- The 2009 acquisition of XTO Energy brings materiality to ExxonMobil's technical expertise in tight gas, CBM, and shale oil and gas exploitation, with ~2.3 bcf/d and 87 mboe/d of production, proved reserves of ~2.3 bn boe, and a resource base of 7.5 bn boe. From a position of basin dominance in the US Onshore, ExxonMobil will seek to build a global unconventional portfolio; as such, the company has already begun purchasing prospective acreage in Argentina, Germany, Poland, Indonesia, and, most recently, China.
- Largely a result of the acquisition, ExxonMobil recorded a 13% increase in production in 2010 over 2009. The company will seek growth of 4-5% per annum over the 2009-2014 period.

Company Overview

- **HQ:** Irving, Texas
- **Employees:** 83,600
- **2010 Reserves:** 24,809 mmboe
- **2010 Production:** 4,447 mboe/d
- **3 Yr Production Growth:** 2.2% CAGR (2007-2010)
- **Nov 2011 Market Cap:** $386 bn
- **Nov 2011 P/E Ratio:** 9.71
- **2010 Corp Revenue:** $370 bn
- **2011 Upstream Capex (Est.):** ~$28 bn

PFC Energy

ExxonMobil Global Production Portfolio - 2010

Canada: Oil sands volumes (Cold Lake, Syncrude, and Kearl projects) will dominate out-year production growth.

UK and **Norway:** Mature North Sea assets have delivered volume declines of ~5% per annum in Europe over the last 5 years.

Germany: Legacy gas assets; recent unconventional acreage acquisition.

Kazakhstan: Participation in 2 large-scale projects: Tengiz & Kashagan.

Russia: Strong performance track record at Sakhalin I and Arkutun-Dagi. Rosneft Strategic partnership could be a dial-turner in Russia (Arctic exploration & tight oil resource exploitation).

US: Largest producing country; regional decade-long decline reversed with purchase of XTO. XTO combined with three additional unconventional acquisitions will make the Onshore L48 the cornerstone of future growth.

Qatar: Represented ~20% of 2010 output. Decade-long double digit growth driven by final tranche of sanctioned LNG capacity in Qatar.

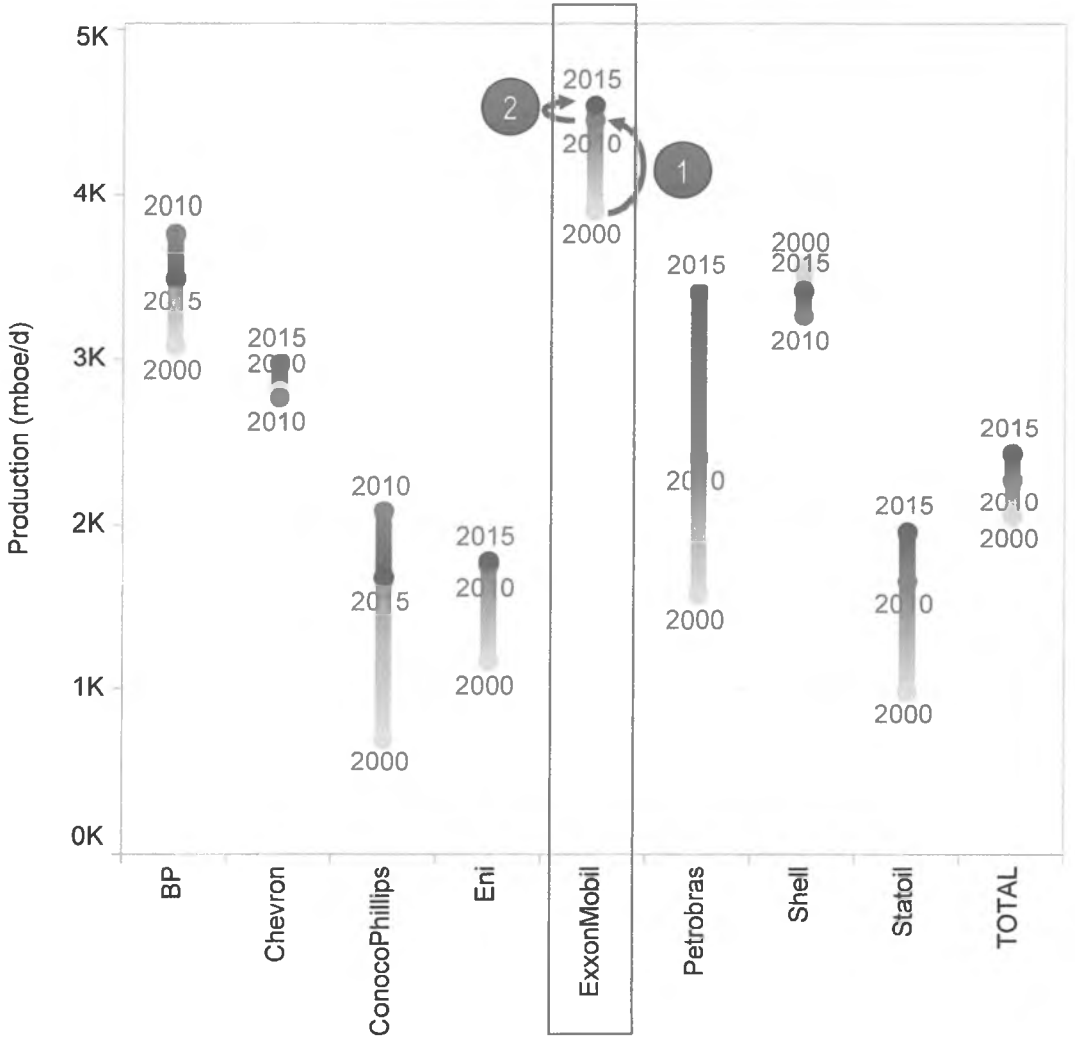
Nigeria: Generally declining shallow- and deep-water assets.

Australia: Gas oriented region, with growth stemming from Gorgon LNG project and Gippsland Basin shallow water projects (Kipper and Turrum).

Indonesia: Near-term gas volumes will hold production steady as ExxonMobil positions for new ventures in the unconventional space (coal bed methane).

Malaysia: Key gas producing area; focus on enhanced oil recovery (EOR) and field life extension schemes.

Argentina: legacy, declining gas assets; recent acreage positioning in prospective shale Neuquen Basin.



Angola: Multi-field new source developments (Kizomba Satellites Phase 1, Pazflor, and CLOV) drive regional growth.

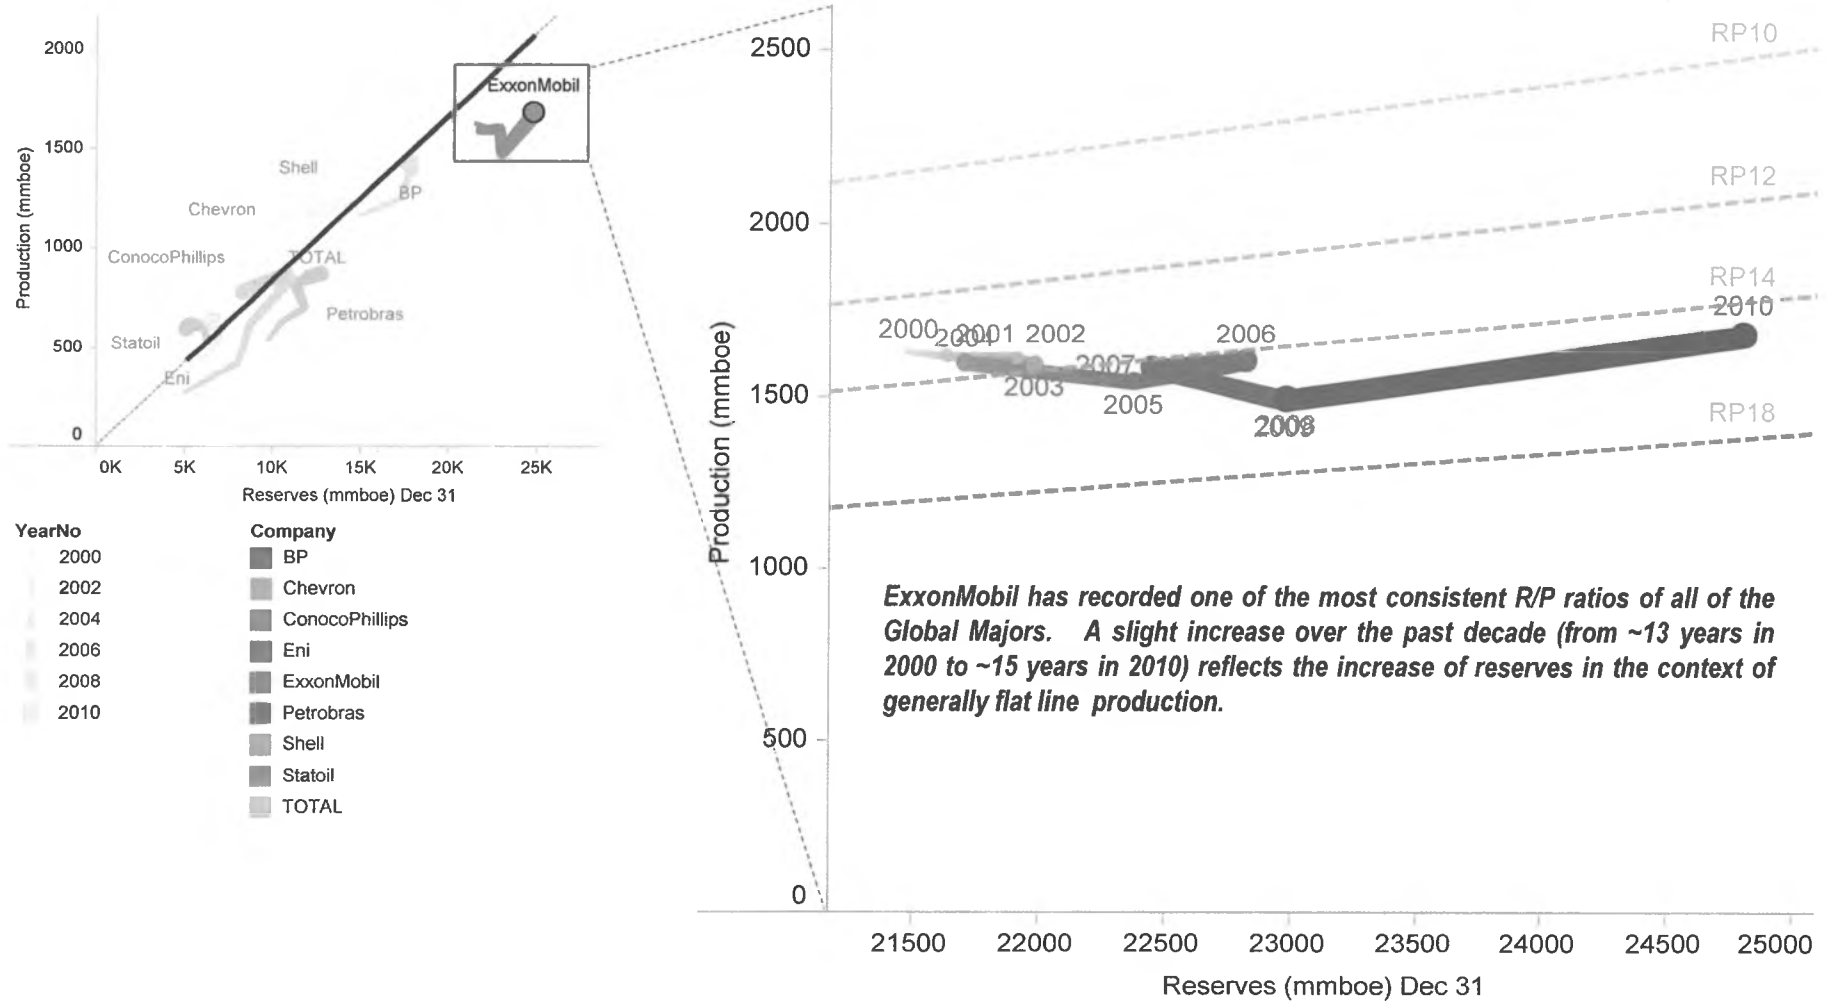
Papua New Guinea: Formerly small contributor to the ExxonMobil portfolio, PNG will rise in prominence within the portfolio through the monetization of gas reserves at PLNG.

PFC Energy

Total Portfolio Evolution: ExxonMobil vis-à-vis the Competition

Production (mboe/d) in 2000, 2010 and 2015 (PFC Forecast): ExxonMobil and Peers

Averaging ~4.45 mmboe/d in 2010, ExxonMobil continues to lead its peer group in terms of production.

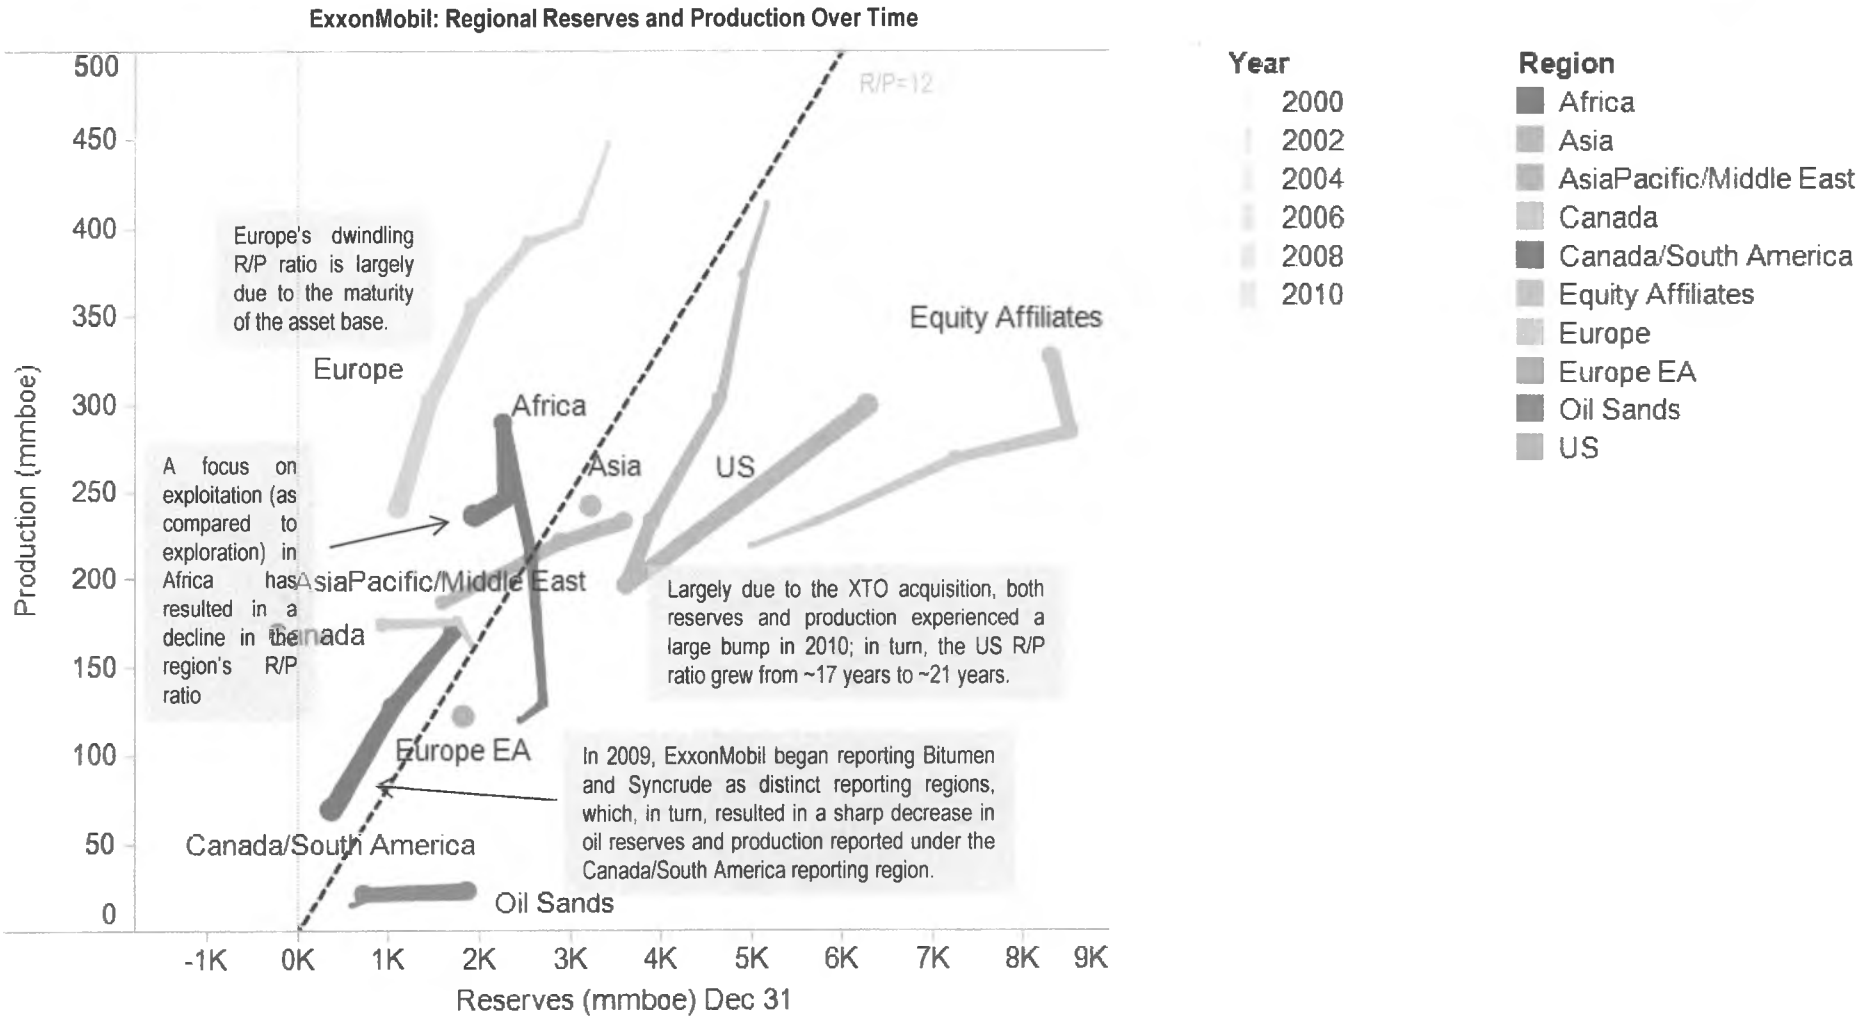


1. **2000-2010:** For much of the last decade, production oscillated, rising between 2000 and 2002 and then again 2005-2007; however, by 2009 production volumes were only slightly above levels recorded at the start of the decade, averaging ~3.92 mmboe/d. In 2010, ExxonMobil secured production growth of ~13% (~6% excluding the XTO acquisition), reaching ~4.45 mmboe/d. For a company that has prided itself on organic reserves and production growth, the XTO acquisition marks a considerable departure in growth strategy for ExxonMobil.

2. **2011-2015:** ExxonMobil's production is forecast to grow modestly between 2010 and 2015, reaching only ~4.54 mmboe/d in 2015. While PFC Energy estimates are lower than ExxonMobil targets, the absence of guidance regarding growth projects associated with the XTO portfolio make the pace of future growth uncertain.

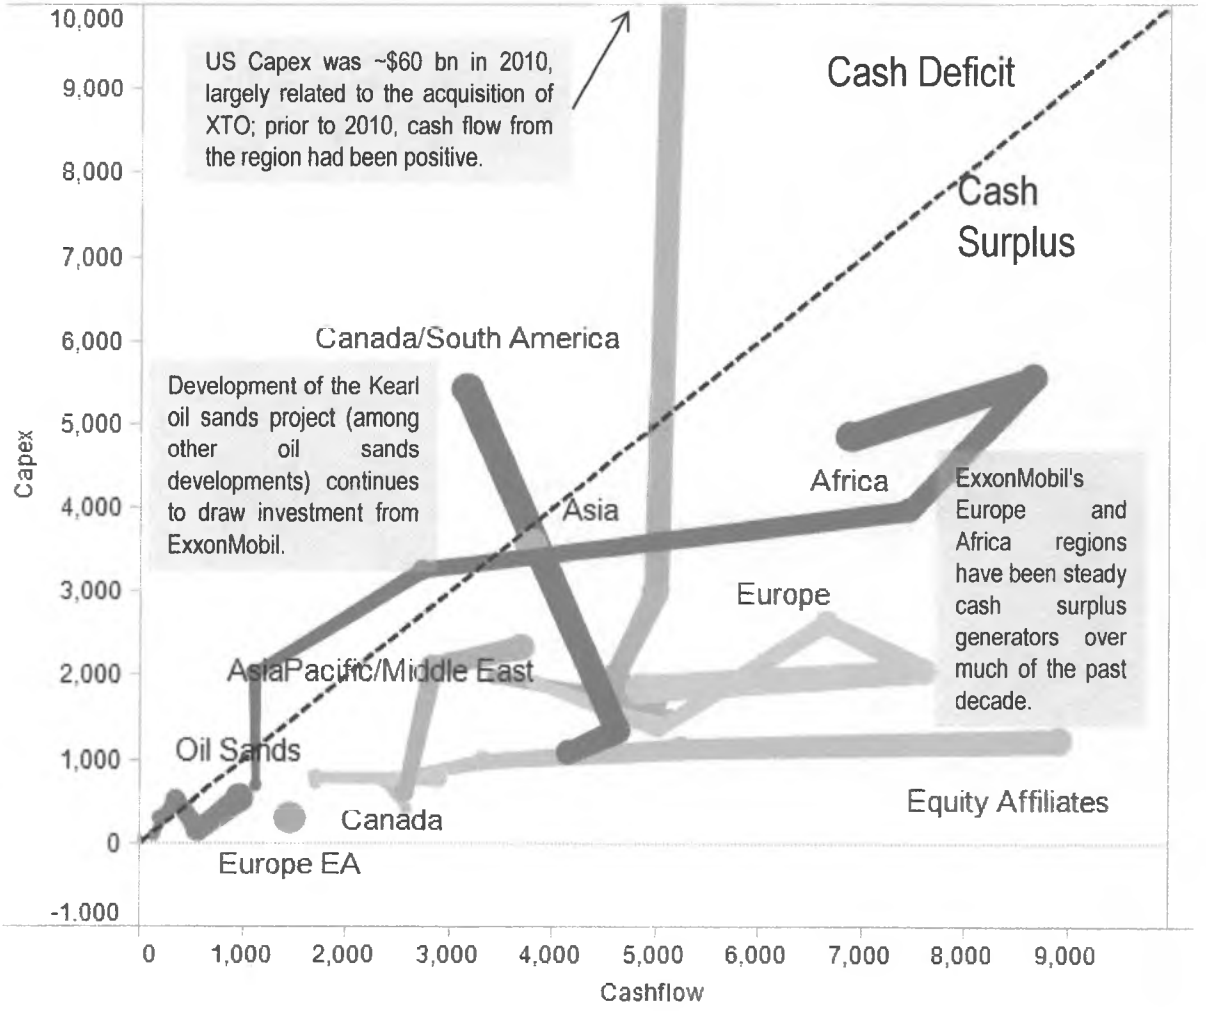
PFC Energy

Reserves and Production: ExxonMobil vis-à-vis the Competition



Reserves and Production (mmboe) 2000-2010: ExxonMobil and Peers

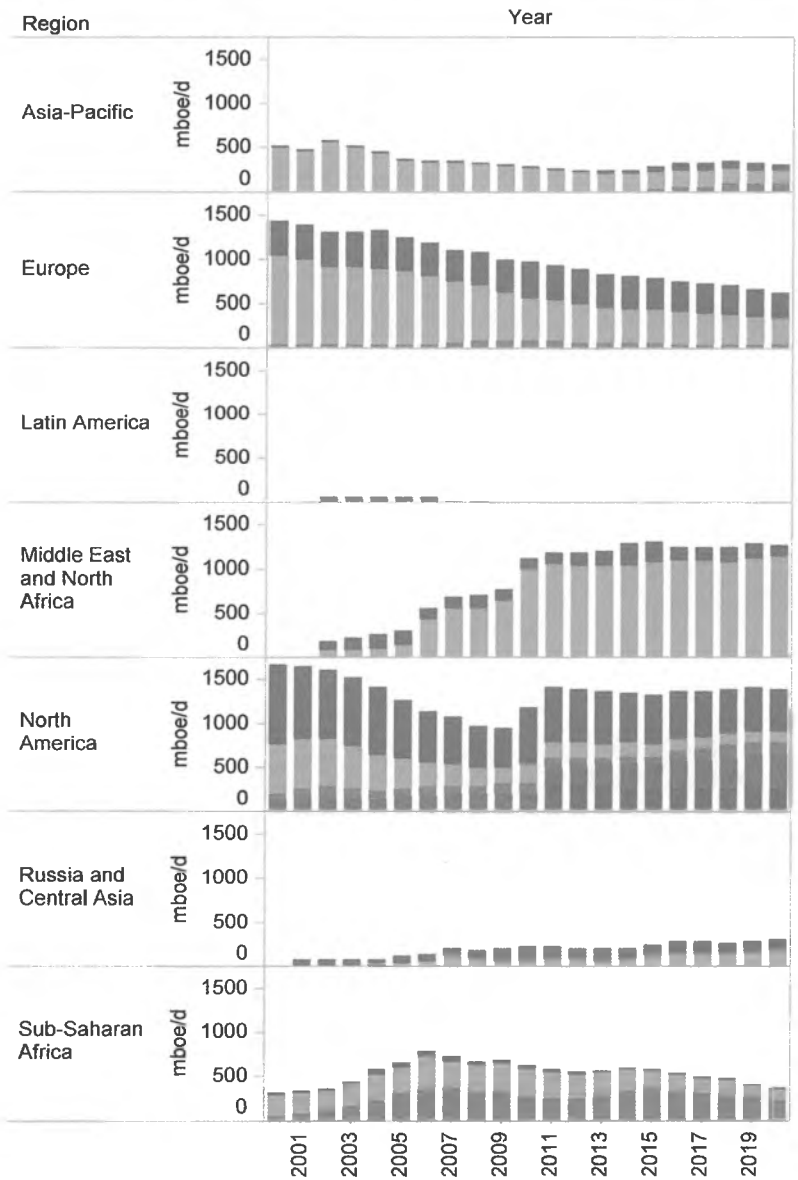
ExxonMobil has recorded one of the most consistent R/P ratios of all of the Global Majors. A slight increase over the past decade (from ~13 years in 2000 to ~15 years in 2010) reflects the increase of reserves in the context of generally flat line production.



PFC Energy

Reserves and Production: ExxonMobil Intra-Portfolio Performance

PFC Energy



How the Portfolio is Financed: Sources and Uses of Cash

PFC Energy

Global Production:
Evolution of the Portfolio

Asia Pacific: Declines in ExxonMobil's relatively mature Asia-Pacific portfolio have been consistent for most of the past decade. A revival in regional production (though medium to long term in nature) is based primarily on two large gas export projects: Papua New Guinea LNG and Gorgon LNG (Australia).

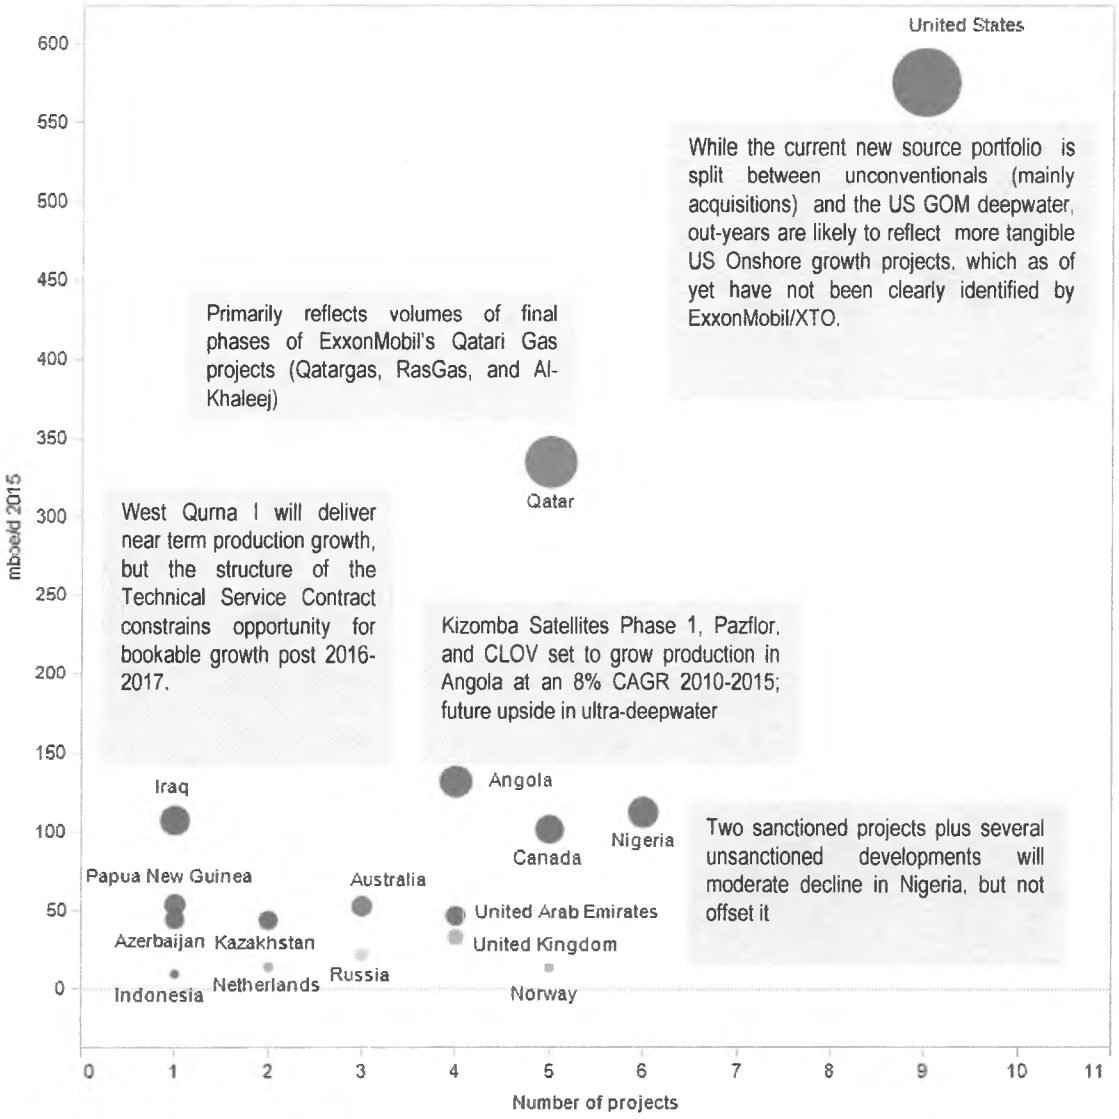
Europe: Mature and generally declining production position. Positive net cash flow enables, in part, financing of frontier exploration in both unconventionals and the deepwater: ExxonMobil will seek to leverage the capabilities of XTO in Germany and Poland, while also assessing the prospectivity of the Turkish Black Sea.

Latin America: At 9 mboe/d, the region has no material impact on the ExxonMobil portfolio. Production is sourced solely from mature, declining gas assets in Argentina. The recent acquisition of 130,000 net acres of prospective shale gas resource in the Neuquen basin is part of a global strategy to leverage XTO capabilities in unconventional resource plays.

Middle East & North Africa: The rapid growth in MENA production that ExxonMobil experienced between 2002 and 2010 is on the cusp of reaching plateau, as the final Qatargas, RasGas, and Al-Khaleej phases have come onstream. While ExxonMobil will record growth from the West Qurna I project, upside in Iraq remains unclear.

North America: The acquisition of XTO Energy will drive a resurgence in regional production. A focus on Fayetteville, Haynesville/Bossier, Barnet, and Woodford shale gas plays, and transitioning portfolio to a more balanced oil:gas ratio in the out-years. A suite of Canadian oil sands developments and potential offshore projects will also contribute growth.

Russia & Central Asia: Major growth 2005-2010 was driven by a handful of mega-projects (Tengiz and Kashagan, Sakhalin I, and Azeri-Chirag-Guneshli); future performance relies heavily on subsequent development phases of these projects, most of which face challenges. The Rosneft partnership could provide additional long-term opportunity.



Sub-Saharan Africa: Growth in SSA has leveled off as new developments struggle to keep pace with steep deepwater decline rates. The primary bright spot in portfolio is Angola, where three new projects (Pazflor, Kizomba Satellites, and PSVM) are scheduled to come onstream over the next two years.

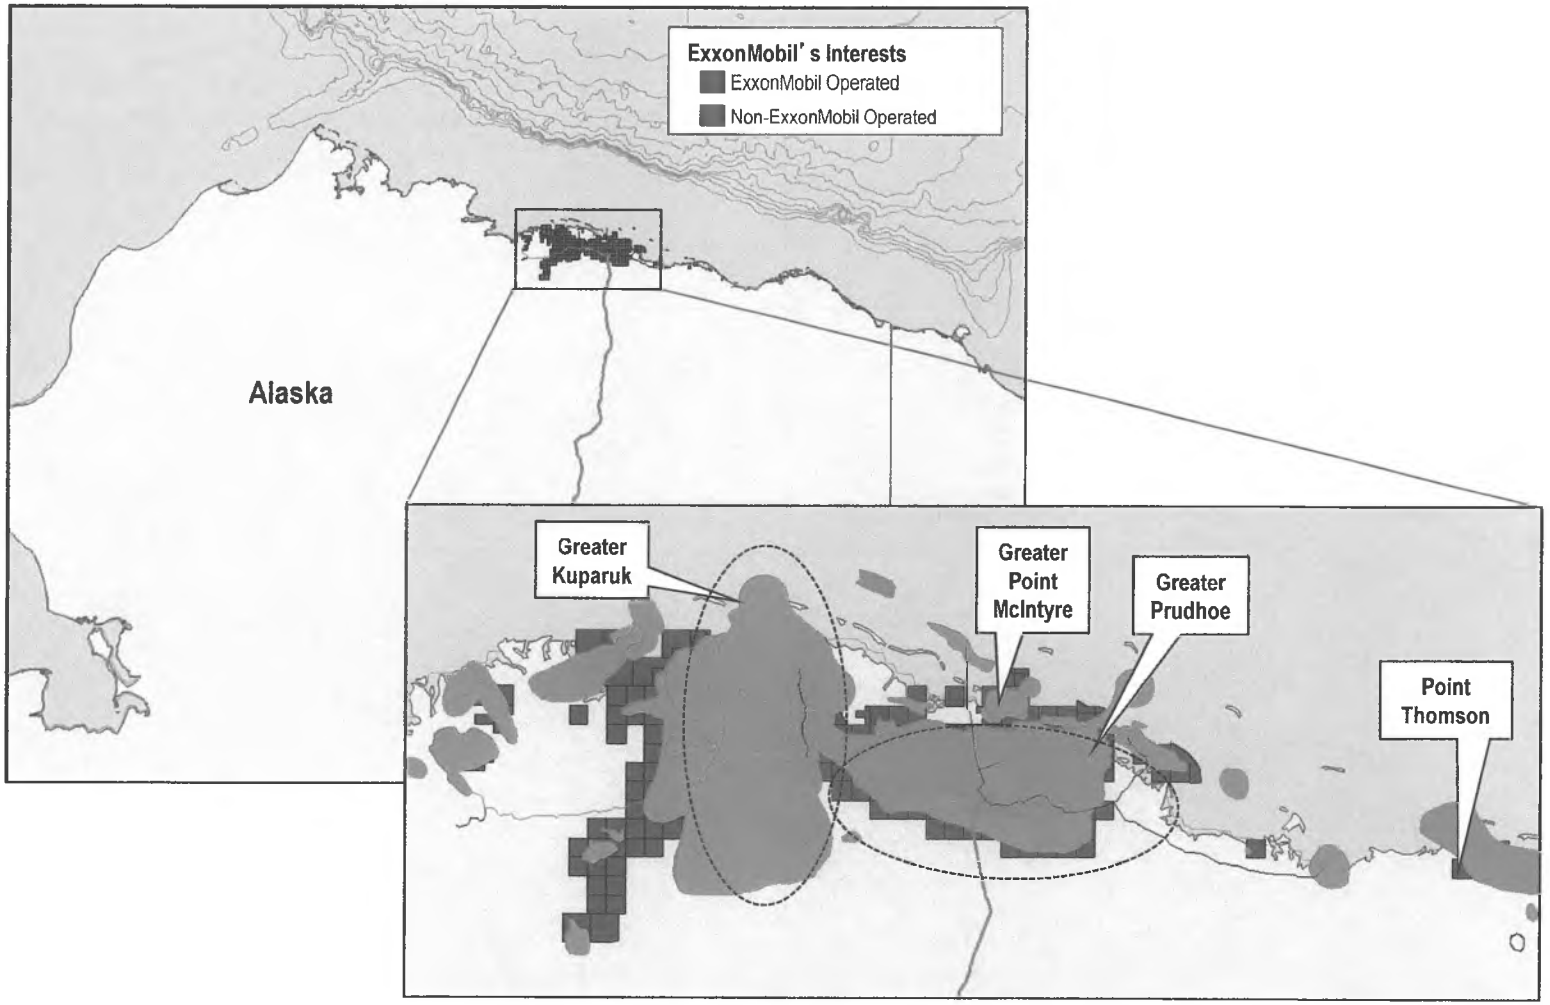
PFC Energy

Global Production:
Country Growth Project Analysis

ExxonMobil: New Source Production – Number of Projects by 2015 Production and Oil/Gas Split



ExxonMobil's US new source portfolio will dwarf new source production from all other countries. Through 2015, the US will contribute nearly 40% of global new source incremental volumes, 99% of which will stem from the company's unconventional activities (acquisitions plus the Piceance tight gas development).

Production from Qatar will primarily be tied to development of the North Field and the Qatargas and RasGas LNG projects, while the rest of the new source landscape reflects ExxonMobil's expansive upstream portfolio.

International unconventional developments are likely to be largely immaterial until 2020 or thereafter.

PFC Energy

ExxonMobil in Alaska – North Slope

PFC Energy

ExxonMobil **Alaska Activity & PFC Energy Assessment**

Alaska Designation	Activity	PFC Energy Assessment
Harvest Area	• In Alaska, ExxonMobil holds interests in the **Greater Prudhoe**, **Greater Point McIntyre**, and **Greater Kuparuk** areas. The company is one of the largest North Slope producers, although production from the region is declining; 2010 net production averaged 117 mb/d of liquids. • Development activities continued at **Point Thomson** in 2010 (35% w.i., operated), and first production of gas liquids is anticipated in 2014. The longer-term potential lies in commercialization of the gas reserves, which is dependent on building a gas pipeline.	**Material harvest position.** As the largest holder of discovered gas resources on the North Slope and a co-operator of the Prudhoe Bay Western Region development, ExxonMobil holds a leading position in Alaska.

PFC-Identified Challenges

- Deliver on unconventional resource positioning: The XTO Energy acquisition and subsequent shale gas acreage transactions have made ExxonMobil a force in the North America unconventional resource play. That said, the company has provided limited guidance on pace of forward development despite continued acreage accumulation. Furthermore, given the weak US gas price environment, it is unclear how rapidly ExxonMobil's management will grow sales volumes. ExxonMobil is counting on additional long-term value arising from the XTO transaction through development of its expanding portfolio of International unconventional resource holdings.
- Execute on Asia-Pacific LNG Projects: ExxonMobil has a queue of LNG developments in Asia-Pacific, including Gorgon LNG (operated by Chevron), PNG LNG, and the potential Scarborough gas field development, all of which are poised to generate longer-term volume growth. Each of these projects comes with significant technical challenges—CO_2 capture and disposal at Gorgon LNG, remote gas field development and long distance pipeline transport in the case of PNG LNG, and the remote offshore location of the Scarborough field in the Carnarvon Basin (which may result in the field being dedicated as feedstock supply to the Pluto or Wheatstone LNG projects, rather than a greenfield LNG development). Performance will be critical to ensuring long-term regional portfolio growth.
- Maintain leadership in share buy-back and dividend performance: ExxonMobil has been a clear peer group leader in returns to shareholders, distributing ~$19.7 bn through dividends and share buy-backs in 2010 and spending ~$114 bn on share repurchase over the 2006-2010 period. With the increased emphasis being placed on unconventional gas resources to deliver future volume growth, shareholders will be looking for ExxonMobil to continue its leading dividend and share buy-back performance, as the core differentiator from its faster growing (in volumetric terms) peer group companies.
- Replace volume growth from Qatar North Field commercialization: With full ramp-up of the final four liquefaction trains at the RasGas and Qatargas LNG complexes, and continued imposition of a development moratorium for the North Field resource by the Qatar government, ExxonMobil will be challenged to deliver material global growth.
  - It is not clear how aggressively ExxonMobil will look to develop its US Onshore unconventional gas resources, given current and projected gas pricing in the North America market;
  - Monetization of captured frontier gas resources in North America (Alaska North Slope, Mackenzie Delta) continues to face delays in the form of regulatory hurdles (recently removed for the Mackenzie Valley gas pipeline project) and gas market supply-demand balances;
  - Development of captured oil reserves in the Caspian region have experienced significant delays and cost over-runs, and are coming under increased political risk through accelerating resource nationalism;
  - ExxonMobil was successful in securing a growth position in Iraq through the West Qurna-1 redevelopment project, but will have to share the larger Iraqi resource prize with a number of IOCs and NOCs. It is not clear that Iraq can become a Core growth area for the company.

AOGA

OIL & GAS: FUELING ALASKA'S ECONOMY

Senate Finance Committee

March 16, 2012

Kara Moriarty, Executive Director

AOGA Member Companies

Decoupling – Sections 5 & 11 of CSSB 192 (RES)

- AOGA Opposes Proposed Language
- Proposed Language results in a tax increase
- Recognize need to eventually resolve the concern that combining the value of gas with that of oil when significant gas sales occur will reduce the tax on the oil, unless they are decoupled.
- AOGA open to trigger mechanism, but reserve right to evaluate proposed language

AOGA Opposes CSSB 192 (RES) – March 16, 2012

Petroleum Information Management System
Sections 2 & 3 of CSSB 192 (RES)

- New section would blur the current clear authorities & accountability of DOR (Taxation Power) & AOGCC (Police Power)

- Could lead to companies providing the same information over and over or in different formats to different agencies

- Proprietary/confidential information may not be adequately safeguarded

- Creates unrealistic expectations about public access to certain specific kinds of information

- May create federal disclosure issues

Progressivity & "base" tax rate
Sections 5, 7, and 8 of CSSB 192 (RES)

- 25% base rate is too high
- CS does not provide brackets – brackets are meaningful
- CS lowers starting slope by merely 1/8
- The new cap will not be reached until approximately $244/barrel

New Minimum Tax – or "Floor"
Section 13 of CSSB 192 (RES)

- Only applies to legacy fields (Prudhoe & Kuparuk)
- Creates a disincentive to invest in legacy fields, especially at low prices
- Requires allocation of costs among the two fields & a producer's interest in their other fields

Summary

- AOGA Opposes CS SB 192 (RES)
- Overall government take for Alaska would still be too high under this CS
- AOGA supports meaningful changes – such as progressivity brackets
- Tax Policy does affect business decisions
- CS will not improve ability to attract more investment
- CS will not lead to more production

Impact of Section 3, CS SB 192 on AOGCC

The AOGCC, an independent quasi-judicial State agency, is the State's permitting and regulatory authority over hydrocarbon and geothermal wells. The Commission's duties include ensuring the maximum recovery of hydrocarbon and geothermal resources, preventing hydrocarbon and geothermal waste, ensuring well safety, and protecting underground sources of drinking water and correlative rights. Given the nature of the Commission's duties and responsibilities, apart from support personnel, it is staffed by expert petroleum engineers and petroleum geologists. Because its expertise is so carefully tailored to its statutory duties and responsibilities, the Commission functions well and Alaska has an unrivaled record with regard to well safety and production.

Section 3 of the committee substitute for SB 192 seeks to effectuate a substantial change in the AOGCC by requiring the Commission to establish, operate and maintain an electronic petroleum information management system comprised of available and non-confidential information. The vast majority of the information the Commission must include in the petroleum information management system has nothing to do with the Commission's mission or function – "unit and joint operating agreements," exploration licenses and leases, "work programs and budgets," "development plans," operating and capital expenditures and projections, "oil and gas sales, revenue and pricing," transportation agreements, abandonment plans and budgets, resident and non-resident hiring information, training opportunities, and other information "the commission determines necessary and relevant to the oil and gas production tax and to the exploration, development, and production of oil and gas resources." Much of this information is currently already gathered and maintained by other state agencies or is not available to any state agency.

After careful review and consideration of Section 3, the AOGCC is of the view that Section 3 radically changes the AOGCC's longstanding role as the State's petroleum technology and geology experts and jeopardizes the Commission's ability to discharge its primary duties and responsibilities in those realms. The Commission has neither the expertise nor the infrastructure to construct, maintain and operate information management systems, computer systems, and the gathering of information on other subjects not related to the safe, efficient production of hydrocarbon resources from wells. Implementation of Section 3 will create – at a substantial fiscal outlay – an additional distinct state bureaucracy within the AOGCC which duplicates functions currently performed by other state agencies.

The AOGCC's non-confidential information is already publically available on its website. Other agencies are currently working to provide similar web availability of their data. Once those agencies do so, the information will be far more readily accessible to the public on those websites and at a substantially reduced cost.

THE ALLIANCE

...for responsible development of Alaska's Oil, Gas & Mineral Resources

THE ALLIANCE & CSSE 192

Doug Smith
President/CEO – Little Red Services
Government Affairs Chair –
Alaska Support Industry Alliance

Presentation Organization

- Background
- Impact to Member Companies
- Observations
- Questions

Our story hasn't changed...

- Alliance members, at their own expense, have traveled to Juneau more than 10 times during the 27th Alaska Legislature
- We have consistently advocated for significant tax reform
- Members and their employees have participated in every public testimony opportunity in 2011/2012
- The McDowell Report confirmed the facts we've presented
  - Alliance companies average between 70% and 90% Alaska hire
  - Alliance companies employ non-residents who were formerly long-term Alaska residents
  - Record employment on the North Slope has not led to a reduction in the production decline

Alliance Member Composition

- The Alliance is comprised of 460 member businesses
- 35,000 employees
- Our membership is comprised of businesses in 43 different sectors from Automotive to Welding
- Our mission statement is to "promote responsible exploration, development and production of oil, gas and mineral resources for the benefit of all Alaskans"

The current investment climate impact on Alliance members

- Continued decline in projects
  - Three largest fabrication shops in the state are currently operating at a loss, with little to no work, in order to keep core employees on staff
- Alaskan companies are looking for work, resulting in many relocating or shifting resources and investment to the lower 48 (CIRI, Solsten, Fairweather, Builders Choice, Northern Industrial Training, Carlile, Lynden, Peak Oilfield Services, Cruz Construction…)

Jobs

- As indicated in the McDowell study, record high employment on the North Slope **does not** represent a thriving oil industry
  - 2000 – 108,000 barrels of annual production for every job
  - 2010 – 28,000 barrels of annual production for every job
- Loss of highly trained professionals to outside competition
- Reduction of jobs based in Anchorage and Fairbanks like engineers, fabrication work, etc.

My Company – Little Red Services

- Letter in your committee packet
  - Relocating an asset from production-related activity to maintenance activities that do not increase production
- Financing
  - Banks outside of Alaska are concerned about our current tax policy and its potential impact on future financial forecast of our service company

The future of Alliance members in the oil business…

Oil tax reform must address the following:

- Existing light oil production
- New light oil production
- Viscous
- Exploration
- New companies and investment in the Alaska market

Observations

- Existing production
  - Low-cost light oil (existing production)
    - "Government take of 70-75% is reasonable. It is maybe slightly on the high side." *(PVM slide 28, presentation to Alaska Support Industry Alliance)*

Observations

- New production
  - The allowance for production increases in CSSB 192 does not reflect the recommendation of Dr. van Meurs: "the 60-65% government take for more costly new light oil resources as proposed in HB 110 and HB 17 is a reasonable level from an international perspective." *(PVM slide 38)*
  - Dr. van Meurs includes in-field drilling of existing fields as new high-cost light oil production *(PVM slide 16)*
  - Dr. van Meurs "The main reason for major companies to be in a harvest mode is that projects outside Alaska are more attractive. No large attractive projects available in Alaska under current fiscal terms for major oil companies" *(PVM slide 15)*

Observations

- New Production, continued…
  - Both Gabon and Trinidad applied an approximate 12 percent drop in order to attract new investment in an effort to offset declining production *(PVM slide 31)*
    - Marginal government take in Gabon at $100/bbl is 52%
    - Marginal government take in Alberta is 57%
    - Marginal government take in Alaska under ACES is over 80%
      (PFC Energy, slide 49)

Observations

- Viscous (called heavy by Dr. van Meurs)
  - Dr. van Meurs "To be competitive Alaska would have to offer government takes for heavy oil at 55-60%." *(PVM Slide 42)*
- Exploration
  - Tax credits have stimulated significant exploration this season
  - Will this result in the required investment to bring new discoveries to production under the current ACES tax structure?

Observations

- New companies in the Alaska market
  - CSSB 192 does not simplify our tax structure for companies looking to invest in new markets and it does not make us competitive for new projects
  - ACES does not compete well when developing higher cost light oil *(PVM slide 37)*
  - "ACES inhibits the development of new projects and resources that might help stem or even reverse decline." *(PFC slide 28)*

Observations

- There is probably a point where industry and the State share the pain of low prices
  - Industry should not have to give up total profits to taxes
  - The State treasury should not collect zero tax at low prices
- A healthy partnership should exist on both ends of the price spectrum

Observations

- Decoupling may be in the State's best interest if it is revenue-neutral to industry
- The Alliance feels this bill, in its current form, does not go far enough to encourage a significant shift in investment
- Although we have touched on several points from Dr. van Meurs on different types of production and corresponding tax rates it would be difficult to implement the approach
- The method and levers to be adjusted is the challenge before the senate but we support a magnitude of change that would place us in the middle of a comparative chart produced by PFC Energy

Testimony of Resource Development Council for Alaska to
Senate Finance Committee,
Regarding CSSB192(RES)
March 16, 2012

Good morning Co-Chairs Stedman and Hoffman and members of the committee. My name is Rick Rogers, Executive Director of the Resource Development Council for Alaska (RDC). RDC is a statewide membership-funded non-profit trade association representing the common interest of the Forestry, Fishing, Tourism, Mining and Oil and Gas industries in Alaska. Our membership is truly a broad cross section of Alaska businesses including the aforementioned industries as well as communities, all twelve Alaska Native Regional Corporations, organized labor, utilities and support business that recognize the important role resource development plays in our economy.

RDC thanks the committee for this invited testimony. I regret being unable to be with you today in Juneau, and appreciate the LIO and staff facilitating testimony from Anchorage. I have prepared no slides for today's presentation.

RDC is appreciative of this committee's recognition of the need to improve the investment climate in Alaska's oil and gas industry to stem TAPS throughput decline. I hope to emphasize the sense of urgency and the broad base of support from RDC membership towards meaningful adjustment to the production tax to achieve a more attractive investment climate in Alaska. Some of the most vocal proponents of production tax reform among our membership are not directly involved in the oil and gas industry. The business community is fearful what continued TAPS throughput decline will do to our economy as a whole.

We are convinced that ACES in its current form is retarding investment and contributing to an accelerating production decline. Alaska is sitting on the edge of a fiscal cliff. A sobering outlook can be found in the Governor's budget, the ten-year budget projection that shows several plausible scenarios with significant budget deficits by 2014. While meaningful tax reform will result in short-term revenue decline, long term it is imperative that we sacrifice some short-term tax revenues to reinvigorate production. From the RDC perspective, this is about acting in the long-term interest of Alaskans.

The long-term discussion needs to be how to encourage more production. Taxing ourselves to prosperity is not a strategy. The CS to SB192 as currently drafted will not provide the improved business climate that results in the investment needed to increase production.

- The changes to the progressivity formula in CSSB192(RES) are insufficient to change investment behavior. RDC has heard this from both industry and the Department of Revenue.

- The allowances for new production in the bill have minimal impact, approximately $25 million per year according to the Department of Revenue March 14 testimony to this committee.

- The gross minimum tax is a tax increase of up to $400 million per year at $40 oil and according to the bill's sponsor statement this is a tax increase at prices up to $70/bbl. We cannot expect tax increases to stimulate investment.

This is a historic turning point for Alaska. Rhetoric characterizing tax reform as a "give away" that legislators must "stand up to" unfortunately mischaracterizes the objective. The Senate Finance Committee is faced with making tough choices necessary to empower the private sector to increase Alaska's productivity to the ultimate benefit of its citizens. We are looking to the Senate Finance committee to provide the leadership necessary to make meaningful reforms that will result in needed investment and resulting production.

Ironically as currently drafted the bill is a giveaway because it will not increase production, which I think we all agree is the ultimate objective. RDC is interested in meaningful results that move the needle, slowing and then reversing production decline. As currently drafted CSSB192(RES) will not move the needle. PPT and then ACES tripled production taxes since 2005, contributing to an accelerating production decline in spite of robust oil prices. DOR analysis suggests this bill makes little difference compared to ACES. Tripling up while "tweaking" down is not going to result in the investment needed to move the needle to increase investments that will lead to more production.

Some have suggested meaningful tax reform that really makes a difference to the investment climate is somehow inconsistent with Title 8 of Alaska's constitution. I do

not recall Governors Hammond, Sheffield, Cooper, Hickel, Knowles or Murkowski being accused of failing to uphold Alaska's constitution when they had far lower oil and gas production taxes than we do today. These governors presided under more balanced fiscal regimes, and RDC encourages this legislature to return to a more balanced fiscal regime for the mutual benefit of Alaska and the industry. This is not to suggest we support going back to the economic limit factor (ELF), but clearly we need something far more substantive than CSSB192(RES) as currently drafted.

RDC supports HB110 because it will move the needle. The producers have committed $5 billion in new investment if meaningful reform such as HB110 passes, and they have said that $5 billion is just a start. While some have criticized the validity of those commitments, I cannot envision a rational corporate strategy that would make those types of commitments and then not follow through.

Investment decisions are made based on a multitude of variables, few of which the Alaska Legislature has any control over. Alaska is one of the highest-cost jurisdictions in the world. Alaska has immense challenges due to limited infrastructure, federal jurisdiction over wetlands, limited drilling seasons and other hurdles. Companies need to assess project economics on all these variables, and burdening production with taxes that are too high has discouraged investment. We should be in a boom of investment at $120 oil, but we are seeing flat investment and an associated accelerating decline curve. For example, Conoco Phillips Alaska capital investment is flat in Alaska vs. a 104% increase in the Lower-48 (2010-2011).

I understand the Senate has rejected HB110 and has chosen a different path. RDC does not care which legislative vehicle gets us across the goal line. We do care that it is substantive, significant, and meets the objective of encouraging private capital to return to the North Slope. The legislature is setting the stage for Alaska's future. Will it be a future of accelerating declines or a flattening decline curve and eventually increased production? If SB192 is the vehicle of choice, it needs far more meaningful adjustments to progressivity or adjustments to other "levers" to approximate a revenue curve more in keeping with HB110.

RDC is glad that exploration credits, which are working, have not been reduced or removed in CSSB192(RES). Exploration is an important element, however exploration credits need to be part of a broader approach leading to increases in near term and long-term production. When new oil is found we need an investment climate to

encourage its production.

Geology, federal regulatory oversight, remoteness, high costs, short drilling seasons, and volatile commodity prices are all out of the State's control. The bottom line is tax policy is one of the few variables in the oil and gas business that the State can control. We are going to get what we ask for. If we continue with a policy that discourages investment and directs it elsewhere, Alaskan's better start battening down the hatches as we are entering a very dark time for Alaska's economy that I fear it will make the 80's look like a walk in the park.

A better approach is to make substantive changes that result in compelling fiscal terms leading to robust activity to slow and reverse the production decline. This discussion is about what is best for Alaska, not what is best for the oil and gas industry. The oil and gas industry has the capacity to do great things in Alaska; we need to set the stage and turn it loose. We did not get to 16.5 billion barrels of production by being timid. It's time for some bold action to get Alaska back on track.

The producers are the ones making the investments. There are many places for the industry to invest and Alaska does have to compete. Consultants can offer helpful direction, but the companies at the end of the day are the ones making the investments. Please listen to them and take to heart the criteria that companies look at when deciding where to invest.

Thank you Chairman and members of the committee for hearing from RDC on this most important issue for Alaska's future.

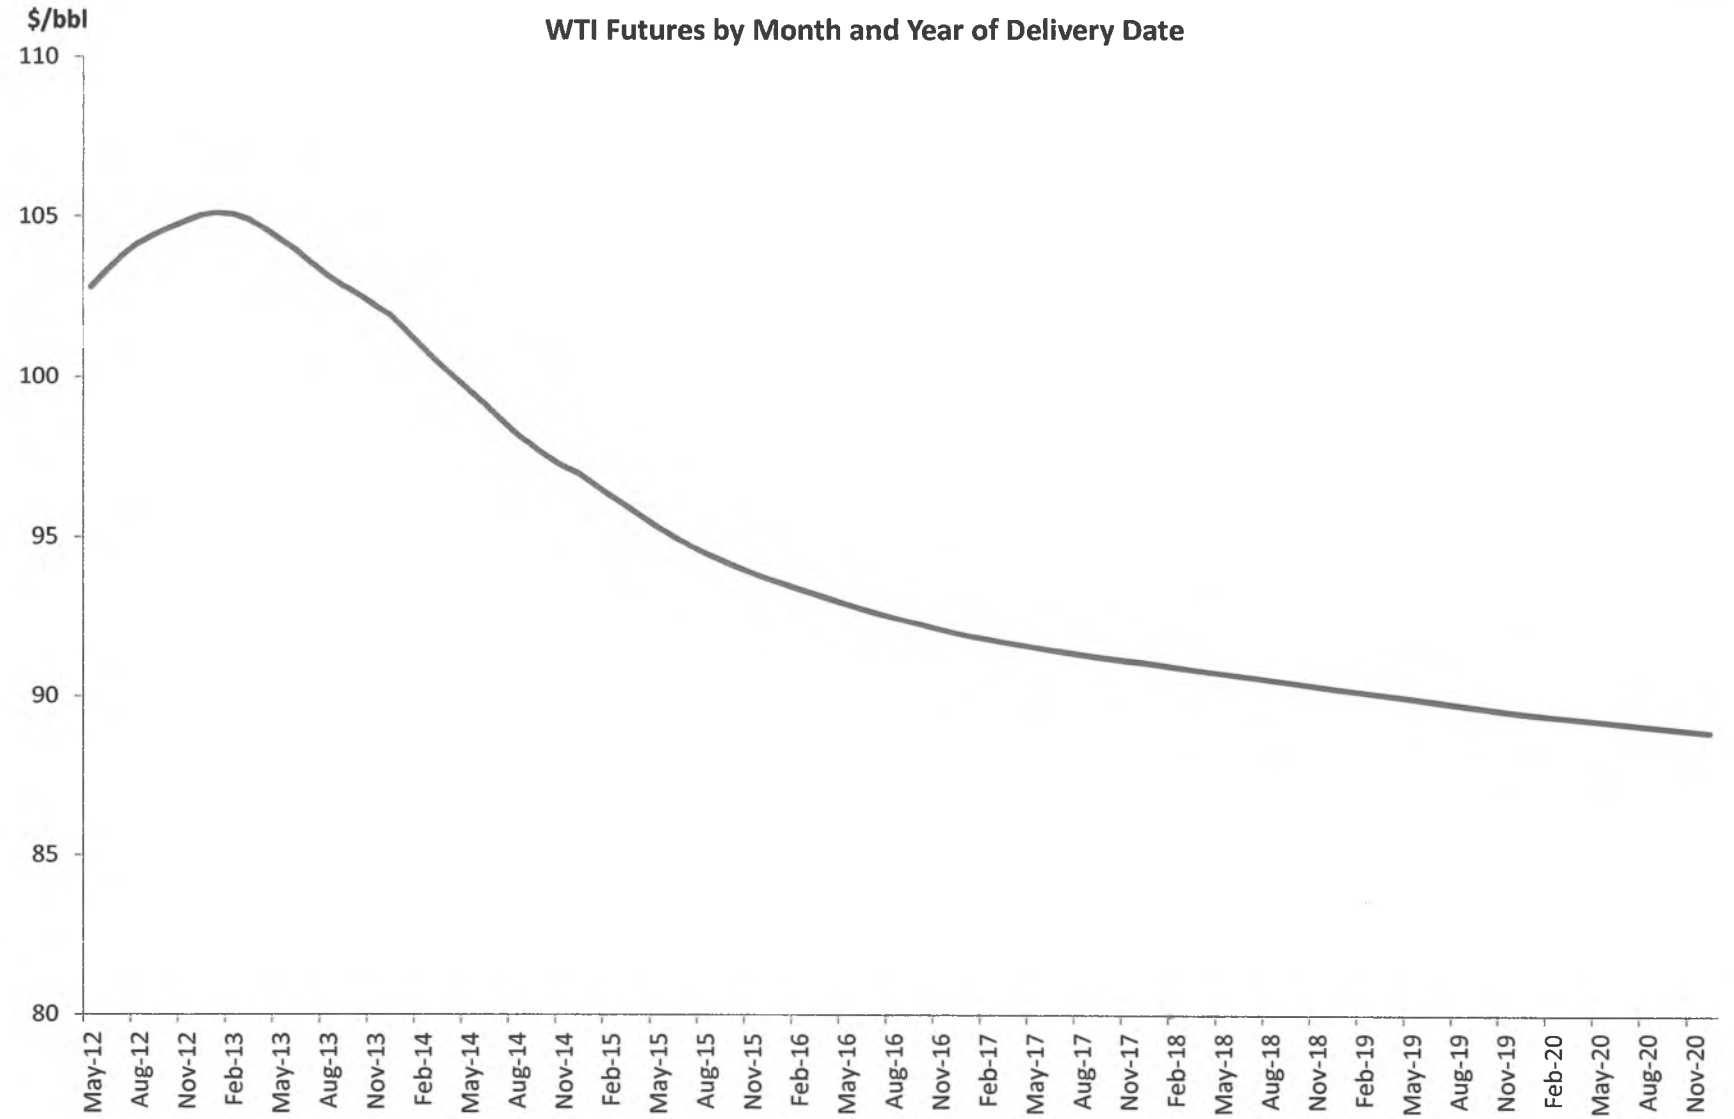
Difficulties in Existing Fiscal Structure

- The incorporation of progressivity into the Profit-Based Production Tax (Net) in ACES creates two significant problems
  - Large-scale gas production at low gas prices could in the future significantly reduce production tax revenue from existing oil production
    - Resolving this problem within the framework of ACES requires significant complexity
    - Approach to decoupling in CSSB 192 requires ability to split costs between oil and gas production, creating high degree of administrative burden, and limiting capacity of state to effectively audit
  - Options for incentivizing new production are limited, and relatively complex
    - Proposed incentives within existing framework focus on either allowances to reduce Production Tax Value , or revenue exclusions (tax holiday)

Summary of Progressive Severance Tax (Gross) Structure

- A Progressive Severance Tax (Gross) option would instead remove progressivity from the Profit-Based Production Tax (Net), instead levying this tax at the flat, base rate of 25%
- To retain an element of progressivity, a new Progressive Severance Tax (Gross) would then be added to the system. The tax would:
  - Be non-deductible for Profit-Based Production Tax purposes
  - Be levied on gross production (net of royalties)
  - Be levied solely on oil
  - The tax would use a progressivity structure not dissimilar to that under the current system, with progressivity coefficients that apply at different thresholds.



Summary of Progressive Severance Tax (Gross) Options

- The first option for the Progressive Severance Tax would use the following parameters:
  - No severance tax below $65 Gross Value at Point of Production (GVPP)
  - Progressivity of .25% commencing at a threshold of $65 GVPP
  - At $125 GVPP, a tax rate of 15% is reached. At this point, progressivity is reduced to 0.05%
  - Progressivity is capped 20%
- A second option, which would freeze government take at 70% at $100/bbl might look like this:
  - No severance tax below $60 Gross Value at Point of Production (GVPP)
  - Progressivity of .25% commencing at a threshold of $60 GVPP
  - At $100 GVPP, a tax rate of 10% is reached. At this point, progressivity is reduced to 0.03%
  - Progressivity is capped 20%

Benefits of Progressive Severance Tax (Gross) Structure

- By removing progressivity from the Profit-Based Production Tax (Net), and having the progressive element of the structure be a Progressive Severance Tax (Gross), two things become much easier to achieve
  - The issue of gas production reducing production tax revenue ceases to be a problem without progressivity in the Profit-Based Production Tax
    - Complex provisions to split costs between oil and gas production under CSSB 192 are thus no longer required
  - Significant incentives can be provided to new production, by eliminating or reducing the Progressive Severance Tax (Gross) for new production
- A wide range of levels of government take can be achieved using this structure, depending on the parameters applied

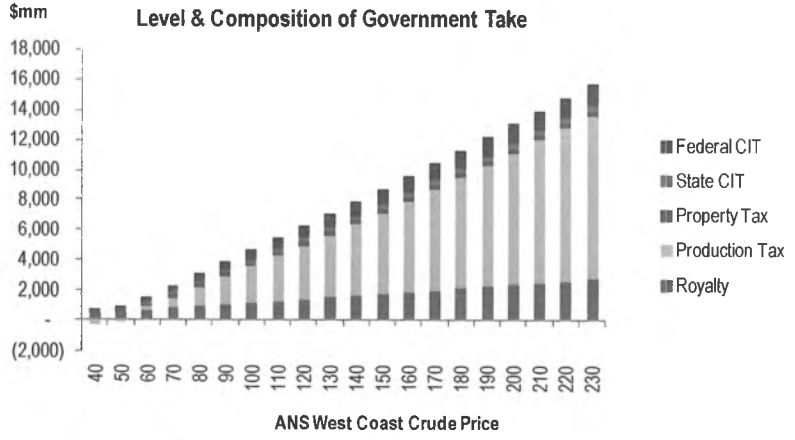
Incentives for New Production

- Significant incentives can be provided to new production, by eliminating or reducing the Progressive Severance Tax (Gross) on any combination of:
  - Production from new areas
  - Production from new plans of development (determined through the regulatory process to be for "new production")
  - Production above a fixed decline rate
- Here, a reduced rate of Progressive Severance Tax has been modeled, using the following parameters for new production:
  - Base rate of 0%
  - Progressivity of .05% commencing at a threshold of $65 (gross value at point of production)
  - Progressivity is capped 5%
- Following slides show a new, high-cost 10 mb/d development under
  - The regular rate
  - The reduced rate (with a time limit of 7 years)
  - The reduced rate (with no time limit)

Note on Impact of Inflation



- Under ACES, thresholds and coefficients for progressivity are specified in nominal terms, without indexation
  - As a result, when economics over the long-term rather than just 2013 are examined, we see the effects of 'bracket creep' or 'stealth tax'
  - In real terms, as prices increase, thresholds for progressivity decrease, and the higher take that comes with progressivity occurs at lower and lower price levels
- Severance tax options are also currently shown assuming nominal thresholds
  - As a result, in the charts, the impact of the severance tax can be seen below the $60/$65 level at which it applies – a result of bracket-creep over the lifetime of a project
- It is strongly worth considering the application of price indexation to thresholds for progressivity

Department of Revenue Response to Questions April 1, 2012

State of Alaska
Department of Revenue

Commissioner Bryan Butcher

SEAN PARNELL, GOVERNOR
333 Willoughby Avenue, 11th Floor
P.O. Box 110400
Juneau, Alaska 99811-0400
Phone: (907) 465-2300
Fax: (907) 465-2389

The Honorable Bert Stedman
Alaska State Senator
State Capitol, Room 516
Juneau, Alaska 99801

March 30, 2012

Dear Senator Stedman:

This letter is in response to a request from your office to provide a summary of all state revenues generated from oil and gas activities in Cook Inlet, and all deductible lease expenditures and applicable tax credits from oil and gas activities in Cook Inlet. You had requested that we provide this information as forecasted for FY 2012 and FY 2013.

The Department of Revenue forecasts oil and gas production from Cook Inlet, and royalties attributable to that production. The Department also forecasts property tax revenue by property, and therefore has Cook Inlet-specific projections. The Department does not forecast other revenues attributable specifically to Cook Inlet, for two reasons: (1) production tax received for Cook Inlet production is less than one percent of the total production tax received by the State; and (2) companies do not separate out state corporate income tax paid for Cook Inlet operations from other oil and gas operations in the state. Credit activity for Cook Inlet is also difficult to determine, as some companies have oil and gas operations in Cook Inlet and other parts of the state, and credits are not always identified by the region in which they were earned.

We can, however, provide your office with a summary of estimates for the items you requested, for historical years. It is important to note that this summary was compiled manually from various sources, including monthly information reports, annual tax returns, property tax records, and credit spreadsheets. Most of these sources contain unaudited, company-reported data that may or may not be accurate. As such, the information in the enclosed table should be viewed as estimates only.

The attached table shows estimated actual data for the fiscal years 2009, 2010, and 2011.

I hope this answer addresses your questions about Cook Inlet. Please let me know if you need further information.

Sincerely,

Bruce Tangeman
Deputy Commissioner

Estimated Lease Expenditures, Credits, and Revenue related to Cook Inlet Oil and Gas Activity, FY 2009 - FY 2011 in $Millions			
	FY 2009	FY 2010	FY 2011
Lease Expenditures			
Operating Expenditures	$201.31	$164.44	$190.14
Capital Expenditures	$297.29	$161.94	$109.55
Total Lease Expenditures	**$498.60**	**$326.38**	**$299.69**
Production Tax Credits	**$11.17**	**$9.13**	**$43.11**
Production Tax Revenue after Credits	<$10.00	<$10.00	<$10.00
Royalty Revenue	$81.31	$78.24	$78.63
Property Tax Revenue	$3.51	$3.57	$3.49
Corporate Income Tax Revenue	-- indeterminate --		
Total Revenue after Credits excluding State Corporate Income Tax	**<$95.00**	**<$92.00**	**<$93.00**

Sources: Monthly Information Forms, Annual Tax Filings, Credit spreadsheets, property tax records.

Notes: This information was compiled manually from unaudited, company-reported data. Some of the information, such as the production tax credit information, is not reported separately when companies have oil and gas operations in Cook Inlet and other parts of the state. As such, this information should be used for illustration only and be considered estimates.

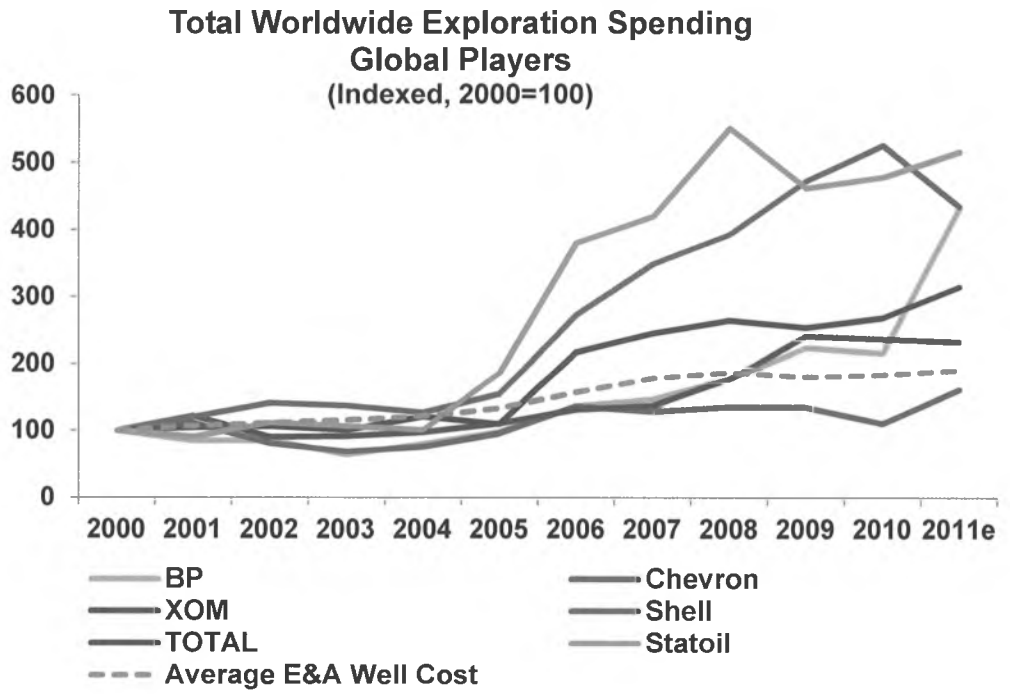
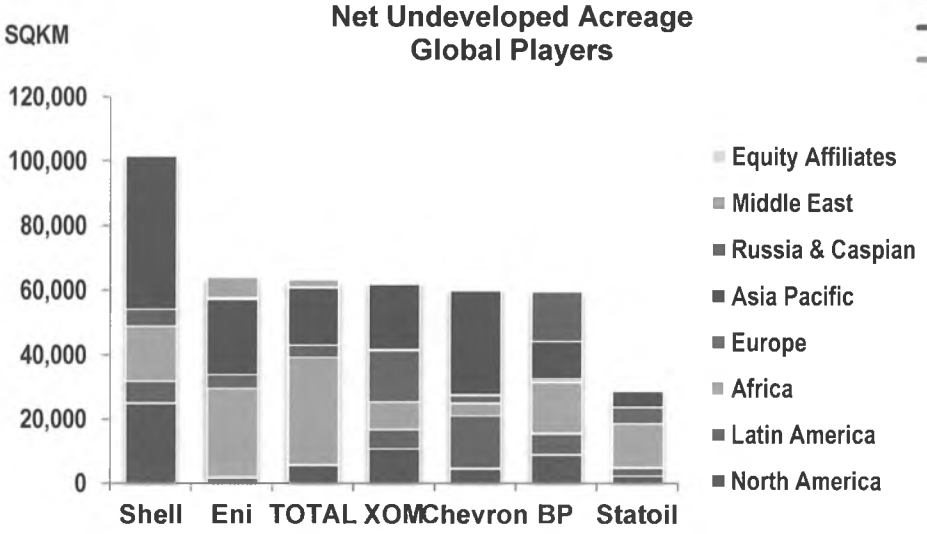
Rebound in Exploration Spending

Exploration Spend as % of Total Upstream Spend*



* *Data reflects Total Consolidated Operations for BP, CVX, ExxonMobil (excludes purchase of XTO), TOTAL, Shell, Eni (1992-2011 only), Anadarko, Apache, BG, ConocoPhillips, Devon, Hess, Marathon, Repsol, and Talisman*

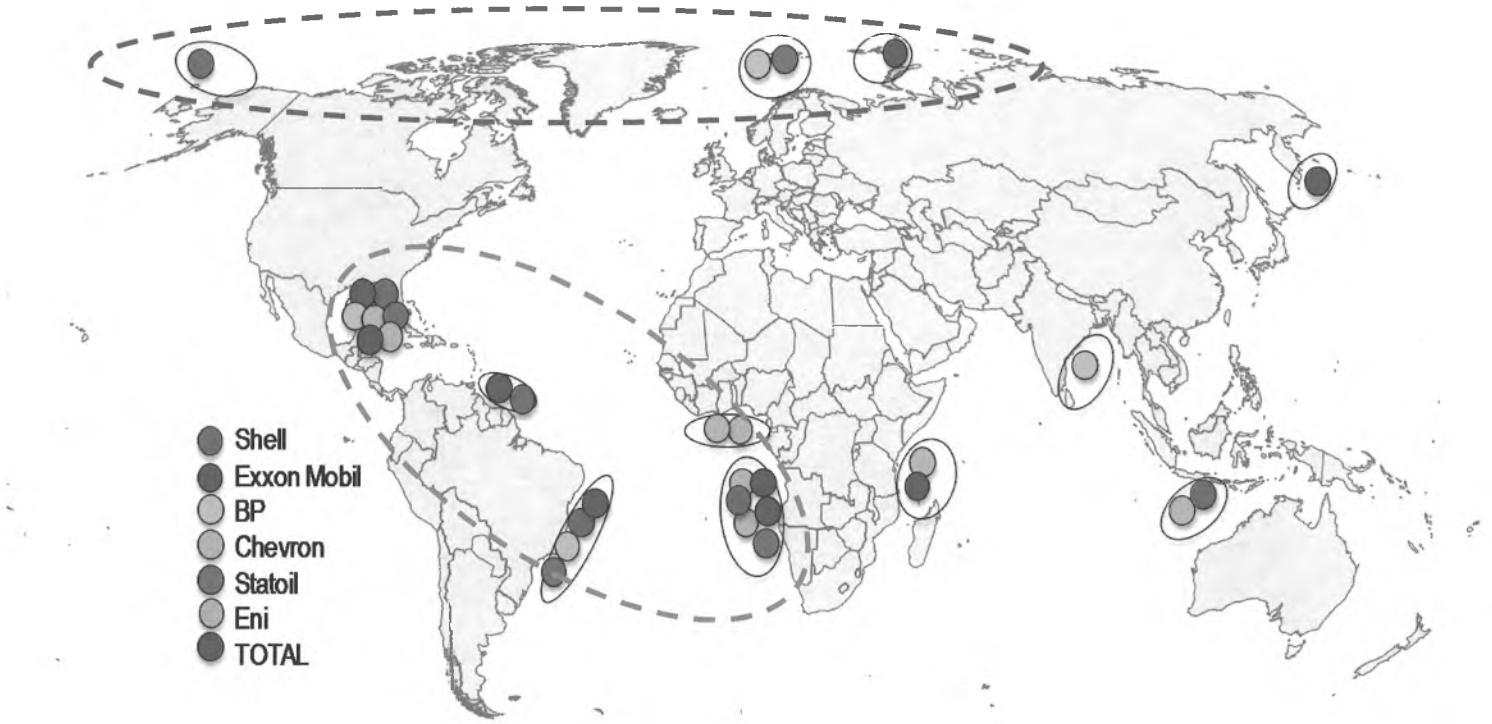


Source: Upstream Competition Service

PFC Energy

Trend in Worldwide Exploration: Global Players

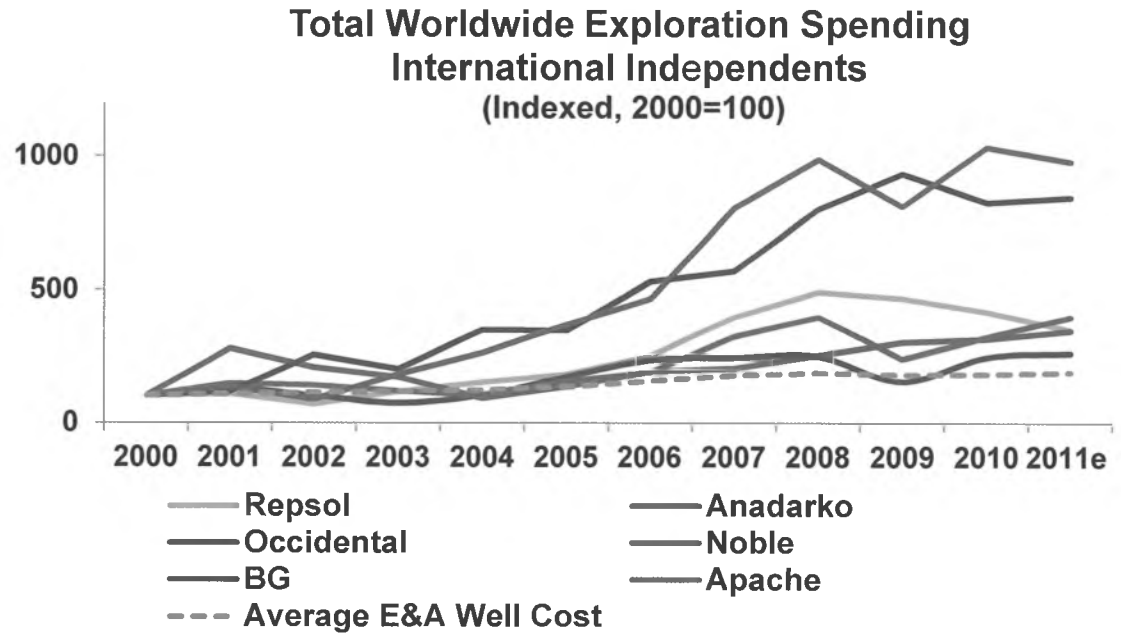
- Exploration spending by many of the Global Players accelerated sharply in 2005-2006 as focus shifted to restocking the portfolio of development projects
- Statoil (North Sea) and Shell (Asia, North America) were early movers, quadrupling exploration spending since 2004
- The growth represents real activity gains, substantially outpacing the Exploration & Appraisal (E&A) Index



- Shell is the leader in undeveloped acreage holdings, at over 100 million sq.kms, in keeping with their "Last Land Grab" growth strategy.
  - Majority of acreage held by the Majors is in Asia and Africa; North America is material undeveloped acreage holding for Shell, XOM, and BP

PFC Energy

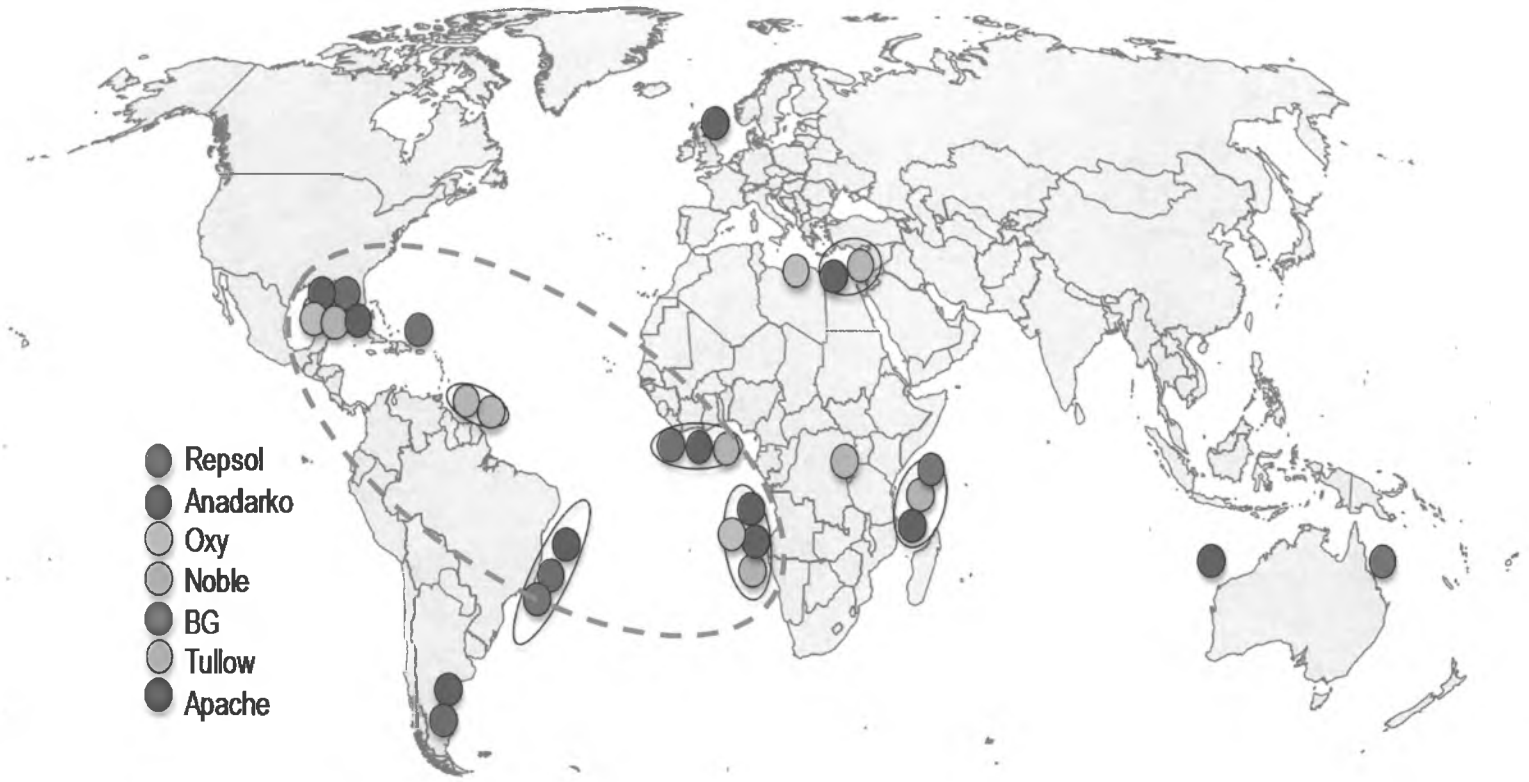
Selected Global Players: Regions of Exploration Focus



- Setting aside the move by virtually all of the Global Players into the US/Canada onshore resource plays (oil sands, shale gas. Shale oil), the focus of exploration interest is in the deepwater plays of the Atlantic Basin
- Emerging interest in a return to the Arctic Resource play, led by Shell in the Chuckchi Sea, BP and Statoil in the Norway and Barents Deepwater, and ExxonMobil securing a strategic association with Rosneft in the Russia Arctic
- Of note is the near complete decline of the Middle East as a growth driver for these large companies

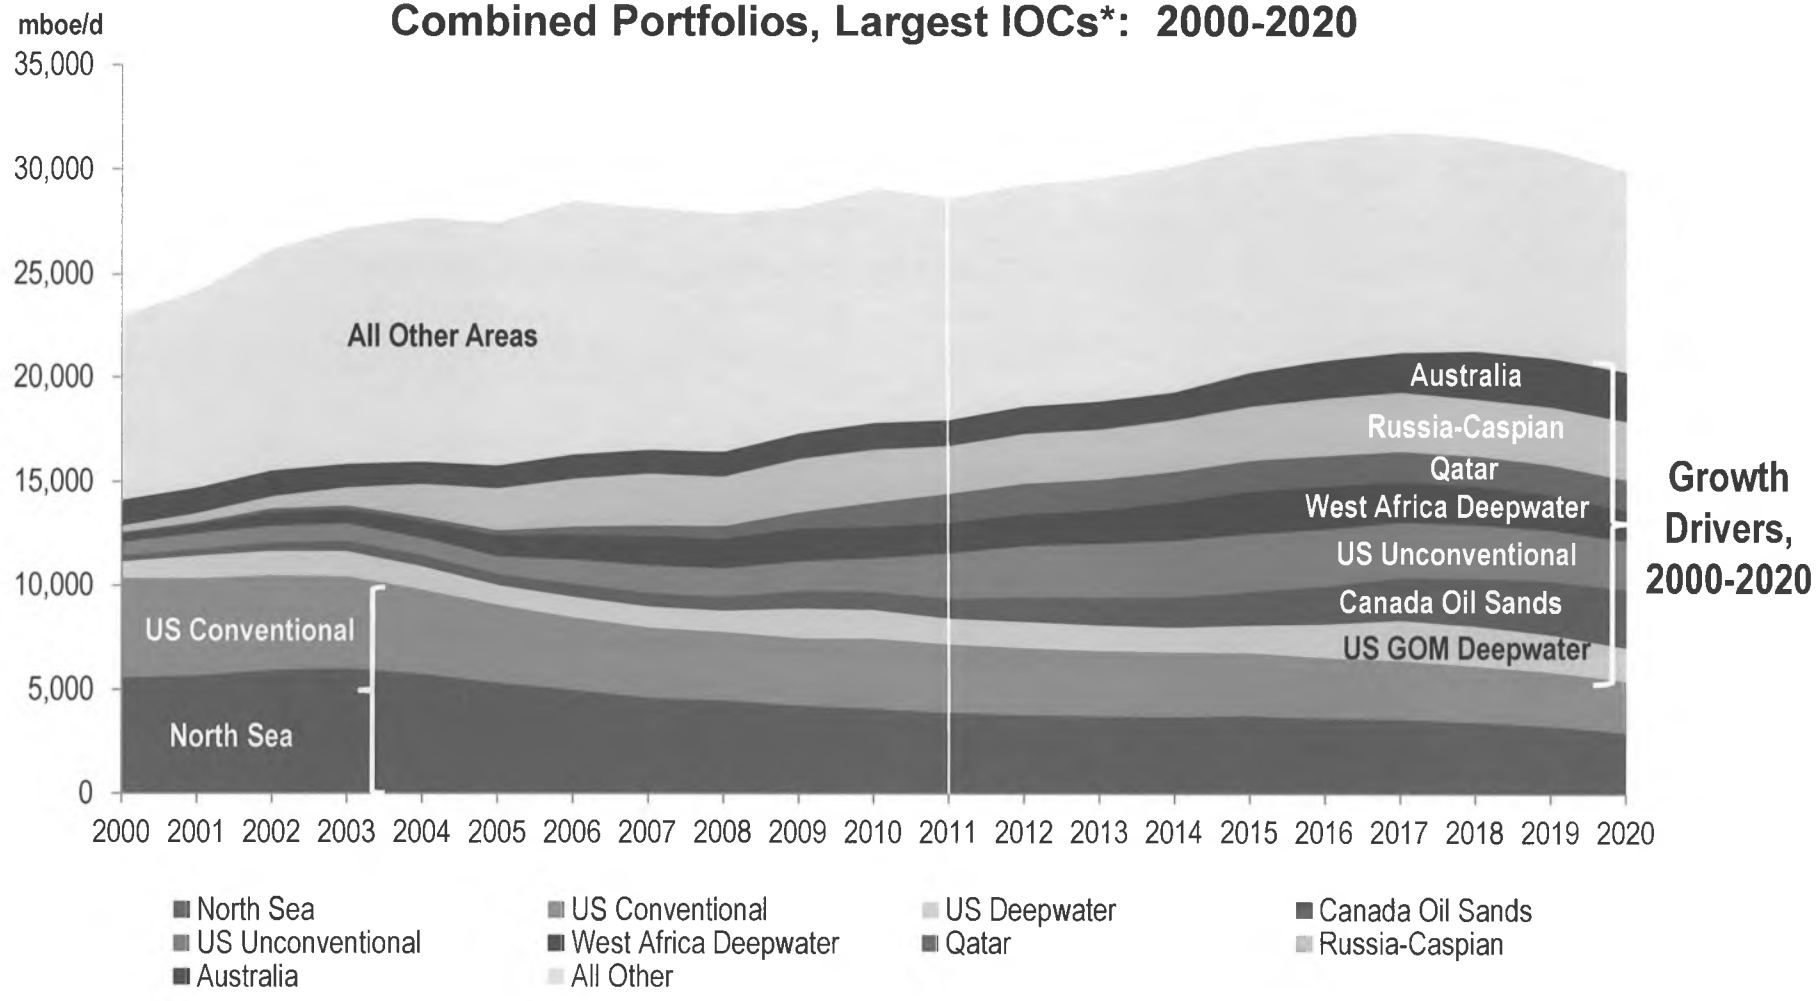
PFC Energy

Trend in International Exploration: Independents



- The International Independents are a more disparate group when it comes to exploration activity:
  - Some, like Anadarko, have been material exploration players through the last decade;
  - Some, like BG and Apache, have aggressively growth their exploration activities through the past decade;
  - Others, like Occidental and Noble, have focused on development activity in a small number of play areas
- Exploration spending by Anadarko, BG, and Apache has hovered around the $1.3-1.5 bn mark for the last few years, high for the Indies and ~60% that of the smaller Global Players

PFC Energy

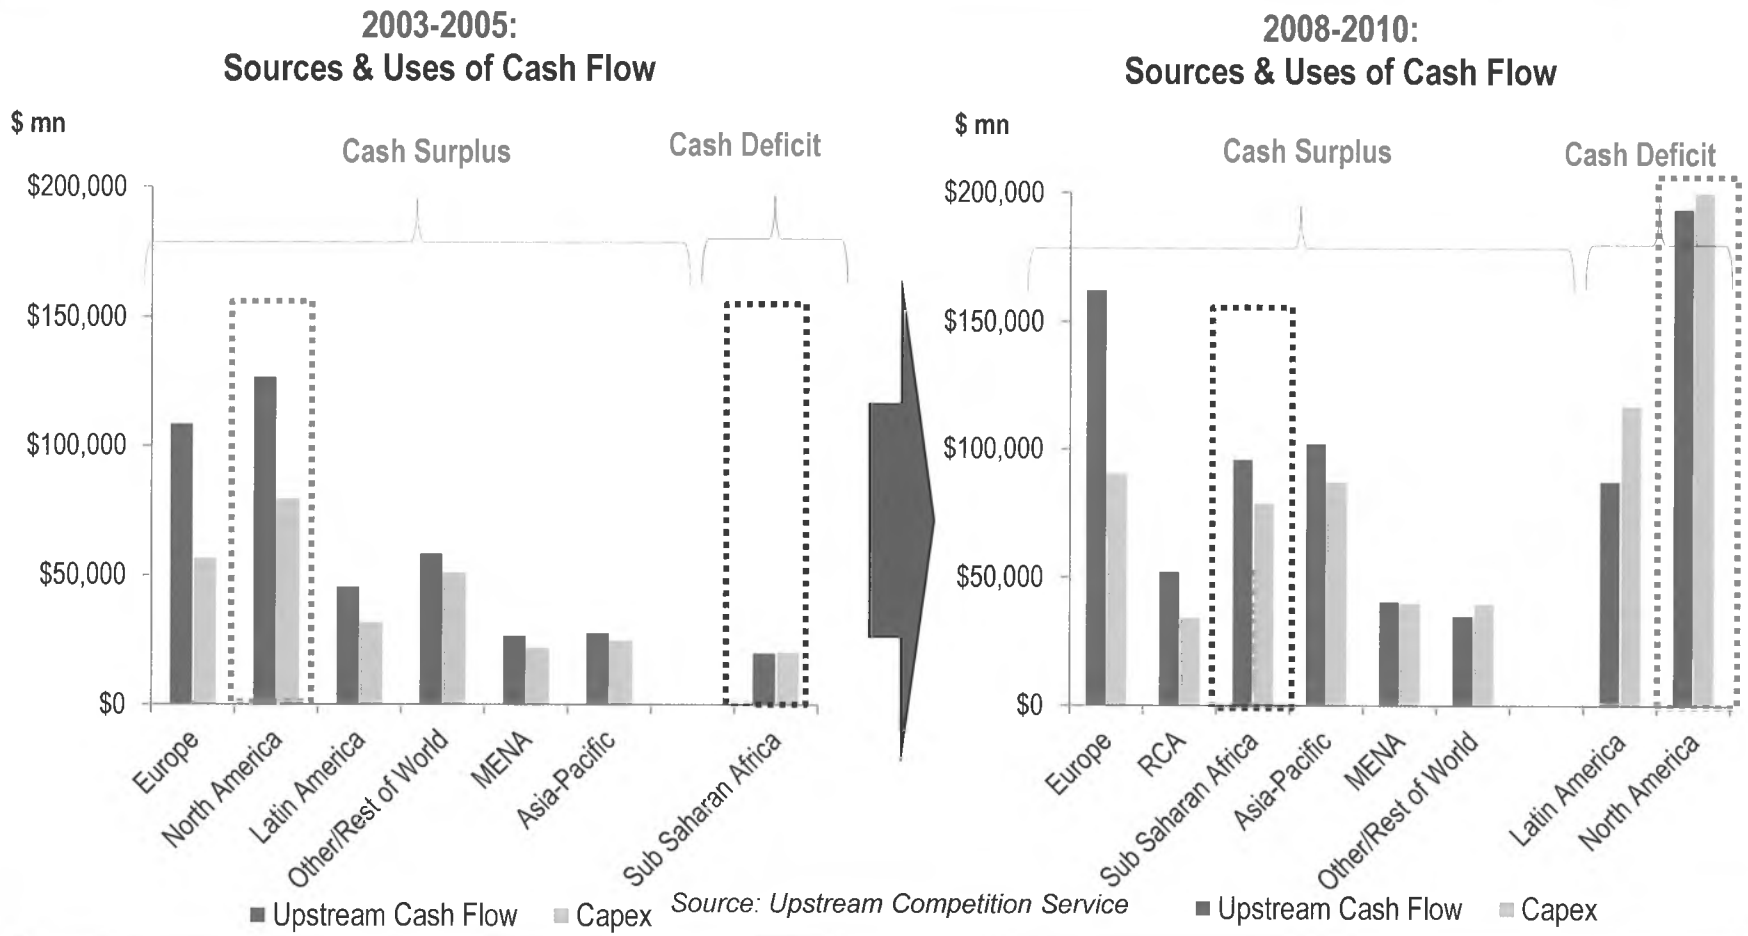


Selected International Players: Regions of Exploration Focus

- The Independents are similarly positioned in the US/Canada onshore resource plays (oil sands, shale gas. Shale oil), and the deepwater plays of the Atlantic Basin
- The Independents are also at the forefront of new basin development, such as the Equatorial Margin, East Africa Deepwater, South America "North Tier" deepwater play, Argentina shale gas, and Lake Albert basin (Uganda)
- The Independents are not as prominent in the high cost, high risk exploration opportunities in the Arctic offshore

PFC Energy

IOC Growth Centered on Successful "New Frontiers"…



Source: Upstream Competition Service

Exploration and Government Risk Taking

- By and large, Governments have refrained from engaging in the business of upstream risk
  - In emerging basins, nascent National Oil Companies (NOCs) will usually have "back-in provisions" within Poduction Sharing contracts, allowing entry into development projects as an equity participant at the point of sanction. Are prohibited from engaging in exploration activity
  - In more mature basins, the NOC may engage fully from license award to production (Petora in Norway, ONGC in India, PDVSA in Venezuela) assuming it has internalized the necessary degree of technical sophistication and dry-hole tolerance
- Exploration credits/rebates are, in essence, a direct engagement by the government in exploration risk. As such, they have been used sparingly outside of the context of the tax and royalty regime

Canada's National Energy Program: An Experiment in Intervention Gone Awry

- The NEP was introduced to both enhance Canadian ownership in Upstream activities, and to accelerate the discovery and development of domestic resources to enhance security of supply and support energy subsidies to domestic consumers

Jurisdiction	Petroleum Incentive Payments: Exploration Activity	Other Government Risk Sharing	Comments

Alberta	• Cdn Ownership >50%: 10% approved costs
	• Cdn Ownership >60%: 25% approved costs
	• Cdn Ownership >65%: 35% approved costs
		• Development projects:
		  • Cdn Ownership > 10%: 10% approved costs
		  • Cdn Ownership >65%: 20% approved costs
		• Same applied to oil sands and EOR developments
			• Incentives provided to both exploration and development activities

Federal Lands	• Cdn Ownership >50%: 35% approved costs • Cdn Ownership >60%: 65% approved costs • Cdn Ownership >65%: 80% approved costs	• PetroCanada given 25% carried back-in option, convertible up to sanction decision. Paid by P-C share of production (grossed up by 15% per annum to reflect interest and inflation)	• Incentive exploratory well had to be >3 miles from a cased well, OR to a deeper horizon => incented deeper drilling in less prospective areas • 5 year Royalty holiday applied on production

PFC Energy

National Energy Program (Canada) and Exploration Incentives

- NEP introduced substantial distortions into the E&P decision making process. In particular, incented Upstream activity towards less prospective and higher cost areas, and introduced "artificial" demand for Upstream services
  - Drilling costs (seismic, rigs, etc.) accelerated rapidly as demand soared in new and unsupported exploration environments
  - Many companies were effectively "drilling for PIP grants" with commercial discoveries representing the Failure case

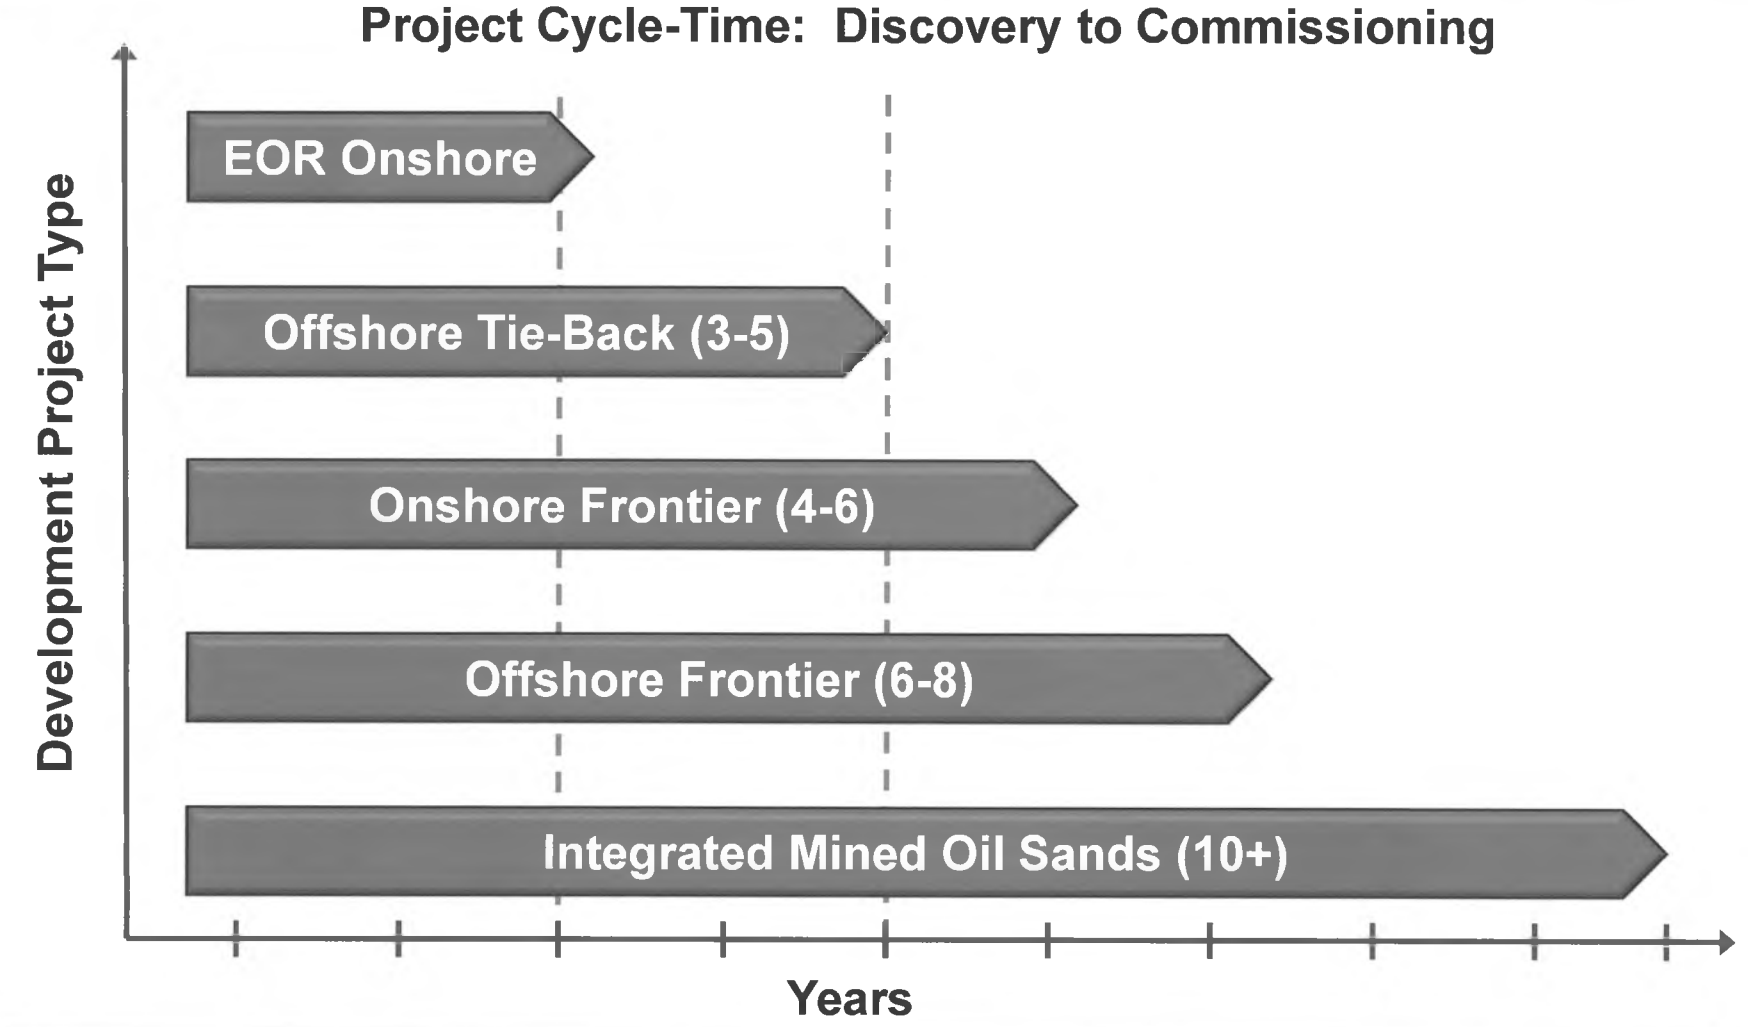
Exploration Well Costs	Canadian Arctic	Atlantic Offshore
1966-1970	$4.3 mm	$1.2 mm
1971-1975	$3.6 mm	$3.8 mm
1976-1980	$24.4 mm	$22.4 mm
1981-1985	**$63.2 mm**	**$45.8 mm**
1986-1990	$44.2 mm	$20.5 mm

PFC Energy

Canada's National Energy Program:

- The decline in crude prices in the mid-1980s forced the withdrawal of virtually all aspects of the NEP
- Alberta:
  - PIP grants replaced by Royalty Tax Credits (75% rising to 90% with maximum credit per well)
  - Exploration Incentives restructured as either:
    - 12 month Royalty holiday on eligible wells to a maximum per well;
    - Royalty exemption on cumulative production, linked to well depth and location
    - Exploration Drilling Incentive Program: 50% credit set off against subsequent royalties
  - Moved away from credits/rebates outside of the royalty and tax environment => *reward success, not simply effort.*
- Federal:
  - PetroCanada back-in eliminated;
  - Royalty linked to "payout" of development
    - 1% royalty rising to 5% at rate of 1% per 18 months
    - Royalty jumps to 30% net CF after Payout
  - Exploration Tax Credit of 25% for well costs above $5 mm, used to reduce Federal Income Tax. If not taxable => direct refund of up to 40% of non-utilized credit

Norwegian Continental Shelf: Incentives in a Modern Context



- Oil production in Norway peaked in 2001 and has fallen by ~45% since then. Growth in gas production allowed BOE volumes to rise till 2004, and have been in decline ever since
- Fiscal system provides incentives for exploration activity

Initiative		Comment
Base Production Tax	• 25%	• Applied to net income from Petroleum activities
Special Tax	• 50%	• Applied to net income geenrated from petroleum activities, to capture resource rent above "normal profits"
Government Investment	• Petoro	• Engages in exploration and development activity as full equity partner; pays share of costs and receives 100% of revenue from its working interest position
Exploration Incentives	• 78%	• Applies to companies in non-taxable position. Since government allows uplift of loss carry-forward at a risk-free interest rate, it is indifferent between refund or offset • Introduced to expand the competitor landscape, bringing in new Upstream companies
License access		• All companies require ***pre-approval for financial, technical, and operating capability*** prior to bidding on a License in the Norwegian Continental Shelf (NCS)

Description	A Qualified Capital Expenditure (QCE) must be a lease expenditure and treated as a capitalized cost under 26 IRC. For credits south of 68 degrees North latitude these are issued as one certificate. For the North Slope, these credits are issued as two certificates (one available in year issued, the other available the following calendar year).	A Qualified Capital Expenditure (QCE) must be a lease expenditure and related to exploration. For credits south of 68 degrees North latitude these are issued as one certificate. For the North Slope, these credits are issued as two certificates (one available in year issued, the other available the following calendar year).	The carried forward annual loss is calculated for each segment by taking 25% of excess lease expenditures (lease expenditures not deductable in calculating production tax values). For credits south of 68 degrees North latitude these are issued as one certificate. For the North Slope, these credits are issued as two certificates (one available in year issued, the other available the following calendar year).	A Well Lease Expenditure (WLE) must be a lease expenditure, QCE, AND an Intangible Drilling and Development Cost (IDC) south of 68 degrees North latitude.	A Well Lease Expenditure (WLE) must be a lease expenditure, QCE, AND an Intangible Drilling and Development Cost (IDC) related to exploration south of 68 degrees North latitude. Difficulties in Existing Fiscal Structure

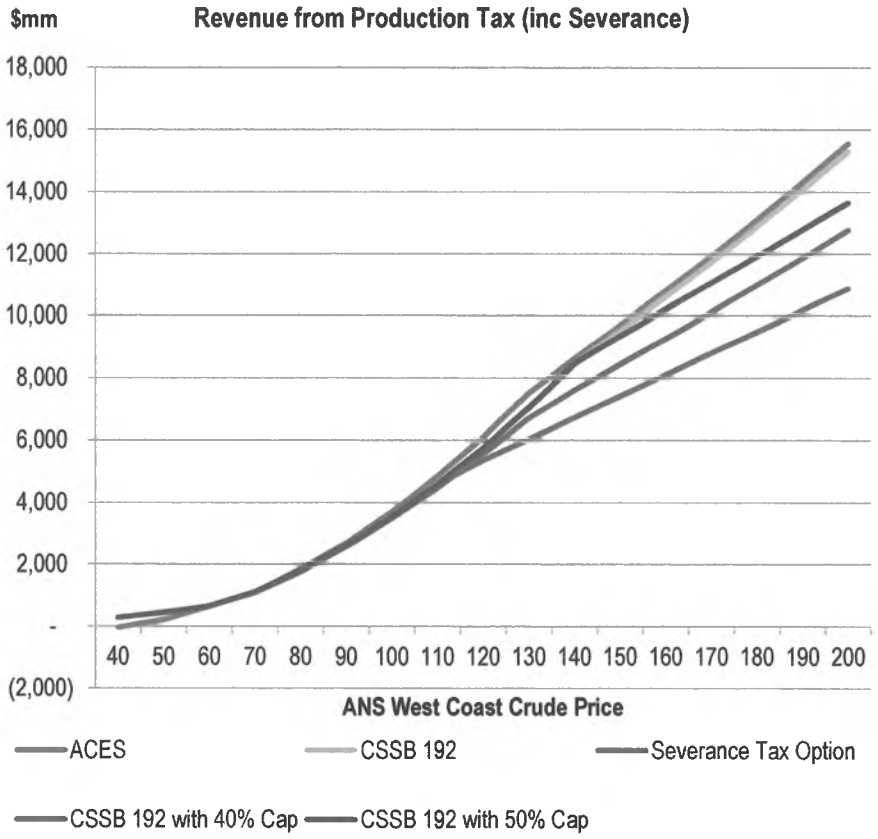
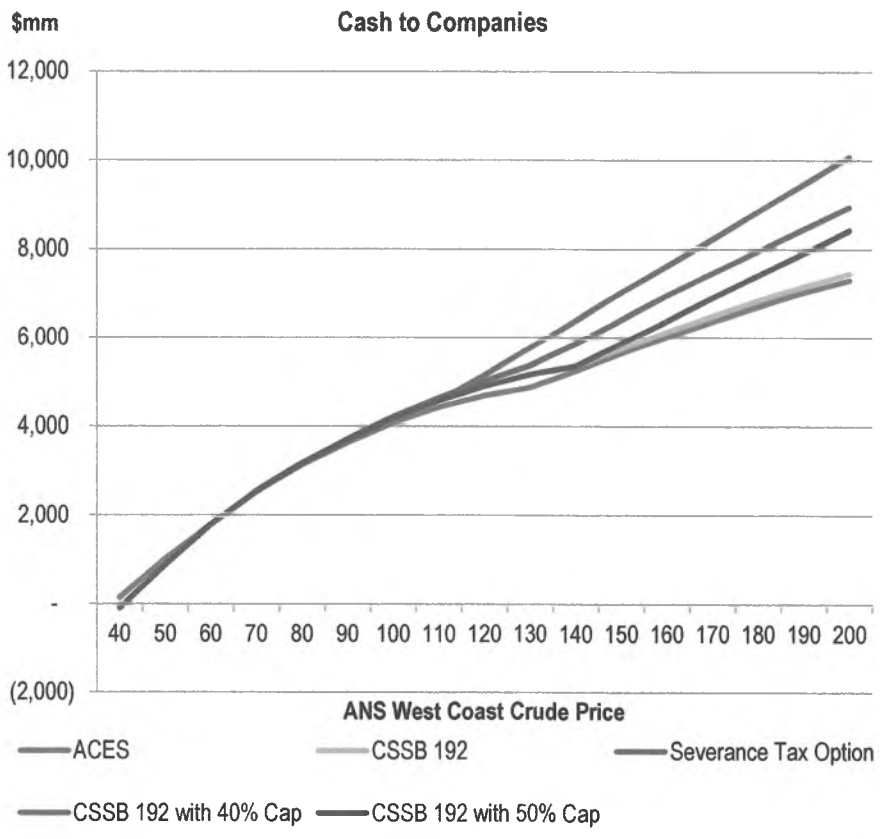
- The incorporation of progressivity into the Profit-Based Production Tax (Net) in ACES creates three significant problems
  - Large-scale gas production at low gas prices could in the future significantly reduce production tax revenue from existing oil production
    - Resolving this problem within the framework of ACES requires significant complexity
    - Approach to decoupling in CSSB 192 requires ability to split costs between oil and gas production, creating high degree of administrative burden, and limiting capacity of state to effectively audit
  - Combination of high credits with high tax rates can produce excessive levels of support for certain spending, and weak incentives for cost control
    - Effective After-Tax rate of Government support for exploration can be over 100% at high price levels
  - Options for incentivizing new production are limited, and relatively complex
    - Proposed incentives within existing framework focus on either allowances to reduce Production Tax Value , or revenue exclusions (tax holiday)



Summary of Progressive Severance Tax (Gross) Structure



- A Progressive Severance Tax (Gross) option would instead remove progressivity from the Profit-Based Production Tax (Net), instead levying this tax at the flat, base rate of 25%
- To retain an element of progressivity, a new Progressive Severance Tax (Gross) would then be added to the system. The tax would:
  - Be non-deductible for Profit-Based Production Tax purposes
  - Be levied on gross production (net of royalties)
  - Be levied solely on oil
  - The tax would use a progressivity structure not dissimilar to that under the current system, with progressivity coefficients that apply at different thresholds.
- The proposed Progressive Severance Tax would use the following parameters:
    - No severance tax below $65 Gross Value at Point of Production (GVPP)
    - Progressivity of .25% commencing at a threshold of $65 GVPP
    - At $125 GVPP, a tax rate of 15% is reached. At this point, progressivity is reduced to 0.05%
    - Progressivity is capped at 20%

Benefits of Progressive Severance Tax (Gross) Structure

- By removing progressivity from the Profit-Based Production Tax (Net), and having the progressive element of the structure be a Progressive Severance Tax (Gross), two things become much easier to achieve
  - The issue of gas production reducing production tax revenue ceases to be a problem without progressivity in the Profit-Based Production Tax
    - Complex provisions to split costs between oil and gas production under CSSB 192 are thus no longer required
  - Much of the issue of excessive spending support ceases to be a problem
    - Even with 40% exploration credit, effective after-tax Government support for exploration flat at 65%
  - Significant incentives can be provided to new production, by eliminating or reducing the Progressive Severance Tax (Gross) for new production
- A wide range of levels of government take can be achieved using this structure, depending on the parameters applied

PFC Energy

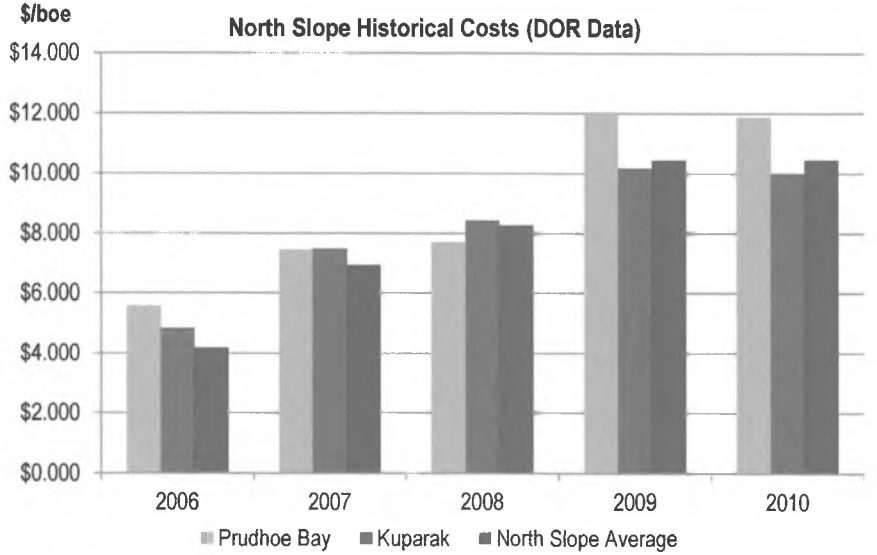
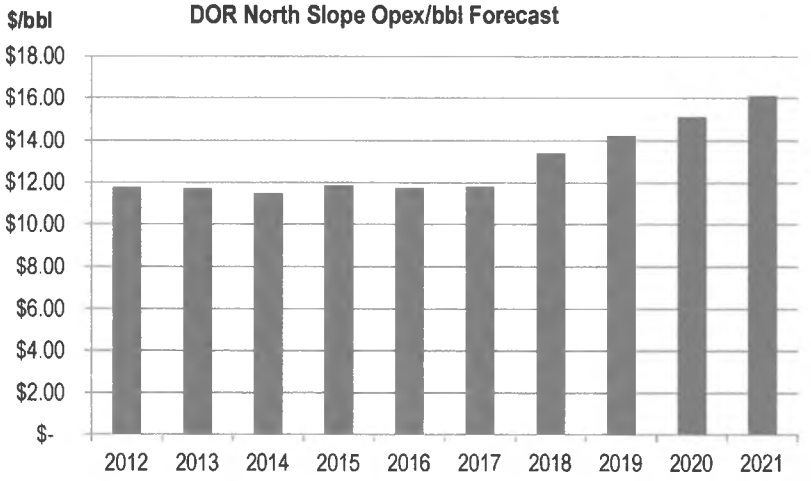
Impact of Rising Operating Costs



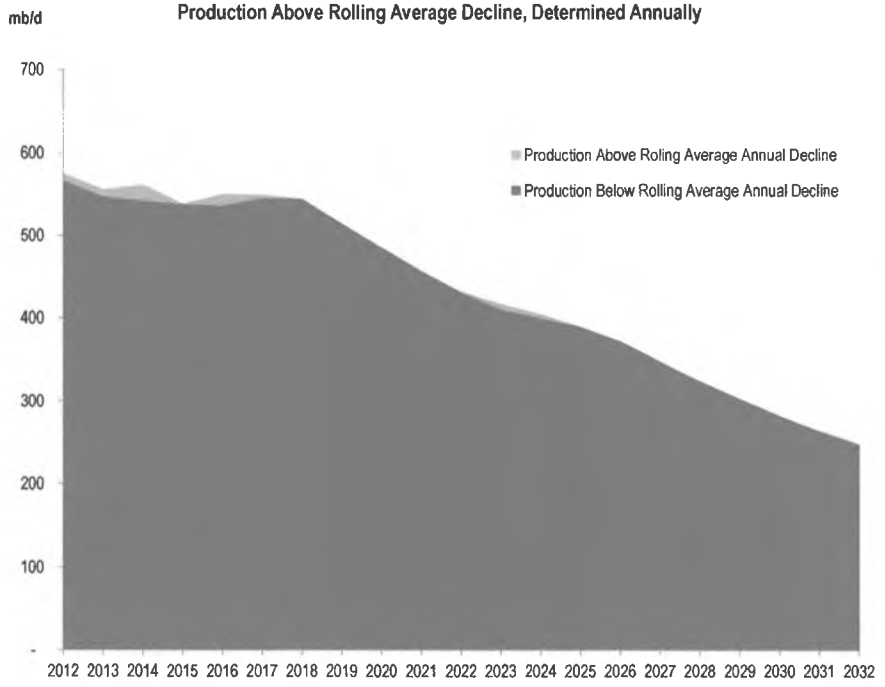
Revenue Difference Between ACES and Progressive Severance Option under Different Opex/bbl Assumptions



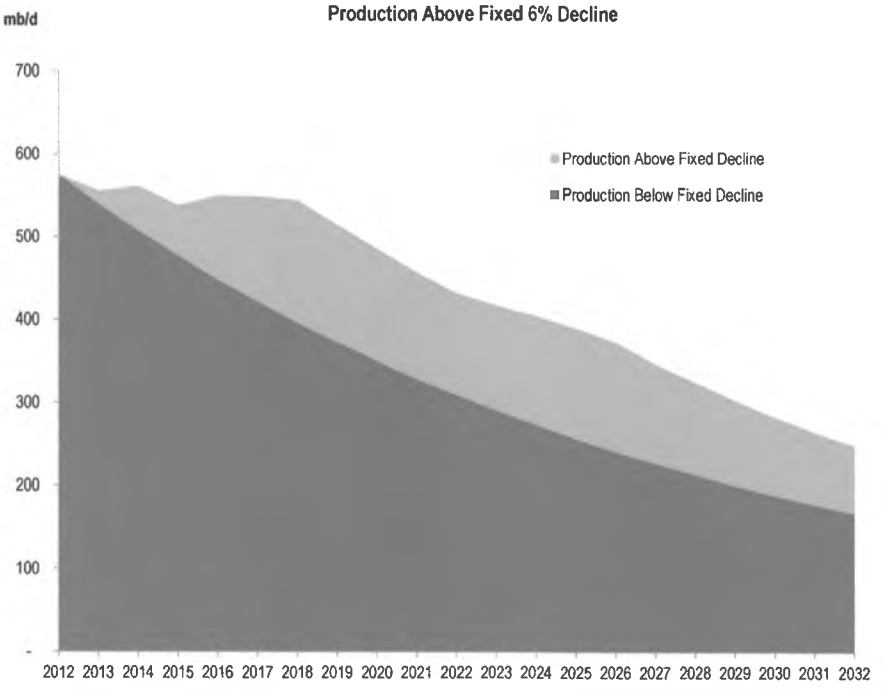
PFC Energy

Data on Operating Costs

PFC Energy



Impact of Inflation



- Under ACES, thresholds and coefficients for progressivity are specified in nominal terms, without indexation
  - As a result, when economics over the long-term rather than just 2013 are examined, we see the effects of 'bracket creep' or 'stealth tax'
  - In real terms, as prices increase, thresholds for progressivity decrease, and the higher take that comes with progressivity occurs at lower and lower price levels
- Similarly, unless progressive severance thresholds are indexed to inflation, progressive severance will apply at steadily lower thresholds over time
  - Indexing thresholds will also go some way to addressing the cost sensitivity issue

Incentives for New Production

- Significant incentives can be provided to new production, by eliminating or reducing the Progressive Severance Tax (Gross) on any combination of:
  - Production from new areas
  - Production from new plans of development (determined through the regulatory process to be for "new production")
  - Production above a fixed decline rate
- One possibility for a reduced rate of Progressive Severance Tax is:
  - No severance tax below $65 Gross Value at Point of Production (GVPP)
  - Progressivity of .05% commencing at a threshold of $65 GVPP
  - Progressivity capped at 5%

Summary of Progressive Severance Tax (Gross) Structure

- A Progressive Severance Tax (Gross) option would instead remove progressivity from the Profit-Based Production Tax (Net), instead levying this tax at the flat, base rate of 25%
- To retain an element of progressivity, a new Progressive Severance Tax (Gross) would then be added to the system. The tax would:
  - Be non-deductible for Profit-Based Production Tax purposes
  - Be levied on gross production (net of royalties)
  - Be levied solely on oil
  - The tax would use a progressivity structure not dissimilar to that under the current system, with progressivity coefficients that apply at different thresholds.
- The proposed Progressive Severance Tax would use the following parameters:
    - No severance tax below $60 Gross Value at Point of Production (GVPP)
    - Progressivity of .27% commencing at a threshold of $60 GVPP
    - At $120 GVPP, a tax rate of 16.2% is reached. At this point, progressivity is reduced to 0.03%
    - Progressivity is capped at 20%

PFC Energy

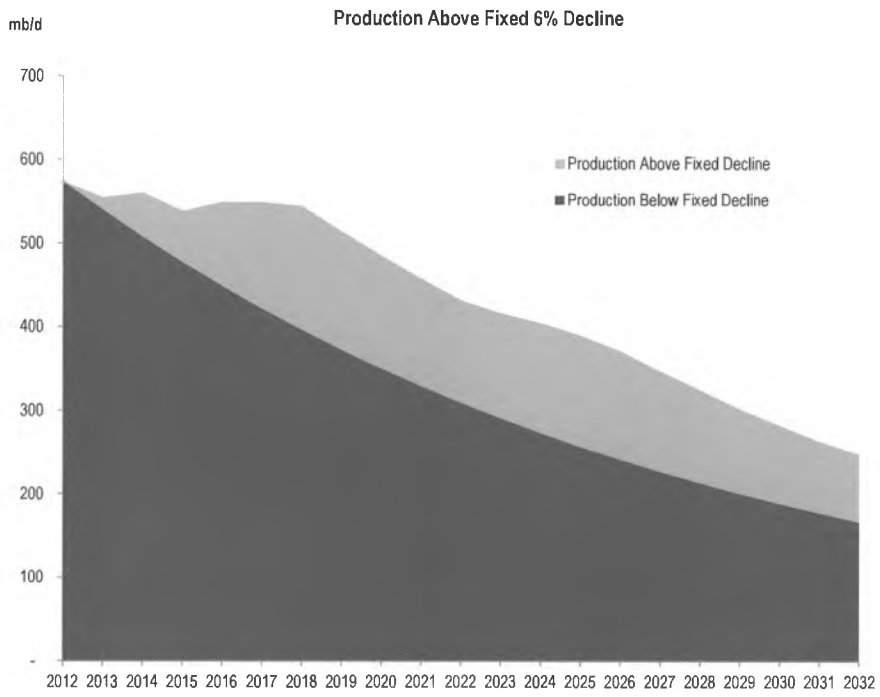
Issues with Tax Floor for Large Fields



- Two significant issues with specifying the tax floor for large fields only
  - Specifying particular units to which a floor applies means that costs then need to be allocated at the unit level – costs for Prudhoe and for Kuparuk need to be calculated separately to that for all other production
  - The 100 mb/d production threshold may create an undesirable incentive
- An administratively easier approach would be to make the distinction at the company, rather than the asset level
  - If the desire is simply to ensure that small producers do not face this floor, this can be more easily accomplished directly
  - One option would be to use the existing definition of a "small producer" for credit purposes, and exclude such producers from the floor

Incentives for New Production

- Significant incentives can be provided to new production, by eliminating or reducing the Progressive Severance Tax (Gross) on any combination of:
  - Production from new areas
  - Production above a fixed decline rate
- One possibility for a reduced rate of Progressive Severance Tax is:
  - No severance tax below $60 Gross Value at Point of Production (GVPP)
  - Progressivity of .05% commencing at a threshold of $60 GVPP
  - Progressivity capped at 5%
  - Reduced rate applied for 7 years
- Since Production above a decline curve cannot have a specific time limit, one option would be an intermediate regime with no time limit for incremental production, for instance:
  - Progressivity of .14% commencing at a threshold of $60 GVPP
  - At $120 GVPP, a tax rate of 8.4% is reached. At this point, progressivity is reduced to 0.03%
  - Progressivity is capped at 10%

Department of Revenue Comments on CSSB 192(FIN) Version O April 6, 2012

Comments on CSSB 192 (FIN) Work Draft 27-LS1305\O

Presentation to the Senate Finance Committee
Department of Revenue
April 6, 2012

Presentation Organization

- DOR comments on components of CSSB 192(FIN) Version O
- DOR comments on complexity of tax law changes and additional requirements for Department

Questions To Consider

- Does this bill make Alaska more competitive?
- Does this bill make Alaska more appealing to potential investors?
- Does this bill make our tax structure less complicated & more understandable to investors?
- Are these changes meaningful enough to compete for investment capital?

CSSB 192 (FIN) Changes from Current Law

- Change to progressivity calculation
  - For currently producing fields
  - For production from currently producing fields exceeding a production target
  - For new fields
- Change to minimum tax
- Change to lease expenditure allocation
- Petroleum information management system

Impact of Change to Progressivity on Production Tax Liability

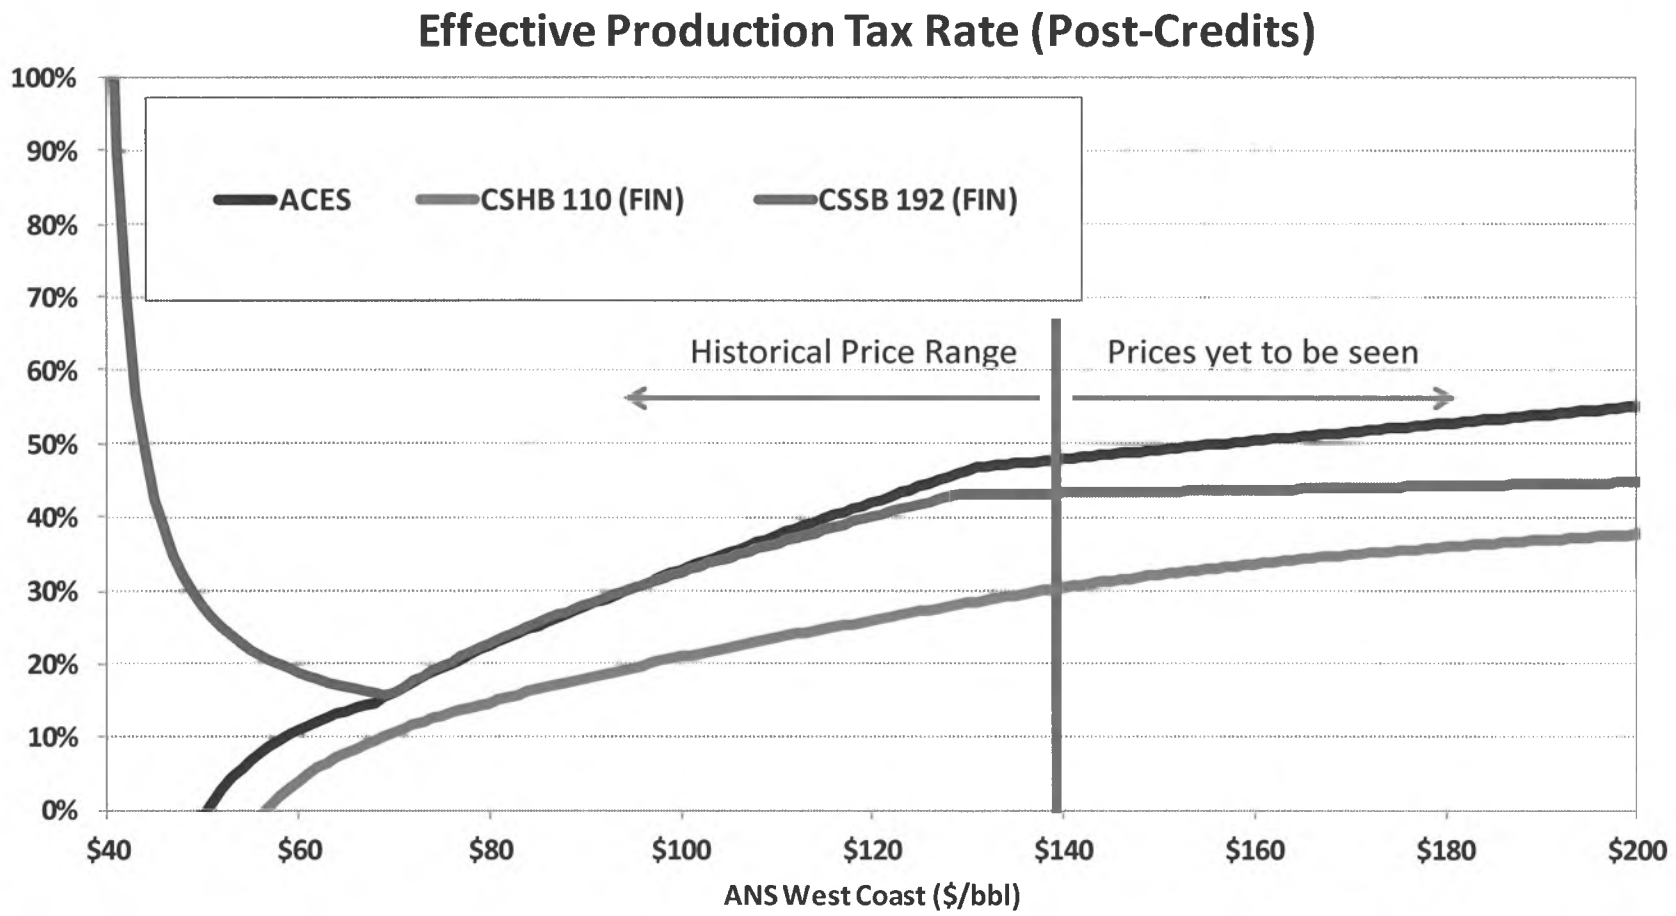
- Tax is increased for many companies below $100 per barrel
- Tax is about the same as current law at $100 per barrel (on average)
- Tax is a small reduction for many companies above $100 per barrel
- Tax change will impact all companies differently

Comments on Change to Progressivity

- Tax effect of progressivity change on currently producing fields is *very sensitive* to a producer's lease expenditures
  - Appears to reduce incentive to invest in North Slope fields
  - Appears to reduce incentive to develop high cost fields
  - Appears to encourages harvest mode and keeping development costs low
  - Appears to reward those that did the least to stem the decline during ACES

Comments on Minimum Tax

- Provision creates a substantial tax increase at lower prices (<$60/barrel).
- Creates a disincentive to investment for qualifying producers
- Could create incentive to stay below 50,000 BOE/day

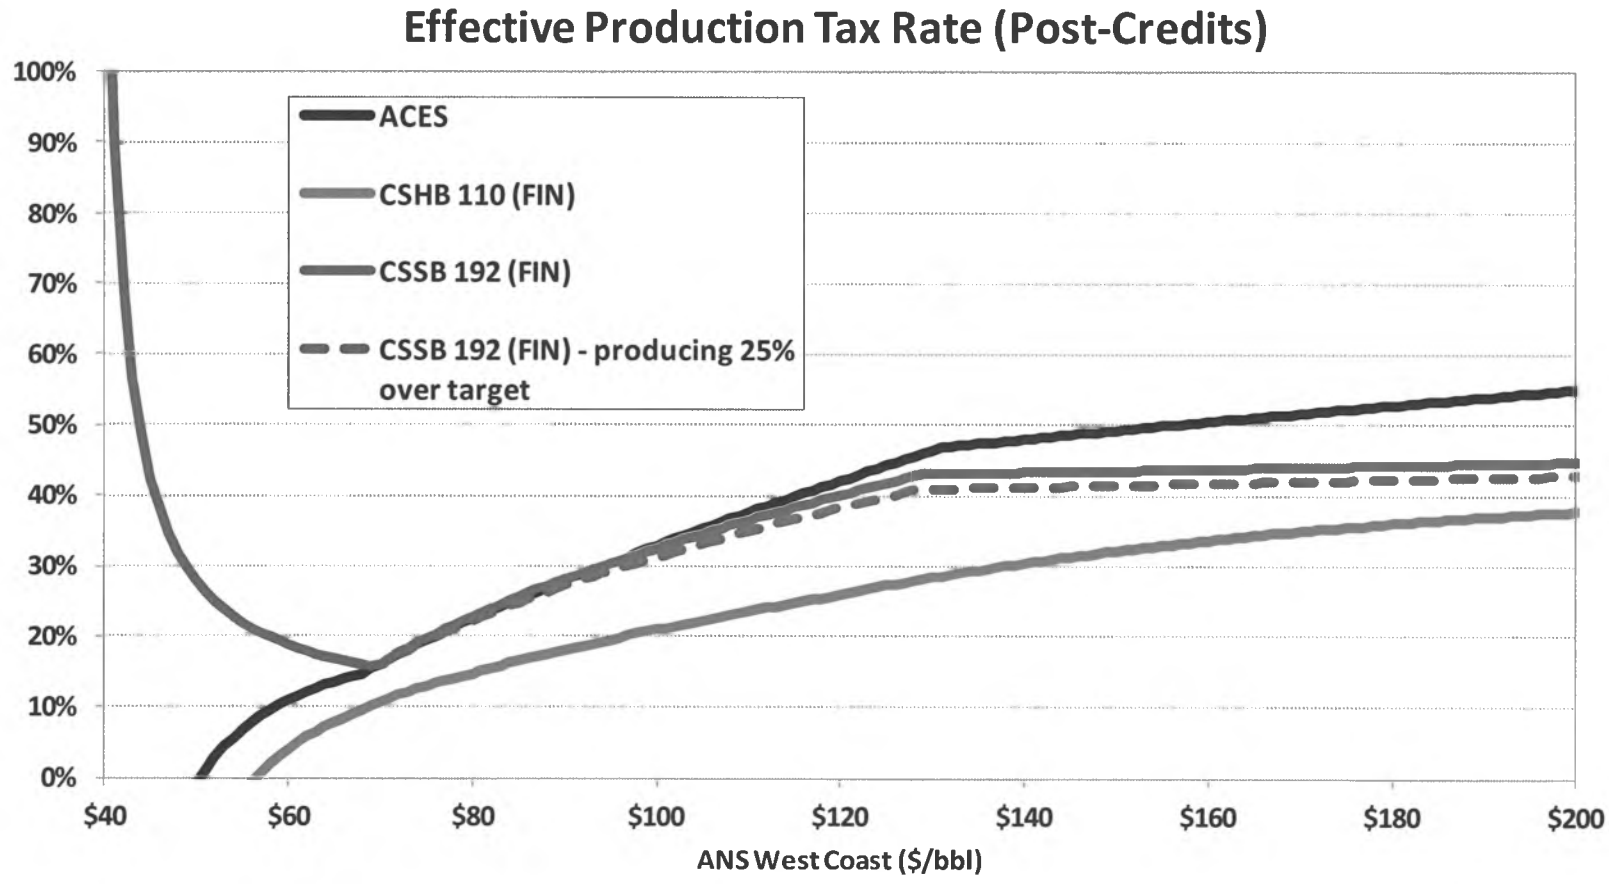


Petroleum Information Management System (PIMS)

- Requires the Department to have the information management system in place by January 1, 2014
- Competes with core mission of the Tax Division, which is to assess and collect taxes
- Competes with daily staff goals of interacting with taxpayers, forecasting revenues, and auditing tax returns
- Will likely delay the completion of those core duties and result in slower responses to legislative policy questions

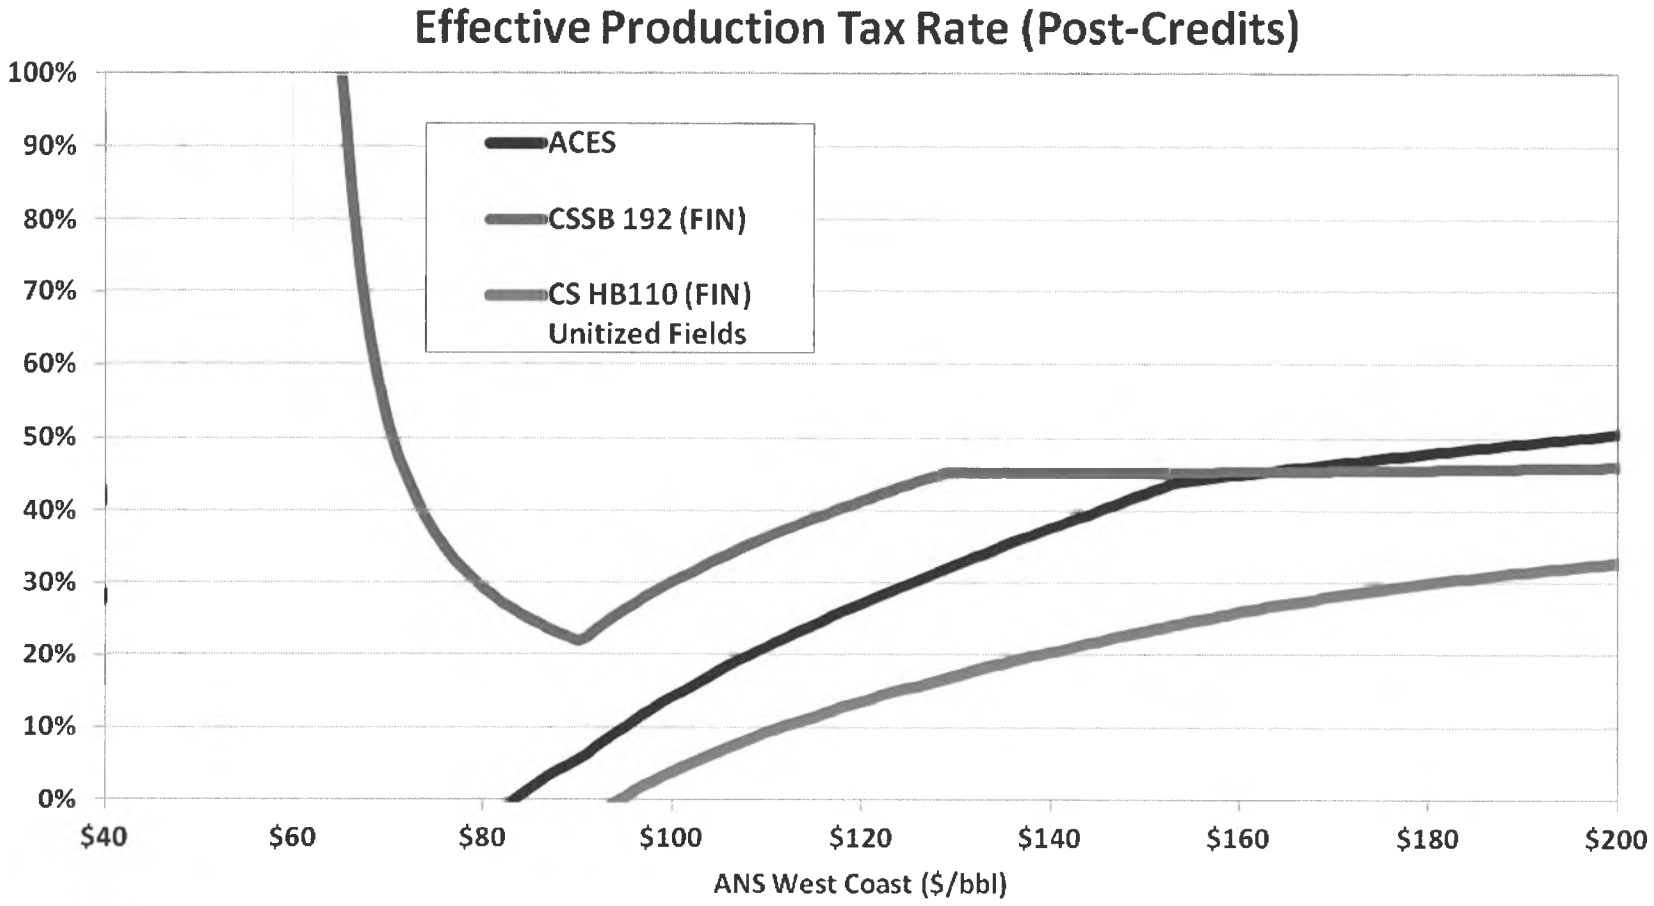
PIMS Continued

- Millions of data elements would have to be manually uploaded to the system, in various formats including electronic copies of Excel spreadsheets, PDFs, Word documents, and in hard copy format
- Determination would have to be made as to the confidentiality of each item for uploading to the system, which would take thousands of employee hours
- Department currently has only begun long-awaited Tax Revenue Management System (TRMS) project, which is expected to take 3 – 5 years to complete
- PIMS would likely delay the implementation of that important tax-specific project
- Would require significant funding and additional staff resources for the Department



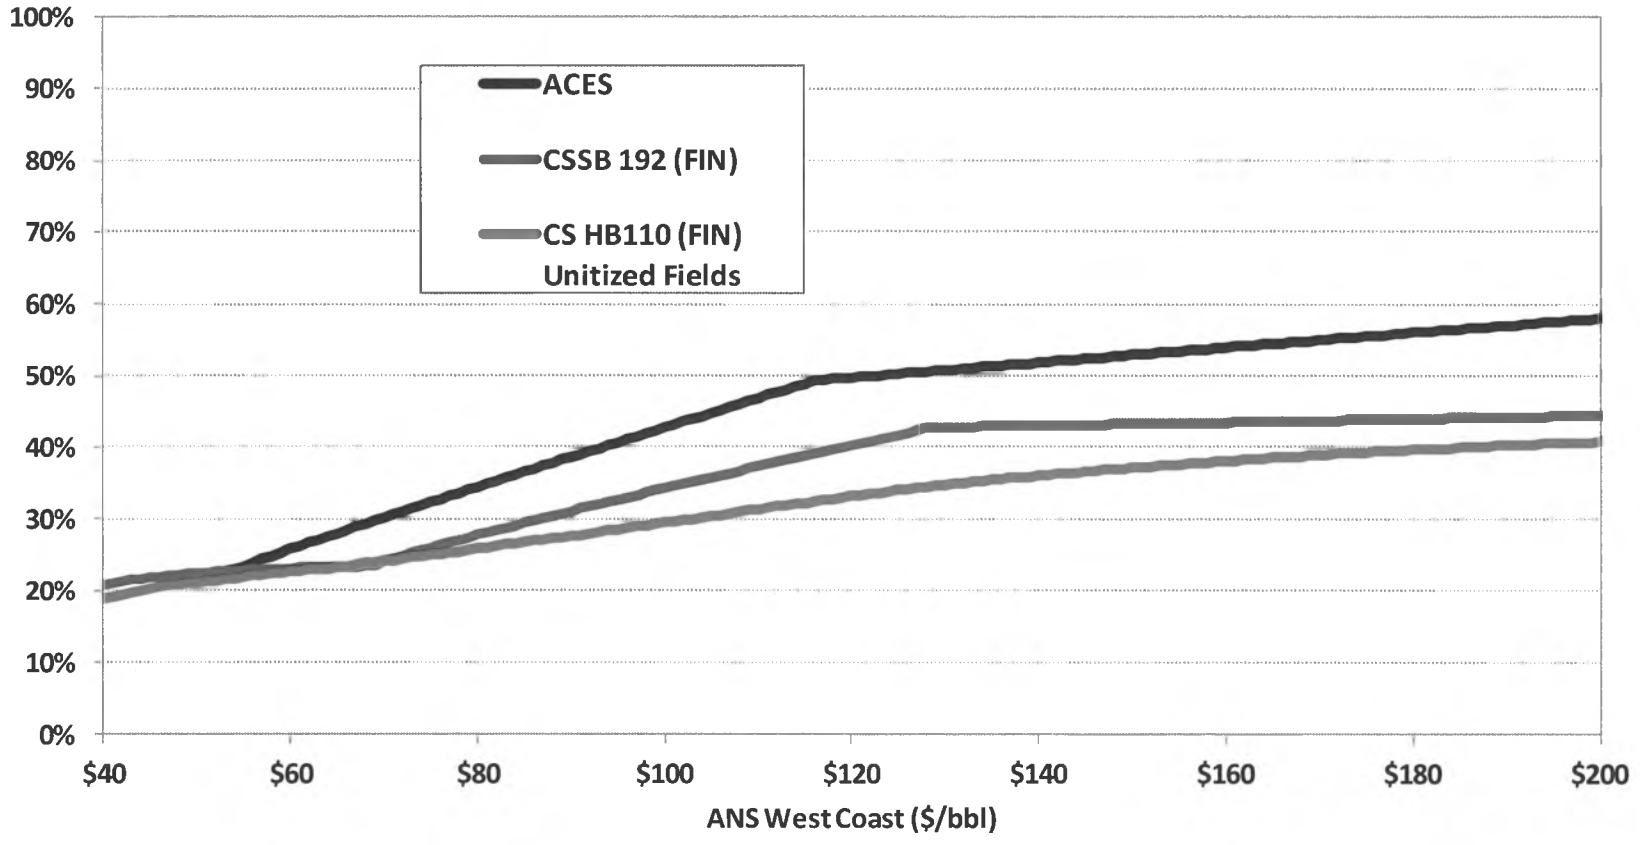
Effective tax rates

Assumes FY 2013 Transport costs of $8.56/ bbl, Opex of $13.75 per taxable barrel, and Capex of $15.36 per taxable bbl.



Effective tax rates

Impact of producing 25% over target (i.e. 1/5 of production at lower rate)



Assumes FY 2013 Transport costs of $8.56/ bbl, Opex of $13.75 per taxable barrel, and Capex of $15.36 per taxable bbl.

Effective tax rates
High-cost producer

Assumes FY 2013 Transport costs of $8.56/ bbl, Opex of $20 per barrel, and Capex of $25 per bbl.

Effective tax rates
Low-cost producer

Assumes FY 2013 Transport costs of $8.56/ bbl, Opex of $10 perbarrel, and Capex of $3 per bbl.

Summary of DOR Comments on CSSB 192(FIN)

- Changes move in the wrong direction – they discourage investment and encourage harvest mode
- Changes to progressivity do not adequately address government / producer take imbalance
- One of the most complicated tax structures in the world will be made even more complicated
- Additional duties of PIMS will add a significant burden to a Department already dealing with years of significant tax changes
- This change will likely require a complete overhaul of the 70+ regulations put in place over the past 4 years
- There appears to be potential constitutionality issues

Questions ?

Juneau, AK 99801

Re: Work-Draft "O" of CSSB 192(FIN)

Dear Senators Stedman and Hoffman and Members of the Senate Finance Committee:

On behalf of the member companies of the Alaska Oil and Gas Association, who account for the majority of oil and gas exploration, production, transportation, refining and marketing in this state, I would like to offer the following comments regarding work-draft "O" of a Senate Finance CS for Senate Bill 192. Despite the diversity of our membership, my comments reflect a 100% consensus among them.

On March 16 we testified to you about the Senate Resources version of the Bill. At that time we told you that, unless one is satisfied to see North Slope oil production continue to decline at about 6% a year or more, meaningful changes need to be made to the present ACES tax. We pointed out a number of measures that the Resources CS could have taken but didn't, as well as a number of things that it proposed to do that would be counterproductive.

Despite all the time and effort that have gone into work-draft "O", we have to say that this new CS also falls short of the meaningful tax change that is called for in order to meet the challenge of stopping decline, much less the even harder goal of getting back to a million barrels a day flowing through the TAPS oil pipeline.

The CS does indeed provide a slightly less onerous tax treatment for new fields and increases in production. But we would remind you that two very new fields — Oooguruk and Nikaitchuq — are each expected to peak at around 20,000 barrels a day. This year the North Slope at a 6% decline will decline by roughly 40,000 barrels a day, as much as these two new fields *combined*. In other words, to offset the decline, two new fields like Oooguruk and Nikaitchuq would need to come into production *each* year. These slight improvements are not likely to generate even this level of development.

The producers of the existing non-legacy fields on the Slope, and the developers of any new fields that may be discovered, need as much production as possible flowing from the legacy

fields through the TAPS oil pipeline in order to keep the costs affordable to ship their oil from the Slope to its refinery destinations. Unaffordably high transportation costs could cripple the economics of any new fields that might be found, as well as the economics of non-legacy fields currently in production.

In other words, the North Slope oil province is like a tree, with the two great legacy fields being its trunk, and with the other fields being branches rising out of the trunk. If one peels the bark off all the way around the trunk and make it unhealthy, all the other branches will become unhealthy too, no matter how robust they might have been if the trunk had stayed strong.

It has been openly acknowledged during the Committee's hearings that the intent is to keep the tax essentially the same as the present tax for the legacy fields at $100 oil, and work-draft "O" reflects that intent. But that intent is just the opposite of what we urged you to do in our March 16th testimony on the Resources CS, and it is the opposite of what we urge you to do now.

Throughout the Twenty-seventh Legislature, AOGA and others have been testifying about what is happening with their businesses on the North Slope, about the interrelationship between the level of new investment each year and the rate of decline in ANS production, and about the effects taxes have on investment decisions. These explanations are not threats, but they are not bluffs either. They have been candid attempts to describe to you how those companies evaluate their investment opportunities here against their opportunities elsewhere, and how Alaska's tax regime can influence the decisions about which opportunities to take.

Those decisions reflect the expectations of the companies' respective shareholders that each company will chose the opportunities that it perceives to be best, all things considered – including taxes. If an Alaskan opportunity is better than one elsewhere and there is enough budgeted money only for one of them, the shareholders expect, and in a very real sense demand, that the Alaska opportunity be taken. The reductions in the level of companies' investments in Alaska since the enactment of ACES are not any kind of retaliation for ACES' enactment, nor does a company cut back here to spite its face. The investments are nothing more, and nothing less, than the result of the competition of the Alaskan opportunities against opportunities elsewhere.

Any one is free to believe that the declining investments and declining production on the North Slope are due to something other than these reasons ... but they will be mistaken. Unfortunately, by the time they are proven to be mistaken, the opportunity for Alaska to have addressed the situation will have passed. And there aren't any "do overs."

Without meaningful tax relief for the legacy fields as well as the other production, the bark will continue to be peeled off the tree trunk, harming the entire tree. Work-draft "O" threatens harm for every member in AOGA.

Thank you, Mr. Chairman and Members of the Senate Finance Committee, for this opportunity to share our deep and grave concerns with you about work-draft "O" of the Finance CS. We respectfully ask you to take another look at what it would do, and to replace it with a CS

that would provide meaningful tax change to enable the additional investments the state and its future need.

In closing, let me repeat that these comments have the unanimous support of AOGA's members: Apache, BP, Chevron, eni petroleum, ExxonMobil, Flint Hills, Hilcorp, Marathon, Petro Star, Pioneer, Repsol, Shell, Statoil, Tesoro, XTO Energy, and Alyeska Pipeline Service Company. Thank you for this opportunity to share them with you.

Very truly yours,

ALASKA OIL AND GAS ASSOCIATION

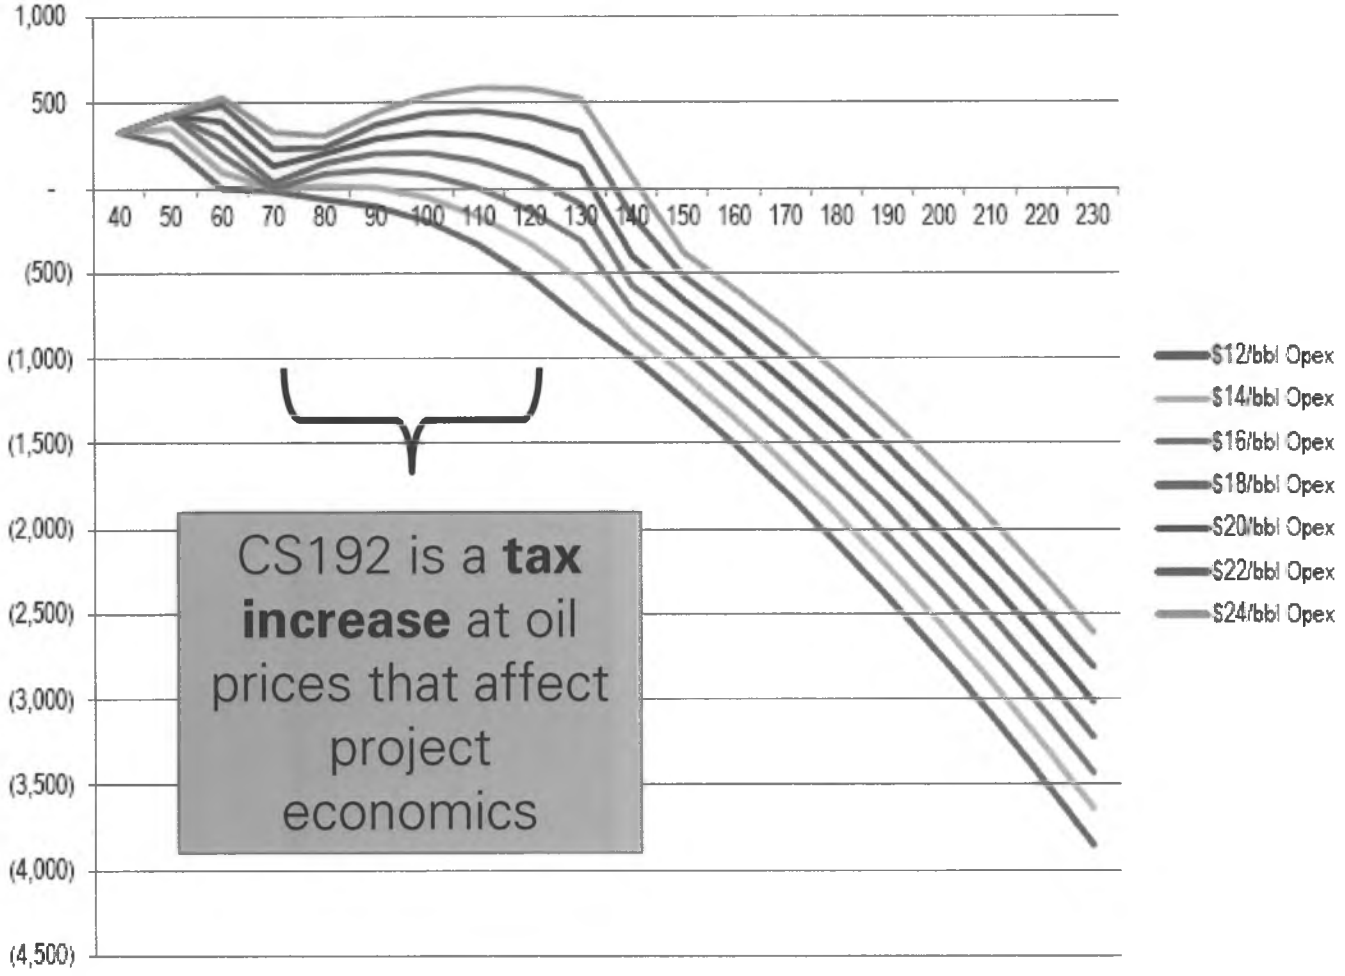
Key Messages

- CSSB 192 (Fin):
  - is a **tax increase** that will cause us to re-evaluate existing activity plans
  - is **not meaningful** and will **not** lead to more investment
  - likely to create **misalignment between producers** that slows/stops activity
  - creates **more disincentive than ACES** to invest in the long-term

bp

CSSB 192(T) Will Not Draw More Investment



And CSSB 192(O) is less attractive

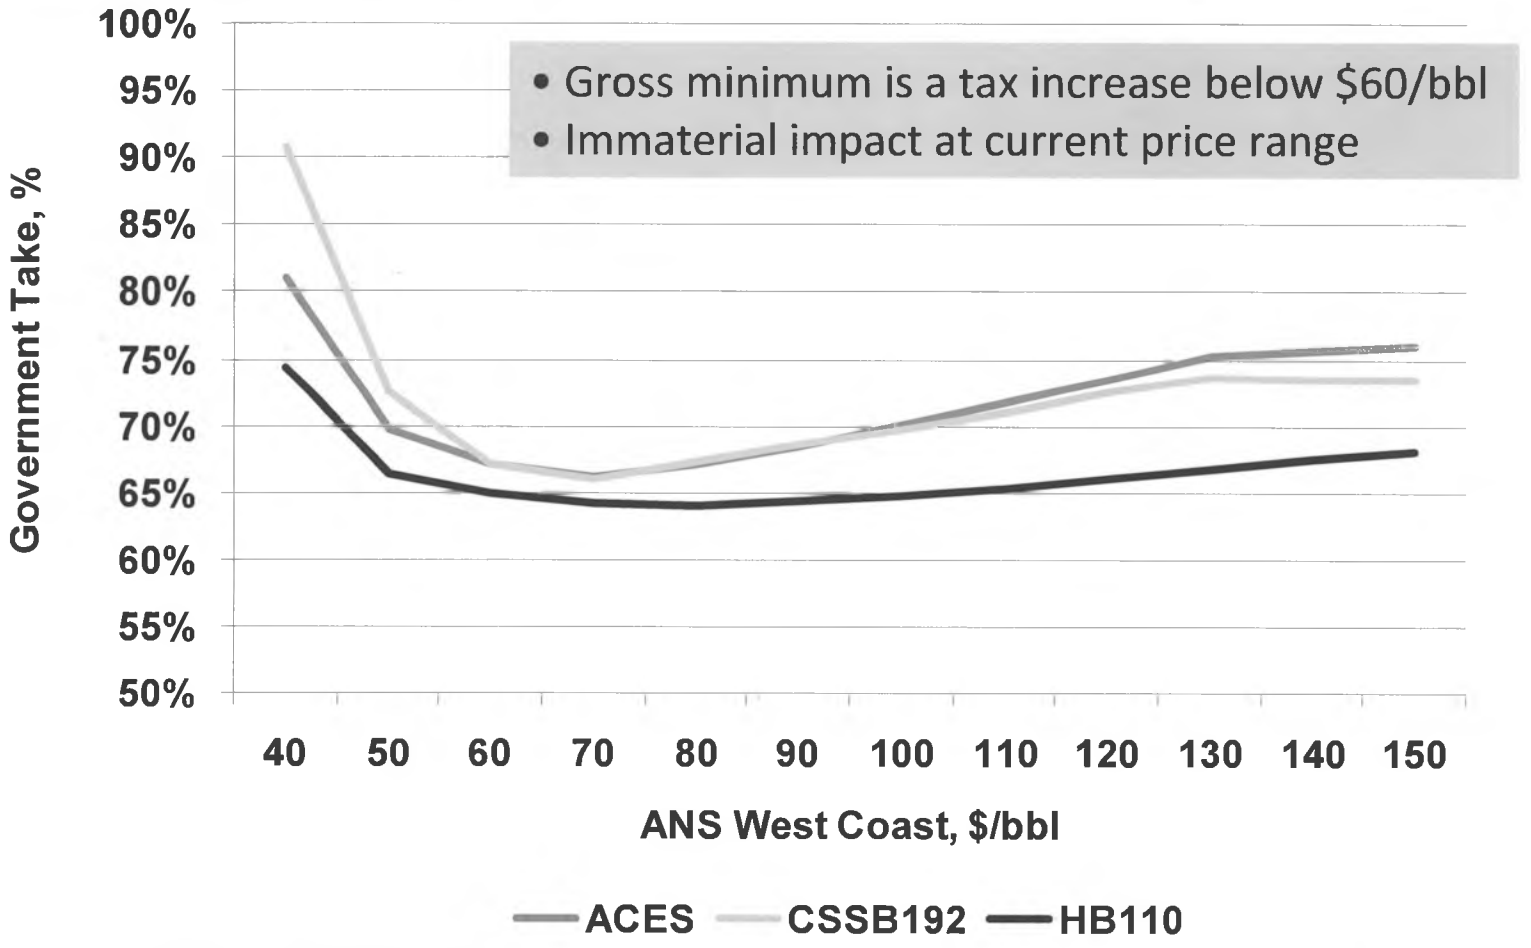
Scott Jepsen, VP External Affairs
ConocoPhillips Alaska

April 6, 2012



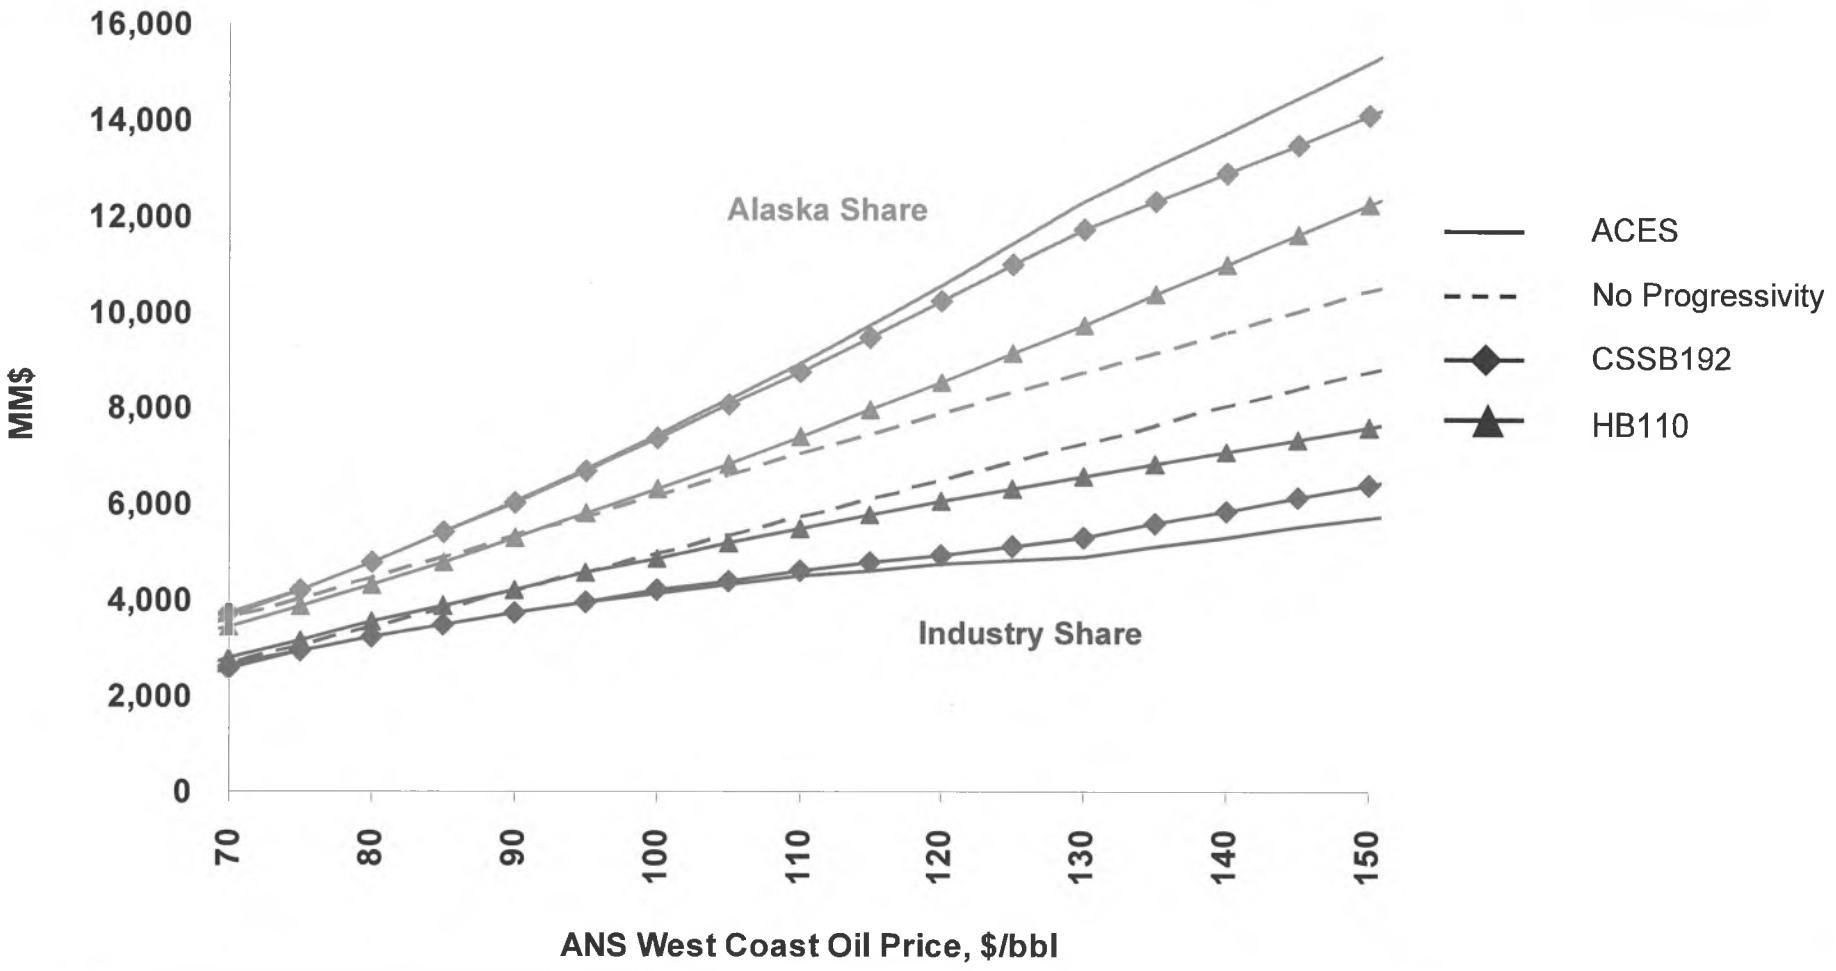
CSSB192 – Observations

ConocoPhillips Alaska

- Tax rate on base still too high
- New oil incentive insufficient to offset high base tax rate
- Floor represents a tax increase at low prices
- Indexing is a positive step
- CSSB192 insufficient to improve the investment climate and attract capital necessary to stem the decline

Government Take Comparison vs ACES

ConocoPhillips Alaska



CSSB192 does not improve the investment climate

Source: PFC Energy, April 4, 2012 1:30PM slide deck (data from Page 5, graphed on Page 10)

State / Industry Share

ConocoPhillips Alaska

CSSB192 Base Tax - does not improve the investment climate

Based on Fall 2011 RSB for FY2013
Assume 35% federal tax rate, 9.4% SIT rate

Alaska Share includes royalty, severance tax, income tax, and property tax

Production Incentive

ConocoPhillips Alaska

- New production incentive insufficient to overcome high base tax rate
- All new production investments challenged by costs and smaller targets
- Maintaining base decline will require more investment over time
- Increases complexity
- Production incentive does not go as far as HB-110

ConocoPhillips Commitment

ConocoPhillips Alaska

Last spring, ConocoPhillips made the following commitments to Alaska if HB110 or similar legislation is passed:

- We will pursue increased drilling activity on the North Slope
- We will aggressively pursue more satellite developments at Alpine and Kuparuk
- We will work with partners to develop major projects at Prudhoe Bay
- We will proactively pursue other projects that can move the needle on oil production

An Open Letter to All Alaskans from ConocoPhillips

Our Commitment to Moving Alaska Forward

Dear Alaskans:

The oil industry in Alaska is at a crossroads. The amount of oil in the Trans Alaska Pipeline is declining at a faster rate than projected even a year ago. State and federal officials are, for the first time, talking openly about the challenges with TAPS low flow in light of the recent shut down of TAPS.

No other state's production has declined more than Alaska in the past eight years. But it doesn't have to be that way. The oil industry and the state of Alaska must work together now to put more oil in the pipeline and bridge the more than 10-year gap between now and when oil from offshore and other sources can hopefully refill TAPS.

Governor Parnell has introduced a bill, HB 110/SB 49, to reduce oil taxes in an effort to restart development and create new jobs. However, some have questioned the oil industry's commitment to Alaska.

In Alaska this week, ConocoPhillips reinforced that commitment to the state. If the business environment is changed, we at ConocoPhillips will do more to help bring Alaska's challenged oil to the market.

We will increase our drilling activity on the North Slope.

We will proactively pursue more North Slope projects that can move the needle on oil production while employing Alaskans and creating new opportunities for Alaska businesses.

We will work with BP and ExxonMobil to advance significant projects like Gas Partial Processing (GPP) and IPAD at Prudhoe Bay.

We will aggressively pursue more satellite developments at both Kuparuk and Alpine.

Our company believes Governor Parnell's goal of producing 1 million barrels of oil per day is a goal around which we can all unite.

At ConocoPhillips, we believe in the potential that Alaska has to offer. We have demonstrated our commitment to the environment by continuing to operate in the cleanest and safest way we can. We have shown a long history of investment, both human and financial, to bring the resources of this great state to the market. We have stood with many Alaska companies, including Alaska Native corporations, to build an oil and gas industry that has provided many jobs to Alaskans.

If the Legislature provides for an effective date of 2012, ConocoPhillips will do our part to accelerate new activity on the North Slope.

Alaska has tremendous resource potential, and we at ConocoPhillips have over 50 years in Alaska in solving technical and environmental challenges associated with oil development. We support improving the investment climate and believe changing oil taxes will lead to a better future with more production and jobs for Alaska families than the current path we are on.

Sincerely,

Trond-Erik Johansen
President
ConocoPhillips Alaska Inc.

Jim Mulva
Chairman and Chief Executive Officer
ConocoPhillips

ConocoPhillips
Alaska's Oil & Gas Company

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB192

Analysis

CSSB 192 states that the Alaska Oil and Gas Conservation Commission is responsible to provide the Department of Revenue its non-confidential data in a format usable by the Department of Revenue's system. In order for the Alaska Oil and Gas Conservation Commission to accomplish this they must hire one contract employee to establish and maintain a link to Department of Revenue's database, as well as to answer questions and provide other miscellaneous support.

(Revised 8/17/2011 OMB)

Analysis

The revenue impact of this bill is indeterminate.

This bill makes several changes to the oil and gas production tax system. Each of the major changes, along with its potential revenue impact, is discussed below.

1. **Creates three different progressive surcharge tax rates that are based on the gross value at the point of production.** Under this bill, the progressive surcharge is changed from one based on the net value of oil and gas production to one based on the gross value at the point of production (GVPP) of oil. The three rates are as follows: for oil in fields that are currently under production, the rate is 0.27% per dollar when the GVPP reaches $60 per barrel, and then decreasing to .03% per dollar at a price $60 over the initial threshold, up to a maximum progressive tax rate of 20%. For the first 7 years of production for oil produced from a lease or property containing land that was not in a unit or commercial production prior to January 1, 2008, the rate is 0.05% per dollar when the GVPP reaches $60 per barrel up to a maximum progressive tax rate of 5%. For producers that increase oil production above a company-specific production target based on each company's decline rate from 2008 and 2011, the rate for that incremental production is 0.14% per dollar when the GVPP reaches $60 per barrel, and then decreasing to .03% per dollar at a price $60 over the initial threshold, up to a maximum progressive tax rate of 10%. The initial $60 progressive surcharge tax thresholds would be adjusted annually by the increase in U.S. consumer price index for all urban consumers. Under Fall 2011 forecast assumptions, these provisions would impact revenue by the following amounts.

Change in State Revenue due to Progressivity Provisions of CSSB 192(FIN) in $millions

	FY 2013	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018
"Base" production from currently producing fields	-110	-75	+25	-150	-225	-200
"Incremental" production from currently producing fields	-10	-75	-75	-125	-150	-175
Qualifying new fields	0	0	0	0	0	-150
Total	-120	-150	-50	-275	-375	-525

2. **Implements a 10% gross minimum tax for companies with average daily production of more than 50,000 BTU-equivalent barrels per day.** This provision of the bill creates a minimum tax of 10% of GVPP for companies producing more than 50,000 BTU-equivalent barrels per day. There are currently three companies that are subject to this provision. Under Fall 2011 revenue forecast assumptions, this provision would not result in a tax increase for any companies, unless oil prices are $80 per barrel or below. At a $50 per barrel oil price, the increase in revenue to the state ranges between $500 million and $650 million per year over the time horizon of this fiscal note.

3. **Requires that the Department of Revenue develop regulations to allocate lease expenditures between oil and gas.** This provision of the bill instructs the Department of Revenue, when lease expenditure allocation is necessary, to allocate lease expenditures between oil and gas based on gross value at point of production "to the extent possible." This provision is expected to impact revenue to the state by less than $10 million per year.

4. **Provides for a new Petroleum Information Management System to be implemented by the Department of Revenue**. This provision of the bill provides for a new information management system for publicly available oil and gas information, to be operational before January 1, 2014. This provision is a major new responsibility for the Department, to be implemented on an accelerated timeframe, and will compete with the core mission of the Tax Division, which is to assess and collect taxes.

The bill has an effective date of January 1, 2013.

Agency Costs for Implementing Changes to Production Tax
This bill would require the Department of Revenue to draft and pass several new regulations to address the changes in progressive surcharge tax rates, the minimum tax rates, and the allocation of costs between oil and gas. The Department of Revenue expects that it would need a reimbursable services agreement with the Department of Law and other costs totaling $495,000. With passage of this bill in the 2012 legislative session, the workshop and public forum process would likely begin in the summer or fall of 2012, and the majority of the regulation costs would be incurred in FY 13.
(continued on next page)

Analysis Continued

Specific costs for each major regulation project include the following:
$75,000 for contracted professional services for regulation consulting.
$270,000 for regulations costs including Department of Law, public notice and registry.
$150,000 for public forums for education of taxpayers and public participation, including preparation materials and legal support, and possibly travel.

In addition to the one-time costs, the provisions of this bill will require four additional auditor positions to handle the increased complexity of the tax law created by this legislation. The positions would be at the Oil and Gas Revenue Auditor IV (Range 24) level, at an annual cost of $546,000 for payroll and benefits, with additional cost for office space, supplies, travel, etc.

Agency costs for Petroleum Information Management System
Estimated one-time costs to the Department of Revenue for the Petroleum Information Management system are approximately $12 million. This includes an estimated $10 million for contract services to procure, design, build, and implement the system. An additional $2 million is estimated for procurement of new hardware (data storage devices, servers, etc.) to create a robust system that can be replicated for access in both Juneau and Anchorage. An increased annual cost of $1 million per year is estimated for ongoing system maintenance, support, storage, server space, and licensing.

Additional staff resources would be required to oversee the information management program, and maintain the data warehouse and disaster recovery plans. We estimate that we would need the following new positions: one Petroleum Economist II (Range 22), one Analyst Programmer V (Range 22), one Database Administrator (Range 15), and one Office Assistant III (Range 11). The total annual cost for these four positions is $397,900 for payroll and benefits, with additional cost for office space, supplies, travel, etc.

Why this fiscal note differs from previous version (if initial version, please note as such)

The Senate Finance committee substitute moves the petroleum information management system from the Department of Administration to the Department of Revenue. The Division of Oil and Gas develops, stores, and maintains much of the information identified for inclusion in the system.

Prepared by: William C. Barron, Director — Phone: 907-269-8800
Division: Division of Oil and Gas — Date/Time: 4/6/12 5:00 PM
Approved by: Daniel Sullivan, Commissioner — Date: 4/6/2012

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB192(FIN)

Analysis

CSSB 192 version U has an indeterminate impact on state royalty revenue. There are tax benefits for new fields, and for old fields at certain price and cost combinations. However, at low oil prices or at high operating costs, the proposed tax incentives become burdens. It is difficult to determine whether the proposed changes will increase or decrease oil production, and therefore, royalty revenue to the State.

Section 10 amends AS 31.05 by adding a new section (AS 44.25.025) which requires the Department of Revenue (DOR) to develop and maintain an electronic petroleum information management system (PIMS) to archive state oil and gas information. The system will only include non-confidential information identified in this bill and other information identified in section 10 relating to oil and gas exploration, development, and production. The Division of Oil and Gas (DO&G) collects and maintains much of the information and materials listed in the proposed bill.

DO&G will be a major contributor to the petroleum management system - likely designing, developing, and maintaining the system and associated materials. DO&G currently houses the following information on: 1) unit and joint operating agreements, 2) state oil and gas exploration licenses and oil and gas leases, 3) exploration activities including seismic data, drilling reports, logs, geological models and maps, 4) development activities including development plans minus expenditure projections and reservoir characteristics, 5) facility maps and studies, and 6) abandonment plans and progress reports. DO&G will conceivably have a role in contributing other information DOR needs for oil and gas exploration, development, and production. DO&G stores and maintains more than 40 years of information from Alaska's oil and gas activities. We find the directives in the proposed bill to initiate a significant undertaking by our department and others involved in supplying the requested information.

It is assumed our information will need to re-integrated into new formats compatible with a sophisticated system easily navigated by the public. The DOR and DO&G data collection and management systems may be different in scale and scope, and synchronizing the systems will take considerable resources. In some cases, information could be linked or transferred to the PIMS site quickly; however, the information requested in the bill will demand extensive time and resources to adapt, redact, and restructure records and materials before inclusion in the PIMS.

Developing and maintaining a petroleum information management system will not likely provide any more information to the public than is currently available from our division. Non-confidential oil and gas information is currently available on DO&G's website or upon request in electronic and hard copy formats. We estimate the proposed bill will initially require eight new FTEs in the division and funds necessary to hire contractors for information technology work.

The division would need five new natural resources specialists (2 NRS II and 3 NRS III) with one administrative assistant (range 12) and two analysts (range 20) for IT functions during build-out starting in FY13. In addition to staff increases, approximately $75,000 in funding for software, licenses, and back-up systems is needed. Storage for DO&G seismic data (2-3 terrabytes) would need to be contracted to electronic storage provider which could cost hundreds of thousands of dollar annually. After the system build-out and population, we should be able to maintain the system with 4-5 FTEs. We project roughly $75,000 for contract services in FY13 and FY 14, $35,000 in FY15, and potentially no funds thereafter. Since we are not forecasting additional state revenue for these sections of the proposed bill, the significant costs incurred in developing and maintaining a new location for DO&G information results in a negative fiscal impact to the state for years to come.

CS FOR SENATE BILL NO. 192(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RESOURCES COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to the oil and gas production tax; providing for a minimum tax on oil and gas production so that the state receives a minimum production tax of 10 percent of the gross value at the point of production for certain oil and gas production; relating to that part of the monthly production tax on the gross value at the point of production of oil produced by a producer that produced oil in 2008 and 2011 but did not produce a volume of taxable oil in excess of a defined target volume or that did not produce taxable oil before January 1, 2008, and produced taxable oil for more than seven consecutive years during a specified time period, and providing that the applicable tax rate on the gross value at the point of production on that category of oil production is 0.27 percent multiplied by the number that represents the difference between the average gross value at the point of production for a barrel of oil and $60 or, if the average gross value at the point of production is greater than $60 above the base amount of $60, that the applicable

New Text Underlined [DELETED TEXT BRACKETED]

tax rate is the sum of 16.2 percent and the product of 0.03 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $60 above the base amount of $60, except that the tax rate applicable to that category of oil production may not exceed 20 percent; relating to that part of the monthly production tax on the gross value at the point of production of oil produced by a producer that produced oil in 2008 and 2011 and produces a volume of taxable oil for the year in excess of a defined target volume, and providing that the applicable tax rate on the gross value at the point of production for that category of oil production is 0.14 percent multiplied by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and the base amount of $60 or, if the average gross value at the point of production is greater than $60 above the base amount of $60, that the applicable tax rate is the sum of 16.2 percent and the product of 0.03 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $60 above the base amount of $60, except that the tax rate applicable to that category of oil production may not exceed 20 percent; relating to that part of the tax on the gross value at the point of production of oil produced by a producer during the first seven consecutive years after the start of sustained production or during the first seven consecutive years of sustained production after December 31, 2012, whichever is later, from a lease or property containing land that was not or previously had not been within a unit or in commercial production before January 1, 2008, and providing that the applicable tax rate on the gross value at the point of production for that category of oil is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate

determined by multiplying 0.05 percent by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and the base amount of $60, except that the tax rate determined for that category of oil production may not exceed five percent; relating to payments of the oil and gas production tax; relating to an adjustment to the base amount of $60 based on an increase in the United States Consumer Price Index for all urban consumers for the most recent year; relating to the allocation of lease expenditures and adjustments to lease expenditures; relating to the duties of the Department of Revenue; relating to a petroleum information management system; relating to the duties of the Alaska Oil and Gas Conservation Commission, the Department of Natural Resources, and the Department of Labor and Workforce Development that relate to providing the Department of Revenue with certain information relating to oil and gas; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 43.55.011(e) is amended to read:

(e) There is levied on the producer of oil or gas a tax for all oil and gas produced each calendar year from each lease or property in the state, less any oil and gas the ownership or right to which is exempt from taxation or constitutes a landowner's royalty interest. Except as otherwise provided under (f), (j), (k), and (o) of this section, the tax is equal to the sum of

(1) the annual production tax value of the taxable oil and gas as calculated under AS 43.55.160(a)(1) multiplied by 25 percent; and

(2) the sum, over all months of the calendar year, of the tax amounts determined under (g) of this section **on the gross value at the point of production of oil**.

* **Sec. 2.** AS 43.55.011(f) is repealed and reenacted to read:

(f) Except for oil and gas subject to (i) of this section and gas subject to (o) of this section, the provisions of this subsection apply to oil and gas produced by a producer that had average daily oil and gas production during the most recent calendar year of more than 50,000 BTU equivalent barrels. Notwithstanding any contrary provision of law, a producer may not apply tax credits to reduce its total tax liability under (e) and (g) of this section for oil and gas produced from all leases or properties below 10 percent of the total gross value at the point of production of that oil and gas. If the amount of tax calculated by applying the tax rates in (e) and (g) of this section to the total production tax value of the oil and gas taxable under (e) and (g) of this section produced from all of the producer's leases or properties is less than 10 percent of the total gross value at the point of production of that oil and gas, the tax levied by (e) and (g) of this section for that oil and gas is equal to 10 percent of the total gross value at the point of production of that oil and gas.

*** Sec. 3.** AS 43.55.011(g) is repealed and reenacted to read:

(g) For each month of the calendar year for which the producer's average monthly gross value at the point of production for a barrel of taxable oil is above the base amount of $60, the producer shall determine the tax for the purposes of (e)(2) of this section as follows:

(1) for oil not subject to (2) or (3) of this subsection produced by a producer that produced oil in 2008 and 2011, for oil not subject to (3) of this subsection produced by a producer who did not produce oil in 2008 and 2011, and for oil production that was subject to (3) of this subsection but is no longer subject to (3) of this subsection, the amount of tax is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate calculated as follows:

(A) if the producer's average monthly gross value at the point of production for a barrel of the taxable oil for the month is not more than $60 above the base amount of $60, the tax rate is 0.27 percent multiplied by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and the base amount of $60; or

(B) if the producer's average monthly gross value at the point of production for a barrel of taxable oil is more than $60 above the base amount of $60, the tax rate is the sum of 16.2 percent and the product of 0.03 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $60 above the base amount of $60, except that the tax rate determined under this subparagraph may not exceed 20 percent;

(2) for oil not subject to (3) of this subsection produced by a producer that produced taxable oil in 2008 and 2011 that is in excess of the target volume determined under (q) of this section, the amount of tax on the volume of oil above the target volume is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate calculated as follows:

(A) if the producer's average monthly gross value at the point of production for a barrel of the taxable oil for the month is not more than $60 above the base amount of $60, the tax rate is 0.14 percent multiplied by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and the base amount of $60; or

(B) if the producer's average monthly gross value at the point of production for a barrel of taxable oil is more than $60 above the base amount of $60, the tax rate is the sum of 8.4 percent and the product of 0.03 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $60 above the base amount of $60, except that the tax rate determined under this subparagraph may not exceed 10 percent;

(3) for oil produced by a producer during the first seven consecutive years after the start of sustained production or during the first seven consecutive years of sustained production after December 31, 2012, whichever is later, from a lease or property containing land that was not or previously had not been within a unit or in commercial production before January 1, 2008, the amount of tax is determined by

multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate determined by multiplying 0.05 percent by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and $60, except that the tax rate determined under this paragraph may not exceed five percent; after the rate determination of this paragraph no longer applies, oil produced from a lease or property that was subject to the rate determination under this paragraph is subject to the rate determination under (1) of this subsection; in this paragraph, "sustained production" has the meaning given in AS 43.55.025(*l*).

*** Sec. 4.** AS 43.55.011 is amended by adding new subsections to read:

(p) Beginning on March 1, 2014, and on March 1 of each year thereafter, the commissioner shall adjust the base amount of $60 in (g) of this section by the percent increase in the annual United States Consumer Price Index for all urban consumers for the most recent year. The index for January 2013 is the reference base index. The commissioner shall publish the percent increase and the adjusted base amount on the department's Internet website as soon as is practicable after the commissioner determines the adjusted base amount. The adjustment made by the commissioner is retroactive to January 1 of the year in which the adjustment is made. The department shall adopt a regulation providing for the payment of the increase in an installment payment required under AS 43.55.020(a) that results from the retroactive application of the adjustment to the base amount of $60 in (g) of this section.

(q) When determining whether a producer is subject to (g)(1) or (2) of this section,

(1) the target volume is determined under the following formula, where V is the volume of the oil produced by the producer in 2011, D is the decline percentage calculated by taking the cube root of the ratio of the volume of taxable oil produced by the producer in 2011 to the volume of taxable oil produced by the producer in 2008, and Y is the year, expressed in four digits, for which the target volume is being determined:

$$\text{Target Volume} = V \times D^{(Y - 2011)};$$ and

(2) the target volume for a producer that increases its volume of

production through the purchase, merger, or other acquisition of another producer is the sum of the producer's target volume and the target volume for the producer that is purchased, merged with, or otherwise acquired; however, if the producer that is purchased, merged with, or otherwise acquired did not have production in 2008 and 2011, the volume of the increased production that is attributable to the purchase, merger, or other acquisition may not be considered for the purpose of determining whether the producer that acquired the additional production has increased the volume of production above its target volume.

* **Sec. 5.** AS 43.55.020(a) is amended to read:

(a) For a calendar year, a producer subject to tax under AS 43.55.011(e) - (i) shall pay the tax as follows:

(1) an installment payment of the estimated tax levied by AS 43.55.011(e) **and (g)**, net of any tax credits applied as allowed by law, is due for each month of the calendar year on the last day of the following month; except as otherwise provided under (2) of this subsection, the amount of the installment payment is the sum of the following amounts, less 1/12 of the tax credits that are allowed by law to be applied against the tax levied by AS 43.55.011(e) for the calendar year, but the amount of the installment payment may not be less than zero:

(A) for oil and gas produced from leases or properties in the state outside the Cook Inlet sedimentary basin but not subject to AS 43.55.011(o), other than leases or properties subject to AS 43.55.011(f), the greater of

(i) zero; or

(ii) the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for oil produced for the month added to the product of** 25 percent and [THE TAX RATE CALCULATED FOR THE MONTH UNDER AS 43.55.011(g) MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible for the leases or properties under AS 43.55.160 from the

gross value at the point of production of the oil and gas produced from the leases or properties during the month for which the installment payment is calculated;

(B) for oil and gas produced from leases or properties subject to AS 43.55.011(f), the **greater** [GREATEST] of

(i) **10 percent of the gross value at the point of production for oil and gas described in AS 43.55.011(f)** [ZERO;

(ii) ZERO PERCENT, ONE PERCENT, TWO PERCENT, THREE PERCENT, OR FOUR PERCENT, AS APPLICABLE, OF THE GROSS VALUE AT THE POINT OF PRODUCTION OF THE OIL AND GAS] produced [FROM ALL LEASES OR PROPERTIES] during the month for which the installment payment is calculated; or

(ii) [(iii)] the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for oil produced for the month added to the product of** 25 percent and the tax rate calculated for the month under AS 43.55.011(g) [MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible for those leases or properties under AS 43.55.160 from the gross value at the point of production of the oil and gas produced from those leases or properties during the month for which the installment payment is calculated;

(C) for oil and gas produced from each lease or property subject to AS 43.55.011(j), (k), or (o), the greater of

(i) zero; or

(ii) the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for the oil produced for the month added to the product of** 25 percent and [THE TAX RATE CALCULATED FOR THE MONTH UNDER

AS 43.55.011(g) MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible under AS 43.55.160 for oil or gas, respectively, produced from the lease or property from the gross value at the point of production of the oil or gas, respectively, produced from the lease or property during the month for which the installment payment is calculated;

(2) an amount calculated under (1)(C) of this subsection for oil or gas produced from a lease or property subject to AS 43.55.011(j), (k), or (o) may not exceed the product obtained by carrying out the calculation set out in AS 43.55.011(j)(1) or (2) or 43.55.011(o), as applicable, for gas or set out in AS 43.55.011(k)(1) or (2), as applicable, for oil, but substituting in AS 43.55.011(j)(1)(A) or (2)(A) or 43.55.011(o), as applicable, the amount of taxable gas produced during the month for the amount of taxable gas produced during the calendar year and substituting in AS 43.55.011(k)(1)(A) or (2)(A), as applicable, the amount of taxable oil produced during the month for the amount of taxable oil produced during the calendar year;

(3) an installment payment of the estimated tax levied by AS 43.55.011(i) for each lease or property is due for each month of the calendar year on the last day of the following month; the amount of the installment payment is the sum of

(A) the applicable tax rate for oil provided under AS 43.55.011(i), multiplied by the gross value at the point of production of the oil taxable under AS 43.55.011(i) and produced from the lease or property during the month; and

(B) the applicable tax rate for gas provided under AS 43.55.011(i), multiplied by the gross value at the point of production of the gas taxable under AS 43.55.011(i) and produced from the lease or property during the month;

(4) any amount of tax levied by AS 43.55.011(e) **and (g)** or (i), net of

any credits applied as allowed by law, that exceeds the total of the amounts due as installment payments of estimated tax is due on March 31 of the year following the calendar year of production.

* **Sec. 6.** AS 43.55.160(c) is amended to read:

(c) Notwithstanding any contrary provision of AS 43.55.150, for purposes of calculating **the tax due under AS 43.55.011(g)** [A MONTHLY PRODUCTION TAX VALUE UNDER (a)(2) OF THIS SECTION], the gross value at the point of production of the oil and gas is calculated under regulations adopted by the department that provide for using an appropriate monthly share of the producer's costs of transportation for the calendar year.

* **Sec. 7.** AS 43.55.160 is amended by adding new subsections to read:

(f) For purposes of (a) of this section, a lease expenditure is applicable to oil or gas produced from a lease or property, or to oil or gas produced from leases or properties in an area of the state, if the lease expenditure is

(1) a cost to explore, develop, or produce oil or gas from that lease or property, or to explore, develop, or produce oil or gas from one of those leases or properties in that area of the state, respectively; and

(2) incurred on or after the commencement of commercial production of oil or gas from the lease or property.

(g) For purposes of (a) of this section, a lease expenditure incurred during a calendar year to explore land that is not a lease or property, or to explore or develop a lease or property before commencement of commercial production of oil or gas from the lease or property, shall be allocated as provided in a regulation adopted by the department under AS 43.55.165(h) to and among oil, gas subject to AS 43.55.011(o), and gas not subject to AS 43.55.011(o) produced by the producer during that calendar year from leases or properties in the same area of the state as the land being explored or the lease or property being explored or developed, respectively.

(h) For purposes of (f) and (g) of this section, an area of the state is one of the following:

(1) land north of 68 degrees North latitude;

(2) land outside the Cook Inlet sedimentary basin not including any

land north of 68 degrees North latitude; or

(3) the Cook Inlet sedimentary basin.

* **Sec. 8.** AS 43.55.165(h) is amended to read:

(h) The department shall adopt regulations that provide for reasonable methods of allocating costs between oil and gas, between gas subject to AS 43.55.011(o) and other gas, and between leases or properties in those circumstances where an allocation of costs is required to determine lease expenditures that are costs of exploring for, developing, or producing oil deposits or costs of exploring for, developing, or producing gas deposits, or that are costs of exploring for, developing, or producing oil or gas deposits located within different leases or properties. **When adopting a regulation for determining a reasonable method of allocating lease expenditures between the production of oil and the production of gas, the department shall, to the extent possible, provide for the allocation of lease expenditures in proportion to the gross value at the point of production for oil produced and gas produced.**

* **Sec. 9.** AS 43.55.170 is amended by adding a new subsection to read:

(d) The department shall adopt regulations that provide for reasonable methods of allocating the adjustments to a producer's lease expenditures in (a) of this section and the payments and credits described in (b) of this section between oil and gas, between gas subject to AS 43.55.011(o) and other gas, and between leases or properties in those circumstances where an allocation of costs is required to determine lease expenditures that are costs of exploring for, developing, or producing oil deposits, or costs of exploring for, developing, or producing gas deposits, or that are costs of exploring for, developing, or producing oil or gas deposits located within different leases or properties. When determining a reasonable method of allocating the adjustments to a producer's lease expenditures between the production of oil and the production of gas, the department shall consider allocating the adjustments in proportion to the lease expenditures allocated to the production of oil and the production of gas under regulations adopted by the department under AS 43.55.165(h).

* **Sec. 10.** AS 44.25 is amended by adding a new section to read:

Sec. 44.25.025. Petroleum information management system. (a) The Department of Revenue shall develop and maintain an electronic petroleum information management system to collect, secure, distribute, store, retrieve, and archive information related to oil and gas exploration, development, and production in the state. The purposes of the petroleum information management system are to improve the administration of the oil and gas production tax and to facilitate exploration, development, and production of oil and gas resources. The petroleum information management system shall be accessible by the public.

(b) To the extent the information is available and is not confidential, the petroleum information management system must include the following information:

(1) unit and joint operating agreements;

(2) state oil and gas exploration licenses and oil and gas leases;

(3) for exploration activities,

(A) exploration work programs and budgets;

(B) seismic data;

(C) drilling reports;

(D) logs;

(E) well tests;

(F) geological models and maps;

(4) for development activities,

(A) development plans with operating and capital expenditure projections;

(B) construction progress reports;

(C) drilling reports;

(D) reservoir characterization;

(5) for production activities,

(A) production work programs and budgets;

(B) oil and gas sales, revenue, and pricing;

(C) transportation agreements;

(D) production data;

(E) injection data;

(F) operating and capital expenditures;

(G) facility maps and studies;

(6) for abandonment of oil and gas wells, leases, and production and transportation facilities,

(A) abandonment plans and budgets;

(B) progress reports;

(7) for oil and gas related employment information,

(A) the number of resident and nonresident hires for each year;

(B) training opportunities; and

(8) other information the Department of Revenue determines necessary and relevant to the oil and gas production tax and to the exploration, development, and production of oil and gas resources.

(c) The Alaska Oil and Gas Conservation Commission, the Department of Natural Resources, and the Department of Labor and Workforce Development, in consultation with the Department of Revenue, shall provide information described in (b) of this section that is not confidential and within the control of the commission and each department to the Department of Revenue for inclusion in the petroleum information management system. The information provided by the Alaska Oil and Gas Conservation Commission or by a department under this subsection shall be in a form suitable for the Department of Revenue to include in the petroleum information management system.

* **Sec. 11.** AS 43.55.160(a)(2) is repealed.

* **Sec. 12.** The uncodified law of the State of Alaska is amended by adding a new section to read:

IMPLEMENTATION OF THE PETROLEUM INFORMATION MANAGEMENT SYSTEM. The Department of Revenue shall develop and implement a work plan for the development of the petroleum information management system required by AS 44.25.025, enacted by sec. 10 of this Act, so that the system is operational before January 1, 2014.

* **Sec. 13.** Sections 1 - 9 and 11 of this Act take effect January 1, 2013.

* **Sec. 14.** Except as provided in sec. 13 of this Act, this Act takes effect immediately under AS 01.10.070(c).

CS FOR SENATE BILL NO. 192(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RESOURCES COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to the oil and gas production tax; providing for a minimum tax on oil and gas production so that the state receives a minimum production tax of 10 percent of the gross value at the point of production for certain oil and gas production; relating to that part of the monthly production tax on the gross value at the point of production of oil produced by a producer that produced oil in 2008 and 2011 but did not produce a volume of taxable oil in excess of a defined target volume or that did not produce taxable oil before January 1, 2008, and produced taxable oil for more than seven consecutive years during a specified time period, and providing that the applicable tax rate on the gross value at the point of production on that category of oil production is 0.27 percent multiplied by the number that represents the difference between the average gross value at the point of production for a barrel of oil and $60 or, if the average gross value at the point of production is greater than $60 above the base amount of $60, that the applicable

New Text Underlined [DELETED TEXT BRACKETED]

tax rate is the sum of 16.2 percent and the product of 0.03 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $60 above the base amount of $60, except that the tax rate applicable to that category of oil production may not exceed 20 percent; relating to that part of the monthly production tax on the gross value at the point of production of oil produced by a producer that produced oil in 2008 and 2011 and produces a volume of taxable oil for the year in excess of a defined target volume, and providing that the applicable tax rate on the gross value at the point of production for that category of oil production is 0.14 percent multiplied by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and the base amount of $60 or, if the average gross value at the point of production is greater than $60 above the base amount of $60, that the applicable tax rate is the sum of 16.2 percent and the product of 0.03 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $60 above the base amount of $60, except that the tax rate applicable to that category of oil production may not exceed 20 percent; relating to that part of the tax on the gross value at the point of production of oil produced by a producer during the first seven consecutive years after the start of sustained production or during the first seven consecutive years of sustained production after December 31, 2012, whichever is later, from a lease or property containing land that was not or previously had not been within a unit or in commercial production before January 1, 2008, and providing that the applicable tax rate on the gross value at the point of production for that category of oil is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate

determined by multiplying 0.05 percent by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and the base amount of $60, except that the tax rate determined for that category of oil production may not exceed five percent; relating to payments of the oil and gas production tax; relating to an adjustment to the base amount of $60 based on an increase in the United States Consumer Price Index for all urban consumers for the most recent year; relating to the allocation of lease expenditures and adjustments to lease expenditures; relating to the duties of the Department of Revenue; relating to a petroleum information management system; relating to the duties of the Alaska Oil and Gas Conservation Commission, the Department of Natural Resources, and the Department of Labor and Workforce Development that relate to providing the Department of Revenue with certain information relating to oil and gas; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 43.55.011(e) is amended to read:

(e) There is levied on the producer of oil or gas a tax for all oil and gas produced each calendar year from each lease or property in the state, less any oil and gas the ownership or right to which is exempt from taxation or constitutes a landowner's royalty interest. Except as otherwise provided under (f), (j), (k), and (o) of this section, the tax is equal to the sum of

(1) the annual production tax value of the taxable oil and gas as calculated under AS 43.55.160(a)(1) multiplied by 25 percent; and

(2) the sum, over all months of the calendar year, of the tax amounts determined under (g) of this section **on the gross value at the point of production of oil**.

*** Sec. 2.** AS 43.55.011(f) is repealed and reenacted to read:

(f) Except for oil and gas subject to (i) of this section and gas subject to (o) of this section, the provisions of this subsection apply to oil and gas produced by a producer that had average daily oil and gas production during the most recent calendar year of more than 50,000 BTU equivalent barrels. Notwithstanding any contrary provision of law, a producer may not apply tax credits to reduce its total tax liability under (e) and (g) of this section for oil and gas produced from all leases or properties below 10 percent of the total gross value at the point of production of that oil and gas. If the amount of tax calculated by applying the tax rates in (e) and (g) of this to the total production tax value of the oil and gas taxable under (e) and (g) of this section produced from all of the producer's leases or properties is less than 10 percent of the total gross value at the point of production of that oil and gas, the tax levied by (e) and (g) of this section for that oil and gas is equal to 10 percent of the total gross value at the point of production of that oil and gas.

*** Sec. 3.** AS 43.55.011(g) is repealed and reenacted to read:

(g) For each month of the calendar year for which the producer's average monthly gross value at the point of production for a barrel of taxable oil is above the base amount of $60, the producer shall determine the tax for the purposes of (e)(2) of this section as follows:

(1) for oil not subject to (3) of this subsection produced by a producer that produced oil in 2008 and 2011 but failed to produce a volume of taxable oil for the year in excess of the target volume determined under (q) of this section, for oil not subject to (3) of this subsection produced by a producer who did not produce oil in 2008 and 2011, and for oil production that was subject to (3) of this subsection but is no longer subject to (3) of this subsection, the amount of tax is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate calculated as follows:

(A) if the producer's average monthly gross value at the point of production for a barrel of the taxable oil for the month is not more than $60 above the base amount of $60, the tax rate is 0.27 percent multiplied by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and the base amount of $60;

or

(B) if the producer's average monthly gross value at the point of production for a barrel of taxable oil is more than $60 above the base amount of $60, the tax rate is the sum of 16.2 percent and the product of 0.03 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $60 above the base amount of $60, except that the tax rate determined under this subparagraph may not exceed 20 percent;

(2) for oil not subject to (3) of this subsection produced by a producer that produced taxable oil in 2008 and 2011 and produces a volume of taxable oil for the year in excess of the target volume determined under (q) of this section, the amount of tax is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate calculated as follows:

(A) if the producer's average monthly gross value at the point of production for a barrel of the taxable oil for the month is not more than $60 above the base amount of $60, the tax rate is 0.14 percent multiplied by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and the base amount of $60;

or

(B) if the producer's average monthly gross value at the point of production for a barrel of taxable oil is more than $60 above the base amount of $60, the tax rate is the sum of 8.4 percent and the product of 0.03 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $60 above the base amount of $60, except that the tax rate determined under this subparagraph may not exceed 10 percent;

(3) for oil produced by a producer during the first seven consecutive years after the start of sustained production or during the first seven consecutive years of sustained production after December 31, 2012, whichever is later, from a lease or property containing land that was not or previously had not been within a unit or in

commercial production before January 1, 2008, the amount of tax is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate determined by multiplying 0.05 percent by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and $60, except that the tax rate determined under this paragraph may not exceed five percent; after the rate determination of this paragraph no longer applies, oil produced from a lease or property that was subject to the rate determination under this paragraph is subject to the rate determination under (1) of this subsection; in this paragraph, "sustained production" has the meaning given in AS 43.55.025(*l*).

*** Sec. 4.** AS 43.55.011 is amended by adding new subsections to read:

(p) Beginning on March 1, 2014, and on March 1 of each year thereafter, the commissioner shall adjust the base amount of $60 in (g) of this section by the percent increase in the annual United States Consumer Price Index for all urban consumers for the most recent year. The index for January 2013 is the reference base index. The commissioner shall publish the percent increase and the adjusted base amount on the department's Internet website as soon as is practicable after the commissioner determines the adjusted base amount. The adjustment made by the commissioner is retroactive to January 1 of the year in which the adjustment is made. The department shall adopt a regulation providing for the payment of the increase in an installment payment required under AS 43.55.020(a) that results from the retroactive application of the adjustment to the base amount of $60 in (g) of this section.

(q) For purposes of determining whether a producer is subject to (g)(1) or (2) of this section, the target volume is determined under the following formula, where V is the volume of the oil produced by the producer in 2011, D is the decline percentage calculated by taking the cube root of the ratio of the volume of taxable oil produced by the producer in 2011 to the volume of taxable oil produced by the producer in 2008, and Y is the year, expressed in four digits, for which the target volume is being determined:

$$\text{Target Volume} = V \times D^{(Y - 2011)}$$

*** Sec. 5.** AS 43.55.020(a) is amended to read:

(a) For a calendar year, a producer subject to tax under AS 43.55.011(e) - (i) shall pay the tax as follows:

(1) an installment payment of the estimated tax levied by AS 43.55.011(e) **and (g)**, net of any tax credits applied as allowed by law, is due for each month of the calendar year on the last day of the following month; except as otherwise provided under (2) of this subsection, the amount of the installment payment is the sum of the following amounts, less 1/12 of the tax credits that are allowed by law to be applied against the tax levied by AS 43.55.011(e) for the calendar year, but the amount of the installment payment may not be less than zero:

(A) for oil and gas produced from leases or properties in the state outside the Cook Inlet sedimentary basin but not subject to AS 43.55.011(o), other than leases or properties subject to AS 43.55.011(f), the greater of

(i) zero; or

(ii) the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for oil produced for the month added to the product of** 25 percent and [THE TAX RATE CALCULATED FOR THE MONTH UNDER AS 43.55.011(g) MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible for the leases or properties under AS 43.55.160 from the gross value at the point of production of the oil and gas produced from the leases or properties during the month for which the installment payment is calculated;

(B) for oil and gas produced from leases or properties subject to AS 43.55.011(f), the **greater** [GREATEST] of

(i) **10 percent of the gross value at the point of production for oil and gas described in AS 43.55.011(f)** [ZERO;

(ii) ZERO PERCENT, ONE PERCENT, TWO PERCENT, THREE PERCENT, OR FOUR PERCENT, AS

APPLICABLE, OF THE GROSS VALUE AT THE POINT OF PRODUCTION OF THE OIL AND GAS] produced [FROM ALL LEASES OR PROPERTIES] during the month for which the installment payment is calculated; or

(ii) [(iii)] the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for oil produced for the month added to the product of** 25 percent and the tax rate calculated for the month under AS 43.55.011(g) [MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible for those leases or properties under AS 43.55.160 from the gross value at the point of production of the oil and gas produced from those leases or properties during the month for which the installment payment is calculated;

(C) for oil and gas produced from each lease or property subject to AS 43.55.011(j), (k), or (o), the greater of

(i) zero; or

(ii) the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for the oil produced for the month added to the product of** 25 percent and [THE TAX RATE CALCULATED FOR THE MONTH UNDER AS 43.55.011(g) MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible under AS 43.55.160 for oil or gas, respectively, produced from the lease or property from the gross value at the point of production of the oil or gas, respectively, produced from the lease or property during the month for which the installment payment is calculated;

(2) an amount calculated under (1)(C) of this subsection for oil or gas

produced from a lease or property subject to AS 43.55.011(j), (k), or (o) may not exceed the product obtained by carrying out the calculation set out in AS 43.55.011(j)(1) or (2) or 43.55.011(o), as applicable, for gas or set out in AS 43.55.011(k)(1) or (2), as applicable, for oil, but substituting in AS 43.55.011(j)(1)(A) or (2)(A) or 43.55.011(o), as applicable, the amount of taxable gas produced during the month for the amount of taxable gas produced during the calendar year and substituting in AS 43.55.011(k)(1)(A) or (2)(A), as applicable, the amount of taxable oil produced during the month for the amount of taxable oil produced during the calendar year;

(3) an installment payment of the estimated tax levied by AS 43.55.011(i) for each lease or property is due for each month of the calendar year on the last day of the following month; the amount of the installment payment is the sum of

(A) the applicable tax rate for oil provided under AS 43.55.011(i), multiplied by the gross value at the point of production of the oil taxable under AS 43.55.011(i) and produced from the lease or property during the month; and

(B) the applicable tax rate for gas provided under AS 43.55.011(i), multiplied by the gross value at the point of production of the gas taxable under AS 43.55.011(i) and produced from the lease or property during the month;

(4) any amount of tax levied by AS 43.55.011(e) **and (g)** or (i), net of any credits applied as allowed by law, that exceeds the total of the amounts due as installment payments of estimated tax is due on March 31 of the year following the calendar year of production.

*** Sec. 6.** AS 43.55.160(c) is amended to read:

(c) Notwithstanding any contrary provision of AS 43.55.150, for purposes of calculating **the tax due under AS 43.55.011(g)** [A MONTHLY PRODUCTION TAX VALUE UNDER (a)(2) OF THIS SECTION], the gross value at the point of production of the oil and gas is calculated under regulations adopted by the department that provide for using an appropriate monthly share of the producer's costs of

transportation for the calendar year.

* **Sec. 7.** AS 43.55.160 is amended by adding new subsections to read:

(f) For purposes of (a) of this section, a lease expenditure is applicable to oil or gas produced from a lease or property, or to oil or gas produced from leases or properties in an area of the state, if the lease expenditure is

(1) a cost to explore, develop, or produce oil or gas from that lease or property, or to explore, develop, or produce oil or gas from one of those leases or properties in that area of the state, respectively; and

(2) incurred on or after the commencement of commercial production of oil or gas from the lease or property.

(g) For purposes of (a) of this section, a lease expenditure incurred during a calendar year to explore land that is not a lease or property, or to explore or develop a lease or property before commencement of commercial production of oil or gas from the lease or property, shall be allocated as provided in a regulation adopted by the department under AS 43.55.165(h) to and among oil, gas subject to AS 43.55.011(o), and gas not subject to AS 43.55.011(o) produced by the producer during that calendar year from leases or properties in the same area of the state as the land being explored or the lease or property being explored or developed, respectively.

(h) For purposes of (f) and (g) of this section, an area of the state is one of the following:

(1) land north of 68 degrees North latitude;

(2) land outside the Cook Inlet sedimentary basin not including any land north of 68 degrees North latitude; or

(3) the Cook Inlet sedimentary basin.

* **Sec. 8.** AS 43.55.165(h) is amended to read:

(h) The department shall adopt regulations that provide for reasonable methods of allocating costs between oil and gas, between gas subject to AS 43.55.011(o) and other gas, and between leases or properties in those circumstances where an allocation of costs is required to determine lease expenditures that are costs of exploring for, developing, or producing oil deposits or costs of exploring for, developing, or producing gas deposits, or that are costs of exploring for,

developing, or producing oil or gas deposits located within different leases or properties. **When adopting a regulation for determining a reasonable method of allocating lease expenditures between the production of oil and the production of gas, the department shall, to the extent possible, provide for the allocation of lease expenditures in proportion to the gross value at the point of production for oil produced and gas produced.**

*** Sec. 9.** AS 43.55.170 is amended by adding a new subsection to read:

(d) The department shall adopt regulations that provide for reasonable methods of allocating the adjustments to a producer's lease expenditures in (a) of this section and the payments and credits described in (b) of this section between oil and gas, between gas subject to AS 43.55.011(o) and other gas, and between leases or properties in those circumstances where an allocation of costs is required to determine lease expenditures that are costs of exploring for, developing, or producing oil deposits, or costs of exploring for, developing, or producing gas deposits, or that are costs of exploring for, developing, or producing oil or gas deposits located within different leases or properties. When determining a reasonable method of allocating the adjustments to a producer's lease expenditures between the production of oil and the production of gas, the department shall consider allocating the adjustments in proportion to the lease expenditures allocated to the production of oil and the production of gas under regulations adopted by the department under AS 43.55.165(h).

*** Sec. 10.** AS 44.25 is amended by adding a new section to read:

Sec. 44.25.025. Petroleum information management system. (a) The Department of Revenue shall develop and maintain an electronic petroleum information management system to collect, secure, distribute, store, retrieve, and archive information related to oil and gas exploration, development, and production in the state. The purposes of the petroleum information management system are to improve the administration of the oil and gas production tax and to facilitate exploration, development, and production of oil and gas resources. The petroleum information management system shall be accessible by the public.

(b) To the extent the information is available and is not confidential, the

petroleum information management system must include the following information:

(1) unit and joint operating agreements;

(2) state oil and gas exploration licenses and oil and gas leases;

(3) for exploration activities,

(A) exploration work programs and budgets;

(B) seismic data;

(C) drilling reports;

(D) logs;

(E) well tests;

(F) geological models and maps;

(4) for development activities,

(A) development plans with operating and capital expenditure projections;

(B) construction progress reports;

(C) drilling reports;

(D) reservoir characterization;

(5) for production activities,

(A) production work programs and budgets;

(B) oil and gas sales, revenue, and pricing;

(C) transportation agreements;

(D) production data;

(E) injection data;

(F) operating and capital expenditures;

(G) facility maps and studies;

(6) for abandonment of oil and gas wells, leases, and production and transportation facilities,

(A) abandonment plans and budgets;

(B) progress reports;

(7) for oil and gas related employment information,

(A) the number of resident and nonresident hires for each year;

(B) training opportunities; and

(8) other information the Department of Revenue determines necessary and relevant to the oil and gas production tax and to the exploration, development, and production of oil and gas resources.

(c) The Alaska Oil and Gas Conservation Commission, the Department of Natural Resources, and the Department of Labor and Workforce Development, in consultation with the Department of Revenue, shall provide information described in (b) of this section that is not confidential and within the control of the commission and each department to the Department of Revenue for inclusion in the petroleum information management system. The information provided by the Alaska Oil and Gas Conservation Commission or by a department under this subsection shall be in a form suitable for the Department of Revenue to include in the petroleum information management system.

* **Sec. 11.** AS 43.55.160(a)(2) is repealed.

* **Sec. 12.** The uncodified law of the State of Alaska is amended by adding a new section to read:

IMPLEMENTATION OF THE PETROLEUM INFORMATION MANAGEMENT SYSTEM. The Department of Revenue shall develop and implement a work plan for the development of the petroleum information management system required by AS 44.25.025, enacted by sec. 10 of this Act, so that the system is operational before January 1, 2014.

* **Sec. 13.** Sections 1 - 9 and 11 of this Act take effect January 1, 2013.

* **Sec. 14.** Except as provided in sec. 13 of this Act, this Act takes effect immediately under AS 01.10.070(c).

CS FOR SENATE BILL NO. 192(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE RESOURCES COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to the oil and gas production tax; relating to the minimum tax on oil and gas production; relating to the tax rates applicable to the production of oil as the gross value at the point of production of oil increases above $65; relating to payments of the oil and gas production tax; relating to the allocation of lease expenditures and adjustments to lease expenditures; relating to the duties of the Department of Revenue; relating to a petroleum information management system; relating to the duties of the Alaska Oil and Gas Conservation Commission, the Department of Natural Resources, and the Department of Labor and Workforce Development that relate to providing the Department of Revenue with certain information relating to oil and gas; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 43.55.011(e) is amended to read:

(e) There is levied on the producer of oil or gas a tax for all oil and gas produced each calendar year from each lease or property in the state, less any oil and gas the ownership or right to which is exempt from taxation or constitutes a landowner's royalty interest. Except as otherwise provided under (f), (j), (k), and (o) of this section, the tax is equal to the sum of

(1) the annual production tax value of the taxable oil and gas as calculated under AS 43.55.160(a)(1) multiplied by 25 percent; and

(2) the sum, over all months of the calendar year, of the tax amounts determined under (g) of this section **on the gross value at the point of production of oil**.

*** Sec. 2.** AS 43.55.011(f) is repealed and reenacted to read:

(f) Except for oil and gas subject to (i) of this section and gas subject to (o) of this section, the provisions of this subsection apply to oil and gas produced from each lease or property within a unit or nonunitized reservoir that has cumulatively produced 1,000,000,000 BTU equivalent barrels of oil or gas by the close of the most recent calendar year and from which the average daily oil and gas production from the unit or nonunitized reservoir during the most recent calendar year exceeded 100,000 BTU equivalent barrels. Notwithstanding any contrary provision of law, a producer may not apply tax credits to reduce its total tax liability under (e) and (g) of this section for oil and gas produced from all leases or properties within the unit or nonunitized reservoir below 10 percent of the total gross value at the point of production of that oil and gas. If the amount of tax calculated by multiplying the tax rates in (e) and (g) of this section by the total production tax value of the oil and gas taxable under (e) and (g) of this section produced from all of the producer's leases or properties within the unit or nonunitized reservoir is less than 10 percent of the total gross value at the point of production of that oil and gas, the tax levied by (e) and (g) of this section for that oil and gas is equal to 10 percent of the total gross value at the point of production of that oil and gas.

*** Sec. 3.** AS 43.55.011(g) is repealed and reenacted to read:

(g) For each month of the calendar year for which the producer's average monthly gross value at the point of production for a barrel of taxable oil

(1) produced from each lease or property within a unit or nonunitized reservoir that has been in production for more than seven years or has cumulatively produced 1,000,000,000 barrels of oil by the close of the most recent calendar year and from which the average daily oil and gas production from the unit or nonunitized reservoir during the most recent calendar year exceeded 100,000 barrels of oil is more than $65, the amount of tax for purposes of (e)(2) of this section is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate calculated as follows:

(A) if the producer's average monthly gross value at the point of production for a barrel of the taxable oil for the month is not more than $125, the tax rate is 0.25 percent multiplied by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and $65; or

(B) if the producer's average monthly gross value at the point of production for a barrel of taxable oil is more than $125, the tax rate is the sum of 15 percent and the product of 0.05 percent multiplied by the number that represents the difference between the average monthly gross value at the point of production for a barrel of oil and $125, except that the sum determined under this subparagraph may not exceed 20 percent;

(2) not included in (1) of this subsection is more than $65, the amount of tax for purposes of (e)(2) of this section is determined by multiplying the monthly gross value at the point of production of the taxable oil produced during the month by the tax rate determined by multiplying 0.05 percent by the number that represents the difference between that average monthly gross value at the point of production for a barrel of oil and $65, except that the tax rate determined under this paragraph may not exceed five percent.

* **Sec. 4.** AS 43.55.020(a) is amended to read:

(a) For a calendar year, a producer subject to tax under AS 43.55.011(e) - (i) shall pay the tax as follows:

(1) an installment payment of the estimated tax levied by AS 43.55.011(e) **and (g)**, net of any tax credits applied as allowed by law, is due for

each month of the calendar year on the last day of the following month; except as otherwise provided under (2) of this subsection, the amount of the installment payment is the sum of the following amounts, less 1/12 of the tax credits that are allowed by law to be applied against the tax levied by AS 43.55.011(e) for the calendar year, but the amount of the installment payment may not be less than zero:

(A) for oil and gas produced from leases or properties in the state outside the Cook Inlet sedimentary basin but not subject to AS 43.55.011(o), other than leases or properties subject to AS 43.55.011(f), the greater of

(i) zero; or

(ii) the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for oil produced for the month added to the product of** 25 percent and [THE TAX RATE CALCULATED FOR THE MONTH UNDER AS 43.55.011(g) MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible for the leases or properties under AS 43.55.160 from the gross value at the point of production of the oil and gas produced from the leases or properties during the month for which the installment payment is calculated;

(B) for oil and gas produced from leases or properties subject to AS 43.55.011(f), the **greater** [GREATEST] of

(i) **10 percent of the gross value at the point of production for oil and gas described in AS 43.55.011(f)** [ZERO;

(ii) ZERO PERCENT, ONE PERCENT, TWO PERCENT, THREE PERCENT, OR FOUR PERCENT, AS APPLICABLE, OF THE GROSS VALUE AT THE POINT OF PRODUCTION OF THE OIL AND GAS] produced [FROM ALL LEASES OR PROPERTIES] during the month for which the installment payment is calculated; or

(ii) [(iii)] the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for oil produced for the month added to the product of** 25 percent and the tax rate calculated for the month under AS 43.55.011(g) [MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible for those leases or properties under AS 43.55.160 from the gross value at the point of production of the oil and gas produced from those leases or properties during the month for which the installment payment is calculated;

(C) for oil and gas produced from each lease or property subject to AS 43.55.011(j), (k), or (o), the greater of

(i) zero; or

(ii) the sum of **the tax determined under AS 43.55.011(g) on the gross value at the point of production for the oil produced for the month added to the product of** 25 percent and [THE TAX RATE CALCULATED FOR THE MONTH UNDER AS 43.55.011(g) MULTIPLIED BY] the remainder obtained by subtracting 1/12 of the producer's adjusted lease expenditures for the calendar year of production under AS 43.55.165 and 43.55.170 that are deductible under AS 43.55.160 for oil or gas, respectively, produced from the lease or property from the gross value at the point of production of the oil or gas, respectively, produced from the lease or property during the month for which the installment payment is calculated;

(2) an amount calculated under (1)(C) of this subsection for oil or gas produced from a lease or property subject to AS 43.55.011(j), (k), or (o) may not exceed the product obtained by carrying out the calculation set out in AS 43.55.011(j)(1) or (2) or 43.55.011(o), as applicable, for gas or set out in AS 43.55.011(k)(1) or (2), as applicable, for oil, but substituting in

AS 43.55.011(j)(1)(A) or (2)(A) or 43.55.011(o), as applicable, the amount of taxable gas produced during the month for the amount of taxable gas produced during the calendar year and substituting in AS 43.55.011(k)(1)(A) or (2)(A), as applicable, the amount of taxable oil produced during the month for the amount of taxable oil produced during the calendar year;

(3) an installment payment of the estimated tax levied by AS 43.55.011(i) for each lease or property is due for each month of the calendar year on the last day of the following month; the amount of the installment payment is the sum of

(A) the applicable tax rate for oil provided under AS 43.55.011(i), multiplied by the gross value at the point of production of the oil taxable under AS 43.55.011(i) and produced from the lease or property during the month; and

(B) the applicable tax rate for gas provided under AS 43.55.011(i), multiplied by the gross value at the point of production of the gas taxable under AS 43.55.011(i) and produced from the lease or property during the month;

(4) any amount of tax levied by AS 43.55.011(e) **and (g)** or (i), net of any credits applied as allowed by law, that exceeds the total of the amounts due as installment payments of estimated tax is due on March 31 of the year following the calendar year of production.

* **Sec. 5.** AS 43.55.160(c) is amended to read:

(c) Notwithstanding any contrary provision of AS 43.55.150, for purposes of calculating **the tax due under AS 43.55.011(g)** [A MONTHLY PRODUCTION TAX VALUE UNDER (a)(2) OF THIS SECTION], the gross value at the point of production of the oil and gas is calculated under regulations adopted by the department that provide for using an appropriate monthly share of the producer's costs of transportation for the calendar year.

* **Sec. 6.** AS 43.55.160 is amended by adding new subsections to read:

(f) For purposes of (a) of this section, a lease expenditure is applicable to oil or gas produced from a lease or property, or to oil or gas produced from leases or

properties in an area of the state, if the lease expenditure is

(1) a cost to explore, develop, or produce oil or gas from that lease or property, or to explore, develop, or produce oil or gas from one of those leases or properties in that area of the state, respectively; and

(2) incurred on or after the commencement of commercial production of oil or gas from the lease or property.

(g) For purposes of (a) of this section, a lease expenditure incurred during a calendar year to explore land that is not a lease or property, or to explore or develop a lease or property before commencement of commercial production of oil or gas from the lease or property, shall be allocated as provided in a regulation adopted by the department under AS 43.55.165(h) to and among oil, gas subject to AS 43.55.011(o), and gas not subject to AS 43.55.011(o) produced by the producer during that calendar year from leases or properties in the same area of the state as the land being explored or the lease or property being explored or developed, respectively.

(h) For purposes of (f) and (g) of this section, an area of the state is one of the following:

(1) land north of 68 degrees North latitude;

(2) land outside the Cook Inlet sedimentary basin not including any land north of 68 degrees North latitude; or

(3) the Cook Inlet sedimentary basin.

* **Sec. 7.** AS 43.55.165(h) is amended to read:

(h) The department shall adopt regulations that provide for reasonable methods of allocating costs between oil and gas, between gas subject to AS 43.55.011(o) and other gas, and between leases or properties in those circumstances where an allocation of costs is required to determine lease expenditures that are costs of exploring for, developing, or producing oil deposits or costs of exploring for, developing, or producing gas deposits, or that are costs of exploring for, developing, or producing oil or gas deposits located within different leases or properties. **When adopting a regulation for determining a reasonable method of allocating lease expenditures between the production of oil and the production of gas, the department shall, to the extent possible, provide for the allocation of**

lease expenditures in proportion to the gross value at the point of production for oil produced and gas produced.

* **Sec. 8.** AS 43.55.170 is amended by adding a new subsection to read:

(d) The department shall adopt regulations that provide for reasonable methods of allocating the adjustments to a producer's lease expenditures in (a) of this section and the payments and credits described in (b) of this section between oil and gas, between gas subject to AS 43.55.011(o) and other gas, and between leases or properties in those circumstances where an allocation of costs is required to determine lease expenditures that are costs of exploring for, developing, or producing oil deposits, or costs of exploring for, developing, or producing gas deposits, or that are costs of exploring for, developing, or producing oil or gas deposits located within different leases or properties. When determining a reasonable method of allocating the adjustments to a producer's lease expenditures between the production of oil and the production of gas, the department shall consider allocating the adjustments in proportion to the lease expenditures allocated to the production of oil and the production of gas under regulations adopted by the department under AS 43.55.165(h).

* **Sec. 9.** AS 44.25 is amended by adding a new section to read:

Sec. 44.25.025. Petroleum information management system. (a) The Department of Revenue shall develop and maintain an electronic petroleum information management system to collect, secure, distribute, store, retrieve, and archive information related to oil and gas exploration, development, and production in the state. The purposes of the petroleum information management system are to improve the administration of the oil and gas production tax and to facilitate exploration, development, and production of oil and gas resources. The petroleum information management system shall be accessible by the public.

(b) To the extent the information is available and is not confidential, the petroleum information management system must include the following information:

(1) unit and joint operating agreements;

(2) state oil and gas exploration licenses and oil and gas leases;

(3) for exploration activities,

(A) exploration work programs and budgets;

(B) seismic data;

(C) drilling reports;

(D) logs;

(E) well tests;

(F) geological models and maps;

(4) for development activities,

(A) development plans with operating and capital expenditure projections;

(B) construction progress reports;

(C) drilling reports;

(D) reservoir characterization;

(5) for production activities,

(A) production work programs and budgets;

(B) oil and gas sales, revenue, and pricing;

(C) transportation agreements;

(D) production data;

(E) injection data;

(F) operating and capital expenditures;

(G) facility maps and studies;

(6) for abandonment of oil and gas wells, leases, and production and transportation facilities,

(A) abandonment plans and budgets;

(B) progress reports;

(7) for oil and gas related employment information,

(A) the number of resident and nonresident hires for each year;

(B) training opportunities; and

(8) other information the Department of Revenue determines necessary and relevant to the oil and gas production tax and to the exploration, development, and production of oil and gas resources.

(c) The Alaska Oil and Gas Conservation Commission, the Department of

Natural Resources, and the Department of Labor and Workforce Development, in consultation with the Department of Revenue, shall provide information described in (b) of this section that is not confidential and within the control of the commission and each department to the Department of Revenue for inclusion in the petroleum information management system. The information provided by the Alaska Oil and Gas Conservation Commission or by a department under this subsection shall be in a form suitable for the Department of Revenue to include in the petroleum information management system.

* **Sec. 10.** AS 43.55.160(a)(2) is repealed.

* **Sec. 11.** The uncodified law of the State of Alaska is amended by adding a new section to read:

IMPLEMENTATION OF THE PETROLEUM INFORMATION MANAGEMENT SYSTEM. The Department of Revenue shall develop and implement a work plan for the development of the petroleum information management system required by AS 44.25.025, enacted by sec. 9 of this Act, so that the system is operational before January 1, 2014.

* **Sec. 12.** This Act takes effect January 1, 2013.

SENATOR BILL WIELECHOWSKI

Sponsor Statement: SB 201

SB 201 would re-institute the "separate accounting" method of calculating corporate income tax for the oil and gas industry. This method was used from 1978-1981 but was discontinued after the industry sued. While the state ultimately won on all points before the Alaska Supreme Court, separate accounting was never re-instated. Instead, corporate income taxes have been assessed based on an apportionment of worldwide earnings.

In recent testimony before the Senate Resources and Finance Committees, international oil and gas consultant Pedro Van Meurs called the apportionment method cumbersome, an obstacle to new investment, and not in the state's best interest. He recommended that Alaska return to separate accounting.

Various estimates have been made of the loss in revenue that has resulted from the state's use of the "unity tax" method of apportioning world-wide earnings. In 2000, the Department of Revenue (DOR) estimated that Alaska had lost $4.7 billion between 1982 and 1997. More recently DOR estimated that the state would have collected about $250 million more in oil industry corporate income taxes during each of the past 5 years had "separate accounting" been in effect.

Regardless of whether the state would gain or lose revenue under separate accounting, it is a simpler and more equitable method of taxing the industry. The corporate income tax paid by international oil and gas companies operating in Alaska should not be decreased based on less profitable investments in other parts of the world or increased based on more profitable investments elsewhere. Instead, taxes should be paid based on Alaska earnings as they for small Alaska businesses throughout the state.

Please join me in supporting SB 201.

MEMORANDUM March 2, 2012

SUBJECT: Sectional Summary for SB 201 (Work Order No. 27-LS1333\A)

TO: Senator Bill Wielechowski
Attn: Michelle Sydeman

FROM: Emily Nauman ELN
Legislative Counsel

You have requested a sectional summary of the above-described bill.

As a preliminary matter, note that a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1 amends the definition of "barrel" in AS 29.60.599, substituting it with the text that will be lost with the repeal of AS 43.20.072.

Section 2 extends the exploration incentive credit provided by AS 41.09.010 to AS 43.21.

Section 3 directs corporations engaged in production or transportation of crude oil or natural gas to determine net income under AS 43.21.

Section 4 substitutes a descriptive list exempting oil and gas companies from the affiliated group reporting requirements of AS 43.20.073(f) with a reference exempting taxpayers subject to AS 43.21.

Section 5 adds AS 43.21, the former Oil and Gas Corporate Income Tax that was repealed in 1982. Credits applicable to income taxes paid under AS 43.20 are extended to AS 43.21 in AS 43.21.320, with exception of the education tax credit, which is not extended to income taxes calculated under AS 43.21. A requirement that legislators have access to information provided by corporations to the SEC has been added at AS 43.21.420. Additionally, minor changes have been made, including updating dates, cross references, and language.

Section 6 extends periodic payment provisions for stranded gas development projects to taxes paid under AS 43.21.

Section 7 repeals AS 43.20.072, the previous oil and gas tax provisions.

Section 8 states that AS 43.21 applies only to taxable income earned or received after December 31, 2012.

Section 9 directs the Department of Revenue to develop regulations to effect AS 43.21 and to develop transitional regulations.

Section 10 gives an immediate effective date to sec. 9, allowing the department to proceed with development of regulations immediately.

Section 11 gives the effective date for the remainder of the bill as January 1, 2013.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 201
2012 LEGISLATIVE SESSION

Analysis

Bill Language:
This bill would repeal the current corporate income tax on oil and gas corporations under AS 43.20.072 (worldwide combination and apportionment) and replace it with a corporate income tax based on separate accounting. Current oil and gas corporate income tax is based on a formula where total worldwide income of a corporation's unitary group is apportioned to Alaska based on the amount of property, extraction and sales attributable to Alaska. This bill would require Alaska oil and gas corporations to calculate income tax for their oil and gas producing and transportation companies based on income earned solely in Alaska. If oil and gas companies are also engaged in activities other than oil and gas production and transportation, this bill would require those companies to calculate and pay tax on those other activities based on worldwide combination and apportionment. This bill would require oil and gas corporations to file a return by April 15 each year providing information the department needs to calculate each corporation's taxable income and income tax. This bill requires the department to calculate each corporation's income tax and send an assessment by August 15 each year to each company subject to the tax. Corporations must then pay the amount of tax as calculated by the department by September 30 of each year. This bill also requires the department to prepare a report each year showing the aggregate amount of income and deductions by category reported by all oil and gas corporate income tax taxpayers. The department would also be required to disclose specific information about a taxpayer if the taxpayer is a publicly traded company and if the information was included in a report filed with the US Securities Exchange Commission (SEC) and the SEC publicly disclosed the information.

Revenues:
The department does not have enough information to accurately and fully estimate the change in oil and gas corporate income tax as a result of this legislation. Preliminary estimates show that under separate accounting, oil and gas corporations would have paid, on average, approximately $190 million more during each of the last 5 fiscal years in corporate income tax if this legislation had been in effect. This bill has an effective date of January 1, 2013. Oil and gas corporations would report under the new method beginning in April 2014 and tax would not be due until September 30, 2014. Therefore, we do not expect to see a change in corporate income tax as a result of this legislation until FY 2015.

Expenditures:
As stated above, this bill would required the Department of Revenue to calculate the amount of tax due by each oil and gas corporation operating in the state based on information each company provided the department. The department would have approximately 4 months to make the calculation of corporate income tax and send assessments to each taxpayer. In addition, the department would be required under this legislation to prepare a report showing aggregate information of all taxpayers and specific information of publicly traded companies. Under the current oil and gas corporate income tax, the calculation of taxable income starts with federal taxable income and then is adjusted for certain Alaska modifications. Currently, the department relies on federal corporate income tax audits as an additional audit resource. As such, the department does not audit down to the invoice level. The calculation of taxable income under separate accounting does not start with federal taxable income and, as such, the department will not be able to rely on federal audits to ensure that taxpayers are properly reporting and must conduct full scale audits including auditing down to the invoice level. There are currently 26 oil and gas corporate income tax filers. The department will have to calculate each taxpayers tax liability each year and conduct more comprehensive audits as well as provide a report each year to the legislature. The department believes it will need four additional corporate income tax auditor III's to handle the increased work as a result of this legislation. In addition, the department will need increased travel funds of approximately $25,000 each year to spend enough time at a corporation's place of business to conduct in-depth audits. Since the first tax returns would not be filed until April 2014, the four positions would not be needed until January 1, 2014. Expenditures in FY2014 reflect hiring of the four positions half-way through the fiscal year.

Memorandum

TO: Senator Bill Wielechowski
FROM: Chuck Burnham, Legislative Analyst
DATE: March 19, 2012
RE: Conoco Phillips: Global Distribution of Net Income and Production
LRS Report 12.250

You asked about Conoco Phillips Company's net income and petroleum production. Specifically, you wanted to know what proportion of net income and production occurs in Alaska, and how the company's profits on a per barrel of oil equivalent (BOE) basis compare to those in the rest of its geographic areas of operation.

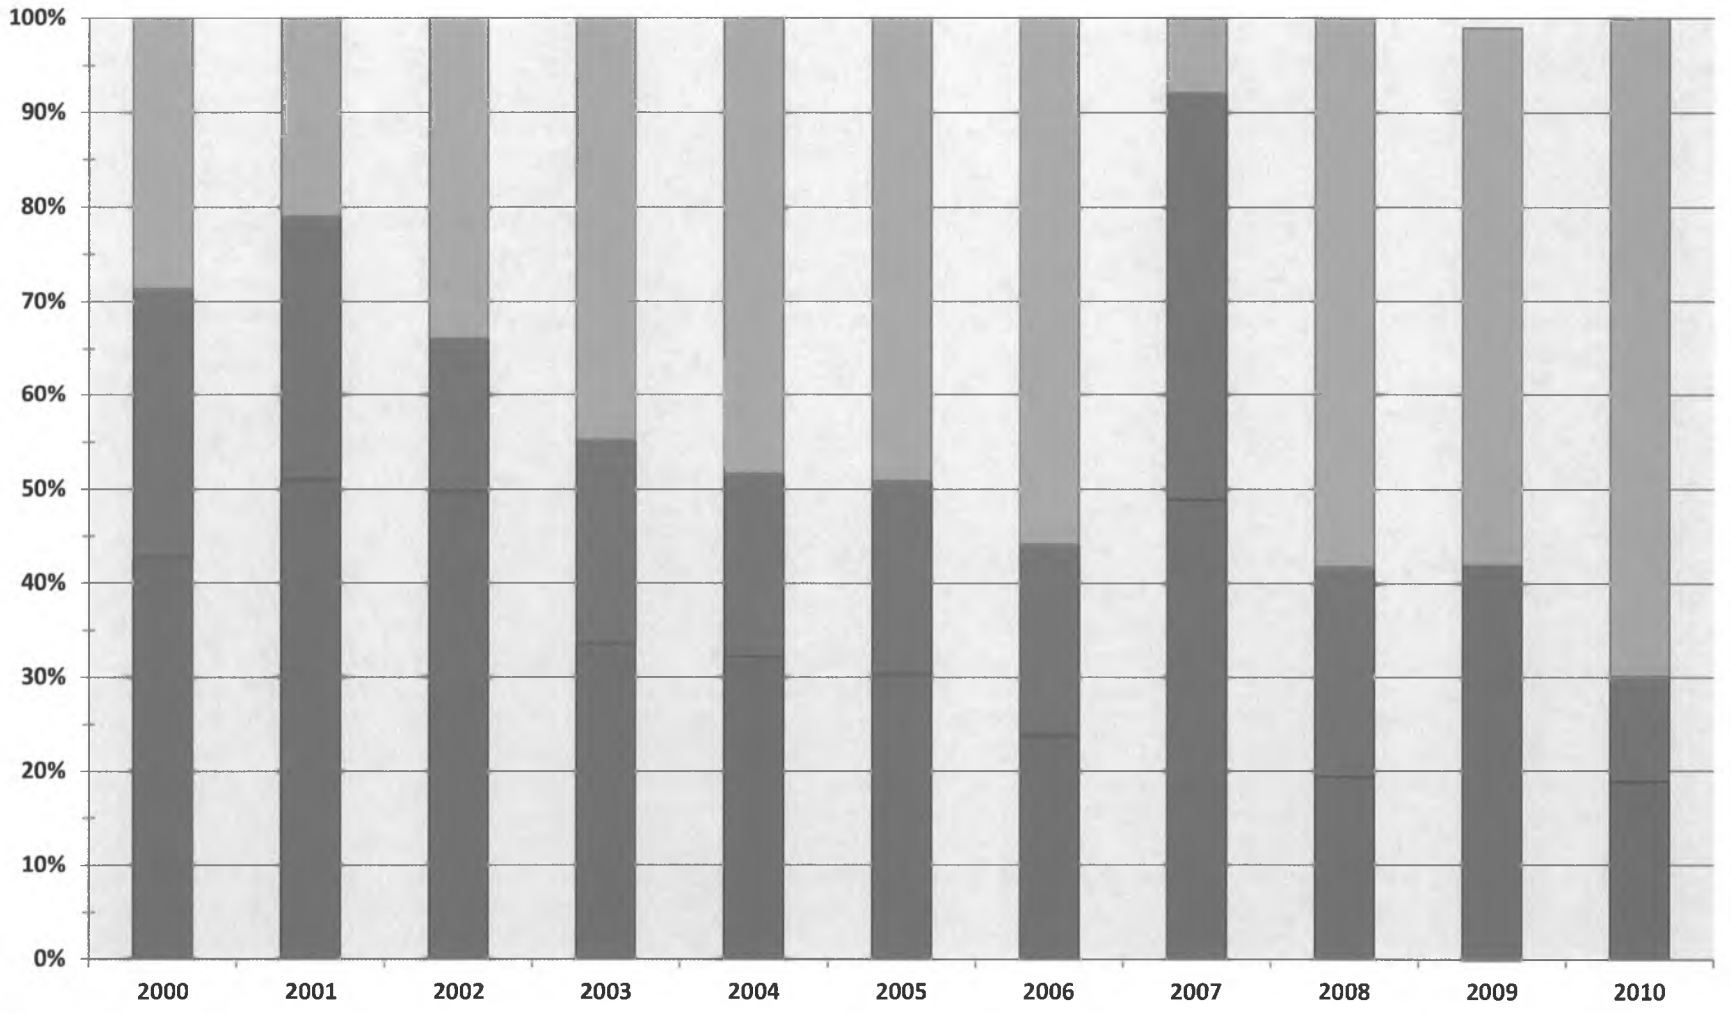
Table 1 (following page) shows net income figures for Conoco Phillips (COP) generated in selected jurisdictions for the eleven years 2000-2010. In accordance with your request, the table also includes our calculation of Alaska net income as a percentage of U.S. and overall net income. As you can see, COP's Alaska net income ranged from $829 million in 2000 to $2.55 billion in 2005.[1] Similarly wide variability in profit was seen across the jurisdictions in which COP operates, with total U.S. net income ranging from $1.15 billion in 2002 to nearly $5 billion in 2008. (Please note that net income figures for 2009 do not reach 100 percent in Figure 1 because the company lost $37 million in its lower 48 operations. Therefore, in effect, Alaska operations represented the total of domestic net income for that year.) Overall, the company's net income from operations in the state accounted for between roughly 19 percent and 51 percent of total profits, and averaged nearly 30 percent over the eleven years in question. Figure 1 illustrates these data.

The measure "barrel of oil equivalent" (BOE) expresses the volume of a given fuel required to equal the amount of energy contained in one standard U.S. barrel of crude oil (42 gallons).[2] Although an imperfect measure, calculating the BOE for various forms of hydrocarbons (oil, natural gas, natural gas liquids, etc.) is useful in that it allows for certain comparisons to be made in a much easier to understand, apples-to-apples format. It is important to note, however, that the BOE of a given substance is most useful for comparing volume to energy content ratios. The measure is less effective for comparing the relative value of BOEs.[3] However, your question, as we understand it, does not concern the value of a given petroleum product or a comparison of the values of various such substances, but rather the profit generated by the production of a specific amount of energy—that of a barrel of oil or its equivalent.

Table 2 provides the proportions of BOE production for COP in Alaska, the Lower 48 states, and combined international jurisdictions. Over the years 2000 to 2010, Alaska operations accounted for an average of about 24 percent of the company's BOE production, as illustrated in Figure 2. Over the same timeframe, COP earned an average profit of over $15 per BOE in Alaska, compared to roughly $10 per BOE for its global operations. As Figure 3 shows, net income per BOE in Alaska over recent years has been both substantially higher and less volatile than that in other states and international operations.

We hope this is helpful. If you have questions or need additional information, please let us know.

[1] All dollar figures are rounded.



[2] Please note that the amount of energy provided by a given amount of crude oil (or any fuel) varies by production location or, more precisely, the grade of oil produced. Therefore, BOE figures should be viewed as estimates.

[3] For example, the BOE of natural gas is typically cited at roughly 5,800 cubic feet (cf), or 5.8 thousand cubic feet (Mcf). At today's prices (Alaska North Slope [ANS] crude spot prices and national average wellhead price for natural gas), one barrel of ANS is worth nearly $123 while the BOE of 5.8 Mcf of natural gas is valued at just over $18.

International	40.4%	32.7%	45.1%	57.6%	56.1%	59.0%	58.2%	52.5%	56.2%	65.9%	58.9%	**53.0%**

Notes: "Barrel of oil equivalent" expresses the amount of a given fuel required to equal the amount of energy contained in one standard U.S. barrel of crude oil (42 gallons). For instance, a generally accepted BOE approximation for natural gas is 5,800 cubic feet (5.8 Mcf). Please note, however, that the amount of energy provided by a given amount of crude oil (or any fuel) varies by production location or, more precisely, the grade of oil produced. Therefore, BOE figures should be viewed as estimates. The figures in this table are the results of dividing net income by the aggregate BOE production of oil, natural gas, and natural gas liquids.

Figure 3: ConocoPhillips: Net Income per Barrel of Oil Equivalent

To: Rep. Paul Seaton

From: Roger Marks

Date: March 9, 2012

Re: Jurisdictions that Require Separate Accounting - Revised

Per your March 1 request to Rep. Hawker, the following discusses the jurisdictions both international and domestic that require separate accounting for deriving taxable income for oil and gas corporate income taxes. This memo supersedes my March 7 note.

At the national level, of the 57 countries in BP's 2011 "Statistical Review of World Energy"[1] that produce either a minimum of 80,000 barrels per day of oil, or 0.1 billion cubic feet per day of gas (see attached), nearly all of them impose a corporate income tax.[2] (Iran, Libya, Mexico, and Trinidad and Tobago do not.)

At the national level, in all cases the tax is calculated on a separate accounting basis. This takes one of three different forms. In some cases the taxable income is ring fenced on a project basis or an area basis. In some cases taxable income is based on the worldwide income of the domestic producers (recognizing foreign taxes paid). And in some cases the taxable income is based on domestic sourced income. But again, in all cases, a separate accounting approach is used to derive taxable income for corporate income taxes at the national level.

At the sub-national level, there are only two instances where political subdivisions are empowered to levy corporate income taxes: the United States (state level) and Canada (provincial level). In most other nations local income is usually raised through either gross proceeds taxes, or indirect taxes such as sales or property taxes.

In the U.S. there are 24 oil producing states that have a corporate income tax. Twenty-two of them use apportionment. In general they use payroll, sales, and property factors. Some states use equal weight for all three factors. Some give greater weights to some factors over others. Some do not use all the factors. Only Alaska uses an extraction (production) factor to derive oil and gas income (in lieu of payroll). (This is tied up in the history of the relationship between the state corporate income tax and the production tax in Alaska.)

Some of these states use worldwide income to apportion. Some use water's edge.

In one of these states, Louisiana, the taxpayer can solicit the state to use separate accounting if a) it can demonstrate apportionment yields an unfair result, b) the unit of the taxpayer's business operating in the state could be successfully operated independently of the units in other states, c) the unit makes all of its sales in the state or derives all of its gross revenues from sources in the state, *and* d) any merchandise or products sold by the unit in the state are either i) produced by

---

[1] BP Statistical Review of World Energy, June 2011

[2] Sources: Ernst & Young, KPMG. Van Meurs, Wood Mackenzie

the taxpayer in Louisiana, ii) purchased by the taxpayer from nonaffiliated sources, iii) purchased from an affiliated source at not more than the price at which similar merchandise or products in similar quantities could be purchased from nonaffiliated sources, *or* iv) transferred from another department of the taxpayer's business at not more than the actual cost to the taxpayer. It is unclear how many taxpayers, if any, are doing this, but I would opine that given the criteria, most major integrated producers would not qualify for separate accounting.

Two states use separate accounting for oil and gas: Mississippi and Oklahoma.

In Canada the provinces apportion worldwide income using a 50/50 sales/payroll factor formula.

Source: includes data from Cedigaz.

Notes: As far as possible, the data above represents standard cubic metres (measured at 15°C and 1013 mbar); because it is derived directly from tonnes of oil equivalent using an average conversion factor, it does not necessarily equate with gas volumes expressed in specific national terms.

Annual changes and shares of total are calculated using million tonnes of oil equivalent figures.

Natural gas production data expressed in billion cubic feet per day is available at www.bp.com/statisticalreview

SB 201:

Separate Accounting of Income Taxes For the oil and Gas Industry

Fact Sheet

- This bill would re-institute the separate accounting method of calculating corporate income tax paid by the oil industry.

- Since oil production in Alaska began, the state has been strongly urged by industry to use a proportion of worldwide profits or a "unitary tax" method for calculating their income tax.

- In 1978, Alaska realized that we were losing significant revenue under the "unitary" system, so the legislature passed Separate Accounting. Under Separate Accounting, revenues generated in Alaska, less expenses, were the basis for the 9.4% state corporate income tax.

- The oil companies sued. They lost in the lower court and appealed to the State Supreme Court.

- Four years late, the State reverted to the old unitary system because the legislature feared there was a potential cost of $1.8 billion if we lost. At the time the legislature saw that as too great a potential liability with the 1981 treasury balance.

- However, in 1985 the state won on all points at the Alaska Supreme Court, and the United States Supreme Court declined the oil companies' appeal request, stating there was no federal issue.

- Unfortunately, separate accounting has never been reinstated.

- For years, the companies have said they could not do separate accounting since they did not track their revenues and costs that way. While that may have been true under the old ELF gross tax system, it is not true under the profit-based PPT or ACES.

- We also now know they do 'separate accounting' for other oil provinces.

- If we take just the $1.8 billion (the difference between income tax revenue generated under the unitary system and separate accounting between the years 1978-1981) and divide that by four years, it equals an underpayment of $450 million per year.

- Multiply that by 30 years, and the state may have lost up to $13.5 billion (more than the total unfunded liability for the PERS/TRS systems).

- In 2000, the Department of Revenue estimated that we had lost $4.7 billion between 1982 and 1997.

- Recently international oil industry consultant Pedro Van Meurs testified to the legislature that he believes the unity tax method is cumbersome, an obstacle to new investment, and not in the state's best interest.

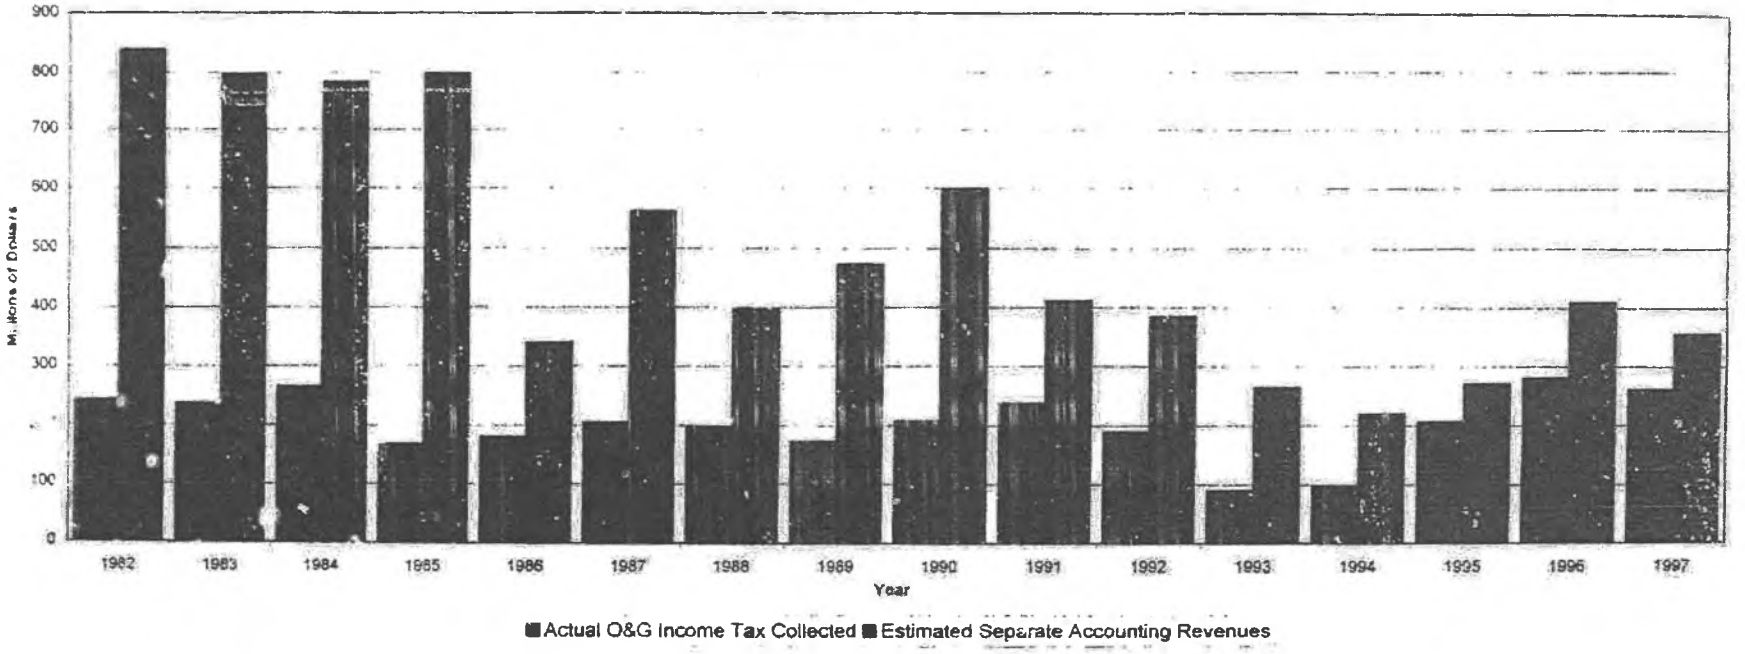
- As oil industry representatives have recently said that Alaska has comparatively strong cash margins, it appears the state may still be losing revenue under the unity tax method.

- The income tax oil companies pay in Alaska may be effectively lowered by less profitable investments around the world. Conversely, if oil development in Alaska is less profitable than elsewhere, as some have stated, this would result in a tax cut for the oil industry.

- Small Alaska-based businesses pay corporate income taxes based on their Alaska earnings. For simplicity and equity, multinational oil companies should do the same.

Variables in Net Income Calculation under Separate Accounting (AS 43.21)

Separate Accounting applied a 9.4 percent tax rate to oil companies' net income. Statutes defined net income as gross income minus the following:



- Royalties;
- Production Taxes;
- Transportation Costs;
- Oil and Gas Conservation Taxes;
- State and Municipal Property Taxes;
- Direct Operating Costs;
- Depreciation of property (production equipment);
- Amortization of lease acquisition payments and property taxes, including capitalized interest on property incurred before commencement of production;
- Interest expenses not capitalized during construction, limited to the sum of total interest paid multiplied by the total value of the corporation's real and tangible property used for production divided by the value of all real and tangible property of the consolidated business (group of corporations holding ownership control). Such limitation does not apply if the corporation can show that the amount paid exceeds the result of the calculation described above;
- Expenses incurred for failed exploration (costs recoverable are for acquisition of abandoned properties, dry holes, and geologic / geophysical exploration);
- Overhead and administrative costs limited by the same multiplier as for interest expenses;
- Income divided among Native Corporations under ANCSA; and
- Federal windfall profits tax on oil under IRS Code Section 4986, which was repealed in August 1988.

Source: 1986-97 calendar year data from DOR letter D. Dickinson to J. Donohue Sept. 23, 1999; 1982-85 fiscal data is from DOR report dated Oct. 31, 1985, Wright to Nordale, In re HB353; data for second half of 1985 not available at this time.

Comparison of Actual Oil and Gas Corporate Income Tax Collected with Estimated Revenues using a Separate Accounting Income Tax Approach Assuming Existing AS 43.20 Rate

Source: 1986-97 calendar year data from DOR letter, D. Dickinson to J. Donohue, 9/23/99; 1982-85 fiscal data is from DOR report dated 10/31/85, Wright to Nordale, in re HB353. Data for second half of 1985 not available at this time. Since the actual income tax collections for FY82 (the phase out year) included revenue from both separate accounting and modified apportionment, the actual income tax collections for FY82 depicted on the chart includes an estimate of revenue from modified apportionment as if it had been in effect for the entire fiscal year.

Alaska is close to Eagle Ford at nearly twice the global portfolio average margin. Therefore, comparative oil profits do not explain the low reinvestment rate for Alaska. The companies tell us that each has its own 'hurdle rate' for return on investment before a project can be profitable enough to be selected for investment. Obviously, nearly double the margin of funded projects pass that test.

We now know that the upstream cost for ConocoPhillips is only $15.48/bl in Alaska instead of the assumed $20/bl. This means that an additional $4.52 per barrel is added to the typical company margin, making ConocoPhillips' Alaska Margin **$48.02/bl.**

"On average, it costs ConocoPhillips $15.48 to produce a barrel of oil in Alaska" – Mary Ann Kah, ConocoPhillips' Chief Economist
January 15th, 2012 Alaska Journal of Commerce *Slope producers lay out scenario with proposed oil changes*

Annual Report

Fiscal Year 2011

Available online at www.tax.alaska.gov

Corporate Income Tax AS 43.20

Description
Alaska levies a corporate income tax on Alaska taxable income.

For purposes of computing taxable income, Alaska, like many states, adopts the federal Internal Revenue Code (IRC) by reference, unless excepted to or modified by specific Alaska statutes.

For a corporation doing business only in Alaska, its taxable income is federal taxable income with certain Alaska modifications.

A corporation that does business both inside and outside Alaska apportions a percentage of the corporation's total income to Alaska using a formula. The Alaska percentage or "apportionment factor" is an average of three factors: property, payroll, and sales, inside and outside the state.

When a corporation is part of a group of corporations that operates as a unit to conduct a business, the taxpayer must apportion to Alaska a percentage of the combined incomes of all of the corporations in the "unitary" or "combined" group.

Corporate income is taxed at graduated rates ranging from 1 percent to 9.4 percent.

For unitary groups that are not oil and gas companies, Alaska adopts "water's edge combination." The combined group generally includes only those corporations with significant U.S. activity.

Oil and gas companies combine on a worldwide basis. Also, oil companies use a "modified" apportionment formula of property, sales, and extraction. The extraction factor is the production of oil and gas in Alaska divided by production everywhere.

Rate
Alaska taxes corporate income at graduated rates ranging from 1 percent to 9.4 percent divided over 10 tax brackets.

Returns and Payments
Corporations file returns annually, with the return due three and one-half months after the close of the tax year, one month after the federal tax return is due. Alaska honors the federal filing extensions.

Corporations must make quarterly estimated payments and the total tax is due two and one-half months from the end of the tax year. There are no extensions to pay the tax. Estimated payments of more than $100,000 and payments accompanying a return greater than $150,000 must be made online or by wire transfer.

Exemptions
Generally, Alaska follows the IRC when determining an entity's taxable status.

Alaska adopts the flow-through federal provisions that exempt S-Corporations from tax. Federally, S-Corporations are treated as partnerships and S-Corporation shareholders report their proportionate share of the corporation's earnings.

Alaska treats Limited Liability Companies (LLCs) as partnerships if they file as partnerships federally. Electric and telephone cooperatives pay tax under AS 10.25 and are exempt from the corporate income tax.

Credits
Under Alaska's blanket adoption of the IRC, taxpayers can claim all federal incentive credits. Federal credits that refund other federal taxes are not allowed. Multistate taxpayers apportion their total federal incentive credits. Alaska specific credits include:

Education - Taxpayers that contribute to Alaska two-year or four-year universities or colleges for direct instruction, research or educational support purposes or school district/ state-operated vocational technical education and training schools may claim a tax credit for 50% of the first $100,000, 100% of the contribution over $100,000 and up to $300,000 and 50% of the remaining amount over $300,000. The total allowable credit may not exceed $5 million.

Minerals Exploration Incentive - Taxpayers may claim a credit for 100% of eligible costs of exploration activities related to determining existence, location, extent, or quality of a locatable mineral or coal deposit. An approved exploration incentive credit may not exceed $20 million and must be applied within 15 tax years after the credit is approved. Application of the credit is limited to the lesser of 50%of the taxpayer's mining license tax liability or 50% of its corporate tax liability.

Oil and Gas Exploration Incentive - Taxpayers may take a credit for up to 50% on state land (or 25% on non - state lands) of eligible oil and gas exploration costs. An approved oil and gas exploration incentive credit may not exceed $5 million per project and is limited to $30 million per taxpayer. Taxpayers may apply the credit against 100% of corporation net income taxes due.

Gas Exploration and Development - Taxpayers may take a corporate income tax credit for 10% of qualifying expenditures incurred in exploration and development of natural gas reserves in Alaska, except for the North Slope. The credit may be applied against 50% of the tax liability. Beginning 1/1/2010 this credit is increased to 25% and it may be applied against 75% of the tax liability.

Gas Storage Facility Tax Credit - Taxpayers may take a credit for costs incurred to establish a gas storage facility in Alaska. The available credit is $1.50 per 1,000 cubic feet of gas storage capacity, with a maximum credit available of $15,000,000 or 25% of costs incurred to establish the facility. This is a refundable tax credit.

Film Production - Taxpayers may take a credit for certain expenses incurred in producing films in Alaska. The credit varies from 30% to 44% and is administered by the Alaska Department of Commerce, Community, and Economic Development (DCCED) in cooperation with the Department of Revenue. This credit may be transferred.

Disposition of Revenue - The Division deposits most corporate net income tax collections into the General Fund. For oil and gas corporations only, the Division deposits collections from audit assessments into the Constitutional Budget Reserve Fund.

History

1949 - The territorial legislature enacts the Alaska Net Income Tax Act. It is 10% of the federal income tax liability on income earned in Alaska. The tax applies to individuals and corporations.

1959 - Alaska adopts the Uniform Division of Income for Tax Purposes Act (UDITPA) within AS 43.20. This is a model statute that was developed by the states to address concerns of the U.S. Congress that states were collectively taxing more than 100% of the earnings of multistate corporations. UDITPA requires multistate corporations to apportion a percentage of their total income to the state by the apportionment formula of property payroll and sales. The standard UDITPA formula apportions 100% of the corporation's

A voter initiative passed in August 2006 subjects cruise ship operators to the Alaska corporate income tax.

income among the states where the taxpayer does business.

1970 - Alaska enacts the Multistate Tax Compact in AS 43.19, and becomes one of the early members of the Multistate Tax Commission. The Compact incorporates the standard three-factor apportionment formula of UDITPA. A main purpose of the Compact and the Commission is to promote the enactment of UDITPA, and the uniform application of UDITPA apportionment formula by the states. Uniform application of UDITPA promotes the full reporting of income by taxpayers and avoids the taxation of the same income by more than one state.

1975 - The legislature repeals the original tax and makes major revisions. Alaska enacts its own tax rates rather than basing the tax on the federal tax liability. Alaska adopts the federal Internal Revenue Code ("IRC") by reference, unless excepted to, or modified by other Alaska statutes. The tax rate was 5.4% of Alaska taxable income with a surtax of 4% based on federal surtax exemptions. For 1975, the surtax exemption was $50,000.

1978 - The legislature finds that the standard three-factor apportionment formula does not fairly reflect Alaska income for oil and gas corporations. Alaska enacts AS 43.21, and requires oil and gas companies to calculate Alaska taxable income using separate accounting. The oil and gas companies challenge AS 43.21.

1980 - The legislature repeals the parts of AS 43.20 that impose the individual income tax and retains the exemption for S-Corporations.

1981 - In an effort to stem the growing amount of disputed oil and gas income taxes and related litigation, the legislature seeks a compromise tax method. The legislature repeals separate accounting under AS 43.21, and enacts AS 43.20.072, the current "modified" apportionment formula for oil and gas corporations. The modified formula drops the payroll factor and adds the "extraction factor." The legislature also enacts the current graduated tax rate structure with a maximum rate of 9.4%.

1987 - The legislature enacts the Alaska Education Credit.

1991 - The legislature enacts "water's edge apportionment" with AS 43.20.073. Water's edge apportionment does not apply to oil and gas taxpayers, who continue to report on a worldwide basis.

1998 - The Department of Revenue wins the OSG Bulkships case. The Alaska Supreme Court holds that AS 43.20 does not adopt the IRC Section 883 by reference. Federally, Section 883 exempts from tax foreign corporations that operate ships and aircraft, and avoids double taxation. The Court says that formulary apportionment in AS 43.19 also avoids double taxation and therefore AS 43.19 is an exception to Section 883. During the next session, the legislature specifically adopts Section 883 and grants explicit tax exemption to the foreign corporations operating cargo ships, cruise ships, and aircraft in Alaska.

2006 - A voter initiative that subjects cruise ship operators to Alaska corporate income tax passes in August 2006. Prior to the initiative, cruise ship operators were exempt from taxation through the Department's adoption of IRC Section 883.

2008 - The legislature amends the education credit provisions to include cash contributions accepted for secondary level vocational courses and programs by a school district in Alaska, and by a state-operated

vocational technical education and training school.

The legislature authorizes tax credits for qualified film production expenditures incurred in Alaska. Tax credits may be sold, transferred, exchanged, or conveyed, and must be used within three years after being granted by DCCED. The maximum of credits claimed by all taxpayers over the life of the credit program may not exceed $100 million.

2010 - The legislature amends the education credit by increasing the maximum credit allowed from $150,000 to $5 million effective January 1, 2011. In addition, the legislature expands contributions eligible for the credit to include contributions made for construction and maintenance of facilities by state operated vocational education schools and two or four-year colleges. The increase in the credit from $150,000 to $5 million expires December 31, 2013. On January 1, 2014, the maximum credit allowed will revert to $150,000.

The legislature expands the Gas Exploration and Development Credit, increasing it from 10% to 25% effective January 1, 2010. The utilization limit was raised from 50% to 75% of the tax liability.

The legislature authorizes tax credits for expenditures to establish gas storage in Alaska. The available credit is $1.50 per 1,000 cubic feet of gas storage capacity, with a maximum credit available of $15,000,000 or 25% of costs incurred to establish the facility. This is a refundable tax credit.

2011 - The legislature enacted legislation extending the date that the $5 million annual education credit limit expires from January 1, 2014 to January 1, 2021. It is then scheduled to return to $150,000. In addition, the legislature expanded contributions eligible for the credit to include contributions made after June 30, 2011 to annual intercollegiate sports tournaments, Alaska Native cultural or heritage programs for public school staff and students, and a facility in the state that qualifies as a coastal ecosystem learning center under the Coastal American Partnership.

Note: This figure shows the amount of total tax liability as reported on original corporate income tax returns filed during FY 2011. The Tax Division accounts for, and reports revenue based on receipt date of payments. Corporate taxpayers are required to make estimated tax payments throughout the year. Therefore, corporate income tax revenue reported in Figure 3 and this figure may be different. The difference between revenue reported in the two figures is due primarily to estimated tax payments received in a preceding or subsequent fiscal year.

Oil tax proposal harkens to the past

Anchorage Daily News (AK) - Sunday, February 26, 2006

Author: *GREGG ERICKSON COMMENT ; Commentary*

Gov. Frank Murkowski has rolled out his new oil and gas tax legislation. Administration officials describe the scheme as a wonderful innovation, designed to rationalize Alaska's oil taxes for the next 30 years.

Why 30 years? Because that's the duration of the "no-changes" promise Exxon Mobil and BP say they must have under the Stranded Gas Act if they are to agree to fiscal terms on a gas line.

"The oil companies have asked us to pass this new tax because they want certainty," explained Senate Resources Committee Chair Tom Wagoner, R-Kenai.

Legislators, even those like Wagoner, who is usually super-friendly to oil companies, are starting to worry where this may be heading. "I've told the oil companies that I will not lock up an oil tax for 30 years," he said.

That's a sensible caution. Whether legislators can legally lock in a taxing scheme is so constitutionally crazy that it suggests the companies could be assuming the "stranded gas" process will fail. From their perspective, that's not such a bad outcome. Exxon has said it wants Alaska to wait until the company has a pipeline to its Canadian gas reserves in the Mackenzie Delta. Waltzing Murkowski and legislators down a years-long garden path to a dead end could fit right in with its plans for delaying development of Alaska gas.

Setting aside the motives that may have put it on the table, the principle behind Murkowski's tax legislation makes sense. Hardly anyone in Juneau realizes it, but stripped of its industry-favoring "incentives," Murkowski's proposal is nearly identical to the "separate-accounting" oil and gas income tax the state adopted in 1978. The history of Alaska's experiment with separate accounting suggests that a cleaned-up version of the governor's tax could serve the state well for a long time.

Before separate accounting, the oil companies -- masters of tax avoidance -- were able to escape paying state corporate income tax on roughly three-quarters of their Alaska oil profits. Separate accounting and Murkowski's proposed tax on petroleum profits rely on a simple concept: If the companies keep a separate set of books for Alaska, we can make sure their taxes reflect their real profits.

The 1978 separate-accounting law took only 9.4 percent of oil profits for the treasury, but the plan raised more money than its proponents dreamed, largely because the new system responded with ruthless efficiency to the effect of rising oil prices on profits. From 1978 to 1981, when the tax was repealed, oil prices quadrupled, while the state's corporate tax revenue from oil producers soared, growing from less than $21 million in fiscal 1978 to $860 million in fiscal 1981.

Oil producers spared no effort to defeat the system, filing multiple lawsuits, and eventually taking their claims of Alaska's "overreaching" to the U.S. Supreme Court. They lost in every venue.

In 1981, however, the companies helped engineer a late-session leadership coup in the state House: Al Adams, D-Kotzebue, three other rural representatives and Russ Meekins, D-Anchorage, bolted from the 22-member Democratic majority and joined a Republican-Libertarian coalition, ousting House Speaker Jim Duncan and replacing him with Republican Joe Hayes. The new speaker replaced Democrat Tony Vaska with Republican Rick Halford on a crucial conference committee. Halford (who later claimed he was duped by the industry) joined with the other House Republican, and on June 17, 1981, the conference committee accepted the Senate's proposal to replace separate accounting with a modified severance tax.

Revenue Commissioner Tom Williams, now a tax attorney for BP, and the man who later dreamed up the concept of the state's Stranded Gas Act, told Gov. Jay Hammond the change would likely have little effect on

revenues and persuaded the governor not to veto the bill.

State economists later calculated the change from separate accounting cost the state billions. Gov. Steve Cowper, elected in 1986 -- a year marked by the oil-price collapse to $6.50 per barrel -- was feeling the pinch as he tried to craft his first budget. Cowper asked his staff to give him options for raising revenue. They unanimously recommended a return to separate accounting, but that was not to be -- for reasons I will relate in this space next Sunday.

Gregg Erickson of Juneau was director of research for the Legislature during 1975-1979, and later served as chief economist in the office of then-Gov. Steve Cowper. Erickson's e-mail is gerickso@alaska.com.

State oil tax struggle is nothing new

Anchorage Daily News (AK) - Sunday, March 5, 2006

Author: *GREGG ERICKSON COMMENT ; Commentary*

When newly elected Gov. Steve Cowper took office in December 1986, he found himself facing a crisis. Oil prices had taken a huge nosedive during 1986, and so had state revenue. "Basically the government was going to shut down in the middle of next year unless something happened," Cowper recalled. "The first thing I thought was to troop out every revenue measure that was in bounds."

Cowper's advisers, led by Revenue Commissioner Hugh Malone, suggested a separate accounting income tax on petroleum companies, a tax very similar to the measure Gov. Frank Murkowski introduced last month. The state had a separate accounting oil tax in 1978, and it worked well, but under pressure from the oil industry the measure was repealed three years later, in 1981. The dramatic events surrounding that repeal, which I described last Sunday, were a watershed in Alaska political life.

Unlike so many other oil-rich countries and provinces, Alaskans had chosen to maximize their state's cash income from the industry, rather than jobs for workers or fat contracts for local businesses. And Alaskans sought development of the state's oil and gas resources by offering them on an intensely competitive, level playing field. No sweetheart deals.

Because of these choices, Alaskans were able to increase their share of oil profits from less than 20 percent in the 1960s to over 35 percent at the end of the 1970s, establish a Permanent Fund to save oil money for future generations, and build billions worth of infrastructure.

That changed in 1981. The Alaska oil industry, increasingly concentrated in the hands of three companies, set about a campaign to mold Alaskans' aspirations away from cash income for the government, and toward jobs and contracts, but they didn't do this alone. A growing number of Alaska households did not know or much care about Alaska's history of capitalist exploitation, and many of these households were directly dependent on oil industry jobs. Most of all, a growing percentage of Alaskans -- including Steve Cowper -- were seeing the growth of state government as a self-serving reaction to overabundant oil revenue rather than an appropriate governmental response to real needs.

Cowper went into the 1986 campaign firmly against raising industry taxes. "I was not interested in beating on the oil companies," he now recalls. Facing a post-election crisis, he took a pass on separate accounting, proposing a personal income tax. That went nowhere, but fortunately, oil prices rose. Together with budget cuts, that averted the predicted fiscal crunch.

Oil prices continued to gyrate, however, and state revenue was further eroded by a delayed-action tax break the oil industry had inserted in the 1981 bill that repealed separate accounting. The delayed tax break, effective in 1987, caused severance tax revenue to drop abruptly. Again squeezed by falling revenue, Cowper's advisers suggested just fixing the severance tax. Nobody really liked the idea, but it was the only thing that looked as if it had even a chance of flying in the Legislature.

In the first months of the 1989 session, the proposed severance tax change, which modified the economic limit factor, foundered as climbing oil prices relieved some of the fiscal stress. But in March, the Exxon Valdez oil spill caused an opposite shift. People, particularly were mad at the industry those from coastal areas.

The tax passed the House in April, but in May failed its initial Senate vote, 9-11. Malone, Cowper's chief strategist, knew that Sen. Mike Szymanski, one of the votes the industry was counting on to kill the measure, planned to switch at the last minute, but that would leave the tally at a 10-10 tie, one vote shy of passage.

Cowper seemed more optimistic. He'd had several heart-to-heart talks with Bethel Republican Sen. John Binkley. "I think he voted his district and his conscience," was how Cowper later explained Binkley's change of heart and vote.

The oil lobbyists were in shock. They tried to get Senate President Tim Kelly to hold the bill so they could try again on a vote to rescind, but Kelly, who was unhappy with the industry over the spill, had already sent the measure back to the House. Cowper signed it the next day.

Gregg Erickson of Juneau was director of research for the Legislature from 1975 to 1979, then served as chief economist in the office of Gov. Steve Cowper. E-mail, gerickso@alaska.com.

Eagle Ford could nudge Alaska for COP

ConocoPhillips' plans to invest $2 billion this year on liquids-rich shale plays could mean the Lower 48 edges out Alaska oil

Eric Lidji

For Petroleum News

ConocoPhillips' most recent quarterly report presented a typical view of the Houston major's exploration and production activities in the United States, but not a complete one.

Discussing the future with analysts in late March, company executives suggested that the balance between Alaska and the Lower 48 might be changing in the coming years.

For a while now, ConocoPhillips has earned more from its exploration and production activities in Alaska than it has in the Lower 48, sometimes a little and sometimes a lot.

Of the $2.7 billion the company earned from E&P worked in the United States last year, $1.7 billion came from Alaska and the rest came from the Lower 48. In the first quarter of 2011, the company earned $549 million in Alaska and $314 million in the Lower 48.

Those earnings don't reflect production levels, though.

ConocoPhillips produced 629,000 barrels of oil equivalent per day in the first

quarter, or 364,000 bpd of oil and natural gas liquids and 1.6 billion cubic feet of natural gas.

That production is lopsided by region. In the Lower 48, ConocoPhillips produced 150,000 bpd of oil and 1.5 billion cubic feet of natural gas per day, while in Alaska the company produced 214,000 bpd of oil and 67 million cubic feet of natural gas per day.

Alaska is usually more profitable for ConocoPhillips because oil trades at a premium to natural gas. And with the delivered price of Alaska North Slope crude oil at around $123 per barrel and Henry Hub at around $4.60 per mcf, that spread has rarely been wider.

So when you crunch the numbers, Alaska accounted for about 63 percent of ConocoPhillips' U.S E&P profits and 35 percent of its production in the first quarter.

COP investing in shale

That balance could flip in the next few years, though.

ConocoPhillips is investing heavily in three liquids-rich shale plays in the Lower 48 this year, the Eagle Ford of South Texas, the North Barnett of North Texas and the Bakken of North Dakota, and also plans to ramp up operations in the Permian basin of West Texas.

The company plans to spend $2 billion in those plays this year to produce some 170,000 barrels of oil per day by 2013, Greg Garland, senior vice president for exploration and production in the Americas, said at the March analysts meeting. That target, if achieved, would push the Lower 48 ahead of Alaska, both in terms of production and profits.

Like many companies, ConocoPhillips is incredibly bullish about liquids-rich Lower 48 shale right now and plans to drill 450 gross wells across the four plays this year. That's in addition to the 240 wells the company plans to drill in "other competitive areas."

13 rigs in Eagle Ford this year

In the Eagle Ford alone, ConocoPhillips budgeted $1.4 billion this year, with plans to run 13 rigs and three dedicated hydraulic fracturing crews to drill 144 wells on 220,000 acres with the goal of producing 30,000 boe per day by the end of the year, 75 percent liquids.

"The Eagle Ford is a game changer," Garland said. "It's a game changer for the industry and for our company."

In the Bakken, ConocoPhillips holds 460,000 acres with a resource potential of

400 million barrels of oil equivalent and more than 1,700 "high-value drilling opportunities."

ConocoPhillips expects to produce 20,000 boe per day from the Bakken this year.

ConocoPhillips budgeted $400 million in the Permian basin and North Barnett Shale this year. The company holds 65,000 acres with a resource potential of some 200 million barrels of oil equivalent in the North Barnett, and more than 1 million acres with a resource potential of 700 million barrels of oil equivalent in the prolific Permian basin.

ConocoPhillips expects to produce 65,000 boe per day from the two plays this year.

Alaska budget flat

By comparison, ConocoPhillips "will invest $350 million in exploitation this year, all at very good returns," Garland said. ConocoPhillips budgeted $900 million for capital expenses in Alaska this year, but expects actual spending to be somewhat lower.

"We expect ConocoPhillips Alaska's 2011 capital budget spending to be basically flat from 2010," ConocoPhillips spokeswoman Natalie Lowman told Petroleum News in February. "The 2011 capital budget includes contingency funding if we are successful in getting improvements in State fiscal terms, and resolving permitting issues with Alpine satellites." ConocoPhillips spent $730 million in 2010, its lowest level since 2007.

ConocoPhillips did not drill any traditional North Slope exploration wells this winter or last winter, but maintains ventures, such as the Alpine West satellite and Chukchi Sea prospects that it plans to pursue as soon as it overcomes permitting and legal hurdles.

Garland said ConocoPhillips still likes its "strong cash margins" in Alaska, as well as its "significant infrastructure position" and "extensive operating capability."

Shale plays remain immature

ConocoPhillips likes the Eagle Ford because of economics.

Garland said the play offered $45 per barrel margins last year, twice the average of ConocoPhillips' global portfolio. Since January 2010, well costs have fallen 40 percent.

Those plays face some obstacles, though, particularly in the short term.

Garland said that resources like rigs and hydraulic fracturing crews are "stretched

thin" in the Eagle Ford, and CFO Jeff Sheets said that some production in the Eagle Ford could remain shut-in until pipeline infrastructure catches up to drilling levels, around 2013.

Washington Post: How much do oil companies really pay in taxes?

By Steven Mufson, Published: May 11, 2011

Just how much do big oil companies pay in taxes?

Exxon Mobil says it pays plenty — more in U.S. taxes than it earned in the United States last year.

Not so, say critics of the oil industry; the Center for American Progress says the oil giant's effective federal income tax rate is about half the 35 percent standard for U.S. companies. The liberal-leaning think tank, citing Exxon Mobil's filings with the Securities and Exchange Commission, says the corporation didn't pay any federal income tax in 2009.

It all depends on how you count.

Exxon Mobil counts everything — not just federal income taxes, but also local property taxes, state taxes, gasoline taxes and payroll taxes. The Center for American Progress (CAP) and other analysts count only the company's federal corporate income taxes.

"We pay our fair share of taxes," said Kenneth Cohen, Exxon Mobil's vice president for public affairs, who in a conference call recently lumped more than $6 of sales, state and local taxes together with every $1 of federal income tax paid in 2010.

But Exxon Mobil's tax rate is "lower than the average American's," Daniel Weiss, an energy expert at CAP, countered in an analysis that put the company's U.S. federal income tax rate in 2010 at just 17.2 percent.

The tax debate may turn into the most combustible issue when top executives from five oil giants appear before a congressional committee on Thursday.

Most congressional Democrats and the Obama administration want to end or limit tax benefits — or tax breaks — for oil companies.

The provisions targeted include the industry's use of a tax break that since 2004 has trimmed the corporate tax rate for manufacturers; oil-depletion allowances that all but the biggest firms use to recover drilling costs, sometimes more than 100 percent of those costs; and the expensing of "intangible" drilling costs at a rate higher than that used by most non-oil companies to recover investment costs.

Those investment incentives have helped make the oil industry one of the most profitable, when measured by cash flow and return on investment. Soaring gasoline prices — as of Wednesday, $3.96 a gallon for regular nationwide — have revved up the issue.

"The oil companies charging these exorbitant prices are picking through New Yorkers' pockets through the tax code, collecting billions of dollars every year in unnecessary taxpayer subsidies," Sen. Charles E. Schumer (D-N.Y.) said Wednesday. "This is completely unacceptable, and those big oil companies should know that the jig is up."

But those tax incentives have survived previous political onslaughts. The expensing of intangible drilling costs — including exploration and development — dates to 1916. The oil-depletion allowance dates to 1926.

The idea of eliminating these tax breaks isn't new. In 1984, the Reagan Treasury Department's original tax reform blueprint got rid of the provisions, but it was never passed into law. Some breaks were later limited. The biggest firms, such as Exxon Mobil, have not qualified for the depletion allowance since the 1970s, but other large oil firms known as independents still do.

Deciphering how it all affects the bottom line isn't easy. Oil companies get credits in the United States for taxes paid to foreign nations where they produce crude oil. Exxon spokesman Alan T. Jeffers said there are 35 IRS agents who work full time auditing the company's books.

Rhetoric aside, Exxon and CAP agree on many figures. Jeffers conceded that the company had a net federal income tax credit of $156 million in 2009, but he says that was the result of favorable audits of returns dating back a decade or more.

Cohen highlighted "total taxes and duties to the U.S. government" of $9.8 billion in 2010. But only $1.3 billion of that went to federal income taxes, the company said in SEC disclosures used by CAP. While that's a big figure, worldwide income before taxes was $57 billion that year, and U.S. income was $7.7 billion.

Whether it's a good idea to get rid of the tax breaks has little to do with property taxes or how much companies collect and pass on to the government in gasoline, sales and payroll taxes, says Eric Toder, a tax expert at the Urban Institute.

"All corporations are big tax collectors," Toder said. "That's not really the issue."

Oil companies complain, and Toder agrees, that when it comes to the manufacturers' tax break, they are being unfairly targeted over something other businesses enjoy (although Toder questions whether any companies should get it).

"We don't characterize them as subsidies," said Kurt Glaubitz, a Chevron spokesman. "They're available to all companies in the oil industry and are similar to those in other industries." He said the manufacturers' tax allowance effectively cuts Chevron's corporate tax rate by two percentage points.

But Toder sees other tax incentives as unnecessary because they are designed to reward investments that are already richly rewarded, especially given high oil prices.

Exxon says that its profits are in line with what other companies make and that it earns just 9 cents on every dollar of sales. That, Cohen said, is a "number you won't hear in Washington."

"That's about half (or less) of what companies in pharmaceuticals or computers make, just to name a few," Cohen said on a company blog. "But strangely, there's not much talk about reducing their tax deductions."

But Wall Street analysts don't generally pay attention to that — and when Exxon talks to investors, it says they shouldn't, either. It tells them to watch the company's "return on capital employed," or ROCE. Those returns are huge — as high as 34 percent in 2008.

"The Corporation has consistently applied its ROCE definition for many years and views it as the best measure of historical capital productivity in our capital-intensive, long-term industry, both to evaluate management's performance and to demonstrate to shareholders that capital has been used wisely over the long term," Exxon said in an SEC filing.

Parsing Exxon's tax bill

The oil giant said it paid more in U.S. taxes than it made in U.S. profits as Congress debates cutting industry subsidies. Critics say Exxon's tax bill is far lower than it seems. By Steve Hargreaves, senior writerMay 4, 2011: 6:48 PM ET

NEW YORK (CNNMoney) -- Exxon Mobil wants to tell you something: It pays taxes. A lot of them.

In the first months of this year, Exxon (XOM, Fortune 500) says it paid $3.1 billion in taxes in the United States -- more than even the $2.6 billion in profit it made selling oil and gas.

To get to that number, the company includes the federal and state gasoline taxes that the company collects from drivers and passes on to government coffers. It also includes payroll taxes the company pays on behalf of its employees.

The company is highlighting its overall tax contributions to make a point: It wants Americans to see just how much the company and its activities add to the overall tax rolls.

"We are one of the largest taxpayers in the United States," said Alan Jeffers, an Exxon spokesman.

For Exxon -- and the oil industry overall -- the message is urgent.

Led by President Obama and key Democratic lawmakers, Congress is pushing to eliminate $4 billion a year in tax breaks enjoyed by the oil industry. With gas at $4 a gallon, it's not a popular time for politicians to defend oil industry subsidies. Even some top Republicans have recently suggested they might support eliminating the breaks.

Critics say Exxon Mobil and the industry is going too far in making its argument.

Big Oil's $38 billion defense

"They are counting taxes they don't pay," said Bob McIntyre, a director at Citizens for Tax Justice. "Payroll taxes are on the workers, sales taxes are on the consumers."

Throwing in those seemingly superfluous tax figures seems like an unnecessary move, especially considering that even without them the income tax the company pays is pretty high.

Exxon's average effective U.S. income tax rate over the last six years is about 29%, according to the firm's security filings and an interview with a top Exxon tax lawyer. It's one of the highest rates for any industry.

Jeffers said the company highlighted its overall tax contributions because it's important for people to see just how much the firm and its activities add to the overall tax rolls.

Exxon's income tax rate is below the 35% rate mandated by corporate tax law, but it's widely believed most U.S. companies don't pay that rate thanks to generous loopholes in the tax code.

0:00 /02:46'Age of cheap oil is over'

The loopholes are designed to let U.S. companies compete with their foreign counterparts, which often have a lower corporate tax rate.

Jeffers noted that Exxon's tax bill can fluctuate wildly from year to year. In 2008 the company paid over 35% of its profit to the government, while in 2009 it was near zero due to an overpayment from the year before. In 2010 it was about 18%.

Tax Justice Center's McIntyre said his own calculations show Exxon's tax rate over the last three years is a bit less than the company is claiming, although it's still in the same ball park.

Still, he said the industry has plenty of money and that what it pays in taxes is too low. McIntyre believes the oil industry should lose its $4 billion a year in tax breaks and that loopholes for companies in general should be closed.

"The oil industry is awash in tax subsidies, subsidies they obviously don't need," he said. "We have a budget deficit."

Jeffers said it's unfair to single out the oil industry and take away the tax breaks that other manufacturers enjoy. He noted that while the industry's profits seem large, its profit margins are about average and that it's only being singled out because gas prices are high.

If it's the deficit we're concerned about, Jeffers said opening up more areas to oil and gas drilling in this country would do more to add jobs and inject revenue into government coffers than simply upping the tax rate.

"Taxes don't create economic activity, they take from it," he said.

Jeffers and McIntyre might as well be proxies for the Republican House and Democrat-controlled Senate. In the next few weeks Democrats will push for an end to tax breaks and Republicans will call for more drilling.

Let the dogfight begin. ■

Exxon Says It Does Pay U.S. Income Taxes

Christopher Helman, Forbes Staff

Recently we published the story "What the Top U.S. Companies Pay In Taxes," and a related blog post, "Big Oil's Tax Bill." What's received the most attention from readers and bloggers was our assertion that ExxonMobil, despite recording more than $15 billion in income taxes, "paid none of its 2009 income taxes in the U.S."

Although I came up with that by reading the company's annual 10-k filing with the SEC, ExxonMobil spokesman Alan Jeffers assures me that this is wrong, that Exxon did indeed pay substantial income taxes to the U.S. Treasury in 2009, and that it overpaid taxes in 2008. How much? Well, Jeffers says so far he's not at liberty to disclose that information. "That's not something we're required to disclose, nor do we."

So what gives? Jeffers explains that what ExxonMobil reports in its annual consolidated financial statements is just accounting, that the numbers reflect expenses or credits recorded throughout the year and "do not represent our tax bill," which has not yet been filed, let alone settled. The financial results listed in the 10-k "is an accurate reflection of what it is, but not what you thought it was," says Jeffers.

What the financial statement says is that ExxonMobil, in 2009, after a handful of deferrals, recorded a total U.S. income tax benefit (i.e., a refund) of $46 million. Next to this, it shows total non-U.S. income taxes of $15.165 billion.

My mistake was in thinking that these figures somehow reflected actual tax benefits and liabilities. So what we should have written was that ExxonMobil "recorded" no U.S. income taxes for 2009 instead of "paid." All you re-bloggers out there, please note the clarification. Mea culpa.

And for all you commenters outraged that Exxon isn't paying taxes in the U.S., don't worry, it is. Our article only focused on income taxes, but it's worth noting that the 10-k also records $7.7 billion in other taxes in the U.S. (like sales taxes) and more than $50 billion of other taxes and duties paid (I mean recorded) overseas.

There's a lingering issue here. If Exxon's income tax line items don't mean what they say, then what does that imply about other important stuff? Are "earnings after income taxes," really $19.28 billion? Are earnings per share really $3.99? Does it all wash out? We've asked Exxon to explain and will let you know what they say.

What The Top U.S. Companies Pay In Taxes

Christopher Helman, 04.01.10, 3:00 PM ET

HOUSTON -

As you work on your taxes this month, here's something to raise your hackles: Some of the world's biggest, most profitable corporations enjoy a far lower tax rate than you do--that is, if they pay taxes at all.

The most egregious example is General Electric. Last year the conglomerate generated $10.3 billion in pretax income, but ended up owing nothing to Uncle Sam. In fact, it recorded a tax benefit of $1.1 billion.

Avoiding taxes is nothing new for General Electric. In 2008 its effective tax rate was 5.3%; in 2007 it was 15%. The marginal U.S. corporate rate is 35%.

How did this happen? It's complicated. GE's tax return is the largest the IRS deals with each year--some 24,000 pages if printed out. Its annual report filed with the Securities and Exchange Commission weighs in at more than 700 pages.

Inside you'll find that GE in effect consists of two divisions: General Electric Capital and everything else. The everything else--maker of engines, power plants, TV shows and the like--would have paid a 22% tax rate if it was a standalone company.

It's GE Capital that keeps the overall tax bill so low. Over the last two years, GE Capital has displayed an uncanny ability to lose lots of money in the U.S. (posting a $6.5 billion loss in 2009), and make lots of money overseas (a $4.3 billion gain). Not only do the U.S. losses balance out the overseas gains, but GE can defer taxes on that overseas income indefinitely. The timing of big deductions for depreciation in GE Capital's equipment leasing business also provides a tax benefit, as will loan losses left over from the credit crunch.

But it's the tax benefit of overseas operations that is the biggest reason why multinationals end up with lower tax rates than the rest of us. It only makes sense that multinationals "put costs in high-tax countries and profits in low-tax countries," says Scott Hodge, president of the Tax Foundation. Those low-tax countries are almost anywhere but the U.S. "When you add in state taxes, the U.S. has the highest tax burden among industrialized countries," says Hodge. In contrast, China's rate is just 25%; Ireland's is 12.5%.

Corporations are getting smarter, not just about doing more business in low-tax countries, but in moving their more valuable assets there as well. That means setting up overseas subsidiaries, then transferring to them ownership of long-lived, often intangible but highly profitable assets, like patents and software.

As a result, figures tax economist Martin Sullivan, companies are keeping some $28 billion a year out of the clutches of the U.S. Treasury by engaging in so-called transfer pricing arrangements, where, say, Microsoft's overseas subsidiaries license software to its U.S. parent company in return for handsome royalties (that get taxed at those lower overseas rates).

SB 201:

Separate Accounting of Oil and Gas Corporate Income Taxes

Senate Finance Committee
March 20, 2012

Senate Bill 201 would reinstate the separate accounting method of calculating corporate income tax paid by the oil and gas industry.

Under separate accounting, oil and gas companies pay tax on the income they earn within a particular jurisdiction as opposed to a share of their worldwide earnings.

This method is used by **EVERY** oil and gas producing nation in the world, including the United States, according to a March 9, 2012, analysis by Roger Marks, requested by LB&A.

It is also used by some U.S. states, including Oklahoma and Mississippi, and is offered as an option to O&G taxpayers in Louisiana.

Since oil production in Alaska began, the O&G industry has strongly urged the State to use a worldwide apportionment method for calculating their income tax.

- The O&G industry is the only industry in Alaska that uses this method.

- The income of other multinational corporations operating in Alaska is apportioned on a "water's edge" or U.S.-only basis.

- In the mid-70s, Alaska realized that it would lose significant revenue under the apportionment method.

- After 63 hearings and 4 years of analysis and debate, the legislature adopted separate accounting in 1978.

Under AS 43.21, revenues generated in Alaska, less expenses, became the basis for the 9.4% state corporate income tax.

The oil companies sued. They lost in the lower court and appealed to the State Supreme Court.

Four years later, in 1982, the State reverted to the apportionment system because the legislature feared a potential cost of $1.8 billion if Alaska lost.

12. The estimated total refund liability of the State is:

YEAR	ESTIMATED TOTAL REFUND LIABILITY
1978	$ 122,000,000
1979	311,000,000
1980	570,000,000
1981	821,000,000
TOTAL	$1,824,000,000

Further your affiant saith naught.

Robert D. Heath, Commissioner
Department of Revenue

SUBSCRIBED AND SWORN TO before me this 27th day of April, 1984.

At the time, the legislature saw that as too great a liability, given the treasury balance in 1981.

However, two years later, the state won on all points at the Alaska Supreme Court, and in 1986, the United States Supreme Court declined the oil companies' appeal request, stating there were no federal issues.

Separate accounting has never been reinstated.

In 2000, the Department of Revenue estimated that Alaska lost $4.7 billion between 1982 and 1997 because of the switch from separate accounting to apportionment.

Comparison of Actual Oil and Gas Corporate Income Tax Collected with Estimated Revenues using a Separate Accounting Income Tax Approach (In Millions)

	Actual O&G Income Tax Collected	Estimated Separate Accounting Revenues	Difference
1982	242.50	837.62	595.12
1983	236.00	796.15	560.15
1984	265.10	782.86	517.76
1985	163.60	797.00	628.40
1986	181.00	341.00	160.00
1987	205.00	562.00	357.00
1988	198.00	396.00	198.00
1989	174.00	473.00	299.00
1990	208.00	598.00	390.00
1991	237.00	410.00	173.00
1992	189.00	385.00	196.00
1993	90.00	264.00	174 00
1994	98.00	219.00	121.00
1995	206.00	270.00	64.00
1996	281.00	408.00	127.00
1997	259.00	355.00	96.00
TOTALS	**$3,238.20**	**$7,894.63**	**$4,656.43**

The DOR fiscal note for this bill also estimates that Alaska is losing about $250 million a year due to its use of worldwide apportionment as opposed to separate accounting.

Statements made over the past decade by oil industry executives support the conclusion that Alaska loses income using formulary apportionment.

" ... Norway, the U.K., **Alaska**, Indonesia, all have relatively high, higher than average margins."

Jeffrey Wayne Sheets, CFO and Senior VP of Finance for ConocoPhillips, in a 2011 Q3 conference call.

"Talk about Alaska, we like Alaska. . . . Last year 240,000 BOE a day, **strong cash margins** in this area ... We'll invest $350 million in exploitation this year, all at **very good returns**."

From Greg Garland, Senior Vice President of Exploration and Production for the Americas with ConocoPhillips. Said on March 23, 2011.

" ... Alaska's role in BP' s portfolio is to provide a **stable production base and cash flow to fuel growth elsewhere** in the business while **improving margins and returns**."

Alaska Business Unit, Mid-Stream Alaska, Trans-Alaska Pipeline Pump Station Electrification Decision Support Package – Sanction, February 9, 2004, page 13

These statements are confirmed by information contained in Securities and Exchange Commission filings, which show that per BOE earnings in Alaska for ConocoPhillips are nearly double what they are in the Lower 48 or the rest of the world.

A Legislative Research report issued yesterday compares net income per BOE from Alaska, the Lower 48 and the rest of the world from 2000-2010.

- Alaska average: $15.10
- Lower 48 average: $8.79
- Rest of world average: $8.57

One cause of this difference in net income per BOE is lower value gas production in other jurisdictions intermingled with higher value oil production. But this intermingling is exactly what occurs with formulary apportionment.

Figure 3: ConocoPhillips: Net Income per Barrel of Oil Equivalent

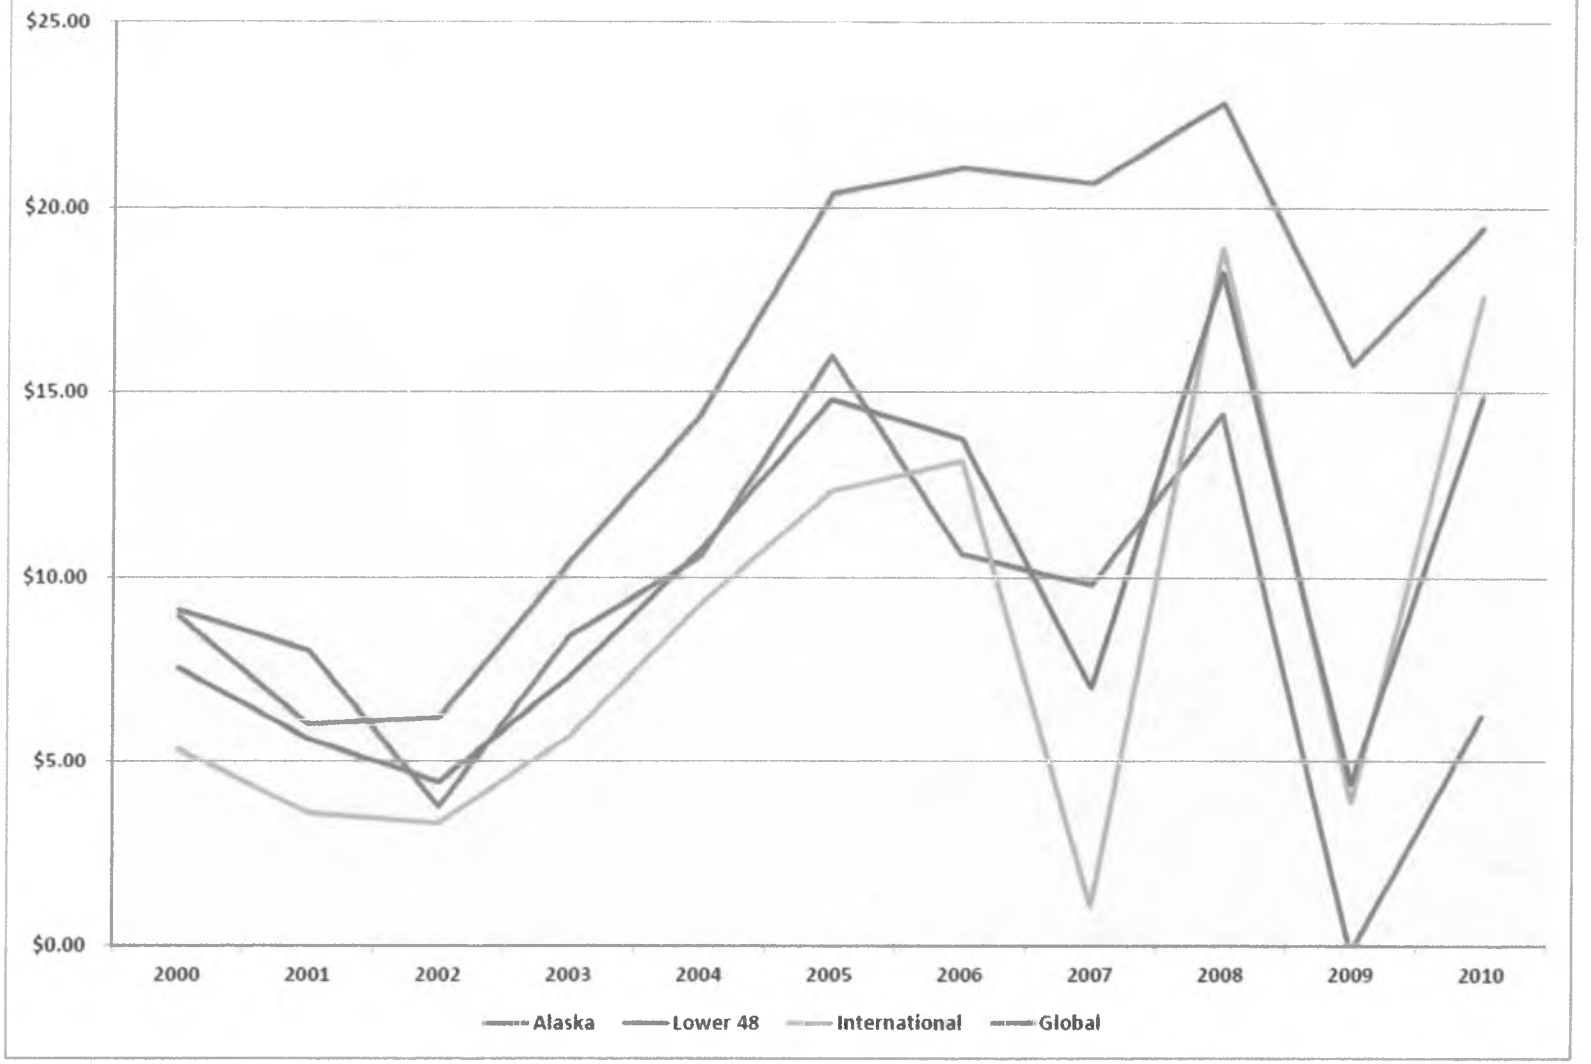

Table 2: ConocoPhillips: Net Income per Barrel of Oil Equivalent (BOE)

Jurisdiction	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	Average
Alaska	$8.97	$6.01	$6.19	$10.43	$14.36	$20.38	$21.08	$20.66	$22.84	$15.73	$19.47	**$15.10**
Lower 48	$9.13	$8.02	$3.77	$8.42	$10.56	$15.96	$10.63	$9.80	$14.39	($0.20)	$6.26	**$8.79**
International	$5.35	$3.61	$3.33	$5.69	$9.27	$12.33	$13.17	$1.06	$18.96	$3.89	$17.62	**$8.57**
Global	$7.54	$5.62	$4.43	$7.32	$10.75	$14.79	$13.73	$7.02	$18.26	$4.39	$14.86	**$9.88**
Proportion of BOE Production												**Average**
Alaska	35.9%	47.6%	35.6%	23.6%	24.1%	22.0%	15.5%	16.6%	15.5%	11.9%	14.4%	**23.9%**
Lower 48	23.8%	19.6%	19.2%	18.8%	19.8%	19.1%	26.2%	30.9%	28.3%	22.2%	26.7%	**23.1%**
International	40.4%	32.7%	45.1%	57.6%	56.1%	59.0%	58.2%	52.5%	56.2%	65.9%	58.9%	**53.0%**

Notes: "Barrel of oil equivalent" expresses the amount of a given fuel required to equal the amount of energy contained in one standard U.S. barrel of crude oil (42 gallons). For instance, a generally accepted BOE approximation for natural gas is 5,800 cubic feet (5.8 Mcf). Please note, however, that the amount of energy provided by crude oil (or any fuel) varies by production location or, more precisely, the grade of oil produced. Therefore, BOE figures should be viewed as estimates. The figures in this table are the results of dividing net income by the aggregate BOE production of oil, natural gas, and natural gas liquids.

Source: Legislative Research calculations based on annual filings of form 10-K with the U.S. Securities and Exchange Commission posted to the EDGAR online database, *http://www.sec.gov/edgar/searchedgar/webusers.htm* .

Recently international oil industry consultant Pedro Van Meurs testified to this committee that he believes worldwide apportionment is cumbersome, an obstacle to new investment, and not in the state's best interest.

Pedro Van Meurs: "I have always been in favor of calculating the Alaska portion of the corporate income tax entirely on the revenues and costs attributable to Alaska and not to any other part of the world."

Pedro Van Meurs on worldwide apportionment: "It messes up significantly the Alaska possibility for giving these kind of incentives, making these kind of rules, allowing international companies to benefit."

Pedro Van Meurs on apportionment: "It makes the tax system very cumbersome to run. In fact, it is actually an obstacle to investment in Alaska because it is very difficult to explain to any newcomer how you even have to calculate your state corporate income tax."

Pedro Van Meurs concluding statement on separate accounting: "It gives you far more political freedom to pursue the interests of the state the way the state wants to do."

A review of the history of this issue is instructive as the legislature reconsiders separate accounting and other changes to our oil tax regime.

- In 1949, the territorial income tax enacted. This tax remain essentially unchanged until 1978.

- Income of multi-state corporations in Alaska was apportioned on the basis of three factors: property, payroll and sales.

- This method of apportionment was developed principally for mercantile businesses.

- Over many years, it became apparent that it **systematically under-calculates income attributable to oil production**.

The oil industry in testimony will likely tell you that Alaska should maintain formulary apportionment to be consistent with many other states, avoid the potential for duplicative taxation, and sidestep the administrative burdens associated with separate accounting.

However, all of the constitutional issues regarding duplicative and discriminatory taxation have been resolved, and the fiscal benefits of separate accounting clearly outweigh the costs and administrative challenges.

- According to the fiscal note submitted by DOR, separate accounting would have generated about $250 million more in each of the 5 preceding fiscal years.

- The cost of administering the system are estimated to be about $525,000/year, primarily to hire 4 new tax auditors.

- Thus the benefits are roughly 475 times greater than the costs.

TOP FIVE OIL COMPANIES
CORPORATE INCOME TAX COMPARISON

	2006	2007	2008	2009	2010	Avg.
Production Tax Value (PTV)	8,269,253,754	12,373,309,410	16,639,085,462	8,123,576,735	10,267,505,397

Effective Tax Rate Paid **(C /A)**	9.6%	6.3%	7.2%	5.2%	5.7%	

* Using FERC Form 6, Net Carrier Operating Income. Certain companies may include Transportation activities outside of Alaska.

(A) Taxable income does not include apportioned other income.

(C) Certain 2006-2008 returns are audited and/or amended.

- It's true that until the 1970s, Alaska lacked the resources and staff to administer a corporate income tax effectively.
- Returns were generally accepted as filed and field audits were never conducted. However, that is not the case today.

As the development of Prudhoe Bay approached, interest within the legislature on appropriate methods of taxation increased.

Legislative consultants warned that Alaska would receive little income tax from the O&G industry, not only because of the apportionment formula, but also because the state tax was based on federally taxable income, which usually amounted to very little.

They argued that income tax should be tied to profitability, rather than production, property, payroll, sales, or other variables which do not represent the health or viability of the industry.

These arguments are true today.

Since little of Alaska's oil is sold instate, the sales factor, which is still part of the formula, minimizes income generated from Alaska.

The property factor is also not as reflective of value as one might expect. It does not include the value of oil or gas in the ground, and facilities are valued at their original cost, not their value today.

Formulary apportionment also fails to recognize the greater profitability of production, compared with refining or retail sales.

It doesn't reflect that not all facets or areas of a company are equally profitable.

In addition, formulary apportionment treats companies with the same earnings (those doing business only in Alaska and multinational corporations) differently.

"The three-factor formula bestows a benefit on multistate oil companies that is not shared by other Alaskan businesses. It allows those corporations to pay tax on only a fraction of their Alaska income, which substantially lowers their effective tax rate..."

State of Alaska brief to Alaska Supreme Court, April 27,1984

During the hearings on AS 43.21, legislators asked about this:

- Senator John Huber: "Does SOHIO object to paying 9.4% on its true net income the same as they would have to if they were strictly an Alaskan corporation?"
- SOHIO Vice President Richard Donaldson: "Yes"

In 1977, the Department of Revenue acknowledged some of the drawbacks of formulary apportionment, including:

1. the federal tax base on which it is based (for U.S. corporations) allows for significant and undesirable erosions in the tax base;

2. the polices underlying many federal tax exemptions, credits and deductions are irrelevant to or inconsistent with state objectives; and

3. none of the property, payroll or sales factors truly represent O&G producing activity in Alaska.

During the same period, the O&G industry made many of the same arguments heard today about ACES.

They said separate accounting :

1. would have an adverse impact on exploration and development investment in Alaska;

2. was unnecessary because Alaska already imposed one of the highest tax burdens of any state on the O&G industry; and

3. illustrated the instability of the Alaska business climate.

- Exxon released a "Business Climate Analysis" showing Alaska ranked 47th and 48th out of the 50 states on 2 important measures of business friendliness.

- The company argued that separate accounting would make it worse.

Despite O&G industry opposition to separate accounting in Alaska, it's interesting to note that elsewhere they have sued to be able to use this methodology.

Even in Alaska, industry has sued in support of the right to use separate accounting.

(See State of Alaska v. Amoco Production Company, 676 P. 2d 595, Supreme Court of Alaska.)

Separate accounting has several additional benefits the sponsor would like to highlight:

1. It doesn't tax a company until that company makes a profit. Under apportionment, companies begin to pay taxes as soon as they set up shop in Alaska. In this manner, separate accounting encourages new business development.

2. If a company invests in Alaska, it drives down that company's corporate income tax. It is an incentive to additional investment.

3. If oil development in Alaska becomes less profitable than elsewhere, that change in profitability is reflected in the corporate income tax. Under that circumstance, it would result in a well-deserved tax cut for the oil industry.

4. The separate accounting methods proposed in SB 201 are nearly identical to methods used by other states, the IRS, and other nations. They are also consistent with OECD model treaties.

In closing, as the State argued in 1984 to the Alaska Supreme Court, separate accounting "foregoes the surrogates and assumptions of mathematical formulas and looks instead at actual revenues and costs of in-state operations."

State of Alaska brief, April 27, 1984, page 41.

It is a fair and equitable method of assessing corporate income taxes that is used successfully around the world and in other U.S. states.

State of Alaska
Department of Revenue

Commissioner Bryan Butcher

SEAN PARNELL, GOVERNOR
333 Willoughby Avenue, 11th Floor
P.O. Box 110400

The Honorable Bert Stedman
Alaska State Legislature
State Capitol, Room 516
Juneau, Alaska 99801

March 24, 2012

Dear Senator Stedman,

You asked for clarification of some of the information contained in a PowerPoint presentation prepared by the sponsor of SB 201, separate accounting for oil and gas corporations and presented during a hearing in Senate Finance on March 20, 2012. Specifically, you requested the following:

1. In slide 4, the bill sponsor stated, "This method [separate accounting] is used by Every oil and gas producing nation in the world, including the United States . . ." In testimony offered by the Department of Revenue, we stated that the U.S. does not calculate tax on a separate accounting basis, the U.S. calculates tax on a "separate entity" basis. You requested an explanation of the difference between "separate accounting" and "separate entity" reporting.

   Separate accounting requires a corporation to determine the amount of taxable income earned within each taxing jurisdiction and pay tax only on the amount earned within a specific jurisdiction. For example, to compute Alaska taxable income on a separate accounting basis, a corporation that conducts activity within and outside Alaska would determine the income earned in Alaska and pay tax on those earnings only to Alaska. Other income earned by the corporation outside Alaska, would not be subject to tax by Alaska.

   Separate entity reporting requires a corporation located within a specific jurisdiction to pay tax on the corporation's entire net income regardless of where the activity took place. Under U.S. federal tax law, companies that are incorporated in the U.S. that conduct activity both within the U.S. and in foreign countries are taxed on their total net income regardless of the fact that some of that income was earned outside the U.S. Thus, the U.S. government taxes a domestic corporation on all of its worldwide income. This method is not separate accounting, it is separate entity reporting.

2. On slide 39, you asked DOR to explain why transportation income reported by the oil and gas companies in 2007 was a positive amount when, in all other years, they reported losses.

   The transportation income or loss as shown on this slide was aggregated from Federal Energy Regulatory Commission (FERC) Form 6 – Annual Report of Oil Pipeline Companies filed by the various oil and gas corporations operating in Alaska. This information is publicly available and can be found on FERC's website at www.ferc.gov. We reviewed the FERC reports and the anomaly is attributed to filings made by BP Pipelines (Alaska), Inc. In all years, pipeline transportation revenue and expenses are fairly constant for all companies except BP. In calendar year 2007, BP Pipelines (Alaska), Inc. reported significantly more pipeline revenue than in the succeeding three years. There is nothing within the FERC report that explains this sudden and apparently one-time increase in pipeline revenue. DOR doesn't have any further insight that it can provide regarding this increase.

3. On slide 39, you asked why the "Actual Corporate Income Tax Paid" did not agree with total corporate income tax as shown in DOR's Revenue Sources Book (RSB).
   As explained during testimony provided by the department, slide 39 is an analysis of corporate income tax of the top 5 oil companies operating in Alaska. Other smaller oil and gas producing companies were not included in this analysis as DOR was requested to do a "quick" analysis based on criteria given to DOR by the sponsor of the House version of SB 201. However, we believe that the top 5 oil companies is a fair representation of the total oil and gas corporate tax paid in calendar years 2006 through 2010. Below is a reconciliation of Actual Corporate Income Tax Paid as shown on slide 39 to total oil and gas corporate income tax collected as reported in the RSB for FY 2007 through FY 2011. It is important to note that the RSB is reported on a fiscal year and cash basis. Corporate income tax returns are filed on a calendar year and accrual basis. For example, corporate income tax payments for calendar year 2010 are reported in both the FY 2010 and the FY 2011 RSB. Most of the difference between the amount reported on the returns and the RSB are timing differences related to estimated tax payments.

Corporate Income Tax As Filed (Tax Returns) Compared to As Collected (RSB)

As Reported	FY 2007/ CY 2006 (Millions)	FY 2008/ CY 2007 (Millions)	FY 2009/ CY 2008 (Millions)	FY 2010/ CY 2009 (Millions)	FY 2011/ CY 2010 (Millions)
RSB	$594.4	$605.8	$492.2	$447.9	$542.1
Tax Returns	$630.3	$570.4	$642.5	$293.2	$385.6
Difference	($35.9)	$35.4	($150.3)	$154.7	$156.4

The additional tax reported in the RSB for FY 2011 is primarily due to estimated tax payments made in FY 2011 by corporations for their calendar year 2011 tax year which ended December 31, 2011. We expect these estimated tax payments will be reported by oil and gas corporations as total corporate income tax for calendar year 2011 when they file their returns in October of this year.

We believe this letter addresses all of the questions you currently have related to SB 201. If you have further questions, please contact Johanna Bales by email at johanna.bales@Alaska.gov or call her at (907) 269-6628.

Sincerely,

Bruce Tangeman
Deputy Commissioner

Corporate Income Taxes

Question:
How much income of a multistate or international business is properly attributable to its in-state assets and activities so it can be taxed by that state?

Separate Accounting

Looks at what the business actually has and does in the state and then seeks to determine directly the net-income as if that in-state portion of the business stood alone – separate from the rest of the business.

Separate Accounting

Challenges:

- In-state portion of a business does not actually stand alone from the rest of the business.

- Very complicated and difficult to unravel transactions between or among parts of the same overall business.

- IRS has intense, detailed regulations governing transactions between corporate affiliates, which separate accounting requires.

Apportionment

Starts with a "pie" containing the apportionable income for the in-state and outside business together and then determines how wide a "slice" is attributable to the income-generating potential of the in-state portion of the business. It is the "slice" that is then taxes by the state.

Apportionment

- Avoids the need to unravel transactions.

- Avoids the analytical difficulties that arise when a unitary business as a whole is greater than the sum of its individual parts.

- The width of a company's "slice" of their respective business's "pie" is the average of the percentages of that business's real or tangible property (at cost), its sales, and its oil and gas production that is present within the state.

STATEMENT OF THE CASE	2
A. Introduction	2
B. The Nature Of This Case.	3
C. The Principles And Operation Of AS 43.21 .	6
1. Separate Accounting Of Oil Production And Pipeline Transportation Income . .	7
2. The Use Of A Formula For All Other Income	10
D. Proceedings Below.	10
SUMMARY OF ARGUMENT	12
ARGUMENT.	20
I. The Alaska Legislature Chose Separate Accounting As The More Reasonable Means Of Estimating The In-state Income Of Multistate Oil Producers	20
A. The UDITPA Formula Does Not Fairly Apportion Oil Production Income. . . .	27
1. The Sales Factor	27
2. The Property Factor.	29
3. The Payroll Factor	31
4. The Disproportionality Of Production Profits.	32

Page

B. The Legislature Had Good Reasons For Choosing Separate Accounting Over A Modified Formula. 34

II. Separate Accounting, As Employed By AS 43.21, Fairly Apportions Oil Production Income To Alaska 38

A. Introduction 38

B. The Fair Apportionment Test Applies To Separate Accounting 41

C. AS 43.21 Is "True" Separate Accounting And Is Subject To The Fair Apportionment Test 46

D. AS 43.21 Meets The Fair Apportionment Standard 52

1. AS 43.21 Reflects A Reasonable Sense Of How Income Is Generated . 53

2. AS 43.21's Treatment Of Out-of-state Activities Does Not Render The Statute Inherently Arbitrary . 59

a. The Treatment of Out-of-state Support Activities is Merely a Matter of Economic Theory. . 60

b. The Companies' Quarrel With AS 43.21's Treatment of Out-of-State Sales and Support Activities Ignores the Fact That Separate Accounting Does Not Capture the Value that Alaska Activity Adds to These Companies' Out-of-state Operations 63

c. The Companies' Precise Out-of-State Contributions Argument was Made and Rejected in Moorman . 65

E. The Oil Companies Have Offered No Evidence That AS 43.21 Produces A Grossly Distorted Result 68

		Page
III.	Since AS 43.21 Is Fairly Apportioned, It Does Not Impose An Impermissible Threat Of Multiple Taxation	74
IV.	The Companies' Equal Protection Claim Amounts To An Erroneous Accusation Of Improper Purpose	92
	A. Introduction And Legal Standard. . . .	92
	B. The Record Amply Demonstrates That The Legislature's Statutorily Identified Purposes Were Genuine . . .	95
	C. Once A Legitimate Purpose Is Identified, The Legislature Is Not Required To Choose The Means Most Favorable To The Taxpayers	97
V.	AS 43.21 Does Not Discriminate Against Interstate Commerce Because It Treats Intrastate And Interstate Oil Companies Evenhandedly	100
VI.	AS 43.21 Does Not Violate The Contract Clause.	108
VII.	AS 43.21 Is Properly Retroactive To January 1, 1978.	109
VIII.	The Lower Court Properly Entered Summary Judgment In Favor Of The State	111
CONCLUSION.		114

AUTHORITIES PRINCIPALLY RELIED UPON

United States Constitution, art. I, § 8

The Congress shall have Power ...

To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes.

United States Constitution, art. I, § 10

No State shall ... pass any ... Law impairing the Obligation of Contracts,

United States Constitution, amend. XIV, § 1

nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

Alaska Constitution, art. I, § 1

all persons are equal and entitled to equal rights, opportunities, and protection under the law.

Alaska Constitution, art. II, § 18

Laws passed by the legislature become effective ninety days after enactment. The legislature may, by concurrence of two-thirds of the membership of each house, provide for another effective date.

Alaska Constitution, art. IX, § 1

The power of taxation shall never be surrendered. This power shall not be suspended or contracted away,

Sec. 1, ch. 110, SLA 1978

* Section 1. LEGISLATIVE FINDINGS AND INTENT. The legislature finds and declares that the method of apportioning income for tax purposes under the "Uniform Division of Income for Tax Purposes" formula embodied in the Multistate Tax Compact (AS 43.19) and AS 43.20.065 does not fairly represent the extent of the business activities in this state of multistate corporations engaged in the production and pipeline transportation of crude oil and natural gas in Alaska. The legislature therefore intends that, in accordance with the provisions of art. IV, sec. 18 of the Multistate Tax Compact

(AS 43.19), the income tax of all corporations engaged in the production or pipeline transportation of oil or natural gas in or directly associated with this state shall be assessed by the tax administrator under this Act. The legislature further intends that the assessment of income tax against a multistate corporation engaged in the production or pipeline transportation of oil or natural gas shall be commensurate with the tax that would be assessed against a corporation owning and operating only those assets of the multistate corporation which are in or directly associated with this state.

AS 43.19.010 Article IV

Article IV. Division of Income.

1. As used in this Article, unless the context otherwise requires:

(a) "Business income" means income arising from transactions and activity in the regular course of the taxpayer's trade or business and includes income from tangible and intangible property if the acquisition, management, and disposition of the property constitute integral parts of the taxpayer's regular trade or business operations.

(b) "Commercial domicile" means the principal place from which the trade or business of the taxpayer is directed or managed.

(c) "Compensation" means wages, salaries, commissions and any other form of remuneration paid to employees for personal services.

(d) "Financial organization" means any bank, trust company, savings bank, industrial bank, land bank, safe deposit company, private banker, savings and loan association, credit union, cooperative bank, small loan company, sales finance company, investment company, or any type of insurance company.

(e) "Nonbusiness income" means all income other than business income.

(f) "Public utility" means any business entity (1) which owns or operates any plant, equipment, property, franchise, or license for the transmission of communications, transportation of goods or persons, except by pipe line, or the production, transmission, sale, delivery, or furnishing of electricity, water or steam; and (2) whose rates of charges for goods or services have been established or approved by a federal, state or local government or governmental agency.

(g) "Sales" means all gross receipts of the taxpayer not allocated under paragraphs of this Article.

(h) "State" means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, and any foreign country or political subdivision thereof.

(i) "This state" means the state in which the relevant tax return is filed or, in the case of application of this Article to the apportionment and allocation of income for local tax purposes, the subdivision or local taxing district in which the relevant tax return is filed.

2. Any taxpayer having income from business activity which is taxable both within and outside this state, other than activity as a financial organization or public utility or the rendering of purely personal services by an individual, shall allocate and apportion net income as provided in this Article. If a taxpayer has income from business activity as a public utility but derives the greater percentage of income from activities subject to this Article, the taxpayer may elect to allocate and apportion the taxpayer's entire net income as provided in this Article.

3. For purposes of allocation and apportionment of income under this Article, a taxpayer is taxable in another state if (1) in that state the taxpayer is subject to a net income tax, a franchise tax measured by net income, a franchise tax for the privilege of doing business, or a corporate stock tax, or (2) that state has jurisdiction to subject the taxpayer to a net income tax regardless of whether, in fact, the state does or does not.

4. Rents and royalties from real or tangible personal property, capital gains, interest, dividends or patent or copyright royalties, to the extent that they constitute nonbusiness income, shall be allocated as provided in paragraphs 5 through 8 of this Article.

5. (a) Net rents and royalties from real property located in this state are allocable to this state.

(b) Net rents and royalties from tangible personal property are allocable to this state: (1) if and to the extent that the property is utilized in this state, or (2) in their entirety if the taxpayer's commercial domicile is in this state and the taxpayer is not organized under the laws of or taxable in the state in which the property is utilized.

(c) The extent of utilization of tangible personal property in a state is determined by multiplying the rents and royalties by a fraction, the numerator of which is the number of days of physical location of the property in the state during the rental or royalty period in the taxable year and the denominator of which is the number of days of physical location of the property everywhere during all rental or royalty periods in the taxable year. If the physical location of the property during the rental or royalty period is unknown or unascertainable by the taxpayer, tangible personal property is utilized in the state in which the property was located at the time the rental or royalty payer obtained possession.

6. (a) Capital gains and losses from sales of real property located in this state are allocable to this state.

(b) Capital gains and losses from sales of tangible personal property are allocable to this state if (1) the property had a situs in this state at the time of the sale, or (2) the taxpayer's commercial domicile is in this state and the taxpayer is not taxable in the state in which the property had a situs.

(c) Capital gains and losses from sales of intangible personal property are allocable to this state if the taxpayer's commercial domicile is in this state.

7. Interest and dividends are allocable to this state if the taxpayer's commercial domicile is in this state.

8. (a) Patent and copyright royalties are allocable to this state: (1) if and to the extent that the patent or copyright is utilized by the payer in this state, or (2) if and to the extent that the patent or copyright is utilized by the payer in a state in which the taxpayer is not taxable and the taxpayer's commercial domicile is in this state.

(b) A patent is utilized in a state to the extent that it is employed in production, fabrication, manufacturing, or other processing in the state or to the extent that a patented product is produced in the state. If the basis of receipts from patent royalties does not permit allocation to states or if the accounting procedures do not reflect states of utilization, the patent is utilized in the state in which the taxpayer's commercial domicile is located.

(c) A copyright is utilized in a state to the extent that printing or other publication originates in the state. If the basis of receipts from copyright royalties does not permit allocation to states or if the accounting procedures do not reflect states of utilization, the copyright is utilized in the state in which the taxpayer's commercial domicile is located.

9. All business income shall be apportioned to this state by multiplying the income by a fraction, the numerator of which is the property factor plus the payroll factor plus the sales factor, and the denominator of which is three.

10. The property factor is a fraction, the numerator of which is the average value of the taxpayer's real and tangible personal property owned or rented and used in this state during the tax period and the denominator of which is the average value of all the taxpayer's real and tangible personal property owned or rented and used during the tax period.

11. Property owned by the taxpayer is valued at its original cost. Property rented by the taxpayer is valued at eight times the net annual rental rate. Net annual rental rate is the annual rental rate paid by the taxpayer less any annual rental rate received by the taxpayer from subrentals.

12. The average value of property shall be determined by averaging the values at the beginning and ending of the tax period but the tax administrator may require the averaging of monthly values during the tax period if reasonably required to reflect properly the average value of the taxpayer's property.

13. The payroll factor is a fraction, the numerator of which is the total amount paid in this state during the tax period by the taxpayer for compensation and the denominator of which is the total compensation paid everywhere during the tax period.

14. Compensation is paid in this state if:

(a) the individual's service is performed entirely within the state;

(b) the individual's service is performed both inside and outside the state, but the service performed outside the state is incidental to the individual's service within the state; or

(c) some of the service is performed in the state and (1) the base of operations or, if there is no base of operations, the place from which the service is directed or controlled is in the state, or (2) the base of operations or the place from which the service is directed or controlled is not in any state in which some part of the service is performed, but the individual's residence is in this state.

15. The sales factor is a fraction, the numerator of which is the total sales of the taxpayer in this state during the tax

period, and the denominator of which is the total sales of the taxpayer everywhere during the tax period.

16. Sales of tangible personal property are in this state if:

(a) the property is delivered or shipped to a purchaser, other than the United States Government, within this state regardless of the f.o.b. point or other conditions of the sale; or

(b) the property is shipped from an office, store, warehouse, factory, or other place of storage in this state and (1) the purchaser is the United States Government or (2) the taxpayer is not taxable in the state of the purchaser.

17. Sales, other than sales of tangible personal property, are in this state if:

(a) the income-producing activity is performed in this state; or

(b) the income-producing activity is performed both in and outside this state and a greater proportion of the income-producing activity is performed in this state than in any other state, based on costs of performance.

18. If the allocation and apportionment provisions of this Article do not fairly represent the extent of the taxpayer's business activity in this state, the taxpayer may petition for or the tax administrator may require, in respect to all or any part of the taxpayer's business activity, if reasonable:

(a) separate accounting;

(b) the exclusion of any or more of the factors;

(c) the inclusion of one or more additional factors which will fairly represent the taxpayer's business activity in this state; or

(d) the employment of any other method to effectuate an equitable allocation and apportionment of the taxpayer's income.

AS 43.20.011(e)

(e) There is imposed for each taxable year upon the entire taxable income of every corporation derived from sources within the state a tax consisting of a normal tax equal to 5.4

per cent of taxable income, and a surtax which is equal to 4.0 per cent of taxable income. For purposes of this chapter the surtax exemption for a taxable year follows §§ 1561 and 1563 of the Internal Revenue Code. The tax of a corporation engaged in the production or transportation of crude oil or natural gas shall be determined and paid in accordance with ch. 21 of this title.

Chapter 21. OIL AND GAS CORPORATE INCOME TAX.

Sec. 43.21.010. APPLICATION [REPEALED EFFECTIVE JANUARY 1, 1982]. AS 43.21.010--43.21.120 applies to every corporation doing business in the state which derives income from the production of oil or gas from a lease or property in the state or from the pipeline transportation of oil or gas in the state. The tax calculated under AS 43.21.010--43.21.120 is measured by the total taxable income of the corporation during the tax period as determined under AS 43.21.020--43.21.040 and is calculated at the rates established under AS 43.20.011(e).

Sec. 43.21.020. DETERMINATION OF TAXABLE INCOME FROM OIL AND GAS PRODUCTION [REPEALED EFFECTIVE JANUARY 1, 1982]. (a) The taxable income of a corporation from the production of oil and gas from a lease or property in the state shall be the corporation's net income as calculated by the department in accordance with this section.

(b) Gross income of a corporation from oil and gas production shall be the gross value at the point of production of oil or gas produced from a lease or property in the state. The department shall by regulation determine a uniform method of establishing the gross value at the point of production. In making its determination the department may use the actual prices or values received for the oil or gas, the posted prices for the oil or gas in the same field, or the prevailing prices or values of oil or gas in the same field. In addition, in its determination of gross value at the point of production of oil or gas produced from a lease or property, the department shall determine the reasonable costs of transportation from the point of sale to the point of production of the oil or gas. Transportation costs set by a tariff properly on file with the Alaska Pipeline Commission or other regulatory agency shall be considered prima facie reasonable, but if a tariff properly on file with a regulatory agency is subsequently amended, changed, or overturned retroactively, the reasonable costs of transportation shall be recomputed for that period using the newly determined tariff.

(c) Net income from oil and gas production shall be determined by the department by deducting from gross income the following:

(1) royalties paid in kind or in value;

(2) taxes imposed under AS 43.55.011--43.55.150 and AS 43.57.010 which are actually paid or incurred by the corporation on the production from a lease or property in the state;

(3) taxes imposed under AS 43.56.010--43.56.210 and AS 29.53.010--29.53.460 which are actually paid or incurred by the corporation on property used directly in the production of oil or gas from a lease or property in the state, including property used in production, gathering, treatment, or preparation of the oil or gas for pipeline transportation, but only if those property tax payments were due and payable only after the date of commercial production from the lease or property with which the property was associated;

(4) the direct costs incurred by or for the corporation in operating the lease or property, including the direct costs of producing, gathering, treating, or preparing the oil or gas for pipeline transportation, but not of any payments received for those activities and not including any indirect cost or overhead expense;

(5) depreciation (using the unit of production method or such other reasonable methods as the department may by regulation establish) on property used directly in the production, gathering, treatment, or preparation of the oil or gas for pipeline transportation including amortization of capitalized interest for investments in this property at a rate not to exceed the average cost of borrowed capital to the taxpayer during the year in which it is capitalized;

(6) the amortization of lease acquisition payments and taxes paid or incurred under AS 43.56.010--43.56.210 and AS 29.53.010--29.53.460 (including capitalized interest on both) for or on producing properties before the commencement of commercial production from the lease or property for which the property is being used;

(7) interest expense of the corporation, not capitalized during construction, that was paid or incurred in connection with property in Alaska; however, unless (f) of this section applies, the interest expense may not exceed that portion of the total interest paid by the consolidated business of which the corporation is a part, determined by multiplying the total interest by a fraction, the numerator of which is the value of the corporation's real and tangible personal property used directly in the production of oil or gas from a lease or property in the state and the denominator of which is the value of all real and tangible personal property of the consolidated business;

in this subsection, "total interest paid by the consolidated business" does not include interest expense arising from intercompany obligations within the consolidated business except to the extent that the interest expense reflects a pass-through of interest on a third-party borrowing by the parent or other member of the consolidated business with the purpose, expressed at the time of the third-party borrowing, of financing Alaska business activity of the taxpayer corporation;

(8) expenses incurred by the corporation after December 31, 1977, of unsuccessful exploration of oil or gas in the state including the acquisition costs of abandoned properties, dry hole costs, and the costs of geologic and geophysical exploration related to those abandoned properties;

(9) general overhead or administrative expense incurred by the corporation attributable to deriving income from the production of oil or gas from a lease or property in the state to the extent, except as provided in (f) of this section, that it does not exceed that portion of the total general overhead or administrative expense incurred by the consolidated business of which the corporation is a part, determined by multiplying the total general overhead or administrative expense by a fraction, the numerator of which is the value of the corporation's real and tangible personal property used directly in the production of oil or gas from a lease or property in the state and the denominator of which is the value of all real and tangible personal property of the consolidated business;

(10) the amount of income from the production of oil and gas from a lease or property that is divided among the regional native corporations under sec. 7(i) of the Alaska Native Claims Settlement Act (P.L. 92-203);

(11) the tax imposed by sec. 4986 of the Internal Revenue Code that is paid or incurred by the taxpayer for oil production from leases or properties in the state.

(d) Deductions from gross income under this section shall not include expenses previously deducted on a return filed under AS 43.20.011--43.20.350.

(e) Where a corporation subject to AS 43.21.010--43.21.120 shares the production or proceeds of the production from a lease or property through a working interest, royalty interest, overriding royalty interest, production payment, net profit interest, joint venture or other agreement, the department shall allocate the deductions from gross income between the corporation and the persons with whom it has such an agreement in accordance with the terms of the agreement.

(f) If a corporation demonstrates to the satisfaction of the department that it paid or incurred actual expenses for interest or for general overhead or administration attributable to deriving income from the production of oil or gas from a lease or property in the state in an amount greater than the amount determined under (c)(7) or (c)(9) of this section, the department may allow the corporation to deduct the greater amount.

Sec. 43.21.030. DETERMINATION OF INCOME FROM OIL AND GAS PIPELINE TRANSPORTATION [REPEALED EFFECTIVE JANUARY 1, 1982]. (a) Except as provided in (c) of this section, taxable income attributable to the transportation of oil in a pipeline engaged in interstate commerce in Alaska shall be determined by the department and shall be the amount reported or that would be required to be reported to the Federal Energy Regulatory Commission or its successors as net operating income, less those portions of interest and general administrative expense attributable to the pipeline transportation of oil in the state, except that taxable income shall also include taxes on or measured by income. The department shall establish regulations governing the determination of interest and general administrative expense attributable to pipeline transportation of oil in the state.

(b) Except as provided in (c) of this section, taxable income attributable to the transportation of natural gas in a pipeline engaged in interstate commerce in Alaska shall be determined by the department and shall be the amount reported or that would be required to be reported to the Federal Energy Regulatory Commission as net operating income less that portion of interest and general administrative expense attributable to pipeline transportation in the state, except that the taxable income shall also include taxes on or measured by income. The department shall establish regulations governing the determination of interest and general administrative expense attributable to pipeline transportation of natural gas in the state.

(c) Taxable income attributable to the transportation of oil or natural gas in Alaska of any corporation not under the Federal Energy Regulatory Commission jurisdiction, or of a corporation under the jurisdiction of the Federal Energy Regulatory Commission but not reporting the operation of pipelines in Alaska separately from the operation of pipelines elsewhere, shall be determined by the department and shall be based upon an amount equal to that which would have been reported to the Federal Energy Regulatory Commission under (a) of this section in the case of oil pipelines, or (b) of this section in the case of natural gas pipelines, had the corporation been, in fact, under Federal Energy Regulatory Commission jurisdiction for

the taxable year and required to report on the operation of Alaska pipelines separately from the operation of pipelines elsewhere.

Sec. 43.21.040. DETERMINATION OF INCOME FROM ACTIVITIES OTHER THAN OIL AND GAS PRODUCTION OR PIPELINE TRANSPORTATION [REPEALED EFFECTIVE JANUARY 1, 1982]. (a) Taxable income of a corporation subject to AS 43.21.010--43.21.120 from activities in this state other than the production of oil or gas from a lease or property in the state or the pipeline transportation of oil or gas in the state shall be determined in accordance with the method established in art. IV of AS 43.19.010 and in AS 43.20.071, as modified by (b)--(f) of this section.

(b) The total taxable income of the consolidated business is its entire income less the portion of that entire income attributable to worldwide production and pipeline transportation of oil and gas. In this section,

(1) for a member of a consolidated business who is required to file under the Internal Revenue Code, "entire income" means taxable income under Subtitle F and chapter 1 of Subtitle A of the Internal Revenue Code of 1954, as amended, except that those provisions adopted after December 31, 1975, which change or modify exemptions from tax are not adopted by reference as a part of this section until the second January 1 following the effective date of the federal law;

(2) for a member of a consolidated business who is not required to file under the Internal Revenue Code, "entire income" means book income, except that a taxpayer may elect to report his income as the income would be determined under (1) of this subsection.

(c) The numerator and denominator of the property factor, of the payroll factor and of the sales factor shall be calculated without reference to that portion of property, payroll or sales directly related to the production of oil or gas from a lease of property in the state or the pipeline transportation of oil or gas in the state.

(d) Repealed by § 17 ch 116 SLA 1981.

(e) Repealed by § 17 ch 116 SLA 1981.

(f) The value attributed to vessels transporting Alaskan oil or gas of the consolidated business which are not owned or effectively owned by the consolidated business shall be excluded from the property factor.

Sec. 43.21.050. ASSESSMENT OF INCOME AND TAX [REPEALED EFFECTIVE JANUARY 1, 1982]. (a) The department shall assess taxable income and the amount of tax payable on that taxable income.

(b) On or before August 15 of each year the department shall send to every corporation taxable under AS 43.21.010--43.21.120 a notice of assessment showing the amount of income taxable under AS 43.21.010--43.21.120 for the previous year and the amount of tax payable on that taxable income.

(c) For purposes of AS 43.21.010--43.21.120 the department may combine taxable incomes of corporations subject to tax under AS 43.21.010--43.21.120 who are part of the same consolidated business.

(d) If the methods of allocation and apportionment provided in AS 43.21.010--43.21.120 do not fairly represent the extent of a corporation's business activity in the state, the corporation may petition for or the department may require, in respect to all or any part of the corporation's business activity, if reasonable, the employment of any method authorized under art. IV, sec. 18, of the Multistate Tax Compact (AS 43.19.010) to effectuate an equitable allocation and apportionment of the corporation's income. The commissioner shall include in his annual report required in AS 43.21.110 a report on all relief granted under this subsection, including for each case a statement of the changes in tax liability resulting from the granting of relief, the tax years involved, and a description of the method of determining taxable income that was substituted for those provided in AS 43.21.010--43.21.120.

Sec. 43.21.060. RETURNS [REPEALED EFFECTIVE JANUARY 1, 1982]. On or before April 15 of each year, a corporation subject to tax under AS 43.21.010--43.21.120 shall submit a return in a form prescribed by the department setting out information required by the department to determine taxable income. For purposes of AS 43.21.010--43.21.120, the department may require corporations subject to tax under AS 43.21.010--43.21.120 who are part of the same consolidated business to file a single return.

Sec. 43.21.070. PAYMENT OF TAX [REPEALED EFFECTIVE JANUARY 1, 1982]. The tax levied under AS 43.21.010--43.21.120 is payable to the department on or before September 30 of each year or in installments, including prepayments of estimated tax, at the times and under the conditions the department may by regulation require. This tax is payable on the due date set out in this section even though the assessment is under appeal or the validity, enforceability or application of AS 43.21.010--

43.21.120 or any provision of AS 43.21.010--43.21.120 is challenged before the department or in the courts.

Sec. 43.21.080. TRANSITIONAL RULES [REPEALED EFFECTIVE JANUARY 1, 1982]. The department shall provide by regulation transition rules for corporations subject to tax under AS 43.20.011--43.20.350 before July 9, 1978 to avoid double taxation of the same income or double deduction of the same expense of those corporations as a result of becoming subject to tax under AS 43.21.010--43.21.120.

Sec. 43.21.090. REGULATIONS [REPEALED EFFECTIVE JANUARY 1, 1982]. The department may adopt regulations in accordance with the Administrative Procedure Act (AS 44.62.010--44.62.650) as appropriate to administer and enforce AS 43.21.010--43.21.120.

Sec. 43.21.100. PENALTIES [REPEALED EFFECTIVE JANUARY 1, 1982]. The penalties established in AS 43.20.011--43.20.350 apply to AS 43.21.010--43.21.120.

Sec. 43.21.110. PUBLIC REPORTING [REPEALED EFFECTIVE JANUARY 1, 1982]. (a) The commissioner of revenue shall compile and transmit to the legislature an annual consolidated report of state revenues and taxation policies under AS 43.21.010--43.21.120. This report shall include total aggregate income tax paid by corporations covered under AS 43.21.010--43.21.120 and aggregate income and deductions by category, so classified as to prevent the identification of particular returns or reports.

(b) The legislative auditor shall transmit to the legislature an annual report reviewing the actions of the department in administering AS 43.21.010--43.21.120.

Sec. 43.21.120. DEFINITIONS [REPEALED EFFECTIVE JANUARY 1, 1982]. Unless the context requires otherwise the definitions contained in AS 43.55.140 are applicable to AS 43.21.010--43.21.120. In addition, in AS 43.21.010--43.21.120

(1) "base of operations" means the closest point on land to the offshore oil or gas production operations from which goods, services and supplies flow to those offshore oil or gas production operations;

(2) "consolidated business" means a corporation or group of corporations having more than 50 percent common ownership direct or indirect, or a group of corporations in which

there is common control either direct or indirect as evidenced by any arrangement, contract or agreement.

JURISDICTIONAL STATEMENT

This is an appeal from a May 27, 1983, grant of summary judgment by the superior court. The lower court ruled that Alaska's separate accounting for oil and gas production and pipeline transportation, AS 43.21, is constitutional. This court has jurisdiction pursuant to AS 22.05.010 and AS 22.05.020.

ISSUES PRESENTED FOR REVIEW

Is the Alaska Legislature's decision to employ separate accounting to estimate appellants' in-state oil and gas production and pipeline transportation income consistent with the Commerce, Due Process, and Equal Protection Clauses of the United States Constitution and the Equal Protection Clause of the Alaska Constitution?

STATEMENT OF THE CASE

A. Introduction

On February 8, 1968, Atlantic Richfield Company struck the largest oil field ever discovered in the United States. The Prudhoe Bay field is so large that oil from the next three largest fields in America would not fill it. Its recoverable oil reserves exceed nine billion barrels, while estimates of total field size reach 20 billion barrels.

The single outlet for this oil is the Trans Alaska Pipeline ("TAPS"). This 900 mile long, 48-inch line carries 1.6 million barrels of oil each day to its destination at Valdez. There, the oil is loaded onto ocean tankers destined for refineries in Washington, California, the Gulf of Mexico and the eastern seaboard. The Prudhoe Bay Field and the Trans-Alaska Pipeline are owned virtually in their entirety by three corporations -- Atlantic Richfield Company, Exxon Corporation and Standard Oil of Ohio.

Prudhoe Bay operations were profitable when production commenced in June 1977. Since then, however, external economic and political factors -- including deregulation, the Iranian revolution, and OPEC pricing practices -- have more than doubled the value of Alaskan oil with no commensurate increase in costs. As a result, between 1978-81, and wholly apart from earnings in marine transportation, refining, and marketing, Arco, Exxon, and Sohio earned $21 billion in net income solely from production and

pipeline transportation of Alaska oil. See Appendix A. These profits have had a profound effect on each of these companies, most notably on Sohio because it is the smallest of the three:

> Once severely short of crude, Sohio's bonanza from its huge reserves of Alaskan oil skyrocketed 1979 profits to $1.2 billion, a phenomenal 2,200% blast in just one decade.

R. 684.

Under the Oil and Gas Corporate Income Tax (AS 43.21), these companies paid approximately $2 billion in income taxes on that $21 billion profit. They have sued to get those taxes back.

This lawsuit involves three corporations that made substantial profits from valuable assets in Alaska, and that now object to paying taxes on that income at the same rate as any other corporation. The essence of this case is revealed in testimony during legislative consideration of AS 43.21:

> Senator [John] Huber: Does Sohio object to paying 9.4% on its true net income the same as they would have to if they were strictly an Alaskan corporation?
>
> [Sohio Vice President Richard] Donaldson: Yes.

R. 4661-62 [D.7-172, F. 27]

B. The Nature of This Case

Every state that imposes a net income tax must devise some method of determining the portion of a multistate taxpayer's

income that is earned within the state. From 1959 to 1978, Alaska used a three-factor formula under the Uniform Division of Income for Tax Purposes Act ("UDITPA") for estimating the Alaska income of all multistate corporations. 1/ AS 43.19; AS 43.20.065; AS 43.20.051-.150 (repealed 1975). 2/

In Alaska's early statehood years, while its economy was marginal and diverse, the UDITPA formula was a satisfactory means of apportioning the income of all multistate corporations. The formula, however, was developed principally for mercantile businesses.

Over several years, the Alaska legislature was advised that the UDITPA formula systematically underestimated income attributable to oil production in Alaska. The legislature was told that, as a result of this underattribution, multistate oil companies paid income taxes on their Alaska production earnings at an effective 2%-3% rate, while in-state oil producers and other Alaska industries paid taxes far closer to the 9.4%

1/ Formulas such as UDITPA rely on certain indicators of business activity -- such as payroll, property, and sales -- to estimate in-state income. A multistate business' indicators, or factors, which are located in the taxing state, are compared with the business' factors located everywhere. The resulting fraction is multiplied against the business' overall income, producing an estimate of in-state income.

2/ UDITPA was approved by the National Conference of Commissioners on Uniform State Laws in 1957, and Alaska was the first state to adopt the model act. In 1970, Alaska adopted the Multistate Tax Compact, which also contains UDITPA, and joined the Multistate Tax Commission. Ch. 124, SLA 1970.

statutory rate. Moreover, under any formula, multistate oil producers owning and operating identical assets in Alaska would pay widely disparate taxes. The legislature enacted AS 43.21 to equalize effective tax rates both between multistate oil companies and other taxpayers, and among multistate oil companies themselves. Sec. 1, ch. 110, SLA 1978.

AS 43.21 changes only the method of estimating in-state income. Once that in-state income is determined, it is taxed at the same 9.4% rate applicable to all corporations. AS 43.20.011(e). AS 43.21 apportions the worldwide income of a taxpayer by separate accounting. Separate accounting identifies gross revenues from activities in the state and then deducts the costs associated with that income. If goods are shipped out of the state for further processing, separate accounting establishes an "arm's-length" price for the value of the goods as they leave the state. That transfer price is used to determine the taxpayer's gross income from the goods.

The legislature believed itself on safe ground in choosing separate accounting -- a method that (1) was, at one time, the only method used in the United States to apportion multistate income; (2) is still the method preferred by other states with substantial oil production activity; and (3) has been upheld by the supreme courts of those states. This lawsuit challenges that choice.

If the companies prevail, they will be entitled to a refund of their AS 43.21 taxes, but will have an alternate

liability for tax years 1978-81 of approximately $620 million. Their net refund, including interest, would be approximately $1.8 billion. 3/ Affidavit of Robert D. Heath, attached as Appendix A.

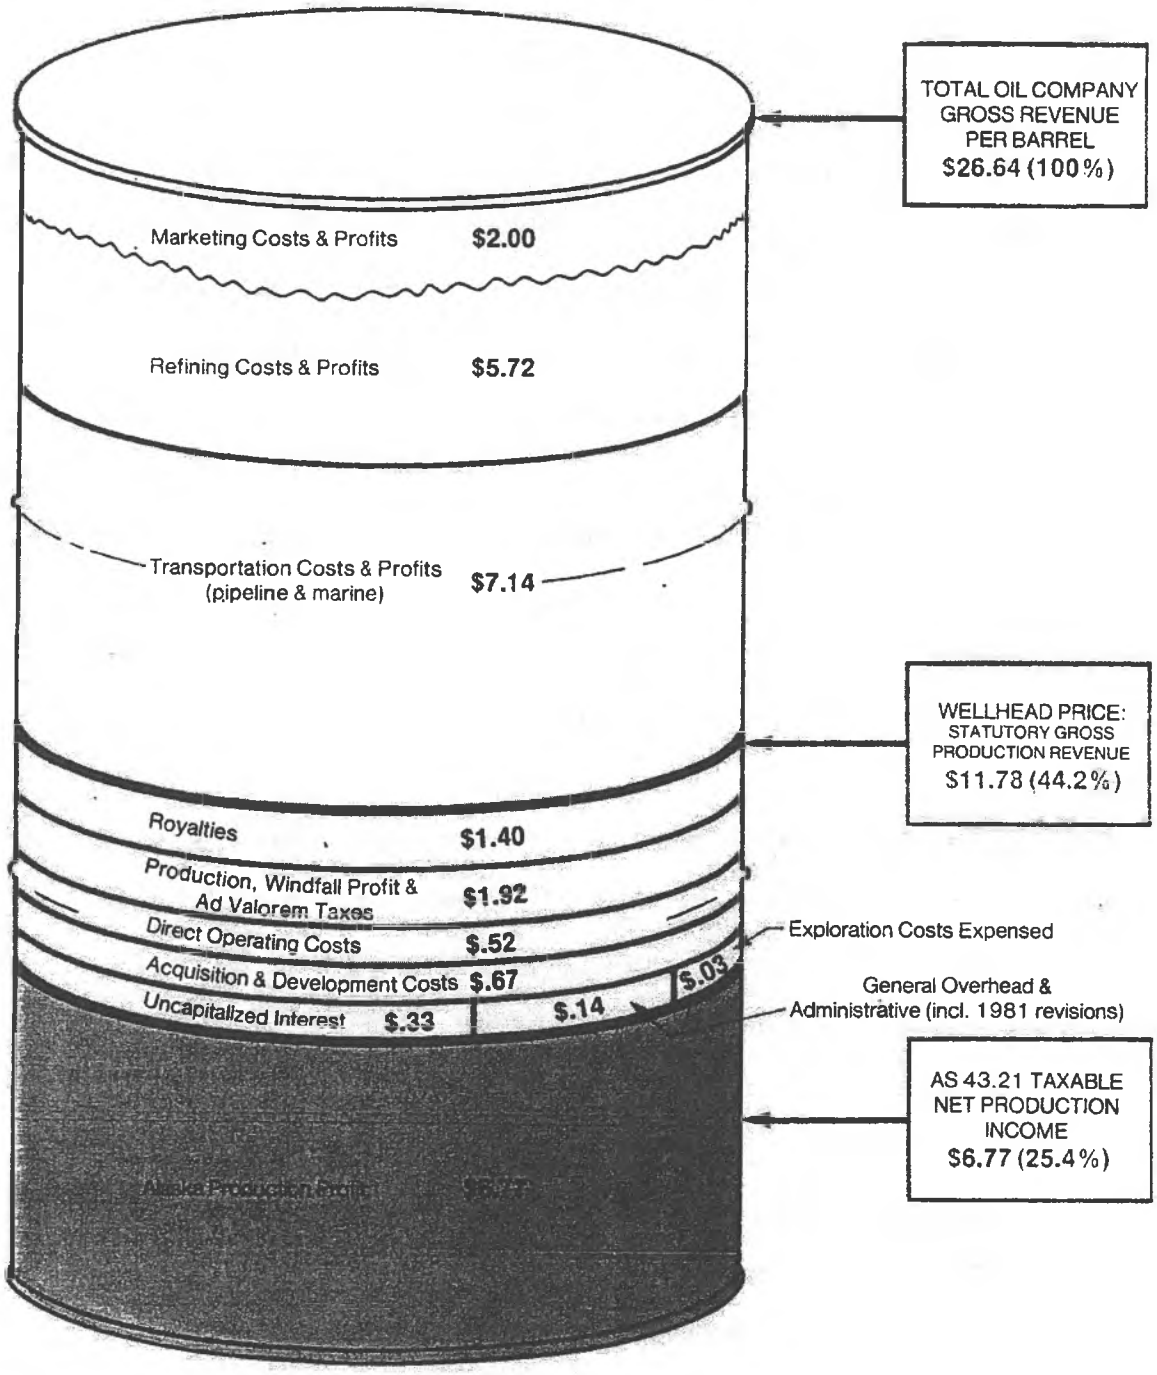
On the state's motion for summary judgment, the superior court held that AS 43.21 is constitutional. R. 17460-62. The companies have appealed from that ruling.

C. The Principles and Operation of AS 43.21

AS 43.21 applies to any corporation that earns income from oil or gas production or pipeline transportation in the state. AS 43.21.010. The statute uses separate accounting to apportion income from oil production and pipeline transportation activities. AS 43.21.020-.030. Income from all other activities in the state is apportioned by a formula. AS 43.21.040. Together, this income is taxed at the statutory rate of 9.4%.

3/ In 1981, the legislature repealed AS 43.21 for tax years beginning after December 31, 1981, and replaced it with a modified formula. Ch. 116, SLA 1981. The legislature did so primarily to avoid further growth in the $2 billion contingent liability caused by this litigation. Although most believe that the companies stand little chance of success in this case, the legislature concluded that any chance was intolerable in light of the massive amounts in controversy. See Hearings Before the Joint Gas Pipeline Committee, May 29, 1984; R. 533, Memorandum by Comm'r Thomas K. Williams to Gov. Jay S. Hammond, October 1, 1980 at 2, R. 572.

1. Separate Accounting of Oil Production and Pipeline Transportation Income.



The separate accounting provisions of AS 43.21 measure only the net income from production and pipeline transportation of oil in Alaska. Income generated by production or pipeline transportation activities elsewhere, and subsequent profits earned from marine transportation, refining, and marketing of Alaska oil after it leaves the state, are excluded from the AS 43.21 tax base. As a result, the net income that Alaska taxes is only about 25% of the ultimate value of Alaska oil. See Chart 1. The remaining 75% represents value added by transportation, refining, and marketing activities "downstream" from Alaska production, and also includes the costs of producing the oil. Id.

The separate accounting of oil production income begins with the determination of gross income. AS 43.21 defines gross income as the value of the oil at the point of production -- that is, the wellhead. 4/ AS 43.21.020; 15 AAC 21.900(24). If the oil is not sold at the point of production, but instead is sold at an outside refinery, the refinery price is used as the first step in determining wellhead value. Finally, if the oil is

---

4/ In this brief, the word "wellhead" is used as a shorthand term for the point of production. It is not meant to be used in any technical sense, nor is it intended to distinguish between the point where the oil first comes out of the ground and the point at which the oil is accurately measured into a pipeline.

ESTIMATED REVENUES AND COSTS

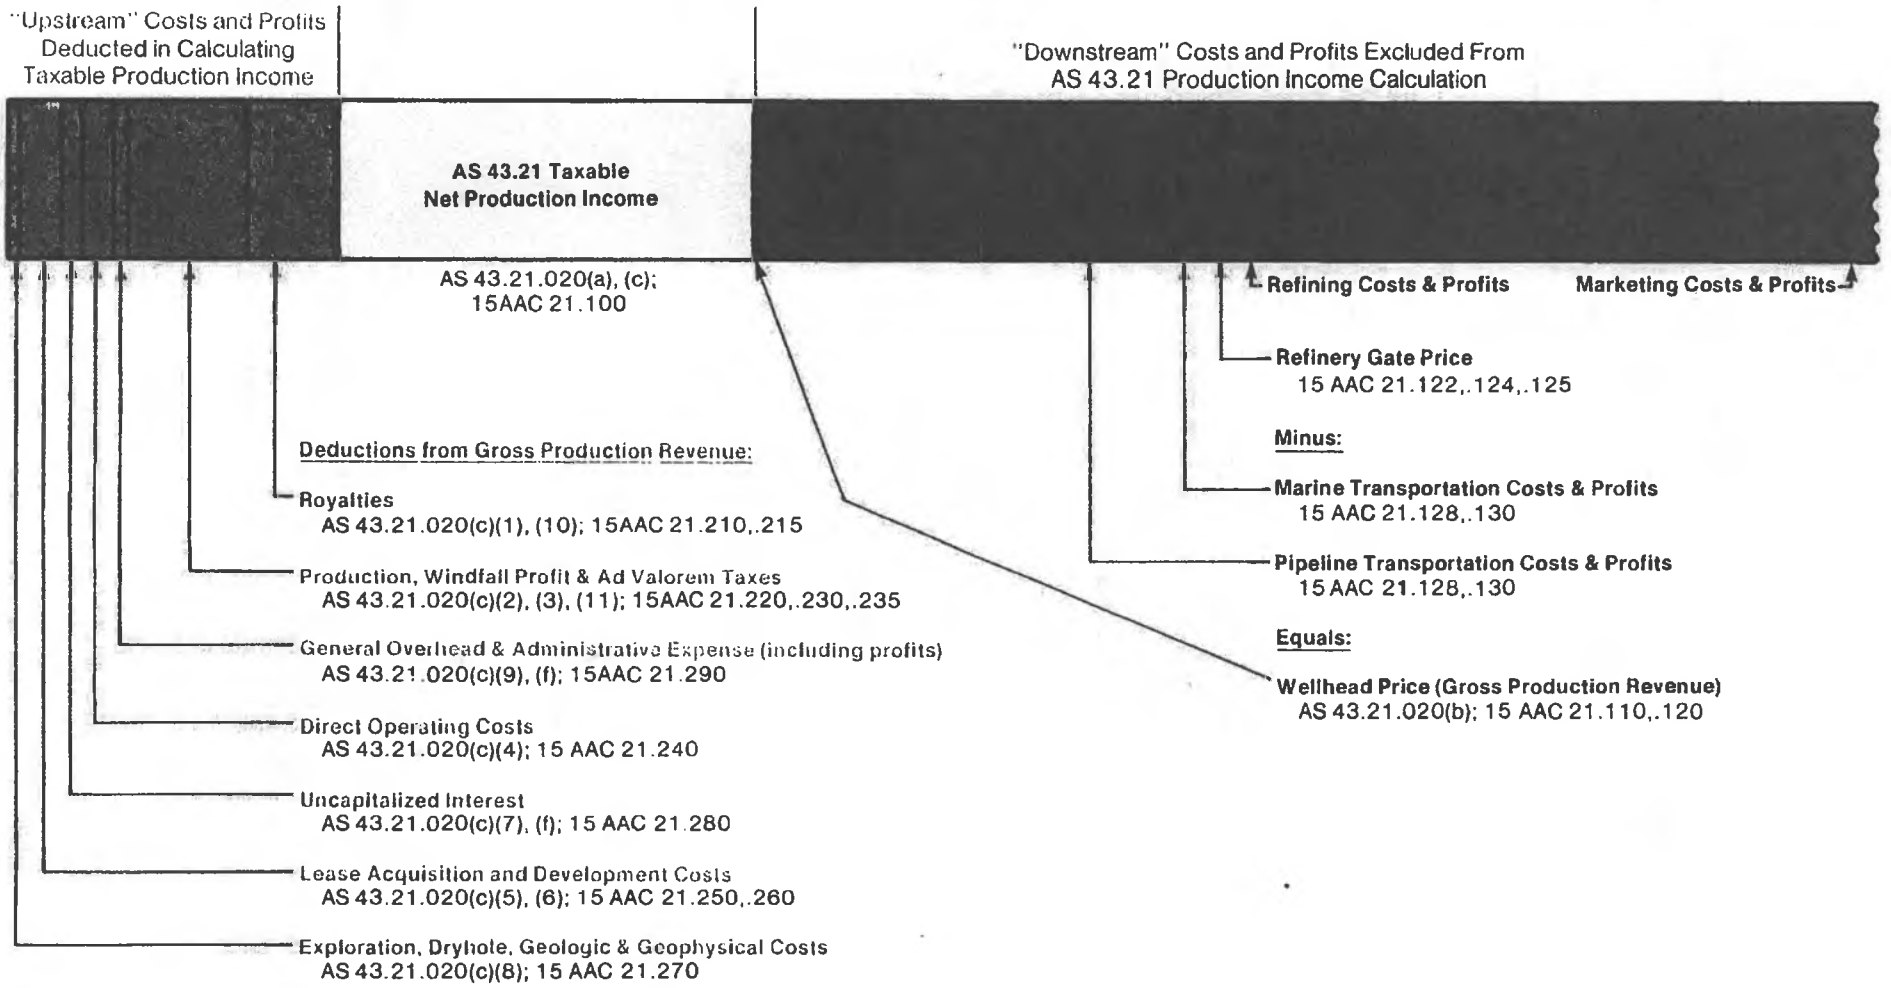
CHART 1

transferred unsold to the producer's refinery, a transfer value is established based upon comparable arm's-length sales or other market indicators.



Whenever a refinery price or transfer value is used, the full costs and profits of transporting the oil between the wellhead and the refinery are subtracted, or "netted back," to arrive at wellhead value. AS 43.21.020(b); 15 AAC 21.120-.130. This "netback" process is common in separate accounting methodology. It is also the process used in calculating the state's severance tax and royalties, and the federal windfall profit tax.

Between 1978 and 1980, the refinery gate price of North Slope crude oil averaged $18.92 per barrel. See Chart 1; R. 16917, 16929 (Deakin). After "netting back" to the wellhead, the gross value of the oil at the point of production averaged $11.78. Id.

Once a wellhead value has been determined, the costs of producing the oil are deducted. AS 43.21 permits the taxpayer to deduct every cost associated with producing Alaska oil, regardless of where those costs are incurred. AS 43.21.020(c). The various cost components, and their relative significance, are best portrayed graphically. See Chart 2.

One particular cost component warrants note. The Act permits a deduction for "general overhead or administrative expense ... attributable to deriving income from the production of oil or gas ... in the state." AS 43.21.020(c)(9). These

AS 43.21 TAXABLE NET PRODUCTION INCOME CALCULATION
EXCLUDES ALL COSTS AND PROFITS OF UPSTREAM AND DOWNSTREAM ACTIVITIES

costs -- which the companies would now make the focus of this lawsuit -- include corporate management, legal and accounting services, financing, personnel management, and research and development. They are deductible whether or not they are incurred in the state, so long as they are properly allocated to the production of oil and gas in Alaska. 5/ While these activities are large in number, they constitute only 2.8% of the cost of producing oil in Alaska. See Chart 2; R. 16929; Regulations also permit a deduction for reasonable profits attributable to these activities, if the taxpayer allocates profits in this manner on its own books of account. 15 AAC 21.290(b).

Oil and gas pipeline operators are required by federal and state regulatory agencies to maintain separate books for each pipeline system. Because all pipelines in Alaska are wholly in-state, the items of income and expense related to Alaska pipeline transportation can be easily ascertained. Under AS 43.21.030, a taxpayer's net Alaska income from pipeline transportation is keyed to the amount reported to the Federal Energy Regulatory Commission as net operating income.

5/ 15 AAC 21.290 allows the deduction of "general overhead and administrative expense ... which is properly allocated (on the basis of personnel time sheets, office space or another basis having general currency in the oil and gas industry)" to operations, lease acquisition or exploration in the state. If these expenses relate to both Alaska and out-of-state activities, continued

2. The Use of a Formula For All Other Income

AS 43.21.040 employs the UDITPA formula to apportion the other income of an AS 43.21 taxpayer to the state -- with one major difference. Worldwide oil production and pipeline transportation income is subtracted from the corporation's apportionable income, and the company's factors attributable to the production and pipeline transportation of oil in Alaska are excluded from the formula.

D. Proceedings Below

Appellants Arco, Exxon, and Sohio argued below that AS 43.21 violated the Commerce, Due Process, and Equal Protection Clauses of the United States Constitution, and the Equal Protection Clause of the Alaska Constitution. The case was decided on the state's motion for summary judgment. The record of that motion is divisible into three categories. Most of the record comprises the legislative history of AS 43.21, which was compiled and indexed by the state. R. 1628-12689. Second, there are competing affidavits from various economists and accountants presenting divergent economic theories on how oil production income is generally earned, and how, as a matter of policy, it

---

5/ continued
the regulation allocates those costs on the basis of in-state and out-of-state acreage, or another basis "if that other basis is more appropriate."

should be apportioned. Compare, e.g., R. 13069 (Church), R. 12986 (Davidson), R. 13111 with R. 1538 (Deakin), R. 1512 (Horst), and R. 1269 (Conrad).

Finally, there are a large number of affidavits submitted by the companies which describe various activities performed outside Alaska, that the companies assert generate a portion of Alaska production profits taxed by AS 43.21. See, e.g., R. 13220-13476 (Sohio Affidavits); R. 13552-13808 (Arco Affidavits); R. 13811 - 14248 (Exxon Affidavits). The state did not contest those factual allegations because the mere existence of these support functions -- which is all that these affidavits demonstrate -- is of no constitutional importance. Conversely, the companies offered no evidence that these activities generated any actual portion of oil production profits, or for that matter that they were profitable at all.

To warrant a trial on a Commerce Clause challenge, the taxpayer must offer quantitative evidence which shows that a particular tax base for a particular year is grossly disproportionate to actual in-state earnings. Container Corp. v. Franchise Tax Board, ___U.S.___, 77 L.Ed.2d 545, 556 (1983); Hans Rees' Sons, Inc. v. North Carolina ex rel. Maxwell, 283 U.S. 123, 125 (1931). The companies offered nothing in this regard. They did not even place their tax returns in the record. Rather, they rested their challenge upon the assertion that separate accounting inevitably fails to recognize that certain

out-of-state activities generate some portion of oil production earnings, and is thus inherently invalid. For this reason, the companies informed the lower court that they were not obliged to undertake any "elaborate showing." R. 12763. See also Appellants' Opening Brief at 45 (hereafter the companies' brief is referred to as "C.B.").

On May 27, 1983, Judge Carlson granted the state's motion for summary judgment. R. 17460-62. He found that the only factual dispute between the parties involved the competing economic and accounting theories presented by the parties' expert affidavits. These divergent theoretical contentions "are facts only in the sense that they provide premises in the process of legal reasoning, they are not that type of fact for which trial is mandated." R. 17460.

SUMMARY OF ARGUMENT

The lower court concluded that separate accounting is a permissible means of apportioning the income of a multi-jurisdictional taxpayer. Shortly after that decision, the United States Supreme Court reached the same conclusion in Container Corp. v. Franchise Tax Board, ___U.S.___, 77 L.Ed.2d 545 (1983). The lesson of Container is that a Commerce Clause challenge to a state's use of separate accounting is subject to the same standards applicable to mathematical formulas. The companies have failed to meet, or even attempt to meet that standard, which requires the companies to prove by "clear and cogent evidence"

that the amount of income attributed to Alaska by AS 43.21 is "grossly disproportionate" to actual in-state earnings. Accordingly, the judgment below must be affirmed.

When Alaska became a major oil-producing state, the legislature, after considerable study, adopted the traditional method of separate accounting long used by other oil-producing states -- including Louisiana, Oklahoma, and Mississippi -- to estimate in-state income from oil production. The separate accounting laws of these states are identical in all material respects to AS 43.21. Gross income is measured by the in-state value of locally-produced oil. Net income is then calculated by deducting the direct and indirect costs of producing that oil, whether those costs are incurred in or out of the state. This same method is used by the federal government to calculate the United States income of a foreign corporation producing oil in this country for sale abroad, and by various international tax conventions to which this country is a party.

The basis for this common preference for separate accounting is the recognition that this method of apportionment fairly estimates oil production income attributable to the jurisdiction. Further, it is commonly recognized that the three-factor UDITPA formula systematically underattributes income to the producing state. UDITPA assumes that oil production income is principally generated by a company's managers, geologists, accountants and salesmen, together with fixed assets such as office buildings and equipment. The oil reserves

themselves, however, are not counted in the "property" factor as an income producing asset. By contrast, separate accounting looks to the amount and value of oil produced when apportioning income.

The supreme courts of other oil-producing states have sustained their separate accounting statutes against the same challenges that the companies make here. In so doing, they have affirmed that separate accounting is a more accurate method of apportioning oil-production income than is UDITPA. Webb Resources, Inc. v. McCoy, 401 P.2d 879, 889 (Kan. 1965); Texas Co. v. Cooper, 107 So.2d 676, 690-91 (La. 1958); Magnolia Petroleum Co. v. Oklahoma Tax Comm'n, 121 P.2d 1008 (Okla. 1941).

This litigation is an attack on the use of separate accounting by oil-producing states. The heart of the companies' case is their contention that these states are precluded from using separate accounting because other states in which they also do business employ mathematical formulas. Sohio thus alleged, as Count I of its amended complaint in this action, that

> [f]ormulary apportionment is constitutionally preferred, and the tax based on Alaska's separate accounting may not constitutionally coexist with taxes imposed by other states on the basis of formulary apportionment.

R. 261.

This core argument was rejected in Container. The Court there held that "both geographic accounting and formula apportionment are imperfect proxies" for the elusive goal of allocating income; neither is more or less prone to

misallocation; and it would thus be perverse to force the states to substitute one inherently imprecise means for another. Container, 77 L.Ed.2d at 564.

The Court reiterated in Container that the Due Process and Commerce Clauses do not impose a single, uniform methodology on the states for attributing the taxable income of a multijurisdictional business. Only Congress has the ability to do so. Yet, despite repeated opportunities to enter this field over the past several decades, and after wide-ranging studies and legislative hearings, Congress has declined to require the states to use any particular method of income attribution.

After Container, the companies in this case had two options: either to withdraw their appeal, or to pretend that what they had attacked below as separate accounting was not in fact "true separate accounting" at all. The companies chose the latter, arguing here that the deference owed to state apportionment rules, including "true separate accounting," does not apply to AS 43.21. The Alaska law, they maintain, is not separate accounting because it fails to account for certain outside contributions to oil production income. And because of that peculiarity, it is not a form of apportionment.

The argument that AS 43.21 is not "true" separate accounting is ridiculous. It functions precisely like the laws of other oil-producing states, the Internal Revenue Code, and international tax conventions.

Moreover, AS 43.21, like every separate accounting statute, is very much a form of apportionment. It estimates that portion of a taxpayer's worldwide income which should be attributed to the taxing state, and in so doing "apportions" a part of that worldwide income to the state. Its purpose is the same as that of any mathematical formula. As the Court said in Container, the separate accounting "approach divides the pie on the basis of formal accounting principles. The formula apportionment method divides the same pie on the basis of a mathematical generalization." 77 L.Ed.2d at 568. Each is a method of "apportioning" a part of the oil company's worldwide income to a state.

The issue in this case, then, is not whether Alaska's tax is "apportioned" -- it certainly is that. The issue is whether the statute achieves a fair apportionment. And, as noted above, the test of fair apportionment is whether or not the statute has in fact grossly overattributed income to the taxing state.

The companies did not attempt to show that AS 43.21 in fact attributed substantially more income to Alaska than they actually earned here. Instead, they chose to rest their case upon the entirely theoretical objection that AS 43.21 inherently taxes some profits attributable to the activities of personnel in other states.

There are three fundamental failings to this argument. First, if one assumes that activities in one state contribute to

profits in another, then contributions made to Alaska oil production by out-of-state activities are only one side of a two-way street. As these companies' annual reports and public pronouncements make clear, the steady profits available from Alaska production activities contribute to the profitability of these companies' operations in other parts of the world. Thus, profits from Alaska crude have permitted these companies to modernize refineries in California, acquire new production properties in the Gulf of Mexico, and diversify into other industries which have no connection with Alaska. However, AS 43.21, like all separate accounting laws, does not attempt to tax any of this added value.

Second, every separate accounting jurisdiction -- including other oil-producing states, other nations and the United States -- treats the expenses associated with the many activities discussed by the companies as deductible costs of production; no separate accounting system treats them as what accountants call "profit centers." Nothing in the United States or Alaska Constitutions requires Alaska, and Alaska alone, to view out-of-state support activities as "profit centers."

Third, an identical argument was made and rejected in Moorman Mfg. Co. v. Bair, 437 U.S. 267 (1978). In Moorman, the taxpayer argued that Iowa's single-factor sales formula inherently taxed income earned by manufacturing activities in Illinois. The Court, however, held that the constitution does not invalidate a state income tax simply because it reaches some

income which does not have its source in the taxing state. Due process, the Court said, requires only that income attributed to the state be rationally related to in-state values. To establish that a state's income-allocation method fails this test, a taxpayer must prove that the state has attributed an amount of income which is grossly disproportionate to its actual in-state earnings.

The companies' argument regarding their outside support activities spins a circle from which one may only escape by recognizing it as such. The companies concede that no apportionment method is perfect; indeed, this inherent imprecision is the reason that a taxpayer must prove a grossly disproportionate result. The companies argue, however, that because AS 43.21 is not perfect, it is therefore not a form of apportionment and is thus per se invalid. Because the companies believe that AS 43.21 is facially invalid, they have placed nothing in the record which indicates whether they would attribute 30%, 3%, or 0.003% of the income taxed by AS 43.21 to outside activities.

Because the companies declined to make any showing of a grossly disproportionate attribution of income, the court below was presented with what amounted to a default, or total absence of proof. Despite an enormous record, there was no evidence which, if taken as true, would make the companies' prima facie case. There was, in short, no need for a trial to test allegations that were never made.

Since AS 43.21 is fairly apportioned, the companies' multiple taxation argument falls as well. Container confirmed that multiple taxation is simply the evil that the fair apportionment test is designed to avoid. If a tax statute is fairly apportioned, it does not create an unconstitutional risk of multiple taxation. The minimal risk of overlapping taxation that may arise from a diversity of apportionment rules is a matter for Congress to address.

The companies' principal multiple taxation argument -- that AS 43.21 taxes "100%" of production income from Alaskan oil, while other states which use a formula are also entitled to "tax a share" of that same income -- is based upon their belief that formulas and separate accounting are automatically asymmetrical. The Court in Container held that they are not. Separate accounting taxes "100%" only in the sense that every state taxes 100% of the income which it apportions to itself. Moreover, no other state has a "right" to tax a share of the income apportioned to Alaska by separate accounting. The inclusion of Alaska production income, and indeed all worldwide income, in the apportionable base of various formulas does not mean that mathematical formulas take a share of every extra-territorial component of income. Rather, the theory upon which apportionment formulas have been sustained is that they will, once all calculations are completed, produce an amount of net income which is an acceptable approximation of income from activities within the taxing state.

According to the companies, traditional geographical separate accounting is no longer a constitutionally accepted way of estimating the domestic income of a multijurisdictional company. That argument would, if accepted, invalidate the separate accounting statutes of a number of other oil producing states -- statutes consistently sustained by the highest courts of those states. It is an argument foreclosed by the United States Supreme Court in Container, and it should be rejected by this court as well.

ARGUMENT

I. THE ALASKA LEGISLATURE CHOSE SEPARATE ACCOUNTING AS THE MORE REASONABLE MEANS OF ESTIMATING THE IN-STATE INCOME OF MULTISTATE OIL PRODUCERS.

The Alaska Legislature's decision to replace UDITPA with separate accounting was made for two related reasons. First, the legislature learned that the three-factor formula, when applied to oil production activities, results in companies paying taxes on only a fraction of the income which they actually earn in Alaska. See Appendices B and C. 6/ Second, and

---

6/ Appendix B is a compilation of representative citations to the legislative history of AS 43.21 which support the legislature's findings. Appendix C has two parts. Part 1 is a narrative summary of the legislative history which was submitted with the state's summary judgment motion. R. 1218-68. Part 2 is the state's response to the companies' legislative history narrative. R. 16931-59. That company narrative (R. 12840-83) was submitted as a separate appendix to their brief.

of that underattribution, use of the three-factor formulas bestows a benefit on multistate oil companies that is not shared by other Alaskan businesses. It allows those corporations to pay tax on only a fraction of their Alaska income, which substantially lowers their effective tax rate, while other businesses -- both local oil producers and other multistate industries -- pay taxes at the full statutory rate of 9.4% on all income earned in Alaska. Id. These conclusions are set out in the legislature's findings:

> 1. [The three-factor apportionment formula in UDITPA] does not fairly represent the extent of the business activities in this state of multistate corporations engaged in the production and pipeline transportation of crude oil and natural gas in Alaska; and
>
> 2. [T]he assessment of income tax against a multistate corporation engaged in the production or pipeline transportation of oil or natural gas shall be commensurate with the tax that would be assessed against a corporation owning and operating only those assets of the multistate corporation which are in or directly associated with this state.

Sec. 1, ch. 110, SLA 1978.

The legislature, in choosing an alternative to UDITPA, drew precisely the same conclusion reached by the taxing authorities of other producing states: that separate accounting is the most accurate way to measure the income of an oil producer. After four years of study, Alaska chose the system used by those other states, including Mississippi, Oklahoma, and

Louisiana. R. 3040 [D. 8-130, F. 14 at 48]; R. 1929 [D. 8-018, F. 4 at 10]; R. 7881 [F. 62 at 66]. 7/

Prior to 1978, Alaska used the UDITPA formula for the same reason other states use it. It is simple and easy to administer; it avoids the possibility of taxpayer manipulation associated with the setting of transfer prices under separate accounting; and as a general rule, it produces a fair, rough approximation of a taxpayer's in-state earnings. R. 5369-70 [D. 7-139, F. 35A at V-15, V-16]. During early statehood years, Alaska's economy was as diversified as it was marginal, and the state lacked the wherewithal to engage in sophisticated tax accounting. During the 1960's, for example, the state's limited auditing capabilities permitted only mathematical checks on tax returns. Appendix C at 10 (R. 1226). Using UDITPA as a rough norm was expedient. If it underattributed the income of a particular industry, the fiscal consequences were likely to be small. In short, when a state has a diversified economic base, misattribution for one segment of that economy will in all probability be diluted and absorbed by other economic activity. R. 5369-70 [D. 7-139, F. 35A at V-15, V-16]; R. 1546, 1554, 1558 (Deakin).

7/ Legislative history documents referred to in this brief are cited to the record and also to the filing system of that history. Thus, "D. 8-111, F. 22" means that the document originated in 1978, is the 111th document from that year, and is found in legislative history file 22.

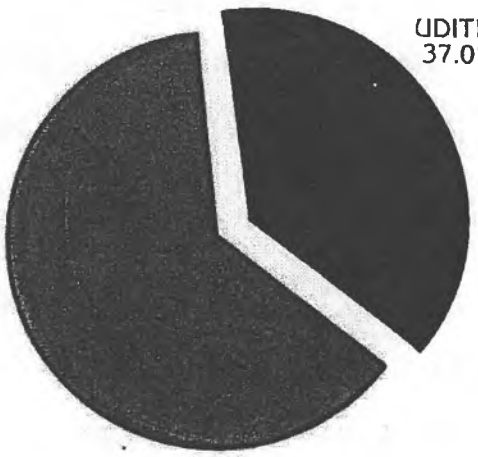
The three-factor formula employed by UDITPA is based on two assumptions that are typically valid for most economic enterprises. The first is that all segments of an integrated enterprise are equally profitable. See, e.g., Container, 77 L.Ed.2d at 565 n.20. The second is that payroll, property, and sales are the only contributors to income, and each contributes equally. Id. UDITPA was developed principally for mercantile industries. Blind application of UDITPA to other industries may, as Professor Jerome Hellerstein has recently noted, sacrifice fairness on the altar of consistency:

> The methods used by the States in dividing income from interstate and international business could benefit from closer attention by the tax committees of State legislatures and tax administrators to the need to devise apportionment methods that respond to the characteristics of various industries. Some of the awkward and unsatisfactory apportionments of income that are currently being made by the States are due to the oft-forgotten fact that the standard three factor formulas were developed and designed to meet the needs of manufacturing and mercantile industries, and are poorly adapted to a good many other businesses.

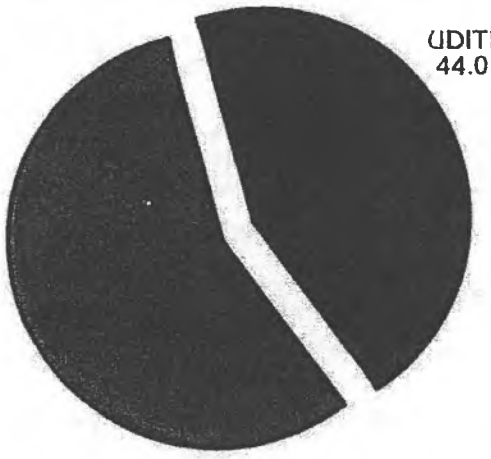
J. Hellerstein, State Taxation: Corporate Income and Franchise Taxes 689 (1983).

The legislature concluded that UDITPA was indeed poorly adapted to the oil production industry. Sec. 1, ch. 110, SLA 1978. See generally Appendices B and C. It would attribute to the state only 20%-25% of the income earned in Alaska by oil producers. As even industry information demonstrated, oil producers would pay an effective tax rate of 2%-3%, while other

businesses paid the statutory 9.4%. See Charts 3 and 4; R. 1700-01, 1703 [D. 8-125, F. 2 at 2-3, 5]. See also R. 2344, 2346-47, 2350, 2353 [D. 8-126, F. 5 at 23,25-26, 29, 32]; R. 1920-22 [D. 8-018, F. 4 at 1-3]. See also Appendix B.



As early as 1971, the New York economics firm of Walter Levy and Associates began warning the legislature that the use of UDITPA to tax impending Prudhoe Bay production profits would result in a gross underattribution of income to Alaska. R. 9858-59. Levy, and his associates Milton Lipton and Richard Kilgore, advised the state that the sales, property, and payroll factors of the UDITPA formula were not suited for apportioning oil production income. 8/ Moreover, those factors were in turn applied against the taxpayer's income as determined under the Internal Revenue Code, which for the oil industry in particular was riddled with subsidies having little or nothing to do with Alaska's tax policies. R. 3831-32 [D. 7-018, F. 22 at 5-6]; R. 9858-59 [F. 36-37]; R. 9741-42 [F. 62 at 26-27]. They predicted that unless Alaska changed its income tax attribution method for oil production, most oil production income earned in Alaska would escape taxation. R. 9894 [F. 65 at 14].



8/ R. 9226 [D. 5-014, F. 56 at 21-23]; R. 9307-08 [D. 5-045, F. 56 at 8-9]; R. 8450-51 [D. 6-107, F. 48 at 1-3]; R. 7172 [D. 6-031, F. 43 at 7]; R. 3858-59, 3864-65, 3878 [D. 7-019, F. 22 at 2, 3, 10, 11, 24]; R. 3982 [D. 7-022, F. 22 at 3];R. 1920-22 [D. 8-018, F. 4 at 1-3]; R. 2024-26, 2036-37, 2042 [D. 8-127, F. 4 at 15-17, 27-28, 33].

CHART 3

In 1974, the legislature directed the Legislative Council to conduct an "interim study of the corporate tax structure in Alaska and of possible alternate systems ...." HCR 78, 8th Leg., 2d Sess. (1974 Alaska). In 1975, Senate President Chancy Croft created the Special Committee on Revenue and Taxation, beginning a four-year debate on the appropriate means of apportioning the income of Prudhoe Bay producers. R. 9322-23 [D.5-015, F. 57]. From 1975-78, 11 major tax bills were considered in the course of 63 hearings. R. 10453-10770; Appendix C at 3 (R. 1220). The legislative history of AS 43.21 is large and comprehensive, reflecting a breadth of analysis by tax experts, economists, and attorneys from all sides of the controversy. 9/

9/ The legislative history is before this court in a uniquely usable fashion. As part of its summary judgment motion, the state assembled every document which was before the legislature during its deliberations, and transcribed every hearing. A complete set of indices allows easy access by subject matter or witness. A separate binder contains all versions of every bill. The result is a research tool unique in Alaska litigation.

The companies would prefer that this court ignore this source, dismissing it as mere bulk. C.B. at 65. Rather, they suggest that the court rely upon a sparsely-cited, argumentative appendix prepared by their counsel. C.B. at 65 n.23. This appendix relies largely on two sources. One is a post-enactment analysis by Mike Bradner, who was not a legislator when AS 43.21 was enacted and who admits that his personal theories about legislative motivation are not supported by the legislature's deliberations on AS 43.21. See Appendix C at 72-75. (R. 16940-43). The second are the 1975 writings of one Prof. Witherspoon, who was briefly retained by the legislature to offer his thoughts on a then-pending property tax bill, and who disappeared from the scene in 1976. Appendix C at 66-67 (R. 16935-37).

The Senate relied extensively on Levy, Lipton, and Richard Kilgore. Appendix C at 3 (R. 1256). The House retained economist Michael Tanzer, who in 1977 issued a major report on projected Prudhoe Bay rates of return. The report was valuable to the legislature in deciding whether the underattribution of income inherent in UDITPA was necessary to maintain a healthy oil industry in the state. Tanzer concluded that Prudhoe Bay producers would earn a 35% rate of return, making it obvious that this incentive was not necessary. 10/ R. 6054-56 [D. 6-003, F. 39 at 5-7].

The Hammond administration retained Professors Jerome Zeifman and Kenneth Ainsworth, who had served, respectively, as chief counsel and staff economist to the congressional Willis Committee. R. 5356 [D. 7-139, F. 35A at V-2]. The Willis Committee's 1964 report on state income taxation remains one of the most comprehensive reviews of state apportionment rules. 11/ Zeifman and Ainsworth's 1977 report, "The Taxation of the Petroleum Industry Under Alaska's Corporate

---

10/ Tanzer's estimates, in fact, were understated. Tanzer, after all, could not foresee the doubling of world oil prices which occurred after the enactment of AS 43.21.

11/ Report of the Special Subcommittee on State Taxation of Interstate Commerce of the Committee on the Judiciary, H. Rep. No. 1480, 88th Cong., 2d. Sess. (1964) (referred to herein as the Willis Report.)

Income Tax," is an invaluable source document in understanding the shortcomings of UDITPA. R. 3233-89 [D. 7-001, F. 18].

The oil industry, in turn, utilized Arthur Anderson & Co. and several law professors, as well as their substantial in-house resources. They also relied on the work of Wainwright Securities. Both Anderson and Wainwright submitted lengthy reports which, in fact, did much to substantiate the legislature's conclusions. R. 2839-2938 [D. 8-080, F. 13]; R. 4879-4963 [D. 7-061, F. 32].

From this pool of expertise, and the staff resources of the legislature and administration, the legislature concluded that the assumptions upon which UDITPA relied do not hold for oil production income, and, of the available alternatives, separate geographic accounting is the most fair, and most accurate.

A. The UDITPA Formula Does Not Fairly Apportion Oil Production Income.

1. The Sales Factor

Under UDITPA, sales receipts are credited solely to the destination state -- that is, the state where the goods are ultimately sold. AS 43.19.010 Art. IV, §§ 16-17. If Alaska oil is delivered to California and sold to a third party there, the full gross sales price is credited to California. Because that gross price includes all costs and profits earned to that point -- including production profits -- the destination sales factor irrebutably presumes that all income from the production of North

Slope oil is earned in California. R. 5371-72 [D. 7-139, F. 35A at V-17 to V-18]. If, however, the oil is merely transferred to a refining division in California, and then sold to a retailer in Arizona, Arizona becomes the destination state, and the presumption is that all North Slope production profits are earned in Arizona.

The destination sales factor of UDITPA originates not from economic reason, but from political influence. It was devised at the behest of manufacturing states in order to provide a more favorable climate for local industry. Willis Report, supra, at 123-28. A destination-state sales factor, as the United States Supreme Court has observed, is akin to a situsing rule, which specifically allocates income on the basis of a legal fiction, without taking a fair look at how income is actually generated. General Motors Corp. v. District of Columbia, 380 U.S. 553 (1965).

In mercantile industries, it may well be that the value of manufacturing activities in the state of origin is substantially enhanced by marketing activities in the state of destination. As Exxon has acknowledged, however, oil production income is "fully earned at the wellhead," largely because the price of crude oil is principally a function of external market conditions and scarcity value. R. 1554-55.

Under UDITPA, then, Alaska's sales factor would be virtually nothing, regardless of the amount of oil taken from Prudhoe Bay. R. 3865 [D. 7-019, F. 22 at 11]; R. 9226 [D. 5-014,

F. 56 at 21]. The companies acknowledge that only a "tiny fraction" of North Slope oil sales are credited to Alaska under UDITPA -- in the case of Arco, 1.5%. C.B. at 22, 50. Thus, as the Department of Revenue concluded in its comprehensive 1977 tax study:

> Although there are problems with each of the three factors, the use of the uniform sales factor produces the greatest distortion of oil and gas corporation activity in Alaska. That is, the total value of petroleum products is assigned only to the state where the final destination sale is made. No value is assigned to the state where the petroleum is produced.

R. 5371 [D. 7-139, F. 35A at V-17].

It is the function of the property and payroll factors of UDITPA to moderate the extreme effects of the sales factor, which by itself will lead to taxation of extraterritorial values. General Motors Corp. v. District of Columbia, 380 U.S. at 561. With respect to oil production, however, the remaining factors compound, rather than cure, the problem.

2. The Property Factor

In calculating the value of property to be placed in Alaska's numerator, UDITPA, by following industry accounting practice, does not include the value of the oil reserves. 12/ Instead, the property factor includes only the cost of the wells

---

12/ The United States Securities and Exchange Commission has continued

and appurtenances which produce that oil, and the acquisition cost of the lease. AS 43.19.010 Art IV, § 11; R. 1546-1550. As a result, and as the legislature was informed, Prudhoe Bay assets were valued under UDITPA at about one percent of their worth. R. 8377 [D. 6-096, F. 46 at 1]. The greatest income producing asset that an oil producer owns is its oil reserves. Alaska's property factor was largely unaffected by either the discovery or production of Prudhoe Bay reserves, although those reserves, rather than the value of the surface structures, are determinative of the profitability of the field.

In proceedings before the Federal Energy Regulatory Commission, the companies acknowledged the deficiencies in the valuation of production property:

> [A]ccounting for cost completely ignores the discovery value of assets added through exploration. For successful companies this can result in substantial understatement of the value of assets.
>
> As is generally the case for companies with oil and gas reserves, Sohio reports its Prudhoe Bay reserves on its balance sheet at cost, which is

---

12/ continued
noted:

> The discovery of oil and gas is the most significant event in exploration, development, and production activities. Traditional accounting methods do not provide for recognition of this event in recording the assets or earnings of companies engaged in this industry ....

R. 1549.

> considerably less than informed estimates of the value of such reserves.

R. 1548.

There are, moreover, several accounting rules which further warp the UDITPA property factor. For example, the Internal Revenue Code allows many costs that are incurred in building surface structures -- intangible drilling costs ("IDC's") -- to be expensed rather than capitalized, as similar costs would be in any other industry. 26 U.S.C. § 263; R. 1550. Thus, they are both excluded from the value of the structure and subtracted from the companies' net income against which the UDITPA factors will ultimately be applied. IDC's, then, hit the producing state coming and going: the property value is reduced, and overall income is diluted.

3. The Payroll Factor

Under UDITPA, payroll is included in a state's numerator only if the employee is based in the state. AS 43.19.010 Art. IV, §§ 13-14; R. 1558-59. Many oil company employees working in Alaska are not based in the state, but are on temporary, remote-location assignment.

Moreover, much production work is done not by employees, but by independent contractors. R. 1550, 1559-60. Payments to independent contractors do not appear in the payroll factor. R. 1550, 1559-60. Rather, they are expensed as IDC's,

which -- again -- dilute both the property factor and apportionable income.

Finally, oil production activities are not labor intensive. R. 3865 [D. 7-019, F. 22 at 11]; R. 3885 [D. 7-020, F. 22 at 3]. They are, instead, property intensive -- assuming, as UDITPA does not -- that "property" includes the oil reserves. Simply put, it takes far less labor to produce a dollar of production income than it does to produce a dollar of marketing income. Id. Sohio provides a telling example. Based on its 1978-80 annual reports, 90% of its total worldwide income was due to Alaska production profits. R. 1559 (Deakin). Nevertheless, less than 10% of its employees were based in Alaska. C.B. at 50.

4. The Disproportionality of Production Profits

Production activities are the most profitable segment of an integrated oil company's operations. R. 1561-64. At the same time, however, they account for the smallest contribution to UDITPA's factors. Id. With respect to Exxon in particular, and the oil industry in general, exploration and production accounts for only 20%-30% of an integrated companies' sales, property and payroll, but 70%-90% of the companies' net income. Id. For Alaska, with a sales factor close to zero, the disparity is unquestionably even more severe.

Edward Deakin, a professor of accounting at the University of Texas, has estimated the cumulative effects of this deflation of the UDITPA factors for a typical Alaskan oil

producer. He concludes that UDITPA attributes to a producing state about 20% of income earned in that state. R. 1543, 1546-47, 1557, 1560-61. That is commensurate with the conclusion reached by the legislature three years before Deakin's study. It is also in accord with the companies' concessions in this litigation. According to the companies, between 1978-80, UDITPA would have attributed to Alaska only about 9% of Arco's total income, while separate accounting attributed 46%. Similarly, UDITPA would have attributed only 24% of Sohio's total income, while separate accounting attributed 91%. C.B. at 50. This disparity, moreover, has been frequently cited by courts when holding that the use of UDITPA for oil production income led to a manifestly unfair result. Texas Co. v. Cooper, 107 So.2d 676 (La. 1958) (UDITPA income: $1.5 million; separate accounting income: $13 million); Webb Resources, Inc. v. McCoy, 401 P.2d 879 (Kan. 1965) (UDITPA income: $40,000; separate accounting income: $157,000); Amoco Production Co. v. Armold, 518 P.2d 453 (Kan. 1974) (UDITPA income: 2.7% of worldwide; separate accounting income: 23% of worldwide).

The disproportionality of production profits to production factors undermines UDITPA's central assumption that all property, payroll, and sales are equally profitable. UDITPA's problems for oil production are intrinsic. For example, while production is responsible for some 70% of an average integrated oil company's profits, production sales as a percentage of all gross receipts average only 20% industry wide.

R. 1556-57. If all sales were equally profitable, 20% of gross receipts would represent 20% of the companies profits. Thus, even if Alaska were to modify UDITPA by employing an origin sales factor, there would still exist a 350% margin of error as to that factor.

The weaknesses of UDITPA were corroborated by independent analysis. In a 1977 "Industry Review" of North Slope oil prepared for investors, Wainwright Securities concluded:

> From Alaska's standpoint, passage of the [income] tax would undoubtedly resolve some glaring deficiencies in its current income tax treatment. Also, it would ensure that the North Slope Oil producers pay something resembling the 9.4% nominal tax rate imposed on domestic (Alaskan) corporations doing business only in the state -- versus the 2-3% rate that otherwise would apply to a multinational oil company.

R. 4911-12 [D. 7-061, F. 32 at 33-34] (emphasis added).

B. The Legislature Had Good Reasons For Choosing Separate Accounting Over a Modified Formula.

Realizing that UDITPA systematically distorts production income attributable to Alaska does not in itself compel the use of separate accounting. Indeed, much of the debate before the legislature centered on whether to employ separate accounting -- which was favored by the legislature -- or a modified formula, which was favored by the administration. See Appendix C at 35-59; R. 1248-68 et seq. The Hammond administration initially opposed separate accounting for the very reasons that it is disfavored by some states -- the possibility of

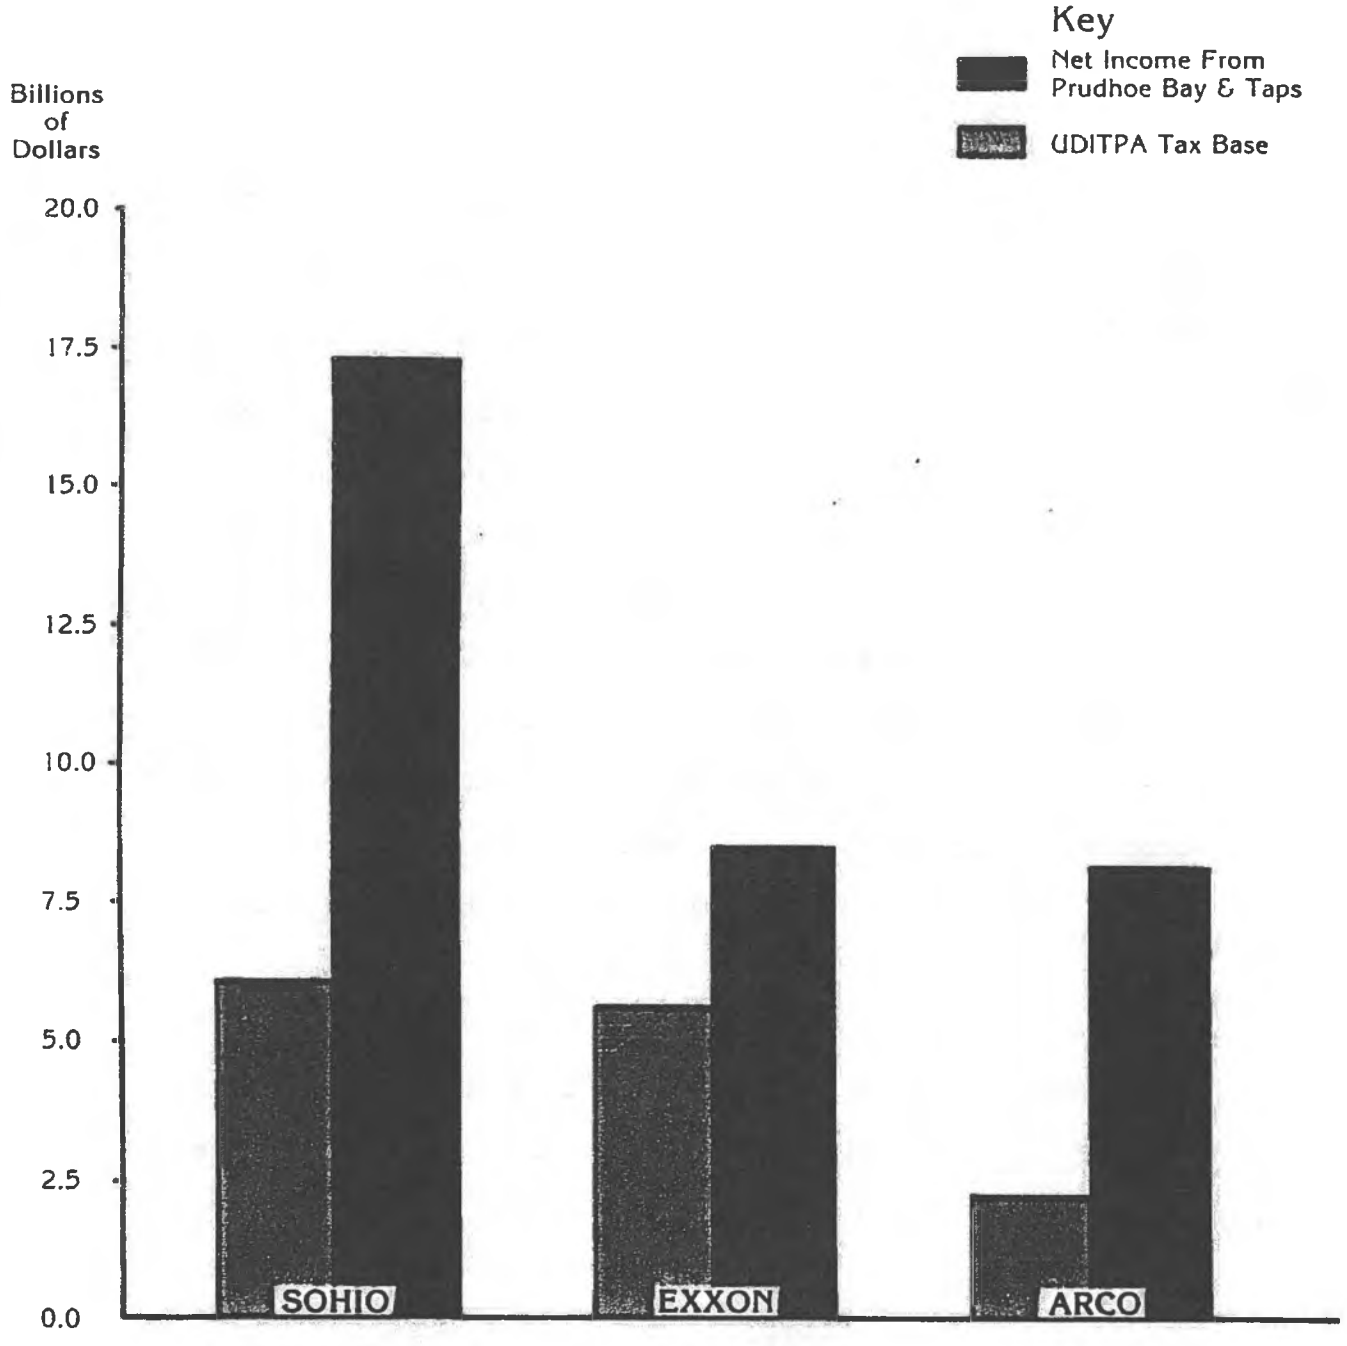
taxpayer manipulation in setting a transfer price. R. 3621-22 [D. 7-173, F. 19 at 15-16].

Separate accounting, however, is frequently utilized to apportion oil production income because crude oil is commonly traded and has an ascertainable value. The oil industry must report the wellhead value of its oil production for a variety of purposes -- including the state severance tax and lease royalties. See e.g., AS 43.55. In 1978, prior versions of separate accounting bills were amended by the legislature to allow the Department of Revenue to rely upon these independent calculations of wellhead value. R. 1846 [D. 8-132, F. 2 at 3]; SCS for CSHB 322. That satisfied the administration's objections. Id.

These two approaches -- a modified formula applied against book rather than federal taxable income, and separate accounting -- were each predicted to generate comparable amounts of additional revenue. 13/ R. 5174-76 [D. 7-153, F. 34];

13/ Under UDITPA, a state's factors are multiplied against federal taxable income. Federal taxable income is reduced from book income (income reported to shareholders) by a variety of deductions which do not reflect actual costs. The oil industry enjoyed special subsidies, including the expensing of intangible drilling costs and the then-existing percentage depletion allowance. These were in addition to liberal use of early depreciation, net operating loss carryforwards and investment tax credits. As a result, the effective federal tax rate for the eight oil companies doing business in Alaska in 1977 was between 1.8% and 35.6%, instead of the 48% statutory rate. Sohio and Arco had effective federal tax rates of 4.2% and 14%, respectively. R. 5362 [D. 7-139, F. 35A at V-8].

R. 3132 [D. 8-101, F. 17]. The separate accounting approach was chosen because it squarely addressed the issue of tax equity. 14/ Under separate accounting, producers with equal volumes of production and equal costs in Alaska would pay the same tax, whether they were local or multi-state companies, and regardless of their worldwide company structure. See Chart 4. Under modified apportionment they would not, as industry reports themselves demonstrated.



Two industry reports in particular made the unintended point that companies with identical holdings would pay vastly different taxes under any formula. In 1976, Sohio presented "Sohio Submission One," which postulated three oil producers, each owning one-third of Prudhoe Bay, but each having very different configurations outside of Alaska. R. 8510 [D. 6-122, F. 50 at 4]. Although Alaska production income was identical for the three, the Alaska tax base attributed to each by UDITPA differed dramatically. R. 8518 [D. 6-122, F. 50 at Table 1A]; R. 8529

14/ R. 4759 [D. 7-054, F. 30 at 1] (Croft) ("the income tax is not designed to pick up additional money but to try to establish equal treatment between companies operating within the state"); R. 1704 [D. 8-125, F. 2 at 6] (Gallagher) ("If we're seeking to raise money -- I think the most effective way is through a severance tax."); R. 1661 [D. 8-006, F. 1 at 1] (Croft) ("the [modified formula] proposal is 'unfair' because it just tinkers with the formula ... separate accounting [is the] most equitable method because under it every corp[oration] pays [the] same effective tax rate."); R. 3309 [D. 7-004, F. 18 at 13] (Ziefman).

Net Income From Prudhoe Bay and Taps

Compared With UDITPA Tax Base

(Life of Field)

Source: Arthur Anderson Study, Exhibit VIII(a)(R. 2899)

CHART 4

[D. 6-124, F. 50 at 3](Lipton); R. 3829 [D. 7-018, F. 22 at 3] (Lipton); R. 8526 [D. 6-123, F. 50 at 3] (Tanzer).

A 1978 industry-sponsored report by Arthur Anderson & Co. illustrated the same point. Exxon and Arco, with nearly identical earnings from Prudhoe Bay and TAPS over the life of the field, would pay vastly different taxes both under UDITPA and the proposed modified formula:

(in millions)	Arco	Exxon	Sohio
Net income from Prudhoe Bay and TAPS:	$8,145	$8,510	$17,249
Taxable income under UDITPA:	2,208	5,639	6,065
Taxable income under modified formula:	4,623	9,013	12,336

R. 2899 [D. 8-080, F. 13 at Table VIII(a)]; R. 2947 [D. 8-081, F. 13 at Supplemental Table II]. See Chart 4. As the Legislative Affairs Agency advised the Subcommittee on Oil and Gas, the modified formula would increase state revenue, but "the issue of tax equity as raised by many legislators in the past has [not] been adequately addressed. Conversely, there is much in the [separate accounting] proposal to recommend it on the grounds of equity ...." R. 4697 [D. 7-041, F. 28 at 3]. See also, R.4704-05 (Lipton) [D. 7-042, F. 28 at 5 and 6].

Thus, separate accounting was chosen as the fairest means of apportionment precisely because it looked only at actual in-state earnings. A modified apportionment formula, the legislature concluded, would simply be "tinkering," that is,

substituting one group of arguable assumptions for another. R. 1661 [D. 8-006, F. 1 at 1].

Separate accounting was not chosen because it would inherently cause more income to be attributed to the state. As Milton Lipton advised the legislature, separate accounting has no inherent bias, and could result in decreased taxation for less profitable enterprises. R. 2156 [D. 8-131, F. 4 at 12]; R. 1941 [D. 8-018, F. 4 at 22]. As it happened, oil prices rose dramatically after AS 43.21 was enacted, resulting in income to the producers and revenue to the state far beyond the highest projections of any 1978 forecaster. 15/ As the Department of Revenue told the legislature, had oil prices instead dropped as dramatically, income attributable to the state by separate accounting would also have declined. R. 5450 [D. 7-139, F. 35A at VI-16].

II. SEPARATE ACCOUNTING, AS EMPLOYED BY AS 43.21, FAIRLY APPORTIONS OIL PRODUCTION INCOME TO ALASKA

A. Introduction

The Commerce Clause issues raised by this appeal were recently decided by the United States Supreme Court. In

---

15/ In 1976, the legislature projected that the 1981 OPEC-set price of crude oil at the refinery would be $16.82 per barrel. R. 8409 [D. 6-102, F. 47 at 3]. The actual 1981 price was $37.05 per barrel. See "Monthly Energy Review," Energy International Administration, United States Dep't of Energy, July 1983.

Container, the Court reaffirmed what the lower court here had already concluded -- that separate accounting, of the kind employed by AS 43.21, is a permissible means of apportioning a unitary business' worldwide income. It is compatible with the use of mathematical formulas by other jurisdictions, and it is no less fair than the three-factor UDITPA formula.

Without question, every state must divide, or "apportion," the income of multistate taxpayers in some manner. Ohio may not, for example, tax all of Sohio's income simply because the company is headquartered in that state. Sohio also does business in Alaska, which entitles Alaska to tax a portion of its multistate income. Because of the inherent imprecision of all income attribution methods, and the eminently debatable nature of the true source of income, no one apportionment system is superior:

> In the case of a more-or-less integrated business enterprise operating in more than one State, however, arriving at precise territorial allocations of "value" is often an elusive goal, both in theory and in practice. For this reason and others, we have long held that the Constitution imposes no single formula on the States.

Container, 77 L.Ed.2d at 552 (citing Mobil Oil Corp. v. Comm'r of Taxes of Vermont, 445 U.S. 425, 438 (1980), Butler Bros. v. McColgan, 315 U.S. 501, 507-509 (1942), Underwood Typewriter Co. v. Chamberlain, 254 U.S. 113, 121 (1920), and Wisconsin v. J. C. Penney Co., 311 U.S. 435, 445 (1940). To establish that a state has exceeded the bounds of the Commerce and Due Process Clauses,

a taxpayer must meet the "'distinct burden of showing by "clear and cogent evidence" that [the state tax] results in extraterritorial values being taxed ....'" 77 L.Ed.2d at 552 (quoting Exxon Corp. v. Wisconsin Dep't of Revenue, 447 U.S. 207, 221 (1980), quoting Butler Bros. v. McColgan, 315 U.S. at 507, quoting Norfolk & Western Railway Co. v. North Carolina ex rel. Maxwell, 297 U.S. 682, 688 (1936)).

In reiterating the familiar standards of the Commerce and Due Process Clauses, the Court in Container held that a state's system for apportioning the income of a multistate taxpayer must meet two requirements. First, it must be "internally consistent," so that its use in every jurisdiction would result in the taxpayer being taxed on no more than 100% of his income. 77 L.Ed.2d at 556. Second, the state's system must actually reflect a reasonable sense of how income is generated. The burden of proof rests with the taxpayer to show by "clear and cogent evidence" that the tax is either "inherently arbitrary" or produces a "grossly distorted result" by taxing income "out of all appropriate proportions to the business transacted in that state." 77 L.Ed.2d at 556.

Alaska's separate accounting statute meets both of these requirements. First, it is internally consistent. If separate accounting were employed by all the states, a taxpayer

would be taxed on exactly 100% of its income. 16/ Second, AS 43.21 "actually reflect[s] a reasonable sense of how income is generated." Id. It does so by foregoing the surrogates and assumptions of mathematical formulas and looking instead at actual revenues and costs of in-state operations. Moreover, despite ample opportunity to do so, the companies have not produced any evidence whatsoever that, if true, would show that AS 43.21 has produced "a grossly distorted result" in its attribution of income to this state. Id.

B. The Fair Apportionment Test Applies to Separate Accounting.

To avoid the deferential standards applied in Container and the many cases preceding it, the companies imply that this deference is due only to mathematical formulas, which is to say that separate accounting is not a permissible means of apportionment. That argument is hopelessly at odds with the court's decision in Container.

The taxpayer in that case did business overseas and in California. Its overseas operations were, true to the

---

16/ The companies here make an additional "internal consistency" argument, which involves the interaction of AS 43.21 and Alaska's general corporate income tax law -- AS 43.20. That argument is premised on the erroneous conclusion that separate accounting and UDITPA are theoretically incommensurate, and in tandem lead to multiple taxation. Therefore, responding to this particular matter is deferred until Section III of this brief, which deals with the companies' various multiple taxation claims.

international norm, taxed on the basis of separate accounting. California, on the other hand, applied its UDITPA formula to the company's worldwide income. The taxpayer argued that separate accounting and UDITPA were theoretically incommensurate, and thus would inevitably lead to multiple taxation. In other words, since foreign nations had already taxed foreign income in full under separate accounting, nothing was left for California to tax through UDITPA. Furthermore, because the United States courts could not control the tax structure of foreign nations, they therefore must force California to excise that separately accounted income from its UDITPA base.

The Court closely scrutinized the taxpayer's grievance, noting that foreign commerce was involved. Nonetheless, the court held that there was no "automatic 'asymmetry'" between the two methods. 77 L.Ed.2d at 572 (emphasis in original) (quoting from Japan Line, Ltd. v. County of Los Angeles, 441 U.S. 434 (1979)). Separate accounting and UDITPA were compatible alternate means of apportioning multijurisdictional income:

> One way of deriving locally taxable income is on the basis of formal geographical or transactional accounting .... The unitary business/formula apportionment method is a very different approach to the problem of taxing businesses operating in more than one jurisdiction.

77 L.Ed.2d at 553 (citations omitted). Although "very

different," the Court found neither more inherently reliable. 17/

> Both geographical accounting and formula apportionment are imperfect proxies for an ideal which is not only difficult to achieve in practice, but also difficult to describe in theory ....
>
> * * * *
>
> [W]e have seen no evidence demonstrating that the margin of error (systematic or not) inherent in the three-factor formula is greater than the margin of error (systematic or not) inherent in the sort of separate accounting urged upon us by appellant ....

77 L.Ed.2d at 564-565. It is of course true that separate accounting taxes 100% of a portion of the taxpayer's worldwide income, while UDITPA taxes a portion of the whole. That, however, means neither that separate accounting is in some manner unapportioned, nor that a separately accounted tax base reaches income that other jurisdictions have a right to tax. The two methods simply follow different routes to the same goal:

17/ Separate accounting "often ignores or captures inadequately the many subtle and largely unquantifiable transfers of value that take place among the components of a single enterprise," 77 L.Ed.2d at 553, while

> [E]ven the three-factor formula is necessarily imperfect ....
>
> * * *
>
> First, the one-third-each weight given to the three factors is essentially arbitrary. Second, payroll, property, and sales still do not exhaust the entire set of factors arguably relevant to the production of income. Finally, the relationship

continued

> Here ... we are faced with two distinct methods of allocating the income of a multi-national enterprise. The "arm's-length" approach divides the pie on the basis of formal accounting principles. The formula apportionment method divides the same pie on the basis of a mathematical generalization.

77 L.Ed.2d at 568. The "same pie," of course, is the company's worldwide income. Since neither is inherently more reliable, and both reach the same goal, there is no basis for elevating either separate accounting or mathematical formulas to constitutional primacy:

> Allocating income among various taxing jurisdictions bears some resemblance, as we have emphasized throughout this opinion, to slicing a shadow ... [I]t would be perverse, simply for the sake of avoiding double taxation, to require California to give up one allocation method that sometimes results in double taxation in favor of another allocation method that also sometimes results in double taxation.

77 L.Ed.2d at 571.

Container breaks no new ground in viewing separate accounting and formula apportionment as different in means, but identical in goal. In earlier cases involving oil production income, for example, courts have either required or upheld the use of separate accounting to satisfy the statutory and constitutional requirement of fair apportionment of an integrated

---

17/ continued
between each of the factors and income is by no means exact.
77 L.Ed.2d at 565, and n.20.

multistate business. 18/ Indeed, UDITPA itself recognizes separate accounting as a permissible means of apportionment. Section 18 provides that if the three-factor formula does not achieve an equitable apportionment of income, alternative means of apportionment are authorized -- specifically including separate accounting. 19/

The commentators are in accord. "The purpose of separate accounting and of formula apportionment is exactly the same -- to divide the net income and assign portions of it geographically." W. Beaman, Paying Taxes to Other States: State and Local Taxation of Non-Resident Businesses ¶ 7.20 (1963). That same conclusion is reached throughout the literature. 20/

18/ Standard Oil Co. v. Thoresen, 29 F.2d 708 (8th Cir. 1928); Fisher v. Standard Oil Co. 12 F.2d 744 (8th Cir. 1926); Webb Resources, Inc. v. McCoy, 401 P.2d 879 (Kan. 1965); Texas Co. v. Cooper, 107 So.2d 676 (La. 1958); Skelly Oil Co. v. Comm'r of Taxation, 131 N.W.2d 632 (Minn. 1964); Magnolia Petroleum Co. v. Oklahoma Tax Comm'n, 121 P.2d 1008 (Okla. 1941); and Standard Oil Co. v. Wisconsin Tax Comm'n, 223 N.W. 85 (Wis. 1929).

19/ AS 43.19.010 Art. IV, § 18 provides that if UDITPA does not "fairly represent the extent of the taxpayer's business activity in the state" the department may use four alternatives, the first of which is "separate accounting."

20/ See Keesling and Warren, The Unitary Concept in the Allocation of Income, 12 Hast. L.J. 42, 43-45 (1960); G. Altman and F. Keesling, Allocation of Income in State Taxation, 89-90 2nd ed. (1950); Hellerstein, State Income Taxation of continued

In short, courts and commentators understand that separate accounting is very much a form of income apportionment of equal dignity with mathematical formulas. As such, it is subject to the same standards that the Supreme Court applies to all income division systems.

C. AS 43.21 is "True" Separate Accounting and is Subject to the Fair Apportionment Test.

The companies have scrupulously avoided the term "separate accounting" in their brief. Their aim is to place some distance between themselves and Container. To this end, their brief refers to separate accounting only once, where AS 43.21 is contrasted to "true separate accounting -- i.e., a system ... that would have attempted to measure, and tax, only income actually earned in Alaska." C.B. at 65. In so doing, they imply that AS 43.21 is not separate accounting at all, but is rather a mutant of no known ancestry, and certainly of no relation to the arm's-length method at issue in Container.

AS 43.21 is "true" separate accounting, both generally, and with respect to the companies' principal complaints. Those complaints are that AS 43.21 looks to out-of-state sales to measure gross income, and that it fails to account for alleged

Multijurisdictional Corporations; Reflections on Mobil, Exxon, and H.R. 5076, 79 Mich. L. Rev. 113, 117 (1980); Ebel, An Examination of State Worldwide Unitary Formula Apportionment, 1 Multistate Tax Comm'n Rev. 1 at 1 (March 1984).

contributions to production income from outside activities. On both counts, AS 43.21 is identical with the "arm's-length" method described in Container, the separate accounting methods used by several of our sister states, the United Nations and Office of Economic Cooperation and Development ("OECD") model treaties, and the Internal Revenue Code. It is also the same separate accounting system used by these companies when they file separate accounting tax returns, often by choice, in other states.

Separate accounting is simply this: revenues associated with an in-state activity are attributed to that state, and the costs associated with those revenues are deducted to arrive at net income. 21/ So far as possible, every cost is allocated to the income-producing activity that it supports. "[G]eneral overhead expense items are associated with specific revenue on some acceptable accounting basis." 22/ If a product or commodity is not sold in the state, but is instead shipped out-of-state for sale or further processing, separate accounting establishes a "transfer price" for that product as it leaves the state. 23/

21/ Keesling & Warren, supra at 43.

22/ P. Hartman, Federal Limitations on State and Local Taxation, 522 (1981). See also J. Hellerstein, supra, at 323.

23/ G. Altman & F. Keesling, supra, at 38; see also, testimony on behalf of oil industry by Gary Boren, R. 2214-2260 [D. 8-029, F. 5 at V-1]; R. 2244.

AS 43.21 does just that. Gross income attributable to Alaska is measured by the "value [of the oil] at the point of production." AS 43.21.020(b). If the oil is sold at the wellhead, that sale is the gross income attributable to Alaska from that oil. Since most North Slope oil is not sold at the wellhead, its value is netted back from the first point at which value can be established. This is done by deducting from the sales price those transportation costs and profits which are incurred from the point of production to the point of sale. AS 43.21.020(b). AS 43.21 then provides for the deduction of every cost associated with producing that income. AS 43.21.020(c). The taxpayer may allocate general overhead and administrative costs to Alaska production on any acceptable accounting basis. AS 43.21.020(c)(9).

Neither the fact that Alaska oil is sold out-of-state, nor the fact that an outside sales price must sometimes be used as the starting point for determining gross income, makes AS 43.21 different from other separate accounting laws. Nor does AS 43.21's treatment of out-of-state support activities distinguish it from "true" separate accounting. Under traditional separate accounting principles, precisely the same support activities marqueed in the companies' brief are universally accounted only as expenses, whether they occur in the income-producing state or in some other state.

The use of an imputed transfer value to establish the gross income of a separately accounted activity is the

cornerstone of every separate accounting law. By definition, a transfer value must be imputed precisely because the commodity is not sold in-state.

The separate accounting provisions of other states are identical in setting a transfer value notwithstanding out-of-state sales. 24/ So, too, is the Internal Revenue Code (IRC) in determining the United States source income of foreign corporations, setting transfer values between commonly controlled entities, and calculating foreign tax credits. 25/

The OECD Model Convention for the Avoidance of Double Taxation with Respect to Taxes on Income and on Capital, 26/ and the United States Draft Model Income Tax Treaty, 27/ employ an

arm's-length separate accounting methodology that is virtually identical in this respect to Alaska's, requiring production income to be attributed to the point of production, based upon its market or wellhead value irrespective of the point of ultimate sale. 28/

AS 43.21's treatment of support activities such as technical services, head office functions, and legal and accounting services is identical to that of other separate accounting laws. If anything, AS 43.21 is more liberal, and allows more flexibility in this respect than other separate accounting laws. Many overhead costs support more than one income producing activity, and most separate accounting laws apportion those costs under a rigid formula. AS 43.21, on the other hand, uses a formula method only as a presumption for allocating the expenses of these activities, permitting the taxpayer to show that actual overhead costs were greater. AS 43.21.020(f). Further, AS 43.21 is unique in that it allows an attribution of profit to these activities if the taxpayer in fact considers them profit generating. See 15 AAC 21.290(b). 29/

28/ United States Model Treaty art. 7, ¶2; R. 1514, 1520-23. OECD Model Convention art. 7, ¶2. R. 1520-23.

29/ The companies complain that the regulation allowing an attribution of profit, although retroactive, was not adopted until after their annual reports were filed, and that the regulation permits a reporting technique prohibited by Securities and Exchange Commission rules. In fact, SEC rules permit this continued

The separate accounting laws of our sister oil-producing states allow only the costs of these activities to be deducted. 30/ The Internal Revenue Code is the same: costs, wherever incurred, are subtracted from gross income with no attribution of profit. 31/ Interest and research expense is allocated to the income producing activities to which it relates. 32/ Overhead and supervisory expenses are apportioned to the activities which they support with no profit added. 33/

Federal transfer price regulations are substantially identical: "Marketing, managerial, administrative, technical, or other services" are deducted at cost with no profit; unless they are rendered solely in support of one geographic activity, they are apportioned among the activities which they support. 34/ Likewise, the OECD model treaty allows only the expense of

---

29/ continued
type of reporting, and, on the issue of timing, annual reports can be amended. R. 16920-21 (Deakin). The companies' argument reduces to a claim that AS 43.21 is unconstitutional because it uses the same accounting rules that the companies themselves employ.

outside support activities to be deducted. The commentary to the treaty specifically prohibits any "commission" being added above actual cost. Horst Deposition at 369-370.

In sum, the fair apportionment standards restated in Container apply to separate accounting, and, most assuredly, AS 43.21 is separate accounting. This section's remaining task is to demonstrate that AS 43.21 meets those standards.

D. AS 43.21 Meets the Fair Apportionment Standard

The means of apportionment employed by a state "must actually reflect a reasonable sense of how income is generated." Container, 77 L.Ed.2d at 556. The burden is on the taxpayer to establish that the tax statute is "inherently arbitrary." Underwood Typewriter Co. v. Chamberlain, 254 U.S. at 121. In other words, the taxpayer must show that there is not even a "modicum of reasonable relation" between the in-state activities which are used to measure the tax, and some rational sense of how income is generated. General Motors Corp. v. District of Columbia, 380 U.S. at 561. Alternatively, the taxpayer must "prove by 'clear and cogent evidence' that the income attributed to the State ... has 'led to a grossly distorted result,'" Container, 77 L.Ed.2d at 556 (citations omitted). This subsection shows first that AS 43.21 is anything but "inherently arbitrary," and, second, that this conclusion is not altered in the slightest by the companies' complaints regarding out-of-state contributions to Alaska income. Subsection E shows that the

FAIRBANKS LAW LIBRARY

companies have declined to submit proof that AS 43.21 has produced a "grossly distorted result."

1. AS 43.21 Reflects a Reasonable Sense of How Income is Generated.

By relying directly on the value of the oil at the point of production, net of all direct and indirect costs incurred in producing it, AS 43.21's separate accounting reflects a "reasonable sense of how [production] income is generated." The highest courts of two other oil-producing states have held that "[w]here the direct method of income allocation can be employed, all suspicion of unconstitutional taxation is dispelled." Webb Resources, Inc. v. McCoy, 401 P.2d at 889; Magnolia Petroleum Co. v. Oklahoma Tax Comm'n, 121 P.2d at 1011. In contrast, these same courts, in the course of requiring or allowing separate accounting for integrated multistate oil companies as the fairest and most accurate means of apportionment, have held that the application of the UDITPA formula would produce a "manifestly unfair" result. Texas Co. v. Cooper, 107 S.2d 676; Magnolia Petroleum Co. v. Oklahoma Tax Comm'n, 121 P.2d 1008; Webb Resources, Inc. v. McCoy, 401 P.2d 879.

Oil production activities are particularly amenable to separate accounting because oil production accounting is done, for a wide variety of purposes, on a lease-by-lease basis. R. 1566-70 (Deakin). These purposes include net profit share

leasing, percentage depletion, and accounting between joint owners of a lease. Id. Wellhead value must be calculated for the federal windfall profit tax, state severance tax, and royalties. Id. Both the United States Bureau of the Census and the Department of Energy require that oil production costs and revenues be reported separate from other operations. Id. Thus, every oil producer knows precisely the revenues and expenses that are associated with each lease.

The unique susceptibility of oil production income to separate accounting permeates applicable case law. The supreme court of Kansas has held that separate accounting produces a fair result because:

> [T]he gross revenues, drilling costs and operating costs could be determined by state lines .... [The taxpayer] knows the exact number of barrels of oil produced from each well; it knows the location of each well; the taxpayer can also determine the exact cost of drilling and the exact cost of equipping each well, as well as the direct costs of operation within the geographical area of the state.

Webb Resources, Inc. v. McCoy, 401 P.2d at 890.

For many industries the establishment of an "in-state value" may be difficult. Much depends upon whether the commodity produced in-state has an independent market value so that an arm's-length price can be determined. Horst Deposition at 155-156. If it cannot, the potential for profit shifting -- by attributing an artificially low price to the value of in-state activity -- is significant. Id. at 85. But because crude oil has an intrinsic value, and is commonly traded as crude oil

(that is, without further processing) its value can be confidently established.

Crude oil value at the point of production separates in-state production income from any downstream income for two reasons. First, and as Exxon has noted, it is widely accepted within the industry itself that "exploration and production income is fully earned at the wellhead." R. 1554-55. To Exxon, viewing production income as fully earned in the production state "is in accordance with generally accepted accounting principles, because crude oil has a known, realizable value." R. 1555.

Second, wellhead value is an arm's-length price. An arm's-length price, of course, is one that allocates to the seller or transferrer of the crude a market rate of return on his producing activity. R. 1530 (Horst). It is also a price at which the refiner or buyer expects to purchase the crude and still earn a profit on refining and resale. Id. Use of a wellhead value therefore segregates and excludes from the AS 43.21 tax base any profit attributable to Alaska oil downstream of the point of production.

Because of its accuracy, separate accounting is the choice of other oil-producing states including Louisiana,

Mississippi, and Oklahoma. 35/ The Comptroller General's report explains the reason:

> [T]he States generally use separate accounting only to determine the income of certain kinds of [multijurisdictional corporations] earned within their jurisdictions. These businesses, (primarily general merchandising, oil and gas, and construction companies) use separate accounting because it conforms more to their financial accounting procedures and, for these specific situations, more accurately reflects income than formula apportionment.

GAO Report to the Chairman, House Committee on Ways and Means: Key Issues Affecting State Taxation of Multijurisdictional Corporate Income Need Resolving, 3 (1982) (emphasis added); R. 17023.

Separate accounting is also preferred by the federal government for various purposes, including apportioning the income of multinational taxpayers, and this preference is shared by other countries. See Container, 77 L.Ed.2d at 565, 569-70. A similar preference is found in model international tax

---

35/ Excluding Texas and Wyoming, which imposed no corporate income taxes, from 1976 to 1980 more than 91% of domestic crude oil was produced in eight states with 40 million barrels or more of annual production. Statistical Abstract of the United States at 730 (1983). The statutes of four of those states (Alaska, Louisiana, Mississippi, and Oklahoma) required separate accounting for oil production income. Of the top five producing states, Texas (first) had no income tax and California (fourth) required formula apportionment, while Louisiana (second), Alaska (third) and Oklahoma (fifth) all required separate accounting for oil and gas production income. Id.

conventions established to encourage international trade and investment by reducing double taxation. 36/

Finally, there are three other sponsors of separate accounting who warrant note -- Arco, Exxon and Sohio. For many years, these companies, of their own chosing, filed separate accounting returns in Alaska even though state law at the time required use of UDITPA. R. 873-1198. Moreover, historically and at least through 1981, these companies chose to file separate accounting returns in states where it was to their advantage to do so. R. 1605-08. In Texas Co. v. Cooper, 107 So.2d at 682, the court rejected the taxpayer's criticisms of separate accounting in light of the fact that the taxpayer "actually use[s] that method in those states where it wants to use it ...." The same critical eye would seem warranted here.

In short, the companies ask this court to heed what they say, and not what they do. More boldly, they seek a ruling that the income allocation method used by the United States, the United Nations, the OECD, and several of our sister states lacks even a modicum of reasonableness. That contention falls of its own weight.

36/ OECD Model Double Taxation Convention, supra, Art. 5, §2, Art. 7, §2; United States Model Treaty, supra, Art. 5, §2; United Nations Model Convention Between Developed and Developing Countries, Art. 7. See, R. 1514-15, 1520-22, 1523 (Horst).

But separate accounting need not be the best means of estimating local oil production income; the "inherently arbitrary" test is not nearly so demanding. Even the crudest of formulas has passed. See Moorman, 437 U.S. at 273, 274. In fact, the Supreme Court has never invalidated a state income tax law under this threshold requirement.

There are three distinct reasons for this judicial restraint. First, the Court has recognized that the task of ascertaining the true source of income is as difficult as "slicing a shadow." Container, 77 L.Ed.2d at 570. As the record in this case abundantly demonstrates, equally qualified economists and accountants disagree on whether separate accounting, or some variety of mathematical formula, is a fairer means of apportioning the production income of a multistate oil company. 37/ An effort to divine the true source of income, and hence the fairest means of apportionment, would be an exercise not only in judicial legislation, but in judicial alchemy.

Second, even if that theoretical bar could be surmounted, establishing a constitutional norm would require the judiciary to craft a lengthy and technical tax code. It would involve not only choosing a particular method, but also prescribing at length the precise rules relating to every element

---

37/ Compare R. 1514-17, 1523-34 (Horst), R. 1542-48, 1564-70 (Deakin) with R. 12996-13001 (Davidson), R. 13072-74, 13082-84 (Church).

of that method. "[T]he adoption of a uniform code ... would require a policy decision based on political and economic considerations that vary from State to State ...." Moorman, 437 U.S. at 279. "Because that task [is] essentially legislative, we declined to undertake it ...." Container, 77 L.Ed.2d at 557.

Finally, any attempt to select between competing economic theories would restrict "the vastness of the state's taxing power and the latitude that the exercise of that power must be given before it encounters constitutional constraints." Norfolk & Western Railway Co. v. Missouri State Tax Comm'n, 390 U.S. 317, 326 (1968). With regard to state apportionment laws in particular, the Court has recognized that:

> At best, the responsibility for devising just and productive sources of revenue challenges the wit of legislators. Nothing can be less helpful than for courts to go beyond the extremely limited restrictions that the Constitution places upon the states and to inject themselves in a merely negative way into the delicate processes of fiscal policy-making. We must be on guard against imprisoning the taxing power of the states within formulas that are not compelled by the Constitution ....

Wisconsin v. J. C. Penney Co., 311 U.S. at 445 (emphasis added).

2. AS 43.21's Treatment of Out-of-state Activities Does Not Render the Statute Inherently Arbitrary.

In spite of this deferential standard, the companies argue that AS 43.21 is inherently arbitrary because it "inevitably" taxes out-of-state contributions to Alaska production income. The companies have catalogued an array of

logistical, financial and support services which they claim occur principally out-of-state, and which they believe are responsible for an unspecified portion of profits attributable to the production of Alaska oil. Because AS 43.21 views the profits from production of Alaska oil as earned in Alaska, companies believe that the statute "inevitably" taxes out-of-state values, and hence is facially invalid. They also imply that AS 43.21 arbitrarily ignores the contributions of out-of-state sales activities and that the statute thus taxes value added downstream of the point of production. Their arguments fail for three reasons.

a. The Treatment of Out-of-state Support Activities is Merely a Matter of Economic Theory.

How one treats support activities is a matter of economic theory. Under the separate accounting approach, income is viewed as being earned when and where the principal operating activity occurs. In other words, production income is earned where the oil is produced, refining income is earned where the oil is refined, and marketing income is earned where the products are sold. Support segments are not treated as separate enterprises that could generate income on their own, but are instead viewed, by tax collectors and taxpayers alike, as "cost centers."

Separate accounting's refusal to go further and attribute a portion of oil production profits to outside

management has been before the courts already. The companies' complaint, in fact, is old hat.

In Shaffer v. Carter, 252 U.S. 37 (1920), an Illinois resident who earned income from oil production in Oklahoma complained that his Oklahoma production income was at least partially a function of the management and financing skills of his Illinois office. The Court held, however, that his oil production income could fairly be viewed solely as local Oklahoma income. "At most," the court held, "there might be a question whether the value of the service of management rendered from without the state ought not to be allowed as an expense in producing the [Oklahoma] income." 255 U.S. at 55. AS 43.21, of course, resolves that question in favor of the taxpayer.

In Webb Resources, Inc. v. McCoy, 401 P.2d 879 (Kan. 1965), the court held that separate accounting was feasible for Kansas oil production because the oil company knew precisely how many barrels of oil were produced in Kansas and could "determine the exact cost of drilling and the exact cost of equipping each well, as well as the direct costs of operation" within the state. As to a lengthy list of out-of-state support activities virtually identical to the companies' illustrations in this appeal, the court held that "these expenses are ordinarily considered to be general or overhead type of expenses which are required in any

type of business which crosses state lines." 38/ 401 P.2d at 890 (emphasis added). As with AS 43.21, the expenses, and only the expenses, of these out-of-state contributions were deducted -- an approach which survived challenge under the Commerce Clause.

Moreover, looking to out-of-state sales to compute local value does not convert a separate accounting statute into a tax on out-of-state sales. A subsequent sale merely determines when income is realized, and not where or how much income is earned. R. 1529-30 (Horst). This argument was dispensed with years ago in Texas Co. v. Cooper, where, in this regard, the taxpayer "bitterly assail[ed]" the transfer price set by Louisiana for oil shipped to the taxpayer's refinery in another state. He argued that there could be "no taxable gain upon the oil sent outside of the State to be refined, and not sold herein." 107 So.2d at 687. The court responded that:

> [B]y definition the use of the separate accounting method to determine net profits of an interstate corporation attributable to a given State utilizes the use of market value in assigning worth to

---

38/ The uncontested facts in that case, like this one, indicated that the following functions were performed outside the taxing state: head office, geologists, landmen, production supervisors, company officers, decisions regarding exploration and drilling, legal services, hiring and firing of key personnel, contracting for services, equipment and supplies (which produced economies of scale), and financing. Webb Resources, Inc., 401 P.2d at 881, 884.

> products at a given stage shipped for further processing to another State ....

Id. at 688 (emphasis added). See also Magnolia Petroleum Co. v. Oklahoma Tax Comm'n, 121 P.2d at 1011-12 (even though there were no actual sales, value at time of shipment "clearly reflected the financial gain or loss at the time the oil left the state").

Additionally, the "netback" methodology of AS 43.21 does not tax value added downstream from the point of production. Transportation profits are attributed to transportation activities. The transportation costs deducted under AS 43.21 begin with the published rate for the Trans Alaska Pipeline. AS 43.21.020(b); 15 AAC 21.130(b)(1). That rate obviously includes a profit. Similarly, if marine transportation is done by a third party, the carrier's full rates (including, obviously, his profit) are deducted. 15 AAC 21.130(b)(2). If the company's own vessels carry the oil, the regulations allow the deduction of full costs, plus port fees, plus a management fee, plus a rate of return (either the one set out in the regulation or the one imputed by the taxpayer itself). 15 AAC 21.130(b)(3).

b. The Companies' Quarrel With AS 43.21's Treatment of Out-of-state Sales and Support Activities Ignores the Fact that Separate Accounting Does Not Capture the Value that Alaska Activity Adds to These Companies' Out-of-state Operations.

If it is true that activities in one state contribute to the profitability of activities in another, that principle is surely a two-way street. Just as Alaska may capture

contributions flowing to it, it equally foregoes the contributions which it may make to other states. As the Wisconsin Supreme Court stated in Standard Oil Co. v. Wisconsin Tax Comm'n:

> We regard as unsound the argument submitted to sustain the commission's [preference for a formula] in this case. If the manufacturing profits of the plaintiff company are increased by means of the sales operations in the State of Wisconsin, the converse is true that the sales operations in Wisconsin benefit by the manufacturing operations of the plaintiff corporation in other states. The argument cannot be applied one way and not the other.

223 N.W. 85, 88 (Wis. 1929) (emphasis added). 39/

Indeed, the companies' annual reports illustrate contributions to profitability in other states derived from Alaskan activities. Alaska production may have been financed by out-of-state activities, but the great revenues these companies have earned from Alaskan crude has allowed them to enhance their portfolios, to revamp their refineries, explore and produce in other states and nations, and invest and diversify throughout the world. 40/ Undoubtedly these Alaska-financed activities

---

39/ See also Webb Resources, Inc., 401 P.2d at 890 ("Whether the taxpayer could conduct its wildcatting operations in other states without the profits derived from the production of oil and gas in Kansas is not the question or the test [as to whether separate accounting is proper].").

40/ See e.g., Sohio 1981 Annual Report: "Over the next ten years the company's planned [nationwide] investment of about $30 billion in dollars of the day for exploration and production will

continued

generate additional corporate profits for the companies. Yet AS 43.21 does not capture any of the income which the companies' own economists would view as attributable to Alaska.

c. The Companies' Precise Out-of-state Contributions Argument was Made and Rejected in Moorman.

In Moorman, the taxpayer challenged the validity of Iowa's single-factor formula on the ground that it inevitably failed to account for outside contributions to income. The taxpayer's goods were sold in Iowa, while its manufacturing was conducted in neighboring Illinois. The Iowa statute taxed the full value of Iowa sales without recognizing the contributions made to that income from Illinois payroll and property.

The taxpayer argued that he could avoid a multiple tax burden only by moving his entire manufacturing operation from Illinois to Iowa. This is the same argument made by the companies here, through a hypothetical intended to show that Alaska's tax base is insensitive to the location of their support

---

40/ continued
draw largely on cash flow from Alaska." Id. at 8. "[I]ncreases [in funds provided from operations], mainly a result of the company's Prudhoe Bay and Alaska-related projects, have been used to increase dividends, expand oil and gas exploration efforts.... [1981 capital expenditures included] "acquisitions of Kennecott and coal properties from United States Steel Corporation and the purchase of offshore leases in the Gulf of Mexico." Id. at 28. See also R. 687.

activities. C.B. at 21, 30. Justice Powell found that same hypothetical appealing in his dissent.

> This surcharge on Iowa sales increases to the extent that a business' plant and labor force are located outside Iowa. It can be avoided altogether only by locating all property and payroll in Iowa ....

Moorman, 437 U.S. at 283. The majority, however, held that this multiple tax burden was not a function of any intrinsic irrationality of Iowa's formula, but was due instead to the fact that Iowa and Illinois used different apportionment methods. Without proof that so great a portion of Illinois profits had been misattributed to Iowa that the latter's tax base was grossly distorted, the taxpayer could not show "that the method of apportionment was inherently arbitrary." 437 U.S. at 274.

The Court rejected the taxpayer's challenge for three reasons. First, even if one assumed that Iowa's tax inevitably touched income partially earned out-of-state. "[T]he Constitution does not invalidat[e] an apportionment formula whenever it may result in taxation of some income that did not have its source in the taxing State ...." 437 U.S. at 272.

That holding simply reflects practical reality. No apportionment rule accounts for all plausible contributions to income, and each is resultantly vulnerable to attractive hypotheticals illustrating its insensitivity and accordingly, to the companies, its "arbitrary" nature. For example, under UDITPA, a production well in state A which produces 100 barrels per day, and a production well in state B which produces 10,000

barrels per day, may be assumed to produce identical income. This is because the UDITPA property factor ignores the principal profit-producing asset in an oil company's portfolio: its oil reserves. At the same time it assigns income on the basis of property which produces little income, such as a moribund refinery, or no income whatsoever, such as expensive pollution control facilities. The point, simply, is that while hypotheticals may have a curiosity value, they are of little constitutional significance in judging the underlying rationality of a state's apportionment law.

Second, the Court in Moorman rejected the argument made by the companies here -- that contributions to local income from outside capital and labor were inherent, and that the taxing state's law therefore "inevitably" taxed out-of-state values. The Court viewed this as simply a debatable economic theory:

> Whatever merit such an assumption might have from the standpoint of economic theory or legislative policy, it cannot support a claim in this litigation that Iowa in fact taxed profits not attributable to activities within the State ....

437 U.S. at 272. "Doubts about the wisdom of the economic assumptions underlying the challenged formula," the Court ruled, were simply not relevant to the constitutional question. 437 U.S. at 275 n.8. Thus, the companies' premise here -- that out-of-state logistical, management, and planning activities are responsible for "earning" a portion of Alaska production profits

-- is only an economic theory that is not shared by those who employ separate accounting.

Finally, in Moorman the Court held that the taxpayer had failed to show that Moorman's Illinois manufacturing activities were, in fact, operated at so great a profit that Iowa's disregard for those activities by use of a single-factor sales formula led to a "grossly disproportionate" result. 437 U.S. at 271-272. Absent such evidence, the Court could not invalidate the statute.

Here as well, the affidavits submitted by the companies

> [do] not contain any separate accounting analysis showing what portion of appellant's profits was attributable to [its activities in other states]. But appellant contends that we should proceed on the assumption that at least some portion of the income from [in-state activity] was generated by [out-of-state] activities .... Indeed, a separate accounting analysis might have revealed that losses in [other states] prevented appellant from earning more income from [the taxing state].

Moorman, 437 U.S. at 272. It is to that absence of proof that we now turn.

E. The Oil Companies Have Offered No Evidence That AS 43.21 Produces a Grossly Distorted Result.

The companies are entitled to relief in this litigation only upon "clear and cogent evidence" that the income Alaska attributes to this state is in fact "out of all appropriate proportions to the business transacted in [the] State," or has "led to a grossly distorted result." Container, 77 L.Ed.2d at 556 (citations omitted). The taxpayer's burden is great.

Indeed, only twice this century has the Supreme Court invalidated a state income tax under the Commerce Clause. In Hans Rees' Sons, Inc. v. North Carolina, the Court struck down the application of North Carolina's single-factor formula which apportioned to the state between 66% and 85% of the taxpayer's net income, when no more than 22% of its income had its source in that state. 283 U.S. at 134. See Container, 77 L.Ed.2d at 564. In Norfolk & Western Railway Co. v. Missouri State Tax Comm'n, the second case, the Court found the requisite "grossly distorted result" because the statute attributed to the state more than twice the value of the taxpayer's rolling stock. 390 U.S. at 321-22.

Cases in which a taxpayer was unable to sufficiently establish the inaccuracy of the tax are perhaps more instructive. In each of the following cases, the result was "not unreasonable," and was therefore constitutional:

	Taxed Income	Actual In-state Income
Butler Bros, 41/	$93,000	Loss of $83,000
Bass Ratcliff, 42/	27,000	none
Underwood, 43/	630,000	43,000

41/ Butler Bros. v. McColgan, 315 U.S. 501, 506 (1942).

42/ Bass, Ratcliff & Gretton, Ltd. v. State Tax Comm'n, 266 U.S. 271, 184 (1924).

43/ Underwood Typewriter Co. v. Chamberlain, 254 U.S. 113, 120 (1920).

The companies here cannot meet their burden of proof, and instead attempt to avoid it by misquoting the seminal case of Hans Rees' Sons, which they claim absolves them of the need for any factual showing. In fact the express holding of the case, which the companies consciously omit, is directly to the contrary. C.B. at 49. 44/ The companies have not disclosed how much income they believe they earned in Alaska, nor have they indicated by what percentage, or dollar amount AS 43.21 has misattributed income. They have certainly had ample opportunity

---

44/ The full quote, with the omitted portions emphasized, reads:

> Evidence which was found to be lacking in the Underwood and Bass cases is present here. These decisions are not authority for the conclusion that where a corporation manufactures in one State and sells in another, the net profits of the entire transaction, as a unitary enterprise, may be attributed, regardless of evidence, to either State. In the Underwood case, it was not decided that the entire net profits of the total business were to be allocated to Connecticut because that was the place of manufacture, or, in the Bass case, that the entire net profits were to be allocated to New York because that was the place where sales were made. In both instances, a method of apportionment was involved which, as was said in the Underwood case, "for all that appears in the record, reached, and was meant to reach, only the profits earned within the State." The difficulty with the evidence offered in the Underwood case was that it failed to establish that the amount of net income with which the corporation was charged in Connecticut under the method adopted was not reasonably attributable to the processes conducted within the borders of that State; and in the Bass case the court found a similar defect in proof with respect to the transactions in New York.

283 U.S. at 132, 133.

to do so. They alone have access to their own detailed internal accounting information, and in Exxon v. Wisconsin and Exxon v. South Carolina, Exxon was able to disclose exactly how much income it earned in a particular state. 45/ Nonetheless, here the companies have declined to undertake what they have called "an elaborate showing," resting instead on the alleged theoretical failings of separate accounting. R. 12763. Indeed, they have not even placed their tax returns in the record.

The companies have amassed a compendium of affidavits describing various activities that occur outside Alaska, and which they believe are responsible for a portion of the AS 43.21 tax base. A summary of those functions consumes much of the companies' brief. Noticeably lacking, however, is any suggestion of the profits attributable to those activities -- or, for that matter, any evidence that these activities were profitable at all. The point is best illustrated by the "dramatic" examples highlighted at pp. 25-26 of the companies' brief:

1) Counsel assert that Arco's Alaska profits have increased as a result of reversing the flow of the Line 90 pipeline. That pipeline does not even carry Alaska crude, and

---

45/ Exxon Corp. v. Wisconsin Dep't of Revenue, 447 U.S. 207 (1980), transcript of 1974 hearing before Tax Appeals Comm'n at A193 and A204; Exxon Corp. v. South Carolina Tax Comm'n., 258 S.E.2d 93 (1979), dismissed for want of substantial federal question, 447 U.S. 919 (1980), Exxon's Jurisdictional Statement to the United States Supreme Court at 5.

the record gives no indication of any particular savings attributable to that pipeline. R. 13075, 13637-38.

2) Alaska profits, counsel argue, are in part the result of a "slugging" technology developed elsewhere. Exxon's affiant, however, acknowledges that the technology has not been used for Alaska activities, saying only that if it were used in the future, it might result in some savings. R. 13866-67.

3) According to counsel, the Puerto Amuelles terminal is responsible for "millions of dollars" of Sohio profits which are included in the AS 43.21 tax base. Sohio's affiants, however, do not allege that Sohio even owns or financed that terminal, or that it has saved Sohio any money whatsoever. R. 13353, 13417.

4) Arco's AS 43.21 tax base, counsel say, includes Arco profits attributable to a drag reduction additive developed elsewhere. Arco's affiant, however, does not allege that Arco developed that additive, much less that it resulted in any particular income. R. 13568-69.

Apparently, this is the best that the companies can offer. 46/ Indeed, among the companies' affidavits, only the

---

46/ Alternatively, the companies offer a comparison between the UDITPA factors of Arco and Sohio and the percentages of their book and federal taxable income which was taxed by AS 43.21 during 1978-80. C.B. at 50. The federal taxable income comparison (85% for Arco and 106% for Sohio) is meaningless. That measure of income includes numerous advantages such as early

continued

affidavit of William Baumol addresses the issue of quantifying misattributed profits. R. 13021-13068. Baumol states that Alaska's "overattribution" of income to itself, including the alleged capture of profits from out-of-state activities, "cannot be exactly measured but may well be extremely large." R. 13031. He suggests that the state be required to demonstrate the insignificance of these activities.

Although it is plainly not Alaska's burden to do so, the state accepted Mr. Baumol's invitation. Its affidavits show that the companies' own measures of Alaskan production income -- as reported in their filings with the United States Department of Energy and the Securities and Exchange Commission; in their tax returns filed in other states; and in their reports to the United States Census Bureau -- all calculate their Alaskan production

---

46/ continued
depreciation, deduction for intangible drilling costs and the like which are not incorporated into AS 43.21. More importantly, profits in Alaska may be offset by losses in other states. In Webb Resources, Inc. v. McCoy, Kansas attributed 137% of the taxpayer's federal taxable income to that state by separate accounting. 401 P.2d at 891. The court merely noted that "the taxpayer's profitable business is located in Kansas" while its "expenses are being incurred primarily in other states." Id. The book income comparisons (46% for Arco and 91% for Sohio) fare no better; the companies have not told this court what they believe thay earned in Alaska or any other state, and the percentages cited in their brief may, in fact, represent precisely Alaska earnings. Finally, the comparison between UDITPA and separate accounting merely confirms the legislature's finding that UDITPA seriously underattributes oil production income to the state. See Charts 3 and 4.

income as equal to or as much as 20% greater than the AS 43.21 tax base. 47/ Moreover, that same evidence suggests that the contribution of outside activities to Alaskan income was de minimis, amounting to a conceivable misattribution of income of less than 1%. 48/

The companies took issue in the superior court with the state's affidavits, claiming that they were unreliable and irrelevant. Yet even assuming that this were true, and the state's evidence were discounted, this would still leave nothing on the companies' side of the evidentiary ledger. The burden of proof is upon them, and their failure to raise a genuine issue of fact inevitably resulted in the grant of summary judgment.

III. SINCE AS 43.21 IS FAIRLY APPORTIONED, IT DOES NOT IMPOSE AN IMPERMISSIBLE THREAT OF MULTIPLE TAXATION.

The very purpose of the fair apportionment test is to minimize or avoid multiple taxation. "Logically, it is impossible when the tax is fairly apportioned, to have the same income taxed twice." Northwestern States Portland Cement Co .v.

47/ Because some of this information was received under a protective order, it was submitted to the lower court under seal. A chart showing how these other measures compare with AS 43.21 appears at R. 16833. See also R. 16912-17 (Deakin).

48/ Id. at 16921-22 (Deakin).

Minnesota, 358 U.S. 450, 462 (1959). Thus, if the taxing state has made an honest effort to estimate in-state income, it has done all that the Commerce Clause demands. Container, 77 L.Ed.2d at 564-65.

In the practical world, where different division-of-income methods may be used, the potential for overlapping taxation exists despite fair apportionment by each state. The threat -- or reality -- of overtaxation lies not in any intrinsic fault with any of those divergent systems, but is simply the result of those systems being different. Only by imposing a uniform and detailed tax code could overlapping taxation be avoided. For reasons discussed before, that is a task the Court will not undertake.

Container disposes of the companies' multiple taxation arguments, holding that precisely the same friction alleged to exist in this case -- that is, the use of separate accounting by one jurisdiction and a formula by another -- in fact creates no friction at all. After determining that California's three factor formula was fair, the Court turned to whether California was obligated to exclude separately accounted foreign income from its formula in order to avoid double taxation.

The Court, relying on Moorman, held that if the disparity of systems were "entirely domestic," rather than international, that disparity would "make little constitutional difference ...." 77 L.Ed.2d at 556, 566.

In view of the international implications, however, the Court applied "additional scrutiny" to the differing methods. 77 L.Ed.2d at 566. Even under that intensified scrutiny, however, the Court found that (1) there was no "automatic asymmetry" between the two, and (2) the two methods of apportionment were equally fair means of measuring income:

> [I]t would be perverse, simply for the sake of avoiding double taxation, to require California to give up one allocation method that sometimes results in double taxation in favor of another allocation method that also sometimes results in double taxation.

77 L.Ed.2d at 571.

Container strips the companies of the theoretical underpinning of their principal multiple taxation arguments. These claims are: (1) if every state applied Alaska's tax laws, multiple taxation would inevitably result; and (2) because Alaska taxes 100% of oil production income earned in the state -- income that other states are also allowed to tax -- AS 43.21 inevitably results in multiple taxation. C.B. at 29-41. This second argument is made both as a matter of theory and purported "fact." Thus, various affidavits purport to demonstrate, inter alia, that while Alaska taxes 100% of North Slope production income, other states which employ a formula method tax 30% of that same income. The result, the companies say, is that as much as 130% of the companies' production income from Alaskan oil is being taxed in the aggregate.

These arguments hinge on the validity of the companies' assertion that Alaska, by separately accounting Alaska oil production income, and other states, by using a formula that apportions a percentage of worldwide income, are reaching the same income. If that were true, there would exist an "automatic asymmetry" (Container, 77 L.Ed.2d at 572) similar to that present in the property tax case of Japan Line, Ltd. v. County of Los Angeles, 441 U.S. 434 (1979). In that case, Japan, without apportionment, taxed the entire value of certain cargo containers. Because Japan taxed the full value of those containers, the Court held -- in the interest of international tax symmetry -- that even though California's tax was fairly apportioned, it could not tax a portion of the value of the same containers. Otherwise, two jurisdictions would be taxing more than 100% of the same value.

From the outset, the companies have rested their multiple taxation claims on their belief that the same friction that existed between Japan and California is present when one jurisdiction uses separate accounting and another uses formula apportionment. This is clearly not the case, as the Court held in Container:

> In Japan Line, we relied strongly on the fact that one taxing jurisdiction claimed the right to tax a given value in full, and another taxing jurisdiction claimed the right to tax the same entity in part -- a combination resulting necessarily in double taxation. 441 U.S., at 447, 452, 455. Here, by contrast, we are faced with two distinct methods of allocating the income of a multi-national enterprise. The "arm's-length"

> approach divides the pie on the basis of formal accounting principles. The formula apportionment method divides the same pie on the basis of a mathematical generalization. Whether the combination of the two methods results in the same income being taxed twice or in some portion of income not being taxed at all is dependent solely on the facts of the individual case.

77 L.Ed.2d at 568.

Thus, separate accounting of income, unlike a property tax, simply takes the whole of a portion, as formulas take a portion of the whole. In Container, California included Bolivia income in its apportionable base. That does not mean, however, that California taxed a portion of income which Bolivia, through its separate accounting, had already taxed in full. Instead, it merely looked at all the company's income as a first step in calculating California earnings. Similarly, Alaska, through separate accounting, is not taxing anything that other states also have a right to tax. As in Container, this case "involves a tax on income rather than a tax on property" -- a fact which makes it "clearly distinguishable." 77 L.Ed.2d at 568.

There is nothing remarkable or improper about Alaska -- or any other state -- taxing 100% of the income that it determines is earned within the state. Every state that uses UDITPA taxes 100% of the income attributed to it by the three-factor formula.

Conversely, no other state has a right to tax a share of the oil production income earned in Alaska. The fact that the companies' worldwide income, including Alaska income, is used in

the tax base of the formula method does not mean that states using that method are licensed to or do engage in extraterritorial taxation. A 2% apportionment fraction in Wisconsin does not mean that Wisconsin is entitled to tax 2% of Exxon's profits in every other state, including Alaska. It means, instead, that 2% of Exxon's sales, property, and payroll are located in Wisconsin, and that inasmuch as income is presumed to follow these factors in precise proportion, Wisconsin may therefore presume that 2% of Exxon's overall income was earned in the state. Wisconsin no more taxes 2% of Exxon's income in each other jurisdiction than it foregoes taxing 98% of Exxon's income earned in Wisconsin.

The companies' misuse of Japan Line likewise explains their view of Mobil Oil Corp. v. Comm'r of Taxes of Vermont, 445 U.S. 425 (1980), and Exxon Corp. v. Wisconsin Department of Revenue, 447 U.S. 207 (1980). These cases involved claims that the Commerce Clause prohibits certain categories of income from being included in the apportionable base of the UDITPA formula. In Mobil, the exclusion sought by the taxpayer was premised on the legal fiction of the situs of intangibles. The taxpayer in that case argued that Vermont was required to exclude from its apportionable base all dividend income received from the taxpayer's unitary subsidiaries -- on the theory that intangible income should be deemed earned in the state of commercial domicile. The Court's response to this attempt to erode the unitary theory on the basis of "talismanic" fictions was

predictable, and as the dissent noted, makes the case rather "unremarkable." 445 U.S. at 445. Mobil, then, had nothing to do with separate accounting.

In Exxon, the taxpayer urged that because its oil production income in one state could be accurately estimated by the taxpayer's own separate accounting, the Commerce Clause required all other states to excise that income from their formulary base. Again unremarkably, the Court held that, because Exxon's operations were unitary, each state could look to all of Exxon's profits as a first step in calculating that state's income.

The companies argue that Mobil and Exxon stand for the proposition that separate accounting is prohibited by the Commerce Clause, relying upon the statement in Mobil that fictional situsing of dividend income is "theoretically incommensurate" with apportionment (445 U.S. at 444), and the observation in both Mobil and Exxon that states are entitled to deference in defining the scope of the unitary business and need not recognize any "exclusive" right of certain states to tax segments of that unitary income. 445 U.S. at 446; 447 U.S. at 229-30. From that language, the companies jump to their conclusion that when Alaska has "exclusively" taxed income through separate accounting, it has done something "theoretically incommensurate" with other states' use of a formula. In other words, they argue that the "automatic asymmetry" of Japan Line is present here as well.

Container presented the facts that would have proved the companies' theory, if it were correct. The foreign jurisdictions in that case taxed the foreign income "in its entirety" by separate accounting. California then included that foreign income in its UDITPA apportionable income. As in Japan Line, the United States Supreme Court could not force the foreign jurisdictions to change. Also as in Japan Line, foreign commerce was involved, requiring "additional scrutiny." Finally, as in Japan Line, the foreign tax method was the international norm. If the two different methods were "theoretically incommensurate," or caused the "automatic asymmetry" present in Japan Line, then the Court would necessarily have stricken California's otherwise fair tax. Instead, the Court affirmed what Alaska has argued in this case -- that formula apportionment and separate accounting are simply two alternative ways to divide the same pie, and any asymmetry "depend[s] solely on the facts of the individual case." 77 L.Ed.2d at 568.

Mobil and Exxon are unexceptional extensions of an unbroken line of income tax cases that have allowed states wide latitude in fashioning their income tax systems. As noted by Professor Walter Hellerstein, a scholar relied upon by the companies, these cases have only a positive impact on the validity of AS 43.21:

> While Mobil and Exxon gave broad approval to formulary apportionment as a constitutionally permissible method of determining a corporation's state income tax base, those decisions did not

> denigrate all other methods the state might choose. Indeed, both Mobil and Exxon reflect the Court's long-standing view that the states enjoy broad leeway in their choice and implementation of division-of-income methods.
>
> It is true ... that Mobil implicitly ... indicated a constitutional preference for apportionment of ... dividends. But that was only because the two competing methods of income division at issue -- specific allocation to a single situs and formulary apportionment among the states -- were "theoretically incommensurate." By contrast, there is nothing "theoretically incommensurate" about separate accounting and formulary apportionment.
>
> Both methods recognize that more than one state may legitimately tax a share of a multistate enterprise's income, although they employ different techniques for determining that share. The Court's opinions thus provide doctrinal support for the proposition that the Constitution is indifferent to a state's choice of separate accounting versus formulary apportionment as a division-of-income method, and this certainly strengthens the case for Alaska's choice of separate accounting in AS 43.21.

R. 17092-93. Other commentators, including those also relied upon by the companies, agree. 49/

49/ See Recent Developments, State Taxation of Foreign-Source Income: Mobil Oil Corp. v. Commissioner of Taxes, 66 Cornell L. Rev. 805 at 807 n.13 (1980); The Supreme Court: 1979 Term, 94 Harv. L. Rev. 75 at 117 n.3 (1980); Recent Development, Taxation: Inclusion of Foreign Source Dividend Income in State Apportionment Formula, 22 Harv. Int'l. L.J. 492 n.1 (1981). The commentators lend more support to the state's position than they do the companies'. For example, they generally agree that the burden is on the taxpayer to demonstrate actual multiple taxation, and even if the taxpayer sustains that burden, some degree of multiple taxation is nevertheless constitutionally permissible. Recent Developments, State Taxation of Foreign-Source Income: Mobil Oil Corp. v. Commissioner of Taxes, supra at 809 n.19, 816 n.57, n.58; The Supreme Court: 1979 Term, supra at 122 n.40; Recent Development, Taxation: Inclusion of

continued

By blindly insisting that Mobil and Exxon hold that separate accounting poses the same "automatic asymmetry" created by the unapportioned property tax in Japan Line, the companies feel free to attack AS 43.21 on the basis of property and gross receipts tax cases, which simply do not bear on the issues presented by this appeal. The property tax cases cited by the companies all involve the taxation of property that moves from state to state: rolling stock, trucks, airplanes, barges, etc. It is unquestionably true that the Court has consistently prohibited any one state from taxing the full value of transient property, as it would have prohibited Japan's tax in Japan Line if imposed by a state. However, as the Court ruled in Container:

> We distinguished property from income taxation in Mobil Oil Corp., 445 U.S. at 444-446, and Exxon Corp., 447 U.S. at 228-229, suggesting that "[t]he reasons for allocation to a single situs that often apply in the case of property taxation carry little force" in the case of income taxation. 445 U.S. at 445.

The companies claim that AS 43.21 is indistinguishable from the state-of-origin gross receipts taxes found void in Evco v. Jones, 409 U.S. 91 (1972), J. D. Adams Mfg. Co. v. Storen, 304

49/ continued
Foreign Source Dividend Income in State Apportionment Formula, supra at 493, 496 n.36. These commentators also generally agree with the state that the courts show great deference to the states in the implementation of state tax policy. Hellerstein, supra, 79 Mich. L. Rev. at 118, 171; Recent Developments, State Taxation of Foreign-Source Income: Mobil Oil Corp. v. Commissioner of Taxes, supra at 817; Taxation of Multistate Corporations -- Mobil, Exxon, and Colorado, 9 Colo. Law 2058, 2059 (1980).

U.S. 307 (1938), and Gwin, White & Prince, Inc. v. Henneford, 305 U.S. 434 (1939). This argument is without merit for three reasons.

First, AS 43.21 is not a gross receipts tax; it is a tax on net income. From 1977 to 1981, the gross receipts from the ultimate sale of a barrel of Alaska oil averaged $26.00. The per barrel AS 43.21 tax base in those years, however, was $6.77. See Chart 1.

Second, inasmuch as gross receipts taxes are different from net income taxes, different apportionment rules have emerged. 50/ The Supreme Court

> [H]as taken the position that the difference between taxes on net income and taxes on gross receipts from interstate commerce warrants different results. Further, the rationale of the decisions striking down taxes involving gross receipts has not been applied to taxes imposed on net income derived from interstate commerce.

P. Hartman, Federal Limitations on State and Local Taxation 461 (1981). Thus, while a state-of-origin gross receipts tax is prohibited, an income tax using a state-of-origin sales factor is not. International Harvester Co. v. Evatt, 329 U.S. 416 (1947).

50/ Gross receipts taxes are imposed on the entire value of the final product, including any value that may have been added by other states through transportation, processing, packaging and marketing. Thus, a tax by either the origin or the destination state is, by its very nature, unapportioned. Therefore courts have established an admittedly arbitrary rule allowing only the destination state to levy the tax. Douglas v. Glacier State Telephone Co., 615 P.2d 580 (Alaska 1980).

continued

Third, even if AS 43.21 were a gross receipts tax, it would be constitutional. The Court has always distinguished between a gross receipts tax on interstate sales and a tax on manufacturing or production activities measured by gross receipts from interstate sales. P. Hartman, supra at p. 443. A gross receipts tax on oil production income is simply a severance tax; it is constitutional even though the measure of the tax is receipts from interstate sales. Commonwealth Edison v. Montana, 453 U.S. 609, 617 (1981).

As a result, the companies' premise that AS 43.21 taxes a base that other states have a right to tax is meritless. So, then, are their sundry factual claims. Their affidavits purporting to show "130% multiple taxation" are nothing more than illustrations of their erroneous premise that states using a formula method of apportionment are "taxing a share" of income earned in Alaska. Other states, with an aggregate apportionment fraction of 30%, do not tax, nor are they entitled to tax, 30% of the AS 43.21 tax base.

The companies' "internal consistency" argument 51/ is also based upon the assumption that separate accounting and

---

50/ continued
Additionally, gross receipts tax liability arises even if the taxpayer incurs a loss, and this tax is thus "inherently more burdensome than income tax[es]." Moorman, 437 U.S. at 281.

51/ The companies' "internal consistency" argument arises out of the combination of AS 43.20 and AS 43.21. Because the former continued

formula apportionment are automatically asymmetrical -- a view precluded by Container. The fact is that if all states were to adopt Alaska's taxing system no more than 100% of all income would be taxed -- notwithstanding the use of separate accounting under AS 43.21 and the use of a three-factor formula under AS 43.20.

The "internal consistency" requirement referred to in Container has its origin in W. Beaman, Paying Taxes to Other States: State and Local Taxation of Non-Resident Businesses at ¶ 3.20 (1963). Beaman makes it clear, as does the Court in Container, that the test is theoretical in nature -- proceeding as it does from a hypothetical, and focusing on whether overtaxation will logically and necessarily result. The test, as Beaman explains, would be violated if a state used an origin factor for sales originating in the state and a destination factor for sales consummated in the state. The combination of

---

50/ continued
applies to a unitary group of corporations and the latter only to the corporation that produces oil, an AS 43.20 taxpayer (for example, Arco's marine transportation subsidiary) may be unitary with an AS 43.21 taxpayer. If, and only if, (1) the income from AS 43.21 production activities is included in the calculation of the AS 43.20 taxpayer's tax liability (which it is not, as discussed below); (2) the unitary business has a separate production subsidiary (which Exxon does not); and (3) the production activities are more profitable than the overall business of the unitary taxpayer, then that combination, if applied everywhere, could lead to multiple taxation.

Of course, if all of a taxpayer's Alaska activities are carried out by a single AS 43.21 corporation, all production income is explicitly excluded from the calculation of "other" income. AS 43.21.040.

these two formulas by every state would inevitably lead to 200% of all income being taxed.

Necessarily, the companies' affidavits, which purport only to show that -- for these particular taxpayers, with this particular corporate structure, in these particular years -- the universal adoption of Alaska's system would result in over-taxation, are irrelevant. For different taxpayers, with different corporate structures, under different economic conditions, undertaxation would result. These affiants' conclusions are therefore "dependent solely on the facts of the individual case." Container, 77 L.Ed.2d at 568 and are of no legal significance.

At the present time, production activities are more profitable industry-wide than are other activities. In Container, the Court accepted the obvious fact that if the more profitable components of an industry -- in that case its foreign operations -- are separately accounted, while less profitable segments are subjected to a formula, aggregate overtaxation might well result. 77 L.Ed.2d at 564-65. See Union Oil Co. of California v. State, Dep't of Revenue, ___P.2d___, Op. No. 7389 at 5 n.3 (February 10, 1984). This is the point of the Tompkins Affidavit (R. 13744-46; C.B. at 52-53), which, through 24,000 hypothetical computer runs, shows that the universal adoption of Alaska's tax system would be more likely to result in overtaxation as relative production profits increase.

The issue, then, is whether this demonstrates an inevitability of overtaxation from the universal adoption of Alaska's system. According to the dissent in Container, it does; given current economic conditions, overtaxation is "the logical expectation in a large proportion of the cases." 77 L.Ed.2d at 577 (Powell, J., dissenting). According to the majority, however, this is not enough. The Court is concerned only with "automatic asymmetry" caused by intrinsic theoretical inconsistency. 77 L.Ed.2d at 572. Thus, the taxpayer's individual circumstances are no more pertinent when they are recast -- through vehicles like the Tompkins affidavit -- as typical of current industry conditions.

Indeed, economic conditions can change. A drop in OPEC crude prices, unaccompanied by lower prices at the pump, may well make production profits disproportionately small in years to come, which means that Alaska's tax system would -- if universally adopted -- tend to undertax income in the aggregate. Thus, under the companies' view, Alaska's system may be facially and intrinsically invalid in 1978, but facially and intrinsically valid in 1990. That is a misuse of the internal consistency test, and the companies' affidavits do not prove their intended point.

What is of even greater importance, however, is that Tompkins -- like his counterparts at Exxon (Oscar Jones) and Sohio (E. Wayne Tanner) -- has based his affidavit on an erroneous interpretation of AS 43.20. See R. 13742-13808,

14204-08, and 13454-56 respectively. Properly interpreted, that law removes even the practical possibility of overtaxation caused by current industry circumstances. It does so because, in calculating AS 43.20 income, all production income everywhere is excluded from the apportionable base -- precisely the result demanded by the taxpayer in Container.

Alaska Tax Ruling 82-2 (ATR 82-2) recognized that, in enacting AS 43.21, the legislature chose to view production income as properly apportionable by the separate accounting method. 52/ Accordingly, the legislature intended to exclude production income from the apportionable base of AS 43.20. Each of the companies' affidavits, however, assumes that production income is included in the AS 43.20 tax base. This erroneous assumption makes the affidavits simply irrelevant.

The companies quarrel with the validity of ATR 82-2, raising procedural objections under the Administrative Procedures Act (AS 44.62). These arguments, however, fail to recognize that the ruling was not an exercise in rulemaking, but rather an

---

52/ Alaska Tax Ruling 82-2 was adopted in the context of determining the AS 43.20 liability of Alaska Interstate Co. That company's AS 43.21 liability had already been determined under Rev. Dec. 81-29 which, contrary to the companies' assertion (C.B. at 53), specifically did not interpret AS 43.20. R. 17267. Thus, the first time the issue was raised before the department, the department ruled in favor of the taxpayer. That ruling was accepted by the department and incorporated into the superior court decision in AIA v. State of Alaska, No. 3AN-81-7286 (Super. Ct., 3rd Jud. Dist. at Anchorage, 1982).

adjudicatory decision adopted by the superior court. Thus, the arguments are indistinguishable from those rejected by this court in Wien Air Alaska, Inc. v. Dep't of Revenue, 647 P.2d 1087 (Alaska 1982). The validity of ATR 82-2 is not and cannot be a subject of this suit. The companies are not contesting their tax liability under AS 43.20; nor are they in a position to challenge ATR 82-2. Under that ruling, each of these companies will receive a substantial refund.

The companies' make one argument regarding ATR 82-2 that is silly. Recognizing that the internal consistency test is hypothetical, they ask the court to assume -- hypothetically -- that every state would adopt both AS 43.20 and AS 43.21. C.B. at 57. They then suggest, however, that the court should not assume that every state would interpret AS 43.20 as Alaska does, because that would be hypothetical. Id. The argument merits no response.

The companies' last multiple taxation argument is that if the UDITPA factors attributable to Alaska production, and the AS 43.21 tax base, are subtracted from the formulas of other states, the tax bases of those formula states will drop. C.B. at 57. This, they believe, shows that AS 43.21 has resulted in multiple taxation. In truth, it shows merely that, under the current economic circumstances of these companies, production profits are disproportionate to production factors -- leading to a result, as we have seen, which is "dependent solely on the facts of the individual case." Container, 77 L.Ed.2d at 568.

In conclusion, as long as states use different methods to apportion income, there will be risks of over- or undertaxation of the income. As the Supreme Court has noted: "... Congress has long debated, but has not enacted, legislation designed to regulate state taxation of income." Mobil Oil Corp. v. Comm'r of Taxes of Vermont, 447 U.S. at 448. Following the introduction of numerous bills 53/ and the holding of numerous hearings 54/ Congress has not found a risk of multiple taxation sufficient to warrant the imposition of uniform rules upon the states. Thus, the companies arguments as to multiple taxation must be rejected.

IV. THE COMPANIES' EQUAL PROTECTION CLAIM AMOUNTS TO AN ERRONEOUS ACCUSATION OF IMPROPER PURPOSE.

A. Introduction and Legal Standard

In enacting AS 43.21 after some four years of intensive debate, the legislature explained its intended goals -- to cure UDITPA's inability to accurately measure the oil production income of a multistate taxpayer, and to ensure that the effective tax rate paid by multistate oil companies approached the 9.4% rate applicable to all taxpayers. Sec. 1, ch. 110, SLA 1978.

The companies' response is two-fold:

1) The words of sec. 1, ch. 110, SLA 1978 are lies, and conceal a hidden motive to subject multistate oil companies to "specially heavy taxation" (C.B. at 60); and

2) Less discriminatory alternatives exist to accomplish the legislature's intended goals -- a point made both as an ostensible separate basis for invalidating the law, and as evidence of the legislature's alleged insincerity.

As a matter of legislative history, the companies are wrong on both counts. Moreover, as a matter of law, the companies' claims are irrelevant.

54/ continued
Before the Subcomm. on Taxation and Debt Management Generally of the Senate Finance Comm., 96th Cong., 2d Sess. (1980).

Alaska's equal protection standard involves a three-step analysis:

> 1) first, the nature of the constitutional interest involved must be identified;
>
> 2) second, in light of that interest, the validity of the purposes of the statute must be analyzed; and
>
> 3) third, also in light of that interest, an analysis must be made of whether the means chosen have a sufficient relationship to the goals of the statute.

ALPAC v. Brown, ___P.2d___, Op. No. 2789 at 10-11 (February 17, 1984). The importance of the interest involved is "the most important variable in fixing the appropriate level of review," and determines the degree of scrutiny required under the remaining components of the test. Id. at 10.

The companies have not, and do not quarrel with the fact that freedom from disparate taxation lies at the low end of those interests protected by the Equal Protection Clause. 55/ The state noted below -- without disagreement -- that in tax cases since Isakson v. Rickey, 550 P.2d 359 (Alaska 1976), this

---

55/ Tax laws have certainly received minimal scrutiny under federal law. As the United States Supreme Court recently stated, "[l]egislatures have especially broad latitude in creating classifications and distinctions in tax statutes." Regan v. Taxation With Representation, ____U.S.____, 76 L.Ed.2d 129, 138 (1983). See also Austin v. New Hampshire, 423 U.S. 656, 661-62 (1975); Kahn v. Shevin, 416 U.S. 351, 355 (1974); Allied Stores of Ohio, Inc. v. Bowers, 358 U.S. 522, 526-27 (1959); Welch v. Henry, 305 U.S. 134, 144-45 (1938); Carmichael v. Southern Coal & Coke Co., 301 U.S. 495, 509, (1937).

court has applied little more than the traditional rational basis standard of review, finding it unnecessary to undertake that balancing of means and interest which is integral to state equal protection analysis involving more substantial rights. Pharr v. Fairbanks North Star Borough, 638 P.2d 666 (Alaska 1981); Ketchikan Gateway Borough v. Breed, 639 P.2d 995 (Alaska 1981); State v. Reefer King Co. Inc., 559 P.2d 56, 65 (Alaska 1976). See also Williams v. Zobel (Zobel I), 619 P.2d 422, 427 (Alaska 1980).

The companies have not asserted that the legislature's stated goals are illegitimate, or that the means chosen by the legislature are unfairly or insubstantially related to these ends. They have, in short, failed to make an equal protection claim. The companies portrayal of a dishonest legislature conspiring to single them out for specially heavy taxation is meant less to fit equal protection protocol, and more to make weight. 56/

56/ To that end, the companies imply that certain briefs written by the Attorney General in other cases "prove" that the legislatures' motives in enacting AS 43.21 were dishonest. C.B. at 62-64. According to them, if the Attorney General has ever defended the economic theory underlying UDITPA, the legislature is bound to accept that theory both before and after the brief is written. The companies have it backwards: the legislature enacts the laws, and the Attorney General enforces and defends them.

Moreover, the companies are hardly in a position to complain of inconsistency. They have not explained why their economic theories vary from year to year, and continue to vary from state to state. Each of these companies, for example, persistently tried to file separate accounting returns in Alaska when UDITPA was required by statute. R. 873-1198.

B. The Record Amply Demonstrates That The Legislature's Statutorily Identified Purposes Were Genuine.

The companies claim that the stated purposes of AS 43.21 (1) could not have been real because there were other means of accomplishing those ends; or (2) even if real, those purposes were not dominant. The companies shamelessly allege that the legislature's conclusion that UDITPA would underestimate oil income is "not supported by the record." C.B. at 66-67. They further assert that it is "unlikely" that the legislature was concerned about tax equity. C.B. at 68. These statements are simply wrong, and presume that this court will heed the companies' advice to ignore the legislative history before it. C.B. at 65. The legislature's consideration of the shortcomings of UDITPA for oil production income, and its concern with tax equity have been set out in Section I and Appendix C to this brief. Additionally, Appendix B lists 75 of the major documents that support the legislature's conclusions. Finally, between pages 1628 and 9923 of the record on appeal this court will find ample evidence, from many qualified and objective experts, supporting the legislature's conclusions.

The companies claim that the real motive behind AS 43.21 was the legislature's desire "to extract the maximum amount of money from the oil industry, and to shift from Alaska residents to the oil industry the burden of satisfying Alaska's

revenue goals." C.B. at 69. 57/ For this proposition, the companies cite the opinion testimony of certain witnesses before the legislature. It should be recalled, however, that the legislative process leading to the enactment of AS 43.21 spanned four years. The state has assembled and submitted every document and transcript related to that debate, a record of some 8,300 pages. The state did not selectively include only those documents that buttress its litigation position. As a result, it is not surprising that one can find comments which would support a variety of alleged motives. Indeed, it is the very function of the legislative hearing process to encourage the expression of divergent views.

Over the course of some 63 hearings, the legislature was told by every conceivable interest what to do, and why it should do it. When it enacted AS 43.21, however, the legislature made its intent perfectly clear in section 1, chapter 110, SLA 1978. As this court has stated, a search for "real"

57/ Similarly, the companies argue that AS 43.21 should receive extra scrutiny because it is "tailored." C.B. at 47-48. The term "tailored tax" is used in Complete Auto Transit, Inc. v. Brady, 430 U.S. 274, 289 n.15 (1977) to describe those state laws that impose peculiar tax burdens on particular industries. AS 43.21 is not a "tailored tax." It was enacted to end discrimination, not to create it. The tax was designed to equalize the tax rate paid by all industries in Alaska, and to end the advantage given to the oil industry, which was taxed at a much lower effective rate than any other industry. See sec. 1, ch. 110, SLA 1978.

legislative motive would transform equal protection jurisprudence "into a parade of legislator's affidavits containing their perceptions" of that motive. Alaska Public Employees Association v. State, 525 P.2d 12, 16 (Alaska 1974). See also Union Oil Co. v. Dep't of Revenue, 560 P.2d 21 (Alaska 1977), Lynden Transport, Inc. v. State, 532 P.2d 700, 716 (Alaska 1975). Thus, in Minnesota v. Clover Leaf Creamery Co., 449 U.S. 456 (1981), the Supreme Court refused to consider evidence of a discriminatory purpose, holding:

> In equal protection analysis, this Court will assume that the objectives articulated by the legislature are actual purposes of the statute, unless an examination of the circumstances forces us to conclude that they "could not have been a goal of the legislation".

449 U.S. at 463 n.7 (citations omitted). The same principle, the Court held, applied to the appellee's Commerce Clause challenge.

C. Once a Legitimate Purpose is Identified, The Legislature is Not Required to Choose the Means Most Favorable to The Taxpayers.

The companies ask this court to examine the means chosen by the legislature under a "least restrictive alternative" analysis. That is entirely inappropriate in a minimal scrutiny case such as this. "Less drastic means," as Professor Ed Gunther has pointed out, is only used by the United States Supreme Court when strict scrutiny is required. Under State v. Ostrosky, 667 P.2d 1184 (Alaska 1983) and ALPAC v. Brown, this analysis would be appropriate only when the nature of the constitutional right

involved is extremely weighty. 58/ Here the nature of the right involved is insubstantial. There is no basis for "less drastic means" analysis.

Moreover, AS 43.21 actually furthers the legislature's goals more effectively than any available alternative -- including the modified formula suggested by the companies. C.B. at 67. Modifying UDITPA was, in fact, the principal alternative considered by the legislature. It was rejected because it did not further the legislature's goals. As discussed in Section I, the legislature concluded that separate accounting better achieves tax equity among oil-producing corporations than does any apportionment formula. Under any formula, the same Alaska properties operated by differently structured corporations produced vastly different tax results. R. 1934-35 [D. 8-018, F. 4 at 15-16]. See Chart 4.

Finally, the companies claim that they are entitled to special protection because their "potential influence [is] limited" in Alaska. C.B. at 60. This argument is without merit.

Multinational corporations are not a suspect class. It is true that these companies cannot vote; nor can any corporation. Corporate influence is exercised through the participation of employees in the political process, and by

---

58/ See Gunther, Forward: In Search of Evolving Doctrine on A Changing Court: A Model for a Newer, Equal Protection, 86 Harv. L. Rev. 1, 21 (1972).

lobbying. In this regard: out of $2,352,203.29 spent by various organizations to influence legislative or administrative action during the 1978 Alaska legislative session, AS 43.21 taxpayers spent 49%, or $1,178,688.56. APOC 1978 Annual Report, Table 47.

The oil industry was also well represented in the political process during the deliberation and passage of AS 43.21. Dozens of oil industry representatives made the concerns of the industry known during the four years of legislative deliberation. 59/

59/ All together 95 separate documents in the legislative history involve industry comment. See "Author Index" under "Industry" for a complete listing of industry presentations to the legislature. R. 10868-10986. See for example, testimony of Crawford Thomas of the Alaska Oil and Gas Association (AOGA), R. 2384-95]D. 8-126, F. 5]; of Gary Boren (AOGA), R. 2188-2203 [D. 8-026, F. 5]; R. 2206-13 [D. 8-028, F. 5]; R. 2214-60 [D. 8-029, F. 5]; of John Warren for Union Oil, R. 2262-64 [D. 8-031, F. 5]; R. 2265-98 [D. 8-032, F. 5]; of Dick Donaldson of Sohio, R. 2605-30 [D. 8-050, F. 7]. The industry comments included an objection to an income tax as a disincentive to investment R. 6237-38 [D. 6-014, F. 40; R. 6242-72 [D. 6-016, F. 40; R. 7462-75 [D. 6-050, F. 43]; R. 4598 [D. 7-147, F. 27]; a request that Alaska maintain an attractive business climate R. 7413-26 [D. 6-048, F. 43]; R. 7427-61 [D. 6-049, F. 43]; a denial that the oil industry had refused to pay its fair share in taxation (R.7546 [D. 6-060, F. 43]; R. 2640-51 [D. 8-053, F. 7]); general criticisms of separate accounting (R. 4316-24 [D. 7-034, F. 26]; R. 2183-84 [D. 8-024, F. 5]; R. 2206-13 [D. 8-028, F. 5]; R. 2446-56 [D. 8-038, F. 6]); requests for no legislative change in order to stabilize taxes (R. 2605-30 [D. 8-050, F. 7]); criticism of the Tanzer Report (see R. 6039-6144, R. 7547-7553 [D. 6-061, F. 43]; R. 6311-14 [D. 6-010, F. 40]; R. 6234-36 [D. 6-013, F. 40]; R. 6277-85 [D. 6-018, F. 40]; R. 6306-27 [D. 6-021, F. 40]; R. 7222 [D. 6-034, F. 43); general comments about high tax burden (R. 8357-62, D. 6-091, F. 46); expressing preference for the then-existing system (R. 8470-73 [D. 6-112, F. 49]; R. 4109-16 [D. 7-027, F. 24]; R. 2262-64 [D. 8-031, continued

The power to tax is a fundamental attribute of sovereignty, 60/ and the state's interest in the execution of its taxing structure is substantial. In view of the insubstantial nature of the companies' constitutional interest, the legitimacy of the purposes of the statute, and the closeness of the fit between the purposes and the statute, AS 43.21 easily meets equal protection requirements.

V. AS 43.21 DOES NOT DISCRIMINATE AGAINST INTERSTATE COMMERCE BECAUSE IT TREATS INTRASTATE AND INTERSTATE OIL COMPANIES EVENHANDEDLY.

AS 43.21 taxes all oil companies equally, no matter where they are domiciled or headquartered, and it fairly

F. 5]); a denial that the federal tax base was unduly eroded by federal subsidies (R. 2188-2203 [D. 8-026, F. 5]; R. 2459-2515 [D. 8-041, F. 6]; opinions that oil industry high profitability was a myth (R. 8709-23 [D. 6-146, F. 54]; R. 4292-4305 D. 7-032, F. 26]); opinions that stable oil tax policy would promote employment (R. 3183-3191 D. 8-106, F. 17]); comments on potential legal problems of separate accounting (R. 4122-82 D. 7-029, F. 25]; R. 4117-18 D. 7-028, F. 24]; R. 4825-73 D. 7-058, F. 31]; R. 2427-2445 [D. 8-037, F. 6]); criticism of Zeifman & Ainsworth report (R. 3233-89) (R. 4183-4229 [D. 7-030, F. 25]; R. 2265-98 D. 8-032, F. 5]); criticism of the Vanik report which concluded that the oil industry paid a 2%-3%effective tax rate (R. 2206-13 [D. 8-028, F. 5]; R. 2214-60 [D. 8-029, F. 5]; R. 2427-45 D. 8-037, F. 6]; R. 2598-2601 [D. 8-048, F. 7]).

60/ Merrion v. Jicarilla Apache Indian Tribe, 455 U.S. 130, 137 (1982); Bode v. Barrett, 344 U.S. 583 (1953); Kirtland v. Hotchkiss, 100 U.S. 558 (1879); Philadelphia & Reading R. Co. v. Pennsylvania, 82 U.S. 146 (1873); Dobbins v. Comm'rs of Erie County, 16 Pet. 435, 10 L.Ed 1022 (1842)

apportions income to Alaska. A state tax that is facially neutral, and that is fairly apportioned, does not discriminate against interstate commerce. Container, 77 L.Ed.2d at 556.

In Complete Auto Transit, Inc. v. Brady, 430 U.S. 274 (1977) the requirement of fair apportionment and the prohibition against discrimination were set out as separate tests, 61/ and indeed the two are not coterminous. Westinghouse Electric Corp. v. Tully, ___U.S.___, Slip Op. at 10 (April 24, 1984). Yet aside from forbidding "obvious" facial discrimination, the court recently held in Container that Complete Auto's prohibition against discrimination

> [M]ight have been construed to require that a state apportionment formula not differ so substantially from methods of allocation used by other jurisdictions in which the taxpayer is subject to taxation so as to produce double taxation of the same income, and a resultant tax burden higher than the taxpayer would incur if its business were limited to any one jurisdiction. At least in the interstate commerce context, however, the anti-discrimination principle has not in practice required much in addition to the requirement of fair apportionment.

61/ In Complete Auto, the Court established a four-prong Commerce Clause test. The tax will be sustained when it (1) is applied to an activity with a substantial nexus with the taxing state; (2) is fairly apportioned; (3) does not discriminate against interstate commerce; and (4) is fairly related to the services provided by the state. 430 U.S. at 277-78. The companies do not contest that they have a substantial nexus with the State of Alaska, and, as has previously been demonstrated, Alaska's separate accounting is fairly apportioned. This section deals with the companies challenges based on the third and fourth prongs of the Complete Auto test: discrimination against commerce, and the relationship of the tax to services provided by the state.

Container, 77 L.Ed.2d at 557 (emphasis added).

The companies nonetheless argue that, quite apart from AS 43.21's fairness in apportioning their income, the statute discriminates against interstate commerce because in practice it threatens to result in multiple taxation -- a burden allegedly caused by the interaction of Alaska's laws and the more prevalent UDITPA formula employed by other states. In support of that argument, the companies use precisely the same "discriminatory impact" analysis relied upon by the dissent in Moorman. 62/ As both Container and Moorman held, however, avoiding the practical consequence of multiple taxation caused by divergent state apportionment rules is a job left to Congress.

In claiming that a facially neutral, fairly apportioned tax nonetheless discriminates against interstate commerce if it poses a practical threat of multiple taxation, or if the affected taxpayers are principally interstate businesses, the companies also rely on cases such as Maryland v. Louisiana, 451 U.S. 725 (1982) and Boston Stock Exchange v. State Tax Commission, 419 U.S. 318 (1977). That reliance is misplaced, for these cases involved "a tax [which], on its face, [was] designed to have discriminatory economic effects." Westinghouse Electric Corp. v. Tully, Slip Op. at 17 (emphasis added).

62/ Justice Powell, relying as the companies do here on cases such as Nippert v. City of Richmond, 327 U.S. 416, 429-432 continued

In Boston Stock Exchange, the state statute established lower tax rates for, and set a tax ceiling on in-state stock transfers. 429 U.S. 321-28. In Maryland v. Louisiana, the state's tax laws by their terms gave only local users a series of exemptions from and credits to a natural gas use tax. 451 U.S. 731-34. Similarly, in Westinghouse Electric Corp. v. Tully, the state of New York allowed a franchise tax credit for the export sales of Domestic International Sales Corporations ("DISC's"), but only if, in the words of the statute, the export goods were "shipped from a regular place of business of the taxpayer within [New York]." Slip Op. at 4. Indeed, in Westinghouse, the court confirmed that, in the tax field, it is a facial preference for local commerce, and not disproportionate consequences, which is constitutionally relevant. Slip Op. at 17.

Under these cases, AS 43.21 might discriminate against interstate commerce if, for example, it permitted the companies to deduct the cost of support activities related to Alaska oil production only if these activities were conducted in Alaska. That type of express "geographical limitation" would suffer from the same flaw at issue in Westinghouse, where the necessary effect of New York's discriminatory DISC credit was to predicate a company's New York tax liability on the percentage of its

---

62/ continued
(1946), would have invalidated Iowa's law because of the practical risk of multiple taxation that it created. 437 U.S. at 288.

commerce undertaken locally. Slip Op. at 7, 10. Under AS 43.21, however, the location of deductible costs is a matter of indifference. Indeed, the companies' complaint is not that Alaska law creates any incentive for them to move operations into the state. By their own admission, if they did so their AS 43.21 liability would remain constant. C.B. at 21. Rather, they argue that the combined effect of Alaska's tax laws and the tax laws of other states together produces an incentive for such a move, since their total nationwide tax liability would be reduced if they moved their operations to Alaska. In the words of the Court in Container, the companies are arguing that they face a "resultant tax burden higher than [they] would incur if [their] business were limited [to Alaska]." 77 L.Ed.2d. at 557. As already noted, Container and Moorman rejected claims based on that precise argument.

The companies' assertion that AS 43.21 falls disproportionately on interstate businesses is barred by Commonwealth Edison v. Montana, 453 U.S. 609 (1981). The companies argue that the purpose of AS 43.21 was to favor local Alaska interests by shifting a disproportionate share of the cost of state government to a small number of multistate companies. C.B. at 73. This assertion of disproportionate burden, to the extent it concerns legislative motive, fares no better than it did under the Equal Protection Clause. Their claim, moreover, simply echoes that of the taxpayers in Commonwealth Edison -- a case decided after this lawsuit was filed. This litigation was

initiated in large part on the companies' hope that the Supreme Court would reach the opposite result in that case. See companies' complaints. R. 289 (Exxon); R. 265 (Sohio); R. 12702 (Arco). The appellants in Commonwealth Edison -- Montana coal producers and their out-of-state customers -- argued that because 90% of Montana's coal was shipped out of state, Montana was discriminating against commerce by exporting its tax base to out-of-state consumers. They also argued that Montana was exploiting a "monopoly" position created by the geographic location of scarce natural resources. Id. at 619. Finally, they argued that they were shouldering too heavy a tax burden, because (1) the amount of their taxes, and as well their share of total state taxes collected, was disproportionate to their presence in the state; (2) the amount of their taxes was disproportionate to the services provided them by the state; and (3) the state was placing 50% of its tax revenues in a permanent fund, and not using it for current government expenses. Id. at 613.

Each of these arguments was rejected in Commonwealth Edison under the fourth prong of Complete Auto, which requires that the measure of the tax be reasonably related to the taxpayer's activities in the state. These same arguments were also rejected when recast as a discrimination claim. As the Court stated, the taxpayers' claims of discriminatory burden "ultimately collapsed" into fourth prong analysis. The court found "no real discrimination," since "the tax burden is borne according to the amount of coal consumed and not according

to any distinction between in-state and out-of-state consumers." Id. at 619.

This case is Commonwealth Edison revisited. AS 43.21 on its face, treats intrastate and multistate oil-producing and pipeline companies uniformly. 63/ It taxes these companies evenhandedly -- in proportion to the profit they make in Alaska. The AS 43.21 tax base is not dependent upon whether the taxpayer is an Alaska or a multistate business, or whether the oil is consumed locally or out-of-state. Under Alaska's separate accounting, state borders are "essentially irrelevant," as Commonwealth Edison held was the goal of the Commerce Clause. 453 U.S. at 619.

Furthermore, and as the court held in Commonwealth Edison, the fact that multistate or "out-of-state" companies bear a large share of the tax burden of operating state government simply does not raise a discrimination claim. If AS 43.21 fairly apportions, as it does, the companies' tax base increases in direct proportion to in-state profit. If that base is large -- either in the absolute or as a percentage of all state taxes --

---

63/ In an attempt to show that AS 43.21 was "contrived" to fall only on interstate business, the companies' counsel speculate, without personal knowledge, that no intrastate taxpayers filed an AS 43.21 return in three of the four years of the tax. C.B. at 68 n.27, 72-73. This is not true. See Affidavit of Thomas K. Williams, then Commissioner of Revenue. R. 17007-17009. Because of the confidentiality protections of AS 43.05.230, Commissioner Williams was unable to reveal taxpayer names. R. 17009.

the companies have only their own Alaska success to blame. Requiring Alaska to ameliorate the tax consequences of the companies' own profitability would place interstate commerce not in a position of equality, but a position of privilege.

> "It was not the purpose of the Commerce Clause to relieve those engaged in interstate commerce from their just share of state tax burden even though it increases the cost of doing business." 64/

Commonwealth Edison is thus dispositive of the companies' discrimination claims. The companies cannot help but agree, and simply seek to preserve the point for further appeal. C.B. at 43 n.13.

After Commonwealth Edison and Container, a fairly apportioned tax which does not facially discriminate between local and interstate components of the same industry does not discriminate against commerce. The fourth prong of Complete Auto imposes only one requirement beyond nexus with the taxing state -- that the measure of the tax must be "reasonably related to the extent of the [taxpayer's] contact [with the state]." 453 U.S. at 626. 65/ "The simple fact is that the appropriate level

---

64/ Commonwealth Edison at 623-24, quoting Colonial Pipeline Co. v. Traigle, 421 U.S. 100, 108 (1975), quoting Western Live Stock v. Bureau of Revenue, 303 U.S. 250, 254 (1938).

65/ The Court held:

> [T]he fourth prong of the Complete Auto Transit test imposes the additional limitation that the measure of the tax must be reasonably related to the extent of the contract, since it is the

continued

or rate of taxation is essentially a matter for legislative, and not judicial, resolution." Id. at 627.

VI. AS 43.21 DOES NOT VIOLATE THE CONTRACT CLAUSE.

The companies claim that Alaska, by increasing taxes on oil production, has abridged the terms of their Prudhoe Bay leases in violation of the Contract Clause of the United States Constitution. The threshold inquiry under the Contract Clause is whether the state law operates "as a substantial impairment of a contractual relationship." Energy Reserves Group, Inc. v. Kansas Power & Light Company, ___U.S.___, 74 L.Ed.2d 569, 580 (1983).

The companies do not assert that there has been any impairment of any actual lease provision, much less a substantial impairment. C.B. at 75-77. In truth, in entering into those leases, the state could not, and did not, contract away its power as a sovereign to tax income earned in the state. The Alaska

---

65/ continued

> activities or presence of the taxpayer in the State that may properly be made to bear a 'just share of the tax burden.' Western Live Stock v. Bureau of Revenue, 303 U.S. at 254.

Commonwealth Edison, 453 U.S. at 626. As the dissent pointed out, any ad valorem tax will now satisfy the fourth prong. Id. at 645.

Without explanation, the companies claim that Alaska's separate accounting is not related to the extent of their contacts with the state. C.B. at 42-43. AS 43.21 taxes profits made on the in-state production of oil, just as Montana taxed the gross value of local coal. If anything, then, Alaska's taxation of the net income from in-state production is fundamentally fairer than Montana's tax on the gross receipts from in-state production.

Constitution provides: "The power of taxation ... shall not be ... contracted away ...." 66/

The companies' argument that the state's oil lease contracts impliedly immunize its lessees from changes in the state's tax laws confuses the state's "role as commercial partner with its role as sovereign." Merrion v. Jicarilla Apache Tribe, 455 U.S. 130 (1982). Jicarilla disposes of this issue:

> Even where the contract at issue requires payment of a royalty for a license or franchise issued by the governmental entity, the government's power to tax remains unless "it has been specifically surrendered in terms which admit of no other reasonable interpretation." St. Louis v. United R. Co., 210 U.S. 266, 280 (1908).

Id. at 148. Accord, Lake Superior Consolidated Iron Mines v. Lord, 271 U.S. 577, 581-82 (1926). See also Exxon Corp. v. Eagerton, Comm'r. of Revenue of Alabama, ___U.S.___, 76 L.Ed.2d 497, 509-512 (1983).

VII. AS 43.21 IS PROPERLY RETROACTIVE TO JANUARY 1, 1978.

The companies believe that article II, section 18 of the Alaska Constitution and AS 01.10.070(a) and (f)(3) require that a retroactivity provision receive a two-thirds vote of the legislature in order to be valid. C.B. at 77-78. 67/ This

---

66/ Alaska Const. art. IX, § 1.

67/ Section 4 of chapter 110, 1978 SLA provides that the Act applies retroactively to January 1, 1978. Section 5 provides that the Act was effective immediately.

argument has no basis in the constitution or statutes cited. 68/ It has also been rejected by the Utah Supreme Court (with respect to a similar Utah constitutional provision), 69/ and by Judge Kalamarides in North Slope Borough v. Gallagher, No. 3AN-76-4703 (Super. Ct., 3rd Jud. Dist. at Anchorage, August 22, 1977), rev'd on other grounds sub nom. North Slope Borough v. Sohio Petroleum Corp., 585 P.2d 534 (Alaska 1978). R. 17138-41.

The companies fail to distinguish between an effective date clause and a retroactivity clause. The former requires a two-thirds vote: the latter does not. Regardless of when an act becomes effective, it may govern transactions or events occurring prior to the applicable effective date, or, as in this case, may concern income earned prior to its enactment. AS 43.21 had an immediate effective date, and sec. 5, ch. 110, SLA 1978 -- which established that effective date -- was passed by the constitutionally requisite two-thirds vote. Once it became applicable law, by its terms it governed income earned beginning January 1, 1978. 70/ Nothing more is required by either statute or the Alaska Constitution.

68/ The only reference to retroactivity requirements in the Alaska statutes is at AS 01.10.090, which says "[n]o statute is retrospective unless expressly declared therein."

69/ Mecham v. State Tax Commission, 410 P.2d 1008, 1009 (Utah 1966).

70/ The 1977 edition of the Manual of Legislative Drafting continued

VIII. THE LOWER COURT PROPERLY ENTERED SUMMARY JUDGMENT IN FAVOR OF THE STATE.

There are no genuine issues of material fact involved in this case. The state has not contested a single material allegation in the companies' factual affidavits, nor does it need to. The companies' claims that AS 43.21 is not a form of separate accounting, is an unapportioned tax, is inherently arbitrary, and leads to double taxation, are all issues of law. At most, these issues involve competing theories of economists and accountants on how income is earned. As the lower court properly ruled, the dispute among theorists here involves legislative facts for which a trial is neither necessary nor appropriate. State v. Erickson, 574 P.2d 1, 4-6 (Alaska 1978); Usery v. Tamiami Trail Tours, Inc., 531 F.2d 224, 244-45 (5th Cir. 1976). C.B. at 79.

70/ continued
(Legislative Affairs Agency) was used for both the 1977 and 1978 sessions of the legislature. That manual sets out the interplay between effective dates and retroactivity sections, clearly treating them as two distinct matters:

> The language [of a bill] providing for retroactive application should be set out in a separate section immediately preceding the effective date section, and where retroactive application of a portion or all of a bill is desired, an immediate effective date should be used in conjunction with the retroactivity section and the sections in the bill desired to be retroactive.

Id. at 11 (emphasis added). See Rule 10 of the Uniform Rules of the Alaska State Legislature (May 3, 1977); Rule 12, February 1973.

Only one triable issue could have been raised in this litigation -- that for these companies in these years, AS 43.21 produced a grossly distorted tax base. See Section E. The state's summary judgment motion forced the companies to "[t]ell us now what evidence you have to support your position." Braund Inc. v. White, 486 P.2d 50, 54 (Alaska 1971). "The theory underlying a motion for summary judgment is substantially the same as that underlying a motion for directed verdict." 486 P.2d at 53. The burden of proving a grossly distorted result is on the companies, and among their many affidavits, there exist no allegations which, if taken as true, would entitle the companies to relief. There is simply no need for a trial. Indeed, of the seven alleged material issues listed in the companies' brief, the issue of grossly distorted result is not to be found. C.B. 79-80.

As they did below, the companies seek to avoid summary judgment by quarreling with the state's evidence on the practical consequences of various out-of-state support functions. C.B. at 79-80. The state, however, bears no burden of proof on the merits of this lawsuit. Its motion seeks to test the companies' prima facie case. See 6 Moore's Federal Practice ¶ 56.08 at 56-136 (2d ed. 1983). Thus, even if the state's evidence were disbelieved in its entirety, the companies' evidentiary ledger would remain blank.

Finally, the companies suggest that summary judgment should not be granted in cases involving "important constitutional issues," suggesting that the state's motion is governed by Ault v. Alaska State Mortgage Ass'n, 387 P.2d 698 (Alaska 1963). C.B. at 78. Ault, however, stands only for the proposition that disputed legislative facts should not be resolved on the basis of one conclusory, seven-paragraph affidavit. 387 P.2d at 700. In this case, the court has a virtual library of material on any economic or accounting matter that it might find pertinent. This court has regularly approved the use of Civil Rule 56 to resolve important constitutional questions, and the companies' alleged exception to that rule simply does not exist. 71/

In summary, even if every material allegation in the companies' affidavits were considered to be true, and the state's affidavits were discounted, the state would nonetheless be entitled to judgment as a matter of law.

71/ See, e.g., Williams v. Zobel (Zobel II), 619 P.2d 448 (Alaska 1980); Douglas v. Glacier State Telephone Co., 615 P.2d 580 (Alaska 1980); Hicklin v. Orbeck, 565 P.2d 159 (Alaska 1977); State v. Lewis, 559 P.2d 630 (Alaska 1977); DeArmond v. Alaska State Development Corp., 376 P.2d 717 (Alaska 1962).

CONCLUSION

The judgment of the superior court is correct and should be affirmed.

Respectfully submitted April 27, 1984.

IN THE SUPREME COURT FOR THE STATE OF ALASKA

ATLANTIC RICHFIELD COMPANY; ARCO PIPE LINE COMPANY; BP ALASKA, INC.; EXXON CORPORATION; EXXON PIPELINE COMPANY; SOHIO ALASKA PETROLEUM COMPANY; and SOHIO PIPE LINE COMPANY, Appellants, vs. STATE OF ALASKA; ALASKA DEPARTMENT OF REVENUE; ALASKA DEPARTMENT OF ADMINISTRATION; COMMISSIONER OF REVENUE ROBERT D. HEATH, and COMMISSIONER OF ADMINISTRATION LISA RUDD, Appellees.	)	Supreme Court No. S-52 Superior Court Nos. 3AN-79-1903 Civil 3AN-80-1542 Civil

AFFIDAVIT OF ROBERT D. HEATH

STATE OF ALASKA)
) ss.
FIRST JUDICIAL DISTRICT)

I, ROBERT D. HEATH, being first duly sworn declare:

1. I am Commissioner of the Department of Revenue for the State of Alaska and have held that post since January 21, 1983.

2. I directed my staff to prepare the following estimates based on information from department collection records, tax returns, taxpayer financial reports and other sources.

3. The figures for AS 43.21 earnings and tax liability are based upon initial collections less refunds and credits plus audit assessments collected. Because AS 43.21 tax returns are still being audited, the figures below are not final

collections. Moreover, certain retroactive refunds and credits for AS 43.21 tax years are still being processed.

4. Estimates of AS 43.20 taxes under a modified approach are based upon best available information.

5. The figures below reflect the most current information on the earnings and taxes collected by the State of Alaska under AS 43.21 and my best judgment on what would have accrued had AS 43.20, as presently amended, been in effect during the same period. These figures pertain only to the appellants in the above-captioned action, and do not consider either the AS 43.21 or possible AS 43.20 liability of other taxpayers.

6. The figures below are expressed in millions of current dollars and have been rounded to the nearest $1 million.

7. Total net income subject to tax under AS 43.21 is:

YEAR	AS 43.21 EARNINGS TAXED
1978	$ 1,588,000,000
1979	4,125,000,000
1980	7,637,000,000
1981	7,617,000,000
TOTAL	$20,967,000,000

8. Total AS 43.21 net collections to date:

YEAR	AS 43.21 NET COLLECTIONS
1978	$ 148,000,000
1979	387,000,000
1980	648,000,000
1981	838,000,000
TOTAL	$2,021,000,000

9. Estimated alternate tax liability under the AS 43.20 modified formula apportionment approach would be:

YEAR	AS 43.20 ESTIMATED ALTERNATE TAX
1978	$ 66,000,000
1979	165,000,000
1980	216,000,000
1981	176,000,000
TOTAL	$ 623,000,000

10. The net tax difference between AS 43.21 tax liabilities and estimated AS 43.20 tax liabilities is:

YEAR	DIFFERENCE BETWEEN AS 43.21 AND AS 43.20 TAX LIABILITY
1978	$ 82,000,000
1979	222,000,000
1980	432,000,000
1981	662,000,000
TOTAL	$1,398,000,000

11. The estimated interest that would be payable on a refund of the difference between AS 43.21 and AS 43.20 tax liabilities:

YEAR	INTEREST ON ESTIMATED REFUND*
1978	$ 40,000,000
1979	89,000,000
1980	138,000,000
1981	159,000,000
TOTAL	$426,000,000

*Interest through 4/27/84

12. The estimated total refund liability of the State is:

YEAR	ESTIMATED TOTAL REFUND LIABILITY
1978	$ 122,000,000
1979	311,000,000
1980	570,000,000
1981	821,000,000
TOTAL	$1,824,000,000

Further your affiant saith naught.

Robert D. Heath, Commissioner
Department of Revenue

SUBSCRIBED AND SWORN TO before me this 27th day of April, 1984.

APPENDIX C OF BRIEF OF APPELLEES

SUMMARY OF LEGISLATIVE HISTORY

Introduction

Passage of the Oil and Gas Corporate Income Tax (AS 43.21) in June 1978 culminated four years of increasingly intense public debate over the appropriate method of taxing the income of oil and gas corporations. The documents assembled here constitute the formal and informal legislative record of that debate for the years 1975 through 1978, the period during which the income taxation of the oil and gas industry was being considered.

Underlying the arguments for or against tax revision were widely differing views of fairness. The industry clearly preferred the status quo. It rejected as unfair the idea that the state could change the rules of the game after oil and gas leases had been executed. That the state would tax beyond its present needs was also viewed as unfair.

Those in favor of tax revision countered that since the industry was earning tremendous profits, fairness dictated that it pay more taxes. Since these valuable nonrenewable resources belonged to future as well as present generations of Alaskans, it was argued that the oil and gas revenues should be raised to satisfy future needs.

Despite this underlying issue of fairness, the documentary record assembled here contains few explicit

discussions of it. Rather, the debate focused on specific legal, economic and administrative issues.

The Issues

The documents included in this history delineate the issues which emerged in the course of the debate. Almost all the issues fell into at least one of the following categories:

1. Constitutional and statutory constraints on Alaska's taxing powers.

2. Industry profitability and the adequate reflection of that profitability in the state's income tax system.

3. Revenues that could be expected from a given tax policy and the requirement for such revenue in the future.

4. Tax burden of particular proposals and the resulting overall tax burden imposed by local, state and federal jurisdictions.

5. The effects of tax changes on future investment decisions.

6. Equity of tax burden among different businesses.

7. Administrative burdens of different tax proposals.

8. Public opinion in Alaska on pending tax proposals.

The number of issues discussed, their exhaustive treatment and the modifications made to legislation as a result of the debate of these issues are reflected in the entire legislative history and indicate the deliberate legislative process that was at work. As the documents here reflect, the

legislature held 63 hearings. At these hearings, the legislature heard numerous witnesses and considered dozens of legal and economic reports over a four-year period. In these testimonies and reports, the legislature received widely divergent viewpoints as expressed by legislators, legislative staff, administration officials, consultants, oil industry representatives, business interests, Native leaders, municipal officials, public interest groups, and other concerned citizens.

The Participants

As the documents here reflect, there was a core group of participants who were particularly important in the corporate income tax debate. These participants were important because they provided the legislature with the most detailed information on and analysis of the issues that were considered. Perhaps singularly important among them was the firm of Walter J. Levy and Associates. Walter Levy, Milton Lipton and Richard Kilgore of that firm began the corporate income tax debate with their criticisms of AS 43.20 and fathered the basic separate accounting concept which ultimately became the basis for AS 43.21. While the Alaska Senate relied on the economic advice of Milton Lipton, the Alaska House retained Michael Tanzer of Tanzer Economic Associates as its economic consultant. Tanzer Economic Associates, a New York based economic consulting firm, produced the first detailed oil and gas profitability study for the Alaska State Legislature.

Also important were Professors Jerome Zeifman and Kenneth Ainsworth. They were retained by the legislature and the administration and were relied on extensively by the administration in its corporate income tax proposal. Zeifman and Ainsworth had substantial experience in the state tax field having served as Chief Counsel and Staff Economist, respectively, for the Special Subcommittee on State Taxation on Interstate Commerce of the U.S. House of Representatives (Willis Committee). The Willis Committee produced the "Report of the Special Subcommittee on State Taxation of Interstate Commerce of the Committee on the Judiciary of the House of Representatives," H. Rep. No. 1480, 88th Cong., Sess. (1964) which is probably one of the most detailed studies of state income taxation to date.

Other consultants having less important roles included Paul Hartman, Joseph Witherspoon, Walter Meed (law school professors), Edward Schaffer, Joseph Kemp and Nial Trimble (economists).

Within the legislature there were many legislators who were actively involved in the income tax debate. Senator Chancy Croft, Senator John Huber and Representative Steve Cowper were among the most actively involved having each proposed legislation revising the corporate income tax.

Senator Chancy Croft served as president of the Senate during the 1975 and 1976 legislative sessions. He served as chairman of the Interim Committee on Oil and Gas Leasing and Taxing Policies in 1976 and was a member of the Senate Resources

and Finance Committees in 1977 and 1978. Senator John Huber was chairman of the Special Committee on Taxation and Revenue in 1975 and 1976 and served on the Senate Resources Committee in 1977 and 1978. Representative Steve Cowper served as a member of the House Finance Committee in 1975 and 1976 and as its chairman in 1977 and 1978. Staff of the Legislative Affairs Agency's Research Division, Finance Division, legislative committees, and individual legislators, played important roles in analyzing testimony and reports. They also provided independent information to the legislature. Gregg Erickson and Richard Haggart of the Legislative Affairs Agency, Research Division; Jim Rhode, staff assistant to the House Finance Committee; and Kay Brown and Connie Barlow, legislative assistants to Senator John Radar made extensive analysis of the income tax issue and their analysis is contained in this legislative history.

Commissioner Sterling Gallagher, Deputy Commissioner John Messenger, Petroleum Revenue Director Tom Williams and other officials of the Alaska Department of Revenue participated extensively throughout the legislative consideration of the corporate income tax issue. In addition to their policy recommendations, the Alaska Department of Revenue provided specific technical and administrative information and analysis to the legislature in its consideration of the issues.

There was also participation by officials of several Native corporations, business leaders, consumer groups and other concerned citizens.

The taxpayers, their consultants and industry organizations participated extensively in the legislative debate. Those industry members who participated the most in the public debate included Richard Donaldson (SOHIO), Ken Showalter (SOHIO), Monty Taylor (EXXON), Marc Singletory (ARCO) and Larry Wilson (UNION OIL). The Alaska Oil and Gas Association (AOGA) coordinated a substantial portion of the industry presentations. For example, it commissioned a public opinion survey by Dittman Research Associates on oil and gas taxation. It retained several lawyers including John Warren, Gary Boren and Leonard Kust, who testified on the industry's behalf in 1978. AOGA also hired the accounting firm of Arthur Anderson and Company to prepare a comparative tax burden study.

The Forum

Some part of the public debate over the corporate income tax revision took place outside the legislature. There were many newspaper articles, editorials and radio and television stories that carried information about the corporate income tax issue as well as the positions of the various participants. The industry carried on an extensive newspaper, radio and television advertising campaign which served to present their position on the taxation issues. In addition, various participants made

speeches to community groups and business organizations. Although none of this portion of the public debate is included in the documentary history, it largely mirrored the debate within the legislature. For example, the arguments made by the industry in its advertisements and in speeches before business groups were arguments which were made to the legislature in the form of testimony and position papers. Similarly, newspaper articles reported the positions contained in reports and in testimony given before the legislature.

The documentary history here contains the public debate within the legislature. It contains the testimony, reports, position papers, memoranda and letters that were presented to legislative committees and individual legislators. There were several committees which considered income tax legislation and which received the information and analysis contained in the documents compiled here. There were two standing committees in each house of the legislature which considered the corporate income tax issue. These committees were the Resources and Finance Committees. In addition to these standing committees, there were two special committees that were established to review the income tax issue. These special committees were the Special Committee on Taxation and Revenue established in 1975 and the Interim Committee on Oil and Gas Leasing and Taxing Policies established in 1976.

The Larger Context

The issues were not considered in a vacuum, and the legislative history documents reflect that fact. Discovery of the Prudhoe Bay oil field, receipt of $900 million on bonus bids at the 1969 lease sale, construction of the Trans Alaska Pipeline, consideration of a proposed gas pipeline, exploration in the Outer Continental Shelf, the formation of the OPEC oil cartel and its effect on world oil prices and federal price controls all provided the backdrop for consideration of the corporate income tax issue. Government expenditures to meet the needs of the state grew despite delays in receiving revenue from North Slope production. The impact of oil industry activities, particularly construction, on the state's economy and life style was a significant concern of legislators. The massive influx of people and capital associated with building the Trans Alaska Pipeline had touched most Alaskans and while many of the effects were positive, the problems of that impact were considered by the legislature.

Policymakers may also have been influenced by their deliberations on related oil and gas issues, such as leasing policy, environmental questions, such as oil spill legislation, and -- most significantly -- the severance tax (which were all under review during this same period).

SETTING THE STAGE 1949-1974

Between 1949, when the territory's corporate income tax was adopted (ch. 115, SLA 1949) and 1978, the structure of the corporate income tax had remained relatively unchanged. The Alaska tax base piggy-backed the federal tax base. The income of multi-state corporations was apportioned to Alaska based upon a three factor formula consisting of property, payroll and sales. Until 1978, Alaska's corporate tax structure was the model of state tax uniformity. In 1959, Alaska adopted the Uniform Division of Income for Tax Purposes Act. This Act, providing a uniform method of apportioning income of multistate corporations, was drafted by the National Conference of Commissioners on Uniform State Laws and was approved in July 1957.

In 1970, Alaska adopted the Multistate Tax Compact (ch. 124, SLA 1970) and joined the Multistate Tax Commission. The compact and its governing Multistate Tax Commission were designed to, among other things, bring some measure of uniformity to the administration of corporate income taxes across the nation. In addition, the commission provided a mechanism under which states could pool their auditing and enforcement efforts with respect to taxpayers doing business in more than one state.

Until the 1970s, there had not been much criticism of the state's corporate income tax system. At least two studies had reviewed Alaska's tax structure before 1970 -- Revenue and Taxation in Alaska (Alaska Legislative Council, January, 1962); Review of the Alaska Tax Structure (Peat, Marwick, Mitchell &

Co., December 31, 1968). Although these studies contained some mild criticism of Alaska's corporate income tax, they essentially supported the basic structure of the federal tax base and uniform apportionment.

Until the 1970s, Alaska lacked the resources and staff to administer the corporate income tax effectively. Until the mid-1970s corporate income tax returns were generally accepted as filed, whether they reported on an apportionment or separate accounting basis. Until the mid-1970s, no field audits were conducted and only mathematical checks of corporate returns were made.

As Alaska's tax officials in the early 1970s began to review the corporate tax returns that had been filed in Alaska, talked with tax administrators in other states and participated in joint audits of the Multistate Tax Commission, they became convinced that apportionment was the right approach. They saw separate accounting as a method used by multi-state corporations for tax avoidance. This view was bolstered by the fact that most multi-state companies who had reported on a separate accounting basis in past years had reported no income in Alaska. Unlike their support for formula apportionment, Alaska tax officials became increasingly disenchanted with the federal tax base. For example, in 1975 the Department of Revenue proposed that Alaska adopt its own tax rate schedule and disallow certain special federal deductions, credits and exemptions.

In addition to the Department of Revenue, other voices of dissatisfaction with the corporate income tax were raised during the early part of the 1970s.

The Advice of Walter J. Levy & Associates

As early as 1970, legislative consultant Walter Levy predicted Alaska would not see much income tax revenue from the oil companies unless the tax law was changed. 1/ He elaborated on this in 1971 noting that Alaska should expect to receive relatively little income tax revenues from the industry, not only because of the apportionment formula, but also because the state tax was based on federal taxable income which he asserted usually amounts to very little anyway. 2/

Walter Levy's colleague, Mr. Milton Lipton, was also speaking out about the need for corporate income tax revision in the early 1970s. Speaking before the Senate Resources Committee in 1973, he advised the legislature to insure that, "... incomes earned in the state are within the state's income taxing power." 3/

1/ Walter Levy, "Transcript of Telephone Conversation, May 13, 1970," p. 14.

2/ Walter Levy, "Testimony Before the Pipeline Impact Committee by Walter Levy and Milton Lipton, March 23, 1971," pp. 36, 37.

3/ Milton Lipton, "Remarks Made by Milton Lipton on October 22, 1973 Before the Senate Resources Committee," p. 20.

Lipton argued that the state's income taxing power is the only way it will be able to insure a reasonable sharing of the economic benefits of resource production in the state.

In addressing a joint meeting of the House and Senate Resources Committees in 1974, responding to detailed questions from Representatives Tom Fink and Russ Meekins, Milton Lipton again urged the legislature to review the state's corporate income tax. Lipton said the existing law would result in many pressing problems when it came to taxing corporate income from oil and gas operations. He urged the state to: (1) identify and tax the income generated in Alaska directly, not by apportionment; (2) establish a method of putting that income within reach of the taxing authorities; and (3) establish a state policy with respect to costs and expenses allowable under state law. He pointed out that oil and gas production will be much more profitable than other business activities in the state, and revisions to the corporate income tax should take that into account. 4/ Until 1974, the legislature ignored this advice.

In 1974, the legislature signified its beginning interest in the corporate tax issue by adopting HCR 78. The resolution directed the Legislative Council to conduct "an

---

interim study of the corporate income tax structure in Alaska and of possible alternate systems... [considering] among other things, the effects of using the federal system as a model, the methods of reporting income and the problems of income shifting..."

Though proposals for conducting a corporate income tax study were submitted to the Legislative Council [L.H. Doc. 5-029, File 58; L.H. Doc. 5-030, File 58], 5/ apparently no action occurred on the resolution that year. The debate on the corporate income tax would begin in earnest in the following year.

ANALYSIS BEGINS -- 1975

In 1975, a new administration and legislature was preoccupied with solving an immediate fiscal crisis. The state's general fund, which had contained the $900 million from the 1969 Prudhoe Bay lease sale, was rapidly depleting and oil revenues from Prudhoe Bay production were still two years away. To solve the problem, the state passed the Oil and Gas Reserves Ad Valorem Tax. This temporary tax was meant to tide the state over until production from Prudhoe Bay began in 1977. Despite the

5/ Where documents are contained in the accompanying files, they are referenced here by our assigned document number and the file number where the document can be located; the first digit of the number identifies the year of its creation, i.e., document 7-083 bears a 1977 date.

legislature's preoccupation with the immediate fiscal problem, the legislature did begin its consideration of the income tax issue.

On January 27, 1975, Senate President Chancy Croft wrote to Governor Hammond informing him of his appointment of a Special Committee on Revenue and Taxation to study the corporate income tax. He noted that the appointment of the committee was done pursuant to the passage of HCR 78 in the previous session. The committee was to coordinate the consideration of income tax proposals including those mentioned by the governor in his budget address. Croft directed the committee "to review the following areas:

1. The corporate tax structure.
2. The corporate tax structure of the oil industry with particular emphasis on such things as percentage depletion allowance and investment tax credit.
3. The advantages and disadvantages of taxation of oil in place by elimination of the present exemption.
4. Possible revision of the severance tax law in light of increasing oil prices.
5. The difference between rates of taxation of oil and of gas.
6. Such other matters relating to taxation of the oil and gas industry in particular, and taxation in general, as it deems advisable."

Senator John Huber was appointed the chairman of the Special Committee on Revenue and Taxation and Senators Pat Rodey and Joe Orsini were appointed as additional members. The committee soon became known as the "Huber Committee" [L.H.

Doc. 5-015, File 57]. In a letter dated January 30, 1975, Governor Hammond applauded the appointment of the special committee and pledged his administration's support [L.H. Doc. 5-016, File 57].

In mid-February 1975, Milton Lipton testified before the Senate Resources Committee on ways the state could quickly raise substantial additional oil revenues to deal with the immediate revenue crisis. During his testimony, he also urged the legislature to undertake an in-depth study of the state's corporate income tax because he believed the existing tax was "ineffectual legislation" [L.H. Doc. 5-007, at 24, File 56].

Speaking before Senator Huber's Special Committee on Taxation and Revenue, Lipton reiterated that one of the most equitable ways for taxing the oil industry was through a corporate income tax. In order to do this, he argued, it is absolutely essential that Alaska properly identify the income earned within the state. Lipton admitted that establishing the gross revenues and acceptable deductions would be difficult, but he argued that it was a manageable problem [L.H. Doc. 5-008, File 56]. A contrary view was expressed in a letter to Senator Huber from another consultant, Bob Paschall [L.H. Doc. 5-006, File 57]. Lipton made very similar remarks to the legislature's Finance Committee [L.H. Doc. 5-009, File 56].

Lipton was suggesting some form of separate or direct accounting (the terms were used interchangeably).

In subsequent testimony to Senator Huber's committee, Lipton spelled out in greater detail the problems with the state's existing income tax. Lipton explained the problem was not the tax rate, but how taxable income was identified. He noted that the apportionment formula did not work well for Alaska because sales in Alaska are infinitesimal and suggested that the formula allows oil companies to allocate foreign income elsewhere, depletion elsewhere, etc. He suggested that the state attempt some form of "direct" accounting of income earned within the state and concluded by saying the state would remain at a distinct disadvantage if it sticks with the apportionment formula method of identifying taxable income [L.H. Doc. 5-011, File 56].

In February, the administration presented a tax package to the legislature which contained some revisions to the existing corporate income tax. These proposals were the first major bills designed to correct deficiencies with Alaska's corporate income tax system. One major deficiency to be remedied by the legislation was the constantly eroding federal tax base. The proposed changes included adopting Alaska's own tax rate schedule, and eliminating certain tax credits, deductions and other federally allowed exemptions from the computation of Alaska's tax base. Those proposals were enacted later that year [ch. 70, SLA 1975; ch. 153 SLA 1975]. During discussion of this legislation, the relative merits of formula apportionment and separate accounting were discussed by the Department of Revenue. The department explained the past problems of inadequate

enforcement of formula apportionment rules and the resultant reporting of separate accounting losses by multistate oil companies. The department clearly favored formula apportionment over separate accounting because separate accounting presented the problems of determining gross value when a "sale" may never have taken place at the wellhead, calculating allowable deductions, and the potential for corporate manipulations of profits [L.H. Doc. 5-033, File 59; L.H. Doc. 5-034, File 57]. The revenue officials gave examples showing the advantages of apportionment over separate accounting. With these conflicting opinions by Walter Levy and Associates and the Department of Revenue, the debate over separate accounting versus formula apportionment was joined.

In April, Milton Lipton was again before the legislature to discuss ways to raise revenues to meet the budget deficit. Once more he departed from the state's immediate fiscal problems and spoke about the state's need to make long term decisions on its corporate income tax structure. He stated that the income tax is the ultimate tool by which the state could receive its fair share of the benefits of oil production. He argued that the income tax is keyed to profitability, rather than production, property or some other value which does not represent the health and viability of industry or its ability to pay. Lipton asserted that he had been trying to make this point for six years, and he strongly urged the legislature to study and revise the corporate tax law [L.H. Doc. 5-007, File 56; L.H.

Doc. 5-008, File 56; L.H. Doc. 5-009, File 56; L.H. Doc. 5-010, File 56; L.H. Doc. 5-011, File 56; L.H. Doc. 5-012, File 56; L.H. Doc. 5-013, File 56].

Although the corporate income tax issue was discussed several times more during the legislative session, no specific legislation was introduced or considered. With adjournment of the 1975 session of the legislature, Senator Huber's Committee on Taxation and Revenue began serious and detailed consideration of the corporate income tax. The committee hired its staff, consisting of Frank Fleeks, as tax counsel, Edwin Sterner as the committee's economist, and Ms. Terry Berman as research assistant. The staff began work on the corporate income tax issue in the interim between legislative sessions.

In July, Senators Huber and Colletta met with Dick Kilgore, of Walter J. Levy and Associates, to discuss the corporate income tax [L.H. Doc. 5-012, File 56]. Kilgore stated that the formula apportionment method of income taxation appeared inappropriate for taxing the income from oil and gas producing activities in Alaska. First, since virtually none of the Prudhoe Bay oil would be sold in-state, the sales factor would be nearly zero. Second, the payroll factor would be almost as slight as the sales factor since the big employment area in the oil industry is not in production, transportation or refining, but in marketing, which occurs nearly entirely outside Alaska. Kilgore cited the Department of Revenue statistics which showed that the formula would end up apportioning about four percent of a typical

North Slope producer's income to Alaska, while a direct accounting system could allocate up to one-third of their income to the state.

Kilgore suggested that establishing a gross value or selling price for the product would not be difficult. Allocating deductions on the other hand, would be a problem and he cited examples.

He also cited serious administrative problems in substituting a crude oil production factor for one of the other apportionment factors.

In November 1975, Milton Lipton was in Alaska to address the Legislative Council where he repeated his comments and those of Richard Kilgore on the corporate income tax. Lipton said the two major alternatives available to the legislature were either a direct accounting system or significant modifications to the apportionment formula. Lipton also stated that he thought that direct accounting would be the most effective and the fairest way of taxing this income. Lipton did recognize that direct accounting may have legal problems but that he could not provide professional input on that issue [L.H. Doc. 5-014, File 56].

Though much of the impetus to study the corporate income tax came from the Alaska Senate (hereinafter "Senate"), the Alaska House of Representatives (hereinafter "House"), was also interested. The House Finance Committee, chaired by Representative Malone, had a Subcommittee on Revenue Sources

chaired by Steve Cowper which, in 1975, contracted with New York oil and gas economic consultant, Michael Tanzer, to review the Alaskan oil industry's profitability and taxability. Tanzer produced an august draft entitled, Alaska: Preliminary Thoughts on Oil Profits and Taxation. Senators Croft and Huber, along with the Huber Committee's staff, and Representative Malone and Finance Committee Aide Jim Rhode offered comments on these drafts in September and October [L.H. Doc. 5-001, File 55; L.H. Doc. 5-002, File 55; L.H. Doc. 5-003, File 55; L.H. Doc. 5-004, File 55; L.H. Doc. 5-005, File 55]. In November, Tanzer produced another draft of his report entitled, Alaska's Prudhoe Bay Oil: Profitability and Taxation Potential [L.H. Doc. 5-006, File 55].

THE CONSIDERATION OF SPECIFIC LEGISLATION--1976

If 1975 was marked by the beginning exploration of the corporate income tax problems, then 1976 was the year when the state's policy options for solving those problems began to emerge in concrete form.

Oil and gas income tax bills were introduced in both houses of the Alaska legislature and committee hearings were held but no bill emerged from committee in either house.

The year began with oil tax reports being submitted in both the House and in the Senate. On January 9, Michael Tanzer's first report, Alaska's Prudhoe Bay Oil: Profitability and Taxation Potential, was released to the public by Representative Steve Cowper [L.H. Doc. 6-003, File 39].

At virtually the same time, Senator Huber released the first staff report from his Special Committee on Taxation and Revenue [L.H. Doc. 6-022, File 41].

The Tanzer report was the state's first significant effort at determining the profitability of the Prudhoe Bay oil reserves. Tanzer estimated the 1964--1995 costs of developing the Prudhoe Bay oil field and then estimated 1964--1995 income. The two figures were used to calculate the rate of return and profitability for SOHIO/BP, EXXON, and ARCO. Tanzer calculated the rate of return using a discounted cash flow (DCF) analysis.

According to the report, existing taxes (state and federal) would allow for DCF annual rates of return in the 28 to 40 percent range, with 35 percent being the rate under a medium oil price assumption. The report showed that if the state corporate tax rate were increased from 5 to 50 percent, it would still allow DCF rates of return to the industry of 19 to 30 percent per year. The state's share would increase from 26 to 61 percent if a 50 percent income tax rate were imposed.

Tanzer also concluded that even with very high taxes, profits would be high enough to provide incentives for additional exploration and development in Alaska.

Another topic was Tanzer's suggestion that Alaska use its oil money to become more active in the oil sector, either through joint ventures with oil companies or by contracting directly with drilling companies. These conclusions were controversial and it did not take long for highly critical

comments, letters, and testimony on the Tanzer report to reach the legislature. Dean Olson, an economist working with Joe Josephson on behalf of BP, said the Tanzer report had serious conceptual and methodological errors [L.H. Doc. 6-010, File 40; L.H. Doc. 6-012, File 40; L.H. Doc. 6-021, File 40; L.H. Doc. 6-034, File 43]. In particular, Olson cited the following errors:

(1) lumping together corporations with different investment capabilities and requirements;

(2) failing to apply probabilistic mathematics to future benefits;

(3) failing to include all costs; and

(4) using unsupported 'net' profit estimates [L.H. Doc. 6-010, File 40; L.H. Doc. 6-012, File 40; L.H. Doc. 6-021, File 40; L.H. Doc. 6-034, File 43].

Standard Oil of California (SOCAL) criticized Tanzer and the legislature, saying budget needs and other factors should be the basis of taxation, not profitability. SOCAL pointed out that looking at the profitability of one oil field skews the picture, and that Tanzer's failure to look at Cook Inlet operations, or the operations of the remaining Prudhoe owners weakened the Tanzer report [L.H. Doc. 6-014, File 40].

Exxon Corporation (EXXON) presented detailed criticisms of the Tanzer report saying its most serious errors were

(1) exclusion of bonus bids in 1969;

(2) failing to include true exploratory risks;

(3) failing to include the transportation investments necessary to market the oil such as the Trans Alaska Pipeline; and

(4) exclusion of other Prudhoe Bay participants.

EXXON said these plus numerous other factors ranging from fairness and comparative tax burdens to inaccurate figures, led them to conclude Tanzer's conclusions were erroneous [L.H. Doc. 6-016, File 40; L.H. Doc. 6-048, File 43].

Several of the regional Native corporations, particularly the Bristol Bay Native Corporation and the Arctic Slope Regional Corporation, criticized the Tanzer report and the notion of increasing taxes on the oil and gas industry. Their concern was that such actions would prevent them from profitably developing oil and gas on their lands [L.H. Doc. 6-015, File 40; L.H. Doc. 6-019, File 40; L.H. Doc. 6-021, File 40]. However, some Native leaders not associated with management of the regional corporations, notably including Eben Hobson, Mayor of the North Slope Borough supported the idea of increased taxation of the oil industry [L.H. Doc. 6-017, File 40].

The Net Proceeds and Excess Value Taxes

In addition to a discussion of industry profitability, the staff report of the Huber Committee concluded that the existing corporate income tax law with its apportionment formula was inadequate because the major components of sales, property and payroll were assigned outside Alaska. The staff recommended

levying a tax on income from the property (as opposed to the income of the corporation), defined as a net proceeds tax.

The report explained that the net proceeds tax works by deducting statutorily established expenses from the gross proceeds from the sale of the products. If the product was shipped from Alaska without being sold, the sales figure would be determined by the sale of the state's royalty oil on the open market or other means. The staff said it would be logical to tax net proceeds at the standard 9.4 percent corporate income tax rate.

The staff also suggested levying a surtax on excess profits. Though complex in detail the basic idea was to identify excessive income defined in terms of an excessive return on capital investment and tax that income at a higher rate. The theory behind the proposal was to tax only the income which did not have a direct impact upon the investor's long-term investment plans, or to tax profits due solely to prices in excess of the long-term price. The obvious problem with this approach was that it required looking into the future to forecast the long-term price. The staff report suggested empowering the Department of Revenue to make this forecast and revise it annually as needed. The committee staff then recommended taxing the excess income or that amount above that received from the long-term price at the rate of 41 percent. It was recommended that this tax would be in addition to the standard 9.4 percent rate -- for a total tax rate on excess income of about 50 percent.

The committee staff's proposed oil and gas properties net proceeds tax was subsequently introduced as HB 699 in the House and SB 620 in the Senate, and the "oil and gas properties excess value surtax" was introduced as HB 703 in the House and as SB 621 in the Senate [see HB 699, SB 620, HB 703 and SB 621, Formal Legislative History].

While the Tanzer report produced an outcry of criticism from the oil industry and Alaska's Native corporations, these groups were relatively silent on the report by the staff of the Committee on Taxation and Revenue. One group which did comment extensively on the report of Huber's staff report as well as the Tanzer report was the New York investment banking community, from which the oil companies were then seeking investment capital for Prudhoe Bay development [L.H. Doc. 6-066, File 45; L.H. Doc. 6-067, File 45; L.H. Doc. 6-068, File 45; L.H. Doc. 6-069, File 45; L.H. Doc. 6-070, File 45; L.H. Doc. 6-071, File 45; L.H. Doc. 6-072, File 45; L.H. Doc. 6-073, File 45; L.H. Doc. 6-137, File 45]. The investment bankers, as expressed in their reports, were not as concerned about the proposed changes in the severance and normal corporate income taxes, as they were about the proposed surtax on excess income. Some reports concluded that notwithstanding the proposed tax laws, the Prudhoe Bay investments would remain profitable for investors [L.H. Doc. 6-066, File 45; L.H. Doc. 6-067, File 45; L.H. Doc. 6-068, File 45; L.H. Doc. 6-069, File 45; L.H. Doc. 6-070, File 45; L.H.

Doc. 6-071, File 45; L.H. Doc. 6-072, File 45; L.H. Doc. 6-073, File 45; L.H. Doc. 6-173, File 45].

While the net proceeds tax and the excess value surtax centered on the profits from producing oil and gas, it failed to account for other oil and gas income such as the income from transportation, refining and marketing. It also did not tax income from non-oil and gas related activities. Critics of this approach expressed concern that the lack of taxes on these other activities gave oil and gas companies an unfair advantage over other firms. [L.H. Doc. 6-059, File 43].

On February 17, Representative Cowper introduced an Oil Production Income Tax, HB 803, which incorporated some of the concepts in the special committee's net proceeds and surtax bills, but also contained different ideas about how to revise the corporate income tax. Unlike the special committee's bills, Cowper's legislation taxed the income of corporations derived from producing the oil rather than taxing the income from the property. Cowper's bill established the gross value of the oil at its first point of sale or at the refinery, whichever was lower, but provided authority to the Department of Revenue to establish this value. The bill then allowed direct production and exploration costs to be deducted from the gross value to arrive at the tax base. No deductions were allowed for indirect costs or expenses outside Alaska. That portion of the difference between the gross value and the deductible costs, which did not exceed 125 percent of the costs was considered the normal tax

base and was taxed at the rate of 10 percent. The difference that exceeded 125 percent of the costs was considered the surtax base and was taxed at the rate of 40 percent. The tax was in addition to, rather than in lieu of the normal corporate income tax. The bill also provided that oil produced from nongovernmentally owned lands was exempt. [see HB 803, Formal Legislative History].

In mid-March of 1976, Representative Cowper introduced a sponsor substitute for HB 803 (SSHB 803), which did not alter the basic approach set out in the original bill, but amended it with technical changes; and in early April introduced a Second Sponsor Substitute for HB 803 (2d SSHB 803), which did contain many substantive changes. [see HB 803, Formal Legislative History].

The April bill reduced the normal tax rate to 9.4 percent and the surtax was deleted completely. This version also allowed payments under the new tax to be applied as a credit against the existing corporate income tax, and dropped the exemption for oil produced from nongovernmental lands. Since the payments under 2d SSHB 803 were a credit against the corporate income tax, nonproducing activities of oil producing firms could be left untaxed [L.H. Doc. 6-094, File 46].

The staff of the Special Committee on Taxation and Revenue released a second report on March 16 [L.H. Doc. 6-023, File 41]. This report justified the committee's tax proposals, in part, by saying they were part of an effort to see

multi-national/multi-state oil and gas corporations treated the same way a domestic Alaskan corporation would be treated, and to obtain a larger share of the profits caused by the increase in world oil prices.

In March, extensive hearings were held by the Joint House and Senate Resources Committees on the proposed oil and gas legislation (March 23--March 30, 1976). More than 30 statements were received. The testimony began with Milton Lipton [L.H. Doc. 6-013, File 40], who repeated his opinion that the existing law needed to be changed and that the formula apportionment system had inherent weaknesses. Although he agreed that it was important to know the industry's profitability, he said that the DCF methodology used by Tanzer might be inappropriate. Mostly, Lipton talked about the net proceeds tax and the direct accounting approach and about the excess value surtax as a new idea. Lipton expressed severe doubts about being able to forecast the long term price of oil and cautioned that the state should not tax profits before they occur. As important considerations, Lipton reminded the committees that Alaska law should be consistent with federal energy policy, and not remove incentives for additional investment.

The oil industry argued against the proposed tax measures in their testimonies. In general, they said the bill:

1) would have an adverse impact on exploration and development investment in Alaska;

2) was not needed since sufficient revenues already existed;

3) was inequitable since it modified existing agreements;

4) was unnecessary because Alaska already imposed one of the highest tax burdens on the oil and gas industry of any state in the union;

5) would raise prices and taxes in the rest of the United States, possibly resulting in federal intervention;

6) was inappropriate in its basing of new and increased taxes on only one profitable field;

7) was inappropriate because the profitability estimates were inaccurate; and

8) illustrated the instability of Alaska's business climate.

[L.H. Doc. 6-038, File 43; L.H. Doc. 6-040, File 43; L.H. Doc. 6-048, File 43; L.H. Doc. 6-049, File 43; L.H. Doc. 6-050, File 43; L.H. Doc. 6-054, File 43; L.H. Doc. 6-060, File 43; L.H. Doc. 6-061, File 43; L.H. Doc. 6-062, File 43]. Native corporation leaders generally echoed these sentiments [L.H. Doc. 6-032, File 43; L.H. Doc. 6-033, File 43; L.H. Doc. 6-035, File 43; L.H. Doc. 6-036, File 43; L.H. Doc. 6-037, File 43].

In addition to this testimony, EXXON released a "Business Climate Analysis" report prepared for it by the Fantus Company, Inc. to show that Alaska had a very poor business climate. Fantus ranked Alaska 47th and 48th out of the 50 states on two tables showing business climate [L.H. Doc. 6-143, File 53]. The industry argued that the passage of these new proposals would only make Alaska's business climate worse.

Representative Cowper testified that he thought the bills should be passed because they established a public sharing

of the windfall profits, created stability, and provided incentives for development on Native lands [L.H. Doc. 6-039, File 43]. A number of others also testified on the issues ranging from business representatives against new taxes, to some individuals in favor of them.

Toward the end of the hearings the Administration presented its views. First, Tom Williams, Director of Petroleum Revenue, testified that the Huber and Cowper bills would reduce the assessed value of the Prudhoe Bay field, thus reducing reserves tax collections in FY 77. Williams suggested that since Prudhoe profits were a few years off, it might be premature to change the income tax law especially since an immediate change in the income tax law would reduce reserve tax revenues which were needed to fund government expenditure until Prudhoe Bay production began. Williams also expressed concern that the net proceeds tax might shelter pipeline owners from taxes, and said the surtax could depress the federal ceiling price for Prudhoe Bay crude [L.H. Doc. 6-059, File 43].

On March 31, Governor Hammond delivered his statement on taxation policy to the Joint Resources Committee [L.H. Doc. 6-063, File 43]. Hammond said he was interested in taxing profits, but that taxes needed to leave sufficient income to encourage exploration and development. Hammond said that while he could support severance tax changes, he could not endorse the other measures because they were difficult to administer, and they created other problems such as depressing reserves tax

receipts and federal ceiling prices. The governor suggested further in-depth study over the 1976 interim (an approach later accepted by the legislature in SCR 101).

After the joint hearings in late March, the Senate and House Resources Committees each began respectively to work on the legislation. The House Resources Committee, chaired by Nels Anderson, took up 2d SSHB 803. The Administration, Native corporations and the oil industry again testified on the legislation [L.H. Doc. 6-091, File 46; L.H. Doc. 6-092, File 46].

On April 15, a motion to table 2d SSHB 803 failed and the subsequent motion to pass the bill out of committee with individual recommendations carried. A majority of members recommended "do not pass" [L.H. Doc. 6-093, File 46]. No more action on the oil and gas corporate income tax bills occurred in the House during 1976.

In the Senate, SB 747, a new tax bill entitled the "Oil and Gas Properties Excess Values Surtax" was introduced on April 15 by the Special Committee on Taxation and Revenue. It included Lipton's suggestions of the previous month. This bill differed from the committee's previous surtax bill (HB 703, SB 621) by allowing recovery of 2.5 times the cumulative capital investment before invoking the surtax on "excess value." SB 747 also reduced the surtax rate from the 41 percent of HB 103/SB 621 to 33-1/3 percent. In other ways, SB 747 was very similar to the previous surtax bills. [see SB 747, Formal Legislative History].

In early May, Milton Lipton testified before the Senate Resources Committee and reiterated his advocacy of direct accounting. In his testimony, he acknowledged that the direct accounting approach might violate the Multistate Tax Compact and might raise a question of double taxation under the U.S. Constitution. He suggested that the legislature get a legal opinion on these issues. Lipton observed that both SB 620 and HB 803 were unnecessarily complicated, and suggested waiting until next year to polish up legislation. Lipton did, however, warn against letting the issue die [L.H. Doc. 6-085, File 45]. Lastly, Lipton said SCR 101 [L.H. Doc. 6-108, File 49], calling for an in-depth tax study, had merit.

On May 12, Tom Williams of the Department of Revenue testified before the Senate Resources Committee and echoed his earlier testimony. Williams testified that SB 620 would be very difficult to administer, would discourage oil and gas exploration and development in Alaska, might depress reserves tax receipts, and would invite litigation [L.H. Doc. 6-065, File 44].

The legislative session ended in 1976 without an oil and gas corporate income tax bill being passed out of a Senate committee. Senator Huber's Special Committee on Taxation and Revenue expired at the end of the session.

The final report of Senator Huber's Special Committee on Taxation and Revenue was published in Senate Journal Supplement No. 14 [L.H. Doc. 6-024, File 41]. As part of the final report, Huber and the committee staff made arguments for

new and increased taxes on the profits from oil and gas operations in Alaska. The final report contains many supporting documents for these arguments [L.H. Doc. 6-024, File 41].

The legislature did, however, pass SCR 101, a resolution calling for the study of alternative oil and gas leasing and taxing policies by both the Legislative Council and governor, with recommendations to be presented at the beginning of the next legislative session [L.H. Doc. 6-108, File 49].

During the summer and fall of 1976, the Research Division of the Legislative Affairs Agency and the Department of Revenue, pursuant to SCR 101, began their studies of the oil and gas tax structure. Each asked for comments from the oil industry [L.H. Doc. 6-117, File 49; L.H. Doc. 6-109, File 49; L.H. Doc. 6-113, File 49].

The Department of Revenue and the Legislative Affairs Agency jointly contracted with Jerome Zeifman and Paul Hartman, two law professors experienced in state tax law issues, to review the legal issues which had been raised regarding the corporate income tax in the previous session.

The committee established to conduct the legislature's tax and leasing study was the Interim Committee on Oil and Gas Leasing and Taxing Policies chaired by Senator Chancy Croft.

Throughout the fall, this interim committee met to review the work of the legislative staff, the Administration, and their consultants with regard to the tax study. At the November 6 meeting of the committee, Milton Lipton testified in

favor of a net proceeds type tax. At the meeting, Croft instructed the staff to draft a net proceeds tax similar to the one suggested by Milton Lipton [L.H. Doc. 6-027, File 42; L.H. Doc. 6-028, File 42; L.H. Doc. 6-029, File 42].

While the legislature and the Administration were in the process of completing their respective studies, the oil industry was conducting its own studies. Late in October of 1976, SOHIO submitted to the Department of Revenue and the Legislative Affairs Agency the first of two documents which it had prepared on the state tax issue. Sohio Submission One projected tax payments of three hypothetical companies each of which had one-third ownership in Prudhoe Bay and the Trans Alaska Pipeline System (TAPS). The document concluded that the oil industry already was paying its fair share of taxes to Alaska [L.H. Doc. 6-122, File 50; L.H. Doc. 6-125, File 50].

Michael Tanzer and Walter J. Levy and Associates commented on Sohio Submission One saying that it proved the inadequacy of the present income tax by showing the effective tax rate was only 2 to 2½ percent and that companies with the same earnings pay different amounts of tax [L.H. Doc. 6-123, File 50; L.H. Doc. 6-124, File 50].

Sohio Submission Two was a comparative tax burden study to show that Alaska's existing tax burden already equaled or exceeded the tax burdens imposed by other oil producing states. This document concluded that it would be unfair to increase

substantially Alaska's tax burden since Alaska already had the highest comparative tax burden [L.H. Doc. 6-126, File 50].

Also in the fall of 1976, the "Mortada Report" was published. This document was prepared for the Federal Energy Administration to help the FEA establish price levels on Prudhoe Bay oil. The report contained a lower estimate of profitability than the Tanzer report and was cited by the oil industry to support its arguments against increased taxation [L.H. Doc. 6-138, File 45].

THE ISSUES NARROW--1977

As part of the tax study mandated by SCR 101, the Administration and the legislature hired professors Jerome Zeifman and Kenneth Ainsworth to study the corporate income tax. In January 1977, they completed their work and submitted a report entitled The Taxation of the Petroleum Industry Under Alaska's Corporate Income Tax [L.H. Doc. 7-001, File 18]. Zeifman and Ainsworth concluded that both the current methods of determining taxable income and apportioning income were ineffectual. The apportionment formula was deficient because it "operates in such a way as to reduce the amount of taxable income attributable to Alaska by corporations which extract non-renewable petroleum resources from the State." They stated that the use of the federal tax base was inappropriate because it is substantially eroded below normal accounting net

income principles and because it provided taxpayers with subsidies to develop oil properties in non-Alaskan areas.

To solve these problems, Zeifman and Ainsworth recommended changing the tax base from federal taxable income to "book" income which is that income attested by a certified public accountant and reported to shareholders in the company's annual report. They also recommended using a modified three-factor apportionment formula substituting an extraction factor for the sales factor. Lastly, they recommended including in Alaska's share of the fractions, the property, payroll and extraction occurring on the Outer Continental Shelf serviced by Alaskan bases. Finally, Zeifman and Ainsworth recommended structuring the tax as a franchise or privilege tax, rather than a traditional income tax. They acknowledged some doubt about the constitutionality of including OCS activities in the numerator of the fraction applicable to Alaska, but thought that by enacting a privilege tax rather than a direct income tax, the risk of an unconstitutional statute was minimized.

To support its finding of the eroded federal tax base, Zeifman and Ainsworth pointed to the projected federal tax expenditures prepared by the Congressional Budget Office. These federal tax expenditure projections showed the amount of federal taxes that were foregone as a result of certain special federal tax deductions, exemptions and credits. Zeifman and Ainsworth recommended the use of a modified apportionment formula to correct the inappropriate apportionment results they saw from a

review of the corporate income tax returns that had been filed by oil and gas corporations.

In their report, Professors Zeifman and Ainsworth argued that it would be a real mistake to adopt a separate accounting system of taxation, as it often results in companies reporting negative incomes and would present Alaska with huge enforcement and audit problems since the firms involved are experts in tax avoidance. The professors said this was a major reason to adopt an approach which would allow a continuation of the Multistate Tax Commission's joint audit program. Zeifman and Ainsworth recommended against a net proceeds tax on roughly the same grounds.

With respect to the legal merits, the professors said that separate accounting was most often promoted by multi-national corporations as a substitute for apportionment but those efforts had been rejected by most tax administrators, the U.S. Supreme Court and the Judiciary Committee of the U.S. House of Representatives. It was promoted by multi-national corporations because it offers multiple opportunities for tax avoidance, a problem which Zeifman and Ainsworth concluded cannot be cured simply by giving the Department of Revenue the ability to determine the value of the oil.

Zeifman and Ainsworth pointed out that until the mid-1970s, the oil companies had invoked a "loophole" in the Multistate Tax Compact (article IV, section 18) which allowed them to use a version of separate accounting, and noted that

under that system, they had essentially avoided paying any tax. Zeifman and Ainsworth made it clear that they did not think the state was able to develop sufficient audit capabilities to deal with these separate accounting problems. Lastly, Zeifman and Ainsworth cautioned that tax inequities against domestic Alaskan companies (by allowing unfair tax advantage to big companies) could result from allowing a net proceeds tax to be in lieu of or a credit to the normal corporate income tax.

During January 1977, Paul Hartman, as a part of the tax study, commissioned under SCR 101 produced a series of legal memoranda on specific income tax issues. In Memorandum No. I: Problems of Affiliated Corporations and the Multistate Tax Compact [L.H. Doc. 7-161, File 18A], Hartman concluded that the Multistate Tax Compact does allow states to require combined reporting, but suggests that it might be best to authorize this statutorily. In Memorandum No. II: Use of Separate Accounting to Determine Taxable Income from Multistate Business Activities in Taxing State [L.H. Doc. 7-162, File 18A], Hartman reviewed the case law on separate accounting and formula apportionment but did not reach a conclusion on whether Alaska could adopt a separate accounting system. In Memorandum No. III: Review and Summary Comments on House Bill 145 [L.H. Doc. 7-163, File 18A], Hartman concluded that HB 145, as drafted, had substantial constitutional problems and advised against enacting it.

At a January 25 meeting of the Interim Committee on Oil and Gas Leasing and Taxing Policies, Milton Lipton testified that

the basic failing of the modified apportionment proposal by Zeifman and Ainsworth was that it would result in significant tax inequities between domestic and multi-state corporations in Alaska. Lipton also said that he favor using a modified version of the federal taxable income rather than "book" income. He argued that the separate accounting methodology is both workable and equitable. Following Lipton's testimony, Chairman Croft directed the staff to draft a separate accounting bill [L.H. Doc. 7-042, File 28].

On January 31, Croft's committee introduced HB 145 in the House and SB 105 in the Senate, identical separate accounting bills. In order to determine a "sales" price, the bills used the wellhead value reported for severance tax purposes. From this gross income amount, specified expenses were to be deducted to arrive at the net income. The net income from pipeline transportation systems was tied to existing accounting systems of the Interstate Commerce Commission, the Alaska Pipeline Commission, the Federal Power Commission or the Alaska Public Utilities Commission. Non-oil production or transportation income was taxed according to the standard formula apportionment under the existing corporate income tax. The bill also required public reporting of gross income, deductible expenses, net income and taxes paid by the corporations. The Alaska Pipeline and Alaska Public Utilities Commissions were required to certify the accuracy of the information presented to the Department of Revenue. [see HB 145 and SB 105, Formal Legislative History].

The Alaska Oil and Gas Association, in January 1977, issued two reports on the subject of taxation. One of the reports, entitled Alaska's Fiscal Condition - Present and Future, argued that the Department of Revenue's and the Legislative Affairs Agency's data indicated the state would have sufficient revenues to meet public needs throughout the foreseeable future. The report projected a $4.6 billion surplus by FY 85 based on existing tax laws [L.H. Doc. 7-056, File 31]. The other report entitled, Alaska Taxation of the Petroleum Industry, argued that, because the general fund already received a large percentage of its revenues from the oil and gas industry, that the industry was already paying its fair share of taxes [L.H. Doc. 7-057, File 31]. The report said that, as a result of joining the Multistate Tax Compact in 1970, Alaska had collected income taxes even when oil and gas companies earned no income in Alaska. The report said Alaska should continue to abide by the compact because the compact assured each state of obtaining its fair share of taxes while protecting taxpayers from duplicative taxation. AOGA concluded by saying that, since Alaska already imposed one of the highest tax burdens in the nation and would be receiving sufficient revenues under existing laws, new tax laws should not be enacted.

On February 11, the Department of Revenue (the department) released its report entitled Alaska's Oil and Gas Tax Structure: A Study with Recommendations for Improvement [L.H. Doc. 7-139, File 35A]. The report provided an overview of oil

and gas operations in Alaska; described Alaska's existing oil and gas tax structure; examined the deficiencies of the corporate income tax; and made recommendations for improving the tax.

This comprehensive study of the state's oil and gas tax structure adopted in its recommendations many of the Zeifman and Ainsworth suggestions. The department concluded that use of the federal tax base allowed for significant and undesirable erosions in the tax base. The department found that the policies underlying many of the federal tax exemptions, credits and deductions were irrelevant to, or in conflict with, state objectives.

The department also concluded that the standard apportionment formula failed to allocate the appropriate amount of income to Alaska from multi-state oil and gas business. The department found that while none of the property, payroll or sales factors truly represented the oil and gas income producing activities in Alaska, the destination-oriented sales factor was responsible for the greatest degree of distortion.

To resolve these problems, the department followed the recommendations of Professors Zeifman and Ainsworth to substitute "book" income for the tax base instead of federal taxable income, and to substitute an extraction factor for the sales factor in the apportionment formula.

The department also opposed strongly the use of separate accounting because of its tax avoidance possibilities and its difficulty to administer.

Testifying before the House and Senate Resources Committees, Monty Taylor of EXXON criticized the department's study for trying to solve technical taxation problems through substantial tax increases. Taylor said the recommendations were unnecessary and undesirable because (1) the state would receive surplus revenues from the existing tax structure, (2) additional taxation would discourage new investment, and (3) additional taxes would alter the profitability of Prudhoe Bay operations and constitute a breach of good faith over the executed leases. Taylor also argued that Prudhoe Bay operations will not be excessively profitable, and declared that the industry's rate of return estimates had declined since 1969 [L.H. Doc. 7-032, File 26; L.H. Doc. 7-033, File 26].

On March 9, the Governor, as part of a total tax package, introduced an oil and gas corporate franchise tax bill (HB 322 and SB 236). The bill imposed a privilege tax (as recommended by Zeifman and Ainsworth) on corporations with gross receipts in excess of $250 million per year, more than 50 percent of which comes from oil or gas related sales. The tax rate was 9.4 percent and would be in lieu of the normal corporate income tax. The tax base would be the higher of federal taxable income or "book" income as reported to shareholders. The bill modified the apportionment formula by substituting an extraction factor for the sales factor, and included in the numerator of these fractions, the property, payroll and extraction factors on the

OCS serviced from Alaskan bases. [see HB 322 and SB 236, Formal Legislative History].

In his transmittal letter, Governor Hammond said that his bill corrected three major deficiencies in the existing corporate income tax. First, it eliminated the "eroded" federal tax base by using the net income reported to shareholders as the tax base. Second, it more accurately measured the corporate business activity in the state by substituting an extraction factor for the apportionment formula sales factor. Third, it allocated to the state some of the income earned from OCS activities that impact the state.

Also introduced at about the same time, was an oil and gas properties net proceeds tax (SB 202) by Senators Huber, Willis and Croft. SB 202 was identical to SSSB 620, the net proceeds bill introduced the previous legislative session by Senator Huber's Committee on Taxation and Revenue. Senate Bill 202 never moved from committee. [see SB 202, Formal Legislative History].

Michael Tanzer's second major report to the legislature, entitled Impact of Increased Taxation on Oil Exploration and Development in Alaska was released on March 25 [L.H. Doc. 7-012, File 20]. Tanzer reviewed the historical experience of oil taxation increases in other countries and concluded that it was not possible to predict whether an increase in taxation would discourage investment. He pointed out that the

oil industry always said that increased taxes would deter additional investment.

Tanzer also recalculated oil industry profitability from Prudhoe Bay operations, and found the industry to be enjoying a 37 percent DCF rate of return. Per barrel profits were calculated at between $1.40 and $2.70, which compared favorably with the $0.15 to $0.30 received in most OPEC nations. Tanzer concluded that substantially increased taxation would not end the attractiveness of Alaska to the oil companies as a place for additional exploration and development. He recommended substantially increasing tax rates, temporarily ceasing leasing, investing increased tax revenues in an exploratory survey and then either directly contracting for drilling or undertaking joint ventures with the oil companies.

In March, legislative hearings were held and testimony was received for and against the various tax proposals before the legislature. On March 21, Professors Zeifman and Ainsworth testified before the Joint House and Senate Resources Committees and answered questions about their study and their recommendations [L.H. Doc. 7-004, File 18].

Commissioner of Revenue, Sterling Gallagher, and Deputy Commissioner, John Messenger, testified before the Joint Resources Committees on the governor's corporate income tax legislation. Gallagher reviewed the Department's tax study and repeated its findings and conclusions. Gallagher and Messenger also responded to questions regarding the profitability of oil

producing activities in Alaska and Alaska's relative tax burden [L.H. Doc. 7-005, File 19; L.H. Doc. 7-006, File 19].

Some of the Native corporations, particularly the Arctic Slope Regional Corporation, stated their opposition to any increase in taxes. Their argument was that anything which impaired Alaska's business climate would harm them, and in particular increased taxation would result in a lower level of oil development and investment [L.H. Doc. 7-014, File 21; L.H. Doc. 7-015, File 21; L.H. Doc. 7-016, File 21]. North Slope Borough Mayor, Eben Hobson testified in favor of increased taxation [L.H. Doc. 7-017, File 21].

Richard Kilgore of Walter J. Levy & Associates also testified extensively on both modified apportionment and the separate accounting methodologies that were before the legislature [L.H. Doc. 7-018, File 22; L.H. Doc. 7-019, File 22; L.H. Doc. 7-020, File 22]. Kilgore said that book income is readily available and contains fewer erosions than federal taxable income. Kilgore also stated, however, that book income allows a great deal of flexibility in how income is reported and thought this could result in other problems. Kilgore offered his view that the extraction factor would be difficult to calculate because it would be difficult to determine a firm's worldwide extraction. Kilgore said the criterion for selecting from among the differing approaches should be how well or accurately the modified apportionment approach or the separate accounting approach reflect the income actually earned in Alaska. With the

use of models, Kilgore proceeded to show that the modified apportionment approach was reasonably accurate for a company like EXXON, but not so for a company like ARCO. He commented that a major failing of the apportionment method was its assumption that all facets and areas within a company are equally profitable which fails to recognize the higher profitability of developing fields such as Prudhoe Bay. Kilgore stated that while the modified apportionment formula approach would increase revenues, it would create inequities. Kilgore concluded that separate accounting more accurately reflected income earned in Alaska and was the preferred approach if it was legally and administratively possible.

Several members of the oil industry also testified on the tax proposals. On March 25, Larry Wilson, tax counsel for Union Oil, argued that separate accounting could not possibly determine the profits derived within a state for a unitary business. Wilson also criticized separate accounting as exposing taxpayers to multiple taxation, and said the approach may violate the Fourteenth Amendment to the U.S. Constitution. Wilson also said the proposal to include OCS activities in the formula was unconstitutional [L.H. Doc. 7-029, File 25].

Richard Donaldson of SOHIO criticized the Department of Revenue's tax study. Donaldson argued that the proposals could be viewed as a confiscation of an equity interest or a modification of the lease contracts; that the taxes were biased against interstate commerce; that they were unfair and

discriminatory; that they would result in multiple taxation; and, failed to meet other constitutional requirements. Over the course of his testimony and the following colloquy, Donaldson raised several legal and policy objections to the tax proposals [L.H. Doc. 7-038, File 27; L.H. Doc. 7-039, File 27].

Also in March, the Alaska Oil and Gas Association issued a report entitled State Income Taxation of Multistate Oil Companies Operating in Alaska: A Discussion of Various Proposals and Their Effects on Taxpayers. The report set out a history of state income taxation of multistate businesses, the need for uniformity, and the effects on taxpayers from deviation from uniformity, e.g., duplicative taxation. The report discussed the harm to the oil companies from the franchise, net income and net proceeds taxes [L.H. Doc. 7-058, File 31].

Whether Prudhoe Bay was unusually profitable continued to be a major issue. The oil companies argued that Prudhoe Bay rates of return were only in the 11 to 18 percent range [L.H. Doc. 7-032, File 26; L.H. Doc. 7-033, File 26]. The Administration and the legislature's consultants often testified that Prudhoe Bay would be unusually profitable with rates of return in the 20 to 40 percent range [L.H. Doc. 7-012, File 20; L.H. Doc. 7-006, File 19]. The Department of Revenue also testified that regardless of the specific rate of return figure used, the adoption of the tax proposals would affect profitability by less than one percentage point [L.H. Doc. 7-009, File 19].

Another issue throughout 1977 was the oil revenues which the state could expect to receive. These revenues were dependent upon many unknown factors including the world market price, federal price ceilings and transportation costs. Throughout the year the Department of Revenue and the Research Division of the Legislative Affairs Agency were constantly revising their estimates of anticipated revenues. The uncertainty about whether the state would soon be faced with large surpluses or large deficits seemed to increase over this period [L.H. Doc. 7-070, File 34; L.H. Doc. 7-075, File 34; L.H. Doc. 7-078, File 34; L.H. Doc. 7-081, File 34; L.H. Doc. 7-082, File 34; L.H. Doc. 7-084, File 34; L.H. Doc. 7-090, File 34; L.H. Doc. 7-092, File 34].

After reviewing the testimony, the House Resources Subcommittee on Oil and Gas chaired by Representative Merle Snider and including Representative Malone, recommended that the full committee consider and pass out HB 322. The subcommittee gave its reasons for this action and concluded that HB 322 would benefit Alaskans without discouraging oil industry development [L.H. Doc. 7-045, File 28].

Curiously, on April 5, the House Resources Committee passed out both HB 322 (the Administration bill) and HB 145 (Croft's interim committee's separate accounting bill).

These bills then moved on to the House Finance Committee which began its consideration of these measures. Many of the same groups which had testified before the resources

committees also testified before the House Finance Committee. The Department of Revenue repeated the Administration's position on April 14, and additionally rebutted the oil industry's arguments that Alaska has one of the highest tax burdens in the country. The department presented its case that compared to other oil producing states, Alaska's existing tax burden was in the middle of the range and even with enactment of the Administration's tax package, the burden would still not be the greatest [L.H. Doc. 7-009, File 19; L.H. Doc. 7-011, File 19; L.H. Doc. 7-150, File 36].

The oil and gas industry also testified extensively repeating their position on new oil taxes [L.H. Doc. 7-025, File 23; L.H. Doc. 7-026, File 24; L.H. Doc. 7-027, File 24].

Jerome Zeifman reiterated his findings and recommendations made earlier and added that the state should not be too concerned with duplicative taxation or violating the principles of uniformity because no multi-national company had ever been able to prove it had been taxed on more than 100 percent of its income. Further, he pointed out that many states already deviate significantly from the uniformity principle [L.H. Doc. 7-022, File 23]. He also stated that the legislature could adopt a provision allowing relief for a taxpayer proving multiple taxation.

The House Finance Committee also heard from many new witnesses. Dr. Edward Schaffer, professor of economics at the University of Alberta, said the oil industry had threatened to

leave Alberta when taxes were raised there, but did not leave. Schaffer also argued it was perfectly appropriate for the state to raise its taxes even after it signed leases with the oil companies [L.H. Doc. 7-022, File 23].

Another new witness was Dr. Joseph Kemp from the University of Aberdeen, Scotland. Kemp reviewed the North Sea experience for the House Finance Committee, particularly with regards to its profitability, tax increases and their impacts, and other related concerns [L.H. Doc. 7-023, File 23; L.H. Doc. 7-066, File 33].

Nial Trimble, an economist also familiar with North Sea oil development, testified that

(1) all over the world the oil industry threatens to leave when taxes are increased, so the response to Alaska's proposal is typical;

(2) Alaska has more potential for successful exploration than other places and it is this, rather than taxes, which is the primary criterion;

(3) Alaska's taxes will not raise consumer prices; and

(4) that oil companies' actions will be dictated by where the oil is.

Trimble concluded that compared to other parts of the world, taxation in Alaska was relatively low, and profits were outstanding, and therefore it was not likely that the oil companies would leave the state [L.H. Doc. 7-021, File 23].

A number of private individuals also testified both for and against the tax proposals [L.H. Doc. 7-024, File 24; L.H. Doc. 7-025, File 23].

The House Finance Committee, on May 10, passed out of committee with a majority of do pass recommendations, a Committee Substitute for HB 322. The substitute essentially preserved the Administration's (and Zeifman's) approach with Zeifman's new recommendations.

On May 11, Chairman Steve Cowper, in the chairman's report, explained the bill and its benefits to Alaska. Also on that day, CSHB 322 passed the House of Representatives.

Following the Joint Resources Committee hearings in March, the Senate, too, took action. On April 27, the Senate Resources Committee adopted and passed out of committee a Committee Substitute for SB 105, which refined the separate accounting procedures outlined in the original SB 105. The new substitute bill made changes to accommodate the technical points made by Milton Lipton, the constitutional problems raised by Paul Hartman and Administrative concerns raised by the Department of Revenue [L.H. Doc. 7-046, File 29; L.H. Doc. 7-050, File 29]. Four members of the committee signed "no recommendation" and two members signed "do pass." The bill was next referred to the Senate Finance Committee.

On May 14, the Senate received the House-passed CSHB 322 and referred it to the Resources and Finance Committees.

On May 19, the Senate Resources Committee adopted a Senate Committee Substitute for CSHB 322. The Senate Committee Substitute "stripped" the House bill and replaced it with the

separate accounting measure that had passed out as CSSB 105 on April 27.

On May 21, the Senate Finance Committee took up CSHB 322. Senator Tillion noted that a Finance Committee Substitute had been prepared (also a separate accounting bill) and he preferred that version. The commissioner of revenue testified in favor of the House-passed bill, and Senator Croft responded in favor of the separate accounting methodology saying it would establish equal treatment between companies operating in Alaska.

Senate Finance Committee Chairman Sackett said he preferred the Senate Resources Committee Substitute, and the Senate Resources Committee Substitute for CSHB 322 was passed out of the Senate Finance Committee with individual recommendations [L.H. Doc. 7-054, File 30; Formal Legislative History].

The Senate committee made it clear that they preferred the separate accounting method of corporate income taxation over the modified formula apportionment method endorsed by the House and the Administration. Neither the House nor the Administration were prepared to change their minds and the 1977 session of the legislature adjourned without a bill passing the full Senate.

SYNTHESIS AND RESOLUTION--1978

During 1977, the discussions in the legislature had mostly shifted away from whether it should revise its corporate income tax to the question of how that goal should be

accomplished. On the several approaches which had been suggested in 1976, two had survived -- the Senate's separate accounting method and the Administration/House modified apportionment approach.

At the beginning of the 1978 legislative session, Commissioner Gallagher and oil industry representatives each requested that the income tax bill be returned to the Senate Resources Committee for further testimony. Gallagher wanted to present more information on the problems of separate accounting and the oil industry wanted to convince the Senate not to pass any income tax bill.

To provide additional support for their position against changing the corporate income tax, the industry contracted with four major consultants. By early 1978, these experts' work was unveiled.

Three of AOGA's consultants addressed the legal questions raised by the two bills on which attention now focused. The first of these was Gary Boren, a Professor of Law at Washington University in St. Louis, who prepared a report entitled The Effects of House Bill 322 and Senate CS for CS for House Bill 322 on Uniformity and Equity [L.H. Doc. 8-029, File 5]. Boren's basic point was that the failure to allow all taxpayers to use federal taxable income as the income tax base resulted in illegal discrimination. Boren further argued that no plausible justification can support elimination of the sales factor. He claimed that in substituting an extraction factor,

Alaska would have a formula unique to itself, which, because it would result in double taxation and discrimination, would be unconstitutional. He argued the separate accounting methodology would be costly, subject to manipulation, arbitrary and unfair, was unconstitutional and raised the specter of Congress stepping in to impose a federal solution to state income taxation. Boren testified before the Senate Resources Committee in February [L.H. Doc. 8-023, File 5; L.H. Doc. 8-024, File 5; L.H. Doc. 8-025, File 5; L.H. Doc. 8-026, File 5; L.H. Doc. 8-027, File 5; L.H. Doc. 8-028, File 5; L.H. Doc. 8-029, File 5].

John S. Warren prepared a report entitled Position Paper on Alaska Oil and Gas Taxation in which he asserted that Alaska's existing tax structure was modern, simple, inexpensive, fair, prevented under and over taxation and contended that all legislative proposals detracted from these values. If the proposals were enacted, the Department of Revenue could no longer rely on federal auditors and Alaska would be forced out of the Multistate Tax Compact, and be deprived of the Multistate Tax Commission's joint audit program. Warren, too, testified before the Senate Resources Committee in February [L.H. Doc. 8-030, File 5; L.H. Doc. 8-031, File 5; L.H. Doc. 8-032, File 5; L.H. Doc. 8-033, File 5; L.H. Doc. 8-034, File 5].

Leonard Kust, a Wall Street tax attorney, prepared two reports released in January. Kust's first report was entitled A Summary of State Taxation of Multi-state Business Income--History

and Present Status. This report was a brief history and overview of the issue nationwide.

Kust's second report, Income Taxation of Multistate Corporations Engaged in Oil and Gas Production and Transportation in Alaska. His arguments generally paralleled the arguments presented by Boren.

AOGA's fourth consultant was a nationally recognized accounting firm, Arthur Anderson and Company. Their January report entitled Prudhoe Bay Field and Trans-Alaska Pipeline System--Comparative State Tax Burden Study indicated that existing law in Alaska imposed the greatest tax burden of any of the major oil and gas producing states, and the legislation being considered magnified the problem considerably [L.H. Doc. 8-080, File 13; L.H. Doc. 8-081, File 13; L.H. Doc. 8-090, File 14]. Bob Moore, a tax partner in Arthur Anderson and Company, testified before the Senate Resources Committee on the study and related issues in February and March [L.H. Doc. 8-090, File 14].

The response to the Arthur Anderson study was immediate [L.H. Doc. 8-083, File 14; L.H. Doc. 8-084, File 14; L.H. Doc. 8-087, File 14; L.H. Doc. 8-088, File 14; L.H. Doc. 8-089, File 14].

The most lengthy rejoinder came from the Department of Revenue which pointed out that Alaska's ranking in comparative tax burdens would be much lower had Anderson used a different methodology and taken a broader approach. The department also pointed out some specific errors in the report [L.H. Doc. 8-089,

File 14]. Dick Haggart of the legislative research staff made some of the same arguments [L.H. Doc. 8-084, File 14].

In addition, it was argued that one unintended showing of the Arthur Anderson study was that the current income tax was not accurately measuring income earned in Alaska and that the separate accounting method most accurately reflected that income. Milton Lipton and others argued that the tables in the study showed that the present income tax apportioned income much below the income earned in Alaska whereas the separate accounting equaled the income earned in Alaska. [L.H. Doc. 8-018, File 4].

In February, representatives of individual oil companies came before the Senate Resources Committee to testify that they were already paying their fair share, that Alaska already imposes the highest tax burden, and that the increased taxes will drive away investment in oil exploration and development [L.H. Doc. 8-048, File 7; L.H. Doc. 8-049, File 7; L.H. Doc. 8-050, File 7; L.H. Doc. 8-051, File 7; L.H. Doc. 8-052, File 7; L.H. Doc. 8-053, File 7].

EXXON, in its efforts to convince the legislature not to increase taxes, contracted with Dittman Research Associates to conduct a public opinion poll. The findings of that poll, published in a report entitled, Public Opinion Concerning Oil Industry Taxation were released in February. The report stated that three out of four Alaskans thought oil industry taxation should remain the same or be lowered [L.H. Doc. 8-054, File 8;

L.H. Doc. 8-055, File 8; L.H. Doc. 8-056, File 8; L.H. Doc. 8-057, File 8].

Crawford Thomas, another AOGA consultant, testified that the Multistate Tax Compact has higher status than state law, and that corporations could continue to use the standard apportionment system regardless of Alaska's laws [L.H. Doc. 8-097, File 15]. Representatives of other business interests also testified against the taxes asserting that it would cause a slowdown in the state's economic growth [L.H. Doc. 8-092, File 15; L.H. Doc. 8-093, File 15; L.H. Doc. 8-094, File 15; L.H. Doc. 8-095, File 15; L.H. Doc. 8-096, File 15]. The Arctic Slope Regional Corporation also testified against the new taxes [L.H. Doc. 8-098, File 16; L.H. Doc. 8-099, File 16; L.H. Doc. 8-100, File 16].

Commissioner Gallagher testified at the February hearings with the Administration's position as to what kinds of problems exist with the current tax structure, why the problems exist, and how the Administration proposes to solve these problems. The solutions proposed by the Administration and the House were preferable to the solutions proposed by the Senate [L.H. Doc. 8-013, File 2].

One of the areas of concern to the legislature over this period was the legal impact on Alaska's membership in the Multistate Tax Compact and the Multistate Tax Commission if it enacted any of the proposed bills. Though many of the oil industry's representatives threatened it would force Alaska out

of the compact and the commission, the legislature's own legal counsel offered opinions to the contrary; they concluded that neither of the proposed bills would force Alaska out of the compact or commission [L.H. Doc. 8-034, File 5; L.H. Doc. 8-058, File 9; L.H. Doc. 8-059, File 9; L.H. Doc. 8-060, File 9; L.H. Doc. 8-061, File 9].

Later in the session, a compromise bill was worked out which contained elements of both the separate accounting bill (SB 145) adopted by the Senate Resources Committee and the governor's franchise tax bill (CSHB 322). It was unveiled in May, when John Messenger and Gregg Erickson appeared with a suggested compromise before the Senate Resources Committee [L.H Doc. 8-005, File 1]. The features of the bill were explained in a summary prepared by the Department of Revenue [L.H. Doc. 8-011, File 2]. The Department of Revenue stated that it had accepted the separate accounting approach set out in the compromise bill because the bill now had features which would avoid the profit shifting problems contained in some of the separate accounting approaches [L.H. Doc. 8-005, File 1; L.H. Doc. 8-011, File 2].

Milton Lipton testified on the new proposed bill. He raised specific technical problems with the bill as well as policy objections to the book income and OCS features of the compromise bill. The Department of Revenue responded to Milton Lipton's comments on the technical issues and reiterated their position in favor of using book income and the inclusion of the OCS factors. The proposed committee substitute was modified

to take into account the technical changes proposed by Milton Lipton and the Department of Revenue and was passed out of both the Senate Resources and Finance Committees (SCS CSHB 322 (Resources)). The bill was approved by the Senate on June 7 and accepted by the House on June 9.

On July 5, 1978, Governor Hammond signed the new oil and gas income tax measure into law saying, "The passage of this bill culminates three years of joint effort by the executive and legislative branches to rectify substantial defects in the former taxation scheme which, by incorporating various federally available tax loopholes and by using an inappropriate apportionment formula, allowed oil and gas corporations to avoid their share of the state tax burden. Although the representatives of the two branches debated at great length and with great vigor as to what was the best method of obtaining this end, I feel it is important to emphasize that the efforts of the executive and the legislative branches were from the beginning motivated by their common goal, i.e., to decrease the opportunity for income shifting and concomitant tax avoidance and to more accurately measure the income producing activity in the state."

LEGISLATIVE HISTORY RESPONSE

I. Introduction

As a part of its legislative history filing submitted with its summary judgment motion, the state provided a "Summary of Legislative History." 6/ That summary provided a straightforward overview of the entire legislative history of AS 43.21 by highlighting the issues, the participants, the forum, the context and the arguments raised during the debate over the oil and gas corporate income tax. In its Memorandum of Points and Authority in Support of Motion for Summary Judgment, the state again highlighted portions of the legislative record but used those portions of the legislative record which were specifically related to the taxpayers' arguments. S.B. at 17 et seq. The previous discussion adequately highlighted the major points of the legislative history, and, of course, the legislative record speaks for itself. This discussion of the legislative history responds specifically to the theories and comments contained in the taxpayers' legislative history. T.B., Appendix C.

6/ Appendix 2 to the Affidavit of John R. Messenger.

The taxpayers' theory of the legislature's intent assumes that the purposes set out in the preamble to AS 43.21 7/ are fraudulent. The taxpayers allege that the legislature had a more "simple," "understandable," yet "fundamentally wrong" motive -- greed, (T.B. at 2, 70) and that the legislature satisfied its voracious appetite for revenue by changing the income tax method for these taxpayers.

The legislative process leading to the enactment of AS 43.21, conducted responsibly and openly as it was during the years covered by this record, encouraged the expression of diverse views. It was considered by two legislatures over a four-year period. It stimulated 63 hearings, dozens of reports and studies, and testimony by uncounted lobbyists, economists, accountants, security analysts, lawyers, corporate officials, government officials, public interest groups, and just plain citizens. Appendix 2 to the Affidavit of John R. Messenger. The debate touched on a number of issues -- some of which are legally irrelevant but which were important for an informed legislative debate on a subject of vital public policy. These issues included the economic effects of various tax measures on the oil industry in Alaska -- including future exploration and development, administrative difficulties involved with tax method changes, comparative tax burden with other states, Congressional

---

7/ Section 1, ch. 110, SLA 1978.

reaction to proposed tax changes and the moral fairness of changing the tax methods for the oil industry. If one wishes to take isolated comments out of context, the resulting record probably contains some support for virtually any legislative motive that one could conceive.

II. The Taxpayers' Legislative Motive Theory

The taxpayers pepper their brief with an unrelenting series of comments, suggestions and inferences that the four-year examination of the oil and gas corporate income tax structure was motivated solely out of an unwholesome desire for more revenue by an avaricious legislature. 8/ Like the movie makers of old,

---

8/ The taxpayers' characterizations of the men and women who served in the Alaska legislature are purposely scattered through their brief. When assembled in one place, however, it is easier to appreciate the extremes to which their rhetoric has taken them: "[T]he State's increasing appetite for revenues." T.B. at 2. "Alaska's rather stingy list of deductions ..." T.B. at 9. "'[H]onest effort' by the legislature ... is absent ..." T.B. at 33. "[H]ow great is the culpability of state's tax scheme." T.B. at 37. The four years of work on the challenged legislation was "not a serious attempt to measure income 'actually' earned in Alaska ..." T.B. at 46. Legislators succumbed to "an impatient avidity for immediate and immoderate gain." T.B. at 55. "The legislature simply decided to ... grab everything for itself." T.B. at 61. The legislature was not "honestly trying to remedy the deficiencies in UDITPA." T.B. at 62. The legislature's purpose was "to extract the maximum amount of money possible ..." T.B. at 66.

the taxpayers have hoped that their subliminal message of gluttony will register on the reader's subconscious.

Having badgered the reader with innuendo, the taxpayers proceed to construct their legislative motive theory in three parts. The first are token comments taken from a handful of documents in 1975 and 1976. 9/ These comments, argue the taxpayers, show that the legislature was "urged" and resultantly "charted the course" to use its taxing power to undo the state's "bad deal" on prior oil and gas leases. T.B. at 67, 68, 71.

The second is a statement taken from a 1979 historical study of oil taxation in Alaska which hypothesizes that Alaska's dual landowner and governmental roles probably allowed the legislature to do what the taxpayers now argue, they in fact accomplished. 10/ T.B. at 70. The third is a collection of statements regarding relative shares of Prudhoe Bay revenues made during the 1981 legislative consideration of changes to AS 43.21. Appendix C at 86-89.

9/ Witherspoon memorandum [L.H. Doc. 5-020, File 57]; Huber statement quoted in Donaldson memorandum, Affidavit of Richard Donaldson, Exhibit A; Report of the Senate Special Committee on Taxation and Revenue [L.H. Doc. 6-024, File 41]; Tanzer reports [L.H. Doc. 5-001, File 55; L.H. Doc. 6-003, File 39]; Gallagher letter to Boucher, Gallagher Deposition, Exhibit 60; Cowper Testimony [L.H. Doc. 6-039, File 43]; Cowper letter to Spahr, Affidavit of William Rozell, Tab 95.

10/ Historical Review of Alaska Petroleum Taxes, 1955-1978 (April 1979). [Attached as Exhibit I to Appendix C].

The weakness of the taxpayers' characterization is apparent on its face. The taxpayers cite nothing from the formal legislative record of AS 43.21 which would support their argument. Nothing from the bills themselves, the legislative journals, the committee reports, nor the governor's letters of transmittal or signature lend the slightest support to the taxpayers' argument. Nor is there any continuous thread or consistent theme to their theory. Their constructed purpose is built solely upon connecting isolated 1975 and 1976 comments with a few post hoc statements made in 1979 and 1981.

Moreover, the taxpayers' citations in support of their argument are less weighty than they appear. String citations periodically refer to one document cited several different

ways. 11/ Quotes, at times, are mischaracterized, 12/ and support for legislative purpose in part consists of self-serving

---

11/ For example, nn. 94, 95, and 98 of taxpayers' brief (T.B. at 64) cite a single document as

> "Deposition of Sterling Gallagher, Exhibit 68 at 31-32; Deposition of Thomas K. Williams, Exhibit 76 at 31; and [L.H. Doc. 6-204 at 31-32, File 42].

12/ For example, at n.125 (T.B. at 70), a paraphrase is shown as a quotation and a quotation is incorrectly attributed. The cited document [L.H. Doc. 5-021] is a memorandum of a conversation between Dick Kilgore, Senator Huber, Senator Colletta, and Judy Whitney. The quote comes not from Senator Huber but from the unknown author of this document. It is not clear from the text whether the material used by the taxpayers is a paraphrase of Senator Huber, Dick Kilgore, or someone else.

Another example is seen at n.117 (T.B. at 69). The quotation is taken out of context. Dr. Tanzer did not say that Alaska should emulate other countries. He did observe that "it is worth noting" what other countries have done. The full quotation is as follows:

> While the ultimate decision on questions of fairness can only be made by the people and their representatives, and not by economic consultants, it is worth noting that such decisions have faced many other countries also. That is, once OPEC changed the ground rules of international oil in 1973 by doubling and redoubling the price of crude oil, the changed circumstances have forced governments in oil producing countries outside of OPEC to reconsider the tax rates they have levied. (Emphasis added).

Further, the taxpayers frequently cite to material which has nothing to do with and does not contain the quote or proposition offered. See T.B. at 69, n.117(c); T.B. at 69 n.118; Appendix C at 10, n.7. Paraphrases are occasionally offered as quotations (Appendix C at 15 - 18), and material is either added without brackets or deleted without ellipses. T.B. at 64 n.94; T.B. at 64, n.95; T.B. at 68, n.115; T.B. at 69, n.121; Appendix C at 10, n.7; Appendix C at 11, 17-23.

testimony from their own supporting witnesses. 13/

The preeminent taxpayer citations for an illegitimate legislative purpose are the quotes attributable to Professor Joseph P. Witherspoon, a law professor consultant to Senator Huber in 1975. 14/ The quotations from Professor Witherspoon are characterized by the taxpayers as "charting the course that the State was to follow." T.B. at 67. The "charting" document is a draft memorandum. It exists in two versions, both clearly incomplete, both ending abruptly as if the author's work had been interrupted. Neither version is signed by the purported author. than draft memorandum. It exists in two versions, both clearly incomplete, both ending abruptly as if the author's work had been interrupted. Neither version is signed by the purported author.

But even assuming that the memo was completed and was seen by a legislator, it is completely irrelevant here because Professor Witherspoon was not talking about the income tax issue but was talking about the state's imposition of a new property tax on oil and gas reserves which would serve as an independent source of tax revenues. 15/ At no place in the unfinished memo

---

13/ See, e.g., the six citations to the legislative record on page 16 of Taxpayers' Appendix C.

14/ T.B. at 67, citing excerpts from L.H. Doc. 5-020, File 57.

15/ On page 4 of the memo it states "In this context, the ad valorem property tax on oil and gas in place has a special justification as a new independent source of substantial tax (continued)

is the income tax addressed. Further, the legislature rejected Witherspoon's advice to impose an oil and gas reserve property tax "as a new and independent source of substantial tax revenue" and adopted instead a temporary two-year property tax to carry the state through a period of budget deficits. 16/

In any event, after consulting with Senator Huber on the property tax in 1975, Professor Witherspoon disappears from the legislative scene and never shows up again in the legislative record. Professor Witherspoon's unfinished memo can hardly be said to have "charted the course" since it did not deal with income tax and was not discussed by the legislature in the context of the income tax at all. If anyone can be said to have been the harbinger of the income tax issue it was Milton Lipton, who began advising the legislature about the deficiencies of the state's corporate income tax in the early 1970s. 17/

A second source of citations used by the taxpayers for their constructed purposes are some statements and documents relating to the so-called "Huber Bills." 18/ This series of

---

15/ (continued)
revenues at this time." [L.H. Doc. 5-020, File 57 at 4 (both versions)].

16/ The oil and gas reserves property tax, AS 43.58, was also allowed as a credit against current and future severance tax liabilities.

17/ See Summary of Legislative History, Appendix 2 to Affidavit of John R. Messenger, pp. 9-11.

18/ SB 567, SB 620, SB 621, SB 747.

bills introduced in 1976 would have increased the upper rate of the state's severance tax from 8 to 14 percent, created an excess value surtax at a 41 percent tax rate, and imposed a net proceeds tax. None of these concepts were adopted by the legislature and in fact not one of the bills moved from a single committee. The first document in this group cited by the taxpayers is a statement attributed to Senator Huber from a memo to file entitled "Huber tax package" authored by SOHIO attorney Richard Donaldson and dated five days after the conversation with Senator Huber. 19/ This aide -- memoir prepared by SOHIO counsel is clearly self-serving and created in anticipation of litigation. There is no evidence, needless to say, that Senator Huber himself ever saw Mr. Donaldson's memorandum. Nor do we have the full conversation or context of the statements or which portions of the conversation represent quotes and which ones are paraphrases. In any event, the alleged statements by Senator Huber related to the Huber bills which never moved from committee.

A second document within this group of cited authorities is a letter from Commissioner Sterling Gallagher to H.A. Boucher dated February 5, 1976. 20/ In the letter the taxpayers cite from the following:

19/ T.B. at 68, citing from Affidavit of Richard Donaldson, Exhibit A at 4.

20/ T.B. at 69, citing Gallagher Deposition, Exhibit 60.

> It seems to me what these bills really do is readjust the royalty provisions of the 1969 sale. We are saying that we made a poor dealin the past and are now using our sovereign tax powers to correct that mistake. Whether this is equitable is a question that can only be answered by the people of Alaska.

The taxpayers neglect, however, to cite earlier in the letter where Commissioner Gallagher states "[i]t would be premature to comment on any tax bills before they are introduced so I will not comment at this time on the Huber taxation package." The accuracy of the perception of tax bills not yet introduced is self-evident. But even assuming that the perception was correct, those bills included a 14 percent severance tax, a 41 percent excess value surtax and a net proceeds tax, all of which did not move out of committee, and none of which formed the basis of the income tax bill that passed.

A third source cited by the taxpayers includes a letter from Representative Cowper to Charles Spahr. THe taxpayers cite this letter for the propostion that HB 803 21/ was designed to amend the lease contracts. This letter was written in response to a letter from Charles Spahr to Representative Cowper. 22/ As with other quotes cited by the taxpayers, this is an example in

---

21/ H.B. 803 was similar to the Huber Proceeds Tax.

22/ Taxpayers' Appendix C at 19 citing Affidavit of William Rozell, Tab 95.

which statements were made in response to the recurring moral claim by the industry that tax increases were "unfair," violated a "basic relationship between the state and the companies," and "represented a significant modification of the spirit and intent of the original leasing agreements entered into in the 1960s." Id.; L.H. Doc 7-032, File 26 at 2. The characterization is industry's, not Rep. Cowper's and Cowper was simply responding that this moral claim was offset by changes in the world oil prices. 23/

What matters, however, in the context of these statements from 1975 and 1976 is that any inference of using the taxing power to rewrite the leases was soundly rejected by State policy makers responsible in later years for advancing specific income tax bills. For example, in a February 20, 1976 memorandum. 24/ forwarded to the Administration's Financial Options Task Force, Commissioner Gallagher states in the context of the State's revenue options:

> If the legislature, on the basis of facts and rational analysis, believes that contracts previously entered into are inadequate and will not obtain the state's goal of optimizing the disposition of its resources, then bilateral

---

23/ The same type of moral fairness rejoinder is contained in (1) the testimony of Dr. Edward Schaffer, T.B. at 69, citing L.H. Doc. 7-022, File 23; (2) the testimony of Dr. Vic Fisher, T.B. at 69 citing L.H. Doc. 7-024, File 23; and the (3) statements of Michael Tanzer, T.B. at 69, L.H. Doc. 5-001, File 55.

24/ This was just two weeks after the introduction of the "Huber Bills."

> renegotiations or litigation to void the contracts is appropriate. The use of the taxing authority to, in effect unilaterally renegotiate contracts is a misuse and abuse of taxing powers. If it so used these powers, government would undermine public confidence in the equity of its tax policy and the "bona fides" of any of its contracts.

Gallagher Deposition, Exhibit 51 at 2-3.

This strong position established from the outset a policy that rejects what the taxpayers would have us believe. This frank and open examination and thorough analysis of the taxation issue characterized the debate which was to continue for three more years.

Thus, the taxpayers here advance a handful of dubious items which they would have this court superimpose upon the legislature's stated purposes -- which are themselves supported by the bulk of the legislative record. With the exception of the testimony of two witnesses during 1977, all of the cited examples of "illicit purpose" come from 1975 and 1976. There is simply no common thread to their manufactured purpose. Indeed even the beginning of the thread is frayed. The "chart" from which Professor Witherspoon supposedly plotted the course of this nefarious taxing scheme is an incomplete draft of a memo written about a property tax proposal which did not pass.

Most of the examples cited by the taxpayers are in fact rejoinders to fairness and moral arguments which were raised by the oil companies in the first place. As concerned legislators, consultants, and citizens, some participants sought not only legal and economic answers to the arguments raised by the oil

companies but moral ones as well. Thus, Senator Huber and Representative Cowper were not content merely to cite article IX, section 1 of the Alaska Constitution to the oil industry officials when they spoke of the state breaking faith with its lease agreements. Instead, they met the companies' moral arguments with what they perceived as the state's moral rejoinder.

As discussed above, the taxpayers use a statement from a 1979 historical taxation study by Michael Bradner as support for their proposition that the legislature did in fact adopt AS 43.21 with a purpose to amend, unilaterally oil and gas leases. Mr. Bradner wrote this report as a private consultant. As a post hoc observation of one who was not even in the legislature when AS 43.21 was enacted, it is, of course, totally irrelevant. 25/ Nonetheless, it should be made clear that Mr. Bradner is referring to his personal theories, and is not purporting to characterize legislative intent. Mr. Bradner's statement reads

> In response to the charge that the state was abridging royalty contracts, it is likely very true that the dual owner/government role of the state allowed the state to do just that.

25/ See Alaska Public Employees' Association v. State, 525 P.2d 12 (Alaska 1974); Lynden Transport, Inc. v. State, 532 P.2d 700 (Alaska 1975); Union Oil Co. of California v. Dept. of Revenue, 560 P.2d (1977).

Michael Bradner, Historical Review of Alaska Petroleum Taxes - 1955-1978, April 1979 at 41.

It is clear, however, that Bradner was not talking in this passage about the purpose of AS 43.21, but about his theory of the economic advantage held by a governmental entity which is both a landowner and sovereign. Bradner's political theory is discussed on pages 3 and 4 of his Historical Review under the title Royalty and Taxes:

> Royalty and Taxes
>
> The State of Alaska has had two predominant revenue relationships with its petroleum resource. As a government the state has the inherent right to levy and collect taxes on its resources. However, as a public lands state, Alaska also has the dual benefit of also being owner of the resource. The latter role as owner allows the state to sell or lease the resource, and in so doing establish whatever sale or lease terms the prospective bidder is willing to pay at the time of contract.
>
> The state can adjust its share of the resource by either increasing general taxes on the resource, or by adjusting the lease terms. However, the problem with adjusting lease terms is that adjustments to such contracts can only be made for new leases. One of the issues of early tax battles in Alaska was the challenge that the state was really abridging the royalty provisions of oil leases by tax increases. The thrust of such argument was that the dual owner/taxor role gave the state an unfair advantage to redress unhappiness over lease terms with tax hikes. It is true that in most states, with some exception in regard to offshore lands of coastal states, that the "usual owner" is in the private sector, with government being confined as the taxing body. The state's dual role in Alaska is certainly the more unusual, and likely does offer some special advantage as well as alternative policy opportunity to the state. As the state entered its decade of policy change the opportunity was

> present to approach revenue issues through taxation, leasing, or some combination of both approaches.
>
> The pathway into the escalating tax battles of the 1970s was perhaps selected by historical circumstance. The sheer magnitude of the Prudhoe Bay discovery, together with the fact that the leases were already set in terms, left Alaska policymakers no other course but to pursue taxation as the only course to ascertain what they perceived as "the state's fair share." While the tax battle started well prior to Prudhoe Bay, the escalated fight that Prudhoe Bay destined to follow has perhaps set aside and overshadowed leasing issues for a decade.

Id. at 3, 4.

In essence, Bradner's political theory is that a government is able to use its taxing power in an economic sense to right perceived inequities in the deals struck by the government landowner. From these premises, Bradner recites all the oil and gas related tax changes since the leases were signed and then hypothesizes that the state's taxing power allowed the state to rewrite the leases. Thus, the premised political-economic theory is that whenever the state exercised its taxing power with respect to the oil and gas industry it was able to change the share of that oil and gas resource. Bradner does not argue that the purpose of any legislation was rewrite the lease terms, but that the dual role of government allowed a change in economic shares of the resource which would not be available to a private citizen. Bradner is merely observing an obvious political and economic fact of life -- that a government, unlike a private citizen, can increase its revenue both as a landowner or a sovereign, each having its own limitations. In

any event, Bradner was not talking about the income tax itself but the "tax issues of a decade." Bradner's conclusion comes in a final section of the report entitled "1979 and the Tax Issues of a Decade."

The first two sentences of a separate section dealing with the corporate income tax tell the real story:

> In 1978 the Alaska Legislature came to grips with the issue of creating a special corporate income tax to apply to the petroleum industry. The issue is complex and its details perhaps not of importance to the theme of this report, but the issue was driven along politically by the allegation that the petroleum industry was unfairly able to escape an equitable application of the state's regular corporate income tax law.

Id. at 38. In other words, the "complex" issues and "details" of the corporate income tax legislation conflicted with Bradner's theme about why all post-lease tax changes were made. Even ignoring the facts surrounding the income tax issue, however, Bradner still has to admit that the income tax issue was premised on the belief that the corporate income tax (UDITPA) was inequitable as applied to the oil industry.

Thus, the taxpayers use of the Bradner report is not of any help to them since it does not cite any support for the theory and is based solely on post hoc logic. Moreover, Bradner admits that the income tax issue was driven by the allegations of an unequitable corporate income tax for the oil industry.

The third piece used by the taxpayers to construct their theories are statements made during legislative

consideration of 1981 income tax legislation. 26/ These comments regarding a "30 percent share" of oil revenues were all made in the context of legislation specifically proposed in 1981 and in particular response to settlement offers of the taxpayers to the state. The "30 percent" concept is merely a benchmark against which one party's settlement offer with respect to this lawsuit could be measured against another's. Offered as they were in good faith settlement discussions, they are inadmissible. Alaska Rule of Evidence 408.

That state officials might use a shorthand description of a settlement offer is not surprising. The taxpayers made similar offers. Affidavit of Richard Donaldson, Exhibit B. These statements had nothing to do with the purposes of legislation enacted three years earlier. In fact, nowhere in the legislative record here is there any discussion of a "30 percent share."

The taxpayers only half-heartedly argue that the legislative record supports their other theory of legislative motive -- that the legislature was trying to discriminate against interstate commerce. T.B. at 54. The taxpayers do not cite any evidence in their brief. In their legislative history, the

---

26/ Appendix C at 89, citing PR 7-88 at 2.

taxpayers rely primarily in this context on various proposals to exempt Native interests from taxation. Appendix C at 57-59. None of those proposals became law, and there was no such exemption in the bill that passed. 27/

III. The Legislature's Stated Purposes.

In contrast to the sparse citations advanced by the taxpayers, the evidence supporting the legislature's stated purposes is overwhelming. The reasons of the legislature are set out in the preamble of the statute:

> [T]he method of apportioning income for tax purposes under the "Uniform Division of Income for Tax Purposes" formula embodied in the Multistate Tax Compact (AS 43.21) and AS 43.20 does not fairly represent the extent of the business activities in this state of multistate corporations engaged in the production and pipeline transportation of crude oil and natural gas in Alaska.
>
> . . .
>
> [T]he assessment of income tax against a multistate corporation engaged in the production or pipeline transportation of oil or natural gas shall be commensurate with the tax that would be assessed against a corporation owning and operating only those assets of the multistate corporations which are in or directly associated

---

27/ The taxpayers argue that the 1981 amendments to AS 43.21 gave special exemptions to Native oil income. The only 1981 provisions relating to Native corporations, however, were those which allowed Native corporations to deduct the amounts required to be shared under Section 7(i) of the Alaska Native Claims Settlement Act. 43 U.S.C. 1601 et seq. Amounts received under this federally-mandated sharing are required to be reported as investment income rather than production income. These rules being in accord with federal income tax rules.

with the state.

Sec. 1, ch. 110, SLA 1978.

The record in its entirety reflects an exhaustive examination of the income tax issue to solve the problem of the unrepresentative UDITPA three-factor formula and to make the measurement of income tax between multistate and non-multistate equal.

It is not surprising that in discussing a tax statute, the amount of revenues involved by the change were discussed. It was not, however, the focus of the legislature nor even a major consideration. The legislature searched for a more accurate and equitable measurement of income earned in the state. In every single version of the income tax bill the rate of tax remained at 9.4 percent. Indeed, there was almost an indifference to the amount of tax that would be raised. Legislators were not swayed from one competing method (modified apportionment) to another (separate accounting) by claims that the latter would collect more money.

The original sponsor of the separate accounting bill, Senator Croft, is paraphrased in the Senate Finance Committee minutes of May 21, 1977 as follows:

> Senator Croft stated that it was his understanding that the income tax is not designed to pick up additional money but to try to establish equal treatment between companies operating within the state.

[L.H. Doc. 7-054, File 30 at 1].

In fact, the legislature was cautioned time after time that separate accounting was not guaranteed to bring in more money and in fact was likely to bring in less money in some situations. Milton Lipton summed it up for the Senate Resources Committee on April 28, 1978:

> Secondly, I think it is not correct that always and inevitably separate accounting means higher in -- taxable income and higher tax revenues than the apportionment -- uh -- approach. Uh -- it doesn't because separate accounting will either -- will either raise the taxable income or reduce the taxable income, raise the income tax revenues or reduce the income tax revenues, depending upon the circumstances of a company's producing operations here in Alaska. It may very well be that the separate accounting, for example, for many of the producers in the Cook Inlet may give them lower income tax liabilities than under the apportionment formula. And if you will recall one of the major objections by -- by other consultants to the separate accounting approach and in favor of the franchise approach was that for three years when the Cook Inlet producers themselves opted for separate accounting, none of them ever showed any taxable income whatsoever and paid no -- no taxes to the State. And therefore separate accounting falls by the wayside as a device to increase income. But if your -- if your approach is that we can identify true income generated in Alaska, we will take our chances with an increase in income where there are profits, we may suffer in other instances even lower tax income than by the apportionment approach if in fact there is very little profitability, or if that company with modest profitability is doing a lot of exploration elsewhere and writing it off. (Emphasis added).

L.H. Doc. 8-131, File 4 at 12. And also on January 25, 1978, before the Joint House and Senate Resource Committee.

> The purpose is not to get higher taxation, but it gives you a direct fix on what the profitability of the industry's operations are... [T]he House Bill ... largely isolates the income taxed in

> Alaska, and hence the Alaskan corporate income tax revenues, from what happens in Alaska.

L.H. Doc. 8-018, File 4 at 22.

The legislature was also told that if the purpose was just to collect more money, the severance tax rather than the income tax was the most effective means. As Commissioner Gallagher put it:

> If we're seeking to raise money -- I think the most effective way is through a severance tax. But it has been traditional in states also to have an income tax in addition to capture the net profits. I think we should also have an effective income tax bill that -- and the issue, I guess, is whether we're going to have an effective and efficient tax system in capturing those things that we're trying to capture.

L.H. Doc. 8-125, File 2 at 6.

Professor Zeifman also gave the same advice to the legislature when he stated that the severance tax was the best approach for simply raising money and that the income tax was inappropriate if that was the purpose. L.H. Doc. 7-004, File 18 at 13.

Even the choice between the competing income tax bills was not made on the basis of which one would collect the most money. In a confidential memorandum to Senate President John Rader from his legislative aide, Senator Croft's attitude toward the competing bills was clearly delineated:

> [C]roft ... says he is not committed to going with the governor's [indecipherable handwritten comment] bill, just for sake of getting tax increase. Says the franchise proposal is "Unfair" because it just tinkers with the formula. Says separate accounting is most equitable method

> because under it every corp. pays same effective tax rate.

L.H. Doc. 8-006, File 1 at 1.

In fact, the revenue estimates of the two competing bills were nearly identical. L.H. Doc. 7-153, File 34; L.H. Doc. 8-101, File 17.

Instead, the legislature was searching for an income tax which more accurately reflected activities in the state and would put multistate companies on a commensurate level with other oil and gas producers and pipeline transporters.

As discussed in the state's opening memorandum and in the Summary of the Legislative History, the Department of Revenue conducted a comprehensive review of the oil and gas tax structure entitled: Alaska's Oil and Gas Tax Structure: A Study with Recommendations for Improvement. L.H. Doc. 7-139, File 35A. In its 1977 study, the Department concluded that there were two basic failings of the corporate income tax as applied to oil and gas production and pipeline transportation: (1) an eroded federal tax base; and (2) an inappropriate apportionment formula. With respect to the UDITPA formula applied to oil and gas production and pipeline transportation the department explained the deficiencies:

> Although there are problems with each of the three factors [property, payroll and sales], the use of the uniform sales factor produces the greatest distortion of oil and gas corporation activity in Alaska. That is, the total value of petroleum products is assigned only to the state where the final destination sale is made. No value is assigned to the state where the petroleum is

> produced. Instead of prorating that value added to the final product by the various phases of the business, the destination sales factor gives sole weight to the marketing side of the business.

Id. at V-17, 18.

Commissioner Sterling Gallagher further explained the problem in testimony before a joint House and Senate Resources Committee hearing shortly after the Department's Tax Study was published:

> The present apportionment formula of property, payroll and sales is designed to measure the activity of general merchantile business. It does not accurately measure the activities of natural resource companies and it does not take into account the unique contribution made by natural resources themselves. The present destination-oriented formula does not give any weight to the scarcity value of the non-renewable resource which is really what determines the income or profit for a natural resource company.

L.H. Doc. 7-005, File 19 at 15 and 16.

The Department of Revenue reiterated these deficiencies to the legislature, time and time again during 1977 and 1978. L.H. Doc. 7-173, File 19 at 10 et seq.; L.H. Doc. 80125, File 2 at 2 et seq.

The taxpayers attack the department's work with a series of unsubstantiated allegations:

> [1] No studies were done on the subject [the UDITPA formula does not fairly represent the business activities of the oil industry] by the Department of Revenue. T.B. at 60.
>
> [2] No data sufficient to examine the application of the UDITPA formula to the oil industry or to unitary businesses of any kind were provided to the State's consultants. T.B. at 60.

[3] The Administration simply presumed its conclusions. T.B. at 60.

For each of these broad conclusions, the taxpayers cite portions of the Depositions of Sterling Gallagher, John Messenger and Thomas K. Williams as well as the State's Response to Request for Admission, No. 150. T.B. at 60. These citations are misrepresentations.

The essence of the testimony by these three individuals is that they could not recall all of the information and studies that were relied on by the department or its consultants. Even though five years have expired since these matters were considered, they were able to point out some of the items considered including tax returns, the department's experience in administering the state's tax system, the Zeifman and Ainsworth report, Sohio Submission One, reports by investment banking firms and the Tanzer reports. 28/ The State's Response to Request for Admission No. 150 also does not support the taxpayers' broad assertion since the state's only admission here is that it knows of no studies concerning UDITPA and extractive industries other than oil and gas. That aside, the Department's conclusions -- based as they were upon its tax administration experience, tax

---

28/ Deposition of Sterling Gallagher at 20-29, 112-117, 53-63; Deposition of John R. Messenger at 121-127, 54-81, 204-207; Deposition of Thomas K. Williams at 14-18.

returns, the Ziefman and Ainsworth report as well as other reports and analysis that came before can hardly be said to have been presumed. Moreover, it is the basis of the legislature's conclusions which are relevant here.

The taxpayers also attempt to discredit the evidence of the failings of UDITPA by citing 1976 testimony of Sterling Gallagher and Thomas K. Williams for the proposition that the oil industry was paying its fair share, at an effective tax close to nine percent. T.B. at 3, 4. 29/ The cited statements of Sterling Gallagher, however, only relate to the effects of 1975 legislation on the federal tax base not to the effectiveness of UDITPA formula. 30/ The statements by Thomas K. Williams had nothing to do with the effective tax rates or the UDITPA formula. In any event, this testimony was given before the department had begun its comprehensive tax study. L.H.Doc. 7-139, File 35A.

The Department of Revenue was not alone in advising the legislature about the deficiencies of UDITPA and the taxpayers' attempt to belittle the legislature's reasoning process by repeatedly referring to deficiencies in an administrative record simply will not work. The deficiencies in the three-factor

---

29/ The testimony cited is found at L.H. Doc. 6-204, File 42.

30/ In another part of his testimony, Sterling Gallagher noted problems with the three-factor formula. Id. at 8.

formula were noted by a host of others: Milton Lipton - L.H. Doc. 8-128, File 4 at 1, 16; Richard Kilgore - L.H. Doc. 7-018, File 22 at 3, 14; Governor Hammond - L.H. Doc. 7-051, File 30 at 1, 2; Senator Croft - L.H. Doc. 7-054, File 30 at 1; Representative Cowper - L.H Doc. 7-053, File 30 at 1; Professors Ziefman and Ainsworth - L.H. Doc. 7-004, File 18.

Evidence of the deficiencies was well documented to the legislature from studies conducted by a number of other sources: the Legislative Affairs Agency, L.H. Doc. 6-096, File 46; L.H. Doc. 6-103, File 48; The Revenue and Taxation Committee Staff, L.H. Doc. 6-024, File 41; Professors Ziefman and Ainsworth, L.H. Doc. 7-001, File 18; Walter J. Levy and Associates, L.H. Doc. 6-124, File 50; Wainwright Securities, L.H. Doc. 7-061, File 32. The conclusions reached in each of these studies were based upon information available to them, both public and confidential, as well as information provided by the industry itself.

The Ziefman and Ainsworth Study was one analysis which documented the failings of UDITPA. L.H. Doc. 7-001, File 18. Based upon their several years experience in analyzing state income tax systems for the United States Congress and upon their analysis of financial reports and income tax returns filed by oil

and gas corporations in Alaska as well as other items, 31/ Professors Ziefman and Ainsworth concluded that "the present method [for determining entire taxable income and the Alaska method for apportioning income] is ineffective and embodies policies which the Alaska Legislature ought appropriately to reevaluate."

The taxpayers try to downplay the significance of this report by alleging that Zeifman and Ainsworth only looked at separate accounting returns, not formula apportionment returns. Appendix C at 52. That is not true. As the report shows, they examined both formula apportionment and separate accounting returns. 32/

The staff of the Special Committee on Taxation and Revenue reported on their own analysis in that Committee's first report:

> From studies done by the staff, the current corporate income tax law does not reach the net profits of the out-of-state producing companies. The Multistate Tax Compact with its allocation formula is inadequate for production of revenue -

---

31/ For other sources relied upon by Ziefman and Ainsworth see L.H. Doc. 7-001, File 18 at 2, for their experience in state taxation see id. at 52.

32/ The taxpayers also complain that the Ziefman and Ainsworth Study only looked at 1975, and earlier, tax returns. Appendix C at 52. Those returns were, of course, the most current information available at that time.

> from resource companies. The allocation formula based on sales, property, and payroll does short change the State of Alaska. The major components of sales, property, and payroll are located outside of the state.

L.H. Doc. 6-022, File 41 at 4. The committee's subsequent reports provided volumes of documentation for this assertion. L.H. Doc. 6-023, 6-024, File 41.

The Legislative Affairs Agency found that UDITPA provided perverse results when applied to the Prudhoe producers. For example, the studies of Dr. Barbara Sorenson were, contrary to taxpayers assertions, (Appendix C at 69) a careful and detailed review of the workings of UDITPA. The two memoranda (L.H. Doc. 6-096, File 46 and 6-103, File 48) demonstrate the gross disparity among the income tax liabilities of the three major Prudhoe Bay producers (L.H. Doc. 6-103, File 48 at 1). In a memorandum later in 1976, Gregg Erickson, Director of Legislative Research, called legislators' attention to the implications of Dr. Sorenson's studies, noting that:

> one obvious question would be whether or not this disparity is justified and, if not, how it can best be eliminated or mitigated. A number of outside observers, including Milton Lipton, have strongly recommended that Alaska go to some sort of "direct or separate accounting." Under such an arrangement net taxable income in Alaska would be determined by calculating the value of oil and gas exported from the state and subtracting therefrom the costs of getting it to the state's borders. Under such an arrangement there would be little reason to expect that domestic and multistate corporations would pay different effective tax rates.

L.H. Doc. 6-026, File 42 at 9.

Others from outside Alaska observed the obvious problems with the application of UDITPA to Alaska oil production. In a comprehensive 85-page analysis of Alaska's petroleum tax policies and oil development prospects issued in April 1977, Wainwright Securities, Inc. noted that there were "glaring deficiencies" in the state's corporate income tax as it was applied to oil producers. They further noted that passage of the Administration's proposed legislation "would ensure that the North Slope producers pay something resembling the 9.4 percent nominal tax rate imposed on domestic (Alaskan) corporations doing business only in the state -- versus the two to three percent rate that otherwise would apply to a multinational oil company." L.H. Doc. 7-061, File 32 at 33-34.

Like virtually every piece of publicly released research prepared by securities firms, the Wainwright analysis contained the standard "boiler plate" language disclaiming liability for any investment which might be made in reliance on the study. Taxpayers' attempt to discredit the study on the basis of that disclaimer is without foundation. Appendix C at 70.

But perhaps the best evidence on the deficiency of the UDITPA formula comes from the taxpayers and their consultants. SOHIO, EXXON, and Arthur Anderson & Co. presented detailed studies to the legislature which revealed in dramatic terms the deficiency of UDITPA to apportion anywhere near the income attributable to their Alaska activities. The taxpayers seek to

skirt these damaging admissions by saying that they were only using the state's definition of Alaska income as described in the tax bills and were not meant to reflect what should be properly assigned to Alaska. Appendix C at 65. The evidence shows otherwise. Each of these studies computed income derived from Alaska operations independent of any tax base set out in a particular bill. They computed as well the income which would be assigned to Alaska under the three-factor UDITPA formula. The two items were not even close, and confirmed to the legislature what others had said -- the effective tax rates for these taxpayers were well below 9.4 percent.

The taxpayers were understandably nervous about providing the legislature with the specific facts and figures that could conceivably have refuted the mounting evidence of UDITPA's failings. 33/ However, they did want to provide the state with their views on how their total Alaska tax burden stacked up against that of other states. In doing this they inadvertently provided the best evidence of all that UDITPA would insure them a nearly free ride on Alaska income taxes.

33/ On June 16, and again on June 22, 1976, the Director of Legislative Research wrote all major Alaska oil companies requesting specific assistance in determining the future incidence and impacts of existing and proposed income taxes. L.H. Doc. 6-109, 6-110, File 49. Arco responded on August 5, pleading overwhelming "uncertainties," and suggesting that the numbers weren't really needed anyhow. L.H. Doc. 6-112, File 49 at 1. On October 4, Exxon finally responded with a flat refusal (continued)

In October of 1976 SOHIO provided the state with its Sohio Submission One. L.H. Doc. 6-122, File 50. The study hypothesized three oil companies, (in much the same manner as Dr. Sorenson's first memorandum), each with an identical one-third ownership in Prudhoe Bay, but with differing activities outside Alaska. 34/ On its face, the study showed that notwithstanding the identity of their assumed Alaska activities, 35/ their UDITPA tax liabilities would be vastly different. In 1977 the company with the largest income tax bill was shown paying almost four times as much as the firm with the smallest. 36/

Milton Lipton, in an analytic review of Sohio Submission One found evidence of another UDITPA deficiency. The taxable income attributed to Alaska would be less than 26 percent of the income implicitly resulting from the Alaska operations of these three hypothetical companies. 37/ Michael Tanzer independently confirmed Lipton's finding. Based on the Sohio

---

33/ (continued)
to discuss income tax numbers. L.H. Doc. 6-119, File 49 at 1. Sohio was more forthcoming. L.H. Doc. 6-111, 6-113, File 49.

34/ One company was assumed to be a California based marketing and refining company with no oil production other than at Prudhoe. Another was a large integrated domestic firm, and the third a major international oil company. L.H. Doc. 6-122, File 50 at 4.

35/ Id.

36/ Id. at Table 1-A.

37/ L.H. Doc. 6-124, File 50 at 3. For testimony on his analysis see L.H. Doc. 7-018, File 72 at 3.

data "the State of Alaska will realize an effective income tax rate only about 1/4 the normal rate ....", much less than even Tanzer had expected. L.H. Doc. 6-123, File 50 at 3.

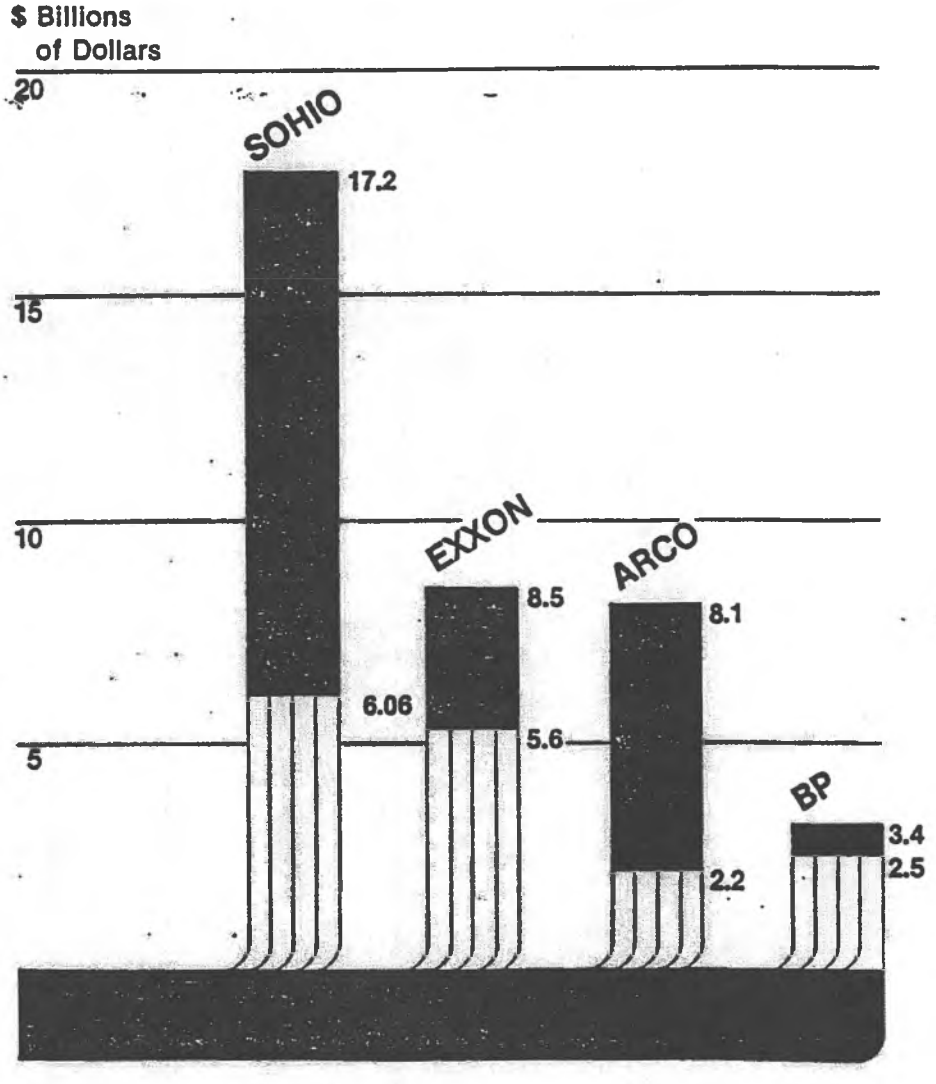
In March of 1977 Exxon presented an analysis along the same lines, for the purpose of showing how little profit they expected to make on Prudhoe Bay. L.H Doc. 7-035, 7-036, 7-037, File 26. The study also showed how small a proportion of total Alaska income would be reached by UDITPA -- between 1976 and 1990 the total was expected to come to $1,152 million for the entire field, on before income tax profits of $33,073 million over the same period, implying an effective state tax rate of less than 3.5 percent. 38/

The crowning confirmation of the disparity between the taxpayers' own assessment of their net income from their Prudhoe Bay activities and their income as apportioned by UDITPA came in January 1978 when the Alaska Oil and Gas Association presented a study prepared by the Houston, Texas, office of Arthur Anderson & Co., a national accounting firm. L.H. Doc. 8-080, File 13. There was nothing implicit in the Anderson study. There, in what

---

38/ The Exxon analysis is considerably more sketchy than Sohio Submission One, and was compiled by Exxon based on "public data." The projected income tax figures are found at p. 13 of the first set of attached tables. Id. Profits before income tax for these years are found on p. 18 of the second set of tables (t9tled "Yearly Analysis of Net Cash Flow") by adding back "Federal Income Tax" to "Net Cash Flow;" this sum is identified as "B[efore] I[ncome] T[ax] Profit" on p. 21 of the second set of tables.

was later to become the famous "table VIII(a)," were the numbers for "Alaska Income Tax", "Alaska Taxable Income," and "Net Income From Prudhoe Bay and TAPS." L.H. Doc. 8-080, File 13 at table VIII(a). The calculations in the report are for the four major participants in TAPS and Prudhoe Bay: Sohio, Arco, Exxon, and B.P. over the period 1977-2001.



This Alaska income figure in the table -- $37,294 million for the four firms analyzed -- was no artificial construct designed with a "stingy set of deductions." It was Arthur Anderson's assessment of the income generated from Prudhoe Bay and TAPS by the four major oil companies. Calculated without reference to any tax base, but rather to the accountants professional judgment of the geographic source of the income. 39/

According to Arthur Anderson, "Alaska Taxable Income" would be only four percent of "net income from Prudhoe Bay and TAPS," giving an effective tax rate of only 4.1 percent. Moreover, it dramatically demonstrated how arbitrary and perverse the UDITPA allocation was with respect to two companies (Arco and Exxon) whose ownership in Prudhoe Bay and TAPS (and thus their activity in Alaska) was essentially identical. Exxon would pay

---

39/ Under careful questioning by Senator Croft, Robert Moore, of Arthur Anderson emphasized that the figure for "net income from Prudhoe Bay and TAPS" represented an accounting judgment. L.H. Doc. 8-130, File 14 at 21-24.

"NET INCOME FROM PRUDHOE BAY FIELD AND TAPS"
AND
"ALASKA INCOME TAX"
as seen by
Arthur Anderson Study Exhibit VIII (a)
(Calculation of Alaska Income Tax Under 43.20)

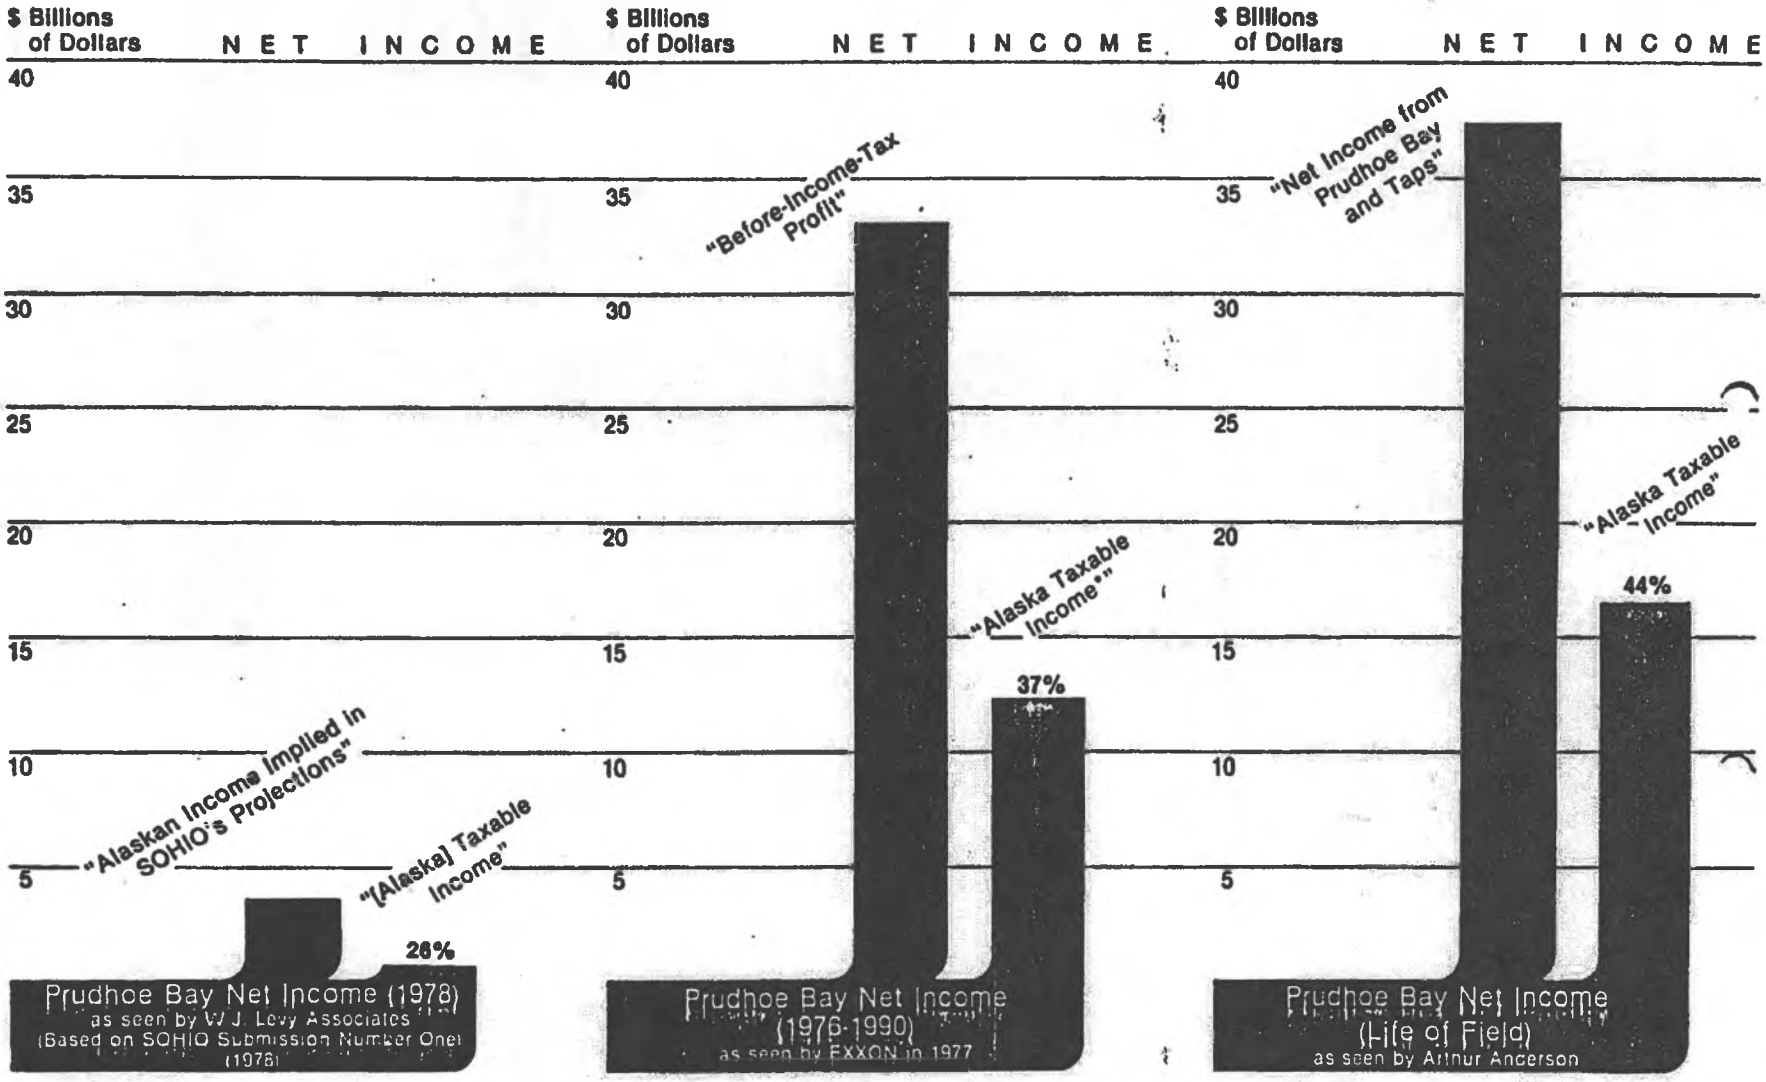


FIGURE II

*Calculated from "Alaska Income Tax"

$530 million in corporate income taxes to Alaska, Arco only $206 million. The disparities are shown in Figure I.

The figures which emerged from these three studies, shows graphically in Figure II, confirmed what everyone by the knew. UDITPA simply didn't work very well when applied to Alaska oil production activities.

CONCLUSION

The massive legislative record reflects not an avaricious legislature but one which was searching for a more effective and equitable income tax for the oil and gas industry. The legislature wanted the oil industry to pay a tax representing 9.4 percent of their income earned in the state; the taxpayers did not. The taxpayers' position was frankly admitted before the legislature. A candid example of this position is shown in this exchange between Senator Huber and Richard Donaldson of Sohio in a hearing before the Senate Resources Committee in 1977.

> Senator Huber: If I may continue, Madame Chairman. Does Sohio object to paying 9.4 percent on its true net income the same as they would have to if they were strictly an Alaskan corporation?
>
> Mr. Donaldson: Yes.

L.H. Doc. 7-172, File 27.

There lay the rub.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CS SB 203 (FIN)
2012 LEGISLATIVE SESSION

Analysis

PFD expects this fiscal note to change as more clarification and information is provided to the Department of Revenue. Note corrected fund source.

The bill creates an energy benefit by means of a voucher for Adults who are determined eligible for the 2012 PFD. The bill proposes the energy benefit to be distributed no later than December 1, 2012. The bill also tasks the Governor with determining how to make the program permanent through the PFD Division.

PFD expects increased appeals of ineligible applicants because of the value of the benefit added to dividend eligibility, a situation similar to that of the 2008 Resource Rebate at which time the Informal Appeals unit received approximately 900 additional appeals by applicants who were ineligible as a matter of law . Additional appeals staff, Range 12 PFD Tech II is needed to render informal appeals decisions within the staturorily designated time frame of 180 days.

Additionally, approximately 100 additional Formal level appeals were heard by Administrative Law Judges with Office of Administrative Hearings in which the divisions decision the applicant was ineligible was upheld. OAH RSA expected in the amount of $113.6.

As the value and benefit of the annual dividend program increases, so does the potential for fraud. $105.K is requested to hire a firm that would assist the division in auditing existing applicants and creating new audit recommendations for continued assurance that opportunity for fraud is minimized.

Approved by: Dan Fauske, Alaska Housing Finance Corporation — Date: 4/3/2012
Department of Revenue

(Revised 11/18/2011 OMB)

Analysis

This bill requires Alaska Housing Finance Corporation (AHFC) to issue an energy voucher to each adult eligible for the permanent fund dividend in 2012. The energy voucher would be redeemable for 250 gallons of heating oil, the monetary equivalent of 35,000 cubic feet of natural gas, or the monetary equivalent of 1,500 kilowatt-hours of electricity. The voucher would be redeemable with a qualified energy distributor.

AHFC would be required to specify a date in 2012 for which each qualified distributor shall submit its retail prices for the fuel or energy source, and to issue payment for the published price of fuel on a certain date to a qualified distributor upon receipt of a voucher.

The energy distributor would credit the full amount to the recipient's account upon receipt of payment by AHFC. The energy voucher must be issued to eligible recipients not more than 30 days following the issuance of 2012 permanent fund dividend, and is valid for four months from date of issuance. The voucher is nontransferable except under specific circumstances including:

By a tenant to a landlord for rent deduction if the tenant does not pay directly for energy use or is unable to access an eligible distributor;

By an individual who is unable to access an eligible distributor. The individual may receive a check for $250 from AHFC; or

If the voucher recipient dies before the voucher is issued or redeemed, it may be transferred to a personal representative or successor.

AHFC would be required to work closely with Department of Revenue (PFD division) to access qualified recipient information to develop and implement the voucher program with appropriate controls.

Section 2 of this bill directs the Office of the Governor to provide a report to the legislature before October 1, 2012 that analyzes and recommends an energy assistance program to be implemented in the fiscal year ending June 30, 2014.

Fund Amount:
In developing this fiscal note, there is an assumption that capital funds will be appropriated. A complete and accurate fiscal impact will be dependent on a number of factors which are presently unknown and include:

The date specified and agreed on by AHFC of the reimbursable price for the energy provided in each community; and

The number of participating distributors, number of Alaskans eligible to receive the voucher, and number of vouchers reimbursed for a negotiated rent reduction or a $250 check.

Given the above-mentioned uncertainty, AHFC estimates cost impact of this bill will range from $325,000,000 to $465,000,000.

Analysis Continued

Administrative Costs:
AHFC recognizes that it will not be possible to ramp up staff capacity to achieve the objectives described in the bill within the time constraints established in the bill; therefore, AHFC intends to contract the majority of the work to obtain services, including, but not limited to:

Establish dedicated program database for tracking, administration and management of voucher recipients and distributors;
Create and establish dedicated website with online claim filing capabilities;
Establish and maintain toll-free telephone number at call center for customer support;
Develop and implement an outreach program, including possible grassroots campaign to reach Alaska residents;
Provide direct mail notice to Alaska residents and potentially qualified distributors regarding the program;
Receive and process distributor requests for qualification;
Establish procedures to qualify distributors for participation in the program;
Maintain list of qualified distributors;
Receive and process distributor claims for reimbursement;
Create and issue personalized, nontransferable uniquely numbered vouchers to Alaska residents;
Issue reimbursement checks to distributors who submit valid claims for reimbursement;
Track voucher redemption;
Handle replacement voucher requests, as needed;
Process claims for a $250 check in lieu of the voucher and determine eligibility, as required;
Issue $250, as needed, to eligible recipients, as required ;
Create and issue 1099s for recipients, as required.
Receive and process administrative mail from distributors and/or Alaska residents;
Providing reporting of status of the administrative activities; and
Maintain a record of all program contacts and responses thereto.

This fiscal note is based on the bill language that establishes the "voucher program" as a one year program. Given the scope and nature of utilization of contract services, extensive ramp-up will be required. Some elements for appeal processes extend up to six years, and there will be costs for the ramp down and dismantling of the program.

This estimate is based upon the possible requirements of AHFC as established in the bill. AHFC staff will be required to manage the necessary contract(s). Additional staff and expenses include administration, information systems, human resources, audit, and accounting support, computers and office space and systems, communications and travel.

Furthermore, as one of the state's largest landlords, AHFC's public housing division will be required to respond to tenant inquiries as it relates to the negotiation allowed under Section 1 (g) of the bill.

Total estimated operating costs for FY13 are $15 million. This amount is listed as CIP Receipts as it will come from the capital appropriation.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB203

Analysis

This bill provides for issuance of energy vouchers to adults eligible for the 2012 Permanent Fund Dividend (PFD), and for the vouchers to be redeemed with qualified distributors of heating oil, natural gas and electricity. Applicants determined to be ineligible for the PFD are entitled to a formal hearing conducted by the office of administrative hearings. The department of revenue, PFD division, estimates an increase of 100 formal appeals. The bill contemplates that those would be concluded within 12 months after filing.

Under the bill, distributors determined not to be qualified also would be entitled to an administrative hearing. The department of revenue could, but is not required to, ask the office of administrative hearings to conduct the distributor appeal hearings as voluntary referrals pursuant to AS 44.64.030(b). The number of distributor appeals that would reach the formal appeal level and be heard by the office of administrative hearings could be quite small, or even non-existent if the department of revenue elected not to refer them to the office.

The bill also provides that the energy voucher not be considered income for financial needs-based assistance programs, unless so required by federal law. If disputes arise between assistance claimants and assistance program managers in the department of health and social services about whether the energy voucher is required by federal law to be treated as income, this could affect the complexity of some cases, or possibly lead to an unquantifiable increase in cases, reaching the formal hearing stage before the office of administrative hearings.

OAH does not anticipate that the resulting one-time, limited duration spike in caseload would increase the office's caseload beyond OAH's capacity to handle the additional cases at approved staffing levels that will be in place as of the July 1, 2012 effective date of Executive Order 116. OAH might need to act sooner than planned to fill an existing vacancy, or if the crush of time-sensitive PFD eligibility appeals so dictated, might need to bring on board a temporary ALJ to handle some of the cases. The cost to OAH of performing the services would be recovered from the affected departments through interagency receipts, based on the time commitment required for hearings and mediations. The $113.6 figure corresponds to the department of revenue's estimate, based on 2008 Resource Rebate experience, of the increase in interagency receipts it would have to pay from the permanent fund to OAH for the anticipated increase of 100 cases. Whether OAH would in fact need to increase expenditures or need increased interagency receipts authority in that amount depends on unpredictable caseload dynamics.

A BILL

FOR AN ACT ENTITLED

"An Act establishing an energy assistance program in the Alaska Housing Finance Corporation to issue an energy voucher to Alaska permanent fund dividend recipients; relating to the analysis and recommendation of an energy assistance program by the governor; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ALASKA ENERGY VOUCHER. (a) To help residents meet the high cost of energy in the state in 2011, the Alaska Housing Finance Corporation shall establish a program under which the corporation will issue not more than one energy voucher to each adult or emancipated minor who

(1) in 2011, was permitted to apply for a permanent fund dividend on the person's own behalf and who was determined by the Department of Revenue to be eligible for the permanent fund dividend paid in 2012; or

(2) did not apply for the permanent fund dividend paid in 2012 but certifies, on a form provided by the corporation that bears notice that false statements made in the form are punishable by law, that the person was eligible for the permanent fund dividend paid in 2012 and is determined by the corporation to have otherwise been eligible for the permanent fund dividend paid in 2012.

(b) An energy voucher issued under this section is redeemable for the monetary equivalent of 250 gallons of heating oil, the monetary equivalent of 35,000 cubic feet of natural gas, the monetary equivalent of 31,000,000 British thermal units of hot water or steam district heat, or the monetary equivalent of 1,500 kilowatt-hours of electricity. For purposes of this subsection, the monetary equivalent of 250 gallons of heating oil, 35,000 cubic feet of natural gas, 31,000,000 British thermal units of hot water or steam district heat, or 1,500 kilowatt-hours of electricity is the retail price of 250 gallons of heating oil, 35,000 cubic feet of natural gas, 31,000,000 British thermal units of hot water or steam district heat, or 1,500 kilowatt-hours of electricity as approved for each distributor qualified under (e) of this section. The corporation shall specify a date in 2012 for which each distributor that wants to be qualified under (e) of this section shall submit the retail price of 250 gallons of heating oil, the retail price of 35,000 cubic feet of natural gas, the retail price of 31,000,000 British thermal units of hot water or steam district heat, or the retail price of 1,500 kilowatt-hours of electricity, as applicable. On receipt of a voucher and eligible claim, the corporation shall issue a payment to the qualified distributor of the monetary amount determined under this subsection using the retail price approved by the corporation under (e) of this section for a qualified distributor for the applicable type of energy, district heat, or fuel. On receipt of the payment from the corporation, a qualified distributor shall credit the full amount of the payment to the account that services the primary physical residence of the recipient of the voucher. A payment made under this section may not be used for costs unassociated with the purchase of the energy, district heat, or fuel, may not be transferred between customer accounts, and may not be paid out in cash. If an account with a remaining balance from a payment made under this section is closed, a qualified distributor shall return the balance of the account attributable to the energy voucher to the corporation.

(c) The energy voucher

(1) must be numbered and state the name of the person to whom the voucher

is issued;

(2) must require the recipient of the voucher to sign, and date, and certify, on a form bearing notice that false statements made in the form are punishable by law, that the recipient of the voucher is complying with all the requirements of the voucher, including the requirement that the voucher amount be used to supply heating oil, natural gas, district heat, or electricity to the voucher recipient's primary physical residence in the state;

(3) is nontransferable and may not be sold, transferred, or traded for any other compensation, except as provided in (g) and (*l*) of this section;

(4) is redeemable only at a distributor qualified under (e) of this section and may not be split among multiple distributors;

(5) is not valid for submission to a distributor more than four months after the date the energy voucher is issued;

(6) is valid for heating oil, natural gas, district heat, or electricity delivered to the voucher recipient's primary physical residence in the state; and

(7) shall be issued by the corporation not more than 30 days following the issuance in 2012 of the permanent fund dividend.

(d) A distributor qualified under (e) of this section shall, within 30 days after accepting the voucher, issue a document acknowledging receipt of the voucher to the person exchanging the voucher. The corporation shall issue the amount determined under (b) and (e) of this section to the qualified distributor for an energy voucher not later than 20 days after receiving an eligible claim from a qualified distributor. Submitted claims must include

(1) the number of the voucher;

(2) the name of the recipient, as stated on the voucher; and

(3) the address or other identifying information requested by the corporation listed on the heating oil, natural gas, district heat, or electricity account that the voucher will credit.

(e) The corporation shall maintain a list of qualified distributors eligible to accept and redeem vouchers. A distributor of oil, natural gas, district heat, or electricity is qualified if the distributor

(1) is licensed to do business in the state;

(2) is regularly engaged in the business of distributing oil, natural gas, district

heat, or electricity;

(3) submits a retail price of oil, natural gas, district heat, or electricity, as applicable, for the quantities described in (a) of this section, submits all evidence for that retail price requested by the corporation, and responds to inquiries of the corporation related to that retail price, and the corporation finds that retail price is representative of the price charged under similar circumstances; and

(4) meets other eligibility requirements that the corporation may adopt under AS 18.56.088 or emergency regulations adopted under sec. 3 of this Act.

(f) In determining the eligibility of an individual under a public assistance program, a heating assistance program, or a veterans' benefits program in which eligibility for assistance is based on financial need, the state may not consider an energy voucher as income or resources received by the recipient or by a member of the recipient's household. An individual whose

(1) supplemental security income benefit payment under 42 U.S.C. 1381 - 1383f is reduced solely because of the receipt of energy assistance under this section is entitled to receive from the state, for a period not to exceed 12 months, the same level of benefit payment as the individual would have received under 42 U.S.C. 1381 - 1383f had energy assistance not been received under this section; or

(2) nutrition assistance or benefits under 42 U.S.C. 1786 (Special Supplemental Nutrition Program for Women, Infants, and Children) or 7 U.S.C. 612c (Commodity Supplemental Food Program) are reduced solely because of the receipt of energy assistance under this section is entitled to receive, notwithstanding the assistance limit in AS 47.25.130(a), cash assistance under AS 47.25.120 - 47.25.300 (general relief assistance), for a period not to exceed 12 months, in the same amount as the individual would have received under 42 U.S.C. 1786 (Special Supplemental Nutrition Program for Women, Infants, and Children) or 7 U.S.C. 612c (Commodity Supplemental Food Program) had energy assistance not been received under this section.

(g) A recipient of an energy voucher who does not pay directly for the heating oil, natural gas, district heat, or electricity used in the recipient's primary physical residence or who does not have reasonable access to a qualified distributor of the type of fuel, district heat, or electricity used in the recipient's primary physical residence in the state may certify that

fact on a form provided by the corporation bearing notice that false statements made in the form are punishable by law, and may exchange the voucher with the corporation

(1) if applicable, for a replacement voucher in the name of the landlord or owner of the recipient's primary physical residence in the state, the value of which may, subject to negotiations between the landlord and tenant, be deducted from rent; or

(2) upon certification that the $250 will be used toward rent, energy, or heating costs at the recipient's primary physical residence in the state, for a check for $250 in the name of the recipient of the energy voucher.

(h) Except as provided in (j) of this section or as may be provided by regulations adopted by the corporation, an energy voucher issued under this section is not valid unless it is signed and dated by the individual named on the face of the voucher.

(i) A replacement voucher issued to a landlord under (g) of this section is not valid until the landlord certifies on a form provided by the corporation bearing notice that false statements made in the form are punishable by law that the amount of the voucher will be used to provide energy or heat to the primary physical residence of the original recipient of the voucher and certifies to the amount that the landlord will apply against the rent of the original recipient of the voucher.

(j) Certification or signature on an energy voucher or other certification under this section required of an individual who is disabled or incapacitated may be signed or certified by the individual's legal guardian or other authorized representative. An individual may complete, sign, and redeem an energy voucher on behalf of a member of the armed forces of the United States who is serving on active duty outside of the United States if the individual has a power of attorney from the member of the armed forces that, in specific or general terms, authorizes the individual to redeem the voucher.

(k) An individual who is disabled or incapacitated may not maintain a claim against the state or an officer or employee of the state based on the manner in which the guardian or authorized representative other than a public agency of the state managed or disposed of an energy voucher received on behalf of the disabled or incapacitated individual.

(l) If a person is eligible for an energy voucher but dies before the energy voucher is issued or redeemed, the energy voucher may be transferred to a personal representative of the estate or to a successor claiming personal property under AS 13.16.680.

(m) In addition to any criminal penalties imposed by state law, if an individual or qualified distributor is convicted of a crime in connection with a false statement made in a certification required under this section, in a submission for a reimbursement under (d) of this section, or in connection with forging an energy voucher, and the conviction is not reversed, vacated, or set aside, or if an individual or qualified distributor is found by the Alaska Housing Finance Corporation to have bought, sold, traded, or otherwise violated the terms of the voucher, that individual or qualified distributor forfeits the energy voucher, or the monetary amount received from the voucher, and the individual is not eligible for a future permanent fund dividend.

(n) If an individual is aggrieved by a decision of the Department of Revenue with respect to the individual's eligibility for a permanent fund dividend, and thus an energy voucher under (a)(1) of this section, the individual may request that the department review its decision under AS 43.23.015(g).

(o) If an individual or distributor is aggrieved by a decision of the Alaska Housing Finance Corporation with respect to the individual's authority to claim an energy voucher on behalf of another, or reimbursement of a distributor, or other decision under (a)(2), (e), (g), or (m) of this section, the individual or distributor may request that the corporation review its decision. Within 12 months after an administrative appeal under this subsection is filed, the corporation shall provide the individual or distributor with a final written decision. If the individual or distributor is aggrieved by the final written decision of the corporation, the individual or distributor may appeal that decision to the superior court in accordance with AS 44.62.560. An appeal to the court under this subsection does not entitle the aggrieved individual or distributor to a trial de novo. The appeal shall be based on the record of the administrative proceeding from which appeal is taken, and the scope of appeal is limited to matters contained in the record of the administrative proceeding.

(p) If the corporation determines that an energy voucher or a cash payment made in exchange for a voucher should not have been issued to an individual or a reimbursement should not have been made to a distributor, the state may use all collection procedures or remedies available under AS 43 to recover the energy voucher or the cash value of the voucher that was improperly issued or for which reimbursement was improperly made. Except as provided in (q) of this section, a notice of an improperly issued voucher or improper

reimbursement shall be sent to the individual or distributor, as applicable, within

(1) three years after the energy voucher was issued if the notice is sent to an individual; or

(2) three years after the distributor received reimbursement if the notice is sent to a distributor.

(q) The three-year time limit under (p) of this section for the corporation to send notice of an improperly issued voucher or an improper reimbursement is extended to six years if the corporation determines that the individual or distributor

(1) exercised gross negligence or reckless disregard with respect to a material fact in connection with a false statement on the energy voucher or submission for reimbursement; or

(2) forged an energy voucher.

(r) If notice is not sent within the time required under (p) or (q) of this section, administrative or judicial proceedings may not be commenced for recovery of an improperly issued energy voucher or improper reimbursement.

(s) An energy voucher, account credit, or cash payment provided under this section is exempt from garnishment, levy, or execution by a private party or the state.

(t) To the extent allowed by federal law and notwithstanding other state law that may be to the contrary, the department shall, on request of the corporation, electronically provide the corporation with information about applicants who the department has determined are eligible for the permanent fund dividend paid in 2012. Information requested by the corporation under this subsection may include the name of the applicant, the physical and mailing address of the applicant, the date of birth of the applicant, the social security number of the applicant, and any other information necessary to execute the energy voucher program. Information from the department may be used by the corporation only for the purpose of executing the energy voucher program created under this section.

(u) In this section,

(1) "corporation" means the Alaska Housing Finance Corporation created under AS 18.56;

(2) "department" means the Department of Revenue;

(3) "disabled" means physically or mentally unable to sign an energy voucher

or make a certification required in this section because of serious emotional disturbance, visual, orthopedic, or other health impairment, or developmental disability that is attributable to mental retardation, cerebral palsy, epilepsy, autism, or other cause;

(4) "incapacitated" means the ability to receive and evaluate information or to communicate decisions is impaired for reasons other than minority to the extent that the person lacks the ability to provide the essential requirements for the person's physical health or safety without court-ordered assistance.

*** Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ANALYSIS AND RECOMMENDATION OF AN ENERGY ASSISTANCE PROGRAM. (a) The governor shall take public testimony, consider the recommendations from organizations involved in providing energy or energy assistance to Alaskans, analyze the energy assistance options in (b) of this section, and analyze alternate options to those proposed in (b) of this section for providing energy assistance to Alaskans and, before October 1, 2012, the governor shall provide a report to the legislature making a recommendation for an energy assistance program to be implemented in the fiscal year ending June 30, 2014, that

(1) correlates the amount of assistance to the local cost of residential heating, taking into consideration the price of fuel and heating degree days in each community;

(2) is implemented based on crude oil price or heating oil price;

(3) has total funding based on state revenue;

(4) minimizes administrative costs;

(5) makes participation of fuel distributors voluntary;

(6) includes a hold harmless provision for recipients of public assistance and veterans' benefits; and

(7) includes penalties for fraud, including ineligibility for a future permanent fund dividend.

(b) The governor shall analyze the following options and may analyze alternate options to provide energy assistance to Alaskans:

(1) a fuel price reduction program with the following features:

(A) state reimbursement to a heating oil or natural gas distributor of a

portion of the wholesale purchase price of fuel that the distributor sold to heat residential structures;

(B) an amount of reimbursement necessary to reduce the wholesale purchase price of a distributor by a specified amount or to a specified price;

(C) a limit on the amount of fuel that a person may purchase and for which a distributor received a state reimbursement; and

(2) an individual account program with the following features:

(A) application on a permanent fund dividend application for energy assistance in the form of a state payment to the applicant's account with a fuel distributor or electric utility;

(B) assistance based on heating degree days and the cost of energy in the community;

(C) electronic selection of

(i) a fuel distributor or electric utility to receive the individual's energy assistance payment; and

(ii) an optional amount from the applicant's dividend to be deposited in the individual's account with a fuel distributor or electric utility;

(D) a statewide base amount to be sent with the applicant's permanent fund dividend for an applicant for energy assistance who fails to select a fuel distributor or electric utility to receive the individual's energy assistance payment.

(c) The governor's report to the legislature under (a) of this section shall evaluate

(1) the estimated cost of the program for the first five years;

(2) the cost of administering the program compared to the assistance provided;

(3) whether the program provides the highest level of assistance to the individuals with the highest heating costs; and

(4) whether the program can be structured so that energy assistance is not subject to federal taxation.

(d) In this section, "heating degree days" means the average temperature for a day minus the reference temperature of 65 degrees Fahrenheit.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

EMERGENCY REGULATION AND PROCUREMENT PROVISIONS. Notwithstanding AS 18.56.088, the Alaska Housing Finance Corporation may adopt emergency regulations under AS 44.62.250 and 44.62.260 necessary to implement the Alaska energy voucher program in sec. 1 of this Act without making written findings under AS 44.62.250. The legislature finds that the adoption of emergency regulations is necessary to implement this Act and for the immediate preservation of public health and general welfare. In addition, the Alaska Housing Finance Corporation is exempt from AS 36.30, including AS 36.30.015(f), for the purposes of implementing the Alaska energy voucher program.

*** Sec. 4.** This Act takes effect immediately under AS 01.10.070(c).

A BILL

FOR AN ACT ENTITLED

"An Act establishing an energy assistance program in the Alaska Housing Finance Corporation to issue an energy voucher to Alaska permanent fund dividend recipients; relating to the analysis and recommendation of an energy assistance program by the governor; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ALASKA ENERGY VOUCHER. (a) To help residents meet the high cost of energy in the state in 2011, the Alaska Housing Finance Corporation shall establish a program under which the corporation will issue not more than one energy voucher to each adult or emancipated minor who

(1) in 2011, was permitted to apply for a permanent fund dividend on the person's own behalf and who was determined by the Department of Revenue to be eligible for the permanent fund dividend paid in 2012; or

(2) did not apply for the permanent fund dividend paid in 2012 but certifies, on a form provided by the corporation that bears notice that false statements made in the form are punishable by law, that the person was eligible for the permanent fund dividend paid in 2012 and is determined by the corporation to have otherwise been eligible for the permanent fund dividend paid in 2012.

(b) An energy voucher issued under this section is redeemable for the monetary equivalent of 250 gallons of heating oil, the monetary equivalent of 35,000 cubic feet of natural gas, the monetary equivalent of 31,000,000 British thermal units of hot water or steam district heat, or the monetary equivalent of 1,500 kilowatt-hours of electricity. For purposes of this subsection, the monetary equivalent of 250 gallons of heating oil, 35,000 cubic feet of natural gas, 31,000,000 British thermal units of hot water or steam district heat, or 1,500 kilowatt-hours of electricity is the retail price of 250 gallons of heating oil, 35,000 cubic feet of natural gas, 31,000,000 British thermal units of hot water or steam district heat, or 1,500 kilowatt-hours of electricity as approved for each distributor qualified under (e) of this section. The corporation shall specify a date in 2012 for which each distributor that wants to be qualified under (e) of this section shall submit the retail price of 250 gallons of heating oil, the retail price of 35,000 cubic feet of natural gas, the retail price of 31,000,000 British thermal units of hot water or steam district heat, or the retail price of 1,500 kilowatt-hours of electricity, as applicable. On receipt of a voucher and eligible claim, the corporation shall issue a payment to the qualified distributor of the monetary amount determined under this subsection using the retail price approved by the corporation under (e) of this section for a qualified distributor for the applicable type of energy, district heat, or fuel. On receipt of the payment from the corporation, a qualified distributor shall credit the full amount of the payment to the account that services the primary physical residence of the recipient of the voucher. A payment made under this section may not be used for costs unassociated with the purchase of the energy, district heat, or fuel, may not be transferred between customer accounts, and may not be paid out in cash. If an account with a remaining balance from a payment made under this section is closed, a qualified distributor shall return the balance of the account attributable to the energy voucher to the corporation.

(c) The energy voucher

(1) must be numbered and state the name of the person to whom the voucher

is issued;

(2) must require the recipient of the voucher to sign, and date, and certify, on a form bearing notice that false statements made in the form are punishable by law, that the recipient of the voucher is complying with all the requirements of the voucher, including the requirement that the voucher amount be used to supply heating oil, natural gas, district heat, or electricity to the voucher recipient's primary physical residence in the state;

(3) is nontransferable and may not be sold, transferred, or traded for any other compensation, except as provided in (g) and (*l*) of this section;

(4) is redeemable only at a distributor qualified under (e) of this section and may not be split among multiple distributors;

(5) is not valid for submission to a distributor more than four months after the date the energy voucher is issued;

(6) is valid for heating oil, natural gas, district heat, or electricity delivered to the voucher recipient's primary physical residence in the state; and

(7) shall be issued by the corporation not more than 30 days following the issuance in 2012 of the permanent fund dividend.

(d) A distributor qualified under (e) of this section shall, within 30 days after accepting the voucher, issue a document acknowledging receipt of the voucher to the person exchanging the voucher. The corporation shall issue the amount determined under (b) and (e) of this section to the qualified distributor for an energy voucher not later than 20 days after receiving an eligible claim from a qualified distributor. Submitted claims must include

(1) the number of the voucher;

(2) the name of the recipient, as stated on the voucher; and

(3) the address or other identifying information requested by the corporation listed on the heating oil, natural gas, district heat, or electricity account that the voucher will credit.

(e) The corporation shall maintain a list of qualified distributors eligible to accept and redeem vouchers. A distributor of oil, natural gas, district heat, or electricity is qualified if the distributor

(1) is licensed to do business in the state;

(2) is regularly engaged in the business of distributing oil, natural gas, district

heat, or electricity;

(3) submits a retail price of oil, natural gas, district heat, or electricity, as applicable, for the quantities described in (a) of this section, submits all evidence for that retail price requested by the corporation, and responds to inquiries of the corporation related to that retail price, and the corporation finds that retail price is representative of the price charged under similar circumstances; and

(4) meets other eligibility requirements that the corporation may adopt under AS 18.56.088 or emergency regulations adopted under sec. 3 of this Act.

(f) In determining the eligibility of an individual under a public assistance program, a heating assistance program, or a veterans' benefits program in which eligibility for assistance is based on financial need, the state may not consider an energy voucher as income or resources received by the recipient or by a member of the recipient's household. An individual whose

(1) supplemental security income benefit payment under 42 U.S.C. 1381 - 1383f is reduced solely because of the receipt of energy assistance under this section is entitled to receive from the state, for a period not to exceed 12 months, the same level of benefit payment as the individual would have received under 42 U.S.C. 1381 - 1383f had energy assistance not been received under this section; or

(2) nutrition assistance or benefits under 42 U.S.C. 1786 (Special Supplemental Nutrition Program for Women, Infants, and Children) or 7 U.S.C. 612c (Commodity Supplemental Food Program) are reduced solely because of the receipt of energy assistance under this section is entitled to receive, notwithstanding the assistance limit in AS 47.25.130(a), cash assistance under AS 47.25.120 - 47.25.300 (general relief assistance), for a period not to exceed 12 months, in the same amount as the individual would have received under 42 U.S.C. 1786 (Special Supplemental Nutrition Program for Women, Infants, and Children) or 7 U.S.C. 612c (Commodity Supplemental Food Program) had energy assistance not been received under this section.

(g) A recipient of an energy voucher who does not pay directly for the heating oil, natural gas, district heat, or electricity used in the recipient's primary physical residence or who does not have reasonable access to a qualified distributor of the type of fuel, district heat, or electricity used in the recipient's primary physical residence in the state may certify that

fact on a form provided by the corporation bearing notice that false statements made in the form are punishable by law, and may exchange the voucher with the corporation

(1) if applicable, for a replacement voucher in the name of the landlord or owner of the recipient's primary physical residence in the state, the value of which may, subject to negotiations between the landlord and tenant, be deducted from rent; or

(2) upon certification that the $250 will be used toward rent, energy, or heating costs at the recipient's primary physical residence in the state, for a check for $250 in the name of the recipient of the energy voucher.

(h) Except as provided in (j) of this section or as may be provided by regulations adopted by the corporation, an energy voucher issued under this section is not valid unless it is signed and dated by the individual named on the face of the voucher.

(i) A replacement voucher issued to a landlord under (g) of this section is not valid until the landlord certifies on a form provided by the corporation bearing notice that false statements made in the form are punishable by law that the amount of the voucher will be used to provide energy or heat to the primary physical residence of the original recipient of the voucher and certifies to the amount that the landlord will apply against the rent of the original recipient of the voucher.

(j) Certification or signature on an energy voucher or other certification under this section required of an individual who is disabled or incapacitated may be signed or certified by the individual's legal guardian or other authorized representative. An individual may complete, sign, and redeem an energy voucher on behalf of a member of the armed forces of the United States who is serving on active duty outside of the United States if the individual has a power of attorney from the member of the armed forces that, in specific or general terms, authorizes the individual to redeem the voucher.

(k) An individual who is disabled or incapacitated may not maintain a claim against the state or an officer or employee of the state based on the manner in which the guardian or authorized representative other than a public agency of the state managed or disposed of an energy voucher received on behalf of the disabled or incapacitated individual.

(l) If a person is eligible for an energy voucher but dies before the energy voucher is issued or redeemed, the energy voucher may be transferred to a personal representative of the estate or to a successor claiming personal property under AS 13.16.680.

(m) In addition to any criminal penalties imposed by state law, if an individual or qualified distributor is convicted of a crime in connection with a false statement made in a certification required under this section, in a submission for a reimbursement under (d) of this section, or in connection with forging an energy voucher, and the conviction is not reversed, vacated, or set aside, or if an individual or qualified distributor is found by the Alaska Housing Finance Corporation to have bought, sold, traded, or otherwise violated the terms of the voucher, that individual or qualified distributor forfeits the energy voucher, or the monetary amount received from the voucher, and the individual is not eligible for a future permanent fund dividend.

(n) If an individual is aggrieved by a decision of the Department of Revenue with respect to the individual's eligibility for a permanent fund dividend, and thus an energy voucher under (a)(1) of this section, the individual may request that the department review its decision under AS 43.23.015(g).

(o) If an individual or distributor is aggrieved by a decision of the Alaska Housing Finance Corporation with respect to the individual's authority to claim an energy voucher on behalf of another, or reimbursement of a distributor, or other decision under (a)(2), (e), (g), or (m) of this section, the individual or distributor may request that the corporation review its decision. Within 12 months after an administrative appeal under this subsection is filed, the corporation shall provide the individual or distributor with a final written decision. If the individual or distributor is aggrieved by the final written decision of the corporation, the individual or distributor may appeal that decision to the superior court in accordance with AS 44.62.560. An appeal to the court under this subsection does not entitle the aggrieved individual or distributor to a trial de novo. The appeal shall be based on the record of the administrative proceeding from which appeal is taken, and the scope of appeal is limited to matters contained in the record of the administrative proceeding.

(p) If the corporation determines that an energy voucher or a cash payment made in exchange for a voucher should not have been issued to an individual or a reimbursement should not have been made to a distributor, the state may use all collection procedures or remedies available under AS 43 to recover the energy voucher or the cash value of the voucher that was improperly issued or for which reimbursement was improperly made. Except as provided in (q) of this section, a notice of an improperly issued voucher or improper

reimbursement shall be sent to the individual or distributor, as applicable, within

(1) three years after the energy voucher was issued if the notice is sent to an individual; or

(2) three years after the distributor received reimbursement if the notice is sent to a distributor.

(q) The three-year time limit under (p) of this section for the corporation to send notice of an improperly issued voucher or an improper reimbursement is extended to six years if the corporation determines that the individual or distributor

(1) exercised gross negligence or reckless disregard with respect to a material fact in connection with a false statement on the energy voucher or submission for reimbursement; or

(2) forged an energy voucher.

(r) If notice is not sent within the time required under (p) or (q) of this section, administrative or judicial proceedings may not be commenced for recovery of an improperly issued energy voucher or improper reimbursement.

(s) An energy voucher, account credit, or cash payment provided under this section is exempt from garnishment, levy, or execution by a private party or the state.

(t) To the extent allowed by federal law and notwithstanding other state law that may be to the contrary, the department shall, on request of the corporation, electronically provide the corporation with information about applicants who the department has determined are eligible for the permanent fund dividend paid in 2012. Information requested by the corporation under this subsection may include the name of the applicant, the physical and mailing address of the applicant, the date of birth of the applicant, the social security number of the applicant, and any other information necessary to execute the energy voucher program. Information from the department may be used by the corporation only for the purpose of executing the energy voucher program created under this section.

(u) In this section,

(1) "corporation" means the Alaska Housing Finance Corporation created under AS 18.56;

(2) "department" means the Department of Revenue;

(3) "disabled" means physically or mentally unable to sign an energy voucher

or make a certification required in this section because of serious emotional disturbance, visual, orthopedic, or other health impairment, or developmental disability that is attributable to mental retardation, cerebral palsy, epilepsy, autism, or other cause;

(4) "incapacitated" means the ability to receive and evaluate information or to communicate decisions is impaired for reasons other than minority to the extent that the person lacks the ability to provide the essential requirements for the person's physical health or safety without court-ordered assistance.

*** Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ANALYSIS AND RECOMMENDATION OF AN ENERGY ASSISTANCE PROGRAM. (a) The governor shall take public testimony, consider the recommendations from organizations involved in providing energy or energy assistance to Alaskans, analyze the energy assistance options in (b) of this section, and analyze alternate options to those proposed in (b) of this section for providing energy assistance to Alaskans and, before October 1, 2012, the governor shall provide a report to the legislature making a recommendation for an energy assistance program to be implemented in the fiscal year ending June 30, 2014, that

(1) correlates the amount of assistance to the local cost of residential heating, taking into consideration the price of fuel and heating degree days in each community;

(2) is implemented based on crude oil price or heating oil price;

(3) has total funding based on state revenue;

(4) minimizes administrative costs;

(5) makes participation of fuel distributors voluntary;

(6) includes a hold harmless provision for recipients of public assistance and veterans' benefits; and

(7) includes penalties for fraud, including ineligibility for a future permanent fund dividend.

(b) The governor shall analyze the following options and may analyze alternate options to provide energy assistance to Alaskans:

(1) a fuel price reduction program with the following features:

(A) state reimbursement to a heating oil or natural gas distributor of a

portion of the wholesale purchase price of fuel that the distributor sold to heat residential structures;

(B) an amount of reimbursement necessary to reduce the wholesale purchase price of a distributor by a specified amount or to a specified price;

(C) a limit on the amount of fuel that a person may purchase and for which a distributor received a state reimbursement; and

(2) an individual account program with the following features:

(A) application on a permanent fund dividend application for energy assistance in the form of a state payment to the applicant's account with a fuel distributor or electric utility;

(B) assistance based on heating degree days and the cost of energy in the community;

(C) electronic selection of

(i) a fuel distributor or electric utility to receive the individual's energy assistance payment; and

(ii) an optional amount from the applicant's dividend to be deposited in the individual's account with a fuel distributor or electric utility;

(D) a statewide base amount to be sent with the applicant's permanent fund dividend for an applicant for energy assistance who fails to select a fuel distributor or electric utility to receive the individual's energy assistance payment.

(c) The governor's report to the legislature under (a) of this section shall evaluate

(1) the estimated cost of the program for the first five years;

(2) the cost of administering the program compared to the assistance provided;

(3) whether the program provides the highest level of assistance to the individuals with the highest heating costs; and

(4) whether the program can be structured so that energy assistance is not subject to federal taxation.

(d) In this section, "heating degree days" means the average temperature for a day minus the reference temperature of 65 degrees Fahrenheit.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

EMERGENCY REGULATION AND PROCUREMENT PROVISIONS. Notwithstanding AS 18.56.088, the Alaska Housing Finance Corporation may adopt emergency regulations under AS 44.62.250 and 44.62.260 necessary to implement the Alaska energy voucher program in sec. 1 of this Act without making written findings under AS 44.62.250. The legislature finds that the adoption of emergency regulations is necessary to implement this Act and for the immediate preservation of public health and general welfare. In addition, the Alaska Housing Finance Corporation is exempt from AS 36.30, including AS 36.30.015(f), for the purposes of implementing the Alaska energy voucher program.

*** Sec. 4.** This Act takes effect immediately under AS 01.10.070(c).

CS FOR SENATE BILL NO. 203( )

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY

Offered:
Referred:

Sponsor(s): SENATORS THOMAS, Paskvan, Hoffman, Wagoner, Ellis, Olson, French, Kookesh, Egan

A BILL

FOR AN ACT ENTITLED

"An Act establishing an energy assistance program in the Alaska Housing Finance Corporation to issue an energy voucher to Alaska permanent fund dividend recipients; relating to the analysis and recommendation of an energy assistance program by the governor; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ALASKA ENERGY VOUCHER. (a) To help residents meet the high cost of energy in the state in 2011, the Alaska Housing Finance Corporation shall establish a program under which the corporation will issue not more than one energy voucher to each person who, in 2011, was an adult or an emancipated minor who was permitted to apply for a permanent fund dividend on the person's own behalf and who was determined by the Department of Revenue to be eligible for the permanent fund dividend paid in 2012.

(b) An energy voucher issued under this section is redeemable for the monetary

equivalent of 250 gallons of heating oil, the monetary equivalent of 35,000 cubic feet of natural gas, or the monetary equivalent of 1,500 kilowatt-hours of electricity. For purposes of this subsection, the monetary equivalent of 250 gallons of heating oil, 35,000 cubic feet of natural gas, or 1,500 kilowatt-hours of electricity is the retail price of 250 gallons of heating oil, 35,000 cubic feet of natural gas, or 1,500 kilowatt-hours of electricity as approved for each distributor qualified under (e) of this section. The corporation shall specify a date in 2012 for which each distributor that wants to be qualified under (e) of this section shall submit the retail price of 250 gallons of heating oil, the retail price of 35,000 cubic feet of natural gas, or the retail price of 1,500 kilowatt-hours of electricity, as applicable. On receipt of a voucher and eligible claim, the corporation shall issue a payment to the qualified distributor of the monetary amount determined under this subsection using the retail price approved by the corporation under (e) of this section for a qualified distributor for the applicable type of energy or fuel. On receipt of the payment from the state, a qualified distributor shall credit the full amount of the payment to the account that services the principal residence of the recipient of the voucher. A payment made under this section may not be used for costs unassociated with the purchase of the energy or fuel, may not be transferred between customer accounts, and may not be paid out in cash. If an account with a remaining balance from a payment made under this section is closed, a qualified distributor shall return the balance of the account attributable to the energy voucher to the state.

(c) The energy voucher

(1) shall be numbered and state the name of the person to whom the voucher is issued;

(2) must require the recipient of the voucher to sign, and date, and certify, on a form bearing notice that false statements made in the form are punishable by law, that the recipient of the voucher is complying with all the requirements of the voucher, including the requirement that the voucher amount be used to supply heating oil, natural gas, or electricity to the voucher recipient's primary residence in the state;

(3) is nontransferable and may not be sold, transferred, or traded for any other compensation, except as provided in (g) and (*l*) of this section;

(4) is redeemable only at a distributor qualified under (e) of this section and may not be split among multiple distributors;

(5) is not valid for submission to a distributor more than four months after the date the energy voucher is issued;

(6) is valid for heating oil, natural gas, or electricity delivered to the voucher recipient's primary residence in the state; and

(7) shall be issued by the corporation not more than 30 days following the issuance in 2012 of the permanent fund dividend.

(d) A distributor qualified under (e) of this section shall, within 30 days after accepting the voucher, issue a document acknowledging receipt of the voucher to the person exchanging the voucher. The corporation shall issue the amount determined under (b) and (e) of this section to the qualified distributor for an energy voucher not later than 20 days after receiving an eligible claim from a qualified distributor. Submitted claims must include

(1) the number of the voucher;

(2) the name of the recipient, as stated on the voucher; and

(3) the address or other identifying information requested by the corporation listed on the heating oil, natural gas, or electricity account that the voucher will credit.

(e) The corporation shall maintain a list of qualified distributors eligible to accept and redeem vouchers. A distributor of oil, natural gas, or electricity is qualified if the distributor

(1) is licensed to do business in the state;

(2) is regularly engaged in the business of distributing oil, natural gas, or electricity;

(3) submits a retail price of oil, natural gas, or electricity, as applicable, for the quantities described in (a) of this section, submits all evidence for that retail price requested by the corporation, and responds to inquiries of the corporation related to that retail price, and the corporation finds that retail price is representative of the price charged under similar circumstances; and

(4) meets other eligibility requirements that the corporation may adopt under AS 18.56.088 or emergency regulations adopted under sec. 3 of this Act.

(f) In determining the eligibility of an individual under a public assistance program, a heating assistance program, or a veterans' benefits program in which eligibility for assistance is based on financial need, the state may not consider an energy voucher as income or resources received by the recipient or by a member of the recipient's household.

(g) A recipient of an energy voucher who does not pay directly for the heating oil, natural gas, or electricity used in the recipient's residence or who does not have reasonable access to a qualified distributor of the type of fuel or electricity used in the recipient's residence in the state may certify that fact on a form provided by the corporation bearing notice that false statements made in the form are punishable by law, and may exchange the voucher with the corporation

(1) if applicable, for a replacement voucher in the name of the landlord or owner of the residence in the state in which the recipient resides, the value of which may, subject to negotiations between the landlord and tenant, be deducted from rent; or

(2) upon certification that the $250 will be used toward rent, energy, or heating costs at the recipient's primary residence in the state, for a check for $250 in the name of the recipient of the energy voucher.

(h) Except as provided in (j) of this section or as may be provided by regulations adopted by the corporation, an energy voucher issued under this section is not valid unless it is signed and dated by the individual named on the face of the voucher.

(i) A replacement voucher issued to a landlord under (g) of this section is not valid until the landlord certifies on a form provided by the corporation bearing notice that false statements made in the form are punishable by law that the amount of the voucher will be used to provide energy or heat to the primary residence of the original recipient of the voucher and certifies to the amount that the landlord will apply against the rent of the original recipient of the voucher.

(j) Certification or signature on an energy voucher or other certification under this section required of an individual who is disabled or incompetent may be signed or certified by the individual's legal guardian or other authorized representative. An individual may complete, sign, and redeem an energy voucher on behalf of a member of the armed forces of the United States who is serving on active duty outside of the United States if the individual has a power of attorney from the member of the armed forces that, in specific or general terms, authorizes the individual to redeem the voucher.

(k) An individual who is disabled or incompetent may not maintain a claim against the state or an officer or employee of the state based on the manner in which the guardian or authorized representative other than a public agency of the state managed or disposed of an

energy voucher received on behalf of the disabled or incompetent individual.

(*l*) If a person is eligible for an energy voucher but dies before the energy voucher is issued or redeemed, the energy voucher may be transferred to a personal representative of the estate or to a successor claiming personal property under AS 13.16.680.

(m) In addition to any criminal penalties imposed by state law, if an individual or qualified distributor is convicted of a crime in connection with a false statement made in a certification required under this section, in a submission for a reimbursement under (d) of this section, or in connection with forging an energy voucher, and the conviction is not reversed, vacated, or set aside, or if an individual or qualified distributor is found by the Alaska Housing Finance Corporation to have bought, sold, traded, or otherwise violated the terms of the voucher, that individual or qualified distributor forfeits the energy voucher, or the monetary amount received from the voucher, and the individual is not eligible for a future permanent fund dividend.

(n) If an individual is aggrieved by a decision of the Department of Revenue with respect to the individual's eligibility for a permanent fund dividend, and thus an energy voucher, the individual may request that the department review its decision under AS 43.23.015(g).

(o) If an individual or distributor is aggrieved by a decision of the Alaska Housing Finance Corporation with respect to the individual's authority to claim an energy voucher on behalf of another, or reimbursement of a distributor, or other decision under (e), (g), or (m) of this section, the individual or distributor may request that the corporation review its decision. Within 12 months after an administrative appeal under this subsection is filed, the corporation shall provide the individual or distributor with a final written decision. If the individual or distributor is aggrieved by the final written decision of the corporation, the individual or distributor may appeal that decision to the superior court in accordance with AS 44.62.560. An appeal to the court under this subsection does not entitle the aggrieved individual or distributor to a trial de novo. The appeal shall be based on the record of the administrative proceeding from which appeal is taken, and the scope of appeal is limited to matters contained in the record of the administrative proceeding.

(p) If the corporation determines that an energy voucher or a cash payment made in exchange for a voucher should not have been issued to an individual or a reimbursement

should not have been made to a distributor, the state may use all collection procedures or remedies available under AS 43 to recover the energy voucher or the cash value of the voucher that was improperly issued or for which reimbursement was improperly made. Except as provided in (q) of this section, a notice of an improperly issued voucher or improper reimbursement shall be sent to the individual or distributor, as applicable, within

(1) three years after the energy voucher was issued if the notice is sent to an individual; or

(2) three years after the distributor received reimbursement if the notice is sent to a distributor.

(q) The three-year time limit under (p) of this section for the corporation to send notice of an improperly issued voucher or an improper reimbursement is extended to six years if the corporation determines that the individual or distributor

(1) exercised gross negligence or reckless disregard with respect to a material fact in connection with a false statement on the energy voucher or submission for reimbursement; or

(2) forged an energy voucher.

(r) If notice is not sent within the time required under (p) or (q) of this section, administrative or judicial proceedings may not be commenced for recovery of an improperly issued energy voucher or improper reimbursement.

(s) An energy voucher, account credit, or cash payment provided under this section is exempt from garnishment, levy, or execution by a private party or the state.

(t) To the extent allowed by federal law and notwithstanding other state law that may be to the contrary, the department shall, on request of the corporation, electronically provide the corporation with information about applicants who the department has determined are eligible for the permanent fund dividend paid in 2012. Information requested by the corporation under this subsection may include the name of the applicant, the address of the applicant, the date of birth of the applicant, the social security number of the applicant, and any other information necessary to execute the energy voucher program. Information from the department may be used by the corporation only for the purpose of executing the energy voucher program created under this section.

(u) In this section,

(1) "corporation" means the Alaska Housing Finance Corporation created under AS 18.56;

(2) "department" means the Department of Revenue;

(3) "disabled" means physically or mentally unable to sign an energy voucher or make a certification required in this section because of serious emotional disturbance, visual, orthopedic, or other health impairment, or developmental disability that is attributable to mental retardation, cerebral palsy, epilepsy, autism, or other cause; "disabled" does not mean "incompetent."

*** Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

ANALYSIS AND RECOMMENDATION OF AN ENERGY ASSISTANCE PROGRAM. (a) The governor shall take public testimony, consider the recommendations from organizations involved in providing energy or energy assistance to Alaskans, analyze the energy assistance options in (b) of this section, and analyze alternate options to those proposed in (b) of this section for providing energy assistance to Alaskans and, before October 1, 2012, the governor shall provide a report to the legislature making a recommendation for an energy assistance program to be implemented in the fiscal year ending June 30, 2014, that

(1) correlates the amount of assistance to the local cost of residential heating, taking into consideration the price of fuel and heating degree days in each community;

(2) is implemented based on crude oil price or heating oil price;

(3) has total funding based on state revenue;

(4) minimizes administrative costs;

(5) makes participation of fuel distributors voluntary;

(6) includes a hold harmless provision for recipients of public assistance and veterans' benefits; and

(7) includes penalties for fraud, including ineligibility for a future permanent fund dividend.

(b) The governor shall analyze the following options and may analyze alternate options to provide energy assistance to Alaskans:

(1) a fuel price reduction program with the following features:

(A) state reimbursement to a heating oil or natural gas distributor of a portion of the wholesale purchase price of fuel that the distributor sold to heat residential structures;

(B) an amount of reimbursement necessary to reduce the wholesale purchase price of a distributor by a specified amount or to a specified price;

(C) a limit on the amount of fuel that a person may purchase and for which a distributor received a state reimbursement; and

(2) an individual account program with the following features:

(A) application on a permanent fund dividend application for energy assistance in the form of a state payment to the applicant's account with a fuel distributor or electric utility;

(B) assistance based on heating degree days and the cost of energy in the community;

(C) electronic selection of

(i) a fuel distributor or electric utility to receive the individual's energy assistance payment; and

(ii) an optional amount from the applicant's dividend to be deposited in the individual's account with a fuel distributor or electric utility;

(D) a statewide base amount to be sent with the applicant's permanent fund dividend for an applicant for energy assistance who fails to select a fuel distributor or electric utility to receive the individual's energy assistance payment.

(c) The governor's report to the legislature under (a) of this section shall evaluate

(1) the estimated cost of the program for the first five years;

(2) the cost of administering the program compared to the assistance provided;

(3) whether the program provides the highest level of assistance to the individuals with the highest heating costs; and

(4) whether the program can be structured so that energy assistance is not subject to federal taxation.

(d) In this section, "heating degree days" means the average temperature for a day minus the reference temperature of 65 degrees Fahrenheit.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to

read:

EMERGENCY REGULATION AND PROCUREMENT PROVISIONS. Notwithstanding AS 18.56.088, the Alaska Housing Finance Corporation may adopt emergency regulations under AS 44.62.250 and 44.62.260 necessary to implement the Alaska energy voucher program in sec. 1 of this Act without making written findings under AS 44.62.250. The legislature finds that the adoption of emergency regulations is necessary to implement this Act and for the immediate preservation of public health and general welfare. In addition, the Alaska Housing Finance Corporation is exempt from AS 36.30, including AS 36.30.015(f), for the purposes of implementing the Alaska energy voucher program.

*** Sec. 4.** This Act takes effect immediately under AS 01.10.070(c).

Alaska Housing
FINANCE CORPORATION

April 4, 2012

The Honorable Senator Bert Stedman
AK State Capitol, Room #516
Juneau, AK 99801

Dear Senator Stedman:

Thank you for allowing Alaska Housing Finance Corporation (AHFC) the opportunity to share information about Senate Bill 203, the energy assistance program and vouchers bill. As you are aware since the bill was first heard in the Senate Finance committee on Feb. 23, a number of significant changes have been adopted, most notably in our opinion, naming AHFC as the administrator of the program.

Our staff appreciates the ability to provide technical assistance to the bill sponsor and his staff. We have undertaken a significant effort to evaluate language in the bill, identify resources currently available to AHFC and those that would be required to implement SB 203 in the timeframe established in the bill.

AHFC recognizes the high cost of fuel plaguing rural areas and the Interior of our state. It is not the prerogative of AHFC to either support or oppose legislation so my intent is simply to provide you information about the challenge that AHFC is being asked to assume. Should SB203 proceed into law, AHFC will be required to issue vouchers within 30 days to each adult who was eligible for a Permanent Fund Dividend (PFD) in 2011. We will rely on PFD's data to determine eligibility into the program.

Should the Governor sign the bill into law by July 1, 2012, AHFC will have approximately three months to ready the program to include establishing a standard agreement or MOU with approximately 300 energy distributors-suppliers. AHFC will be responsible to print and issue individually numbered vouchers to 450,000 to 550,000 Alaskans with the vast majority of vouchers going out in November but additional vouchers to follow as PFD eligibility is determined. Each eligible recipient may choose to redeem their voucher for oil, natural gas, or electricity in their service area. Where distributors/suppliers choose not to participate in the program or where recipients do not have an account with a distributor, the recipient may choose instead to redeem his/her voucher for $250 and apply funds toward rent relief.

Further, SB 203 allows for a negotiation between a landlord and tenant. To illustrate three points:

1) In the case of an eligible recipient who happens to be a renter in Fairbanks, the renter could choose to split the value of the voucher 50/50 with his landlord. Should the landlord agree to the trade and for discussion purposes, the value of the voucher was $1,200. Under scenario, the renter would receive a rent reduction of $600, and the landlord would benefit from an additional $600 in energy relief.
2) Because AHFC will be required to provide 1099s for income that exceeds $600, tax counsel advises that both the tenant and the landlord in the scenario presented should receive 1099s and it is likely that the check will qualify as a taxable event.
3) If the renter in the scenario presented was a recipient of one of AHFC's Housing Choice Vouchers, a program funded by the federal department of Housing & Urban Development, the IRS would likely consider the event taxable; however, AHFC would consider the payment a one-time event not countable as family income so there would be no negative impact to the family relative to AHFC housing.

The bill specifies that AHFC will choose a date in 2012 for which to determine a fuel price, and because the recipient will have up to four months from time of issuance to redeem their voucher, again for illustration purposes, the practical effect is for a community whose oil price is $4.00/gallon on Jan. 15, the date AHFC selects under this hypothetical scenario, the cash value for this voucher would be $1,000. The distributor would credit the individual's account at time of receipt. If that voucher was redeemed on Dec. 1, 2012 and fuel prices were $5.00/gallon, the practical effect is that the consumer would receive 200 gallons of fuel. If, on the other hand, the price of fuel dropped to $3.00/gallon, the consumer would receive 333 gallons of fuel.

Upon delivery of the fuel or credit to an individual's account, AHFC would reimburse the distributor for the full value of the voucher. The bill requires AHFC to reimburse the distributor within 20 days of receiving eligible claims.

A few additional noteworthy points:

- For those individuals who choose to use their voucher to pay for electricity and are engaged in the PCE program, the value of the voucher will be applied post-PCE.
- AHFC does not have the current resources in-house to develop, manage and substantially dismantle this program in one year as is required in the bill. As a result, we have submitted a fiscal note that accounts for 10 full-time positions in the first year and ratcheting down to just two positions in the final year of the program. In the beginning, the majority of these positions will be dedicated to I.S. infrastructure development, contract administration with vendors AHFC engages, internal audit functions and appeals, and customer service and administrative support largely dedicated to our own clients in public housing and those who benefit from the Housing Choice Voucher program. Toward the end of the program in FY17 and FY18, we envision the primary duties of AHFC staff will be continued contract compliance and audit.
- My staff has been actively engaged in conversations with contractors who may be able to support the project as required in SB 203 and we will seek to bring those onboard as soon as possible under the authority granted to AHFC in Sec. 3 that allows for emergency regulation and procurement provisions. A detailed description of the duties we expect to contract is provided on page two of the fiscal note provided.

Finally, costs included in the fiscal note account for $310 million-$450 million in fuel reimbursement. The largest variable in this range is the number of Alaskans who might be eligible to participate, followed by the wide differential in actual cost of fuel by source.

Combined, operations, contract and fuel costs are estimated not to exceed $465,000,000 in FY13.

We appreciate the tremendous trust the legislature has placed in our leadership at Alaska Housing Finance Corporation and your confidence in our ability to execute significant projects. Please contact me if you have questions or concerns; I have staff standing by in your committee to answer questions the committee may pose.

Sincerely,

Daniel R. Fauske

Senate Bill 203: Energy Relief for Alaskans

Work draft CS 27-LS1363\D

Purpose: To provide Alaskans with relief from the effects of high energy costs and create a program to help residents deal with high energy costs during the transition to an affordable energy source.

Section 1: The state will send a voucher to every adult PFD recipient in the fall of 2012. This can be redeemed at a fuel distributor or utility of your choice for the value of 250 gallons of heating oil, 350 CCF of natural gas, or for 1,500 KWH of electricity.

- The recipient decides whether to use the voucher for heating oil or natural gas or electricity, then gives the voucher to the distributor of their choice. If the recipient does not already have an account with the distributor, they open an account.
- Distributors send the vouchers to the state and submit claims for payment that list the voucher number, name of voucher owner, the delivery address and other information.
- Upon receipt of a claim from a distributor, the state sends payment to the distributor to be credited to the voucher recipient's account.
- The amount of the state payment will be calculated by multiplying the quantity of fuel provided by the voucher, by the distributor's retail price on a specific date in 2012.
- The credit may be used only for energy at the recipient's primary residence in Alaska, and may not be transferred to another account or paid in cash to the account holder.
- The credit may be used to pay a recipient's debt with the distributor.
- Each voucher may only be used at one distributor.
- Distributors can decide whether to deliver fuel immediately after they receive a voucher, or to wait until they receive payment from the state.
- The credit remains in the account until it is spent on energy delivered to the recipient's home.
- If the account is closed before all the credit is used, the distributor sends the balance back to the state.
- Vouchers state the recipient's name, may not be sold or transferred, and require signature by both the recipient and the distributor.
- Recipients who certify that they do not pay directly for heating oil, natural gas or electricity at their primary residence may return their vouchers to the state and receive either: a replacement voucher in the name of their landlord, or a check for $250. Individuals may also qualify for $250 if they do not have a qualified distributor in their community.
- Participation by distributors is voluntary, and interested businesses can apply to be added to the list of qualified distributors.
- The program will be administered by the Alaska Housing Finance Corporation (AHFC).

Section 2: The Governor must evaluate options and make a recommendation for the best energy relief program that can be instituted in 2013 and beyond.

This recommendation is due October 1, 2012. This analysis must include an evaluation of a "fuel price reduction" program, an "individual account" program, and alternate options.

Section 3: AHFC may adopt emergency regulations and is exempt from procurement law for the purpose of implementing the energy voucher program rapidly.

Section 4: This legislation takes effect immediately.

March 26, 2012

SB 203: Energy Relief

Summary of Changes Contained in draft Committee Substitute 27-LS1363\D

1. Purpose (page 1, line 8)
   Clarifies that the purpose of the energy voucher program is to provide Alaskans with relief from the effects of high 2011 energy costs, which correlates with the residency period for the permanent fund dividend paid in 2012.

2. AHFC administers voucher program (page 1, line 9 and throughout)
   Substitutes Alaska Housing Finance Corporation for Department of Revenue as the state agency responsible for administering Section 1 of the bill, the energy voucher program.

3. Specific date for fuel price calculation and crediting consumer's energy account (page 2, lines 6-19)
   Directs AHFC to calculate the price of the energy for which each voucher is redeemed based on the distributor's retail price on a specific date or dates in 2012 selected by AHFC. Upon receipt of a claim from a distributor, AHFC will send payment to the distributor to be credited to the voucher recipient's energy account. The credit may be used for new deliveries of energy or to pay arrears. The credit may only be used for energy purchases and associated taxes, and may not be transferred to another account or paid in cash to the account holder. If an account with a voucher credit balance is closed, the distributor must submit the balance to the state.

4. Amounts and types of fuel (page 1, line 14)
   The voucher is redeemable for the monetary equivalent of 250 gallons of heating oil, 350 CCF of natural gas or 1,500 KWH of electricity. The amounts were selected with the objective of providing approximately 2 months of energy based on estimates of average statewide residential consumption. A $250 cash option has been provided to residents who do not purchase electricity, oil or gas for their primary residence, or do not have access to a qualified distributor, to assist them in purchasing alternative fuels or paying their rent. A renter whose heat and electricity are included in rent has the alternative of requesting reissuance of the voucher to their landlord in exchange for a rent reduction.

5. Voucher issuance and expiration (page 3, line 1 and line 7)
   AHFC will issue the voucher no more than 30 days after the Department of Revenue issues the individual's PFD. The voucher must be redeemed with a distributor, or returned to AHFC for the $250 payment or reissuance to a landlord, within 4 months of issuance. The distributor must issue a receipt for the voucher to the recipient, and must submit a claim to AHFC within 30 days.

6. Location of fuel delivery (page 2, line 23)
   The voucher recipient must sign and date a certification that the account into which the voucher reimbursement will be deposited is for energy delivered to their primary residence in Alaska.

7. Reissuance of voucher to landlord (page 4, line 16)
   The request for reissuance of a voucher to a landlord must state the amount of the mutually agreed -upon rent reduction, and be signed by both parties, as well as certify that the reissued voucher will be used for energy at the original recipient's primary residence in Alaska.

8. Eligibility for $250 (page 4, line 3 and line 10)
   Applicants for the $250 payment must certify they will use the money for rent or energy at their primary residence in Alaska. Eligibility for the $250 payment is expanded to include voucher recipients who certify that they do not have reasonable access to a qualified distributor in the Alaska community where their primary residence is located.

9. Qualified distributors (page 3, line 21)
   As part of the application process, distributors must submit the retail price they charged on the date specified by AHFC, along with any information required by AHFC to verify that price. AHFC may require information or evidence related to the price and must determine that the price is representative of the price charged under similar circumstances.

10. Qualified PFD recipients (page 1, line 10)
    States that a voucher will be issued to each person who was an adult or emancipated minor in 2011 and was determined by the Department of Revenue to be eligible for the PFD paid in 2012.

11. Garnishment (page 6, line 20)
    States that vouchers, account credits and cash payments cannot be garnished by the state or a private party.

12. AHFC emergency regulation authority and exemption from procurement rules (page 9, lines 2-9)
    Grants AHFC the authority to adopt emergency regulations and exempts AHFC from procurement laws to enable the agency to implement the program rapidly.

13. Appeals of AHFC decisions (page 5, lines 14-29)
    States that the existing Department of Revenue appeal process for PFD denial is the appeal process for denial of a voucher. The bill also creates an AHFC appeal process for challenging AHFC decisions about distributor qualifications, voucher claims, and payments, and violations of the laws governing the voucher program.

14. Penalties for violating the energy relief law (page 6, line 2)
    Adds forfeiture of state payments and reimbursements related to the voucher program to the penalties for violating the laws governing the program.

15. Voucher recipients who cannot act on their own behalf (page 4, line 22 and page 7, line 4)
    Amends language regarding signature of vouchers on behalf of impaired people, so it mirrors the PFD law regarding disabled and incompetent applicants.

16. AHFC access to PFD information (page 6, line 22)
    Directs the Department of Revenue to provide in electronic format all information about Permanent Fund Dividend recipients that AHFC needs to administer the energy relief program, including social security numbers.

17. Public input into energy assistance program analysis and recommendation (page 7, line 12)
    Amends section 2 of the bill by adding the requirement that, before issuing his report and recommendation, the governor takes public comment and considers recommendations from organizations involved in providing energy or energy assistance to Alaskans.

18. Immediate effective date (page 9, line 10)
    Adds an immediate effective date to the bill and the title.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB203

Analysis

This bill provides for issuance of energy vouchers to adults eligible for the 2012 Permanent Fund Dividend (PFD), and for the vouchers to be redeemed with qualified distributors of heating oil, natural gas and electricity. Applicants determined to be ineligible for the PFD are entitled to a formal hearing conducted by the office of administrative hearings. The department of revenue, PFD division, estimates an increase of 100 formal appeals. The bill contemplates that those would be concluded within 12 months after filing.

Under the bill, distributors determined not to be qualified also would be entitled to an administrative hearing. The department of revenue could, but is not required to, ask the office of administrative hearings to conduct the distributor appeal hearings as voluntary referrals pursuant to AS 44.64.030(b). The number of distributor appeals that would reach the formal appeal level and be heard by the office of administrative hearings could be quite small, or even non-existent if the department of revenue elected not to refer them to the office.

The bill also provides that the energy voucher not be considered income for financial needs-based assistance programs, unless so required by federal law. If disputes arise between assistance claimants and assistance program managers in the department of health and social services about whether the energy voucher is required by federal law to be treated as income, this could affect the complexity of some cases, or possibly lead to an unquantifiable increase in cases, reaching the formal hearing stage before the office of administrative hearings.

OAH does not anticipate that the resulting one-time, limited duration spike in caseload would increase the office's caseload beyond OAH's capacity to handle the additional cases at approved staffing levels that will be in place as of the July 1, 2012 effective date of Executive Order 116. OAH might need to act sooner than planned to fill an existing vacancy, or if the crush of time-sensitive PFD eligibility appeals so dictated, might need to bring on board a temporary ALJ to handle some of the cases. The cost to OAH of performing the services would be recovered from the affected departments through interagency receipts, based on the time commitment required for hearings and mediations. The $113.6 figure corresponds to the department of revenue's estimate, based on 2008 Resource Rebate experience, of the increase in interagency receipts it would have to pay from the permanent fund to OAH for the anticipated increase of 100 cases. Whether OAH would in fact need to increase expenditures or need increased interagency receipts authority in that amount depends on unpredictable caseload dynamics.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SB 203
2012 LEGISLATIVE SESSION

Analysis

PFD expects this fiscal note to change as more clarification and information is provided to the Department of Revenue.

The bill creates an energy benefit by means of a voucher for Adults who are determined eligible for the 2012 PFD. The bill proposes the energy benefit to be distributed no later than December 1, 2012. The bill also tasks the Governor with determining how to make the program permanent through the PFD Division.

PFD expects increased appeals of ineligible applicants because of the value of the benefit added to dividend eligibility, a situation similar to that of the 2008 Resource Rebate at which time the Informal Appeals unit received approximately 900 appeals by applicants who were ineligible as a matter of law . Additional appeals staff, Range 12 PFD Tech II is needed to render informal appeals decisions within the staturorily designated time frame of 180 days.

Additionally, approximately 100 Formal level appeals were heard by Administrative Law Judges with Office of Administrative Hearings in which the divisions decision the applicant was ineligible was upheld. OAH RSA expected in the amount of $113.6.

As the value and benefit of the annual dividend program increases, so does the potential for fraud. $100.K is requested to hire a firm that would assist the division in auditing existing applicants and creating new audit recommendations for continued assurance that opportunity for fraud is minimized.

This fiscal note is written assuming distribution of the energy vouchers will be handled by AHFC, per the sponsor statement and conversations with the bill sponsor.

Subject: Support for SB 203, Energy Assistance Program & Vouchers

Dear Chair Hoffman and Chair Stedman:
The Alaska Commission on Aging (ACoA) is pleased to offer our support of SB 203, a bill to establish an energy assistance program that would issue an energy voucher to all Alaskan Permanent Fund Dividend recipients. SB 203 is an interim measure to help Alaskans manage their high utility bills until more affordable energy supplies come on line. SB 203 also requires the Executive Branch to evaluate and make recommendations for a cost efficient and effective energy assistance program to be instituted by FY2014. This legislation is sponsored by Senator Joe Thomas and co-sponsored by Senators Paskvan, Ellis, Olson, Egan, Wagoner, French, Kookesh and you, Senator Hoffman.

The price of heating fuel is expensive but especially hard felt by Alaskans on a fixed income. As the price of heating fuel increases, older Alaskans spend more of their fixed incomes on heating their homes, especially Elders who live in rural and remote communities where energy costs are the highest. During the winter, seniors often spend much of their day at home. Older adults typically experience cooler body temperatures than younger people. Many live in older and sometimes drafty homes that are less energy efficient and poorly insulated. In order to save money, some seniors turn down their thermostats way low and may even resort to closing off rooms during the winter or more dangerous practices such as using their kitchen stoves for heat. They also cut back on food and prescription medication expenditures, measures that can compromise their health and quality of life.

ACoA supports SB 203 and believes that this program will help all Alaskans with their heating bills, especially older Alaskans. Please feel free to contact Denise Daniello, ACoA's executive director, by phone (465-4879) or email (denise.daniello@alaska.gov) should you have questions or require additional information.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Resolution No. 12-02

A RESOLUTION of the City of Mountain Village to support Senate Bill 203-The Energy Voucher Bill

WHEREAS : the Council of the City of Mountain Village humbly request the Alaska Department of Revenue utilize the $3.7 billion surplus revenue to provide vouchers to every Adult Permanent Fund Dividend recipient and also develop a program to help residents deal with high heating costs during the transition to more affordable energy supplies.

WHEREAS : the City of Mountain Village recognizes and are fully aware of the high cost of living for the residents in Rural Alaska.

NOW, THEREFORE, BE IT RESOLVED THAT : The City of Mountain Village respectfully request that the State of Alaska Department of Revenue provide immediate energy relief vouchers based on the local cost of home heating, price of fuel and average temperatures of the communities using the $3.7 billion dollars of surplus generated from Alaska Permanent Fund Dividend Program.

CERTIFCATION

Subject: SB 203

Honorable Senator Donald Olson,
The icy grip of old man winter is loosening and spring is close at hand. No doubt we will see him again.
My name is Frederick Beans, born and raised, for over a half a century, in Mountain Village. In my time, I've seen the decline of jobs , the hey days of Commercial Fishing is at its lowest, and I've also witnessed our People resorting to the handouts of the Government, not only that, but the increase of the price of a barrel of crude oil, of which the State of Alaska gets its revenue from. The price oil is on the rise, in part, due to the unrest in the Middle East, and I don't see it dropping any time in the future, which in turn is raising the cost of living, out here in the Bush.
As the Mayor of Mountain Village, I sincerely and wholeheartedly support Senate Bill 203, of which you are a co-sponsor of. I feel the Bill is a stepping stone in relieving some of the hardships we are facing, and will be facing, in the future. I also hope a program, of this nature, will be developed, to aid us in living in this Great State of Alaska.
I will bring this before the City Council, at our next meeting, and, I will push for a resolution in support of SB 203. I will also encourage the other entities to do so. Thank You very much.

Sincerely Yours,
Fred P. Beans,
Mayor of Mountain Village.

Subject: RE: SB 203 Energy Assistance Program and Vouchers

Co-Chair Hoffman,
Co-Chair Thomas,
Committee members,

I hope you will find time to schedule a hearing soon for SB 203 *Energy Assistance Program and Vouchers.*

The bottom line with folks is staying warm and having food on the table. I saw some of my family going through a lot of stress last winter, and me for/with them, due to the costs running up for heating and utility bills. My (adult) kids were fortunate enough to be able to put the delivery costs on a credit card and hopefully pay it off over the summer. It is still a drag on the budgets and another year like the last one is going to really hurt. I live in my daughter's downstairs apartment, and am only indirectly hurt by this, but it is a big concern.

Some seniors and others who do not have as dependable jobs are beginning to have to choose to stay warm or have healthy food or other things like school clothes for their kids who just keep growing.

Please allow a public hearing and let people tell you about their situations. I fear there are many who are struggling and some are simply leaving Fairbanks.

Sincerely,

Doris Robbins

Soldotna 99669,

SB 203 is needed! The people of Alaska, especially in the bush communities, are suffering from high energy costs and need relief NOW, not in the future. If we get a pipeline built we can sunset this bill. Remember, the money you are spending belongs to the people of Alaska.

Subject: Energy Relief Plan

Hi: Please let Senator Thomas know we appreciate fully his efforts to help relieve energy costs to Alaskans. The group of Senators are absolutely correct in that relief is necessary. Our families here at St. George often must either heat their homes or cut down on grocery purchases. A hard choice for anyone. But, with the high unemployment situation facing our people, this proposed relief is welcome and justified. We are grateful for the efforts of the Senators. Thank you, Pat Pletnikoff, Mayor, City of St. George

Juneau AK, 99801

Rep. Bob Herron
State House of Representatives
State Capitol, Room 411
Juneau, AK 99801-1182

RE: SB 203 Energy Relief Plan

Dear Sen. Hoffman and Rep. Herron,

After a short respite from the cold weather, our temperatures have dropped once again to the -20s at nights and our people continue to work at keeping their homes warmed with anything they could afford or find. The cost of trying to keep warm is still outrageous, to say the least.

The AVCP Regional Housing Authority (RHA) is in receipt of a press release and draft bill regarding SB 203. When the AVCP RHA Board of Commissioners met recently, they adopted a resolution, which is attached, supporting SB 203. The Commissioners believe the benefits from SB 203 will be very welcomed by us all in Alaska.

We recommend that SB 203 be amended to provide, if at all possible, the vouchers go to heads of families, and raise the vouchers to 500 gallons or 3,000 KWHs, and include wood vouchers as another option where available.

A cord of wood is about $500. A cord in the long run supplies more BTUs than an equivalent cost of heating fuel. A cord (2,500 lbs) provides 7,000 BTUs per lb. or 17,500,000 BTUs. One gal. of stove oil has 135,000 BTUs; thus, 17.5 million divided by 135,000, gets about 130 gals worth of heating oil. If fuel oil costs $6.40 (Bethel price), it costs $830 to buy that 130 gals versus $500 for a cord of wood. Immediately, one has a $330 savings buying wood, or buys more BTUs with that $830 when using it all on wood.

Rural Alaska, as you know, always suffers the most when it comes to paying for heating

and electricity. You might have heard on KYUK radio or read in the Anchorage Daily News about some people in Bethel paying up to $800-plus monthly bills this winter for their heating. In villages around Bethel, people were burning trash, wood from abandoned buildings, and icy green brush from riversides.

Other villages have their own stories:

Kotlik

In Kotlik, a tribal council worker says nearly all community household are coming to the tribal council and asking for LIHEAP and/or emergency assistance. There are only 150 jobs for the 600 population. Stove oil costs $6.65 and gas is $7.25. Therefore, people that get pay checks first buy stove oil and food, and worry about bills later. Even wood gathering is hard to do, due to the cost of gasoline.

Nunam Iqua (Sheldon's Point)

As in Kotlik, a few jobs are available in Nunam per a tribal council worker, so most people cannot afford to buy heating fuel. Lucky for the village, there is a sandbar near the village where people can get wood to burn if they are able to get it. But elders who have little help are calling upon the tribal council for energy assistance every day, and such assistance is backlogged to November; they are even asking for any CITGO assistance. Nunam is assigned 11 emergency energy vouchers, but those are currently exhausted. People are asking for loans or try to borrow money to buy needed items and heating fuel, or to pay bills. One community member racked up $800 in electricity using an electric heater and oven when a toyostove broke down for a few days.

Hooper Bay

In Hooper Bay, the city manager says people in his village are "looking" for anything that will burn, whether cardboard, old shoes, clothing and any scrap of wood that becomes available. He said people are chain-sawing down unused city property buildings at night and taking the lumber home for wood. Still members in town have been coming all winter long to the city asking for any scraps of lumber that may become available. People are stealing wood from each other, the city manager said, and collecting and burning low-quality woods such as cottonwood gotten from the shoreline.

Nunapitchuk

A head of household from Nunapitchuk said he was getting tired of getting their stove oil stolen from their tank so they set an old bear trap below it. In the middle of one night they finally caught a thief, who howled loudly and made a ruckus when caught. But, by the time they went out to go check the trap, the villain had escaped loose. The head of household said they have less stove oil stolen now.

Examples of stove oil and gas costs in Y-K Delta villages:

<u>Mumtram Pikkai, Inc., Goodnews Bay, AK.</u>

$ 5.31 heating, $ 6.17 gas, plus 3% sales tax. This winter, Goodnews Bay is using up two years' supply of heating fuel. The village is very low on stove oil now, and will have to request for more stove oil from any local available supplies like the school. Price will

go up at the spring barge delivery.

Qanirtuuq, Inc., Quinhagak, AK.
$6.75 heating, $ 6.82 gas, plus 3% sales tax. The supplier was out of stove oil in February, but bought some from the LKSD School and AVEC.

Nunapitchuk Ltd.
$6.00 heating, $6.85 gas, plus 4% sales tax.

City of Upper Kalskag.
$6.50 for both heating and gas.

Iqfijouaq Co. Inc., Eek, AK.
$7.00 for bothheating and gas, plus 2% sales tax. Stove oil might not last to this coming spring.

Akiachak Fuel Sales, Inc.
$6.86 heating, $ 6.90 gas. Plus 5% sales tax.

Kokarmiut Corp., Akiak, AK.
$6.85 heating, $ 6.80 gas.

In light of the above examples, AVCP Housing is very grateful that you, our representatives in Juneau, are trying to work on a plan to help rural Alaskans deal with their high energy costs. The Sarah Palin-era Energy Dividend was of great assistance when it was enacted and distributed – many rural Alaskans then received a very great benefit. But today, high energy costs are unrelenting and rural residents still need relief in this area, since there is rarely any kind of long-lasting relief for this, even for the wider population of Alaska. The lack of relief is resulting in a low-state of anarchy in a village like Hooper Bay, but since it's involving only wood, criminal matters aren't being brought up.

Therefore, thank you very much for your thoughtfulness in developing SB 203. On behalf of the AVCP RHA Board of Commissioners and staff, I thank you for your continued assistance to the Yukon-Kuskokwim Delta region, other rural Alaska areas, and the rest of the state and its people.

Sincerely,

Ron Hoffman

BOARD OF COMMISSIONERS
ASSOCIATION OF VILLAGE COUNCIL PRESIDENTS
REGIONAL HOUSING AUTHORITY

RESOLUTION 12-05

A RESOLUTION SUPPORTING SB 203, THE ALASKA ENERGY RELIEF PLAN

WHEREAS; Rural Alaskans were hit with one of the coldest weather spans in the winter of 2011-2012, causing a major hardship for struggling families (Alaska had an average 5.8°F between November-January, but dropped to the -20s and -30s for up to two weeks at a time); and

WHEREAS; The Alaska Senate is proposing to utilize a portion of the State's $3.7 billion surplus to help Alaska families in coping with high energy prices via Senate Bill 203, and provide Alaskans with immediate energy relief through fuel vouchers and develop a program to help residents deal with high heating costs during the transition to more affordable energy supplies; and

WHEREAS; SB 203 would direct the Alaska Dept. of Revenue to send a voucher to every adult Permanent Fund Dividend recipient in the fall of 2012, which can be redeemed at the fuel distributor of their choice for either 250 gallons of heating oil, an equivalent amount of natural gas, or 1,500 KWH of electricity; and

WHEREAS; SB 203 calls for the State to evaluate several options for on-going energy relief and recommend by Oct. 1, 2012, the best or most viable program that can be put into effect for 2013 and beyond.

NOW, THEREFORE, BE IT RESOLVED That the AVCP RHA Board of Commissioners hereby supports SB 203, and wholeheartedly encourages the Alaska State Legislature to pass the bill as soon as possible and immediately send it to Gov. Sean Parnell for this signature.

CERTIFICATION

The foregoing resolution was passed by the Board of Commissioners of the Association of Village Council Presidents Regional Housing Authority in a duly called meeting where a quorum was present, this 23rd day of February, 2012, by a vote of 5 ayes, 0 nays and 0 abstaining.

RE: Letter of Support for Senate Bill 203

Dear Senator Thomas,

Bristol Bay Native Corporation strongly supports Senate Bill 203, the creation of an energy voucher program.

The high and unstable price of energy is a serious issue for families and businesses in the Bristol Bay region, and immediate relief is severely needed. The average price of heating fuel is $5.85 per gallon; the average price of electricity, based on PCE reports is $0.5967 per kWh.

Energy assistance is very important as it provides immediate relief to low-income families. We recognize the need for assistance for all Alaskans as a necessary short-term solution to any energy plan set forth. We know the importance of energy efficiency and conservation, and alternative energy policies, programs and projects that help offset the need for fossil fuels.

We recognize SB 203 requests the executive branch to evaluate program options for energy assistance beyond the temporary voucher program. To that point, we respectfully recommend that rural entities such as regional corporations and non-profits be included in those discussions, analyses and recommendations to the fullest extent possible.

Bristol Bay Native Corporation appreciates your concern with the high cost of energy, and supports your efforts in finding solutions to continue to provide relief until a transition to more affordable energy supplies is realized.

Sincerely,

Jason Metrokin
President & CEO

RE: Letter of Support for Senate Bill 203, "Energy Voucher"

Dear Mr. Thomas,

The Bristol Bay Native Association is writing to express support of Senate Bill 203, the creation of an energy voucher program.

The high and volatile price of energy is a serious issue for families and businesses in the Bristol Bay region, and immediate relief is severely needed. The average price of heating fuel is around $5.85 per gallon; and the average price of electricity, based on PCE reports, is around .5967 per kWh.

We are very familiar with the importance of energy assistance and the immediate relief it provides to low-income families as the administrator of LIHEAP & AKHAP programs for the region. In general, we recognize the need for assistance for all Alaskans as a necessary short-term solution to any energy plan set forth. We also recognize the importance of energy efficiency and conservation, and alternative energy policies, programs and projects that help offset the need for fossil fuels.

We recognize SB 203 requests the executive branch to evaluate program options for energy assistance beyond the temporary voucher program. To that point, we respectfully recommend that rural entities such as regional non-profits be included in those discussions, analyses and recommendations to the fullest extent possible.

The Bristol Bay Native Association appreciates your concern with the high cost of energy, and supports your efforts in finding solutions to continue to provide relief until a transition to more affordable energy supplies is realized.

Sincerely,

Ralph Andersen

RE: Senate Bill 203

Honorable Co-Chair Hoffman, Honorable Co-Chair Stedman:

Kawerak, Inc., is a regional Native non-profit, serving 20 Tribes in the Bering Strait. Kawerak supports SB203 because it will provide badly needed heating assistance next winter, and will help the state move forward towards an assistance program that truly meets our needs.

This winter is particularly difficult. January 2012 was the coldest month on record. Heating degree days are 23% above average. At the same time fuel oil costs an average of $6.33 / gallon across the region. Prices over $7 are not uncommon.

Today, high energy costs, aggravated by low income and high unemployment, are increasing the burden in our already economically distressed communities. As energy prices rise, the amount of money available for household necessities dwindles, and the quality of life is suffering as a consequence. SB203 provides the security we need for the coming year.

Kawerak supports section two of SB 203 because it moves us forward towards a program that better meets our needs. It directs the Governor's office to evaluate different ways to provide heating assistance, and to make recommendations to the legislature next session.

Kawerak requests legislators pass SB203 this session. It helps insure residents will have the energy they need next winter, and puts us on the course towards a program that meets Alaska's energy needs in years to come.

ALASKA STATE LEGISLATURE

SENATOR JOE THOMAS

Senate Bill 203:

"An Act establishing an energy assistance program in the Department of Revenue to issue an energy voucher to Alaska permanent fund dividend recipients; and relating to the analysis and recommendation of an energy assistance program by the governor."

Alaskans are struggling to heat their homes in the face of high energy costs. This crisis is under-cutting families and stifling local economies, particularly in communities with the harshest climates and highest fuel costs.

Senate Bill 203 provides Alaskans with energy relief through fuel vouchers this fall, and develops a program to help residents deal with high heating costs during the transition to more affordable energy supplies.

SB 203 directs the Alaska Department of Revenue to send a voucher to every adult Permanent Fund Dividend recipient in the fall of 2012, which can be redeemed at the fuel distributor or utility of their choice for either 250 gallons of heating oil, an equivalent amount of natural gas, or 1,500 KWH of electricity. By providing an equal amount of fuel to each adult, the voucher system accounts for the disparate cost of different fuels and prices in different locations.

Renters and others who certify that they do not pay directly for home heating oil, natural gas or electricity may request the reissuance of their voucher in the name of their landlord or a $250 cash payment.

The second section of the bill requires the governor to analyze two specific options for energy relief in FY14 and beyond: a "fuel price reduction program" and an "individual account program." The executive branch may also analyze alternatives to those options before making a recommendation. The analysis and recommendation are due back to the legislature by October 1, 2012.

The program recommended by the state must correlate the amount of assistance to the local cost of residential heating, taking into consideration the price of fuel and "heating degree days" in each community, as well as satisfy other requirements designed to ensure an efficient and equitable program.

SB 203 will provide needed relief this year, and develop a program to help families in the future. I ask for your support.

Senator Joe Thomas
February 17, 2012

Senate Bill 203 : Energy Relief for Alaskans

Purpose: to provide Alaskans with immediate energy relief and create a program to help residents deal with high energy costs during the transition to more-affordable energy supplies.

Section 1: State sends a voucher to every adult PFD recipient in the fall of 2012, which can be redeemed at a fuel distributor or utility for 250 gallons of heating oil, or for the natural gas BTU equivalent, or for 1,500 KWH of electricity.

- Fuel distributors apply to be added to the list of qualified distributors.
- Vouchers are numbered, state the recipient's name and are non-transferable.
- Vouchers may be redeemed at any qualified fuel distributor in the state.
- Fuel may be delivered to any address in the state.
- Recipients who certify that they do not pay directly for home heating oil, natural gas or electricity may return their vouchers to the department and receive either: a replacement voucher in the name of their landlord, or a check for $250.
- Distributors submit claims for reimbursement to the state that list voucher numbers, names of voucher owners, fuel delivery addresses and the retail price of fuel on the delivery date.
- The program will be administered by the Department of Revenue/AHFC

Section 2: Executive branch evaluates options and makes a recommendation for an energy assistance program for Alaskans in 2013 and beyond.

The analysis and recommendation are due October 1, 2012. The analysis will include evaluation of a "fuel price reduction" program, an "individual account" program and alternate options, as well as a recommendation for the best program that can be instituted in FY14:

<u>Fuel price reduction option:</u>

The state makes payments to fuel distributors to lower the price they charge Alaskans for residential heating fuel.

Distributors of heating oil and natural gas submit to the state proof of the wholesale purchase price for the fuel they distribute, and the state reimburses those distributors the amount necessary to effectively reduce that wholesale price a specified amount or to a specified price. Distributors receive this reimbursement for all fuel they sell in the state for residential heating. The executive branch analysis will include consideration of the limiting the number of gallons each Alaskan may purchase at the reduced rate.

---more---

Individual account option:

Alaskans apply through the annual PFD process and qualify for an amount of money to be deposited by the state in an account in their name at a fuel distributor or electric utility of their choice in their community. The amount of assistance varies depending on energy costs and heating degree days in each community.

The Permanent Fund Division creates an electronic system similar to "pick-click-give" through which applicants may select a fuel distributor or utility. Individuals who do not select a fuel distributor or utility receive a standard, statewide "base" amount of assistance in the form of a check to their PFD mailing addresses. The executive branch analysis will consider allowing Alaskans to deposit a portion of their PFD's into their fuel accounts, in addition to their energy assistance.

The executive branch analysis of the options and its recommended program must include evaluation of the following:

1. Whether the program can be structured so the resulting energy assistance will not be subject to federal taxation.
2. The estimated cost of the program in FY14 and for the following 4 years.
3. The cost of administering the program relative to the assistance provided to Alaskans.
4. The extent to which the program provides the most assistance to those Alaskans who have the highest heating costs.

The recommended program must include the following:

- Amount of assistance correlated to the cost of home heating in different communities.
- Program triggered by ANS crude oil price or a heating oil price, and total program funding level dependent on state revenue.
- Penalties for fraud similar to PFD provisions, including loss of future PFD's.
- Voluntary participation by fuel distributors.
- Administrative costs kept to a minimum.

NOTES:

1. Prices include city and borough sales tax, where applicable. If there is a varied cost structure, based on quantity, the price is for 200-400 gallons, delivered.

2. These prices are from one vendor in each community. In some communities, there may be other vendors with different prices.

3. In communities where fuel is barged in, prices are constant between deliveries. In communities on the highway system, prices are much more volatile and could change weekly.

BILL NO. SB 210

Analysis

SB 210 amends existing law on crimes of assault in the third degree if a person causes injury to a child under the age of 12. Current law reads under the age of 10 years.

This bill also adds a new section to existing statute to include crimes of endangering the welfare of a child in the first degree if, being a parent, guardian, or other person legally charged with the care of the child under 16 years of age, the person recklessly fails to provide adequate food or liquids to a child, causing protracted impairment of the child's health.

And lastly, the bill further defines "serious physical injury".

The fiscal impact of the passage of this legislation on the Department of Corrections is indeterminate. If passed, the Department of Corrections will monitor possible future fiscal impacts.

BILL NO. CSSB 210(JUD)

Analysis

This bill creates tougher penalties on crimes committed against a child. This bill impacts the Division of Motor Vehicles (DMV) by adding to the list of disqualifying offenses for school bus drivers. In addition to the current disqualifying offenses listed in AS 28.15.046, the DMV would be prohibited from issuing a school bus endorsement to someone who has been convicted of a newly created offense in SB 210 within 20 years of the time of application.

It is anticipated that this bill will have no fiscal impact on the Division of Motor Vehicles (DMV).

FISCAL NOTE #5

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 210(JUD)

Analysis

Senate Bill 210 amends the definitions of certain crimes, including assault and endangering the welfare of a minor, by making certain activities either new crimes or more serious crimes. This could have the effect of changing the number and types of criminal cases that are filed with and handled by the court system.

Although the court does not anticipate a significant increase in new cases or in felony case filings, the changes made in this bill will likely result in at least some changes in the number or types of fiings. The precise impact of the changes is speculative, however, and the court therefore submits an indeterminate fiscal note.

FISCAL NOTE #4

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 210(JUD)

Analysis

This bill amends AS 11.41.200(a) by adding several components regarding children to the definitions of assault in the first, second, and third degrees. Assault in the first degree is modified by including the following: an adult *intentionally* causing "serious bodily harm" to a child under 16 years of age with a disability, an adult *recklessly* causing "serious bodily harm" to a child under 12 years of age, and an adult *recklessly* causing "serious bodily harm" on multiple occasions to a child under the age 16 with a disability. Assault in the first degree is a class A felony that carries a sentence of up to 20 years imprisonment.

Assault in the second degree is modified by including the following: an adult *knowingly* causing serious "bodily harm" to a child under 16 years of age with a disability, an adult *recklessly* causing "physical injury" to a child under 12 years of age, and an adult recklessly causing "physical injury" on multiple occasions to a child under the age of 16 with a disability. Assault in the second degree is a class B felony that carries a sentence of up to 10 years imprisonment.

Assault in the third degree is modified by changing the age range, from 10 years of age to 12 years of age, when an adult causes physical injury to a child and the injury would cause a reasonable caregiver to seek medical attention from a healthcare professional and changes the age arrange from 10-16 years of age to 12-16 years of age when an adult *knowingly* causes "physical injury to a child and the injury reasonably requires medical treatment. Assault in the third degree is a class C felony that carries a sentence of up to five years imprisonment.

Additionally, this bill amends the crime of endangering the welfare of a minor by including exposing the child to various controlled substances. Penalties for violation of this provision range from a class A misdemeanor to a class B felony with a potential sentence of up to 10 years imprisonment. This bill also makes several changes to the statutes defining criminal non-support by including monetary support ordered in another jurisdiction and basic sustenance to the definition of "support," among others.

Finally, this bill makes changes to AS 12.55.155 by adding as an aggravator for sentencing crimes that resulted in serious bodily harm to a child that resulted in extended or substantial impairment to the child's mental health.

Although the Public Defender Agency cannot predict the number of new cases that will be charged nor the number of cases that will be upgraded to more serious felonies under this bill, these modifications are likely to increase the level, and therefore the cost, at which these cases are charged and litigated. The Agency, therefore, submits an indeterminate fiscal note.

FISCAL NOTE #3

STATE OF ALASKA **BILL NO.** CSSB 210(JUD)
2012 LEGISLATIVE SESSION

Analysis

This bill amends AS 11.41.200 (Assault in the first degree) by adding sections to include a person 18 years of age or older, causing serious bodily harm to a child under the age of 16 years who has a disability, or a child under the age of 12 years. The bill also amends AS 11.41.210 (Assault in the second degree) by making similar changes.

The bill amends AS 11.51.100 (Endangering the welfare of a child in the first degree) by adding a section making it a crime to recklessly expose a child to the unlawful manufacture, use, display, or delivery of a schedule IA – VIA controlled substance, and by setting new penalties.

The bill makes changes to AS 11.51.120 (Criminal nonsupport) regarding monetary support and necessary food and water.

The bill amends AS 12.55.155 (Factors in aggravation and mitigation) by adding a new section regarding children who were seriously harmed that resulted in protracted and substantial impairment of the child's mental health.

The bill amends AS 28.15.046 (licensing of school bus drivers) to prevent the Department of Administration, Division of Motor Vehicles, from issuing a license to an applicant who has been convicted of "Endangering the welfare of a minor in the first degree" in the previous 20 years.

Finally, this bill amends AS 47.10.086 (Reasonable efforts) and AS 47.10.990 (Definitions) by adding sections referencing "Serious bodily harm."

Passage of this legislation will have no fiscal impact on the Division of Alaska State Troopers.

FISCAL NOTE #2

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 210(JUD)

Analysis

SB 210 makes changes to the substantive assault law by adopting new crimes addressing harm to children under 12 years old and to disabled children under 16 years old.

It also adopts new crimes prohibiting exposure to the use, manufacture, display, or delivery of controlled substances. It also makes changes in the crime of criminal nonsupport, and sentencing factors for crimes involving child victims.

The fiscal impact to Department of Law is indeterminate.

FISCAL NOTE #1

STATE OF ALASKA **BILL NO.** CSSB 210(JUD)
2012 LEGISLATIVE SESSION

Analysis

This bill amends AS 11.41.200(a) by adding several components regarding children to the definitions of assault in the first, second, and third degrees. Assault in the first degree is modified by including the following: an adult *intentionally* causing "serious bodily harm" to a child under 16 years of age with a disability, an adult *recklessly* causing "serious bodily harm" to a child under 12 years of age, and an adult *recklessly* causing "serious bodily harm" on multiple occasions to a child under the age 16 with a disability. Assault in the first degree is a class A felony that carries a sentence of up to twenty (20) years imprisonment.

Assault in the second degree is modified by including the following: an adult *knowingly* causing serious "bodily harm" to a child under 16 years of age with a disability, an adult *recklessly* causing "physical injury" to a child under 12 years of age, and an adult recklessly causing "physical injury" on multiple occasions to a child under the age of 16 with a disability. Assault in the second degree is a class B felony that carries a sentence of up to ten (10) years imprisonment.

Assault in the third degree is modified by changing the age range, from 10 years of age to 12 years of age, when an adult causes physical injury to a child and the injury would cause a reasonable caregiver to seek medical attention from a healthcare professional and changes the age arrange from 10-16 years of age to 12-16 years of age when an adult *knowingly* causes "physical injury to a child and the injury reasonably requires medical treatment. Assault in the third degree is a class C felony that carries a sentence of up to five (5) years imprisonment.

Additionally, this bill amends the crime of endangering the welfare of a minor by including exposing the child to various controlled substances. Penalties for violation of this provision range from a class A misdemeanor to a class B felony with a potential sentence of up to ten (10) years imprisonment. This bill also makes several changes to the statutes defining criminal non-support by including monetary support ordered in another jurisdiction and basic sustenance to the definition of "support," among others.

Finally, this bill makes changes to AS 12.55.155 by adding as an aggravator for sentencing crimes that resulted in serious bodily harm to a child that resulted in extended or substantial impairment to the child's mental health.

This bill creates new crimes that will have a fiscal impact on the Office of Public Advocacy. At this point it is impossible to predict what that impact will be with regards to the number of new cases that will be charged or the number of cases that will be upgraded to more serious felonies under this bill, these modifications are likely to increase the level, and therefore the cost, at which these cases are charged and litigated. The Office of Public Advocacy, therefore, submits an indeterminate fiscal note.

CS FOR SENATE BILL NO. 210(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATOR MCGUIRE

A BILL

FOR AN ACT ENTITLED

"An Act relating to crimes against children; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 11.41.220(a) is amended to read:

(a) A person commits the crime of assault in the third degree if that person

(1) recklessly

(A) places another person in fear of imminent serious physical injury by means of a dangerous instrument;

(B) causes physical injury to another person by means of a dangerous instrument; or

(C) while being 18 years of age or older,

(i) causes physical injury to a child under **12** [10] years of age and the injury would cause a reasonable caregiver to seek medical attention from a health care professional in the form of diagnosis or treatment;

(ii) causes physical injury to a child under **12** [10] years

of age on more than one occasion;

(2) with intent to place another person in fear of death or serious physical injury to the person or the person's family member, makes repeated threats to cause death or serious physical injury to another person;

(3) while being 18 years of age or older, knowingly causes physical injury to a child under 16 years of age but at least **12** [10] years of age and the injury reasonably requires medical treatment;

(4) with criminal negligence, causes serious physical injury under AS 11.81.900(b)(56)(B) to another person by means of a dangerous instrument; or

(5) commits a crime that is a violation of AS 11.41.230(a)(1) or (2) and, within the preceding 10 years, the person was convicted on two or more separate occasions of crimes under

(A) AS 11.41.100 - 11.41.170;

(B) AS 11.41.200 - 11.41.220, 11.41.230(a)(1) or (2), 11.41.280, or 11.41.282;

(C) AS 11.41.260 or 11.41.270;

(D) AS 11.41.410, 11.41.420, or 11.41.425(a)(1); or

(E) a law or ordinance of this or another jurisdiction with elements similar to those of an offense described in (A) - (D) of this paragraph.

*** Sec. 2.** AS 11.51.100(a) is amended to read:

(a) A person commits the crime of endangering the welfare of a child in the first degree if, being a parent, guardian, or other person legally charged with the care of a child under 16 years of age, the person

(1) intentionally deserts the child in a place under circumstances creating a substantial risk of physical injury to the child;

(2) leaves the child with another person who is not a parent, guardian, or lawful custodian of the child knowing that the person is

(A) registered or required to register as a sex offender or child kidnapper under AS 12.63 or a law or ordinance in another jurisdiction with similar requirements;

(B) charged by complaint, information, or indictment with a

violation of AS 11.41.410 - 11.41.455 or a law or ordinance in another jurisdiction with similar elements; or

(C) charged by complaint, information, or indictment with an attempt, solicitation, or conspiracy to commit a crime described in (B) of this paragraph; [OR]

(3) leaves the child with another person knowing that the person has previously physically mistreated or had sexual contact with any child, and the other person causes physical injury or engages in sexual contact with the child**; or**

(4) recklessly fails to provide adequate food or liquids to a child, causing protracted impairment of the child's health.

*** Sec. 3.** AS 11.51.100(f) is amended to read:

(f) Endangering the welfare of a child in the first degree under (a)(1)**, (2), or (4)** [OR (2)] of this section is a class C felony.

*** Sec. 4.** AS 11.81.900(56) is amended to read:

(56) "serious physical injury" means

(A) physical injury **to a person of any age** caused by an act performed under circumstances that create a substantial risk of death; [OR]

(B) physical injury **to a person of any age** that causes serious and protracted disfigurement, protracted impairment of health, protracted loss or impairment of the function of a body member or organ, or that unlawfully terminates a pregnancy; **or**

(C) physical injury to a person under 12 years of age that causes

(i) serious disfigurement;

(ii) impairment of health, by serious bruising or other injury, that reasonably requires medical evaluation or treatment by a health care professional;

(iii) loss or impairment of the function of a body member or organ; or

(iv) serious impediment of blood circulation or breathing;

* **Sec. 5.** This Act takes effect July 1, 2012.

Senator Lesil McGuire

Sponsor Statement for 210

"An Act relating to crimes against children."

On February 8, 2012 the Children's Justice Task Force (CJA) a federally-mandated, state-wide multidisciplinary group presented their findings to the Joint Senate Judiciary and HESS Committees with their system recommendations for improvement through criminal legislation. I became aware through this presentation, research, and other important conversations that we have shortcomings in the current criminal laws regarding the prosecution of harm to children.

Those that suffer from these short comings are Alaska's children and the numbers are staggering. In 2008, approximately 12,400 children were likely victims of at least one incident of maltreatment, which breaks down to 34 children per day. In the instance of a child death, 1 out of every 5 was related to maltreatment.

SB 210 works with the recommendations from CJA to create tougher penalties on crimes committed against a child. The bill will create increased criminal liability for assaults to children by modifying the current definition of "serious physical injury" and increases penalties when a parent intentionally withholds adequate food or liquids.

Together, the Legislature can assist our future generations by providing them with laws that protect their rights and create safer communities for their growth and development. I urge your support for this legislation.

BOARD RESOLUTION OF THE CHILDREN'S PLACE

ADOPTED ON MARCH 14, 2012

The undersigned, being the Board Chair and Executive Director of The Children's Place **"The Children's Place"**, a 501(c)(3) private, not for profit agency providing support and coordination of services related to the evaluation, investigation, and treatment of child abuse to the communities in the Matanuska-Susitna Valley, with the approval, direction, and concurrence of the Board of Directors of The Children's Place **"The Board of Directors"**, hereby sign the following resolution in support of SB 210, "An Act Relating to Crimes Against Children":

WHEREAS:

1. The Children's Place and the Board of Directors has become aware through presentation, research, and other important conversations brought by the Children's Justice Act Task Force that the State of Alaska has shortcomings in the current criminal laws regarding the prosecution of harm to children, and;
2. The Children's Place and the Board of Directors are aware that SB 210 works with the recommendations from the Children's Justice Act Task Force to create tougher penalties on crimes committed against children, and;
3. The Children's Place and the Board of Directors knows that in 2008, over 12,000 children were likely victims of at least one type of child maltreatment – approximately 34 children each day; that 1 out of every 5 infant deaths in Alaska Is related to maltreatment; that Alaska has one of the highest rates of maltreatment-related infant mortality in the nation; and that child abuse has life-long implications including adverse effects on adult physical and mental health, and;
4. The Children's Place and the Board of Directors believes that young children may be unable to describe what has happened to them (due to age, developmental status or knowledge base) in a way that fits Alaska's current assault or strangulation statues, and;
5. The Children's Place and the Board of Directors is aware that in some situations, current Alaska state laws do not allow perpetrators of serious child physical abuse and neglect to be held appropriately accountable, and;
6. The Children's Place and the Board of Directors believes that criminal penalties for harming children should be higher than those penalties for harming adults who are much more likely to be able to defend themselves, and;
7. The Children's Place and the Board of Directors requests the Legislature assist our future generations by providing them with laws that protect their rights and create safer communities for their growth and development.

IT IS RESOLVED THAT:

The Children's Place and the Board of Directors urge your support for this legislation.

Kibe Lucas, Board Chair
The Children's Place

Jennifer Burkmire, Executive Director
The Children's Place

of age on more than one occasion;

(2) with intent to place another person in fear of death or serious physical injury to the person or the person's family member, makes repeated threats to cause death or serious physical injury to another person;

(3) while being 18 years of age or older, knowingly causes physical injury to a child under 16 years of age but at least **12** [10] years of age and the injury reasonably requires medical treatment;

(4) with criminal negligence, causes serious physical injury under AS 11.81.900(b)(56)(B) to another person by means of a dangerous instrument; or

(5) commits a crime that is a violation of AS 11.41.230(a)(1) or (2) and, within the preceding 10 years, the person was convicted on two or more separate occasions of crimes under

(A) AS 11.41.100 - 11.41.170;

(B) AS 11.41.200 - 11.41.220, 11.41.230(a)(1) or (2), 11.41.280, or 11.41.282;

(C) AS 11.41.260 or 11.41.270;

(D) AS 11.41.410, 11.41.420, or 11.41.425(a)(1); or

(E) a law or ordinance of this or another jurisdiction with elements similar to those of an offense described in (A) - (D) of this paragraph.

* **Sec. 2.** AS 11.51.100(a) is amended to read:

(a) A person commits the crime of endangering the welfare of a child in the first degree if, being a parent, guardian, or other person legally charged with the care of a child under 16 years of age, the person

(1) intentionally deserts the child in a place under circumstances creating a substantial risk of physical injury to the child;

(2) leaves the child with another person who is not a parent, guardian, or lawful custodian of the child knowing that the person is

(A) registered or required to register as a sex offender or child kidnapper under AS 12.63 or a law or ordinance in another jurisdiction with similar requirements;

(B) charged by complaint, information, or indictment with a

violation of AS 11.41.410 - 11.41.455 or a law or ordinance in another jurisdiction with similar elements; or

(C) charged by complaint, information, or indictment with an attempt, solicitation, or conspiracy to commit a crime described in (B) of this paragraph; [OR]

(3) leaves the child with another person knowing that the person has previously physically mistreated or had sexual contact with any child, and the other person causes physical injury or engages in sexual contact with the child**; or**

(4) recklessly fails to provide adequate food or liquids to a child, causing protracted impairment of the child's health.

*** Sec. 3.** AS 11.51.100(f) is amended to read:

(f) Endangering the welfare of a child in the first degree under (a)(1)**, (2), or (4)** [OR (2)] of this section is a class C felony.

*** Sec. 4.** AS 11.81.900(56) is amended to read:

(56) "serious physical injury" means

(A) physical injury **to a person of any age** caused by an act performed under circumstances that create a substantial risk of death; [OR]

(B) physical injury **to a person of any age** that causes serious and protracted disfigurement, protracted impairment of health, protracted loss or impairment of the function of a body member or organ, or that unlawfully terminates a pregnancy; **or**

(C) physical injury to a person under 12 years of age that causes

(i) serious disfigurement;

(ii) impairment of health, by serious bruising or other injury, that reasonably requires medical evaluation or treatment by a health care professional;

(iii) loss or impairment of the function of a body member or organ; or

(iv) serious impediment of blood circulation or breathing;

* **Sec. 5.** This Act takes effect July 1, 2012.

FISCAL NOTE #2

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSSB 217(L&C)

Analysis

SB 217 establishes standards and guidelines for an audit of a licensed pharmacy in the state of Alaska performed by an insurer, managed care company, a third-party payor, pharmacy manager or any entity that represents such companies.

This bill will have no fiscal impact to the Division of Corporation, Business and Professional Licensing.

FISCAL NOTE #1

STATE OF ALASKA **BILL NO.** CSSB 217(L&C)
2012 LEGISLATIVE SESSION

Analysis

The intent of this bill is to establish standards for an audit of pharmacy records carried out by an insurer, a managed care company, a third-party payor, a pharmacy benefits manager, a health plan administered by the state, or any entity that represents such companies.

The division of Retirement and Benefits actuarial (Buck Consulting) does not anticipate there will be any financial impact on the AlaskaCare health plans.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE LABOR AND COMMERCE COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act establishing procedures and guidelines for auditing pharmacy records; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

INTENT. This Act is intended to establish standards for an audit of pharmacy records carried out by an insurer, a managed care company, a third-party payor, a pharmacy benefits manager, a health plan administered by the state, or any entity that represents such companies.

*** Sec. 2.** AS 08.80 is amended by adding a new section to read:

Sec. 08.80.477. Pharmacy audits. (a) When an audit of the records of a pharmacy licensed in this state is conducted by an insurer, managed care company, hospital or medical service corporation, third-party payor, or pharmacy benefits manager,

(1) for each audit cycle, the auditor shall provide the pharmacy or

pharmacist with notice of the audit at least two weeks before conducting the initial on-site audit;

(2) unless the pharmacy and the auditor agree otherwise, the audit may not be scheduled to occur during the first seven business days of a month because of the high volume of prescriptions that are filled during that time;

(3) an insurer, managed care company, hospital or medical service corporation, third-party payor, or pharmacy benefits manager may not conduct an audit within 90 days after an audit in which no errors were found; in this paragraph, "error" does not mean a clerical error, record keeping error, or typographical error;

(4) the audit of a claim shall occur within two years after the date the claim was submitted;

(5) if the audit involves clinical or professional judgment, the audit must be conducted by or in consultation with a pharmacist licensed in this or another state;

(6) each pharmacy shall be audited using the same standards and parameters as other similarly situated pharmacies;

(7) an auditor may not use the accounting practice of extrapolation to establish an overpayment or underpayment or for calculating recoupment or penalties;

(8) a finding of overpayment or underpayment by the auditor must be based on an actual overpayment or underpayment and may not be based on a projection based on the number of patients served who have a similar diagnosis or on the number of similar orders or refills for similar drugs;

(9) calculations of overpayment by an auditor may not include dispensing fees unless a prescription was not dispensed, a physician denied authorization to dispense the prescription, or the dispensing violated a term of a contract;

(10) an auditor may not assess a charge-back, recoupment, or other penalty against a pharmacy solely because a prescription is mailed or delivered at the request of a patient as part of a routine business practice of the pharmacy;

(11) to the extent that an audit finds clerical or record keeping errors in a required document or record, the pharmacy may not be subject to recoupment unless

the clerical or record keeping error results in actual financial harm to an insurer, managed care company, hospital or medical services corporation, third-party payor, pharmacy benefits manager, or a customer;

(12) the preliminary audit report must be delivered to the pharmacy within 120 days after the completion of the audit;

(13) interest may not accrue from the date of completion of the audit to the delivery date of the preliminary audit report, unless an auditor finds proof of intent to commit fraud;

(14) a pharmacy shall be allowed at least 30 days following receipt of a preliminary audit report to produce documentation to address a discrepancy found during the audit; a pharmacy may use any record, including the records of a hospital, physician, or other health care provider, or other written or electronic record to validate a pharmacy record;

(15) the insurer, managed care company, hospital or medical service corporation, third-party payor, or pharmacy benefits manager shall establish a written appeal process by which a pharmacy may appeal an unfavorable preliminary or final audit report;

(16) the final audit report must be delivered to the pharmacy within 90 days after receipt of the preliminary audit report or final appeal;

(17) the auditor may not receive compensation based on the percentage of the amount recovered by the auditor;

(18) the auditor shall provide a copy of the final report to a health benefit plan sponsor affected by the audit;

(19) patient information accessed in the course of an audit is confidential and may not be used for marketing purposes.

(b) This section does not apply to

(1) a criminal investigation; or

(2) state Medicaid programs.

(c) In this section, "health benefit plan" has the meaning given in AS 21.54.500.

* **Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to

read:

APPLICABILITY. This Act applies to pharmacy audits conducted after the effective date of this Act.

* **Sec. 4.** This Act takes effect January 1, 2013.

HCCMCA
HEALTHCARE COST MANAGEMENT
CORPORATION

April 13, 2012

Senate Finance Committee
Honorable Bert Stedman, Chair
120 4th Street State Capitol, Rm. 516
Juneau, AK 99801-1182

Dear Senator Stedman,

HCCMCA is a coalition of over 35 Alaska and Northwest based self-funded and employer-sponsored health benefit plans. These funds represent over 65,000 covered lives in Alaska.

I was prepared to testify this morning via teleconference regarding SB 217, with concerns this bill does not do enough to protect the legal and fiduciary integrity of trustees and administrators of our Taft-Hartley and other trust funds. Many of our concerns are similar to those Director Jim Puckett described in his testimony.

Unfortunately, a copy of the most recent CS being considered by the committee was not available here at the Fairbanks LIO. Nevertheless, based on the testimony and description given, HCCMCA's position is that the proposed CS changes do not go far enough. For example, we think the provision limiting the number of scripts that can be audited to 75 during a single audit is overly restrictive and burdensome for auditors contracted by our health plans.

Regarding overall policy questions, in Section 2, we submit Alaska boroughs, municipalities and school districts should be included in the definition of governmental agencies (entities?) which are exempted from coverage by the bill. We also believe the committee should evaluate whether ERISA preempts application of this statute to Taft-Hartley trust funds.

In sum, we prefer SB 217 be held in committee and a work group formed allowing interested parties to better evaluate and understand the issues during the interim.

Feel free to contact me if you have any questions.

Sincerely,

Fred G. Brown
Executive Director

Senate Bill 217 Pharmacy Audits

Sponsor Statement

Passage of Senate Bill 217 will establish procedures and guidelines for auditing pharmacy records so that all pharmacies are held to the same standards. It has been introduced by request of the Alaska Pharmacists Association.

The legislation would help assure all pharmacies in the state face reasonable audits, but it would especially help small-business pharmacies who, because of their smaller pool of assets, may face dire consequences due to an unreasonable audit.

Senate Bill 217 would set requirements for auditing pharmacy records by an insurer, a managed care company, a third-party payor, or a pharmacy benefits manager. Where there are disagreements between an auditor and a pharmacy, the measure would allow for an appeal in the case.

Pharmacists acknowledge that audits are a good tool to protect the public and detect fraud or abuse, but they say that, sometimes, audits may be unreasonable and used in a way to deprive them of fair reimbursement for their services. There may be times when pharmacists may give someone the right drug in the right dose, but because of a clerical or typographical error in billing, they may not get paid what they are due.

Senate Bill 217 is aimed at protecting the public from potential abuse, while at the same time assuring that pharmacists face fair, reasonable and consistent audits.

Supporters of this measure include the Alaska Pharmacists Association, the National Community Pharmacists Association, and the National Association of Chain Drug Stores.

CSSB 217 Pharmacy Audits

Sectional Analysis

Section 1. States the intent of the bill is to set standards for auditing pharmacy records.

Section 2. Amends Chapter 08.80, Pharmacists and Pharmacies, by adding a new section, 08.80.477, that sets out requirements for auditing pharmacy records by an insurer, a managed care company, a third-party payor, a pharmacy benefits manager, a health plan administered by the state, or an entity that represents such companies.

Some of those procedures cover:

- Notice requirements for audits;
- Scheduling of audits;
- Retrospective limitations;
- Auditor qualifications;
- Audit standards;
- Errors;
- Access to previous reports;
- Limits on providing audit reports;
- Prohibitions against extrapolation and projections;
- Requiring findings of actual overpayment;
- Exclusion of dispensing fees;
- Time limits relating to reports;
- Documentation;
- Appeals;
- Regulating auditor compensation;
- Limiting accrual of interest;
- Excluding applicability to criminal investigations or investigations by a governmental agency.

Section 3. Applies the bill to audits that occur after the immediate effective date set in Section 4.

Section 4. Provides for an immediate effective date.

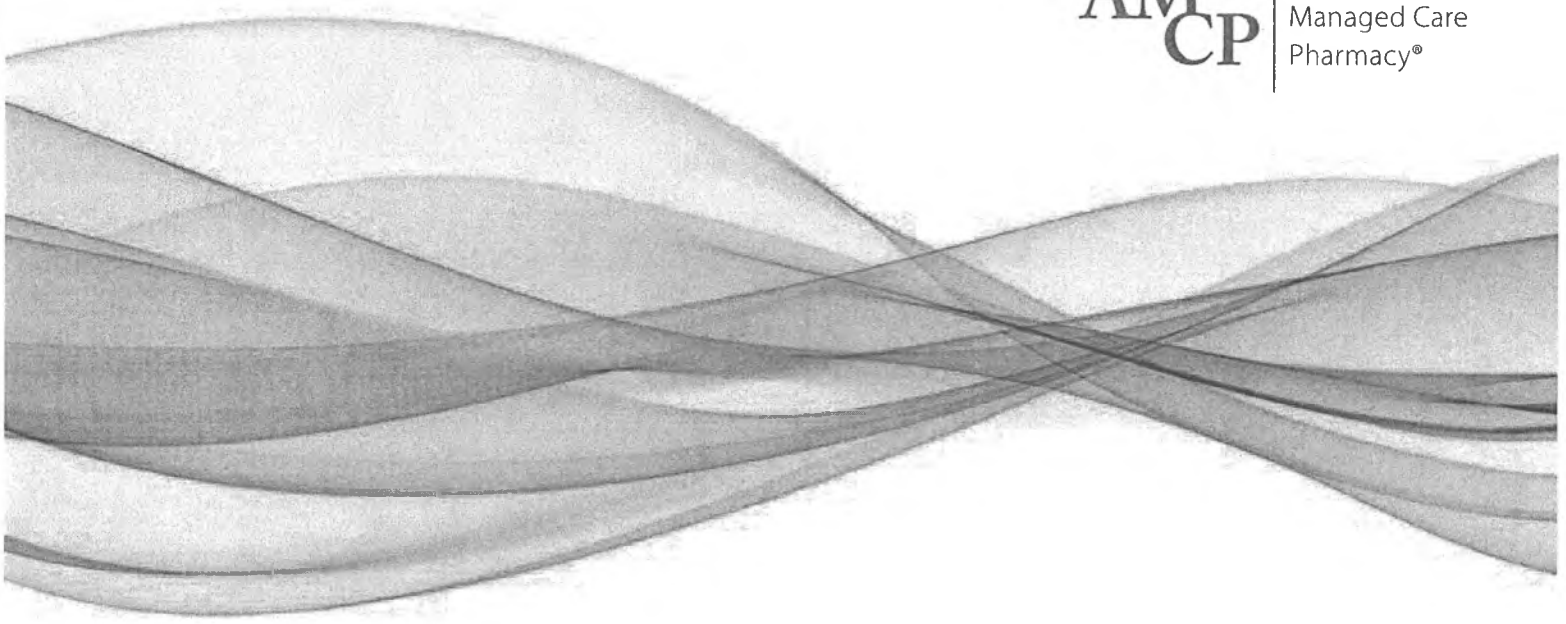
Senate Bill 217 Pharmacy Audits



Summary of Changes
SB 217 \A to CSSB 217 (L&C) \B

Sec. 1.

- P.1, line 8. The word "such" is replaced by "those" for clarity.

Sec. 2.

- P.2, line 7. A new paragraph (3) is added limiting to 75 the number of prescriptions an auditor may audit in a single audit.
- P.2, line 15. A new paragraph (7) is added to limit the audit to requirements no stricter than state or federal law.
- P.2, line 18. The phrase "may not be the basis for finding of fraud" replaces "may not constitute fraud."
- P. 2, line 21. The phrase "provide information only" replaces "only provide information" for grammatical correctness and clarity.
- P.2, line 13. A new paragraph (13) is added to ensure that a prescription mailed or delivered at the request of a patient may not be the basis for a charge-back, recoupment or penalty.
- P. 3, line 7. Documented phone calls from a prescriber or prescriber's agent, is added to the list of items that can be used to validate a pharmacy record.
- P. 3, lines 25 – 27. Subsection (b) is rewritten to clarify that this bill does not apply to Medicaid audits.

ACKNOWLEDGEMENTS

The Academy of Managed Care Pharmacy wishes to thank the AMCP Community Pharmacy Outreach Council's Task Force on Model Audit Guidelines for providing their expertise in developing this document. AMCP also wishes to thank staff members from the American Pharmacists Association, the Food Marketing Institute and the National Community Pharmacists Association for their contributions to this project.

Members of the AMCP Community Pharmacy Outreach Advisory Council Task Force

Julie Lenhard, PharmD, RPh, Chair
Wegmans Food Markets
Member of the AMCP Community Pharmacy Outreach Advisory Council

Lowell Anderson, DSc
Center for Leading Healthcare Change, University of Minnesota
Appointed by the American Pharmacists Association

John Cronin, PharmD, JD
Fredrickson Mazeika & Grant LLP
Appointed by the American Society of Pharmacy Law

Leanne Kent, CPhT
The Kroger Co.
Appointed by the Food Marketing Institute

Brian J. Correia, CFE
CVS Caremark
Appointed by AMCP

Charlie Oltman, MBA, CHC
Target
Appointed by AMCP

G. William Strein, MSPH, RPh
Medco Health Solutions
Member of the AMCP Community Pharmacy Outreach Advisory Council

Michael Tocco, MEd, RPh
Integrated Pharmacy Solutions, Inc.
Member of the AMCP Community Pharmacy Outreach Advisory Council

Theresa Tolle, FAPhA, RPh
Baystreet Pharmacy
Appointed by the American Pharmacists Association

Lonny Wilson, DPh
Pharmacy Providers of Oklahoma
Appointed by the National Community Pharmacists Association

Carolyn Ha, PharmD
Associate Director, Professional Affairs
National Community Pharmacists Association

April Shaughnessy, RPh, CAE, Project Staff Liaison
Director, External Relations

INTRODUCTION

In 2009, the Academy of Managed Care Pharmacy (AMCP) established the Community Pharmacy Outreach Advisory Council to address issues that managed care pharmacy and community pharmacy share and that would lead to an enhanced relationship. The Council identified auditing of pharmacy claims as a high priority issue largely because of the friction it causes for both community and managed care pharmacy. The Council conducted a poll to learn about the issues that both practices had with auditing and determined that model guidelines for pharmacy claims auditing could serve as the foundation to address the issue.

The *AMCP Model Audit Guidelines for Pharmacy Claims* are the result of over a year-long effort by a Task Force comprised of pharmacists in managed care organizations[1] (MCOs), community practice and law; auditing administration; third party management; and, network administration.

It is important to note that while these *Guidelines* were developed for MCOs and community pharmacies as a way to improve the relationship between the parties, the contract between the MCO and the pharmacy should define the actual audit process. These *Guidelines* are offered to assist MCO's in developing a pharmacy claims audit program, and to help pharmacy providers to better understand the audit requirements and process.

THE ROLE OF AUDITS

Historically, health care services, including prescription medications, were paid by the patient as an out of pocket expense. These payments may then have been reimbursed by a third party or self-funded insurance plan. Over the twentieth century health care insurance evolved from indemnity pre-paid insurance, to managed care emerging as a major mechanism of coverage. The growth of plan design, administration and payment by third-party entities, coupled with increases in the total costs of care, have required oversight of plans and their financial services. Audits of claims made by pharmacies and payments made to pharmacies are included in the oversight process.

The auditing of pharmacy claims serves two main purposes: 1) detecting fraud, waste and abuse, and 2) validating data entry and documentation to ensure they meet regulatory and contractual requirements.

Fraud, Waste and Abuse

While a pharmacy may find audits unpleasant and disruptive as they are currently conducted, all providers need to recognize that audits remain the primary method presently available for MCOs to determine network pharmacy compliance and to identify fraud, waste and abuse (FWA) within the prescription drug benefit, as these contribute to the rising cost of health care.

With the launch of Medicare Part D in 2006 came an increase in federal funding of pharmacy benefits and a corresponding increase in the scrutiny of pharmacy claims and billing practices. Under the Centers for Medicare and Medicaid's (CMS) oversight of federally funded programs, plans and provider networks are subject to performance monitoring for compliance with and adherence to fraud, waste and abuse requirements that are well defined in federal law. The federal standards have led to an increasing level of oversight of pharmacy claims in commercial plans as well, and are reaching into the specialty pharmacy practices associated with long term care and home infusion pharmacies. Regardless of professional setting, an appreciation of the changing environment in which MCOs operate is essential for contemporary pharmacy practice and operation.

[1] Managed Care Organization (MCO) is used throughout the *Guidelines* and is defined as all types of MCOs including, but not limited to, health plans, PBMs, HMOs and contracted agents.

Data Entry and Documentation

Another purpose of audits is to validate the correct entry of required pharmacy claims information. These are the audits most commonly experienced by MCOs and pharmacies, and are among those that cause the most difficulties.

The misunderstandings that arise from data verification are often preventable. The MCO should supply the pharmacy provider with a document that defines the requirements on which it may base an audit. This document must be updated and communicated as changes occur. The actual audits should be conducted in a manner that leads to continuous quality improvement of the services of the provider, rather than as a source of revenue. Further, the provider must review and be comfortable with these documents before it agrees to a contract. Once a contract is entered into, it is incumbent on the provider to commit to review and comply with the requirements.

PHILOSOPHY and RESPONSIBILITIES

The audit is both a contract management essential and a public relations opportunity for the MCO. It is possible that the in-pharmacy audit is the only time the pharmacy provider and a representative of a MCO will ever meet in an official capacity. The way in which an audit is conducted can contribute substantially to the pharmacy staff's attitude about the MCO, and the MCO representative's attitude about the pharmacy's practice, and can affect the ongoing working relationship between the two parties and ultimately, patient care.

The audit experience, regardless of outcome, is often shared broadly with colleagues in the pharmacy practice community and back to the MCO. Experiences the pharmacy staff has with auditing, drug benefit design, benefit management, and help desk interaction can affect the attitude of the pharmacy staff towards the MCO. Therefore, the pharmacy staff is in a position to affect consumer perception of the health benefit broadly and the MCO's drug benefit specifically.

The audit provides an important opportunity for the MCO to market itself to the pharmacy staff by sharing the goals of the benefit design, discussing the importance of adherence to the contract, and gathering important market information from the pharmacy. The net result can be an improved relationship between the parties.

It is much easier for the pharmacy staff to understand the requirements of a MCO subject to audit if the goals of the drug benefit are shared. In many cases these goals are quite simple, e.g., target generic dispensing rates, adherence to formulary and compliance.

The audit process is a means of ensuring that pharmacy procedures and reimbursement mechanisms are consistent with regulatory and MCO contractual requirements. With increasing oversight of the cost of the many elements of health care, the frequency and nature of audits of pharmacy claims can only be expected to increase.

It is imperative that pharmacists-in-charge, and their staff, understand the dispensing and billing requirements and the implications of non-compliance. The pharmacy organization should consider appointing a "compliance officer" for the purpose of monitoring regulatory and MCO requirements and to ensure optimal performance of pharmacies.

A properly designed audit process should be transparent and have a fair design and implementation. Such a structure goes a long way towards fulfilling its purpose of assuring the performance of the pharmacy network. The auditors and the pharmacy staff must understand the elements of the audit process.

There are several considerations that will positively affect audit performance outcomes:

PHILOSOPHY and RESPONSIBILITIES

continued

Bilateral understanding and adherence to contract obligations: Both parties to the contract, and their representatives, should understand the obligations under the contract. This requires affirmative action of both parties.

Transparency of audit guidelines, dispensing requirements and process: It is important to the process that the MCO makes the audit elements and audit process available to the network in a clearly defined usable manner, and updates this information when changes are made. If included in the contract, it is helpful if these porocesses appear in a separate section labeled as "audit elements." Without this transparency, the pharmacy may be left with the assumption that the audit is merely a way for the MCO to make more money. In the interest of compliance with the requirements, the MCO should routinely offer audit tips to its pharmacy network.

Risk- or Incentive-based Auditing: Auditing of pharmacy claims that are paid for as a percentage of findings may lead to overzealous interpretation and frivolous recoupment of payment. It is strongly recommended that MCOs should avoid contracting pharmacy claims auditing based upon this practice.

State dispensing regulations and published MCO claim submission requirements must work in concert: Audit requirements should not require the pharmacy staff to act contrary to state regulations. However, the claim submission requirements regarding plan benefit design, and the audit of same, may be additive to state laws, rules and regulations to the extent that the MCO requires it to correctly administer its defined benefit.

Prescription Order Documentation: Pharmacy practice often requires modifications to the original prescription order after consultation with the prescriber or patient. These consultations must be documented by the pharmacist on the prescription order or electronic record. For example, a "use as directed" instruction on the prescription order needs further clarification to support appropriate billing of the claim.

Electronic documentation and records: With an ever increasing shift to electronic prescribing and record keeping, it is imperative that electronic documentation (e.g. prescription orders, transaction notes, etc.) become acceptable for audit purposes. It is, however, critical that electronic documentation and records are complete, secure and of high quality to ensure their readability and authenticity.

All participants to an audit need to be informed and professional: When an audit is seen as reasonable, transparent and fair in design and implementation, the entire process is raised to a professional and quality improvement level. On the part of the MCO this would include timely notice of pending audit and its purpose, timely arrival to conduct the audit, timely notification of results, and a reasonable appeals process, as well as professional demeanor by the auditors. On the part of the pharmacy it would be understanding of the contract, audit requirements and dispensing requirements, being prepared for the audit, providing a member of the pharmacy staff to assist the auditor, as well as a professional demeanor of the pharmacy staff. A bilateral professional level of performance can make the audit process run smoothly, be educational and improve quality.

THE AUDIT PROCESS

Over the years different types of audits have been developed to address changes in benefit and billing processes. Concurrent Daily Review Auditing was developed to attempt to make immediate changes to a claim before payment was made to the pharmacy. Another type, Retrospective Audits (desk, mail or in person) were designed to validate appropriate service by the pharmacy and help to detect FWA. And finally, an Investigative Audit is used after the normal audit processes have led to fraud.

Description of Audit Types

Concurrent Daily Review Audit is an audit of claims that may trigger the MCO to review them for various reasons (e.g. atypical quantities or excessive dosage). This type of audit focuses on the rationality of quantity and dosage form pairing. Once identified, typically a telephone call is made or an email is sent, usually immediately (generally within the same day but no later than 72 hours of claim submission), to the dispensing pharmacy to obtain an understanding of the claim submission. The claim concern is usually resolved at the time of notification by the pharmacy's electronic resubmission of the claim.

Retrospective Audit is a retrospective, usually quite detailed, analysis of the total volume of claims submitted by a pharmacy. Retrospective audits may be conducted using one of three different types of pharmacy claims audits:

- **Desk Top Audit** is conducted by contacting the pharmacy via fax, email, the U.S. mail or contracted mail services as defined in the contract between the parties. The pharmacy may be asked to provide photocopies of the specific prescription orders, signature logs, wholesaler invoices or other documentation within a date range of claims paid to the pharmacy. The pharmacy will be given a due date to submit the requested information. The requested information may be returned by fax, email or U.S. Mail.
- **In-Pharmacy Audit** is conducted by contacting the pharmacy via email, U.S. mail, or other channel as defined in the contract between the parties, prior to the scheduled on-site audit date. The notification may include the audit time frame and types of documents that will be reviewed during the on-site audit and optimally blinded prescription order number ranges that will be reviewed. These audits may be conducted during regular business hours and the auditor should make reasonable efforts to minimize disruptions to the pharmacy. The pharmacy may be expected to have the documentation to support the audit period readily retrievable and accessible. A member of the pharmacy staff should be dedicated to assist the auditor. When the audit is complete, the auditor should provide general feedback to the assigned pharmacy staff member.
- **Investigational Audit** differs from MCO to MCO, but typically it is broader than a pharmacy claims audit and may be initiated from a medical, dental or another type of claim. An investigational audit is usually a more extensive audit and can involve regulatory and law enforcement. Typically this type of audit commences when there is clear evidence based upon preliminary reviews or audits that reveal fraud or abuse by patient or provider. This type of audit will not be addressed by these Guidelines due to the individual nature of this type of audit.

Audit Process: Outline of Procedures

I. Concurrent Daily Review Audits

Concurrent Daily Review Audits are a great way for a MCO to monitor its network and work with pharmacy to identify claims that were submitted incorrectly so that these claims can be corrected prior to payment by the MCO. Pharmacy claims audits, with retroactive recovery of prior payments, may lead to friction between a pharmacy and MCO. The Concurrent Daily Review Audit process is a way to ease this friction by identifying claims immediately, and allowing for correction of the claims through a reversal and rebilling process. Pharmacy can appreciate this audit process as it avoids the notion that pharmacy claims audits are merely a revenue source for a MCO. This audit process creates more of a partnership between a MCO and pharmacy.

Documentation

When a relationship is established between a pharmacy and an MCO, there should be formal written documentation either included as contractually defined in the body of the contract or in the provider manual that includes specific information on the audit process. For Concurrent Daily Review Audits the following information[2] may be pertinent:

- Documentation of the audit process
- Documented list of items necessary to satisfy the audit which can include some or all of the following:
  - Prescription order copies
    - Original prescription orders or
    - Electronic scanned images

    Note: Regardless of the copy type, it is important that the prescription order copy must be able to be verified as a legitimate order with legible content and containing pertinent documentation on the prescription. For the electronic copies, documentation for the prescription may be in electronic transaction notes with a date and time stamp. It is important to be sure that all the necessary information related to the prescription order dispensing is provided. Usually, it is to the benefit of the community pharmacy to make sure its prescription copies are legible and all supporting documentation is presented.
  - Physician Notes
  - Additional Documentation
    - Electronic documentation on the dispensing of the prescription order with a date and time stamp of when the documentation occurred.
    - Written documentation on the dispensing of the prescription order that is dated as to when the documentation occurred.
- Timeframes should be outlined
  - Timeframe for a pharmacy to submit audit documentation for a concurrent audit. *Suggested timeframe:* At least 10 to 14 calendar days.
  - Timeframe of initial results to be sent to the pharmacy. *Suggested timeframe:* Within 24 to 48 hours after receiving initial documentation.
  - Timeframe for additional supporting documentation to be submitted. *Suggested timeframe:* Within 10 to 14 calendar days.
  - Timeframe to send final results to the pharmacy. *Suggested timeframe:* Within 24 to 48 hours after receiving any additional supporting documentation.

[2] There may be state laws regarding auditing pharmacy claims that differ from the Model Guidelines outlined.

Audit Process: Outline of Procedures

continued

- Types of discrepancies
  - Documentation on which discrepancies can be reviewed again if the pharmacy submits additional documentation
  - Each MCO may adopt its own unique policies regarding documents that are acceptable for additional review
- Documented appeals process
- Process for resolution of issues raised by the audit. This is typically handled through a reversal and rebilling process.

Procedures

1. The MCO identifies claims for audit.
   Guidance: The number of prescription orders to be audited typically ranges from 1 to 5. The prescription orders audited are typically no more than 7 to14 calendar days old and dependent on payment cycles.
2. The MCO can deliver the audit notification to the pharmacy via encrypted email or telephone call.
   Guidance: The audit notification should include the following information:
   a. Pharmacy response time
   b. Documentation needed to satisfy the audit request
   c. Contact within the auditing department at the MCO to answer any questions
   d. Expectation of when the pharmacy will receive initial results
3. The pharmacy is required to compile all audit documentation for submission to the MCO. The documentation should include everything necessary to satisfy the audit.
   Guidance: All documentation should be emailed or faxed back to the MCO within 14 calendar days. It may be to the benefit of the pharmacy if the pharmacy is able to provide the documentation right away. This may allow for prescription orders to be corrected prior to the prescription sale. Typically the pharmacy is given the opportunity to reverse the original claim and rebill the claim correctly. This process allows for corrections to be made prior to the payment of the claim which prevents any audit chargebacks from occurring.
4. The MCO then reviews all audit documentation submitted by the pharmacy, and creates an initial findings report for the pharmacy.
   Guidance: This report would typically be emailed to the pharmacy within 24 to 48 hours of receipt of the original documentation. The initial results should include a listing of all claims reviewed followed by the audit discrepancy, or indicate if there is no discrepancy.
5. The pharmacy will typically receive the initial audit results via email. At this time all claims should be reviewed to determine the following:
   a. No discrepancies are found.
   b. Pharmacy agrees with the audit discrepancy. The pharmacy may find that the prescription has not yet been dispensed to the customer and pharmacy can correct the prescription and prepare it for future fills. If the prescription has been dispensed, the pharmacy can make the correction in the system to prepare for future refills.

Audit Process: Outline of Procedures

continued

c. Pharmacy disagrees with the audit discrepancy and would like to submit additional documentation supporting the prescription order dispensing. The pharmacy is required to collect all additional documentation to be submitted to the MCO to support the original dispensing.
Guidance: Supporting documentation should be submitted within 14 calendar days of receiving the initial results.

6. The MCO will typically receive the supporting documentation via email or fax. At this time the MCO reviews the supporting documentation to determine the final audit results. The MCO will typically send final audit results to the pharmacy within 24 hours of receipt of supporting documentation. With the final audit results, the MCO should communicate the amount that the pharmacy is to expect on the next remittance advice as payment for the prescription order.
7. The pharmacy will then verify that the proper payment was received on the claim when the corresponding remittance advice is received.

II. Desktop Audits

Desktop Audits (a retrospective audit) are a method of auditing that MCOs use which many pharmacies prefer because they may be less disruptive to the day-to-day pharmacy operations when compared to an in-pharmacy audit. Typically these audits utilize a process where community pharmacy may provide copies of prescriptions along with additional documentation to satisfy the audit.

Documentation

When a relationship is established between a pharmacy and a MCO, there should be formal written documentation contractually defined either included in the body of the contract or in the provider manual that includes specific information on the process. It is strongly recommended that pharmacy staff responsible for approving contracts read the provider manual prior to signing any contracts. For desktop pharmacy audits the following information may be pertinent:

- Documentation of the audit process
- Documented list of items necessary to satisfy the audit which can include some or all of the following:
  - Prescription order copies — either original prescription orders or electronic scanned images
    Regardless of the copy type, it is important for the prescription copy to be legible and contain any pertinent documentation on the prescription. For the electronic copies, documentation for the prescription may be in electronic transaction notes with a date and time stamp. It is important that all necessary information related to the prescription order dispensing is provided.
  - Proof of pick up or delivery of the prescription. Pharmacy is most often allowed to provide one of the following:
    - Electronic date and time stamp in the pharmacy software system of the sold prescription
    - Electronic signature
    - Paper signature
  - Physician Notes
    - Notes should be on the written copy which is what will be reviewed in an audit.

Audit Process: Outline of Procedures

continued

- Additional Documentation
  - Electronic documentation on the dispensing of the prescription order with a date and time stamp of when the documentation occurred.
  - Written documentation on the dispensing of the prescription order that is dated as to when the documentation occurred.

- Timeframes should be outlined
  - Timeframe for a pharmacy to submit audit documentation for a desktop or mail audit. *Suggested timeframe:* At least 14 to 21 calendar days.
  - Timeframe of initial results to be sent to the pharmacy. *Suggested timeframe:* Within 30 to 45 calendar days of the audit.
  - Timeframe for additional supporting documentation to be submitted. *Suggested timeframe:* Within 14 to 21 calendar days after receipt of initial results.
  - Timeframe to send final results to the pharmacy. *Suggested timeframe:* Within 30 to 45 calendar days of receiving any follow up documentation.

- Types of discrepancies
  - Documentation on which discrepancies can be reviewed again if the pharmacy submits additional documentation
  - Each MCO may have different policies regarding documents that are acceptable for additional review

- Documented appeals process
- Process for chargebacks or recoupment of payment defined.

Procedures

1. The MCO identifies claims for audit.
   Guidance: The number of prescription orders audited typically ranges from 1 to 50 unique prescription claims and from 1 to 12 months old.
2. The MCO can deliver the audit notification to the pharmacy via mail or encrypted email.
   Guidance: The audit notification should include the following information:
   a. *Pharmacy response time*
   b. *Documentation needed to satisfy the audit request*
   c. *Contact within the auditing department at the MCO to answer any questions*
   d. *Expectation of when the pharmacy will receive initial results*
3. The pharmacy needs to compile all audit documentation for submission to the MCO. The documentation should include everything necessary to satisfy the audit.
   Guidance: All documentation should be faxed, emailed or mailed back to the MCO within the specified time which typically ranges from 14 to 21 calendar days.
4. The MCO will then review all audit documentation submitted by the pharmacy and create an initial findings report for the pharmacy.
   Guidance: This report is typically mailed or sent via secure email to the pharmacy within 30 to 45 calendar days after the receipt of the original documentation. The initial results typically include a listing of all claims reviewed followed by the audit discrepancy, or indicate if there is no discrepancy.

Audit Process: Outline of Procedures
continued

5. The pharmacy may receive the initial audit results via mail or secure email. At this time all claims should be reviewed to determine the following results:
   a. No discrepancies are found.
   b. Pharmacy agrees with the audit discrepancy.
   c. Pharmacy disagrees with the audit discrepancy and would like to submit additional documentation. The pharmacy will collect all additional documentation to be submitted to the MCO to support the original dispensing.
   Guidance: Supporting documentation is typically submitted 14 to 21 calendar days after reception of initial results.
6. The MCO will typically receive the additional documentation via fax, mail or email. At this time the MCO reviews the additional documentation to determine the final audit results.
   Guidance: The MCO will typically send final audit results to the pharmacy within 30 to 45 calendar days. With the final audit results, the MCO will typically give the pharmacy the choice to pay any chargeback amounts with a separate check or an automatic deduction from a future remittance to the pharmacy.
7. Once the pharmacy receives the final audit results, it can do the following:
   a. Appeal the audit results via the appeals process
   b. Agree with the results and select a payment method.
   Guidance: Alternatives include pharmacy submitting payment via check to the MCO within the period of time specified contractually, typically agreed to by the parties but generally within 30 calendar days of receipt of final audit results. The pharmacy may also opt to allow the MCO to complete an automatic deduction on a future remittance advice typically at least 30 calendar days from the date the pharmacy received the final audit results.

III. In-Pharmacy Audits

In-Pharmacy Audits (a retrospective audit) are used widely by MCOs because they provide the most comprehensive view of operational practices and procedures yet they are most intrusive to pharmacy practice as they can interrupt daily operations and patient care. MCOs should be sensitive to scheduling this type of audit to minimize disruption. It is also advisable for the pharmacy to provide dedicated pharmacy staff to the auditor to minimize exposure of health information and ascertain that the best effort is made to find all documentation. From a pharmacy perspective, Concurrent Daily Audits or Desktop Audits are typically preferred methods, but reality is that the In-Pharmacy Audit gives a MCO the opportunity to interact directly with members in the pharmacy network.

Documentation

When a relationship is established between a pharmacy and a MCO, there should be formal written documentation contractually defined either included in the body of the contract or in the provider manual that includes specific information on the process. It is strongly recommended that pharmacy staff responsible for approving contracts read the provider manual prior to signing any contracts.

For In-pharmacy audits the following information is pertinent:

- Documentation of the audit process
- Documented list of items and documentation necessary to satisfy the audit which can include some or all of the following:

Audit Process: Outline of Procedures

continued

- Prescription order copies — either original prescription orders or electronic scanned images

  Regardless of the copy type, it is important for the prescription copy to be legible and contain any pertinent documentation on the prescription. For the electronic copies, documentation for the prescription may be in electronic transaction notes with a date and time stamp. It is important that all necessary information related to the prescription order dispensing is provided.

- Proof of pick up or delivery of the prescription. Pharmacy may be allowed to provide as documentation, as defined in the pharmacy contract, one of the following:
  - Electronic date and time stamp in the pharmacy software system documenting the delivery of the sold prescription
  - Electronic signature
  - Paper signature
- Prescriber Notes
- Additional Documentation
  - Electronic documentation on the dispensing of the prescription order with a date and time stamp of when the documentation occurred.
  - Written documentation concerning the dispensing of the prescription order that is dated as to when the documentation occurred.

- Timeframes should be outlined
  - Timeframe of initial results to be sent to the pharmacy. *Suggested timeframe:* Within 30 to 45 calendar days of the audit.
  - Timeframe for additional supporting documentation to be submitted. *Suggested timeframe:* Within 14 to 21 calendar days after receipt of initial results.
  - Timeframe to send final results to the pharmacy. *Suggested timeframe:* Within 30 to 45 calendar days of receiving any follow up documentation.
- Types of discrepancies
  - Documentation on which discrepancies can be reviewed again if the pharmacy submits additional documentation
  - Each MCO may have different policies regarding documents that are acceptable for additional review
- Documented appeals process
- Process for chargebacks or recoupment of payment defined.

Procedures

1. The MCO identifies claims for audit.
   Guidance: The number of prescription orders audited typically ranges from 25 to 125 unique prescription claims and from 1 to 12 months old, however, Medicare Part D audits by the MCO or CMS (or its OIG) may require the review of claims substantially older than this general timeframe.
2. The MCO can deliver the audit notification to the pharmacy via mail or encrypted email.
   Guidance: The audit notification should include the following information:
   a. *Date and time of the In-Pharmacy audit. Guidance: The MCO would typically notify the pharmacy at least 14 to 21 calendar days prior to the audit date. In the event*

Audit Process: Outline of Procedures

continued

the pharmacy is not available for an In-Pharmacy audit on the date the MCO selected, there should be flexibility to reschedule the audit at a time when both parties are available. Effort should be made by the MCO to avoid the holiday timeframes, weekends, Mondays, or the first week of the month when pharmacies are experiencing high prescription volumes.

   b. *Documentation needed to satisfy the audit request along with the timeframe of the records to be audited. Guidance: All documentation should be within the rules and regulations of the State Board of Pharmacy, DEA, state regulatory/enforcement agencies, and HIPAA/HITECH.*
   c. *Contact within the auditing department at the MCO to answer any questions.*
   d. *Expectation of when the pharmacy will receive initial results after the In-Pharmacy audit is completed.*

3. The pharmacy must prepare for the In-Pharmacy audit. Preparation would include obtaining the appropriate records for review. Note: The MCO will typically provide a date range or masked prescription number for the community pharmacy to begin pulling appropriate records if they are in storage. Community pharmacy should also prepare from a staffing standpoint so that their day-to-day workflow is not impacted by the In-Pharmacy audit.

4. The MCO will then review all audit documentation submitted by the pharmacy and create an initial findings report for the pharmacy.
   Guidance: This report is typically mailed or emailed to the pharmacy within 30 to 45 calendar days after the receipt of the original documentation. The initial results typically include a listing of all claims reviewed followed by the audit discrepancy, or indicate if there is no discrepancy.

5. The pharmacy will receive the initial audit results via mail or email depending on agreement between MCO and pharmacy. At this time all audit reports detailed by claim should be reviewed to determine the following:
   a. No discrepancies were found
   b. Pharmacy agrees with the audit discrepancy
   c. Pharmacy disagrees with the audit discrepancy and would like to submit additional documentation. The pharmacy will collect all additional documentation to be submitted to the MCO to support the original dispensing.
      Guidance: The MCO may accept supporting documentation that is submitted by the pharmacy up to 21 calendar days after reception of initial results.

6. The MCO will typically accept the additional documentation via fax, mail, or email. At this time the MCO reviews the additional documentation to determine the final audit results.
   Guidance: The MCO will typically send final audit results to the pharmacy within 30 to 45 calendar days. With the final audit results, MCO will typically give the pharmacy the choice to pay any chargeback amounts with a separate check or an automatic deduction on a future remittance advice.

7. Once the pharmacy receives the final audit results, it can do the following:
   a. Appeal the audit results via the appeals process.
   b. Agree with the results and select a payment method.
      Guidance: The pharmacy typically would then send a check to the MCO within 30 calendar days of receipt of final audit results. The pharmacy may also opt to allow the MCO to complete an automatic deduction on a future remittance advice typically at least 30 calendar days from the date the pharmacy received the final audit results.

THE APPEAL PROCESS

Once the pharmacy receives the audit results, it is recommended that the pharmacy be given the opportunity to submit a formal appeal to the MCO. This is typically completed and received by the MCO no later than 30 calendar days from the date that the final audit report is communicated to the pharmacy.

If the pharmacy files an appeal, it should be filed according to the procedures and timeline as detailed in the contract between the parties. Many MCOs require the pharmacy to complete a formal appeal form and send it with the required documentation.

The pharmacy should provide appropriate additional documentation to substantiate the appeal of the final audit results. The MCO should provide a written determination of the appeal within 30 calendar days of the expiration of its specified review period.

Guidance:

1. *Reasonable documentation from a prescriber or a patient to substantiate the dispensing of a prescription should be accepted by the MCO.*
2. *The type of acceptable documentation should be outlined in the contract between the pharmacy and the MCO.*
3. *Regardless of what is required in the contract, the pharmacy should always submit the appeal by a secure mail service.*

COMPOUNDED MEDICATION: GENERAL DISCUSSION AND GUIDANCE

A compounded prescription order is a unique, nonstandard order for the preparation of a medication or medications in a form that is not commercially available; therefore, not standardized with a single specific NDC number describing the product dispensed. For this reason, billing for compounded medications is often confusing and inconsistent for MCOs and pharmacies. Most MCOs have their own specific process for pharmacies to submit a compounded prescription order claim. Pharmacies may be in many different MCO networks and not familiar with all the different processes. The pharmacy will choose one process and use it to bill all MCOs for compounded prescription orders resulting in an inappropriately billed claim because it is not the proper process.

There are pharmacies that prepare compounded prescription orders as a small percentage of the practice, and because they are members of MCO networks, they will direct bill to the MCO. However, there are others that specialize in compounding prescription orders. These pharmacies are commonly referred to as compounding pharmacies. Many of these compounding pharmacies do not participate in MCO networks, which will require patients to seek reimbursement by submitting a claim directly to the MCO.

It is important for pharmacy and MCOs to come together to develop model guidelines that specifically address billing for compounded prescription medications. Due to the lack of model guidelines addressing compounded prescription orders, there are inconsistencies in the way compounded prescription orders are submitted. The number that are inaccurately billed may result in auditors targeting compounded prescription claims disproportionately and more frequently than other types of claims. To a pharmacy submitting a high percentage of compounded prescription claims, this targeting appears unfair.

NCPDP recognized this and developed a new telecommunication standard (v D.0) that was adopted and its use will be required on January 1, 2012. Once MCOs and pharmacies adopt and implement the new standard, there will be a more accurate means of billing c ompounded prescription claims.

Guidance: Pharmacy and MCOs should develop model audit guidelines based on the implementation of the new vD.0 telecommunication standard for compounded prescription billing.

LONG TERM CARE: GENERAL DISCUSSION AND GUIDANCE

Auditing of Long Term Care (LTC) pharmacies is one of the more challenging areas of pharmacy practice for auditing. The volume of claims by the LTC pharmacy, the issue of medical orders versus prescription orders, state-by-state regulatory differences in the storage of prescription order documentation and physical accessibility of stored documents are just some of the underlying factors that make it so challenging. These Model Guidelines can provide only limited help in resolving the existing problems for LTC pharmacy audit processes. It is recommended that pharmacy and MCOs seek to develop a model audit process specific to LTC pharmacy. Further, it is recommended that the National Association of State Boards of Pharmacy (NABP) and state boards of pharmacy develop a national standard for the retention and storage requirements for LTC prescription orders.

The demographics of patients, the prescribers and the LTC facility make it difficult for pharmacies to get, verify and store what MCOs view as the appropriate documentation to validate appropriate filling and billing of a prescription order. It is recommended that the audit process should allow an extended period of time, perhaps 30 calendar days, for LTC pharmacies to locate and present the appropriate documentation; however, often the expected documents are simply not available. This is due primarily to physicians writing medication orders in a patient chart rather than writing prescription orders as is typical for ambulatory care patients. The lack of appropriate documentation onsite often leads to what auditors and MCOs today view as inappropriate documentation (such as a "bar code scan" for a reorder) as proof of a prescription order. The result is often a citation for recoupment of the claim payment which can frustrate the pharmacy. The LTC pharmacy may view this as a legitimately dispensed prescription order. The recoupment of the claim may result in the patient/beneficiary being denied the value of the benefit to which they are entitled. In turn, the MCO may then become frustrated by its inability to properly conduct its drug utilization review process and validation of a paid claim to meet the requirements of government and private payor programs. Each believes they are following best practices and regulations; however, the documentation requirements to fill a prescription order and to bill a prescription order are inconsistent. It is recommended that further discussion by the profession is needed to bridge this documentation gap.

Guidance: Pharmacies, MCOs and government regulatory entities should develop audit processes specific to LTC pharmacy practice. The processes should consider:

1. *The types of documentation that are legally accepted to support medication orders in the LTC pharmacy. Audit findings should be consistent with legal requirements under state laws, and until documentation requirements are standardized and clarified, pharmacies should ensure that documentation properly supports the dispensing and billing of prescription orders;*
2. *Proper execution of MCO DUR programs, which are an integral part of drug benefit management and utilization controls;*
3. *Government program documentation requirements that impose obligations on both MCOs and pharmacies; and,*
4. *Preservation of the drug benefit to which the patient/beneficiary is entitled.*

PRIVACY CONCERNS

Pharmacies are considered to be Covered Entities under the Federal HIPAA law as well as under state privacy laws. Amendments to HIPAA contained in the HITECH law passed in 2009 included expansion of several requirements to Business Associates, which include the MCO and audit contractors. In addition, there may be state privacy laws that place similar or separate privacy requirements on pharmacies, MCOs, and audit contractors. Audit procedures should incorporate any requirements contained in these laws to ensure that the audit does not place the MCO, audit contractor and pharmacy being audited in violation of these laws.

Guidance: Audit Procedures should include provisions to ensure that privacy protections required by federal and state law are met. Procedures should also include provisions to assist audited pharmacies in complying with their obligations under these laws.

In developing audit procedures, the MCO should analyze Federal and State laws to:

1. *Identify privacy issues and responsibilities of the MCO*
2. *Identify privacy issues and responsibilities of Pharmacy*
3. *Identify privacy issues and responsibilities of the Audit Contractor (if outside of the MCO)*
4. *Address compliance issues of all parties*
   a. *Patient Consent and Auditor authority regarding personal health information (PHI)*
   b. *Authorized disclosures*
   c. *Unauthorized disclosures*
   d. *Accounting of all disclosures*
   e. *Allowed exclusion of PHI*

STATE and FEDERAL OVERSIGHT

State and Federal Pharmacy Laws and Regulations

State and federal laws reflect a wide variety of requirements and regulatory oversight that apply to the practice of pharmacy, the distribution of federal legend drugs, the operation of pharmacies and the sale and administration of health benefit plans inclusive of prescription drug benefit coverage in each state and throughout the country. The pharmacy and pharmacist are required to comply with the law that applies to the location of the pharmacy, or, on occasion, the pharmacy law of the locale where the patient resides. In general, interpretation of, and compliance with, the applicable law is a matter that is left to a Board of Pharmacy, Department of Insurance, CMS or another regulatory agency with jurisdiction over the issue. Auditors are often asked to evaluate the legitimacy and legality of prescription drug orders as part of their auditing procedure. There have been wide complaints from audited pharmacies that auditors are not qualified to interpret the state laws, or that they make interpretations that are inconsistent with those of the state board of pharmacy.

Audit and appeal procedures should include provisions that prevent claim recoupment based on interpretations of law that are inconsistent with the law under which the pharmacy filled the prescription order.

In developing audit procedures and training for auditors, the MCO should outline the following federal and/or state laws and regulations:

- Related to Health Plans
  - General ERISA and non-ERISA
  - Medicare
  - Medicaid

State and Federal Pharmacy Laws and Regulations *continued*

- Related to Pharmacies
  - Dispensing
  - Controlled Substances
  - Compounding
  - Other Drug Laws
- Specific laws related to insurance other plans and/or audit standards
- Laws related to Pharmacy Practice
  - Board of Pharmacy
    - General Practice
    - Practice Site Specific (LTC, assisted living, home infusion, etc.)
    - Compounding
  - Other
- Laws related to Health Plans
- General laws related to contracts

Guidance

1. *Audit procedures should acknowledge that differences exist between:*
   a) *Contractual requirements of network participation in a variety of plans with defined benefits as one component of audit evaluation, and*
   b) *Various federal and state laws and regulations that govern the practice of pharmacy and the operation of pharmacies.*
2. *It is recommended that auditors be pharmacists or certified pharmacy technicians that have had experience in community pharmacy practice.*

PHARMACY AUDIT TRANSACTION STANDARDS

In 2009, NCPDP[3] sponsored audit focus groups including representatives from pharmacies, MCOs, and audit companies to develop the scope of a project on pharmacy audit transaction standards. With participants from all segments of the industry within and outside of the NCPDP membership, focus groups were conducted which resulted in the three goals of the project:

- Create an electronic audit transaction file with requests, responses, and final outcome transmissions for both Desk Top claim audits and for In-Pharmacy audit notices.
- Create a forum to discuss and resolve audit issues with government programs and state regulation
- Create a forum to discuss and resolve common prescription conflict/dispensing events that may be non-compliant with the plan coverage criteria.

An NCPDP Task Group within the Telecom Workgroup was assigned this project and the Implementation Guide was approved by NCPDP as a standard in May 2011.

The new NCPDP Pharmacy Audit Transaction Standard was developed to help guide those involved with the community pharmacy claims audit process and was intended to meet two needs:

- To provide practical guidelines for software developers throughout the industry as they implement the Audit Transaction Standard, and
- To ensure a consistent implementation of the Audit Transaction Standard.

[3] NCPDP (National Council of Prescription Drug Programs) is a not-for-profit ANSI-Accredited Standards Development Organization representing virtually every sector of the pharmacy services industry.

PHARMACY AUDIT TRANSACTION STANDARDS

continued

This Standard should facilitate a specific type of business communication among diverse parties within the audit process. However, the use of this standard may be too burdensome on both pharmacies and MCOs because a process to upload documentation that is so critical in the audit process has not been selected and HIPAA standards for this type of information exchange have not yet been released. These factors may slow its adoption.

Guidance

1. *The adoption of this new transaction standard should remain voluntary.*
2. *A mechanism to upload documentation needs to be determined to assist in the adoption of this new transaction standard.*

CONCLUSION

Pharmacy claims auditing has been a source of contention in pharmacy, and, to some degree, MCOs and pharmacies have been positioned as adversaries. It became necessary for the profession to develop a stakeholder-based process to address the pharmacy claims audit process.

The *AMCP Model Audit Guidelines for Pharmacy Claims* will assist stakeholders in taking the first steps in understanding the perspectives of the MCO and pharmacy to ensure the audit process policies and procedures are sensitive to all stakeholders.

It is encouraged that all stakeholders review the presented *Model Guidelines* and use them when developing or reviewing current audit processes to ensure that they are fair and balanced. If both MCOs and pharmacies objectively review and embrace these Model Guidelines, the result will be a transparent audit process, a better understanding of the audit process and a more cooperative relationship between the parties.

APPENDIX: GLOSSARY

Appeal: As it relates to pharmacy claims audits, a formal request by the pharmacy for reconsideration on the audit findings.

Audit Notification: A communication via US mail or electronic means that is sent by the MCO to notify the pharmacy of an audit.

Audit Process: A means of ensuring that pharmacy procedures and reimbursement mechanisms are consistent with regulatory and MCO contractual requirements.

Audit Types: There are different types of audits that apply to pharmacy claims or conducted by an MCO:

- **Concurrent Daily Review:** An audit that is conducted by telephone or email usually immediately (within the same day but no longer than 72 hours of claim submission). The claim concern is usually resolved at the time of notification by the pharmacy's electronic resubmission of the claim.
- **Retrospective Audit** is a retrospective detailed analysis of the total volume of claims submitted by a pharmacy. A retrospective audit can be conducted using one of three types of pharmacy claims auditing:
  - **Desk Top Audit** is conducted after notification by the MCO to the contracting pharmacy as defined in the contract between the parties. The audit is conducted electronically. See *Guidelines* for process.
  - **In Pharmacy Audit** is conducted after notification by the MCO to the contacting pharmacy via email, U.S. mail, or other channel as defined in the contract between the parties. This audit is conducted onsite in the pharmacy. See *Guidelines* for process.
  - **Investigational Audit** differs from MCO to MCO, but typically it is broader than a pharmacy claims audit and may be initiated from a medical, dental or another type of claim. An investigational audit is usually a more extensive audit and can involve regulatory and law enforcement. Typically this type of audit commences when there is clear evidence based upon preliminary reviews or audits that reveal fraud or abuse by patient or provider.

Adjudication: The process of completing all validity, process and file edits necessary to prepare a claim for final payment or denial.

Claim: A submission by the pharmacy to the MCO for payment of prescription dispensed to an MCO plan member.

Documentation: Items (i.e., prescription order, signature logs, purchasing invoices, etc) required to satisfy an audit and/or appeal process. These items should be listed in the provider manual under the audit process.

Employee Retirement Income Security Act of 1974 (ERISA): A federal law that regulates employer-sponsored benefit plans and restricts state government from regulating these plans. The law mandates reporting and disclosure requirements for group life and health plans with relevant guidance on the sponsorship, administration, minimum records retention period, servicing of plans, some claims processing, appeals regulations and minimum mandatory clinical benefits.

APPENDIX: GLOSSARY

continued

Fraud, Waste and Abuse (FWA)

- **Fraud:** It is the illegal acquisition of prescription drugs for personal use or profit. This definition excludes theft, burglary, backdoor pharmacies and illegal importation or distribution of prescription drugs (i.e., purposeful billing for non-existent prescriptions (phantom claims), billing for brand drugs when generics are dispensed)
- **Waste:** To consume, spend, or employ uselessly or without adequate return; use to no avail or profit (i.e., prescription medications ordered when not needed (auto fill or hoarding), filled after patient death or discontinuation of treatment, large day supplies filled when drug has not been shown effective for patient and medications automatically given because patient says they've been taken in the past yet there is no demonstrated need.
- **Abuse:** The use of a prescription medication in a way not intended by the prescriber.

HIPAA: The Health Insurance Portability and Accountability Act of 1996, a Federal law and subsequent regulations that include protection of personally identifiable health information and gives HHS the authority to mandate the use of electronic standards for the electronic exchange of health care data.

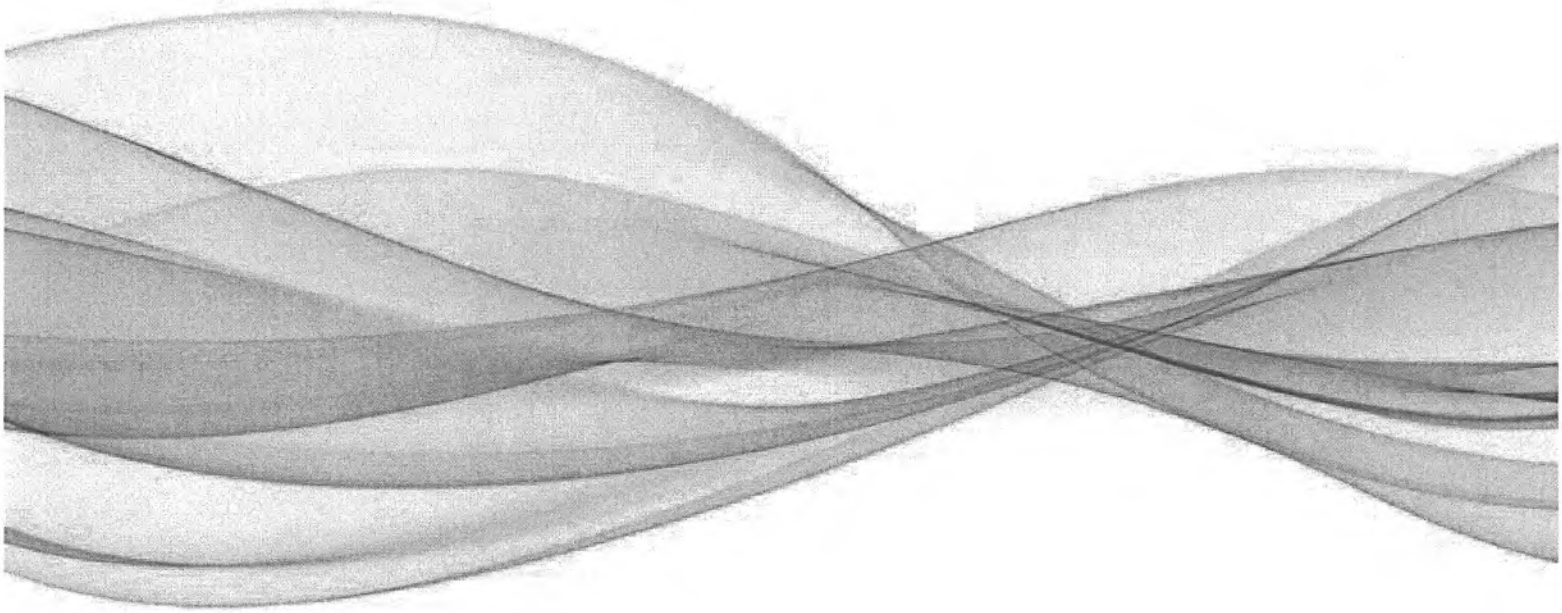
HITECH: The Health Information Technology for Economic and Clinical Health (HITECH) Act, was enacted as part of the American Recovery and Reinvestment Act of 2009 to promote the adoption and meaningful use of health information technology. It also addresses the privacy and security concerns associated with the electronic transmission of health information that strengthen the civil and criminal enforcement of the HIPAA regulations.

Incentive-based Auditing: Auditors are paid for their services based on a percentage of incorrectly or inappropriately submitted pharmacy claims.

Long Term Care (LTC) Pharmacy: Long term care typically refers to individuals who require health care either in an institutional facility on a long-term basis, but can also refer to those requiring services at home. Pharmacy services may be provided by the institutional facility or through an offsite pharmacy providing services to the facility.

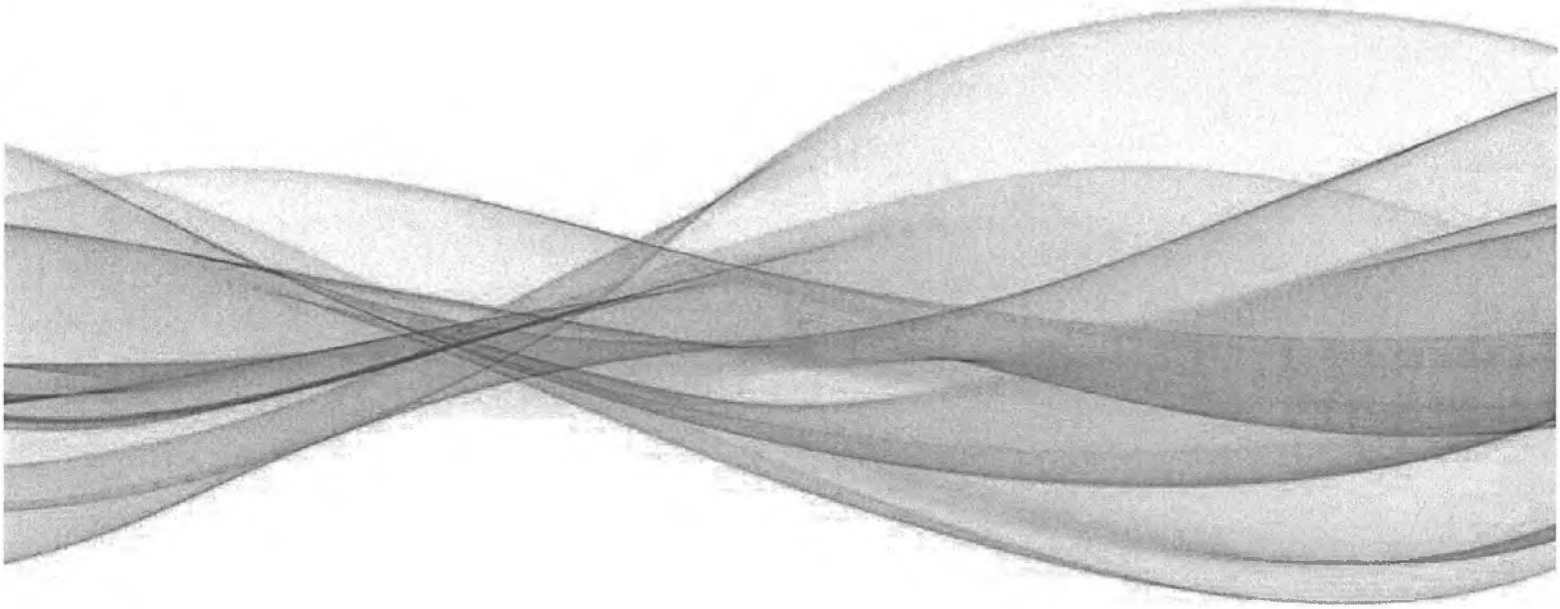
Managed Care Organization (MCO): For the purposes of this document this term is used generically to include all types of MCOs including health plans, pharmacy benefit managers (PBM), health maintenance organizations (HMO), contracted agents, etc.

NDC Number (National Drug Code): A unique 11 digit code given to drugs that identifies the labeler, product and package size.



National Council of Prescription Drug Programs (NCPDP): National Council of Prescription Drug Programs is a not-for-profit ANSI-Accredited Standards Development Organization representing virtually every sector of the pharmacy services industry.

Pharmacy Benefits Manager (PBM): PBMs are hired by the health plan, employer, or PDP to orchestrate the development of the pharmacy network and adjudicate claims for the health plan.



Pharmacy Network: Pharmacies that are contracted by a MCO in order to service the members of the health plan by providing convenient sites to fill their prescriptions.

Provider: An entity who has contracted with an MCO to deliver care to a covered person. In the case of pharmacy services, it is typically the pharmacy, rather than the pharmacist, that contracts with the MCO.

Provider Manual: A manual issued by the MCO and distributed to the pharmacy that outlines its processes, procedures, etc., as it relates to drug benefit and pharmacy claims.

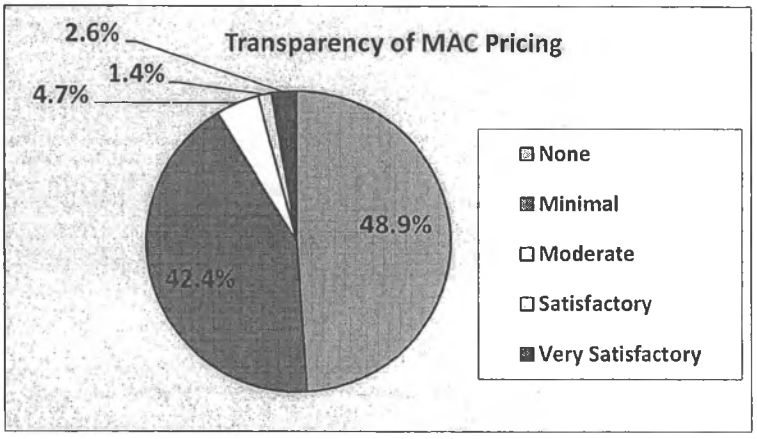
Survey of Community Pharmacies
Impact of Pharmacy Benefit Manager (PBM) Contracting and Auditing Practices on Patient Care

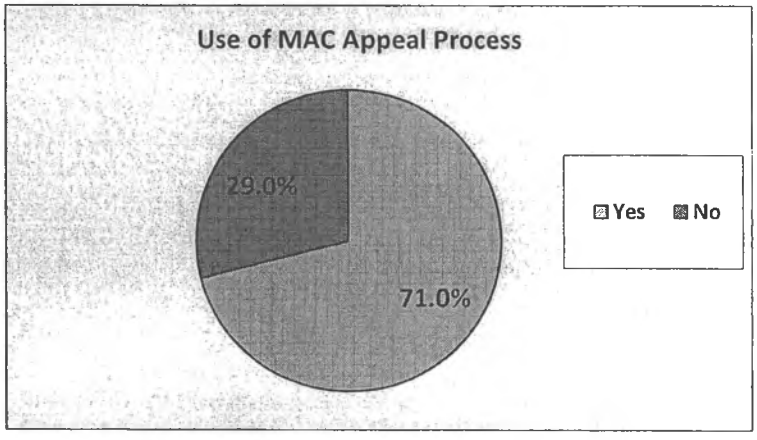
National

The Patient Choice and Pharmacy Competition Act of 2011 (H.R. 1971/S. 1058) would make several reforms to the unregulated Pharmacy Benefit Management (PBM) marketplace. These reforms would help community pharmacies serve patients and assure that there is a strong, accessible community pharmacy network.



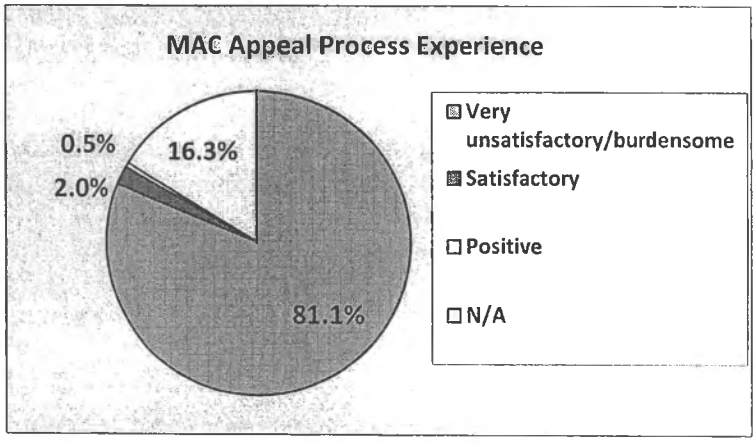
Among other provisions, the bill would require a minimum level of reimbursement transparency in the contracts that PBMs have with pharmacies for Part D and commercial insurance plans. For generic drugs, pharmacies generally don't know how much they will be reimbursed or when it will change. The bill would also make PBM auditing practices more focused on fraud rather than administrative and technical issues and make these audits more consistent among PBMs.

This survey provides important information to policymakers regarding the challenges that over 1,800 pharmacies report having with PBMs. This survey was conducted between June and July 2011.



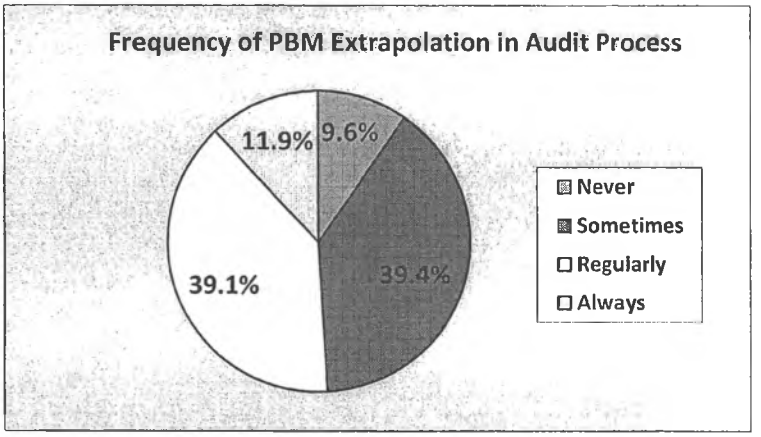
100 Daingerfield Road
Alexandria, VA 22314-2888
(703) 683-8200 PHONE
(703) 683-3619 FAX

Part I – Transparency of Generic Drug Reimbursement in PBM Contracts

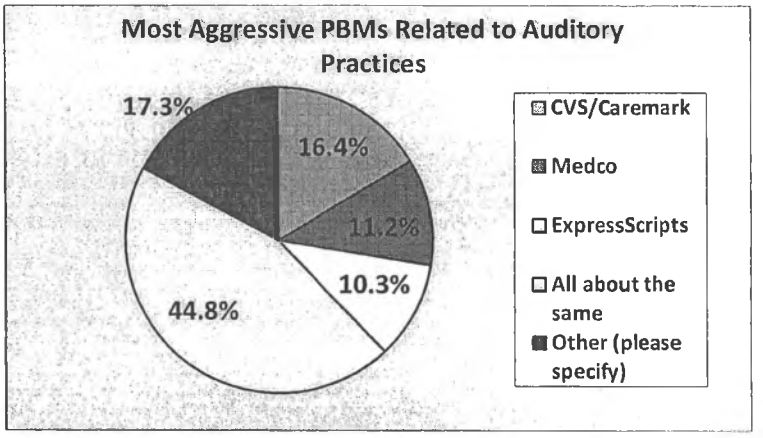


I - A provision of H.R. 1971 would require PBMs to disclose greater information to pharmacies in contracts regarding MAC reimbursement for generics. In a typical PBM/pharmacy contract, how much information or specificity is usually given regarding either how MAC pricing for generics is determined (methodology) or how often these prices will be updated?

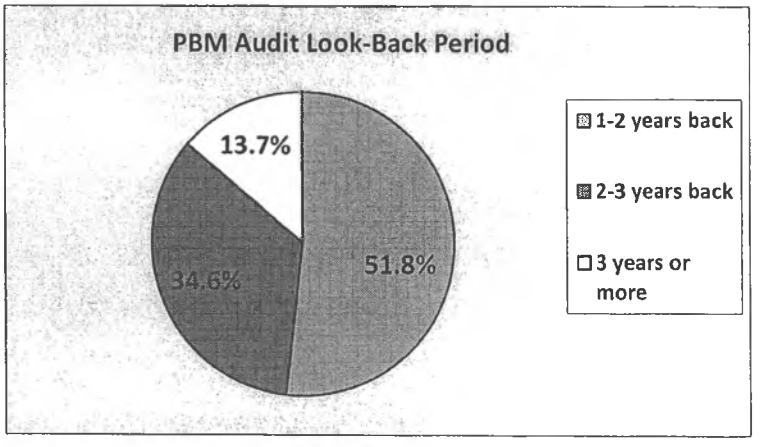
II - Have you ever used or tried to use a PBM's MAC appeal process?



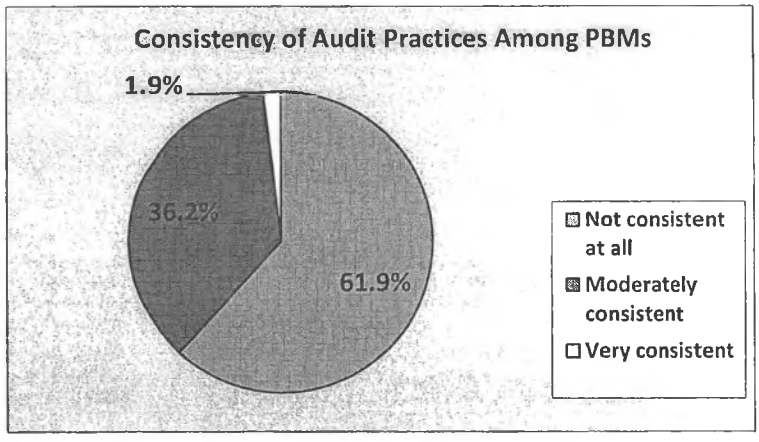
III - If you answered yes, did you find the process or overall experience to be:



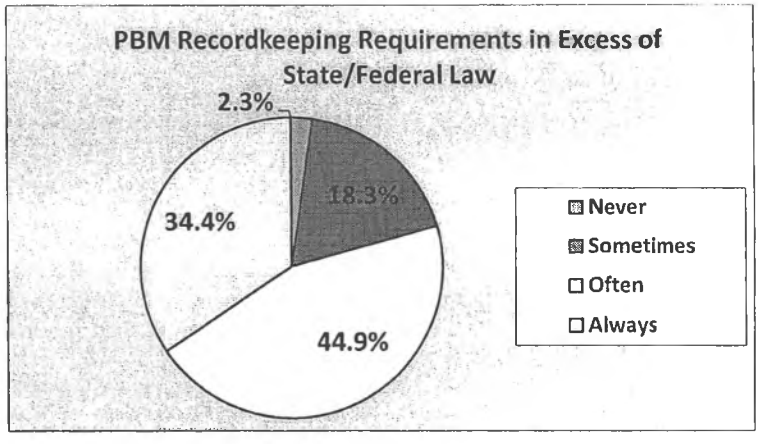
Part II – PBM Auditing Practices of Community Pharmacies



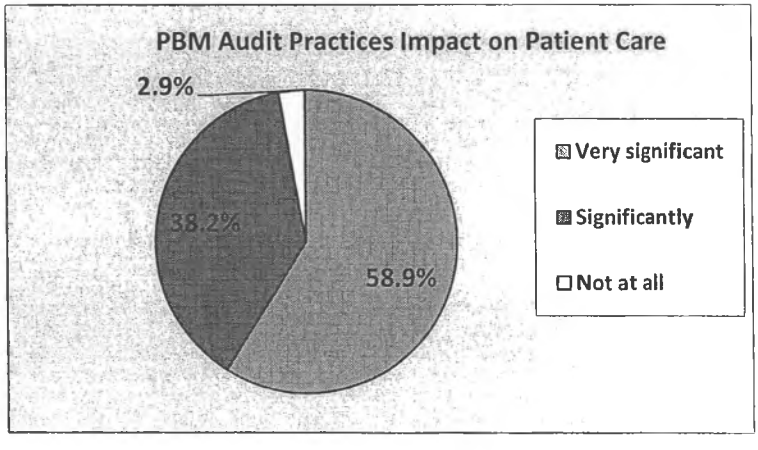
IV - Several provisions of H.R. 1971 would reform the manner in which PBMs could conduct audits. How often is extrapolation used in a PBM pharmacy audit?



V - Which PBM typically conducts the most aggressive audits?



VI - In general, how many years back does a PBM go when auditing your pharmacy's claim data?



VII - How consistent are the auditing requirements across PBMs?

VIII - How often do PBM auditors require (and accordingly harshly penalize pharmacies for even minor noncompliance) recordkeeping requirements that go above and beyond what is required under state or federal law?

IX - How significantly are PBMs reimbursement and auditing practices affecting your ability to provide patient care and remain in business?

PBM Audits Steal Money From Pharmacies, Take Time Away from Patients

- The auditor disallowed a handwritten prescription for a high dollar medication and attempted to recoup the payments from every refill because "in his opinion, the prescription was written out by someone other than the practitioner who signed it." The script had been written (documented) by the physician's nurse due to his poor penmanship and signed by the physician. Despite thorough follow up documentation of the legitimacy and accuracy of the prescription, the payments were recouped in full.

- A physician once stamped his DEA number on a prescription for a $1000 med that the patient received. The PBM took the money back even though the patient got the meds, because they wanted the doctor to preprint the DEA# on the prescription pad. However, this was a new doctor at that group practice and the office manager did not have enough time to preprint thousands of pads at the print press.

- Doctor spelled the patient name incorrectly, and they refuse to pay the prescription and all refills

- Audited 4 months ago by ACS for Humana patients. They Found only one mistake and that was [that the] clinic NPI was used on physician name. Two years ago NPI was not available online, so we called the doctor's office to get his NPI. They gave us the clinic NPI. We do not have a way to find how many NPI's do not match with our physician profile. So we were using the same NPI for one doctor for [the] last 2 years. Humana or ACS never corrected us either. Unfortunately it was all AIDS medication (very expensive). Now they want $16,000 back for using wrong NPI. To appeal we went to [the] doctor's office and they filled out [a] form that [the] insurance required us to get from [the] doctor's office to make sure that they were legitimate prescriptions and sent it to ACS for further clarification. ACS denied our appeal twice and wants to recoup money now. I called Humana and left messages several times and never heard anything back. I can not go to court because it would cost me too much and I do not have this amount that I can pay them easily. Very discouraging.

- Doctor wrote prescription for 1 bottle of a liquid maintenance medication, we dispensed 1 month's supply. They claimed we should've only given 14 days worth and took all the money from the claim back, even though the patient received the whole prescription. They took all the money back for the life of the prescription (11 refills, or 12 months).

Alaska Pharmacists Association

Examples of Abusive Auditing Practices in Alaska

Audit Abuse Example:

1) Our pharmacy had filled a prescription for patient who had been having chronic hives (itching) from auto-immune type disease. The patient had seen a specialist who had prescribed a high dose antihistamine at a dose of two tablets three times per day to dispense a 3 month supply with refills. The patient refilled the prescription approximately 5 months after the first fill.

We received a desk audit from the Insurance Company (Aetna) about a year after that and sent them a copy of the prescription. We later received notice from Aetna that they would be recouping the total cost of the prescription (including the dispensing fee) since the patient didn't refill the prescription until 5 months after the first date of the fill (i.e. patient wasn't always using six tablets per day). We received no electronic notification of concern from Aetna at the time we dispensed the prescription (which is done in real time). We spent considerable time with the doctor's office getting a letter to document the patient's ongoing need for the medication in order to fight the recoupment.

We shouldn't have needed to do this since we filled the prescription as written and verified the need and dose at the original time of dispensing.

2) CareMart called our pharmacy and requested audit on 21 prescriptions; they would only give me the numbers over the phone and would not fax because they want deniability. It took a lot of time to comply with their audit.

3) One issue I remember was from a pharmacy in Alaska by Express Scripts. They were taking back our payment because of a transferred Rx. They were not accepting a prescription copy because at the time of transfer the prescription image was not sent correctly between the two Kroger Pharmacies. The pharmacist transcribed the information on an Rx blank with all the information. They were not accepting this, even though state law says this is good enough. I did appeal and win this.

4) In February, 2011 our pharmacy received notice of a large desk audit to be performed. The audit was for prescriptions from 2008 and over 100 prescriptions were involved. All of these prescriptions had to be copied, printed, signature logs, etc. - so it was very time consuming, especially since all of the records were from over 3 years ago. This was completed and sent to the auditors. Then we were notified that they were going to also do an on-site audit of these and other prescriptions.

In August of this year - 2 auditors arrived at our store and I spent the entire day answering their questions, pulling files, and finding documentation. They were not very well knowledgeable in pharmacy as many of their questions were not good questions. So, we made it through that and I was told we would be receiving a final report in a few weeks.

That report arrived and I was very pleased when I read the first few pages. Out of over $103,000 in claims reviewed - we had $89 in errors according to the auditors. However, when I got to the last page - through their "one-sided confidence extrapolation method" (their name for this) - they said I owed over $7,300! I called the auditors to no avail.

Since this - I have just hired a lawyer to help in disputing this claim. Most companies only use extrapolation when the error rate is over 5%. Ours was less than 0.1%! The last audit we had a few years ago - we had a zero repay. Being told to repay over $7000 is just not right!

5) Our pharmacy received a desk audit from ACS Audit and Compliance Solutions who was contracted by the Pharmacy Benefit Manager Healthspring. The letter was dated November 9, 2011 and we received the letter on November 14, 2011. All requested documentation had to be postmarked by 12/9/2011. On the 12/9/11 we mailed all documentation to ACS. On January 24, 2012 we received the results of the audit via UPS in a letter dated 1/17/12. The report indicated that "the signature documenting receipt of pharmacy services cannot be found in the signature logs" for one prescription. Because of this missing signature, the plan was going to deduct the entire amount of that prescription from a future remittance. This prescription was correctly filled for a legitimate purpose and mailed to the patient in Haines Alaska. To prevent this recoupment by the audit company, our pharmacy has had to send an affidavit to the patients daughter (the patient has since passed away from cancer) so she can sign to verify that they did indeed receive the medication. All supporting documentation was due back to ACS by 2/6/12. This pharmacy had to request and was granted a one week extension to this deadline. As of today, 2/9/12 the pharmacy has not received the affidavit, and has called for another extension but has not heard back from ACS. This pharmacy has already dispensed the medication correctly, the patient has taken the medication as prescribed, but because of a procedural error, the plan is attempting to recoup the entire amount of the prescription from the pharmacy.

LAWS THAT PROVIDE REGULATION OF THE BUSINESS PRACTICES OF PHARMACY BENEFIT MANAGERS

ARKANSAS
Title 17, Chapter 92
Section 17-92-1201, et.seq.

- Pharmacy Audit Bill of Rights sets forth standards for audits by a managed care company, an insurance company, a third-party payor or any entity that represents such companies or groups
- Pharmacy must be given at least one week advance notice of an audit
- If clinical or professional judgment is required audit must be conducted by or in consultation with a pharmacist
- Pharmacy may use records of a hospital, physician or other authorized practitioner to validate the pharmacy record
- Recoupment of claims has to be based on actual overpayment unless it is part of a settlement with the pharmacy
- Period covered by audit cannot exceed 24 months from the date the claim was submitted to or adjudicated by the entity
- Unless consented to by the pharmacy, the audit cannot take place during the first 7 days of the month due to high volume of prescriptions filled during that time
- Preliminary audit report must be delivered within 120 days after the conclusion of the audit - final report must be delivered within 6 months
- Use of extrapolation audits for calculation of recoupments or penalties is prohibited
- Copy of the final audit report to be provided to the plan sponsor
- Applies to audits of claims submitted after January 1, 2008

Effective: 04/03/07

Arkansas
Arkansas Code Title 9 Chapter 88 Sec. 801-804
Fair Disclosure of State Funded Payments for Pharmacists' Services Act

- Requires PBMs to itemize by individual claim the amount actually paid to the pharmacy or pharmacist, the identity of the pharmacy, and an identifier of the pharmacist services

Signed into law: 4/2/2009

CONNECTICUT
Public Act No. 07-200
An Act Requiring the Registration of Pharmacy Benefit Managers

- PBM must obtain a certificate of registration from the Insurance Department.
- PBM must complete an application form which must include the name and address for an agent for service of process, pay a fee and provide evidence of a surety bond.

• PBM operating as a line of business or affiliate of a health insurer or other entity does not have to obtain a certificate of registration but must provide annual notification to the Commissioner of its status.
• Registration may be denied and a hearing process is provided for an Appeal.

• Commissioner has the authority to suspend, revoke or refuse to issue or renew for conduct of a character likely to mislead, deceive or defraud the public or the commissioner, unfair or deceptive business practices or nonpayment of renewal fee.
Effective: 01/01/08

FLORIDA
Florida Statutes Chapter 465
465.188dicaid audits of pharmacies

• Agency conducting the audit must give 1 week prior notice
• Audit must be conducted by a pharmacist licensed in this state
• Any clerical error, typographical error, scrivener's error or computer error regarding a document or record required under Medicaid program does not constitute a willful violation and is not subject to criminal penalties without proof of intent to commit fraud
• A pharmacist may use the physicians record or other order for drugs or medicinal supplies written or transmitted by any means of communication for purposes of validating the pharmacy record with respect to orders or refills of a legend or narcotic drug
• Each pharmacy must be audited under same standards, parameters
• Pharmacist must be allowed at least 10 days to produce documentation to address any discrepancies
• Period covered by an audit may not exceed 1 calendar year
• Audit may not be scheduled during the first 5 days of any month due to high volume of prescriptions filled during that time
• Audit report must be delivered to pharmacist within 90 days after conclusion of audit.
• Entity conducting the audit may not use the accounting practice of extrapolation in calculating penalties for Medicaid audits
• Provisions do not apply to investigative audits conducted by Medicaid Fraud Control Unit of the Department of Legal Affairs

• Provisions do not apply when Florida Agency for Health Care Administration has reliable evidence that claim that is the subject of the audit involved fraud under the Medicaid program.

GEORGIA
Title 26, Chapter 26-4.110.1

• Requires a PBM to be licensed as a pharmacy, with a few exceptions, if it provides the services of benefits that constitute the practice of pharmacy.
• If the PBM is licensed then the Board can inspect its premises whether they are located within or outside the state.
Effective: 05/22/02

Title 26, Chapter 4 – 26-4-118
The Pharmacy Audit Bill of Rights

• Requires certain procedures when an audit of pharmacy records is undertaken by a managed care company, insurance company, third-party payor or any entity that represents such companies (which would include PBMs).
• Pharmacy must be given notice at least one week prior to the conducting of the audit.
• Any audit that requires clinical or professional judgment must be conducted by or in consultation with a pharmacist.
• A finding of an overpayment or underpayment may be a projection based on the number of patients served having a similar diagnosis or on the number of similar orders or refills for similar drugs; however recoupment of claims must be based on the actual overpayment or underpayment unless the pharmacy agrees as part of a settlement.
• Pharmacy must be allowed at least 30 days following the receipt of the audit report in which to produce documentation to address any discrepancy found during the audit.
• Period covered by the audit may not exceed two years from the date that the claim was submitted to or adjudicated by the entity.
• An audit may not be scheduled during the first seven calendar days of any month without the consent of the pharmacy.
• The preliminary report must be delivered to the pharmacy within120 days after the conclusion of the audit.
• Extrapolation is prohibited in calculating recoupments or penalties for audits.
• Each entity conducting an audit shall establish an appeals process
• Plan sponsor must be provided with a copy of the audit report
Effective: 04/19/06 (applies to audits to claims submitted for payment after 07/01/06)

Official Code of GA Ann. Title 33 Chapter 64

- Provides for license requirements and filing fees for PBMs

- Requires a surety bond
- Provides that a pharmacy benefit manager shall not engage in the practice of medicine
- Makes certain audit requirements applicable to pharmacy benefit managers
- To provide that a pharmacy benefits managers shall not have no be licensed as an administrator

Effective: 06/02/10 (Senate Date Signed by Governor)

Indiana
Indiana Code 25-26-22

- Provides pharmacists procedural protections against audits initiated by PBMs
- PBM must provide description of audit procedures in audit contract
- Pharmacy must be given at least two weeks written notice in advance of an onsite audit
- Auditor may not interfere with pharmacist-delivered services to patients and must minimize disruption of pharmacy operations
- If clinical or professional judgment is required audit must be conducted by or in consultation with a pharmacist
- Pharmacy may use records of a hospital, physician, or other health practitioners to validate a prescription for a legend drug
- Period covered by audit cannot exceed 24 months from the date the claim was submitted to or adjudicated by PBM
- PBM must permit pharmacy to electronically resubmit claims disputed by the audit
- Unless consented to by the pharmacy, the audit cannot take place during the first 5 days of the month
- On-site auditor may not be paid based on percentage of amount recovered, resulting from the audit
- Preliminary audit report must be delivered within 90 days after the conclusion of the audit
- Final report must be delivered within120 days after the preliminary audit is received by the pharmacy or if a final appeal is filed, after a determination is made
- Recoupment of claims must be based on actual overpayment or underpayment, not extrapolation –final audit report must be distributed prior to recoupment

Effective: 7/1/2009

IOWA
Title XIII Commerce

Subtitle 1 Insurance and Related Regulation
Chapter 510B.1 – 510B.9

• PBM must obtain a certificate as a third party administrator
• PBM must perform its duties exercising good faith and fair dealing
• PBM must notify the covered entity in writing of any conflicts
• PBM cannot contact a covered individual without permission of the covered entity
• PBM cannot require more stringent record keeping than that required by state or federal law or regulation
• PBM must notify the pharmacy when it receives notice from a covered entity of a contract cancellation within 10 working days
• Within three business days of a price increase notification by a manufacturer or supplier the PBM must adjust its payment to the pharmacy consistent with the price increase
• Commissioner must enforce the provisions and adopt rules concerning timely payment of pharmacy claims and a process for adjudication of complaints and settlement of disputes between a PBM and a pharmacy related to auditing practices and termination of pharmacy agreements
• Legislative Council is directed to establish an interim committee on PBMs to review transparency, disclosure, confidentiality protections, ability of covered entities to audit PBMs and appropriate remedies for covered entities to enforce the provisions in the Act

Effective: 01/01/08

KANSAS
Chapter 154
Pharmacy Benefits Manager Registration Act

• Requires pharmacy benefit managers to obtain a valid certificate of registration issued by the insurance commissioner in order to operate in the state
• PBM must file an application form which includes:
(a) Name, address, official position and professional qualification of each individual who is responsible for the conduct of the affairs of the PBM, including all members of the board of directors, board of trustees, executive committee, other governing board or committee, the principal officers in case of corporation, the partners or members in the case of a partnership or association and any other person who exercises control or influence over the affairs of the PBM
(b) Name and address of the applicant's agent for service of process in the state
(c) A nonrefundable application fee of $140
• Registration expires on March 31st of each year and the renewal fee is $140
• If the fee is not paid the registration may be revoked or suspended
• PBMs must register within 90 days after the effective date of the act
• Insurance commissioner may adopt rules

• If a PBM acts without registering, it will be subject to a fine of $500 per violation

Effective: 04/28/06

Kentucky
KRS Chapter 304, Subtitle 17A, Sections 1-5
An Act Relating to Pharmacy Audits

- Creates pharmacy audit protections
- Pharmacy must be given at least thirty days written notice of an audit
- If clinical or professional judgment is required audit must be conducted by or in consultation with a pharmacist
- Pharmacy may use records of a hospital, physician, or other authorized practitioner to validate the pharmacy record
- Recoupment of claims must be based on actual overpayment unless it is part of a settlement with the pharmacy
- Period covered by audit cannot exceed two years from the date the claim was submitted unless federal law allows a longer period or there is evidence of fraud
- Unless consented to by the pharmacy, the audit cannot take place during the first 7 days of the month
- Preliminary audit report must be delivered within 120 days after the conclusion of the audit – final report must be delivered in 6 months
- Following receipt of preliminary audit report, the pharmacy may take 30 days to produce documentation in response to discrepancies
- Final audit report must provide claim-level detail of amounts and reasons for each claim recovery
- Auditor may not be paid based on percentage of amount recovered, resulting from the audit
- Exit interview to provide pharmacy an opportunity to respond to questions, comment and clarify findings must be done at end of audit – time of interview must be agreed to by pharmacy
- Pharmacy must be provided written instruction of appeals process for final audit report
- If unsubstantiated audits discovered following appeal, they are dismissed without further proceeding.
- Auditor may not collect disputed funds until audit process, including appeals, is completed

Signed into Law: 3/24/2009

MAINE
Title 22, Chapter 603, Subchapter 4, Section 2699
Prescription drug practices

• Provides that a PBM owes a fiduciary duty to a covered entity and must discharge that duty in accordance with the provisions of state and federal

law.
• Requires PBM to perform its duties with care, skill, prudence and diligence in accordance with the standards of conduct applicable to a fiduciary in an enterprise of a like character and with like aims.
• Requires the PBM to notify the covered entity in writing of any practice that is a conflict of interest.
• Upon request by the covered entity, the PBM must provide all financial and utilization information relating to services to that covered entity.
• The PBM may designate any information provided to the covered entity as confidential and the information may not be disclosed without the permission of the PBM except that disclosure may be ordered by a court. Also this provision does not limit the Attorney General's use of its investigative authority.
• Requires the PBM to transfer in full to the covered entity any benefit or payment received as a result of a substitution.
• Requires the PBM to disclose to the covered entity all financial terms and arrangements for remuneration of any kind that apply between the PBM and any drug manufacturer or labeler, including formulary management, drug-switch programs, educational support, claims processing and pharmacy network fees that are charged from retail pharmacies and data sales fees. The PBM may designate the information as confidential. However disclosure may be ordered by a court and this provision does not limit the Attorney General's use of its investigative authority.
• Provides that a violation of the Act is a violation of the Maine Unfair Trade Practices Act and subject to a fine of not more than $10,000.
• Applies to contracts executed or renewed on or after September 13, 2003.
Effective: 04/13/05 (On 06/05/06, the United States Supreme Court denied the Petition for a Writ of Certiorari filed by PCMA seeking to overturn the Maine law on the grounds that ERISA preempted that state law. This ruling ended any further legal challenges by PCMA to the law.)

MARYLAND
Subtitle 16, Sections 15-1601 et seq
Pharmacy Benefits Managers

• Prior to entering into a contract, the PBM must inform the purchaser that the PBM may solicit and received manufacturer payments, pas through or retain those payments depending on the contract terms, sell aggregate utilization information and share aggregate utilization information with other entities.
• PBM must offer to provide to the purchaser a report that contains net revenue and manufacturer payments.
• If a purchaser has a rebate sharing agreement, the PBM must offer to provide a repot fore each fiscal quarter and each fiscal year that contains information on the net revenues, prescription drug expenditures, manufacturer payments and rebates.
• PBM may require purchaser to sign a nondisclosure agreement prior to

releasing information.
• Ability of Attorney General or Insurance Commissioner to obtain information and use the information in any proceedings not affected by this section.
• PBM must disclose at the time of contracting with a pharmacist and at least 30 days before any contract change: the terms of reimbursement, process for verifying benefits and beneficiary eligibility, dispute resolution and audit appeals process and procedures for verifying drugs included on the formularies used by the PBM.
• PBM may not schedule an onsite audit to begin during the first 5 calendar days of a month unless requested by the pharmacist.
• PBM must use a pharmacist if the audit requires clinical or professional judgment.
• All pharmacies in the network must be audited under the same standards and parameters.
• Audit limited to claims submitted or adjudicated within the 2 year period immediately preceding the audit.
• Extrapolation audits are prohibited unless the pharmacist agrees to projected overpayments or denials as part of a settlement agreement.
• PBM must establish an internal appeals process for disputed audit claims.
• PBM must follow certain procedures for the timing of audit reports and payment of amounts due as a result of the audit,
• PBM may not request a therapeutic interchange unless certain criteria are met unless the proposed interchange is for medical reasons that benefit the beneficiary or it will result in financial savings and benefits to the purchaser or the beneficiary.
• PBM must follow disclose certain information to the prescriber when the PBM solicits the prescriber to make an interchange.
• If PBM receives payment from a manufacturer for making the interchange that payment must be disclosed to the prescriber at the time of the solicitation.
• If an interchange occurs, the PBM must provide certain information to the beneficiary.
• PBM must maintain a toll free number for prescribers, pharmacists and beneficiaries.
• PBM must register with the Insurance Commissioner and renew registration every 2 years.
• Commissioner may suspend, deny, revoke or refuse to renew a registration, PBM subject to administrative penalties.
• PBM may not ship, mail or deliver drugs through a non-resident pharmacy unless it holds a pharmacy permit from the Board of Pharmacy.
• Establishes requirements for a pharmacy and therapeutics (P&T) committee established by a PBM.
• Members of a P&T committee must sign a conflict of interest statement.
• A majority of the P&T committee members must be practicing physicians or pharmacist.

• PBM must have policies and procedures including disclosure requirements to address potential conflicts of interest and a process to evaluate medical and scientific evidence concerning the safety and effectiveness of prescription drugs.
• PBM may not require a pharmacist to participate on the P&T committee.
Effective: 10/01/08

Title 15, Subtitle 10B, Section 15-10B-20
Private Review Agents

• Requires the Insurance Department to conduct an examination of any PBM registered as a private review agent at least once every three years.
• Requires the Commissioner to issue a report based on the examinations.
Effective: 05/13/03

MISSISSIPPI
Pharmacy Audit Integrity Act

• Establishes minimum and uniform standards and criteria for the audit of pharmacy records.
• Pharmacy contract must identify and describe in detail the audit procedures.
• Entity conducting an onsite audit must give the pharmacy at least 2 weeks prior written notice before conducting an initial audit.
• An audit that involves clinical and professional judgment must be conducted by or in consultation with a pharmacist.
• Entity conducting the onsite audit may not interfere with the delivery of pharmacy services.
• Pharmacy may use records of a hospital, physician or other authorized practitioner to validate the pharmacy record
• Recoupment of claims has to be based on actual overpayment.
• A finding of an overpayment shall include the dispensing fee amount unless the prescription was not dispensed.
• Period covered by the audit may not exceed two years from the date that the claim was submitted to or adjudicated by the entity.
• Audit cannot take place during the first 5 days of the month.
• Preliminary audit report must be delivered within 120 days after the conclusion of the audit - final report must be delivered within 180 days. Pharmacy has at least 30 days to review preliminary report. Audit report must be written.
• Recoupments of disputed funds or repayment of funds must occur after final internal disposition of the audit including the appeal, if any, process. If identified discrepancy exceeds $25,000 future amounts in excess of that amount may be withheld pending finalization of the audit.
• Interest may not accrue during the audit period.
• Entity conducting the audit must establish a written appeals process and if either party is not satisfied with the appeal, that party may seek mediation.
• Plan sponsor must receive a copy of the final report.

Effective: 07/01/08

Title 73 – Professions and Vocations
Chapter 21 – Pharmacists -- Sections 73- 21-151 – 73-21-159
Pharmacy Benefit Prompt Pay Act

• Requires PBMs to file financial statements with the state Insurance Department.
• PBMs must use a nationally recognized reference in pricing calculations when reimbursing pharmacies and must update that reference no less than every three business days.
• Clean claims filed electronically must be paid within 15 days (not later than 35 days if filed as a paper claim).
• The Board of Pharmacy shall monitor PBMs for compliance with the law and is authorized to subject PBMs to administrative penalties or noncompliance.
Effective: 06/30/06

MISSOURI
Revised Statutes
Chapter 338 Pharmacists and Pharmacies
Section 338.600

• Sets forth standards for pharmacy audits by a managed care company, insurance company, third party payor or any entity that represents such groups
• The entity conducting the audit must provide pharmacy with one-week notice prior to audit
• If clinical or professional judgment is required, must by conducted by or in consultation with licensed pharmacist
• Any clerical error, record-keeping error, typographical error, or scrivener's error shall not constitute fraud or grounds for recoupment, so long as the prescription was legally dispensed. No claim arising under this provision shall be subject to criminal penalties without proof of intent to commit fraud
• A pharmacy may use the records of a hospital, physician or other authorized practitioner of the healing arts for purposes of validating the pharmacy record. Electronically stored images of prescriptions, electronically created annotations shall be considered valid prescription records.
• Each pharmacy shall be audited under same standards/parameters
• Period covered by audit shall not exceed two-year period unless previous finding of fraud
• Audit shall not be conducted during first three business days of any month due to high volume of prescriptions filled during such time
• Entity conducting the audit shall not use extrapolation

• Recoupment shall only occur after final internal disposition of audit, including appeals process
• Each entity conducting audit shall establish an appeals process, lasting no longer than six months
• Entity conducting audit shall provide copy of final audit report (after appeals) to plan sponsor
• Section does not apply to investigative audit that involved probably fraud or willful misrepresentation or conducted by law enforcement agency
EFFECTIVE August 2009

NEW MEXICO
Chapter 61 – Article 11
61-11-18.2

• Requires a managed care company, insurance company, third-party payor or representative of the managed care company, insurance company or third-party payor to conduct audits according to certain criteria.
• Must give pharmacy at least two weeks notice prior to conducting an initial on-site audit.
• An audit that requires clinical or professional judgment must be conducted by or in consultation with a pharmacist.
• Pharmacy can use the records of a hospital, physician or other authorized practitioner for the purposes of validating the pharmacy record.
• A finding of overpayment or underpayment cannot be based on a projection and recoupment of claims must be based on actual overpayment or underpayment unless a statistically justifiable method of projection is part of an agreed settlement.
• Pharmacy must be allowed at least 21 days, with reasonable extensions, to produce documentation to address any discrepancies.
• Audit period cannot exceed 2 years, unless agreed by contract, from the date that the claim was submitted or adjudicated.
• Audit may not be initiated or scheduled during the first five calendar days of a month unless consented to by the pharmacy.
• Preliminary audit report must be delivered within 120 days, with reasonable extensions allowed, after the conclusion of the audit.
• Final report must be delivered within 6 months after receipt of the preliminary audit report or final appeal, whichever is later.
• Audit criteria apply to all audits of claims submitted after July 1, 2007.
• Extrapolation audits are prohibited in calculating recoupments or penalties
• Each entity conducting an audit must have an appeals process. If the discrepancy exceeds $25,000 future payments to the pharmacy may be withheld pending finalization of the audit.

• Law does not apply to any investigative audit that involves fraud or willful misrepresentation.
Effective: 07/01/07

NORTH DAKOTA
Chapter 26.1-27

• Defines a PBM as an administrator and requires PBM to be registered as an administrator.
• Requires disclosure of ownership interest in the PBM by an insurer or a pharmaceutical manufacturer.
• Requires the PBM to notify the Commissioner in writing within five business days of any material change in the PBM's ownership.
• Requires PBM to comply with statutory provisions concerning substitution of one drug for another.
• PBM may not exclude an otherwise qualified pharmacy from its network if the pharmacy accepts the terms, conditions and reimbursement rates of the PBM's contract.
• PBM may not require a pharmacist or pharmacy to participate in one contract in order to participate in another contract.
• PBM must offer to the covered entity contracting options that must include: a transaction fee without a sharing of a payment received by the PBM, a combination of transaction fee and a sharing of the payment received by the PBM or a transaction fee based on the covered entity receiving all of the benefits of payments received by the PBM.
• Agreement between the PBM and the covered entity must include a provision allowing the covered entity to audit the PBM's books, accounts and records as necessary to confirm that the benefit of a payment received by the PBM is being shared as required by the contract.
• During an examination of a covered entity, the Commissioner may examine any contracts between the covered entity and the PBM in order to determine whether payments received from the PBM are being applied to reduce the covered entity's rates or have been distributed to covered individuals.
• Covered entity must disclose annually the benefits of the payments received and describe how the benefits received were applied towards reducing rates or distributed to covered individuals.
• Any information disclosed to the Commissioner is considered a trade secret.
• Legislative Council was directed to study the PBM industry and make a report and recommendations, together with legislation required to implement the recommendations to the next assembly.
Effective: 08/01/05

OKLAHOMA

Title 59, Section 356
Pharmacy Audit Integrity Act

- Establishes minimum and uniform standards and criteria for the audit of pharmacy records.
- Pharmacy contract must identify and describe the audit procedures.
- Entity conducting an onsite audit must give the pharmacy at least 2 weeks prior written notice before conducting an initial audit.
- An audit that involves clinical and professional judgment must be conducted by or in consultation with a licensed pharmacist.
- Entity conducting the onsite audit may not interfere with the delivery of pharmacy services.
- Pharmacy may use records of a hospital, physician or other authorized practitioner to validate the pharmacy record
- Recoupment of claims has to be based on actual overpayment or underpayment; however a projection may be used as part of a settlement as agreed to by the pharmacy.
- A finding of an overpayment shall include the dispensing fee amount unless the prescription was not dispensed or a physician denied authorization.
- Each pharmacy must be audited under the same standards and parameters as other similarly situated pharmacies audited by the entity.
- Period covered by the audit may not exceed two years from the date that the claim was submitted to or adjudicated by the entity.
- Audit cannot take place during the first 5 days of the month.
- Must disclose to the plan sponsor any money recouped in the audit.
- Preliminary audit report must be delivered within 120 days after the conclusion of the audit - final report must be delivered within 6 months after receipt of the preliminary report or final appeal. Pharmacy has at least 60 days to review preliminary report. Audit report must be written.
- Recoupments of disputed funds or repayment of funds must occur after final internal disposition of the audit including the appeal, if any, process. If identified discrepancy exceeds $25,000 future amounts in excess of that amount may be withheld pending finalization of the audit.
- Interest may not accrue during the audit period.
- Entity conducting the audit must establish a written appeals process.
- Plan sponsor must receive a copy of the final report.
- Act does not apply to any audit which involves fraud, abuse or willful misrepresentation.
- Not consider as fraud any clerical or record-keeping error, such as a typographical error, scrivener's error, or computer error regarding a required document or record; however, such claims may be subject to recoupment. No such claim shall be subject to criminal penalties without proof of intent to commit fraud;

Effective: 11/01/08

RHODE ISLAND
Title 27 – Insurance
Chapter 27-29.1

• Includes PBMs in the definition of third-party administrator under chapter 20.7 and thus requires filing of an annual report
• Annual report filed by third-party administrators with the department of business regulation shall include: contractual language that provides a complete description of the financial arrangements between the third-party administrator and each of the insurers covering benefit contracts delivered in Rhode Island
• If the third-party administrator is owned by or affiliated with another entity or entities, it shall include an organization chart and brief description which shows the relationships among all affiliates within a holding company or otherwise affiliated
• Report must be in a format required by the director and filed with the department as a public record

Effective: 07/05/04

SOUTH DAKOTA
Chapter 58-29E -- Pharmacy Benefits Management

• Requires PBMs to be licensed as a third party administrator.
• Requires PBM to perform its duties by exercising good faith and fair dealing toward the covered entity.
• Gives the covered entity the option to request information from the PBM on rebate revenues and retrospective utilization discounts.
• Gives the covered entity the option to request information on the nature, type and amount of all other revenue received from a pharmaceutical manufacturer or labeler for programs that the covered entity offers to its enrollees.
• Prohibits a PBM from contacting a covered individual without express written permission of the covered entity.
• Provides that information disclosed to the covered entity shall be confidential and proprietary information; however insurance department may request information but it will be considered confidential and privileged and not open to public inspection or disclosure.
• Provides that the covered entity may audit the PBM's records as they relate to rebates and other information described in this Chapter.
• Prescription may be substituted if it is a lower priced generic or if the substitution is for medical reasons but PBM must obtain prior approval from the prescriber.
• Allows the Division of Insurance to promulgate rules.
• Applies to contracts entered into or renewed after June 30, 2004.

Effective: 03/09/04

TENNESSEE
Titles 56 and 63

• Establishes certain standards for audits of pharmacies conducted by PBMs
• At least two weeks prior written notice must be given to the pharmacy before conducting the initial on-site audit.
• If clinical or professional judgment is required audit must be conducted in consultation with a pharmacist who has knowledge of the Tennessee Pharmacy Practice Act.
• Pharmacy may use records of a hospital, physician or other authorized practitioner to validate the pharmacy record.
• Unless consented to by the pharmacy, the audit cannot take place during the first 7 days of the month due to high volume of prescriptions filled during that time.
• Pharmacist must be given no less than 30 days following receipt of the audit report to produce documentation to address any discrepancy
• PBM must establish an appeals process and provide the pharmacist a written explanation of the process.
• Use of extrapolation audits for calculation of recoupments or penalties is prohibited.
• Preliminary audit report must be delivered within 120 days and the final report must be delivered with 6 months after receipt of the preliminary audit report or final appeal, whichever is later.
• Period covered by an audit cannot exceed two years from the date the claim was submitted or adjudicated.
• Recoupment of any disputed funds cannot take place until after the final internal disposition of the audit including any appeal process
• If PBM uses a nationally recognized reference to calculate reimbursement then the PBM must use the most current reference price or amount
• Requires PBMs to provide timely updates to pharmacy product pricing files used to calculate prescription prices and reimburse pharmacies. Files must be updated no less than every 3 business days.
• Any clerical or record-keeping error, such as a typographical error, scrivener's error, or computer error, regarding a required document or record may not, in and of itself, constitute fraud; however, such claims may be subject to recoupment. Notwithstanding any other provision of law to the contrary, no such claim shall be subject to criminal penalties without proof of intent to commit fraud;

Effective: 07/01/07

Tenn. Code Ann. Title 56, Chap. 7 Sec. 3201-3205

- Specifies that when PBMs provide patients information regarding out-of-pocket costs, such as co-pay, for a prescription or service, they must provide the patient the actual reimbursement
- Prohibits PBMs from restricting pharmacies from disclosing to patients the actual reimbursement for a particular prescription or covered service

Effective: 1/1/2010

TEXAS
Texas Insurance Code Chapter 1369, Subchapter B Sect. 1369

- Provides for a study to evaluate how PBMs use prescription drug information to manage therapeutic drug interchange programs and other drug substitution recommendations

Effective: 9/1/2009

Texas Gov. Code Chap. 2158, Subchapter H
An Act Relating to the Regulation of PBMs and Mail Order Pharmacies

- Requires state agencies to disclose information relating to amounts charged by PBMs for PBM services provided under prescription drug programs –information must be provided within 30 days of request
- Provides for a study to evaluate how PBMs use prescription drug information to manage therapeutic drug interchange programs and other drug substitution recommendations
- Provides that in awarding contracts to provide PBM services the board of trustees of the Employee Retirement System of Texas is not required to select the lowest bid but must meet certain criteria – includes, contract that must state board of trustees ability to audit PBM, entitlement to access PBM cost and service information during audit, define information PBM must provide related to pharmacy audits, and required independent auditing of mail order pharmacies owned by the PBM
- Prohibits mail order requirement for prescription drug coverage
- Requires PBMs to allow enrollees to obtain a multiple-month supply of any prescription drug from a community pharmacy under same terms and conditions as when purchased through a mail-order pharmacy – community pharmacy must accept same reimbursement that applies to a mail-order pharmacy
- PBMs must reimburse pharmacies for both brand and generic drugs using reimbursement rates based on current and nationally recognized benchmark indices that include AWP and MAC.

Effective: 9/1/2009

VERMONT
18 V.S.A. Chapter 221, Sections 9421, 9471 – 9473
Pharmacy Benefit Managers

• PBM must discharge its duties with reasonable care and diligence and be fair and truthful

• PBM must provide notice to a health insurer that the following terms may be included in its contract with the PBM:

(1) all financial and utilization information requested by the insurer

relating to the provision of benefits to beneficiaries through that insurer's health plan (information may be designated as confidential);
(2) notify the insurer of any proposed or ongoing activity that, directly or indirectly, poses a conflict of interest;
(3) if a substitute drug is to be dispensed which costs more than the prescribed drug and the PBM receives a payment or benefit then the cost of both drugs and the benefit or payment must be disclosed;
(4) if PBM derives any benefit based on volume of sales for certain drugs or classes or brands of drugs, that payment or benefit must be passed on in full to the health insurer; and
(5) disclose all financial terms and arrangement for remuneration of any kind that apply between the PBM and the drug manufacturer including formulary management and drug-switch programs, educational support, claims process and pharmacy network fees charged from retail pharmacies and data sales fees (information may be designated as confidential).
• PBM must register before doing business in the state
• PBM must notify health insurers that they are entitled to a quote for an administrative-services-only (ASO) contract with full pass through of negotiated prices, rebates and other such financial benefits which would identify to the insurer external sources of revenue and profit generally available and whether the PBM offers that type of arrangement.
• In order to verify the pricing arrangements of ASO contracts, the PBM must allow access to the Commissioner to conduct an audit
• Department's expenses in conducting the audit must be paid by the PBM
• Applies to all contracts executive or renewed on or after September 1, 2007.
Effective: 07.01.07

DISTRICT OF COLUMBIA
Title 48, Subtitle II, Chapter 8A, Subchapter II.
Transparent Business Practices Among Pharmacy Benefit Managers

• Requires a PBM to act as a fiduciary.
• PBM must perform its duties with care, skill, prudence and diligence
• Requires the PBM to notify the covered entity in writing of any practice that is a conflict of interest.
• Requires any payments/benefits that a PBM receives from a drug manufacturer or labeler based on volume of sales or market share must be paid in full to the covered entity; however covered can agree to return a portion of the benefit or payment to the PBM
• Upon request by the covered entity, the PBM must provide information on all rebates, discounts and other similar payments.
• Upon request by the covered entity, the PBM must disclose all financial terms and arrangements for remuneration of any kind between the PBM and a drug manufacturer or labeler including formulary management, drug substitution programs, educational support claims processing and data

sales fees.
• PBM may designate the information provided as confidential.
• If a PBM substitutes another prescription drug for a prescribed drug and if the substitute drug costs more than the prescribed drug, the PBM must disclose the costs of both drugs and any benefit or payment directly or indirectly that accrues to the PBM as a result of the substitution. Any benefit or payment received as a result of the substitution must be transferred in full to the covered entity.
• Violations are subject to a fine of not more than $10,000.
Effective: 09/16/06 (This law remains the subject of litigation by PCMA.)

State of Alaska
Senate Labor and Commerce Committee
Hearing on Pharmacy Audits
Testimony of the National Community Pharmacists Association
March 1, 2012

Chairman Egan and honorable members of the committee:

On behalf of the National Community Pharmacists Association (NCPA) I wish to thank you for conducting this hearing. NCPA testifies today in strong support of S.B.217 as legislation that provides fair and common sense protections for pharmacies against what are currently abusive audit practices by PBMs. Let me first be clear, this legislation does not prevent audits from occurring for their intended purpose of preventing fraud, waste and abuse. In fact, this legislation specifically states that the standards within S.B.217 do not apply when pertaining to criminal investigation or an investigation by a government agency. NCPA members understand that audits must occur to catch fraud and abuse within the system. However, current PBM audits of pharmacy are in many cases simply being used as a lucrative revenue source

NCPA represents America's independent community pharmacists, including the owners of more than 23,000 community pharmacies, pharmacy franchises and chains. Together, they employ over 300,000 full-time employees and dispense nearly half of the nation's retail prescription medicines. In Alaska alone there are over 39 community pharmacies, which employee a projected 413 residents. The average independent community pharmacy generates $4 million in annual revenue and employs 10.6 full-time individuals. Alaska's independent community pharmacies generate $157 million in annual revenue. Also, those community pharmacies support additional revenues to other state businesses in the amount of $141.2 million annually and support additional full-time employment to other businesses equal to 165 employees.

NCPA has long championed the need for greater oversight of pharmacy benefit managers (PBMs) and many of their questionable business practices due to the problems our members and their patients continue to face. One of the largest problems that NCPA pharmacist members face in today's pharmacy marketplace, is the issue of abusive audit practices. This issue occurs nationwide and many states are taking steps to protect their pharmacists and small business owners. Today about 15 states have implemented some level of fair audit protections. It is not uncommon for these audits to penalize an independent pharmacy tens of thousands or even hundreds of thousands of dollars for nothing more than a clerical or administrative mishap, many of which are not the fault of the pharmacy. Let me be clear, the so called errors I am referring to are instances in which the correct medication was dispensed to the correct person and the correct fee was charged to the patient and plan.

Let me provide you with a recent example of a "minor" audit that an NCPA member went through. This member was penalized $14,000 for not using a physician's number in their computer system. The catch was that in this case, it was a Certified Nurse Practitioner (CRNP) that wrote the order so there was no physician's number to log in. The prescriber was not a physician! The pharmacist took measures to ensure he was properly compliant and contacted the insurance company who indicated this was not a problem and he should use the CRNP License number. He did this. In addition, he also attached a copy of the CRNP's actual license just so it was clear what he was doing. He then logged the phone call to further protect himself. Even so, when he was audited, the PBM demanded $14,000 back. After all the steps this pharmacist took to ensure he was acting

100 Daingerfield Road
Alexandria, VA 22314-2888
(703) 683-8200 PHONE
(703) 683-3619 FAX

properly, he ultimately settled this issue for $12,000. The pharmacist was doing exactly what he was told to do by the insurance company and even took additional steps to make sure everything was properly documented. Even so, this pharmacist small business owner took a loss of $12,000. These stories occur on a regular basis. Similar stories have resulted in pharmacists being fined $250,000 or even more.

Rather than legitimately using the audit process to guard and protect against fraud, many PBMs now view the process as a profitable revenue stream for the company. In fact, many auditors are incentivized by receiving payment based on a percentage of the money reclaimed. PBMs now go well beyond the basic intent of an audit, to catch fraud and abuse, and instead focus on typographical or administrative errors, or loopholes in the rules and regulations such as the above story as a basis to recoup money from the pharmacy. In many cases, if a PBM auditor identifies an administrative error, he or she will "take back" 100% of the value of that prescription and even all its refills—a severe financial penalty that is out of proportion to the gravity of the offense.

Another egregious practice many PBMs employ in order to "ensure" that discrepancies will be found is to establish elaborate record keeping requirements well in excess of what is required under state or federal law or other PBMs. Pharmacies typically maintain contracts with multiple PBMs. The result is a myriad of conflicting documentation requirements that can make operating a busy pharmacy and providing patient care an even greater challenge.

NCPA is confident that once members review S.B.217 they will see the measures spelled out are reasonable standards to ensure that abuses do not occur. In circumstances where fraud or legitimate errors occur, independent pharmacists understand that steps must be taken to correct these errors and recoup a reasonable sum of money. As business owners, independent pharmacists realize that there are individuals in every profession that may try to work the system. In those cases, we fully support the recoupment of money. These instances are not what is being referred to today.

In conclusion, NCPA urges your support of S.B.217—legislation that will provide pharmacies an understandably needed degree of protection against the overaggressive and far reaching PBM audit practices. Community pharmacists understand that in business there must be audits to identify those instances where true fraud occurs. However, these audits should not be utilized to only increase PBMs profit margins. I thank you for taking NCPA's concerns into consideration.

I welcome your questions at this time.

NCPA
NATIONAL COMMUNITY PHARMACISTS ASSOCIATION

WWW.NCPANET.ORG

February 29, 2012

The Honorable Dennis Egan
State Capitol Room 510
Juneau AK, 99801

Dear Senator Egan:

I am writing today on behalf of the National Community Pharmacists Association (NCPA) in strong support of S.B.217. This legislation would provide some fair and common sense protections for pharmacies against abusive pharmacy audit practices. NCPA represents America's independent community pharmacists, including the owners of more than 23,000 community pharmacies, pharmacy franchises and chains. Together, they employ over 300,000 full-time employees and dispense nearly half of the nation's retail prescription medicines. In Alaska alone there are over 39 community pharmacies which employee a projected 413 residents.

NCPA has long championed the need for greater oversight of pharmacy benefit managers (PBMs) and many of their questionable business practices due to the problems our members and their patients continue to face. PBMs have been allowed to operate virtually unchecked since their inception—slowed only by the increasing amount of litigation alleging fraudulent and deceptive business practices filed against the PBMs each year and some extremely limited regulation. One of the largest problems that NCPA pharmacist members face in today's pharmacy marketplace, is the issue of abusive audit practices.

Rather than legitimately using the audit process to guard and protect against fraud, many PBMs now view the pharmacy audit process as a profitable revenue stream for the company. These audits can claim hundreds of thousands of dollars for nothing more than basic administrative or typographical mistakes, many not even occurring at the fault of the pharmacist or pharmacy staff. Many PBMs now go well beyond the basic intent of an audit, to catch fraud and abuse, and instead focus on these typographical or administrative errors as a basis to recoup money from the pharmacy. In many cases, if a PBM auditor identifies an administrative error, he or she will "take back" 100% of the value of the prescription and all refills—a severe financial penalty that is out of proportion to the gravity of the offense.

Another egregious practice many PBMs employ in order to "ensure" that discrepancies will be found is to establish elaborate record keeping requirements well in excess of what is required under state or federal law or other PBMs. Pharmacies typically maintain contracts with multiple PBMs. The result is a myriad of conflicting documentation requirements that can make operating a busy pharmacy and providing patient care an even greater challenge.

In conclusion, NCPA urges the support of S.B.217—legislation that will provide pharmacies an understandably needed degree of protection against the overaggressive and far reaching PBM audit practices. Community pharmacists understand that in business there must be audits to identify those instances where true fraud occurs. NCPA is confident that once you review S.B.217 you will find it simply sets reasonable standards to insure that audits continue to be useful for their true intent yet cannot be utilized to only increase PBMs profit margins. If you have any questions about the information contained in this letter or wish to discuss in greater detail, please do not hesitate to contact me at matt.diloreto@ncpanet.org or at (703) 600-1223.

NACDS NATIONAL ASSOCIATION OF CHAIN DRUG STORES

February 2, 2012

The Honorable Cathy Munoz
The Honorable Peggy Wilson
Alaska State House of Representatives
Alaska State Capitol
Juneau, AK 99801-1182

RE: House Bill 259 – Pharmacy Audits

Dear Representatives Munoz and Wilson,

On behalf of the members of the National Association of Chain Drug Stores (NACDS) operating in the State of Alaska, I ask for your support of House Bill 259. NACDS members operating in Alaska include Costco, Health Mart Systems, Safeway/Carrs, Target, Walgreen and Wal-Mart.

Auditing practices and their lack of standardization have long been the bane of pharmacies. House Bill 259 would set the standard by which pharmacies are audited and allow for appeal in the case of disagreement.

Pharmacies are not opposed to audits based on suspicion of fraud, unlawful billing practices and abuse. However, most audits are preformed based on a "hunting" expedition where the entity contracting for the audit is looking for additional revenue on the basis of overpayments based on technical errors.

Technical errors are ones in which the right person, got the right drug, in the right dose at the right time, but there is some type of clerical, record-keeping or typographical error.

We applaud your sponsorship of this legislation and the parameters it establishes for auditing practices.

Provisions of the Bill

- Two weeks notice would be very helpful due to the personnel and time needed to compile the records for auditing;
- Eliminating the first seven days of the month would be tremendously helpful to pharmacies due to the large influx of prescriptions during that time period;
- Limiting the "look back" to a period of two years allows the pharmacies to go back and bill a different third-party payer that they may have been unaware of at the time of original billing;
- Disallowing the use of extrapolation is a huge issue for pharmacies as they are an extremely inaccurate methodology for determining over or underpayment;
- Disallowing an overpayment to include dispensing fees is fair based on the fact overpayments are calculated on the cost of the drug; and
- Providing for a mechanism by which the pharmacy can appeal the findings allows for fairness in the process.

We appreciate your sponsorship of the legislation and stand ready to answer questions as they may arise to keep this bill moving through the legislative process.

Sincerely,

Lis Houchen

RE: SB 217: Auditing Pharmacy Records

Dear Senator Eagan,

The Alaska Board of Pharmacy, at its February meeting in Anchorage, voted unanimously in favor of supporting House Bill 259 (An Act establishing procedures and guidelines for auditing pharmacy records, and providing for an effective date). The Board feels the time for such statutory oversight is overdue. This industry has operated far too long without oversight, and the need is great to protect not only our pharmacies, but the patients they serve. Our hope is to see this bill enacted without delay. Thank you.

Sincerely,

Richard Holm, R. Ph.

Alaska Pharmacists Association

February 3, 2012

The Honorable Cathy Munoz
The Honorable Peggy Wilson
Alaska State House of Representatives
Alaska State Capitol
Juneau AK 99801-1182

RE: House Bill 259 – Pharmacy Audits

Dear Representatives Munoz and Wilson,

On behalf of the members of the Alaska Pharmacists Association, I ask for your support of this important bill for the benefit of all pharmacies in the State of Alaska. Our membership includes pharmacists, pharmacy technicians, pharmacies and others interested in the practice of pharmacy throughout the state.

This bill will standardize the manner in which pharmacies may be audited and will allow for appeal in the case of disagreement. Pharmacies realized that audits may be a way to detect fraud, unlawful billing practices, and abuse, but sometimes they are done as a way of looking for additional revenue on the basis of overpayment for technical errors. These technical errors are ones where the right person got the right drug in the right dose but there was some sort of clerical or typographical error in the billing.

Some provisions of the bill that we think are especially important are:

- Two weeks notice to allow pharmacies to gather the needed information with less disruption to their daily routine
- Eliminating the first 7 days of the month from a potential audit would be very helpful because pharmacies see a greater number of prescriptions in the first part of the month
- Limiting the audit period to two years
- Disallowing the use of extrapolation when auditors determine over or underpayment
- Disallowing an overpayment to include the dispensing fee since overpayments are based on the cost of the drug and dispensing fees are for the service rendered
- Providing for a method of appeal

The Alaska Pharmacists Association appreciates your sponsorship of this important piece of legislation.

Sincerely,

Margaret D. Soden, RPh, President

March 6, 2012

Senator Dennis Egan
State Capitol Room 510
Juneau, Alaska 99801

Re: SB 217, Pharmacy Audits

Dear Senator Egan,

On behalf of Premera Blue Cross Blue Shield of Alaska, I am writing to you to express our concerns with SB 217, pertaining to pharmacy audits.

The purpose of pharmacy auditing is similar to other types of audits – it is a process for verifying compliance with requirements and regulations and to ensure appropriate quality standards are met. Typically, the language of the contract between the Pharmacy Benefits Manager (PBM) and a pharmacy specify the components and conditions of the auditing process.

In this case, Premera's Pharmacy Benefits Manager, Medco, conducts audits on a regular basis, as specified in the contract, to ensure pharmacies are providing services and billing in compliance with the contract that they hold with Medco. Medco has effective, appropriate pharmacy auditing processes already in place.

Therefore, we oppose SB 217, as it would interfere with the contractual agreement between these parties.

Thank you for considering our concerns on this issue. I would be happy to answer any questions that you may have.

Sincerely,

Jack C. McRae

Senator Dennis Egan
Alaska State Senate
State Capitol Room 510
Juneau AK, 99801

RE: Senate Bill 217 – Pharmacy Audits

Dear Senator Egan:

As one of Alaska's largest private employers (2900 employees in 11 stores in Alaska), I am writing to express Fred Meyer Stores' support of this important bill.

This bill will standardize the manner in which pharmacies may be audited and will allow for appeal in the case of disagreement. As Pharmacists, we recognize that audits are vital to detecting fraud, unlawful billing practices, and abuse. However, there are times when penalties are assessed for truly innocent technical errors. These technical errors are ones where the right person got the right drug in the right dose but there was some sort of clerical or typographical error in the billing. Penalties based on these situations fall outside the spirit and purpose of auditing.

Some provisions of the bill that we think are especially important are:

- Two weeks' notice to allow pharmacies to gather the needed information with less disruption to their daily routine (Pharmacies run a VERY tight ship in order to help do our part in preventing more increases in health care costs.)
- Eliminating the first 7 days of the month from a potential audit would be very helpful because pharmacies see a greater number of prescriptions in the first part of the month
- Limiting the audit period to two years
- Disallowing the use of extrapolation when auditors determine over or underpayment
- Disallowing an overpayment to include the dispensing fee since overpayments are based on the cost of the drug and dispensing fees are for the service rendered
- Providing for a method of appeal

These are reasonable provisions that still provide for the oversight needed in an industry such as Pharmacy, where the safety of our customers is our top priority, just as it is for the State.

Thank you for your sponsorship of this legislation. If I can answer any questions, please call me at 907-267-6786.

Sincerely,

Mark Bohrer

Re: SB 217 Letter of Opposition from Alaska Teamsters on HB 259

The Alaska Pharmacists Association respectfully disagrees with the Teamsters that HB259 is not well defined and is not revenue neutral.

This bill is based on model legislation that has passed in approximately 20 states and legislative legal counsel has had adequate time to review and modify any Alaska specific language. The bill does not set forth any commissions or mandate any state specific agency oversight.

Regarding claims in the letter that certain portions of the bill are "vague and not well written" we again respectfully disagree. Our association is willing to sit down with teamster representatives anytime to explain the specific line items and why it's important to have fair audit standards for Alaskan Pharmacists.

I will address specific items that were addressed in the letter:

Subparagraph 3 requires the audit of a claim within two years. This is consistent with State of Alaska Pharmacy practice statutes that mandates pharmacies keep prescription records for only **two years.**

Subparagraph 6 merely says a clerical error doesn't constitute fraud. The "marking up the price of a prescription by a dollar" example isn't relevant in today's world. Even if a pharmacy submitted a price of a prescription for a dollar more than the contracted rate the pharmacy would still only get the contracted rate. Not a penny more or less.

Subparagraphs 8 & 9 sets forth when and how extrapolations can be used. Legislation addressing this issue has been enacted in at 11 other states. Extrapolation is a serious issue for pharmacy that must be corrected.

Subparagraph 11 the claim that "there is a lot of revenue built into the dispensing fee" is misleading. I am sure if you look at the total plan expenditures the dispensing fees, at an average of $2-$3 per prescription, are a small portion of the overall drug plan expenditures. However, these are the dollars necessary to provide pharmacy services and it is unfair to take them back when a service is provided.

Subparagraph 12 -16 covers delivery of the final audit and appeal process. The letter notes for example that most pharmacy contracts already allow 90 days for the audit results to be delivered to pharmacy. However in a Teamsters Healthtrans PBM contract example, submitted by one Alaskan pharmacy, no date was given for an audit finding results back to the pharmacy. In fact the contract only contained two reference lines regarding audits. This is exactly the problem pharmacies in Alaska face in dealing with multiple PBM contracts that do not allow for negotiating such language. HB 259 standardizes and gives structure to the auditing process.

CVS CAREMARK

Testimony in Opposition to Senate Bill No. 217

Submitted by

Eric P. Douglas
Director, Government Affairs
CVS Caremark Corporation

To

Alaska State Senate
Senate Labor and Commerce Committee

March 1, 2012

Committee Chair Eagan, Vice Chair Paskvan, Honorable members of the Alaska Senate Labor and Commerce Committee; my name is Eric Douglas and I am the Director of Government Affairs for CVS Caremark over the Western United States. Thank you for providing me with an opportunity to testify before you today. CVS Caremark respectfully submits this testimony in opposition to Senate Bill 217 ("SB217"). This bill consists of four Sections covering numerous audit practices and procedures, many of which are overly prescriptive and would hinder our ability to perform audit functions on behalf of our clients. Therefore, we ask that you reject SB217.

Background and Information Regarding Fraud and Use of Audits

CVS Caremark is the leading pharmacy health care provider in the country. Through our integrated offerings across the entire spectrum of pharmacy care, we are uniquely positioned to provide greater access to care, engage plan members in behaviors that improve their health, and lower overall health care costs for health plans and their members. As one of the country's top PBMs, we also provide access to a network of more than 65,000 pharmacies, including over 7,300 CVS pharmacies. Our relationship with our network pharmacies is a critical component to the value we bring to our clients and their beneficiaries. To deter fraud and ensure contract pharmacies comply with CVS Caremark quality assurance requirements, we audit a minimum of five-percent (5%) of contracted pharmacies annually. CVS Caremark audits network pharmacies based on statistical analysis of claims data or as a result of state regulatory authorities and clients informing us about potential violations. PBMs look for errors, irregularities and

suspicious patterns over time and claims are compared with historical information as well as claims submitted by similarly situated pharmacies, e.g. geographically, by volume, etc. Substantial changes in the volume of claims submitted or the dollar amount of claims form particular pharmacies can also be in indication of fraudulent activity.

Following an audit, CVS Caremark allows a pharmacy 30 days to submit additional documentation on claim discrepancies. This is especially important to a pharmacy that has itself been a victim of fraudulent activity by one or more of its employees. Unacceptable findings discovered by an audit may include the submission of a fraudulent claim or a pharmacy consistently demonstrating a failure to follow the claims submissions policies clearly outlined in their Provider Manual. However, the more common type of fraud discovered is a "phantom" billing where a claim is submitted by a pharmacy but cannot be supported by a valid prescription on audit.

For pharmacies that have unacceptable audits or have submitted fraudulent claims, our Management Review Committee meets quarterly to review unacceptable and fraudulent activity to determine if continued membership in our network places our clients and their beneficiaries at risk. The Committee is made up of CVS Caremark employees from various cross-functional departments. Additionally, when we find irrefutable evidence of fraud we report it to the appropriate authorities and state agencies. CVS Caremark is active in both the National Association of Drug Diversion Investigators ("NADDI") and the National Health Care Anti-Fraud Association ("NHCAA"). These two organizations and their members make it their mission to assist in investigating and prosecuting pharmaceutical drug diversion.

"Health care fraud is a pervasive and costly drain on the U.S. health care system. In 2008, Americans spent $2.34 Trillion dollars on health care. Of these trillions of dollars spent, the Federal Bureau of Investigation ("FBI") estimates that between 3 and 10 percent (3%-10%) was lost to health care fraud." [i]

In 2010 alone, a joint health care fraud and prevention effort between the U.S. Department of Justice and the Department of Health and Human Services resulted in the recovery of more than $4 Billion in taxpayer dollars. A not insignificant portion of the recovered money came from uncovering pharmacy fraud schemes that included fraudulent billing practices and illegal dispensing of medications.[ii]

CVS Caremark recommends that the government not impose onerous pharmacy audit restrictions that will lessen PBM's ability to detect and recover monies resulting from fraudulent activity, abuse and wasteful spending in our healthcare system.

Conclusion

CVS Caremark sincerely appreciates the opportunity to submit our testimony regarding this legislation. SB217 unfortunately would create unreasonable restrictions on legitimate and necessary audits of prescription drug claims submitted for payment by pharmacies in Alaska. SB217 would weaken the ability of an insurer, MCO or PBM to protect its clients, detect fraud, reject invalid claims and recoup a clients' money when they have been improperly billed. For these reasons, CVS Caremark respectfully asks for your "NO" vote, rejecting SB217.

I will be pleased to answer any questions the Committee members may have and again, thank you for the opportunity to testify before you today.

NACDS Applauds Enactment of Indiana Bill to Counter Unfair PBM Audit Practices

Legislation reflects growing nationwide recognition of need to protect patients and community pharmacies from predatory PBM policies

Alexandria, Va. – The National Association of Chain Drug Stores (NACDS) today lauded the enactment of legislation in Indiana to prevent unfair pharmacy benefit manager (PBM) audit practices that could hinder patient access to community pharmacy-provided services, which help advance patient health and reduce costs to the health system.

Among other provisions, the legislation specifies PBM audit requirements of pharmacies – including reasonable time frames and procedures – and strengthens standards that help prohibit PBMs from acting in a belligerent manner to use their enormous leverage when conducting these audits.

Governor Mitch Daniels (R) signed Senate Bill 407 after the Indiana legislature approved the measure last week. NACDS sent a letter to Governor Daniels urging him to sign the bill, underscoring the importance of protecting community pharmacies from the virtually unregulated PBM industry.

"Ensuring PBM compliance with reasonable and appropriate business practices will increase transparency on the opaque PBM industry and benefit patients in making their healthcare choices," said NACDS President & Chief Executive Officer Steven C. Anderson, IOM, CAE. "We applaud Governor Daniels and Indiana policymakers for enacting this vital legislation that will help prevent PBMs from dictating unreasonable contract terms to pharmacies and employing anti-competitive practices."

Indiana now joins several other states that have either enacted or are considering legislation to rein in one-sided PBM tactics, audit requirements and reimbursement procedures. For example, Utah lawmakers recently passed legislation that also would require PBM audits of pharmacies to use fair and rational standards, while also addressing other concerns with reimbursement.

Unfair PBM audit, transparency and reimbursement practices have also generated attention on the federal level. Just this week, U.S. Representative Cathy McMorris Rodgers (R-WA) introduced legislation that would establish Medicare standards for pharmacy audits and reimbursement by PBMs. Representative McMorris Rodgers has also introduced, along with U.S. Senator Mark Pryor (D-AR), the Pharmacy Competition and Consumer Choice Act (H.R. 1971 and S. 1058), which address concerns with forcing beneficiaries to use a PBM's own mail order pharmacy, the frequency of updating maximum

allowable cost (MAC) pricing, data usage, and other issues identified by Members of Congress.

"From the U.S. Capitol to state legislatures, policymakers are sending a clear message that PBMs must use fair practices and cease the utilization of auditing gimmicks to attack community pharmacies," Anderson said. "NACDS will continue advocating on the federal, state and local levels to preserve patient access to neighborhood pharmacies, which have demonstrated a proven track record of gaining patients' trust and offering services to improve health while reducing costs."

For more information on NACDS efforts to highlight detrimental PBM practices and oppose the proposed mega-merger of PBMs Express Scripts and Medco, which would likely exacerbate existing PBM problems, please visit www.TooBigToPlayFair.com.

###

The National Association of Chain Drug Stores (NACDS) represents traditional drug stores, supermarkets, and mass merchants with pharmacies – from regional chains with four stores to national companies. Chains operate more than 40,000 pharmacies and employ more than 3.5 million employees, including 130,000 pharmacists. They fill over 2.6 billion prescriptions annually, which is more than 72 percent of annual prescriptions in the United States. The total economic impact of all retail stores with pharmacies transcends their $900 billion in annual sales. Every $1 spent in these stores creates a ripple effect of $1.81 in other industries, for a total economic impact of $1.76 trillion, equal to 12 percent of GDP. For more information about NACDS, visit www.NACDS.org.

Pharmacies. The face of neighborhood healthcare.

SPONSOR STATEMENT – SENATE BILL 221

SB 221 – An Act relating to the disposition of proceeds from the alcoholic beverage tax and to the alcohol and other drug abuse treatment and prevention fund.

The state of Alaska is projected to collect nearly $40 million dollars from the existing alcohol excise tax in FY2013. SB 221 allocates 100 percent of existing alcohol tax revenue to the Alcohol and Other Drug Abuse Treatment and Prevention Fund (ADTP). In 2002, State Representative Lisa Murkowski championed HB225 to raise the alcoholic beverage tax and establish the ADTP to "help provide revenue needed for the expanded treatment, therapeutic courts, diversion programs and other initiatives now under consideration in the Legislature." Since 2003, only 50 percent of funds collected from the existing alcohol tax have been appropriated to the ADTP. While the political reasoning for the fund was to expand treatment, decreases in general fund spending have left overall funding for substance abuse treatment and prevention reduced or stagnant.

Despite passage of HB 225, demand for residential treatment, intensive outpatient, aftercare and community treatment and prevention programs continue to dramatically exceed the substance abuse treatment system's capacity. Providers throughout the state report treatment beds are full to capacity, long waiting lists exist for services they offer, and there are numerous requests for services they can't provide.

According to the Division of Behavioral Health, when the 141,000 uninsured Alaskans living at or below 250 percent of the federal poverty index become eligible for publicly funded health insurance after 2014 under federal law, (based on 2006 prevalence estimates) at least 2,800 of these adults can be expected to experience a substance abuse disorder requiring treatment. Federal match funds (FMAP) will provide 100 percent funding for expanded populations from 2014-2016, then phase down to a 90 percent match by 2020. Failing to build adequate alcohol and drug treatment capacity for the Medicaid expansion will have a profound impact on State General Fund expenditures for the Medicaid program long into the future. Passage of SB 221 will provide supplemental funding to expand treatment capacity statewide by addressing the backlog of capital budget requests for evidence-based detox and treatment facilities, as well as reinforce and expand current substance abuse treatment programs.

Alcoholism and drug abuse are inextricably linked to Alaska's epidemic levels of domestic violence and sexual assault, suicide, child neglect cases and rising corrections costs. According to a 2005 McDowell report, costs incurred as a result of substance abuse neared $738 million annually. With a small statutory change, all monies collected from alcohol taxes can be put toward proven substance abuse treatment and prevention programs. I strongly urge you to join in support of SB 221 to allocate 100 percent of existing alcohol tax revenue for substance abuse treatment and prevention.

Behavioral Health Response
LegLog 870
Breakdown of Funding for SA Treatment & Prevention by Component and Fund Source
11/3/2011

Behavioral Health offers response to the following request:

- Can we provide a breakdown of our alcohol and drug treatment and prevention programs by component showing funding by fund source for FY11? FED, UGF, DGF, Other.

Based on the associated core services, Behavioral Health recognizes the expenditures and revenue in the following components as Substance Abuse related.

- AK Fetal Alcohol Syndrome Program – SA Prevention and Intervention
- Alcohol Safety Action Program (ASAP) – SA Prevention and Intervention
- Community Action Prevention & Intervention - SA Prevention and Intervention
- Rural Services & Suicide Prevention - SA Prevention and Intervention
- Behavioral Health Grants – SA Treatment

The attached spreadsheet reports actual expenditures and revenue in the above components for FY11. The expenditures and revenue reported for Substance Abuse Administration are based on an allocation proportionate to the expenditures in the substance abuse components vs. the expenditures in the mental health related components. The expenditures reported for Substance Abuse Medicaid are available at the collocation code level.

FISCAL NOTE #1

STATE OF ALASKA **BILL NO.** SB 221
2012 LEGISLATIVE SESSION

Analysis

Bill Language:
Under current statute, 50% of the Alcoholic Beverage Excise Tax is deposited into the alcohol and other drug abuse treatment and prevention fund , a subaccount within the general fund, and the remaining 50% is deposited directly into the general fund. This bill would require the entire proceeds of the Alcoholic Beverage Excise Tax to be deposited in the alcohol and other drug abuse treatment and prevention fund established in the general fund. In FY 2011, the Tax Division collected approximately $38.7 million in total alcoholic beverage excise tax. Approximately $19.3 million was deposited in the alcohol and other drug abuse treatment and prevention fund. Under this bill, the entire amount would be deposited in the drug abuse treatment and prevention fund.

Revenues:
The bill has no effect on total revenues.

Expenditures:
The department can implement the provisions of the bill with existing resources.

FISCAL NOTE #2

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB 221

Analysis

This bill relates to the disposition of proceeds from the alcoholic beverage tax and to the alcohol and other drug abuse treatment and prevention fund.

This fund was established several years ago, and there are processes in place for the Department of Revenue to make the deposits of taxes, and the Department of Health and Social Services to expend the funds upon receiving an appropriation.

This bill will have no fiscal impact on the Department of Administration, Division of Finance.

Senator Lyman Hoffman, Co-chair
Senator Bert Stedman, Co-chair
Senate Finance
Alaska State Legislature
Alaska State Capitol
Juneau, AK 99801

Dear Senator Hoffman and Senator Stedman:

Please accept this letter of support for HB 78. The Mat-Su Health Foundation (MSHF) is a 501c3 that owns part of the Mat-Su Regional Medical Center. We invest revenues from our local hospital into grants to improve the health of Mat-Su residents. MSHF's mission is to improve the health and wellness of Alaskans living in Mat-Su, with the goal to become the healthiest borough in the state of AK by 2017. We have four strategies to reach this goal. One strategy is to reduce barriers to healthcare access.

One key barrier to access is the lack of healthcare professionals to deliver healthcare services. On the acute care side, building a new hospital has helped our community attract qualified physicians, specialists, and nursing and technical staff to deliver the quality care our Mat-Su residents need and deserve. MSRMC spends thousands of dollars annually to recruit these professionals, most of them from out-of-state—especially for hard to fill positions for pharmacists, physical therapists, occupational therapists, and others for which there is no professional education within the state of AK.

Until the needed clinician is recruited, the hospital still has to deliver that quality care. In the interim, it hires "travelers" from out of state with the credentials to fill these needed slots. MSRMC spent $6,447,814 from 2004 through 2010 on contract, temporary health professionals from outside AK to fill current needs. And that is probably one of the lowest expenditures for contract labor of hospitals in the state. Because we have a relatively new hospital in a growing community, we have had great success in recruiting. So believe it or not, this $6.4 million is low by industry standards.

Despite what MSRMC is doing, MSHF is still concerned this workforce barrier is limiting access Mat-Su residents have to primary care in particular. We're doing our part by offering scholarships to Mat-Su residents pursuing education for a career in healthcare and are giving away $100,000 this year. It's not enough, and it's not nearly as effective as loan repayment and incentive programs.

We've been studying the various ways to either educate our young adults here in healthcare professions or encourage our young adults to return to AK to work after getting their education outside or ways we could incentivize healthcare professionals to return or move to Alaska to provide services in local clinics and hospitals to Alaskan citizens. National studies have determined loan repayment and incentive programs to be two of the most effective strategies in terms of both recruitment and retention. I've attached a resolution passed by the MSHF Board of Directors in support of the State's investment in a loan repayment and incentive program. This offers more details about the workforce needs in Mat-Su.

I commend you for closely watching the state budget and looking critically at state spending. An investment in a loan repayment and incentive program is just that—an investment. And it has a phenomenal return. Every doctor that moves to our state represents a new business, one that employs receptionists, nurses, bookkeepers, accountants, technicians, etc. Every healthcare professional we recruit will generate jobs and income to our state—an incredible return on investment. Please make this return possible by passing HB 78.

Sincerely,

Elizabeth Ripley

March 29, 2012

The Honorable Senate Finance Committee
Senators Lyman Hoffman and Bert Stedman, Co-Chairs
Alaska State Legislature
State Capitol, Room 532
Juneau, Alaska 99801

RE: Letter of Support for SB 221

Dear Senators Hoffman and Stedman:

Thank you for the invitation from the Senate Finance Committee to comment on Senate Bill 221, an Act relating to the disposition of proceeds from the existing alcohol tax to the alcohol and other drug abuse treatment and prevention fund.

Substance abuse and dependence and their consequences are associated with substantial health and social costs. Large numbers of Alaskans continue to suffer from the effects of substance abuse, and it remains one of our most serious health and social problems. Substance abuse is a contributing factor in suicides, crime, domestic violence, child abuse, unemployment, school dropout rates, and juvenile delinquency.

We need to prevent, intervene early, treat and help people recover from substance abuse. Senate Bill 221 is designed to do just that.

Our research into this topic indicates that there are insufficient resources to fully address this problem in Alaska; therefore, we support increasing the capacity of substance abuse treatment programs in Alaska by dedicating 100 percent of the taxes collected under the Alcoholic Beverage Tax to the Alcohol and Other Drug Abuse Treatment and Prevention Fund (ADTP). These funds would supplement, not supplant, the existing undesignated general funds to the ADTP for this purpose.

Best regards,

Diane Kaplan

STATE OF ALASKA

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF THE COMMISSIONER
FINANCE AND MANAGEMENT SERVICES

SEAN PARNELL, GOVERNOR

P.O. Box 110601
Juneau, AK 99811-0601
Phone: (907) 465-1630
Fax: (907) 465-2499

March 19, 2012

The Honorable Senator Johnny Ellis
Alaska State Legislature
State Capitol, Room 119
Juneau, AK 99801-1182

Dear Senator Ellis:

On March 16, 2012, the Department of Health and Social Services received the following question from your staff regarding Alcohol and Drug Abuse funding:

- ***Would you please send the latest projections from February based on the January 30, 2012 data?***

Please find the attached Alcohol Fund Projection as of January 31, 2012.

- ***Can you explain the technicalities of why there is carry forward every fiscal year?***

The carry forward term refers to the dollars rolled to the next fiscal year because net revenues have exceeded expenditures from a prior year. For certain special funds such as the Alcohol and Other Drug Abuse Treatment and Prevention Fund, the excess revenue from a prior year is carried forward to the next fiscal year.

If you have additional questions regarding this issue, please contact me at 465-1630.

Sincerely,

Nancy Rolfzen
Assistant Commissioner

Enclosure

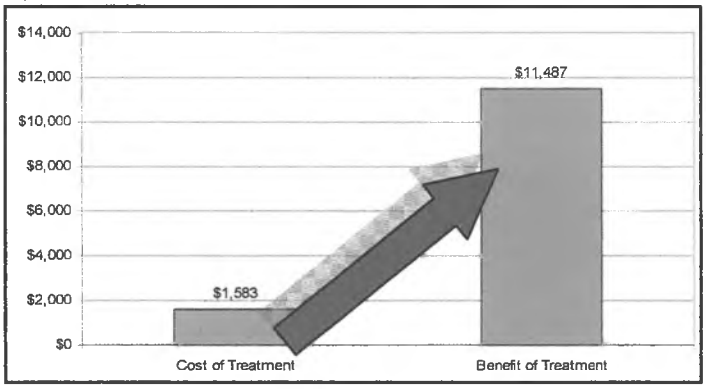
April 2009

Cost Offset of Treatment Services



There is a great paucity on nationwide data related to the cost benefit of substance use treatment. However, the limited research in some States suggests that there is a major benefit to substance use treatment. According to recent estimates[1], the total financial cost of drug use disorders to the United States is estimated to be $180 billion annually. The economic costs of alcohol abuse were 184.6 billion in 1998[2]. Accessible and effective community-based alcohol and drug treatment is imperative to reduce society's financial burden from problems associated with drug use. As the U.S. economy faces unsustainable escalations in health care costs, we need to ensure needed substance use disorder treatment and recovery programs help reduce health and societal costs.

The benefits of treatment far outweigh the costs. Even beyond the enormous physical and psychological costs, treatment can save money by diminishing the huge financial consequences imposed on employers and taxpayers.

Cost Savings of Treatment: California, New York, and Washington

Treatment has been shown to have a benefit-cost ratio of 7:1[3]. The largest savings were due to reduced cost of crime and increased employer earnings (see Figure 1).

Figure 1. Cost Offset of Substance Abuse Treatment in California

For every **$100,000 spent on treatment,**

$487,000 of health care costs[4] and $700,000 of crime costs were shown to be avoided[5].

Public Assistance in Washington

A comparison of medical expenses of Medicaid clients[6] who received treatment noted these savings:

Modality	Savings per Medicaid member per month
Inpatient	$170
Outpatient	$215
Methadone	$230

Spending money on treatment has led to important health and public safety cost reductions in Washington[7]:

Health Care Utilization Savings: California

Treated patients have been shown to **reduce**[8]:

ER visits by 39%

Hospital stays by 35%

Total medical costs by 26%

when compared to a control group.

Employers

Employees treated for substance use[9] have:

- **reduced absenteeism,**
- **reduced tardiness,**
- **lowered on-the-job injuries,**
- **fewer mistakes, and**
- **disagreements with supervisors**

Benefit-Cost Comparisons

- A study[10] comparing the direct cost of treatment to monetary benefits to society determined that on average, costs were $1,583 compared to a benefit of $11,487 (a benefit-cost ratio of 7:1).
- In an analysis[11] of methadone detoxification patients (n=102), authors observed that for every dollar spent on treatment, $4.87 of health care costs were offset.
- In comparing cost offsets in Washington State of people in treatment to non-treated, authors noted:[12] lower medical costs ($311/month); lower state hospital expenses ($48/month); lower community psychiatric hospital costs ($16/month); reduced likelihood of arrest by 16%; and reduced likelihood of felony convictions by 34%.

Health Care Utilization

- In a study[13] examining nearly 150,000 Medicaid claims for beneficiaries in six states, authors determined that people with substance abuse disorders had significantly higher expenditures for health problems compared to others.
- In comparison of medical expenses for welfare clients in Washington State[14] (n=3,235 treatment group and n=4,863 control) it was determined that substance abuse treatment was associated with a reduction in expenses of $2,500 per year.
- In reviewing selected beneficiaries in Oregon's Medicaid program,[15] researchers concluded that eliminating the substance abuse benefit led to increased medical expenditures.
- A review[16] of over 1,000 patients in a Sacramento chemical dependency program noted a substantial decline in hospital (35%), emergency room (39%), and total medical costs (26%) when compared to a control group.
- A recent article[17] on medical costs concluded that health care costs are higher for families with a person who has a dependency problem than for other similar families.

Employer Savings

An intake-to-follow-up assessment[18] study of nearly 500 people treated at Kaiser Permanente's Addiction Medicine program demonstrated significant reduction in missed work, conflict with coworkers, and tardiness. It also noted that employers break even on investing in chemical dependency treatment.

Every $1 spent on addiction treatment saves $7 in crime and criminal justice costs. When researchers added savings related to health care, the savings-to-cost ratio was 12:1.[19]

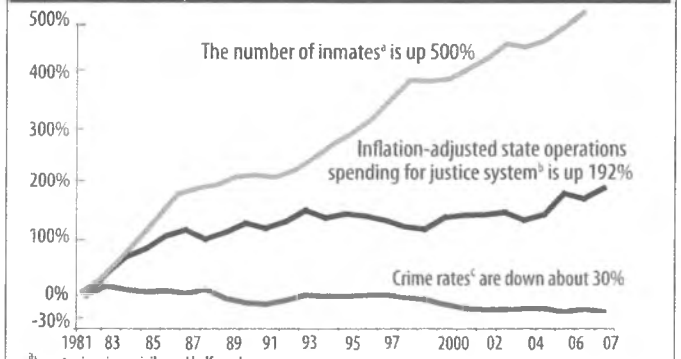
RESEARCH SUMMARY
Institute of Social and Economic Research
University of Alaska Anchorage • January 2009
R.S. No. 71

The Cost of Crime: Could The State Reduce Future Crime and Save Money by Expanding Education and Treatment Programs?



By Stephanie Martin and Steve Colt

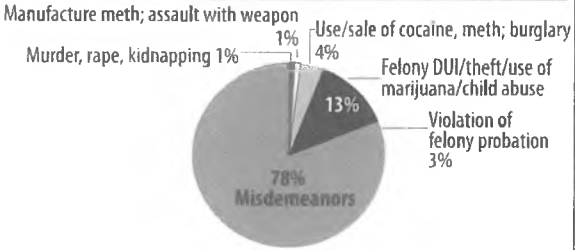
Alaska's prison population is among the fastest-growing in the U.S., with five times more inmates in 2007 than in 1981. Spending for the state justice system has nearly doubled since 1981—but the crime rate has dropped only about 30%.

Here's the dilemma for the state, given the pattern shown in Figure 1: what can it do to hold down the number of inmates and stem the rising costs—while at the same time keeping the public safe and using tax dollars effectively?

Senator Hollis French asked ISER to project growth in the number of Alaska inmates and the associated costs—and then evaluate whether the state could reduce that growth by expanding intervention and prevention programs for people already in prison or at risk of ending up there. Alaska currently spends about $17 million a year for such programs, but they aren't available to many of those who might benefit from them.

Figure 1. Percentage Changes in Alaska Crime Rate, Spending for Justice System, and Number of Inmates, 1981-2007

[a]Inmates in prisons, jails, and halfway houses
[b]Spending for Departments of Corrections, Public Safety, and Law; court system; Division of Juvenile Justice; Public Defender Agency; and Office of Public Advocacy. Does not include capital spending or payment on debt
[c]Rates per 100,000 for murder, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft
Sources: U.S. Department of Justice; state budget documents; Alaska Department of Corrections



There are a wide range of such programs. But it is programs for adults who are already in prison or jail that have the most potential to save money and reduce crime in the next 20 years. That's because they can reach the most people.

We know that without any intervention, about two-thirds of those who serve their sentences and are released commit new crimes. Stopping at least some of them from committing more crimes would not only help improve public safety but also reduce growth in both the number of inmates and in spending.

Also, most of those released committed misdemeanors (Figure 2). Those who commit the most serious crimes serve long sentences and make up a small share of those released in any given year.

To analyze which programs have the most potential to reduce crime *and* save the state money, we worked with the Alaska Criminal Justice Working Group and the Washington State Institute of Public Policy. That institute did a similar analysis for Washington state and provided us with data it collected from program evaluations nationwide (see back page). What did our study show?

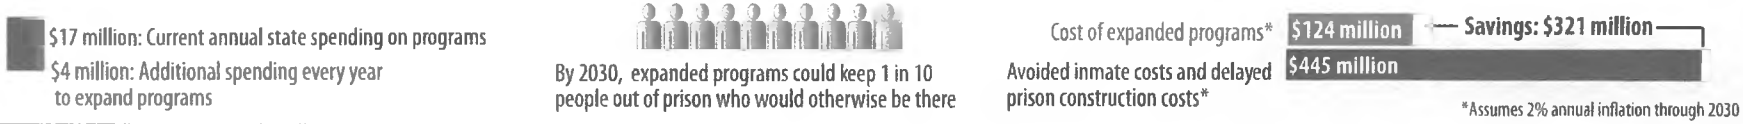


Figure 2. Who Gets out of Jail or Prison in Alaska?
(Total Releases, 2002-2007: 82,339)

Source: Alaska Department of Corrections

- *With no change in policies, the number of Alaska inmates is likely to double by 2030,* from 5,300 to 10,500.
- *If the state spent an additional $4 million a year to expand programs it already has, the prison population in 2030 might be 10% smaller* than projected—about 1,050 fewer inmates.
- *The state would spend about $124 million for expanded programs through 2030 but would avoid $445 million in costs—a savings of $321 million.* It would save money by incarcerating fewer people and by delaying prison construction costs. (Figures 3 and 8).
- *Education and substance-abuse treatment programs—in prison, after prison, and instead of prison—save the state two to five times* what they cost and reach the most people. Programs for teenagers are also very effective at reducing crime and saving money, but they reach fewer people.

Figure 3. Potential Effects, Costs of, and Savings from Expanded Prevention or Intervention Programs

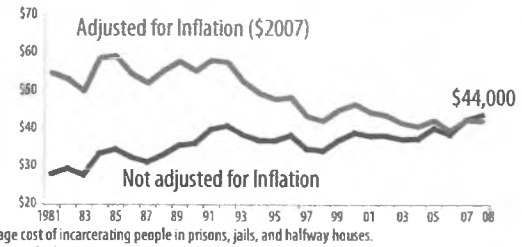
Why Consider Expanding Programs?

In 1980, 2 in 1,000 Alaskans were behind bars; today that share is approaching 10 in 1,000. The sharp increase started in the 1980s, when the state government began collecting large oil revenues. The state used some of that money to expand police agencies, courts, and other parts of the criminal justice system statewide. Also in the 1980s, it made sentencing for the most serious felonies more uniform and stiffened sentences.

The crime rate in Alaska has declined since the 1980s. But the number of Alaskans in prisons, jails, and halfway houses has increased much faster, as have costs for the state justice system. Alaska's prisons are full, and the 1,500-bed prison scheduled to open in 2012 is projected to be full soon after it opens.

Locking people up is expensive, whether their crimes are major or less serious. Alaska spends on average $44,000 a year per inmate in prisons, jails, and halfway houses. Adjusted for inflation, that's actually less than in the 1980s—but it's still a lot (Figure 4).

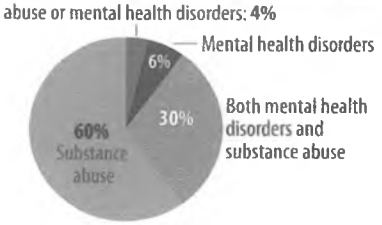
Studies in other states have shown that some intervention and prevention programs can help cut both costs and crime, either by keeping people who have served their sentences from committing new crimes after they're released, or preventing some people from going to prison in the first place.



What Programs Did We Analyze?

The Alaska Criminal Justice Working Group gave us a list of programs to analyze. We looked for programs with the biggest potential payoff for the state—those that could reduce growth in both numbers of inmates and in spending for corrections, at a reasonable cost for the state.

Alaska already has a number of programs in place, and we found that expanding some of those would be most cost-effective. Table 1 lists the programs in our final analysis. As a guideline for what was a "reasonable" expansion, we used 10% to 20% of the eligible people not already served—except for very small programs that can't easily be expanded that much.



These programs would serve inmates, at-risk juveniles, and young children. They are all intended to reduce future crime in some way. Programs that treat substance-abuse or mental heath disorders have been shown to reduce recidivism—and as Figure 5 shows, almost all current inmates have those disorders.

Figure 4. Annual State Costs Per Inmate,* 1981-2008
(In Thousands of Dollars)

*Average cost of incarcerating people in prisons, jails, and halfway houses.
Source: Alaska Department of Corrections

Figure 5. How Many Alaska Inmates Have Substance Abuse or Mental Health Disorders?

Sources: Alaska Department of Corrections; Alaska Mental Health Trust

Table 1. Current Size and Potential Expansion of Intervention and Prevention Programs[a]

Programs	Currently serve	Reasonable expansion	Potentially eligible (2008)
Prison-based programs			
Education (adult basic; vocational)	More than 1,000	500	Almost all inmates (4,500)
Substance-Abuse (residential; intensive outpatient)	Close to 500	500	90% of inmates (approximately 4,000)
Sex-offender treatment[b]	0	50	10% of 500 eligible inmates
Transition from prison			
Transition for inmates with mental health disorders (Institutional Discharge Project)	70	100	36% of inmates (1,600)
Alternatives to Incarceration	500	500	Approximately 5,000[c]
Mental health, drug, alcohol courts; electronic monitoring; residential substance-abuse treatment			
Juvenile offenders	Approximately 500	1,000	Approximately 3,000
Aggression replacement training; family therapy; residential treatment; institutional transition			
Prevention	3,025	450	Approximately 8,000[e]
Head Start for 3- and 4-year olds from low-income families[d]			

[a]Programs included in our final analysis are those for which we found evidence that expansion would have significant pay-offs for the state at a reasonable cost. We evaluated additional programs not included here, either because there wasn't sufficient evidence to assess their effectiveness or because they weren't feasible to implement in Alaska at this time.

[b]To effectively reduce crime, sex offender treatment programs need to be offered in both prison and the community. Treatment is currently available only in the community, so the number served in prison is currently zero—but there are proposals to add treatment in prison.

[c]People facing low-level charges and with substance-abuse problems.

[d]Head Start is a federal program, but the state supplements federal money and Governor Sarah Palin has proposed additional state funding.

[e]We assume all children from families with up to double the poverty-level income would be eligible.

We looked at but excluded other programs from our final analysis. The criminal justice working group decided that a few programs, while effective elsewhere, wouldn't be feasible to implement in Alaska at this time. For other programs, there wasn't enough available evidence to judge how effective they were in saving money or reducing crime, or the available evidence showed them to be largely ineffective.

How Do the Programs Compare?

As Figure 3 (front page) shows, expanding programs to serve more of the eligible people would save the state about $321 million and reduce the projected number of inmates 10% by 2030. Figures 6 and 7 show how the various programs contribute to costs, savings, and reductions in the number of Alaskans behind bars.

- *Education and substance-abuse treatment programs for inmates save two to four times what they cost*, reduce recidivism by about four percentage points, and can reach the most people.

- *Intervention programs for juveniles who have committed crimes are very effective* at saving money and reducing recidivism, but they serve a much smaller number of people.

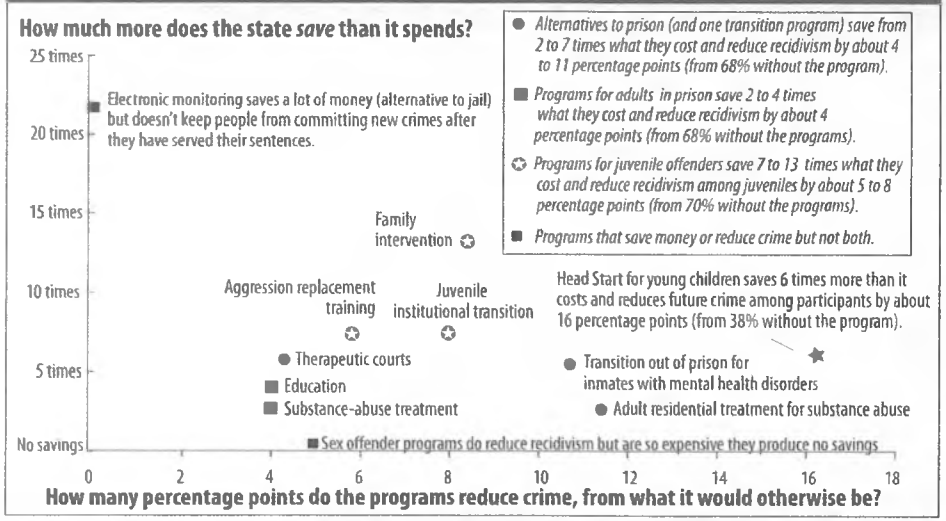
- *Programs that set up transition services for inmates with mental-health disorders* coming out of prison are among the most effective—but they can't readily be expanded to serve the many people who could benefit from them.

- *Alternatives to prison for some people charged with lesser offenses save the state money right away, and almost all reduce recidivism.* The exception is electronic monitoring, which is inexpensive but hasn't been shown to reduce future crime.

- *Treatment programs for sex offenders do reduce crime,* but they are very expensive and so don't save the state money.

- *Programs that prevent future crime by helping very young at-risk children are the most effective.* But the effects of spending for those programs aren't apparent until many years later.

Figure 6. How Effective Are Various Programs at Saving Money and Reducing Crime?



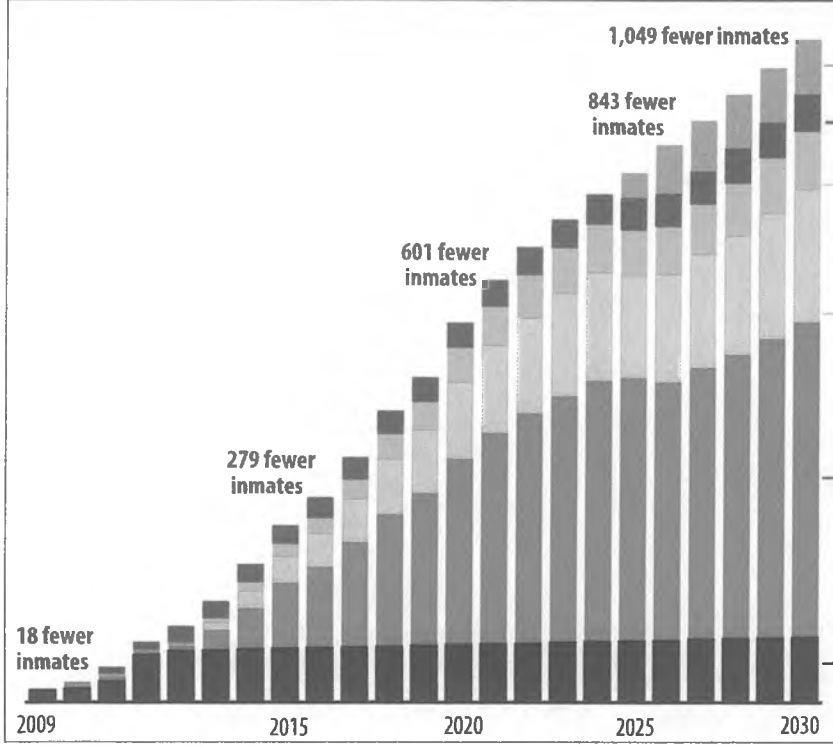


Figure 7. How Would Expanding Specific Programs Contribute to Reducing Growth in Numbers of Inmates?

Pre-school programs for at-risk children cost about $1,000 per child but save many times that much, by reducing future crime. The effects of the spending aren't apparent for years, until the children grow up.

Programs for juveniles offenders cost an average of about $2,500 per person, but save almost 10 times that much by keeping kids out of prison. They serve only a subset of the population of 12- to-17-year-olds.

Transition programs for people with mental health disorders are extremely effective, add about $2,000 per person to inmate costs, and save about four times that much. But the programs currently serve very few people and can't readily be expanded to serve large numbers.

Programs that treat inmates for substance abuse add about $2,000 a person to inmate costs, but over time save about twice as much. They are effective, but can't readily be expanded to reach all the people who need them.

Education and job training programs in prison add about $1,000 to inmate costs, but they reach the most people and save about four times more than they cost. Because they are offered in every facility, they can easily be expanded and can reach more people. (Reductions in the number of inmates as a result of the sex-offender treatment program are also included here, but are only one or two people a year.)

Programs that keep people out of prison save the state money right away, because they cost much less than the $44,000 per person the state spends to lock people up. They include therapeutic courts for substance abuse and mental health disorders, electronic monitoring, and residential substance-abuse treatment.

Conclusion

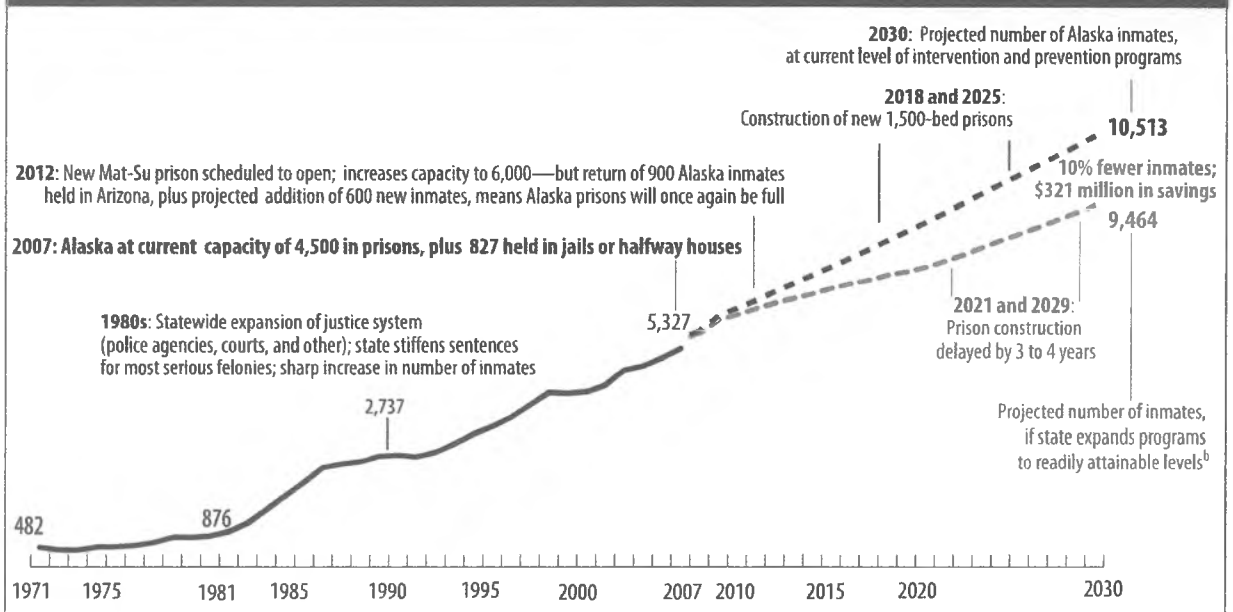
In conclusion, Figure 8 shows how Alaska's corrections system got where it is and where it's likely to go—if intervention and prevention program are kept at their current levels, and if the most effective programs are expanded to serve more of the eligible people.

We found that the state could both reduce the number of Alaskans in prison or jail and save considerable money over the next 20 years, by adding about $4 million a year to the $17 million it currently spends to keep people from returning to prison— or prevent them from ever going there at all.

Spending more for these programs even as oil prices and state revenues are falling may not seem like a good idea. But Alaska also needs to look to the future—and over time the benefits of strategically expanding those programs that reduce crime and keep more Alaskans out of prison far outweigh the costs.

Method of Analysis

Our job was to assess whether specific programs could reduce long-term state spending for corrections by reducing growth in the number of inmates. As a starting point, we needed evaluations of how effective various programs are at reducing future crime.



But except for some of the therapeutic court programs, most programs in Alaska have not been rigorously evaluated. Therefore, we used results of a Washington state assessment that systematically reviewed 571 program evaluations from around the country.

To be included, evaluations had to have carefully designed control groups, replicable results in multiple settings, and long-lasting effects. This method is evidence-based public policy, which merges research and practice. It is similar to clinical trials in medicine. Keep in mind that this is a new field, and only about 10% of programs in place nationwide have been evaluated at this standard.

With data from rigorous evaluations, the Washington State Institute of Public Policy created a model that estimated the effects of programs on recidivism—and then combined those results with a cost-benefit analysis to estimate the long-term effects on state spending and inmate populations.

We combined the institute's estimates of recidivism with Alaska data on program costs, eligible groups, and state population to estimate long-term effects on crime and state spending.

Figure 8. Average Number of Alaska Inmates,[a] 1971-2007, and Projected Number, 2008-2030

[a]Average daily number of people in prisons, jails, and halfway houses. [b]The number of people who could be readily added to program rolls varies considerably by program; see Table 1.

Sources: Alaska Department of Corrections; ISER projections of number of prisoners, based on Alaska Department of Labor projections of Alaska population 18-64 and assuming no change in current use of rehabilitation programs as well as expanded use; Washington State Institute of Public Policy

The authors thank the members of the Alaska Criminal Justice Working Group for their help in identifying programs to evaluate and for comments on drafts of this publication. The Alaska Legislature funded this group in 2007 and authorized the Alaska Judicial Council to act as its staff.

The group is chaired by a justice of the Alaska Supreme Court and Alaska's lieutenant governor. Other members include top policymakers from the departments of Corrections, Public Safety, Health and Social Services, and Law, as well as the Alaska Mental Health Trust Authority; the heads of the Alaska Public Defender Agency and the Office of Public Advocacy; the administrative and deputy directors for the Alaska Court System; the executive director of the Judicial Council, the U.S. attorney, and Anchorage's police chief.

This group meets monthly to talk about long-term justice issues, as well as to resolve any inter-branch issues that come up among the many agencies and organizations that deal with aspects of Alaska's justice system.

The authors also thank Elizabeth Drake and Steve Aos of the Washington State Institute of Public Policy for developing the methods and models we used and for helping us apply them to Alaska. For more information go to www.wsipp.wa.gov.

This research summary and many other publications on a wide range of topics are available on ISER's Web site:

EXECUTIVE SUMMARY

The Advisory Board on Alcoholism and Drug Abuse, through the Alaska Department of Health and Social Services, contracted with McDowell Group in April 2005 to update a prior study on the economic costs of alcohol and other drug abuse in Alaska.

Alcohol and other drug abuse impacts the economy in many ways. Public safety, health care, and public assistance are among the areas impacted by alcohol and other drug abuse. The extent of these impacts is evident in the level of alcohol and other drug dependency and its associated cost on the Alaska economy. According to a 1998 study, 9.7 percent of Alaska's population is dependent upon or abuses alcohol (39,596 residents), while 1.5 percent is other drug dependent (14,238 residents). The total cost of this dependence to the Alaska economy is estimated to be $738 million during 2003. Alcohol abuse costs accounted for $525.5 million (71 percent). Other drug abuse costs were estimated at $212.5 million (29 percent). Costs by category include:

- $367 million from productivity losses.
- $154 million from criminal justice and protective services.
- $178 million from health care.
- $35 million from traffic crashes.
- $4 million from public assistance.

Percentage of Costs by Category Related to Alcohol and Other Drug Abuse in Alaska, 2003

More detailed study results for each cost category are presented below. Some of the economic benefits related to the manufacturing and sale of alcohol are also included.

Productivity Losses

Lost productivity occurs when alcohol and other drug abuse results in premature death, reduced efficiency of workers through physical or mental impairment, incarceration for criminal offense, and inpatient treatment or hospitalization. The reduced efficiency of employees, or premature death of Alaska residents, results in less production of goods and services, and is thus a cost to society.

Alcohol and other drug abuse in Alaska cost an estimated $367 million in lost productivity during 2003. Components of productivity losses and associated costs include:

- Premature death from alcohol and other drug abuse in Alaska resulted in an estimated $183 million in lost productivity in 2003. The annual average number of deaths from alcohol and other drug abuse between 1999 and 2003 was 236.
- Workers impaired by alcohol and other drug abuse had an estimated reduced productivity in Alaska of $136 million during 2003. This includes $106 million in alcohol-related impairment and $20 million in other drug-related impairment.
- Costs from alcohol and other drug-related incarcerations totaled an estimated $39 million in lost productivity during 2003. During that period, 1,193 inmate incarcerations were directly related to alcohol and other drug abuse.
- Lost productivity from Alaska residents receiving inpatient treatment for alcohol and other drug abuse cost an estimated $8.8 million in 2003.

Traffic Crashes

Alcohol and other drug abuse are a major cause of traffic crashes in Alaska. There were 1,109 traffic crashes in Alaska attributed to alcohol and other drug abuse during 2002. Of these crashes, 25 were fatal, 107 were major injury crashes, 370 were minor injury crashes, and 607 had property damage only. The estimated costs from these crashes were more than $35 million. Costs included:

- $16 million for legal costs.
- $12 million for insurance administration costs.
- $5 million for property damage costs.
- $2 million for workplace costs.

Costs by traffic accident category included:

- $26 million from major injuries.
- $5 million from fatalities.
- $2.5 million from minor injuries.
- $1 million from property damage only.

Criminal Justice

Alcohol and other drug abuse contribute to crime and child abuse. In 2003, an estimated 17,400 arrests were attributed to alcohol and other drug abuse. During this same period, 15,800 Alaska residents were victims of alcohol and other drug abuse-related crimes. Costs attributed to crime-related alcohol and other drug abuse in the state were nearly $154 million during this period. Crime costs in 2003 included:

- $43 million for law enforcement.
- $38 million for corrections.
- $12 million for legal costs and court adjudication.
- $636,000 for property damage.
- $1.9 million in economic costs to victims.
- Adult and child protective services attributed to alcohol and other drug abuse cost an estimated $59 million. These costs include foster care services, adoption care services, residential care services, and social worker services.

Health Care

Health care costs attributed to alcohol and other drug abuse result from illnesses or injuries. Examples of the kinds of health problems that can result from alcohol and drug abuse are cirrhosis of the liver, hypertension, diabetes, or stomach cancer. Health care costs related to alcohol and other drug abuse totaled an estimated $178 million in 2003. Health care costs included:

- Hospital costs from illnesses and injuries were estimated at $9.3 million. Alcohol abuse-related health care costs accounted for $84.8 million, while other drug abuse-related costs were $8.2 million.
- Alcohol and other drug residential and outpatient treatment costs were approximately $26.8 million.
- Total medical outpatient costs from illnesses and injuries totaled an estimated $25.7 million.
- Pharmaceutical costs were estimated at $23.0 million, while nursing home costs were $719,400.
- Medical care totaled $3.9 million for patients with other drug-related HIV and HIV with AIDS. Approximately 78 HIV and HIV with AIDS cases were attributed to intravenous drug abuse.
- Costs for medical treatment of hepatitis B and C caused by intravenous drug abuse was $5.1 million. Intravenous drug abuse contributed to 344 hepatitis B and C cases in Alaska in 2003.

Public Assistance and Social Services

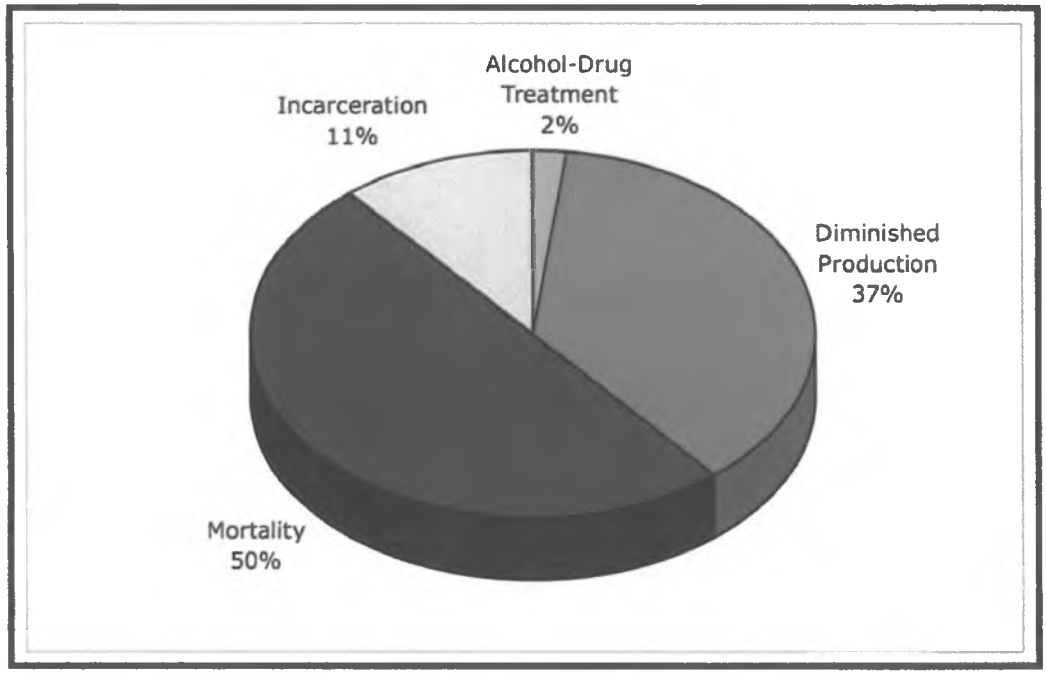
A portion of public assistance expenditures can be attributed to alcohol and other drug abuse. Alcohol and other drug-dependent persons may qualify for public assistance because of reduced income, inability to hold a job, or disability caused by substance abuse. Costs attributed to abuse (program administration costs only) were an estimated $4.1 million in 2003.

Employment Impacts of Alcohol Sales

Although the focus of this study is centered on the cost of alcohol and other drug abuse, there are some economic benefits associated with the sale of alcoholic beverages. These economic benefits include employment, income and tax revenues. In 2003, there were approximately 3,000 jobs in alcohol-related industries in Alaska, with earnings of approximately $62 million. State excise tax revenue on alcoholic beverages, collected at the wholesale level, was approximately $33 million in FY 2004.

Actual Costs

It is critical the reader recognize that the alcohol and other drug-related costs presented in this study are estimates only. Actual costs could be 25 percent higher or lower than the total presented in this report. Very little underlying data exists regarding the monetary impact of alcohol and other drug abuse in Alaska. There is a clear need for more comprehensive research.



For this report, the McDowell Group study team used national data to estimate Alaska's alcohol and other drug abuse costs and then adjusted these costs for Alaska's higher cost of living. The study team relied heavily on a 1998 publication from the National Institute on Drug Abuse and National Institute on Alcohol Abuse and Alcoholism (NIDA/NIAAA, 1998), and a 1999 study for the Washington State Department of Social and Health Services, Division of Alcohol and Substance Abuse. As exhaustive and thorough as these studies are, they do not address Alaska's higher alcohol rates or its higher cost of providing services. Alaska's alcohol-dependent population is double the national average, according to results of the Alaska Adult Household Telephone Survey conducted by the Gallup Organization. In addition, cost-of-living indicators published by American Chamber of Commerce Researchers Association (ACCRA) show Anchorage health care costs were 65 percent higher than the national average during 2003.

In nearly all cases, Alaska-specific data were not available on the amount of crime, health and medical costs, lost production, and public assistance that can be attributed to alcohol and other drug abuse. Estimates rely on national norms based on tested methodologies. National norms are based on a lower prevalence of alcohol abuse and dependence than is the case in Alaska. Comprehensive development of Alaska-specific data is recommended.

Summary

Alcohol and other drug abuse cost Alaska an estimated $367 million in lost productivity during 2003. Lost productivity occurs when alcohol and other drug abuse results in premature death, reduced efficiency of workers through physical or mental impairment, incarceration for criminal offense, and residents requiring inpatient treatment or hospitalization. Overall, the reduced efficiency of employees or premature death of Alaska residents results in less production of goods and services, and thus is a cost to society. Figure 1 illustrates the sources of lost productivity in the Alaska economy.

Figure 1
Percent of Lost Productivity for Alaska from Alcohol and Other Drug Abuse in 2003

- Premature death from alcohol and other drug abuse in Alaska resulted in an estimated $183 million in lost productivity in 2003. Males accounted for $145 million in estimated losses and females, $37.7 million. An average of 236 deaths annually can be attributed to alcohol and other drug abuse between 1999 and 2003. Alcohol and drug abuse accounted for approximately 8 percent of deaths in that period; the average annual number of deaths from all causes in Alaska was 2,964 between 1999 and 2003.
- Alcohol and other drug abuse can impair worker performance resulting in lost productivity. An estimated 39,596 Alaska residents are alcohol dependent, resulting in reduced productivity of $106 million in 2003. Another 14,238 residents were drug dependent, resulting in $30 million in diminished productivity. The male population accounted for the largest portion of lost

productivity at $111 million, while productivity losses for females were estimated at $26 million.

- Of the 3,743 Alaska residents incarcerated in 2003, an estimated 1,193 incarcerations can be attributed to alcohol and other drug abuse. Lost productivity from alcohol and drug related incarcerations was estimated at $39 million.

- Time spent by Alaska residents while receiving inpatient treatment for alcohol and other drug abuse resulted in approximately $9 million in lost productivity in 2003. These figures do not include the actual cost of treatment.

Lost Production Due to Mortality

The largest cost to Alaska residents from alcohol and other drug abuse stems from productivity losses due to premature death. Death from alcohol and other drug abuse can result from suicide, motor vehicle crashes, homicide, cirrhosis, diabetes, or other medical causes. From an economic point of view, an Alaska resident provides two types of production benefits. The first is in the form of employment. By being employed, the resident is contributing to the overall benefit of Alaska society by producing goods and services. The second production benefit is from household services. An individual spends time caring for children, cleaning and maintaining a household like any wage and salary job, though that service is generally not compensated. Combined, these production losses contribute to the largest cost from alcohol and other drug abuse in Alaska.

Methodology

To estimate productivity losses from premature death, McDowell Group relied on the same methodology used in the "The Economic Costs of Alcohol and Drug Abuse in the United States – 1992" for the National Institute on Drug Abuse and National Institute on Alcohol Abuse and Alcoholism (NIDA/NIAAA) published in 1998. The research team first applied attribution factors by diagnosis supplied in the NIDA/NIAAA study to annual deaths by diagnosis reported by Alaska Vital Statistics from 1999 to 2003. Second, 2000 estimates of the present value of life earnings by age and gender were obtained from a published report by University of California Professor Dorothy Rice. These values are a combination of earnings data and estimated value of household services, which originate from U.S. Bureau of Census data. Earnings were adjusted by 5.5 percent to reflect the change in annual per capita personal income from 2000 to 2003 reported by the Bureau of Economic Analysis. Finally, the number of deaths by age and gender attributed to alcohol and other drug abuse were multiplied by the appropriate present value of life earnings in 2003 dollars.

In summary, the value of an average person's lifetime productivity is estimated and, depending on their age at the time of premature death, lost productivity is measured. It is important to note that this measure is not an estimate of "out-of-pocket" losses. Rather, it is a theoretical construct intended to reflect the fact that humans have the potential to be productive, and if life is cut short, society has suffered a loss of production potential.

Results

On average, there were 236 deaths in Alaska due to alcohol and other drug abuse between 1999 and 2003. Based on data from this period, alcohol and other drug abuse accounted for approximately 8 percent of all the deaths in the state (there was an annual average of 2,964 deaths from all causes between 1999 and 2003).

A breakdown of average annual deaths by age and gender is presented in Table 1. Of these deaths, 72 were females and 163 were males. From 1999 to 2003 the largest number of deaths was between ages 40 to 44 for females (seven alcohol and other drug-related deaths) and ages 45 to 54 for males (36 alcohol and other drug-related deaths). Table 2 shows the number of alcohol and other drug-related deaths by cause during this period. Motor vehicle crashes (41 deaths) and suicide (33 deaths) were the major causes of premature death from alcohol and other drug abuse between 1999 and 2003.

Table 1
Average Annual Number of Deaths Attributed to Alcohol and Other Drug Abuse by Age and Gender, 1999-2003

Age	Males	Females
00-04	2.9	2.0
05-09	1.4	0.2
10-14	2.9	1.4

Total economic loss from premature death of Alaska residents was $183 million during 2003. Table 3 presents estimated loss of productivity by age and gender. Males accounted for almost $145 million in lost productivity. Females accounted for approximately $38 million. The most significant costs were associated with males in two age groups, those between the ages of 20 to 24 years and 40 to 44 years, which each accounted for $18 million in lost productivity. Females age 35 to 39 years accounted for $5 million, as did those age 40 to 44.

Table 3
Mortality Costs Attributed to Alcohol and Other Drug Abuse
By Age and Gender, 2003

Age	Males	Females
1-4	$3,363,000	$1,693,000
5-9	$1,751,000	$226,000
10-14	$4,038,000	$1,382,000
15-19	$16,320,000	$4,450,000
20-24	$18,240,000	$4,602,000
25-29	$15,410,000	$3,892,000

Lost Production Due to Diminished Productivity

Alcohol and other drug abuse by Alaska residents results in reduced productivity. This loss can come in the form of high absenteeism, reduced efficiency from diminished physical and mental abilities, or limited work history because of the individual's inability to hold a job. Abuses of alcohol and other drugs may also impact a person's ability to be productive in non-employment related activities like household or parenting services. In extremely severe cases, abusers of alcohol and other drugs can be hospitalized or even institutionalized, in essence removing the individual from productive society entirely. These productivity losses from alcohol and other drug abuse have a significant cost burden to the residents of Alaska.

Methodology

The primary method for estimating economic costs from diminished productivity was to measure lost earnings. The research team relied on estimates presented in the NIDA/NIAAA (1998) study that determined the percent of lost earnings from alcohol and other drug dependence. In the study, the authors estimated the loss of earnings from alcohol-dependent males at 9.4 percent of average earnings and lost earnings from other drug dependent males at 7.7 percent of average earnings. Estimates on lost earnings for the female alcohol and other drug-dependent population came from the 1990 Rice study on the economic impacts of alcohol and other drug abuse. These estimates were used because the authors of the NIDA/NIAAA (1998) study found no impacts to female earnings from alcohol or other drug dependence. The 1990 study reports a reduction in earnings from alcohol dependence of 6.9 percent and 5.4 percent from other drug dependence.

Estimates on the number of Alaskans who are alcohol and other drug dependent came from the 2003 National Survey on Drug Use and Health by the Substance Abuse and Mental Health Services Administration (SAMHSA). In the report, SAMHSA estimated that 10.4 percent of Alaska's population is classified with alcohol or drug dependence or abuse: 8.6 percent for alcohol and 3.1 percent for other drugs. Approximately 1.3 percent of the population is dependent or abusing both alcohol and drugs. SAMHSA reports that males are almost twice as likely to be classified with substance dependence or abuse as females.

Total costs from diminished productivity for male and females were calculated by multiplying diminished productivity by the number of Alaskans who were alcohol and other drug dependent in 2003. The research team collected data from the Alaska Department of Labor and Workforce Development (ADOL) on earnings for males and females during 2003. Alaska males earned an average of $33,762 in 2003, while females earned $23,056. The research team then estimated the annual loss in earnings by multiplying the percent decline in earnings for alcohol or other drug dependence for each gender by the appropriate annual Alaska earnings for 2003.

Results

In 2003, Alaska had approximately 39,596 adult residents classified with alcohol dependence or abuse and 14,238 residents classified with drug dependence or abuse. Of those alcohol-dependent residents, 27,355 were males and 12,240 were females. The drug-dependent population consists of 9,283 adult males and 4,956 adult females. Table 4 presents computation figures for estimating diminished productivity from alcohol and other drug dependence or abuse.

Table 4
Productivity Losses from Alcohol and Other Drug Dependence or Abuse by Gender, 2003

	Alcohol		Other Drugs	
	Males	**Females**	**Males**	**Females**
Alaska population 18 years and over that is alcohol and other drug dependent	27,355	12,240	9,283	4,956
Annual average earnings for Alaska in 2003	$33,762	$23,056	$33,762	$23,056
Loss in productivity from alcohol and other drug dependence	9.4%	6.9%	7.7%	5.4%
Annual lost earnings from alcohol and other drug abuse	$3,174	$1,591	$2,600	$1,245
Estimated productivity loss from alcohol and other drug abuse	$87 million	$19 million	$24 million	$6 million

Sources: Alaska Department of Labor, Employment and Earnings report, 2003; SAMHSA 2003 National Survey on Drug Use and Health, and The Economic Costs of Alcohol and Drug Abuse in the United States-1992 (NIDA/NIAAA, 1998).

The typical Alaska male alcohol abuser cost society $3,174 annually in diminished productivity in 2003. The typical male drug abuser cost society $2,600 in 2003. During that same period, the average female alcohol abuser cost society $1,591 in lost production, while the typical female drug abuser cost society $1,245. Total diminished productivity for Alaska from alcohol and other drug-dependent residents was an estimated $137 million. Of those adults who abuse alcohol or are dependent, the largest portion was from the state's male population. An estimated $87 million in diminished productivity was from males who abuse or are dependent on alcohol, and another $19 million was from females. Diminished productivity from other drug dependence was estimated to cost the state economy $30 million, $24 million from males and $6 million from females.

Lost Production Due to Incarceration

Another source of lost productivity for Alaska is from residents incarcerated because of alcohol and other drugs. Residents can be incarcerated for committing an alcohol or other drug related crime or from committing a crime while under the influence of alcohol or other drugs. An example of an alcohol or other drug-related crime would be distributing alcohol without a license or selling illegal drugs. Sexual assault is an example of a crime committed under the influence, where alcohol or other drug use was a contributing factor. Without alcohol or other drugs, incarcerated Alaskans could be productive members of society producing goods and services. While incarcerated, these individuals are generally not employed and thus are not productive members of society. This loss in productivity can be measured by estimating lost earnings.

Methodology

Estimates for lost productivity from incarcerations involved two steps. The first was to determine the number of Alaska residents incarcerated due to alcohol or other drug-related crimes. The research team relied on national attribution rates published in the NIDA/NIAAA (1998) study. These rates are presented in Table 5. These national attribution rates are thought to be lower than incarceration rates for Alaska from alcohol and other drug abuse. However, no Alaska-specific research has been completed to verify this premise. Currently, only anecdotal information is available. It is speculated that alcohol and other drug abuse plays a role in 85 percent to 95 percent of all incarcerations in Alaska.[1]

Table 5
Attribution Rates for Alcohol and Other Drug-Related Incarcerations

	Alcohol	Other Drug
Homicide	30.0%	15.8%
Assault	30.0%	5.1%
Sexual assault	22.5%	5.1%
Robbery	3.4%	27.2%
Burglary	3.6%	30.0%
Larceny/theft	2.8%	29.6%
Auto theft	3.5%	6.8%
Drug laws	0.0%	100.0%
Driving under the influence	100.0%	0.0%
Liquor laws	100.0%	0.0%
Prostitution	0.0%	12.8%

Source: The Economic Costs of Alcohol and Drug Abuse in the United States – 1992 (NIDA/NIAAA, 1998).

The second step was to estimate potential loss of earnings from incarceration. The research team assumed that persons incarcerated because of alcohol and other drug abuse could be as productive as the general population. As shown above, ADOL indicates Alaska males earned $33,762 in 2003 and females earned $23,056. The earnings estimates were then applied to the alcohol and other drug-related incarcerated population for Alaska in 2003.

[1] Based on discussions with Sarah Williams, Coordinator of Substance Abuse Program, and Teri Carns, Staff Director for the Alaska Criminal Justice Assessment Commission.

Results

In 2003, there were 3,743 people incarcerated for crimes of all types (this is a count of the inmate population regardless of what year they were placed in a correctional facility, not the number of annual offenses). Of these, 1,193 incarcerations were attributed to abuse of alcohol and other drugs. Males accounted for most of the incarcerations attributed to abuse of alcohol and other drugs at 1,065 in 2003, while females accounted for 128 incarcerations.

Table 6 presents the number of people incarcerated for alcohol or drug related offenses in 2003 by offense and gender. These are not the number of incidences in a single year, but the cumulative total of those in prison as of December 31, 2003. Sexual assault, assault, and homicide were the primary offenses committed. Based on attribution rates shown in Table 5, an estimated 122 people were incarcerated for sexual assaults, 163 for assaults, and 122 for homicides attributed to alcohol abuse. Drug law violations were the primary offense associated with other drug abuse at 175 incarcerations.

Table 6
Alcohol and Other Drug-related Incarcerations in Alaska by Offense and Gender, 2003

	Alcohol		Other Drug	
Offense	**Females**	**Males**	**Females**	**Males**
Homicide	7	115	4	61
Assault	11	152	2	26
Sexual Assault	1	121	0	27
Robbery	0	4	2	32
Burglary	0	2	0	21
Larceny-Theft	1	5	11	51
Auto Theft	0	1	0	3
Drug Laws	0	0	34	141
Driving under the influence	41	259	0	0
Liquor Laws	8	49	0	0
Prostitution	0	0	0	0
Total	**70**	**708**	**54**	**360**

Source: McDowell Group based on Alaska Department of Corrections 2003 Offender Profile data and attribution rates by offense from The Economic Costs of Alcohol and Drug Abuse in the United States – 1992 (NIDA/NIAAA, 1998).

Total lost productivity from incarcerations from alcohol and other drug abuse in Alaska was $39 million in 2003. Incarcerated males accounted for $36 million, while females accounted for $3 million in lost productivity.

Lost Production Due to Alcohol/Other Drug Treatment

The final source of lost productivity included in this study is from Alaska residents receiving inpatient alcohol and other drug treatment. Treatment includes long-term residential treatment, short-term hospitalization, and detoxification. While receiving treatment for alcohol and other drug abuse, patients are not productive residents in the Alaska economy, so society loses the benefit of their production of goods and services. This loss in productivity can be measured by estimating lost earnings.

Methodology

Total bed days for residential and detoxification treatment centers were used to estimate lost productivity in 2005 from time spent while undergoing alcohol and other drug treatment. Data for 2003 was not available, therefore 2005 is considered a reasonable proxy for 2003 bed days. Total bed days were then converted to work years. Work years were multiplied by average annual 2003 earnings of $37,356 for all Alaskans, as reported by ADOL.

Results

There were 85,926 total bed days for alcohol and other drug abuse in 2005.[2] These total bed days was equivalent to 235 work years. Overall, total lost production from inpatient treatment for alcohol and other drug abuse was estimated at $8.8 million. This figure does not include lost productivity from residents receiving substance abuse treatment outside the state. Although the exact number of these individuals is unknown, it is estimated that much of the private residential treatment received by Alaskans occurs outside of the state.[3]

[2] Source: Alaska Department of Health and Social Services, Mike Bellevue.
[3] Source: Finding the Answers to Tough Questions About Substance Abuse in Alaska, 1999 Annual Report, State of Alaska Advisory Board on Alcoholism and Drug Abuse.

Alcohol use is a major cause of traffic crashes in Alaska. In 2002, 1,109 traffic crashes were attributed to alcohol, costing an estimated $35 million. Of these crashes, 25 were fatal injury crashes, 107 were major injury crashes, 370 were minor injury crashes, and 607 crashes had property damage only. According to the Alaska Department of Transportation and Public Facilities (ADOTPF), a traffic crash is alcohol-related under the following conditions:

- If the blood alcohol test given to the driver, pedestrian, pedal cyclists, or recreational vehicle operator was positive.
- If a police investigation indicated that alcohol consumption was a contributing factor.
- If a citation was issued for driving while under the influence of alcohol, driving with an open container of alcohol, or public drunkenness.

Methodology

To measure the cost of traffic crashes, the research team used two sources: State of Alaska 2002 alcohol-related traffic crash statistics from ADOTPF, and cost-per-accident data from the National Highway Traffic Safety Administration (NHSTA), adjusted for inflation to 2003 dollars.[4] Crash data was divided into four categories: property damage only, minor injury, major injury, and deaths. These categories were matched to the national data, which shows unit costs from motor vehicle crashes in eight categories. McDowell Group matched minor injuries reported by ADOTPF with Maximum Abbreviated Injury Scale (MAIS) Level 1, classified as minimum injuries in the NHTSA report. Major injuries were matched to MAIS Level 5, classified as critical injuries by NHTSA. No extrapolation is needed for the remaining categories, property damage only and fatalities, which are in each study. Unit costs related to traffic crashes from the NHTSA report are presented in Table 7.

Table 7
Unit Costs of Traffic Crashes in the U.S., 2003

Type of Cost	Fatal	Major Injury (MAIS 5)	Minor Injury (MAIS 1)	Property Damage Only
Insurance administration	$37,120	$75,118	$715	$116
Workplace cost	$8,702	$8,191	$252	$51
Legal cost	$102,138	$88,753	$172	$0
Property damage	$10,273	$9,446	$3,844	$1,484
Total	**$158,233**	**$181,508**	**$4,983**	**$1,651**

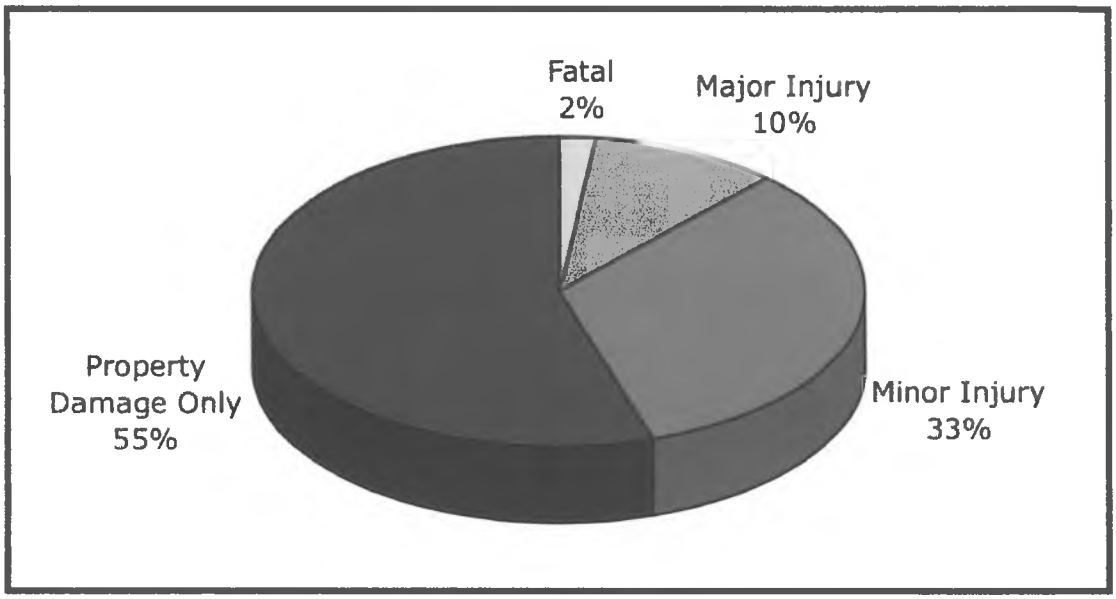
Source: The Economic Cost of Motor Vehicle Crashes, 2000, NHSTA.

Other than knowing that other drugs are a contributing factor in traffic crashes, little is known about their significance, because only alcohol-related data is collected. In the NHTSA study, costs from traffic crashes are divided into separate expense categories. This includes medical costs, loss in productivity from mortality and morbidity, insurance administration costs, workplace costs, legal costs, and property damage costs. To avoid double counting, the research team estimated insurance

[4] *The Economic Cost of Motor Vehicle Crashes, 2000*, published by the National Highway Traffic Safety Administration (NHTSA).

administration costs, workplace, legal and property costs. Losses in productivity and medical costs are accounted for in other sections of the report.

Cost estimates for alcohol-related traffic crashes were adjusted to reflect changes in the Alaska cost-of-living and in U.S. prices from 2000 to 2003. Inflation was estimated using the Anchorage consumer price index from the Bureau of Labor Statistics (BLS). Inflation over this period was approximately 8 percent. The source for the cost-of-living data was the American Chamber of Commerce Researchers Association (ACCRA). During 2003, Anchorage's cost-of-living was approximately 25 percent higher than the average participating city in the American Chamber of Commerce.



Traffic accident statistics include ATV and snowmobile crashes on roadways, but DOTPF does not collect ATV and snowmobile crashes off roadways, such as rivers, lakes, and in the backcountry. Lost productivity and health care costs associated with alcohol-related ATV and snowmobile deaths or injuries are included in the cost estimates. Property damage is not included.

Results

In 2002, 1,109 traffic crashes in Alaska were alcohol-related, about 8 percent of traffic crashes from all causes (13,325). However, the percentage of traffic fatalities caused by alcohol is much greater. About half of all U.S. fatal traffic crashes are caused by alcohol use (NHTSA, 1994). In Alaska, 32 percent of the 78 deaths from traffic crashes were attributed to alcohol in 2002. Figure 2 shows the number of alcohol-related crashes by category.

Adjusted to reflect 2003 dollars, alcohol-related traffic crashes in Alaska cost approximately $35 million in 2003. Table 7 shows the cost of alcohol-related traffic crashes by severity and expense. Legal costs of $16 million were the largest expense, followed by insurance administration costs at $12 million. By crash category, major injuries accounted for the largest costs at $26 million. Lost productivity associated with fatal crashes are not included in this estimate. (See chapter on Lost Productivity.) If these costs were included, the costs of alcohol-related traffic deaths would be far higher than other traffic crash categories.

Figure 2
Percent of Alcohol-Related Traffic Crashes by Type in Alaska, 2002

Table 8
Number of Traffic Crashes and
Total Cost of Alcohol-Related Crashes in Alaska, 2003

Number of Traffic Crashes and Cost Type	Fatal	Major Injury	Minor Injury	Property Damage Only	Total Costs
Number of traffic crashes	25	107	370	607	1,109
Insurance administration cost (thousands of dollars)	$1,245	$10,787	$355	$94	$12,482
Workplace cost (thousands of dollars)	$292	$1,176	$125	$42	$1,635
Legal cost (thousands of dollars)	$3,427	$12,745	$85	$0	$16,257
Property damage cost (thousands of dollars)	$345	$1,356	$1,909	$1,209	$4,819
Total Costs (thousands of dollars)	**$5,309**	**$26,064**	**$2,474**	**$1,345**	**$35,192**

Source: McDowell Group, Note: Number of accidents is based on 2002 data from Alaska Department of Transportation and Public Facilities report, 2002 Alaska Traffic Collisions; and The Economic Cost of Motor Vehicle Crashes, 2000, NHTSA, adjusted for inflation and cost-of-living in Alaska.

Alcohol and other drug abuse contribute to a majority of the criminal justice and protective services costs in Alaska. Combined, these costs totaled nearly $154 million during 2003. Costs for police protection, legal and court services, and incarceration services totaled $93.8 million in 2003. Child and adult protective services totaled nearly $60 million in Alaska during 2003. Child protective services, the largest share of protective services, includes foster care, adoption care, residential care, and social worker services.

Criminal Justice

Like all states in the U.S., Alaska suffers from alcohol and other drug abuse-related crime. Nationwide, 49 percent of 14,000 inmates surveyed reported they were under the influence of alcohol and other drugs at the time of the offense (NIDA/NIAAA, 1998). In another study, it was reported that 2.5 million arrests were made in the U.S. for alcohol offenses, while another 1.5 million arrests were for other drug offenses (Schneider Institute for Health Policy, 2001).

In Alaska there were an estimated 17,000 arrests or offenses known to law enforcement in 2003 that were attributed to alcohol and other drug abuse. During the same period, approximately 57,000 Alaska residents were victims of alcohol and other drug abuse-related crimes. All combined, costs attributed to crime-related alcohol and other drug abuse in Alaska were $93.8 million during this period.

The focus of this section is to provide estimates on the economic costs of crime-related alcohol and other drug abuse for Alaska during 2003.

Methodology

To estimate the economic costs of alcohol and other drug abuse-related crime, the research team relied on a methodology similar to that used in the NIDA/NIAAA (1998) report. Five cost measurements were used: law enforcement, legal and adjudication, corrections, victims' property damage, and victims' medical expenses. Within each category, crime-related attribution rates for alcohol and other drug abuse (NIDA/NIAAA, 1998) were applied to Alaska crime data.

To estimate enforcement and legal costs, estimates were based on data from the Alaska Department of Public Safety (DPS), and blended with attribution rates from the NIDA/NIAAA (1998) report. DPS prepares an annual report, "Crime Reported in Alaska," as part of the nationwide Unified Crime Reporting system. In 2003, law enforcement agencies reporting to DPS for the purposes of the UCR had jurisdiction over 97.5 percent of Alaska's population. The report presents data on offenses known to law enforcement for a proscribed group of offenses: murder, rape, aggravated assault, burglary, larceny-theft, and motor vehicle theft. This includes all offenses of which law enforcement is aware, whether or not an arrest was made. In addition, the report provides arrest data on a number of additional categories of offense. For the purpose of this report, data on offenses known to law enforcement were used when available. When unavailable, straight arrest data was used. Variations between the two data types are noted when appropriate.

Though not used in this study, data from the Arrestee Drug Abuse Monitoring Program (ADAM) project provides an indication of the linkage between drug abuse and crime in Alaska. For example, a survey (including drug testing) of 718 male and female arrestees in Anchorage in 1999 found that 54 percent of males and 56 percent of females tested positive for one or more drugs (including cocaine, marijuana, opiates, Methamphetamine, and PCP).[5] The ADAM project also collected arrestee data on alcohol use. The survey collected data on long-term and near-term drinking behavior prior to arrest for 1,178 males booked into Anchorage jails in 2000 and 2001. The authors of the summary report concluded that "among those that enter the criminal justice system through jails, problematic alcohol abuse is rampant."[6]

Inmate population by offense was used for correction cost estimates. Inmate counts were based on the Alaska Department of Corrections 2003 Offender Profile. The Offender Profile provides inmate counts by offense category as of December 31 of each year. Alcohol and drug abuse attribution rates from NIDA/NIAAA (1998) were applied to this data. Total expenditures by the Department of Corrections in 2003 were $179 million.

Alaska population data from ADOL and victimization rates from the Bureau of Justice Statistics were used to estimate victim property damage and medical costs. In each case, Alaska-specific data by offense was multiplied by its associated attribute rate for alcohol and other drug abuse.

Attribution rates, arrests, and incarcerations related to alcohol and other drug abuse are presented in Tables 9 and 10.[7] Victimization rates, victim numbers, and attribution rates related to alcohol and other drug abuse are shown in Table 11.

[5] "Drug Abuse Among Arrestees in Anchorage", Alaska Justice Forum 17(1), Spring 2000.
[6] "Alcohol Use Among Anchorage Arrestees", Alaska Justice Forum 19(4), Winter 2003.
[7] Specific data on drug and alcohol arrests is available from the Alaska State Troopers Alaska Bureau of Alcohol and Drug Enforcement (ABADE). For example, ABADE alcohol-related arrest/charges included 43 for distribution/sales and 237 for transport in 2003. Cocaine related arrests/charges includes 53 for distribution/sales, 28 for transport and 24 for possession in 2003. Crack related arrests/charges includes 13 for distribution/sales and 11 for possession. Source: 2003 Annual Drug Report.

Table 9
Arrests Attributed to Alcohol and Other Drug Abuse in Alaska, 2003

Type of Offense	Total Number of Arrests	Alcohol Abuse	Drug Abuse	Arrests Attributed to Alcohol Abuse	Arrests Attributed to Drug Abuse	Total Substance Related Arrests
Murder	39	30%	16%	12	6	**18**
Aggravated Assault	2,638	30%	5%	791	135	**926**

Total		**49,232**			**4,299**	**11,514**	**15,813**

Source: McDowell Group, based on attribution rates from The Economic Costs of Alcohol and Drug Abuse in the United States – 1992 (NIDA/NIAAA, 1998); population data from Alaska Department of Labor, and victimization rates from Bureau of Justice Statistics.

As reported under Productivity Losses, crime rates attributed to alcohol and other drug abuse are thought to be higher in Alaska than the rest of the nation. Attribution rates from the NIDA/NIAAA (1998) study were used to estimate Alaska crime rates related to substance abuse, because no Alaska-specific data is currently available to support this premise.

To measure criminal costs attributed to alcohol and other drug abuse, the research team used NIDA/NIAAA (1998) data to estimate the economic implications of criminal activity. After adjusting for inflation and the Alaska cost-of-living differential, law enforcement costs per arrest ranged from $60 to $4,100, depending on the offense, while the average legal costs for most offenses were $1,100 per arrest. Legal costs for driving while intoxicated, liquor laws, and public drunkenness were approximately $60 per arrest. Average incarceration costs per inmate were approximately $33,500. Property damage and medical costs per victim by crime type are presented in Table 12. These unit costs were used to estimate the costs of arrests, incarcerations, and victimizations related to alcohol and other drug abuse.

Table 12
Property Damage and Medical Expenses per Victim, 2003

Type of Crime	Property Damage Expenses per Victim	Medical Expenses per Victim
Robbery	$27	$10
Assault	46	540
Rape	-	72
Murder**	-	23,816
Larceny	31	-
Burglary	58	-
Motor vehicle theft	207	-

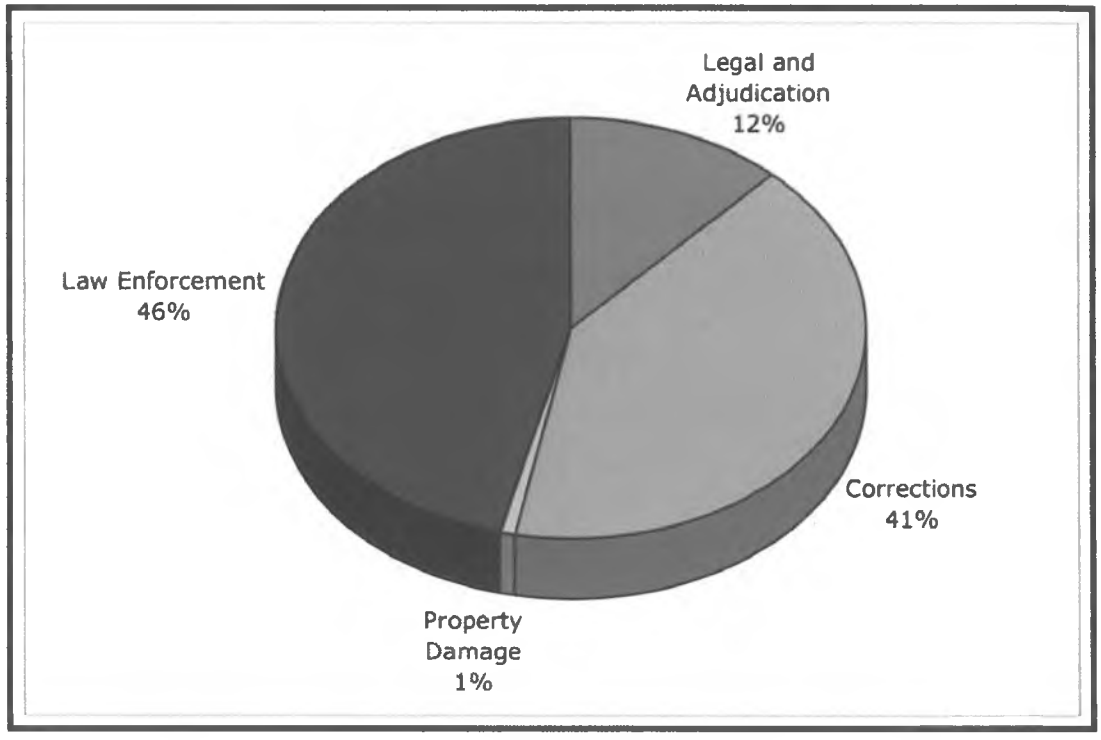
Source: McDowell Group estimates based on NIDA, NIAAA 1992 and the Bureau of Justice Statistics.
** Medical costs for homicides include long-term costs. See NIDA/NIAAA (1998), Appendix C, Table C.6.

As noted above, costs were adjusted to reflect changes in U.S. prices from 1992 to 2003, as well as the cost-of-living in Alaska. Bureau of Labor Statistics inflation rates specific to health care were used to inflate health care and medical expenses (a 56 percent inflation rate). To adjust for Alaska's higher medical costs relative to the rest of the country, medical expenses for victims were increased by a 65 percent health care-specific cost-of-living differential. This differential was drawn from American Chamber of Commerce Research Association data for fourth quarter 2003.

Additional costs from lost productivity due to incarceration are presented in the Productivity Losses chapter to avoid double counting. Inmates are generally not employed while incarcerated, so society loses the benefit of their production of goods and services.

Drug traffic control costs were not included in this report. The U.S. budget in fiscal year 2003 for drug traffic control was $11 billion.[8] Some portion of this money was spent in Alaska for drug interdiction, international intelligence, research, and a number of other drug-related activities. However, specific information on Alaska's portion of this budget is not available.

Results



In Alaska in 2003, approximately 17,400 offenses known to law enforcement and 1,190 incarcerations were attributed to alcohol and other drug abuse. Of the 17,400 arrests, 8,400 crimes were related to alcohol abuse, while other drug abuse accounted for 9,000 crimes. Among incarcerations, 780 were alcohol-related and 410 were other drug-related.

Alaska also had an estimated 15,800 residents who were victims of alcohol or other drug abuse-related crimes. The number of victims who had property damage was 11,700, while 4,100 of the victimizations were against a person.

Figure 3 shows the distribution of alcohol and other drug-related crime by cost. Total costs for Alaska substance abuse-related crime were $93.8 million in 2003. The largest expense was law enforcement at $43.4 million, followed by correction costs at $38.2 million and legal and adjudication costs at $11.6 million. Property damage costs totaled more than $636,000 and medical costs to victims totaled $1.9 million. Medical costs are reported in this chapter for reference, but were not added to total crime-related costs to avoid double counting. Medical costs are included in the Health Care chapter.

Figure 3
Distribution of Criminal Justice Costs Attributed to Alcohol and Other Drug Abuse in Alaska, 2003

Note: Figures may not add to 100% due to rounding.

Table 13 presents law enforcement costs from alcohol and other drug-related crime for Alaska during 2003. Larceny and theft accounted for the largest expense at $23 million. Burglary accounted for $5.2 million and assault for $3.7 million.

Legal costs from alcohol and other drug-related crimes for Alaska during 2003 are presented in Table 14. Larceny and theft were the largest expense at $6 million. Costs for burglary were $1.3 million, and for assault were $972,000.

Among Alaska incarceration costs in 2003, costs for inmates imprisoned for driving while intoxicated were greatest, at $10 million. This is a substantial increase from 1999, due largely to a more than doubling of the inmate population for DWI crimes. This was followed by costs for aggravated assault, at $6.4 million and homicide at $6.2 million. Drug laws were fourth, at $5.9 million, and sexual assault followed, at $4.5 million. Table 15 presents incarceration costs for Alaska during 2003 by offense.

Table 13
Law Enforcement Costs Attributed to Alcohol and Other Drug Abuse by Offense in Alaska, 2003

Type of Offense	Alcohol	Drug	Total
Homicide*	$47,000	$25,000	$71,000

Liquor laws	-	-	-
Prostitution	-	-	-
Drug laws	-	6,097,000	6,097,000
Total	**$24,384,000**	**$13,800,000**	**$38,184,000**

Source: McDowell Group, based on attribution rates from The Economic Costs of Alcohol and Drug Abuse in the United States – 1992 (NIDA/NIAAA, 1998); and incarceration data from Alaska Department of Corrections.

Note: Columns and rows may not total due to rounding.

This incarceration data does not include Alaska Statute Title 47 Protective Holds in Department of Corrections Facilities. Department of Corrections data does not specify the reason for each protective hold, but DOC staff indicate that the "vast majority [of protective holds] are the result of incapacitation due to alcohol use." For the years 2000-2002, there were a total of 7,920 protective holds for 3,243 individuals.[9] Estimates of the annual cost of these protective holds are not available.

Protective Services

Alcohol and other drug abuse is a primary contributor to child abuse and neglect cases in Alaska. In a study completed by the National Center on Addiction and Substance Abuse at Columbia University in 1999, it was found that parents were three times more likely to abuse their children and four times more likely to neglect their children if the parents were substance abusers. In that same study, approximately seven out of ten abused or neglected children nationwide are linked to parents who abuse alcohol and other drugs. In a study completed by the Alaska, Department of Health and Social Services, Division of Alcohol and Drug Abuse (DADA) (now part of the Department of Behavioral Health), approximately 81 percent of all Division of Family and Youth Services (DFYS) (now the Office of Children's Services) reports of child abuse involved alcohol and drug abuse.[10,11]

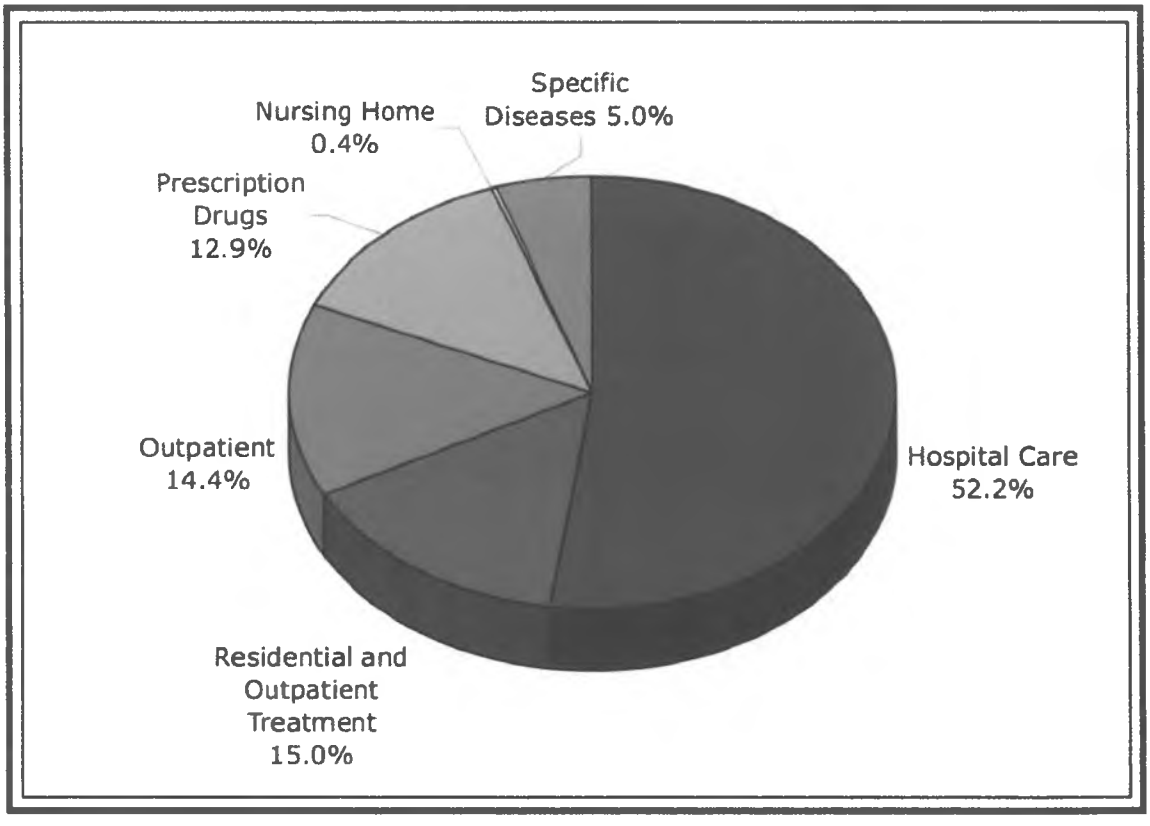
[9] "Analysis of Title 47 Protective Holds in Department of Corrections Facilities, CY 00-02." Undated document.
[10] *Final Report of the Alaska Criminal Justice Assessment Commission*, May 2000, published by the Alaska Judicial Council.

Methodology

Currently, there is no accurate measure of the cost to Alaska from child abuse and neglect caused by alcohol and other drug abuse. To overcome this shortfall, the research team relied on the 1999 DADA child abuse estimate and assumed that 81 percent of child protective services were attributable to alcohol and other drug abuse. These services include foster care, adoption care, residential care, and social work care through the Office of Children's Services (OCS). In addition, the Office of Public Advocacy (OPA) provides child protective services. Their services include advocacy within the legal system for children under state custody. Their total FY2003 expenditure was $13.8 million. Unfortunately, OPA was not able to provide the portion of their budget that is attributed to child protective services.

Adult protective service costs during 2003 were provided by Division of Senior and Disability Services, in the Department of Health and Social Services. The division provides assistance to adults who are unable to care for themselves, either because of physical, emotional, or mental impairment. Total expenditures on adult protective services in 2003 were $733,000. Department personnel estimate that 20 percent of all protective services cases are related to substance abuse or dependence by the care recipient. Another 20 percent of the cases the department handles are linked to substance abuse or dependence by primary caregivers or other family members.

Results



Total costs for child protective services provided by the Office of Children's Services in Alaska during fiscal year 2003 were nearly $60 million. Social work accounted for the largest expense at $18.4 million. Other expenses include $13 million for foster care services, $14 million for residential services, and $13.7 million for adoption and guardianship services. Additional program funding for child abuse prevention programs was $1.6 million.

Adult protective care services were estimated at $293,000 during 2003.

Illness and injuries stemming from alcohol and other drug abuse have significant health costs. In Alaska, health care costs related to alcohol and other drug abuse are estimated at $178 million. Alcohol and other drug-related illnesses or injuries range from acute to chronic. Acute illness includes alcohol poisoning, while chronic illness could be cirrhosis of the liver. In addition, prolonged alcohol and other drug abuse could increase the chance of other illnesses such as hypertension, diabetes, or stomach cancer.

This chapter estimates health care costs related to alcohol and other drug abuse in Alaska during 2003. Health care costs are presented for the following categories: hospital, outpatient, prescription drugs, nursing home and long term care facilities, fetal alcohol syndrome (FAS), HIV, and hepatitis B and C.

Figure 4
Distribution of Health Care Costs Related to Alcohol and Other Drug Abuse in Alaska, 2003

- Hospital costs from alcohol and other drug abuse-related injuries and illnesses in Alaska are estimated at $93 million in 2003. Alcohol abuse-related hospital care for medical illnesses and injuries costs accounted for $84.8 million, while other drug abuse-related costs were $8.2 million.

- Alcohol and other drug in-resident and outpatient drug and alcohol treatment costs from state sources were approximately $26.8 million.

- Total medical outpatient visits from alcohol and other drug abuse-related illness or injuries are estimated at 60,100 for a total cost of $25.7 million in 2003.

- Pharmaceutical and long term care costs from alcohol abuse are estimated at $23.0 million and $719,400, respectively.

- Approximately 78 HIV and HIV with AIDS cases were attributed to intravenous drug use during 2003. Total medical costs for treating these patients were $3.9 million.

- Intravenous drug abuse contributed to 344 hepatitis B and C cases in Alaska during 2003, with medical care costs of $5.1 million.

Excluded from the total values are the costs of care for individuals with Fetal Alcohol Syndrome and other Fetal Alcohol Spectrum Disorders. Data on the number of individuals living with FASD in Alaska is unavailable. However, information on the number of children born with FAS in a given year is available, as are estimates for lifetime costs of care. Estimated lifetime health care costs for the 15 FAS births in 2003 are $47.0 million.

Hospital Costs

Hospital costs from illness and injuries are a significant portion of alcohol and other drug-related health care costs. In 2003, hospital costs from illness and injuries accounted for 52 percent of total health care costs related to alcohol and other drug abuse (which totaled $178 million). Hospital costs are composed of three sources:

- Illness or injuries directly related to alcohol and other drug abuse, which might include alcohol cirrhosis or gastritis.

- Illness indirectly related to alcohol and other drug abuse, which could include cancer of the esophagus, burns, or poisoning.

- Treatment or injuries complicated by alcohol and other drug abuse resulting in lengthy hospital stays.

Methodology

To estimate injury and illness-related hospital costs from alcohol and other drug abuse, the research team relied on results of two studies: the *National Survey on Drug Use and Health*, conducted annually by the Substance Abuse and Mental Health Services Administration in the U.S. Department of Health and Social Services; and *The Economic Costs of Alcohol and Drug Abuse in the United States - 1992*, NIDA/NIAAA (1998).

The NSDUH showed that 10.4 percent of Alaska's population age 12 and older was dependent upon or had abused illicit drugs or alcohol in 2003, while the U.S. national average was 4.5 percent. Alaska's portion of the U.S. substance dependent or abusing population was 0.5 percent.

No Alaska-specific data exists on the number of hospital inpatient days related to drug and alcohol abuse; to estimate this number, the research team adjusted NIDA/NIAAA (1998) estimates to reflect growth in the U.S. population, and used

the factor for Alaska's alcohol and drug-dependent population (0.5 percent) to determine the number of hospital care days in the state. The NIDA/NIAAA study reported costs for non-federal and federal/veteran inpatient care, as well as costs for alcohol and other drug-related hospital and outside physician services. Cost estimates were adjusted to reflect U.S. price inflation for health care from 1992 to 2003 and Alaska health care costs. Inflation in nationwide health care costs over the time period was approximately 56 percent according to the Bureau of Labor Statistics. During 2003, health care costs in Fairbanks (the largest Alaska city included in 2003 American Chamber of Commerce Research Associates – ACCRA cost-of-living data) were approximately 65 percent higher than a national average. After adjusting for inflation and Alaska health care costs, estimated average cost per day for hospital care in 2003 was $2,099. The daily cost for physician care averaged $504.

Total Alaska non-federal hospital costs from illness and injury-related substance abuse were estimated by applying daily hospital costs to the estimated number of hospital care days related to alcohol and other drug abuse. Hospital costs were divided into three categories for alcohol: alcohol-specific illness, alcohol-related illness, and additional costs from co-occurring alcohol disorders. Other drug categories include other drug-specific illness, other drug-related illness, and additional days from other drug disorders.

Substance abuse-related hospital stay costs for illnesses and injuries in a veterans' or federal facility were estimated using the methodology from the NIDA/NIAAA (1998) study. In that study, veterans' and federal hospital revenues accounted for 9.5 percent of total U.S. hospital revenues. By applying this proportion to non-federal hospital costs for substance abuse, the research team estimated hospital costs for the federal facilities for Alaska during 2003.

Results

The estimated total number of hospital care days related to alcohol and other drug abuse illnesses and injuries were 32,900 in Alaska during 2003. Alcohol abuse accounted for an estimated 30,000 care days, while 2,900 were from other drug abuse. Among alcohol abusers, total hospital care days were estimated as follows: specific illnesses at 2,300, related illnesses at 22,700, and co-occurring alcohol disorders at 5,000. Estimated number of hospital care days for other drug abuse-specific illnesses was fewer than 10, while hospital care days for other drug abuse-related illnesses are not included in hospital costs to avoid double counting. These costs are presented later in this chapter. Additional days from other drug disorders were estimated at 2,900 hospital care days. Table 16 presents results on the number of care days by category for Alaska in 2003.

Table 16
Hospital Costs for Illness and Injuries
Related to Substance Abuse in Alaska, 2003

	Total Care Days	Non-Federal Hospital Costs	Veteran and Federal Hospital Costs	Total Hospital Costs
Alcohol-specific illness	2,300	$6,072,400	$514,000	**$6,586,300**
Alcohol-related illness	22,700	59,164,600	5,007,800	**64,172,400**
Additional days from co-occurring alcohol disorders	5,000	12,931,600	1,094,600	**14,026,100**
Subtotal, alcohol abuse	30,000	78,168,600	6,616,300	**84,784,900**
Other Drug abuse-specific illness	<10	14,800	1,300	**16,100**
Other Drug abuse-related illness	*	*	*	*
Additional days from other drug disorders	2,900	7,586,700	642,200	**8,228,900**
Subtotal, other drug abuse	2,900	7,601,600	643,400	**8,245,000**
Total alcohol and other drug abuse	**32,900**	**$85,770,100**	**$7,259,700**	**$93,029,900**

Source: McDowell Group, based on alcohol and drug dependent population estimates from the 2003 National Survey on Drug Use and Health, from the Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services; and U.S. hospital care days and costs per day related to alcohol and other drug abuse from The Economic Costs of Alcohol and Drug Abuse in the United States – 1992 (NIDA/NIAAA, 1998).

*These costs include HIV, and Hepatitis A and B, which are presented later in the chapter.

Alaska hospital costs from alcohol and other drug abuse-related medical injuries and illness in 2003 were estimated at $93 million (Table 16). Non-federal hospitals accounted for $85.8 million, while veterans and federal hospitals were $7.3 million. Estimated hospital costs injuries and illness related to alcohol and other drug abuse were $84.8 million and $8.2 million, respectively. Alcohol-related illnesses resulted in the highest hospital costs at $64 million.

Data maintained in the Alaska Department of Health and Social Services Alaska Trauma Registry, for the years 1997 through 2001, provides an indication of the number of accidents where alcohol and/or illegal drug use, at the time of the accident, was suspected or proven. Of approximately 22,700 trauma incidents recorded in the registry, alcohol use was suspected or proven in 24 percent of the cases and illegal drug use was suspected or proven in 10 percent of the cases.

Residential and Outpatient Alcohol and Other Drug Treatment Costs

In 2003, there were 4,006 substance abuse treatment admissions in Alaska. Just over 80 percent of these admissions were for alcohol or alcohol with secondary drug issues.

There are several categories of costs related to the treatment of alcohol and drug abuse and dependence in resident and outpatient facilities. The Alaska Department

of Health and Social Services, Division of Behavioral Health, provides grant funds to organizations and agencies throughout the state in support of drug and alcohol treatment services. Specific services include rehabilitation, counseling, case management, and other types of treatment services for individuals and families. In addition, Medicaid pays for treatment in facilities within and outside of Alaska for qualifying Alaskans. Treatment can also be paid through private insurers or private parties.

Data pertaining to the state-funded treatment, both through DBH and through Medicaid, is readily available. Data on costs borne by private insurers or private parties is not available. As a result, cost estimates presented underestimate the total cost of drug and alcohol treatment.

Funding appropriated by the DBH to support alcohol and drug abuse treatment in 2003 totaled approximately $23.3 million. Payments from Medicaid for substance abuse services in 2003 totaled $3.5 million. These payments account for treatment received in substance abuse-specific treatment facilities. Not included in these treatment costs are any services for co-occurring disorders that may have been billed by mental health or other providers. Costs for lab tests for drug and alcohol screening are also excluded from this number. Because Health and Social Services provided the data on both DBH and Medicaid directly, no estimate procedures were needed.

Data from the National Survey of Substance Abuse Treatment Services (N-SSATS) provides data on the number of treatment facilities and clients in substance abuse treatment. As of March 2004, there were 2,503 clients in substance abuse treatment in 69 facilities in Alaska. Just over half of those clients (53 percent) were in private non-profit treatment facilities, 8 percent were in private for-profit facilities, 9 percent were in local government facilities, 14 percent were in federal government facilities, and 16 percent were in tribal government facilities.[12]

Medical Outpatient Costs

Another health expense related to alcohol and other drug abuse is outpatient medical treatment for a specific disorder or illness related to alcohol and other drug abuse. Examples of specific disorders could include alcohol gastritis or cirrhosis, while a related illness could be chronic pancreatitis or cancer of the esophagus.

Methodology

Like hospital costs, specific data on alcohol and other drug abuse-related medical outpatient visits was not available for Alaska. To estimate these costs, the research team applied Alaska prevalence figures to U.S. estimates for alcohol abuse-related medical outpatient visits reported in the NIDA/NIAAA (1998) study. The NIDA/NIAAA study did not report any medical outpatient visits for other drug abuse-specific disorders because of the lack of data and causal relationships needed to estimate the medical outpatient visits. Other drug abuse medical outpatient visits related to HIV and Hepatitis B and C are presented later in the chapter.

Estimated medical outpatient visits were multiplied by the average medical outpatient cost for alcohol and other drug abuse-related illnesses and injuries. Cost estimates were adjusted to reflect changes in U.S. prices from 1992 to 2003, and

[12] N-SSATS State Profile – Alaska 2004.

Alaska health care costs. Inflation was estimated at 56 percent using U.S. consumer price index for health care expenditures from the U.S. Bureau of Labor Statistics. Alaska health care cost data came from ACCRA. During 2003, health care costs in Fairbanks (the largest Alaska city for which data were available) were approximately 64 percent higher than the average participating city. After adjusting for inflation and cost-of-health care in Alaska, the estimated average cost for an alcohol and other drug abuse-related medical outpatient visit was $504.

Results

Alcohol abuse-related medical outpatient visits in Alaska during 2003 were estimated at $25.7 million. Alcohol-related disorders accounted for 52,200 estimated visits, while alcohol-specific illnesses had an estimated 7,900 visits. Table 17 presents estimated medical outpatient visits and costs for alcohol abuse-related disorders.

Of the total $25.7 million in alcohol abuse-related outpatient medical costs in 2003, alcohol abuse-related illness and injury contributed an estimated at $22.3 million, while alcohol abuse-specific illness and injury contributed $3.4 million.

Table 17
Medical Outpatient Visits and Costs Related to Alcohol Abuse in Alaska, 2003

	Outpatient Visits	Outpatient Costs (thousands of dollars)
Alcohol-specific	7,900	$3,373,000
Alcohol-related	52,200	22,286,000
Total, Alcohol Abuse	**60,100**	**$25,659,000**

Source: McDowell Group, based on alcohol and other drug-dependent population estimates from National Survey on Drug Abuse and Health, 2003, Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services; and U.S. medical outpatient and costs related to alcohol abuse from The Economic Costs of Alcohol and Drug Abuse in the United States – 1992 (NIDA/NIAAA, 1998).

Prescription Drugs and Nursing Home/Long-Term Care Costs

Although not as high as hospital and medical outpatient costs, alcohol and other drug abuse also have prescription drug and nursing home costs. Prescription drugs are prescribed for alcohol abuse-specific illnesses such as cirrhosis or alcohol-related cancer. Long-term care and nursing home costs estimates are for residents who have a primary alcohol abuse-specific diagnosis.

Methodology

Alcohol-related prescription drug costs were estimated using Alaska prevalence data on substance abuse. Prevalence estimates were applied to the total U.S. prescription drug costs related to alcohol abuse, as published in the NIDA/NIAAA (1998) study. These totals were adjusted to reflect population growth, inflation, and the cost of health care in Alaska. In the study, 2.2 percent of U.S. prescription drug costs for all illnesses were attributed to alcohol abuse. Prescription drug costs related to other drug abuse were not estimated due to the lack of national data.

Nursing home costs related to alcohol abuse were estimated using data from the Alaska Department of Health and Social Services and the NIDA/NIAAA (1998) study. HSS collects data on the number of long-term care days per care facility in

Alaska, as well as the daily rate information for each facility. There were an estimated 219,400 total nursing home and long-term treatment care bed days in Alaska for all during 2003, while cost per day of care averaged $328 per day, with a range of $213 to $625 per day. The cost of Alaska nursing home care for all illnesses and injuries during 2003 was approximately $71.9 million. Based on estimates published in the NIDA/NIAAA (1998) study, approximately 1 percent of the nation's nursing home care costs can be attributed to alcohol abuse-specific illnesses. The research team applied 1 percent to total nursing home and long term care costs in Alaska during 2003.

Results

Estimated pharmaceutical costs related to alcohol abuse in Alaska during 2003 were approximately $23.0 million. Alcohol abuse-related nursing home care days totaled 2,194 in Alaska during 2003. Costs from these visits amounted to approximately $719,000.

Fetal Alcohol Spectrum Disorders

Prenatal exposure to alcohol can cause specific birth defects which may include physical, mental, behavioral, and learning disabilities. Many children with fetal alcohol disorders are not identified until they reach school age or later. Individuals with alcohol-related effects may have difficulties with attention, memory, and problem solving. Heart, liver, and kidney defects are also common, as well as vision and hearing problems.[13] Alcohol-related effects that fall within the broad category of fetal alcohol spectrum disorders (FASD) include:

- fetal alcohol syndrome (FAS),
- partial FAS (PFAS),
- fetal alcohol effects (FAE),
- alcohol-related neurodevelopmental disorder (ARND),
- and other alcohol-related birth defects (ARBD).[14]

During the past ten years, a number of FAS prevalence rates have been established. Studies by the Centers for Disease Control and Prevention indicate a national rate from 0.2 to 1.5 cases per 1,000 births across various populations.[15] Other studies, including those focusing on specific high-risk populations such as Native Americans, other minorities and families living in poverty have indicated rates from 0.5 to 5.0 per 1,000 live births. Clearly, the data is varied and limited.

In establishing a clear number of infants born each year in the United States with Fetal Alcohol Syndrome, the CDC estimates between 1,000 and 6,000 children will be born with FAS each year – a preventable birth defect and disability.

Beginning in 1997, Alaska was one of five states comprising the CDC's Fetal Alcohol Syndrome Surveillance Network (FASSNet), a program established to provide consistent and comparable FAS prevalence rates. Participating states included Arizona, Colorado, New York, Wisconsin and Alaska (however, FAS rates for Wisconsin are not available). At 1.5 per 1,000 live births, Alaska has a significantly higher rate of children born with FAS than other states in the FASSNet program. In

[13] National Organization on Fetal Alcohol Syndrome, *What is FAS/FASD?*, www.nofas.org/faqs.aspx?id=9
[14] US Department of Health and Human Services, SAMHSA Fetal Alcohol Spectrum Disorders Center for Excellence. *The Language of Fetal Alcohol Spectrum Disorders.*
[15] *FAS: Guidelines for Referral and Diagnosis*, CDC, 2004.

addition, Alaska data showed an estimated FAS prevalence rate of 4.8 per 1,000 live births among Alaska Natives. CDC data indicates FAS prevalence rates ranging from 0.3 per 1,000 in Arizona and Colorado to 0.4 in New York.

CDC estimates that other prenatal alcohol-related conditions, such as ARND and ARBD, occur approximately three times as often as FAS.[16] Within the wider category of FASD (which would include individuals with FAS), the US is estimated to have about 10 cases per 1,000 live births. [17]

Alaska's estimated rate of all births impacted by prenatal alcohol exposure is 16.3 cases per 1,000 births, based on the 1995 to 1999 birth years. While these alcohol-related effects are closely associated with FASD, these rates are not directly comparable to national FASD rates of 10 per 1,000 live births due to differences in diagnoses and reporting at the state and national levels. Based on 16.3 cases per 1,000 and the number of live births from 1995 to 1999, approximately 160 infants are born each year in Alaska with FAS and other effects from maternal alcohol use during pregnancy. Of those, approximately 15 are born with Fetal Alcohol Syndrome (FAS).

FAS vs. FASD

It is important to remember that the information being used to determine the economic costs of care and service delivery to individuals with Fetal Alcohol Syndrome is only a small portion of the overall impact of prenatal exposure to alcohol and the resulting birth defects and disabilities. Beginning in 2000, the State of Alaska began extensive efforts to improve and expand the ability to appropriately diagnose individuals prenatally exposed to alcohol. In 2005, Alaska has a broad and regionally diverse network of diagnostic teams across the state.[18] Data collected from these teams indicate that from July 2000 through March 2005 teams have conducted 755 FASD diagnostic assessments. Of this number, 76 (10.0 percent) were diagnosed with FAS or atypical FAS; 378 (49.9 percent) were diagnosed with Static Encephalopathy; 251 (32.2 percent) were diagnosed with Neurobehavioral Disorder; and 50 (6.6 percent) were found to have no evidence of organic brain damage.

What this data indicates is that the costs associated with all alcohol-related births are much higher than those estimated just for individuals with FAS. And, as noted in the break-through research of Dr. Ann Streissguth in 1996 (Understanding the Occurrence of Secondary Disabilities in Clients with Fetal Alcohol Syndrome [FAS] and Fetal Alcohol Effects [FAE]), individuals with FAE (what is now referred to as FASD) are more likely to develop secondary disabilities and need more services than those with Fetal Alcohol Syndrome and the associated facial dysmorphology. For Alaska and the economic costs associated with all fetal alcohol spectrum disorders, the costs could be as much as 80 percent higher than indicated for FAS alone.

Economic Cost of Fetal Alcohol Syndrome

The cost of caring for and providing appropriate services to a person with FAS can be significant. These costs may include neonatal care for low birth weight to special speech therapy, behavioral management, or residential care for adults with FAS. Lifetime costs for care for children born in 2003 with FAS are estimated below. However, these costs are excluded from the total health care costs for 2003, as the component of that expenditure in 2003 alone cannot be determined.

[18] For information on available services go to http://health.hss.state.ak.us/fas/teams/default.htm).

Methodology

To estimate the economic costs from FAS, the research team first determined the number of live births with FAS in Alaska. The Alaska Department of Health and Social Services has closely monitored incidence of FAS in the state since 1998, as part of a U.S. Centers for Disease Control (CDC) monitoring program called the Fetal Alcohol Syndrome Surveillance Network (FASSNet), the ongoing Alaska FAS Surveillance Project and the Alaska Birth Defects Registry. The development of 13 community-based FASD diagnostic teams across Alaska has also assisted in the collection of data related to both FAS and other alcohol-related disabilities included in the FASD umbrella definition.

The Alaska FAS Surveillance Project data collection system is based on reports to the Alaska Birth Defects Registry, and uses medical chart data points to identify children with FAS or other prenatal alcohol-related conditions. DHSS staff consider the surveillance program to be highly rigorous. Alaska clinicians and case workers use a diagnostic process developed by researchers at the University of Washington Fetal Alcohol Syndrome Diagnostic and Prevention Network. Reporting of birth defects to the state registry is mandated by Alaska law. While Alaska's FAS surveillance system is believed to capture the majority of prenatal alcohol-related cases, it is possible that underreporting could make the incidence rate even higher.

For birth years 1995 to 1999, the incidence rate of FAS in Alaska is 1.5 per 1,000 live births.[19] This was the highest rate of the five states that were involved in developing the CDC FASSNet system. (The lowest rate was 0.3 FAS cases per 1,000 births.) However, the incidence of all prenatal alcohol-related conditions, including such conditions as alcohol-related birth defects (ARBD) and alcohol-related neurodevelopmental disorder (ARND), as well as FAS, is 16.3 per 1,000 live births. This incidence rate is assumed to be consistent in birth year 2003.

To estimate FAS costs in Alaska, the research team relied on data published in Health Professions Education Partnership Act of 1998 (Senate Bill 1754). The cost of treating an individual with FAS over his or her lifetime was estimated to be at least $1.4 million in 1995. These costs could include neonatal intensive care, medical and surgical services (not related to neonatal care), special speech therapy, behavioral management, and residential care. Medical and surgical service might include rectifying or monitoring hearing loss or cleft palate surgery. Residential services include special education, home care, speech therapy or institutional care. The 1995 data was adjusted for inflation using the Bureau of Labor Statistics Consumer Price Index for medical care. Additionally, costs of providing care were adjusted by the Alaska differential for cost of living (65 percent in 2003). The resulting total lifetime costs (in 2003 dollars) for providing services to an individual with FAS are estimated at $3.1 million.

The total cost for providing services to an individual with FAS born in Alaska during 2003 was estimated by multiplying the lifetime costs by the number of FAS births during that period.

Results

Table 18 presents estimated costs for FAS births in Alaska during 2003. During that period, Alaska had about 15 FAS births. Total economic costs resulting from services to all individuals with FAS in Alaska totaled approximately $47.0 million.

AIDS and HIV Costs

Intravenous drug abuse among individuals who share unhygienic needles is a significant cause of AIDS and HIV. Although AIDS and HIV no longer require extensive inpatient medical care, both result in high medical expenses worth measuring separately from the hospital and outpatient costs presented above (NIDA/NIAAA, 1998).

Methodology

The State of Alaska Department of Health and Social Services Epidemiology Section compiles data on HIV and AIDS diagnoses in the state. While the section does not track individuals with HIV and/or AIDS diagnoses, it does compile cumulative counts of the number of diagnoses in the state since the first known HIV diagnosis. Of the known cases of HIV and/or AIDS, 13 percent are associated with intravenous drug use. In addition, the Epidemiology Section tracks known deaths. The section does not track the whereabouts of diagnosed individuals, and as a result no data exists regarding the number of HIV/AIDS patients who may have moved away from Alaska. For the purposes of these estimates the research team assumes that 100 percent of diagnosed individuals remain in the state, though it is recognized that this may not be the case. Additionally, we assume that 100 percent of the known deaths occurred among individuals who had been diagnosed with AIDS, although data is not available on specific cause of death.

Two steps were used to calculate other drug-related AIDS and HIV medical costs. First, AIDS and HIV costs were estimated by applying annual medical expenses from the NIDA/NIAAA (1998) study to the number of known Alaska AIDS and HIV patients in 2003. Cost data was adjusted for inflation and the cost of health care in Alaska using the same sources and methods previously reported. Annual medical expenses for each Alaska HIV patient were estimated at $30,600, while medical expenses for each AIDS patient were $68,200.

The second step was to determine the percent of AIDS and HIV medical expenses that can be attributed to other drug abuse. The Epidemiology Section reported that approximately 13 percent of AIDS and HIV cases were attributed to intravenous drug abuse. This attribution rate was then applied to medical costs for AIDS and HIV patients.

Based on the data from the Alaska Division of Public Health, a total of 597 individuals with HIV or HIV/AIDS lived in Alaska in 2003. Of those, an estimated

295 had HIV without AIDS and 302 had HIV with AIDS. An estimated 13 percent of these individuals contracted HIV through intravenous drug use.

Although the following cost estimates are limited only to those caused by intravenous drug abuse, alcohol abuse is a risk factor in contracting AIDS and HIV from unprotected sex.

Results

An estimated 78 HIV and HIV with AIDS cases in Alaska are attributable to intravenous drug use. Medical costs for treating these patients in 2003 were approximately $3.8 million. Table 19 presents the number of HIV and HIV with AIDS cases and annual medical expenses for these cases.

Table 19
Annual Medical Expenses per AIDS and HIV Case
Due to Other Drug Abuse in Alaska, 2003

	Annual Medical Expenses per Patient	Number of AIDS and HIV Patients	Total Costs due to Drug Abuse
HIV Positive	$30,600	38	$1,172,000
AIDS	$68,200	39	$2,678,000
Total	**n/a**	**78**	**$3,850,000**

Source: McDowell Group, based on AIDS and HIV case numbers from Alaska Department of Health and Social Services, Division of Public Health; and annual medical expense data from The Economic Costs of Alcohol and Drug Abuse in the United States – 1992 (NIDA/NIAAA, 1998).

Hepatitis B and C Costs

Intravenous drug abuse and sharing unhygienic needles are leading contributors to hepatitis B and C in Alaska. In fact, intravenous drug use is the largest contributor to hepatitis C. Hepatitis B and C have been linked to cirrhosis and primary hepatic cancer.

Methodology

Approximately 12 percent of hepatitis B cases and 36 percent of hepatitis C cases can be attributed to intravenous drug abuse (NIDA/NIAAA, 1998). According to the Alaska Department of Health and Social Services, there were 8 cases of hepatitis B and 952 cases of hepatitis C reported in the state in 2003. Hepatitis B infection is accompanied by acute illness, and reported cases in 2003 likely accurately represent the number of people seeking care for hepatitis B in that year. However, hepatitis C is not necessarily accompanied by acute symptoms, though long-term costs of care are generally far more significant. Due to limited data on the disease stage[20] and how many patients were cured, the report estimates the cost of treating only those hepatitis C cases reported by the Alaska Division of Public Health in 2003.

Medical expenses for hepatitis B and C were presented in the NIDA/NIAAA (1998) study by stage. Since data is limited for hepatitis B and C in Alaska, medical expenses from the NIDA/NIAAA study were averaged. Adjusting for inflation and Alaska health costs, the annual average medical expense is $3,400 for treating hepatitis B and $14,900 for hepatitis C. These costs were applied to all other drug

[20] Incubation, acute, and persistent are the three stages of hepatitis.

abuse-related hepatitis B and C cases reported in 2003 by the Division of Public Health. However, it should be pointed out that most hepatitis B and C cases required only monitoring of the disease, which is relatively inexpensive. Hepatitis B cases generally require intensive treatment but limited long-term care, while hepatitis C cases may require low levels of treatment over an extended time, leading toward intensive treatment in later stages of the disease. The study provides an approximate cost of treating hepatitis B and C cases that were newly reported during 2003.

Results

In Alaska, intravenous drug abuse attributed to one hepatitis B case and 343 hepatitis C cases during 2003. Total annual medical costs for intravenous drug abuse-related hepatitis B were $3,000. Costs associated with the treatment of hepatitis C attributed to intravenous drug abuse were an estimated $5.1 million. Table 20 presents total medical costs and number of cases for hepatitis C in Alaska during 2003.

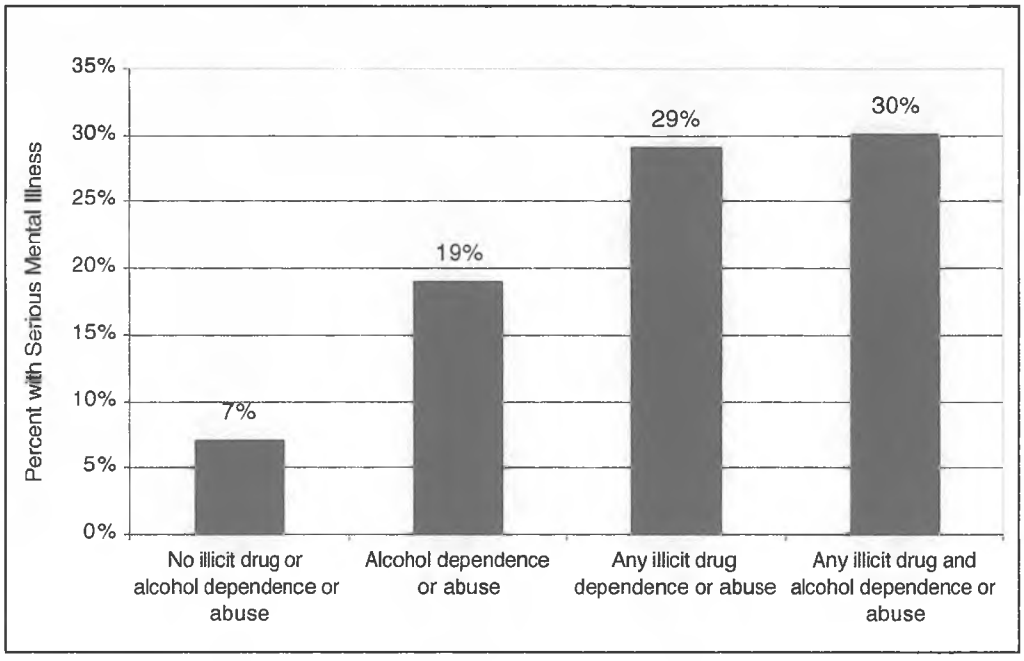
Table 20
Annual Medical Expenses per Hepatitis C Case
Due to Drug Abuse in Alaska, 2003

	Annual Medical Expenses per Patient	Number of Patients	Total Costs due to Drug Abuse
Hepatitis C	$14,900	343	$5,114,000

Source: McDowell Group, based on hepatitis B and C case numbers from the Alaska Department of Health and Social Services; and annual medical expense data from The Economic Costs of Alcohol and Drug Abuse in the United States – 1992 (NIDA/NIAAA, 1998).
Hepatitis B costs were not included in the table because costs were insignificant compared to Hepatitis C ($3,000).

A significant percentage of individuals with serious mental illness also are users of or dependent upon drugs and/or alcohol. Similarly, rates of serious mental illness among individuals who experience drug and/or alcohol dependence or abuse are significantly higher than among the general population. Research also indicates that adults with co-occurring serious mental illness (SMI) and substance abuse disorders are more likely to receive treatment for their mental illness than for their substance dependence.

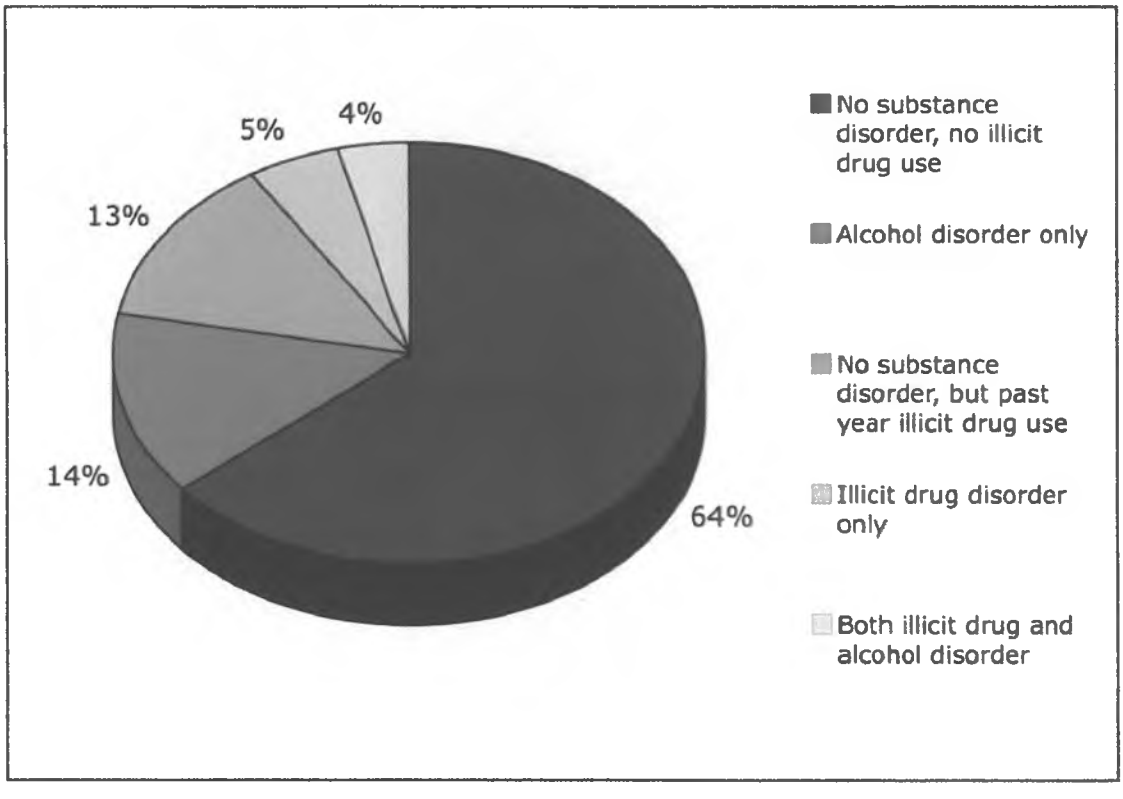
The State of Alaska is currently undergoing a process to integrate substance abuse treatment and mental health services in the state so that individuals in need of care can receive coordinated treatment for any co-occurring disorders. In addition, the state introduced an initiative in 2004 called Bring the Kids Home. The purpose of BTKH is to support the development of in-state residential psychiatric treatment capacity for Alaskan children and youths. Though still in its nascent stage, there are already measurable impacts from the initiative.



The U.S. Substance Abuse and Mental Health Services Administration (SAMHSA), Office of Applied Studies published a report in 2004 on *Serious Mental Illness and Its Co-Occurrence with Substance Use Disorders* for the year 2002. The report provides data on co-occurrence of mental illness and substance dependence or abuse, as well as comparative data on the rates of treatment for individuals with these conditions, alone or in combination.

Co-Occurrence of Serious Mental Illness and Substance Dependence or Abuse

The prevalence of serious mental illness (SMI) among adults who have a substance use disorder is significantly higher than among adults who do not. Nineteen percent of adults who are dependent upon or who abuse alcohol had SMI in 2002, as did 29 percent of those with illicit drug dependence or abuse, and 30 percent of those with both drug and alcohol abuse or dependence. By contrast, only 7 percent of adults who have no substance use disorder experienced SMI (see Figure 5).



This data clearly shows that serious mental illness is much more likely to occur among the drug and/or alcohol dependent population. Likewise, among the population of adult Americans who experience serious mental illness, significant percentages of individuals are likely to have a drug and/or alcohol dependency or abuse. Of 17.5 million adults aged 18 or older who experienced SMI in 2002, 14 percent had an alcohol disorder only, 13 percent had no substance abuse disorder but had nevertheless used illicit drugs in the past year, 5 percent had an illicit drug disorder only, and another 5 percent had both illicit drug and alcohol disorders. In total, 46 percent of the population with SMI had drug or alcohol disorders or abuse, alone or in combination (see Figure 6.)

Substance Use Disorder Among Adults With Serious Mental Illness, 2002

Source: SAMHSA, Office of Applied Studies, National Survey on Drug Use and Health, 2002.

These data clearly show that there is a strong correlation between alcohol and or substance dependence and serious mental illness.

The analysis of the use of treatment services for either SMI or for substance dependence in the SAMHSA report revealed interesting trends in the treatment services accessed by affected individuals. Individuals with SMI only, and no substance abuse disorder, were most likely (48 percent) to receive mental health treatment. Among those individuals with SMI and substance dependence, 46 percent received only mental health treatment, while 14 percent received only specialty substance use treatment. Only 12 percent received treatment for both SMI and a substance abuse disorder. In addition, adults with SMI co-occurring with illicit drug dependence or abuse were more likely to receive mental health treatment (54 percent) than those adults who had SMI co-occurring with alcohol dependence or abuse (43 percent).

Adults who had co-occurring SMI and substance dependence or abuse were more likely to receive specialty substance use treatment than adults with substance disorders but no SMI (14 versus 5 percent).

In 1999, the Gallup Organization conducted a household telephone survey in Alaska and determined that 9.7 percent of the population aged 18 and over abused or was dependent on alcohol. Applying this percentage to the 2002 adult population in Alaska of 448,000 would result in an estimated 43,500 alcohol dependent adults in that year. Based on the co-occurrence rates presented in the SAMHSA (2002) study, this means an estimated 8,300 Alaskans had co-occurring alcohol dependence or abuse and serious mental illness in 2002. However, the Gallup survey did not assess the percentage of Alaskans whose alcohol dependence was accompanied by illicit drug dependence or abuse. It is reasonable to assume that some of the 8,300 alcohol dependent Alaskans also had illicit drug dependence or abuse. The prevalence of SMI among adults with both alcohol dependence and illicit drug use is significantly higher (30 percent versus 19 percent for alcohol only), so it is likely that the number of Alaskan adults with co-occurring SMI and alcohol and/or illicit drug dependence or abuse is even higher.

Bring the Kids Home Initiative

Like adults, children and youth experience co-occurring mental and substance abuse disorders. According to the SAMHSA Report to Congress, 2002, researches have found a link between substance abuse disorders and behavioral and mental/emotional disorders in youth. The 2001 National Household Survey on Drug Abuse found that 26 percent of 12 to 17-year-olds who had used illicit drugs in the past year had also received treatment or counseling for behavioral or mental health issues. This compared to only 16 percent of youths who had not used illicit drugs (SAMHSA, 2002).

In Alaska, there are a limited number of residential mental health treatment facilities for children and youth. When children and youth need intensive mental health treatment they often must travel to facilities outside of the state. However, according to the Alaska Division of Behavioral Health and the Mental Health Trust Authority, out-of-state treatment may not be as beneficial as services delivered close to home. Possible disadvantages of out-of-state services may include less therapeutic benefit for children and their families, longer lengths of stay and higher risk of readmission, and transitional difficulties.

To address the high rates of out-of-state institutionalization, the State of Alaska launched the "Bring the Kids Home Initiative" to support the development of in-state infrastructure and treatment opportunities for youth and children. Since the program inception in late 2004, several steps have been taken to position the state to achieve these goals. Three workgroups have been established, including one that is working to identify means to support the establishment of services and service providers in Alaska and one that is identifying ways to support the development of a treatment professional workforce. A third work group, made up of three mental health clinicians, reviews the cases of children who are under consideration for out-of-state treatment, and tries to redirect cases within the state whenever clinically possible and appropriate.

Prior to the launch of the BTKH initiative, Alaska had seen a stark increase in the number of children in out-of-state residential psychiatric treatment centers (RPTCs). There was a 200 percent increase in the number of children covered by Medicaid who received treatment in an out-of-state RPTC from 2000 to 2004. This was accompanied by a 280 percent increase in the cost of those services, from $9.9 million in 2000 to $37.8 million in 2004.

Preliminary fiscal year 2005 data, however, shows that more children were able to receive treatment in Alaska facilities. The number of children receiving services in out-of-state treatment facilities through Medicaid decreased from the previous year, and the percentage of Alaskan children receiving treatment services in-state rose to 29 percent from 22 percent the previous year. In addition, 71 children who were in out-of-state facilities have been transferred to treatment facilities within Alaska since the program inception. Additionally, there was a drop in out-of-state spending on RPTC care.

Table 21
Medicaid Residential Treatment Care Expenditures,
State Fiscal Years 2001 to 2005

	SFY01	SFY02	SFY03	SFY04	SFY05 preliminary
In-State	8,243,000	9,230,000	10,093,000	11,532,000	12,659,000
Out-of-State	17,609,000	21,752,000	30,915,000	37,794,000	34,044,000
Total	**$25,852,000**	**$30,982,000**	**$41,008,000**	**$49,326,000**	**$46,703,000**

Source: Division of Behavioral Health, "Bring the Kids Home Indicators: Baseline Data State Fiscal Years 1998-2004," May 2005; and "Bring the Kids Home Indicators: SFY05 Supplemental Data—Preliminary," August 2005.
Note: Claims for state fiscal year 2005 are still being processed; final numbers will likely be higher.

While the state continues to process insurance claims for FY05 treatment services, HSS staff indicated that the trends reflected in the preliminary data are likely representative of overall change. While expenditures for the program were modest in FY05 ($100,000), HSS staff said awareness of the BTKH initiative in the treatment community likely drove some of the shift toward Alaska-based treatment. The BTKH initiative has a budget of $2.4 million for FY06.

Needy Alaskans who qualify for public assistance receive cash and food stamps and other social services from the state. A portion of the public assistance expenditures can be attributed to alcohol and other drug abuse. As noted earlier in the report, alcohol and other drug dependence can result in reduced income, trouble finding and holding a job, or even a disability, all of which may qualify the individual for public assistance. This chapter looks briefly at the economic costs of alcohol and other drug abuse-related public assistance.

Methodology

Different methods were used to estimate the costs of alcohol and drug abuse-related public assistance at the state and federal levels. At both levels, only administrative costs of programs were considered as public assistance payments are a redistribution of income and not an actual cost to society.

At the federal level, there are two sources of public assistance costs. The first is former Supplemental Security Income (SSI) and Old Age, Survivors, and Disability Insurance (OASDI) recipients. National administrative cost figures were used to estimate the Alaska-specific portion of the federal programs, using the assumption that costs were proportional to the number of recipients. NIDA/NIAAA (1998) attribution rates were used to estimate the proportion of total costs that are attributable to drug and alcohol abuse. For SSI and OASDI recipients, 1.7 percent of the cases were related to alcohol and other drug abuse.

At the state level, public assistance programs include the Alaska Temporary Assistance Program (ATAP) and food stamp programs, and other programs such as energy assistance and child care assistance. Again, NIDA/NIAAA (1998) attribution rates were used to estimate the cost attributable to substance abuse.

For ATAP and other state programs, 4.1 percent of the cases were related. Because Alaska's dependency rates are more than twice national rates, attribution rates published in the NIDA/NIAAA (1998) study likely provide a conservative estimate of Alaska's true administration costs from public assistance. However, the lack of Alaska attribution rates for alcohol and other drug abuse-related public assistance necessitates the use of these national attribution rates published in the NIDA/NIAAA study.

Results

Administration costs from alcohol and other drug abuse-related public assistance was approximately $4.1 million in Alaska during 2003. The largest contributor was administration of payments for Alaska Temporary Assistance Program, food stamps and other state-administered assistance programs at $4.0 million, while administrative costs from former OASDI and SSI recipients totaled $170,000.

The cost of underage drinking in Alaska is a component of many of the alcohol and drug abuse-related costs already identified in this study. However, it is informative to examine specifically underage drinking costs, to place such costs in perspective relative to overall costs associated with alcohol and other drug abuse in Alaska.

This study did not include research focused on underage drinking costs. However, data from other sources is available. The Pacific Institute for Research and Evaluation (PIRE) has produced national and state-level estimates of the cost of underage drinking. PIRE data indicates that medical care costs and loss of work costs in Alaska totaled $128 million in 2001. PIRE also placed "pain and suffering" costs at $353 million. The following table provides more detail on specific sources of underage drinking costs in Alaska.

Table 22
Costs of Underage Drinking in Alaska, by Problem, 2001

	Total Costs (in millions)
Youth Violence	$329.7
Youth Traffic Crashes	77.7
High-Risk Sex, Ages 14-20	13.9
Youth Property Crime	7.6
Youth Injury	26.9
Poisonings and Psychoses	2.6
FAS Among Mothers Age 15-20	3.3
Youth Alcohol Treatment	18.9
TOTAL	$480.7

Source: Pacific Institute for Research and Evaluation (PIRE), March 2004. Posted at http://www.udetc.org/UnderageDrinkingCosts.asp

As indicated above, many of these costs have been captured in other sections of this report. The largest component of underage drinking costs, as measured by PIRE, are pain and suffering-related costs, which are not addressed at all (for adults or youth) in this report. While it is likely that some of the direct medical and work loss costs identified in the PIRE study are not reflected in this report, the potential for double-counting is high, therefore none of the costs reported in Table 22 are added to the grand total costs related to alcohol and drug abuse in Alaska, as measured in this study. Research beyond the scope of this study would be required to identify specific components of costs reported in the PIRE report that are not captured in the McDowell Group report.

Although this report concentrates on quantifying the costs of alcohol and other drug abuse, there are some measurable economic benefits associated with the sale of alcohol. The most obvious benefit is employment. Jobs related to alcohol sales include manufacturing, wholesale trade and retail trade. Alcohol excise tax revenues go into Alaska's unrestricted general-fund budget. Other benefits, including indirect employment impacts from alcohol manufacturing and sales, are more difficult to measure and beyond the scope of this study. Earnings from these jobs help employ other residents who are not directly linked to the alcohol industry.

This chapter looks briefly at the direct employment benefits from the alcohol industry and discusses the excise tax collected from the sale of alcohol beverages.

Methodology

To measure the employment and earnings related to manufacturing and sales of alcohol, the research team relied on data published in the 2003 Employment and Earnings Report by Alaska Department of Labor and Workforce Development, Research and Analysis Division. Employment and earnings data was collected for the following industries:

- Breweries & Wineries (NAICS 31212, 31213)
- Wholesale trade for beer, wine, and distilled beverages (NAICS 4248)
- Beer, Wine, Liquor stores (NAICS 4453)
- Drinking places, Alcoholic (NAICS 7224)

Total tax revenue collected in FY2004 from the sale of alcohol beverages was published in the Tax Division Annual Report of Division Operations, by the Alaska Department of Revenue. Per gallon tax rates on alcoholic beverages were increased, on October 1, 2002, from $0.35 to $1.07 for beer, $0.85 to $2.50 for wine and $5.60 to $12.80 for liquor. As of that same date, 50 percent of the revenue is deposited in the Alcohol and Other Drug Abuse Treatment and Prevention Fund.

Results

Table 22 presents employment and earnings for alcohol-related commerce and manufacturing industries in Alaska during 2003. Total employment related to the sale of alcoholic beverages in Alaska was approximately 3,000 jobs with earnings of $62 million. Drinking establishments accounted for the most employment at approximately 1,800 jobs with $26 million in payroll.

Table 23
Employment and Earnings for Alcohol-Related Industries in Alaska, 2003

Industry	Employment	Earnings (millions)
Breweries and Wineries	90	$3.0
Wholesale trade	413	17.1
Retail trade: Liquor stores	672	15.9
Retail trade: Drinking places	1,815	25.8
Total	**2,990**	**$61.8**

Source: 2003 Employment and Earnings Report, Alaska Department of Labor and Workforce Development, Research and Analysis Division.

Total tax revenue collected from the sale of alcohol beverages in Alaska was $32.7 million during FY 2004. This includes $14.1 million collected on sales of 1.1 million gallons of liquor, $4.3 million collected on sales of 1.7 million gallons of wine, and $14.3 million collected on sales of 14.7 million gallons of beer. Contributions of unrestricted revenue to the General Fund totaled $16.4 million, with an equal amount contributed to the fund for alcohol and drug abuse treatment programs.

Alaska Wine & Spirits Wholesalers Association

March 19, 2012

Dear Alaska Legislators:

The Alaska Wine and Spirits Wholesalers Association (AWSWA) and Alaska Cabaret, Hotel, Restaurant & Retailers Association (CHARR) support depositing 100 percent of the receipts from the existing Alcoholic Beverage Tax into the Alcohol and Other Drug Abuse Treatment and Prevention Fund, and request that these funds be allocated into the budget to provide additional treatment services rather than supplanting current services.

Currently, only half of the revenue from the existing alcohol tax is used for substance abuse treatment and prevention. Alaska consistently ranks among the top five states for alcohol and drug dependence. Alaskans who seek treatment must be able to find and enter into treatment programs. There are far too few options available, and when someone needs help they often face long wait times. Substance abuse treatment services continue to be underfunded statewide, leaving individuals to continue the costly and tragic cycle of addiction.

According to the Federation of Tax Administrators, Alaska's alcohol tax is 3.5 to 4 times the national average which means Alaska has one of the highest excise tax rates on alcohol in the nation. These taxes produce over 38 million dollars annually, but sadly the majority of this tax revenue is not used to combat the problems related to the abuse and misuse of alcohol.

Alaska's hospitality industry pays the state government its fair share in taxes, and we support the use of this revenue to provide cost-effective, readily available treatment. Alaska CHARR and AWSWA respectfully requests that you support SB221, to ensure 100 percent of the existing alcohol tax revenue goes towards substance abuse treatment.

Sincerely,

Don Grasse, President, K&L Distributors

Joel Kadarauch, VP, Odom Corporation

Dale G. Fox, CAE, President & CEO, Alaska CHARR

Attention to: Senator Johnny Ellis

Dear Members of the Senate Finance Committee,

Thank you for introducing Senate Bill 221 to allocate 100 percent of existing alcohol tax revenue to the Alcohol and Other Drug Abuse Treatment and Prevention Fund (ADTP). In 2002, State Representative Lisa Murkowski championed HB225 to raise the alcoholic beverage tax and establish the ADTP to help provide much-needed revenue for expanded substance abuse treatment and diversion programs. Since 2003, only half of the funds collected from the existing alcohol tax have been appropriated to the ADTP. While the political reasoning for the fund was to expand treatment, decreases in general fund spending have left overall funding for substance abuse treatment and prevention reduced or stagnant.

Despite the increasing need for more substance abuse treatment and prevention, these programs are historically underfunded. Providers throughout the state report treatment beds are full to capacity, long waiting lists exist for services they offer, and there are numerous requests for services they can't provide. According to the Federation of Tax Administrators, Alaska's alcohol tax is 3.5 to 4 times the national average which means Alaska has one of the highest excise tax rates on alcohol in the nation. These taxes produce over 38 million dollars annually, but sadly the majority of this tax revenue is not used to combat the problems related to the abuse and misuse of alcohol.

Alaska consistently ranks among the top 5 states for alcohol and drug dependence. Not only does substance abuse have an extreme economic impact on the state, estimated at $738 million annually in health care costs, traffic crashes, criminal justice and public assistance, substance abuse is a reportedly a factor in 85% of sexual assault and domestic violence cases, and a contributing factor in 70% of child abuse and neglect cases. We cannot continue to ignore the substance abuse epidemic in Alaska.

The Governor should be commended for his Choose Respect initiative. Senate Bill 221 is the logical next step. We can't stop the scourge of sexual assault and domestic violence without addressing the underlying issue of alcoholism and drug abuse. With a small statutory change, all monies collected from alcohol taxes can be put toward proven substance abuse treatment and prevention programs. The time to act is now.

Thank you for your leadership on this crucial issue. Sincerely,

David S. Alexander, President

Subject: Senate Bill 221

March 15, 2012

Dear Members of the Senate Finance Committee:

At our March 15, 2012 meeting, the Board of Directors of Partners for Progress discussed Senate Bill 221. We voted unanimously to support this bill.

Since 1999 Partners for Progress has been closely involved in the work of Alaska's Legislature, Administration, and the Court System to identify "Smart Justice" measures that better protect the public while reducing the human and monetary costs of incarceration. This year's Legislative Crime Summit highlighted a number of tested and proven measures that achieve this goal. Most involve substance abuse prevention and treatment.

Prevention and treatment of substance abuse is at the core of "Smart Justice". Providing additional funding to address the scourge of alcohol and drug abuse that underlies much of the crime in Alaska is an essential step towards curbing Alaska's ever-growing costs of incarceration while improving public protection. We urge your support for Senate Bill 221.

Respectfully,

Janet McCabe

Re: Letter of Support for SB 221

Dear Senator Ellis,

The Alaska Mental Health Board and Advisory Board on Alcoholism and Drug Abuse support SB 221, a bill to ensure that the revenue from our state's alcohol taxes is used to prevent and treat substance abuse. We appreciate your work, and that of the Senate Finance Committee, to address this issue.

Our Boards have long held the position that funds available from the alcohol tax were intended to supplement and not supplant existing general fund (GF) monies for behavioral health. The legislative intent of the alcohol tax was clearly to supplement existing funding for behavioral health services. This is clear from then state Representative Lisa Murkowski's sponsor statement: the alcohol tax fund "would help provide revenue needed for the expanded treatment, therapeutic courts, diversion programs and other initiatives" then being considered by the Legislature.

Alaska consistently ranks among the states with the highest rates of binge drinking.[1] Indigenous Americans report higher rates of alcohol dependence than other ethnicities in America.[2] Alaska's alcohol taxes produce over $38 million annually. Only half of the revenue from the existing alcohol tax is expressly allocated for substance abuse treatment and prevention.

Our concern is that funds from the alcohol tax fund have been used instead of GF dollars rather than in addition to GF dollars. The result is that substance abuse treatment services continue to be underfunded statewide, leaving individuals to continue the costly and tragic cycle of addiction.

[1] "Prevalence of Binge Drinking Among Adults, 2010," Centers for Disease Prevention and Control *citing* Behavior Risk Factor Surveillance System data (geographic representation of state rates available online at http://www.cdc.gov/alcohol/data-stats.htm).

[2] *The NSDUH Report*, "Alcohol Dependence or Abuse: 2002, 2003, 2004" (Issue 16, 2006) (online at http://www.samhsa.gov/data/2k6/alcDepend/alcDepend.htm).

In 2005, the Advisory Board on Alcoholism and Drug Abuse published findings on the economic costs of alcoholism and other drug abuse in Alaska:

- $367 million due to productivity loss in the workplace;
- $154 million on criminal justice and protective services;
- $178 million on health care;
- $35 million on traffic crashes; and
- $4 million for public assistance.[3]

Accessible and effective community-based alcohol and drug treatment is essential to reducing society's financial burden from problems associated with alcohol and drug abuse. Even beyond helping to alleviate the enormous physical and psychological costs, access to treatment and recovery supports diminishes the huge financial consequences imposed on employers and taxpayers.

Our board members expressly support the effort to ensure that 100 percent of Alaska's alcohol tax revenue goes to substance abuse treatment and prevention programs. We appreciate your work to improve access to these important services – for the health of all our neighbors and our communities.

Sincerely,

J. Kate Burkhart
Executive Director

ALASKA FEDERATION
OF NATIVES

March 16th, 2012

The Honorable Senate Finance Committee
State Capitol Building, Room 532
Juneau, Alaska 99801

Dear Senate Finance Committee Members,

On behalf of the Alaska Federation of Natives we would like to state our support for Senate Bill 221 to allocate 100 percent of the money collected by the existing alcohol tax to the Alcohol and Other Drug Abuse Treatment and Prevention Fund. It is clear that you recognize the negative effect of alcohol and drug addiction on the health and safety of Alaska Natives and you are actively seeking solutions that will reduce that impact.

We advocate for this bill on behalf of our membership wishes for a healthy future for all of Alaska. AFN represents 230 villages, through themselves or the 11 Regional Non-profits, and 12 Regional ANSCA corporations that are also members.

Senate Bill 221 is in alignment with AFN's commitment to ensuring healthier Alaska Natives. Many of the health challenges facing Alaska Natives are tied to behavioral health conditions; chief among these is substance abuse.

- 1 in 11 Alaska Native deaths is alcohol-induced
- Alcohol was the fourth leading cause of death from 1993 to 2002 (Alaska Bureau of Vital Statistics)
- Alcohol contributed to 85% of reported domestic violence cases and 80% of reported sexual assault cases between 2000-2003 (ISER, Status of Alaska Native Report, 2004)

Senate Bill 221 will help us fulfill our mission by allocating nearly 40 million dollars for substance abuse treatment and prevention services statewide. These programs continue to be underfunded leaving desperate individuals to continue the costly and tragic cycle of addiction.

Should you have any questions about our position, please feel free to contact me at (907) 274-3611.

RE: **SB 221 – An Act relating to the disposition of proceeds from the alcoholic beverage tax and to the alcohol and other drug abuse treatment and prevention fund.**

Dear Senators Hoffman, Stedman and members of the Finance Committee,

Catholic Social Services (CSS) is writing in strong support of Senate Bill 221. As one of the largest social service agencies in Alaska, we see first-hand the devastating impact of alcohol and drug abuse. CSS operates eight multi-faceted programs including two emergency homeless shelters, a home for teens, a food pantry, supportive housing, an adoption and pregnancy support program, services for individuals with disabilities, and a refugee resettlement & immigration program. During fiscal year 2011, CSS served 20,317 clients in Alaska.

Alcoholism and drug abuse are inextricably linked to Alaska's epidemic levels of domestic violence and sexual assault, suicide, child neglect cases, and rising corrections costs. According to a 2005 McDowell report, costs incurred as a result of substance abuse neared $738 million annually. With a small statutory change, all monies collected from alcohol taxes can be put toward proven substance abuse treatment and prevention programs.

I strongly urge you to join in support of SB 221 to allocate 100 percent of existing alcohol tax revenue to substance abuse treatment and prevention.

Sincerely,

Susan H. Bomalaski, Ph.D., LPC

ANCHORAGE, ALASKA
AR NO. 2011–347

A RESOLUTION OF THE ANCHORAGE MUNICIPAL ASSEMBLY IN SUPPORT OF ALLOCATING 100 PERCENT OF THE EXISTING ALCOHOLIC BEVERAGE TAX RECEIPTS TO FUND ADDITIONAL TREATMENT SERVICES IN RECOGNITION OF THE OVERWHELMING UNMET DEMAND FOR SUBSTANCE ABUSE TREATMENT IN ALASKA.

WHEREAS alcohol and drug abuse are an epidemic in Alaska; and

WHEREAS Alaska consistently ranks among the top five states for alcohol and drug dependence; and

WHEREAS Alaska ranks eighth nationally for the percentage of people ages 18 years and older who need but do not receive treatment for illicit drug use; and

WHEREAS alcohol is a factor in an estimated 85 percent of reported cases of domestic violence and 80 percent of sexual assaults; and

WHEREAS the 2005 Advisory Board on Alcohol and Drug Abuse through the Alaska Department of Health and Social Services found that the economic costs of alcoholism and other drugs in Alaska annually include $367 million due to productivity loss in the workplace, $154 million on criminal justice and productive services, $178 million on health care, $35 million on traffic crashes, and $4 million for public assistance; and

WHEREAS Treatment has been shown to have a benefit-cost ratio of 7:1, and the largest savings are due to reduced cost of crime and increased employer earnings; and

WHEREAS according to the latest federal Substance Abuse and Mental Health Services Administration (SAMHSA) reports, between 43,000 and 57,000 Alaskans age 12 or over abused or were dependent on alcohol or an illicit drug; and

WHEREAS under AS 43.60.050 (a), 50% of the taxes collected under the Alcoholic Beverage Tax (43.60.010) are deposited in the Alcohol and Other Drug Abuse Treatment and Prevention Fund; and

WHEREAS Alaska is projected to collect nearly $40 million in total existing alcohol tax receipts for Fiscal Year 2012; and

WHEREAS, there is an overwhelming unmet demand for substance abuse treatment in Alaska; and

WHEREAS tax monies collected from the sale of alcohol should be used to prevent and treat substance abuse; and

WHEREAS the Cabaret, Hotel, Restaurant & Retailers Association, Alaska Wine and Spirit Wholesalers, social service organizations, treatment providers, and faith-based organizations support increasing funds for substance abuse treatment in Alaska;

NOW THEREFORE BE IT RESOLVED that the Anchorage Assembly, in recognition of the overwhelming unmet demand for substance abuse treatment in Alaska, supports allocating 100 percent of the receipts from the existing Alcoholic Beverage Tax to fund additional substance abuse treatment services in Alaska, rather than supplanting current funding for the limited services presently available.

PASSED AND APPROVED by the Anchorage Assembly this 13th day of December, 2011.

Debbie Ossiander
Chair

ATTEST:

Barbara S. Jones
Municipal Clerk

ANCHORAGE
CHARR
CABARET, HOTEL, RESTAURANT & RETAILERS ASSOCIATION

December 6, 2011

Dear Assembly Members;

The Anchorage Cabaret, Hotel, Restaurant & Retailers Association (CHARR) supports depositing 100 percent of the receipts from the existing Alcoholic Beverage Tax into the Alcohol and Other Drug Abuse Treatment and Prevention Fund, and requests that these funds be allocated into the budget to provide additional treatment services rather than supplanting current services.

Currently, only half of the revenue from the existing alcohol tax is used for substance abuse treatment and prevention. Alaska consistently ranks among the top five states for alcohol and drug dependence. Alaskans who seek treatment must be able to find and enter into treatment programs. There are far too few options available, and when someone needs help they often face long wait times. Substance abuse treatment services continue to be underfunded statewide, leaving individuals to continue the costly and tragic cycle of addiction.

According to the Federation of Tax Administrators, Alaska's alcohol tax is 3.5 to 4 times the national average which means Alaska has one of the highest excise tax rates on alcohol in the nation. These taxes produce over 38 million dollars annually, but sadly the majority of this tax revenue is not used to combat the problems related to the abuse and misuse of alcohol.

Alaska's hospitality industry pays the state government its fair share in taxes, and we support the use of this revenue to provide cost-effective, evidence based and readily available treatment. Anchorage CHARR respectfully requests that you support this effort, and take action to ensure 100 percent of the existing alcohol tax revenue goes towards substance abuse treatment.

Sincerely,

S. Villamides

Dear Members of the Senate Finance Committee,

Thank you for introducing Senate Bill 221 to allocate 100 percent of existing alcohol tax revenue to the Alcohol and Other Drug Abuse Treatment and Prevention Fund (ADTP). In 2002, State Representative Lisa Murkowski championed HB225 to raise the alcoholic beverage tax and establish the ADTP to help provide much-needed revenue for expanded substance abuse treatment and diversion programs. Since 2003, only half of the funds collected from the existing alcohol tax have been appropriated to the ADTP. While the political reasoning for the fund was to expand treatment, decreases in general fund spending have left overall funding for substance abuse treatment and prevention reduced or stagnant.

Despite the increasing need for more substance abuse treatment and prevention, these programs are historically underfunded. Providers throughout the state report treatment beds are full to capacity, long waiting lists exist for services they offer, and there are numerous requests for services they can't provide. According to the Federation of Tax Administrators, Alaska's alcohol tax is 3.5 to 4 times the national average which means Alaska has one of the highest excise tax rates on alcohol in the nation. These taxes produce over 38 million dollars annually, but sadly the majority of this tax revenue is not used to combat the problems related to the abuse and misuse of alcohol.

Alaska consistently ranks among the top 5 states for alcohol and drug dependence. Not only does substance abuse have an extreme economic impact on the state, estimated at $738 million annually in health care costs, traffic crashes, criminal justice and public assistance, substance abuse is a reportedly a factor in 85% of sexual assault and domestic violence cases, and a contributing factor in 70% of child abuse and neglect cases. We cannot continue to ignore the substance abuse epidemic in Alaska.

The Governor should be commended for his Choose Respect initiative. Senate Bill 221 is the logical next step. We can't stop the scourge of sexual assault and domestic violence without addressing the underlying issue of alcoholism and drug abuse. With a small statutory change, all monies collected from alcohol taxes can be put toward proven substance abuse treatment and prevention programs. The time to act is now.

Thank you for your leadership on this crucial issue.

RE: **SB 221** – Allocation of 100 percent of existing alcohol tax revenue to the Alcohol and Other Drug Abuse Treatment and Prevention Fund (ADTP)

Dear Senators Hoffman, Stedman and members of the Finance Committee,

The Alaska Mental Health Trust Authority (The Trust) is writing in strong support of **Senate Bill 221**. This bill would allocate 100 percent of existing alcohol tax revenue to the Alcohol and Other Drug Abuse Treatment and Prevention (ADTP) fund.

Sadly, Alaska consistently ranks among the top five states for alcohol and drug dependence. In addition, many of Alaska's social ills can be linked back to substance abuse. For example, substance abuse is a reportedly a factor in 85% of sexual assault and domestic violence cases, and in 70% of child abuse and neglect cases. Furthermore, the economic impact on Alaska from substance abuse is estimated at $738 million annually in health care costs, traffic crashes, criminal justice, public assistance and lost productivity.

In an effort to ensure Alaska had revenue for substance abuse prevention strategies and treatment programs, then State Representative Lisa Murkowski, championed HB225 to raise the alcoholic beverage tax and establish the ADTP fund to generate needed revenue for these programs and services. Unfortunately, since 2003, only 50 percent of the funds collected from the existing alcohol tax have been appropriated to the ADTP fund.

The Trust and its partners have been and continue to be steadfast advocates for ensuring Alaska's continuum of health care is sufficient to help those with addictions find a path to recovery. Unfortunately, Alaskans' access to evidence based substance abuse treatment is severely limited. If these additional ADTP funds were used to supplement rather than supplant the General Funds currently used for these services, they would go a long way to helping individual Alaskans and improving the health and wellness of our state.

The Trust strongly supports SB221 and thanks the Senate Finance Committee for their leadership in helping Alaskans suffering from addiction find their path to recovery.

Sincerely,

Jeff Jessee, CEO

Senator Johnny Ellis
Alaska State Capitol, Room 103
Juneau, AK 99801

RE: Mat-Su Health Foundation support for SB 221

Dear Senator Ellis:

Mat-Su Health Foundation (MSHF) is the official business name of Valley Hospital Association, Inc., which shares ownership in Mat-Su Regional Medical Center. MSHF invests its assets into charitable works to improve the health and wellness of Alaskans living in Mat-Su. MSHF has identified substance abuse as a focus area for our philanthropic work and is a member of the Mat-Su Substance Abuse Prevention Coalition and a funder of Recover AK. Both of these coalitions are concentrating on reducing and preventing alcohol abuse.

According to the Center for Disease Control's Behavior Risk Factor Surveillance System data for AK over the last decade, adult binge drinking rates have ranged from 16 to 19% and proportion of heavy drinkers from four to seven percent. These stats contribute to one of the highest state rates of alcohol dependence in the nation. These rates impact Alaska's suicide, domestic violence, child abuse, sexual assault, motor vehicle crash, and crime rates as well as contribute to lost productivity for employers. According to the 2005 report from the Advisory Board on Alcoholism and Drug Abuse, the economic impact on Alaska from substance abuse is estimated at $738 million annually in health care costs, traffic crashes, criminal justice, public assistance and lost productivity.

Representative Lisa Murkowski's sponsor statement for the state alcohol tax explained that the fund "would help provide revenue needed for the expanded treatment, therapeutic courts, diversion programs and other initiatives." Whereas the legislative intent of the tax is clear, only 50% of the collected funds have been applied to treatment, prevention and other efforts related to alcohol abuse.

Taxing alcohol is an environmental strategy to reduce consumption. Applying 100% of these tax revenues for additional environmental strategies to reduce the misuse and abuse of alcohol will help more Alaskan families to enjoy greater quality of life; more Alaskan children to thrive in their homes and schools; and Alaska businesses to enjoy more productivity and income.

The MSHF Board of Directors supports SB 221, which would allocate 100 percent of existing alcohol tax revenue to the Alcohol and Other Drug Abuse Treatment and Prevention (ADTP) fund. We commend your efforts to advance this cause and your help in creating a healthier Alaska.

Sincerely,

Elizabeth Ripley

ALASKA ADDICTION PROFESSIONALS ASSN

March 28, 2012

Dear Members of the Senate Finance Committee,

Thank you for introducing Senate Bill 221 to allocate 100 percent of existing alcohol tax revenue to the Alcohol and Other Drug Abuse Treatment and Prevention Fund (ADTP). In 2002, State Representative Lisa Murkowski championed HB225 to raise the alcoholic beverage tax and establish the ADTP to help provide much-needed revenue for expanded substance abuse treatment and diversion programs. Our association, then known as the Substance Abuse Directors Association (SADA), vigorously supported that legislation and its intent. Since 2003, only half of the funds collected from the existing alcohol tax have been appropriated to the ADTP. While the political reasoning for the fund was to expand treatment, decreases in general fund spending have left overall funding for substance abuse treatment and prevention reduced or stagnant. Our providers have experienced higher costs to provide services but have not seen the significant gain in funding to keep pace with the price of doing business. The overall effect has been a loss of treatment capacity and reduction in the number of services available for those who suffer the ravages of addiction.

Despite the increasing need for more substance abuse treatment and prevention, these programs are historically underfunded. Providers throughout the state report that treatment beds are full to capacity, long waiting lists exist for services they offer, and there are numerous requests for services they cannot provide. According to the Federation of Tax Administrators, Alaska's alcohol tax is 3.5 to 4 times the national average, which means Alaska has one of the highest excise tax rates on alcohol in the nation. These taxes produce over 38 million dollars annually, but sadly, the majority of this tax revenue is not used to combat the problems related to the abuse and misuse of alcohol.

Alaska consistently ranks among the top five states for alcohol and drug dependence. Not only does substance abuse have an extreme economic impact on the state, estimated at $738 million annually in health care costs, traffic crashes, criminal justice and public assistance, substance abuse is a reportedly a factor in 85% of sexual assault and domestic violence cases, and a contributing factor in 70% of child abuse and neglect cases. We cannot continue to ignore the

PO Box 92580, Anchorage, AK 99509

substance abuse epidemic in Alaska. The economic toll in communities from untreated addiction to alcohol and other drugs can be seen in high health care costs from individuals seeking help in emergency rooms. These costs are also seen in legal and corrections costs to serve offenders with drug and alcohol related crimes, families torn apart and children sent to OCS custody… For every $1 spent in treatment services, $7 is saved (UCLA, 2007) in related cost to our state and communities.

The Governor should be commended for his Choose Respect initiative. Senate Bill 221 is the logical next step. We cannot stop the scourge of sexual assault and domestic violence without addressing the underlying issue of alcoholism and drug abuse. With a small statutory change, all monies collected from alcohol taxes can be put toward proven substance abuse treatment and prevention programs. The time to act is now.

Thank you for your leadership on this crucial issue.

Division: General Services — Date/Time: 4/2/12 3:45 PM
Approved by: John Cramer, Deputy Commissioner, Department of Administration — Date: 4/2/2012

(Revised 1/17/2012 OMB)

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SB226

Analysis

The bill directs the Alaska Housing Finance Corporation (AHFC) to finance construction and purchase of a new office building in Nome to house state agency offices, financed by AHFC, then placed in service as an asset of the Alaska Public Building Fund (APBF) managed by the Department of Administration (DOA). The APBF would collect rents for the building to cover lease costs, maintenance and operations costs, and all other costs embedded in the APBF rates. Fund, DOA/DGS will charge tenant agencies an estimated rate beginning at $2.42 sq ft per month in FY2013, increasing to an estimated $2.81 sq ft per month beginning in FY2018.

FY2013 costs are $704.6. Calculation: $2.42 sq ft x 19,100 sq ft x 12 months = $554.6+$150.0 (a one-time item for the architect in year one) FY2014 through FY2018 represents the cost for tenant agencies reflecting an anticipated increases in PBF rates.

The bill anticipates construction of a building by a private developer, for a purchase price of $38 million AHFC would finance the project with 21-year bonds; the state would require operating appropriations in order to pay the debt service to AHFC estimated to be $2,504.0 per year. If the funding required to service the debt is not appropriated separately , debt retirement costs would have to be embedded in the per square foot rate per month set for agencies occupying the building, thereby increasing the proposed rent per square foot rate accordingly. For the purposes of this fiscal note, facilities rents collected from tenant agencies are shown as interagency receipts, but will ultimately be recorded in the Alaska Public Building Fund once received.

This fiscal note is prepared to illustrate operating costs for the proposed building,
allowing for backfilling existing space leased from the private sector in Nome.

Assumptions:
1) The proposed building will be constructed from bond proceeds as a justice center that measures 19,100 usf. Debt retirement will be on a 21-year timeframe.
2) If the existing Nome SOB will be demolished--demo costs are not in DOA's fiscal note as demolition/disposal costs will be borne by DOT/PF.
3) The proposed building will be financed from AHFC bond proceeds on 21-year term. Estimated debt retirement cost is $2,504.0 annually beginning in FY2013.
Tenant agencies must budget separately for the facilities rent charges they will be billed for occupying space in the proposed building.
4) DOA would require one additional permanent, full-time contracting officer position in Anchorage for administration of the proposed building. Salary and benefits costs for the new position comprise personal services costs shown on the fiscal note.
5) DOA would also require the services of a licensed architect for the first year to assist in the monitoring of the design document and construction process. An estimate of $150.0 for year 1 is included in this fiscal note.

Proposed Occupants:

Agency	Projected Space Need in proposed building
Alaska Court System	12,000
Public Safety	3,000
Administration/Public Defender	1,500
Corrections	800
Law	1,800
Total	**19,100**

Why this fiscal note differs from previous version (if initial version, please note as such)

The CS for SB 226 directs Alaska Housing Finance Corporation (AHFC) to finance the purchase of an office building in Nome from the City of Nome. As part of its due diligence, AHFC will engage in a process to identify useable space requirements and tenant needs. As such, AHFC is presenting ranges for the cost of the project up to $38,000,000 as specified in the bill.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CS SB226
2012 LEGISLATIVE SESSION

Analysis

CS for SB 226 directs Alaska Housing Finance Corporation (AHFC) to finance with bond proceeds the purchase of an office building in Nome to provide space for state agency occupancy and use. It further directs the commissioner of the Department of Administration to enter into a lease with AHFC for the purchased building.

Section 2 specifies, the term of the bonds may not exceed 21 years. The bill also specifies an anticipated annual rental obligation of $2,504,000 with total lease payments for the full term of the lease-purchase agreement anticipated to be $52,548,000. The Act would take effect immediately under AS 01.10.070 (c).

AHFC analysis:
Consistent with language included in Sec. 2 of the bill, AHFC estimates total project cost at $38,000,000 which AHFC believes could support a new office building up to 54,000 sq. ft. In contrast, a smaller building at 30,000 sq. ft, is projected to cost $27,675,000.

Based on a reasonable set of assumptions, annual debt service on these projects would range from $2,964,000 to $2,221,000, respectively . Total bond payments over 21-years on these projects would range from $62,241,250 to $44,416,500.

Finally, using these scenarios, operational expenses for AHFC would range in total from $773,854 to $590,400 in FY 13 and FY 14. This fiscal note projects the larger 54,000 sq. ft. building will be constructed; should a small building be selected, actual costs will be less than those presented.

CS FOR SENATE BILL NO. 226(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

A BILL

FOR AN ACT ENTITLED

"An Act relating to the purchase by the Alaska Housing Finance Corporation of an office building in Nome from the City of Nome; approving the issuance of bonds for the purchase of the office building; providing notice of, and directing the commissioner of administration to enter into, a lease-purchase agreement with the Alaska Housing Finance Corporation for the office building; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

FINDINGS AND PURPOSE. (a) The Department of Administration has identified a need for office space in the City of Nome for state agency use. The purchase of an office building in Nome from the City of Nome to provide space for state agency occupancy and use would serve a public purpose.

(b) The purpose of this Act is to

(1) direct the Alaska Housing Finance Corporation to finance the purchase of an office building in Nome from the City of Nome to provide space for state agency occupancy and use; and

(2) provide notice of, and direct the commissioner of administration to enter into, a lease with the Alaska Housing Finance Corporation for the office building authorized in sec. 2 of this Act.

*** Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE AUTHORIZATION FOR PURCHASE AND BONDS. (a) The Alaska Housing Finance Corporation shall finance under AS 18.55.010 - 18.55.290 with bond proceeds the purchase of an office building in Nome from the City of Nome to be leased to the Department of Administration to provide space for state agency occupancy and use. The purchase price of the office building may not exceed $38,000,000, including the costs of purchasing the office building and issuing the bonds for the purchase.

(b) The Alaska Housing Finance Corporation may issue bonds under AS 18.55.100(a)(15) and (d) for the purchase of the office building described in (a) of this section. The term of the bonds may not exceed 21 years.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE NOTICE OF AND AUTHORIZATION FOR LEASE-PURCHASE AGREEMENT. Subject to annual appropriation, the commissioner of administration shall enter into a lease-purchase agreement for the office building described in sec. 2 of this Act. The anticipated total cost of the project is $38,000,000. The anticipated annual amount of the rental obligation is $2,504,000. The total lease payments for the full term of the lease-purchase agreement are anticipated to be $52,548,000. The term of the lease-purchase agreement may not exceed the maximum term of the bonds authorized under sec. 2 of this Act.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPROVAL OF FINANCING AND AGREEMENT. (a) Section 2 of this Act constitutes the approval required by AS 18.55.100(d) for the financing of the office building

described in sec. 2 of this Act.

(b) Section 3 of this Act constitutes the notice and approval required by AS 36.30.085 for the lease-purchase agreement described in sec. 3 of this Act.

*** Sec. 5.** This Act takes effect immediately under AS 01.10.070(c).

SB 226 - PURCHASE & LEASE OF NOME STATE OFFICE BUILDING
Sectional Analysis

SECTION 1 Findings & Purpose.

SECTION 2 Directs AHFC to finance the purchase of an office building in Nome, from Nome.

SECTION 3 Directs DOA to enter into a lease-purchase agreement for the building.

SECTION 4 Legislative approvals of financing & lease-purchase agreement.

SECTION 5 Effective date.

BLOCK 70 PARKING GARAGE DEVELOPMENT AGREEMENT

THIS AGREEMENT made effective this 31st day of August, 2006, is between the Municipality of Anchorage, a municipal corporation and its assigns ("MOA") and the Alaska Center for Convention & Trade, LLC, an Alaska limited liability company ("**ACCT**").

Recitals

A. MOA has undertaken the development of a new Anchorage civic and convention center through design build procurement RFP 24-P009, to be built on Block 80 in downtown Anchorage. At the time of procurement, the Alaska Housing Finance Corporation ("AHFC") owned Block 80 and used it for parking for Atwood Building tenants. One element of RFP 24-POO9 required proposers to recommend changes for the coordination and relocation of parking from Block 80 to other locations and to address the lack of adequate parking in downtown Anchorage. ACCT was the successful proposer for RFP 24-P009. It recommended and provided initial designs for the construction of a new parking garage in a location approximate to the Atwood Office Building and the new convention center.

B. In consummation of the procurement, the MOA, through its successor-in-interest CivicVentures, entered a Development Agreement, dated November 10, 2004 and an Amended and Restated Development Agreement, dated effective December 31, 2006 (collectively "Convention Center Development Agreements"), with ACCT. The Convention Center Development Agreements require the MOA and ACCT to work cooperatively to explore options for maximizing parking available for the civic and convention center, including the construction of a new parking facility on a site agreeable to the MOA and ACCT. The Amended and Restated Development Agreement further provides the MOA with the right to elect to construct a parking garage with or through ACCT, so long as such election is made prior to substantial completion of the convention center.

C. To provide for the siting of the convention center on Block 80, the MOA, through the Anchorage Community Development Authority, entered into the Property Exchange Agreement and the Agreement Conveying Parking Rights, both dated April 12, 2006, (collectively, the "Parking Agreements") with AHFC. The Parking Agreements established the terms of the MOA acquisition of Block 80 for use for the convention center and, among other covenants, required the MOA and

AHFC to work toward long-term solutions for substitute parking for the Atwood Building.

D. Under the terms of the Parking Agreements, the MOA transferred title to the south half of Block 70 to AHFC to provide for a location for substitute parking for the Atwood Building. The Parking Agreements further contemplated the possibility of funding for a parking garage on the south half of Block 70, which would better serve the needs of the State of Alaska as well as the needs of MOA in the development of downtown Anchorage and the new civic and convention center.

E. Following execution of the Parking Agreements, AHFC sought and received legislative authorization under Chapter 47 of the Session Laws of Alaska 2006 to finance the purchase of a parking garage from the MOA or other potential sellers or developers. AHFC is willing to purchase a parking garage from the MOA if the MOA, using its contractual rights under its procurement process and the Convention Center Development Agreements, would agree to construct a parking garage on Block 70.

F. The MOA is willing to cooperate with AHFC to develop and sell a parking garage to AHFC. To achieve this aim, the MOA, through this Agreement, which shall be binding upon the MOA only after approval of this Agreement by the Anchorage Assembly, exercises its rights under the Amended and Restated Development Agreement to elect to construct a parking garage through ACCT. The MOA desires to have the development of the parking garage occur contemporaneously with the development of the new civic and convention center and the adjacent improvements to various streets.

G. ACCT is willing to proceed with a development of a parking garage. Relying in part on its prior work done on developing a parking solution and to further facilitate the project by developing certain baseline information in order for AHFC and the MOA to reach agreement, ACCT has undertaken numerous predevelopment activities without promise of compensation, including, but not limited to, preparing a preliminary project narrative, a preliminary construction budget, 10 percent design drawings, and a preliminary construction schedule. ACCT has also addressed and identified concerns relating to impacts to traffic, financing requirements, public hearings, and sales price.

H. Based upon the MOA's desire to sell a parking garage to AHFC and based upon ACCT's initial work of identifying development costs and needs for the parking garage, ACCT and the MOA wish to enter into this Development Agreement to

set forth the contractual obligations of each party as the parking garage project progresses. Because AHFC is the ultimate purchaser of the parking garage and the garage must meet the needs of AHFC and the tenants of the Atwood Office Building, it is intended, unless otherwise stated herein or unless expressly reserved by the MOA in its separate written agreement with AHFC, that where approvals are required by the MOA of design, schedules, deliverables or other performances by ACCT, that responsibility for such approvals will be transferred and assigned to AHFC under the terms of the Agreement to License, Assign, Construct, and Purchase the Block 70 Parking Garage entered into contemporaneously with this Block 70 Parking Garage Development Agreement.

In recognition of the recitals, which are material to this Agreement, the parties hereby agree as follows:

1. Definitions.

1.1. Additional Defined Terms. Capitalized words used in this Agreement that are not defined in Section 1 shall have the same meaning as the capitalized words under the Design Build Contract attached as Exhibit E to this Agreement. Words of technical usage, even if not capitalized, including but not limited to "substantial completion," "hazardous materials," "design-builder," "stipulated sum," or "change orders" shall have a common meaning in both this Agreement and the Design-Build Contract. However, the reference to "Owner" in the Design-Build Contract shall mean ACCT until the date of Acknowledgement of Substantial Completion, after which it shall mean the MOA or its assigns. The MOA will be an additional and required signatory to the Acknowledgement of Substantial Completion.

1.2. "Agreement" means this Block 70 Parking Garage Development Agreement.

1.3. "Block 70 Parking Garage" means the garage to be developed and constructed under this Agreement.

1.4. "Design-Build Contract" means the agreement between ACCT and its design-builder for the Project, which shall be substantially in the form of AIA Form 141 "Standard Form of Agreements between Owner and Design/Builder" (2004 ed.) and Exhibits A and C thereto, the form of which is attached as Exhibit "E" to this Agreement.

1.5. **"Effective Date"** means August 31, 2006.

1.6. **"Notice To Proceed"** means the written notice from the MOA to ACCT directing it to proceed with the Phase II work and identifying the Design Build Documents and the Phase I deliverables that form the basis for the Phase II work, including any negotiated modifications to such deliverables.

1.7. **"Parties"** means ACCT and the MOA and its assigns.

1.8. **"Phase I"** means the period of time from the Effective Date of this Agreement until the Notice to Proceed to Phase II work, or notice of termination.

1.9. **"Phase II"** means the period of time from the issuance of the Notice to Proceed for Phase II work until the date of MOA's acceptance of final completion as set forth in article A.9.10 in Exhibit A to the Design Build Contract.

1.10. **"Pricing Documents"** means that level of design plans and specifications sufficient for the design-builder to provide a stipulated sum price for the completion of all design and construction necessary to complete the Project under the terms and conditions of the Design Build Contract.

1.11. **"Project"** means the design and construction of the Block 70 Parking Garage from the beginning of Pre-development through MOA's acceptance of final completion as set forth in Article A.9.10 in Exhibit A to the Design Build Contract.

1.12. **"Property"** means that half of Block 70 more particularly described as Tract 1, Block 70, Anchorage Original Townsite, according to Plat No. _____, situated in Anchorage Recording District, Third Judicial District, State of Alaska.

1.13. **"Purchase and Sale Agreement"** means that Agreement to License, Assign, Construct, and Purchase the Block 70 Parking Garage entered into between the MOA and AHFC contemporaneously with this Agreement.

2. **Development Phases.** Obligations to be performed prior to or under this Agreement shall be divided into the Predevelopment Phase, Phase I, and Phase II.

3. **Predevelopment Phase. 10% Plans and Phase Approval.**

3.1 **Scope of Work.** The scope of work for Predevelopment Phase shall include development and completion of Predevelopment Phase deliverables. Predevelopment Phase deliverables shall include a Project

narrative, a preliminary Project budget, 10% design level drawings, a preliminary Project schedule, and a final budget for Phase I deliverables all as further identified in this Section.

3.1.1 **Preliminary Project Narrative.** ACCT shall develop a preliminary Project narrative, to be incorporated as **Exhibit A** to this Agreement. The preliminary Project narrative will identify salient design objectives and functional goals of the Project and will provides an objective description of how the Project will appear and function at completion. The Project narrative shall guide the preparation of the Project design and preliminary Project budget. ACCT and the MOA will work collaboratively on the narrative before it is finalized as part of the Phase I deliverables.

3.1.2 **Preliminary Project Budget.** ACCT shall prepare a preliminary Project budget, to be incorporated as **Exhibit B** to this Agreement. The preliminary Project budget provides a preliminary analysis of the viability of the Project. Excluding the cost of Block 70, the preliminary Project budget, shall be comprehensive by category as to all Project expenses, including, but not limited to: preliminary consultant expenses of both ACCT and MOA; recoverable expenses incurred by ACCT or its consultants during the Predevelopment Phase; developer fees; contingency amounts and categories; financing costs; and the cost of design and construction. Notwithstanding the above, however, the Project budget shall not be construed to be a guaranteed maximum price, nor will it be representative of the final budget. All line items are subject to change in the final Project budget as the risks of the Project are better ascertained, including the developer fee and contingency amounts and categories.

3.1.3 **10% Design Level Drawings.** ACCT shall prepare 10% design level drawings for the Block 70 Parking Garage that reflect the features identified in the Project narrative, including site placement and general plan view of the parking structure. The 10% design level drawings shall be incorporated as **Exhibit C** to this Agreement. Exhibit C

contains the current preliminary plans as of the date this Agreement is signed by the Parties.

3.1.4 **Preliminary Project Schedule.** ACCT shall furnish a preliminary Project schedule to be incorporated as **Exhibit D** to this Agreement. The preliminary Project schedule shall identify milestones for the design and construction of the Project, including a construction start date, a substantial completion date, and anticipated dates for required approvals of Phase I and Phase II work in order for the Project to proceed on a timely basis.

3.1.5 **Final Budget for Phase I Deliverables.** Notwithstanding Section 3.1.2, ACCT shall prepare a final budget for Phase I deliverables, which shall be incorporated as a line item to Exhibit B to this Agreement. The budget shall identify fees and costs of ACCT and its consultants for Phase I deliverables that shall be paid according to the terms of Section 6 of this Agreement.

3.1.6 **MOA Required Design Items.** Certain design features are identified in the Purchase and Sale Agreement at section 4.2.1 that will remain part of the Project and not to be changed without written consent of the mayor of the MOA, even after assignment. The required design of the elevator stair tower and the design of the building skin are attached hereto as **Exhibit G** and **Exhibit H** respectively.

3.2 **Coordination.** The Parties shall consult and coordinate with AHFC for the development of all Predevelopment Phase deliverables. Neither ACCT nor MOA warrants or represents that concurrence will be reached on all issues. However, ACCT will endeavor to assist with due diligence to achieve concurrence on all material Project elements.

3.3 **Payment.** ACCT fees for Predevelopment Phase deliverables shall be determined under Section 6 of this Agreement.

3.4 **Execution of Agreement and Binding Effect.** Execution of this Agreement by the MOA shall constitute the MOA's acceptance of the Pre-Development Phase deliverables. However, the MOA shall not execute this

Agreement until AHFC has signed the Purchase and Sale Agreement. Written notice to proceed for the Phase I work based upon the deliverables set forth in section 3.1 shall be deemed given upon execution of the Purchase and Sale Agreement. This Agreement shall not be binding upon, or give rise to any obligations of the MOA until this Agreement and the Purchase and Sale Agreement have been approved by the Anchorage Assembly.

4. Phase I. The Development of the Stipulated Sum and the Pricing Documents.

4.1 Scope of Work. During Phase I of the Project, ACCT will complete the design and development of the Project to a level of design drawings and specifications sufficient for ACCT to propose to the MOA a lump sum to complete the design and construction of the Project. The scope of work for Phase I shall include provision by ACCT of the following deliverables: the final Project narrative, a final Project budget, the Pricing Documents, a Project schedule, the Design Build Contract, and copies of all other agreements between ACCT and its other consultants for the design and construction of the Project. The time for delivery of the Phase I deliverables will be established as part of the Pre-Development Phase Schedule attached as Exhibit D to this Agreement. Any delay in any party's failure to meet a deadline set by the preliminary Schedule shall extend the time for the other party's performance by an equal number of days for the performance of Phase I work and the deadline to issue the Notice to Proceed to Phase II. Notwithstanding an assignment by MOA of its rights under this Agreement to AHFC, ACCT shall also provide a copy of the deliverables to MOA at the same time it provides a copy to AHFC.

4.1.1 Final Project Narrative. ACCT shall develop and provide a final Project narrative. The final Project narrative will identify the structural features and design elements of the Block 70 Parking Garage whose inclusion does not exceed the final Project budget. The MOA covenants and represents that it will accurately advise ACCT of all elements it requires to be in the Project as part of the Phase I process. Should MOA issue the Notice to Proceed under Section 4.4 of this Agreement, the final Project narrative shall be incorporated as part of the Design-Build Documents as set forth in section 1.1 of the Design-Build Contract between ACCT and the design-builder. Should MOA issue the Notice to Proceed under Section 4.4 of this Agreement, the Final Project Narrative, as amended, if applicable, per the terms of Section 4.4 of this Agreement, shall be incorporated as Exhibit A-1 to this Agreement and shall be incorporated by reference into the Notice to Proceed. The final Project

Narrative will include the design elements set forth in the Purchase and Sale Agreement Section 4.2.1, including but not limited to those features shown graphically on Exhibits G and H unless modified by consent of the MOA, in accordance with section 3.2.5 of the Purchase and Sale Agreement.

4.1.2 Final Project Budget. ACCT shall develop and provide a Final Project Budget. The Final Project Budget will set forth all fixed cost components and allowance components, the Phase II developer fees and MOA contingency fees, the Stipulated Sum for the design build construction of the Project, AHFC costs of development and bonding, and all other fees and costs of MOA and its consultants required for completion of the Project. The allowance components are set forth as "soft costs" in the Budget, Exhibit B. The final Project budget shall be in compliance with Chapter 47 of the Session Laws of Alaska 2006. Should MOA issue the Notice to Proceed under Section 4.4 of this Agreement, the final Project budget, as amended, if applicable, per the terms of Section 4.4. of this Agreement, shall be incorporated as Exhibit B-1 to this Agreement and shall be incorporated by reference into the Notice to Proceed. The line items on the budget include items that are under the control and the responsibility of ACCT and its consultants and the design builder and items under the direct control and responsibility of the MOA or its assigns. At the time a Notice to Proceed is executed by the MOA and approved by ACCT, both ACCT and the MOA shall be limited to expenditures on the line items allocated to them under the final Project budget, unless a modification or equitable adjustment is otherwise allowed by this Agreement.

4.1.3 Pricing Documents. ACCT shall develop and provide the Pricing Documents for the Project that reflects the features identified in the final Project narrative and final Project budget. The design will comply with all required and applicable local, state, and national codes and regulations. The drawings will be to a level of design sufficient for ACCT's design-build contractor to give a firm Stipulated Sum to complete the design and provide all labor, and materials to complete construction of the Project. Should the MOA issue the Notice to Proceed under Section 4.4 of this Agreement, the Pricing Documents, as amended, if applicable, per the terms of Section 4.4. of this Agreement, shall be incorporated as Exhibit C-1 to this Agreement, shall be incorporated by reference into the Notice to Proceed, and shall be incorporated as part of the Design-Build Documents

as set forth in section 1.1 of the Design-Build Contract between ACCT and the design-builder.

4.1.3.1 Approval of Drawings. MOA's approval of the drawings and specifications shall be limited to providing a certification that the building design will meet the MOA's Project needs, including such requirements as established under the Purchase and Sale Agreement. The MOA's approval of drawings and specifications shall not constitute a waiver of MOA's expectation that the design complies with any applicable codes, statutes, or regulations applicable to the Project. Such compliance shall be the responsibility of ACCT and its design-builder.

4.1.4 Final Project Schedule. ACCT shall develop and provide a final Project schedule for design and construction of the Project. Should the MOA issue the Notice to Proceed under Section 4.4 of this Agreement, the final Project schedule, as amended, if applicable, per the terms of Section 4.4 of this Agreement, shall be incorporated as Exhibit D-1 to this Agreement, shall be incorporated by reference into the Notice to Proceed, and shall be incorporated as part of the Design-Build Documents as set forth in section 1.1 of the Design-Build Contract between ACCT and the design-builder. The final Project schedule will incorporate the same schedule ACCT uses for its Design-Build Contract with its design-builder.

4.1.5 Design Build Contract. ACCT shall develop and provide a final Design-Build Contract for the Project setting forth the obligations of the design-builder to undertake the work, the obligations of ACCT acting as the "Owner," until the date of Acceptance of Substantial Completion, and the rights and obligations of MOA as "Owner" following the date of Acknowledgment of Substantial Completion. At a minimum, the Design-Build Contract shall: identify the Stipulated Sum for the Project payable to the design-builder, identify Project criteria, set forth the final Project schedule, set forth the requirements necessary to complete the Project including design, permitting and governmental approval, identify that the MOA shall be an additional and required signatory to the Acknowledgement of Substantial Completion, and identify all available remedies to the MOA should it become necessary to remove ACCT and its contractors from the Project. The Design-Build Contract shall be in substantial compliance with **Exhibit E** to this Agreement and shall be subject to MOA approval.

4.2 MOA Cost Estimate. The MOA may retain a consultant of its own choosing to provide independent third-party construction cost estimating and to verify the reasonableness of ACCT's proposed budget. The MOA shall notify ACCT of the identification of its consultant within fifteen (15) calendar days of the Effective Date of this Agreement. ACCT and MOA's consultant shall engage in a cost reconciliation process following MOA's consultant's review of ACCT's proposed Project budget. Per Section 4.4 of this Agreement, the MOA may elect not to proceed to Phase II, in its sole discretion, if its consultant and ACCT are unable to resolve budget differences after ACCT's delivery of its final and best price.

4.3 Costs and Fees. The lump sum costs and fee for performing the Phase I scope of work (exclusive of the Pre-development costs) shall not exceed ONE MILLION SIX HUNDRED TWENTY SEVEN THOUSAND FIVE HUNDRED and NO 100's DOLLARS ($1,627,500), inclusive of all third party costs and development fees of ACCT as set forth in Exhibit B to this Agreement. Costs and fees shall be payable in accordance with Section 6.2 of this Agreement.

4.4 Notice To Proceed to Phase II. Upon delivery of the Phase I deliverables identified in Section 4.1 of this Agreement, the MOA shall have the right to review all such documentation and elect in its sole and exclusive discretion, based upon such review, whether to proceed to Phase II of the Project within the time frame set forth in Exhibit D-1 to this Agreement. The MOA may further negotiate the terms of the Pricing Documents, the Final Project Budget, and the final Schedule, and other Phase I deliverables. If the MOA elects not to proceed to Phase II, it shall provide ACCT with written reasons for such election. The provision of written reasons for MOA's election shall be solely for the purpose of facilitating further discussions between the Parties, and shall not be construed as a limitation upon MOA's right to elect not to proceed to Phase II for any reason in its sole and exclusive discretion. The Parties shall confer to attempt to resolve any differences. If the parties are unable to resolve their concerns within ten (10) calendar days from the date of the MOA's election not to proceed, either ACCT or the MOA may terminate this Agreement with written notice to the other. If the Parties agree on a revised set of Phase I deliverables, then the revised deliverables shall be incorporated into this Agreement and the Design-Build Contract and shall be incorporated by reference into the written Notice to Proceed. The issuance of the Notice to Proceed shall be contingent upon satisfaction of the terms of the Purchase and Sale Agreement and Section 5.2 of this Agreement and the Notice to Proceed shall warrant and represent that such conditions have been satisfied by the MOA or its assigns.

5. Phase II Construction and Management.

5.1 Scope of Work. The scope of work for Phase II shall be defined by the Notice to Proceed and shall include: ACCT's entry into the Design-Build Contract with its design-builder, the subsequent design, construction, and final completion of the Project, meeting the conditions set forth by the MOA for MOA's acceptance of final completion of the Project, and receipt of all other necessary land use and occupancy permits and approvals. Satisfactory delivery of the Phase II scope of work shall be set by and determined under the terms as set forth in Article 9 of Exhibit A to the Design Build Contract as attached as Exhibit E to this Agreement.

5.2 Conditions Precedent to Phase II. The Parties shall not proceed to Phase II unless all of the following conditions precedents are satisfied.

5.2.1 The MOA has approved the Phase I deliverables and provided the written Notice to Proceed as described in Section 4.4 of this Agreement.

5.2.2 The MOA and AHFC have executed the Purchase and Sale Agreement.

5.2.3 ACCT and its design builder are able to enter into a Design-Build contract in form and upon terms acceptable to the MOA and ACCT.

5.2.4 The Municipality of Anchorage Assembly has approved this Agreement, and the Purchase and Sale Agreement.

5.2.5 The MOA has secured sufficient funding and financing for the Project.

5.3. Form of ACCT's Design-Build Contract. So long as the conditions precedents are satisfied, ACCT shall enter into the Design-Build Contract with its design-builder. The form of the Design-Build Contract shall be in substantial compliance with **Exhibit E** to this Agreement. For purposes of such contract, ACCT shall be considered the Owner of the Project. Notwithstanding the definition of "Owner", ACCT will be responsible to the MOA for the delivery of the Project on the schedule and terms consistent with the Notice to Proceed.

5.4. **Written Notice to Proceed.** Upon the satisfaction of all conditions precedent in Section 5.2, with the exception of subsection 5.2.1, the MOA shall give ACCT its written Notice to Proceed with the Project, which will satisfy all conditions precedent to this Agreement and shall incorporate by reference Exhibits A-1, B-1, C-1, and D-1 to this Agreement. ACCT shall deliver to the MOA within ten (10) days of the written Notice to Proceed, an executed copy of the Design Build Contract, the insurance certificates required for the Project and the payment and performance bonds.

5.5 **Other Terms.** The following terms and covenants apply to the Phase II work.

5.5.1 **Payment and Performance Bonds.** Both ACCT and the MOA or its assign will be named as co-obligees under the payment and performance bonds to be provided by the design-builder under the Design-Build Contract.

5.5.2 **MOA Third Party Beneficiary.** The MOA shall be a third-party beneficiary of any contracts between ACCT and other entities who perform work on the Project and any contracts between ACCT's design builder and other entities who perform work on the Project. Notwithstanding the above, these rights shall not be interpreted nor relied upon to permit any direct claims against the MOA by the Design-Builder and its subcontractors and vendors or any of ACCT's other contractors or consultants. Such parties shall seek their relief solely as provided in the Design Build Contract.

5.5.3 **Standard of Work/Contractors.** All work performed by ACCT and the design builder shall be performed in accordance with the professional standards applicable to the Project consistent with other projects in Anchorage Alaska of similar complexity, quality and scope. ACCT may use or replace, or consent to the use or replacement, of the design-builders, contractors or personnel or re-allocate responsibilities as it deems necessary or appropriate in order to carry out its responsibilities hereunder with any qualified design-builders, contractors or personnel as it deems appropriate in its reasonable judgment. If ACCT seeks to name any design-builder to take over the Project in place of Davis Constructors and Engineers, Inc., the MOA must consent to the named design-builder; however,

the MOA's consent to such named design-builder shall not be unreasonably withheld or delayed. This requirement shall not apply to any surety performing under the payment and performance bonds who shall remain free to select its own contractors without the MOA's consent, but who shall select its own contractors in compliance with its obligations under its bonds and the governing law of surety.

5.5.4 **Site Control.** The ~~MOA~~ Developer shall be solely responsible for providing timely site control and access to the Project site for the construction of the project in accordance with the final schedule that is Exhibit D-1 to this Agreement. The MOA reserves for itself, its representatives, and its or any other assigns, the right to enter upon the Property so long as such entry is coordinated with and through ACCT, at any time and for any purpose, so long as MOA shall notify ACCT and does not interfere with ACCT's or the design–builder's use of the Property or construction of the Block 70 Parking Garage. The MOA and its assigns shall comply with all necessary job-site safety rules imposed by ACCT or its contractor while present on the Property during construction.

5.5.5 **Contingency; Disposition of Contingency upon Substantial Completion.** Exhibit B-1 will include a "Project contingency" in the amount of ACCT's development fee and an MOA contingency. The Project contingency shall be available to cover cost-overruns allocated to ACCT under this Agreement and the Design-Build Contract. The MOA contingency shall be available to cover cost overruns chargeable to the MOA under this Agreement and chargeable to the MOA, either directly or through ACCT, under the Design-Build Contract.

5.5.5.1 Disposition of Project Contingency. Any sums not expended by ACCT from the Project contingency shall be paid as the Developer's Fee. If the Project contingency is to be paid to ACCT, then 80% of the remaining Project contingency, or a greater amount if mutually agreed upon by the Parties, shall be paid to ACCT at MOA's Acknowledgement of Substantial Completion under the Design-Build Contract; and the remaining 20% of the contingency (or such lesser remaining balance if earlier

withheld as set forth above) shall be paid upon final completion of the Project as set forth in Article 9.10 of the Design Build Contract.

5.5.5.2 Disposition of MOA Contingency. Any sums not expended by the MOA from the MOA contingency upon MOA's Acknowledgement of Substantial Completion of the Project may be allocated or retained as MOA determines within its sole discretion, but in compliance with the Purchase and Sale Agreement.

5.5.6 Changes. MOA shall have the right to initiate Change Order requests for the Project. Change Order requests will be processed in accordance with the procedures set forth in Article A-7 to Exhibit A to the Design-Build Contract. The MOA's Change Order request shall be submitted through ACCT and the MOA will sign the Change Order and authorize the change in final budget and schedule. Payment for cost overruns owing to MOA initiated Change Orders shall be in compliance section 6.3 of this Agreement. After assignment by MOA to AHFC, a Change Order request relating to items described in 4.2.1 of the Purchase and Sale Agreement shall not be effective unless it has been signed by both AHFC and MOA.

5.5.7 Cost Overruns. The design builder, and then ACCT, not the MOA, is at risk for Change Orders initiated by ACCT and/or for cost overruns for construction and design for work performed within the scope of the Design Build Contract, except as set forth in this Section 5.5.7.

5.5.7.1 The MOA shall be responsible for cost overruns that result directly and solely from the MOA's delayed execution of a Notice to Proceed outside the timeframe set forth for issuing the Notice to Proceed in Exhibit D-1 to this Agreement. Any cost overruns resulting from such delay, however, must be approved by the MOA in its Notice to Proceed in order for such overruns to be enforceable against the MOA.

5.5.7.2 The MOA shall be responsible for cost overruns resulting directly and solely from the MOA's failure to

provide timely and exclusive site control per the requirements of Section 5.5.4 of this Agreement.

5.5.7.3 Except for environmental claims, which are governed by Section 5.5.7.5 of this Agreement, and regulatory changes, which are governed by Section 5.5.7.4, the MOA shall be responsible for payment for cost overruns owing to changes in site conditions as set forth in section A.4.1.4 of Exhibit A to the Design-Build Contract. Any such change will be processed as a Change Order under the Design-Build Contract and will result in an equitable adjustment of the final budget and schedule. Changes in the Stipulated Sum owing from cost overruns governed by this Section 5.5.7.3 shall be paid from the MOA's Contingency first and then by the MOA upon exhaustion of the MOA's contingency.

5.5.7.4 The MOA shall be responsible to pay the cost overruns associated with regulatory changes as set forth in Section A.4.1.11 of Exhibit A to the Design-Build Contract that are attributable to changes in municipal code or regulation between the date of record for the Pricing Documents and the date of issuance of the building permits, or which retroactively affect approvals earlier given under the building permits. Any change in regulatory requirements attributable to changes in municipal code or regulation shall be processed as a change order and shall result in an equitable adjustment of the final budget and schedule attached as Exhibit B-1 and D-1 respectively of this Agreement. Change orders under this Section 5.5.7.4 shall be submitted directly to and paid by the MOA.

5.5.7.5 ACCT shall pay the first TWO HUNDRED THOUSAND and no/100 DOLLARS ($200,000) ("**Environmental Cap**") of cost overruns owing from environmental claims arising under A.4.1.4 and A.10.3 of Exhibit "A" to the Design-Build Contract or other claims or losses incurred because of the presence of hazardous materials on the Project site from the Project Contingency. The MOA shall be responsible for cost overruns in excess of the Environmental Cap. The MOA agrees to indemnify,

defend and hold ACCT harmless from any other costs it incurs in excess of the Environmental Cap required by any Change Orders arising due to environmental claims arising under sections A.4.1.4 and A.10.3 of Exhibit A to the Design-Build Contract or other losses, damages, or claims arising from the presence of hazardous materials on the site as regulated under applicable local, state or federal law.

5.5.7.6 The MOA shall be responsible for cost overruns owing to change orders that change the scope of the Project and deviate from the Project narrative. The MOA shall be responsible for cost overruns for bonding and purchasing the garage in excess of those amounts set forth as finance costs/cost of issuance in Exhibit B-1 to the Block 70 Parking Garage Development Agreement that are not the responsibility of ACCT. Cost overruns owing to Change Orders which are determined to be the responsibility of ACCT to pay under the terms of Design-Build Contract, and not allocated to the MOA under this Agreement shall be paid from the Project contingency and then by ACCT upon exhaustion of the Project contingency.

5.6 **Payment for Phase II Scope of Work.** Costs and fees for Phase II Scope of Work shall be payable in accordance with Section 6 of this Agreement.

5.7 **1% for Art Program.** The MOA, in compliance with Anchorage Municipal Code 07.04.010 - 07.04.080, will separately administer a 1% for Art program for the Project. ACCT, through the design builder's architect, will have a representative on the selection committee. The parties will collaborate in finding art that does not increase the cost of construction of the Project. Payment for the 1% for art costs and effort will be paid directly by the MOA, subject to the terms of Section 4.3 of the Purchase and Sale Agreement, and will not be processed as an obligation of ACCT.

6. Payment

6.1 **Pre-Development Phase Work Payment.** The MOA shall owe ACCT and the consultants and contractors of ACCT no fee for work performed under the Predevelopment Phase scope of work. However, if the Parties

execute this Agreement and proceed to Phase I, Pre-development Phase costs shall be due and payable as set forth in section 6.2.1.

6.2 **Phase I Work Payment.** Payment for the Phase I work will be billed based upon a lump sum basis for the effort to complete the Phase I work. In no event, absent an MOA directed change in the scope of work, shall the final billing exceed the lump sum set forth in Section 4.3 of this Agreement. Phase I Costs are earned and payable in accordance with Section 6.2.1 of this Agreement regardless of whether the MOA decides to proceed to Phase II. Should the MOA not elect to proceed to Phase II, the MOA shall not owe any additional money for the allowance components (reflected as "soft costs" on Exhibit "B") and shall only owe the Phase I costs as set forth in the Budget and attached as Exhibit B. Should the MOA elect to proceed to Phase II and issue the Notice to Proceed, then the amount paid by MOA for Phase I and Pre-development costs and fees will be credited to the final Project budget. In such case, allowance components for Phase I work that may be in excess of the Phase I costs may be reimbursable under the final Project budget if included in the final Project budget.

6.2.1 Timing of Payments. The Pre-Development Work as shown on Exhibit "B" in the amount of THREE HUNDRED SEVENTY THOUSAND AND NO/100 DOLLARS ($370,000) shall be due and owing upon execution and paid within ten (10) business days of execution of this Agreement by MOA. The lump sum for the Phase I scope of work as shown on Exhibit "B" in the amount of ONE MILLION SIX HUNDRED TWENTY-SEVEN THOUSAND FIVE HUNDRED AND NO/100 DOLLARS ($1,627,500) shall be due and owing and paid within ten (10) business days of either the issuance of the Notice to Proceed or the written election of the MOA not to proceed to Phase II. Phase II work shall be paid in accordance with section 6.3.

6.3 **Phase II Work.** Phase II work will be billed to the MOA in monthly billings based upon the percentage of work complete, the time and hours undertaken to complete the work and the requirements specified in Sections 5.1 and 5.2 of the Design-Build Contract and in the Article A.9 of Exhibit A to the Design-Build Contract, and shall be paid within the times set forth therein. The development fee earned during Phase II work shall be earned as a percentage of work completed under Phase II work in accordance with the Design Build Contract and paid in accordance with section 5.5.5.1 of

this Agreement. ACCT shall be entitled to stop work in the event of a failure to timely pay, except for matters submitted to the dispute resolution process as set forth in Section 13 of this Agreement, unless the failure to pay prevents it from requiring its design-builder to proceed with construction under the Design-Build Contract, in which case it may suspend work pending resolution of the dispute.

6.4 **Payment Notwithstanding Contingency.** Notwithstanding the condition precedent of Assembly approval as set forth in section 5.2.4, upon the assignment of this Agreement by the MOA to AHFC, the obligation to pay for the Pre-Development Fee and the Phase I Fee shall vest and the cost and fees shall be due and owing by AHFC as assignee until a notice of termination is given. In the event a notice of termination is given during Phase I work, then the amount owed shall be paid on a percentage of completion basis allocated for the time under the Exhibit D-1 from the start of work on Pricing Documents (line 32) until the delivery of the Pricing Documents (line 36).

7. **Consent to Assignment.** In the event that MOA executes the Purchase and Sale Agreement and in so doing assigns its rights, duties, and responsibilities to AHFC, upon AHFC's written assumption of MOA's duties and obligations under this Agreement, ACCT consents to such assignment and agrees ACCT shall look solely to AHFC for payment and releases MOA from any obligations to make payment. ACCT shall include in its Design Build Contract and require the Design Builder to include in its subcontractor agreements this language releasing MOA from obligations to pay for claims relating to the Project. ACCT shall be entitled to take direction from AHFC after assignment on all matters relating to the Project; except sections 3.2.2, 3.2.3 and modification or deletion of any of the design items in section 4.2 of the Purchase and Sale Agreement, as to which ACCT shall be entitled to take sole direction from the MOA. If ACCT is aware that AHFC and the MOA disagree over who has authority to direct ACCT, ACCT will, at a minimum, provide MOA and AHFC with a written statement of such disagreement five calendar days prior to the time required for resolution of the disagreement without cost overrun to the Project. Upon following such procedure for notice, ACCT shall not be responsible to the MOA or its assigns for following the direction of either the MOA or AHFC; nor shall ACCT be responsible for the cost of any changes incurred in following such direction.

8. **Mutual Obligations.** Each party covenants and agrees that the other party has relied in material ways on the expectation and belief that the other party will

continue to proceed with the Project with the other party consistent with the covenant of good faith and fair dealing. MOA recognizes that the development services identified above are complex and time intensive and will require ACCT to engage other professionals in order to deliver the scope of services with enough accuracy and detail necessary to submit an application for financing and information to MOA to make an informed decision. MOA agrees to work solely and in cooperation with ACCT in order to proceed with the Phase I work. Nothing in this Paragraph requires MOA to advance to a subsequent phase of the Project, or prevents MOA, if MOA and ACCT are unable to agree on the terms for proceeding to a subsequent phase, from proceeding in its sole discretion with that phase with a different developer or design builder.

9. **Ownership of Documents.** The design-builder will maintain the redline drawings during the construction of the Project and one set shall be delivered to the MOA within a reasonable time after the date of final completion. ACCT will have the architect of record deliver to the MOA an e-version of the final drawings and specifications, which will be endorsed with the limited license and the MOA's release and waiver as set forth immediately below for any use without the retention of the Architect and ACCT. Any other reproductions and other hard copies will be delivered on a reimbursable basis outside of the final budget. The MOA and its assigns shall have a license to use such plans for its future work, remodeling and renovation work of the Project without any further consent from ACCT, the design-builder, or the architect of record, conditioned upon the implied promise from such use that each such licensee shall release ACCT, the design-builder, the architect of record and their employees and subcontractors from any liability, loss, claim arising therefrom and that each such licensee architect, engineer or contractor who uses the plans and specifications will indemnify, defend and hold harmless ACCT, the design-builder, the architect of record and their employees and subcontractors from any and all liability which may arise from its use of the plans, unless such use is undertaken with prior written consent of ACCT, the architect of record and the design-builder, which consent shall not be unreasonably withheld. If found to be in default, ACCT assigns to MOA all of its rights to the ownership and use of documents as set forth in Design-Build Contract. To the extent not set forth above, the MOA's rights to documents shall be co-equal to ACCT's as set forth in section A.1.6 of Exhibit A to the Design-Build Contract.

10. **Records.** ACCT shall keep all records and accounts of the Project as is usual and customary in the construction industry for not less than five (5) years after substantial completion. Upon written request from MOA, such records shall be

available to MOA or its appointed accounting or auditing representatives for inspection and copying. Prior to destroying or disposing of such records, ACCT shall offer the records to MOA.

11 **Termination and Default.** This Agreement may be terminated by mutual agreement of the Parties, for convenience, or for default as set forth below.

11.1 ACCT Right of Termination for Cause. ACCT may terminate this Agreement upon thirty (30) days written notice upon a material default by the MOA, unless during such notice period, the default is cured, or if the default is such that it may not be cured reasonably within thirty (30) days, then MOA has begun the cure and is diligently prosecuting the cure until its completion. A material default shall not exist as to funds not paid, but in dispute under the Disputes Clause of this Agreement, until after the funds are found due after exhaustion of the Disputes Clause, however, such non-payment shall provide a basis for stopping work until the dispute is resolved.

11.2 MOA Right of Termination for Cause. MOA may terminate this Agreement upon thirty (30) days written notice upon a material default by ACCT, unless during such notice period, the default is cured, or if the default is such that it may not be cured reasonably within thirty (30) days, then ACCT has begun the cure and is diligently prosecuting the cure until its completion, or if the default is in dispute, then until resolved under the Disputes Clause of this Agreement. Notwithstanding the proceeding, the MOA shall also have the rights to take over the work under the terms and conditions and with the obligations as set forth in section 14.2 of Exhibit A to the Design-Build Contract; however, if the disputes resolution determination is that ACCT was not in default, or that its non performance was excused, then ACCT shall be entitled to payment of its Developer Fee and its design-builder shall be entitled to payment of its lost profits and unallocated overhead to the extent provided for in the Design-Build Contract.

11.3 Waiver of Consequential Damages. Upon any default, except for defaults of time of completion, which are addressed by liquidated damages, each party may seek its actual damages; however, both Parties waive as against the other the right to seek consequential damages as further defined by section A.4.1.10 of Exhibit A to the Design-Build Contract and/or punitive damages arising from such breach.

11.4 Termination for Convenience. MOA shall have the right to terminate this Agreement for convenience under the terms, conditions, and with the obligations

of the Owner under Section A.14.4 of Exhibit A to the Design-Build Contract. ACCT shall be entitled to its development fee in the event of such termination.

12. **Alternative Contractor.** In the event ACCT and MOA are unable to agree on an acceptable final budget to proceed to Phase II, then MOA shall pay to ACCT all sums due and owing for the Phase I work completed as set forth in section 6.2 and 6.4 of this Agreement and reimburse ACCT for any approved expenses advanced on behalf of MOA in anticipation of Phase II work. Approved expenses are expenses described as Phase I on Exhibit A attached hereto, which are approved by MOA upon execution of this Agreement, or expenses for Phase II work that the MOA has authorized in writing to keep the Project on schedule prior to the Notice to Proceed with Phase II work. In the event of termination because of the decision not to proceed with Phase II work with ACCT, then ACCT will grant a license to MOA to use the documents for construction of a parking garage on the Property on the terms set forth in section 9 of this Agreement. MOA acknowledges that the documents are incomplete and waives any claims against ACCT, the design-builder and/or architect of record for any errors or omissions in the documents and the MOA will hold the licensee(s) to the requirements of section 9 of this Agreement.

13. **Disputes between MOA and ACCT.** In the event of any dispute arising between the MOA and the ACCT regarding any part of this Agreement or the Parties' obligations or performance hereunder, either Party may institute the dispute resolution procedures set forth herein. The Parties shall continue performance of their respective obligations hereunder notwithstanding the existence of a dispute, except only for the failure to pay for Phase I or Phase II work. ACCT will include this Disputes Clause in lieu of the disputes clause set forth in Article 6 of the Design-Build Contract and Articles A.4.2 to 4.4.5 of Exhibit A to the Design-Build Contract.

13.1 Initial Meeting to Resolve Disputes. Any party may from time to time call a special meeting for the resolution of disputes that would have a material impact on the cost or progress of the Project. Such meeting shall be held at the MOA offices in Anchorage, Alaska within three (3) working days of written request therefore, which request shall specify in reasonable detail the nature of the dispute. The MOA's Authorized Representative, ACCT's Authorized Representative and any other person who may be affected in any material respect by the resolution of such dispute shall attend the meeting. Such Authorized Representative shall have authority to settle the dispute and shall attempt in good faith to resolve the dispute.

13.2 Mediation. If the dispute has not been resolved within five (5) working days after the special meeting has been held, a mediator, mutually acceptable to the Parties and experienced in design and construction matters shall be appointed. The Parties shall share the cost of the mediator. The mediator shall be given any written statements of the Parties and may review the Site and any relevant documents. The mediator shall call a meeting of the Parties within ten (10) working days after his/her appointment, which meeting shall be attended by the MOA's Authorized Representative, the ACCT's Authorized Representative and any other person who may be affected in any material respect by the resolution of such dispute. Such Authorized Representatives shall have authority to settle the dispute and shall attempt in good faith to resolve the dispute. During such ten (10) day period, the mediator may meet with the Parties separately.

13.2.1 No minutes shall be kept with respect to any mediation proceedings, and the comments and/or findings of the mediator, together with any written statements prepared, shall be non-binding, confidential and without prejudice to the rights and remedies of any Party. The entire mediation process shall be completed within twenty (20) working days of the date upon which the initial special meeting is held, unless the Parties agree otherwise in writing. If the dispute is settled through the mediation process, the decision will be implemented by written agreement signed by the Parties.

13.3 Court. In the event mediation fails, then any party may seek to resolve the dispute in a court of competent jurisdiction located in Anchorage Alaska. The prevailing party in such action shall be entitled to payment of their reasonable Alaska Rule of Civil Procedure 82 fees and court costs incurred in the court action itself and in any action necessary to enforce the judgment.

13.4 Other contracts. All contracts that the MOA or ACCT enter into with third parties that implement design or construction of the Project shall be required to include as a term a dispute resolution procedure in substantial compliance with the terms of Section 13 of this Agreement.

13.5 Authorized Representative/Notice. Each Party agrees, within ten days of the delivery of a mutual executed copy of this Agreement, to notify the other party who its Authorized Representative is, including mailing address, phone numbers, fax numbers, and e-mail address.

13.5.1 Notice. All notices sent pursuant to this Agreement shall be in writing and sent by regular, registered or certified mail, postage prepaid, or by hand-delivery to the parties as follows below:

To ACCT:

Venture Development Group
425 G Street, Suite 210
Anchorage, AK 99501
Attn: Mark Pfeffer

JL Properties
813 D Street , Ste. 200
Anchorage, AK 99501
Attn: Jon Rubini

With a copy to:

Ashburn & Mason
1130 West Sixth Ave., Ste. 100
Anchorage, AK 99501
Attn: Donald W. McClintock, III

To MOA:

Municipal Manager
632 W. 6th Ave., Suite 830
Anchorage, AK 99501

Municipal Attorney
Municipality of Anchorage
Department of Law
632 W. 6th Avenue, Ste. 730
Box 196650
Anchorage, AK 99519-6650

Either party may change these persons or addresses by giving notice as provided above. Notice shall be considered given and received on the latest original

delivery or attempted delivery date as indicated on the postage or service receipt(s) of all persons and addresses to which notice is to be given. In the event of notice by regular mail, notice shall be deemed received on the fourth business day after posting.

14. **Insurance**. ACCT shall require its design-builder to carry the insurance as set forth in **Exhibit "F."** ACCT itself will not carry separate coverages; it will be named as an additional insured under the design-builder's policies.

15. **Coordination with Design-Build Contract.** This Agreement and the Design-Build Contract shall define the obligations and performances of ACCT to the MOA.

15.1 Delay. In the event the design-builder shall be entitled to an equitable adjustment of time under the Design-Build Contract due to changes, force majeure, or other reasons as set forth in the Design Build Contract, then ACCT shall be allowed an equal time extension under this Agreement.

15.2 Liquidated Damages. In the event of unexcused delay in completion of the project, then ACCT shall collect from its design-builder the liquidated damages provided for under the Design-Build Contract and remit those to the MOA. ACCT shall not be required to pay any additional liquidated damages for such delay under this Agreement. Such liquidated damages shall be the MOA's sole and exclusive remedy for delay.

15.3 Warranties. The warranties to be provided after substantial completion and acceptance of the Project shall be an obligation owed directly by the design-builder to the MOA and its assigns and no other warranty provided by ACCT shall be provided nor implied under this Agreement. ACCT performance shall be complete upon final completion of the Project and acceptance of the same by MOA or its assigns. Beneficial occupancy will be delivered at the time of Acceptance of Substantial Completion.

15.4 Conflicts with form agreements. In the event of a conflict between this Agreement and the Design-Build Contract, the terms of this Agreement shall control over any printed portions of the Design-Build Contract, and the typed or revised provisions of the Design-Build Contract that have been approved by the MOA shall control over this Agreement.

15.5 Review and Approval of the Design-Build Contract. The MOA shall have the right of review and approval of the form of the Design-Build Contract prior to its execution.

16. **General Provisions.** The following general provisions shall apply to this Agreement.

16.1 Except where a party is entitled explicitly by this Agreement to make a decision in its sole discretion, whenever consent or approval of either party is required, that party shall not unreasonably withhold such consent or approval;

16.2 This Agreement shall be binding upon and inure to the benefit of the parties and their successors;

16.3 This Agreement shall be construed and interpreted in accordance with the laws of the State of Alaska and venue for dispute resolution shall be Anchorage, Alaska;

16.4 Headings and captions shall have no effect on its interpretation;

16.5 When required by this Agreement, the singular shall include the plural and the neuter shall include the masculine and the feminine;

16.6 The unenforceability, invalidity, or illegality of any provision of this Agreement shall not render the other provisions of this Agreement unenforceable, invalid, or illegal; and,

16.7 Each party has negotiated this Agreement with the assistance of counsel and any ambiguity in the Agreement shall not be construed against either party for having provided the language in question.

AGREEMENT TO LICENSE, ASSIGN, CONSTRUCT, AND PURCHASE THE BLOCK 70 PARKING GARAGE

This Agreement to License, Assign, Construct, and Purchase the Block 70 Parking Garage is made this 31st day of August 2006, between the Municipality of Anchorage ("MOA") and the Alaska Housing Finance Corporation ("AHFC").

RECITALS

A. Under Chapter 47 of the Session Laws of Alaska 2006, the Alaska State Legislature found there is insufficient parking available for the Atwood Office Building in downtown Anchorage and the purchase of a new garage to provide parking for the Atwood Office Building tenants, who include numerous Alaska state departments and agencies, would serve a public purpose. By this legislation, AHFC is authorized to finance and purchase a parking garage, the price for which may not exceed $44,000,000, including the costs of purchasing and issuing bonds for the facility.

B. AHFC is the fee-simple title owner of the south half of Block 70, an area of land on the north side of Seventh Avenue, across the street from the Atwood Office Building.

C. Until April 12, 2006, AHFC was the owner of Block 80, a parcel of real property adjacent to and used for parking for the Atwood Office Building. MOA has undertaken the development of a new Anchorage civic and convention center on Block 80 through a design-build procurement. One element of that procurement required recommendations for the coordination and relocation of parking in downtown Anchorage and foresaw the need for the design and construction of a new parking garage to serve the Atwood Office Building, the convention center, and the public at large.

D. The Alaska Center for Convention & Trade, LLC ("ACCT") was the successful proposer on MOA's request for proposal for the convention center project. In consummation of this proposal, MOA, through its successor-in-interest CivicVentures, entered into a development agreement with ACCT on November 10, 2004 and into the Amended and Restated Development Agreement on January 19, 2006. In addition to providing for the design and construction of the convention center, the Amended and Restated Development Agreement permitted MOA to further contract with ACCT for the design and construction of a new parking garage.

E. Contemporaneous with the execution of this Agreement, MOA is entering into the Block 70 Parking Garage Development Agreement with ACCT for the design and construction of the parking garage permitted under the Amended and Restated Development Agreement for the convention center.

F. AHFC believes that the Block 70 Parking Garage as set forth and described under the Block 70 Parking Garage Development Agreement will serve the parking needs contemplated under the legislative authorization. So long as the Block 70 Parking Garage substantially meets the design guidelines set forth under this Agreement, MOA desires to assign some of its rights and responsibilities under the Block 70 Parking Garage Development Agreement to AHFC and to sell the completed garage to AHFC.

G. Therefore, AHFC and MOA desire to work together to see the design and construction of the Block 70 Parking Garage come to completion. To achieve this aim, the Parties for their mutual and best interests, enter into this Agreement to License, Assign, Construct, and Purchase the Block 70 Parking Garage.

1. DEFINITIONS

1.1. **"Agreement"** means this Agreement to License, Assign, Construct, and Purchase the Block 70 Parking Garage.

1.2. **"Block 70 Parking Garage"** means the garage to be constructed under the Block 70 Parking Garage Development Agreement.

1.3. **"Block 70 Parking Garage Development Agreement"** means the agreement between MOA and ACCT for the design and construction of the Block 70 Parking Garage that is effective as of August 31, 2006.

1.4. **"Effective Date"** means August 31, 2006.

1.5. **"Parties"** means AHFC and MOA.

1.6 **"Property"** means that half of Block 70, more particularly described as:

> Tract 1, Block 70, Anchorage Original Townsite, according to Plat No. _____ situated in the Anchorage Recording District, Third Judicial District, State of Alaska.

1.7 **Additional Defined Terms.** Additional capitalized words used in this Agreement shall have the same meaning as the capitalized words under the Block 70 Parking Garage Development Agreement. Words of technical

usage such as "substantial completion" or "final completion" shall have a common meaning under both this Agreement and the Block 70 Parking Garage Development Agreement.

2. LICENSE TO DEVELOP PROPERTY

2.1 License. As of the Effective Date, AHFC grants to MOA a non-exclusive license to enter upon and develop the Property for the design and construction of the Block 70 Parking Garage and for any other purpose incidental or relevant to such design and construction.

2.1.1 Assignment of License. MOA shall assign its license to enter upon and develop the Property to ACCT. Notwithstanding this assignment to ACCT, MOA reserves for itself the right to enter upon the Property so that it may monitor and protect its interests related to environmental indemnification as set forth in Section 5.5.7.5 of the Block 70 Parking Garage Development Agreement. When entering upon the Property, however, MOA shall first notify ACCT of its intended entry, comply with all necessary job-site safety rules imposed by ACCT or its contractor while present on the Property during construction, and not interfere with ACCT's use of the Property or construction of the Block 70 Parking Garage.

2.1.2 Access and Site Control. The Parties hereby incorporate the provisions of Section 5.5.4 of the Block 70 Parking Garage Development Agreement regarding access and site control into this Agreement.

2.2 Reserved Rights. Notwithstanding Section 2.1, AHFC reserves for itself, its representatives, and its assigns the right to enter upon the Property at any time and for any purpose, so long as AHFC shall notify ACCT and does not interfere with ACCT's use of the Property or construction of the Block 70 Parking Garage. AHFC shall comply with all necessary job-site safety rules imposed by ACCT or its contractor while present on the Property during construction.

2.3 Termination of License. Unless otherwise extended by mutual agreement, MOA's license to enter upon and develop the Property terminates upon any of the following events:

2.3.1 AHFC's election under Section 4.4 of the Block 70 Parking Garage Development Agreement not to proceed to Phase II.

3.2, MOA assigns to AHFC all of its rights, duties, and responsibilities under the Block 70 Parking Garage Development Agreement.

3.2 Reservation of Assignment. MOA reserves for itself the following rights, duties, and responsibilities under the Block 70 Parking Garage Development Agreement.

3.2.1 Those rights, duties, and responsibilities occurring during the Pre-development Phase as described in Section 3 of the Block 70 Parking Garage Development Agreement, excluding the obligation to make payment set forth in Section 3.3 of such agreement.

3.2.2 Those rights, duties, and responsibilities set forth in Section 5.5.7.4 (COST OVERRUNS) (Changes to Municipal code or regulations) of the Block 70 Parking Garage Development Agreement.

3.2.3 Those rights, duties, and responsibilities set forth in Section 5.5.7.5 (COST OVERRUNS) (Environmental) of the Block 70 Parking Garage Development Agreement.

3.2.4 MOA shall receive a copy of the deliverables described in section 4.1 of the Block 70 Parking Garage Development Agreement at the same time the deliverables are given to AHFC.

3.2.5 MOA shall have the right to participate in all negotiations between AHFC or its consultants and ACCT or its consultants described and set forth in Section 4.4 of the Block 70 Parking Garage Development Agreement where such negotiations are relevant to the design features described in Section 4.2 of this Agreement. Notwithstanding this provision, AHFC shall have exclusive right to determine in its sole discretion whether to proceed to Phase II pursuant to Sections 4.4 and 5.4 of the Block 70 Parking Garage Development Agreement.

3.2.6 MOA shall have the right provided in section 5.5.4 of the Block 70 Parking Garage Development Agreement to visit and inspect the site from time to time at its sole discretion for the purpose of evaluating and monitoring environmental activities for which MOA has potential indemnification responsibility, so long as MOA complies with the access and entry provisions set forth in Section 2.1.1 of this Agreement.

3.2.7 All non-financial obligations imposed by Anchorage Municipal Code 07.40.010 - 07.40.080 relating to funds for work of art in public facilities. AHFC shall be responsible for payment to MOA for the costs of implementing the one percent for the Art program per the requirements of Section 4.3.

3.3 **AHFC's Acceptance of Assignment.** AHFC accepts the assignment of rights and assumes the duties and responsibilities under the Block 70 Parking Garage Development Agreement from MOA as set forth in Section 3.1 and limited by Section 3.2 of this Agreement.

3.4 **Cooperation.** MOA and AHFC agree they will cooperate in good faith to facilitate AHFC's assumption and implementation of AHFC's assigned rights and responsibilities.

3.5 **Indemnification.** Subject to a specific appropriation by the legislature for this purpose, AHFC agrees to indemnify MOA against all claims arising out of or asserted against MOA as a result of performance of those rights, duties, and responsibilities assigned to AHFC under Section 3.1 of this Agreement; however such obligation does not extend to claims arising out of or asserted against MOA as a result of performance of those rights, duties, and responsibilities reserved to MOA by Section 3.2 of this Agreement or extend to damages caused by MOA's own negligence. All Parties to this Agreement recognize and agree that AHFC has no appropriation currently available to it to indemnify MOA under this section and that enactment of an appropriation in the future to fund a payment under this section remains in the sole discretion of the legislature. The legislature's failure to make such an appropriation fully rescinds any liability on the part of AHFC under this Section and creates no further liability or obligation of AHFC for indemnification or other action.

4. DESIGN AND CONSTRUCTION OF THE BLOCK 70 PARKING GARAGE

4.1 Predevelopment and Phase I Activities. AHFC agrees that until such time as AHFC, as the assignee of the MOA, elects to proceed to Phase II under Sections 4.4 and 5.4 of the Block 70 Parking Garage Development Agreement, AHFC will keep MOA informed of all meetings, events, and decisions concerning design, schedule, budget, or cost of the Block 70 Parking Garage and that MOA will be permitted to send a representative to all meetings between AHFC or its consultants and ACCT or its consultants or between ACCT and its contractors or consultants.

4.2 Design Features.

4.2.1 Design Features. If AHFC elects to proceed to Phase II under Section 5.4 of the Block 70 Parking Garage Development Agreement, the Block 70 Parking Garage shall be designed and constructed to contain the following design features:

4.2.1.1 The garage shall be located at the northern property line of the Property so that the width of the sidewalks along 7th Avenue is maximized.

4.2.1.2 The first floor of the structure shall contain commercial or retail space along E Street, F Street, and Seventh Avenue.

4.2.1.3 The sidewalks on the E Street, F Street, and Seventh Avenue sides of the garage shall be heated from the outside face of the commercial or retail space storefront to the back of the curb.

4.2.1.3.1 MOA and AHFC agree that should AHFC elect to proceed to Phase II and the Block 70 Parking Garage be constructed, AHFC shall be responsible for any maintenance of the sidewalks around the garage. However, should the MOA undertake any activities within its right-of-way, MOA shall be responsible for any damage to or impacts upon the heating system caused by those activities.

4.2.1.4 No vehicle entry or exit shall be designed or constructed on the F Street side of the garage.

4.2.1.5 The garage shall be designed and constructed to provide for two lanes of access to the garage to or from E Street. The E Street access shall not diminish the twenty-nine (29) feet of sidewalk measured from the outside face of the commercial or retail storefront (nineteen (19) feet from the face of the structure) to the back of curb.

4.2.1.6 The garage shall be designed and constructed with an exterior skin as such skin is described and depicted in Exhibits A and H to the Block 70 Parking Garage Development Agreement. Any change to the exterior skin that does not conform to Exhibits A and H must be approved in writing by the mayor of the MOA.

4.2.1.7 The garage shall be designed and constructed to include a stair-elevator tower and pedestrian plaza that conforms with the tower and pedestrian plaza described and depicted in Exhibits A and G to the Block 70 Parking Garage Development Agreement. Any change to the tower and plaza that does not conform to Exhibits A and G must be approved in writing by the mayor of the MOA.

4.3 **One Percent for Art.** MOA shall undertake and perform all legal responsibilities imposed by Anchorage Municipal Code 07.40.010 - 07.40.080 regarding funds for works of art in public facilities and shall be responsible for administering such program for the Block 70 Parking Garage. Appointments to the committee or jury for art collection shall be structured so that AHFC and ACCT representatives compose the majority of members. As such, the five-person committee or jury for selecting art shall be appointed as follows: two members by AHFC; two members by MOA; and one member by ACCT. AHFC funds allocated to the one percent for the arts shall be used to cover the cost of the art, the costs of installing the art on or at the Block 70 Parking Garage, and the MOA administrative fee described in this Section. The MOA administrative fee shall equal ten percent of the one percent for art budget. One half of such fee shall be paid within 30 days after the selection committee is appointed and the remainder of such fee shall be paid after all of the artwork has been selected and contracts awarded to the artists. As to payment for the art, MOA shall notify AHFC when payment to the selected artist or artist is due not later than 35 days prior to the due date, and AHFC shall provide the funding for one-percent for art directly to MOA not less than five business days prior to the date upon which payment to the artists is due.

4.4 **Assembly Approval.** MOA shall submit to the Anchorage Assembly and use its best efforts to obtain passage of a municipal ordinance concerning public facility site review for the Project. The submitted ordinance shall provide for the Anchorage Assembly to follow substantially similar expedited procedures for approvals of site review and public hearings used for the Anchorage convention center.

5. PURCHASE AND SALE OF THE BLOCK 70 PARKING GARAGE

5.1 **Purchase Price.** The purchase price for the Block 70 Parking Garage shall equal the amount payable to ACCT for design and construction of the Project as set forth in the Block 70 Parking Garage Development Agreement, plus the administrative fee payable to MOA under Section 5.2 of this Agreement. The purchase price shall not exceed Forty-Four Million Dollars ($44,000,000) less AHFC's costs for bonding and purchasing the garage. Cost overruns for bonding and purchasing the garage in excess of those amounts set forth in Exhibit B-1 to the Block 70 Parking Garage Development Agreement shall be borne by AHFC. If AHFC does not elect under Sections 4.4 and 5.4 of the Block 70 Parking Garage Development Agreement to proceed to Phase II, the purchase price shall not be owed, but the payments required under Section 6 of the Block 70 Parking Garage Development Agreement shall be made by AHFC directly to ACCT.

5.2 **MOA Administrative Fee.** As part of the purchase price, AHFC shall pay an administrative fee directly to MOA of Two Hundred Twenty Thousand Dollars and no cents ($220,000). Payment of such fee beyond the initial payment shall be made only if AHFC elects under Section 4.4 and 5.4 of the Block 70 Parking Garage Development Agreement to proceed to Phase II. Payment of the fee shall be made in installments as follows:

5.2.1 One hundred and Ten Thousand Dollars ($110,000.00) -- Thirty days following the Effective Date

5.2.2 Fifty Five Thousand Dollars ($55,000.00) -- Thirty days following the signing of the Notice to Proceed described under Section 5.4 of the Block 70 Parking Garage Development Agreement.

5.2.3 Fifty Five Thousand Dollars ($55,000.00) -- Upon beginning of construction.

5.3 **Installment Payments of Purchase Price.** If AHFC elects under Sections 4.4 and 5.4 of the Block 70 Parking Garage Development

Agreement to proceed to Phase II, AHFC shall pay the balance of the purchase price in excess of the administrative fee provided for under Section 5.2 of this Agreement in installments paid directly to ACCT as provided in Section 6 of the Block 70 Parking Garage Development Agreement. AHFC shall provide MOA with documentation showing that such payments have been made within fifteen (15) days of the date such payments are made.

5.4 **Warranties.** Except as provided in Sections 5.4.1 and 5.4.2 of this Agreement, MOA does not warrant, in any manner whatsoever, title to the Property or the quality, condition, or fitness of the Property for use of the Block 70 Parking Garage.

5.4.1 Nothing contained in Section 5.4 shall be construed to limit any warranties assigned by MOA to AHFC pursuant to Section 3 of this Agreement.

5.4.2 Nothing contained in Section 5.4 shall be construed to limit the limited warranty provided by MOA as described in Section 5.5 and Exhibit A to this Agreement.

5.5 **Closing.** The closing for AHFC's acquisition of the Block 70 Parking Garage shall be contemporaneous with AHFC's acceptance of substantial completion of the Block 70 Parking Garage. At such time, MOA shall furnish AHFC with a quitclaim deed with one limited warranty. The quitclaim deed with one limited warranty shall be in substantial compliance with Exhibit A to this Agreement.

6. ADDITIONAL PROVISIONS

6.1. **Termination of Agreement. Termination.** This Agreement may be terminated by any of the following events:

6.1.1 AHFC's election under Section 4.4 of the Block 70 Parking Garage Development Agreement not to proceed to Phase II.

6.1.2 Termination of the Block 70 Parking Garage Development Agreement.

6.1.3 Upon mutual agreement of the Parties.

6.1.4 Upon AHFC's acceptance of final completion of the Block 70 Parking Garage.

6.2 **Effect of Termination.** In the event of termination, this Agreement shall be of the following force and effect.

6.2.1 If AHFC does not elect to proceed to Phase II construction and management under Section 4.4 of the Block 70 Parking Garage Development Agreement, this Agreement shall be without further force and effect. However, this clause shall not be interpreted to dispense with AHFC's obligations to make the payments to ACCT required by Section 6 of the Block 70 Parking Garage Development Agreement or to limit AHFC's ownership of the Phase I deliverables as governed by Section 9 of the Block 70 Parking Garage Development Agreement.

6.2.2 If the Agreement is terminated pursuant to Section 6.1.2 of this Agreement, MOA shall immediately transfer ownership of the Block 70 Parking Garage to AHFC in whatever state of completion by provision of the quitclaim deed with one limited warranty in substantial compliance with Exhibit A to this Agreement. With the exception of the following listed provisions of this Agreement, the remainder of this Agreement shall be without force and effect.

6.2.2.1 Section 3 (ASSIGNMENT OF DEVELOPMENT AGREEMENT), including AHFC's ability to exercise remedies for default under the Block 70 Parking Garage Development Agreement.

6.2.2.2 Section 4.1 (DESIGN AND CONSTRUCTION OF DOWNTOWN PARKING GARAGE -- Predevelopment and Phase I Activities).

6.2.2.3 Section 5.2 (PURCHASE AND SALE OF THE BLOCK 70 PARKING GARAGE-MOA Administrative Fee).

6.2.2.4 Section 5.4 (PURCHASE AND SALE OF THE BLOCK 70 PARKING GARAGE --Warranties).

6.2.2.5 Section 6 (ADDITIONAL PROVISIONS).

6.3 **Loss or Damage.** In the event of loss or damage to the Property as a result of flood, fire, earthquake, or other casualty, risk of loss shall be as set forth in the Block 70 Parking Garage Development Agreement.

6.4 **Notices.** All notices, demands, and requests which may be or are required to be given by either party to the other shall be in writing and shall be personally served, delivered by express courier, or sent by facsimile transmission(if sent by facsimile transmission a duplicate copy shall be sent by mail) to the individuals identified below:

If to MOA:

Municipal Manager
Municipality of Anchorage
632 W. Sixth Ave., Ste. 830
Anchorage, Alaska 99501
(907) 343-7110
Fax: (907) 343-7140

And

Municipal Attorney
632 W. Sixth Ave.,
Suite 730
Anchorage, Alaska 99501
(907) 343-4545
Fax: (907) 343-4550

If to AHFC:

Executive Director
Alaska Housing Finance
Corporation
4300 Boniface Parkway
Anchorage, Alaska 99504
(907) 330-8452
Fax: (907) 338-9218

And

Department of Administration
Division of General Services
Attn: Tanci Mintz
550 W. Seventh Ave., Suite 1970
Anchorage, Alaska 99501
(907) 269-0300
Fax: (907) 269-0308

6.5 **Consultation.** MOA and AHFC independently represent that each has had an adequate opportunity to consult with its own tax, legal, and other advisor prior to executing this Agreement. This Agreement when executed shall represent the agreement of the Parties and the rule of construction that ambiguities are construed against the drafter shall not apply.

6.6 **No Third Party Beneficiaries.** With the exception of Section 6.6.1, this Agreement creates no third party beneficiaries and no private rights of action that can be exercised by anyone other than the Parties to this Agreement, their successors, or assigns.

6.6.1 ACCT is a third-party beneficiary of Section 5.1 of this Agreement in the limited and only circumstance as follows: ACCT is a third-party beneficiary and may bring a private cause of action to enforce the obligations of AHFC set forth in Section 5.1 of this Agreement for payment of Pre-development and Phase I fees as such payment is required by and described in Section 6 of the Block 70 Parking Garage Development Agreement. AHFC agrees that ACCT may proceed in reliance upon this covenant, even if the Assembly does not approve the Block 70 Parking Garage Development Agreement and this Agreement, provided only that ACCT complies with its obligation to license its Phase 1 deliverables to AHFC upon such payment.

6.7 **Binding Effect.** This Agreement is binding on and shall inure to the benefit of the Parties and their respective legal representatives, successors, and assigns.

6.8 **Governing Law; Jurisdiction.** This Agreement shall be construed and interpreted and the rights of the Parties determined in accordance with the laws of the State of Alaska. Should any legal proceeding be necessary under this Agreement, the same shall be commenced in the Superior Court of the State of Alaska, Third Judicial District at Anchorage, Alaska. MOA and AHFC agree specifically that venue and jurisdiction in that court are proper and further agree to submit themselves to the jurisdiction of that court as a result of any matter arising under this Agreement.

6.9 **Headings and Subheadings.** Headings and subheadings are provided for descriptive purposes only and shall not be interpreted as obligations of this Agreement.

6.10 **Enforceability of Agreement.** Invalidity or unenforceability of any provision of this Agreement shall not affect the remainder.

6.11 **Waiver.** No waiver of any provision of this Agreement shall be effective unless in writing and signed by the Party who is bound to perform under the waived provision.

6.12 **Integration; Amendment.** This Agreement is the entire agreement of the Parties relating to the Property and it supersedes all prior agreements, understandings, representations, and negotiations. This Agreement may not be amended verbally or by any course of dealing, but only in writing signed by both parties.

6.13 **Disputes.** The Parties agree to apply the alternative disputes resolution procedures set forth in section 13.1 and 13.2 of the Block 70 Parking Garage Development Agreement to disputes between MOA and AHFC regarding this Agreement or the Parties' obligations or performance hereunder. Notwithstanding this provision, the alternative disputes resolutions procedures of Section 13.1 and 13.2 of the Block 70 Parking Garage Development Agreement shall not be applicable to any of the following: those matters set forth under this Agreement as being under the exclusive authority or sole discretion of either MOA or the AHFC; those matters which would subject AHFC to cost overruns under Section 5.5.7 of the Block 70 Parking Garage Development Agreement; or those matters, if any, subject to AHFC's administrative claims procedures.

LAWS OF ALASKA

2006

Source
SB 317

Chapter No.
_____

AN ACT

Relating to the purchase by the Alaska Housing Finance Corporation of a parking garage in Anchorage, Alaska and approving the issuance of bonds for the purchase of that parking garage; providing notice of, and authorizing the commissioner of the Department of Administration to enter into, a lease-purchase agreement with the Alaska Housing Finance Corporation for that parking garage; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1

AN ACT

Relating to the purchase by the Alaska Housing Finance Corporation of a parking garage in Anchorage, Alaska and approving the issuance of bonds for the purchase of that parking garage; providing notice of, and authorizing the commissioner of the Department of Administration to enter into, a lease-purchase agreement with the Alaska Housing Finance Corporation for that parking garage; and providing for an effective date.

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

FINDINGS AND PURPOSE. (a) There is insufficient parking available for the Atwood Office Building in downtown Anchorage, Alaska, and the purchase of a new parking garage to provide parking for the Atwood Office Building would serve a public purpose.

(b) The purpose of this Act is to

(1) authorize the Alaska Housing Finance Corporation to finance the purchase of a parking garage for the Atwood Office Building; and

(2) provide notice of, and authorize the commissioner of administration to enter into, a lease with the Alaska Housing Finance Corporation for that parking garage.

*** Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE AUTHORIZATION FOR PURCHASE AND BONDS. (a) The Alaska Housing Finance Corporation is authorized to finance under AS 18.55.010 - 18.55.290, with bond proceeds, the purchase of a parking garage in Anchorage, Alaska, to be leased to the state to provide parking for the Atwood Office Building. The maximum amount of the purchase price of the parking garage may not exceed $44,000,000, including the costs of purchasing the facility and issuing the bonds for the purchase.

(b) The Alaska Housing Finance Corporation is authorized to issue bonds under AS 18.55.100(a)(15) and (d) for the purchase of the parking garage described in (a) of this section. The bonds may have a term not to exceed 21 years.

*** Sec. 3.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE NOTICE OF AND AUTHORIZATION FOR LEASE-PURCHASE AGREEMENT. Subject to annual appropriation, the commissioner of administration is authorized to enter into a lease-purchase agreement for the parking garage described in sec. 2 of this Act. The anticipated total cost of the project is $44,000,000. The anticipated annual amount of the rental obligation is $3,700,000. The total lease payments for the full term of the lease-purchase agreement is anticipated to be $77,700,000.

*** Sec. 4.** The uncodified law of the State of Alaska is amended by adding a new section to read:

APPROVAL OF FINANCING AND AGREEMENT. (a) Section 2 of this Act constitutes the approval for the financing of the public building project described in sec. 2 of this Act required by AS 18.55.100(d).

(b) Section 3 of this Act constitutes the notice and approval of the lease-purchase agreement described in sec. 3 of this Act required by AS 36.30.085.

*** Sec. 5.** This Act takes effect immediately under AS 01.10.070(c).

ANALYSIS: *(Attach a separate page if necessary)*

The Alaska Housing Finance Corporation will finance, with bond proceeds, the purchase of a parking garage in Anchorage which will be leased to the state to provide parking for the Atwood Office Building. The maximum purchase price of the parking garage may not exceed $44,000,000, including the cost of purchasing the facility and issuing the bonds for purchase. Subject to an annual appropriation, the Commissioner of Administration is authorized to enter into a lease-purchase for the parking garage. The anticipated total cost of the project is $44,000,000 and the anticipated annual amount of the rental obligation is $3,700,000. This fiscal note represents the amount necessary to satisfy the required annual lease payment of $3,700,000.

CSSB 289(FIN)

domestic insurers. It changes licensing language to be consistent with state standards, allows for increasing electronic communication, and changes some definitions.

Co-Chair Meyer noted the zero fiscal note. He asked if the Labor and Commerce Committee agrees with the bill. Ms. Hall replied that Labor and Commerce sponsored the bill at her request.

9:02:17 AM

Representative Foster MOVED to REPORT CSSB 289 (FIN) out of Committee with individual recommendations and the accompanying fiscal note. There being NO OBJECTION, it was so ordered.

CSSB 289 (FIN) was REPORTED out of Committee with a "no recommendation" and with zero fiscal note #1 by the Department of Commerce, Community and Economic Development.

9:03:43 AM

SENATE BILL NO. 317

> "An Act relating to the purchase by the Alaska Housing Finance Corporation of a parking garage in Anchorage, Alaska and approving the issuance of bonds for the purchase of that parking garage; providing notice of, and authorizing the commissioner of the Department of Administration to enter into, a lease-purchase agreement with the Alaska Housing Finance Corporation for that parking garage; and providing for an effective date."

SCOTT J. NORDSTRAND, COMMISSIONER, DEPARTMENT OF ADMINISTRATION, referred to a handout "Atwood Building Parking Center" (copy on file.) He explained that Anchorage is building a convention center downtown and wants to acquire Block 80, which is valued at $4.6 million. An agreement was made to swap half of Block 70 for half of Block 80. The state accepted $2.3 million in cash for the other half of Block 80. That left a shortage of parking in Block 70. The state made an agreement with the municipality for the right to park 149 cars in the JC Penney garage for up to 7 years and for free parking during the construction of a new parking garage. If, at the end of 7 years, the state does not build a parking garage, the municipality has the option to purchase back the property and they would have to build a parking garage. Presently, there is a need for about 1,000 parking spaces.

9:07:37 AM

Mr. Nordstrand referred to page 2 and listed the various parking spaces currently available. The plan is to build a parking garage on Block 70 that would accommodate up to 830 vehicles and with a skyway into the Atwood Building.

Mr. Nordstrand noted on page 5 the configuration of the future parking plan. Alaska Housing Finance Corporation (AHFC) owns the Atwood Building. The developer for the new convention center will also be used for the new parking garage in order to get the best possible price. Construction on the new garage will begin next spring. AHFC would issue debt and purchase from the municipality, and the Department of Administration would lease the parking facility from AHFC. The state will own it at the end of the lease/debt payoff. The Department of Administration will build the cost of the parking into the lease rate that is charged to tenants in the facility.

9:10:41 AM

Mr. Nordstrand related the financial terms on page 7. AHFC will bond up to $44 million and have a debt service of $3,700,000 annual lease payments over 21 years. The debt would be issued at the beginning of construction with progress payments thereafter.

Mr. Nordstrand talked about the lease cost analysis on page 8. The new lease rate of $2.52 per square foot does not reflect offsetting revenues and savings. He explained the revenues and savings on page 9. He estimated that parking costs would increase. The first floor of the facility will be used for retail space and will be a source of income. The convention center cash payment of $2.3 million is available revenue. After hours parking revenue is estimated to be $200,000 per year. The total when capitalized is $23.5 million. Revenues and savings are estimated to reduce the square foot cost for the parking center by half.

9:14:26 AM

Mr. Nordstrand summarized that there is a demand for more parking and future cost and demand impacts are imminent. The Atwood Parking Center would provide safety and convenience for visitors and 1,000 state employees and other tenants.

Representative Foster spoke in support of SB 317. He recalled that a survey in the 80's showed 59 percent of facilities were not taxed so the burden fell on the other 41 percent of the people. When the state owns facilities, others have to pay for maintenance. Co-Chair Meyer recalled when the state bought the Atwood building, which resulted in a loss to the tax rolls. Mr. Nordstrand described this transaction as a win/win situation that has the approval of

the city. Co-Chair Meyer commented that the taxpayers may not be happy.

9:16:24 AM

Representative Kelly asked if there is a charge to park at the lot. Mr. Nordstrand replied that there are so many square feet allowed for state parking. He gave an example of a lease facility with not enough parking. Atwood employees have not been paying for parking. There are 930 free parking places presently.

Representative Kelly asked if that would be an issue in the future. He agreed with the concern brought up by Representative Foster and Co-Chair Meyer. He suggested letting the people pay for it. Mr. Nordstrand said that issue has not been looked at. He could see how it could be a financial problem for employees. The norm is to not pay for parking.

Representative Kelly cautioned that there is unfunded liability. Mr. Nordstrand pointed out that the municipality is planning to build more parking.

9:21:52 AM

Co-Chair Meyer asked if lease payments are shown on the fiscal note. He asked about savings resulting from consolidating parking. Mr. Nordstrand said that expense has not been determined. Co-Chair Meyer asked who would pay for maintenance of the parking garage. Mr. Nordstrand said the Anchorage Parking Authority. He spoke of how security would be handled. Those costs are unknown, but evening and weekend parking could offset those expenses.

Co-Chair Meyer asked if there would be a walkway to the Atwood Building. Mr. Nordstrand replied that the Atwood Building was designed for such a skyway. There may be a skyway to the Convention Center in the future.

9:25:03 AM

Co-Chair Meyer commented that the fiscal note has unknowns.

Representative Foster MOVED to REPORT SB 317 out of Committee with individual recommendations and the accompanying fiscal note. There being NO OBJECTION, it was so ordered.

SB 317 was REPORTED out of Committee with individual recommendations and with fiscal note #1 by the Department of Administration.

9:26:37 AM

MINUTES
SENATE FINANCE COMMITTEE
April 28, 2006
9:13 a.m.

CALL TO ORDER

Co-Chair Lyda Green convened the meeting at approximately 9:13:55 AM.

PRESENT

Senator Lyda Green, Co-Chair
Senator Gary Wilken, Co-Chair
Senator Con Bunde, Vice Chair
Senator Fred Dyson
Senator Bert Stedman
Senator Lyman Hoffman
Senator Donny Olson

Also Attending: SENATOR RALPH SEEKINS; AMY STEITZ, Staff to Senator Tom Wagoner; SCOTT NORDSTRAND, Commissioner, Department of Administration; GREG O'CLARAY, Commissioner, Department of Labor and Workforce Development; TOM MAHER, Staff to Senator Therriault; MIKE ANDREWS, Director, Alaska Works Partnership Inc.; JOHN BITNEY, Lobbyist, Alaska State Homebuilders Association;

[NOTE: Public testimony on SJR 20 was presented in the order depicted in the minutes. In addition, all testimony was presented in Juneau unless otherwise noted.]

Attending via Teleconference: From Anchorage: MARK DAVIS, Director, Division of Banking & Securities, Department of Commerce, Community and Economic Development; ROGER PRINCE, Department of Commerce, Community and Economic Development; JOE BRAMMER, Alaska Association of Mortgage Brokers; JOHN MARTIN; KEN GAIN, Secretary/Treasurer, Independent Lenders of Alaska; JOHN CARMAN, Past President, Alaska Mortgage Bankers Association; MIKE SAMSON, President, Samson Electric; BILL WATTERSON, President, Watterson Construction; JULIE AUNE, Vice President, AAA Fence; REBECCA LOGAN, President, Associated Building and Contractors (ABC) of Alaska; from Fairbanks: DOUG ISAACSON, Past President, Alaska Association of Mortgage

Commissioner O'Claray guaranteed this bill was developed to be non-partisan in regard to the union/non-union issue. He asserted that there are many people to train, and the bill endeavors to encompass as many employees as possible.

Co-Chair Green appreciated Commissioner O'Claray's "positive attitude".

Co-Chair Wilken moved to report the bill from Committee with individual recommendations and accompanying fiscal notes.

There being no objection, CSSB 309(L&C) was REPORTED from Committee with two fiscal notes from the Department of Labor and Workforce Development: fiscal note #1 in the amount of $5,043,300, and fiscal note #2 for $247,700.

#sb317
4:33:51 PM

SENATE BILL NO. 317
"An Act relating to the purchase by the Alaska Housing Finance Corporation of a parking garage in Anchorage, Alaska and approving the issuance of bonds for the purchase of that parking garage; providing notice of, and authorizing the commissioner of the Department of Administration to enter into, a lease-purchase agreement with the Alaska Housing Finance Corporation for that parking garage; and providing for an effective date."

This was the first hearing for this bill in the Senate Finance Committee.

SCOTT NORDSTRAND, Commissioner, Department of Administration, introduced the bill, and explained it as a proposal to build a parking garage to serve the Atwood Building in downtown Anchorage.

4:34:45 PM

Commissioner Nordstrand referred to a presentation titled "Atwood Building Parking Center" [copy on file]. He explained that the State purchased the Atwood Building and the adjacent

"Block 80" lot at the same time, and had since used Block 80 as a parking area for State employees working in the Atwood Building. He directed attention to the map on page 3 of the presentation. The Municipality of Anchorage and the State recently concluded negotiations to sell Block 80 to the Municipality for construction of a convention center.

Commissioner Nordstrand continued that the State was compensated in a "block for block" trade, and acquired one half of "Block 70" directly across the street from the Atwood Building, where the Dimond Center parking lot is currently located. In addition, the State was paid market value of $2.3 million by the Municipality of Anchorage for the other half of Block 80. The State is statutorily required to provide 40 visitor parking places as well as a specified number of handicap parking places within one half block from the door of the Atwood Building, in addition to employee parking, for a total of approximately 930 parking spaces. These parking needs are currently met with multiple parking lots within a 12 square block area.

4:38:54 PM

This bill proposes a long term solution to the Atwood Building's parking issues in the form of a parking structure to be built on the State's portion of Block 70. As part of the negotiated terms between the State and the Municipality, the State committed to build a parking garage within seven years on Block 70, or to allow the Municipality the option to buy back the lot at market value to do so themselves. The erection of a parking structure would enable the State to sell Block 102, currently used for parking and valued at approximately $4 million, and put those funds into the parking facility.

The parking facility would include a "skybridge" to the Atwood Building, as the building was configured to receive that type of overpass. Per request of the Mayor of Anchorage, the ground level would be available for lease by retail stores, resulting in additional income generated by the parking facility.

Commissioner Nordstrand reported that the Alaska Housing Finance Corporation (AHFC) owns the Atwood Building; the State Department of Administration leases the space from AHFC, and charges the departments that occupy the offices. The Municipality was once planning to build the parking garage themselves, but found it financially burdensome. Under this

proposal, the developer retained by the Municipality of Anchorage would be used by the State to design and construct the facility. The State would engage an independent cost expert to determine a fixed price for the project which would be agreed to by both parties. AHFC would issue the debt for construction of the facility and purchase the completed parking garage from the Municipality, whereby the Department of Administration would lease the structure. Commissioner Nordstrand anticipated the construction bonds would be paid off in 21 years, at which time the deed for the parking garage would be turned over to the State. This bill requested authority to bond for up to $44 million, although he did not anticipate the cost would be that high. If, however, the project incurred the maximum amount of debt, the annual debt payment would be $3.7 million for 21 years. The debt would be issued at the beginning of construction to pay for construction expenses.

4:43:12 PM

Commissioner Nordstrand estimated the cost of the project to be approximately $1.22 per square foot, if the full bond amount was issued. The State currently pays roughly $1.30 per square foot for the offices in the Atwood Building, bringing the total new lease rate to $2.52 per square foot. The market rate for this type of office accommodations in Anchorage averages approximately $2.75.

4:44:12 PM

Commissioner Nordstrand assumed that the cost to lease parking spaces would increase with time. An escalation in parking fees would provide cost avoidance savings to the State, as well as generate additional income by renting spaces in the parking structure for after-hours and weekend parking. In addition to retail lease income and revenues from the sale of surrounding parking areas, including Block 80 and Block 102, he projected the parking facility would generate the equivalent of $23.5 million. He considered these figures evidence of the State's ability to "buy down the debt".

4:45:59 PM

Commissioner Nordstrand summarized that the demand for parking would remain constant, if not increase, in the future, and the construction of a parking facility would allow the State and the

occupants of the Atwood Building to provide for their own needs rather than paying market price for rented parking.

4:46:21 PM

Commissioner Nordstrand added that the parking structure would provide "safety and convenience" for visitors to the Atwood Building, as well as State employees.

4:46:41 PM

Senator Hoffman asked how Block 102 would be sold.

Commissioner Nordstrand answered that the parcel would be sold "competitively". The lot was appraised for approximately $3.7 million in January 2006, and he expected the value to increase dramatically with the completion of the nearby convention center.

Senator Hoffman assumed the land would be advertised publicly.

Commissioner Nordstrand affirmed.

4:47:33 PM

Senator Olson asked regarding maintenance and operating costs related to the facility.

Commissioner Nordstrand replied that operating the parking structure would incur costs, such as management of the lease space and employment of a parking attendant, but he was unsure what the total cost would be. He expected the costs would be "minimal", and operations may be handled by the Atwood Building managers or the Anchorage Parking Authority.

4:48:31 PM

Co-Chair Wilken was frustrated with the decision to bond for this project and invest $30 million in debt services. He pointed to the $2.5 billion in the Constitutional Budget Reserve (CBR) account and $2 billion in the Earnings Reserve Account (ERA) as possible revenue sources to pay for the parking facility outright, thus avoiding the $30 million the State would pay in interest under the current proposal.

4:49:46 PM

DAN FAUSKE, CEO, Alaska Housing Finance Corporation, testified via teleconference from an offnet location. He directed attention to Sec. 2(b) on page 2, line 16, and noted that the terms of the bonds should indicate a 21-year period rather than 20 years.

4:50:16 PM

Commissioner Nordstrand confirmed this.

Co-Chair Green voiced support for the bill.

Co-Chair Wilken moved to report the bill from Committee with individual recommendations and accompanying fiscal notes.

There being no objection, SB 317 was REPORTED from Committee with zero fiscal note #1 from the Department of Administration.

4:51:21 PM

#

ADJOURNMENT

Co-Chair Lyda Green adjourned the meeting at 4:51:42 PM.

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

April 27, 2006

The Honorable Ben Stevens
President of the Senate
Alaska State Legislature
State Capitol, Room 111
Juneau, AK 99801-1182

Dear President Stevens:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the purchase by the Alaska Housing Finance Corporation of a parking garage in Anchorage, Alaska; approving the issuance of bonds for the purchase of that parking garage; and providing notice of and authorizing the commissioner of the Department of Administration to enter into a lease-purchase agreement with the Alaska Housing Finance Corporation for that parking garage.

This bill would authorize the Alaska Housing Finance Corporation (AHFC) to finance, with bond proceeds, the purchase of an up to approximately 830-space parking garage to serve the parking needs of the Atwood Building in downtown Anchorage. The bill also would authorize the Department of Administration to enter into a lease-purchase agreement with the AHFC for that parking garage.

I urge your prompt and favorable action on this measure.

Sincerely yours,

Frank H. Murkowski
Governor

ANALYSIS: *(Attach a separate page if necessary)*

The Alaska Housing Finance Corporation will finance, with bond proceeds, the purchase of a parking garage in Anchorage which will be leased to the state to provide parking for the Atwood Office Building. The maximum purchase price of the parking garage may not exceed $44,000,000, including the cost of purchasing the facility and issuing the bonds for purchase. Subject to an annual appropriation, the Commissioner of Administration is authorized to enter into a lease-purchase for the parking garage. The anticipated total cost of the project is $44,000,000 and the anticipated annual amount of the rental obligation is $3,700,000. This fiscal note represents the amount necessary to satisfy the required annual lease payment of $3,700,000.

Atwood Building Parking Center

- Requirements
  - AHFC owns Atwood Building
  - MOA to design and construct for fixed price
  - AHFC to issue debt & purchase from MOA
  - DOA to lease from AHFC; State owns at end of lease/debt payoff
  - Same arrangement as Atwood Building
  - DOA builds cost into lease rate charged to agencies

Atwood Building Parking Center

- Financial Terms
  - AHFC bonds up to $44 million
  - $3,700,000 annual lease payments (21 years)
  - Debt issued at beginning of construction with progress payments thereafter

Atwood Building Parking Center

- Lease Cost Analysis

  - $3,700,000/252,000 SF/12 = $1.22 p/SF

  - Existing Lease Rate $1.30 per SF
  - New Lease Rate $2.52 per SF
  - Market Rate Comparable $2.75 per SF

- New lease rate does not reflect offsetting revenues and savings

Atwood Building Parking Center

- Revenues & Savings
  - Existing Parking Cost (280 spaces with MOA; $170,000 p/yr)
  - Future Parking Cost Increases (MOA)
  - Retail Lease Income ($360,000 p/yr est.)
  - Land Sale (Block 102; $4 million est.)
  - Convention Center Cash payment ($2.3 million)
  - After Hours Parking Revenue ($200,000 p/yr est.)
- Total when capitalized $23.5 million
- Revenues & Savings estimated to reduce SF cost for Parking Center by half

Atwood Building Parking Center

- Summary
  - A current demand exists
  - Future cost and demand impacts are imminent
  - A current opportunity for resolution
  - A sound financial investment
  - No general fund appropriation needed
  - Safety and convenience for visitors and 1000 state employees and other tenants

City of Nome proposal for State Office Building in Nome:

March 20, 2012

In separate studies over a number of years, both the Department of Administration and the Department of Transportation and Public Facilities have repeatedly identified the pressing need for modern, functional and efficient office space for state agencies in Nome, Alaska to serve the public interest. A structural conditions report by PDC Engineers as far back as 2001, and confirmed by BBFM Engineers in 2004, identified "severe…on-going corrosion of steel columns below the 1st floor and starting to diminish structural integrity". In March 2010, the Alaska Court System estimated deferred maintenance, code upgrades and remodeling of the existing Nome Courthouse (the former Federal Building) would cost nearly $9M, but would not ultimately address the building's structural failings in design, construction or location within the floodplain and its recent history of flooding.

In January 2010, the Mayor and City Council of Nome identified a new state office building as a legislative priority as part of its 2011 City of Nome presentation to the State of Alaska. On July 15 of that year, the City formally responded to the State Department of Administration RFI identifying its preferred Front Street site as lots owned by Sitnausak Native Corporation. In March of 2012 Sitnausak Native Corporation expanded the potential building site by securing additional lots which were subsequently committed to the City for this project at fair market values.

Through an open public process the City of Nome, its executives and City Council have repeatedly expressed commitment and determination that the City needs and deserves a first-class functional State office building in Nome at a location approved by City Council; a location that promotes local business, servers the public interest and enhances Nome's historic Front Street.

Under the City's development plan the State would own a new facility built to its specifications, at or below an independent third- party engineer's cost estimate. The facility would be on the

City of Nome's preferred site, which the State will own through the City's acquisition at appraised fair mark value.

- **Site Location:** Optimal location on Front Street as identified by the Nome City Council; a central location with good public accessibility that revitalizes downtown Nome rather than causing/contributing to its decline or cannibalizing local vendors. (precise location is Block C, Lots 1-4; Block D, Lots "Portion of 9" and 12A & 13A)
- **Site Attributes:** Building site is beyond the identified floodplain and has the most cost-efficient utility infrastructure of any site available. In conversation with Nome Joint Utility Manager, John Handland, utility connections at the Front Street location would be significantly less expensive than other alternatives (the Stedman Street location.) Site allows for co-location with existing state agency offices next door, and allows for physical connection of the buildings, if desired. Site also requires less site preparation than other alternatives.
- **Site Ownership and Terms:** All parcels comprising the site are now owned or fully controlled by Sitnasuak Native Corporation, which has committed the aggregated parcels to the project for development to suit by its subsidiary, Nanuaq Development. The Nanuaq team has substantial successful project financing and development experience, including multiple completed projects for State and municipal ownership on similar development models.
- **Site Size:** The aggregated parcels, plus the current right-of-way of Lane's Way, which the City would vacate for the project, comprise nearly 70,000 square feet—over an acre and a half and large enough to support the State's requirements.
- **Site Cost:** The commitment of the land is at Fair Market Value, as determined by a State-approved appraisal.
- **Building Attributes:** To be developed under contract with the City of Nome; State determined scale and State specifications.
- **Building Cost:** At or below the cost estimate of a State-approved cost estimator
- **Financing:** Best tax-exempt bond rates available to AHFC.
- **Project Cost:** Lowest cost project delivery methodology available to the state that provides state ownership and avoids long-term lease premium.
- **Timing:** Provides the shortest path to a completed project.
- **Contract Administration:** City of Nome, and then AHFC (upon assignment from City of Nome)
- **Operator:** Department of Administration at project completion

Following is an extract of findings from existing architectural and engineering reports on file for the building:

USKH Jan 1994. This report is separated into three volumes as follows:

- Vol A Exterior Envelope Corrosion Study
- Corrosion damage to the south wall of the structure was the primary focus of the report. The report documented damage that occurred as a result of a major storm even that occurred in November of 1974 The report identified that an inadequate repair of that damages resulted in poor protection from the elements which had resulted
- USKH recommended removal of the existing cladding system to expose the framing members such that the extent of corrosion damage could be determined and removed.
- After repair of the damaged framing, a new cladding system Exterior Insulation and Finish System (EIFS) was recommended This system would utilize a synthetic plaster system such as Dryvit, R-Wall, Pleko, Finestone or Thorowall These types of systems are considered to have excellent resistance to harsh and/or corrosive environments.

- Vol B Heating and Ventilation controls Study Volume B focused solely on the HVAC control system

- Pneumatic Heating and Ventilation System controls are original and nearing the end of their useful life Lifespan is typically 20-30yrs building was 20 yrs old in 1993

- USKH recommended upgrading the system to DDC

- Other suggested improvements were to balance all the air and hydronic systems in the facility and insulate heating system piping in the basement.

- None of this work was ever funded

- Vol C Condition Survey and Deficiencies Report
  Life Safety issues are as follows:
- 1 hour corridor system: Current corridors now on extend from floor to drop ceiling. Corridors should be replaced with floor to hard ceiling on hour fire rated walls and 20 minute fire rated metal framed doors
- Stair Railings need to be brought up to current codes
- Fire alarm system: Building wide addressable fire alarm system is recommended
- Other fire separations. Additional smoke dampers in the ventilation system are required to meet current codes.
- Inadequate ventilation for fume hood and kettle exhaust fan
- Emergency Lighting system upgrade
  Other items noted include provisions for lessening the maintenance cost of the build, energy conservation and ADA compliance

Loftus Engineering Associates 10/13/97

- Exterior Envelope Corrosion Study Review
  This report was made as a follow up (second opinion) report to Volume A of the initial USKH report. Report confirms the initial USKH diagnosis and recommendation for

repair Report indicates that the condition of the south wall is "an unacceptable condition by any standard of performance"

Recommended repairs to the wall system include
1 Removal of all of the existing siding on the building to expose the underlying sheet rock for inspection.
2. Removal and replacement of all the studs in the crawl space, includes the entire wall section.
3 Additional 15% of wall areas (first floor primarily) are expected to require similar removal and replacement. Areas requiring removal shall be determined by inspection after removal of cladding and areas of sheetrock.
4. All removed walls to be reconstructed Entire building clad with half inch ply covered with building paper EPS insulation will be fastened to the ply and then covered with an EIFS cladding system as identified in the USKH report

Corrosion in the steel columns is first identified in this report Report indicates the condition as "serious" and indicates that repairs should be made by stripping up to 2 feet of the concrete cladding over the existing columns and cleaning and reapplying corrosion inhibitors.

None of these repairs were undertaken

PDC Inc Consulting Engineers12/20/2001

- Engineers Report Nome State Office Building

This report focuses primarily on corrosion to the structural elements of the building. Notes indicate corrosion has reduced the cross section of some structural elements to have reduced column cross sections by as much as 15%. Failure of the exterior cladding is identified as the source of the leakage for wind driven salt spray from the Bering Sea Corrosion also noted in steel floor decking on the east wall. Beam to column and beam to girder bolted connections show corrosion as well.

Recommended fix is to expose all structural elements suspected to be subject to corrosion. Sandblast and recoat them with corrosion inhibitors. All connections should be sandblasted, inspected and repaired. Additional lateral supports may be required to correct structural deficiencies. Replace all metal studs along the south wall of the crawl space and the first floor of the structure Exterior cladding should be completely removed and replaced with a new system more resistant to the corrosive elements particular to the building location

None of the recommended repairs have been made

BBFM Engineers Inc. 10/22/2004

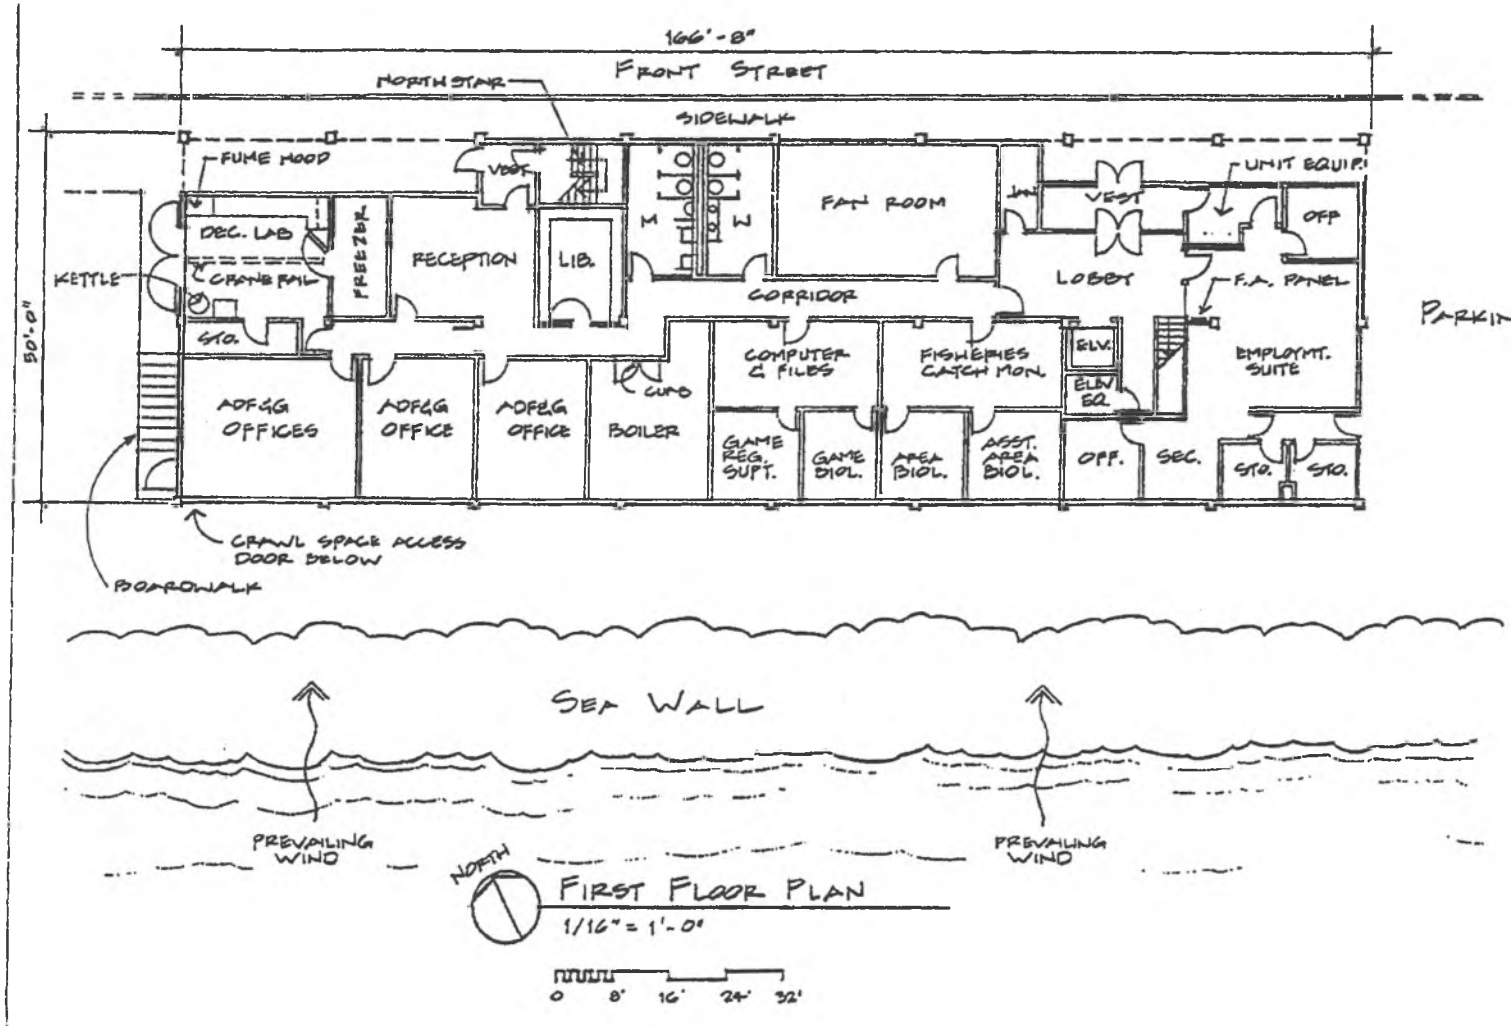
- Nome State Office Building Inspection

Inspection was made immediately subsequent to a storm event which caused flooding in the basement of the Nome State Office Building and caused up to three feet of gravel deposited along the south wall of the building Report references a previous report by PDC that identifies concrete spalling and sever corrosion of structural columns on the south wall of the building. Recommends repair of this problem as indicated in the PDC Report.

DOTPF Northern Region Safety Officer Letter Regarding Mold/Fungus 5/17/2006

- Letter documents Northern Region M&O cleanup and testing to demonstrate that mold and fungus were not present in the building

I. Background



The Nome State Office Building is a 15,980 square-foot, two-story structure, located on Front Street in Nome, adjacent to the sea wall on the Norton Sound of the Bering Sea. The facility houses various state agencies, including:

Department of Corrections
Department of Environmental Conservation
Department of Fish and Game
Department of Health and Social Services
Department of Labor
Elections
Attorney General
Governor's Office
Legislative Affairs

On November 17, 1993, at the request of DOT&PF, the facility was inspected by Scott Bell, P.E., a mechanical engineer with USKH. The purpose of the inspection was to determine the condition of the existing HVAC controls system, list deficiencies, and provide recommendations and budgetary cost estimates for correction of the identified deficiencies. The wide difference in room temperatures throughout the facility is the primary impetus for this study of the HVAC control system. As part of this investigation, Mr. Bell met with the Honeywell, Inc. representative in Anchorage and reviewed this building's control system with them.

The existing controls system is a pneumatic system consisting primarily of Honeywell components and is in average condition for a 20-year old system (control systems have a useful life of from 20 to 30 years). Several of the control sequences can be improved upon by the addition of control components. Given the remaining useful life of the control system the State should consider switching to a direct digital control (DDC) for the mechanical rooms and main controllers.

Upgrades to the building's air heating system are also discussed, but are not recommended at this time due to their high estimated construction cost.

MEMORANDUM

Date: October 22, 2004 204153
To: Mike Szewc, State of Alaska
From: Troy J. Feller, PE
Re: Nome State Office Building

The purpose and scope of site visit was to identify and assess any storm damage or distress to the Nome State Office Building on Front Street. The recommendations from this assessment are in my Site Observation Report dated October 22, 2004. Although not storm related, during my observations I did note the on-going corrosion of steel columns below 1st floor along south side of building. This corrosion is becoming severe and is starting to diminish the building's structural integrity. Most of the cracked and spalled concrete observed around perimeter of building and in the crawl space is being caused by the steel column corrosion. The outer layer of steel expands as it oxidizes which results in prying forces to the un-reinforced concrete encasement resulting in the cracking and spalling. Once the concrete encasement is loose it tends to trap moisture against steel columns which exacerbates the problem. This situation needs to be addressed as described in the December 2001 report by PDC Engineers.

Sent via email

Dear Governor Parnell:

Please accept our deep appreciation for your recent visit during a busy Legislative session. We are especially grateful for your personal interest in the potential construction of a new Alaska State Office Building in Nome. We admire the high level of integrity and professionalism your administration has displayed in addressing this project.

It is our hope this much needed project can be advanced during the current Legislative session; to do so will require definitive action be taken very soon. We hope you can finish the project feasibility study and make a final determination on how to proceed this week.

If you should chose to pursue the project through a government-to-government relationship, as proposed in the City of Nome's July 2010 response to the Department of Administration's Request for Information, we urge you to designate the Alaska Housing Finance Corporation (AHFC) as the lead state agency for the project.

The advantages of this approach, which were discussed during your trip, are these:

- It would allow location of the project on Front Street, which through a series of public meetings was identified as the optimal central location preferred by the community.
- The vetted procurement methodology and legal documents used by AHFC in development of the parking garage for the Atwood Building in Anchorage could be used with very minimal modification.
- The State would receive a building custom designed to its specifications without having to bear any construction risk.
- Substantial historic data indicates a building developed in this manner would cost the State of Alaska considerably less than if the State of Alaska built the building itself.

We look forward to working with your administration on this important project.

Respectfully,
CITY OF NOME

Denise Michels
Mayor

cc: Senator Donny Olson
Representative Neal Foster

MEMORANDUM

State of Alaska
Department of Transportation & Public Facilities
Statewide Public Facilities

TO: File

DATE: September 26, 2007

FILE NO:
TELEPHONE NO: 907-269-0869
FAX NO: 907-269-0805

SUBJECT: Nome State Office Building
Project Number TBD

FROM: Matt Desalernos P.E.
Project Manager

The Nome State Office Building was constructed in 1973-74 Problems with the building began almost immediately. A major storm event in the fall of 1974 caused significant damage to the south wall of the building The repairs made after the 1974 storm have been largely ineffective at protecting the building from the infiltration of corrosive salt water spray from the Bering Sea which sits only a few feet away. Over the years significant corrosion to steel framing members and to steel structural members has now developed into a serious problem that must be addressed soon if the building is to remain in service An engineers report dated 2001 indicated that corrosion has reduced the cross section of some columns by as much as 15% Undoubtedly the situation has continued to worsen in the years since that report was written

The structural problems with the building are well documented through a series of engineer's reports dating back to Jan 1994 (see attached summary). Each subsequent report has noted additional and progressive damage to the steel framing and the structural components of the building. Another severe storm event such as the one in that occurred in 1974 could easily cave in the entire south wall of the crawl space, allowing storm waves to wreak havoc within that area of the building causing extensive damage to the building HVAC system. Such damage could easily cause the entire building to be unfit for occupancy for a significant amount of time

The exterior cladding system on those portions of the building not damaged by the 1974 flood has been at a point of failure for some time. A significant amount of the cladding system is made of steel that has now rusted away to the point where it no longer serving as an effective moisture barrier. In addition, the original cladding system relied heavily on a number of caulked joints to maintain the integrity of the moisture barrier. Such systems are difficult or impossible to maintain, particularly in a severe environment. As a result many if not all of the original caulked joints are now at a point of failure. The end result of the rusted out steel panels and failed caulked joints is that the likelihood of additional corrosion damage to interior steel framing members in other areas of the building is very high.

Subsequent storm events in 2004 and 2005 have caused additional damage to the south wall During these events significant flooding resulted in the crawl space The flood water infiltrated the buildings HVAC system, creating the potential for possibly hazardous contaminants (dust and mold) to have been introduced into the buildings ventilation system. While these contaminates have been removed, the probability is high that future storm events will cause more flooding in the crawl space and the cleanup will need to be repeated If the building is to remain in service, it would be prudent and sensible to look at reconfiguring the buildings HVAC system so that mechanical equipment is removed from this area completely or at a minimum housed or sealed in such a way as to be protected from damaging effects of the almost certain future flooding of the crawl space

The mechanical systems in the building are all original equipment and have exceeded their useful life expectancy New boilers and direct digital control systems are needed to replace the existing 30+ year old systems.

Other significant life safety issues need to be corrected if the building is to remain in service Existing corridors were identified in 1994 as not meeting the current fire rating (1hour), it is doubtful that the fire marshal will allow this deficiency to remain if other major upgrades to the building are undertaken Other life safety issues such as adding a fire alarm system, adding code required smoke dampers to the ducting system and adding code compliant emergency exit lighting should also be addressed

The original roof was replaced in 1993, so it is now 14 years old Nome maintenance personnel have not mentioned problems with the roof Typically roofs of this kind can be expected to last 20 yrs or more. Accordingly, a new roof is probably going to be needed in the next 5-10 years.

ROM Cost estimate (not including costs for temporary relocation of current occupants):

Structural Repair and new siding 2 5 million

- Demo old siding including haz mat for asbestos impregnated siding: $250,000
- Demo damaged framing members exposing corroded steel structural members and joints: $150,000
- Repair of corroded structural members $1,000,000
- Replacement of damaged wall framing $500,000
- Install new siding system: $500,000

HVAC System Renovations 2 0 million

Life Safety upgrades: 1 5 million

March 7, 2012

The Honorable Sean Parnell
Office of the Governor
P.O. Box 110001
Juneau, AK 99811-0001

Sent via email

Dear Governor Parnell:

Thank you for engaging with us over the past year regarding the proposed State Office Building in Nome. Also, thank you for including an installment of funding for the project in your proposed budget. We appreciate your efforts and your support for the project.

As you know, the City has been very concerned about the possibility that the facility might be developed at a location other than on Front Street. Based on this concern, in the first half of 2010 the Nome City Council adopted formal resolutions identifying its preferred Front Street site, encouraging the State to solicit a "build-to-suit" proposal for its development.

Our interest in this regard is so great that we decided to back-up those resolutions by partnering with the State to achieve our preferred location. We proposed as much in response to a Department of Administration issued Request for Information (RFI) procurement process as far back as July of 2010.

Since that time, our partnering has included direct discussion with the site owner, including a public City Council work session last fall in which we discussed a general outline of an arrangement for acquisition and development of our preferred site. It was agreed that the Mayor should work with the State and the site owner to develop final terms and to bring the necessary agreements back to the City Council for approval.

Consistent with that direction, I have continued to work with the site owner and expect very soon to have a signed agreement for site acquisition and development to State specifications (subject to City Council approval), to form the basis for negotiation of an agreement with the State. The result would be development precisely to State requirements, with the design and construction components for completion of the project procured through an RFP process.

Under this approach, we would propose to deliver an optimally-located and efficiently acquired new Nome State Office Building, custom-built to the State's scope and specifications, at a cost that reflects the fair market value of the land, as determined by the State, and a facility cost at or below an engineer's estimate, also as determined by the State.

The Nome City Council's identification of the site on Front Street was fully consistent with the State Procurement Code under AS 36.30.850(b)(5), reflecting recognition of the unique nature of particular parcels of "real property or interest in real property." Likewise, that same provision will allow the State to acquire the site and development on a build-to-suit basis directly from the City of Nome.

We understand that the Department of Administration is preparing to issue yet another RFI relating to the State's needs in Nome. If we must, we will respond again; however, we believe it is in the public interest, and will save the State considerable time and money, to deal directly with the City of Nome instead.

We are respectfully requesting to partner in the solution by engaging in a meaningful dialogue that accomplishes development on the City of Nome's selected site, with the State directing the scope and quality of the project, and the City having meaningful participation in the development details and, per the above procurement methodologies and approaches, we will accomplish the goal together with the greatest efficiency and cost certainty.

It is our understanding that AHFC has played a comprehensive facilitation role on the State's behalf on similar projects in the past, combining AHFC's unique project management and financing expertise to benefit the project, and that they have the staff and resources to do so efficiently. Could a partnership between AHFC, acting on the State's behalf, and the City of Nome be considered? If so we would propose a face-to-face meeting with your representative, AHFC and the City.

With the clock winding down on the current Legislative Session, we understand that time is of the essence; however, if we meet no later than March 20, 2012 we still have time to adequately define the project for Legislative approval.

We are prepared to do our part to meet both the State's goals and the City's goals and we respectfully request your consideration of this approach.

Respectfully,
CITY OF NOME

Denise Michels
Mayor

SENT VIA EMAIL & CERTIFIED MAIL

July 15, 2010

Mr. Jeff Jolly, Contracting Officer III
Department of Administration
Division of General Services
550 West 7th Avenue, Suite 1970
Anchorage, AK 99501

Subject: Letter of Interest Regarding the Nome State Office Building

Dear Mr. Jolly,

The City of Nome (the City) is hereby formally responding to the State of Alaska's Request for Information / Letters of Interest in building a new Nome State Office Building. The City is very interested in entering into a binding agreement or contract on a government to government basis with the State of Alaska to design, bid, build and then lease with the option to purchase a new State Office Building in the City of Nome. The City feels that a government to government partnership on this project is in both the best interest of the State and the local community of Nome given the impacts such a project can have on a small community.

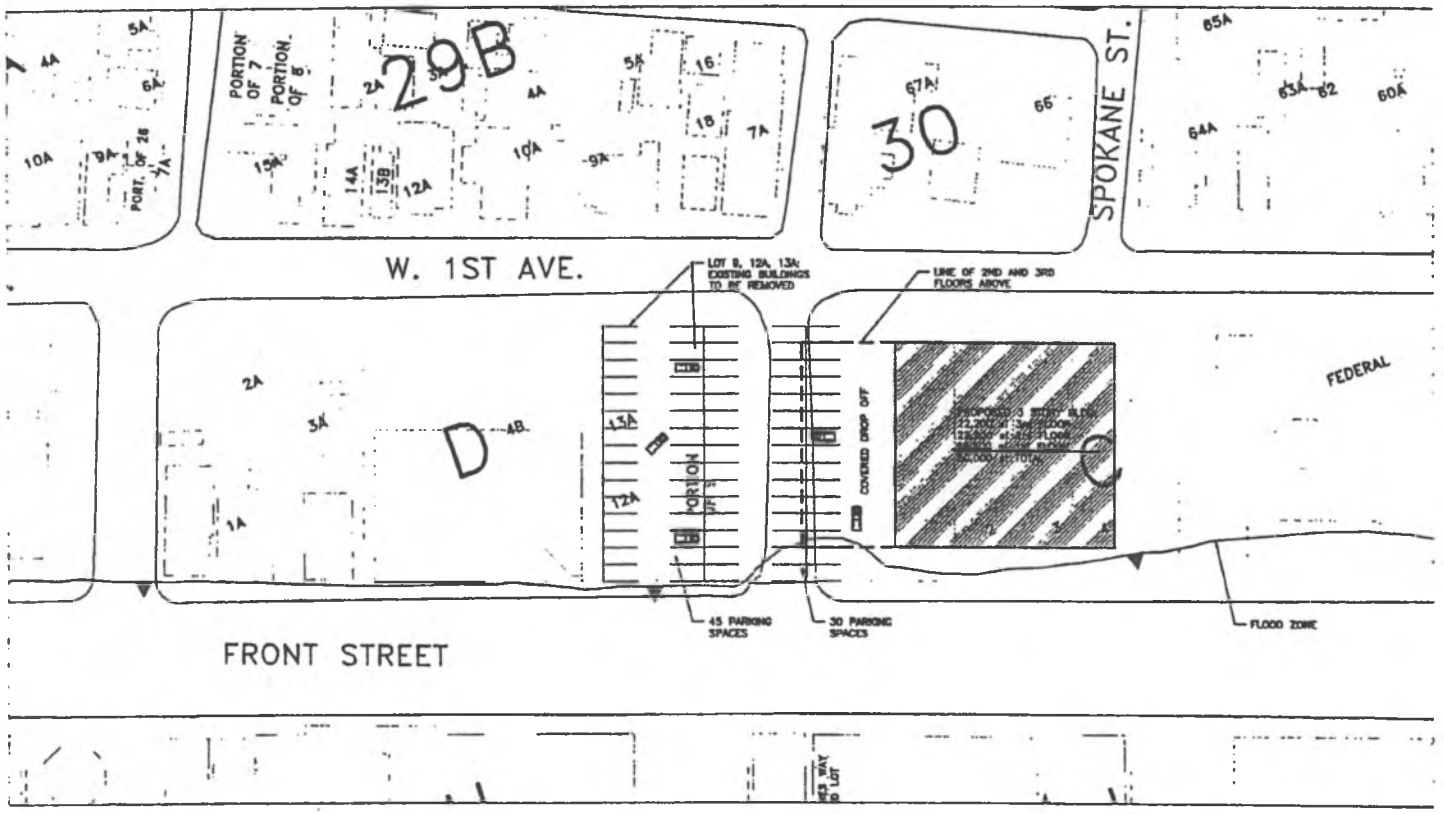
Given the unique nature of this public / private sector partnership, it would be the intent of the City to contract the construction and management of the building to Nanuaq, LLC (a subsidiary of Sitnasuak Native Corporation) who is also the majority land holder in the proposed project. Nanuaq, LLC would act as the Construction Manager / General Contractor on the project pulling together the long term financing, design and construction aspects of the project. In doing so, the up front capital costs of such a project will not be a burden on the State or local residents.

Included in this response and described below are three sample building options that are all located on blocks C and D of Front Street, well within the specified 3.5 mile radius of the post office. The building options all have outlines of the proposed parking spaces and building options as they relate to the flood zone area(s). All of the options listed and shown in Attachments A, B and C would additionally be constructed as Leed Certified buildings, be ADA compliant and could be ready within a 10 month period from the date that the State and City approve the completed construction documents.

Sample Building Options

Option A:
This option is a 3-story 60,000 SF building with a 5,000 SF penthouse for mechanical equipment. The building has a covered drop off area as well as 75 parking spaces. This option requires occupying / vacating Lanes Way, along with occupying lots 9, 12A, and 13A, Blk D for a 45 space parking lot and lots 1-4 of Blk C for the building, covered drop off and 30 space parking lot.

Option B:
This option is a 3-story 49,200 SF building with a 5,000 SF penthouse for mechanical equipment. The building has a covered drop off area as well as 75 parking spaces. This option does not require occupying or vacating Lanes Way. Lots 9, 12A and 13A of Blk D will be occupied for a 45 space parking lot and lots 1-4 of Blk C for the building, covered drop off and 30 space parking lot.



Option C:
This option is a 3-story 59,200 SF building with a 5,000 SF penthouse for mechanical equipment. The building has a covered drop off area as well as 75 parking spaces. This option does not require occupying or vacating Lanes Way. Lots 9, 12A and 13A of Blk D will be occupied for a 45 space parking lot and lots 1-4 of Blk C for the building, covered drop off and 30 space parking lot.

Additionally, the City has attached letters of support from the individual land owners for this project. Should you require additional information or have questions, please contact me at 907.443.6600 or manager@ci.nome.ak.us.

Sincerely,
CITY OF NOME

RE: New Nome State Office Building

Dear Mr. Scheben,

Sitnasuak Native Corporation and its subsidiary, Nanuaq, Inc. are committed to working with the City of Nome in the development of a new State office building on Front Street in Nome, Alaska. The current Front Street property, owned by Sitnasuak Native Corporation, combined with a vacated Lanes Way, and two additional privately owned lots would provide the greatest benefit to Nome and its local businesses. Maintaining State offices on Front Street will ensure the local economy remains in the commercial business section of Nome.

I hope that we can continue to discuss this issue to find a solution that addresses the needs of the State of Alaska and local economy of Nome. You can reach me at your convenience at tsobocienski@snc.org or 907-387-1215.

Thank you for your time.

Respectfully,

Trudy Sobocienski

RE: Letters of Interest – Nome New State Office Building

The Nome Chamber of Commerce would like to voice its support for the public/private partnership between the City of Nome and the Sitnasuak Native Corporation in providing land along Front Street for the proposed new State office building. This win-win situation would combine the Front Street lot owned by Sitnasuak, a vacated Lanes Way and two additional lots along Front Street into one large lot. The new site was be adjacent to the Sitnasuak Office building, a building already occupied by State departments.

Front Street was designed to handle the traffic flow that the proposed new State office building would create. An historic monument outside the Bering Strait Native Corporation office building (Old Federal Building) reads "Front Street has been the business district of Nome since the gold rush". We fully support this public/private partnership.

If you have any question on this matter, feel free to call me at (907) 443 – 3879.

Sincerely,

Mitch Erickson

Request for Information/Letters of Interest - Nome State Office Building

Category: Procurement
Publish Date: 06/25/2010
Event/Deadline Date:

Department: Administration
Location: Statewide
Coastal District: N/A

Body of Notice:

The Department of Administration, Division of General Services is requesting information on available office space in Nome.

The State of Alaska (State) is seeking letters of interest from contractors, developers, or lessors, interested in providing approximately 60,000 square feet of office space located in Nome, Alaska. The State will consider a long term lease (approximately 20 years), a lease/purchase or the purchase of a new state office building.

The State is considering all alternative space where economically advantageous. The State will use the information it receives in response to this advertisement as the basis to develop a cost/benefit analysis and to determine whether to compete this office space requirement, design and construct its own office building in Nome, or take other appropriate action.

The site for the Nome State Office Building shall be located within an approximate three point five (3.5) mile radius of the Nome Post Office and shall be situated within approximately 250 feet of the existing public road and utility system.

If you are interested in providing office space to the State in Nome, Alaska, respond in writing no later than July 16, 2010. Responses must indicate compliance with the items below and include a name, contact information, and building location/address:

- Size of proposed building
- Location of building (must be within an approximate 3.5 mile radius of the Post Office)
- The space shall be ADA compliant
- Number of parking spaces available (to accommodate employees and visitors)
- Facility location in relation to flood zones
- Estimated date building could be ready for State occupancy

This RFI does not obligate the State to issue an RFP, award a contract or pay any costs incurred in the preparation of a response to this RFI. Do not submit price/costs with your response, a Notice of Award for space will not be made as a direct result of this RFI. Contact information will be kept on file for any future related Request for Proposal (RFP) solicitations under AS 36.30, Alaska State Procurement Code.

Written responses may be sent by: US Mail, fax, or email to the following address. Please note the State does not accept responsibility for failed fax or emailed response deliveries.

Senator Bettye Davis

CSSCR 2(STA), 27-LS0031\B - "Proposing amendments to the Uniform Rules of the Alaska State Legislature relating to the presiding officer pro tempore."

SPONSOR STATEMENT

THE PURPOSE OF SENATE CONCURRENT RESOLUTION NO. 2 IS TO AMEND THE UNIFORM RULES TO INCREASE THE DUTIES AND RESPONSIBILITIES OF TEMPORARY PRESIDING OFFICERS AND TO ALLOW MORE LEGISLATORS TO FUNCTION IN LEADERSHIP POSITIONS.

CSSCR 2(STA) creates a permanent third position in leadership for temporary presiding officers who heretofore only presided over the first floor session of a legislature until the chambers were organized and the permanent or regular presiding officers were seated.

Sections 1-3 change the nomenclature in titles to be consistent throughout the Uniform Rules.

Section 4 amends Uniform Rule 4 by establishing that in the absence of both the regular presiding officer (Speaker of the House) and the absence of the majority leader, the presiding officer pro tempore previously elected in Uniform Rule 1(b) serves as the presiding officer pro tempore. The result of the language amending section 4 of SCR 2 is that the presiding officer pro tempore elected at the start of the first session of legislature, in addition to the presiding officer pro tempore's duties set out in Uniform Rule 1(b), will continue for both sessions to serve as a "backup" in the absence of the regular presiding officer (Speaker of the House) and majority leader. Presiding officers pro tempore may also be assigned other duties consistent with the Uniform Rules. As presently provided in Rule 4, the regular presiding officers, majority leaders, and now the presiding officers pro tempore, may relinquish the chair to any member.

MEMORANDUM March 21, 2011

SUBJECT: Sectional Summary to CSSCR 2(STA)
(Work Order No. 27-LS0031\B)

TO: Senator Bettye Davis
Attn: Tom Obermeyer

FROM: Doug Gardner
Director

You requested a sectional summary of SCR 2, a bill relating to proposed amendments to the Uniform Rules of the Alaska State Legislature relating to the presiding officer pro tempore. This summary is current as of the date of this memorandum and the "B" version of the resolution.

As a preliminary matter, a sectional summary of a bill should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents. If you would like an interpretation of the bill as it may apply to a particular set of circumstances, please advise.

Section 1 of the bill amends Uniform Rule 1(a) by replacing "temporary" with the phrase "pro tempore," making the use of the term "pro tempore" consistent throughout Uniform Rule 1.

Section 2 of the bill amends Uniform Rule 1(b) by replacing "temporary" with the phrase "pro tempore" in two places in Uniform Rule 1(b). Again, replacing "temporary" with "pro tempore" achieves consistency throughout Uniform Rule 1 when describing the "pro tempore" officer. This section also replaces "permanent" with the word "regular" when identifying the regular presiding officer in four places in Uniform Rule 1(b). The term "regular" is used to replace reference to the existing "permanent" officer, and provides consistency in describing the "regular" officer throughout Uniform Rule 1.

Section 3 of the bill amends Uniform Rule 1(c) by replacing the phrase "temporary and permanent," with "the presiding officer pro tempore," and "regular," and also replaces "officers" with "officer." Again, the proposed amending language is used to achieve consistency throughout Uniform Rule 1.

Section 4 amends Uniform Rule 4 by establishing that, in the absence of both the regular presiding officer (Speaker of the House) and the absence of the majority leader, the presiding officer pro tempore previously elected in Uniform Rule 1(b) serves as the presiding officer pro tempore. The presiding officer pro tempore elected at the start of the first session of a legislature, in addition to the presiding officer pro tempore's duties set out in Uniform Rule 1(b), will continue for both sessions to serve as a "backup" in the absence of the regular presiding officer (Speaker of the House) and majority leader. Section 4 of the bill does not displace or in any way alter the duties of the Speaker of the House, or the House Majority Leader. Rather, the bill provides a third leadership position called "presiding officer pro tempore" to identify a member elected to this position as a designated alternate in the event that the speaker and the majority leader are absent.

Examples of Duties of the Senate President Pro Tem

(as of February 2011)

Alabama Senate

Rule 21. Messages may be called at any stage of business by the President Pro Tempore or in his/her absence, then the Majority Leader, except while a matter is being considered, while the yeas and nays are being called, or while the ballots are being counted.

Rule 36. During the period between the end of the regular session and the convening of the next regular session, or, in the first year of a quadrennium, between the Organizational Session and the regular session, members may deliver bills to the Secretary of the Senate, which shall be known as "pre-filing." Such bills shall be numbered by the Secretary in the order of receipt and otherwise processed for introduction when the regular session has been convened. Pre-filed bills shall be assigned by the President, or his/her designee, with the concurrence of the President Pro Tempore, or his/her designee, to a standing committee for study and shall be formally referred to the same committee upon commencement of the regular session; provided, however, that no bill shall be pre-filed under this rule after the commencement of the last regular session of the Legislature in any quadrennium and before the organizational session following the general election.

Rule 42. In the absence of the President when the Senate convenes, the President Pro Tempore shall preside except as provided for in Rule 1; however, any other rule to the contrary notwithstanding, when the President of the Senate chooses not to preside, the President Pro Tempore shall preside. Should the President Pro Tempore not be in the chamber or choose not to preside, the Majority Leader shall preside and/or designate in writing a member to preside or until such time as the President or the President Pro Tempore, as the case may be, assumes or reassumes the presidential duties of the Chair; provided, however, that such delegation may not continue to the next legislative day.

Rule 45. When more than one member rises seeking recognition, the Presiding Officer shall decide which member to recognize. The President Pro Tempore shall be recognized first when rising for a Point of Order, as well as for the purpose of taking up House messages, executive messages, and other matters of serious import for the operation of the Senate. The Majority Leader, in the absence of the President Pro Tempore, shall have priority when seeking recognition.

Rule 47. (a) The Senate President Pro Tempore may designate the Majority Leader to perform the duties of the Senate President Pro Tempore in his/her absence, with the exception of signing of bills and resolutions, which only the President and President Pro Tempore are constitutionally allowed to do. The President Pro Tempore shall be an additional voting member of all Senate Standing Committees, superseding the number of members of each standing committee as set out in Rule 48, including Local Legislation No. 1, but excluding all other local legislation committees unless he/she is a member of another local legislation committee by geographical circumstance. The President Pro Tempore may designate in writing to the Secretary of the Senate the name of a member who is not already a member of the committee to represent him or her as a voting member under this rule. Such substitution shall be for a term of not less than one year unless such member so appointed dies or resigns from the Senate, or resigns from the committee so appointed under this rule.
(b) There shall be a Senate Committee on Assignments which shall be composed of the President Pro Tempore, the Lieutenant Governor, the Senate Majority Leader and three additional members appointed by the President Pro Tempore. The Committee on Assignments shall appoint the Chairperson, Vice Chairperson and membership of all Senate Standing Committees and Select Committees. The Committee may reappoint the membership of the committees, and may rename the leadership of the committees. Any such change in committee membership, or the chairman or vice-chairman thereof, shall only be authorized by a majority vote of the membership of the Committee

on Assignments. Actions of this committee shall be reported to the Senate by the President Pro Tempore or in his/her absence by the Senate Majority Leader as such appointments are approved. ...

Rule 54. A bill or resolution carrying an appropriation may be referred to a committee other than the appropriate finance and taxation committee if the subject matter requires such referral in the judgment of the President Pro Tempore. However, such bill or resolution shall also be referred to and reported by the appropriate committee on finance and taxation after being given a second reading.

Rule 68. The Secretary shall provide the Chairperson of each standing committee with a stamp with which to make endorsements on bills. Each standing committee of the Senate shall be furnished a secretary or clerk by the Secretary of the Senate. Office space shall be provided to the President Pro Tempore, the Senate Majority Leader, and to the Chairpersons of standing committees as such space is made available to the Senate.

Rule 82. Any motion relating to creating or filling a vacancy in the office of President Pro Tempore shall be in writing with a day certain for the vote, which day certain may not be less than five legislative days after the motion is filed. Any vote relating to the removal of a member serving as President Pro Tempore shall prevail only with a concurrence of a two-thirds vote of the elected members of the Senate.

Arizona Senate

Rule 2. ... H. The President shall have the right to name any member as President Pro Tempore to serve during the President's absence, which appointment may extend throughout the session unless terminated by the Senate. The President may appoint any other member as temporary President Pro Tempore to serve for a limited period of time in the absence of the President and President Pro Tempore. In the absence or omission of such an appointment, the Senate shall proceed to elect a President Pro Tempore to act during the absence of the President.

Arkansas Senate

Rule 1.02. The President shall have the right to name any member to perform the duties of the Chair, but such substitution shall not extend beyond adjournment; provided, however, that in case of the absence of the President Pro Tempore, he may make such appointment for a period not exceeding ten (10) days, with the approval of the Senate at the time the same is made.

Rule 2.01. (a) At the beginning of every regular session of the General Assembly the Senate shall elect from its members an officer to be styled "President Pro Tempore" of the Senate, who shall perform all the duties of the President of the Senate during his absence, except as otherwise provided in these Rules. At the beginning of each regular session, the President Pro Tempore shall appoint four (4) Assistant President Pro Tempores, one from each of the current Congressional Districts. At least three (3) of the Assistant President Pro Tempores shall be a member of the majority party. The President Pro Tempore shall designate one of the four Assistant President Pro Tempores to perform all the duties of the President Pro Tempore during his or her absence.
(b) Beginning with the 87th General Assembly, the President Pro Tempore shall not serve more than one term in the office nor shall the President Pro Tempore be Chairman of any Class "A", "B" or Class "C" Committee nor the Joint Budget Committee.
(c) The President Pro Tempore shall have the authority to convene the members of the Senate between sessions for the purpose of addressing any matter that affects the business of the full Senate.

Rule 5.01. The Chaplain shall be selected daily by the President Pro Tempore or his designee and shall attend the commencement of that day's session of the Senate and open the same with prayer.

Rule 7.02. ... (c) All vacancies on Class "A", Class "B" and Class "C" Committees of the Senate shall be filled by the President Pro Tempore on the basis of seniority or as provided by law or by other Rules of the Senate. In the temporary absence of the Chairman and the Vice-Chairman, the member next in rank and seniority, and soon, as often as the case may happen, shall act as Chairman. In case of a permanent vacancy in the Chairmanship or Vice-Chairmanship of any committee, the President Pro Tempore shall appoint another Chairman or Vice-Chairman within the first three (3) days of the next regular or special session of the General Assembly.

Rule 10.05. In the absence of a quorum, five (5) members shall be appointed by the President Pro Tempore to compel the attendance of absent members. In all calls of the Senate, the doors shall be closed, the names of the members shall be called by the Secretary of the Senate, and the absentees noted. Those for whom no sufficient excuse is made may, by order of the majority of those present, be sent for by members to be appointed by the President Pro Tempore for that purpose and their attendance secured and retained. The Senate shall determine upon what conditions they may be discharged. Members who voluntarily appear shall, unless the Senate otherwise directs, be immediately admitted to the Senate Chamber, and they shall report the names to the Secretary of the Senate to be entered upon the Journal as present. At any time after the roll call has been completed, the Presiding Officer may entertain a motion to adjourn. If the Senate adjourns, all proceedings under this section shall be vacated.

Rule 20.01. The President Pro Tempore shall appoint all conference committees which 1 shall be ordered from the Senate from time to time, and unless otherwise directed by the Senate, the same number of Senators shall be named to serve on the conference committees as are named to serve on such committees by the House.

California Senate

Rule 2. The President pro Tempore, Assistant President pro Tempore, Vice Chair of the Committee on Rules, or senior member present shall call the Senate to order at the hour stated and, if a quorum is present, shall proceed with the order of business

Rule 7. The President pro Tempore shall take the Chair and call the Senate to order at the hour of the meetings of the Senate. The President pro Tempore is the Presiding Officer of the Senate.

It shall be the particular responsibility of the President pro Tempore to secure the prompt and businesslike disposition of bills and other business before the Senate. He or she shall maintain order in the Senate Chamber and, in case of a disturbance or disorderly conduct outside the bar or in the gallery, he or she shall have the power to order the same cleared.

The President pro Tempore shall serve ex officio as a member of all Senate and joint committees of which he or she is not a regular member, with all of the rights and privileges of that membership except the right to vote. In counting a quorum of any of these committees, the President pro Tempore may not be counted as a member.

The Assistant President pro Tempore or the Vice Chair of the Committee on Rules shall, in the absence of the President pro Tempore, perform the duties, and have all powers and authority, of the President pro Tempore.

Rule 8. The President pro Tempore of the Senate may name a Senator to perform the duties of the Chair in his or her absence. The Senator so named shall be vested, during that time on the floor, with all the powers of the President pro Tempore, and the Senator who performs these duties shall be known as the Assistant President pro Tempore.

In the absence of the President pro Tempore, the Assistant President pro Tempore, or the Vice Chair of the Committee on Rules, any Senator may perform the duties of the Chair.

Rule 10.5. On the first day of each session, the President pro Tempore, members of the Committee on Rules, Secretary of the Senate, and Sergeant at Arms shall be elected by a majority vote of the duly elected and qualified Members of the Senate and shall serve until their successors are elected and qualify. The Committee on Rules shall appoint an Assistant Secretary, a Minute Clerk, a Chaplain, and other employees with such duties as the committee requires.

Rule 11. The Committee on Rules shall consist of the President pro Tempore of the Senate, who shall be the chair of the committee, and four other Members of the Senate to be elected by the Senate. There is a vacancy on the committee in the event a member ceases to be a Member of the Senate or resigns from the Committee on Rules. Any vacancy occurring during a summer, interim study, or final recess, except in the case of the President pro Tempore, shall be filled by the remaining members of the Committee on Rules. A vacancy occurring at any other time shall be filled by election by the Senate.

The Committee on Rules shall appoint all other committees of the Senate and shall designate a chair and vice chair of each committee.

In making committee appointments, the Committee on Rules shall give consideration to seniority, preference, and experience. However, in making committee appointments, the Committee on Rules shall, as far as practicable, give equal representation to all parts of the state.

Rule 38.5. Every amendment proposed must be germane. In order to be germane, an amendment must relate to the same subject as the original bill, resolution, or other question under consideration.

A point of order may be raised that the proposed amendment or an amendment now in the bill, resolution, or other question under consideration is not germane, so long as the question is within control of the body. In that case the President pro Tempore shall decide whether the point of order is well taken. In the absence of the President pro Tempore, the Vice Chair of the Committee on Rules shall decide whether the point of order is well taken. If, in the opinion of the President pro Tempore or the Vice Chair of the Committee on Rules, the point of order is well taken, the question of germaneness shall on his or her motion be referred to the Committee on Rules for determination. The Committee on Rules shall make its determination by the following legislative day. If the point of order is raised and referral is made on the last legislative day preceding a joint recess, the Committee on Rules shall make its determination before adjourning for the recess. ...

Colorado Senate

Rule 1. (a) Unless otherwise ordered, the regular hour of meeting of the Senate shall be 10 o'clock a.m. on Mondays, and 9 o'clock a.m. on other days. The hour of adjournment shall be as ordered.

(b) The President of the Senate, or in the President's absence the President pro tempore, shall take the chair every day promptly at the hour to which the Senate stands adjourned, shall call the Senate to order, shall lead or designate another Senator to lead the members in a recitation of the pledge of allegiance to the flag of the United States of America, and on the ascertainment of a quorum, shall proceed to business.

(c) If at the hour for the convening of the Senate, the President and the President pro tempore shall be absent, the senior Senator present shall call the Senate to order and shall continue to preside, with all the powers, privileges, and duties of the President, until the President or President pro tempore shall appear.

Rule 12. ... (b) At the beginning of each regular session convening after a general election and at such other times as may be necessary, the Senate shall, by a majority vote of all members elected, elect one of its members as President, and another member as President pro tempore, who shall, during the absence or inability of the President to serve, preside over the Senate and exercise and perform all the powers, privileges, and duties of the President. In addition, in the event of the death, resignation, disability, or absence from the state of the President, the President pro tempore, as acting President, shall exercise all the powers and duties of the President when the General Assembly is not in session, but the exercise of such powers and duties by the President pro tempore shall continue only until the General Assembly shall meet or until the disability or absence from the state of the President is removed, whichever shall first occur. In the event of the death, resignation, disability, or absence from the state of the President pro tempore, then the majority floor leader shall succeed to the office of acting President pro tempore.

(c) Neither the President, President pro tempore, nor any acting or temporary presiding officer shall be excused from or prohibited from voting on any question because of so presiding, but shall not vote on appeals from such person's decision.

Connecticut Senate

Rule 6. If the President while presiding, wishes to leave the chair, the president pro tempore shall preside, or, in the absence of the president pro tempore, the president pro tempore's designee shall preside for a period not exceeding one day.

Rule 7. Within one week after appointment, the President Pro Tempore shall nominate a chaplain and up to three

deputy chaplains, and if such nominations are confirmed by the Senate by a majority vote, the candidates so nominated and confirmed shall serve for the 2011 and 2012 sessions.

Rule 9. ... (b) On any day that is not scheduled as a session day, the President Pro Tempore and the Minority Leader, or their designees, may call the Senate into session for purposes of transacting business of a procedural nature by filing with the clerk or the clerk's designee a written instruction to conduct a pro forma Senate session with or without the presence of a senator. Said direction shall include a written motion to adopt the day's Senate agenda and act on all items as indicated and incorporate the items by reference into the Senate journal and Senate transcript. Said motion shall be read into the record and shall have the same force and effect as if the Senate were convened with a presiding officer and senator.

Rule 18. The majority leader, other leaders of the majority party in the Senate and the chairperson and vice chairpersons of each standing and select committee shall be appointed by the president pro tempore of the Senate. Chairpersons and vice chairpersons shall serve at the pleasure of the president pro tempore and the majority leader. The clerks of the standing and select committees and the chairpersons of the subcommittees thereof shall be appointed by the chairpersons of the respective committees with the approval of the president pro tempore of the Senate. The minority leader shall be elected by the members of the minority party in the Senate and the other leaders of the minority party in the Senate shall be appointed by the minority leader. The minority leader shall appoint ranking minority members to each standing and select committee. Such ranking members shall serve at the pleasure of the minority leader. All standing and select committee members shall be appointed by the president pro tempore by the fifth regular session day of the first year of the term, except to fill a vacancy caused by death or incapacity or resignation from the Senate or from a committee; and except that the president pro tempore may appoint any member elected after the fifth regular session day of the first year of the term to any committee within five calendar days after the member takes the oath of office. Not more than nine senators shall be appointed to any standing committee, except that the joint standing committees on Appropriations and Finance, Revenue and Bonding shall consist of not more than eleven senators. The member first named shall be chairperson. The chairperson of each committee may appoint one of the members of the committee as clerk thereof. All Senate leaders, standing committee assignments, chairpersons, vice chairpersons and clerks and subcommittee chairpersons shall serve for both the 2011 and the 2012 sessions.

Delaware Senate

Rule 9. ... C. President Pro Tem's pre-filed list.
(1) A bill or resolution filed with the Secretary may, in the discretion of the President Pro Tem, be placed upon the "President Pro Tem's pre-filed list" and the bill or resolution shall at such time be assigned to a Committee by the President Pro Tem. Copies of the President Pro Tem's pre-filed list shall be distributed to members prior to its reading by the Reading Clerk. The President Pro Tem's pre-filed list shall be read as soon as practicable by the Reading Clerk.

Rule 18. The President Pro Tempore shall appoint all committees; however, the President Pro Tempore, on at the Pro Tem's own initiative or upon order of the Senate, may appoint special or select committees.

Florida Senate

Rule 1.1. A President and a President Pro Tempore shall be elected for a term of two (2) years at the organization session preceding the regular session of each odd-numbered year. They shall take an oath to support the Constitution of the United States and the Constitution of the State of Florida, and for the true and faithful discharge of the duties of office. The Majority Party may, by caucus called by the President, elect a President Designate and a President Pro Tempore Designate, and their names shall be certified to the Secretary. The President may designate a Majority Leader whose name shall be certified to the Secretary. The Minority Party may, by caucus, elect a Minority Leader and a Minority Leader Pro Tempore, and their names shall be certified to the Secretary at the organization session. All elected officers are to hold office until their successors are chosen and qualified or until the expiration of their term, whichever shall occur first.

Rule 1.7. (1) The President may name any Senator to perform the duties of the chair.
(2) If for any reason the President is absent and fails to name a Senator, the President Pro Tempore shall assume the duties of the chair.

(3) If the President resigns, he or she may, prior to resignation, designate a member of his or her party to assume the duties of the chair until a permanent successor is elected.
(4) In the event the chair is vacated permanently, nothing herein shall preclude the Senate from electing a presiding officer. If the chair is vacated permanently during a session of the Legislature, a new presiding officer must be elected within seven (7) days of the vacancy. If the chair is vacated permanently while the Legislature is not in session, the President's designee shall convene the Senate no later than thirty (30) days after the vacancy for the purpose of electing a new presiding officer. The election shall be the Senate's first order of business. In the event that a designation is not made pursuant to subsection (3) of this Rule, the President Pro Tempore shall assume the duties of the designee in convening the Senate to elect a new presiding officer.

Georgia Senate

Rule 1-1.2. (a) A President Pro Tempore shall be elected by the Senate from among its members by a majority of the Senators voting, provided the total vote constitutes a quorum. The President Pro Tempore shall act as President in case of the temporary disability of the President of the Senate. In case of the death, resignation, or permanent disability of the President of the Senate or in the event of the succession of the President of the Senate to the executive power, the President Pro Tempore shall become President of the Senate and shall receive the same compensation and allowances as the Speaker of the House of Representatives. The General Assembly shall provide by law for the method of determining disability as provided in this Paragraph.
(b) Whenever from any cause the President of the Senate shall be absent, the President Pro Tempore shall preside. If both shall be absent, the Secretary of the Senate shall call the Senate to order and shall preside until the election of an acting presiding officer, which said election shall be the first business of the Senate. The acting presiding officer shall preside until the return of one of the first named officers, at which time his or her functions shall cease.
(c) The President of the Senate may, during a day's session, name the President Pro Tempore or the designee of the President to perform the duties of the Chair during any part of that day, but no longer.
(d) While presiding, or in the absence of the President of the Senate, the President Pro Tempore shall have the same powers and duties as the President of the Senate.

Rule 1-1.3. When the President Pro Tempore or any other Senator is presiding, he or she shall not vote unless the Senate shall be equally divided, or unless his or her vote, if given to the minority, will make the division equal. The presiding Senator shall vote in all elections. In all cases where a fixed constitutional vote is required to pass a bill or measure under consideration, and said bill or measure shall lack only one vote to pass the same, the presiding Senator shall vote, and his or her vote shall be counted the same as that of any other member.

Rule 2-1.1. The Committee on Assignments shall be composed of the President Pro Tempore of the Senate, the Majority Leader, the Majority Caucus Chairperson, the Majority Whip, the Majority Caucus Vice-Chair, the Majority Caucus Secretary, and two Senators appointed by the President of the Senate. The President Pro Tempore or his designee shall serve as Chair of the committee. The Chair shall vote only to break a tie. Actions of this committee shall be reported to the Senate by the committee chairperson as necessary. The meetings of this committee shall be closed to the public.

Rule 2-1.2. There shall be a Committee on Administrative Affairs composed of the President of the Senate, the President Pro Tempore, the Majority Leader, the Minority Leader, the Secretary of the Senate, and three members appointed by the President of the Senate. This Committee shall have the responsibility of employing, supervising, disciplining, and setting the compensation of all aides, secretaries and other personnel for the Senate, including the Senate Budget and Evaluation, Senate Press and Senate Research offices. The Committee shall supervise the purchase and allotment of supplies for the Senate. This Committee shall also supervise and approve all out-of-state travel of members of the Senate and staff.

Rule 2-7.3. The Committee of the Whole shall not proceed with the business before it whenever a vote on any question shall disclose the fact that no quorum of the Senate is present. Whenever it is suggested that a quorum is not present, the President Pro Tempore or his or her designee shall satisfy himself or herself of the fact by actual count of the Committee and shall report the same to the Committee; and the President Pro Tempore or his or her designee shall, on his or her own motion, order that the Committee immediately rise, and he or she shall report the fact of the absence of a quorum to the Senate.

Rule 8-1.2. When two or more Senators shall rise at the same time, the President shall name the Senator entitled to proceed; provided, however, the President shall recognize the President Pro Tempore, the Majority Leader, and the Minority Leader, in that order of precedence, should any of them rise to speak, prior to recognizing any other Senator.

Hawaii Senate

Rule 5. (1) In case the President and Vice-President shall be absent at the hour to which the Senate had adjourned, the member of the majority party having the longest tenure in the Senate shall preside until a President pro tempore is chosen. If two or more members are equally qualified to preside, the eldest qualified member shall preside.
(2) The President pro tempore shall be invested with all of the powers and shall perform all the duties of the President. Whenever the President pro tempore is required to sign a bill or other instrument, the Clerk shall attach to such bill or instrument a certificate stating that such President pro tempore was duly elected and is authorized to so sign.

Idaho Senate

Rule 1. (A) The President of the Senate is the Lieutenant Governor and, in his absence or inability to serve, the President Pro Tempore shall perform with like privilege and authority all functions and duties of the President. The President shall vote only when the Senate is equally divided, but this restriction shall apply only to the President and not to the President Pro Tempore or any other Senator who may be in the Chair. The presiding officer shall never cast more than one vote. ...

Rule 3. (A) At the first meeting of the Senate at which a quorum shall be present, the Senate shall proceed to elect a President Pro Tempore and a Secretary and shall adopt temporary rules which, unless otherwise specifically stated, shall be the permanent rules of the preceding session. ...

Rule 6. (A) The President may, in the temporary absence or temporary incapacity of the President Pro Tempore, or with his consent, designate, either verbally or in writing, any Senator to perform the duties of the Chair who shall, during such time, be invested with all powers and privileges of the President except that of signing bills and joint resolutions, but such appointment shall not extend beyond an adjournment.
(B) Succession to Office of President Pro Tempore of the Senate. Upon the death, removal, permanent incapacity or resignation from office of the President Pro Tempore of the Senate, during a legislative session, the Senate shall proceed to elect a new President Pro Tempore. In the event of the President Pro Tempore's death, removal, resignation or permanent incapacity between legislative sessions, the Senate Majority Leader (and in the event of his death, removal, resignation or permanent incapacity to act as interim President Pro Tempore, the Senate Assistant Majority Leader) shall act as interim President Pro Tempore with all of the duties, powers and prerogatives of the office, to serve until the next session of the Legislature, at which time a new President Pro Tempore shall be elected.

Rule 7. ... (C) All employees of the Senate shall be selected by an attache committee, which committee shall be appointed by the Senate leadership, and the employees so selected shall be subject to the approval of the Senate. There shall be paid to the employees of the Senate, for all services rendered by them, such compensation as may be determined by Senate leadership. The President Pro Tempore is authorized to retain such personnel as deemed necessary during the interim.
(D) Subject to the overall supervision of the President Pro Tempore, the Secretary of the Senate shall have general responsibility for all Senate employees, although doorkeepers, watchmen, janitors, pages, and others charged with housekeeping functions, shall be immediately responsible to the Sergeant at Arms.

Rule 19. (A) The following standing committees shall be appointed by the leadership under the direction of the President Pro Tempore, by and with the advice and consent of the Senate; the number of members on each committee shall be fixed in the order of appointment, and such order shall be read into the Journal; provided that the President Pro Tempore shall appoint a majority of each committee and the chairman of each committee from the membership of the political party having a majority in the Senate: ...

Indiana Senate

Rule 1. ... (b) The announced convening time of the Senate may be changed after the Senate has adjourned with the agreement of the President Pro Tempore and the Minority Floor Leader. ...

Rule 3. Every Senator shall be present at all meetings of the Senate unless excused by the President Pro Tempore.

Rule 9. (a) The President Pro Tempore shall preside over the Senate when the President is absent or steps down from the Chair. Whenever presiding over the Senate, the President Pro Tempore shall at any time have the right to designate a member of the Senate to preside in place of the President Pro Tempore. In the absence of the President and the President Pro Tempore, the Majority Leader shall preside over the Senate.
(b) In the case of death or resignation of the President Pro Tempore, the Majority Caucus Chair shall serve as Temporary President Pro Tempore until the election of a President Pro Tempore by the members of the Senate pursuant to subsection (d) of this rule. If the Majority Caucus Chair is unable to serve as Temporary President Pro Tempore, the individuals holding the following positions shall serve as Temporary President Pro Tempore in the order listed:
(1) Majority Floor Leader.
(2) Majority Whip.
(3) Assistant President Pro Tempore.
(4) Assistant Majority Floor Leader. If two (2) individuals hold the position of Assistant Majority Floor Leader, the individual having served in that position the longest shall serve as Temporary President Pro Tempore.
(c) Whenever the Majority Caucus Chair, or any member listed in the order of succession, files with the Ranking Member of the Committee on Rules and Legislative Procedure a written statement suggesting that the President Pro Tempore is unable to perform the duties of the office because of incapacity, the Ranking Member shall convene the Committee within twenty-four (24) hours to decide the question. The President Pro Tempore, who serves as Chair of the Committee, shall not preside over the meeting of the Committee under this rule. However, the President Pro Tempore shall be permitted to vote on the question as a member of the committee. If the Committee finds that the President Pro Tempore is unable to perform the duties of the office, the Majority Caucus Chair shall serve as Temporary President Pro Tempore until the election of an Acting President Pro Tempore by the caucus of the President Pro Tempore pursuant to subsection (e) of this rule. If the Majority Caucus Chair is unable to serve as Temporary President Pro Tempore, the individuals holding the following positions shall serve as Temporary President Pro Tempore, in the order listed:
(1) Majority Floor Leader.
(2) Majority Whip.
(3) Assistant President Pro Tempore.
(4) Assistant Majority Floor Leader. If two (2) individuals hold the position of Assistant Majority Floor Leader, the individual having served in that position the longest shall serve as Temporary President Pro Tempore.
(5) Assistant Caucus Chair. If two (2) individuals hold the position of Assistant Caucus Chair, the individual having served in that position the longest shall serve as Temporary President Pro Tempore.
(6) Assistant Majority Whip.
(d) If the President Pro Tempore dies or resigns when the Senate is in session, the full Senate shall meet within forty-eight (48) hours to elect a new President Pro Tempore. If the President Pro Tempore dies or resigns when the Senate is not in session, the full Senate shall meet within five (5) calendar days to elect a new President Pro Tempore.
(e) If the President Pro Tempore is found unable to perform the duties of the office under subsection (c) when the Senate is in session, the caucus of the President Pro Tempore shall meet within forty-eight (48) hours to elect an Acting President Pro Tempore. If the President Pro Tempore is found unable to perform the duties of the office under subsection (c) when the Senate is not in session, the caucus of the President Pro Tempore shall meet within five (5) calendar days to elect an Acting President Pro Tempore. The full Senate is not required to meet to approve the election of an Acting President Pro Tempore by the caucus.
(f) The Temporary President Pro Tempore and the Acting President Pro Tempore shall exercise all of the duties and powers granted to the President Pro Tempore under the Standing Rules and Orders of the Senate.
(g) The Acting President Pro Tempore shall serve until the Committee on Rules and Legislative Procedure determines that the President Pro Tempore is able to resume the duties of the office. The Committee shall meet within twenty-four (24) hours to determine the question upon receipt of a written statement from the President Pro Tempore that the President Pro Tempore is able to resume the duties of the office. The President Pro Tempore, who

serves as Chair of the Committee, shall not preside over the meeting of the Committee under this Rule. However, the President Pro Tempore shall be permitted to vote on the question as a member of the committee.

Rule 17. ... (d) A motion to adjourn may be made only by the President Pro Tempore or Senator designated by the President Pro Tempore.

Rule 21. The first item of business at the first regular session of a term of the General Assembly shall be the election of the following:
The President Pro Tempore
The Principal Secretary

Rule 23. (a) The President Pro Tempore shall appoint the following:
(1) Majority Floor Leader.
(2) Majority Whip.
(3) Assistant President Pro Tempore.
(4) Assistant Majority Floor Leader(s).
(5) Assistant Majority Whip.
(6) Assistant Majority Caucus Chair(s).
(7) Assistant Majority Secretary of the Senate.
(8) Postmaster of the Senate.
(9) Principal Doorkeeper of the Senate.
(10) Majority Attorney of the Senate.
(11) Deputy Secretary of Operations.
(12) Acting Principal Secretary of the Senate, if the Principal Secretary is removed, suspended, unable to serve, or resigns.
(13) Chief Legal Counsel. ...

Rule 24. The officers and employees of the Senate shall be responsible to and under the direction of the President Pro Tempore or President Pro Tempore-elect.

Rule 32. (a) The President Pro Tempore or President Pro Tempore-elect shall appoint the chairperson and members of each of the standing committees and subcommittees thereto. The appointments to standing committees and subcommittees shall be reported to the Senate by the President Pro Tempore and recorded in the Journal.
(b) The chairpersons and members of the standing committees and subcommittees thereof shall continue for the term of the General Assembly unless removed by the President Pro Tempore or unable to serve.
(c) All vacancies on any committee or subcommittee shall be filled by appointment by the President Pro Tempore or President Pro Tempore-elect of the Senate.

Rule 49. (a) Whenever the President Pro Tempore of the Senate shall assign a filed Senate bill or joint resolution to a standing committee, the assignment shall be made within seven (7) calendar days following the last day for filing Senate bills and joint resolutions and shall cause the bill or joint resolution with the committee assignment to be set forth on a bill filing list. ...

Rule 51. Bills and resolutions pre-filed prior to a session or during recess after organization day may be assigned and released by the President Pro Tempore or President Pro Tempore-elect of the Senate to a standing committee for consideration and will be introduced the first or a subsequent day on which the Senate is convened.

Rule 84. (a) If the Senate dissents in House amendments, the President Pro Tempore may appoint a conference committee, and if the House dissents in Senate amendments, the Speaker may request by the appointment of House conferees, that the President Pro Tempore appoint a conference committee.
(b) The Senate conference committee consists of two Senators, with the first listed Senator being the Senate Chairperson. Advisors may be appointed at any time by the President Pro Tempore.
(c) Senate conferees may be changed or removed at any time by the President Pro Tempore, who shall give written notice to the Office of the Minority Leader of the change.

(d) The appointment of a conference committee and any change of conferees shall be reported by the President Pro Tempore to the Senate and posted in the information center for the Senate committee meetings and on the Senate bulletin boards.

Rule 87. (a) All bills passed by both Houses shall be printed in enrolled form and shall be certified as accurate by the first author of the bill, the President of the Senate, the President Pro Tempore, and the Principal Secretary. One copy of each enrollment shall be furnished to the author at the time of that certification.

Iowa Senate
Rule 53. The senate shall elect, from its membership, a president pro tempore. When the president is absent, the president pro tempore shall preside, except when the chair is filled by temporary appointment by the president or the majority leader.

The president pro tempore, when presiding, shall perform duties as prescribed in rule 52, paragraphs 1 and 2.

The president pro tempore shall serve as a member of the legislative council and as a member of the senate committee on rules and administration.

Kentucky Senate

Rule 26. ... The President may designate any Senator to preside in the absence of both the President and President Pro Tem and to perform all duties of the President, including duties as a member of the Committee on Committees. This designation by the President may be made from time to time or for any period of time as the President may designate.

Rule 27. ... Any decision made by the President shall be subject to appeal to the Senate. During the pendency of any appeal to the Senate from a decision of the chair, the President shall vacate the chair and call the President Pro Tem to preside. When the President Pro Tem is presiding on an appeal to the Senate from a decision of the President, no motion or business shall be in order except the motion on appeal from the decision of the President, and that motion shall not be debatable. Upon an appeal, the question put to the Senate shall be stated as follows: "Shall the decision of the President stand as the judgment of the Senate? An 'Aye' vote shall support the President's ruling, and a 'Nay' vote shall oppose the President's ruling." The ruling of the President shall be sustained unless a majority of the members elected to the Senate oppose the ruling.

Rule 28. The Senate shall elect a President Pro Tem, who shall perform the duties of the President when the President is absent from the Senate, or when empowered by the President to perform the duties of the chair.

Rule 37. There shall be a Committee on Committees composed of the President, the President Pro Tem, the Majority Floor Leader, the Majority Caucus Chairman, the Majority Whip, the Minority Floor Leader, the Minority Caucus Chairman, and the Minority Whip of the Senate.

The majority of this committee shall have full power to act on all matters referred to the committee either by these rules or by action of the Senate. A meeting of the Committee on Committees may be called by the President, the Majority Floor Leader, or a majority of the committee members.

The President shall be Chairman of the Committee on Committees, and in the President's absence, the Majority Floor Leader shall serve as Chairman.

All bills and resolutions bearing the force and effect of law shall, upon their introduction, be automatically referred to the Committee on Committees which shall refer same to the proper committee not later than the third day in which the Senate is in session after the date of introduction.

The Committee on Committees shall have supervision and control over all employees of the Senate whether elected by the Senate or appointed by the Committee on Committees or provided by the Legislative Research Commission, and the Committee on Committees shall see that they perform all of their duties to the Senate and the members thereof. The Committee on Committees is empowered to discharge any or all of said employees and officers except

the constitutional officers of the Senate. The Committee on Committees shall appoint the members of all standing and special committees and shall fill any vacancies thereon.

Louisiana Senate

Rule 3.4. A. The President Pro Tempore shall be elected by the members of the Senate from among the members thereof in the same manner as the President. He shall be elected every four years, and his election shall be the next order of business following election of the President.
B. He may be removed from office in the same manner as the President.
C. A vacancy in the office of President Pro Tempore shall be filled in the same manner as the original election.

Rule 3.5. The President Pro Tempore shall:
(1) In the absence of the President, preside or call a member to preside over the Senate.
(2) Upon the death or resignation of the President, assume the powers, duties, and emoluments of the President until a president is elected as provided in Senate Rule 3.2.
(3) In case of the disability or temporary absence of the President, assume the powers, duties, and responsibilities of the President until the termination of the disability or absence. The Senate shall make appropriate financial recompense to the President Pro Tempore for his service during such time.
(4) Determine the meeting time of the Senate, with concurrence of the Senate.
(5) Perform such other duties as are assigned to him by the President, the Senate, the state constitution or laws, the Joint Rules of the Senate and House, the Senate rules, or otherwise by the Legislature.

Maine Senate

Rule 201. The President shall:
...3. Appoint all committees, a Sergeant-at-Arms, an Assistant Sergeant-at-Arms, a President Pro Tempore to perform the duties of the Chair during the President's absence and chamber staff, unless the Senate otherwise directs. Name a Senator to perform the duties of the President when the President Pro Tempore is absent. The President may rescind these appointments at any time; ...

Rule 202. The President Pro Tempore shall:
1. Preside at the time to which the Senate has adjourned when the President is absent;
2. When the President assumes the office of Governor, exercise the powers and duties of the office of President until the vacancy in the Senate created by the President's succession to the office of Governor is filled, the Senator so elected is seated and a President is elected.

Michigan Senate

Rule 1.104. a) A President pro tempore, Assistant President pro tempore, and Associate President pro tempore shall be elected by a vote of a majority of the Senators elected and serving. They shall be elected at the first session of a quadrennium. All officers elected by the Senate are to hold office until their successors are elected and qualified or until the expiration of their term, whichever occurs first. ...

Minnesota Senate

Rule 14.2. The President may call a member to preside. In the absence of the President, the President Pro Tem, the Chair of the Committee on Rules and Administration, or the Chair's designee, shall preside over the Senate. In the absence of the President and the Chair, the Senate may select a member to perform the duties of the President. Substitutions do not extend beyond adjournment.

Mississippi Senate

Rule 9. There shall be elected a President Pro Tempore in the manner provided in Section 5-1-15, Mississippi Code of 1972. The President Pro Tempore shall not be eligible for appointment as chairman of any standing Senate committee, with the exception of the Rules Committee.

Rule 10. In the election of the President Pro Tempore, the candidate receiving the lowest number of votes shall be dropped after the first ballot and on each succeeding ballot until one (1) candidate receives a majority of all votes cast, and the vote shall be by viva voce vote on roll call of the members.

Rule 11. In the absence of the President, or at the President's request, the President Pro Tempore shall act in the President's stead, assuming the duties and responsibilities herein granted to the President.

Rule 65. (1) There shall be a standing Committee on Rules which shall consist of the President (who shall be a nonvoting member), the President Pro Tempore, and four (4) Senators, each having served at least four (4) years in the Senate, one (1) from each Congressional District of the State as constituted on January 1, 2004, to be selected by the Senators from their respective congressional districts by caucus. The voting precinct of the Senator representing such district shall determine the congressional district caucus in which the Senator shall participate and for which the Senator may hold membership on the Rules Committee. The President Pro Tempore shall serve as chairman of the committee; the vice chairman shall be appointed by the President Pro Tempore from among the Senators on the committee. ...

Missouri Senate

Rule 10. The president pro tem shall be parliamentarian of the senate and may decide all points of order, and in his absence such points of order may be decided by the chairman of the Committee on the Judiciary and Civil and Criminal Jurisprudence, except in either case, the point of order may be referred by the then acting parliamentarian, to the Committee on Parliamentary Procedure for consideration and determination. All rulings on points of order shall be subject to an appeal to the senate and all questions and points of order shall be noted by the secretary with the decision thereon.

Rule 12. All committees listed in Rule 25 shall be appointed by the president pro tem of the senate, except as otherwise provided. The minority party members shall be chosen by the minority party in the manner determined by the minority party caucus.
At the beginning of each session the caucus chairman of the minority party may file with the secretary of the senate a statement setting forth the method by which minority party members are to be appointed as determined by the minority party caucus, but if no such statement is filed, the minority party members shall be appointed to committees by the minority floor leader.

Rule 13. The president pro tem shall be chosen by the senate, and if the president pro tem so chosen is absent, or his office vacant, the senate may proceed to elect an interim president pro tem to hold the office during such absence or other incapacity, at the pleasure of the senate.

Rule 14. The president pro tem shall sign all acts, joint resolutions and addresses. All writs, warrants and subpoenas issued by order of the senate shall be under his or her hand attested by the secretary.

Rule 16. Stenographers and reporters wishing to take down the debates and proceedings of the senate may be admitted by the president pro tem to the reporters' table on the floor of the senate for that purpose, and under such further regulations as the senate may prescribe, but no persons, including members of the senate, other than members of the press, shall be permitted to sit at the press table while the senate is in session.

Rule 17. Subject to the unanimous approval of the president pro tem and the majority and minority floor leaders as to time and duration, live or taped news media broadcasts of sessions of the senate may be made by broadcast media representatives. Reporters and technicians to effectuate such broadcasts or taping may be admitted to the chamber for this purpose, but no apparatus or procedure shall be used which will interfere with the usual procedure of the senate. All recording or broadcasting shall be done from areas reserved or set aside for such activities by news media representatives by the president pro tem.

Rule 25. The president pro tem of the senate shall appoint the following standing committees: ...

Rule 27. The Committee on Parliamentary Procedure shall be composed of three members: the president pro tem, the chairman of the Committee on the Judiciary and Civil and Criminal Jurisprudence, and the minority floor leader.

Rule 31. 1. The standing committees of the senate on Administration, Appropriations, and such other committees as the president pro tem shall designate, may function within the state unless otherwise approved by the president pro tem during the interim between the end of the first regular session and the commencement of the second regular

session, at such times and places as are considered necessary to consider bills and other matters referred to them, to hold hearings, hear testimony, receive evidence, make such studies as are deemed necessary and to perform any other necessary legislative function pertinent to their respective powers and duties.
2. The actual and necessary expenses of each committee functioning during the interim pursuant to the provisions of this rule, and the expenses of its members and the research and clerical personnel assigned to it incurred in attending meetings of the committee or of any subcommittee thereof, shall be paid from the senate contingent fund upon the approval of the chairman of the committee on administration and the president pro tem of the senate.

Montana Senate

Rule S10-30. President, President pro tempore, and other officers. (1) The Senate shall, at the beginning of each regular session, and at other times as may be necessary, elect a Senator as President and a Senator as President pro tempore.
(2) The Senate shall choose its other officers and is the judge of the elections, returns, and qualifications of the Senators.

Rule S10-60. Succession. (1) In case of the absence or disqualification of the President, the President pro tempore of the Senate shall perform the duties of the President until the vacancy is filled or the disability removed.
(2) Whenever the President pro tempore of the Senate is of the opposite political party from that of the President, the following procedure applies:
(a) If the President dies while in office, the members of the Senate have the right to immediately nominate and elect an acting President of the same party.
(b) If the President is absent for 2 or more legislative days or at any time after the 85th legislative day or at any time during special session of the Legislature and wants to appoint an acting President during the President's absence, the President may do so, or the members of the Senate have the right to immediately nominate and elect an acting President of the President's caucus.
(c) An acting President of the Senate has the powers of the President and supersedes the powers of the President pro tempore.

Nevada Senate

Rule 2. President Pro Tem and Other Presiding Officers. 1. Except as otherwise provided in subsection 2:
(a) The President Pro Tem has all the power and shall discharge all the duties of the President during his absence or inability to discharge the duties of his office.
(b) In the absence or inability of the President Pro Tem to discharge the duties of the President's office, the Chair of the Standing Committee on Legislative Operations and Elections shall serve as the presiding officer. In the absence or inability of the Chair, the Vice Chair of the Standing Committee on Legislative Operations and Elections shall serve as the presiding officer. In the absence or inability of the Vice Chair of the Standing Committee on Legislative Operations and Elections, the Senate shall elect one of its members to serve as the presiding officer. A member who is serving as the presiding officer has all the power and shall discharge all the duties of the President until the absence or inability which resulted in the member serving as the presiding officer has ended.
2. When the President Pro Tem or another member is serving as the presiding officer, the President Pro Tem or other member may vote on any question for which he is otherwise qualified to vote as a member. If the Senate is equally divided on the question, the President Pro Tem or other member may not give an additional deciding vote or casting vote pursuant to Senate Standing Rule No. 31 or Section 17 of Article 5 of the Nevada Constitution.

New Jersey Senate

Rule 1:4. At the organization meeting, the Senate shall elect a President, a President, *pro tempore*, and a Secretary, each of whom shall continue in office at the pleasure of the Senate. The votes of 21 or more members are required for the election of each of those officers and for their removal from office. Vacancies in those offices shall be filled at the next meeting of the Senate

Rule 3:9. a. If the President desires to temporarily vacate the Chair during any meeting, the President shall request the President, *pro tempore*, or name another Senator to preside. While presiding the President, *pro tempore*, or other Senator shall exercise the powers and duties of the President.
b. When the President is absent, the President, *pro tempore*, shall possess all the powers and discharge all the duties of the President.

New Mexico Senate

Rule 1-2. The other officers of the senate shall be:
(a) a president pro tempore;
(b) one chaplain;
(c) one chief clerk;
(d) three assistant chief clerks; and
(e) one sergeant-at-arms.

Rule 4-5. The president pro tempore when acting as president, or any member of the senate while acting as presiding officer of the senate, shall be invested with all the powers and duties conferred by these rules upon the president. Whenever the president is not in the chair, the president pro tempore or some member designated by the president pro tempore, or elected by the senate, shall preside.

Rule 9-1. There shall be a committee known as the "committees' committee", which shall be composed of the president pro tempore, the majority floor leader, the majority whip, the minority floor leader, the minority whip and five members of the majority party and one member of the minority party appointed by the president pro tempore, by and with the consent of the senate; provided if a vacancy is created on the committees' committee for any reason, the president pro tempore or the appropriate caucus if the vacancy is that of a party leader, may fill the vacancy. The chairman of the committees' committee shall be the president pro tempore. The vice chairman shall be selected by the members of the committees' committee. ...

Rule 9-13-1. There shall be a committee known as the senate ethics committee, which shall be composed of the president pro tempore, the majority floor leader, the majority whip, the minority floor leader, the minority whip, the majority caucus chairman, the minority caucus chairman and one member of the senate minority party appointed by the senate minority floor leader. The senate ethics committee is designated as the committee to which all matters pertaining to ethics shall be referred. The president pro tempore shall chair the senate ethics committee. ...

Rule 10-1. When the senate resolves itself into the committee of the whole, the president pro tempore, or a senator designated by him or the senate, shall preside.

North Carolina Senate

Rule 4. Convening and presiding in absence of President. – In the absence of the President, the President Pro Tempore or a Senator designated by the President Pro Tempore shall convene or reconvene the Senate and preside, and during such time shall be vested with all powers of the President of the Senate except that of casting a vote in case of a tie when the President Pro Tempore or the designated Presiding Officer has already voted on the question as a Senator. In the event of the absence of the President and President Pro Tempore at any time fixed for the reconvening of the Senate, the Senate shall be called to order by a member designated by the President Pro Tempore, or if no member is designated, by the Deputy President Pro Tempore of the Senate. If no member has been designated and the Deputy President Pro Tempore is also absent, the Senate shall be called to order by the Chair of the Committee on Rules and Operations of the Senate who shall designate some member to act as Presiding Officer.

Rule 9. Parliamentarian to be appointed by the President Pro Tempore. – The President Pro Tempore shall appoint from among the members of the Senate a Parliamentarian. In the absence of the Parliamentarian, the Chair of the Committee on Rules and Operations of the Senate shall act as Parliamentarian.

Rule 17. ... (g) The President Pro Tempore may authorize and provide for the broadcasting of Senate sessions via television or Internet.

Rule 31. Appointment of committees. – The President Pro Tempore of the Senate shall have the exclusive right and authority to appoint the membership of all committees, regular and select, and to appoint committee chairs and vice-chairs and to establish select committees, but this does not exclude the right of the Senate by resolution to establish select committees. Upon the recommendation of the Committee on Rules and Operations of the Senate, the Senate

may alter the name, number, and composition of the standing committees by a majority vote of the Senators present and voting.

Rule 34. (a) ... The President Pro Tempore shall have the exclusive right and authority to determine the total number of members and the number of members of each political party of each committee. No Senator shall hold membership on more than 12 standing committees unless the Committee on Rules and Operations of the Senate provides otherwise. ...
(b) The President Pro Tempore and the Deputy President Pro Tempore may serve as ex officio members of each Senate committee and subcommittee.

Rule 37. Committee of the Whole Senate. ... Only the President Pro Tempore, the Deputy President Pro Tempore, or the Chair of the Committee on Rules and Operations of the Senate may move to resolve into the Committee of the Whole Senate. ... The Chair shall be the President Pro Tempore of the Senate or his designee.

Rule 57. Conference committee. – The President Pro Tempore of the Senate, or in the President Pro Tempore's absence, the Deputy President Pro Tempore, upon motion, shall appoint a conference committee when the Senate fails to concur in amendments or committee substitutes put by the House to a bill originating in the Senate, or when the House of Representatives fails to concur in amendments or committee substitutes put by the Senate to a bill originating in the House. Senate conferees shall include the primary sponsor of the bill. In considering the bill committed to the conferees, only such matters as are germane to the bill shall be considered by the conferees, and the conference report shall deal only with such matters. The matters referred to the conference committee by the conference committee chairs shall go to and be considered by the conferees appointed by the Senate and the House of Representatives. While the bill is in conference committee, the Senate's position shall be determined by a majority of the Senate conferees. Upon agreement by the Senate and House of Representatives, a conference report shall be drafted reflecting the matters considered and agreed upon by the conferees. The conference report shall not be amended.

Rule 60. Pages. – (a) The President Pro Tempore of the Senate shall appoint pages. The President Pro Tempore, or such person as the President Pro Tempore may designate, shall supervise the pages and assign to them their duties. Each page shall be at least 15 years of age or be in the ninth grade at the time of service. ...

Rule 66. President to sign papers. – All addresses and all warrants and subpoenas issued by order of the Senate, shall be signed by the President, the President Pro Tempore, or the Deputy President Pro Tempore. All acts and resolutions shall be signed by the President, the President Pro Tempore, the Deputy President Pro Tempore, or by a Senator designated by the President Pro Tempore to act as Presiding Officer.

Rule 72. Assignment of seats; offices. – (a) The President Pro Tempore of the Senate shall assign seats in the Senate Chamber to the members elected. The President Pro Tempore, when assigning seats, may give preferential consideration to the respective members according to the length of service which each member has rendered in the Senate. No incumbent appointed to fill an unexpired term in the immediate preceding session shall retain the seat if requested by a Senator elected to said session.
(b) Not later than two weeks after the initial committee assignments become final, the President Pro Tempore of the Senate is authorized to make assignments of committee rooms and offices to designated committees, chairs, and members of the Senate. In making such assignments of individual offices, the President Pro Tempore may give preferential consideration to the respective members according to the length of service which each member has rendered in the Senate.

North Dakota Senate

Rule 202. President Pro Tempore. In the absence of the President of the Senate, or during refusal of the President to act, the President Pro Tempore shall exercise all rights and prerogatives of the President. While the Legislative Assembly is in session, the President Pro Tempore shall sign all vouchers for payment of money out of the appropriation for the Legislative Assembly.

Oklahoma Senate

Rule 1-3. INTERPRETATION. When the Senate is in daily session, interpretation of the rules shall be made by the President Pro Tempore or by an elected member of the Senate designated by the President Pro Tempore as Presiding Officer pursuant to Senate Rule 2-4; when a committee is meeting, interpretation of the rules shall be made by the committee chair, or in the chair's absence the vice-chair, of the committee; and at all other times interpretation of the rules shall be made by the President Pro Tempore of the Senate. ...

Rule 2-1. OFFICERS. Officers of the Senate shall be:
The President, who shall be the Lieutenant Governor of the State of Oklahoma;
The President Pro Tempore, who shall be the Presiding Officer of the Senate;
Such other officers as may be designated by the Majority and Minority caucuses; provided, the Majority Floor Leader shall serve as acting President Pro Tempore in the event that the President Pro Tempore vacates the office on a temporary basis. If the President Pro Tempore shall vacate the office on a permanent basis, the Majority Floor Leader shall serve as acting President Pro Tempore until such time as the Senate shall elect a new President Pro Tempore; and
The Secretary.

Rule 2-2. ELECTION. The President Pro Tempore shall be elected by a majority of the members of the Senate when the Senate convenes on the first Tuesday after the first Monday in January of each odd-numbered year. The Secretary of the Senate, who shall not be a member of the Senate, shall be elected by a majority of the members following election of the President Pro Tempore and announcement of the other officers.

Rule 2-4. DUTIES OF THE PRESIDENT PRO TEMPORE.
A. The President Pro Tempore shall be the chief executive officer of the Senate and shall prescribe all policies not otherwise provided by law or by the rules. The President Pro Tempore shall serve as Presiding Officer of the Senate during its daily sessions but may designate another member of the Senate to serve as Presiding Officer at such times as the President Pro Tempore deems appropriate. Wherever the title "Presiding Officer" appears in the rules it shall mean the President Pro Tempore or an elected member of the Senate designated by the President Pro Tempore as Presiding Officer.
B. The President Pro Tempore may refer any matter concerning exercise of the Senate's discretionary powers and duties under Section 30 of Article V of the Oklahoma Constitution to a standing committee or select committee as the President Pro Tempore deems appropriate.
C. The President Pro Tempore shall determine the duties to be performed for the Senate by the Secretary of the Senate and shall designate a Chief of Staff to be responsible for staff duties not assigned to the Secretary of the Senate. The President Pro Tempore or a designee shall be responsible for the issuance of all warrants and vouchers and the maintenance of an accurate account of expenditures by the Senate.

Rule 3-1. EXECUTIVE ASSISTANTS. Each member of the Senate shall be entitled to designate an executive assistant. Executive assistants shall serve at the discretion of, and perform such duties as prescribed by, the individual member of the Senate for whom employed, subject to such policies as may be established by the President Pro Tempore.

Rule 3-2. LEADERSHIP STAFF. The President Pro Tempore shall be entitled to employ a leadership staff. Leadership staff shall serve at the discretion of, for such compensation pursuant to law as may be determined by, and perform such duties as prescribed by, the President Pro Tempore.

Rule 3-3. SERVICE STAFF. The Chief of Staff, subject to the review and supervision of the President Pro Tempore, shall be authorized to employ service staff. Service staff shall be employed according to policies established by the President Pro Tempore and shall receive such compensation pursuant to law as may be determined by, and perform such duties as prescribed by, the President Pro Tempore.

Rule 4-2. MANDATORY AUDIT. The President Pro Tempore shall cause an audit of the Senate's expenditures to be made at least once each fiscal year.

Rule 4-3. PHYSICAL PROPERTY. The President Pro Tempore shall be responsible for the physical property of the Senate and for that portion of the Capitol assigned to the Senate. The Chief of Staff, under direction of the President

Pro Tempore, shall be authorized to perform routine repairs, maintenance and upkeep on such property and facilities.

Rule 4-4. SUPPLIES AND EQUIPMENT. The use of Senate supplies and equipment, including Senate postage meters, is restricted to official Senate business. Questions of compliance shall be resolved by the President Pro Tempore or, at the discretion of the President Pro Tempore, the Rules Committee.

Rule 6-1. PROPOSALS. Any member of the Senate may submit in writing to the President Pro Tempore a proposal for study or consideration by the Senate, subject to such deadlines for interim studies as may be established by the President Pro Tempore.

Rule 7-1. TYPES AND NUMBER. There shall be two types of Senate committees established by the President Pro Tempore, to-wit: standing committees and select committees. The President Pro Tempore shall appoint the chair and vice-chair of each standing committee and of each select committee.

The President Pro Tempore may establish, and appoint the members of, as many ad hoc subcommittees of each standing committee as the President Pro Tempore deems appropriate. There shall be as many select committees as are created by the President Pro Tempore.

Rule 7-2. MEMBERSHIP. Membership on standing committees and on select committees shall be subject to the following:
A. The President Pro Tempore shall appoint, subject to the approval of the Senate, the Majority Caucus members and the chair and vice-chair of each standing committee.
...
D. The President Pro Tempore shall appoint all members of select committees.
E. The President Pro Tempore and Majority Floor Leader shall each be ex officio and voting members of all standing and select Senate committees.

Rule 7-4. DUTIES OF LEGISLATION COMMITTEES. Each legislative committee shall be responsible for the formulation of legislative programs and determination of nonlegislative matters within the jurisdiction prescribed by the President Pro Tempore; shall inquire into the administration and execution of all laws within the same jurisdiction; shall consider such proposals as may be submitted to the committee by the President Pro Tempore; and shall be responsible for the continuing codification of all laws within the prescribed jurisdiction.

Rule 8-1. COMMITTEE OF THE WHOLE. Without prior notice, the Senate may, by motion approved by a majority of the members of the Senate, declare itself a Committee of the Whole, at which time the President Pro Tempore or a member designated by the President Pro Tempore shall chair the Committee of the Whole. Rules applicable to other Senate committees shall be applied to the Committee of the Whole, except those rules relating to notice.

Rule 10-2. GALLERIES AND HALLWAYS. The President Pro Tempore or a designee is empowered to assign seats in the galleries of the Senate and is empowered to order the galleries and hallways of the Senate cleared to preserve order or to ensure the safety of the members of the Senate. ...

Rule 10-5. CALL OF THE SENATE. The Senate may, by majority vote of the members present, operate under Call of the Senate, in which case the President Pro Tempore is empowered to compel the attendance of all members of the Senate and is empowered to confine the members of the Senate to the chamber.

Rule 10-10. SENATE LOUNGE AND ANTEROOMS. The President Pro Tempore may prescribe policies restricting the use of the Senate lounge and any rooms adjoining the lounge or the Senate chamber.

Oregon Senate

Rule 7.01. Election of Presiding Officer; Pro Tempore Presiding Officer. (1) The members of the Senate shall elect by a roll call vote a President of the Senate. A constitutional majority (16) is required to elect a President. (2) The members shall also elect by a roll call vote a President pro tempore of the Senate. A constitutional majority (16) is required to elect a President pro tempore.

Pennsylvania Senate

Rule IV

1. (a) The Senate shall, at the beginning and close of each regular session and at such other times as may be necessary, elect one of its Members President Pro Tempore, who shall perform the duties of the Lieutenant Governor in any case of absence or disability of that officer, and whenever the office of Lieutenant Governor shall be vacant. (Const. Art. 2, Sec. 9)

(b) The vote of a majority of the Members voting shall be required to elect a President Pro Tempore. Except at the beginning and close of each regular session, the Senate shall only elect a President Pro Tempore when the office has become vacant and the vote of the majority of the Members elected shall be required to vacate the office of a seated President Pro Tempore.

Rule V

1. The President Pro Tempore shall:

(a) Appoint the Chairmen, Vice-Chairmen and members of the Standing Committees of the Senate as soon after the election of the President Pro Tempore as possible.

(b) Appoint members to special committees whenever authorized.

(c) Fill all vacancies occurring in standing and special committees.

(d) Refer to the appropriate standing committee, every bill and joint resolution which may be introduced in the Senate or received from the House of Representatives. Such referral shall be at the President Pro Tempore's convenience but not later than the succeeding legislative day.

(e) Appoint and have under the President Pro Tempore's direction such Senate employees as are authorized by law.

(f) Vote last on all questions when occupying the Chair.

2. The President Pro Tempore may:

(a) Name any Senator to preside in the absence of the President, or if both the President and President Pro Tempore are absent the Majority Leader, or the Majority Leader's designee, shall preside. The Majority Leader, during such time, shall be vested with all powers of the President. This authority shall not extend beyond a day's adjournment.

Rule XV

1. There shall be the following permanent Standing committees, the Chairmen, the Vice-Chairmen and members thereof to be appointed by the President Pro Tempore as soon as possible after his election in sessions convening in odd-numbered years or such other times as may be necessary. The composition of each Standing Committee shall reasonably reflect the party composition of the Senate membership. ...

2. (a) The President Pro Tempore shall be an ex-officio voting Member of all standing committees and subcommittees and not included in the number of committee members herein provided except that the President Pro Tempore shall not be an ex-officio Member of the Committee on Ethics and Official Conduct. ...

Rule XX

1. The President Pro Tempore shall appoint three Senators to comprise a Committee of Conference. Two shall be from the majority party and one from the minority party. ...

Rhode Island Senate

Rule 1.6. "President Pro Tempore" is a member of the senate elected to that position, who presides over the senate in the absence of the president of the senate.

South Carolina Senate

Rule 1. ... B. At various times as he or she deems necessary during the session, the President *Pro Tempore* is authorized to make a motion to provide for the convening of the Senate in statewide session for the exclusive purpose of the introduction and referral of bills, receipt of communications and committee reports and the reading and passage of local legislation to which all members of an affected delegation have given their consent for the bill to be taken up, and to adjourn immediately thereafter. Any such motion shall provide the specific dates during which the motion shall apply and shall provide that the Senate must convene at 11:00 a.m. and adjourn not later than 12:30 p.m. on each such day and such motion must be made at least two (2) days prior to the beginning of the period for which it applies.

C. The President *Pro Tempore* or his designee, when, in his opinion, it is impractical or dangerous to hold a regularly scheduled session(s) of the Senate, may declare the body adjourned to some other time. Such actions are to be taken only in times of great emergency including, but not limited to, natural disasters, severe weather, and acts of God.

Rule 7. A. If a Senator in speaking, or otherwise, violates the Rules of the Senate, the presiding officer shall, or any member may, by raising a point of order, call him to order; and when a member is called to order by the President or under a point of order, he or she shall sit down and may not proceed without leave of the Senate, unless the President takes the point of order under advisement. The President may call for the Sense of the Senate on any question of order. Every question of order must be decided by the President, without debate, and Senators shall have the right to appeal the decisions of the President to the full Senate. When the decision of the President is appealed, the President *Pro Tempore* or his or her designee shall preside and the President shall retire from the chamber during the pendency of the appeal and the Senate's debate and action on the motion to appeal. The question before the Senate shall be "Shall the ruling of the President be overridden?" and after not more than thirty (30) minutes, fifteen (15) minutes for and fifteen (15) minutes against, of debate it shall be decided by a majority vote of the membership.
...

South Dakota Senate

Rule S1-1. President pro tempore presides in absence of president. If the president is absent or unable to serve, the president pro tempore shall act as presiding officer of the Senate. The acts of the president pro tempore have the same validity as those of the president.

Rule S2-2. Seating assignments. The president pro tempore of the Senate, with the advice of the minority leader, shall make the seating assignments for the floor of the Senate.

Rule S3-1. Elective officers. The officers of the Senate are a president pro tempore of the Senate, a secretary of the Senate and such other officers necessary to conduct the business of the Senate, who shall be formally elected by a majority vote of the members-elect of the Senate. Employees necessary to conduct the business of the Senate shall be appointed by the president pro tempore and their appointment shall be announced at the opening of the session.

Rule S4-2. Chairs of standing committees. The president pro tempore of the Senate shall serve as the chair of the legislative procedure committee. For other committees, the member of a committee announced first is the chair. In the absence of the chair, the member announced next shall act as chair, and so on as often as necessary.

Rule S4-3. Referral of bills to committee. Upon the first reading of a bill, the president pro tempore of the Senate or his designee shall assign that bill to an appropriate committee for hearing.

Tennessee Senate

Rule 3. SPEAKER PRO TEMPORE. The Speaker of the Senate shall appoint a Speaker pro tempore who shall perform such duties as assigned by the Speaker. The Speaker pro tempore shall serve at the pleasure of the Speaker. The Speaker pro tempore shall preside during the absence of the Speaker, except that the Speaker shall have the right to name any member to perform the duties of the Chair for a period not to extend beyond an adjournment. In the absence of the Speaker and the Speaker pro tempore, it shall be the duty of the Clerk to call the Senate to order and call the roll for the election of a temporary speaker. In the event of an interim vacancy in the office of Speaker, through death or resignation, or in the event of disability, the Speaker pro tempore shall conduct the necessary business of the Senate only until such time as an election can be held in the Senate to fill the vacancy.

Texas Senate

Rule 1.02. The Senate shall, at the beginning and close of each session, and at such other times as may be necessary, elect one of its members President Pro Tempore, who shall perform the duties of Lieutenant Governor in any case of absence or disability of the Lieutenant Governor.

Rule 1.03. If the office of Lieutenant Governor becomes vacant, the President Pro Tempore of the Senate shall convene the Committee of the Whole Senate within 30 days after the vacancy occurs. The Committee of the Whole Senate shall elect one of its members to perform the duties of the Lieutenant Governor in addition to the duties of

Senator until the next general election. If the Senator so elected ceases to be a Senator before the election of a new Lieutenant Governor, another Senator shall be elected in the same manner to perform the duties of the Lieutenant Governor until the next general election. Until the Committee of the Whole Senate elects one of its members for this purpose, the President Pro Tempore shall perform the duties of the Lieutenant Governor.

Utah Senate

Rule SR-20.03. The President may call a Senator to the chair as President Pro Tempore and that Senator has the power of the President while conducting. This substitution does not extend beyond adjournment.

Vermont Senate

Rule 6. As soon as may be after the convening of each biennial session, the President of the Senate, the President pro tempore, and one senator elected by the Senate shall comprise the committee to be known as the Committee on Committees. The Committee on Committees shall appoint the members, on the part of the Senate, of the permanent joint standing committee on Joint Rules, and all committees of the Senate, and all other committees requiring appointment of members of the Senate, unless otherwise provided by statute; but any appointment so made may, on motion of a senator, be overruled by the Senate; in which case the Senate shall, on nomination of a senator, immediately fill the vacancy. Any motion to overrule the appointments of the Committee on Committees must be made not later than the next legislative day following the announcement of the committee appointments to the Senate. ...

Rule *17.* The President pro tempore shall perform all the duties of the President during the latter's absence.

Rule 36. The Orders of the Day shall then be taken up. At the request of the President pro tempore, unless a majority of the Senate objects, bills or resolutions may be taken up out of their normal sequence. ...

Virginia Senate

Rule 2. (a). There shall be elected by the Senate, on the first day of the session following the election of the Senate, a President pro tempore who shall serve for a term of four years and be a senior member in the Senate.
(b). In the event of the absence, disability or vacancy in the office of the Lieutenant Governor, the President pro tempore shall carry out the duties of the Lieutenant Governor as presiding officer. Further, the President pro tempore shall be the Chairman of the Commission on Interstate Cooperation of the Senate.
(c). The President pro tempore shall have the right to name in open session, or if he is absent, in writing, a Senator to perform the duties of the presiding officer, but such substitution shall not extend beyond an adjournment of a daily session, except by unanimous consent of those present.
(d). In the event of a vacancy in the office of the Lieutenant Governor, or whenever the powers and duties of the Governor shall devolve upon the Lieutenant Governor, the President pro tempore shall have the right to name, in writing, a Senator to perform the duties of the presiding officer during his absence; and the Senator so named shall have the right to name, in open session, or in writing, if he is absent, a Senator to perform the duties of the presiding officer, but such substitution shall not extend beyond adjournment of a daily session, except by unanimous consent of those present.

Rule 7. The Senate shall elect 11 Pages and five Pages shall be appointed by the following: one by the Lieutenant Governor; one by the President pro tempore; one by the chairman of the caucus of the majority party; one by the majority leader; and one by the minority leader. The Pages shall be no less than 13 and no more than 14 years of age at the time of election or appointment, shall be residents of the Commonwealth of Virginia, and shall be elected or appointed for a term of one year. No Page shall be eligible for reelection. Any such Page so elected or appointed may be suspended or dismissed for cause by the Clerk of the Senate.

Rule 19. (a). A Committee on Rules, which shall be in addition to the foregoing standing Committees, 17 Senators, consisting of the standing Committee Chairs; the President pro tempore, if the person is not a Chair; the Majority Leader, if the person is not a Chair; the Minority Leader; and members to comprise the 17. ....

Rule 50. The Senate may go into the Committee of the Whole only upon the affirmative vote of a majority of the members elected. When the Senate shall resolve itself into the Committee of the Whole, the President shall leave the

Chair and the President pro tempore shall preside in the Committee. If the President pro tempore is absent from the Senate, then the Senate shall elect a chairman to preside therein. ...

Washington Senate

Rule 2. 1. Upon the organization of the senate the members shall elect one of their number as president pro tempore who shall have all the powers and authority and who shall discharge all the duties of lieutenant governor acting as president during the lieutenant governor's absence. The senate shall also elect a vice-president pro tempore who will serve in the absence of the lieutenant governor and the president pro tempore.
2. In the absence of the president pro tempore, and vice president pro tempore, or with their consent, the president shall have the right to name any senator to perform the duties of the chair, but such substitution shall not extend beyond an adjournment, nor authorize the senator so substituted to sign any documents requiring the signature of the president.

West Virginia Senate

Rule 4. The President of the Senate shall appoint a President *pro tempore,* who, during the absence of the President, shall preside and perform all the duties of the President.

Wisconsin Senate

Rule 1. (1) The senate shall elect, by roll call vote, one of its members to serve as president and one to serve as president pro tempore. The president and president pro tempore shall serve for the biennial session unless separated by death, resignation, or removal by the adoption of a resolution by a majority of the current membership. ...

Rule 2. (1) When the president is absent or unable to preside over the senate sitting in session, the president pro tempore may preside and assume all of the duties enumerated under rule 4. The substitution does not extend beyond adjournment and ends upon the president's return or the election of a new president. ...

Rule 3. Duties of president pro tempore and majority leader. When the president is separated by death, resignation, or removal from office, or is otherwise unable to serve, all of the powers and duties of the president not enumerated in rule 4 devolve upon the president pro tempore until a president is elected. When both the president and president pro tempore are separated by death, resignation, or removal from office, or are otherwise unable to serve, all of the powers and duties of the president not enumerated under rule 4 devolve upon the majority leader until a president is elected

Legislative Leaders

Leadership positions. At the beginning of each legislative session, decisions are made concerning leadership positions. Among the first is the determination of which titles will be used and the number of individuals who may hold each position. The most common leadership titles are president of the Senate, speaker of the House, majority leader and minority leader. However, there usually are no limits to the names and numbers of leadership positions that may exist, and table 99-2.13 illustrates the variety used by legislative chambers.

Selection and terms. Once titles and the number of individuals to hold each position have been set, the actual selection of legislative leaders commences. It is one of the key steps taken to organize a legislative chamber, and tables 99-2.14 through 99-2.18 illustrate how state legislatures choose their leaders.

The presiding officer—that is, the president of the Senate or speaker of the House—typically is elected by a vote of the full body. However, in the states shown below, the person who is elected by the people to serve as lieutenant governor acts as the president of the Senate.

Alabama
Arkansas
California
Connecticut
Delaware
Georgia
Idaho
Indiana
Michigan
Mississippi
Missouri
Nebraska
Nevada
New Mexico
New York
North Carolina
North Dakota
Oklahoma
Pennsylvania
Rhode Island
South Carolina
South Dakota
Texas
Vermont
Virginia
Washington

The president pro tem selects other caucus leaders in three states. In Alabama, the president pro tem appoints the Senate majority leader and assistant majority leader. The Senate assistant majority leader and the majority whip are appointed by this leader in Connecticut. In the Indiana Senate, the president pro tem chooses the majority leader, assistant majority leader and majority whip.

The majority leader appoints other caucus leaders in the Connecticut Senate and House, Florida Senate and House, Iowa Senate, Minnesota Senate, Oregon Senate and Rhode Island Senate. The specific leaders who are selected by the majority leader are:

Connecticut Senate	Assistant majority leader, majority whip
Connecticut House	Deputy majority leader
Florida Senate	Majority whip
Florida House	Majority floor leader, majority caucus chair
Iowa Senate	Majority caucus secretary
Minnesota Senate	Majority whip, majority caucus secretary
Oregon Senate	Assistant majority leader, majority whip
Rhode Island Senate	Majority whip

In the Delaware House, the speaker pro tem is the most senior member of the majority caucus. The chairman of the District of Columbia Council is elected by the citizens of Washington, D.C.

In most legislatures, there is no limit to the number of years that an individual may hold a leadership position. However, 24 chambers reported that some of their leadership positions have term limits—either official or unwritten. Table 99-2.19 highlights these limits.

Roles and responsibilities. The roles and responsibilities of legislative leaders vary considerably among the states. Shown below are brief synopses of the duties typically associated with selected leadership positions. Tables 99-2.20 through 99-2.36 provide more detailed information on leaders' duties.

President of the Senate. The president is the principal leader of the Senate. The president typically will 1) preside over the daily sessions of the Senate, 2) preserve order in the chamber, 3) state parliamentary motions, 4) rule on parliamentary questions, 5) appoint committee chairs and members, 6) refer bills to committee, 7) sign legislation, writs and warrants, and 8) act as the official spokesperson for the chamber. In about 26 states, the lieutenant governor serves as the president of the Senate, and many of these duties often are assumed by the president pro tem.

President pro tem of the Senate. The primary roles assigned to the president pro tem are to 1) preside over the Senate in the president's absence, 2) exercise the powers and duties of the president in his or her absence, and 3) assume other duties as assigned by the president. Sometimes, this is an honorary position, with few substantive duties assigned. In states where the lieutenant governor presides over the Senate, the president pro tem often assumes duties associated with a president.

Speaker of the House or Assembly. The speaker is the principal leader of the House or Assembly. The speaker typically will 1) preside over the daily sessions of the House or Assembly, 2) preserve order in the chamber, 3) state parliamentary motions, 4) rule on parliamentary questions, 5) appoint committee chairs and members, 6) refer bills to committee, 7) sign legislation, writs and warrants, and 8) act as the official spokesperson for the chamber.

Speaker pro tem. The primary roles assigned to the speaker pro tem are to 1) preside over the House or Assembly in the speaker's absence, 2) exercise the powers and duties of the speaker in his or her absence, and 3) assume other duties as assigned by the speaker. In some states, this is an honorary position, with few substantive duties assigned.

Majority leader or majority floor leader. The primary functions of a majority leader usually relate to floor duties. The majority leader 1) is the lead speaker for the majority party caucus during floor debates, 2) develops the calendar, and 3) assists the president or speaker with program development, policy formation and policy decisions.

Majority whip. The duties of the majority whip are to 1) assist the floor leader, 2) ensure member attendance, 3) count votes, and 4) generally communicate the majority position on issues.

Majority caucus chair. The majority caucus chair generally 1) develops the majority caucus agenda with other principal leaders, 2) presides over the majority caucus meetings, and 3) assists with the development of policy.

Majority caucus secretary. The main responsibility of the majority caucus secretary is to keep records of caucus meetings.

Minority leader or minority floor leader. The minority leader is the principal leader of the minority party caucus. The minority leader is responsible for 1) developing the minority position, 2) negotiating with the majority party, 3) directing minority caucus activities on the chamber floor, and 4) leading floor debate for the minority caucus.

Minority Whip. The major responsibilities for the minority whip are to 1) assist the minority leader on the chamber floor, 2) count votes, and 3) ensure attendance of minority party members.

Minority caucus chair. The minority caucus chair 1) presides over caucus meetings and 2) assists the minority leader with policy development.

Minority caucus secretary. The main responsibility of the minority caucus secretary is to keep records of caucus meetings.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SCR 24
2012 LEGISLATIVE SESSION

Analysis

SCR 24 establishes the Alaska Legislative Celebration Commission to organize events to commemorate the 100th anniversary of the first convening of the legislative branch of government in Alaska. The Commission will be comprised of two members of the House of Representatives, to be appointed by the Speaker of the House and two members of the Senate, to be appointed by the Senate President . There will also be three public members which will be jointly appointed by the Presiding Officers. The Commission will be staffed by existing staff to the appointed members and by staff of the Legislative Affairs Agency. Staffing costs will be absorbed within existing budgets. It is anticipated that there will be eight meetings in total. Six of these meetings are anticipated to be held in Anchorage during the summer months and two will be held in Juneau during the spring months. Travel and per diem costs for the members of the Commission and their staff is estimated to be 43.3 (detailed below), with the majority of the travel taking place in FY13 and a small FY14 travel budget for purposes of this fiscal note. A services budget of 70.0 - split between two fiscal years for event planning, catering, space and equipment rental, and design of a commemorative coin is included in this fiscal note, along with a commodities budget of 40.0, for supplies, flowers, decorations, etc. Costs to teleconference meetings or print materials will be absorbed within the existing Legislative Affairs Agency budget.

SENATE CONCURRENT RESOLUTION NO. 24

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE RULES COMMITTEE BY REQUEST

Introduced: 3/12/12
Referred: Finance

A RESOLUTION

Establishing the Alaska Legislative Celebration Commission to organize events to commemorate the 100th anniversary of the first convening of the legislative branch of government in Alaska.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the United States of America acquired the Alaska territory from Russia by the Treaty of Cession of March 30, 1867, for $7,200,000; and

WHEREAS local government was not officially instituted in the Alaska territory until 1884, when the United States Congress passed the Organic Act, "An act providing for a civil government for Alaska"; and

WHEREAS the Organic Act redesignated Alaska as an incorporated but unorganized territory renamed the District of Alaska and provided for a governor, a district court of general jurisdiction, a district judge, and court officials, all appointed by the President of the United States; and

WHEREAS, from 1884 to 1912, several efforts that were made to petition the United States Congress for the institution of more representative government in the District of Alaska

and, specifically, for an elected legislative body, failed or were largely ignored; and

WHEREAS, following substantial grassroots efforts and the promotional work of James Wickersham, the United States Congress approved the Second Organic Act on August 24, 1912, making Alaska a territory of the United States and providing for an elected legislative body vested with very limited powers; and

WHEREAS, following local elections in November 1912, the first legislative body of the Territory of Alaska, consisting of eight senators and 16 representatives, was convened on March 3, 1913, in Juneau, Alaska; and

WHEREAS March 3, 2013, will mark the 100th anniversary of the first convening of Alaska's legislative branch of government; and

WHEREAS it is fitting that the occasion of the 100th anniversary of the first convening of Alaska's legislative branch be commensurate with Alaska's magnificent heritage and celebrate the opportunities that 100 years of representative government have brought to the state and its people; and

WHEREAS the organization of a statewide celebration to commemorate the occasion properly will require advance research, planning, and other preparation;

BE IT RESOLVED that the Alaska State legislature establishes the Alaska Legislative Celebration Commission, which may meet during the interim between legislative sessions, to research, plan, and prepare for the 100th anniversary of the first convening of the legislative branch of government in Alaska; and be it

FURTHER RESOLVED that the commission shall consist of two members from the house of representatives appointed by the speaker of the house of representatives, two members from the senate appointed by the president of the senate, and three public members appointed jointly by the speaker of the house of representatives and the president of the senate; and be it

FURTHER RESOLVED that if a member of the commission resigns or is otherwise unable to perform the duties of a member of the commission or if a legislative member of the commission is no longer a member of the legislative body from which the member was appointed, the officer responsible for appointing the member shall appoint a replacement member as soon as is practicable; and be it

FURTHER RESOLVED that a majority of the members of the commission

constitutes a quorum; the commission may approve measures, make recommendations, and take other action based on a vote of a majority of the quorum that is present; the members shall elect from among the membership a chair and other officers as may be required to fulfill the duties of the commission; and be it

FURTHER RESOLVED that members of the commission serve without compensation but are entitled to per diem and travel expenses authorized for boards and commissions in statute; and be it

FURTHER RESOLVED that the staff of the legislative members of the commission and staff of the Legislative Affairs Agency shall serve as staff for the commission; and be it

FURTHER RESOLVED that the commission shall plan and administer activities leading up to and relating to the official commemoration of the 100th anniversary of the first convening of the legislative branch of government in Alaska; and be it

FURTHER RESOLVED that the commission may engage in joint projects with municipalities, civic organizations, and other entities to help identify ways to commemorate and celebrate the 100th anniversary of the first convening of the legislative branch, and that the commission shall be dissolved not later than March 3, 2014.

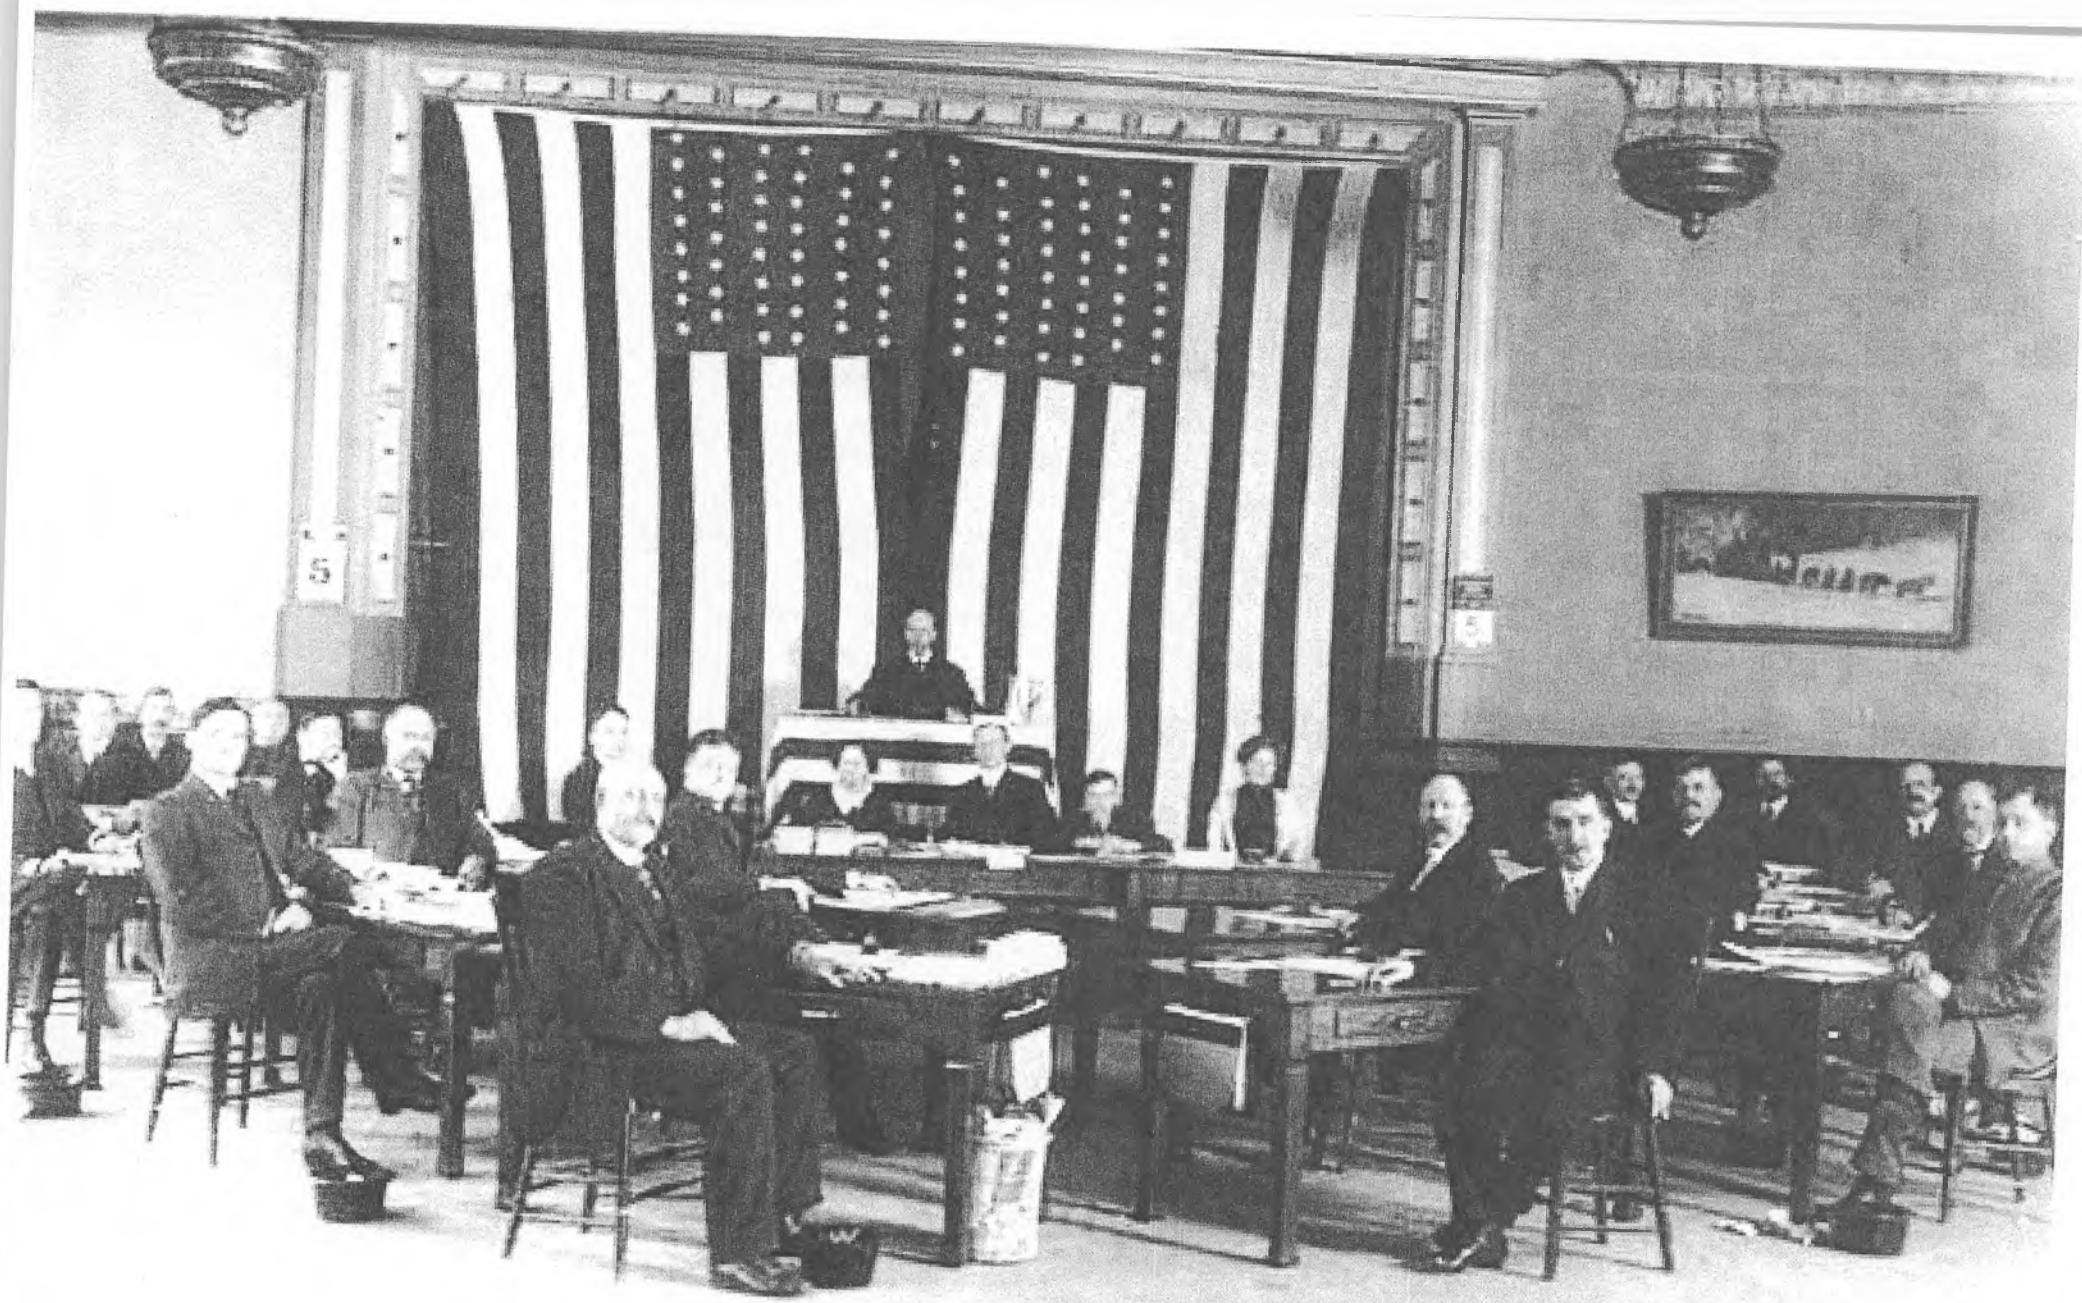
SENATOR JOHNNY ELLIS
RULES COMMITTEE CHAIR

SENATE CONCURRENT RESOLUTION 24
SPONSOR STATEMENT

Senate Concurrent Resolution 24 begins the process of recognizing 100 years of government by the people, as embodied by the establishment and convening of an elected legislature in Alaska beginning on March 3, 1913.



Before looking at 100-years of accomplishments of Alaska's Legislature, please take a moment to consider how elected representation in Alaska was achieved in the first place. The journey was a long one.

Today many people take for granted that we have the right of representation, of appeal, of petition, etc. No such rights existed in legal practice during pre-territorial days. This was by and large a lawless land from Alaska's purchase in 1867 until 1884, when the Organic Act passed Congress, and even then Alaska was in the hands of executives; territorial governors were appointed by the President of the United States.

At least 25 measures for representation were presented to Congress, none ever reached a vote in either house before 1912. The rational for denying Alaskans the rights of representation and appeal were firstly that its population was too small, and secondly that it would be too much of a financial drain on the federal treasury. However, every other territory in U.S. history had a similarly sized population at the time of its induction as a territory; and by 1916, then Governor John Strong estimated that Alaska had added approximately $500,000,000 to the national wealth since its purchase in 1867, a figure that exceeded national trade with China and the Philippines.

Regardless, it was only after 46 years of exhaustive efforts appealing to the President and Congress that Alaska was finally afforded the right to establish and elect its own Legislature. The First Territorial Legislature was quick to pass ground-breaking laws such as women's suffrage, compulsory school ages, required registration of lobbyists, 8-hour work days, and the establishment the Pioneers' Homes. Thereafter the Alaska Legislature continued to have a colorful history.

The small Commission established by SCR 24 would set out to examine that history carefully over the coming months and present to the Legislature in 2013 a schedule of events commensurate of 100 years of elected service to Alaska and its people. Thank you for your consideration of this timely legislation.

Territorial Organic Act

(37 Stat. 512)
August 24, 1912
ch. 387

Editor's notes. — The sections of the Territorial Organic Act as set out below correspond to the sections formerly set out in the United States Code, 48 U.S.C. 21 et seq., but the numbering system was not the same as that in the United States Code. The following table provides a cross reference from the section number in this volume to the former section in the United States Code. All United States Code sections cited below have either been omitted or repealed.

Act Sec.	USC	Act Sec.	USC
1	48 U.S.C. 21	10	48 U.S.C. 81
2	48 U.S.C. 22	11	48 U.S.C. 82, 83
3	48 U.S.C. 23, 24, 80	12	48 U.S.C. 84
4	48 U.S.C. 67-72	13	48 U.S.C. 85
5	48 U.S.C. 73	14	48 U.S.C. 86
6	48 U.S.C. 74	15	48 U.S.C. 87
7	48 U.S.C. 75	16	48 U.S.C. 88, 89
8	48 U.S.C. 76	17	48 U.S.C. 145
9	48 U.S.C. 44, 45, 77-79	20	48 U.S.C. 90

Collateral references. — 81A C.J.S., States, § 5; 86 C.J.S., Territories, § 4.

§ **1. Territory of Alaska organized.** That the Territory ceded to the United States by Russia by the treaty of March thirtieth, eighteen hundred and sixty-seven, and known as Alaska, shall be and constitute the Territory of Alaska under the laws of the United States, the government of which shall be organized and administered as provided by said laws.

§ **2. Capital and seat of government.** That the capital of the Territory of Alaska shall be at the city of Juneau, Alaska, and the seat of government shall be maintained there.

§ **3. Constitution and laws of the United States extended; limitation on legislative powers.** That the Constitution of the United States, and all the laws thereof which are not locally inapplicable, shall have the same force and effect within the said Territory as elsewhere in the United States; that all the laws of the United States heretofore passed establishing the executive and judicial departments in Alaska shall continue in full force and effect until amended or repealed by Act of Congress; that except as herein provided all laws now in force in Alaska shall continue in full force and effect until altered, amended, or repealed by Congress or by the Legislature: *Provided,* That the authority herein granted to the Legislature to alter, amend, modify, and repeal laws in force in Alaska shall not extend to the customs, internal revenue, postal or other general laws of the United States or to the game, fish and fur-seal laws and laws relating to fur bearing animals of the United States applicable to Alaska, or to the laws of the United

States providing for taxes on business and trade, or to the Act Entitled "An Act to provide for the construction and maintenance of roads, the establishment and maintenance of schools, and the care and support of insane persons in the District of Alaska, and for other purposes," approved January twenty-seven, nineteen hundred and five, and the several Acts amendatory thereof: Provided, further, That the provision shall not operate to prevent the Legislature from imposing other and additional taxes or licenses. And the legislature shall pass no law depriving the judges and officers of the district court of any authority, jurisdiction, or function exercised by like judges or officers of district courts of the United States.

§ **4. The legislature.** (a) The legislative power and authority of the Territory shall be vested in a legislature, which shall consist of a senate and a house of representatives. The senate shall consist of sixteen members, four from each of the four judicial divisions into which Alaska is now divided by Act of Congress, each of whom shall have at the time of his election the qualifications of an elector in Alaska, and shall have been a resident and an inhabitant in the division from which he is elected for at least two years prior to the time of his election. The term of office of each member of the senate shall be four years, except that at the general election in Alaska in 1944 one member for each division, other than a member elected to fill the unexpired term of a senator previously elected, shall be elected for a term of two years.

(b) The house of representatives shall consist of twenty-four members elected from the four judicial divisions into which Alaska is now divided by Act of Congress. Each such division shall be entitled in the seventeenth to the twentieth legislatures, inclusive, to the following number of representatives:

First judicial division, eight representatives;
Second judicial division, four representatives;
Third judicial division, seven representatives; and
Fourth judicial division, five representatives.

The United States Director of the Census shall, with[in] one week after the first meeting of the twentieth legislature and of each fifth legislature thereafter, certify to such legislature, and to the Secretary of Alaska, the number of representatives to which each judicial division is entitled under an apportionment, according to the method of equal proportions, of the total number of representatives among the various divisions on the basis of the total population (exclusive of members of the military or naval forces of the United States and members of their families not actual and bona fide residents of Alaska) of each division, as determined under the latest United States Decennial Census. Each judicial division shall in the five legislatures succeeding the legislature to which such certification is made be entitled to the number of representatives so certified. The term of office of each representative shall be two years, and each representative shall possess the same qualifications as are prescribed for members of the senate.

(c) (1) The legislature is authorized to establish, and to adjust from time to time, legislative districts within the several judicial divisions for the election of the members of the senate and house of representatives for such divisions. Districts separate from those established for the election of members of the house of representatives may be established for the election of members of the senate. All districts in any division for the election of members of the same body shall be as nearly equal in population and shall be established with as great a degree of geographical unity and cohesiveness, as is reasonable and practicable, and shall elect the same number of members, unless it shall be found desirable to provide districts around municipalities of a multiple size in which case proportionate representation shall be provided.

(2) Whenever the representation of any division shall increase or decrease by reason of a reapportionment under subsection (b), the legislature shall cause such division to be redistricted in accordance with the provisions of subdivision (1) of this subsection. If the

legislature to which such certification of reapportionment is made fails to so redistrict, the representatives of such division shall be elected at large from such division in the manner provided in subsection (d) for the election of representatives prior to the establishment of legislative districts, until such time as such division is so redistricted.

(3) Whenever the legislature shall have established legislative districts for the election of members of the senate, the terms of office of all members of the senate in the legislature immediately preceding the legislature to which the members of the senate are first to be elected by district shall, regardless of the term for which such members were elected, expire with the expiration of such preceding legislature. As soon as the members of the senate shall have assembled as a consequence of such first election they shall, by lot or drawing, be divided in each division into two classes. The seats of the members of the first class shall be vacated at the end of two years, and the seats of members of the second class shall be vacated at the end of four years, so that two members of the senate from each division shall, after such first election, be elected biennially at the regular election.

(d) In any election held prior to the establishment of legislative districts pursuant to subsection (c) the electors in each judicial division shall be entitled to vote for as many senators and representatives as are to be elected to such office from such division. The candidates for each such office in the number to be so elected receiving the highest number of votes for such office shall be elected. In any election for senator or representative held after the establishment of legislative districts pursuant to subsection (c) the candidates in the number to be elected from each district for such office, receiving the highest number of votes of the electors of such district for such office, shall be elected. In case of a tie vote in any election for senator or representative, the candidates affected shall settle the question by lot.

(e) In case of a vacancy in either branch of the legislature the Governor shall order an election to fill such vacancy, giving due and proper notice thereof.

(f) Each member of the legislature shall be paid by the United States the sum of $15 per day for each day's attendance while the legislature is in session, at each regular biennial session thereof, and mileage, in addition, for each such session, at the rate of 15 cents per mile for each mile from his home to the capital and return by the nearest traveled route. All other legislative expenses, including salaries and mileage of the members at other than regular biennial sessions, shall be paid by the Territory. (Amended November 13, 1942, 56 Stat. 1016)

Editor's notes. — The Act of November 13, 1942, 56 Stat. 1018, also provided as follows:

§ 4. (a) The amendments made by this Act shall take effect only with respect to the seventeenth and succeeding legislatures of the Territory of Alaska.

§ 5. Election of members of the legislature. That the first election for members of the Legislature of Alaska shall be on the Tuesday next after the first Monday in November, nineteen hundred and twelve, and all subsequent elections for the election of such members shall be held on the Tuesday next after the first Monday in November biennially thereafter; that the qualifications of electors, the regulations governing the creation of voting precincts, the appointment and qualifications of election officers, the supervision of elections, the giving of notices thereof, the forms of ballots, the register of votes, the challenging of voters, and the returns and the canvass of the returns of the results of all such elections for members of the legislature shall be the same as those prescribed in the Act of Congress entitled "An Act providing for the election of a Delegate, to the House of Representatives from the Territory of Alaska," approved May seventh, nineteen hundred and six, and all the provisions of said Act which are applicable are extended to said elections for members of the legislature, and shall govern the same, and the canvassing board created by said Act shall canvass the returns of such elections and issue certificates of election to each member elected to the said legislature; and all the penal provisions contained in section fifteen of the said Act shall apply to elections for

members of the legislature as fully as they now apply to elections for Delegate from Alaska to the House of Representatives.

Editor's notes. — Act of March 26, 1934, 48 Stat. 465, quoted in the amendments following § 20 of this Act, provided that the election of members of the legislature be held on the second Tuesday in September in 1934 and every second year thereafter.

§ 6. Convening of legislature; sessions. The Legislature of Alaska shall convene at the capitol at the city of Juneau, Alaska, on the fourth Monday in January in the year 1941 and on the fourth Monday in January every two years thereafter; but the said legislature shall not continue in session longer than sixty days in any two years unless again convened in extraordinary session by a proclamation of the Governor, which shall set forth the object thereof and give at least fifteen days' notice in writing or by telegram or radiogram to each member of said legislature, and in such case shall not continue in session longer than thirty days. The Governor of Alaska is hereby authorized to convene the legislature in extraordinary session for a period not exceeding thirty days when requested to do so by the President of the United States, or when any public danger or necessity may require it. (Amended April 18, 1940, 54 Stat. 111)

§ 7. Organization of legislature. That when the legislature shall convene under the law, the senate and house of representatives shall each organize by the election of one of their number as presiding officer, who shall be designated in the case of the senate as "president of the senate" and in the case of the house of representatives as "speaker of the house of representatives," and by the election by each body of the subordinate officers provided for in section "eighteen hundred and sixty-one of the United States Revised Statutes of eighteen hundred and seventy-eight," and each of said subordinate officers shall receive the compensation provided in that section, which shall be paid by the Territory. (Amended November 13, 1942, 56 Stat. 1018)

Editor's notes. — See editor's note to § 4.

§ 8. Enacting clause; title and subject of act. That the enacting clause of all laws passed by the legislature shall be "Be it enacted by the Legislature of the Territory of Alaska." No law shall embrace more than one subject, which shall be expressed in its title.

§ 9. Legislative power; limitations. The legislative power of the Territory shall extend to all rightful subjects of legislation not inconsistent with the Constitution and laws of the United States, but no law shall be passed interfering with the primary disposal of the soil; no tax shall be imposed upon the property of the United States; nor shall the lands or other property of nonresidents be taxed higher than the lands or other property of residents, nor shall the legislature grant to any corporation, association, or individual any special or exclusive privilege, immunity, or franchise without the affirmative approval of Congress; nor shall the legislature pass local or special laws in any of the cases enumerated in the Act of July thirtieth, eighteen hundred and eighty-six [48 U.S.C. § 1471]; nor shall it grant private charges or special privileges, but it may, by general act, permit persons to associate themselves together as bodies corporate for manufacturing, mining, agriculture, and other industrial pursuits, and for the conduct of business of insurance, savings banks, banks of discount and deposit (but not of issue), loans, trust, and guaranty associations, for the establishment and conduct of cemeteries, and for the construction and operation of railroads, wagon roads, vessels, and irrigating ditches, and the colonization and improvement of lands in connection therewith, or for colleges, seminaries, churches, libraries, or any other benevolent, charitable, or scientific association, but the authority embraced in this section shall only permit the organization of corporations and associations whose chief business shall be in the Territory of Alaska; no divorce shall be granted by the legislature nor shall any divorce be granted by the courts

of the Territory unless the applicant therefor shall have resided in the Territory for two years next preceding the application, which residence and all causes for divorce shall be determined by the court upon evidence adduced in open court; nor shall any lottery or the sale of lottery tickets be allowed; nor shall the legislature or any municipality interfere with or attempt in any wise to limit the Acts of Congress to prevent and punish gambling, and all gambling implements shall be seized by the United States marshal or any of his deputies, or any constable or police officer, and destroyed; nor shall any public money be appropriated by the Territory or any municipal corporation therein for the support or benefit of any sectarian, denominational, or private school, or any school not under the exclusive control of the government; nor shall the Government of the Territory of Alaska or any political or municipal corporation or subdivision of the Territory make any subscription to the capital stock of any incorporated company, or in any manner lend its credit for the use thereof; nor shall the Territory, or any municipal corporation therein, have power or authority to create or assume any bonded indebtedness whatever; nor to borrow money in the name of the Territory or of any municipal division thereof; nor to pledge the faith of the people of the same for any loan whatever, either directly or indirectly; nor to create, nor to assume, any indebtedness, except for the actual running expenses thereof, and no such indebtedness for actual running expenses shall be created or assumed in excess of the actual income of the Territory or municipality for that year including as a part of such income appropriations then made by Congress, and taxes levied and payable and applicable to the payment of such indebtedness and cash and other money credits on hand and applicable and not already pledged for prior indebtedness; *Provided,* That all authorized indebtedness shall be paid in the order of its creation; all taxes shall be uniform upon the same class of subjects and shall be levied and collected under general laws, and the assessments shall be according to the true and full value thereof, except that unpatented mining claims and nonproducing patented mining claims, which are also unimproved, may be valued at the price paid the United States therefor, or at a flat rate fixed by the legislature, but if the surface ground is used for other than mining purposes, and has a separate and independent value for such other purposes, or if there are improvements or machinery or other property thereon of such a character as to be deemed a part of the realty, then the same shall be taxed according to the true and full value thereof. No tax shall be levied for Territorial purposes in excess of 2 per centum upon the assessed valuation of the property therein in any one year; nor shall any incorporated town or municipality levy any tax, for any purpose, in excess of 3 per centum of the assessed valuation of property within the town in any one year; *Provided,* That the Congress reserves the exclusive power for five years from the date of the approval of this Act to fix and impose any tax or taxes upon railways or railway property in Alaska, and no acts or laws passed by the Legislature of Alaska providing for a county form of government therein shall have any force or effect until it shall be submitted to and approved by the affirmative action of Congress; and all laws passed, or attempted to be passed, by such legislature in said Territory inconsistent with the provisions of this section shall be null and void; *Provided, further,* That nothing herein contained shall be held to abridge the right of the legislature to modify the qualifications of electors by extending the elective franchise to women. (Amended June 3, 1948, 62 Stat. 302)

Editor's notes. — See § 2 of Act of April 13, 1934, 48 Stat. 583, quoted following the provisions of this Act, for authorization of legislation concerning intoxicating liquor.

§ 10. Selection of officers of legislature; rules; journal; quorum; adjournments; compelling attendance of members. That the Senate and House of Representatives shall each choose its own officers, determine the rules of its own proceedings not inconsistent with this Act, and keep a journal of its proceedings; that the ayes and noes of the members of either house on any question shall, at the request of one-fifth of

the members present, be entered upon the journal; that a majority of the members to which each house is entitled shall constitute a quorum of such house for the conduct of business, of which quorum a majority vote shall suffice; that a smaller number than a quorum may adjourn from day to day and compel the attendance of absent members, in such manner and under such penalties as each house may provide; that for the purpose of ascertaining whether there is a quorum present the presiding officer shall count and report the actual number of members present.

§ 11. Legislators holding other office; persons commissioned or appointed under United States. That no member of the legislature shall hold or be appointed to any office which has been created, or the salary or emoluments of which have been increased, while he was a member, during the term for which he was elected and for one year after the expiration of such term; and no person holding a commission or appointment under the United States shall be a member of the legislature or shall hold any office under the government of said territory.

§ 12. Privileges of legislators. That no member of the legislature shall be held to answer before any other tribunal for any words uttered in the exercise of his legislative functions. That the members of the legislature shall, in all cases except treason, felony, or breach of the peace, be privileged from arrest during their attendance upon the sessions of the respective houses, and in going to and returning from the same; *Provided,* That such privilege as to going and returning shall not cover a period of more than ten days each way, except in the second division, where it shall extend to twenty days each way, and the fourth division to fifteen days each way.

§ 13. Passage of bills. That a bill in order to become a law shall have three separate readings in each house, the final passage of which in each house shall be by majority vote of all members to which such house is entitled, taken by ayes and noes, and entered upon its journal. That every bill, when passed by the house in which it originated or in which amendments thereto shall have originated, shall immediately be enrolled and certified by the presiding officer and the clerk and sent to the other house for consideration.

NOTES TO DECISIONS

Applied in Plumley v. Georgia E. Hale, M.D., Inc., Sup. Ct. Op. No. 1847 (File Nos. 4014, 4017), 594 P.2d 497 (1979).

§ 14. Approval or veto of bills by Governor; reconsideration after veto; effective date of act. That, except as herein provided, all bills passed by the legislature shall, in order to be valid, be signed by the Governor. That every bill which shall have passed the legislature shall be certified by the presiding officers and clerks of both houses, and shall thereupon be presented to the Governor. If he approves it, he shall sign it and it shall become a law at the expiration of ninety days thereafter, unless sooner given effect by a two-thirds vote of said legislature. If the Governor does not approve such bill, he may return it, with his objections, to the legislature. He may veto any specific item or items in any bill which appropriates money for specific purposes, but shall veto other bills, if at all, only as a whole. That upon the receipt of a veto message from the Governor each house of the legislature shall enter the same at large upon its journal and proceed to reconsider such bill, or part of a bill, and again vote upon it by ayes and noes, which shall be entered upon its journal. If, after such reconsideration, such bill or part of a bill shall be approved by a two-thirds vote of all the members to which each house is entitled, it shall thereby become a law. That if the Governor neither signs nor vetoes a bill within three days (Sundays excepted) after it is delivered to him, it shall become a law without

his signature, unless the legislature adjourns sine die prior to the expiration of such three days. If any bill shall not be returned by the Governor within three days (Sundays excepted) after it shall have been presented to him, the same shall be a law in a like manner as if he had signed it, unless the legislature, by its adjournment, prevents the return of the bill, in which case it shall not be a law.

§ **15. Legislative expenses.** There shall be annually appropriated by Congress a sum sufficient to pay the salaries and mileage of members of the legislature for each regular biennial session. All other legislative expenses, including the salaries and mileage of the members of the legislature for other than the regular biennial sessions, the salaries of the employees of the legislature, the printing of the laws, and all other incidental expenses of the legislature, shall be appropriated and paid by the Territory. All of the sums so appropriated by Congress shall be disbursed by the Governor of Alaska, under sole instructions of the Secretary of the Treasury, and the Governor shall report quarterly to the Secretary of the Treasury for the manner in which said funds have been expended. No expenditure, to be paid out of money to be appropriated by Congress, shall be made by the Governor or by the legislature for objects not authorized by the acts of Congress making appropriations nor beyond the sum thus appropriated for such objects. (Amended November 13, 1942, 56 Stat. 1018)

Editor's notes. — See editor's note to § 4.

§ **16. Transmitting laws and resolutions to President and Secretary of State; printing.** That the Governor of Alaska shall, within ninety days after the close of each session of the Legislature of the Territory of Alaska, transmit a correct copy of all the laws and resolutions passed by the said legislature, certified to by the Secretary of the Territory, with the seal of the Territory attached; one copy to the President of the United States, and one to the Secretary of State of the United States; and the legislature shall make provisions for printing the session laws and resolutions within ninety days after the close of each session and for their distribution to public officials and sale to the people of the Territory.

§ **17. Election of delegates.** That after the year nineteen hundred and twelve the election for Delegate from the Territory of Alaska, provided by "An Act providing for the election of a Delegate to the House of Representatives from the Territory of Alaska," approved May seventh, nineteen hundred and six, shall be held on the Tuesday next after the first Monday in November in the year nineteen hundred and fourteen, and every second year thereafter on the said Tuesday next after the first Monday in November and all of the provisions of the aforesaid Act shall continue to be in full force and effect and shall apply to the said election in every respect as is now provided for the election to be held in the month of August therein; *Provided,* That the time for holding an election in said Territory for Delegate in Alaska to the House of Representatives to fill a vacancy, whether such vacancy is caused by failure to elect at the time prescribed by law, or by the death, resignation, or incapacity of a person elected, may be prescribed by an act passed by the legislature of the Territory of Alaska; *Provided: further,* That when such election is held it shall be governed in every respect by the laws passed by Congress governing such election.

§ **18. Commission to examine transportation question.** That an officer of the Engineer Corps of the United States Army, a geologist in charge of Alaska surveys, an officer in the Engineer Corps of the United States Navy, and a civil engineer who has had practical experience in railroad construction and has not been connected with any railroad enterprise in said Territory be appointed by the President as a commission hereby authorized and instructed to conduct an examination into the transportation

question in the Territory of Alaska; to examine railroad routes from the seaboard to the coal fields and to the interior and navigable waters; to secure surveys and other information with respect to railroads, including cost of construction and operation; to obtain information in respect to the coal fields and their proximity to railroad routes; and to make a report of the facts to Congress on or before the first day of December, nineteen hundred and twelve, or as soon thereafter as may be practicable, together with the conclusions and recommendations in respect to the best and most available routes for railroads in Alaska which will develop the country and the resources thereof for the use of the people of the United States; *Provided, further,* That the sum of twenty-five thousand dollars, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated to defray the expenses of said commission.

§ 19. Codifying United States laws applicable to Alaska. That the Committee on Territories of the Senate and the Committee on Territories of the House of Representatives are hereby authorized, empowered, and directed to jointly codify, compile, publish, and annotate all the laws of the United States applicable to the Territory of Alaska, and said committees are jointly authorized to employ such assistance as may be necessary for that purpose; and the sum of five thousand dollars, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to cover the expenses of said work, which shall be paid upon vouchers properly signed and approved by the chairman of said committees.

§ 20. Laws to be submitted to Congress for approval. That all laws passed by the Legislature of the Territory of Alaska shall be submitted to the Congress by the President of the United States, and, if disapproved by Congress, they shall be null and of no effect.

Amendment to Organic Act

AN ACT to amend an Act entitled "An Act creating a legislative assembly in the Territory of Alaska and conferring legislative powers thereon, and for other purposes," approved August twenty-fourth, nineteen hundred and twelve.

That nothing in that Act of Congress entitled "An Act creating a legislative assembly in the Territory of Alaska and conferring legislative power thereon, and for other purposes," approved August twenty-fourth, nineteen hundred and twelve, shall be so construed as to prevent the courts now existing or that may be hereafter created in said Territory from enforcing within their respective jurisdictions all laws passed by the legislature within the power conferred upon it, the same as if such laws were passed by Congress, nor to prevent the legislature passing laws imposing additional duties, not inconsistent with the present duties of their respective offices, upon the governor, marshals, deputy marshals, clerks of the district courts, and United States Commissioners acting as justices of the peace, judges of probate courts, recorders, and coroners, and providing the necessary expenses of performing such duties, and in the prosecuting of all crimes denounced by Territorial laws the cost shall be paid the same as is now or may hereafter be provided by Act of Congress providing for the prosecutions of criminal offenses in said Territory, except that in prosecutions growing out of any revenue law passed by the legislature the costs shall be paid as in civil actions and such prosecutions shall be in the name of the Territory. (August 29, 1914, 38 Stat. 710)

Amendment to Organic Act

Schools. That the Legislature of Alaska is hereby empowered to establish and maintain schools for white and colored children and children of mixed blood who lead a

civilized life in said Territory and to make appropriations of Territorial funds for that purpose; and all laws or parts of laws in conflict with this Act are to that extent repealed. (March 3, 1917, 39 Stat. 1131)

Amendment to Organic Act

An act fixing the date for holding elections of a Delegate from Alaska to the House of Representatives and of members of the Legislature of Alaska; fixing the date on which the Legislature of Alaska shall hereafter meet; prescribing the personnel of the territorial canvassing board, defining its duties, and for other purposes.

§ 1. **Date for election of delegate.** That the election of a Delegate from the Territory of Alaska to the House of Representatives provided for by the Act of Congress entitled "An Act providing for the election of a Delegate to the House of Representatives from the Territory of Alaska", approved May 7, 1906, as amended, and the election of the members of the Legislature of the Territory of Alaska, provided for by the Act of Congress entitled, "An Act to create a legislative assembly in the Territory of Alaska, to confer legislative powers thereon, and for other purposes", approved August 24, 1912, shall hereafter be held on the second Tuesday in September in the year 1934, and every second year thereafter on the said second Tuesday in September. (March 26, 1934, 48 Stat. 465)

§ 2. **Sessions of legislature.** (March 26, 1934, 48 Stat. 465; Repealed April 18, 1940, 54 Stat. 111)

§ 3. **Territorial canvassing board.** That the canvassing board for the Territory of Alaska created by the Act of Congress entitled, "An Act providing for the election of a Delegate to the House of Representatives from the Territory of Alaska", approved May 7, 1906, shall hereafter consist of the Governor, the secretary of the Territory, and the collector of customs for Alaska. It shall be the duty of the said canvassing board to canvass and compile in writing the vote specified in the certificates of election returned to the Governor from the several election precincts in the Territory and to keep an accurate record of each voting precinct in the Territory and the date of its creation.

The said canvassing board shall commence the performance of its duties at the office of the Governor within ten days after the second Tuesday in October in each year in which an election is held as hereinabove provided, and shall continue with such work from day to day until the same is completed. No packages containing election returns shall be opened until the canvass commences, at which time they shall be opened in public and in such manner and under such conditions, as nearly as possible, as to give all parties interested an opportunity to see the returns. In case it shall appear to the board that no election return, as herein prescribed, has been received by the Governor from any precinct in which an election has been held, the said board may accept in place thereof the certified copy of the certificate of election for such precinct received from the clerk of the court, and may canvass and compile the same with the other election returns. The canvassing board shall terminate the canvass and issue the certificates of election as soon as it is satisfied that no missing return would, if received, change the result of a canvass based upon the returns at hand, but when the board has information that an election was held at any precinct from which no return has been received and which return, if received, the board has reason to believe will affect the result of the election, it shall be the duty of the board to await the arrival of such return until 4 o'clock post-meridian on the 10th day of December in the year during which the election is held, but no longer, and any return received after that time shall not be counted by the board.

Upon the completion of the said canvass as herein provided, the said board shall declare the person who has received the greatest number of votes for the office for which

he is a candidate elected to such office for the term for which he is elected and shall issue and deliver to him in writing, under their hands and seals, a certificate of his election. It shall be the duty of the Governor to preserve all election returns carefully and inviolate, and, after the certificates of result have been canvassed, to replace the returns into the packages from which they were taken and carefully seal the same and preserve all such returns inviolate for at least two years thereafter, unless sooner called upon by the House of Representatives of Congress or some court or tribunal of competent jurisdiction to produce the same for inspection. It shall also be the duty of the Governor to notify each successful candidate of his election, and to do so by the speediest means of communication. (March 26, 1934, 48 Stat. 465)

§ 4. Effect of existing laws; authority of Territorial Legislature. Except as herein otherwise provided, all of the provisions of the Acts of May 7, 1906, and of August 24, 1912, hereinabove referred to, shall continue in full force and effect until altered, amended, or repealed by Congress. And any and all laws enacted by the Legislature of the Territory of Alaska pertaining to elections in said Territory shall remain in full force and effect until altered, amended, or repealed by the said Legislature or by Congress. That the Legislature of the Territory of Alaska shall have the power from time to time as the need therefor may arise, to change the date of general elections in the said Territory, including the date of election of a Delegate from the Territory of Alaska to the House of Representatives and of the members of the territorial legislature; and that the Legislature of the Territory of Alaska shall also have the power by law to change from time to time the personnel of the canvassing board, the dates of its meetings, and may prescribe its duties. (March 26, 1934, 48 Stat. 466)

Amendment to Organic Act

AN ACT to repeal an Act of Congress entitled "An Act to prohibit the manufacture or sale of alcoholic liquors in the Territory of Alaska, and for other purposes," approved February 14, 1917, and for other purposes.

§ 1. Repeal. That the Act of Congress entitled "An Act to prohibit the manufacture or sale of alcoholic liquors in the Territory of Alaska, and for other purposes", approved February 14, 1917, contained in United States Statutes at Large, volume 39, Public Laws, pages 903 to 909, is repealed. Title II of the National Prohibition Act, as amended and supplemented, and the Act entitled "An Act to provide revenue by the taxation of certain nonintoxicating liquor, and for other purposes", approved March 22, 1933, except such provisions of such title and of such Act of March 22, 1933, as shall be retained in force and effect in the States, are repealed to the extent such title and such Act of March 22, 1933, are in force and effect in the Territory of Alaska. (April 13, 1934, 48 Stat. 583)

§ 2. Legislation as to intoxicating liquors authorized. That notwithstanding the repeal of the said Act no spirituous or intoxicating liquors shall be manufactured or sold in the Territory of Alaska, except under such regulations and restrictions as the Territorial Legislature shall prescribe, and the legislative power and authority conferred upon the Legislative Assembly of the Territory of Alaska by the Act of Congress entitled "An Act to create a legislative assembly in the Territory of Alaska, to confer legislative power thereon, and for other purposes", approved August 24, 1912, shall be, and hereby is, extended to include any legislation pertaining to the manufacture or sale of spirituous or intoxicating liquor within the said Territory, and any provision contained in the said Act of August 24, 1912, in conflict herewith, is hereby expressly repealed: *Provided, however,* That the Legislature of the Territory of Alaska shall have full power and authority to delegate the powers hereby conferred to any board or commission designated

or created by the legislature for such purpose, which powers shall include the power to make rules and regulations governing the manufacture, barter, sale, or possession of spirituous or intoxicating liquors in the Territory of Alaska, to prescribe the qualifications of those who are to engage in the manufacture, barter, sale, or possession of intoxicating liquors in the said Territory, and to prescribe license fees and excise taxes therefor: *Provided,* That nothing in this Act shall in any way repeal, conflict, or interfere with the public general laws of the United States imposing taxes on the manufacture and sale of intoxicating liquors for the purpose of revenue and known as the "internal revenue laws." (April 13, 1934, 48 Stat. 583)

§ **3. Liquor control board.** That the act of the Territorial Legislature of Alaska entitled "An Act to create the board of liquor control and prescribe its powers and duties", approved May 4, 1933, contained in the Session Laws of Alaska, 1933, being Chapter 109 thereof at pages 193—194 be, and the same hereby is, ratified and approved, and the board thereby created shall have the powers and the authority conferred upon it by the said Act. And any person, firm, or corporation, who shall violate any of the rules or regulations prescribed by the said board governing the manufacture, sale, barter, and possession of intoxicating liquors in the Territory of Alaska, or the qualifications of those engaging in the manufacture, sale, barter, and possession of such liquors in the said Territory, or the payment of license fees and excise taxes therefor, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished as provided in section 2072 of the Compiled Laws of Alaska. (April 13, 1934, 48 Stat. 584)

§ **4. Repeal.** That sections 462 to 478, both inclusive, of Act of Congress entitled "An Act to define and punish crime in the District of Alaska and to provide a code of criminal procedure for said district", approved March 3, 1899 (30 Stat L 1337—1341), as amended by the Act of June 6, 1900 (31 Stat L 332), and by the Act of February 6, 1909 (35 Stat L 601—603), be and the same hereby are, repealed. (April 18, 1934, 48 Stat. 584)

§ **5. Nonapplication of 1 USC § 29.** Section 13 of the Revised Statutes (USC, title 1, sec 29) shall not apply with respect to any penalty, forfeiture or liability incurred under any provision repealed by this Act. (April 18, 1934, 48 Stat. 584)

HOME RULE FOR ALASKA.

WICKERSHAM FILES 1912

For Immediate Release.

Washington, D. C.,

(Release) ..... Alaska has no territorial legislature, and has not had at any time since its purchase by the United States in 1867. Congress is Alaska's only legislative body. With 65,000 people and an average trade with the United States for the last decade of $55,000,000.00 a year the territory is greatly in need of the developing aid of a local legislature. Every other territory created by the United States, since the passage of the Ordinance of 1787 for the organization of the Ohio country, has been given a legislative body at the moment of its creation.

On April 24th, the House of Representatives passed a bill creating an elective legislature in Alaska such as the other territories have had and that bill is now pending before the United States Senate. It was referred to the Senate Committee on Territories of which Senator William Alden Smith, of Michigan, is chairman. It is now before that committee.

It is interesting to note that Missouri territory for twenty years was much larger in area than Alaska and had a much smaller population. Sixteen territories were created each having a smaller population in proportion to area than Alaska. Nine states were created at a time when each had a less population than Alaska now has.

Delaware became a state in 1776 and by the census of 1790 had a population of only 59,096, while Alaska had at the time of the last census a population of 54,356. As late as 1890 the new state of Wyoming had a population of but 60,705.

The most interesting feature of Alaska's claim of right to organize an elective territorial legislature of her own is her astonishing trade with the United States. Since the United States purchased Alaska in 1867 there has been extracted from that northern territory $206,813,594.00 in gold, silver, and copper; the sea and fur products amount to $229,710,036.00, and with the cash items paid into the United States Treasury by the people of the territory the total production of Alaska in forty-five years amounts to $446,640,984.00. Against that enormous sum is to be placed the expenditures of the United States in the purchase and maintenance of the territory, which amounts to only the sum of $35,816,674.00, and leaves a balance in favor of Alaska of more than $410,000,000.00. This astonishing production of the northern territory is to be supplemented, so we are informed, by an area of agricultural lands in the great interior Tanana valley of equal arable capacity and of larger area than all the land actually put to crop in Norway, Sweden and Finland, where more than ten million people live from agriculture alone.

The statistics presented certainly make a good case in favor of granting Alaska an elective territorial legislature. Aside from the figures, however, there is a question of principle involved which is dear to the heart of every American. It is the principle of the right of the people to rule.

The bill as it passed the House carefully limits the powers of the Alaska legislature with more than the usual safeguards against unwise and vicious legislation. There is first the veto of the governor, appointed by the President of the United States, and therefore presumed to be a reasonably discreet person; then Congress reserves the right to disapprove any act passed by the Alaskan legislature, which gives an additional veto upon its acts. These two vetoes taken in connection with the presumption that the representatives of the people in the legislature will wish to do right ought sufficiently to protect the public from bad legislation in that territory. The Act also provides that the legislature shall have no authority to dispose of any part or portion of the public domain. Neither the coal lands, the fisheries, water power, nor any other national property can be disposed of without the affirmative approval of Congress.

The power conferred is very largely limited to the police power and the bill does little more than permit the people of the territory to elect an agency under Congress to assist in laying the foundations of civil government in the territory.

There is no good reason why the Committee on Territories should not report this bill, and the Senate pass it at this session.

There is no good reason why Alaska should not have home-rule.

SESSION LAWS

MARCH 3 – MAY 2, 1913

SYNOPSIS OF LAWS

Chapter 1 (H. B. No. 2).

AN ACT to extend the elective franchise to women in the Territory of Alaska.

Chapter 2 (S. B. No. 4).

AN ACT in relation to legal holidays and repealing Sections 716 and 717 of Chapter 71, Title II, of the Code of Civil Procedure for Alaska.

Chapter 3 (S. B. No. 12).

AN ACT to repeal the act of Congress, entitled, "An Act to Authorize the Appointment of Road Overseers and to Create Road Districts in the District of Alaska, and for Other Purposes." 33 Stats. at L., Ch. 1629, Page 391, approved April 27, 1904, and declaring an emergency.

Chapter 4 (S. B. No. 14).

AN ACT to prevent the desecration of the flag of the United States, and to provide a punishment for carrying flags in public parades or flying them from buildings under certain conditions.

Chapter 5 (S. B. No. 29).

AN ACT to require hotels and lodging houses in the Territory of Alaska, to be provided with fire escapes, ropes and other appliances.

Chapter 6 (S. B. No. 51).

AN ACT relating to the filing, publication and citation of laws of the Territory, and declaring an emergency.

Chapter 7 (S. B. No. 6).

AN ACT to establish the number of hours to constitute a day's work on all Territorial and municipal construction or such work done by contract or sub-contract, and providing penalties for its violation.

Chapter 8 (S. B. No. 19).

AN ACT to regulate the purchase of ore.

Chapter 9 (S. B. No. 31).

AN ACT to prevent employees from being oppressed by reason of an employer compelling them to board at a particular boarding house, or to purchase goods or supplies at a particular store and providing a penalty for violations thereof.

Chapter 10 (H. B. No. 27).

AN ACT to amend Section 18, Ch. I, Title I, Part III, of the Alaska Code, relating to the duties of notaries public. (Compiled Laws of Alaska, Sec. 382).

Chapter 11 (S. B. No. 35).

AN ACT regulating and prescribing fees and license tax to be paid by domestic corporations and by foreign corporations doing business in the Territory of Alaska.

Chapter 12 (S. B. No. 40).

AN ACT to provide for the incorporation of colleges, seminaries, churches, libraries, or other benevolent, fraternal, social, religious, educational, charitable, or scientific associations whose chief business shall be in the Territory of Alaska.

Chapter 13 (H. B. No. 28).

AN ACT to provide a form of summons in civil actions in Justice Courts. (Compiled Laws of Alaska, Sec. 1781.)

Chapter 14 (H. B. No. 34).

AN ACT to amend Section 47 of the Penal Code of Alaska. (Compiled Laws of Alaska, Sec. 1927.)

Chapter 15 (H. B. No. 35).

AN ACT to amend Section 277 of the Code of Civil Procedure of Alaska. (Compiled laws of Alaska, Sec. 1109.)

Chapter 16 (H. B. No. 36).

AN ACT to amend Section 299 of the Code of Civil Procedure of Alaska. (Compiled Laws of Alaska, Sec. 1131.)

Chapter 17 (H. B. No. 41).

AN ACT to amend Section 255 of the Civil Code of Alaska. (Compiled Laws of Alaska, Sec. 684.)

Chapter 18 (H. B. No. 42).

AN ACT to amend Section 1011 of the Code of Civil Procedure of Alaska. (Compiled Laws of Alaska, Sec. 1843.)

Chapter 19 (H. B. No. 44).

AN ACT to amend Section 950 of the Code of Civil Procedure of Alaska. (Compiled Laws of Alaska, Sec. 1782.)

Chapter 20 (H. B. No. 50).

AN ACT to amend Section 305 of the Code of Criminal Procedure of Alaska. (Compiled Laws of Alaska, Sec. 2414.)

Chapter 21 (H. B. No. 51).

AN ACT to amend Section 45 of the Code of Civil Procedure for Alaska. (Compiled Laws of Alaska, Sec. 877.)

Chapter 22 (H. B. No. 53).

AN ACT to amend Section 153 of the Code of Civil Procedure of Alaska. (Compiled Laws of Alaska, Sec. 985.)

Chapter 23 (H. B. No. 56).

AN ACT to amend Section 134 of the Penal Code of Alaska. (Compiled laws of Alaska, Sec. 2014.)

Chapter 24 (H. B. No. 57).

AN ACT to amend Section 166 of the Penal Code of Alaska. (Compiled Laws of Alaska, Sec. 2046.)

Chapter 25 (H. B. No. 58).

AN ACT to amend Section 171 of the Penal Code of Alaska. (Compiled Laws of Alaska, Sec. 2051.)

Chapter 26 (H. B. No. 66).

AN ACT to amend Section 178 of the Code of Criminal Procedure of Alaska. (Compiled Laws of Alaska, Sec. 2287.)

Chapter 27 (H. B. No. 67).

AN ACT to amend Section 169 of the Code of Criminal Procedure of Alaska. (Compiled Laws of Alaska, Sec. 2278.)

Chapter 28 (H. B. No. 69).

AN ACT to provide a penalty for inciting another to commit a crime.

Chapter 29 (S. B. No. 1).

AN ACT to declare employment in underground mines, applied to metalliferous lode mining only, underground workings, open cut workings, open pit workings, smelters, reduction works, stamp-mills, roller mills, concentrating mills, chlorination processes, cyanide processes, to be injurious to health and dangerous to life and limb. To regulate and limit the hours of employment in said occupations; to declare the violation thereof a misdemeanor and to provide penalties for the violation thereof.

Chapter 30 (S. B. No. 21).

AN ACT making it a felony to take, remove or conceal any ore, mineral, amalgam, precipitates, concentrates or other mineral-bearing substance from any mine, sampler, smelter, concentrating mill, chlorination mill, cyanide mill, or other reduction works, with intent to steal the same or to defraud the owner thereof, and providing a penalty therefor.

Chapter 31 (S. B. No. 39).

AN ACT to amend Section 1550 of the Compiled Laws of the Territory of Alaska, referring to the adjourning of terms of court on account of the non-attendance of the judge.

Chapter 32 (S. B. No. 49).

AN ACT to establish Juvenile Courts, to provide for the care of dependent children, to create children's guardians in Alaska, and for other purposes.

Chapter 33 (S. B. No. 38).

AN ACT to punish the making of false certificates by notaries public and other officers authorized to administer oaths in the Territory of Alaska.

Chapter 34 (S. B. No. 34).

AN ACT to provide for the service of process in a criminal proceeding against a corporation.

Chapter 35 (H. B. No. 25).

AN ACT to require the registration of vital statistics in the Territory of Alaska, and for other purposes.

Chapter 36 (H. B. No. 30).

AN ACT prohibiting the use of deception, misrepresentation, false advertising, and false pretenses and unlawful force in the procuring of employees to work in any department of labor in this Territory, and fixing penalties criminal and civil for violation thereof.

Chapter 37 (H. B. No. 60).

AN ACT to regulate the practice of pharmacy in the Territory of Alaska and to prescribe penalties for the violation thereof.

Chapter 38 (H. B. No. 86).

AN ACT to prevent the spread of contagious disease among live stock.

Chapter 39 (H. B. No. 88).

AN ACT to amend Section 43 of Title II of the Act of Congress of March 3, 1899, entitled, "An Act to Define and Punish Crimes in the District of Alaska and to Provide a Code of Criminal Procedure for said District."

Chapter 40 (H. B. No. 76).

AN ACT to provide for the appointment of commissioners for the promotion of uniformity of legislation in the United States.

Chapter 41 (H. B. No. 90).

AN ACT to amend Chapter 2, of the Penal Code of Alaska by adding to said Chapter an additional section to be numbered Section 31.

Chapter 42 (H. B. No. 80).

AN ACT to provide for the registration and restriction of communicable diseases in the Territory of Alaska; and declaring an emergency.

Chapter 43 (H. B. No. 13).

AN ACT to provide for the registration of persons employed to advocate or oppose legislative measures, and to regulate the method of such advocacy or opposition.

Chapter 44 (H. B. No. 4).

AN ACT to provide for the compulsory education of the children of Alaska and for other purposes. (8-16)

Chapter 45 (H. B. No. 22).

AN ACT to fix the liability of employers for personal injuries sustained by their employees.

Chapter 46 (H. B. No. 14).

AN ACT to amend an act of Congress entitled: "An Act to Amend and Codify the Laws Relating to Municipal Corporations in the District of Alaska."

Chapter 47 (H. B. No. 20).

AN ACT to provide for the incorporation of cities of the second class in the Territory of Alaska.

Chapter 48 (Substitute for H. B. No. 40 and H. B. No. 61).

AN ACT to provide for the formation of banking corporations, and to regulate the business of banking in the Territory of Alaska, and securing supervision thereof; for the appointment of a Territorial Banking Board, defining its duties; and fixing penalties for the violation of this act.

Chapter 49 (H. B. No. 74).

AN ACT to provide for the filing of grubstake contracts and prospecting agreements.

Chapter 50 (H. B. No. 75).

AN ACT prohibiting the casting of sawdust, planer shavings and other lumber waste into the waters of Alaska and declaring the violation thereof to be a misdemeanor.

Chapter 51 (H. B. No. 85).

AN ACT to relieve destitution in the Territory of Alaska.

Chapter 52 (H. B. No. 96).

AN ACT to establish a system of taxation, create revenue, and provide for collection thereof for the Territory of Alaska, and for other purposes.

Chapter 53 (H. B. No. 97).

AN ACT to make appropriation for the Territory of Alaska for the fiscal year ending December 31, 1913, and for the fiscal year ending December 31, 1914, and for the quarter ending March 31, 1915.

Chapter 54 (H. B. No. 98).

AN ACT to impose a poll tax upon male persons in the Territory of Alaska and providing means for its collection.

Chapter 55 (S. B. No. 61).

AN ACT declaring the use of water for mining, power and other purposes, and the use of pole and tower lines for telephone and telegraph purposes for aerial tram and for the transmission of electric light and power to be a public use and providing for the condemnation of rights-of-woy therefor.

Chapter 56 (S. B. No. 62).

AN ACT to make uniform any reference to or citation of the compiled laws of the Territory of Alaska.

Chapter 57 (S. B. No. 71).

AN ACT to provide punishment for pimps or macques.

Chapter 58 (S. B. No. 56).

AN ACT to make uniform the law of business corporations in the Territory of Alaska.

Chapter 59 (S. B. No. 54).

AN ACT to make uniform the law of bills of lading in the Territory of Alaska, and repealing all acts, and parts of acts, inconsistent or in conflict therewith.

Chapter 60 (S. B. No. 67).

AN ACT to amend Chapter 88 of the Code of Civil Procedure in Respect to the Disposition of Estates of Persons Who Have Disappeared.

Chapter 61 (S. B. No. 66).

AN ACT relative to wills without this Territory, and to promote uniformity in the Territory in that respect.

Chapter 62 (S. B. No. 63).

AN ACT to amend Section 41, Chapter III, Part I, of the Alaska Criminal Code relating to Larceny, and for other purposes.

Chapter 63 (S. B. No. 41).

AN ACT to prohibit the transportation of explosives and other dangerous articles on vessels or vehicles carrying passengers for hire.

Chapter 64 (S. B. No. 36).

AN ACT relating to negotiable instruments, and repealing all acts and parts of acts in conflict with this act.

Chapter 65 (S. B. No. 50).

AN ACT to make uniform the law of warehouse receipts in the Territory of Alaska, and repealing all acts, and parts of acts, inconsistent or in conflict therewith.

Chapter 66 (S. B. No. 47).

AN ACT to make uniform the law of sales of goods in the Territory of Alaska, and repealing all acts or parts of acts inconsistent or in conflict therewith.

Chapter 67 (S. B. No. 46).

AN ACT to make uniform the law of transfers of shares of stock in corporations in the Territory of Alaska, and repealing all acts or parts of acts inconsistent or in conflict therewith.

Chapter 68 (S. B. No. 37).

AN ACT to provide for the locating of the water front boundary lines of townsites located near navigable rivers and streams in Alaska; declaring the violation thereof a misdemeanor and prescribing a penalty therefor.

Chapter 69 (S. B. No. 48).

AN ACT relating to the assessment, levy and collection of general taxes for school and municipal purposes by municipal corporations, and declaring an emergency.

Chapter 70 (S. B. No. 26).

AN ACT to provide for the amicable adjustment of differences that may arise between employers and employees.

Chapter 71 (S. B. No. 16).

AN ACT making it unlawful to wrongfully and without authority use the name, title of officers, insignia, emblem, ritual or ceremonies of any order or society, and providing punishment for the violation of the provisions of this act.

Chapter 72 (S. B. No. 52).

AN ACT to divide the Territory into mine inspection districts; to establish the office of mine inspector; to prescribe the duties, powers, qualifications and compensation thereof; to regulate the operation of mines in the Territory of Alaska; to provide for the health and safety of mine workers in the Territory; to declare the violation of any of the provisions hereof a misdemeanor and prescribing punishment therefor.

Chapter 73 (S. B. No. 69).

AN ACT to amend Chapter 19, of the Compiled Laws of Alaska relating to escheats.

Chapter 74 (S. B. No. 11).

AN ACT to supplement the mining laws of the United States in their application to the Territory of Alaska; providing for the location and possession of mining claims in Alaska and repealing all acts and parts of acts in conflict herewith to the extent of such conflicts.

Chapter 75 (S. B. No. 23).

AN ACT concerning certain forms of prostitution, and providing punishment for persons encouraging prostitution in violation of this act.

Chapter 76 (H. B. No. 21).

AN ACT to provide for the alteration, enlargement, and the annexation of new territory to the boundaries and limits of incorporated towns within the Territory of Alaska.

Chapter 77 (H. B. No. 68).

AN ACT creating the office, and providing for the appointment of a Treasurer of the Territory of Alaska, prescribing his duties and compensation, and making other provisions with reference to the administration of that office.

Chapter 78 (H. B. No. 89).

AN ACT to create a board of commissioners to provide for a home for aged prospectors in Interior Alaska.

Chapter 79 (H. B. No. 91).

AN ACT to create, establish, and provide for liens on mines in favor of laborers and materialmen, and repealing all acts and parts of acts in conflict herewith.

Chapter 80 (H. B. No. 94).

AN ACT to provide for the acceptance and use of the United States Marine Barracks buildings at Sitka, Alaska, as a home for indigent prospectors and others who have spent their years in Alaska and become dependent, and to create a commission for the government of the same.

Chapter 81 (H. B. No. 95).

AN ACT to amend Chapter 10, of the Penal Code of Alaska.

Chapter 82 (H. B. No. 99).

AN ACT directing and authorizing the Treasurer of the Territory of Alaska to apply for and receive moneys in the United States Treasury due the Territory on account of sales of timber in national forests in Alaska.

Chapter 83 (H. B. No. 59).

AN ACT to regulate the practice of medicine and surgery in the Territory of Alaska, to create a Board of Medical Examiners, and to regulate the fees thereof, to prevent the practice of medicine and surgery by unauthorized persons, and to provide for the trial and punishment of violators of the provisions of this Act by fine or imprisonment, or both, and to repeal all laws or part of laws in conflict or inconsistent with this Act.

Chapter 84 (H. B. No. 73).

AN ACT to regulate the practice of dentistry in the Territory of Alaska and to provide for the examination, regulation, licensing and registration of persons engaged in the practice of dentistry, and for the punishment of offenders against this act.

FISCAL NOTE

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB007SCS(JUD)

Analysis

This legislation makes synthetic cannabinoids a schedule IIIA controlled substance.

Currently, possession of a schedule IIIA is a Class A misdemeanor if the amount possessed is less than 3 grams (AS 11.71.050) or a Class C Felony if the amount possessed is over 3 grams (AS 11.71.040). Manufacturing or delivering a schedule IIIA controlled substance is a Class B felony (AS 11.71.030). The sentences for these crimes range anywhere from 0 - 10 years.

The current average daily cost of care to house an inmate is $136.44. Therefore, housing one offender could have a potential impact to the department ranging from $0.0 (no time served) to $498.0 (for a 10-year sentence).

This bill makes possession of the liquid form of synthetic cannabinoids a class C felony for possession of 3 grams or more a class A misdemeanor for 3 grams or less.

Additionally, this legislation would make possession of 12 grams or more of organic herbs that contain synthetic cannabinoids a class C felony. Possession of 6-12 grams of organic herbs that contain synthetic cannabinoids a class A misdemeanor and possession of 6 grams and under of organic herbs that contain synthetic cannabinoids a class B misdemeanor.

Department of Corrections is unable to determine the fiscal impacts of the passage of this legislation, as we cannot estimate the total number of actual violations that will occur. Should this legislation pass, the department will closely monitor the fiscal impact.

FISCAL NOTE #5

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 7(JUD)

Analysis

This bill adds several chemical forms of synthetic cannabinoids to Schedule IIIA of Alaska's prohibited substance schedules. The bill also adds salts, isomers, and other forms of Schedule IIIA substances to the same schedule. Currently, marijuana is a Schedule VIA prohibited substance. The anticipated fiscal impact is zero, however, if litigation ensues there will be addition costs in defending this litigation.

FISCAL NOTE #4

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. CSHB 7(JUD)

Analysis

This proposed legislation would add certain synthetic cannabinoids to the schedule IIIA list of controlled substances. This bill would become effective immediately.

REPRESENTATIVE CATHY MUÑOZ

CS HB7 (JUD) - Ban on Controlled Substances

A new synthetic cannabinoid, commonly known as K2 or Spice, has become readily available at local stores and over the internet. Some users of this chemical compound experience severe adverse reactions including hallucinations, nausea, vomiting, agitation, and panic attacks.

The synthetic cannabinoid is a combination of herbal and chemical compounds that commonly produce a reaction similar to the use of marijuana. The popularity is increasing, especially among youth, due to easy accessibility, low cost, and the difficulty of detection on drug tests.

The first introduction to K2 came to my attention through an individual's story. Within moments of inhaling K2 the young man experienced adverse reactions that included severe vomiting, loss of reality, inability to walk and talk, and violent outbursts. Without the quick reaction of those nearby there may have been tragic ending to this story. Many similar stories have surfaced in communities throughout Alaska. To date, nine states have successfully enacted laws to prohibit synthetic cannabinoids.

HB7 will classify certain synthetic cannabinoids as schedule IIIA controlled substance. Schedule IIIA includes materials, compounds and mixtures which contain similar synthetic chemicals. It is important that we get ahead of this growing problem and I urge your support for the passage of this bill.

REPRESENTATIVE CATHY MUÑOZ

MEMORANDUM

TO: Senator Bert Stedman
Senate Finance Co-Chair

CC: Darwin Peterson
Finance Committee Aide

FROM: Representative Cathy Muñoz

DATE: March 29, 2011

RE: Changes to Senate CS for CS HB 7 (JUD)

The Senate Judiciary Committee changed the penalties relating to the possession of organic herbs that contain synthetic cannabinoids.

1) Possession of 12 grams or more of organic herbs that contain synthetic cannabinoids as a misconduct in the fourth degree (Class C felony).

2) Possession of 6-12 grams of organic herbs that contain synthetic cannabinoids as a misconduct in the fifth degree (Class A misdemeanor).

3) Possession of 6 grams and under of organic herbs that contain synthetic cannabinoids as a misconduct in the sixth degree (Class B misdemeanor).

Other penalties relating to the selling and manufacturing of the synthetic cannabinoids, which are listed as a scheduled IIIA controlled substance, remain unchanged. The pure liquid form of these synthetic cannabinoids remains a class C felony for possession of 3 grams or more, a class A misdemeanor for under 3 grams.

An effective of July 1, 2011 was added to give adequate notice to the public and store owners who are selling these materials.

A title change has been done to reflect to the two changes.

Memorandum

TO: Representative Cathy Muñoz
FROM: Chuck Burnham, Legislative Analyst
DATE: February 8, 2011
RE: Comparing States' Laws on Synthetic Cannabinoids to Selected Alaska Drug Laws
LRS Report 11.159

You asked us for information on states' laws on synthetic cannabinoids. Specifically, you asked for an account of where such substances appear on states' schedules of controlled substances and the crime classifications and penalties for possessing those substances. You also asked us to compare those other states' penalties for such crimes to those indicated for possession of substances in Alaska's controlled substance schedules IIA and IIIA.

We identified 11 states with laws prohibiting the possession of synthetic cannabinoids.[1] Classifications and penalties for a first criminal offense of possession in these states range from a Class B misdemeanor in Kentucky, which carries a maximum term of imprisonment of 90 days and a $250 fine, to an unclassified felony in Georgia, for which an offender is subject to a prison sentence of 2-15 years. In addition to the 11 states that have synthetic cannabinoid prohibitions in place, at least 21 states, including Alaska, are currently considering similar legislation.

In Alaska, as you know, controlled substances are placed on a given level within the schedule of controlled substances based on the degree of danger or probable danger a given drug poses to a person or the public. Those schedules range from "IA," containing the most dangerous substances, to "VIA," which are perceived to be the least dangerous drugs. Possession of a Schedule IIA controlled substance in Alaska constitutes the crime of "misconduct involving a controlled substance in the fourth degree." That offense is a Class C felony punishable by a maximum of 5 years in prison and a $50,000 fine. Please note, however, that the presumptive sentencing guideline in Alaska is far less severe, and a suspended sentence is possible for a first offense. Possession of a Schedule IIIA controlled substance in Alaska is a Class A misdemeanor for which an offender can receive a maximum of 1 year in prison and a $10,000 fine.[2]

The attached table summarizes crime classifications and penalties for possessing synthetic cannabinoids in the eleven states where that activity has been criminalized, and compares that information to the crime classification and penalties for possession of items on Alaska' controlled substances Schedules IIA and IIIA. Please note that the penalties listed in our table are either maximum sentences or ranges of incarceration periods. Actual penalties are generally subject to considerable discretion by the sentencing courts.

We hope this is helpful. If you have questions or need additional information, please let us know.

[1] Those states are Alabama, Georgia, Illinois, Kansas, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Oklahoma, and Tennessee. According to the National Conference of State Legislatures (NCSL), synthetic cannabinoids are "chemically engineered substances, similar to THC—the active ingredient in marijuana—that, when smoked or ingested, can produce a high similar to marijuana. Initially developed for research related to treatment of pain and the effects of cannabis on the brain, these substances have recently become a popular alternative to marijuana. The NCSL maintains information about these substances and states' responses to the issue at *http://www.ncsl.org/?tabid=21398*.

[2] Controlled Substance Schedules in Alaska are enumerated at AS § 11.71.140-190.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

[Docket No. DEA-345F]

Schedules of Controlled Substances: Temporary Placement of Five Synthetic Cannabinoids Into Schedule I

AGENCY: Drug Enforcement Administration (DEA), U.S. Department of Justice.

ACTION: Final order.

SUMMARY: The Administrator of the Drug Enforcement Administration (DEA) is issuing this final order to temporarily place five synthetic cannabinoids into the Controlled Substances Act (CSA) pursuant to the temporary scheduling provisions. The substances are 1-pentyl-3-(1- naphthoyl)indole (JWH-018), 1-butyl-3-(1-naphthoyl)indole (JWH-073), 1- [2-(4-morpholinyl)ethyl]-3-(1-naphthoyl)indole (JWH-200), 5-(1,1-dimethylheptyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol (CP-47,497), and 5-(1,1-dimethyloctyl)-2-[(1R,3S) -3-hydroxycyclohexyl]-phenol (cannabicyclohexanol; CP-47,497 C8 homologue). This action is based on a finding by the Administrator that the placement of these synthetic cannabinoids into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety. As a result of this order, the full effect of the CSA and its implementing regulations including criminal, civil and administrative penalties, sanctions and regulatory controls of Schedule I substances will be imposed on the manufacture, distribution, possession, importation, and exportation of these synthetic cannabinoids.

FOR FURTHER INFORMATION CONTACT: Christine A. Sannerud, PhD, Chief, Drug and Chemical Evaluation Section, Office of Diversion Control, Drug Enforcement Administration, 8701 Morrissette Drive, Springfield, VA 22152, telephone (202) 307-7183, fax (202) 353-1263, or e-mail ode@usdoj.gov.

DATES: Effective Date: March 1, 2011.

SUPPLEMENTARY INFORMATION:

Background

The Comprehensive Crime Control Act of 1984 (Pub. L. 98-473), which was signed into law on October 12, 1984, amended section 201 of the CSA (**21 U.S.C. 811**) to give the Attorney General the authority to temporarily place a substance into Schedule I of the CSA for one year without regard to the requirements of 21 U.S.C. 811(b) if he finds that such action is necessary to avoid imminent hazard to the public safety. The Attorney General may extend the temporary scheduling up to six months during pendency of proceedings under 21 U.S.C. 811(a)(1). A substance may be temporarily scheduled under the emergency provisions of the CSA if it is not listed in any other schedule under section 202 of the CSA (**21 U.S.C. 812**) or if there is no exemption or approval in effect under 21 U.S.C. 355 for the substance. The Attorney General has delegated his authority under 21 U.S.C. 811 to the DEA Administrator (28 CFR 0.100).

As per section 201(h)(4) of the CSA (**21 U.S.C. 811**(h)(4)), the Deputy Administrator, now Administrator, transmitted notice of her intention to temporarily place JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol into Schedule I of the CSA to the Assistant Secretary for Health of the Department of Health and Human Services (HHS) in a letter dated October 6, 2010. In response to this notification, the

Assistant Secretary of Health, HHS communicated in a letter dated November 22, 2010, to the then-DEA Acting Administrator that there are no exemptions or approvals in effect for JWH-018, JWH- 073, JWH-200, CP-47,497, and cannabicyclohexanol under Section 505 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 355). The substances are not listed in any other schedule in **21 U.S.C. 812**.

A notice of intent to temporarily place JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol into Schedule I of the CSA was published in the Federal Register on November 24, 2010 (75 FR 71635). Before making a finding that temporarily placing a substance into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety, the Administrator must consider three of the eight factors (factors 4, 5, and 6) set forth in section 201(c) of the CSA (**21 U.S.C. 811**(c)). These factors are the history and current pattern of abuse, the scope, duration, and significance of abuse, and what, if any, risk there is to the public health, including actual abuse, diversion from legitimate channels, and clandestine importation, manufacture, or distribution. 21 U.S.C. 811(h)(3).

The temporary placement of these five synthetic cannabinoids into Schedule I of the CSA is necessary in order to avoid an imminent hazard to the public safety. First, these substances are not intended for human consumption, but there has been a rapid and significant increase in abuse of these substances in the United States. As a result of this abuse, synthetic cannabinoids are banned in at least 18 states in the United States and several countries, and all five branches of the U.S. military prohibit military personnel from possessing or using synthetic cannabinoids. Second, law enforcement has seized synthetic cannabinoids in conjunction with controlled substances and based on self-reports to law enforcement and health care professionals, synthetic cannabinoids are abused for their psychoactive properties. Third, numerous state and local public health departments and poison control centers have issued health warnings describing the adverse health effects associated with synthetic cannabinoids. Based on scientific data currently available, these five substances have the potential to be extremely harmful and, therefore, pose an imminent hazard to the public safety.

History and Current Pattern of Abuse

A "cannabinoid" is a class of chemical compounds in the marijuana plant that are structurally related. The cannabinoid [Delta]9- tetrahydrocannabinol (THC) is the primary psychoactive constituent of marijuana. "Synthetic cannabinoids" are a large family of chemically unrelated structures functionally (biologically) similar to THC, the active principle of marijuana.

Two of the five synthetic cannabinoids (CP-47,497 and cannabicyclohexanol) were synthesized in the early 1980s for research purposes

[[Page 11076]]

in the investigation of the cannabinoid system. JWH-018, JWH-073, and JWH-200 were prepared in the mid-1990s and evaluated to further advance understanding of drug-receptor interactions regarding the cannabinoid system. Developed and evaluated as research tools, no other known legitimate uses have been identified for these five synthetic cannabinoids. Furthermore, these five synthetic cannabinoids are not intended for human consumption.

The emergence of these five synthetic cannabinoids represents a recent phenomenon in the U.S. designer drug market. Since the initial identification of JWH-018 by U.S. forensic laboratories, many additional synthetic cannabinoids including JWH-073, JWH-200, CP- 47,497, and cannabicyclohexanol have been identified in related herbal incense products and plant food. These synthetic cannabinoids have purported psychotropic effects when smoked or ingested. These substances are typically found in powder form or are dissolved in appropriate solvents, such as acetone, before being sprayed on the plant material contained in the herbal incense products.

The popularity of these THC-like synthetic cannabinoids has significantly increased throughout the United States, and they are being abused for their psychoactive properties as reported by law enforcement, the medical community, and through scientific literature.

Some of the product names include, but are not limited to, "Spice," "K2," and many more. Due to sophisticated marketing, the products that contain these five THC-like synthetic cannabinoids are perceived as "legal" alternatives to marijuana despite the fact that they are typically advertised as herbal incense or plant food (Bonsai- 18) by Internet retailers, tobacco shops, head shops, and other domestic brick and mortar retail venues, and labeled "Not For Human Consumption." No evidence exists that these synthetic cannabinoids have value as an additive to herbal incense products due to the absence of odor associated with the substances.

Based on law enforcement encounters, these five substances are typically found laced on plant material. The plant material is packaged in small pouches or packets, and is being sold over the Internet, in tobacco and smoke shops, drug paraphernalia shops, gas stations, and convenience stores as herbal incense products, giving customers of all ages direct access to these five substances. Research articles propose that the packaging is professional and conspicuous, targeting young people, possibly eager to use cannabis, but who are afraid of the judicial consequences and/or association with illicit drugs.

According to Internet discussion boards and law enforcement encounters reported directly to DEA, these five synthetic cannabinoids are being both abused alone and/or being sprayed on plant material (which is then smoked). The most common route of administration of these synthetic cannabinoids is by smoking (using a pipe, a water pipe, or rolling the drug-spiked plant material in cigarette papers).

These five synthetic cannabinoids alone or spiked on plant material have the potential to be extremely harmful due to their method of manufacture and high pharmacological potency. There is little information regarding the pharmacology, toxicology, and safety of these substances in humans given the minimal amount of pre-clinical investigations undertaken regarding these substances; therefore, the full danger of these drugs has not yet been determined.

As of January 31, 2011, 18 states in the United States and other countries have controlled one or more of the five synthetic cannabinoids. Moreover, all five branches of the military prohibit their personnel from possessing or using synthetic cannabinoids associated with products such as Spice and K2.

Scope, Duration, and Significance of Abuse

According to forensic laboratory reports, the initial appearance of these synthetic cannabinoids in herbal incense products in the United States occurred in November 2008 when U.S. Customs and Border Protection first encountered products such as Spice.

The increasing abuse of the five synthetic cannabinoids is demonstrated by the increase in federal, state, and local law enforcement activity associated with these substances. The National Forensic Laboratory Information System, a national repository for drug evidence analyses from forensic laboratories across the United States, has reported in excess of 500 exhibits containing synthetic cannabinoid from January 2010 through September 2010. These exhibits came from numerous states across the nation including Alabama, Arkansas, California, Florida, Hawaii, Iowa, Indiana, Kansas, Kentucky, Louisiana, Minnesota, Missouri, North Dakota, Nebraska, Nevada, Oklahoma, Pennsylvania, South Carolina, Tennessee, and Virginia.

Even though there is no evidence of legitimate non-research related use for these synthetic cannabinoids, multiple shipments of JWH-018 and JWH-073 have been encountered by U.S. Customs and Border Protection in 2010. One enforcement operation encountered five shipments of JWH-018 totaling over 50 kilograms (110.2 pounds) of powder. In addition, bulk loads of JWH-018 and JWH-200 have been encountered by law enforcement in 2010. For example, in Casper, Wyoming, DEA agents encountered large quantities of herbal incense products laced with the synthetic cannabinoid JWH-018 in conjunction with methamphetamine and other illegal drugs in execution of search and arrest warrants.

On March 24, 2010, the American Association of Poison Control Centers reported receiving 112 calls from 15 states related to synthetic cannabinoids to U.S. poison centers since 2009. Just nine months later, the number of calls increased to over 2,700 from 49 states and the District of Columbia.

What, If Any, Risk There Is to the Public Health

Health warnings have been issued by numerous state and local public health departments and poison control centers describing the adverse health effects associated with these synthetic cannabinoids and their related products, including agitation, anxiety, nausea, vomiting, tachycardia (fast, racing heartbeat), elevated blood pressure, tremor, seizures, hallucinations, paranoid behavior, and non-responsiveness.

Smoking these synthetic cannabinoids for the purpose of achieving intoxication and experiencing the psychoactive effects has been identified as a reason for emergency room visits and calls to poison control centers. In a fact sheet by the National Drug Court Institute, the problem of synthetic cannabinoid abuse is described as "significant and disturbing." This is supported by information that was communicated to DEA from one of the major private toxicology laboratories. Based on laboratory findings from drug screens for the period of July 2010 through November 2010, over 3,700 specimens tested positive for either JWH-018 or JWH-073. They also indicated that they were finding 30-35% positivity for specimens submitted by juvenile probation departments.

Case reports describe psychotic episodes, withdrawal, and dependence associated with use of these synthetic cannabinoids, similar to syndromes

[[Page 11077]]

observed in marijuana abuse. In addition, based on law enforcement encounters reported directly to DEA, when responding to incidents involving individuals who have reportedly smoked these synthetic cannabinoids, first responders report that these individuals have suffered from intense hallucinations. Moreover, emergency department physicians and toxicologists have reported the adverse health effects associated with smoking herbal incense products laced with these substances. Furthermore, based on law enforcement encounters, suspected Driving Under the Influence of Drug incidents are attributed to the smoking of synthetic cannabinoids. For example, in September 2010, police in Nebraska responded to an incident involving a teenage male who had careened his truck into the side of a residence. After striking the residence and several more items, the teen continued several more yards before coming to a complete stop. Prior to crashing the truck, the individual had driven past a junior high school and nearly struck a child. Upon further investigation, the driver of the vehicle admitted to smoking "Wicked X," a product marketed as "herbal incense" and known to contain synthetic cannabinoids, prior to the accident. Preliminary toxicology reports indicated that the individual did not have any alcohol or other illegal substances in his system.

Detailed chemical analyses by DEA and other investigators have found these synthetic cannabinoids spiked on plant material in herbal incense products marketed to the general public. Product analyses have found variations in both the synthetic cannabinoid found on the plant material and the amount. As proposed in scientific literature, the risk of adverse health effects is further increased by the fact that similar products vary in the composition and concentration of synthetic cannabinoids spiked on the plant material.

Self-reported abuse of these THC-like synthetic cannabinoids either alone (e.g., in pills with the substance in powder form) or spiked on plant material appear extensively on Internet discussion boards, and abuse has been reported to public health officials and law enforcement. The abuse of these substances spiked on plant material is corroborated by forensic laboratory analysis of products encountered by law enforcement.

According to the U.S. Customs and Border Protection, a number of the products and synthetic cannabinoids appear to originate from foreign sources. Product manufacturing operations encountered by law enforcement corroborate that the herbal incense products are manufactured in the absence of quality controls and devoid of regulatory oversight. Law enforcement has encountered the manufacture of herbal

incense products occurring in such places as residential neighborhoods. These products and associated synthetic cannabinoids are readily accessible via the Internet.

Based on the above data, the continued uncontrolled manufacture, distribution, importation, exportation, and possession of JWH-018, JWH- 073, JWH-200, CP-47,497, and cannabicyclohexanol pose an imminent hazard to the public safety. DEA is not aware of any recognized therapeutic uses of these synthetic cannabinoids in the United States.

DEA has considered the three criteria for placing a substance into Schedule I of the CSA (**21 U.S.C. 812**). The data available and reviewed for JWH-073, JWH-018, JWH-200, CP47,497, and cannabicyclohexanol indicate that these synthetic cannabinoids each has a high potential for abuse, no currently accepted medical use in treatment in the United States and a lack of accepted safety for use under medical supervision.

In accordance with the provisions of section 201(h) of the CSA (**21 U.S.C. 811**(h)) and 28 CFR 0.100, the Administrator has considered the available data and the three factors required to support a determination to temporarily schedule five synthetic cannabinoids: 1- butyl-3-(1-naphthoyl)indole, 1-pentyl-3-(1-naphthoyl)indole, 1-[2-(4- morpholinyl)ethyl]-3-(1-naphthoyl)indole, 5-(1,1-dimethylheptyl)-2- [(1R,3S)-3-hydroxycyclohexyl]-phenol, and 5-(1,1-dimethyloctyl)-2- [(1R,3S)-3-hydroxycyclohexyl]-phenol in Schedule I of the CSA and finds that temporary placement of these synthetic cannabinoids into Schedule I of the CSA is necessary to avoid an imminent hazard to the public safety.

Regulatory Requirements

With the issuance of this final order, JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol become subject to the regulatory controls and administrative, civil and criminal sanctions applicable to the manufacture, distribution, possession, importation, and exportation of a Schedule I controlled substance under the CSA.

1. Registration. Any person who manufactures, distributes, dispenses, imports, exports, or possesses JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol or who engages in research or conducts instructional activities with respect to JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol, or who proposes to engage in such activities, must be registered to conduct such activities in accordance with **21 U.S.C. 823** and **958**. Any person who is currently engaged in any of the above activities and is not registered with DEA must submit an application for registration and may not continue their activities until DEA has approved that application. Retail sales of Schedule I controlled substances to the general public are not allowed under the Controlled Substances Act.

2. Security. JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol are subject to Schedule I security requirements. Accordingly, appropriately registered DEA registrants must manufacture, distribute and store these substances in accordance with **1301.71**; **1301.72**(a), (c), and (d); **1301.73**; **1301.74**; **1301.75**(a) and (c); and **1301.76** of Title 21 of the Code of Federal Regulations as of March 1, 2011.

3. Labeling and packaging. All labeling and packaging requirements for controlled substances set forth in **Part 1302** of Title 21 of the Code of Federal Regulations shall apply to commercial containers of JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol. Current DEA registrants shall have thirty (30) calendar days from the effective date of this Final Order to be in compliance with all labeling and packaging requirements.

4. Quotas. Quotas for JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol will be established based on registrations granted and quota applications received pursuant to **part 1303** of Title 21 of the Code of Federal Regulations.

5. Inventory. Every DEA registrant who possesses any quantity of JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol is required to keep inventory of all stocks of these substances on hand pursuant to **1304.03**, **1304.04**, and **1304.11** of Title 21 of the Code of Federal Regulations. Every current DEA registrant who desires registration in Schedule I for JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol shall conduct an inventory of all stocks of these substances. Current DEA registrants shall have thirty (30) calendar days from the effective date of this Final Order to be in compliance with all inventory requirements.

6. Records. All registrants who handle JWH-018, JWH-073, JWH-200, CP-

[[Page 11078]]

47,497, or cannabicyclohexanol are required to keep records pursuant to **1304.03**, **1304.04**, **1304.21**, **1304.22**, and **1304.23** of Title 21 of the Code of Federal Regulations. Current DEA registrants shall have thirty (30) calendar days from the effective date of this Final Order to be in compliance with all recordkeeping requirements.

7. Reports. All registrants are required to submit reports in accordance with **1304.33** of Title 21 of the Code of Federal Regulations. Registrants who manufacture or distribute JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol are required to comply with these reporting requirements and shall do so as of March 1, 2011.

8. Order Forms. All registrants involved in the distribution of JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol must comply with order form requirements of **part 1305** of Title 21 of the Code of Federal Regulations as of March 1, 2011.

9. Importation and Exportation. All importation and exportation of JWH-018, JWH-073, JWH-200, CP-47,497, or cannabicyclohexanol must be conducted by appropriately

registered DEA registrants in compliance with **part 1312** of Title 21 of the Code of Federal Regulations on or after March 1, 2011.

10. Criminal Liability. The manufacture, distribution, dispensation, or possession with the intent to conduct these activities; possession; importation; or exportation of JWH-018, JWH - 073, JWH-200, CP-47,497, or cannabicyclohexanol not authorized by, or in violation of the CSA or the Controlled Substances Import and Export Act occurring as of March 1, 2011 is unlawful.

Executive Order 12988

This final temporary scheduling order meets the applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988 Civil Justice Reform.

Executive Order 13132

This final temporary scheduling order does not preempt or modify any provision of State law; nor does it impose enforcement responsibilities on any State; nor does it diminish the power of any State to enforce its own laws. Accordingly, this order does not have federalism implications warranting the application of Executive Order 13132.

Congressional Review Act

Pursuant to section 808(2) of the Congressional Review Act, the agency is not required to comply with the Act if it makes a good faith finding that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. It is in the public interest to schedule these cannabinoids immediately because they pose a public health risk. Use of materials spiked with these cannabinoids has been the cause of emergency room visits and calls to poison control centers. The adverse health effects associated with these synthetic cannabinoids and their related products include agitation, anxiety, nausea, vomiting, tachycardia (fast, racing heartbeat), elevated blood pressure, tremor, seizures, hallucinations, paranoid behavior, and non- responsiveness. The materials have been marketed on products that are available to the general public, and their manufacture is devoid of quality controls and unregulated.

This temporary scheduling action is taken pursuant to **section 811**(h), which is specifically designed to enable DEA to act in an expeditious manner to avoid an imminent hazard to the public safety from new or designer drugs or abuse of those drugs. Section 811(h) exempts the temporary scheduling order from standard notice and comment rulemaking procedures to ensure that the process moves swiftly. For the same reasons that underlie section 811(h), that is, DEA's need to move quickly to place these five cannabinoids into Schedule 1 because they pose a threat to public health, it would be contrary to the public interest to delay implementation of the temporary scheduling order by requiring DEA to undertake the procedures necessary to comply with the Congressional Review Act prior to the order taking effect.

Unfunded Mandates Reform Act of 1995

This final temporary scheduling order will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $126,400,000 or more (adjusting for inflation) in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Reporting and recordkeeping requirements.

Under the authority vested in the Attorney General by section 201(h) of the CSA (**21 U.S.C. 811**(h)), the Administrator hereby amends 21 CFR part 1308 as follows:

PART 1308--SCHEDULES OF CONTROLLED SUBSTANCES

- 1. The authority citation for part 1308 continues to read as follows:

  Authority: **21 U.S.C. 811**, **812**, **871**(b), unless otherwise noted.

- 2. **Section 1308.11** is amended by adding new paragraphs (g)(1), (2), (3), (4), and (5) to read as follows:

Sec. 1308.11 Schedule I.

* * * * *

(g) * * *

(1) 5-(1,1-Dimethylheptyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol, its optical, positional, and geometric isomers, salts and salts of isomers--7297 (Other names: CP-47,497)

(2) 5-(1,1-Dimethyloctyl)-2-[(1R,3S)-3-hydroxycyclohexyl]-phenol, its optical, positional, and geometric isomers, salts and salts of isomers--7298 (Other names: cannabicyclohexanol and CP-47,497 C8 homologue)

(3) 1-Butyl-3-(1-naphthoyl)indole, its optical, positional, and geometric isomers, salts and salts of isomers--7173 (Other names: JWH- 073)

(4) 1-[2-(4-Morpholinyl)ethyl]-3-(1-naphthoyl)indole, its optical, positional, and geometric isomers, salts and salts of isomers--7200 (Other names: JWH-200)

(5) 1-Pentyl-3-(1-naphthoyl)indole, its optical, positional, and geometric isomers, salts and salts of isomers--7118 (Other names: JWH- 018 and AM678)

Dated: February 18, 2011.

Michele M. Leonhart,
Administrator.

Comparing States' Laws on Synthetic Cannabinoids to Selected Alaska Drug Laws				
State	**Citation**	**Controlled Substance Schedule**	**Crime Classification** (1st Offense--Possession)	**Penalty**
Alaska	AS § 11.71.040 and § 12.55.125	Schedule IIA (as proposed in HB 7)	Class C felony	Maximum 5 years imprisonment and $50,000 fine (presumptive sentence is far less--suspended sentence possible)
	AS § 11.71.050	Schedule IIIA	Class A misdemeanor	Maximum 1 year imprisonment and $10,000 fine
Alabama	CA § 13A-12-213 to 14.1	Not scheduled	Class A misdemeanor	Sentencing guidelines: up to 32 month sentence typically allotted by court among probation, community corrections, county jail/work release or an alternative
Georgia	OCGA § 16-30-25 and 16-13-30	Schedule I	Unclassified felony	2-15 years imprisonment
Illinois	720 ILCS § 570/204 and 402(c) and 730 ILCS § 5/5-4.5-45 and 5-4.5-50	Schedule I	Class 4 felony	1-3 years imprisonment and $25,000 fine
Kansas	KSA § 21-36a06 and 4708	Schedule I	Class A non-person misdemeanor	Sentencing guidelines: typically, 10-12 months of probation
Kentucky	KRS § 218A.1427 and 534.040	Schedule I	Class B misdemeanor	Maximum imprisonment of 90 days and fine of $250
Louisiana	LSA § 40:966	Schedule I	Unclassified	Maximum 6 months in jail and $500 fine
Michigan	MCL § 333.7403	Schedule I	Unclassified misdemeanor	Maximum 1 year imprisonment and $2,000 fine
Mississippi	MC § 41-29-113 and 139	Schedule I	Unclassified misdemeanor or felony depending upon amount of drug	For example, 0.1 grams to 2 grams, up to 2 years imprisonment and $50,000 fine; 10-30 grams, 6-24 years imprisonment and up to $50,000 fine.
Missouri	MRS § 195.202, 558.011, and 560.016	Schedule I	Class A misdemeanor	Maximum 1 year imprisonment and $1,000 fine
Oklahoma	OSA 63 § 2-204 and § 2-402	Schedule I	Unclassified felony	2-10 years imprisonment and $5,000 fine
Tennessee	TCA § 39-17-438	Not scheduled	Class A misdemeanor	Sentencing guidelines--wide latitude to courts
Notes and Source: This table provides information gleaned from the *Lexis* database of state statutes on first offenses for possessing small amounts of synthetic cannabinoids or the referenced drug schedule, as applicable. Please note that a variety of crime-specific circumstances and elements of criminal procedure impact actual sentences.

Representative Cathy Muñoz
House of Representatives
State Capitol
Juneau AK 99801-1182

Dear Representative Muñoz:

On behalf of our respective organizations, we would like to thank you for introducing HB 7, an Act classifying certain synthetic cannabinoids as schedule IIA controlled substances; and providing for an effective date.

We met recently to review proposed legislation and decided to unanimously support this bill.

Again, thank you for addressing this issue. Please contact the APOA office in Anchorage at 277-0515 if there is anything our organizations can do to assist in the passage of this bill.

Sincerely,

John Lucking Jr., President

January 21, 2011

Representative Cathy Munoz
State Capitol Room 403
Juneau AK 99801

Dear Representative Munoz:

As the Chief of Police for the Fairbanks Police Department, I would like to extend my support of House Bill No. 7 "An Act classifying certain synthetic cannabinoids as schedule IIA controlled substances."

According to the U.S. Department of Justice Drug Enforcement Administration, these substances have no known therapeutic use and are known to cause a variety of effects including seizures, hallucinations, psychotic episodes, and non-responsiveness. In addition the Alaska Information Analysis Center (AKIAC) has reported in studies that subjects have reported having difficulties with balance, slurred speech, and being light headed.

These cannabinoids present a significant threat to the safety of Alaska's citizens as long as they remain unclassified. Without this new legislation a person who is under the influence of synthetic cannabinoids while operating a motor vehicle is not in violation of the law. This presents a clear danger to the citizens of Alaska, as someone could potentially be under the influence of a synthetic cannabinoid while driving and experience hallucinations, seizures, or a psychotic episode. This is not a hypothetical situation and the Fairbanks Police Department has already investigated a motor vehicle accident where the driver of the vehicle was having seizures as a result of consuming synthetic cannabinoids.

By classifying synthetic cannabinoids as a schedule II controlled substance, the act of operating a motor vehicle under the influence of a synthetic cannabinoid would become an illegal act. This bill would therefore have a direct impact on the safety of the citizens of the State of Alaska.

Sincerely

Laren Zager
Chief of Police
Fairbanks Police Department

Re: House Bill 7 and Senate Bill 17 - *Synthetic Cannabinoids*

Dear Representatives:

The Municipality of Anchorage supports the bills currently before the legislature. As I indicated last Friday before your Committee, the primary reasons to treat synthetic cannabinoids more serious than their organic equivalents is because the potency of the synthetics has been found to be up to 800 times greater than the organic, and the potency from sample to sample varies widely. We have evidence that this high potency induces hallucinogenic reactions and unpredictable behaviors that are far more dangerous to the user, and those who may come into contact with them, than marijuana. The variations in the strength of any one dose can cause users to get a mild reaction in one instance and fall into unconsciousness in another instance. We have had one death in Anchorage that can be directly attributed to the use of synthetic cannabinoids. The Municipality believes felony prosecution for the manufacture, production, distribution, and sale of synthetics is a necessary tool that should be available to law enforcement to discourage the use of these drugs.

The Municipality supports providing the State Crime Lab with necessary resources to test for these drugs. As of a couple of months ago, we were aware of only two labs nationally that could test for these products in blood or urine. One lab could test urine samples and the other could test blood samples. In order to successfully prosecute people in the chain of production and consumption, we need the capability of testing both seized products and the bodily fluids of users. If properly resourced, having these tests performed locally and having local technicians available to testify, may save both money and time over using out-of-state labs.

Please find included in our email the Powerpoint presentation our Traffic Safety Resource Prosecutor uses. We have been making these presentations to the local military, business groups, and governmental agencies. We look forward to providing additional testimony on the bills in the coming weeks. If you have any questions, please do not hesitate to contact me.

Sincerely,

Dennis A. Wheeler
Municipal Attorney

Alaska House of Representatives

RE: Synthetic Cannabinoids

To Whom it May Concern,

The purpose of this correspondence is to support House Bill 7 that would list certain synthetic cannabinoids found in "K2" or "Spice" as Scheduled controlled substances which will provide law enforcement will have the necessary authority to prosecute the sell and possession of these substances. These drugs are currently being sold in several local venders which sends the social message that they are not harmful and social acceptable; thereby, increasing the risk for youth consumption and related consequences.

K2/Spice products are a mixture of herbal/spice plant products sprayed with potent psychotropic drugs, often contaminated with unidentified toxic substances which is marketed under variety of names including K2, Spice, Pep Spice, Spice Silver, Spice Gold, Spice Diamond, Smoke, Sence, Skunk, Yucatan Fire, Genie & Zohai and sold in variety of colors/flavors-usually sold in foil packaging

The growing popularity of these drugs is causing increasing alarm among law enforcement officials, lawmakers, and health care professionals across America. "Spice" has been banned by some U.S. domestic and overseas military commands as well as in Germany and other European countries because substances have been identified in the product to have the presence of chemicals with tetrahydrocannabinol (THC)-like effects.

The danger in smoking "Spice" is that the product is unregulated and not manufactured in a controlled environment. Smoking this product could be very harmful because the substance could also include unknown contaminants. Therefore, there is no way to accurately determine what the potential harmful effects could be. [1] Medical officials concur that smoking "Spice" can cause adverse effects to one's health. Hospitals have reported incidents of people, mostly

[1] 4Mind Hacks: Spice flow: the new street drug pharmacology December 01, 2009, Accessed 13 May 2010 and Wikipedia Accessed 13 May 2010

teenagers, visiting emergency rooms for: heart palpitations, respiratory issues, panic attacks, hallucinations, delusions, and, one case where a teen lapsed into a coma.[2]

The Mat-Su Substance Abuse Prevention Coalition seeks to reduce substance abuse among youth by advocating for and implanting evidence-based environmental strategies. These drugs are currently sold at local shops which increases access to the drug and sends the social message to young people that they are acceptable and not harmful.

I have attached legislation adopted by the state of Missouri which contains a list of the compounds used to create these drug which can be used by the Senate as a template to draft a similar bill/ordinance.

The Mat-Su Substance Abuse Prevention Coalition appreciates your time and consideration of this issue. If you would like any additional information, please contact the project coordinator, undersigned. Thank you for your time.

Sincerely,

Desiree Compton, for Mat-Su Substance Abuse Prevention Coalition
Project Coordinator

Chemicals Used in "Spice" and "K2" Type Products Now Under Federal Control and Regulation

DEA Will Study Whether To Permanently Control Five Substances

MAR 01 - WASHINGTON, D.C. – The United States Drug Enforcement Administration (DEA) today exercised its emergency scheduling authority to control five chemicals (JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol) used to make so-called "fake pot" products. Except as authorized by law, this action makes possessing and selling these chemicals or the products that contain them illegal in the United States. This emergency action was necessary to prevent an imminent threat to public health and safety. The temporary scheduling action will remain in effect for at least one year while the DEA and the United States Department of Health and Human Services (DHHS) further study whether these chemicals should be permanently controlled.

Chemicals like K-2 and Spice are designated as Schedule I substances, the most restrictive category under the Controlled Substances Act.

The Final Order was published today in the *Federal Register* to alert the public to this action. These chemicals will be controlled for at least 12 months, with the possibility of a six month extension. They are designated as Schedule I substances, the most restrictive category under the Controlled Substances Act. Schedule I substances are reserved for those substances with a high potential for abuse, no accepted medical use for treatment in the United States and a lack of accepted safety for use of the drug under medical supervision.

Over the past couple of years, smokeable herbal products marketed as being "legal" and as providing a marijuana-like high, have become increasingly popular, particularly among teens and young adults. These products consist of plant material that has been coated with research chemicals that claim to mimic THC, the active ingredient in marijuana, and are sold at a variety of retail outlets, in head shops, and over the Internet. These chemicals, however, have not been approved by the FDA for human consumption, and there is no oversight of the manufacturing process. Brands such as "Spice," "K2," "Blaze," and "Red X Dawn" are labeled as herbal incense to mask their intended purpose.

Since 2009, DEA has received an increasing number of reports from poison control centers, hospitals and law enforcement regarding these products. At least 16 states have already taken action to control one or more of these chemicals. The Comprehensive Crime Control Act of 1984 amends the Controlled Substances Act (CSA) to allow the DEA Administrator to place a substance temporarily in schedule I when it is necessary to avoid an imminent threat to the public safety. Emergency room physicians report that individuals that use these types of products experience serious side effects which include: convulsions, anxiety attacks, dangerously elevated heart rates, increased blood pressure, vomiting, and disorientation.

"Young people are being harmed when they smoke these dangerous 'fake pot' products and wrongly equate the products' 'legal' retail availability with being 'safe'," said DEA Administrator Michele M. Leonhart. "Parents and community leaders look to us to help them protect their kids, and we have not let them down. Today's action, while temporary, will reduce the number of young people being seen in hospital emergency rooms after ingesting these synthetic chemicals to get high."

Re: HB 7 – Regulation of Synthetic Cannabinoids

Dear Representative Munoz,

On behalf of the Advisory Board on Alcoholism and Drug Abuse, I would like to express our appreciation of your bringing this important issue to the forefront. Synthetic marijuana or "cannabinoids" pose a grave risk to youth and adults, given the serious health consequences and impairments experienced by users of these drugs.

The dangers posed by synthetic marijuana are serious. While the base products may be natural, the chemicals used to mimic the properties of THC are not approved for human consumption. National news reports on the effects of these products include elevated heart rate and blood pressure, extreme anxiety, poisoning, nausea and vomiting, hallucinations, overdoses, and even addiction.

The American Association of Poison Control Centers reported more than 3,000 calls related to poisoning by synthetic marijuana products in 2010 – and nearly 400 calls since January 1 of this year. The U.S. Army banned use of synthetic marijuana by service members in August 2010. The U.S. Drug Enforcement Agency (DEA) exercised its emergency scheduling authority to **temporarily** control five chemicals used in synthetic marijuana products (JWH-018, JWH-073, JWH-200, CP-47,497, and cannabicyclohexanol). This federal regulation is limited in duration (12-18 months), leaving Alaskans at risk after that time without the state taking action.

The effects of synthetic marijuana are being felt right here in Alaska. News reports of crimes involving these products have come from Fairbanks and Anchorage. The U.S. Army reported courts martial and non-judicial discipline of more than thirty soldiers in Alaska by December 2010. The Anchorage School District reports use by students (though not to the same extent as actual marijuana). Given the health consequences and the role synthetic marijuana can play in criminal activity, there is a more than adequate basis for the regulation of these products to protect the health and safety of Alaskans.

Thank you for your work to protect Alaskans from these harmful products.

Sincerely,

J. Kate Burkhart
Executive Director

Subject: HB-7,SB17

To Representives Munoz and Kerttula and Senator Egan

I would like to voice my support for the passage of HB 7 and SB 17 banning synthetic marijuana and the chemical substances that these "Herbal Incense" are laced with.

I feel that for this product to be sold off the shelf by local businesses to anyone is a criminal act and the penalities should be severe enough to discourage the sale and distribution of this meth like product.

The target market for synthetic pot, in my opinion, is typically anyone that is trying to avoid drug use detection by their employers, (including the military), as well as students participating in school sports at districts that have a drug testing program in place.

While people over 18 should know better than to smoke this substance, many do not understand the consequences of inhaling the unregulated chemicals sprayed on these herbs. I fear that the drug is going to cause irreparable harm or death to someone, and sadly that someone will likely be under the age of 18 to get the public's attention and to shed the light on the potential harm that this product can cause. However, passage of a law to criminalize the sale and possession can help circumvent that concern.

.he Federal Government regulates the importation of toys painted with lead from China, sometimes not all that well quite honestly. Alaska should join the ranks of several other states that have already passed legislation of this particular poison from being so readily available on store shelves.

We don't need to make it easy for people to gain access to this drug.

Thank you,

Scott Spickler

Subject: HB-7 and SB-17

Honorable Representatives Munoz and Kerttula, and Senator Egan:

Please support the above bills and outlaw synthetic cannabis products (Spice, K2, etc.).

- This family of drugs is intended to produce a high – thus users are impaired in any activities they may undertake (e.g. driving)
- These products appear to be falsely labeled and do not contain herbal plants, but rather cannabinoid compounds related to THC (active ingredient in pot); i.e., they lie

It would appear these products are a thinly veiled effort to bypass anti-marijuana rules to sell pot by-any-other-name. Whether it is pot or other, the stated intent is to produce a drugged high. That alone is sufficient to merit regulation as a controlled substance. At a minimum it should be so regulated – at best it would be made illegal. It's market is based on wriggling around anti-drug law. Let's close the door on the deceptive marketing of pot by-any-other-name. It is a drug (or group of drugs) being made available to the public essentially as an unregulated nutraceutical. This is a sham and should be ended.

Respectfully,

Frank Bergstrom

Subject: HB-7/SB17

Dear Representatives Munoz and Kerttula and Senator Egan:

I would like express my support and encourage you to pass HB 7 and SB 17 banning synthetic marijuana and the chemical substances that lace these "Herbal Incense". These substances should not be sold to anyone for any reason. The sale of such material should be designated a criminal act with penalties severe enough to discourage their sale and distribution.

As an employer with strict drug use policies the legal sale of synthetic narcotics creates untold liability. I think it is safe to say that if my fully loaded boom truck is in an accident with your loved ones and the driver has been enjoying "Herbal Incense" prior to the accident you won't be satisfied with a defense that the product was sold over the counter by a local business and is legal. Dead is dead. Legalizing these materials creates a liability nightmare for employers, school sports programs and endangers the public.

Alaska has more than its share of substance abuse problems so lets join with other states that have already passed legislation of this particular poison from being so readily available on store shelves.

Sincerely,

Bruce Abel

To whom it may concern,

I would like to voice my opinion in favor of banning synthetic marijuana in Alaska. It's a very dangerous drug and it doesn't belong in our state.

I have seen what smoking this does to a person and it was a very scary experience. Vomiting, very intense hallucinations, and high heart rate just to name a few symptoms. I believe if I wasn't around during this episode this person very well could have died. I think it's just a matter of time before it does take someones life.

I hope Alaska follows in many other states footsteps and bans this substance.

Testimony for HB7

I would have to start by saying that I never thought I would have had a bad trip on synthetic herb, most times people have bad trips from mushrooms or acid but that herb I had was unlike anything I'd ever heard of. I had started smoking spice in February of this year and smoked on weekends. The appealing side of this herb was that it gave a marijuana like high for about 3 hours with just a couple of hits and the best part being that you didn't have to worry about drug tests because it passed for friends that I knew in the military so passing standard tests was not a problem.

Now another plus to this herb was that unlike normal weed, this herb is not supposed to produce any paranoia, and there was no sign of being high at all, such as no red eye, no half open eyes and you were able to basically be a functional stoner, you could be in public and not look or smell high in anyway. This of course was very appealing to me and many of my friends who also couldn't smoke weed because of drug tests at their jobs.

The brand of spice I had been smoking for about 6 months was called red dawn, spark 20. The herb I smoked the night of my incident was called spike, max. I only had 2 hits and less than 2 minutes later I was losing my perception of what was real in every way, it turned everything into a fuzzy cartoon like picture and I lost control of my legs that I couldn't walk at all. I couldn't talk. I could hear what I thought and what I wanted to say, but all I was spitting out was gibberish. This went on for what felt like many hours. I can remember thinking to myself that I wasn't actually going come out of this craziness and this might be how I end up dying! I remember telling my brother to call 911 and remember going into the ambulance and ending up in the hospital for a day. The doctors haven't had an incident with synthetic herb until that night and I had to basically be flushed out for 10 hours.

I know many people are still going to want to try spice but the fact it's just a bunch of chemicals sprayed on tobacco and nobody knows what the long term affects of this herb are and the scary thing is that this stuff is so easy to purchase. The price has dropped here in town from $53 a gram down to $30 a gram, which is just a bit more than the going rate for actual weed.

I would have thought this herb was completely harmless but the fact that a regular smoker such as myself could even have a bad experience as bad as mine was a huge eye opener to just how bad this stuff really is. The fact that it's very easy to get in town and that it only takes a little bit to get to a mind altering high is spooky. I know a large number of kids in town have had a substance abuse problem and this drug is dangerous because of the fact you can have an herb that twists reality in such a way that you can't tell what's real and what's a hallucination. I see this problem getting worse in the near future because it's a new drug that is easy to obtain and has a weed like high and at the same time has dangerous side effects.

Sectional Analysis

House Bill 13

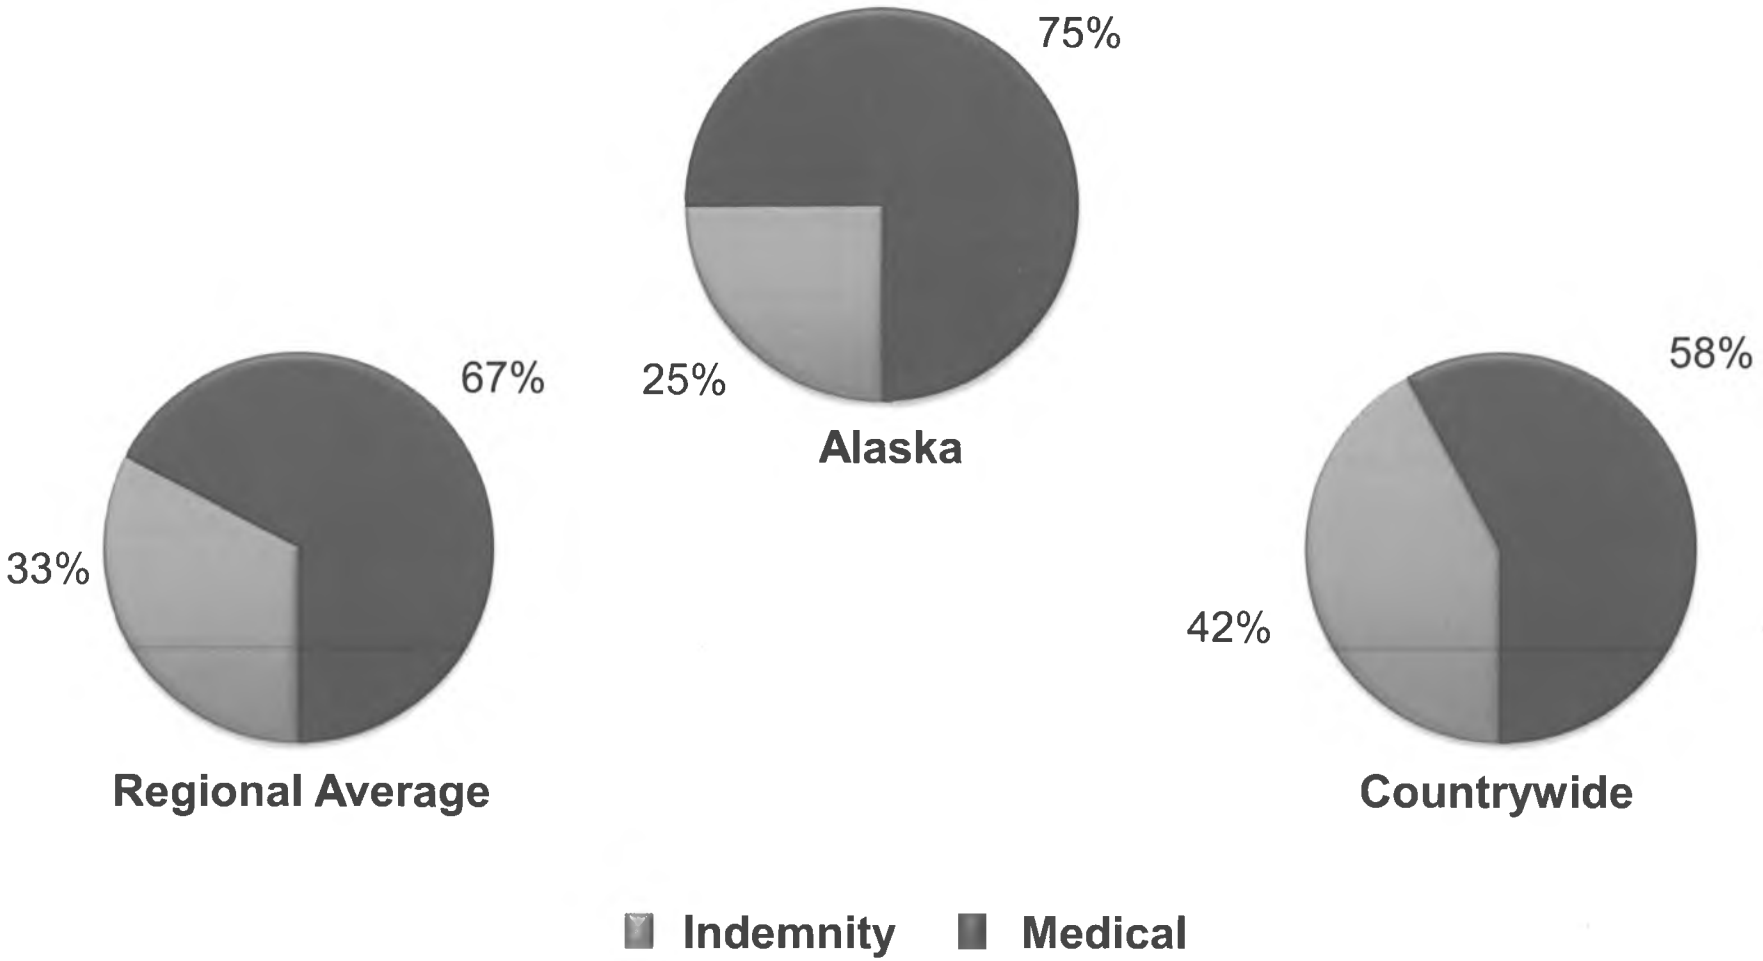
"An Act relating to fees and charges for medical treatment or services as they relate to workers' compensation; and providing for an effective date."

This is a summary only. Note that this sectional analysis should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. Amends AS 23.30.097(a) to provide that after December 31, 2010, the fee may not exceed the usual, customary and reasonable charges in a fee schedule adopted by the board which must include the most recent Current Procedural Terminology codes maintained by the American Medical Association for category I, II and III medical services and the Health Care Procedure Coding System for medical supplies, injections, emergency transportations and other medically related services. The fee schedule must reflect the cost in the geographical area where services are provided and is set at the 90th percentile.

Section 2. Provides for an immediate effective date under AS 01.10.070(c)

Email: Representative_Kurt_Olson@legis.state.ak.us



Alaska Medical Average Cost per Case vs. Countrywide

* Countrywide figure is preliminary
Source: NCCI financial data valued as of 12/31/08 and 12/31/09

© Copyright 2010 National Council on Compensation Insurance, Inc. All Rights Reserved.

Medical Benefits Constitute the Majority of Total Benefit Costs in Alaska

Regional states are AZ, MT, NM, and OR

© Copyright 2010 National Council on Compensation Insurance, Inc. All Rights Reserved.

schedule conversion factor and the education and promotion of EBM as defined by Sackett and the ultimate adoption of EBM treatment guidelines are necessary to effectively control medical costs.

The committee also finds, however, the adoption of EBM treatment guideline requires greater study and public involvement than this committee has managed to garner. It may be wise to view this as a public health intervention since it will affect thousands of people, thus requiring careful thought, planning and attention to public perception and buy-in. Selection and adoption of treatment guidelines with over-emphasis on cost control without explicit focus on the benefits of changes to workers, coupled with overly-hasty and poorly-planned implementation can cause widespread confusion, needless system disruption and delays, and resistance by system participants who might otherwise cooperate as occurred in California. Further study with more public involvement and discussion of the purpose, anticipated benefits and intended outcomes of guidelines adoption is likely needed before practice guidelines can be implemented.

D. Other Methods for Improving Workers' Compensation. During its study of various medical cost control methods employed in other jurisdictions, the committee has realized the vital role advisory councils play in the development and improvement of workers' compensation systems throughout North America. Although Alaska has attempted to promote change through the efforts of an informal *ad hoc* group, the committee believes that a formal advisory council should be statutorily created to monitor the performance of the Alaska workers' compensation system and, on an on-going basis, make recommendations to reduce injuries and improve the effectiveness of care delivered to injured workers and the overall outcomes produced for injured workers, their employers and the state's overall economic and social well-being. The establishment of such a council would not only assist in providing the public involvement necessary to implement treatment guidelines but could play a central role in the improvement of Alaska's workers' compensation system as a whole through adoption of the framework, model, and process offered by The 60 Summits Project. The minority while in favor of creating an advisory council believes that a medical services review committee that is more medically dominated is important to maintain to address areas requiring more specialized knowledge and medical consensus. The minority suggests that joint meetings could be utilized where needed as in a 60 Summits process.

IX. RECOMMENDATIONS. Based on the above, the committee recommends as follows:

A. Medical Costs. The committee was not unanimous on all sections listed below. One member abstained from the fee schedule language in (b) below and although all members agree with the concept of evidence-based medicine and treatment guidelines, two believed the language contained in section (c) should be eliminated.

Amend AS 23.30.097 to take effect January 1, 2011 to read as follows:

(a) All fees and other charges for medical treatment or service are subject to regulation by the board consistent with this section. A fee or other charge for medical treatment or service may not exceed the lowest of

(1) the fee schedule as published by the department under (b) of this section; [THE USUAL, CUSTOMARY, AND REASONABLE FEES FOR THE TREATMENT OR SERVICE IN THE COMMUNITY IN WHICH IT IS RENDERED, FOR TREATMENT OR SERVICE, (A) PROVIDED BEFORE AUGUST 1, 2007, NOT TO EXCEED THE FEES IN THE FEE

SCHEDULE SPECIFIED BY THE BOARD IN ITS PUBLISHED BULLETIN DATED DECEMBER 1, 2004; (B) PROVIDED ON OR AFTER AUGUST 1, 2007, BUT BEFORE MARCH 31, 2009, NOT TO EXCEED THE FEES OTHERWISE APPLICABLE IN (A) OF THIS PARAGRAPH ADJUSTED BY THE PERCENTAGE CHANGE FROM 2004 TO 2006 IN THE MEDICAL CARE COMPONENT OF THE CONSUMER PRICE INDEX FOR ALL URBAN CONSUMERS COMPILED BY THE UNITED STATES DEPARTMENT OF LABOR, BUREAU OF LABOR STATISTICS]

(2) the fee or charge for the treatment or service when provided to the general public; or

(3) the fee or charge for the treatment or service negotiated by the provider and the employer under (c) of this section.

(b) **The department shall annually establish a schedule of fees by bulletin on or before December 1 of each year to take effect on January 1 the following year. The fee schedule rates shall be established in consultation with the Medical Services Review Committee or its successor as a subcommittee of the advisory council and be based on the following standards as adopted by the Centers for Medicare and Medicaid services in effect at the time the services are provided, regardless of where services are provided:**

(1) The American Medical Association Current Procedural Terminology Codes (CPT);
(2) the Healthcare Common Procedure Coding System (HCPCS);
(3) the Medicare Severity Diagnosis-Related Groups (MS-DRG);
(4) the Ambulatory Payment Classifications;
(5) the Relative Value Units as adjusted annually using the most recently published resource-based relative value scale;
(6) The Average Wholesale Price as obtained from the current Medispan, Drug Topics Red Book or other national publication as determined by the department.

(c) **The department may establish by regulation in consultation with the Medical Services Review Committee or its successor as a subcommittee of the advisory council evidence based utilization and treatment guidelines for medical services. There is a rebuttable presumption that the utilization and treatment guidelines established by the department are correct medical treatment for injured workers.**

(d) An employer or group of employers may establish a list of preferred physicians and treatment service providers to provide medical, surgical, and other attendance or treatment services to the employer's employees under this chapter; however,

(1) the employee's right to chose the employee's attending physician under AS 23.30.095 (a) is not impaired;

(2) when given to the employee, the employer's preferred physician list must clearly state that the list is voluntary, that the employee's choice is not restricted to the list, that the employee's rights under this chapter are not impaired by choosing an attending physician from the list, and that, if the employee chooses an attending physician from the list, the employee may, in the manner provided in AS 23.30.095 , make one change of attending physician, from the list or otherwise; and

2010 Oregon Workers' Compensation Premium Rate Ranking Summary

Department of Consumer and Business Services October 2010

By Jay Dotter and Mike Manley

Oregon employers in the voluntary market pay, on average, the 41st highest workers' compensation premium rates in the nation. Oregon rates are 17 percent below those of the median state in the study.

Premium rate indices are calculated based on data from 51 jurisdictions, for rates in effect as of Jan. 1, 2010. Oregon's premium rate index is $1.69 per $100 of payroll, or 83 percent of the national median. National premium rate indices range from a low of $1.02 in North Dakota to a high of $3.33 in Montana. The 2010 median value is $2.04, which is a drop of 10 percent from the $2.26 median of the 2008 study. Three jurisdictions have an index rate in the $3.00 to $3.49 range; five are in the $2.50 to $2.99 range; 20 are in the $2.00 to $2.49 range; 16 are in the $1.50 to $1.99 range; and seven have indices under $1.50.

Figure 1. 2010 Workers' compensation premium index rates

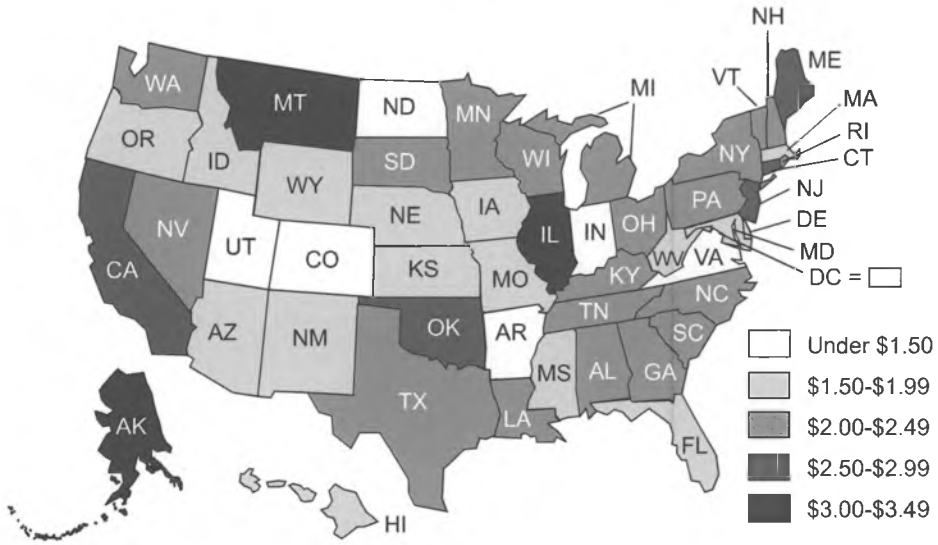


Table 1. Oregon's ranking in the top 10 classifications

Occupation	Ranking
Clerical office employees NOC	45
Salespersons - outside	48
College: professional employees and clerical	39
Physician and clerical	42
Restaurant NOC	40
Store: retail, NOC	41
Hospital: professional employees	36
Automobile service/repair center and drivers	34
Trucking: NOC - all employees and drivers	28
Health care employees – retirement, nursing, convalescent	21

This study used classification codes from the National Council on Compensation Insurance (NCCI). Of approximately 450 active classes in Oregon, 50 were selected based on relative importance as measured by share of losses in Oregon. To control for differences in industry distributions, each state's rates were weighted by 2004-2006 Oregon payroll to obtain an average manual rate for that state. Listed in Table 1 are Oregon's rankings in the top 10 of the 50 classifications used.

Table 2 (on the back) contains the premium rate ranking for all 51 jurisdictions.

Table 2. Workers' compensation premium rate ranking

2010 Ranking	2008 Ranking	State	Index Rate	Percent of study median	Effective Date

51	51	North Dakota	1.02	50%	July 1, 2009

Notes: Starting with the 2008 study, when two or more states' Index Rate values are the same, they are assigned the same ranking. The index rates reflect adjustments for the characteristics of each individual state's residual market. Rates vary by classification and insurer in each state. Actual cost to an employer can be adjusted by the employer's experience rating, premium discount, retrospective rating, and dividends. Link to previous reports and summaries.

Employers can reduce their workers' compensation rates through accident prevention, safety training, and by helping injured workers return to work quickly.

In compliance with the Americans with Disabilities Act (ADA), this publication is available in alternative formats. Please call 503-378-8254.

Sectional Analysis

House Bill 13

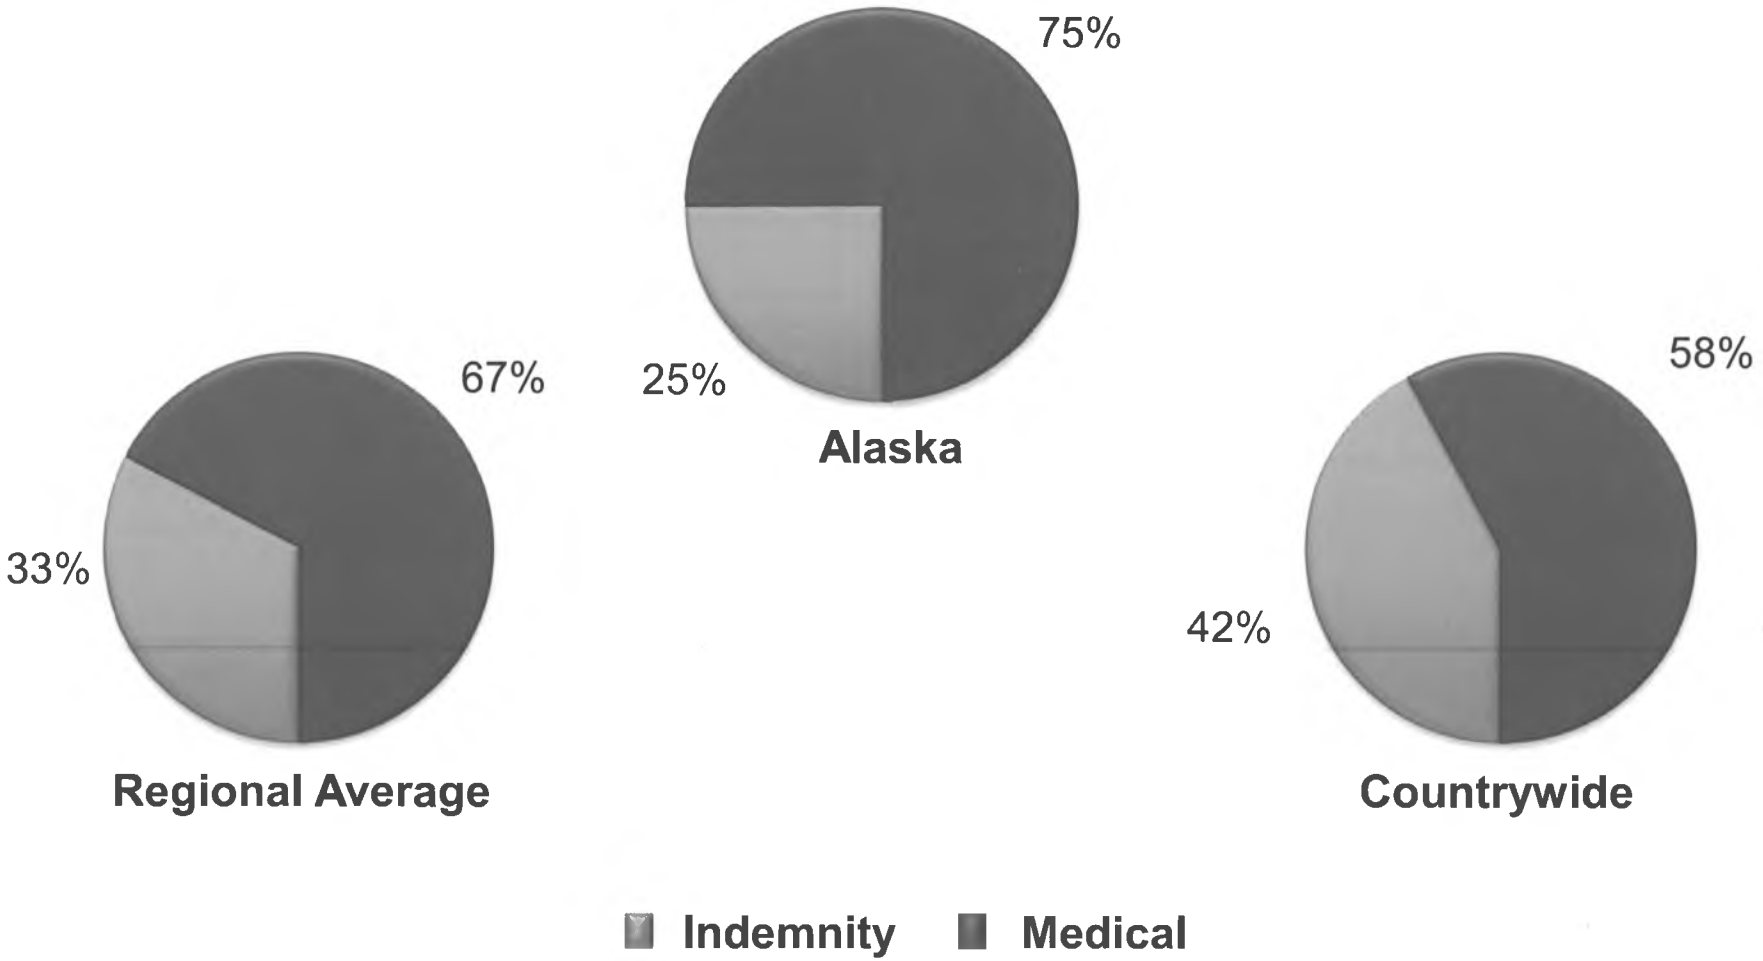
"An Act relating to fees and charges for medical treatment or services as they relate to workers' compensation; and providing for an effective date."

This is a summary only. Note that this sectional analysis should not be considered an authoritative interpretation of the bill and the bill itself is the best statement of its contents.

Section 1. Amends AS 23.30.097(a) to provide that after December 31, 2010, the fee may not exceed the usual, customary and reasonable charges in a fee schedule adopted by the board which must include the most recent Current Procedural Terminology codes maintained by the American Medical Association for category I, II and III medical services and the Health Care Procedure Coding System for medical supplies, injections, emergency transportations and other medically related services. The fee schedule must reflect the cost in the geographical area where services are provided and is set at the 90th percentile.

Section 2. Provides for an immediate effective date under AS 01.10.070(c)

Email: Representative_Kurt_Olson@legis.state.ak.us



Alaska Medical Average Cost per Case vs. Countrywide

* Countrywide figure is preliminary

schedule conversion factor and the education and promotion of EBM as defined by Sackett and the ultimate adoption of EBM treatment guidelines are necessary to effectively control medical costs.

The committee also finds, however, the adoption of EBM treatment guideline requires greater study and public involvement than this committee has managed to garner. It may be wise to view this as a public health intervention since it will affect thousands of people, thus requiring careful thought, planning and attention to public perception and buy-in. Selection and adoption of treatment guidelines with over-emphasis on cost control without explicit focus on the benefits of changes to workers, coupled with overly-hasty and poorly-planned implementation can cause widespread confusion, needless system disruption and delays, and resistance by system participants who might otherwise cooperate as occurred in California. Further study with more public involvement and discussion of the purpose, anticipated benefits and intended outcomes of guidelines adoption is likely needed before practice guidelines can be implemented.

D. Other Methods for Improving Workers' Compensation. During its study of various medical cost control methods employed in other jurisdictions, the committee has realized the vital role advisory councils play in the development and improvement of workers' compensation systems throughout North America. Although Alaska has attempted to promote change through the efforts of an informal *ad hoc* group, the committee believes that a formal advisory council should be statutorily created to monitor the performance of the Alaska workers' compensation system and, on an on-going basis, make recommendations to reduce injuries and improve the effectiveness of care delivered to injured workers and the overall outcomes produced for injured workers, their employers and the state's overall economic and social well-being. The establishment of such a council would not only assist in providing the public involvement necessary to implement treatment guidelines but could play a central role in the improvement of Alaska's workers' compensation system as a whole through adoption of the framework, model, and process offered by The 60 Summits Project. The minority while in favor of creating an advisory council believes that a medical services review committee that is more medically dominated is important to maintain to address areas requiring more specialized knowledge and medical consensus. The minority suggests that joint meetings could be utilized where needed as in a 60 Summits process.

IX. RECOMMENDATIONS. Based on the above, the committee recommends as follows:

A. Medical Costs. The committee was not unanimous on all sections listed below. One member abstained from the fee schedule language in (b) below and although all members agree with the concept of evidence-based medicine and treatment guidelines, two believed the language contained in section (c) should be eliminated.

Amend AS 23.30.097 to take effect January 1, 2011 to read as follows:

(a) All fees and other charges for medical treatment or service are subject to regulation by the board consistent with this section. A fee or other charge for medical treatment or service may not exceed the lowest of

(1) the fee schedule as published by the department under (b) of this section; [THE USUAL, CUSTOMARY, AND REASONABLE FEES FOR THE TREATMENT OR SERVICE IN THE COMMUNITY IN WHICH IT IS RENDERED, FOR TREATMENT OR SERVICE, (A) PROVIDED BEFORE AUGUST 1, 2007, NOT TO EXCEED THE FEES IN THE FEE

SCHEDULE SPECIFIED BY THE BOARD IN ITS PUBLISHED BULLETIN DATED DECEMBER 1, 2004; (B) PROVIDED ON OR AFTER AUGUST 1, 2007, BUT BEFORE MARCH 31, 2009, NOT TO EXCEED THE FEES OTHERWISE APPLICABLE IN (A) OF THIS PARAGRAPH ADJUSTED BY THE PERCENTAGE CHANGE FROM 2004 TO 2006 IN THE MEDICAL CARE COMPONENT OF THE CONSUMER PRICE INDEX FOR ALL URBAN CONSUMERS COMPILED BY THE UNITED STATES DEPARTMENT OF LABOR, BUREAU OF LABOR STATISTICS]

(2) the fee or charge for the treatment or service when provided to the general public; or

(3) the fee or charge for the treatment or service negotiated by the provider and the employer under (c) of this section.

(b) **The department shall annually establish a schedule of fees by bulletin on or before December 1 of each year to take effect on January 1 the following year. The fee schedule rates shall be established in consultation with the Medical Services Review Committee or its successor as a subcommittee of the advisory council and be based on the following standards as adopted by the Centers for Medicare and Medicaid services in effect at the time the services are provided, regardless of where services are provided:**

(1) The American Medical Association Current Procedural Terminology Codes (CPT);
(2) the Healthcare Common Procedure Coding System (HCPCS);
(3) the Medicare Severity Diagnosis-Related Groups (MS-DRG);
(4) the Ambulatory Payment Classifications;
(5) the Relative Value Units as adjusted annually using the most recently published resource-based relative value scale;
(6) The Average Wholesale Price as obtained from the current Medispan, Drug Topics Red Book or other national publication as determined by the department.

(c) **The department may establish by regulation in consultation with the Medical Services Review Committee or its successor as a subcommittee of the advisory council evidence based utilization and treatment guidelines for medical services. There is a rebuttable presumption that the utilization and treatment guidelines established by the department are correct medical treatment for injured workers.**

(d) An employer or group of employers may establish a list of preferred physicians and treatment service providers to provide medical, surgical, and other attendance or treatment services to the employer's employees under this chapter; however,

(1) the employee's right to chose the employee's attending physician under AS 23.30.095 (a) is not impaired;

(2) when given to the employee, the employer's preferred physician list must clearly state that the list is voluntary, that the employee's choice is not restricted to the list, that the employee's rights under this chapter are not impaired by choosing an attending physician from the list, and that, if the employee chooses an attending physician from the list, the employee may, in the manner provided in AS 23.30.095 , make one change of attending physician, from the list or otherwise; and

2010 Oregon Workers' Compensation Premium Rate Ranking Summary

Department of Consumer and Business Services October 2010

By Jay Dotter and Mike Manley

Oregon employers in the voluntary market pay, on average, the 41st highest workers' compensation premium rates in the nation. Oregon rates are 17 percent below those of the median state in the study.

Premium rate indices are calculated based on data from 51 jurisdictions, for rates in effect as of Jan. 1, 2010. Oregon's premium rate index is $1.69 per $100 of payroll, or 83 percent of the national median. National premium rate indices range from a low of $1.02 in North Dakota to a high of $3.33 in Montana. The 2010 median value is $2.04, which is a drop of 10 percent from the $2.26 median of the 2008 study. Three jurisdictions have an index rate in the $3.00 to $3.49 range; five are in the $2.50 to $2.99 range; 20 are in the $2.00 to $2.49 range; 16 are in the $1.50 to $1.99 range; and seven have indices under $1.50.

Figure 1. 2010 Workers' compensation premium index rates

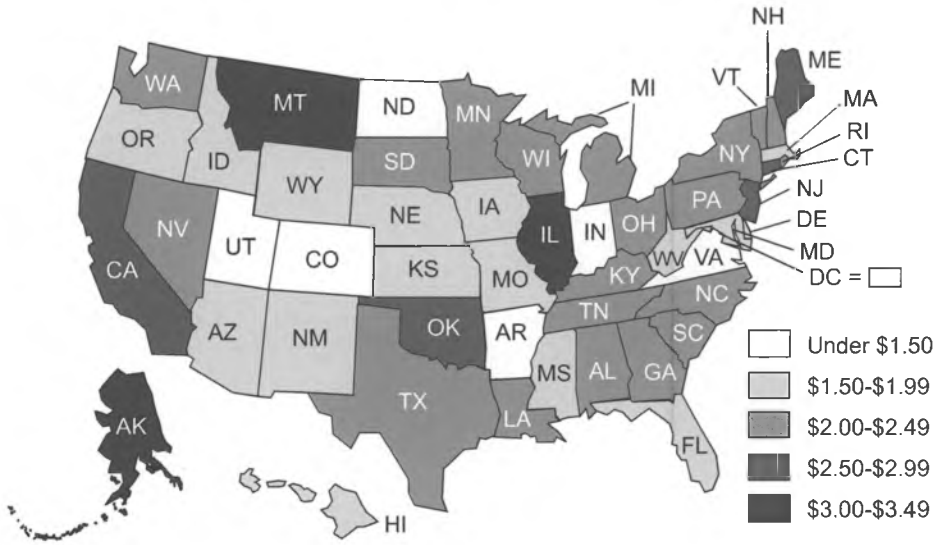

Table 1. Oregon's ranking in the top 10 classifications

Occupation	Ranking
Clerical office employees NOC	45
Salespersons - outside	48
College: professional employees and clerical	39
Physician and clerical	42
Restaurant NOC	40
Store: retail, NOC	41
Hospital: professional employees	36
Automobile service/repair center and drivers	34
Trucking: NOC - all employees and drivers	28
Health care employees – retirement, nursing, convalescent	21

This study used classification codes from the National Council on Compensation Insurance (NCCI). Of approximately 450 active classes in Oregon, 50 were selected based on relative importance as measured by share of losses in Oregon. To control for differences in industry distributions, each state's rates were weighted by 2004-2006 Oregon payroll to obtain an average manual rate for that state. Listed in Table 1 are Oregon's rankings in the top 10 of the 50 classifications used.

Table 2 (on the back) contains the premium rate ranking for all 51 jurisdictions.

Table 2. Workers' compensation premium rate ranking

2010 Ranking	2008 Ranking	State	Index Rate	Percent of study median	Effective Date
1	2	Montana	3.33	163%	July 1, 2009

A BILL

FOR AN ACT ENTITLED

"An Act extending the senior benefits payment program; and relating to income allowances for medical assistance recipients and Alaska Pioneers' Homes and Alaska Veterans' Homes residents."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 47.45 is amended by adding a new section to read:

Article 4. Long-term Care Allowance.

Sec. 47.45.400. Long-term care allowance. (a) The department shall exclude a personal needs allowance of $200 a month from the income calculation made for the reimbursed cost of long-term care facility services, including swing-bed facility services, paid by the department for a person who is a recipient of medical assistance benefits under AS 47.07.020.

(b) The department shall pay a personal needs allowance of $200 a month to a resident of a long-term care facility in the state who is without income or resources.

(c) In this section, "long-term care facility" means an establishment, other than

an Alaska Pioneers' Home or an Alaska Veterans' Home, that is

(1) licensed by the department under AS 47.32 as a skilled nursing facility or intermediate care facility; or

(2) owned or operated as a skilled nursing facility or intermediate care facility by the United States, an Indian tribe, or a tribal organization and exempt from state licensure under applicable law.

* **Sec. 2.** AS 47.55.020(b) is amended to read:

(b) Every person admitted to a home who receives income from any source in excess of **$200** [$100] a month shall be required by the department to pay the excess to the department immediately upon receipt of the money in payment, or part payment, of the cost of the person's care. However, the department may not require in any month the payment of an amount greater than the monthly rate set under AS 47.55.030(b) except to satisfy indebtedness incurred under AS 47.55.070. The department may not evict a person from a home if the income and assets of the person are insufficient to pay the monthly rate set under AS 47.55.030(b) and the person is otherwise in compliance with requirements under this chapter.

* **Sec. 3.** AS 47.55.020(c) is amended to read:

(c) At the end of each month, the payments made under (b) of this section shall be transmitted to the commissioner of revenue. The department **shall** [MAY] pay the sum of **$200** [$100] a month to a resident **who is** without **income or resources** [MONEY].

* **Sec. 4.** AS 47.55.020(d) is amended to read:

(d) Notwithstanding AS 47.55.070 and (b) of this section, a resident of a home whose income, assets, and other resources are insufficient to pay the monthly rate set under AS 47.55.030(b), and who does not have private insurance to cover the cost of care, qualifies for payment assistance if the resident is otherwise in compliance with requirements under this chapter. The amount of payment assistance equals the amount needed, when added to other income and assets of the resident, to pay the monthly rate set under AS 47.55.030(b). Payment assistance received by a home resident is a debt to the state. In determining the amount of payment assistance for which a home resident qualifies, the following income, assets, and other resources of the resident

shall be disregarded:

(1) income from any source in an amount up to **$200** [$100] a month as established by the department by regulation;

(2) the following assets received under 43 U.S.C. 1601 et seq. (Alaska Native Claims Settlement Act):

(A) cash dividends and other income equal to at least $2,000 as established by the department by regulation;

(B) stock;

(C) noncash dividends from stock; and

(D) land;

(3) a permanent fund dividend issued under AS 43.23;

(4) compensation to volunteers under the federal retired and senior volunteers (42 U.S.C. 5001), foster grandparents (42 U.S.C. 5011), and senior companion (42 U.S.C. 5013) programs made in accordance with 42 U.S.C. 5044(f);

(5) federal World War II restitution payments made under 50 U.S.C. App. 1989b-4 and c-5;

(6) payments under AS 18.67 (Violent Crimes Compensation Board);

(7) an amount, determined by the department by regulation, that is sufficient for burial expenses of the resident, the resident's spouse, and dependents of the resident;

(8) real property being used as the primary residence of the resident's spouse or a dependent of the resident;

(9) other real or personal property equal to at least a total value of up to $10,000 as established by the department by regulation;

(10) federal payments that are excluded by law from income for federal assistance purposes.

* **Sec. 5.** Section 4, ch. 1, FSSLA 2007, is amended to read:

Sec. 4. AS 09.38.015(a)(11); AS 47.45.301, 47.45.302, 47.45.304, 47.45.306, 47.45.308, and 47.45.309 are repealed June 30, **2015** [2011].

(Revised 1/27/2011 OMB)

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SCSHB016(FIN)
2011 LEGISLATIVE SESSION

Analysis:

The Pioneer Home Payment Assistance Program currently allows resident to retain $100 for a personal needs allowance. Increasing the personal needs allowance to $200 will result in $158,400 ($100 x 132 payment assistance residents x 12 months) in lost revenue to the Alaska Pioneer Homes.
Currently three residents have no income. We consider this to have an insignificant impact on this fiscal analysis.

Why this fiscal note differs from previous version (if initial version, please note as such)

In addition to reauthorizing the Senior Benefits Payment Program, this legislation also increases the personal needs allowance for residents of long-term care facilities, Alaska Pioneers' Homes, and Alaska Veterans' Homes to $200 per month.

Prepared by: Kimberli Poppe-Smart, Deputy Commissioner
Division: Mediciad Services Director, Health Care Services
Phone 907-334-2520

Date 3/28/2011

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SCSHB016(FIN)
2011 LEGISLATIVE SESSION

Analysis:

The Senior Benefits Payment Program helps low income seniors who are age 65 or older remain independent in the community by providing a monthly income supplement to help meet their basic needs, such as food and housing. Currently the program is set to expire June 30, 2011.

This bill increases the personal needs allowance for residents of long-term care facilities, Alaska Pioneers' Homes, and Alaska Veterans' Homes to $200 per month. Medicaid is the payer of last resort, and will pay for the medical services that are not paid by other means.

It is estimated that of the 502 Medicaid recipients in nursing homes, 346 individuals will need to have their Medicaid contributions increased by $125 per month. The $125 increase in their personal needs allowances will reduce the amount they are contributing for medical care by $125. (346 x $125) x 12 (months) = $519,000.

It is assumed that the federal match will be 50% in future years.

Why this fiscal note differs from previous version (if initial version, please note as such)

In addition to reauthorizing the Senior Benefits Payment Program, this legislation also requires the department to increase the amount of monthly income that nursing home residents are allowed to keep for their personal needs from $75 to $200 a month if the resident is a Medicaid recipient and 65 years of age or older. It also requires the department to increase the monthly amount it pays to nursing home residents who are age 65 or older and have no other income from $75 to $200 a month.

(Revised 1/27/2011 OMB)

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SCSHB016(FIN)
2011 LEGISLATIVE SESSION

Analysis:

Assumptions:
* The legislation will become effective July 1, 2012.
* The amount paid to nursing home residents with no other income will also apply to nursing home residents who are under the age of 65.
* 70 individuals a month will be impacted by the increased personal needs payment. (22 are age 65 or older and 48 are under the age of 65.)
* This number is expected to remain constant through FY 2017.
* The increased cost per person/month will be $125. $200 future payment - $75 current payment = $125.

Additional Cost for FY 2012 through FY 2017 = $105.0/year
* 70 individuals/month x $125 payment x 12 months = $105.0

Why this fiscal note differs from previous version (if initial version, please note as such)

In addition to re-authorizing the Senior Benefits Payment Program, this legislation also increases the personal needs allowance for residents of long term care facilities, Alaska Pioneers' Homes, and Alaska Veterans' Homes to $200 a month. The governor's FY12 budget includes an increment of $1,968.1 to fund projected caseload growth in FY12.

Note: Other fiscal notes address the costs associated with the increased personal needs allowance.

Approved by: Alison Elgee, Assistant Commissioner — Date 3/29/2011
DHSS Finance & Management Services

Analysis:

The Senior Benefits Payment Program helps low income seniors who are age 65 or older remain independent in the community by providing a monthly income supplement to help meet their basic needs, such as food and housing. Currently, the program is set to expire on June 30, 2011. This legislation continues the program through June 30, 2015. As of December 2010, the current program enrollment was 10,093. The number and percent of seniors at each payment level was:

* $250 - 1,071 (10.6%)
* $175 - 3,872 (38.4%)
* $125 - 5,150 (51.0%)

Assumptions:

* Current staffing levels for the program will be maintained and will consist of one Eligibility Technician III, four Eligibility Technician I's, and one Office Assistant I.

* Annual expenditures for Personal Services, Travel, Contractual, and Supplies will remain constant for FY 2012 through FY 2015.

* Projected grant expenditures in FY 2011 are expected to be about $21.0 million. A supplemental for $1.3 million has been requested in FY 2011.

* Annual grant expenditures for FY 2012 are expected to increase in response to a projected caseload growth of 3.6%.

* Annual grant expenditures for FY 2013 through FY 2015 are expected to increase in response to a projected caseload growth of 3% annually.

* Grant expenditures for FY 2012 through FY 2015 are expected to increase as follows:
-- 3.55 percent in FY 2012
-- 2.78 percent in FY 2013
-- 2.78 percent in FY 2014
-- 2.77 percent in FY 2015

See attached projected caseload and grant expenditures.

STATE OF ALASKA
DEPT. OF HEALTH AND SOCIAL SERVICES
OFFICE OF THE COMMISSIONER

SEAN PARNELL, GOVERNOR

P.O. BOX 110601
JUNEAU, ALASKA 99811-0601
PHONE: (907) 465-3030
FAX: (907) 465-3068

Response to Senate Finance Questions from February 7, 2011
Submitted: February 22, 2011

When legislation established the Senior Benefits Program in 2007 the Division of Public Assistance estimated that four Eligibility Technicians I positions, one Eligibility Technician III and 1 administrative support position would be needed to serve the projected number of program participants. Despite growth in the service population since 2007, no additional staff has been needed to manage the work.

The Senior Benefits Program Eligibility Technician I (ET I) accepts applications for assistance (including renewal or re-certification applications), determines eligibility, pursues and verifies needed documentation, and authorizes benefits. The ET I also acts on reports of change from program participants and addresses client inquiries about their case status. The ET I documents all case actions and composes notices that summarize the eligibility determination.

The Eligibility Technician III (ET III) is the unit's lead worker, office manager and program policy expert. The ET III conducts quality assurance case reviews, responds to the more complex client inquiries, assists in the Fair Hearing process, conducts outreach and performs other tasks associated with the administration of the program.

An Office Assistant I (OA I) is the only administrative support personnel for the office. The OAI registers applications, handles incoming and outgoing mail, and is the office receptionist.

Each Eligibility Technician I actively manages an average caseload of approximately 2,500 program participants. The Senior Benefits Program Office receives about 220 new applications and approximately 850 renewal applications each month.

The caseload is not as static as it might seem. In addition to the more than 1,000 new and renewal applications received monthly, over 200 cases are closed each month. Roughly 32 percent of the closures are due to the death of the recipient, 15 percent are because the elder has left the state, and 12 percent are due to the elder moving to a nursing home or a Pioneer Home.

The amount of time it takes to process an application depends on the complexity of the information contained on the application and whether or not the applicant provided all of the needed information. A simple application (one person household with income only from Social Security) takes an average of 15 to 20 minutes to process. More complex cases (e.g., multiple sources of income) may take up to 30 minutes.

Response to Senate Finance Questions from February 7, 2011

Approximately 40 to 50 percent of initial applications are incomplete. Staff estimates that incomplete applications can take 30 to 45 minutes to complete. Incomplete applications take longer to process because the ET makes a concerted effort to contact the applicant to secure the missing information or to pursue verification through interfaces and collateral contacts. When these efforts fail a notice is drafted to request the missing information. Because of the efforts of the ET to pursue missing, incomplete, or questionable information it is only necessary to pend approximately 25 to 30 percent of incomplete applications.

It takes an average of 10 minutes to process renewal applications as long as there are no changes in the applicant's circumstances. As with an initial application the ET reviews the application for completeness, checks system interfaces, reviews prior case notes, authorizes benefits, sends notices, and documents all actions taken on the application. If there are changes reported on the renewal application, it may be necessary to contact the customer for additional information or clarification, which increases the amount of time needed to complete the eligibility determination.

Once an applicant is determined eligible, the Eligibility Information System (EIS) automatically issues the approved benefits for future months until a renewal application is required or the client reports a change in their circumstances.

Each month the office receives approximately 200 reports of change (changes in residence, reports of death, new income, etc.) that require action by an ET. The processing time for reports of change varies depending on the nature of the change. It can take from five minutes to as long as 10 to 15 minutes to process a report of change if it entails a change in benefits or requires verifying the information provided by the client.

The office receives 40 to 50 calls per day during peak periods, which include the week benefits are typically issued for on-going cases and after renewal applications are mailed out. Responding to calls takes on average 10 minutes and longer if interpreter services are needed.

Approximately 40 to 50 people come to the office each month to inquire about the program, the status of their case, or to drop off an application or verification. Visits may be relatively short or quite protracted depending on the needs of the customer.

Staff must also research returned mail, which entails attempts to contact the customer to confirm the correct address or, after investigating the circumstances, closing the case for loss of contact. It is estimated that responding to return mail takes about 8 -10 hours per month. Staff also must address lost payments and re-issuance of benefits (when changes in mailing address are not reported timely, etc.). About 20 of these requests are received monthly and it takes about 10 -20 minutes to discuss the situation with the client and to process the stop-payment for a warrant and to document the changed information.

DATE: February 9, 2011

TO: Senate Finance Committee

FROM: Ron Kreher
Acting Director of Public Assistance

SUBJECT: HB 16 Questions from Finance Committee Hearing

1. Why are Pioneer Home residents ineligible for Senior Benefits payments? Is it everyone in the PH?

Response: Pioneer home residents are not eligible for Senior Benefits payments. Most low-income individuals in institutions or Pioneer Homes are required, as a condition of Medicaid or the Pioneer Homes payment assistance program, to contribute most of their income towards the cost of the services they receive in those facilities. In the case of residents of Pioneer Homes, the Division of Pioneer Homes heavily subsidizes its residents. The Pioneer Homes have a payment assistance program that helps to address the needs of low-income individuals living in their facilities who are unable to cover the full costs of residing in the facility.

If residents of these facilities received Senior Benefit payments, it would increase the amount of money they would need to contribute toward the cost of their care. In most cases, the offset would be dollar for dollar. In the case of Medicaid, Senior Benefit payments, which are 100% General Fund, would effectively offset Medicaid payments, which are 50% federal funds. So, it would result in a net increase in General Fund expenditure with little to no benefit to the client.

2. How do Pioneer Home residents with very low income pay for their personal needs, such as haircuts?

Response: Medicaid and the Pioneer Homes payment assistance program participants are required to contribute most of their income toward the cost of their care. AS 47.55.020(b) exempts $100 of a residents income from the room and board payment. AS 47.55.020(c) and 7 AAC 74.050 authorizes the department to pay a personal needs allowance of $100 per month for residents who don't have money. The personal needs allowance is for the resident to purchase miscellaneous items they may need or want.

3. Can seniors receive Senior Benefits payments while they are not present in Alaska? (What provisions are in place if a senior needs to go outside of Alaska due to medical reasons? Are Senior Benefit checks sent out of state?).

Response: There is allowance for seniors to receive a Senior Benefits payment while not present in Alaska. According to state statute (AS 47.45.304), an eligible individual who leaves the state may not receive a cash benefit under AS 47.45.302 during the absence unless the individual absence is temporary and is for one of the following reasons:

(1) to receive medical treatment;

(2) to accompany the individual's family member who is receiving medical treatment outside the state; or

(3) for a vacation, business trip, or other absence of less than 30 consecutive days, unless the individual has applied for and received a time extension from the department for special circumstances.

4. How are Alaska seniors, particularly those in rural areas, advised of the Senior Benefits program? (The concern is that many elderly in rural areas do not have access to, nor do they use, computers.)

Response: The department performs outreach for the Senior Benefits Payment program in several ways. The department maintains information about the Senior Benefits program on its public assistance website. In addition to computer based outreach, it advertizes the Senior Benefits Program through TV ads, sends letters and flyers to rural community leaders asking them to advise seniors in their communities about the program; and makes application forms and informational flyers available to senior centers throughout the state. In addition, Adult Public Assistance recipients who are age 65 or older are advised to apply for the program when public assistance records indicate the individual is not receiving a Senior Benefits payment.

5. Provide more detailed information about ineligible seniors who live in Pioneer Homes, Veterans Homes and other nursing homes. How many seniors living in those facilities are on Medicaid? We understand the Medicaid recipients not qualifying as this would reduce the federal match and increase the state match. But what about those seniors who would otherwise qualify based on income but someone else (such as family) pays the bill for the nursing home?

Response: There were 454 residents in the Pioneer Homes on 12/31/2010.

- 95 were on an Older Alaskans Medicaid waiver.
- 136 were on the Payment Assistance program.
- 223 were private pay. However, income to the individual (such as Senior Benefits), would be required to go toward the cost of care per the Medicaid and the Pioneer Homes payment assistance program.

6. Provide more detailed information to justify the need for six employees to process Senior Benefit program. What is each person's job description, are they all full time, what are their caseloads, etc.?

Response: Division of Public Assistance determined the existing staffing levels are necessary to administer the Senior Benefits program after more than three years of program operation. The unit consists of one Eligibility Technician III position, four Eligibility Technician I positions, and one Office Assistant position. This unit handles a Senior Benefits caseload of over 10,000 individuals. In addition to accepting and processing new applications, public assistance staff process annual reviews and act on "reports of change" throughout the year.

House Bill 16
Sponsor Statement

Short Title: Extend Senior Benefits Payment Program

House Bill 16 would extend the Alaska Senior Benefits Program to June 30, 2015.

The Senior Benefits Program provides monthly cash assistance to state residents age 65 years or older whose household income does not exceed 175% of the federal poverty guidelines for Alaska. Specifically, the program pays:

- $250 per month to individuals with income of 75% or less of FPG
- $175 per month to individuals with income between 75% and 100% of FPG
- $125 per month to individuals with income between 100% and 175% of FPG

The program assists approximately 10,000 Alaskan seniors, with a total cost of $21 million projected for this fiscal year. If it is not extended, the program will sunset on June 30, 2011.

Staff Contact: Rena Delbridge 465-6959

Revised 2/1/2011

House Bill 16 Background Information
Alaska Senior Benefits Program Statutes

Title 09. CODE OF CIVIL PROCEDURE

Chapter 09.38. ALASKA EXEMPTIONS ACT

(a) An individual is entitled to exemption of the following property:

(11) [See delayed amendment note]. benefits paid or payable under AS 47.45.301 - 47.45.309.

Sec. 47.45.301. Alaska senior benefits payment program. [See delayed repeal note]..

(a) The Alaska senior benefits payment program is established in the Department of Health and Social Services to provide cash benefits as far as practicable under appropriations provided by law.

(b) The department shall administer the program and adopt regulations under AS 44.62 to carry out the purposes of the program.

(c) If the department estimates that appropriations for the program are insufficient to meet the demands of the program in a fiscal year, the department may reduce or eliminate the cash benefit available to recipients.

Sec. 47.45.302. Cash assistance benefit. [See delayed repeal note]..

(a) An individual is eligible for a cash assistance benefit under the program if the individual

(1) is 65 years of age or older;

(2) is a resident of the state;

(3) has a household income that does not exceed 175 percent of the annual federal poverty line for Alaska, as determined by the United States Department of Health and Human Services and revised under 42 U.S.C. 9902(2);

(4) has not received a longevity bonus payment under AS 47.45.010 - 47.45.160 for the same period; and

(5) applies on a form provided by the department; the department may use an abbreviated form for an individual who received a payment under an assistance program for seniors that paid $120 a month and was administered by the department on or before the effective date of this section.

(b) An eligible individual shall receive a monthly cash assistance payment beginning on August 1, 2007, as follows:

(1) $250 if the individual's household income does not exceed 75 percent of the federal poverty line for Alaska;

(2) $175 if the individual's household income does not exceed 100 percent but is above 75 percent of the federal poverty line for Alaska;

(3) $125 if the individual's household income does not exceed 175 percent but is above 100 percent of the federal poverty line for Alaska.

(c) Cash assistance provided under this section is subject to appropriation.

Sec. 47.45.304. Continuation of benefits. [See delayed repeal note]..

An eligible individual who leaves the state may not receive a cash benefit under AS 47.45.302 during the absence unless the individual's absence is temporary and is for one of the following reasons:

(1) to receive medical treatment for the individual;

(2) to accompany the individual's family member who is receiving medical treatment outside the state; or

(3) for a vacation, business trip, or other absence of less than 30 consecutive days, unless the individual has applied for and received a time extension from the department for special circumstances.

Sec. 47.45.306. Appeal rights. [See delayed repeal note]..
An individual who receives a determination from the department that denies, limits, or modifies a cash benefit under AS 47.45.301 - 47.45.309, other than a determination under AS 47.45.301 (c) to reduce or eliminate benefits, may request a hearing before the department under regulations adopted by the department.

Sec. 47.45.308. Ability to recover or recoup improper assistance or benefits. [See delayed repeal note]..
An individual is liable to the department for the value of assistance or benefits improperly paid to the individual under AS 47.45.302 or former AS 47.45.310 or 47.45.320 if the improper payment was based on inaccurate or incomplete information provided by the individual. In a civil action brought by the state to recover from the individual the value of assistance or benefits improperly paid under AS 47.45.302 or former AS 47.45.310 or 47.45.320, the state may recover from the individual the costs of investigation and prosecution of the civil action, including attorney fees as determined under court rules.

Sec. 47.45.309. Definitions. [See delayed repeal note]..
In AS 47.45.301 - 47.45.309,

(1) "department" means the Department of Health and Social Services;

(2) "eligible individual" means an individual who meets the requirements of AS 47.45.301 - 47.45.309 and regulations adopted under those statutes for eligibility for the program;

(3) "family member" means a person who is

(A) legally related to an eligible individual through marriage or guardianship; or

(B) an eligible individual's sibling, parent, grandparent, son, daughter, grandson, granddaughter, uncle, aunt, niece, nephew, or first cousin;

(4) "program" means the senior benefits payment program established in AS 47.45.301 - 47.45.309;

(5) "resident" has the meaning given in AS 47.25.430 (a).

January 24, 2011

The Honorable Mike Hawker
Member of the House of Representatives
Alaska Capitol, Room 502
Juneau, AK 99801-1182

RE: HB 16 (Hawker) – Support

Dear Representative Hawker:

The Alaska Food Coalition is pleased to express our support for HB 16 which will extend the Senior Benefits Program for another four years. At least 1/3 of the Alaska Food Coalition membership serves the senior population. Our members identify hunger, or food insecurity, as a growing problem among the senior population in Alaska.

The Hunger in America 2010 study found 42% of adult pantry and soup kitchen clients in Alaska were 50 and older. Of those pantry visitors 65 and older, 57.8% told us they experienced low or very low food security; they worry about or don't know if they will have enough food. The study also found, of all pantry clients in Alaska:

- 43% had to choose between buying food and paying for utilities
- 45% had to choose between buying food and paying for rent or mortgage
- 35% had to choose between buying food and medicine

Among households with 1 senior member age 65 or older, 21.8% participate in a home delivered meal program. Agencies who deliver home meals have reported a 20% increase in requests for services. The Salvation Army Older Alaskans Program in Anchorage estimates there are twice as many seniors in Anchorage in need of their services. The Yakutat Senior Center serves an average of 42 meals a day; double what they served the previous year. According to data from the Alaska Department of Public Assistance, food stamp recipients age 60 and over increased by 22% in 2009. The need is clear; our low-income seniors need help paying for basic needs.

We want all Alaskans to be hunger free, food secure. There is no question the Senior Benefits Program has helped Alaskan seniors put food on their tables, and will continue to do so with continued funding. We appreciate your leadership on this issue and wish to express our sincere thanks to you for helping Alaska Seniors live full and productive lives.

We ware also thankful to Representatives Millet, Lynn, Gara and Tuck for signing up to co-sponsor HB16.

Please do not hesitate to contact Vanessa Salinas, Alaska Food Coalition Manager if you have any questions, 907-222-3103 afc@foodbankofalaska.org

Thank you for all that you do for Alaska.

Sincerely,

Heather Harris
Alaska Food Coalition President

CC: Representative Charisse Millet
Representative Les Gara
Representative Bob Lynn
Representative Chris Tuck

Senior BENEFITS PROGRAM

Fact Sheet
January 24, 2011

The Alaska Senior Benefits Payment Program was established on August 1, 2007 and, unless reauthorized, is set to end on June 30, 2011. It pays cash benefits to Alaskans who are age 65 or older and have low to moderate income. Cash payments are $125, $175, or $250 each month depending on income.

Recipients

- There were 10,093 Senior Benefits recipients as of December 2010. Of these, 5,534 were also Adult Public Assistance recipients.

- Number and percent of seniors at each payment level in December 2010.
  - ✓ $250 - 1,071 (10.6%)
  - ✓ $175 - 3,872 (38.4%)
  - ✓ $125 - 5,150 (51.0%)

- Average age of recipients is 75. The maximum age is 105.

Program Expenditures

- Currently, projected program benefit expenditures for FY 2011 are $21.0 million. Projected benefit expenditures for FY 2012 are $21.7 million.

Eligibility and Payment

- Eligibility and payment amount is based on gross annual income (before any deductions are taken for taxes, Medicare premiums, etc.).

Senior Household Size	**Senior Benefits Program Gross Annual Income Limit** Effective 3/1/2011		
	$250 monthly payment	**$175 monthly payment**	**$125 monthly payment**
Individual	$10,200 ($850 per month)	$13,600 ($1,134 per month)	$23,800 ($1,984 per month)
Married Couple	$13,785 ($1,149 per month)	$18,380 ($1,532 per month)	$32,165 ($2,680 per month)

- Income limits may change yearly along with Alaska's federal poverty level. The $250, $175, and $125 monthly payments correspond to 75 percent, 100 percent, and 175 percent of the federal poverty level for Alaska, respectively.

- Assets, such as savings, are not counted for eligibility.

- Payments are not available to seniors living in the following institutions:
  - ✓ Prison or jail,
  - ✓ nursing home,
  - ✓ Alaska Pioneers' Home or Alaska Veterans' Home, or
  - ✓ Public or private institution for mental disease

The Honorable Mike Hawker
Member of the House of Representatives
Alaska Capitol, Room 502
Juneau, AK 99801-1182

RE: HB 16 (Hawker)—Support

Dear Representative Hawker:

On behalf of the members of AARP in Alaska, we are pleased to indicate our very strong support for HB 16 which will extend the Senior Benefits program for another four years.

There is no doubt that the Senior Benefits program has proven to be an invaluable help to many older Alaskans who might not be able to afford to stay here without it.

We all recognize that Alaska's seniors face high health care costs as well as high energy costs.

The Senior Benefits program has allowed over 10,000 older Alaskans to deal with these costs and to remain citizens of our state.

We want Alaskans to be able to stay here after retirement. The Senior Benefits program is essential to achieve that goal.

On behalf of all those older Alaskans who may not be aware of your continued leadership on this issue, please accept our thanks for all that you have done, continue to do, and will do in the future.

We are pleased to thank Representatives Millet, Lynn, Gara and Tuck for signing up to co-sponsor HB 16.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

Barbara A. Schumacher
P.O. Box 873505
Wasilla, AK. 99687

To Whom it may concern,
Please think very carefully about the Senior Benefits Program, here in Alaska. It has been a great source of comfort & financial stability to me for the last 3 years. I shudder to think what it would mean to your Senior Constituents, who benefit so greatly from this program if it were to be discontinued
Thank you for your consideration.

Sincerely,
Barbara A. Schumacher - age 75
BARBARA A. SCHUMACHER
Wasilla, AK.

Date: January 12, 2011

To: MatSu Legislative Office

To whom it may concern;

I am the daughter of a Wasilla area resident senior citizen. It has come to my attention that the State needs to seek renewal for the Alaska Senior Citizen Benefits Program. I strongly support this program and urge the State to petition for renewal of this very important service to our Seniors. The Senior Care benefits that my mother receives allow her that tiny bit of extra wiggle room on her fixed retirement income, without which, her standard of living will become negatively affected.

Many Alaskan Seniors are in similar, or worse, situations. Without these benefits the State would surely see a rise in emergency medical care resulting from senior's not getting the medications, doctor visits, appropriate food, etc. they need because of less income.

Please support the continued funding for the Alaska Senior Citizen Benefits Program.

Sincerely,

Mrs. Katherine McLaughlin

Alaska Capitol, Room 532
Juneau, AK 99801-1182

Re: HB 16 (Hawker)
Letter of Support- Senior Benefit

Dear Co-Chairs Hoffman and Stedman:

Mabel T. Caverly Senior Services provides small grants for dental work, eyeglasses, hearing aids, prescriptions, rent, utilities, furnace repair, appliance repair, etc. We also collaborate with the Food Bank of Alaska to distribute monthly food boxes. Thanks to a partnership with Alyeska Canine Trainers, we are able to add dog and cat food to our distribution offerings. All these programs have income limits of approximately 200% of the Federal Poverty Level.

Because of these programs, nearly all our client base would be considered low income.
The average monthly income for the grants program clients who are ages 65 and older is $1,400. That includes the Senior Benefit income of $125.00.

One of our clients better explained the circumstances of a great many of seniors with very modest means much better than I ever could. "I get my social security check, pay the house payment and utilities. My check is mostly gone. Last year, I was in the doughnut hole. I couldn't afford my medications which cost $ 400 for 2. My teeth are falling out. I'm in pain. I worked all my life. I would have never thought I would have to ask for help. This is the first time in my life. At times, I don't know what to do anymore."

Please imagine life for this gentleman and so many others like him if the Senior Benefit goes away.

We would appreciate your support to extend the Senior Benefit.

Thank-you in advance for considering this matter.

Sincerely,

(s) S.B. Camery

FISCAL NOTE

STATE OF ALASKA **BILL NO.** CSHB021(FIN)
2012 LEGISLATIVE SESSION

Analysis

This bill will increase the size of the Statewide Suicide Prevention Council by one member, from a total membership of 16 to 17. The bill would add a representative from the military. In addition, the bill amends the definition of the youth member to include an age demarcation, and eliminates the requirement that the student be currently enrolled in a secondary school in Alaska.

The proposed changes will result in increased travel costs for the Council. Four meetings are held each year at varying locations. Based on historical costs, it is estimated that the additional travel costs for an additional council member will be $4,000 per year.

Alaska State Legislature

Representative Anna Fairclough – House District 17

House Bill 21

"An Act relating to the membership of the Statewide Suicide Prevention Council."

House Bill 21 would simply increase the number of members appointed to the Statewide Suicide Prevention Council from 16 members to 17 members and create an age requirement for the youth member.

The additional member would be appointed by the Governor and would give representation on the council for members of our military. Suicide among our military is on the rise and having an individual familiar with the lives and challenges our military members face on a daily basis is crucial to their overall well-being.

The new member must be one of the following; discharged from, retired from, or engaged in active duty military service or someone who is a mental health provider, social worker, or other person actively providing a health care service to discharged, retired, or active military personnel.

House Bill 21 also changes the requirement for the youth member who is appointed to the council. Currently this appointee has to be enrolled in the 9th, 10th, 11th, or 12th grade of a secondary school. This member would be changed allowing the youth to be 16 years of age when appointed, but not older than 20 years of age. This will allow our youth members to continue to serve beyond completion of their secondary school education and allow for continuity on the council.

Thank you for your consideration of this legislation. I appreciate your support of House Bill 21.

Alaska State Legislature

Representative Anna Fairclough – House District 17

CSHB 21- Explanation of Changes

1) House State Affairs Committee Change-

Page 2, line 20, following **"States"**: inserted **", including the United States Coast Guard, the Army National Guard, the Air National Guard, or a reserve unit of the armed forces of the United States,"**

This change was made to expand and specify the military service organizations which qualify for the new position on the council.

2) House Finance Committee Change-

Page 2, line 16: changed **20** years of age to **24** years of age.

This change was made to allow more continuity on the council with the high school and secondary school age member. Most young people do not complete their secondary school education by the age of 20. Moving the age to 24 will give this member the ability to serve through their secondary school completion.

Re: Letter of Support for House Bill 21 (CSHB 21)

Dear Representative Fairclough,

On behalf of the Statewide Suicide Prevention Council, I express our full support for HB 21 expanding the membership of the Council to include representatives from the veteran and military community and a wider group of youth.

In 2010, the Council received public comment during its meetings requesting representation from the military and veteran service systems on the Council. These populations are a particularly high-risk group for suicide, with high incidence of post traumatic stress disorder, depression, substance abuse, and other disorders contributing to suicide.[1] In Alaska, the Veterans Health Administration is engaged with the suicide prevention system as a partner. The state suicide prevention plan, *Casting the Net Upstream*, includes a specific strategy to increase suicide prevention efforts related to active and veteran military service members. Thus, having a representative from the veteran/military systems will be of great benefit to the Council's work.

The Council currently has a seat reserved for a high school age youth. We have discovered that these members are often appointed as juniors or seniors, which limits the time they have to serve with the Council. HB 21 serves to expand the eligibility for the youth representative to age 24, so that this member can serve a full 4 year term. Also, this better reflect the actual age group with the highest risk of suicide in Alaska – youth age 15-24.[2]

The Council supports HB 21, and we thank you for your work on behalf of – and as a member of – the Statewide Suicide Prevention Council.

Sincerely,

J. Kate Burkhart
Executive Director

cc: William Martin, Chairman

[1] *See Losing the Battle: The Challenge of Military Suicide,* Center for a New American Security (October 2011).
[2] The age-adjusted rate of suicide for young men age 15-24 in Alaska between 2000-2009 was 56.1/100,000.

From: Sami Velez-Douglas [mailto:mtsamiam@yahoo.com]
Sent: Saturday, April 16, 2011 9:20 PM
To: Rep. Anna Fairclough
Subject: CSHB21(Fin)

Dear Representative Fairclough:

I am currently a graduate student at the University of Alaska in Anchorage pursuing my Masters of Social Work degree. As part of my Policy practice course, I have been following with great interest HB 21 (now known as CSHB21(Fin)). My primary graduate research and professional interests include the analysis and development of innovative community-based programs that provide post-combat resource navigation and trauma/crisis intervention strategies.

I am a veteran of the United States Army and have held the distinct honor of serving as a federal civilian contractor at Fort Wainwright (2007) and a federal civilian employee at Fort Richardson (2008-2010). In my role as a Family Readiness Support Assistant, I worked directly with the command group of a deployable unit at Fort Richardson. Together, we implemented and sustained a comprehensive Family Readiness Program to support nearly 500 Soldiers and their family members through all phases of the unit's two-year deployment cycle -- pre-deployment, mobilization, deployment, and reintegration. Through these experiences, I have learned first-hand -- the challenges of post-combat integration can only be expressed by those who have walked that difficult path.

Combat veteran and military family member voices *must* be heard. I offer my wholehearted support for the inclusion of a *combat* veteran representative on the Statewide Suicide Prevention Council.

Please accept my deepest appreciation for sponsoring this bill, and for your service to the State of Alaska.

Sincerely,

Sami J. Douglas

SENATE CS FOR CS FOR HOUSE BILL NO. 24(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): REPRESENTATIVES OLSON, Petersen

A BILL

FOR AN ACT ENTITLED

"An Act extending the termination date of the Regulatory Commission of Alaska; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

LEGISLATIVE INTENT. In order for the legislature to evaluate the desirability of extending the Regulatory Commission of Alaska beyond June 30, 2012, it is the intent of the legislature that before January 17, 2012, the Regulatory Commission of Alaska shall provide a proposal to the legislature to reduce the statutory timeline for tariff filings that change a utility's revenue requirement or rate design.

*** Sec. 2.** AS 44.66.010(a)(3) is amended to read:

(3) Regulatory Commission of Alaska (AS 42.04.010) - June 30, **2012** [2011];

*** Sec. 3.** This Act takes effect immediately under AS 01.10.070(c).

Kate Giard, Commissioner
Regulatory Commission of Alaska
701 West Eighth Avenue, Suite 300
Anchorage, Alaska 99501-3469

April 14, 2011

Senator Lesil McGuire
State Capitol Room 125
Juneau AK, 99801

Dear Senator McGuire:

During Senate Finance yesterday, you expressed concern about a conversation I had with Mr. Kerr of Anchor Point Energy, LLC. Hopefully, the information below provides some context and explanation for my comments to Mr. Kerr in February.

The design, size and location of Anchor Point's planned pipeline was identified as a potential issue by Union Oil (Unocal) when Enstar filed "to construct a new 8-inch gas transmission pipeline to increase access to both known natural gas supplies as well as prospective exploration areas" in 2009. Anchor Point filed comments in that docket and Unocal also filed comments. Among other things, Unocal sought assurance that Anchor Point's pipeline would be established from the outset with consideration for the potential use of that pipeline by other users, stating,

> [Anchor Point's proposed] 9.3 mile pipeline will be located in the immediate vicinity of a number of other oil and gas leases including the existing Nikolavesk Unit, CIRI acreage, and state oil and gas leases held by Renaissance Alaska, LLC, Alaska Energy Alliance, LLC, Nordic Energy Partners, LLC, and Benchmark Oil & Gas Company. Companies holding this acreage should be assured from the outset that they will have access to the 9.3 mile pipeline
>
> ...
>
> ..it is clear that Anchor Point's proposed pipeline is subject to the Commission's jurisdiction under AS 42.06 and that Anchor Point will now be required to obtain a Commission certificate pursuant to AS 42.06 before commencing construction. As part of obtaining a certificate, Anchor Point will be required to design its system to accommodate third party volumes... (Emphasis added).

Enstar asserted that it was inappropriate to discuss Anchor Point's pipeline in Enstar's docket. We granted Enstar's expansion stating that we were not going to address any

extraneous matters raised. With that order, in April, 2010 I wrote a statement urging Anchor Point to apply for a certificate soon so that any disputes over the pipeline's design or access would not impede Enstar's plans to take gas in early 2011 (attached).

As Unocal noted in its comments, state law requires that a carrier must offer carriage to others, which means that design, size and route become important matters to address before a pipeline is constructed. AS 42.06.240(a) requires that a pipeline carrier may not "undertake the construction or extension of any pipeline facilities ...unless there is in force with respect to that pipeline carrier a certificate of public convenience and necessity issued by the commission authorizing those acts or operations." It would inefficient and costly for a pipeline carrier to completely build a pipeline, come for a certificate, only to find that a third party wants the pipeline sized differently. The way the law is written avoids these situations.

Anchor Point's application for a certificate was filed on December 29, 2010. In its application, Anchor Point stated, "Actual construction of the Pipeline is currently well under way as the Applicant was not aware of any requirement for advance approval."

Anchor Point lack of compliance with statute created an uncomfortable precedent. AS 42.06 offers regulatory structure for several critical pipelines in Alaska, including TAPS and other Cook Inlet natural gas pipelines. If a new pipeline can be constructed, without offering the public due process on important matters, particularly when those matters were already raised in a closely related docket, it becomes challenging to find a rational basis to enforce any provision of AS 42.06.

When a commissioner has a position about a matter pending before the RCA, there are several venues that are available. First, we can write a concurring statement, as I did in April and as commissioners have done for years. Those statements reflect the perspective of a commissioner but do not affect the overall decision in the docket. Second, we can make statements on the public record, which was the venue I had seriously considered. Those statements create a record, but are also the reflections of just one commissioner.

Emphasizing this circumstance through a public venue would make it more readily apparent that the statute had been weakened and more easily accessible to other carriers in the future as a basis for why they should not be penalized for taking similar action. So I determined not highlight the matter in the public arena, but to let Mr. Kerr know how seriously I did consider the matter.

In my conversation with Mr. Kerr, I explained how disturbing it was, to have encouraged Anchor Point in April 2010, to file early, thus allow for a full due process, to find in December, that the pipeline had been illegally constructed. I expressed that I was at least partially convinced that building the pipeline in advance of obtaining a certificate may have been a strategic step to avoid designing the pipeline to accommodate a route or size needed by other developers in the area.

I discussed other aspects of Mr. Kerr's application related to compliance with commission regulations on confidential financial matters, as I had been asked by the adjudicatory panel to review them. My comments were limited to the statutory and regulatory matters in front of the commission, just as I would have made them on the public record.

At the hearing, Mr. Kerr referred to our conversation, noted that he was very upset that someone would question his integrity, that he truly was not aware that he needed to file an application prior to construction and that he would do everything possible to comply with our statutes in the future. (attached) The Commission footnoted his promise in its final order and expressly conditioned his certificate on complying with all statutes and regulations.

Those are the facts as I know them and I would be happy to provide any additional information that you may need about the subject.

With regards,

Kate Giard

STATE OF ALASKA

THE REGULATORY COMMISSION OF ALASKA

Before Commissioners:

Robert M. Pickett, Chairman
Kate Giard
Paul F. Lisankie
T.W. Patch
Janis W. Wilson

In the Matter of the Application Filed by ALASKA PIPELINE COMPANY to Amend Certificate of Public Convenience and Necessity No. 141 to Expand Its Service Area

U-09-107

ORDER NO. 2

CONCURRING STATEMENT OF COMMISSIONER KATE GIARD

If an application for a certificate of public convenience and necessity is required under AS 42.06 for Anchor Point Energy's pipeline (or for APLC's proposed pipeline in the event that DNR issues an AS 38.35 right-of-way lease), the law requires the RCA to hold a public hearing at least 30 days prior to issuing the certificate.

Comments made by Union in this docket indicate that there may be tension as to the location and routing of any new AS 42.06 pipelines. A contested application process will take longer to resolve. Given the proposed construction schedules, parties may wish to file their AS 42.06 applications as soon as possible to get the process underway.

REGULATORY COMMISSION OF ALASKA
Anchorage, Alaska
VOLUME I
PUBLIC HEARING
February 14, 2011
10:00 o'clock a.m.
Anchorage, Alaska

Comments of Anchor Point:

You know, right before this meeting I had someone come and, I guess, as my dad would say, dress me down. And, you know, we have always at Armstrong attempted to work with regulatory authorities. It's -- you know, it's our intention to be partners with you guys. We see that as how things are a win/win and to the extent that we can, we're always going to do that. And I feel horrible right now 'cause I had someone imply that I was less than honest or something like that. And just for what it's worth anything I can do to get you guys where you need to be, let me know because, you know, life is just too short. I don't want anyone in your shoes to think that we're doing anything that is less than forthright or less than honest, so -- and I apologize, but I just had to get that out there because it shook me up with respect to that.

Q So now is probably as good a time as any to address the question of why is it that the pipeline is almost built and we're just now asking for the certificate?

A Right. And with respect to that let me -- let me start by saying I apologize. And, again, apologize, too for having to hear me earlier, but this is unique for us. Number one, we did not know we needed to come here and I sincerely apologize for that with respect to the pipeline aspect. We thought we -- when we went through the SPCO and all of the protocol that is associated with that and Bob Rich has been nice enough to be here and under his feet we've got two boxes full of various filings and data that went in tangent with the -- with the SPCO filing, but we definitely dropped the ball. We did not recognize that we needed to be in front of you for your permission to -- for the construction of the pipeline and I sincerely apologize for that. And at this point all I can do is say we'll try everything we can to make it better. We actually found out when we began this tariff filing aspect which was another unique thing to us since we're only moving our own gas, but when we did find out shortly after that which was the very first week, I think, of December I came up and visited with some people with the RCA to say I'm sorry, we've made a mistake and we're going to try everything we can to rectify it.

Sponsor Statement
CS House Bill 24 (FIN)

"An Act extending the termination date of the Regulatory Commission of Alaska; and providing for an effective date."

CSHB 24(FIN) extends the sunset date for the Regulatory Commission of Alaska (RCA) to June 30, 2015.

I encourage all the members to review the Legislative Audit summary and the full audit report. You will see that in the opinion of our auditors, the RCA is serving a public purpose and has demonstrated an effort to resolve issues brought forward by prior audits.

Legislative Audit has recommended 8 year extension. In this bill the RCA would be extended for 4 years. This more conservative extension will give the Legislature confidence that the required action items in a recent audit are completed.

The RCA serves an important role in the everyday lives of the residents of Alaska. The rate oversight of public utilities and pipelines in Alaska help control the prices consumers pay for heat and lights. The continuation of the Commission is very important.

Thank you for your support of this legislation.

The Honorable Kurt Olson, Chair
House State Affairs Committee
Alaska State Capitol, Room 24
Juneau, Alaska 99801-1182

Dear Chair Olson:

HB 24 (Olson)—Support

On behalf of the AARP members in Alaska, we encourage you and your colleagues on the House Labor and Commerce Committee to support HB 24, which you authored. HB 24 would extend the life of the Regulatory Commission of Alaska (RCA) for two years. AARP would support an even longer authorization if possible.

AARP relies on the RCA because it offers our members and all Alaskans the best opportunity to achieve basic consumer protections:

- The ability to make informed choices about utility services
- The security of safe and reliable energy and telecommunications services
- The assurance that sales practices and advertisements are fair, so they do not confuse, mislead, or frighten the public
- The reassurance that consumers receive accurate information, communicated clearly and in plain language, so we understand our rights and remedies

The RCA assures consumers the right to affordable rates and access to such basic necessary services as utilities and communications. We rely on the Attorney General to represent consumers on cases before the RCA. AARP families need HB 24; all Alaskans need this bill.

AARP recommends an "AYE" vote on HB 24.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

Cc: Rep. Paul Seaton
Subject: HB 24 (Extend Regulatory Commission of Alaska Sunset)

Dear Representatives Olsen and Johson:

I serve as spokesman for the HEA Members Forum, an ad hoc group of some 300 Homer Electric Association members. Unfortunately, due to prior commitments, I will be unable to participate in the Labor and Commerce Committee meeting on HB 24 (Extend Regulatory Commission of Alaska
Sunset) scheduled for Wednesday, March 16 at 3:15 PM. Our experience has shown the RCA to be the main agency looking out for utility ratepayers interests. Members Forum participants concur with the October 16, 2010 Legislative Budget and Audit Committee report findings that the RCA fulfills an important public need and should be extended through June 30, 2019. Consequently we urge passage of HB 24. Please circulate this message to members of your Labor and Commerce Committee.

Many thanks for considering our concerns.

Sincerely,

Mike O'Meara, Spokesman
HEA Members Forum
3734 Ben Walters Lane
Homer, AK 99603

December 14, 2010

Members of the Legislative Budget
and Audit Committee:

In accordance with the provisions of Title 24 and Title 44 of the Alaska Statutes (sunset legislation), we have reviewed the activities and the attached report is submitted for your review.

DEPARTMENT OF COMMERCE, COMMUNITY, AND
ECONOMIC DEVELOPMENT
REGULATORY COMMISSION OF ALASKA
SUNSET REVIEW

October 16, 2010

Audit Control Number

08-20067-11

This audit was conducted as required by AS 44.66.050 and under the authority of AS 24.20.271(1). Currently, under AS 44.66.010(a)(3), the Regulatory Commission of Alaska is scheduled to terminate on June 30, 2011. In our opinion, the termination date for this commission should be extended. We recommend the legislature extend the termination date to June 30, 2019.

The audit was conducted in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. Fieldwork procedures utilized in the course of developing the findings and recommendations presented in this report are discussed in the Objectives, Scope, and Methodology.

Pat Davidson, CPA
Legislative Auditor

Regulatory Commission of Alaska 25

OBJECTIVES, SCOPE, AND METHODOLOGY

In accordance with Title 24 and 44 of the Alaska Statutes, we have reviewed the activities of the Regulatory Commission of Alaska (RCA) to determine if there is a demonstrated public need for its continued existence and if it has been operating in an efficient and effective manner.

As required by AS 44.66.050(a), this report shall be considered by the committee of reference during the legislative oversight process to determine whether the RCA should be reestablished. Currently, under AS 44.66.010(a)(3), the board will terminate on June 30, 2011, and will have one year from that date to conclude its administrative operations.

Objectives

The RCA was created to regulate public utilities and pipeline carriers. In regulating public utilities and pipeline carriers, the RCA's activities include certificating qualified providers of public utility and pipeline service, and ensuring reliable services and facilities at just and reasonable rates, terms, and conditions.

To this end, the primary objective of this audit was to determine whether there is a public need for the RCA and if its existence should be extended.

The secondary objective was to determine if the RCA is serving the public's interest in its commissions and administrative activities.

Scope

Alaska Statute 44.66.050 outlines the factors to be considered in determining whether the RCA has demonstrated public need for its continued existence. We reviewed the RCA activities that occurred between FY 07 and FY 10.

Methodology

In order to meet the various objectives of the audit:

- We evaluated a statistical sample of 73 dockets[1] and a statistical sample of 73 tariff filings[2] to determine that dockets and tariff filings were processed within the applicable, if any, statutory timeline or within tariff regulations.

[1]The sample included: 62 utility dockets, 8 pipeline dockets, and 3 rule-making dockets.
[2]The sample included: 63 utility tariffs, 7 pipeline tariffs, and 2 interexchange tariffs.

- We reviewed the RCA regulation changes and board minutes for adequate public notice and public comment.

- We reviewed proposed legislation and related testimony for statutory changes and the RCA's position.

- We generated ALDER management reports to prepare a schedule of revenues and expenditures for FY 07 through FY 10.

- We examined a random sample of 25 power cost equalization eligible non-regulated utilities to determine if the RCA was performing reviews of annual financial reports.

- We interviewed the RCA's Consumer Protection Section and American Association of Retired Persons (AARP) representatives on the extent of the RCA public outreach efforts.

- We analyzed consumer complaints received during July 1, 2006 to April 9, 2010, to assess the timely processing of the complaints. On a sample basis, we also selected 25 consumer complaints for examination of compliance with the RCA regulations and procedures.

- We reviewed appealed RCA decisions to determine the status of the decision and the explanation for the court remanding the appealed decisions back to the RCA.

- We evaluated the reliability of certain data maintained in the commission database.

- We surveyed a sample of representatives from public utilities, pipeline companies, and individuals who were party to formal proceedings or tariff filings during July 1, 2006 through April 9, 2010. We also surveyed a sample of parties involved in informal complaints during the same time period.

Exhibit 1

Survey Group	Response Rate
Utility Dockets	42%
Rule-making Dockets	44%
Pipeline Dockets	21%
Tariff Filings	41%
Informal Complaints	26%

- We interviewed the RCA staff, commissioner, and various individuals from other state agencies. We also contacted the State Ombudsman, the Office of Victims' Rights, the Alaska State Human Rights Commission, the United States Equal Employment Opportunity Commission, the Alaska Labor Relations Agency, and the equal employment opportunity staff within the Department of Administration.

ORGANIZATION AND FUNCTION

The Regulatory Commission of Alaska (RCA) was created July 1, 1999, upon reorganization of the Alaska Public Utilities Commission by Ch 25, SLA 99. Under state law, the RCA is responsible for ensuring safe, adequate, and fair public utility and pipeline services. This is to be done by allowing regulated entities to charge users rates and provide service in a manner consistent with the interests of both the public and regulated entity. The RCA has the authority to adopt regulations and to hold formal, quasi-judicial hearings to accomplish these purposes.

The RCA regulates pipeline, telephone, electric, natural gas, water, sewer, refuse, cable TV, and heat services through a certification process. A public utility or pipeline company must obtain a certificate of public convenience and necessity, which describes the authorized service area and scope of operations. A certificate is issued when the RCA formally finds the applicant to be fit, willing, and able to provide the service requested.

In addition to the certification process, the RCA also may economically regulate the rates, classifications, rules, regulations, practices, and services of public utility facilities, and pipeline carriers covered by Alaska Statutes. The RCA determines whether the rates being charged or proposed by regulated entities are fair, just, and reasonable.

The RCA records in dockets the activities relating to certification and regulation of public utilities and pipeline carriers; resolution of formal complaints; and adoption of regulations. These dockets are categorized into three types: utility, pipeline, and regulatory. (See Exhibit 3 on page 10.)

As shown in Exhibit 2, the RCA consists of five commissioners. The commissioners are appointed by the governor, confirmed by the legislature for six-year terms, and must either be a member of the Alaska Bar Association or have a degree in engineering, finance, economics, accounting, business administration, or public administration from an accredited college or university. The RCA's staff includes administrative law judges, engineers, financial analysts, telecommunications specialists, tariff analysts, consumer protection officers, paralegals as well as administrative and support staff. The RCA also receives legal advice from counsel assigned to it by the Department of Law.

Exhibit 2

Regulatory Commission of Alaska Members
Robert Pickett, Chair Term expires March 2014
T.W. Patch Term expires March 2016
Kate Giard Term expires March 2013
Paul Lisankie Term expires March 2015
Jan Wilson Term expires March 2012

The staff of RCA is organized around seven major functions: administration, administrative law, finance, tariff, engineering, common carriers, and consumer protection. The RCA had

57 permanent funded positions[3] in its $8 million FY 10 operating budget. A brief description of the services provided by each RCA function is as follows.

- Administration: This function is responsible for fiscal and personnel administration, budget preparation, and records management - including the case management system. The commission chair is responsible for this function and is aided by an administrative manager, a commission section manager, an advisory section manager, documents processing and accounting personnel, and other clerical support staff.

- Administrative Law: This function is responsible for setting procedural schedules for dockets, making discovery and evidentiary rulings, issuing procedural orders, conducting hearings, advising commissioners on legal issues in pending dockets, and drafting the RCA orders. An administrative law judge is assigned to each docket shortly after it is opened and, along with an assigned commissioner and staff docket manager, works on the docket until it is closed.

- Finance: This function examines, analyzes, and evaluates financial statements submitted for rate cases. The finance staff audits financial records of utilities and pipeline companies and examines historical operating year data and pro forma adjustments. These analyses are presented at proceedings before the RCA.

- Tariff: This function examines, analyzes, and investigates tariff filings and presents recommendations to the RCA at biweekly tariff action meetings. Administrative duties include organizing those meetings, ensuring that public notice requirements on tariff filings are met, and maintaining current master tariffs for all utilities.

- Engineering: This function is responsible for certification proceedings and the investigation of utility and pipeline company procedures and practices affecting service quality. The engineering staff also reviews legal descriptions for service areas, plans for plant expansion, and plant-in-service and depreciation schedules. These analyses are presented in proceedings before the RCA.

- Common Carriers: This function develops, recommends, and administers policies and programs with respect to the regulation of rates, services, accounting, and facilities of communications common carriers within the State involving the use of wire, cables, radio, and space satellites.

- Consumer Protection: This function investigates and resolves informal consumer complaints, and is responsible for public affairs and media relations as well as responding to information requests.

---

[3]This total does not include three non-permanent positions and the assistant attorney general that the Department of Law furnishes to RCA through a reimbursable services agreement.

REPORT CONCLUSIONS

In developing our conclusion regarding whether the termination date of the Regulatory Commission of Alaska (RCA) should be extended, we evaluated RCA operations using the 11 factors set out in AS 44.66.050. Under the State's "sunset" law, these factors are to be used in assessing if an agency has demonstrated a public policy need for continuing operations.

In our opinion the RCA fulfills a public need and is serving Alaskans by:

- Assessing the capabilities of utility and pipeline companies to safely serve the public;
- Evaluating tariffs and charges made by regulated entities;
- Verifying the pass-through charges to consumers from electric and natural gas utilities;
- Adjudicating disputes between ratepayers and regulated entities;
- Providing consumer protection services; and
- Performing financial reviews of utilities for the State's power cost equalization program.

Under AS 44.66.010(a)(3), the RCA is scheduled to terminate June 30, 2011. We recommend the legislature extend the RCA's termination date until June 30, 2019.

(Intentionally left blank)

FINDINGS AND RECOMMENDATIONS

In our previous sunset audit,[4] we made one recommendation. The recommendation was for the Regulatory Commission of Alaska (RCA) to develop regulations that would enhance the transparency, accountability, and efficiency of the RCA's decision making process. The recommendation included three areas for improvement: (1) establishing timelines for matters not covered by statute; (2) establishing standards for certain aspects of discovery; and (3) clarifying terms used in statute that relate to established timelines for certain formal proceedings. This overall recommendation has been partially resolved.

In May 2007, HB 209 amended the statutory timelines in AS 42.05.175 to include a new section for other adjudicated matters. The amendment also modified the timeframes from months to days. The concerns related to this part of the prior audit recommendation have substantially been addressed.

The second part of the recommendation stated that the RCA should establish standards for certain aspects of discovery. The RCA opened a docket in October 2006 to seek comments from regulated entities and interested parties regarding potential regulation projects that should be viewed as priorities. One of the potential projects noted in the docket is regulations for discovery. However, no action was taken regarding discovery regulations, and the 2006 regulations docket was subsequently closed. In May 2010, the RCA opened another docket to solicit comments on discovery regulations. The docket states:

> *We are required by AS 42.05.175(e) to issue a final decision in a rulemaking proceeding not later than 730 days after the order initiating the proceeding is issued. However, until we have received public comment and evaluated the availability of staff resources, we will not know whether it is appropriate to initiate one or more rule-making proceedings, and, if so, the proper scope and subject matter of those proceedings. Consequently, we may close this docket without further action once we complete our information gathering effort, or we may issue one or more orders initiating separate rule-making proceedings.*

Comments were received, and the RCA is currently in the process of reviewing the comments in order to assess if one or more orders initiating separate rule-making proceedings are necessary. The concerns related to this part of the prior audit recommendation have not been addressed, but the RCA is currently in the process of evaluating industry and public input on discovery regulations.

The third part of the prior audit recommendation states the RCA should clarify terms used in statute that relate to established timelines for certain formal proceedings. Specific terms

[4]Department of Commerce, Community and Economic Development; Regulatory Commission of Alaska, Sunset Review, October 20, 2006, Audit Control No. 08-20048-06.

include *complete*: applications, tariff filings, formal complaints and petitions. The RCA adopted new regulations specific to complete and incomplete applications.[5] The RCA's management stated that no regulations were adopted for the terms *complete*: tariff filings, formal complaints, and petitions.

The prior recommendation also suggested an alternative solution to clarifying terms by developing a practice of issuing an order to memorialize the date when the initial record is considered complete. The RCA did implement this practice by issuing an initiating order on each matter which calculates and identifies the statutory deadline. Parties disputing the calculation of the statutory deadline may petition the RCA for reconsideration within 15 days of the initiating order. Under this revised procedure, the statutory deadline is known and communicated to all parties early in the proceeding.

[5]3 AAC 48.648 "Complete Applications" and 3 AAC 48.650 "Incomplete Applications."

ANALYSIS OF PUBLIC NEED

The following analyses of board activities relate to the public need factors defined in AS 44.66.050(c). These analyses are not intended to be comprehensive, but address those areas we were able to cover within the scope of our review.

Determine the extent to which the board, commission, or program has operated in the public interest.

The Regulatory Commission of Alaska (RCA) is operating in the public's interest. The RCA identifies its core services as the following:

1. Thoroughly review utility and pipeline filings for compliance and approval.
2. Clear guidance to utility and pipeline service providers.
3. Ensure Alaska's interests are considered in the development of federal legislation and regulation.
4. Dispute resolution involving regulated entities.
5. Public information and education to enhance the public's understanding and use of utility and pipeline services.

In carrying out its responsibilities, the RCA acts much of the time in a quasi-judicial manner. Accordingly, decisions must be supported by findings of fact, and the findings of fact must be based solely upon the evidence as it appears in the record of a given proceeding. The RCA implemented a new practice beginning in FY 08 for the RCA's legal counsel to review final orders ensuring final decisions are based on evidentiary record and contain justification for the decision reached. Review of final orders from a sample of utility dockets indicates that the RCA has substantially implemented this new practice. The RCA continues to be very concerned about affording all parties involved in a given decision appropriate due process, while at the same time being responsive to concerns about the timeliness of its decision making process.

The RCA has responded well to legislative concerns about timeliness. In 2007, the legislature amended the RCA's statutory timeline requirement by adding AS 42.05.175(i) to address other adjudicated matters that were not already subject to a federal law, state law, or statutory timeline of AS 42.05.175(a)-(e). We reviewed a sample of formal proceedings

subject to statutory timelines[6] and a sample of tariff filings subject to regulatory timelines.[7] Testing showed that the RCA was in compliance with its statutory and regulatory timelines.[8]

Source: The RCA Case Management System

Exhibit 3, details the number of dockets the RCA processed for FY 07 through FY 10. The RCA opened 175 dockets, on average, over the three year period of FY 07 through FY 09. Additionally, the RCA closed, on average, almost 170 dockets for the same three year period.

Surveys were sent to representatives from utility and pipeline companies who were parties to a sample of formal proceedings or tariff filings presented before the RCA during FY 07 through April 2010. Surveys were also sent to a sample of consumers who filed an informal complaint with the RCA during the same time period. Over the past three years, approximately 85% of survey respondents stated that the RCA's overall operations stayed the

[6]Alaska Statute 42.05.175(a)-(i)
[7]3 AAC 48.220 – 3 AAC 48.280
[8]RCA management reported during our sunset audit that there were two tariff filings that went into effect without the required commission approval.

same or improved. Additionally, comments from two utility survey respondents regarding the RCA serving the public interest stated:

- *Sometimes it is more important to carry out the RCA's purpose of protecting the public than it is to "be efficient."*

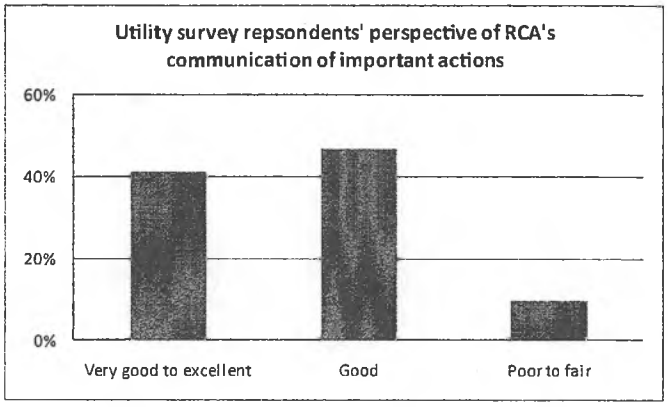
- *Continue the good public service.*

The RCA's efforts at resolving consumer complaints with regulated utilities also serve the public's interest. The commission resolves most informal complaints within 45 days. Most of the respondents to the informal complaint survey reported that the RCA's complaint resolution process was efficient.

Determine the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices that it has adopted, and any other matter, including budgetary, resource, and personnel matters.

During FY 07, the RCA created an administrative law section comprised of four administrative law judges (ALJs) and a professional support staff. The RCA made this change based on input from regulated entities seeking streamlined pre-hearing and hearing processes as well as enhanced quality and timeliness of commission orders. The ALJs set procedural schedules for dockets, make discovery and evidentiary rulings, issue procedural orders, conduct hearings, advise the RCA on legal issues in pending dockets, and draft RCA orders. An ALJ is assigned to each docket shortly after it is opened and, along with an assigned commissioner and staff docket manager, oversees the processing of the docket until it is closed.

Although over half the utility survey respondents felt the efficiency of the RCA's hearing process did not change in the last three years, a third felt that the process is more efficient now. Utility survey respondents suggested the following areas for improvement in the efficiency of the hearing process:



- Utilizing the ALJs for discovery and evidentiary rulings;
- Requiring only three commissioners to sit on the hearing panel; and
- Limiting the number of issues to be addressed and ensuring they are defined and fully explained.

Also, during FY 07, the RCA implemented the new procedure of issuing an initiating order that identifies: (1) the statutory or regulatory authority and timeline; (2) the RCA panel assigned to the docket; and (3) the ALJ assigned to the docket. The initiating order should document the application completion date, tariff filing date, or petition date. These dates are critical as they trigger the statutory timeline.

The RCA conducts two docket status meetings each month to review open dockets and the associated statutory timelines to ensure the dockets: will be evaluated, will proceed to the hearing process, and a final order will be issued prior to the statutory timeline. Additionally, the RCA monitors its tariff filings to ensure timelines are met and holds two tariff action meetings each month to approve tariff filings.

Almost all the utility survey respondents involved in formal proceedings before the RCA reported that they were informed by the RCA of the statutory timelines related to their dockets. As illustrated in Exhibit 4, over 40% of the utility survey respondents stated that the RCA's communication of important matters related to their formal proceeding was very good to excellent and almost 50% said that communication was good.

Exhibit 4

The RCA's total expenditures remained relatively stable from FY 07 through FY 10. The funding source for almost all of these expenditures was the regulatory cost charges paid by regulated entities. The RCA's total revenues remained stable between FY 07 and FY 09; however in FY 10, the RCA had $900,000 more in revenues than in expenditures. Appendix A summarizes the RCA's revenues and expenditures for FY 07 through FY 10.

Determine the extent to which the board, commission, or agency has recommended statutory changes that are generally of benefit to the public interest.

During FY 07, the RCA opened a docket requesting recommendations for statutory revisions and sought comments on five specific areas of potential statutory reform.[9] The RCA invited two rounds of comments, held a public workshop and a public hearing, and discussed the proposed statutory revisions at three public meetings. The RCA then voted to transmit several proposed statute changes to include revising:

- Public utility and pipeline carrier regulatory costs;
- Civil penalties for public utilities and pipeline carriers;
- Timeliness for issuance of final orders;
- Potential conflict of interest of legal counsel;

[9]The areas were: (1) a specific statutory interest rate or interest formula to apply to refund obligations; (2) an increase to the statutory exemption levels in AS 42.05.711; (3) statutory timelines for AS 42.05 and AS 42.06 matters not currently subject to timelines; (4) updated civil penalties; and (5) statutory authorization for the chairman to appoint ALJs to hear certain types of cases and present proposed decision.

- Partially exempt position structures; and
- Qualification levels for commissioners.

The transmittal also included adding an administrative law section and a natural gas and oil pipeline section to the RCA's statutes that were forwarded to the governor for consideration. According to RCA management, the governor's intention was to support a bill that would enact many of the requested statute changes. However, based on committee minutes[10], the governor did not pursue the legislation and requested that the RCA work with the legislature. The resulting bill that was presented to the legislature did not contain many of the original statutory changes the RCA sought.

During the 2007 legislature, the RCA chair provided testimony to the legislature in support of establishing a deadline for formal proceedings not currently subject to statutory timelines. This legislation was passed and created statutory timelines for adjudicatory matters that come before the RCA and are not subject to federal timelines or timelines in AS 42.05.175(a)-(e). Also, in 2007, the legislature amended the RCA's annual report statutes[11] to include specific language in the statute that requires the RCA's annual report to contain details about the RCA's compliance with the statutory timeline requirements under AS 42.05.175(a)-(e), with the timeline extensions made by the commission under AS 42.05.175(f), and with other performance measures established by the commission.

The RCA did not recommend any statutory changes during FY 08 through FY 10. While numerous statutory changes were made by the legislature, the RCA did not have an official position on the changes.

Determine the extent to which the board, commission, or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service that it has provided.

The RCA affords the public opportunities to speak at publicly noticed, RCA meetings. The RCA uses a variety of methods for notifying the public of formal proceedings. Notices appear on the RCA and the State's website. Notices are also placed in newspapers in the affected regions of the State or maybe included with utility customer billings.

Additionally, as part of its operating mission, the RCA has an active consumer protection function which provides utility customers an avenue to seek resolution of complaints. The RCA generally tries to resolve disputes between customers and utilities informally, before

[10] House Labor and Commerce Committee, April 13, 2007

[11] Alaska Statute 42.05.211 and AS 42.06.220. Note: AS 42.06.220 states, "*The report must address regulation of oil and gas pipeline facilities in the state ... and must contain details about the commission's compliance with performance measures reported by the commission.*"

opening a formal complaint. Exhibit 5 below illustrates the consumer complaints filed with the RCA regarding utility types during the first ten months of FY 10.

The RCA resolved 84% of consumer complaints within 45 days of those filed between July 1, 2006 and April 9, 2010. Additionally, most of the respondents to our survey, who were involved with the informal complaint resolution process, reported the RCA was efficient in processing their complaint.

Exhibit 5

Consumer Complaints filed with the RCA between July 1, 2009 to April 9, 2010

	Number Filed	Total Complaint %
Telecommunications	94	40%
Electric	68	29%
Water / Sewer	30	13%
Natural Gas	25	10%
Cable Television	12	5%
Refuse Collection	6	3%
Totals	235	100%

Source: The RCA case management system

Beginning in 2007, the RCA, in a joint venture with the American Association of Retired People (AARP) Alaska, participated in several workshops for outreach in financial education and consumer protection. The RCA has continued to collaborate with consumer groups such as the Alaska Housing Finance Corporation to educate ratepayers and homebuyers about utility rates and services. The RCA also had an informational booth present at the Alaska Federation of Natives convention and was present at the Better Business Bureau seminars. As part of the consumer protection workshops, staff taught classes to educate consumers on utility rates and services.

Determine the extent to which the board, commission, or agency has encouraged public participation in the making of its regulations and decisions.

The quasi-judicial manner in which the RCA operates provides opportunities for all interested and affected parties to informally and formally respond to proposed regulations and decisions. Review of a sample of proposed regulations confirms that the RCA provided opportunities for public comment at the public meetings, workshops, and through the RCA's website.

The RCA's website is instrumental for communicating with the public. The RCA makes a computer terminal available at its office for the public to use for researching RCA records. Besides notices of upcoming meetings, formal actions are posted on the RCA website along with the commission's annual reports, discussions of major regulatory issues, and a forum for public comment. The process for filing a consumer complaint is explained and visitors to the website can subscribe to direct e-mail notices related to specific topics of interest.

Half of the survey respondents[12] report that the RCA's website is easy to use for finding information and provided sufficient information regarding dockets and filings. However, a third of the respondents stated that the website was not user friendly. Areas for improvement suggested by survey respondents include:

- Better search capabilities;
- Access to historical decisions;
- Status of pending motions for dockets;
- Continuous updates of current forms and information; and
- Allow for electronic filings.

Determine the efficiency with which public inquiries or complaints regarding the activities of the board, commission, or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of victims' rights or the office of the ombudsman have been processed and resolved.

The Department of Commerce, Community, and Economic Development, the Boards and Commission within the Office of the Governor, and the Office of Victims' Rights reported receiving no complaints about the RCA over the past four years. The State's Office of the Ombudsman opened 24 cases based on contacts from the public. The majority of the cases were about how to contact the RCA. There were four cases filed by consumers regarding complaint processing and public meeting activities of the RCA. Based on our review of these cases, we determined that the ombudsman's investigation was appropriate resulting in the case being closed with no further recommendation for the RCA.

The RCA's orders and decisions are subject to appeal to the state courts. Since the prior sunset review, 18 of the RCA's final orders reflecting docket decisions have been appealed to the State's Superior Court. The Superior Court remanded two of the decisions back to the RCA for further proceedings due to the RCA not adequately articulating the reason for one decision and the other due to the RCA denying a direct refund to the affected entity. One remanded decision is pending a final decision before the RCA and the other was settled prior to further proceedings before the RCA. Eight appealed decisions are open and pending at the Superior Court, six were dismissed, and the Superior Court affirmed two of RCA's decision.

Additionally, the State's Supreme Court issued decisions related to four RCA docket decisions, resulting in affirming two RCA decisions, reversing the RCA's decision on one appealed decision and denying the RCA's appeal of a Superior Court's decision.

[12]Survey respondents included representatives from utility and pipeline companies who were a party to a utility, pipeline, rule-making docket or a tariff filing.

Determine the extent to which a board or commission that regulates entry into an occupation or profession has presented qualified applicants to serve the public.

A public utility or pipeline carrier must obtain from the RCA a certificate of public convenience and necessity, which describes the authorized service area and scope of operations. A certificate is issued upon the RCA formally finding the applicant to be fit, willing, and able to provide the service requested. The RCA generally regulates the rates, services, and practices of these entities.

As of June 2010, there were 622 active certificated entities. Of these, 153 were economically regulated. Exhibit 6 is a summary, by service type, of the economically regulated entities.

To ensure utilities meet requirements, the RCA employs utility financial analysts and utility engineers to perform the appropriate analyses to make a determination of an applicant's capabilities before granting a certificate. Between July 1, 2007 and June 30, 2010, the RCA issued 54 certificates of public convenience and necessity, of which 18 were for economically regulated entities.

Exhibit 6

Source: The RCA case management system

Determine the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission, or agency to its own activities and the area of activity or interest.

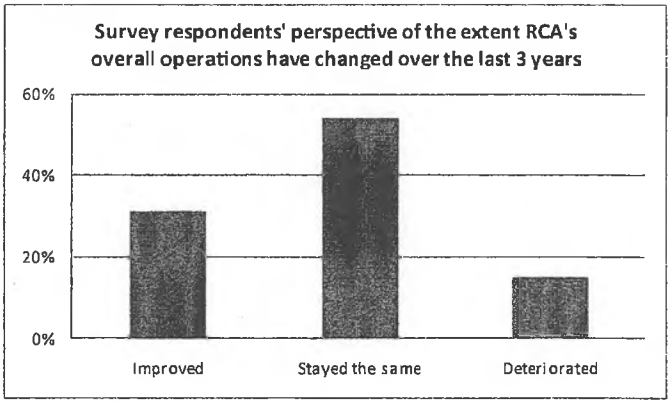
We found no evidence of the RCA's hiring practices or appointments that were contrary to state personnel practices. Since July 2006, no complaints have been filed with any of the following: (1) Alaska State Commission on Human Rights within the Office of the Governor; (2) the United States Equal Employment Opportunity Commission; (3) the Alaska Labor Relations Agency with the Department of Labor and Workforce Development; or (4) staff specializing in equal employment opportunity issues in the Division of Personnel within the Department of Administration.

Determine the extent to which statutory, regulatory, budgeting, or other changes are necessary to enable the agency, board, or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Almost half of all survey respondents[13] reported the existing statutes and regulations are

[13]Except for consumer complaint survey recipients.

obsolete, vague, unduly restrictive, or inadequate. Some of the areas that the respondents believe should be addressed by statutory or regulatory changes are:



- Clarifying statute for definition of a final order;
- Revising regulations to allow for electronic filings;
- Establishing regulations for discovery;
- Amending parts of AS 42.05.175 to segregate the timeframes between adjudicative proceedings and the time given for the RCA to issue its final order at the close of such proceedings;
- Shortening the statutory timeline for decisions in rate proceedings; and
- Revising ex parte communication rules.

Again, the last three items are survey respondents' issues from the prior sunset audit.

Determine the extent to which the board, commission, or agency has effectively attained its objectives and purposes and the efficiency with which the board, commission, or agency has operated.

As shown in Exhibit 7, almost 55% of all survey respondents stated that the RCA's overall operations have stayed the same and over 30% stated they improved during the past three years.

Exhibit 7

The review of the data from the case management system for our analysis identified many errors with the data entry into the system. The RCA does not have comprehensive written procedures to ensure the data entered into the system is accurate, consistent, and complete. This was also identified during our audit of the RCA's FY 09 Annual Report and is documented in the Findings and Recommendations section of that report.[14] Although these errors were still present during our sunset audit, the RCA's management has acknowledged and agreed that improvements are needed.

[14]Department of Commerce, Community, and Economic Development, Regulatory Commission of Alaska, FY 09 Annual Report Audit, September 21, 2010, Audit Control No. 08-30057-10.

The RCA assists in the administration of the State's power cost equalization (PCE) program. The Alaska Energy Authority (AEA) administers the PCE program based on the PCE rate calculations performed by the RCA.[15]

There are approximately 70 non-regulated PCE recipients, and the RCA has set an internal performance measure to review one-third of the annual reports received annually. Exhibit 8 details the number of annual reports the RCA has reviewed during FY 07 to FY 10. The RCA has improved on the number of annual report reviews and has exceeded their internal performance measure for FY 10.

Exhibit 8

Non-regulated PCE entities' annual reports reviewed by the RCA

	FY 07	FY 08	FY 09	FY 10
Number of Non-Regulated PCE Entities	79	84	69	69
Goal (30% of entities)	24	25	21	21
Number of Annual Report Reviewed by RCA	11	7	9	30

Source: Compiled from the RCA annual reports and RCA management

During FY 10, the RCA was awarded a grant under the American Recovery and Reinvestment Act (ARRA) for $767,500 to help fund positions to manage an increase in its responsibilities resulting from the ARRA electricity-related projects.[16] As of June 30, 2010, the RCA has expended roughly $7,000 of the ARRA funding. The RCA hired staff[17] who worked on reviewing utility tariffs language, provided analysis and commission support in hearing reviews, and reviewed applications for the transfer of an electric utility. The staff also participated in the development of new electrical interconnection regulations.

Determine the extent to which the board, commission, or agency duplicates the activities of another governmental agency or the private sector.

The RCA's mission is to assure viable utility and pipeline service is provided with just and reasonable rates to consumers in Alaska. The RCA's role is to reach decisions which consider the often competing interests of the concerned parties in pursuit of outcomes which protect and promote the overall public interest.

The Regulatory Affairs and Public Advocacy (RAPA) section within the Department of Law also protects the public's interest. The responsibility of the RAPA was established in July 2003 to advocate on behalf of the public's interest in utility matters that come before the

[15]3 AAC 52.660 states that in order for the RCA to determine if the PCE rate is just and reasonable, a non-regulated utility shall file an annual report for review. The RCA, using its discretion under 3 AAC 42.640, will adjust the PCE rates based on review of the annual report. However, non-regulated utilities can request the RCA to review its annual report for the PCE adjustment at any time.

[16]The ARRA electricity related projects include, but are not limited to, energy efficiencies, electricity-based renewable energy, energy storage, smart grids, electric and hybrid-electric vehicles, demand response equipment, coal with carbon capture and storage.

[17]The ARRA funding is for two positions. The RCA filled one position with an engineering analyst; however, it has not found a qualified applicant for the financial analyst position.

RCA,[18] in court appeals, and before the legislature and other policymakers. The attorney general, as the public advocate, determines and advocates for the general public's interest with particular attention to the interests of consumers who would not otherwise have an effective voice regarding the rates and services of regulated utilities or pipeline carriers operating in the State. No legal services are provided directly to the people. Individual utility customers who seek assistance may contact the Consumer Protection Section of the RCA.

There is a common mission between the two organizations; however, they both perform different functions. The RCA issues decisions on utility matters in the public's interest and the RAPA advocates for the public.

Almost 90% of the survey respondents[19] stated that the RCA did not duplicate the activities of another government agency or private sector. The areas the survey respondents stated were duplicated include reports that are filed with the RCA and with the Federal Communications Commission and reports filed with the RCA and with the AEA. The duplicate reporting between the RCA and the AEA indicates this is an area for improved communication between the two state entities.

[18]Alaska Statute 44.23.020(e)

[19]Survey respondents include representatives from utility and pipeline companies who were parties to a utility, pipeline, rule-making, informal complaint docket or tariff filing that were open at one point between FY 07 to April 9, 2010. Survey respondents also included consumers of informal complaint dockets.

RE: Response to preliminary audit report, Department of Commerce, Community, and Economic Development, Sunset Audit of the Regulatory Commission of Alaska (RCA)

Dear Ms. Davidson,

I have reviewed preliminary audit report on the sunset review of the RCA and concur with the recommendation that the legislature extend the RCA's termination date to June 30, 2019.

Your letter notes that the RCA has not resolved a recommendation from a prior audit that standards for discovery be developed. You also recognized that the RCA is currently evaluating input regarding discovery regulations. I have every reason to believe the matter will be appropriately addressed.

In addition, the audit's in-depth analysis of the RCA, with suggestions from survey respondents, provides an alternative perspective from which the RCA can evaluate its operations.

Thank you for the opportunity to comment on the preliminary audit report.

Sincerely,

Susan K. Bell
Commissioner

LEGISLATIVE AUDIT

RE: Response to preliminary audit report,
Department of Commerce, Community, and Economic Development (DCCED),
Sunset Audit of the Regulatory Commission of Alaska (RCA)

Dear Ms. Davidson:

Thank you for the opportunity to respond to the confidential preliminary audit report. The RCA appreciates the conclusion that it fulfills a public need and is serving Alaskans.

The report details the RCA's response to the 2006 sunset audit report recommendation that the RCA enhance the transparency, accountability, and efficiency of its decision-making process. As noted, the first part of the three-part recommendation was addressed through a statutory change; another part was addressed through the use of initiating orders which calculate and identify statutory deadlines for new proceedings. Through a rule-making proceeding, the RCA is currently pursuing the remaining part of the recommendation by considering discovery regulations. As interested entities have conflicting views, new regulations take time and careful consideration. However, the RCA is currently evaluating industry and public input regarding discovery regulations.

In summary, the RCA concurs with the recommendation that the legislature extend the RCA until June 30, 2019. Thank you for the opportunity to comment on the preliminary audit report.

Sincerely,

Robert M. Pickett, Chair
Regulatory Commission of Alaska

cc: The Honorable Susan Bell
Commissioner

Chairman Kurt Olson
Labor and Commerce Committee
House of Representatives
Capitol Building
Juneau, Alaska 99801

March 15, 2011

Re: Regulatory Commission of Alaska

Dear Chairman Olson:

General Communication, Inc. (GCI) supports the Legislative Budget Audit recommendation to extend the termination date for the Regulatory Commission of Alaska (RCA) to June 30, 2019.

By extending the RCA authorization, the legislature will allow for consistency and continuity in the consideration and determination of telecommunications issues in the State. As a provider of telecommunications services, GCI can best focus on serving our customers when regulatory issues and policies are decided, as necessary, before an established, experienced, professional body. For these reasons, GCI believes that the extension of the RCA authorization as recommended best serves the public interest.

Please address any questions on this matter to the undersigned or Alex von Wichman at (907) 229-3857.

Sincerely,

Tina Pidgeon
Sr. Vice President, Governmental Affairs and Senior Counsel

FISCAL NOTE #4

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. HB 56

Analysis

HB 056 adds arson in the first and second degrees to those crimes defined as a "serious felony offense" in the statute defining conspiracy. With this amendment, the crime of conspiracy would prohibit persons from conspiring to commit arson in the first or second degree.

Passage of this legislation would have no foreseeable fiscal impact on the Department of Law.

BILL NO. HB 56

Analysis

This legislation is creating a new serious felony crime of conspiring to commit arson in the first degree and arson in the second degree. Therefore, the Department of Corrections has no information to determine the number of offenders that will be placed under the custody of the department.

The department will closely monitor potential future impacts of this legislation.

HB 56
INCLUDE ARSON IN CRIMES OF CONSPIRACY

Sponsor Statement

House Bill 56 adds first and second degree arson to Alaska's conspiracy statute, which will provide strong deterrents to committing arson and close a loophole in current law. HB 56 was drafted after it became apparent during a committee hearing last session that arson is not currently included in Alaska's conspiracy statute. Because of this, arsonists may only be charged with a crime if the arson is attempted or completed, and they cannot be charged with the separate crime of conspiracy if two or more people are involved in the arson. This bill only adds first and second degree arson

- Conspiracy: an agreement by two or more people to commit a crime with at least one overt act committed towards the completion of the crime.
- Arson in the first degree: damaging property by fire or explosion and recklessly placing another person (including emergency personnel) in danger or serious physical injury. (Class A Felony)
- Arson in the second degree: knowingly damages a building by fire or explosion. (Class B Felony)
- Conspiracy to commit a Class A Felony (Arson One) is a Class B Felony.
- Conspiracy to commit a Class B Felony (Arson Two) is a Class C Felony.

HB 56 will fix those problems. Including arson in the conspiracy statute will provide stronger punishments, whether or not conspirators actually complete the arson. Under HB 56, if arson is committed, the conspiring arsonists can charged with *both* arson and conspiracy, rather than just arson under the current law. If the arson is not completed, however, this bill will allow conspirators to be prosecuted for conspiracy to commit arson, which is not punishable under current law.

If you have any questions, please contact Representative Gruenberg's legislative aide, Miles Brookes, at 465-4940.

Dear Representative Gatto,

On behalf of the Alaska Fire Chiefs Association I would like to give you our support for HB56 "An Act making arson in the first degree and arson in the second degree serious felonies for purposes of application of the crime of conspiracy."

The act of Arson is a horrendous and devastating crime. Arson crimes take a terrible toll on individuals and communities across the State of Alaska through the loss of lives and property.

The Alaska Fire Chiefs Association supports your efforts to add conspiracy to the possible offenses for this crime.

Sincerely,

Jeff Tucker, President
Alaska Fire Chiefs Association

To catch an arsonist

Juneau Crime Line announces new arson reward program

Posted: March 15, 2012 - 12:10am

By EMILY RUSSO MILLER

JUNEAU EMPIRE

After a reported 31 arsons in 13 months, the Juneau Crime Line is upping the ante in hopes of catch arsonists who have evaded police.

The nonprofit crime solving organization, which is Juneau's equivalent to Crime Stoppers, announced a new $1,500 arson reward program Wednesday to incentivize those with information about unlawful blazes to come forward.

"We're trying to get some information to help the police department to get these arsons to stop," longtime Crime Line board member Robin Paul said in a phone interview. "That's our main goal."

Crime Line tipsters, who are guaranteed anonymity, are usually awarded up to $1,000 when they provide information that is instrumental to cracking unsolved cases. But Paul hopes the extra $500 will prompt more leads.

"These arsons are something that have really been problematic for the community," she said.

Capital City Fire Marshal Daniel Jager said there were 31 arson incidents reported from January 2011 through February 2012, and that all of those cases are still open and active. Those include 11 vehicle fires, fire damage to the turf field at Adair-Kennedy Memorial Park and Thunder Mountain High School sports fields and the destruction of a Porta-Potty and to the Twin Lakes playground, according to a statement from Paul.

"All of these are still open, and we're still actively pursing leads on them," Jager said. "We haven't just forgot about them."

Perhaps the most troubling suspected arson was the vehicle and carport fire at the Crow Hill Condominiums last July that "could have resulted in tragedy if the fire had spread to the complex and trapped unaware sleeping residents," Paul said.

The perpetrator or perpetrators of that crime still remain at large.

CCFR and the Juneau Police Department work together to solve arson cases, with the fire marshal focused on the fire scene (the point of origin of the fire, whether an accelerant was used, etc.) while the police conduct the criminal investigation. But when leads wind down or "things go cold," as Paul put it, Crime Line can reignite a case by enticing informants to come forward with a monetary award.

"(Arson) is a very big concern for us, and I'm pleased to see the Crime Line is offering rewards to help us solve these issues," JPD spokesman Lt. David Campbell said in an interview.

He said arson not only poses danger to property and people, but to firefighters and others who respond to the scene.

Arson cases can be difficult to investigate and prosecute if there's not a confession or witness, Jager said, because potential physical evidence is not only destroyed in the flames, but also by firefighters while doing their job suppressing the fire. He said there's about a 2 percent arson conviction rate nationwide.

Jager said he hopes this new reward program will jog people's memory and cause them to think back to see if they remember anything out of the ordinary; and for those who know something, to come forward. The anonymity Crime Line affords is the key, he said.

"Sometimes people are a little more willing to do the right thing if they have a reward, but the key is not so much the money award, it's the fact that it can be done anonymously," he said. "They don't want people to know that they're involved and that's understandable. I think the Crime Line is a great avenue for people who aren't comfortable doing that in person."

Jager added, "The money helps, but for the most part, people, they're just concerned about potential ramifications."

The 31 arsons have come at a high price. Jager estimates the total damage from all the above instances is much more than $100,000, and the damage from the Crow Hill fire alone caused as much.

Local businesses — like Shattuck & Grummett Insurance and Malia Hayward State Farm Insurance — and other community members have stepped forward to pledge money to the special arson reward program. Crime Line is funded only by donations from the community.

This isn't the first time Crime Line has created a special reward program. According to the Crime Line website, more than $10,000 was pledged for the unsolved murder of Johnny L. Jack Sr. in October 1988 and the murder of Cindy Elrod nearly 30 years ago.

The group also offers up to $1,500 for reporting the purchase or distribution of oxycontin in the Juneau area.

Other popular programs are the $100 reward for reporting drunken driving, and the special graffiti program, sponsored by the city, also pays $100, according to the website.

The last suspected arson incident in Juneau area, Jager said, was a vehicle fire by Glacier Gardens, a botanical garden on Glacier Highway, about two weeks ago.

HB 60 Expanding Geoduck Farming

Shellfish farming has the potential to diversify the economic base of coastal communities impacted by the changing dynamics of the fishing industry. HB 60 allows this expansion of this clean water industry by permitting geoducks to be farmed subtidally in the Gulf of Alaska even if wild geoducks are not present. The bill does not exempt farmers from any health, safety, or other transfer provisions relating to hatchery seed.

The Alutiiq Pride Shellfish Hatchery is the only hatchery that supplies mariculture spat and seed in the State. It was initiated by the State to be a self-sustaining operation in association with the private mariculture farms permitted by the State. Their business plan relies on the sale of geoduck seed. However, an informal policy of the Department of Fish and Game prevents geoduck seed from being utilized by farms anywhere outside of southeast Alaska. These restrictions on the sale of geoduck seed cause the sole hatchery for the mariculture industry in Alaska to require continual subsidy by the State. HB 60 will allow the mariculture industry to develop around the Gulf of Alaska, providing a potentially strong market for seed and private sector financing for the operation of the hatchery.

As non-mobile filter feeders eating plankton, farmed geoducks will not prey on any local commercial, sport or personal use fish. There have been no reports of species displacement in the sedimentary habitat by geoduck clams. Farmed geoducks will not interfere with personal recreational boaters as they are cultivated in the sediment below low tide and without the numerous buoys and floating cages used in oyster farms. No infectious disease has been identified in any wild geoduck population or the geoduck farming industries of Washington, British Columbia, or Alaska.

The conflict involving geoducks in southeast Alaska is between the dive fishermen who harvest wild stock and farmers who wish to farm in areas with existing wild stock. HB 60 would circumvent this conflict because there is no wild geoduck stock in the proposed area. This bill will not override any Department of Natural Resources farm site leasing or Department of Fish & Game permit regulation.

HB 60 eliminates unnecessary hindrances to the growth of the maricluture industry in Alaska and provides a potential alternative economic base for coastal communities while adequately considering the health of our marine ecosystem.

Staff Contact, Heather Beggs 465-2028

2/10/2012 HB60/A

Article 02. AQUATIC FARMING

Sec. 16.40.100. Aquatic farm and hatchery permits.

(a) A person may not, without a permit from the commissioner, construct or operate

(1) an aquatic farm; or

(2) a hatchery for the purpose of supplying aquatic plants or shellfish to an aquatic farm.

(b) A permit issued under this section authorizes the permittee, subject to the conditions of AS 16.40.100 - 16.40.199 and AS 17.20, to

(1) acquire, purchase, offer to purchase, transfer, possess, sell, and offer to sell stock and aquatic farm products that are used or reared at the hatchery or aquatic farm; and

(2) except as provided in (f) of this section, harvest and, without further cultivation, sell an insignificant population that may be present at the aquatic farm site of a wild stock of a shellfish species intended to be cultured at the site.

(c) The commissioner may attach conditions to a permit issued under this section that are necessary to protect natural fish and wildlife resources.

(d) Notwithstanding other provisions of law, the commissioner may not issue a permit under this section for the farming of, or hatchery operations involving, Atlantic salmon.

(e) Upon the expiration or termination of a permit issued under this section, a person who holds a permit for an aquatic farming site where wild stocks of shellfish indigenous to the site are cultured shall, as a condition of the permit, restore the wild stock of shellfish, as consistent with sustained yield management of the wild stock, to the population level that existed on the site when the permit for the site was initially issued by the commissioner. A permit holder is not required to restore that portion of the wild stock of shellfish that was removed from an aquatic farming site by a common property fishery conducted after the issuance of the permit for the aquatic farming site.

(f) If the wild stock of a shellfish species to be cultured at an aquatic farm site exceeds the amount determined by the department to be an insignificant population and if the commissioner determines in writing that removal from the site of that portion of the stock that exceeds an insignificant population would benefit the public and that removal of the stock by a person other than the permittee would unreasonably interfere with the operation of the aquatic farm, the commissioner may authorize the permittee to remove and sell the excess amount of the wild stock from the site, if the permittee pays reasonable compensation, as defined by the department, to the department for the harvest and sale of the excess wild stock. The department shall deposit the money received under this subsection into the general fund. The legislature may appropriate the money received under this section to the department for shellfish management and enhancement.

Sec. 16.40.105. Criteria for issuance of permits.

The commissioner shall issue permits under AS 16.40.100 on the basis of the following criteria:

(1) the physical and biological characteristics of the proposed farm or hatchery location must be suitable for the farming or the shellfish or aquatic plant proposed;

(2) the proposed farm or hatchery may not require significant alterations in traditional fisheries or other existing uses of fish and wildlife resources;

(3) the proposed farm or hatchery may not significantly affect fisheries, wildlife, or their habitats in an adverse manner;

(4) the proposed farm or hatchery plans and staffing plans must demonstrate technical and operational feasibility; and

(5) the proposed farm site may not include more than an insignificant population of a wild stock, on the site, of a shellfish species intended to be cultured.

Sec. 16.40.110. Permit application, renewal, and transfer.

(a) An applicant for an aquatic farming or hatchery permit required under AS 16.40.100 shall apply on a form prescribed by the commissioner. An application for a permit must include a plan for the development and operation of the aquatic farm or hatchery, which must be approved by the commissioner before the permit is issued.

(b) An application for renewal or transfer of a permit must be accompanied by fees required by the commissioner, a report of the disease history of the farm or hatchery covered by the permit, and evidence that satisfies the commissioner that the applicant has complied with the development plan required under (a) of this section. The commissioner may require a health inspection of the farm or hatchery as a condition of renewal. The department may conduct the inspection or contract with a disease diagnostician to conduct the inspection.

(c) A person to whom a permit is transferred may use the permit only for the purposes for which the permit was authorized to be used by the transferor, and subject to the same conditions and limitations.

Sec. 16.40.120. Aquatic stock acquisition permits.

(a) A person may not acquire aquatic plants or shellfish from wild stock in the state for the purpose of supplying stock to an aquatic farm or hatchery required to have a permit under AS 16.40.100 unless the person holds an acquisition permit from the commissioner.

(b) An acquisition permit authorizes the permit holder to acquire the species and quantities of wild stock in the state specified in the permit for the purposes of supplying stock to

(1) an aquatic farm or hatchery required to have a permit under AS 16.40.100;

(2) the department.

(c) The commissioner shall specify the expiration date of an acquisition permit and may attach conditions to an acquisition permit, including conditions relating to the time, place, and manner of harvest. Size, gear, place, time, licensing, and other limitations applicable to sport, commercial, or subsistence harvest of aquatic plants and shellfish do not apply to a harvest with a permit issued under this section. The commissioner of fish and game shall issue or deny a permit within 30 days after receiving an application.

(d) The commissioner shall deny or restrict a permit under this section upon finding that the proposed harvest will impair sustained yield of the species or will unreasonably disrupt established uses of the resources by commercial, sport, personal use, or subsistence users. The commissioner shall inform the Board of Fisheries of any

action taken on permit applications for species that support commercial fisheries subject to limited entry under AS 16.43 and of any permits denied because of unreasonable disruption of an established use. A denial of the permit by the commissioner must contain the factual basis for the findings.

(e) The Board of Fisheries may adopt regulations for the conservation, maintenance, and management of species for which an acquisition permit is required.

(f) Except as provided in (d) of this section or in a regulation adopted under (e) of this section, the commissioner shall issue a permit if

(1) wild stock is necessary to meet the initial needs of farm or hatchery stock;

(2) there are technological limitations on the propagation of culture stock for the species sought;

(3) wild stock sought is not fully utilized by commercial, sport, personal use, or subsistence fisheries; or

(4) wild stock is needed to maintain the gene pool of a hatchery or aquatic farm.

(g) Aquatic plants and shellfish acquired under a permit issued under this section become the property of the permit holder and are no longer a public or common resource.

Sec. 16.40.130. Importation of aquatic plants or shellfish for stock.
A person may not import into the state an aquatic plant or shellfish for the purpose of supplying stock to an aquatic farm or hatchery unless authorized by a regulation of the Board of Fisheries.

Sec. 16.40.140. Limitation on sale, transfer of stock, and products.

(a) A private hatchery required to have a permit under AS 16.40.100 may sell or transfer stock from the hatchery only to an aquatic farm or other hatchery that has a permit issued under AS 16.40.100, except that shellfish stock may also be sold or offered for sale to an aquatic farm or related hatchery outside of the state.

(b) Stock may not be transferred to or from an aquatic farm or hatchery required to have a permit under AS 16.40.100 without prior notice of the transfer to the commissioner. A notice of transfer shall be submitted at least 45 days before the proposed date of transfer.

(c) A notice of transfer must be accompanied by a report of a health inspection of the stock. The department shall conduct the inspection or contract with a disease diagnostician to conduct the inspection. The cost of inspection shall be borne by the department.

(d) The department may restrict or disapprove a transfer of stock if it finds that the transfer would present a risk of spreading disease.

(e) A person may not sell, transfer, or offer to sell or transfer, or knowingly purchase or receive, an aquatic farm product grown or propagated in the state unless the product was grown or propagated on a farm with a permit issued under AS 16.40.100. The permit must be in effect at the time of the sale, transfer, purchase, receipt, or offer.

Sec. 16.40.150. Disease control and inspection.

(a) The department shall order the quarantine or the destruction and disposal of diseased hatchery stock or of aquatic farm products when necessary to protect wild stock. A holder of a permit issued under AS 16.40.100 shall report to the department an

outbreak or incidence of disease among stock or aquatic farm products of the permit holder within 48 hours after discovering the outbreak or incidence.

(b) A holder of a permit issued under AS 16.40.100 shall allow the department to inspect the permit holder's farm or hatchery during operating hours and upon reasonable notice. The cost of inspection shall be borne by the department.

(c) The department shall develop a disease management and control program for aquatic farms and hatcheries.

(d) The department may enter into an agreement with a state or federal agency or a private, state-certified provider to provide services under (b) and (c) of this section, or inspections under AS 16.40.110(b).

Sec. 16.40.155. Records and reports confidential.
Records required by statute or by a regulation adopted by the department concerning aquatic farm stocks or production, prices, and harvests of aquatic farm products and wild stocks, and annual statistical reports of individual aquatic farms or hatcheries required by statute or by a regulation adopted by the department are confidential and may not be released by the department, except that the department may release the records and reports

(1) to the Department of Revenue and the Department of Natural Resources to assist the departments in carrying out their respective statutory responsibilities;

(2) as necessary to comply with a court order;

(3) provided by an aquatic farm or hatchery permit holder to the permit holder whose activity is the subject of the records or reports;

(4) regarding cumulative annual harvests of wild stocks at individual aquatic farm sites.

Sec. 16.40.160. Regulations.
The commissioner may adopt regulations necessary to implement AS 16.40.100 - 16.40.199.

Sec. 16.40.170. Penalty.
A person who violates a provision of AS 16.40.100 - 16.40.199, a regulation adopted under AS 16.40.100 - 16.40.199, or a term or condition of a permit issued under AS 16.40.100 - 16.40.199, is guilty of a class B misdemeanor.

Sec. 16.40.199. Definitions.
In AS 16.40.100 - 16.40.199

(1) "aquatic farm" means a facility that grows, farms, or cultivates aquatic farm products in captivity or under positive control;

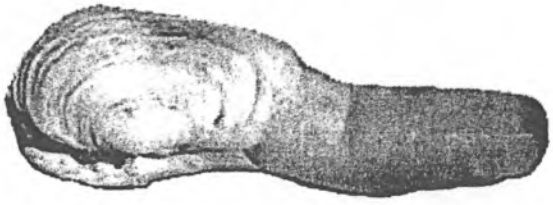
(2) "aquatic farm product" means an aquatic plant or shellfish, or part of an aquatic plant or shellfish, that is propagated, farmed, or cultivated in an aquatic farm and sold or offered for sale;

(3) "aquatic plant" means a plant indigenous to state water or that is authorized to be imported into the state under a permit issued by the commissioner;

(4) "commissioner" means the commissioner of fish and game;

(5) "hatchery" means a facility for the artificial propagation of stock, including rearing of juvenile aquatic plants or shellfish;

(6) "insignificant population" means a population of shellfish that, in the determination of the commissioner, would not attract and support a commercial fishery for that species of shellfish and the harvest and sale of the shellfish would not result in significant alteration in traditional fisheries or other existing uses of fish and wildlife resources if the population were included within an aquatic farm site;



(7) "positive control" means, for mobile species, enclosed within a natural or artificial escape-proof barrier; for species with limited or no mobility, such as a bivalve or an aquatic plant, "positive control" also includes managed cultivation in unenclosed water;

(8) "shellfish" means a species of crustacean, mollusk, or other invertebrate, in any stage of its life cycle, that is indigenous to state water or that is authorized to be imported into the state under a permit issued by the commissioner;

(9) "stock" means live aquatic plants or shellfish acquired, collected, possessed, or intended for use by a hatchery or aquatic farm for the purpose of further growth or propagation.

Interesting Geoduck Facts

Latin name: *Panopea abrupta* (Conrad, 1849)
Superfamily: Hiatellidae
Family: Hiatellidae

- **"The common name for geoduck has a native American origin, meaning "dig deep", a reference to humans or sea otters digging them. The scientific name is *Panopea abrupta* (Conrad, 1849) and I believe it is the largest intertidal clam in the world. It is the largest species of Panopea."**
  Harbo, R.1997.Shells and Shellfish of the Pacific Northwest".
- **The geoduck clam is sometimes spelled: goeduck, goiduck, or gweduck.**
- **The Chinese call the geoduck the "elephant trunk clam"**
- **Native to the northern Pacific coasts of Canada and the United States of America, that is, along the coasts of Washington state and the province of British Columbia. About 109 million adult geoducks are packed into Puget Sound's sediments the biggest bunch of marine animals in the Sound.**
- **The geoduck is the largest intertidal clam (and the largest burrowing clam) in the world with an average weight of approximately 1 kg (2.2 lbs) in B.C. and a shell length to 195 mm (7").**
  - **"I had one of these (Panopea abrupta) on display here at the Seattle Aquarium that was 13 pounds, and I've heard of bigger ones. They are generally credited with being the deepest digging clam, the biggest burrowing clam and it's possible that the geoduck is one of the longest-living mollusks."**
    Roland C. Anderson, PhD; Puget Sound Curator, The Seattle Aquarium
    (Source)
- **Huge geoducks have been recorded weighing up to 4.5 kg (10 lbs) Hand et al.1996, Harbo 1997 with larger denizens of the deep reported by fishermen in the field. (Source)**
  The maximum documented weight: 7.15 kgs. (Sources differ on this point)
- **Age and growth studies have shown that geoduck clams grow about one inch per**

year in shell length for the first four years of life. The growth rate is gradually reduced after this time. The average size of 2.2 pounds is reached in five to six years.

- Average Age: Adults may live to over 140 years and reach a maximum shell length of 23 cm. Geoducks are among the longest-lived animals in the world. Growth-ring analysis shows many individuals live for more than 100 years. They grow rapidly in the first 10-15 years (approximately 1 inch per year), after which time the growth in shell length almost ceases and is replaced by a thickening of the shell and a slow increase in body weight.
- Oldest Recorded Age: 146 to 168 years (sources differ on this point).
    - "The neck of a geoduck can stretch to 1 meter, from the body and shell of this clam. When the clam is harvested (by divers, using high pressure water jets), the neck contracts. The oldest clam aged from British Columbia is 168 years old!" "
      Harbo, R.1997.Shells and Shellfish of the Pacific Northwest".
- Geoducks are most often found at depths between 10 and 80 feet below the mean low tide mark, but have been reported at depths reaching 360 feet. Average depths from another source: subtidal, from 8 to 120 m depth
- They bury themselves up to a meter deep in sand, silt, gravel and other soft substrates. A developing geoduck will burrow into sediment at an approximate rate of 1 foot per year. After digging about 3 feet deep, the adult geoduck settles in for 100 years or more.
- Siphons and neck cannot be withdrawn into their shell. In burrowed adults, the siphon may stretch 39 inches to the sea bed.
- Geoducks have separate sexes. Spawning occurs annually, primarily from Late April to July, when waters are warm. Females release from 7-10 million eggs, which develop through several stages in the water column until settling on the bottom within 40-50 days. At a shell length of 2 mm, they burrow into the substrate and can bury to a refuge depth of 60 cm in two years. They are sexually mature by 3 yrs.
- The of the geoduck is thin, it lacks teeth, and it may attain a length of 8 in. (20 cm). The valves, or two parts of the shell, are always open in the adult, because the body and siphons are too large to be retracted.
- The geoduck feeds on phytoplankton (single-celled marine algae), mostly diatoms and flagellates. Due to it's diet, one must be careful of paralytic shellfish poison (PSP) or "red tides". Check with autorities if unsure wheter or not there is a red tide before attempting to invite a geoduck for lunch. Red tides are harmless to the clams, but they can be fatal to humans.
- As Food: The neck can be cut or ground and used in chowders. The body meat, when sliced, pounded and sautéed it resembles abalone. Although they are edible,

they are not widely marketed due to their inaccessibility. They are exposed for only a few hours a month, during minus tides, and even then only a very fast person digging with a shovel can attempt to dig out this fast burrowing clam. (Note: sport limits for the stae of Washington are three per day)

- See the Underwater Harvestors Page for information of purchasing, storing, preparing and recipes for geoducks
- The prime meat comes from the neck, which may be up to 24-inches when fully extended, and the mantle can be cut or ground and used in chowders. The neck meat is often used in sushi or minced into patties and quick fried.
- Welcome to Geoduck Recipes: not only recipes but an introduction to geoduck aquaultue. By Grant Jones and his wife, Ashley.
- Mirugai Sushi: Source

- Predators: sea stars, crabs, fishes, and birds.

- SCUBA divers utilize high-pressure water to "dig" out the geoduck. The divers wear dry suits for protection from the cold water and they are supplied with air pumped down to them through a flexible hose from a compressor onboard a fishing boat. They must wear heavy weights to keep them submerged. Divers walk along the bottom for geoduck shows, which are the visible exposed tip of a siphon or dimple left in the sand from a retracted siphon. The divers then use a nozzle fed with high pressure water from the fishing boat above them to liquefy the sand around the geoduck thus removing the clam. The geoduck is then placed into a bag clipped to their waist. Divers are in constant communication with their boat via high tech diver to ship communications.

January 21, 2011

Representative Paul Seaton
State Capitol, Room 201
Juneau, Alaska 99801

Dear Representative Seaton:

The Alutiiq Pride Shellfish Hatchery appreciates your efforts with House Bill 60. We rely upon shellfish seed sales to cover portions of our operating expenses. Geoducks and their high value offer us the best opportunity to achieve our sales goals. To date, the demand has not been originally projected causing a perpetual shortfall in revenue. Opening additional markets in south-central Alaska will help alleviate this deficit.

We are often frustrated by the Alaska Department of Fish and Game and their regulation of transport. It is ironic that we can transport a non-indigenous species such as oysters and cannot transport a native species outside what is considered its natural range. The fact that it will probably be non-reproductive in south- central Alaska should make management easy.

I would suggest we promote a cooperative demonstration project exploring the feasibility of geoduck farming in south-central Alaska headed by the Department of Fish and Game, the Department of Commerce and the Chugach Regional Resources Commission. The shellfish hatchery can provide geoduck seed for such an effort.

Sincerely,

Jeff Hetrick, Director

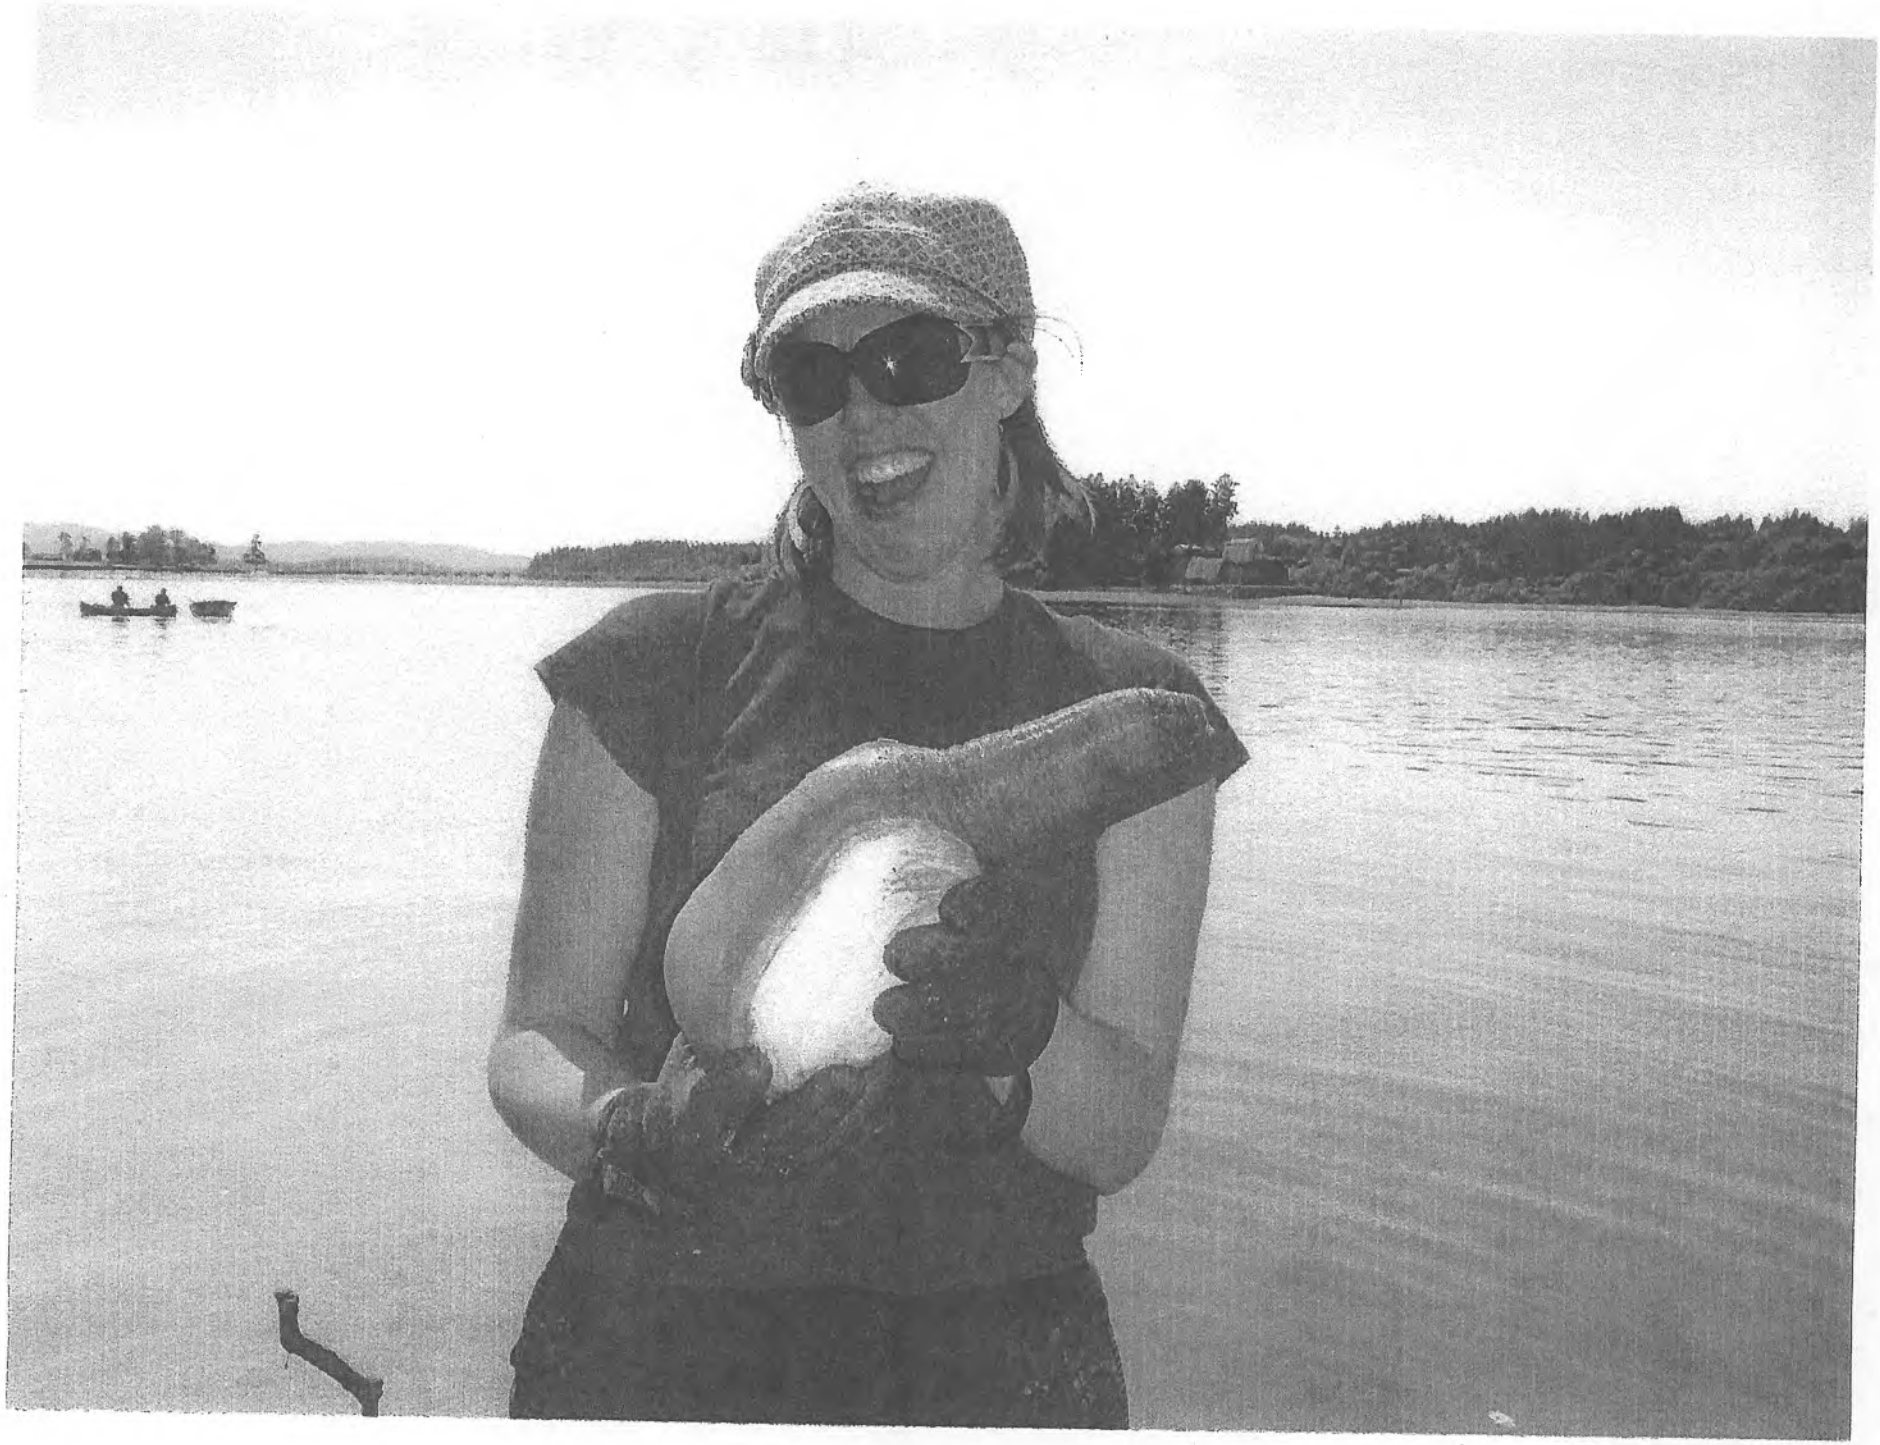
March 11, 2011

Dear Alaska Legislators,



The City of Seward supports House Bill 60, "An Act relating to aquatic farm permitting involving geoducks and to geoduck seed transfers between certified hatcheries and farms".

HB 60 will remove limitations to the growth of geoduck mariculture in Alaska. Currently, geoduck clam seed from the Alutiiq Pride Shellfish Hatchery can be utilized only by southeast shellfish farms due to Alaska Fish and Game geographic restrictions. This limits geoduck seed sales and the start-up of geoduck farms in Alaska. Removing the geographic limitation will expand the geoduck farming industry into other coastal communities of Alaska.

By supporting HB 60, you are expanding the geoduck industry in Alaska and expanding the economic diversity of our communities.

Sincerely,

Mayor William E. Dunham
City of Seward

The Honorable Lyman Hoffman, Co-Chair
The Honorable Bert Stedman, Co-Chair
Senate Finance Committee
Alaska State Capitol, Rooms 518 & 516
Juneau, AK 99801-1182

Subject: Support for HB 65

Dear Chair Hoffman & Chair Stedman:

The Alaska Commission on Aging (ACoA) is pleased to offer our support for HB 65, a bill authored by Representatives Edgmon, Joule, Herron and Foster co-sponsored by Representatives Peggy Wilson, Kerttula, Tuck, Gardner, Kawasaki, Millet, and Gara. The purpose of this legislation is to expand the list of eligible applicants for Alaska Housing Finance Corporation's (AHFC) Senior Citizens Housing Development Fund (SCHDF) to include regional housing authorities in addition to municipalities, 501(c)3 and (4) nonprofit organizations. The SCHDF program is used specifically to increase the number of senior housing units for older Alaskans and to address the needs of a growing Alaska senior population whose incomes are in the low to moderate range. The SCHDF is a flexible funding tool that provides gap financing for the construction of mixed-income housing projects for older Alaskans and supports a variety of development needs. The ACoA endorses the inclusion of regional housing authorities as eligible applicants to increase the availability of quality and affordable senior housing to benefit older Alaskans in every region of the state, including rural and remote areas.

The ACoA supports passage of HB 65 to make these funds available for development of senior housing in rural and remote regions that are not adequately served by this program. Please feel free to contact Denise Daniello, ACoA's executive director (465-4879 or denise.daniello@alaska.gov) should you require additional information about our position. Thank you for your consideration and support of HB 65.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Sincerely,

Denise Daniello

HB 65
Senior Citizens Housing Development Fund Grants

SPONSOR'S INTENT

HB 65 will benefit senior citizens across the state by including regional housing authorities among the entities eligible for grants through the Alaska Housing Finance Corporation's Senior Citizens Housing Development Fund (SCHDF).

The SCHDF contributes funding to organizations that develop quality housing for older Alaskans, who make up the fastest growing segment of our population.

While SCHDF grants have been available to municipalities and 501(c)(3) and (4) nonprofits since the fund's inception, Alaska's regional housing authorities have not been eligible. HB 65, which has the support of the Alaska Housing Finance Corporation, will correct that omission.

In most cases, grants through the SCHDF complement funding from a variety of other sources. Often an SCHDF grant is the final piece of the puzzle that allows a project to go forward. Funds can be put toward pre-development expenses and new construction as well as acquisition of properties, accessibility modifications, and rehabilitations.

Alaska's 14 regional housing authorities span from Ketchikan to Barrow and are among the state's most experienced developers of affordable housing. Making housing authorities eligible for grants will not increase spending through the SCHDF. It may, however, widen the selection of projects competing for grants and increase AHFC's ability to more effectively allocate funding.

I would be very grateful for your support for this legislation, which I hope will benefit elders in every region of Alaska.

Memorandum

Date: February 2nd, 2011

To: Rep. Cathy Munoz, Chair
House Community & Regional Affairs Committee

From: Rep. Bryce Edgmon
House District 37

RE: Examples of 501(c)3 Nonprofits that have Received SCHDF Grants

Thank you again for hearing HB 65—Senior Citizens Housing Development Fund Grants—on February 1st in the Community & Regional Affairs Committee.

At the hearing, Rep. Saddler asked for examples of already-qualifying nonprofit organizations that have been recipients of SCHDF grants. I have looked into the question, and I write now to provide the requested examples.

They include the Retirement Community of Fairbanks as well as the Mid-Valley Senior Citizens—two of the three entities whose projects were described in an item in the committee members' bill packets titled "Examples of Senior Housing Projects Partly Funded with Senior Citizens Housing Development Grants."

Additional examples include:

Chugach Colony Estates—Grantee: Palmer Senior Citizens' Center, Inc.
Meadow Lakes—Grantee: Meadow Lakes Community Council
Togiak Senior Housing—Grantee: Bristol Bay Housing Development Corporation
Tovarish Manor Phase II—Grantee: Ninilchik Tribal Health, Culture and Heritage Nonprofit

Please do not hesitate to contact me or my staff if you require any further information regarding HB 65.

Senior Citizens Housing Development Fund (SCHDF)

Grants from the SCHDF provide funding for senior citizen housing. SCHDF monies are awarded according to three different AHFC programs which are outlined below. Under all three programs, eligible recipients for SCHDF monies are limited to municipalities or public or private nonprofit corporations designated as tax exempt under 26 U.S.C. 501(c) (3) and (4) of the internal Revenue Code of 1954.

Greater Opportunities for Affordable Living (GOAL)

The GOAL program awards SCHDF monies to bridge the gap between the total cost of the project and the total funding from other sources. Funds may be used for acquisition, rehabilitation and/or new construction of senior housing.

Grant recipients must choose a definition of "senior citizens" as either age 55 and older or age 62 and older according to the federal definition of "housing for older persons" under the Federal Fair Housing Act (Section 807 of 42 U.S.C. 3607) implemented at 24 CFR 100.300-308. Both choices carry with them requirements detailed in the application process.

Senior Access Program (SAP)

The SAP provides funds for accessibility modifications to existing housing. Examples of eligible activities are construction of ramps and installation of shower grab bars. SAP funds are awarded based on the cost of proposed eligible activities and are capped according to an annually determined amount.

Qualifying seniors must meet the definition of a "senior household" under 15 AAC 151.950 c.11. Income and residency restrictions apply.

Pre-Development Grants Program

The Pre-Development Grants Program provides funding in order to prepare projects for application to the GOAL, HUD 202, HUD 811 or other construction funding programs. Some examples of eligible expenses under this program are architectural single line drawings, legal fees, preliminary site engineering and consultant fees. Awards are based on specific eligible activities and are capped according to an annually determined amount.

Information provided by Alaska Housing Finance Corporation.

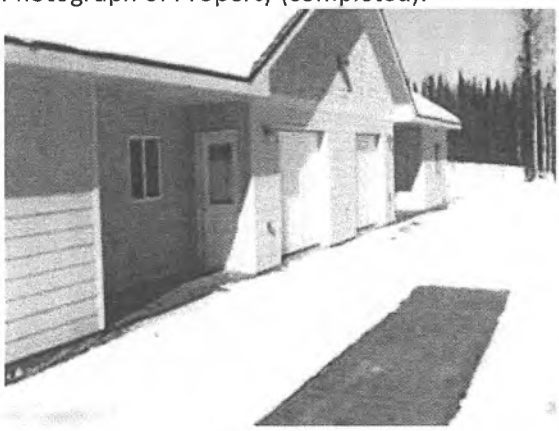
Examples of Senior Housing Projects Partly Funded with Senior Citizens Housing Development (SCHDF) Grants

Generally, please see the below table for information regarding funding levels and interest in senior housing over the past few years. The table references senior funds allocated to rental development projects, by source, for competitive allocation through the Greater Opportunities for Affordable Living (GOAL) cycles from FY 2008 to present.

GOAL Cycle for Rental Development	SCHDF $'s Used	DCEH $'s Used	Funded Requests / Number of Applicants
FY 2008	$3.5 M	$5.7 M	6/9
FY 2009	$5.5 M	$1.6 M	4/7
FY 2010	$2.8 M	$0.7 M	2/2
FY 2011	$4.0 M	$0	2/4

Project Examples:



1) Raven Landing Phase I – Funded in FY 2008 Cycle
    a. Project Sponsor: Retirement Community of Fairbanks
    b. Project Location: Fairbanks
    c. Number of Units: 20
    d. Total Development Costs: $5.1 M
    e. Funding Sources:
        i. $490k - Neighborhood Stabilization Program
        ii. $1.1 M – SCHDF
        iii. $1.1 M – DCEH
        iv. $1.2 M – AHFC 1st Deed of Trust
        v. $950k – AHFC 2nd Deed of Trust
        vi. $150k – Denali Bank loan
        vii. $31k – Deferred Developer Fee

Photograph of Property (construction underway):

2) Blueberry Pointe – Funded in FY 2009 Cycle
    a. Project Sponsor: Mid Valley Senior Citizens
    b. Project Location: Houston
    c. Number of Units: 6
    d. Total Development Costs: $2.3M
    e. Funding Sources:
        i. $1.2 M – SCHDF
        ii. $620k – HOME Investment Partnership funds
        iii. $330k – AHFC 1st Deed of Trust
        iv. $169k – AHFC 2nd Deed of Trust

Alaska Housing
FINANCE CORPORATION

2011 LEGISLATIVE FACTSHEET

Enable Regional Housing Authorities (RHAs) to receive AHFC Senior Citizens Housing Development Funds (SCHDF)

January 31, 2011

LEGISLATIVE REQUEST: This legislation, pre-filed by Rep. Bryce Edgmon as HB65, will insert language in A.S. 18.56.810(a) to include Regional Housing Authorities as eligible grant recipients for funds appropriated by the legislature to the Senior Citizens Development Fund (SCHDF) that is administered by Alaska Housing Finance Corporation (AHFC). AHFC supports this legislation as written.

STATEMENT OF NEED:

- The Senior Citizens Housing Development Fund moved to AHFC during the merger of all state housing functions in 1992. SCHDF provides funding to organizations to develop senior citizen housing.
- Statutory language currently limits program eligibility to municipalities or public or private non-profit corporations designated as tax exempt under 26 U.S.C. 501c(3) and (4) (Internal Revenue Code of 1954). Although Alaska regional housing authorities are some of the most experienced and qualified housing developers in the state, they are not able to access this grant program that supports increased development of senior housing.
- Because of current statutory language, a housing authority must incorporate a separate non-profit organization or partner with an eligible organization in order to receive a SCHDF award for senior housing development.

HOW IT WORKS:

- Funding under SCHDF is used to develop housing for "older persons" as defined under the Federal Fair Housing Act. Sponsors can elect either age 62 and older, or age 55 and older as the age requirement for occupancy under Section 807 of the Fair Housing Act (42 U.S.C. 3607 (b) (1) as implemented at 42 CFR 100.300-308.
- Acquisition, rehabilitation, accessibility modification and new construction of senior housing as well as pre-development activities are all eligible for grant awards.

ADDITIONAL:

- Members of the Alaska Association of Housing Authorities (AAHA), collectively one of the largest groups of affordable housing providers in the state, support this statutory change.

RE: HB 65 (Edgmon, Herron, Foster, Joule)—Support

Dear Co-Chairs Stoltze and Thomas:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the House Finance Committee to support for HB 65, authored by your Committee colleagues Representatives Bryce Edgmon and Reggie Joule as well as by Representatives Bob Herron and Neal Foster and co-sponsored by Representative Peggy Wilson. HB 65 will allow regional Native housing entities to apply for grants for senior housing from the Alaska Housing Finance Corporation.

HB 65 does not expand funding for senior housing. It simply allows Native organizations with housing expertise and experience to compete for grants for senior housing. This makes sense and creates a fair competitive field for organizations that AARP would like to see involved in senior housing.

AARP recommends an "AYE" vote for HB 65.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

Marie Darlin

Subject: Support for HB 65

Dear Representatives Edgmon, Herron, Foster, and Joule:

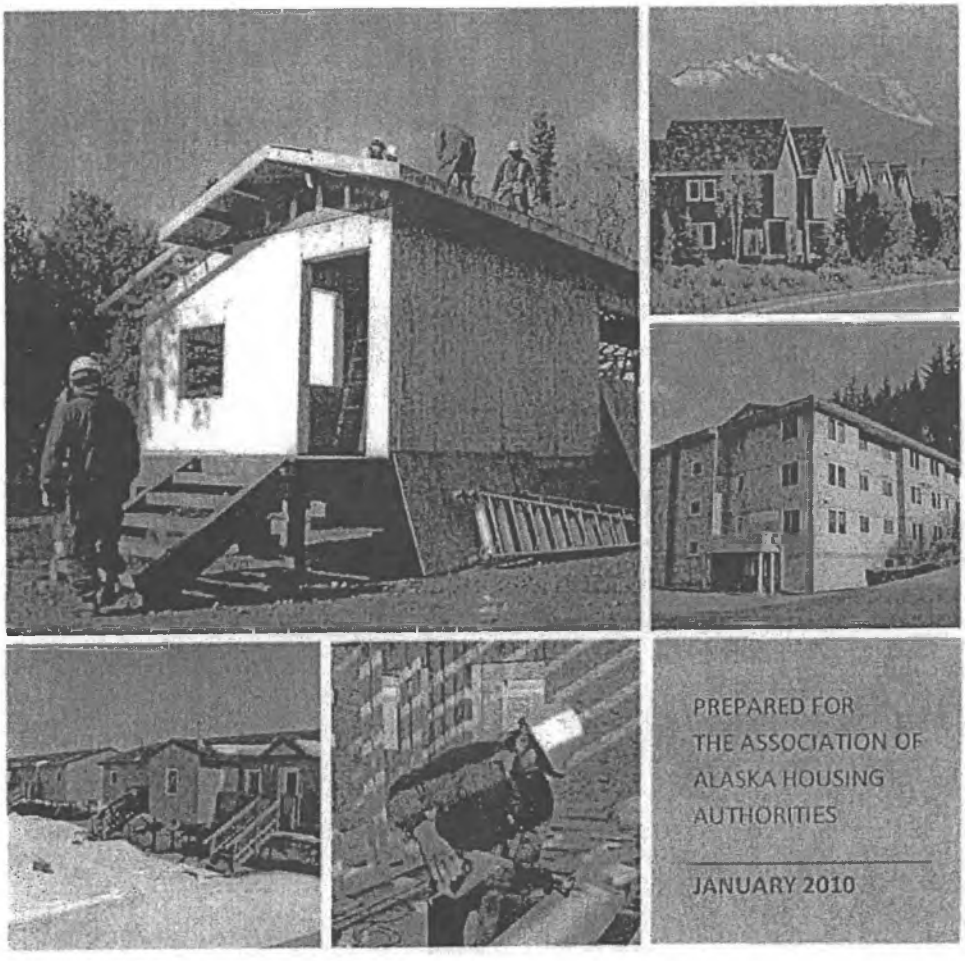
The Alaska Commission on Aging (ACoA) is pleased to offer our support for HB 65, a bill sponsored by you and co-sponsored by Representative Peggy Wilson, to expand the list of eligible applicants for Alaska Housing Finance Corporation's (AHFC) Senior Citizens Housing Development Fund (SCHDF) to include regional housing authorities in addition to municipalities, 501(c)3 and (4) nonprofit organizations. The SCHDF program is used specifically to increase the number of senior housing units for older Alaskans and to address the needs of a growing Alaska senior population whose incomes are in the low to moderate range. The SCHDF is a flexible funding tool that provides gap financing for the construction of mixed-income housing projects for older Alaskans and supports a variety of development needs. The ACoA endorses the inclusion of regional housing authorities as eligible applicants to increase the availability of quality and affordable senior housing to benefit older Alaskans in every region of the state, including rural and remote areas.

Alaska is the state with the fastest growing senior population. Currently, there are more than 85,000 Alaska seniors age 60 years and older representing 12.3% of the state's population, a 52.6% increase since 2001. The population of Alaskan seniors increased nearly seven percent in the most recent year alone. All nine regions recognized by the Department of Health and Social Services experienced an increase in their senior populations of at least 20% over the last eight years.

Having a safe, comfortable, and accessible home fulfills a basic human need which becomes even more important as a person ages and develops frailties. Alaska has a statewide shortage of accessible, affordable housing options for seniors. The waiting list for AHFC's senior/disabled housing has grown by 70% in the past two years. In addition, 15-16% of Alaska's homeless population is estimated to be people age 55 years and older.

The ACoA supports passage of HB 65 to make these funds available for development of senior housing in rural and remote regions that are not adequately served by this program. Looking forward, we recognize that there will be an increased demand for additional funds for the SCHDF to meet the accelerating need of the growing Alaska senior population as well as to pay for higher construction costs related to

inflation and development in rural and remote communities. Please feel free to contact Denise Daniello, ACoA's executive director (465-4879 or denise.daniello@alaska.gov) should you require additional information about our position. Thank you for your support of HB 65 and for recognizing the critical need to develop additional quality senior housing in Alaska.



Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Sincerely,

Denise Daniello
ACoA Executive Director

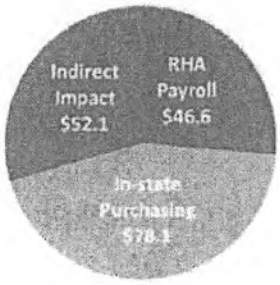
PREPARED FOR
THE ASSOCIATION OF
ALASKA HOUSING
AUTHORITIES

JANUARY 2010

The Economic Impact of Alaska's
Regional Housing Authorities

Information Insights
Fairbanks + Anchorage

Executive Summary



Alaska's Regional Housing Authorities (RHA) play a key role in increasing the supply of quality affordable housing in Alaska. They provide housing, assistance in purchasing a home, renter and home buyer education, infrastructure for housing development, community facilities and employment opportunities to benefit Alaska Natives as well as non-Alaska Natives.

In rural communities, these organizations provide the vast majority of new housing units for local residents and they are a key player in increasing the supply of affordable housing in urban communities. The impacts to the lives of the people who receive housing are easy to understand, but housing authorities also provide benefits to all Alaskans in less direct ways. In addition to providing housing and other benefits to clients in substantial numbers, they also employ Alaskans throughout the state and contribute to the whole state by stimulating economic activity. RHAs have a nearly 100 percent resident hire rate.

The Association of Alaska Housing Authorities (AAHA) contracted with Information Insights to identify the statewide economic impacts of Alaska regional housing authorities, including the direct benefits to urban and rural Alaska as well as indirect economic benefits to the state as a whole. The study also highlights the work housing authorities are doing to provide safe, affordable and energy efficient housing stock in the state and the non-housing projects that improve the lives of Alaskans and benefit their communities. Finally, it provides regional details on housing authority economic activity.

Key Findings

TOTAL ECONOMIC IMPACT

The total economic impact of Alaska's regional housing authorities on the state's economy includes both direct and indirect benefits. Direct impacts include wages and benefits paid to employees of the regional housing authorities as well as purchases made by the housing authorities from vendors and contractors in Alaska. Indirect impacts include the additional revenue, employment and earnings created by the companies from which RHAs purchase goods and services, as well as the economic activity generated throughout the economy when employees of all impacted companies or organizations spend their paychecks.

Total impacts of housing authority activity from all sources

The total (direct + indirect) economic impact of RHA activity in the state in 2008 was significant:

- $177 million in economic activity statewide
- 2,831jobs statewide

Of the jobs generated by RHAs in 2008, approximately 51.5 percent (1,457) were full-time jobs, 47.5 percent (1,345) were seasonal and temporary jobs, and the remainder (29) were part-time jobs.

Direct economic impacts statewide

In 2008, direct impacts statewide totaled:

- 1,757 people employed with housing authorities
- $46.6 million in direct payroll
- $78.1 million in spending with Alaska-based vendors and contractors

Nearly one third of the 1,757 direct jobs were full-time year round positions. The proportion of full time year round workers is lower in the direct jobs count than in the jobs generated by RHA vendor spending owing to the highly seasonal nature of construction in Alaska.

Indirect impacts

In 2008, indirect impacts of RHA activity statewide included:

- 495 jobs primarily in Alaska's construction, freight, government and professional services as a result of RHA purchases from Alaska-based vendors and contractors
- 579 additional jobs primarily in the service sector created when employees of both housing authorities and vendors spent their paychecks on Alaska goods and services
- $45.5 million in additional economic activity resulting from RHA purchasing and payroll spending

BUILDING AND RETROFITTING ALASKA'S LOW-INCOME HOUSING STOCK

Direct benefits also include all the new housing units constructed in the state as well as renovations to existing housing by Alaska regional housing authorities. In 2008, these totaled:

- 200 new housing units built at a cost of just under $48.1 million dollars
    - 137 new urban housing units built at a total cost of more than $26.7 million dollars
    - 63 new rural housing units built at total cost of nearly $21.4 million dollars

- Approximately 1,000 housing units rehabilitated and renovated at a total cost of more than $18.2 million dollars
- 260 housing units - valued at more than $23.6 million - were "conveyed" to individual owners through a variety of housing authority programs designed to make home ownership possible for the people they serve.

The 200 new units built in 2008 represent all types of homes, both single and multi-family units, including units that are designed to serve special populations like the elderly and people with disabilities. It is also important to note that site remediation and infrastructure development becomes part of total costs for many projects in both urban and rural communities. Examples include extending utilities or road systems to un-served areas in rural communities and providing demolition and environmental remediation in challenging urban neighborhoods.

In addition to building, renovating and transferring ownership of homes to individuals, regional housing authorities reported having nearly 4,500 housing units currently under management and conservatively estimate serving more than 10,000 people.

BRINGING MONEY AND JOBS TO RURAL AND URBAN ALASKA

In the four years from 2005 to 2007, RHAs contributed to the economies of 125 Alaska communities. In 2008 alone, the direct economic impact of RHA projects in the state's rural and urban communities were as follows:

Direct impacts on rural Alaska, 2008

- More than 1,250 people employed
- $26.5 million in payroll
- $13.9 million spent with vendors and contractors located in rural Alaska

RHAs are creating work across the state, including some of the most remote communities where unemployment rates are extremely high. The impact of job creation in these small communities, with few employment opportunities, has far reaching positive implications beyond just local spending of disposable income.

Direct impacts on urban Alaska, 2008

- More than 500 people employed and $20.2 million in payroll in 2008
- $64.1 million spent with vendors and contractors located in urban Alaska[1]

A KEY ROLE IN EXPANDING WEATHERIZATION SERVICES

For the past 30 years there have been five active weatherization entities in the state; now the Alaska Housing Finance Corporation has signed agreements with the

[1] The total purchasing by RHAs of $78.1 million includes six percent that cannot be allocated as either urban or rural.

housing authorities to do this important work as well. Alaska's regional housing authorities will play a key role in meeting the state's goal of weatherizing 13,000 housing units over the next five years. Regional housing authorities have the infrastructure and relationships throughout the state that will be invaluable in achieving rapid expansion in weatherization services.

NON-HOUSING IMPACTS

The flexibility of Native American Housing and Self Determination Act (NAHASDA) funds has made it possible for RHAs to invest in the infrastructure needed to support new quality housing units, even when the infrastructure goes beyond the buildings themselves. Examples include projects to extend utilities (water, electric, gas), extending access into new neighborhoods, building community facilities and providing financial support.

Cook Inlet Housing Authority

Promoting Independence Through Housing

January 10, 2011

Representative Bryce Edgmon
Alaska State Capitol, Room 416
Juneau, Alaska 99801

SUBJECT: PROPOSED REVISIONS TO AS 18.56.010 – SENIOR CITIZENS HOUSING DEVELOPMENT FUND

Dear Representative Edgmon:

I am writing on behalf of Cook Inlet Housing Authority (CIHA), the state chartered regional housing authority for the Cook Inlet Region., and a member of the Association of Alaska Housing Authorities (AAHA). We offer our support for a proposed amendment to AS 18.56.010 to explicitly include Alaska's regional housing authorities as eligible recipients under the Alaska Housing Finance Corporation (AHFC) Senior Citizens Housing Development Fund (SCHDF) program.

The SCHDF program was created to provide funding to assist organizations in the development of senior citizen housing through grant awards for acquisition, rehabilitation, accessibility modification and new construction activities. CIHA and other Alaska regional housing authorities are some of the most qualified and experienced developers of senior housing in the state; in fact, CIHA itself is now the largest provider of senior housing in Alaska.

The current language of AS 18.56.010 excludes regional housing authorities from eligibility for SCHDF funds, because although they are tax exempt for I.R.S. purposes, they are not 501(c)(3) or (4) entities. The rationale for this distinction is unclear, and more importantly, has not been uniformly applied by AHFC in past grant awards. AHFC has awarded SCHDF grant funds to many regional housing authorities in the past, including CIHA, and only last year determined that regional housing authorities were actually not named as eligible recipients. The statutory language is unclear in that it names "public and private non-profit 501(C)(3) or (4) organizations" as eligible recipients. Although regional housing authorities are in fact public corporations, they are not "public non-profit" (i.e., 501(C)(3) entities). Inclusion of "regional housing authorities" to the list of eligible participants in the program would help clear this confusion.

AHFC's past award of SCHDF to regional housing authorities for senior housing development has set a precedent for regional housing authority eligibility for these funds. Regional housing authorities are also collectively the largest developer of housing, including senior housing, in the State. Denying regional housing authorities access to these valuable funds will result in a significant reduction in the delivery of greatly needed senior housing in rural and urban areas of the state. Further, there would not be any financial impact to the state's general fund if regional housing authorities were permitted to continue to access SCHDF funds. For these reasons, CIHA strongly supports AAHA's proposal to expressly include regional housing authorities organized under AS 18.55.996 to the list of entities eligible for the direct receipt of SCHDF funds.

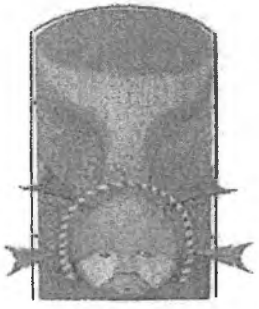
Rep. Bryce Edgmon
Alaska State Capitol, Room 416
Juneau, AK 99801

Re: Proposed Revisions to Sec. 18.56.810: Senior Citizens Housing Development

Dear Rep. Edgmon,

I am writing on behalf of [Bering Straits Regional Housing Authority], one of 14 state chartered regional housing authorities who are members of the Association of Alaska Housing Authorities (AAHA). We offer our support for a proposed statutory amendment which would provide for the direct eligibility of Alaska housing authorities under the AHFC Senior Citizens Housing Development Fund Program.

The program was created to provide funding to assist organizations attempting to develop senior citizen housing. Acquisition, rehabilitation, accessibility modification and new construction of senior housing as well as pre-development activities are all eligible for grant awards.



Although Alaska's regional housing authorities are some of the most experienced and qualified housing developers in the state, current statutory language limits program eligibility to municipalities or public or private nonprofit corporations designated as tax exempt under 26 U.S.C. 501©(3) and (4) (Internal Revenue Code of 1954). Regional housing authorities do not meet this technical definition and are thus unable to directly access this particular program as a resource to address increasing senior housing needs throughout the state. [Bering Straits Regional Housing Authority] strongly supports the proposal by AAHA to add regional housing authorities, as defined under AS 18.55.996, to the specified eligible entities which can apply for and receive these funds.

It is our understanding that your office has agreed to sponsor legislation which would provide for the requested statutory change. We very much appreciate your efforts to assist in this matter. If there is anything further we can do to help in your efforts, please do not hesitate to contact us.

Sincerely,

Robert Mocan

Executive Director

ALEUTIAN
HOUSING AUTHORITY

January 4, 2011

Rep. Bryce Edgmon
Alaska State Capitol, Room 416
Juneau, AK 99801

Re: Proposed Revisions to Sec. 18.56.810: Senior Citizens Housing Development

Dear Rep. Edgmon,

I am writing on behalf of Aleutian Housing Authority (AHA), one of the 14 state chartered regional housing authorities and a member of the Association of Alaska Housing Authorities (AAHA) to offer our support for a proposed statutory amendment which would provide for the direct eligibility of Alaska housing authorities under the AHFC Senior Citizens Housing Development Fund Program.

The program was created to provide funding to assist organizations attempting to develop senior citizen housing for seniors 60 years of age and older and whose incomes are in the low to moderate ranges. Acquisition, rehabilitation, accessibility modification and new construction of senior housing as well as pre-development activities are all eligible for grant awards.

Although Alaska's regional housing authorities are some of the most experienced and qualified housing developers in the state, current statutory language limits program eligibility to municipalities or public or private nonprofit corporations designated as tax exempt under 26 U.S.C. 501©(3) and (4) (Internal Revenue Code of 1954). Regional housing authorities do not meet this technical definition and are thus unable to directly access this particular program as a resource to address increasing senior housing needs throughout the state. Aleutian Housing strongly supports the proposal by AAHA to add regional housing authorities, as defined under AS 18.55.996, to the specified eligible entities which can apply for and receive these funds.

It is our understanding that your office has agreed to sponsor legislation which would provide for the requested statutory change. We very much appreciate your efforts to assist in this matter. If there is anything further we can do to help in your efforts, please do not hesitate to contact us.

Sincerely,

Dan Duame
Executive Director

Re: Proposed Revisions to Sec. 18.56.810:
Senior Citizens Housing Development

Dear Rep. Edgmon:

Bristol Bay Housing Authority (BBHA) supports a proposed statutory amendment which would provide for the direct eligibility of Alaska housing authorities under the AHFC Senior Citizens Housing Development Fund Program. As you are aware, BBHA is one of 14 state chartered regional housing authorities who are members of the Association of Alaska Housing Authorities (AAHA).

The program was created to provide funding to assist organizations attempting to develop senior citizen housing. Acquisition, rehabilitation, accessibility modification and new construction of senior housing as well as pre-development activities are all eligible for grant awards.

Although Alaska's regional housing authorities are some of the most experienced and qualified housing developers in the state, current statutory language limits program eligibility to municipalities or public or private nonprofit corporations designated as tax exempt under 26 U.S.C. 501©(3) and (4) (Internal Revenue Code of 1954). Regional housing authorities do not meet this technical definition and are thus unable to directly access this particular program as a resource to address increasing senior housing needs throughout the state. In the past, AHFC has interpreted the regulations to define Housing Authorities as eligible applicants and recipients of such funds. However, after a AG opinion on the topic, AHFC has reversed that interpretation of eligibility of Housing Authorities to directly participate in the program. BBHA strongly supports the proposal by AAHA to add regional housing authorities, as defined under AS 18.55.996, to the specified eligible entities which can apply for and receive these funds.

Thank you for sponsoring legislation which would provide for the requested statutory change. We appreciate your efforts to assist in this matter. Please contact me for any further information you may need on this issue.

Sincerely,

Dave McClure
Executive Director
Bristol Bay Housing Authority

Re: Proposed Revisions to Sec. 18.56.810
Senior Citizens Housing Development

Dear Representative Edgmon,

It is my understanding that your office has agreed to sponsor legislation that will request a statutory amendment to allow Alaska housing authorities as eligible entity to apply for the AHFC Senior Citizens Housing Development Fund Program (SCHDF).

We thank you for sponsoring legislation that will allow Alaska regional housing authorities to apply for the SCHDF program as a resource to address increasing senior housing needs throughout the state and especially Alaska rural communities.

Tlingit Haida Regional Housing Authority is a member of the Association of Alaska Housing Authorities (AAHA). We strongly support the proposal by AAHA to add regional housing authorities, as defined under AS 18.55.996, to the specified eligible entities that are eligible to apply for and receive SCHDF funds.

If you have any questions or need my support with your efforts, please feel free to contact me at 907-780-6868.

Sincerely,

Blake Z. Kazama

INTERIOR REGIONAL HOUSING AUTHORITY

January 5, 2011

Rep. Bryce Edgmon
Alaska State Capitol, Room 416
Juneau, AK 99801

Dear Rep. Edgmon:

RE: Proposed Revisions to Sec. 18.56.810 Senior Citizens Housing Development.

I am writing on behalf of the Interior Regional Housing Authority, one of 14 state chartered regional housing authorities who are members of the Association of Alaska Housing Authorities (AAHA). We offer our support for a proposed statutory amendment which would provide for the direct eligibility of Alaska housing authorities under the AHFC Senior Citizens Housing Development Program.

The program among others was created to provide funding to assist organizations attempting to develop senior citizen housing. The acquisition, rehabilitation, accessibility modification and new construction of senior housing as well as pre-development activities are all eligible for grant awards. What should be a relatively straightforward process is complicated by the fact that, regional housing authorities are hampered by a technicality. The need for senior housing is a need that we hear about on a continual basis.

Although Alaska's regional housing authorities are some of the most experienced and qualified housing developers in the state, current statutory language limits program eligibility to municipalities or public or private nonprofit corporations designated as tax exempt under 26 U.S.C. 501©(3) and (4) (Internal Revenue Code of 1954). Regional housing authorities do not meet this technical definition and are thus unable to directly access this particular program as a resource to address increasing senior housing needs throughout the state without having to jump through a lot of hoops.. The Interior Regional Housing Authority strongly supports the proposal by AAHA to add regional housing authorities, as defined under AS 18.55.996, to the specified eligible entities which can apply for and receive these funds.

It is our understanding that your office has agreed to sponsor legislation which would provide for the requested statutory change. We very much appreciate your efforts to assist in this matter. If there is anything further we can do to help in your efforts, please do not hesitate to contact us.

Sincerely,

Irene Catalone

Why this fiscal note differs from previous version (if initial version, please note as such)

This fiscal note reflects CSHB078(FIN) version "27-LS0147\O". The CS moves advanced nurse practitioners (ANPs) from the eligible list of practitioner types in Tier II to Tier I after the Board of Nursing adopts a regulation that requires ANPs to complete a degree of doctor of nursing practice. As of March 13, 2012, the Alaska Board of Nursing has not made a decision to require doctoral education. It is assumed then that the doctoral requirement would not occur within the time frame of this fiscal note; therefore, there is no change in the fiscal note amounts. However, when the requirement does change it should be noted that there will be an increased cost. Using the existing assumptions of the fiscal note on page 3, moving a practioner type from Tier II ($222.0) to Tier I ($387.0) will increase the total cost by $165.0 ($387.0 - $222.0), with $123.8 GF and $41.2 in matching funds from the employing site. No changes were made to pages 2-3.

FISCAL NOTE #4

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 78(FIN)

Analysis

This bill creates a loan repayment program and an employment incentive program for certain health care professionals employed in the state. These health care professionals must meet eligibility criteria, and they must be engaged in qualified employment. The intent of the legislation is to "address the worsening shortage of certain health care professionals in the state by increasing the number and improving the distribution of health care professionals who provide direct patient care."

The Division of Public Health estimates that it will need 1.0 FTE to fully administer the loan repayment and employment incentive programs.

The Division estimates that it will need $2,715.0 for practitioner payments in Year 1. This assumes that 90 participants will be enrolled in the program in Year 1. Funding can be used for practitioner payments as cash incentives, for payments to lending institutions for loan repayments, or for a combination of the two types of payments. Maximum payments established for any combination of loan repayment and cash incentive are: $35.0 annually for Tier I health care professionals employed in "regular" positions; $47.0 annually for Tier I health care professionals employed in "very hard-to-fill" positions; $20.0 annually for Tier II health care professionals employed in "regular" positions; and $27.0 annually for Tier II health care professionals employed in "very hard-to-fill" positions. The need for $2,715.0 in FY2012 assumes the following:

Tier I	27 Practitioners	$1,161.0
Tier II	63 Practitioners	$1,554.0
Total	90 Practitioners	$2,715.0

Tier I assumes 9 participants from each of 3 types comprising Tier I at $387.0 for each type.
(6 x $47.0 + 3 x $35.0 = 387.0 x 3 = $1,161.0)

Tier II assumes 9 participants from each of 7 types comprising Tier II at $222.0 for each type)
(6 x $27.0 + 3 x $20.0 = 222.0 x 7 = $1,554.0)

The Division assumes the employing entities will provide 25% of the $2,715.0 as contributing match as specified in the bill. Therefore, the expected GF need is $2,036.3. The match for the employing entities is $678.7 (GF/Pgm).

Incentive payments are available to professionals for up to 3 years of qualified employment with a lifetime maximum participation of 12 years in the loan repayment and direct incentives aspects of the program by a Tier I or Tier II health care professional. The total number of participants in the program may not exceed 90 participants annually, regardless of whether the participant is a new or continuing participant.

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 78(FIN)

Analysis Continued

Continued from page 2

On the fiscal note, the payments for practitioners will be paid from the services line:

Item	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Practitioner	$ 2,715.0	$ 2,715.0	$2,715.0	$ 2,715.0	$ 2,715.0	$ 2,715.0
Personal	$ 102.8	$ 102.8	$ 102.8	$ 102.8	$ 102.8	$ 102.8
Travel	$ 6.0	$ 6.0	$ 6.0	$ 6.0	$ 6.0	$ 6.0
Commodities	$ 9.6	$ 2.0	$ 2.0	$ 2.0	$ 2.0	$ 2.0
Services	$ 9.5	$ 9.5	$ 9.5	$ 9.5	$ 9.5	$ 9.5
Equipment	$	$	$	$	$	$
Eval Report	$	$	$	$	$	$
Total:	$2,842.9	$2,835.3	$2,835.3	$2,835.3	$2,835.3	$2,835.3

Administrative Costs

1.0 Health Program Manager II. Assumes $9.5 per FTE annually for office space, phones, and other contractual costs; $7.6 one time costs per FTE for computers, software, and office equipment; $2.0 per FTE annually for supplies; $6.0 per year for travel.

Health Program Manager II

This position will serve as lead program manager for the loan repayment and employment incentive program and will establish procedures for the commissioner's designation and prioritization of sites eligible for participation in the program, develop the application process for participation in the program for sites and professionals, develop and disseminate public information and notices pertinent to the program, lead the development of the methodology and procedures for classifying each eligible site as having either regular or very hard-to-fill positions, prepare annual reports that document the successes and challenges of the program, facilitate the creation of and ongoing work of the advisory committee, and establish procedures and manage the employer contribution portion of the program.

FISCAL NOTE #3

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB 78(FIN)

Analysis

This bill, as amended, modifies the Alaska Commission on Postsecondary Education's (ACPE) role relative to the loan repayment program for health care professionals employed in the state. ACPE will validate that the education loans claimed by an applicant for program participation exist and qualify as education loans for the purpose of receiving the loan repayment payment. This is a service that ACPE can provide without any associated costs to the program.

House Bill 78 – Incentives for Certain Medical Providers

Version 27-LS0147\O | CSHB 78(FIN)
Staff Contact: Liz Clement 465-6576

SPONSOR STATEMENT

Alaska communities, both urban and rural, face a serious shortage of health care providers that, if not immediately addressed, will rapidly worsen. In response to this challenge, HB 78 creates the Alaska Health Care Professions Loan Repayment & Incentive Program (HCPLRIP) - a loan repayment and direct monetary incentive program, which will quickly reduce the shortage by filling vacant health care provider positions throughout the state with both new and experienced health care professionals.

Similar programs have proven effective in other states. Alaska's HCPLRIP will support up to 90 participants each year, spread across 10 different essential health care occupation shortage areas[1]. 30 of these slots will be reserved for the most underserved areas of the state, designated by the Commissioner of Health and Social Services as having the greatest need[2]. Benefit will not be limited to rural Alaska, however; there is also room for urban health care providers.

Other health workforce supports exist, but they are not enough[3]. HCPLRIP is an effective and efficient step to fill the gaps in our current heath care service landscape. When implemented, Alaska's HCPLRIP will be one of very few in the United States offering incentives to mid-career professionals who may have already exhausted other loan repayment options, or who no longer carry educational loan debt. This feature will serve as a powerful recruitment tool, bringing with it the benefit of experience only seasoned professionals carry. New graduate or mid-career, HB 78 is designed to bring them here, bring them home - and keep them here for the long term.

It is critical that we promptly address Alaska's healthcare workforce shortage, in order to ensure that all Alaskans have meaningful access to the basic health care they need. HB 78 is not a comprehensive solution, but a proven, manageable, measurable step we can take right now.

Please join me in support of HB 78.

---

[1] Three positions will be reserved for practitioners in each of the following professional groups: dentist, pharmacist, physician, dental hygienist, registered nurse, advanced nurse practitioner, physician assistant, physical therapist, clinical psychologist, and Master's level or higher clinical social worker. Other slots will be filled as needs are identified.

[2] Based upon ongoing needs assessment and employment statistics.

[3] The valuable WWAMI program, which I fully support, is on its own not enough to meet Alaska's complex health care needs. Students who eventually practice in Alaska can only do so once their education is complete. In addition, the program only supplies physicians, while Alaska demands a variety of health care professionals.

CS HB 78 (FIN) – Incentives for Certain Medical Providers

Version 27-LS0147\O
Staff Contact: Liz Clement 465-6576

SECTIONAL SUMMARY

Section 1. Establishes the health care professions loan repayment and incentive program in the Department of Health and Social Services for the purpose of addressing a shortage of certain health care professionals in the state, and for improving the distribution of those professionals. Requires the Commissioner of health and social services to administer the program, to designate and prioritize eligible employment sites, and to monitor the program in consultation with an advisory body established under this section. Provides for maximum combined loan repayment and employment incentives based on the type of employment. Lists professions eligible for participation in the program.

Sections 2 and 3. Allow Advanced Nurse Practitioners to move from Tier II to Tier I classification, contingent upon regulatory action by the Board of Nursing to require a doctorate-level degree for practice in the state. See Section 7 for effective date.

Section 4. Requires the Department of Health and Social Services to prepare and submit a report in 2019 pertaining to the health care professions incentive program established in the bill.

Section 5. Requires the Board of Nursing to notify the revisor of statutes upon adoption of a regulation that requires completion of a degree of Doctor of Nursing Practice in order to practice as an Advanced Nurse Practitioner in the State of Alaska.

Section 6. Repeals all provisions in the bill that establish the health care professions incentive program on June 30, 2019.

Section 7. Activates Sections 2 and 3 of the bill 30 days after the Board of Nursing notifies the revisor of statutes of the adoption of a regulation detailed in Section 5.

Section 8. Except for the content of Section 7, provides for an immediate effective date for the bill.

Alaska Center for Rural Health – Alaska's AHEC
UNIVERSITY of ALASKA ANCHORAGE
August 2007

2007 Alaska Health Workforce Vacancy Study Research Summary

Key Findings: *Alaska is confronted by severe shortages of professional health workers, primarily in high-level primary care occupations that include* ***Family Physician, General Internist, Critical Care Nurse, Nurse Case Manager, Family Nurse Practitioner, Physician Assistant, Pharmacist, Dentist, Physical/Occupational/Speech Therapist,*** *and* ***Behavioral Health*** *occupations. Shortages in* ***RNs*** *and* ***Allied Health*** *are much less acute. Most affected are rural areas and Tribal Health Organizations, though growth-driven high vacancy rates affect the Anchorage-Matsu region as well.*

BACKGROUND

Alaska is confronted by a "perfect storm" of health professional shortages. The state has long suffered from a deficient "supply side" characterized by insufficient numbers of key health workers whose recruitment, retention and training have been impeded by Alaska's remoteness, harsh climate, rural isolation, low population density and scarce training resources. Now exacerbating this already difficult situation is a burgeoning "demand side" for increased health services for a steadily growing and aging population. The health services industry is the fastest growing sector of Alaska's economy, employing over 7% of the state workforce.

METHODOLOGIES

The key questions this study sought to answer were: What health occupations were at this time most critically affected by shortages? Exactly how many budgeted positions existed and how many of these currently remained unfilled? Where were these vacancies regionally and in what types of organizations? What did employers perceive to be the major underlying causes of their vacancies? How many new trainees/graduates could the job market actually absorb annually and how many organizations could absorb them?

Four hundred seventy-six (476) purposively sampled Alaska health service organizations of all types responded to the study survey (Figure 1). Survey data was used to generate estimates of positions and vacancies for the entire state of Alaska.

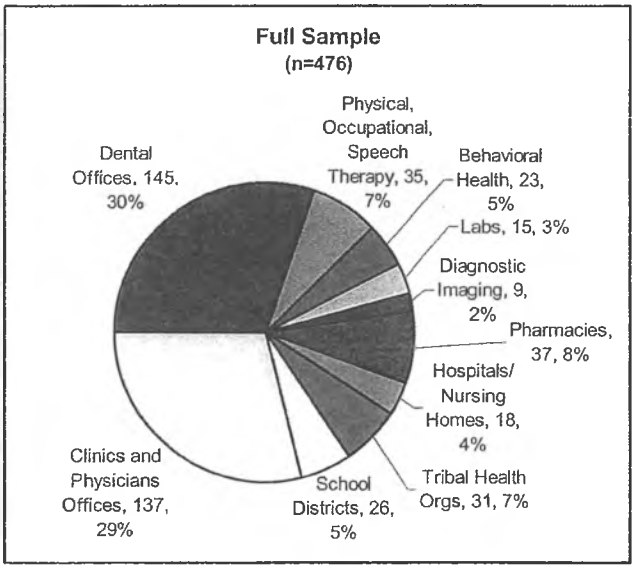

Figure 1

KEY FINDINGS

The findings confirm and quantify the trends cited in recent studies and accumulating anecdotal evidence: despite the recent progress in training and deploying health personnel, such as **Registered Nurses**, critical shortages persist (Tables 1,2).

The situation for key primary care occupations – **Family Physician, General Internist, Nurse Practitioner, and Physician Assistant** – was troubling, particularly in the rural areas, with numerous estimated vacancies and high estimated state vacancy rates between 15% and 20%.

Though vacancies for **Psychiatrists** were not numerous, they were particularly in demand (19.0% estimated vacancy rate) and difficult to recruit (mean vacancy length of 34.5 months).

This study was funded by the Office of Associate VP for Health, University of Alaska Anchorage, through Center for Disease Control and Prevention grant #5-H755-DP024673, and by the Alaska Mental Health Trust Authority.

The national **Pharmacist** shortage has hit Alaska hard and affects every region, with high estimated vacancy numbers (98), and an estimated vacancy rate of 23.7%.

Therapists of all kinds – **Physical, Occupational, Speech, and Speech-Language Pathologists** – were in short supply, with estimated vacancy rates ranging from 15.6% to 29.3%. No part of the state escaped the shortages; vacancy rates were most acute in rural areas, but numerically high in the Anchorage Mat-Su region.

High numbers of vacancies and high vacancy rates were reported for key specialized nursing occupations, particularly for **Nurse Case Manager**, **Family Nurse Practitioner**, and **Critical Care Nurse**. These appeared to be the current areas of most critical shortage in nursing.

The estimated **Registered Nurse** vacancy rate was moderate (8.0%), but this masked 10% rates in hospitals and tribal health organizations, and an estimated rural rate of 16.1%.

While the estimated vacancy rate for **Dentist** was 10.3%, this masked a 15.3% estimated rural rate and a very high 42.0% rate for tribal health organizations, which had 39% of estimated **Dentist** vacancies.

Table 1. Occupational Groups

Health Information/ Reimbursement	1816	106	5.8%	4451	253	**5.7%**

In the **Behavioral Health** occupational group, the most acute shortages – with both extremely high vacancy numbers and high vacancy rates – appeared to be among **Human Services Workers**. In addition, overall estimated **Behavioral Health** occupation vacancies were extremely numerous (1033), around 29% of all estimated vacancies – more than any other occupational group.

Among **Allied Health** occupations, high vacancy rates were affecting employers of **Physical Therapy Assistants** and **Respiratory Therapists**. **Sonographer** vacancies were difficult to fill, and **Surgical Technician** vacancies, though not numerous, were averaging 3 to 4 years in length.

One hundred (100) vacancies and a vacancy rate of 18.1% were reported for **Community Health Aide/Practitioners (CHA/Ps).**

Among "front office" and "back office" occupations, **Coding Specialist** and **Certified Coder** had 11% estimated vacancy rates and very long mean vacancy lengths.

The managerial occupations for which high vacancy rates were reported were healthcare related: **Behavioral Health Supervisor, Clinical Department Manager, Health Information Manager, Medical Director, Nurse Manager, and Practice Manager.** Behavioral health organizations had the most estimated managerial vacancies.

Table 2. Key occupations

Key Occupations (high numbers of vacancies, high vacancy rates)	Study Sample (n=476)			State Estimate		
	Positions	Vacancies	Vacancy Rate	Positions	Vacancies	Vacancy Rate
Family Physician	252	48	18.3%	675	107	**15.8%**
General Internist	71	15	21.1%	200	40	**20.0%**
Psychiatrist	36	10	27.8%	93	18	**19.0%**
Registered Nurse	3109	299	9.6%	5489	439	**8.0%**
Critical Care Nurse	497	43	8.7%	629	60	**9.5%**
Nurse Case Manager	136	42	30.9%	209	49	**23.4%**
Family Nurse Practitioner	155	36	23.2%	364	71	**19.5%**
Physician Assistant	207	32	15.5%	515	98	**19.0%**
Pharmacist	302	73	24.2%	413	98	**23.7%**
Physical Therapist	271	29	10.7%	510	84	**16.5%**
Dentist	319	47	14.7%	692	71	**10.3%**
Human Services Worker	1568	170	10.8%	4800	697	**14.5%**
Behavioral Health Clinician	297	35	11.8%	555	71	**12.8%**
Case Manager/Care Coordinator	505	52	10.3%	1163	164	**14.1%**
Physical Therapy Assistant	35	11	31.4%	62	18	**28.6%**
Medical Assistant	367	38	10.4%	1092	102	**9.3%**
CHA/P	552	100	18.1%	552	100	**18.1%**
Certified Coder	85	6	7.1%	209	22	**10.6%**
Medical Director	49	6	12.2%	120	18	**14.8%**
Behavioral Health Supervisor	82	13	15.9%	176	22	**12.5%**

Looking at respondent types, tribal health organizations reported the highest overall vacancy rate (16.5%). These organizations reported 87 **CHA/P** vacancies; approximately half of all estimated vacancies for **Nurse Case Manager, Pharmacist, Chemical Dependency Counselor, Dentist, Medical Lab Tech, Medical Technologist**, and **Health Educator**; and all the estimated vacancies for **Coding Specialist**. But every respondent type was a locus for acute shortages in key occupations, such as clinics/offices of physicians for **PAs**, hospitals/nursing homes for **RNs**, pharmacies for **Pharmacists**, behavioral health organizations for **Human Services Workers**, and school districts for **Speech-Language Pathologists**.

Higher vacancy rates were generally found in the rural respondents, particularly in the North/West and Southwest regions, which reported double digit vacancy rates for nearly all occupational groups, and overall vacancy rates of around 20% (Table 3, Figure 2). Occupations with much higher rural estimated vacancy rates included **RN** (6.9% urban, 16.1% rural), **Behavioral Health Clinician** (9.3% urban, 22.9% rural), **Dentist** (7.2% urban, 15.3% rural), **Physical Therapist** (13.5 urban, 31.6% rural), and **PA** (14.7% urban, 26.8% rural) (Table 4).

DISCUSSION

The "supply side" shortages apparently persist. "Inadequate Pool of Qualified Workers" was the top reason given for vacancies, cited by 54% of respondents, followed by "Transience/Moving Away" (28%), "Insufficient Compensation" (18%), and "Rural Isolation" (16%). Many tribal health organizations also reported "Insufficient/Expensive Housing" as a top reason for unfilled vacancies. The data also indicated a burgeoning "demand side," where shortages were exacerbated by population growth and an increased need and demand for health services, particularly in the high-growth Anchorage Mat-Su region.

Table 3. Regional vacancy rates

Occupational Group	Regions (Study Sample – n =476)						
	North/ West (n=10)	Southwest (n=17)	Interior (n=72)	Anchorage Mat-Su (n=232)	Gulf Coast (n=69)	Southeast (n=70)	Statewide/ Multiregional (n=6)

Table 4. Urban vs. Rural vacancies and vacancy rates

Occupation	Urban		Rural	
	Estimated Vacancies	Estimated Vacancy Rate	Estimated Vacancies	Estimated Vacancy Rate
Family Physician	68	14.9%	38	17.6%
General Internist	27	18.8%	13	23.1%
RN	339	6.9%	94	16.1%
Family Nurse Practitioner	36	13.3%	34	36.4%
Pharmacist	68	22.7%	30	25.9%
Behavioral Health Clinician	36	9.3%	34	22.9%
Human Services Worker	158	8.5%	209	10.1%
Dentist	32	7.2%	38	15.3%
Dental Hygienist	14	3.6%	17	10.0%
Dental Assistant	27	4.4%	64	14.9%
Physical Therapist	59	13.5%	26	31.6%
PA	50	14.7%	47	26.8%
All Occupations	1998	8.1%	1162	13.3%

Many respondents provided commentary with their surveys and noted positions that are particularly difficult to fill:

- *"We have been hiring travelers for Physical Therapy positions at $67/hr – we can't find therapists to employ. We have been looking for 2 years."* (Urban Medical Clinic).
- *"Without a state Physical Therapy program it is very difficult to get PT staff. Usually this area is staffed by PTs that leave competing PT clinics."* (Urban Physical Therapy Office)
- *We really need a pharmacy school in Alaska. It took two years to fill our last pharmacist position."* (Urban Pharmacy)
- *"Pharmacists are always the most difficult position to fill."* (Rural Pharmacy)

The availability of military spouses has apparently alleviated some of the workforce pressure, but has exacerbated the "transience" problem. Also affecting the shortages was the absence of local training resources (such as medical, dental, pharmacy, and therapy schools) to provide a local workforce pipeline. In the qualitative data, common refrains were, "we need a pharmacy school," "we need a dental school," "we need a physical therapy school."

The acuity of workforce shortages was also reflected by the high percentage of estimated vacancies the responding employers would consider filling with new grads (Table 5). Respondents indicated that they had the capacity to hire sizeable graduating cohorts of Family Physicians, PAs, Occupational and Physical Therapists, Pharmacists, and Dentists. These may be the occupations likely to yield optimal responses to substantial investments in preparation and training programs and/or targeted recruitment and retention campaigns.

How Hard Is It for Alaska's Medicare Patients to Find Family Doctors?

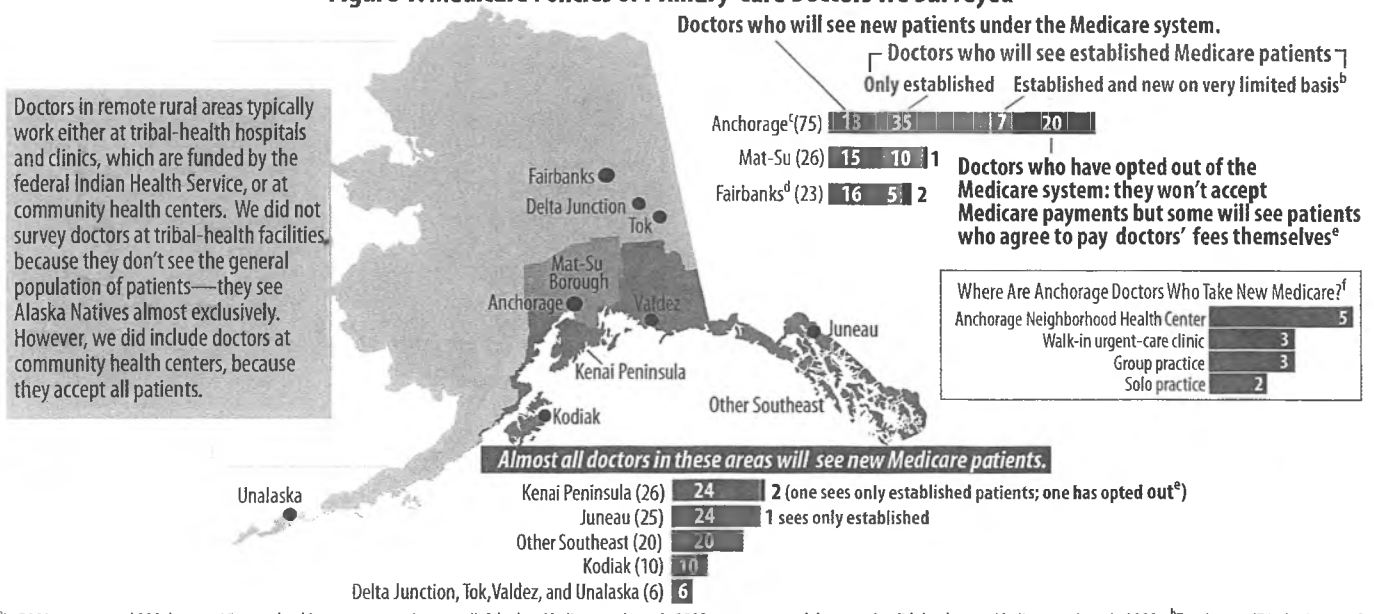
By Rosyland Frazier and Mark Foster

UA Research Summary No. 14 • March 2009
Institute of Social and Economic Research • University of Alaska Anchorage

In the past few years, Alaskans have been hearing reports that some primary-care doctors won't see new Medicare patients. Medicare pays these doctors only about two-thirds of what private insurance pays—and that's after a sizable increase in 2009. But most Americans 65 or older have to use Medicare as their main insurance, even if they also have private insurance. Just how widespread is the problem of Alaska's primary-care doctors turning away Medicare patients? ISER surveyed hundreds of doctors to find out—and learned that so far there's a major problem in Anchorage, a noticeable problem in the Mat-Su Borough and Fairbanks, and almost no problem in other areas.

Medicare is the federal health insurance program for older Americans and for some younger people with disabilities. At issue is what Medicare pays primary-care doctors for their services—not what it pays for other medical costs. Alaska's 50,000 Medicare enrollees are almost all in the "fee for service" plan, which pays doctors standard fees for their services.*

Why is it so worrisome if primary-care doctors won't see Medicare patients? These are the doctors who provide broad care, track patients' overall health, and coordinate care with specialists. That's very important for older people, who often have various medical problems and chronic conditions. And the number of Alaskans over 65 is growing fast—it's expected to double in the next 15 years.



To learn how hard it is for older Alaskans to find primary-care doctors, in 2008 we tried to survey all those who could see the general population of Medicare patients. We were able to interview 229 doctors or their staffs—about 85% of those we tried to reach.

But Medicare payments for Alaska doctors increased in 2009, thanks to efforts of Alaska's U.S. senators. So we recently called back the doctors who had told us they weren't taking new Medicare patients. None of them had opened their doors to significant numbers of new Medicare patients. Four said they now see a very limited number of new Medicare patients, under special circumstances. Two doctors in a joint practice who still didn't see new Medicare patients had hired a nurse practitioner who did.

It's certainly also possible that without the 2009 increase, even more doctors would have decided not to see Medicare patients. Figure 1 shows what our 2008 and 2009 surveys found.

- *It's mainly doctors in Alaska's larger urban areas who are declining to see new Medicare patients.* But that's where the majority of older Alaskans live. Most doctors (even in Anchorage) will still see established patients—that is, patients they've seen in the past.
- *Almost all doctors in smaller communities take new Medicare patients.* Rural places have few doctors—so doctors probably feel more of an obligation to see all patients. For patients (Medicare or otherwise) in rural Alaska, the challenge is more likely to be recruiting and keeping doctors.
- *One in ten doctors we surveyed has opted out of the Medicare system.* Most are in Anchorage. They will not accept Medicare payments, but some will see patients who agree to pay the entire doctor's bill themselves.
- *The Anchorage Neighborhood Health Center,* which accepts all patients, saw twice as many Medicare patients in 2007 as in 2001. It has become the only choice for many of Anchorage's Medicare patients.
- *Medicare patients are not relying more on emergency rooms,* if figures for Providence Hospital's emergency room in Anchorage are typical. Numbers of Medicare patients there haven't changed much in the past several years.

Figure 1. Medicare Policies of Primary-Care Doctors We Surveyed[a]

[a]In 2008 we surveyed 229 doctors; 15 weren't taking any new patients at all; 3 had no Medicare patients. In 2009 we re-surveyed doctors who didn't take new Medicare patients in 2008. [b]Ten doctors (7 in Anchorage, 2 in Fairbanks, 1 in Mat-Su) accept a few new Medicare patients under special circumstances, but don't typically see new Medicare patients. [c]Includes Eagle River/Chugiak. [d]Includes North Pole. [e]See Figure 9. [f]See page 3.

*Nationwide, 21% of beneficiaries have enrolled in Medicare Advantage programs—which means they become members of private health plans, and Medicare then pays the plans a set monthly amount for each Medicare enrollee.

Survey of Primary-Care Doctors

We surveyed only primary-care doctors. So far there hasn't been any sign that specialists are declining to see Alaska's Medicare patients—not surprising, since Medicare tends to pay them closer to private-insurance rates.

We first had to determine how many doctors fit our survey criteria: those who currently practice general, family, or internal medicine at least 20 hours a week and who could see the average Medicare patient, if they chose to.

About 700 primary-care doctors are licensed in Alaska, but most aren't available to see the general population of Medicare patients. Hundreds work for government agencies, are in public health, or see only specific groups (Figure 2).

Among those who didn't fit our criteria are doctors working for tribal-health facilities that provide Indian Health Service programs for Alaska Natives. These doctors do see Alaska Native Medicare patients.

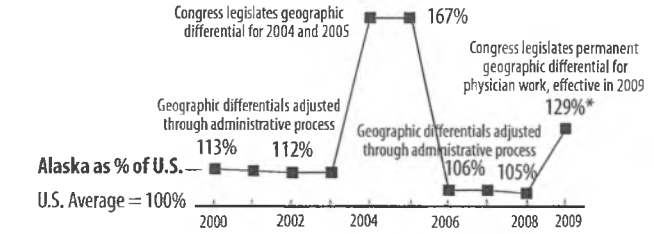
We estimated that 264 doctors were left, after we took out those who didn't fit our criteria. In 2008 we tried to reach all 264. We were able to talk with about 85%—229 doctors or their staffs. We asked them to tell us their policies for seeing Medicare patients and to rank reasons why they might be limiting or turning them away. The top reason they cited was "inadequate reimbursement"—that is, Medicare payments aren't enough to cover the costs of seeing patients.

We also followed up, in 2009, with doctors who had told us in 2008 that they weren't taking new Medicare patients. We reached all but two.

Figure 2. How Many Primary-Care Doctors Are Available to See Medicare Patients?
(Among Alaska Doctors Practicing General, Family, or Internal Medicine at Least 20 Hours per Week)

[a]We excluded pediatricians and obstetrician-gynecologists, who are often included in definitions of primary-care doctors, because they don't routinely see older patients. [b]About 42 doctors were not at the addresses and phone numbers in the medical directory. We tried but weren't able to find them, and we assume they have left the state or are not practicing [c]We excluded doctors working for tribal-health organizations, the military, the Veterans' Administration, and Planned Parenthood, because they don't see the general population of Medicare patients. Doctors who work for tribal-health facilities do see Alaska Native Medicare patients. [d]We interviewed either doctors or members of their staffs.

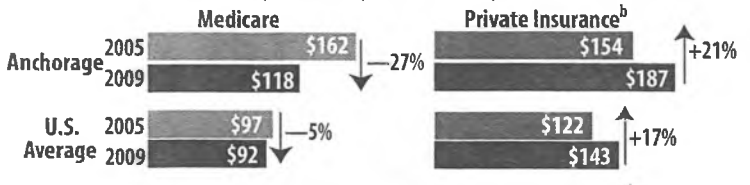
Medicare Versus Private Insurance



The federal Center for Medicare and Medicaid Services (CMS) calculates Medicare payments for doctors under a complex formula that takes into account geographic differences in costs around the country. Alaska's doctors have historically been paid more than the U.S. average for seeing Medicare patients.

The CMS formula actually includes three geographic differentials: one for "physician work" itself, one for doctors' costs of operating practices, and one for doctors' costs of carrying liability insurance.

In 2008, Congress set the Alaska geographic differential for "physician work" at 50% above the U.S. average, effective in 2009. Alaska's U.S. senators Lisa Murkowski and Ted Stevens were instrumental in gaining that increase for Alaska doctors. But combined with the other differentials—set by CMS—the overall Medicare geographic differential for Alaska doctors in 2009 is 29% above the U.S. average. Figure 3 shows the differential since 2000.



- *From 2000 to 2003, the geographic differential for Alaska doctors was about 12% above the U.S. average.* That differential was set entirely under CMS's administrative process.
- *In 2004 and 2005, the differential for Alaska doctors jumped to 67% above the U.S. average.* Ted Stevens, at that time Alaska's senior U.S. senator, spearheaded the legislation that led to the substantial but temporary increase. In those two years, Medicare paid Alaska doctors as much as private health insurance (Figure 4).
- *After that legislation expired, the Medicare differential dropped sharply,* to about 5% above the U.S. average from 2006 to 2008.
- *In 2009, the cost differential for Alaska doctors climbed to 29% above the U.S. average,* due to new federal legislation—as we just discussed. But Medicare still pays doctors less now than it did in 2005 (Figure 4).
- *Medicare pays about two-thirds of what private insurance pays, in Alaska and on average nationwide.* (But in the adjacent markets of Washington state, Medicare pays 68% to 75% of what private insurance pays.)
- *That nationwide gap helps explain why more Medicare patients are having trouble finding doctors.* Recent national surveys sponsored by the Medicare Payment Advisory Commission found that 17% of Medicare patients in the U.S. had "a big problem" finding family doctors in 2007, up from 13% in 2005. Alaska may be the harbinger of a national trend.

Figure 3. Medicare Geographic Cost Differential* for Alaska Doctors

*This is a weighted average of three geographic cost differentials the Center for Medicare and Medicaid Services uses in a complex formula that determines what doctors are paid. One of those is the differential for "physician work," and Congress set that at 150% of the U.S. average for Alaska doctors, effective in 2009. But the other differentials--for physicians' costs of operating their practices and for carrying liability insurance—are set by CMS and can vary from year to year.

(New Patient, 30-Minute Visit)

[a]Figures include the amount Medicare or private insurance pays and the amount the patient pays. [b]Median payments
Source: Ingenix National Fee Analyzer

Where Are the Medicare Patients?

• *Nearly 70% of non-Natives over 65 live in Anchorage, the Mat-Su Borough, and the Fairbanks area.* Figure 5 shows only where older non-Natives live, because older Alaska Native patients have access to doctors through tribal-health care facilities. For them, the issue is not that doctors won't see them but that there may not be enough doctors, especially in rural areas.

Who Accepts Medicare Patients?

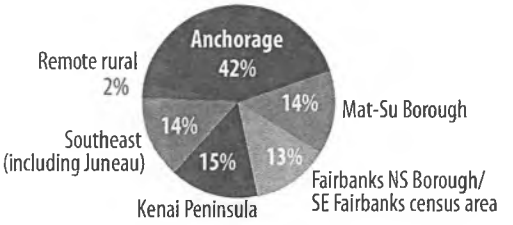
Besides the doctors who will see new or established patients, some doctors have made another choice: they've opted out of the Medicare system. They don't accept any Medicare payments (see Figure 9), but some will see Medicare patients who agree to pay the doctor's fee themselves. Patients who can do that have more choices. But for those who need Medicare to help pay the bill, the access problem is the worst in Anchorage.

• *We found only 13 primary-care doctors seeing the general population of new Medicare patients in Anchorage.* Of those, 3 were at walk-in, urgent-care clinics, which mostly just treat minor injuries and illnesses (Figure 1).

• *Five of the 13 Anchorage doctors seeing new Medicare patients in 2008 were at the Anchorage Neighborhood Health Center.* That's one of dozens of federally funded community health centers in Alaska. There are hundreds more across the U.S. These centers are open to everyone, but they are mainly for medically "under-served" groups of people—poor and uninsured, for instance—or areas of the country without adequate local medical care, like many of Alaska's rural communities.

• *The Anchorage Neighborhood Health Center is the main choice for growing numbers of Medicare patients.* Both the number of Medicare patients coming to the clinic and the percentage they make up of all patients doubled between 2001 and 2007 (Figure 6). That growth did flatten out in 2004 and 2005, when Medicare paid doctors at a level comparable to private insurance. But after that, the numbers climbed. (In Fairbanks, the community health center saw a similar percentage increase. In the Mat-Su Borough, a health center just opened in 2005, so data are limited.)

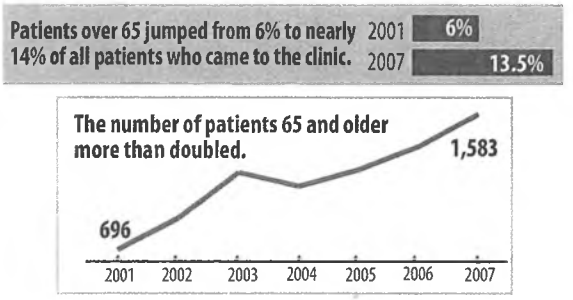
• *Until recently there was another choice for Anchorage's Medicare patients—the Alaska Family Medicine Residency Program*, where some family doctors get their final phase of training. These resident doctors see patients, and they had been accepting growing numbers of Medicare patients. But to make sure the residents see a variety of patients, the program has now capped the number of Medicare patients it accepts.



• *Anchorage's Medicare patients don't seem to be turning more to emergency rooms.* Data from Providence Hospital's emergency room show that visits by older patients have stayed mostly steady, with seasonal variations, since 2004 (Figure 7). But some health-care providers think that Medicare patients may be postponing care they need and coming in only when medical problems get much worse.

Medicare Payments to Doctors and to Health Centers

• *Medicare pays doctors and community health centers differently.* Some people believe that Medicare uniformly pays health centers more than it pays private doctors, making it more feasible for health centers to see Medicare patients. But the reality is more complex.



• *Medicare pays health centers the same fee for seeing Medicare patients for any visit, but private doctors more for longer, more complex visits.* Figure 8 compares payments for 30- and 60-minute visits with new patients, at doctors' offices and the Anchorage Neighborhood Health Center (ANHC). For a 30-minute visit, Medicare pays ANHC $119 and doctors about $95. But for a 60-minute visit, it still pays ANHC $119, but the doctors $189.

Figure 8. Medicare and Patient Payments to Private Doctors and Anchorage Neighborhood Health Center, 2009

[a]Patient co-pay; 20% of total payment. [b]Facility fee charged to patient, but many are not able to pay full charge. Patients with incomes up to 200% of federal poverty line pay on a sliding fee scale.

Sources: Anchorage Neighborhood Health Center; Ingenix National Fee Analyzer

• *What Medicare patients pay at health centers and at doctors' offices is also determined in different ways.* Essentially, Medicare allows the health centers to take their own fees into account when determining what patients are charged. But Medicare doesn't allow doctors to use their own fees; instead, Medicare sets a maximum allowable charge for specific kinds of visits, and patients pay a portion of that (see Figure 9).

• *Neither ANHC nor the doctors' offices necessarily collect the amounts shown in Figure 8 as payments from patients.* At ANHC, patients with incomes up to 200% of the federal poverty line are charged on a sliding fee scale. Likewise, private doctors may not always be able to collect the patient's share. And both private doctors and ANHC report losing money when they see Medicare patients.

Doctors and the System

Primary-care doctors who see Medicare patients have three choices for getting paid. Figure 9 describes those choices among doctors we surveyed.

About 85% choose the standard Medicare process ("participating"). Another 4% still work with the Medicare system but charge patients somewhat more ("non-participating"). The final 11% have opted out of the Medicare system , but will still see patients who agree to foot the bill.

Patients also pay different amounts, depending on their doctors' policies. For a service with an allowable Medicare fee of $100, patients seeing doctors who accept that fee would pay $20—but only after Medicare paid the other $80. Patients seeing "non-participating" doctors would pay the doctors $109.25; Medicare would later reimburse the patients $76, so their final cost would be $33.25. Patients seeing doctors who have opted out of the Medicare system would pay a fee determined by the doctor—perhaps a negotiated fee, but still typically more than Medicare pays.

Figure 9. How Do Alaska Primary-Care Doctors Who See Medicare Patients Deal with the System?
(Among 211 Surveyed Who See New or Established Patients)

Most doctors accept standard Medicare fees and bill Medicare. They are called "participating." Medicare sets maximum allowable charges for various services. Participating doctors agree not to charge more than the allowable rate, and Medicare pays them 80% of that. The patients (and their secondary insurance, if they have any) pay the other 20%.

A few doctors (called non-participating) can charge up to 9% more than the allowable Medicare charge. But Medicare pays less and patients pay more. Here's how it works. The patient pays the entire bill, but the doctor submits a statement to Medicare so the patient is paid for the Medicare share. But instead of paying 80% of the charge, Medicare pays only 76%. The patients (and their secondary insurance, if they have any) pay the rest of the bill.

Some doctors don't accept Medicare payments for their fees. They are said to have "opted out." They will still see Medicare patients, but patients must agree to pay a fee the doctor sets. Medicare doesn't pay either doctors or patients, and patients can't bill any secondary health insurance they may have. Remember that patients pay only the fee for the doctor. They still use Medicare to help pay hospital and other medical costs. Doctors who opt out have to re-confirm their decision with Medicare every two years. They can also apply to come back into the system after two years.

Example: How Much Would Patients Pay for a Service with an Allowable Medicare Charge of $100?

	Participating Doctors Charge $100	Non-Participating Doctors Can Charge $109.25	Doctors Who Have Opted Out Can Set Their Own Fees
Medicare pays	$80	$76	$0
Patient pays	$20[a]	$33.25[a]	Entire doctor's fee[b]

[a]Patients can bill secondary insurance to help pay their share. [b]Patients can't bill secondary insurance to pay any amount.

Sources: American Academy of Family Physicians; Government Accountability Office

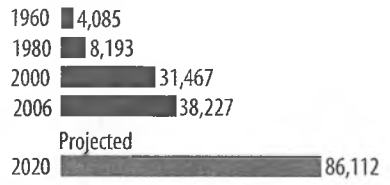
Conclusion

With few exceptions, Americans 65 or older who are retired have to use Medicare as their primary insurance—even if they also carry private health insurance or have retirement benefits that include health-care coverage. Any other insurance they have can *only* be used to help pay *their share of the allowable Medicare charge*. They can't use private insurance to pay doctors more than Medicare allows.

As more Alaskans turn 65, the access problem will get worse, unless something changes. Growing numbers of Medicare patients around the country are also reporting access problems. And the American College of Physicians has reported that a nationwide shortage of primary-care doctors is looming—which would make the problem even worse.

This summary talks about just a very narrow slice of the multitude of issues facing Medicare. It's one of the largest and fastest-growing federal programs, and President Obama has said reforming it will be part of his plan to improve the U.S. health-care system. How potential reforms might affect Medicare patients' access to family doctors isn't clear today.

Because Medicare is a federal program, the state's options for helping improve access are limited. But Alaskans are talking about various possibilities—like recruiting more doctors and offering them bonuses to see Medicare patients, and either establishing an Anchorage clinic for Medicare patients or expanding the Anchorage Neighborhood Health Center.



In a publication later this year, we'll look at the implications of various ways of trying to improve access for Medicare patients. We'll also report what family doctors themselves told us—how they make decisions about seeing Medicare patients and what might make them willing to see more.

Health Care Professions Loan Repayment Program

Summary

Problem

Alaska is competing with other states and nations for the finite pool of available healthcare professionals. This competition will only intensify since the growth of supply is continuing to fall behind that of demand.

A common state-level response to these pressures is the use of financial inducements, collectively known as support-for-service programs (SFSP's). Good outcomes have been achieved with these. There are five types: scholarships, service-option loans, loan repayment, direct financial incentives, and residency support programs. All SFSP's have the same public goal: To improve healthcare staffing in shortage areas. National studies have determined loan repayment programs to be one of the most effective of the several support-for-service strategies - in terms of both recruitment and retention (see: *HCPLRP: Issue Paper*, 2007)

A key problem is that Alaska does not have a robust support-for-service program while most other states do, many have several, and further, some of those are growing. In sum, Alaska is at a substantive disadvantage as it necessarily competes in the national healthcare labor market.

Discussion

Alaskan health care provider agencies use many approaches to recruit and retain staff. This has proved difficult, however, and particularly so where (1) federal loan repayment programs do not apply, or, (2) there is insufficient resource available to meet need. More tools are needed to confront the problem of steadily growing vacancies in the Alaskan healthcare workforce.

Most all other states have state-sponsored programs that influence health professionals' geographic and specialty distributions. Programs that integrate a number of strategies for attracting and retaining health professionals have had a greater likelihood of success than have programs which rely on a single strategy. Substantial evidence indicates that state-level support-for-service programs typically are a fundamental part of those strategies.

Support-for-Service Programs

It is well-established that many healthcare professionals carry a heavy debt-burden as they come out of training and are attracted to serving in those locations where a share of that burden can be taken away. For instance, in 2004, young physicians' educational debt averages stood at over $109,000 and this cost was increasing at the rate of more than $4,000 per annum.

There are several types of support-for-service programs. One of the two most common types of such programs is the service-requiring scholarship program. These pay tuition and other costs for healthcare students while obligating them to a period of service that begins when they complete residency (or similar post-graduate training) years later. The other common program type is loan repayment. Loan repayment programs recruit healthcare practitioners as they complete their training and are ready to begin service in exchange for paying off the traditional education loans

they acquired years earlier. Programs of both types typically require one year of service for each year of training cost support they provide.

Considerable precedent exists for state-level offices to sponsor and manage financial support and inducement programs to thus encourage the within-state service of healthcare personnel. Overall, 81 state-level programs were identified. There were 44 states with at least one program (88% of states). Fully 21 states had two or more programs (47%), with highs found in New Mexico (at 5) and Minnesota (at 7). On average, the 44 states had nearly two programs (1.8) each.

Loan Repayment Programs

In national studies, loan repayment has been found to be a successful strategy to recruit and retain health care professionals. Twenty-five years of program evaluations have clarified many of the outcomes possible from healthcare training support-for-service programs. Furthermore, studies have demonstrated that loan repayment programs, as a whole, have better outcomes than scholarship programs. Studies have shown that there are several benefits which can accrue from loan repayment programs. Selected examples include: (a) high position-fill rates, (b) high service-completion rates, and (c) high retention rates.

These programs are successful because the benefit of loan repayment is clear to potential applicants, and programs typically only provide payments to participants after they complete each 3 or 6 months of work; therefore, if a participant leaves or otherwise fails to work in the agreed upon area or practice, payments simply stop and there is no need to enforce penalties.

In 2006, the Alaska Physician Supply Task Force recommended a number of specific strategies and action steps to assuring an adequate supply of physicians to meet Alaska's need. One of the PSTF findings was that loan repayment is a proven strategy for recruiting physicians, and the federal loan repayment programs currently available to Alaska physicians need to be stabilized financially and supplemented with Alaska-based programs.

Conclusion

Reported increasing vacancy rates, increasing costs of recruitment [SORRAS report], and comparisons with national norms [PSTF report] suggest that Alaska currently experiences a shortage of healthcare professionals, and, that shortages exist in several key occupational categories. Loan repayment programs have demonstrated substantial and longstanding success as a public strategy which has helped to rectify such shortages.

Recommendation

It is recommended that Alaska create a "Health Care Professions Loan Repayment Program".

To do this, a planning process should be established. This process should define and prepare for adoption at least the following program elements: (a.) organizational support, (b.) oversight, (c.) fiduciary agent, (d.) practitioner eligibility, (e.) site eligibility, (f) repayment details, (g.) program design & management, and (g) program evaluation.

Health Care Professions Loan Repayment Program
Issue Paper

Abstract

This paper: (1.) illustrates the current and expected healthcare workforce needs of Alaska; (2.) indicates the widespread use elsewhere of support-for-service programs, and in particular loan repayment; and (3.) recommends that Alaskans should now explore creation of a Health Care Professions Loan Repayment Program (HCPLRP).

Main Issue

Alaska is increasingly vulnerable to the competitive challenges posed by other states and nations for the finite pool of available healthcare graduates. This vulnerability will increase during coming years because of two factors. (1.) The need for health care professionals in Alaska is steadily rising, and, shortages are now evident in some categories. (2.) Further, these trends are national. These workers are part of, and often respond to, nationwide labor markets. Further, these trends are expected to accelerate. This is particularly true in those states that do not produce adequate numbers of their own health workers in the given disciplines. This puts such states at a marked disadvantage. Financial incentive programs are particularly important for those states, and Alaska is one of these. As a result, several other states have become robust competitors in recruitment of the healthcare workforce, and some are planning new and expanded loan repayment programs (Pathman, 2007).

A fundamental, and common, state-level response to these pressures is the use of financial inducements, these collectively known as support-for-service programs (SFSP's). Excellent outcomes are readily achievable from these efforts. There are five types: scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs. All support-for-service programs have the same key public goal: To improve healthcare staffing in shortage area communities.

National studies have determined loan repayment programs to be one of the most effective of the several support-for-service strategies - in terms of both recruitment and retention. As compared to the other SFSP options, here loan repayment participants sign support-for-service contracts after they complete their training, when they are older and better informed as to their career options. These professionals make commitments at the time they are ready to begin their service-obligations. They are more likely to know their own needs and those of their families at this later juncture. They know where they will serve and have a sense as to how well their chosen worksites will "fit" their needs.

Problem

This section presents evidence which indicates that:

- A healthcare workforce shortage currently exists in several occupations.
- Under current conditions these shortages will continue into the foreseeable future.
- In several occupations, these shortages will escalate.

Trends in National Workforce

Numerous, prominent sources indicate that there is a growing national shortage in the rural health care workforce. Two examples follow.

GAO Position (2001): In 2001, the General Accounting Office's (GAO's) director of health care-public health issues testified before Congress regarding growing concerns about the adequacy of the health care work force and lessons learned from the experience of the National Health Service Corps (NHSC) in addressing the maldistribution of health care professionals (Heinrich, 2001). Selected key points were:

- Recruitment and retention of adequate numbers of qualified health care workers are major concerns for many health care providers today.
- Available evidence suggests emerging shortages in some fields (e.g. nurses).
- Vacancy rates for HC workers in rural areas and inner cities are especially high.
- Although demand for most health workers will continue to grow, the increasing age of Americans, and their workforce may limit supply.
- The National Health Services Corp (NHSC) illustrates the challenges in addressing shortages of health professionals in certain locations.
- Better placement coordination with waivers for J-1 visa physicians is needed.
- Loan repayment is a better approach than service-requiring scholarships, to which individuals commit when they are still students.

NOSORH Position (2006): A representative and recent understanding can be gained from the National Organization of State Offices of Rural Health (NOSORH). In September 2006 NOSORH issued a Statement of National Priorities. Presented below are selected summaries of that document, without further comment. Interested readers should see: http://www.nosorh.org/pdf/Rural_Impact_Study_States_IT.pdf

- While most rural communities in the U.S. already experience health care workforce shortages, the demand for health care workers nationwide is projected to grow faster than the supply. This shortage of health care workers can impact health care in a variety of ways, including: decreasing quality of care, decreasing access to care, increasing stress in the workplace, increasing medical errors, increasing workforce turnover/decreasing retention rates, and increasing health care costs.

- Most rural areas ... are classified by the federal government as Health Professional Shortage Areas (HPSAs) for primary medical care. A HPSA designation is made using a formula that includes a ratio of physician to population that is greater than 1:3,500. A population is considered "adequately served" when the ratio is 1:2,000. In 1997, more than 2,200 additional physicians would have been needed in non-metropolitan areas to eliminate HPSA designations. SORH directors consider the workforce shortage to be one of the greatest issues facing rural health, in particular shortages related to physicians and nurses.

- Certain national health workforce trends that will have a profound impact on rural populations and exacerbate the current rural health workforce shortages. Examples follow:

    - If health care consumption patterns and physician productivity remain constant over time, the aging population will increase the demand for physicians per thousand population from 2.8 in 2000 to 3.1 in 2020. Demand for fulltime-equivalent RNs per thousand population would increase from 7 to 7.5 during this same period.

    - Minority and female physicians have a greater propensity than do non-minority and male physicians to practice in urban communities. Meanwhile the percentage of physicians that are minorities and women is increasing.

    - The Bureau of Health Professions projects that there will be a 33-44% increase in demand for physicians, 41 percent for RNs, and 46 percent for LPNs from 2000 to 2020.

    - According to the Bureau of Health Professions, there is an acute shortage of pharmacists in the U.S. In February 1998, there were 2,670 unfilled full and part-time positions in the U.S. as compared to 6,920 in February 2000. Adding to this, enrollment rates in U.S. schools of pharmacy declined during this period.

    - In 1970, women accounted for 13 percent of the nation's pharmacists as compared to 2000 when they were 46 percent of the nation's pharmacists. Women tend to elect part-time work as pharmacists.

    - From 1990 to 1999, there was a 46 percent increase in the number of prescriptions dispensed from hospitals.

- *NOSORH concluded the following in its 2006 statement of national priorities:* ...SORH directors around the U.S. determined that they are most concerned with issues related to rural health workforce, health care services, and the needs of special populations. Research suggests that this concern is warranted as: demand for health care workers is increasing while the supply is decreasing; rural health care facilities continue to be fragile, there are gaps in these services, and all of these rural health services are critical to the health and well-being of the U.S.; and the needs of rural populations are changing, however, the programs serving them are unable to meet their needs. While SORHs respond to a variety of rural health needs and issues, new health care policies and additional rural health programs and funding will be needed if states are to address these increasingly important rural health issues and concerns.

Growth in Alaskan Jobs

Healthcare Workforce Overall: In 2004 there were 301,300 jobs in Alaska, with 32,700 (10.9 percent) of these in health care and social assistance (HCSA). By 2014, the overall job count is projected to be 349,550, with the HCSA workforce at 43,650 (12.5 percent). Thus by 2014, the number of HCSA jobs is projected to grow by 10,950 (34 percent), accounting for 22.7 percent of overall statewide job growth for the period. By 2014, health care and social assistance is projected to be the largest single industry workforce category in Alaska with 43,650 workers. (AHCDB, 2007, Table 3.300).

Social Service Occupations: For 2004, employment in community & social service (CSS) occupations was estimated to be 6,025 jobs. By 2014, this category of jobs is forecasted to be at 7,487, a rise of 1,462 (24 percent). The highest projected growth rates from 2000-2014 are projected to include mental health & substance abuse social workers (36.2 percent), social & human service assistants (34.6 percent) and mental health counselors (32 percent). (AHCDB, 2007, Table 3.310).

Selected Occupations: Review of 42 particular healthcare occupations indicates that these held 14,083 jobs in 2000, and that these are forecasted to reach 25,009 by 2010, an overall rise of 10,026 jobs (78 percent). Registered nursing positions are expected to grow the most, from 4,439 in 2000 to 8,556 in 2010, a gain of 4,117 jobs or (93 percent). All but one of the examined occupations is expected to have more jobs available by 2010. Further, of the 42 occupations presented, employment in 8 of these will more than double (e.g. AHCDB, 2007, Table 3.330).

Shortage in Alaskan Workforce

Health Professional Shortage Areas: Alaska has a large number of federally designated "Health Professional Shortage Areas" (HPSAs), the point of these designations being to aid in health care planning and finance. Typically these are determined by the existence of: (1.) a relative lack of desired personnel, and (2.) the existence of particular socio-economic conditions. A second route to HPSA designation, which is automatic, is via the existence of a federally funded community health center (CHC). HPSAs are of three types. Statewide in 2007 the following HPSAs existed: 28 in Primary Care (with 16 scored, and 12 via CHCs), 27 in Mental Health (with 14 scored, and 13 via CHCs), and 24 in Dental Health (with 7 scored, & 17 via CHCs). (Alaska Health Care Databook, 2007, Table 3.360). However, an important caveat is that many observers feel that the federal HPSA designation process underestimates the extant need for more healthcare professionals (e.g. US GAO, 1995). Thus, these designations should be considered as a conservative method for establishing need for the healthcare workforce.

Medically Underserved Areas: Alaska also has numerous federally designated "Medically Underserved Areas" (MUA) and "Medically Underserved Populations" (MUP). These designations identify shortages of primary medical care, dental health or mental health providers. Designations may be either geographic (MUA, i.e. a county or service area), or demographic (MUP, i.e. low income, Medicaid-eligible populations, cultural and/or linguistic access barriers to primary medical care services). Each designation is assigned an Index of Medical Underservice (IMU) score, which is used to determine the eligibility of an area or population for MUA/MUP status. For 2007, there were 17 area designations and 11 population designations. (Alaska Health Care Databook, 2007, Table 3.350).

Resident Workers with Age: Two aspects of worker demographics further suggest the likelihood of a workforce shortage in the health care and social assistance (HCSA). The first of these regards "resident workers with age". In 2005 total employment in all HCSA occupations stood at 28,356. Of resident workers in all HCSA occupations statewide, 40 percent were age 45 and older; 27 percent were age 50 and older. Of resident workers who were in health care practitioner occupations per se, 47 percent were age 45 and older; and 31 percent were age 50 and older. Therefore, succession planning will be of concern over the next two decades as today's mature health care professionals retire (Alaska Health Care Databook, 2007, Table 3.320).

Non-Resident Workers: A second workforce demographic issue regards the sizeable number of "non-resident" workers. Overall, 10 percent of the workforce was non-residents in 2005, with a

high of (13 percent) among non-resident health care practitioner and technologist occupations. Expect additional pressure to build on the health care system if non-resident (itinerate) workers are not available to fill Alaska health care workforce gaps (e.g. AHCDB, 2007, Table 3.320).

Selected Occupations: Physicians

Physician Shortage – 1997: A decade ago Johnson and Norris (1997) conducted a comprehensive study to describe Alaska's geographic distribution of generalist physicians relative to population. These investigators queried all 443 generalist care physicians (family, general, general internal medicine, and pediatric) or their offices as to their specialties, employers, populations served, hours spent per week offering direct patient care, and locations. The results indicated a 30% overall shortage of generalist physicians for the state, representing roughly 141 full-time-equivalent generalists relative to national practice patterns and trends of health maintenance organizations. Of 17 primary health care areas, including the Anchorage area, 15 showed a need for additional generalist physicians. Most areas had a 20 to 40% shortage.

Physician Shortage – 2004: In 2004, a survey by the American Medical Association showed that, nationally, there were 2.38 practicing physicians per 1,000 people. Alaska's rate of practicing physicians was 2.05 per 1,000 people. Based on Alaska's 2004 population estimate of 656,834 and the national average of 2.38 physicians per 1,000 people, Alaska should have had 1,565 practicing physicians to be on par with national averages. The actual number of physicians practicing in Alaska was 1,347, indicating a shortage of 14 percent or 218 physicians. In areas outside of Anchorage, the rate of physician deficiency was 16 percent. (Alaska Health Care Databook, 2007, Table 3.370).

Physician Shortage – 2006: In 2006, the AK DHSS and the University of Alaska jointly assembled the "Alaska Physician Supply Task Force" (PSTF). This group then conducted a large inter-agency study, issuing the authoritative report, "*Securing an Adequate Number of Physicians for Alaska's Needs*". It found that Alaska had a shortage of physicians. Although not at crisis levels, the shortage was affecting access to care throughout the state, and, increasing cost to hospitals and other health care organizations. Up to 16% of rural physician positions in Alaska were vacant in 2004. Patients with Medicare were having difficulty finding a primary care physician. Several important specialties were in serious shortage in Alaska. It concluded that:

- The shortage is very likely to worsen over the next 20 years as the state's population increases and ages. Physician supply nationwide is entering a period of shortage, according to the best current predictions. Physicians in Alaska are aging and one-third may be retiring in the next 10-15 years. The new generation of physicians wants a more balanced life, meaning fewer hours on duty and more predictable schedules. These trends mean that more physicians will be required to serve the same population. Technology and scientific advances have increased the amount of medical care available, also adding to the need for physicians, as the patients expect more care than previously.

- As the supply of physicians shrinks, recruitment will become more competitive. Alaska's traditional system of recruiting physicians from federal assignment in the military and Indian Health Service is much less effective with changes in these systems. Alaska is far behind the other states in production capacity. (1-2) Long-range planning, even if it includes a four-year medical school in Alaska, will not address current physician needs in a timely fashion, so interim measures are needed. (59)

Selected Occupations: Nurses

Nursing Shortage – 2003: The nursing shortage is particularly acute, both in Alaska and nationwide. It is estimated that during this decade the need for RN's will increase by 4,117 (in 2000: 4,439; in 2010: 8,556) (Fried, N. & Keith, B. (2003). National shortages will make recruitment yet more difficult. As a result, Alaska will have a great need to recruit and retain registered nurses. Addressing the need of rural and remote areas will be yet more difficult and expensive than to do so for urban areas.

Impact on CHC's

Rosenblatt, et al. (2006) examined the status of provider workforce shortages such as these may limit CHC expansion. They noted that the federal government has continued to expand the capacity of community health centers (CHCs) to provide care to underserved populations. The researchers therefore conducted a survey of all 846 federally funded US CHCs that directly provide clinical services and are within the 50 states and the District of Columbia (May-Sept, 2004). Questionnaires were completed by the chief executive officer of each grantee. Overall response rate was 79.3%. Information was supplemented by data from the 2003 Bureau of Primary Health Care Uniform Data System and weighted to be nationally representative.

Rosenblatt, et al (2006) found that primary care physicians made up 89.4% of physicians working in the CHCs, the majority of whom are family physicians. In rural CHCs, 46% of the direct clinical providers of care were non-physician clinicians compared with 38.9% in urban CHCs. There were 428 vacant funded full-time equivalents (FTEs) for family physicians and 376 vacant FTEs for registered nurses. There were vacancies for 13.3% of family physician positions, 20.8% of obstetrician/gynecologist positions, and 22.6% of psychiatrist positions. Rural CHCs had a higher proportion of vacancies and longer-term vacancies and reported greater difficulty filling positions compared with urban CHCs. Physician recruitment in CHCs was heavily dependent on National Health Service Corps scholarships, loan repayment programs, and international medical graduates with J-1 visa waivers. The study concluded that CHCs face substantial challenges in recruitment of clinical staff, particularly in rural areas. The largest numbers of unfilled positions were for family physicians at a time of declining interest in family medicine among graduating US medical students. They stated that success of the current US national policy to expand CHCs may be challenged by these workforce issues.

Strategy

It is essential to enhance the capacity of Alaskan health care provider agencies to recruit and retain staff where: (1.) federal loan repayment programs either do not apply, or, (2.) there are insufficient resources available to meet need. More tools are needed to confront the problem of steadily growing vacancies in the Alaskan healthcare workforce.

Most other states have programs that influence health professionals' geographic and specialty distributions. Programs that integrate a number of strategies for attracting and retaining health professionals have a greater likelihood of success than do programs which rely on a single strategy. Substantial evidence indicates that state-level support-for-service programs should be, and typically are, a fundamental part of those strategies.

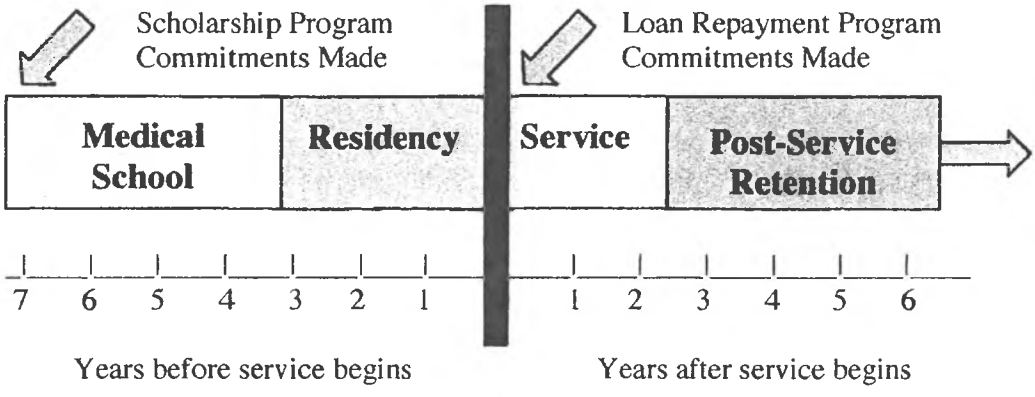
Debt from Health Care Training

What follows are brief summaries of recent, representative studies which suggest that:

- Health care student debt affects subsequent practitioner career choices;
- Loan repayment options support recruitment goals; and
- These programs directly help to correct practitioner maldistributions.

Factors in Recruitment & Retention: Daniels, et al. (2007) sought to identify factors associated with rural recruitment and retention of graduates from a variety of health professional programs in the southwestern United States. They conducted a longitudinal study by mailing a survey to graduates from 12 health professional programs in New Mexico. The main outcomes examined were: (1.) first rural employment, and, (2.) aspects of any rural employment, since graduation. Daniels, et al. (2007) concluded that rural background and preference for smaller sized communities are associated with both recruitment and retention. In addition, however, they stated that loan forgiveness and rural training programs appear to support recruitment. Retention efforts must focus on financial incentives, professional opportunity, and desirability of rural locations

Medical Student Debt & Career Choice: Rosenblatt & Andrilla (2005) examined the notion that medical students' rising total educational debt is one of the factors that explains the recent decline in students' interest in family medicine and primary care. They analyzed the results from questions on the Association of American Medical Colleges' 2002 Medical School Graduation Questionnaire that focused on students' debt and career choices. Students reported that higher levels of debt influenced their future career choices. An inverse relationship was observed between the level of total educational debt and the intention to enter primary care, with the most marked effect noted for students owing more than $150,000 at graduation.



Medical Training Debt & Service Commitments: Pathman, et al (2000) assessed how student loan debt and scholarships, loan repayment and related programs with service requirements influence the incomes young physicians seek and attain, influence whether they choose to work in rural practice settings and affect the number of Medicaid-covered and uninsured patients they see. Data are from a 1999 mail survey of a national probability sample of 468 practicing family physicians, general internists and pediatricians who graduated from U.S. medical schools in 1988 and 1992. A majority of these generalist physicians recalled "moderate" or "great" concern for their financial situations before, during and after their training. Eighty percent financed all or part of their training with loans, and one-quarter received support from federal, state or community-sponsored scholarship, loan repayment and similar programs with service obligations. In their first job after residency, family physicians and pediatricians with greater debt reported caring for more patients insured under Medicaid and uninsured than did those with less debt. For no "specialty" was debt associated with physicians' income or likelihood of working in a rural area. Physicians serving commitments in exchange for training cost support, compared to those without obligations, were more likely to work in rural areas (33 vs. 7 percent, respectively, $p < 0.001$) and to provide care to more Medicaid-covered and uninsured patients (53 vs. 29 percent, $p < 0.001$), but did not differ in their incomes ($99,600 vs. $93,800, $p = 0.11$). Thus, among physicians who train as generalists, the high costs of medical education appear to promote, not harm, national physician work force goals by prompting participation in service-requiring financial support programs and perhaps through increasing student borrowing.

Support-for-Service Programs

It is well-established that a sizeable number of healthcare professionals carry a heavy debt-burden as they come out of training and are attracted to serving in those locations where a share of that burden can be taken away. For instance, training to become a physician is expensive, as 80 percent of medical students who graduate in debt will attest (e.g. Jolly, 2005). In 2004, young physicians' educational debt averages stood at over $109,000 and was this cost was increasing at the rate of more than $4,000 per annum (e.g. AAMC, 2004). Nonetheless, educational costs and students' fears of acquiring six-figure debts have created a market for government programs that link support for healthcare training costs to a period of obligated clinical work in shortage areas.

There are several types of financial "support-for-service programs" (SFSP's). These include: scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs. One of the two most common types of such programs is the service-requiring scholarship program. These pay tuition and other costs for healthcare students while obligating them to a period of service that begins when they complete residency (or similar post-graduate training) years later. The other common program type is loan repayment. Loan repayment programs recruit healthcare practitioners as they complete their training and are ready to begin service in exchange for paying off the traditional education loans they acquired years earlier. Programs of both types typically require one year of service for each year of training cost support they provide.

Figure 1 - Timeline of physicians' training years, signing of commitments with service-requiring scholarship and loan repayment programs, service periods (typically two-to-four years) and post service retention.

(After: Pathman, D.E. (2006). What Outcomes Should We Expect From Programs That Pay Physicians' Training Expenses in Exchange For Service? NCMEDJ, 67(1), pg. 77)

Support-for-service programs appear to be a natural solution to both the students' and the public's needs. They have grown in popularity over the past 25 years in tandem with rising tuition costs, with both federal and state agencies using them. In one well-known federal example, in 2005 the Bureau of Health Professions reported that the National Health Service Corps (NHSC) was providing an obligated physician workforce of about 1,700 scholars and loan re-payers. As a result of NHSC shifting most of its funding to loan repayment, more workers were immediately brought into the fold, and that census has now roughly doubled. In addition, most states also

sponsor their own support-for-service programs. In 1996 there were a total of 69 state programs with an estimated workforce of 1,300 practicing physicians. These state programs doubled in number from 1990 to 1996 and very likely have grown further since (Pathman, et al. 2000).

State Scholarship, Loan Forgiveness, and Related Programs: Pathman, Taylor, et al (2000) noted that in the mid-1980s, states expanded their initiatives of scholarships, loan repayment programs, and similar incentives to recruit primary care practitioners into underserved areas. These programs have since grown substantially during the ensuing two decades. The authors thus sought to identify and describe state programs that provide financial support to physicians and midlevel practitioners in exchange for a period of service in underserved areas, and to begin to assess the magnitude of the contributions of these programs to the US health care safety net. This cross-sectional, descriptive study established the number and types of state support-for-service programs in 1996; trends in program types and numbers since 1990; distribution of programs across states; numbers of participating physicians and other practitioners in 1996; numbers in state programs relative to federal programs; and basic features of the state programs.

The study found that in 1996 there were 82 eligible programs operating in 41 states, including 29 loan repayment programs, 29 scholarship programs, 11 loan programs, 8 direct financial incentive programs, and 5 resident support programs. Programs more than doubled in number between 1990 (n = 39) and 1996 (n = 82). In 1996, an estimated 1306 physicians and 370 midlevel practitioners were serving obligations to these state programs, a number comparable with those in federal programs. Common features of state programs were a mission to influence the distribution of the health care workforce within their states' borders, an emphasis on primary care, and reliance on annual state appropriations and other public funding mechanisms.

The authors concluded that as of 1996 the several states had fielded an obligated primary care workforce comparable in size to the better-known federal programs. Thus, these state programs constitute a major portion of the US health care safety net. The study emphasized that such state programs should be considered in plans to further improve health care access.

Experience of Other States

State-Level Support-for-Service Programs (2007): Considerable precedent exists for state-level offices to sponsor and manage financial support and inducement programs to thus encourage the within-state service of healthcare personnel. Tables 1, 2 & 3 here-present listings of those state-level support-for-service programs that were web-posted by the Association of American Medical Colleges (as of 8/10/07). These provide a selective look at state and federal loan repayment, forgiveness and scholarship programs available to allopathic medicine and other health professions students. This compilation is not exhaustive, and at present, our office is not aware of one that is. The here-derived tables shows that, overall, there were 81 programs. There were 44 listed states with at least one program (88% of US states). Fully, 21 of these states had two or more programs (47% of listing), with highs found in New Mexico (at 5) and Minnesota (at 7). On average, the 44 listed states had nearly 2 programs (1.8) each. Table 1 presents 43 listings that were designated as "state programs". Table 2 presents another 20 listings that were designated as "federal/state programs". Finally, Table 3 presents another 18 programs were not otherwise classified, though quick inspection of titles suggests that many can be readily classified. Those programs that were categorized as (strictly) "federal" (e.g. NIH, military) are not further considered. Click on any program title for more programmatic detail.

State-Level Offices: Service-for-Support Programs

Table 1: Designation as: "State Program"

State	Program
Arizona	Arizona Medical Student Loan Program
Arkansas	Community Match Physician Recruitment Program
Arkansas	Physician Grant Recruitment and Retention Program
Colorado	Colorado Health Professions Loan Repayment Program
Georgia	State Medical Education Board of Georgia Scholarship Program
Indiana	Indiana Primary Care Scholarship Program (IPCSP)

Loan Repayment Programs

In national studies, loan repayment has been found to be a successful strategy to recruit and retain physicians and nurses. Twenty-five years of program evaluations have clarified many of the outcomes possible from healthcare training support-for-service programs. Furthermore, studies have demonstrated that loan repayment programs, as a whole, have better outcomes than scholarship programs. Results of these comparisons have proved compelling. For example, studies demonstrating the strengths of loan repayment programs prompted Congress recently to allow the NHSC to make more loan repayment and fewer scholarship awards (e.g. Bureau of Health Professions, 2005) and led some states to expand their loan repayment programs (Pathman, et al. 2000).

Studies have shown that there are several benefits which can accrue from loan repayment programs. Selected examples follow:

> *High Position Fill-Rates:* Some programs, including the NHSC, have many more applicants than their funds can support and regularly fill all funded positions; other programs have many unfilled positions for lack of applicants.
>
> *High Service Completion Rates*: Very few loan repayment programs, accordingly, have found a need to set any buy-out penalties; as a group, their service completion rates average 93% without them (Pathman, et al, 2004). It is the physician-program-community fit and the financial attractiveness of the program that prompts physicians to complete their obligations with service (the "carrot"), not financial and legal threats (the "stick").
>
> *High Retention Rates:* Beyond merely completing obligations with service, there has long been the hope that obligated physicians will remain in their service communities for years afterwards ... In fact, data show that physicians participating in state-run support-for-service programs remain in their service sites as long on average as other young physicians remain in practices of all types nationwide. Physicians obligated to state-run loan repayment programs remain substantially *longer* than other young physicians (e.g. Pathman, 2004).

Effectiveness of Support-for-Service: Sempowski, I.P. (2004) attempted to evaluate the effectiveness of programs that provide financial incentives to physicians in exchange for a rural or underserviced area return-of-service (ROS) commitment. This was done via a systematic literature review using Medline and Ovid HealthSTAR databases were searched from 1966 to 2002. The initial search yielded 516 results. Bibliography review yielded additional references. Ten publications were selected as the highest level of evidence available. The main outcome measures were: (a.) initial recruitment of physicians, (b.) buyout rates, and (c.) long-term retention.

The majority of studies reported effective recruitment despite high buyout rates in some US-based programs. The one prospective cohort study on retention showed that physicians who chose voluntarily to go to a rural area were far more likely to stay long term than those who located there as an ROS commitment. Multidimensional programs appeared to be more successful than those relying on financial incentives alone. Sempowski, I.P. (2004) concluded that ROS programs to rural and underserviced areas have achieved their primary goal of short-term recruitment but have had less success with long-term retention. However, this study combined different types of support-for-service programs within its analysis thus somewhat preventing conclusions as to loan repayment programs, per se.

Loan Repayment vs. Payback Programs: Miller & Crittenden (2001) sought to determine and contrast the possible impact that two different types of support-for-service programs might have on medical school choice, and, students' intentions to return to their home states. The authors examined difference in preferences for: (a.) payback programs regarding state-subsidized medical education which are designed to increase the rate of graduates returning to those states to practice; and (b.) loan repayment programs that are designed to entice medical school graduates from rural states to return to their home states.

Miller & Crittenden (2001) surveyed 229 medical students (response rate 80 percent). The questionnaire collected background information on the students and addressed the possible

impact of payback and loan repayment policy proposals on student plans. Forty-seven percent of students reported that they would attend a different medical school if a required payback program were in place. Students who were more competitive at the time of admission to medical school were significantly more likely to say they would attend another medical school than were less competitive students. In contrast, 48 percent of students reported that they would be more likely to return to their home states if expanded loan repayment programs were available for service in areas of need. The findings suggest that payback programs may dissuade more competitive students from entering medical schools with such requirements, compromising the pool of students most likely to return to rural areas. Conversely, medical students appear willing to consider loan repayment programs upon completion of their training.

Why Do Loan Repayment Programs Work? Expert opinion was sought for insights into why loan repayment programs work. Donald Pathman, MD, MPH, (Univ. of North Carolina) was queried as to his view. Dr. Pathman stated:

> "As a whole, state-run (loan repayment) programs are successful but not because they are run well---- most are under-funded, under-staffed and can't offer individualized assistance to the health care practitioners they support. They are successful because the benefit of loan repayment is clear to potential applicants and programs typically only provide payments to participants after they complete each 3 or 6 months of work; therefore, if a participant leaves or otherwise fails to work in the agreed upon area or practice, payments simply stop and there is no need to enforce penalties." (Pathman, 2007)

Does a Loan Repayment Program Make Sense for Alaska? Expert opinion was sought for perceptions as to whether a loan repayment program makes sense for Alaska. Again, Donald Pathman, MD, MPH, (Univ. of North Carolina) was queried as to his view. Dr. Pathman stated:

> "I am glad to hear that Alaska is thinking of expanding loan repayment opportunities. I visited Alaska for the first time this past spring for the National Rural Health Association meeting, in Anchorage, with a side trip to Minto and Fairbanks. What an amazing place! I spoke with several folks working with the Native American health corporation in the state, and realize the physician shortages for the populations they serve. I was impressed that they knew little about how to attract and keep a physician. Lots of opportunities there for improvement in programs." (Pathman, personal communication, 2007)

Position of the Alaska Physician Supply Task Force (2006): The PSRF recommended a number of specific strategies and action steps to achieve four main goals related to assuring an adequate supply of physicians to meet Alaska's need. One of the PSRF findings was that Alaska's clinics and hospitals receive inquiries from physicians about the availability of loan forgiveness often. Loan repayment is a proven strategy for recruiting physicians, and the federal loan repayment programs currently available to Alaska physicians need to be stabilized financially and supplemented with Alaska-based programs. For detail, see: *"Securing an Adequate Number of Physicians for Alaska's Need"* (2006).

Precedents in Alaska: There are, and have been, other circumspect loan repayment programs for health professionals here in Alaska. These have typically been via categorical federal funding. Examples include Indian Health Service supports, and use of the National Health Service Corp. There have also been selected opportunities via the regional health corporations, and certain hospitals. Further, the Alaska Mental Health Trust has recently considered some loan repayment supports in the behavioral health field. While promising, these will collectively still fall far short of garnering the needed workforce to face projected need.

Recommendation

Recommended: Alaska should establish a Health Care Professionals Loan Repayment Program (HCPLRP). Decisions as to particular program elements must await further public process. Questions should be addressed regarding at least the following program elements:

- *Organizational Support*: What are the best ways to build legislative and public understanding and support on this issue? For instance, members of the Alaska Physician Supply Task Force supported a loan payback provision for physicians.

- Oversight: What is that governance entity most suited to provide leadership and oversight of this program? Similarly, which entity is most suited to administer the program? There is evidence that no single entity has the expertise to properly oversee and administer such a program. This might argue for a blended or interagency oversight structure. One agency might provide programmatic administration, while the other might serve as fiduciary agent.

- *Fiduciary Agent*: It may prove both workable and preferred that fiduciary mechanics and other administrative aspects be organizationally separated. If so, which agency is most to assume this fiduciary role? One approach might be to have the program work in tandem with the Alaska Commission on Postsecondary Education (ACPE). It is possible that the functions of the Alaska Commission on Postsecondary Education could be amended as these relate to repayment provisions healthcare degree program participants. It appears likely that no substantive change would be necessary for ACPE to act strictly as fiscal agent for participant payments. Further, this would not be a recommendation to change the scope of the ACPE mission to include direct workforce development. This later function would likely be accomplished by another state agency via interagency partnership.

- *Provider Eligibility*: Which healthcare occupations are to be deemed as eligible for the HCPLRP? Are all eligible occupations to benefit equally from the HCPLRP, or, will the occupations differ in terms of: (a.) maximum financial benefit, (b.) length of service required, (c.) specificity of service location, and, (d.) penalty for early-quit? There is evidence that for a loan repayment program, marked penalties are not needed, and, are actually likely harm outcomes.

- *Repayment Details*: Several policy and procedural decisions must be concluded. Examples follow. What is an adequate period of service-payback? What is the proportionality of payback when scheduled over years? What are the most useful policies with which to govern service payoff?

- *Work Processes*: Several work-process details will need to be established as regards management client relationships. Programmatically, what ways do we want to work, one-on-one, with program applicants to help them find suitable communities/positions? What types of assistance do we most want to provide to applicants, practices and communities?

- *Program Evaluation*: An ongoing evaluation should be installed and maintained as an expected part of any proposed support-for-service program (e.g. Henderson & Fox-Grage, 1997). It is in everyone's interest, and particularly in those of Alaska's medically underserved communities, that such programs: (a.) have explicit outcome objectives, (b.)

are regularly monitor as to those outcomes, (c.) openly acknowledge weaknesses, and (d.) embrace change as needed. Many different types of outcomes might be monitored. Reasonable measures might include:

- Practice in specific needy communities (e.g. HPSAs)
- Serve high-priority patient groups (e.g. Medicaid)
- Service completion of participants
- Retention rate of participants
- Satisfaction of participants
- Indictors as to the content of practice/work of program participants (e.g., proportion that provide inpatient care, that provide obstetrical care, or whatever specific services are deemed to have critical workforce shortages)

Other Support-For-Service Options to Consider:

As robust as a state-level loan repayment is likely to prove, there are other programmatic strategies. At least two other strategies should also be thoroughly examined: (a.) service-option loans, and (b.) direct incentives.

- *Strategy: Service-Option Loan Programs*

  Consider provision of educational loans to all citizens of Alaska who undertake health professions training, where the loans will be forgiven if they work within Alaska after graduation. This would provide added incentive for health care students who were raised in Alaska to return to Alaska to practice, rather than being wooed away by the states/communities where they receive their training. There is evidence that these have worked well elsewhere, given attention to key programmatic details. For Alaska, a service-option loan program should nicely complement a loan repayment program; because the former would address only Alaska residents and the latter would primarily attract those health practitioners coming from out-of-state.

- *Strategy: Direct Incentive Programs*

  Consider provision of direct incentive programs. In these, funding is provided to practitioners who agree to work in needy settings whether or not they have educational loans to be repaid. There is no reason to believe that only young practitioners-with-debt are suited to work in rural areas and/or with underserved populations.

  Loan repayment programs only target recent graduates who have weighty educational debts. For instance, as regards physicians, many recent graduates carry minimal debt (perhaps 40%). Further, a large portion of those physicians who are potentially recruit-able to Alaska are 10 or 20 years out of training and have no educational debts. It is possible, even likely, that "an Alaskan adventure" would appeal to some number of mid and late-career physicians. It may prove informative to assess the State's medical licensure files to learn the average/median/quartiles of age of physicians as to when they gain their first Alaska license. If, indeed, many are older, then this is a group that should be targeted. Direct incentive programs target those practitioners without loans, and, older practitioners.

Finally, support-for-service programs (of all types) constitute only one way to help bolster recruitment and retention of health care professionals. Alaska must develop a multi-pronged approach to confronting our growing healthcare workforce shortage.

Conclusion

Substantial evidence shows that Alaska currently experiences a shortage of healthcare professionals, and, that this shortage exists in several key occupational categories.

There are several types of support-for-service programs, and the national experience has proven loan repayment programs to be robust. These have demonstrated substantial and longstanding success as a public strategy which has helped to rectify such shortages. To quote from Pathman, et al. (2004),

> "As a whole, states' support-for-service programs bring physicians to needy communities where they find satisfying work caring for at-risk patient populations and remain for many years. Of all program types, the loan repayment and direct financial incentive forms, which target physicians after training, show the broadest successes. The successes of these state programs warrant their continued support and perhaps expansion to remedy the continuing maldistribution of physicians." (pg. 567).

Outcomes of States' Scholarship, Loan Repayment, and Related Programs for Physicians

Donald E. Pathman, MD, MPH,† Thomas R. Konrad, PhD,* Tonya S. King, PhD,‡ Donald H. Taylor, Jr., PhD,§ and Gary G. Koch, PhD‖*

Context: Many states attempt to entice young generalist physicians into rural and medically underserved areas with financial support-for-service programs—scholarships, service-option loans, loan repayment, direct financial incentives, and resident support programs—with little documentation of their effectiveness.

Objective: The objective of this study was to assess outcomes of states' support-for-service programs as a group and to compare outcomes of the 5 program types.

Design: We conducted a cross-sectional, primarily descriptive study.

Participants: We studied all 69 state programs operating in 1996 that provided financial support to medical students, residents, and practicing physicians in exchange for a period of service in underserved areas; federally funded initiatives were excluded. We also surveyed 434 generalist physicians who served in 29 of these state programs and a matched comparison group of 723 nonobligated young generalist physicians.

Data Collection: Information on eligible programs was collected by telephone, mail questionnaires, and from secondary sources. Obligated and nonobligated physicians were surveyed, with 80.3% and 72.8% response rates, respectively.

Main Outcome Measures: Levels of socioeconomic need of communities and patients served by physicians, programs' participant service completion and retention rates, and physicians' satisfaction levels.

Results: Compared with young nonobligated generalists, physicians serving obligations to state programs practiced in demonstrably needier areas and cared for more patients insured under Medicaid and uninsured (48.5% vs. 28.5%, $P < 0.001$). Service completion rates were uniformly high for loan repayment, direct incentive, and resident-support programs (93% combined) but lower for student-targeting service-option loan (mean, 44.7%) and scholarship (mean, 66.5%) programs. State-obligated physicians were more satisfied than nonobligated physicians, and 9 of 10 indicated that they would enroll in their programs again. Obligated physicians also remained longer in their practices than nonobligated physicians ($P = 0.03$), with respective group retention rates of 71% versus 61% at 4 years and 55% versus 52% at 8 years. Retention rates were highest for loan repayment, direct incentive, and loan programs.

Conclusions: States' support-for-service programs bring physicians to needy communities where a strong majority work happily and with at-risk patient populations; half stay over 8 years. Loan repayment and direct financial incentive programs demonstrate the broadest successes.

Key Words: physicians, health services access, rural health, primary care, student loans and scholarships, loan repayment, state health policy

■ *It is one of the happy incidents of the federal system that a single courageous State may, if its citizens choose, serve as a laboratory; and try novel social and economic experiments without risk to the rest of the country.—"Louis Brandeis*
Supreme Court of the United States
New State Ice Co. v. Liebmann, *1932; dissenting opinion*[1]

States and federal agencies frequently use service-requiring scholarships, loans, loan repayment, and related incentives to entice physicians into medically underserved settings.[2–4] As of 1996, 40 states offered 69 such physician-obligating programs, the federal National Health Service Corps (NHSC) and Indian Health Service (IHS)-sponsored scholarship and loan repayment initiatives,[5] and the NHSC and states jointly sponsored an additional 29 loan repayment programs. Service-requiring programs collectively wield a sizable workforce, estimated at 2900 physicians in 1996, half each under state and federal auspices.[5]

The 5 recognized program types—scholarships, service-option loans, loan repayment, direct financial incentives,

and resident support[5]—share fundamental goals and an approach that links financial support to periods of service; however, these program variations differ in important ways. *Scholarship programs* obligate medical students early in their training and many years before they are to serve their obligations. Participants in scholarship programs are firmly expected to provide service, and hefty penalties are used to discourage participants from buying out their obligations should their career interests change. *Service-option loan programs* also target medical students but offer participants a choice of performing service or repaying program funds at standard interest rates.

Loan repayment and *direct financial incentive programs* commit physicians much later, near the completion of residency training when their service is to begin. They typically levy no or minimal penalties on physicians who fail to complete a period of service. With loan repayment programs, physicians receive assistance repaying traditional education loans they acquired years earlier as students, whereas financial incentive programs provide unrestricted funds.

The newest programs, the *resident support* type, respond to the growing financial pressures on residents[6] with assistance in the form of scholarships, loan repayment, and direct financial incentives. Service is required and begins 1 to 2 years after a commitment is signed, at the end of residency.

Over the decades much has been said, with little supporting evidence, about the outcomes of these programs as a group and the relative strengths of the individual program types. It is generally believed, for example, that physicians in support-for-service programs are less satisfied and remain in their practices briefer than physicians without obligations. Many observers believe that stiff penalties are required to curtail otherwise high buyout rates, especially in programs that obligate individuals years in advance of service.[7] Others worry, however, that high penalties trap some participants in ill-suited commitments who are then unhappy as they serve and unlikely to be retained.[8-10] Proponents of loan repayment and direct incentive programs believe satisfaction and retention are better when physicians sign commitments after their training when they know their career interests, job options, and families' needs.[11] Scholarship defenders counter that only captive scholarship recipients can be drawn to the most desperately underserved communities because they are so unattractive.[12]

Few studies have assessed the outcomes of support-for-service programs, like the rates at which their practitioners complete their obligations with service and their practitioners' satisfaction and retention. Programs do not often undertake self-evaluations and those that do seldom have comparative data on other programs.[2,13] States and federal agencies regularly add, drop, and modify their programs without firm evidence of their effectiveness.[14-17]

This study has 2 primary goals: 1) to assess outcomes of states' support-for-service programs as a group, and 2) to compare outcomes for the 5 program types. We assess program outcomes we believe are important to underserved communities, physicians, and policymakers: the levels of socioeconomic need of communities and patients served by participating physicians, participant service completion and retention rates, and satisfaction levels of participants and their families. We also test the assumptions that 1) higher buyout penalties increase the proportion of physicians who fulfill their obligations with service but at a cost of lower physician satisfaction and poorer retention, and 2) scholarship programs bring physicians into the neediest communities.

METHODS

Identifying Eligible State Programs

We identified all state support-for-service physician programs nationally as of 1996[5] by supplementing previous lists of relevant programs[3,18,19] with information from telephone calls to key contacts in every state and from available online sources and printed materials. Eligibility criteria for programs were that they 1) provided financial support to students, residents, and/or practicing physicians in 1996; 2) had a service requirement or option in defined medically needy settings located across a given state; and 3) received no direct federal support. Of the 69 identified eligible programs, 20 offered scholarships, 24 provided loan repayment incentives, 12 offered loans with service options, 7 offered direct financial incentives, and 6 offered support to residents.

Program Data

We obtained basic descriptive information for all programs through initial and follow-up telephone contacts with program directors and from programs' web sites, brochures, reports, and copies of their enacting legislation. This information was verified and supplemented through an 8-page mailed questionnaire completed by 45 programs (65%). Forty-eight (86%) of the 56 programs old enough to have had more than 20 physicians eligible for placement in service sites provided estimates of the service completion rate for their obligated physicians over the previous 3 years. Programs were approached for survey and other data in no particular order other than we started with the few directors we knew and tended to recruit all programs within a particular state at the same time.

Identifying State-Obligated and Comparison Group Physicians

Programs were asked to provide names and basic information on each physician who signed a first contract with them and/or had been placed in a first-service site in 1991 and 1996. These 2 years were selected because individuals who

Copyright © Lippincott Williams & Wilkins. Unauthorized reproduction of this article is prohibited.

committed to student programs in 1991 and loan repayment and direct incentive programs in 1996 would have begun serving their obligations in approximately 1996. Programs created after 1991 provided names of individuals contracted in their first year of operation; very large programs provided only a randomly selected subsample of names from 1991 and 1996, and smaller programs supplemented their samples with names of physicians obligated in proximate years (eg, 1992 and 1995). We elected not to request physician names from the last 12 eligible programs as a result of project time requirements. Of the 48 programs from which we requested physician data, 29 (60%) provided all data we needed to survey their obligated physicians. Programs from which we requested and received physician-specific information, programs from which we requested but did not receive this information, and programs from which this information was not requested were similar in size, physicians' contract terms, the types of geographic locations where their obligated practitioners served, and reported service completion rates.

We surveyed all 434 family physician, general internist, and general pediatrician participants (allopaths and osteopaths) identified by programs as then serving or having served their obligations. We excluded nongeneralists and physicians who defaulted or bought out their obligations without ever serving a day of their obligations. Programs reported no international medical graduates.

We constructed a comparison group of nonobligated generalists from the American Medical Association Physician Masterfile. A sampling frame of eligible subjects was constructed of all 8742 graduates of U.S. allopathic and osteopathic medical schools in 1988 and 1992 who 4 years after graduation were in clinical practice in the United States in family practice, general internal medicine, and general pediatrics. A stratified random sample of 723 of these physicians was selected, with oversampling of strata to match the state-obligated cohort in specialty distribution and geography, and to ensure diverse racial and ethnic representation.

Physician Surveys

In 1998 and early 1999, we sent up to 4 questionnaire mailings to the state-obligated and comparison group physicians. Of the 434 obligated physicians surveyed, 23 proved to be ineligible or were never located, and there were 330 eligible respondents (80.3%). Response rates for obligated physicians were comparable across service program types, physician specialties, and racial–ethnic groups.

In the comparison sample of 723 physicians, 56 subjects proved ineligible or were never located and 468 eligible physicians responded (72.8%). Response rates for the comparison sample did not vary by subjects' rural/urban location, gender, or specialty; rates were somewhat lower for blacks (52.4%). We excluded 100 physicians from the comparison group who indicated that they had or were serving a state or federal obligation.

In the physician questionnaires, participants of state programs reported details of the first practice in which they served their obligations. On parallel questionnaire items, comparison group physicians described the first practice after residency in which they worked 9 months or longer. Both groups reported their incomes, satisfaction, their families' experiences, and their patients' insurance types. Nearly all questionnaire items had been used in earlier studies[9,20,21] and were pilot-tested again for applicability to this study with 30 obligated and nonobligated physicians in North Carolina.

We appended 1990 U.S. Census data characterizing the towns and cities where physicians worked.[22] County data on local physician-to-population numbers were appended for 1994 from the Area Resource File.[23]

Analyses

We compared obligated and nonobligated physicians on a variety of outcomes, including satisfaction and retention rates. We also compared programs of each of the 5 types individually and with the other 4 program types as a group. We used chi-squared tests, independent sample 2-tailed *t* tests, and 1-way analysis of variance (ANOVA) to compare groups on normally distributed variables. The Kruskal-Wallis test was used to compare groups on 4 nonnormally distributed variables: physician income, town population, town per capita income, and county primary care physician-to-population ratios. Bivariate comparisons were followed with linear and logistic regression models (with log transformations of nonnormally distributed variables) to adjust for key potentially confounding or explanatory variables. Life tables were used to describe proportions of physician groups remaining in their practices for specified numbers of years. Kaplan-Meier plots and Cox proportional hazards models were used to compare estimates of retention for various physician groups over time.

We also assessed relationships between programs' buyout costs and the various program outcomes with chi-squared and 2-tailed *t* tests. We further used multiple and logistic regression to test the relationships between buyout costs and the various outcomes for confounding by varying service obligation terms across programs and/or respondents' actual obligation periods. No confounding was found and we do not report these models.

Comparisons of obligated and nonobligated physicians were weighted to adjust for strata sampling fractions and response rates and run on the SUDAAN statistical software program (Research Triangle Institute, Research Triangle Park, NC). Analyses involving only obligated physicians were run on the SPSS statistical program (release 11.5.0; SPSS Inc., Chicago, IL) and not weighted. A level of statistical significance of $P \leq 0.05$ was used throughout.

RESULTS

State Programs

In 1996, the 69 eligible programs were relatively new and small, with a median age of just 6 years and median workforce of 11 physicians. Sixty-four programs were funded with state revenues, 2 had only private support, and 3 were self-supporting using buyout funds from earlier participants; 9 programs also used community matching funds. Forty-seven programs were based in state offices of rural health or other state agencies, 18 within individual medical schools, and 4 within private organizations.

Programs supported physicians with an average of $14,000 for each year of obligated service with no significant differences across the 5 types of programs ($P = 0.55$). Average minimum service obligation terms did vary across program types, from 12 months in resident support programs, 18 months in scholarship programs, 19 months in service-option loan programs, 29 months in loan repayment programs, and 36 months in direct financial incentive programs ($P = 0.003$).

Physicians and Their Practices

Physicians obligated to state programs, compared with physicians without obligations, were more often male (63% vs. 53%, $P < 0.05$), more often married (84% vs. 75%, $P < 0.05$), slightly older (33 vs. 32 years on average, $P < 0.001$), but no more or less likely to be black or Hispanic (8.5% vs. 6.2%, $P = 0.10$). Obligated physicians were much more likely than nonobligated generalist physicians to be family physicians (72% vs. 38%, $P < 0.001$) and more often owned the practices where they worked (36% vs. 27%, $P < 0.05$), but earned comparable salaries (median, $89,735 vs. $89,622, $P = 0.2$).

Comparing physicians obligated to the 5 types of programs, we found no differences in gender, marital status, ethnicity, or income. Loan program participants, however, were less likely to be family physicians than participants of other programs (54% vs. 75%, $P = 0.02$), and physicians in incentive programs more often owned their practices (49% vs. 16%, $P = 0.01$).

Although minimum service obligation durations varied across programs of the 5 types, the average number of years this study's respondents were actually obligated to their programs did not differ for those in 4 of the types (range, 3.13–3.48 years, $P = 0.31$) but was shorter for participants of resident-support programs (2.72 years, $P = 0.02$).

Service Completion Rates

The 5 types of programs differed greatly in how often their physicians completed their obligations with service rather than buying out or defaulting ($P < 0.001$) (Fig. 1). Service-option loan programs reported the lowest average service completion rates (44.7%) followed by scholarship programs (66.5%). The 30 programs of the remaining 3 types, programs that committed physicians after training or as residents, reported uniformly high service rates (entire group mean, 93%; 92% after omitting the 5 of these 30 programs without a minimum service period).

Program directors reported obligation default rates, the proportion of obligated physicians who failed to provide either service or repay program funds, of 5.2% on average for all programs combined with no significant differences across program types ($P = 0.78$). In contrast, the percentage of physicians who bought out-of-service commitments differed greatly across the 5 program types, greatest in service-option loan programs (49.2%) and scholarship programs (27.2%).

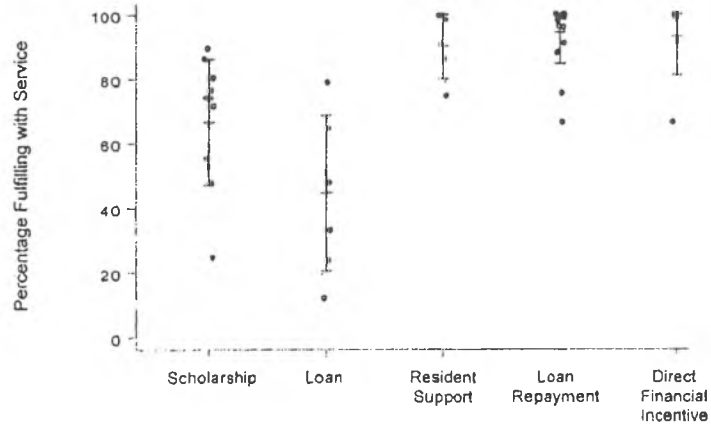

FIGURE 1. Percentage of recent physicians in each program (°) who fulfilled their obligations with service, grouped by program type.

© 2004 Lippincott Williams & Wilkins

Copyright © Lippincott Williams & Wilkins Unauthorized reproduction of this article is prohibited

Programs of the remaining 3 types reported comparable low buyout rates (2.3% combined). Thus, the high buyout rates of student programs account for their low service completion rates.

The costs that loan repayment, direct incentive, and resident support programs levy on physicians who buyout of obligations had no relationship with programs' service completion rates. Only among student programs, scholarships and service-option loans, were penalties and service completion rates related; specifically, rates averaged 80.3% for the 4 student programs that charged penalties of 3 times the amount of support provided compared with 48.6% for the 12 programs that charged less ($P = 0.02$).

Communities and Patients Served by Physicians

Physicians serving in state programs of all types combined, compared with the nonobligated physicians, worked in counties that were far more often rural and had lower primary care physician-to-population ratios, in cities and towns that were much smaller and poorer, and they reported more of their patients were uninsured or covered under Medicaid (Table 1). Even in analyses run separately for rural and urban-situated physicians and in multivariate models adjusting for physicians' rural versus urban location, specialty, and demographics, obligated physicians were still found to work in needier communities and with needier patients by all measures.

We explored whether county physician-to-population ratios were lower for obligated physicians simply because states with a greater need for physicians (and thus lower ratios) more often sponsored support-for-service programs.[24] We confirmed that, indeed, obligated physicians worked in counties with primary care physician-to-population ratios lower than their state's median county ratios more often than nonobligated physicians (37% vs. 11%, $P < 0.001$).

Among obligated physicians and weighing findings on all 5 measures of community need (Table 1), those serving in direct financial incentive programs worked in the neediest settings. Contrary to popular belief, the towns and counties where scholarship participants worked demonstrated no greater need than where participants of other programs worked.

Physician and Family Satisfaction

Physicians serving state obligations were more often satisfied with their work and practices and more often felt a sense of belonging to their communities than nonobligated physicians (Fig. 2). Obligated and nonobligated physicians gave comparable estimations of the satisfaction and needs-fulfillment of their spouses and children.

In virtually all ways tested, satisfaction was comparable for physicians and families participating in the 5 types of programs, the only exception being that scholarship program participants more often than others felt restricted by the practice sites available to them (36.6% vs. 19.3%; $P < 0.01$).

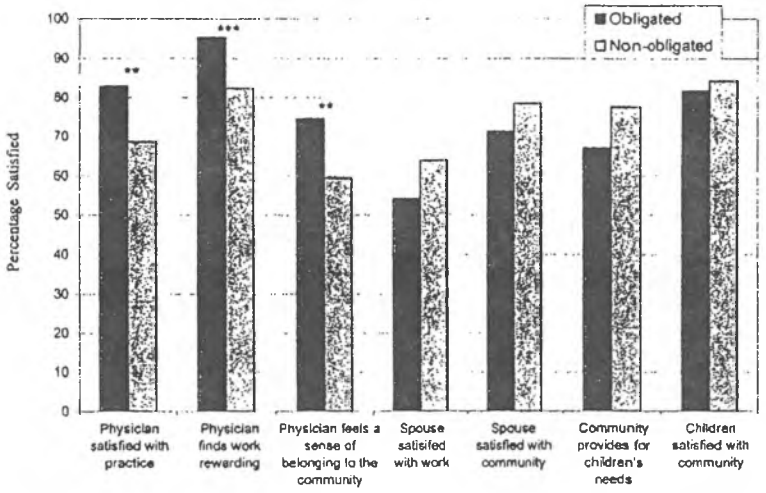

TABLE 1. Comparison of Community and Patient Characteristics of State-Obligated and Nonobligated Physicians; Physicians Serving in the 5 Types of Service Programs; and Physicians Obligated to Programs Using Different Types of Site-Eligibility Criteria

		Community and Patient Characteristics				
	(n Physicians/ Programs)	Rural (Nonmetropolitan) County (%)	Median Town/City Population	Median Town/City per Capita Income ($)	Median County Primary Care Physician-to-Population Ratio	Mean Patients Covered by Medicaid or Uninsured (%)

FIGURE 2. Satisfaction and needs fulfillment of physicians and their families serving in all state programs combined (n = 330) compared with nonobligated physicians (n = 368)

A remarkable 90.2% of obligated physicians indicated that they likely would enroll in their program if they had it to do all over again, including 64.2% who indicated that they definitely would do so. Differences across programs were found only for physicians in scholarship compared with loan repayment programs in which 47% versus 71% of physicians indicated that they would definitely sign up again ($P = 0.01$).

We explored the relationships between the buyout costs that programs levied and physicians' satisfaction, again finding associations only for medical student-targeted programs. When service-option loan and scholarship programs charged more than simple principal plus interest to buyout, most measures of physician satisfaction were lower, including fewer participants reporting, in retrospect, a definite willingness to commit to their programs again (36% vs. 65%, $P = 0.04$).

Retention

Obligated physicians remained longer in their service practices than nonobligated physicians remained in their first jobs after training (hazard ratio [HR] for leaving, 0.70; 95% confidence interval [CI], 0.51–0.96; $P = 0.029$) (Table 2). Respective group retention rates from life tables at 2 years were 92% versus 77%, at 4 years 71% versus 61%, at 6 years 59% versus 55%, and at 8 years 55% versus 52%. Retention tended to be better for obligated physicians than nonobligated physicians even after adjusting for group differences in physicians' specialties and demographics, although the differ-

TABLE 2. Comparison of the Retention of State-Obligated versus Nonobligated Physicians

	Hazard Ratio	*P* Value	95% Confidence Interval
Model 1 (unadjusted)			
Obligated vs. nonobligated	0.70	0.029	(0.51–0.96)
Model 2 (adjusted)			
Obligated vs. nonobligated	0.75	0.080	(0.53–1.03)
Family physician vs. internist	0.91	0.688	(0.58–1.43)
Pediatrician vs. internist	0.80	0.533	(0.40–1.61)
Male vs. female	0.76	0.190	(0.50–1.15)
Married vs. unmarried	0.75	0.270	(0.46–1.25)
Age when physicians began serving obligations	1.01	0.675	(0.95–1.08)

ence fell under the threshold of statistical significance (P = 0.08).

Among the 5 types of service-requiring programs, the longest group retention was seen for loan repayment recipients, 66% of whom remained in their service sites 8 years after starting work there, with a hazard ratio of departure compared with all other programs = 0.46 (95% CI, 0.30–0.70; P <0.001) (Fig. 3). Retention was shortest for resident support programs (HR, 6.72; 95% CI, 4.05–11.12; P <0.002). Scholarship participants demonstrated the second shortest retention (HR relative to service-option loan, loan repayment and direct incentive programs, 1.96; 95% CI, 0.97–3.97; P = 0.061).

Programs' buyout penalties were associated with retention, but once again only in scholarship and service-option loan programs, wherein penalties above simple principal plus interest were associated with lower odds of retention at 4 years (odds ratio, 12.4; P = 0.012).

DISCUSSION

Outcomes for states' support-for-service programs as a group were generally quite positive. Programs as a whole placed physicians in small and needy rural towns and counties, where physicians estimated that almost half of their patients were covered by Medicaid or were without health insurance. Physicians who served in these state programs were generally more satisfied with their work and communities and remained in their service sites longer than nonobligated "mainstream" generalists. We do not believe that the jobs and communities where these physicians served were inherently more pleasing; rather, we suspect that the benevolence of individuals who commit to and then fulfill service requirements predisposes them to find particular satisfaction from work that they believe in.[25,26]

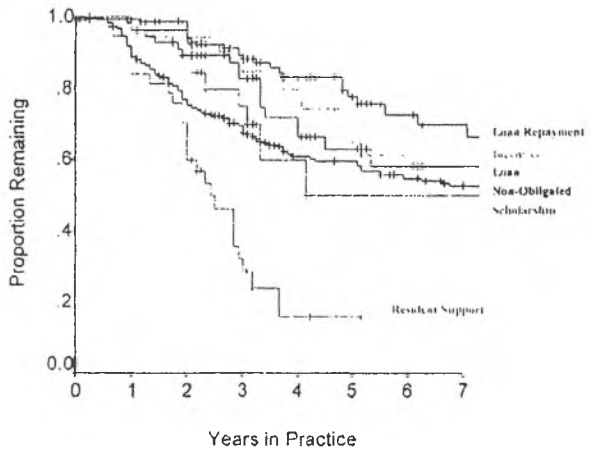

FIGURE 3. Retention of obligated physicians within their service practices: Kaplan-Meier estimations by type of program and compared with nonobligated physicians

Loan repayment and direct financial incentive programs enjoyed the greatest successes among the various program types, confirming the wisdom of recruiting physicians at the end of their training.[11] Financial buyout penalties were generally not used or needed in these programs, because their service completion rates were excellent without financial threats. Several program directors spoke of how much easier loan repayment and financial incentive programs are to administer than student-targeted programs, in which program staff must monitor participants during their training and deal with the many who buy out.[10,27] Direct financial incentive programs demonstrated an interesting niche among the program types, supporting physicians who often owned their practices, often in particularly needy settings.

Despite positive outcomes for programs overall, this study confirmed some commonly held concerns about scholarship programs. Very high penalties do seem to cut buyout rates by one third,[7] but penalties of any amount were associated with lower physician satisfaction and shorter retention. Contrary to claims,[12] state scholarship program participants did not work in demonstrably needier settings than participants of other programs. Studies of the NHSC Scholarship Program have similarly found that its participants do not serve in needier settings than those in the NHSC Loan Repayment Program.[11,27] The Congressional Government Accounting Office (GAO) and NHSC further similarly concluded that the NHSC Loan Repayment Program achieved better outcomes—higher service-completion rates, greater satisfaction, and longer retention—than the NHSC Scholarship Program, and also at a lower cost.[11,15,28]

The affordable buyout terms of student service-option loan programs allowed half of their participants to opt out of service, but the half who did serve were satisfied and long retained. Service-option loans could play an important complementary role to programs that target graduates, appealing to aspiring medical students who might otherwise choose not to pursue a medical career rather than assume the typical $100,000+ debt in traditional education loans. To embrace loan programs with service options, states must accept that it is not fatally undesirable for some participants to satisfy their loan contracts financially rather than with service. Indeed, most medical students fund their education with traditional loans, like the Health Education Assistance Loans (HEAL), where there is no option or enticement for service.[9] Concerns that too many physicians buyout of loan-for-service programs leaving too few available for shortage communities can be addressed quite readily by making more awards up front, costing programs nothing more because nearly all who opt not to serve repay their loans with interest.

Limitations and Unanswered Questions

Some of this study's data were self-reported and thus vulnerable to reporting inaccuracies. Directors provided figures on their programs' default and buyout rates and likely used a variety of methods to determine these rates. We are unaware, however, of any systematic inaccuracies likely to have biased our principal findings.

Some directors of scholarship and service-option loan programs who otherwise cooperated with our study would not provide the physician-specific information we needed to survey their participants, citing federal confidentiality protections of administrative data collected on students.[29] Given the demonstrated similarities between participating and nonparticipating programs, most importantly in the service completion rates of their participants, we do not suspect that the lower participation rates of student programs biased our outcomes. However, if less successful student programs withheld participants' names to hide their weaknesses, then loan repayment and direct incentive programs could actually be relatively even *more* successful than we judged (ie, bias, if present, was toward the null).

We had wanted to assess program costs and cost-effectiveness but program directors could not provide complete or comparable cost data. We also did not assess the experiences of physicians who signed up with these programs but chose not to serve.

We had no validated criteria on which to judge how often state-obligated physicians work in the very neediest settings, because states have not substantiated their site eligibility criteria and current federal criteria are inadequate.[30,31] Nonetheless, because some state programs use very broad site eligibility criteria, it is very likely that some obligated physicians do not work in the neediest areas.[5,32]

CONCLUSIONS AND RECOMMENDATIONS

As a whole, states' support-for-service programs bring physicians to needy communities where they find satisfying work caring for at-risk patient populations and remain for many years. Of all program types, the loan repayment and direct financial incentive forms, which target physicians after training, show the broadest successes. The successes of these state programs warrant their continued support and perhaps expansion to remedy the continuing maldistribution of physicians.

ACKNOWLEDGMENTS

The authors are grateful to the many state program directors, program staff, and participating physicians who provided data for this study. The authors thank the indispensable contributions of Kathleen Crook, MPA, to the data management aspects of this study, and the contributions of Tim Henderson, MSPH, of the National Conference of State Legislatures and James Bernstein, MHA, and Thomas Tucker of the NC Office of Rural Health and Resources Development to our understanding of these state programs and interpretation of the data. The authors also thank the fellows of UNC's National Research Service Award Primary Care Research Fellowship for their thoughtful suggestions on various drafts of this paper. This study was funded by grant R01-HS09165 from the Agency for Healthcare Research and Quality.

FAX: (907) 465-1398

February 9, 2011

Representative Bob Herron
Alaska Capitol, Room 411
Juneau, AK 99801-1182

Subject: Support for HB 78, Incentives for Certain Medical Providers

Dear Representative Herron:

The Alaska Commission on Aging (ACoA) supports for HB 78, a bill to establish a loan repayment program to build Alaska's health care workforce by increasing the recruitment and retention of targeted health care professionals in urban and rural, underserved communities. This bill is authored by you and co-sponsored by Representative Edgmon.

Alaska, as with the rest of the nation, is experiencing a shortage of health care workers as fewer students are entering the health care profession and many of those already working in health care are preparing for retirement. Alaska is one of five states that does not offer a state-sponsored loan repayment program for health care professions. As a result, our hospitals, clinics, and communities lose potential health care workers to other states that incentivize their workforce with loan repayment programs.

Access to quality health care is a priority for all Alaskans and a critical need for people age 65 years and older. Older Alaskans benefit from regular health care services which enhance their overall health and decrease the need for more expensive, intensive treatment and emergency visits.

Alaska continues to lead all states with the fastest growing senior population currently comprising about 12 percent of our state's population and is projected to increase by five to six percent each year until 2020. The graying of Alaska's population is creating substantial shifts for workforce, particularly in the health care and long-term support service sectors, as demand increases and providers are reaching retirement age. If older Alaskans are unable to find a health care provider, they may be forced to leave the state in search of access to health care professionals. As a result, Alaska could suffer from a loss of retirees, who contribute more than $1.7 billion to the state's economy in addition to their significant volunteer service, caregiving activities, and community leadership.

ACoA supports HB 78 and believes that the proposed legislation will help to build a qualified health care workforce who will be available to meet the health care needs of older Alaskans. Please feel free to contact Denise Daniello, ACoA's executive director, by phone (465-4879) or email (denise.daniello@alaska.gov) should you have questions or require additional information about our position. Thank you.

Sincerely,

Sharon Howerton-Clark
Chair, Alaska Commission on Aging

Sincerely,

Denise Daniello
ACoA Executive Director

ALASKA
PRIMARY CARE ASSOCIATION

RESOLUTION 2011-02
Health Care Professionals Incentive Program

WHEREAS the Alaska Primary Care Association strives toward the goal of a healthy population, it recognizes that a robust health care workforce is necessary to provide adequate health care access for all Alaskans and is a key ingredient in improving the public health of all Alaskans; and

WHEREAS Alaska is competing nationally for the finite pool of available health care professionals; and Alaska is suffering from labor shortages in most health care occupations,[1] demonstrated by the fact that most of the state is designated either a Health Professional Shortage Area or a Medically Underserved Area,[2] and these shortages are particularly acute for primary care "safety net" agencies; and

WHEREAS a common state-level response to these pressures is the use and state funding of financial inducements, collectively known as support-for-service programs (SFSPs), and good outcomes have been achieved with these,[3] and national studies have determined loan repayment programs and incentive programs to be two of the most effective of the several SFSP strategies in terms of both recruitment and retention of new providers and experienced providers respectively;[4] and

WHEREAS Alaska does not have a robust SFSP while most other states do, many have several, and some of those are growing, and these SFSP assist with the geographic and specialty distributions of providers in these states;[5] and

WHEREAS it is well-established that many health professionals carry a heavy debt-burden from the date of graduation and are attracted to locations where a share of that burden can be relieved; and

WHEREAS for areas in the state where providers are required to work in professional isolation due to remote settings, direct incentives are needed to attract more experienced health care providers who do not carry debt and are considered desirable placements, and direct incentives can also be used to recruit and retain recent graduates who can use the incentives to pay student loans; and

WHEREAS the State of Alaska is making positive and important strides to reduce the health care workforce shortage administering a small, newly created federally and AMHTA and CHC funded program called SHARP (Supporting Health-care Access through loan Repayment), Alaska also needs a state-designed and state-controlled program to allow us to address our unique needs and help us be more competitive with other states in drawing candidates: ensuring an adequate number of provider slots, providing for certain health care professional categories not included in SHARP that are in shortage, allowing for greater flexibility in placements, and offering incentives to experienced providers without student loans as well as recent graduates with student loans; and

WHEREAS in 2006, the Alaska Physician Supply Task Force recommended specific strategies and action steps to assure an adequate supply of physicians to meet Alaska's need, including creation of a SFSP, and the 2007 Alaska Workforce Vacancy Study and the 2005-2006 Status of Recruitment Resources and Strategies (SORRAS II) point to the need for a state loan repayment and incentive program; and

903 W. Northern Lights Blvd., Suite 200, Anchorage, AK 99503-2400
main: 907.929.2722 fax: 907.929.2734 www.alaskapca.org

ALASKA PRIMARY CARE ASSOCIATION

WHEREAS a proposal submitted to the Alaska Primary Care Council by DHSS Health Planning and Systems Development recommends that "Alaska create a 'Health Care Professions Loan Repayment Program'"[6] based on the following logic;

> Reported increasing vacancy rates, increasing costs of recruitment [SORRAS report,] and comparisons with national norms [PSTF report] suggest that Alaska (per DHHS March 2009 data 7,) currently experiences a shortage of healthcare professionals, and, that shortages exist in several key occupational categories.
>
> Loan repayment programs have demonstrated substantial and longstanding success as a public strategy which has helped to rectify such shortages;[8]

WHEREAS, the Alaska Health Care Commission, in its 2009 Report / 2010-2014 Strategic Plan entitled "Transforming Health Care in Alaska," recommends as a goal to the Governor and Legislature the following: "Develop the health care workforce.....[by] increas[ing] the supply of primary care physicians by supporting educational loan repayment and financial incentives for recruitment" and later explained in its report:

> [O]ther strategies to improve recruitment and retention of physicians from outside Alaska must be considered. Support-for-Service programs offer an important recruitment and retention tool for states. These programs provide current or future health practitioners with educational scholarships, educational loans, repayment of educational loans, or direct monetary incentives in return for a contractual obligation with the practitioner to serve a period of service in a needy area.
>
> Loan repayment and financial incentive programs are the most popular form of support-for-service programs, as studies document service obligations established at the beginning of a practitioner's educational process (through a scholarship or loan) are less effective in terms of achieving the desired recruitment outcome as are loan repayment and financial incentive programs. Another benefit of loan repayment and financial incentive programs is that the return is immediate.

WHEREAS Having experienced providers on staff helps overall retention and recruitment, and many providers are reaching retirement age with no current incentives in place to keep these providers in the workforce beyond retirement age; and

WHEREAS federal health reform law permits state funding used for loan repayment to be tax exempt;

THEREFORE BE IT RESOLVED that the Alaska Primary Care Association supports the creation of a state-sponsored "Health Care Professionals Incentive Program," and recommends that the program include a provision that will allow incentives used for loan repayment to be tax exempt, and will advocate for the necessary authorizing and fiduciary legislation.

DONE AND DATED THE 16th DAY OF September IN THE YEAR 2010

SIGNED BY

Sonia Handforth-Kome
Board President, Alaska Primary Care Association

Alaska Pharmacists Association

February 1, 2011

Representative Bob Herron
Alaska State House State Capitol Room 411
Juneau, AK 99801

RE: Support for HB 78
Alaska Health Care Professions Loan Repayment & Incentive Program

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, putting Alaskans in jeopardy, the Alaska Pharmacists Association strongly supports the concept of a state-sponsored loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a limited and shrinking national pool.

"The Mission of the Alaska Pharmacists Association is to preserve, promote and lead the profession of pharmacy in Alaska."

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, LCSWs (licensed, clinical social workers), and physical therapists are all in short supply in Alaska.

Based on statistics provided by Laura Miller, PhD, Senior Economist with the National Association of Chain Drug Stores, the national average of community pharmacists per 10,000 people is 5.36. For Alaska, the figure is 3.35. To get to the national average, Alaska would need an additional 137 pharmacists. The average number of people per community retail pharmacy is about 5,300 nationally, and in Alaska it is 8,900. Even if you add in the 15 Indian Health Service (IHS) pharmacies, Alaska's pharmacies average about 7,500 people, much higher than the national average.

The Health Care Professions Loan Repayment & Incentive Program proposal brings to the table an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. The proposed program designed for Alaska will provide much needed relief for our state.

Respectfully,

Nancy O. Davis
Executive Director

Re: Support for HB 78 Incentives for Certain Medical Providers

February 9, 2011

Dear Senate and House Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, Iliuliuk Family and Health Services, Inc. (IFHS) strongly supports HB 78 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

Our organization, IFHS, is the only comprehensive service provider for medical, dental and behavioral health services within 800 air miles of Unalaska. We are remote, and we frequently find that we are unable to compete with "lower 48" medical practices for providers, since we also cannot compete effectively with salaries. State loan repayment options for our providers would help us offer a competitive package.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only a handful of states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed certified social workers, and physical therapists are all in short supply in Alaska.

It takes IFHS over a year to recruit a single doctor; six months to recruit a behavioral health specialist, and the last time we recruited a dentist, it took us four years to do so. We cannot recruit RNs – until July of 2009, we had two open RN positions for over two years, and currently have one RN position that has been open for over four years. We fill this position with locums RNs, but far prefer a full-time staff RN for consistency of care to our patients. A state-sponsored support-for-service program would help make our recruitment package more appealing and more competitive.

The Professions Loan Repayment & Incentive Program proposed in HB 78 provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and

incentives have been shown to effectively help alleviate shortage problems in other states. HB 78 establishes a loan repayment and incentive program customized for Alaska and will provide much needed relief for our state.

IFHS supports HB 78 and urges passage of this important legislation. Your active steps to assure the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program are greatly appreciated.

Respectfully,

Sonia Handforth-Kome

February 18, 2011

The Honorable Bob Herron
AK House of Representatives
State Capitol Room 411
Juneau AK, 99801

Dear Rep. Herron:

Please accept this letter of support for HB 78. The Mat-Su Health Foundation (MSHF) is a 501c3 that owns part of the Mat-Su Regional Medical Center. We invest revenues from our local hospital into grants to improve the health of Mat-Su residents. MSHF's mission is to improve the health and wellness of Alaskans living in Mat-Su, with the goal to become the healthiest borough in the state of AK by 2017. We have four strategies to reach this goal. One strategy is to reduce barriers to healthcare access.

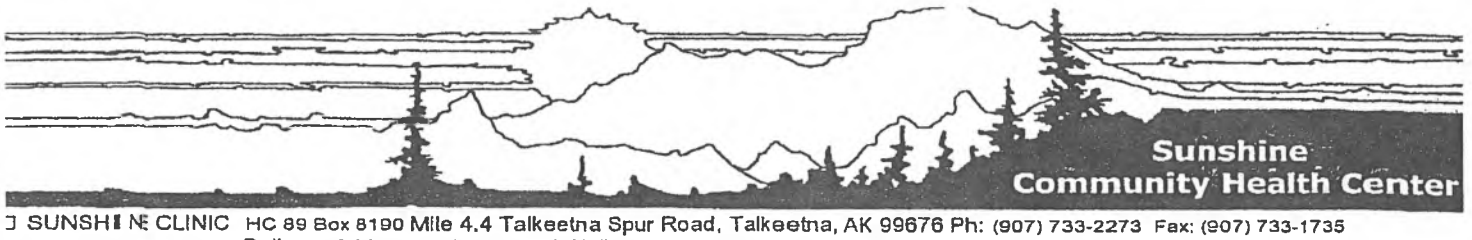
One key barrier to access is the lack of healthcare professionals to deliver healthcare services. On the acute care side, building a new hospital has helped our community attract qualified physicians, specialists, and nursing and technical staff to deliver the quality care our Mat-Su residents need and deserve. MSRMC spends thousands of dollars annually to recruit these professionals, most of them from out-of-state—especially for hard to fill positions for pharmacists, physical therapists, occupational therapists, and others for which there is no professional education within the state of AK.

Until the needed clinician is recruited, the hospital still has to deliver that quality care. In the interim, it hires "travelers" from out of state with the credentials to fill these needed slots. MSRMC spent $6,447,814 on contract labor from 2004 through 2010 on temporary health professionals from outside AK to fill current needs. And that is probably one of the lowest expenditures for contract labor of hospitals in the state. Because we have a relatively new hospital in a growing community, we have had great success in recruiting. So believe it or not, this $6.4 million is low by industry standards.

Despite what MSRMC is doing, MSHF is still concerned this workforce barrier is limiting access Mat-Su residents have to primary care in particular. We're doing our part by offering scholarships to Mat-Su residents pursuing education for a career in healthcare and are giving away $100,000 this year. It's not enough, and it's not nearly as effective as loan repayment and incentive programs.

We've been studying the various ways to either educate our young adults here in healthcare professions or encourage our young adults to return to AK to work after getting their education outside or ways we could incentivize healthcare professionals to return or move to Alaska to provide services in local clinics and hospitals to Alaskan citizens. National studies have determined loan repayment and incentive programs to be two of the most effective strategies in terms of both recruitment and retention. I've attached a resolution passed by the MSHF Board of Directors in support of the State's investment in a loan repayment and incentive program. This offers more details about the workforce needs in Mat-Su.

MAT-SU HEALTH FOUNDATION



950 E. Bogard Road, Suite 218 • Wasilla, AK 99654
Phone: (907) 352-2863 • Fax: (907) 352-2865
www.matsuhealthfoundation.org

I commend you for closely watching the state budget and looking critically at state spending. An investment in a loan repayment and incentive program is just that—an investment. And it has a phenomenal return. Every doctor that moves to our state represents a new business, one that employs receptionists, nurses, bookkeepers, accountants, technicians, etc. Every healthcare professional we recruit will generate jobs and income to our state—an incredible return on investment. Please make this return possible by passing HB 78.

Sincerely,

Elizabeth Ripley

February 9, 2011

Representative Robert Herron
State Capitol
Juneau, AK

Dear Representative Herron,

I am writing you regarding HB 78

As executive director for the Sunshine Community Health Center, I cannot tell you how valuable a loan repayment and incentive program is to recruiting potential medical and dental providers.

It took Sunshine 20 months (December 2008 – August 2010) to hire a new dentist and while there were other obstacles (i.e. licensing for one) which hampered our efforts, loan repayment was the number one question asked by candidates. In March of 2009, we began a search for a medical provider, which last 6 months, 70% of the candidates interviewed said loan repayment was critical in their choice of employment. During those six months, we were forced to employ a locum rather than reduce clinic days or hours, which would have been a hardship to the rural and remote patients we see. The cost in hiring a locum is 35% more than hiring a permanent provider.

While Alaska certainly has a lot of offer we cannot compete with clinics and centers in the lower 48 if the playing field is not level. One-way to even the playing field is to approve and fund a loan and incentive program in Alaska.

I urge you to support this bill because without and even playing field we place clinics in a position of having to scale back hours as they search for months for new providers. At a time when clinics in Alaska are seeing a shift in patient needs seeing more uninsured, Medicare and Medicaid patients we cannot afford to close or reduce hours at the expense of good patient care.

Sincerely,

Sharon Montagnino
Executive Director

Re: A Pharmacist's Support for HB 78

Dear Representative Herron,

I am a pharmacist from south Florida who relocated in September 2010 to work in rural southeast Alaska. I would appreciate the opportunity to share my story and subsequent support for HB 78.

After putting myself through a bachelors in environmental science, I decided to move back into my parent's home to begin repaying my nearly twenty thousand in student loans. During this time I became very involved with a local children's hospital and nursing home. This volunteer work inspired me to return to college to pursue a career in pharmacy. I was accepted at one out of state and two private colleges of pharmacy. I knew any choice would result in massive student loans accrued during the four years required for a Doctor of Pharmacy degree. Therefore, I choose a local private college, which allowed me to economize by continuing to live with my parents.

A week after graduating pharmacy school in May 2008, I was married. Despite various extraordinary efforts to contain debt, my student loan total had grown to roughly two hundred thousand. My husband and I felt a great responsibility to begin aggressively repaying my student loans in order to prepare for a family. As a result, I did not defer my loans to complete a residency and subsequently enter a more sought-after field of pharmacy. Rather, I entered the very demanding field of retail pharmacy. I spent two years working fulltime at an independent retail pharmacy and as a relief pharmacist at another pharmacy in Florida. I have come to value and respect the vital role a local retail pharmacist has in counseling and advising patients, collaborating with practitioners, seeking innovative ways to meet individual patient's needs (i.e. compounding medications), and often serving as a listening friend. It is a physically demanding and emotionally draining, but richly rewarding by the relationships built with patients.

In September 2010, my husband and I relocated to Prince of Wales Island to work at an independent retail pharmacy. We have seen firsthand the vital role this pharmacy plays in the community and overall health of the residents. Professionally, I have been enriched by working in a pharmacy with such a strong focus on serving and challenged by the multiple unique services the pharmacy offers to help patients, the community, and state. Part of my employment has been dedicated to expanding these services. For example, I have arranged for pharmacy students to come from other states to complete educational rotations at the pharmacy and the pharmacy plans to participate in the state safe medication disposal program. In addition, my husband and I have thoroughly enjoyed become a part of the Prince of Wales community. My husband has become a volunteer firefighter, joined a community volleyball team, assisted a local domestic violence organization with financial matters, and is leading the technology improvement efforts of a local church. I have had the privilege of starting a gymnastic program at the city recreation center with nearly sixty participants in four classes, I am assisting in the formation of the Prince of Wales Behavioral Health Coalition, and I was recently elected to serve on the Board of Directors for the Alaska Pharmacists Association.

My husband and I would like to remain on Prince of Whales Island long-term, but there are costs involved with staying and the burden of my student loans forces us to be very cautious with our choices. From my perspective, HB 78 would be a powerful incentive to draw pharmacists to Alaska and encourage retention. I have witnessed much legislation that is well intentioned, but often a significant portion ends up benefiting or rewarding those who have not necessarily made the hard choices. In contrast, I personally found HB 78 to be distinctive. The reason for this is twofold: First, HB 78 will attract medical professionals to Alaska and rural areas in particular, thus benefitting the underserved in these areas. Second, HB 78 will actually assist those who have made the continuous rigorous sacrifices of time, energy, and finances to enter the medical profession in an effort to give of themselves in the service of others.

Thank you for your time and consideration!

Sincerely,

Dr. Julie McDonald

ANCHORAGE FAITH & ACTION • CONGREGATIONS TOGETHER

AFACT

March 10, 2012

The Honorable Bob Herron
Alaska House of Representatives
State Capital Room 411
Juneau, AK 99801

Dear Rep. Herron:

Please accept this letter of support for HB78 on behalf of the Anchorage organizing ministries of Lutheran Church of Hope and Central Lutheran Church. Both are members of AFACT (Anchorage Faith and Action--Congregations Together). For many months, leaders from each congregation have joined together, responding to concerns we have heard with regard to the struggle of seniors to find, keep, and be retained by primary care doctors.

We support HB78 because we hope it will provide an incentive for more primary care doctors to come to the state and treat seniors 65 and over. Our joint organizing ministry is grateful that the supporters of this bill recognize that the struggle for equal access to healthcare providers is not limited to the rural areas of our state. In our one-to-one conversations with seniors in Anchorage, we have heard many stories of concern and fear about the lack of primary care doctors.

The new Medicare clinics have temporarily alleviated some of this stress, however the senior population is growing. ISER has projected that by 2020 the number of Medicare recipients in Alaska will more than double, likely outgrowing the clinics. In our state, being in or near an urban center does not mean you have access to primary care.

We hope that this committee and the House will act in sympathy and solidarity with *all* our underserved populations, including and especially Medicare recipients in the Anchorage Bowl.

Sincerely,

Rev. Julia Seymour

The Rev. Julia Seymour
Pastor, Lutheran Church of Hope

Alaska Academy of Physician Assistants

Re: Support for HB 78 Incentives for Certain Medical Providers

March 21, 2011

Dear Representative Herron and Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, the Alaska Academy of Physician Assistants strongly supports HB 78 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed clinical social workers, and physical therapists are all in short supply in Alaska.

The Alaska Health Care Professions Loan Repayment & Incentive Program provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. HB 78 establishes a loan repayment and incentive program customized for Alaska and will provide much needed relief for our state.

The Alaska Academy of Physician Assistants supports HB 78 and urges passage of this important legislation. Your active steps to assure the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program are greatly appreciated.

RE: HB 78 (Herron)--Support

Dear Co-Chairs Stoltze and Thomas:

On behalf of the members of AARP in Alaska, we encourage you and your colleagues on the House Finance Committee to support HB 78, authored by Representative Bob Herron and co-sponsored by your Committee colleague Representatives Edgmon as well as Representatives Feige, Millet, and Tuck.

The intent of HB 78 is to provide incentives for health care providers, especially for expertise that is in short supply in Alaska as well as to secure providers in our many underserved geographic areas.

AARP approaches HB 78 from the standpoint of the customer. Our members are the group most likely to need health care services and are often the first ones to face critical health care problems because they cannot find a provider.

You are well aware of our health care workforce shortages in Alaska. If our members cannot find a health provider, the results can be bad for them as well as for the state.

Postponing a needed health visit often results in health deterioration and, in many cases, more intense and more expensive treatment. With an increase in providers, our members are more likely to seek prevention and early treatment. The overall health status of older Alaskans will improve.

However, if our members cannot find a health care provider, Alaska will be the loser.

As you know, prior to 1990 many older Alaskans left the state after retirement because they could not count on finding medical facilities and providers to meet their needs.

This trend reversed and now Alaska has the highest percentage of older people who decide to stay in their home state after retirement. The economic value of these retirees is estimated at over $1.7 billion.

We want our citizens to stay here after retirement. The most significant determination of where retirees decide to live is the availability of quality health care. We must have an adequate health care workforce if we are going to keep older Alaskans in our state.

HB 78 will go a long way in helping us secure that workforce.

AARP recommends an "AYE" vote on HB 78.

Should you have any questions about our position, please feel free to contact me (586-3637) or Patrick Luby, AARP Advocacy Director (907-762-3314).

Thank you for your consideration.

Sincerely,

American Dental Hygienists' Association

Re: Support for HB 78—Incentives for Certain Medical Providers

March 7, 2011

Dear Representative Herron and Members of the Alaska State Legislature:

The Alaska State Dental Hygienists' Association (ASDHA) supports House Bill 78 to establish a loan repayment and incentive program. This legislation addresses the shortage of certain health care professionals in the state and will increase the number and improve the distribution of health care professionals that provide direct patient care.

Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. This legislation would allow Alaska to compete with other states in the recruitment of numerous providers and help fill the alarming number of vacancies that exist.

House Bill 78 provides incentives for dental professionals, including dentists and dental hygienists. While current practice act limitations exist for direct patient care by dental hygienists, we are hopeful HB 78 will attract more dentists and dental hygienists to our state and to rural communities. With up to eighteen dental hygiene students graduating from Alaska universities yearly, we believe HB 78 would provide an additional incentive for them to stay.

The ASDHA supports HB 78 and urges passage of this important legislation. Your active steps to assure the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program are greatly appreciated.

Respectfully,

Gail Walden

To: Rep. Bob Herron
Subject: Support for HB-78

Rep. Herron:
On behalf of the Alaska Dental Society, I'm writing to ask for your support of HB-78 Incentives for Certain Medical Providers.
If our small and rural communities are going to succeed in attracting the services of private practice dentists, Alaska will need these types of assistance to recruit practitioners. My office received a request recently from a dentist looking to relocate in Ketchikan who would treat primarily Medicaid eligible children. A resource that is needed in many small Alaskan communities, but because of student loans was asking what type of assistance is available in Alaska. HB-78 would help us ensure that Alaska could compete with other states that offer generous incentives for healthcare providers.
Your support for HB-78 is appreciated.

Jim Towle

Subject: HB78

Members of the House Finance Committee

The Alaska Dental Society urges you to support HB78, Incentives for certain Medical Providers.

HB78 will provide financial incentives to encourage health care providers to provide care in underserved areas. The underserved areas, primarily in rural Alaska, face chronic shortages of health care providers and will continue to do so without incentives. The Dental Health Aide Therapist (DHAT) program run by ANTHC has helped provide needed dental services but given the limited scope of treatment provided has still left a need for dentists in rural Alaska. Economics of scale and the high cost of building a dental clinic make it unlikely towns with less than 2000 in population will have a private dentist.

46 other states have recognized the difficulty in requiting dentists into underserved areas and have one or more programs in their states to provide encouragement. Unfortunately that leaves Alaska as one of only 4 states without such a program. New dentists frequently graduate with $200,000+ in school debt and consequently make their location choices based on the ability to repay these loans.

HB78 coupled with the economic package provided by the ANTHC subsidiaries and the FQHCs (Federally Qualified Health Centers) will provide an economic incentive for new graduates – and possibly other dentists – to provide care in underserved areas.

Subject: HB 78

Re: Support for HB 78 Incentives for Certain Medical Providers

March, 07, 2011

Dear Representative Herron:

Thank you for your tireless work on behalf of Alaskans and their best interests. My name is Mary Sullivan and I'm the program manager of the Seniors Behavioral Health Coalition, facilitated by Akeela Inc. The SBHC is made up of senior service providers, senior citizens, private business and state and tribal entities and is dedicated to prevent older adult behavioral health problems, as well as to ensure the full continuum of care for this population. Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, the Senior Behavioral Health Coalition strongly supports HB 78 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

The members of the SBHC feel that ensuring health care access especially to seniors is a key protective factor against the development of behavioral health problems in later life. HB 78 would help to recruit qualified providers both in primary care, and in the ancillary services (such as social work) that are often needed with the medically fragile and those experiencing chronic conditions, such as those that many older adults experience. Access early and often to these ancillary and primary care services means that the development of more costly diseases and behavioral problems are more likely to be prevented. However, with the workforce shortage, access to much needed services is extremely impeded and in some cases impossible. Older adults already face challenges with access to primary care due to the reimbursement rates of Medicare, and the workforce shortage makes it doubly difficult for our elders, who worked very hard all their lives, to get the health care they need and have earned the right to deserve. Therefore, the SBHC feels that HB 78 is a wise choice for Alaska with its aging population, and is also a fiscally responsible role for government to fill in helping make Alaska a desirable place of work for these hard to fill health care positions.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed clinical social workers, and physical therapists are all in short supply in Alaska.

The Alaska Health Care Professions Loan Repayment & Incentive Program provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. HB 78 establishes a loan repayment and incentive program customized for Alaska and will provide much needed relief for our state.

The Senior Behavioral Health Coalition supports HB 78 and feels it is an important and needed piece of legislation. Your work on behalf of Alaska's seniors is very appreciated.

Respectfully,

ary Sullivan

RE: HB-78 – Incentives for Certain Medical Providers

POSITION: Support

ANTHC is a tribally controlled, non-profit, statewide tribal health organization formed pursuant to federal law to provide medical and community health services for more than 130,000 Alaska Natives. ANTHC is part of the Alaska Tribal Health System (ATHS), which is owned and managed by the 229 federally recognized tribes in Alaska and by their respective regional health organizations.

ANTHC and Southcentral Foundation jointly manage the Alaska Native Medical Center (ANMC), the tertiary hospital of the ATHS located in Anchorage. ANMC hospital and SCF clinic facilities together employ 161 physicians, 37 dentists and 509 nurses, along with many more employees working in health-related professions. We face the same workforce challenges as our partner health organizations, competing with employers in the Lower 48 to recruit and retain a quality workforce.

Current reports prepared by the Indian Health Service on physician positions within the tribal system and by Alaska tribal facilities on nursing positions provide a good snapshot of workforce challenges. These challenges are even greater for rural sites that also experience higher turnover rates. One significant issue not included in the reports is the aging population of our current providers.

Profession	*Positions Authorized*	*Vacancies*	*Percentage*
Physicians – statewide	305	59	19%
Physicians – ANTHC/SCF	168	17	10%
RN – statewide	900	133	15%
LPN – statewide	107	25	23%
APN – statewide	137	38	28%

Ideally we would grow our own health professionals in numbers that would meet our workforce needs, and we have made progress over the years. The tribal health system offers internships and scholarships that bring some of our best and brightest to the medical field. More Alaska Natives are choosing Medical and Dental careers; a University of Alaska Anchorage program, Recruitment and Retention of Alaska Natives into Nursing, is graduating Alaska Native nurses; many of our Community Health Aides have built on their basic training opportunities to prepare for advancing careers; and the Dental Health Aide Program is graduating students who fill a need for dental health services and patient education. We are inching forward, but more work needs to be done. Experienced providers are needed now to meet the needs of our patient/owners while we work to grow our own. They are also needed as preceptors and role models to students.

HB 78 is a strategy to attract skilled health professional to Alaska jobs. It would work in tandem with other efforts as Alaska's health provider community work to provide quality care to our residents. ANTHC urges your favorable consideration and passage of HB 78 to help us turn the corner on Alaska's health care workforce.

Re - HB78 - Recruitment Incentives for Certain Health Care Professionals

Dear Representatives Stoltze & Thomas:

The Alaska State Medical Association (ASMA) represents physicians statewide and is primarily concerned with the health of all Alaskans.

ASMA strongly supports HB78. It was one of the stakeholders that came together to develop the concept for loan repayment and direct incentive program proscribed in HB78. This measure will provide for an effective recruitment tool for physicians as well as other health care professionals in short supply.

Alaska competes with all other states in the recruitment of an ever shrinking pool of physicians practicing general internal medicine or family medicine. Currently only about 2% of medical school graduates are choosing general internal medicine or family medicine residencies. 46 of those states with whom Alaska competes for these physicians already have a loan repayment or direct incentive program.

HB78 will help to solve Alaska's chronic and acute (in certain practice specialties) physician workforce shortages. Those practice specialties include family medicine, general internal medicine, psychiatry and general surgery.

HB78 is needed to help put Alaska on a more level playing field with other states trying to recruit for the same limited and shrinking supply of physicians needed to provide the care. Obviously, by attracting and keeping physicians in the State, the people of Alaska have better access to health care; but not so obvious is that our physician community is an important "economic engine" that materially contributes to a stronger state economy.

ASMA urges you and the other members of the House Finance Committee to support HB78 and to expeditiously take action to ensure enactment of this critical measure.

Sincerely,

By: James. J. Jordan, Executive Director
For: The Alaska State Medical Association.

Re: Support for HB 78 Incentives for Certain Medical Providers

March 4, 2011

Dear Representative Herron and Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, the SEARHC Ethel Lund Medical Center strongly supports HB 78 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

The SEARHC Ethel Lund Medical Center provides comprehensive outpatient care to Alaska Native/Native American patients in the Juneau area (over 6,000 active patients). We have found recruitment of healthcare providers to be extremely challenging, including physicians, physician assistants, pharmacists, physical therapists, optometrists, and other healthcare professionals. Almost all potential applicants request loan repayment.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed clinical social workers, and physical therapists are all in short supply in Alaska.

The Alaska Health Care Professions Loan Repayment & Incentive Program provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. HB 78 establishes a loan repayment and incentive program customized for Alaska and will provide much needed relief for our state.

The SEARHC Ethel Lund Medical Center supports HB 78 and urges passage of this important legislation. Your active steps to assure the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program are greatly appreciated.

RE: HB 78 Incentives for Certain Medical Providers

Dear Committee Members,

The purpose of this letter is to strongly support HB 78 and encourage you to push this important legislation forward for passage. The University of Alaska Anchorage has developed a distance delivered Master of Social Work program to make it possible for Alaskans to remain in their communities while they earn an advanced degree in social work. Our graduates reside in rural communities throughout the state, serving some of Alaska's most vulnerable citizens. Unfortunately, these graduates often carry excessive student loan debt as they move into social work jobs. Department of Labor data indicates the average master's level social work graduate earns approximately $43,100/year. Our students often carry over $60,000 in student loan debt. HB 78 will assist Licensed Clinical Social Workers (LCSW) to repay their student loans while motivating them to seek employment in "shortage priority" areas.

Please feel free to give me a call if you have any questions about the distance MSW program and supporting graduates to repay their loans.

Sincerely,

Elizabeth A. Sirles, PhD, Director
School of Social Work

Ray Andreassen, DO
HC 60 Box 4860

February 16, 2011

To whom it may concern:

I am the long-time owner operator of Family Medical Center in Delta Junction, and I am writing to express my full support of Representative Herron's HB 78 Incentives for Certain Medical Providers.

Family Medical Center is one of the many facilities servicing rural communities that would greatly benefit from this measure. Recruitment and retention is one of the paramount hurdles in providing consistent quality care in rural Alaska.

I urge you to move forward on the approval of HB 78 Incentives for Certain Medical Providers.

Sincerely,

Ray Andreassen, DO

Liz Clement
Subject: HB 78 Incentives for health workforce providers

Dear Representative Herron,

I am writing in support of HB 78 Incentives for Health Workforce Providers.

As you know, Alaska is 1 of 5 states without a state-sponsored program and communities, clinics, and hospitals in Alaska lose candidates daily to other states because we don't have a program. For every dollar spent, there is a 100% return on state investment: every penny spent will mean a practitioner was filling a vacancy in Alaska. Unlike other loan programs and scholarship proposals which target students in training, HB 78 targets professionals who are ready to work immediately – and targets seasoned professionals (incentive portion of program) so greatly increases size of candidate pool; will make Alaska highly competitive (traditional loan repayment programs target only recent graduates with student debt – a smaller pool)
Without action, Alaska will face ongoing recruitment costs and high locum tenens costs due to high turnover, and the length of vacancies will continue to increase health care costs in Alaska. Without action, Alaska will continue to trend toward a public health crisis in pockets of the state; and without action, Alaska can expect increased ER use, increased Medivac use, increased Medicaid travel costs, and increased costs associated with chronic disease.
Thank you for your continued support of HB 78.

Sincerely,
Gretchen Clarke

RE: HB 78 Incentives for Certain Medical Providers

writing in support of HB 78. Passing this bill would be instrumental in ensuring that rural communities such as where I am ly working to have the incentives that would draw and retain professional clinical social workers that would remain and or join ies that desperately require these workers to help provide the highest quality of services for the community they serve. HB 78 l a provide incentives for community members to seek continuing education to enhance their ability to become qualified .s in their home community. As a Clinical Social Worker who has seen the need for services and know of the need for be able to remain working in these rural areas any extra incentives would benefit retention while reducing the financial itions that this type of education requires.

Subject: RE: HB 78 Incentives for Certain Medical Providers

I am writing in support of HB 78. Passing this bill would be instrumental in ensuring that rural communities have a hook to attract qualified social workers. More importantly HB 78 provides an incentive for community members to seek continuing education to enhance their ability to become qualified practitioners in their home community. As a member of the Alaska Chapter of the National Association of Social Workers, one of our goals is to continue to grow the profession within Alaska, HB 78 would provide one tool to further this goal and bring qualified social workers and other health professionals to the state and allow them to stay. We know this is an expensive state to live in and yet one of the most needy in terms of resources. HB78 just makes sense.

I appreciate the committee's willingness to hear the bill and we look forward to its movement through the political process.

Best Regards,

As a member of the Alaska Chapter of the National Association of Social Workers, one of our goals is to continue to grow the profession within Alaska, HB 78 would provide one tool to further this goal.

Additionally, on a personal note, my goal as an Alaska Native has always been to provide services and support for the community that supported my professional growth. In that vein, as a young person I traveled to the lower 48 to gain education and experience I could bring back to my home community in Alaska. However, the return was a more difficult decision since there were fewer Support-for-Service opportunities in Alaska while the state requires more continued education credits for practitioners to remain licensed. I value my accreditation and am committed to maintaining my license. I feel it affords clients and my community assurance that they are getting the best support possible. I would truly value any programs that can financially support this work and enabling other practitioners to provide their own best services for communities in need.

I appreciate the committee's willingness to hear the bill and we look forward to its movement through the political process.

"We help adults with mental illness live their own best lives"

March 31, 2011

Dear House Finance Committee members:

March is Social Work Appreciation Month – and a wonderful time to hold a hearing on an important bill impacting my profession's future, HB 78.

My name is Marie Lavigne and I am a licensed clinical social worker, board certified in oncology and a proud alumni of the University of Alaska School of Social Work, where I earned my degree and student loans. As I will be serving patients at the Cancer Center during your hearing, I am submitting written testimony to express my support for HB 78.

As Chair of the UAA School of Social Work Community Advisory, I want to express our support of efforts such as HB 78, to develop creative incentives to help fill the gap in countless vacant health care provider positions – which include masters trained, clinical licensed social workers and other health professionals across Alaska.

Like most of my colleagues who earned an MSW at the University of Alaska, student loans helped to pay my tuition. Graduate financing for my beloved field of practice is very limited. Despite considerable fundraising by our UAA Social Work Advisory and community partners over the years to endow several scholarships (average award $500), bachelor and masters trained social workers finance their own education. In fact, I have refinanced my loans to make them affordable till I am age 65. It's rather discouraging, that I will be paying my own loans while trying to finance my children's higher education and save for my retirement, in a field such as social work that offers modest salaries. Incentives such as loan repayment can help make the investment of education and service to the community a win-win for students, professionals and communities.

As you will hear in testimony by countless providers today, we have a growing health care shortage that is being compounded by an age wave bringing with it retirements of experienced health care professionals compounded by increased demand for care of our elders and Alaskans living with chronic or life limiting health conditions, such as cancer.

In response to this health care challenge, HB 78 creates the Alaska Health Care Professions Loan Repayment and Incentive Program which offers a valuable solution for Alaska. This can help quickly reduce the shortage by filling vacant health care provider positions throughout the state with both new and experienced health care professionals. It's an important investment the Alaskan legislature can make this session.

Alaskans continues to learn and develop their professional skills in health care in Alaska. Let's invest in this valuable sector of the economy through HB 78.

Thank you for your vote in favor of HB 78.

The Honorable Bill Thomas, Co-Chair
The Honorable Bill Stoltze, Co-Chair
House Finance Committee
Alaska State Capitol, Room 519
Juneau, Alaska 99801-1182

RE: CS HB 78 [HSS]

Dear Co-Chairs Thomas and Stoltze:

I have lived in Alaska since 1954 and plan to stay here the remainder of my days. I supported HB 392 during the last legislative session, a bill very similar to HB 78. I support CS HB 78 and urge the Committee to support and move this legislation at its next hearing. The documents on BASIS show this bill enjoys wide support from numerous groups around Alaska.

Below is a partial list of the reasons I support CS HB 78. I had intended to testify in person before the Finance Committee, but a previously scheduled medical appointment conflicts with the Committee schedule.

- We need more medical practitioners in Alaska
- Many of our health care practitioners themselves are reaching retirement age
- This bill will make it possible for Alaska to attract new Health Care professionals. We are competing nationally for this talent. We want the incentives this bill provides to attract young Alaskans to go into the health care fields and return to Alaska with their skills
- Alaska has the fastest-growing senior population in the 50 states
- Retired seniors contribute about $1.7 Billion annually to the Alaska economy, including retirement and health care spending
- This spending generates nearly 15,000 year round jobs for residents all around Alaska
- Senior income from investments outside Alaska and other non-earned income flowing into Alaska, generate about 3,500 more jobs
- It has been exceedingly difficult to find a primary care practitioner in Anchorage or Fairbanks that will see a new Medicare patient. There were 25 in Anchorage in early 2009; in the spring of 2010, that number was down to 4 practitioners, all at the Neighborhood CHC. The recent opening of the Medicare clinic should help some

Representative Herron,
I want to urge you to support HB 78 to create a health care professions loan repayment and incentives program for Alaska. We struggle with access to care though out the state. As a dentist who has spent most of my career in Alaska working in rural communities, I have seen providers come and go. We need to do more to keep providers here and engaged with our communities. Financial incentives and loan repayments would help them to stay. There are a lot of financial benefits to providers working in other states, we need to make Alaska appealing and rewarding. HB 78 could help us meet the needs of our communities.

September 13, 2011

Liz Clement
Rep. Herron Legislative Aide

Liz Clement:

As Medical Director for a community health center (ANHC) and now Chief Executive for Providence Medical Group, Alaska, I may have recruited more physicians to non-tribal, non-military practice than anyone in the state.

...oan repayment is always a high priority for recruits, and often is the critical difference in a successful recruiting engagement.

This is a problem in primary care, where there are too few trainees graduating, and now increasing competition for them as the nation wakes up to their value.

This is also a problem in urban specialty care, for example, psychiatry and pediatric subspecialties. While urban Anchorage isn't considered "underserved," many of these subspecialists serve the entire state.

Please support HB 78 so that we may compete. Successfully competing for healthcare professionals means serving our citizens at home.

Sincerely,

Tom Hunt, MD

Rep. Herron Legislative Aide

Liz Clement:

Thank your for taking the time to meet and consider this important issue.
I understand the need to be fiscally conservative, but I see - everyday - the impact of our healthcare workforce shortage and am truly fearful for our future.

This bill is more cost-efficient and results-producing than other methods
- loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. The proposed program designed for Alaska will provide much needed relief for our state.

It will take a multifaceted effort to solve our healthcare workforces shortage - this bill is foundational to that effort.
Please help us touch the future!

Sincerely,

Jan Abbott

Re: Support for HB 78 Incentives for Certain Medical Providers

September, 12, 2011

Dear Members of the House Finance Subcommittee:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, the UAA Department of Health Sciences Physician Assistant Program strongly supports HB 78 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

The mission of the UAA Department of Health Sciences Physician Assistant Program is to recruit and train PAs to work in underserved areas of Alaska. Our PA students graduate with a debt burden of over $100,000. HB 78 will add important financial incentives to allow our students to choose practices in primary care underserved settings.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only five states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed certified social workers, and physical therapists are all in short supply in Alaska.

The Alaska Health Care Professions Loan Repayment & Incentive Program provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. Alaska will realize a 100% return on state investment: every penny spent will mean a practitioner was filling a vacancy in Alaska.

The UAA Department of Health Sciences Physician Assistant Program supports HB 78 and urges passage of this important legislation. Your active steps to assure the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program are greatly appreciated.

Respectfully,

John Riley PA-C, MS
UAA Physician Assistant Program Coordinator

Why this fiscal note differs from previous version (if initial version, please note as such)

Fiscal note updated (1) to reflect changes made from the bill as introduced to the committee substitute (27-LS0334\B) adopted in House Resources and the conceptual amendment #1 made to that CS and (2) to reflect that certain erosion control projects that also contribute to flood mitigation could be included in the disposal of bedload material as it pertains to this bill. This is a new fiscal note form version for the second session of the 27th legislature. The appropriation and allocation have been changed to reflect the revised DNR structure.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** HB 89
2012 LEGISLATIVE SESSION

Analysis

This bill allows the Commissioner of the Department of Natural Resources (DNR) to offer for disposal bedload material within a river, lake, stream or coastal water (gravel, rock and other material) at below fair market value if disposal of that material enhances the effectiveness of a flood control project.

The Department already routinely sells bedload material at fair market value through its authority under AS 38.05.120. This bill would change the current fixed-fee structure ($/cubic yard) to a percent of profit royalty structure (not less than 12.5%) for the disposal of bedload material that enhances the effectiveness of a flood control project.

Reduction in revenue generated from the disposal of bedload material would be dependent upon the number of extraction sites approved under a site-specific flood mitigation plan and the volume of bedload material extracted from those sites. Additionally, the reduction in revenue from individual sales may be offset by the potential increase in the number of sales that would not have otherwise occured without this legislation. In either case, because the number of sites and volume of bedload material that might be extracted is at this time is unknow, the revenue impact is indeterminate.

Additionally, DNR will incur new costs for the review of each site-specific flood mitigation plan and review of net profit reporting after extraction. While DNR does not anticipate the proposed legislation will result in a significant increase in cost for any one project, the number of plans and sale applications that will be received is also indeterminate. The cumulative costs of receiving many applications may result in future supplemental budget requests.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB89

Analysis

The fiscal impact of this legislation cannot be determined by the Department of Transportation and Public Facilities. This bill requests consultation with a professional engineer with relevant experience to review plans for bed load material extraction. The Department of Transportation and Public Facilities has professional engineers and hydrologists on staff that may be used for determining how a project near a roadway or bridge might be undertaken so as not damage state infrastructure. We cannot determine how often this will occur, thus DOT&PF submits an indeterminate fiscal note.

CS FOR HOUSE BILL NO. 89(RES)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - FIRST SESSION

BY THE HOUSE RESOURCES COMMITTEE

Offered: 3/23/11
Referred: Finance

Sponsor(s): REPRESENTATIVE SEATON

A BILL

FOR AN ACT ENTITLED

"An Act relating to the disposal of certain bedload material in conjunction with a flood mitigation plan."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 38.05.872 is amended by adding new subsections to read:

(b) The commissioner may offer for disposal bedload material from an area subject to a site-specific flood mitigation plan approved by the commissioner under the terms in (d) of this section after making a finding that

(1) removal of the bedload gravel will offset future costs to the state that are attributable to flood damage;

(2) the sale of the bedload gravel under (b) - (e) of this section at a cost that may be below fair market value is in the best interests of the state; and

(3) removal of the bedload gravel will enhance the effectiveness of the flood mitigation plan in preventing a flood or minimizing flood damage.

(c) The commissioner may request a professional engineer with relevant

experience to review the plans for bedload material extraction.

(d) A person, other than the state or federal government or a political subdivision of the state, acquiring bedload material under a disposal authorized by the commissioner under this section shall comply with the terms and conditions established by the commissioner and pay to the department a royalty of not less than 12.5 percent of pretax profit calculated by subtracting from the value of the bedload material the actual direct costs of extricating, loading, and transporting the material to market, if applicable. The commissioner may adopt regulations that identify the method and means for determining the value of the bedload material and the costs that may be deducted for the purpose of calculating the amount to be paid to the state. In this subsection, "value" means the sales price of the material in a bona fide arm's-length transaction between unaffiliated parties or the sales price of the material had the material been sold in a bona fide arm's-length transaction between unaffiliated parties.

(e) In this section, "bedload material" means gravel, rock, and other material located below the plane of the ordinary high water mark or the mean high water mark of a river, lake, stream, or other coastal water.

*** Sec. 2.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes shall change the catch line of AS 38.05.872 from "Disposition of state land for flood control projects" to "Disposition of state land and material for flood mitigation."

ALASKA STATE LEGISLATURE
House District 35

HB 89
Sponsor Statement

Weather related disasters have cost the State of Alaska $106,474,936 over the past twenty years according to the Department of Military and Veterans Affairs. One of the most persistent and costly problems for Alaska communities is the regular flooding of rivers. In many regions this flooding is caused by an accumulation of gravel in the river bed, and the severity of the flooding could be decreased by removal of the gravel.

HB 89 provides commercial operators with a financially achievable way to remove gravel and other material in a riverbed prone to flooding. Statute currently requires that the state receive fair market value for sales of its gravel. The Department of Natural Resources assesses fair market value of gravel statewide and charges an up-front per yard fee for gravel removed from state land. This includes all gravel below a river that is determined to be navigable. The current pricing for gravel varies statewide from $5.00 per yard in Cordova, to $3.25 per yard on the Kenai Peninsula, $3.00 in the Mat-Su Borough, and $2.50 in the Aleutian Islands. This fee inhibits commercial removal of gravel from rivers with regular flooding issues.

HB 89 allows the Department of Natural Resources to consider mitigation of state disaster expenses as part of the fair market value calculation, and to receive a percent of the profit that a private contractor receives for the sale of the gravel they have extracted. HB 89 establishes this level at 12.5% of profits, mirroring the royalty share that the state receives for its oil and gas resources. The percent of profit paid to the state is calculated after the cost of extraction, loading and transportation are subtracted.

ALASKA STATE LEGISLATURE
House District 35

Summary of changes between HB 89 and CSHB 89 (RES)

- **Page 1, Line 6**: changed wording from "approved flood control project" to "site-specific flood mitigation plan" to distinguish these site-specific plans from federally funded projects involving the Army Corps of Engineers.

- **Page 1, Line 14**: added sub (c) allowing the Commissioner of DNR to request a professional engineer with relevant experience to review site specific flood mitigation plans.

- **Page 2, Line 2**: added "other than the state or federal government or political subdivision of the state" to make it clear that the percent of profit payment for bedload material does not apply to government entities.

- **Page 2, Line 3**: added "shall comply with the terms and conditions established by the commissioner" to make clear that the agency has oversight on the bedload material disposal process.

Honored Customers

Re: **Unit Pricing Change for Purchase of Sand, Gravel and Rock Materials**
Material Sale Contracts on State-owned Land – Southcentral Region

Dear Customer:

The Department of Natural Resources, Division of Mining, Land and Water has conducted a telephone market survey of current prices for sand, gravel and rock materials in various geographic locations in Southcentral Alaska where the State offers materials for sale. The purpose was to determine current fair market value.

Per 11 AAC 71.090 (c), ADNR is expected to "periodically establish representative sales prices for materials that are an estimate of the material's fair market value." The new prices determined will be used as the fair market value unit price per cubic yard of materials in the material sale contracts issued for the right to extract sand, gravel or rock for all contracts and permits, per AS 38.05.110 through 38.05.120.

> **Fair Market Value** – Fair market value is defined in 11 AAC 71.090 as the "highest price described in terms of money, which timber or material would bring if offered for sale for a reasonable time in the open market by a seller willing, but not forced, to sell to a buyer willing, but not forced, to buy, both being fully informed of the purposes for which the timber or material is best suited."

We have determined the current unit price schedule for purchase of materials throughout the Southcentral Region. The price list is attached as "Cost per Cubic Yard of Sand, Gravel and Rock Information Sheet – 2007." These prices will be effective beginning **January 1, 2007.**

These prices will remain in effect until updated through a similar price analysis. If you have any questions please contact Susan Browne at 907-269-8560 or Susan_G_Browne@dnr.state.ak.us.

Sincerely,

Michael Sullivan
Acting Regional Manager

Fact Sheet

Title: Material Sales in Alaska

Alaska Department of NATURAL RESOURCES
Division of Mining, Land & Water
February 2009

What is "Materials"?
Materials are sand, gravel, riprap, rock, limestone, slate, peat, and any other substances from the ground that are not applied for through the location system for mining claims (e.g. gold, silver, and other metals. Materials are measured and sold in cubic yards.

Where can I find materials on state land?
You can find information on material sites at the Department of Natural Resources (DNR) Public Information Center (PIC) offices listed at the end of this fact sheet. Often, sites that have already been used for extracting materials will be shown on state status plat maps. You may also do your own research to find new areas where you can extract materials. To get started, find the area in which you want to extract the materials. Use a USGS topographic map to determine what township, range and section your selected site is in. To determine if the site is on state-owned land, visit or contact the PIC.

How do I buy material on state land?
Determine the quantity of material you require from the site you have identified and request an application from the PIC.

Are there different types of state material sales?
Yes, there are three types of material sales.

- The first and smallest is a "limited" material sale which cannot be for more than 200 cubic yards per 12 month period per person. This is a revocable, nonexclusive contract for personal or commercial use.

- The second type is the "negotiated" sale, which generally cannot exceed 25,000 cubic yards per year per person or company. Material purchased under this type of sale can be sold or used for commercial purposes. The term of the sale is generally one year, but can be longer depending on circumstances.

- The third and larges is the "competitive" sale. The sale contract can be issued for an unlimited amount of material to be taken over many years. Award will be determined by public auction if there are multiple bidders for the same location. If no competitive interest is expressed during the public notification period, no auction is necessary and the sale can proceed to contract upon completion of the decision making process. Material purchased through competitive sale can be sold or used for commercial purposes.

What are the procedures for material sales?
If the material is located in an approved site, a limited material sale (200 cubic yards or less) can usually be issued over-the-counter at the Public Information Center.

For a negotiated material contract at an approved material site, the applicant must submit the following:

- A negotiated material sale application, environmental risk questionnaire, development plan, reclamation plan and a $100 application fee.

- Bonding deposit and insurance are requirements of a negotiated material sale contract. If approved the Division of Mining, Land & Water will then issue a contract to the applicant.

If a negotiated material or competitive contract is requested from a "new undeveloped site", a more involved public interest process must be followed. The process begins with agency review and a Coastal Zone Review if the project is within a coastal district.

Preliminary and final findings must be written and public notice given. The applicant is responsible for the cost of the public notice. These additional procedures take several months to process, depending on the complexity of issues and agency/public comments that must be addressed. Plan ahead; apply several months before you need to extract material.

What are the costs involved?
No filing or application fee is charged for a limited material permit, but negotiated and competitive sales contracts require a filing fee of $100.

The price charged for "limited" and small "negotiated" sales is set by the DNR, typically based on the fair market sales price of material in the area.

The amount charged for larger "negotiated" and "competitive" material sales (sales of more than 25,000 cubic yards) is generally based on a site-specific appraisal or an abbreviated appraisal called an "opinion of value". A "competitive" sale price is initially set by an appraisal, but may be raised during an auction if more than one person or company competes for the material.

NOTE: State regulations require the DNR to set a minimum "base price" which covers the cost of processing the contract. In no event can the amount charged for materials be less than this "base price".

USEFUL FACTS

- A full size pickup bed can hold approximately one cubic yard.
- A standard dump truck has a capacity of 10-12 cubic yards.
- The standard capacity of a belly dump is approximately 18-20 cubic yards.
- One Cubic Yard = 1.5 Tons (approximate)

Most negotiated material sales and all competitive sales require a business license, proof of insurance and a performance/reclamation bond. The bond will be refunded if all the terms of the sale contract are observed.

What happens when the material sale expires?
If you have met all the terms of the material sale contact, any bond will be refunded. If terms of the contract have been violated, penalties may be assessed against you. If you need to purchase more material, a new application must be submitted and processed by DNR in order to issue a new material sale contract.

Authority:
The applicable State statute and regulations include, but are not limited to: AS 38.05.110-120 and 11 AAC 71.

Where do I apply?
Material sale applications are available from and may be submitted to any of the DNR offices listed below.

DNR Public Information Center
550 West 7th Avenue, Suite 1260
Anchorage, AK 99501-3557
Phone: 907-269-8400
Fax: 907-269-8901

DNR Public Information Center
3700 Airport Way
Fairbanks, AK 99709-4699
Phone: 907-451-2700
Fax: 907-451-2706

DNR Public Information Office
400 Willoughby Street, 4th Floor
Juneau, AK 99801
Phone: 907-465-3400
Fax: 907-586-2954

Helpful Hints to Speed Processing

- Plan ahead; apply several months before you need to extract your material.
- If you have selected an existing material site used by the Department of Transportation and Public Facilities, obtain a written letter of non-objection from them and attach it to your application.
- If you will be applying for an extraction site within a wetland, river or stream you will need to contact the U.S. Army Corps of Engineers and the Department of Fish & Game Office of Habitat Management & Permitting (OHMP)

KENAI PENINSULA BOROUGH
RESOLUTION 2011-010

A RESOLUTION SUPPORTING ENACTMENT OF HOUSE BILL 89 AUTHORIZING THE DEPARTMENT OF NATURAL RESOURCES COMMISSIONER TO OFFER BEDLOAD MATERIAL FOR FLOOD CONTROL PURPOSES IN EXCHANGE FOR A PERCENTAGE OF THE PROFIT FROM THE SALE OF THAT MATERIAL

WHEREAS, flooding is a serious problem in the Seward-Bear Creek area, where at least six major flooding events have occurred since 1986, causing millions of dollars in damage to private and public properties and infrastructure; and

WHEREAS, the Seward-Bear Creek area is subject to alluvial fan flooding hazards including high velocity floodwaters which can cause tremendous erosion, and carry large amounts of sediment and debris which fill stream beds and allow floodwaters to spread widely, threatening development over a broad area; and

WHEREAS, one problem encountered in mitigating losses from flooding that the borough, the City of Seward and the Seward-Bear Creek Flood Service Area ("SBCFSA") have attempted to address is the charge imposed by the State for gravel removed from stream beds under navigable water which rendered the level of removal needed infeasible due to the horrendous cost; and

WHEREAS, following the work of the flood plain task force established by the assembly in resolution 2009-005 a summit was held during October 2010 in Seward to bring the various involved parties together including the Department of Natural Resources ("DNR"), the City of Seward, the borough administration, the SBCFSA representatives, representatives from the Matanuska-Susitna Borough, the Corps of Engineers and other agencies; and

WHEREAS, one proposal presented at that summit was to support revisions to state statutes that would give the DNR commissioner the discretion to offer bedload material for disposal for flood control purposes in exchange for a percentage of profit from the sale of the material instead of a fixed permit fee; and

WHEREAS, Representative Seaton is sponsoring House Bill no. 89 which would amend AS 38.05.872 to grant such discretion to the commissioner; and

WHEREAS, support of House Bill 89 is consistent with the short term mitigation measures and goals of the SBCFSA Flood Hazard Mitgation Plan (May 2010); and

WHEREAS, support of House Bill 89 is consistent with section 2.12 Flood Mitigation Strategy 4 of Chapter 2.0 of the KPB All Hazard Mitigation Plan;

NOW, THEREFORE, BE IT RESOLVED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH:

SECTION 1. That the assembly supports HB 89 in its current form, which would grant the Department of Natural Resources Commissioner the discretionary authority to sell bedload material for flood control purposes from state land in exchange for a royalty based on a percentage of the pretax profit derived from the sale of such material.

SECTION 2. That copies of this resolution shall be forwarded to the Borough's Legislative Delegation Senators Cathy Giessel, Al Kookesh, Thomas Wagoner, and Gary Stevens, and Representatives Alan Dick, Mike Hawker, Kurt Olson, Mike Chenault, and Paul Seaton.

SECTION 3. That this resolution takes effect immediately upon its adoption.

ADOPTED BY THE ASSEMBLY OF THE KENAI PENINSULA BOROUGH THIS 15TH DAY OF FEBRUARY, 2011.

Gary Knopp, Assembly President

The Honorable Paul Seaton
Alaska Legislature
State Capitol
Juneau, AK 99801-1182

Re: House Bill 89

Dear Representative Seaton,

This letter is written in support of House Bill 89, an Act authorizing the Commissioner of Natural Resources to offer bedload material for disposal for flood control purposes in exchange for a percentage of the profit from the sale of that material. On behalf of the City of Seward, please accept our thanks for your sponsorship of this important legislation.

As you are aware, removal of gravel from alluvial streams is essential for successful flood mitigation efforts. In many cases, however, the removal of bedload material does not occur because of the cost of removing gravel. This is a cost that increases when we remove bedload gravel from navigable streams. In those instances, our community pays twice; we pay a contractor to remove the gravel and then we also pay a royalty to the State for the gravel.

Your legislation makes it more affordable for a community to remove gravel from navigable streams for flood mitigation purposes. This is because contractors have an opportunity to profit from sale of the gravel thus reducing or eliminating the amount we would pay to the contractor. House Bill 89 also provides superior value to the State for its gravel resources. The value to the State is from better flood protection for its citizens and the receipt of 12.5% of the pretax profit when the gravel is sold or used by the local government or contractor. Arguably, this is greater value than that offered by the current policy of a set royalty for each cubic yard of gravel.

Please make our support of House Bill 89 a matter of the official record. Let us know if you need additional testimony to support this important legislation.

Sincerely,

Willard E. Dunham
Mayor
City of Seward

Phillip E. Oates, DBA
City Manager
City of Seward

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 97

Analysis

HB 97 would indefinitely extend the Invasive Weeds and Agriculture Pest Coordinator position within the Department of Natural Resources, Division of Agriculture. The authority for this position exists under AS 03.05.027, which will be automatically repealed on June 30, 2011 (Sec. 2 and 3, ch. 102, SLA 2008).

The Invasive Weeds and Agriculture Pest Coordinator position provides public information and education on invasive weed and pest control, conducts research on invasive weeds and pests, and represents the Division of Agriculture and the Department of Natural Resources on issues relating to the prevention, identification, and management of invasive species. This position is a Range 16, Natural Resource Specialist II located in Palmer.

Continued funding of the position would require $101,100 in annual operating expenditures, including $85,100 in personal services (one Range 16 NRS-II), $5,000 in travel (in-state travel for weed management and outreach), $5,000 in contractual services (technical assistance and facility operating expenses), and $6,000 in commodities (supplies, tools, and equipment) necessary to fulfill the duties outlined in AS 03.05.027.

REPRESENTATIVE CRAIG JOHNSON
RULES COMMITTEE CHAIRMAN

SPONSOR STATEMENT FOR HB 97

This bill will allow the Commissioner of Natural Resources to keep employed a state coordinator to manage and educate the citizens of Alaska on the subject of noxious weeds, invasive terrestrial plants, and agricultural pests. This coordinator works through the Division of Agriculture along with other state departments, agencies and institutions. This person brings together the aforementioned entities in addition to the University of Alaska Cooperative Extension Service and the Alaska Association of Conservation Districts.

Through this coordination the State of Alaska has begun to develop a strategic plan and requested Federal funding for survey projects. More importantly, a start toward limiting economic loss and adverse effects to the state's agricultural, natural, and human resources because of the presence and spread of noxious weeds, invasive terrestrial plants, and agricultural pests, in the state.

This bill repeals the sunset date of June 30, 2011.

Invasive Weeds and Agriculture Pest Management Coordinator: Overview of Accomplishments

Established in statute by HB 330 in 2008, the Invasive Weeds and Agricultural Pest Coordinator (Coordinator) within the Department of Natural Resources, Division of Agriculture, has worked across multiple agencies and jurisdictions to further invasive plant management. Accomplishments of note include furthering key program components; initiating weed management projects; coordinating with industry, agencies, local entities, Canada and other states; providing comments to agencies on proposed projects; providing technical assistance; and participating in public outreach. Below are examples of accomplishments in each of these categories.

Core Program Components: Strategic Plan development and Regulation Revision/Development
A strategic plan was developed with coordination and review of local, state, and federal entities. The plan is currently drafted and out for public review.

Regulations have been drafted and are being reviewed by the Commissioner's Office prior to a going out for the public review process.

Weed Management Projects
The Coordinator has initiated 4 priority invasive species control and eradication projects:

- Canada thistle management in Anchorage;
- Spotted knapweed eradication in Anchorage, Kenai, Kasilof, Kake, Prince of Wales, Ketchikan, Valdez, Haines and Skagway;
- Purple loosestrife replacement in Anchorage; and
- Giant Hogweed Eradication in Kake.

Industry Coordination
The Coordinator has worked with a number of industry groups and private sector companies on a range of invasive weeds and pest issues, including:

- horticulture industry to find solutions to identified problem species and vectors
- gravel producers through the Alaska Rock Products Association and Alaska Miners Association to develop a weed free gravel certification program
- agricultural producers and Soil and Water Conservation Districts to further the Weed Free Forage Certification Program by keeping records and organizing trainings for forage certifiers
- Alaska Wilderness Recreation and Tourism Association (AWRTA) to incorporate invasive species prevention and detection measures in their "Adventure Green" certification program
- pest control operators to develop presentations about state invasive weeds and agricultural pest management priorities at the pesticide applicator recertification class, 2009 and 2010

Agency Coordination
The Coordinator regularly works with state, federal, and local government employees to organize management of invasive weeds and agricultural pests. Examples of interagency coordination include:

- Participating in the Alaska Committee for Noxious and Invasive Plants Management (CNIPM) by organizing the annual conference, coordinating multiagency weed management efforts, and participating in subcommittees
- Participating in the Alaska Invasive Species Working Group (AISWG) meetings, and presently leading an effort to further formalize the group by establishing bylaws and an advisory board
- Being identified as lead in coordinating response to potential Spartina infestations
- Working with Alaska DOT, providing presentations at the annual Environmental Expo in 2009 and encouraging their involvement in local weed management projects around the state
- Furthering coordination with federal agencies through participation in several committees including the Alaska Pest Risk Assessment Committee, Weed Free Gravel Committee, Weed Free Forage Committee, and others.
- Coordinating early detection border inspections for state priority weeds with U.S. Customs and Borders Protection staff
- Assisting in annual Integrated Pest Management trainings for the Cooperative Extension Service
- Participating in the Alaska Coastal Management Plan working group

Local Coordination Efforts

The coordinator participates and facilitates local efforts to manage invasive weeds and agricultural pests by connecting organizations with similar efforts, focusing priorities, and providing assistance when necessary. Key examples of local coordination efforts include:

- Attended Cooperative Weed Management Area (CWMA) meetings around the state in person and by teleconference
- Helped to coordinate local response for Garlic Mustard and Spotted Knapweed eradication
- Coordinates with Soil and Water Conservation Districts attending local and statewide meetings
- Assisted AACD in hiring their invasive plants coordinator
- Assisted the Anchorage CWMA in developing a strategic plan for invasive plant management
- Participated in coordinating response to a newly discovered Elodea canadensis infestation in the Chena Slough in Fairbanks

Coordination with Canada and Other States

The Division of Ag has participated in coordination with the Yukon, British Columbia and Northwest Territories in Canada to share information and encourage management of high priority invasive weeds that threaten to spread to Alaska. Coordination with other states is done through participation in the Western Weed Coordinator Committee.

Comments on Agency Projects

The state coordinator has provided comments to federal agencies seeking to manage invasive weeds on federal lands to ensure state invasive weed management priorities are addressed and management is done with effective and safe methods. Comments to agencies have included:

- USDA 2009 priorities
- National Park Service Environmental Analysis for invasive plants management
- BLM scoping Environmental Analysis for weed management on the Dalton Highway
- USFWS Kodiak National Wildlife Refuge Environmental Analysis for invasive plant management

Comments were submitted on state projects and programs as well. Several DOT road construction projects have been commented on to include invasive plant management and prevention measures, often by request from DOT. The coordinator commented to DF&G that the scope of invasive species

issues eligible for funding from the Alaska Sustainable Salmon Fund be broadened from just pike to any invasive species with impacts to salmon.

Technical Assistance

Individuals and groups working on weed and pest management around the state are often dealing with these issues for the first time. The coordinator has worked to provide advice on controlling infestations in effective, economical, and safe ways. Examples of technical assistance provided include:

- Provided numerous recommendations for weed management and prevention at DOT's request
- Participated in the review committee for Alaska Association of Conservation Districts (AACD) Invasive Plant Program Grants
- Participated in ranking the invasiveness of invasive plants
- Provided guidance to Chugach State Park staff seeking to initiate invasive plant management
- Reviewed species included in a grass identification field guide and freshwater plants identification field guide
- Provided firsthand knowledge to USGS when modeling the spread of invasive plants in Alaska
- Reviewed strategic plan for Spartina prevention and management developed by NOAA
- Worked to develop protocol for an inventory of invasive weeds along the Trans Alaska Pipeline
- Provided assistance in project development to AACD Invasive Plant Program Coordinators
- Working with the Alaska Shorezone Committee who models habitat for invasive plants

Public Outreach and Presentations

Many people in Alaska are unfamiliar with the impacts invasive weeds and agricultural pests pose Alaska. The Coordinator works to provide information to the public to generate awareness and increase participation in prevention, detection, and management. Recent examples of public events which the Coordinator presented or participated in include:

- Mat- Su Salmon Science Symposium 2008 and 2009
- Fairbanks, Anchorage, and Kenai CWMA workshops
- Alaska Forum on the Environment 2009, 2010, and scheduled for 2011
- Alaska Citizen Scientist Teachers Workshop in 2010
- Lead tour of weeds on Chester Creek greenbelt in Anchorage
- Invasive plants impacts to salmon and moose, the Eagle River Nature Center, September 2010
- Alaska Wilderness Recreation and Tourism Association annual conference, 2009
- Alaska Greenhouse and Nursery Conference, 2009

Grant Writing

The coordinator has worked to secure additional funds and grants from partnering agencies and other sources to assist the state in meeting its weed and pest management goals. Examples of such grants include:

- USFWS ARRA project grant to eradicate spotted knapweed (awarded $100,000)
- USFS Forest Health Protection grant for coordination with horticultural industry (awarded $80,000)
- USFS Forest Health Protection grant for management of Canada thistle in Anchorage (awarded $8,000)
- National Fish and Wildlife Foundation grant for management of Canada thistle in Anchorage (awarded $80,000 but returned because matching funds were not appropriated)
- BLM grant for gravel pit inventory and initiation of a weed-free gravel certification program (awarded $20,000)

December 1, 2010

The Honorable Sean Parnell
P.O. box 110001
Juneau, AK 99801

Dear Governor Parnell:

Re: AS 03.05.027: Noxious weed, invasive plant and agricultural pest management and education

Globally, invasive plants, agricultural pests and other species of invasive organisms impact ecosystems, ecosystem services, and economies that in the United States alone result in over $130 billion in losses and associated management costs each year. Alaska lags other states in coordinating prevention, monitoring, mitigation and education to reduce the threats and impacts of invasives, but Alaska does have some programs of value in our efforts to confront this growing problem. One such program is instituted under AS 03.05.027: Noxious weed, invasive plant and agricultural pest management and education. However, this Statute includes Sec. 2. Repealing the Act; and Sec. 3. setting an effective date for the repeal as June 30, 2011.

We would like to ask you to consider the impacts repeal of this Act will have on Alaska's ability to address both the threat and the realities of invasive plants and agricultural pests in Alaska. As the Director of Conservation for the Alaska SeaLife Center and having charge over our marine invasive species program, I engage various Federal and State staff in invasive species planning and action and with industry and communities on initiatives to reduce the many threats posed by introduction of non native species. It will be a great loss to the State in managing invasive plants and our coordinating activities if AS 03.05.027 sunsets. We would therefore respectfully request your intervention to repeal Sec. 3. of this Act and assure a sustaining budget is approved to uphold the very important objectives, staffing and actions so necessary under the Statute.

I will be pleased to speak with you or anyone else who can help make a difference in building the State capacity to address the growing problem of invasive species that impact and threaten our State and its ecosystems and economies.

Sincerely,

Howard Ferren
Director of Conservation

Alaska Committee for Noxious and Invasive Plants Management

December 3rd, 2010

State of Alaska
Office of the Governor
P.O. Box 11001
Juneau, AK 99811-0001
3rd Floor State Capital

Subject: continue funding for AS 03.05.027 and remove sunset clause

Dear Governor Parnell:

Compared to the lower 48, Alaska has far fewer non-native invasive plant species. With swift and strategic management of our invasive weeds, Alaska has a rare opportunity to avoid severe economic and ecological impacts that have occurred in other parts of the country.

The Alaska Committee for Noxious and Invasive Plants Management (CNIPM) appreciates the excellent work that has resulted from AS 03.05.027, which pertains to Division of Agriculture's invasive weed and agricultural pest program. Since signing this statute into law, the Division of Agriculture has undertaken a significant role in collaboration and management of high-priority invasive plant species in Alaska. Unfortunately, AS 03.05.027 will sunset in the spring of 2011. CNIPM supports continued funding of AS 03.05.027 and recommends the removal of its sunset clause.

CNIPM is composed of concerned citizens, scientists, and land managers that volunteer or work for non-profit, tribal, local, state, and federal agencies across Alaska. The goals of CNIPM are to heighten the awareness of problems associated with invasive plant species and to bring about greater statewide coordination, cooperation, and action to halt the introduction and spread of these undesirable plants. To learn more about the mission and goals of CNIPM, please visit www.uaf.edu/ces/cnipm.

Without continued funding of AS 03.05.027, CNIPM believes regular review of regulations and the strategic plan generated from this statute will cease and quickly become outdated. When signing AS 03.05.027 into law, the state recognized that pre-existing invasive plant regulations were outdated and ineffective and that the creation of a strategic plan with updated regulations would increase efficacy of invasive plant management in Alaska. As the type and abundance of invasive weeds are constantly changing in Alaska, the state should regularly review both documents. Consistent review will increase the likelihood of the state pursuing the most urgent and meaningful management priorities for invasive plant species in Alaska.

CNIPM greatly appreciates the new level of cooperation and coordination from the state government, which we feel is a direct result of AS 03.05.027. In years past, CNIPM had

minimal contact with the DNR, likely a result of state employees having a full load of job duties. AS 03.05.027 created a dedicated invasive plant management position within the Division of Agriculture. As a result, CNIPM now has a DNR contact that regularly attends monthly teleconferences and collaborates on education and management projects.

CNIPM is particularly pleased with Division of Agriculture leading projects that involve private industries and state-wide management efforts of notorious invasive plant species. First, Division of Agriculture is leading a CNIPM subcommittee geared towards the creation of a weed free gravel certification program. Second, Division of Agriculture is working with the horticulture industry to find solutions to state-wide invasive plant issues. Finally, Division of Agriculture is leading efforts in the state-wide eradication of spotted knapweed, giant hogweed, and regional management of Canada thistle, all of which have a serious potential to impact economies in Alaska.

While much work remains, CNIPM believes that AS 03.05.027 has resulted in Division of Agriculture making valuable contributions to invasive plant problems across Alaska. In particular, CNIPM feels AS 03.05.027 has directly improved invasive plant species regulations and strategic planning, DNR coordination with CNIPM, collaboration with private industries in the pursuit of solutions to invasive plant problems, and management of notorious invasive weeds. To continue and progress on the great work accomplished by Division of Agriculture, CNIPM urges for continued funding of AS 03.05.027.

Sincerely,

Blaine Spellman

Blaine T. Spellman
Chair, CNIPM Board of Directors

Subject: Regarding HB97

We are Troy and Lori Zaumseil and are writing to request that you support the passage of HB97 which will allow the Division of Ag to retain the statewide coordinator position, addressing noxious weeds and invasive plants. The bill is set to be heard in the House Resources Committee on Monday and move forward from there. Alaska is at such a critical place in preventing/managing the economic and ecological impact from invasive threats and maintaining the continuity of efforts is imperative.

Troy and I became involved in this issue several years ago when we found a Canada Thistle growing in a plant we purchased at a local box store. This extremely noxious and invasive plant was covered by Alaska statute (albeit a very old and outdated one), and yet when we tried to make a report to the Division of Agriculture, we were disturbed to find that they had neither staff nor funding to follow up on this serious situation. That began a journey for us as concerned citizens, property owners, gardeners, outdoors people and voters. After contacting the legislative body, we also began speaking--first to community councils then to state conventions (Alaska Forum on the Environment, CNIPM, Master Gardeners, etc) and eventually we were invited to address the opening session of the National Invasive Weeds Awareness Week in Washington D.C. to talk about Alaska's fight to protect valuable resources from invasion. During that first year, HB330 was introduced by Rep Craig Johnson and later passed unanimously by the Alaska Legislature in a demonstration of how the system CAN work for ordinary citizens who ask their representatives to protect their interests and then those elected officials take action. Troy and I have spoken about our involvement and pride in our Alaska system in presentations we have given all over Alaska and Outside, not only in D.C., but in Nevada, Oregon and Florida as well. We were asked by US Fish and Wildlife Service to speak in Allakaket, Bettles and Coldfoot this past summer and were able to educate residents of interior Alaska on the threats to their way of life posed by invasive species. Without an organized statewide program, Alaska will not be eligible for federal funding and the individual efforts of state and federal agency staffers will be far less effective. We ask you, once again, to protect the citizens you serve by voting for HB97 and allowing this work to continue uninterrupted. Prevention and Early detection are the most economical and efficient method to address the problem. Delay or disruption would certainly result in higher cost to the state's taxpayers.

In addition, we are asking that you request action be taken by the State Department of Transportation. Travel corridors are the proven vector for invasive species to move through and into an area, and Alaska is extremely vulnerable to this scenario. It is imperative that DOT take positive action to PREVENT the spread of invasives and no longer be the passive conduit to ALLOW the spread. Roadways all over the state have noxious plants growing in the right of ways and airports also have infestations, and all of these are allowing noxious weeds to be spread into pristine areas that are defenseless when these seeds and plant parts are transported through or onto them. The Department needs to be given a mandate to address this issue so that their budget allocations can be made accordingly. The DEC approval process to treat noxious weeds is so cumbersome as to be nearly ineffective and needs to be streamlined to allow effective and efficient treatment. While Troy and I are not versed in the workings of state bureaucracy, we are confident that those in receipt of this e-mail will be able to take the necessary steps to bring DOT and DEC into step with assisting in the problem and not adding to it.

Thank you so much for your time and attention

Lori and Troy Zaumseil
9015 Dewberry St
Anchorage, AK 99502

A Brief Report on the Alaska Invasive Plants Project

A $1.14 million Recovery Act grant from the USDA Forest Service to Alaska Association of Conservation Districts

In September of 2009, the Alaska Association of Conservation Districts entered into a cooperative agreement with the US Forest Service to accept $1.14 million to implement the Alaska Invasive Plants Project. The overall goal of any Recovery Act funds is to create jobs and equip those hired with the skills and training needed to move into better, more permanent employment.

The purpose of this project was to oversee and coordinate invasive plant programs throughout Alaska via coordinator positions stationed in Soil and Water Conservation Districts. IP coordinators received training in issues related to invasive plant surveying, control and management, as well as training in public outreach methods and grant writing. Supported by a roving weed crew, the coordinators conducted invasive plant surveys, control, education and outreach projects in their regions. The purpose was to generate high-quality jobs, with high priority placed on training so that these jobs would function as springboards to future employment.

In addition, AACD contracted the Alaska Natural Heritage Program through the University of Alaska to conduct the second phase of the Alaska invasiveness ranking project. The ANHP ranking system has provided land managers, agencies and the general public with a valuable tool for invasive plant management prioritization. Expanding the list of species screened by this system strengthens our ability to protect and manage Alaska's natural areas and resources.

A total of 18 people have been employed through this project: 14 for a year or more, and three more as a summer roving work crew. In the course of the project, a project manager, 13 invasive plant coordinators, and a research analyst were hired and trained. The staff were scattered around the state, as shown on this map. Locations were: Wasilla, Palmer, Upper Susitna, Kenai, Kodiak, Homer, Seward, Aniak, Dillingham, Metlakatla, Juneau, Cordova, Fairbanks and Delta Junction.

The project has been successful beyond our expectations. More than 2,000 students and 5,000 adults were provided with information about invasive plants, their effect on Alaska's natural habitat, and how to control them. Nearly 1,000 volunteers worked on remediation projects. Over 1,000 bags of weeds were removed around the state, and over 100 acres were treated by various means, including pulling, digging, spraying, burning, tarping and whacking. Over 5,000 acres were surveyed for invasive plant infestations, and thousands of new records were provided to the Alaska Natural Heritage Program for inclusion in its database. We established relationships in numerous rural villages, including two that are developing distinct Native conservation districts, and provided training and remediation plans through

the Yukon-Kuskokwim Delta and in the community of Tyonek. We provided written work plans for numerous private and public property owners and managers, including a community garden, several municipalities, an arboretum, a number of farmers, and many others.

Of the 15 regular employees hired, eight were unemployed at the time they were hired, and another four were underemployed. At this time, four of the 15 have secured funding for future employment and two others have decided to pursue other plans. We have provided grant-writing training to all employees and are encouraging them to pursue new sources of funds to expand the work on identifying and reducing invasive plants in Alaska. Our goal is to replace the 15 full-time and 3 part-time jobs we will lose at the end of this grant with 30 new jobs in Alaska. We are hopeful that we will find funding for at least half our goal by the time most of the ARRA-funded employees go off payroll at the end of March.

Although we are proud of the work we have accomplished with this grant, we believe that the field work and outreach successes will be ephemeral unless the work is followed up for at least two more years. Many of the plants we worked to reduce or eliminate are known to be resilient and to require follow-up treatment for three to five years, some even longer. Unless this work is taken up by others or funded by similar projects, we fear that what we have gained in the fight against invasive plants this past year will be lost.

In addition to continuation of the work funded by this grant, we see another pressing concern that is in its infancy in Alaska: the identification and remediation of aquatic invasives. The discovery last summer of a serious infestation in the Chena Slough near Fairbanks, and the anecdotal reports of aquatic invasives in other areas of Alaska bring us grave concern. We hope that, at a minimum, a comprehensive statewide survey for aquatic invasives is begun in the very near future.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. CSHB104 (RLS)

Analysis

The bill changes the name of the Alaska Merit Scholarship program to the Alaska Performance Scholarship program in the applicable statutes. The bill repeals and reenacts AS 14.43.825(f) which now prohibits the commission from awarding new scholarship applicants if insufficient funds are available to pay existing awards and the existing awards will be prorated. AS 14.43.830 (qualified postsecondary institutions) is amended to include requirements that institutions have advisory programs and provide counseling related to course selection and career choice to incoming student and proved credits that will result in the issuance of a degree or certificate within a customary time period.

The bill will establish a new income account and fund for the AlaskaAdvantage education grant and Alaska performance scholarship award. The amounts appropriated to the fund may not exceed the greater of $40 million or an amount when added to the fund balance equals $160 million. The department is required to distribute one-third of the fund or $40 million whichever is less. The bill provides transition language so the $40 million limit may be substituted for the following amounts and fiscal years:

FY2012, $20,000,000
FY2013, $30,000,000.

The tax credits allowed in AS 43.20.014(a) would be expanded to include credits for cash contributions accepted for the Alaska performance scholarship investment fund.

The bill changes the name of the Alaska merit scholarship program to the Alaska performance scholarship and leaves the scholarship awards unchanged so there is no fiscal impact to the Department of Education & Early Development.

Why this fiscal note differs from previous version (if initial version, please note as such)

This revised fiscal note restores the $4.9 million that the Senate Sub-Committee removed from the Governor's FY13 operating budget **(bringing total FY13 funding to $8 million)**. The funding source will be changed to the Scholarship Fund if this bill is adopted and the new fund code is established.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** HB 104
2012 LEGISLATIVE SESSION

Analysis

The committee substitute bill establishes award income accounts and an investment fund, the earnings from which will pay out Alaska performance scholarships (APS) and AlaskAdvantage education grants (AEG); and, establishes a proportional allocation of funding structure with two-thirds of each year's appropriation allocated to APS and onethird of the appropriation to AEG.

Assumptions for the APS participation projections below include:

Student eligibility rates increase over time from 28% to 44% of high school graduates.
APS utilization rates increase over time from 36% to 50%.
Average award amount is $3,419.

APS estimates:

#APS Projected Student Headcount by Cohort Year

CY1	CY2	CY3	CY4	CY5	CY6	Total Annual Costs
FY13	1,273	1,067				$ 8,000.0
FY14	1,181	1,082	1,120			$11,566.0
FY15	1,157	1,003	1,049	1,041		$14,558.0
FY16	1,296	983	933	1,049	456	$16,240.0
FY17	1,296	1,101	914	933	534	129 $16,161.0

Why this fiscal note differs from previous version (if initial version, please note as such)

This fiscal note differs in that estimates reflect amendments to HB104 which create an allocation of annual appropriations from the investment fund to pay for Alaska performance scholarships (APS) and for AlaskAdvantage education grants (AEG). The $3,000.0 shown as FY13 costs is included in the Governor's FY13 base budget request.

FISCAL NOTE

STATE OF ALASKA
2012 LEGISLATIVE SESSION

BILL NO. SCSHB104 DRAFT

Analysis

The committee substitute establishes award income accounts and an investment fund, the earnings from which will pay for APS and AEG awards to students; and, establishes a proportional allocation of funding structure with two-thirds of each year's appropriation allocated to APS and one-third of the appropriation allocated to AEG.

Based on the structure described above, the annual allocated amounts for AEG are shown below. These estimates are derived by assuming all APS-eligible students applying to use their award are fully funded. Also shown are the projected number of AEG recipients based upon an average individual annual award amount of $1,580:

	Funding Allocation	#AEG Recipients
FY13	$ 3,000.0	1,899
FY14	$ 5,783.0	3,660
FY15	$ 7,279.0	4,607
FY16	$ 8,120.0	5,139
FY17	$ 8,080.0	5,114
FY18	$ 8,520.0	5,392
FY19	$ 9,035.0	5,718
FY20	$ 9,450.0	5,981
FY21	$ 9,596.0	6,073
FY22	$ 9,835.0	6,225
FY23	$10,095.0	6,389
FY24	$10,226.0	6,472

It is important to note that AEG awards are made relative to the pool of applicants specific to a given academic year. Unlike the APS, there is no implied continuing obligation that an individual awarded an AEG in a given year will receive it in a subsequent year. The applicant pool is ranked in order of greatest to least financial need and AEGs are awarded until available funds are exhausted or all eligible applicants are awarded, whichever occurs first.

FISCAL NOTE

STATE OF ALASKA **BILL NO.** SCS CSHB104
2012 LEGISLATIVE SESSION

Analysis

Bill Language:
This bill expands the existing education tax credit allowed against the corporate income, oil and gas production and property, mining license, and fisheries business and landing taxes to include contributions made to the newly created Alaska Higher Education Investment Fund under AS 37.14.750.

Revenues:
This bill does not increase or decrease the amount of total education tax credits allowed against the tax types identified above. It merely identifies an additional class of contributions that can qualify for the credit. It is possible that taxpayers who have not made qualifying contributions and not claimed an education tax credit in the past, may contribute to the higher education fund and claim a credit. However, it is difficult to determine the affect this bill will have on taxpayer behavior and, therefore, it is difficult to determine if this bill will affect tax revenues from the taxes identified above.

Expenditures:
Department of Revenue can implement and administer the provisions of this bill utilizing existing resources.

SENATE CS FOR CS FOR HOUSE BILL NO. 104(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act renaming the Alaska performance scholarship and relating to the scholarship and tax credits applicable to contributions to the scholarship; relating to AlaskAdvantage education grant funding and to Alaska performance scholarship funding; relating to AlaskAdvantage education grant eligibility; establishing accounts and a fund for those purposes; making conforming amendments; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.03.113 is amended to read:

Sec. 14.03.113. District determination of scholarship eligibility. A school district shall determine whether a student who graduates from a high school in the district is eligible for an award of an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship under AS 14.43.810 - 14.43.849. If a student is eligible, the district shall state in the student's permanent record the highest level of funding for

which the student is eligible. A district shall provide a student with an opportunity to request that the district correct an error in the eligibility determination.

*** Sec. 2.** AS 14.43.415(a) is amended to read:

(a) For an applicant to be eligible for a grant under AS 14.43.400 - 14.43.420, the applicant must be

(1) a resident of this state;

(2) enrolled or about to be enrolled

(A) at an institution **located in the state that is**

(i) accredited by an institutional accrediting body recognized by the United States Secretary of Education; or

(ii) approved to participate in the Alaska performance scholarship program as a qualified postsecondary institution under AS 14.43.830 [APPROVED TO PARTICIPATE IN FEDERAL FINANCIAL AID PROGRAMS UNDER 20 U.S.C. 1070 - 1099c-2, AS AMENDED, LOCATED IN THIS STATE]; and

(B) on at least a half-time basis; and

(3) able to demonstrate financial need in accordance with standards for determining financial need established by the commission [UNDER 20 U.S.C. 1070c-2, AS AMENDED].

*** Sec. 3.** AS 14.43.810 is amended to read:

Sec. 14.43.810. Alaska performance [MERIT] scholarship program established; regulations. (a) The Alaska **performance** [MERIT] scholarship program is established to provide scholarships for **Alaska residents who have attained an Alaska High School Diploma by Examination after January 1, 2011, or who are** high school graduates [WHO ARE ALASKA RESIDENTS] to attend a qualified postsecondary institution in the state.

(b) The department shall, in consultation with the commission, adopt regulations necessary to implement the **Alaska performance scholarship** program. The commission shall administer the daily operations of the **Alaska performance scholarship** program and financing of the **Alaska performance scholarship** program, including the procedures for applying for the scholarships, establishing standards for

and ensuring continuing compliance with programmatic standards, and requiring students to apply for other nonloan financial aid, consistent with federal law.

*** Sec. 4.** AS 14.43.820(a) is amended to read:

(a) Subject to appropriation, the commission shall award an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship to an applicant who

(1) is a resident of the state as defined in AS 01.10.055;

(2) **except as provided in (c) of this section,** graduated or will graduate within six months from a high school in the state;

(3) **except as provided in (d) of this section,** has completed a core academic curriculum **of** [IN] high school **level coursework** that includes

(A) four years of mathematics, four years of language arts, four years of science, and four years of social studies, one year of which may include a foreign language, an Alaska Native language, fine arts, or cultural heritage; or

(B) three years of mathematics, four years of language arts, three years of science, four years of social studies, and two years of a foreign language or an Alaska Native language;

(4) **except as provided in (c) of this section,** has a minimum grade-point average in high school of 2.5 or higher; the department shall set by regulation minimum requirements based on a substantially similar standard for districts that do not assign grades;

(5) has achieved a minimum score on a

(A) college entrance examination; or

(B) standardized examination designed to measure a student's level of preparedness to make the transition to work, as selected by the department; and

(6) is enrolled in good standing in a course of study at a qualified postsecondary institution in this state that is intended to result in the award of a certificate or degree.

*** Sec. 5.** AS 14.43.820 is amended by adding new subsections to read:

(c) Notwithstanding the eligibility requirements in (a)(2) and (4) of this

section, the department shall adopt regulations to provide for the eligibility of a student who has attained an Alaska High School Diploma by Examination in the state.

(d) The commissioner shall waive a portion of the core academic requirements specified under (a)(3) of this section for not more than 12 additional months after a student graduates from a high school in the state or 24 months after a student attains an Alaska High School Diploma by Examination to provide an eligible applicant the opportunity to complete the academic requirements at a qualified postsecondary institution using a scholarship awarded under AS 14.43.825(a) or at a public high school in the state with a district sponsorship under (g) of this section if the applicant submits a timely application on a form approved by the commissioner and, for an applicant who has graduated from a high school in the state, provides satisfactory proof that the applicant was unable to complete the academic requirements under (a)(3) of this section as a result of circumstances beyond the applicant's control, including

(1) illness or disability;

(2) a lack of reasonable access to the required coursework at a small or remote high school attended by the applicant in the state; and

(3) other circumstances prescribed by regulation adopted by the board.

(e) The commissioner shall approve or deny an application for a waiver submitted under (d) of this section within 30 days after receiving the application.

(f) An applicant who receives a waiver under (d) of this section, shall, within the time granted for the waiver, provide satisfactory proof to the commissioner of completion of the core academic requirements specified under (a)(3) of this section.

(g) Notwithstanding a contrary provision in this title, a school district that agrees to sponsor a student for a waiver under (d) of this section may include a student who has been approved for a waiver under (d) of this section in the student count conducted under AS 14.17.600 as a full-time or part-time student if the student attends a school in the district for the purpose of completing the core academic requirements under (a)(3) of this section.

(h) In this section, "district" has the meaning given in AS 14.17.990.

*** Sec. 6.** AS 14.43.825(a) is amended to read:

(a) The maximum annual awards for the Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarships are as follows:

(1) the first award level is $4,755 and requires a

(A) 3.5 grade-point average or above **or a total score in the 90th percentile or above on the general educational development examination;** and

(B) [A] very high minimum score on a college entrance examination;

(2) the second award level is $3,566 and requires a

(A) 3.0 grade-point average or above **or a total score in the 80th percentile or above on the general educational development examination;** and

(B) [A] high minimum score on a college entrance examination;

(3) the third award level is $2,378 and requires a

(A) 2.5 grade-point average or above **or a total score in the 70th percentile or above on the general educational development examination;** and

(B) [A] moderately high minimum score on a college entrance examination.

*** Sec. 7.** AS 14.43.825(b) is amended to read:

(b) A student's eligibility for a scholarship terminates six years after the date the student **graduates** [GRADUATED] from high school **or attains a State of Alaska High School Diploma by Examination,** unless the student qualifies for an extension of time allowed by the department by regulation.

*** Sec. 8.** AS 14.43.825(f) is repealed and reenacted to read:

(f) Payment of a scholarship is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible scholarships, the commission may not award a scholarship to a new applicant, and the commission shall pay existing awards on a pro rata basis for that fiscal year.

* **Sec. 9.** AS 14.43.830 is amended to read:

Sec. 14.43.830. Qualified postsecondary institutions. (a) The following institutions are qualified postsecondary institutions for purposes of awarding an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship:

(1) a university or college physically located in the state that [IS]

(A) **is** authorized to operate in the state under AS 14.48.020 or is exempt from authorization under AS 14.48.030(b)(1); [AND]

(B) **is** accredited by a regional **or national** accreditation association;

(C) has an advisory program established for incoming students that provides counseling related to course selection, career choice, and personal challenges; and

(D) provides courses and credits that can result in the issuance of a degree or certificate available at the institution within a time frame expected for that degree or certificate;

(2) a career and technical school program physically located in the state that **meets the standards established in (a)(1)(C) and (D) of this section and that** has been included on a list of certified career and technical school programs received from the Department of Labor and Workforce Development; the commission shall publish the list on or before June 30 of the year preceding enrollment.

(b) The Department of Labor and Workforce Development shall, in consultation with the Department of Education and Early Development, adopt regulations under AS 44.62 (Administrative Procedure Act) establishing criteria under which the Department of Labor and Workforce Development shall certify career and technical school programs in the state as eligible to participate in the Alaska **performance** [MERIT] scholarship program.

* **Sec. 10.** AS 14.43.849(4) is amended to read:

(4) "program" means the Alaska **performance** [MERIT] scholarship program established under AS 14.43.810 - 14.43.849;

* **Sec. 11.** AS 14.43 is amended by adding a new section to read:

Sec. 14.43.915. AlaskAdvantage education grant account and Alaska

performance scholarship award account. (a) The AlaskAdvantage education grant account is created as an account in the general fund. Money may be appropriated to the account from the Alaska higher education investment fund under AS 37.14.750 and from other sources. The commission may use the money in the account to pay grants awarded under AS 14.43.400 - 14.43.420.

(b) The Alaska performance scholarship award account is created as an account in the general fund. Money may be appropriated to the account from the Alaska higher education investment fund under AS 37.14.750 and from other sources. The commission may use the money in the account to pay scholarships awarded to students under AS 14.43.810 - 14.43.849.

(c) Of the total amount available annually to the commission for payment of grants under AS 14.43.400 - 14.43.420 and for payment of scholarships under AS 14.43.810 - 14.43.849, one-third of the combined amount in the accounts established under (a) and (b) of this section shall be available solely for payment of grants awarded under AS 14.43.400 - 14.43.420. The commission shall annually allocate to all qualified applicants for scholarships awarded under AS 14.43.810 - 14.43.849 two-thirds of the combined amount in the accounts. If an insufficient number of qualified applicants are awarded scholarships under AS 14.43.810 - 14.43.849 before September 1 of each fiscal year, the balance of the account established in (b) of this section shall be transferred to the account established in (a) of this section for the payment of grants under AS 14.43.400 - 14.43.420 for that year. If an insufficient number of qualified applicants are awarded grants under AS 14.43.400 - 14.43.420 before the end of that fiscal year, the commissioner shall redeposit the remaining funds into the Alaska higher education investment fund established under AS 37.14.750.

(d) The commission shall reserve a percentage calculated under this subsection of the total amount available for awards in the accounts established under (a) and (b) of this section each year for award to students who graduate from a school district with an ADM of less than 800 or from a school that was operated by the Alaska State-Operated School System established under former AS 14.08.020. The percentage reserved under this subsection shall be calculated by adding the ADMs of

districts with an ADM of less than 800 and the number of students enrolled in a school that was operated by the Alaska State-Operated School System established under former AS 14.08.020 that is located in a district with an ADM of 800 or more and then dividing that number by the sum of the ADMs of all districts in the state.

(e) If an insufficient number of applicants apply for the available amount reserved under (d) of this section, the commission shall redeposit the remaining amount in the account from which the funds originated.

(f) In this section,

(1) "ADM" has the meaning given in AS 14.17.990;

(2) "district" has the meaning given in AS 14.17.990, but also includes a state boarding school under AS 14.16.

*** Sec. 12.** AS 14.45.130(a) is amended to read:

(a) A religious or other private school that elects to comply with AS 14.45.100 - 14.45.130 shall maintain permanent student records reflecting immunizations, physical examinations, standardized testing, academic achievement, courses taken at the school, and level of eligibility for an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship under AS 14.43.810 - 14.43.849.

*** Sec. 13.** AS 37.14 is amended by adding a new section to read:

Article 8A. Alaska Higher Education Investment Fund.

Sec. 37.14.750. Alaska higher education investment fund established. (a) The Alaska higher education investment fund is established in the general fund for the purpose of making grants awarded under AS 14.43.400 - 14.43.420 by appropriation to the account established under AS 14.43.915(a) and of making scholarship payments to qualified postsecondary institutions for students under AS 14.43.810 - 14.43.849 by appropriation to the account established under AS 14.43.915(b). Money in the fund does not lapse. The fund consists of

(1) money appropriated to the fund;

(2) income earned on investment of fund assets;

(3) donations to the fund; and

(4) money redeposited under AS 14.43.915(c).

(b) The legislature may appropriate any amount to the fund established in (a)

of this section. Nothing in this section creates a dedicated fund.

(c) As soon as is practicable after July 1 of each year, the commissioner of revenue shall determine the market value of the fund established in this section on June 30 for the immediately preceding fiscal year. The commissioner shall identify 10 percent of that amount as available for appropriation as follows:

(1) one-third for the grant account established under AS 14.43.915(a), from which the Alaska Commission on Postsecondary Education may award grants; and

(2) two-thirds for the scholarship account established under AS 14.43.915(b), from which the Alaska Commission on Postsecondary Education may award scholarships.

(d) In this section, unless the context requires otherwise, "fund" means the Alaska higher education investment fund established in (a) of this section.

*** Sec. 14.** AS 43.20.014(a) is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 15.** AS 43.20.014(a), as amended by sec. 14, ch. 92, SLA 2010, is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 16.** AS 43.55.019(a) is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a

nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 17.** AS 43.55.019(a), as amended by sec. 21, ch. 92, SLA 2010, is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 18.** AS 43.56.018(a) is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-

year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 19.** AS 43.56.018(a), as amended by sec. 28, ch. 92, SLA 2010, is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 20.** AS 43.65.018(a) is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 21.** AS 43.65.018(a), as amended by sec. 35, ch. 92, SLA 2010, is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 22.** AS 43.75.018(a) is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 23.** AS 43.75.018(a), as amended by sec. 42, ch. 92, SLA 2010, is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 24.** AS 43.77.045(a) is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government; **and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 25.** AS 43.77.045(a), as amended by sec. 49, ch. 92, SLA 2010, is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school; **and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 26.** Section 8, ch. 14, SLA 2010, is repealed.

*** Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: ALASKA HIGHER EDUCATION INVESTMENT FUND. The Alaska higher education investment fund established in AS 37.14.750, enacted by sec. 12 of this Act, is the fund identified in sec. 20(f), ch. 5, FSSLA 2011.

*** Sec. 28.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Education and Early Development, the Department of Labor and Workforce Development, the Department of Revenue, and the Alaska Commission on Postsecondary Education may adopt regulations

necessary to implement changes made to their respective authorities by this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before July 1, 2012.

*** Sec. 29.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes is instructed to change the

(1) heading of art. 12 of AS 14.43 from "Alaska Merit Scholarship Program" to "Alaska Performance Scholarship Program";

(2) catch line for AS 14.43.820 from "Alaska merit scholarship program; eligibility" to "Alaska performance scholarship program; eligibility."

*** Sec. 30.** Sections 2, 4, 5 - 7, and AS 14.43.915(d) and (e), added by sec. 11 of this Act, take effect April 1, 2013.

*** Sec. 31.** AS 14.43.830(a)(1)(C) and (D), added by sec. 9 of this Act, and the amendment to AS 14.43.830(a)(2) made by sec. 9 of this Act take effect July 1, 2013.

*** Sec. 32.** Sections 15, 17, 19, 21, 23, and 25 of this Act take effect January 1, 2021.

*** Sec. 33.** Except as provided in secs. 30 - 32 of this Act, this Act takes effect immediately under AS 01.10.070(c).

SENATE CONCURRENT RESOLUTION NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Introduced:
Referred:

A RESOLUTION

Suspending Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, concerning House Bill No. 104, renaming the Alaska performance scholarship and relating to the scholarship and tax credits applicable to contributions to the scholarship; relating to AlaskAdvantage education grant funding and to Alaska performance scholarship funding; establishing an account and fund for those purposes; and making conforming amendments.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

That under Rule 54, Uniform Rules of the Alaska State Legislature, the provisions of Rules 24(c), 35, 41(b), and 42(e), Uniform Rules of the Alaska State Legislature, regarding changes to the title of a bill, are suspended in consideration of House Bill No. 104, renaming the Alaska performance scholarship and relating to the scholarship and tax credits applicable to contributions to the scholarship; relating to AlaskAdvantage education grant funding and to Alaska performance scholarship funding; establishing an account and fund for those purposes; and making conforming amendments.

27-GH1893\S
Mischel
3/28/12

Adopted 03/30/12

SENATE CS FOR CS FOR HOUSE BILL NO. 104(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act renaming the Alaska performance scholarship and relating to the scholarship and tax credits applicable to contributions to the scholarship; relating to AlaskAdvantage education grant funding and to Alaska performance scholarship funding; relating to AlaskAdvantage education grant eligibility; establishing accounts and a fund for those purposes; making conforming amendments; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.03.113 is amended to read:

Sec. 14.03.113. District determination of scholarship eligibility. A school district shall determine whether a student who graduates from a high school in the district is eligible for an award of an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship under AS 14.43.810 - 14.43.849. If a student is eligible, the district shall state in the student's permanent record the highest level of funding for

New Text Underlined [DELETED TEXT BRACKETED]

which the student is eligible. A district shall provide a student with an opportunity to request that the district correct an error in the eligibility determination.

*** Sec. 2.** AS 14.43.415(a) is amended to read:

(a) For an applicant to be eligible for a grant under AS 14.43.400 - 14.43.420, the applicant must be

(1) a resident of this state;

(2) enrolled or about to be enrolled

(A) at an institution **located in the state that is**

(i) accredited by an institutional accrediting body recognized by the United States Secretary of Education; or

(ii) approved to participate in the Alaska performance scholarship program as a qualified postsecondary institution under AS 14.43.830 [APPROVED TO PARTICIPATE IN FEDERAL FINANCIAL AID PROGRAMS UNDER 20 U.S.C. 1070 - 1099c-2, AS AMENDED, LOCATED IN THIS STATE]; and

(B) on at least a half-time basis; and

(3) able to demonstrate financial need in accordance with standards for determining financial need established by the commission [UNDER 20 U.S.C. 1070c-2, AS AMENDED].

*** Sec. 3.** AS 14.43.810 is amended to read:

Sec. 14.43.810. Alaska performance [MERIT] scholarship program established; regulations. (a) The Alaska **performance** [MERIT] scholarship program is established to provide scholarships for **Alaska residents who have attained an Alaska High School Diploma by Examination after January 1, 2011, or who are** high school graduates [WHO ARE ALASKA RESIDENTS] to attend a qualified postsecondary institution in the state.

(b) The department shall, in consultation with the commission, adopt regulations necessary to implement the **Alaska performance scholarship** program. The commission shall administer the daily operations of the **Alaska performance scholarship** program and financing of the **Alaska performance scholarship** program, including the procedures for applying for the scholarships, establishing standards for

and ensuring continuing compliance with programmatic standards, and requiring students to apply for other nonloan financial aid, consistent with federal law.

*** Sec. 4.** AS 14.43.820(a) is amended to read:

(a) Subject to appropriation, the commission shall award an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship to an applicant who

(1) is a resident of the state as defined in AS 01.10.055;

(2) **except as provided in (c) of this section,** graduated or will graduate within six months from a high school in the state;

(3) **except as provided in (d) of this section,** has completed a core academic curriculum **of** [IN] high school **level coursework** that includes

(A) four years of mathematics, four years of language arts, four years of science, and four years of social studies, one year of which may include a foreign language, an Alaska Native language, fine arts, or cultural heritage; or

(B) three years of mathematics, four years of language arts, three years of science, four years of social studies, and two years of a foreign language or an Alaska Native language;

(4) **except as provided in (c) of this section,** has a minimum grade-point average in high school of 2.5 or higher; the department shall set by regulation minimum requirements based on a substantially similar standard for districts that do not assign grades;

(5) has achieved a minimum score on a

(A) college entrance examination; or

(B) standardized examination designed to measure a student's level of preparedness to make the transition to work, as selected by the department; and

(6) is enrolled in good standing in a course of study at a qualified postsecondary institution in this state that is intended to result in the award of a certificate or degree.

*** Sec. 5.** AS 14.43.820 is amended by adding new subsections to read:

(c) Notwithstanding the eligibility requirements in (a)(2) and (4) of this

section, the department shall adopt regulations to provide for the eligibility of a student who has attained an Alaska High School Diploma by Examination in the state.

(d) The commissioner shall waive a portion of the core academic requirements specified under (a)(3) of this section for not more than 12 additional months after a student graduates from a high school in the state or 24 months after a student attains an Alaska High School Diploma by Examination to provide an eligible applicant the opportunity to complete the academic requirements at a qualified postsecondary institution using a scholarship awarded under AS 14.43.825(a) or at a public high school in the state with a district sponsorship under (g) of this section if the applicant submits a timely application on a form approved by the commissioner and, for an applicant who has graduated from a high school in the state, provides satisfactory proof that the applicant was unable to complete the academic requirements under (a)(3) of this section as a result of circumstances beyond the applicant's control, including

(1) illness or disability;

(2) a lack of reasonable access to the required coursework at a small or remote high school attended by the applicant in the state; and

(3) other circumstances prescribed by regulation adopted by the board.

(e) The commissioner shall approve or deny an application for a waiver submitted under (d) of this section within 30 days after receiving the application.

(f) An applicant who receives a waiver under (d) of this section, shall, within the time granted for the waiver, provide satisfactory proof to the commissioner of completion of the core academic requirements specified under (a)(3) of this section.

(g) Notwithstanding a contrary provision in this title, a school district that agrees to sponsor a student for a waiver under (d) of this section may include a student who has been approved for a waiver under (d) of this section in the student count conducted under AS 14.17.600 as a full-time or part-time student if the student attends a school in the district for the purpose of completing the core academic requirements under (a)(3) of this section.

(h) In this section, "district" has the meaning given in AS 14.17.990.

*** Sec. 6.** AS 14.43.825(a) is amended to read:

(a) The maximum annual awards for the Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarships are as follows:

(1) the first award level is $4,755 and requires a

(A) 3.5 grade-point average or above **or a total score in the 90th percentile or above on the general educational development examination;** and

(B) [A] very high minimum score on a college entrance examination;

(2) the second award level is $3,566 and requires a

(A) 3.0 grade-point average or above **or a total score in the 80th percentile or above on the general educational development examination;** and

(B) [A] high minimum score on a college entrance examination;

(3) the third award level is $2,378 and requires a

(A) 2.5 grade-point average or above **or a total score in the 70th percentile or above on the general educational development examination;** and

(B) [A] moderately high minimum score on a college entrance examination.

* **Sec. 7.** AS 14.43.825(b) is amended to read:

(b) A student's eligibility for a scholarship terminates six years after the date the student **graduates** [GRADUATED] from high school **or attains a State of Alaska High School Diploma by Examination,** unless the student qualifies for an extension of time allowed by the department by regulation.

* **Sec. 8.** AS 14.43.825(f) is repealed and reenacted to read:

(f) Payment of a scholarship is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible scholarships, the commission may not award a scholarship to a new applicant, and the commission shall pay existing awards on a pro rata basis for that fiscal year.

* **Sec. 9.** AS 14.43.830 is amended to read:

Sec. 14.43.830. Qualified postsecondary institutions. (a) The following institutions are qualified postsecondary institutions for purposes of awarding an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship:

(1) a university or college physically located in the state that [IS]

(A) **is** authorized to operate in the state under AS 14.48.020 or is exempt from authorization under AS 14.48.030(b)(1); [AND]

(B) **is** accredited by a regional **or national** accreditation association;

(C) has an advisory program established for incoming students that provides counseling related to course selection, career choice, and personal challenges; and

(D) provides courses and credits that can result in the issuance of a degree or certificate available at the institution within a time frame expected for that degree or certificate;

(2) a career and technical school program physically located in the state that **meets the standards established in (a)(1)(C) and (D) of this section and that** has been included on a list of certified career and technical school programs received from the Department of Labor and Workforce Development; the commission shall publish the list on or before June 30 of the year preceding enrollment.

(b) The Department of Labor and Workforce Development shall, in consultation with the Department of Education and Early Development, adopt regulations under AS 44.62 (Administrative Procedure Act) establishing criteria under which the Department of Labor and Workforce Development shall certify career and technical school programs in the state as eligible to participate in the Alaska **performance** [MERIT] scholarship program.

* **Sec. 10.** AS 14.43.849(4) is amended to read:

(4) "program" means the Alaska **performance** [MERIT] scholarship program established under AS 14.43.810 - 14.43.849;

* **Sec. 11.** AS 14.43 is amended by adding a new section to read:

Sec. 14.43.915. AlaskAdvantage education grant account and Alaska

performance scholarship award account. (a) The AlaskAdvantage education grant account is created as an account in the general fund. Money may be appropriated to the account from the Alaska higher education investment fund under AS 37.14.750 and from other sources. The commission may use the money in the account to pay grants awarded under AS 14.43.400 - 14.43.420.

(b) The Alaska performance scholarship award account is created as an account in the general fund. Money may be appropriated to the account from the Alaska higher education investment fund under AS 37.14.750 and from other sources. The commission may use the money in the account to pay scholarships awarded to students under AS 14.43.810 - 14.43.849.

(c) Of the total amount available annually to the commission for payment of grants under AS 14.43.400 - 14.43.420 and for payment of scholarships under AS 14.43.810 - 14.43.849, one-third of the combined amount in the accounts established under (a) and (b) of this section shall be available solely for payment of grants awarded under AS 14.43.400 - 14.43.420. The commission shall annually allocate to all qualified applicants for scholarships awarded under AS 14.43.810 - 14.43.849 two-thirds of the combined amount in the accounts. If an insufficient number of qualified applicants are awarded scholarships under AS 14.43.810 - 14.43.849 before September 1 of each fiscal year, the balance of the account established in (b) of this section shall be transferred to the account established in (a) of this section for the payment of grants under AS 14.43.400 - 14.43.420 for that year. If an insufficient number of qualified applicants are awarded grants under AS 14.43.400 - 14.43.420 before the end of that fiscal year, the commissioner shall redeposit the remaining funds into the Alaska higher education investment fund established under AS 37.14.750.

(d) The commission shall reserve a percentage calculated under this subsection of the total amount available for awards in the accounts established under (a) and (b) of this section each year for award to students who graduate from a school district with an ADM of less than 800 or from a school that was operated by the Alaska State-Operated School System established under former AS 14.08.020. The percentage reserved under this subsection shall be calculated by adding the ADMs of

districts with an ADM of less than 800 and the number of students enrolled in a school that was operated by the Alaska State-Operated School System established under former AS 14.08.020 that is located in a district with an ADM of 800 or more and then dividing that number by the sum of the ADMs of all districts in the state.

(e) If an insufficient number of applicants apply for the available amount reserved under (d) of this section, the commission shall redeposit the remaining amount in the account from which the funds originated.

(f) In this section,

(1) "ADM" has the meaning given in AS 14.17.990;

(2) "district" has the meaning given in AS 14.17.990, but also includes a state boarding school under AS 14.16.

*** Sec. 12.** AS 14.45.130(a) is amended to read:

(a) A religious or other private school that elects to comply with AS 14.45.100 - 14.45.130 shall maintain permanent student records reflecting immunizations, physical examinations, standardized testing, academic achievement, courses taken at the school, and level of eligibility for an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship under AS 14.43.810 - 14.43.849.

*** Sec. 13.** AS 37.14 is amended by adding a new section to read:

Article 8A. Alaska Higher Education Investment Fund.

Sec. 37.14.750. Alaska higher education investment fund established. (a) The Alaska higher education investment fund is established in the general fund for the purpose of making grants awarded under AS 14.43.400 - 14.43.420 by appropriation to the account established under AS 14.43.915(a) and of making scholarship payments to qualified postsecondary institutions for students under AS 14.43.810 - 14.43.849 by appropriation to the account established under AS 14.43.915(b). Money in the fund does not lapse. The fund consists of

(1) money appropriated to the fund;

(2) income earned on investment of fund assets;

(3) donations to the fund; and

(4) money redeposited under AS 14.43.915(c).

(b) The legislature may appropriate any amount to the fund established in (a)

of this section. Nothing in this section creates a dedicated fund.

(c) As soon as is practicable after July 1 of each year, the commissioner of revenue shall determine the market value of the fund established in this section on June 30 for the immediately preceding fiscal year. The commissioner shall identify 10 percent of that amount as available for appropriation as follows:

(1) one-third for the grant account established under AS 14.43.915(a), from which the Alaska Commission on Postsecondary Education may award grants; and

(2) two-thirds for the scholarship account established under AS 14.43.915(b), from which the Alaska Commission on Postsecondary Education may award scholarships.

(d) In this section, unless the context requires otherwise, "fund" means the Alaska higher education investment fund established in (a) of this section.

*** Sec. 14.** AS 43.20.014(a) is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government; **and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 15.** AS 43.20.014(a), as amended by sec. 14, ch. 92, SLA 2010, is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 16.** AS 43.55.019(a) is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a

nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 17.** AS 43.55.019(a), as amended by sec. 21, ch. 92, SLA 2010, is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 18.** AS 43.56.018(a) is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-

year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 19.** AS 43.56.018(a), as amended by sec. 28, ch. 92, SLA 2010, is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 20.** AS 43.65.018(a) is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 21.** AS 43.65.018(a), as amended by sec. 35, ch. 92, SLA 2010, is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 22.** AS 43.75.018(a) is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 23.** AS 43.75.018(a), as amended by sec. 42, ch. 92, SLA 2010, is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 24.** AS 43.77.045(a) is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government; **and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 25.** AS 43.77.045(a), as amended by sec. 49, ch. 92, SLA 2010, is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school; **and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 26.** Section 8, ch. 14, SLA 2010, is repealed.

*** Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: ALASKA HIGHER EDUCATION INVESTMENT FUND. The Alaska higher education investment fund established in AS 37.14.750, enacted by sec. 12 of this Act, is the fund identified in sec. 20(f), ch. 5, FSSLA 2011.

*** Sec. 28.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Education and Early Development, the Department of Labor and Workforce Development, the Department of Revenue, and the Alaska Commission on Postsecondary Education may adopt regulations

necessary to implement changes made to their respective authorities by this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before July 1, 2012.

*** Sec. 29.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes is instructed to change the

(1) heading of art. 12 of AS 14.43 from "Alaska Merit Scholarship Program" to "Alaska Performance Scholarship Program";

(2) catch line for AS 14.43.820 from "Alaska merit scholarship program; eligibility" to "Alaska performance scholarship program; eligibility."

*** Sec. 30.** Sections 2, 4, 5 - 7, and AS 14.43.915(d) and (e), added by sec. 11 of this Act, take effect April 1, 2013.

*** Sec. 31.** AS 14.43.830(a)(1)(C) and (D), added by sec. 9 of this Act, and the amendment to AS 14.43.830(a)(2) made by sec. 9 of this Act take effect July 1, 2013.

*** Sec. 32.** Sections 15, 17, 19, 21, 23, and 25 of this Act take effect January 1, 2021.

*** Sec. 33.** Except as provided in secs. 30 - 32 of this Act, this Act takes effect immediately under AS 01.10.070(c).

EXECUTIVE SUMMARY

As set forth in Alaska Statute 14.43.840, the state's departments of Education & Early Development (EED) and Labor and Workforce Development (DOLWD), the University of Alaska (UA), and the Alaska Commission on Postsecondary Education (ACPE) present this first annual report on the Alaska Performance Scholarship (APS) to the public, the Governor, and the Legislature. In its first year, as of January 1, 2012 the APS has awarded over $3,000,000 to over 900[1] Alaska high school graduates from the class of 2011, with over 1,400 additional students who qualified and will remain eligible to receive the APS in coming years.

Described as "an invitation to excellence," the scholarship's intent is to inspire students to push themselves academically in areas that correlate to success in college and career training. While it is still too early to measure the full effects of the scholarship, some students have indicated that the APS has had an effect on them. While the graduating class of 2011 had very little time to change their classes or study habits in order to qualify for the scholarship, in a recent survey of APS-eligible students, 16% said they had worked harder in school in order to increase their GPA, 20% said they either took or retook a standardized test in order to become eligible, and 10% made changes to the classes they were taking. Perhaps most importantly, over one-quarter of the survey respondents said that the scholarship was extremely important in influencing their decision on whether or not to pursue postsecondary education.

APS recipients come from all regions of the state, though their eligibility and use of the scholarship vary by gender, race/ethnicity, and region. And, while there are a variety of approved training providers throughout the state at which students may use the APS, over 98% of the students in this first year are using their scholarships at one of the University of Alaska campuses. Over 96% of APS funds go to pay for students enrolled full time, and 86% of APS funds go to students pursuing a bachelor's degree.

In future years, as APS recipients progress through their academic careers and join the labor force, a more complete picture of APS' impacts on students will begin to form, and there will be additional evidence to determine how the scholarship is influencing Alaska students and providing additional opportunities for them to pursue postsecondary education and succeed in the workforce. Until then, the following report provides some preliminary information on this, the inaugural class of recipients of the Alaska Performance Scholarship, including characteristics of who is receiving the APS, where they came from, where they are pursuing their postsecondary studies, how much was spent, and some preliminary indicators of how these recipients are faring in their first year of studies.

[1] The full report references APS data as of November 14, 2011, the date information on students' APS eligibility and usage was collected and distributed to the agencies partnering in the writing of this report. At that time, APS had awarded 870 recipients approximately $2.94 million.

"I am so grateful for the APS scholarship, as I was not completely sure I was willing to take on a student loan to attend full time. Because of the APS scholarship, in conjunction with the UAA Scholars scholarship, I am able to attend full time without any loans. I am very fortunate for the timing of the APS!"

Level 1 APS Recipient, in response to APS Outcomes Survey

"I am very thankful that the APS was available for me. I definitely have a hard time paying for school, especially as a full time student working part time hours, with full time working parents who have never received higher than a high school education. I am a full time student, daughter, and eldest sibling. I am also a part time employee. Paying for tuition on top of textbooks and other fees is almost near impossible for me. Thank you APS for this opportunity, I would be struggling to make ends meet without this scholarship!"

Level 2 APS Recipient, in response to APS Outcomes Survey

"I believe the Alaska Performance Scholarship promoted the competitiveness of the University of Alaska system in its attempt to endorse post-secondary education in the state. Also, I would also want to mention that the customer service was remarkably great. I was surprised that those answering my calls were knowledgeable and did everything to help my cause, so I commend them for that!"

Level 1 APS Recipient, in response to APS Outcomes Survey

ALASKA PERFORMANCE SCHOLARSHIP INAUGURAL YEAR'S OUTCOMES REPORT

As set forth in Alaska Statute 14.43.840, Alaska's Departments of Education & Early Development (EED) and Labor and Workforce Development (DOLWD), the University of Alaska (UA), and the Alaska Commission on Postsecondary Education (ACPE) present this first annual report on the Alaska Performance Scholarship to the public, the Governor, and the Legislature. While the legislatively authorized framework of the Alaska Performance Scholarship, or APS, has been in place for little more than one year, by mid-November 2011 the program had provided $2,959,913 to 870 Alaskans from the 2011 high school graduating class[2] to provide assistance in paying for their postsecondary education. An additional 1,452 graduates qualified in 2011 and will remain eligible to receive the APS, and may take advantage of its benefit in coming years.

The APS has been described as "an invitation to excellence," in that students must strive to meet certain education milestones, which correlate to success in college and career training, in order to be eligible for a scholarship. (Information on the requirements is included in Appendix A.) Students' eligibility was verified by their school districts. The final list of eligible APS students, with relevant information, was then provided to EED. School districts were not required to report to EED the underlying details relative to each student's APS award eligibility for academic year 2011 (AY11), as such information was not readily available or easily compiled for the initial reporting period. However, this information was voluntarily provided for approximately one-third of APS-eligible students[3].

AN ANALYSIS OF HIGH SCHOOL GRADUATES, APS-ELIGIBLE GRADUATES, AND RECIPIENTS

Data Sources for the AY11 APS Outcomes Report

Information on AY11 graduates is available from several sources. EED maintains information on public school students in its K-12 data system known as OASIS (the On-line Alaska School Information System), and collects some information on a small number of graduates from outside of the public school systems who applied for an APS. As the primary source of information on all Alaska public high school graduates, including those who decide not to pursue postsecondary education, EED's data was used to identify socioeconomic and demographic characteristics of students. In order to provide comparisons between the AY11 graduating class and prior years' graduates, EED provided several years of high school graduation data for the APS outcomes report. For the graduating class of 2011, the EED data can be considered to be in its final form, with no future updates or changes expected. For all other sources of information on these students, the data available is preliminary and in some cases is likely to see significant future revisions.

For students pursing postsecondary education at one of the University of Alaska campuses, UA's BANNER system is the primary source of information about their progress toward attaining their degree or certificate. Incorporating the information on Alaska high school graduates provided by EED, the Institutional Research & Analysis (IRA) unit at UA provided some characteristics of APS-eligible students, including preliminary findings on enrollments for students attending any UA school. Data included in this report was collected early in the fall semester, and will almost certainly change once complete semester data becomes available. In future years, such information on students' rates of college attendance, retention and completion will provide valuable measures of the APS' impacts on students' educational outcomes.

DOLWD is able to link its labor force and wage data to high school and postsecondary graduates, a capability that will provide valuable information on the effects of the APS in years to come as graduates

---

[2] Public high school graduate information comes primarily from EED's summer OASIS data collection, and represents information confirmed by October 4, 2011. APS recipient information comes from ACPE's Alaska Student Aid Portal system (ASAP), and is current as of November 14, 2011. Information in both databases has been subject to slight changes since the substantive data used in this report was collected. Some information contained in this report may reflect more recent data, and slight differences in reported data may exist due to record matching disparities among the four agencies. The most recent data is available from these agencies, and on the APS webpage at *aps.alaska.gov*.

[3] EED is coordinating with school districts to build capacity for reporting individual-level data, including student GPA, completed course information, and SAT, ACT or WorkKeys scores for those students who have their scores reported to their district.

enter the workforce. While such information will not be available for APS recipients for several years, DOLWD's Research & Analysis Section has conducted several similar studies to date, looking at characteristics such as comparative wages, workers' occupations, place of work, and unemployment insurance use. This information will provide the benchmark against which to measure APS recipients in the future.

ACPE collects information on those students who complete the Free Application for Federal Student Aid (FAFSA) and other information on students receiving the APS, as well as students receiving other grants and loans it administers. ACPE also contracts with the National Student Clearinghouse (NSC) to receive information on Alaska students and their pursuit of postsecondary education, either in or outside the state[4]. For this year's APS outcomes report, ACPE also conducted a survey of APS-eligible students to gain some understanding of how the scholarship affected them. By combining the data available from these different sources, this first annual report derives a preliminary profile of the state's most recent graduates, of APS-eligible students, and of APS recipients.

Where Do APS-Eligible and Recipient Students Reside?

Consistent with the state's population distribution, the majority of APS-eligible students and recipients come from the Anchorage School District, the largest city in the state and the school district which accounted for nearly 40% of the state's public school graduates in AY11. At the other extreme, in AY11 there were 12 of Alaska's 54 school districts which graduated fewer than 10 students[5], two of which had no seniors. (See Exhibit 1.)

EXHIBIT 1. 2010-2011 APS Eligibility and Acceptance by District/Region

** Information cannot be disclosed without potentially releasing personally identifiable information.*

[4] NSC states that 93% of all U.S. higher education students from 3,300 postsecondary institutions are reported to the Clearinghouse. NSC is more likely to miss students in smaller schools and those pursuing certificates and vocational licenses. For Alaska, the NSC database contains information only from the UA system and from Alaska Pacific University. The algorithm to match students is also prone to slight errors, in both erroneously matching records for different students, and in not matching records for the same student. These errors affect only a small percentage of students, but numbers may not equal other reported results due to these matching issues.

[5] There are 53 local public school districts in Alaska plus the Mount Edgecumbe boarding school in Sitka, which is managed by EED.

** Information cannot be disclosed without potentially releasing personally identifiable information.*

It is informative to look at differences in the rates of eligibility and students' use of the APS across regions of the state. Regions referenced in this report are shown in Appendix E.

EXHIBIT 2. AY11 Graduates' APS Percentage Eligibility and Use by Region

Alaska's Southcentral region not only had the most students eligible to receive an APS, but, as shown in Exhibit 2, it had the highest percentage of graduates eligible to receive a scholarship as well, at 31.7%. Southeast and Interior Alaska trailed Southcentral, and Southwest Alaska's eligibility rate was just more than one-half that of Southcentral's. The Far North region had the lowest percentage of graduates eligible for the APS. However, when we consider the percentage of APS-eligible students who actually made use of it in their first year after graduation, the Far North and Interior regions led the state with nearly one-half of all eligible students actually receiving the scholarship, 48.6% and 49.9%, respectively. This compares to the Southeast region, where just over one-quarter, 27.5%, of eligible students took advantage of the APS in this first year.

Who is Eligible for the APS, and Who Is Using It?

To determine who is benefiting from the APS, we need to make comparisons across three different populations of students: all AY11 high school graduates; the subset of students who were academically eligible to receive the APS; and those students who actually received the scholarship. In certain cases, these three populations show only slight differences, and in other cases there are significant contrasts.

Exhibits 3 and 4 provide two examples of the similarities and the differences among these three groups. When we consider all public high school graduates in AY11, nearly 29% were academically eligible to receive the APS. Of those eligible, slightly more than one-third, or 36%, took advantage of the APS during their first semester after graduating from high school.

EXHIBIT 3. APS Eligibility and Recipients by Gender

	Public School Graduates	Eligible		Recipients	
		Count	% of Graduates	Count	% of Eligible
Totals	8,064	2,322	28.8%	835	36.0%
Male	4,012	1,060	26.4%	380	35.8%
Female	4,052	1,262	31.1%	455	36.1%

Female graduates were slightly more likely to be eligible for the APS as compared to their male counterparts. However, in terms of those eligible students who go on to receive an APS in the first year after graduation, the two genders are nearly identical.

Such similarities are not the case when we analyze APS eligibility by race/ethnicity. For the eligible populations based on race, Caucasian students are four and one-half times more likely to be academically eligible for the APS than are Alaska Native/American Indian students, at 37.9% versus 8.3%.

EXHIBIT 4. APS Eligibility and Recipients by Ethnicity

	Public School Graduates	Eligible		Recipients	
		Count	% of Graduates	Count	% of Eligible
Total	8,064	2,322	28.8%	835	36.0%
Caucasian (White)	4,764	1,807	37.9%	652	36.1%
Alaska Native/American Indian	1,463	122	8.3%	44	36.1%
Asian	575	143	24.9%	44	30.8%
Hispanic	427	78	18.3%	33	42.3%
Native Hawaiian or Pacific Islander	402	112	27.9%	40	35.7%
African-American (Black), not Hispanic	292	50	17.1%	18	36.0%
2 or more races (not Hispanic)	141	10	7.1%	4	40.0%

However, similar to our gender analysis, once a student becomes eligible for the APS, differences in its usage across ethnic groups nearly disappear. Almost all groups take advantage of the APS at the same rate, 36%, within the first year after graduating from high school. The two outliers in the use of the APS are Hispanics, with 42% of eligible students using the APS in the first year after graduation, and Asians, with only 31% making use of the APS. However, given the small size of the student populations within these ethnic groups, care should be taken in drawing conclusions about their propensity to use, or not use, the APS to pursue postsecondary education opportunities. Additional information over the next several years will help identify if there are any significant differences in the use of the APS among ethnic groups.

Still, there are instances when there are observed differences in the percentages of the eligible populations making use of the APS their first year after graduation. One of the most striking is in the use of the scholarship based on the award level. (See Exhibit 5.) Even though a Level 1 award is, in its dollar value, one-third larger than a Level 2 award, students are 50% more likely to use the Level 2 award than they are a Level 1, at 43.1% compared to 28.4%.

EXHIBIT 5. APS-Eligible Public School Graduates by Award Level[6]

	Total Eligible	Recipients	
		Count	Percent
Total	2,322	835	36.0%
Level 1	922	262	28.4%
Level 2	687	296	43.1%
Level 3	713	277	38.8%

Part of the difference in APS use by award level can be attributed to competition from non-Alaska postsecondary institutions. Using information available through the NSC, it is possible to identify many of the students academically eligible to receive the APS who pursued postsecondary education at an out-of-state institution. For the graduating class of 2011, NSC data identified 30% of all high school graduates as attending a postsecondary institution in Alaska, while 17% were found to attend out-of-state institutions.

[6] Exhibit excludes non-public school APS recipients, because of a lack of information on the total number of non-public school students who were eligible for an award but who failed to apply by completing an Alternative Eligibility Determination Application.

(See Exhibit 6.) Just over one-half of the total graduating class was not found in the NSC database, either because they did not pursue postsecondary education, or because they attended an institution that does not report to NSC. Nevertheless, given the scope of the NSC database (see footnote 4, page 6), it is unlikely the number of graduates attending non-reporting institutions would be material.

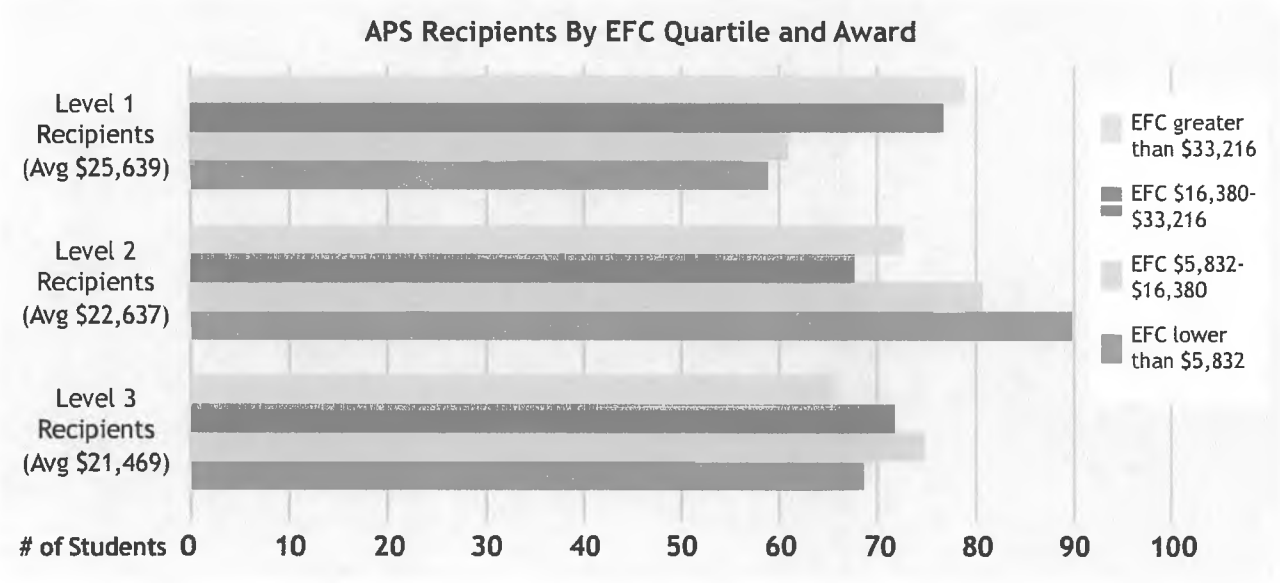
EXHIBIT 6. AY11 Public School Graduates' In-state and Out-of-state Attendance Patterns

	Headcounts			
	AY11 Graduates	Attended In AK	Attended Outside	Not Found / Not Attending
Total Graduates	**8,064**	**2,437**	**1,401**	**4,226**
Not APS Eligible	**5,742**	**1,439**	**467**	**3,836**
Total APS Eligible	**2,322**	**998**	**934**	**390**
Level 1	922	298	518	106
Level 2	687	350	215	122
Level 3	713	350	201	162

	Percentages			
	AY11 Graduates	Attended In AK	Attended Outside	Not Found / Not Attending
Total Graduates	**8,064**	**30%**	**17%**	**52%**
Not APS Eligible	**5,742**	**25%**	**8%**	**67%**
Total APS Eligible	**2,322**	**43%**	**40%**	**17%**
Level 1	922	32%	56%	11%
Level 2	687	51%	31%	18%
Level 3	713	49%	28%	23%

In AY11, nearly as many APS-eligible graduates decided to attend out-of-state as did in-state, 934 versus 998, while only 390 eligible students are unaccounted for in the NSC data. For students eligible for the Level 1 awards, their tendency to attend an out-of-state institution is much greater than those students eligible for Levels 2 or 3 awards. Also, this group of highest academic performing students is more likely to pursue postsecondary training somewhere, whether in-state or out-of-state, with over 88% of these students being found in the NSC data. This compares to Level 3-eligible students, where only 77% were found to be attending any postsecondary institution.

Finally, there are some differences in the eligibility for and use of the APS based on students' (and their parents') financial capacity. While information on students' finances is not available consistently across the three student populations being considered - high school graduates, APS-eligible and APS-recipient students - there are two sources of financial information available to shed some light on which students are most likely to be eligible to receive the scholarship, and which are most likely to make use of it. For APS-eligible students, information collected by EED allows for the identification of those public school students considered economically disadvantaged in their senior year of high school. In AY11, 30% of all high school graduates were considered economically disadvantaged, or 2,420 total graduates. (See Exhibit 7.) Of these students, 10.9% were APS-eligible, compared to the total student eligibility of 28.8%.



However, if an economically disadvantaged student was eligible for an APS, they were nearly as likely to use it as the total student population, at 34% versus 36%.

EXHIBIT 7. AY11 Public School Graduates and APS-Eligible Students by Financial Status

	Total AY11 Graduates	% of Total Graduates	APS Eligible	Eligible/ Total	APS Recipients	Recipients /Eligible
Total Students	8,064	n/a	2,322	28.8%	835	36.0%
Economically Disadvantaged	2,420	30.0%	253	10.9%	86	34.0%
Not Economically Disadvantaged	5,644	70.0%	2,069	36.7%	749	36.2%

The second source of financial data comes from students' FAFSA filings. To determine a student's eligibility for certain financial aid opportunities, the FAFSA collects information on the student's and their parents' (relative to dependent students) income and assets. This is used by the United States Department of Education to determine how much, according to a federal formula, the family is expected to pay toward a student's education on an annual basis (the Expected Family Contribution or EFC). Because the FAFSA is the primary application for the APS we have this information for both public- and private-school graduates. It should be noted that the EFC is not a factor in determining APS *eligibility*; however, it is used for purposes of this analysis as a proxy for student income status.

EXHIBIT 8. AY11 APS Recipients by Expected Family Contribution and Award Level

In Exhibit 8, the 870 APS recipients were sorted by their EFC and then divided into four equally sized groups, or quartiles. One quartile contained families expected to contribute at least $33,216 to their postsecondary education. Another contained families expected to contribute at least $16,380, but less than $33,216. The third quartile families were to contribute at least $5,832, but less than the second group. The final quartile was expected to contribute less than $5,832. Each quartile's use of the APS by award level was then analyzed.

Those students in the highest EFC quartile, and to a lesser extent those students in the second quartile, were slightly more likely to be Level 1 award recipients. Those in the two lower quartiles, who were expected to contribute less than $16,380, were less likely to receive a Level 1 award. Those students in

the lowest EFC quartile were most likely to receive a Level 2 award, followed by a Level 3 and finally by a Level 1 award. When we calculate the average EFC by award level received, Level 1 recipients' average $25,639 compared to Level 3 recipients, whose families are expected, according to the federal methodology, to contribute an average of $21,469 annually toward their postsecondary education.

Where are APS Recipients Pursuing Their Postsecondary Studies?

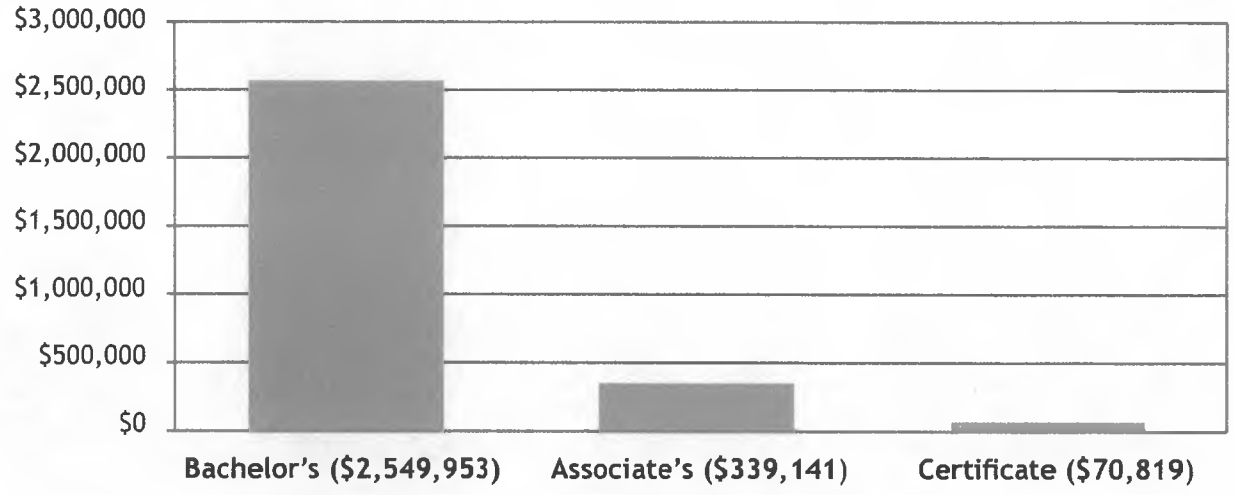
For the high school graduating class of AY11, in addition to regionally accredited institutions, 13 career and technical education institutions in the state were approved for students to attend and receive the APS[7]. However, only eight institutions were attended by APS award recipients in their first year after graduation. (See Exhibit 9.)

Because APS funds are available for up to six years after graduation from high school, and because many students pursuing career and technical training do so after having already entered the labor force, it is expected that the number of students using the APS for certifications and vocational licensure will increase in the future. However, a surprisingly low number of APS-eligible students used their scholarships to pursue certificates and licenses their first year after graduation. Of the 870 students who received a scholarship immediately after graduating, only 22 pursued a certificate.

EXHIBIT 9. APS Recipients and Postsecondary Attendance by Institution

Institution	Total # of Awards
Alaska Bible College	5
AVTEC	7
UAA	497
UAF	316
UAS	40
Other Institutions	5

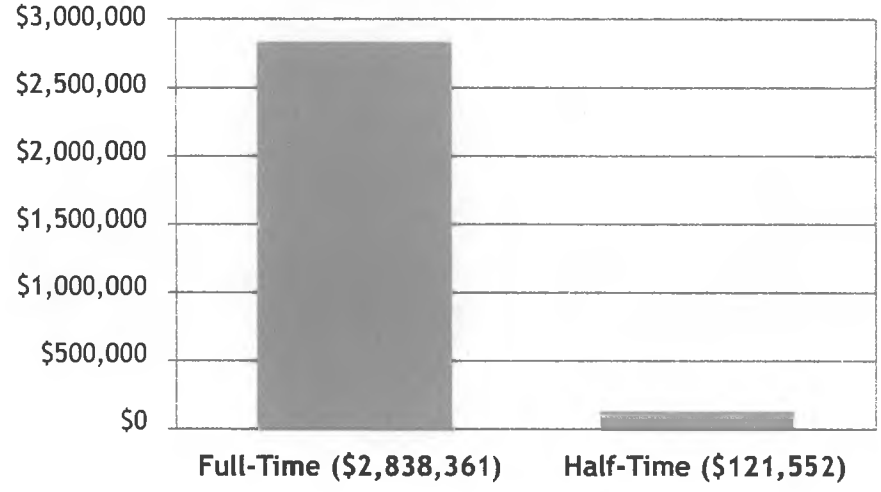
As noted earlier, nearly as many eligible students pursued their postsecondary studies outside of Alaska as did in the state. (See Exhibit 6, page 10.) The largest number of students, both in terms of overall graduates and in the number of APS-eligible students, attended a postsecondary institution in Washington, followed closely by Oregon. Colorado was the only other state attracting at least 100 graduates from the class of AY11, while Montana, California, Idaho and Arizona each attracted more than 50 graduates. A list of those states where 10 or more recent graduates were attending can be found in Appendix B.



How Much In APS Funds Was Awarded, And For What Types Of Enrollment?

As of November 14, 2011, the APS program had paid out $2,959,913 to 870 recipients pursuing postsecondary education at a qualified institution in Alaska, for an average award amount of $3,402 per APS recipient[8]. As mentioned above, the majority of students used the APS to pursue degrees, either associate's or bachelor's, and so very little of the nearly $3 million was used to pursue certificates. (See Exhibit 10.)

[7] For a list of participating institutions and programs, see Appendix B.



[8] As of December 20, 2011, the total amount awarded has risen to $3,006,713, with 902 recipients receiving funds.

EXHIBIT 10. APS Award Amounts by Degree/Certificate

APS recipients decided overwhelmingly to pursue postsecondary studies on a full-time basis. Because the APS can be used to pay for only four years (eight semesters or twelve quarters of studies), and because the award is reduced by 50% for attending less than full-time, students may be attempting to maximize the amount of the award they are eligible to receive. However, there are additional benefits to students for attending full-time - they are able to complete their degree sooner and therefore enter the workforce sooner, maximizing the return on their educational investment. Moreover, students who attend full time are more likely to complete their degree or certificate than those who attend less than full time.

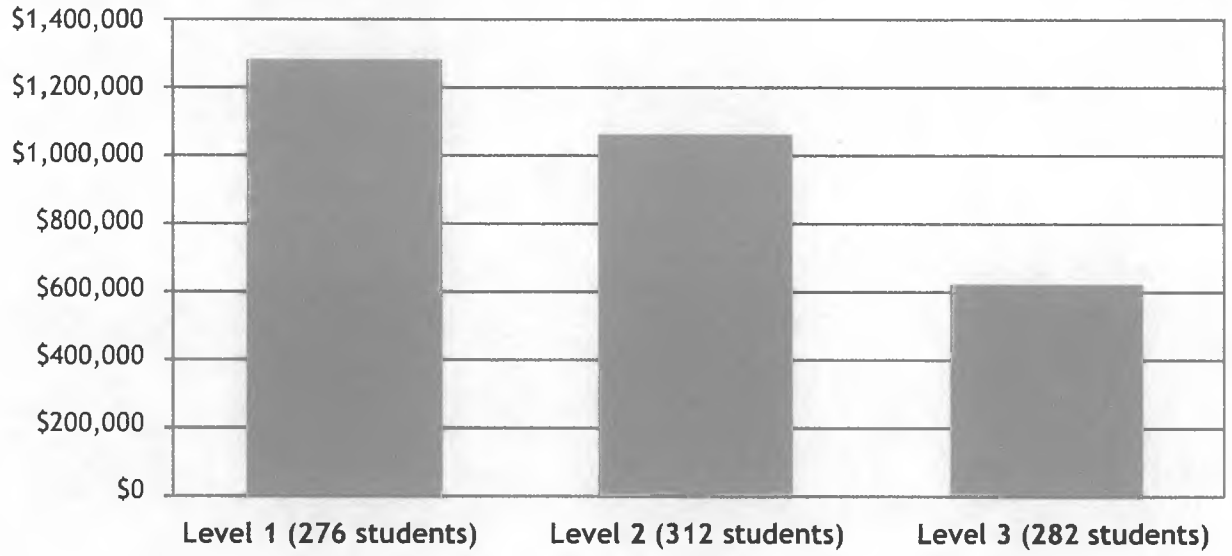


EXHIBIT 11. APS Award Amounts by Enrollment Status

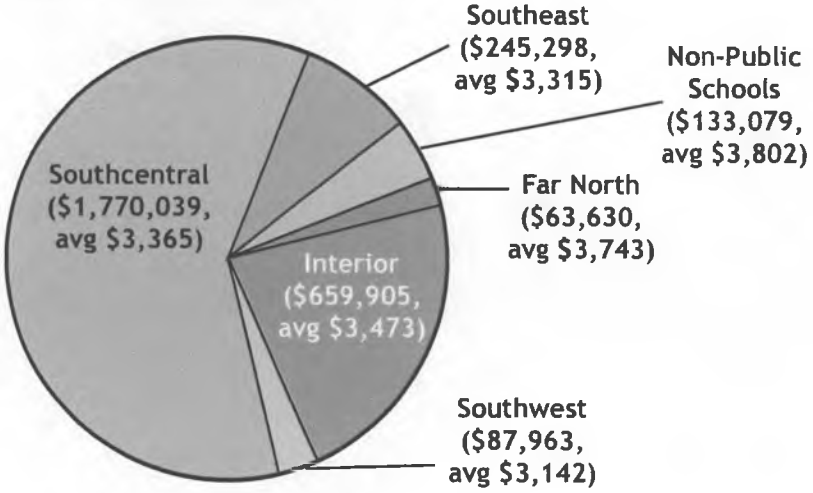
As shown in Exhibit 12, given the differences in the amounts awarded at each level, most APS funds were expended for the top award level, even though this level had the fewest recipients[9].



[9] Numbers of recipient students do not match those in Exhibit 3, which included only public school eligible and recipient students.

EXHIBIT 12. APS Award Amounts by Award Level

The Southcentral region receives funding roughly proportional to the number of APS recipients who come from the region, though the average award in the region is slightly less than the statewide average of $3,402. (See Exhibit 13.) Note that while 35 non-public school graduates from the class of 2011 received an APS award and were included in the chart, these students were not allocated to a region.

EXHIBIT 13. APS Total and Average Awards by Region

How Does the APS Affect Educational Attainment?

The APS goals include improving students' high school performance and preparing them for postsecondary education and career success. Evaluating progress in achieving these goals will require several years of information comparing APS recipients to non-recipients in their postsecondary education and labor force performances.

Given the program's short history, AY11 high school graduates had few opportunities to change behaviors in order to be eligible for an APS award. In future years, as the APS eligibility requirements for rigorous

curricula are completely phased in, students will have more time to align their course plans. We will then be better able to measure if the APS motivates students to push themselves academically, and if the APS' "invitation to excellence" is broadly accepted and reflected in the performance of the recipients. (For more information on how the APS affected students' behaviors in high school, see the section "APS Survey Findings" on page 19.)

Determining the appropriate measures to evaluate APS outcomes can be complex. For example, with regard to postsecondary education, three typical measures of success are: reduced remediation, increased student retention from one year to the next, and an increase in graduation rates. However, much of the information required to determine how successful the class of AY11 has been in these regards is not yet available.

There is preliminary information available on the patterns of UA first-time freshmen who enroll in preparatory (remedial) courses during the most recent fall semester. Nearly two-thirds of those who were not APS eligible enrolled in some type of preparatory classes. More than one-half of these APS-ineligible students were enrolled in preparatory mathematics courses, and more than one-third were enrolled in preparatory English classes. By comparison, just over one in four APS eligible students took any preparatory classes in their first semester at UA. (See Exhibit 14.) As would be expected, those APS-eligible students at the higher award levels were less likely to take preparatory classes, with fewer than one in 10 students eligible for the top collegiate APS award taking any type of preparatory classes.

Not only did APS-eligible students take fewer preparatory courses, but they also enrolled in more credit hours in their first semester than did the ineligible students. Ineligible students attempted, on average, 11.3 credit hours in their first semester in AY12, of which 2.9 hours were preparatory classes. APS eligible students attempted on average 13.6 credit hours in their first semester, only one of which was in a preparatory class. Because preparatory courses do not count toward degree requirements, the average APS student, if they successfully complete their first semester course load, ends up with 12.6 credit hours to apply toward a degree, compared to 8.4 hours for an ineligible student who successfully completes their first semester classes.

EXHIBIT 14. UA First-Time Freshmen in AY12 Taking Preparatory Courses and Average Credit Hours Attempted[10]

Total Headcount of First-Time Freshman, AY12 = 3,631	Non-APS-Eligible First-Time Freshmen	APS-Eligible First-Time Freshmen				
		Total Eligible	College Level 1	College Level 2	College Level 3	All Vocational
Total Student Headcount	**2,751**	**880**	**262**	**310**	**287**	**21**
Students Taking Any Preparatory Courses	**1,784**	**241**	**23**	**86**	**124**	**8**
Percent of Total Headcount	64.8%	27.4%	8.8%	27.7%	43.2%	38.1%
Students Taking Preparatory Math	1,504	207	21	71	108	7
Percent of Total Headcount	54.7%	23.5%	8.0%	22.9%	37.6%	33.3%
Students Taking Preparatory English	1,003	52	2	15	32	3
Percent of Total Headcount	36.5%	5.9%	0.8%	4.8%	11.1%	14.3%
Average Total Hours Attempted	11.3	13.6	14.5	13.6	13.0	12.8
Avg. Preparatory Hours Attempted	2.9	1.0	0.3	0.9	1.6	1.7
Avg. Preparatory Hours - Math	1.7	0.7	0.2	0.7	1.2	1.1
Avg. Preparatory Hours - English	1.1	0.2	0.0	0.2	0.4	0.5

[10] Data reflect student enrollments for the opening of the fall semester, and credit hours are credit hours attempted. Preparatory Studies and Preparatory Science courses are not included in the analysis above, and numbers are subject to change once closing data for the fall semester becomes available.

The benefits from the APS will occur if more students are successfully motivated to study harder in order to maintain a high GPA and to take rigorous classes to become APS eligible. These two factors will contribute to higher standardized test scores, and therefore less need for remediation and greater success in postsecondary pursuits.

One future measure of such motivation will be the number of students who take college entrance examinations. There was only a limited opportunity for AY11 graduates to increase their test taking during this first year of the scholarship. However, information is available from both ACT and College Board, the organization which administers the SAT, on the number of students in each graduating class taking their tests over the past several years. As future years' graduates prepare to qualify for the scholarship, it is expected that the numbers and percentage of students taking one or both tests should increase. Historically, as the percentage of students taking these tests increases, the average scores decrease. Tracking the test-taking patterns and average scores of future graduates will provide some insights into the scholarship's ability to motivate students to pursue higher education, and also on how well increased rigor and the emphasis on higher performance in secondary school translates into higher scores on college entrance examinations. As a benchmark, for the graduating class of 2011, 40% of those graduates had taken the ACT, and of these 54% scored 21 or higher on the composite score, the minimum score to become APS-eligible using the ACT[11].

EXHIBIT 15. Number and Percentage of Alaska High School Graduates Taking College Entrance Examinations by Year, 2006-2011[12]

Numbers and Percentages of ACT & SAT Test Takers By Year

	2006	2007	2008	2009	2010	2011
AK High School Graduates	7,361	7,666	7,855	8,008	8,245	8,064
ACT Test Takers	1,987	2,106	2,047	2,254	2,228	3,022
% taking ACT	27%	27%	26%	28%	27%	37%
SAT Test Takers	(not available)	4,050	4,060	3,899	4,089	3,866
% taking SAT		53%	52%	49%	50%	48%

UA data was also able to capture how quickly recent high school graduating classes' students began work on their degree. Exhibit 16 again uses the most recent three years' public high school graduating classes, noting how many students in each class began their postsecondary studies within one year of graduation, and the types of degree or certificate they pursued. For AY11, UA was able to match its APS-eligible students to EED's AY11 graduation data, and to the types of endorsements they pursued. Of UA's 880 APS eligible students, 852 had graduated from public schools. Over the past three years, the percentage of Alaska public school graduates attending UA within one year of their high school graduation has remained relatively stable, between 26% and 29%. However, for the population of APS-eligible students in AY11, 36.7% attended one of the UA schools in the fall semester following their high school graduation.

[11] ACT Profile Report - Alaska, Graduating Class 2011. Similar statistics were not yet available for SAT test takers.

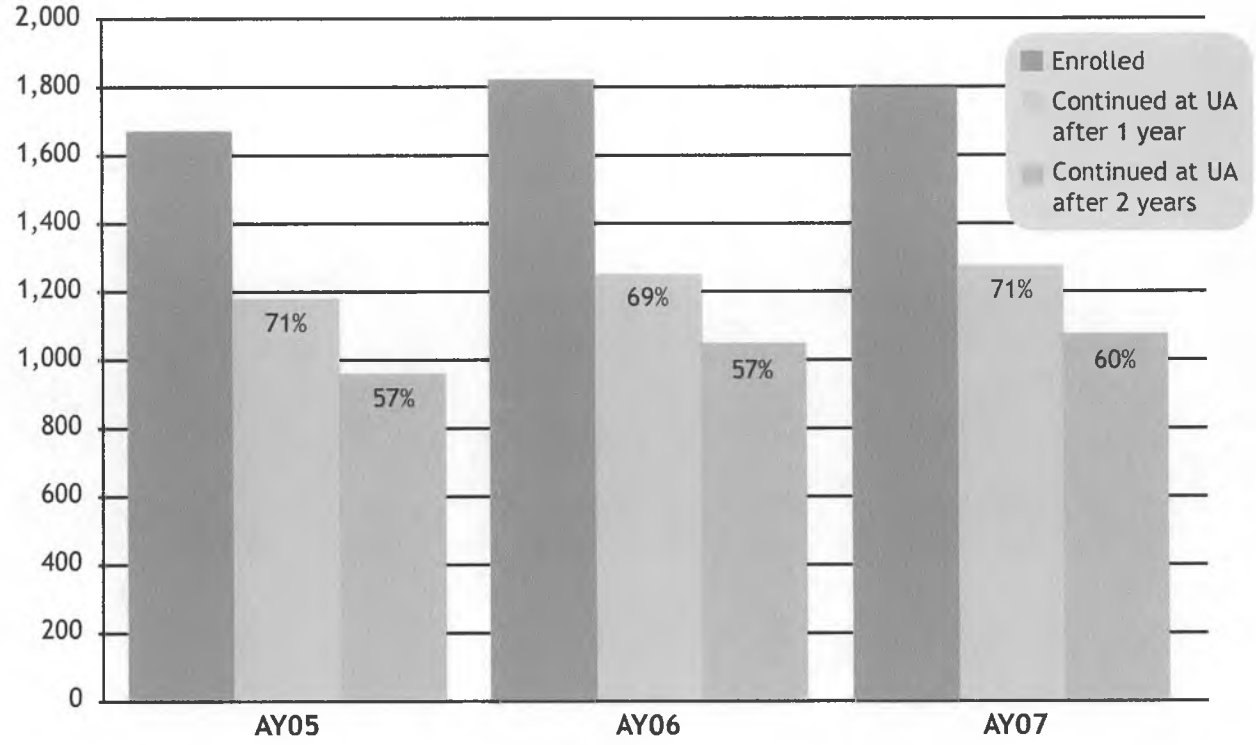
[12] Percentages of test takers will not match those as reported by the testing agencies. ACT and the College Board use the Western Interstate Commission for Higher Education's (WICHE) projections of high school graduates by year. Percentages calculated in Exhibit 15 represent the number of test takers divided by the number of public school graduates receiving diplomas as reported by EED.

EXHIBIT 16. High School Graduates Pursuing Postsecondary Degree/Certificate at UA Within One Year of Graduation[13]

	Public School Graduates			APS Eligible, AY11		Percentage of Public School Graduates			Percentage APS Eligible, AY11
	AY09	AY10	AY11	Public	Other	AY09	AY10	AY11	Public
Total Graduates	7,997	8,249	8,064	2,322					
Total Degree/ Certificate Seekers	2,093	2,374	2,144	852	27	26.2%	28.8%	26.6%	36.7%
Bachelor's Degree Seekers	1,387	1,532	1,442	697	20	17.3%	18.6%	17.9%	30.0%
Associate's Degree Seekers	653	793	651	121	7	8.2%	9.6%	8.1%	5.2%
Certificate Seekers	53	49	51	10	0	0.7%	0.6%	0.6%	0.4%
Pending Endorsement	n/a	n/a	n/a	24	1	n/a	n/a	n/a	1.0%

In addition, these APS-eligible public school graduates exhibit a tendency to pursue higher degrees, thus committing to stay in school longer to attain their degrees. For all Alaska public school graduates in the last three years, between 17% and 19% pursued a bachelor's degree within a year after their high school graduation. For the inaugural class of APS-eligible students, 30% enrolled in a bachelor's degree program. In addition, because the AY11 cohort data is based only on fall semester enrollments, the percentage of AY11 students seeking a degree or certificate within one year of graduation will likely go up.

Some of these students' tendencies may be based on the fact that APS recipients have shown a history in secondary school of achieving good grades and high test scores, so these students could be more likely to pursue postsecondary education than an average student. APS recipients' higher first year attending rates could also be driven by the APS rewarding them to attend school in Alaska. Still, it appears that APS recipients are more likely to pursue postsecondary education within their first year after graduation, and at a rate substantially above the average rate for all students.



Pursuing postsecondary education soon after graduating from high school can have several benefits for students. Students' retention of information learned in high school diminishes over time, so attending a postsecondary institution early can reduce the need for remediation. Students also complete their degrees sooner, the earlier they begin their pursuit of one, giving them more years to reap the rewards of higher education.

With only one semester of postsecondary data available for review, first year attendance and remedial classes taken are the only two measures of postsecondary performance available at this time. The next potentially measurable effect of the APS, second year student retention rates, will not be available until the fall of 2012[14]. Still, historical data is available, and can be used to illustrate current student retention rates in order to create the benchmark that the APS program will be compared against. Exhibit 17 shows Alaska high school graduates from AY05 through AY07 enrolling within one year of their high school graduation (so enrolling at UA in AY06 through AY08.)

[13] AY11 data is based on information gathered at the beginning of the semester, while previous years' data reflects information gathered at the close of the semester. In the table, "Public" indicates APS students matched to AY11 EED data. "Other" includes those students graduating from non-public schools in AY11 who are eligible to receive an APS award. Because the total number of non-public school graduates in Alaska is not known, no percentages were calculated for this student population. "Pending Endorsement" includes students awaiting admission into a degree or certificate program.

[14] Going forward, NSC data can help measure whether the APS has affected students' decisions on where to attend school, and if the APS makes students more likely to pursue their postsecondary studies in Alaska.

EXHIBIT 17. Retention of AY05-AY07 High School Graduates Attending UA Within One Year of Graduation

Without linking those students who end up not returning to UA after one or two years to other data sources, most notably the NSC data, we cannot determine if these students actually stopped pursuing their postsecondary education, or if they continued at another postsecondary institution. Still, more than one in four students did not return to their declared degree program at UA after their first year, and more than one in three were no longer pursuing their degree after two years.

For AY11 high school graduates, the 2013 APS outcomes report will be able to provide comparable retention rate measures for all students attending UA, and for the subset of APS recipients. Similar to the first year postsecondary attendance rates, APS recipients may have other factors that affect their retention rates, but it is reasonable to believe the scholarships will incent students to remain in school and complete their degree. As recipients progress through their postsecondary studies, data from their attending institutions and the NSC will help provide additional measures as to the scholarship's influence on recipients.

Educational attainment data even further into the future will include APS recipients' graduation rates, how they compare to the overall student population, and how quickly they earn their degree or certificate. However, a sufficient number of years must elapse before the data on this measure of the APS' success is available.

In preparation for future reports on the outcomes of APS students, UA's IRA unit compiled UA graduation rate data on Alaska high school students using the most recent graduating class for which complete information is available, AY05[15]. Comparable data for AY06 and AY07 is not yet available, since these students have had less than six years in which to complete their degrees. Information presented for AY07

[15] Completion information and graduation rates are generally calculated based on 150% of the normal time to completion for the degree or certificate. For a bachelor's degree, which normally takes four years to complete, graduation and completion data is then based on six years after the student begins their postsecondary education. Similarly, associate's degree and two-year certificate programs are calculated after three years. For the high school graduating class of AY11, comparable completion and graduation rates information for four-year programs will not be available until after AY17, but completions will be reported in the first year data is available.

completers represents those students who completed either a bachelor's or associate's degree within four years (graduating with their degree in AY11).

In Exhibit 18, we can compare AY05 completion rates to AY07. At 31.6% versus 14%, it is obvious that a significant share of students take more than four years to complete their degree. While comparable data for APS recipients is several years away, APS' effect on degree completion and the average number of years required to complete a degree will be an important measure.

EXHIBIT 18. UA Degree and Certificate Completion by AY11, for AY05-AY07 High School Graduates Attending UA Within One Year of Graduation

Graduates Pursuing a Degree	AY05	AY06	AY07
Total Enrolled in a Degree Program	1,674	1,824	1,802
Total Completing Program	529	397	253
Percentage Completing Program	31.6%	21.8%	14.0%
Average Years to Completion	4.42	4.03	3.48

Graduates Pursuing a Certificate	AY07
Total Enrolled in a Certificate Program	38
Total Completing Program	9
Percentage Completing Program	23.7%
Average Years to Completion	1.44

How Does the APS Affect Workforce Success?

As a part of the analysis of how the APS affects students, DOLWD will in the future be able to provide information relative to several indicators of workforce success and how receipt of the APS changes students' behavior while in school. For example, one effect of the APS might be that the additional funds provided allow students to focus more on their studies and less on earning money to pay for school. We know that the majority of APS recipients are attending school full time, and we can compare recipients' wage earnings while in school to similar non-recipients to see if the APS allows a student to focus on their studies.

DOLWD will also be able to provide the average earnings of APS recipients, determine if their occupation is related to their degree, and determine how many remain in Alaska versus leaving the state to pursue a career elsewhere. Labor outcomes can be measured among the three eligibility levels for both recipients and non-recipients, and between eligible and ineligible students. Similar to graduation rates, however, this information will be available only after the APS cohorts are more fully matured.

APS Survey Findings

In December, ACPE surveyed approximately 1,800 students who met the academic requirements to receive an APS award. These students were a subset of the 2,322 APS-eligible students - they had filed a FAFSA and included an email address in that application. Students did not have to have received an APS award in order to be included in the survey, though students filing a FAFSA are those most likely to pursue postsecondary education. Therefore the selection process was biased toward those students intending to be enrolled in postsecondary studies in 2011-12 and therefore more likely to have received the scholarship.

The survey included several multiple choice and scaled questions, as well as opportunities for responders to provide their own comments. Selected comments gathered through the survey have been interspersed throughout this report. Not all comments received were positive, though most negative ones focused on the scholarship's requirement that it be used only at in-state schools, and in some cases on the confusion and lack of information available about the scholarship in this its first year. (Representative comments, both pro and con, are included in Appendix C.)

Responses were collected from 357 students, or 20% of the students who were asked to participate. Response rates ran from a high of 23% for award Level 1-eligible students, down to 16% for award Level 3-eligible students. Nearly 90% of respondents were pursuing a degree, and 5% were not pursuing postsecondary education. Of those pursuing postsecondary education, just over one-quarter were attending school outside of Alaska and were therefore not eligible to receive the award in AY12.

Two-thirds of the survey respondents, 237 students, said that the APS affected their decision to attend school. Nearly two-thirds of these students said the APS affected their decision to pursue their education in Alaska, and over 20% said that it made them consider doing so, even though they eventually went to an out-of-state school. Over one-quarter of the respondents said it was extremely important in influencing their decision on whether or not to pursue postsecondary education.

When asked about their use of the APS, 58% of respondents said it was extremely likely that they would make use of their entire APS award within six years of graduating, and 44% said they were extremely likely to do this within four years. Two-thirds of respondents said that it is extremely likely that they will attend school full-time.

Although the APS program was new this year, and final outcomes regarding funding were not available until the spring, 55% of students knew that they could become eligible for the APS before or near the beginning of their last semester during their senior year. Another 19% found out shortly before their graduation, and only 5% discovered they were eligible after having arrived at their postsecondary institution. Nearly 10% of students surveyed stated that they weren't aware that they were eligible to receive the APS until they received the ACPE survey, but this high level was partially due to confusion in their interpretation of the question - 29 of these 34 students were attending an out-of-state institution, so while they were academically eligible they did not meet all requirements to actually receive an APS award. Thirty-nine percent of students learned about the APS through a teacher or school counselor, and 29% through a parent or guardian.

Students were seemingly well-informed about the program and their status. Two-thirds knew the award level they were eligible to receive, and 40% knew the dollar value of their award. (See Exhibit 19.)

EXHIBIT 19. Survey Respondents' Knowledge About the APS and their Eligibility Status

Knew the award level for which they were eligible	67.5%
Knew the amount of their award	40.4%
Knew the APS was available only if they attended a qualifying Alaska school	78.1%
Knew they must attend at least half time to receive the scholarship	38.4%
Knew that they would be eligible to receive up to four years of funding	57.3%
Knew that they had six years in which to use the APS	24.8%

The high school graduates in AY11 had little opportunity to change their approach to the classes they took or the effort they expended in order to become eligible for the APS - 69% said they made no changes. Almost 16% said they worked harder to increase their GPA, 12% said they retook a standardized test in hopes of increasing their score, 10% made changes to the classes they had planned to take, and 8% took a standardized test when they would not have done so otherwise.

Conclusion

With the first-ever APS recipients just finishing the first semester of their postsecondary studies, it is impossible to determine the long-term effects of the scholarship, and it is too early to tell if the eligibility and enrollment patterns seen in this first year were caused by the APS, or if they will continue into the future. Because the information available at this early date is so preliminary, it will be subject to revision as a more complete picture of these students' performance during their first semester of postsecondary studies becomes available.

Until comparative data for APS recipients versus non-recipients becomes available, some of the best information comes directly from students who are eligible to receive the scholarship, and their thoughts on how the APS program has affected them. A significant number of recipients expressed their belief that the scholarship had allowed them to pursue postsecondary education, with one-quarter saying that it was extremely important in their decision to even pursue postsecondary education. Two-thirds of surveyed students responded that it strongly influenced their decision to attend school, and most credited the APS with their choice to attend school in Alaska.

In future years, as more data becomes available, additional assessments of APS' effectiveness will be possible, and a better determination can be made as to what extent the scholarship is meeting its intended goals. For the 2013 report, examples include preliminary information on students' retention rates and more complete information on the number of remedial credit hours being taken by AY11 graduates. Information on satisfactory annual progress of APS recipients will also be available, and can be compared to non-recipients' progress. There will also be data on the number of graduates beginning their pursuit of postsecondary training in their second year after high school graduation, and on those students initially attending institutions outside of Alaska and then returning in their second year. In subsequent years, information on degree/certificate completions and labor force participation will become available, and will offer even more meaningful measures of the success and value of the Alaska Performance Scholarship.

"I think it is an amazing thing to offer a scholarship to encourage students to stay in Alaska. I love Alaska and find it sad that a lot of students my age are so eager to flee the state after graduating."

Level 3 APS Recipient, in response to APS Outcomes Survey

"I really appreciate that I get APS. It really helps me pursue my education and life goals. It is extremely hard to work and study and any financial assistance helps a lot. Thank you very much for helping me pursue my goals. I'm greatly thankful for the opportunities I have."

Level 3 APS Recipient, in response to APS Outcomes Survey

"Thank you for rewarding my efforts in high school with this scholarship. Every bit of financial aid encourages and empowers Alaskans to pursue a higher education. If the state invests in us, the youth, we will invest in the state with the power of our minds and ideas. It is because of programs like this that advocates for positive change are born."

Level 2 APS Recipient, in response to APS Outcomes Survey

"It was a very nice surprise to see that I did not have to pay for school at all with this scholarship and all of my others. It is helping my family very much not to have to get a loan. It is a nice way to see that the state wants their children to go to college and will help you with that."

Level 2 APS Recipient, in response to APS Outcomes Survey

"This scholarship program is opening up so many doors I never thought would be open and available to me. Thank you so much!"

Level 1 APS Recipient, in response to APS Outcomes Survey

"You have changed my life and future. Thank you for investing in me. I will do my best to use your faith in me well. My home is here; and hopefully will always be here."

Level 1 APS Recipient, in response to APS Outcomes Survey

APPENDIX A.

Determining APS Eligibility

For the high school graduating class of 2011, a student could become eligible for the APS by:

- ✓ maintaining a minimum grade-point average in high school of 2.5 or higher;
- ✓ achieving a minimum score on a college entrance exam to be eligible for an APS which could be used to pursue a degree or a certificate, or achieving a minimum score on a standardized examination designed to measure a student's level of preparedness to transition to the workforce to pursue a certificate or professional licensure; and
- ✓ completing a rigorous core curriculum that included four years of language arts, three years of social studies, a minimum of two years of each and five years combined of mathematics and science, and one year of physical education.

The APS rigorous curriculum is being phased in over four years to give school districts time to incorporate changes to meet the new requirements. Therefore curriculum requirements for the class of 2011 were less rigorous than ultimately established by the APS legislation. In 2013, students must complete:

- ✓ either four years of mathematics, science, language arts, and social studies; or
- ✓ four years of language arts and social studies, three years of science and mathematics, and two years of a foreign language or an Alaska Native language.

If a student met the rigorous curriculum requirements, their GPA and college entrance and standardized test scores were used to determine the APS award level the student could receive, and therefore the amount of their scholarship. (See Exhibit 1.) A student is eligible only for the lowest award level based on their GPA and test scores. For example, consider a student with an SAT score of 1710 and a GPA of 2.6. Although the SAT score would qualify for an APS Level 1 award, it must be combined with a GPA that also qualifies for Level 1. In this example, the lower GPA drops the student's eligibility to a Level 3.

EXHIBIT 1. APS Award Levels and Minimum Requirements

APS Award Level	Minimum GPA	Minimum Standardized Test Scores (only one test required)			Award Amounts
		Collegiate & Career/Technical		Career/Technical Only	
		SAT	ACT	WorkKeys	
Level 1	3.5	1680	25	5 in three subject areas	$ 4,755
Level 2	3.0	1560	23		$ 3,566
Level 3	2.5	1450	21		$ 2,378

The type of standardized test the student takes affects the award type they are eligible to receive. Scores from the two college entrance exams, the SAT and the ACT, can be used to determine a student's eligibility for both a collegiate award and a career/vocational award. In the example described earlier, the student would be eligible to pursue either a degree or a certificate or vocational license and receive a Level 3 award. However, the WorkKeys test scores can only be used to determine a student's eligibility to receive a scholarship to pursue a certificate or vocational licensure program. WorkKeys scores will not qualify a student for a collegiate award. To become eligible for a collegiate award, the student would need to take a college entrance exam.

RECEIVING THE SCHOLARSHIP

To actually receive the APS scholarship, a student must:

- ✓ submit a FAFSA or an approved alternative application no later than June 30 for the following academic year[16];
- ✓ enroll in a qualified postsecondary program at one of the 23 participating institutions, or pursue an approved certificate or vocational licensure program at one of 13 career and technical education institutions in the state;
- ✓ enroll in:
  - ❖ at least 12 credit hours for each semester to receive the full amount of their APS award during their freshman year, and 15 credit hours in subsequent years; or
  - ❖ at least 6 credit hours to receive a half-time award[17]; or
  - ❖ a qualifying clock-hour CTE program.
- ✓ have an unmet cost of attendance[18] of $500 or more in order to receive the scholarship.

[16] For AY11 graduates, the FAFSA and alternative application deadlines were extended to December 15, 2011, because of the availability of funding to provide additional scholarships after the June 30 filing deadline.

[17] Students pursuing graduate degrees have lower credit hour limit requirements.

[18] The cost of attendance includes tuition, fees, books, required tools and supplies, room, board and transportation. This amount is reduced by all other non-loan aid (scholarships, grants, etc.) for which a student is eligible to calculate the unmet cost of attendance. If the unmet cost of attendance is less than $500, a student does not receive any APS funds. If the unmet cost of attendance is greater than $500 but less than the available APS award amount, the student receives only the amount of their unmet cost of attendance.

APPENDIX D.

Sample APS Recipients' Comments to Survey

Responders to the APS survey had an opportunity to provide comments on how their eligibility to receive the APS affected their decision on whether and where to pursue their postsecondary education, and were asked if they had any additional thoughts on the scholarship. In total there were 335 comments provided by responders, with a sampling of them below. Responses have been separated into generally positive and generally negative ones.

Examples of responders' positive comments on the APS program:

I was going to transfer after a year or two, but now I'll probably stay in Alaska all four years.

It made me stay in Alaska instead of leave the state for a different college.

The scholarship was appreciated and is a great initiative on the part of the State of Alaska. Suggest that even though a student doesn't study in Alaska, if the student comes back to Alaska and works for five years that the APS be awarded to pay student's college loans. Alaska is still benefiting from having a college educated worker in Alaska; just as if the worker studied in Alaska.

I was excited to learn that I can use it for two year of graduate school after I graduate from an out-of-state university. It has given me an incentive to return to Alaska. I like having plans for my future!

It was a huge deciding factor on whether or not I would be going to college, and if I would stay in-state.

I was going to attend Brown University, but the financial aid I received for studying within the state has encouraged me to stay in Alaska.

The APS scholarship is helping me stay in school. I could have gone to just the certification on the previous scholarship money and money I had saved. Now I will apply the APS money toward my associate's and my bachelor's degrees. I will be in the aviation industry and am convinced that a 4 yr degree is important. I thank the APS board for this assistance.

Since my family is low-income, my parents would not have been able to pay for my education. The APS Scholarship encouraged me to continue with my post-secondary plans and gave me a means to do so. It is a great idea =).

It made it possible. I graduated a year early from high school. It was important to me to start taking a core classes right away and work into seeing what field I really want to study. The APS made this possible....THANK YOU!

Knowing that I had this extra help of funding for school, I decided to go for my full bachelor's degree instead of just my associate's.

I was considering other-out-of state schools, but I believed that this scholarship opportunity was too big to miss. Thus the APS was the deciding factor for me attending college in Alaska.

It was not advantageous to me to attend an in-state school before the APS became available. I was offered the top scholarship at Covenant College in Georgia and half tuition scholarships at two or three other schools. However, as an independent home school student I was not eligible for the UA Scholars program. Thank you for providing this merit-based program to Alaskans of all walks of life!

The APS helped me take a closer look at the field of study that I plan on pursuing (Applied Engineering) and see the excellent opportunities available at Alaskan universities.

I am a UA Scholar, so I knew that $11,000 of my tuition and fees would be covered if I chose to stay in-state. However, when I heard about the APS, I knew that it would cover any remaining tuition costs. This really closed the deal for me to stay in Alaska.

I would've attended the University of Washington in Seattle if there was no scholarship. I conducted a cost-benefit analysis of whether I should attend the University of Alaska Fairbanks or the University of Washington, and UAF proved to reap more benefits if attended. Also, this decision to decline the University of Washington was made in late June because I found out I was eligible for my scholarship level only then.

My candid opinion is that the APS is a step in the right direction; obviously, it is in its first stage, so the coordination problems are inherently understandable. However, more needs to be done. Higher education is too expensive, still, even in-state.

This scholarship is a great idea for helping low-to-middle-income students get through college. In general, this segment of students falls through the cracks, insofar that need-based scholarships seldom accept them and their family's income often prevents them from going to a choice school without taking out costly loans. Furthermore, the scholarship is well-rounded in its brackets, however I know of a few students who missed out on it by falling short in only one of the admission factors. A little more leniency would go very far, as poor test-takers are often not poor students.

I believe the Alaska Performance Scholarship promoted the competitiveness of the University of Alaska system in its attempt to endorse post-secondary education in the state. Also, I would also want to mention that the costumer service was remarkably great. I was surprised that those answering my calls were knowledgeable and did everything to help my cause, so I commend them for that!

I wasn't sure who to contact in an effort to thank you all for this scholarship, but I am very grateful for this award. I plan to use it all, and I'm working towards maintaining my GPA so I can use it.

Examples of responders' negative comments on the APS program:

I felt cheated. I worked hard, took difficult classes and did well. Why should I be discriminated against and denied access to these public funds because I am going to school Outside? I actually cost the State of Alaska less since I am out of state. UAA tuition is already subsidized by the state.

Since I was misinformed and made my plans accordingly, I have to come up with a different plan that will now take longer and cost me more money than anticipated! Very disappointed!

I was already pretty certain about going to school in Alaska. I think high school should inform students better about how the program works. I know a lot of girls who didn't know they could get it with their grade 3.0's and so they didn't take the ACT or the SAT.

I had already applied and gotten in to out of state schools by the time that I knew about APS, so it didn't affect my decision much, but may in the future since I can use it for up to six years after graduating.

It did not offer me much and indicated I would get more by going out-of-state. I already knew I would be pursuing a postsecondary education. I already had full-tuition waivers, honors program offers, and other scholarship opportunities that were much better.

I think high-achieving students should be able to receive the APS even if they attend school out of state. Although I understand the appeal of keeping these students in Alaska, the fact remains that those students eligible for the APS who wish to pursue higher education out of state usually have to pay more for school than they would remaining in Alaska without the APS. There should be a level of APS that can be given regardless of the location of the chosen university of the student.

Originally I had trouble receiving this scholarship. I was eligible, but I had a few complications with the school and with my FAFSA. I ended up receiving the scholarship about a month late, but I was pleased that I was still able to receive it. After I emailed the APS through the website they were very helpful.

I could not receive the APS because I was over-awarded by many other scholarships I applied and competed for. If I knew that the APS scholarship would have been funded earlier, I could have spent less time on scholarship applications and more time studying or doing athletic sports.

I wish I had received more information on the APS. I didn't realize this award was different from some of the other scholarships offered to Alaska students, so I didn't think to look further into it.

It is a great scholarship, but I would like to see more scholarships for Alaska residents pursuing other studies that are not available in Alaska.

We had a very complicated experience with getting the 2nd set of SAT/ACT scores from the high school to the state. Each thought the other was responsible for getting scores from one place to the other. If it wasn't for the perseverance of my mother facilitating and phone calling everywhere my APS opportunity would have slipped through the cracks and I would not have gotten it! No one really understood the process or procedures at the time and it was very frustrating and messy. Maybe next year it will go smoother for students and families! Thank you very much for helping me and my family pay for college in Alaska. We are grateful for the support at home here in Alaska.

APPENDIX E.

Alaska Regions Referenced in the APS Report

Created by: Alaska Department of Labor and Workforce Development

Acknowledgements

This inaugural report on the Alaska Performance Scholarship would not have been possible without the considerable efforts of staff in the research sections at each of the four partnering agencies. ACPE would like to acknowledge the following agencies and staff and thank them for their contributions to this, the 2012 Alaska Performance Scholarship Outcomes Report.

- ★ Alaska Department of Education & Early Development's Assessment, Accountability & Information Management
  - Erik McCormick, Director
  - Michael Plotnick, Data Manager
  - Peggy Corazza, Data Manager (retired)
  - Shari Paul, APS Program Coordinator
- ★ University of Alaska's Systemwide Institutional Research & Analysis
  - Gwendolyn Gruenig, Associate VP
  - Saltanat Schweitzer, Director
  - Stephanie Virgo, Sponsored Programs Analyst
- ★ Alaska Department of Labor and Workforce Development's Research & Analysis Section
  - Rob Kreiger, State Programs Supervisor
  - Yuancie Lee, State Programs Economist

SENATE CS FOR CS FOR HOUSE BILL NO. 104(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act renaming the Alaska performance scholarship and relating to the scholarship and tax credits applicable to contributions to the scholarship; relating to AlaskAdvantage education grant funding and to Alaska performance scholarship funding; relating to AlaskAdvantage education grant eligibility; establishing accounts and a fund for those purposes; making conforming amendments; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* **Section 1.** AS 14.03.113 is amended to read:

Sec. 14.03.113. District determination of scholarship eligibility. A school district shall determine whether a student who graduates from a high school in the district is eligible for an award of an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship under AS 14.43.810 - 14.43.849. If a student is eligible, the district shall state in the student's permanent record the highest level of funding for

which the student is eligible. A district shall provide a student with an opportunity to request that the district correct an error in the eligibility determination.

*** Sec. 2.** AS 14.43.415(a) is amended to read:

(a) For an applicant to be eligible for a grant under AS 14.43.400 - 14.43.420, the applicant must be

(1) a resident of this state;

(2) enrolled or about to be enrolled

(A) at an institution **located in the state that is**

(i) accredited by an institutional accrediting body recognized by the United States Secretary of Education; or

(ii) approved to participate in the Alaska performance scholarship program as a qualified postsecondary institution under AS 14.43.830 [APPROVED TO PARTICIPATE IN FEDERAL FINANCIAL AID PROGRAMS UNDER 20 U.S.C. 1070 - 1099c-2, AS AMENDED, LOCATED IN THIS STATE]; and

(B) on at least a half-time basis; and

(3) able to demonstrate financial need in accordance with standards for determining financial need established by the commission [UNDER 20 U.S.C. 1070c-2, AS AMENDED].

*** Sec. 3.** AS 14.43.810 is amended to read:

Sec. 14.43.810. Alaska performance [MERIT] scholarship program established; regulations. (a) The Alaska **performance** [MERIT] scholarship program is established to provide scholarships for **Alaska residents who have attained an Alaska High School Diploma by Examination after January 1, 2011, or who are** high school graduates [WHO ARE ALASKA RESIDENTS] to attend a qualified postsecondary institution in the state.

(b) The department shall, in consultation with the commission, adopt regulations necessary to implement the **Alaska performance scholarship** program. The commission shall administer the daily operations of the **Alaska performance scholarship** program and financing of the **Alaska performance scholarship** program, including the procedures for applying for the scholarships, establishing standards for

and ensuring continuing compliance with programmatic standards, and requiring students to apply for other nonloan financial aid, consistent with federal law.

*** Sec. 4.** AS 14.43.820(a) is amended to read:

(a) Subject to appropriation, the commission shall award an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship to an applicant who

(1) is a resident of the state as defined in AS 01.10.055;

(2) **except as provided in (c) of this section,** graduated or will graduate within six months from a high school in the state;

(3) **except as provided in (d) of this section,** has completed a core academic curriculum **of** [IN] high school **level coursework** that includes

(A) four years of mathematics, four years of language arts, four years of science, and four years of social studies, one year of which may include a foreign language, an Alaska Native language, fine arts, or cultural heritage; or

(B) three years of mathematics, four years of language arts, three years of science, four years of social studies, and two years of a foreign language or an Alaska Native language;

(4) **except as provided in (c) of this section,** has a minimum grade-point average in high school of 2.5 or higher; the department shall set by regulation minimum requirements based on a substantially similar standard for districts that do not assign grades;

(5) has achieved a minimum score on a

(A) college entrance examination; or

(B) standardized examination designed to measure a student's level of preparedness to make the transition to work, as selected by the department; and

(6) is enrolled in good standing in a course of study at a qualified postsecondary institution in this state that is intended to result in the award of a certificate or degree.

*** Sec. 5.** AS 14.43.820 is amended by adding new subsections to read:

(c) Notwithstanding the eligibility requirements in (a)(2) and (4) of this

section, the department shall adopt regulations to provide for the eligibility of a student who has attained an Alaska High School Diploma by Examination in the state.

(d) The commissioner may waive a portion of the core academic requirements specified under (a)(3) of this section for not more than 12 additional months after a student graduates from a high school in the state or 24 months after a student attains an Alaska High School Diploma by Examination to provide an eligible applicant the opportunity to complete the academic requirements at a qualified postsecondary institution using a scholarship awarded under AS 14.43.825(a) or at a public high school in the state with a district sponsorship under (g) of this section if the applicant

(1) submits a timely application on a form approved by the commissioner;

(2) provides satisfactory proof that the applicant was unable to complete the academic requirements under (a)(3) of this section as a result of circumstances beyond the applicant's control, including

(A) illness or disability;

(B) a lack of reasonable access to the required coursework at a small or remote high school attended by the applicant in the state; and

(C) other circumstances prescribed by regulation adopted by the board.

(e) The commissioner shall approve or deny an application for a waiver submitted under (d) of this section within 30 days after receiving the application.

(f) An applicant who receives a waiver under (d) of this section, shall, within one year after approval of the waiver, provide satisfactory proof to the commissioner of completion of the core academic requirements specified under (a)(3) of this section.

(g) Notwithstanding a contrary provision in this title, a school district that agrees to sponsor a student for a waiver under (d) of this section may include a student who has been approved for a waiver under (d) of this section in the student count conducted under AS 14.17.600 as a full-time or part-time student if the student attends a school in the district for the purpose of completing the core academic requirements under (a)(3) of this section.

(h) In this section, "district" has the meaning given in AS 14.17.990.

* **Sec. 6.** AS 14.43.825(a) is amended to read:

(a) The maximum annual awards for the Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarships are as follows:

(1) the first award level is $4,755 and requires a

(A) 3.5 grade-point average or above **or a total score in the 90th percentile or above on the general educational development examination;** and

(B) [A] very high minimum score on a college entrance examination;

(2) the second award level is $3,566 and requires a

(A) 3.0 grade-point average or above **or a total score in the 80th percentile or above on the general educational development examination;** and

(B) [A] high minimum score on a college entrance examination;

(3) the third award level is $2,378 and requires a

(A) 2.5 grade-point average or above **or a total score in the 70th percentile or above on the general educational development examination;** and

(B) [A] moderately high minimum score on a college entrance examination.

* **Sec. 7.** AS 14.43.825(b) is amended to read:

(b) A student's eligibility for a scholarship terminates six years after the date the student **graduates** [GRADUATED] from high school **or attains a State of Alaska High School Diploma by Examination,** unless the student qualifies for an extension of time allowed by the department by regulation.

* **Sec. 8.** AS 14.43.825(f) is repealed and reenacted to read:

(f) Payment of a scholarship is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible scholarships, the commission may not award a scholarship to a new applicant, and the commission shall pay existing awards

on a pro rata basis for that fiscal year.

*** Sec. 9.** AS 14.43.830 is amended to read:

Sec. 14.43.830. Qualified postsecondary institutions. (a) The following institutions are qualified postsecondary institutions for purposes of awarding an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship:

(1) a university or college physically located in the state that [IS]

(A) **is** authorized to operate in the state under AS 14.48.020 or is exempt from authorization under AS 14.48.030(b)(1); [AND]

(B) **is** accredited by a regional **or national** accreditation association;

(C) has an advisory program established for incoming students that provides counseling related to course selection, career choice, and personal challenges; and

(D) provides courses and credits that can result in the issuance of a degree or certificate available at the institution within a time frame expected for that degree or certificate;

(2) a career and technical school program physically located in the state that **meets the standards established in (a)(1)(C) and (D) of this section and that** has been included on a list of certified career and technical school programs received from the Department of Labor and Workforce Development; the commission shall publish the list on or before June 30 of the year preceding enrollment.

(b) The Department of Labor and Workforce Development shall, in consultation with the Department of Education and Early Development, adopt regulations under AS 44.62 (Administrative Procedure Act) establishing criteria under which the Department of Labor and Workforce Development shall certify career and technical school programs in the state as eligible to participate in the Alaska **performance** [MERIT] scholarship program.

*** Sec. 10.** AS 14.43.849(4) is amended to read:

(4) "program" means the Alaska **performance** [MERIT] scholarship program established under AS 14.43.810 - 14.43.849;

*** Sec. 11.** AS 14.43 is amended by adding a new section to read:

Sec. 14.43.915. AlaskAdvantage education grant account and Alaska performance scholarship award account. (a) The AlaskAdvantage education grant account is created as an account in the general fund. Money may be appropriated to the account from the Alaska higher education investment fund under AS 37.14.750 and from other sources. The commission may use the money in the account to pay grants awarded under AS 14.43.400 - 14.43.420.

(b) The Alaska performance scholarship award account is created as an account in the general fund. Money may be appropriated to the account from the Alaska higher education investment fund under AS 37.14.750 and from other sources. The commission may use the money in the account to pay scholarships awarded to students under AS 14.43.810 - 14.43.849.

(c) Of the total amount available annually to the commission for payment of grants under AS 14.43.400 - 14.43.420 and for payment of scholarships under AS 14.43.810 - 14.43.849, one-third of the combined amount in the accounts established under (a) and (b) of this section shall be available solely for payment of grants awarded under AS 14.43.400 - 14.43.420. The commission shall annually allocate to all qualified applicants for scholarships awarded under AS 14.43.810 - 14.43.849 two-thirds of the combined amount in the accounts. If an insufficient number of qualified applicants are awarded scholarships under AS 14.43.810 - 14.43.849 before September 1 of each fiscal year, the balance of the account established in (b) of this section shall be transferred to the account established in (a) of this section for the payment of grants under AS 14.43.400 - 14.43.420 for that year. If an insufficient number of qualified applicants are awarded grants under AS 14.43.400 - 14.43.420 before the end of that fiscal year, the commissioner shall redeposit the remaining funds into the Alaska higher education investment fund established under AS 37.14.750.

(d) The commission shall reserve a percentage calculated under this subsection of the total amount available for awards in the accounts established under (a) and (b) of this section each year for award to students who graduate from a school district with an ADM of less than 800 or from a school that was operated by the Alaska State-Operated School System established under former AS 14.08.020. The

percentage reserved under this subsection shall be calculated by adding the ADMs of districts with an ADM of less than 800 and the number of students enrolled in a school that was operated by the Alaska State-Operated School System established under former AS 14.08.020 that is located in a district with an ADM of 800 or more and then dividing that number by the sum of the ADMs of all districts in the state.

(e) If an insufficient number of applicants apply for the available amount reserved under (d) of this section, the commission shall redeposit the remaining amount in the account from which the funds originated.

(f) In this section,

(1) "ADM" has the meaning given in AS 14.17.990;

(2) "district" has the meaning given in AS 14.17.990, but also includes a state boarding school under AS 14.16.

* **Sec. 12.** AS 14.45.130(a) is amended to read:

(a) A religious or other private school that elects to comply with AS 14.45.100 - 14.45.130 shall maintain permanent student records reflecting immunizations, physical examinations, standardized testing, academic achievement, courses taken at the school, and level of eligibility for an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship under AS 14.43.810 - 14.43.849.

* **Sec. 13.** AS 37.14 is amended by adding a new section to read:

Article 8A. Alaska Higher Education Investment Fund.

Sec. 37.14.750. Alaska higher education investment fund established. (a) The Alaska higher education investment fund is established in the general fund for the purpose of making grants awarded under AS 14.43.400 - 14.43.420 by appropriation to the account established under AS 14.43.915(a) and of making scholarship payments to qualified postsecondary institutions for students under AS 14.43.810 - 14.43.849 by appropriation to the account established under AS 14.43.915(b). Money in the fund does not lapse. The fund consists of

(1) money appropriated to the fund;

(2) income earned on investment of fund assets;

(3) donations to the fund; and

(4) money redeposited under AS 14.43.915(c).

(b) The legislature may appropriate any amount to the fund established in (a) of this section. Nothing in this section creates a dedicated fund.

(c) As soon as is practicable after July 1 of each year, the commissioner of revenue shall determine the market value of the fund established in this section on June 30 for the immediately preceding fiscal year. The commissioner shall identify 10 percent of that amount as available for appropriation as follows:

(1) one-third for the grant account established under AS 14.43.915(a), from which the Alaska Commission on Postsecondary Education may award grants; and

(2) two-thirds for the scholarship account established under AS 14.43.915(b), from which the Alaska Commission on Postsecondary Education may award scholarships.

(d) In this section, unless the context requires otherwise, "fund" means the Alaska higher education investment fund established in (a) of this section.

*** Sec. 14.** AS 43.20.014(a) is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state;

[AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 15.** AS 43.20.014(a), as amended by sec. 14, ch. 92, SLA 2010, is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 16.** AS 43.55.019(a) is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 17.** AS 43.55.019(a), as amended by sec. 21, ch. 92, SLA 2010, is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 18.** AS 43.56.018(a) is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment,

by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government; **and**

(7) the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 19.** AS 43.56.018(a), as amended by sec. 28, ch. 92, SLA 2010, is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school; **and**

(4) for the Alaska higher education investment fund under

AS 37.14.750.

* **Sec. 20.** AS 43.65.018(a) is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 21.** AS 43.65.018(a), as amended by sec. 35, ch. 92, SLA 2010, is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or

four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 22.** AS 43.75.018(a) is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 23.** AS 43.75.018(a), as amended by sec. 42, ch. 92, SLA 2010, is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 24.** AS 43.77.045(a) is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state;

[AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 25.** AS 43.77.045(a), as amended by sec. 49, ch. 92, SLA 2010, is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 26.** Section 8, ch. 14, SLA 2010, is repealed.

*** Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: ALASKA HIGHER EDUCATION INVESTMENT FUND. The Alaska higher education investment fund established in AS 37.14.750, enacted by sec. 12 of this Act, is the fund identified in sec. 20(f), ch. 5, FSSLA 2011.

*** Sec. 28.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Education and Early Development, the Department of Labor and Workforce Development, the Department of

Revenue, and the Alaska Commission on Postsecondary Education may adopt regulations necessary to implement changes made to their respective authorities by this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before July 1, 2012.

*** Sec. 29.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes is instructed to change the

(1) heading of art. 12 of AS 14.43 from "Alaska Merit Scholarship Program" to "Alaska Performance Scholarship Program";

(2) catch line for AS 14.43.820 from "Alaska merit scholarship program; eligibility" to "Alaska performance scholarship program; eligibility."

*** Sec. 30.** Sections 2, 4, 5 - 7, and AS 14.43.915(d) and (e), added by sec. 11 of this Act, take effect April 1, 2013.

*** Sec. 31.** AS 14.43.830(a)(1)(C) and (D), added by sec. 9 of this Act, and the amendment to AS 14.43.830(a)(2) made by sec. 9 of this Act take effect July 1, 2013.

*** Sec. 32.** Sections 15, 17, 19, 21, 23, and 25 of this Act take effect January 1, 2021.

*** Sec. 33.** Except as provided in secs. 30 - 32 of this Act, this Act takes effect immediately under AS 01.10.070(c).

SENATE CS FOR CS FOR HOUSE BILL NO. 104(FIN)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWENTY-SEVENTH LEGISLATURE - SECOND SESSION

BY THE SENATE FINANCE COMMITTEE

Offered:
Referred:

Sponsor(s): HOUSE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

A BILL

FOR AN ACT ENTITLED

"An Act renaming the Alaska performance scholarship and relating to the scholarship and tax credits applicable to contributions to the scholarship; relating to AlaskAdvantage education grant funding and to Alaska performance scholarship funding; relating to AlaskAdvantage education grant eligibility; establishing accounts and a fund for those purposes; making conforming amendments; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*** Section 1.** AS 14.03.113 is amended to read:

Sec. 14.03.113. District determination of scholarship eligibility. A school district shall determine whether a student who graduates from a high school in the district is eligible for an award of an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship under AS 14.43.810 - 14.43.849. If a student is eligible, the district shall state in the student's permanent record the highest level of funding for

which the student is eligible. A district shall provide a student with an opportunity to request that the district correct an error in the eligibility determination.

*** Sec. 2.** AS 14.43.415(a) is amended to read:

(a) For an applicant to be eligible for a grant under AS 14.43.400 - 14.43.420, the applicant must be

(1) a resident of this state;

(2) enrolled or about to be enrolled

(A) at an institution **located in the state that is**

(i) accredited by the United States Secretary of Education; or

(ii) approved to participate in the Alaska performance scholarship program as a qualified postsecondary institution under AS 14.43.830 [APPROVED TO PARTICIPATE IN FEDERAL FINANCIAL AID PROGRAMS UNDER 20 U.S.C. 1070 - 1099c-2, AS AMENDED, LOCATED IN THIS STATE]; and

(B) on at least a half-time basis; and

(3) able to demonstrate financial need in accordance with standards for determining financial need established by the commission [UNDER 20 U.S.C. 1070c-2, AS AMENDED].

*** Sec. 3.** AS 14.43.810 is amended to read:

Sec. 14.43.810. Alaska performance [MERIT] scholarship program established; regulations. (a) The Alaska **performance** [MERIT] scholarship program is established to provide scholarships for high school graduates who are Alaska residents to attend a qualified postsecondary institution in the state.

(b) The department shall, in consultation with the commission, adopt regulations necessary to implement the **Alaska performance scholarship** program. The commission shall administer the daily operations of the **Alaska performance scholarship** program and financing of the **Alaska performance scholarship** program, including the procedures for applying for the scholarships, establishing standards for and ensuring continuing compliance with programmatic standards, and requiring students to apply for other nonloan financial aid, consistent with federal law.

* **Sec. 4.** AS 14.43.820(a) is amended to read:

(a) Subject to appropriation, the commission shall award an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship to an applicant who

(1) is a resident of the state as defined in AS 01.10.055;

(2) graduated or will graduate within six months from a high school in the state;

(3) **except as provided in (c) of this section,** has completed a core academic curriculum **of** [IN] high school **level coursework** that includes

(A) four years of mathematics, four years of language arts, four years of science, and four years of social studies, one year of which may include a foreign language, an Alaska Native language, fine arts, or cultural heritage; or

(B) three years of mathematics, four years of language arts, three years of science, four years of social studies, and two years of a foreign language or an Alaska Native language;

(4) has a minimum grade-point average in high school of 2.5 or higher; the department shall set by regulation minimum requirements based on a substantially similar standard for districts that do not assign grades;

(5) has achieved a minimum score on a

(A) college entrance examination; or

(B) standardized examination designed to measure a student's level of preparedness to make the transition to work, as selected by the department; and

(6) is enrolled in good standing in a course of study at a qualified postsecondary institution in this state that is intended to result in the award of a certificate or degree.

* **Sec. 5.** AS 14.43.820 is amended by adding new subsections to read:

(c) The department shall waive a portion of the core academic requirements provided under (a)(3) of this section if that portion of the curriculum is not available to a student who attended a public school in the state in a district in which the student resides.

(d) Notwithstanding the eligibility requirements in (a)(2) - (4) of this section, the department shall adopt regulations to provide for the eligibility of a student who has attained a general education development diploma in the state.

*** Sec. 6.** AS 14.43.825(a) is amended to read:

(a) The maximum annual awards for the Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarships are as follows:

(1) the first award level is $4,755 and requires a

(A) 3.5 grade-point average or above **or a total score in the 90th percentile or above on the general education development diploma examination;** and

(B) [A] very high minimum score on a college entrance examination;

(2) the second award level is $3,566 and requires a

(A) 3.0 grade-point average or above **or a total score in the 80th percentile or above on the general education development diploma examination;** and

(B) [A] high minimum score on a college entrance examination;

(3) the third award level is $2,378 and requires a

(A) 2.5 grade-point average or above **or a total score in the 70th percentile or above on the general education development diploma examination;** and

(B) [A] moderately high minimum score on a college entrance examination.

*** Sec. 7.** AS 14.43.825(f) is repealed and reenacted to read:

(f) Payment of a scholarship is subject to appropriation and the availability of funds for expenditure under AS 37.14.750. If insufficient funds are appropriated or available in a fiscal year to pay all eligible scholarships, the commission may not award a scholarship to a new applicant, and the commission shall pay existing awards on a pro rata basis for that fiscal year.

*** Sec. 8.** AS 14.43.830 is amended to read:

Sec. 14.43.830. Qualified postsecondary institutions. (a) The following institutions are qualified postsecondary institutions for purposes of awarding an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship:

(1) a university or college physically located in the state that [IS]

(A) **is** authorized to operate in the state under AS 14.48.020 or is exempt from authorization under AS 14.48.030(b)(1); [AND]

(B) **is** accredited by a regional **or national** accreditation association;

(C) has an advisory program established for incoming students that provides counseling related to course selection, career choice, and personal challenges; and

(D) provides courses and credits that can result in the issuance of a degree or certificate available at the institution within a time frame expected for that degree or certificate;

(2) a career and technical school program physically located in the state that **meets the standards established in (a)(1)(C) and (D) of this section and that** has been included on a list of certified career and technical school programs received from the Department of Labor and Workforce Development; the commission shall publish the list on or before June 30 of the year preceding enrollment.

(b) The Department of Labor and Workforce Development shall, in consultation with the Department of Education and Early Development, adopt regulations under AS 44.62 (Administrative Procedure Act) establishing criteria under which the Department of Labor and Workforce Development shall certify career and technical school programs in the state as eligible to participate in the Alaska **performance** [MERIT] scholarship program.

* **Sec. 9.** AS 14.43.849(4) is amended to read:

(4) "program" means the Alaska **performance** [MERIT] scholarship program established under AS 14.43.810 - 14.43.849;

* **Sec. 10.** AS 14.43 is amended by adding a new section to read:

Sec. 14.43.915. AlaskAdvantage education grant account and Alaska performance scholarship award account. (a) The AlaskAdvantage education grant

account is created as an account in the general fund. Money may be appropriated to the account from the Alaska higher education investment fund under AS 37.14.750 and from other sources, as provided under (c) of this section. The commission may use the money in the account to pay grants awarded under AS 14.43.400 - 14.43.420.

(b) The Alaska performance scholarship award account is created as an account in the general fund. Money may be appropriated to the account from the Alaska higher education investment fund under AS 37.14.750 and from other sources, as provided under (c) of this section. The commission may use the money in the account to pay scholarships awarded to students under AS 14.43.810 - 14.43.849.

(c) Of the total amount available annually to the commission for payment of grants under AS 14.43.400 - 14.43.420 and for payment of scholarships under AS 14.43.810 - 14.43.849, one-third of the combined amount in the accounts established under (a) and (b) of this section shall be available solely for payment of grants awarded under AS 14.43.400 - 14.43.420. The commission shall annually allocate to all qualified applicants for scholarships awarded under AS 14.43.810 - 14.43.849 two-thirds of the combined amount in the accounts. If an insufficient number of qualified applicants are awarded scholarships under AS 14.43.810 - 14.43.849 before October 1 of each fiscal year, the balance of the account established in (b) of this section shall be transferred to the account established in (a) of this section for the payment of grants under AS 14.43.400 - 14.43.420 for that year.

(d) The commission shall reserve a percentage calculated under this subsection of the total amount available for awards in the accounts established under (a) and (b) of this section each year for award to students who graduate from a school district with an ADM of less than 800 or from a school that was operated by the Alaska State-Operated School System established under former AS 14.08.020. The percentage reserved under this subsection shall be calculated by adding the ADMs of districts with an ADM of less than 800 and the number of students enrolled in a school that was operated by the Alaska State-Operated School System established under former AS 14.08.020 that is located in a district with an ADM of 800 or more and then dividing that number by the sum of the ADMs of all districts in the state.

(e) If an insufficient number of applicants apply for the available amount

reserved under (d) of this section, the commission shall redeposit the remaining amount in the Alaska higher education investment fund established under AS 37.14.750.

(f) In this section,

(1) "ADM" has the meaning given in AS 14.17.990;

(2) "district" has the meaning given in AS 14.17.990, but also includes a state boarding school under AS 14.16.

*** Sec. 11.** AS 14.45.130(a) is amended to read:

(a) A religious or other private school that elects to comply with AS 14.45.100 - 14.45.130 shall maintain permanent student records reflecting immunizations, physical examinations, standardized testing, academic achievement, courses taken at the school, and level of eligibility for an Alaska **performance** [MERIT SCHOLARSHIP PROGRAM] scholarship under AS 14.43.810 - 14.43.849.

*** Sec. 12.** AS 37.14 is amended by adding a new section to read:

Article 8A. Alaska Higher Education Investment Fund.

Sec. 37.14.750. Alaska higher education investment fund established. (a) The Alaska higher education investment fund is established in the general fund for the purpose of making grants awarded under AS 14.43.400 - 14.43.420 by appropriation to the account established under AS 14.43.915(a) and of making scholarship payments to qualified postsecondary institutions for students under AS 14.43.810 - 14.43.849 by appropriation to the account established under AS 14.43.915(b). Money in the fund does not lapse. The fund consists of

(1) money appropriated to the fund;

(2) income earned on investment of fund assets; and

(3) donations to the fund.

(b) The legislature may appropriate any amount to the fund established in (a) of this section. Nothing in this section creates a dedicated fund.

(c) As soon as is practicable after July 1 of each year, the commissioner of revenue shall determine the market value of the fund established in this section on June 30 for the immediately preceding fiscal year. The commissioner shall identify 10 percent of that amount as available for appropriation as follows:

(1) one-third for the grant account established under AS 14.43.915(a), from which the Alaska Commission on Postsecondary Education may award grants; and

(2) two-thirds for the scholarship account established under AS 14.43.915(b), from which the Alaska Commission on Postsecondary Education may award scholarships.

(d) In this section, unless the context requires otherwise, "fund" means the Alaska higher education investment fund established in (a) of this section.

*** Sec. 13.** AS 43.20.014(a) is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state;

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 14.** AS 43.20.014(a), as amended by sec. 14, ch. 92, SLA 2010, is amended to read:

(a) A taxpayer is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 15.** AS 43.55.019(a) is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 16.** AS 43.55.019(a), as amended by sec. 21, ch. 92, SLA 2010, is amended to read:

(a) A producer of oil or gas is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 17.** AS 43.56.018(a) is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a

nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 18.** AS 43.56.018(a), as amended by sec. 28, ch. 92, SLA 2010, is amended to read:

(a) The owner of property taxable under this chapter is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 19.** AS 43.65.018(a) is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-

year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 20.** AS 43.65.018(a), as amended by sec. 35, ch. 92, SLA 2010, is amended to read:

(a) A person engaged in the business of mining in the state is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 21.** AS 43.75.018(a) is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 22.** AS 43.75.018(a), as amended by sec. 42, ch. 92, SLA 2010, is amended to read:

(a) A person engaged in a fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

*** Sec. 23.** AS 43.77.045(a) is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted **for**

(1) [FOR] direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) [FOR] secondary school level vocational education courses, programs, and facilities by a school district in the state;

(3) [FOR] vocational education courses, programs, and facilities by a state-operated vocational technical education and training school;

(4) [FOR] a facility or an annual intercollegiate sports tournament by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(5) [FOR] Alaska Native cultural or heritage programs and educational support, including mentoring and tutoring, provided by a nonprofit agency for public school staff and for students who are in grades kindergarten through 12 in the state; [AND]

(6) [FOR] education, research, rehabilitation, and facilities by an institution that is located in the state and that qualifies as a coastal ecosystem learning center under the Coastal America Partnership established by the federal government**; and**

(7) the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 24.** AS 43.77.045(a), as amended by sec. 49, ch. 92, SLA 2010, is amended to read:

(a) In addition to the credit allowed under AS 43.77.040, a person engaged in a floating fisheries business is allowed a credit against the tax due under this chapter for cash contributions accepted

(1) for direct instruction, research, and educational support purposes, including library and museum acquisitions, and contributions to endowment, by an Alaska university foundation or by a nonprofit, public or private, Alaska two-year or four-year college accredited by a regional accreditation association;

(2) for secondary school level vocational education courses and programs by a school district in the state; [AND]

(3) by a state-operated vocational technical education and training school**; and**

(4) for the Alaska higher education investment fund under AS 37.14.750.

* **Sec. 25.** Section 8, ch. 14, SLA 2010, is amended to read:

TRANSITION: **PERFORMANCE SCHOLARSHIP** PROGRAM STANDARDS AND IMPLEMENTATION FOR INITIAL SCHOOL YEARS. Notwithstanding any contrary provision of this Act, the Department of Education and Early Development and the Department of Labor and Workforce Development, after consultation with the Alaska Commission on Postsecondary Education, may adopt regulations under AS 44.62 (Administrative Procedure Act) to implement their respective duties under the Alaska **performance** [MERIT] scholarship program established in AS 14.43.810, enacted by sec. 5**, ch. 14, SLA 2010** [OF THIS ACT], so that a student

(1) may be eligible for **an Alaska performance scholarship** [THE PROGRAM] even though the student did not fully meet the required core academic curriculum for the school years beginning July 1, 2010, through June 30, 2014; and

(2) who graduated from high school in this state after January 1, 2011, and before July 1, 2011, and meets eligibility requirements for the **Alaska performance scholarship** program may apply for a scholarship on or after January 1, 2011, for enrollment in a program of study beginning on or after July 1, 2011.

*** Sec. 26.** The uncodified law of the State of Alaska is amended by adding a new section to read:

TRANSITION: REGULATIONS. The Department of Education and Early Development, the Department of Labor and Workforce Development, the Department of Revenue, and the Alaska Commission on Postsecondary Education may adopt regulations necessary to implement changes made to their respective authorities by this Act. The regulations take effect under AS 44.62 (Administrative Procedure Act), but not before July 1, 2012.

*** Sec. 27.** The uncodified law of the State of Alaska is amended by adding a new section to read:

REVISOR'S INSTRUCTION. The revisor of statutes is instructed to change the

(1) heading of art. 12 of AS 14.43 from "Alaska Merit Scholarship Program" to "Alaska Performance Scholarship Program";

(2) catch line for AS 14.43.820 from "Alaska merit scholarship program; eligibility" to "Alaska performance scholarship program; eligibility."

*** Sec. 28.** Section 26 of this Act takes effect immediately under AS 01.10.070(c).

*** Sec. 29.** AS 14.43.830(a)(1)(C) and (D), added by sec. 8 of this Act, and the amendment to AS 14.43.830(a)(2) made by sec. 8 of this Act take effect July 1, 2013.

*** Sec. 30.** Sections 14, 16, 18, 20, 22, and 24 of this Act take effect January 1, 2021.

*** Sec. 31.** Except as provided in secs. 28 - 30 of this Act, this Act takes effect July 1, 2012.

State of Alaska
Department of Revenue

Commissioner Bryan Butcher

SEAN PARNELL, GOVERNOR
333 Willoughby Avenue, 11th Floor
P.O. Box 110400

February 24, 2012

The Honorable Bert Stedman
The Honorable Lyman Hoffman
Co-Chairs, Senate Finance Committee
Alaska State Senate
Juneau, AK 99801

Dear Senators Stedman and Hoffman:

Attached you will find an update to previous analyses we have provided regarding the Senate Finance Committee Substitute to HB 104. The purpose of this update is to respond to the Committee's request as to how much of an additional appropriation is necessary in order to cover costs of the AlaskAdvantage Education Grant program.

Assuming an asset allocation which achieves 5% earnings, we project an additional appropriation of $160 million in FY2013 will be needed. This appropriation is a result of the House amendments. Governor Parnell's Alaska Performance Scholarship Fund, as proposed, does not require the additional appropriation.

Please contact me if you would like more detail or any additional information. We appreciate the opportunity to provide this to the Committee.

Sincerely,

Angela Rodell
Deputy Commissioner

cc: Darwin Peterson, Senate Finance Committee Aide

Purpose: To project total return as well as understand effect of operating expenditures

AK Performance Scholarship Fund

($ Thousand)

February 22, 2012

The Honorable Bert Stedman, Co-chair
Senate Finance Committee
Alaska State Legislature
State Capitol Room 516
Juneau, Alaska 99801

Dear Senator Stedman:

The following information is provided in response to requests made at the February 15, 2012 meeting of the Senate Finance Committee.

1. **What are the rates of APS eligibility and usage, aggregated by school size?**
The table below aggregates APS eligibility specifically by ranges of high school size.

2011 Alaska Public High School Graduates

Size of School Graduating Class	Total Graduates	Eligible Graduates	Received Scholarship	# of Schools
All Schools	8,064	2,338	835	
Greater than 100	4,729	1,680	560	20
51 to 100	1,659	363	143	22
21 to 50	690	204	93	22
11 to 20	405	48	20	29
6 to 10	278	21	10	37
5 or fewer	303	22	9	116

2. **What are the national college-going rate and the Alaska college-going rate?**
This information was misreported by me during last week's discussion. According to the National Center for Higher Education Management Systems (NCHEMS), the national college-going rate in 2008 (most recent year available) was 63.3%, and the Alaska-specific rate was 45.7%, the lowest of any state in the nation. The college-going rate is defined as the number of first-time freshmen who graduated from high school in the past year and are enrolled in postsecondary institutions anywhere in the United States, divided by the number of public and private high school graduates.

printed on recycled paper

3. **Relative to math remediation/preparatory courses, what level of math is generally considered college level?**
   The University of Alaska reports that calculus is generally considered entry level for the college-level mathematics course sequences.

4. **How many students are getting simultaneous awards from the AlaskAdvantage Education Grant (AEG) and the Alaska Performance Scholarship (APS)?**
   This number remains a moving target since spring awards have not been completed and additional AEGs are awarded as funds become available as a result of changes in students' statuses. At this time, it is anticipated we will have approximately 20 students who receive both AEG and APS awards for 2011/2012 enrollment.

5. **Where did students with AEGs enroll?**

AEG Awards by School of Attendance, *through 12/31/2011*

School	# of Students	Total Dollars Awarded
Alaska Pacific University	11	$24,000
AVTEC	9	$19,500
Alaska Career College	12	$31,500
Charter College	107	$151,375
Ilisagvik College	7	$10,500
UAA	1,271	$1,896,375
UAF	449	$660,375
UAS	123	$168,000
Wayland Baptist University	20	$20,000
Total	2,009	$2,981,625

6. **What is the Alaska college-going rate by district?**
   Please see Attachment 1.

7. **What are the specific legal requirements relative to small cell suppression when reporting APS outcomes, and what options are available to provide legislators with specific numbers relative to APS eligibility and usage by district and high school?**
   The Family Education Rights and Privacy Act, or FERPA (20 U.S.C. § 1232g), provides parents (or students, if over 18) the right to consent to the disclosure of personally identifiable information (PII) from education records, with certain exceptions set out in law. PII is defined as information that, alone or in combination, is linked or linkable to a specific student and that would allow a reasonable person (an "outside observer"), who does not have

personal knowledge of the relevant circumstances, to identify an individual student or to ascribe specific academic characteristics to an individual with reasonable certainty.

The Department of Education and Early Development works with ACPE to ensure appropriate protocols are followed and will be responding directly to the committee's inquiry. However, recent changes in federal guidance relative to FERPA provide an opportunity to re-examine compliance protocols. Such re-examination is also timely relative to policymakers' need for APS outcomes information.

To best inform this re-examination, and to ensure we maximize information availability without putting compliance at risk, ACPE will consult with a recognized FERPA expert. We expect to receive guidance relative to changes in administrative law recommended to classify receipt of an APS award as FERPA directory information, which may in future years be considered public information.

Alaska did submit a request directly to the federal FERPA compliance office several months ago for guidance relative to the publication of APS data, but have yet to receive a response.

Based on an internal review, EED and ACPE have concurred that, in a greater number of instances than originally published, release of the annual number of APS recipients by school district is reasonable and complies with all applicable FERPA requirements. A new list of graduates and APS recipients by school district is provided as the second attachment to this document.

We look forward to providing additional detail relative to FERPA requirements upon completion of legal review and receipt of additional external expert analyses.

Thank you for the opportunity to discuss the Alaska Performance Scholarship outcomes report. I hope this information is responsive to the inquiries. I would be pleased to provide any additional information requested.

Sincerely,

Diane Barrans
Executive Director

2. Summary of APS recipients by district

Attachment 1: Alaska College-Going Rates by District

The table below presents information available from the National Student Clearinghouse (NSC). AY11 Alaska high school graduates were matched to NSC data to identify those pursuing postsecondary education, both in-state and out-of-state. Students enrolled in non-collegiate postsecondary training programs such as apprenticeships or non-degree vocational training are not included in the college-going rates calculated from NSC numbers.

NSC collects its information directly from postsecondary institutions. A student's attendance is considered to be directory information under FERPA, and is disclosable by the institution unless the student requests that such information not be shared. When this occurs, the institution does not report the identity of that student to NSC. This maintains compliance with FERPA, but may understate the actual number of graduates attending postsecondary institutions.

School District	Attending Postsecondary			Not Found in NSC	Grand Total

Statewide Public	**8,064**	**2,322**	**29%**	**835**

NOTES: ***Other Districts w/ Graduates*** includes twenty five school districts with fewer than five APS-eligible students in AY11. These districts were: Aleutians East, Annette Island, Bering Strait, Bristol Bay, Chatham, Chugach, Craig City, Dillingham, Hoonah, Hydaburg, Iditarod, Kake , Kashunamiut, Klawock, Kuspuk , Lake and Peninsula , Lower Yukon, Northwest Arctic, Pribilof, Saint Mary's, Southeast Island , Southwest Region, Yakutat, Yukon Flats, and Yupiit. Three districts (Aleutian Region, Pelican and Tanana) had no high school seniors and/or graduates in AY11.

1) The committee substitute amends subsection (3) on page 3, line 8 – in the previous version eligibility for a performance scholarship was based on a student's completion of a core academic curriculum in high school. The change in the committee substitute allows a student to complete a core academic curriculum of high school level coursework. Some students take advanced high school courses in the 8th grade and that coursework should apply.

2) That same section references an exemption to the core academic curriculum found in section 5 at the bottom of page 3. It provides a waiver of any portion of the core academic curriculum if those courses aren't made available.

3) Subsection (d) was also included to allow a mechanism for students who attain a General Education Development diploma or GED. On that same page in section 6 you will see that language was added whereby a student who scores in the 90th percentile on the GED would be eligible for the highest scholarship award. A score in the 80th percentile would result in eligibility for the second highest award level and a score in the 70th percentile would make a student eligible for the third award level.

4) On page 5, line 7, the words "or national" was inserted so qualified institutions in the state could be accredited by either a regional or national accreditation association.

5) At the bottom of page 5, section 10 creates two subaccounts, the AlaskaAdvantage education grant account and the Alaska Performance Scholarship award account. Money would be deposited into these accounts from the Alaska Higher Education Investment Fund. This last fund I mentioned is a new fund recommended by the Administration where the $400 million appropriated last year to a subaccount of the Alaska Housing Finance Corporation would be deposited. (appropriation required)

6) Sections (c) on line 10 and section (d) on line 21 of page 6 are both new. Section (c) is the 1/3 – 2/3 concept whereby one-third of the amount available each year from the Alaska Higher Education Investment Fund would be made available for the AlaskaAdvantage grants and two-thirds would be for the performance scholarships. It also states that if there are an insufficient number of qualified applicants eligible for the pool of funds available for the performance scholarships, the balance remaining would be allocated to the AlaskaAdvantage grant program.

7) Section (d) creates a mechanism for preserving a proportional amount of funds for students in a school district with an Average Daily Membership of less than 800. This amount would be calculated by taking the statewide percentage of students in a school district of 800 students or less and that same percentage of funds would be reserved for those students. For example, if 25% of the students in Alaska are enrolled in these small school districts, then 25% of the funds available for grants and scholarships would first be made available to those students. Subsection (e) states that if an insufficient

number of those students qualify, then the remaining funds will be redeposited back into the Alaska Higher Education Investment Fund.

8) Section 12 on page 7 creates the Alaska Higher Education Investment Fund. Subsection (c) on the bottom of page 7 establishes the payout method from this umbrella fund into the two subaccounts. Annually, 10 percent of the amount available in the Fund would be made available for appropriation. 1/3 of that amount would go into the AlaskaAdvantage education grant account and 2/3 would go into the Alaska Performance Scholarship award account. This payout method will need to be revisited.

9) Sections 13 through 24 adds the Alaska higher education investment fund as an eligible recipient for are all the statutory tax credits allowed for contributions to education. Sections 13 and 14 apply to the state corporate income tax. Sections 15 and 16 apply to the oil and gas production tax. Sections 17 and 18 apply to the oil and gas property tax. Sections 19 and 20 apply to the mining license tax. Sections 21 and 22 apply to the fisheries business tax. Sections 23 and 24 apply to the fisheries resource landing tax. The reason why each one of these tax credits are referenced twice is because of changes we made to the tax credits in previously enacted legislation which would have sunset them in 2021.

10) Finally, sections 29 and 30 on page 16 have new effective dates. Section 29 establishes a delayed effective date of July 1, 2013 for section 8 of the bill. This section describes

the conditions a postsecondary institution must meet in order to receive scholarship funds. Basically it says they have to provide an advisory program for incoming students and offer courses that will result in the issuance of a degree within an expected time frame.

11) The January 1, 2021 effective date in section 30 apply to all the second referenced tax credit provisions which would sunset in 2021. With this effective date, contributions to the Alaska Higher Education Investment Fund will be permanent.

February 14, 2012

The Honorable Bert Stedman
The Honorable Lyman Hoffman
Co-Chairs, Senate Finance Committee
Alaska State Senate
Juneau, AK 99801

Dear Senators Stedman and Hoffman:

Attached you will find an update to the analysis we provided on January 30, 2011 for the Senate Finance Committee Substitute to HB 104. The purpose of this update is to reflect revisions made to expenditures under the fund along with a longer time forecast as well as to give indications of the minimum investment return needed.

The first chart assumes a return of 6.85%, similar to the Power Cost Equalization Fund or the CBRF – Subaccount. The asset allocation is comprised of 41% Broad Market Fixed Income, 27% Domestic Equities and 32% International Equities. The second chart assumes a return of 5.00%. The asset allocation is comprised of 71% Broad Market Fixed Income, 19% Domestic Equities and 10% International Equities.

We believe both of the scenarios provided give the Committee both a conservative estimation along with a prudent investment strategy that while assumes more risk, provides for greater return.

As you will note the projected return under either set of assumptions appears to be sufficient to cover the expected payments relative to the Alaska Performance Scholarships, as proposed by Governor Parnell. However, amendments to the bill have expanded the purpose of the fund to cover costs of the AlaskAdvantage Education Grant program. In order to avoid an erosion of the principal of the Alaska Performance Scholarship Fund, other general fund appropriations may be necessary to cover all the purposes of this bill.

Please contact me if you would like more detail or any additional information. We appreciate the opportunity to provide this to the Committee.

Sincerely,

Angela Rodell

February 10, 2012

The Honorable Bert Stedman
Co-Chair Finance Committee
Alaska State Senate
Capitol, Room 516
Juneau, AK 99801

Dear Co-Chair Stedman:

The following represents the Parnell administration's response to certain proposals to modify the Alaska Performance Scholarship's structure through HB104, a bill currently in Senate Finance.

Context

The Alaska Performance Scholarship (APS) is intended to be "an invitation to excellence" with the goal of encouraging students, schools, and parents to set their standards high so that more of Alaska's young people are fully prepared to be successful in their postsecondary education, whether at a college, university or in career training. The eligibility criteria for APS are aligned to standards that reduce the need for remediation after high school. APS also rewards students for academic achievement beyond the minimum required for high school graduation. As importantly, it challenges schools which have not previously done so to step up and offer what Alaska's students need and deserve to better meet the challenges of their future and the workforce in which they will be a part.

Proposal: Create a Statutory District Waiver of Curricular Requirements

The Administration rejects the proposal that a loophole is needed in state law that would accommodate school districts which elect not to add or make available to their students, through a growing menu of options, the course content required for APS eligibility. In order to have the desired outcome of increasing opportunities and likelihood for students striving to be prepared for postsecondary education, a uniformly high set of standards for program offerings needs to be sustained.

However, it is reasonable to conclude that it may take some districts longer than others to incorporate the necessary components into their schools' course offerings. Anticipating that process, the State Board of Education and Early Development created a student-centered safety net by regulation: 4 AAC 43.035 Grace Period for Curriculum Requirements. This regulation

provides that safety net to students by allowing the commissioner to grant otherwise eligible students a grace period to satisfy a gap in curricular requirements. The grace period grants students one extra year after graduation to complete the curriculum requirements of 4 AAC 43.030. Moreover, during the grace period the student, if enrolled in a participating institution, may apply for and receive the scholarship while potentially working on both high school and college credits simultaneously.

The current regulation sunsets after the 2012 school year but, should school districts require a longer period of time to make available the necessary course, could be extended for an appropriate period of time. With foresight, this will allow districts a definitive time period in which to assist their students in accessing the necessary courses.

Proposal: Create a Statutory Waiver of Rigorous Curriculum and High School Graduation

For reasons related to the previous discussion, the Administration objects to any proposal that would substantially dilute APS' fundamental components. The vision and purpose of the APS is to incent students to take and master academic content which prepares them to advance to postsecondary education with a much greater likelihood that they will not need to spend time and resources on the remedial course work which, data show, more often than not leads to an educational dead end. The first year of data preliminarily confirms that goal, through APS' existing structure, can be achieved with only 27% of APS recipients needing remedial courses compared to 64% of non-APS recipients.

During the first several years of scholarship implementation, APS requirements will increase in rigor and preparation above and beyond minimum graduation requirements. Incorporation of a General Equivalency Diploma (GED) alternative would purport to offer students an even less rigorous standard than high school graduation. There would be an anticipated effect that students receiving a GED may actually require more remediation than a student with a diploma and significantly more than current APS qualifiers.

Marketing the concept to our young people that a GED route to the APS is viable is not only contrary to the stated purpose of the scholarship, but is directly opposed to the goal of incentivizing students to: stay in school, take challenging courses, and prepare to succeed after high school. Additionally, the offering of a supposed GED pathway, would immediately be recognized as a "bait and switch" option when GED recipients attempted to achieve the necessary scores on required college entrance exams and overwhelmingly failed to achieve the minimums needed for APS eligibility. It is imperative that we deal honestly with teenagers weighing the impacts of their decisions to drop out or stay in their secondary education program.

APS, as it currently exists, says to set your goals high and work hard and you will be recognized and rewarded. The GED route says that you don't even have to graduate and you *could* still be rewarded. These messages are contradictory and not supported by data on the postsecondary outcomes for GED recipients.

From a policy perspective it is instructive to note that the branches of U.S. military service have become extremely restrictive in terms of accepting GED recipients as enlistees. This policy shift was based upon years of research on military enlistees which resulted in data that showed GED recipients had service attrition rates of twice those with a high school diploma or some college credit. Furthermore, studies on the impact of making GEDs available to

teenagers suggest that the mere fact the GED appears to be an "equivalent" credential may increase the high school dropout rates. The Administration is staunchly opposed to any modification of APS that would further mislead our young people into perceiving the GED track to be, in any way, comparable and leading to the same rewards as the rigorous standards associated with Alaska's scholarship.

Proposal: Create Two APS Funding Priority Tiers Based on the Number of Students in a District

The Administration supports the structure of the existing statutes and as clarified in HB104 that requires, in the event of a funding shortfall, APS-eligible students would receive scholarship amounts on a pro rata basis. We do not believe that it is sound public policy to reserve any portion of scholarship funds based upon the school district size from which students graduated. Governor Parnell seeks to fully fund all eligible students because they have, in equal measure, satisfied the eligibility requirements—inclusive of students from small districts.

Using district size as a distinguishing factor fails to recognize more influential factors relative to APS-eligibility such as socio-economic status and race/ethnicity. Under the district-size amendment, assuming a shortfall in funding, based on the statistics today, most beneficiaries would not be rural kids. Those prioritized beneficiaries would be students from small cities with a higher proportions of educated parents such as Unalaska, Skagway, Wrangell, and Petersburg. Notwithstanding the public policy issue, there very well may be equal protection concerns if the outcome is discrimination in favor of small districts' graduates. Again, this would not be a policy the Administration would advance or support.

Thank you for the opportunity to offer these comments. If you or the committee members have additional questions or would like additional information, please contact me at 465-2802 or Diane Barrans at 465-6740.

Sincerely,

Mike Hanley

Mike Hanley

The Honorable Bert Stedman
The Honorable Lyman Hoffman
Co-Chairs, Senate Finance Committee
Alaska State Senate
Juneau, AK 99801

January 30, 2012

Dear Senators Stedman and Hoffman:

On January 25, 2012 we sent you our response to questions raised during the January 18th hearing. The pro forma forecast of interest earnings assumed the fund would stay under Alaska Housing Capital Corporation and remain in GeFONSI. As of January 25th, the asset allocation for GeFONSI is 58.98% in the Short-term pool and 41.02% in the Intermediate Fixed Income pool. If the funds were moved to its own endowment fund as contemplated under HB 104 and we assumed the same asset allocation as currently utilized by the Constitutional Budget Reserve Fund – Special Subaccount, we would project the following result:

AK Performance Scholarship Fund

($ Thousands)

	2012	2013	2014	2015	2016	2017	2018
Principal Assets							
Beginning Assets	-	401,736.0	413,744.6	422,237.2	427,052.0	429,999.0	431,833.9
Total Investment Return	1,736.0	27,005.3	27,684.2	28,124.9	28,381.9	28,540.3	28,563.2
Transferred as Grants	-	(6,996.2)	(7,625.1)	(8,310.8)	(8,726.3)	(9,162.4)	(9,619.0)
Transferred as Scholarships	-	(8,000.5)	(11,566.5)	(14,999.2)	(16,708.7)	(17,542.9)	(20,087.6)
Net contribution/withdrawals	400,000.0	-	-	-	-	-	-
Ending Assets	401,736.0	413,744.6	422,237.2	427,052.0	429,999.0	431,833.9	430,690.5
Annual Growth %	N/A	2.99%	2.05%	1.14%	0.69%	0.43%	-0.27%

This asset allocation is comprised of 41% Broad Market Fixed Income, 27% Domestic Equities and 32% International Equities and is projected to earn an annual rate of return of 6.85%. We have also calculated the probability of a negative return over 1 year to be 24.95% for this asset allocation.

We believe both of the scenarios provided give the Committee both a conservative estimation along with a prudent investment strategy that while assumes more risk, provides for greater return. Investment returns for GeFONSI and the CBRF Special Subaccount are reviewed

quarterly with the Commissioner, myself and the Chief Investment Officer and any needed adjustments are made.

Please contact me if you would like more detail or any additional information. We appreciate the opportunity to provide this to the Committee.

Sincerely,

Angela Rodell

SUBJECT: Response to questions asked of the Department of Revenue at the January 18, 2012 Senate Finance Committee meeting

Dear Senators Stedman and Hoffman:

Thank you for giving us a chance to respond to questions regarding HB 104. I apologize for the delay in getting you this information.

First, the scholarship fund generated approximately $868,000, equating to approximately 0.6%. In the chart below, we forecasted earnings vs. payouts assuming the historical GeFONSI rate of 3.2% and we assumed draws would be made twice a year.

January 20, 2012

The Honorable Bert Stedman, Co-Chair
Senate Finance Committee
Alaska State Senate
State Capitol, Room 516
Juneau, Alaska 99801

Dear Senator Stedman:

The following information is provided as follow-up to my January 18, 2012 testimony to the members of the Finance Committee regarding CSHB104 (RLS). Committee members requested information about the numbers of applicants and recipients of both Alaska Performance Scholarships (APS) and AlaskAdvantage Education Grants (AEG) for the 2011-12 year.

That information follows, however, please bear in mind that with respect to the numbers of actual recipients, these are preliminary statistics that will likely have modest changes between now and the end of the 2012 academic year due to changes in students' enrollment and eligibility statuses.

For both AEG and APS purposes, the application is the Free Application for Federal Student Aid (FAFSA). 7,753 Alaska residents filed the 2011-12 FAFSA by the program deadline, which was June 30, 2011, indicating they were considering attending at least one Alaska institution.[1] As of December 1, 2011, AEGs had been awarded to 2,009 applicants for attendance at nine Alaska institutions.[2] Approximately 5,000 students were certified as enrolled in Alaska institutions. However, in developing ACPE's fiscal note relative to costs of fully funding this program, based upon prior year experience I have estimated that between 4,400 and 4,500 of the students meet the AEG award criteria of being: (1) enrolled at least half-time; (2) in good academic standing; and, (3) matriculated into a certificate or degree program.

Relative to APS-eligible 2011 graduates, 2,322 students met the initial eligibility requirements; as of January 1, 902 eligible students had received APS awards. As I indicated to the committee, the 2012 Alaska Performance Scholarship Outcomes Report is scheduled to be transmitted to the legislative members on or before the statutory deadline of January 27, 2012. Please note that the statistics in the report are primarily referencing a snapshot of data from November 14, 2011, and so vary slightly from these numbers. Additional preliminary APS

[1] On the FAFSA filers can list multiple institutions with which the FAFSA data will be shared.
[2] Alaska Pacific University, AVTEC, Alaska Career College, Charter College, Ilisagvik College, UAA, UAF, UAS and Wayland Baptist

printed on recycled paper

statistics can be found online at http://akadvantage.alaska.gov/Research/APS_Statistics.aspx. These statistics will be updated following the end of the Spring 2012 term.

I hope this information is responsive to the inquiry. Please let me know if there is additional information I can provide.

Respectfully,

Diane Barrans
Executive Director

Governor Sean Parnell
STATE OF ALASKA

January 14, 2011

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault,

It is time now to sustainably fund the performance scholarships we so diligently worked together on last year. Under the authority of Article III, Section 18, of the Alaska Constitution, I am transmitting a bill renaming the Alaska Merit Scholarship to the Alaska Performance Scholarship; relating to tax credits applicable to contributions for the scholarships; and establishing the Alaska Performance Scholarship investment fund and the Alaska Performance Scholarship award fund. This bill would create funding mechanisms for the Alaska Performance Scholarship that are in accordance with recommendations of the Alaska State Legislature's Joint Higher Education Scholarship Funding Task Force.

The Alaska Performance Scholarship incentivizes Alaska students to take a rigorous curriculum and earn scholarships for post-secondary education. This will lead to increased academic performance in our high schools, increased parental involvement, and increased graduation rates. More students will graduate prepared to enter and complete postsecondary education and training in Alaska. The scholarship helps a variety of students – those who seek career and technical training as well as academic studies – to realize their dreams through their own hard work.

The bill creates an Alaska Performance Scholarship investment fund. The fund would consist of appropriations to the fund, donations to the fund, and income earned on investments of fund assets. Also, the bill would create the Alaska Performance Scholarship award fund to make scholarship awards. The bill would authorize certain tax credits applicable to contributions to the scholarship.

The graduating class of 2011 will be the first students eligible for this opportunity. I urge your prompt and favorable action on this important measure.

Sincerely,

Sean Parnell
Governor

RESOLUTION NUMBER 11-01

RESOLUTION TO ENDORSE THE ALASKA PERFORMANCE SCHOLARSHIP

WHEREAS, the Alaska Workforce Investment Board is a private industry driven public organization that is accountable through its members including representatives from business and industry, education, organized labor, and government to the residents, the Legislature and the Governor of Alaska;

WHEREAS, the Alaska Workforce Investment Board acts as the lead state planning and coordinating entity for state human resource programs involving employment training, career and technical education, and workforce development;

WHEREAS, the Alaska Workforce Investment Board recognizes and values the attributes that the Alaska Performance Scholarship provides to Alaskans graduating from an Alaskan high school;

WHEREAS, the Alaska Workforce Investment Board has noted the percentage of Alaskans entering postsecondary education is among the lowest in the nation;

WHEREAS, there is a growing drop-out rate and non-graduation rate in Alaska's secondary schools;

WHEREAS, the Alaska Workforce Investment Board believes that the scholarship program will provide incentives to Alaska students to attain higher performance in secondary school, complete their high school diploma, and plan to attend postsecondary education;

WHEREAS, the scholarships will also help lower the cost of education for Alaska students and leave them in better financial status as they complete certifications or degrees; and

NOW THEREFORE BE IT RESOLVED that the Alaska Workforce Investment Board endorses the Alaska Performance Scholarship.

CERTIFICATION
The Alaska Workforce Investment Board held a meeting duly and regularly called, noticed, and convened this 23rd day of February, 2011 and the foregoing Resolution was adopted unanimously at said meeting.

Signed this 23rd day of February, 2011.

Jim Lynch, Chair
Alaska Workforce Investment Board

The Honorable Alan Dick
Chair, House Education Committee
Alaska House of Representatives
Alaska State Capitol, Room 104
Juneau, Alaska 99801

Dear Mr. Chair and Members of the House Education Committee:

Thank you for the opportunity to meet jointly with the House and Senate Education Committees yesterday while the State Board of Education and Early Development held their quarterly meeting in Juneau. Hopefully Chair Dick, you will have a chance to meet with the board at another time.

In March 2010 the State Board of Education and Early Development passed a resolution supporting the Alaska Performance Scholarship (APS) and the opportunities that it will provide for Alaskan students (see attached). The board still supports the resolution as well as the APS. The board is also committed to implementation of the APS through the regulatory process.

There are many students across the state that will graduate in the next couple of months who have been working hard towards achieving the APS and, in fact, have been counting on the APS opportunities. The board would like to emphasize its support of those students, parents and teachers who have been working so diligently towards their goal.

The Board is committed to working with Department of Education and Early Development staff, school districts, superintendents, teachers, home school families and all others to deliver the rigorous curriculum.

If you have any questions or would like to speak with me about the board's support of the APS,

printed on recycled paper

please contact me directly at esthercox@alaskalife.net. I welcome an open dialogue on our support of APS.

Sincerely,

Esther Cox

FISCAL NOTE #1

STATE OF ALASKA
2011 LEGISLATIVE SESSION

BILL NO. HB 105

Analysis

This bill adds 23,181 acres to the southeast State Forest in Southern Southeast Alaska by redsignating certain state-owned parcels. A timber management plan would be developed to actively manage the parcels for higher timber volumes per acre, shorter rotations, and less impact on wildlife. Designation of these parcels as State Forest lands and the development of a timber management plan will allow for long-term management activities, including the thinning of young second-growth timber stands, generally not considered appropriate for undesignated state lands.

Implementation of this bill will not require new positions or funding.

The bill will have no short-term impact to the revenue stream, but will provide for long-term increases in forest productivity and subsequent increased timber revenues.

January 14, 2011

The Honorable Mike Chenault
Speaker of the House
Alaska State Legislature
State Capitol, Room 208
Juneau, AK 99801-1182

Dear Speaker Chenault,

Under the authority of Article III, Section 18, of the Alaska Constitution, I am transmitting a bill relating to the Southeast State Forest. The Southeast State Forest was established in June 2010, under Chapter 112, SLA 2010, in an effort to ensure that State lands in Southeast Alaska that had already been designated for commercial forestry management would be managed as an integrated unit and according to a broader long-term and comprehensive forest management plan. This bill would designate an additional 23,181 acres of commercial forest lands that are conducive to meeting these goals, almost doubling the size of the Southeast State Forest, and further ensuring an appropriate land base for long-term forest management. The lands would continue to be open for multiple uses, including wildlife harvest and recreational activities.

Adding lands to the Southeast State Forest enables the Division of Forestry in the Department of Natural Resources to manage this land to increase long-term timber supply for local processors and wood energy needs, provide near-term jobs in pre-commercial thinning, timber harvest and milling, and retain the land in State ownership for multiple uses.

The bill contains provisions to avoid conflicts with the newly formed City and Borough of Wrangell's land selection and entitlement. Additionally, if new municipalities are incorporated before June 30, 2019, lands that were vacant, unappropriated, and unreserved before establishment of the State Forest will be included in the calculation of the municipal entitlement acreage, but may not be selected.

Alaska's timber industry and energy needs remain top priorities of my administration. This legislation is one important piece of our overall strategy to stabilize and revitalize the timber industry and expand wood energy opportunities in Southeast Alaska.

I urge your prompt and favorable action on this measure.

Sincerely,

Sean Parnell
Governor

Enclosure

Public Briefing: HB 105/SB 44

Additional Lands to Southeast State Forest

Alaska Department of NATURAL RESOURCES

January 24, 2011

DEPARTMENT OF NATURAL RESOURCES -- DIVISION OF FORESTRY

Background. Pursuant to SCSHB 162(RES), the 25,291 acre Southeast State Forest was established in June 2010. These forest lands will be managed as an integrated unit and according to a state forest management plan. While the lands were previously available for timber harvest before the State Forest was established, the State Forest designation ensures these productive forest lands will remain in state ownership and contribute to the long term viability of the timber based economy in southeast.

An additional 23,181 acres of State lands in the southern southeast have been identified as appropriate for inclusion into the Southeast State Forest. The Department of Natural Resources manages over 159,000 acres of uplands in southern southeast Alaska. Timber management is allowed on approximately one third of this land; the State actively manages this timber base to supply wood to local processors. The remaining land is designated primarily for other uses including land sales, recreation, water resources, and fish and wildlife habitat, including over 25,000 acres of legislatively designated state parks, refuges, and public use areas.

Adding lands to the State Forest will ensure that the State's most suitable lands in Southeast remain available to contribute to timber supply through the State's ongoing timber sale program. Much of the State owned timber land in southeast Alaska was inherited from the U.S. Forest Service and is comprised of young, second-growth stands. Actively-managed second-growth stands provide more timber volume per acre on shorter rotations and can result in improved deer browse than unmanaged stands. We can increase timber yield and associated timber supply from state land by thinning these stands. Thinning is a long-term investment and is only justified if the land will continue to be available for forest management.

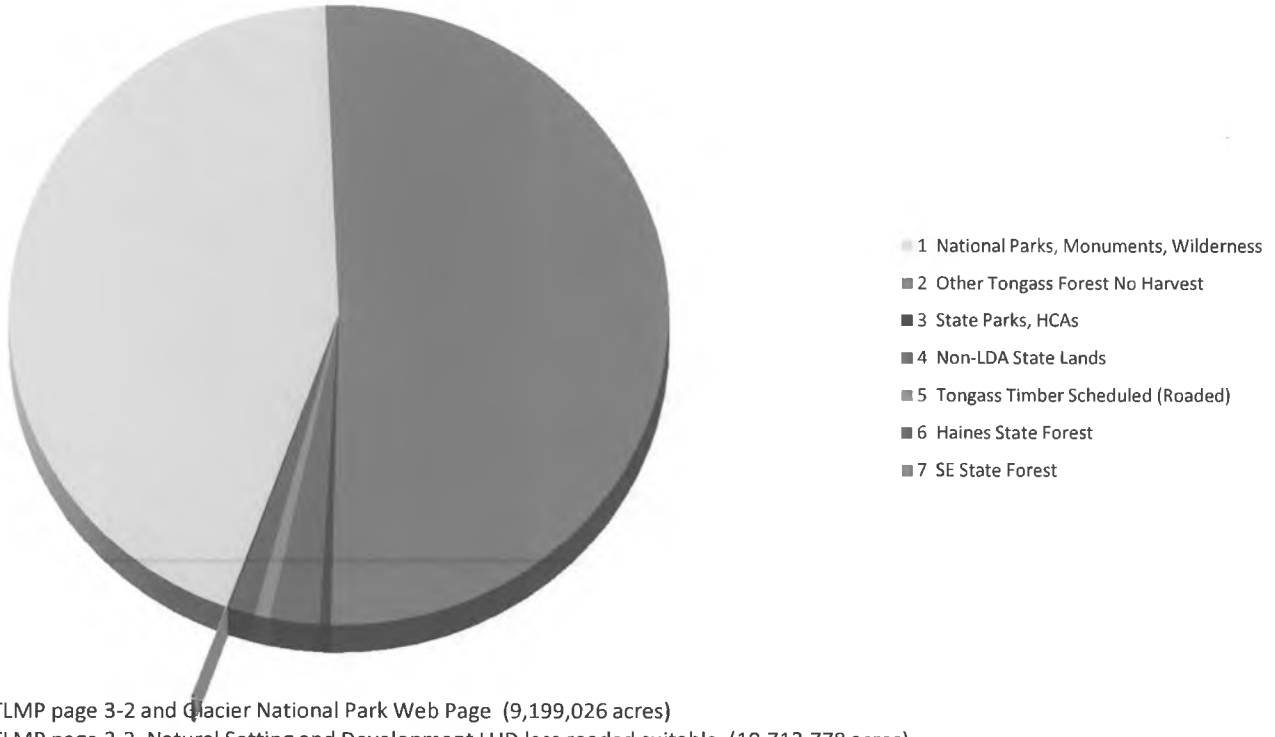
Purpose. This bill would add an additional 23,181 acres of State lands to the Southeast State Forest from lands currently available for timber harvest. The Division of Forestry would then be able to manage the 48,472 acres of Southeast State Forest lands for a long-term supply of timber and retain these lands in state ownership for multiple uses.

Proposed Additions to Southeast State Forest The proposed additions to the Southeast State Forest include 23 parcels totaling approximately 23,181 acres (see chart). Approximately 21 percent of these lands are from six parcels that had previously been reserved pending legislative transfer to the University of Alaska. That legislation did not pass freeing these lands for long-term forest management in the State Forest. The legislation includes general use lands on Prince of Wales, Tuxekan, Gravina, Kosciusko, Revillagigedo, Wrangell, Suemez, Mitkof, Kuiu, Dall, and Zarembo Islands. Six of these parcels are adjacent or near existing State Forest parcels. The Division of Forestry worked with the Division of Mining, Land, and Water to identify and exclude lands that are priorities for the state land disposal program.

State Forest Management. The Southeast State Forest will be managed as part of the State Forest System under AS 41.17.200-.230. Lands in the State Forest will continue to be open for multiple uses, including wildlife habitat and harvest and recreational activities. State Forest lands will be managed consistent with the management intent under the current Prince of Wales Island Area Plan, Prince of Wales Island Area Plan Amendment, and Central/Southern Southeast Area Plan. Changes to management intent would require public and interagency review through adoption of a State Forest Management Plan under AS 41.17.230.

Municipal Entitlements. The City and Borough of Wrangell boundary encompasses five parcels in the proposed state forest additions (St. Johns Harbor, Eastern Passage, Pat Creek, Pat Creek Uplands and Earl

West Cove). A State Forest designation will not affect the amount or location of land the Wrangell Borough can select. That determination is based on the maximum total acreage of vacant, unappropriated, unreserved land in the borough boundaries within two years after the date of incorporation (AS 29.65.030). However, a borough would not normally be able to select land within a State Forest. To avoid conflicts with the Wrangell entitlement, the Southeast State Forest bill specifies that the Wrangell Borough may select State Forest land within the borough boundary.



If new municipalities are incorporated before June 30, 2019, lands that were vacant, unappropriated, unreserved land before establishment of the State Forest will be included in the calculation of the municipal entitlement acreage, but may not be selected.

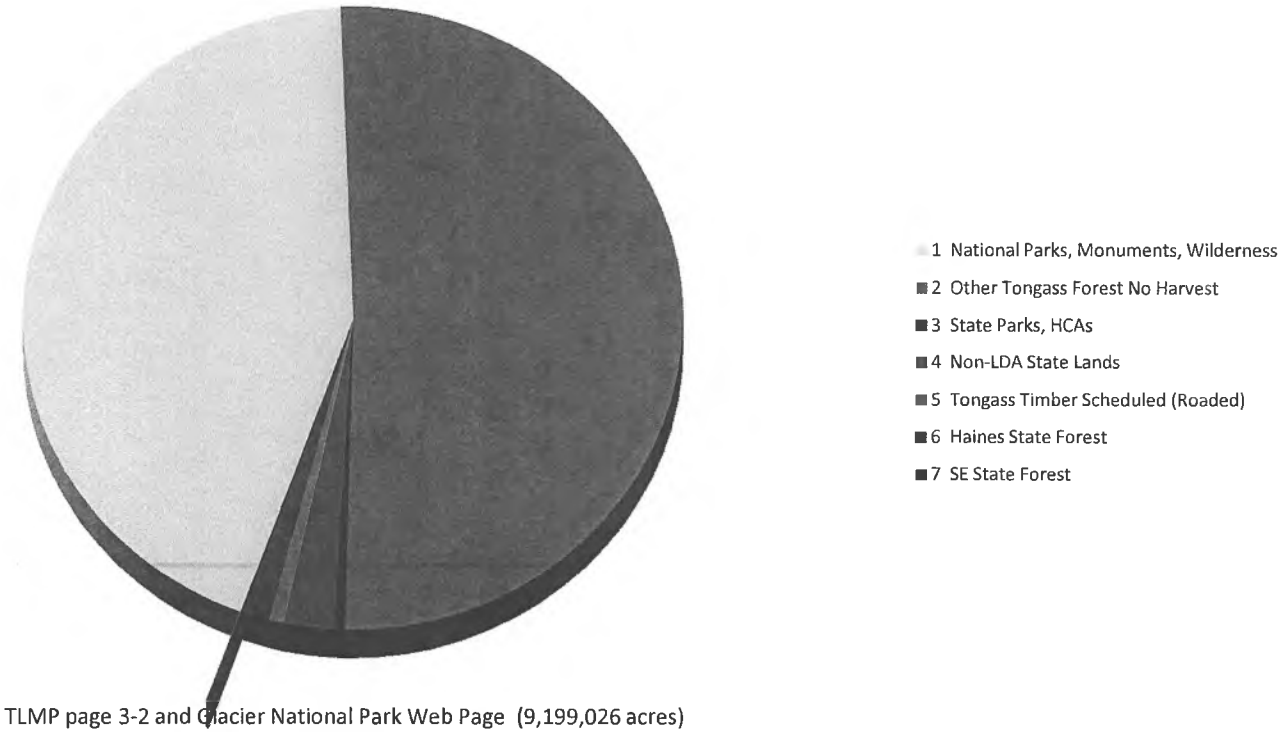
Southeast Alaska Public Land Summary

(21,004,230 acres)



1 2008 TLMP page 3-2 and Glacier National Park Web Page (9,199,026 acres)
2 2008 TLMP page 3-2, Natural Setting and Development LUD less roaded suitable (10,713,778 acres)
3 Per DNR DMLW records including Chilkat Preserve, State Marine Parks and Critical Habitat Areas (110,032 acres)
4 DNR DMLW, excludes Juneau Area Plan which lumps uplands and tidelands together. Excludes selections. (526,103 acres)
5 2008 TLMP, Roaded Suitable, includes old growth and young growth. Table 2-4, TLMP FEIS (144,000 acres)
6 Per DOF Web page (286,000 acres)
7 SE State Forest not including additional SB44/HB105 acres (25,291 acres)

[1] Middle projection series

Source: Alaska Department of Labor and Workforce Development, Research and Analysis Section

through migration is projected to continue through 2034.

The Department of Labor projects stable growth for the Native population through the projection period, from 125,200 people in 2009 to 171,660 in 2034. (See Exhibits 6 and 11.) Additionally, Natives are expected to increase as a share of the state's population, from 18.1 percent in 2009 to 19.9 percent in 2034.

Historical trends for natural increase and interstate net-migration have been relatively stable, so uncertainty estimates were unnecessary for this group. Therefore, the Alaska Native projections are only comparable to the middle series of the statewide projections and can be subtracted from this series to estimate the non-Native population.

Decreasing fertility rates are reflected in the Native share of the total population under age 20. That proportion is projected to decline over the period from 22.4 percent in 2009 to 21.9 percent in 2034. The median age for the population is expected to rise from 25.8 to 29.8 between 2009 and 2034.

[1] Middle projection series

Source: Alaska Department of Labor and Workforce Development, Research and Analysis Section

through migration is projected to continue through 2034.

The Department of Labor projects stable growth for the Native population through the projection period, from 125,200 people in 2009 to 171,660 in 2034. (See Exhibits 6 and 11.) Additionally, Natives are expected to increase as a share of the state's population, from 18.1 percent in 2009 to 19.9 percent in 2034.

Historical trends for natural increase and interstate net-migration have been relatively stable, so uncertainty estimates were unnecessary for this group. Therefore, the Alaska Native projections are only comparable to the middle series of the statewide projections and can be subtracted from this series to estimate the non-Native population.

Decreasing fertility rates are reflected in the Native share of the total population under age 20. That proportion is projected to decline over the period from 22.4 percent in 2009 to 21.9 percent in 2034. The median age for the population is expected to rise from 25.8 to 29.8 between 2009 and 2034.

ENCOURAGING VALUE ADDED TIMBER PROCESSING OF STATE TIMBER

Most state timber made available through state timber sales remains in-state and is processed locally. Over the past six years, of the total statewide timber sale volume of 159 million board feet, just over 8 million board feet, or **5.1%, was exported**. It should be noted that all of the exports have been from the Southern Southeast area, where export markets and local manufacturing markets coexist.

Excluding timber sales conducted outside of the Southern Southeast area, over the past six years, roughly 13% of total timber sale volume was exported. Some of this volume was exported by the mills themselves, as they can maximize sale value by exporting specific logs that command premium prices in oversees markets.

Summary Six Year Sale History SSE Area Office, FY05 - FY10
In thousands of board feet (Mbf) and number of sales

Domestic Sales	54	90.0%
Domestic Volume	54,525	89.7%
Export Sales	6	10.0%
Export Volume	6,262	10.3%
Export Volume by Mills [1]	1,806	3.0%
Total sales [2]	60	
Total Volume	60,777	

1 Note: Export by AK mills in eight transactions as follows:
Viking Lumber, 6 export transactions
Icy Straights, 1 Export Transaction
Western Gold, 1 Export transaction

2 Note: These sixty timber sales made to thirty different Alaska businesses

The most effective method for encouraging value-added timber processing is to provide a steady, reliable, and consistent timber supply. However, in instances where available timber might not be adequate to allow for timber export while meeting in-state manufacture needs, the state has a number of authorities to encourage, under certain circumstance, local manufacture of timber from state timber sales.

Although the U.S. Supreme Court decision in *South-central Timber v. State of Alaska* (available online at http://supreme.justia.com/us/467/82/index.html) imposes restrictions on the state's

ability to require primary manufacture of timber from competitively bid state timber sales, the state has developed criteria whereby primary manufacture requirements can be included in negotiated state timber sales. Of the following timber sale authorities, the 38.05.118 and 38.05.123 statutes can be applied under certain circumstances, namely underutilized manufacturing capacity, high unemployment, and/or high value-added processing. In most parts of the state, competitive sales go to manufacturers because export markets are not viable. In Southern Southeast, log exports are viable alternatives and thus the 118 or 123 authorities are sometimes used to encourage local manufacturing.

DNR Division of Forestry State Timber Sale Types

◆**Competitive sales** (AS 38.05.120)
- No volume limit within allowable cut
- No duration limit
- Requires best interest finding, advertisement, and public notice
- Price determined by auction, but not less than base price
- This is the standard sale type. Use of negotiated sales is limited to the specific conditions listed below.

◆**Small negotiated sales** (AS 38.05.115)
- ≤500 MBF
- ≤1 year duration
- No more than one per purchaser each year
- No best interest finding, advertisement, or public notice required
- Price determined by fair market value appraisal and base price (11 AAC 71.092)

◆**Negotiated sales for value-added products** (AS 38.05.123)
- Up to 10MMBF/yr (100 MMBF total over 10 years)
- Up to 10 years
- Requires best interest finding and public notice
- Restricted to use for local manufacture that includes "high value-added" wood products. By statute, wood chips are defined as a "value-added" product rather than a "high value-added" product.
- Operators must submit a business plan/operating plan for their processing facilities prior to negotiating a .123 sale. Processing facilities must be operational prior to harvesting timber sold under a .123 sale.
- Requires best interest finding and public notice.
- State typically uses RFP process to select winning proposal, especially where there is competitive interest in state resources.

◆**Negotiated sales for areas with high unemployment** (AS 38.05.118)
- No volume limit
- Up to 25 years with reappraisal every five years

- Limited to areas with unemployment ≥135% of statewide average
  - This sale type does not apply in some jurisdictions because their unemployment rates are close to the statewide average)
- Area must have underutilized manufacturing capacity
- Must have underutilized allowable cut or salvage timber
- Requires best interest finding and public notice
- Price determined by fair market value appraisal and base price (11 AAC 71.092)

◆**Personal use sales** (AS 38.05.850)
- Not for commercial use
- No best interest finding, advertisement, or public notice required
- Up to 10MBF per purchaser per year
- Price determined by fair market value appraisal and base price (11 AAC 71.092)

Other Initiatives to Encourage Investment in Value Added Processing

- New Growth Prospectus for Interior Alaska

  This publication provides summary inventory information including annual allowable cut and contacts for State and Native Corp lands in interior Alaska.

- Updated Forest Inventories

The division has been updating forest inventories in Southern Southeast, Tanana Valley, and Matsu valley and will proceed with updates in Haines and Kenai over next few years. Reliable inventory information is critical for investors interested in citing new facilities.

- Credible and Effective Regulatory Structure

The State's Forest Resources and Practices program (FRPA) is a model, credible in protecting public resources while not being overly burdensome on operators. Investors in manufacturing facilities need assurance that they can coexist with other forest users and FRPA helps provide that assurance.

Trends in Value Added Processing

The State's investment in the renewable energy fund is generating widespread interest in developing woody biomass energy facilities for heat and combined heat and power. Energy prices and state investments will spur an increase in value added for low quality wood to meet energy needs. DOF is working with existing timber sale authorities however there may be need for modifications to address the unique needs of these projects that include up to 25 year supply commitments.

Anchorage, AK 99501

BOARD OF FORESTRY

April 4, 2011

Senator Bert Stedman, Co-chair
Senator Lyman Hoffman, Co-chair
Senate Finance Committee
120 4th Street, State Capitol, Room 520
Juneau, Alaska 99801-1182

Dear Senators Stedman and Hoffman,

The Alaska Board of Forestry is pleased to convey its support for Senate Bill 44/House Bill 105 to expand the Southeast State Forest. The Board of Forestry provides a forum to discuss and resolve issues on forest practices and management of forests on state land (AS 41.17.947(b)). Board members represent diverse constituencies – the timber, fishing, and mining industries, Native Corporations, professional foresters and fish and wildlife biologists, and environmental and recreational organizations.

The Board of Forestry was briefed on the concept of state forest additions at their meeting on August 23-25, 2010, on a draft of the bill at the December 13-14, 2010 meeting, and on the specifics of SB 44/HB 105. This land is currently part of the state timber base, but susceptible to future changes in land use designations. Five of these parcels were previously part of the University land settlement. Dedication to long-term management helps sustain the Southeast timber industry and communities, and ensure continued multiple use. It also secures a long-term land base that justifies the investment in thinning to increase the volume of second-growth timber and enhance wildlife habitat.

I am pleased to report that on April 1, 2011 the Board unanimously voted to support passage of Senate Bill 44/House Bill 105.

Sincerely,

Chris Maisch, State Forester

A RESOLUTION OF THE JUNEAU CHAMBER OF COMMERCE EXPRESSING SUPPORT FOR THE PROPOSED ADDITIONS TO THE SOUTHEAST STATE FOREST AS PRESENTED IN HB 105
02-11

WHEREAS, the majority of timber in SE Alaska is on federally owned National Forest land, harvest of which has drastically declined and local mills are heavily dependent on sale of state timber, and

WHEREAS, the state is committed to maximizing the sustainable supply of timber from the small state timber land base, and

WHEREAS, there is broad support for shifting timber harvesting in SE Alaska from old growth to young growth stands, which yield higher volumes per acre on shorter rotations, and have less impact on wildlife, and

WHEREAS, much of the state timber land was conveyed from the federal government with young growth stands, the shift from old growth to young growth harvest can be accelerated by thinning these stands, and

WHEREAS, thinning and subsequent young growth management constitutes long-term investment, it is only justified if the land will continue to be available for forest management, and

WHEREAS, land designated as State Forest would ensure that some land will remain available for long-term management for multiple uses including the supply of timber to local processors, and

WHEREAS, the State owns the parcels of land that are listed in HB105 and are suitable for designation and subsequent management as a State Forest,

THEREFORE BE IT RESOLVED, that the Juneau Chamber of Commerce endorses the establishment of a Southeast Alaska State Forest as currently proposed in House Bill 105 "An Act relating to the Southeast State Forest; and providing for an effective date".

BE IT FURTHER RESOLVED, that the Juneau Chamber of Commerce will transmit this resolution to the Governor of Alaska, House and Senate Resource Committee Chair, Alaska State Legislature, the Alaska Congressional Delegation, the U.S. Forest Service Chief, U.S. Forest Service Alaska Regional Forester.

PASSED AND APPROVED, by the Juneau Chamber of Commerce Board of Directors on this date: February 15, 2011

Representing nearly 400 Business Members

Southeast Conference

February 14, 2011

Southeast Conference is a broad based association of communities in Southeast Alaska with a mission of undertaking and supporting activities that promote strong economies, healthy communities and a quality environment throughout the region. In keeping with that mission we support expanding the Southeast Alaska State Forest....SB44 & HB105.

The timber industry in SE Alaska is on the verge of disappearing as a result of the failure of the US Forest Service to provide a supply of economic timber from the Tongass National Forest. This disaster started with the cancellation of the Long Term Timber sales. The timber sale program went into a decline starting with the cancellation of the long term contracts and continues today. The current volume offered by the Forest Service is less than 10% of the volume offered at the time of cancellation of the long term sales.

The existence of a timber industry in SE Alaska depends on immediate action to provide a supply of economically viable sales. There has been a concerted effort by the State working with the Forest Service to improve the quantity and quality of the Forest Service timber sales. This effort continues but has not resulted in the improvements needed.

Southeast Conference has reviewed Senate Bill 44-which will add an additional 23,181 acres of State lands to the 25,291 acre existing Southeast State Forest established last year. This expanded Southeast State Forest of 48,474 acres will be managed by the department of Natural Resource' Division of Forestry, which has an exemplary record of managing Alaska's forests and related resources.

Southeast Conference commends Governor Parnell and the Alaska Legislature for the establishment of a Southeast Alaska State Forest.

The Southeast Conference is pleased to support SB-44. Enactment of SB-44 will enable the Department of Natural Resources Division of Forestry to sustainably manage the timber, fisheries, wildlife, waters, recreation and other multiple benefits that will strengthen the local economy, provide jobs and improve quality of life of all Southeast Alaska communities.

Thank you for your consideration.

Merrill Sanford
SEC Timber Committee Chairperson

RE: Support of Additional Lands to Southeast State Forest

Dear Chris:

The Alaska Forest Association supports inclusion of an additional 23,181 acres to the Southeast State Forest. The state's timber sale program in Southeast is very small, but very effective. The federal government controls about 94% of the land in Southeast Alaska but they have been supplying only about 20% of the timber that our industry has harvested in the last few years. While State and private timberlands have supplied the other 80%, this has not been sufficient to keep our mills operating. Currently we have only a single medium-size mill still operating in the region along with a handful of very small mills.

Unlike the federal forest management program, the State effort has provided economically viable timber sales on a regular and consistent basis within the constraints of sustained yield principles. In addition to supporting our timber industry the State's timber sale program brings in revenue in the form of stumpage payments that are invested back into the statewide forest management program.

Dedicating more State lands in Southeast Alaska to long-term forest management helps ensure these lands will continue to support the State timber sale program. This helps sustain our remaining timber industry until we can either overcome the impediments that make the federal timber unavailable or until we can persuade Congress to allow the State to own or manage a significant portion of the Tongass. By dedicating lands for long-term forest management the State is better positioned to invest in practices that enhance forest productivity, such as pre-commercial thinning. By increasing the growth and yield from the State Forest, more timber can be supplied to our industry from these lands in perpetuity.

We urge you to support the current efforts to increase the size of the Southern Southeast State Forest.

Sincerely,

Owen Graham
Executive Director
Alaska Forest Association

State of Alaska
DNR-Division of Forestry

RE: State Forest

Dear Chris:

The City of Coffman Cove fully supports the inclusion of additional lands to the State Forest. The addition of 23,181 acres will ensure the future of a small timber industry in Southeast Alaska. The concept of a State Forest is a good management tool to help Southeast Alaska diversify its economy to include timber harvest along with tourism and fishing.

Coffman Cove has a long history as a logging community. While we are trying to incorporate other industries, timber is still an important part of our lifestyle and economy. Other communities in Southeast Alaska find themselves in similar situations. With the shift in US Forest Service management of the Tongass National Forest we find ourselves in a situation where planning for the future is impossible. The establishment of the State Forest will allow some sensible management practices. The additional acreage will ensure there is enough land base to provide some stability.

Please feel free to copy this letter to use in any capacity to support the State Forest. I will write a similar letter to Senator Stedman and Representative Johansen.

Sincerely,

Elaine Price
City Administrator

Mr. Chris Maisch, State Forester
Division of Forestry
550 W. 7th Avenue, Suite 1450
Anchorage, AK 99501

RE: Additional Lands to Southeast State Forest

Dear Mr. Maisch:

The Resource Development Council (RDC) is writing to support the inclusion of an additional 23,181 acres to the Southeast State Forest. This state land in southern Southeast Alaska is appropriately suited for inclusion into the new state forest as it has been consistently managed for timber harvest. A state forest designation over these lands would expand the Southeast State Forest to 48,472 acres and ensure they will remain in state ownership and contribute to the long-term viability of the forest products industry in Southeast Alaska.

RDC is a statewide, non-profit, membership-funded organization founded in 1975. The RDC membership is comprised of individuals and companies from Alaska's oil and gas, mining, timber, tourism, and fisheries industries, as well as Alaska Native corporations, local communities, organized labor, and industry support firms. RDC's purpose is to link these diverse interests together to encourage a strong, diversified private sector in Alaska and expand the state's economic base through the responsible development of our natural resources.

RDC supported the creation of the 25,291-acre Southeast State Forest, which was established in June 2010. In Southeast Alaska, demand for state timber exceeds supply and local mills are dependent on a consistent supply to stay in business. The majority of the timber in Southeast Alaska is on federal land, but federal timber sales have declined sharply. Subsequently, the demand for state timber from local mills has increased significantly.

Much of the new state forest was inherited from the U.S. Forest Service with young second-growth stands. There is broad support for shifting timber harvesting in Southeast Alaska from old growth to second growth stands. The new state forest and the proposed additional parcels to it will help provide a sustainable timber supply to local mills and accelerate the harvest of second-growth timber. Actively managed second-growth stands will provide more timber volume per acre on shorter rotations.

The shift to second-growth harvesting can be accelerated and timber volume increased on state land by thinning these stands. However, thinning is a long-term investment and is only justified if the land will be available for timber harvesting.

The Division of Forestry will manage the state forest for a long-term supply of timber to local processors, and retain the land in state ownership for multiple use, including wildlife habitat and harvest, as well as recreational activities. The forest will be managed as part of the State Forest System in accordance with a new management plan that will be developed within the next three years. In the interim, existing guidance under the current Prince of Wales Island Area Plan and Central/Southern Southeast area plans will apply.

RDC supports the proposed additions to the Southeast State Forest from lands currently available for timber harvest and believes a larger state forest in the region will benefit the economy.

Sincerely,

Carl Portman
Deputy Director

Society of American Foresters
Growing better all the time

January 31, 2011

Alaska, SAF
C/o Maynard Nuss
Executive Secretary
521 High View Drive
Anchorage, Alaska 99515-3716

Governor Parnell
P.O. Box 110001
Juneau, AK 99811-0001

Dear Governor Parnell,

The Alaska Society of American Foresters (SAF) is Alaska's organization of professional foresters and other natural resource scientists dedicated to the sustainable management and protection of Alaska's forests and related resources.

The Alaska Society of American Foresters and Southeast state chapters have reviewed the HB 105 and corresponding Senate Bill 44 – which will add an additional 23,181 acres of State lands to the 25,291 acre existing Southeast State Forest established last year. This expanded Southeast State Forest of 48,474 acres will be managed by the Department of Natural Resource' Division of Forestry, which has an exemplary record of managing Alaska's forests and related resources.

The Alaska SAF commends the Governor Parnell and the Alaska Legislature for the establishment of a SE Alaska State Forest.

The Alaska Society of American Foresters is please to support HB 105. Enactment of HB 105 will enable the Department of Natural Resources Division of Forestry to sustainably manage the timber, fisheries, wildlife, waters, recreation, and other multiple benefits that will strengthen the local economy, provide jobs, and improve quality of life of all Southeast Alaska communities.

Sincerely,

Kathryn S. Pyne,
Alaska SAF, Chair

Cc: Southeast Legislature Delegation; Alaska Congressional Delegation, State Forester Chris Maisch, Southeast Conference, USFS Regional Forester Beth Pendleton, and National SAF.
