEs.

A PBDE phase-out may result in job loss for existing production workers. APHA policy statement 9304 acknowledges potential worker impacts and calls for assistance to workers who are displaced by technological changes.38 New research further supports the need for Work Environment Impact Assessments prior to chemical phase-outs/bans in order to prevent the shifting of risks to workers within the affected industry.39 A PBDE phase-out also provides economic opportunities for workers in industries which make safer alternatives to PBDE flame retardants.40

In light of the aforementioned emerging science on the inherent toxicity and persistence of PBDEs, evidence of adverse health effects on animals and the prevalence and rising levels in fish, biota and human breast milk, immediate action is needed to prevent further environmental contamination and to protect public health.

Therefore, The American Public Health Association hereby:

1. Resolves: That APHA urge state and federal governments to require the use of PBDE flame retardants be phased out in all products manufactured and sold in the United States by a date certain; and
2. Resolves: That APHA urge state and federal governments, in enacting such phase-outs, to consider policies that alleviate short-term economic impacts on the PBDE production workforce, and to also consider economic benefits to workers in industries making safer alternatives; and
3. Resolves: That APHA urge state and federal governments to provide financial incentives for development and use of alternative flame retardants or preferably changes in product design to increase fire resistance without use of chemicals, to assure fire safety, while protecting the public from toxic exposures; that alternative flame retardants be adequately tested for toxicity; and that environmental and health safety must be assured prior to use; and
4. Resolves: That APHA urge state and federal governments to require labeling of chemical flame retardants used in products; and
5. Resolves: That APHA urge state, federal and local governments to regulate the safe disposal of products containing brominated flame retardants and to prohibit land application of sewage sludge until testing can assure that such material does not contain measurable levels of PBDEs; and
6. Resolves: That APHA urge the U.S. Centers for Disease Control and Prevention to expand the national biomonitoring program to include PBDEs and to increase the number of people studied; and
7. Resolves: That APHA urge Congress to increase funding for research on PBDE flame retardants, including monitoring levels of PBDEs in fish, sediments, human milk, blood and tissue, and additional research into exposure routes and human health effects from these exposures.

Senator Bill Wielechowski
State Capitol
Juneau, AK 99801

Dear Senator Bill Wielechowski:

As President of the Association of Village Council Presidents we are writing you in support of SB 27, a bill that would prohibit the manufacture and sale of toxic retardants in common consumer products. The Association of Village Council Presidents is a tribally-governed organization advocating on behalf of 56 Federally Recognized tribal governments throughout the Calista region. We recognized increasing evidence that flame retardants, such as polybrominated diphenyl ethers (PBDEs) named in SB 27 are being found in the Arctic. We are concerned about PBDEs leaving a lasting toxic legacy in people and the environment.

PBDEs are potent toxins that persist in the environment and bioaccumulation in the food chain and in human tissues. They can travel long distances and move readily between the water, soil, and air. PBDEs are associated with a variety of negative toxic effects including memory impairment, learning and behavioral problems, the disruption of thyroid hormone balance and reproductive health issues. In Alaska, PBDEs have been detected in seabird eggs, marine mammals, otters, and polar bears. The presence of such chemicals in wildlife is cause of concern, no only for the survival and well-being of wildlife but for the human consequences of bioaccumulative exposure through the food we eat.

We need to enact legislation to phase out PBDEs from consumer product. Fortunately, fire safety can be achieved without the use of toxic chemical because there are safe, economical, and effective alternatives to PBDEs currently in widespread use.

Eliminating most uses of PBDE flame retardants is possible and an important step to protecting public health.

Thank you for sponsoring this bill.

Sincerely,

Myron Naneng, President
ASSOCIATION OF VILLAGE COUNCIL PRESIDENTS

Representative Lindsey Holmes
State Capitol Room 405
Juneau AK, 99801

Senator Bill Wielechowski
State Capitol Room 101
Juneau AK, 99801

Reference: HB 63 & SB 27

On behalf of the Alaska Fire Chiefs Association I am writing to give our support for HB 63 and SB 27; **TITLE:** "An Act relating to flame retardants and to the manufacture, sale, and distribution of products containing flame retardants; relating to bioaccumulative toxic chemicals; and providing for an effective date."

Polybrominated Fire Retardants (PBDEs) have been proven to be toxic chemicals and hazardous not only to residents in homes with PBDEs but to Fire Firefighters who may be called to fight fires in structures where these chemicals are present.

We support the passage of HB 63 and SB 27.

Sincerely,

Jeff Tucker, President
Alaska Fire Chiefs Association

February 16, 2011

Senator Bill Wielechowski
State Capitol
Juneau, AK 99801

Dear Senator Wielechowski:

The Arc of Anchorage would like to thank you for introducing SB 27, *"An Act relating to flame retardants and to the manufacture, sale, and distribution of products containing flame retardants; relating to bioaccumulative toxic chemicals; and providing for an effective date."* The Arc of Anchorage is a private not-for-profit organization that serves people with developmental disabilities and mental health issues so they can lead rich and productive lives. The Arc looks forward to a day when it is no longer needed because all preventable disabilities have been prevented, but we need legislative help to address prevention.

Learning and developmental disabilities influence the quality of life for affected children and their families, and also impose a heavy financial burden on the state through required Special Education, increased health care costs, lost work time for parents, and a lifelong loss of work productivity for severely affected children. Scientific evidence has demonstrated that some chemicals, including decaBDE, can cause learning and developmental disorders. We must not expose our children to toxicants that we know or suspect can harm their developing brains and bodies. We know safe alternatives can replace the need for these toxic chemicals without compromising fire safety.

Developing children are more susceptible to toxic exposures than adults. When certain exposures occur at certain times, sometimes even at very low doses, the development of children's brains, other organs, and reproductive, hormonal, and immune systems can be permanently altered. Recent evidence has shown children who had higher cord blood concentrations of polybrominated diphenyl ethers (PBDEs) scored lower on tests of mental and motor development at 1–4 and 6 years of age. This work was initiated based on a large body of research indicating that prenatal PBDE exposure has the potential to disrupt neurodevelopment.

PBDE residues, particularly highly brominated PBDEs such as deca-BDE, have been found consistently in tissue samples of both new mothers and their newborn infants, as well as in mothers' breast milk. Ingestion of contaminated milk is one of the two major routes of PBDE exposure in children, and there are concerns about the high concentrations ingested, given the

susceptibility of newborns. This trend has been found to occur around the globe. Yupik women from the Yukon Kuskokwim Delta of Alaska have the highest known concentrations of PBDEs in human populations in the Arctic.

Children rely on adults to keep them safe from harm. Therefore, it is up to us to do everything we can to keep them safe and to minimize their exposures to toxics. SB 27 is important legislation that will help protect children from needless exposures to this persistent, toxic chemical.

Thank you,

Patti J. Saunders

Patti Saunders

The Arc of Anchorage

ALASKA PROFESSIONAL FIRE FIGHTERS
International Association of Fire Fighters, AFL-CIO, CLC
P.O Box 111222, Anchorage, AK 99511-1222

March 3, 2011

To: Honorable Senators and Representatives of the Alaska Legislature
RE: The Alaska Professional Fire Fighters Associations' position on PBDE's

Dear Legislator –

The Alaska Professional Fire Fighters Association (AKPFFA) is submitting this letter in support of HB63 / SB27 and urges passage of this important public health and environmental measure. We believe passage of this measure is a step in the right direction for improving the health and safety of our firefighters and the community.

Our organization represents 7 affiliated local fire fighter unions and more than 480 affiliated members of the International Association of Fire Fighters (IAFF). We are concerned with providing the safest working environment for our firefighters, and the need to maintain the highest safety standards; a big step towards achieving these goals can be made by banning the use of polybrominated diphenyl ethers (PBDE's).

The elimination of PBDE's is not about compromising fire standards. A fire safety committee comprised of fire professionals will review alternatives identified by the Department of Ecology and the Department of Health as "safer", ensuring that any alternative will meet the same fire standards. This bill is about protecting firefighters and others exposed to these chemicals from the potentially dangerous health implications. Unlike other flame retardants, when PBDE's burn they release dense fumes and black smoke that reduce visibility and a highly corrosive gas known as hydrogen bromide. Many studies involving firefighter's exposure from these chemicals penetrating protective gear have found that firefighters have a much greater risk of contracting cancer, heart and lung disease, and other debilitating diseases. While we clearly support the use of flame retardant chemicals, there are alternatives already in use that do not contain bromine or chlorine making it safer for firefighters than those that contain PBDE's.

Major manufacturing corporations like Dell, Hewlett-Packard, and IKEA have already moved away from the use of PBDE's in their products. These industry leaders are demonstrating that alternative flame retardant technologies for achieving fire safety standards do exist and are readily available for other manufactured products.

The AKPFFA joins the Alaska State Fire Chiefs Association and the IAFF along with numerous health and environmental groups in supporting this important piece of legislation.

Sincerely,

Tom Wescott
President AKPFFA
tomwescott@gmail.com

INTERNATIONAL ASSOCIATION OF FIRE FIGHTERS®

HAROLD A. SCHAITBERGER
General President

THOMAS H. MILLER
General Secretary-Treasurer

March 1, 2010

Mark Drygas, President
Alaska Professional Fire Fighters Association
PO Box 111222
Anchorage, AK 99511-1222

Dear President Drygas:

The International Association of Fire Fighters is concerned about health and safety of our members as well as the health and safety of all our citizens. Accordingly, the IAFF believes that the passage of legislation addressing brominated flame retardants (Polybrominated diphenylethers (PBDEs) including Penta-, Octa-, and Deca-BDEs) is a step in the right direction for improving the health and safety of our fire fighters and the citizens who are exposed to these toxic substances. Accordingly, we support the efforts of the Alaska State Legislature on this issue.

Before going ahead, I believe it is important for you to understand what our organization is and whom we represent at these hearings. The IAFF is an international union affiliated with the AFL-CIO and the Canadian Labour Congress. At the present time, we represent over 296,000 paid professional fire service employees in the United States and Canada. The membership of the IAFF is employed by various parties that include the federal government, states, counties, municipalities, fire districts, airports, industrial manufacturers, and so on.

The profession of fire fighting is and has always been a hazardous occupation. Every year the IAFF reviews the deaths and injuries occurring in the fire service, and each year the hazards of fire fighting continue to exist and display ever-varied forms. Fire fighter line-of-duty fatalities have ranked fire fighting among other publicized hazardous occupations in the private sector, such as mining and construction.

One of the primary applications of PBDE's is as a flame retardant applied onto or in many common household goods (furniture foam; plastic cabinets; computers and small appliance; consumer electronics; wire insulation; and back coatings for draperies and upholstery) to reduce and retard the amount of flame spread. While these chemicals inhibit the formation and spread of flames, they do not completely prevent fires. However, unlike other flame retardants, when PBDE's burn they release dense fumes and black smoke that reduce visibility and a highly corrosive gas known as hydrogen bromide. In addition, PBDE's produce highly toxic byproducts of incomplete combustion. Although use of flame retardants may save lives and property, there have been unintended consequences. There is evidence that PBDEs persist in the environment and accumulate in living organisms, as well as toxicological testing that indicates these chemicals may cause liver toxicity, thyroid toxicity, and

neurodevelopmental toxicity. Many studies involving fire fighters exposed to these and other toxic gases during active fire fighting, overhaul, and long term exposure from these chemicals penetrating protective gear, have found that fire fighters have a much greater risk of contracting cancer, heart and lung disease, and other debilitating diseases. While we support the concept of flame retardant chemicals, there are alternatives that do not contain bromine or chlorine and are much safer for fire fighters than PBDE's.

The IAFF salutes those companies that have stopped using brominated flame retardants (such as Dell, Hewlett-Packard, Ikea and many others) and are now using safer alternative fire retardants. These companies demonstrate that alternative flame-retardant technologies for achieving fire safety standards do exist and are readily available for other manufactured products.

Three years ago, as the result of a successful political action initiative led by the Washington State Council of Fire Fighters, Washington State banned PBDEs effective in 2008, pending a study of alternatives.

Maine became the second U.S. state to ban PBDEs, thanks to an initiative led by the Professional Fire Fighters of Maine. The Maine bill specifically targets deca-BDEs and phases them out by the year 2010. Other States examining the PBDE issue include California, Connecticut, Hawaii, Illinois, Maryland, Michigan, Minnesota, Montana, New York and now Alaska. We are certainly appreciative to the Alaska Professional Fire Fighters Association to also address this important issue with legislation for the safety our fire fighters and our citizens.

Further, the IAFF with the assistance of the National Association of State Fire Marshals (NASFM) worked with the National Institute for Standards and Technology and organized a scientific workshop on the potential health effects to fire fighters of flame retardants in the aftermath of a fire. This meeting was held in September of last year. Technical experts from the government and private sector representing the fire services, health sciences, fire science, environmental sciences, and product manufacturers explored our state of knowledge about and stimulated open discussion by the meeting participants on:

- Approaches to reducing the flammability of building products and the rate of fire spread in buildings;
- The composition and nature of products formed during and after an actual building fire, and how they are affected by the presence of a fire retardant;
- Quantification of the concentration of the fire products;
- Routes of exposure by emergency responders and clean-up crews to hazardous fire products;

- The possible relationship between acute and chronic health effects on emergency responders exposed to fire products, and the type and amount of fire retardant involved in the fire; and

- Knowledge gaps and the identification of a possible future research agenda.

Finally, the IAFF has worked with the manufacturing industry on this issue to further protect our membership. Chemtura, one of the nation's largest manufacturers of Deca-BDE (Decabrom), has been in opposition to the legislation. However, Chemtura and the IAFF have now agreed to jointly support federal legislation that would establish:

- A time table to ban the production or importation of Decabrom for US consumption;

- A time table to ban the sale of finished products containing Decabrom; and

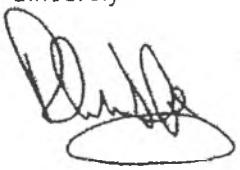
- A mechanism to compel compliance and enforcement of the respective bans.

Due in part to that effort, the US Environmental Protection Agency announced on December 17, 2009, that the two U.S. producers of decabromodiphenyl ether (decaBDE), Albemarle Corporation and Chemtura Corporation, and the largest U.S. importer, ICL Industrial Products, Inc., have committed to end production, importation, and sales of decaBDE for most uses in the United States by December 31, 2012, and to end all uses by the end of 2013. EPA has long been concerned about these fire retardants' impact on human health and the environment. Again, their studies have shown that decaBDE persists in the environment, potentially causes cancer and may impact brain function.

Any measure that takes a potentially dangerous chemical away from the fire fighters' workplace will enhance fire fighter safety, and as a result, public safety. Let me conclude by addressing the perception of public safety and fire fighter and citizen exposures to toxic products. During the last year's holiday shopping season, there was uproar around the world about 90 ppm of the flame retardant antimony that was found in Zhou Zhou toy hamsters, a popular Christmas toy. What didn't make the news is that currently:

- 30,000 ppm of flame retardants is found in nursing pillows, high chairs, and stroller foam;

- 75,000 ppm of antimony is found in TV enclosures; and



- 150,000 ppm of DecaBDE is found in plastic enclosures.

The amount of antimony in the toy hamsters was determined not to migrate out and cause a health problem for children. However the flame retardants in baby products,

furniture and TV enclosures do migrate into dust and as I have discussed can contribute to toxic exposures to citizens and fire fighters. That is why the IAFF and our state and provincial associations, including the Alaska Professional Fire Fighters Association have been addressing these exposures and we are working with federal, state and provincial governments as well as the industry to remove many of these chemicals from common products.

The International Association of Fire Fighters and the Alaska Professional Fire Fighters Association once again appreciate the Alaska State Legislature's proposal to address fire fighter exposures to toxic materials and we support such efforts to protect our members.

Sincerely

Richard M. Duffy
Assistant the General President
Occupational Health, Safety and Medicine

cc: Ricky Walsh, IAFF District Vice President

NATIVE VILLAGE OF SAVOONGA • P.O. BOX 120, SAVOONGA, AK 99769 • PHONE 984-6414 • FAX 984-6027

March 11, 2010

To: Honorable Senators and Representatives of the Alaska Legislature

From: Native Village of Savoonga

Regarding: Support of HB 385 and SB 295

Dear Legislator:

The Native Village of Savoonga is submitting this letter in support of HB 385 and SB 295, legislation to phase out the manufacturing, sale, and distribution of products that contain polybrominated biphenyl ethers (PBDEs). We believe that action on this class of persistent toxic chemicals is necessary to protect the health and well-being of our people and future generations. We must do everything we can to protect the health of our children who are especially vulnerable because exposure to these chemicals can harm their developing brain and their ability to learn. We know that there is also increasing evidence that links exposure to PBDEs with other serious health problems such as permanent developmental disorders, reproductive harm, thyroid disease, and certain types of cancer.

We are aware that PBDEs are transported on wind and ocean currents into our region and are accumulating in the north/Artic at an alarming rate. PBDEs are now found in our traditional foods, including fish, seabird eggs, and marine mammals. Our people are also at risk because of the presence of PBDEs in products that we use in our homes and that we may be experiencing higher exposures because our homes are closed in for a greater part of the year than in lower latitudes. We are concerned that in a recent study of the Arctic Monitoring and Assessment Program, Yupik women from the Yukon-Kuskokwim Delta had the highest levels of PBDEs of any human population of the circumpolar Arctic. It is necessary to take action to prevent exposures to PBDEs and other persistent, bioaccumulative and toxic chemicals.

We urge you to take this opportunity to pass this important piece of legislation in order to protect our health and the health of all Alaskans. Thank you for your attention to our

concerns.

Sincerely, Vera Tommingson Vice President

For Kenneth Kingeekuk

President, IRA Council, Native Village of Savoonga

Subject: support for SB 295

Senator Bettye Davis and Members of the Committee
Senate Health and Social Services Committee
State Capitol
Juneau, AK 99801-1182

March 16, 2010

Dear Chair Davis and Members of the Senate Health and Social Services Committee:

Thank you for taking the opportunity to hear testimony on SB 295, an important bill to phase out octa-, penta-, and decaBDE from certain uses, for which safer, effective alternatives are in widespread, successful use. I am unable to attend the hearing scheduled on Wednesday, March 17, 2010 but appreciate the opportunity to submit written support of this bill. I urge that the Committee support this bill.

My name is Roxanne Chan and I am a Registered Nurse and Licensed Acupuncturist currently residing in Anchorage. Since moving to Alaska in 2005, I have had the opportunity to practice nursing in communities such as Barrow, Nome,Â and Anchorage. I also recently had the opportunity to participate in a biomonitoring study where my blood was tested for PBDEs.

In October of 2009, the report *Hazardous Chemicals in Health Care: A Snapshot of Chemicals in Doctors and Nurses* (

http://www.psr-la.org/files/hazardous-chemicals-in-health-care.pdf). was released documenting the levels of different chemicals of twelve doctors and eight nurses from around the country including myself and a physician from Alaska. My results showed that I have at least 19 different PBDEs in my body including the ones this bill aims to phase out.

As someone who is generally aware of chemical exposure from consumer products, I was alarmed to see my results showing that these chemicals were found in my blood. PBDEs have been linked to a wide range of health problems and it made me wonder if my exposure to chronic low levels due to consumer products could result in adverse health in the future.

As I am sure you are aware, a central tenant of health care isâ€"put simplyâ€"first, do not harm. Allowing chemicals on the market which are correlated to adverse health effects is contrary to this principal. Reducing chemical exposures, through policy measures such as SB 295, is an important primary prevention measure to help improve the health of our state overall.

I hope that you will join me and others in supporting SB 295, an important step in reducing Alaskans exposure to toxic chemicals and creating an environment where people can be healthier.

Sincerely,

~~ã€€~~

Roxanne Chan, RN, LAc

From: Karen McLane [mailto:gusskimo@yahoo.com]
Sent: Saturday, March 20, 2010 9:17 AM
To: Senator_Bettye_Davis@legis.state.ak.us; Senator_Joe_Paskvan@legis.state.ak.us; Senator_Fred_Dyson@legis.state.ak.us; Senator_Johnny_Ellis@legis.state.ak.us; Senator_Joe_Thomas@legis.state.ak.us; Senator_Bill_Wielechowski@legis.state.ak.us
Subject: Senate Bill 295 support

Dear Senators,

I am writing regarding this important piece of legislation that Sen Wielechowski has submitted for approval. I live in Nome and have for most of my life. My family moved here when I was 4 years old and I graduated from Nome Beltz High School in 1984. I continued my education to the Masters level in Nursing Science and am now back in Nome teaching Community Health Aides so we can have medical services in our remotest villages. As health care providers we are acutely aware of the health hazards that toxins have in our environment and how they get there.

We have the highest rates of cancers in Alaska. I have seen many, many thyroid cancers and gastrointestinal types of cancers as well. It is my belief that toxins in our Native people's environment play a part in these high rates as does tobacco use.

SB 295 would require the phase out of polybrominated diphenyl ethers (PBDEs). PBDEs are toxic flame retardant chemicals added to plastics, foam products, and textiles to make them difficult to burn. The EPA is concerned that certain PBDEs are persistent, bioaccumulative, and toxic to both humans and the environment. The American Public Health Association and International Association of Fire Fighters have urged the phase out of PBDEs. Safer and economically viable alternatives are available and are already being used by some manufacturers of computers and other products.

Please think about the affects this particular toxin has on the health of our people and vote to phase it out of use.

Thank you for your help,

Karen McLane FNP-BC

Subject: Senate Bill 295

Senators:

On behalf of Planned Parenthood of the Great Northwest, our thousands of supporters in Alaska and the more than 9,000 women and men we provide services to I am writing to urge you to support and pass SB 295. Providing Alaskans with a safe environment in which to raise their children is paramount to our mission and will help ensure that when families do plan to have children they will be the healthiest possible. With safe alternatives that still provide excellent fire protection there is no reason not to pass this important legislation. PPGNW is a proud member of the Healthy Families Alliance with many other agencies across Alaska, formed to promote fundamental reform to current chemical laws to protect children, workers, communities and the environment. As PPGNW 'goes green' in our health centers we hope that we can help promote cleaner, toxic free environments for everyone in the State. This bill is the first step.

PBDEs are toxic, endocrine-disrupting flame retardant chemicals added to plastics, foam products, and textiles. They leach from household products and we are exposed through foods, indoor air, and household dust.

A brand new study conducted by researchers at Columbia University showed that prenatal exposure to PBDEs at levels commonly found in households is associated with adverse neurodevelopmental effects in young children. The researchers found that "children with higher concentrations of PBDEs in their umbilical cord blood at birth scored lower on tests of mental and physical development between the ages of one and six. Developmental effects were particularly evident at four years of age, when verbal and full IQ scores were reduced 5.5 to 8.0 points for those with the highest prenatal exposures. "

Thank you for hearing this important legislation and please do not hesitate to contact me directly if you would like further information on our position.

Firefighter/Paramedic

Representative Lindsey Holmes
State Capitol
Juneau, AK 99801

February 18, 2011

Dear Representative Holmes;

I am writing to you in support of HB 63, which would ban polybrominated fire retardants in consumer products, while giving the Department of Environmental Conservation additional powers and encouraging cooperation with other states in such activities. Rather than elaborating on the rationale for this legislation, which is effectively presented in your sponsor statement, I'll describe the issue of PBDE toxicity as it relates to the burn injury community. This is in order because the brominated flame retardant (BFR) chemical industry often seeks our support when their products are challenged by such legislation

I support HB 63 in my role as a founding director (in 1985) and emeritus Board member of the Federation of Burn Foundations (FBF), and as a former major committee chair, honoree (twice) and member of the Board of Trustees of the American Burn Association (ABA).

It is understandable that anyone who treats severely burned patients or works closely with both care providers and survivors, as I have for 35 years, would be inclined to support any action which might save a life or prevent such an injury. That was my own position until four years ago, when I first became aware of the increasing public health and environmental threat posed by the accumulating presence of toxic frame retardant chemicals in the environment and human tissue, --along with the lack of any data supporting their effectiveness. Many of us in the ABA share such concerns,

I have also felt a special responsibility to monitor fire and burn injury statistics, as the ABA member trusted with updating the Association's annual burn incidence fact sheet. In tracking the steady decline in fire and burn death and injury over the past 30 years, I have noted the many reasons for those trends. These include numerous safety efforts, such as smoke alarms, more public education, stronger building codes and safer designs of cigarettes, cigarette lighters and candles. Unlike PBDEs, none of these influences on fire casualties have negative side effects, and they have had a far greater positive impact than any that can be claimed for these chemicals.

Other recent changes in society which are not motivated by fire safety have also helped reduce fire casualties. These include the major decline in smoking, the transition in cooking from the stove to the microwave and our growing reliance on restaurants and fast food outlets.

For these reasons, I strongly encourage support for HB 63 in this session of your legislature.

Sincerely,

Peter A. Brigham, MSW

Bill to ban PBDEs would protect Alaskans

COMPASS: ***Other points of view***

By FRANK VON HIPPEL

(02/20/11 17:16:56)

The Alaska State Legislature is considering a bill backed by Sen. Bill Wielechowski and Rep. Lindsay Holmes that would ban the import of furniture and electronics containing a class of toxic flame retardants known as PBDEs (polybrominated diphenyl ethers).

PBDEs are man-made chemicals produced for the manufacture of fire-resistant products. As products break down or release PBDEs into the atmosphere, the PBDEs find their way into the environment. PBDEs are highly persistent; they may remain unchanged for many decades or break down into daughter compounds that are also toxic.

Unfortunately, they are fat soluble and bioaccumulate in the fatty tissues of exposed animals. As these animals are consumed by predators, the PBDEs biomagnify up the food web, resulting in the highest levels in the top carnivores. Many of these top carnivores, such as fish and marine mammals, are important subsistence foods in Alaska.

People are exposed to PBDEs in multiple ways, including through the ingestion of fatty foods as well as contact with household dust. PBDEs have been found in human breast milk and in the blood of mothers and their babies. A Centers for Disease Control and Prevention study found that over 93% of Americans had detectable levels of PBDEs in their bodies, some at levels that are associated with health problems in laboratory animals. PBDEs have been found to disrupt the hormone system of numerous animals and have widespread effects on neurodevelopment and reproductive development.

The laboratory animals chosen for these studies have proven to be excellent models for human medical research time and time again. The hormone system of other vertebrates is almost exactly the same as the hormone system of humans. Therefore, disruption of hormone pathways in laboratory animals indicates that PBDEs likely cause similar developmental and health effects in humans.

PBDEs interfere with thyroid hormone, which regulates many aspects of development, and male and female sex steroids, which regulate sexual development and behavior. For example, PBDE exposure may cause undescended testes in newborn boys and reduced testosterone and sperm counts in men. Some PBDEs may be carcinogens. Although we do not fully understand the mechanisms by which PBDEs disrupt multiple hormone pathways, the evidence is sufficient to take a prudent approach and ban their import to Alaska where feasible.

Washington became the first state to ban all forms of PBDEs in 2007, with key support coming from firefighter associations. Firefighters advocated against PBDEs because when products containing PBDEs burn, they release highly toxic dioxins and furans. Associations of nurses and doctors also supported the legislation.

Maine, Oregon, Vermont, Rhode Island, Illinois and Massachusetts also have banned some or all of the PBDEs, and similar legislation is under consideration in other states. Similar bans are in effect in Canada and most European nations.

The Washington law required that safer and technically feasible alternatives to PBDEs be identified before the ban would go into effect. These alternatives, which meet fire-safety standards, were identified by Washington state agencies in December 2008; the identification of alternative flame

retardants allowed restrictions on the use of PBDEs in electrical products and furniture to take effect Jan. 1, 2011.

Many companies have taken a proactive approach in phasing out PBDE use. For example, Intel, IBM and Ericsson no longer produce products with PBDEs, and Hewlett-Packard, Sony, Motorola, Panasonic, NEC, Samsung and Toshiba are all working to phase out PBDEs.

Alaskans experience unusual levels of PBDE exposure for three reasons: The Arctic is a global sink for persistent pollutants that settle out of the atmosphere in cold temperatures; Alaskans who rely on a subsistence diet eat fish and marine mammals that accumulate PBDEs because of their position at the top of the food web; and we spend most of the winter sealed in our homes, where we are exposed to household dust containing PBDEs.

Therefore, Alaska has extraordinary cause to ban the importation of products containing these chemicals. We cannot control the atmospheric deposition of PBDEs into the Arctic or their delivery by ocean currents, but we can control their importation in consumer products.

Frank von Hippel is a professor of biological sciences at the University of Alaska Anchorage.

OCEANA | Protecting The World's Oceans

175 South Franklin Street, Suite 418 +1.907.586.4050
Juneau, AK 99801 USA www.oceana.org

April 6, 2011

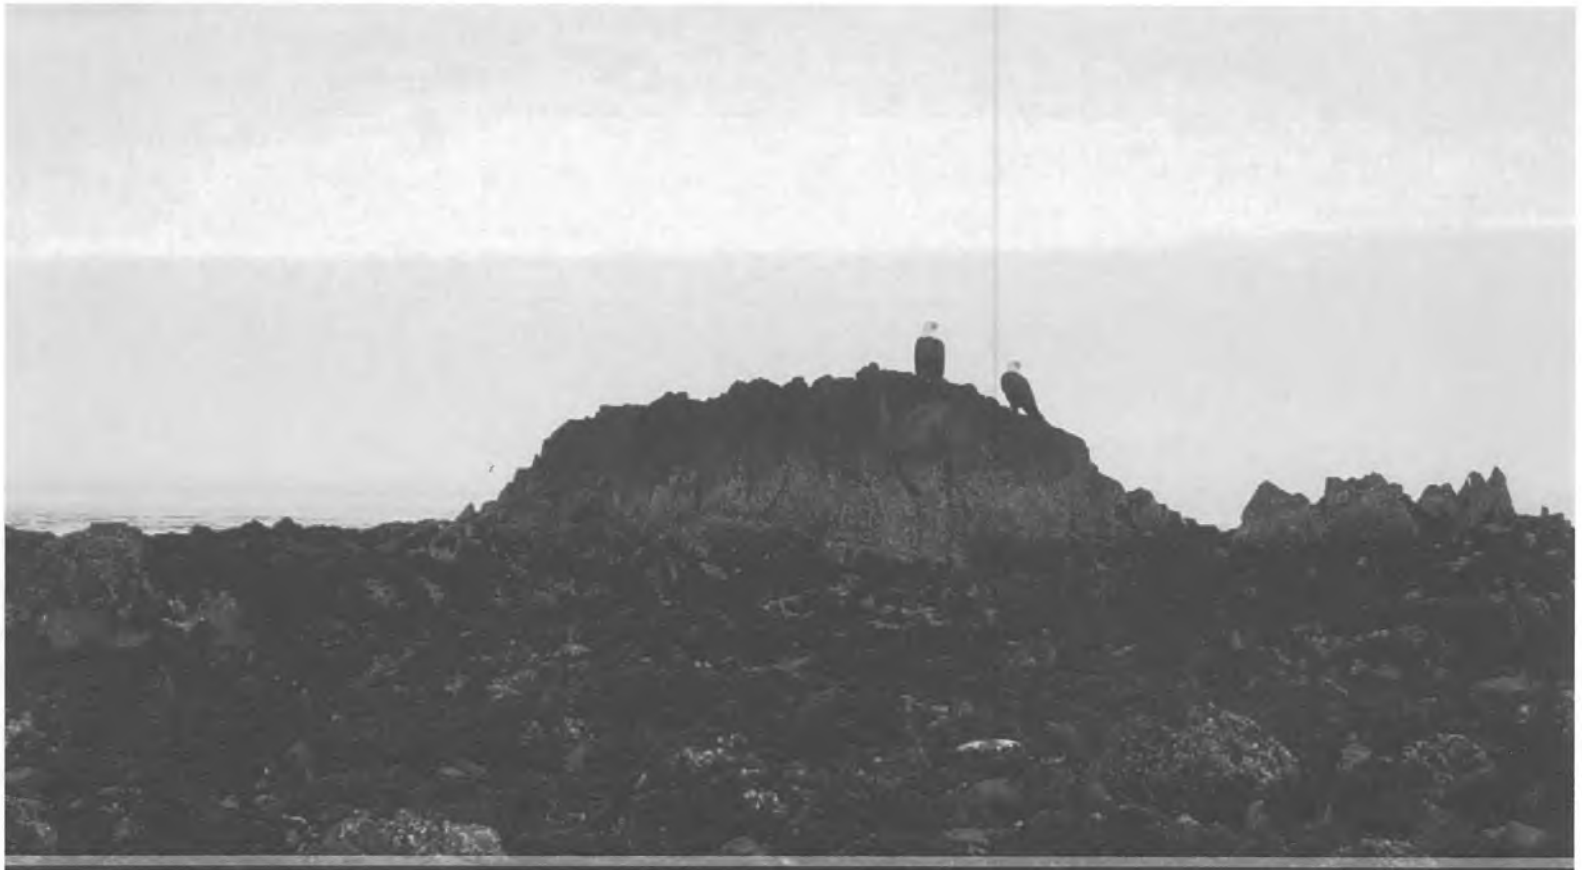
Senator Lyman Hoffman
Chairman, Senate Finance Committee
State Capitol, Room 532
Juneau, AK 99801

Dear Chairman Hoffman and Committee Members:

We strongly urge you to pass Senate Bill 27, an act relating to the manufacture, sale, and distribution of flame retardants and bioaccumulative toxic chemicals, out of the Senate Finance Committee. This legislation will help protect the health and safety of Alaskans and our precious marine resources by curbing the spread of Polybromodiphenyl ethers (PBDEs).

PBDEs fall into a class of pollutants known as persistent organic pollutants (POPs) that includes chemicals such as PCBs and DDT. POPs have gained widespread recognition in the past few decades for their toxicity and for the health risks they pose to both humans and wildlife. PBDEs, like many other POPs, are dangerous for three important reasons: they are able to travel long distances via atmospheric and ocean currents; once released into the environment they are extremely difficult, if not impossible, to remove; and they bioaccumulate, or increase in concentration, as they move up the food web.

Research conducted by the National Oceanic and Atmospheric Administration (NOAA) in 2009 found that PBDEs are prevalent on nearly every coast line in the United States. PBDEs have been found in sediments and soils as well fish, shellfish, seals, sea lions, whales, porpoises, polar bears, and numerous land and sea birds. (NOAA, 2009) Several studies have documented high concentrations of PBDEs in humans in the United States, and over the last three decades, those concentrations seem to be increasing. NOAA's research found that those concentrations were anywhere from 10 to 100 times higher than concentrations found in Europe and Asia. (NOAA, 2009)



In Alaska, where many of us consume large quantities of fish and shellfish, and in some regions high-fat marine mammals, we are particularly at risk for exposure not only through the household goods in our homes, but also through the foods that we eat. PBDEs are a great cause for concern for Alaskans who rely heavily on fish and other marine animals to supplement and often sustain our diets,.

In order to protect the health and safety of Alaskans, as well as our valuable marine resources, the Senate Finance Committee should pass SB 27.

Sincerely,

Susan Murray
Senior Director, Pacific
Oceana

Background

NOAA's Mussel Watch Program was designed to monitor the status and trends of chemical contamination of U.S. coastal waters, including the Great Lakes. The Program began in 1986 and is one of the longest running, continuous coastal monitoring programs that is national in scope. NOAA established Mussel Watch in response to a legislative mandate under Section 202 of Title II of the Marine Protection, Research and Sanctuaries Act (MPRSA) (33 USC 1442). In addition to monitoring contaminants throughout the Nation's coastal shores, Mussel Watch stores samples in a specimen bank so that trends can be determined retrospectively for new and emerging contaminants of concern.

In recent years, flame retardant chemicals, known as polybrominated diphenyl ethers (PBDEs), have generated international concern over their widespread distribution in the environment, their potential to bioaccumulate in humans and wildlife, and concern for suspected adverse human health effects. The Mussel Watch Program, with additional funding provided by NOAA's Oceans and Human Health Initiative, conducted a study of PBDEs in bivalve tissues and sediments.

This report, which represents the first national assessment of PBDEs in the U.S. coastal zone, shows that they are widely distributed. PBDE concentrations in both sediment and bivalve tissue correlate with human population density along the U.S. coastline. The national and watershed perspectives given in this report are intended to support research, local monitoring, resource management, and policy decisions concerning these contaminants.

Acknowledgements

The Mussel Watch Team would like to thank those who through their hard work made this document possible. As a result of their efforts, this report has been greatly enhanced.

Mussel Watch Program Background

- Approximately 300 active monitoring sites are located in the continental U.S., Alaska, Puerto Rico, and Hawaii.
- Stations are 10 to 100 km apart along the entire U.S. coastline.
- Approximately 150 contaminants are monitored in resident bivalve populations including: polycyclic aromatic hydrocarbons (69), polychlorinated biphenyls (40), organotins (4), metals and metalloids (15), and historic and contemporary use pesticides and selected transformation products (20).
- Special assessments are used to determine the environmental impacts of new contaminants, extreme events, and oil spills.

Program Background

NOAA's Mussel Watch Program monitors the status and trends of chemical contamination of U.S. coastal waters. The Program began in 1986 and is one of the longest running, continuous coastal monitoring programs that is national in scope. The Program is based on annual collection and analysis of oysters and mussels. These bivalves are stationary organisms that filter particles from water; thus, contaminant levels in their tissue are a good indicator of local contamination. Mussel Watch data are useful for characterizing the environmental impact of new and emerging contaminants, measuring effects of extreme events (hurricanes and oil spills), and for assessing the effectiveness of legislation, management decisions, and remediation of coastal contamination. As a result of monitoring all major estuaries for chemical contamination, Mussel Watch results can be used to identify geographic areas of concern and potential human exposures to elevated levels in seafood.

NOAA established Mussel Watch in response to a legislative mandate under Section 202 of Title II of the Marine Protection, Research and Sanctuaries Act (MPRSA) (33 USC 1442), which called on the Secretary of Commerce to, among other activities, initiate a continuous monitoring program "to assess the health of the marine environment, including monitoring of contaminant levels in biota, sediment and the water column." As part of the NOAA Authorization Act of 1992, the overall approach and activities of NOAA's National Status and Trends Program (NS&T), including Mussel Watch, were codified under provisions of the National Coastal Monitoring Act (Title V of the MPRSA).

In 1986, the inaugural year of the Mussel Watch Program, 145 sites were sampled. Today, Mussel Watch is comprised of approximately 300 monitoring sites, where about 150 chemical contaminants, chosen through consultation with experts and scientists from academia and government, are measured. Many of these contaminants are listed as Environmental Protection Agency (EPA) Priority Pollutants (Keith and Teillard, 1979). Legislation has been passed to regulate most of the organic contaminants analyzed by the Mussel Watch Program

Program Goal

To support ecosystem-based management through an integrated nationwide program of environmental monitoring, assessment, and research to describe the status and trends of contaminants in our Nation's estuaries and coasts.

(http://NSandT.noaa.gov). The majority are toxic to aquatic organisms, and some are taken up and stored in animal tissues with the potential to be transferred through food webs to humans.

This report utilizes Mussel Watch PBDE measurements of mussels, oysters, and sediment to provide a summary of national PBDE levels, and is intended for use by resource managers, policy makers, scientists, legislators, and concerned citizens. The bivalve mollusks measured included species of the genus *Mytilus* (blue mussels), species of the genus *Dreissena* (zebra mussels), and species of the genus *Crassostrea* (oyster). Some of these species are edible, but no PBDE threshold levels for the protection of human health have been promulgated by the U.S. Food and Drug Administration. This report compares the status of PBDEs at the national level to those found locally or regionally. Comparisons can be used to determine if the concentrations are high relative to the rest of the Nation. Site specific measurements can be found in Appendix 1. More detailed program information can be accessed at http://NSandT.noaa.gov.

Highlight

Many Mussel Watch sites are coincident with the 1976-1978 EPA Mussel Watch sites.

Program staff consulted with state officials, academic professionals and others when sites were established.

Some sites are located in or near NOAA-managed areas (National Estuarine Research Reserves, National Marine Sanctuaries).

Sites were selected in shellfish beds large enough for repeated sampling.

Samples are only collected from natural substrates; caged mussels are not used.

▼ Chemical Description

- Production of PBDEs in the U.S. began in the 1970s and peaked in the late 1990s.
- PBDEs are ubiquitous in the U.S. coastal environment.
- In the U.S., PBDE levels in humans have been rising over the past 30 years and are generally 10-100 times higher than levels measured in Europe and Asia. Current concentrations in humans may be leveling off or decreasing.

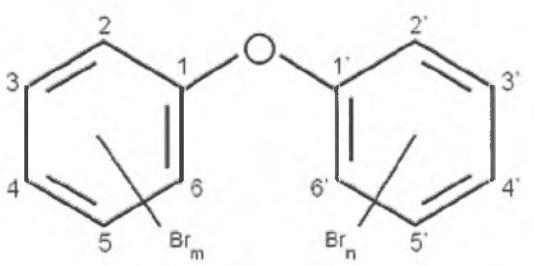

Figure 1. Chemical structure of polybrominated diphenyl ethers.

Polybrominated diphenyl ethers are persistent man-made aromatic chemicals composed of two phenyl rings linked by an oxygen bridge (ether linkage). Bromine atoms can replace up to ten hydrogen atoms on the phenyl rings (Figure 1). Theoretically, 209 unique PBDE structures (congeners) are possible. Congeners with the same number of bromine atoms are referred to as a homologue, and thus, there are ten homologues ranging from mono- to decaBDE. For example, a PBDE with ten bromines, is called decaBDE; five bromines is a pentaBDE (Tables 1 and 2).

The chemical structure of PBDEs are similar to that of polychlorinated biphenyls (PCBs), another class of globally distributed environmental contaminants that the U.S. banned from production in 1976 (ATSDR, 2001). PBDEs have been referred to as the new PCBs. Consumer product manufacturers have begun using alternative flame retardants; but, in the short term, the current load of PBDEs in buildings, vehicles, and consumer products assures continued release and exposure for years to come.

Manufacture and Regulation

The industrial production of brominated diphenyl ethers primarily yields a mixture of tetra, penta, hexa, hepta, octa, nona, and deca homologues in various percentages (Siddiqi et al., 2003). Three generic commercial formulations: Penta, Octa, and DecaBDE, were produced (ATSDR, 2004) under a variety of product names (e.g., DE-71, Bromkal 70-5DE, DE-79, Bromkal 790-8DE, Saytex 102E, and Bromkal 82-0DE). Commercial formulations are mixtures of specific homologues. The relative homologue composition of these three generic formulations is shown in Table 1. The predominant congeners found in the environment are the main congeners found in commercial mixtures.

Flame retardants save lives by inhibiting ignition and subsequent burning of consumer products. Laws and regulations require that consumer products meet minimum fire safety standards. Hence, human exposure to products containing flame retardant chemicals is practically unavoidable.

Production of PBDEs in the U.S. began in the 1970s and peaked in late 1990s (Hardy, 2002a). Global demand for brominated flame retardants doubled during the 1990s (Alaee et al., 2003). In 2004, the European Union (EU) banned the use of PentaBDE and OctaBDE commercial mixtures (BSEF, 2006) and the U.S. chemical manufacturers voluntarily ceased production. Subsequently, the EU banned DecaBDE in 2008, but it continues to be produced and used in the U.S.

Commercial PentaBDE was used mainly in polyurethane foam (mattresses and padding beneath carpets and furniture). Commercial OctaBDE was predominantly used in casings for electronic products (computers, monitors, plastics). Commercial PentaBDE, OctaBDE, and DecaBDE mixtures were also used in nylon, textiles, and adhesives. Today, commercial DecaBDE is used primarily in TV casings.

Chemical Description

Table 1. Percent composition of commercial PBDE flame retardant mixtures. Commercial products contain more than one homologue in a specific range (WHO, 1994).

Exposure and Toxicity

Human exposure to PBDEs occurs through inhalation of contaminated household (Jones-Otazo et al., 2005) and workplace dust (Julander et al., 2005), and eating contaminated food (Schecter et al., 2006; Hale et al., 2001; Hayward et al., 2007).

Women in the U.S. were found to have some of the highest levels of PBDEs in breast milk (Schecter et al., 2003; Norén and Meronyté, 2000), blood (Schecter et al., 2005; Sjödin et al., 2008), and body fat (Johnson-Restrepo et al., 2005a; She et al., 2002). Levels in the U.S. have been rising over the past 30 years, but appear to be leveling off or decreasing (Sjödin et al., 2008). Generally, in the U.S., levels in human samples are 10-100 fold higher than levels measured in Europe, Asia, and New Zealand. Recent evidence suggests that PBDEs can be transferred from mother to fetus and from breast milk to infants (Hooper et al., 2000).

Occupational exposure may be important for some workers. The highest reported concentrations of PBDEs in human blood serum were measured in workers at an electronic waste dismantling facility in China (Qu et al., 2007).

There is a growing body of research describing the toxicology of PBDEs in animals and humans. Thorough reviews on the subject include Darnerud et al., 2001; Hardy, 2002b; and Darnerud, 2003. Toxicological studies in animals indicate that liver, thyroid, and neurobehavioral development may be impaired by these contaminants. The human health effects from exposure to PBDEs are not well documented; however, based on the structural similarity of PBDEs to PCBs, there is reason for concern. The most sensitive populations are likely to be pregnant women, developing fetuses, and infants (McDonald, 2002). Human prenatal and neonatal exposure to PBDEs is being carefully studied

and a recent report suggests an association of reduced thyroxine levels with prenatal exposure to PBDEs and PCBs (Herbstman et al., 2008).

Environmental Fate and Transport

PBDEs are widely distributed in marine sediments (Wurl and Obbard, 2005; Oros et al., 2005; Allchin et al., 1999) and biota (Environment Canada, 2006; Hites, 2004; de Wit et al., 2004). The major sources of PBDEs to the environment are homes and household dust (Stapleton et al., 2005; Jones-Otazo et al., 2005; Butt et al., 2004), releases during the manufacturing and use of commercial products, and releases during the recycling and disposal of products containing PBDEs. Subsequently, PBDEs may be distributed throughout the environment by atmospheric transport (Stranderg et al., 2001), runoff, industrial point sources, and sewage outflows (Litten et al., 2003). PBDEs are detected in remote places, such as the Arctic (Ikonomou et al., 2002; de Wit et al., 2004), representing further evidence of atmospheric transport and deposition. Other diffuse PBDE pathways include leaching from aging consumer products, incineration of municipal waste, land application of sewage sludge as biosolids, industrial discharge, and accidental spills (EPA, 2008; Hale et al., 2001; ATSDR, 2004).

Relatively high concentrations of PBDEs have been detected in sediments and biota in areas close to industrial sources (Shen et al., 2006; Liu et al., 2005). At high temperatures, PBDEs may form a volatile mixture of polybrominated dibenzodioxins (PBDD) and polybrominated dibenzofurans (PBDF), making the incineration of municipal waste containing plastic and upholstery a source of atmospheric PBDEs, dioxins, and furans (ATSDR, 2004).

PBDEs have low vapor pressures, very low water solubility, and high octanol-water partition coefficients (log K_{ow}) values (Environment Canada, 2006); therefore, they behave like many other persistent organic contaminants that accumulate in biota and sediment. In the environment they are more likely to be associated with particles than dissolved in the water.

In addition to being found in fish (Johnson and Olson, 2001; Hites et al., 2004) and shellfish (Hoenicke et al., 2007; Booij et al., 2002; Oros et al., 2005), PBDEs have been measured in foxes, grizzly bears (Christensen et al., 2005), seals (Ikonomou et al., 2008; Ikonomou et al., 2002), sea lions (Stapleton et al., 2006), polar bears (Verreault et al., 2005; Kannan et al., 2005), porpoises, whales (Weijs et al., 2009; Ross, 2006), land and sea birds (Lindberg et al., 2004; McKinney et al., 2006; Voorspoels et al., 2006; Jaspers et al., 2005; Verreault et al., 2005; Bustnes et al., 2008), and bird eggs (Herzke et al., 2005; Braune et al., 2007).

Since the 1970s, levels of PBDEs in sediments and wildlife, including aquatic species, have increased substantially (Ikonomou et al., 2002). Studies of PBDEs in marine foodwebs (Wan et al., 2008; Xia et al., 2008; Bragigand et al., 2006; Johnston-Restrepo et al., 2005a; Haglund et al., 1997) provide evidence of biomagnification. PBDEs in the environment may be transformed by debromination processes (removal of bromine atoms), including photo-transformation during exposure to sunlight (Stapleton and Dodder, 2008).

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB030

Analysis

This bill amends AS 12.36 by adding a new section regarding the return of property in the custody of a law enforcement agency. This legislation specifies that the owner of property in the custody of a law enforcement agency may request that the agency return the property. Further, that within 10 days of the request and following reasonable notice to all involved parties, a request for a court hearing shall be made.

Currently it is the standard practice of the department to return seized personal property as soon as possible. This legislation will not have a significant impact on the workload of the department.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 30

Analysis

SB 30 would adopt a procedure for the owner of property to request the Office of Victims' Rights to investigate whether property in the custody of law enforcement should be returned to them. The Victims' Advocate may, after an investigation, request that a hearing about the property be held. This note is indeterminate because the department may be required to represent law enforcement agencies at the hearings proposed in the bill. At this time we are not sure how many of these proceedings will occur. The issues raised may be complex, particularly if defense counsel opposes the return.

SENATOR FRED DYSON

SPONSOR STATEMENT

CS SB 30 (2d JUD)

An Act providing for the release of certain property in the custody of a law enforcement agency to a crime victim under certain conditions and relating to requests for that release by the Office of Victims' Rights

CS SB 30 (2d JUD) introduces within the Alaska Code of Criminal Procedure a process for victims of property crime to petition the court for relief in recovering their property held as evidence.

Too often victims of theft and robbery are victimized a second time by bureaucracy. This is particularly true in cases of property crimes where demonstrable loss occurs to the victim's person or business as a result of property being held for a protracted period of time by a law enforcement agency, usually at the direction of prosecution, defense counsel and/or other interested parties.

The law as currently written, provides discretionary authority to the prosecution for release of property, but does not clearly provide a right of hearing for a property owner to directly petition the court in those circumstances when crime victims, prosecution and defense cannot come to agreement on return of property to the crime victim.

Victims of property theft often face the added burden of replacing stolen property. Small business owners who suffer property loss may face bankruptcy if the loss results in the inability to consummate a sale, continue their business operations, or the stolen property is uninsured or underinsured.

Property recovered by a law enforcement agency may be held as evidence for a protracted period of time. Property owners deserve protections in the law to ensure their property is held as evidence only as long as necessary for the prosecution and defense to physically retain the item, without jeopardizing the case.

CS SB 30 (2d JUD) will provide property owners in the Alaska Code of Criminal Procedure, a clearly identifiable process to petition the court through the Office of Victims' Rights for the recovery of their property in those circumstances where they are otherwise not able to reach agreement with interested parties on the return of property.

SECTION ANALYSIS – CS SB30 (2d JUD)

Section 1

1. Provides that a crime victim who is the owner of property in the custody of a law enforcement agency may request the agency for the return of their property through the Office of Victims' Rights (OVR).
2. OVR will file the request with the agency after conducting an investigation into the request to make an initial determination if the crime victim is entitled to return of the property being claimed under the requirements of proposed 12.36.070(c): the crime victim provides satisfactory proof of ownership, and the party that objects to the return of the property fails to prove that the property must be retained by the agency for evidentiary purposes.
3. Once OVR makes such a determination, they will request on behalf of the crime victim that the agency return the property.
4. Within 10 days after receipt of request and following reasonable notice to prosecution, defense and other interested parties, the agency will request a hearing before the court to determine if the property shall be released to the crime victim.
5. The court of jurisdiction is identified in cases involving a pending criminal case and in situations where no criminal case is pending.
6. Establishes the burden of proof to be a *preponderance of the evidence,* for both the crime victim showing ownership and the objecting party proving the property must be retained by the agency.
7. Establishes that if the court orders the return of the property to the crime victim, the court may impose reasonable conditions on the return to maintain the evidentiary integrity of the property.
8. Identifies the term *crime victim* as having the meaning given to *victim* in AS 12.55.185, the Code of Criminal Procedure.

Section 2

1. Establishes within Title 24, Chapter 65 *Office of Victims' Rights* the authority of OVR to request a law enforcement agency for return of property on behalf of a crime victim claiming property after conducting an investigation as proscribed in AS 12.36.070(c).
2. Provides that the victims' advocate may use any of the powers granted to the advocate under Title 24, Chapter 65.

ALASKA STATE SENATE

SENATOR FRED DYSON

CS SB30(2d JUD) - EXPLANATION OF CHANGES

The substantive changes to SB 30 since introduction on 01/19/11 are as follows:

1. The use of the term *owner* was changed to *crime victim* out of a concern that bill language would allow for defendants to misuse the *return of property hearing* process, and detract from the intention of the bill, to promote victims' rights by returning property to crime victims.
2. The introduction of the Office of Victims' Rights to the return of property process was done to alleviate a concern that bill language may inadvertently open the door to a significant number of requests for return of property hearings from crime victims, and that a required intermediary step be considered to vet the requests to make a pre-determination concerning eligibility of crime victims to have their property returned to them.
3. Original bill language permitted property owners to directly request from a law enforcement agency the return of their property. For reasons mentioned in #2, the current version provides that the Office of Victims' Rights files a request with the law enforcement agency on behalf of the crime victim for return of property.
4. Original bill language required the law enforcement agency to prove that the agency or another interested party is authorized to retain possession of the property. Judiciary committee members and the Office of Public Defender recommended that *the party that objects to the return of the property* should be the entity with the burden of proof that the property should be retained and not returned to the crime victim.
5. Dept of Law requested the following changes in cooperation with the bill sponsor –
    a. Clarification of court jurisdiction when the property in question is part of a criminal case, and when it is not part of a criminal case.
    b. An evidentiary standard of proof be established to guide the Court with decisions of whether the burden of proof is met by the parties. The standard is *a preponderance of the evidence.*
    c. The party who objects to the return of property to a crime victim shall state the reason on the record.
    d. Clarifies the *reasonable conditions* the court may impose on the return of property to crime victims to maintain the evidentiary integrity of the property.
6. The term *crime victim* is defined as the meaning given to *victim* in AS 12.55.185, Alaska Code of Criminal Procedure.
7. Consistent with the changes identified in #2, the current version of SB 30 establishes within Title 24, Chapter 65 – Office of Victims' Rights, the authority of OVR to request a law enforcement agency for return of property on behalf of a crime victim.

SENATOR FRED DYSON

CS SB 30 (2d JUD) NOTES

1. Alaska Statutes - Title 12 *Code of Criminal Procedure*, Chapter 36 *Disposition of Recovered or Seized Property*, Sec. 20 *Return of Property*, provides the legal process for return of property.

2. 12.36.020(a) identifies those circumstances when a law enforcement agency may **not** return property to an owner.

3. 12.36.020(b) provides for the return of property to owners *at the discretion of the prosecuting attorney* where photographs are used as evidence in place of the property, stating *the prosecuting attorney **may** release the property to the owner upon presentation of satisfactory proof of ownership.*

4. 12.36.020(c) states that wrongfully taken or damaged property that is *not* properly photographed and authenticated under 12.45.086 *Photographic evidence of property wrongfully taken or damaged,* and used as evidence in a criminal or children's court proceeding, is to be returned to the owner *within 60 days after the final disposition of the case.*

5. 12.36.020(c) is problematic for two reasons. First, it is the crime victim who suffers unjustly if the property was not properly photographed and authenticated; and second, final disposition of the case may be protracted for a long period of time. The return of property to its rightful owner may be hindered by concerns of prosecution, defense, and/or other interested parties.

6. 12.45.086 *Photographic evidence of property wrongfully taken or damaged,* defines the process for admissibility of photographs as evidence in criminal and children's court proceedings. This section states that properly submitted photographs are to be regarded to the same extent as if the property itself was introduced as evidence. This sounds good, but in practice falls short of its intent. 12.45.086(c) seems to recognize this problem by singling out only the theft of commercial fishing gear as being property that *shall be returned to the owner as soon as possible*. Nearly all thefts of property from businesses should be returned to the rightful owners ASAP.

7. CS SB 30 (2d JUD) seeks to restore victims to a pre-offense condition by *providing directly to the crime victim the right of a court hearing to recover possession of the crime victim's property*, and requiring that the party who objects to the return of the property prove to the court that their interest in the property overrides the crime victim's interest in having it returned.

8. CS SB 30 (2d JUD) provides that property owners who are *crime victims* must make a request for hearing through the Office of Victims' Rights (OVR) whose purpose is to vet the requests to determine if certain conditions are met in the law to allow for an owner claiming property to request a hearing.

9. 12.36.090 *Definitions* of "law enforcement agency" includes the Office of District Attorney, Department of Law, as this is a public agency having one of its principal functions being the enforcement of the criminal law.

Re: SB 30 in support

Senator

We write you in support of SB-30 (An Act providing for the release of property in the custody of a law enforcement agency to the owner under certain conditions)

We agree to the supporting of SB-30 as representatives of the ASHBA (Alaska State Home Building Association), with a membership of 700 plus professionals operating and working in the construction industry. The organization views this form of legislation as beneficial to those individuals, or companies that are violated through theft, or the court systems as a means to acquire their property, and be able to utilize while the situation is resolved through the legal process.

This legislation will benefit all parties living in the state of Alaska, and will surly be well received through its passing.

If you are in need of any members being available to telephonically testify, or require any additional assistance please do not hesitate to ask.

Thank you for sponsoring SB-30

RE Senate Bill 30

Dear Senator Dyson,

On behalf of the National Federation of Independent Business/Alaska, I wish to express our support for Senate Bill 30. The National Federation of Independent Business is the largest small-business advocacy group in Alaska.

SB 30 would provide a mechanism for businesses that have had property stolen to gain assistance in recovering the items that are often critical to the continuation of a person's business.

While often there is not a problem retrieving property from authorities that are prosecuting a case, there are times when small businesses find that they are not considered as important as other issues. SB 30 provides the person assistance from the office of victims' rights to help recover stolen property being held by a law enforcement agency.

While the problem of retrieving stolen property is not always a problem, small businesses have found themselves fighting the government who has bottomless resources. The legal cost and loss of business are a very heavy burden to small businesses.

We believe that CSSB 30 is a reasonable solution to a potentially devastating problem for small businesses.

Sincerely yours,

Dennis L. DeWitt
Alaska State Director

RE: Follow-up Questions on SB34

Thank you for the opportunity to respond to questions that arose during the March 10th meeting of the Senate Finance Committee during the hearing on SB34.

Can loans made under SB34 be stacked?
Yes. SB34 refers to loans in the plural, so multiple loans up to the maximum loan amount are allowable as long as the borrower meets the additional collateral requirements to secure any subsequent loans.

Are loans under SB34 recourse or non-recourse loans?
All of the loans issued by the Division are recourse loans. However, the Division works diligently with borrowers to avoid foreclosure. The Collections staff is very adept at achieving work outs that satisfy the loan requirements and leave the borrower whole.

What would be considered acceptable collateral and how has this been determined in the past?
Page 4, line 11 is standard language with regard to collateral requirements. Collateral is determined to be acceptable if it is in acceptable condition, has a determined market value, lien perfection is achievable, and there are no limiting factors. Limiting factors could be considerations regarding its location, possible environmental concerns, flood plain status, and similar concerns. The most common types of collateral accepted include real estate, aircraft, vessels, equipment, gear and inventory. The Division assigns a ratio to mitigate any of the limitation or risk factors associated with a particular type of collateral. Inventory is generally assigned a very low ratio of 25%, if it is accepted at all. The nature of the inventory will be taken into consideration. All of the foregoing is part of the due diligence that the lending staff regularly undertakes to determine if/how a loan application should advance to a credit decision.

Why was the loan fund summary discontinued and what was does the department need to continue this service?
In the past, this information was provided as part of a Division budget overview. The budget overview presentation was revised and submitted on a Department-wide basis. The Division will provide an update for yearend FY10 and year-to-date for FY11 no later than March 21. I believe the committee has a summary spreadsheet that provides some, but not all of this historical information.

Additional Information Based on Comments

Typical Default Rates
The Division has achieved an outstanding track record with regard to minimizing loan defaults and delinquencies. With regard to comparative default rates, a number of sources cite 4% as an average (Businessweek, WSJ). The SBA microloan program has a reported a 5 to 12 % rate, depending on the state. In Wisconsin, the average default rate was 9.26% and the median default rate was 5.58% (multiple loans administered by many agencies and NGOs). According to the Micro Capital Monitor, the 2006 average was 4.76% for U.S. micro lending. It is, perhaps, worth noting that according to 13 CFR 307.16 (d) an EDA funded RLF may have a default rate of 20% before a fund review is conducted and no specific action is mandated until the rate meets or exceeds 30%.

Clean-up of Inactive Loan Funds
The Division has historically continued to carry loan funds on its reports if there is any likelihood of a payment or other transaction. Loan Servicing reports include funds for which no active lending has occurred for many years, but some payment or interagency transaction may have occurred in the prior year. We welcome the discussion of streamlining this presentation of loan fund activity to focus on only those funds where active lending is occurring.

If I can provide any additional information, please let me know.

Re: Letter of support for SB34 "An Act establishing the Alaska small business revolving loan fund; relating to the fund and loans from the fund; and providing for an effective date."

Dear Senator Wielechowski,

Anchorage Downtown Partnership, Ltd. is an organization that represents over 900 business and property owners in downtown Anchorage, Alaska. Our mission is to increase cleanliness, occupancy rates, investment values and lease income; to decrease crime; to stimulate economic development; and improve the quality of life in downtown Anchorage.

We are writing to you today to express our support for SB34 "An Act establishing the Alaska small business revolving loan fund; relating to the fund and loans from the fund; and providing for an effective date."

A small business revolving loan fund – or microloan fund – is precisely what many of our stakeholders have been searching for, particularly over the past few years. Despite the state of the national economy, the Anchorage economy has fared quite well and many of our member businesses actually experienced growth in demand for their goods or services, growth that many were unable to meet because they lacked the capital to ramp up the operations.

Examples among our stakeholders include: an architecture firm whose business grew during the past few years as federal, state, and local capital projects came to fruition, a hotel owner who was poised to renovate and upgrade his small hotel to meet the growing demand for "boutique" hotels. In both cases, these businesses were poised to grow to meet the demands for their particular product or service. And in both cases, they were unable to secure the capital needed to grow their businesses.

Creating a microloan fund to be administered by the Department of Commerce, Community, and Economic Development will benefit Alaska small businesses tremendously, including many of our downtown stakeholders. Providing faster access to capital for growing or expanding businesses that have been unable to secure loans through traditional means is precisely what small businesses need.

Thank you for bringing this bill forward. On behalf of our organization and the 900+ business and property owners we represent, we strongly support SB34 and look forward to its passage.

Sincerely,

Christopher M. Schutte
Executive Director
Anchorage Downtown Partnership, Ltd.

SENATOR BILL WIELECHOWSKI

Sponsor Statement: SB 34

An Act Establishing the Alaska Small Business Revolving Loan Fund

The purpose of SB 34 is to promote additional economic development in Alaska by helping small businesses to secure needed capital for start-up or expansions,

- Alaska's loan fund would be modeled after the federal Small Business Administration's "Microloan Program."

- Only 2 states do not participate in the federal program. Alaska is one. The program is not available here because an intermediary lender is required, and no lenders meeting SBA qualifications have been identified.

- This bill would create a Small Business Revolving Loan Fund within the Dept of Commerce, Community, and Economic Development. All earnings and loan repayments would be retained in the fund for future loans and all operating expenses would be paid from fund earnings.

- Loan applicants must be Alaska residents and provide a reasonable amount of non-state matching funds. Loans are capped at $50,000 for 1 individual and $100,000 for 2 or more. Loans would bear an interest rate of prime plus 1%, with a minimum of 6% and a maximum of 8%.

Please join me in supporting this important legislation.

S.B. 34:

Alaska Small Business Revolving Loan Fund

Prime Sponsors
(Bipartisan)

Senators

Menard, Ellis, Paskvan, McGuire, Thomas, and Wielechowski

Purpose:

To promote
economic development
by helping small businesses
in Alaska to access
critically needed capital

The Need

- Nationally, the number of small businesses able to obtain adequate financing has steadily decreased in the last several years.
- In 2008, 78% of small businesses reported adequate access to capital.
- This declined to 62% in 2009 and 59% in 2010.

(National Small Business Association)

Fewer Loans

- In 2009, new small business loans fell 33% to $192 billion, the lowest total since 2000. (Federal Financial Institutions Examination Council)

- Small business use of nearly every financing mechanism has decreased -- from traditional bank loans to credit cards to vendor loans. (NSBA)

Credit Crunch

- 80% of business owners – 4 out of 5 – report that their company has been impacted by the credit crunch.

Why is this a problem?

- Small firms tend to drive job growth, particularly during recoveries. They employ roughly half of all American workers and account for about 60% of job creation.

- Businesses less than 2 years old are especially vital. Over the past 20 years, start-ups have accounted for roughly 25% of job creation. When capital flows more freely, small businesses add new jobs.

Is Alaska Different?

- Probably not, according to experts. In fact, Alaska's higher business costs could exacerbate the problem.

- Support for small businesses is as important here as elsewhere.

Given this …

- Perhaps we should listen to Fed Chairman Ben Bernanke, who recently said:

- "Making credit accessible to sound small businesses is crucial to our economic recovery and so should be front and center among our current policy challenges." (June 9, 2010)

One Answer: Micro-Loans

- **The Small Business Revolving Loan Fund Senate Bill 34 proposes is modeled after a program currently operated by the federal Small Business Administration.**

An Unmet Need

- 46 other states have "micro-loan" programs

- Alaska does not because an intermediary lender is required and no lenders meeting SBA qualifications have been indentified to date in the state

A Little History

- Last year, Governor Parnell introduced HB 412 to create a state micro-loan program.
- The bill passed the House unanimously on April 13 but stalled in the Senate.
- Over the interim, we tried unsuccessfully to ascertain whether the Governor intended to re-introduce the bill.

Senate Bill 34

- As a result, a bipartisan group of Senators decided to introduce SB 34.

- This bill differs from HB 412 in that the maximum loan amount has been slightly increased in response to comments from small business owners and new federal guidelines.

Senate Bill 34, cont.

- The Senate bill also requires applicants for loans over $35,000 to prove they have been turned-down from a local financial institution before requesting a state loan.

- It also requires that applicants provide a minimum 20% match for the loan.

Loan Eligibility

- Applicants must be Alaska residents and their businesses must be located in Alaska.

- They must provide sufficient collateral to secure the loan.

(Nationally, micro loans have a very low default rate – less than 5%. DCCED expects an even lower rate in Alaska. Overall, their default rate is .6%)

Loan Terms

- The loans would bear an interest rate of prime plus 1%, with a floor of 6% and a cap of 8%.

- The maximum term would be 6 years.

Loan Terms, cont.

- Loans could not exceed $50,000 for 1 individual and $100,000 for 2 or more individuals.

- The program would be housed within the Department of Commerce, Community and Economic Development.

Other Programs

This program would complement two existing programs administered by the Division of Economic Development:

1. **The Small Business Economic Development Revolving Loan Fund**
2. **The Rural Development Initiative Fund**

Economic Development Fund (SBEDRLF)

- This program relies on funding from the federal EDA and is targeted at communities experiencing economic hardship.

- Funds are primarily used for long-term financing and numerous federal requirements must be met.

Rural Development Fund (RDIF)

- Created with state funds, primarily for long-term financing.
- Only available in communities of 5,000 or less (if not connected by road or rail to Anchorage or Fairbanks) or communities of less than 2,000 (if connected).

Alaska
Small Business Loans

- Would provide relatively short-term, low-interest loans to Alaska small businesses

- Could be used for working capital, purchasing machinery, equipment, inventory and leasehold improvements.

Statewide Eligibility

- Loans would be available in all regions of the state.
- The application process would be streamlined and fees would be modest: $100 to apply and a 1% origination fee.

Capitalization

- The fund would be capitalized with $3.5 million.
- All earnings and loan repayments would be retained by the fund for future loans.
- And operating expenses would be paid from fund earnings.

Potential Fund Sources

- Two possibilities:

    1. General funds (likely)
    2. State Small Business Credit Initiative funding through the U.S. Treasury (less likely)

Small Business Credit Initiative

- New federal program created by the Small Business Jobs Act of 2010
- $1.5 billion appropriated to "strengthen state programs that support lending to small businesses and small manufacturers"
- Formula-driven program

Small Business Credit Initiative, cont.

- Alaska's share = More than $13 million
- State has filed letter of intent to apply
- Application deadline : June 27, 2011

Revolving Loan Funds:
Self-Sustaining

- Assumptions: 20 loans in first year
- Average loan = $35,000
- 25 in second year and every year thereafter
- By FY'17, all principle pushed out
- Fund starts earning money and re-lending

Widespread Support For Micro-Loans

Business groups from across the state recognize the need for a micro-lending program, such as that proposed by S.B. 34.

Bristol Bay Economic Development Corporation

"By far, the most challenging aspect of starting a small business in our region is lack of capital; even when it involves a very small amount of money. Traditional sources of capital such as banks and other financial institutes are not viable sources of capital for small entrepreneurs in rural Alaska."

H. Robin Samuelsen
Chief Executive

Anchorage Economic Development Corporation

"This modest investment by the state of Alaska could yield significant benefits for communities in every region of the state. The sizes of the loan are quite modest, as are the corresponding fees and interest rates charged. The infusion of capital this program offers will help both existing businesses and start-up businesses to bridge short-term funding gaps, purchase new equipment, expand services and employ more Alaska citizens."

Bill Popp
President and CEO

Alaska Small Business Development Center

"Micro-lending is an opportunity for many small businesses who typically do not find lending options with banks due to the small amount of their loan request. Many lending institutions prefer loan applications with values of $100,000 or more. ... The approval of micro-lending bills will significantly impact and support many small businesses throughout Alaska..."

Debi Fowler

Associate State Director

Southwest Alaska Municipal Conference

"In Southwest Alaska, a revolving loan fund could help small boat owners or smaller fish processors with equipment purchases. It could assist bed and breakfast owners with upgrades to their homes and business. Or it could provide much needed capital to mechanics, day care providers, and a host of other small business startups and entrepreneurs."

Andy Varner
Executive Director

Small Business Owner

"As a small business owner, I depend on credit to place orders for inventory, expansion, advertising and payroll during slow times. Availability of this credit has allowed many businesses to weather economic slow downs in the past and even to emerge stronger when the economy recovers. This recession is different: all forms of available credit have dried up, especially those for small business."

Ted Ragains

Alaska Bankers Association

- SB 34 even has the **support of the Alaska Bankers Association**.

- The sponsors of this legislation worked closely with them to resolve any concerns they had.

Closing Thoughts

- Small loans, many under $15,000
- Alaska residents only
- Quick pay-back
- The difference between success and failure, especially when credit is tight
- Possible federal funding
- Self-sustaining, including operating costs

MEMORANDUM February 10, 2011

SUBJECT: Sectional summary of CSSB 34(L&C) establishing the Alaska small business revolving loan fund
(Work Order No. 27-LS0204\I)

TO: Senator Bill Wielechowski
Attn: Michelle Sydeman

FROM: Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. Gives the new material a short title. Places this in uncodified law.

Section 2. States legislative intent for the bill.

Section 3. Establishes the new Alaska Small Business Revolving Loan Fund.

Sec. 44.33.950 creates the new fund in the general fund. Allows the Department of Commerce, Community, and Economic Development to use money in the fund to carry out the purposes of the new fund provisions. Identifies the money and payments that make up the fund. Authorizes the legislature to make appropriations from the fund to administer the new fund provisions.

Sec. 44.33.955 lists the powers and duties of the department relating to the fund.

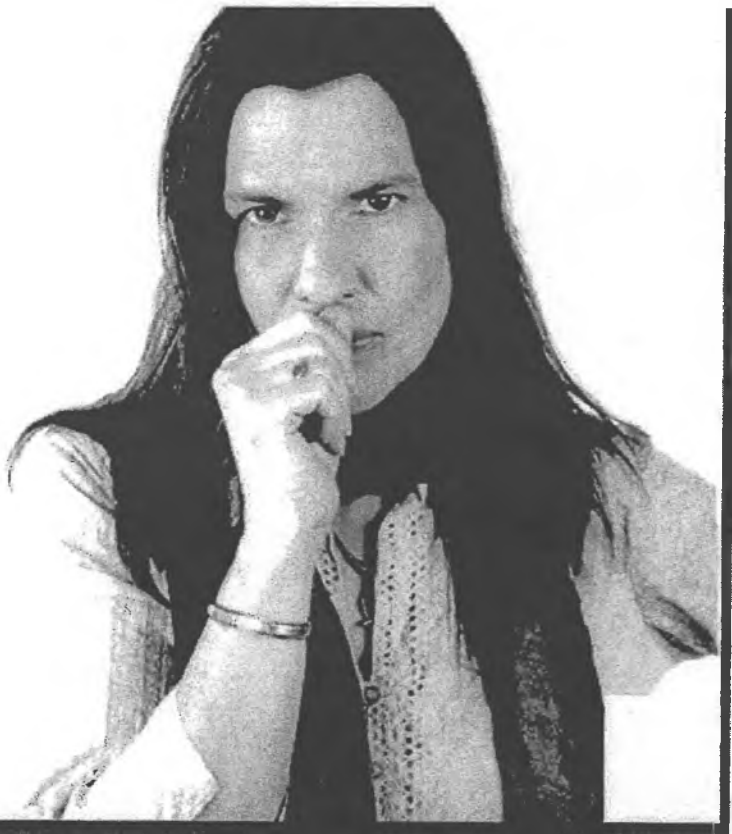
Sec. 44.33.960 sets out the eligibility requirements for applicants for loans from the fund, including (1) providing 20 percent of the money to be used on the project, and (2) proving that the applicant was turned down for a loan or that another loan is contingent on the fund loan. Indicates how an applicant meets the residency requirements.

Sec. 44.33.965 sets the monetary limits on loans to individuals and to two or more individuals. Sets a maximum term for fund loans and allows for extensions. Sets maximum and minimum interest rates for fund loans. Requires loans to be secured by collateral. Prohibits loans to individuals with established past due child support obligations.

Sec. 44.33.970 establishes a special foreclosure expense account and indicates when the department may use the money in the account.

Sec. 44.33.975 directs the department to dispose of property acquired through loan default or foreclosure. Requires the method of disposal to serve the state's best interest. Allows for amortization of payments.

Sec. 44.33.990 defines terms for the new provisions.



Section 4. Authorizes the department to begin the regulation adoption process for the new loan fund immediately. But the regulations may not take effect before July 1, 2011.

Section 5. Gives bill sec. 3 an immediate effective date.

Section 6. Aside from the start-up regulation authority, sets a general effective date for the bill of July 1, 2011.

If I may be of further assistance, please advise.

2010 Mid-Year Economic Report

NSBA
National Small Business Association®

Small-Business Financing

As NSBA repeatedly has said over the last two years, small-business access to capital is a growing problem. When asked what are the most significant challenges facing their business, nearly one-third (29 percent) said lack of available capital—that's up from 24 percent just six months ago.

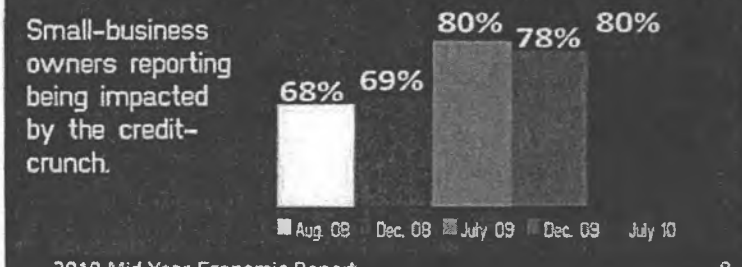
The prospect of getting financed for a small business—even in a growing economy—is very difficult simply due to the fact that many small businesses lack the assets necessary for a traditional bank loan, making them a riskier lending option for banks. Unfortunately, the number of small businesses able to obtain adequate financing for their business has steadily decreased in the last few years. Today, only 59 percent of small businesses are able to obtain adequate financing for their business. That number has dropped from 78 percent in August 2008, 67 percent in December 2008, 62 percent in July 2009, and 61 percent in December 2009. Although a majority are able to secure financing, it cannot be glossed over that 41 percent—which translates into more than 12 million—of the nation's small businesses are not able to get adequate financing.

NSBA has been asking small-business owners if their business had been impacted by the credit crunch since early 2008. In February 2008, 55 percent responded that it had. In August 2008 that number jumped to 67 percent, and continued to rise to 69 percent in December 2008 and hit a high of 80 percent in July 2009. Despite a slight easing in December 2009 down to 78 percent, the number today is back up at its highest point. Eighty percent—four out of five—of small-business owners report that their company has been impacted by the credit crunch.

The availability of capital is a critical component to business growth and job creation for small businesses. Since 1993, when NSBA began asking these questions, there has been a direct correlation between access to capital and job growth—when capital flows more freely, small businesses add new jobs.

Among small-business owners for whom capital availability has been a problem, 44 percent state that they have been unable to grow or expand the business, and 20 percent state that they have been forced to reduce their number of employees. Perhaps even more worrisome is the growth in small businesses that report they are unable to increase inventory to meet demand—up from seven percent in December 2009 to 12 percent today. This means that, although growth opportunities exist for these businesses, they are being held back by a lack of capital.

In the last six months, there has been a decrease in small-business use of nearly every financing mechanism, from traditional bank loans to credit cards to vendor credit. The number of small businesses using no financing options remained steady at 21 percent—virtually no change from the December 2009 results.



Prior to the December 2009 survey, credit cards had been the number one source of financing for small-business owners, Today, however, they have dropped to the number three slot, just behind traditional bank loans at number one and earnings of the business at number two. Although reports have shown a higher rate of approvals among credit card applicants, many small businesses are hesitant to take on credit-card debt given the volatility associated with them.

Loans

While the number of small businesses relying on traditional bank loans jumped to 53 percent in July 2009—up from 44 percent in December 2008—only 43 percent small-business owners today are using bank loans. That number was higher just six months ago with 46 percent of small-business owners using bank loans. In addition to banks' unwillingness to loan to small businesses, the fact that terms continue to worsen for small businesses is likely part of the reason small-business owners have been seeking fewer bank loans. Twenty-four percent of small-business owners reported less favorable terms on their loans in the last year, and only two percent report that

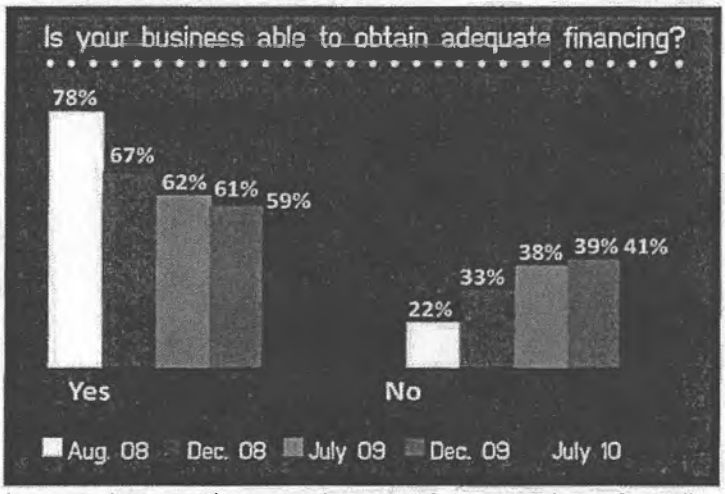
What types of financing has your company used within the past 12 months to meet your capital needs?

	Aug. 08	Dec. 08	July 09	Dec. 09	July 10

the terms of their loans have become more favorable.

Although lower demand for loans from small-business owners who are typically hesitant to take on additional debt in a distressed economy may be a part of the equation, the decrease in loans is more likely related to the terms and availability of such loans. Many banks appear unable or unwilling to lend affordable capital to any small businesses that doesn't meet their extremely high definition of a "creditworthy" small business.

Underscoring this fact, the April 2010 Federal Reserve Board (the Fed) Senior Loan Officer Survey reported that, although banks have begun slightly easing standards on large firm loans, little has changed for small firms. Among large banks, 19.4 percent eased their standards on loans to large firms while only 3.4 percent did the same for small business. Compounding matters, there was even a net tightening on loan terms to small businesses from smaller banks—the very banks that small businesses typically turn to as they are the last remaining institutions still willing to make character-based loans. The reason cited for this tightening was completely unrelated to the businesses themselves, and rather was due to a less favorable economic outlook and the banks' decreased tolerance for risk.



The implications of the collapsed housing market continue to haunt the small-business community. In August 2008, 12 percent of small-business owners leveraged their business loans with a second home mortgage. That number has been steadily decreasing since that time and is now at an all-time low of six percent.

Credit Cards

Given the events of the last year, in which interest rates on credit cards remained high, credit-card limits were arbitrarily cut, and credit-card accounts were eliminated entirely by the credit-card companies, it is not surprising that the gradual decrease in credit-card usage has continued. Although the number of small-businesses relying on credit cards has dropped slightly, they still account for one of the largest sources of financing for NSBA's members.

In the last year, a major piece of legislation was passed, the Credit CARD Act, which went into effect in early-2010 and put a stop to some of the most egregious practices of the credit-card industry. Unfortunately that legislation didn't expressly include the cards used exclusively or primarily for small-business use despite the best efforts of NSBA and some key advocates on Capitol Hill. Credit-card companies and large banks railed against the legislation and an amendment to extend the protections to small businesses, warning that the legislation and the small-business inclusion amendment would make credit cards wildly more expensive and difficult to qualify for across the board.

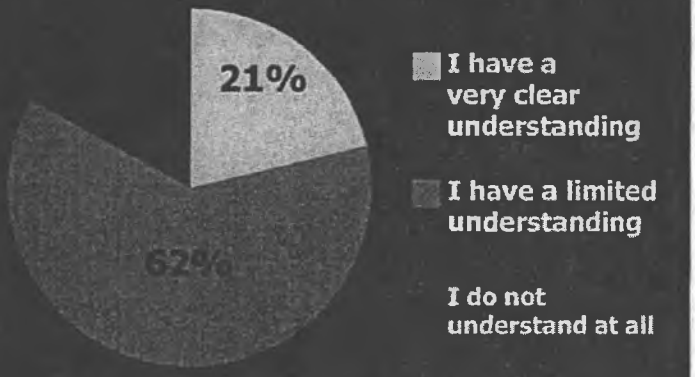
Now four months after the implementation date, that simply

has not happened. Granted, a significant number of small businesses (48 percent) report that the terms on their credit cards have in fact gotten worse in the last several months, however that number actually decreased since the December 2009 report when 64 percent reported worsening terms in recent months. Given that many banks have voluntarily adjusted their standard operating procedures to extend the legislative protections to both personal and business credit cards, this is a clear indication that the legislation did NOT cause wholesale cost increases in credit cards as opponents to the bill projected. Furthermore, the survey indicates that the law is working, as fewer small-business owners reported that the terms of their credit card had worsened.

The interest rates small-business owners are subject to continue to be high, though not as a direct result of the legislation. The average interest rate small businesses pay is 16 percent. Half of small businesses (50 percent) pay more than 15 percent in interest rates on their credit cards. Nearly one-quarter (23 percent) of all small-business owners are currently paying 20 percent or more in interest rates. This has not been a notable change since the December 2009 report.

One particularly problematic trend that began in late-2008 was credit-card companies arbitrarily reducing the credit limit on a card—or shutting down the card entirely. For a small-business owner carrying a balance, this unexpected reduction results in a diminished credit score, as the owner suddenly is utilizing more of his/her available credit. With banks increasingly reliant on personal credit scores in their underwriting practices, this credit score hit can be quite problematic. Compounding matters, these reductions are typically due simply to the fact that, as a small business, they are viewed as a more risky credit option.

When asked in December 2008, 28 percent of small-business owners responded that they had experienced a decrease in their line(s) of credit or a credit-card limit in the past six months. Today, 36 percent—up slightly from 35 percent in December 2009—of small-business owners were subject to such a decrease in the last six months.



"There is a direct correlation between access to capital and job growth. Unless small-business owners are able to secure financing, we will continue to see high unemployment."

Which one of the following issues do you believe Congress and President Obama's administration should address first?

	July 10	Dec. 09
Reducing the tax burden	36%	43%
Increase small business access to capital	23%	18%
Reducing the regulatory burden on businesses	14%	15%
Health care reform	10%	7%
Rising fuel prices and addressing the nations' dependence on oil	3%	4%
Credit card reform	3%	3%
Improving education to provide a qualified domestic workforce	1%	1%

How well would you say you understand how the new health care reform law is going to impact your business?

Public Policy

Just months away from the mid-term elections with some key pieces of legislation having been passed—health care reform and financial regulatory reform to name a few—lawmakers find themselves still facing high unemployment and a struggling small-business community. Despite all the rhetoric about the importance of small business to the U.S. economy, too little has been done address the many issues bogging down America's small-business owners. Small business has played a critical role in past economic recoveries; however they continue to be hit with increasing difficulty accessing capital, putting the brakes on any growth opportunities.

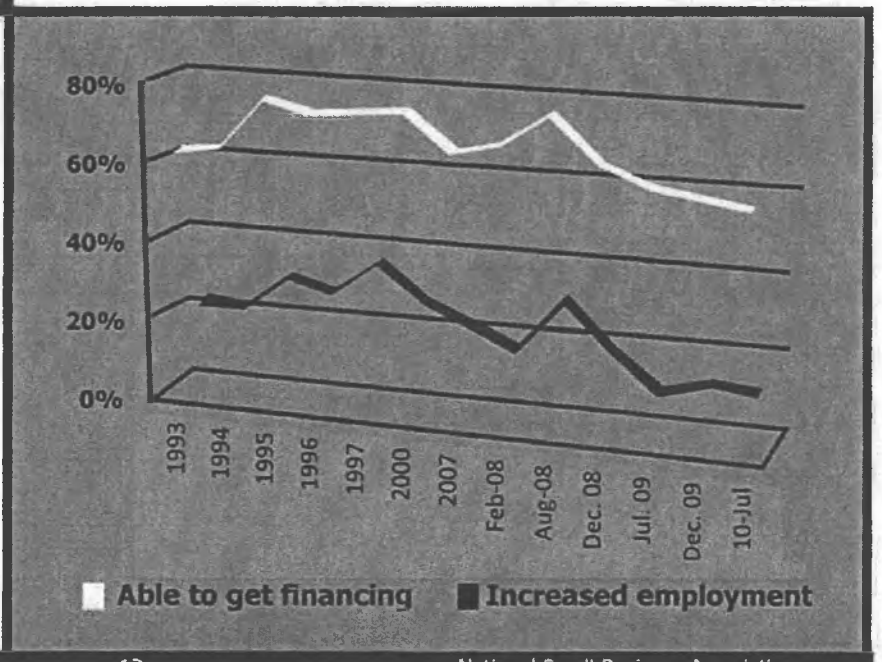
Small-business owners continue to rank "reducing the tax burden" as the top issue Congress and the administration should address. However in the last six months, there was a notable drop from 43 percent to 36 percent among those that ranked taxes their top issue. In that same time, the number of small businesses that ranked "access to capital" as the top issue Congress and the administration should address rose 5 points to 23 percent. Reducing the regulatory burden on small businesses and health care reform came in third and fourth, respectively.

Health Care Reform

Despite the passage of broad health care reform—legislation which NSBA ultimately opposed due to its inability to truly address rising costs—small business owners continue to report dire consequences of rising health insurance costs. When asked how they have coped with rising health care costs, 24 percent, up from 20 percent in December 2009, were forced to reduce their workforce. That means one in four small businesses, in this terrible economy with high unemployment, is having to lay-off workers due to health insurance costs.

There exists a significant amount of confusion among small-business owners about how the new health care law will impact their business. When asked if their business will qualify for the small-business health care tax credit, only 10 percent said yes. The majority—52 percent—said they weren't sure whether or not they were eligible for the tax credit. In more broad terms, small businesses were asked to rate their understanding of the new law, and only 21 percent said they have a clear understanding while 79 percent said they have a limited or no understanding at all of how their business will be impacted. Given that this survey is among

CONCLUSION



Small employers comprise 99.7 percent of all employer firms in the U.S. One in two workers in the private workforce run or work for a small business, and one in four individuals in the total U.S. population is part of the small business community (equaling 23 percent of the population.) Firms with fewer than 500 employees accounted for 64 percent of net new jobs between 1993 and the third quarter of 2008. Thirty-two percent of those gains came from the creation of new, small firms.

According to the Pew Research Center, small businesses are widely seen as having a positive impact on the country. Small business ranked number one with 71 percent of respondents having positive views. Large corporations, on the other hand, earned a 64 percent negative rating. Just 25 percent say the federal government has a positive effect on the way things are going in the country and banks and other financial institutions only earned a 22 percent positive rating.

According to SBA's Small Business Economic Indicators for 2003, when the economy gained momentum after the previous downturn in the early 1990s, firms with fewer than 500 employees increased their net employment in the first year after the recession, while large firms continued to shrink. From March 2000 to March 2001, small firms added 1.15 million net new jobs while large firms lost 0.15 million net new jobs.

NSBA believes more can, and must be done to ensure entrepreneurship remains a viable, attainable option for every American.

Amid all the financial concerns small-business owners face, the fact that Congress would approve this new, massively burdensome 1099 reporting requirement is unfathomable.

Alaska Bankers Association

February 14, 2011

Senator Bill Wielechowski
AK State Capitol, Room #101
Juneau, AK 99801

Dear Senator Wielechowski:

The Alaska Bankers Association consists of the following eight member banks: Alaska Pacific Bank, Denali State Bank, First Bank Ketchikan, First National Bank Alaska, KeyBank, Mt. McKinley Bank, Northrim Bank, and Wells Fargo Bank.

The Alaska Bankers Association would like to express our thanks for working with us to amend Senate Bill 34; the Small Business Revolving Loan Fund. The addition of the "turn down" language for loans over $35,000 is of particular importance. We are satisfied with the changes made in the Senate Labor & Commerce Committee and are now in support of the bill.

As Craig Dahl, President of Alaska Pacific Bank, indicated in his testimony, the Alaska banks are actively engaged in making loans to the small business community. While the nation's headlines spoke to bank's not making loans, the banks watched loan demand slow or stop all together depending on the market. However, at no time during the last two plus years have any of the community banks in Alaska stopped lending in any of their portfolios.

To give you a sense of recent loan volume over the last two years, we have acquired a range of lending from several of our members. The following data represents the 2009 and 2010 new business loans under $100,000 made by First National Bank, Northrim Bank and Alaska Pacific Bank.

2009		2010	
1,060	$34,146,278	1,035	$37,796,775

This data represents three of our eight member banks in Alaska.

All banks, not just in Alaska, have excess liquidity and are looking forward to increased loan demand. If a viable business proposal walks into any of the Alaskan institutions, the proposal is going to receive a fair review. We want to make the loan as bad as the borrower wants it.

Again, thank you for working with the Alaska Bankers Association to craft a committee substitute that works for all of us.

Sincerely,

Joe Beedle
President, Alaska Bankers Association

Mat-Su Resource Conservation & Development

"Fostering Responsible Resource Conservation and Economic Development in the Matanuska-Susitna Borough"

February 2, 2011

Senator Bill Wielechowski
Room 101,State Capitol Building
Juneau, Alaska 99801-1182

Dear Senator Wielechowski;

As the ARDOR in the Matanuska-Susitna Borough our goal is to assist in creating jobs, expanding the local economy, conserve natural resources and enhance the quality of life for the residents and institutions of the Matanuska-Susitna Borough.

One of the economic development tools we are in need of not only in the Mat-Su Borough but throughout the State is an effective Micro-Loan program that meets the broad needs of entrepreneurs in both rural and urban Alaska.

As an Economic Development practitioner I fully support the development of a broad reaching Micro-Loan program that allows Small Businesses access to much needed capital.

Sincerely,

Marty Metiva
Executive Director

February 2, 2011

Dear Senator Wielechowski,

This letter is written in support of SB 34, a bill aimed at creating a micro revolving loan fund for the State of Alaska. Access to startup and working capital is a key component of starting new enterprises and creating jobs in Alaska, and many rural Alaskans do not have access to this type of capital.

In Southwest Alaska, a revolving loan fund could help boat owners or smaller fish processors with equipment purchases. It could assist bed and breakfast owners with upgrades to their homes and business. Or it could provide much-needed construction capital to mechanics, day care providers, and a host of other small business startups and entrepreneurs.

Alaska is one of only four states in the nation that do not have a microloan program and this bill would resolve that and fill an unmet need that would help small businesses, which is why SWAMC supports it.

Our organization believes SB 34 is a valuable bill with great potential. I hope it can help add to Alaska's efforts to support our small businesses and entrepreneurs.

Sincerely,
SOUTHWEST ALASKA MUNICIPAL CONFERENCE

Andy Varner

Executive Director

PRINCE WILLIAM SOUND
ECONOMIC
DEVELOPMENT
DISTRICT

Chenega Bay
Cordova
Tatitlek
Valdez
Whittier

February 1, 2011

To Whom It May Concern:

On behalf of Prince William Sound Economic Development District, I would like to offer our support for Senate Bill No. 34 to establish an Alaska Small Business Revolving Loan Fund. This would be extremely helpful to those in our state who wish to open a new business.

SB34 would provide loans for working capital, equipment, construction or other purposes needed to start a business in Alaska.

We, therefore, support Senate Bill No. 34.

Sue Cogswell, Executive Director

ALASKA REGIONAL DEVELOPMENT ORGANIZATION
ARDOR
3207 Spenard Rd · Suite 207 · Anchorage, Alaska 99503 Phone (907) 222-2440 · FAX (907) 222-2411 · Cell (907) 223-1672 · Email uwsud@gci.net

This letter is written in support of Senate Bill 34, a bipartisan effort to create and maintain a Small Business Revolving Loan Fund for residents of the State of Alaska.

There is a need in Alaska for a funding source to support the needs of entrepreneurs who wish to initiate a small business and borrow a portion of their initial investment for it. Applicants would provide the remainder of funds from their own sources and would be responsible for repaying the amount borrowed at a reasonable rate of interest.

For residents of the Yukon Kuskokwim Delta, this program would provide an opportunity currently unavailable to them to establish their business idea and access needed capital for a startup or a business expansion.

Your support of this bill would provide a needed source of funds for potential small business entrepreneurs in Alaska who are currently underserved and without other resources to draw upon.

Thank you for your consideration of this request.

Carl Berger, Executive Director
Lower Kuskokwim Economic Development Council
Bethel, AK

Bernanke Urges Small-Business Lending

Federal Reserve Chairman **Ben Bernanke** urged banks and regulators Monday to seek out ways to ensure that small businesses get the credit they need to create jobs.

"Making credit accessible to sound small businesses is crucial to our economic recovery and so should be front and center among our current policy challenges," Bernanke said in prepared remarks to the Fed's forum on restoring credit to small businesses.

Reuters

Fed Chairman Ben Bernanke

Declaring small businesses as "central" to tackling unemployment, the Fed chief said not enough is being done to ensure that financially sound companies can obtain loans.

Fed officials have become increasingly worried about the stubbornly high unemployment. The jobless rate edged down to 9.5% in June from 9.7% the previous month. But the economy shed jobs for the first time this year, with nonfarm payrolls falling 125,000 last month.

"The formation and growth of small businesses depends critically on access to credit," Bernanke said in the text of his remarks. "Unfortunately, those businesses report that credit conditions remain very difficult."

The forum is the culmination of a fact-finding mission the Fed launched in February to identify how to improve credit access for small firms, which account for about 60% of job creation.

Fed officials have hosted more than 40 meetings around the country with small businesses, bankers and community leaders to identify obstacles that have contributed to a continued contraction in lending.

Bernanke cited data showing that outstanding loans to small businesses have declined to less than $670 billion in the first quarter of 2010 from about $710 billion in the second quarter of 2008.

While major banks eased loan conditions for big firms during the first quarter, lending standards remained tight among the local banks that small businesses rely on, according to the quarterly Fed survey. Similarly, a survey by the **National Federation of Independent Business** found that the proportion of firms reporting tighter credit conditions over the past three months remained "extremely elevated," Bernanke said.

Some lenders participating in the meetings viewed the current lending standards a return to more normal conditions following a period of lax standards. But Bernanke said "it seems clear" that some creditworthy borrowers and having trouble getting credit, even when strong cash flow is compensating for a loss in collateral.

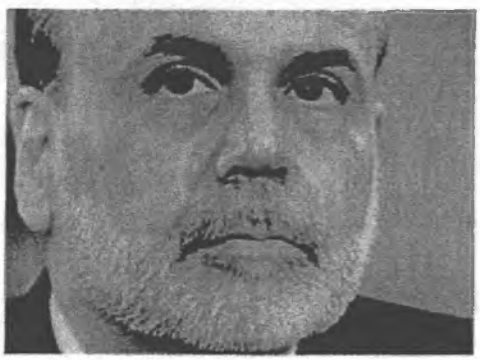
"The challenge ahead for lenders will be to determine how to assess the credit quality of businesses in an uncertain and difficult economic environment," he said.

Lending to creditworthy borrowers is in their interest, Bernanke said, since "that's how they earn their profits."

Meanwhile, he said regulators should continue to work with lenders to help improve credit availability to sound small firms.

The Fed has been encouraging banks to ensure that credit-worthy small businesses can get the credit they need. Reacting to complaints that its own bank examiners are contributing to overly tight standards, the central bank is also conducting training programs with examiners to drive home the message that encouraging loans to small businesses that can repay is positive for the banking system.

Still, Bernanke cautioned against "one-size-fits-all solutions," saying that the meetings confirmed that each small business has a unique combination of local economic conditions and relationships with creditors and customers.



He didn't make any comments on the outlook for monetary policy.

WASHINGTON, July 12, 2010

Bernanke: Small Businesses Denied Credit

Federal Reserve Chairman Steps Up Pressure on Banks to Lend More to Smaller Firms

Federal Reserve Chairman Ben Bernanke testifies on Capitol Hill in Washington, Wednesday, June 9, 2010. **(AP Photo/J. Scott Applewhite)**

(AP) Big companies are building up cash and are expected to report strong earnings starting this week. Not so for small businesses that can't get loans - or hire freely until they do.

The gap helps explain why the economic rebound isn't stronger and could even stall. Federal Reserve Chairman Ben Bernanke stepped up pressure Monday on banks to break the logjam and lend more to smaller firms, which employ at least half of American workers.

Small business owners are relying on personal credit cards or raiding retirement accounts to stay afloat, the Fed chairman said.

Bernanke and other regulators have urged banks for months to lend more to smaller companies. Lawmakers have complained that small businesses that want loans are having trouble getting them. Banks have countered by saying demand remains weak.

The Fed does have authority to create programs to increase lending, such as providing low-cost loans to banks. But economic conditions would probably have to weaken considerably before the Fed would propose such a move. One such program set up during the 2008 financial crisis was recently closed.

The Fed chief's latest comments came as legislative efforts to spur small-business lending have languished, and as the recovery has lost momentum. Bernanke spoke at a Fed conference held to explore ways to loosen lending to small companies.

"Making credit accessible to sound small businesses is crucial to our economic recovery," Bernanke said. "More must be done."

Some small business leaders say they would hire more if only they had easier access to loans. One of them is Marilyn Landis of Basic Business Concepts Inc. of Pittsburgh, which compiles financial documents for other small businesses.

Landis says she would like to hire one or two more people for her 10-person firm and wants to expand into New England. Yet even though she says she's never missed a payment, Landis says her line of credit was cut about 18 months ago.

She relies on credit cards to pay for everything from supplies to payrolls. Without additional credit, she says, "It is impossible to expand, and I can't hire."

Nearly one-third of small business borrowers report difficulty arranging credit, the National Federation of Independent Businesses says.

By contrast, big businesses, which start reporting their second-quarter earnings this week, have enjoyed easier access to loans and low interest rates.

Analysts expect companies in the Standard & Poor's 500 to report a 42 percent jump in profit by one measure, S&P says. For the current quarter, which ends Sept. 30, they expect a 31 percent rise.

The big companies also benefit from something available to fairly few small businesses: plenty of cash.

In March, cash at S&P 500 companies hit a record $837 billion - about a year and a half's worth of profits. And S&P senior analyst Howard Silverblatt says he expects cash to rise to a new record for the April-to-June quarter when figures are released later this summer.

Yet even as the economy has improved, lending to small businesses has declined. It's dropped from around $710 billion in the second quarter 2008 to less than $670 billion in the first quarter of this year.

The Fed and other regulators have urged banks to step up lending to creditworthy small businesses. Despite the push, such lending is still tight.

The impact on the economy is severe because small businesses tend to drive job growth during recoveries. They employ roughly half of all Americans and account for about 60 percent of job creation, Bernanke said.

And newer small businesses - those less than two years old - are especially vital. Over the past 20 years, these startups accounted for roughly a quarter of all job creation, even though they employed less than 10 percent of the work force, he added.

The Obama administration in early May sent Congress a proposal to create a $30 billion program to unfreeze credit for small businesses. The fund would provide money to small and medium-sized banks to encourage them to lend to small businesses. The legislation has yet to pass the Senate.

Bernanke said it's hard to tell whether the problem is banks refusing to lend to small businesses or a lack of demand from those companies. Each company faces different economic conditions and complex relationships with customers, suppliers and creditors, Bernanke said.

Some lenders say they have restored more traditional standards after a period of lax lending that contributed to the financial crisis.

Several big banks say they're already lending more to small businesses. Bank of America lent $19.4 billion to small and medium-sized businesses in the first three months of 2010, an increase of nearly $3 billion from last year. JPMorgan Chase and Citigroup have pledged to lend more, too.

Combined, though, the dollar amounts are relatively tiny compared with how much banks would lend in a healthy economy, said Robert DeYoung, a finance professor at the University of Kansas.

"These numbers would be dwarfed by the increase in lending after the economy starts recovering, and the economy hasn't really started to recover," DeYoung said.

Banks will be able to increase lending significantly, DeYoung said, only after businesses feel confident enough to take on more debt. Prodding banks to lend before then raises the risk that they'll make bad loans, he said.

"I wish I could conclude this wrap-up with a list of the three or four things we could do to immediately unlock small business lending," Fed Governor Elizabeth Duke said at the

conference. "But the problems are numerous and complex, and they will require creativity and persistence to solve."

Small Business Can't Get Loans From Bailed-Out Banks in U.S.

By Bob Ivry - Sep 16, 2010

Chip Besse figured he could hire a dozen people once he got a $1.1 million small-business loan.

Wells Fargo & Co. turned him down.

U.S. taxpayers helped the San Francisco-based bank weather the 2008 financial crisis with a $25 billion loan and $9.5 billion of debt guarantees. By July 2009, when Besse wanted to buy and expand a Colorado snowmobile-rental business, Wells Fargo wasn't sharing the wealth, he said.

Besse, 29, had little success with 16 other lenders in 2008 and 2009. His list included New York-based JPMorgan Chase & Co., which agreed to provide less than 70 percent of what he wanted, and Charlotte, North Carolina-based Bank of America Corp., which Besse said kept him hopeful for a month before rejecting his application.

"I was furious," he said. "A lot of bankers are trying to justify their jobs and they waste everyone's time."

Besse, a Philadelphia native, was a partner in a London private equity firm with a credit score of 769 out of 850 and $185,000 in a checking account. His search for a loan shows how difficult it is for small companies, which the Small Business Administration says created 64 percent of net new jobs over the past 15 years, to get credit -- even from banks that accepted billions in taxpayer-funded bailouts.

Trading, Not Lending

The U.S. government helped Wells Fargo, JPMorgan Chase and Bank of America back to health with $189.3 billion in loans under the Troubled Asset Relief Program and debt guarantees through the Federal Deposit Insurance Corp. The rest of the country: not so much. That's in part because of policies the Federal Reserve has instituted to help banks, said Peter Morici, an economist and professor at the Smith School of Business at the University of Maryland in College Park.

"We've created a system that encourages bankers to trade, not lend," Morici said.

A record 41 percent of small business owners say they can't get adequate financing, up from 22 percent two years ago, according to a July report by the National Small Business Association, a 150,000-member advocacy group founded in 1937 that has surveyed entrepreneurs since 1992. New small-business loans fell 33 percent last year from 2008 to $191.6 billion, the lowest total since 2000, according to the Federal Financial Institutions Examination Council.

Outstanding loans declined 16 percent as of June 30 compared with 2009, based on the council's data. Tighter credit makes it tougher for entrepreneurs such as Besse to hire some of the 14.9 million Americans who are out of work.

No Data

Spokespeople for the three big banks that Besse approached said they didn't track their small-business lending until last year, the middle of the longest economic downturn since the 1930s. It's therefore impossible to gauge their recent volume against their performance before the credit contraction began.

JPMorgan Chase increased new small-business loans 36 percent to $4.5 billion in the first half of 2010 over the same period last year. Bank of America lent $8.2 billion, a 1 percent increase, the company said.

Wells Fargo lent $6.6 billion; it has no comparable number for 2009, according to Marc L. Bernstein, head of the bank's Business Direct and Small Business Segment. Banks define small businesses as those with annual revenue of less than $20 million.

Little Demand

The three banks said they're lending as much as they safely can in an environment with few creditworthy small businesses and soft demand.

"The last thing we want the banking system to be is excessively liberal in its lending standards," said Bert Ely, a banking industry analyst in Alexandria, Virginia.

Entrepreneurs and their advocates counter that lending guidelines have become so strict that many business owners have given up trying to get credit.

"If the government had used the same lending criteria on the big banks that the big banks are using on us, the banks never would have gotten the TARP money," said Carl Calhoun, who tapped $400,000 in home equity to finance his St. Petersburg, Florida-based mattress company,

Commercial Bedding Co., after he couldn't find a lender.

The credit crunch for small businesses has drawn the attention of President Barack Obama and Fed Chairman Ben S. Bernanke, who have both called for more lending.

With the U.S. unemployment rate stuck at more than 9.5 percent for the past year, the U.S. Senate today passed legislation that would provide $30 billion in loans to banks with less than $10 billion in assets. The bill, which now must go to the House for a final vote, includes incentives for the banks to extend credit to small businesses, along with tax breaks for eligible companies.

'Still Struggling'

"At a time when small business owners are still struggling to make payroll and they're still holding off hiring, we put together a plan that would give them some tax relief and make it easier for them to take out loans," Obama said yesterday.

While they won't disclose their investing strategies, JPMorgan Chase and Bank of America were among four banks that reported a "perfect quarter" in the first three months of this year. That means they made money trading every day. Wells Fargo wouldn't reveal how its trading desk fared.

The Fed's low-interest-rate policy makes it easy for banks to lend to the U.S. government rather than small businesses, said David Rosenberg, chief economist and strategist for Toronto-based Gluskin Sheff & Associates Inc., which manages $5.4 billion.

Safe Yields

Banks, which can borrow at the overnight rate of about 0.20 percent, can get safe yields of more than 2.5 percent buying 10- year Treasury bonds and other almost risk-free U.S. obligations, Rosenberg said.

Banks held a record $1.597 trillion of Treasury and government agency securities on Sept. 1, according to the Fed, 44 percent more than at the start of the recession in December 2007. The 10-year Treasury yield was 2.72 percent yesterday.

"The biggest risk in buying Treasuries is that interest rates will rise, and the Fed has repeatedly said short-term rates would remain close to zero as far as the eye can see," Rosenberg said.

Lowering interest rates has been part of the Fed's effort to facilitate small-business lending, said David W. Skidmore, a spokesman for the central bank in Washington.

Strengthening Banks

"Easier monetary policy encourages banks to lend to small businesses and other borrowers since the rates banks receive on alternative investments are lower," Skidmore said. "And we have focused on strengthening the nation's banks so that they can resume normal lending as quickly as possible."

The Term Asset-Backed Securities Loan Facility, a Fed lending program established in November 2008, helped finance more than 850,000 small business loans, he said.

One option the central bank has to spur lending is cutting the 0.25 percent interest it pays banks on reserve accounts it holds for them, Bernanke said on Aug. 27. The central bank's emergency lending and asset purchases since September 2008 have swelled those accounts to more than $1 trillion, according to Fed data, a more than 20-fold jump since the bankruptcy of Lehman Brothers Holdings Inc.

Senior loan officers at big banks reported loosening credit guidelines for small businesses this year for the first time since 2006, according to a July survey by the Fed. Still, small business owners complain that banks have reduced credit lines and increased interest charges.

'Zero, Zippo'

"Bailing out Wall Street has done zero, zippo, nothing to help small business and create jobs," said Dale R. Kluga, 50, president of Cobra Capital LLC, a finance company in Darien, Illinois, that funds about $40 million worth of equipment for small businesses.

Besse said he was eager to run his own outfit, so he left Clearbrook Capital Partners LLP when he found Grand Adventures LLC in Winter Park, Colorado. The company rents snowmobiles and arranges tours.

"It was a lifestyle decision," he said. "I was thinking, how can I not work so much and have fun? Something where I can watch my kids grow up and be a part of the community."

Since he had an account with Bank of America, he said he applied there first for a loan.

Jefferson George, a Bank of America spokesman -- like all representatives of banks Besse applied to -- declined to comment on Besse's case specifically.

Bear Stearns

Besse approached Bank of America in June 2008, as financial institutions were tightening credit in the wake of the near- failure of Bear Stearns Cos. Since then, Bank of America's lending to

businesses with less than $20 million in annual revenue has fallen, according to regulatory filings. It had $15.9 billion in such loans outstanding at the end of June, down 12 percent from the same date last year and 20 percent from two years ago.

Though Bank of America said in a July 27 press release that it had loaned $45.4 billion in the first half of 2010 to small and mid-size businesses, about 80 percent of the loans went to companies with more than $20 million in sales.

"There's very weak demand from the smallest businesses," said Kathie Sowa, Bank of America's small-business credit executive, who is based in Sacramento, California.

Demand only appears to have slackened because entrepreneurs are frustrated with lenders and have given up asking for money, said Galen Gondolfi, a senior loan counselor at Justine Petersen, a nonprofit microlender in St. Louis.

"I can tell you straight out: Small businesses are not getting the financing they need," Gondolfi said. "We are experiencing unabated demand."

Incomplete Statistics

Statistics on lending to small business aren't always complete. Data collected by the Small Business Administration include only loans backed by the agency. The Federal Financial Institutions Examination Council, established in 1979 and consisting of the Fed, the FDIC and other bank regulators, tallies outstanding loans with original amounts of $1 million or less.

Loans backed by the SBA so far this year are down 14 percent compared with roughly the same period in 2007, according to the agency's data. They increased 47 percent to $12.3 billion over last year, when the U.S. economy was contracting. SBA loans went to less than 1 percent of small businesses in 2009, according to data compiled by Bloomberg.

Besse took his quest for a loan to Wells Fargo in June 2008. After the bank's underwriters said they wanted him to have experience in the snowmobile business, he went to work for the company he wanted to buy, he said.

In July 2009, Wells Fargo turned him down.

Went Snowmobiling

"I had a relationship with them," Besse said. "They came out to Winter Park in January and went snowmobiling. They promised so many things and didn't deliver anything."

Wells Fargo's Bernstein said the bank made $13 billion in new small-business loans last year,

followed by $6.6 billion in the first half of 2010.

"We do everything we can to say yes," Bernstein said in an interview. He declined to discuss Besse's individual case.

Besse said a loan officer from JPMorgan Chase "moved faster than anyone else and operated the most honorably" and ended up offering a loan for $750,000 -- less than Besse needed.

The bank was looking to pare back risk, Besse said the loan officer told him.

Banks need cash cushions to insulate themselves against losses from the property bubble that they haven't yet written off, said Christopher Whalen, co-founder of Torrance, California-based Institutional Risk Analytics.

Buybacks Possible

Such losses equal about one-third of the amount they've already written off as unrecoverable, Whalen said. For Bank of America, JPMorgan Chase and Wells Fargo, the total amount would be about $50 billion, he said, based on the banks' regulatory filings.

Bank of America and JPMorgan Chase may be on the hook for as much as $78 billion in home loans they sold to buyers during the housing boom such as government-controlled Fannie Mae and Freddie Mac, according to an Aug. 17 report by Washington-based Compass Point Research & Trading LLC. Mortgage buyers can demand reimbursement for loans that violate underwriting guidelines or involve fraud.

Jerry Dubrowski, a spokesman for Bank of America, said credit quality is improving and he wouldn't forecast charge- offs. Thomas Kelly, a JPMorgan Chase spokesman, said the bank is ready and willing and will continue to lend. Wells Fargo's credit losses peaked in the third quarter of 2009 and the bank expects them to continue to decline, Chief Financial Officer Howard I. Atkins said Sept. 13.

Banks Under Pressure

Besse finally got an $850,000 loan from Collegiate Peaks Bank of Salida, Colorado. Collegiate Peaks, with four branches and $164 million in assets, borrowed $2 million in TARP funds, about .002 percent of the $95 billion in TARP money that went to Bank of America, JPMorgan Chase and Wells Fargo.

Banks with less than $10 billion in assets make 60 percent of the country's small-business loans, according to the Independent Community Bankers of America. They're under pressure to

make fewer loans now, said Bob Hahn, chief executive officer of Community Valley Bank in El Centro, California, where the jobless rate is 30.3 percent, the highest in the U.S.

Small banks are failing at a rate of one every two days, according to FDIC data, and they're facing greater regulatory scrutiny because of that, Hahn said.

"We're being told to raise more capital or shrink assets," said Hahn, whose bank has two branches and $60 million in assets. "What's the primary asset of a community bank? Loans. That's where the pressure is coming from."

'Financially Savvy'

Besse's snowmobile business got credit in part because it had sufficient cash flow and the snowmobiles could be sold off in the event of missed payments, said Kim Palmer, the SBA lending manager at Collegiate Peaks.

"Chip is very financially savvy and has accomplished a great deal for someone his age and we saw this as a way to establish a relationship with someone like that," Palmer said.

Besse hired 12 new employees by adding a guided back- country skiing business he called Powder Addiction.

Shawn Edmondson, 36, a husband and father of two boys, 9 and 7, was a carpenter in the area when work "slowed way down" because customers couldn't get loans to renovate their homes, he said. He estimated that his 2008 income was $15,000.

Besse hired him last year as a ski guide. Edmondson said he earned about $200 in salary and tips every day on the slopes, surpassing his full-year 2008 pay in the six-month ski season.

"We don't make a lot, but this is income that keeps us afloat," Edmondson said. "We can pay our mortgage and stay on top of things."

Micro-Loan Program

SBA Program Office

The Microloan Program provides small, short-term loans to small business concerns as well as not-for-profit child-care centers. SBA makes funds available to specially designated intermediary lenders, which are nonprofit community-based organizations with experience in lending as well as management and technical assistance; these intermediaries make loans to eligible borrowers. The maximum loan amount is $35,000; the average loan is about $13,000.

How Funds May Be Used

Microloans may be used for working capital or the purchase of inventory, supplies, furniture, fixtures, machinery and/or equipment. Proceeds cannot be used to pay existing debts or to purchase real estate.

Technical Assistance

Each intermediary is required to provide business training and technical assistance to its micro-borrowers. Those applying for microloan financing may be required to fulfill training and/or planning requirements before a loan application is considered.

Terms, Interest Rates, and Fees

Loan terms vary according to the size of the loan, the planned use of funds, the requirements of the intermediary lender, and the needs of the small business borrower. The maximum term allowed for a microloan is six years. Interest rates vary, depending on the intermediary lender and costs to the intermediary from the U.S. Treasury. Generally, these rates will be between 8 and 13 percent.

Collateral

Each intermediary lender has its own lending and credit requirements. Generally, intermediaries require some type of collateral and the personal guarantee of the business owner.

For More Information

Small businesses interested in applying for a microloan should contact an intermediary in their area; all credit decisions are made on the local level. The Microloan Program is available in selected locations in most states. A list of approved Microloan intermediaries in your area can be found here.

State Small Business Credit Initiative (SSBCI)

Overview

On September 27, 2010, President Obama signed into law the Small Business Jobs Act o 2010 (the "Act"). The Act created the State Small Business Credit Initiative, which was funded with $1.5 billion to strengthen state programs that support lending to small businesses and small manufacturers. The State Small Business Credit Initiative is expect to help spur up to $15 billion in lending to small businesses. Under the State Small Business Credit Initiative, participating states will use the federal funds for programs that leverage private lending to help finance small businesses and manufacturers that are creditworthy, but are not getting the loans they need to expand and create jobs. The State Small Business Credit Initiative will allow states to build on successful models for state sm business programs, including collateral support programs, Capital Access Programs (CAP and loan guarantee programs. Existing and new state programs are eligible for support under the State Small Business Credit Initiative.

Who May Apply?

The State Small Business Credit Initiative is open to any state of the United States (and th District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of Northern Mariana Islands, Guam, American Samoa, and the United States Virgin Islands) that establishes a new, or has an existing, capital access or state credit support program that meets the eligibility requirements in the Act. In certain circumstances, municipalities may have an opportunity to apply to the Treasury Department for State Small Business Credit Initiative funding.

Key Deadlines

- Notice of Intent to Apply. The first step in the application process is for applicants file a "Notice of Intent to Apply" with the Treasury Department no later than 5:00 pr EST on November 26, 2010. The Notice of Intent form is available on this page under "Resources."
- Application package. The second step is to file a completed application package r later than 5:00 pm EST on June 27, 2011. The application form and required attachments are made available on this page under "Resources."

Juneau, AK 99811-0208

RE: Fiscal Note for Senate Bill No. 38

Dear Pat:

As requested, we are providing the following information for a Fiscal Note for a bill regarding the addition of a one-time lump sum payment of $100,000 to the spouse (or dependent children) of a Peace Officer/Firefighter who dies due to occupational causes. This bill affects both the State of Alaska Public Employees' Retirement System Defined Benefit Plan (PERS DB) and the State of Alaska Public Employees' Retirement System Defined Contribution Retirement Plan (PERS DCR). We have assumed that the bill will become effective as of July 1, 2010. Our results are based on the draft 2010 actuarial valuation results.

The tables below show the cost of the bill for Fiscal Years 2013 through 2017. Dollars are in thousands.

PERS DB Plan	FY13	FY14	FY15	FY16	FY17
Increase in Normal Cost Amount	$98	$101	$104	$107	$111
Increase in Past Service Cost Amortization Payment	$42	$43	$45	$46	$48
Total Increase in Annual Employer Contribution Amount	$140	$144	$149	$153	$159

PERS DCR Plan	FY13	FY14	FY15	FY16	FY17
Increase in Normal Cost Amount	$34	$36	$38	$39	$41
Increase in Past Service Cost Amortization Payment	$1	$1	$1	$1	$1
Total Increase in Annual Employer Contribution Amount	$35	$37	$39	$40	$42

1200 17th Street, Suite 1200 • Denver, CO 80202
720.359.7700 • 720.359.7701 (fax)

Summary for Analysis Continuation Section of Fiscal Note

The data, assumptions, plan provisions and methods used for the DB plan costs are described in the draft actuarial valuation reports as of June 30, 2010. The assets for both plans are based on the June 30, 2010 information provided by Christina Maiquis. We have assumed that the bill will become effective July 1, 2010.

The tables below summarize the change in the unfunded accrued liability. Dollars are in thousands.

PERS DB Plan	Current DB Plan	DB Plan After SB 38
Accrued Liability	$18,132,492	$18,133,139
Actuarial Value of Assets	11,157,464	11,157,464
Total Unfunded Accrued Liability	$6,975,028	$6,975,675

PERS DCR Plan	Current DCR Plan	DCR Plan After SB 38
Accrued Liability	$8,038	$8,048
Actuarial Value of Assets	13,568	13,568
Total Unfunded Accrued Liability	$(5,530)	$(5,520)

Please let us know if you need any further information.

Sincerely,

David H. Slishinsky

David H. Slishinsky, A.S.A.
Principal and Consulting Actuary

Ms. Kyla Kaltenbach, Buck Consultants

Senate Finance Committee
SB38 Hearing, February 1, 2012
Questions and Answers

Senator Stedman - Please provide a grid/table, by tiers, showing the death/survivor benefits already available to members of the PERS retirement system. How are the benefits to Tier IV different from the other tiers? What benefits are available to a new Tier IV member?

- See attachment "Occupational Death2" to see benefits by tier.
- Please note that DCR death benefit is the choice of; (1) 50% of compensation at the time of death **or** (2) the lump sum of employees and employer contributions in the employee's DCR account.

Senator Olson - Asked how quickly are the benefits available to the survivors? What is quickly available to survivors/spouses after death?

- The division processes death benefits within 3 days of notification.
- The Basic Life Insurance is available one week of the division receiving a copy of the death certificate.

Senator Egan - Where did the $647,000 in the fiscal note come from?

Buck Consultants estimates one death a year. Since the deaths will continue past the timeframe of the fiscal note, Buck also calculated the estimated change in the liability going forward for the life of the plan. That change is the $647,000 Sen. Egan is speaking of.

Current DB Plan Liability:	$6,975,028,000
New DB Liability:	$6,975,675,000
Difference:	$647,000

The $647,000 represents the present day value of the expected benefits we would pay over the life time of the plan. Currently we have two occupational P/F deaths, one in the DB plan and one in the DCR plan.

Also see the February 4, 2011 letter from Buck Consultants.

Miscellaneous Questions:

How would SB 38 impact those in Tier I, II, III, IV and a brand new hire?

SB38 would provide an additional $100,000 benefit to the current death benefits already available to peace officers and firefighters.

Senate Finance Committee
SB38 Hearing, February 1, 2012
Questions and Answers

How does this compare with worker's comp?

Death benefits under workers compensation is established by Sec. 23.30.215. To summarize:

- There is an immediate benefit of up to $10,000 for funeral expenses based on whether there is a widow or widower and the number of dependent children, and
- Monthly benefits are based on employees' salaries.

Sec. ⏩23.30.215⏪. Compensation for death.

(a) If the injury causes death, the compensation is known as a death benefit and is payable in the following amounts to or for the benefit of the following persons:

(1) reasonable and necessary funeral expenses not exceeding $10,000;

(2) if there is a widow or widower or a child or children of the deceased, the following percentages of the spendable weekly wages of the deceased:

(A) 80 percent for the widow or widower with no children;

(B) 50 percent for the widow or widower with one child and 40 percent for the child;

(C) 30 percent for the widow or widower with two or more children and 70 percent divided equally among the children;

(D) 100 percent for an only child when there is no widow or widower;

(E) 100 percent, divided equally, if there are two or more children and no widow or widower;

(3) if the widow or widower remarries, the widow or widower is entitled to be paid in one sum an amount equal to the compensation to which the widow or widower would otherwise be entitled in the two years commencing on the date of remarriage as full and final settlement of all sums due the widow or widower;

(4) if there is no widow or widower or child or children, then for the support of father, mother, grandchildren, brothers, and sisters, if dependent upon the deceased at the time of injury, 42 percent of the spendable weekly wage of the deceased to such beneficiaries, share and share alike, not to exceed $20,000 in the aggregate;

(5) $5,000 to a surviving widow or widower, or equally divided among surviving children of the deceased if there is no widow or widower.

(b) In computing death benefits, the spendable weekly wage of the deceased shall be computed under AS 23.30.220 and shall be paid in accordance with AS 23.30.155 and subject to

the weekly maximum limitation in the aggregate as provided in AS 23.30.175 , but the total weekly compensation may not be less than $75 for a widow or widower nor less than $25 weekly to a child or $50 for children.

(c) All questions of dependency shall be determined as of the time of the injury, or death.

(d) Compensation under this chapter to aliens not residents, or about to become nonresidents, of the United States or Canada is the same in amount as provided for residents, except that dependents in a foreign country are limited to widow or widower and child or children, or if there is no widow or widower and child or children, to surviving father or mother whom the employee has supported, either wholly or in part, for a period of one year before the date of injury. The board, at its option, or upon the application of the insurance carrier, may commute all future installments of compensation to be paid to an alien dependent who is not a resident of the United States or Canada by paying or causing to be paid to the alien dependent one-half of the commuted amount of the future installments of compensation as determined by the board.

(e) Death benefits payable to a widow or widower in accordance with (a) of this section shall abate as that person ceases to be entitled and does not inure to persons subject to continued entitlement. In the event a child ceases to be entitled, that child's share shall inure to the benefit of the surviving spouse subject to adjustment as provided in (f) of this section.

(f) Except as provided in (g) of this section, the death benefit payable to a widow or widower shall terminate 12 years following death of the deceased employee.

(g) The provisions of (f) of this section do not apply to a widow or widower who at the time of death of the deceased worker is permanently and totally disabled. The death benefits payable to a widow or widower are not subject to reduction under (f) of this section after the widow or widower has attained the age of 52 years.

(h) In the event a deceased worker is survived by children of a former marriage not living with the surviving widow or widower, then those children shall receive the amount being paid under a decree of child support; the difference between this amount and the maximum benefit payable under this section shall be distributed pro rata to the remainder of those entitled.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB038

Analysis

This bill affects both the PERS Defined Benefit and Defined Contribution plans. The results are based on the 2010 actuarial valuation.

Numbers given above reflect increases in the Annual Employer Contribution Amount due to increase in Normal Cost amount and Past Service Cost amount to the PERS plans. Employer rates in the PERS are set at 22% of eligible payroll by statute (AS 39.35.255). Increases to the Annual Employer Contribution Amount are therefore paid from the State General Fund (AS 39.35.280). Because changes affect years beyond the fiscal note horizon the additional effect on the unfunded liability is as follows: increase of $647,000 in the Defined Benefit Retirement Plan (PERS Tiers I, II, III).

Buck Consultants was supplied the following information from the Division of Retirement and Benefits for their analysis:

We are currently paying 1 occupational death benefit under firefighter occupation in the Defined Benefit Plan.
We are currently paying 1 occupational death benefit under the peace officer occupation in the Defined Contribution Plan.
We are currently paying 6 occupational death benefits with service that is/was not peace officer/firefighter occupation in the Defined Benefit Plan.

MEMORANDUM February 10, 2011

SUBJECT: Sectional Summary of SB 38 (Work Order No. 27-LS0371\A)

TO: Senator Kevin Meyer
Attn: Christine Marasigan

FROM: Dan Wayne
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1. Describes when payment of the one-time $100,000 occupational death benefit established in Sec. 2 of the draft bill would be made, and provides that the payment may not be made to anyone but a surviving spouse or a dependent child of a peace officer or firefighter who was a member of the *defined benefit* retirement plan of the Public Employees' Retirement System.

Sec. 2. Establishes a $100,000 one-time occupational death benefit in the *defined benefit* retirement plan of the Public Employees' Retirement System. The benefit would be payable to the surviving spouse or, if there is no surviving spouse who is eligible to receive payment, to the dependent children, of a peace officer or firefighter whose death is an occupational death under AS 39.35.430. The benefit would be in addition to other occupational benefits for which the surviving spouse or dependent children may be eligible. A surviving spouse or dependent child whose action was a substantial cause of the death would be ineligible.

Sec. 3. Exempts the $100,000 one-time occupational death benefit from post-retirement pension adjustment under AS 39.35.475.

Sec. 4. Describes when payment of the one-time $100,000 occupational death benefit established in Sec. 5 of the draft bill would be made, and provides that the payment may not be made to anyone but a surviving spouse or a dependent child of a peace officer or firefighter who was a member of the *defined contribution* retirement plan of the Public Employees' Retirement System.

Sec. 5. Establishes a $100,000 one-time occupational death benefit in the *defined contribution* retirement plan of the Public Employees' Retirement System. The benefit would be payable to the surviving spouse or, if there is no surviving spouse who is eligible to receive payment, to the dependent children, of a peace officer or firefighter whose death is an occupational death under AS 39.35.892. The benefit would be in addition to other occupational benefits for which the surviving spouse or dependent children may be eligible. A surviving spouse or dependent child whose action was a substantial cause of the death would be ineligible.

ALASKA PROFESSIONAL FIRE FIGHTERS
International Association of Fire Fighters, AFL-CIO, CLC
P.O Box 111222, Anchorage, AK 99511-1222

Honorable Kevin Meyer
Alaska State Senate
State Capital Room 103
Juneau AK 99801

Senator Meyer:

My name is Tom Wescott and I am the President of the Alaska Professional Firefighters Association. The AKPFFA represents roughly 500 firefighters from Kotzebue to Ketchikan and on behalf of these men/women I am writing you today to encourage our Alaska State Legislators to support Senate Bill 38.

Senate Bill 38 provides a onetime occupational death benefit to public safety employees who die in the line of duty. It goes without saying that no one is enthusiastic about using this type of benefit. Unfortunately, we know that occasionally those in public service are called to make the ultimate sacrifice in the line of duty. The benefit provided by SB 38 will allow families to get through the grieving process without having to worry about immediate financial matters. No one can put a price on a life but this benefit will provide a small gesture of thanks to the family of a fallen public safety officer as they began to deal with the loss of their loved one.

Once again I would ask everyone's full support of Senate Bill 38 as a way of supporting our public safety employees' family upon their passing while performing a heroic act.

Sincerely,

Thomas A. Wescott
President
Alaska Professional Fire Fighters Association

Public Safety Employees Association, Inc.

"Representing Alaska's Finest"

A.F.S.C.M.E. Local 83

February 11, 2011

Christine Marasigan
State Capitol Room 103
Juneau AK, 99801

Dear Ms. Marasigan:

The Public Safety Employee's Association Local 803 is a public employee union that represents more the 700 public safety employees throughout Alaska. Our members work as Alaska State Troopers, Airport Police in Fairbanks and Anchorage, Deputy Fire Marshalls in the Department of Public Safety, and municipal police officers and staff employed at the City of Ketchikan, the City of Sitka, the City of Juneau, the City of Fairbanks, the City of Soldotna, and the City of Unalaska.

PSEA wants to submit this letter of support for SB 38, the Line of Duty Death Benefit for peace officers currently in the PERS system, introduced by Senator Meyer. PSEA supports this bill because it protects our members and other peace officers that risk their lives every day protecting all Alaskans. PSEA also supports this bill because it will help families and survivors of peace officers in the most tragic of situations. Finally, PSEA supports this bill because it has a relatively small fiscal impact, and it is a benefit that we all hope, God willing, is not ever necessary.

Please pass on this letter of support to members of the Senate Labor and Commerce Committee. Please also pass on our thanks to the Committee and staff for your consideration of this important legislation. If you have any further questions, please contact me or President Rob Cox at this email, or by phone at 907-337-1979.

Sincerely yours,

Jake Metcalfe
Executive Director
PSEA/AFSCME Local 803

February 10, 2011

Honorable Members of the Alaska State Legislator:

The Anchorage Police Department Employee's Association (APDEA) represents approximately 500 front line police employees. The APDEA unconditionally supports both Senate Bill 38 and House Bill 84. Both of these bills provide for a one time line-of-duty death benefit for our state's public safety employees.

In 2010, officers killed nationwide in the line of duty increased 37% over 2009. In Alaska, from Anchorage to Hoonah, our law enforcement agencies and communities felt this increase in violence against officers. On average, a police officer is killed in the line of duty every 53 hours. Sadly, on January 24th, 2011 - the very same day I was visiting your offices in Juneau, there were eleven police officers shot nationwide, several of whom were killed outright. These facts are troubling and support the growing concern among law enforcement professionals that the trend will worsen as some elements of our society, containing the criminal and disenfranchised, will look for increasingly bold ways to lash out against order.

On the personal side, these deaths damage the officer's organization, their communities and their families. The average officer killed is 38 years old with 12 years of police experience. These officers are killed during hours of limited visibility, the majority in ambushes and usually they are alone. These deaths leave families devastated with varying degrees of benefits and support.

If approved, Senate Bill 38 and House Bill 84 would provide some stability for those public safety families left behind after a tragic event. These bills would provide some "breathing room" for families unprepared for this sudden loss. Particularly in Alaska, where some of our smaller and remote communities have not suffered through the loss of a public safety employee, this bill reminds all Alaskans that we are united.

I urge the Members of the Alaska State Senate and House of Representatives to approve this measure.

Sincerely,

Derek Hsieh
President
APDEA

CS FOR SENATE BILL NO. 42(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act relating to the quorum of the Alaska Energy Authority; relating to the powers and duties of the Alaska Energy Authority; relating to the acquisition or construction of a Susitna River power project by the Alaska Energy Authority; relating to the definition of 'feasibility study' in the Alaska Energy Authority Act; providing legislative approval for certain loans from the power project fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 44.83.040(a) is amended to read:

(a) The chair and vice-chair of the Alaska Industrial Development and Export Authority shall serve as officers of the Alaska Energy Authority. The powers of the Alaska Energy Authority are vested in the directors, and **four** [THREE] directors of the authority constitute a quorum. Action may be taken and motions and resolutions adopted by the Alaska Energy Authority at a meeting by the affirmative vote of a majority of the directors. The directors of the Alaska Energy Authority serve without

compensation, but they shall receive the same travel pay and per diem as provided by law for board members under AS 39.20.180.

* **Sec. 2.** AS 44.83.080 is amended to read:

Sec. 44.83.080. Powers of the authority. In furtherance of its corporate purposes, the authority has the following powers in addition to its other powers:

(1) to sue and be sued;

(2) to have a seal and alter it at pleasure;

(3) to make and alter bylaws for its organization and internal management;

(4) to adopt regulations governing the exercise of its corporate powers;

(5) to improve, equip, operate, and maintain power projects and bulk fuel, waste energy, energy conservation, energy efficiency, and alternative energy facilities and equipment;

(6) to issue bonds to carry out any of its corporate purposes and powers, including the establishment or increase of reserves to secure or to pay the bonds or interest on them, and the payment of all other costs or expenses of the authority incident to and necessary or convenient to carry out its corporate purposes and powers;

(7) to sell, lease as lessor or lessee, exchange, donate, convey, or encumber in any manner by mortgage or by creation of any other security interest, real or personal property owned by it, or in which it has an interest, when, in the judgment of the authority, the action is in furtherance of its corporate purposes;

(8) to accept gifts, grants, or loans from, and enter into contracts or other transactions regarding them, with any person;

(9) to deposit or invest its funds, subject to agreements with bondholders;

(10) to enter into contracts with the United States or any person and, subject to the laws of the United States and subject to concurrence of the legislature, with a foreign country or its agencies, for the construction, financing, operation, and maintenance of all or any part of a power project or bulk fuel, waste energy, energy conservation, energy efficiency, or alternative energy facilities or equipment, either

inside or outside the state, and for the sale or transmission of power from a project or any right to the capacity of it or for the security of any bonds of the authority issued or to be issued for the project;

(11) to enter into contracts with any person and with the United States [,] and, subject to the laws of the United States and subject to the concurrence of the legislature, with a foreign country or its agencies for the purchase, sale, exchange, transmission, or use of power from a project, or any right to the capacity of it;

(12) to apply to the appropriate agencies of the state, the United States, and a foreign country and any other proper agency for the permits, licenses, or approvals as may be necessary, to **acquire, construct,** maintain**,** and operate power projects in accordance with the licenses or permits, and to obtain, hold, and use the licenses and permits in the same manner as any other person or operating unit;

(13) to enter into contracts or agreements with respect to the exercise of any of its powers, and do all things necessary or convenient to carry out its corporate purposes and exercise the powers granted in this chapter;

(14) to recommend to the legislature

(A) the pledge of the credit of the state to guarantee repayment of all or any portion of revenue bonds issued to assist in construction of power projects;

(B) an appropriation from the general fund

(i) for debt service on bonds or other project purposes; or

(ii) to reduce the amount of debt financing for the project;

(15) to carry out the powers and duties assigned to it under AS 42.45;

(16) to make grants or loans to any person and enter into contracts or other transactions regarding the grants or loans;

(17) to promote energy conservation, energy efficiency, and alternative energy through training and public education**;**

(18) to acquire a Susitna River power project, whether by construction, purchase, gift, or lease, including the acquisition of property rights

and interests by eminent domain under AS 09;

(19) to perform feasibility studies and engineering and design with respect to power projects.

*** Sec. 3.** AS 44.83 is amended by adding a new section to read:

Sec. 44.83.085. Susitna River power project annual report. The authority shall prepare, not later than the first day of each regular session of the legislature, an annual report summarizing the status of the Susitna River power project and shall notify the legislature that the report is available.

*** Sec. 4.** AS 44.83.396(a) is amended to read:

(a) A power project that was acquired or constructed **under AS 44.83.080(18) or** as part of the former energy program for Alaska is owned, and shall be administered, by the authority.

*** Sec. 5.** AS 44.83.990(3) is amended to read:

(3) "feasibility study"

(A) means a study conducted for the purpose of establishing the economic and environmental practicality of completing a proposed power project [UNDER FORMER AS 44.83.181];

(B) includes engineering and design work to meet the requirements for submission of a license application for a proposed new project to the Federal Energy Regulatory Commission;

*** Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE APPROVAL OF LOANS FROM THE POWER PROJECT FUND. (a) Provided the Alaska Energy Authority approves a loan for the Haida Energy, Inc., Reynolds Creek hydroelectric project, the legislature authorizes the Alaska Energy Authority to loan an amount not to exceed $11,000,000 from the power project fund (AS 42.45.010) for the Haida Energy, Inc., Reynolds Creek hydroelectric project in addition to the loan authorized by sec. 6, ch. 70, SLA 2010.

(b) Provided the Alaska Energy Authority approves a loan for the Cordova Electric Cooperative Humpback Creek hydroelectric project, the legislature authorizes the Alaska Energy Authority to loan an amount not to exceed $5,000,000 from the power project fund

(AS 42.45.010) for the Cordova Electric Cooperative Humpback Creek hydroelectric project.

(c) Subsections (a) and (b) of this section constitute legislative approval under AS 42.45.010(j) for a loan from the fund that exceeds $5,000,000.

*** Sec. 7.** This Act takes effect immediately under AS 01.10.070(c).

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSSB 42(FIN)

Analysis

This legislation expands the Alaska Energy Authority's powers to allow AEA to acquire a Susitna River power project.

This fiscal note reflects the costs to AIDEA for the increase in personal services related to AEA's establishment of a project office in pursuit of constructing and owning the Susitna Hydro project.

PERSONAL SERVICES: $1,125.0 - Increased to include 8 staff for the first year as follows:
Project Manager Rg 27
Environmental Manager Rg 26
Administrative Assistant Rg 12
Project Accountant Rg 18
Financial/Budget Analyst Rg 24
Public Outreach/Legislation Liaison Rg 23
Procurement Manager Rg 24
Data System Specialist Rg 20

The funding source is an increase to I/A receipts from the Alaska Energy Authority.

See also the related Fiscal Note for the costs to AEA Statewide Project Development component to establish a project office for the Susitna Hydro project.

Why this fiscal note differs from previous version (if initial version, please note as such)

This Fiscal Note estimates employee costs for Susitna Project Office and assumes that new staff are AIDEA employees contracted to the Alaska Energy Authority.

Prepared by: Amy Adler — Phone: 771-3013
Division: Alaska Energy Authority — Date/Time: 4/15/11 4:00 PM
Approved by: Susan K. Bell, Commissioner — Date: 4/15/2011

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSSB 42 (FIN)

Analysis

This legislation expands the Alaska Energy Authority's powers to allow AEA to acquire a Susitna River power project.

This fiscal note reflects the costs to AEA to establish a project office in pursuit of constructing and owning the Susitna Hydro project.

CONTRACTUAL: $1,350.0

$1,125.0 Contractual Services for 8 staff (AIDEA employees) for the first year as follows:

Project Manager - Rg 27
Environmental Manager - Rg 26
Administrative Assistant - Rg 12
Project Accountant - Rg 18
Financial/Budget Analyst - Rg 24
Public Outreach/Legislation Liaison - Rg 23
Procurement Manager - Rg 24
Data System Specialist - Rg 20

Note: Personal Services Costs are reflected in the related Fiscal Note for the AIDEA component.

$225.0 Contractual Services for Building lease, and G&A costs for Project Office. Cost estimates include a cost associated with contract labor personnel.

$ 189.0	Annual Lease - 4,500 sq. ft. (250'/pp x 14 +1000') x $3.50 per sq. ft./mo. x 12 mo.'s.
$ 36.0	G&A Expense: $3.6 per person - $3.6 x 10 (8 staff + 2 contractors).
$ 225.0	

EQUIPMENT/FURNITURE: $413.0 - Increase for first year Project Office set up costs. This cost estimate assumes all equipment and furniture purchases in the first year as well as one time only moving expenses and tenant improvements.

$ 28.0	IT Equipment $2.0 per person x 14 (8 staff + 6 contractors). Assumes all equipment purchases in first year for project office (including contract labor needs).
$ 385.0	Tenant Improvement $315.0 ($70 x 4,500 sq. ft.); Moving Expenses $21.0; and Furniture $49.0
$ 413.0	

Note: Tenant Improvement costs will vary depending on building configuration and may also be negotiated as part of a long term lease.

*** Costs for FY 2017 indeterminate

CS SB 42(FIN) Work Draft E
April 15, 2011
Sectional Analysis

Section 1: Would increase from 3 to 4 the quorum requirement for meetings of the AEA board of directors in reaction to statutory amendments made in 2010. Those amendments increased the size of the AIDEA board from 5 to 7. The AIDEA board serves as the board of AEA. The proposed amendment would correct the quorum for meetings of AEA's board of directors.

Section 2: Would expand AEA's powers to allow AEA to apply for permits and licenses to acquire and construct new projects, to construct or otherwise acquire a power project on the Susitna River, to conduct feasibility studies of new power projects. This authority would enable AEA to initiate the FERC licensing process for the Watana hydroelectric project on the Susitna River. Authorizes AEA to acquire property rights by eminent domain under AS 09.

Section 3: Would require AEA to submit to the legislature an annual report summarizing the status of the Susitna River power project.

Section 4: Would provide that AEA must exercise for new power projects, existing statutory authority regarding the management of AEA owned power projects. AS 44.83.396 addresses how AEA administers the power project and contracts for operators, and includes provisions providing for AEA to contract with qualified utilities for the operation of a power project. The statutory provisions are currently limited to power projects from the pre-1993, "former energy program for Alaska."

Section 5: Would amend the definition of "feasibility study" under AS 44.83.990(3) so that the term is not limited to only pre-1993 power projects.

Section 6: Would provide legislative approval for AEA to make two power project loans. The first loan is for up to $11,000,000 for the Haida Energy, Inc. Reynolds Creek hydroelectric project. This authorization would be in addition to the legislative approval given for a $9,000,000 loan for the project under sec. 6, ch. 70, SLA 2010; for a total approved power project loan of up to $20,000,000. The second loan is for $5,000,000 for the Cordova Electric Cooperative Humpback Creek hydroelectric project. Under AS 42.45.010(j), the legislature must approve the project and power project loan amount if the cumulative state monetary support from loans, grants, and bonds for the project equals or exceeds $5,000,000.

Section 7: Would provide for an immediate effective date.

Adopted 4/16/11

CS FOR SENATE BILL NO. 42(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act relating to the quorum of the Alaska Energy Authority; relating to the powers and duties of the Alaska Energy Authority; relating to the acquisition or construction of a Susitna River power project by the Alaska Energy Authority; relating to the definition of 'feasibility study' in the Alaska Energy Authority Act; providing legislative approval for certain loans from the power project fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 44.83.040(a) is amended to read:

(a) The chair and vice-chair of the Alaska Industrial Development and Export Authority shall serve as officers of the Alaska Energy Authority. The powers of the Alaska Energy Authority are vested in the directors, and **four** [THREE] directors of the authority constitute a quorum. Action may be taken and motions and resolutions adopted by the Alaska Energy Authority at a meeting by the affirmative vote of a majority of the directors. The directors of the Alaska Energy Authority serve without

compensation, but they shall receive the same travel pay and per diem as provided by law for board members under AS 39.20.180.

* **Sec. 2.** AS 44.83.080 is amended to read:

Sec. 44.83.080. Powers of the authority. In furtherance of its corporate purposes, the authority has the following powers in addition to its other powers:

(1) to sue and be sued;

(2) to have a seal and alter it at pleasure;

(3) to make and alter bylaws for its organization and internal management;

(4) to adopt regulations governing the exercise of its corporate powers;

(5) to improve, equip, operate, and maintain power projects and bulk fuel, waste energy, energy conservation, energy efficiency, and alternative energy facilities and equipment;

(6) to issue bonds to carry out any of its corporate purposes and powers, including the establishment or increase of reserves to secure or to pay the bonds or interest on them, and the payment of all other costs or expenses of the authority incident to and necessary or convenient to carry out its corporate purposes and powers;

(7) to sell, lease as lessor or lessee, exchange, donate, convey, or encumber in any manner by mortgage or by creation of any other security interest, real or personal property owned by it, or in which it has an interest, when, in the judgment of the authority, the action is in furtherance of its corporate purposes;

(8) to accept gifts, grants, or loans from, and enter into contracts or other transactions regarding them, with any person;

(9) to deposit or invest its funds, subject to agreements with bondholders;

(10) to enter into contracts with the United States or any person and, subject to the laws of the United States and subject to concurrence of the legislature, with a foreign country or its agencies, for the construction, financing, operation, and maintenance of all or any part of a power project or bulk fuel, waste energy, energy conservation, energy efficiency, or alternative energy facilities or equipment, either

inside or outside the state, and for the sale or transmission of power from a project or any right to the capacity of it or for the security of any bonds of the authority issued or to be issued for the project;

(11) to enter into contracts with any person and with the United States [,] and, subject to the laws of the United States and subject to the concurrence of the legislature, with a foreign country or its agencies for the purchase, sale, exchange, transmission, or use of power from a project, or any right to the capacity of it;

(12) to apply to the appropriate agencies of the state, the United States, and a foreign country and any other proper agency for the permits, licenses, or approvals as may be necessary, to **acquire, construct,** maintain**,** and operate power projects in accordance with the licenses or permits, and to obtain, hold, and use the licenses and permits in the same manner as any other person or operating unit;

(13) to enter into contracts or agreements with respect to the exercise of any of its powers, and do all things necessary or convenient to carry out its corporate purposes and exercise the powers granted in this chapter;

(14) to recommend to the legislature

(A) the pledge of the credit of the state to guarantee repayment of all or any portion of revenue bonds issued to assist in construction of power projects;

(B) an appropriation from the general fund

(i) for debt service on bonds or other project purposes; or

(ii) to reduce the amount of debt financing for the project;

(15) to carry out the powers and duties assigned to it under AS 42.45;

(16) to make grants or loans to any person and enter into contracts or other transactions regarding the grants or loans;

(17) to promote energy conservation, energy efficiency, and alternative energy through training and public education**;**

(18) to acquire a Susitna River power project, whether by construction, purchase, gift, or lease, including the acquisition of property rights

and interests by eminent domain under AS 09;

(19) to perform feasibility studies and engineering and design with respect to power projects.

* **Sec. 3.** AS 44.83 is amended by adding a new section to read:

Sec. 44.83.085. Susitna River power project annual report. The authority shall prepare, not later than the first day of each regular session of the legislature, an annual report summarizing the status of the Susitna River power project and shall notify the legislature that the report is available.

* **Sec. 4.** AS 44.83.396(a) is amended to read:

(a) A power project that was acquired or constructed **under AS 44.83.080(18) or** as part of the former energy program for Alaska is owned, and shall be administered, by the authority.

* **Sec. 5.** AS 44.83.990(3) is amended to read:

(3) "feasibility study"

(A) means a study conducted for the purpose of establishing the economic and environmental practicality of completing a proposed power project [UNDER FORMER AS 44.83.181];

(B) includes engineering and design work to meet the requirements for submission of a license application for a proposed new project to the Federal Energy Regulatory Commission;

* **Sec. 6.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE APPROVAL OF LOANS FROM THE POWER PROJECT FUND. (a) Provided the Alaska Energy Authority approves a loan for the Haida Energy, Inc., Reynolds Creek hydroelectric project, the legislature authorizes the Alaska Energy Authority to loan an amount not to exceed $11,000,000 from the power project fund (AS 42.45.010) for the Haida Energy, Inc., Reynolds Creek hydroelectric project in addition to the loan authorized by sec. 6, ch. 70, SLA 2010.

(b) Provided the Alaska Energy Authority approves a loan for the Cordova Electric Cooperative Humpback Creek hydroelectric project, the legislature authorizes the Alaska Energy Authority to loan an amount not to exceed $5,000,000 from the power project fund

(AS 42.45.010) for the Cordova Electric Cooperative Humpback Creek hydroelectric project.

(c) Subsections (a) and (b) of this section constitute legislative approval under AS 42.45.010(j) for a loan from the fund that exceeds $5,000,000.

*** Sec. 7.** This Act takes effect immediately under AS 01.10.070(c).

Hydroelectric Project Risk Analysis & the Bradley Lake Funding Model

Summary Report

SNW

1420 Fifth Avenue, Suite 4300
Seattle, Washington
98101

Phone: (206) 628-2882

Fax: (206) 343-2103

11/15/2010

INTRODUCTION

The State of Alaska is analyzing the Susitna and Chakachamna hydroelectric projects for possible development. Both projects would require the investment of substantial resources and capital to move to the construction phase, including time and costs associated with an environmental review and the Federal permitting and licensing process. As part of the information gathering process, SNW has been asked to perform the following specific work tasks:

1. List and, if possible, assess the potential risks from an investor's perspective of the Susitna and Chakachamna hydroelectric projects.
2. Research, compare and contrast the Bradley Lake project and its original funding mechanisms to a potential similar project today.

Context for the Risk Assessment Component of This Report

Currently, there are several large hydroelectric facilities being constructed around the world. Many of these projects are being built in the BRIC nations (Brazil, Russia, India and China), where there are fewer permitting and environmental challenges to overcome. Nearly all projects of the size and scope of Susitna and Chakachamna currently being developed internationally are structured with some amount of government assistance or government guaranty, and many also include an equity investor participant. Some examples include China's Three Gorges, BC Canada's Toba Montrose, BC Canada's Waneta Expansion, Thailand/Laos' Pak Chom and Ban Koum projects (similar size/costs), and Brazil's Santo Antonio. The Waneta Expansion project financing is typical of the structures used to develop large hydro electric facilities; a more detailed description follows:

Waneta Expansion Project Description

Fortis Inc., an electric utility holding company, has entered into a partnership with Columbia Basin Trust (CBT) and Columbia Power Corporation (CPC), both 100% owned corporations of the Government of British Columbia, to construct a $900 million 335 megawatt hydroelectric generating facility on the Pend d'Oreille River, near Trail, British Columbia. The partnership calls for Fortis to own and operate 51% of the non-regulated portion of the facility and the CBT/CP group to own and operate the other 49% of the Waneta Expansion Project. The energy generated by the project will be sold to BC Hydro under a long-term power purchase contract. The surplus capacity will be sold to FortisBC under a long-term capacity purchase agreement. Fortis' portion of the initial financing costs are expected to be covered through credit facilities and then through long-term debt and equity take-out financing. The CPC portion is being funded through a $500 million commitment to be used as equity funding for joint venture power projects. Construction on the Waneta Expansion Project is expected to last four and a half years.

One important distinction between the large generation projects being constructed globally and the projects under consideration in Alaska is that the projects being built globally have access to large populations via transmission grids. This ability to both serve the immediate power consumption needs within the facility's service area and have access to other markets via a transmission system improves the baseline feasibility of a power generation facility and creates the option to develop excess capacity, which can be sold at market rates. Without state or federal support, Alaska's isolated geographic location eliminates the ability to build capacity which, when added to the current generation capabilities within the railbelt, exceeds existing demand.

It is the isolated geographic location of the railbelt customer base, in combination with the scope and complexity of the Chakachamna and Susitna projects, that lead us to conclude that neither of these facilities can be completed through a project finance vehicle (i.e., the security for the financing would be exclusively revenue from the sale of project-generated power). In our view, these projects will require State funding, which could be directly via capital investment and/or indirectly through some form of credit support or backstop, in order to obtain securities market access. It is also our view that it is reasonable for the State to consider investing in railbelt generation assets with the objective of developing a long-term stable source of base load power at a cost that will promote economic stability and growth within the railbelt region. Nevertheless, the process the State should go through in determining whether to invest additional time and resources into either the Susitna or Chakachamna project is analogous to the diligence that an equity investor would perform prior to the commitment of capital.

The following section identifies many of the risks inherent to an investment in either the Susitna or Chakachamna project. SNW is not qualified to advise AEA on the susceptibility of Susitna or Chakachamna to most of the risks identified. Many of these risks are focused on engineering or geological elements specific to the projects, and we are not an engineering firm. For this reason, we have confined our work to just the identification and explanation of risks, and for the most part have withheld any opinion as to whether either of the projects is more or less susceptible to a particular risk. The State, with its engineering and geotechnical resources and significant history with each of these proposed facilities, is in the best position to risk-weight the projects. Our objective is to help to identify as many of the project risks as possible and provide some framework to assist AEA with its risk assessment.

FINANCING CRITERIA: DISTINGUISHING RISK

Through a review of publicly available websites and documents footnoted or sourced throughout this report, we have evaluated and categorized some of the different risks associated with the two selected projects. As with the analysis of any project finance type structure, an investor will rely on a project feasibility study to outline the various engineering risk factors and risk mitigation efforts that are being undertaken throughout the stages of project development. SNW has not specifically studied nor are we suited to evaluate the two projects with respect to the different types of geological, volcanic, environmental risks, etc. from an engineering perspective. However, it is these risks that primarily distinguish Susitna and Chakachamna from one another.

Some potential risk factors are discussed below:

Overall Project Timeline

Both Susitna and Chakachamna are expected to take multiple years to permit and construct. The phased execution of the projects over multiple years has the effect of amplifying the elements of construction risk and reducing the overall confidence in project feasibility. Specifically with regard to Susitna and Chakachamna, the remote location of the projects will also be a factor in timely completion of the projects and therefore project feasibility. A large risk factor associated with either project is the unknown site or geological issues that could materialize during the construction phase. All other factors being equal, a shorter project permitting process and construction timeline is likely to result in less project risk.

Permitting and Licensing

There will be significant permitting risk, at both the Federal and local/State level. Projects of this scope and size would expect strong environmental opposition to the facility, transmission lines, roads (even if only

temporary), and/or railroads. Any project financing would occur only after all permits/licenses were issued and all court challenges were exhausted, so investment of capital leading to the permitting of either project will be substantial. Any risk assessment of the projects under consideration based on permitting and licensing should be done while simultaneously considering the feasibility of construction and the long-term operating viability of the project.

Development/Pre-construction

There is a significant portion of pre-construction development work that needs to be completed, at a sizable cost. These expenditures are rarely risks that investors will carry. Pre-construction costs would have to be paid by the State or an independent developer.

Construction Risk

Both the Chakachamna and Susitna projects are subject to a variety of construction risks. The three primary credit concerns relating to construction include (1) the cost of the project, (2) the schedule for the project, and (3) the quality of the completed project. Each can negatively impact the availability of funding and/or the date that the project comes on-line and begins producing revenue.

Project cost risk is influenced by a whole host of risks inherent to both projects in various degrees. As noted above, the duration of construction can amplify the risk of many of these cost factors. Some of the risk elements that can influence project cost are:

Inflation Risk. The risk that the future cost of materials and/or labor will exceed estimates.

Supply Risk. The risk that materials required for construction will be unavailable due to competing construction demand and/or the inability to deliver materials to the job site due to a remote location or problems along the supply route.

Labor Risk. The risk that there will be either a shortage of the labor required to move the project forward on schedule or a work stoppage delaying completion.

Engineering Risk. The risk that the project will encounter unanticipated and/or under-estimated construction challenges. While we are not an engineering firm, it is our understanding that many large project cost overruns are caused by unforeseen underground conditions. The scope and nature of underground work at both Susitna and Chakachamna should be carefully assessed and factored into overall project feasibility.

Contractor Risk. The risk that a contractor will fail to perform on its contractual obligations. This risk can be mitigated by allocating construction risks among the various project participants through the use of design/build contracts and the implementation of fixed price/fixed schedule agreements, and by including price incentives and disincentives in construction contracts. Nevertheless, it is impossible to completely insulate a project from contractor risk, and the overall complexity of the project including project sighting and engineering should be factored into the risk assessment.

Geological Risk Factors

There are significant potential geological risks associated with the two projects, which have been identified and discussed in the following documents:

Susitna Project, Watana and High Devil Canyon – RCC Dam Cost Evaluation, prepared by R&M Consultants, Hatch Acres, and Jack Linnard Consulting (which sourced two other studies including *1982 Feasibility Study* (Acres), and *1983 License Application* (Harza Ebasco 1983)).

Chakachamna Hydroelectric Project – Interim Feasibility Assessment Report, prepared by Bechtel Civil & Minerals Inc., 1983.

Both projects entail significant project risk and it is our opinion that the risks associated with both projects would require substantial financial backing in the form of credit support from the State to be feasible. For Chakachamna, the potential implications of Mt. Spurr volcanic activity, the close proximity of the Castle Mountain fault, and the geological nature of the lake tap would be significant areas of concern for investors. From a capital markets perspective, and not based on any engineering expertise, it is our opinion that the seismic and geological risk factors connected to the Susitna project seem to be considerably less than Chakachamna, nevertheless Susitna will demand extensive seismic and geological analysis prior to obtaining outside capital funding.

Environmental (Fish, Plant, Wildlife) Risk Factors

Both projects will incur environmental issues in the form of fish passage, changes in water quality and temperature, vegetation removal, wildlife habitat loss or alteration, and reservoir fluctuations. These risks may not be limited to the construction period. Post-construction environment risk could materialize due to an unanticipated environmental impact. Again, based solely on our capital markets perspective, the design of the Chakachamna project, which will necessitate the diversion of water flow from one drainage to another, appears to have the increased potential for environmental risk, particularly the potential for post-construction environmental damage and possible corresponding operating risk.

Regulatory/Legal Risk Factors

While there are significant federal hurdles associated with the permitting of a hydro project (of any size), there have been some recent positive legal developments out of Washington, D.C. The U.S. Department of Energy, Department of Interior, and the Army Corps of Engineers recently signed a Memorandum of Understanding intended to promote the development of hydropower in the United States. The MOU is intended to increase cooperation among the different agencies and to integrate policies and procedures at the federal level. This potentially creates efficiencies through the regulatory approval process and an improvement in the time frame in which required approvals are obtained.

Notwithstanding the above, it would be a mistake to proceed with either project under the assumption that there is no political risk. While politically stable, the United States has a long history of changing rules and regulations due to a political shift in governance or general public sentiment.

Technology Risk

Hydro is a tried and true technology capable of providing very stable base load power, but it is capital-intensive. The possibility of technological improvements in other sources of base load power leading to greater output, lower environmental impact, and reduced generation and transmission costs would be a factor for any investor. This risk factor can be mitigated through the structure of the Power Purchase Agreement.

BRADLEY LAKE COMPARISON ANALYSIS

Description and History

The Bradley Lake Hydroelectric Project is located in south-central Alaska at the southern end of the Kenai Peninsula. The project includes a 610–feet-long, 125–feet-high concrete-faced and rock-filled gravity dam, a 3.5-mile power tunnel and a steel-lined penstock. The project has 126 megawatts of installed capacity. Two

20-mile, 115-kilovolt transmission lines connect the project to a transmission system on the Kenai Peninsula. The project provides electric power to the most populous areas of Alaska, including the Kenai Peninsula, the Municipality of Anchorage, the Matanuska-Susitna Borough, and the Fairbanks area. Under a Power Sale Agreement, AEA has sold 100% of the capacity to the following purchasers:

- Chugach Electric Association, Inc. (30.4%);
- Municipality of Anchorage (25.9%);
- Alaska Electric Generation & Transmission Cooperative, Inc. (25.8%) acting on behalf of Homer Electric Association, Inc. (12.0%) and Matanuska Electric Association, Inc. (13.8%);
- Golden Valley Electric Association, Inc. (16.9%); and
- City of Seward (1.0%).[1]

The power generation potential of Bradley Lake was first studied by the U.S. Corps of Engineers and presented in a report dated March 1955. The project was authorized by Congress in 1962, but, despite its feasibility, federal funds were not available for its construction. The Alaska Energy Authority (then Alaska Power Authority) assumed responsibility for the project in 1982. Preliminary plans and field investigations started in 1982. In April 1984, AEA submitted a license application to the Federal Energy Regulatory Commission. The FERC license is the primary regulatory approval governing project development. The license to construct the project was issued on December 31, 1985, under the Energy Program for Alaska. In addition to the FERC license, AEA applied for and received 170 federal, State and local permits and licenses required to support construction and operations. A number of studies and investigations were performed to ascertain the geologic and geotechnical conditions of the site and structures. Seismic design considerations and the results of the investigations were reviewed and found prudent by the projects' technical review board and the FERC board of consultants.[2] In addition, a number of environmental studies were done, including studies of the effects of the project on wildlife, fish and winter ice conditions.[3] Construction of the project commenced on June 17, 1986, with site preparation work. Construction was suspended, however, after the completion of Phase I in May 1987 due to the pending negotiations of a satisfactory power sales agreement. In December 1987, AEA and the railbelt utilities entered into a Power Sales Agreement, and legislation was introduced in January 1988 to exempt the Bradley Lake power sales agreements from review by the Alaska Public Utilities Commission.[4] Construction of the project resumed on March 12, 1988, and the project was declared in commercial operation on September 1, 1991. From the project's completion in 1991 through 2009, the project has had an average annual output of 386.4 million kilowatt hours.

Original Financing

Project cost in the amount of $357.2 million (including reserves, capitalized interest, and cost of debt issuance) was funded long-term by (1) appropriations from the State in the initial aggregate amount of $175 million (later reduced to $163.6 million), (2) proceeds from the sale of AEA's bonds issued in the amount of $165.3 million, and (3) approximately $28.3 million of interest earnings during construction. A portion of the

[1] Alaska Energy Authority Bradley Lake Hydroelectric Project Fact Sheet (2010)
[2] Alaska Energy Authority Power Revenue Bonds, Second Series Official Statement (1990)
[3] "Throwing the switch at Bradley Lake," Alaska Business Monthly (1991)
[4] "Throwing the switch at Bradley Lake," Alaska Business Monthly (1991)

State appropriations funding was provided by the Railbelt Energy Fund, which was established from the Power Development Fund and seeded with appropriations for the canceled Susitna Hydroelectric Project.[5]

AEA issued approximately $267.5 million of Variable Rate Demand Bonds during the project construction phase to be used for construction cost. The Variable Rate Demand Bonds were sized in an amount that, together with interest earnings, would be sufficient to completely cover construction of the project. This approach created the ability to earn the maximum amount of interest earnings during construction. The Variable Rate Demand Bonds were general obligations of AEA and were secured by bank letters of credit and a capital reserve fund under an Indenture of Trust from AEA to the Bank of New York. Following construction, the Variable Rate Demand Bonds were redeemed using a combination of State-appropriated funds and the proceeds of long-term, fixed rate bonds issued in the amount of $165.3 million. The initial bond sales were issued in very flat yield curve environments, with interest rates ranging from 6.1% on the short end to 7.25% on the long end.[6] The original financing plan for the project is outlined in the table below:

FINANCING PLAN FOR BRADLEY LAKE

Available Funds	
Long-Term Bond Issuances	$ 165,260,157
State Appropriations	163,605,157 *
Interest Earnings from VRDBs	28,375,379
Total	$ 357,240,693
Application of Funds	
Project Construction	$ 312,500,000
Capitalized Interest	17,418,182
Capital Reserve Fund	13,392,890
Renewal and Contingency Fund	5,000,000
Bond Insurance Premiums	1,302,839
Bond Issuance Expenses	3,339,175
Operating Reserve Account	625,000
Net Original Issue Discount	3,662,607
Total	$ 357,240,693

* The original appropriation was in the amount of $175,080,000, but $11,474,843 was refunded to the State after construction.

[5] "Allure of the Railbelt Energy Fund," Alaska Business Monthly (1990)

[6] Electronic Municipal Market Access and Alaska Energy Authority Power Revenue Bonds, Second Series Official Statement (1990)

The Variable Rate Demand Bonds were refunded through two long-term issuances, the first in 1989 in the amount of $105 million and the second in 1990 in the amount of $60,259,015. The sources and uses for the permanent financing of the project are outlined in the table below.

	1st Series Revenue Bonds	2nd Series Revenue Bonds	Total
Sources			
Principal Amount of Bonds	$ 105,001,142	$ 60,259,015	$ 165,260,157
Existing Funds*	100,000	227,848,767	227,948,767
Total	$ 105,101,142	$ 288,107,782	$ 393,208,924
Uses			
Redemption of Variable Rate Demand Bonds	$ 76,600,000	$ 190,900,000	$ 267,500,000
Deposit to Construction Fund	-	82,300,919	82,300,919
Deposit to Interest Account	12,245,356	3,840,138	16,085,494

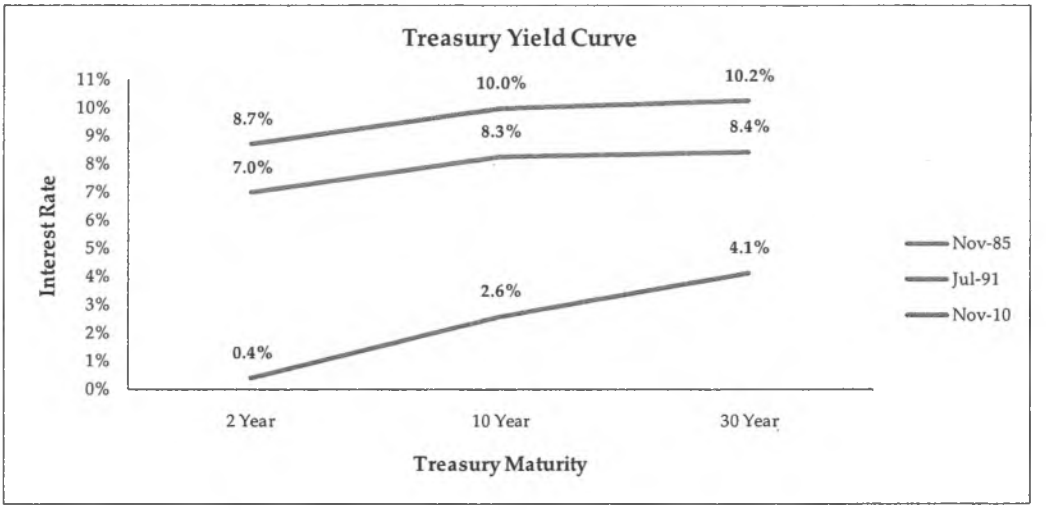
Comparison of Current Financing Environment

The project was an innovative deal at the time that it was originally built and financed, and was the first instance of a state agency financing a power project on a long-term basis.[7] While the current financing environment is very different from that of 25 years ago, when the project was developed, the size, scope and success of the project makes it a relevant standard to analyze when considering a comparable large scale hydroelectric project. For this comparison, we have focused on highlighting the key components of the original financing relative to what could be expected in today's market. These components include:

- Arbitrage and investment earnings
- Rate environment and pricing
- Equity
- Security
- Power sales agreement
- Regulatory review and waivers
- Financing terms and conditions

Arbitrage and Investment Earnings: During the construction phase of the Bradley Lake project $267.5 million of Variable Rate Demand Bonds were utilized as interim funding and were later repaid through the

[7] Alaska House Judiciary Committee, Action Narrative, January 26, 1988. Tape 88 Side 1.



combination of State appropriations, which, in effect, acted as equity in the transaction, and long-term fixed rate revenue bonds, which would be backed by the power sale agreement. One significant aspect of variable rate demand bonds issued at the time is that, because they were issued prior to the Tax Reform Act of 1986, unspent proceeds from the bonds could be invested at a higher, taxable rate of interest. This interest rate arbitrage was used as additional source of capital for the project. Investment earnings on this arbitrage over the life of the Bradley Lake variable rate demand bonds equaled $28.3 million or approximately 9.0% of the total project costs. The 1986 Tax Act eliminated any ability to use tax-exempt bond proceeds to earn interest arbitrage, so interest rate arbitrage would not be available for a similar transaction today.

Rate Environment and Pricing: The 1980s saw a declining interest rate environment with relatively flat yield curves. While rates did not decrease in a linear fashion, due to some volatility in the decade, the overall rate decrease was fairly dramatic. For example, the 10-year treasury rate went from almost 15% in 1981 to around 8% in 1989, while the 2-year treasury rate went from almost 16% to around 8% over the same period. Long-term rates were in the 10% range in 1985 when the variable rate demand bonds were issued. The permanent take-out bonds were issued on a serial basis, with interest rates ranging from 6.10% on the short end to 7.25% on the long end. This environment is very different from the one we are currently experiencing, with historically low rates and a very steep yield curve. Rates on the 2-year treasury are currently 0.38%, while the 30-year treasury is around 4.12%.

The combination of historically high long-term tax exempt interest rates and a declining interest rate environment made variable rate bonds during the construction phase of Bradley Lake a good choice. As noted above, prior to being expended on the project, proceeds of bonds issued during the construction phase were invested above the variable rate cost of capital, creating interest earnings that exceeded the interest cost of the construction financing. The Bradley Lake funding structure took full advantage of the arbitrage strategy by borrowing for the full amount of the project, including the amount that was expected to be loaned by the State.

Additionally, the use of variable rate bonds served to minimize borrowing cost during construction. As bond proceeds were expended and therefore no longer able to be invested to create arbitrage earnings, the cost of interest was minimized since, in the typical upward-sloping yield curve environment, short-term variable rates were lower than long-term fixed rates. The combination of arbitrage earnings and low rates once bond proceeds were spent served to lower the funding cost of the project during the construction phase.

The Bradley Lake funding cost was additionally benefitted by falling rates during the construction period. As construction wrapped up, the variable rate bonds were refinanced with long-term fixed rate bonds in a lower interest rate environment than the long-term rate environment that existed when the project was started, as illustrated in the table below.

Interest rate risk is always a concern for project feasibility. Rising rates during project construction can substantially jeopardize project feasibility. By utilizing variable rate funding during the construction phase of the project, Bradley Lake was exposed to rate risk; however, this was a calculated risk, since the project was started in a high interest rate environment. Variable rate funding could also be a tool utilized to finance either Susitna or Chakachamna to provide extremely low-cost capital during the construction phase. Of course, the projects would be exposed to interest rate risk until the long-term fixed rate funding is secured. Contrary to 1985, today's long-term interest rates are historically low, creating an incentive to use fixed rate funding during the construction phase and eliminate the risk of rising rates.

While eliminating rate risk, fixed rate funding would likely result in additional cost in the form of negative arbitrage, or the inability to invest construction proceeds at or above the long-term borrowing rate, during the construction phase. Since negative arbitrage would only exist during the construction phase, it should be considered as an additional cost that, at least in the current rate environment, is outweighed by the risk of rising rates.

Equity: Another key component of the Bradley Lake funding structure was the large percentage of equity that was provided through appropriations from the State. State appropriations for the project ended up accounting for approximately 50% of the total project costs. The State's participation in the Bradley Lake project allowed the substantial capital cost of the project to be spread over a period of time that exceeded what would have been available through the bond market.

Security: The Variable Rate Demand Bonds were backed by a letter of credit as well as a general obligation of AEA. The permanent take out bonds were backed by revenues of the power sale agreement, the general obligation and full faith and credit of AEA as well as a moral obligation of the State. In today's environment, an investor would expect to see at least this level of credit support for a deal of this size and complexity.

Power Sales Agreement: The power sale agreement is simply the business deal between the power generator and the power purchaser and can be used to shift risk from the generator/developer to the power purchaser. The power sale agreement in the Bradley Lake project was heavily negotiated by the various parties and at one point was actually the cause of a significant construction delay on the project.[8] As the main source of payment and security, the power sale agreement was integral in arranging the permanent financing. A unique attribute

[8] Throwing the Switch at Bradley, Alaska Business Monthly (1991)

of the Bradley Lake power sale agreement was that the agreed payments continued for an additional 20 years after bonds used to fund the project were scheduled to be retired. This structure was designed to repay the State for the considerable capital that was contributed to the project but also served to extend the time frame for amortizing the cost the project.[9] SNW believes that this aspect of the Bradley Lake contract has applicability to future generating projects within the railbelt.

Regulatory Review and Waivers: While no one would argue that the Bradley Lake project was fast tracked, given the time spent on analysis and the rigorous regulation process that was required, two key waivers were obtained in the process. The first was a special federal exemption that allowed the project to use tax-exempt financing despite the fact that it would serve three contiguous counties. Normally, private activity bonds for electric facilities are exempt only if the facilities are used by a utility serving no more than two contiguous counties. Secondly, the sale and purchase agreement was exempt from APUC review, which removed a great deal of uncertainty within the investor community and seems to have been instrumental in moving the project forward at a critical juncture in time.[10] While these specific waivers may not be necessary for a similar project in today's environment, it is important to remember that a project of this size and scope has the potential to require various agencies and levels of the public sector to work together to achieve success.

Financing Terms

The tables below outline the key terms and conditions achieved in the Bradley Lake financings compared to what might be achievable for a similar project today.

[9] Alaska House Judiciary Committee, Action Narrative, January 26, 1988; tape 88 side 1

[10] Alaska House Judiciary Committee, Action Narrative, January 26, 1988; tape 88 side 1

INITIAL CONSTRUCTION FINANCING

FUNDING MECHANISMS	ORIGINAL BRADLEY LAKE PROJECT	POTENTIAL PROECT TODAY
Construction Costs	$312,500,000	Dependent on project
Equity (State Allocation)	$175,000,000	Likely to be greater than 50% or more of total project cost
Interim Financing	Variable Rate Demand Bonds	State funding potentially in combination with conventional bond funding
Amount of Bonds	$267,500,000	Dependent on project
Date Issued	11/20/1985	Dependent on project
Use of Funds	Construction	Permitting, licensing, construction
Security	General Obligation of the Authority, Letter of Credit and Capital Reserve	Dependent on project; however, for a large scale project, investors would expect to see significant credit support
Financing Costs		Dependent on project
Interest Rate	Variable Rate	Dependent on security, interest rate environment, tax-status, size, credit rating
Letter of Credit	Required	Possible requirement
Capital Reserve	Required	Necessary requirement
Completion Bonds	Allowed without compliance	-

PERMANENT TAKE-OUT FINANCING

FUNDING MECHANISMS	ORIGINAL BRADLEY LAKE PROJECT	POTENTIAL PROECT TODAY
Bond Resolution	Maximum of $175,000,000	-
Par Amount Issued	$165,260,157 $105,001,142 Series 1 $60,259,015 Series 2	-
Credit Rating	Moody's Aaa (enhanced) S&P AAA (enhanced)	-
Type	Negotiated / Tax Exempt	-
Underwriters	John Nuveen & Co; Goldman Sachs; Merrill Lynch; Paine Webber; and Lehman Brothers	-
Dates Issued	9/1/1989 Series 1 7/15/1990 Series 2	-
Use of Funds	Refund VRDB and capitalize reserve funds	-
Financing Costs		-
Interest Rate		-
Security for Bonds	Direct and general obligations and full faith and credit of the Authority and revenues received from operation of the project under Power Purchase Agreement	-
Insurance	Yes and provided by MBIAC	-
Power Purchase Agreement	Five utilities purchase 100% of Annual Project Costs, including debt service and annual reserves	Likely different structure than Bradley Lake, but there will need to be a strong PPA in place between the project owner and the railbelt utilities
Power Purchase Default	If insufficient funds available because of payment default of Power Purchaser, ADA may increase each other Power Purchaser's share of costs up to 25%	Step-up provision in the PPA will be a necessary security structure feature; however, it could be structured differently than Bradley Lake
Capital Reserve Fund	Equal to Maximum Aggregate Debt Service	Required, but could be structured differently than Bradley Lake
State Obligation	Moral obligation of the State to restore Capital Reserve Fund	Will depend on PPA structure, but State pledge of any kind would benefit the credit
Completion Bonds	Allowed on parity	Yes, typically up to 10% of original bonds issued to fund the project
Additional Bonds	May be issued on parity for the cost of acquisition and construction of any capital improvement related to the project with approval from the project	Dependent upon type of debt. It is not typical to allow additional bonds for a project revenue bond structure however system debt would permit additional bonds

	management committee as well as proof that the additional bonds will not hinder debt service payments on the original bonds	subject to meeting certain financial thresholds. Bradley Lake is a hybrid additional bonds provision.
Consultant Engineer	Report estimating the projected costs and revenue requirements for a 10-year period as well as opinions on the project	Required
Renewal and Contingency Reserve Fund	Yes	Required
Operating Reserve Account	Yes	Required
Optional Redemption	102% (7/1/00-6/30/01) 101% (7/1/01-6/30/02) 100% (7/1/02 – thereafter)	Will depend on debt type. Taxable bonds would typically not permit optional redemption, while tax-exempt bonds would allow for optional redemption.
Notice of Redemption	At least 30 days but no more than 60 days	-

State Financial Assistance

As identified in previous reports[11] discussing potential financing structures for large generation assets, State financial assistance in a form similar to the Bradley Lake project model will be a necessary tool for either of the potential hydroelectric projects being evaluated. State financial assistance offers a number of advantages not available through traditional utility enterprise bond funding or project finance. State funding, whether in the form of a grant or loan, can be utilized to defer higher cost conventional revenue bond funding. Obviously a grant from the State provides the cheapest form of capital, but even when structured as a loan, State assistance can dramatically lower the overall cost of capital. State funding in the form of a loan has three significant advantages when compared to revenue bonds or a loan from a commercial lender:

Repayment flexibility. State funding can be utilized to extend debt repayment beyond the terms available in the public or commercial debt capital markets. Additionally, a State loan can easily be restructured or deferred to achieve system rate objectives.

Credit support/risk mitigation. State funding can be used to mitigate project construction risk to investors. This is particularly relevant for projects with extended construction timelines, such as the Susitna or Chakachamna hydro projects. Risk mitigation is also relevant in situations where permitting is an issue or a new technology is being used. As discussed earlier, investors will not accept the significant construction and permitting risks inherent with large-scale projects without some form of support from the State.

Potential interest cost benefit. State funding can provide a lower cost source of capital. The State's high investment grade credit rating allows it to borrow for less than even the most secure utility enterprise, and this lower borrowing cost can be passed on to the project. Alternatively, the State can use cash reserves to invest in a large-scale generation project like Susitna or Chakachamna. By using a funding model similar to Bradley Lake's, this capital investment can be returned to the State over an extended period of time. Extending the return of capital to a term that more closely matches the useful

[11] Regional Integrated Resource Plan – Financial Analysis Summary Report, 2/3/2010

life of the asset lowers the rates and charges for utility customers and spreads the capital cost of the project over a larger customer base.

CONCLUSION

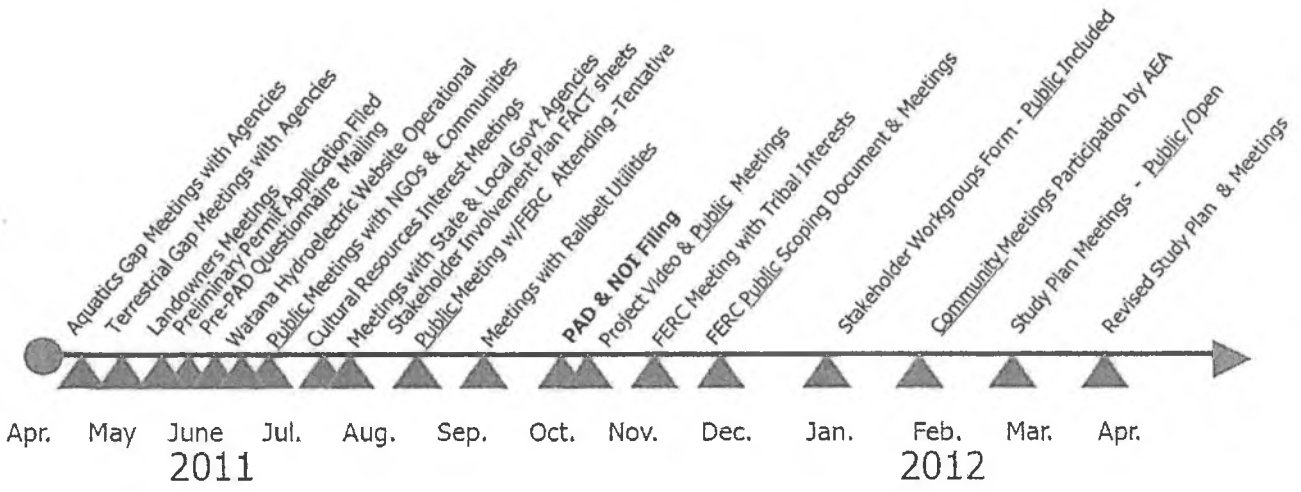
In conclusion, SNW does not believe that it is possible to differentiate between the Susitna and Chakachamna projects on the basis of capital markets access. As we have underscored in this report, the scope of both projects, combined with the unique nature of the railbelt region, will necessitate a funding structure for either project that is supported by State credit or a State capital commitment. We think that it is likely that we would reach this same conclusion for any project with similar complexity and cost developed within the railbelt. There are engineering, geotechnical and seismic factors specific to each of the projects that would be relevant for the State to consider in risk weighting the projects prior to investing additional time and resources in further development. We've highlighted some of those risks in this report but do not have the technical expertise to advise AEA on the importance of these risks.

Finally, we believe that elements of the Bradley Lake funding model have applicability to funding new large hydroelectric facilities within the railbelt. Market conditions and the legal constraints under which any new project would be funded are dramatically different than when Bradley Lake was funded, so the Bradley Lake structure cannot be replicated as a whole. However, the ability to collaborate with the State to mitigate certain risks and spread the capital cost over an extended period of time will be critical to funding a multi-billion dollar project.

Public Involvement Opportunities in the FERC Licensing ILP and ALP Hydroelectric Licensing Processes

Licensing a hydroelectric project under the Federal Energy Regulatory Commission's (FERC) licensing procedures is a multi-year process that provides considerable opportunity for public input and participation. The licensing process is based on federal laws and regulations that require several years worth of extensive planning, environmental studies, resource agency and native American consultation, community meetings and opportunities for public comment. There are numerous opportunities for engaging the public in this lengthy process of studying, preparing, and evaluating a licensing proposal.

Of the Commission's three available licensing processes, both the Integrated Licensing Process (ILP) and Alternative Licensing Process (ALP) mandate specific requirements for informing and consulting with members of the public, citizen groups and other non-governmental organizations (NGOs). Increased public involvement is one of the goals of the ILP and ALP processes over the earlier "Traditional" Licensing Process (TLP) that had been in place for many decades. The ALP and TLP require written support from agencies and NGO's to get approval from FERC, while the ILP is the default process that requires no special approvals. While the TLP offers some flexibility in terms of stakeholder outreach it would not be a good fit for a Project like Watana because it would not provide the opportunities for stakeholders to participate in the study process and the ability for the public to participate are less than those of the ILP or ALP. Because the ILP provides a structured formal sequence for all licensing steps, all participants are enabled to play key roles from the very beginning of the process. The ALP is a bit more informal, but has similar steps to the ILP in allowing opportunities for public participation; the only real difference is that the timeframes for each step can vary and will not necessarily be known in advance to the public and other potential interested parties. Both the ILP and ALP were designed by the Commission to involve a wider range of participants at an earlier stage in the licensing process versus the previous TLP.



In general, the public has tremendous opportunities for input from the outset of any of the FERC licensing processes, beginning with consultation that takes place before the licensee publishes its Notice of Intent (NOI) to even file for a license. For the Watana Hydroelectric Project, some of the main pre-PAD public activities that would be important are outlined in the following timeline that assumes filing of a NOI and PAD in fall of 2011.

Timeframe:	**Activity:**
April – June 2011	Landowner meetings AEA Web site operational (to be update regularly) Pre-PAD Questionnaire mailings Hydro mailing list Community and interest organization informational meetings
July – September 2011	Public meetings with FERC (to describe process) Stakeholder Involvement Plan – Communication plan Project Fact Sheet AEA Web site (continually update)
October – December 2011	PAD & NOI filed Public information sheets

FERC meeting with Tribal Interests
FERC Public Scoping Document & Meetings
FERC website, mailing list, written comments
AEAWeb site (continually updated)

January – March 2012

Stakeholder workgroups formed
Community meetings
Study Plan meetings
Revised Study Plan & meetings
FERC website, mailing list, written comments
AEAWeb site (continually update)

Public Participation Opportunities Common to all FERC Licensing Processes

In general, all of FERC's licensing processes involve two distinct parts: Pre-Application activities, which can be divided into other phases; and Post-Filing activities which are led by FERC. The first Pre-Application activity phase includes preparation and filing with FERC by the applicant of a NOI to file an application for a license and a Pre-Application Document (PAD). As part of the PAD, applicants are required to not only consult with the public and all interested parties, but also to develop and maintain licensing mailing lists of all interested parties who wish to receive information regarding the Project licensing. Under any of the FERC processes, anyone who wishes to be included can add their name and contact information to the mailing lists that will eventually be used for a variety of required notifications by the applicant, FERC, and other agencies. In both Pre-Application and Post-Filing phases license applicants, agencies and FERC and any member of the public can access FERC's web-based e-library system that will hold the Commission's complete records filed under a specific FERC Project number (or docket number). Any party can search and download documents, write and file letters and other documents themselves. Interested parties can even subscribe to an email service that will inform them of new filings as they come in. Lastly, any interested party can formally intervene in a Project proceeding through FERC's e-library if they wish to be able to seek formal rehearing or ultimately appeal the Commission's findings in a Federal court.

Most all modern licensing efforts also include a Project specific website hosted by the applicant where documents, meeting notices and other information are made available. AEA is currently in the final

stages of developing a new Website specifically for the Watana Project complete with listserv capabilities where interested parties can sign up for emails to stay abreast of current activities in the licensing process. Additionally, the PAD and license application filings are required to be sent to public libraries under any of the FERC licensing processes. All of FERC processes require applicants and FERC to place public notices in regional newspapers at the time of most major filings and prior to public meetings. In summary, members of the public can:

- Get placed on mailing lists and access licensing information through each stage of the process.
- Provide written comments to FERC and all other parties at any time documenting concerns with, or support for the Project.
- Provide oral comments and ask questions of Commission staff and the applicant at public scoping meetings, site visits, and in other meetings.
- Submit study requests and participate in workgroups during study plan development (varies by FERC licensing process).

Public Involvement Opportunities under the ILP and ALP

The PAD provides FERC and potential interested parties with existing, relevant and reasonably available information pertaining to the Project to help identify potential impacts, issues and related information needs, to develop study requests and study plans.

Under the ILP regulations, within 120 days of the date the NOI is filed, FERC holds initial meetings with all potentially-affected tribes or other Native American interests; issues a public notice that the NOI and PAD have been filed; prepares and issues a Scoping Document 1 (SD1) that discusses the project and related issues; and holds public meetings and site visit. FERC scoping meetings are typically held over a several day period with daytime and evening meetings in several locations in the Project area. Each meeting provides the opportunity for the public to view formal presentations and learn more about the Project plans and licensing process. The meetings provide opportunities for interested parties to give verbal testimony that is transcribed by a court recorder. The transcribed comments are made available to the public on FERC's eLibrary. Written comments may also be submitted during the scoping meetings or at any time in the licensing proceeding. Thirty days after the last scoping meeting, all interested parties may file comments with FERC on the NOI, PAD, and SD1.

FERC's scoping process in an ALP will normally take place later than under the ILP unless requested by the applicant and stakeholders, in which case it would be similar to the ILP process although the requirement for meeting with the potentially-affected tribes and other Native American groups is not set on a specific timeline under the ALP regulations. The advantage of the ILP for the public is that all parties will have certainty they can participate at a set point, early in the process and that will allow them a chance to get engaged in all of the subsequent licensing stages rather than entering the process after most decisions regarding studies and other commitments have been made.

Under the ILP, within 195 days after the PAD is filed, the applicant must file a Proposed Study Plan that includes detailed plans for each study it proposes to perform. Within 90 days, the applicant must hold at least one study plan meeting open to all interested participants, and interested parties may file comments on the Proposed Study Plan. Thirty days later, the applicant must file a Revised Study Plan, and 30 days after that FERC must issue a Study Plan Determination, which orders the applicant to perform the studies described by FERC in the Determination. The process for the ALP is less formal and does not have the pre-determined, prescribed steps and timelines, so it is often more difficult for interested parties to know when they can participate. In an ALP the public can provide similar input to study plans

and get involved in the process and would have the best chance for involvement if they join into the ALP collaborative licensing groups that are set up early in the process.

The ILP and ALP generally provide for two seasons of field studies. At the conclusion of both field seasons under the ILP, the applicant files a Study Report with FERC that describes the applicant's progress in performing the studies, and identifies any variances and modifications, including new studies. All interested parties have an opportunity to meet with the applicant to discuss each report and file comments with FERC before FERC makes a determination regarding the proposed modifications. The final Pre-Application activity phase commences when the applicant files either a Draft License Application (DLA) or a Preliminary Licensing Proposal (PLP), which must be filed no later than 150 days before the applicant must file its Final License Application (FLA). The ALP follows a similar sequence but may include an applicant-prepared Environmental Assessment also available for public comment. Interested parties have 90 days to file comments on the DLA or PLP under either process. Lastly, a Final License Application is prepared under both ILP and ALP that documents how the applicant has collaborated with federal and state agencies, tribes and the public regarding the measures.

Post-Filing activities commence once the applicant files its Final License Application. During the Post-Application activities FERC will: 1) determine if the application is complete and request additional information from the applicant if needed; 2) prepare an Environmental Assessment or Environmental Impact Statement (EIS) consistent with the National Environmental Policy Act once the application is complete; and 3) make a decision on issuance of the license, including license terms and conditions. In this process the public is notified and allowed participation through direct mailings from the applicant's mailing list, through posting in FERC's e-library, and through public meetings and newspaper notices.

Development of a Stakeholder Involvement Plan

While not specifically required under an ALP or ILP, a stakeholder involvement plan is essential to successful licensings as it is widely known that it is better to engage potentially interested parties early, rather than have them join into the process late with their concerns. A stakeholder involvement plan is developed prior to filing of the PAD and typically addresses the following items:

- A Communications Plan that clearly describes the procedures for information sharing including:
  - Providing comments
  - Public & working meetings (notices, minutes, etc)
  - Document distribution protocols
  - Study requests procedures
- Identifies potential stakeholders early on
- Develops a Strategic/Media Relations Plan
- Provides means to get early conversations going with key stakeholders
- Provides potential "polling" opportunities (PAD questionnaire)
- Develops a framework to obtain rapport with all stakeholders
- Benchmark potential mitigation measures and highlights Project benefits
- Provides framework for how a Web page should be structured
- Lays out a plan for how public meetings, open houses, and site visits should be organized and ran.
- Describes when and how direct mailings should be used.
- Lays out a plan for engaging the media to get newspaper & other media outlet coverage
- Addresses the need and outlines how Project managers can attend and participate in other regular community or agency meetings

ALASKA
ENERGY AUTHORITY

Railbelt Large Hydro Evaluation

Preliminary Decision Document

November 23, 2010

Prepared By
Alaska Energy Authority

ALASKA ENERGY AUTHORITY

November 23, 2010

Executive Director's Statement:

The Alaska Energy Authority (AEA) has been appropriated $10 million in State funds to start planning and designing a large hydroelectric project. Our first goal has been to identify the project to pursue that would give the State the best chance of success to be built and meet the State's goal to produce 50% of Alaska's electrical energy from renewable resources by 2025. It has been generally understood that a multi-billion dollar hydroelectric project will require State participation and financial assistance.

In the Preliminary Decision Document AEA has focused its efforts on the Susitna River and Chakachamna hydroelectric projects. This document provides a risk analysis comparison of the two projects by summarizing the known information and risks of the two projects and identifies the Susitna Hydroelectric project as the recommended primary project for the State to pursue. The Chakachamna project is recommended to be studied as an alternative to Susitna. Alternative projects need to be evaluated as part of the FERC licensing process, unless or until it is determined that there is reason to reject it as an alternative. As an alternative project, AEA recommends allocating the minimum necessary State funds to study the Chakachamna project thereby using the maximum amount available to further advance the Susitna project.

AEA will hold public workshops in February to educate and receive input from the public on the Preliminary Decision Document and the recommended approach to meet the Alaska's 50% renewable energy goal by 2025. After December, please refer to our webpage, www.akenergyauthority.org for workshop schedule. In the meantime, I encourage interested parties to submit written comments to AEA by the any of the following methods:

Email: largehydro@aidea.org

Fax: 907-771-3044 Attn: Large Hydro Project

Address: Large Hydro Project
Alaska Energy Authority
813 West Northern Lights Blvd
Anchorage, AK 99503

AEA looks forward to your comments on the Preliminary Decision Document.

Sincerely,

ALASKA ENERGY AUTHORITY

Michael C. Harper
Acting Executive Director

Railbelt Large Hydro Evaluation

Preliminary Decision Document

November 23, 2010

Table of Contents

Executive Summary 1

Chapter 1 Project Descriptions 1-1

1.1 Susitna River Hydroelectric Project (Low Watana Non-expandable Alternative) 1-1

1.2 Chakachamna Hydroelectric Project 1-2

Chapter 2 Engineering Issues 2-1

2.1 Access 2-1

2.1.1 Susitna Project 2-1

2.1.2 Chakachamna Project 2-1

2.1.3 Access Comparison 2-1

2.2 Transmission 2-1

2.2.1 Susitna Project 2-1

2.2.2 Chakachamna Project 2-2

2.2.3 Transmission Comparison 2-2

2.3 Geologic Hazards 2-2

2.3.1 Susitna Project 2-2

2.3.2 Chakachamna Project 2-2

2.3.3 Geologic Hazards Comparison 2-3

Terms and Acronyms

AEA	Alaska Energy Authority
ALP	Alternative License Process
APA	Alaska Power Authority
cfs	cubic feet per second
Chakachamna Project	Chakachamna Hydroelectric Project
FERC	Federal Energy Regulatory Commission
FPA	Federal Power Act
GWhrs	Gigawatt hours
HB	House Bill
ILP	Integrated License Process
IRP	Integrated Resource Plan
KWhrs	Kilowatt hours
MW	Megawatt
NOI	Notice of Intent
NP	National Park
PAD	Preliminary Application Document
Railbelt	The region of Alaska served by the railroad, stretching from Seward to Fairbanks
RIRP	Regional Integrated Resource Plan
SNW	Seattle Northwest Securities
Susitna Project	Susitna Hydroelectric Project, Low Watana Non-expandable Alternative
TBM	tunnel boring machine
TLP	Traditional License Process

Executive Summary

There are two proposed major hydroelectric projects in the Alaska Railbelt Region: the Susitna Hydroelectric Project, Low Watana Non-expandable Alternative (Susitna Project) and the Chakachamna Hydroelectric Project (Chakachamna Project). The purpose of this document is to identify which of these is most likely to successfully meet the long term energy needs of the railbelt at reasonable cost. This preliminary evaluation also considers the possibility to permit a project in its presently proposed configuration and to be able to do so in a reasonable time frame.

The 2010 AEA Regional Integrated Resource Plan (RIRP) is a 50-year long range plan that identifies combinations of generations and transmission capital improvement projects in the railbelt region (Black and Veatch 2010). The RIRP documented the need for a large amount of new annual generation for the railbelt within the next 10 to 15 years. The type of generation constructed will be influenced by declining Cook Inlet natural gas production, legislative environment, financing, and ability to permit or license and construct a project in a timely manner.

The 2010 Alaska legislature passed House Bill (HB) 306 which declares a State energy policy. This bill directs the State to receive 50 percent of its electrical generation from renewable and alternative energy sources by 2025. The only way to achieve this goal is for a new large hydroelectric project to be built in the railbelt region. The project sites, one on the Susitna River at Watana and one at Lake Chakachamna, are shown on Figure 1-1. The energy generated by one of these two projects would provide roughly one fourth (Chakachamna) to roughly one half (Susitna) of the current electrical energy demand.

Alaska Energy Authority received funding from the Alaska Legislature in 2010 for the preliminary planning, design, permitting and field work for the Susitna and Chakachamna Projects, as well as Glacier Fork Hydroelectric Project and other hydroelectric projects along the Railbelt. Most of the funds were allocated to the Susitna and Chakachamna Projects. There are a variety of alternatives on the Susitna River as documented in the HDR Report (2009). The Susitna Project chosen for this comparison is the Low Watana Non-expandable alternative. It was chosen because it offers a combination of greater winter storage capacity while still maintaining a low overall cost and low cost of power generated.

Permitting and licensing of a large hydroelectric project is regulated by the Federal Energy Regulatory Commission (FERC) and is a lengthy, complex and costly process. For this reason, the two projects must be evaluated at an early stage to determine if either has a fault that would prevent it from being licensed and constructed. As substantial research has already been done on each project, this document summarizes existing information on the projects, and uses this information for evaluation and comparison. Additional detailed information is available in the referenced documents. By using existing information to choose a primary project, resources can be concentrated on its development, with the goal of satisfying future railbelt energy demand and compliance with the legislative intent that the State receives 50 percent of its electric generation from renewable and alternative energy sources by 2025.

The ultimate goal of developing a project is to provide a cost-effective and long-term energy source to the railbelt region. Therefore, the cost, potential environmental impact, engineering issues and energy production potential of both projects were evaluated. This evaluation highlights key elements of each project that affect the cost of resulting energy, timeliness of energy contribution, and long term environmental and the projects' socioeconomic operational effects.

The results of this comparison show that the Susitna Project should be the Alaska's primary hydroelectric project; the Chakachamna Project should be considered as an alternative. Although the design, permitting and construction of the Susitna Project would cost approximately 50 percent more than it would for the Chakachamna Project the Susitna Project would produce more than twice the annual amount of energy as the Chakachamna Project. In addition, risk of cost overruns with the Chakachamna Project would be much greater than with the Susitna Project because of the extensive underground work required and its location in steep terrain.

The environmental impact of the Chakachamna Project would also be greater because it would require a cross-basin water transfer in a river system with salmon migration. Significant salmon runs travel to and through Lake Chakachamna. To allow enough environmental flow to protect fisheries, energy from the Project would have to be substantially reduced.

Additional conclusions that can be drawn from the comparison of the two projects include:

- As indicated above, in terms of energy production, the Susitna Project would produce more than two times the amount of the Chakachamna Project. The Susitna Project would have the added advantage of sufficient storage for significant energy production in the winter.

- The licensing, permitting and construction process for the Chakachamna Project would take roughly 3.5 years longer than for the Susitna Project because of the complex environmental studies required for the cross basin transfer and the time for the tunnel construction.

- The State would need to contribute substantial equity and be the licensee for either project. The ability to finance the projects is equal in either case.

- There are relatively less long term operational uncertainties for the Susitna Project.

- Both projects have some seismic risk; however the dams and powerhouses could be designed to withstand major seismic events as long as a fault does not pass through the structure. The Chakachamna Project has a relatively greater risk of damage to the power tunnel or fish passageway during a seismic event or volcanic eruption.

- The Susitna Project would be a larger construction project and have greater impacts on electrical rates than the Chakachamna Project along the railbelt and Statewide, in the form of lower rates in the long term.

- The Susitna Project would allow the State to achieve the State Energy policy goal of 50 percent renewable by 2025. The Chakachamna Project would not accomplish this goal by itself.

Overall, the Susitna Project would have a relatively lower cost of energy, fewer likely environmental effects, could start sooner, a reduced licensing/permitting schedule, less construction and long term operational risk, and greater positive impacts on the Alaskan economy than the Chakachamna Project.

A year of field studies at Lake Chakachamna would not be sufficient to determine an definitive environmental flow, would not predict project energy outcomes, or substantially change the economic factors that make the Susitna Project more desirable. Thus, Chakachamna Project field work should not proceed in 2011. Instead it may be prudent to perform some additional studies to confirm conceptual size optimization and cost.

Much of the information in this document came from reports prepared by HDR (HDR 2010), R&M Consultants/Hatch Associates Consultants (R&M Consultants/Hatch Associates Consultants 2010), and Seattle-Northwest Securities Corporation (SNW 2010). In addition, R&M Consultants/Hatch Associates provided Operational Uncertainty evaluation in Chapter 9. The referenced documents should be read for the full assumptions. Referenced documents and other important documents regarding these projects are available on the Alaska Energy Authority's Railbelt Large Hydro webpage.

Chapter 1

Project Descriptions

Each of the potential projects is described in the following section.

1.1 Susitna River Hydroelectric Project (Low Watana Non-expandable Alternative)

A two dam scheme was developed for the Susitna River Hydroelectric Project initially by the Corps of Engineers in the late 1970's for which a feasibility study was completed by Acres American Inc. for the Alaska Power Authority (APA) in 1982 (Acres 1982) and a license application was filed with FERC. An amended license was prepared in 1985 (Harza Ebasco 1985) and the project was cancelled in early 1986. Extensive site work including surveying, deep rock drilling as well as soil drilling and sampling was conducted at the Watana site. In addition environmental studies including fish and wildlife studies were conducted throughout the basin and included instream flow studies in the side channel sloughs downstream of Portage Creek.

In the two dam scheme developed in the Acres feasibility study (Acres 1982) the upper dam was at Watana (Figure 1-1) and was to be an 885 foot high earthfill embankment with a 1040 MW underground powerhouse. It was to be constructed first. The amended license (Harza Ebasco 1985) proposed to develop the project in three stages instead of two with an expandable 700 foot high embankment at Watana as the first phase with an installed capacity of less than 500 MW.

A number of hydroelectric generation alternatives were studied recently on the Susitna River (HDR 2009), of which the Low Watana Non-Expandable Alternative is the selected Susitna Project discussed in this document. The Low Watana Alternative, a 700 foot high dam with a 600 MW powerhouse was chosen because the best combination of winter storage, less environmental impact and low overall cost in addition to meeting the 50 percent renewable goal by 2025. The expandable version of a dam at this location was not chosen because it is more expensive initially relative to power output and the ultimate raised dam would have more environmental impacts related to terrestrial habitat as well as other technical challenges. The location of the Susitna Project as chosen for this review is the same location as the Watana dam in the two dam scheme as proposed in the 1980's (Acres 1982, Harza Ebasco 1985).

The Susitna Project would be located approximately half-way between Anchorage and Fairbanks. It would create a dam on the Susitna River at river mile 184 above the mouth of the Susitna River. The dam would be located within a steep sided river valley approximately 15 miles upstream of Devil's Canyon. The 700 foot high dam would have a 557 foot difference between tail water and maximum pond elevation, with a maximum pond level of 2014 feet. The reservoir would be 39 miles long and a maximum of 2 miles wide. Installed capacity would be 600 MW with the average annual generation determined to be 2600 GWhrs (HDR 2009). A final decision has not been made on the type of dam or the type of powerhouse (underground or surface) that would be used. The location of the Project is shown in Figure 1-1.

1.2 Chakachamna Hydroelectric Project

The Chakachamna Project was studied in detail in the 1980's as reported in the Bechtel report (Bechtel 1983). The project developed in that report consisted of an intake under the lake, and a 12 mile tunnel to an underground powerhouse on the McArthur River. At that location, the best alternative had a small regulating dam on the Chakachatna River and was estimated to produce 1,300 GWhrs of electricity annually although the report indicated that the maximum power could be generated by eliminating environmental flows and producing 1664 GWhrs of electricity annually with an installed capacity of 400MW. This latter alternative was identified to have adverse impacts on the fishery resources which use the Chakachatna River. Chapter 4 of this document; Preliminary Energy Estimate, further addresses the energy potential of the Chakachamna Project in light of environmental flows in the Chakachatna River.

The 1983 report (Bechtel 1983) also included an extensive environmental study which included environmental hydrology, aquatic biology, terrestrial vegetation and wildlife as well as human resources.

The Chakachamna Hydroelectric Project (Chakachamna Project) currently has a Preliminary Application before FERC (FERC No. 12660). In its Pre-Application Document (PAD) filed with FERC, the applicant, TDX Power described the Project to have 300 MW installed capacity and generate 1300 GWhrs hours of annual energy (TDX Power 2009).

The Chakachamna Project is located approximately 85 miles west of Anchorage at the south base of Mt. Spurr. Chakachamna Lake drains into the Chakachatna River, which flows downstream through a complicated system, ultimately flowing into Cook Inlet. That flow is partially joined to the McArthur River flow by way of the Noaukta Slough. The Chakachamna Project is essentially the same as the original scheme in the Bechtel study and involves diverting water from Chakachamna Lake through an 11 mile tunnel to an underground power plant near the McArthur River. The power plant would discharge its tailrace flow to the McArthur River and the flow would not rejoin the Chakachatna River until a point much further downstream, reducing flow in a portion of the Chakachatna River, and the Noaukta Slough and Middle River as well. The location of the Project is shown in Figure 1-1. The Project and vicinity are shown in Figure 1-2. The current scheme does not have a dam on the Chakachatna River as it exits the lake.

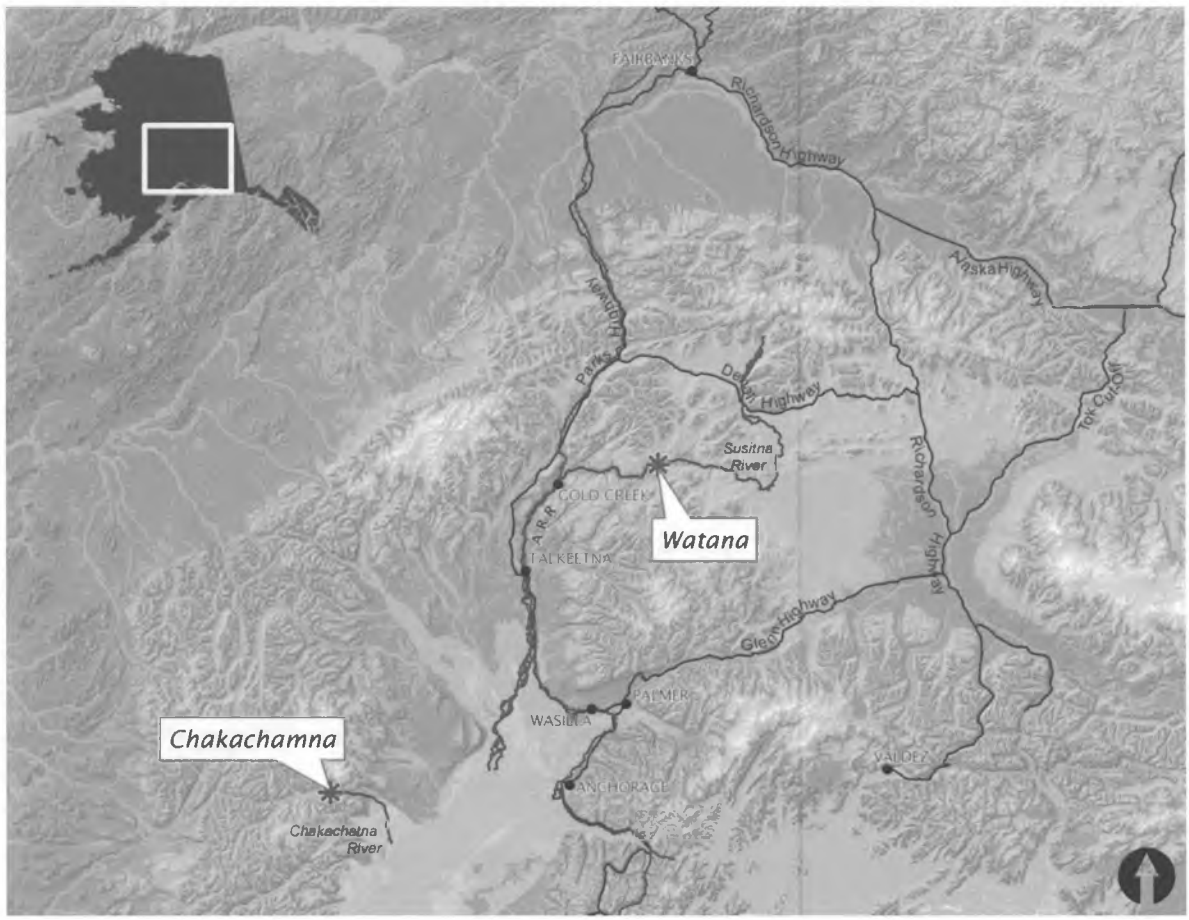

Figure 1-1 **Locations of the Susitna Project (Low Watana Alternative) and the Chakachamna Project**

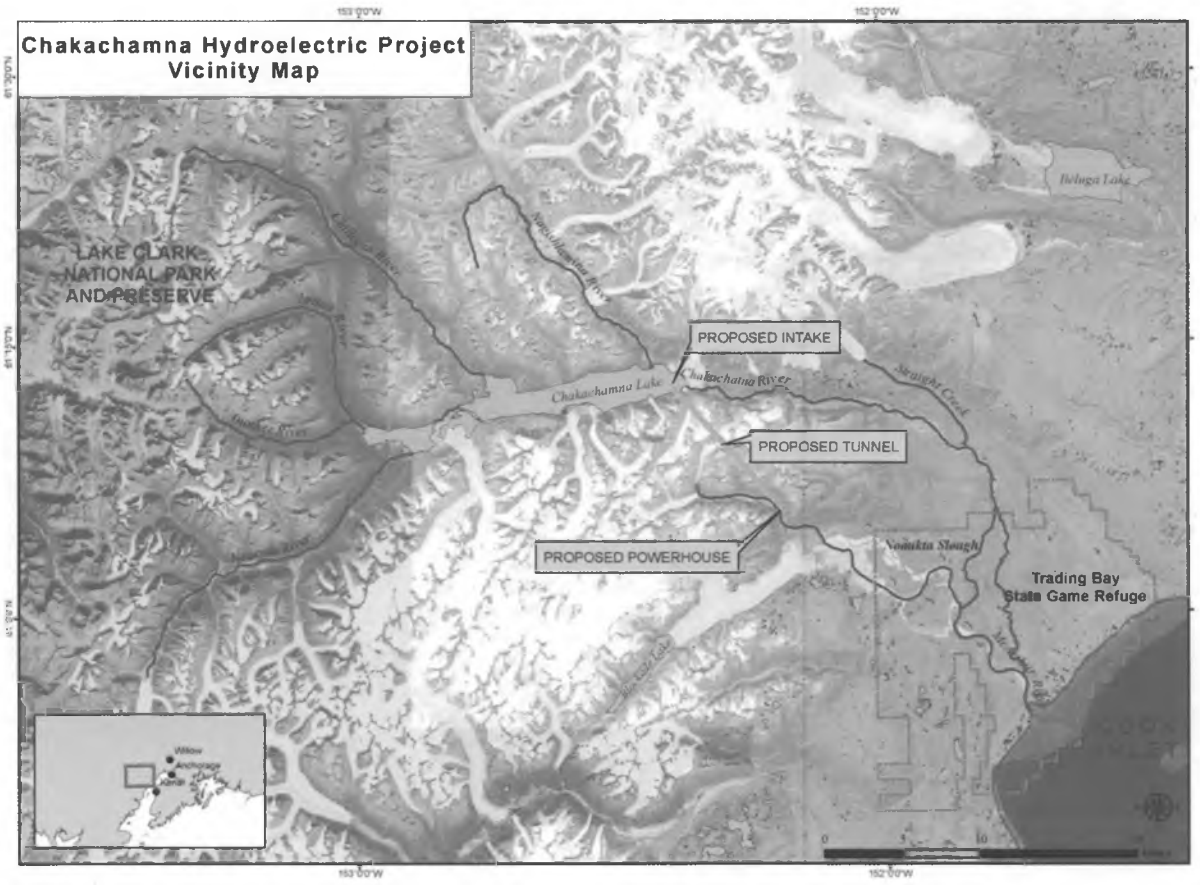

Figure 1-2 **Vicinity of the Chakachamna Project**

Chapter 2

Engineering Issues

Engineering issues associated with each potential project are discussed in the following section.

2.1 Access

2.1.1 Susitna Project

The Susitna Project could be accessed both from the Denali Highway by a new road and from Gold Creek (existing railroad bridge over the Susitna River) by a new rail line. Access via two modes of transportation provides the Project with advantages; the most significant of which is that the road could be built quickly, allowing early on site construction work. The rail link would allow materials from outside the State to be transported directly to the site by rail without having to off load to trucks.

2.1.2 Chakachamna Project

The Chakachamna site requires access from tidewater to the lake, the tunnel adits, and the McArthur River powerhouse location. Construction of a large dock to handle heavy equipment at Tyonek would be necessary. Access routes needed for construction and operation would be challenging. The construction access road could not cross the Trading Bay Game Refuge, and would therefore require crossing the braided Chakachatna River delta and wetland, as well as traversing high on steep mountain slopes to access the area near the lake

2.1.3 Access Comparison

Both projects would require roads and/or railroad to be constructed to handle very large and heavy equipment. Constructing access into both projects is likely to require two years. The advantages of access to the Susitna Project are that a major bridge is not required and that the routes cross less steep terrain compared to the Chakachamna Project. The bridge (or two) over the Chakachatna River will be large, expensive structure(s) with capacity to handle the heavy equipment. It is questionable whether a road built to handle heavy equipment could be constructed to the fish passageway location. If a road could not be constructed to handle a tunnel boring machine, drill and blast construction of the fish passageway would be required.

2.2 Transmission

2.2.1 Susitna Project

The Susitna Project would connect to the north-south intertie near Gold Creek. The cost of that transmission from the Susitna power plant to the intertie is included in the Susitna Project cost

estimate. A conceptual study of the transmission needs in the railbelt if the Susitna Project was constructed was completed by EPS (EPS 2009). Upgrades to the existing intertie and substations would be required to transmit energy to Anchorage and Fairbanks.

2.2.2 Chakachamna Project

The Chakachamna Project transmission costs were estimated in today's dollars based on the original 1980's scheme. The cost of the transmission from the power plant to the Beluga Power plant was included in the cost estimate. It is believed a triple circuit would be required for the segment of the powerplant to Beluga, as well as additional changes in the railbelt transmission system. If the Chakachamna Project was constructed, transmission upgrades from Beluga plant to the intertie and an upgrade of the intertie upgraded would likely be necessary.

2.2.3 Transmission Comparison

Transmission line construction beyond the two projects will be needed. Because the Susitna Project will be located centrally between Anchorage and Fairbanks, it will require less total length of new line construction, but because of the larger power output will require more actual circuits. Chakachamna Project will likely require some new line construction from Beluga to Anchorage and changes if energy is to be transmitted north to Fairbanks. Overall there is not a significant difference between the two projects due to transmission needs.

2.3 Geologic Hazards

2.3.1 Susitna Project

The design earthquake for the Susitna Project would likely be a based on consideration of a Denali fault event somewhere in the range of magnitude 8.0, a local crustal earthquake and a subduction zone earthquake with a magnitude of roughly 8.5. The original Project design considered all of these earthquakes in the design. Excellent recent data exist on the Magnitude 7.9, 2002 Denali fault earthquake. A review of the earthquake design requirements for a Susitna Project was made by R&M Consultants (R&M 2009).

Subsurface conditions at the Susitna Project site are well known due to considerable rock drilling in the 1980's at the site. At the time, it was considered feasible to construct both diversion tunnels, power tunnels and an underground powerhouse.

There have been recent earthfill dams designed for large earthquakes, the most significant being the Seven Oaks Dam in Orange County, California, which is designed for a magnitude 8 earthquake from a distance of 1.2 miles away.

2.3.2 Chakachamna Project

The design earthquake for the Chakachamna Project would likely be from the Castle Mountain fault, which is approximately 6 miles from the power plant location. Proximity to the fault would likely mean that smaller connecting faults would be encountered during tunneling, which

could cause delays and increased cost during construction. Subsurface geologic conditions along the tunnel alignment are not known. The frequency of any significant faulting and associated zones of fractured rock are not known, and could affect tunnel construction.

The Chakachamna Project also has other geologic hazards due to its proximity to Mount Spurr and Barrier Glacier. The most recent eruption at Mount Spurr was in 1992. If the volcano were to erupt again, ash fall and mud flows have the potential to block or partially block the powertunnel intake, fish passageway, or natural outflow of the lake. Facilities would need to be located or designed to minimize risk from an eruption. Also, at Lake Chakachamna, Barrier Glacier, which partially dams the lake, is a geologic risk. The glacier does not appear to be currently moving, is covered with debris, and has an ice core. A partial release of the lake occurred in 1971 when the outlet was eroded. The lake level dropped 10 to 15 feet. Facilities would need to be designed to accommodate a change in the glacier, which could cause the lake level to go up or down and substantially affect Project energy production and fish passage.

2.3.3 Geologic Hazards Comparison

Overall geologic hazards are somewhat greater at the Chakachamna site due to the close proximity of the castle Mountain fault and Mount Spurr.

2.4 Estimates of Probable Project Development Costs

A comparison of cost estimates for development of both project are provided in the following Section.

2.4.1 Susitna Project

2.4.1.1 Cost Estimate History

In 1982 to 1983, a detailed cost estimate to develop the complete Watana/Devil Canyon project was prepared. This estimate was revised in1985 to 1986, and again in March 2009. The latest estimate, prepared in November, 2009, is for a Low Watana Non-Expandable alternative. The estimate for this project in 2008 dollars is $4.5 billion as detailed in Table 2-1 below.

Table 2-1 Susitna, Low Watana Project Cost Summary

FERC Line #	Line Item Name	Low Watana (2008 Dollars Millions)
71A	Engineering, Environment, and Regulatory (7%)	$ 236
330	Land and Land Rights	$ 121
331	Power Plant Structure Improvements	$ 115
332.1-.4	Reservoir, Dams and Tunnels	$ 1,538
332.5-.9	Waterways	$ 590

Table 2-1 Susitna, Low Watana Project Cost Summary

FERC Line #	Line Item Name	Low Watana (2008 Dollars Millions)
333	Waterwheels, Turbines and Generators	$ 297
334	Accessory Electrical Equipment	$ 41
335	Misc Power Plant Equipment	$ 21
336	Roads, Rails and Air Facilities	$ 232
350-390	Transmission Features	$ 224
399	Other Tangible Property	$ 16
63	Main Construction Camp	$ 180
71B	Construction Management, 4%	$ 135
Total Subtotal		**$ 3,746**
Total Contingency		**$ 749**
Total (Millions of Dollars, rounded)		**$ 4,500**

2.4.2 Chakachamna Project

2.4.2.1 Cost Estimate History

In 1982, a detailed cost estimate was prepared for developing the Chakachamna Project. In 2008 and 2009, re-evaluations of this original estimate were made to take into account potential new alternative arrangements. In 2010, the detailed 1982 was updated with unit prices modified to be consistent with the estimated costs for the Susitna Project. The estimate for the Chakachamna Project in 2008 dollars is $2.9 billion, as detailed in Table 2-2 below.

Table 2-2 Chakachamna Project Cost Summary Table

FERC Line #	Line Item Name	Chakachamna (2008 Dollars Millions)
71A	Engineering, Environment, and Regulatory (7%)	$ 151
330	Land and Land Rights	$ 75
331	Power Plant Structure Improvements	$ 105
332.1-.4	Reservoir, Dams and Tunnels	$ 1,147
332.5-.9	Waterways	$ 123
333	Waterwheels, Turbines and Generators	$ 181
334	Accessory Electrical Equipment	$ 20

Table 2-2 Chakachamna Project Cost Summary Table

FERC Line #	Line Item Name	Chakachamna (2008 Dollars Millions)
335	Misc Power Plant Equipment	$ 15
336	Roads, Rails and Air Facilities	$ 172
350-390	Transmission Features	$ 232
399	Other Tangible Property	$ 0
63	Main Construction Camp	$ 90
71B	Construction Management, 4%	$ 86
Total Subtotal		**$ 2,400**
Total Contingency		**$ 480**
Total (Millions of Dollars, rounded)		**$ 2,880**

2.4.3 Cost Comparison

Although capital cost is greater for the Susitna Project, the evaluation in Chapter 9 will show that the cost to repay the financing of the project relative to energy production will be lower for the Susitna Project. Since the financing cost is a major portion of the energy cost, and since operation and maintenance and utility cost will be roughly equal regardless of the power source, overall, the Susitna Project cost per unit of energy will be relatively lower.

Detailed Susitna costs can be found at Susitna Hydroelectric Project Alternatives Design Report 2009 located on the AEA Railbelt Large Hydro webpage.

Detailed Chakachamna costs can be found at Susitna and Chakachamna – Preliminary Decision Document 2010 located on the AEA Railbelt Large Hydro webpage.

Chapter 3

Environmental Issues

Development of a hydroelectric project would face a variety of issues over the design lifetime. The design lifetime for a modern hydroelectric facility is anticipated to be greater than 100 years. The following discussion is not all inclusive but highlights the likely major areas of concern regarding both projects. Botanical and cultural resource issues are not discussed in this document since they have not been fully explored and tend to have less overall impact on whether a project is licensed and constructed.

3.1 Fisheries

3.1.1 Susitna Project

Fish resources have the highest potential to be impacted by the project. Most of the potential impacts would occur in the reservoir and the middle Susitna River downstream of the reservoir. There would be impacts due to changes in water quality, thermal regime, suspended sediment load, reservoir draw-down fluctuations, impoundment zone inundation, flow regime, and fish habitat. Not all impacts to fish populations would be negative. For example, an increase in winter water temperatures could lead to the enhancement of overwintering habitat and thus greater fish survival; however, the cooler spring water temperatures could slow fish growth.

The majority of the salmon production occurs in tributaries outside the area of anticipated effects. Devil Canyon acts as an effective passage barrier to upstream migration of salmon. Radio telemetry studies of Susitna drainage conducted by ADF&G (Yanusz et. al., 2007) observed no sockeye salmon moving above Portage Creek near the entrance to Devils Canyon. A few (less than 100) adult Chinook salmon have been observed above the Devil Canyon dam site (FERC Amend Nov 1985). Electrofishing surveys conducted by ADF&G in 2003 (Johnson, 2010) documented Chinook salmon rearing in Kosina Creek and the Oshetna River, both located above the Watana Dam site.

In the Watana impoundment zone, approximately 40 river miles of the Susitna River would be inundated and transformed into reservoir habitat. An additional 15 miles of four named tributary streams (including Kosina Creek) and numerous smaller unnamed tributaries and eight small lakes would be inundated. There are nine species of fish occurring in the proposed impoundment zones: Arctic grayling would lose approximately nine miles of spawning habitat and would not likely populate the impoundment zone (ENTRIX 1985). River habitat would be transformed into lake/reservoir habitat that may be occupied by a different array of fish species. Lake drawn down may limit spawning of species dependent upon these areas for reproduction. Table 3-1 shows the possible fisheries impact of the Susitna Project.

3.1.2 Chakachamna Project

Chakachamna Project has fish issues of concern to resource agencies. Since this document is a summary, only the three that most affect project economics and licensing ability will be discussed.

3.1.2.1 Lake Level Fluctuations

Chakachamna Lake and the surrounding tributaries support abundant salmon and freshwater fisheries resources. Five significant tributaries and numerous minor drainages empty from the surrounding mountains into Kenibuna and Chakachamna Lakes. Of these, the Chilligan and Igitna Rivers provide significant sockeye salmon spawning habitat. The lake tributary streams also provide habitat for Dolly Varden.

Studies in 1982 showed significant numbers of adult sockeye salmon milling along the north shore of Chakachamna Lake and spawning was suspected but not confirmed. Chakachamna Lake also provides habitat for resident lake trout, Dolly Varden, and round whitefish. Life histories of lake trout, Dolly Varden, and whitefish have not been investigated in Chakachamna Lake.

Under the proposed operational structure (base case), the lake level would fluctuate approximately 60 feet from the normal maximum pool elevation of 1,142 feet to the normal minimum pool elevation of 1,082 feet. If sockeye salmon spawn along lake shoals, it is likely that their spawning timing would coincide with the maximum pool elevation. The resulting eggs might subsequently be exposed and killed when the lake level drops to the minimum pool elevations in March or April. Similarly, lake trout spawning areas may be affected by the winter lake drop in lake level.

An additional impact relating to lake level drop is the potential for down-cutting of the channel between Kenibuna and Chakachamna Lakes and the fluvial fans of lake tributaries such as the Chilligan River. If down cutting occurs and as a result effects the level of Kenibuna lake (within Lake Clark National Park) then project can not be licensed by FERC. Down cutting may also effect fish passage into the tributaries particularly during periods of low lake level.

3.1.2.2 Reduced Flows into the Chakachatna River

The proposed operation of the Chakachamna Hydroelectric Project involves diverting a portion of the natural flow out of Lake Chakachamna to the powerhouse located in the McArthur River valley. In the base case, the average flow in the Chakachatna River will be reduced by approximately 50 to 80 percent from June through November.

The Chakachatna River provides a migration corridor, spawning habitat, and rearing habitat for salmon. The lower Chakachatna River splits into three branches: Middle River, which flows southeast to Cook Inlet, the Chakachatna River, which flows south and joins the McArthur River near its mouth, and a third braided section called Noaukta Slough which joins the middle part of the McArthur River. Hydrologic ties to the Chakachatna and McArthur rivers appear important in supporting the lower elevation wetlands north of Noaukta Slough and in the Trading Bay State

Game Refuge. Reduced river flow may cause floodplains, wetlands, and riparian habitats to dry. Drying of these wetland would effect fish populations in the Trading Bay State Game Refuge.

3.1.2.3 False Attraction

Transfer of water from Chakachamna Lake to the upper McArthur River may cause false attraction of adult salmon to the powerhouse tailrace during their spawning migration. The tailrace is proposed to be located approximately 15 miles up the McArthur River from the Noaukta Slough (Chakachatna River) confluence. The mixture of Chakachamna Lake water from the tailrace may confuse salmon migration and could prevent or delay the movement of salmon to spawning areas in Chakachamna Lake and its tributaries.

Critical months for salmon passage into and out of the lake occur between May and September, when a majority of the lake's discharge will be diverted to the upper McArthur River. Adult salmon return to their natal spawning areas by using olfactory cues (chemical "smells"). For Lake Chakachamna sockeye salmon, these cues are imprinted at the smolt stage when juvenile salmon migrate from spawning and rearing areas in the lake out the Chakachatna River to salt water. Because the majority of the Lake Chakachamna water is being discharged from the powerhouse into the McArthur River a substantial number of the adult salmon may be falsely attracted to the powerhouse in the McArthur River.

3.1 Wildlife Impacts

3.1.1 Susitna Project

There are currently no known listed endangered species in the project area. The most significant effect on wildlife would be on the species that live in the spruce forested valley walls. Impacts on each species would be different based on species abundance and use of the habitat; however, major threats common to most species have been identified. Downstream of the Watana reservoir there may be an increase in preferred moose browse, thus increasing the moose population (Harza Ebasco 1985b). The Susitna Project development would impact mink and otter in the middle river by increasing the winter turbidities which would reduce the value of the mainstem as feeding habitat. Open water in the winter would have a positive effect on mink and otter (Harza Ebasco 1985b). Other impacts to animals downstream of the reservoir would be negligible (Harza Ebasco 1985b).

A summary of the potential environmental impacts of the Susitna Project is provided in Table 3.1 below.

Table 3-1 Potential Environmental Impacts of the Low Watana Hydroelectric Project on the Susitna River

Impacts	Issues
Reservoir - Impacts	
River Habitat & Fisheries Impacts	Approximately 40 river miles of the main stem of the Susitna River and 15 miles of tributary streams will be converted from riverine to reservoir environment. Arctic grayling are the most abundant fish species in the impound zone and will have the greatest

	impacts with the loss of approximately nine miles of spawning habitat. A significant portion of lower Kosina Creek used by rearing Chinook salmon will be lost to inundation.
Fish passage	Fish passage may be blocked for a small number of Chinook salmon that travel above the site.
Drawdown impacts	The annual drawdown and refilling of the reservoir will affect an estimated 10 miles of river that will alternate between river and reservoir habitat.
Terrestrial Impacts	An estimated 20,000 acres of habitat will be flooded. Reservoir may alter traditional migration routes.
Downstream Impacts	
Flow change impacts to fish	Lower summer flows may reduce access to side channel fish habitats and reduce the amount of rearing habitat for salmonids. Increased winter time flows may provide more rearing habitat benefiting overwinter survival. Dampening of flows may alter streambed movement and affect side channel habitats.
Temperature impacts to fish	Lower than natural water temperatures in spring/early summer may cause a delay in the onset of favorable summer rearing conditions for salmonids. Warmer than normal fall water temperatures may extend the summer rearing period later into fall. Overwinter survival for salmonids may be benefited by warmer water temperatures and a delay in ice formation. Higher main stem discharges in winter may maintain higher rates of warm groundwater upwelling in side sloughs affecting incubation of salmon eggs.

3.1.2 Chakachamna Project

Wildlife impacts from the Chakachamna Project have not been studied in detail. Reduction of salmon traveling to Lake Chakachamna tributaries would reduce the food source for bears and eagle in Lake Clark National Park. Drying of Trading Bay State Game Refuge would potentially alter wildlife habitat effecting birds and mammals in the refuge.

Increased flow down the McArthur River may cause some increased flooding and wetlands south of Trading Bay State Game Refugee. The net effect of the changes in food source and habitat over a large area (Lake Clark NP, Trading Bay, and McArthur River) has not been studied.

3.2 Environmental Flow

3.2.1 Susitna Project

Environmental flow requirements are met by water being used for energy production passing through the generating units and then being released into the natural stream channel. The effect of environmental flows is to change the timing of the energy production but not necessarily the average annual amount of generation.

A preferred environmental flow regime in the 1980's was developed to have high late summer flows for maintenance of rearing habitat for Chinook salmon juveniles. However, peak summer flows would be reduced and winter flows (within limits) would be increased to generate more power. A comparison of the 1980 selected environmental flow and of the existing Susitna River flows are shown in Figure 3-1 below.

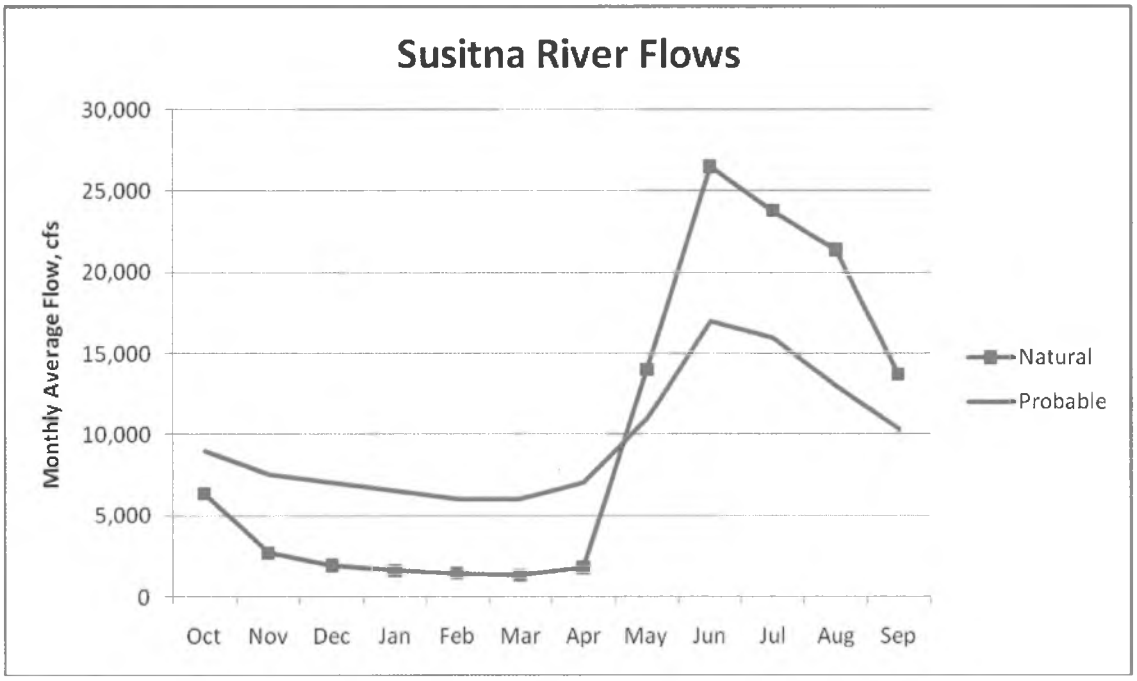

Figure 3-1. Susitna River monthly mean flow at Gold Creek.

3.2.2 Chakachamna Project

The preliminary environmental flow recommendations suggested for the Chakachatna River in the PAD are based on the Montana Method (Tennant 1972) as presented in the Bechtel report on the project in 1983. The Bechtel report assumed environmental flows during the months of April to September of 1094 cfs or lake inflow, whichever was less. During the months of October through March, the minimum environmental flow was assumed to be 365 cfs or lake inflow, whichever was less. These amounts of discharge are rated as "fair to degrading" flows in the Montana Method. This method was developed for and has primarily been used on rivers in the lower 48 states, which show little similarity to the glacially driven and highly seasonal flows of the Chakachatna River. Winter time flows using this method drop below historic average monthly flows, potentially resulting in freeze-out of spawning beds located outside the main river or in side channel areas. Summertime flows provided may not be sufficient to attract adult spawners confused by the discharges into the McArthur drainage or to provide for upstream passage through the canyon area located below Chakachamna Lake. Additionally, this environmental flow method does not take into consideration the groundwater hydrology feeding wetlands of the Trading Bay Game Refuge.

While it is outside of the scope of this document to complete the environmental flow analysis needed to adequately address all of the environmental issues in the Chakachamna watershed, Table 3-2 below provides an estimate of environmental flows that may be more likely to be viewed favorably by permitting agencies. It should be noted, however, that these flows have not been reviewed or endorsed by any permitting agencies. Determination of environmental flows for the project will ultimately be the result of a detailed analysis of instream flow data by conducted by a multiagency review team over a multi year time period.

Table 3-2 Estimate of Probable Environmental Flows

Month	Historic Natural Flow (cfs)	Base Case Flow (cfs)	Minimum Probable Flow (cfs)	Notes
October	2468	402	1,250	50% of mean monthly flow: provides water to Noaukta Slough to attract adult coho spawners and protect historic side channel spawning habitats.
November	1206	365	600	50% of mean monthly flow: provides water to Noaukta Slough to attract adult coho spawners and protect historic side channel spawning habitats.
December	813	363	600	75% of mean monthly flow: protects incubation in Chakachatna/Noaukta Slough spawning beds.
January	613	365	500	100% of mean monthly flow: protects incubation in Chakachatna/Noaukta Slough spawning beds.
February	505	357	500	100% of mean monthly flow: protects incubation in Chakachatna/Noaukta Slough spawning beds.
March	445	358	500	100% of mean monthly flow to protect incubation in Chakachatna/Noaukta Slough spawning beds.
April	441	582	500	100% of mean monthly flow: protects incubation in Chakachatna/Noaukta Slough spawning beds.
May	1042	1,094	750	75% of mean monthly flow: protects juvenile rearing in Chakachatna/Noaukta Slough areas and provides for outmigration of smolts from lake.
June	5,875	1,094	2,000	33% of mean monthly flow: provides water for outmigration of smolts from lake and feeds groundwater to Trading Bay Refuge wetlands.
July	11,944	1,421	4,000	33% of mean monthly flow: provides water to attract spawning adults to Chakachatna/Noaukta as opposed to McArthur, provides adequate flow for adult passage through canyon below lake outlet, and feeds groundwater to Trading Bay Refuge wetlands.
August	11,996	5,599	4,000	33% of mean monthly flow: provides water to attract spawning adults to Chakachatna/Noaukta as opposed to McArthur, provides adequate flow for adult passage through canyon below lake outlet, and feeds groundwater to Trading Bay Refuge wetlands.
September	6,042	2,164	2,000	33% of mean monthly flow: provides water to attract spawning adults to Chakachatna/Noaukta as opposed to McArthur, provides adequate flow for adult passage through canyon below lake outlet, and feeds groundwater to Trading Bay Refuge wetlands.

3.2.3 Environmental Flow Analysis

To evaluate the effect of increased minimum environmental flow requirements in the Chakachatna River and/or the effect of lake level fluctuations, two alternatives to the base case were also evaluated. Environmental issues surrounding project operations generally revolve around three main issues: 1) habitat affected by flows in the bypass reach; 2) upstream and downstream fish passage; and 3) habitat affected by lake level fluctuations. The alternatives to the Base case evaluated were:

- **Alternative #1 – Base case with probable environmental flow.** Alternative 1 is the same as the base case except that:
  - Environmental flow requirements are revised as described in Table 3-2 above.
  - The lake level fluctuations are not restricted.
- **Alternative #2 – Base case with probable environmental flow & minimization of lake fluctuation**. Alternative 2 is the same as the base case except that:
  - Environmental flow requirements are revised as described in Table 3-2 above.
  - The maximum lake level fluctuation would be 15 feet below the weir outlet.

A comparison of potential environmental impacts resulting from each alternative are presented in Table 3-3.

Table 3-3 Comparison of Potential Environmental Impacts Resulting from Chakachamna Lake Hydro Alternatives

Issue	Base Case	Alternative 1	Alternative 2
Lake Level Fluctuation			
Impacts to shoal spawning areas for sockeye salmon and lake trout	Significant impacts to incubating eggs due to draw down	Significant impacts	Least significant case but impacts may still occur
Access to inlet streams (Chilligan and Igitna) for sockeye spawners	Not likely to be impacted	Could be impacted due to drawn down	Not likely to be impacted
Adult salmon passage into lake	Minor to moderate, passage via natural outlet 87% of time	Significant, dependent upon using fish tunnel 91% of the time	Minor to moderate passage via natural outlet 87% of time
Smolt outmigration from lake	Unknown, smolts 100% dependent on fish passage tunnel	Unknown, smolts 100% dependent on fish passage tunnel	Unknown, smolts 100% dependent on fish passage tunnel
Chakachatna / McArthur Issues			
False attraction of Chakachamna sockey spawners to the McArthur powerhouse	Likely to occur	Least likely case but may still occur	Least likely case but may still occur
Noauktna Slough and Chakachatna side channel spawning and rearing habitats	Moderate impacts possible from winter freeze-out	Lower impacts than Base Case	Lower impacts than Base Case
Trading Bay Wildlife Refuge			
Groundwater fed wetland habitats	Moderate impacts	Lower impacts than Base Case	Lower impacts than Base Case

Under the Base Case and Alternative 1 the lake level would fluctuate approximately 60 feet from the normal maximum pool elevation of 1,142 feet to the normal minimum pool elevation of 1,082 feet. Spawning of adult salmon and Lake Trout may be effected and down cutting to tributaries may occur.

Lake level affects adult salmon passage into the lake in Alternative 1, where the natural outlet is not available to spawning adults 91 percent of the time. In this alternative, fish will be dependant upon using the two mile long fish passage tunnel. There is uncertainty whether fish will be willing to use the tunnel. In all cases the fish passage tunnel will be required for smolt outmigration.

In Alternative 2, the lake level is minimized to 15 feet below the outlet. While this amount of drawdown may exceed natural lake level fluctuation, it is the scenario offering the least impact to lake habitats.

For Chakachamna, limiting lake fluctuation (Alternative 2) to minimize the affect on upstream spawning will decrease the amount of runoff that can be captured, thereby decreasing the average annual generation. Figure 3-2 shows the post-project lake elevation by month for the base case and the two alternatives.

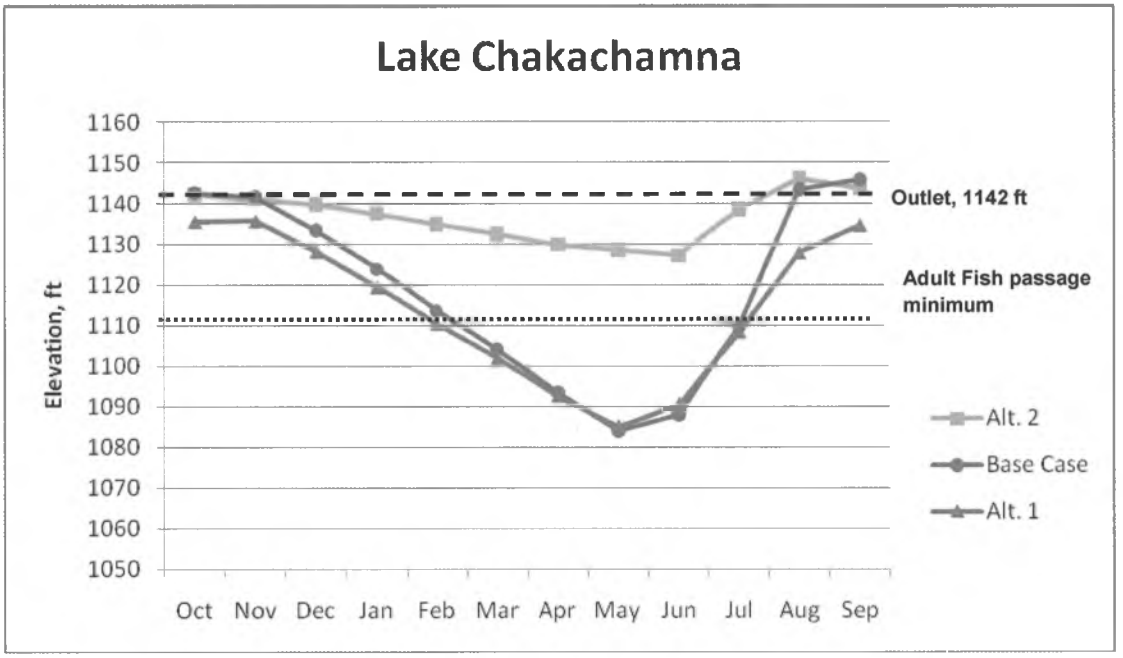

Figure 3-2 Chakachamna Lake Elevation by Month

Flows in the Chakachatna River during Project operation will be comprised of environmental flow releases and spill as shown in Figure 3-3. Since the powerhouse discharges return to the McArthur River, the net flows in the Chakachatna River are reduced in all cases.

Detailed Chakachamna environmental discussion can be found at Susitna and Chakachamna – Preliminary Decision Document, Environmental-Energy-Cost November 12, 2010 located on the AEA Railbelt Large Hydro webpage.

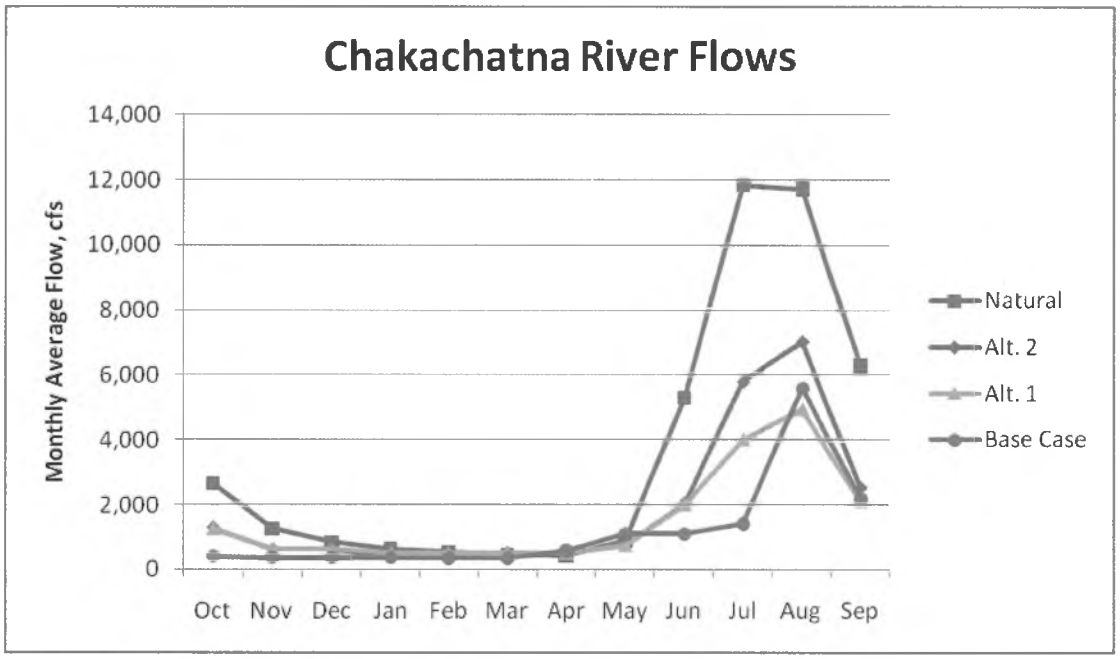

Figure 3-3 Chakachatna River Flows (Downstream of Lake) by Month

Chapter 4

Preliminary Energy Estimate

4.1 Evaluation of Average Annual Energy and Firm Winter Capacity

The amount of energy that can be produced from hydroelectric projects is a function of the amount of available water and, in the case of storage projects, how the available water can be regulated (systematically released). In addition to the average annual energy, the firm capacity attainable during winter months is of particular importance. For hydroelectric projects, the firm capacity is almost always lower than the installed generation capacity for a project. For the purposes of this study work, firm capacity is defined as:

"The amount of power the project can generate on a continuous basis from November 1 through April 30 with 98 percent reliability."

It should be noted that this is only one manner of regulation. The water can be regulated in a variety of different means in order to achieve other objectives, such as peaking, spinning reserve, or backup capacity. Major assumptions used to develop the estimates average annual energy and winter plant capacity are presented below.

4.1.1 Susitna Model Assumptions and Data Sources

This potential project consists of the construction of a large storage reservoir on the Susitna River at the Watana site with a 700-foot-high dam and a four-unit powerhouse with a total installed capacity of 600 MW. This "Low Watana non-expandable" alternative is described in detail in *Susitna Hydroelectric Project, Conceptual Alternative Design Report (*HDR Alaska 2009b).

4.1.2 Chakachamna Model Assumptions and Data Sources

This potential project consists of the inter basin transfer of water from a lake tap near the outlet of Chakachamna Lake through an approximately 10.8-mile-long tunnel to an underground powerhouse that would discharge to the McArthur River. The powerhouse would have a total generating capacity of 300 MW. The Base case (as proposed) and two alternatives were evaluated. Alternatives, described in Section 3.1.3, show how alternative operational constraints on the project would affect project energy. These alternatives are as follows:

- **Base Case** for analysis was the project as described in the PAD (TDX Power 2009). This project used environmental flow recommendations for the Chakachatna River based on the Montana Method (Tennant 1972).

- **Alternative #1 – Base Case with Probable Environmental Flow.** Alternative 1 is the same as the Base Case except that higher environmental flows are required.

- **Alternative #2 – Base Case with Probable Environmental Flow & Minimization of Lake Fluctuation.** Alternative 2 is the same as the Base Case except that higher environmental flows are required and lake level drop would be limited.

4.2 Results

Firm capacities and average annual energy estimates are presented in Table 4-1.

Table 4-1 Firm Capacity and Average Annual Energy Estimates

Alternative	98% Winter Capacity (MW)	Average Annual Energy Production (GWhrs)
Susitna	245	2,600
Chakachamna, Base Case	170	1,300
Chakachamna, Alternative 1	140	1,100
Chakachamna , Alternative 2	30	860

The energy distribution by month for each of the above alternatives is shown in Figure 4-1 below.

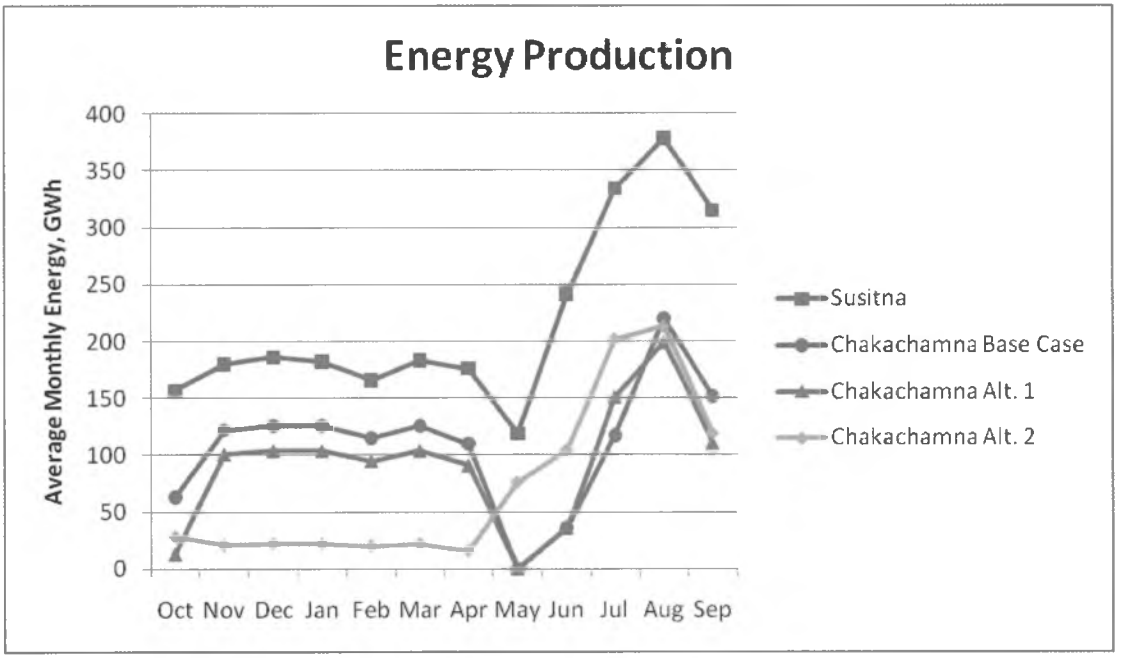

Figure 4-1 Energy Distribution by Month

As can be seen by these results, the firm winter capacity and average annual energy production estimates can vary significantly based upon the assumed environmental constraints placed upon the project. For the Chakachamna Project, increased environmental flow requirements (Alternatives 1 and 2) reduce the amount of water that is available for generation, thereby

lowering the annual energy. Reduced use of reservoir storage greatly limits the amount of energy that can be produced during the winter months (Alternative 2).

Detailed Chakachamna environmental discussion can be found at Susitna and Chakachamna – Preliminary Decision Document, Environmental-Energy-Cost November 12, 2010 located on the AEA Railbelt Large Hydro webpage.

For the Susitna Project, environmental flow requirements are met by water passing through the generating units and then being released into the natural stream channel. The effect of changed environmental flows is to change the timing of the energy production but not necessarily the average annual amount of generation.

Chapter 5 Permitting

5.1 Overview – Regulatory Processes

While pursuant to the Federal Power Act (FPA), the Federal Energy Regulatory Commission (FERC) has exclusive authority to issue licenses for most non-federal hydropower projects, there are several federal and state agencies that are authorized under several federal statutes to submit mandatory and recommended terms and conditions to be included in a FERC-issued license.

- **FERC's licensing process options** – Applicants may propose to use one of three options: the Integrated (ILP), Alternative (ALP), or Traditional (TLP). The default is the ILP, unless FERC approves use of either the ALP or TLP.
- **Pre-filing consultation** – extensive pre-filing meetings and exchange of information required.
- **Federal Energy Regulatory Commission – Application for License** required; Draft submitted for review & comments; Final filed.
- **Federal and State resource agencies consultation & terms & conditions** – File mandatory & recommended terms and conditions; most become License Articles and require compliance.
- **Numerous other State & Federal approvals & permits are required** – Applicants are required to provide evidence of consultation with agencies in an Application for License, and provide copies of permits and/or approvals.

Please also see R&M Consultants/Hatch Associates Consultants report (2010) for a detailed presentation of the various agencies and their authorities who would shape the content of any issued license.

5.2 Regulatory Issues – Chakachamna Project

TDX received its first Preliminary Permit on November 14, 2006. The purpose of a Preliminary Permit is to reserve priority to conduct studies for a period of three years, and if the effort results in filing an Application for License. A successive (second) permit was issued on February 25, 2010. This permit expires on January 31, 2013. FERC noted in issuing the permit that "a successive permit can warrant a greater standard of Commission oversight." "If the permittee fails to make significant progress toward developing a license application, the permit may be subject to cancellation."

On July 17, 2009, TDX filed its Notice of Intent to File an Application for License (NOI), Request to Use a Traditional Licensing Process (TLP), and Pre-Application Document (PAD). By letter dated July 27, 2009, FERC requested that they consider which licensing process it wishes to use and to refile its request noting that there would not be a need to refile the PAD. TDX met with FERC on August 5, 2009 to discuss the proceeding. On September 21, 2009, TDX requested to rescind its PAD. TDX stated that "this Project may be best served by an Integrated Licensing Process (ILP). TDX stated its intent to implement a field season in 2010 and to hold a study plan review and workshop in February 2010. TDX has a website for the Project and there is no evidence that work is proceeding as noted in their September 21, 2009, correspondence to the FERC. Nor has any further information been filed with the Commission. Under TDX's current development schedule, a third FERC Permit would be necessary.

5.2.1 Licensing Schedule

Once the pre-filing process restarts the schedule could be:

- Prepare and File Final Application for License – 4.5 years
- FERC Processing and License Issuance – 2.5 years

5.3 Regulatory Issues – Susitna / Low Watana Project

At present, there is no FERC Preliminary Permit in effect. While a FERC Permit is not required, it would be prudent for an entity representing the State to secure priority to study the Project. As discussed above, the Alaska Power Authority (APA), now known as AEA prepared and filed an application for license in February 1983. That application was withdrawn and APA revised the Project schedule to realize benefits identified with a three, as opposed to two-year construction schedule in 1985. In 1986, APA abandoned pursuit of a FERC license for numerous reasons, including financial feasibility.

In 2008, AEA began an update of the project, including preparation of the Railbelt IRP to evaluate the ability of the Susitna Project, and other resources, to meet long term demand in the Railbelt Region.

5.3.1 Licensing Schedule

Table 5-1 shows a Licensing, Engineering and Construction Schedule Comparison for the two projects. For the Susitna Project, based on information available at this time, the FERC schedule could be:

- Prepare and File Final Application for License – 3.5 years
- FERC Processing and License Issuance – 2 years

5.4 Total Project Development Timeline

Table 5-1 provides a Development Schedule Comparison for the two projects. Based on information available at this time, the comparative total schedule from start of the FERC process, in the case of the Chakachamna a restart of their pre-filing process, could be:

Table 5-1 Development Schedule Comparison

Major Task	Chakachamna	Susitna Low Watana
FERC Pre-filing Process	4.5 years	3.5 years
FERC Processing – DC	2.5 years	2.0 years
FERC Processing - Portland	2.0 years	1.0 years
Construction through Start up	5.5 years	4.5 years
TOTALS	**14.5 YEARS**	**11 YEARS**

Detailed Susitna and Chakachamna Licensing and permitting information is found at Susitna-Low Watana & Chakachamna Projects, Large Hydro Evaluation of Two Projects, Preliminary Decision Document, Environmental & Regulatory Issues November 14, 2010 located on the AEA Railbelt Large Hydro webpage.

Chapter 6

Development Schedule

The following tables (Table 6-1 and Table 6-2) show the major tasks associated with hydro project development, and the estimated preliminary schedule for completion for the Chakachamna Project compared to the estimated preliminary schedule for completion for the Susitna Project. Special considerations and assumptions for each are listed below.

Table 6-1 Considerations / Assumptions

Chakachamna Project	Susitna Project
▪ TBM est. 14-16 months to order and deliver to site ▪ 4.5 year pre-filing process assumes studies underway in 2011 (one year behind schedule in TDX PAD, 2009) ▪ 2.5 years for FERC Processing and License Issuance, and 5.5 year construction schedule based on PAD (Appendix 2-1) ▪ FERC-PRO processing and some procurement must be accomplished before field work can begin ▪ Longer construction schedule due to significant underground work, with higher risk profile and greater uncertainty ▪ Project "access" to require 2 yrs to construct ▪ Chakachamna has higher risk that the schedule to Project Startup will extend beyond 14.5 years.	▪ Significant, extensive and valid environmental studies performed in 1980's to be updated and used to develop FERC documents ▪ Significant geotechnical investigations performed previously ▪ FERC-PRO processing and some procurement must be accomplished before field work can begin ▪ More surface features and work carries more schedule certainty, less risk ▪ Project "access" to require 2 yrs to construct ▪ Engineering schedule based on "Low Watana Non-Expandable Development" (HDR, 2009) ▪ Susitna has lower risk that the schedule to Project Startup will extend beyond 11 years.

Table 6-2 Licensing, Engineering, and Construction Schedule Comparison

	Regulatory / Environmental Major Tasks			Engineering / Construction Major Tasks		
	Preliminary Permit	**Chakachamna**	**Susitna**		**Chakachamna**	**Susitna**
Pre-License Issuance	Scoping Draft Application Final Application	4.5 yrs	3.5 yrs	Feasibility Engineering Design Specifications, Drawings & Bid Documents		
	FERC Processing (DHAC) License Order Issued	2.5 yrs	2 yrs			
Post-License Issuance	License & Permits Compliance			FERC Processing (Portland Regional Office) Procurement	2 yrs	1 yr
				Construction Testing & Commissioning Project Startup	5.5 yrs	4.5 yrs
Reg/Env Estimated Schedule		**7 yrs**	**5.5 yrs**	**Eng/Const Estimated Schedule**	**7.5 yrs**	**5.5 yrs**
				ESTIMATED TOTAL TO STARTUP	**14-15 years**	**11 years**

Chapter 7

Financial

Based on project risk for investors, the two projects, Susitna and Chakachamna, are similar. Project financing for either project, where the costs of the project is paid for solely by the sale of power produced from the project, is assumed to be unavailable. Without State participation these project are unlikely to proceed. State participation of whatever form it takes place will enable these projects to occur and lower the cost of the energy to ratepayers.

Large projects have financing that is structured on some amount of government participation. Government participation is normally required because of the following risks generally associated with large hydroelectric projects make project financing unattainable:

- **Timeline**: Project may take 10-20 years prior to first power sales. Private investors do not like to spend substantial funds for an extended time when the payoff is a long time or may not occur.
- **Licensing and Permitting Risk**: Significant funds can be spent only for the project to have long delays in licensing and in operation constraints placed on project.
- **Construction Risk**: Estimating the cost of a project many years out has risk of the prices changing for materials and labor. In addition, the demand for a product can change.

The "Bradley Model" has been discussed as a way that a new large hydroelectric facility can be financed for construction with State assistance. Licensed and constructed in the 1980's and early 1990's it is Alaska's largest hydroelectric project. Bradley Lake Hydroelectric Project (Bradley Project) is located southeast of Homer, Alaska and is a 125-foot high concrete faced rock filled gravity dam. The project has 126MW of installed capacity and produces approximately 9 percent of the railbelt's annual energy. The state paid for licensing and much of the cost of the project. Approximately 50 percent of the project's licensing and construction cost was paid by the State. The railbelt utilities purchase all the power for the projects and pay all the costs of the project (bond financing, Operations and maintenance). Once the debt service is retired then the utilities will continue to pay the State the same amount as the debt service.

Detailed information on State participation and Bradley financing is available at Hydroelectric Project Risk Analysis & the Bradley Lake Funding Model Summary Report, November 15, 2010 located on AEA's website at the Railbelt Large Hydro webpage.

Chapter 8

Cost of Power

The cost of power from the Susitna and Chakachamna Projects is addressed in this chapter. A simple calculation of the cost of power, which assumes 50 percent State equity in either project, a financing rate of 6 percent, and annual energy from sections above results in the generation costs shown in Table 8-1 below.

Table 8-1 Cost of Power Comparison

Project	Finance Amount (50%)	Rate	Term (years)	Annual Energy (GWhrs)	Cost per kWhr
Susitna	2,250,000,000	6%	30	2600	$0.063
Chakachamna Alt 1	1,440,000,000	6%	30	1100	$0.09
Chakachamna Alt 2	1,440,000,000	6%	30	860	$0.12

This simple table gives an idea of how the two projects compare in the cost of power. Interest during construction is excluded from this comparison.

The estimated construction cost of Chakachamna Alternative 1 would need to decrease by 30 percent to have a comparable cost of power with the Susitna Project. Or, assuming no changes in the cost the energy of the Chakachamna Project, annual energy would need to be 1600 GWhrs. This could only be achieved by having zero environmental flow.

An alternative way of analyzing cost comparisons is to estimate State contributions needed if generation costs are held at $0.06 kWhr. From this perspective, the State required contribution would be $2.35 B for the Susitna Project (2,600 GWhrs) and $1.96 B for the Chakachamna Project (1100 GWhrs) or $2.17 B (860 GWhrs). Assuming state participation would be based on providing $.06 cost per kWh, the Susitna project would cost 20% more than Chakachamna project Alternative 1; however, it will provide approximately 136% more energy and compared to Alternative 2, an 8% greater cost with 200% more energy.

Chapter 9

Operational Uncertainty

Table 9-1 presents a summary of the comparative operational uncertainties associated with developing the Chakachamna and Susitna Projects.

Table 9-1 Operational Uncertainties Issue Comparison

Issue and likelihood of occurrence within next 100 years	Chakachamna Project	Susitna Project
	Issue Notes/Requirements	**Issue Notes/Requirements**
Earthquake Risk		
Immediate damage due to fault movement Studies show 700-year return period for significant earthquakes (magnitude 6 to 7), last such earthquake approximately 650 years ago.	Castle Mountain fault, approximately 11 miles from the lake, magnitude 7+, displacements of up to 6 ft, only 4500 ft from powerhouse site. Infrastructure near the fault include; powerhouse and bridge over Chakachatna River. Power tunnel intersects numerous smaller faults. Seismic event may cause localized collapse in the fault zone if not lined. Lack of information about whether movement could occur on any of these smaller faults.	Castle Mountain Fault located 65 miles from powerhouse, intake, lake, magnitude 7+, Denali Fault located 45 miles , magnitude 8.0, Inter-plate subduction zone located 40 miles, magnitude 9.2 Dam could experience high seismic loads (known seismic zone, EQ design case should consider loading)
Secondary effects	Landslide and avalanche potential into lake and onto access road.	Potential landslides and avalanches along access roads.
Hydrological Risk		
Generation	USGS record at site 11 years of data, correlation with 4 streams. Understanding of the hydrology There is potential during events such as floods or glacial activity for down cutting of the glacial moraine at the end of the lake which could reduce head and storage in the project Smaller basin will cause greater deviations from average hydrological flow and energy generation. Drought (Not sure if needed, see above) Tunnel roughness may increase with time due to wear which will reduce generation.	USGS record at site 54 years of data on Susitna River. Understanding of the hydrology vis a vis climate change effects.
Climate Change		
Glacier recession	Increase in flows as the glaciers melt (>100 yrs), followed by reduced and more "flashy" flows at the project.	Increase flow for a period with glacier recession (>100 yrs) followed by decreased flow.
Volcanism		

Table 9-1 Operational Uncertainties Issue Comparison

Issue and likelihood of occurrence within next 100 years	Chakachamna Project	Susitna Project
	Issue Notes/Requirements	**Issue Notes/Requirements**
Effects on Project Facilities and Features	Mt Spurr is located immediately adjacent to the project, Redoubt volcano is approx. 50 miles to the west. Explosive eruption at Mt. Redoubt 2009 Previous eruption on Mt. Spurr was a side blowout. Debris flows similar to those that occurred in 1953 and 1992 eruptions of Crater Peak could dam Chakachatna River. The debris dams might erode progressively or may burst abruptly. Lava flows could dam the Chakachatna River and raise Chakachamna Lake. Large floods would be produced by surging and melting of glacial ice during an eruption. Glacier movement (melting at base) is probable. Ice flow on Barrier Glacier may surge, dam the lake, raise water level and erode through, typically below the glacier in material. Access road may become blocked or destroyed by mud or erosion (high flows in river from melting glacier or glacial dam breakout). Effects on river bridges from debris flow Ash effects on transmission Poison gas cloud could affect the powerhouse (unlikely with distance & powerhouse location) Communications may be disrupted by volcano.	Mt Wrangell is located to the more than a hundred miles to the East and is closer to Watana. Mt Wrangell is in a non-eruptive active state at present but with history of 9 reported possible eruptions since 1760, most recently 1930; steaming at present. Ash could reach the Watana project and transmission lines depending on wind conditions. Pyroclastic flows are unlikely to affect Watana due to distance and intervening terrain.
Tunnelling and Foundation Conditions		
Dam	Small structure on rock foundation. Material of the natural dam, believed to be moraine, could contain significant quantities of ice, lahar material, or volcanic ash that could affect the permanence of the natural dam.	Geotechnical exploration indicates favorable foundation conditions on bedrock. Foundation (permafrost). Melting permafrost in the rock could lead to increased permeability of foundation that may require additional grouting associated with project site.

Table 9-1 Operational Uncertainties Issue Comparison

Issue and likelihood of occurrence within next 100 years	Chakachamna Project	Susitna Project
	Issue Notes/Requirements	Issue Notes/Requirements
		River diversion tunnels. Large spillway.
Power tunnel(s)	Extensive underground construction will be expensive to shut down for inspection and repair if necessary. Very hard rock along tunnel alignment – more than 35,000 psi, which is extremely hard and could present difficulty for a tunnel boring machine resulting in slow progress.	Competent rock conditions for dam and tunnel construction, studies date to 1982. Very short power tunnel(s) – 1.0 mile max, and shallow and surface power tunnel, therefore less risk of delay in construction. Limited number of geotechnical fault zones to pass through, due to location and short length of tunnels, provided "Fingerbuster" and "Fin" zones are avoided.
Glacier Activity		
Dam and Intake	Unpredictability regarding the interaction of glaciers with the volcanic activity, including possible melting at the base of the ice that would cause glacial pulses or surges. An advance of Barrier Glacier at the Chakachamna Lake outlet, initiated by heat from below the ice, could dam the outlet and raise the lake level. When the ice nose decayed, a large volume of water would be released that could erode the lake outlet and lower the lake below its present level. There is potential during events such as floods, glacial activity for down cutting of the glacial moraine at the end of the lake which could reduce head and storage in the project. Lowering the lake would reduce the submergence of the power inlet below what is acceptable. Breakout in 1971 one of Alaska's largest recorded floods.	N/A
Powerhouse	Blockade Glacier has been identified as a source of outburst floods on McArthur River	N/A
Surging Glaciers	Four glaciers in the Chakachamna study area have been identified as surging glaciers. They include Pothole Glacier and Harpoon Glacier in the Nagishlamina River Valley and Capps Glacier on the eastern slope of Mt Spurr.	N/A

Table 9-1 Operational Uncertainties Issue Comparison

Issue and likelihood of occurrence within next 100 years	Chakachamna Project	Susitna Project
	Issue Notes/Requirements	**Issue Notes/Requirements**
Outburst Glaciers	Glacier damming of the Nagishlamina Valley by a surging glacier may result in outburst conditions at the outlet from Chakachamna Lake. A sudden influx of water into Chakachamna Lake could produce significant changes including lowering of the lake outlet.	N/A
Other		
Intake	Lake tap would need fish screens Volcano eruption may affect power tunnel intake.	N/A
Access Road	Landslide, avalanche danger part of the route.	Avalanche danger over a portion of the route.
Transmission Line	42 miles of new transmission line to Beluga Sub Station. Submarine cable across Cook Inlet subject to marine environment risks such as currents, scour, dragging anchors.	58 miles of new transmission line.
Operation & Maintenance		
Operations & Maintenance	Long tunnel intersecting numerous faults susceptible to rock-falls over time and maintenance requirements Rock entrained in tunnel flow could damage turbines Long tunnel has higher risk of collapse, blockage Long tunnel will require planned outages for inspection and maintenance over life of project, higher risk of interruption.	Multiple short tunnels allows for more regular inspection and maintenance without prolonged outages and impact to operations
Load Stability		
Powerhouse location with respect to load centers	Off the end of the railbelt load center, not easy to stabilize (brown-out/black-out).	Location between Anchorage and Fairbanks means project is closer to center of load, easier to stabilize grid using reactive potential.
Hydrological Risk - Water Shortage		
Drought	Small catchment mainly fed by meltwater from glaciers, which make this site more susceptible to water shortages and less dependable as a source of energy.	Catchment is less susceptible to drought.

Chapter 10

Summary and Conclusions

This document compared two large hydroelectric projects to determine which would better meet the needs of the railbelt population and the State of Alaska now and into the future. The following table shows a comparison summary of the two projects.

Table 10-1 Comparison Summary

Criteria	Susitna (Low Watana) Project	Chakachamna Project
Engineering (Cost)	$4.5B	$2.9
Environmental	Same basin, modified flows, little to no salmon present.	Cross basin drainage, substantial concern regarding fisheries and Trading Bay State Game Refuge.
Energy	2,600 GWhrs annual average. About 50% of existing railbelt annual electrical energy. Meets and exceeds State energy policy without other projects.	Most likely to be less than 1,100 GWhrs annual average. About 20% of existing railbelt annual electrical energy. Does not provide substantial winter power.
Start-up Date	Approximately 11 years	Approximately 15 years
Licensing/Permitting	Substantial site knowledge likely to reduce licensing/permitting delays.	Significant unknowns on environment, geology, and hydrology likely to slow process
Finance	Requires State financial support	Requires State financial support
Cost of Energy	Simple calculation using cost & energy numbers above, 50% State equity, and 6% interest yields $0.06 /khr	Simple calculation using cost & energy numbers above, 50% State equity, and 6% interest yields $0.09-0.12 /khr
Operational Uncertainty	Less long term operational risk from seismic. Central location helps to stabilize grid.	Greater long term operational risk from seismic events, volcano eruption, & glacial changes. Energy more variable on an annual basis. Harder to stabilize.
Notes	River system has potential to expand generation by going upstream, downstream, or raise dam height. Transmission lines could connect to other areas of the State.	

The Susitna Project would produce more energy and at a lower cost per MW. Historically the flow has varied little year to year so that the amount of energy can be better estimated. Most of the Project is anticipated to be above ground so that geotechnical unknowns that influence construction cost risk are minimized. Produced energy during summer would be greater than desired so that flows would remain high for salmon downriver. However, the reservoir area would give the Project the ability to still generate substantial power during the winter critical months.

The Chakachamna Project would not be able to divert flow as was used for estimating energy in the early 1980's. The reduced flow would have substantial effects on the Trading Bay State Game Refuge down river and would cause false attraction to return adult salmon so that they are not able to find their way to the lake. In addition, the smolt salmon in the lake need substantial outlet flow to enable them to find the exit to the lake. Drawing down the lake during the winter would cause mortality of shallow spawners and may prevent salmon from ascending up the rivers at the head of the lake during early summer. If the Project is operated to provide significant environmental flows and restrict the lake drawdown then the cost of energy increases significantly and would produce minimal energy during the critical winter months. Because of the complex two drainage system hydrology and rich fisheries determining the environmental flow and conditions will require many years and millions of dollars. The substantial number of multi-year studies would delay the licensing and start-up date.

The Susitna Project is thought to be a licensable project without a fatal flaw. Geotechnical information indicates bedrock is suitable for construction. Environmental information indicates that impacts would be minimal. The Chakachamna Project has many fisheries concerns that will restrict the Project operation, increase the cost, and decrease the energy output of the Project. Some of the issues may not be able to be mitigated.

The Susitna Project provides a lower cost per unit of energy, the least environmental impact, a greater total amount of energy, and the anticipated startup date is sooner.

Based on the projects economics and impacts Susitna Project (Low Watana non-expandable alternative) should be the primary Project to pursue with Chakachamna Project as the alternative.

Chapter 11

Recommendations

We recommend that field studies and engineering evaluations be conducted on the Susitna Project preparing for a Final Decision Document scheduled to be released on November 15, 2011. In addition, we also recommend that a FERC license application be initiated on January 1, 2012 for the selected Project. In order for the process to move forward it is recommended that a Preliminary Permit be filed with FERC for the selected Project by December 31, 2011.

Specific studies to be completed in 2011 include:

- A complete review of the 1985 Susitna environmental study plan and the conduct of critical studies from that plan. Changes to the river system and the environment need to be documented.
- Field work to verify Susitna environmental conditions.
- A detailed cost estimate of the Chakachamna Project including changes to the Project introduced by environment constraints such as downstream flow releases (size optimization).
- A final determination of the type dam to be used at the Susitna site and the access plan and a revised cost estimate of the overall scheme.
- Detailed engineering studies on transmission needs, design drawings, and geotechnical review.

It is anticipated based on the schedule discussion in preceding Section 6.0 that the data gathered in the 2011 field season can be used for both the primary and alternative project. The FERC Preliminary Permit for the Susitna Project should be filed by December 2011.

ALASKA
ENERGY AUTHORITY

ALASKA POWER ASSOCIATION
R E S O L U T I O N

A Resolution in Support of Expanded Powers for the Alaska Energy Authority

The Alaska Legislature has adopted a goal of 50 percent renewable energy by 2025. The only way this goal can be met is with the construction of a major hydropower facility for the Railbelt or other very large generation projects, the cost of which would be well beyond the financial ability of any of the individual Alaska electric utilities.

Therefore, the state will need to be an integral partner in the funding and construction of any such projects. The logical state entity for this partnership is the Alaska Energy Authority (AEA), but it is, at present, limited by its statutory authority.

Alaska Power Association supports the expansion of statutory powers of the AEA that would, at a minimum, allow the agency to acquire, construct or own any interest in an electric project or any right to capacity of an electric project or to perform feasibility studies, design and engineering with respect to power.

Governor Sean Parnell
STATE OF ALASKA

January 14, 2011

The Honorable Gary Stevens
President of the Senate
Alaska State Legislature
State Capitol, Room 111
Juneau, AK 99801-1182

Dear President Stevens,

Under the authority of Article III, Section 18, of the Alaska Constitution, I am transmitting a bill that would authorize the Alaska Energy Authority (AEA) to move forward on pursuing a large hydroelectric project to supply much needed energy to Interior and Southcentral Alaska. The bill would authorize AEA to acquire, construct, own, and operate new power projects; create a new Alaska Railbelt energy fund as a fund of AEA; repeal the existing Railbelt energy fund (AS 37.05.520) after the balance of the existing fund is appropriated and transferred into the new fund or appropriated and expended for other purposes; address quorum requirements of the AEA board; and allow for the adoption of regulations to govern the procurement of supplies, services, professional services, and construction.

Alaska's State Energy Policy target is to reach 50 percent of its electricity generation through renewable energy by 2025. To achieve this goal, we must move aggressively and invest now to develop capacity for a major hydroelectric project on the Susitna River. This legislation allows AEA to continue with environmental and feasibility studies positioning the State to seek preliminary approval from the Federal Energy Regulatory Commission for a project that will provide half of Southcentral's electricity demand.

Alaska must invest now to create new opportunities for economic development and jobs for Alaskans. A Susitna Dam hydroelectric project will provide an important and much needed supply of renewable energy for Alaskan homes and businesses while creating jobs for Alaskans. A sectional analysis is provided with this packet.

I urge your prompt and favorable action on this important measure.

Sincerely,

Sean Parnell
Governor

Enclosure

Analysis:

ALASKA INDUSTRIAL DEVELOPMENT & EXPORT AUTHORITY - AIDEA

Personal Services: TOTAL $(5,578.7)

$ (5,578.7) Decrease in personal services costs with transfer of 42 employees to Alaska Energy Authority.

$ - Request one new position for AIDEA - Accountant IV, Range 20, to accommodate anticipated increased work load. Estimated cost is $110.0
No net increase in AIDEA Receipts requested - Cost offset by receipts from AEA for facilities costs. See net change in receipts for AIDEA Facilities Component.
Net reduction in position count to AIDEA is 41.

Contractual Services: TOTAL $341.6

$ 341.6 Contractual cost of AEA Employees providing shared services (Operations Department) to AIDEA.

$ (5,237.1) Net Change to Expenditures

ALASKA INDUSTRIAL DEVELOPMENT & EXPORT AUTHORITY - Facilities Maintenance

Currenty AIDEA absorbs the building operating costs . This fiscal note estimates the impact to AEA and AIDEA if AEA reimbursed AIDEA for their pro rata share.

Facility Operating Cost = $3.4 per PCN per year x 42 employees = $142.8

Contractual Services: No net impact to expenditure line. Reimbursement of actual costs impacts only the revenue source.

Impact to Fund Source: Reduces AIDEA receipts and Increases I/A receipts. Tranfer AIDEA receipt authority to operations component

ALASKA ENERGY AUTHORITY - Statewide Project Development, Alternative Energy and Efficiency
FN 1 of 2

Personal Services: TOTAL $ 5,638.7

Increase in personal services costs with transfer of approximately 42 employee from AIDEA. All employee costs will be accounted for in one component - Statewide Project Development, AEE. This transfer reduces contractual services in several AEA components and increases personal services in this component.

$	160.0	Approximately 2 FTE's providing support to the AEA PCE Component - GF funds.
$	2,207.5	Approximately 16 FTE's providing support to the AEA Rural Energy Operations Component - GF and CIP receipts.
$	2,320.0	Approximately 17 FTE's providing support to the AEA Statewide Project Development & AEE Component - GF and CIP receipts.
$	891.2	Approximately 7 FTE's who are defined as shared service. This includes 6 positions that report to the Deputy Director of Operations and one engineer that works on both AIDEA and AEA projects.
$	5,578.7	
$	60.0	Request one new position for AEA - Loan Officer R20. Request additional BF receipts of $60.0 with remaining funds through current funding levels.
$	5,638.7	

Contractual Services: TOTAL $ (2,311.1)

$	(2,320.0)	Decrease Contractual Services and transfer cost to Personal Services. Approximately 17 FTE's.
$	(285.1)	Operations - Shared Services. Decrease Contractual Services and transfer cost to Personal Services.
$	142.8	Facility Operating Cost = $3.4 per PCN per year x 42 employees = $142.8
$	151.2	G&A Cost Currently paid by AIDEA = $3.6 per PCN per year x 42 employees = $151.2
$	(2,311.1)	

$	**3,327.6**	Net change to expenditures

ALASKA ENERGY AUTHORITY - Statewide Project Development, Alternative Energy and Efficiency
FN 2 of 2

Personal Services: TOTAL $ 1,125.0

Increased to include 8 staff for the first year as follows:

$	210.0	Project Manager Rg 27
$	175.0	Environmental Manager Rg 26
$	70.0	Administrative Assistant Rg 12
$	100.0	Project Accountant Rg 18
$	155.0	Financial/Budget Analyst Rg 24
$	140.0	Public Outreach/Legislative Liaison Rg 23
$	155.0	Procurement Manager Rg 24
$	120.0	Data Systems Specialist Rg 20
$	1,125.0	

Contractual Services: TOTAL $ 238.0

$	189.0	Annual Lease - 4,500 sq. ft. x $3.50 per sq. ft./mo. X 12 mo.'s
$	13.0	Utilities - $1.3 per person x 10 (8 staff + 2 contractors)
$	36.0	G&A Expense: $3.6 per person - $3.6 x 10 (8 staff + 2 contractors)
$	238.0	

Equipment/Furniture: TOTAL $ 413.0

$	28.00	IT Equipment $2.0 per person per year x 14 (8 staff + 6 contractors). Assumes all equipment purchases in 1st yr for project office (including contract labor needs).
$	385.00	Tenant Improvement $315.0 ($70 x 4,500 sq ft); Moving Expenses $21.0 and Furniture 49.0
$	413.00	

ALASKA ENERGY AUTHORITY - Rural Energy Operations

Personal Services: No Impact.

Contractual Services: TOTAL $ (2,329.3)

$	(2,207.5)	Reduce cost contractual costs of employee services and transfer out to Statewide component. Approximately 16 FTE's.
$	(121.8)	Reduce contractual costs of Operations employees who provide shared services. Transfer cost to Statewide component personal services.
$	(2,329.3)	

ALASKA ENERGY AUTHORITY - Power Cost Equalization

Personal Services: No Impact.

Contractual Services: TOTAL $ (160.0)

$	(160.0)	Reduce cost contractual costs of employee services and transfer out to Statewide component. Approximately 2 FTE's.
$	(160.0)	

ALASKA ENERGY AUTHORITY - Owned Facilities

Personal Services: No Impact.

Contractual Services: TOTAL $ (25.0)

$	(25.0)	Reduce cost contractual costs of employee services and transfer out to Statewide component. Approximately 15% of 1 FTE.
$	(25.0)	

Summary of Net Increase in GF Request for AEA:

$	76.9	Shared Services - IT Support not previously paid for by AEA
$	40.8	Shared Services -HR Support not previously paid for by AEA
$	294.0	O/H Facility Operating Cost/G&A not previously paid for by AEA
$	411.7	

CSSB 42(RES)
Sectional Analysis

Section 1: Would expressly authorize the legislature to appropriate amounts in the Railbelt energy fund to capitalize the new Railbelt energy fund, called the Alaska Railbelt energy fund, created by Section 3 of the bill. This would allow amounts to be appropriated and transferred from the existing Railbelt Energy fund into the new fund.

Section 2: Would place in the exempt service the executive director and other staff of AEA.

Section 3: Would establish the new Railbelt energy fund, called the Alaska Railbelt energy fund of AEA. The legislature may appropriate money from the fund for feasibility studies, license, permit, acquire or construct, or to make grants for power projects and electric transmission lines and interties that serve the Railbelt region.

Section 4: Would increase from 3 to 4 the quorum requirement for meetings of the AEA board of directors in reaction to statutory amendments made in 2010. Those amendments increased the size of the AIDEA board from 5 to 7. The AIDEA board serves as the board of AEA. The proposed amendment would correct the quorum for meetings of AEA's board of directors.

Section 5: Would empower AEA to hire employees and advisors in the exempt service. This power to hire employees would be equivalent to powers the Alaska Industrial Development and Export Authority (AIDEA) currently possesses.

Section 6: Would expand AEA's powers to allow AEA to acquire, construct, and conduct feasibility studies, engineering and design of new power projects.

Sections 7: Would empower AEA, if approved by law, to establish subsidiary corporations to support the acquisition, construction, ownership, and operation of power projects, and thereby potentially limit potential liability of AEA or strengthen the financial viability of a project.

Section 8: Would enable an AEA subsidiary to exercise powers currently granted to AEA under AS 44.83.090. For example, an AEA subsidiary would be exempt from regulation by the Regulatory Commission of Alaska (RCA) to the same extent as AEA is exempt (but utilities contracting with the AEA subsidiary would not be exempted, and RCA would still need to approve power sales agreements between the AEA subsidiary and the Railbelt utilities).

Section 9: Would provide that AEA must exercise for new power projects, existing statutory authority managing power projects. This obligation is currently limited to power projects from the pre-1993, "former energy program for Alaska."

Section 10: Would make AS 44.83.396 apply to AEA subsidiaries that own power projects . AS 44.83.393 addresses how AEA administers the power project and contracts for operators, and includes provisions providing for AEA to contract with qualified utilities for the operation of the project. The amendment in Section 10 will impose these same duties on a subsidiary of AEA formed for a power project.

Section 11: Would amend the definition of "feasibility study" under AS 44.83.990(3) so that the term is not limited to only pre-1993 power projects.

Section 12: Would repeal the existing Railbelt energy fund, AS 37.05.520. This repeal would become effective under Sections 16 and 17 when the balance of the fund is appropriated to AEA for deposit into the new Alaska Railbelt energy fund (created by Section 3), or appropriated for other authorized purposes.

Section 13 would provide "approval by law" for AEA to form a subsidiary corporation for the Watana Hydroelectric Power Project, as required by AS 44.83.085, to be enacted by Section 7 of the bill.

Section 14: Would provide transitional provisions to address the status of existing employees who perform AEA functions with the Alaska Industrial Development Export Authority. AEA has not possessed the statutory authority to hire its own staff since the reorganization of AEA affected by 1993 legislation (ch. 18, SLA 1993). Since the 1993 legislation, AEA programs have been implemented by AIDEA employees. AEA's executive director, for example, is an employee of AIDEA, but is independent from the executive director of AIDEA. Sections 2 and 5 would authorize AEA to hire its own employees, and thereby assume greater control over the implementation of AEA programs. Section 13 provides for the transition of these employees from AIDEA to AEA.

Section 15: Would instruct the revisor of statutes to amend the statutory heading of AS 44.83.040 to reflect that the section would also address AEA employees.

Section 16: Would make the repeal of the existing Railbelt energy fund, AS 37.05.520, contingently effective when an appropriation that becomes law appropriates the unexpended and unobligated balance of the fund to AEA for deposit into the new Alaska Railbelt energy fund (created by Section 3), or for other authorized purposes. The section also requires the Commissioner or the Department of Administration to notify the lieutenant governor and revisor of statutes when the conditions are met.

Section 17 would make the repeal effective on the date after the date the appropriation referenced in Section 16 becomes effective.

Section 18: Would provide for an immediate effective date, excepting the contingent effective date for repeal of the existing Railbelt energy fund.

Prepared by Department of Law
March 22, 2011

CSSB 42(RES)
Sectional Analysis

Sections 1, 3, 12, 16 and 17: Collectively, creates a new Railbelt energy fund called the Alaska Railbelt Energy Fund, as a fund of AEA and repeals the existing Railbelt energy fund. **Section 1** would expressly authorize the legislature to appropriate amounts in the Railbelt energy fund to capitalize the new Railbelt energy fund, called the Alaska Railbelt energy fund. This would allow amounts to be appropriated and transferred from the existing Railbelt Energy fund into the new fund. **Section 3** would establish the new Railbelt energy fund, called the Alaska Railbelt energy fund of AEA. The legislature may appropriate money from the fund for feasibility studies, license, permit, acquire or construct, or to make grants for power projects and electric transmission lines and interties that serve the Railbelt region.

Section 12: Would repeal the existing Railbelt energy fund. **Section 16** Would make the repeal of the existing Railbelt energy fund, AS 37.05.520, contingently effective when an appropriation that becomes law appropriates the unexpended and unobligated balance of the fund to AEA for deposit into the new Alaska Railbelt energy fund (created by Section 3), or for other authorized purposes., and requires the Commissioner or the Department of Administration to notify the lieutenant governor and revisor of statutes when the conditions are met. **Section 17** would make the repeal effective on the date after the date the appropriation referenced in Section 16 becomes effective.

Sections 2 and 5: Would empower AEA to hire employees and advisors in the exempt service. This power to hire employees would be equivalent to powers the Alaska Industrial Development and Export Authority (AIDEA) currently possesses.

Sections 14 and 15: Are transitional sections related to AEA hiring employees. **Section 14:** would address the status of existing employees who perform AEA functions with the Alaska Industrial Development Export Authority. AEA has not possessed the statutory authority to hire its own staff since the reorganization of AEA affected by 1993 legislation (ch. 18, SLA 1993). Since the 1993 legislation, AEA programs have been implemented by AIDEA employees. AEA's executive director, for example, is an employee of AIDEA, but is independent from the executive director of AIDEA. The bill would authorize AEA to hire its own employees, and thereby assume greater control over the implementation of AEA programs. **Section 15:** would instruct the revisor of statutes to amend the statutory heading of AS 44.83.040 to reflect that the section would also address employees.

Section 4: Would increase from 3 to 4 the quorum requirement for meetings of the AEA board of directors in reaction to statutory amendments made in 2010. Those amendments increased the size of the AIDEA board from 5 to 7. The AIDEA board serves as the board of

AEA. The proposed amendment would correct the quorum for meetings of AEA's board of directors.

Sections 6, 9, and 11: Would expand AEA's powers to allow AEA to acquire, construct, and conduct feasibility studies, engineering and design of new power projects. **Section 6** would amend the powers of AEA to add provisions related to new power projects. **Sections 9 and 11** would empower AEA to exercise for new power projects, existing statutory authority managing power projects which are currently limited to power projects from the pre-1993, "former energy program for Alaska." AS 44.83.396 (amended by **Section 9** of the bill) addresses how AEA administers the power project and contracts for operators. AS 44.83.990(3) (amended by **Section 11**) would define "feasibility study" so that it is not limited to only pre-1993 power projects.

Sections 7, 8, 10, and 13: Would empower AEA, if approved by law, to establish subsidiary corporations to support the acquisition, construction, ownership, and operation of power projects. **Section 7** would empower AEA to create subsidiary corporations for new power projects, and thereby potentially limit potential liability of AEA or strengthen the financial viability of a project. **Sections 8 and 10** of the bill would enable an AEA subsidiary to exercise powers currently granted to AEA. **Section 8** would amend AS 44.83.090 to exempt an AEA subsidiary from regulation by the Regulatory Commission of Alaska to the same extent as AEA is exempt (but would not exempt utilities contracting with the AEA subsidiary). **Section 10** would make AS 44.83.396 apply to AEA subsidiaries that own power projects . AS 44.83.393 addresses how AEA administers the power project and contracts for operators, and includes provisions providing for AEA to contract with qualified utilities for the operation of the project. The amendment in Section 10 will impose these same duties on a subsidiary of AEA formed for a power project. **Section 13** would provide "approval by law" for AEA to form a subsidiary corporation for the Watana Hydroelectric Power Project, as required by AS 44.83.085, to be enacted by Section 7 of the bill.

Section 18: Would provide for an immediate effective date, excepting the contingent effective date for repeal of the existing Railbelt energy fund.

Prepared by Department of Law
March 22, 2011

CSSB 42(RES)
COMPARISON: RCA REGULATION/AEA MANAGEMENT

Prepared by Department of Law
March 22, 2011

Statutory Bases For AEA Management:

1. AS 44.83.090(b) – AEA is not subject to jurisdiction by RCA, but that does not diminish RCA jurisdiction over utilities that purchase power from AEA projects. Absent another exemption, RCA must approve a power sales agreement before a utility could purchase from an AEA power project. AS 42.05.431(b).

    a. AEA exemption from RCA jurisdiction is similar to treatment given other political subdivisions.

        AS 42.05.711(b) – a public utility owned by and operated by a political subdivision is not subject to RCA regulation under AS 42.05 (with limited exceptions) unless: (a) the governing body elects to be subject to AS 42.05, or (b) the political subdivision would directly compete with another utility.

2. AS 44.83.090(a) – mandates provisions that must be included in AEA power sales agreements. The contract must provide for payment of operating and maintenance costs, interest and amortization of bond debt, AEA monitoring of project, full disclosure of all cost factors so rates will be determined on basis of true cost data; periodic revision of rates based upon accurate cost data; security and default provisions. Here, AEA does not make a "profit" under power sales agreements.

    AS 44.83.396(e) – mandates that AEA when it contracts for operation of a power project, review and approve annual budgets for operation and maintenance, and assure that the project is being operated efficiently and in a manner consistent with national standards for industry and agreements with bondholders.

Statutory Bases For RCA Regulation/Exemption

1. The statutory mandates on AEA under AS 44.83.090(a) and AS 44.83.396(e) largely duplicate what RCA could do under economic regulation.

    a. AS 42.05.381 & AS 42.05.431(a) require rates be just and reasonable, and not discriminatory. Rates are based upon costs.

b. AS 42.05.291 & AS 42.05.511 provide authority for RCA to investigate management, services and facilities for efficiency, safety, etc.

c. The statutory mandates on AEA alleviate the need for what would include duplicative RCA regulation, plus the legislature may provide oversight over AEA.

2. AS 42.05.431(b) – A wholesale power agreement between public utilities is subject to prior approval by RCA. This provision applies to utilities purchasing from AEA, absent another exemption.

    a. An example of exemption - AS 42.05.431(c) – provides that wholesale power and related agreements arising out of certain, specifically described projects which AEA owns or originally owned, are not subject to RCA review or approval until all long-term debt for the project is paid off.

    b. The exemption eliminated time necessary for RCA review and approval, and potential litigation.

    c. The exemption applies only to Bradley Lake Hydroelectric Project, and the original Four Dam Pool Hydroelectric Project (currently Lake Tyee and Swan Lake owned by the SEAPA joint action agency).

3. AS 42.05.431(b) – After RCA approves a wholesale power agreement and the agreement is in effect, RCA may not invalidate a sale under that contract. If sales under the contract make rates unjust or unreasonable, RCA can order parties to the agreement to negotiate or exercise dispute resolution mechanisms in the contract.

    a. Valid, approved power sales agreements will almost certainly be necessary to support financing a project.

4. AS 42.05.431(a) – includes provisions that municipal and cooperative utilities may include rate covenants in bond and debt instruments, and RCA may not reject a rate necessary to satisfy debt covenants relating to rates.

    a. This provision reduce scope of economic regulation and thereby offers assurances to creditors that the utility's debt will be repaid.

    b. Application of this or similar provisions will likely be necessary for AEA financing of large projects.

CSSB 42(RES) – FERC Oversight
(Prepared by the Alaska Department of Law)

FERC Oversight in Licensing Procedures	RCA Oversight
1. The FERC process evaluates the broad public interest. a. Environmental issues, including fish, wildlife & botanical resources, and water use and quality. b. Socio-economic and cultural impacts. c. Recreational resources. d. Project description and operating details. e. Economic and cost of power.	1. RCA approves power sales agreements. a. Rate under contract must be "just and reasonable." b. Decision based on cost of power & reliability factors similar to those FERC uses in licensing. c. After a power sales agreement is approved i. RCA may not invalidate power sales under an approved contract, and ii. RCA does not economically regulate operations under the contract, but may order renegotiation or dispute resolution.
2. The cost of power factors FERC evaluates in determining whether to grant a license include: a. Construction and operational plans. b. Whether the project can be operated efficiently. c. The local need for power. d. The projected cost of power. e. Comparison of the lowest cost, reasonable alternative source of power.	2. RCA Statutory Regulation. a. Non-economic regulation includes potential investigation of services and facilities of public utility that are unreasonable, unsafe, inadequate, insufficient, or unreasonably discriminatory. b. Economic regulation includes: i. Approval of rates if "just and reasonable," and "non-discriminatory." ii. Potential investigation of utility management for inefficient or unreasonable practices.
3. License conditions FERC imposes will impact the cost of power: a. FERC will impose license conditions (e.g., environmental conditions) which usually increase the cost of power. b. License conditions are mandatory. c. RCA economic regulation would not eliminate license conditions, regardless of impact on power rates.	
4. Post licensing activities. a. FERC will review and enforce compliance with license conditions, including dam safety. b. FERC reviews and approves license amendments, e.g. to improve efficiency of project. c. FERC oversight might impact efficiency and costs, but is not focused upon economic regulation.	

CSSB 42(RES) – FERC Oversight
(Prepared by the Alaska Department of Law)

Impact of Imposing Rate Regulation on Ability to Obtain Financing.

1. Financing a project at reasonable, economic rates requires minimizing risk of non-payment of the debt.

2. If "rate regulation" is imposed to eliminate the obligation of ratepayers to pay certain expenses (e.g., for cost overruns), another person or entity must pay.
    a. Placing payment risk on lenders or bond holders will likely either (i) preclude financing, or (ii) increase the cost of financing (increased costs which would pass through to ratepayers).
    b. Placing payment risk on utilities would generally redirect the obligation to the same persons - - from ratepayers to members for cooperatives, and from ratepayers to tax-payers for municipal utilities.
    c. Future legislatures could choose to appropriate more funds to the project to cover cost overruns, and protect ratepayers.

3. RCA statutes protect lenders and bond holders of municipal and cooperative utilities, assuring that rates RCA approves will cover debt payments.

RE: Tourism Marketing Funding

SB 46 Capital Budget

Senators:

In the Commerce section of SB 46 is a proposal (50611, P.21) to fund $7 million dollars for the Alaska Travel Industry Association, (ATIA). I urge you to reject this capital expenditure for a number of reasons:

- ATIA has not demonstrated success or a viable funding plan.
- ATIA has many advertising missions, but no measures of impact.
- ATIA is cruise-centric, rather than focus on independent air travelers who rent cars, hotel rooms, buy meals and fly to Bush Alaska.
- ATIA has not increased its industry funding ($2.7 m) for three years.
- The FY11 state subsidy was $16 million, 85% of ATIA's budget.
- ATIA opposes all taxes on the cruise industry, yet want 'sustainable' yearly funding by tapping tourism tax revenues.
- ATIA should be treated as the state does ASMI seafood marketing, which presently enjoys 20% state funding, not 85%.

Thank you for your attention to the issue of financing tourism marketing.

Chip Thoma, RCA President

Box 21884 Juneau, Alaska 99802 (907) 586-2117 chipt@alaska.net

To: Rob Earl
Subject: Fwd: FW: The demise of SpringBoard

Honorable Representative Herron and Senator Hoffman:

My name is Aaron Kennedy and I currently teach high school math and robotics in Kwethluk, Alaska. I have been teaching here for three years.
During my time here, I have struggled to cover all the appropriate material in my math classes AND make them interesting and relevant. Our robotics class has given me an opportunity to focus on application and using skills learned in other subjects.

Perhaps the best example of how important robotics is the story of a student that I have in math and robotics. In my three years, Jaymon has dropped out multiple times. However, this year he decided to take robotics and has worked hard at it. Since the Christmas break, he has not missed a day of school. All the teachers recognize a difference.
Instead of failing all of his classes, he is now passing almost all of his classes. The enjoyment that he gets out of the class and the reward of going to the local competition in Bethel has made him a better student.

Jaymon may be an extreme example, but virtually all of the students participating in robotics have demonstrated some improvement in the past few months. It is critical to keep programs like these running in our schools. Our school and school district (LKSD) receive a lot of help from the Juneau Economic Development Council's (JEDC) Springboard STEM Initiative.

It is my understanding that this program has been funded through the Department of Defense, and that all DoD funding has been eliminated from the current DoD re-authorization. We need the state to pick up the slack and help fund this effective and valuable initiative. Please fund SpringBoard's programs through the capital budget.

Thank you for your time and consideration in this matter.

Sincerely,

Aaron Kennedy

FISH AND WILDLIFE SERVICE
Alaska Maritime National Wildlife Refuge
95 Sterling Highway, Suite 1
Homer, Alaska 99603

March 17, 2011

Honorable Senator Bert Stedman
Honorable Senator Lyman Hoffman
Honorable Members of the Alaska Senate Finance Committee

Dear Senator Stedman, Senator Hoffman and other committee members:

Please accept this brief written submission to your committee on behalf of the Alaska Maritime National Wildlife Refuge. The refuge headquarters is in Homer, Alaska in the wonderful Islands and Ocean Visitor Center. The Islands and Ocean Visitor Center houses two organizations: the Kachemak Bay Research Reserve with its staff of state employees and the Alaska Maritime National Wildlife Refuge, with its staff of federal employees. Besides office facilities for both organizations, the center also includes a large exhibit hall and a small theatre. We enjoy a vibrant and successful partnership in the building. The Islands and Ocean Visitor Center also serves over 50,000 visitors each year who come to learn about the marine environment, the work of the two organizations housed in the center, and the remarkable fish and wildlife resources of Alaska.

As you make decisions about the possible construction of a natural gas pipeline to Homer, I want you to be aware of the current energy use of our facilities in Homer. The Fish and Wildlife Service manages three buildings in Homer. All three depend on fuel oil as the primary heat source and each could potentially be converted to natural gas. Our Islands and Ocean Visitor Center is 39,500 square feet. From October 1, 2009 through September 30, 2010, we consumed 25,392 gallons of fuel oil for that building. During the same time period, at our 4,992 square foot warehouse building, we used 1,543 gallons of fuel oil. We used 776 gallons of fuel oil at our 1131 square foot storage shed on Bunnell Street during that period.

Thank you for considering our energy usage as you make decisions about energy infrastructure needs and opportunities in and around Homer.

Sincerely,

Steve Delehanty
Refuge Manager

Testimony for Public Hearing: March 17, 2011

TO: Members of the Senate Finance Committee

Over the past year there has been considerable discussion of a gas line from Anchor Point to the City of Homer. South Peninsula Hospital, located in Homer, Alaska, requests that you support the $10.5 million dollar appropriation to see that this gas line becomes a reality for the people and businesses of the southern Kenai Peninsula.

This line would best be described as a transmission line rather than a distribution line. Distribution would take place in the various localities such as Kachemak City or the City of Homer. The City of Homer has done due diligence over the last year to put elements in place to assist with the distribution of the resource.

This line will benefit the region in terms of reducing energy costs. There are only limited options available to area residents and enabling natural gas flow would help to encourage competitive energy prices. Energy, the most expensive commodity on the peninsula, could come in line with the energy costs of Anchorage where fuel is considerably less expensive. Adding another source of energy would encourage economic development as the overall cost of energy would likely decrease with a new source coming to the area. New businesses would be encouraged to come to the southern peninsula and existing businesses would have a greater ability to expand.

The operational savings to large public facilities could be enormous. Specifically to us at South Peninsula Hospital, the savings would be tremendous. Our initial estimate is well over $200,000 in annual operating savings that our facility could see once we transition to gas.

We ask the members of the committee to please support the efforts to bring gas to the southern Kenai Peninsula. This action would be a very meaningful way to impact the quality of life and cost of living for many residents of Alaska.

Sincerely,

Larry D. Shirts.
Director of Supports Services
South Peninsula Hospital

TESTIMONY / SB 46

THANK YOU CO-CHAIRS STEDMAN AND HOFFMAN AND MEMBERS OF THE SENATE FINANCE COMMITTEE. I APPRECIATE THE OPPORTUNITY TO COMMENT ON SB 46, THE CAPITAL BUDGET SUBMITTED BY GOVERNOR PARNELL. FOR THE RECORD, MY NAME IS WALT WREDE. I AM THE CITY MANAGER FOR THE CITY OF HOMER.

THE GOVERNOR'S CAPITAL BUDGET DOES NOT INCLUDE FUNDING FOR PHASE II OF THE SOUTH KENAI PENINSULA NATURAL GAS PIPELINE. THIS GAS TRANSMISSION LINE WOULD BRING NATURAL GAS FROM ANCHOR POINT SOUTH 23 MILES TO HOMER AND KACHEMAK CITY. PHASE I OF THIS PROJECT WAS FUNDED LAST YEAR BY THE LEGISLATURE AND INCLUDED A PRESSURE REDUCING STATION IN ANCHOR POINT AND APPROXIMATELY 3,200 FEET OF LOW PRESSURE TRANSMISSION LINE. THE PROJECT WOULD HAVE SUBSTANTIAL REGIONAL BENEFITS FOR HOMER AND THE ENTIRE SOUTHERN KENAI PENINSULA. IT HAS VERY BROAD SUPPORT WHICH INCLUDES THE KENAI PENINSULA BOROUGH, THE KENAI PENINSULA BOROUGH SCHOOL DISTRICT, THE KENAI PENINSULA ECONOMIC DEVELOPMENT DISTRICT, THE CITY OF HOMER, AND KACHEMAK CITY, TO NAME JUST A FEW. THIS PROJECT WILL STIMULATE ECONOMIC DEVELOPMENT IN THE AREA AND WILL RESULT IN A LOWER COST OF LIVING AND LOWER COST OF DOING BUSINESS.

HOMER IS WITHIN THE ENSTAR NATURAL GAS SERVICE AREA AND HAS BEEN ATTEMPTING TO OBTAIN GAS SERVICE FOR THIRTY YEARS. THIS PROJECT WILL CONNECT HOMER TO THE REST OF THE SOUTHCENTRAL NATUAL GAS DISTRIBUTION SYSTEM. THE STATE OF ALASKA HAS A LONG HISTORY OF FUNDING AND PROVIDING SUPPORT FOR BASIC INFRASTRUCTURE AND ENERGY PROJECTS THAT BENEFIT ITS PEOPLE AND THE ECONOMY. WE URGE YOU TO SUPPORT THIS PROJECT AND ADD IT TO THE CAPITAL BUDGET THIS YEAR.

THE GOVERNOR'S BUDGET ALSO CONTAINS AN INADEQUATE AMOUNT OF FUNDING FOR THE HARBOR MATCHING GRANT PROGRAM AND FOR THE DRINKING WATER AND WASTEWATER PROGRAMS. DOCKS, HARBORS, AND WATER AND SEWER INFRASTRUCTURE SUPPORT BASIC PUBLIC SERVICES AND ARE VITAL TO A VIBRANT AND DIVERSE ECONOMY. THE CITY OF HOMER BELIEVES THAT WE SHOULD BE INVESTING MORE IN THIS INFRASTRUCTURE NOT LESS AND WE URGE THE COMMITTEE TO SUPPLEMENT THE AMOUNTS OFFERED BY GOVERNOR PARNELL FOR THESE PROGRAMS.

THANKS AGAIN FOR THE OPPORTUNITY TO COMMENT.

WALT WREDE / CITY MANAGER / HOMER 235.8121 / WWREDE@CI.HOMER.AK.US

Walt Wrede

March 17, 2011

Attn: Senate Finance Committee
State of Alaska

Re: Homer Gas Line Extension

Although I have recently served as a member of the Energy Task Force, as it was formed by the City of Homer, my testimony today is given simply as a concerned resident of Homer and a thirty five year member of the local business community.

For the first time in the history of the Lower Kenai Peninsula there exists the opportunity to bring natural gas to Homer and Kachemak City. It is my understanding that the extension of the current pipeline from Anchor Point to this area would require additional funding of $10.05M. It should be noted that this project would not only be an investment in the infrastructure of these two communities, it would also immediately bring utility savings of literally hundreds of thousands of dollars per year to the Borough, the City of Homer, Kachemak City, the local business community and private homeowners. Additionally it would be a key component in facilitating continued growth in all of these segments of the Lower Kenai Peninsula both now and well into the future.

While I am certain you are faced with a multitude of requests from groups and individuals alike as you work through the State budget for the coming year, I can not believe that many, if any, requests are more reasonable or more pressing than this proposed pipeline extension. I appreciate your continued review of this project and will look forward to your final positive resolution.

Best regards,

Mike Pate

CS FOR SENATE BILL NO. 46(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SPECIAL SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act making and amending appropriations, including capital appropriations, savings deposits in the form of appropriations to the statutory budget reserve fund, and other appropriations; making appropriations to capitalize funds; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

(SECTION 1 OF THIS ACT BEGINS ON PAGE 2)

* **Section 1.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 2 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

	Appropriation	General	Other
Allocations	Items	Funds	Funds
* * * * *	* * * * *		
* * * * * **Department of Administration** * * * * *			
* * * * *	* * * * *		
Atwood Building and Linny Pacillo Parking Garage Improvements (HD 17-32)	2,800,000	2,800,000

Grants to Named Recipients (AS 37.05.316)				

	Allocations	Appropriation Items	General Funds	Other Funds
It is the intent of the legislature that the Department of Commerce, Community and Economic Development eliminate the requirement for narrative and financial quarterly reporting for any grant of $50,000 or less. It is further intended that the department make a single upfront payment for any grant of $50,000 or less, conditioned on the department first receiving a signed certification from the recipient agreeing to use the full grant amount for its intended purpose, to return all unexpended funds to the state for deposit in the general fund upon project completion, and to follow all other terms of the departments grant agreement.

Grants to Unincorporated Communities (AS 37.05.317)				
It is the intent of the legislature that the Department of Commerce, Community and Economic Development eliminate the requirement for narrative and financial quarterly reporting for any grant of $50,000 or less. It is further intended that the department make a single upfront payment for any grant of $50,000 or less, conditioned on the department first receiving a signed certification from the recipient agreeing to use the full grant amount for its intended purpose, to return all unexpended funds to the state for deposit in the general fund upon project completion, and to follow all other terms of the departments grant agreement.				
Dot Lake Village - Equipment Purchase (HD 6)		85,000	85,000

New Weigh Station (HD 7-11)				
Safe Routes to Schools (HD 1-40)	1,000,000			
Seward Highway - Anchorage to Portage Glacier Road ITS Project (HD 17-32)	750,000			
Seward Highway - Dowling to Tudor Reconstruction (HD 17-32)	20,000,000			
Seward Highway - Milepost 104 to 115 Passing Lanes - Indian to Potter (HD 17-32)	15,000,000			
Sitka - Halibut Point Road Resurfacing, Drainage Improvements and Bridge Replacement (HD 2)	4,000,000			
Southeast Region - National Highway System and Non-National Highway System Pavement and Bridge Refurbishment (HD 1-5)	5,000,000			
Statewide - Air Quality Mobile Source Modeling (HD 1-40)	1,200,000			
Statewide - Bicycle/ Pedestrian Facilities Rehabilitation and Improvements (HD 1-40)	500,000			
Statewide - Civil Rights	200,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Program (HD 1-40)				
Statewide - Comprehensive Highway Safety Plan (HD 1-40)	400,000			
Statewide - Highway Data Equipment Acquisition and Installation (HD 1-40)	1,500,000			
Statewide - Highway Fuel Tax Enforcement (HD 1-40)	100,000			
Statewide - National Highway Institute and Transit Institute Training (HD 1-40)	750,000			
Statewide - National Highway System Weight Restriction Remediation (HD 1-40)	10,000,000			
Statewide - Planning Work Program (HD 1-40)	8,000,000			
Statewide - Research Program (HD 1-40)	1,700,000			
Statewide - Scenic Byways Grants (HD 1-40)	750,000			
Statewide - Seismic Retrofit - Bridges (HD 1-40)	2,000,000			
Statewide - Urban Planning Program (HD 12-35)	1,500,000			
Statewide - Weigh-in-Motion Equipment (HD 1-40)	2,000,000			
Surface Transportation	45,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Preconstruction (HD 1-40)				
It is the intent of the legislature that when any named project that either increases vehicular capacity or has a construction cost exceeding $20,000,000 is added to the Statewide Transportation Improvement Plan (STIP), the Department of Transportation and Public Facilities provides written notification to the legislature. The notification should contain a brief project summary to include title, short description of work, geographic location, cost and estimated construction completion date.				
Top of the World Highway - Milepost 0 to 13 - Rehabilitation (HD 6)	12,200,000			
Whittier - Maintenance and Operations (HD 17-32)	2,200,000			
Deferred Maintenance		**28,000,000**	**28,000,000**	
Alaska Marine Highway System Deferred Maintenance (HD 1-40)	3,000,000			
Aviation Deferred Maintenance (HD 1-40)	3,500,000			
Harbors Deferred Maintenance (HD 1-40)	1,500,000			
Highways Deferred Maintenance (HD 1-40)	16,900,000			
Statewide Facilities Deferred Maintenance (HD 1-40)	3,100,000

(SECTION 3 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 3.** The following sets out the statewide funding for the appropriations made in sec. 1 of this Act.

Funding Source		Amount
Unrestricted General Funds		
1003	General Fund Match	84,114,886
1004	Unrestricted General Fund Receipts	695,969,721
1139	Alaska Housing Finance Corporation Dividend	16,300,000
1140	Alaska Industrial Development and Export Authority Dividend	26,000,000
1173	GF Miscellaneous Earnings	205,300
Total Unrestricted General Funds		$822,589,907
Designated General Funds		
1005	General Fund/Program Receipts	3,400,000
1050	Permanent Fund Dividend Fund	266,500
1052	Oil/Hazardous Release Prevention & Response Fund	100,000
1153	State Land Disposal Income Fund	3,700,000
1195	Special Vehicle Registration Receipts	250,000
1202	Anatomical Gift Awareness Fund	55,000
1221	Civil Legal Services Fund	110,000
Total Designated General Funds		$7,881,500
Other Non-Duplicated Funds		
1017	Group Health and Life Benefits Fund	570,800
1024	Fish and Game Fund	750,000
1027	International Airports Revenue Fund	17,236,750
1029	Public Employees Retirement Trust Fund	661,500
1034	Teachers Retirement Trust Fund	272,100
1042	Judicial Retirement System	6,900
1045	National Guard Retirement System	21,900
1105	Permanent Fund Gross Receipts	150,000
1108	Statutory Designated Program Receipts	14,155,000

Total Other Non-Duplicated Funds		$33,824,950
Federal Funds		
1002	Federal Receipts	1,064,381,384
Total Federal Funds		$1,064,381,384
Duplicated Funds		
1026	Highways Equipment Working Capital Fund	18,322,600
1061	Capital Improvement Project Receipts	3,230,000
1075	Alaska Clean Water Fund	1,826,274
1100	Alaska Drinking Water Fund	4,071,900
1112	International Airports Construction Fund	19,212,924
1147	Public Building Fund	3,000,000
1185	Election Fund	100,000
Total Duplicated Funds		$49,763,698

(SECTION 4 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 4.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 5 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

It is the intent of the legislature that the following appropriations and projects are needed to carry out the state's energy policy described in AS 44.99.115. As the energy policy states, the legislature recognizes the immense diversity of the state's geography, cultures, and resource availability and the need to identify and assist with development of the most cost-effective, long-term sources of energy for each community statewide. Therefore, the legislature intends that the package of appropriations and projects listed below are all necessary to achieve a statewide balance in addressing the state's diverse energy needs.

Bulk Fuel Upgrades (HD 1-40)	5,000,000			
Electrical Emergencies Program (HD 1-40)	330,000			
Rural Power System Upgrades (HD 1-40)	10,000,000			
Alaska Energy Authority - Round IV Renewable Energy Project Grants (AS 42.45.045)		**36,620,231**	**36,620,231**	
Inside Passage Electric Cooperative, Inc. - Hoonah Heat Recovery Project (HD 5)	475,000			
University of Alaska Center for Energy and Power - Pilgrim Hot Springs	1,330,467			

	Allocations	Appropriation Items	General Funds	Other Funds
Geothermal Assessment (HD 39)				
Northwest Inupiat Housing Authority - Upper Kobuk River Biomass (HD 40)	250,000			
Southeast Island School District - Thorne Bay School Wood Fired Boiler Project (HD 1)	300,000			
G&K, Inc. - Cold Bay Electric Utility Wind Energy Project (HD 37)	99,075			
Kodiak Electric Association, Inc. - Terror Lake Hydroelectric Project (HD 36)	3,751,840			
Kootznoowoo, Inc. - Thayer Lake Hydroelectric Project (HD 5)	1,060,500			
Alaska Power & Telephone Company - Upper Tanana Biomass CHP Project (HD 6)	380,000			
TDX Power, Inc. - Bethel Renewable Energy Project (HD 38)	213,690			
Chugach Electric Association, Inc. - Battle Creek Diversion Project (HD 33-35)	500,000			
Alaska Village Electric	237,500			

	Allocations	Appropriation Items	General Funds	Other Funds
Cooperative, Inc. - Old Harbor Hydroelectric (HD 36)				
Lake & Peninsula Borough - Port Heiden Wind Turbine Project (HD 37)	250,000			
Golden Valley Electric Association - Eva Creek Wind Turbine Purchase (HD 7-11)	1,463,200			
Alaska Electric Light & Power Company - Snettisham Transmission Line Avalanche Mitigation (HD 3-4)	2,000,000			
Pelican - Hydroelectric Upgrade Project (HD 2)	1,896,836			
Tenakee Springs - Indian River Hydroelectric Project (HD 5)	203,000			
University of Alaska Center for Energy and Power - Organic Rankine Cycle Field Testing (HD 6)	472,787			
Lake & Peninsula Borough - Wood Boilers (HD 36)	369,900			
Chitina Electric, Inc. - Fivemile Creek Hydroelectric Project (HD 6)	277,000			
Ormat Nevada, Inc. - Mount	1,999,972			

	Allocations	Appropriation Items	General Funds	Other Funds
Spurr Geothermal Project (HD 33-35)				
Napaskiak Electric Utility - Wind Power and Heat Recovery (HD 38)	61,225			
Alaska Village Electric Cooperative - St. Marys/ Pitkas Point Wind Construction (HD 39)	275,554			
Louden Tribal Council - Renewable Energy Feasibility Study (HD 6)	100,000			
Chugach Electric Association, Inc. - Transmission to Renewable Energy Resources (HD 33-35)	600,000			
Interior Regional Housing Authority - Wood Heating Feasibility Assessments (HD 6)	154,477			
Lime Village Traditional Council - Photovoltaic System Retrofit (HD 6)	25,000			
Craig - Biomass Fuel Dryer Project (HD 5)	350,000			
Independence Power, LLC - Fourth of July Creek Hydroelectric Project (HD 33-35)	136,500			
Kotzebue - Paper and Wood	85,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Waste to Energy (HD 40)				
Village of Atmautluak - Wind Renewable Energy (HD 38)	100,000			
Alaska Village Electric Cooperative, Inc. - Stebbins Wind Feasibility (HD 39)	137,750			
Elfin Cove - Hydroelectric Project (HD 2)	347,000			
Ketchikan - Whitman Lake Hydroelectric Project (HD 1)	700,000			
Alaska Village Electric Cooperative, Inc. - Eek Wind Feasibility (HD 38)	142,500			
Organized Village of Kwethluk - Wind Feasibility (HD 38)	145,000			
Sitka - Japonski Island Boathouse Heat Pump (HD 2)	125,000			
Alaska Village Electric Cooperative, Inc. - Marshall Wind Feasibility (HD 6)	111,150			
Nelson Lagoon Electrical Cooperative - Wind Energy Project (HD 37)	99,075			
North Slope Borough - Atqasuk Transmission Line	210,000			

	Allocations	Appropriation Items	General Funds	Other Funds
(HD 40)				
Alaska Village Electric Cooperative, Inc. - Kaltag Solar Construction (HD 6)	90,000			
Alaska Village Electric Cooperative, Inc. - Scammon Bay Wind Feasibility (HD 39)	142,500			
Chugach Electric Association, Inc. - Stetson Creek Diversion and Cooper Lake Dam Facilities (HD 33-35)	576,080			
New Koliganek Village Council - Wind and Heat Recovery Feasibility Study (HD 37)	105,050			
North Slope Borough - Wainwright Wind Turbine Design (HD 40)	298,000			
North Slope Borough - Kaktovik Wind Diesel (HD 40)	132,000			
North Slope Borough - Point Hope Wind Turbine Design (HD 40)	298,000			
North Slope Borough - Point Lay Wind Generation Design (HD 40)	298,000			
Kenai Hydro, LLC - Grant Lake Hydroelectric Facility	1,184,000			

	Allocations	Appropriation Items	General Funds	Other Funds
(HD 33-35)				
Alaska Village Electric Cooperative, Inc. - Selawik Hybrid Wind Diesel System Turbine Upgrade (HD 40)	85,000			
Alaska Power Company - Reynolds Creek Hydroelectric Project (HD 5)	2,000,000			
AVTEC - Hydroelectric Training Facility (HD 33-35)	67,500			
Alaska Village Electric Cooperative, Inc. - Koyuk Wind Feasibility (HD 39)	142,500			
Chefornak - Wind Feasibility (HD 38)	136,750			
Alaska Village Electric Cooperative, Inc. - Elim Wind Feasibility (HD 39)	142,500			
Akutan - Geothermal Development Project (HD 37)	2,695,000			
Akiachak Native Community - Wind Feasibility and Conceptual Design (HD 38)	110,000			
ORPC Alaska, LLC - Cook Inlet Tidal Generation Project (HD 33-35)	2,000,000			
Alaska Power Company - Connelly Lake Hydroelectric	468,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Project (HD 5)				
False Pass - Wind Energy Project (HD 37)	69,075			
Native Village of Eyak - Biomass Feasibility Study (HD 5)	75,000			
Eklutna, Inc. - Hunter Creek Hydroelectric Project (HD 13-16)	84,000			
Port Graham Village Council - Biomass Waste Heat Demonstration Project (HD 33-35)	75,000			
Matanuska-Susitna Borough - Susitna Valley High School Wood Heat (HD 13-16)	750,000			
Copper River School District - Kenny Lake School Wood Fired Boiler (HD 6)	565,485			
Alaska Power Company - Schubee Lake Hydroelectric Project (HD 5)	80,000			
Bering Pacific Engineering - Eska Creek Hydroelectric Project (HD 12)	37,000			
Metlakatla Indian Community - Metlakatla-Ketchikan Intertie (HD 1-5)	1,180,000			
Haines - Excursion Inlet	93,593			

	Allocations	Appropriation Items	General Funds	Other Funds
Hydro Project (HD 5)				
Native Village of Cantwell - Jack River Hydro Project (HD 7-11)	30,000			
Wrangell - Electric Vehicle Feasibility Study (HD 2)	25,000			
Sitka - Centennial Hall and Library Renewable Energy Feasibility Study (HD 2)	30,000			
Sitka - Wastewater Treatment Plant Renewable Energy Feasibility Study (HD 2)	20,000			
Inside Passage Electric Cooperative - Tenakee Inlet Geothermal Resource Study (HD 5)	599,200			
Metlakatla Indian Community - Triangle Lake Hydroelectric Project (HD 5)	500,000			
Alaska Energy Authority - ARCTEC Energy Projects		**96,500,000**	**96,500,000**	
AEA - Anchorage to Quartz Creek Transmission Line Maintenance and Repair (HD 17-32)	25,000,000			
AEA - Battle Creek Diversion (HD 33-35)	15,000,000			
AEA - Cook Inlet Gas Gathering System Remodel	2,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
(HD 12-35)				
AEA - Daves Creek to Seward Transmission Line Completion (HD 33-35)	1,500,000			
AEA - Girdwood and Substation Improvements (HD 17-32)	4,000,000			
AEA - Homer Electric Association Soldotna to Nikiski Transmission Upgrade (HD 33-35)	25,000,000			
AEA - Quartz Creek to Soldotna Transmission Maintenance and Repair (HD 33-35)	10,000,000			
AEA - Seward Power Plant Integration (HD 33-35)	4,000,000			
AEA - Soldotna to Quartz Creek Transmission Study, Design and Permitting (HD 33-35)	5,000,000			
AEA - Teeland to Healy Substation Improvements and Repair (HD 7-11)	5,000,000			
Alaska Energy Authority - Energy Generation Projects				
It is the intent of the legislature that the state's capital investment into energy generation projects not exceed 50% of the total investment required to fully complete those projects.				
AEA - Akiak Community Electrical Generation System Upgrade (HD 38)		4,000,000	4,000,000	

	Allocations	Appropriation Items	General Funds	Other Funds
AEA - Copper Valley Electric Association Allison Creek Hydroelectric Project (HD 12-35)		10,000,000	10,000,000	
AEA - Golden Valley Electric Association Eva Creek Wind Farm (HD 7-11)		10,000,000	10,000,000	
AEA - Gustavus Electric Company Falls Creek Hydroelectric Debt Reimbursement (HD 5)		1,300,000	1,300,000	
AEA - Ketchikan Whitman Lake Hydroelectric Project (HD 1)		8,025,000	8,025,000

(SECTION 16 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 16.** BOND DEFEASANCE. (a) The amount necessary for the defeasance of Municipality of Anchorage Lease Revenue Refunding Bonds, Correctional Facility, Series 2005, not to exceed $25,000,000, is appropriated from the general fund to the Department of Administration for the payment of future obligations and fees for the Municipality of Anchorage Lease Revenue Refunding Bonds, Correctional Facility, Series 2005 (Anchorage Jail).

(b) The amount necessary for the defeasance of State of Alaska Certificates of Participation Alaska Psychiatric Institute, Series 2002, the Seafood and Food Safety Laboratory Facility, Series 2003A, and the State Virology Laboratory Facility, Series 2005B, not to exceed $24,000,000, is appropriated from the general fund to the state bond committee for the defeasance of future obligations and fees for the State of Alaska Certificates of Participation Alaska Psychiatric Institute, Series 2002, the Seafood and Food Safety Laboratory Facility, Series 2003A, and the State Virology Laboratory Facility, Series 2005B.

* **Sec. 17.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

* **Sec. 18.** FUND CAPITALIZATION. (a) The sum of $60,000,000 is appropriated from the general fund to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a))

for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

(b) The sum of $2,400,000 is appropriated from the general fund to the emerging energy technology fund (AS 42.45.375).

(c) The amount of federal receipts from the financial assistance award for emerging energy technology by the Denali Commission established under P.L. 105-277, estimated to be $2,400,000, is appropriated to the emerging energy technology fund (AS 42.45.375) for capital projects.

* **Sec. 19.** FUND TRANSFERS. (a) The sum of $2,500,000 is appropriated from the general fund to the alternative energy conservation revolving loan fund (AS 45.88.010).

(b) The sum of $30,620,231 is appropriated from the general fund to the renewable energy grant fund (AS 42.45.045(a)).

(c) The sum of $30,000,000 is appropriated from the general fund to the Alaska Housing Capital Corporation account.

(d) It is the intent of the legislature that the appropriation made in (c) of this section bring the total balance of the Alaska Housing Capital Corporation account to $400,000,000 and that the $400,000,000 in the account be used to fund postsecondary scholarship programs at a later date.

* **Sec. 20.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

* **Sec. 21.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. (a) The amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530(a)) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2011, estimated to be $5,399,679, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program to the following municipalities in the amounts stated:

MUNICIPALITY	PROJECT	ALLOCATION
(1) North Slope Borough	Permit tracking system	$ 242,000

(2) North Slope Borough	Lagoon and Kuk Inlet	109,000
(3) City of Barrow	Local government operations and maintenance	1,600,000
(4) North Slope Borough	Meade River school counselor	270,177
(5) North Slope Borough	Land management and enforcement continuation	750,000
(6) North Slope Borough	School counselor program	282,502
(7) North Slope Borough	Mayor's job program	300,000
(8) City of Nuiqsut	Youth center operations and maintenance	194,000
(9) City of Nuiqsut	Local government operations and maintenance	595,000
(10) City of Atqasuk	Local government operations and youth program	300,000
(11) City of Barrow	City archival project	60,000
(12) North Slope Borough	Workforce development for essential services	452,000
(13) City of Wainwright	Wainwright local government operations	245,000

(b) If the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530(a)) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2011, is less than the sum of the allocations made in (a) of this section, the Department of Commerce, Community, and Economic Development shall work with the municipalities listed in (a) of this section to reduce the sum of the allocations made in (a) of this section to equal the amount received.

* **Sec. 22.** DEPARTMENT OF HEALTH AND SOCIAL SERVICES. (a) An amount equal to federal receipts received directly by tribes for the Low Income Home Energy Assistance Program during the fiscal year ending June 30, 2011, less federal receipts received directly by tribes for the Low Income Home Energy Assistance Program during the fiscal year ending June 30, 2012, not to exceed $3,373,000, is appropriated from the general fund to the

Department of Health and Social Services, public assistance, energy assistance program, for grants to tribes for energy assistance under AS 47.25.626 for the fiscal year ending June 30, 2012.

(b) If federal receipts appropriated in sec. 1 of this Act to the Department of Health and Social Services, public assistance, energy assistance program, for the fiscal year ending June 30, 2012, are not available to the state in the amount appropriated, the appropriation of federal receipts is reduced by the unavailable amount, and the difference between the amount of federal receipts appropriated in sec. 1 of this Act and the amount received, not to exceed $4,627,000, is appropriated from the general fund to the Department of Health and Social Services, public assistance, for the energy assistance program for the fiscal year ending June 30, 2012.

* **Sec. 23.** DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT. The sum of $486,000 is appropriated from the general fund to the Department of Labor and Workforce Development, Alaska Workforce Investment Board, to offer, in cooperation with the Department of Commerce, Community, and Economic Development, grants as authorized by AS 23.15.820(b) for training Alaskans in the film and television industry.

* **Sec. 24.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) The unexpended and unobligated balance, estimated to be $2,000,000, of the appropriation made in sec. 1, ch. 82, SLA 2006, page 86, line 32, through page 87, line 3 (Department of Transportation and Public Facilities, Parks Highway Frontage Road realignment at Seward meridian - $2,000,000) is reappropriated to the Department of Transportation and Public Facilities for Parks Highway Frontage Road and intersection improvements at Trunk Road.

(b) Section 14(*l*), ch. 14, SLA 2009, is amended to read:

(*l*) The sum of $4,250,000 is appropriated from the Alaska capital income fund (AS 37.05.565) to the Department of Transportation and Public Facilities for construction of a new Ketchikan airport ferry to replace the M/V Bob Ellis**, mooring and transfer facility repairs, and M/V Oral Freeman construction costs incurred before January 1, 2002**.

(c) Section 19, ch. 29, SLA 2008, page 186, line 8, is amended to read:

	APPROPRIATION ITEMS	GENERAL FUND	OTHER FUNDS

Transportation Projects	**271,700,000**	**150,050,000**	**121,650,000**
[GENERAL OBLIGATION BONDS]			**[271,700,000]**

(d) Section 20, ch. 29, SLA 2008, page 189, line 8, is amended to read:

1004	**Unrestricted General Fund Receipts**	**150,050,000**
1008	General Obligation Bonds	**121,650,000**
		[271,700,000]

*** Sec. 44.** DEPARTMENT OF PUBLIC SAFETY. The sum of $1,356,550 is appropriated from the general fund to the Department of Public Safety for Alaska Public Safety

information network migration.

* **Sec. 45.** DEPARTMENT OF REVENUE. The unexpended and unobligated balance, not to exceed $1,238,900, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 39, line 27, and allocated on lines 31 - 32 (Department of Natural Resources, natural gas commercialization - $1,550,000) is reappropriated to the Department of Revenue, natural gas commercialization, for the fiscal year ending June 30, 2012.

* **Sec. 46.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. Section 7, ch. 43, SLA 2010, page 47, lines 8 - 10, is amended to read:

	ALLOCATIONS
Fairbanks - South Cushman - Mitchell Expressway to **Sanduri Street** [VAN HORN] (HD 7-11)	1,710,000

* **Sec. 47.** STATUTORY BUDGET RESERVE FUND. (a) The sum of $500,000,000 is appropriated from the general fund to the statutory budget reserve fund (AS 37.05.540).

(b) The sum of $500,000,000 is appropriated from the general fund to the statutory budget reserve fund (AS 37.05.540).

* **Sec. 48.** CONTINGENCIES. (a) Each of the appropriations made in sec. 4 of this Act is contingent on passage by the Twenty-Seventh Alaska State Legislature and enactment into law of every appropriation, without reduction of any appropriation, made in sec. 4 of this Act.

(b) The appropriation made in sec. 16(a) of this Act is contingent on the state bond committee's certifying the amount required for the defeasance of the callable bonds.

(c) The appropriations made in sec. 24(c) - (f) of this Act are contingent on the state bond committee's certifying to the office of management and budget that the entire $121,650,000 of State of Alaska Series 2009A general obligation bond proceeds to the Department of Transportation and Public Facilities have been expended.

* **Sec. 49.** NONSEVERABILITY. Notwithstanding AS 01.10.030, in the event that a court of competent jurisdiction finds the contingency in sec. 48(a) of this Act is invalid, then the contingency in sec. 48(a) of this Act is not severable from the appropriations made in sec. 4 of

this Act if

(1) the governor has vetoed, whether by striking or reducing, any appropriation in sec. 4 of this Act; and

(2) the legislature, by action or inaction, has failed to override all vetoes of, including reductions to, appropriations made in sec. 4 of this Act in the time and manner allowed under art. II, sec. 16, Constitution of the State of Alaska.

*** Sec. 50.** LAPSE. (a) The appropriations made in secs. 18, 19(a), 19(b), 19(c), 20(1), and 47 of this Act are for the capitalization of funds and do not lapse.

(b) The appropriations made in secs. 21, 24, 27(a), 28(c), 28(e), 28(g), 29, 31, 32(c), 33(b), 33(c), 34(c), 34(d), 39(c), 39(d), 43, and 44 of this Act are for capital projects and lapse under AS 37.25.020.

(c) The appropriations made in sec. 16 of this Act lapse June 30, 2020.

(d) A grant awarded in this Act to a named recipient under AS 37.05.316 is for a capital project, unless specifically identified in this Act as an operating grant, and lapses under AS 37.25.020 unless otherwise stated or designated for a fiscal year.

(e) The appropriation made in sec. 23 of this Act lapses June 30, 2015.

*** Sec. 51.** RETROACTIVITY. Section 44 of this Act is retroactive to January 1, 2011.

*** Sec. 52.** Sections 13, 25, 26(b), 28(a), 32(a), 32(b), 32(g), 35, 36(b), 37, 39(a), 40 - 46, and 51 of this Act take effect May 17, 2011.

*** Sec. 53.** Sections 16, 24, 26(a), 27, 28(b) - (g), 29 - 31, 32(c) - (f), 33, 34, 36(a), 38, 39(b) - (d), 47(a), 48(b), and 48(c) of this Act take effect June 30, 2011.

*** Sec. 54.** Except as provided in secs. 52 and 53 of this Act, this Act takes effect July 1, 2011.

CS FOR SENATE BILL NO. 46(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SPECIAL SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act making and amending appropriations, including capital appropriations, savings deposits in the form of appropriations to the statutory budget reserve fund, and other appropriations; making appropriations to capitalize funds; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

(SECTION 1 OF THIS ACT BEGINS ON PAGE 2)

* **Section 1.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 2 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

	Appropriation	General	Other

Soldotna - Joyce K. Carver Library Expansion (HD 33-35)		3,400,000	3,400,000	
Grants to Named Recipients (AS 37.05.316)				

	Allocations	Appropriation Items	General Funds	Other Funds
It is the intent of the legislature that the Department of Commerce, Community and Economic Development eliminate the requirement for narrative and financial quarterly reporting for any grant of $50,000 or less. It is further intended that the department make a single upfront payment for any grant of $50,000 or less, conditioned on the department first receiving a signed certification from the recipient agreeing to use the full grant amount for its intended purpose, to return all unexpended funds to the state for deposit in the general fund upon project completion, and to follow all other terms of the departments grant agreement.				
Abused Women's Aid In Crisis, Inc. (AWAIC) - Equipment Repair and Replacement (HD 17-32)		229,700	229,700

Grants to Unincorporated Communities (AS 37.05.317)				

It is the intent of the legislature that the Department of Commerce, Community and Economic Development eliminate the requirement for narrative and financial quarterly reporting for any grant of $50,000 or less. It is further intended that the department make a single upfront payment for any grant of $50,000 or less, conditioned on the department first receiving a signed certification from the recipient agreeing to use the full grant amount for its intended purpose, to return all unexpended funds to the state for deposit in the general fund upon project completion, and to follow all other terms of the departments grant agreement.

Dot Lake Village - Equipment Purchase (HD 6)	85,000	85,000

1185	Election Fund	100,000
Total Duplicated Funds		$49,763,698

(SECTION 4 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 4.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 5 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

It is the intent of the legislature that the following appropriations and projects are needed to carry out the state's energy policy described in AS 44.99.115. As the energy policy states, the legislature recognizes the immense diversity of the state's geography, cultures, and resource availability and the need to identify and assist with development of the most cost-effective, long-term sources of energy for each community statewide. Therefore, the legislature intends that the package of appropriations and projects listed below are all necessary to achieve a statewide balance in addressing the state's diverse energy needs.

	Allocations	Appropriation Items	General Funds	Other Funds
* * * * *			* * * * *	
* * * * * **Department of Commerce, Community and Economic Development** * * * * *				
* * * * *			* * * * *	
Alaska Industrial Development & Export Authority - Coal to Liquids Certification Project (HD 1-40)		500,000	500,000	
Alaska Energy Authority - Nuvista Light & Power Chikuminuk Hydroelectric and Alternative Energy Project (HD 36-38)		17,630,000	17,630,000	
Alaska Energy Authority - Southeast Energy Fund (HD 1-5)		10,000,000	10,000,000	
Alaska Energy Authority -		65,700,000	65,700,000	

	Allocations	Appropriation Items	General Funds	Other Funds
Susitna Hydroelectric Energy Plan (HD 12-35)				
Alaska Energy Authority - Energy Programs		**16,330,000**	**10,330,000**	**6,000,000**
Alaska Energy Plan Implementation (HD 1-40)	1,000,000			
Bulk Fuel Upgrades (HD 1-40)	5,000,000			
Electrical Emergencies Program (HD 1-40)	330,000			
Rural Power System Upgrades (HD 1-40)	10,000,000			
Alaska Energy Authority - Energy Projects				

It is the intent of the Legislature that the state's capital investment into any of these energy projects not exceed 50% of the total investment required to fully complete each project. The Alaska Energy Authority (AEA) should evaluate each of the energy projects in this section using criteria similar to that established for the renewable energy grant fund (AS 42.45.045) by the Renewable Energy Fund Advisory committee. If during their evaluation, AEA determines that an appropriation below exceeds the 50% state funding threshold, the authority shall submit to the legislature recommendations for reductions or reappropriation by February 1, 2012.

AEA - Akiak Community Electrical Generation System Upgrade (HD 38)	4,000,000	4,000,000	
AEA - Anchorage to Quartz Creek Transmission Line Maintenance and Repair (HD 17-32)	25,000,000	25,000,000	
AEA - Battle Creek Diversion (HD 33-35)	15,000,000	15,000,000	

	Allocations	Appropriation Items	General Funds	Other Funds
AEA - Cook Inlet Gas Gathering System Remodel (HD 12-35)		2,000,000	2,000,000	
AEA - Copper Valley Electric Association Allison Creek Hydroelectric Project (HD 12-35)		10,000,000	10,000,000	
AEA - Daves Creek to Seward Transmission Line Completion (HD 33-35)		1,500,000	1,500,000	
AEA - Girdwood and Substation Improvements (HD 17-32)		4,000,000	4,000,000	
AEA - Golden Valley Electric Association Eva Creek Wind Farm (HD 7-11)		10,000,000	10,000,000	
AEA - Gustavus Electric Company Falls Creek Hydroelectric Debt Reimbursement (HD 5)		1,300,000	1,300,000	
AEA - Homer Area Natural Gas Pipeline (HD 33-35)		10,053,000	10,053,000	
AEA - Homer Electric Association Soldotna to Nikiski Transmission Upgrade (HD 33-35)		25,000,000	25,000,000	
AEA - Ketchikan Whitman Lake Hydroelectric Project (HD 1)		8,025,000	8,025,000	
AEA - Kodiak Electric Association Terror Lake		3,750,000	3,750,000	

	Allocations	Appropriation Items	General Funds	Other Funds
Hydroelectric Facility Expansion (HD 36)				
AEA - Metlakatla Indian Community Metlakatla-Ketchikan Intertie (HD 1-5)		10,500,000	10,500,000	
AEA - Mount Spurr Geothermal Project Development (HD 12-35)		18,000,000	18,000,000	
AEA - Quartz Creek to Soldotna Transmission Maintenance and Repair (HD 33-35)		10,000,000	10,000,000	
AEA - Seward Power Plant Integration (HD 33-35)		4,000,000	4,000,000	
AEA - Sitka Blue Lake Hydroelectric Project Expansion (HD 2)		28,500,000	28,500,000	
AEA - Soldotna to Quartz Creek Transmission Study, Design and Permitting (HD 33-35)		5,000,000	5,000,000	
AEA - Teeland to Healy Substation Improvements and Repair (HD 7-11)		5,000,000	5,000,000	
Alaska Energy Authority - Round IV Renewable Energy Project Grants (AS 42.45.045)		**36,620,231**	**36,620,231**	
Inside Passage Electric Cooperative, Inc. - Hoonah	475,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Heat Recovery Project (HD 5)				
University of Alaska Center for Energy and Power - Pilgrim Hot Springs Geothermal Assessment (HD 39)	1,330,467			
Northwest Inupiat Housing Authority - Upper Kobuk River Biomass (HD 40)	250,000			
Southeast Island School District - Thorne Bay School Wood Fired Boiler Project (HD 1)	300,000			
G&K, Inc. - Cold Bay Electric Utility Wind Energy Project (HD 37)	99,075			
Kodiak Electric Association, Inc. - Terror Lake Hydroelectric Project (HD 36)	3,751,840			
Kootznoowoo, Inc. - Thayer Lake Hydroelectric Project (HD 5)	1,060,500			
Alaska Power & Telephone Company - Upper Tanana Biomass CHP Project (HD 6)	380,000			
TDX Power, Inc. - Bethel Renewable Energy Project (HD 38)	213,690			

	Allocations	Appropriation Items	General Funds	Other Funds
Chugach Electric Association, Inc. - Battle Creek Diversion Project (HD 33-35)	500,000			
Alaska Village Electric Cooperative, Inc. - Old Harbor Hydroelectric (HD 36)	237,500			
Lake & Peninsula Borough - Port Heiden Wind Turbine Project (HD 37)	250,000			
Golden Valley Electric Association - Eva Creek Wind Turbine Purchase (HD 7-11)	1,463,200			
Alaska Electric Light & Power Company - Snettisham Transmission Line Avalanche Mitigation (HD 3-4)	2,000,000			
Pelican - Hydroelectric Upgrade Project (HD 2)	1,896,836			
Tenakee Springs - Indian River Hydroelectric Project (HD 5)	203,000			
University of Alaska Center for Energy and Power - Organic Rankine Cycle Field Testing (HD 6)	472,787			
Lake & Peninsula Borough - Wood Boilers (HD 36)	369,900			

	Allocations	Appropriation Items	General Funds	Other Funds
Chitina Electric, Inc. - Fivemile Creek Hydroelectric Project (HD 6)	277,000			
Ormat Nevada, Inc. - Mount Spurr Geothermal Project (HD 33-35)	1,999,972			
Napaskiak Electric Utility - Wind Power and Heat Recovery (HD 38)	61,225			
Alaska Village Electric Cooperative - St. Marys/ Pitkas Point Wind Construction (HD 39)	275,554			
Louden Tribal Council - Renewable Energy Feasibility Study (HD 6)	100,000			
Chugach Electric Association, Inc. - Transmission to Renewable Energy Resources (HD 33-35)	600,000			
Interior Regional Housing Authority - Wood Heating Feasibility Assessments (HD 6)	154,477			
Lime Village Traditional Council - Photovoltaic System Retrofit (HD 6)	25,000			
Craig - Biomass Fuel Dryer Project (HD 5)	350,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Independence Power, LLC - Fourth of July Creek Hydroelectric Project (HD 33-35)	136,500			
Kotzebue - Paper and Wood Waste to Energy (HD 40)	85,000			
Village of Atmautluak - Wind Renewable Energy (HD 38)	100,000			
Alaska Village Electric Cooperative, Inc. - Stebbins Wind Feasibility (HD 39)	137,750			
Elfin Cove - Hydroelectric Project (HD 2)	347,000			
Ketchikan - Whitman Lake Hydroelectric Project (HD 1)	700,000			
Alaska Village Electric Cooperative, Inc. - Eek Wind Feasibility (HD 38)	142,500			
Organized Village of Kwethluk - Wind Feasibility (HD 38)	145,000			
Sitka - Japonski Island Boathouse Heat Pump (HD 2)	125,000			
Alaska Village Electric Cooperative, Inc. - Marshall Wind Feasibility (HD 6)	111,150			

	Allocations	Appropriation Items	General Funds	Other Funds
Nelson Lagoon Electrical Cooperative - Wind Energy Project (HD 37)	99,075			
North Slope Borough - Atqasuk Transmission Line (HD 40)	210,000			
Alaska Village Electric Cooperative, Inc. - Kaltag Solar Construction (HD 6)	90,000			
Alaska Village Electric Cooperative, Inc. - Scammon Bay Wind Feasibility (HD 39)	142,500			
Chugach Electric Association, Inc. - Stetson Creek Diversion and Cooper Lake Dam Facilities (HD 33-35)	576,080			
New Koliganek Village Council - Wind and Heat Recovery Feasibility Study (HD 37)	105,050			
North Slope Borough - Wainwright Wind Turbine Design (HD 40)	298,000			
North Slope Borough - Kaktovik Wind Diesel (HD 40)	132,000			
North Slope Borough - Point Hope Wind Turbine Design (HD 40)	298,000			

	Allocations	Appropriation Items	General Funds	Other Funds
North Slope Borough - Point Lay Wind Generation Design (HD 40)	298,000			
Kenai Hydro, LLC - Grant Lake Hydroelectric Facility (HD 33-35)	1,184,000			
Alaska Village Electric Cooperative, Inc. - Selawik Hybrid Wind Diesel System Turbine Upgrade (HD 40)	85,000			
Alaska Power Company - Reynolds Creek Hydroelectric Project (HD 5)	2,000,000			
AVTEC - Hydroelectric Training Facility (HD 33-35)	67,500			
Alaska Village Electric Cooperative, Inc. - Koyuk Wind Feasibility (HD 39)	142,500			
Chefornak - Wind Feasibility (HD 38)	136,750			
Alaska Village Electric Cooperative, Inc. - Elim Wind Feasibility (HD 39)	142,500			
Akutan - Geothermal Development Project (HD 37)	2,695,000			
Akiachak Native Community - Wind Feasibility and Conceptual Design (HD 38)	110,000			

	Allocations	Appropriation Items	General Funds	Other Funds
ORPC Alaska, LLC - Cook Inlet Tidal Generation Project (HD 33-35)	2,000,000			
Alaska Power Company - Connelly Lake Hydroelectric Project (HD 5)	468,000			
False Pass - Wind Energy Project (HD 37)	69,075			
Native Village of Eyak - Biomass Feasibility Study (HD 5)	75,000			
Eklutna, Inc. - Hunter Creek Hydroelectric Project (HD 13-16)	84,000			
Port Graham Village Council - Biomass Waste Heat Demonstration Project (HD 33-35)	75,000			
Matanuska-Susitna Borough - Susitna Valley High School Wood Heat (HD 13-16)	750,000			
Copper River School District - Kenny Lake School Wood Fired Boiler (HD 6)	565,485			
Alaska Power Company - Schubee Lake Hydroelectric Project (HD 5)	80,000			
Bering Pacific Engineering - Eska Creek Hydroelectric Project (HD 12)	37,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Metlakatla Indian Community - Metlakatla-Ketchikan Intertie (HD 1-5)	1,180,000			
Haines - Excursion Inlet Hydro Project (HD 5)	93,593			
Native Village of Cantwell - Jack River Hydro Project (HD 7-11)	30,000			
Wrangell - Electric Vehicle Feasibility Study (HD 2)	25,000			
Sitka - Centennial Hall and Library Renewable Energy Feasibility Study (HD 2)	30,000			
Sitka - Wastewater Treatment Plant Renewable Energy Feasibility Study (HD 2)	20,000			
Inside Passage Electric Cooperative - Tenakee Inlet Geothermal Resource Study (HD 5)	599,200			
Metlakatla Indian Community - Triangle Lake Hydroelectric Project (HD 5)	500,000

Major Maintenance Grant Fund (AS 14.11.007)		**73,240,050**	**73,240,050**	
St. Mary's Complex Renovation Completion (HD 39)	105,954			
Valley Park Elementary School Roof Replacement	1,211,170			

	Allocations	Appropriation Items	General Funds	Other Funds
(HD 1)				
Nome Elementary Boiler Replacement (HD 39)	545,838			
Alakanuk Emergency Electrical Service Repairs (HD 39)	89,621			
Pelican High School Mechanical Upgrades (HD 2)	150,628			
Annette Island School District Phone System Replacement (HD 5)	95,422			
Arctic Village K-12 School Soil Remediation (HD 6)	5,517,065			
Kake District-wide Lighting Upgrades (HD 5)	59,215			
Tri-Valley K-12 School Gymnasium and Locker Room Roof Replacement (HD 7-11)	691,312			
St. Mary's Backup Generators Replacement (HD 39)	1,133,912			
Scammon Bay K-12 School Generator and Fuel Tank Relocation (HD 39)	1,696,152			
Sand Point K-12 School Gym Floor and Bleacher Replacement (HD 37)	151,540			
Pitka's Point K-8 School Renovation (HD 39)	8,360,235			
Yakutat Elementary Kitchen Renovation Completion (HD	52,172			

	Allocations	Appropriation Items	General Funds	Other Funds
5)				
Kaltag K-12 School Mechanical And Electrical Upgrades (HD 6)	2,365,365			
Jack Egnaty Sr. K-12 School Roof Replacement, Sleetmute (HD 6)	1,142,184			
Tununak K-12 School Major Maintenance (HD 38)	19,166,462			
Andrew K. Demoski K-12 School Renovation, Nulato (HD 6)	11,819,009			
Anchorage District-wide Roof Replacements and Structural Upgrades (HD 17-32)	6,492,500			
Buckland K-12 School Heating System Improvements (HD 40)	292,408			
Tenakee K-12 School Roof Replacement (HD 5)	520,001			
Nunapitchuk Wastewater Upgrades (HD 38)	1,045,500			
Bethel Campus Water Sewer Line and Utilidor Repairs (HD 38)	2,499,850			
Metlakatla Elementary School Underground Fuel Tank Replacement (HD 5)	360,285			
Valdez High School Fire Alarm and Sprinkler	694,943			

	Allocations	Appropriation Items	General Funds	Other Funds
Replacement (HD 12)				
Nenana K-12 School Major Maintenance (HD 6)	1,354,111			
Akutan K-12 School Siding Replacement (HD 37)	63,822			
Nenana K-12 School ADA Upgrades and Erosion Control (HD 6)	713,158			
Ketchikan District-wide Electric Boiler Installation (HD 1)	3,432,996			
Craig Alternative Wood Heat Project (HD 5)	161,172			
Sand Point K-12 School Pool Maintenance (HD 37)	73,895			
Mekoryuk Wastewater Upgrades (HD 38)	858,707			
Hermon Hutchens Elementary Fire Alarm, Clock, and Intercom Replacement (HD 12)	323,446			
School Construction Grant Fund (AS 14.11.005)		**76,635,615**	**76,635,615**	

The legislature intends that the following three appropriations to Kuinerrarmiut Elitnaurviat K-12 School, Napaskiak K-12 School, and Kivalina K-12 School address the recommendations made by the court in Kasayulie v. State, 3AN-97-3782 CIV (Sept. 1, 1999).

Kuinerrarmiut Elitnaurviat K-12 School Renovation/ Addition, Quinhagak (HD 38)	28,489,312			
Napaskiak K-12 School	33,421,589			

	Allocations	Appropriation Items	General Funds	Other Funds
Replacement (HD 38)				
Kivalina K-12 School Renovation/ Addition (HD 40)	14,724,714			

This allocation is contingent upon the community of Kivalina moving to a permanent new location where the new school can safely be constructed.

Deferred Maintenance			
Mt. Edgecumbe High School Deferred Maintenance (HD 1-40)	2,800,000	2,800,000	

(SECTION 11 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 11.** The following sets out the funding by agency for the appropriations made in sec. 10 of this Act.

Funding Source	Amount
Department of Commerce, Community and Economic Development	
1004 Unrestricted General Fund Receipts	29,671,100
*** Total Agency Funding ***	$29,671,100

Total Duplicated Funds	$0

(SECTION 13 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 13.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

* **Sec. 14.** FUND CAPITALIZATION. (a) The sum of $60,000,000 is appropriated from the general fund to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a)) for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

(b) The sum of $2,400,000 is appropriated from the general fund to the emerging energy technology fund (AS 42.45.375).

(c) The amount of federal receipts from the financial assistance award for emerging energy technology by the Denali Commission established under P.L. 105-277, estimated to be $2,400,000, is appropriated to the emerging energy technology fund (AS 42.45.375) for capital projects.

* **Sec. 15.** FUND TRANSFERS. (a) The sum of $2,500,000 is appropriated from the general fund to the alternative energy conservation revolving loan fund (AS 45.88.010).

(b) The sum of $30,620,231 is appropriated from the general fund to the renewable energy grant fund (AS 42.45.045(a)).

* **Sec. 16.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from

the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

* **Sec. 17.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. (a) The amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530(a)) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2011, estimated to be $5,399,679, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program to the following municipalities in the amounts stated:

MUNICIPALITY	PROJECT	ALLOCATION
(1) North Slope Borough	Permit tracking system	$ 242,000
(2) North Slope Borough	Lagoon and Kuk Inlet	109,000
(3) City of Barrow	Local government operations and maintenance	1,600,000
(4) North Slope Borough	Meade River school counselor	270,177
(5) North Slope Borough	Land management and enforcement continuation	750,000
(6) North Slope Borough	School counselor program	282,502
(7) North Slope Borough	Mayor's job program	300,000
(8) City of Nuiqsut	Youth center operations and maintenance	194,000
(9) City of Nuiqsut	Local government operations and maintenance	595,000
(10) City of Atqasuk	Local government operations and youth program	300,000
(11) City of Barrow	City archival project	60,000
(12) North Slope Borough	Workforce development for essential services	452,000
(13) City of Wainwright	Wainwright local government	245,000

operations

(b) If the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530(a)) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2011, is less than the sum of the allocations made in (a) of this section, the Department of Commerce, Community, and Economic Development shall work with the municipalities listed in (a) of this section to reduce the sum of the allocations made in (a) of this section to equal the amount received.

* **Sec. 18.** DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT. The sum of $486,000 is appropriated from the general fund to the Department of Labor and Workforce Development, Alaska Workforce Investment Board, to offer, in cooperation with the Department of Commerce, Community, and Economic Development, grants as authorized by AS 23.15.820(b) for training Alaskans in the film and television industry.

* **Sec. 19.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) The unexpended and unobligated balance, estimated to be $2,000,000, of the appropriation made in sec. 1, ch. 82, SLA 2006, page 86, line 32, through page 87, line 3 (Department of Transportation and Public Facilities, Parks Highway Frontage Road realignment at Seward meridian - $2,000,000) is reappropriated to the Department of Transportation and Public Facilities for Parks Highway Frontage Road and intersection improvements at Trunk Road.

(b) Section 14(*l*), ch. 14, SLA 2009, is amended to read:

(*l*) The sum of $4,250,000 is appropriated from the Alaska capital income fund (AS 37.05.565) to the Department of Transportation and Public Facilities for construction of a new Ketchikan airport ferry to replace the M/V Bob Ellis**, mooring and transfer facility repairs, and M/V Oral Freeman construction costs incurred before January 1, 2002**.

* **Sec. 20.** HOUSE DISTRICT 2. (a) Section 1, ch. 3, FSSLA 2005, page 66, lines 23 - 28, is amended to read:

	APPROPRIATION ITEMS	GENERAL FUND
Petersburg: North Harbor Deferred Maintenance**, Replacement,** and Transfer (HD 2)	2,500,000	2,500,000

In order to expend this appropriation, the City of Petersburg must enter into an agreement with the Department of Transportation and Public Facilities and accept full responsibility for ownership and maintenance of the North Harbor by January 1, 2006.

(b) Section 4, ch. 15, SLA 2009, page 46, lines 24 - 25, is amended to read:

	APPROPRIATION ITEMS	OTHER FUNDS
Wrangell - **Street,** [STIKINE AVENUE] Sidewalk**, and Infrastructure Improvements** [EXTENSION] (HD 2)	390,000	390,000

*** Sec. 21.** HOUSE DISTRICT 5. * **Sec. 33.** HOUSE DISTRICT 39. The unexpended and unobligated balance, estimated to be $100,000, of the appropriation made in sec. 1, ch. 30, SLA 2007, page 54, lines 11 - 12 (Emmonak, city street lighting - $100,000) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Emmonak for the purchase of heavy equipment.

* **Sec. 34.** REAPPROPRIATION OF LEGISLATIVE APPROPRIATIONS. (a) Section 56(b), ch. 43, SLA 2010, is amended to read:

(b) The unexpended and unobligated balance, not to exceed $750,000, of the appropriation made in sec. 1, ch. 12, SLA 2009, page 44, line 29 (Budget and Audit Committee - $19,501,800) is reappropriated to the Legislative Council to conduct for the legislature an independent third-party scientific and multidisciplinary study of **statutory and permitting requirements and processes related to** [THE POTENTIAL] large mine development in **the state** [THE BRISTOL BAY DRAINAGE] for the fiscal **years** [YEAR] ending June 30, 2011**, June 30, 2012, June 30, 2013, and June 30, 2014**.

(b) The unexpended and unobligated balance, estimated to be $900,000, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 47, line 11 (legislative operating budget - $11,800,100) is reappropriated to the Legislative Budget and Audit Committee for operating

expenses for the fiscal year ending June 30, 2012.

(c) The unexpended and unobligated balance, not to exceed $450,000, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 46, line 33 (Legislative Council - $36,425,700) is reappropriated to the Legislative Council to conduct for the legislature an independent third-party scientific and multidisciplinary study of statutory and permitting requirements and processes related to large mine development in the state for the fiscal years ending June 30, 2011, June 30, 2012, June 30, 2013, and June 30, 2014.

(d) The unexpended and unobligated balance, after the appropriation made in (c) of this section, estimated to be $2,230,000, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 46, line 33 (Legislative Council - $36,425,700) is reappropriated to the Legislative Council to begin scoping, planning, and implementing a system-wide redesign of the Bill Action Status and Inquiry System (BASIS), an integrated document management system, and a consolidation of the legislature's internal and external websites.

(e) The unexpended and unobligated balance, estimated to be $8,275,000, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 46, line 27 (Budget and Audit Committee - $18,911,100) is reappropriated to the Legislative Budget and Audit Committee to begin scoping, planning, and implementing an enhanced content management platform to integrate appropriation data, tracking, and reporting with the legislature's Bill Action Status and Inquiry System (BASIS) and for other purposes of the committee.

* **Sec. 35.** STATUTORY BUDGET RESERVE FUND. (a) The sum of $300,000,000 is appropriated from the general fund to the statutory budget reserve fund (AS 37.05.540).

(b) The sum of $200,000,000 is appropriated from the general fund to the statutory budget reserve fund (AS 37.05.540).

* **Sec. 36.** CONTINGENCY. Each of the appropriations made in sec. 4 of this Act is contingent on passage by the Twenty-Seventh Alaska State Legislature and enactment into law of every appropriation, without reduction of any appropriation, made in sec. 4 of this Act.

* **Sec. 37.** NONSEVERABILITY. Notwithstanding AS 01.10.030, if the contingency found in sec. 36 of this Act is held to be invalid, then the contingency is not severable from the appropriations made in sec. 4 of this Act.

* **Sec. 38.** LAPSE. (a) The appropriations made in secs. 14, 15, 16(1), and 35 of this Act are

for the capitalization of funds and do not lapse.

(b) The appropriations made in secs. 17, 19, 22(a), 23(c), 23(e), 23(g), 24, 26, 27(c), 28(b), 28(c), 29(c), 29(d), 34(d), and 34(e) of this Act are for capital projects and lapse under AS 37.25.020.

(c) A grant awarded in this Act to a named recipient under AS 37.05.316 is for a capital project, unless specifically identified in this Act as an operating grant, and lapses under AS 37.25.020 unless otherwise stated or designated for a fiscal year.

(d) The appropriation made in sec. 18 of this Act lapses June 30, 2015.

* **Sec. 39.** Sections 19 - 34 and 35(a) of this Act take effect June 30, 2011.

* **Sec. 40.** Except as provided in sec. 39 of this Act, this Act takes effect July 1, 2011.

Hazard Mitigation Assistance Grants (HD 1-40)	300,000			
Grants to Municipalities (AS 37.05.315)				

It is the intent of the legislature that the Department of Commerce, Community and Economic Development eliminate the requirement for narrative and financial quarterly reporting for any grant of $50,000 or less. It is the intent of the legislature that as long as the department receives a signed certification from the grant recipient that they will comply with all other terms of the grant agreement and that the full grant amount will be used for the purpose for which it is intended, that the department make a single upfront payment for any grant of $50,000 or less.

Dillingham - Airport Improvement - Runway Safety Area Expansion (HD 37)	26,500,000			
Fairbanks International	16,700,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Airport - Aircraft Rescue Firefighting Facility Upgrades (HD 7-11)				
Fairbanks International Airport - Equipment (HD 7-11)	920,000			
Golovin - Runway and Apron Improvements (HD 39)	11,850,000			
Gulkana - Apron and Taxiway Pavement Rehabilitation (HD 6)	1,730,000			
Homer - Terminal Apron Taxiway Pavement Rehabilitation (HD 33-35)	3,200,000			
Kotzebue - Airport and Runway Safety Area Improvements (HD 40)	9,500,000			
Kotzebue - Apron Expansion (HD 40)	480,000			
Kwigillingok - Airport Rehabilitation (HD 38)	1,500,000			
Manley - Airport Relocation (HD 6)	1,625,000			
Nanwalek and Port Graham - Airport Master Plan (HD 33-35)	1,000,000			
Platinum - Airport extension (HD 38)	3,500,000			
Point Hope - Airport Rehabilitation (HD 40)	6,715,000			
Sitka - Rocky Gutierrez	500,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Airport Runway Overlay (HD 2)				
Statewide - Aviation Preconstruction (HD 1-40)	18,000,000			
Statewide - Aviation Systems Plan Update (HD 1-40)	2,500,000			
Statewide - Various Airports Aeronautical Surveys (HD 1-40)	2,000,000			
Statewide - Various Airports Minor Surface Improvements (HD 1-40)	10,000,000			
Statewide - Various Airports Snow Removal and Safety Equipment (HD 1-40)	10,000,000			
Ted Stevens Anchorage International Airport - Advanced Project Design and Planning (HD 17-32)	3,000,000			
Ted Stevens Anchorage International Airport - Annual Improvements (HD 17-32)	1,000,000			
Ted Stevens Anchorage International Airport - Bag Sorting Scanner Replacement (HD 17-32)	1,700,000			
Ted Stevens Anchorage International Airport - Concourse C Carpet	400,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Replacement (HD 17-32)				
Ted Stevens Anchorage International Airport - E21 Gate / Sallyport (HD 17-32)	1,024,000			
Ted Stevens Anchorage International Airport - Environmental Compliance (HD 17-32)	1,000,000			
Ted Stevens Anchorage International Airport - Equipment (HD 17-32)	8,860,000			
Ted Stevens Anchorage International Airport - Facility Improvements, Renovations and Upgrades (HD 17-32)	4,600,000			
Ted Stevens Anchorage International Airport - Field Maintenance Facility Floor Sloping (HD 17-32)	1,800,000			
Ted Stevens Anchorage International Airport - Glycol Storm Water Treatment Facility (HD 17-32)	30,000,000			
Ted Stevens Anchorage International Airport - Information Technology Improvements (HD 17-32)	2,485,500			
Ted Stevens Anchorage	2,800,000			

	Allocations	Appropriation Items	General Funds	Other Funds
International Airport - Jet Bridge Replacements (HD 17-32)				
Ted Stevens Anchorage International Airport - Lake Hood Annual Improvements (HD 17-32)	1,052,632			
Ted Stevens Anchorage International Airport - Lake Hood Strip Improvements (HD 17-32)	1,300,000			
Ted Stevens Anchorage International Airport - Lake Hood Strip Runway Protection Zone Land Acquisition (HD 17-32)	1,000,000			
Ted Stevens Anchorage International Airport - Master Plan-Part 150 Noise Compatibility Study (HD 17-32)	716,667			
Ted Stevens Anchorage International Airport - North Terminal Exterior Paint (HD 17-32)	1,926,000			
Ted Stevens Anchorage International Airport - North Terminal Gate N7 (HD 17-32)	2,000,000			
Ted Stevens Anchorage International Airport -	2,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
North Terminal Lobby Improvements (HD 17-32)				
Ted Stevens Anchorage International Airport - Residential Sound Insulation Program (RSIP) (HD 17-32)	18,600,000			
Ted Stevens Anchorage International Airport - Runway 7L Rehabilitation (HD 17-32)	5,000,000			
Ted Stevens Anchorage International Airport - Runway Deicer Storage (HD 17-32)	400,000			
Ted Stevens Anchorage International Airport - Taxiway E and M Reconstruction (HD 17-32)	15,000,000			
Ted Stevens Anchorage International Airport - Terminal Seating (HD 17-32)	1,700,000			
Unalaska - Runway Safety Area and Pavement Rehabilitation (HD 37)	25,700,000			
Whittier - Airport Master Plan (HD 17-32)	125,000			
Surface Transportation Program		**486,635,000**		**486,635,000**
Alaska Disparity Study (HD	650,000			

	Allocations	Appropriation Items	General Funds	Other Funds
1-40)				
Alaska Marine Highway System - Ferry Vessel Refurbishment (HD 1-40)	15,000,000			
Alaska Marine Highway System - Fleet Condition Survey Update (HD 1-40)	200,000			
Alaska Marine Highway System - M/V Columbia Repower and Ship Systems Improvements (HD 1-40)	25,000,000			
Alaska Marine Highway System - Pelican Ferry Terminal Renovation (HD 2)	3,000,000			
American Association of State Highway and Transportation Officials Technical Programs Support (HD 1-40)	100,000			
Americans with Disabilities Act - Transition Plan for Rights of Way (HD 1-40)	500,000			
Anchorage Metropolitan Area Transportation Solutions (AMATS) - Air Quality Public and Business Awareness Education Campaign (HD 17-32)	300,000			
Anchorage Metropolitan Area Transportation Solutions (AMATS) - Arterial	200,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Roadway Dust Control (HD 17-32)				
Anchorage Metropolitan Area Transportation Solutions (AMATS) - Dowling Road Extension West Reconstruction (HD 17-32)	22,000,000			
Anchorage Metropolitan Area Transportation Solutions (AMATS) - O'Malley Road Reconstruction (HD 17-32)	4,000,000			
Anchorage Metropolitan Area Transportation Solutions (AMATS) - Ridesharing and Transit Marketing (HD 17-32)	720,000			
Bethel - Tundra Ridge Road Improvements (HD 38)	1,200,000			
Congestion Mitigation and Air Quality (CMAQ) - PM 2.5 Reductions (HD 7-11)	6,500,000			
Copper River Highway - Million Dollar Bridge #0206 (HD 12)	11,465,000			
Dalton Highway - Milepost 11 to 18 Reconstruction (HD 6)	25,000,000			
Dalton Highway - Milepost 197 to 209 (HD 6)	10,000,000			
Dalton Highway - Milepost 267 Holden Creek Bridge	5,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Repair or Replacement (HD 6)				
Dalton Highway - Milepost 9 to 11 Reconstruction - 9 Mile Hill (HD 6)	3,000,000			
Fairbanks Metropolitan Area Transportation System (FMATS) - Coordinator's Office (HD 7-11)	330,000			
Fairbanks Metropolitan Area Transportation System (FMATS) - Gold Hill Road Bicycle and Pedestrian Facility (HD 7-11)	1,100,000			
Fairbanks Metropolitan Area Transportation System (FMATS) - North Pole Bike Path Rehabilitation and Connections (HD 7-11)	455,000			
Fairbanks Metropolitan Area Transportation System (FMATS) - Sign Replacement (HD 7-11)	1,365,000			
Fairbanks - Air Quality Planning Project (HD 7-11)	200,000			
Fairbanks - Potter Road Surfacing (HD 7-11)	250,000			
Galena - Campion Road Erosion Protection (HD 6)	9,000,000			
Gambell - Evacuation Road Repairs and Extension (HD	11,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
39)				
Geographic Information System (GIS) Development (IWAYS) (HD 1-40)	1,000,000			
Glenn and Parks Highways Corridor ITS Project (HD 13-16)	1,500,000			
Glenn Highway - Milepost 172 to 189 Rehabilitation (HD 12)	10,000,000			
Hatcher Pass - Scenic Overlook and Trailhead Construction (HD 13-16)	1,000,000			
Homer - East End Road Rehabilitation - Milepost 3.7 to 12.2 (HD 33-35)	3,500,000			
Intelligent Transportation Systems Border Infrastructure (HD 1-40)	1,250,000			
Juneau - Auke Lake Trail and Wayside (HD 3-4)	1,200,000			
Juneau - Brotherhood Bridge and Industrial Boulevard Improvements (HD 3-4)	17,500,000			
Juneau - Fritz Cove Road Rehabilitation and Repair (HD 3-4)	4,000,000			
Juneau - Glacier Highway - Widen and Resurface Eagle Beach to Bessie Creek (HD 3-4)	11,300,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Juneau - Mendenhall Valley Street Dust Control (HD 3-4)	2,000,000			
Ketchikan - North Tongass Highway - Totem Bight to Whipple Creek (HD 1)	3,500,000			
Ketchikan - South Tongass Highway Widening - Saxman to Surf Street (HD 1)	1,000,000			
Livengood - Livengood Creek Bridge Replacement (HD 6)	1,400,000			
Matanuska-Susitna - Trunk Road Reconstruction (HD 13-16)	10,000,000			
New Seward Highway - Rabbit Creek to 36th Avenue (HD 17-32)	2,000,000			
Ninilchik - Village Bridge Replacement (HD 33-35)	2,200,000			
Nome - Nome-Council Road - Milepost 4 to 16 (HD 39)	4,500,000			
Northern Region - National Highway System and Non-National Highway System Pavement and Bridge Refurbishment (HD 1-40)	32,000,000			
Nulato - Airport Road Improvements (HD 6)	4,500,000			
Parks Highway - Milepost 239 to 263 Reconstruction - Nenana Canyon to Bear	27,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Creek (HD 7-11)				
Prince of Wales Island - Klawock to Hollis Pavement Rehabilitation and Culvert Replacement (HD 5)	20,000,000			
Revise Alaska Traffic, Environmental, and Right-of-Way Manuals and Standard Specifications (HD 1-40)	500,000			
Richardson Highway - Milepost 201 Phelan Creek Bridge Replacement (HD 12)	6,000,000			
Richardson Highway - Milepost 228 - One Mile Creek Bridge Replacement (HD 12)	7,500,000			
Richardson Highway - Milepost 345 Moose Creek Railroad Crossing (HD 12)	14,000,000			
Richardson Highway - Milepost 357 - Fairbanks New Weigh Station (HD 7-11)	3,000,000			
Safe Routes to Schools (HD 1-40)	1,000,000			
Seward Highway - Anchorage to Portage Glacier Road ITS Project (HD 17-32)	750,000			
Seward Highway - Dowling to Tudor Reconstruction (HD	20,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
17-32)				
Seward Highway - Milepost 104 to 115 Passing Lanes - Indian to Potter (HD 17-32)	15,000,000			
Sitka - Halibut Point Road Resurfacing, Drainage Improvements and Bridge Replacement (HD 2)	4,000,000			
Southeast Region - National Highway System and Non-National Highway System Pavement and Bridge Refurbishment (HD 1-5)	5,000,000			
Statewide - Air Quality Mobile Source Modeling (HD 1-40)	1,200,000			
Statewide - Bicycle/Pedestrian Facilities Rehabilitation and Improvements (HD 1-40)	500,000			
Statewide - Civil Rights Program (HD 1-40)	200,000			
Statewide - Comprehensive Highway Safety Plan (HD 1-40)	400,000			
Statewide - Highway Data Equipment Acquisition and Installation (HD 1-40)	1,500,000			
Statewide - Highway Fuel Tax Enforcement (HD 1-40)	100,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Statewide - National Highway Institute and Transit Institute Training (HD 1-40)	750,000			
Statewide - National Highway System Weight Restriction Remediation (HD 1-40)	10,000,000			
Statewide - Planning Work Program (HD 1-40)	8,000,000			
Statewide - Research Program (HD 1-40)	1,700,000			
Statewide - Scenic Byways Grants (HD 1-40)	750,000			
Statewide - Seismic Retrofit - Bridges (HD 1-40)	2,000,000			
Statewide - Urban Planning Program (HD 12-35)	1,500,000			
Statewide - Weigh-in-Motion Equipment (HD 1-40)	2,000,000			
Surface Transportation Preconstruction (HD 1-40)	45,000,000			

It is the intent of the legislature that no new transportation capacity enhancement project or road project costing more than $1,000,000 be initiated by the Department of Transportation and Public Facilities with this allocation prior to the department receiving project specific approval from the legislature.

Top of the World Highway - Milepost 0 to 13 - Rehabilitation (HD 6)	12,200,000			
Whittier - Maintenance and	2,200,000

(SECTION 3 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 3.** The following sets out the statewide funding for the appropriations made in sec. 1 of this Act.

Funding Source		Amount
Unrestricted General Funds		
1003	General Fund Match	84,114,886
1004	Unrestricted General Fund Receipts	573,864,921
1139	Alaska Housing Finance Corporation Dividend	16,300,000
1140	Alaska Industrial Development and Export Authority Dividend	26,000,000
1173	GF Miscellaneous Earnings	205,300
Total Unrestricted General Funds		$700,485,107
Designated General Funds		
1005	General Fund/Program Receipts	200,000
1048	University of Alaska Restricted Receipts	2,000,000
1050	Permanent Fund Dividend Fund	266,500
1052	Oil/Hazardous Release Prevention & Response Fund	100,000
1153	State Land Disposal Income Fund	3,700,000
1195	Special Vehicle Registration Receipts	250,000
1202	Anatomical Gift Awareness Fund	35,000
1221	Civil Legal Services Fund	110,000
Total Designated General Funds		$6,661,500
Other Non-Duplicated Funds		
1017	Group Health and Life Benefits Fund	570,800
1024	Fish and Game Fund	750,000
1027	International Airports Revenue Fund	17,236,750
1029	Public Employees Retirement Trust Fund	661,500
1034	Teachers Retirement Trust Fund	272,100
1042	Judicial Retirement System	6,900
1045	National Guard Retirement System	21,900
1105	Permanent Fund Gross Receipts	150,000

1108	Statutory Designated Program Receipts	14,155,000
Total Other Non-Duplicated Funds		$33,824,950
Federal Funds		
1002	Federal Receipts	1,063,381,384
Total Federal Funds		$1,063,381,384
Duplicated Funds		
1026	Highways Equipment Working Capital Fund	18,322,600
1061	Capital Improvement Project Receipts	3,230,000
1075	Alaska Clean Water Fund	1,826,274
1100	Alaska Drinking Water Fund	4,071,900
1112	International Airports Construction Fund	19,212,924
1185	Election Fund	100,000
Total Duplicated Funds		$46,763,698

(SECTION 4 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 4.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 5 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

	Allocations	Appropriation Items	General Funds	Other Funds

(SECTION 5 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 5.** The following sets out the funding by agency for the appropriations made in sec. 4 of this Act.

Funding Source	Amount
Department of Administration	
1004 Unrestricted General Fund Receipts	58,129,818
1005 General Fund/Program Receipts	2,800,000
1147 Public Building Fund	3,000,000
*** Total Agency Funding ***	$63,929,818
Department of Corrections	
1004 Unrestricted General Fund Receipts	1,150,000
*** Total Agency Funding ***	$1,150,000
Department of Education and Early Development	
1004 Unrestricted General Fund Receipts	125,000
*** Total Agency Funding ***	$125,000
Department of Fish and Game	
1004 Unrestricted General Fund Receipts	700,000
*** Total Agency Funding ***	$700,000
Department of Law	
1004 Unrestricted General Fund Receipts	1,250,000
*** Total Agency Funding ***	$1,250,000
Department of Military and Veterans Affairs	
1004 Unrestricted General Fund Receipts	4,980,000
*** Total Agency Funding ***	$4,980,000
Department of Natural Resources	
1004 Unrestricted General Fund Receipts	6,900,000
1005 General Fund/Program Receipts	400,000
*** Total Agency Funding ***	$7,300,000
Department of Public Safety	
1004 Unrestricted General Fund Receipts	2,650,000
*** Total Agency Funding ***	$2,650,000
Department of Revenue	

1	1004 Unrestricted General Fund Receipts	2,000,000
2	*** Total Agency Funding ***	$2,000,000
3	**Department of Transportation and Public Facilities**	
4	1002 Federal Receipts	1,000,000
5	1004 Unrestricted General Fund Receipts	15,500,000
6	*** Total Agency Funding ***	$16,500,000
7	* * * * * Total Budget * * * * *	$100,584,818

8 (SECTION 6 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 6.** The following sets out the statewide funding for the appropriations made in sec. 4 of this Act.

Funding Source	Amount
Unrestricted General Funds	
1004 Unrestricted General Fund Receipts	93,384,818
Total Unrestricted General Funds	$93,384,818
Designated General Funds	
1005 General Fund/Program Receipts	3,200,000
Total Designated General Funds	$3,200,000
Other Non-Duplicated Funds	
Total Other Non-Duplicated Funds	$0
Federal Funds	
1002 Federal Receipts	1,000,000
Total Federal Funds	$1,000,000
Duplicated Funds	
1147 Public Building Fund	3,000,000
Total Duplicated Funds	$3,000,000

(SECTION 7 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 7.** The following appropriation items are for capital projects and grants from the general fund or other funds as set out in section 8 of this Act by funding source to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

It is the intent of the legislature that the following appropriations and projects are needed to carry out the state's energy policy described in AS 44.99.115. As the energy policy states, the legislature recognizes the immense diversity of the state's geography, cultures, and resource availability and the need to identify and assist with development of the most cost-effective, long-term sources of energy for each community statewide. Therefore, the legislature intends that the package of appropriations and projects listed below are all necessary to achieve a statewide balance in addressing the state's diverse energy needs.

	Allocations	Appropriation Items	General Funds	Other Funds
* * * * *			* * * * *	
* * * * * **Department of Commerce, Community and Economic Development** * * * * *				
* * * * *			* * * * *	
Alaska Industrial Development & Export Authority - Coal to Liquids Certification Project (HD 1-40)		500,000	500,000	
Alaska Energy Authority - Energy Programs		**16,330,000**	**10,330,000**	**6,000,000**
Alaska Energy Plan Implementation (HD 1-40)	1,000,000			
Bulk Fuel Upgrades (HD 1-40)	5,000,000			
Electrical Emergencies Program (HD 1-40)	330,000			
Rural Power System	10,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Upgrades (HD 1-40)				
Alaska Energy Authority - Energy Projects				
AEA - Anchorage to Quartz Creek Transmission Line Maintenance and Repair (HD 17-32)		25,000,000	25,000,000	
AEA - Battle Creek Diversion (HD 33-35)		15,000,000	15,000,000	
AEA - Cook Inlet Gas Gathering System Remodel (HD 12-35)		2,000,000	2,000,000	
AEA - Daves Creek to Seward Transmission Line Completion (HD 33-35)		1,500,000	1,500,000	
AEA - Girdwood and Substation Improvements (HD 17-32)		4,000,000	4,000,000	
AEA - Mount Spurr Geothermal Project Development (HD 12-35)		18,000,000	18,000,000	
AEA - Quartz Creek to Soldotna Transmission Maintenance and Repair (HD 33-35)		10,000,000	10,000,000	
AEA - Seward Power Plant Integration (HD 33-35)		4,000,000	4,000,000	
AEA - Soldotna to Quartz Creek Transmission Study, Design and Permitting (HD 33-35)		5,000,000	5,000,000	

	Allocations	Appropriation Items	General Funds	Other Funds
AEA - Susitna Hydroelectric Energy Plan (HD 12-35)		65,700,000	65,700,000	
AEA - Teeland to Healy Substation Improvements and Repair (HD 7-11)		5,000,000	5,000,000	
Alaska Energy Authority - Round IV Renewable Energy Project Grants (AS 42.45.045)		**36,620,231**	**36,620,231**	
Inside Passage Electric Cooperative, Inc. - Hoonah Heat Recovery Project (HD 5)	475,000			
University of Alaska Center for Energy and Power - Pilgrim Hot Springs Geothermal Assessment (HD 39)	1,330,467			
Northwest Inupiat Housing Authority - Upper Kobuk River Biomass (HD 40)	250,000			
Southeast Island School District - Thorne Bay School Wood Fired Boiler Project (HD 1)	300,000			
G&K, Inc. - Cold Bay Electric Utility Wind Energy Project (HD 37)	99,075			
Kodiak Electric Association, Inc. - Terror	3,751,840			

	Allocations	Appropriation Items	General Funds	Other Funds
Lake Hydroelectric Project (HD 36)				
Kootznoowoo, Inc. - Thayer Lake Hydroelectric Project (HD 5)	1,060,500			
Alaska Power & Telephone Company - Upper Tanana Biomass CHP Project (HD 6)	380,000			
TDX Power, Inc. - Bethel Renewable Energy Project (HD 38)	213,690			
Chugach Electric Association, Inc. - Battle Creek Diversion Project (HD 33-35)	500,000			
Alaska Village Electric Cooperative, Inc. - Old Harbor Hydroelectric (HD 36)	237,500			
Lake & Peninsula Borough - Port Heiden Wind Turbine Project (HD 37)	250,000			
Golden Valley Electric Association - Eva Creek Wind Turbine Purchase (HD 7-11)	1,463,200			
Alaska Electric Light & Power Company - Snettisham Transmission Line Avalanche Mitigation (HD	2,000,000			

	Allocations	Appropriation Items	General Funds	Other Funds
3-4)				
Pelican - Hydroelectric Upgrade Project (HD 2)	1,896,836			
Tenakee Springs - Indian River Hydroelectric Project (HD 5)	203,000			
University of Alaska Center for Energy and Power - Organic Rankine Cycle Field Testing (HD 6)	472,787			
Lake & Peninsula Borough - Wood Boilers (HD 36)	369,900			
Chitina Electric, Inc. - Fivemile Creek Hydroelectric Project (HD 6)	277,000			
Ormat Nevada, Inc. - Mount Spurr Geothermal Project (HD 33-35)	1,999,972			
Napaskiak Electric Utility - Wind Power and Heat Recovery (HD 38)	61,225			
Alaska Village Electric Cooperative - St. Marys/Pitkas Point Wind Construction (HD 39)	275,554			
Louden Tribal Council - Renewable Energy Feasibility Study (HD 6)	100,000			
Chugach Electric Association, Inc. -	600,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Transmission to Renewable Energy Resources (HD 33-35)				
Interior Regional Housing Authority - Wood Heating Feasibility Assessments (HD 6)	154,477			
Lime Village Traditional Council - Photovoltaic System Retrofit (HD 6)	25,000			
Craig - Biomass Fuel Dryer Project (HD 5)	350,000			
Independence Power, LLC - Fourth of July Creek Hydroelectric Project (HD 33-35)	136,500			
Kotzebue - Paper and Wood Waste to Energy (HD 40)	85,000			
Village of Atmautluak - Wind Renewable Energy (HD 38)	100,000			
Alaska Village Electric Cooperative, Inc. - Stebbins Wind Feasibility (HD 39)	137,750			
Elfin Cove - Hydroelectric Project (HD 2)	347,000			
Ketchikan - Whitman Lake Hydroelectric Project (HD 1)	700,000			
Alaska Village Electric	142,500			

	Allocations	Appropriation Items	General Funds	Other Funds
Cooperative, Inc. - Eek Wind Feasibility (HD 38)				
Organized Village of Kwethluk - Wind Feasibility (HD 38)	145,000			
Sitka - Japonski Island Boathouse Heat Pump (HD 2)	125,000			
Alaska Village Electric Cooperative, Inc. - Marshall Wind Feasibility (HD 6)	111,150			
Nelson Lagoon Electrical Cooperative - Wind Energy Project (HD 37)	99,075			
North Slope Borough - Atqasuk Transmission Line (HD 40)	210,000			
Alaska Village Electric Cooperative, Inc. - Kaltag Solar Construction (HD 6)	90,000			
Alaska Village Electric Cooperative, Inc. - Scammon Bay Wind Feasibility (HD 39)	142,500			
Chugach Electric Association, Inc. - Stetson Creek Diversion and Cooper Lake Dam Facilities (HD 33-35)	576,080			
New Koliganek Village	105,050			

	Allocations	Appropriation Items	General Funds	Other Funds
Council - Wind and Heat Recovery Feasibility Study (HD 37)				
North Slope Borough - Wainwright Wind Turbine Design (HD 40)	298,000			
North Slope Borough - Kaktovik Wind Diesel (HD 40)	132,000			
North Slope Borough - Point Hope Wind Turbine Design (HD 40)	298,000			
North Slope Borough - Point Lay Wind Generation Design (HD 40)	298,000			
Kenai Hydro, LLC - Grant Lake Hydroelectric Facility (HD 33-35)	1,184,000			
Alaska Village Electric Cooperative, Inc. - Selawik Hybrid Wind Diesel System Turbine Upgrade (HD 40)	85,000			
Alaska Power Company - Reynolds Creek Hydroelectric Project (HD 5)	2,000,000			
AVTEC - Hydroelectric Training Facility (HD 33-35)	67,500			
Alaska Village Electric Cooperative, Inc. - Koyuk	142,500			

	Allocations	Appropriation Items	General Funds	Other Funds
Wind Feasibility (HD 39)				
Chefornak - Wind Feasibility (HD 38)	136,750			
Alaska Village Electric Cooperative, Inc. - Elim Wind Feasibility (HD 39)	142,500			
Akutan - Geothermal Development Project (HD 37)	2,695,000			
Akiachak Native Community - Wind Feasibility and Conceptual Design (HD 38)	110,000			
ORPC Alaska, LLC - Cook Inlet Tidal Generation Project (HD 33-35)	2,000,000			
Alaska Power Company - Connelly Lake Hydroelectric Project (HD 5)	468,000			
False Pass - Wind Energy Project (HD 37)	69,075			
Native Village of Eyak - Biomass Feasibility Study (HD 5)	75,000			
Eklutna, Inc. - Hunter Creek Hydroelectric Project (HD 13-16)	84,000			
Port Graham Village Council - Biomass Waste Heat Demonstration Project (HD 33-35)	75,000			
Matanuska-Susitna Borough -	750,000			

	Allocations	Appropriation Items	General Funds	Other Funds
Susitna Valley High School Wood Heat (HD 13-16)				
Copper River School District - Kenny Lake School Wood Fired Boiler (HD 6)	565,485			
Alaska Power Company - Schubee Lake Hydroelectric Project (HD 5)	80,000			
Bering Pacific Engineering - Eska Creek Hydroelectric Project (HD 12)	37,000			
Metlakatla Indian Community - Metlakatla-Ketchikan Intertie (HD 1-5)	1,180,000			
Haines - Excursion Inlet Hydro Project (HD 5)	93,593			
Native Village of Cantwell - Jack River Hydro Project (HD 7-11)	30,000			
Wrangell - Electric Vehicle Feasibility Study (HD 2)	25,000			
Sitka - Centennial Hall and Library Renewable Energy Feasibility Study (HD 2)	30,000			
Sitka - Wastewater Treatment Plant Renewable Energy Feasibility Study (HD 2)	20,000			
Inside Passage Electric	599,200			

	Allocations	Appropriation Items	General Funds	Other Funds
Cooperative - Tenakee Inlet Geothermal Resource Study (HD 5)				
Metlakatla Indian Community - Triangle Lake Hydroelectric Project (HD 5)	500,000			
Grants to Municipalities (AS 37.05.315)				
Fairbanks North Star Borough - Natural Gas Distribution Study (HD 7-11)		500,000	500,000	
Fairbanks North Star Borough - Wood Stove Conversion Program (HD 7-11)		3,000,000	3,000,000	
Galena - GILA Steam Plant Safety and Energy Improvements (HD 6)		1,476,800	1,476,800	
Homer - Homer Area Natural Gas Pipeline (HD 33-35)		10,053,000	10,053,000	
Ketchikan - Whitman Lake Hydroelectric Project (HD 1)		8,025,000	8,025,000	
Sitka - Blue Lake Hydroelectric Project Expansion (HD 2)		28,500,000	28,500,000	
Grants to Named Recipients (AS 37.05.316)				

	Allocations	Appropriation Items	General Funds	Other Funds
Copper Valley Electric Association, Inc. - Allison Creek Hydroelectric Project (HD 12-35)		10,000,000	10,000,000	
Golden Valley Electric Association - Eva Creek Wind Farm (HD 7-11)		10,000,000	10,000,000	
Gustavus Electric Co. - Falls Creek Hydroelectric Debt Reimbursement (HD 5)		1,300,000	1,300,000	
Homer Electric Association, Inc. - Soldotna to Nikiski Transmission Upgrade (HD 33-35)		25,000,000	25,000,000	
Kodiak Electric Association, Inc. - Terror Lake Hydroelectric Facility Expansion (HD 36)		7,500,000	7,500,000	
Metlakatla Indian Community - Metlakatla-Ketchikan Intertie (HD 1-5)		10,500,000	10,500,000	
Nuvista Light & Power - Chikuminuk Hydroelectric and Alternative Energy Project (HD 36-38)		17,630,000	17,630,000

Alaska Gasline Development Corporation - Year 2 In-State Gas Project (HD 12-35)		5,500,000	5,500,000	
AHFC Weatherization and Home Energy Rebate Programs		**51,500,000**	**50,000,000**	**1,500,000**
AHFC Weatherization Program (HD 1-40)	31,500,000			
AHFC Home Energy Rebate Program (HD 1-40)	20,000,000			

(SECTION 8 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 8.** The following sets out the funding by agency for the appropriations made in sec. 7 of this Act.

Funding Source	Amount
Department of Commerce, Community and Economic Development	
1002 Federal Receipts	6,000,000
1004 Unrestricted General Fund Receipts	233,314,800
1012 Railbelt Energy Fund	65,700,000
1140 Alaska Industrial Development and Export Authority Dividend	500,000
1210 Renewable Energy Grant Fund	36,620,231
*** Total Agency Funding ***	$342,135,031
Department of Revenue	
1002 Federal Receipts	1,500,000
1004 Unrestricted General Fund Receipts	55,500,000
*** Total Agency Funding ***	$57,000,000
* * * * * Total Budget * * * * *	$399,135,031

(SECTION 9 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 9.** The following sets out the statewide funding for the appropriations made in sec. 7 of this Act.

Funding Source		Amount
Unrestricted General Funds		
1004	Unrestricted General Fund Receipts	288,814,800
1012	Railbelt Energy Fund	65,700,000
1140	Alaska Industrial Development and Export Authority Dividend	500,000
Total Unrestricted General Funds		$355,014,800
Designated General Funds		
1210	Renewable Energy Grant Fund	36,620,231
Total Designated General Funds		$36,620,231
Other Non-Duplicated Funds		
Total Other Non-Duplicated Funds		$0
Federal Funds		
1002	Federal Receipts	7,500,000
Total Federal Funds		$7,500,000
Duplicated Funds		
Total Duplicated Funds		$0

(SECTION 10 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 10.** The following appropriation items are for capital project grants to upgrade commercial passenger vessel services and infrastructure, enhance passenger safety and support cruise ship visitor activities from the Commercial Vessel Passenger Tax Account (AS 43.52.230) or other funds as set out in section 11 of this Act to the agencies named for the purposes expressed and lapse under AS 37.25.020, unless otherwise noted.

(SECTION 16 OF THIS ACT BEGINS ON THE NEXT PAGE)

* **Sec. 16.** FEDERAL AND OTHER PROGRAM RECEIPTS. (a) Federal receipts, designated program receipts as defined in AS 37.05.146(b)(3), information services fund program receipts as defined in AS 44.21.045(b), receipts of the University of Alaska as described in AS 37.05.146(b)(2), receipts of commercial fisheries test fishing operations under AS 37.05.146(c)(21), corporate receipts of the Alaska Housing Finance Corporation, corporate receipts of the Alaska Aerospace Corporation, Exxon Valdez oil spill trust receipts as defined in AS 37.05.146(b)(4), and receipts of the Alaska Fire Standards Council under AS 37.05.146(b)(5), that exceed the amounts appropriated by this Act are appropriated conditioned on compliance with the program review provisions of AS 37.07.080(h).

(b) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) exceed the estimates appropriated by this Act, the appropriations from state funds for the affected program may be reduced by the excess if the reductions are consistent with applicable federal statutes.

(c) If federal or other program receipts as defined in AS 37.05.146 and in AS 44.21.045(b) fall short of the estimates appropriated by this Act, the affected appropriation is reduced by the amount of the shortfall in receipts.

* **Sec. 17.** FUND CAPITALIZATION. (a) The sum of $60,000,000 is appropriated from the general fund to the Alaska Gasline Inducement Act reimbursement fund (AS 43.90.400(a)) for the natural gas pipeline project construction inducement under AS 43.90.110(a)(1).

(b) The sum of $2,400,000 is appropriated from the general fund to the emerging energy technology fund (AS 42.45.375).

(c) The amount of federal receipts from the financial assistance award for emerging energy technology by the Denali Commission established under P.L. 105-277, estimated to be $2,400,000, is appropriated to the emerging energy technology fund (AS 42.45.375) for capital projects.

* **Sec. 18.** FUND TRANSFERS. (a) The sum of $2,500,000 is appropriated from the general fund to the alternative energy conservation revolving loan fund (AS 45.88.010).

(b) The sum of $30,620,231 is appropriated from the general fund to the renewable energy grant fund (AS 42.45.045(a)).

* **Sec. 19.** INSURANCE CLAIMS. The amounts to be received in settlement of insurance claims for losses and the amounts to be received as recovery for losses are appropriated from

the general fund to the

(1) state insurance catastrophe reserve account (AS 37.05.289(a)); or

(2) appropriate state agency to mitigate the loss.

*** Sec. 20.** NATIONAL PETROLEUM RESERVE - ALASKA IMPACT GRANT PROGRAM. (a) The amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530(a)) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2011, estimated to be $5,399,679, is appropriated from that fund to the Department of Commerce, Community, and Economic Development for capital project grants under the National Petroleum Reserve - Alaska impact grant program to the following municipalities in the amounts stated:

MUNICIPALITY	PROJECT	ALLOCATION
(1) North Slope Borough	Permit tracking system	$ 242,000
(2) North Slope Borough	Lagoon and Kuk Inlet	109,000
(3) City of Barrow	Local government operations and maintenance	1,600,000
(4) North Slope Borough	Meade River school counselor	270,177
(5) North Slope Borough	Land management and enforcement continuation	750,000
(6) North Slope Borough	School counselor program	282,502
(7) North Slope Borough	Mayor's job program	300,000
(8) City of Nuiqsut	Youth center operations and maintenance	194,000
(9) City of Nuiqsut	Local government operations and maintenance	595,000
(10) City of Atqasuk	Local government operations and youth program	300,000
(11) City of Barrow	City archival project	60,000
(12) North Slope Borough	Workforce development for essential services	452,000
(13) City of Wainwright	Wainwright local government	245,000

operations

(b) If the amount received by the National Petroleum Reserve - Alaska special revenue fund (AS 37.05.530(a)) under 42 U.S.C. 6506a(*l*) or former 42 U.S.C. 6508 by August 31, 2011, is less than the sum of the allocations made in (a) of this section, the Department of Commerce, Community, and Economic Development shall work with the municipalities listed in (a) of this section to reduce the sum of the allocations made in (a) of this section to equal the amount received.

* **Sec. 21.** DEPARTMENT OF LABOR AND WORKFORCE DEVELOPMENT. The sum of $486,000 is appropriated from the general fund to the Department of Labor and Workforce Development, Alaska Workforce Investment Board, to offer, in cooperation with the Department of Commerce, Community, and Economic Development, grants as authorized by AS 23.15.820(b) for training Alaskans in the film and television industry for the fiscal year ending June 30, 2012.

* **Sec. 22.** DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES. (a) The unexpended and unobligated balance, estimated to be $2,000,000, of the appropriation made in sec. 1, ch. 82, SLA 2006, page 86, line 32, through page 87, line 3 (Department of Transportation and Public Facilities, Parks Highway Frontage Road realignment at Seward meridian - $2,000,000) is reappropriated to the Department of Transportation and Public Facilities for Parks Highway Frontage Road and intersection improvements at Trunk Road.

(b) Section 14(*l*), ch. 14, SLA 2009, is amended to read:

(*l*) The sum of $4,250,000 is appropriated from the Alaska capital income fund (AS 37.05.565) to the Department of Transportation and Public Facilities for construction of a new Ketchikan airport ferry to replace the M/V Bob Ellis**, mooring and transfer facility repairs, and M/V Oral Freeman construction costs incurred before January 1, 2002**.

* **Sec. 23.** HOUSE DISTRICT 2. (a) Section 1, ch. 3, FSSLA 2005, page 66, lines 23 - 28, is amended to read:

	APPROPRIATION ITEMS	GENERAL FUND
Petersburg: North Harbor Deferred Maintenance**, Replacement,** and	2,500,000	2,500,000

Transfer (HD 2)

In order to expend this appropriation, the City of Petersburg must enter into an agreement with the Department of Transportation and Public Facilities and accept full responsibility for ownership and maintenance of the North Harbor by January 1, 2006.

(b) Section 4, ch. 15, SLA 2009, page 46, lines 24 - 25, is amended to read:

	APPROPRIATION ITEMS	OTHER FUNDS
Wrangell - **Street,** [STIKINE AVENUE] Sidewalk**, and Infrastructure Improvements** [EXTENSION] (HD 2)	390,000	390,000

*** Sec. 24.** HOUSE DISTRICT 5. The unexpended and unobligated balance, estimated to be $200,000, of the appropriation made in sec. 13, ch. 29, SLA 2008, page 120, lines 14 - 16, as amended by sec. 41(b), ch. 43, SLA 2010 (Craig, fish processing capacity and community cold storage) is reappropriated to the Department of Commerce, Community, and Economic Development for payment as a grant under AS 37.05.315 to the City of Craig for reimbursement of 2008 and 2009 expenditures for Craig cold storage.

*** Sec. 25.** HOUSE DISTRICT 6. *** Sec. 37.** REAPPROPRIATION OF LEGISLATIVE APPROPRIATIONS. (a) Section 56(b), ch. 43, SLA 2010, is amended to read:

(b) The unexpended and unobligated balance, not to exceed $750,000, of the appropriation made in sec. 1, ch. 12, SLA 2009, page 44, line 29 (Budget and Audit Committee - $19,501,800) is reappropriated to the Legislative Council to conduct for the legislature an independent third-party scientific and multidisciplinary study of **statutory and permitting requirements and processes related to** [THE POTENTIAL] large mine development in **the state** [THE BRISTOL BAY DRAINAGE] for the fiscal **years** [YEAR] ending June 30, 2011**, June 30, 2012, June 30, 2013, and June 30, 2014**.

(b) The unexpended and unobligated balance, estimated to be $900,000, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 47, line 11 (legislative operating budget - $11,800,100) is reappropriated to the Legislative Budget and Audit Committee for operating expenses for the fiscal year ending June 30, 2012.

(c) The unexpended and unobligated balance, not to exceed $450,000, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 46, line 33 (Legislative Council - $36,425,700) is reappropriated to the Legislative Council to conduct for the legislature an independent third-party scientific and multidisciplinary study of statutory and permitting requirements and processes related to large mine development in the state for the fiscal years ending June 30, 2011, June 30, 2012, June 30, 2013, and June 30, 2014.

(d) The unexpended and unobligated balance, after the appropriation made in (c) of this section, estimated to be $2,230,000, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 46, line 33 (Legislative Council - $36,425,700) is reappropriated to the Legislative Council to begin scoping, planning, and implementing a system-wide redesign of the Bill Action Status and Inquiry System (BASIS), an integrated document management system, and a consolidation of the legislature's internal and external websites.

(e) The unexpended and unobligated balance, estimated to be $8,275,000, of the appropriation made in sec. 1, ch. 41, SLA 2010, page 46, line 27 (Budget and Audit Committee - $18,911,100) is reappropriated to the Legislative Budget and Audit Committee to begin scoping, planning, and implementing an enhanced content management platform to integrate appropriation data, tracking, and reporting with the legislature's Bill Action Status and Inquiry System (BASIS).

* **Sec. 38.** STATUTORY BUDGET RESERVE FUND. (a) The sum of $300,000,000 is appropriated from the general fund to the statutory budget reserve fund (AS 37.05.540).

(b) The sum of $200,000,000 is appropriated from the general fund to the statutory budget reserve fund (AS 37.05.540).

* **Sec. 39.** CONTINGENCY. (a) Each of the appropriations made in sec. 7 of this Act is contingent on passage by the Twenty-Seventh Alaska State Legislature in the First Regular Session and enactment into law of every appropriation made in sec. 7 of this Act.

(b) The appropriations made in sec. 4 of this Act are contingent on the fiscal year 2012 year-to-date average price of Alaska North Slope crude oil exceeding $150 a barrel on October 1, 2011.

* **Sec. 40.** LAPSE. (a) The appropriations made in secs. 17, 18, 19(1), and 38 of this Act are for the capitalization of funds and do not lapse.

(b) The appropriations made in secs. 20, 22, 25(a), 26(c), 26(e), 26(g), 27, 29, 30(c), 31(b), 31(c), 32(c), 32(d), 37(d), and 37(e) of this Act are for capital projects and lapse under AS 37.25.020.

(c) A grant awarded in this Act to a named recipient under AS 37.05.316 is for a capital project, unless specifically identified in this Act as an operating grant, and lapses under AS 37.25.020 unless otherwise stated or designated for a fiscal year.

* **Sec. 41.** Sections 22 - 37 and 38(a) of this Act take effect June 30, 2011.

* **Sec. 42.** Except as provided in sec. 41 of this Act, this Act takes effect July 1, 2011.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSSSSB051(L&C)
2012 LEGISLATIVE SESSION

Analysis

The proposed legislation will remove individuals with significant disabilities from participating in the Business Enterprise Program (BEP) and will change the method of how vendors are licensed at a facility from a permit to a contract.

There is no fiscal impact to the department anticipated as a result of this legislation.

Senator Bettye Davis

Senate Bill 51, 27-LS0079 -"An Act relating to the operation of vending facilities on public property."

Sponsor Statement

SB 51 restores to blind persons first priority for a contract to operate a vending facility on state and other public property. This bill amends the Alaska Chance Act of 1976 to require that the State Division of Vocational Rehabilitation Business Enterprise Program provide the same first priority to the blind on state and other public property as it does on federal property enforced under the Randolph-Sheppard Act of 1936. The Alaska Chance Act for the first time added disabled persons in addition to the blind in preference for vending licenses on public facilities. This loss of first priority and expansion of beneficiaries has thwarted the spirit and letter of the Randolph-Sheppard Act. The resulting decrease in vending opportunities for blind merchants in Alaska exacerbated their already extraordinarily high unemployment rates among all types and severities of the disabled and the population in general.

SB 51 recognizes that the blind are dissimilarly situated compared to other disabled persons who do not suffer the same degree of impairment and unemployment as an economic matter. Although the State has combined management and training opportunities for both the blind and other persons with disabilities under one Business Enterprise Program of the Division of Vocational Rehabilitation, this bill requires that it must give first priority to the blind for vending contracts on state, federal or other public property.

SB 51 comports with original legislative intent and gives first priority to the blind imposed under AS 23.15.100 prior to changes in 1974 and 2006 which added persons with disabilities and severe disabilities who currently compete with the blind for licenses on vending facilities on public property. It requires that the Division attempt to find and notify blind persons of vending opportunities as they arise on public property. These public properties may include among others court houses, military bases, state and federal office buildings, and other public properties.

Typically, blind individuals who receive Randolph-Sheppard contracts act as managers of large vending or cafeteria facilities, subcontracting with food service organizations to provide meals and/or vending services on a day to day basis. They also may independently operate lobby concession stands, or vending machine banks. In October, 2009 Alaska's Business Enterprise Program had only six sites operating in federal facilities under Randolph-Sheppard, and six sites operating in state facilities under the Chance Act. This bill should greatly expand opportunities for employment and vending locations for the blind.

MEMORANDUM March 18, 2011

SUBJECT: Sectional summary of CSSSSB 51( ), relating to the operation of vending facilities on public property
(Work Order No. 27-LS0079\B)

TO: Senator Bettye Davis
Attn: Tom Obermeyer

FROM: TB
Theresa Bannister
Legislative Counsel

You have requested a sectional summary of the above-described bill. As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. Amends a section dealing with powers and duties of the division of vocational rehabilitation (Agency). Removes references to persons with severe disabilities from the provisions dealing with the operation of vending facilities on public property.

Section 2. Directs the agency to issue a license for the operation of vending facilities on public property to blind persons who meet certain criteria, including criteria established by agency regulations. Requires these regulations to provide blind persons with first priority for a contract to operate a vending facility on public property.

Section 3. Adds new subsections to the section on the issuance of licenses for vending facilities on public property.

Sec. 23.15.133(c). Allows the agency to contract with a person who is not blind to operate a vending facility until the agency can locate a blind person who qualifies to operate the vending facility.

Sec. 23.15.133(d). When there is a vacancy in the operation of a vending facility on state property, requires the agency to attempt to contact blind persons directly about operating the vending facility. Directs the agency to work with private organizations to contact blind persons. This requirement is in addition to any other procurement requirements of AS 36.30 (the state procurement code). Newspaper advertising is not sufficient.

Sec. 23.15.133(e). Allows a blind person operating a vending facility to operate another vending facility if the agency cannot find a blind person to operate the other vending facility.

Section 4. Deletes a reference to persons with severe disabilities from a provision relating to hearings on agency actions that relate to vending facilities.

Section 5. Amends the definition of "licensee" to remove the reference to a person with a severe disability.

Section 6. Repeals a section relating to vending facilities operated by persons with severe disabilities.

Section 7. Indicates that the Act applies to vending facility licenses issued, and vending facility contracts entered into, on or after the effective date of this Act.

Section 8. States that the Act does not affect a contract entered into before the effective date of this Act.

If I may be of further assistance, please advise.

Office of Senator Bettye Davis

Explanation of Changes

CS for Sponsor Substitute for Senate Bill 51(L&C), 27-LS0079\I

The Committee Substitute for Sponsor Substitute for SB 51(L&C), 27-LS0079\I returns the language to that of the original draft. It removes from the Sponsor Substitute the recent inclusion of municipal and school property in the definition of "public property." It was determined after diligent inquiry that the inclusion of municipal and school property, particularly school property, would greatly reduce revenues needed in school programs supported by vending revenues.

The intent of SB 51 and language in this Committee Substitute remains to give statutory priority in vending licenses to the blind in state and federal buildings under the current definition of public property which is managed by the Business Enterprise Program in the Division of Vocational Rehabilitation in the Department of Labor and Workforce Development.

MEMORANDUM September 2, 2010

SUBJECT: Bill relating to the operation of vending facilities on public property (Work Order No. 27-LS0079\A)

TO: Senator Bettye Davis
Attn: Tom Obermeyer

FROM: Theresa Bannister
Legislative Counsel

This memo accompanies a draft of the bill described above.

1. Equal protection. Although I had earlier mentioned that the limitation of vending facility license priority to blind persons might raise an equal protection question, I no longer believe that to be the case. Since this appears to be an economic matter, under federal law the scrutiny is minimal; all that is needed is that it needs to be is rationally related to a legitimate state interest, and the selection by the legislature of one type of persons with disabilities (here, blind persons) to receive the benefit does not appear to present a problem.[1] Under state equal protection requirements, as an economic matter, minimum scrutiny merely requires showing that the state's objectives are legitimate and that the legislation bears a substantial relationship to its purpose.[2]

2. Direct notification of blind persons. Can the agency use its vocational rehabilitation records to contact blind persons directly, or are they confidential? How do you want the agency to work with a private organization to contact blind persons directly?

If I may be of further assistance, please advise.

Sec. 23.15.010. Administration of vocational rehabilitation. The commissioner shall administer the vocational rehabilitation program. (§ 37-9-6 ACLA 1949; am § 2 ch 169 SLA 1955; am § 2 ch 144 SLA 1957; am § 1 ch 79 SLA 1960; am § 16 ch 58 SLA 1999)

Sec. 23.15.020. Powers and duties of commissioner. (a) The commissioner may cooperate with a federal agency, as provided and required by federal law for vocational rehabilitation.

(b) The commissioner shall comply with the federal laws and the conditions necessary to secure the full benefit of the federal vocational rehabilitation laws, and shall do all things necessary to entitle the state to receive the benefits of the federal laws.

(c) The commissioner may do all the things and adopt the regulations that are necessary to carry out the federal laws and the purposes of AS 23.15.010 — 23.15.210. (§ 37-9-6 ACLA 1949; am § 2 ch 169 SLA 1955; am § 2 ch 144 SLA 1957; am § 1 ch 79 SLA 1960; am § 17 ch 58 SLA 1999)

Sec. 23.15.030. Appointment of administrative officers. The commissioner may appoint administrative officers and delegate to them the authority necessary to carry out AS 23.15.010 — 23.15.210. (§ 37-9-6 ACLA 1949; am § 2 ch 169 SLA 1955; am § 2 ch 144 SLA 1957; am § 1 ch 79 SLA 1960; am § 18 ch 58 SLA 1999)

Sec. 23.15.040. Division of vocational rehabilitation established. The division of vocational rehabilitation is established under the commissioner to carry out AS 23.15.010 — 23.15.210. (§ 37-9-6 ACLA 1949; am § 2 ch 169 SLA 1955; am § 2 ch 144 SLA 1957; am § 18 ch 208 SLA 1975; am § 19 ch 58 SLA 1999)

Sec. 23.15.050. Director of vocational rehabilitation. The commissioner shall appoint a director of the division of vocational rehabilitation. The director has the

administrative authority delegated by the commissioner and necessary to carry out AS 23.15.010 — 23.15.210 and the regulations and policies adopted by the commissioner. (§ 37-9-6 ACLA 1949; am § 2 ch 144 SLA 1957; am §§ 2, 3 ch 79 SLA 1960; am § 9 ch 96 SLA 1967; am § 19 ch 208 SLA 1975; am § 20 ch 58 SLA 1999)

Sec. 23.15.060. Agreements under Social Security Act. (a) The commissioner may enter into necessary agreements on behalf of the state with the Secretary of Health and Human Services to carry out the provisions of the federal Social Security Act, as amended, and as it is subsequently amended, relating to the making of determinations of disability under Title II and Title XVI of that Act.

(b) The Department of Revenue shall act as the custodian of funds paid by the federal government to the state, shall comply with agreements entered into under the Social Security Act, and shall disburse the funds in accordance with instructions from the director of the division of vocational rehabilitation. (§ 37-9-6 ACLA 1949; am § 2 ch 169 SLA 1955; am § 2 ch 144 SLA 1957; am § 20 ch 208 SLA 1975; am § 1 ch 5 SLA 1978; am § 21 ch 58 SLA 1999)

Cross references. — For federal law relating to eligibility under Titles II and XVI of the Social Security Act, see 42 U.S.C. 422 and 1382.

Sec. 23.15.070. Personnel policies [Repealed, § 84 ch 58 SLA 1999.]

Sec. 23.15.080. Eligibility for vocational rehabilitation service. (a) Vocational rehabilitation service shall be provided directly or through a public or private instrumentality to an individual with a disability who

(1) is a resident of the state at the time of application for the service and whose vocational rehabilitation the agency determines after full investigation can be satisfactorily achieved; or

(2) is eligible for the service under an agreement with another state or with the federal government.

(b) In determining the types and extent of vocational rehabilitation services to be provided to an individual with a disability, the agency shall take into consideration any similar benefits that may be available to the individual under other programs. However, the agency may not take other benefits into consideration when doing so would significantly delay the provision of needed services to the individual with a disability. The agency need not take other benefits into consideration when they are for

(1) diagnostic and related services, including transportation and subsistence in connection with those services;

(2) counseling, guidance, and referral;

(3) training, including personal and vocational adjustment training, and necessary training materials;

(4) services to members of families of individuals with disabilities;

(5) job placement; and

(6) services necessary to assist individuals with disabilities to maintain suitable employment. (§ 37-9-7(1) ACLA 1949; am § 3 ch 144 SLA 1957; am § 2 ch 5 SLA 1978; am § 4 ch 25 SLA 2006)

Effect of amendments. — The 2006 amendment, effective May 10, 2006, substituted "an individual with a disability" for "a handicapped individual" in the introductory language of subsection (a) and twice in the introductory language of subsection (b), and substituted "individuals with disabilities" for "handicapped individuals" in paragraphs (b)(4) and (b)(6).

Sec. 23.15.090. Priority as to eligibility. If vocational rehabilitation service cannot be provided for all eligible individuals with disabilities who apply, the agency shall

provide by regulation for determining the order to be followed in selecting those to whom the services will be provided. (§ 37-9-7(2) ACLA 1949; am § 3 ch 144 SLA 1957; am § 5 ch 25 SLA 2006)

Effect of amendments. — The 2006 amendment, effective May 10, 2006, substituted "individuals with disabilities" for "handicapped individuals."

Sec. 23.15.100. Powers and duties; vending facilities. (a) In carrying out AS 23.15.010 — 23.15.210, the agency shall

(1) take the action it considers necessary or appropriate to carry out the purposes of AS 23.15.010 — 23.15.210 and adopt regulations in conformity with these purposes;

(2) determine the eligibility of applicants for vocational rehabilitation service;

(3) submit to the governor annual reports of activities and expenditures and, before each regular session of the legislature, estimates of sums required for carrying out AS 23.15.010 — 23.15.210 and estimates of the amounts to be made available for this purpose from all sources;

(4) cooperate with public and private departments, agencies, and institutions in providing for the vocational rehabilitation of individuals with disabilities, studying the problems involved in providing this rehabilitation, and establishing, developing, and providing, in conformity with the purposes of AS 23.15.010 — 23.15.210, the programs, facilities, and services that may be necessary or desirable;

(5) survey the potential for providing vending facilities on public property and, when feasible, establish vending facilities operated by blind persons and persons with severe disabilities on public property;

(6) license blind persons and persons with severe disabilities in accordance with AS 23.15.133 for the operation of vending facilities on public property, with blind persons having first priority for operation of the vending facilities;

(7) provide the training and supervision necessary to enable blind persons and persons with severe disabilities to operate vending facilities;

(8) provide the equipment and initial stock necessary to enable blind persons and persons with severe disabilities to operate vending facilities.

(b) In carrying out AS 23.15.010 — 23.15.210, the agency may

(1) enter into agreements with other states to provide for the vocational rehabilitation of residents of the states concerned;

(2) establish and operate rehabilitation facilities and workshops and make grants to public and other nonprofit organizations for these purposes;

(3) supervise the operation of vending stands and other small businesses established under AS 23.15.010 — 23.15.210 to be conducted by individuals with severe disabilities;

(4) make studies, investigations, demonstrations, and reports, and provide training and instruction, including the establishment and maintenance of the research fellowships and traineeships with the stipends and allowances that are considered necessary, in matters relating to vocational rehabilitation; and

(5) adopt regulations necessary for carrying out the provisions of AS 23.15.010 — 23.15.210. (§ 37-9-8(1) (2) ACLA 1949; am § 4 ch 144 SLA 1957; am § 1 ch 75 SLA 1976; am §§ 1, 10 ch 69 SLA 1982; am § 6 ch 25 SLA 2006)

Cross references. — For present law covering the subject matter of former (b)(5) of this section, see AS 23.15.133.

Effect of amendments. — The 2006 amendment, effective May 10, 2006, substituted "individuals with disabilities" for "handicapped individuals" in paragraph (a)(4) and substituted "persons with severe disabilities" for "severely handicapped persons" in paragraphs (a)(5), (a)(6), (a)(7), (a)(8), and substituted "persons with severe disabilities" for "severely handicapped individuals" in (b)(3).

Sec. 23.15.110. Extension of services outside state. Vocational rehabilitation service may be extended to the continental United States to all individuals eligible under

AS 23.15.010 — 23.15.210. The director may place professional or clerical personnel or both inside the continental United States to carry out the purposes of AS 23.15.010 — 23.15.210. (§ 37-9-8(3) ACLA 1949; am § 4 ch 144 SLA 1957; am § 22 ch 208 SLA 1975)

Sec. 23.15.120. Cooperation with federal government. (a) The agency shall cooperate with the federal government in carrying out the purposes of federal laws pertaining to vocational rehabilitation, including the licensing of blind persons to operate vending stands on federal property, and may adopt the methods of administration that are found by the federal government to be necessary for the proper and efficient operation of agreements or plans for vocational rehabilitation. The agency may comply with the conditions that are necessary to obtain the full benefits of the federal laws for the state and its residents.

(b) Upon designation by the governor, the agency may perform functions and services for the federal government relating to individuals under a physical or mental disability, in addition to those provided in (a) of this section. (§ 37-9-9 ACLA 1949; am § 5 ch 144 SLA 1957)

Sec. 23.15.125. Assistive technology loan guarantee and interest subsidy program. (a) An assistive technology loan guarantee fund is established in the agency. The fund consists of money appropriated to it. The agency may solicit and accept available public and private money for distribution from the fund.

(b) Subject to (c) and (d) of this section, the agency may use money in the fund established under this section to guarantee 90 percent of the principal amount of a loan or to subsidize the interest rate of a loan guaranteed by the agency for appropriate assistive technology that is best suited for enabling a person with a disability to

(1) obtain or maintain employment; or

(2) live more independently.

(c) The agency may guarantee a loan or subsidize the interest rate of a loan guaranteed under this section if

(1) the loan is made to a person with a disability or a member of the person's family to obtain assistive technology for the person with a disability within the limitations of (b) of this section;

(2) the loan is originated and serviced by a state or federally chartered financial institution located in the state;

(3) before a loan guarantee or subsidy is requested from a lending institution, the agency determines that the person requesting the loan guarantee or subsidy is not able to obtain the needed assistive technology from a less costly source;

(4) the lending institution determines that the person or the family of a child reasonably can be expected to repay the loan given their expected income or other resources; and

(5) for a loan to modify a vehicle to provide transportation for a person with a disability, the applicant has been steadily employed for the 90 days immediately preceding the date of the loan application.

(d) The director shall establish an assistive technology loan committee within the agency. The committee shall consist of the director, or the director's designee, a representative of a financial institution who is experienced with consumer loans, and at least one but not more than three persons with disabilities. The committee shall

(1) establish guidelines for providing loans under this section, including guidelines relating to the maximum amounts and duration of loans and guidelines to ensure that persons with disabilities who live in rural or remote areas of the state have adequate access to loans under this section;

(2) annually establish the percentage of money in the fund that may be used for subsidizing the interest rates on loans guaranteed under this section; and

(3) make r
program.

(e) In this section,

(1) "assistive technology" means durable equipment, adaptive aids, and assistive devices;

(2) "person with a disability" means an individual having a physical or mental disability. (§ 1 ch 65 SLA 1995; am § 7 ch 25 SLA 2006)

Effect of amendments. — The 2006 amendment, effective May 10, 2006, deleted "a handicapped individual or" preceding "an individual" in paragraph (e)(2).

Sec. 23.15.130. Vocational rehabilitation small business enterprise revolving fund. (a) There is created in the state treasury a revolving fund designated as the vocational rehabilitation small business enterprise revolving fund. The fund shall be administered by the director.

(b) Receipts from the net proceeds of vending facilities on public property, other than vending facilities operated by a licensee, shall be paid into the fund.

(c) The commissioner of administration shall separately account for receipts under (b) of this section that are paid into the vocational rehabilitation small business enterprise revolving fund. The annual estimated receipts of the fund may be used by the legislature to make appropriations to the department to aid licensees in operating vending machine facilities.

(d) In this section "net proceeds" means the gross receipts from operating a vending facility less the costs of operation and a fair return to the operator, to be determined by the agency. (ACLA 1949, § 37-9-10, as enacted by § 6 ch 144 SLA 1957; am § 3 ch 75 SLA 1976; am § 2 ch 69 SLA 1982; am § 45 ch 138 SLA 1986)

Sec. 23.15.132. Vending facilities. (a) A vending facility may not be established on public property that is under the jurisdiction of the state except as authorized by the commissioner.

(b) A vending facility authorized by the commissioner shall be selected and located after consulting with the persons responsible for the maintenance and operation of the property to be served by the vending facility. A contract for the operation of the vending facility by a licensee shall be executed by the agency and must contain provisions ensuring that the licensee shall charge reasonable prices and that the vending facility shall provide high quality merchandise. (§ 3 ch 69 SLA 1982; am § 32 ch 40 SLA 2008)

Effect of amendments. — The 2008 amendment, effective May 23, 2008, deleted "of education and early development" following "commissioner" at the end of subsection (a) and in the first sentence of subsection (b).

Opinions of attorney general. — A coffee/pop fund operated by state employees to purchase coffee and soda pop for themselves is not a "vending facility" within the meaning of this section. April 12, 1988 Op. Att'y Gen.

Sec. 23.15.133. Vendors' licenses. (a) The agency shall issue a license for the operation of a vending facility on public property to a blind person or a person with a severe disability who is a resident of the state at the time of application and who qualifies for a license under

(1) 20 U.S.C. 107 — 107f (Randolph-Sheppard Act); or

(2) regulations adopted by the agency providing for licensing of blind persons or persons with severe disabilities.

(b) A license issued under this section does not expire. However, a license may be revoked if the agency finds that the licensee is not operating the facility in accordance with regulations adopted by the agency. (§ 3 ch 69 SLA 1982; am § 8 ch 25 SLA 2006)

Effect of amendments. — The 2006 amendment, effective May 10, 2006, substituted "a person with a severe disability" for "severely handicapped person" in the introductory language of subsection (a), corrected

a statutory reference in paragraph (a)(1), and substituted "persons with severe disabilities" for "severely handicapped persons" in paragraph (a)(2).

Sec. 23.15.134. Active participation by licensees with severe disabilities. The agency shall adopt regulations that ensure the opportunity for active participation by a licensee with severe disabilities in the administration of vending facilities operated by licensees with severe disabilities. The opportunity for active participation provided under this section must be at least as extensive as the opportunity for active participation provided for a blind licensee under AS 23.15.135. (§ 3 ch 69 SLA 1982; am § 9 ch 25 SLA 2006)

Effect of amendments. — The 2006 amendment, effective May 10, 2006, substituted "licensee with severe disabilities" for "severely handicapped licensee" and "licensees with severe disabilities" for "severely handicapped licensees" in the first sentence.

Sec. 23.15.135. Committee of blind vendors. (a) The Committee of Blind Vendors consisting of all blind licensees is established. The agency shall conduct a biennial election of a president, vice-president, secretary, and treasurer of the committee and may conduct elections to fill vacancies in office at any time.

(b) The commissioner shall assure active participation by the Committee of Blind Vendors in administrative, policy, and program development decisions concerning vending facilities operated by blind licensees. The agency shall, with active participation by the Committee of Blind Vendors,

(1) adopt regulations providing for the licensing of blind persons for the operation of vending facilities on public property;

(2) consider and respond to grievances of blind licensees;

(3) develop and administer a statewide system for the transfer and promotion of blind licensees;

(4) develop training and retraining programs for blind licensees and for blind persons interested in obtaining a license to operate a vending facility;

(5) organize meetings and conferences for blind licensees;

(6) adopt regulations necessary to assure that vending facilities operated by blind licensees are administered by the agency in a substantially equivalent manner whether a vending facility is located on state or federal property;

(7) designate public property as appropriate for the location of a vending facility operated by a blind licensee.

(c) To ensure the opportunity for active participation in decisions that affect the administration of vending facilities operated by blind licensees the agency shall, before each meeting of the Committee of Blind Vendors, provide the committee with written information on matters to be considered. The agency shall provide the committee with reasons in writing for decisions and actions of the agency that do not conform to recommendations submitted by the committee. (§ 3 ch 69 SLA 1982; am § 33 ch 40 SLA 2008)

Effect of amendments. — The 2008 amendment, effective May 23, 2008, deleted "of education and early development" following "commissioner" in the first sentence of subsection (b).

Sec. 23.15.136. Group insurance for certain licensees. The agency shall purchase group insurance coverage under AS 39.30.090 for licensees holding current operating agreements. The employer share of the insurance premium shall be paid from the vocational rehabilitation small business enterprise revolving fund. (§ 1 ch 38 SLA 1990)

Sec. 23.15.140. Vocational Rehabilitation Fund. [Repealed, § 2 ch 23 SLA 1968.]

Sec. 23.15.150. Custodian of funds. The Department of Revenue is designated custodian of all vocational rehabilitation funds in the state. (ACLA 1949, § 37-9-12, as enacted by § 6 ch 144 SLA 1957)

Sec. 23.15.160. Gifts. The commissioner may accept a gift or donation from a public or a private source that is offered unconditionally for carrying out AS 23.15.010 — 23.15.210. The commissioner may accept a conditional gift if, in the judgment of the agency, the conditions are proper and consistent with AS 23.15.010 — 23.15.210. (ACLA 1949, § 37-9-13, as enacted by § 6 ch 144 SLA 1957; am § 3 ch 23 SLA 1968; am § 22 ch 58 SLA 1999)

Sec. 23.15.170. Maintenance not assignable. The right of an individual with a disability to maintenance under AS 23.15.010 — 23.15.210 is not transferable or assignable at law or in equity. (ACLA 1949, § 37-9-14, as amended by § 6 ch 144 SLA 1957; am § 10 ch 25 SLA 2006)

Effect of amendments. — The 2006 amendment, effective May 10, 2006, substituted "an individual with a disability" for "a handicapped individual."

Sec. 23.15.180. Hearings. (a) An individual applying for or receiving vocational rehabilitation who is aggrieved by the action or inaction of the agency is entitled to a fair hearing by the agency, in accordance with regulations.

(b) A blind person or a person with a severe disability aggrieved by a decision or action of the agency under AS 23.15.133 — 23.15.135 shall receive a hearing on request in accordance with AS 44.62.330 — 44.62.630 (Administrative Procedure Act). A blind person may also file a complaint in accordance with 20 U.S.C. 107d-1 for arbitration of a grievance. (ACLA 1949, § 37-9-15, as amended by § 6 ch 144 SLA 1957; am § 4 ch 69 SLA 1982; am § 11 ch 25 SLA 2006)

Effect of amendments. — The 2006 amendment, effective May 10, 2006, substituted "a person with a severe disability" for "severely handicapped person" in the first sentence of subsection (b).

Sec. 23.15.190. Misuse of lists and records. Except for purposes directly connected with the administration of the vocational rehabilitation program and in accordance with regulations, a person may not solicit, disclose, receive, or make use of, or authorize, knowingly permit, participate in, or acquiesce in the use of a list of, names of, or information concerning, persons applying for or receiving vocational rehabilitation, directly or indirectly, derived from the records, papers, files, or communications of the state or an agency of the state, or acquired in the course of the performance of official duties. An officer or employee violating this provision is subject to discharge or suspension. (ACLA 1949, § 37-9-16, as amended by § 6 ch 144 SLA 1957)

Sec. 23.15.200. Limitation on political activity. An officer or employee engaged in the administration of the vocational rehabilitation program may not use official authority to influence or permit the use of the vocational rehabilitation program for the purpose of interfering with an election or affecting the results of an election or for a partisan political purpose. An officer or employee may not solicit or receive, and an officer or employee may not be obliged to contribute or render, a service, assistance, subscription, assessment, or contribution for a political purpose. An officer or employee violating this section is subject to discharge or suspension. (ACLA 1949, § 37-9-17, as amended by § 6 ch 144 SLA 1957)

Sec. 23.15.210. Definitions. In AS 23.15.010 — 23.15.210,

(1) "active participation" means a process through which the Committee of Blind Vendors or a licensee is provided the opportunity to exert a major influence in program

policies, standards, and procedures affecting the operation of vending facilities, with the commissioner having final responsibility;

(2) "agency" means the division of vocational rehabilitation;

(3) "blind person" means a person whose central visual acuity does not exceed [illegible] in the better eye with correcting lenses, or whose visual acuity, if better than [illegible] is accompanied by a limit to the field of vision in the better eye to such a degree that its widest diameter subtends an angle of not greater than 20 degrees; an examination by an ophthalmologist or by an optometrist is necessary before a person is found to be blind;

(4) "director" means the director of the division of vocational rehabilitation;

(5) "individual having a physical or mental disability" means an individual who has a physical or mental condition that materially limits, contributes to limiting, or, if not corrected, will probably result in limiting the individual's activities or functioning;

(6) "individual with a disability" means an individual having a physical or mental disability that for that individual constitutes or results in a substantial barrier to employment and who can reasonably be expected to benefit in terms of employability from the provision of vocational rehabilitation services;

(7) "licensee" means a blind person or a person with a severe disability licensed by the division of vocational rehabilitation under 20 U.S.C. 107 — 107b and 107d — 107f (Randolph-Sheppard Act), AS 23.15.133, and regulations adopted under federal or state law;

(8) "person with a severe disability" means a person who has one or more physical or mental disabilities that seriously limit the person's functional capacities in terms of regular employment and whose vocational rehabilitation requires multiple vocational rehabilitation services over an extended period of time;

(9) "public property" means real or personal property owned or leased by the state or federal government or an agency of the state or federal government;

(10) "vending facility" means a vending machine, cafeteria, snack bar, shelter, cart, or counter where food, tobacco, newspapers, periodicals, and other articles are offered for sale to the general public and dispensed automatically or manually whether prepared on or off the premises; and excludes a facility in a hospital, school, or other institution where food or other articles are offered for sale only to patients, inmates, and persons enrolled in or employed by the institution;

(11) "vocational rehabilitation service" means goods and services, including diagnostic and related services, necessary to enable an individual with a disability to engage in gainful employment;

(12) "workshop" means a rehabilitation facility engaged in a production or service operation that is operated for the primary purpose of providing gainful employment or professional services to persons with disabilities as an interim step in the rehabilitation process for those who cannot readily be absorbed in the competitive labor market or during times when employment opportunities for them in the competitive labor market do not exist. (§ 37-9-5 ACLA 1949; am § 1 ch 169 SLA 1955; am § 1 ch 144 SLA 1957; am § 23 ch 208 SLA 1975; am § 2 ch 75 SLA 1976; am §§ 3-6 ch 5 SLA 1978; am §§ 5-8 ch 69 SLA 1982; am § 84 ch 58 SLA 1999; am § 12 ch 25 SLA 2006; am § 34 ch 40 SLA 2008)

Revisor's notes. — This section was reorganized in 1984 to place the defined terms in alphabetical order.

Effect of amendments. — The 2006 amendment, effective May 10, 2006, substituted "not greater" for "no greater" in paragraph (3), substituted "individual with a disability" for "handicapped individual" and "barrier" for "handicap" in paragraph (6), substituted "blind person or a person with a severe disability" for "blind or severely handicapped person" in paragraph (7), inserted paragraph (8), deleted former paragraph (10) which defined "severely handicapped person," substituted "an individual with a disability" for "a handicapped individual" in paragraph (11), substituted "persons with disabilities" for "the handicapped" in paragraph (12), and renumbered paragraphs to properly reflect alphabetical order.

The 2008 amendment, effective May 23, 2008, deleted "of education and early development" following "commissioner" in paragraph (1).

Opinions of attorney general. — A coffee/pop fund operated by state employees to purchase coffee

and soda pop for themselves is not a "vending facility" within the meaning of AS 23.15.132. April 12, 1988 Op. Att'y Gen.

Action under Americans with Disabilities Act (42 U.S.C.A. §§ 12101 et seq.), to remedy alleged harassment or hostile work environment. 162 ALR Fed. 603.

Sec. 23.15.230. Appointment of committee. The governor shall appoint the members of the State Vocational Rehabilitation Committee for staggered terms not exceeding three years. The composition of the committee must be consistent with the requirements of 29 U.S.C. 725 and 3003, as amended. A member may be reappointed, and a vacancy shall be filled by the governor. (§ 2 ch 23 SLA 1960; am § 5 ch 168 SLA 1990; am § 2 ch 57 SLA 2010)

Cross references. — For transitional provision relating to the continued service of members of the former Governor's Committee on Employment of People with Disabilities as members of the State Vocational Rehabilitation Committee, as the committee is recomposed under this section, see § 5, ch. 57, SLA 2010, in the 2010 Temporary and Special Acts.

Effect of amendments. — The 2010 amendment, effective June 10, 2010, rewrote the section.

Sec. 23.15.240. Selection and term of chair. The members of the committee shall select a chair from among the voting members of the committee, subject to disapproval by

LEGISLATIVE RESEARCH REPORT

SEPTEMBER 27, 2010

REPORT NUMBER 11.032

BUSINESS ENTERPRISE PROGRAM FOR THE BLIND

PREPARED FOR SENATOR BETTYE DAVIS

BY TIM SPENGLER, LEGISLATIVE ANALYST

You asked how many states are in compliance with the federal Randolph-Sheppard Act, which provides employment opportunities for blind individuals through the establishment and operation of vending facilities on federal property.[1] Additionally, you wanted to know the results of a 2008 federal audit of the Alaska Division of Vocational Rehabilitation, Business Enterprise Program, regarding the state's compliance with the act. Briefly, only Wyoming is not in compliance with the act and Alaska has yet to receive results from the 2008 audit.

Through the Randolph-Sheppard Act programs, individuals who are blind are given priority in the contracting for vending facilities on federal property. Typically, blind individuals who receive Randolph-Sheppard contracts act as managers of vending facilities, subcontracting with food service organizations to provide meals and/or vending services on a day-to day basis. Administered by state licensing agencies through the U.S. Department of Education's Rehabilitation Services Administration, Randolph-Sheppard Act programs are often labeled "business enterprise programs," as is the case in Alaska.

Alaska's Business Enterprise Program includes both the Randolph-Sheppard component and a similar state-created program, which was initiated with the Chance Act of 1976.[2] The Chance Act created a program similar to the Randolph-Sheppard Act but for blind *and* severely disabled individuals on *state and other property.* As of October 2009, Alaska's Business Enterprise Program had six sites operating in federal facilities, under Randolph-Sheppard, and six sites operating in state facilities, under the Chance Act. We include, as Attachment A, details on these 12 operations.[3]

Daniel Fry, management and program specialist, Randolph-Sheppard Programs, U.S. Department of Education, Rehabilitation Services Administration (RSA), informs us that while Randolph-Sheppard programs are not mandatory, every state except Wyoming chooses to participate.[4] Mr. Fry relates that

---

[1] Public Law (P.L.) 74-732, as amended by P.L.83-565, and P.L. 93-516; 20 USC 107 et seq.

[2] Section 1 ch 75 SLA 1976. AS 23.15.100 through 23.15.210 pertain to blind and severely disabled vendors.

[3] A 13th vending site—at the Palmer Hospital—has been added to the programs within the last year.

[4] Daniel Fry, management and program specialist, Randolph-Sheppard Programs, U.S. Department of Education, Office of Special Education and Rehabilitation Services, Rehabilitation Services Administration, can be reached at (202) 245-7308.

state programs are periodically audited by the RSA and a number are working on some form of improvement plan, based on RSA recommendations.[5]

The Rehabilitation Services Administration, in June of 2008, audited by conducting an on-site review, the State of Alaska's Business Enterprise Program. To date, however, Alaska has not received the results of the audit. Mr. Fry acknowledges that his agency has been unable to complete reviews in a timely fashion due to a large backlog of audits coupled with staffing shortages. He informs us that the RSA (now nearly fully staffed) is uncertain at this juncture when or if Alaska will receive a report regarding the 2008 audit. The agency may wait until Alaska is next audited (Mr. Fry was unable to estimate when this would occur) to produce a written report.

Mr. Fry suggests that if a dispute arises on a particular Randolph-Sheppard issue, an individual could contact his or her state's program coordinator to see if a resolution can be achieved. In Alaska, Pamela Geary is the business enterprise program coordinator.[6] If such an intervention does not prove successful, and there is evidence of an egregious breach of the Randolph-Sheppard Act, the RSA can be contacted and may become involved.

For another perspective, we contacted Mark Maurer, president of the National Federation of the Blind (NFB).[7] Mr. Mauer concurs with Mr. Fry that Wyoming is the only state without a Randolph-Sheppard Act program, and that states are often in the process of tweaking their programs to increase effectiveness. He is unaware of any major issues regarding Alaska's program during his 23 years as president of the NFB.

We hope you find this information to be useful. Please let us know if you have questions or need additional information.

[5] According to Mr. Fry, there is no federal provision that speaks to a blind individual being a vendor in multiple locations, which was of interest to you.

[6] Pamela Geary, Alaska's BEP coordinator, can be reached at (907) 269-3568. We spoke with Mark Dale, administrative manager for vocational rehabilitation, and Ms. Geary's supervisor. He asserts that the state is operating its program in a prudent, fair, and efficient way. Mr. Dale will send us a copy of any federal audit report that the program receives, which we will then pass along to your office.

[7] Mark Maurer, president, National Federation of the Blind, can be reached at (410) 659-9314.

America's blind unemployment stands at 70 percent Advocates blame

Journal Record, The (Oklahoma City), Jul 6, 1999 by Lori Johnston Associated Press

ATLANTA -- In a labor market so tight that many employers are begging for workers, 70 percent of blind Americans who want a job can't find one, and advocates blame discrimination, a drop in Braille literacy and, perhaps most important, the computer mouse.

While the nation's overall unemployment rate is at a 29-year low of 4.2 percent, the level of joblessness among the blind has remained stagnant for about a decade, according to the U.S. Labor Department.

"The Americans with Disabilities Act seems to have had no impact on this," said Barbara Pierce, spokeswoman for the National Federation of the Blind at the group's annual convention in Atlanta. The act, passed in 1990, bans discrimination based on disability and requires employers to take "reasonable" steps to accommodate disabled people.

In addition to the 70 percent of the blind who are unemployed, 30 percent of those who are working are considered underemployed in relation to their qualifications, according to the Labor Department.

Over the years, technology has made things much easier for blind people. Converting text to Braille, once a painstaking process, can now be done by computers, and some office equipment is available with Braille-embossed buttons.

But other technology has hurt the employment chances of the 750,000 blind Americans.

Many blind people once worked as receptionists, taking dictation and answering the phone for managers and executives.

But voice mail and e-mail have changed the job description, requiring more computer skills.

And software that requires the user to move around the screen with a mouse and click on icons is nearly impossible for blind people to learn.

Peg Halverson, who has been out of a job for the past two years, said she could use software that includes graphics if someone would put it in a blind-friendly format that relies mostly on keystroke commands and speaks out loud to the user to alert him or her to what is on the screen.

"I want to be employed. I want to contribute to society," said Halverson, 44. "I'm thinking, `I have a business degree, I have basically 20 years of administrative experience, and I can't even get a customer service job.'"

Pierce said software makers that convert point-and-click programs so that the blind can use them are a couple of years behind the rest of the fast-moving computer industry.

Advocates said another problem has been a decline in the number of blind children learning Braille. During the past 30 years, the percentage of blind children learning Braille in the United States has fallen from about 50 percent to less than 10 percent, according to the federation.

The reason: a push during the past two decades to get blind children out of special schools and "mainstream" them with other youngsters.

The federation backs mainstreaming, but according to Ms. Pierce, many school systems saw it as a chance to cut costs by hiring fewer teachers for disabled students and rolling back Braille instruction to only once or twice a week.

Another big obstacle for blind people trying to find jobs is employers' attitudes, advocates said. Many managers think blind people are helpless and can't be effective workers. "This is pity- based discrimination," Pierce said.

Advocates said there is technology to help the blind in many jobs.

Some companies may balk when told that a blind employee will require a $3,000 Braille embosser that works like a computer printer that would cost less than $500. However, Ms. Pierce said, there are state, federal and private programs that help employers pay for such equipment.

At the convention, blind people are attending workshops on writing resumes, interviewing and dealing with discrimination.

Lynn Mattioli, a hospital dietitian in Baltimore, said she doesn't try to avoid the subject of her blindness during job interviews. Instead, she tells employers exactly how she proposes to overcome her disability and get the job done.

Employment Statistics for People Who Are Blind or Visually Impaired: U.S.

This document is being archived because the information it contains is not recent data and may be outdated. See Featured Resources for Employment Statistics for the most recent employment data pertaining to people with vision loss.

What are these statistics?

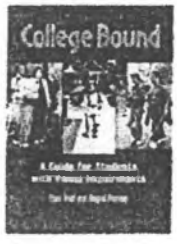
This set of statistics starts with the broadest grouping as background, that is, the entire U.S. population. It then narrows down, step by step, to focus on the employment status of relevant groupings of people who are blind (legally blind); those who are visually impaired (other people with serious difficulty seeing that cannot be corrected with ordinary glasses); and, for comparison, the general public with no serious visual or other impairment. Also shown are statistics for broad age groups *within* the vision groupings.

Where are these statistics from?

Most of the data come from a 1994-95 national survey conducted by the federal government's National Center for Health Statistics. That study provides details about employment status of legally blind and other visually impaired adults that are not available from other national studies. The specific definitions and methods of the study are explained in a report by AFB research staff (Kirchner et al., 1999).

How are the statistics organized here?

Each numbered set, from 1 to 10, deals with a different grouping. For example, one set refers to blind and visually impaired people grouped together, whereas another set refers only to people who are legally blind and the next set refers only to people who are visually impaired, excluding those who are legally blind.



Within each set—starting with #4—the lettered items differ by referring, A, to the number and percentage of people who *are* employed, and B, to the number and percentage who are *not* employed.

The employment data are also provided in a question and answer format. The questions and answers section follows after the numbered items.

7 to 10 million (1994-5).

2. B. Estimated number of blind & visually impaired people who live in households (i.e., *excluding* institutionalized and homeless) of all ages

6 to 8 million (1994-5).

Note: Only people who live in households, including those who live alone, are covered by surveys used for statistics on employment. The range of estimates exists because various national studies use different definitions and methods.

3. Estimated number and percentage of household-based blind & visually impaired people who are of working age, defined as 18 through 69 years old

About 2 to 3 million (1994-95) or 35-40% of all blind & visually impaired household-based people.

4. A. Employed: estimated number and percentage of working age (18 to 69 years old) blind & visually impaired people who are employed

1 to 1.3 million people or 40-45% (1994-95).

4. B. Not Employed: estimated number and percentage of working age (18 to 69 years old) blind & visually impaired people who are not employed

1 to 1.7 million people or 55-60% (1994-95).

5. A. Employed: estimated number and percentage of legally blind people of working age (18 to 69 years old) who are employed

About 160,000 people or 30% (1994-95).

5. B. Not employed: estimated number and percentage of legally blind people of working age (18 to 69 years old) who are not employed

About 375,000 people or 70% (1994-95).

6. A. Employed: estimated number and percentage of visually impaired (excluding legally blind) people of working age (18 to 69 years old) who are employed

About 1.1 million people or 45% (1994-95).

6. B. Not employed: estimated number and percentage of visually impaired (excluding legally blind) people of

working age (18 - 69 years old) who are not employed

About 1.4 million people or 55% (1994-95).

7. A. Employed: estimated number and percentage of blind & visually impaired people of working age, by age category, who are employed:

- Ages 18 through 54 years—About 868,000 people or 54% (1994-95)
- Ages 55 through 69 years—About 217,000 people or 22% (1994-95)

7. B. Not employed: estimated number and percentage of blind & visually impaired people of working age, by age category, who are not employed:

- Ages 18 through 54 years—About 740,000 people or 46% (1994-95)
- Ages 55 through 69 years#8212;About 769,000 people or 78% (1994-95)

8. A. Employed: estimated number and percentage of legally blind people of working age, by age category, who are employed:

- Ages 18 through 54 years—About 145,000 people or 42% (1994-95)
- Ages 55 through 69 years—About 17,000 people or 9% (1994-95)

8. B. Not employed: estimated number and percentage of legally blind people of working age, by age category, who are not employed:

- Ages 18 through 54 years—About 200,000 people or 58% (1994-95)
- Ages 55 through 69 years—About 171,000 people or 91% (1994-95)

9. A. Employed: estimated number and percentage of visually impaired people (excluding legally blind) of working age, by age category, who are employed:

- Ages 18 through 54 years—About 733,000 people or 59% (1994-95)
- Ages 55 through 69 years—About 149,000 people or 20% (1994-95)

9. B. Not employed: estimated number and percentage of visually impaired people (excluding legally blind) of working age, by age category, who are not employed:

- Ages 18 through 54 years—About 509,000 people or 41% (1994-95)
- Ages 55 through 69 years—About 598,000 people or 80% (1994-95)

10. A. Employed: estimated number and percentage of the general population with no serious impairments, of working age, who are employed:

- Ages 18 through 54 years—About 97,649,000 people or 82% (1994-95)
- Ages 55 through 69 years—About 1,453,000 people or 54% (1994-95)

10. B. Not employed: estimated number and percentage of the general population with no serious impairments, of working age, who are not employed:

- Ages 18 through 54 years—About 21,435,000 people or 18% (1994-95)
- Ages 55 through 69 years—About 9,756,000 people or 46% (1994-95)

Employment Statistics Questions and Answers

What percentage of working-age adults who are visually impaired (not including those who are legally blind) are employed in the U.S.?

Please note that this older estimate is provided pending the availability of more current information. In 1994-95, approximately 46% of working-age adults (ages 18-69) who were visually impaired but not legally blind were employed.

Definition and scope: This estimate includes adults aged 18-69 years, who have a vision loss with a visual acuity better than 20/200, and a visual field of better than 20 degrees.

Data source: National Center for Health Statistics (1998), National Health Interview Survey--Disability Supplement, 1994-95, www.cdc.gov/nchs/nhis.htm.

What percentage of working-age adults who are legally blind are employed?

Please note that this older estimate is provided pending the availability of more current information. In 1994-95, approximately 32% of working-age adults who were legally blind were employed.

Definition and scope: This estimate included adults 18-69

years of age who were legally blind. Legal blindness is a level of vision loss that has been defined by law to determine eligibility for benefits. It refers to central visual acuity of 20/200 or less in the better eye with the best possible correction, or a visual field of 20 degrees or less.

Data source: National Center for Health Statistics (1998), National Health Interview Survey--Disability Supplement, 1994-95, www.cdc.gov/nchs/nhis.htm. For further information, see Kirchner, C., Schmeidler, E., & Todorov, A. (1999). Looking at employment through a lifespan telescope: Age, health, and employment status of people with serious visual impairment. Mississippi State: Mississippi State University, Rehabilitation Research and Training Center on Blindness and Low Vision.

When age is taken into account, what percentage of working-age adults who are visually impaired (not including those who are legally blind) are employed in the U.S.?

Please note that this older estimate is provided pending the availability of more current information. In 1994-95, over three-fifths of visually impaired individuals in the "prime working years" of 22-50 years old were employed. About two-fifths of those 50-59 years old, and one-fifth of those 60 and older, were employed.

Definition and scope: This estimate includes adults aged 18-69 years, who have a vision loss with a visual acuity better than 20/200, and a visual field of better than 20 degrees.

Data source: National Center for Health Statistics (1998), National Health Interview Survey--Disability Supplement, 1994-95, www.cdc.gov/nchs/nhis.htm. For further information, see Kirchner, C., Schmeidler, E., & Todorov, A. (1999). Looking at employment through a lifespan telescope: Age, health, and employment status of people with serious visual impairment. Mississippi State: Mississippi State University, Rehabilitation Research and Training Center on Blindness and Low Vision.

When age is taken into account, what percentage of legally blind adults are employed?

Please note that this older estimate is provided pending the availability of more current information. In 1995, almost one-half of legally blind individuals in the 22-50-year-old range were employed. By contrast, fewer than one-quarter of legally blind people ages 50-59 years, and one-tenth of those older than 60 years, were employed.

Definition and scope: This estimate included adults 18-69 years of age who were legally blind. Legal blindness is a level of vision loss that has been defined by law to determine eligibility for benefits. It refers to central visual acuity of 20/200 or less in the better eye with the best

possible correction, or a visual field of 20 degrees or less.

Data source: National Center for Health Statistics (1998), National Health Interview Survey--Disability Supplement, 1994-95, www.cdc.gov/nchs/nhis.htm. For further information, see Kirchner, C., Schmeidler, E., & Todorov, A. (1999). Looking at employment through a lifespan telescope: Age, health, and employment status of people with serious visual impairment. Mississippi State: Mississippi State University, Rehabilitation Research and Training Center on Blindness and Low Vision.

What is the explanation for the discrepancy in the rates of employment between younger (ages 22-50) and older (ages 50-59) visually impaired and legally blind working-age adults?

The lower employment rates for older adults raise the following possibilities:

1. The younger workers have had better access to education.
2. There is age discrimination against older workers.
3. There are more economic disincentives to employment for those closer to retirement age.
4. Adults who have lost their vision late in life have fewer of the skills they would need as employees to cope with their visual impairments.
5. Health problems that might prevent employment increase with age.

Definition and scope: This explanation included adults 18-69 years of age with vision loss, including those who are legally blind. The term vision loss refers to individuals who are visually impaired and, thus, have trouble seeing, even when wearing glasses or contact lenses. These visually impaired individuals have a visual acuity better than 20/200, and a visual field of better than 20 degrees. The term vision loss also refers to individuals who are legally blind or unable to see at all. Legal blindness is a level of vision loss that has been defined by law to determine eligibility for benefits. It refers to central visual acuity of 20/200 or less in the better eye with the best possible correction, or a visual field of 20 degrees or less.

Data source: National Center for Health Statistics (1998), National Health Interview Survey--Disability Supplement, 1994-95, www.cdc.gov/nchs/nhis.htm. For further information, see Kirchner, C., Schmeidler, E., & Todorov, A. (1999). Looking at employment through a lifespan telescope: Age, health, and employment status of people with serious visual impairment. Mississippi State: Mississippi State University, Rehabilitation Research and Training Center on Blindness and Low Vision.

When health is taken into account, how does it affect the rates of employment among visually impaired and blind working-age adults?

Health has a major effect on rates of employment. For visually impaired adults under the age of 55, of those who were in "excellent" or "very good" health, 83% were employed, the same as the percentage for sighted adults. If, however, visually impaired adults under age 55 were in "poor" health, only 20% were employed.

The situation is similar for legally blind adults. Of those under 55 years old who reported "excellent" health, 60% were employed, in comparison to a 5% employment rate for those in "poor" health.

Please note that this older estimate is provided pending the availability of more current information.

Definition and scope: This explanation included adults 18-69 years of age with vision loss, including those who are legally blind. The term vision loss refers to individuals who are visually impaired and, thus, have trouble seeing, even when wearing glasses or contact lenses. These visually impaired individuals have a visual acuity better than 20/200, and a visual field of better than 20 degrees. The term vision loss also refers to individuals who are legally blind or unable to see at all. Legal blindness is a level of vision loss that has been defined by law to determine eligibility for benefits. It refers to central visual acuity of 20/200 or less in the better eye with the best possible correction, or a visual field of 20 degrees or less.

Data source: National Center for Health Statistics (1998), National Health Interview Survey--Disability Supplement, 1994-95, www.cdc.gov/nchs/nhis.htm. For further information, see Kirchner, C., Schmeidler, E., & Todorov, A. (1999). Looking at employment through a lifespan telescope: Age, health, and employment status of people with serious visual impairment. Mississippi State: Mississippi State University, Rehabilitation Research and Training Center on Blindness and Low Vision.

What is the explanation for the discrepancy in the rates of employment between individuals who are blind or visually impaired and those who are sighted?

Seventy-four percent of the sighted working-age public are employed, compared to approximately 46% of working-age adults who are blind or visually impaired. However, the sighted public, as a group, is both younger and in better health than are people who are visually impaired or legally blind, and these two factors have major effects on rates of employment. Please note that the older estimate this explanation is based upon is provided pending the availability of more current information. More current information most likely resembles these older employment estimates.

Definitions

Legal Blindness is a clinical measure that, in the U.S., means a person's central visual acuity is 20/200 or less in

the better eye, when using the best correction that can be provided by ordinary eyeglasses, or he/she has a visual field of 20 degrees or less.

For the data used here, survey respondents reported if they were legally blind, after having responded "Yes" when asked whether they have "serious difficulty seeing, even with glasses." Others with "**serious visual impairment**" were respondents who answered "yes" to the question about serious difficulty seeing, and "no" to legal blindness.

"**Employment**" is based on responses to a survey question asking whether the person had worked at a job or business in the two weeks prior to the interview, or—for those who said "no"—whether they had a job but were on vacation, sick or on layoff. "**Not employed**" includes people who were actively looking for work as well as those who, for various reasons, were not actively looking for work, although they may have been interested in working.

Unemployment Rates and Reasons Dissing the Blind

by James S. Nyman

From the Editor: The following remarks were delivered by Dr. James Nyman at the annual White Cane Banquet of the Omaha Chapter of the National Federation of the Blind of Nebraska, Saturday, November 8, 2008. After teaching for a number of years at the university level, Jim Nyman became director of Nebraska Services for the Blind in 1974, a post in which he continued until his retirement in 1998. He reports the first Federationist he met was Jacobus tenBroek. Here are Dr. Nyman's remarks:

In 1994, on our way to visit a friend in South Africa, my wife and I stopped over for a day in Athens. I had looked forward for a long time to visiting this birthplace of western philosophy. Shortly before we arrived there, some Greek archeologists announced they believed they had excavated the prison cell where Socrates had died after drinking a cup of hemlock, a poisonous concoction derived from the hemlock plant. He had been condemned to death for corrupting the youth of Athens by seeking the truth. With some difficulty we found the excavation site on Mount Phillipapou, and I had my wife photograph me standing where Socrates died for the truth. Socrates had discovered that the search for truth sometimes leads into the dens of politics with, in his case, deadly consequences. It has been said that, in politics, truth is often the first casualty. Well, tonight I hope to rescue truth from the hazards of politics but still find it in a topic that is vitally important to blind persons. Unless I am singularly lucky, I may find myself following in the footsteps of Socrates, treading on the same dangerous ground. When I conclude my remarks, don't be offended if I decline any beverage you may offer me.

What is this truth I am seeking? You will probably have guessed that it has something to do with the unemployment rate for blind people. You would be right in part, but I will also be looking for the reasons that explain that rate--whatever it turns out to be. I have to confess up-front that I don't have a definite answer to either question. We have all heard that the unemployment rate for blind people is 70 percent or more. We have heard that percentage repeated many times, and it has achieved the status of a great truth. This is a shocking number, and it may be that the shock itself puts it beyond questioning. If repetition is the measure of truth, we may already have found what I said I was seeking. On the other hand, we might be well advised to heed the ironic caution of a very wise philosopher named Ludwig Wittgenstein, who suggested that this procedure is, "As if someone were to buy several copies of the morning paper to assure himself that what it said was true."

If we can't rely on repetition as the measure of truth, we will have to adopt some other method in the search. The nineteenth-century British statesman Benjamin Disraeli observed that there are three kinds of lies: lies, damned lies, and statistics. If I were to suggest that the repeated claim of a 70 percent unemployment rate is either a lie or a damned lie, I suspect I would have very quickly passed

from the search for truth into the realm of politics and the cup of hemlock would have been handed to me forthwith. So I suppose I will have to fall back on statistics to pursue the truth.

We can start with some official statistics. Each month the U. S. Department of Labor issues a report on the unemployment rate for the previous month. Over the past few years that rate has ranged from 4.2 percent to 6.1 percent. If we accept 70 percent as an accurate figure for the unemployment rate of blind people, the ratio between the Labor Department rate for the general population and the claimed rate for the blind would be anywhere from 11.5 to 16.7 times higher for the blind. In Nebraska the unemployment rate has hovered around 3.5 percent for the past few years, so the ratio would be about twenty times higher in our state. Typically, when individuals and organizations invoke the much higher rate for the blind, it is either implicitly or explicitly equated with the official unemployment rate. Before we can accept this identification, we need to know what the official rate involves.

The concept appears to be simple enough: "Unemployment rate means the ratio of unemployed to the total civilian labor force expressed as a percent." It gets a bit more complicated when we explore the meaning of some of the terms that go into this computation. The Department provides definitions for five terms that are involved:

1. civilian noninstitutional population includes everyone over sixteen except those in institutions and the military;
2. the civilian labor force includes everyone in the civilian population who is either employed or unemployed;
3. employed means working as an employee or in a business, farm, or profession;
4. unemployed is anyone who is available for work and has made specific efforts to obtain a job; and
5. unemployment rate is the percentage of unemployed persons in the labor force.

To simplify and clarify: the civilian labor force is the fraction of the civilian noninstitutionalized population who are either employed or unemployed. At the end of 2007 this was 62.8 percent. In order to be included in the calculation of the unemployment rate, an individual must meet four requirements: he or she must first be sixteen years or older; second, have no employment; third, be available for work; and fourth, have made specific efforts to find employment during the period of reporting. When it is claimed that 70 percent of blind people of working age are unemployed, are we asserting that seven out of every ten blind people satisfy these four requirements of the Labor Department's strict meaning of unemployed, within the civilian labor force? If not, we need to find a more illuminating way to express the shocking truth about the low level of participation of the blind in remunerative employment.

An initial formulation that does not rely on the guidelines for statistical reporting might read: "Seventy percent of people over sixteen who are blind in the civilian noninstitutionalized population are not currently employed. This formulation suggests that 30 percent of blind people of working age are, in fact, employed and are therefore counted in the civilian labor force. This contrasts with the 62.8 percent of the overall civilian population who were in the labor force at the end of 2007. This rate of participation is approximately double that of the blind. What of the 70 percent who are claimed as unemployed?

A glance at statistics for the civilian population helps to illuminate the question. By simply subtracting the 62.8 percent from the total civilian population, we are left with 37.2 percent who are not presently in the labor force. We can reasonably assume that, due to medical and age-related complications associated with blindness in addition to the usual reasons, blind people are absent from the civilian labor force at a somewhat higher rate than that of the general population. Those reasons include such factors as continued education, especially in the younger age range; family

responsibilities; early retirement; disinclination to work; discouragement during job-seeking; and, for a fortunate few, sufficient wealth to eliminate the need for remunerative employment.

Given that 30 percent of blind people are employed and more than 37.2 percent are simply absent from the labor force, we can now ask what percentage can be counted as unemployed. We can only speculate, but 32.8 percent is the absolute maximum and not the 70 percent that is claimed. If we employed the same formula to compute the Department of Labor official unemployment rate as advocates use to calculate the 70 percent figure, we would arrive at the startling conclusion that the monthly unemployment rate had fluctuated between 41.4 percent and 43.3 percent rather than the 4.2 percent and 6.1 percent that has been reported. This, of course, includes the 37.2 percent of the civilian population who simply did not work. One can just imagine the shock waves that would run through Wall Street and the political world if this were reported. Nevertheless, the method used to arrive at this figure would be precisely parallel with that used by advocates to calculate the 70 percent unemployment rate for the blind; that is, it includes all those who are absent from the labor force by choices unrelated to work.

Combining the 30 percent of employed blind persons and the 37.2 percent or more of those absent from the labor force, we arrive at a figure of more than 67.2 percent of those who cannot be counted as unemployed. Less than 32.8 percent appears to be the remainder. Is this, then, the true unemployment rate of the blind? If we now return to the Labor Department statistical reporting standard, the answer will have to be no.

What is the status of this lower percentage? You will recall that, in order to meet the strict standards of the Department of Labor, individuals are counted as "unemployed" only if they are not employed, as defined but "had made specific efforts to find employment." They must also be available for employment, but I will address the question of availability a bit later in my remarks. Meanwhile, for present purposes, "specific efforts to find employment" can include a set of activities as minimal as checking job listings in the local newspaper or on some Internet site, following up on an employment lead, arranging an interview, sending out a résumé, making a cold call, conferring with a rehabilitation counselor, checking with friends and acquaintances in a network of associates, participating in a job training program at a community college, or attending a job fair. While some of this activity will be recorded in documents of one sort or another, it is otherwise a matter of conjecture what portion of these individuals has engaged in one or more of the "specific efforts" enumerated. A full 100 percent would be a generous estimate. Anything less than that would further reduce the percentage who could be counted as unemployed, even under the looser guidelines.

Since being available for employment is one of the Labor Department's criteria for being counted as unemployed, when medical complications and age are considered, the number of blind people who are available for employment is further diminished. While age and medical conditions are not an absolute bar to employment, we know that a higher proportion of the blind experience these additional complications. I cannot quantify the impact of these factors on employment statistics, but the effect is to reduce the unemployment rate significantly below the 32.8 percent that I said was the absolute maximum. If I were not a very modest man, I think I might claim at this point that I had, in the span of a few minutes, cut the unemployment rate for the blind by more than one half. But, it will take more than statistical wizardry to make a substantive difference in the lives of those who fall into the ranks of the unemployed. While it may be politically less dramatic than 70 percent, even the lower percentage is unacceptably high. The lower number, however, should allow us to focus on the fact that it is not a global percentage that we need to reduce, but rather the lives of many individuals that we need to improve.

To recapitulate the analysis: 30 percent of the blind of working age are employed, and around 40 percent are neither seeking employment nor available for work, so that 30 percent or fewer are technically unemployed. This change of perspective should permit us to focus our attention on the particular factors that explain the unacceptably low rate of participation in the labor force. It puts us in a better position to formulate individual plans and general policies to attack the problem.

Dissing the Blind

For simplification I have identified a half dozen factors that, singly or in some combination, are involved in most cases of unemployment. Since each of these factors begins with the three letters D-I-S, I call this "Dissing the blind." Thus we have 1. discrimination, 2. disincentives, 3. distance, 4. discouragement, 5. disinclination, and 6. disability. We can only hope that the complexity of particular situations will not leave us in the position of the unfortunate centipede in the poem:

The centipede was happy quite,
Until the toad, in fun, said, "Pray:
Which leg comes after which?"
Which brought its mind to such a pitch,
It lay distracted in a ditch.

1. Discrimination: As blind people we are fortunate if we get from one end of a day to the other without experiencing some form of discrimination. It is a pervasive phenomenon with many manifestations. Any time we confront some form of differential treatment, even if it is intended to benefit us, it reflects an underlying attitude that places us in a class outside ordinary membership in the human community. No single approach can effectively cope with the many forms that discrimination takes. The National Federation of the Blind has evolved many strategies to reduce or eliminate the impact of this differential treatment by legislation, litigation, and public education.

Obtaining legislative action has proved relatively easy over the past forty years with the adoption of White Cane Laws in most states and passing of civil rights legislation at the federal level with Section 504 of the 1973 Rehabilitation Act, the Americans with Disabilities Act, and laws pertaining to the education of disabled children enacted in the past thirty years. Unfortunately, the mechanisms enforcing these laws are so cumbersome and lawyer-driven that blind and otherwise disabled people are fortunate if the resolution of particular cases isn't posthumous or doesn't extend into old age. Court rulings have so diminished the value of antidiscrimination laws that Congress found it necessary to adopt and the president to sign the Americans with Disabilities Amendment Act to return to the original intent of the law. Ironically, a constitutional amendment in Nebraska, the Civil Rights Initiative, intended to end both preferential treatment and discrimination, in its very language discriminates against the disabled. The operative section of the proposition reads: "The state shall not discriminate against, or grant preferential treatment to, any individual or group on the basis of race, sex, color, ethnicity, or national origin in the operation of public employment, public education, or public contracting." It is far from clear what this language means, but one thing is evident: disabilities do not even merit a mention in the enumeration of classes of affected people.

Clearly it is not easy to change a whole culture and the attitudes that govern behavior toward disabled people. Optimists may claim that over the past half century great strides have been made, but evidence for this claim is fragmentary at best. Persuasion and occasional favorable rulings can resolve individual cases in employment, education, and access to public benefits, but discrimination is a continuing reality that blind individuals and the blind as a group must confront.

Forty years ago, when I was seeking employment as a college teacher, I recall at least two rejection letters that flatly stated that a blind person could not manage the responsibilities of a faculty member.

We are not likely to encounter such open declarations in today's atmosphere of social consciousness, but the more subtle forms are probably more difficult to combat. Because those who discriminate rarely leave a trail of evidence to document the discrimination, it is difficult to quantify the scale of actual discrimination. One thing is certain: the accumulation of anecdotal evidence cannot all be dismissed as the product of a paranoid imagination. The National Federation of the Blind, by public education, legislation, litigation, negotiation, and innovation, has succeeded in having some of the barriers to employment identified and lowered. Unfortunately, barriers have proved more amenable to modification than the underlying attitudes that lead to their erection in the first place.

2. Disincentives: In 1968, when we organized a new affiliate of the National Federation of the Blind in Illinois, I served as the legislative representative, becoming an official registered lobbyist in the state. One of the first undertakings I carried out was to write a letter to all the members of the Illinois Congressional delegation, urging them to support an increase in the earnings allowance for blind recipients of Social Security Disability Insurance (SSDI). The NFB has long argued that restrictions in the earnings limitations discouraged blind people from seeking employment since, when the limit was reached, recipients would experience a sudden drop in income and loss of medical benefits.

The more things change, the more they stay the same. When Supplemental Security Income (SSI) was implemented in 1974, an even more restrictive earnings limitation was applied. Until 1996 the earnings limitation for blind SSDI recipients was linked to those for Social Security recipients between the ages of sixty-five and seventy. In that year that coupling was eliminated, and, while the earnings limits increased at an accelerated rate for older people, it lagged significantly for the blind. In 2008 this disparity is between $18,840 for the blind and $36,120 for older people: a total of $17,280, or $1,440 a month. On May 15 the House of Representatives passed the Blind Persons Earnings Fairness Act, which would gradually re-couple earnings limitations for blind and senior recipients. If this is finally adopted by both House and Senate, one of the significant disincentives to seeking employment will have been greatly reduced.

When Medicare became a part of SSDI benefits in 1965, the argument became more compelling. Many blind beneficiaries needed medical services for other conditions covered by Medicare. Under these circumstances it is understandable that fear of losing medical benefits associated with the SSDI program has been one of the greatest disincentives to seeking employment. To counteract these obvious disincentives, the period of eligibility for medical benefits has been extended for ninety-three months so that the threat of losing these benefits immediately after cash benefits are terminated no longer exists. Nevertheless, fears have a tendency to outlive the facts, so it is incumbent on the Social Security Administration, rehabilitation personnel, and advocates to impress the facts on potential job seekers. Some positive incentives besides extended medical coverage have been incorporated into SSDI to reduce or eliminate disincentives, including discounting work-related expenses and imposing no limitations on earnings during a trial work period of nine months to a year. If parity is reached with the earnings limits for older recipients, a moderate income and living standard with some security against the devastation of medical costs will have been achieved. These measures and others have significantly reduced the disincentives to seeking and obtaining employment.

3. Distance: Let's take a fanciful journey into the next generation. Everyone will be driving smart cars. To be more precise, smart cars will be driving everyone. Earlier this year, at the annual showcase of the electronics industry in Las Vegas, an experimental vehicle was demonstrated. With global positioning technology and other systems for controlling the movements of the vehicle, all the passenger needed to do was enter a destination into the GPS and sit back and wait until the car arrived.

Many aspects of ordinary life are impaired by the limited options that confront a blind person. Social, economic, recreational, entertainment, religious, educational, and family participation can involve the necessity of devising alternatives for simply getting there. At best public transportation is a poor option, except in the largest metropolitan areas. The private automobile has come to dominate social existence, including work, to the point that in some settings blindness can virtually immobilize an individual. The lack of imagination and resources among those who operate public transportation systems makes it clear that no solution to the problem of simply getting there, wherever there might be, is likely to come from that quarter. If a quarter century turns out to be an accurate projection for the introduction of smart cars, I will be just a little over a hundred years old and probably not seeking employment, but it would represent the elimination of one of the serious obstacles to the employment of blind people. But employment is only part of life, and the other dimensions would also be greatly enhanced. I said it would be a fanciful journey, but some of the younger members of the audience may live to see it realized.

4. Discouragement: Anyone who has experienced repeated failures to obtain employment may feel discouraged and drop out of the labor force. The likelihood of experiencing repeated failure if one is blind is many times greater than it is for members of the general public. I know of no way to quantify the fraction of unemployed blind people who are simply discouraged and have withdrawn from the job search. Workshops by consultants, books and articles by experts, job fairs, and individual counseling can lay out many brilliant strategies for job seeking, but the realities of discrimination and indifference more often than not reduce these to exercises in futility. Meanwhile, discouragement and withdrawal from the job search continue to swell the ranks of unemployed blind people and account for a significant fraction of the unemployment rate. Repeated assertions of the 70 percent unemployment rate can hardly be encouraging to these individuals.

5. Disinclination: Some people in this world would prefer not to work. Some of them are blind. If people are blind in this society, there is a pretty good chance they can qualify for a variety of public supports: SSDI, Medicare, SSI, public housing, food stamps, and other benefits. If an individual settles into a comfort zone in this framework, a disinclination to work can be sustained. I recall suggesting to Robert Newman that he create a scenario of a blind character for his Thought Provoker in which an individual found a comfort zone of adequate resources and a lifestyle that nurtured a disinclination to work. The vehemence of reaction to this scenario suggests that our well-known commitment to the work ethic will minimize this factor. No matter how much we may deplore this rejection of the work ethic, most of us know someone who prefers this lifestyle. Technically, anyone who is so inclined is not counted under the Labor Department strict standard for being unemployed, but he or she would satisfy the more general notion of unemployment. Fear of rejection or discouragement after repeated failures may explain the attitude, but the reality must be acknowledged. I know no way to quantify the contribution of this phenomenon to the unemployment of blind people.

6. Disability: In 1917 Nebraska adopted a definition of blindness that still provides the statutory meaning of this visual condition. The definition reads: "The term blind includes all persons whose sight is so defective as to seriously limit their ability to engage in the ordinary vocations and activities of life." The misleading aspect of this definition is that it directly links the degree of defectiveness with the limitations on ability to engage in vocational and other activities. Unfortunately, this perception is deeply ingrained in popular beliefs about the relationship between visual acuity and ability to function in the world, including the world of work. This statutory definition, however, is open to a different interpretation, one that suggests that limitations can be overcome. In the familiar formulation of Kenneth Jernigan: "If a blind person has proper training and opportunity, blindness can be reduced to a physical nuisance." The critical qualification, of course, is, "with proper training in the alternative techniques of blindness." When positive attitudes drive and sustain the motivation to employ the alternative techniques, then blindness is significantly reduced as a factor. It is not an

accident that individuals who complete a training program in the orientation center in Lincoln have an employment rate of around 90 percent. Further evidence for the value of training in the alternative techniques is provided by Dr. Ruby Ryles of Louisiana Tech and Dr. Fred Schroeder, who have documented that 90 percent of employed blind people are proficient Braille readers. In the modern economy Braille literacy and computer literacy combined are indispensable skills. Without such training it is difficult to see how individuals could, in the strict requirements of Labor Department statistics, be said to be available for employment.

While it is only a guess, I am willing to wager that the unemployment rate could be cut in half again if proper training in alternative techniques and the adoption of positive attitudes were available to all blind people nationally.

Conclusion

I began by saying that I was seeking the truth about the rate of unemployment of blind people. The conventional wisdom and political rhetoric suggest that this rate is 70 percent. When viewed in light of Labor Department guidelines, this asserted rate is more a matter of politics than an accurate description of reality. But official statistics only hint at a serious problem. It is more illuminating to examine the reasons for the low rate of participation in the labor force. In other words, the problem is not how we can reduce a statistical unemployment rate, but how we can increase participation in the remunerative labor force.

I have suggested that discrimination, disincentives, distance, discouragement, disinclination, and disability account for most of the absence from the work place. Administrative and judicial remedies may affect discrimination in limited ways, but public education activities by the National Federation of the Blind and the examples of blind individuals will do more to effect changes in the social attitudes underlying discrimination. However, as the saying goes, "Don't hold your breath!" Much has been done to reduce the disincentives associated with SSDI, SSI, and Medicare, but the impact of these benefits must be communicated by the Social Security Administration, advocacy organizations, and rehabilitation agencies. We need to do a better job of education and counseling. Transportation will continue to be a significant problem for blind people to resolve, requiring a combination of individual ingenuity and initiative and some public action. Perhaps in the next generation technology may make the convenience of the private automobile as available to the blind as it is to everyone else. Discouragement stemming from repeated failures and disinclination to work may be overcome when success replaces failure. Encouragement by advocates and professionals can sustain efforts toward employment, but, as they say, "Nothing succeeds like success." Finally, disability is the most pervasive and the most remediable factor that explains the low rate of participation of the blind in the labor force. It is a sad truth that the vast majority of blind people have not had the opportunity for proper training in the alternative skills of blindness and the sustaining attitudes that would render them successful job seekers and workers.

If we are guided by the Biblical injunction, "Seek the truth, and the truth shall set you free," rather than contributing to the creation and perpetuation of myths and misconceptions about a 70 percent unemployment rate, we may indeed find the truth we have been seeking. Well, what is this truth that can set us free? It turns out not to be all that mysterious and, I hope, not at all hazardous to the seeker. I would say that this is the truth that the National Federation of the Blind has pursued since its founding in 1940. It is the truth that blindness can be managed in the social and physical environment by proper training, adopting a positive philosophical attitude, and persuading others to understand this truth. Little by little, but a little too slowly, this truth is beginning to prevail.

Forbes: Blind people in the workplace

In media terms, a significant aspect of David Paterson, who legally blind, ascending to the NY governor's job is the flurry of news and feature stories about life with blindness in general. *Forbes* looked at the business angle of blind people in the workplace in a March 14 story, talking to some corporate executives who are blind.

But the story also lays out the specifics of the high unemployment rate for blind people. The American Foundation for the Blind (AFB) reports a 70% unemployment rate among blind adults of employment age. However, AFB explains in the *Forbes* story what accounts for some of this. For example, many people become blind later in life and decide to quit working because they aren't too far from retirement. "It's hard to persuade people who are newly blinded in their 50s and 60s to get back into rehabilitation and training so they can go back to work," Carl Augusto, AFB president, says in the article.

However, for young blind people the future is rosier. "The younger generation of blind workers is different than their older counterparts, says Augusto. They are employed at the same rate as sighted people. Schools are preparing them better for careers, and they're taking advantage of technology."

But discrimination against blind people in hiring still exists and accounts for the high unemployment rate. "The single largest factor is discrimination and bias," says Steven Rothstein, president of Perkins School for the Blind in Massachusetts. "There's a belief among employers that people who are blind can't do jobs."

The story also included the experiences of Barry Honig, who is blind and president of Honig International, a Manhattan-based executive search and management consulting firm, and Al Gayzagian, a blind Harvard graduate who struggled for three years to find a job, but found one as a typist and then rose to the level of senior financial officer at John Hancock.

The *Forbes* story, by Tara Weiss, does a good job of giving a nuanced report about the positive and negative aspects affecting blind people who try to obtain employment.

Lighthouse for the Blind - St. Louis Earns National Industries for the Blind Award for Sustaining and Increasing Employment for People Who Are Blind

We are proud to provide employment opportunities for people who are blind, said John Thompson, President of Lighthouse for the Blind-Saint Louis

ST. LOUIS, MO, January 27, 2011 /Missouri PR News/ -- Lighthouse for the Blind - St. Louis was recently honored for its efforts to increase employment retention, growth, and upward mobility for people who are blind in 2010.

The award was presented by National Industries for the Blind (NIB) in recognition of Lighthouse for the Blind - St. Louis' success and commitment to increasing employment and economic opportunities for people who are blind.

"We are proud to provide employment opportunities for people who are blind," said John Thompson, President. "Over 90% of our direct labor force, including our supervisors, are legally blind and represent a loyal, dedicated and capable workforce. We are honored to serve as an example in the community of the capabilities of people who are blind. We are please to provide quality products, on time and at competitive prices to the federal government as well as commercial customers."

The 2010 Employment Award winners receive cash payments from a $1 million fund created to recognize and encourage NIB associated agencies that grow or sustain employment for people who are blind. Emphasis is also placed on efforts to increase upward mobility in the workplace and job placements.

With a 70 percent unemployment rate for working aged Americans who are blind, all efforts to create jobs for this population help to change this statistic and provide economic and personal freedom for people who are blind.

"It is an honor for me to recognize agencies such as Lighthouse for the Blind - St. Louis that are dedicated to creating jobs and high-growth career opportunities for people who are blind," said Kevin A. Lynch, president and CEO of NIB. "I truly appreciate their efforts to reduce the unemployment rate for this population."

Also known as LHB Industries, the Lighthouse was founded in 1933 and today maintains offices and manufacturing facilities that currently employ more than 60 legally blind persons at two locations in Saint Louis County.

The Lighthouse manufactures, assembles, warehouses and sells high-quality products to government and commercial customers nationwide including first aid kits, medical kits, catheters, aerosol and liquid paints, aerosol and liquid cleaning products and many others.

For more information, contact Abby Barnett at toll-free 800.542.3697, or 314.423.4333 ext.130, or visit the website http://www.lhbindustries.com.

At National Industries for the Blind (NIB), our mission is to enhance the opportunities for economic and personal independence of persons who are blind by creating, sustaining and improving employment opportunities. NIB and 90 associated agencies serve as the largest employer for people who are blind. These employees make and sell SKILCRAFT products and services to the federal government and Department of Defense through the AbilityOne Program, established by the Javits-Wagner-O'Day Act. www.NIB.org.

The Lighthouse for the Blind is a privately chartered, 501(c)3 non-profit corporation established in 1933. Through the manufacture and sale of products to various government agencies as well as commercial customers and individuals, we are able to further our mission of assisting individuals who are legally blind maintain dignity and independence by making available employment, education and support services. We are committed to providing a supportive environment where our employees can count on developing new and productive skills that will assist them in reaching amazing levels of independence. For more information, please visit us online at www.lhbindustries.com.

CS FOR SENATE BILL NO. 53(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS DAVIS, Ellis, McGuire

A BILL

FOR AN ACT ENTITLED

"An Act reestablishing the Alaska Commission on the Status of Women; and relating to the purpose and powers of the Alaska Human Relations Commission."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 44.19 is amended by adding new sections to read:

Article 6. Alaska Commission on the Status of Women.

Sec. 44.19.628. Creation and membership of commission. (a) The Alaska Commission on the Status of Women is established in the Office of the Governor.

(b) The commission consists of two members of the executive branch and seven public members, appointed by the governor, who serve at the pleasure of the governor. All members shall be residents of the state. At least one public member shall be a person who manages a household that includes the person's spouse and at least one child and who is not otherwise employed, and at least one public member shall be a single mother who is the head of a household that includes at least one child.

(c) The governor shall appoint members on a nonpartisan and

New Text Underlined [DELETED TEXT BRACKETED]

nondiscriminatory basis. In making the appointments, the governor shall consider

(1) recommendations made by civic organizations, women's organizations, educational and vocational groups, employer groups, labor unions, church groups, homemakers' clubs and organizations, and other groups having an interest in the welfare and status of women;

(2) the statewide geographical representation of the commission;

(3) minority and low-income representation;

(4) the representation of senior citizens, persons with disabilities, and persons from a variety of occupational categories; and

(5) the representation of persons with different marital statuses and persons with various numbers of children.

(d) The commission shall elect one of its members as chair. The chair may appoint other officers as necessary.

Sec. 44.19.629. Terms of office; compensation. (a) The term of office of a member of the commission is three years. Terms shall be staggered. A member may not serve more than six consecutive years.

(b) A vacancy shall be filled in the same manner as the original appointment. A person appointed to a vacancy serves for the unexpired portion of a term.

(c) Public members of the commission do not receive compensation for their services but are entitled to per diem and travel allowances authorized by law for other boards and commissions.

Sec. 44.19.630. Meetings. (a) A majority of the members constitutes a quorum for conducting business and exercising the powers of the commission. The commission shall meet at the call of the chair, at the request of the majority of the members, or at a regularly scheduled time as determined by a majority of the members.

(b) The commission shall meet in each region of the state on a rotating basis and may not hold consecutive meetings in the same region of the state. For the purposes of this subsection, the regions of the state are Southcentral Alaska, Southeast Alaska, Kenai Peninsula, Western Alaska (including Kodiak), Interior Alaska, and Northern Alaska.

Sec. 44.19.631. Powers and duties of the commission. (a) The purpose of the commission is to improve the status of women in the state by conducting research, by serving as a referral service for information and education to help women avail themselves of existing resources to meet their needs, and by making and implementing recommendations on the opportunities, needs, problems, and contributions of women in the state, including

(1) education;

(2) homemaking;

(3) civil and legal rights; and

(4) labor and employment.

(b) To accomplish this purpose, the commission may

(1) act as a clearinghouse and coordinating body for governmental and nongovernmental information relating to the status of women;

(2) cooperate with public and private agencies in joint efforts to study and resolve problems relating to the status of women in the state;

(3) accumulate and compile information concerning discrimination against women;

(4) disseminate the results of research and compilation of data acquired under (3) of this subsection by publication and other methods, such as public hearings, conferences, and seminars;

(5) study and analyze all facts relating to Alaska laws, regulations, and guidelines with respect to equal protection for women under the state constitution;

(6) recommend legislative and administrative action on equal treatment and opportunities for women;

(7) encourage women to use their capabilities and to assume leadership roles;

(8) encourage the development of regional and municipal women's councils or commissions; and

(9) accept, on behalf of the state, contributions of services, materials, or money to assist in meeting the cost of carrying out AS 44.19.628 - 44.19.631.

(c) When conducting research, acting as a referral service, serving as a forum

for ideas, or developing recommendations related to the welfare of women, the commission shall solicit and consider information and views from a variety of constituencies to represent the broad spectrum of diversity that exists with respect to possible approaches for meeting the needs of women in the state.

(d) On the request of the commission, an executive branch department shall cooperate with the commission in the performance of its duties under this section. The commission may use legal, technical, secretarial, and administrative services as may be provided by the governor.

(e) The commission shall prepare and publish an annual report on the status of women in the state, the commission's proceedings for the previous calendar year, and its recommendations and proposals for change. The commission shall provide the governor and legislature with copies of the report by the 15th day of each regular legislative session.

*** Sec. 2.** AS 44.19.608 is repealed.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

MEMBERS OF THE ALASKA COMMISSION ON THE STATUS OF WOMEN; STAGGERED TERMS. Notwithstanding AS 44.19.629, added by sec. 1 of this Act, the terms of the initially appointed members of the Alaska Commission on the Status of Women, established under AS 44.19.628, enacted by sec. 1 of this Act, shall be set in the manner provided by AS 39.05.055(7).

(4) disseminate the results of research and compilation of data acquired under (3) of this subsection by publication and other methods, such as public hearings, conferences, and seminars;

(5) study and analyze all facts relating to Alaska laws, regulations, and guidelines with respect to equal protection for women under the state constitution;

(6) recommend legislative and administrative action on equal treatment and opportunities for women;

(7) encourage women to use their capabilities and to assume leadership roles;

(8) encourage the development of regional and municipal women's councils or commissions; and

(9) accept, on behalf of the state, contributions of services, materials, or money to assist in meeting the cost of carrying out AS 44.19.628 - 44.19.631.

(c) When conducting research, acting as a referral service, serving as a forum

for ideas, or developing recommendations related to the welfare of women, the commission shall solicit and consider information and views from a variety of constituencies to represent the broad spectrum of diversity that exists with respect to possible approaches for meeting the needs of women in the state.

(d) On the request of the commission, an executive branch department shall cooperate with the commission in the performance of its duties under this section. The commission may use legal, technical, secretarial, and administrative services as may be provided by the governor.

(e) The commission shall prepare and publish an annual report on the status of women in the state, the commission's proceedings for the previous calendar year, and its recommendations and proposals for change. The commission shall provide the governor and legislature with copies of the report by the 15th day of each regular legislative session.

*** Sec. 2.** AS 44.19.608 is repealed.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

MEMBERS OF THE ALASKA COMMISSION ON THE STATUS OF WOMEN; STAGGERED TERMS. Notwithstanding AS 44.19.629, added by sec. 1 of this Act, the terms of the initially appointed members of the Alaska Commission on the Status of Women, established under AS 44.19.628, enacted by sec. 1 of this Act, shall be set in the manner provided by AS 39.05.055(7).

Good morning, Chairman Hoffman and Members of the Senate Finance Subcommittee;

Thank you for hearing SB53 in Finance Committee this morning. I was on the line to testify on behalf of the 7,500 girls and adult volunteers of Girl Scouts of Alaska this morning, but my line was not unmuted so I'm sending written testimony instead.

The reestablishment of the Alaska Commission on the Status of Women is of great interest and benefit to the next generation of women, Alaska's girls. Perhaps it should even be Alaska Commission on the Status of Women and Girls.

As you heard, the wage gap between men and women in Alaska is of grave concern. I'd like to offer some other vital issues this Commission could make a difference for.

Leadership. Women are 50% of the population and more than 50% of college graduates, yet women in decision making leadership positions do not reflect those numbers. In fact, nationally, women represent only 17% of elected leadership positions, and even less corporate board seats or CEO offices. The courageous women we have in leadership positions here in Alaska are valuable, but they are not enough. This country, this state deserves more leadership, we deserve gender balanced leadership.

Girl Scouts own research reflects that girls and boys think of leadership differently, and real life experiences show that when leadership is gender balanced, we all do better. A recent study of the Fortune 500 shows that American corporations whose boards are at least one-quarter women outperform other companies by 53% on return on equity, 42% on return on sales, and 66% on return on invested capital (Catalyst/Chubb Corporation 2007). And in fact the country of Norway in 2003 enacted legislation requiring that women hold at least 40% of board seats in publicly traded Norwegian companies. In 2010, *Newsweek* named Norway as "the only Western industrialized state to escape the global economic meltdown relatively unscathed. It bears a healthy banking sector, record-low unemployment, and one of the hottest sovereign wealth funds around." All this to say that things work best when we engage all of our potential instead of only half of it for leadership, when we have gender balanced leadership.

And yet, 61% of girls are either deeply ambivalent about leadership or say that it's not important to them. Negative influences abound, including peer pressure to not stand out, unhealthy images in the media about beauty, a lack of mentors, little support for girls with an interest in science, technology, engineering and math (STEM), and bullying. This cycle of discouragement that begins in grade school goes on to have far-reaching impact on our society.

We can do better for our girls. Alaska Commission on the Status of Women could assist in balancing leadership in our state, and thus improving our economy and state overall for the next generation.

A similar story exists in science, technology, engineering, and math (STEM) careers regarding women's representation. A new study by Girl Scouts Research Institute tells us that 73% of teen girls ARE interested in STEM subjects, but do not take the final step of making STEM career choices. This is especially concerning because STEM jobs have a higher pay scale than many others, and women are not benefitting from that. Engineering, for example, a critical field of study and career choice for a state as rich in natural resources as ours is, and yet only 3% of all

girls are currently interested in being engineers, and only 32% of girls who identify themselves as interested in STEM. Here in Alaska you can get a degree in any kind of engineering there is, and yet our companies often have to look Outside for engineering candidates. We are not tapping 50% of our potential resources to meet that need, our girls. Alaska has a chapter of Society of Women Engineers, but that is not enough. Their members, women engineers, are hard at work being successful in their fields, and cannot bear the burden of closing this gap alone. Neither can Girl Scouts.

For all these reasons, Girl Scouts, as we celebrate 100 years, have designated 2012 as the Year of the Girl to call attention to these issues and change the paradigm for the next generation. Girl Scouts of Alaska enthusiastically supports SB53 to restore the Alaska Commission on the Status of Women, an appropriate and effective move to improve our state during the Year of the Girl.

Testimony on SB53 – Reestablishment of the Alaska Women's Commission

Senate Finance Committee, January 20, 2012

I remember when the Alaska Women's Commission shut its doors during Governor Hickel's administration. Governor Hickel replaced it with the Alaska Family Commission. A few months later, in March 1996, there was a women's conference in Centennial Hall and hundreds of women came from around the state.

On the last day, a group of women met in the center of the hall as the janitors cleaned up around us. Several women had been to the 5th United Nations Women's Conference in Beijing, and were anxious to share what they had learned before they returned to their homes all over the state.

On that afternoon, we also talked about what we could do now that the Women's Commission was gone. How would women communicate with each other across this vast state? How would we let women know what resources were available to them? We decided to establish a website, and we called it the Alaska Women's Network. It still exists and is a great resource. I was one of the founding board members, and served as President until just a few years ago.

What we learned at the Alaska Women's Network is that women need a central place to find information. AWN has a lot of information, but it is passive and does not generate new resources for the women of our state.

I have a historical reference here. This is the Women's Legal Rights Handbook published by the Alaska Women's Commission in 1990. Marie Darlin, a longtime community activist in Juneau, gave it to me years ago for safe keeping. Maybe she knew a day would come when the Commission would be resurrected.

Governor Parnell has made reducing violence against Alaskan women one of his top priorities with the Choose Respect campaign. This 31 year old booklet covers Criminal Law and Violence Against Women in plain English with a Glossary in the back. It also covers adoption, name changes, and other legal matters that might come up for a woman in Alaska. At one time, I had another Alaska Women's Commission report. It was a study of why girls dropped out of school.

In addition to updating old studies, an Alaska Women's Commission could take a hard look at the wage gap for women in this state. It is against federal law to pay a woman less than a man for the same job, but no matter how you cut it, women all over Alaska make less money than men in the same jobs. I hope that military service is the exception, but I don't know that for a fact. The Juneau Economic

Development Council's 2011 report on Juneau and Southeast Economic Indicators laid out the wage disparity in every civilian field and at every education level.

The report says that nationally men earned 29% more than their female counterparts in 2009. In Alaska, men earned 37% more for full time year round employment. In Juneau, which is seen as a government town where one would expect wage parity for women, men earned 42% more than their female counterparts.

While many women, including myself, reacted with surprise and indignation at these figures when they came out in the Juneau Empire in April, where could we go with that? Who could dig into those numbers and find out if federal wage laws were being broken or, to be kind, were not understood by employers. I began to study pay equity and I have reams of material, but no authority to enforce the law.

By the way, Representative Munoz told me that her grandmother, Thelma Engstrom, introduced legislation in the Alaska Territorial Legislature in 1946 for pay equity between men and women. That was 66 years ago

It is a fact that far too many women earn less than men for the same jobs in this state. That is illegal, it is not fair, and it impacts our economy. It is a fact that Alaska leads the country in violence by men against women. It is a fact that the cost of living in Alaska is high, and low income women can get stuck in dangerous relationships because they cannot afford to take care of themselves and their children. So they stay.

Pay equity and prevention of violence again women are two of my passions, but an Alaska Women's Commission would provide information and education, conduct research to find out what women need, and make and implement recommendations for the women of this state on a wide range of issues.

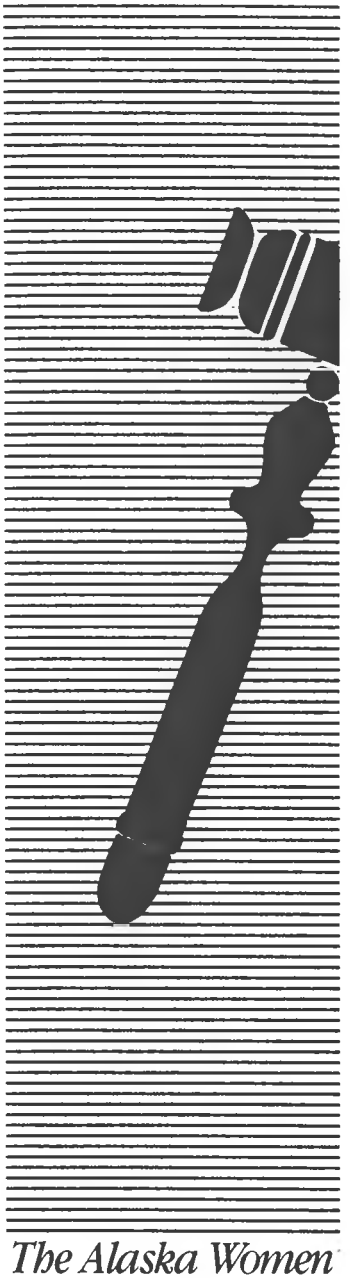
Last night, a friend told me that women make up 67% of the University of Alaska Southeast student body. 67%.

Who's going to tell those women that if they become an engineer or an architect in Juneau, the man in the next cubicle will most likely be paid 96% more than they'll get. Their women friends who choose finance or insurance, however, will have male co-workers who make 213% more. Their best bet in Alaska is to take up fishing. There is just a 2% pay differential if they get a boat and a commercial fishing license.

Would you advise these bright young women to stay in Alaska and earn less than their potential, or move to another state where they have a fair shot at equal pay? Alaska ranks 41st in the country in the male to female earnings ratio. California ranks second. As these UAS women are walking to class in 12

degree weather, sunshine and fair pay might sound pretty good to them, to say nothing of the women at UAF and UAA.

Alaska has the dubious distinction of record high sexual and physical abuse of women. Choose Respect is a priority for our current Governor, but what if the next Governor's priorities lie elsewhere? Each Governor comes into the office with his or her own ideas of what Alaska needs.



While Senate Bill 53 doesn't address it, I would respectfully suggest that the Alaska Women's Commission be safeguarded in statute from the philosophical or personal world view of the powers that be. Leaders come and go, we women stay.

I ask you to support Senate Bill 53 to improve the status of the women of this great state in all aspects of our lives. No non-profit can do the caliber of work an official Women's Commission can do if it is fully funded and supported by the Governor and the Legislature.

Thank you.

Occupation Analysis

JEDC also looked at differences in wages in selected occupations. Finance and Insurance occupations had the greatest difference. Men in that industry earned 213 percent more than women in 2009 for full time work. Healthcare practitioner and technical occupations also had a difference of more than 200 percent. Private education and mining had the greatest wage equity, with wage differences between zero and two percent.

Percent Higher Wages Earned by Men in Juneau over Women for Full Time Year Round Employment, by Occupation 2009

Occupation or Industry	Percent Higher Earnings
Finance and insurance	213%
Healthcare practitioner and technical occupations	204%
Architecture and engineering occupations	96%
Food preparation and serving related occupations	77%
Health care and social assistance	68%
Sales and related occupations	58%

Education Analysis

JEDC ran an education analysis of Juneau males and females. Woman in Juneau are slightly better educated than their male counterparts in nearly every education category. Juneau women hold more Associate's degrees, Bachelor's degrees, and Master's degrees. Men have one percent more PhD's than Juneau women (over the age of 25).

	Count of Degrees		Percentage of those Holding Degrees	
Level of Education	Juneau Males	Juneau Females	Juneau Males	Juneau Females
High School Degree or higher	9,807	10,089	97%	96%
Bachelors or higher	3,395	3,925	34%	37%
Graduate Degree or higher	1,201	1,443	12%	14%

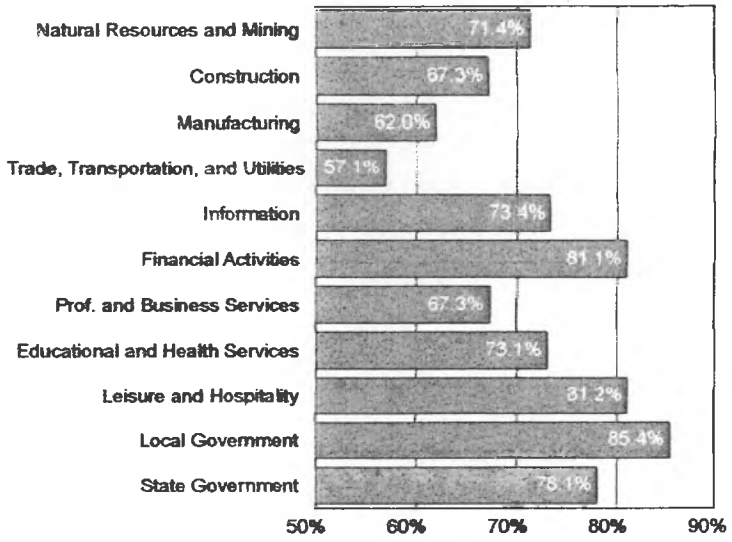
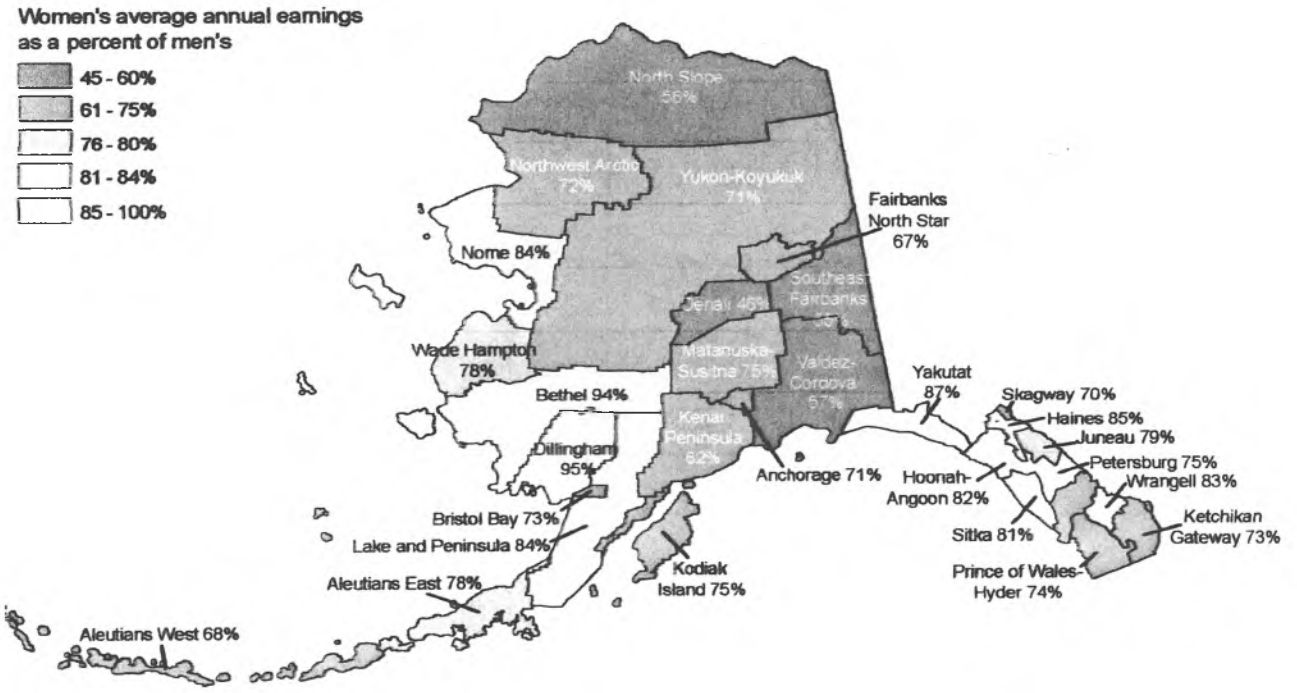
JEDC



rower gap in pay. Women made $31,102 in 2010, 85 percent of men's average earnings of $36,439. There were 28,470 women working in local government in 2010, making up 58 percent of workers in the industry.

Men outearn throughout state

Women earned less than men in every borough and census area in Alaska in 2010, as shown in Exhibit 7. The ratio of women's earnings to men's in each borough or census area often depended on the region's dominant industries.



For example, in Bethel and Dillingham, where local government is the largest employer, women made over 90 percent of what men made, on average. At the other end of the spectrum, women in boroughs and census areas where natural resources and mining were major employers made significantly less on average than men.

state: In 2008, Washington, D.C. had the nation's smallest wage gap, at 88%, well ahead of California, where women earned 84.9% of what men earned. The median of 75.9% is shared by the states of Connecticut, Kentucky, New Mexico, and Pennsylvania. Women fared worst relative to men in Wyoming, where women's earnings represented only 64.3% of men's earnings, the widest gap of any state.

Women and their families cannot sustain a wage gap that persists this deep in this economy. There is no doubt that more is necessary both to strengthen equal pay laws, which have been weakened over time by courts, and to require the federal government to be more proactive in preventing and battling wage discrimination. In particular, the Paycheck Fairness Act, which has already passed the House of Representatives, would serve these goals

IV. The Paycheck Fairness Act Would Fight Pay Discrimination Based on Gender

Introduced in both the House (H.R. 12) and the Senate (S. 182) and passed by the House last year, the Paycheck Fairness Act would address discriminatory pay practices, an important source of the wage gap. The Act builds upon the Equal Pay Act of 1963, which made it illegal for employers to pay unequal wages to men and women who perform substantially equal work. Among other things:

- The Paycheck Fairness Act allows victims of wage discrimination based on gender to receive full compensatory and punitive damages, as opposed to only liquidated damages and back pay awards, putting gender-based wage discrimination on equal footing with discrimination based on race and ethnicity.
- The Act would make it easier for parties that have been discriminated against to work together through a class action suit by automatically considering members part of the class unless they choose to opt out, in keeping with the Federal Rules of Civil Procedure.
- The Act would close loopholes in how discrimination is counted by clarifying that a gender differential in pay within a company need not be within the same facility to count as discrimination, and by tightening the rules concerning defense of a gendered pay differential that employers claim is not due to sex.

Table 1: Median Earnings for Full-Time, Year-Round Workers by Sex and State[24]

SB53 – REESTABLISHMENT OF THE ALASKA COMMISSION ON THE STATUS OF WOMEN

Senate Bill 53 "An Act reestablishing the Alaska Commission on the Status of Women; and relating to the purpose and powers of the Alaska Human Relations Commission."

Senate Bill 53 reestablishes the Alaska Commission on the Status of Women – a nine member body devoted to improving the status of women. The Alaska Commission on the Status of Women was originally created in 1978; renewed and renamed to the Alaska Women's Commission in 1983; then combined with the Alaska Human Relations Commission in 1993. While the Alaska Human Relations Commission continues to exist in statute, it has never been funded and was declared inactive in 1996.

Staggering statistics for women in Alaska show the extreme need to reestablish the Commission to exclusively focus on major issues facing women. Alaska has the highest rates of sexual assault and domestic violence in the nation and historically, women are more likely to be poor than men. Poverty rates for unmarried female householders with children are particularly high and have consistently been two or three times as high as overall male and female poverty rates since 1996. Survey data compiled by the American Community Survey shows that of 26,518 families in Alaska with a female head of household, 22.6 percent live below the poverty level. The gender wage gap persists in Alaska and across a wide spectrum of occupations and industries. In 2009, according to the Alaska Department of Labor, Alaskan women on average earned only 66.6% of what men earned. And, although more women than men in Alaska hold a bachelor's degree or higher, data shows that men's median annual earnings are higher in every education level. Alaskan women, in particular women of color, experience health care disparities and women living in rural Alaska have worse-than average disparities on access and utilization of services.

Reestablishing the Alaska Commission on the Status of Women will help Alaskans focus on these critical areas that have negatively impacted women and children for decades. Throughout the Commission's existence, the Commission conducted many public hearings and trainings, developed manuals on violence against women, education and welfare, conducted research to help women avail themselves of existing resources to meet their needs and implemented recommendations on the opportunities, needs, problems and contributions of women in the areas of education, homemaking, civil and legal rights, and labor and employment. The Commission developed a comprehensive statewide plan that identified the needs of children and youth and made recommendations to enhance the quality of life for women and children, as well as produced annual reports which described in detail the accomplishments of the commission in those years. We need innovative, forward thinking and a commission that exclusively concentrates on ensuring equality for women.

STATE OF ALASKA
OFFICE OF THE GOVERNOR

ALASKA WOMEN'S COMMISSION
3601 C STREET - SUITE 742
ANCHORAGE, ALASKA 99503

January 25, 1990

The Alaska Women's Commission is pleased to present our 1989 annual report, outlining the tasks we completed and the goals we reached during the last year.

First among them was the re-establishment of the Commission for another four years. With the firm mandate we received from the Governor and the legislature, we were able to spend two meetings in extensive long-range planning to insure that those four years are full of productive activity aimed at the betterment of the economic, political, social and educational condition of Alaska women and their families.

Revision of the Women's Legal Rights Handbook was successfully completed, and its distribution accomplished as effectively as possible within a limited budget.

Important outreach to rural women took place in Nome and Bethel; we hope to augment this during the coming year, and an important contribution to that goal will be aided by the federal grant we received to hold a conference on substance abuse in rural Alaska, with a special emphasis on women.

Other outreach of significance we were able to make this year was to welfare recipients and female high school drop-outs. We hope to follow up with research designed to provide assistance to both these groups.

A new decade lies before Alaska and its citizens, containing both roses and thorns. The Alaska Women's Commission is dedicated to seeing that those citizens who are female share equally in the former and not disproportionately in the latter.

Sincerely,

Paula Sampson

LETTER FROM THE DIRECTOR

The Alaska Women's Commission has undergone some important changes in 1989. The passage of legislation to continue the Commission was difficult. Concerns raised by women who testified or women who talked to staff have impacted the direction of our work. In particular it is clear that there are many women in Alaska who are striving to get off welfare, helping a family member who has a serious health problem, recovering from sexual abuse or domestic violence, living in poverty, lacking adequate job skills, needing appropriate treatment for addiction to drugs or alcohol, or lacking adequate child care or housing. These and other basic issues must be solved to enable women to be in a position to make choices about their lives.

Women also testified in hearings before the Commission about feeling unsupported in their choice to be a homemaker or start a home business or work part-time while raising a family. The Commission has looked at strategies to support women in these choices and has incorporated these issues into our long term plan as well as our FY90 activities.

Thus, while the process of gaining legislation for continuing the Women's Commission was difficult, it also provided us with a lot of information from across the state on what are women's concerns and on what changes women need to address these concerns.

The new Women's Legal Rights Handbook, an updated Directory of Women's Organizations, a women's calendar, meetings for welfare recipients in Bethel, Anchorage and Kenai to address their needs, research on young women who drop out of school, and award of a federal grant for a substance abuse conference for rural women are the major accomplishments of the past year. It has been a productive year and I look forward to continuing the Commission's work to improve the status of Women in Alaska.

Sincerely,

Ruth Lister

PURPOSE OF THE COMMISSION

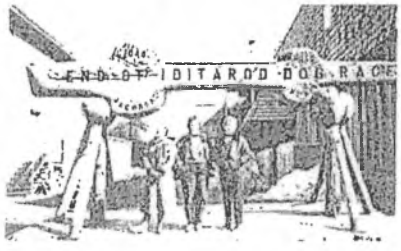
The Alaska Women's Commission is dedicated to the achievement of equal legal, economic, social and political status for women in Alaska.

Nine public members and one representative from the Attorney General's office are appointed by the Governor to staggered three year terms. They represent a wide range of backgrounds, interests and geographic areas. Meetings are held three times per year and are open to the public..

The Commission is a statewide network for study and action on a variety of issues. Current priorities include legislation, employment, civil and legal rights and issues relating to the family.

WOMEN'S COMMISSION LIVES

Governor Cowper signed SB 8, the bill extending the life of the Alaska Women's Commission, into law on April 20th. This legislation extends the Commission's life until June 30, 1993.



The original version of SB 8, as submitted by Senator Fahrenkamp, would have reinstated the Alaska Women's Commission under basically the same terms it had operated under prior to "sunsetting". The Legislature amended this bill (SB 8) in some significant ways. The amendments shorten the terms Commissioners serve from five years to three and limit the length of appointments to a maximum of six consecutive years.

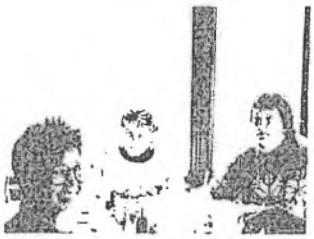
The original bill required that one of the Commissioners be a homemaker. SB 8 amends it by deleting the term homemaker and inserting in its place a "person who manages a household that includes the person's spouse and at least one child and who is not otherwise employed".

Ruth Lister and Evelyn Tucker work on the Long Term Plan for the Women's Commission.

The amended bill is consistent with the original which directs the Governor to make appointments on a nonpartisan and nondiscriminatory basis and to give consideration to the recommendations made by "civic organizations, women's organizations, educational and vocational groups, employer groups, labor unions, church groups, homemakers' clubs and organizations, and other groups having an interest in the welfare and status of women".

**Commissioners meet in Nome:
Paula Sampson, Linda Freed, Susan Smalley.**

The original bill also directed the governor to consider statewide geographical representation of the Commission and minority and low-income representation when making appointments. The legislature added the following groups: senior citizens, the disabled, people from a variety of occupational categories, people with different marital statuses, and people with various numbers of children.



Finally, the amendments to SB 8 also provide the following direction: "When conducting research, acting as a referral service, serving as a forum for ideas, and developing recommendations related to the welfare of women, the commission shall solicit and consider information and views from a variety of constituencies in order to represent the broad spectrum of diversity that exists with respect to possible approaches for meeting women's needs in the state".

LONG TERM PLAN

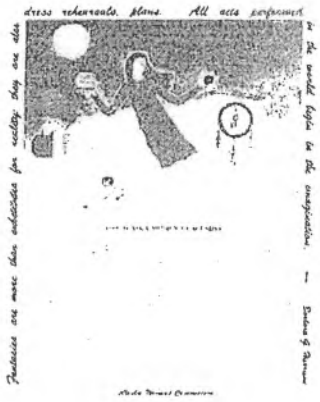
In 1988 the Alaska Women's Commission started work on a long term plan. Issues of concern to women were identified as well as present and ideal status. Women's organizations statewide were asked to comment on these issues and suggest strategies for accomplishing change.

In May of 1989 the Commission reviewed these comments as well as other issues proposed by both women's organizations and individuals who have contacted our office.

At that time, the Commission divided the issues from the draft plan into two major categories: survival and equity. Many women are concerned about survival needs such as food and housing for themselves and their children. Other women are able to focus on equity issues such as equal representation in local and state government, equal access to opportunity in the work place, sex equity in education, etc. Women affected by survival issues must have these addressed before they can even be concerned about equity issues. Some issues such as health care and substance abuse services affect both groups of women. The Commission will balance its focus between survival and equity issues over the next several years. The survival issues identified were: health care, basic education, housing, legal services, child care, child custody, child support, and domestic violence/sexual assault services. The equity issues identified were: employment, family leave, entrepreneurship, affirmative action, part-time and flexible work, demographic balance on boards and commissions, sex discrimination in the law, sex equity in education, and support of lifestyle decisions.

Rebecca Napoleon, Susan Smalley, Linda Freed.

Different categories of women who are affected by these issues were listed by the Commission. For example, the groups affected under support of lifestyle decisions were listed as homemakers, divorcing women, single parents, rural women, employed women and pregnant women. Groups affected under part-time and flexible work were homemakers, teens, employed women, single parents and seniors. At their recent meeting in October the Commission completed the long term plan by finalizing strategies for action for each issue. While we anticipate that new strategies will be added when projects are implemented, this is an excellent starting point for our work.



WELFARE REFORM: ANNUAL REPORT

The Women's Commission sponsored forums for welfare recipients to learn about the federal Family Support Act and to provide a means for welfare recipients to impact the proposed state plan to implement the Act. A total of four meetings were held, two in Anchorage, one in Bethel and one in Kenai. Recipients responded positively to having a safe and confidential opportunity to be heard. For most, the isolation and fear created by being on public assistance and living in poverty have been overwhelming.

At the first Anchorage meeting the Commission brought Carol Sasaki, director of a national organization called HOME (Helping Ourselves Means Employment with Education) through a Carl Perkins grant from the Department of Education. Recipients addressed questions on childcare, education and training needs, child support, barriers to self sufficiency, and entrepreneurship. Recipients expressed a strong desire to get off welfare. They were clear about the kind of help they needed to get jobs that are not low paying or lacking medical insurance. The Commission reported their findings to the Family Support Task Force and published a preliminary report which included recommendations.

At the second Anchorage meeting, women reviewed key issues in the draft state plan, talked about their responses, and learned how to give written and oral public testimony. About a dozen recipients came to the public hearings on Welfare Reform.

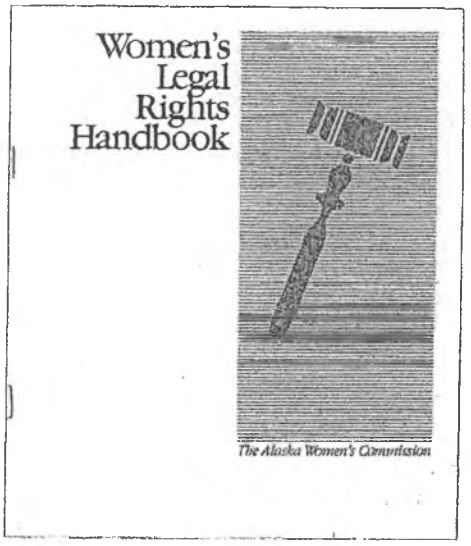
The Commission will continue to meet with recipients and to work with them and state agencies to create programs that meet their needs for obtaining self sufficiency.

THE CALENDAR AND DIRECTORY

In February of 1989 the Commission published a revised Directory of Women's Organizations in Alaska. This useful booklet lists Women's Organizations statewide and by community. The Directory was last revised in 1984.

Early in 1989 the Commission also produced a women's full color poster calendar. The calendar lists annual meetings of women's organizations, conferences and workshops of interest to women in communities around the state. The calendar was mailed to women's organizations and groups, health aides, Native organizations and schools. It was very well received.

LEGAL RIGHTS HANDBOOK REVISED AND UPDATED



In September the Commission released a newly revised and updated **Women's Legal Rights Handbook**. Commission staff worked with attorneys and other reviewers to revise, update and in some cases rewrite sections of the text. They also added a new chapter entitled "Legal Representation" which advises women about selecting and working with an attorney or representing themselves if they can not afford a lawyer.

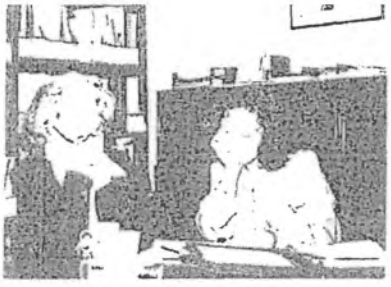
The Chapters on "Employment" and "Divorce and Dissolution" were rewritten and substantially enlarged. "Employment" now contains sections on: State and Federal Laws Regarding Discrimination; Wage Discrimination; Sexual Harassment; Pregnancy, Childbearing, and Family Leave; People with Disabilities; and Local, State, and Federal Anti-discrimination Agencies.

The Divorce and Dissolution chapter now covers: Residency; Property Division; Tax Consequences; Alimony; Attorney Fees; Child Support; Child Support Enforcement Program; Child Custody; Uniform Child Custody Jurisdiction Act; Modifications; and Visitation.

The Commission would like to acknowledge the contributions of many different women from throughout the state who helped revise sections and review drafts. This revision of the Handbook would not have been possible without their assistance.

Because of budget limitations, the Commission printed fewer copies than it has in the past. The Commission distributed copies to Women's Organizations, Domestic Violence Programs, Public Defenders, Alaska Legal Services, District Attorneys, Health Aides, Native Organizations, Senior Centers, and individuals. Initial copies free; each additional copy is $1.50 plus postage.

COMMISSION RECEIVES GRANT



PLANS SUBSTANCE ABUSE CONFERENCE FOR RURAL WOMEN

Evelyn Tucker and Mary Stachelrodt discuss the substance abuse conference.

In September the Commission received a federal grant from the Office of Substance Abuse Prevention to produce a statewide conference on substance abuse issues for rural women. The conference will focus on women taking a leadership role in the prevention of substance abuse in their communities as a result of their commitment to families and children.

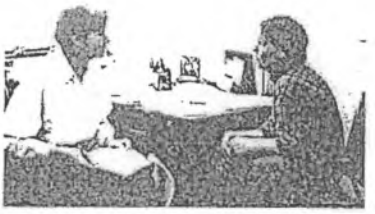
"Leadership in Sobriety" will be held as a retreat at the Meier Lake Conference Center, a rustic facility located on a lake approximately 40 miles north of Anchorage. The conference will run March 20-23 and will accommodate 60 to 80 women from throughout the state. Participants will include women who are providers of human services, policy makers in their communities, and those who have a personal interest in substance abuse issues. The budget includes scholarships and travel stipends for 24 women from around the state. Regional health corporations will be asked to select two women from their region to attend.

Billie Harvey and Mary Stachelrodt go over the conference mailing list.

The Commission will identify women from rural communities whose work and interest in the field of substance abuse qualifies them as experts. They will provide workshops and group session for the conference. One "outside expert", Phyllis Chelsea from Alkali Lake, has been invited to be the main presenter. Otherwise the Commission's intention is to identify and nurture its own substance abuse experts in rural Alaska.

"Leadership in Sobriety" will give rural women the opportunity to examine how substance abuse affects them and their families. The Conference will provide a forum to explore the relationships between substance abuse, domestic violence, sexual abuse, depression, and suicide. Lastly the conference will give women the opportunity to share the positive strategies they have developed in their personal and private battles with substance abuse.

1989 REPORT



YOUNG WOMEN OF ALASKA SPEAK OUT

The Commission Completes Research on Why Teens Drop Out

In December, 1989, research was completed on a study about why young women drop out of school. The Women's Commission interviewed 115 teens and tape recorded their comments and ideas.

The estimated drop-out rate for Alaska is approximately 33%, matching the national average. Young women comprise almost half of the total number of drop-outs.

The unique aspect of this study is that it affords the reader an opportunity to hear the thoughts and feelings of young women who have gone through the experience of failing in school or having school/parents/teachers fail them and have dropped out as a result.

Ruth Lister and Lauren Bruce review the Drop Out report.

Elizabeth Peratrovich

ELIZABETH PERATROVICH CHOSEN FOR WOMEN'S HALL OF FAME

The Alaska Women's Commission selected Elizabeth Peratrovich (1911-1958) as the 1989 inductee to the Alaska Women's Hall of Fame. She was selected for her work to insure passage of anti-discrimination legislation in the Alaska Territorial Legislature. In the 1940s Elizabeth Peratrovich and her husband Roy led a determined fight for passage of a bill that extended civil rights to all Alaskan citizens. They were successful in 1945 when the Alaska Territorial Legislature passed a law that provided for "full and equal accommodations, facilities, and privileges to all citizens in places of public accommodation within the jurisdiction of the Territory of Alaska."

Elizabeth Peratrovich will be formally inducted into the Alaska Women's Hall of Fame at a reception in March as part of this year's Women's History Month events. The Women's Hall of Fame was established by Governor Cowper in 1986 to honor women who have made contributions to Alaska and who have provided visible role models for tomorrow's leaders. It is dedicated to the late Lisa Rudd.

COMMISSION PRESENTATIONS

Prior to the passage of SB8, much of the Commission's time was spent speaking to groups and individuals in favor of the Commission. In addition the Commission made presentations to a variety of audiences on key issues the Commission is supporting. A total of 944 people attended these presentations, forums, and meetings. The following is a summary of presentations the Commission made at forums, meetings, and conferences in 1989:

Alaska Network on Domestic Violence and Sexual Assault
Alaska Women's Lobby
Alaska Women's Political Caucus
Alaska Women's Resource Center
Annual School on Addiction Studies
Association of Public Administrators
Association of University Women
Bartlett Club
Business and Professional Women's Club
Chugiak High School
Department of Education Sex Equity Training for Trainers
Displaced Homemaker Meetings for Region X
Emmonak High School
Kodiak Women's Resource Center
National Women Legislators Conference
Public Service Alaska Conference
re:commitment, a conference on equity in Alaskan Schools
Small Business Association
Valley Women's Resource Center
University of Alaska, Women and Social Policy Class

Forums and Meetings the Commission Sponsored

Legislative Alliance for Women (12x)
Meetings on Divorce/Dissolution and Child Custody (5x)
Pro-life and Pro-choice Meetings (2x)
Substance Abuse Conference Planning Meetings (2x)
Welfare Reform Public Forums (4)

Referrals

The Alaska Women's Commission received over 600 calls from women seeking information or a referral. In 1989 approximately one third of the calls were regarding divorce. Approximately one third were from women who wanted to start their own business. Roughly 10% involved asserting legal rights. The remaining calls were from women seeking information in such areas as health care, counseling, assistance with welfare, information on the commission, employment, education, women in history, and legislation.

I am concerned about SB 53 COMMISSION ON THE STATUS OF WOMEN. While it is true that single women with children are more at risk of poverty, we do not need this Commission to discern this. The UN Commission on the Status of Women (CSW) has become a magnet for radical policies that hinder and exploit women.

In 2010, the theme of the United Nations Commission on the Status of Women was Sexual Rights. Last year, the theme was Youth Revolutions. Reporting at this conference, were legal organizations that target Christian denominations in litigation.

Radical sex education exploits women and children and throws them into risky sexual situations. CSW is aware that education is the key to changing the next generation. Diane Schneider, representing the National Education Association (NEA) on a CSW panel said that "oral sex, masturbation, and orgasms need to be taught in education." She also said students should not be able to "opt out" of such classes, meaning parents would not be able to object having their child in the class. Her comments also targeted traditional marriage, heterosexuals, and mothers that want to "stay at home" as outdated.

Every year, the University of Kansas Commission on the Status of Women puts on a production of *The Vagina Monologues* which even feminists consider anti-men and anti-traditional male/female relationships.

The UN CSW includes Iran as one of its 45 members. Iran has blamed women for earthquakes and approves of jailing them for having a suntan. Should

we take seriously, a commission that includes those who consistently violate human rights. Two weeks after Iran was elected to the UN CSW, the UN CSW passed a resolution condemning Israel's treatment of Palestinian women. This was the only country addressed by the UN CSW even though women suffer greatly in Arabic countries.

I think it would be unfortunate to let one commission speak for all women. Many of its view are contrary to many people's beliefs. We need to invigorate our economy and provide opportunities for women and men so their families are provided for. The CSW often provides misinformation.

Sincerely,

Jennifer Grimwood

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 58

Analysis

Senate Bill 58 adds two new superior court judges to the Anchorage Bench. The Judges will be assigned civil caseloads. This fiscal note reflects the cost of the new judges along with their accompanying staff and one-time office-related expenses. This note also reflects the capital remodel costs necessary to accommodate two new superior court judges in the Nesbett Courthouse. These remodel costs are also included in the Alaska Court System's capital budget request as part of the court's long-term capital goals. Should the court's capital budget request be fully funded those costs would be removed from this note.

FISCAL NOTE #2
Alaska Judicial Council

Analysis

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 58

SB 58 adds two new superior court judges in the Third Judicial District. This fiscal note assumes that these positions will be filled separately, either because they will be in different venues or because the court may not have the facilities to proceed immediately on two new positions in a single venue. The Judicial Council's initial costs of filling these vacancies include funds needed to solicit applicants, to conduct investigations into their qualifications, and to convene a meeting to interview applicants and nominate the most qualified to the governor for appointment. A breakdown of costs is as follows:

Travel	Council members' travel to two meetings		9,000
Contractual	Printing, mailing, survey hosting, data analysis, advertising, miscellaneous		14,100
Commodities	Paper		100
		Total	23,200

If the Alaska Court System is able and willing to fill the two new positions simultaneously, and if the positions are in the same venue, the Judicial Council will coordinate its solicitation and screening of judicial applicants to achieve lower costs. In that case, the Council's funding request would be as follows:

Travel	Council members' travel to one meeting		5,500
Contractual	Printing, mailing, survey hosting, data analysis, advertising, miscellaneous		7,900
Commodities	Paper		100
		Total	13,500

An average superior court judge serves for twelve years. Costs associated with filling these positions in the future are amortized over the next twelve years.

FISCAL NOTE #3

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 58

Analysis

This bill provides for two new superior court judges in Anchorage. These positions are expected to handle a civil caseload of Child in Need of Aid (CINA) matters. The additional judicial positions are expected to increase weekly court room appearances and will increase the workload associated with all civil cases as the Agency attempts to prepare its cases in a timely manner to meet the demand of increased court hearings.

The civil division has six attorneys who are required to appear before the current ten superior court judges handling CINA matters. The Agency anticipates the need for a single attorney position in the civil division with the additional support of a law office assistant to meet the anticipated workload increase.

FISCAL NOTE #4

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 58

Analysis

This bill will create two new Superior Court judge positions in the Third Judicial District. The agency has been advised that these two judges will be handling Anchorage Child in Need of Aid (CINA) matters. Currently, there are ten Anchorage Superior Court judges handling CINA matters. The addition of two new Superior Court judges will considerably increase the number of CINA cases heard on a weekly basis.

The Office of Public Advocacy currently has five full time staff attorneys in Anchorage who represent parents in CINA matters. These attorneys are within a staff section with a total of eight attorneys and two support staff (one law office assistant and one paralegal). The addition of two more judges will greatly increase the demands on these attorneys and staff to prepare for and appear in court for CINA matters. In order to adequately address the increased demands on the agency, the agency will need one additional attorney and one additional law office assistant.

FISCAL NOTE #7

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 58

Analysis

This bill adds two new civil judges in Anchorage. Currently a significant portion of cases before the Anchorage judges are CINA (child in need of aid) cases. The addition of two new judges would increase the capacity of the court system to handle CINA cases, but would require an additional attorney in the Anchorage Child Protection Section to utilize the improved capacity to reduce delays inherent in the current system. To the extent the judges increase the capacity of the court system to process criminal cases, the criminal division of the department would similarly experience increased workloads. The Child Protection Section would need at least 1 FTE attorney position and a .5 support position to meet the increased demand on time and resources.

State Capitol
Juneau, Alaska 99801-1182

Dear Senator Hoffman:

During the Senate Finance Committee hearing on SB 58 on Thursday, March 10th you asked for a three-year average of case filings per judge in both the superior and district courts for each court location. The attached spreadsheet shows the cases per judge for each of the last three fiscal years and a three-year average for each court location and for both superior and district courts. [1]

I hope this answers your questions. Please let me know if you would like additional information.

Sincerely,

Doug Wooliver

The Honorable Lesil McGuire
Member, Senate Finance Committee
Alaska State Legislature
State Capitol
Juneau, Alaska 99801-1182

Dear Senator McGuire:

In both the Senate Judiciary Committee and the Senate Finance Committee hearings on SB 58 you expressed concern about the limited number of women judges in Alaska, particularly the limited number of women superior court judges. In response to your concerns Larry Cohn (Executive Director, Alaska Judicial Council) provided you with a brief history of the number of women who apply for judgeships and the number of women the Council forwards to the governor for possible appointment. In order to supplement the information provided by Mr. Cohn I am attaching a list of all the women judges who are currently serving in Alaska. Confirming your concerns, of the 40 superior court judges in Alaska, only 5 are women.

I included magistrates in my list because, though they are hired directly by the court system and not part of the judicial selection process that goes through the Council and the governor, they are judges and hear thousands of cases each year.

Sincerely,

Doug Wooliver
Administrative Attorney
Alaska Court System

The Honorable Joe Thomas
Member, Senate Finance Committee
Alaska State Legislature
State Capitol
Juneau, Alaska 99801-1182

Dear Senator Thomas:

During the March 10th Senate Finance Committee hearing on SB 58 you asked for the percentage of Anchorage Child in Need of Aid cases that have had a contested issue and are now before a superior court judge rather than a standing master. There are currently 686 active CINA cases in the Anchorage Superior Court, 56 percent, or 388 cases, are being handled by a superior court judge and not a master.

I hope this answers your question; please let me know if you would like any additional information.

Sincerely,

Doug Wooliver
Administrative Attorney
Alaska Court System

cc: Senate Finance Committee Members

ALASKA COURT SYSTEM

Sponsor Statement
SB 58

The Alaska Supreme Court is asking for two new superior court judges in Anchorage. The judges will be assigned to civil cases.

Additional judges are needed because Anchorage superior court judges have the highest caseloads in the state and a combination of devoting more time to Child in Need of Aid (CINA) cases and an ever-increasing number of domestic relations cases where the parties choose to litigate their case without the assistance of attorneys has created a workload that is unsustainable.

Although some of the additional work comes from an increase in case filings, much is the result of improved practices that better meet the needs of those who come to court. This is particularly true with CINA cases.

One change that has impacted workload involves how CINA cases are assigned to judges. Prior practice was to have standing masters (specialists who hear cases and make recommendations to judges) preside over all phases of a case with the exception of contested hearings. If a hearing was contested it would be assigned to an available superior court judge who would resolve the contested issue and then return the case to the standing master. Although that practice saved superior court time, it led to other problems as the family was shuffled back and forth between judges.

The new practice begins the same as the old; a CINA case starts with a master until there is a contested issue. However, once that occurs the case is permanently assigned to a superior court judge; it does not return to the master. This eliminates the judge-shuffling and allows the judge and the family to get to know each other. All parties agree that familiarity improves both the process and the outcome for the families. However, this model results in superior court judges spending more of their time on these cases.

In addition to CINA cases, another prime driver behind the current workload is the prevalence of unrepresented litigants in domestic relations cases. Although we do not have historical statistics that track these cases, Alaska judges, like judges from across the country, have seen a significant increase over the past several years.

Judges cite a list of time-consuming challenges that arise when counsel is absent from one side or both sides. Frequent motion practice, arguments unrelated to the relevant legal issues, delays stemming from the failure to submit needed information and judicial time spent calculating child support awards are some of those challenges. However, even though these litigants take more time, their cases are as important as those where the parties have lawyers and the judiciary is committed to ensuring that they too can meaningfully access the court.

Adding two new judges will not significantly reduce the workload of the Anchorage superior court (Anchorage superior court judges will still be the busiest superior court judges in the state), but it will provide some relief as the court works to develop alternative ways to manage that workload. Thank you for considering this request.

Alaska State Legislature
State Capitol
Juneau, Alaska 99801-1182

Dear Senator Stedman:

You have in your committee SB 58 which was introduced by request of the Alaska Supreme Court and adds two new superior court judges to the Anchorage Superior Court. The companion bill in the House is HB 133 and a house member asked for a breakdown of the judicial caseloads for each of the superior court locations. Because I thought that your committee might be interested in this same information, I am sending it to you as well. The breakdown shows the number of superior court cases filed divided by the number of superior court judges for each superior court location. This information covers cases filed in FY 2010.

Location	Cases Filed	Number of Judges	Cases Per Judge
Anchorage	10,298	15	687
Juneau	1,140	2	570
Fairbanks	3,212	6	535
Kenai	1,515	3	505
Valdez	192	0.4	480
Palmer	1,910	4	478
Bethel	853	2	427
Dillingham	351	1	351
Nome	330	1	330
Ketchikan	632	2	316
Kodiak	287	1	287
Sitka	285	1	285
Kotzebue	259	1	259
Barrow	223	1	223

I hope you find this useful. Pleas let me know if you would like any additional information.

Sincerely,

Doug Wooliver
Administrative Attorney
Alaska Court System

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSSB 59(L&C)

SB 59 extends the Dental Board to June 30, 2016. In accordance with AS 08.03.020 funding extends one year following the termination date allowing the Board to conclude its affairs. The FY2012 funding is included in the Operating Budget request and costs shown are an average of direct costs for a biennial licensing period.

Travel expenses represent transportation and per diem for the 9 member board and 1 staff to meet at least 4 times each year in accordance with AS 08.36.040.

The program is required to cover costs with licensing fees under AS 08.01.065, and revenue generated by board fees are anticipated to cover its full operating costs. New funds are not required to implement this bill.

Alaska Legal Services Corporation

Serving Alaska Communities and Families for over 40 years

Who we are:

- Alaska Legal Services Corporation (ALSC) is a private, non-profit law firm that provides free legal services to seniors and low-income Alaskans.

Our Mission:

- To provide meaningful access to justice in resolving civil legal problems for low-income clients, thus promoting family stability and reducing the legal consequences of poverty.

Who We Serve:

- ❖ Alaskans below 125% of the Alaska poverty ceiling
- ❖ Seniors --- over 600 per year
- ❖ Children --- nearly 1/2 of those assisted have children in their households
- ❖ Domestic Violence Victims --- over 400 cases per year
- ❖ Rural residents --- 38% of all clients served resided in rural communities
- ❖ Veterans---preventing homelessness and assuring access to healthcare

Community Need:

- An estimated 88,000 Alaskans live below the poverty ceiling. At present, there is only one ALSC attorney for every 4,000 Alaskans living in poverty.
- In 2009, ALSC received over 3,400 inquiries and 2,834 applications for legal help.
- We turned away over 500 families that could have been helped if we had the resources.
- Many more did not apply, knowing our resource limitations.

Providing Statewide Access To Justice With Offices In:

Anchorage	Bethel	Dillingham	Fairbanks	Juneau
Kenai	Ketchikan	Kotzebue	Nome	Palmer

Strong Local Support:

- Nearly all of our offices enjoy local financial support. Each office sets its own case acceptance priorities based on local needs.

Our Services:

Legal Advice and Counseling	Court Representation	Advocacy
Community Legal Clinics	On-line Self-Help	Pro Bono program

Types of Cases:

Domestic Violence Protection	Foreclosures	Family Law
Wills & Healthcare Directives	Public Benefits	Consumer Protection
Housing Protection	Debtor Relief	
Health care Advocacy	Employment	
Probates & Estates		
Veteran's Benefits		

Access to Justice for Alaskans in Need

Alaska Legal Services Corporation

Serving Victims of Domestic Violence

Who we are:

- ALSC is a non-profit civil legal aid agency, providing free legal services to Alaska's poor. We are by far the largest provider of legal services to domestic violence victims in Alaska. We served over 400 families experiencing domestic violence last year alone. Children were present in 80% of these households.
- ALSC has provided legal assistance, including representation to domestic violence victims, for over 40 years, with a particular emphasis on service delivery in Alaska's rural areas.

Community need:

- In 2009, ALSC saw a 15% increase in requests for assistance from victims of abuse. Our ability to help is limited by available resources, forcing us to turn away over 500 families each year.
- The Governor's initiative funds stronger criminal efforts but relies on pro bono efforts to increase civil representation. The lack of dedicated funding for increased civil representation is a weak link in this initiative.

What we do:

- ALSC attorneys provide advice and/or representation aimed at increasing victims' safety and long term stability by keeping or securing housing, obtaining orders of protection and assisting with income maintenance issues such as securing child support and public benefits.

Why we do what we do:

- Alaska's rates of domestic violence and sexual assault are among the highest in the nation. A 2003 study seeking to explain a decline in domestic violence found the provision of civil legal services to victims significantly lowers the incidence of abuse and was the **only** service designed to help victims having this impact.
- Domestic Violence is the number one precursor to child abuse and neglect. Services to victims also protect children.
- Legal services address practical matters that make leaving abusive relationships a realistic alternative.

April 9, 2011

Senator Lesil McGuire
Alaska Capitol, Room 125
Juneau, AK 99801-1182

Subject: Support for SB 62, Civil Legal Services Fund

Dear Senator McGuire:

The Alaska Commission on Aging (ACoA) is pleased to offer our strong support of SB 62, a bill to establish a mechanism to enhance funding for the Alaska Legal Services Corporation (ALSC) by allowing the Legislature to appropriate up to 25% of filing fees paid annually to the Alaska Court System in addition to annual appropriations approved from the General Fund. This bill is sponsored by you and co-sponsored by Senators French, Paskvan, Wielechowski, and Menard.

ALSC addresses the civil legal needs of low-income Alaskans by providing subsidized and no-cost legal representation. Currently, there are approximately 88,000 Alaskans who live below 125% of the poverty level who are eligible for these services, including Alaskan seniors. Over the years, state funding has declined while the number of low-income people in need of legal services has increased. This legislation is designed to help increase funding levels for ALSC appropriate for serving a growing number of Alaskans needing these services.

Legal assistance for seniors is provided statewide by ALSC and assures that seniors, especially those at greatest social and economic risk, have access to the civil justice system. According to ALSC, more than 600 older Alaskans receive legal services annually through this statewide nonprofit organization that does not include community outreach activities to seniors. Examples of ALSC assistance provided to seniors include help with consumer and family law such as establishing Miller Trusts, guardianships, conservatorships, and wills; assistance with housing issues including resolving renter-landlord disputes, foreclosures, and reverse mortgages; among other forms of legal assistance. Alaska Legal Services employs approximately twenty attorneys statewide. Due to funding limitations, they are only able to accept one in five cases of all people who call for help.

The ACoA supports SB 62 to improve access to civil legal representation for Alaska's most needy population. Access to legal information, advice, and assistance helps older Alaskans preserve financial and personal independence, maintain control of their finance and health care decisions, maintain appropriate family relationships, and protect personal assets and well-being. Thank you for sponsoring this important legislation. Please feel free to contact Denise Daniello, ACoA's executive director, by phone (465-4879) or email (denise.daniello@alaska.gov) should you have questions or require additional information.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Re: SB 62 – Civil Legal Services Fund

Dear Senator McGuire,

On behalf of the Alaska Mental Health Board and Advisory Board on Alcoholism and Drug Abuse, I would like to express our appreciation of your support for legal services for Alaska's indigent and vulnerable citizens. For individuals experiencing mental health and substance use disorders, the non-profit public interest firms are often the only source of legal assistance. Ensuring these firms' ability to serve their clients ensures that Alaskans with disabilities and families affected by substance abuse are able to access the legal system when in need.

Alaska Legal Services, the Disability Law Center, and the Alaska Network on Domestic Violence and Sexual Assault all provide services imperative to the health and safety of vulnerable Alaskans. Without the high quality services offered by their lawyers, paralegals, advocates and staff, many seniors, victims of violence and people experiencing disabilities would be left alone and without recourse when faced with unfair or unjust treatment.

The Boards' appreciate your advocacy on behalf of these agencies, but more importantly, on behalf of their clients and the entire justice system in Alaska.

Sincerely,

J. Kate Burkhart
Executive Director

RE: Letter of Support for SB 62

Dear Senator McGuire:

On behalf of the Alaska Network on Domestic Violence & Sexual Assault and the women and children that we serve, we thank you for bringing forth SB 62 to provide a consistent funding stream for civil legal services.

Civil legal services are a critical piece to helping end domestic violence in Alaska. Studies have found that civil legal services are the most effective means of ending violence in victim's lives. Why? Because when a victim makes a decision to leave her abuser and goes to a friend's house or shelter, she is just beginning her journey to obtain safety and basic needs for her and her children. In order to succeed, she must meet the basic needs of economic support, protective orders for safety, gaining temporary custody of her children, and safe and permanent housing. Without the assistance of an attorney, victims can lose custody of their children, fail to receive economic support and increase their risk of greater violence. The result too often is that victims return to abusers for economic support and to monitor the interactions between the abuser, who gains custody, and the children.

While there are many attorneys in Alaska that volunteer time and resources to assisting victims, the demand for civil legal services far exceeds the available resources. The Network's Pro Bono program works closely with Alaska Legal Services Corporation to assist victims in finding attorneys, but they too are limited by availability of resources. SB 62 will insure that a consistent funding stream is available for the legislature, in their discretion, to appropriate to those organizations that serve low-income Alaskans. SB 62 will insure that these Alaskans are provided with services necessary to protect their guarantee of "equal rights, opportunities, and protection under the law" as declared by the Alaska Constitution.

Thank you for sponsoring this important piece of legislation.

Sincerely,

Peggy Brown, Executive Director

Senator Lesil McGuire

SPONSOR STATEMENT for Senate Bill 62

"An Act allowing appropriations to the civil legal services fund from court filing fees."

This bill is designed to help fund civil legal services for low-income Alaskans. Senate Bill 62 will provide a mechanism for funding the Alaska Legal Services Corporation (ALSC), by allowing the legislature to appropriate up to 25 percent of filing fees paid to the Alaska Court System during the previous fiscal year into the Civil Legal Services Fund.

The Alaska Legal Services Corporation was established in 1966 to address the civil legal aid needs of low-income Alaskans. ALSC is not a state agency, but is instead a nonprofit charitable 501(c)(3) whose funding comes from a variety of state, federal, and private sources. Over the last several years ALSC funding has dwindled, from $4.2 million as of 1987 to less than $3.1 million as of 2010, while it struggles to serve a growing number of poverty-level applicants. Appropriations from the State of Alaska that were once as high as $1.2 million in FY84 are currently at $350,000. Senate Bill 62 aims to correct this lack of funding and helps ensure civil legal representation for Alaska's most needy population.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB062
2012 LEGISLATIVE SESSION

Analysis

The Office of Public Advocacy's enabling statute includes a provision that requires OPA to provide legal representation "to indigent parties in cases involving child custody in which the opposing party is represented by counsel provided by a public agency." AS 44.21.410(a)(4). This portion of OPA's enabling statute was the result of a 1979 Alaska Supreme Court decision, *Flores v. Flores*, 589 P.2d 893 (Alaska 1979).

In *Flores*, the Alaska Supreme Court determined that a parent has a constitutional right to counsel in a child custody action where the indigent parent's opponent is represented by a "public agency." Mr. Flores, the indigent parent's opponent, was represented by Alaska Legal Services Corporation (ALSC) in the underlying child custody matter. The majority opinion in *Flores* identified ALSC as a public agency for purposes of triggering the state's obligation to provide counsel to the other parent.

The Flores court did not define "public agency" or set forth criteria for determining whether an organization is a public agency for these purposes. Likewise, OPA's enabling statute fails to define the term "public agency."

If the Alaska Legal Services Corporation or similar organizations receive additional public funding to represent parties in child custody matters, this will trigger additional obligations by the Office of Public Advocacy to provide representation to indigent parties in those matters. Since the agency cannot determine in how many additional cases it may be appointed, it cannot accurately predict the fiscal impact on the agency.

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. SB 66

Analysis

This bill establishes a new market tax credit assistance program within AIDEA and enables AIDEA to use money in its enterprise development account to fund guarantees and loans AIDEA would make under this program.

This legislation has no operational fiscal impact to AIDEA.

CSSB 66(L&C)

An Act creating a new markets tax credit assistance guarantee and loan program within the Alaska Industrial Development and Export Authority; and providing for an effective date.

Sectional Analysis

Section	Analysis
1	Amends AS 44.88.155(c) to allow assets of the enterprise development account to be used to fund a new markets tax credit assistance guarantee or loan
2	Amends AS 44.88 by adding a new article – New Markets Tax Credit Assistance Program. 44.88.700 allows AIDEA to issue guarantees and make loans to help finance projects funded through a federal new markets tax credit program. The assistance is limited to projects within Alaska for which tax credits are allocated by a qualified community development entity; the authority shall determine that the project will promote economic development; the authority may agree to certain restrictions and guidelines arising from the federal program. 44.88.710 provides that a guarantee does not create a debt or liability of the state; a guarantee may not be canceled except under its terms 44.88.715 establishes applicant qualifications 44.88.720 requires an applicant to provide certain information required by AIDEA in regulation including the potential submission of an economic benefit analysis prepared by a person acceptable to the authority. 44.88.730 establishes condition of a loan guarantee 44.88.740 requires financial institution holding a guarantee shall service the loan 44.88.750 allows AIDEA to make leverage loans if AIDEA determines an applicant is not able to obtain a leveraged loan from a financial institution 44.88.760 sets a cumulative $40 million limit under this program 44.88.770 provide AIDEA the authority to adopt regulations, establish terms and conditions, execute contracts, charge fees and interest rates, acquire property through purchase, transfer or foreclosure 44.88.799 defines terms used in the new article
3	Immediate effective date

ALASKA ENERGY AUTHORITY

Bill Hearing Information Sheet
Prepared by AIDEA
Senate Bill 66

"An Act creating a new markets tax credit assistance guarantee and loan program within the Alaska Industrial Development and Export Authority; and providing for an effective date."

This legislation will enable AIDEA to foster more economic development in Alaska, especially in areas with great need for new investment. This program requires both equity and debt financing and there is a scarcity of debt capital available. This legislation provides the mechanism for AIDEA to issue guarantees and make loans to assist in financing projects in these underserved and underdeveloped areas.

The federal New Markets Tax Credit (NMTC) Program permits taxpayers to receive a credit against Federal income taxes for making qualified equity investments in designated Community Development Entities (CDEs). Essentially, the program provides substantial tax credits to equity investors to projects, which also borrow funds from what is termed a leveraged lender. By combining tax credits on the equity side with favorable loan conditions on the debt side, the cost of financing a qualifying project can be reduced by between 20-30%.

The program offers these benefits to support investment in economically disadvantaged areas. Substantially all of the qualified equity investment must be used by the CDE to provide investments in low-income communities. The credit provided to the equity investor totals 39 percent of the cost of the investment and is claimed over a seven-year credit allowance period. In each of the first three years, the investor receives a credit equal to five percent of the total amount paid for the stock or capital interest at the time of purchase. For the final four years, the value of the credit is six percent annually. Investors may not redeem their investments in CDEs prior to the conclusion of the seven-year period.

The program was reauthorized by Congress in December 2010 for an additional two years and has tax credits allocations worth $3.5 billion for each year. To date, the Fund has made 495 awards totaling $26 billion in allocation authority.

The program uses census tracts as the geographic unit and only projects in Qualified Census Tracts (QCT) are eligible for the NMTC tax credits. QCTs are those that meet at least one of the following requirements:

- Poverty rate greater than 20%, and/or
- Median income less than 80% of the state/metropolitan median.

There are two portions to financing through the NMTC program.

- The equity portion as described above; and

- The second is a loan usually from a bank that is called a leveraged lender under the program. It is this debt portion of the program that has suffered from the economic downturn because banks have been unwilling to lend and as a result there is a shortage of debt to complete many NMTC deals. While the NMTC program has been a success its current usage is limited by a lack of credit. The leveraged lender is limited to interest only payments for the seven years of the tax credit period. At the end of the seven years the loan is retired through a balloon payment or refinanced.

In order to work, NMTC funding, therefore, must have equity investors seeking tax credits and a willing leveraged lender. SB66 seeks to facilitate adequate participation by debt lenders to support the equity portions of this program.

SB66 will vitalize the NMTC program in Alaska by allowing AIDEA to provide loan guarantees to the leveraged lender in an NMTC deal. This AIDEA guarantee would incentivize participation by financial institutions. Before issuing a NMTC guarantee or a loan, the Authority will determine that the project will promote economic development in the state. In cases where the applicant can show that they have been unable to obtain a leveraged loan, under commercially reasonable terms, from two financial institutions then AIDEA may make a direct leveraged loan to the project.

The combined outstanding principal balance of AIDEA's loan guarantees and loans may not exceed $40 million.

Re: Enhancing the Value of the Federal New Markets Tax Credit Program in Alaska

Introduction

Some weeks ago, you asked me for my thoughts, initially in draft form, on how the Alaska Industrial Development and Export Authority ("AIDEA" or the "Agency") could help stimulate and facilitate New Markets Tax Credit ("NMTC") transactions in the State of Alaska. In this regard, we had preliminary discussions regarding the possibility that AIDEA might act as the leveraged lender in NMTC transactions. You asked me to help determine how such a program might work, consider how AIDEA might protect itself from exposure in acting as a leveraged lender, and suggest other ways in which AIDEA might assist in making the NMTC program work in Alaska. Finally, you asked me to address several specific questions that relate to AIDEA acting as a NMTC leveraged lender.

In response, I submitted a draft memo to AIDEA on October 4, 2010 and attended a meeting to discuss these topics with you at AIDEA's offices on October 6, 2010. As part of that meeting, we met with representatives of Alaska Growth Capital, the only Alaska based NMTC allocatee, to hear and understand their views on how AIDEA could be helpful in promoting NMTC transactions in Alaska. Following that meeting, you asked me to revise my draft memo in light of our discussions and submit this final version to you.

Background

In December 2000, Congress enacted the New Markets Tax Credit Program as part of the Community Renewal Tax Relief Act of that same year. Intended to address the lack of investment capital available for business and other economic development activities in low income communities, the Program operates by providing a federal subsidy to many different project types developed in eligible areas. The Program is codified at Sec. 45D of the Internal Revenue Code and is administered by the Community Development Financial Institutions ("CDFI") Fund in the Department of the Treasury.

Once a year, through a highly competitive process, the credits are awarded to financial institutions that are certified by the CDFI Fund as Community Development Entities ("CDEs"). The CDEs then offer the credits to investors in exchange for equity capital, which is then used to subsidize below market financing for eligible projects. Except for rental housing, NMTCs can be used to subsidize almost any type of business or real estate project, including community facilities and other nonprofit uses such as schools, health clinics and cultural institutions. In addition, and under certain circumstances, even residential rental units can qualify for the subsidy if they are part of a mixed-use development.

Under the NMTC Program, it is possible for a project to obtain a loan at a below market rate of interest, or to obtain the equivalent of an equity subsidy of approximately 15% of total project cost. However, there is no guarantee as to either the type or level of subsidy available to a particular project. Both will depend upon the outcome of negotiations among and between the project developer, the CDE and the tax credit investor.

AIDEA Acting as a NMTC Leveraged Lender

The NMTC subsidy is delivered to specific projects via discrete transactions that generally require the participation of a lender to provide debt as a portion of the financing. (See attached Structure Chart.) Every dollar of debt provided to a NMTC transaction attracts approximately $.35 in federal equity subsidy, though the actual amount will vary from transaction to transaction. Recently, due to the financial crisis and the resulting lack of available credit, it has become increasingly difficult to find commercial lenders to participate in these transactions, thereby diminishing the use of the federal subsidy in Alaska and elsewhere.

The lack of leveraged lenders currently participating in the Program creates a need for AIDEA or some other source to fulfill that role. By creating a loan fund, or otherwise directing loans to NMTC transactions, AIDEA could stimulate the delivery of federal dollars to projects within Alaska, and do so in such a way as to exert its influence over which types of projects receive the subsidy. It is anticipated that this initiative would be at little or no cost to the State because the NMTC Program permits the leveraged lender to be paid a market rate of interest on the loan and then allows the repayment of the principal in full at the end of the seven year NMTC compliance period.

Specific Questions Regarding AIDEA's Possible Role as a NMTC Leveraged Lender

You have asked me to address the following specific questions regarding AIDEA's possible role as a NMTC leveraged lender:

1. What, if any, are the federal requirements for being a leveraged lender?

   There are no federal requirements of which I am aware for acting as a leveraged lender.

2. Are there any exemptions from federal requirements for public entities?

   N/A. See No. 1 above.

3. What are the benefits for AIDEA in being the leveraged lender?

   The benefits of AIDEA in being a NMTC leveraged lender are that AIDEA could stimulate the delivery of federal dollars to projects in Alaska while exercising its

influence on the types of projects that receive the federal subsidy. AIDEA could also earn a reasonable rate of return by making leveraged loans.

4. What are the disadvantages?

   The disadvantages are that such loans would entail credit risk, and that that risk would be compounded by the fact that the loans are nonrecourse over the seven year NMTC compliance period. In addition, as a leveraged lender, AIDEA would have only an indirect security interest in the underlying project asset. Also to be considered are the opportunity costs of utilizing AIDEA funds in NMTC projects rather than for other programs and purposes.

5. How can a leveraged lender minimize its risk when it has no recourse to the assets of the QALICB for seven years?

   Leveraged lenders can attempt to minimize their risk in a number of ways, including: (1) implementing appropriate underwriting standards and procedures; (2) acting as the servicing agent for the CDE loans; (3) obtaining a letter of credit to mitigate construction risk; (4) obtaining a priority interest in cash flow distributions and other proceeds that may be received; (5) obtaining additional collateral and guarantees, so long as they are not derived from the underlying project; (6) establishing the right to assume management control of the investment fund in the event problems arise. It is important to note, however, that most of these rights would have to be negotiated with the other parties to the transaction, including the equity investor and the CDE, who might not agree to them.

6. Are there other state development finance authorities that play the role of leveraged lender? If so, please provide a list.

   I have not done a 50 state review of the practices of state development finance authorities with regard to making leveraged loans. However, I understand that in connection with its own NMTC allocation, the New Jersey Economic Development Authority provides a subordinated leveraged loan product to facilitate its NMTC transactions.

Other Ways in Which AIDEA Might Help
Facilitate the NMTC Program in Alaska

The following are several other ideas about how AIDEA might help facilitate NMTC transactions within the State. First, AIDEA could examine its existing grant and loan programs to determine whether these programs can be modified in some way so as to facilitate their use in conjunction with the NMTC structure. Second, AIDEA could consider being the guarantor of all or a portion of independent leveraged loans, similar to the SBA loan guaranty program. Third, AIDEA might consider being a guarantor on the compliance indemnity, particularly with regard to targeted population transactions. Fourth, AIDEA might consider acting as the tax credit investor and then syndicating the tax credits to corporate taxpayers. Finally, it would be helpful if there were a procedure for the

expeditious designation of State economic incentive zones so as to help certain projects qualify for the Program.

The October 6, 2010 Meeting at AIDEA

We met at AIDEA's offices on October 6, 2010 to review the draft memo and further discuss how AIDEA could help stimulate and facilitate NMTC transactions in the State of Alaska. As part of that meeting, we met with representatives of Alaska Growth Capital to share our ideas with them and to hear their views on how AIDEA could help in promoting NMTC transactions. The meeting concluded with the understanding that AIDEA should stimulate and facilitate NMTC transactions by participating as both a guarantor of NMTC leveraged loans and as a lender of last resort to NMTC transactions if and when the existence of the AIDEA guarantee proves insufficient to cause a private financial institution to make the particular leveraged loan.

This conclusion was reached for two basic reasons. First, due in part to the lack of available credit in general, it is exceedingly difficult at the present time for NMTC projects to obtain leveraged loans from private financial institutions. Guaranteeing or providing leveraged loans should help alleviate a serious bottleneck that has developed and is preventing many eligible NMTC transactions from moving forward.

Second, of the various roles considered for AIDEA, acting as a gurantor or provider of leveraged loans was deemed to be the one most consistent with AIDEA's historic role in promoting economic development. One of AIDEA's three major program initiatives has been its loan participation program, in which the Agency works closely with the private sector to provide loans to economic development projects. Acting as a leveraged loan guarantor or provider, therefore, is closely related to AIDEA's experience in debt financing, and is consistent with the principle that AIDEA's approach should be to assist private financial institutions in providing that financing, stepping in directly only when the private sector does not respond.

In concluding, there was also discussion at the meeting of other ways in which AIDEA might help facilitate NMTC use in Alaska, specifically in the rural hubs. For example, there was some consideration given to AIDEA serving as a guarantor on the tax credit compliance indemnity, particularly with regard to targeted population transactions, where projects not located in NMTC qualified areas are nonetheless eligible for the credits because of the characteristics of the project's customers, employees or owners. Because obtaining the tax credit equity investment in these transactions has been problematic, this is an area in which in the future AIDEA may wish to consider playing a role.

ALASKA GROWTH CAPITAL

An ASRC Company

February 03, 2011

The Honorable Bob Herron
Chair, Special Committee on Economic Development, Trade and Tourism
Alaska State Legislature
State Capitol Room 411
Juneau, Alaska 99801

Re: HB120, "An Act creating a new markets tax credit assistance guarantee and loan program within the Alaska Industrial Development and Export Authority; and providing for an effective date."

Dear Representative Herron:

I am writing on behalf of Alaska Growth Capital (AGC) to express support for HB120. This bill allows Alaska Industrial Development and Export Authority (AIDEA) to guarantee loans for use with US Treasury's New Markets Tax Credits (NMTC) program. We at Alaska Growth Capital are sure this bill will result in more economic development in Alaska.

Alaska Growth Capital has participated in the New Markets Tax Credit program since 2004. Since then, AGC has been awarded $90 million in NMTC allocation. Our most recent work in the NMTC program has been to leverage equity investments for projects that experience gaps in their financing. One of our major accomplishments has been the financing of Maniilaq Association's Elder Care Facility. This transaction utilized equity from New York Community Bank that allows the Elder Care Facility to offset expected losses during the first years after opening.

Lenders must accept limitations on loans made to NMTC projects, which drives away their desire to participate. To maximize community benefit, loans to an NMTC project must be interest-only for seven (7) years. During that time the lender must also sign a forbearance agreement preventing it from foreclosing on the loan. Finally, during that seven (7) year period, the lender's lien on property is indirect. These provisions benefit the community in which NMTC investments are occur but they are often too arduous for banks to accept without guarantees or additional forms of security.

3900 C Street, Suite 302 * Anchorage, AK 99503-5965 * (907) 339-6760 * (907) 339-6771 Fax

Competition for allocation of New Markets Tax Credits, the equity from investors and loans to make this program possible is intense, particularly for Alaskans. Projects in New York or Chicago have the benefit of being close to the major financial institutions. If a potential investor has questions, they can often "go down the street" to inspect the project and speak with staff. That is often impractical if the project is in rural Alaska and the investor is in New York.

Compounding this problem, NMTC program has seen fewer and fewer banks provide loans to projects. These loans are essential to realizing the economic benefits of New Markets Tax Credits; without them projects must self-leverage with existing cash. As a result, lending is scarce and thus expensive in this program. AIDEA's guarantee will lower the borrowing costs for projects, which can be the difference between projects that get built and projects that stay on the drawing board. Further, loans often provide faster and larger capital sources than fundraising campaigns. Passing HB120 will help to alleviate these problems and make Alaska more competitive for this important program.

I respectfully request you to schedule hearings on this piece of legislation and for your support. I am happy to answer any questions; should you or your committee have any please contact me at your convenience.

Sincerely,

Hugh Short, President/CEO
Alaska Growth Capital

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 68
2012 LEGISLATIVE SESSION

Analysis

Senate Bill 68 allows the Alaska Commercial Fishing and Agriculture Bank (CFAB) to make loans for capital investment of operating capital to a shore-based fish processor, a timber processor, or an agricultural processor or harvester with facilities located in Alaska. This bill amends sections of AS 44.81 related to board composition, loans, records, and lobbying contracts of CFAB. It also adds a new section, AS 44.81.275, which stipulates that the Department of Commerce, Community, and Economic Development conduct regular banking evaluations.

The Division of Banking and Securities examination staff will examine CFAB once every three years. The one week examination will include the evaluation of the bank's loan portfolio quality and the appropriateness and effectiveness of policies, practices, and management ability to carry out the bank's statutory purpose. Examiners will prepare a written Report of Examination and distribute it to CFAB and the legislative auditor.
The division will use existing examination staff to conduct the examination, so no additional costs are anticipated for personal services.

Actual examination expenses (examiner hours and travel) are reimbursed by CFAB, and go into the general fund. The division up-fronts travel costs and must include travel expenditures for CFAB examinations in its travel budget. Therefore, this fiscal note for travel every three years, beginning in FY 2014, is requested in the amount of $5.8.

Revenue will increase every three years by approximately $22.0, which is the estimated reimbursement of examination costs as detailed below.

Estimated Examiner Hours	$16.0
Estimated Travel Costs	$5.8
Total Estimated Cost to Conduct Examination	$22.0

Sent Via E-Mail and USPS

Senator John Coghill
State Capitol Room 504
Juneau AK, 99801

Re: SB68

Senator Coghill;

Following is the information requested by the Senate Finance Committee. This information is as of 12/31/11.

CFAB's Delinquency rate is 3.2%
Since the beginning of the current fiscal year (6/1/11) we have modified one (1) loan due to the borrower's inability to make their payment.
In addition 12 other loans were modified to allow for changes with regard to the borrowers or collateral. All of these loans are current.

As of 12/31/11 we have a total of 308 loans outstanding for a total dollar amount of $25.022.207.

Those loans break down as follows:

TYPE	Number #	Dollar Amt. $
Commercial Fishing	288	19,535,832
Agriculture	1	126,504
Processors	8	2,607,239
Tourism	11	2.752.633
All Loans	308	$25,022,207

Our lender, CoBank, advances us funds based on a ratio of 80% of each loan. For example if we made a loan of $100,000 they would advance us $80,000. So given CFAB's current capital base, and assuming all other things remain equal, we would be able to make up to a total of $100,000,000 in loans. CFAB's portfolio hit a high of about $80,000,000 in the mid 80's, however the total portfolio of loans has hovered around $32,000,000 or lower for over 10 years.

A concern has been expressed that if SB68 should pass that CFAB would run out of money to lend to the commercial fishing industry due to an excess of loans to the tourism industry. This is a valid concern, but one that is mitigated by several factors.

- First, CFAB is in a strong financial position with an average of $20,000,000 of capital on hand at any time.

- Second, CFAB partners with the National Bank for Cooperatives in Denver (CoBank) for any supplemental funding needs. The supplemental funds from CoBank are available on a four to one basis, allowing CFAB to meet up to $100 million in loan demand.

- An unfortunate third mitigating factor is that the demand for loans from the commercial fishing industry has remained relatively flat over the last several years. This appears to be due to the increased competition from government funding sources.

These three strong mitigating factors engender an absolute confidence that should SB68 pass CFAB will continue to meet all financing needs of the commercial fishing industry.

Respectfully,

Lela F. Klingert
President

Executive Message to Members

Each year it is a challenge for me to write a message to CFAB's members that would prove useful in helping each of you to better understand, and perhaps better appreciate, the benefits of your cooperative. Reporting the financial side seems to be the least challenging part. The struggle comes in trying to summarize the less tangible benefits of CFAB.

OPERATING INCOME

A quick comparison of the FY2011 income total of $2.4 million with the FY2010 total of $3.6 million suggests a sharp decline in interest payments. That is not the case, however; the latter number was significantly enhanced by a large volume of previously non-accrued interest as a result of the distribution of EXXON VALDEZ payments. The total was reduced by slightly higher ($33,612 vs. $25,124) interest payments due to increased borrowings occasioned by a greater volume of loans to Members.

OPERATING EXPENSES

CFAB's operating expenses (or "overhead") increased to about $1,495,077, up from $1,378,700. There were several factors at work. Since CFAB is considered a "service" company the majority of its operating costs are its "people" costs (salaries and benefits). While salaries are generally controllable, other benefits, especially with respect to health care requirements, seem to be in a relentlessly upward cost spiral. In addition, the total expenses include several necessary but non-recurring costs that were accelerated and incurred in FY2011 to take advantage of tax deductions.

OTHER FACTORS AND RESULTS

In addition to "normal" operating items, there were some other events affecting CFAB's 2011 results. The largest such item ($512,370) reflects proceeds on claims acquired as part of normal collection activities many years ago. Another item of significance included a contribution to the CFAB Scholarship Fund, in addition to meaningful contributions to two agriculture-related entities (Alaska Agriculture in the Classroom and Alaska Farmland Trust. *See front inside cover*), as well as to a range of community organizations.

The net result of all of the foregoing was net income of $1,298,400 before taxes. Federal and State income tax obligations, totaling just over $268,000, further reduced the total, resulting in Net Proceeds of $1,012,298.

DISPOSITION OF NET PROCEEDS

For the 19th consecutive year the Board of Directors authorized payment of a dividend on the Class B Preferred Stock holdings of Members whose related loans had been paid in full by May 31. These dividends totaled $40,012.

The Board of Directors also approved allocation of a patronage refund totaling $716,293 to all eligible FY2011 Member-Patrons. As is the usual practice, 30% of the allocation will be distributed in cash by mid-September 2011 while the remainder will be retained as Allocated Members' Equity.

The remaining Net Proceeds, totaling $255,993, were transferred to CFAB's Unallocated Surplus account.

OTHER FINANCIAL MATTERS

Other actions and events also affected the total of Members' Equities - the issuance of Class B Preferred Stock in connection with new loans; the distribution of the balance of 2003 Retained Patronage totaling $202,659; the retirement of $135,900 of Class B Preferred Stock associated with loans that had been paid in full in past years; and some lesser items. The combined effect of those transactions, and the retention of Net Proceeds mentioned above, was an increase in total Members' Equities to over $19.2 million.

NEW LOAN ACTIVITY

The number of new loans in FY2011 increased slightly from that in FY2010. The average size of new loans was slightly higher as well. While we have no way of knowing for certain, we believe this is primarily the result of increased costs of vessels, permits, and IFQ's. The three-year comparison below excludes seasonal loans to processors as well as the refinancing of "old" CFAB loans.

Executive Message to Members

Number	Loan Totals
FY2009 48	$7,215,180
FY2010 47	$4,792,003
FY2011 58	$7,375,734

BOARD OF DIRECTORS

At the 2010 Annual Meeting CFAB Members reelected incumbent Directors Alan Otness and Paula Giauque, to three-year terms expiring in 2013. Also, during FY2011 the three-year term of Chris McDowell, one of CFAB's two Directors who are appointed by the Governor of Alaska, expired. Subsequent to the FY2011 year-end, Governor Parnell appointed Adam Galindo, an Anchorage businessman, to the vacant seat.

At CFAB's 2011 Annual Meeting there will be one Director Seat up for election. Prior to receiving this report you will have received a call for nominations. CFAB's nomination and election process is designed to attract the broadest possible participation. We urge every member to consider service as a Director. CFAB is YOUR cooperative, YOU are its owners, and we not only welcome your interest and involvement, we strongly encourage it.

DICK ELIASON

It is with sadness, but also with respect and fond memories, that we call attention to the April passing of Richard "Dick" Eliason of Sitka. A man with a diversified background, which included significant commercial fishing experience, Dick was committed to meaningful service to Alaska and to all of its residents. He served 22 years in the Alaska State Legislature – including a term as Senate President – where he was generally regarded as a true Statesman. Shortly after his retirement from the Legislature, Dick was appointed by Governor Walter Hickel to a 3-year term as a CFAB Director, and was twice reappointed to similar terms by Governor Tony Knowles. Dick served CFAB, its members, and his peers extremely well. He was dedicated and always well-prepared, and his broad experience – coupled with his consensus-building instincts – elicited the best efforts of those around him. We strongly and sincerely urge you to reflect on the ways that Dick Eliason, with others of like commitment, contributed to the valuable services offered by CFAB today.

ANNUAL MEETING

In November 2010, for the first time in many years, CFAB held its Annual Meeting offsite – in Seattle, Washington, during FISH EXPO. An important aspect of that meeting involved the approval by Members of revised CFAB Articles of Incorporation – that important document had not been amended since 1987, and CFAB had encountered, and undergone, many changes in the ensuing years.

We were pleased at the Member attendance at that 2010 meeting; significantly greater than has been traditionally experienced at Anchorage meetings. We are planning the 2011 Annual Meeting to be held offsite as well, to allow us to further assess Member interest and attendance. That Meeting will convene on Friday, November 18 (again, during Fish Expo) in the LEEWARD ROOM of the Hilton Hotel in Seattle. Members will receive Official Notices, and related materials, in due course. We urge you to take advantage of this additional opportunity to participate in your CFAB Membership, and to meet CFAB's Directors and staff.

30TH ANNIVERSARY CELEBRATION

In September of 2010 CFAB held a gathering of Members, industry peers and associates, and guests at our building. It was a belated celebration of CFAB's new office space as well as a celebration of CFAB's thirty years of operation. The turnout exceeded expectations as did the menu, which consisted entirely of Alaska-produced items assembled and prepared by Wes Masters of Masters Catering in Anchorage. I encourage you to visit CFAB's website to view some of the pictures from that event. It was rewarding that so many Members and friends shared in this special occasion with us.

Executive Message to Members

2011 *Scholarship Recipients*

CFAB President Lela Klingert with Scholarship Recipient Shane Hautanen and his father, CFAB member, Nelson Hautanen. Shane is attending Colorado State University.

University of Alaska Fairbanks

Zachary Aspelund
Naknek
University of Alaska Fairbanks

SCHOLARSHIP FUND

We reported in the 2010 Annual Report that CFAB was able to fulfill a longtime aspiration of Managements and Directors by establishing The CFAB Scholarship Fund. Earlier this year that Scholarship Fund awarded its first scholarships – each in the amount of $2,500 – to five students who represent various CFAB Member families. In total, applications were received from thirteen students, and every member of the selection committee was forced to struggle with the decision(s) involved. For me personally, it was immensely gratifying to see such impressive evidence of talented, committed, and involved young people spread throughout Alaska!

The winners of the scholarships were:

Cody Clark, Soldotna
Shane Hautanen, Anchorage
Zachary Ray Aspelund, Naknek
Kevin Mann, Juneau
Jonah Yakunin, Anchor Point

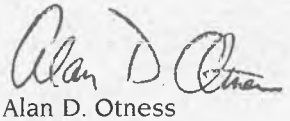
CONGRATULATIONS!!!!

Solicitations for applications for next year's scholarships will be mailed in early 2012.

OTHER MATTERS

In several recent Annual Reports, we have commented on various aspects of both the national and statewide economy, on developments within the Alaska commercial community, and in particular on some of the seemingly irrational trends in the granting of credit (of all kinds). With respect to the latter, the pendulum seems to continue to swing wildly, especially in the "Lower 48"; and, even though we in Alaska seem to be somewhat less affected, the results of broad credit instability certainly show up in the prices and availability of goods and services as well as in investment returns.

Executive Message to Members



Those of us who read newspapers and other periodicals, who watch television, who browse the Internet, and who communicate with family, friends, and business counterparts – in other words, all of us – can assume a certain level of detachment in our observations of political turmoil and bloodletting, of home foreclosure trends, of unemployment trends, and of border security issues, etc., and breathe yet another prayer of thanks for the "joys of Alaska." But each of those phenomena, with the conscious or unconscious mindset it engenders, seems to have a way of intruding, and translating its effects into, our cherished way of life.

Although I offer the foregoing couple of paragraphs as broad and general commentary, the Alaska commercial fishing community is – as always – at the forefront of my mind. After nearly 25 years of close association with that community, the values of diversity, of aggressive industriousness, and of an entrepreneurial spirit have become ingrained. And certainly, to any observer or veteran of the "gear wars" of the '70s and '80s, Alaska commercial seafood harvesters have never appeared to hold the potential to become a renowned and harmonious choir! Nevertheless, during those decades as well as throughout more recent years, the harvester community seemed to exist in public and political eyes as a single and potent entity.

In my view, much has changed in recent years. Some fisheries have disappeared, but some fisheries (in an overall sense) have flourished economically. Various rationalization mechanisms have made it possible for investors to reap the benefits of a fishery without ever setting foot on a vessel. Narrower and more stringent – and more rigidly enforced – allocation, gear, and procedural rules and regulations have created demands for fulltime, all-out efforts during each opportunity. Costs have escalated much more rapidly than have gross returns. All of these factors, and more, have combined to establish an unprecedented urgency and intensity at all levels and in virtually every fishery.

At the national level, also, and in the broadest sense, we see similar developments. America today seems to be divided in so many ways, with rifts evident in politics, between and among economic classes, in schemes for access to health care, in educational opportunities, in the impacts of legal and illegal immigration, in tax policies and initiatives, etc. To this observer, it appears that the de facto social acceptance and general support of these divisions have served to support and intensify the growing factions within our fishing community.

In Alaska, the commercial fishing community no longer has the political and socio-economic power it once held and quite possibly took for granted. The demographics of the state have changed dramatically over the past 25 or more years, and those of the Alaska State Legislature have changed perhaps even more. There is growing pressure for access to various resources by a broader range of the citizenry, and there appears to be less appreciation for the tangible, and intangible, contributions of commercial fishing to coastal, and other rural communities. I am sometimes dismayed at the seemingly cavalier attitudes within the fishing community toward the challenges that are developing from those broader changes. The commercial fishing community must not lose its capacity to respond to those challenges, but that loss of capacity is inevitable if we adopt a posture of, "As long as I've got mine, it's all good!" One of the most significant hazards faced by most commercial harvesters is a vessel sinking. It is perhaps a good time to remind ourselves that when the bow of a vessel sinks, the stern inevitably follows close behind!

The Board of Directors

Alaska Commercial Fishing and Agriculture Bank

Anchorage, Alaska

We have audited the accompanying balance sheets of Alaska Commercial Fishing and Agriculture Bank as of May 31, 2011 and 2010, and the related statements of net proceeds, changes in capital and patronage, and cash flows for the years then ended. These financial statements are the responsibility of the Alaska Commercial Fishing and Agriculture Bank's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Alaska Commercial Fishing and Agriculture Bank as of May 31, 2011 and 2010, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Notes to Financial Statements

May 31, 2011 and 2010

(1) General

The Alaska Commercial Fishing and Agriculture Bank (CFAB) was incorporated May 4, 1979 to promote growth of the Alaska agriculture, timber, and commercial fishing industries by providing debt financing to resident-owned businesses engaged in harvesting, processing, or marketing of these industries and to promote its own growth as a strong user-oriented institution through cooperative ownership and self governance. Effective in August 2000, CFAB's lending authority was statutorily expanded to include tourism and other resource-based activities in addition to its original lending areas.

The accounting and reporting policies of CFAB conform to accounting principles generally accepted in the United States of America. CFAB follows the accrual method of accounting. In preparing the financial statements, management of CFAB is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and revenue and expenses for the period. Actual results could differ from those estimates. The more significant accounting and reporting policies and estimates applied in the preparation of the accompanying financial statements are discussed in Note 2.

(2) Summary of Significant Accounting Policies

Cash and Cash Equivalents

For purposes of reporting cash flows, cash includes cash on hand and demand deposits at other financial institutions. Cash flows from loans are reported net.

Loans and Interest on Loans

Loans are stated at the amount of unpaid principal, reduced by deferred loan fees and an allowance for loan losses. The accrual of interest income is suspended on loans for which the payment of interest is contractually past due more than 90 days and/or otherwise considered by management to be worthy of nonaccrual. Upon placing a loan into nonaccrual status, any fiscal year-to-date unpaid interest is reversed by a charge against interest income. Subsequent payments received on a nonaccrual loan are credited to the loan's principal balance until sufficient payments are received to bring the loan current. When the circumstances that led to a loan being placed in nonaccrual status have been favorably resolved or otherwise changed, the loan is considered for restoration to normal accrual status. Nonaccrual loans are considered to be impaired under the provisions of FASB Accounting Standards Codification (ASC) 310.

Allowance for Loan Losses

The allowance for loan losses is maintained at an amount that management considers adequate to provide for estimated loan losses inherent in the loan portfolio. The allowance is based upon review and evaluation of individual loans, which consider numerous factors including type of loan, credit quality, collateral, industry conditions, prior loan loss experience, and management's estimate of future potential losses, as well as application of a potential loss factor consistent with CFAB's experience. Allowances for losses on loans are subjective and may be adjusted in the future depending on economic conditions.

Assets Acquired in Liquidation of Loans

Asssets acquired through or in lieu of loan foreclosure are initially recorded at fair value less estimated selling costs at the date of foreclosure. Any writedown to fair value at the time of transfer is charged to the allowance for loan losses. Management periodically performs valuations, and an allowance for losses is established by means of a charge to operations if the carrying value of a property exceeds the lower of its carrying amount or its fair value less estimated costs to sell.

Fair Value of Financial Instruments

CFAB's financial assets carried at fair value have been classified based on a hierarchy defined by ASC 820. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

- **Level 1** - Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

- ***Level 2*** – Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.
- ***Level 3*** – Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect CFAB's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

Impaired loans are measured at fair value on a non-recurring basis. These assets are classified as Level 3 where significant value drivers are unobservable. The fair value of impaired loans are determined using the fair value of each loan's collateral for collateral-dependent loans as determined, when possible, by an appraisal of the property, less estimated costs related to liquidation of the collateral. The appraisal amount may also be adjusted for current market conditions.

Bank Premises, Furniture, and Equipment

Bank premises, furniture, and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are charged to operations by use of the straight-line method over estimated useful lives of three to thirty-nine years. Expenditures for maintenance and repairs are charged to operating expenses as incurred. Expenditures for renewals or improvements that extend the life of an asset are capitalized at cost and depreciated as stated above. Upon sale, retirement, or other disposition of property, the cost and accumulated depreciation are removed from the respective accounts and the resulting gain or loss is recorded.

Income Taxes

Under the asset and liability method of ASC No. 740, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be recovered or settled. Under ASC No. 740, the effect on deferred tax assets and liabilities of change in tax rates is recognized as income in the period that includes the enactment date. CFAB qualifies as a cooperative taxable under Subchapter T of the Internal Revenue Code.

CFAB adopted the provisions of Topic 740 of the FASB Accounting Standards Codification relating to accounting for uncertainty in income taxes. As a result of the implementation of ASC 740, CFAB made a comprehensive review of its portfolio of uncertain tax positions in accordance with recognition standards established by ASC 740. In this regard, an uncertain tax position represents CFAB's expected treatment of a tax position taken in a filed tax return, or planned to be taken in a future tax return, that has not been reflected in measuring income tax expense for financial reporting purposes. CFAB believes that it has appropriate support for the income tax positions taken and to be taken on its tax returns and that its accruals for tax liabilities are adequate for all open years based on an assessment of many factors, including past experience and interpretations of tax law applied to the facts of each matter. As a result of applying the provisions of ASC 740, there was no cumulative effect on retained earnings.

For the year ended May 31, 2011, there were no material changes to the total amount of unrecognized tax benefits. CFAB does not expect any significant increases or decreases for uncertain tax positions during the next 12 months.

CFAB files income tax returns in the U.S. and various state jurisdictions. The tax years 2007 through 2010 remain subject to examination by the tax jurisdictions.

CFAB's policy is to recognize interest and penalties accrued on any unrecognized tax benefits as a component of income tax expense. There is no interest or penalties accrued at May 31, 2011. As a result of this review, CFAB concluded that at this time there are no uncertain tax positions.

Member Reserves

Certain loan agreements between CFAB and members require the member to maintain financial reserves to cover maintenance and improvements to the underlying collateral during the life of the loan. The reserves are held by CFAB in cash accounts until requested for maintenance or improvements by the members.

Recent Accounting Pronouncements

In July 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2010-20. Disclosures About the Credit Quality of Financing Receivables and the Allowance for Credit Losses. The objective of ASU 2010-20 is to provide financial statement users with greater transparency about an entity's allowance for credit losses and the credit quality of its financing receivables through additional disclosure. This ASU is intended to

provide additional information to assist financial statement users in assessing an entity's credit risk exposures and evaluating the adequacy of its allowance for credit losses. ASU 2010-20 is effective for annual reporting periods ending on or after December 15, 2011.

Reclassifications

Certain amounts in the 2010 financial statements have been reclassified to conform to the 2011 presentation. This reclassification affects neither the net proceeds, nor the capital and patronage.

Subsequent Events

CFAB has evaluated subsequent events through August 31, 2011, the date on which the financial statements were issued.

(3) Loans and Other Receivables

CFAB's loan portfolio by major category is as follows at May 31:

	2011	2010
Seafood harvesters	$ 20,901,560	20,675,051
Tourism	2,818,289	2,981,202
Fish processors	2,770,730	1,394,813
Agriculture	130,001	135,676
Other receivables	31,797	39,397
	26,652,377	25,226,139
Less allowance for loan losses	(2,723,599)	(2,658,500)
	$ 23,928,778	22,567,639

In accordance with its statutory mandate and authority, CFAB's financing activity is limited to Alaska commercial fishing, agriculture, timber, tourism, and natural resource exploitation industries. This concentration of loans in resource-based industries results in an unusual level of risk exposure. At May 31, 2011 and 2010, respectively, approximately 89% and 87% of CFAB's loan portfolio was concentrated in the fishing industry.

During the ordinary course of business, CFAB receives requests to modify the existing terms and conditions of loans. As a result of requests received, CFAB modified $4,657,673 and $4,422,920 in loans during the years ended May 31, 2011 and 2010, respectively. No interest was forgiven on modified loans in the years ended May 31, 2011 and 2010. Of the loans modified by CFAB:

Loans totaling $2,029,450 and $2,908,807 for the years ended May 31, 2011 and 2010, respectively, involved payment of interest in full. The principal reamortized within the original loan terms.

Loans totaling $2,501,823 and $1,514,113 for the years ended May 31, 2011 and 2010, respectively, involved payment of interest in full. However, the principal reamortizations resulted in new and later final payment dates.

Loans totaling $126,400 and $0 for the years ended May 31, 2011 and 2010, respectively, involved no payment, or partial payment, of the interest due. Additionally, the principal reamortizations resulted in new and later final payment dates.

The loan portfolio includes $1,098,675 and $1,325,050 in loans classified as nonaccrual at May 31, 2011 and 2010, respectively.

CFAB recognizes no interest income on nonaccrual loans during the time the loans are maintained in nonaccrual status. Had CFAB's nonaccrual loans performed in accordance with their original terms, approximately $98,000 and $113,000 in additional interest income would have been recorded in the years ended May 31, 2011 and 2010, respectively.

For the years ended May 31, 2011 and 2010, the average balance of nonaccrual loans was approximately $1,171,700 and $994,571, respectively.

Activity in the allowance for loan losses is as follows during the years ended May 31:

	2011	2010
Balance at beginning of the year	$ 2,658,500	2,446,744
Recoveries on loans previously charged off	71,109	222,499
Less loan amounts charged off	(6,010)	(10,743)
Balance at end of the year	$ 2,723,599	2,658,500

Management periodically evaluates the allowance for loan losses and changes are recorded through adjustment to the current period provision for loan losses.

Loans to Directors: To qualify for election to the CFAB board of directors, an individual must be a current member of the Bank. A member of the Bank may be an individual who is a principal of a partnership that is a member of the Bank or an officer of a corporation, limited liability company, or other legal entity that is a member of the Bank. Loans to these directors or their interests totaled $2,307,801 and $2,659,947 at May 31, 2011 and 2010, respectively. During 2011 and 2010, respectively, loan advances totaled $948,265 and $1,617,000, and loan repayments totaled $1,300,411 and $1,569,824 on these loans.

At May 31, 2011, there were no unrecorded commitments to lend additional funds to borrowers whose loans have been modified.

(4) Bank Premises, Furniture, and Equipment

Bank premises, furniture, and equipment consist of the following at May 31:

	2011	2010
Land and building	$ 1,760,568	1,668,794
Furniture, fixtures, and equipment	215,411	312,478
	1,975,979	1,981,272
Less accumulated depreciation and amortization	(353,556)	(301,413)
	$ 1,622,423	1,679,859

Depreciation expense for the years ended May 31, 2011 and 2010 was $95,906 and $70,069, respectively.

(5) Notes Payable

Notes payable consists of the following at May 31:

	2011	2010
Line of credit of $13,000,000, with variable interest (2.17% at May 31, 2011) due January 1, 2012, collateralized by all CFAB assets	6,295,032	5,556,909

Interest expense reported is net of a patronage refund of $47,372 in 2011 and $89,569 in 2010. Interest expense amounting to $38,400 and $30,000 relates to the Bank's office building for 2011 and 2010, respectively. This interest is reported as occupancy expense in order to differentiate the expense associated with the office building.

(6) Member Notes Payable

Member notes payable are unsecured loans made to CFAB by CFAB members at fixed rates for periods ranging from 30 to 90 days. At May 31, 2011 and 2010, respectively, member notes were $672,841 and $306,661 and paid interest at 2.25%. Interest expense related to these notes amounted to $11,959 and $6,929 in 2011 and 2010, respectively.

(7) Capital

Share Capital

Preferential shareholders rights on dissolution follow in the order of Class B and Class A. The following rights apply to the two categories of stock:

Class B - No voting rights. However, at the discretion of the board of directors, a dividend may be paid to Class B stockholders whose loans are paid in full at fiscal year-end. Class B stock may only be held by members of CFAB. Each borrower is required to make a purchase of Class B stock in an amount equal to 2% of the total loan or $2,500, whichever is less. This investment remains in place until retired by the board of directors.

Class A - No dividend rights. Each member of CFAB must own one share of Class A stock. Each share of stock carries one vote. To vote, a member must be a current patron or have been a CFAB patron during the preceding two years or have minimum retained membership earnings and/or Class B stock with CFAB of $1,600.

(8) Employee Benefit Plan

CFAB has an employee benefit plan as defined under Section 401(k) of the Internal Revenue Code (Code) covering substantially all employees. An employee is allowed to contribute his or her earnings to the maximum limit allowed by the Code. Contributions by CFAB to the plan are at the discretion of the board of directors. Contributions by CFAB for the years ended May 31, 2011 and 2010 were $49,560 and $51,122, respectively.

(9) Income Taxes

The components of income tax expense are as follows:

	Current	Deferred	Total
2011:			
Federal	225,687	-	225,687
State	60,415	-	60,415
	$ 286,102	-	286,102
2010:			
Federal	$ 359,603	-	359,603
State	102,449	-	102,449
	$ 462,052	-	462,052

The actual tax expense differs from the "expected" tax expense for those years (computed by applying the U.S. Federal corporate tax rate of 34% to proceeds before income taxes) as follows:

	2011	2010
Computed "expected" income tax expense	$ 441,456	591,111
State tax expense	39,874	67,617
Charitable contribution carryforward	(10,861)	131,118
Depreciation expense	(12,788)	(80,473)
Allowance for loan loss	22,134	71,997
Patronage refunds and dividends declared	(243,540)	(345,843)
Nondeductible expenses	733	865
Changes in deferred tax asset valuation allowance	(17,325)	(58,973)
Other	66,419	84,633
Tax expense	$ 286,102	462,052

The components of and changes in the net deferred tax asset at May 31 were as follows:

	2009	Deferred (expense) benefit	2010	Deferred (expense) benefit	2011
Allowance for loan loss	$ 978,697	84,703	1,063,400	26,039	1,089,439
Other	87,495	173,210	260,705	10,739	271,444
	1,066,192	257,913	1,324,105	36,778	1,360,883
Valuation allowance	(601,731)	(173,450)	(775,181)	(50,956)	(826,137)
	$ 464,461	84,463	548,924	(14,178)	534,746

A valuation allowance on a deferred tax asset is provided when it is more likely than not that some portion of the deferred tax asset will not be realized. CFAB has established a valuation allowance that reflects its expected taxable income and tax planning strategies.

Temporary differences that give rise to the significant portions of the deferred tax liability consist of depreciation and the basis differences in assets. The deferred tax benefit (expense) related to the deferred tax liability amounted to $14,178 and $(84,463) at May 31, 2011 and 2010, respectively.

(10) Commitments and Contingent Liabilities

Unused Lines of Credit

At May 31, 2011 and 2010, respectively, CFAB had commitments to members for unused credit lines of approximately $435,000 and $750,000.

Contingencies

CFAB is a litigant in several legal actions arising from normal business activities, related to delinquent loans and foreclosures. CFAB reserves for potential losses on delinquent loans as described in Note 2. There is no litigation unrelated to loan delinquencies and foreclosures.

Stan Stephens
GLACIER & WILDLIFE CRUISES
VALDEZ, ALASKA

February 4, 2011

The Honorable John Coghill,
Capitol Office Bldg. – Rm 504
Juneau, Alaska 99801

Dear Senator Coghill,

I am writing to you to express my interest in SB68. We are holder of a tourism loan from CFAB. As a loan holder, I can say we are proud to be able to work with such a responsible lender. Since CFAB is owned by Alaska residents, it is available to serve Alaskan such as ourselves. I consider a direct benefit for the passage of SB68.

Originally, I understand that loans were made for agriculture, commercial fishing and other resource based operations. Their range of loans are basically the same at present, but now include loans to the tourism industry, helping another group of Alaskans.

Any of CFAB's members are eligible to hold 4 of CFAB's 5 elected Directors positions, regardless of the industry they serve. Apparently there are few agricultural loans at present, since most farmers now procure loans from established State-Federal programs. When SB68 is passed, those possibilities or serving as a Director, there is now an improved opportunity for us, as members to serve in that capacity, and that opportunity will be increased by 25%. Legislation from SB68 only affects CFAB operations, and will add value to the member's investments.

Passage of SB68 will only have positive effects for those of us who have loans, as CFAB members. I urge you to vote "YES" on SB68. Thank you.

Respectfully,

Stan Stephens

Example of CFAB Financing that would be possible as a result of the passage of SB68.

CFAB has received a request to finance the expansion of B4UDie Lodge that is located outside Dillingham in Western Alaska.

The lodge is owned by the ABC Corporation. ABC Corporation is an Alaska Corporation whose ownership is comprised as follows:

John Smith	15%	Residence	Los Angeles, CA
Susan Smith	15%	Residence	Los Angeles, CA
John Doe	15%	Residence	Seattle, WA
Mary Doe	15%	Residence	Seattle, WA
William Jones	15%	Residence	Anchorage, AK
Jane Jones	15%	Residence	Anchorage, AK
Jim Johnson	10%	Residence	Soldotna, AK

The ABC Corporation wants to borrow $300,000 to expand their lodge by building 4 new cabins; the lodge is located in the Tik Chik region. The lodge has operated in this area for 20 years. They employ 30 Alaskans during the months of May through Sept. From October to April they have two Alaskans employed as caretakers.

The ABC Corporation owns and pays property taxes on the lodge valued at $2,000,000 as well as 5 airplanes valued at $500,000. In addition they pay AK Corporate Income taxes.

Jim Johnson is the manager of the B4UDie Lodge, the remaining six owners are silent partners/investors and are not involved in the day to day operations of the lodge.

Given that the majority ownership (60%) of the Corporation is owned by non-residents under its current statute, CFAB would not be able to provide financing to the ABC Corporation even though the sole operation of the Corporation is in Alaska and the role of the non-resident owners is strictly as an investment in the Corporation bringing non-resident investment to Alaska and enhancing the economic development of the region.

Passage of SB68 allowing CFAB to finance non-resident owned Tourism and Resource Based businesses whose facilities are located in Alaska would allow CFAB to finance requests such as the example shown above and increasing the financing options to increase economic opportunities for Alaskans

ALASKA STATE LEGISLATURE

SENATOR JOHN COGHILL

State Capitol, Room 504, Juneau, AK 99801-1182 (907) 465-3719
3340 Badger Road Suite #290, North Pole, AK 99705 (907) 488-5725

SB 68 Alaska Commercial Fishing and Agriculture Bank
SPONSOR STATEMENT

Senate Bill 68 will strengthen the Commercial Fishing and Agriculture Bank (CFAB) and its ability to serve member-owners. CFAB was created by the legislature to fulfill a need for financing the agricultural and fishing permit industries.

Because it has been difficult to keep a resident farmer on the board of directors filled, SB 68 removes mandatory requirements to have a seat on the board designated for a resident farmer.

The bill removes dollar limitations for co-op members seeking loans for tourism-related activities and the development or exploitation of natural resources.

SB 68 will also allow CFAB to make loans for capital investment or operating capital to a shore-based fish processor, a timber processor, or an agricultural processor or harvester with facilities located in Alaska. This bill extends this allowance to tourism-related activities and the development or exploitation of natural resources as outlined in subsections (15) and (16)

The legislature supplied $32 million in seed money to CFAB to kick start the cooperative and since the coop was using dollars borrowed from the general fund, CFAB was prohibited by law from hiring a lobbyist because it was thought of as a quasi-governmental entity until it had paid the State back the full amount of the stock. CFAB fulfilled that obligation over a year before the required time, and is now an independent business, there is no need to prohibit them from having a lobbyist.

The bill also requires CFAB's financial records to be examined by the Department of Commerce Division of Banking at 36 month intervals and requires CFAB to reimburse the state for the cost of the audit.

ALASKA STATE LEGISLATURE

SENATOR JOHN COGHILL

State Capitol, Room 504, Juneau, AK 99801-1182 (907) 465-3719
3340 Badger Road Suite #290, North Pole, AK 99705 (907) 488-5725

Section 1. Removes the requirement that one member of the CFAB board of directors must be a resident farmer.

Sec. 2.

Subsection 4. Removes dollar limitations for loans being used for tourism within the state.

Subsec. 5. Removes dollar limitations for loans being used for tourism within the state.

Subsec. 6. Removes dollar limitations for loans being used for natural resource development.

Subsec. 7. Removes dollar limitations for loans being used for natural resource development.

Subsec. 8. Clarifies that a person receiving a loan for capital investment or operating capital to a shore-based fish processor, a timber processor, or an agricultural processor or harvester, must meet all requirements except for residency and resident ownership of company.

Subsec. 10. Adds new loans to non-residents for capital investment or operating capital to operate tourism activities under subsection 15 and development and exploitation of natural resources under subsection 16, to loans secured by liens subordinate to valid first liens and security agreements granted to another creditor.

Subsec. 12. Adds new loans to non-residents for capital investment or operating capital to an operator of tourism-related activities and facilities dedicated to the development or exploitation of natural resources, to provisions for CFAB to participate with another bank without the obligor being a member of CFAB.

Subsec. 13. Allows CFAB to purchase or participate in loans from other lenders for loans to non-residents whether or not an obligor is a member of the bank.

Subsec. 15. Adds a new subsection that allows for non-residents to receive loans for tourism-related activities, providing they meet all other requirements to receive a loan stated in CFAB statutes.

Subsec. 16. Adds a new subsection that allows for non-residents to receive loans dedicated to the development of natural resources, providing they meet all other requirements to receive a loan stated in CFAB statutes.

Sec. 3. Adds an audit by Department of Commerce, Community, and Economic Development, Division of Banking and Securities, as an exception to the confidentiality provision of CFAB's financial records.

Sec. 4. Establishes a new subsection into CFAB statutes allowing for a list of candidates for director of the bank to be given to voting members of the bank.

Sec. 5. Establishes a new section in CFAB statutes providing for a bank examination at intervals of not more than 36 months, a summary report of the examination, and requiring a fee to be paid by the bank for the examination.

Sec. 6. Repeals definition of "resident farmer" and repeals the prohibition of CFAB having a lobbyist.

Sec. 7. Establishes a section prohibiting any bank examination until one year after the effective date of this act.

Sec. 8. Establishes an immediate-effective-date provision to this act.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSSB070(L&C)
2012 LEGISLATIVE SESSION

Analysis

This legislation establishes a state health insurance exchange for consumers and small businesses in compliance with provisions of the Affordable Care Act. As part of its duties, the exchange will inform individuals about Medicaid, the Child Health Insurance Program (i.e. Denali KidCare), and any other applicable programs. If the exchange determines that the individual is eligible for a program, it must enroll the individual in that program. The legislation also gives the exchange the authority to enter into a contract for the performance of its duties with the Department of Health and Social Services.

Assumptions:
· The legislation will become effective 7/1/2012.
· The Insurance Exchange will contract with the Department of Health and Social Services, Division of Public Assistance (DHSS/DPA) to determine Medicaid and Denali KidCare eligibility for new enrollees.
· The exchange will pass necessary demographic and financial information to DHSS/DPA so that it can establish and maintain Medicaid eligibility for the new enrollees. This information will be passed to DHSS/DPA electronically.
· System enhancements will need to be made to DPA's Eligibility Information System (EIS) to receive data from the exchange and register it in EIS.
· Development and testing of the EIS system enhancements will take 9 months.
· The exchange will begin passing information to DPA's EIS in FY 2013.
· The costs of adding the new Medicaid expansion included in the Affordable Care Act are not included in the estimates.

FY 2013 Administration Costs: $365.4

Personal Services: Staff needed to develop and test the system enhancements in FY 2013:
$112.0 for salary and benefits for 1 Analyst/Programmer IV for 9 months
$198.5 for salary and benefits for 2 Analyst/Programmers III for 9 months
$310.5 - Total

Commodities:
$ 1.2 ($0.55 x 3 staff x .75 (9 months) = $1.2)

Contractual:
$ 24.0 costs for phones, office space, etc.

Capital Outlay:
$ 29.7 one time purchase for personal computers, software, workstations and associated costs for 3 staff
($9.9 x 3 = $29.7)

(Revised 11/28/2011 OMB)

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 70

Analysis

SB 70 would establish a health benefit exchange in order to facilitate the purchase and sale of individual and small employer health insurance plans in Alaska. The exchange would also provide consumer education and assistance. The exchange would be established as a public corporation within the Department of Commerce, Community and Economic Development, but it would be a separate legal entity.

An exchange board appointed by the Governor would have the responsibility and authority to develop and maintain the exchange which would include developing and maintaining a website for Alaskans to obtain information on insurance plans, to determine eligibility for and enroll eligible Alaskans in Medicaid or Denali Kidcare, to determine cost of coverage after any premium tax credit or cost sharing reduction and many other functions specified in the bill.

The bill does not create any additional duties or role for the Division of Insurance, since the development and maintenance of the exchange is the sole responsibility of the board. Therefore, no fiscal impact on the Division of Insurance is anticipated.

Why this fiscal note differs from previous version (if initial version, please note as such)

This fiscal note has been amended to reflect higher FY13 Personal Services costs due to salary and benefit increases. Travel for years beyond FY13 have been reduced to reflect change from monthly Board meetings to quarterly. One-time support costs have been reduced in years beyond FY13. The fiscal note has been updated to the new form for the 2012 Legislative Session.

STATE OF ALASKA **BILL NO.** SB 70
2012 LEGISLATIVE SESSION

Analysis

SB 70 would establish a health benefit exchange in order to facilitate the purchase and sale of individual and small employer health insurance plans in Alaska. The exchange would also provide consumer education and assistance. The exchange would be established as a public corporation within the Department of Commerce, Community, and Economic Development, but it would be a separate legal entity. An exchange board appointed by the Governor would have the responsibility and authority to develop and maintain the exchange which would include developing and maintaining a website for Alaskans to obtain information on insurance plans, to determine eligibility for and enroll eligible Alaskans in Medicaid or Denali Kidcare, to determine cost of coverage after any premium tax credit or costs sharing reduction and many other functions specified in the bill.

Estimates have been developed for the required resources to meet the core functions to be performed including:

1) Personal Services - a staff of 12 including an executive director, accounting staff, web support and program staff.

2) Board Costs - first year travel costs based on monthly two day meetings until the exchange is fully operational, followed by quarterly meetings for subsequent years.

3) Services - including one-time and on-going work station supplies and equipment, telephone hotlines, phone systems, printing, leased space support contracts and core services costs.

4) Commodities - one-time for computers and supplies.

5) Grants to the Navigator program.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB070

Analysis

Request for: Platform Build-out for Alaska Health Insurance Exchange

The current available information regarding other state's planning efforts relative to Health Insurance Exchange legislation suggests that costs for a platform build-out vary depending on final platform design. A critical factor will be if the solution implemented is a stand-alone solution or leveraged, in part, on an existing, related solution already in production. As a result, ETS estimates and requests with this fiscal note $3,000.0 in FY2013 to plan for and build out the platform on which the health insurance exchange will operate. Of the $3,000.0, ETS anticipates $800.0 will be needed for purchase of bandwidth services and related costs. ETS is requesting an additional $500.0 per year over the next six (6) fiscal years for maintenance an operation of the platform solution.

CS FOR SENATE BILL NO. 70(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATORS FRENCH, Davis, Ellis

A BILL

FOR AN ACT ENTITLED

"An Act establishing the Alaska Health Benefit Exchange; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTENT. It is the intent of the legislature in this Act

(1) to facilitate the purchase and sale of qualified health plans in the individual market in this state;

(2) to establish a small business health options program exchange to assist qualified small employers in the state in enrolling employees in qualified health plans offered in the small group market;

(3) to provide consumer education and assist individuals with access to programs, credits, and cost-sharing reductions;

(4) to reduce the number of uninsured Alaskans by creating an organized,

transparent, and easy-to-navigate health insurance marketplace that offers a choice of high value health plans with low administrative costs for individuals and employers; and

(5) that the Alaska Health Benefit Exchange Board recommend to the legislature and the Office of the Governor methods to keep premium costs low and risk pools strong in the health insurance market place.

*** Sec. 2.** AS 21.54 is amended by adding new sections to read:

Article 2A. Alaska Health Benefit Exchange.

Sec. 21.54.200. Alaska Health Benefit Exchange. The Alaska Health Benefit Exchange is established as a public corporation of the state in the Department of Commerce, Community, and Economic Development but with separate and independent legal existence.

Sec. 21.54.210. Alaska Health Benefit Exchange Board. (a) The Alaska Health Benefit Exchange Board is established to manage the exchange.

(b) The board consists of eight members, including six members appointed by the governor, the commissioner of health and social services or the commissioner's designee, serving ex officio, and the director, serving ex officio, without the power to vote. The members of the board appointed by the governor are

(1) a representative of small business employers;

(2) a representative of the health care insurance business;

(3) a person with expertise in health plan finance;

(4) a person with expertise in health plan administration;

(5) an actuary or a person with a background in health care actuarial or economic principles; and

(6) a health care consumer representative.

(c) Except for the commissioner or the commissioner's designee and the director, who serve ex officio, each board member serves for a term of three years beginning on January 1 and until a successor has been appointed. A member is eligible for reappointment.

(d) The board shall select a member to serve as chair and a member to serve as vice-chair for a term and with duties and powers necessary to perform their functions.

(e) A majority of the board constitutes a quorum for transacting business.

(f) If a vacancy occurs, the governor shall make an appointment, effective immediately, for the balance of the unexpired term.

(g) Board members and the executive director hired under (j) of this section shall comply with the requirements of AS 39.50 (public official financial disclosure) and shall disclose an affiliation with an insurer, agent, broker, or other representative of an insurer, a health care provider, or a health care facility.

(h) Members of the board are entitled to per diem and transportation costs under AS 39.20.180.

(i) A member of the board of directors of the exchange may not be held civilly or criminally liable for an act or omission if the act or omission was in good faith and within the scope of the director's duties.

(j) The board shall employ an executive director to administer the exchange. The executive director shall perform duties as prescribed by the board and may employ a staff to assist in the performance of the duties of the executive director. The executive director and staff employed under this subsection are in the partially exempt service under AS 39.25.120.

Sec. 21.54.220. Duties and powers of the Alaska Health Benefit Exchange; limitation. (a) The Alaska Health Benefit Exchange Board shall

(1) facilitate the purchase and sale of qualified health plans;

(2) establish a small business health options program exchange to assist qualified small employers in the state in enrolling employees in a qualified health plan;

(3) provide for the operation of a toll-free telephone hotline to respond to requests for assistance;

(4) provide for enrollment periods under sec. 1311(c)(6), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(5) maintain an Internet website through which enrollees and prospective enrollees of qualified health plans may obtain standardized comparative information on those plans;

(6) implement procedures for the certification, recertification, and

decertification of qualified health plans according to the determination of the division consistent with guidelines developed by the United States Secretary of Health and Human Services under sec. 1311(c), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(7) assign a rating to each qualified health plan offered through the exchange according to the determination of the division in accordance with the criteria developed by the United States Secretary of Health and Human Services under sec. 1311(c)(3), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(8) determine the level of coverage of each qualified health plan according to the determination of the division under regulations issued by the United States Secretary of Health and Human Services under sec. 1302(d)(2)(A), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(9) use a standardized format for presenting health benefit options in the exchange, including the use of the uniform outline of coverage established under 42 U.S.C. 300gg et seq. (sec. 2715, Part A, subpart II, title XXVII, Public Health Service Act);

(10) in accordance with sec. 1413, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, inform individuals of title XIX, Social Security Act eligibility requirements for the Medicaid program under 42 U.S.C. 1396 - 1396w-2, the Children's Health Insurance Program under 42 U.S.C. 1397aa - 1397mm (title XXI of the Social Security Act), or any applicable state or local public program; and, if the exchange determines that any individual is eligible for a program, enroll that individual in that program;

(11) establish and make available by electronic means a calculator to determine the actual cost of coverage after application of any premium tax credit under 26 U.S.C. 36B (Internal Revenue Code of 1986), and any cost-sharing reduction under sec. 1402, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(12) establish a small business health options program exchange

through which qualified employers may access coverage for their employees and which shall enable a qualified employer to specify a level of coverage so that any of its employees may enroll in any qualified health plan offered through the small business health options program exchange at the specified level of coverage;

(13) subject to sec. 1411, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, grant a certification attesting that, for purposes of the individual responsibility penalty under 26 U.S.C. 5000A (Internal Revenue Code of 1986), an individual is exempt from the individual responsibility requirement or from the penalty imposed by that section because

(A) an affordable qualified health plan covering the individual is not available through the exchange or through the individual's employer; or

(B) the individual meets the requirements for another exemption from the individual responsibility requirement or penalty;

(14) provide the following information to the United States Secretary of the Treasury:

(A) the name and taxpayer identification number of each individual issued a certification under (13) of this subsection;

(B) the name and taxpayer identification number of each individual who was an employee but who was determined to be eligible for the premium tax credit under 26 U.S.C. 36B (Internal Revenue Code of 1986) because

(i) the employer did not provide minimum essential coverage; or

(ii) the employer provided the minimum essential coverage, but it was determined under 26 U.S.C. 36B(c)(2)(C) (Internal Revenue Code of 1986), to be unaffordable to the employee or not to provide the required minimum actuarial value; and

(C) the name and taxpayer identification number of each individual who

(i) notifies the exchange under sec. 1411(b)(4), P.L.

111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, that the individual has changed employers; and

(ii) ceases coverage under a qualified health plan during a plan year and the effective date of that cessation;

(15) provide to each employer the name of each employee of the employer described in (14)(B) of this subsection who ceases coverage under a qualified health plan during a plan year and the effective date of the cessation;

(16) perform duties required of the exchange by the United States Secretary of Health and Human Services or the United States Secretary of the Treasury related to determining eligibility for premium tax credits, reduced cost-sharing, or individual responsibility requirement exemptions;

(17) select entities qualified to serve as navigators as determined by the division in accordance with sec. 1311(i), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and standards developed by the United States Secretary of Health and Human Services and award grants to enable navigators to

(A) conduct public education activities to raise awareness of the availability of qualified health plans;

(B) distribute fair and impartial information concerning enrollment in qualified health plans, the availability of premium tax credits under 26 U.S.C. 36B (Internal Revenue Code of 1986), and the availability of cost-sharing reductions under sec. 1402, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(C) facilitate enrollment in qualified health plans;

(D) provide referrals to the division for consumer assistance for a person with a grievance, complaint, or question regarding the person's health benefit plan or coverage, or a determination under that plan or coverage; and

(E) provide information in a manner that is culturally and linguistically appropriate to the needs of the population being served by the exchange;

(18) review the rate of premium growth within the exchange and outside the exchange as determined by the division and rely on the information developed by the division on whether to continue limiting qualified employer status to small employers;

(19) rely on policies and procedures developed by the division to minimize adverse selection among plans sold within the exchange and review policies within the exchange and outside the exchange to monitor the effect of adverse selection between the two marketplaces;

(20) credit the amount of any free choice voucher to the monthly premium of the plan in which a qualified employee is enrolled, in accordance with sec. 10108, P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and collect the amount credited from the offering employer;

(21) consult with persons having an interest in the activities of the exchange, including

(A) health care insurers;

(B) health care consumers who are enrollees in qualified health plans;

(C) individuals and entities with experience in facilitating enrollment in qualified health plans;

(D) representatives of small businesses and self-employed individuals;

(E) the division in the Department of Health and Social Services responsible for administering Medicaid; and

(F) advocates for enrolling hard-to-reach populations;

(22) establish one or more advisory groups to consult with the board to provide expertise on and input into operations of the exchange; the membership of an advisory group may include health care providers, hospitals, and persons identified in (21) of this subsection;

(23) maintain an accurate accounting of all activities, receipts, and expenditures;

(24) submit an annual accounting report to the United States Secretary of Health and Human Services, the governor, the director and the legislature; the report must include the following information described by insurer by benefit plan:

(A) the number of covered persons;

(B) the number of covered persons receiving free choice vouchers and the amount of free choice vouchers credited;

(C) the number of individuals exempted from individual responsibility requirements by reason;

(D) the number of individuals eligible for premium tax credit;

(E) the number of employees who terminated coverage and the number of individuals obtaining coverage through the exchange who were covered under an employer health plan in the preceding six months; and

(F) other data specified by the director;

(25) cooperate with an investigation conducted by the division or the United States Secretary of Health and Human Services under the Secretary's authority under P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and allow the division or the Secretary, in coordination with the Inspector General of the United States Department of Health and Human Services, to

(A) investigate the affairs of the exchange;

(B) examine the properties and records of the exchange;

(C) require periodic reports in relation to the activities undertaken by the exchange;

(26) allow a health care insurer to offer a plan that provides limited scope dental benefits under 26 U.S.C. 9832(c)(2)(A) (Internal Revenue Code of 1986), through the exchange, either separately or in conjunction with a qualified health plan, if the plan provides pediatric dental benefits under sec. 1302(b)(1)(J), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(27) apply for planning and establishment grants made available to the exchange under sec. 1311, P.L. 111-148 (Patient Protection and Affordable Care Act),

as amended, and regulations adopted under that Act;

(28) rely on the division's determination relating to the potential for interstate compacts that would permit the sale and purchase of health care insurance across state borders and recommend particular compact arrangements for legislative approval; and

(29) submit to the director a plan of operation to ensure the fair, reasonable, and equitable administration of the exchange; the plan of operation becomes effective on approval in writing by the director, subject to the following:

(A) if the exchange fails to submit a suitable plan under this paragraph, the director may adopt reasonable regulations necessary or advisable to carry out the provisions of AS 21.54.200 - AS 21.54.270; the regulations adopted by the director under this subparagraph must continue in force until modified by the director or superseded by a plan submitted by the exchange and approved by the director;

(B) the plan of operation must

(i) establish procedures for the performance of the duties and powers of the exchange;

(ii) establish procedures for handling assets of the exchange;

(iii) establish the amount and method of reimbursing members of the board of directors;

(iv) establish regular places and times for meetings of the board of directors;

(v) establish procedures for records to be kept of all financial transactions of the exchange, its agents, and the board of directors;

(vi) contain any additional provisions necessary or proper for the execution of the powers and duties of the exchange.

(b) The exchange may

(1) enter into a contract for the performance of the exchange's duties with the Department of Health and Social Services or another entity that has

experience in individual and small group health insurance or benefit administration, or other experience relevant to the responsibilities to be assumed by the entity, except that the exchange may not contract for the performance of its duties with a health care insurer or an affiliate of a health care insurer;

(2) enter into information-sharing agreements with federal and state agencies and other state exchanges to carry out its duties if the agreements include adequate protections with respect to the confidentiality of the information to be shared and comply with all state and federal laws and regulations; and

(3) apply for and receive grants or donations from federal, state, local government, foundation, or private entities; the exchange shall make records of application for or receipt of grants or donations under this paragraph available to the public on the exchange's Internet website within 30 days after application or receipt.

(c) The exchange may not use money intended for the administrative and operational expenses of the exchange for staff retreats, promotional giveaways, or excessive executive compensation.

(d) Neither the exchange nor a health care insurer offering a health benefit plan through the exchange may charge an individual a fee or penalty for termination of coverage if the individual enrolls in another type of minimum essential coverage because

(1) the individual has become newly eligible for that coverage; or

(2) the individual's employer-sponsored coverage has become affordable under the standards of 26 U.S.C. 36B(c)(2)(C) (Internal Revenue Code of 1986).

Sec. 21.54.230. Health benefit plan certification. (a) The exchange may certify a health benefit plan as a qualified health plan if

(1) the plan provides the essential health benefits described in sec. 1302(a), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, except that the plan is not required to provide essential benefits that duplicate the minimum benefits of qualified dental plans if

(A) the exchange has determined that at least one qualified dental plan is available to supplement the plan's coverage; and

(B) the health care insurer makes prominent disclosure at the time it offers the plan, in a form approved by the exchange, that the plan does not provide the full range of essential pediatric benefits, and that qualified dental plans providing those benefits and other dental benefits not covered by the plan are offered through the exchange;

(2) the premium rates and contract language have been approved by the director;

(3) the plan provides at least a bronze level of coverage under AS 21.54.220(a)(7) unless the plan is certified as a qualified catastrophic plan, meets the requirements of P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, for catastrophic plans, and will only be offered to individuals eligible for catastrophic coverage;

(4) the cost-sharing requirements of the plan do not exceed the limits established under sec. 1302(c)(1), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and, if the plan is offered through the small business health options program exchange, the deductible for the plan does not exceed the limits established under sec. 1302(c)(2), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(5) the health care insurer offering the plan

(A) is licensed and in good standing to offer health insurance coverage in the state;

(B) offers at least one qualified health plan that provides a silver level of coverage under AS 21.54.220(a)(7) and at least one plan that provides a gold level of coverage through each small business health options program exchange and exchange for individual coverage in which the health care insurer participates;

(C) charges the same premium rate for each qualified health plan without regard to whether the plan is offered through the exchange and without regard to whether the plan is offered directly from the health care insurer or through an insurance producer;

(D) does not charge cancellation fees or penalties in violation of AS 21.54.220(d); and

(E) complies with the regulations developed by the United States Secretary of Health and Human Services under sec. 1311(d), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and other requirements the exchange establishes;

(6) the plan meets the requirements of certification as adopted by regulation under AS 21.54.250 and by the United States Secretary of Health and Human Services under sec. 1311(c), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, which include minimum standards in the areas of marketing practices, network adequacy, essential community providers in underserved areas, accreditation, quality improvement, uniform enrollment forms, and descriptions of coverage and information on quality measures for health benefit plan performance; and

(7) the exchange determines that making the plan available through the exchange is in the interest of qualified individuals and qualified employers in this state.

(b) The exchange may not exclude a health benefit plan

(1) because the plan is a fee-for-service plan;

(2) by imposing premium price controls; or

(3) because the plan provides treatments necessary to prevent patients' deaths that the exchange determines are inappropriate or too costly.

(c) The exchange shall require each health care insurer seeking certification of a plan as a qualified health plan to

(1) submit to the exchange a justification for any premium increase before implementation of that increase; the health care insurer shall prominently post the justification information on the health care insurer's Internet website; the exchange shall consider the information submitted, along with the information and the recommendations provided to the exchange by the director under 42 U.S.C. 300gg-94 (sec. 2794(b), Part C, title XXVII, Public Health Service Act) when determining whether to allow the health care insurer to make plans available through the exchange;

(2) make available to the public in plain language, as defined in sec. 1311(e)(3)(B), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and submit to the exchange, the United States Secretary of Health and Human Services, and the director accurate and timely disclosure of the following:

(A) claims payment policies and practices;

(B) periodic financial disclosures;

(C) data on enrollment;

(D) data on disenrollment;

(E) data on the number of claims that are denied;

(F) data on rating practices;

(G) information on cost-sharing and payments with respect to any out-of-network coverage;

(H) information on enrollee and participant rights under Title I of P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act; and

(I) other appropriate information as determined by the United States Secretary of Health and Human Services.

(3) permit individuals to learn, in a timely manner on the request of the individual, the amount of cost-sharing, including deductibles, copayments, and coinsurance, under the individual's plan or coverage that the individual would be responsible for paying with respect to the furnishing of a specific item or service by a participating provider; a minimum, that information must be made available to the individual through an Internet website and through other means for individuals without access to the Internet.

(d) The exchange may not exempt a health care insurer seeking certification of a qualified health plan from state licensure or solvency requirements, regardless of the type or size of the health care insurer, and shall apply the criteria of this section in a manner that ensures equality between or among health care insurers participating in the exchange.

(e) The provisions of AS 21.54.200 - 21.54.270 that are applicable to qualified

health plans also apply, to the extent relevant, to qualified dental plans, except as modified under (1) - (3) of this subsection or by regulations adopted by the exchange. Under this subsection,

(1) the health care insurer shall be licensed to offer dental coverage, but need not be licensed to offer other health benefits;

(2) the plan must be limited to dental and oral health benefits, without substantially duplicating the benefits typically offered by a health benefit plan without dental coverage and must include, at a minimum, the essential pediatric dental benefits prescribed by the United States Secretary of Health and Human Services under sec. 1302(b)(1)(J), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and other dental benefits as the exchange or the Secretary may specify by regulation; and

(3) the health care insurer may jointly offer a comprehensive plan through the exchange in which the dental benefits are provided by a health care insurer through a qualified dental plan and the other benefits are provided by a health care insurer through a qualified health plan if the plans are priced separately and are also made available for purchase separately at the same price.

Sec. 21.54.240. Exchange funding; publication of costs of the exchange. (a) The exchange may charge assessments or user fees to a health care insurer offering a health benefit plan or otherwise generate funding necessary to support its operations provided under AS 21.54.200 - 21.54.270.

(b) The exchange shall publish the average costs of licensing, regulatory fees, and any other payments required by the exchange, and the administrative costs of the exchange, on its Internet website. That information must include information on money lost to waste, fraud, and abuse.

Sec. 21.54.250. Regulations. The division or the exchange may adopt regulations to implement their respective authority under the provisions of AS 21.54.200 - 21.54.270. Regulations adopted under this section may not conflict with or prevent the application of regulations adopted by the United States Secretary of Health and Human Services under P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act.

Sec. 21.54.260. Relation to other laws. Provisions of AS 21.54.200 - 21.54.270, and actions taken by the exchange under AS 21.54.200 - 21.54.270 may not be construed to preempt or supersede the authority of the director to regulate the business of insurance in the state. Except as expressly provided to the contrary in AS 21.54.200 - 21.54.270, all health care insurers offering qualified health plans in the state shall comply fully with all applicable health insurance laws of the state and regulations adopted and orders issued by the director.

Sec. 21.54.270. Definitions. In AS 21.54.200 - 21.54.270,

(1) "board" means the Alaska Health Benefit Exchange Board established AS 21.54.210;

(2) "exchange" means the Alaska Health Benefit Exchange established under AS 21.54.200;

(3) "health benefit plan" has the meaning given in AS 21.54.500, except that, notwithstanding AS 21.54.500, it does not include

(A) coverage only for accident or disability income insurance, or any combination of accident or disability income insurance;

(B) coverage issued as a supplement to liability insurance;

(C) liability insurance, including general liability insurance and automobile liability insurance;

(D) workers' compensation insurance or similar insurance;

(E) automobile medical payment insurance;

(F) credit-only insurance;

(G) coverage for on-site medical clinics;

(H) insurance coverage specified in federal regulations issued under the P.L. 104-191 (Health Insurance Portability and Accountability Act of 1996), under which benefits for health care services are secondary or incidental to other insurance benefits;

(I) the following benefits if they are provided under a separate policy, certificate, or contract of insurance or are otherwise not an integral part of the plan:

(i) limited scope dental or vision benefits;

(ii) benefits for long-term care, nursing home care, home health care, community-based care, or any combination of long-term care, nursing home care, home health care, or community based care;

(J) limited benefits specified in federal regulations issued under P. L. 104-191 (Health Insurance Portability and Accountability Act of 1996);

(K) the following benefits if the benefits are provided under a separate policy, certificate, or contract of insurance; there is no coordination between the provision of the benefits and any exclusion of benefits under any group health plan maintained by the same plan sponsor; and the benefits are paid with respect to an event without regard to whether benefits are provided with respect to an event under any group health plan maintained by the same plan sponsor:

(i) coverage for only a specified disease or illness; or

(ii) hospital indemnity or other fixed indemnity insurance;

(L) the following benefits if offered as a separate policy, certificate, or contract of insurance:

(i) Medicare supplemental health insurance as defined in 42 U.S.C. 1395ss(g)(1) (sec. 1882(g)(1) ch. 7, Subchapter XVIII, Part E, Social Security Act);

(ii) coverage supplemental to the coverage provided 10 U.S.C. 1071 - 1110a (Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)); or

(iii) similar supplemental coverage provided to coverage under a group health plan;

(4) "qualified dental plan" means a limited scope dental plan that has been certified under AS 21.54.230(e);

(5) "qualified employer" means a small employer that elects to make its full-time employees and, at the option of the employer, some or all of its part-time employees, eligible for one or more qualified health plans offered through the small

business health options program exchange if the employer

(A) has its principal place of business in this state and elects to provide coverage through the small business health options program exchange to all of its eligible employees, wherever employed; or

(B) elects to provide coverage through the small business health options program exchange to all of its eligible employees who are principally employed in this state;

(6) "qualified health plan" means a health benefit plan that has in effect a certification that the plan meets the criteria for certification described in sec. 1311(c), P.L. 111-148 (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act, and AS 21.54.230;

(7) "qualified individual" means an individual, including a minor, who

(A) is seeking to enroll in a qualified health plan offered to individuals through the exchange;

(B) resides in this state;

(C) at the time of enrollment, is not incarcerated, other than incarceration pending the disposition of charges; and

(D) for the entire period for which enrollment is sought, is and is reasonably expected to be a citizen or national of the United States or an alien lawfully present in the United States;

(8) "small business health options program exchange" means the small business health options exchange under AS 21.54.220(a)(12) and sec. 1321, P.L. 111-148, (Patient Protection and Affordable Care Act), as amended, and regulations adopted under that Act;

(9) "small employer," notwithstanding AS 21.54.500, means an employer that employed an average of not more than 50 employees during the preceding calendar year; for purposes of this paragraph,

(A) a person treated as a single employer under 26 U.S.C. 414 (b), (c), (m), or (o) (Internal Revenue Code of 1986), shall be treated as a single employer;

(B) an employer and any predecessor employer shall be treated

as a single employer;

(C) all employees shall be counted, including a part-time employee and an employee who is not eligible for coverage through the employer;

(D) if an employer was not in existence throughout the preceding calendar year, the determination of whether that employer is a small employer shall be based on the average number of employees the employer is reasonably expected to employ on business days in the current calendar year; and
